

# The Summerland Review

DEVOTED TO THE INTERESTS OF SUMMERLAND

AND NARAMATA

Vol. 3, No. 22

SUMMERLAND, B.C., JANUARY 7, 1911

Whole No. 126

## PUBLIC MEETING.

On Tuesday afternoon in the Men's Club, a public meeting was held which had been called by the Council. There were about 150 ratepayers present.

Mr. Hector Sutherland, having been called to the chair, remarked that in the case of a municipality having so many citizens taking an interest in its affairs, as Summerland had, there was only one end to that interest, and that was SUCCESS. Great problems had to be faced in every municipality, but much more so in the case of a new one, and it behoved all the ratepayers to take an active interest.

He trusted that any criticism, comments or charges made during that afternoon or any discussion which might occur, would be on a friendly and happy basis, that all bickerings and self interest might be effaced and only the good of the municipality as a whole be considered.

He called upon Mr. Logie to read the statement of affairs for the past year. Previous to doing this, Mr. Logie explained that it was impossible to have a complete statement of affairs as the end of the Municipal year was on Friday last, and it would not be possible to have a balance sheet issued before nomination day. He therefore gave some figures as to the income and expenditure of the municipality during the year 1909 taking some fifteen minutes to run over his statement.

After this, Mr. Sutherland threw the meeting open and asked any one who had any remarks to make to bring them forward, so that discussion and enlightenment might be the result.

Mr. D. H. Watson asked for the report of the Council as to what their policy had been during the past twelve months, the manner in which they had disposed of the business during that time, and the reason for it.

This was not considered a fair question, the chairman remarking that if individual questions were asked as to policy on a certain work, but not as to the policy as a whole, the Council would reply to same.

Mr. C. S. Stevens, after making enquiries as to the sinking fund of the municipality, spoke strongly in regard to the schools. He asked why the teachers in the municipality did not stay. He would like to know if their salaries were too small.

Mr. James Ritchie, in reply, said that he understood that the salaries in Summerland were below the average for schools in the district, but seeing that so many applications always came in for vacancies, he thought that as long as this state of affairs existed, it would not be advisable to spend the ratepayers money in higher salaries.

Mr. R. W. Nelson at this point asked several questions the chief of which was why

were Japanese employed in digging the trenches for the pipeline, and were these laborers paid at the same rate as white men. He was informed that Japanese were not employed by the municipality. The contractor for this work had them in his own employ, and the Japanese were paid the same rate of wages the white laborer.

Mr. James Ritchie here remarked that before he replied as to the reason why the pipe line had been let to this particular contractor, and other details in connection with the water system, he would like to have all questions or any criticisms so that he could deal with them before going on with the chief expenditure of the year.

Mr. Cancellor at this point remarked that it was about time the meeting got to business. He presumed that they were all there to know something about the water system, why the work had not been pushed through as quickly as it ought to have been nor yet as satisfactorily.

Mr. James Ritchie, representing the Council, explained the why and wherefore of many interesting details in regard to the pipe line and water system.

In the first place, he remarked, they had employed a highly paid official to do certain things which had not been done. They had relied upon their being done, but they had been disappointed. This was one of the mistakes he acknowledged the Council had made; but as he truly remarked, it was impossible at the time they made the appointment to know they were in error. Early in the season this official took a whole lot on his shoulders, but owing to the strain he resigned in the summer. This delayed matters a few months, as the methods adopted under this regime were far too slow, so the Council called for tenders for the complete work, that is the digging of trenches, laying of pipes, and covering in. Four firms contracted for the pipes, two only contracting for the whole work. One firm offered \$51,652 and the other contracted for \$47,526.15. This figure was the successful one and the Canadian Pipe Co. were awarded the contract. In regard to the changing of certain plans, and suggestions made by the consulting engineer, Mr. Ritchie said that the Council deemed them impracticable and he was convinced that on this particular part of the work, the engineer had not given sufficient thought, or if he had, that his orders had been misunderstood by those to whom they had been given.

The delay in the laying of the pipes was in no way due to the laxity of the contractor. They had a plant whereby they could turn out one carload of pipes per day, but owing to the C.P.R. not having supplied sufficient cars for their use, they had not been able to deliver as quickly as they were equipped to do.

There were several matters which the

Council had to face and many difficult problems had to be worried out, but they had done the best to their knowledge. They had hoped to have part of the north flume cement lined, and everything was in readiness for this work, and it would be completed before the irrigation water was required for the coming season.

In regard to the packing shed and wharf, he was fairly convinced that the engineer who had the laying out of the scheme was to blame. There was no doubt that it was not so satisfactory as it might have been; but the original plans were altered, the second plans were altered, and it was not until late in the proceedings that the Council were furnished with plans. There was no doubt that since there was no sidetrack, importers of goods and merchandise were being handicapped, but for the present, this could not be avoided and would have to so remain.

Before Mr. Ritchie could take his seat, both Mr. Mellor and Mr. Sutherland rose and spoke very emphatically in connection with this work. In fact, there was far more discussion about this than about the huge expenditure of the Council during the year, and the work carried on immediately under their orders.

Mr. W. J. Robinson said that he hoped that Councillors seeking reelection, or any ratepayer seeking election would hold meetings at which they could inform the ratepayers as to their policy during the ensuing twelve months, so that some idea could be formed as to what might be expected of them.

Other questions were asked, relative to road contracts, pollution of Aeneas Creek, Lights along the road, etc., some of which were answered and others side tracked.

## SUMMERLAND APPLES IN THE OLD COUNTRY

The following four opinions are taken from letters received here acknowledging the arrival of the fruit shipped through the Vernon Board of Trade at the beginning of September.

They make interesting reading, and we could fill a few columns with similar excerpts received during the past few weeks.

"Apples arrived in perfect condition, not one bad in the whole lot. If your district turns out such quality of fruit as this you had better get me appointed as agent here, for there would not be the least difficulty in getting customers."

"The apples are real gems—by far the best fruit I have ever seen, and they are bound to command the markets wherever they go."

"The apples arrived safely, and are indeed beautiful. Both the varieties are so different from the fruit we get here, the colour and flavour being perfect."

They are the finest apples I ever tasted—so sweet and full of flavour—and such pictures to look at."

Peachland Paragraphs.

Miss Lulu Brown returned on Saturday from visiting relatives in Naramata.

Mr. Paul Murray returned home on Monday and resumed his scholastic duties on Tuesday.

Miss Lena Kennedy is spending a week in Penticton.

Mr. W. A. Lang was a passenger on the Okanagan on Wednesday morning en route for Vancouver.

Mrs. Mills and her daughter Mrs. Hyde, are visiting the former's parents, Mr and Mrs. Robert Mitchell.

Rev. J. P. D. Knox entertained the members of the High School class last Friday evening. A very pleasant evening was spent with games and guessing contests.

Mr. and Mrs. George Mitehell of Penticton, spent New Year's in Peachland. Their friends were delighted to welcome them back for a few days.

Miss Montgomery of Chilliwack has been engaged to take charge of the Primary department of the Public School, and began her work on Tuesday morning.

Rev. C. W. Whyte left last Saturday for Field, B.C., where he has received a call from the Presbyterian Church. We understand that Mr. Whyte has not definitely decided to accept.

Municipal affairs are taking the attention of everybody just now. As election time draws near, the ratepayers are showing an unusual interest in all questions relating to the municipality, and also in selecting candidates to fill the offices.

(Too late for last week.)

Mr. Paul Murray, Principal of the Public School, is spending his holidays in Vancouver.

Miss Ethel McIntyre is spending a week in Kelowna visiting friends there.

Mrs. C. G. Elliott entertained the members of the Handicraft Club on Thursday afternoon.

Mr. F. W. Hicks left for the coast on Wednesday morning to take charge of a school in South Vancouver.

Mr. H. Lowles of Vernon is staying at the home of his cousin, Mr. J. L. Elliott for a few days.

Miss E. Kinney spent a day or two in town last week on her way to Penticton to visit her cousin.

Mr. H. Hardy returned on Wednesday last from Penticton, where he had been spending Christmas with his old friends, Mr. and Mrs. George Mitchell.

Miss Rita Houston, who has been teaching at Notch Hill, is spending her holidays here with her family. She leaves on Saturday for Spence's Bridge where she has accepted a position for next year.

Mr. and Mrs. W. Keating, of Russell, Man. are spending a few weeks here with Mr. Oliver Keating. They are much pleased with the place and enjoy the mild weather after the sharp frost of the Manitoba winter.

The snowfall which came last week has given us sleighing, such as we seldom have in this locality and has added much to the pleasures of the holiday season, which has been an unusually gay one. Besides numerous parties each of the Sabbath Schools held very successful Christmas entertainments with a Christmas tree in connection.

Local News Items.

Councillor G. N. Gartrell desires us to intimate that he will not seek re-election for the forthcoming twelve months.

St. Stephens Church (Anglican.) Sunday, January 8th. 1st Sunday after Epiphany. Sunday School 10 a.m. Matins 11a.m. Evensong 7 p.m.

In our last week's issue we stated that the price of season tickets for the Balcombe Skating Rink was \$2.00. This was an error, \$2.50 being the correct amount.

Messrs. Shields & Hatfield have admitted Jas. Clark as a partner in their business. To facilitate the new partnership it is desirable that all accounts due the old firm be paid at once.

There will be a meeting of Ratepayers this (Friday) evening at the Schoolhouse, West Summerland at 8 o'clock prompt for the organization of the Summerland Ratepayers' Association.

Mr. H. Bristow is once more a very successful exhibitor of poultry at the Ashcroft show. Out of four entries he gained three firsts and one third. At this rate Summerland poultry will become as famous as our fruit.

Methodist services will be held down town next Sunday morning, and at West Summerland in the evening. These services will introduce a series of monthly addresses on the general topic of "The Religious Mission of the Anglo-Saxon."

On Wednesday night the S.S. Okanagan arrived rather late, in fact so late that it did not arrive at all that particular night, it being 2 a.m. before she whistled. She left Peachland at about 6.10, and near Squally Point a heavy wave struck her broadside on, and dislocated some of her internal arrangements, and she was beached at a cove nearby till repairs could be made with the aforementioned result. Rolling home at 2 o'clock in the morning does not sound well for such an old stager as the "Okanagan"—and at the beginning of the year too!

SAY!!! Mr. Landless Man. There are thirty-five million acres of cultivatable land in British Columbia. Don't that make you feel that you are not in the game? Be wise and start the New Year right by getting in right and the right place to get in right is at Watson's Realty.

**FYFFE-TILY.**

On Monday last at the Anglican Church Pen-  
ticton James Fyffe and Elizabeth Tily both of  
Summerland were united in bonds of holy  
matrimony by the Rev. Mr. Cleland. The  
wedding feast was held at the home of Mr.  
and Mrs. Dan Williams Penticton. Several  
Summerland guests were present. Mr. and  
Mrs. Fyffe have taken up their residence in  
Peach Valley. The Review joins with their  
many friends in wishing them a long and  
happy life

**AGRICULTURAL ASSOCIATION.**

The annual meeting of the above associa-  
tion was held in the Council chamber on Mon-  
day last at 7.30. Annual reports from the  
President and Secretary-Treasurer were sub-  
mitted, and the following officers were ap-  
pointed: President, C. J. Thompson. Vice-  
President, D. H. Watson. Secretary-treas-  
urer, R. Pollock. Directors, Messrs. J.  
L. Logie, H. C. Mellor, and J. M. Suther-  
land.

**ANNUAL MEETING OF THE FARMER'S  
INSTITUTE.**

On Tuesday evening last, the annual meeting  
of the Farmers' Institute was held.

Whether it was owing to the fact that the  
meeting called by the Council had absorbed  
all the interest in the community, or whether  
interest is lagging in the welfare of the dis-  
trict, it is difficult to say, but ten at the  
annual meeting of such an important institu-  
tion as this is a very poor showing, especially  
out of a membership of 123. Mr. Thompson,  
the president of the institute, occupied the  
chair.

The secretary, in his report, made mention  
that during the year, nine meetings had been  
held, which included two lectures on bees, one  
on spraying and pruning, Messrs. Scott and  
Metcalf occupied another evening, and Messrs  
Thomber and Melander also lectured during  
the year.

The financial statement showed a balance on  
hand of \$89.90—truly a healthy state of aff-  
airs for so young an institution.

Mr. Brown asked if anything had yet been  
done in regard to the marketing of the forth-  
coming crop, and if the fruit growers were  
prepared to support yet another packing house  
if such an one were to be opened up in the  
district.

In regard to the meeting of Mr. Samson, it  
was decided to leave this in the hands of the  
president, who would be meeting him at the  
convention in Victoria.

The following office-bearers were appointed:  
Pres. C. J. Thomson, Vice Pres., J. R.  
Brown, Sec. Treas., I. B. Fulton, Directors:  
Messrs. Fetherstonhaugh, Lewes, Mellor, Tate  
and Clouston.

