

The Summerland Review

DEVOTED TO THE INTERESTS OF SUMMERLAND, PEACHLAND AND NARAMATA

Vol. 3, No. 34

SUMMERLAND, B.C., APRIL 1, 1911

Whole No. 138

PUBLIC MEETING

BIG CROWD PRESENT

Hospital Affairs and Hotel Light and Water.

On Tuesday afternoon last, the public meeting called by the Municipality was held in the Municipal Hall. There were about sixty present.

Councillor C. J. Thompson was appointed chairman, and Thos. Colledge secretary of the meeting.

Mr. Thompson explained that in accordance with the requisition for a public meeting, this had been called, and he asked Mr. W. J. Robinson to speak on the Hospital affairs.

Mr. Robinson in a descriptive address briefly stated the case for the hospital. He said that the hospital had now passed the experimental stage, and was not by any means large enough to meet the demands of the community. The building at present in use was not suitable, very inconvenient, and inadequate in every respect, and though good work had been accomplished in the past, it had been accomplished only in the face of great inconvenience.

At Kelowna, Merritt, and other places in the province, hospitals had been erected, and as Summerland is growing, and will continue so to do, it was up to the people to provide suitable hospital accommodation.

He quoted figures from reports on their present work, and showed that though the hospital has had a fairly large income from patients, it was an institution dependent to a great extent upon charity, and so would ever remain. He calculated that \$1,500 would be necessary to keep the institution going, and though this seemed a rather large sum, still the working expenses of a fairly large institution were no more than those of a small one.

Drs. Andrew and Smith, and also Major Hutton, ably supplemented Mr. Robinson's remarks. Dr. Andrew pointed out that though a large hospital was not used by every family, still it was an insurance in a way, and a good one. If perchance sickness did happen along the place and facilities for dealing with it were ready, and in a good,

modern, and well equipped building, patients had every care and attention at their command.

There was a great amount of discussion on the matter, and the following motion was placed before the meeting:

"That in the opinion of this mass meeting the Municipal Council be asked to take into consideration the advisability of issuing debentures for \$7,000 for hospital purposes."

This was voted on, and carried by 43 to 13. A question was asked if all were ratepayers who had voted, but even though a few may not have been so, the majority was sufficiently convincing to prove the feeling of the meeting.

Councillor Thompson next introduced the question of free light and water to the Hotel. This raised the dust, and discussion was rife. After a while a vote was taken which showed 21 for and 16 against. This was not considered sufficiently convincing, and a committee of three was appointed to go into the matter and to call a meeting at a later date to fully consider the facts and figures.

EXTORTIONATE PRICES.

According to a London paper, extraordinary prices are being asked for the rents of West-end flats and houses for the forthcoming coronation season, and as an indication of the high prices likely to be obtained for good views of the procession, the occupier of a house in St. James' street has let it to a wealthy American who has contracted to pay \$5,000 for the day. Fifty thousand to two thousand five hundred dollars are being asked for the season for houses round about Grosvenor Square. In Belgravia the prices range from \$2,500 to \$5,000 and \$7,500 for larger houses, while in the Hyde Park district, including Bayswater and Kensington, the rents are anything from \$2,500 to \$3,000; and similar rents are being asked for flats.

The Bank of Montreal moved to their new premises on Ninth Street, on Wednesday last. Although as yet incomplete, the premises look good, and when finished, the Bank of Montreal will be established in a building well worthy of their extensive business.

VANCOUVER CITY MARKET.

To Be a Fruit Market On a Large Scale, As Well As For General Purposes.

Mr. J. M'Millan, the recently appointed manager of the Vancouver city market, visited Summerland on Wednesday last.

In conversation with Mr. M'Millan, it would seem that Vancouver is fully intent on capturing a good amount of B.C. fruit, and they are making every effort to have a market which will in every way be equal to any in the Dominion. Mr. M'Millan is getting into touch with the orchardists of the province with the intention of gaining their trade. All fruit shipped to them will be handled directly by him or his assistants, under the civic authorities. The prices will be governed solely by the supply and demand, and cheques will be forwarded to the grower on the Monday following the sale of the goods, less ten per cent commission; the grower to pay freight.

Each day, excepting Friday, products will be sold by private treaty, and on Fridays all products will be sold by public auction.

Mr. M'Millan fully intended to meet the fruit growers here, but the letter making arrangements for the meeting went astray. However, anyone interested in the project, and all fruit growers are surely interested in the marketing of their produce, should write to Mr. M'Millan, asking for full particulars, and address the letter to the City Market, Vancouver. It will receive every attention.

To poultry men, the market is also of special interest, and those sending dressed fowls should conform to the latest bulletin issued by the Agricultural Department in regard to the marketing of chickens. The market is steady and safe, and no one need hesitate to forward their produce to the Vancouver city market.

Market reports will be printed in the Review every week.

Mrs. Shaw, of Golden, is to give demonstrations in sewing in connection with the Women's Institute from April 3rd to 7th in the Council Chamber, at three o'clock in the afternoon. She is highly commended as a competent instructress. All are welcome.

New Presbyterian Church.

OPENING ON SUNDAY LAST.

Large Congregation -- Splendid Music Heavy Collections.

On Sunday last, West Summerland was the centre of attraction. The Presbyterians of Summerland have long been working at the church on the flat, giving freely of their labor and time, as well as heartily subscribing to the building fund. Sunday last was the reward for their efforts and they were fully convinced that their labours were appreciated.

The building from the outside belies its interior. The exterior is in an unfinished state, but once inside, the congregation were more than surprised. Every detail had been well studied and worked out, and the building looked and felt like a church in every respect.

There is seating accommodation for 250, but last Sunday over 300 were crowded into the pews and chairs down the aisles, and dozens more had to remain outside.

Rev. J. Clark, of Calgary, was the preacher for the day, and he was supported by Revs. Pattison, Hardy and Hood, of Summerland. He delivered splendid sermons both morning and evening. The music at both services was in the able hands of the Presbyterian choir.

On Monday evening opening celebrations were continued, and during the evening the pastors of the various churches gave brief addresses, as also did Mr. Clark. A short program was also rendered which was thoroughly enjoyed. During the intermission, Rev. Jas. Hood, Presbyterian pastor, was presented with a black Geneva silk gown, given him by the ladies of his congregation.

The collections at these festivals were for the building fund, and over \$150 was placed in the plate during the two days.

Dr. Mathison will be in Summerland from April 4th to 24th. Make appointments early.

This year the cannery will be on the market for tomatoes, beans, peas, etc., in addition to fruit.

"GEORGES" CORONATION GIFT TO THE KING.

: Naramata Notes :

Rev. F. W. Pattison spent Tuesday of this week in town.

The following letter has been received by Reeve Jas. Ritchie, which explains itself.

Victoria, B. C., March 22, 1911.

Sir: The Government is in receipt of a communication from His Excellency the Governor-General of Canada, in which it is announced that a movement has been set on foot with the object of enabling all the "Georges" of the Empire to present a Coronation gift to the King.

His Excellency expresses the desire that such steps may be taken as seem best for the purpose of enabling the "Georges" of this province to have an opportunity of joining in the gift.

It is proposed that subscriptions shall be accepted from five cents up to five dollars. A list of the names of all the donors, but not the amounts given by each, will be presented to the King. The Government would esteem it a favor if you would kindly receive subscriptions in your vicinity, transmitting same in time to reach this Department on or about the 15th of May, together with a list of names of subscribers.

It is suggested that every publicity be given to this matter through the press. Letters are being sent to the Mayors of the various cities, Reeves of municipalities, Government Agents in unorganized districts, and Canadian Clubs throughout the province.

I have the honor to be, Sir,

Your obedient servant,

H. E. YOUNG,

Provincial Secretary.

All "Georges" in Summerland who may desire to subscribe to this Empire wide present, should give their subscription to Mr. A. H. Steven at West Summerland, or to Mr. T. Collinge, Summerland, who will pass the money on to Reeve Ritchie.

"A Forward Look Downward" is the subject of a special sermon to young men at the Baptist Church, West Summerland, next Sunday morning.

On Wednesday last big parcels were all the rage in Summerland, and the ladies were the carriers. Messrs. Angove and Stinson's Millinery show was the centre of attraction, and you mere men, just you look out for the "Creations" there are sure to be in evidence on Sunday next.

Mrs. M. M. Robinson, of Summerland, spent Wednesday of this week in town visiting friends.

The whist party last Friday evening given by Mesdames Simpson and Walters as a Band Benefit, proved up in fine style resulting in quite a substantial addition to the coffers of the organization.

Mr. J. M. Robinson spent the week at Victoria on business.

Mr. R. White has removed to Summerland where he has accepted a position.

The first meal was served on Friday morning of this week in the "Hotel Naramata." The building stands without a peer in the valley and will far outclass scores of so-called fine city hotels. It is a regular tourists hotel where the comfort and convenience of guests who wish to while away a holiday season amidst ideal conditions has been carefully considered. The building is a two-storey frame and concrete structure standing in the midst of extensive grounds laid out in flower beds, drives and winding walks—the whole commanding a full view of the lake.

Messrs. Niblock and Endacott are about to branch out into the Real Estate business. They have secured offices from the Trust Company. Their advertisements appear elsewhere in this issue.

The whist club which met last Tuesday evening at the home of Mr. and Mrs. Johnson decided upon one other evening's play before winding up for the season. So next Tuesday they meet at the home of Mr. and Mrs. Walters.

The work of development of the fruit lots is now in full swing, and on all sides at once. It is quite evident that if the fruit grower does have an easy time in the winter months he must certainly bestir himself in early spring.

Speaking of fruit lot development we must not forget that this is the main issue with us. We have pooled our interests entirely on fruit. We claim to have the soil, the climate, and the water in abundance and available. We have fully 50,000 trees planted and coming into bearing. This year it is quite safe to say that 15,000 trees will be planted. Of these about 75 per cent will be apples and the remainder peaches, apricots, pears and cherries.

Owing to the increased area being put under cultivation at Naramata Messrs Niblock and Endacott have been obliged to purchase two new teams of horses.

CRYING FOR WATER.

In Montreal, Ottawa and Toronto, children are crying for water, not for bread. In this boasted land of broad rivers and great lakes, fed and replenished by an annual snowfall, it is hard to conceive that any one should lack for water to drink. Yet in these three wealthy cities, the mothers tremble when they give their children water, lest in the glass there lurks that which may tear their dear ones from them.

There are many children in these cities, five years of age, across whose lips has never passed a drop of city water. They are the fortunate ones whom the stork dropped in the homes of riches and luxury, where even the dishes are washed in bottled water. There is no suffering among that class. But the children of the clerk, the mechanic and the laborer—they must drink the city water and take their chances.

In Ottawa, during the past three months, there have been over 700 cases of typhoid and over thirty deaths. It is the worst epidemic the city has ever known. In Montreal, the situation is always bad. In Toronto, they have not had good water for several years, and recently a break in the intake pipe which runs out into Lake Ontario has made matters worse.

What is the remedy? A Dominion law which will absolutely prohibit the dumping of sewage of any kind whatsoever into a river or lake. There was a time when such a law was unnecessary, but the population was small and the towns and cities were villages and "corners." Sewage disposal is one of Canada's great problems. It is much greater and far more vital than the reciprocity arrangement concerning which the country is at a white heat. But when did the world ever regard human life as more valuable than purely material wealth?—Canadian Courier.

"What's wrong? Bank bust?" This was the question on Wednesday. There was nothing the matter with our local mint, just removing to their more commodious premises that was all.

NOTICE.

Tenders will be received by the undersigned up to the 22nd day of April, 1911, at 5 p.m. for the purchase of Block 27, Subdivision of Lot No. 541, Group One, New Westminster District, situated in the city of Vancouver, and being the site of the old Provincial Courthouse. Each tender must be enclosed in a registered letter and must be addressed to the undersigned, and plainly marked "Tender for Old Vancouver Courthouse Site," and must be accompanied by an accepted cheque for ten per cent of the first payment of the purchase money. Payment for the property will be accepted in instalments of one-quarter of the purchase money. The first of such installments to be paid within thirty days of the acceptance of the tender, and the other three annually thereafter, with interest at the rate of six per cent per annum. In the event of the person whose tender is accepted failing to complete the first installment within thirty days of the notice of such acceptance the sale to him will be cancelled and his ten per cent deposit forfeited. The cheques of unsuccessful tenderers will be returned. The highest or any tender will not necessarily be accepted. No commissions of any kind will be allowed.

BAND CONCERT

The Band Concert on Thursday
was well above the standard of Sum-
merland concerts. Last year they
gave a first-class concert, and we
were hardly expecting the equal
this year, but were pleasantly dis-
appointed in our surmise. Al-
though our band is somewhat de-
creased in numbers, they have in-
creased in efficiency, and are a com-
bination of players that would be
hard to beat, and we feel sure that
if those who are antagonistic to this
splendid organization had taken the
trouble to be present, and support,
they would be kickers no more, that
is if they happened to have a musi-
cal bone in their body.

In the many and varied selections
ranging from Sousa to Balfe and
Lauder to Sullivan, they presented
a first-class program in every re-
spect, in each item the rendition
being splendid. Poet and Peasant
Overture gave them fine scope—
this piece is quite different to the
class of music we oftentimes have ser-
ved out to us by bands, and our
boys attacked it well, and shewed
throughout a thorough knowledge
of the composer, and it is only by
severe training, conscientious prac-
tise, and a good baton that they
were able to present this piece so
magnificently.

The many solos introduced
throughout the various pieces.
shewed that a good many of the
boys are soloists of no mean order
on their own particular instru-
ments.

The program was interspersed
with songs by Mr. Moore, mono-
logue by Mr. Stackhouse and a

quartette by Messrs. Smiths, Bea-
vis and Thornber. All were heart-
ily encored, and deservedly so, but
unfortunately Mr. Stackhouse could
not comply as something went
wrong with the lights at that mo-
ment, and

'Twas close on ten o'clock

When Teddy got the shock

In the gym.

He now respects the juice

And hasn't any use

For fuses.

When a new fuse had been fixed
the program was proceeded with,
and the audience listened with
pleasure to the whole of the per-
formance.

To the strains of the national an-
them, the enthusiastic crowd dis-
persed, voting the evening as one
well spent, and thoroughly convin-
ced that the labors of the band are
well worth carrying on and suppor-
ting.

May the 24th is the date of their
next concert, and a full house
should be in evidence to hear the
splendid array of musicians at pre-
sent playing under the name of
The Sumerland Citizen's Band.

The band desires to thank all
those who helped along the concert
on Thursday evening, and also all
those who patronized them by
their support. It struck us that
Summerland as a whole is by far
too engrossed by their own little
affairs to support anything of a
public nature if a charge is made
for admission. At the opening of
a Church they will turn out three
to four hundred strong—there is
only a collection there. When it
means 50 or 75c. for the advanc-
ment of just as desirable an institu-
tion in our midst, viz. music,
they absolutely refuse to support.
Why? Is music of no use? Does
it play no part in life? Shakes-
peare says: "The man that hath no
music in his soul, and is not
moved by a concord of sweet sounds
is fit for treason, stratagem and
strife—let no such man be trust-
ed." Is this to be said of our
community, or do we desire music of
the ten cent variety, reeled off a
gramophone by the yard.

We appeal to your loyalty—help
Summerland—first by helping her
institutions—be they of whatever
variety, so long as they stand for
the uplifting of the people, and
second by remembering that in
every community on the face of
the globe, there are more things
to be met than mere rates and tax-
es—these are required by law,
the others are to be placed to the
Good Nature and Fellowship of
Man Account.

NEWS FROM THE EAST.

(From our own correspondent.)

Montreal, March 27.—Great interest is being shown in the coming meeting of the Canada Medical Association which is to be held in Montreal on June 7—9 next. This meeting follows immediately after the opening of the new Medical Building of McGill University by His Excellency Earl Grey when there will be a re-union of the many graduates of McGill. The meeting of the Canada Medical Association promises to be one of the most successful in the history of the Association. Many physicians and surgeons of world-wide fame have signified their intention of being present. Sir Thomas Barr, physician to the late King is to read the opening address in Medicine, and Professor A. Primrose of Toronto is to deliver the address in surgery. The celebrated Dr. Mayo of Rochester has arranged to be present and is expected to take a prominent part in the discussions. Amongst the subjects of great importance to Canadians at large which will be discussed is a proposed campaign against typhoid fever. The experience of Toronto, and Montreal in 1910 and presently that of Ottawa have made it essential that united action should be considered to allay the terrors of this dread and yet preventable disease. Reduced rates have been promised by the railway companies and already a large number of Canada's medical practitioners have signified their intention to be present.

According to cables, newspapers and private letters received here during the past few days, the Bahama Islands, a part of Britain's possessions in the West Indies, are anxious to become a part of the Dominion of Canada, and a large delegation of politicians and prominent men will shortly leave Nassau to officially place the views of the islanders before the Governor-General at Ottawa. Canadians who know the Bahamas say that the islands would prove a most agreeable acquisition to Canada's family.

Up to the first of January of this year Canadians were content to put their savings into their own countries industries and undertakings. Now there is a marked tendency to put it into American or European enterprises, and foreign companies with stocks or bonds to sell here are finding a remarkably ready market. The Lake Superior Iron and Chemical Company, for instance, has just placed a block of preferred stock

on the Canadian market, and Canadians have not been a bit slow in taking it up, sometimes taking their money out of staid old Canadian industrials to buy. It may be reciprocity talk or it may be merely that they see a better investment and are determined to take advantage of it. Unlike many American offerings the Lake Superior comes well recommended. It is an old company reorganized and turns out the largest amount of pig iron, and its two by-products, wood alcohol and acetate of lime in the world. It owns six huge charcoal pig iron furnaces in Michigan, nearly 150,000 acres of hardwood forest, 47 miles of railway and the famous Yale iron mine.

Sir T. Price, senior commissioner for the South African Government Railways and Harbors is making an extensive tour in Canada and the United States for the purpose of making a thorough examination of grain handling and exportation on this continent. South Africa, he said in an interview, is admirably adapted for growing immense quantities of corn, and during the past four years the Government and railways have been experimenting in the exportation of corn to Europe. Hitherto the custom has been followed of handling the corn in sacks, but Sir Thomas is convinced that the Canadian system of handling in bulk is the best system and he is about to visit Fort William, Minneapolis, Chicago, Duluth and other places to look into this system and decide whether it is adaptable to the South African trade.

The rigidity with which the United States customs officials examine passengers landing from ocean liners at New York has turned the wiles of the smuggler to Canada. The professional "smug" as the detectives call them, takes passage to St. John or Halifax and then waits his chance to cross the border with his contraband. Realizing this, the U.S. Government has stationed re-inforcements at all ports of entry on the boundary and the harvest to the Treasury is daily becoming richer. An inspector from Washington who was here the other day said that Montreal was the base from which the smuggler worked and that goods sometimes checked in trunks or shipped by express, travelled up and down the boundary before they were able to escape the vigilance of his men and be transported across.

FAMOUS PEOPLE
BY FANNIE M. LOTHROP

THOMAS A. EDISON

The World's Greatest Inventor

The eight hundred or more patents credited to Thomas A. Edison means one for every three weeks of his fifty-eight years, and even this calculation is unjust to his mechanical genius, for it does not include his many inventions which never ventured into the publicity that patents demand.

This wizard of invention was a model of precocity. Born at Alva, Ohio, he had only one teacher—his mother; at seven he became a wage-earner; at eleven he was reading Newton's "Principia"; at twelve he was a newsboy on the Grand Trunk Railway, and in an improvised laboratory in the baggage car he began to dabble in chemistry. A broken bottle of sulphuric acid filled the air with an odor that was unspeakable, and the cruel hands of the conductor registered his disapproval by a brutal blow on the ear of the young disciple of science, which made him deaf for life.

He soon learned telegraphy and became so expert that the most rapid operators on the line could not rattle him by their fiercest speed, and all taken down in his small, clear, copper-plate writing. He showed then the remarkable ability to meet any situation instantly and perfectly. When he was in Canada, and the terrible storms cut off all telegraphic communication, and it was necessary to get word to Sarnier, an American town across the border, he mounted a locomotive and "tooted" a telegraphic message again and again until the answer came.

His first patent was for a machine for recording votes for the State Legislature. It worked perfectly, but it was the very thing the Legislature most cordially did not want. In the same year he went to New York friendless, penniless, in debt, hungry, sore and heart-weary at times, but with eyes wide open for chances. The Laws Gold Reporting Co., that reported stock transactions, had an accident that put all its machinery out of commission. Wall Street patrons fretted, chafed, grew frenzied at the delay. Young Edison diagnosed the difficulty, treated it instantly, and was at once known and recognized. A short time later he had a \$40,000 check in his pocket for a stock ticker he invented. Then real life began for him.

To tell of his inventions in a few lines is like seeking to condense a library into an epigram; but mention must be made of multiplex telegraphy, incandescent electric lighting, the phonograph, moving pictures, the microphone, the tasimeter, the odoscope, electric pen, his storage battery, the megaphone, which list faintly suggests a host of others.

Entered according to Act of the Parliament of Canada, in the year 1908, by W. C. Mack, at the Department of Agriculture.

QUEEN BANS BIG HATS. Queen Mary is very particular in regard to the dress of those in her immediate entourage, neatness and quiet good taste being the met d'ordre among her ladies in waiting and the youthful recently appointed maids of honor. "Queen Mary has a dislike, for instance," says the Gentlewoman; "to the blouse or costume being low cut in the neck, and she permits only the neat high collar or lace for morning or afternoon toilettes. The Queen, too, has commanded that, when in waiting, her maids shall eschew another mode somewhat in vogue with

young girls at the moment, viz., short elbow sleeves. The Queen has also, in this respect, signified her liking for the neat small toque in preference to the wide-brimmed fashionable hat, with its towering plumes."

WOMENS' INSTITUTE DEMONSTRATION.

The first meeting of the Women's Institute in connection with the Sewing demonstration, will be held on Tuesday April 4th instead of Monday the 3rd as announced elsewhere in this issue.

THE HOSPITAL.

The public meeting on Tuesday emphasized the fact, as ever, that this institution is popular. At the meeting, the whole of the proposals submitted were passed en bloc.

While heartily in sympathy with the hospital and its work, it would seem to us that the proposed building is by far too large for present needs. For instance, there is a public ward of five beds for ladies use, and one of the same size for the use of the men. The latter may be full sometimes, but the former, we feel sure will hardly ever be used as cases in the past have almost always been those usually allocated to private wards.

It would seem a wise plan to complete the shell of the proposed building, and finish a few of the rooms inside, then as the demand for hospital accommodation increases let the interior increase with it.

While we are no advocates of meanness, nor yet dispensers of narrow policies, we believe a little more thought as regards the size of the building to be erected, should be exercised, and a smaller one considered. This course would naturally decrease running expenses—no mean consideration in an institution of this character.

OPPORTUNITIES IN B.C.

The Publicy Department of the C.P.R. has just issued two very important booklets descriptive of the Great Northwest and British Columbia. These booklets are a mass of information gathered first-hand, and are illustrated profusely with scenes of industrial and agricultural activity, fruit and vegetable growing, stock raising, and the

general development of the phenomenally rich sections of the Dominion.

Speaking generally of the opportunities offering in B. C., the advantages from raising stock, grain, and produce rather than specializing in any one commodity, are pointed out. A clover patch for growing hogs with enough grain to finish them off for market is a sure source of profit. Dairying is scarcely less so, especially when butter is made; and poultry is another adjunct which should not be neglected, owing to the high price of eggs and table fowl.

Mixed farming is especially profitable where irrigation is possible, even in the best of the fruit districts, enabling the farmer to grow what crop he chooses, regulating the supply of moisture to the necessities of the case and adjusting the supply to the demand of the locality.

Thousands of men who struggle for a meagre living in the beaten paths, may find under these conditions a profitable occupation, under ideal climatic conditions, and with all the facilities of transportation and a ready market.

