DEVOTED TO THE INTERESTS OF SUMMERLAND, PEACHLAND AND NARAMATA

Vol. 13, No. 9 SUMMERLAND, B.C., OCTOBER 1, 1910

Provincial Librarian  
No. 113

## POULTRY NOTES.

Never before in the history of the production of our eggs flesh and feathers has there been so much interest as within the past few months. Local Poultry Associations and poultrymen generally seem to be waking to the fact that there is a future before us. Undreamed of possibilities of the past are being realized at present, and even the very most sanguine of us must be convinced that still better results may be obtained under improved methods.

Our most successful poultrymen in all parts of the Province had proved that, under proper conditions and with careful and efficient management, poultry raising is a paying proposition, a more profitable industry than many others, some of which have been "boomed" for years. But we must accept conditions as we find them and make the best of them. Poultry associations and individual poultrymen have not been given the encouragement they deserve. Those engaged in the business of poultry-keeping have gone through dear experiences and have overcome many obstacles; they have had to work out their own salvation while the government stood aloof and the public were suspicious of possible profits.

But now we enter upon a new era with a broad and promising field before us. The British Columbia Poultry Association was organized for the benefit of every poultryman in the Province, it was organized to strengthen the working power of the local associations; it was organized for the purposes of bringing the government into closer touch with the poultrymen in order that the government might be better able to understand and appreciate their needs.

Work which will be taken up by the Provincial Associations will be of a very broad character, and will cover every phase pertaining to the poultry industry. Its primary object is naturally that of education, to educate the public to adopt improved methods in poultry breeding in order that the returns for the money and labor expended in poultry keeping may be greater than under present conditions. The returns of the poultry keeper should be greater, and one object of the Provincial Poultry Association will be to aid all poultrymen in every possible way.

It will seek to disseminate throughout the Province a thorough knowledge of proper methods of rearing domestic fowls. Its chief aim will be to secure a more widespread interest in thoroughbred poultry. It is also expected that within a year or two it will hold a Provincial Poultry Show, which should prove to be one of the largest and best in Canada.

The following questions will give some idea of the nature of the work undertaken by this new Association:

1. About 90 of all poultry products come from the farm. How can this Association interest the farmers who are now keeping scrub stock in Standard-bred poultry?
2. How can we educate the farmer to produce and care for more and better poultry?
3. Do we need a Standard for market poultry and eggs as well as a standard for Exhibition Stock?
4. What about the adoption of a Utility Standard—as applied to the production, judging and selling of poultry meat and eggs?
5. What can this Association do to encour-

age co-operation in the marketing of poultry products? What are some of the best methods to adopt?

6. Suggestions concerning the selling of cold storage eggs and poultry meat as fresh products. Imported eggs are also sold as fresh eggs.

7. Cheaper and better grades of feed?

8. Suggestions regarding the arrangement of our Annual Poultry Shows into circuit which will allow of the securing of the most competent judges for all Shows at minimum expense.

9. Revision of Prize Lists. Why not adopt a "sliding scale", i. e., the prize money to be in proportion to the entries?—number of entries also controlled by number of exhibitors. —Are cash prizes the means of stimulating healthy competition. Are not ribbons and cups of greater value in encouraging healthy competition, and will they not tend to more readily establish our annual poultry shows as educational and advertising features rather than as at present where birds compete for petty cash prizes?

Everyone interested in poultry should become a member of the Provincial Poultry Association. Membership may be secured by the payment of an annual fee of \$1.00, addressed to the Secretary, M. A. Jull, Victoria, B. C.

There are three important reasons for becoming a member.

1. Those who join will help in building up the business of breeding, making better the business of producing pure bred poultry, and increasing the demand for these products.

2. The Association doubtless will lead in a movement to place poultry production on a more economical and better basis, and thus produce better conditions.

3. The publications of the Association alone will much more than repay the cost, as from them the breeders will learn many new things helpful in their own lines of breeding. There will shortly be published the first annual report of the Association, which should be in the hands of all the poultrymen of the Province. This will contain all the proceedings of the Convention which was held in August at the time of the Vancouver Show as well as many valuable articles from the leading poultry experts and authorities throughout America. It will also contain a directory of the poultry breeders of British Columbia. This directory will contain the names and addresses of all poultry breeders who are members, with the varieties and the breeds of fowl they are breeding. This directory alone should be worth much more than the annual membership fee, as in this way poultry breeders throughout the Province will be brought into close touch with one another.

The Successful Poultryman is the official organ of the B. C. P. A. Membership for the directory should be in not later than October 1st, as the report is then going to press, and any members who are desirous of having their breeds of fowl entered in the directory must do so before the 1st. of October.

Norman E. Phinney, who for some time has been working in Greenwood, was in town during this week. He has accepted a position with Megraw's Store at Vernon, commencing on the first.

## SAVING ELECTRICITY.

Tungsten lamps are coming to the front because they save electricity. In appearance their only difference from the ordinary carbon filament incandescent lamp is that the filament is constructed of tungsten instead of carbon. But in actual use, it has been proved that they use only one third as much current as a carbon lamp to produce the same illuminating power. True, their first cost is greater (approximately three times as much,) but this is counterbalanced by the saving in current effected. They have one weak point, however. That is the ease with which the delicate tungsten filament is broken. On this account great care has to be exercised in installing them, and it is for this reason, too, that they cannot be economically used as portable lamps. Yet, when carefully handled, they have a long lease of life. In England, where they are used much more extensively than here, it is quite common for them to last 3,000 hours and one instance is no record where a tungsten lamp burned continuously for over 15,000 hours. Even when allowance is made for more frequent breakage, the tungsten lamp shows a great saving over the carbon of about fifty per cent. That is an economy not to be despised and points to much greater use for stationary lighting purposes.

## ROSS RIFLE AND QUEEN'S OWN.

"Don't let that rifle down so hard. You'll break the toy."

They are actually speaking of the famous Ross rifle. This rifle has been proved to be a mere toy, and it is likely when the Queen's Own arrive home again there will be no Ross rifle, but just a twisted bit of steel and a cracked stock. The rifle which previously had been lauded frightfully, is not serviceable. The officers ridicule it and the men curse it.

The first week in England has found the rifle in a terrible state. The barrels in some cases are rusty on account of damp weather. The intricate sights are twisted and altogether they hardly bear the appearance of a real rifle, but resemble the wooden variety that young children play with the first week after Christmas.

Practising the attacks put the rifles on the rocks, so to speak. Concealing behind trees or rocks and falling on terra firma with a thud scratches stocks and twists sights. There is hardly a rifle in the regiment that is not damaged somewhat. Oil in big quantities seems to be of little use to preserve it.

The Ross rifle may be O. K. on the ranges, but in the ordinary military work, manual training, skirmishing, scouting, attacking and so forth, it falls far short of requirements.

A soldier's hand is unprotected when handling the weapon. All the Queen's Own Boys bear gashes on their hands as a result of having them caught on the sharp edges of some of the parts of the rifle.—The Toronto Evening Telegram.

Miss Hobbs who has been in charge of the Trout Creek School, has been transferred by the School Board to the Central School.

SEPTEMBER "ROD AND GUN."

With the opening of the bird shooting season the September number of "Rod and Gun in Canada," published by W. J. Taylor, Limited, Woodstock, Ontario, gives a number of delightful stories dealing with days amongst the ducks, geese, woodcock, and prairie chickens—experiences which will cause many a thrill to sportsmen reading them. Numbers will be able to duplicate, in remembrance, many of these published experiences, and in this way live over again red letter times in their histories. Variety marks this production, every lover of the outdoors, whatever his particular taste, receiving attention. The story of two young moose, one of a pet raccoon, the efforts of an amateur to trap a bear, particulars of the American bison, the Alpine Club's last camp and some dog lore show the manner in which the magazine covers the wide variety of Canadian outdoor life. The verses in this number are excellent, and the Bohemian ring of "Fishin's Good" will find an echo with many even of the most staid. "My Little Fisherman," with his wonderful story of the monster that got away appeals to the sympathies of all, while the "Evening Chorus" is equally good. The issue should be found with every shooting party this season.

STILL GROWING.

It has been found necessary for us to install a typesetting machine to be sufficiently equipped for the growth of business. This is yet another of the many good signs which signify that Summerland is going along steadily but surely, to her ultimate goal—a huge flourishing fruit district.

The cut printed here is an illustration of the particular machine which we have now working in our office. It is a Typesetting machine that by working a keyboard, similar to a typewriter, levers are put into motion which force type onto a revolving disk, and they gather in their correct order immediately in front of the operator. When the type has been printed, it is placed back into the machine by means of an automatic loader, and the type, by an ingenious system of wards, drops down, each letter in its respective place.

We shall be pleased to show anyone who may care to come, this new machine. It is the only one of its kind in the Dominion and is entirely different from any other machine which takes the place of the compositor.

Mr. T. Dale has just received two pure bred Berkshire pigs from F. M. Brown, a well known breeder in Manitoba. Being of the best stock they are eligible for registration in United States and Canadian Herd Books.

AUCTION.

On Saturday, October 8th, 1910, at 1.30 p.m.  
The valuable

Live Stock & Implements

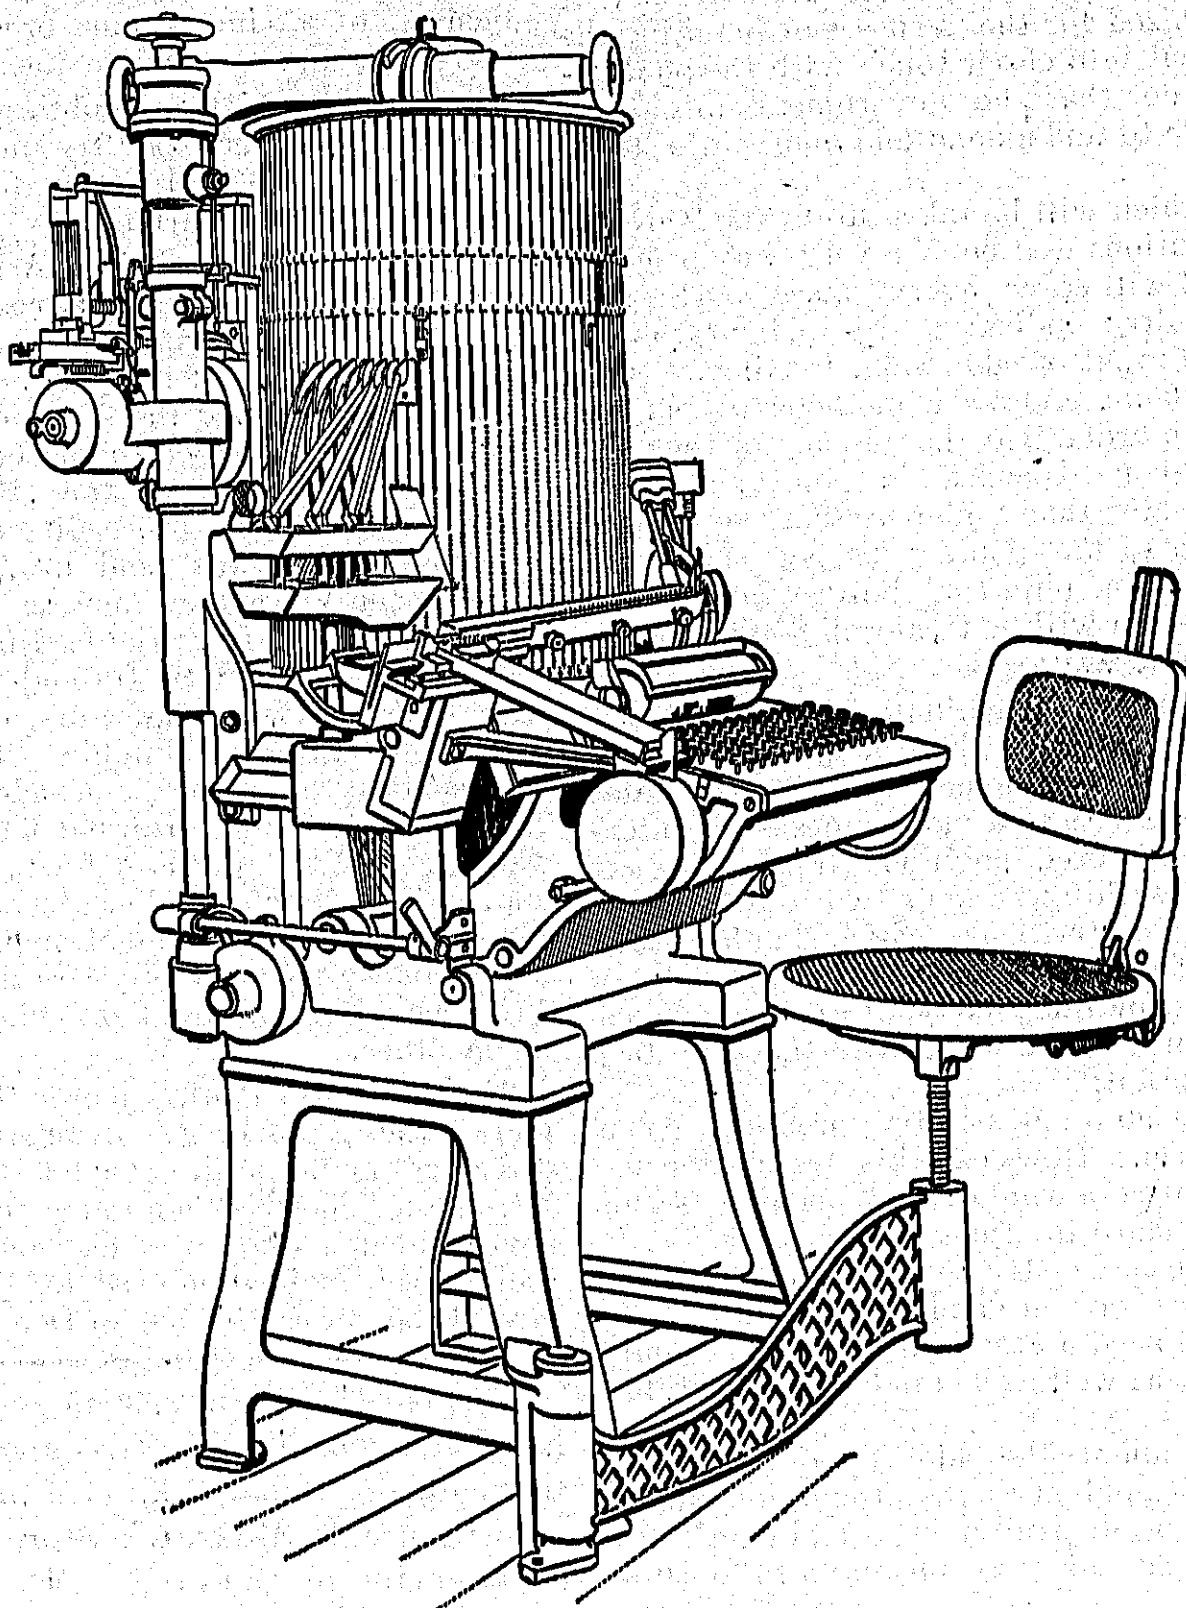

Of Messrs. JOHN and MAGNUS TAIT, also other Live and Dead Stock, Will be Sold by Auction, without reserve, on the land adjoining Messrs. Shields & Hatfield's Blacksmith's shop on the Lake Front.

CATALOGUE.

- |                                      |                                     |                                 |

| 5 Basin, muffin tins, and spoons.    | 22 Cross cut saw.                   | 40 Two wheel cart.              |
| 6 Tea kettle.                        | 23 Canthook.                        | 41 Set Team Harness, new.       |
| 7 1/2 doz. tablespoons and 1/2 doz.  | 24 Logging chain.                   | 42 Do., do. good repair.        |
| teaspoons.                           | 25 Sledge and wedge.                | 43 Set single harness.          |
| 8 1/2 doz. each knives and forks.    | 26 Wheelbarrow.                     | 44 Acme cultivator.             |
| 9 Two tin milk pans and four         | 27 Spramotor spray pump, with       | 45 One horse cultivator.        |
| bread pans.                          | attachments.                        | 46 Set harrows.                 |
| 10 Carving Set.                      | 28 Sorrel gelding.                  | 47 Disc harrow, 8 discs (light, |
| 11 Tub and washboard.                | 29 Bay mare.                        | good for orchard work).         |
| 12 1/2 doz. cups and saucers and 1/2 | 30 Milking cow.                     | 48 Fleury plow.                 |
| doz. plates.                         | 31 Two year old heifer, calf to     | 49 Single horse plow.           |
| 13 Teapot and sugar bowl.            | Jersey bull.                        | 50 Team scraper.                |
| 14 Lantern.                          | 32 Two pigs, four months old.       | 51 Cyphers incubator.           |
| 15 Pair of pillows.                  | 33 Do., do.                         | 52 Cyphers brooder.             |
| 16 Mirror.                           | 34 Four hives of bees, all in first | 53 Garden seeder.               |
| 17 Stretcher.                        | rate order to go through winter.    |                                 |

Lots 1-17 are all NEW and form a fairly complete bachelor outfit. Further entries for this sale can be made to

CHAS. H. CORDY, Auctioneer.

## The Summerland Review

### TORONTO EXHIBITION NOTICES.

#### BRITISH COLUMBIA EXHIBIT A MARVEL IN FRUIT PRODUCTION.

#### Opportunities for Diversified Farming Appear Practically Unlimited.

British Columbia's showing at this exhibition is again a leader among the provincial displays and bids fair to become the greatest advertisement that progressive and fast developing province has yet sent out.

It is in the horticultural building, Toronto exhibition, occupying one of the northern wings. The exhibit displays a wealth of decorative art, and it would be well worth your while to pay it a visit.

British Columbia has an area of 395,000 square miles, or 252,800,000 acres, and has a coast line of some 7000 miles. The population is estimated to be about 260,000, and is increasing with surprising rapidity. The province is so situated that it is bound to develop into one of the great trade centers in Canada. The fact that within the last four years its trade has increased over nineteen million dollars, shows the enormity of its growth, which is sure of advance.

The natural resources of that province are unlimited. Its fisheries have an average yearly yield of one hundred and fourteen million dollars, and are considered one of the most important in the world. Its mineral wealth has amazed the entire world, producing as they have over three hundred million dollars. The forests of this western province of ours have an annual yield of twelve million dollars.

The opportunities for profitable diversified farming are practically unlimited. The demand for every product of the farm is great and ever-increasing, the present supply being wholly inadequate for the local market.

Under a system of small land holdings with diversified field culture, every object of cultivation is highly profitable, because produced by labor that might otherwise be unproductive.

Grain of all varieties is grown over a large area, which consists of the Fraser Valley, Okanagan, Spallumcheen, Kamloops, and the Thompson River district.

British Columbia fruit is preferred above all others in the markets of the middle west, where it commands profitable prices.

In 1904 a small exhibit sent to England was awarded the gold medal of the Royal Horticultural Society, in 1905 a car lot exhibitor in London won the first prize from all competitors, while no less than eight medals were awarded the individual exhibits which made up the collection. Again, in 1906, 1907, and 1908, collections of British Columbia apples won the gold medals of the Royal Horticultural societies of England and Scotland, and several silver and bronze medals were awarded to individual British Columbia fruit growers. In 1909 the province was, for the fifth time, awarded a gold medal by the Royal Horticultural Society, four silver gilt and three silver medals being won by individual exhibitors. This was the largest exhibit so far sent from British Columbia, consisting of 480 boxes, or about twenty tons of fruit, which made a splendid display.

Most people are aware of the big timber that is to be found in British Columbia, but one requires to see for oneself in order to thoroughly realize the stupendous nature of the trees themselves. In the exhibit at the Toronto exhibition the British Columbia government shows a large round cut from a B.C. fir which measures 74 inches in diameter. The tree from which this mammoth block was cut was over three hundred feet in height, and probably six hundred years old. A B.C. spruce is also shown, which is 67 inches in diameter. There are also square sawn blocks of fir which measure 40 inches each way. A block of B.C. cedar measures 58 inches in diameter, and a square sawn block of the same wood which is 42 inches each way. A fine large square sawn block of B.C. spruce measures 44 inches each way. This mammoth timber is really marvellous, showing as it does the immense size to which fir, spruce, and cedar grow in British Columbia. The exhibit also contains a large number of fine photographs of standing timber, showing the stupendous size of the trees. The British Columbia exhibit is in charge of Edward Bullock Webster, exhibition commissioner for the province of British Columbia, who will be pleased to explain the natural advantages of this great province to anyone desiring information. Your visit to the exhibition will be incomplete unless you have examined this attractive display.—Hamilton Herald.

WANTED by Municipality of Summerland a capable man to run gasoline engine. Applications, stating wages required, will be received at the Water Commissioners Office, West Summerland.

FOR SALE—A  $\frac{3}{4}$  Jersey Cow, due to calve latter part of February. Apply to H. Phinney.

### News from Peachland

Mr. and Mrs. John McLaughlan spent Thursday in Kelowna.

Mr. J. Porter of Moose Jaw has been visiting his old neighbor Mr. Geo. Keyes for a few days.

Mr. J. A. Morrin has bought a car load of apples and is having them packed ready for shipment to Phoenix.

Mrs. C. J. Kennedy and Miss Lily McTavish left for Vancouver last week, the former en route for Chicago, via San Francisco, the latter returning to her home in Vancouver.

The Townsite and Irrigation Company are putting in a dam across the outlet of a large lake up the north fork of deep creek, to ensure a plentiful supply of water for next August.

Quite a number of people attended the Kelowna Fair last week, and a good many prizes for fruit and poultry were secured. Messrs. S. F. Callendar and Willie Dawson were the successful ones.

A couple of shooting parties spent a few days in the hills last week, but failed to secure any game. The fine weather of the past month has allowed the deer to remain back in the higher hills.

Mr. J. P. Roberts, manager of the Northern Crown Bank at Vancouver, was in town last week looking over the place with a view to establishing a branch of his bank here. He was pleased with the outlook and decided to report favorably to the directors of the bank.

Mr. Carl McTavish who has been spending the summer at the home of his cousin Mrs. C. G. Elliott, left for his home in Vancouver, Thursday morning to resume his studies at McGill. During his stay here he acted as organist at the Methodist Church, and at the conclusion of the practice last Friday evening, he was given the 'sack,' which, when he opened he found it contain \$15 in gold. He has been in both war canoes and carries away six medals as souvenirs of his summers' paddling.

Mr. Harry Logan, another college lad, who has also spent his holidays with his parents here, set out on Wednesday for Winnipeg. Mr. Logan is entering his junior year in the arts course in Manitoba College.

SLABS—The Summerland Lumber Coy. will deliver Slabs for \$3.00 per cord. Before drawing any away apply J. R. Campbell, manager.

## W. RITCHIE,

DEALER IN

### All Kinds of Lumber.

Windows, Doors, Lime, Cement,  
Shingles, tc.

Also a Stock of Buggies and Democrats.

Yard: Parkdale.

BROWN 8

**Local News Items.**

A full box of strawberries was brought to the office this week, which were grown on Mr. Holder's lot on Siwash Flat.

R. H. English has still a few tons of J. Y. Griffin's well-known and effective fertilizer on hand. To clear same he will make a reduction on ton lots of \$5.00.

At the evening service in Methodist Church on Sunday Rev. Jas. Hood will preach a special sermon on "20th Century Church Problem, Why Men do not go to Church." The message will be of special interest to men.

At the Kelowna Fair last week "Forest Fire," the splendid hackney stallion owned by Summerland Hackney Association achieved great feats. In his class he took first, and as the best horse in the whole show he won the sweepstakes. "Forest Fire" was the centre of an admiring crowd, and the recipient of many bouquets.

St Andrew Sunday School at West Summerland will hold the annual Children Day Service in the School House on Sunday morning, October 2nd., service commencing at 11 o'clock. The Preaching and Sunday School Service will combine on this occasion. A beautiful order of service has been sent out by the General Assembly which should be of interest to all. Everybody welcome.

B. T. Boies asks us to make the following correction. Through a mistake last week, Mr. Boies was credited with the packing of the peaches for the T. Eaton Company car, instead of which the fruit was packed by the packers of the Okanagan Fruit Union at the lake points. Mr. Boies was at the Landing at the loading of the car, and reports a very fancy car of fruit.—Vernon News. Why does not Mr. Boies say that the car was packed at Summerland?