This was all the business.

Major E. E. Hutton, who writes us from  
Del Monte, California, requests us to thank  
all those who so willingly assisted at the re-  
cent fire at his residence, believing that had  
it not been for their timely help, his residence  
would have been in danger of complete des-  
truction.

Or better yet, call and see us.

**UNRIVALLED IN ITS BEAUTY,** its location, and the excellence of its  
soil, is our new fruit land proposition  
on the west shore of Dog Lake in the sunny southern Okanagan Valley.

Here fronting on one of the finest inland sheets of water, with a full eastern exposure, and on  
which the sun shines forth in all its glorious splendor, are to be found hundreds of acres without  
stones, without timber, without alkali. Here the most punctilious fruit grower can be satisfied in  
the way of orchard land. One of the great outstanding features is that all irrigation and domestic  
water supply will come through a pressure pipe system.

**DOES SUCH A PROPOSITION APPEAL TO YOU?**  
If it does write us and we will only be too glad to give you all the desired information

### A VEXED QUESTION

Tuesday's meeting of the ratepayers leads us to believe that it is not the expenditure of the municipality during the last twelve months, nor yet their policy in regard to the various departments that were the chief sources of interest, neither were they the subjects on which the feeling of the meeting was most decided. It seemed to centre around the track at the wharf; whether it should be allowed to cross the road. We remarked editorially whilst this work was in progress, about the condition of the road at that particular time, and said that it was in an undesirable state of upheaval. Since then the wharf has been opened for service and is now in every day use, and if anyone cared to travel that way a few times during the busy part of the day, he would probably form some idea as to whether the side track would or would not be desirable at that particular point. We all know that the placing of the warehouse and the wharf so near to the road was a mistake, an error of judgment on the part of some person or other; who, it is impossible to say; but certain it is, that if a side track were placed across the road, a team would be required to haul cars along it from the wharf. This being so, the cost of hauling would be no more if the cars were kept on the lake shore than if they crossed the public road. A track could be made between the present slip and the road running north to Peach Orchard, by making a V connection on the track between the present warehouse and the packing shed.

This plan could be easily worked. The initial expenditure required for this would be much greater than that proposed at present; but even so, the upkeep and expense of moving cars would be no greater, the public highway would not be obstructed or made unsightly; the railway officials would have the line on their own property, so that it could not be moved at the will of the ratepayers as would be the case if the track were laid along the road, unless a by law were passed giving them

full powers to use the road in this manner.

In view of this, it would seem that if such a track is absolutely indispensable—and it would certainly be a desirable improvement—then the one along the shore, parallel to the slip would be the more desirable, less inconvenient, and more easily worked, because a loading platform could be built between the track and the road, which would in itself be a boon, both to the railway company and to those shipping goods in by the carload; for by this means the goods could be dumped on the platform and the car returned at once; and there would be no waiting for the shipper's particular turn at unloading, as there would be ample room for at least eight cars on this track.

### FARMERS' INSTITUTE'S WORK.

The annual report of the Farmers' Institute has just been issued. It contains a great amount of information, and shows how valuable has been and is the work done by the Institutes. One of the very interesting reports is that of Mr. John Craig, professor of horticulture at Cornell University. Speaking of his trip through the Okanagan, and his observation at Summerland, Mr. Craig says:

"This deservedly noted peach district presented a number of interesting conditions. The growers appear to be an enthusiastic unit in promoting fruit culture. In the management of their orchards, it was noted that the practice of using peach trees as fillers in apple orchards was not at all uncommon. My own judgment in regard to this is that it will not work out satisfactorily in the long run, for the reason that the cultural requirements of the two crops may sometimes run contrary to each other, and at the distance the trees are now being set it is probable that those set for permanent growth will be seriously crowded before the peach fillers have reached a condition of comparative inefficiency. I believe that, in general, the stone fruits should not be mixed with the pomes in commercial orcharding. The question arose in my mind also as to whether some of the trees in the lower lands of the inner valleys were not suffering from the excess of alkali. Experiments might probably be instituted with profit to the growers to ascertain the accuracy of this observation, and which might also lead to the correction of the difficulty if it were found to be correct. It is to be remembered on the other hand, that under moisture-controlled conditions, it is possible to treat the two crops more nearly alike than under natural conditions.

The question of varieties of peaches is a live one in this district. There seems to be a prejudice against the white flesh varieties. This apparently arises out of the attitude of fruit-dealers. Inasmuch as such varieties as Carmen and Belle of Georgia are reliable producers, and have recently become popular in eastern markets, it would be well at least to investigate their adaptability to the region and their value as possible substitutes for some of the less valuable kinds which are now being cultivated. It should be remembered

that home markets can always be educated to accept good orchard products.

Summer-pruning of the peach and apple is receiving considerable attention, but is being practised in a variety of ways. There is abundant opportunity and a real need of experiments leading to the establishment of a uniform practice founded on sound basic principles. Problems of irrigation are liable to arise here which will require careful study in the not distant future."

### HUMOR RECORDED IN PATENTS.

The little boy who wrote a letter to Santa Claus asking him to "please send a rooster, the hens is lonesome" was quite as practical as many poultry breeders with a hobby. While most anyone will admit that everybody should have a hobby, practical poultrymen are agreed that hobby riding in the poultry yard, if persisted in, will lead to an empty pocket-book and sleepless nights. At the same time, there is no industry, not excepting the fruit industry, which ensures more certain profits than that of poultry raising. And many of the smaller and more advanced agriculturists in the Okanagan are making this discovery.

It will be interesting to these men to learn of the many queer inventions patented to bring joy to the hearts of poultry raisers and ducats to the pockets of the inventors. In the Scientific American some of these inventions are illustrated.

One Jeremiah Cory, a "man from Missouri," as early as 1870, patented a device which showed his remarkable inventive genius. Cory tried to keep bees and poultry—a very profitable combination. The bee-moth, which works only at night, wrought havoc with his bees. And so Cory provided his hives with sliding doors and connected the doors with each other and with the hen roosts by means of a system of links and levers. It was all so well worked out that his hens acted as protectors for the bees at night. Early to bed, early to rise is the motto of both bees and poultry. And the bees retire first. After these Missouri bees were all in bed the hens would mount their roosts and thereby close the hive doors, locking the bees in and the moths out. In the morning, when the hens left their roosts, the doors of the hives were automatically opened releasing the bees bright and early for their days work.

But here is a real classic among curious inventions. The patent was granted to Sanford J. Baker, of Waterville, Ne., in 1871. Baker's device was to keep chickens from working in a garden. It consisted of a piece of spring wire, bent double, with a clamp at the bend. This was secured to the hen's leg, leaving the two ends of the wire extending for some distance backward and slightly downward. Not only would this hinder the fowl from scratching, but the spring arms would force her forward at each scratch. If the hen was persistent enough, the device would compel her to walk out of the garden against her will.

Many patents have been granted on devices to keep the fowls free from insects; also various dusting receptacles; and another device

## The Summerland Review

was patented by C. C. Schild, of Iona, Mich., which prevented the fowls from carrying on the pernicious practice of feather pulling. Another inventive poultryman, a gymnastic hobbist, by the way, evolved an ingenious device for making hens exercise. Wm. J. Manley, of Erie, Pa., has a treadmill which may be adjusted according to the weight and agility of the bird. By going fast enough, using both legs and wings, the bird eventually reaches the food, but must keep going in order to keep near the food. The inventor has failed to utilize the waste energy in getting the eggs to market.

Every poultry man has at one time or another been troubled by having an egg-eating hen in his flock. E. J. Hanahan, of Tribes Hill, N.Y., has solved the problem. He connects an egg with an electric battery, and places in such a position that the hen in order, to get to it, must stand on a metal plate, which at once closes the circuit. One shock will either kill or cure the hen.

Charles A. Harper lives at King, Texas, and has patented a hen coop to fit conditions there. The same is said to be very popular "away down South in Dixie." The coop is mounted on a lever like the old oaken bucket. The whole coop is lifted off the ground, and at the same time the door automatically closes. When the lever is locked in position the occupants are safe for the night. We have not heard of any of the Summerland poultry men adopting anything of this type. If a modified device could be evolved along these lines to guard the orchards it might help some.

But the most remarkable device of all the queer poultry inventions is that patented by one Andrew Jackson, Jr., of Munich, Tenn. The Junior Jackson has seen the need of spectacles for chickens. These spectacles are designed, not to cure astigmatism and near sight in the hen, but rather to protect the eyes in encounters with other chickens. The patentee makes it clear when he himself says: "This invention relates to eye protectors, and more particularly to eye protectors designed for fowls, so that they might be protected from other fowls that might attempt to peck them.

As a result of this article on poultry inventions, we do not anticipate that any of our poultry men will be inspired to "go and do likewise."

### BETWEEN ME AND HANK

It is a significant fact that nearly every university in the land is teaching its scholars to study well "the new thought religion" — a term which signifies something but really means nothing, for what is known as "new thought" is as old as the mountains. Most people who do not know what this "new religion" is are blinded by prejudice and will not see in it any good therefore cannot know anything about it. Just as the parson who preached a sermon on "Why I Am Not a Christian Scientist," believed all he said—and meant it—but did not know what he was talking

about. Orthodox religionists still frown on these modernized old philosophical teachings, and Dr. Dille has asserted that "faith is better than sight, and much better than reason." Just as if sight and reason were not as much God given as faith! It is merely a difference of where one pins his faith. The "new" thinker believes in God, but he believes in God in every man. The old style religionist has faith in God in one Man and the devil in the rest. The "new" believer pins his faith to the God in everything, the moving principle behind everything. The old style religionist pins his faith to the traditions of the church. The church immovable—founded on a rock. Humanity moves forward. The church stands still. The church gives way slowly to modern thought. It has always done so, and always will. It follows where it should lead.

### WHAT A DECADE HAS DONE.

There is one phase of Canadian development which the story of a decade brings out very prominently. On January 1, 1901, there were half a dozen cities worth talking about—centres of development. Today there are a score. Ten years ago Winnipeg was just emerging from the fur-post era with a forty thousand population, plank sidewalks, and for the most part, wooden buildings. Vancouver was an isolated seaport town—a city only by statute and in the promise of things to come. Victoria was mainly a big residential town. Edmonton had a 2,000 population and no railroad. Calgary was still a big cow-town with a few sandstone blocks. Regina was a huddle of wooden houses in a sea of treeless land. Saskatoon was a temperance village with a train three times a week. Medicine Hat knew nothing of the gas in its basement. Fort William and Port Arthur were a pair of stopping places half asleep on the edge of Lake Superior. Brantford was a small market city, and Ottawa had not yet discovered Chaudiere horsepower.—Canadian Courier.

A brief financial statement of the receipts and disbursements in connection with the champion car of Jonathans shown at Vancouver from Kelowna was made last week to the Board of Trade of that town. The following is a summary:

Expenses.	
Cost of car of apples, 600 boxes	\$1,537.50
Expenses taking car to Show	409.70
	<hr/>
	\$1,947.20
Receipts.	
First Prize Grand Sweepstakes	\$1,000.00
Proceeds of car, sold to F. Stewart & Co.	1,500.00
	<hr/>
	\$2,500.00
	<hr/>
	1,947.20
	<hr/>
Cash Balance	\$552.80
and a gold medal value \$100.	

On Friday last, at the Men's Club, the Merry Musicians held sway. This company came under the Walker auspices, and gave a splendid evenings program. Mr. Echardt was the chief artiste and he was well supported. The audience was not so large as we have seen, but was none the less enthusiastic, and the executive of the Mens Club is to be congratulated on providing such a series of entertainments as those brought under their auspices.

## Kaleden Comments.

The Christmas season has been a happy and joyful time for all our people here; not a discontented or dissatisfied word or look has been in evidence. Everybody seemed determined to try and give somebody else "a good time," and succeeded therein wonderfully well, for in blessing others they themselves were blessed. This beautiful spirit of the Master is delightful to find so universally, for even in this sacred season, only too many are found to be most selfish in the enjoyment of their passing pleasures, fearing that intruders may mar their happiness. This spirit of Christian good fellowship augurs well for the future of our town. Some of the down town families very generously arranged to look after all bachelors away from their homes, and so planned that these lucky young men came in for two or three Christmas dinners and accompanying hospitalities that week end. So well were they looked after that it is not improbable they now think that bachelorhood is still the ideal life!

In a passing reference to the very successful social organized by the ladies, which took place on Friday evening December 23rd., it was to be regretted that Miss Melville, who took such an active part in the preliminary arranging, was unable to attend, owing to her mother requiring her constant care and attention. Rev. F. W. Avauche just before leaving, expressed keen satisfaction and warm thanks on behalf of visiting friends for the enjoyable evening they had spent with us, and hoped that was the first of many more socials yet to come. Hearty thanks too, were due to Mr. S. M. Pitman, the Company's cook, who materially assisted in the refreshment department.