The average hop yield in the Okanagan is given at 1,500lbs. to the acre, at 25 cents per pound. The average fodder yield 1½ tons to the acre at \$18 per ton in the sack; the average tobacco yield 800 pounds per acre at 15 to 30 cents per pound; in apples and pears the average yield is 8 to 15 tons per acre and the price \$30 to \$50 per tons respectively; in peaches and grapes, the orchards and vineyards will yield as high as \$300 of fruit per acre.

In 1891 the total orchard area of the province was 6,500 acres. Up to 1901 it had increased only 1,000 acres, but from 1901 to the close of 1908, it had increased to 100,000 acres, and a very large increase was made during the years 1909—10.

It is pointed out that while many farmers do not realize the profit which can be made by combining fruit growing with poultry raising, there is a notable increase in the poultry industry, and yet we fall far short, even under our most favorable conditions, of supplying the home market. In 1908 the value of eggs and poultry imported into the province wages about \$1,500,000; in 1909 the importations amounted to \$2,467,715. Fowls bring, on the open market, from \$5 to \$8 per dozen, chickens \$4 to \$5; ducks \$5 to \$11; geese \$1 to \$2 each, and turkeys 25 cents to 35

cents per pound.

Prospects were never brighter in the province for the dairyman. In addition to the milk supplied, the creameries of the province last year produced 2,000,000 pounds of butter, and it is estimated that this figure was more than doubled by the amount of butter imported.

No portion of Canada offers better advantages to the stock raiser than those of the interior of British Columbia, and particularly the Okanagan Valley. Prices of live stock are variable, but the following may be taken as the standard: draught horses \$500 to \$800 per team; farm teams \$300 to \$500; roadsters \$150 to \$300 each; hackneys \$200 up; Clydesdale, Percheron and Shire stallions \$800 to \$5,000 each; ranch cattle 3½ to 5 cents per pound live weight; dairy cows \$50 to \$75 each; calves 7½ cents ilve weight; sheep 5½ to 6½ cents per pound live weight; lambs \$4 to \$6 per head; wool 13 cents per pound; net animal profit per ewe from \$4.40 to \$5.40; live hogs 6½ to 9 cents per pound

OUR FRUIT IN THE MARKET.

It seems incredible, in the face of all that has been said by Fruit Commissioner Metcalfe in his reports from the Northwest markets and the great care exercised by the packing houses and shippers in the preparation of their fruit for the markets, that there should still be complaints registered by buyers of our fruit. But that complaints have been registered is evident from the following letters:

“Penhold, Alta.,
March 11, 1911.

Editor “Review.”

Dear Sir:

As I am pretty well acquainted in Summerland, I would like to see your fruit taking first place in the Northwest.

“I can furnish you with a dozen names of farmers who have bought apples and peaches in boxes that were supposed to be full, and when opened they were only three-quarters full and very inferior.

“It is my opinion that the Fruit Union should do something to stop this thing or they will soon lose their reputation.

Yours,
G. D. Campbell.”

It would appear from the following letter from Mr. Samson that Mr. Campbell took the matter up with the Fruit Union some months ago.

Vernon, B.C.,

Mr. G. D. Campbell,
Penhold, Alta.

Dear Sir:

We are in receipt of your letter of the 3rd. inst., and note what you say with reference to receiving a box of peaches containing our brand giving the marks on the box. We note also the sample of wrapping paper which is, as you say, butter paper.

You may be assured these peaches were never packed in this paper at the point of shipment; neither were they sent out in the manner in which they came to you. We are not doing business that way, and you can rest assured that these boxes were properly packed and filled when shipment was made. It looks very much to us as though your local dealer, from whom you bought the peaches, had repacked them, and not having the proper wrapping paper, used this butter paper. Whether this was done to gain more boxes, we do not know, but it looks to us as though there was something wrong at that end of the line.

Our business is too large and we have too much at stake as regards our reputation to allow anything of this kind.

Yours truly,
Okanagan Fruit Union Ltd.

E. E. Samson, Manager.

If Mr. Samson's deductions are correct, and we see no reason for doubting them, then the real point at issue is at the other end, though, unfortunately, the Fruit Union must stand the blame so far as the innocent buyer or buyers are concerned. It is just possible—it seems probable—that an unscrupulous wholesaler or retailer has repacked an inferior grade of peaches in the Okanagan Fruit Union's packing boxes, from which the fruit had been retailed. There seems to be no way of effectively remedying this, if there are retailers dishonest enough to do it. All any fruit shipping union can do is to put the fruit on the market in regular form, and this we may be sure the Okanagan Union has done and will continue to do. If two peaches of Okanagan brand can be sold to one of any other brand, the unscrupulous dealer will transfer the inferior fruit to the Okanagan boxes, and there seems to be no help for it.

The regular monthly meeting of the Ratepayers' Association will be held tonight (Friday) in the Central Schoolhouse, West Summerland, at eight o'clock.

BETWEEN ME AND HANK.

No greater insult was ever offered to God than to say that His highest work—man—made in his likeness—is so base at heart as to merit only damnation. Did you ever ask yourself the question if in all nature there is any other animate or inanimate thing which is not filling the divine purpose? If this be so, then how can man be otherwise? Isn't it just possible that in our chase after the unnatural things of life, we have drifted away from the realities of Life and are in the dark so far as our associations with the Divine should be?

The man who quarrels, is a pestilential wag. The man who holds a grudge is considered narrow, small and insufficiently baked. And yet we are told that long, long ago a man and a woman disobeyed God, and God banished the man and the woman and damned posterity. And ever since then man has held a quarrel with God and God has looked with vengeance upon man. It is all so strange—so man-made—so crude and cruel!

ANOTHER VOICE AGAINST RECIPROCITY.

"The farmers of Manitoba have been stampeded by the officers of the Grangers, who are Grit, first last and all the time, ready to work for the Liberal party under all circumstances. But I look for a tremendous revulsion of feeling when the farmers of the province understand the reciprocity question as they will understand it," said Hon. Robert Rogers, minister of public works for Manitoba. "The farmers of Manitoba are sensible men," continued he. "They realize that reciprocity would reduce the value of their products. They would be forced in everything they produce to go into the open market and compete against the world, and on everything they buy they would have to pay a duty.

"No farming community in the world has ever been really prosperous except under a moderate protection. The man does not live who can show where reciprocity will benefit the farmers. People quote the prices of malt barley in the United States and compare it with the price of feed barley on this side. And on that alone they try to make an argument. No, reciprocity would not benefit the farmers of Manitoba. It would ruin them."

THE SAME CRY FROM BOTH SIDES.

From the Canadian side we hear of the many dire things which are to happen to Canada with the adoption of the reciprocity agreement, and from the American side we hear of the equally dire things which are going to happen to the United States. Most of us are familiar with the Canadian version of the disaster which is to occur in Canada. Let us now look for a moment upon the American raven's cry. It is identical with that coming from various public men of Canada. Representative W. E. Humphrey of Washington writes as follows acknowledging the receipt of a telegram endorsing the reciprocity proposals:

I am in receipt of your dispatch notifying me of the club's endorsement of the Canadian reciprocity agreement proposed by the administration. As I telegraphed you immediately this bill passed the House on February 14, and I shall not have an opportunity to act upon it further. It was rushed through so quickly that I had little opportunity to know what the sentiment was in my state.

"Practically all the information I have received from the state, however, is to the effect that it will be injurious. I cannot help but believe that this is true, especially upon the fishing industry, the shingle industry and farming.

I would not object to reciprocity that had any reciprocity in it but I have been utterly unable to see where the United States gets anything out of the proposed treaty. It gives everything to Canada and we get nothing in return. I do not know that I would object to absolute free trade between this country and Canada, but I do object to making great concessions to Canada and getting nothing in return.

The Okanagan district W. C. T. U. Convention will meet at Kelowna on April 25 the 26.

MAY 24. —The subscription list is open and Empire Day will soon be here. Every dollar helps, and Mr. Collas, at the bank of Moncton, is the treasurer. He will be pleased to have your name down for whatsoever sum you feel inclined to subscribe. The day is well advertised, and at all the lake points they are looking to Summerland to put up a good day. We shall do it, and do it all the easier and quicker by your support and interest. Do not wait to be asked for a sub. just plunk it in.

: Peachland Notes :

Mr. Geo. Phillips spent Wednesday in Kelowna.

Rev. J. D. P. Knox was a passenger to Kelowna and Westbank on Thursday morning.

Mr. A. J. C. Clarence is confined to the house for a few days with a severe cold.

The young people of the Baptist Sunday School entertained the Bible Classes of the other schools last Friday evening. A very enjoyable time was spent.

Rev. Mr. Miller, of Penticton, conducted the anniversary services in the Presbyterian Church here last Sunday both morning and evening. He preached two fine sermons to a well filled church on each occasion. On Monday evening the young people of the congregation entertained, and gave a very good account of themselves.

BORN:—on March 27, to Mr. and Mrs. G. B. Phillips, a daughter.

Mrs. F. W. Hicks and family set out for Vancouver on Thursday morning to join Mr. Hicks who has been teaching in North Vancouver since the beginning of the year. On Tuesday afternoon Mrs. G. Mitchell gave an afternoon in honor of Mrs. Hicks and a very pleasant afternoon was spent. All wish Mrs. Hicks a happy time in the city.

Dr. Crompton returned from England last week with his bride and they are now settled in his country residence on his fruit lot.

Rev. Mr. Lewis got notice last week that he was transferred from charge of the Presbyterian congregation here to Notch Hill. During the short time he has been here Mr. Lewis has proven himself a most excellent preacher and has made many warm friends who are loath to see him moved. He left on Thursday morning for his new field.

The Reeve's banquet, now apparently an established annual affair, was held in the Orange Hall last Tuesday evening. Reeve Garraway proved himself a most capable and gracious host. After justice had been done to the sumptuous menu, the following toast list was proposed. The King, the Empire, Dr. Buchanan. The Dominion Government, Mr. H. McDougall. The Provincial Government, Mr. W. A. Lang. The Municipality of Peachland, Reeve Garraway. The Municipal Council, Councillors

Douglas, Elliott, Clarence and Houston. The Press, Mr. Baker. The Learned Professions, Dr. A. C. Nash. The Peachland School, Principal Murray. The Farmers' Institute. Mr. John McDoughton. The company broke up with the singing of Auld Lang Syne, after spending one of the finest evenings possible.

CLEAN UP THE YARD.

Spring, with all her charm, the tin cans, ash-piles, filth-hole and unmentionable smells, is here. There is work for the man with the hoe—and the rake—and the lime box—and the crude carbolic bottle—and the chloride of lime can—and the shovel—and—and—but where shall we put it all?

The City Council is discussing as other Councils before them have discussed, the question of the disposition of the city garbage. The matter is receiving serious consideration and Mayor Ruttan has been delegated to find a suitable site for the erection of a public incinerator. In the meantime, the yards must be cleaned up, and the health committee wish to request all householders to reduce the dangerous element so far as possible by burning in the yards everything of an objectionable nature, including tin cans, bottles, boxes, and the rakings of the corners. By so doing and by the liberal sprinkling about the yards of crude carbolic and lime the danger of sickness will be largely overcome.—Enderby Press.

AN APOLOGY TO SIFTON.

The student body of McGill University at a meeting last Friday decided to draft an apology and forward it to the Hon. Clifford Sifton in order to make amends for the indignities to which he was subjected at the anti-reciprocity demonstration held on Monday last. The students' meeting was a stormy one both sides being equally divided. Finally it was agreed to send the following explanation to Mr. Sifton: "Resolved, that we the students of McGill, wish to explain that the protests made at the meeting on March 20 were directed entirely against its admittedly political nature, which they considered contrary to the best traditions of McGill and were in no way meant to express personal animosity towards the eminent speaker of the evening.

C. H. CORDY AND THE VANCOUVER LIBERAL ASSOCIATION.

The following letter is taken from the Vancouver Province, dated March 28.

Editor Province.—In reading the account of the meeting held under the auspices of the Vancouver Liberal Association on March 20, more especially the speeches of Messrs. Maxwell Smith and Duncan Ross, both of whom seem to think that the so-called reciprocity agreement is the advance guard of the millennium, it is interesting to observe that in their arguments in favor of the agreement, Mr. Smith, speaking as he says from a fruitgrowers point of view, claims, among other things that "the treaty would not tend so much to produce cheaper fruit but rather superior fruit, while Mr. Ross claims that the same thing would reduce the price of fruit by 50 per cent. Would it not be instructive if Mr. Smith, who claims that "the fruit industry only needs organization" would tell us how he can possibly vote with Mr. Ross on a question which the latter says involves a reduction of fifty per cent in the price of fruit. It would also be interesting to know whether the majority of those present at the meeting voted for the resolution because the agreement would reduce the price of fruit or for the opposite reason.

Further, if Mr. Smith's statement that "If the Canadians in British Columbia secured the organization and business methods of their rivals in the fruit industry to the south they would soon secure possession of the buying field," is correct, it is one of the strongest arguments yet put up in favor of at least deferring the ratification of the agreement until time has been allowed for such organization, which has commenced to be strengthened and completed.

As a fruit grower I have no fear of the results of fair competition between our fruit and that of our neighbours to the south, but fail to see the object of an agreement, which, to quote the words of the resolution passed at the meeting referred to, will offer "extended markets for the producer and cheaper products for the consumer." How are the resources of the Dominion or province to be developed if the producer has to sell his produce at a reduction of fifty per cent, even though he may have an "extended market?"

CHAS. H. CORDY,
Summerland, B.C.,
March 24, 1911.

SHERIFF'S SALE.

The Westbank Trading Company, Limited, Westbank, British Columbia, under a Chattel Mortgage the Royal Bank of Canada for the sum of \$7,094.00.

Lien contract to the W. H. Petrie, B.C. Limited, and by virtue of Writ of Fi Fa issued out of the Supreme Court of British Columbia, a Woodman's Lien for the sum of \$2,316.35 besides Sheriff's fees and other legal expenses, and to me directed and delivered, and I have duly seized and levied upon the following property, to wit:

1st. Saw Mill Buildings and Machinery, situated on lot 24 according to plan of subdivision of Lots 486, 805 and 806, Osoyoos Division of Yale District, B. C., known as Westbank, together with lease of said lots for three years, subject to renewal.

2nd. 700,000 feet of saw-logs, more or less.

3rd. 200,000 feet of lumber, more or less, in the Mill yard.

4th. Portable Engines and Sundries.

Notice is given that on Tuesday the Fourth Day of April, 1911, at the hour of 11 o'clock of said day at the Saw Mill, Westbank, I will sell by public auction the above described property or so much thereof as will satisfy the claims and costs. Mill and property can be seen on applying to John Robinson, bailiff in charge at the Mill, Westbank. Dated this second day of March, 1911.

WENTWORTH F. WOOD,
Sheriff, Yale County.

EVEN THE HEN IS HIT.

When a poultryman wrote to the state department at Washington asking what Canadian reciprocity would do for the American hen, Charles M. Pepper, of the bureau of trade relations, got busy. According to his statistics the quantity of eggs Canada has for export has decreased from about three million dozen in 1906 to 82,000 dozen in 1911 and she is actually reaching out as far as China for her eggs. Imports by Canada from the United States average about a million dozen a year, while Canada was only able to spare the United States an average of about 35,000 dozen a year. The total last year was 40,000 as against 750,000 dozen sent from the United States. The reciprocity agreement makes eggs free on both sides of the line, so that as a trade bargain, the United States gets the three per cent duty removed on a million dozen eggs a year and in exchange takes off the five cents a dozen duty from something less than 40,000 dozen a year.

Boy Scouts from the Overseas Dominions will have official standing in the Coronation procession, although provision had not at first been made for them. How detachments are to get to the Old Country and who is to pay the expense of the trip is another question. The Canadian Century of Montreal is sending a squad of twenty, the boys to be drawn from all parts of Canada, and it is not unlikely that Colonel Sherwood and the Dominion Council will arrange to send a second squad. The Century party will sail on the Empress of Ireland with the Canadian Coronation contingent of Canada's official delegation and will travel like real soldiers under transport of war conditions.

In the Prize List of the Summerland Agricultural Association Fall Fair, the following class was inadvertently omitted: Class 8.—Best box of pears. Flemish Beauty, Beurre D'Anjou, Beurre D'Bose, Comice, Winter Nellis and Louise bonne de Jersey. Prizes, for each class, \$10 and \$5.

The public meeting on Tuesday was a very lively one. We were not aware before that the municipality owned cows, or was it that they were likened to a cow—to be milked by all and sundry. It was meant as a joke surely, for although great sums have been expended, this is the case in all new municipalities, and ours has a habit of getting cent for cent, as all tradesmen know.

A Few Suggestions

In New Spring Apparel for Men.

The Up-to-Date Man recognises the fact that it is necessary to maintain a neat and smart appearance about clothes. A well dressed man commands attention. The new men's suits we are showing are made of fabrics most popular for this season. Neat small patterns in grey woads; subdued browns and greens in small checks and stripes, and the workmanship is of the highest order.

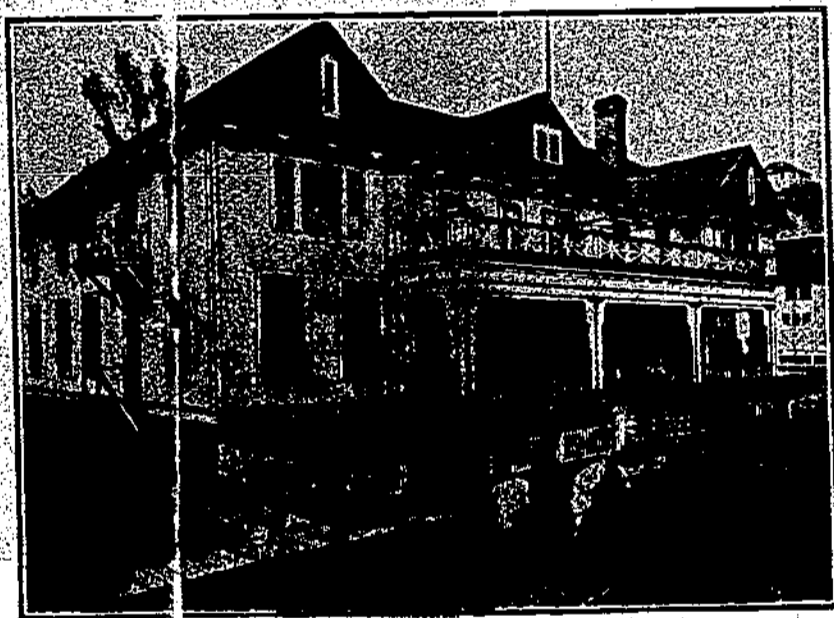

The hats for Spring are decidedly smart and stylish. The crown is full and can be worn in block or dented, with a nice full roll rim.

The new boots combine style and comfort. We have them in Valour, Box Calf and Patent, with the new light box toe and wing tip.

Shirts in carefully selected designs. Overalls, Jackets, etc., at right prices.

RICH RED BLOOD.

You Will Never Have It as Long
as You Have Dyspepsia.

Just as long as you have dyspepsia your food will not properly digest, and the nutritious elements in the food will not be extracted or absorbed, and impoverished or watery blood will follow.

This condition may not be apparent at first, but it will come just as sure as the sun will rise again.

Any stomach ailment, including all forms of indigestion, can be promptly cured by using Mi-o-na tablets, a scientific treatment unsurpassed.

It stops fermentation, belching of gas and taste of sour food almost at once.

The mighty power of Mi-o-na to invigorate and restore the stomach to perfect condition is known everywhere.

Mi-o-na cures by building up—by banishing the cause. For thin people it is a great flesh builder, because it causes the stomach to give more and purer nutrition to the blood. It cures sea and car sickness and vomiting of pregnancy almost immediately. The Summerland Drug Co. sells Mi-o-na for 50 cents a large box, and guarantees it to cure or money back.

HYOMEI

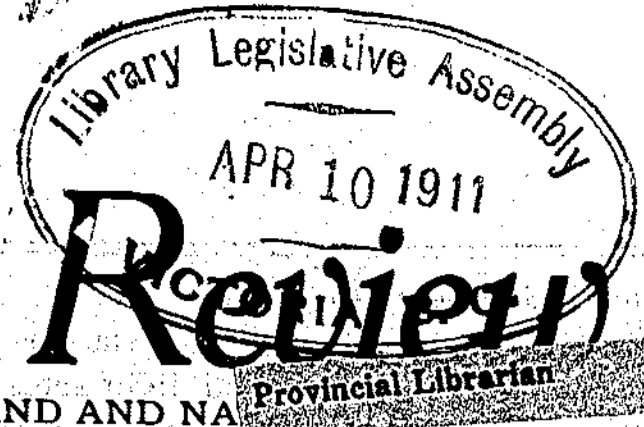

(PRONOUNCED HIGH-O-ME)

CURES CATARRH, ASTHMA,

Vol. 3, No. 35

SUMMERLAND, B.C., APRIL 8, 1911

Whole No. 139

RATEPAYERS' ASSOCIATION.

On Friday last in the Central Schoolhouse, West Summerland, the monthly meeting of the Ratepayers' Association was held. In the absence of the president, Mr. C. H. Cordy, who was away from home on business, Mr. C. Fetherstonhaugh occupied the chair. There were about twenty present. After the meeting had been called to order the minutes of the last meeting were read and passed.

The first discussion of the evening was about the municipal pipe line and the laying of same, whether it had been tested to the full pressure, if the valves at the various points were embedded in concrete as called for by the specification, and matters of a like nature. The discussion was long, but the opinion of the meeting was solid to the effect that there had been a great amount of leniency allowed the contractor in the laying of the pipes throughout the municipality; and they finally decided to seek legal advice and satisfy themselves as to whether the reply of the Council to the effect that they did not intend to enforce the penalty clause of the agreement, namely, "If not finished within a certain date, a fine of so much per day shall be made and deducted from the contracted price." If the association finds that by law this fine can be imposed owing to the contractor contravening any part or parcel of the agreement they firmly intend to go further into the matter.

Another source of great discussion was the Pound By-law. A member of the association had been asked to go into this matter and had procured a copy of the statutes of B. C. governing the impounding of animals. He had not only procured them but he read them out clause by clause, which was a dry and dreary business. Of course, he had gone into the matter thoroughly, but still it would have been much better and easier on the association had he just marked the particular clauses with which they had to deal that evening. At the close of the reading and after the argument, it was moved and seconded that the Municipal Council be requested to enforce the penalty clause respecting

animals which had been in pound more than once. This is a good move and there is no doubt whatever that many of the ratepayers of Summerland procure cheap fodder for their cattle by turning them out on the highways and byways, and if perchance they are impounded every other week the fines do not amount to any considerable figure; therefore these people should be provided for by the penalty clause, and it should be rigidly enforced.

The secretary was instructed to procure information as to the formation of a branch of the Prevention of Cruelty to Animals Society in this district. Several cases have recently come under the notice of members, and they considered it about time that these drivers should be ostracized from the community or themselves treated in such a manner as the law may direct when cruelty to dumb animals has been proven against them. A question was asked about the financial statement of the Municipality for the year 1910. This was referred to the deputation who were to see the Council.

Motor cars came in for a great amount of discussion, limiting their speed in the municipality to eight miles an hour, restricting them to certain roads, and so forth. Feeling was very strong on this matter, and finally a deputation consisting of Messrs. Kirk, Richardson and Clouston was appointed to meet the Council and to lay the various matters discussed by the association before their notice. This was all the business and the meeting adjourned.

A Canadian wide missionary Convention will shortly be announced by the Laymen's Missionary Movement. Meetings will be held in almost every town and city from the Atlantic to the Pacific some time next autumn. The dates have not as yet been definitely fixed but the first gathering will likely take place at Vancouver about the middle of October. Sir Andrew Fraser, late Governor General of Bengal, will be the chief speaker at those conventions, and in the western provinces he will be assisted by Mr. John R. Mott. In Montreal it is expected that Dr. R. E. Speer will accompany Sir Andrew Fraser.

MUNICIPAL COUNCIL MEET.