George Ross, who has been in charge of the Summerland C.P.R. Station and Express Office since its inception about two years ago, has been transferred. At present he will work as relief at Armstrong, after which he goes in the Operating Department in the Mountain Division. Mr. J. Macpherson has now charge of the station here. He comes from Alberta to here, and has been getting acquainted with the work of this station during the last few weeks.

### MANUFACTURERS CONVENTION.

The recent convention of the Canadian Manufacturers Association at Vancouver is expected to be of great benefit to the country from the standpoint of the Western consumer. It has given these Eastern Capitalists an idea of the great resources of the West both as they can be applied to the manufacturers and to the marketing of their wares. Their stops along the way during their trip out were put to good use by hearing suggestions from those who know local needs and conditions, and men who have studied these needs as applied to the entire West. That they, as a body, will be helped by these suggestions, whether they act on them fully or not, goes without saying, and the day may be dawning when we will have the Canadian manufactured article taking the place of the cheaper American product. It is certain that any Canadian in this western country prefers to buy the Canadian article when it suits his purpose as well as the foreign, if he can get it as cheap or cheaper. We may even go a little further and say he will buy it when it is not so cheap but reasonably close in price.

The Association declared for Protection as was expected of them, but have agreed not to publish their propoganda until Parliament meets. On this high tariff they seem to base their hope of a western market. Whether they are right in this or not, the case stands at present that the American manufacturer is favored by a lower freight rate, due to short haul, and despite the high duty can place his manufactured product here cheaper than the Eastern Canadian. The remedy for this lies in the

establishment of factories in the west. We have the natural resources, cheap power, in natural gas, hydro-electric plants, and cheap coal and shipping facilities that cannot be surpassed. Let the slogan of the west become "No long haul, but the factories in the West!"

### CORRESPONDENCE.

We do not hold ourselves responsible for opinions expressed by correspondents.—Ed.

The Editor, Summerland Review.

Dear Sir,

Is it not about time something was done to make the Pound regulations a good deal more strict, also to enforce them. On Friday 23rd, I pounded two heifers which were trying to break through my gate. On Monday the same two heifers were wandering on the road. The council, I believe, are supposed to look after the interests of the ratepayers. I should have thought that the damage done recently on Trout Creek would have been sufficient to show them the necessity of immediate action, or are we to wait till more damage is done to our orchards, out of the revenue from which we are expected to pay taxes. I am yours truly, C. G. HUDDLESTON.

### PRACTICAL PITY.

Dear Sir—

"Don't pity a man without pulling him out," runs a piece of advise from the land of stars and stripes. And, as usual, our Yankee cousins have "hit the nail on the head right away" in as few words as possible.

It is indeed of little use to pity anyone with out attempting to help him, or to bewail the state of affairs in general without at least one good try to put them right. People are rarely much strengthened or comforted by that variety of compassion which stops short of the helping hand, or, at least, the friendly endeavor to lend it. On the contrary, it annoys them, they would far rather you kept your pity to yourself. Pity only helps if it goes a step further, and becomes sympathy as well. Sympathy implies fellow-feeling, and fellow feeling means fellowship, which, in turn, is inseparable from the helping hand.

Do you know the pious pitier? Have you met him—or her? The long-face and sanctimonious person who casts up his eyes and says he is sure "it must be very dreadful, but there, we all have our troubles, and you must bear yours". He doesn't intend to lift a finger for you, or say one word of real sympathy and encouragement, oh dear, no! At the bare thought of such a thing he will reach for his hat and hurry off, leaving you to infer that he has a lot of troubles of his own to attend to, and that they are a great deal worse than yours.

Don't be a futile passive pitier. Be actively sympathetic. If you are sincerely sorry for the troubles of your fellow creatures, you will do your best to lighten them, and you may be able to remove them altogether. There are several things you can do for a man when he

is in trouble.

You can show him he has a friend in you. You can prove that by acting like a friend, and you can try to cheer and encourage him. Let your pity be practical, and it will be of some use in the world. A passive pity is but the Compassion of a coward.

A. Reader.

### MARKET REPORT.

Extracts from Commissioner J. C. Metcalfe's Weekly Bulletin.

Regina, Sept. 12th.—I saw a car of mixed fruits that arrived here for the Mac Pherson Fruit Co. from the Okanagan Fruit Union, Vernon. It was composed of a great number of varieties of both Plums and Peaches, some of the varieties were a little over ripe, but quality was good, and well packed. I also saw part of a car of apples from the Victoria Fruit Growers' Association, Victoria, in the same Company's warehouse, the King's and Duchess were showing rot to some extent. The quality of apples were poor, packing below the standard, and graded too high, did not seem to be properly matured from some cause. It is far better to mark a good No. 2, rather than a poor No. 1. I also saw a car of mixed fruits, mainly Prunes, from Hatzic, B. C., that arrived here on the 9th. for the Vernon Fruit Co., was shipped on the 2nd., seven days in transit.

The following are jobbers quotations to retailers to date, Sept. 1th:

B. C. Apples, per box	\$2.25
Ontario " " Bbl. NO. 1	6.00
" " " " NO. 2	5.00
B. C. Pears, " box	3.50
" " Peaches " "	1.00
American " " "	1.00
" " Prunes, in Peach Box	1.15
B. C. " " " "	1.15
B.C. Plums, in 4 basket crate from lower mainland	1.00

Saskatoon, Sept. 14th.—Northern Fruit Co., here report having had 19 car loads of Plums, Prunes and Peaches this season, of that amount placed 4 car loads in North Bartford and stated further that they were highly pleased with the large fruits they had handled from B. C. this season, to date. Had three cars of Italian Prunes and two cars of peaches standing on siding then, but were short on crabs, Pears and Apples.

Early and Co., jobbers here, report they have not been able to obtain a sufficient supply of B. C., fruit.

Had two car loads of American Peaches on siding now, and two car loads of Prunes and apples rolling from Wenatchie, cost f. o. b. point of shipment, 80 cents per case for apples assorted varieties, 4 and 4½ tiers. Prunes, 50 cents in peach boxes. He further stated he would like to buy and handle more B. C. fruit if it could be obtained from the Growers and shippers.

Prince Albert, Sept. 15th.—There are no jobbing houses located at this point, dealers are supplied from outside jobbing houses and very little fruit comes in direct from growers with the exception of small fruits which come in by express and in limited quantities, but there are a number of large retailers here who buy fruit in car loads, Hanville & Co., Rogers & Co., Coombs & Co. The latter firms had just received a car load of mixed fruits from the Grand Parks Co., car arrived in excellent condition, packing, grading and quality of fruit was very good, and dealers and consumers pleased with it. In retail shops, I saw

# The Summerland Review

quotations from American points prices are much higher than when wired unsolicited. Pears and Crabs are firm and in great demand. American Prunes have come in freely to these points, in peach boxes, and although retail prices were cut very close here jobbers have been paying f. o. b. American shipping points for prunes in peach boxes, 50 cents and 55 cents per case. I would advise shippers holding to fair prices of Fall and Winter stock, particularly Winter, and more especially if stocks are not heavy, pack and grade thoroughly. There is a disposition on the part of some shippers to mark grade too high, especially in marking fancy, forgetting that fancy is practically perfection on all points, quality, size, and colour and pack, and this applies to crabs as well as apples. The Dominion Fruit Inspector has no power or authority to re-mark grade on boxes from what they are marked by shippers, but he has power to erase the grade if not in conformity with the act and brand falsely marked. It will be well for our growers and Shippers to bear this in mind and raise the standard of their pack, rather than lower, as we are certainly establishing an enviable reputation on B. C. fruit at the present time all over these Provinces, and this reputation, if sustained and advanced on our fruit products will certainly create an increased demand for them and command the highest market prices. At the same time our shippers must not forget the competition they have to meet from the American Pacific Coast Stations and the effort being put forth by them to reduce the cost of production in every way and their earnest endeavors to grow and raise the standard of their fruit products by the latest and most up-to-date methods.

(Signed) J. C. Metcalf,  
Commissioner.

H. P. Lee informs us that a great number of enquiries are coming in about the apple shipment which will be sent to the Old Country about the first of November. He wants everyone who has friends in England, Ireland, or Scotland to get in touch with him and send a box or more home. The cost will be something in the neighborhood of a dollar a box. These will be shipped as a carload, then distributed at Liverpool to their different destinations. —Vernon News.

We note that the Vancouver Apple show the fruit is to be exhibited on an incline of 45 degrees. This is far too much as the fruit in many packs will not stay in the boxes 30 degrees is ample. At the Spokane Fair 45 was used, and many exhibitors built a stage of their own on the 30 degree basis. It would be well for the exhibitors to take this matter up and see if they can't prevail on the executive to alter their present arrangement.

## STAGES OF LIFE.

An unknown correspondent sends us this interesting phhcoogical study of the growth of the child's mind: "At ten the boy thinks his father knows everything. "At fifteen he thinks he knows as much as his father does. "At twenty he thinks he knows twice as much as the old man knows, or ever will know. "At thirty five he condescends to ask his father's advice. At fifty he's where he was at ten—he believes the dear old chap was the wisest man in the world."—Toledo Blade

## The Summerland Review

### CANADIAN NATIONAL APPLE SHOW.

The world is going to be influenced largely in its opinion of the horticultural resources and possibilities of Canada, and more particularly of the Province of British Columbia and of the Pacific Northwest, by what is to be seen at the first Canadian National Apple Show to be held at Vancouver, October 31st to November 5th, inclusive, and the world's judgement is not going to be a disappointment for the exhibition promoters, because any and all districts which are growing apples will be represented at the Big Show.

The great apple exhibition will be housed in the Vancouver Horse Show Association building near the north entrance to Stanley Park, and a large temporary structure covering all of Alberni Street for a distance of a block. The buildings will have a grand total of 98,640 square feet of floor space.

The public will have easy access to the buildings which can be reached by the Pender, Robson, and Davie Street car lines.

Within the charming circle of the apple hosts will be stationed upon a raised platform the 48th Highlanders' Military Band of 40 pieces, the most famous band of Canada, and one of the leading bands of the world. This great musical organization has been secured by the management exclusively for the First Canadian National Apple Show at an initial expense of \$5,000. The band will come direct from Toronto, Ontario, to Vancouver, and will return direct to Toronto without playing concert engagements at any intermediate point.

The carload exhibits and plate displays will be housed in a temporary building to be erected on Alberni Street. This building will be 300 feet long, and longer if required. The carload exhibits will be arranged on a 17 feet incline of 45 degrees around the four walls of the building.

Tables six feet wide will occupy the centre of the building, and will extend its entire length. They will be specially constructed stair tables for the display of the plate exhibits, having three twelve inch treads with two four inch risers on each side. This arrangement, with a building fifty feet wide, will give a passage way on each side ten feet wide. Allowing thirteen feet at each end for passage way the plate display table will be 250 feet long. Using ten inch plates this immense table will accommodate 1800 plates of apples. There are five apples to each plate, consequently

a grand total of 9000 apples will be on display on this table, or enough for a half apple to each boy and girl in Vancouver. These apples will be the finest grown, and it is safe to say will average throughout three inches in diameter. If they were all placed in a single row touching one another the little boy or girl starting with the first apple would have to walk five and one ninth miles to reach the last apple in the row.

Suppose a greedy little boy could eat six of those big apples each day, it would take him four years, one month, and ten days to eat all of the apples in that row.

It is estimated by the Secretary of the First Canadian National Apple Show that there will be 21 carloads of apples exhibited at the big exposition. The exhibition rules require 600 boxes for a car, hence there will be a grand total of 12,600 boxes of apples on display. A box of apples is approximately 20 inches long.

There are 36 to 225 apples in a box, according to size and the manner in which they are packed. The average would therefore be about 130 apples to each box, or a total of 1,638,000 apples in the entire show. These apples will average about two and one quarter inches in diameter, and if they were placed in a single row it would be 698 miles long.

The owners of these apples will receive \$25,000 in prizes or nearly two dollars per box. After the show is over the apples will sell readily at two to five dollars per box, say an average of \$3.50 per box, or a total of \$44,100. Therefore the exhibitors will receive approximately \$70,000 for the apples exhibited at Canada's First National Apple Show.

Now then, suppose that a greedy little boy who lives in London should ask his papa to buy all of these apples, how much would it cost his papa at a shilling apiece, and how long would it take that little boy to eat all of them, eating six apples a day?

The First Canadian National Apple Show management will give a season ticket entitling the holder to two admissions daily to the first 100 school boys and school girls of Vancouver who send in the correct answer to the above problem, and a prize diploma to the Vancouver school whose pupils send in the most correct answers. Each contestant must give name and age and name of school of which he or she is a pupil.

A similar offer is made to the school boys and school girls of Victoria, and to the school boys and school girls of British Col-

umbia, living outside of Victoria and Vancouver.

The answers must be addressed to Canadian National Apple Show, Room 7, Winch Building, Vancouver, B.C., and on the lower left hand corner of the envelope must be the words "Vancouver Contest," or "Victoria Contest," according to the home of the little boy or girl. Those living outside of Victoria and Vancouver will simply write the word "Contest" on the envelope.

A handsome souvenir cane and pennant will be given by the Salmon Arm, B.C., Fruit District to each and every contestant sending in the correct answer. The answers will be arranged alphabetically as to name of contestant, and the pennant-canes distributed at the Horse Show building during the entire week of the National Apple Show. Any little boy or little girl who has sent in a correct answer may get the prize at the Horse Show Building at any time during the week of the Apple Show. All he or she will have to do will be to announce his or her name to the "Apple King," who will be there for the purpose of distributing canes.

All answers must be received at the Secretary's office, Room 7, Winch Building, on or before October 7, 1910.

### Water Notice.

NOTICE is hereby given that an application will be made under Part V. of the "Water Act, 1909," to obtain a license in the Osoyoos Division of Yale District.

(a) The name, address and occupation of the applicant is Charles Hagarth Whellams and Paul Amos Smith, Shingle Creek, B. C. Ranchers.

(b) The name of the lake, stream or source is June Creek, being a tributary of Shingle Creek.

(c) The point of diversion is near North line of applicants Pre-emptions Claim, No. 5965, in Group 1, Osoyoos.

(d) The quantity of water applied for is two cubic feet per second.

(e) The character of the proposed works is a dam, ditch and flume.

(f) The premises on which the water is to be used is Pre-emption Claim No. 5965, in Group 1, Osoyoos.

(g) The purposes for which the water is to be used--Irrigation.

(h) If for irrigation describe the land intended to be irrigated, giving acreage. Pre-emption Claim No. 5965, in group 1, Osoyoos,--320 acres.

(i) Area of Crown land intended to be occupied by the proposed works--None.

(k) This notice was posted on the 17th day of September, 1910, and application will be made to the Commissioner on the seventeenth day of October, 1910.

(l) Give the names and addresses of any riparian proprietors or licensees who or whose lands are likely to be affected by the proposed works, either above or below the outlet--None.

CHAS. H. WHELLAM,  
PAUL A. SMITH.

Shingle Creek,  
Summerland B.C.

**:: Naramata Notes ::**

Mr. D. McKay was a business visitor to Kelowna on Tuesday.

Mrs. F. H. Rounds and Miss Williams spent Monday in Penticton.

Master Wilbur Wellband has commenced a course in Okanagan College at Summerland.

Mr. J. M. Robinson came in on Wednesday's boat after his week of absence on the Water Commission.

Mr. and Mrs. Niblock have returned from Calgary where they have been for a few weeks visiting friends.

It is expected that Naramata will turn out in full force next Monday evening at the Band Concert in Summerland.

Mr. George Cook is quite ill with a low fever. His numerous friends extend the hope that the crisis is already past.

Master George Dale and his friend Walter Mumm from Summerland spent the week-end at Naramata, the guests of Roy Boothe.

It is probable that Mr. Simpson the electrician will erect a house this fall on his recently purchased property near the O'Calligan orchard.

Mr. and Mrs. J. M. Schreck contemplate taking a trip to Buffalo and other eastern points this coming Winter season. They will be absent for about a couple of months.

The young ladies of the girls club met last Wednesday evening at the home of Miss Wells to bid Miss Mitchell, who is leaving for Vancouver next Tuesday, bon voyage. It is probable that her absence may extend for several months.

**NEW WESTMINSTER SHOW.**

At New Westminster Show Summerland has had hard luck. The exhibit has been turned down because there was not a sufficient quantity. This is no fault of the district. Twenty cases of fruit consisting of peaches, plums, etc., were forwarded to cold storage to be held in readiness for the Show. Seven of these have been lost, stolen or strayed, and it was impossible to duplicate them so late in the season.

This is a serious enough matter, and whosoever is responsible for the loss, should be heavily punished. It is a difficult matter to locate, and maybe would not be worth while seeing that in all probability only the price of the fruit could be collected.

But what does Summerland suffer through this? No exhibit at New Westminster! And this after all the trouble which has been taken is a great disappointment, but this does not count so much as the criminal neglect which lies at somebody's door.

**WEDDING BELLS—TAIT AND CROSSEN.**

On Wednesday evening last at the Presbyterian Manse, Jno. Tait of Summerland, was joined in wedlock to Ruby Morrison Crossen, of Stirling, Scotland, Rev Jas. Hood officiated. The manse was decorated for the occasion, festoons of flowers being strung across the room. After the evening the newly married couple and guests to the number of about twenty, journeyed to their new home where the wedding feast was partaken of, after which a social time was spent.

**WATER ACT, 1909.**

BY DIRECTION of the Board of Investigation, Notice is hereby given that the Board will proceed to adjudicate upon claims to water on the following streams and tributaries thereto in the Similkameen and Osoyoos Water Districts, under authority of Part 3 of the Water Act, 1909.

- Pine Creek
- Spring on Pre-emption No. 2986
- Spring on Ecks Pre-emption
- Shoot Creek
- Ellis or Nanisheen Creek
- James Creek
- Penticton Creek
- Spring on Pre-emption No 2551
- Canon Lake
- Second Creek
- Cedar Creek
- Little Penticton Creek
- Sheep Creek
- Four-mile Creek South on Dog Lake
- Four-mile Creek on East side Okanagan Lake
- Five-mile Creek
- Johnson Creek
- Spring on Pre-emption No. 4507
- Spring near Pre-emption near Four-mile Creek
- Spring near 1st Creek near Pre-emption No. 1388
- Spring on Sub-lot 19, L. 2711
- Alder Creek
- Maple Creek
- Creek three miles south on Dog Lake
- McLean Creek
- Lake near Kelowna-Penticton Trail
- Spring, Penticton
- Stewards Dam
- Creek, Lot 286
- Seven-mile Creek (Lots 210 and 266)
- Camp, Old Camp, 9 mile or Arawana Creek.
- Creek on Lot 211.
- Spring near south-east corner of lot 587.
- South branch of Ellis Creek.
- Spring, Lot 2551.

Meeting for the purpose of adjudication will be held at Penticton on or about October 20th, 1910; Okanagan Falls on or about October 25th, 1910; and Naramata on or about October 28th, 1910.

W. S. DREWRY,  
Chief Water Commissioner.

Lands Department (Water Branch),  
Victoria B.C., July 15th, 1910.

**Local News Items.**

Know ye all. The band concert is going to be a crowded affair so you had better get there on time, 8.15 prompt on Monday night and no reserved seats. Give the boys a good send-off to the New Westminster Show.

We are requested to state that applications are now being received for Domestic Water connections, and same will be attended to in order of receipt. Forms can be obtained at the Water Commissioner's office.

Mr. G. H. Stapleton, of Nelson, representing the International Correspondence School, was in town this week on the lookout for students. He reported procuring quite a large number of students from Summerland.

Mr J. L. Berkley, of the Fruit Union, is now busy packing apples for the National Apple Show at Vancouver, on behalf of the Agricultural Society. Seeing that in this case we do not have to depend on cold storage, the exhibit will go through O. K. All growers who are sending apples for this exhibit should have them in next week, and bring in big quantities, to either of the packing houses. This car load of about 800 boxes is for all the district, and it is up to the whole of the growers to take great interest in it, and bring the best of their fruit.

The executive of the W.C.T.U. met at the home of Mrs. C. M. Smith on Tuesday, and outlined the work of the organisation for the year with business-like despatch. A pleasant social hour followed, with the accompaniment of the cup that cheers, etc. The regular monthly meeting will be held in the club-room parlor on Monday next at 8 p.m. A cordial invitation is extended to ladies who are not already members to attend and join the ranks of those striving to advance the cause of temperance.

## RICH RED BLOOD.

You Will Never Have It as Long as You Have Dyspepsia.

Just as long as you have dyspepsia your food will not properly digest, and the nutritious elements in the food will not be extracted or absorbed, and impoverished or watery blood will follow.

This condition may not be apparent at first, but it will come just as sure as the sun will rise again.

Any stomach ailment, including all forms of indigestion, can be promptly cured by using Mi-o-na tablets, a scientific treatment unsurpassed.

It stops fermentation, belching of gas and taste of sour food almost at once.

The mighty power of Mi-o-na to invigorate and restore the stomach to perfect condition is known everywhere.

Mi-o-na cures by building up—by banishing the cause. For thin people it is a great flesh builder, because it causes the stomach to give more and purer nutrition to the blood. It cures sea and car sickness and vomiting of pregnancy almost immediately. The Summerland Drug Co. sells Mi-o-na for 50 cents a large box, and guarantees it to cure or money back.

## SUMMERLAND PEACHES AT WINNIPEG.

Winnipeg, Sep. 20, 1910.

Mr. Samson, c.o. Okanagan Fruit Union,  
Vernon, B.C.

Dear Samson,

In confirmation of our wire of yesterday re the supplying of another carload of peaches, we might state that the car just received and sold proved to be a "whirlwind success." It arrived on Saturday morning, having just taken four days to get here from the Landing, which is exceptionally good time.

Mr. Lanigan certainly held to his promise in connection with the quick dispatch, and the T. Eaton Company certainly made good their promise to give the peaches such notoriety that it would allow the people of Winnipeg to know just what Okanagan peaches really are; but in order to do this it meant the quality must be first-class, and the price right. We were discussing the question as to which class of fruit the market preferred, and you will no doubt remember the statement being made that Washington practically had full control, and that British Columbia peaches were more or less tabooed—but when the quality is right, and the price is right, it does not matter to the Winnipeg general public whether they come from Washington, Ontario or British Columbia. Therefore all it needs is Push and Energy on the part of the British Columbia Fruit Growers to place themselves upon the market at Winnipeg. To substantiate the selling qualities as well as our adv. medium it just took exactly ninety minutes to dispose of that car, and we could have disposed of another car the demand was so great. We put in a window display which lasted just two hours, when people kept making request after request for the peaches after having been sold out, making it necessary for us to take the cases out of the window.

We are enclosing a copy of the advertisement placed in the paper for the occasion. You might send it on to Mr. Agur.

If this peach sale is any forerunner of what we might expect of the apple display it would pay the Okanagan Fruit Growers to make preparations to place the very best class of apples in this exhibit, and there is no doubt but what it will be possible to bring in a train load another year,

as you can plainly see it only remains for the fruit growers to act wisely in being able to give us first-class apples at a reasonable rate in order to allow the people of Winnipeg to sample, themselves, the fruit of British Columbia.

The packing, shipping, casing and labelling of the peaches was above criticism, and certainly a credit to any shipping organization.

With best regards to yourself, I am,  
yours sincerely,

The T. Eaton Co. Ltd.

Mail Order Dept.

Sgd. Chas. Band.

## SUCCESSFUL CONCERT.

### The Band Hold a Benefit Concert Previous to Their Departure for the Coast.

On Monday last, the Summerland Citizen's Band were the promoters and chief artistes at the first concert of the season.

At 8:15 prompt, the advertised time, the chairman, Mr. J. C. Robson, opened the evening's program with a few remarks in which he made mention of the great asset to Summerland the band is, and how little some of our townspeople realized this. The boys had worked very hard at practices and all that was coming to them in the way of bouquets or compliments they had truly earned.

The bandsmen, about twenty-four in number, looking extra smart in their now completed uniforms, went through a lengthy and very varied program in a style, which gave assurance of a hearty reception at New Westminster. Their able leader, Mr. Pearce, has given them plenty to do, and drilled them to that pitch, whereby they will not fail him. Every selection was well rendered and thoroughly enjoyed. The songs by Miss Bartholomew, and violin solos by Mr. Dewar were bright spots in the evening's programme which was as follows:

March	Punjab	Band
Caprice	Solitude	Band
Cornet Solo	Addah Polka	A. C. Pearce
Violin Solo	Bercluse de Jocelyn	Mr. Dewar
Selection	Lauders Songs	Band
Song	Angels Serenade	Miss Bartholomew
Selection	Mikado	Band
Intermezzo	Cavalleria Rusticana	Band
Violin Solo	Madrigal	Mr. Dewar
Selection	Scotland	Band
March	Stars and Stripes	Band
	God Save the King.	