The following visitors stayed in our midst this Christmas: Mr. and Mrs. B. Hatfield and family, Summerland, and Mr. and Mrs. Block,

Naramata, guests of Mr. and Mrs. Seaman Hatfield. Mr. Ralbh. Wolverton and sister Gladys, from Spokane, and Mr. F. A. Williams Summerland, guests of Mr. and Mrs. O. E. Tomlin. Mr. J. L. Hatfield (Summerland) spent the night of the 26th. here. On the 27th. Mr. J. McGraw and Mr. G. Robertson, from Glasgow, Scotland, are here and intend to make their home. Mr. McGraw recently bought property on the benches, and will build a house shortly; his wife and family will leave Scotland and join him here next April.

On Christmas Day, at the close of the afternoon Baptist Church service, Mrs. A. S. Hatfield, on behalf of herself and her husband, presented the Church with an individual communion service. Not only does this gift show great generosity but also much thoughtfulness, for as the Pastor remarked, it was something of which that church was badly in need, and his gratitude and that of the members must be accepted by what they felt rather than by what they could say.

On the 29th. Mr. George Purvis left for Vancouver, the date of his return being uncertain. He has completed the shell of his house overlooking the lake. The same day a south wind brought up a sudden thaw which threatened to carry off all our snow; night fall however, brought a return of frost. On the 30th. the sun shone brightly all day long in a beautiful blue sky suggestive of the return of spring, but surely not so soon before some of us have even bought our skates?

On the 31st. the wind which had been blowing from the south changed round and towards evening blew strongly from the north. Messrs. Hatfield & Co. with some assistance succeeded in putting a float under the gasoline launch "Kaleden" and with the aid of a team and cable, drew her practically ashore. She will remain in dry dock for the winter.

## :: Naramata Notes ::

Mr. F. H. Rounds was down to Penticton on Tuesday on business.

Mrs. F. Goodman, of Summerland, spent Friday of this week in town, the guest of Mrs. Boothe.

The folks living in Naramata whose birthdays occur in January purpose giving a party during the month. 'Nuf said for the present. Lets just say "continued in our next."

Mr. and Mrs. Wolstencroft have moved into their spacious new house. They have sold their tent to Mr. Nuttall who has already removed it to his own property near Mr. Block, Sen.

At the New Year's ball elsewhere spoken of, a letter from Mr. Fred Manchester formerly an active member of the Athletic Club, was read by Mrs. Gillespie, expressing regret at his unavoidable absence.

Let us have light, and behold there is light—electric light too, of the right kind. The night of the big concert in the Opera House was made the occasion for the first demonstration. The work of completing the various lines is being pushed forward with energy.

A party of surveyors working in the interests of James J. Hill's Kettle Valley road have a camp established near town and are working toward Penticton. It will not be so very long the wise ones say till we have another wish gratified. Hasten the day!

The road leading up through Aitken's gulch is being widened in order to allow the traction engine operating for the lumber company to travel safely up and down with its heavy load of logs. Mr. W. Nuttall has the work in charge.

The concert put on the stage at Naramata on Thursday evening December 29th. was by far the finest program of a mixed character ever presented here, and there have been several excellent ones in the past. To mention the various participants who so ably contributed towards the evening's enjoyment were vain, as there were in all 32 numbers. Yes Sir! Thirty two numbers! And had you been there you would have stayed till the curtain dropped for the last time. Among the choruses possibly "The Crazy Jays" and "Silver bells" stood out most prominently. Amongst the juvenile aspirants for glory there were several who made decided hits. Of these Master Malcolm Walters, who did the summersault act in the "Yama Yama Man" chorus, little Miss Maragret Mitchell, who sang as she never sang before, also Ralph Boothe, another five year old soloist, besides Alice Myers who told a secret about the holes in her pocket; these and others came in for a big share of praise. Snata Claus was there too, with his little boy, and hurried away leaving everyone glad and relieved. It were well if the whole world got as good a helping from this much talked of individual. At the close a vote of thanks was tendered Mrs. Gillespie who trained

the performers and who so ably conducted the entire proceedings to so happy a conclusion.

The fourth annual ball of the Naramata Athletic Association was held in the Opera House on Monday evening January 2nd. There was a very large attendance, some 75 dancers, and quite a number of spectators being present. The Christmas decorations had not been disturbed the stage being turned into a whist room, and this was well occupied during the evening by the non-dancers. The costumes of the ladies were noticeably handsome, and it would be hard to find a prettier bevy of young ladies than that which graced the ballroom. The music was supplied by Mrs. Boothe, Mr. Walters, and Mr. R. Boothe, and many popular airs were played during the evening. Naramata is to be congratulated on possessing such musical talent. Mrs. Boothe was tireless in her efforts to please, and graciously responded to the many encores.

A special ferry brought a few friends from Summerland in addition to those who came on the Okanagan.

During the intermission supper was served by the ladies of the Unity Club, Mrs. Wells having charge of the committee, and the refreshments served were unusually dainty and plentiful. The boys of the Athletic Club assisted in the serving.

Dancing continued until 2 a.m., when all joined in singing "Auld Lang Syne."

Three cheers for B.C. and her wonderful apples! We have all heard how our beloved province has won success on every hand, in the great Horticultural Shows in Great Britain; it is also interesting to know what the private individual quietly sampling several varieties for himself thinks about our fruit. Your correspondent sent four boxes to friends in England in the special car from Vernon on November 2nd. last. Acknowledgements have come from all, loud in their praise of this product, warmly commending colour, flavour, uniformity, firmness, pack and general appearance. One writes: "How can you obtain such a rich red colour all over the apple?"—(referring to Jonathans and Spitzenbergs). Another, a prominent business man in Manchester, writes; "They are beautiful both as to appearance and taste, and all I can say is, if you can grow fruit like this, at a reasonable price, there is an unlimited market for it. I do not remember ever having tasted an apple I liked better. (Jonathan.) The fruit travelled very well and if you could send us another box and charge market price for them F.O.B. to Worsley I will remit to you." The same writer adds "Thanks for the Canadian Pictorial which is a new paper and gives us a good insight into Canadian life."—Kaleden Cor.

About thirty young people of Summerland went to Penticton last Tuesday evening as guests of the Union Young People's Society of that place. The hosts of the evening had provided a musical program and refreshments for the entertainment of their visitors and a very pleasant evening was spent together.

Peach Orchard, Summerland.

SUMMERLAND MUNICIPALITY.

The list of Electors for 1911 has been posted in the Council Chamber. The council will sit as a Court of Revision on Saturday, January 7th, 1911, at ten o'clock a.m. to finally revise said list.

J. L. Logie, Clerk.

MUNICIPALITY OF SUMMERLAND.

Public Notice is hereby given to the electors of the Municipality of Summerland that I require the presence of the said electors at the Council Chamber, Summerland, on the ninth day of January, 1911, at 12 o'clock noon, for the purpose of electing persons to represent them in the Municipal Council as Reeve and Councillors, and in the Municipal School Board as Trustees.

The mode of nomination of candidates shall be as follows: The candidates shall be nominated in writing; the writing shall be subscribed by two voters of the Municipality as proposer and seconder, and shall be delivered to the Returning Officer at any time between the date of the notice and 2 p.m. of the day of the nomination, and in the event of a poll being necessary such poll will be opened on the Fourteenth (14th.) day of January, 1911; at the Council Chamber in Summerland, of which every person is required to take notice and govern himself accordingly.

The qualifications for Reeve, Conucillor and Trustee are as follows:

The qualification for Reeve shall be his being a male British subject, and having been for the three months preceding the day of nomination, the registered owner in the Land Registry Office of land or real property situate within the Municipality of the assessed value on the last Municipal or Provincial Assessment Roll of Five Hundred Dollars, or more, over and above any registered judgment or charge, and being otherwise qualified as a voter.

The qualification for Councillor shall be his being a male British subject and having been for the three months next preceding the day of his nomination the registered owner in the Land Registry Office of land or real property situate within the Municipality of the assessed value on the last Municipal or Provincial Assessment Roll of Two Hundred and Fifty Dollars, or more, over and above any registered judgment or charge, or being a homesteader, lessee from the Crown or pre-emptor, who has resided within the Municipality for the portion of one year immediately preceding the nomination, and who during the remainder of the said year has been the owner of the said land of which he was formerly the homesteader, lessee from the Crown or pre-emptor, and who is assessed for Five Hundred Dollars, or more, on the last Municipal or Provincial Assessment Roll over and above any registered judgment or charge, and being otherwise qualified as a voter.

The qualification for Trustee being any person being a householder in the School District, and being a British subject of the full age of twenty one years and otherwise qualified to vote at an election of School Trustees in the said School District, shall be eligible to be elected or to serve as a School Trustee.

Given under my hand at Summerland, this thirtieth (30th.) day of December, 1910.

J. L. Logie,  
Returning Officer.

WANTED—by the Bank of Montreal, Summerland a boy for addressing and sorting letters running messages etc. and for cleaning premises.

## When Buying Roofing Ask Your Dealer This

How long has this roofing you recommend actually been in use?

The real test of a roof is in its wear.

And unless a manufacturer can show that his roofing has actually worn for fifteen or twenty years, his statement that it will do so is only guess work and therefore of no value. With

### RUBEROID ROOFING

we can give you proofs that roofs laid nineteen years ago are still in good condition.

When you are covering a building with Ruberoid Roofing you are not making an experiment. You know that your roof is of a material of proven durability. And remember also

There is ONLY ONE Ruberoid Roofing.

A weather-proof and fire-resisting roofing that contains no tar, rubber or paper---a roofing that will not rot, crack, melt or rust---a roof suitable for any building.

About 70 bachelors and friends partook of the fourth annual banquet provided for those young men who reside in our midst, and are yet without home ties. This year the supper was given by the united Young People's Bible Class of the Baptist Church, and was held in the College dining hall. Principal Sawyer acted as chairman, and the Summerland Band was in attendance and dispensed music in the intervals between the speeches. As in previous years, a very pleasant time was spent, and we are glad to see that this gathering appears to have become a permanent institution.

### RICH RED BLOOD.

You Will Never Have It as Long  
as You Have Dyspepsia.

Just as long as you have dyspepsia your food will not properly digest, and the nutritious elements in the food will not be extracted or absorbed, and impoverished or watery blood will follow.

This condition may not be apparent at first, but it will come just as sure as the sun will rise again.

Any stomach ailment, including all forms of indigestion, can be promptly cured by using Mi-o-na tablets, a scientific treatment unsurpassed.

It stops fermentation, belching of gas and taste of sour food almost at once.

The mighty power of Mi-o-na to invigorate and restore the stomach to perfect condition is known everywhere.

Mi-o-na cures by building up—by banishing the cause. For thin people it is a great flesh builder, because it causes the stomach to give more and purer nutrition to the blood. It cures sea and car sickness and vomiting of pregnancy almost immediately. The Summerland Drug Co. sells Mi-o-na for 50 cents a large box, and guarantees it to cure or money back.

## RATEPAYERS' ASSOCIATION.

On Friday last a meeting of ratepayers was held in the Schoolhouse, West Summerland.

There were about sixty present.

Mr. C. H. Cordy was appointed to the chair, and Mr. W. C. W. Fosbery acted as secretary of the meeting.

The object of the gathering was to consider the advisability of commencing a ratepayers' association in the municipality, and a constitution of the proposed association was read clause by clause. It was approved unanimously and an association was immediately formed, several coming forward with the annual fee—fifty cents—at the meeting.

The office-bearers were elected and are as follows:—

President C. H. Cordy.

Vice-president C. Fetherstonhaugh.

Secretary-treasurer J. Kirk.

Committee:—R. H. English, T. Garnett, Capt. Webb, T. Dale and A. Richardson.

The association will meet monthly, and the time and place of such meetings will be published in the Review.

The objects of the association are wide and extensive. "All for Summerland, and Summerland for all," may be used as the motto, as it is intended to get the community as a whole interested in the common good, to cement the various districts into one huge interested and patriotic body. To talk over matters of interest locally, and if any improvements or suggestions are considered of vital importance, then to lay them before the municipal council; education on the best lines of municipal education and talks on municipal affairs.

As will be seen from the foregoing the association is organized on the right lines and if rightly used, (and there is no reason why it should not be so), it will be an association of workers for the common good.

## THE POULTRY SHOW.

On Wednesday and Thursday of this week, in the Fruit Packing House, C.P.R. wharf, the first annual show in connection with the Southern Okanagan Poultry Association will be held. On Wednesday from 1 to 9 p.m. the show will be open and on Thursday from 10 a.m. to 9 p.m. There are altogether 10 classes divided into 79 sections, and in addition to the prize and diplomas awarded by the society, there are 20 special prizes.