The monthly general meeting of the Council was held in the Municipal Building, West Summerland, on Monday last at 9 a.m. There was a full attendance, each member being in his place at the specified time.

The minutes of the last meeting were read and approved.

After correspondence had been read, quite a crowd of deputations waited upon the Council. Mr. A. E. Hespeler requested the Council to go into the matter of automobiles and the restriction of their speed, and also restricting them to certain roads. He likewise drew the attention of the Council to the condition of the nuisance ground. The latter came in for a good amount of discussion, and the Council decided that greater care had to be exercised by those using this dump. They must carry out the letter of the law, and cover whatever they take in the way of vegetable, animal or such refuse matter, with silt or lime to the depth of three inches. Where boxes are dumped, or any refuse that can be burnt, it must be destroyed in that manner.

Before they had got through with this matter, a deputation from the Ratepayers' Association, consisting of Messrs. Kirk and Clouston, waited upon the Council, and laid before them the many resolutions passed by their meeting. The Pound By-law was the one around which there was most discussion, but nothing of a definite nature was done. In the meantime, however, they will go further into the matter.

The letter from Mr. H. B. Taylor, claiming payment for work done in connection with the electric light plant last summer was read and placed on the table. This letter consisted of about seven pages closely written, and in it Mr. Taylor described how he had done certain things which, had he not accomplished them, there is no doubt they would still have remained undiscovered. It is quite evident that Mr. Taylor is a humorist in his own little way.

A letter from the Attorney General was read asking the Council who furnished the instructions that all fines collected in the municipal-

ity were to be paid to the government agent. He was not aware that such an order had been issued.

Mr. C. N. Higgin's request re the road near to his place at Balcomo was referred to the roads and bridges committee.

Motor cars. These machines are evidently causing great trouble in the district. Certain it is that during the muddy condition of the roads recently, they caused a considerable amount of trouble to their owners, but now the whole community seems to be going after them. There were three distinct deputations about motorcars and each one was stronger than the other, if possible, in condemnation of the autos. The Council are procuring a copy of the new law anent these machines in B.C., and no doubt when they have received this, they will act upon it and have all motor cars licensed and also the drivers, and if the latter in any way misbehave by exceeding the speed limit, taking roads in the district on which they are not supposed to travel, or in any other way breaking this law, their license will be cancelled, and so far as Summerland is concerned, they will be out of a job.

Mr. C. S. Stevens, manager of the Telephone Company, waited upon the Council asking permission to erect poles in various parts of the municipality for the extension of the telephone system. Trout Creek, Crescent Beach and Garnett Valley were amongst the districts mentioned. He also drew the attention of the Council to the fact that where the telephone wires crossed the electric live wires, guards should be placed above in case of breakage of any of the telephone wires. In all cases throughout the system of the telephone Company where a live electric wire crossed the telephone wires, such guards had been placed.

Messrs. J. E. Phinney and W. S. Ritchie asked the Council to place hydrants in position at various places in West Summerland and also to provide fire hose for the protection of the inhabitants. These hydrants, the Council informed them, were already on the way and would be erected as soon as possible. In regard to hose, reel, etc., nothing definite was decided.

Mr. T. P. Thornber, municipal

Electrician, intimated to the Council that there were many applications for electricity for household use, and the Council decided that, so long as there is no scarcity of water the plant shall be run from eight to twelve every Wednesday morning for the benefit of those who use electric irons, etc.

The Council resolved that, if satisfactory arrangements could be made, they would purchase the right-of-way where necessary at Gartrell for the Government Trunk Road.

Mr. J. Blewett waited upon the Council requesting them to alter the curve in the Peach Orchard road near his residence, making the road much straighter than it is at the present time. He informed the Council that all the proprietors of land whom this would affect, were heartily in accordance with this proposed change. The Council referred the matter to the Board of Control.

The account for additional services rendered by Mr. C. P. Nelson in his annual audit of the municipal books was referred to the chairman of the Finance Committee for his attention. During the last three regular meetings of the Council, the municipal accounts and balance sheet have formed much food for discussion and have been the bone of contention between the municipal auditor and municipal clerk.

The following accounts were passed:

Dom. Glazed Cement Co.	208.00
Drug Company	4.50
R. H. English	.50
J. L. Logie	221.65
Development Co.	106.00
B. Drake	1.25
B. H. Sherk	3.00
Citizens' Band	30.00
L. C. Beetham	10.00
Supply Company	25.00
Total	\$600.90

The assessment roll for the year 1911 was presented by the assessor, Mr. J. L. Logie. The sum total in round figures as it at present stands is \$2,522,000.00.

After a session of four hours the Council adjourned until seven p.m. when all were again in evidence. They proceeded with the following business:

Applications for road work, etc., were considered, and in one or two cases tenders covering same are to be called for. In cases where owners have at present one road to their property their applications were left over.

It was resolved that all delinquent in paying their water and light rates before the end of the quarter, the same shall be cut off from the use of these privileges. For over two hours the Council discussed the rate problem, and the discounts to be allowed this year on the rates and taxes. There was an equal division on the matter, but finally by changing the manner of application the following was passed, providing the assessment of the municipality will allow of it. 10 per cent discount on Irrigation and Domestic Water rates, and an increase of one mill on the dollar in taxes to meet the roads and bridges account for the year.

About the extension of the Electric Light Plant there was discussion, but as the signatures of 50 per cent of the rateable value of the district will be necessary on a petition to the Council, this was left over for the present.

In regard to the hospital they cannot move on the matter until a signed petition of over 50 per cent of the assessed value of the municipality has been presented to the Council.

In respect to the hotel the matter was left over until such time as the public meeting was called.

The claim of T. Collinge was again considered and a plan was taken of the section on which the accident occurred, and advice was requested from the Council's solicitor, Mr. Billings.

This was all the business, and the council adjourned at 11.30 p.m.

Any man who has the habit of beating his better half will, after this, get a taste of his own medicine if he happens to be haled before Judge Lengalier in the Court of Sessions. For the first time in many years a sentence, with the additional sting of the cat o' nine tails added to it, was pronounced by his Lordship the other day. He was also good enough to warn all wife beaters that, if ever any of them appeared before him, they would catch the same punishment. It is a peculiar fact, but none the less true, that almost every man criminally inclined fears the lash more than anything. Governor Vallee of the Montreal jail is of the opinion that a large percentage of his boarders would be a good deal more Christianly inclined were the cat o' nine tails a little more freely applied.

Messrs. Shields, Hatfield and Clark handle rigs, wagons, etc. See them before placing your order.

NOTICE.

Tenders will be received by the undersigned up to the 22nd day of April, 1911, at 5 p.m. for the purchase of Block 27, Subdivision of Lot No. 541, Group One, New Westminster District, situated in the city of Vancouver, and being the site of the old Provincial Courthouse. Each tender must be enclosed in a registered letter and must be addressed to the undersigned, and plainly marked "Tender for Old Vancouver Courthouse Site," and must be accompanied by an accepted cheque for ten per cent of the first payment of the purchase money. Payment for the property will be accepted in instalments of one-quarter of the purchase money. The first of such instalments to be paid within thirty days of the acceptance of the tender, and the other three annually thereafter, with interest at the rate of six per cent per annum. In the event of the person whose tender is accepted failing to complete the first instalment within thirty days of the notice of such acceptance the sale to him will be cancelled and his ten per cent deposit forfeited. The cheques of unsuccessful tenderers will be returned. The highest or any tender will not necessarily be accepted. No commissions of any kind will be allowed.

ADVERTISE.

: Naramata Notes : Kaleden Comments

Mr. Allen Hill has removed for a time to Penticton.

Mrs. J. M. Robinson is expected back from Toronto next Tuesday the 11th inst.

Mr. N. Alexander has purchased Mr. Miller's town property including a house and two lots and has already taken possession.

Mr. W. S. Miller of the Naramata Supply Company has completed the transfer of his interests to Mr. Bartlett and contemplates leaving for the south next week.

Mr. and Mrs. Walters entertained the whist club on Tuesday evening upon the occasion of the final series of plays. A dainty luncheon was served about eleven, after which the scores for the whole series were announced and prizes awarded. It was found that Mrs. Johnson and Mrs. Wolstencroft for the ladies and Mr. Dean and Mr. Boothe for the gentlemen were the ones who best deserved congratulations or words of sympathy respectively as the case might be.

The Unity club held its regular bi-monthly gathering on Friday last at the home of Mrs. Languedoc. The special item of news here is the donation of a town lot to the club by Mrs. Wellband, as a site for the proposed clubhouse. The Unity club is a thoroughly cosmopolitan, non-political, non-sectarian, social and philanthropic organization, that has done, and is still doing, very important work for Naramata.

During the course of the week several changes have been effected in town that are of interest to Naramata citizens. The Post Office has been transferred to its old quarters in the store, the Trust Company's offices are now situated in the Hotel proper, also Mr. Robinson's private office, and the former hotel will in future be run like a restaurant, and at prices which will be more in keeping with a working man's pocket. Then the proposed furniture store will be in the building on the Avenue known as the original store, soon to be vacated.

Messrs. Shields, Hatfield and Clark are as busy as ever in their boat building department. They have already launched several boats this season, and amongst the orders they have on hand at present are a 25 foot launch and a craft of the "viper" type.

Miss E. Wilson, of Oberon, Man. has arrived and has taken up the work of Postmistress.

Orchard planting is now in full swing, and a large number of men have come into Kaleden this week.

Our Provincial member, Mr. L. W. Shatford, and H. C. Turner, the Similkameen Road Superintendent, were in town this week.

Our old friend Jack Steven and a companion Thos. Hickey arrived in town today from Summerland, on business.

The Fairview Stage, carrying the Kaleden mail, commenced travelling over the new and much easier grade through Kaleden on April 1st, delivering the mail at the Post Office, and distributing en route to Maron and White Lakes.

Mr. James Ritchie motored over from Summerland twice this week accompanied on the first occasion by Lord De Vescie and local advising companion. These gentlemen were shown over a portion of the Kaleden property, in which they expressed much interest and satisfaction. His Lordship commented on the excellent quality of the water obtained from the splendid gravity pipe system now in operation here, and expressed himself as delighted with his visit.

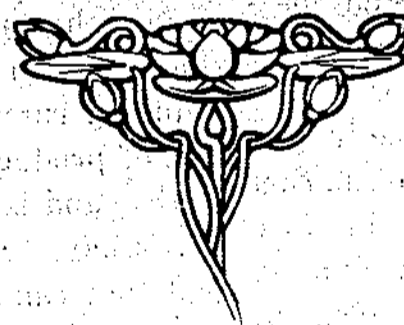

On Thursday last, Mrs. Melville, after enduring many years of physical suffering, passed peacefully to the Higher Service—"With Christ which is far better." Those who know the family cannot speak too highly of the devotion of its members to their mother, and the unwearying skilled attentions of Miss Melville by night and day, during the last few months in particular, has witnessed to a rare unselfishness and tender love. The funeral took place quietly in Kaleden, a simple service in the home, led by Rev. F. W. Auvache, was attended by Mr. and Mrs. James Ritchie, Mrs. and Miss Finlay, and Miss Chalmers, of Summerland; Miss Auvache of Penticton, Mr. McLellan of Okanagan Falls, and local friends. The remains were then conveyed to and laid to rest in the cemetery.

Come to the
West Summerland Blacksmith
if you want your horses properly shod. All kinds of wood and iron work promptly attended to.
SCOTT DARKIS.

A Big Asset

The Solid Earth

Of course, you must procure the right kind of Soil, the kind that will grow anything. This is the kind we offer in Summerland; the fruit-growing centre of the world-famed Okanagan district.

SATURDAY, APRIL 8, 1911.

THE MATTER OF PROFIT.

It was a great pleasure for Mr. McMillan, manager of the Vancouver city market, to meet the fruit shippers of Summerland on his trip through the Okanagan last week. Mr. McMillan was most favorably impressed by the ready attitude of our shippers to grasp the market conditions presented to them by him, and it was his pleasure to refer to them while speaking at other places and to commend their clean cut business attitude in dealing with the market problems with him. He hoped other districts would enter as wholeheartedly and as clearheadedly as did the shippers of Summerland, for by such action, and such only, would come any permanent good to the growers of British Columbia.

We have every confidence in the successful solution of the market problems by the fruit and produce growers of the Okanagan Valley. There are problems to be tackled, it is true, but the men upon whose shoulders will rest the responsibility of tackling these problems, are men whose lives have been spent in overcoming obstacles and carrying through big things, and they are not going to fail us now.

There is opening in Vancouver a market for our fruit and vegetables unsurpassed in Canada. True, in the past, we have not had "a look in" in the Vancouver market, but last year's national apple show at the coast metropolis put an end to that unprofitable indifference prevailing at Vancouver with regard to the Okanagan. It showed Vancouver that this favored Valley was not going to be ignored any longer, and that Vancouver must do one of two things: either encourage the

trade between this section and Vancouver or lose entirely the business from this Valley. And the business people of Vancouver have forced the opening of Vancouver markets to Okanagan fruits and produce.

If we can get a market so close to home, and one which, for the next few years, at least, will be unequalled in demand and at a good price, it will assist materially in solving the problem just now, and ought to create a demand for quality that only the fruit of the Okanagan can supply.

But the market problems are not the only problems our fruit and produce men must tackle. Another is that of economical handling of the product in the field and from the field to the packing house and packing house to market. This is a problem that confronts even the older fruit districts and one which demands constant attention. If this be true in the older districts it is doubly true in the districts just getting their fruit on the market.

"We received such splendid prices for our fruit in the past years that economy in production has practically been ignored," says Mrs. E. H. Shepard, in Better Fruit. "However, we are no different in this respect from many large industrial enterprises. Business in the past two years has been exceedingly prosperous, very active and profits large, and it was not necessary to economize in production, at least we thought it was not necessary. This has also been true of the railroads. Much attention has been devoted recently to reducing running expenses and the cost of production in various enterprises, and is still being given serious study. Railroads are finding that they can save millions of dollars with economizing methods. Sometimes the saving in itself alone is a big profit. A man familiar with one of the big meat concerns stated some time ago that the profit in business really was what they saved by utilizing the waste, consisting of the horns and hoofs, which were made into glue; the hide, which was made into leather; the entrails, which are used for fertilizers. Not an ounce of the carcase is wasted. So it is with the fruit business. We should utilize the culls for by-products.

"Some time ago the work of the brick mason was carefully investigated, and it was found after a very careful study that his movements in handling bricks could be so improved as to facilitate the rapidity with which he worked so that

his efficiency increased 200 per cent. It would seem that this might offer a good suggestion for us in the handling of our fruits. Now, in our opinion, there is not a doubt that when the fruit grower gives the matter of picking, packing, grading and proper conveniences a thorough study it will result in handling our fruit and growing it in such a way as to make a saving of probably 20 per cent, or ten cents a box, and ten cents a box saved is just as good as ten cents a box made, and in some instances better, because sometimes we do not get the ten cents a box extra when we are expecting it."

STRAWBERRIES BETWEEN THE ROWS.

"Mr. W. H. Burke, of Three Rivers, Mich., writing in Better Fruit for March, strongly advocates the growing of strawberries between the rows in young orchards.

"During a recent trip through the orchards of the Intermountain and Pacific Coast states," says he, "the writer was struck by the failure of the orchardists, in many instances, to utilize the spaces between the rows of young orchard trees by the growing of some profitable crop. It occurred to me then that this must be due to the fact that the orchardists in this region were unfamiliar with what is going on in so many orchards in other sections of the country now being opened up to the production of fruit in large areas. For instance, on a recent trip through the orchards of the Pecos Valley of New Mexico we had excellent opportunity to learn, from the practical results secured there, of the high value of utilizing these vacant spaces during the years when the orchards are coming into bearing. Not only did we learn from the orchardists that the practice was profitable, but we had opportunity to compare the trees in orchards where cultivated crops were grown with those where no crops were grown between the trees, and were agreeably surprised to note how much further advanced and in how much better condition were the trees in those orchards where subsidiary crops were grown between the rows. We were especially struck by orchards where strawberries were grown because, as the strawberries require frequent cultivation, we could see the trees had responded directly to that treatment, and were far and

away in advance of the trees in nearby orchards—trees that had been set at the same time, in the same character of soil, and excepting for the fact that crops had been grown between the rows in one orchard, whereas none had been grown in the neighbouring orchards, the same conditions throughout prevailed.

"I also visited a northern Michigan orchard last summer whose owner advised us that he was more than paying expenses while his trees were coming into bearing through the growing of strawberries. We receive letters from all over the country confirming our observations in these directions, and we are very confident that with the growing demand for high grade strawberries, both locally and in far distant markets, The growers of the Pacific Coast and Intermountain states would find this method of utilizing the vacant spaces between the rows of trees a source of real profit.

"As to the methods to be employed in this line of work, we would suggest that from three to five rows of strawberries may be grown during the early stages of the orchard's development, depending, of course, upon the width apart the trees are set. Where approximately fifty trees are set to the acre at least two crops could be grown from five rows of plants during the earlier stages of the orchard's growth. As the trees spread their foliage the number of rows would become fewer, of course.

"As to soil, the same conditions in this respect that will develop fine orchard trees will also grow fine crops of strawberries. In regions where irrigation is practiced the same rules would apply in that respect, excepting that we should advise a sparing use of water, as the tendency of the excessive use of water is to make the fruit flabby and tasteless."

Georgia has the honor of being the first to report its peach crop nipped by the frost.

that, under the authority contained
in section 131 of the "Land Act,"
a regulation has been approved by
the Lieutenant-Governor in Council
fixing the minimum sale prices of
first and second class lands at \$10
and \$5 per acre respectively.

This regulation further provides
that the prices fixed therein shall
apply to all lands with respect to
which the application to purchase is
given favorable consideration after
this date, notwithstanding the date
of such application or any delay that
may have occurred in the consider-
ation of the same.

Further notice is hereby given
that all persons who have pending
applications to purchase lands un-
der the provision of sections 34 or
36 of the "Land Act" and who are
not willing to complete such pur-
chases under the prices fixed by the
aforesaid regulation shall be at lib-
erty to withdraw such applications
and receive refund of the moneys
deposited on account of such appli-
cations.

WILLIAM R. ROSS,
Minister of Lands.
Department of Lands,
Victoria, B.C., April 3rd, 1911.

NARAMATA NOTES.
(additional).

Dr. Andrew paid the local school
an official visit on Wednesday last
in the capacity of Medical Health
Officer.

The subject of Mrs. Gillespie's
address next Sunday evening is
"The Promised Land." As Mrs.
Gillespie leaves next Thursday on a
two months visit to California this
will be the last opportunity we
shall have for some time to listen
to our talented lecturer. All are
welcome.

WOMEN'S INSTITUTE.

The members and friends of the
Women's Institute held a special
series of meetings this week, from
Tuesday till Friday afternoon,
when Mrs. Shaw, of Golden, gov-
ernment demonstrator of needle-
work and kindred subjects, gave
practical lessons to all who cared
to learn. The first meeting, on
Tuesday, took the form of a social
afternoon, with the inevitable cup
of tea. Mrs. Shaw hand-
ed round some very beautiful
specimens of Montmellick work,
crotched lace and other fine em-
broidery. On Wednesday about
twenty-eight attended and the lad-
ies set to work in real earnest,
many bringing materials with them.
One group were much interested in
the making of a couple of dressing
sacques, others were copying an el-
aborate crochet pattern, and sever-
al were learning the intricate stit-
ches of Montmellick work. Mrs.
Shaw gave a lesson in stencilling
and two or three of the ladies had
a try at that, some very creditable
work being produced. Mrs Shaw
offered to teach any who wanted to
learn how to crochet round d'oyleys
while some of those who had not
had an opporunity before got a les-
son in stencilling. And thus
throughout the week the busy
hum of activity went on, and Mrs.
Shaw was ever willing, ready and
capable to solve all the difficulties
brought to her in her own particu-
lar department.

**REDUCING THE COST TO
MARKET.**

The Panama Canal Exposition
will be held in San Francisco in
1915. This is a glorious victo-
ry for San Francisco and will be
of great benefit to the entire
Northwest and our great fruit in-
dustry. In time, refrigerator
steamers will be placed on the
line between here and New York
and Europe, which will enable us
to lay our apples down in the At-
lantic cities and Europe for at
least onehalf of what it costs us
now.—Better Fruit.

The Baptist Church on Shaugh-
nessy Avenue will probably be form-
ally opened for public worship about
the beginning of next month.

Mr. S. Bartholomew returned to
Summerland on Monday from his
trip to Vallejo, where he has been
spending the winter with his
brother.

The Corporation of the District Municipality of Summerland.

(Total Tax 10 mills on the dollar).

Local News Items

BORN.—To Mr. and Mrs. Geo. R. Raincock, on the 6th inst., a daughter.

On Monday last, the Bank of Montreal opened up a branch at West Summerland, with Mr. H. J. Collas as sub-agent.

Mr. James Conway and daughter, Myrtle, arrived home last Friday from their three months holiday. Myrtle left on Monday for Kelowna at which city she has accepted a position.

The members of the Bible Class of the Methodist Sunday School spent a social time at the home of Mr. and Mrs. James Conway last Thursday evening. Games and guessing contests were the order of the evening and everyone thoroughly enjoyed themselves.

The following is the Honor List for the Town School for the month of March. 3rd Reader Class. Doris Fulton 85; Allen Harris 84; Kathleen Raincock 82; Bertha Bristow 73; Kathleen Brown 73. Second Reader Class. James Clark 87; Olive Bristow 86; Marjorie Hatfield 83; Kathleen Merrill 80; Willie Clark 76; Gwen Harris 75. 1st. Reader Class. Jack Harris 85.

A wedding took place at the Mount Pleasant Baptist Church on Saturday afternoon, when Miss Mary Helen Bartholomew and Mr. George Mason Ross, both of Summerland, B. C., were married by the Rev. S. Everton in the presence of a few friends. The bride was given away by her father, Mr. Samuel Bartholomew of Summerland. Miss Alice Kennedy of Vancouver attended the bride and Mr. R. W. Agur of Summerland was best man. Mr. and Mrs. Ross will spend several days with friends in the city, after which they will return to their home in the Okanagan Valley.—Province.

We really would like to give the band concert the write-up it deserves, but cannot, having missed it and hence merited our share of the gentle scolding administered to the public by the Review. The citizens are not "antagonistic" to this splendid organization. They appreciate its excellency and are proud of its achievements. But the long suffering public has had its hand in its pocket every other night all winter. There is hardly enough left in the bottom of our sock to buy seed potatoes.—Summerland correspondent, Vernon News.

The following is the Honor Roll for Division I. of the Central School for March. Senior 4th. John McLeod 86; Jean McIntyre 86; Blanche Babbit 82; Charles Steuart 81; Gordon Ritchie 80; Andrew Campbell 79; Cleveland Stevens 80; Kathleen Elliott 78; Willie Simpson 77; Howell Harris 75; Edith Bristow 74; Maggie Ritchie 74; Kathleen Babbit 73; Gordon Campbell 73; Harvey Phinney 72; Ruth Blair 72; Marie Arkell 72; Minnie Gallagher 71. Junior 4th. Olga Tunstall 71, Kenneth Elliott 63; Eliza Ritchie 63; Bert Campbell 63; Marie Hatfield 61.

Mr. W. J. Robinson returned from the Provincial capital on Wednesday evening. His visit to the coast was in the interests of the hospital proposition. Mr. Robinson reports being favorably received. While his request was for a subsidy of \$7000 for the Summerland Hospital the government has promised \$5000, \$3500 of which is available this year and the balance in 1912.

St. Stephen's Guild of the Anglican Church will hold a Bazaar on Wednesday April 26th, in the Mens' Club. Blouses and fancy goods will be offered for sale. Afternoon tea and Supper will be served. During the evening the Amateur Dramatic Society has kindly consented to present a short play.

W. A. Doyle.

NEWS FROM THE EAST.

(From our own correspondent.)