Mr. Powell Jones officiated as accompanist.

For transgressing the new Provincial Liquor Law by not having his barroom blinds in the required position on a Sunday, the proprietor of the Coldwater Hotel at Merritt has been fined \$100 and costs. The fact that he had been in attendance of late at the bedside of his sick wife was not accepted as extenuation.

## MARKET REPORT

Extracts from Commissioner J. C. Metcalfe's Weekly Bulletin.

Regina, Sept. 19th.—A car of mixed fruits arrived here from Vernon for the Vernon Fruit Co., on the 18th, shipped on the 13th, five days in transit, contained apples, pears, prunes and peaches. Apples were good and well packed. Pears were fine stock, variety Flemish Beauty, but packed in four basket plum crates, baskets weighed 5 lbs. net of fruit or 20 lbs. to the case. It is not advisable to pack pears in any other package but the regular pear box. Peaches were nice stock and well packed but a little over-ripe. Plums were also over-ripe, but altogether the car was very satisfactory. Peaches are firmer in price again, stocks low, not much offering of them.

Moose Jaw, Sept. 19th.—Three car-loads of mixed fruits arrived this point from B.C. Sept. 16, all coming in excellent condition, were all well packed and graded. Dominion Fruit Inspector, Mr. McCabe, inspected these cars and reported they were excellent in every respect. Color, quality, pack and grade were of the best. In conversation he stated that B.C. growers and shippers had the American product beaten in these markets if they continued to keep up the present high standard set, and to still further improve on the product and largely increase the quantities grown over the present output. Jobbers are buying our fruit products at much higher prices than they can buy the American product, clearly evidencing the superiority of our fruit and pack over the American.

The manager of the Pioneer Fruit Co. here, Brandon, stated our B.C. growers and shippers had certainly, on apples, pears and crabs, everything beaten coming into this market this season, and proposed to handle more than he had formerly done, although prices and quotations were lower from the American side as the following quotation indicates: apples, assorted varieties, four and four and a half tiers, 35 cents per box.

The manager of the MacPherson Fruit Co. here, practically confirmed the same statement respecting our apples, pears and

# AUCTION.

POTATOES—Small Feed Potatoes for sale. Apply Phillip G. Dodwell, Balcom.

Miss Charlotte Hadleigh, who has been spending the summer here with her aunt, Mrs. Angove, left last Saturday for Vernon. She is going to train as a nurse at the Jubilee Hospital there.

crabs, adding, at the same time, that the markets of Brandon and Winnipeg called for a poorer and cheaper quality of fruit than the west, from the fact that great quantities of poorer fruit were dumped into these markets from Ontario and other points, creating a large demand on the part of consumers for that grade and quality of fruit. Retailers report they are highly pleased with our large fruits of all kinds this season to date.

Winnipeg, Sept. 22nd.—Vipond & Co., jobbers here, report large quantities of fruit from Ontario arriving on these markets at the present time, much of it arriving in poor condition. He showed me a quotation from Wenatchie which read as follows:

Spitz, Ganos and Winesaps, No. 1, \$1.00  
Do. do. No. 2, 0.80  
Do. do. No. 3, 0.60

Spys, Baldwins, Ben Davis and Newtowns No. 1, \$0.80; No. 2, \$0.60; No. 3, \$0.45, but added they were not certainly up to the standard or equal to the B.C. fruits that were being offered by the B.C. shippers at the present time.

Mr. Scott, manager of the MacPherson Fruit Co., here, stated they would buy largely of Ontario and Washington apples this season, as prices were lower, although not equal in any respect to B.C. fruit this season that is being offered. He further stated that the manager of their house, Calgary, had bought 50 car loads of Washington apples for their trade in the west. B.C. prices were higher for apples. They had bought American side, at 80 cents per box for No. 1.

I saw a car load of Italian prunes from Grand Forks, B.C., was sold by public auction, same mart, prices realized were 75 to 85 cents per case. Arrived in good condition. This market is loaded with prunes at the present time and prices are ruling low.

Peaches are practically over and prunes are nearly so. Crabs are scarce and in great demand at high prices. Just here I may say jobbers are discouraging the shipping of crabs in other than the regular apple box or the half apple box, as growers and shippers when quoting and shipping do not state the size or kind of box, giving cause for dissatisfaction among jobbers and retailers by the use of various sizes. I certainly think it advisable for shippers to use a uniform box, leaving no cause for complaint and misleading, or giving dissatisfaction among buyers by using different sizes of boxes as they are doing at the

present time. Pears are in great demand and prices are high, apples of good quality and pack are in good demand and fairly high prices, and although some quotations from American points are low, good stock is fetching reasonably high prices here. Apples in New York State, are reported as being bought at \$3.00 per bbl., with the expectation that prices will advance in the near future. Prices for Ontario apples as the season advances are rising with a very short crop of poor quality. Reports coming to hand from various sources state the east must draw largely on the west for their supply of apples this season, and for these and other reasons, I would advise B.C. shippers to hold firm to present prices being asked for good stock, and, at the same time, maintain the present high standard of fruit being shipped into these markets at present time.

Mr. Pearce, on behalf of the band, desires to thank those artistes who so kindly helped along the concert on Monday night, also the gentlemen who acted in various capacities, the ladies who gave the most excellent supper, and lastly but not least, all those who attended the concert and helped to make it such a success.

# The Summerland Review

## VOICES OF THE STREET.

Walpole Murdock publishes the Hartney, Man., Star. He edits it well. Mr. Murdock is somewhat of a philosopher, a lover of nature, too, and a man of moods. He visited Winnipeg recently. Of his visit he says—and in the saying he voices the sentiment, no doubt, of many former Winnipegers now of the Okanagan:

"Solomon once said that 'wisdom uttereth her voice in the street,' but Solomon never imagined a modern city. He never tried to dodge the twenty different honks of a score of automobiles amid the clang of trolley bells; he never stepped from an electric car just in time to have his robe ripped off by the brass railings of a benzine buggy filled with fops who simper and with simpletons who giggle; he never took an elevator up a shaft towards the blue dome and looked out through the breath of smokestacks over the wealth and poverty and sham of a great city civilized by commercial competition; he never stood on the street at midnight and watched words leap from the gloom with the suddenness of lightning and announce 'Art Clothing,' 'Dental Buds,' 'Scotch Whisky.'

Solomon gathered luxuries from the known world of his day, and was, no doubt, a close observer, and often saw Jerusalem jarring with wheels, and shuffling with feet, and probably saw industry with her thousand arms thrust idleness into rascality. He also saw that all classes are there compelled to meet. His glittering coach wheels clashed against the scavenger's cart, and his fine robe brushed the peddler's pack, and then he went home and wrote 'the poor and the rich meet together,' and when he recalled the subterfuge and double dealing of the multitude, the swagger and strut of those who wish to attract attention he added, without much thought, 'the Lord is the maker of them all.'

"In the great city the tide of human life goes down the street as rapids tossed and turned aside and dashed ahead in confusion. In the rushing, raving highway is the best place to study man, but in the carpeted aisles of the forest, in the woods from which the eternal shadow is never lifted, on the shores of the sea where the rocks are sprinkled with tangled foam and whirlwind, is the best place to study nature."

In the Methodist Church on Sunday evening next, the Rev. F. W. Hardy will take for his text, "The Church and Socialism."

## WHEN YOU'RE DISAPPOINTED.

In judging a person's character one of the most trustworthy signs is the way in which he or she takes a disappointment.

There are many different ways in which we may meet the little trials and reverses of everyday life, and as surely as a fly swoops down on a pot of jam in preference to butter, cheese, and other tempting provisions of a like nature, so will a faint heart choose the cowardly way, a brave temperament the cheerful way, a meek spirit the resigned way, and so on. What is your way?

Do you sit down and whine, peevishly complaining that you have excellent claims for the much-contested position of "the most unfortunate person in the world," groan that yours is a hard fate indeed, and that you never heard of such a miserable person as yourself? That is the coward's way. Or do you meekly fold your hands and say, "I know it is very hard, but it cannot be helped? I always was a 'put upon' and ill-used individual. But I'm used to it, I do not complain. And you go on complaining in the same manner a long time afterwards, taking a miserable pleasure in the fact of your having been disappointed, and letting the world know it, in case it should enjoy itself. That is the hypocrite's way.

Do you rage, storm and rave, savagely calling down vengeance on things in general just because they don't happen to fall in with your humour? That is the way of the weak and the selfish. Or do you give a cheerful grin and exclaim "oh, well, so it wasn't to be after all. Never mind, it doesn't matter. I'll have another try!" That is the brave way—the way that wins.

It doesn't matter much that disappointment of yours. "'Twill be all the same a hundred years hence," is a sound saying, though this piece of information would probably be of more comfort to a Methuselah than to an ordinary mortal. But there is real consolation in the fact that we do not always know what is best for us, and many of the gifts we covet are withheld from us only by a wise Providence that does.—Contributed.

Kaslo is the last provincial city to adopt municipally the principles of the new License Act. The Commissioners of the Slocan city have just called before them all local licensees and emphasized their determination to fully enforce in Kaslo the drastic provisions of the law.

**Local News Items.**

During morning service at the Methodist Church, the Rev. F. W. Hardy is at present giving a series of sermons dealing with the Lord's Prayer.

The C.P.R. bridge gang left town on Thursday morning. The boys have got through with their work, and the new dock and slip will be used regularly ere long. The first car load consisting of bricks was landed there on Wednesday night.

Two large hampers of clothing were sent off this week to Campbelltown, N.B. Supplies of this description are very welcome at that point just now, and it is up to every place to help out the sufferers from the great fire as well as they can possibly so do.

The Pringle Company, who occupied the boards at the Empire Hall last Saturday and the two preceding nights, were by no means favored by as large audiences as their plays warranted. They gave good shows each night, which were much enjoyed by those who attended. In a critical vein, we would say that the alleged burlesque part, which was placed on each evening during an interval, could well be dispensed with, and the omission would enhance greatly the enjoyment of the play being produced.

The Terrace Dairy of Peach Orchard, owned by A. A. Derrick, has been taken over by the Lake Side Stock and Dairy, Limited, and their location is now at Trout Creek. Mr. Derrick will still occupy position as manager. Dr. Lipsett, veterinary surgeon, will look after the health of stock, and it is the intention of the company to have a first-class equipment throughout. A large consignment of the best bred stock will shortly be procured in the eastern provinces.

The following is an excerpt from a recent issue of the Vancouver Province:

"Speaking generally of the Summerland district, he states that some 500 boxes of peaches were this year shipped, chiefly to the prairie markets, while a very large quantity were canned. Altogether he regards the fruit shipment from the Okanagan town as very satisfactory, with prospects for an infinitely greater yield in the future."

We are all liable to mistakes, but to make such an one as the above is atrocious. Five hundred boxes, forsooth. Why, there were about forty five cars of peaches shipped, and that averaging 1200 boxes to the car, spells 54,000.

It was a sword which mystified the townspeople on Wednesday. None of your common or garden kind, but a real two-handed variety as was used by our forbears, and, what's more, was actually "dug up," so the story ran, from the shores of the balmy Okanagan, not many miles from the new packing house. After it had been hauled to town surmises as to its origin were rampant, and even though one could see traces of very modern aluminum paint on the blade, and the sword itself was made out of very modern rolled sheet iron, yet the suggestions as to its origin did not in the least abate. Ere long it will be labelled as one of the old original two-handed swords brought over in an early period by some Scottish chief, who used it for killing beaver for the Hudson Bay Co., or maybe to dispatch the huge fish which at one time inhabited the lake. What a hoax.

### FUTURE OF PEACH-GROWING.

In passing through Vernon a few days ago, we were told very confidentially by one who believed he knew, that peach growing in the Okanagan was doomed to failure, that the crop was so perishable and had to be handled so quickly, that there was much loss in the crop. We were informed also, that, as a result of this, the peach orchards were to be uprooted and the trees replaced by apples, or some other fruit which was not so perishable.

This information surprised us greatly. It will surprise Summerland and Peachland readers quite as greatly. There is no doubt that this impression is spreading in certain quarters, and will spread amongst a certain class of reasoners, no matter how absurd it be. And there are always many people in the way of such reports, and when they hear them are only too anxious to push them along.

Fifteen years ago, or less, the orange growers of California found themselves in a similar condition to that of the fruit growers of the Okanagan to-day. They had not then found a way to the markets, and were more or less at the mercy of the commission houses and the limited local market. When the market was glutted, and the local field could not get away with more fruit, the commission men set the price to the growers, and it was a case of taking what the commission houses offered or letting the fruit go bad on the trees.

At that time, the orange growers had no organised system of disposing of their product. To-day everything is changed. Then, many orange orchards were uprooted, and the English walnut trees substituted for the orange trees.

The orange crop of California at that time was so small as not to be reckoned with in the eastern markets, and, because the crop was so small, the growers were at the mercy of the market-makers.

To-day there are ten acres of orange trees bearing fruit where there was but one acre fifteen years ago, and the value of the orange crop is now upwards of ten millions annually. The growers are getting prices they never dreamed of ten years ago, and they control the market instead of being controlled by it.

We are prepared to admit that there is a vast difference in the nature of oranges and peaches. Oranges are gathered from Christmas until July, and there is a limited territory in which they can be grown. They also keep better, and can be picked green and kept in prime condition for many weeks in cooling houses. Peaches, on the contrary, are the most perishable of fruits; they ripen all at once, and must be placed on the market immediately. They can also be grown in many districts, and are not confined to any particular locality. But there is a difference in peaches. There is no peach on the market to-day equal in either color, flavor, or fibre to that of the Okanagan peach. This is admitted by men who are familiar with the fruit of every peach-growing district in America. This fact alone is sufficient to open every market in America to the Okanagan peach, and to place it in a class by itself in every market to which it is sent.

While we have not heard of anyone in the peach-growing district of the Okanagan replacing peach trees with any other variety of fruit, we are not prepared to say there is no one who will do it. There may be one orchardist, there may be a dozen, who will do it. But for every tree uprooted there will be one thousand peach trees planted. The day will come, and it is not far distant, when the peach growers of the Okanagan will command the markets of the Dominion.

To acknowledge the difficulties which our peach growers have to contend with is the first step in the way of overcoming them. Other districts which have not the advantage of quality, that is so generally admitted in favor of the Okanagan, are to-day shipping one hundred carloads of peaches where the Okanagan ships one. In a trade paper published at Toronto we see the report of the peach crop of Georgia, and the amount of peaches shipped from that state this season is given as 6000 carloads. Would anyone say that the Georgia peach

is less perishable or less difficult to handle than the Okanagan peach? Would anyone presume to say that the Georgia peach growers are not making fortunes out of their crop?

This is only one instance. Similar reports come from other peach-growing districts. With the undoubted advantage in favor of the Okanagan peach, will anyone say that our peach growers are going to make less from their crop than the peach growers of other districts?

We think this Vernon impression will make our Summerland peach growers smile. The proceeds from the output of our orchards this year ought to be sufficient to settle the point even now, when we must admit that we have not yet got down to a system of perfection in the picking and handling of the fruit.

### PREMIER McBRIDE AGAIN MAKES GOOD.

Premier McBride again showed his masterful spirit in his speech before the Manufacturers' Association of Canada at Vancouver some days ago. His presentation of the magnificent possibilities of British Columbia, and his optimistic picture of the future, struck a responsive note in the hearts of his hearers, and made them see vividly the wonderful character of our resources now developing.

Premier McBride knows British Columbia as few men know it. He has studied it from his boyhood days, and he loves it with an ardor seldom seen in public men. It is but natural that he should be optimistic, for no man with any degree of foresight can fail to see in the future anything else but a nation in the building.

Premier McBride showed up splendidly before this gathering of the Dominion's commercial princes, and he made them realise, as they did not realise before, that British Columbia is a mighty important integral part of the British Empire as well as of the Dominion of Canada.

British Columbians have good reason to be proud of the Hon. Richard McBride.

### STRAWS.

The next year or two will see phenomenal development in the Okanagan Lake district. We are almost certain to have a third line of railway reaching to this waterway for a share of the business offering. And if the present ratio of development is kept up, the output of our orchards will soon be so great that a third railway will be necessary if the crop is to be car-

ried from the orchards to the markets with any degree of alacrity.

There may be much in this excerpt from the Kelowna Courier, and there may be little, but it points to the probability of a railway being constructed on the opposite side of the lake from end to end, and continuing northward to the northern end of the Okanagan:

"During the past week a number of Kettle Valley Railway surveyors arrived in town, and, after outfitting, are now engaged in work in the district. Their advent was unexpected, as it is understood the Kettle Valley has no charter covering the country between here and Vernon, and the Midway-Vernon subsidy was recently repealed by the Legislature. The Kettle Valley obtained a charter some time ago for an extension of their existing railway in the Boundary country, but, so far as we can remember, it was for a route following the main Kettle River to the headwaters of Cherry Creek and thence to Vernon, yet it is possible that they have powers to vary the route. The congestion of freight this season on the lake and the prospects ahead for the next few years are believed to account for the surveys now being made, and it is boldly predicted that Kelowna will have rail communication inside of twelve months."

**THE UNIVERSITY SITE.**

Now that we have thoroughly digested the contents of the report of the University Site Commission we are forced to the conclusion that the site chosen is the one we would have chosen ourselves if we could have been non-partisan long enough. The report, while recommending Point Grey as the most suitable, gives several options any one of which would be nearly as well suited to the requirements. The fact which seems to favour Point Grey is that in addition to its scenic possibilities, overlooking as it does the Gulf and the Fraser Valley, and its combined proximity to the city, and the unlikelihood of its being shut in by buildings, is the large area of government land in that vicinity. In providing for a school which is to be started on the scale of the proposed university it would be the greatest mistake not to provide enough land for the subsequent enlargement. The gentlemen of the commission, all practical educationalists, have fully realized this and provided for it in their report by recommending that two hundred and fifty acres should be provided for campus and seven hundred acres for

experimental purposes exclusive of large areas for practical forestry work. The idea of secondary schools for the teaching of agriculture, mining, etc., should meet with everybody's support. Coal mining can be taught much better where there are coal mines, mineral mining where it is carried on, and we know that no man ever learned horticulture out of a book and became a practical orchardist without the practical experience. So boost for the secondary schools with their short courses for busy men and when the proper time comes we should see that Summerland is to the front with her claim for one of these schools, being, as she is, the centre of the Peach Belt.

The new Liquor License Law is already having its effect in Kamloops, where a well known hotel man was recently fined \$100 and costs for giving liquor to a man apparently under the influence.

**:: Naramata Notes ::**

Miss B. Mitchell left on Tuesday for Vancouver.

Born, to Mr. and Mrs. Walters, on Monday Oct. 3rd, a daughter.

Capt. Languedoc has purchased a new horse and rig from a party up the lake.

Mr. J. M. Robinson has been in Trail this week attending a meeting of Water Commissioners.

Mrs. W. McCulloch returned on Wednesday evening from a few weeks sojourn with friends in Vernon.

Mr. D. McKay has completed some alterations in the store of the Supply Co., which greatly increases the display space.

Mr. F. J. Young, with wife and family from Edmonton, are the most recent arrivals to assume charge of their fruit farm south of town.

Mr. P. Hall, special representative of a large wholesale house in Calgary, spent a little while in our town this week, looking up a few relations.

During the absence of Mr. Mulford at the coast cities, his business is being looked after by "Sam," the competent and intelligent Chinese cook of the hotel.

Mrs. J. S. Gillespie, after several months absence in Chicago and New York, has returned to town. A reception is being held to-day at the home of Mrs. Wellband by the ladies of the Unity Club.

The management of the Smith Lumber Co. pushed their timepieces on 40 minutes on Monday morning, in order to make better use of the daylight. This is one way of getting ahead of the C.P.R., eh?

Mr. W. Armour, a recent purchaser of choices in the new sub-division at North Naramata, will likely be one of the first to break sod. It is "Billy's" intention to get his property in shape for spring planting.

The intake of the pipeline system at Mill Creek has been very substantially improved by the construction of a six foot dam across the stream. This has been done to avoid the trouble last season caused by its forming at the mouth of the flume.

Mr. H. E. Hancock's heavy shipment of household effects has at last arrived from England, and is this week being moved to his residence. Unfortunately a few of the finest pieces of furniture were badly damaged, the loss of which will however be partly covered by insurance.

The installation of the new electric light plant is progressing. The system when complete, in the opinion of experts, will be the very best of its size that money can buy. And when you realize that three years ago Naramata site was a wilderness of dense undergrowth, some idea can be gained of the progress being made in the development of our town.

The Naramata representatives of the Summerland band, who are this week filling in a three days engagement at New Westminster, all got away safely on Tuesday morning's boat. Not saying much, you say? Well, if you could have seen the scurrying time one or two gentlemen had to get into street costume to meet that 5-30 boat you'd probably think differently. "Did they run?" Sure, they r-r-ran.

Miss Effie Brown, cousin of Mr. T. J. Smith, who came in here recently for her health, passed away on Friday the 7th, at Mr. Smith's residence on Jones' Flat.

**News from Peachland**

Mr. J. L. Vicary left Thursday morning for a couple of weeks visit to Vancouver.

Mr. and Mrs. W. A. Lang are attending the New Westminster Fair this week.

Mr. G. A. McWilliams of Summerland spent a day here last week looking over some real estate propositions with Mr. J. L. Elliott.

Much regret is expressed on all sides that Mr. and Mrs. Geo. Mitchell are leaving here soon to make their home in Penticton. Mr. Mitchell having taken a position with Messrs. Eyre and Cutbill. They have both been so active in church and social life of the whole community that a very large gap will be left by their departure.

On Tuesday evening the Ranchers' Glee Club, of which Mrs. Mitchell has been leader for two years, met at the home of Mr. and Mrs. J. L. Elliott, and spent a very jolly evening. Besides being a farewell for Mr. and Mrs. Mitchell, it afforded an opportunity to wish bon voyage to Mr. and Mrs. J. L. Vicary and Dr. Crompton, who will soon be leaving on trip to the Old Country for the winter.

Wednesday afternoon, Mrs. C. G. Elliott gave an "At Home" in honor of Mrs. Mitchell, and a number of the most intimate friends in the vicinity spent a very pleasant time, if a man may judge from the sounds of hilarity which were heard issuing from the house at tolerably regular intervals.

**Water Notice.**

NOTICE is hereby given that an application will be made under Part V. of the "Water Act, 1909," to obtain a license in the Osoyoos Division of Yale District.

(a) The name, address and occupation of the applicant is: Charles Hagarth Whellams and Paul Amos Smith, Shingle Creek, B. C. Ranchers.

(b) The name of the lake, stream or source is June Creek, being a tributary of Shingle Creek.

(c) The point of diversion is near North line of applicants Pre-emptions Claim, No. 5965, in Group 1, Osoyoos.

(d) The quantity of water applied for is two cubic feet per second.

(e) The character of the proposed works is a dam, ditch and flume.

(f) The premises on which the water is to be used is Pre-emption Claim No. 5965, in Group 1, Osoyoos.

(g) The purposes for which the water is to be used—Irrigation.

(h) If for irrigation describe the land intended to be irrigated, giving acreage. Pre-emption Claim No. 5965, in group 1, Osoyoos,—320 acres.

(i) Area of Crown land intended to be occupied by the proposed works—None.

(k) This notice was posted on the 17th day of September, 1910, and application will be made to the Commissioner on the seventeenth day of October, 1910.

(l) Give the names and addresses of any riparian proprietors or licensees who, or whose lands are likely to be affected by the proposed works, either above or below the outlet—None.

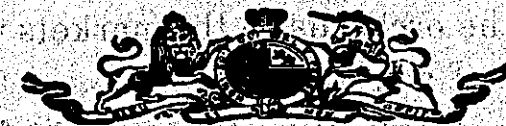

CHAS. H. WHELLAM.  
PAUL A. SMITH.

Shingle Creek,  
Summerland B.C.

Mrs. Jno. Tait will be at home on Tuesday the 25th and Wednesday the 26th.