There is every indication of a first class exhibition of birds and pet stock, and the show should help the chicken industry in the community to a great extent.

## NOMINATION DAY.

On Monday last, the nomination of the Reeve, and also of the councillors for the various wards took place in the municipal Hall. The nominations were received from noon until 2 p.m., and precisely at the latter hour, Mr. J. L. Logie read out the following list:—

Reeve James Ritchie.

Councillors.

Ward 1. J. R. Brown.

H. C. Mellor.

Ward 2. C. H. Cordy,

J. Steuart,

H. Dunsdon.

Ward 3. C. J. Thompson.

Ward 4. H. L. Lewes.

School Board Trustees.

G. J. Coalter White, S. H. Adams.

He declared Mr. James Ritchie as Reeve for the municipal year of 1911, Messrs. C. J. Thompson and H. S. Lewes councillors for wards 3 and 4 respectively, and Messrs. G. J. C. White and S. H. Adams as School Board Trustees.

In Wards 1. and 2, a poll would have to be taken, and this would be held in the Municipal Hall on Saturday the 14th inst.

Previous to the dispersion of the meeting, Mr. Logie spoke about the good work which the Ex-Reeve, Mr. R. H. Agur, had accomplished for the Municipality, and he thought it only fitting that some mark of appreciation should go forth from the meeting.

Mr. Hespeler proposed that such should be done, and Mr. W. J. Robinson seconded, remarking that seeing Mr. Agur had held office for three years, and the manner he had disposed of the various and arduous duties thereto attached, that such an appreciation should be heartily accorded. He was pleased to hear that Mr. Ritchie had been appointed to that honourable office, as in every way he was fitted for the position.

The motion was also supported by Mr. Higgin in a few well-chosen words, and heartily carried.

Mr. J. M. Sutherland thought that this was an opportunity to propose a vote of thanks to the Council of 1910. Their labor had been heavy, and the care and attention bestowed remarkable. Their able services and the able manner in which the affairs of the municipality had been managed were more than worthy of such a vote of thanks.

Mr. Hespeler seconded this motion. Mr. J. R. Brown, on behalf of the Council, thanked the meeting for its vote of thanks, and assured them that it would be appreciated by the members of the council.

## NO BETTER INVESTMENT.

In proposing the health of the Hon. Price Ellison at a dinner in his honor in London, the Duke of Argyll referred to the fact that he had visited the Okanagan twenty-seven years ago, and speaking of this country, he said. "From the short experience of orchard and fruit culture, we may be very certain indeed that no British money can be better invested than in the fruit orchards of British Columbia."—Vernon News.

## "VERY FINE APPLES."

Mr. John Waddell, the well-known C.P.R. conductor, received from his fruit ranch at Summerland, B.C., one of the finest shipments of apples ever brought to this market. The shipment included Baldwins, Ben Davis, Jonathans and other varieties. The apples were perfect in every particular, large, smooth skin, beautifully formed and without blemish. —Brandon Daily Sun.

## GOING FOR SCOTCH LABORERS.

Mr. W. Stewart, of the firm of Foley, Walsh & Stewart, the contractors, for the mountain sections of the Grand Trunk Pacific Railway, which will represent an outlay of many millions of dollars, has left for Scotland to secure labor for the gigantic undertaking. There is very little labor available on the Pacific coast and public sentiment will not tolerate, neither will the Dominion or Provincial Governments sanction the importation of Asiatic labor. Mr. Stewart is hopeful of getting the 5,000 men he needs to build the road through the mountains. He says these men, accustomed to the mountains of their native land, will make first-class settlers after the road is constructed.

"They will cost us more," said Mr. Stewart, "than Asiatics would have done, but the railway and the country will have the advantage of 5,000 acclimatized settlers of the finest race the world has produced."

## NURSES' ASSOCIATION.

An effort is being made by the graduate Nurses' Association of Vancouver to organize all the nurses of the province for the purpose of securing an Act of Registration for which application will be made to the government of British Columbia. The object is to raise the standard of nursing in the Province and to protect the public from being imposed upon by nurses who are not properly qualified. The act is not designed to prevent anyone from engaging in the work of nursing, but simply to make possible for those employing nurses to distinguish between trained members of the profession and those who have not the requisite qualifications.—Povince.

## Peachland Paragraphs.

Mr. R. T. Hazlewood, representing the Oregon Nursery Co. was in town a couple of days this week.

Mr. L. D. McCall returned on Wednesday from a trip to Summerland.

Mr. Wanless of Penticton was in town on Monday looking over some real estate propositions.

Messrs. Ward and Bachelor have opened up a real estate office in town and are preparing to do a large business. They have an office in course of erection on Beach Avenue, and in the meantime are busy listing properties and getting ready to handle any business which may come their way.

Messrs. Eyre & Cutbill celebrated the completion of their new warehouse by giving a masquerade ball on Thursday evening of last week. Some very pretty costumes were worn and some which could not be commended for their beauty and artistic design. An orchestra from Kelowna provided the music, which was much enjoyed by the dancers. The remark was heard on all sides that all the members of the firm were excellent hosts, and they certainly spared no pains to see that every guest was made happy, with the result that the the function is voted one of the most successful ever held in Peachland.

Nominations for Councillors and School Trustees passed off very quietly last Monday. Four trustees were to be elected three retiring and one vacancy caused by the resignation of Mr. A. J. C. Clarence, who resigned to run as a councillor for Ward 3. Messrs. Grant Lang, John McLaughlan, and A. D. Ferguson were all re-elected by acclamation, while Dr. Buchann fills out Mr. Clarence's unexpired term. Mr. W. J. Garroway was elected Reeve, and Messrs. A. J. C. Clarence and Wm. Douglas in wards 3 and 4 respectively, were unopposed. Mr. M. N. Morrison is the only one of the old Council seeking re-election, and he is opposed in ward 2 by Mr. C. G. Elliott. In ward 1, Messrs. R. H. Houston and John Drought are the contestants. Thus there will be voting on Saturday in but two wards, 1 and 2.

Winnipeg.—Sir Harold Harmsworth, of London, Eng., was paid by Allan & Killam, \$3,000 per foot for 30 feet on Main street, close to Portage avenue.

Nelson, B.C.—Fred H. Harlett, a resident in the Slocan district for seventeen years, was killed Saturday at Silvertown by a snowslide from the roof of one of the buildings of at the Galena Farm mines. He was an ordained Congregational minister, but deafness had compelled him to leave the ministry, and for eight years he had been caretaker of the Galena Farm mines. It is supposed that while going between the buildings the snow came down and suffocated him, and he was dead when discovered by Frank Kennedy, his companion at the mines.

## THE BATTLE OF LONDON.

Six additional bodies have been found in the ruins of the house in London which was burned in the battle between the police and the anarchists within. That they were desperate men is evident from the fact that they were all armed with the latest pattern automatic revolvers and rifles. This brings the number of dead criminals up to eight. In addition, what the police describe as one of the most complete outfits for the manufacture of counterfeit coin, both British and foreign, was found, pointing to the conclusion that the men were members of a gang of international swindlers, and that this was their method of securing funds to carry out their murderous propoganda. A number of carefully constructed bombs were also unearthed. Some officials declare that a plot to kill King George has been discovered, but this theory is not backed by Scotland Yard. Fear is expressed in some quarters that the comrades of the dead anarchists will attempt to avenge the slaughter of their confederates, and that they will spare no pains to accomplish their infernal purpose. The foreign quarter of London is being closely watched and any such scheme will be nipped in the bud.

The Duke of Rutland presided at the annual festival dinner of the Cabdrivers' Benevolent Association in London and gave a warning to the taxi-cab drivers.

The Duke said that there were now in London 1,103 cabdrivers between sixty and seventy years of age, 190 between seventy and eighty, and six over eighty. "It is not impossible in the not remote future," he said, "that those who now flourishingly drive motor-cabs may be threatened with aerial cab competition. Those who make their living by driving public vehicles in the streets, may be called upon to drive aeroplanes in the future."

The hold-up man who tackled Mr. McKay of 2046 Glen Drive at the corner of the Drive and Eighth avenue, on Saturday night, found that his intended victim could go one better and ended the chance meeting by hoofing it for the tall timbers. Mr. McKay was on his way home when an unknown thug cracked him on the back of the head with the intention of following up the wallop by searching the wayfarers pockets but Mr. McKay had other views. He carried a walking stick and began using it on his assailant. A pitched battle ensued, which ended in the would-be hold-up-man executing a flank movement into the bush without stopping to go through Mr. McKay's pockets.—Province.

After making her usual trip to Penticton on Thursday night, the Okanagan returned to Summerland where she tied up for the night. Had she remained at Penticton she would have risked being frozen up tight by morning.

## FRUIT GROWERS IN CONVENTION.

### R. H. Agur Appointed President of Provincial Association.

Premier McBride in his address to the Fruit-growers Association of British Columbia at their convention in Victoria last week, said that the fruitgrowers had succeeded in bringing to British Columbia a reputation second to none as a fruitgrowing district. No territory had ever received so marked a recognition in a single line of production and the results of the horticultural shows held in Great Britain must be a source of gratifying pride to the fruit growers of the province.

The Premier paid a glowing tribute to the memory of the late Captain R. G. Tatlow, a man whose term as minister of Agriculture, he said, must go down in history as one of the most useful regimes in the executive of local government. His duties on his retirement had been taken up by the Hon. W. J. Bowser, who had shown himself a painstaking and capable official, while now the office was held by the Hon. Price Ellison, who would bring to his work a practical knowledge of conditions in the province.

The Premier had been informed by Mr. Ellison that in the commercial centres of the Old Country the fruit exhibited by the British Columbia Government had easily surpassed all its competitors. The government was exceedingly grateful for the many kindly and painstaking acts of the fruitgrowers who, at considerable trouble and expense, had managed to assemble together for shipment these exhibits. The work of the department seemed to have been highly successful in all parts of the Old Country.

The Premier expressed his keen appreciation of the growth of the Fruit Growers' Association which, he understood, since its re-organization at Kamloops last year had increased its membership from ninety to over three hundred.

It was the intention of the department of agriculture, next year, to establish twenty packing schools at different points in the province, and the services of two expert packers had already been secured.

The officers elected for the ensuing year were as follows:—

President, R. H. Agur, Summerland; vice-presidents, Messrs. W. C. Ricardo, Vernon, R. M. Palmer, Kamloops, and W. Summers, Gordon Head.

Directorate:—Victoria, W. Summers, Gordon Head; Nanaimo, T. A. Wood, Duncan; The Gulf Islands, W. N. Shaw, Gabriola Island; Lower Mainland, A. Unsworth; Lower Mainland (Chilliwack and west, south of the Fraser,) J. C. Metcalfe, Hammond; Lytton to Kamloops, (including Lillooet,) R. M. Palmer, Kamloops; Salmon Arm to Armstrong, F. D. Nicholson, Salmon Arm; Vernon to Woods Lake (including Coldstream,) W. C. Riardo, Vernon; Kelowna, Okanagan Centre and Westbank, T. W. Stirling, Kelowna; Peachland to Penticton, R. H. Agur, Summerland; Similk-

ameen, J. J. Armstrong; Keremeos; Kettle River, J. Rooke, Columbia; Arrow and Slocan Lake, T. O. Abriel, Nakusp; Nelson and Lower Kootenay, J. Johnston, Nelson; Kaslo and Upper Kootenay, J. W. Cockle, Kaslo; Creston and East Kootenay, Mr. Compton.

## TELEPHONE CONNECTION WITH KAMLOOPS.

One of the important works undertaken by the Dominion Government in British Columbia has just been completed in the forging of the final link in the iron circle of the Kamloop-Okanagan telephone system by the construction of a new telephone line between Kamloops and Vernon by way of Grand Prairie. In its completed state the government telephone line now runs in a full circle from Kamloops through Nicola, Hedley, Penticton, Kelowna, and Vernon back to Kamloops, with these six offices acting as connecting links. In addition there are three spurs, Kamloops to Little Fort, Nicola to Lower Nicola and Vernon to Lumby. Between Kelowna and Vernon there are both a copper metallic line used exclusively for telephone work, and a single iron wire for telegraph service. This telephone system is 973 miles around its entire circle and in all there are over 500 miles of wire including the spur and the second circuit between Kelowna and Vernon. This is the longest single iron wire telephone in the world.

Among the improvements in the near future will be a considerable amount of re-poling in the Otter Valley and Similkameen section and the construction of a second circuit of metallic copper between Kelowna and Penticton. The latter will give a copper metallic service between Vernon and Penticton, the busiest section of the system. The old iron wire will be used exclusively for telegraph work, thus relieving the work of the telephone between these points.

There are over fifty offices and agencies on this system connecting with the outside world, many points of which are at some distance from the railroad and whose only connection with the larger centres, apart from the telephone, is a mail service once a week.