Montreal, April 3.—With the new era of construction that bids fair to make this an entirely new city within the next quarter of a century well under way, Montreal is now spending annually on the erection of new buildings nearly enough money to build the Georgian Bay Canal, and is using during the same period enough building material to construct at least three pyramids equal in size to the great pyramid of Choops. Never before in the history of Canada has there been any approach to the record of expansion which figures just collected have brought to light here. New suburbs, towns in themselves, are springing into being almost every day all over the island. Old landmarks, gentle reminders of Maisonneuve and the French founders of Montreal, disappear in a night and long sturdy iron girders reaching to the skies take the place of the squat time worn stone walls. Up to date Montreal has had the unenviable reputation of being a fire-trap city, and this reputation has been deserved, for the city's loss by fire has far exceeded annually the usual losses sustained by cities of a similar size in the United States and Europe. With the rebuilding that is going on an effort is being made to remedy this state of affairs. The fire zone—that is to say the area in which none but fireproof buildings may be erected—has been greatly extended and in the older portions of the city where narrow streets networks of overhead wires and cables and obsolete buildings make excellent conditions for a large conflagration, it is proposed to erect fireproof walls of asbestos. Some of these walls will of necessity have to be over a hundred feet high and will require an immense amount of material. With a view to placing a tentative plan before the authorities the manager of the Black Lake Consolidated Asbestos Company has just completed a round trip of all the leading asbestos companies in the United States to get their views. He found that all the American mines were working overtime to fill immediate demands, and as his own output has already been sold for some time to come, the great walls of China will probably hold their reputation for a little while longer. In the meantime Chief Tremblay of the Fire Department is very much exercised. If he had his way he would pull all the old buildings in the city to the

ground, but as the most dangerous ones belong to a powerful corporation, it is not likely that he will get his way.

It took Montreal a long time to wake up and cast a sleepy glance over Porcupine. Developments that made the world stare have been going on for a good twelve months up there. Toronto has gone crazy over it. Montreal, until a few days ago, slept on in peace and bliss. Porcupine, as a camp, is undoubtedly good if one may believe the united word of the scores of engineers, expert and otherwise, who have walked right in and turned around and walked right out again. They all saw enough to satisfy them that pay ore in large quantities was to be had. As to the specific mines which are being offered to the public—that is another question. Some of them come out with flaring prospectuses gaudily decorated. The wise man sends most of these to the waste basket. Others appear as a straight business proposition and the wise man treats them as such. If money is put in more money may be taken out. So far, these latter have stood the test of time. Hollinger is one of these, the Dome is another and Porcupine Tisdale is another. These three camps, however, leaders in popularity as they have been so far, and situated in the centre of the gold producing zone, are still gambles. As a matter of fact all mines are gambles.

Stories have been circulated at different times of terrible diseases caught from the wearing of false hair. These are being brought pretty close to home at the present moment. Dr. J. E. Laberge of the Provincial Board of Health, is about to issue a statement to the effect that there is danger that the plague which is causing such frightful suffering and death in China may be brought into Canada by false hair. The officers of the health department are making enquiries at the local hair stores in order to discover what proportion of the switches sold by local dealers come from China. The men who conduct the hair business state that they import the bulk of their goods from Germany, but they add that Chinese hair is also on sale here. It is claimed that most of the corpses taken to the morgues in the plague stricken districts of China are minus pigtails, and the reason is that the hair has been taken by agents of the hair companies.

RICH RED BLOOD.

You Will Never Have It as Long
as You Have Dyspepsia.

Just as long as you have dyspepsia your food will not properly digest, and the nutritious elements in the food will not be extracted or absorbed, and impoverished or watery blood will follow.

This condition may not be apparent at first, but it will come just as sure as the sun will rise again.

Any stomach ailment, including all forms of indigestion, can be promptly cured by using Mi-o-na tabets, a scientific treatment unsurpassed.

It stops fermentation, belching of gas and taste of sour food almost at once.

The mighty power of Mi-o-na to invigorate and restore the stomach to perfect condition is known everywhere.

Mi-o-na cures by building up—by banishing the cause. For thin people it is a great flesh builder, because it causes the stomach to give more and purer nutrition to the blood. It cures sea and car sickness and vomiting of pregnancy almost immediately. The Summerland Drug Co. sells Mi-o-na for 50 cents a large box, and guarantees it to cure or money back.

HYOMEI

SUMMERLAND, B.C., APRIL 15, 1911

Whole No. 140

CLEAN-UP DAY.

Should Summerland and the several towns on the lake have a Clean Up Day? It is all very well to leave the matter to the authorities and the people themselves, but would it not be better to make a systematic and wholesale clean up early in the spring and be done with it? The idea is not by any means a new one, Calgary adopts the system every year, a number of Canadian cities, and Spokane, Wash., has long since found it a splendid idea and one that the citizens take to readily. The following despatch will clearly point out the methods adopted by the latter city and it would be well for Summerland to take some lessons from it. We, of course, cannot go into the system in such an elaborate manner, but we can attain just as good result. Here is the despatch: Spokane, Wash., April 10.—One of the most unique and wholesome spectacles ever witnessed on this continent will be the cleaning and special arbor day celebration in Spokane the latter part of April, when the city commissioners will co-operate with the citizens in an effort to make Spokane a "spotless town." Mayor Hindley will proclaim a public holiday to start the campaign, after which the city beautiful committee of the chamber of commerce and allied organizations will take charge.

"Our arrangements are not yet completed," Mayor Hindley said, "but I believe we can bring out from 45,000 to 50,000 men and women, including railroad and bank presidents, manufacturers, wholesale and retail dealers and society matrons, on the opening day to assist in beautifying the residence districts. The city crematory department will take charge of the business streets and alleys and special detachments of firemen will be on hand to prevent fires. The refuse will be destroyed under their direction.

Aubrey Lee White, president of the Spokane park commission, is the originator of the municipal cleaning day plan, first worked out in this city early in the spring of 1906, through the city beautiful committee of the 150,000 club now headed by C. Herbert Moore, formerly mayor of the city. It has be-

come an annual institution in Spokane, and has been taken up by other cities in the United States and the Dominion of Canada.

Twenty thousand men, women and school children participated in the first annual clearing day five years ago. The army of volunteer workers, composed of people from all works of life, was under the direction of City Engineer Lilenthal, who was marshal for the day. The men and boys were armed with shovels, pruning implements and rakes, while the women and girls assisted in planting trees and shrubs and flower seeds. They worked from early morning till the sun had passed from sight behind the western hills, and the results were highly satisfactory. Five hundred teams were provided by the 150,000 club, mill owners, business houses and residents generally, to haul the garbage to the municipal incinerating plants, and special firemen were stationed in various parts of the city and outskirts to supervise the destruction of refuse by bonfires. Business was suspended during the hours the people were engaged in cleaning the city.

The 150,000 club turned out in its entire membership of 3,200 in command of Hon. H. Rice, then secretary of the organization and the Ne-Now E-Nak-Ops; the women's auxiliary headed by Mrs. F. F. Emery, assisted the school girls with the planting of the shrubs and flower vines and seeding plots of ground. Ten thousand packets of flower seeds were used. When Spokane awakened next morning the city presented the appearance of a new pin.

Beautification and artistic improvements were noticeable in all parts of the city, and it was generally conceded that the first cleaning day campaign was one of the most successful semi-civic movements carried to a conclusion in Spokane and the Northwest. Then and there it was decided to devote one day each year to this work.

The band are busy practising for their concert on the 24th of May. At present they are forming a minstrel troupe, and everything points to a successful show. The first rehearsal of the troupe took place on Thursday evening in the Council Chamber.

"JERRYLETS."

Many will remember Mr. Terry, the Government Poultry Demonstrator, who so ably held forth at the Poultry Show in Summerland during January last. Mr. Terry, under "Jerrylets," expressed his opinion of the district and the show in the Canadian Poultry Review as follows:

Phew! Talk about land booms. It isn't in it with the poultry boom out here.

Splendid climate, splendid prices for all kinds of produce, and unfortunately a splendid price to pay for grain.

Am writing this from Summerland, situated on the Okanagan Lake. Won't try to describe the lake scenery. It would take Mrs. Clancy to do it.

Am demonstrating at the first annual show here. Entries nearly 300. All home made coops. All uniform, splendidly made, good size, and full size doors. Show being held in the fruit warehouse, room enough to show 12,000 birds. Thoroughly live town. Electric lighted, hotel (temperance). Only 2,000 inhabitants in the township, so consider 300 entries.

Met the champion fancier of Canada to-day. Think he deserves the title. If we had more like him, there would be thousands of shows where there are only tens now. Failed to catch the boat yesterday, so started out, with four birds on his back, and tramped fifteen miles through the hills (really mountains). Started at two a.m. and arrived here at eight thirty a.m. this morning. Had a coyote follow him for several hundred yards, probably could smell the chickens. This fancier-sport is fifty years old, and comes from the home of many a fancier—Yorkshire, England. He was raised right near to Harry Pickles and Beldon, the great Hamburg specialists, also T. Rawnsley.

Mr. and Mrs. G. M. Ross went up the lake on Wednesday morning's boat, after spending a few days in Summerland. They will make their home for a few months in Armstrong—not far enough away to prevent an occasional visit to Summerland, we hope—and the good wishes of a host of friends follow them.

NEWS FROM THE EAST.

(From our own correspondent.)

Montreal, April 10.—In this great city of Montreal there is an ever-increasing army of wage-earning women. These girls and women are employed in schools, offices, shops, private homes and other places too numerous to mention. They pour into our city from the country districts of Canada, and from the smaller towns and villages. They come across the ocean from the Motherland, and, in smaller numbers, from the south. Here they gather to work and to live. They have to work and they live as best they can. Further than accepting freely of their work Montreal has, thus far, done little for this class of her population. And Montreal is just beginning to realize that she is in debt. Shortly before Sir Thomas Shaughnessy went abroad a few gentlemen sat in the smoking room of the Mount Royal Club. Most of them were of the ever expanding millionaire class. The question of society's duty to the working girl arose. The President of the Canadian Pacific jumped to his feet, paced the room a couple of times and thus expressed himself:—"The young men of our day have everything. They have club houses, they have well stocked reading rooms, they have comfortable and convenient meeting places. Our young women hear the bustle and roar of business about their ears nine hours a day for six days a week. The rest of the time they spend in the back hall bedroom of a boarding house thinking about it. The more pleasant and quiet you can make your employees' surroundings the more cheerful work you can get out of them. We consider money well spent on the C. P. R. if we can eliminate noise thereby. The other day I had several noiseless typewriters installed. Some of the girls objected because the touch did not suit them. Some genius invented an attachment which made the touch similar to any standard machine a stenographer happened to be accustomed to. It cost us money and it cost the typewriter people money to make the change, but the change took a useless click out of life. If a man would invent an attachment that would make a train

noiseless I would have it if it cost a fortune. It is the bumps and clicks of the day's work that make us weary." It was this little speech, spoken on the spur of the moment, which sowed the seed for larger things. A real home for the working woman was suggested—a home embodying all that that dear word really means. These same millionaires got their heads together an architect and a contractor were summoned, plans and specifications were called for, inquiries were made as to how other cities coped with the problem, and the ball was set rolling. Montreal is to have a half million dollar hotel exclusively for women. It will be an Adamless Eden so to speak, and just as unique and tranquil in many ways as the one only and original Eden. It will be built either on Sherbrooke Street, opposite the Royal Victoria College or on Dorchester Street, not far from the Y. M. C. A. building.

Because of an increased flow of immigration from continental ports to Western Canada and an increase in the use of the Saint Lawrence route by continental passengers travelling to points in the Western States, two steamers of the Red Star Line have been transferred, and will ply between Rotterdam and Quebec instead of between Antwerp and New York as hitherto. They are the Samland and the Gothland, and will be included in the Canada Line Service. Increases to the fleets of the White Star-Dominion, the Thompson and the Allan Lines have also been announced. Peculiarly enough in almost every instance the vessels are being taken from the New York trade to the Saint Lawrence—a small fact in itself, but plainly showing in which direction the wind is blowing.

The fate of "The Mill" Rembrandt's famous painting, and its loss to England because Lord Lansdowne has not sufficient income to retain it, has stirred anew the embers of strife in regard to the commercialization of art. Canada has never had a front rank artist nor a really famous painting. Nevertheless, in the little coterie of Canadian artists and students here, "The Mill" has been a subject of hot discussion, and many an artistic metaphorical tear has been shed because there is nobody in Canada to step forward with the necessary one hundred thousand pounds to buy the painting for this country. Mr. Robert Harris, the dean of Canadian artists, instead of weeping

is smiling. He sees signs in the air at last arousing itself to an interest in art. Although it has not been generally noticeable, he says, Canada has been progressing steadily in the development of her artistic temperament. It has begun in the commercial grades of course, but when people have made money out of art it will not be long before they will turn to "art for art's sake." A few days ago, he said, he noticed that a small band of Canadians, amongst them Mr. William Stone of the Bank of Toronto and Mr. Edmund Bristol, M.P., of the Canadian Securities Corporation, had re-organized Stone, Limited, the largest lithographing plant in Canada, and made a small issue of \$200,000 bonds for the purpose of obtaining the Canadian rights of the Heubner-Blostein art process of lithographing. By this process they will be able to produce sketches, drawings, and so on in about ten days time far better and cheaper than by the old method thus far employed in Canada, which took six weeks. Now this might appear to be a purely commercial proposition, but it as more than that, for it showed that the Canadian eye is at last seeking more artistic surroundings.

Agitations in the labor world usually head up and become ripe on the first day of May of each year, and this year will be no exception. May Day is one great hurrah for the laboring men with socialistic tendencies and a real or imaginary grievance. He waves a red flag, listens to red-hot oratory, and rests his eyes and a burning throat. The next morning he is on the job again with a clear conscience, feeling that he has done his duty by society and relieved his system of a year's pent-up bile. The coal-miners' strike in the West is of course the great topic of conversation in labor circles here, other predicted strikes being merely local.

Mr. Charles Webster, assistant to Mr. Thomas Cunningham, Inspector of Fruit Pests, is in town at the present time. He has been sent here to go fully into the matter of any fruit pests in this district, and to exterminate any of a virile type, or in case this is not possible, then to destroy the tree. He believes that the latter course will not be necessary, though a few of the trees will have to be cut

Tenders will be received by the undersigned up to the 22nd day of April, 1911, at 5 p.m. for the purchase of Block 27, Subdivision of Lot No. 541, Group One, New Westminster District, situated in the city of Vancouver, and being the site of the old Provincial Courthouse. Each tender must be enclosed in a registered letter and must be addressed to the undersigned, and plainly marked "Tender for Old Vancouver Courthouse Site," and must be accompanied by an accepted cheque for ten per cent of the first payment of the purchase money. Payment for the property will be accepted in instalments of one-quarter of the purchase money. The first of such installments to be paid within thirty days of the acceptance of the tender, and the other three annually thereafter, with interest at the rate of six per cent per annum. In the event of the person whose tender is accepted failing to complete the first installment within thirty days of the notice of such acceptance the sale to him will be cancelled and his ten per cent deposit forfeited. The cheques of unsuccessful tenderers will be returned. The highest or any tender will not necessarily be accepted. No commissions of any kind will be allowed.

SMALLPOX THREATENS OTTAWA.

Ottawa, April 11.—The capital is threatened with an outbreak of small-pox which, it is feared, will be as serious as the recent typhoid epidemic. Already there are twenty-seven cases in the isolation hospital, and this number will probably be largely increased in the course of the next two days. Dr. Bell, provincial medical health officer, has severely criticized the civic authorities for their laxity, and has threatened to quarantine the whole city if immediate and stringent steps are not taken to check the outbreak. Commencing to-day, the street railway company will fumigate its cars every twenty-four hours.

VICTORIA, B. C. ELECTIONS.

All Members of the Council Elected Last January Returned to Office.

Victoria, April 11.—A. J. Morley was re-elected mayor of Victoria yesterday by a majority of 706 votes out of a total of 3260 cast. His opponent, A. H. Bannerman, polled 1454 votes. Bannerman only entered the contest at the last minute.

Mr. H. Glennie was in town Tuesday on a combined business and pleasure trip. Harry reports business brisk at Penticton.

Messrs. Shields, Hatfield and Clark handle rigs, wagons, etc. See them before placing your order.

The Ladies' Hospital Auxiliary will meet at three p.m. on Tuesday next in the Council Chamber, S'land

Joint Methodist and Presbyterian Easter services will be held down town in the morning and at West Summerland in the evening next Sunday.

The monthly meeting of the Women's Institute will be held on Friday April 21st, at three o'clock, in the Parlor of the Men's Club. Subject, Tea Relishes and Fancy Breads, different ways of cooking eggs and egg packing.

A pleasing tribute to the high esteem in which Mr. and Mrs. George Ross are held by the people of Summerland generally and the business men in particular, was paid to them at the beginning of the week when they were presented with a beautiful morris chair and a silver tea set, accompanied by a letter of appreciation, signed by most of the business men at the front. The presentation came quite as a surprise to the recipients, and needless to say they were not unmoved by this totally unlooked for token of esteem.

SANITARY (?) SUMMERLAND.

The following letter was unavoidably held over from last week.

West Summerland, B.C.,
April 5, 1911.

The Editor,
Summerland Review,
Summerland, B.C.

Dear Sir:

In olden times when a community was visited, as was often the case, by an outbreak of plague, the people would flock with one accord to their numerous places of worship, and there endeavour by dint of strenuous prayer to appease the wrath of an angry Deity. In these modern times, being more materially minded, when such a visitation occurs they look more closely to their methods of sanitation. It is with this idea in mind that the writer ventures to appeal to the powers that be to investigate the sanitary conditions prevailing at West Summerland. An outraged Nature will sooner or later demand a heavy toll of sickness and maybe death for such wilful and continuous violation of its most elementary law—cleanliness.

Primitive sanitary methods are all very well in a community of one or two souls, and one suffers them because they are more or less inevitable; but where there is a congestion of a hundred or so, and the amount of refuse deposited exceeds the deodorising power of the earth in which it is placed, the usual evils of bad smells, typhoid and diphtheria follow as the night the day.

Here is a truly awful state of affairs. All domestic refuse is thrown away immediately in front or back of the dwelling; the whole place is littered with all kinds of garbage, decaying food, empty and partially empty meat and fruit tins, 'dead marines,' cast-off portions of clothing and other weird articles too numerous to mention. Dogs, cats, chickens, and other snappers up of unconsidered trifles, wander about at their own sweet will. Of the sanitary conditions the less said about them the better; It would be impossible for one who has not seen to imagine anything so indescribably filthy.

The summer is coming, and with it the hot weather. The germs and microbes, numbed into temporary oblivion by the chilling blasts of winter will soon begin to sit up and take notice, awakened to new life and activities by the revivifying influence of a genial sun. Let me appeal most earnestly, while here is yet time, to the residents

of Summerland to awaken to the need of an immediate betterment of these uncleanly conditions and to take such steps as will obtain it. Churches and chapels are without doubt very desirable institutions, but the writer knows of another that is at least just as essential. And being no preacher, he would yet like to call the reader's attention to the old adage, "Cleanliness is next to Godliness," and to again remind them that the laws of health cannot be disregarded and disobeyed with impunity.

SANUS.

: Naramata Notes :

Trees! Trees!! Trees!!! This is the most conspicuous topic this week. Very heavy consignments have arrived this week from various nurseries and the work of transplanting is already in progress.

Mrs. J. M. Robinson returned this week from her extended continental tour having spent several weeks with her family in Toronto.

A large audience assembled in the Opera House on Sunday evening last to hear Mrs. Gillespie's address "The Promised Land." Many of the Summerland friends of this talented though by no means orthodox preacher, came over by special ferry. The music provided for the occasion included a solo by Mr. F. Manchester, and a quartette by Mr. and Mrs. Gillespie, Mrs. Walters and Mr. Miller.

Mr. Hancock's horses upon being let out to pasture the other day didn't do anything but light out on the trail to Penticton, and a few days later were at Fairview. Mr. W. Raincock brought the delinquents back on Tuesday.

Mr. Simpson's new cottage on his fruit lot is nearing completion. The building when completed will reflect much credit upon the contractor, Mr. G. W. Cook.

The At Home held on Saturday afternoon in Elliott's Hall by the Ladies' Help Society of the Baptist Church, proved very encouraging in its financial results. During the afternoon upwards of \$20 was voluntarily contributed to the Instrument Fund of the new church building. A short musical program was given, the outstanding selections being a song by Miss Anna Hayes and a pianoforte solo by Prof. W. H. A. Moore. Dainty refreshments were also provided.

: Peachland Notes :

Mr. M. N. Morrison is spending a few days in Vernon. In his absence Mr. Jack Wright has charge of the Express Office.

Mr. George Barber of Salmon Arm, is in town this week attending to the planting of trees and the cultivation of his lot.

Trees from both Washington and Oregon nurseries arrived last week in apparent good condition, and are now being planted with the ground in first class shape.

Messrs. McKay and McGregor returned from Vancouver last week to be on hand for the opening of the cement pipe work. We understand that the manager, Mr. W. A. Lang, has sufficient orders on hand to keep the plant going until winter.

Leutenant Governor Bulyea came in this week on a tour of inspection of his property here. He is staying at the home of his sister, Mrs. J. B. Robinson.

The Methodist and Baptist Sunday Schools hold a union service next Sunday afternoon to hear the report of the delegates to the Penticton Convention.

Rev. Mr. McKenzie is supplying the Presbyterian pulpit until the arrival of Mr. McGingham, who has received the appointment for the summer.

Rev. C. W. Whyte who has been in Field all the winter returned to his home here last Saturday evening.

Mr. A. J. C. Clarence has been confined to the house for some time as the result of a bad cold.

The Municipal Council has been busy preparing the 1911 assessment roll for the past two weeks. It is now completed and the notices will be sent out immediately. This year's total assessment is about \$12,000 higher than last year for the whole municipality.

Messrs Eyre & Cutbill got in a carload of wagons, carts and buggies last week. All of the famous Studebaker make, already they have disposed of about a dozen of them.

Mr. Jack Wright has been busy for a couple of weeks getting the ditches and flumes in order for the season's watering. So expeditiously was the work carried on that he had the water running in the main ditches last week.

Mr. A. Turner and wife, of Saskatoon, with Mrs. Judge Biggar, of Oakville, Ont., made a brief visit to an old friend and fellow townsman, Dr. C. M. Smith, from Saturday night to Monday morning. Mr. Turner's son John, who is manager of the Northern Crown Bank at Peachland, accompanied them down the lake. The week previous, the doctor entertained Mr. and Mrs. Duncan and son Harold. All these visitors, save Mr. John Turner have been spending the winter in California, and are now en route home. Mr. W. Duncan, the son of one of York's pioneers is now a prosperous resident of Yorkton. Mr. A. Turner, a former commissioner of Saskatoon is at present one of that city's wealthy real estate dealers and holds the position of Stipendiary Magistrate.

NOTICE.

Public Notice is hereby given that, under the authority contained in section 131 of the "Land Act," a regulation has been approved by the Lieutenant-Governor in Council fixing the minimum sale prices of first and second class lands at \$10 and \$5 per acre respectively.

This regulation further provides that the prices fixed therein shall apply to all lands with respect to which the application to purchase is given favorable consideration after this date, notwithstanding the date of such application or any delay that may have occurred in the consideration of the same.

Further notice is hereby given that all persons who have pending applications to purchase lands under the provision of sections 34 or 36 of the "Land Act" and who are not willing to complete such purchases under the prices fixed by the aforesaid regulation shall be at liberty to withdraw such applications and receive refund of the moneys deposited on account of such applications.

GENEROUS GRANT FOR NEW HOSPITAL.

Change in Pinas, Materially Reducing Costs of Erection and Maintenance.

The Hospital Board met in regular monthly session on Monday. Messrs. W. J. Robinson, A. Richardson, J. C. Robson, E. B. May, and J. M. Sutherland being present.

Mr. Dunsdon interviewed the Board in reference to an account of his.