Representatives of the Kootenay Motor Boat Co., of Nelson, were in town this week looking over the district with a view to installing a boat factory here.

The trend of events during the past week would lead one to believe that in Summerland we live in an age of obedient parents and immaculate children.

**WATER ACT, 1909.**

BY DIRECTION of the Board of Investigation, Notice is hereby given that the Board will proceed to adjudicate upon claims to water on the following streams and tributaries thereto in the Similkameen and Osoyoos Water Districts, under authority of Part 3 of the Water Act, 1909.

- Pine Creek
- Spring on Pre-emption No. 2986

## Local News Items.

To those who are forwarding individual exhibits to Vancouver: shipping tags can be procured for them from R. Pollock.

At the Baptist Church down town at 7-0 p.m. the subject will be "The greatest question of your life" At West Summerland in the afternoon at 3, subject "A value in lovliness."

The cannery has closed down for the season. Next year they intend to go in the business on a much larger scale, and instal the latest machinery and labor-saving devices at present used in the business.

Capt. Fison, who has had charge of the Municipal water scheme since they purchased same from the Development Co., has resigned his position, and he left town on Friday morning for Kamloops.

Entries for the Apple Show are coming in pretty good, and there is every indication that the show will be a huge success. It is well to know that the last day for entries is Thursday, the 13th, but it would be well to get them in as early as possible, as the Secretary (R. Pollock), will have all he can handle before the show.

A great deal of mischief may easily be done by thoughtless persons who frequent the water front with small bore rifles, if steps are not taken to stop the nuisance. Picking off ducks and divers may be a means of parading one's skill to the gaping populace, but it is extremely unpleasant to the man who hears the hum of the bullet past his head when the bird is missed and the bullet ricochets. That this shooting continues, often in spite of protest, may be due to ignorance of the physical laws involved or may just be carelessness, but the fact remains that a bullet skipping over the water makes as nasty a wound as the one which comes direct, and it means the hospital or worse for the man who gets it. A word to the—unwise.

**CANADA'S DEFENCE SYSTEM.**

Speaking in a recent issue of the Royal Colonial Institute Journal, "United Empire," an editorial writer of wide experience says:

"Sir John French's mission to enquire into the working of the defence system in Canada has afforded an interesting opportunity for seeing how the Dominion regards a question on which opinion in the Mother Country is so much (and in Australasia not at all) divided. It is reported that Sir John accepts the voluntary system as the best suited for Canada at present, and also the numerical standard aimed at, and confines his criticisms chiefly to those points in which existing forces fail to come up to a required standard. The Militia system of Canada grew up in much the same happy-go-lucky way as the old Volunteer system in Great Britain, and with forces so raised there are always difficulties in co-ordinating them into a whole, with properly balanced arms and departments. The Territorial scheme was specially designed to correct this fault, and undoubtedly provides a far more coherent frame-work. Canada has taken steps in this direction by dividing herself into four commands and thirteen military districts, which are, on paper at all events, properly balanced. Probably Sir John French conceived his mission to be to point out defects in the existing system, and not to propose any new one. Lord Kitchener was invited to suggest his own idea of the best possible form. It is understood that, apart from details of organisation, Sir John's main criticisms are directed at the inadequate knowledge and training in the higher commands, doubtless attributable to some extent to the comparatively small opportunity enjoyed by officers for handling their troops. The period of training has been left very largely to the personal desires of the Volunteers themselves, whereby the men, having enlisted and served at one camp, are not absolutely compelled to attend any more. The importance of service in camp to the voluntary soldier is only equalled by the importance to his officer of being able to actually handle in the field the men he is supposed to command, but these conditions are hard to secure without a longer and more closely enforced period of training than has been usual. Whether this can be accomplished in Canada remains to be seen. It does not seem feasible in the Mother Country. It has been rejected as impossible in Aus-

tralia and New Zealand. There is little likelihood that it will be adopted in South Africa, where a tradition of compulsory citizen service already has a strong hold on the people. Canada has some of the best raw material for defence purposes in the world, and she, too, has a "tradition," for in no country has citizen-patriotism run higher. The working out of her military and naval problems will be watched with deep interest, and sympathy, for the conditions of her national life present peculiar difficulties in both respects, and on their solution may hang some of the gravest issues of our times."

### SEPTEMBER "ATHLETIC WORLD."

The September number of "The Athletic World" magazine has just reached this office. In up-to-date sport affairs and illustrations it is strikingly stronger than the August issue, which created such a favorable impression as a Canadian athletic and outdoor periodical, covering all branches of sport in Canada, with a liberal number of sport happenings over the world generally. We predict a full measure of success for "The Athletic World" in its able efforts to espouse the cause of good sport in this Dominion.

### RICH RED BLOOD.

You Will Never Have It as Long as You Have Dyspepsia.

Just as long as you have dyspepsia your food will not properly digest, and the nutritious elements in the food will not be extracted or absorbed, and impoverished or watery blood will follow.

This condition may not be apparent at first, but it will come just as sure as the sun will rise again.

Any stomach ailment, including all forms of indigestion, can be promptly cured by using Mi-o-na tablets, a scientific treatment unsurpassed.

It stops fermentation, belching of gas and taste of sour food almost at once.

The mighty power of Mi-o-na to invigorate and restore the stomach to perfect condition is known everywhere.

Mi-o-na cures by building up—by banishing the cause. For thin people it is a great flesh builder, because it causes the stomach to give more and purer nutrition to the blood. It cures sea and ear sickness and vomiting of pregnancy almost immediately. The Summerland Drug Co. sells Mi-o-na for 50 cents a large box, and guarantees it to cure or money back.

SUMMERLAND, B.C., OCTOBER 15, 1910

Whole No. 115

## COUNCIL IN REGULAR SESSION.

The monthly meeting of the council was held in the Council Chamber on Monday last.

Present Couc. Ritchie (acting Reeve), Councs. J. R. Brown and C. J. Thomson.

The minutes of previous meetings were read and adopted.

A letter from the Indian Agent was read re the fencing of the reservation at certain parts near to Trout Creek, offering to provide wire and staples for same. It was decided to make arrangements for fixing posts and wire at such points as deemed advisable to stop cattle from roaming in the district from south of the Creek. A letter was read also from one of the rate-payers suggesting stricter enforcement of the Pound By-law, as he considered that some proprietors of cattle and horses allowed their beasts to feed by the roadside in preference to purchasing fodder, as it came in cheaper, even though they had to pay Pound fees now and again. The council decided that the Pound Law must still be more strictly enforced, and if the same cattle or horses kept being impounded, then the proprietors must be summoned for wilful neglect.

Messrs. Cordy and Huddleston asked permission to fell trees and remove same on road south side of Peachland Road, but the council could not comply with their request, as it is against the laws of the Municipality.

Mr. R. H. English handed in his resignation as Pound keeper, which same was accepted.

The contract between the Canadian Pipe Company of Vancouver and the Municipality, for supplying and laying pipe in accordance with specification was agreed to. The pipe to be laid at a minimum depth of 4 ft. 6 ins. from the road surface to bottom of pipe, and contract to be completed by December 10th, 1910.

The By-law for the purposes of raising the sum of \$2,500 for School Board purposes was read for the first time, and the voting on same is to take place on Saturday, October 29th, between the hours of 9 a.m. and 7 p.m.

Mr. R. H. English waited upon the council seeking information as to when they may expect the completion of road off main

road in Trout Creek district. The council promised their attention to the matter.

Mr. T. Dale, pound keeper, made report to the council respecting the cattle which caused the damage on lots in Trout Creek district. The arbitrators have fixed the damage at \$201, and four of the beasts only having been in the orchard, the respective owners were ordered to pay the total amount as affixed by the arbitrators, viz., \$50.25 for each beast.

The sum of \$300 was granted to the Agricultural Society for expenses to the Vancouver Apple Show.

The following accounts were passed and authorized to be paid:

## Extracts from Commissioner J. C. Metcalfe's Weekly Bulletin.

To Summarize on Metcalf's report: Plums, prunes and peaches are over; jobbers and retailers are now looking for quotations on Winter Apples and our growers and shippers should get in touch by quoting prices as soon as possible, or having their travellers call upon them personally. Apple prices; are firm and demand good so there is no necessity for sacrificing or cutting of prices at the same time it will be necessary to watch American shipments and quotations from the American Coast States, as they are our competitors and not Ontario, with the exception of the Winnipeg market in which they figure largely. At the same time our Growers and shippers should remember to keep up the present high standard and grade of our pack in every respect, and compel them to buy as it were at higher prices our fruit for its excellence in comparison with others.

## BUILDERS OF THE WEST.

Transplanted men, like transplanted flowers, are the best. Here in the Peach Belt of the Okanagan we are favored with the best men from Manitoba and the Northwest. The results are to be seen on every hand. And the past is but a sample of what the future is to be. The real article is yet to come. These men have been the experimenters; to them we owe all that is to follow. They have demonstrated what we can do here. They, and other hundreds like them, will now proceed to act upon the strength of the success of their demonstrations.

## FRUITGROWERS—ATTENTION!

It is important to remember that stems must in all cases be left on apples for exhibition purposes. At New Westminster Show the judges would not award a first prize to any exhibit unless this rule was strictly complied with.

## NEW WESTMINSTER SHOW.

Out of seven boxes seven plates of fruit shewn by Mr. Alex. Steuart at the Provincial Exhibition last week at New Westminster, he gained the following prizes:

### Five Variety Exhibit.

1st. Best Collection of Winter Apples.

1st. Do. Fall Apples.

### Plate Exhibits.

1st. Best Plate Spitzenberg.

1st. Do. Cox's Orange Pippin.

2nd. Do. Wagner.

2nd. Do. Crab Apples (Hyslop).

2nd. Do. Jonathan.

2nd. Do. Ribstone Pippin.

2nd. Do. Extra Varieties (Summer or Fall).

### Box Exhibits.

2nd. Gravenstein (Five Boxes).

The judges would not award a first prize to any exhibit of apples which were minus stems, and although Mr. Steuart's exhibit of Gravenstein's were ahead of first prize exhibit in every way, it had to be placed second because the stems were missing. Apples will not keep so long when stems have been removed. Mr. Steuart was one of the two exhibitors from Summerland. What we have missed owing to the aggravating loss of the six boxes out of cold storage it is impossible to estimate, especially so when one sees the above splendid lot of prizes won by an individual exhibitor from this district.

## HOSPITAL DONATIONS.

Miss May Phinney, pair of crutches; Mr. Johnsons, apples; Mr. Gillies, apples and peaches; Mr. Hayes, peaches; Mrs. Solly, jam; Mrs. Ross, pickles; Mrs. G. M. Ross, tomatoes; Mrs. Lipsett, preserves, jelly and cake; Mrs. Bulyea, two pairs of towels; Mrs. Robson, plums; Mrs. Phinney, peaches and preserves; Mr. Hespeler, peaches and eggs; Messrs. Jones, Wharton, and Dewar, venison, grouse, and water melon; English Church Harvest Thanksgiving, fruit and flowers; Hospital Ladies' Aid, trays, tray cloths, two bedsteads, cot, surgical dressings, and instruments.

## BY-LAW NO. 28.

### A BY-LAW FOR RAISING \$2,500.00 FOR SCHOOL PURPOSES.

WHEREAS it is deemed advisable to erect a building for School purposes in the Municipality of Summerland.

AND WHEREAS the Government of the Province of British Columbia has agreed to contribute towards the construction of said building the sum of \$6,500.00, providing the Municipality contribute towards the same the sum of \$2,500.00.

AND WHEREAS it is necessary for the said purpose to raise by way of loan upon the credit of the Municipality of Summerland the said sum of \$2,500.00, payable on the first day of December, A.D. 1920, bearing interest in the meantime payable half-yearly at the rate of five per cent. per annum, the principal of such loan when raised to be applied for the purposes aforesaid.

AND WHEREAS for the payment of the said principal and interest it is necessary to raise the sum of \$333.23, by rate in each and every year.

AND WHEREAS the whole rateable property of the Municipality of Summerland, according to the last revised assessment roll, is \$1,522,000.00.

AND WHEREAS the total amount of existing Debenture debt of the said Municipality of Summerland is \$285,000.00, of which none of the interest or principal is in arrears.

NOW THEREFORE, the Reeve and Council of the Municipality of Summerland, in open meeting assembled, enact as follows:

1. It shall be lawful for the Reeve of the Municipality of Summerland to raise by way of loan from any person or persons, body or bodies corporate, who may be willing to advance the same on the credit of the said Municipality by way of the Debentures hereinafter mentioned a sum of money not to exceed in the whole the sum of \$2,500.00, and to cause all such sums so raised and received to be paid into the hands of the Treasurer of the said Municipality, for the purposes and with the objects hereinbefore recited.

2. It shall be lawful for the said Reeve to cause any number of Debentures to be made for the sum of not less than \$500.00 each, bearing interest at the rate of five per cent. per annum, not exceeding in the whole the sum of \$2,500.00, and all such Debentures shall be sealed with the seal of the Municipality of Summerland, signed by the Reeve and countersigned by the Treasurer of the said Municipality.

3. The said Debentures shall bear date the first day of December, A.D. 1910, and shall be made payable in ten years from the date hereinafter named for this By-Law to take effect at the Bank of Montreal, Summerland, British Columbia.

4. The said Debentures shall have coupons attached for the payment of interest at the rate of five per cent. per annum on the amount of the said Debentures, and such interest shall be payable half-yearly on the first day of June and December in each and every year, and the signatures to such coupons may be either written, stamped, printed or lithographed.

5. A rate on the dollar shall be levied and shall be raised annually in addition to all other rates on all the rateable property of the Municipality to pay interest on the debt hereby created, during the currency of the said Debentures, and to provide for the payment of the said debt when due.

6. The sum of \$125.00 shall be raised and levied annually by a rate on all the rateable property in the said Municipality of Summerland, in addition to all the other rates for the payment of the interest on the said Debentures.

7. The sum of \$203.23 shall be raised and levied annually by a rate on all the rateable property in the said Municipality of Summerland, in addition to all other rates, for the payment of the debt hereby created when due.

8. It shall be lawful for the said Municipality, from time to time, to repurchase any of the said Debentures at such price or prices as may be mutually agreed upon, and all Debentures so repurchased shall forthwith be cancelled, and no reissue of any Debenture or Debentures shall be made in consequence of such re-purchase.

9. This By-Law shall, before the final passage thereof, receive the assent of the electors of the said Municipality of Summerland in the manner provided for by the "Municipal Clauses Act," 1906 and amending Acts.

10. This By-Law shall come into force and take effect on the first day of December, A.D. 1910.

11. This By-Law may be cited for all purposes as the "Municipality of Summerland School Loan By-Law, 1910."

Passed by the Municipal Council this 10th day of October, 1910.

Received the assent of the electors of the Municipality of Summerland the \_\_\_\_\_ day of October, 1910.

Reconsidered and finally passed by the Municipal Council the \_\_\_\_\_ day of November, 1910.

Clerk.

Reeve.

(L. S.)

TAKE NOTICE that the above is a true copy of the proposed Bill of Loan upon which the vote of the Electors of the Municipality will be taken on Saturday, October 29th, 1910, between the hours of nine a.m. and seven p.m., in the Council Chamber, Summerland.

# The Summerland Review

## CHANGES IN THE B.C. CABINET.

In an extra edition of the B.C. Gazette published on the 10th, the following appears:

His Honor The Lieutenant-Governor has been pleased to accept the resignations of the Hon. Francis Lovett Carter-Cotton as President of the Executive Council; the Honorable William John Bowser, K.C., as Minister of Finance and Agriculture; and the Honorable Price Ellison, as Chief Commissioner of Lands.

His Honor, the Lieutenant-Governor, has been pleased to make the following appointments: The Honorable Price Ellison to be Minister of Finance and Agriculture; William Frederick Ross, K.C., of Fernie, and Albert Edward M'Phillips, K.C., of Victoria, as Members of the Executive Council; the Honorable William Roderick Ross, K.C., to be Chief Commissioner of Lands, and the Honorable Albert Edward M'Phillips, K.C., to be President of the Executive Council.

## DIFFICULTIES INEXPLAINABLE.

An old colored man stole a pig, and after getting home with the animal knelt to pray before retiring. His wife heard him praying the Lord to forgive him for stealing the pig. She went to sleep with Uncle Eph still praying. Later in the night she woke up and saw him still kneeling in prayer. At daybreak his supplications had not ceased. "Eph, why don't you come to bed?" asked his wife. "Let me 'lone, 'Riah; de-mo' I trise to 'splain to the Lord how I come to steal dat pig. de wurser I get mixed."

## IN THE PRAIRIE CAPITAL.

**Potato Famine is Already in Sight--High Prices Rule on Market.**

A potato famine is already in sight in Winnipeg and there is a general shortage of other vegetables. Market gardeners have not seen such poor returns in fifteen years. Potatoes are now quoted at 90 cents per bushel and the price is not likely to be any lower retail. This is the season when provident householders fill up their cellars with roots for winter, but little inducement is offered them this fall as 75 cents per bushel for ten bushel lots is the utmost concession farmers will make. Heavy importations from the east will be necessary. The extraordinary weather conditions of this year still obtain. Three nights ago ten degrees of frost were registered, while last evening the thermometer was over 70 after a very sultry day.

## THE BAND AT NEW WESTMINSTER SHOW.

### A Great Success. The Boys Well Received.

"The Summerland Band, one of the leading musical aggregations of the province, played in Queen's Park yesterday afternoon, and gave a concert in the exhibition building in the evening. Mr. A. B. Pearce, the able leader, has had an extensive experience, and the Summerland band shows the results of his careful training. The only other band in the Okanagan district which can compare with them is the one at Vernon, but the latter is more of the American style, while the Summerland Band is of the old English military style."—The British Columbian.

"In Wagner's Band of Seattle, and the Summerland Band, the society has secured organizations that would be hard to beat anywhere. The Summerland Band is recognised as the best of its kind in any town of its size in the west."—New Westminster Daily News.

On Thursday afternoon they were up against the professional band of Seattle, but did not suffer by the contrast. They played splendidly, the tone and taste being above the average, and the crowd listening were enraptured. The manager of the Seattle Band complimented them personally, and music lovers of New Westminster were never tired of showering bouquets on them.—An Onlooker's point of view.

The foregoing are extracts from the two papers mentioned, the latter a visitor from Vernon. They speak for themselves.

Cliff N. Borton, who had the arrangements in hand, deserves all kinds of credit for the manner in which the engagement was carried through. The boys were loyal to him throughout the whole engagement, and were all enthusiastic with the way in which they were received. Every individual member felt that he was responsible for the success of the trip, and with this feeling in the band, it could not help but be successful, and every night the conductor, Mr. Pearce, was called upon to give encores.

The advertisement for Summerland must have been incalculable, as everybody at the show was taken up with the splendid representatives from our town, and money was never better spent.

On the home journey they had a trial by jury, with the porter in charge as plaintiff, and they ultimately found verdict in his favor, and presented him with a purse of \$15.

At Sicamous a woman was found who had just been bereaved of her husband while travelling through, and as she had a number of small children, the boys contributed a good fat purse to relieve her of her temporary destitution.

**WALKER'S FIRST PRODUCTION.**

**Robert Meikle Concert.**

Robert Meikle, the well-known Scotch baritone, supported with Frank Lloyd, humorist, Miss Nannie Strachan, soprano, and Miss Nellie Malcolm, accompanist, gave the first of a series of entertainments from the Walker Theatre, Winnipeg, on Thursday evening, in the Men's Club. A fairly large audience greeted each performer with cheers, and encores were the order of the evening.

Mr. Meikle was most at home in his song "March of the Cameron Men," also in the old-English duet with Miss Strachan, "Madam, will you walk with me." Miss Strachan, in "Comin' thro' the Rye," proved herself an accomplished singer and actress combined. Mr. Lloyd caused great laughter every time he appeared. In his song, "For Months and Months, and Months," he fairly captivated the audience. Miss Malcolm is well-known to many here as a very clever pianist and accompanist, and she upheld her splendid reputation. The whole entertainment was first-class, and a fitting introduction to the exceptional productions sent out by Mr. Walker. The climax of the evening was reached in the unaccompanied quartette, "Sweet and Low," which went splendidly until Mr. Lloyd brought the house down with one of his many little tricks, and the artistes then switched off on to "God save the King."

**CONDITIONS GOVERNING SHIPMENTS OF APPLES TO THE BRITISH ISLES.**

Any person in British Columbia can ship one or more boxes.

The boxes must be addressed plainly on one end. Paint the address on as paper is liable to be marred.

Pack in the regular apple box.

Send only fancy apples and of good variety.

The Vernon Board of Trade will only deliver to the nearest station unless sent to a town which has an express office.

The sum of one dollar and fifty cents pays for the carriage of one box of apples from Vernon to the nearest station where your friends reside. You will have to inform them that a box is being sent.

All fruit must arrive at the Okanagan Fruit Union warehouse, Vernon, not later than Saturday, October 22nd.

In forwarding the apples to Vernon, nail a label on one end addressed H. P. Lee, care of Fruit Union, Vernon (be sure and prepay freight charges to Vernon)

In forwarding money send only Express or Postal Orders. Shipment will not go forward unless \$1.50 per box is sent.

Let H. P. Lee know by return mail how many boxes you wish to send and to whom they will be addressed.

The boxes must LEAVE Summerland on the 20th inst., the 21st will be too late. (This means that they must be at the wharf before 6 o'clock on Wednesday.)

Freight from Summerland to Vernon is 27c. per 100 lbs. Average box of apples weighs 45 lbs.

**UNRIVALLED IN ITS BEAUTY,** its location, and the excellence of its soil, is our new fruit land proposition on the west shore of Dog Lake in the sunny southern Okanagan Valley.

Here fronting on one of the finest inland sheets of water, with a full eastern exposure, and on which the sun shines forth in all its glorious splendor, are to be found hundreds of acres without stones, without timber, without alkali. Here the most punctilious fruit grower can be satisfied in the way of orchard land. One of the great outstanding features is that all irrigation and domestic water supply will come through a pressure pipe system.

**DOES SUCH A PROPOSITION APPEAL TO YOU?** If it does write us and we will only be too glad to give you all the desired information

**JAMES RITCHIE**

**PARKDALE**

**SUMMERLAND**

**WHY SHE DIDN'T ATTEND SUNDAY SCHOOL.**

It seems very easy to find an excuse these days for not attending church or Sunday School. But here's one that carries off the ribbon:

"Were you to Sunday School to-day, Mary?" was asked of a six-year-old.

"No, 'cause it's muddy, an' Mama put a clean dress on me, and when you lose the money you must give the preacher, you get your skirts muddy when you go to look for it."

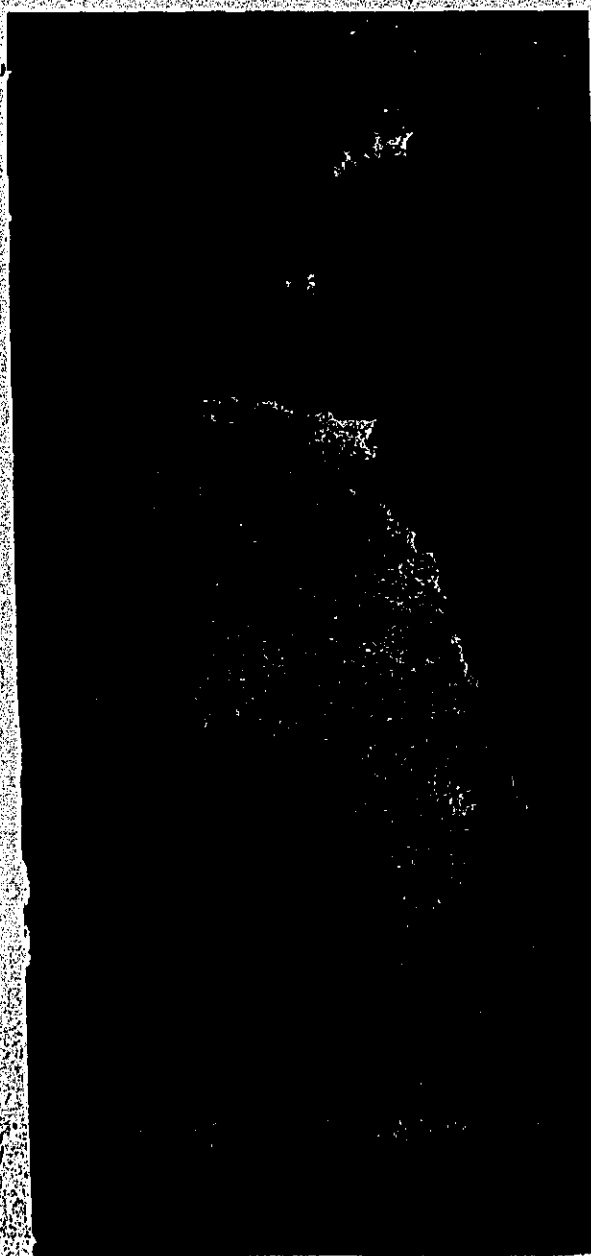

**THE MARKET FOR OUR FRUIT.**

"But where will we market the fruit from all these orchards being set out in the Okanagan? Will the market not be over-supplied?" This and similar questions are not unusual. And to one who does not understand, the question might seem reasonable. But listen! Northwest Canada has one hundred and seventy million acres of arable land, and only about ten million acres are under the plow. For twenty years Canada has been settling up these vast acres. The 'settling up' process will continue for another hundred years, and still we shall have millions of acres to be settled upon. Upon these millions of acres Canada is placing thousands of homes. In these thousands of homes—increasing every year—there are thousands of mouths to feed—and they all want fruit—our fruit. Market! Bless me; there is the demand for carloads where we cannot supply barrells! We must put thousands of acres into more fruit! Peaches, apricots, nectarines, plums, apples and pears! The demand is growing faster than the trees can develop. We are but a small part of British Columbia, but there is no fruit quite so good as the fruit of the Okanagan, and none better than that of the Peach Belt.