The messages transmitted over the wires amount to nearly 5,000 per month. As a connection with a number of both government and private exchanges the wires are of inestimable value. The government line has its own exchanges at Hedley, Princeton, Merritt and Nicola, on which there are over 100 local telephones. The system also connects the three exchanges of the lake shore telephone at Summerland, Peachland and Penticton, controlling nearly 300 instruments. Connection is also made at Kamloops with the British Columbia system at Vernon, with the Okanagan Company's system and at Kelowna with Mr. Millies' private exchange for that city. The new line between Vernon and Kamloops was constructed under Mr. C. S. Sevens.—Province.

**:: Naramata Notes ::**

Mr. W. Armour has returned from a business trip to Calgary.

Chief Engineer McCullough of the Kettle River Valley Railway survey party was in town Tuesday. He reports excellent progress in the way of grades east of town, and the camp has been moved to Four Mile Creek.

'The Senior Folks' Whist club held its first meeting for the new year at the home of Mr. and Mrs. Cook on Tuesday evening. A very pleasant evening's amusement was the outcome. The party dispersed at 11 p.m., to meet in two weeks time at the home of Mr. and Mrs. Wolstencroft.

A large number of young folks spent a few hours on Thursday evening of last week at the home of Mr. T. I. Williams on the benches. The party was given in honor of Miss Orca Williams, a student at the provincial Normal School, who has now returned to resume her studies.

The ferry service has been somewhat irregular this week as a result of the heavy seas prevailing on the lake. A number of our citizens have found a trip to Summerland at this season a rather tedious and costly journey.

Those "January Birds" really mean business. There is to be a party gotten up by the folks of Naramata whose birthdays occur in this month of storms. The details for the gathering were arranged for at a meeting held on Wednesday at the home of Mrs. Gillespie.

**ANOTHER SPECIAL PRIZE.**

The Southern Okanagan Poultry Association has been offered a cup for competition at their annual show by Mr. Cutbill, of the firm of Messrs. Eyre and Cutbill, Peachland and Penticton. The cup will be called the "Eyre and Cutbill" Cup, and is offered for the largest and best exhibit in the show. It has to be won twice in succession, or three times, not consecutively.

The young people of the Epworth League of the Methodist Church spent a pleasant social evening in the Men's Club last Monday evening. This was another of a series of such entertainments given by this society, and it was a great success. A large number were present and enjoyed themselves during the evening with various forms of amusement.

The Vernon Okanagan has changed hands. Messrs. Lever and Avauche took over the concern some nine months ago, and although they have almost doubled the business in this period, yet, owing to a lack of capital, they have parted with their interests to Mr. S. Polson, of Armstrong. It is Mr. Polson's intention to change the name of the paper, and to make a number of important innovations.

**ASQUITH'S BOLD POLICY.**

Instructions just given to the leading departmental officials indicate the bold and almost sensational program upon which the Asquith government had decided. Realizing that their existence depends on Redmond and the Labour party, they are preparing to confront parliament immediately with their four most bitterly contested measures, which, they calculate, will firmly knit the coalition together. These four bills will be presented to the commons at the earliest possible moment in the approaching session in the following order: Removal of the Lords' veto; Irish Home Rule; abolition of plural voting and the Disestablishment of the Welsh Church. They look like a clever combination.

Mr. Balfour and Lord Lansdowne will, it is confidently believed, induce the House of Lords to accept the abolition of the veto substantially as the government propose.

The nonconformist and other Liberal opposition to Home Rule on the ground that it gives Rome domination over the Irish Protestants, will be assuaged by the Welsh disestablishment, which the English Free Churchmen regard as a necessary stepping stone to the disestablishment of the Church of England and Scotland. Moreover the abolition of pluralism and the adoption of the principal of one man one vote will, the government anticipate, hand over to the coalition thirty or forty Unionist seats in England.

**HON. PRICE ELLISON VISITS HOME  
OF MR. G. PARKER.**

While in England the Hon. Price Ellison had the pleasure of calling upon Mr. and Mrs. Harwood, the parents of our esteemed townsman, Joseph Harwood. They also visited the parents of Mr. G. Parker, of Summerland. The Hon. Cecil Parker is the son of Lord Macclesfield, and an uncle of the Duke of Westminster. Mr. and Mrs. Ellison enjoyed a pleasant visit at their home near Chester, and had also the pleasure of meeting the Duchess of Westminster, at Eaton Hall, the Duke's palatial residence, which is a short distance from Mr. Parker's home.—Vernon News.

### MORE POWER AND MORE LIGHT.

Last Wednesday evening, the electric light plant struck for want of power, the stream, pipe, inlet, or some connection therewith having frozen.

At the more recent meetings of the Council, the question of extending the system has been discussed—and left over each time. Seeing that the end of the year was so near, and their term of office expiring, there is no doubt but that the Council followed the wisest course. The elections take place today; and we would put it to the new Council that Summerland must go ahead with the times; her electrical plant must be increased. Although in its working the present plant has given satisfaction, it is inadequate, and out of proportion to the size of the district. How to go about it, is for the Council to consider, and in order to avert the re-occurrence of last Wednesday's happening, we would suggest that at an early meeting this matter be thoroughly gone into, and the necessary by-law drawn up and submitted to the people. If the by-law carries, the work should be carried through with the least possible delay.

### IN THE BLIZZARD BELT.

While we of the Okanagan were last week enjoying the sunshine, they were experiencing fierce blizzards in the Northwest, and the East was frozen up. The despatches tell of great suffering in the blizzard belt, and stories frequently come of the perishing of some poor unfortunate caught in the blinding snow.

The most pathetic of these reports comes from North Portal, Sask., where the blizzard of last Tuesday night caught Mrs. Samuel Turner and her twelve year old son on the prairie and they were frozen to death scarcely 150 yards from their home. The mother and son were returning from the stable situated but a short distance from the house when they lost their way. Nothing was known of their fate until the following morning when a neighbour found the two remaining children in the house shivering in the cold. The bodies of the moth-

er and son were found buried in the snow the next day. In her efforts to save her boy, the mother had wrapped him in her cloak.

When we read of these tragic deaths in the raging storm just across the mountains, we find it difficult to believe that there can be such a contrast in the weather conditions in sections separated by so few miles, and it is only such incidents as these that brings us to a realization of our advantages and a fuller appreciation of our sunshine and shadows.

### HON. PRICE ELLISON RETURNS.

At a luncheon given last week in Vernon the Hon. Price Ellison told of his experience on his recent trip to England. The purpose of his trip was to learn first hand what benefit we are deriving from the exhibits of fruit which the government has been sending for several years, and also to endeavour to work out some plan to bring population to this province.

One of the discoveries made by Mr. Ellison was the fact that there is an unlimited market for our fruit in England. But we shall find strong competition there as we have in the Northwest, for the apple growers of Oregon, Washington and Colorado, are even now well in possession of the market. He saw fruit from these states on display in every direction. He said that he had seen Winter Bananas from this province sold in London for a shilling each, and a nice little paper box containing six Spitzenbergs brought four shillings and six pence. One of the things that surprised the people of the Old Country was the manner in which our fruit "stood up." They could hardly believe that the apples shown had come 6,000 miles and had been handled several times on the railways and steamships.

### A NEW PERIODICAL.

Mr. Arthur Hawkes, chief of the publicity department of the Canadian Northern Railway, has resigned his position with the intention of starting in Montreal a weekly journal to be known as "The British News of Canada." The intention is to provide a link between the Englishmen in Canada and those in the Old Country, and particularly to bring before the intending emigrant reliable information regarding the opportunities and advantages that Canada offers, and to tell the true story of the success that people of the British Isles have achieved in the land of their adoption. The idea of such a publication as Mr. Hawkes proposes is not new, but never has the task been undertaken by one better equipped than he to achieve the purpose which he sets before himself.—Nelson Daily News.

### POUND NOTICE

A buckskin gelding branded  on left shoulder, hind feet white, has been impounded and unless previously claimed will be sold at the corral on my premises, on Saturday, Jan. 21 at 2 o'clock to defray expenses and in accordance with the provisions of the by-law governing stray animals.

Thos. Dale, Pound-keeper.  
Summerland, Jan. 5th, 1911.

### COMPLAINTS OF FRUITGROWERS.

Careless handling by inexperienced handlers; dirty and broken cars, which the growers often have to repair at their own expense prior to shipping; inequitable rates, onion and beer cars for fruit, smelling, according to Mr Pitcairn, "as if they had carried a consignment of cold storage Chinese from the Orient," were among the complaints the fruitgrowers in the annual convention last Friday, hurled at W. C. Bowles, general C.P.R. freight agent in B.C., and R. Helme, superintendent of the Dominion Express Company in Vancouver.

The two smiling wrath-appeasers, who occupied seats in the front row, would not have known there was a thing wrong, had not it been for Thos. A. Brydon, a member of the Victoria association, who, after J. C. Metcalfe had read his freight report, and the meeting was about to pass it for good and all, arose and said that the report was very empty, and a very poor showing for the freight committee.

Mr. Brydon gave courage to others, so that before the meeting closed, instead of the report being pigeon-holed, nearly half the delegate discovered they had some kind of a grievance. Mr. Brydon complained that whatever the causes, the grower got the worst end of it. Even in good consignments there was enough to pay the freight and the commission man; and what was left went to the grower and that it was often infinitesimal. He complained that the adjustment of freight rates on both freight and express were essential, and further complained of poor handling of berries in shipping. They were packed side up, and on arrival at Vancouver the grower would be unable to tell his own fruit.

Mr. Pitcairn complained of the cars and handling also. He also complained of the freight and express rates, and was followed by jobbers, growers and shippers all with a cry against the company in some shape or form.

As regards the express rates Mr. Helme and the chairman referred to the fact that the schedule had been taken up by the railway commission and that a new schedule would shortly be issued. Both Mr. Helme and Mr. Bowles promised to serve the shippers as well as possible, and to see that the cars were in order, and as far as possible, to see that fruit was properly handled in shipment. The complaints, they held, were individual; but Mr. Bowles said that explicit instructions were given regarding the cleaning of cars.

The railway men were accorded votes of thanks for attending and listening to the remarks of the delegates, and a freight complaint committee is to be appointed.—Victoria Times.

The ladies gymnasium class in connection with the Men's Club were formed last week, and proved to be well attended. The evenings for ladies are Tuesday, Thursday and Saturday, and the classes are open to any young ladies in Summerland.

## THE COUTEAU TRAM PROJECT.

G. A. Henderson, manager of the Bank of Montreal, Vernon, and A. E. Ashcroft, C.E., returned on Tuesday from Montreal, where with R. H. Agur, they had spent several weeks in connection with the Couteau Power Company's projected tramway. This scheme has been under way for some time, and its accomplishment would be of inestimable value to this district.

In an interview accorded the Vernon News by Mr. Henderson, it was stated that there is every probability that the project will be carried to a successful issue at an early date.

"We are authorized to state," says the News, "that the matter was thoroughly investigated by the Montreal financial interests who were approached by the gentlemen from the Okanagan, and that such assurance was given as to bring Messrs. Henderson and Ashcroft home with the feeling that their mission had been a success. An engineer is expected out shortly and upon receipt of his favourable report in Montreal the necessary capital will be at once forthcoming.

The construction of the tram line from Vernon to Lumby is only the first step to be taken in developing this scheme, and it is intended as soon as possible to extend it to Kelowna and other points in the Valley. Power for electric light and other purposes will also be disposed of by the Company, and as cheap power is one crying necessity of the district, much active manufacturing development will follow the inauguration of this scheme."

The annual meeting of the Board of Trade will be held on Tuesday next, in the Council Chamber, Summerland, at 3 p.m. It is hoped that all members will be present.

## C. H. CORDY WITHDRAWS FROM THE CONTEST IN WARD TWO.

Since going to press with the front page, we have received the following letter from C. H. Cordy  
Editor Review,

Sir—Through the medium of your columns I wish to inform the ratepayers of Ward Two that I have withdrawn my name from the list of candidates and would beg all those who had decided to support my candidature, to transfer their vote and interest to Mr. H. Dunsdon, who, like myself was proposed and seconded by voters in the ward and at a ward meeting.

Yours truly,

Chas. H. Cordy.

P.S.—My office will be at the service of Mr. Dunsdon as a committee room on election day.

**FOR SALE**—English Baby Carriage. Cost \$50.00. Very little used. Will accept \$22.50 cash. Apply the Review Office.

**WANTED**—A medium sized safe. Particulars and price to the Lake Shore Telephone Co.

## WARD FOUR RATEPAYERS MEET.

A meeting of the ratepayers of Ward 4 was held at the residence of Mr. O. F. Zimmerman, on the evening of Thursday, January 5, for the purposes of forming a Ward Ratepayers' Association, and nominating a councillor to represent the ward on the new Council.

Mr. Fenner was appointed to the chair pro tem, and in a few words laid the object of the meeting before those present.