The President reported on his trip to Victoria in the interests of the new hospital. He stated that he had succeeded in getting a grant from the Provincial Government, towards the erection of a suitable building, of \$5,000, of which \$3,500 is available this year and the balance in 1912. He also discussed the plans with the architect and Dr. Young, minister of Education, from whose department, the provincial hospitals are supervised. It was deemed advisable to reduce the size of the building as originally proposed. Alterations were accordingly made in the plans, reducing the beds to fourteen in number, and bringing the toilet rooms into the main wings instead of building special extensions, also omitting one closet and basin from each toilet, and one toilet room altogether. It was found that by making these alterations in the plans that the building could be completed for about \$10,000. President Robinson also stated that the cost of maintenance with such a building would be little more than at present, not more than about \$25. per month greater, whereas the results accomplished would be three times greater.

The committee appointed at the last meeting to arrange for a suitable site for the new building reported that the Summerland Development Company had granted them twenty-four town lots in blocks 32 and 24, and valued at \$3,000, with the proviso that the building erected cost not less than \$10,000.

Owing to the necessity of having the ratepayers' approval before the Board can obtain the grant required from the municipality, it was decided to ask the Council to submit the by-law relative to the matter to the citizens, and that a copy of the petition be given each of the directors with the request that each obtain all possible signatures in his district, so that there shall be no unnecessary delay. Plans and specifications will be ready in

about two weeks, and as soon as the Board gets the approval of the citizens, it is proposed to proceed with the construction.

The exterior of the building, according to plans, will be of metallic lath and stucco, and the interior will be heated by steam.

THE NEW RAILWAY

Kettle Valley railway surveyors have been busy this week working to establish another location line between Pentiction and Summerland.

Some weeks ago a line was run along the benchlands on the Indian Reserve to the west of Pentiction and on up towards Summerland diverting up Trout Creek. It has been found impracticable to build a line with a good gradient in Trout Creek canyon and it is impossible to bridge the valley.

The new location line leaving Pentiction is much closer to the lakeshore than was the one run previously. It passes back of Summerland, and sweeping around the base of the mountain known as Giant's Head, strikes west by south-west toward Trout Creek Valley which it finds west of the big canyon.

The contracts for the material for the new wharf which will be 500 hundred feet long with a deck of forty feet have now all been placed, and the first shipment of timber is expected next week. It is understood that when the timber gets to hand there will be no further delay in getting the construction started.

The survey parties on the east side of the lake are "still experiencing difficulties," according to a recent statement of Mr. J. J. Warren, president of the Kettle Valley. About a dozen location lines have already been run, and the prospects are for considerably more surveying before a permanent location is established. Mr. Warren, however, stated that the problem of defining a line from the east would not affect actual construction in Pentiction, where the right-of-way is pretty well located and where divisional yards as previously reported have already been secured.—Pentiction Herald.

SATURDAY, APRIL 15, 1911.

ANENT BLUE LAWS.

Our esteemed contemporary, the Kelowna Courier, and the Kelowna City Council, are not of one mind when it comes to a matter of Blue Laws. The City Council of our progressive sister city, brought up a by-law to restrict the pool-room to certain hours. The Courier, while not objecting to the by-law, suggested that as it was a matter of interfering with the personal privilege of citizens in the playing of a clean game for recreation and pastime, it should be left to a plebiscite, and this was the view held by 150 citizens who signed a petition to that effect and presented it to the Council. That august body turned down the petition and passed the proposed by-law *holus-bolus*, and in doing so, took occasion to say things about Editor Rose, forgetting that "every Rose has its thorn" and that "kissing goes by favor."

We do not wish to meddle. "The Rose would be as sweet by any other name." But when the Blue Law Bug begins to buzz in the bonnet of a bucolic Kurgh, there is nothing for it except to let it fill itself with the blood of its victim and fall off. To oppose it only makes it exude odors odiferous to the olfactory organs, which even the Rose could not outsmell. It would be well for Editor Rose to remember, also, that there is at present an epidemic of sumptuary legislation in America, of which we are a part. Perhaps we are harking back to the days of 250 year ago, in which case we have to fear the outcome of Kelowna's tobacco crop. When the Blue Laws prevailed in New England, amongst those statutes was one pro-

viding a penalty of fifty pounds of tobacco for neglecting to attend parish church and abiding during service on Sunday. There was also a law for the punishments of pretty maids who were known to encourage the hopes of more than one suitor. This would be rough on the violets of the Okanagan. No planter could dispose of a pound of tobacco until he had laid aside the specified quantity of his assessment toward the support of the minister. Twenty pounds of tobacco was the penalty of taking a voyage on the Sabbath, except it be to church or of extreme necessity. The church was strong on smoke, or in smoke, in those days. Five thousand pounds of tobacco was the forfeit for entertaining a Quaker or any one one "outside the fold," and allowing him to teach or preach in or near the house of his host. Maid servants becoming enciente by their masters were to be sold to the church wardens for two years, for the good of the parish. Presumably the church wardens were like Ceasar's wife. A parent was compelled to see that his son was baptized by a minister of the Church of England, or pay a fine of 2,000 pounds of tobacco. This sounds much like the law on compulsory vaccination. A month's absence from divine service at the parish church brought a fine of five shillings or fifty pounds of tobacco, or ten lashes on the bare back, well laid on.

It is a good thing for Editor Rose and the Okanagan editorial flower garden that he did not live 250 years ago in the New England States. The City Council, or the "wardens of the parish," would have quartered him, or placed a fine upon him that would have smothered the beauty of his name in tobacco smoke for all ages to come. But, living in these days of enlightenment, and pool-room laws, he is let down with a scolding. And the world wags on.

WHY CHILDREN GO ASIRAY.

In a speech recently delivered by the Bishop of London, that eminent gentleman gave some good advice to parents when he said: "I am now convinced that the uplifting of the morality of our people lies above everything else in educating the children rationally and morally. I believe that more evil is done by the squeamishness of parents who are afraid to instruct their children in the vital facts of life, than by all the other agencies of vice put

together. Thousands of men have asked me why they were not taught the dangers of vice in their youth, and I have no reply to make to them. I intend now, with God's help, to remove this reproach from the land. Boys and girls must be told what these great vital facts of life mean, and they must be given the proper knowledge of their bodies and the proper care of them. No abstract-ions. The only way is to be frank, man to man."

Commenting on this suggestion, the editor of the Medical Brief says: Such an education of our youth will mean more in the prevention of disease and misery and in the prolongation of life than all the anti-alcoholic reforming will ever do."

Again, Dr. Charles Eliot, former president of Harvard University, recently said: "The subject of reproduction and sexual hygiene should be more generally presented to young people by parents and teachers. I am convinced that the policy of silence has failed disastrously."

In 1907 the United States Congress passed a law appropriating \$20,000 to pay experts to study clams. A few months later, the same august body turned down a proposed appropriation of \$30,000 to pay an expert to study children. Dr. Hurty, the able secretary of the Indiana State Board of Health, appropriately raised the question: "Which are of most importance to the public, clams or human beings?"

Not long ago in the Ladies Home Journal, which has been doing good work along this line, the editor said he was in constant receipt of letters from school teachers and principals asking if some word cannot be written to awaken parents to even a partial realization of the appalling conditions that exist among the pupils of their schools, especially of those schools which boys and girls attend. These teachers emphasized the universal commonness of love affairs of pupils of which the parents are absolutely ignorant. Commenting upon this condition of affairs, the Journal said:

"It has perhaps, been brought home to no other magazine as it has to this periodical—the pitiful and criminal ignorance which exists today among parents as to the appalling practices that are going on of which their children are a part. The facts cannot be printed: that is impossible. The teachers acknowledge that they dare not speak, for

where they have done so they have either met with rebuff from the parents censure from their superiors, or have lost their positions. The average mother is fully content to believe that all is well with her children. And there the matter stands—with our duty, as we see it at least, fully discharged so far as it lies within our limitations. The solution lies with each individual parent. The teacher, with the editor, stands helpless before unmentionable conditions."

QUALITY COUNTS—AND WE'VE GOT IT.

Are the fruit and vegetable growers letting the canners plant a doubt in their minds, asks the Canadian Collier's? The growers cannot lose by freer trade with the United States, but the canners can. The early market argument, such as it is, has been pushed to the front lately. "We will lose the early market," says the grower, the canner nudging him. The truth is he never had it anyway. Refrigerator cars and a continent that embraces all the climates have turned the seasons topsy-turvy. We eat California celery in December and California strawberries in February and other dainties out of their natural order, until we lose track of when things ripen. Ask the first man on the street what month to expect cherries and watch him hesitate. We eat the premature, insipid stuff because it is the best we can get at the time, but when our own fruit and vegetables, with the firm northern texture and the hardy northern flavor, come in, we "go to it" with a zest and stick at it as long as they last. This market the Canadian grower has always had and nobody can take it from him. Other people like our fruit and vegetables as well as we do, and knowing them high class, want to buy them. Why should the Okanagan apple, the Kootenay plum, the Ashcroft potato, the Niagara peach, the Oakville strawberry, the Montreal melon, the Annapolis Valley apple, shudder at the prospect of two home markets instead of one? And there's the British market besides—Covent Garden, where our apples are done up in tissue paper like oranges and sell for five cents each. Don't forget that.

The City Council of Revelstoke favor the idea of a general municipal clean-up day. Other cities are favoring the same idea. What about Summerland?

MR. BORDEN'S SPLENDID SERVICE

In view of the proposed trip of Mr. Borden, leader of the Conservative party, to the West in a short time, this sane appreciation of the man and his work taken from the Canadian Courier will be read with interest :

"Some men go to the Legislature or Parliament to serve their own interests, and their own or their wives' ambitions; other men go to parliament to serve the country. According as the country has men of the latter class to make her laws and administer her public affairs, so will her fame grow among the nations. Unselfish public service is absolutely essential in the building up of any country, therefore it should be highly valued. It is doubtful if Canadians fully realize the importance of this truth.

"This point comes up in a consideration of the unrest which has been manifest in the Dominion Conservative party for somewhat more than a year. There is an element within the party which is restless under the leadership of Mr. R. L. Borden. They have much the same feeling as the Dominion Liberals had under the leadership of the Hon. Edward Blake. Indeed, the two situations are almost parallel. Mr. Blake and Mr. Borden are very similar in their training, in their character and in their temperament. Mr. Blake led an Opposition which was forced by stern necessity and hard fate to wage an almost hopeless fight with the greatest leader of that day. The situation of the eighties has been duplicated in the first decade of the new century and Mr. Borden has been fated to wage a similar battle against the greatest political leader of to-day. It is therefore natural that there should be discontent in the Conservative party in 1911, as there was discontent in the Liberal party in 1884 or thereabouts.

"Mr. Borden, in his present peculiar position, has the sympathy and consideration of all the thinking citizens throughout the country whether they be Conservative or whether they be Liberal. All are agreed that he has performed a difficult task coolly, carefully and honorably. He never desired the leadership of his party. So far as his ambition is known, it lay rather in the direction of his legal work. Had he remained in law he would to-day have been one of the first half-dozen jurists of the country. Because he was wealthy enough to afford the loss of a fine private

practice and because his party believed him to be the best man available for the leadership, he was called, and he accepted. Since that time he has devoted himself wholeheartedly and disinterestedly to the work of leading His Majesty's Opposition. That he has not been more successful in his attacks upon the Government within the House and in the constituencies can only be explained by the parallel quoted in the preceding paragraph. One may only say that if a Pope, a Graham, a Forget a McBride, or even a Whitney had been in the same position, none would have done better than Mr. Borden."

The Lake Shore Telephone Company are experimenting with the "lock-out" system. This system practically means that all the telephones on party lines act as individual 'phones. Whilst a subscriber on a party line is using his instrument, no one else can use the line, nor yet is it possible for anyone on the line to overhear any conversation, or to "butt in." At present it is only in use on the purple and violet lines, but if it proves out as well as it promises to do, the Company will extend it to all party lines where it is required. This will naturally mean that all who have this system will be like individual telephones, and as such will pay the individual 'phone rental—\$2.00 per month.

Rev. F. W. Pattison will conduct special Easter services next Sunday, in the Baptist Church, West Summerland, at 10:30 a.m., and in Elliott's Hall at 7 p.m. All are cordially invited.

Mr. R. H. English has made arrangements whereby he can furnish a motor car. Those wishing a fast ride may have same on the shortest possible notice, and at reasonable rates. 'Phone A or B 41.

MRS. GEORGE GOULD

The Home-Life at Georgian Court.

One of the most magnificent country houses in the United States is Georgian Court, at the head of the beautiful lake Carasajlo, among the tall, straight kingly pines of Lakewood, N.J., and the wife and mother who makes this palace a home is Mrs. George J. Gould, the daughter of Mr. and Mrs. C. D. Kingdon, formerly of Toronto.

The beautiful Edith Kingdon, after completing her education in England, adopted the stage as a career, and her talent, grace, charm and presence were winning recognition when in 1886 she was married to George Gould, the millionaire railway owner, and son of Jay Gould, at one time America's leading financier. Mrs. Gould soon became one of the most popular of the younger society women of the country and a leader in the world of fashion. Beautiful is the house in which she lives, but far more beautiful is the atmosphere of love, sweetness and companionship that fills the home with sunshine and happiness. It is said that wealth often makes fair favorites of fortune forgetful of the privileges and joys of motherhood, sacrificing on the altar of fashion, time and attention that should be paid to loving watchfulness of the welfare of the children; but Mrs. Gould is a model mother to her six children, a devoted companion, confidant and friend.

The Goulds are practically the only members of the ultra-fashionable set who reside in the country the year round. Georgian Court, built of light gray brick and terra cotta in the style of the French Renaissance, lies in beautiful grounds rendered exclusive by a high fence of wrought iron with bases and interspersed posts of gray stone to match the house. The stables, harmonizing in architecture with the mansion itself, are stocked with horses of every description for the family and guests.

Over the stables is the theatre, a dainty, bijou play-house, complete in every detail, furnished in dark red and gold and seating about one hundred and twenty-five. The Casino, devoted primarily to sport, has a special race-track, a great plunge swimming tank, courts for all games, and about forty bed-rooms and half as many bath-rooms, to be used when a large house-party overtakes the hospitality of the mansion. The Sunken Garden, which is sixty feet in width and 120 in length, is floored and walled with flawless marble, and fine sculpture peeping from a dark background of evergreen shrubs and bushes, is reflected in the clear waters of a lagoon. Near by, too, is the wonderful electric fountain, sixty feet in diameter, of white marble; the centre piece consisting of a colossal Nautilus shell of bronze, forming a chariot on which stands the heroic statue of a man driving a pair of purest marble sea-horses.

Entered according to Act of the Parliament of Canada, in the year 1905, by W. O. Mack, at the Department of Agriculture

FOR SALE.— Mare, splendid worker for orchards or team. About 1,100 pounds. Apply Review Office.

Before planting trees the soil ought to be broken deeply to give the roots a good chance. For this a sub-soil plow is required. White and Company have a first-class tool for this work. Call and see one.

EXPERIMENTAL ORCHARD FOR REVELSTOKE.

Last Thursday evening, at a meeting of the Revelstoke Board of Trade, The following letter of advice was read from the Hon. Thos. Taylor :—

Dear Sir,—I am recently advised by the Agricultural Department that it is the intention of that Department during the coming season to have steps taken to establishment of an experimental orchard in the neighbourhood of Revelstoke in order to show what varieties of fruit can be successfully grown.

Yours faithfully,
Thos. Taylor.

ANNUAL REPORT, MEDICAL OFFICER OF HEALTH, 1910.

To the Chairman of the Board of Health,

Summerland Municipality.

Sir: I beg to submit the following summary of local conditions during the past year throughout the municipality. Owing to the fact that the mortality statistics still continue to be forwarded to Kamloops instead of to the local Health Officer, or the Secretary of the Board, I am unable to give the Board a detailed statement.

SCHOOLS.—On account of the large increase in the school population, and widely separated locations of the five schools, the inspection of these involves a greatly increased expenditure of time since there is more mileage to be covered than during the first years of the Municipal organization. A notable number of cases of enlarged tonsils and nasal obstruction exists among the pupils. Less than one half of the total number in attendance have been vaccinated.

Shortly before the Summer holidays an epidemic of scarletina broke out but prompt measures of quarantine having been taken the disease was confined to a few households. More recently an epidemic of enteric fever occurred among the pupils and staff of Okanagan College. Other scattered cases were reported, sixteen in all, with two deaths, a mortality of 12 per cent. slightly greater than the average in hospital and private practice during later years. The origin of the outbreak has not been definitely traced but the majority of the cases appear to have been imported over the C. P. R. rail and lake routes. A very meagre report from the Provincial Secretary, Dr. J. C. Fagan, however, condemns the domestic water supply of the College. My own investigation would show the possibility of infection having taken place through the effluent of the cess-pool (called a septic tank) on the College grounds. Measures to remedy this have been suggested and ordered.

Certain interests and influences have brought about the invasion of this community by a number of tuberculosis patients, some of a progressive and advanced type. Thirteen cases have been reported to me with four deaths a mortality of 30 per cent. contrasting unfavorably with the results of institutional treatment where the mortality has been reduced to seven per

cent. Of course, it must be borne in mind that the sanitarium reject advanced cases, unless the patients are able to pay liberally for board and special attendance.

The serious increase of local mortality brought about by the condition above described has become the subject of much unfavorable comment. The original settlers of Summerland have been claimed by that Prince of Promoters, our first Reeve, to be "hand picked." This term, I infer, refers more particularly to the financial status of the incomers. The time appears to have arrived when it has become necessary to do some "hand picking" as regards the physical condition of prospective residents. It may be of general interest in this connection to quote from the last Report of the Anti-Tuberculosis Society. In seven cases only, out sixty-one was it deemed advisable to use tuberculine, and in all but one patient shewing a temperature over 99.5 in which the result was unfavorable.

SEPTIC TANKS ON SHORE.—Regarding these structures I beg to offer you my special report thereon. All of which is respectfully submitted.

RICH RED BLOOD.

You Will Never Have It as Long
as You Have Dyspepsia.

Just as long as you have dyspepsia your food will not properly digest, and the nutritious elements in the food will not be extracted or absorbed, and impoverished or watery blood will follow.

This condition may not be apparent at first, but it will come just as sure as the sun will rise again.

Any stomach ailment, including all forms of indigestion, can be promptly cured by using Mi-o-na tablets, a scientific treatment unsurpassed.

It stops fermentation, belching of gas and taste of sour food almost at once.

The mighty power of Mi-o-na to invigorate and restore the stomach to perfect condition is known everywhere.

Mi-o-na cures by building up—by banishing the cause. For thin people it is a great flesh builder, because it causes the stomach to give more and purer nutrition to the blood. It cures sea and car sickness and vomiting of pregnancy almost immediately. The Summerland Drug Co. sells Mi-o-na for 50 cents a large box, and guarantees it to cure or money back.

HYOMEI

Vol. 3, No. 37

SUMMERLAND, B.C., APRIL 22, 1911

Whole No. 141

First Annual Meeting of Okanagan Fruit Union

OPTIMISTIC IN FACE OF DEFICIT.

The annual meeting of the Okanagan Fruit Union was held at Vernon recently. Statements of the working of the business for the past season and suggestions for the future were put before the meeting by Mr. Kidstone, one of the managing directors; Mr. R. H. Agur, vic-president, and Mr. Garraway, secretary, as follows:

During the year 1910 the Union shipped a total of 176 carloads, made up as follows: 31 straight cars of vegetables, 65 cars of apples, 6 cars of crabs, 5 cars of prunes, 10 cars of peaches; 59 mixed cars of apples, peaches, plums and prunes. The total number of packages handled was as follows: berries 1290; cherries, 2714; apricots, 344; grapes 26; plums and prunes, 19,271; peaches, 35,007; apples, 51,236; crabs, 7,839; pears, 1,218; tomatoes, 2,382; cantaloup, 489; corn, pumpkin, citron, etc., 276; onions, 823 sacks; potatoes, 10,957 sacks; total, 133,872 packages

Eight packing houses were operated by the union during the season, the amount of business handled being as follows:

Coldstream Ranch Packing House, Long Lake	
Packing House and Vernon	\$ 86,514.00
Summerland, West Summerland, Peachland, Penticton, Short's Point	34,107.00
Total sales for year	\$120,621.00

The operating expenses for the year were \$21,577.76, depreciation of fixtures and equipment \$267.69, making a total of \$21,845.45. The earnings, commissions on sales and profits on sales of material amount to \$14,552.00, leaving a deficit of \$7,293.45 on the year's trading.

The sales on the whole were very satisfactory; the advertising of Okanagan fruit, the goodwill of the trade, and the excellent facilities obtained during the past year for packing and shipping are all of inestimable value to the fruit growers. The policy of the Union in putting up a standard pack has re-

sulted in better grading and packing of Okanagan fruit. It may be pointed out that the exhibit cars of the Vernon Board of Trade and of the Summerland Agricultural Society at the National Apple Show, Vancouver, were packed by the Fruit Union and the success attained by these exhibits testifies to the good grading and packing, and the careful way in which the work was done. Reports from jobbers and consumers all tend to prove that the trade mark of the Union, "O. K." stands for the best in quality, grade and pack. But, while the result of the year's trading, so far as getting and keeping the markets and consequent returns to the grower are concerned, has been successful, financially the Union has not done well. The charges made to the growers have not, but the actual cost of packing and operating to the union has, been too high, with the result that the Union has made a loss of \$7,93.45.

The Union has the very best facilities for packing and handling. At Vernon and Summerland buildings have been erected with frost proof cellars for the storage of a large amount of fruit for winter consumption. Both these houses have trackage. At West Summerland a large packing house has been erected which will prove a great advantage to growers in that district. In addition there are the two large packing houses at the Coldstream Ranch and Long Lake, each with a frost proof cellar for storage.

It has been proven many times in other fruit growing districts, especially California, that the smallest turnover on which a co-operative fruit union can be run at a minimum charge is 500 cars per season, and with the large acreage coming into bearing in the Valley and the increased yield of the younger orchards the time is not very far distant when the Union will be handling this quantity per season.

It must be borne in mind that the Okanagan Fruit Union is an association of growers. The shareholders at the first general meeting

of the company by resolution restricted the dividend to six per cent; and as the business will be run at such charges as will merely cover the cost of operating, the Union is practically a co-operative association and should have the support of all growers. The share capital at present subscribed will have to be materially increased to successfully finance the business and an active campaign for more subscriptions will be carried on. The Union purchased for the growers last year, paper, material, etc., to the extent of over \$25,000, which illustrates the need of a reserve fund to carry on the business before the shipping season begins. By obtaining box material in large quantities and having same shipped in carload lots, the Fruit Union is, with its facilities for packing and handling, in a position to pack fruit for the growers at a considerable less cost than could be done by the individual grower. Grading and packing are also more uniform.

Some growers have stated to the Union that charges absorb too large a percentage of the gross returns; but such growers apparently fail to realize that the greater proportion of such charges is for material bought or work done, both of which if undertaken by the grower himself would form a part of the cost of operating the orchard and would certainly actually cost each grower more than the amount charged by the Union—the difference being in fact the difference between wholesale and retail rates.

The returns to the growers on the sales of fruit were very satisfactory on the whole. The returns on peaches may appear to some to be very low but in view of the condition of the markets when the main crop of Okanagan peaches were moving, the returns were highly satisfactory. The markets were glutted with American peaches, which were on the market two weeks earlier than our main crop. Fancy Elbertas running no smaller than size 80 were being freely quoted at prairie jobbers at 27 cents per box f.o.b. ship-

ping point. In Seattle these were sold for 25 cents per box. Even at this low quotation there was not a demand and consequently the market was full of these peaches shipped on consignment which in many cases would hardly realize shipping charges to the growers. From reliable sources we are informed that as many as 400 cars of Washington peaches were left on the trees, the prices offered being too small to justify picking and handling.