**APPLE SHOW.**

Arrangements have been made with The Okanagan Fruit Union for the use of the new packing house at the C. P. R. wharf for the Apple Show. Exhibitors are reminded that the exhibits must be in their place at the Packing House by 6 p. m. on the evening of Tuesday, the 18th. Exception will be made for bread and cut flowers which will be received up till 10 a. m. on the day of the exhibition. The judging in the various classes will be conducted in the forenoon, and the Show will be open to the public in the afternoon and evening. The band will be in attendance.

CIVIL ENGINEER AND LAND SURVEYOR,  
PENTICTON, B.C.

P. O. Box 228.

TAKE NOTICE that the Penticton Lumber Syndicate Limited, did, on or about the twenty third day of September 1910, deposit with the Minister of Public Works, Ottawa, Ontario, an application for permission to boom and construct certain works on the Okanagan River, in the Province of British Columbia, together with the plans and description of the proposed site.

Dated at Penticton this 23rd day of September, 1910,

Hugh Lior,  
Secretary Treasurer of the said  
Penticton Lumber Syndicate Ltd.

**E. SHARP,**  
Milliner,

TROUT CREEK, SUMMERLAND.

JUST OVER THE HILL.

The peach belt of the Okanagan is on the eve of the greatest development it has experienced in its history. This statement may sound strange to one who has watched the phenomenal growth of Summerland and her sister towns in the past six or seven years. But it will be understood next season, and to a greater extent still in the season following, when the peach orchards now coming into bearing will have developed to a fuller capacity, and there will be other hundreds of acres set out to orchards in addition to the hundreds already producing. It will be understood when additional railway facilities make it possible to get the fruit to market more quickly and in better condition. It will be understood when the demand for Okanagan peaches will come from every market in the east and north-west. It will be understood when this increased demand brings with it hundreds of fruit growers from other sections with thousands of dollars to put into orchards already producing, or into the making of new orchards on land now producing nothing. It will be understood when the beautiful homes now in the making up and down our fertile hills and valleys have, so to speak, matured, offering to the hundreds of retiring business men of the east real evidence of what is offered to them here as a homeland envied by the quiet of the hills and the majesty of Nature, and yet with all the conveniences and comforts of metropolitan life. It will be understood when the experimental stage has been passed, and men can let drive into the future with the certain knowledge of what the outcome will be. It will be understood when, in addi-

tion to our peach orchards, we can point to thousands of apricot trees in full bearing burdened with delicious fruit. It will be understood when it is known that in addition to peaches, nectarines, apricots and plums we can also produce the highest quality of apples and pears.

There are, indeed, so many many features to make the district great that we wonder so many of them have thus far escaped the eye of capital and industry. The fruit crop of the present season has done much to open the eyes of those who did not know. It has also increased the faith of our own people— if increase in faith were necessary—and we can strike out stronger than ever in the knowledge that every blow is certain to bring rich returns.

Looking into the future but a few years, we can see every acre of arable land overlooking the Okanagan Lake or out upon the valleys and hills, planted to fruit trees or producing the high priced delicacies for the table market. And every point of prominence will have builded thereon the home of one of Canada's retired merchant princes.

In the measure that we have prepared for the future, we shall advance upon it and extract therefrom the good things we are prepared to receive. We have been extremely fortunate at Peachland, Summerland and Naramata, in having in our people the skill and wisdom, and the indomitable spirit, so essential in laying the foundation for a community such as ours.

Our men have had ambition and initiative, and they have had capital to back this up. They have been teachable, and knew how to go about it to acquire the knowledge required. Money can be borrowed, but character, industry, potential efficiency must exist in the man. These must be self-developed. And in the men who have assisted in laying the foundation of Summerland and her sister towns, they have been prominent characteristics. And upon every institution established here these men have left their impress—an impress that will not wear off.

In after years we shall see the results of their good work, perhaps more clearly than we do now. It can never be effectually erased. It need never be. Indeed, it should be our aim, and the aim of those who come after, to endeavor to add to the good work they have done. That it will be added to, and greatly, is certain. We have but the foundation laid, the structure will be started the next year or two. Ten years is not long in a district so favored as

this. It is but a step. But in that time we shall see the skeleton of the structure erected, after which will come the beauty of the building.

If one is seeking monetary wealth, the surest investment we know of is in Okanagan Lake property. One cannot miss it. But monetary wealth, after all, is but secondary. The pleasures of good health and a contented mind mid scenery such as we have here, and a bountiful harvest always assured, are not to be forgotten. And these things are assured every man and woman who comes here determined to live his or her best.

But where will we market the fruit from all these orchards being set out in

EVIDENCES OF OUR DEVELOPMENT

There is nothing which speaks more eloquently of the development of Canada in general and British Columbia in particular, than the phenomenal progress being made in the construction of railroads; and the granting of charters for railway construction. It is estimated that within the next five years there will be no less than 7000 miles of railway constructed and brought into operation in Canada. This year track will be laid for 1,500 miles of new roads, which is about the same as was laid last year. At this rate we shall see Canada within the next ten years with a railroad system of not less than 44,000 miles. Australia, our sister Dominion, judging by her present annual increase in railway building, will have but 17,000 miles.

EDWARDS ACQUITTED.

Perhaps no newspaper man in the Dominion has had more evil things said about him by people who did not understand him and did not know what they were talking about, than R. C. Edwards, editor of the Eye-Opener, once of Calgary, now of Winnipeg. He has been chased from pillar to post first by his political enemies, then by the postal authorities, and last by the Lord's Day Alliance people. But Truth will not down—and Edwards tells a great deal of it in his Eye-Opener, along with a great deal which is not the truth—or which the common mind prefers to believe is not the truth. We may be wrong, but it would seem that the Eye-Opener editor is more sinned against than sinning. Last week before Judge Walker, of Winnipeg, Mr. Edwards was acquitted of the charge laid against him by the Lord's Day Alliance.

**"THE KING, LONG LIVE THE KING."**

Portugal is the latest of the European powers to turn away from this altar of the ancients and lift up the banner of The People. Portugal is small, and one of the insignificant kingdoms, and therefore the change in the form of government will have little or no effect, either upon the other monarchies or the commerce of the world. King Manuel has been here; he has gone. He has left a good name behind. The world is getting better. We have not the need of kings we used to have. We are beginning to realize that every man who is a king at heart is a king indeed—and no one else is or can be.

**BETWEEN ME AND HANK**

Disuse will kill anything. We must utilize the talent that is ours, if we are to keep it. I do not know of a sadder sight than to see a man who complains of his inability to do something which he hears some other man lauded for doing. I do not know any man, however great he may be, with whom I should wish to exchange places. Greatness is not in being praised and talked about. Greatness lies in being sincere in the work you have in hand, and faithful in carrying out the mission that is yours though no man may ever see the result of your work and know it to be yours, or know the mission you are sent upon. It may be only in the patience and smile, the kindness and cheer, in the home. It may be that we need only to lift the load of sadness from the hearts of men and women we meet in our business associates. I do not know. But this sure! If we are not sincere, our work will not live. I would not say that sincerity is everything. I have seen some very sincere men who make a complete bungle of the job they were at. But I never have seen a man who sincerely tried to do that which he was commissioned to do, better than anyone else ever had done it before, who did not win out in the end.

There is a popular belief, and we generally accept it without argument, that some men are helped by God more than others—that He presides over the destinies of some men and nations and leaves others to shift for themselves. It was noticed in all the modern wars—Spanish-American, Boer-English and Russo-Japanese—how each army went into the field with prayers for victory from priest and chaplain. Each

prayed that God would be on their side, and when the battle was over, each army, in many instances, thanked God for the victory. In every instance, God was believed to be on the side of might. God is always thanked for victory, right or wrong. Might is right, and God is might. It was the same in Biblical days. How absurd it all is! The real question is not about God, and His power, either with nations or individuals. The real question is what are we doing with the God-power in us and through us, in our lives and our work.

A reception in honor of Miss Lloyd, Lady Superintendent of the Hospital, was given by the members of the Ladies' Auxiliary of the Hospital, on Tuesday afternoon in the Men's Club. The parlors were beautifully decorated with flowers and refreshments were served by the Ladies of the Auxiliary. A pleasant hour was spent by the Hospital Board and the ladies interested in the welfare of the institution.

## "BACK TO COLLEGE."

Roden Kingswill, in the Canadian Courier for October, writes very interestingly some thoughts inspired by the opening of college sessions.

From ten thousand Canadian homes says he, the hope of the family has gone forth to the big town, there to spend the next eight months in the pursuit of culture: the knowledge of men, sport, clothes, girls and the humanities. But, though he may not know, it his primary object in going to college is to learn how to do things. He needs education to make him effective as a workman. A good many people who have not enrolled at any college misconceive the object of a scholastic course. Once upon a time, for instance, R. P. Roblin, the Premier of Manitoba, was in a Pullman parlour with a man who happened to have put in a few years at the University of Toronto. Now, Mr. Roblin would probably be the last man on earth to deny that he is himself one of the brightest and shiniest Philistines that ever trod the prairie. In that Pullman aforesaid R. P. Roblin—as is his wont—proceeded to lay down the law aggressively. Higher education, he announced, was of no use to anybody. It had never made any man richer. Whereupon the collegian made bold to remark that if a man had to dig a post-hole he would do it better with a trained intellect and a trained intelligence than if he had neither.

"With the Roblin irenic habitude the Premier replied that his interlocuter was talking rot. No proof of earning power consequent upon the possession of an academic degree being shown, the degree was a worthless decoration. Q. E. D.

"Of course Mr. Roblin was wrong. Anybody who is not a Manitoba civil servant is at liberty to say so. Mr. Roblin was wrong because he looked cross-eyed at the situation. If any fond and self-denying parent believes that in sending his boy to college he is equipping him as a money-getter, that parent is fatally in error. If that parent wants a sure thing in the money-getting line, let him apprentice his son to some reputable pawnbroker. The profits are sure; the element of chance is eliminated; the hours are not long and the operation of a well-equipped loan office—with three balls outside—gives the proprietor the opportunity of becoming a student of human nature. And he is paid for doing it. This is not yet customary at ordinary universities.

"The Canadian college of to-day is large-

ly what its students make it. The President, it is true, has a certain amount of say-so, but the student body has its characteristics, each after its own kind. Nobody would mistake a McGill man for a Toronto man. And Toronto, owning the largest student body in what, for want of a better name, we call the British Empire, has the least strongly-marked type of them all. Queen's is *sui generis*. It used to be the gibe of McGill and Toronto men—it may be now—that the average Queen's man had never been in a larger town than Kingston until he visited Montreal or Toronto on a cut-rate football excursion. Students are rarely suave. Toronto is unsectarian—even, maybe Godless *qua* Sam Blake. And Toronto doesn't care. McGill is unsectarian. And McGill doesn't care. Queen's is Presbyterian. And Queen's does care, in a peculiar way. That way tends toward proving that, although Queen's is Presbyterian, it isn't Presbyterian. To this end, every so often there are issued from the Registrar's office at Kingston statements showing that in the student body the Presbyterians are in the minority. No outside understands why this is done. The answer is to be found in the arcana of the Board of Regents."

Malcolm M'Intyre, Dominion Emigration Agent, of St. Enoch's Square, Glasgow, was in town during a few days this week.

## Water Notice.

NOTICE is hereby given that an application will be made under Part V. of the "Water Act, 1909," to obtain a license in the Osoyoos Division of Yale District.

- (a) The name, address and occupation of the applicant is Charles Hagarth Whellams and Paul Amos Smith, Shingle Creek, B. C. Ranchers.
- (b) The name of the lake, stream or source is June Creek, being a tributary of Shingle Creek.
- (c) The point of diversion is near North line of applicants Pre-emption Claim, No. 5965, in Group 1, Osoyoos.
- (d) The quantity of water applied for is two cubic feet per second.
- (e) The character of the proposed works is a dam, ditch and flume.
- (f) The premises on which the water is to be used is Pre-emption Claim No. 5965, in Group 1, Osoyoos.
- (g) The purposes for which the water is to be used—Irrigation.
- (h) If for irrigation describe the land intended to be irrigated, giving acreage. Pre-emption Claim No. 5965, in group 1, Osoyoos, —320 acres.
- (i) Area of Crown land intended to be occupied by the proposed works—None.
- (k) This notice was posted on the 17th day of September, 1910, and application will be made to the Commissioner on the seventeenth day of October, 1910.
- (l) Give the names and addresses of any riparian proprietors or licensees who or whose lands are likely to be affected by the proposed works, either above or below the outlet—None.

CHAS. H. WHELLAM,  
PAUL A. SMITH.

Shingle Creek,  
Summerland B.C.

## WATER ACT, 1909.

BY DIRECTION of the Board of Investigation, Notice is hereby given that the Board will proceed to adjudicate upon claims to water on the following streams and tributaries thereto in the Similkameen and Osoyoos Water Districts, under authority of Part 3 of the Water Act, 1909.

### LECTURE ON SOCIALISM.

Gerald Desmond lectured on Socialism in the Men's Club, Thursday night, to an audience which followed his address throughout with the keenest interest. He took for his main thought the economic aspect of "Wages" from the standpoint of the laborer and small farmer.

He then quoted from Government reports showing that only 3 per cent. of the farmers of the United States and Canada received for their produce \$1000 per year, while the greater portion of them received \$400, thus placing the agriculturist on a lower level than many of the crafts of industrial workers.

He was unable to furnish figures as to

local conditions, but of course this average could not apply to such a favorably situated section as the Okanagan Valley and the Summerland district in particular.

This is the condition we have to face whether we like it or not, the cause is the vesting of the industries of the country into the hands of a few capitalists, and the remedy is the social ownership of all utilities which are socially operated. The workers can never get the full value of all they produce until the instruments of production are collectively owned.

At the close of the address, an interesting discussion took place and the speaker answered a number of questions with regard to different phases of the subject.

The Man who saves you dollars.

### :: Naramata Notes ::

Several fine lots are this fall being broken up preparatory to the Spring planting. The Socialistic Lecture in Summerland on Wednesday drew a fair representative on the 7.30 ferry.

Mr. and Mrs. Hancock have moved into their spacious new house recently built on their fruit lot.

Mrs. Block Sr. entertained on Tuesday afternoon in honor of Mrs. Wellband prior to this lady's departure for the East.

Mr. J. Miller of Calgary, is spending a few days at Naramata at "Kenwood" Orchard the guest of Mr. and Mrs. John Niblock.

Mrs. Wellband left this week for Toronto where she hopes to spend some months. Her two youngest children Master Donald and Miss Florence, accompanied her.

A small but choice display of apples grown by Mr. W. W. Mitchell is on view at the Hotel. This is worthy of special note being the first fruit of its kind grown at this point.

Mr. R. Munroe the manager of "Rakad-ona" Fruit Ranch is somewhat of a gardener. He is making an exhibit of garden produce at the Summerland Apple Show next week, that will likely prove this proposition.

A busy man is our popular preacher, Rev. G. O. Fallis who is demonstrating that he can do more than preach on Sunday and play base ball or tennis on Monday. This week he is proving up as a rattling fine teamster. When seen on Wednesday he claimed to have the excavating for the new church well under way. Mr. Fallis is superintending the preliminary stages of the work, besides rendering good practical assistance.

**EXCERPS FROM REPORT TO PRESIDENT OF  
B. C. F. G. A. KAMLOOPS.**

British Columbia.—Previous estimates as to extent of crop will be sustained. On the Island fruit will be much smaller than expected but color very fine. Fruit shown at the Victoria Exhibition far exceeded in color anything for several years.

Lower Mainland.—Here too the fruit will be rather undersized but of fine color. There is less scab than last year. In the Salmon Arm and Armstrong district fruit will also be on the small side, due to dry weather. There has been no injury from frost. Color will be good, and there will be a certain amount of scab. Lyton will ship 14 cars of good fruit and the Salmon Arm Armstrong district probably 30 to 45. In the Okanagan the crop will be up to estimates and color, as well as quality will be excellent. In the Grand Forks section fruit will be of good color, size and quality. In the Kootenay while somewhat undersized, due to drought, and with a small amount of scab, fruit will be on the whole excellent.

Summary.—Without allowing too much influence to the speculative movement in the East, the apple situation as a whole has clarified somewhat during the past month and the situation at present favors the movement of fruit at good prices. There is no reason why growers should not hold firm to prices based on those of the last report which will put our prices at a good figure.

There is a tendency to dump the cheaper grades of box fruit into our Prairie Provinces marked more or less loosely in accordance with our Fruit Marks Act. Our Commissioner, Mr. Metcalfe, will doubtless keep in touch with this feature of the American shipments and should have every support from British Columbia in the enforcement of a high grade of fruit from the American side.

On the whole, while there may be some opportunity to take advantage of speculative rises, shippers will do well in their regular trade to urge sales at prices made as already indicated rather than trust to speculation and a later rise.

R. M. Winslow,  
Prov. Agriculturalist.

The Ladies Aid in connection with the Presbyterian Church will provide light refreshments at the Apple Show on Wednesday, from 11.30 a.m., and during the afternoon will provide tea.

**PREPARING FOR OLD AGE.**

Every encouragement is given to people under the Annuities Act of Canada to make provision for old age. It is one of the broadest and safest and withal the best pieces of legislation we have seen. And the Dominion Government is doing all that can reasonably be done to induce people to take advantage of the Act. Under this annuities may be purchased by or for anyone domiciled in Canada. The system is elastic and can be adapted to the requirements of any person or association of persons. There is great simplicity as to payments: deposits can be made in any post office of such sums as the individual may set aside for the purpose. These accumulate at 4 per cent compound interest, and at the date fixed for the annuity to begin such an annuity as the total amount at his credit can purchase will be paid quarterly as long as he lives. The annuitant receives the benefit of every 25 cents paid in, without any deduction for expenses of any kind. Annuities may be purchased from \$50 up to \$600. The earliest age at which an annuity is payable is 55 years, except in the case of invalidity or disablement. In such a case, should the purchaser have at his credit sufficient to purchase an annuity of not less than \$50, payments will be made to him though he be under 55. If the amounts paid are not sufficient to secure an annuity of \$50, or should the annuitant die before the date named for the annuity to begin, all payments made, with 3 per cent. compound interest, will be returned. There are no lapses and no penalties, neither can the amounts paid in be withdrawn, and the annuity when it becomes payable is protected from attachment for debt or for any other cause. Should a man die at 60 the Government will return to his wife or heirs the amount paid in, with 3 per cent. compound interest. Should he desire to have the annual income guaranteed for twenty years, so that he or his heirs would in any event get back twenty annual payments of the annuity in question, this can be effected by an increase in his weekly payments.

**SCHOOL BOARD.**

The School Board have received two of the Nelson Shields. These are mounted on oak, and at the bottom a space is left to slip paper in with the name of the holder for the year. It may be used as the principal directs, for punctuality, or any form of achievement by scholars, essays etc.

### RICH RED BLOOD.

You Will Never Have It as Long as You Have Dyspepsia.

Just as long as you have dyspepsia your food will not properly digest, and the nutritious elements in the food will not be extracted or absorbed, and impoverished or watery blood will follow.

This condition may not be apparent at first, but it will come just as sure as the sun will rise again.

Any stomach ailment, including all forms of indigestion, can be promptly cured by using Mi-o-na tablets, a scientific treatment unsurpassed.

It stops fermentation, belching of gas and taste of sour food almost at once.

The mighty power of Mi-o-na to invigorate and restore the stomach to perfect condition is known everywhere.

Mi-o-na cures by building up—by banishing the cause. For thin people it is a great flesh builder, because it causes the stomach to give more and purer nutrition to the blood. It cures sea and car sickness and vomiting of pregnancy almost immediately. The Summerland Drug Co. sells Mi-o-na for 50 cents a large box, and guarantees it to cure or money back.

# HYOMEI

(PRONOUNCED HIGH-O-ME)

## THE APPLE SHOW.

### Wednesday's Show One of the Best in the Province Summerland Proves Once Again That she can Grow Apples Second to None Great Crowds Attend Local Exhibition

"A great day for the show" remarked one visitor to a friend, who immediately replied, "Yes, and a great show for the day." He was not far off the truth, for truly it was a great show, one of which Summerland need not be ashamed. As an apple growing district, we once more proved ourselves to be on a par with any other fruit growing country on the continent.

The array of fruit was beyond criticism—the flower and vegetable classes were also excellent, but one would like to see more competition in this particular class of exhibits, and no doubt, as the seasons come and go, we shall see a great growth, as the exhibits on view were proof enough as to what can be grown in the district. Naramata was by far the strongest in these classes. There were over 450 entries, and the judges, Mr. Winslow and Mr. Clark, for fruit, and Mr. W. Simpson for vegetables, had great difficulty oftentimes in deciding just where to place the prize. Commercial value of variety, character of fruit, and character of pack were the points which counted. In class I. for instance, there were several of the boxes opened at the side to see if the grading and coloring was uniform, and two exhibits, which were close runners, lost on uneven coloring—face packs not rating so high as uniform packs. The difference between the winner and loser of the second prize was only half a point, so the judging was very close. Another interesting item was the fact that the first prize consisted of Spitzenbergs, grown by Mr. James Gartrell at Trout Creek, fruit from these same trees has taken many gold and other medals at the Royal Horticultural Society's Show at London, England, during recent years.

Although most exhibits had the stems in them, Mr. Winslow noted one or two which were minus, and which had to be disqualified. This is important, and Summerland fruit-growers would do well to bear in mind that fruit without stems is not perfect, and rates as second-class. Twenty per cent. of the fruit taken to the packing houses this year was without stems—we cannot be too careful, and it is up to the fruitgrowers to watch very carefully this fault, as it is serious. Another fault which is to be emphasized is the bulge on the sides of the boxes—this is not allowable and is very bad packing and bad policy, as the boxes

are stacked on their sides, and fruit will be badly bruised if the boxes are bulged.

Mr. Winslow was greatly taken with the general run of exhibits, and thought that they were at least 50 per cent. better than last year, and there is no reason why it should not be as much better again next year. One thing he would suggest was that all box exhibits should be fastened down previously to exhibiting, and thus give all the growers the same chance. The decorating of the room was very creditably done, and helped the general ensemble of the exhibit wonderfully. Mrs. Wellband had a case of beautifully painted china on view, which had been executed by her pupils and herself—great interest centered round this artistic private exhibit.

Mr. Nelson had several large photographs on show also, and during the quiet of the morning exposed a few plates.

The crowd was in a good humor, and the band helped greatly the holiday feeling which prevailed, as did also the cup that cheers which was served by the ladies of the Presbyterian Church.

By-the-way, when you saw the strawberries—did it not take you back to the leafy month of June?

The following is the list of prize winners:

Class 1: Best 5 boxes of Winter Apples, any variety. 1 Jas. Gartrell, 2 Hy. Reynolds.