It was decided to form the Ratepayers' Association of Ward 4, and Mr. R. Johnstone was elected the first president. Mr. Fred Neve was appointed secretary-treasurer.

A discussion followed as to the raising of a fund to cover running expenses, and it was finally settled by the following resolution, "Each member to be charged an annual fee of 25 cents per year." Upon the understanding that Mr. J. R. Brown had decided to retire from office in Ward 4, the name of Mr. H. S. Lewes was presented as the most desirable successor of Councillor Brown. Accordingly, a resolution was carried nominating Mr. Lewes as a councillor for Ward 4.

In a few words Mr. Lewes thanked his friends, and said that he was sorry to see Mr. Brown leave the Ward for his earnest efforts had always been in evidence for the good of his district, and he hoped that his own efforts would show a similar deep interest in the public welfare.

The meeting decided that Messrs. Zimmerman and T. J. Garnett nominate Mr. Lewes in the regular order on January 9th.

It was also decided that the Review be requested to publish a report of the meeting.

After a vote of thanks to Mr. Zimmerman for the use of his house, the meeting adjourned.

The association is anxious that all ratepayers in the Ward become members, and the secretary-treasurer is authorized to receive the names and fees of those who wish to join.

## SPROUTING OATS FOR POULTRY.

An excellent green food for winter feeding. —Take a quantity of oats and soak them in water for twelve hours. Then pour off the water and put the oats in an ordinary box which has holes in the bottom to let the water drain off. Moisten the oats morning and night. As soon as they begin to sprout they should be spread out to a thickness of about two inches and still continue to water them morning and night. In about ten days, depending how warm the room is in which they are kept, they will be ready to feed. By this time the oats will have sprouts about six inches in length and a good sod will have been formed. —Poultry Magazine.

The Summerland Skating Rink was opened on Thursday night. Free skating was granted to celebrate this event, and also on Friday night. Season tickets for this convenient skating rink are selling at \$3.50, and single tickets at 25 cents. There is no doubt but that this popular pastime will be patronized more than ever.

**"GRIMES' GOLDEN."**

Where is the stately Mr. Grimes, the noblest man of modern times, whose apple soothes and pleases? He surely is a cracker-jack; I'd like to pat him on the back, and hold him on my knees. I'd like to fold him to my breast, and say: "our apple is the best that ever grew and ripened; I think so much of you that I would share with you my pumpkin pie, my taxes, or my stipend. O let the good old name of Grimes be sounded by the evening chimes, and blazoned on the hearings; his apple drives dull care away, and makes each heart seem light and gay down here where I am boarding. O let the noble name of Grimes be handed down to future times, embalmed in song and story; his apple cheers, inspires and thrills, incites to splendid deeds, and fills our boarding house with glory. 'Twould be the foulest of all crimes if never more the name of Grimes should be on earth paraded; for he has brought a new delight—an apple that the gods would bite—and has old Burbank faded. O Grimes, I lack the poet's speech, or I would tell you what a peach you are, you dear old lummix! You've poured some balm upon our smarts; you've surely reached the people's hearts, and reached them through their stomachs!—Walt Mason.

**NEW MAP OF BRITISH COLUMBIA.**

A new map of the Province of British Columbia has been issued by the Department of the Interior, Ottawa, which will assist in meeting the demand for complete and up-to-date information. This map, which is on a scale of 35 miles to the inch, shows not only the whole province, but portions of each of the following:—Yukon and the North West Territories on the north, Alberta on the east, the United States on the south, and Alaska on the west. All information of a general nature, which the scale will admit of, is shown, including railway stations and all important points.

The boundaries of the Dominion Railway Belt and the Dominion Land Agencies into which it is divided, are clearly shown. All townships and range lines of the Dominion Lands system of survey, with corresponding numbers, are shown in this district. The Dominion Electoral Divisions throughout the province are also shown. All railways in operation and the Grand Trunk Pacific as located are shown. The Yukon Telegraph line can be traced on the map all the way from Ashcroft to Dawson City in the Yukon. Single copies of this map will be sent free of charge on application to the Chief Geographer, Department of the Interior, Ottawa, Ontario.

The following schedule for basketball matches between the teams of the Men's Club and Okanagan College has been drawn up:

- January 20 at College.
- 27 at Men's Club.
- February 4 at College.
- 17 at Men's Club.
- 24 at College.
- March 3 at Men's Club.

A junior game between the same clubs will be played as a preliminary to each senior game. All matches commence at 7.30 sharp. Pennants will be awarded to the successful team. These games should prove interesting as both clubs have new material to choose from.

Miss Robson left on Monday morning on a visit to friends in Vernon.

The regular monthly meeting of the Women's Institute will be held in the Parlors of the Men's Club, on Friday next, at 3 p.m. Subject:—Biscuits and Buttonholes. Rather an interesting subject, and a mere man is wondering how it will be dealt with, probably the biscuits will be awarded to the maker of the best buttonholes. The sewing of buttons would make a good competition for a Bachelors' Institute.

### RICH RED BLOOD.

You Will Never Have It as Long  
as You Have Dyspepsia.

Just as long as you have dyspepsia your food will not properly digest, and the nutritious elements in the food will not be extracted or absorbed, and impoverished or watery blood will follow.

This condition may not be apparent at first, but it will come just as sure as the sun will rise again.

Any stomach ailment, including all forms of indigestion, can be promptly cured by using Mi-o-na tablets, a scientific treatment unsurpassed.

It stops fermentation, belching of gas and taste of sour food almost at once.

The mighty power of Mi-o-na to invigorate and restore the stomach to perfect condition is known everywhere.

Mi-o-na cures by building up—by banishing the cause. For thin people it is a great flesh builder, because it causes the stomach to give more and purer nutrition to the blood. It cures sea and car sickness and vomiting of pregnancy almost immediately. The Summerland Drug Co. sells Mi-o-na for 50 cents a large box, and guarantees it to cure or money back.

## THE POULTRY SHOW.

Southern Okanagan Poultry Association Hold Their First Annual Show  
Splendid Array of Birds Good Attendance Interesting  
Demonstration by Govt. Instructor R. J. Terry

During this week, the poultry fanciers and experts of the Southern Okanagan have been busy with their show. The packing shed near the wharf made a splendid and convenient building for this purpose.

The pens were arranged back to back, two deep, and in two rows, two hundred and fifty in all, and each one was occupied by one or more of the feathered tribe. A few turkeys, ducks and pigeons were exhibited, but by far the greater number of birds shown were the common or barnyard fowl. Perhaps it is conveying a wrong impression to say "common," for the birds were by no means common as regards their breeding, all being of prize-winning strain.

A walk around the pens emphasized the fact that the fowl breeders of B.C. are out for business. They mean business, and a chat here and there with one upon the different varieties, evinced the fact that although each one may have his own particular fancy as regards a certain strain, yet they are all of one accord in saying that "chickens pay."

This is the main thing—no matter if one keeps the birds as a business or as a hobby, or as a sideline in connection with the orchard, it is a proven fact that chickens are a paying investment. Of course they have to be attended to properly if results are required, but so also has the horse and cow, if you wish to make the most out of them.

The birds on show here were, on the average, exceptionally good. Mr. William Coats, of Vancouver, the well known poultry expert and dog fancier, who contributes oftentimes to the "Successful Poultryman," was the judge. He remarked that the Brown Leghorns were a very strong class, and one or two other varieties were also above the ordinary. Take the Silver Spangled Hamburgs—in this class birds scoring 92 out of a possible 100 points were not in the list of prize-winners.

Mr. J. R. Terry, who was recently appointed a Government Poultry Instructor for B.C. was present, and demonstrated with a government exhibit, and also gave information on the poultry business,—feeding, cramming, dressing, etc.

From Enderby, Mr. Pounds was present with a large exhibit, and Mr. Dawson of Peachland was also there with fifty birds.

The following is a list of the prize-winners:

Pekin Duck 1st H. Phinney.  
Pen 1st B. H. Sherk.

Owing to the special prizes not having been awarded before we went to press, this list will be published next week, also a few general remarks about the show.

## THE LECTURE

The squawk of the doomed fowl called the scattered crowd together on Thursday evening at the Southern Okanagan Poultry Show.

Mr. R. J. Terry, the government expert had consented to give a practical demonstration, and although only 24 hours notice had been given the public, a surprisingly large crowd was present. After a few introductory remarks by Mr. C. N. Borton, Mr. Terry took charge of affairs, and in a very lucid and practical manner demonstrated the best methods of preparing a fowl for market. Notwithstanding interruptions and answering questions whilst at work, Mr. Terry killed and plucked two fowls in ten and a half minutes.

The third bird he dissected and explained fully the various organs and their functions, where to look for disease, how to decipher the same, and how, whilst alive, it is possible to tell the birds attacked by certain diseases, and also the hens which are laying or are about to lay.

The fourth bird was dispatched in the ordinary method, that of breaking the neck. This method although good, was not so satisfactory as the one previously demonstrated; for immediate consumption the birds were alright, but if perchance, they were required for cold storage, then it was an absolute necessity to bleed the fowl. For about an hour he demonstrated with the birds, and talked on this practical poultry farming subject everyone paying great attention to his remarks.

After this demonstration he adjourned to the government exhibit of foods, dressed fowls, etc., and here a big following gathered, and firing questions right and left, kept Mr. Terry busy for another hour or so.

In every way Mr. Terry was practical. He answered every question in a thoroughly capable manner, and it was with regret that this audience found the time getting along so rapidly. The feathered tribe with their little habits and big habits are no mystery to him, and he is quite at home answering questions—no easy task when so many are interested.

To enjoy such a treat as was Thursday's lecture, it would be worth while attending twenty lectures, yawn at nineteen, and then get one so practical and full of vim. No cut and dried theories, no side issues, just the plain straight talk, full of information.

During the evening, Mr. Coats, the judge of the poultry, made a few remarks. He said that he had been pleasantly surprised at the interest taken in poultry in Summerland, and the show proved that the interest was well warranted, and it was a great credit to the district. In the Brown Leghorn class the average score was well over 90 out of a possible 100 points—truly an exceptional showing. In so young an association as this, the score card was a help, and he was pleased to see it in evidence. By the scores on these cards the various faults could be seen and remedied at a future show. The system of working the show was excellent and in every way a credit to the association. He would advise all the poultry fanciers, and all interested to join the B. C. Association, and by that means get into touch with all the best methods and new ideas.

Mr. W. A. Wright, the secretary of the association, gave a brief outline of its objects, and stated that their finances were not in as healthy a state as could be desired. He therefore urged anyone sufficiently interested in poultry to give what they could spare, be it ever so small, toward the expenses of the show.

Mr. Wallace Wright, in very appropriate remarks, proposed a vote of thanks to both Mr. Terry and Mr. Coats, and in effect said that they cannot come to Summerland too often. We echo these sentiments.

The total number of Britishers who emigrated from the British Isles during eleven months of 1910 was 234,821. More than one half came to this country. Canada is thus the strongest drawing magnet for British emigration in the world.

## To The Shrewd Business Man

A commercial Orchard is a good income producer while you live, the best real estate agent you ever had when you are ready to sell, and a valuable asset to leave to your widow and orphans when you have reached the end of life's journey.

The place to get in touch with such a proposition is at

## Watson's Realty.

**FIRST MEETING OF THE NEW COUNCIL,  
1911.**

On Monday last, at 10 a.m., the first meet-  
ing of the new council was held.

After Mr. H. Dunsdon and Mr. H. S. Lew-  
es had been duly sworn in and formally wel-  
comed to the Council board by Reeve James  
Ritchie, the following business was transac-  
ted:—

Resolved that owing to the contract work  
and pipe-laying, etc., being at present in a  
dormant condition, the services of Mr.  
Wright, the engineer, be dispensed with for  
the present.

A resolution was passed employing James  
Arkell as a teamster for the municipality at a  
salary of \$70 per month.

It was resolved that Dr. C. M. Smith be ap-  
pointed Medical Health Officer for the ensuing  
twelve months; and that John Tait be appiont-  
ed the Sanitary Inspector and Constable for  
the Municipality for the same period. R. H.  
English, J.P., was appointed to act as Police  
Magistrate for the year.

A letter from F. W. Holt, C.E., of St.  
John, in regard to an application as Water Com-  
missioner, was filed.

Mr. James Fyffe waited on the Council in  
regard to the purchase of ice at the Reservoir,  
Balcomo, and it as resolved that tenders be cal-  
led for the right of cutting this ice at so much  
per ton. In this connection it was resolved  
that notices be posted prohibiting skating or  
trespassing on the Reservoir so that the water  
may be kept perfectly clean.

The Council then adjourned till 10 a.m. on  
the 20th. inst.