In spite of these conditions, however, the Union was able to realize grower prices ranging from 47½ cents to 70 cents per box f.o.b. Vernon for 34,000 boxes of peaches, and only in the case of one car containing 1,000 boxes were they forced to reduce the price to 42½ cents. There is no doubt whatever that the policy adopted by the union has materially helped in the disposal of last season's fruit crop, and that such help will be more and more marked as the volume of fruit increases—the policy of the Union being to establish the reputation of Okanagan fruit on a firm basis, and to work out the details of distribution so thoroughly, that increase of volume will facilitate, instead of congesting operations. The benefit of such a system in insuring the disposal of output cannot fail to show its mark on the capital value of orchards and orchard land.

As they do not buy fruit, they have no inducement to follow the ordinary procedure of buying in the cheapest market, but have only to attend to the latter half—selling in the dearest market—and return the proceeds, less certain fixed charges, to the grower.

The success of the system depends absolutely on the management, as has been proved in many other districts, and the directors are thoroughly satisfied that, under the new management, the business will go straight ahead.

The Directors reported that Mr. E. E. Samson had tendered his resignation as manager, which had been accepted, and that Mr. H. L. Garraway had been appointed to succeed

o this position.
The following office-bearers were elected for the ensuing year: President, Mr. W. Crawley Ricardo; vice-president, Mr. R. H. Agur; managing directors, Messrs. W. Crawley Ricardo and Mr. J. Kidston; directors, Messrs. R. M. Palmere, James Ritchie, R. S. Dormer, E. Henderson, W. S. Foggo, J. D. Godwin; auditors, Messrs. Riddell, Stead & Hodges, chartered accountants.

MARTIN BURRELL'S ORCHARDS SOLD.

The largest deal in fruit lands yet recorded in the Kettle Valley was completed at Grand Forks last week when the final papers were signed transferring to the Grand Forks Fruit and Nursery Company the 225 acre tract of Martin Burrell, M.P., and the 160 acre tract of J. D. Honsberger. Twenty acres are planted on the Burrell ranch, 120 in the Honsberger ranch and 65 acres in the company's own ranch. It is the intention of the company to increase this acreage planted in fruit to 330 within the next year. The old company had a capitalization of \$25,000, while the new capitalization is \$200,000.

Empire Day

AT SUMMERLAND.

PROGRAMME

HORSE RACES.

One Mile, open, \$100, first \$70 second \$30.

Half Mile, two in three, for horses which have been owned for three months immediately preceding date of entry by Summerland ratepayers, or by men who have been in the employ of Summerland ratepayers for a like period. The annual banquet of the Methodist congregations was held in the church parlor last week. The Ladies Aid was in charge and prepared one of those sumptuous repasts which have made Summerland cooks so famous. Shortly before seven o'clock the entire congregation assembled around one long bountifully laden and handsomely decorated table. The pastor presided and after supper the following toasts were honored: The King, Dr. C. M. Smith, Our Province, G. A. McWilliams. Our Church, Mrs. D. H. Watson. Mothers and Wives, J. L. Logie. Sweethearts, J. C. Robson. The Choir, Granville Morgan. After the speeches an item of church business was disposed of and the assembly dispersed agreeing that this Congregational Tea had been one of the best yet and hoping to meet again next year.

Local News Items

The regular monthly meeting of the Ratepayers' Association will be held on Friday evening, the 29th inst. in the Central Schoolhouse, West Summerland, at eight o'clock.

Mrs. George Gray left on Tuesday morning on a visit to the coast. She expects to be away about two weeks.

The new bell for the Presbyterian Church has arrived. It is about thirty inches high, and thirty-eight inches wide at the mouth, and weighs about 1,000 pounds. It will be hung in the steeple of the church and the dreams of the lie-abed Sunday morning individuals will be rudely disturbed ere long.

In another column the program of races, etc., for the Empire Day Celebration is printed. It will be seen that a good substantial day's sport is provided.

Building operations are quite brisk throughout the whole of the municipality, and great changes are being made. Everything points to a very successful year for Summerland.

Last year the shore was cleaned up, but this year it seems to have been forgotten, but maybe it will get another rake out by and by.

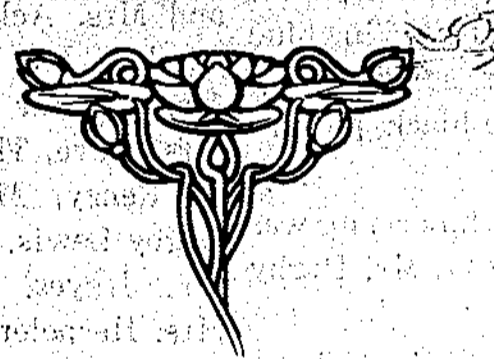

Summerland is to have two evenings of high-class drama next week. Mr. John Griffiths, the eminent tragedian, supported by a strong company will present "Faust" in the new Opera House, on Thursday evening next, April 27. The following evening Shakespeare's immortal "Othello, the Moor of Venice," will be presented. These will be performances above the average, and seats should be booked early at the Drug Store.

A Backward Look Upward is the next subject in the series of sermons which are being preached to Young Men at the West Summerland Baptist Church on Sunday mornings.

A Big Asset

The Solid Earth

Of course, you must procure the right kind of Soil, the kind that will grow anything. This is the kind we offer in Summerland; the fruit-growing centre of the world-famed Okanagan district.

SUMMERLAND. B.C.

FASHIONABLE WEDDING.

Zimmerman-Cartwright.

The marriage of Miss Vida Lois Cartwright, youngest daughter of Lieutenant Colonel and Mrs. Cartwright, of Summerland, to Mr. Otto Fisher Zimmerman, third son of Adam Zimmerman, Esq., of Hamilton, Ontario, took place in St. Stephen's Church, Summerland, on Wednesday last, the 19th. inst., at 2.30 p.m.

The church was beautifully decorated with greenery and large white satin bows. Whilst the guests assembled, Mr. H. Powell Jones rendered suitable music on the organ.

The bride, who looked exceedingly charming in a gown of ivory satin draped with old Limerick lace, and a long tulle veil crowned with orange blossoms and lily of the valley, was escorted up the aisle by her father. She carried a shower bouquet of beautiful white roses.

The bridesmaids, Miss Young, (Ottawa), and the bride's sister, Miss Marion Cartwright, were daintily gowned in pink satin, veiled with pink ninon. They wore large black picture hats trimmed with roses and pink satin ribbon, and each carried a lovely shower bouquet composed of pale pink carnations and maidenhair fern.

Mrs. Cartwright, mother of the bride, looked very handsome in grey satin, with an overdress of Paisley silk, and a hat to match.

Miss Cartwright, (Ottawa), aunt of the bride, was attired in blue satin, with a tunic of sequin trimmed net, and a large black picture hat.

The groom, Mr. Zimmerman, was supported by his friend, Mr. Digby Lewis.

Rev. H. A. Solly performed the ceremony, and the service was short, but very impressive and well rendered. The old favorite wedding hymn, "The voice that breathed o'er Eden" was sung by the company assembled, after which, to the strains of the wedding march, and amidst showers of rice, the young couple left the church.

A reception was held at Rockwood, the residence of the bride's parents, and the guests were received by Colonel and Mrs. Cartwright, and the young couple, Mr. and Mrs. O. F. Zimmerman.

The bride and groom were the recipients of many hearty congratulations and good wishes, and also of many beautiful and substantial presents, which were on view in the drawing room.

After the reception, the guests repaired to the dining room, which was tastefully decorated with yellow flowers and ribbons in harmony, and the centre of the table was taken up by a huge bridescake, which the bride proceeded to cut with her father's sword. After refreshments had been partaken of, the Rev. H. A. Solly proposed in a few well chosen words, the health of "the bride," which was received with acclamation, and suitably responded to by the groom on behalf of his wife. Other toasts followed, and about 4.30, the happy couple departed by automobile for Penticton, where they were entertained to a bridal dinner by friends. The bride's travelling costume was of Copenhagen blue, with facings of black satin, and a large black hat trimmed with cornflowers.

Mr. and Mrs. Zimmerman will spend their honeymoon at the coast cities, after which they will take up their residence at their home in Summerland.

The following is the list of invited guests:

Mr. and Mrs. Agur, Messrs. Allen and Eric Agur, Mr. and Mrs. Helmer, Miss Cossett, Mr. and Mrs. Osler, Mr. and Mrs. Fetherstonhaugh, Mr. and Mrs. Higgin, The Misses Higgin, The Misses Dodwell, Mr. Philip Dodwell, Mr. and Mrs. Thompson, Miss Madge Thompson, Mr. Stephen Thompson, Major and Mrs. Hutton, Mr. and Mrs. Acland, Mr. and Mrs. J. Ritchie, Mr. and Mrs. Clouston, Mr. Arthur Clouston, Mr. and Mrs. Neve, The Misses Neve, Mr. de Renzy, Mr. Cruikshank, Mr. Digby Lewis, Mr. Collas, Mr. and Mrs. Hayes, Miss Hayes, Mr. and Mrs. Hespeler, Mr. and Mrs. May, Mr. and Mrs. Arnott, Miss Hilda Arnott, Mr. and Mrs. Cooper, Miss Dorothea Cooper, Mr. and Mrs. Simpson, Mr. and Mrs. Hector Sutherland, Miss Mary Sutherland, Mr. Villiers, Mr. and Mrs. James Sutherland, Miss Sheila Sutherland, Mr. and Mrs. Pineo, Mrs. Young, Mr. and Mrs. Kerr, Miss Kerr, Mr. Charles Kerr, Miss Milligan, Mr. Milligan, Mr. and Mrs. John Steuart, Rev. and Mrs. Solly, Master Nicholas Solly, Rev. and Mrs. Hood, Mrs. Ross, Mrs. Mason, Mr. and Mrs. Cecil Brown, (Penticton), Mr. and Mrs. Benson, Mr. and Mrs. Theed, Mr. and Mrs. J. Mitchell, Mr. A. Steven, Mr. Archie Steven, (Penticton), Miss Young, (Ottawa), Miss Cartwright, (Ottawa).

COLLEGE MUSICAL EVENING.

Any doubts as to the efficiency of the music department of the Col-
 lege were certainly dispelled on Thursday evening last. Summer-
 land's high musical reputation was more than upheld, and that the Col-
 lege can provide the talent for such a program reflects the more credit upon Prof. W. H. A. Moore, who has charge of this branch of work.
 Although the spacious gymnasium at the foot of the hill was by no means crowded, some two hundred people were in attendance. True to that unwritten law governing all Summerland performances the first item was not commenced till half an hour past the appointed time, and even after that people continued to arrive to the annoyance of listeners and performers alike. We forgot this, however, as the program proceeded.

Prof. Moore, at the piano, displayed that finished technique that speaks the musician. His selections were rendered in such a way as to make the choice of one above the rest a difficult matter. Perhaps Chopin's Nocturne in A flat, being comparatively well known, appealed most to the audience.
 The Glee Club, composed of six-

teen girls' voices was a surprise. The balance of the parts produced an ensemble creditable to a chorus of longer standing than their's. They were deservedly encored in their last selection.

The College Quartette sang well, and though recalled for their second number, were perhaps heard to more advantage in Arcadelt's quaint early sixteenth century part song.

The duet by Miss Haines and Mr. Moore proved very popular, and the audience clamorously demanded more.

The musical march by the Young Ladies Gymnasium Class was very pleasingly and effectively executed, and it is evident, too, that the young ladies can give the boys a hint or two when it comes to graceful club swinging.

Altogether, it was an evening well spent, and congratulations are due to the Music Department of the College. It is intended to give another concert in connection with the Closing Exercises, and a provisional date has been set for the 20th of May.

L. E. Van Hise, who has had charge of the Hotel automobile for some considerable time, left their service on Tuesday of this week.

FRUIT UNION REPORT.

There is no cause for alarm in the reported deficit of seven thousand dollars in the past season's business of the Okanagan Fruit Union. No business is more difficult to place upon a paying footing than that of marketing on a co-operative basis. So many unforeseen difficulties arise which have to be met and so many demands are made upon the management, by growers and jobbers alike, that it is almost impossible to foresee the complications or foretell the cost. Experience alone can tell wherein methods are to be improved upon.

There is this about it: the Union has set a standard of excellence for Okanagan fruit which must and shall be maintained, and as the orchards increase the output the business will be placed on a better financial basis.

Now is the time in the life of the Union when the loyal support of every grower should be given. No other method has been found in any fruit section so successful in the marketing of the fruit as through these Union organizations, and the life of the fruit industry depends upon the successful working out of the system the Union offices are now engaged in solving.

RAISE THE LIMIT.

It is never safe to venture beyond our depth if you cannot swim. But, on the other hand, if you can swim at all, you will learn to swim much better if you venture out into the deep. Don't hang timidly to the shallows!

This is true of all life: we are too prone to be content with little rather than put forth an effort to

do greater things. In all branches of business and in every vocation of life, we see men content to do a dollar business when they could have a five dollar business by reaching for it. Where one man in a community fails through over-reaching himself, one hundred fail because they do not step far enough.

In the Okanagan we see examples of this from various viewpoints. We see scores of men here on excellent farming and fruit lands—been there for years—who are as poor today as when they took up the land. Lacking faith in themselves they will not reach out.

There are hundreds of men in the Northwest who have had their attention directed to this favored section of B. C., and who expect some day to locate here. But they are timid, and are no better off today than when the "notion" first struck them.

If these friends would just look ahead a few years! If they would just move! A fortune is within their grasp. There are thousands of acres in the Okanagan—and particularly in the peach belt—that never have been touched by the plow—land as good as any now in orchard or under cultivation—and all that is needed is for them to step out—take hold—do the thing!

No man living in this great Valley of ours need experience any qualms of conscience for inducing his friends to locate here. It is all one vast garden and will one day support thousands where to-day it supports hundreds. The opportunities for money making are great, and for the comforts of life, no spot in America offers more—if as much—than is offered here for anything like the same expenditure of labor and money.

BETWEEN ME AND HANK.

Little Dot and Pansy Wee were sipping honey. "Does your pa keep a bee?" asked Pansy Wee of Little Dot.

As we grow older we know that one bee cannot make honey. They have to work in swarms. And bees, we are told, work more like well organized humans than any other creature or insect. So let them bring it down to this: To accomplish anything of real, lasting benefit in community life men must work together—in groups. Each has a work to do and the success of all depends upon each individual success. A community of individual

successes means a successful community. Tom cannot shirk with out all feeling it; Dick cannot leave his work undone without injury to others, and Harry's failure means a break in the community chain. We must do the business placed into our hands as if the world's salvation depends upon it. Not because our own interests are advanced thereby, but because others have entrusted to us a certain thing, and we cannot, for the community's sake, be less faithful in any business entrusted to us by others than in our own. No obstacle on earth can block the progress of a squad of men each of whom is faithful to all.

MUNICIPAL COUNCIL MEET.

On the 10th inst. there was a special meeting of the Council, in the Municipal Buildings West Summerland.

Communications were received and read from Mr. R. H. English, The Attorney General, Mr. F. H. Latimer, Mr. Jas. Ritchie and from the Water and Light Department.

The Finance Committee recommended payment of the following accounts:—

A. H. Steven	\$19.25
A. Richardson & Co.	13.54
G. Brimble	17.00
W. A. Doherty	4.65
S. Lowry	3.75
H. Coles	7.00
R. Mitchell	21.00
Total	\$86.19

The following Water and Light accounts were also passed for payment:—

Pay Roll	\$481.10
Canadian Westinghouse Co.	305.78
W. J. Docking	7.50
A. H. Steven	6.25
Angove & Stinson	.70
Canadian Pipe Co.	24.75
Mather Yuill & Co.	75.70
C. P. R.	7.22
Dominion Express Co.	2.15
C. N. Borton	46.27
Scott Darkis	1.05
White & Co.	34.35
B. H. Sherk	36.05
Drug Company	2.00
M. Arkell	6.00
Clark, Steuart & Co	2.79
Telephone Co.	2.25
Government Telephones	2.00
London Machinery Co.	6.40
F. H. Latimer	150.00
J. G. Robertson	4.00
J. S. Ritchie	1.80
T. P. Thornber	69.26
Supply Company	105.70

W. Ritchie	1.37
Shields, Hatfield & Clark	111.10
Wilson & Bloomfield	50.00
Total	\$5259.12

By-law No. 32 granting rebate for prompt payment of water rates was read.

The Council then adjourned until May 1st, at nine a.m. when a special meeting for the reading of By-laws will be held.

NEWS FROM THE EAST.

(From our own correspondent.)

Montreal, 20. Plans are now under way and are likely to be soon carried to completion which will provide virtually for the re-making of Montreal as a port. Commissions composed of engineers and harbour officials have been studying for a long time the problem of providing for the more efficient and economical handling of the tremendous commerce which centres in this city and which has made it one of the finest ports in the world. This investigation has resulted this week in the submission of two reports. While these differ in details they are alike in essential particulars and both provide for the practical rebuilding of the entire water front. The plan generally favored provides for the replacement of the antiquated surface tracks over which freight is now hauled along the river front by an elevated road to be devoted exclusively to the handling of freight and to have spurs connecting with all the piers. Back of the road is to rise a solid row of giant warehouses connected with the railway at the second storey level. By this means communication between any part of the waterfront and every other part will be direct and convenient and it is estimated that the cost of handling freight will be reduced forty per cent. The great system of giant terminals will make a striking change in the appearance of the city and it is expected that the cost of the improvements contemplated will be ten million dollars or more, most of which, however, will be expended by private capital in the construction of the terminal warehouses.

Whether the much-talked of hem skirt is to become the leading feature in the city's summer feminine costumes remains to be seen. Meantime it is likely to become a political issue, the subject of police rules, traffic regulations and a cause of excitement in many other

ways. Already several minor officials have been called upon to declare their attitude regarding this form of dress. Its appearance on the street is sufficient to collect a crowd of proportions great enough to block all traffic and the problem has arisen as to how the matter shall be handled. One member of the police force when called to explain why he had not arrested the wearer of a harem skirt who had attracted such a crowd as to block temporarily the passage of fire engines answered that he did not know it was a misdemeanor to appear in such a costume and that he would rather lose his job than be seen making such an arrest anyhow. Father Knickerbocker may or may not be forced to make various harem skirt regulations but they will have little effect either way. Whether or not they are to be generally worn is a matter which will be decided not by law but by feminine decision.

Word that the Mexican Government has at last decided to resort to active measures for the suppression of the rebel forces is received with rejoicing here, for Canada is more than incidentally interested in the welfare of the little republic. Large amounts of Canadian money have been invested in Mexico of late years and have always brought large returns. Some people lately have been worried about having their money invested in a country where there is internal strife but their fears, for the most part, seem to be groundless, for nothing short of a national calamity could affect their assets. The Mexican Rubber and Mahogany Corporation, Limited, one of the largest organizations of its kind on this continent, which is almost entirely owned by Canadians and who own and are operating extensive areas of some four hundred and forty square miles of mahogany, rubber and chicle limits in the southern parts of Mexico have been closely in touch with the situation during all the recent disturbances, and at no time have they felt any anxiety situated as they are some hundreds of miles from the seat of the trouble and even in the result of the revolutionists gaining access to their property no harm could result. The mahogany, standing green as it does, will not burn, a danger that is always foremost in Canadian timber ventures, and the business of the Company has gone on oblivious of any disturbances.

CORRESPONDENCE.

Victoria, B.C., April 12, 1911.
The Editor,
Summerland Review,
Summerland, B.C.

Dear Sir:
I beg to draw to your attention the existence of the Horse Breeders' Lien Act, Chapter 21, 1907, and Chapter 24, 1911, which requires that:—

- "3. (1) Every person, firm or company standing or travelling any stallion for profit or gain in the province of British Columbia shall cause the name, description and pedigree of such stallion to be enrolled in the Department, and shall procure a certificate of such enrollment as hereinafter provided.
- (2) The fee for such enrollment and certificate shall be five dollars.
- (3) Upon the transfer of the ownership of any stallion enrolled under this section, the certificate of enrollment may be transferred to the transferee by the minister, upon proof to his satisfaction of such transfer and upon payment of the fee of two dollars.
- (4) The owner of any stallion standing or travelling for profit or gain shall post up and keep affixed during the whole of the season copies of the certificate of such stallion, issued under the next preceding section, in a conspicuous place both within and upon the outside of the main door leading into every stable or building where the said stallion stands regularly for public service.

I trust that this matter may be made public in order that all stallions standing for service, in the province of British Columbia, may become registered in this Department.

Applications for registration should be made to the Live Stock Commissioner, Department of Agriculture, Victoria, and should be accompanied by a postal order for \$5.00 to cover registration fees.

Yours very truly,
M. A. JULL,
Live Stock Commissioner.

RESERVE.

NOTICE is hereby given that all vacant Crown lands not already under reserve, situated within the boundaries of the Land Recording Districts of Cariboo and Lillooet and the Kamloops Division of Yale Land Recording District are reserved from any alienation under the "Land Act" except by pre-emption.

: Naramata Notes :

Mrs. James Hayward spent the Easter holidays visiting friends at Peachland.

Mr. T. R. Wellband, who is in the Real Estate business in Vancouver, came in on Saturday night and spent the Eastertide with his wife and family. Mr. Wellband reports that business is still brisk at the coast and in common with many others, predicts a great future for this important city.

Mr. W. S. Miller, late of the Naramata Supply Company, left on Thursday morning last for California, going around by way of Chicago and Cincinnati, Ohio, in which latter city his parents live. During his stay in Naramata Mr. Miller made many staunch friends, who sincerely regret his removal from our town.

The Summerland Trust Company are in receipt of a heavy consignment of furniture from the Canada Furniture Company, of Woodstock, Ontario. The greater part of the shipment is for the new hotel, and the balance will form the nucleus of a stock for the new furniture store soon to be opened on Robinson Avenue.

Mr. and Mrs. J. M. Robinson, Mr. G. Wolstencroft and Mr. W. J. Robinson, journeyed to Peachland by special ferry on Thursday of this week, to attend a meeting of the Peachland Townsite Company.

Miss Gladys Wolverton, of Vera, Wash., who has been visiting at Kaleden since Christmas, spent a couple of days in Naramata at the beginning of the week, the guest of Mr. and Mrs. Lyons.

Mr. Lier, of the Penticton Lumber Company, has purchased the barge from the Okanagan Lake Boat Company, and with the aid of the government pile driver, is constructing a government wharf on the Lower Okanagan Lake, and a private wharf near Aitken's point, to which place these lumber magnates purpose hauling the whole of this winter's immense cut.

Mr. Wolstencroft is having his cottage painted by our local brush artist, Mr. Lyons.

Mrs. C. W. Johnson who is still at the Kelowna Hospital is reported to be improving.

Mr. and Mrs. Morsch have removed to their commodious apartments above their new store which latter will shortly be open for business.

BRITISH COLUMBIA'S WISE LAND POLICY.

That the Government of British Columbia is administering the assets entrusted to it by the people at large, and not for the financial enrichment of the few, and that it has not the slightest intention of receding from the position recently taken in respect to increasing the price of crown lands was the gist of an answer given a few days ago by Hon. W. J. Bowser, attorney general, to a deputation which waited upon him.

The deputation was composed of a number of Vancouver men who are largely interested in the disposal of lands in Central British Columbia. Mr. J. F. Bledsoe was the spokesman of the party. For an hour and a half the deputation held the attention of the attorney general, the result being a declaration from the minister that the government had fully considered the subject in all its phases before action had been taken, and he intimated that orders-in-council were not made one day to be blown over the next. He declared that in his opinion the members of the deputation could not expect any alteration of the decision of the government.

The protest of the deputation was called forth by the recent action of the Government in doubling the price at which crown lands might be obtained. For years the government has allowed purchase at the rate of \$5 per acre for first class lands, and \$2.50 per acre for second class lands. Henceforth the price will be \$10 and \$5 respectively, and the new schedule will apply in the case of those applications for purchase as have not yet been considered by the government, and all lands for which application may be received in the future.