Class 2: Best 2 boxes of each of the following varieties:

Yellow Newtown, 1 H. C. Mellor, 2 J. J. Mitchell.

Spitzenberg, 1 H. Blomfield, 2 J. Gartrell.  
Winter Bahana, C. J. Thomson, 2 R. H. Agur.

Jonathan, 1 J. J. Mitchell, 2 S. M. Young.  
Wagener, 1 A. Stuart 2, H. C. Mellor.  
Northern Spy, 1 J. Gartrell 2, T. Dale.  
M'Intosh Red 1, L. C. Woodworth, W. R. Bartlet.

Grimes Golden Alex. Stuart.

Class 3—Best box of the following varieties:  
Rome Beauty 1, J. Gartrell, 2 C. J. Thomson.  
Baldwin, 1 H. Reynolds, C. J. Thomson.  
Rhode Island Greening 1, J. Gartrell, Alex. Stuart.

Gravenstein, Alex. Stuart.

Wealthy, Alex. Stuart, J. H. Doherty.

King of Tompkins, 1 Alex. Stuart, 2 Dunsdon Bros.

Cox's Orange Pippin, 1 Alex. Stuart, 2 R. H. Agur.

White Winter Pearmain, 1 J. Gartrell, 2 J. Ritchie.

Fameuse, C. J. Thomson, F. L. Osler.  
Best pack of Apples, 1 T. H. Hole, 2 Bert Nelson, 3 A. L. Deaver.

Class 4: Best box of Crab Apples (any variety) 1 S. M. Young, 2 T. Tait.

Class 5 Best Pyramid of Apples, C. H. Thomson, 2 R. H. Agur.

Class 15. Pan of home-made bread—Mrs. John Steuart, Mrs. J. J. Mitchell.

Class 16 General display of Honey—L. D. McCall.

The annual prize shoot will be held on Thanksgiving Day Oct. 31st. at 9 a. m. A good attendance is requested.

Harvest Home Service in Methodist Church on Sunday evening at 7 p. m. Subject "The Church and Materialism" special music.

Sunday at the Baptist Church, on the flat, 10.30 a. m., subject: "The Universal ministry. Down town, Elliots' Hall, 7 p. m., Subject; "The Young Man Who Missed It."

Owing to the S. S. Convention in Vernon, and absence from home, Mrs. Jno. Tait will postpone her "At Home" until Tuesday 15th and Wednesday 16th of November.

Mrs Livingstone of Ontario will speak to the ladies of Summerland at the home of Mrs. Lipsett on Tuesday afternoon Oct. 25th at 3 o'clock. On Wednesday Oct. 26th Mrs. Livingstone will address a public meeting at the Baptist Church at West Summerland at 8 o'clock. Subject "The Rational Question" A Collection will be taken.

George L. Munro, who has been residing in Kaleden for some little time, and who last week came to Summerland, passed away to his long rest on Thursday the 20th inst. He leaves a wife and four children, and the sympathy of the community goes out to them in their sad bereavement. Mr. Munro was a native of Pugwash, N.S. and was a Mason and also an Oddfellow.

## KELOWNA'S FRUIT PRIZES.

We heartily congratulate the citizens of our neighboring town on the lake on the splendid display of fruit at the New Westminster Fair. Kelowna, the "Orchard City," carried off the highest awards, both for individual and district exhibits.

## BY-LAW NO. 28.

A BY-LAW FOR RAISING \$2,500.00 FOR SCHOOL PURPOSES.

WHEREAS it is deemed advisable to erect a building for School purposes in the Municipality of Summerland.

AND WHEREAS the Government of the Province of British Columbia has agreed to contribute towards the construction of said building the sum of \$6,500.00, providing the Municipality contribute towards the same the sum of \$2,500.00.

AND WHEREAS it is necessary for the said purpose to raise by way of loan upon the credit of the Municipality of Summerland the said sum of \$2,500.00, payable on the first day of December, A.D. 1920, bearing interest in the meantime payable half-yearly at the rate of five per cent. per annum, the principal of such loan when raised to be applied for the purposes aforesaid.

AND WHEREAS for the payment of the said principal and interest it is necessary to raise the sum of \$333.23, by rate in each and every year.

AND WHEREAS the whole rateable property of the Municipality of Summerland, according to the last revised assessment roll, is \$1,522,000.00.

AND WHEREAS the total amount of existing Debenture debt of the said Municipality of Summerland is \$285,000.00, of which none of the interest or principal is in arrears.

NOW THEREFORE, the Reeve and Council of the Municipality of Summerland, in open meeting assembled, enact as follows:

1. It shall be lawful for the Reeve of the Municipality of Summerland to raise by way of loan from any person or persons, body or bodies corporate, who may be willing to advance the same on the credit of the said Municipality by way of the Debentures hereinafter mentioned a sum of money not to exceed in the whole the sum of \$2,500.00, and to cause all such sums so raised and received to be paid into the hands of the Treasurer of the said Municipality, for the purposes and with the objects hereinbefore recited.

2. It shall be lawful for the said Reeve to cause any number of Debentures to be made for the sum of not less than \$500.00 each, bearing interest at the rate of five per cent. per annum, not exceeding in the whole the sum of \$2,500.00, and all such Debentures shall be sealed with the seal of the Municipality of Summerland, signed by the Reeve and countersigned by the Treasurer of the said Municipality.

3. The said Debentures shall bear date the first day of December, A.D. 1910, and shall be made payable in ten years from the date hereinafter named for this By-Law to take effect at the Bank of Montreal, Summerland, British Columbia.

4. The said Debentures shall have coupons attached for the payment of interest at the rate of five per cent. per annum on the amount of the said Debentures, and such interest shall be payable half-yearly on the first day of June and December in each and every year, and the signatures to such coupons may be either written, stamped, printed or lithographed.

5. A rate on the dollar shall be levied and shall be raised annually in addition to all other rates on all the rateable property of the Municipality to pay interest on the debt hereby created, during the currency of the said Debentures, and to provide for the payment of the said debt when due.

6. The sum of \$125.00 shall be raised and levied annually by a rate on all the rateable property in the said Municipality of Summerland, in addition to all the other rates for the payment of the interest on the said Debentures.

7. The sum of \$208.23 shall be raised and levied annually by a rate on all the rateable property in the said Municipality of Summerland, in addition to all other rates, for the payment of the debt hereby created when due.

8. It shall be lawful for the said Municipality, from time to time, to repurchase any of the said Debentures at such price or prices as may be mutually agreed upon, and all Debentures so repurchased shall forthwith be cancelled, and no reissue of any Debenture or Debentures shall be made in consequence of such re-purchase.

9. This By-Law shall, before the final passage thereof, receive the assent of the electors of the said Municipality of Summerland in the manner provided for by the "Municipal Clauses Act," 1906 and amending Acts.

10. This By-Law shall come into force and take effect on the first day of December, A.D. 1910.

11. This By-Law may be cited for all purposes as the "Municipality of Summerland School Loan By-Law, 1910."

Passed by the Municipal Council this 10th day of October, 1910.

Received the assent of the electors of the Municipality of Summerland the day of October, 1910.

Reconsidered and finally passed by the Municipal Council the day of November, 1910.

Clerk.

Reeve.

TAKE NOTICE that the above is a true copy of the proposed By-Law upon which the vote of the Electors of the Municipality will be taken on Saturday, October 29th, 1910, between the hours of nine a.m. and seven p.m., in the Council Chamber, Summerland.

J. L. LOGIE,  
Municipal Clerk.

PRUNING Wanted, 15 years experience in fruit culture. W. E. Thomas, West Summerland P.O.

## NOTICE.

Municipality of the Corporation of Summerland to wit:

PUBLIC NOTICE is hereby given to the Electors of the Municipality aforesaid that the following By-Law has been passed by the Municipal Council and which require the assent of the Electors, viz: No. 28, A By-Law to raise \$2,520 to erect a building for School Purposes in the Municipality of Summerland. Such poll will be opened on Saturday, the 29th day of October, at the Council Chamber, Summerland, between the hours of 9 a.m. and 7 p.m., of which all persons are hereby required to take notice and govern themselves accordingly.

Given under my hand at Summerland, this eleventh day of October, 1910.

J. L. LOGIE,  
Returning Officer.

## BLACKBALLED, BUT TRUE.

A good example of the kind of story Mark Twain used to like to weave into his after-dinner speeches was the tale of the drinker who unwillingly put in an application for a membership in a temperance society, sailed the next day on a three years voyage, on which he kept his pledge in spite of longing and temptation, and returned to resign only to find that his name had been blackballed originally.

### WHAT THE FUTURE PROMISES.

If there is any country under the sun that promises so much to the young man or the young woman as Canada, we have not yet heard of it. And if there is any part of the dominion of Canada where the future can be so safely staked upon as in the Okahagan Valley we have yet to be told about it.

Are we making the most of it?

Are we doing our part?

Are we prepared to listen, weigh, analyze, sift, eliminate, and in the end use our own commonsense?

Is our confidence in the outcome supreme?

Have we faith? Are we willing to put our

life and money for three or five years into the venture before we see the cash move our way?

Are we strong enough to wave all scoffers back and push ahead in the face of those who cry fool?

Have we the courage of our convictions: are we big enough to believe in ourselves and do the thing the way we see it? The future promises the most to the man who is prepared to give most in return for what is received.

Extract from a young lady's letter from Venice: "Last night I lay in a gondola in the Grand Canal, drinking it all in, and life never seemed so full before."--Lippincott's.

### THE DOMINION'S DEVELOPMENT.

Canada's wonderful resources, and their rapid development are never-failing themes. It is predicted by Mr. Graham, Minister of Railways and Canals, that the decennial census next year will reveal an increase of more than 60 per cent. in the population of the Dominion, bringing the total up to eight millions. He confidently predicts that by the end of 1920 Canada's inhabitants will number at least 15,000,000. During the past decade 44,412 settlers have entered Canada from the United States. Of these, 43 per cent. have made homestead entries in the West, and they have brought with them, in cash and settlers' effects, upwards of \$400,000,000. "Right at the foundation of our efforts to exploit our great heritage," proceeded Mr. Graham, "lies a clear and definite purpose with respect to railways. Since the twentieth century began we have increased our railway mileage from 17,657 to 24,104—equal to 37 per cent. as compared with 19 per cent. in the United States. About 4,500 miles of line are under actual construction at this moment. No country in the world has done as much to encourage railway construction as has Canada. In the first place, out of the Federal Treasury has been paid \$27,110,000 in cash subsidies, to which the Provinces have added \$35,585,000, and municipalities 17,824,000. The Dominion and Provinces operate 2,039 miles of line, representing a capital cost of \$111,545,000. But that is far from being all Canada has done or is doing to develop her railway interests. The Dominion and Provinces have given 44,116,017 acres of land and at least \$100,000,000 in guarantees, so that, directly and indirectly, the aggregate aid might be placed at \$750,000,000, or \$100 per head for every man woman, and child in the country. In addition to all this, the investment of private capital in the railways of Canada amounts to \$1,308,480,000."

### THE OVER-SEAS CLUB.

Mr. C. A. Marshall is the local secretary for this club and its creed is as follows:

"Believing the British Empire to stand for justice, freedom, order and good government, we pledge ourselves, as citizens of the greatest Empire in the world, to maintain the heritage handed down to us by our fathers."

The objects of the club:

To help one another.

To urge on every able-bodied man the necessity of being able to bear arms.

To draw together in the bond of comradeship the peoples now living under the folds of the British flag.

To insist on the vital necessity to the Empire of British supremacy on the sea.

An important feature of the new organization will be the institution of a Correspondence Club, by means of which lonely readers will be put into touch with fellow-members in all parts of the world.

**:: Naramata Notes ::**

Miss Bessie Mitchell, has returned from her recent trip to Vancouver.

Mr. W. Land is again renewing acquaintances after several months absence from town.

Mr. Geo. Cook has sufficiently recovered from the effects of his lengthy illness to be able to walk about a little each day.

Mr. W. R. Bartlett our genial post master had quite a display at Summerland of fruit grown at his Peachland Orchard and carried off the honors in several classes.

Rev. Frank Hardy, Methodist pastor from Summerland filled the pulpit on Sunday morning last. Having exchanged services with Rev. G. O. Fallis of Pentecost.

It is of course to premature for us to talk about a fruit display at Naramata for a few years, yet, but do you know that we may see a "Flower" Show put on the boards for Naramata next year.

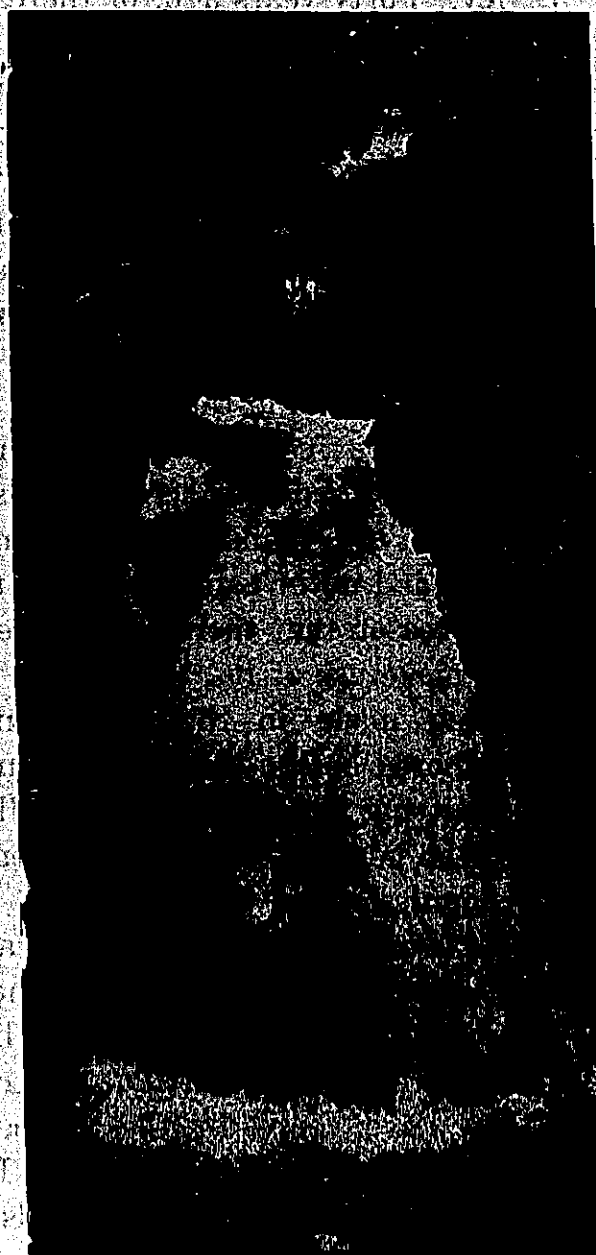

A special ferry was chartered by Mr. Robinson at 3 p. m. on wednesday in order to allow the pupils of the public school an opportunity to get across the lake to the Apple Show.

Messrs. D. Munroe of "Rakadome," ranch and J. Aveson—who is in charge of the Greenhouse and gardens of the Trust Co. are deservedly proud of having carried off most of the prizes for flowers and garden produce at this weeks show at Summerland.

The young ladies of the Sigma Delta Club had a meeting on Thursday evening at the home of Miss Adelaide Hayward. After the meeting the club repaired to the grand stand beach where the young gentlemen of the town had prepared on a camp fire a huge beef steak roast. A very jolly time was spent Mr. and Mrs. Wolstencroft and Mr. and Mrs. Dean played the part of chaperons to the satisfaction of all.

Next Sabbath promises us three services: The regular morning service at eleven, another in the afternoon at 3 o'clock by Rev. H. Solly, and the evening service will be addressed by Mrs. A. L. Gillespie. At the morning session both church and Sunday School will assemble at eleven at which time P. D. Knox of Peachland will preach and assist the pastor, in a grand children's rally. The whole community are invited to join us in this service of song and praise.

**NARAMATA, B.C.**

Or better yet, call and see us.

The Okanagan had a slight tiff with the wharf on Monday night, in which both boat and wharf came in for a fair share of damage as a result of the collision. The excitement didn't last long. Just at the time however it looked a little serious for a bevy of girls at the far end. The way with which these latter lit out for the safe end was certainly not slow.

Now a word about next Thursday: October 27th. Better stick the date in your hat. Its not Thanksgiving day of course but 'twill be a day of big things nevertheless. The ladies are planning for a Turkey Dinner, to be served in the Hall. Proceeds in aid of the building fund for the

new Church. The dinner will be followed by a program of songs and instrumental music—part of which latter may be furnished by an orchestra now being organized. Think of this again—The Big Turkey Dinner.

**CANADIAN PEACHES IN LONDON.**

The first commercial consignment of Canadian peaches to be made to London, England were made during the past season starting early in September and continuing weekly throughout the peach season. The fruit was immediately distributed for sale to all parts of the United Kingdom on the arrival of the boats. This is the culmination of a series of experiments covering a period of five years, and was very successful.

The quicker you  
get a good thing

### UNUSED, FERTILE LANDS.

There is no question more insistent in its demand for consideration than that of the unused thousands of acres tied up in this Province in the Indian reserves. The question has been picked up by the press now and then and the injustice of the thing shown up, but after a few articles have appeared, the matter has been laid down again, with, apparently, nothing gained. But every article that has appeared in the press of the Province has had some effect. Every earnest effort to show wherein our policy in dealing with the Indians is weak has resulted in bringing to the public eye a little more light and a clearer understanding. These apparently fruitless efforts have prepared the way for the crusade which now seems imminent—a crusade against the government's laxity in bringing the matter of the Indian lands up for consideration. A despatch from Ottawa says that Rev. A. G. O'Mara, Hamilton Cassels, K.C., and Canon Tucker of Montreal, representing the Moral Reform Association of Canada, saw Sir Wilfrid Laurier and Hon. Frank Oliver a few days ago, and asked that some definite steps be taken by the Dominion Government to settle the question of the title of Indian Lands in British Columbia by a submission of the case to the Privy Council or by some other means.

The deputation pointed out that the Indians claim their lands, but that they are being disposed of in various ways to white men, particularly to railways, and serious consequences may result. The deputation also spoke of the possibility of an uprising of Indians if something were not done.

Sir Wilfrid said he was willing to have the matter settled, but intimated that he did not desire to take the initiative without the consent of the British Columbia Government, which does not recognise the character of the claims put forward by the Indians.

While we who understand the disposition of the Indians better in the matter of these lands will question seriously the reference in the

dispatch to the possibility of an uprising, and also, the statement that the Indians are being dispossessed of their land, we cannot but receive with pleasure the assurance that the question is to be taken up by the department. Anything looking to the formulation of a policy which will treat the Indian with fairness and at the same time give the white man some consideration, will be received with gladness.

In British Columbia we have no Indian policy. Forty years ago, or thereabouts, the Province gave the Dominion the use of all the land required for Indian reserves, to be used as such so long as the Indians occupied it, and when the Indians were ready to give it up, then the title of the lands was to revert to the Province. Under this agreement a commission was appointed to go over the Province and select the lands necessary—say 200 acres for every Indian then living. The best land in the Province was selected, hence we have many thousands of acres held as Indian reserve land in the Okanagan, which never has been used and never can be used by the Indians for the reason that there are not enough Indians to make use of it. When the selections were being made in the Okanagan, the Indians gathered before the commission at each point of sitting and the land was allotted according to the number of Indians present. When the commission moved to another point, the Indians moved also, and, as all Indians look alike, the lands were apportioned as before. It is said that many of the same band of Indians appeared at each sitting of the commission. We have, here in the Okanagan therefore, thousands of acres tied up in Indian reserves where we should have hundreds, and as the Indians never have been, and never will be or can be produced, numerous enough to occupy it, these lands will always remain unused and unoccupied so long as they are tied up in "reserves." Under the law regulating these reserves, if it can be said there is a law, we have made the Indian more a dependent than we found him. We threw about him the fostering care of the priest and dumped him upon a lot of land that he did not know how to till, and gave him no instructions as to the working of the land, and no implements with which to work it. We took from him the laws which made him useful as a savage, and gave him the laws of civilization without giving him any means by which he could become civilized or useful under them. We gave no free schools, we gave him no free church, we gave him no freedom but to sit down upon his land and decay. On the face of it, we wanted to be kind to the Indian—we wanted to give him something that was already his. But in reality, we placed him within limits of restraint, there to fall to pieces and slowly perish by hand of civilization. We made it possible for him to acquire our vices and none of our virtues. We have given him the worst we have, and we have made it impossible for him to break through the shroud of ignorance and reach some of the light that is ours.

Perhaps our forebears thought they were doing the right thing by the Indian, but later developments have proved they were wrong.

The thought apparently was and has been that, under the hand of civilization, the Indian would soon disintegrate, become diseased and finally extinct. They would not believe that the Indians could ever become educated, and the object seems to have been to make him harmless, that he might die "in the faith"—the sooner the better.

But the Indian today is crying for education. He sees what his brothers across the line have done and are doing under better conditions, and he wants the chance here. The United States with its 267,000 Indian population, has done infinitely better by them than we of Canada have by our 99,000. Long ago they discovered that the Indian was capable of civilizing. The vast Indian reserves were bought from the Indians by the government, and the proceeds from the sale of these lands devoted to the better housing, the better clothing, and the better educating of the Indians. First-class schools were established on the small reserves retained by the Indians; they were given the open church, open school, open government. They were enabled from the sale of the lands to provide themselves with the best of implements obtainable, and the best of horses. The best possible chances were given them, and they responded in a manner that surprised even those who claimed the most for them.

What those Indians have done, ours can do, and will do if given the opportunity. It will surprise one to learn from the Indian Department of the United States what the Red Men have accomplished since the unused reserve land was taken from them, and they were given the means to cultivate the smaller tracts. We must face the problem in British Columbia not alone for the Indian's welfare, but also for our own.

### THE MAN FROM BRUCE.

Perhaps no writer in Canadian journalism is better known than "Bruce" McConnell, of the Saturday Sunset, Vancouver. He is clever, and, what is of far more importance, he is sincere in his work. "Bruce" has made good fights for reforms which were demanded by the public, and in all of them he has carried his point. His success in carrying through the campaigns waged by him, seems to be due largely to the fact that he goes thoroughly into the root of the matter before launching upon the undertaking.

Mr. McConnell, accompanied by Mrs. McConnell, passed up the Valley during last week, after spending some days in the country south to the Boundary line. Mr. McConnell did not stop off at Summerland owing to his having to get out of the Okanagan by the week's end. He learned about our development and resources, however, and we shall no doubt see much from his virile pen of his impressions on the trip up the lake.

One of the objects, if not the main one, of Mr. McConnell's trip, was that he might get a thorough understanding of the question of the Indian reserve lands of the Okanagan. He is getting facts and statistics for a campaign he soon will launch in the Saturday Sunset, look-

ing to the opening up of these immense tracts of land to the white man, and at the same time the making of better conditions for the Indians.

Mr. McConnell is convinced that the Okanagan has the brightest future of any district in the Dominion. He sees here resources we have not yet thought of, and he feels that in a very few years the Okanagan lake district will be teeming with tourists, and business. The vast areas of fertile land pointed out to him which are tied up uselessly in reserves for Indians which do not exist, caused him to speak strongly on the subject of the Indian policy of the government. He felt that the matter should be forced upon the powers that be until the interests of the Indian and the white settlers are properly looked after.

One of the questions which presented itself to Mr. McConnell, is that of the fishing possibilities of Okanagan lake. He thought that now is the time to see to the stocking of the lake with an abundant supply of game fish. If the lake is already supplied, so much the better; it will give a good start. There is no doubt in his mind but that this district will soon become one of the most popular resorts for pleasure seekers in the west. He felt that the residents of the district did not fully grasp the importance of this phase of our development.

### BETWEEN ME AND HANK

Occasionally we hear a pessimistic plaint couched in words of warning that things are really not what they seem, and that all this prosperity that is so abundant in Canada, and particularly in the West, is but a sort of Jack o' lantern of over-estimated bliss—something designed by a malevolent providence to lead the people of this fair dominion into the swamp of dire disaster. But bless you, dear heart, though we must hear these discordant notes, we do not have to give way to them. We get in this life, and we'll get in the next, exactly what we prepare for—no more, no less. And there is nothing compelling about prosperity. If we prefer to use blue glasses to hide the golden glory of the sunrise, we may do so. The pessimist, like the poor, we have ever with us. But why should we turn from the great harvest of prosperity that honest effort and real worth has earned for the country, and search out the trivial needs of discontent and dissatisfaction. Life is so full of real blessings, real needs and real joys! The prosperity that to-day is Canada's; the songs of plenty that to-day are ours, are not fictitious. These songs come from the full hearts of happy and contented men and women—happy in the genuine fulness of freedom that comes from plenty honestly earned. And we

have good reason to believe that this happiness and this prosperity will continue. It is not a bubble founded on speculation and created by gambling. It is not confined to a few people. It is for all of us. It is yours; it is mine.