The British News of Canada is one of the  
latest journals to appear and in every way de-  
sires to become a good sheet, especially for  
those who do not know this vast country of  
ours. To those resident in Canada it will be  
none the less interesting, and under the edit-  
orship of Mr. Arthur Hawkes, we look for  
good things. The head office is in Montreal,  
and 50 cents the annual subscription.

**RETURNS FROM DEMONSTRATION ORCHARD**

A statement has been issued by the District Representative of the Ontario Department of Agriculture at Collingwood, Ontario, showing the cost of the work done in the demonstration orchards conducted in that district this year and their returns. A large part of the expense was for pruning, of which the orchards were in great need. This item of expense should be divided over a number of years.

Mr. W. Hamilton's orchard at Collingwood realized \$405.45, as against a total expense of \$144.20. Fifty trees owned by John Osborne, at Dunedin, produced twenty-two and a half barrels of Duchess apples, which sold for \$56.25, eighty-two barrels of fall and winter apples which sold for \$246, and fifteen and a half barrels of culls which sold for \$9.10, or a total of \$311.35. The cost of scraping the trees, pruning, two sprayings, working the orchard and sowing a cover crop amounted to \$48.30. The cost of barrels, picking and packing cost \$78.38. The profit on the fifty trees was \$184.67. The most this orchard had ever produced previously in any one year was \$50. The crop produced was clean and free from worms, and comprised a high per centage of number one apples.

**SHORT HEN SERMONS.**

The good hen is usually found at the home of a good master.

The busier the hens the better they will be.

Hens that always have something handy to eat are not apt to overdo the matter and make themselves sick; but if allowed to become very hungry, and then given a big dose, there may be some sick ones among the favourites. Steady feeding is best.

As the new corn gets dry and hard it is safe to feed more than when it is soft and green. It is more easily digested and gives better results.

Do not try to be a freak poultryman. Just go steady and work for the best you can.

Keep the dust box supplied with nice clean dust, and see that the grit box is never empty.

Clean litter on the floor makes happy hens. The eggs come from happy hens.

Change the litter on the house floors frequently.

Good hens are worth about as much as two dozen eggs these days. It is nice to have some to sell, but if I had a thousand and a nice place to keep them, I would not sell a single one, unless she was too old for service.

The Hotel Summerland entertained their guests and employees at an informal dance last Saturday evening in the dining room. The decorations used by the local I.O.O.F. at their supper the previous evening were still in place and added much to the appearance of the room. Everyone enjoyed themselves to the full and appreciated the efforts put forth for their entertainment. It is hoped that this will become a regular feature at the hotel during the remainder of the winter months.

**When Buying Roofing  
Ask Your Dealer This**

How long has this roofing you recommend actually been in use?

The real test of a roof is in its wear.

And unless a manufacturer can show that his roofing has actually worn for fifteen or twenty years, his statement that it will do so is only guess work and therefore of no value. With

# The Summerland Review

## THE 'LITTLE PEACH' DISEASE.

L. Caasar, B.S.A., O.A.C., of Geulph, Ontario, writing in the Canadian Horticulturist, says:— During a recent trip to the peach districts of Michigan to investigate the disease known as 'Little Peach' the writer gained the following information:

Little Peach is a very destructive disease. In the opinion of the majority of Michigan growers it is several times more destructive than Peach Yellows. Wherever affected trees have been allowed to remain the whole orchard, as a rule, has become hopelessly diseased in four or five years. An expert grower stated that he had himself seen more than 100 orchards thus destroyed.

So far as is known, no variety of peach is exempt. Japanese plums are subject to the disease. The writer saw three plum orchards with several of the trees attacked by Little Peach.

Little Peach attacks trees from two years of age and upwards. (This is also true of Yellows.) The disease has been successfully controlled in Michigan and other places, but only by the removal each year, as soon as possible, of all clearly diseased trees and also all suspected ones. It is absolutely necessary to remove the suspicious cases as well as the clearly diseased. Co-operation in control measure is necessary, and, where orchards are close together as in Ontario peach districts, is imperative. No person can thoroughly control the disease in his own orchard by the removal of diseased trees if his neighbor only a few rods away fails to remove his. If, however, the orchards are half a mile apart one may hope to be able to keep his own orchard fairly free from the disease even independent of his neighbors. Where trees have been removed because of the disease young trees may, if desired, be set in the same place next spring. Such trees are not any more subject to Little Peach and Yellows than any other trees in the orchard.

The cause of Little Peach (or of Yellows) is not yet discovered. It is not definitely known in how many ways the disease may be spread.

It is probably first brought into a district on nursery stock and once in the orchard it spreads from one tree to another, but just how no one knows. Many think that the time of infection is during the blossoming season.

The disease can be propagated by budding as has been proven. Mr. Horace Welch, who is said to be the best expert on the disease in the state, took more than 200 buds from trees showing symptoms of Little Peach, and inserted some in young seedlings and others in healthy trees, but in every case the disease developed, but not until the second year, and in some cases the third year.

Whether the pits from Little Peach will grow and produce the disease is not yet proven. It is believed that a small percentage of them will do so. The ordinary system of inspection for Yellows (as practised in Ontario) is not sufficient for Little Peach, as this disease does not show in trees until the latter part of September. Therefore, inspection work

should continue up to the coloring of the leaves by frost. It is not an infrequent occurrence to find trees with all the symptoms of Little Peach except that the fruit ripens somewhat prematurely or at latest at the normal time. Such fruit shows no sign of Yellows. This is possibly an abnormal case of Little Peach and Yellows attacking the tree at the same time. Whatever be the cause these trees must be destroyed just as if they had typical Little Peach or Yellows.

In some districts in Ontario Little Peach has already caused the loss of several orchards and of many trees in nearby orchards. No chance should be given it to make further progress; therefore every grower is urged to destroy AT ONCE every tree marked by the inspector and every suspected tree. It is very important not to let them remain in the orchard till next spring. There is no use in hoping for the recovery of trees; they never recover from this disease.

## ALL FOR BRITISH COLUMBIA.

Ontario fruit growers of late have begun to wonder how it is that ninety out of every hundred well-to-do British settlers who enter Canada to take up fruit growing pass by the great fruit districts of the east, as though they had never heard of them, and proceed direct to British Columbia. There they buy land at considerably higher values than land equally as good can be purchased for in Ontario. Eastern growers have even felt rather aggrieved over the situation. But now a worse thing is happening. During the past few months the Central Okanagan Lands Limited, of Kelowna, B.C., has actually conducted agencies in Montreal and Ottawa. They have displayed excellent samples of their fruit and illustrations of their orchard land and are creditably stated to have sold some three hundred thousand dollars worth of fruit lands to Canadians in the east. They even ran an excursion of eastern investors to the Pacific province. We presume that the next we shall hear is that they have opened branches in the Niagara district and induced our leading Niagara district growers to sacrifice their fruit lands in order that they might make better investments in the west.

The fact is that our eastern growers are very, very, much asleep. If they do not awaken very soon they will have their boots stolen off their feet. The Ontario government also is dozing. The possibilities for a development of the fruit industry in Ontario are enormous. And yet! practically nothing is being done. Why then should we wonder over British investors passing us by?—Canadian Horticulturist.

After the frost—SPRING. On Tuesday last, throughout the district, the frogs greeted the sun with their cheery croak. Are they correct in their diangosity of the weather, or were they fooled?—that is what troubles us. Let us hope they were correct—certain it is they were optimistic, for the noise they made was as of old, and the chorus was heartily rendered.

## CANADA, THE COMING APPLE COUNTRY.

There is every indication that Canada is going to be the apple-producing country of the world in a few years. Our fruit wherever it has been shown in competition with that of other apple-producing sections, has surpassed the best shown by them, and the eyes of the world have been opened to the great possibilities awaiting the further development of the industry.

The East is being re-discovered, and thousands of apple orchards are being planted where hay and grain were previously grown. The same may be said of many districts in the west and northwest, and with this tremendous increase in production and the continual orchard extensions which will go on for years, Canada must certainly become the mistress of the apple markets of the world. We can produce the quality, and shall soon be producing the quantity, that will command the markets.

The apple sections of the United States are not increasing as they might be expected to increase. But even if they should, their fruit cannot compare in quality with that which can be grown in the apple districts of Canada, and when we have reached that point of development when we can produce the quantity to control the markets, the markets will be ours in spite of all competitors.

No industry promises better than the apple industry, which is now only in its infancy—as an industry.

### ENORMOUS POULTRY RETURNS.

Summerland poultrymen are this week holding their first annual poultry show. There is no doubt that these shows will do for the lake district what they have done for other districts, and we may confidently hope to see a general improvement in this very profitable industry. The hen is making considerable stir throughout the west. Indeed, wherever the

sun shines, the hen is honored for her product.

Daily papers and magazines are writing editorials about her. They are suddenly waking up to the fact that the hen is a valuable asset.

Here is what 'Collier's' says in the December 17 issue:

We revert to the hen, because everything comes from an egg and eggs come from a hen. Last year the poultry products of this country totalled only \$25,000,000, as against \$625,000,000 for the United States. Even now we are importing eggs and poultry from the United States, Russia and Germany, and unless we are going to import more our output in the next five years must increase materially. The United States is beating us out three to one per head of population. The United States item of \$625,000,000 for poultry products is almost \$40,000,000 more than all the products of all the farms and ranches in Canada. To get down to cases, the whole province of Ontario did not total in farm products last year within \$17,000,000 of what the hens did for the state of Missouri. In 1902 Canada exported nearly \$2,000,000 worth of poultry products. Last year these figures had dropped to slightly over half a million. In 1904 Canada exported to Great Britain ten times as much poultry and eggs as she does today. There are two reasons for this state of affairs. The farmer fails to realize the profit possibilities of the egg market, and he is afraid that a greater production would cause the cold storage houses and the middlemen to cut prices. Co-operation—teamwork in marketing and sharing profits—will be the ultimate solution of the Canadian poultry problem.

### CO-OPERATION THE SOLUTION.

A writer in the Canadian Horticulturist, in supporting the unanimous opinion of the delegation of farmers which recently went to Ottawa to convey to Premier Laurier their desire for reciprocity with the United States in all agricultural products, offers a few explanations as to how it would affect the interests of our Canadian fruit growers, and particularly our growers of apples. In many sections of Canada the apple business is being rapidly improved by co-operation of the growers in the care of their orchards and the marketing of their fruit. He tells of the improved conditions in Norfolk county, Ontario, where they have had a co-operative association engaged in the handling of apples for the past five years. Last year even with the short crop, the association sold nine times the amount of fruit handled by it the first year it was organized. The further development of the apple business in Ontario, the writer says, under the co-operative system are bright indeed. He believes, with reciprocity with the United States in all agricultural products, the same results would take place, only on a much larger scale, if, under reciprocity, a co-operative system could be arranged between the growers of both countries.

BORN.—On Sunday the 15th. inst., to Mr. and Mrs. H. N. Alexander, a daughter.

## BETWEEN ME AND HANK

Goodness to be goodness must have some edge to it. That goodness which is neither hot nor cold, which insidiously IS, and remains so; can accomplish very little either in the development of oneself or in the inspiration of others. The shorn lamb needs a reasonable amount of winter's blast to make it active. To maintain a dead church, or a dead Bible Society; act in conformity with the common acceptance of what is considered good, and lend the time that should be given in the enjoyment of the quiet and sweetness of the home, to bolstering up a dead service and a dying cause, is but the resemblance of goodness; it is not goodness itself. It scatters your forces and makes for weakness and ineffectual conformity. I think Emerson put it better than ever it was put before, and the last century has not improved upon it. Says he: "I am ashamed to think how easily we capitulate to badges and names, to large societies and dead institutions." From this virile writer I take it that we have not advanced far in the direction of goodness because our goodness is made ineffectual by and through our disposition to side step issues and titter Truth rather than speak it boldly and meet it calmly as we should.

It was an awful storm. Nothing like it was ever known by the oldest inhabitant. The nor' wind she blow an' blow. Trains were stalled for days on the mainline, and local woodpiles vanished in a night. Ears that were wont to stand erect in the open, sought cover under fur-lined ear-laps and noses that had never seen the inside of a wine glass, were reddened to a strawberry hue. Whiskers grew icicles and every breath was a fog bank. Toes grown with the cold, and finger-tips tingled in indescribable agony. Ash pans, coal skuttles, and woodboxes were momentarily full or empty and the devil played a tattoo on the bedposts. It was an awful storm. But it is over now, and life in the Okanagan seems the sweeter, for out of it all, with the thermometer at twenty below, a wee associate editor was born to the staff of Walker's Weekly, and the game goes on.—Walker's Weekly, Enderby.

The College students held their first sleigh ride of the season on Tuesday evening, and had a merry time. Five sleighs had been called into requisition, and soon after eight between sixty and seventy students and friends climbed aboard at the Baptist Church on the Flat. The horses were first headed for Prairie Valley, and turning at the Balcomo Schoolhouse, returned to the Flat, and then circled Giant's Head by way of Peach Valley. The excitement of the evening was the dumping of the occupants of one of the sleighs into the snow by the wayside, but fortunately no one was seriously hurt. Refreshments were served on returning to the church, and the hoarse sleigh-riders dispersed soon after eleven, wishing for more snow and more sleigh rides.