In dealing with the deputation Hon. Mr. Bowser made it plain that he was speaking as an individual member of the cabinet, because, he stated, the subject under discussion was one which came properly under the jurisdiction of Hon. Mr. Ross, minister of lands. Hon. Mr. Bowser suggested that the protest should have been made to the proper minister at Victoria. But on the question that the government might modify the terms of the order-in-council Hon. Mr. Bowser was firm in the expression of the opinion that there was no possibility of such a step being taken.

The increase in the price at

which the government will sell crown lands will not in the slightest degree affect the price at which the pre-emptions may be made in those large areas of Central British Columbia and the Peace River Country, which have been reserved for this special purpose. Pre-emptors can take up land and secure absolute title at the rate of \$1 per acre.

: Peachland Notes :

Lieut. Gov. Bulyea left last Saturday for Edmonton, after spending the week here inspecting his property and arranging for the season's work.

Mr. H. W. Arbuckle arrived home from England last Tuesday evening. He was followed a couple of days later by his travelling companions, Mr. and Mrs. J. L. Vicary, and Miss Vicary, who had stopped a couple of days in Winnipeg. They all say they had a good time but were glad to return to their homes here once more.

Our three teachers, Miss Montgomery, Messrs. Barker and Murray are attending convention this week in Vernon. Mr. Barker gives a paper on the school system of England, and Mr. Murray is on the program to lead the discussion on a history paper. Miss A. E. Elliott is also attending the Convention in Vernon.

Mr. John McDougall spent Easter with his family here. Mr. Chas. D. Pope of Vernon was another visitor to his home folk over the holidays.

Mr. A. J. C. Clarence, whom we reported last week to be ill, took a turn for the worse on Saturday and passed to his rest on Sunday afternoon. Mr. Clarence was an "old timer" having lived here for ten years. He came here originally because of tubercular trouble and during all these years he put up a most heroic fight against the grim foe, bravely and uncomplainingly attending to his private business and public duties as School Trustee and Councillor when ill enough to be in bed. He served twice on the School Board resigning from that body last January to represent Ward 3 on the Council. Possessed of good executive ability and untiring zeal, he was a most useful member of these two bodies.

His brother arrived from Vancouver to attend the funeral which was held last Wednesday morning and was conducted by Rev. H. A. Solly, of Summerland. The large attendance at the service testifies to

the respect in which he was held by his fellow citizens. Mrs. Clarence has the sincere sympathy of the whole community in her bereavement. His nearest surviving relations are an aged father in England, a sister at the Court of Denmark and the brother from Vancouver.

NOTICE.

Public Notice is hereby given that, under the authority contained in section 131 of the "Land Act," a regulation has been approved by the Lieutenant-Governor in Council fixing the minimum sale prices of first and second class lands at \$10 and \$5 per acre respectively.

This regulation further provides that the prices fixed therein shall apply to all lands with respect to which the application to purchase is given favorable consideration after this date, notwithstanding the date of such application or any delay that may have occurred in the consideration of the same.

Further notice is hereby given that all persons who have pending applications to purchase lands under the provision of sections 34 or 36 of the "Land Act" and who are not willing to complete such purchases under the prices fixed by the aforesaid regulation shall be at liberty to withdraw such applications and receive refund of the moneys deposited on account of such applications.

LACK OF LABOUR RETARDS PROGRESS.

"The agricultural train is a great idea. It would be hard to exaggerate the educative value of such trains and I hope the example of the Washington State Agricultural College at Pullman will be followed by this province." Such was the statement of Mr. W. E. Scott, the deputy minister of agriculture and permanent chief of the agricultural department of British Columbia, who has just returned from a trip through the Kootenays.

Deputy Minister Scott represented the provincial government in welcoming & accompanying the officials of the State College of Washington—Pullman Agricultural College—in their demonstration through the Kootenay. He said:

I was much impressed with the enormous educative value of this demonstration train and consider that the equipment and mission of such trains is a work which could be profitably undertaken by our provincial government with far

reaching and highly beneficial results to agricultural development throughout British Columbia.

"Everywhere," said Mr. Scott, "there is an inalienable and, indeed, a well founded spirit of optimism. This is a great factor in building up a new country. It builds up the western states and its effects as well as its justification are even greater in our wonderful province of British Columbia. There is a great need, however, for labor, the lack of which retards the rate of progress materially."

Oh! where, and oh! where
Will the little railway run?

Last week-end was recognized by a few as "clean up time," and two or three places look the better for it.

At odd times rowboats are to be seen on the lake, and the owners fishing from same. As yet no great catches have been made.

The new Opera House is rapidly nearing completion, and the scenery for same is being prepared. It is expected that all will be in readiness for the concert on May 24th.

The Oddfellows will hold their 92nd. anniversary service in the Baptist Church at the front next Sunday afternoon at three o'clock. All brethren please meet in the Lodge room at 2.30 o'clock. The public and visiting brethren are cordially invited. Collection in aid of furnishing one of the wards in the new hospital. Rev. G. O. Fallis, of Penticton, will conduct the service, assisted by Rev. F. W. Pattison.

QUEEN'S UNIVERSITY PROBLEM.

Queen's University, Kingston, is still wrestling with the question of separation from the Presbyterian Church. On the board of trustees of the college, there are, as there in the general assembly, staunch and uncompromising opponents of the movement who have sturdily withstood the strength of opinion that has been developed in the Presbyterian body since Principal Grant urged that the institution could not hope to attain a recognized standing as a modern seat of learning until it had become independent of denominational ties. How long these champions of church control can hope, however, to continue the present conditions remains to be seen. The whole matter will probably hinge on the question of adequate support without which no university can hope to attract a student body.

The anti-separation trustees, it is said, ask where Queen's will get her endowment if it yields her its Presbyterian connection. Principal Grant and those who were actively associated with him in striving for years to place the college on a satisfactory financial basis, asked where it would get adequate endowment if it continued its Presbyterian connection. Dr. Grant devoted many years of his life to awakening the Presbyterian body to a sense of its responsibility towards Queen's University and he failed to secure anything like what he required. It was only after he had failed and perceived clearly that all hope of success was impossible that he accepted the inevitable and declared for separation.

The Summerland Municipal Council is late in the day in publishing its financial statement for 1910, which appeared in last Saturday's issue of the "Review."—Kelowna Courier.

The members of the Methodist and Presbyterian Churches in town are considering the advisability of amalgamation. To work together as one Church under one pastor, holding services alternately, morning and evening at Summerland and West Summerland, is part of the proposals.

RICH RED BLOOD.

You Will Never Have It as Long as You Have Dyspepsia!

Just as long as you have dyspepsia your food will not properly digest, and the nutritious elements in the food will not be extracted or absorbed, and impoverished or watery blood will follow.

This condition may not be apparent at first, but it will come just as sure as the sun will rise again.

Any stomach ailment, including all forms of indigestion, can be promptly cured by using Mi-o-na tablets, a scientific treatment unsurpassed.

It stops fermentation, belching of gas and taste of sour food almost at once.

The mighty power of Mi-o-na to invigorate and restore the stomach to perfect condition is known everywhere.

Mi-o-na cures by building up by banishing the cause. For thin people it is a great flesh builder, because it causes the stomach to give more and purer nutrition to the blood. It cures sea and car sickness and vomiting of pregnancy almost immediately. The Summerland Drug Co. sells Mi-o-na for 50 cents a large box, and guarantees it to cure or money back.

SUMMERLAND, B.C., APRIL 29, 1911

Whole No. 142

BOARD OF TRADE MEETING.

A "Clean Up Day" Campaign.

There was a very poor attendance at the quarterly general meeting of the Summerland Board of Trade held in the Council Chamber on Tuesday afternoon. Enough members were present, however, to form a quorum and with Mr. H. C. Mellor in the chair the business of the meeting was proceeded with.

The secretary (Mr. Stackhouse) presented his report of the quarter's work and at the same time, owing to his leaving the district, handed in his resignation.

A number of questions came up for discussion, among them, a motion that the Council be requested to set aside the 11th May (Thursday) as a Cleaning up Day and the Civic Improvement Committee of the Board of Trade be instructed to take the necessary steps towards the observance of this day. By this means it is hoped that the vacant lots, streets and lakefront of the town may be relieved of the tin cans and rubbish which may be seen at almost every corner. This will be a cheap form of advertisement for Summerland and all that is necessary is the co-operation of its citizens.

Mr. H. D. Suckling from the Head Office at Montreal is at present acting as teller at the Bank of Montreal, Summerland.

W. H. Austin, who has had charge of the Gymnasium of the Men's Club for the past season, left on Tuesday for Vancouver.

The ratepayers of the Trout Creek ward held a meeting on Tuesday evening to discuss the new hospital proposition. Mr. R. Johnson was elected to the chair. The President of the Hospital Board, Mr. W. J. Robinson, was, by request, present to put the details of the scheme before the gathering. After a good deal of argument both pro and con, those present, almost without exception, signed a petition favoring the Hospital Board's plans.

The Misses Spencer, who are at present the guests of Mr. and Mrs. A. W. McLeod, have decided to make their home in Summerland, and have already arranged for the erection of a handsome residence at West Summerland.

ODDFELLOWS' ANNIVERSARY.

On Sunday last, the members of Okanagan Lodge, No. 58, Summerland, celebrated the 92nd anniversary of their order, in the new Baptist Church, Shaughnessy Avenue.

This was the first service in the new edifice, and the building was well filled.

The service was conducted by the Rev. F. W. Pattison, who gave a very appropriate address, and special music was rendered by the choir and a solo by Miss Brown. The collection taken up was on behalf of the new hospital.

On Tuesday evening the celebration was continued and took the form of an At Home, which was held in the Men's Club. A delightful and varied program was presented, interspersed by speeches from visitors, and also by a few of the brotherhood. Noble Grand, V. Taylor, made a splendid chairman. Refreshments were served and the whole affair tended to prove that the order, in Summerland, is very much alive and very active. After the singing of the National Anthem, the gathering dispersed, voting it a very successful evening.

On Sunday morning next in St. Andrew's Church, West Summerland, at 10:30, all members and adherents of the Presbyterian Church and congregation are asked to meet and discuss the question of forming one congregation under the care of one pastor. The meeting will be asked to give a decision on the question, so a good audience is looked for. Sunday School will be re-organized at the close of the morning service.

The first Regatta of the 1911 series of the Naramata Amateur Athletic Association will be held on Thursday June 23rd., Coronation Day.

W. W. Borton, brother of Cliff, was married at Newcastle, N.B., on Tuesday, to Miss A. S. McAuley, of that town. Mr. and Mrs. Borton will take up residence over their brother's store on Shaughnessy Avenue, Summerland.

HOSPITAL LADIES AUXILIARY

ANNUAL MEETING.

The annual meeting of the Hospital Ladies Auxiliary was held in the Council Chamber on Tuesday afternoon, the 18th. inst. The following officers were elected for the ensuing year.

- President - Mrs. R. C. Lipsett.
- 1st. Vice Pres. Mrs. A. Moreland.
- 2nd. Vice Pres. Mrs. F. Andrew.
- Rec. Sec. Mrs. C. S. Stevens.
- Cor. Sec. Mrs. J. C. Robson.
- Treasurer Mrs. H. A. Solly.

The financial statement was read, and passed, as follows:

Receipts.	
In hand from 1910	\$113.01
By Subscriptions	37.50
By Donations	28.25
By Collections	25.50
By Entertainments	421.55
Total	\$625.81
Expenditures.	
Articles supplied to Hospital	\$248.95
Expenses of Entertainments	119.30
Cost of Badges	6.25
Postage	.50
In Hand	250.81
Total	\$625.81

Audited and found correct, F. J. Nixon.

Another Canadian city has voted in favor of government by commission. St. John, N. B. "Canada's winter port," one of the important eastern cities of our country, gave a large majority in favor of the new plan, the vote being 3893 for commission and 1647 against.

Mr. W. Dawson, of Peachland, has recently sold his property at Shingle Creek. The price realized is stated to be \$15,000, and it's understood that a large Saskatchewan concern are the purchasers.

Last week there were two power spraying outfits at work in Summerland. These are the first in the district, and there is no doubt but what they will soon be in evidence throughout the whole of the district.

OBITUARY.

Mrs. C. D. Denton.

With an awful suddenness that sent sorrow deep into the hearts of all who had known her, the news came to Summerland from Kelowna last Sunday afternoon that Mrs. Denton, wife of Prof. C. D. Denton, of the College, had entered into her long rest. The sad intelligence was the more unexpected since but an hour or two previously a cheering message had come over the wires to the effect that the invalid was improving. But a relapse set in, and at half past three her spirit went to God.

Mrs. Denton had ailed for a considerable time; she had, in fact, been more or less unwell for many months back. Last fall she suffered an attack of the prevalent typhoid, and about three weeks ago she was removed to the Kelowna Hospital suffering from internal trouble. An operation was decided upon, and although this presented unforeseen complications, yet high hopes were entertained for her recovery. But this was not to be.

Mr. Denton, accompanied by Rev. F. W. Pattison and Prof. D. H. McIntosh, went up to Kelowna on Sunday afternoon, and escorted the remains to Summerland on Monday. On Tuesday morning, after a brief but impressive service at the Baptist Parsonage, interment was made in the local cemetery. College work was suspended for the morning, and students and staff assembled at the graveside to pay their last respects to one deeply loved.

Those who were privileged to know Mrs. Denton can indeed feel with the sorrowing husband in his irreparable loss—the second bereavement he has been called upon to bear within so brief a space. Wherever her influence was felt, in the College and in the community generally, Mrs. Denton made a host of warm friends. She suffered continually but bore all with a beautifully patient and uncomplaining spirit, and it is indeed hard to realize that she is not here, but beyond.

The whole community mourns with Mr. Denton the loss of one we all would have had longer with in our district.

GOVERNMENT LECTURERS AT THE WOMEN'S INSTITUTE.

Miss Ravenhill, late lecturer of London University, King's College for Women, and now of Shawinigan Lake, and Mrs. Moran, Lady Superintendent in the Colonial Nursing Service, visited Summerland this week, and lectured on Thursday evening before the Women's Institute. They are making a six weeks tour of the Dominion under the auspices of the Women's Institutes of B. C. spreading valuable information as they go. They came here from Armstrong and went on to Penticton on Friday Owing to the counter attractions on Thursday evening there was not a full attendance of the ladies but those who did go felt that the time had been well spent. Both of these cultured ladies were full of their subjects and held the little audience in rapt attention throughout. Miss Ravenhill spoke first, and before introducing the subject of Food Values gave a resume of the aims and work of these Women's Institute in spreading knowledge of practical matters, such as the proper selection and preparation of food, nursing, hygiene, needlework and also in helping to beautify the places where they existed, in preserving the natural beauties of the districts or by replacing these in other ways as the towns grew. And she said that the Women's Institute had a very important work to do by way of extending the right hand of fellowship to strangers coming to settle. Much helpful work could be done in these ways. She then went on to explain some very large and distinct diagrams, which Miss Ravenhill herself had designed, showing the relative proportions of the different food elements in various common articles of diet, and gave many hints as to what to use and how and when, laying emphasis on the great reduction of starches and sugars required by elderly people compared to the large amount of these energy producing constituents required by growing and active young folks; and also the small amount of fat required in summer compared to the winter. She told some interesting little anecdotes and evidently, she could have gone on lecturing and holding the attention of her audience for a much longer time. However, she then introduced Mrs. Moran, who in a very short time contrived to give an astonishingly clear and concise lecture, on accidents and emergencies.

Great interest was manifested in the practical demonstrations in binding a cut artery and in reviving an apparently drowned person by means of artificial respiration. She had some personal experience of accidents herself, and spoke with conviction. The meeting closed with a vote of thanks to Miss Ravenhill and Mrs. Moran, and the expression of the hope that they would visit our Valley again at some future date. By the way, the annual subscription to the Women's Institute is only fifty cents and new members will be heartily welcomed.

The baseball game on Thursday afternoon on the flat, between Summerland and Penticton was a disappointment—from our point of view. The visitors put it over the locals by 15-7. Although our boys have not had much hard practice, yet no one expected a score so one sided as this. But we'll fix 'em on the twenty fourth of May!

ST. STEPHEN'S LADIES' GUILD.

Sale of Work.

On Thursday afternoon, in the Men's Club, the ladies connected with the Anglican Church held their annual sale of work. The hall was decorated with flags and greenery. Along the whole of one side of the hall a stall was arranged, on which was displayed ladies' and children's wear, fancy goods, etc., and a bevy of willing workers were kept busy attending to the many visitors. The fishpond was another attraction, and second-hand books at another stall also drew purchasers. Afternoon tea was popular, as was also the supper served from six to seven thirty. Both these attractions were heartily supported.

During the evening an entertainment was given, and was fairly well attended. The Dramatic Society presented the sketch "Faithful James" which was very well received, and songs violin solos and pianoforte selections made up

the balance of a very interesting programme.

After the performance in Empire Hall the same evening, the ladies provided a late supper, and a considerable number took this in.

A National Problem—Its Solution by Jesus; is the subject of Mr. Pattison's sermon this Sunday evening, at Elliott's Hall.

Kaleden Comments

Miss G. M. Wolverton returned last Saturday from her visit to Summerland and Naramata.

"The Tribes of the North" certainly seem to be taking the south by storm, for a large number of Lancashire and Yorkshire men have come to Kaleden during the past month, and are so pleased with their new surroundings that as many as can do so look forward to settling down here, those who are married arranging for their wives to follow soon.

The first of the flotilla of Sponson canoes due here from Summerland and this coming week, arrived last Saturday, and is certainly worthy of the admiration bestowed upon it. Messrs. Hatfield & Co. Kaleden, are to be warmly congratulated on introducing to our notice this model of the Chesnut Canoe Co., and for persuading so many of our people to purchase Sponsons.

The Government Road on the east side of Lower Okanagan Lake, from the Falls to Mathison's, is well under way.

On Friday, Mr. James Ritchie, accompanied by a Mr. Johnson, of London, England, — a visitor of no small importance — motored over on business.

Mrs. Grieve, Will, and Jean Babbit, of Summerland have arrived here with all the family effects preparatory to settling down on their recently acquired property here. Other relatives of the family, living at Summerland, will join them shortly.

Orchard planting has been progressing rapidly, and will very soon be completed.

The real estate prospects this year are bright at Kaleden. Mr. and Mrs. Macalister of Winnipeg, have moved into the town house of Mr. T. G. Wanless, and hope to be joined ere long by certain members of their family.

Mrs. and Miss Finlay have arrived from Summerland where they have temporarily been staying on their way here from the Prairie.

The first catch on this lake suggests a good fishing season. Mr. F. Harrison landed an eight and a half pound salmon trout this week; the cook and his assistant, always anxious to provide for the men the latest and most varied dainties, also tried their luck, and soon got a bite, but on drawing in the line, had to be satisfied with a single scale on the hook. So near, and yet—

THE MEXICAN REVOLUTION.

It has become a matter of general surprise that the trouble in Mexico should have come about, and of greater surprise that it should have assumed the proportions it apparently has judging from the daily reports from the seat of the turmoil. Nobody seems to know just what it is all about. But Don F. Leon De la Barra, the Mexican Ambassador to the United States, in the New York Independent, explains the source of the outbreak, and relieves the situation. Says he:

"Why, the foreigner asks himself, has peace been destroyed in a country where finances are flourishing, whose industries are prosperous, and whose Government works strenuously to improve the knowledge and well-being of the people?"

"The facts demonstrated by our progress during the past thirty years are undeniable; The surplus of the Treasury has exceeded 160,000,000 pesos, which amount has been devoted in part to works for the general benefit of the people, and which is the result of the superb habit attained in the last ten fiscal years, thanks to the powerful hand of a capable and foreseeing administration; our securities abroad reach the highest quotations of any of the Latin American bonds; the figures of our international commerce show an increase of more than 300 per cent. in thirty years, and the development of our mining industry places us in the front rank as producers of silver, and in the third as producers of copper. Public instruction is widespread; the irrigation works, which the Government favors strenuously, have already begun to show their influence on agricultural production, which will increase every day, and the net of railroads which in 1876 hardly reached over six hundred kilometers of track, and which today exceeds 24,800 kilometers, affords facilities to industries and commerce and co-operates to spread civilization throughout the republic.

"Among the seditious in actual rebellion can be pointed out three groups; the beguiled who honestly have thought themselves the apostles of democracy and progress; the vanquished in the struggle of life, either through their own incapacity or through other circumstance, who aspire to figure in a new regime that can afford them field for their activities that are not always wise; and those individuals the dross of society, who are ready to fight for any cause by which they can profit

and make use of for their evil intentions.

"The first have thought that through a revolutionary movement they would change the situation in the republic, which they did not think satisfactory; casting into oblivion the teachings of history, and failing to recognize with a mistaken and near-sighted judgement, the advantages attained during the course of late years by the honest, patriotic and enlightened administration over which General Diaz has presided.

"The present situation in the republic is as follows: In the north, in a portion of the state of Chihuahua, some forces made up of malcontents who are against the local administration, without any military organization, properly speaking, keep up a guerilla warfare in which they will soon be subdued by force of arms, notwithstanding the advantages that kind of warfare gives them in a mountainous country."

IN MEMORIAM.

Helen Skene Denton.

(Contributed.)

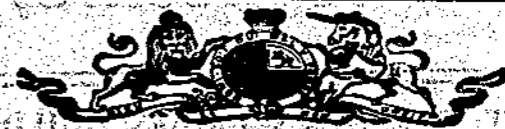

Few, hearing the homely, oft repeated words, "And their place shall know them no more," can appreciate their significance. It is hard to think of a present separated from the past. To the little group of sorrowing friends who gathered simply, quietly and reverently to take a last, loving farewell of Helen Skene, beloved wife of C. DeBlois Denton, the realization seemed impossible. It was difficult to believe that the golden threads of friendship were severed, that the old relationship no longer existed.

Mrs. Denton's place was peculiarly her own. The wealth of a generous nature, the boon of a cultured home in New Brunswick where she was born twenty-seven years ago, the wide experience of the Seminary at Wolfville, where she met her husband, and a singularly happy marriage all contributed to the knowledge, sympathy and tact essential to the position she was destined to fill. Coming as a bride to the Okanagan she gave to the College in its youth all the light and gaiety of her own. She became a part of the institution entering into the multifarious activities of students and teachers as one of themselves. To those in residence her presence was especially precious. The gracious hospitality of her home will never be

forgotten. It was always open for a chat, a laugh after the day's work, or a game before study. The picture that will remain in the hearts of those who knew her best is that of the evening when she overcame her increasing weakness to fulfill a time-honored engagement and welcome her guests with her accustomed happiness and vivacity. Her place knows her no more but her spirit still lingers stealing and giving odor, and making sweet with its fragrance all past associations.

Into the corridors, into the hospital, wherever she went, she took the charm of her personality. During her illness she endeared herself to everyone. Her rare brave spirit never faltered, never doubted, never feared. Her faith in the ultimate fitness of things never wavered. Nothing could have been more in keeping with her trustful, uncontentious life than the few short words of hope read before the body was carried to its final resting place in the Summerland Cemetery. Her place knows her no more; but her memory still lives, an inspiration to her friends and a priceless heritage for her devoted husband.

Messrs. Shields, Hatfield and Clark handle rigs, wagons, etc. See them before placing your order.

NOTICE.

Public Notice is hereby given that, under the authority contained in section 131 of the "Land Act," a regulation has been approved by the Lieutenant-Governor in Council fixing the minimum sale prices of first and second class lands at \$10 and \$5 per acre respectively.

This regulation further provides that the prices fixed therein shall apply to all lands with respect to which the application to purchase is given favorable consideration after this date, notwithstanding the date of such application or any delay that may have occurred in the consideration of the same.

Further notice is hereby given that all persons who have pending applications to purchase lands under the provision of sections 34 or 36 of the "Land Act" and who are not willing to complete such purchases under the prices fixed by the aforesaid regulation shall be at liberty to withdraw such applications and receive refund of the moneys deposited on account of such applications.