The spirit that is dominant in Canada today is not the ribald glee of a drunken man. The songs of plenty that rise from every home in the Okanagan are not based upon good things evilly acquired. These songs are more than justified by existing conditions and are warranted by prospects. The spirit of optimism that is ours is simple common sense. The most level-headed of our citizens are the most optimistic—and rightly so, for they see the things of to-day and the things that are to come as they really are and as they will be. Having earned the good things which are theirs they feel free to enjoy them honestly and to the full. Emerson laid down the law of compensation—we pay for what we get, and we can have what we want if we are prepared to pay the prize. We can not get something for nothing—and enjoy it.

**Local News Items.**

Mr. G. L. Parker, left town on Tuesday for an extended visit to his home in England.

Mr. H. Sutherland journeyed to Vernon on Tuesday to act on the Grand Jury at the Court there.

The Billiard Room at the hotel has been enlarged and another table has been ordered.

A splendid specimen of a Golden Eagle was shot on Monday at Fred Brents' place out at Shingle Creek.

Mr. A. Stark, of the Supply Co. left for a months holiday on Monday last. Harrison and the Coast cities are the places he intends to visit.

The Baptist services have been changed, and are to be held as follows: West Summerland at 10.30, Sunday School at 11.45, Elliot's Hall 7 p.m. Sunday School 11.30.

Public and High School and College juniors, played off a football game on Friday last on the College Campus, the former winning by 2-0. A good game was put up, no scoring taking place until the last 20 minutes.

Jack Conway who has been with the Supply Co. for about four years has been offered and has accepted a position with Leguimm Bros, Kelowna, for which place he left on Friday morning.

Fred Manchester who has been in connection with the hotel here since May last, and formerly who was in Real Estate at Naramata, leaves next Tuesday for California, where he has accepted a position.

On Tuesday the two first car loads of goods were landed at the new wharf. These were the first two cars to actually be placed on the wharf, and one contained coal for the College, the other consisted of lumber for Messrs. Nelson Brothers.

A company for the manufacture of fruit boxes and irrigation pipe has been formed at Penticton. They will have a capital of \$200,000 and hope to employ about 40 or 50 men who will be housed near the factory in premises built by the company.

The ladies of the College Auxiliary propose having a sale of fancy and useful articles on the afternoon and evening of Tuesday November 15th in the College Gymnasium. Proceeds to go toward furnishing the Library in the Ladies Building. Contributions from any interested will be gladly received.

In connection with the Apple Show at Vancouver special fares will be in vogue throughout the Dominion Tickets available from Oct. 29th to Nov. 9th at \$18.20 return from Summerland. These will be on sale from the 29th to Nov. 3rd.

It would not be a bad idea if owners of rigs, etc, during the dark hours of the night, would carry a light of some description. Up to the present there has not been any accident due to this negligence, but one or two very narrow escapes have been reported. "A miss is as good as a mile" but it is as well that we benefit by the experience of the "miss'es" of others.

"Every bullet has its billet." So the old proverb says, but it does not always work out, that the bullet arrives at the billet intended. It did last Saturday however, and a Coyote was the billet. He had been playing havoc amongst the chickens for some time past, and being seen in the distance he was fired at. The idea was to scare the beast, but to the surprise of the marksman, the marauder dropped dead. Measuring off the distance it proved to be 230 pases, and the little oftimes supposed inoffensive weapon of 22 caliber was used.

Tag Day has at last been recognised in Summerland. The Hospital Board fixed Wednesday of this week as being the most suitable time, being the Apple Show also, and the little red cross tag was quite a popular badges. The splendid total of \$161.05 was collected by the energetic young ladies, and the Hospital Board wish to convey their thanks for the very liberal responce. The box of chocolates offered to the most successful lady was won by Miss Cartwright. The first three stood as follows.

Miss Cartwright - . . . . .	\$33.80
Miss White - . . . . .	\$30.10
Miss Neve - . . . . .	\$28.00

Some very fine Cox's Orange Pippin apples are being exhibited in the windows of Messrs Geo. Lock and Co., of High-Street, some weighing threequarters of a pound. They were grown by an old Kirtonian (Mr. Wm. Snow) and sent by him from Summerland, British Columbia. The apple trees were sent to Mr. Snow by Mr. Lock at Christmas 1908, less than three years ago. The most remarkable thing is that they were out of the ground for eleven weeks befor reaching Mr. Snow. That such lovely apples should be picked from the same trees in so short a time shows the fruit-growing capabilities of British Columbia. - Crediton Chronicle, Devonshire England.

## Peachland Paragraphs.

Mr. H. McDougald spent Monday in Kelowna.

Mr. and Mrs. W. A. Lang and A. E. Hardie returned Tuesday from New Westminster Fair.

Mrs. M. N. Morrison and infant were passengers from Kelowna on Wednesday's boat.

Mrs. J. A. Morrin is paying a visit to her Peachland friends.

We have been very fortunate this fall in the matter of frosts, none have visited us so far. The lowest temperature recorded being 40 degrees above freezing. It looks as though we might reach the old record date of thirteen years ago for our first frost viz. Nov. 7th.

Mr. A. Baily, Postmaster Mr. John F. Burne, lawyer, and Dr. W. Knox, all of Kelowna, have laid aside their professional cares and responsibilities for a week and set out for a hunt up back of Glen Robinson. They were driven to the end of the road by Mr. T. McLaughlin.

The Northern Crown Bank has decided to open a branch here and have leased a part of Mr. J. A. Millers' building opposite the post office. This is a decided step in advance for us and it is to be hoped that Peachlanders will show their appreciation of this banks' enterprise and patronize them whenever possible.

Messrs C. W. Whyte and P. Murray representing a committee of the Presbyterian Church met the officials of the Methodist Church Wednesday evening to discuss some means whereby the church work of the denomination might be harmoniously and more economically carried on here. The discussion was of an entirely informal character but it is expected that it will lead to some definite steps being taken in the near future.

Mr. C. J. Thomson, who won first prize for best pyramid of apples with a splendid array of Winter Bananas, has sold them at a fancy price. They are to be shipped to California.

### PUBLIC MEETING

A public meeting will be held in Council Chamber, Summerland, at 2 o'clock p. m., on Monday, Oct. 24th, for the purpose of discussing the School Loan By-law. J. L. LOGIE, Sec. to School Board.

### POUND NOTICE

The following animals have been impounded and unless previously claimed will be sold at my stable on Saturday, Oct. 29th, at 2 p. m., to defray expenses, in accordance with the provisions of the by-law governing stray animals.

R. H. ENGLISH, Pound Keeper.

Description of animals:

1. Dark bay mare, about 4 years old. Brand P, on right hip.
2. Bay colt about 2 years old, (horse). Brand P, on right hip, and small star between eyes.
3. Bay horse colt, about 2 years old. Brand P, on right hip; 2 hind feet white, and white star on face.
4. Chestnut horse colt, about 2 years old. Brand P on right shoulder, 2 white hind feet, and white strip from between eyes and down over point of nose.

## A. B. Elliott

The Man who saves you dollars.

The Apple Show on Wednesday was formally opened by Mr. J. M. Robinson, in the unavoidable absence of the Hon. Price Ellison. He made a few brief remarks, and complimented the fruit growers of the district on the exceptional showing of fruit—an exhibit which would be hard to beat in any part of the globe. The markets of the world were well acquainted with the peaches of the district, and ere long they would be quite as well acquainted with our apples, as they would stand up against any other district's growth.

### CHURCH NOTICE.

**A SAFE FOR RADIUM.**

The high value of radium renders it necessary to exercise all possible caution in storing accumulations of this precious element. The first safe for radium has recently been constructed to the order of the British Radium Corporation. As the safe is entirely novel in design, a brief description of its structural characteristics will not be without interest to our readers says the SCIENTIFIC AMERICAN. That it should be burglar-proof was, of course, an essential condition; nor was this difficult of attainment. A requirement less easy to fulfil was that the safe should be proof against the escape of the radium itself. Steel would not serve the purpose, as radium emanations pass through the thickest armour plate as readily as sunlight passes through clear glass. Extensive investigations showed that practically the only metal which the radium emanations fail to penetrate is lead; but a leaden safe would not safeguard its contents from the attacks of skillful burglars. The plan ultimately adopted was to construct a safe within a safe; in other words, a leaden shell or coffer protected by a steel casing.

The inner safe is composed of pure lead three inches in thickness. The door is circular in form, and fits with such absolute precision that no ray can escape through the joints. Moreover, by means of a special contrivance, any slight looseness which may result from wear and tear in opening and closing the door can be readily adjusted.

To prevent the loss of accumulated radium emanations when the inner door of the safe is opened, two valves have been inserted. Before the door is opened, two tubes with mercury will be passed through, and these will collect and store the emanations.

The safe weighs a ton and a half; and although it is only about 3 feet in height, its contents—if ever it were filled with radium—would exceed \$5,000,000,000 in value at the current market price.

**BEAT THE DEVIL.**

A local minister had had a serious time in fighting the saloon element in his town and had not been backed up in his efforts by the members of his own church. This with other troubles had led to his resignation and in announcing his departure at his farewell sermon said:

"I am going to do something the devil has never done." They wondered what it could be. "I am going to leave C—."

### RICH RED BLOOD.

You Will Never Have It as Long as You Have Dyspepsia.

Just as long as you have dyspepsia your food will not properly digest, and the nutritious elements in the food will not be extracted or absorbed, and impoverished or watery blood will follow.

This condition may not be apparent at first, but it will come just as sure as the sun will rise again.

Any stomach ailment, including all forms of indigestion, can be promptly cured by using Mi-o-na tablets, a scientific treatment unsurpassed.

It stops fermentation, belching of gas and taste of sour food almost at once.

The mighty power of Mi-o-na to invigorate and restore the stomach to perfect condition is known everywhere.

Mi-o-na cures by building up—by banishing the cause. For thin people it is a great flesh builder, because it causes the stomach to give more and purer nutrition to the blood. It cures sea and car sickness and vomiting of pregnancy almost immediately. The Summerland Drug Co. sells Mi-o-na for 50 cents a large box, and guarantees it to cure or money back.

# HYOMEI

(PRONOUNCED HIGH-O-ME)

DEVOTED TO THE INTERESTS OF SUMMERLAND, PEACHLAND AND NARAMATA

Vol. 3, No. 13

SUMMERLAND, B.C., OCTOBER 29, 1910

Whole No. 117

## SIR THOMAS AT SUMMERLAND

The Distinguished President of the C. P. R., Accompanied by His Daughters and Fellow Officials of the Company, Pay a Visit to Okanagan's Peach Belt.

Summerland was distinctly honored on Friday last by a visit from Sir Thomas Shaughnessy and party, consisting of Sir. Thos. Shaughnessy, the Misses Shaughnessy, Mr. Wm. White, R. B. Angus, Mr. C. H. Hosmer, Mr. Switzer, chief engineer of the Western Division, Capt. Gore, and Mr. Kilpatrick, and the secretaries of the chief officials.

The S. S. Okanagan was placed at the service of the distinguished party for the day. At 8 a. m. the special train bearing the party arrived at Okanagan Landing and at once the visitors boarded the Okanagan and a straight run was made to Summerland, the boat arriving here shortly after 11 o'clock.

Mayor Agur and other civic officials, and President Thompson of the Agricultural Association, were taken on board by Mr. J. M. Robinson and introduced to Sir Thomas and party.

On landing at the C.P.R. wharf the party were escorted to the Apple Show building and there shown the splendid display of fruit on exhibition. It was most interesting to note the pleasure pictured on the faces of Sir Thomas and the Misses Shaughnessy, who are accompanying the party, as they saw Summerland's great fruit display. They were filled with admiration for the flower tables, the luscious red apples, the goldens and greens, and the baskets of grapes and splendidly-packed pears. It pleased the party particularly to be led to a table where the management had prepared a surprise in the shape of a magnificent box of apples for each member of the distinguished visitors.

A new variety of apple was exhibited by L. D. McCall of Peachland which is particularly fine in color and flavor and large and clean-skinned. The apple judges were unable to name it and Mr. Winslow tagged "Shaughnessy Reds". When Sir Thomas saw this he laughed heartily.

Sir Thomas is one of those big men that the world is better off for having seen and felt; quick of discernment and filled with admiration for the man who can produce the goods. He saw back of the plate of "Shaughnessy Reds," the spirit of initiative that put it there, and he waited the arrival of his daughters to call their attention to it. Laughingly, he said, it reminded him of an incident he had met with in his travels, "In one of the cities there lives an Irishman who is known as the

green grocer with red hair that lives on Shaughnessy Heights."

After the party had enjoyed the fruit display, Sir Thomas, Mr. White, Mr. Angus, Mr. Hosmer, the Misses Shaughnessy, and Mrs. Ackland, were taken in autos on a trip through the fruit orchards of Summerland. As they were about to take their cars Sir Thomas uncovered, and in a few words expressed his pleasure at seeing such a splendid exhibit of fruit. He was pleased to see the progress made and hoped to see on his return at another time still better things.

On the drive over Summerland Heights they were delighted. The warm sunshine, the clear blue sky overhead, and below them the placid waters of the lake; the shores golden with Autumn foliage, and the orchards through which they drove waving in the sunlight, made them feel that it was good to be here. And they came back to their boat in a very happy state of mind.

Sir Thomas here informed Mr. J. M. Robinson that he desired to see him in the boats' parlor. There on behalf of his party Sir Thomas presented Mr. Robinson with a cheque for \$600, in appreciation of his work at Summerland and in the Southern Okanagan.

Promptly at 1 o'clock Sir Thomas and party reappeared on the deck; the boat cast off and they were off. Three hearty cheers were given by the distinguished party as the boat moved away. These were returned from the shore, and the visit of Sir Thomas and party was at an end, the Okanagan returning direct to the Landing to place the visitors on the Shaughnessy Special.

### NEW INDUSTRY FOR SUMMERLAND.

There was organized in Summerland this week an industry which is sure to mean much to Summerland and district. It is known as the Lakeside Stock and Dairy, Ltd, and its officers are: Pres, Dr. Lipset; vice pres. and Manger, A. A. Derrick; Secretary Treas., F. Le Roy Black. The property purchased is known as the Robinson-Black acreage, and is admirably adapted to dairying, being well watered meadowland.

Mr. Derrick turned in his dairy stock in the

deal, and is now absent in the East purchasing additional cows. It is the purpose of the new company to conduct a thoroughly up-to-date dairy and stock farm and to this end will be erected a new building for the proper handling of the milk business of the Peach Belt.

### BOARD OF TRADE MEETING.

The Quarterly General Meeting of the Board of Trade was held at the office of the Secretary, on Tuesday, October 25th, 1910, at 3 p. m.

Present; Messrs Agur, Clouston, J. M. Sutherland, C. J. Bentley, W. H. Tait, White, Fetherstonhaugh and Secretary.

The minutes of the last quarterly meeting were read and confirmed.

Correspondence was then read and the Secretary reported having received many enquiries from prospective settlers in Canada, South America and England, to all of whom he had replied, sending also pamphlets in each case.

Among the correspondence was a circular letter from Mr. Winslow, re labor and a considerable part of the meeting was taken up with a discussion on this question, the Secretary being instructed to write to the Deputy Minister of Agriculture, giving the views of the Board and to turn his reply over to the Emigration Committee.

At the same time it was suggested that the Secretary ascertain from Mr. Scott the exact state of the law with regard to the liability of Nurserymen for trees being true to name.

The matter of advertising on the back of business envelopes was discussed at some length and was eventually turned over to the advertising committee and it was moved by Messrs. Clouston and Sutherland: That Mr. C. J. C. White's name be added to that committee. Carried.

The meeting then adjourned.

Miss Rose, who will be remembered by many in Summerland and her talk on the forming of Woman's Institute and Domestic Science, will visit Summerland again on the 10th. of November 1910, when a meeting will be held at 4 p. m. the place of the meeting will be given at a later date.

# The Summerland Review

## PROSPEROUS OKANAGAN.

"Bruce", in the Saturday Sunset, Vancouver, has this to say of conditions as he found them in his recent trip through the Okanagan: "What is necessary in capital and equipment for success in the Okanagan? If success is measured by the attainment of a moderate income, the establishment of a comfortable home amid ideal conditions of climate, a life in the open air, employment that calls for a healthy exercise of muscles and mind, the rearing and education of a family and the acquisition of competence in old age, if that is what is meant by success, I know of no spot in Canada where it may be attained more surely and easily upon a more modest investment than in the Okanagan.

"Suppose the prospective fruit grower wants to become established on a ten acre fruit plot. His land will cost from \$200 to \$300 per acre, a fair average being \$250. Usually he will pay a fifth of the purchase price down and the balance in instalments extending over four years at 6 per cent.

"If he prefers land already planted some companies offer land with year-old trees planted at \$75 per acre increase or say \$325. If he buys virgin soil it will cost him approximately as follows: First year trees and planting, \$50 to \$75 per acre; second year including spraying, pruning, irrigating etc., \$25 to \$30 an acre; the third year the same, fourth and fifth years \$30 to \$35 an acre. The sixth year his orchard will pay expenses.

"By the end of the fifth year he will have invested in land and orchard, taking the outside figures, \$455 per acre or \$4,550 for his ten acre plot. Fencing and tools etc., will require say another \$300 to \$600. His house and buildings are of course extra. In the meantime while his orchard is coming on he may raise vegetables or small fruits according to the adaptability of the soil.

"Some extraordinary returns have been secured in this way but it does not follow that the beginner without experience would be equally successful. However it may not be amiss to mention some of the results attained. Five and a half acres of onions produced 150 tons, worth \$4,500, ten acres of potatoes yielded \$2,800. One real estate firm asserts that tomatoes will produce \$1,000 to the acre, strawberries \$1000 to \$1,500 per acre, potatoes from \$300 to \$600 per acre and so on. Allowing for any exaggeration there may be in these figures it would appear that the orchardist is waiting for his trees to mature he should be able to produce from \$2,000 to \$3,000 per annum on his ten acre tract so that in five years he should be able to not only pay for his land and orchard but to make a very good living from it at the same time.

"His land which has cost him to make of it a producing orchard about \$450 an acre, will also have enhanced in value to from \$700 to \$1000 per acre, these prices and higher ones being commonly paid for bearing orchards. It will be seen that an industrious and energetic man with a modest capital of about \$2,000 may therefore put himself in the way of a secure income for the rest of his life

and in possession of a comfortable home.

"There are hundreds of instances in the Okanagan where intelligent, industrious men have started with even less and are now in comfort if not affluence, independent for the rest of their lives. There is no more independent man in the world than the one with a bearing orchard. No man with ordinary prudence or thrift need ever make a failure of his orchard or himself. He sells his crop on the tree for cash. His expenses are light, being mostly those of spraying, pruning and cultivation. He has between times plenty of leisure in which to cultivate his mind or pursue his hobbies. In the Okanagan he has opportunity for indulging in every healthful pursuit. There are polo clubs, rifle clubs, tennis and bowling in all the villages and improvement clubs of various kinds. He may hunt and fish or yacht or ride and the weather almost invariably invites him out of doors. His family have all the advantages of good schools and churches. He has free mail delivery to his door and telephones. He is in touch with the world and its doings or he can forget them if he wants to. When he has become established his income will enable him to travel some, in fact he may be in actuality what is usually regarded as an anomaly in Canada, a gentleman farmer."

"Bruce" also saw some things which did not please him. He tells about it: "Speaking of advertising I am constrained to make a few remarks on this subject. They apply to the hotels in the Okanagan itself. Although this is the zenith of the apple harvest and both apples and pears are at their best, yet not on a single hotel table in the valley have we met with fruit that was fit to eat yet alone fit to maintain the great reputation of that valley for these fruits. On the tables what fruit was to be had at all were mere culls, or wind-falls, ill-colored, ill-flavored and tough. A traveller who did not visit the packing houses or orchards of the district would certainly form a poor opinion of Okanagan fruit if he judged it all by the few miserable specimens which he would meet with in the Okanagan hotels. And the same might be said of vegetables. In a land teeming with garden products, where hundreds of acres of tomatoes are ripening in the fields none were ever seen upon the table of the Okanagan hotels. Canned peas, string beans and corn in a district where these vegetables are said to mature with a peerless flavor, were regular items on the bill of fare.

"At the C. P. R. hotel at Sicamous, Okanagan fruit figures on the bill-of-fare and the sample which was served to me was a slander on the Valley. It would have been very much better to have left Okanagan out of the bill-of-fare entirely than to associate it with the miserable stuff served up to travellers under that name.

"Travelers passing through the country naturally form their impressions and base their judgement of its products by those with which they come in contact. If they meet with poor stuff they naturally can say nothing good about it and there is little doubt that the fallacy

which has been widely published, that Okanagan apples are inferior to Ontario fruit has had its origin in the miserable stuff with which travellers have been served in British Columbia hotels.

"Okanagan hotels, in fact all hotels in all parts of the province would be doing their districts an inestimable service by seeing to it that only the best products of their district were served on their tables. By making a little effort in this direction they could establish not only a profitable reputation for themselves but for their districts.

"Of course Okanagan hotels are not the only sinners in this respect. You will get the poorest beef-steak on the prairies where beef is raised and shipped in trainloads to Europe. Often the poorest bread will be found in the country hotels of Manitoba. In Vancouver the fish served in hotels and restaurants is not always above suspicion and so it goes. There seems to be a shyness or an indifference to procuring what is best and easy to get of the products of their own district by hotels."

Walker and Chinley, the men charged with the murder of an Indian woman, were acquitted at the third trial given them, at Vernon, last Friday. The first trial resulted in a verdict of guilty, but a new trial was granted. The second trial the jury disagreed and the case was sent from Clinton to Vernon, for its third hearing, with the result above stated.

Vernon's Board of Trade has now a membership of 106. The Board is doing splendid work, and its meetings are attended by a large percentage of its members.

# The Summerland Review

## Local News Items.

Mr. W. Hespeler returned to Winnipeg on Friday morning.

The S.S. Kaleden has been laid up for the winter season.

Fred Williamson shot a grizzly bear near the Penticton dam some days ago.

The Rev. A. W. McLeod will conduct the services at the Baptist Church next Sunday.

The Plymouth Brethern hold services at Penticton every Sunday, in the Odd Fellows' Hall.

Mr. and Mrs. Thos. Collinge are spending a few weeks on a visit to friends in the coast cities.

Mr. E. B. May and wife returned from a four month's trip to the Old Country on Tuesday.

The wharf at Penticton is being widened 16 feet, the work of driving the piles being now well under way.

Overheard on the S. S. Okanagan: "Why does not Summerland clean up the lake shore, as is done here at Kelowna?"

Mr. and Mrs. Peters, of Okanagan Landing, recently received word of the loss of their son at sea off the coast of South America.

Mr. E. G. Hart, Assistant Circulation Manager of the Vancouver World, spent Thursday in Summerland in the interest of that publication.

The fruit packers employed by the local branch of the Vernon Fruit Union and Stirling and Pitcairn returned to their homes during the week.

Mr. J. M. Robinson left on Thursday for Toronto. After spending a short time with his family, he will make an extended trip to the Old Country on business.

From six pounds of seed potatoes, Mr. Huckell, of Okanagan Centre, this season cropped and sold 371 pounds, and in addition had 133 pounds of small potatoes.

Mr. A. G. Munn and family arrived in town last Thursday, from Harbor Grace, Newfoundland. They have moved on to their lot in the Trout Creek district, formerly owned by Mr. Melor of Summerland.

Geo. W. Clark, who was purser on the S. S. Kaleden the past summer, died a few days ago at Nelson, from typhoid fever. "Walley" had many friends at the different ports on the Okanagan lake, who will be deeply grieved to learn of his death.

It was a great pleasure for the Misses Shaughnessy last Friday, to be met at the wharf on the arrival of the Okanagan by their friend, Mrs. Ackland, who knew them before her marriage and removal to Summerland. It is the intention of the Misses Shaughnessy to spend some weeks with Mrs. Ackland sometime in the months of May and June.