WILLIAM R. ROSS,
Minister of Lands,
Department of Lands,

SATURDAY, APRIL 29, 1911.

CENTRAL FRUIT EX- CHANGE.

The circumstances leading to the organization of the Central Fruit Exchange in British Columbia, with headquarters at Revelstoke, are fresh in the minds of the fruit men and producers of the Okanagan. It was organized only three years ago. After one season of selling the Central Exchange went to the wall, and this circumstance is perhaps fresher in the minds of our fruitmen. At the demand of the growers who were caught in the failure, the B. C. Government instituted an investigation, and, although we have seen a published report of the findings of this commission, we understand the report exonerated the men who were at the head of the enterprise and laid the blame, if any, at the door of the growers themselves, who were unable to supply the quantity of produce they had agreed to supply, thereby making it impossible for the Central Exchange to meet the demands made upon it for produce, or to liquidate the indebtedness incurred in its efforts to create a market for produce that was not forthcoming.

This, in brief, is the history of the Central Fruit Exchange. It failed, not because its officers were dishonest or inexperienced, but for the reason that the districts failed utterly to "make good." They estimated their produce four times greater than it turned out to be. The Central Exchange planned its season's business on the estimated crop and failed on the actual crop. In this respect both the growers and the Exchange management were at fault. But the intentions of both were good. It was the re-

sult of not knowing. Both needed experience to teach them how to work together. Lack of experience in this respect was sure to bring results disastrous to both.

The failure of the Exchange two years ago had a tendency to retard the co-operative movement then promising so well. It was but another blow to successful organization. However, the principle back of the movement was the correct principle, and is the only principle that will solve the problem of marketing the output of our orchards and gardens and fields. The growers of British Columbia must eventually come to this. Not district organization in competition one with the other as at present, but district organization under one selling head.

The fruit growers of the Northwestern States have come to this conclusion with regard to the output of those States, and the Central Selling Agency idea, almost identical with that underlying the Central Exchange of three years ago, has taken hold of them. And an organization has been effected along these lines. It will be worth while to study the system under which the organization will operate and to watch carefully its progress.

It is proposed to organize the fruit growers of Washington, Oregon, Idaho and Montana into distinct districts with one selling head, to be known as "the Central Selling Agency for Northwest fruits." The present value of the crop to be handled has been estimated at ten million dollars. The circumstances leading up to the organization of this Agency are clearly stated by Mr. H. W. Otis, chairman of the executive committee, in "Better Fruit," and as they embrace the essential facts which are of vital importance to all fruit growers, and particularly those of the province of B. C. we feel disposed to reproduce the interview, as our fruit growers and shippers must meet the same conditions sooner or later. He says:

"No outside promoters or influences have any part in the attempt to line up the fruit growers of the Northwest to put the orchard business on a sound basis. They merely wish the privilege of handling direct that which they are producing instead of taking the blind chances of delegating the distribution to produce speculators. The plan of organization adopted at Walla Walla is the outgrowth of

definite conditions confronting the growers in the Northwest. It is true that most of them have been making money up to date, but in the face of a steadily increasing output every year it becomes necessary to take steps to develop new markets systematically to insure consumption of the large crops that will be raised on their increasing acreage in the next five and ten years.

"The entire lack of co-operation on the part of orchard men in the face of identical interests, the total absence of intelligent or systematic distribution, with the attendant evils of disastrous competition among the districts, have made the markets undependable and fluctuating. The result has been invariably the source of loss to the dealer as well as the grower. As a remedy it is proposed that district associations shall be formed, as already exist in some of the fruit sections, to control all the details of growing and assembling the crops.

"These associations will form the nucleus of the central selling agency or exchange, which will have charge of the marketing. It will be properly located and equipped to handle the big business in an up-to-date way, employing the best sales manager and traffic expert that can be had for money. An executive committee representing each district will constitute the governing board. None of the districts will have to lose their individuality, as that feature will, in many cases, be an important aid in selling the crop. An educative publicity campaign will be carried on, like that of the California Orange growers, to enlarge the demand for Northwest fruits.

"It is definitely stated and distinctly understood that the new organization shall not operate in restraint of trade. It will seek to advance the best interests of the grower and consumer, thereby incidentally benefitting the legitimate dealer in the long run by doing away with much of the speculative uncertainty that now accompanies the handling of fruit and produce. By eliminating the middleman in the selling of fruits direct from the grower to the dealer there will be a tendency to bring relief to the consumer by reducing the cost to him."

OUR MAGNIFICENT FUTURE.

Looking ahead a half decade it does not require a prophetic eye to

see in our surroundings the development of one of the greatest, if not the greatest, districts in the Dominion of Canada. Okanagan Lake is a Dominion asset. It makes temperate a climate most conducive to health and longevity; it subdues the summer's hot suns and makes mild the winter's cold blast. It brings back to the tired and weary the energy of earlier days and puts new life into man after he has depleted his energies in life's hard struggle in the channels of business. Here nature has outdone herself in making provision for the man of retiring years, by providing everything possible for his outdoor comfort, making it possible for him to spend the sunset days of life in the open, free from every care and close to nature's heart. We know of no district which affords more looking to man's comfort than the district of the Peach Belt. And with Nature giving so much, and man adding his mite, in the way of directing the channel of growth and providing the brains looking to the development of the beautiful, we shall see here upon the rolling hills skirting the silver beaches the evolution of a Naples that will eclipse the Naples of Italy.

As we see the beautiful homes gradually lightening up the barren hills, and view the quick response of Nature to man's feeble efforts; and think that Eastern Canada is annually producing in the marts of trade thousands of enfeebled men of brains and nerves but lacking brawn, and learn that these men when they feel the touch of Nature's call, will seek just such a locality as we have here where they can rest and enjoy the fruits of their labor, is there not good reason for the optimism we feel and the distinct light taken in each new development looking to the fulfillment of the great plan each and all are striving for?

The Thursday half holiday is a welcome break in the week's routine for the storekeepers. The printer cannot join in on this day as it is press day, so he takes Saturday afternoon instead.

The local Jewellery Store is removing to the premises formerly occupied by the Bank of Montreal. The Music Department of the College will give another recital in the Gymnasium, on Monday, May 22nd. It is intended that this recital will include more student work, and it will form part of the Closing celebrations.

RIFLE ASSOCIATION.

The season's shooting is now in full swing on the range, and the members are getting down to steady practice. There are several new members this season, and anyone interested in rifle shooting is requested to communicate with the Secretary, F. J. Nixon, West Summerland, who will be very pleased to furnish any information.

Following are the high scores for the past two weeks.

THE SECRET OF THE FLOWERS.

The rose would, no doubt, 'smell as sweet by any other name,' but how does it contrive to smell sweet at all? With this query in mind a French chemist set about to subject flowers to analysis in order to find out the secret. Being cut into sections and having pure hydrochloric acid poured over them, it is no wonder that the tender flowers gave up a portion of their secret. Yet they did not give it entirely.

The investigator was able to ascertain only that the fine oil which gives the perfume is apparently derived in every case from chlorophyll, and is usually located at the upper surface of the petals or sepals in delicate cellules. There seems to be some inverse relation between the amount of pigment or coloring matter in the flower and the perfume. Some of the more soberly colored flowers have the most delightful fragrance, while brilliant hues do not imply a corresponding sweetness of smell.

The fact that the perfume oils are derived from chlorophyll is interesting, because, as will be remembered, chlorophyll is that substance in plants which, when acted upon by the light of the sun, turns a leaf into a sort of chemical laboratory. But it cannot act without the sunbeams. We know how much we owe to the sun as the source of all life and energy upon

the earth, and yet it is a little surprising to reflect that the big orb is directly instrumental in the production of the exquisite perfume with which a flower salutes our nose.—The London Globe.

On Sunday, May 21, there will be two church services of special interest to Summerlanders. The day has been set apart as College Sunday, and it has been decided to formally open and dedicate the new Baptist Church at the front in the evening of the same day. The service specially devoted to the College Closing will be held in the morning, in the Gymnasium, and the evening service will be held down town in the new building. The preacher at both services will be Rev. J. B. Warnicker, pastor of the First Baptist Church, Victoria.

If the married men of Summerland should have noticed lately that they were being treated to "experiments" at tea lately, instead of plain boiled eggs, they will know the reason; for at the usual monthly meeting of the Women's Institute last Friday afternoon there was a general exchange of recipes. These were mostly for the "Guideman's tea."

The College baseball nine bested the Peachland Seniors at Peachland last with a score of 7-6 after a ten inning game. They expected a walk-over along the same lines as the games of last year and their consequent self-confidence nearly lost them the game.

CARD OF THANKS.

Mr. C. DeBlois Denton desires to express his gratitude for the expressions of loving sympathy which have come to him in his sorrow.

WANTED.—Experienced Teamster. Apply by letter to Mr. Higgin, Balcom.

RESERVE.

SIR JAMES M. LEMOINE
Canada's Historian and Litterateur.

At "Spencer Grange," a sunny homestead amidst great trees overhanging the St. Lawrence, near the quaint old fortress city of Quebec, where every square foot of ground seems consecrated to historic memories, lives Sir James MacPherson LeMoine, Canada's genial historian, now working still in the sunshine of optimism, though in his eighty-first year.

Born in the city of Quebec, a descendant of one of the old and distinguished families of Old France, he spent some of his early years under the kindly care of his Scotch maternal grandfather at Isle aux Grues. After completing his education at the Seminaire de Quebec, he entered the public service as collector of internal revenue at the age of twenty-two. Three years later he was admitted to the bar and practised law for a few years, but his heart was not in it. He preferred studying history and birds and writing about them. Surrendering to the spell of the legendary and historic lore of his native city and its surroundings, he loved to breathe new life into the old romances, or to dive into the sea of historic research and investigation. The range of his work can be best suggested by the comprehensive title "Canadian History, Legend, Scenery and Sport"—a veritable treasure-house of Canadian lore, written with a fine literary touch, and pulsing with vital human interest.

The love of birds, which led him forty-five years ago to write his first contribution to periodical literature on land and sea birds around Quebec for the "Canadian Naturalist," is a dominating note in his life. His splendid collection of Canadian birds in the museum of his home attests his loyalty to his feathered friends, and "Spencer Grange" is the mecca of students of Canadian annals, keenly alive to the rare privileges it affords them.

His library rooms are filled to overflowing with books, pamphlets, pictures and literary treasures; but the most interesting shelves are those containing the thirty volumes of his writings, eighteen of which are in English and twelve in French. Like Professor Goldwin Smith, Sir James' printed books represent the smaller part of his literary product, for he has numberless pamphlets and magazine articles to his credit that are unfortunately buried in the oblivion of ephemeral periodicals.

His interest in contemporary matters is as deep and vital as ever; his mind is keen, alert, sensitive as a barometer to every impression, and he carries his years with a grace and ease that laugh at time and its terrors. For many years president of the Literary and Historical Society of Quebec, he has also had the highest literary honor in the Dominion—the presidency of the Royal Society of Canada.

Entered according to Act of the Parliament of Canada, in the year 1903, by W. G. Macz, at the Department of Agriculture

:Peachland Notes:

Mr. H. McDougall spent Tuesday in Kelowna.

Mr. W. A. Lang is visiting Vancouver for a few days.

Mrs. J. B. Robinson is attending the W. C. T. U. Convention in Kelowna this week.

Mr. George Barber is putting in a few days on his lot this week before leaving for Salmon Arm for the summer.

The Game Warden paid us an official visit this weekend and fined

a couple of citizens for breaking the game laws. They had erred ignorantly by having venison in their possession ten days after the closing of the open season. As the Warden was satisfied that they had not known the law a very light fine was imposed. It does seem a very peculiar piece of legislation that a man may shoot five deer any time during the season—say the last day or two—yet all the venison must be disposed of within ten days of the close of the season!

Naramata Notes:

There are three wealthy and well known citizens of Montreal who, useful and public spirited as they are in life, will still be almost as useful in death. This trio are old and honored members of St. James Club. Although almost every man of means is a member of St. James and the amount of money spent here in a day for pleasures of one kind and another would keep a large sized family for a year or many years the institution has had difficulties in raising enough money to add to the present premises and make some very necessary improvements. This novel scheme has been hit upon: The committee has been empowered to borrow and spend one hundred and twenty five thousand dollars, this money to be raised by mortgaging the club's property. To pay off this mortgage the lives of three of the oldest members are to be insured, the club paying the premiums. When they die the insurance money will, of course, go to the club. The three members can't make up their minds if friends really mean it now when they raise a glass and wish the proverbial "good health," For the sword of Damocles seems to be hanging over their heads.

Coronation Day, June 22! What about it? "That's the date selected for our first Regatta," say the Athletic and Aquatic Association. JUNE 22.

The survey party have completed their route past the upper benches of Naramata and are now retracing their line making a few alterations. 'Tis a shortsighted person who cannot see the immense value this new line will place on Naramata properties.

Mr. Schreck has accepted a position with the Trust Company on the Irrigation system.

The Falls of Naramata and Spray Falls are at their best when viewed at this time of year. The view well repays the effort necessary to gain the heights. Remember there is a good road all the way up.

The contract for plastering the new church was completed this week. It only remains now to arrange for the seating.

WANTED.— Woman or capable girl for general house work: Apply Mrs. May, Bank of Montreal, Summerland.

The Summerland Review

NEWS FROM THE EAST.

(From our own correspondent.)

Montreal, April 26.—The banks, the harvest machinery manufacturers, the transportation interests, are all looking forward to the farmers of Canada making a record in the matter of the country's total wheat crop this year. The banks lend money on the crops and they are preparing to lend generously this year. The millers grind wheat into flour and they are expecting their mills to work overtime this year. The transportation companies handle the crop and they are increasing their rolling stock and fleets of vessels this year. In connection with the harvest outlook an important announcement was made this week that interests closely identified with the Canadian Cereal and Milling Company, had purchased the International Milling Company and that a holding company was about to be organized, which would direct the affairs of both companies. Mr. J. D. Flavell, president of the former organization is spoken of as the president of the new company. Both the Cereal and Milling Company and the International Milling Company stand high financially and commercially and the joining of the two will have no little effect on the handling of this year's crop. The Cereal Company's mills are all located in Ontario, namely at Tillsonburg, Lindsay, Toronto, London, Fergus, Embro, Woodstock, Ayr, Galt and Highgate, and have a combined capacity of over 5,500 barrels per day of flour, rolled oats and oatmeal. The International, as its name implies, has mills on both sides of the boundary, four in the United States and one at Moose Jaw. It was founded in 1896 by Mr. F. A. Bean, from Minnesota, who started with one small mill. In making the expansion not a dollar outside of the actual earnings of the organization has been expended. This year the International is enlarging the Moose Jaw mill, erecting a rolled oats mill at the same place and acquiring a string of elevators throughout the west. The new combination is in very able hands financially. It is understood that the directors of the new holding company will be chosen from both the International and the General Companies' boards. The harvest machinery people are looking for an extremely busy year. All the new settlers need new machinery and there is going to be consider-

able difficulty in outfitting every farmer or would be farmer in time. The Sawyer Massey people report that their factories are working night and day to provide for the demands which are coming from the west for ploughs, reapers, rakes and so on. They also notice that the demand for heavier machinery such as threshing outfits and traction ploughs, is much greater than it was a few years ago, showing that the farmers are getting more prosperous and preparing for operations on a larger scale this year. Early this winter the Canadian Pacific, the Grand Trunk and the Canadian Northern placed their orders for freight cars to be delivered this summer in time to help haul the harvest to Fort William. Since then additional orders have been sent in for a total of ten thousand cars. Preparations are also being made for increasing the tonnage of the vessels plying on the lakes, most of them in the grain trade, and of the Atlantic Steamers. As a rule, the railways are not far wrong and it will be very surprising if their preparations for a bumper harvest are not justified.

Having experienced cold storage eggs, cold storage meats, cold storage chickens, and cold storage edible products without limit, there has now been discovered the evil of cold storage flowers. Many a bunch of high priced blooms, it now appears, though seemingly fresh picked, may have been in cold storage for five or six months. Particularly is this true of violets, and many an ancient bunch picked half a year ago is now disposed of to the unsophisticated purchaser. In appearance the cold storage blooms, like cold storage eggs, have nothing of which to be ashamed. It is in their odor that the danger lurks. The ancient blossoms picked in the dull season, lose all their sweetness soon after being placed in cold storage in the fall. When they are taken out from the cold storage chambers in the spring they must be artificially scented. Violets, for instance, are impregnated with violet extract, just as a handkerchief might be impregnated. Not only is there danger of a certain kind of poisoning from smelling them, but they hold their false sweetness for only about six hours and they droop and wither as quickly. These long preserved, artificially scented blooms, which are vended at ridiculously low prices, are one of the most surprising cold storage products yet brought to light.

"FAUST."

A Strong Company.

At the time appointed for the rising of the curtain in the new Empire Hall on Thursday evening, there were five people present. At eight thirty five there was a fair audience; but it seems strangely unfair that the punctual few must wait upon the tardiness of the majority, though it appears, unfortunately, that this has become a deeply rooted custom in our town. As a stage production, "Faust" is distinctly weird; but this is the atmosphere that the all-pervading Mephistopheles sheds over the entire play. The story of the man Faust, who unthinkingly barter his soul in a moment of intoxication in the anticipation of a few joyous hours of love; the man who unwittingly sells his immortality so cheaply—it is pathetic. And this feeling deepens as the story unfolds, and the man is cheated of his love happiness, yet still has to pay his price.

Mephistopheles, the Prince of Darkness, is of course, the dominating personality—or perhaps Satanality. This ever-present, dominating and cynical incarnation of Plutonic majesty, all powerful, yet powerless with a simple, guileless maiden, inspires one with feelings of awe, as he lightly toys with the destinies of men and women and

ruthlessly condemns them to his under world. It was a strong part and lost none of its strength in the hands of John Griffith. He made a robust and a relentless Mephistopheles, and possesses a voice and figure that readily lend themselves to a masterful interpretation of this great character.

Miss Edyth Totten, as Marguerite, the girl whose love path Mephistopheles so plentifully bestrews with thorns, delighted the audience with her soulful acting. Her pathos was genuine, and her listeners were sorrowing with her at the culmination of her ill starred love affair.

The whole cast was good, each individual actor entering so completely into their impersonation, that the performance ranks as one of the strongest interpretations of this great work we have seen.

The stage management was evidently in capable hands, no pains being spared to produce effects almost startling in their realism. "Faust" as performed last night, should certainly prove a drawing card for Shakespeare's "Othello," which is to be presented tonight. This will afford a rare opportunity to see an uncommon presentation of this well known tragedy.

Last night's performance was the first in the new Empire Hall. Without exaggeration it may be said to be one of the finest halls in the Valley. Perhaps no larger than the old hall, yet in every respect, stage conveniences, fittings and finish, there is no comparison between them. The spacious interior is quite in keeping with its destinies of men and women and posing exterior.

Hon. Secretary.

Let this sink in! The son who is the actual inspiration in his father's business; the daughter who is the real salvation of the home, is he or she who has put on the overalls and wampus, apron and housedress and got busy at fifteen or sixteen, with no favors asked or given, and stayed right on the job. It is work and responsibility that make men, not immunity and pocket money. Honors mean little or nothing, and must be incidental and not an end or aim. It was Leo Tolstoy who said: "Do these things for your children; Let them do all they can for themselves; carry their own water, fill their own jugs, wash up, arrange their own rooms, clean their own boots and clothes Believe me, that, unimportant as these things may seem, they are a hundred times more important for your children's happiness than a knowledge of French or history.

These things train the children to simplicity, to work, and to self dependence. If you can add work on the land, if it be but a kitchen garden that will be well.

Believe me, that without that condition there is no possibility of a moral education, a Christian education, or a consciousness of the fact that men are not naturally divided into classes of masters and slaves, but that they are all brothers and equals."—Enderby Press.

Father Bernard Vaughan, the noted Jesuit, in a sermon at Nuneaton, Warwickshire, England, last week, referred in strong terms to the work of Mormon missionaries in England in sending women and young girls to the colonies of the sect in Utah and other American States. Among other things, Father Vaughan said: Fancy a country like this, calling itself Christian, and tolerating these Mormons. They should be taken by the scruff of the neck, rushed across our island, and dropped into the sea."

NO ELECTION THIS YEAR.

Montreal, April 24.—The Hon. Sidney Fisher, speaking at a reciprocity meeting on Saturday night, was asked why the government did not present the question to the electors. Mr. Fisher replied:

"Just as soon as you want it you shall have the chance, but we do not want to disfranchise a great number of the people who will after the census will have votes. We do not think that the present distribution represents fairly the whole country. It would be a national crime to dissolve parliament and go to the country just in the face of a census re-distribution."

An important meeting of the local W. C. T. U. will be held on Monday afternoon next at the home of Mrs. J. R. Brown, when officers will be elected for the ensuing year. A full attendance is requested.

Keep Well Dressed

Don't Get Sloppy—You can't afford it

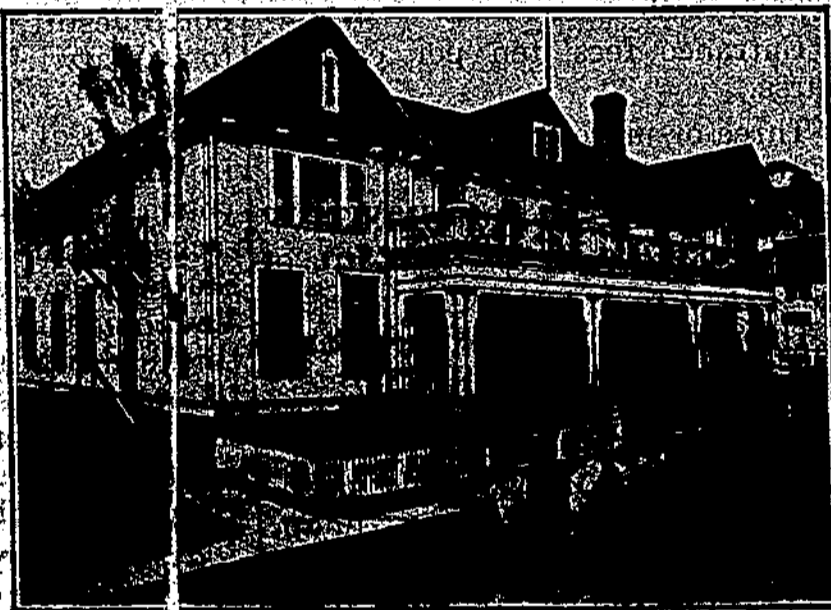

The World welcomes the well-dressed man. No man has ever hurt his cause by being well dressed.

We are showing the very newest styles in men's clothing, and the value of good style in the clothes you select cannot be over-estimated. The quality is largely a matter of honesty, and we feel we can give you both in the 20th Century Brand.

Our stock is very complete, and patterns and values are the best. Come in and let us fit you out.

RICH RED BLOOD.

You Will Never Have It as Long as You Have Dyspepsia.

Just as long as you have dyspepsia your food will not properly digest, and the nutritious elements in the food will not be extracted or absorbed, and impoverished or watery blood will follow.

This condition may not be apparent at first, but it will come just as sure as the sun will rise again.

Any stomach ailment, including all forms of indigestion, can be promptly cured by using Mi-o-na tablets, a scientific treatment unsurpassed.

It stops fermentation, belching of gas and taste of sour food almost at once.

The mighty power of Mi-o-na to invigorate and restore the stomach to perfect condition is known everywhere.

Mi-o-na cures by building up—by banishing the cause. For thin people it is a great flesh builder, because it causes the stomach to give more and purer nutrition to the blood. It cures sea and car sickness and vomiting of pregnancy almost immediately. The Summerland Drug Co. sells Mi-o-na for 50 cents a large box, and guarantees it to cure or money back.

HYOMEI

(PRONOUNCED HIGH-O-ME)

CURES CATARRH, ASTHMA,
 Bronchitis, Croup, Coughs and Colds, or money back. Sold and guaranteed by

Summerland Drug Company