Mr. Cyril Stackhouse arrived here on Mon-

day from Vancouver. For the past four years he has been with the Bank of British North America in a number of their branches. He has severed his connection with the Banking world, however, and expects to remain here permanently, having taken a position under Mr. C. S. Stevens on the Government and Local Telephone Systems.

Kelowna is sending a straight car of Jonathans to the Canadian Apple Show. There will be three mixed-carloads exhibits from the Okanagan Valley. The position taken by Mr. H. P. Lee before the Vernon Board of Trade at its last meeting, that it would be wiser for the different sections of the Valley to send straight carloads of the variety best adapted to the section, is no doubt a sound one, but the apple industry has not developed sufficiently far to make this possible. So the apple growers say.

Peach Orchard, Summerland.

**OPENING UP THE PROVINCE.**

The policy of the Provincial Government, under the leadership of the Hon. Richard McBride, has ever been one looking to the development of the vast territory heretofore untouched. Its railroad policy is transforming dormant districts into districts of great prosperity. Next in importance to its railway policy, stands its trunk road policy. The Minister of Public Works has stated that not only will transprovincial roads be constructed so as to make continuous highways from the coast to Alberta, but the department will also build a north-to-south transprovincial road. This road will be a continuation of the old Cariboo trail, which will follow the east bank of the Fraser river to a point opposite Fort George, thence by the Nechaco Valley to the divide separating the Nechaco Valley from the Buckley Valley as far as Hazelton; in all a distance of between 500 and 600 miles. The total number of miles to be built by the Government in these roads will be more than 1000 miles.

**CANADIAN APPLE SHOW.**

The gentlemen having in charge the Summerland car of apples for the Canadian Apple Show, worked well on to midnight last Friday, assisted by their packers, to get the fruit on the car, which was sent in that evening to carry the exhibit to Vancouver, and the car was ready to be taken north Saturday morning. The carload consisted of the best samples on exhibition at the Summerland Apple Show. We are not saying anything about it, but the carload that beats that from Summerland will have to be mighty—twice mighty—fine.

It is stated by the secretary of the show, that already eighteen entries have been made in the carload class, which is five carloads more than ever were exhibited heretofore at any national or international apple show or world's exposition. Records of previous apple shows indicate that for every entry in the carload class there was a half carload for all other exhibits of the show. At this rate Canada's first National Apple Show will have fully 25 carloads.

**DISTINGUISHED PARTY IN B. C.**

His Highness the Crown Prince of Hess, a relative of the Kaiser, traveling incognito as Baron Godendorf, and accompanied by Baron Schenck, an aide-de-camp to the German Emperor, Baron Riedessel, Mr. L. Garbau and Mr. L. O. Armstrong, colonization agent of the C. P. R., visited British Columbia last week. The distinguished gentlemen expressed themselves as delighted with the glories of the interior of British Columbia. In all their travels, they are reported as saying, they saw no scenery to rival that which they feasted their eyes upon for days in the Columbia River Valley south of Golden. They were much impressed with the possibilities of the Province for ranching and fruit growing.

**UNRIVALLED IN ITS BEAUTY,** its location, and the excellence of its soil, is our new fruit land proposition on the west shore of Dog Lake in the sunny southern Okanagan Valley.

Here fronting on one of the finest inland sheets of water, with a full eastern exposure, and on which the sun shines forth in all its glorious splendor, are to be found hundreds of acres without stones, without timber, without alkali. Here the most punctilious fruit grower can be satisfied in the way of orchard land. One of the great outstanding features is that all irrigation and domestic water supply will come through a pressure pipe system.

**DOES SUCH A PROPOSITION APPEAL TO YOU?** If it does write us and we will only be too glad to give you all the desired information.

**JAMES RITCHIE** - **PARKDALE** - **SUMMERLAND**

**:: Naramata Notes ::**

Mr. Manchester left on Wednesday for Sumas California where he joins a theatrical organization as manager.

Mrs Collwell of Penticton a former resident of town paid us a friendly visit this week.

When Foster the weather sman predicts frost he does not mean the Okanagan. However we had a few degrees of cold on Tuesday.

The young ladies Club—"The Alpha Deltas"—are holding a dance in the Opera House next Monday night—but that's another story. You'll hear about it later.

J. Miller of Revelstoke, Inspector of Public Schools paid the local School an official visit on Wednesday afternoon. Mr. Miller is making a strenuous effort to secure a more uniform system of grading in the schools of his inspectorate. A much needed reform truly.

Mr. J. M. Robinson much of whose time this fall has been taken up attending lengthy meetings of the water commission expects to leave shortly for Toronto. After a brief visit with his family in Toronto he and Mrs. Robinson start on a proposed trip to Europe. It is probable that one of Mr. Robinson's missions will be to interest Eastern capital in the proposed electric car line down the eastern shore of the Okanagan Lake—the idea is to connect Vernon, Kelowna, Naramata and Penticton.

A party under the Athletic Club's auspices, was given on Tuesday evening in honor of Mr. Fred Manchester, prior to his departure from town. In the course of the evenings entertainment the president of the Club, Mr. H. J. Wells, on behalf of the boys, presented the guest of the evening with a handsome travelling outfit in "Companion" Mr. Wells took occasion to speak of Mr. Manchester's able assistance at critical periods in the growth of the organization. Mr. Manchester in his reply stated, that he was completely "flabbergasted" by this unlooked for expression of feeling of the Naramata Athletic and Aquatic Association, and expressed the hope that the club should continue to carry on the good work already begun.

The Daily News of New Westminster has the following to say of the Jubilee Singers: "Every selection was a success and loudly enjoyed, and had the singers acceded to every request they would have been kept on the stage all night."

Mr. W. Atckison returned home this week from a six months visit to the Old Country.

Or better yet, call and see us.

**A SAD FATALITY.**

Word was received Wednesday of a shocking accident near Kelowna whereby Thomas Hereron, a wellknown farmer of Okanagan Mission, met a sudden death. The details which have reached us are of a meagre nature, but it seems that Mr. Hereron had been in Kelowna on Tuesday purchasing some farm implements, and on his return trip his horses became unmanageable, and he was thrown from the high seat of the farm wagon. His body was found on the road near Mr. Orchard's house, on Wednesday morning about a mile from his house. His neck was broken and death must have

been instantaneous. Mr. Hereron was an old timer in the Okanagan, and was greatly esteemed and respected by a large circle of friends who were greatly shocked and grieved over his terribly sad and sudden death. He leaves a widow and several children. M. Hereron, road foreman, of Okanagan Mission, is a brother of the deceased.

It is with great pleasure that we announce the coming of Williams' Jubilee Singers under the auspices of the Mens' Club on Thursday, Nov. 17th 1910. From press reports a treat is in store for those fortunate enough to hear them.

### OUR APPLE SHOW.

"Look here, Robinson," said Sir Thomas on his visit last week, to the founder of Summerland, "I understood you to say this was the Peach Belt; I do not see a peach on exhibition!"

"We are showing now what we can do in apples," replied Mr. Robinson. "Come and see us when we are picking peaches, and we will show you peaches."

"A great exhibit; a GREAT exhibit!" was the comment of the Empire Builder of few words.

And Sir Thomas was right.

That is what everybody said who saw it.

"It's good; oh, yes, it's good: but wait till next year!" And "Dave" Watson smiled.

"Next year we are going to give away more than \$1000 in prize money. We have already this amount subscribed. We shall have a great deal more."

This is the spirit back of the Summerland Apple Show. It is the spirit of our fruit-growers, collectively and individually. The Apple Show has come to stay. "Last year our people brought their exhibits in their pockets; this year in boxes; next year it will be in carloads," to use Mr. Watson's sunny summing up again. It but indicates the character of Summerland's development and the unfolding of the district. It was certainly a GREAT exhibition. Next year it will be greater. Whatever may be the result of our carload exhibit at the Canadian Apple Show, Summerland fruit-growers are satisfied that this is more than a Peach Belt. It is an apple belt also.

### PLEASINGLY HONORED.

That was a fitting tribute paid to the personal ability of the man when Sir Thomas Shaughnessy presented to Mr. J. M. Robinson a personal check for the sum of \$600 as an evidence of his appreciation of the work performed by Mr. Robinson as founder of Summerland, Peachland and Naramata.

No man is in a better position to know the obstacles which Mr. Robinson encountered in his early efforts than is Sir Thomas Shaughnessy and his colleagues. It was to Sir Thomas that Mr. Robinson went early in the life of Summerland and procured from him the assistance necessary to secure the land and place water upon it, and since that time the keen eye of Sir Thomas has been upon every movement in the progress of the community.

These gentlemen, and those who through their confidence in them have contributed to the making of the community, are to be congratulated, not only on the fact that they have developed a financial success out of the land, but more particularly on the fact that they have builded a community that stands at the top in all things looking to the betterment of man.

### NARAMATA AT THE APPLE SHOW.

While the fruit orchards of Naramata are as yet out of bearing, it was apparent at the Apple Show that Naramata intends to be "on the map" in prominent Gothic when it comes to assisting in making Summerland's Apple Show a success. The flowers and vegetables from Naramata at last week's show were most noteworthy. It seemed to be just what was needed to make the success of the show complete. Next year Naramata's third regatta of the season will be augmented by a Peach and Flower Show, and Summerland will take advantage of the opportunity to reciprocate. In the mean time, "Fill your glasses, gentlemen and drink to Naramata."

### GOVERNMENT TELEPHONE SYSTEM.

At a meeting of the Vernon Board of Trade last week, S. C. Smith drew attention to what he called the "rotten" nature of the telephone service furnished by the Dominion Government in the district. He said it was not too bad between Vernon and Kelowna, but it was just about impossible to communicate by phone with Penticton. "You pay," he said, "for ten or fifteen minutes on the phone, and then have to write a letter." Other members joined with Mr. Smith in condemning the government service; and it was moved by C. F. Costerton, seconded by W. R. Megaw, that the secretary write to Mr. Stevens, supt. of government telephones, informing him that the line to Penticton is practically useless, and also very unsatisfactory to Kelowna, and asking him to take immediate steps to remedy this.

### BETWEEN ME AND HANK

We were speaking of things as we had found them. Perhaps we did not know. She was a mother of several children. He had none, and his prospects—well,—perhaps. But, no matter.

"I think it is very wrong" said she, "for

women—and some men—who have no children of their own and are proud of it—to project their well-intended, no doubt, but evil thought into the home life of the mothers who have children—and are not ashamed. Many times I have had lady friends tell me that I am a fool to sacrifice my life for my children. They declare that I shall regret it, the children will not appreciate the efforts I put forth in their behalf; and that I may as well "have a good time" and let them grow up as they will. To all of these good friends I have but one answer: "my children are my own; I do not call it sacrifice to labor for them. My life is bound up in them. Service is no Sacrifice." To me these thoughts are very distasteful and I pay no attention to them. It is all joy to serve my children. But there are mothers whose load has perhaps been heavier than mine and to them service may not mean as much as it means to me; in these women such thoughts, may find a resting place and their whole lives and the lives of their children may be soured and seared. "Oh, no; do not tell your mother sisters that in service to the little ones they sacrifice anything dear in this life. Indeed, their lives are the real lives that are full."

### MONEY SEEKING INVESTMENT.

The building of railways to tap the Okanagan from the South has already given a great impetus to the movement of land south of Penticton. It is predicted that a few years will see many thousands of acres in this vicinity—now wild and unproductive—producing a harvest of great value. This prediction, and the knowledge of the country that investors have gained, has induced the men who can handle large tracts to send their agents South, and today they are buying up these tracts of land as rapidly as they can get them. The day of the small buyer is apparently passed for the present, at least. Today there are many men in the Okanagan looking for large tracts while there are but few who are prepared to take up the small things. Next season the small buyers will be attracted hither. Prices will have advanced, it is true, but this will not keep back the man or men looking for small holdings. Indeed, when these large tracts are planted to even a few orchards, which will demonstrate what the land will do, the idle lands will be snapped up more readily at a high figure than they are today at a low figure and in a low state of cultivation. Perhaps we are over-Optimistic. We do not know. But think it over. Buy land.

### ONE OF THE BIG INDUSTRIES.

Beyond a question of doubt fruit canning is to be one of the biggest industries of the Dominion. It is not so long ago that you heard this same talk in regard to salmon canning. Some listened; they profited. Others laughed; they are being laughed at now.

Mr. Fruit-grower, do not be of the latter type. It is all to your advantage that a fruit cannery should be located in your near vicinity.—The Fruit Magazine.

## The Summerland Review

### PROTECTION AGAINST FROSTS.

Up to a few years ago, the orange growers of California were frequently unfortunate enough to lose much of their crop by the sudden fall of the temperature during the night. It was not unusual for the crop to be very seriously damaged by the frosts. To-day we never hear of it. Indeed, the danger from frosts in the orchards is never considered by any of the growers who are in the business to succeed. The overcoming of this great obstacle in the way of a dependable harvest has been a noteworthy achievement. It is the result of the practical utilization of smudge pot in the orchard.

Many thousands of dollars are saved annually by the fruit growers in California and elsewhere by the use of this simple device. Although smudge pots have been in use for several years, a new improvement has been made which goes a long way towards making the smudge-pot a complete success. It is the electric alarm thermometer, which automatically warns the rancher when the temperature reaches the danger point.

The alarm thermometer has a dial something like that of a clock with two hands, one of which registers the degrees of temperature, while the other hand is set at the danger point, ranging from 26 to 31 deg. F. for the various fruits and vegetables. When the hand registers the temperature drops to the point indicated by the alarm hand, an electric bell rings automatically and keeps ringing. The thermometer itself is placed in the orchard, and the electric bell in the bedroom of the rancher or foreman, the connection being made by an ordinary electric circuit.

This device makes it unnecessary for the fruit grower to sit up all night during a cold spell and watch for the expected frost.

The smudge pots that are used in connection with this alarm thermometer are exceedingly simple, being medium-sized cans of sheet iron designed to hold crude oil. The pot is covered with an iron hood provided with perforations about the upper rim to create a draft when the oil is burning. This construction has the advantage of retaining the soot, so that the fruit will not be blackened, and it also makes it possible to regulate the flame so that it can burn longer, and prevents it from being blown out by sudden gusts of wind.

Only one thermometer is needed in the orchard, and about eighty or one hundred smudge pots per acre.

The object of these many fires is not only to prevent the fall of temperature in the orchard, but to set the air in motion, thus keeping the frost from forming. Large fires are not nearly so efficient as small ones.

### SULPHATE OF IRON FOR WEEDS.

Last spring I received a circular from a maker of spraying apparatus recommending the use of iron sulphate to kill weeds in lawns, walks, and driveways. It sounded so reasonable and labor-saving that I tried it. I did not persevere on the lawn, but I used it with great satisfaction on the asparagus bed. If it

is used before cutting, is stopped, a little care is necessary, because every drop that touches a tip makes a tiny black mark. This mars the appearance of the stalk, but does no real damage. When I stopped cutting, I sprayed the bed thoroughly with a solution of about a halfpound of copperas to a gallon of water. I applied it on a bright day and the million or more weeds just uncurling their third or fourth leaf simply laid down and died. There have been no more this season. It is a most delightful way of accomplishing a back-breaking task.—The Garden Magazine.

### WANTON DESTRUCTION OF TIMBER.

Hon. Clillard Sifton, chairman of the Conservation Commission, recently spoke very strongly on the matter of the destruction of our forests by fire. "As regards our forests," said he, we are open to severe blame. During the past summer, the present year remember, more timber has been destroyed in Canada through fire than by the lumberman's axe, in the last 20 years.

Canadian Pacific Railway Company.

## THANKSGIVING SERVICES.

Last Sunday at 3 p. m. the Harvest Festival Church Service was held in the large room in the Opera House where Divine Service is always held and had been decorated by the ladies of the congregation. Round the raised stand in front of the stage were grouped in tasteful fashion all kinds of vegetables such as cauliflower, cabbages, savoy, potatoes, corn, onions, parsnips, carrots, beetroots, borecole, tomatoes, cucumbers etc. All were splendid quality and came from one of the oldest farms here. In the corners on the stage front, right and left, of same were some lovely flowers in vases large and small. The small table which has to serve as a reading and pulpit desk was covered by an embroidered cloth and had a large vase full of lovely chrysanthemums. The window sills were decorated by nasturtiums, creepers and other flowers which gave a very pretty effect in fact the whole was very pleasing and showed in a small way the bounteousness of the Okanagan Valley.

The Rev. Mr. Solly Rector of Summerland preached one of his fine sermons. He spoke of the gratitude every one ought to feel at this time of the year when the harvest is gathered in. He also spoke how we must exercise thought and prudence when we select crops, when we sow, when we plant our trees, when we watch them and guard them against vermin and ground pests, when we irrigate and cultivate the soil and when we keep out the weeds, but the growing we have to leave to another power, a higher and mightier power, no use saying, "I have made them grow or I am going to make them grow." When we have done our very best, then the growing will follow in due course but not otherwise. The old truth will always remain the old truth, "by the sweat of thy brow thou shalt eat thy bread." Mr. Solly's reference that our hearts should be full of gratitude to the Giver of all things reminded one of one of the most beautiful things Ruskin said, so fine that it was put on his tombstone, namely:

"And when I look around and see the fruitfulness of the earth I see in Thee Our Heavenly Father who daily giveth us our bread."

Space will not permit us to refer to more of this sermon, it was a masterly one in every way and was listened to with great devotion by all present.

The hymns were: "Praise, oh praise our God and King", "Come ye thankful people come," "We plough the fields and scatter" and last that grand old German hymn "Now thank ye all our God with heart and hands and voices" (Nun danket alle Gott!)

There was a very good congregation. Besides the members of the Church of England

there were present Mr. J. M. Robinson, Mr. and Mrs. Niblock, Mr. and Mrs. Gillespie, Mrs. Hancock and daughters Mrs. Booth, Mr. Bartlett and other friends.

The biggest event of the week was possibly—some would say undoubtedly—was the Big Turkey Dinner given on Thursday evening by the ladies of Naramata. The affair was an unqualified success from start to finish and it is to be hoped that it may be made an annual event. The supper being over a really surprising programme of songs, instrumental music, speeches etc. contributed to the enjoyment of the occasion. A feature of the programme was the club swinging by Mr. Nuttall who was accorded a well deserved reception.

Mention should also be made of the floral decorations of the Hall which indicated two things: (a) A wealth of foliage and (b) the presence of artistic taste in the display.

The following is the programme:

1. Chairman's speech Mr. Bartlett.
2. Rev. G. O. Fallis—Speech.
3. Piano Duet—Mrs. Languedoc Miss Block.
4. Song: Mrs. J. R. Mitchell.
5. Recalled.
6. Club Swinging by Mr. Nuttall.
7. Solo: Mast. I. Williams.
8. Piano Solo: Miss Tupper of Penticton.
9. Song: Miss Verra Palmer.
10. Speech Rev. Hardy.
11. Song: S'land Mr. Miller of Penticton.
12. Recalled.
13. Piano Duet: Miss Block Mrs. Languedoc.
14. Song: Miss Mitchell.
15. God Save the King.

Special ferry brought large numbers from Summerland including, J. R. Brown, Pastor Hardy, and J. C. Robson. Penticton also was well represented.

Don't forget the Jubilee Singers on Thursday Nov. 17th under the auspices of Mens' Club. Reserved Seat 75 cents general admission 50 cents. Plan at Drug Store.

### POUND NOTICE

The following animals have been impounded and unless previously claimed will be sold at my stable on Saturday, Oct. 29th, at 2 p. m., to defray expenses, in accordance with the provisions of the by-law governing stray animals.

R. H. ENGLISH, Pound Keeper.

Description of animals:

1. Dark bay mare, about 4 years old. Brand P, on right hip.
2. Bay colt about 2 years old, (horse). Brand P, on right hip, and small star between eyes.
3. Bay horse colt, about 2 years old. Brand P, on right hip; 2 hind feet white, and white star on face.
4. Chestnut horse colt, about 2 years old. Brand G on right shoulder, 2 white hind feet, and white strip from between eyes and down over point of nose.

### SUGGEST AN INQUIRY.

In its report to the Hon. Mr. Justice Gregory last week, at the Fall Assizes at Vernon, the Grand Jury again called attention to the frequent escapes from goal of prisoners. "It has been presented by the Grand Jury of the Fall assizes, 1900, that prisoners frequently escape from custody," says the report. "We consider it our duty to call attention to the escape from goal of a prisoner who might have been charged at these assizes. There is more reason to lay stress on the necessity of enquiry."

### LOOKING FOR TROUBLE.

It is the same old story. A writer in the Canadian Farmer estimates that the three prairie provinces produced last year enough wheat to keep thirty-three million people in bread twelve months. In other words, they produced enough bread to feed eight million Canadians and had enough left over to feed more than half of the people of the United Kingdom. These figures induce the Canadian Courier to ask where Canada is to find a market for the wheat which will be raised here ten years from today.

### PREVENTING LOSSES OF IRRIGATION WATER.

In a paper read before the fourth Annual Convention of the Western Canada Irrigation Association held at Kamloops recently, Professor Etcheverry, of the University of California, said: "The distribution of water in flumes over rolling ground requires that wooden flumes be used, supported stilts or trestles. These so often constructed, are weak, and will often blow down with every strong windstorm. Flumes also interfere with cultivation and harvesting of the crops. These objections have led many of the irrigators of Southern California to use underground pipe distribution systems—a supply pipe laid about 2 feet underground along the upper boundary of the tract. At the head of each row of trees the pipe is tapped and a stand-pipe connected to it. The water flows out of the stand-pipe into the furrows through spouts cemented in the stand-pipe. Cement, wood and lay pipes are generally used. Cement pipe is more durable than wood pipe, and is considerably cheaper than either, except where a clay pipe factory is in the vicinity and it has to meet competition. The cement pipe used in Southern California ranges from 6 inches to 36 inches in diameter, and is made of a mixture of 1 part of cement to 3 or 4 of sand or gravel, well tamped in metal moulds. The moulds are not expensive, and the pipes are often made by the irrigator himself. As the large pipes will not resist pressure above 10 feet and the small ones not over 20 feet, for greater pressures wooden pipes are necessary. The cost of this type of cement mortar pipe as compared with wooden banded pipe is about as follows:

Diameter	Wood banded pipe at Vancouver	Cement mortar pipe 1:3 mix. Built on ground Not laid
12ft.	.385	.20
14ft.	.44	.25
16ft.	.55	.30
20ft.	.91	.43
24ft.	1.21	.60

"In general the cement pipe costs about one-half the wooden pipe.

"While pipe irrigation has until recently been limited to Southern California, it has, to my knowledge, during the last few years been adopted for orchards in Oregon, Washington, Idaho and no doubt other states, and there are many localities where expensive wooden pipe and iron pipe systems have been installed were a cheaper and more permanent cement pipe system could have been built."

### FUNDS FOR FIRE FIGHTING.

A special warrant has been authorized by the government providing for the extraordinary appropriation of \$125,000 to cover the unanticipated high cost of fire fighting throughout the province during the recent dry weather. The unusually long delayed arrival of the autumn rains considerably disarranged the departmental estimate as to the season's cost in suppressing or preventing forest fires. The sum of \$75,000 was voted for this purpose by the house last session.

### RICH RED BLOOD.

You Will Never Have It as Long as You Have Dyspepsia.

Just as long as you have dyspepsia your food will not properly digest, and the nutritious elements in the food will not be extracted or absorbed, and impoverished or watery blood will follow.

This condition may not be apparent at first, but it will come just as sure as the sun will rise again.

Any stomach ailment, including all forms of indigestion, can be promptly cured by using Mi-o-na tablets, a scientific treatment unsurpassed.

It stops fermentation, belching of gas and taste of sour food almost at once.

The mighty power of Mi-o-na to invigorate and restore the stomach to perfect condition is known everywhere.

Mi-o-na cures by building up—by banishing the cause. For thin people it is a great flesh builder, because it causes the stomach to give more and purer nutrition to the blood. It cures sea and car sickness and vomiting of pregnancy almost immediately. The Summerland Drug Co. sells Mi-o-na for 50 cents a large box, and guarantees it to cure or money back.

## HYOMEI

(PRONOUNCED HIGH-O-ME)

CURES CATARRH, ASTHMA, Bronchitis, Croup, Coughs and Colds, or money back. Sold and guaranteed by

Summerland Drug Company