**:: Naramata Notes ::**

Mr. James Crawshaw, of Vernon, was in town over Sunday renewing acquaintances.

Mr. W. J. Robinson spent Wednesday in town on business. He was accompanied by Mrs. Robinson.

Rev. Mr. Allen who has been visiting at the home of his son, Mr. A. B. Allen, left on Tuesday morning for Vancouver where he expects to stay for the remainder of the winter season.

This was a busy week in social circles, there being no fewer than three card parties besides that given on Thursday night by the January Birds, a full account of which is held over till next week.

The inspector for the Dominion Express Co. was here on Wednesday in the interests of his company. As a result of his visit the local office will be closed temporarily on account of the protracted illness of the local representative Mr. Allen.

Quite a number from town visited the Poultry Show in Summerland. There was a small exhibit from Naramata, Messrs. Mulford and Munroe being the only exhibitors. The former gentleman carried off first honors for one of his birds, while the latter got into the ticket class with one of his, and considering the heavy opposition, they feel well satisfied with the results.

The party on Saturday night in the boys' tent where Messrs. Nuttall, Land and Kenyon demonstrated to a finish to about a score of their young friends that bachelors know how to entertain right royally. Mr. and Mrs. Cook played the part of chaperones to everyone's satisfaction. The lady prize-winners were Miss L. Wells and Miss Block, Mr. Cook and Mr. R. Boothe winning for the gentlemen. On Monday evening the same gentlemen entertained the American section of the married folks and also up in this occasion the crowd put in a merry time. Then on Tuesday evening Capt. and Mrs. Languedoc gave a party to the young people of Naramata. There were in all six tables playing a delightful varied program at whist. Upon this occasion the hostess was assisted by Miss Block and Mrs. H. E. Hancock. Miss Mitchell and Mr. A. P. Wilson were the top-notchers, while the humbler places were held by Miss Block and Mr. N. Mitchell.

**FARMERS' INSTITUTE.**

It is important that all who wish to receive the publications issued by the Department of Agriculture shall join the Farmers' Institute before the end of this month when the secretary will be forwarding to Victoria a complete list of all members in good standing at that date. The annual subscription is only fifty cents payable to I. B. Fulton, secretary-treasurer.

**HOTEL PENTICTON PROPRIETOR DEAD.**

The sympathy of the entire community is with Mrs. Amos Barnes and her five daughters and little son in the sudden bereavement which came to them on Wednesday last.

Mr. Amos Barnes was seen in apparently his usual health shortly before noon on Wednesday morning and a short half hour later was discovered in an unconscious condition in the engine room in the rear of the hotel. He died a few minutes later, death having been caused by heart failure.

Mr. Barnes came to Penticton with his family in the spring of 1906. He had made a large number of friends, and the news of his death will be received with sorrow by a number of people resident in Manitoba and Alberta as well as his friends in the Okanagan. The funeral service took place at St. Savior's Church of which Mr. Barnes was a member, Rev. J. A. Cleland officiating.

The meeting of the Board of Trade which was called for last Tuesday was postponed and will be held next Tuesday afternoon at 3 o'clock. All members are asked to govern themselves accordingly.

The Poultry Show was a great success, and every credit is due to the few who rallied round and worked it out to its ultimate end. The financial prospects for the show are not so good as one would like to see, and it is hoped that those who are interested in poultry, or interested at all in the development of this business in the province will help out a little, even though it only be to the tune of two bits, as "many littles mak' a muckle."

Northern Spys.—Friends from Edinburgh write as follows:—What a GREAT TREAT! We never get apples here the least like them. If they come into the home market, London must take possession of the whole.

This has been a busy week at the hotel. Among the registrations are the following:—P. Higginson, Vancouver; A. S. Bain, Victoria; Paul Gillet, R. B. Powers, E. S. Vanderwoort, G. B. Sayers, J. McClun, A. C. Gaht, R. A. Grimes, C. McIntyre, W. P. Sharp, Vancouver; W. L. Jones, D. Williams, Penticton; W. Dawson, J. S. Moore, Mr. Hardy, Peachland; J. J. Worth, Calgary; T. Pound, H. R. Walby, Enderby; Miss Sweet, T. R. Terry, Victoria; H. Gray, Montreal; N. B. Whitley, Seattle; C. A. Bradley, Victoria; C. A. Washburn, Revelstoke; J. M. Hughes, Armstrong; V. B. Wilson, Lindsay Ont; J. D. Williams, Kelowna; A. W. Lee, T. Alice, Mrs. S. G. Eliott, M. Morehoue, W. M. Coats, Vancouver.

On Friday last, the members of the I. O. O. F. entertained a number of Penticton brethren to supper at the hotel. They had a splendid time, and unity and harmony prevailed. Previous to the supper, degree work in the lodge occupied most of the evening.

NOTICE.—Any person cutting or removing wood from the property of A. E. Hespeler on the Gulch Road, will be prosecuted.

### A TWO-DAYS' COURSE FOR THE FRUIT GROWERS OF SUMMERLAND AND PEACHLAND.

A two-days' course for fruitgrowers, under the auspices of the Farmers' Institute will be held in Summerland on January 27 and 28, and in Peachland on January 30 and 31. The lectures in Summerland will be delivered in the Municipal Hall, at the lakefront, and the place where the practical orchard demonstrations will be given will be announced later. The following is the program:—

#### SUMMERLAND.

First Day.—Afternoon.

2.00 p.m. Types of soil in relation to practical fruit growing. C. C. Clark.  
3.30 p.m. Pruning: Summer and Winter. (Open-air demonstration). M. S. Middleton.

Evening.

7.30 p.m. Orchard Pests and their control. Ben Hoy.  
Sprays: Preparation and application. J. F. Carpenter.

Second Day.—Forenoon.

10.00 a.m. Management of Orchard Soil in relation to the Conservation of Moisture and Fertility. C. C. Clark.

Afternoon.

2.00 p.m. Physiology of Plants in practical relation to fruit growing. J. F. Carpenter.  
3.30 p.m. Winter Injury: causes of and methods of prevention. Ben Hoy.

Evening.

7.30 p.m. Selection of Nursery Stock. Orchard Plans and Planting. (Illustrated by lantern slides). M. S. Middleton.  
Successful Growing and marketing of fruit. R. M. Winslow, Provincial Horticulturist.

#### PEACHLAND.

First Day.—Afternoon.

2.00 p.m. Types of soil in relation to practical fruit growing. Ben Hoy.  
3.30 p.m. Pruning: Summer and Winter. (Open air demonstration). M. S. Middleton.

Evening.

7.30 p.m. Physiology of plants in relation to practical fruit growing. J. F. Carpenter.  
Winter Injury: Causes of and methods of prevention. Ben Hoy.

Second Day.—Forenoon.

10.00 a.m. Orchard Pests and their control. J. F. Carpenter.

Afternoon.

2.00 p.m. Management of Orchard soil in relation to the Conservation of moisture and fertility. Ben Hoy.  
3.30 p.m. Sprays and spraying. J. F. Carpenter.

Evening.

7.30 p.m. Selection of Nursery Stock. Orchard plans and planting. (Illustrated by lantern slides). M. S. Middleton.  
Successful growing and marketing of fruit. R. M. Winslow, Provincial Horticulturist.

Variety and plenty of it is the keynote of the January issue of the Rod and Gun in Canada, published a Woodstock Ontario. The opening article deals with the outfit required by the backwoodsman and though sportsmen may differ on many of the trimmings, there will be general agreement as to the essentials. There are a number of items recording occurrences out of the common, showing how vastly experiences in the woods may differ and others reminding sportsmen of similar events on their own trips. The whole is redolent of the outdoors and must act like a tonic in the wintry weather.

A bulletin of the census office just issued gives the total area of field crops grown in Canada this year as 32,711,063 acres, and the value of crops as \$507,185,500, compared with 30,065,556 acres and a value of \$532,993,100 last year. Wheat, oats and barley had last year a total area of 18,917,900 acres with a value of \$289,144,000, and this year with an area of 20,992,900 acres the value is only \$248,738,300. The decrease in value is \$40,405,700, which is \$14,599,100 more than the decrease for all field crops and a lower production of 18,591,000 bushels of wheat, 58,686,000 bushels of oats and and 9,981,000 bushels of barley through droughts and heat in Manitoba Saskatchewan and Alberta from an area sown greater by 1,857,200 acres

**BILLY'S TRIP.**

On Saturday last, Mr. W. Simpson arrived back from the Old Country.

It will be remembered that he accompanied the car of fruit which took first prize in the mixed variety, and second in the Sweepstakes at the Canadian National Apple Show held in November last. At the close of the Show, the fruit was shipped to London, and Billy accompanied the car.

Ten days by freight, and a stormy passage delayed things, and in the English Channel fog prevailed, with the result that the shipment arrived in the London Docks on December 3,—the last day of the Show. A rush was made, and everything done to get some of the fruit at least on exhibition, with the result that in the afternoon a few boxes were staged, and these won a gold medal from the Royal Horticultural Society.

After the Exhibition the fruit was sold by public auction, and, it is pleasing to remark, fetched a little better price than any fruit which passed had through the auctioneer's hands.

Mr. Micheal Garcia, of the famous fruit importing firm of Garcia, Jacobs & Co., told Mr. Simpson that the particular shipment that he had brought was the best he had ever seen in the country. A large wholesale merchant of Covent Garden, who secured all of the Spitzenbergs, said that this variety from Summerland was the best he had ever handled in his life.

Mr. Simpson said that Jonathan and Winter Banana were varieties much talked about—and in his opinion a large mixed shipment of these two varieties would be a very paying investment. They should be accompanied by some responsible person to represent the grower, in order to ensure the latter getting a square deal. The reason for this is that a few boxes may not arrive in perfect condition, and this would lower the price of the whole shipment

If accompanied, this could not happen, as the growers representative would see to it that the imperfect fruit was separated from the perfect.

Newtowns and Northern Spy have a good hold on the market, and on account of their size are greatly in favor—an apple too large for dessert purposes being not such a ready seller. Jonathans are fetching a good price, being such glorious apples, and having such a color, they are ready sellers. Although Hood River Newtowns were selling at seven shillings and sixpence and eight shillings per box, he was convinced that the same buyers would give double the money for our Winter Bananas.

Travelling greatly over England, Mr. Simpson made a point of visiting the leading fruit merchants in each town, and he comes back with a very optimistic views regarding the Old Contry as a market for our fruit, and is convinced that certain varieties would command high prices. Given every attention at this end, and quick transportation, he is confident that the fruit grower will make big money in providing fruit for the markets in the tight little island 7,000 away.

**MUNICIPAL ELECTIONS.**

The elections passed off very quietly on Saturday last, and only five were present at the declaration of the results, in addition to the returning officer and his clerks.

In Ward One, Mr. J. R. Brown was returned by a majority of six, and in Ward Two, Mr H. Dunsdon headed the poll with a majority of thirteen.

In all there were 110 votes cast, one ballot being spoiled.

BORN.—On Friday the 13th inst., to Mr. and Mrs. G. N. Gartrell, a son.

vivid coloring of the Pacific province fruit, certainly the best colored apples in the Empire, which is another way of saying the best in the world, for there are no apples outside the Empire to equal those grown within it. That is not sentiment but fact. The clear, dry, crisp cold of the "benches" and the lake country valleys in British Columbia, with the generous

mellow heat of the Pacific summer, represent a perfect apple climate. We are indebted to the courtesy of the British Columbia Agent General for a number of fine samples of this fruit which has figured so largely in London this season, and will be likely to figure even more prominently in future, for the flavour and condition of the British Columbian apple is equal to its exquisite coloring."

### RICH RED BLOOD.

You Will Never Have It as Long as You Have Dyspepsia.

Just as long as you have dyspepsia your food will not properly digest, and the nutritious elements in the food will not be extracted or absorbed, and impoverished or watery blood will follow.

This condition may not be apparent at first, but it will come just as sure as the sun will rise again.

Any stomach ailment, including all forms of indigestion, can be promptly cured by using Mi-o-na tablets, a scientific treatment unsurpassed.

It stops fermentation, belching of gas and taste of sour food almost at once.

The mighty power of Mi-o-na to invigorate and restore the stomach to perfect condition is known everywhere.

Mi-o-na cures by building up—by banishing the cause. For thin people it is a great flesh builder, because it causes the stomach to give more and purer nutrition to the blood. It cures sea and car sickness and vomiting of pregnancy almost immediately. The Summerland Drug Co. sells Mi-o-na for 50 cents a large box, and guarantees it to cure or money back.

## SPECIAL MEETING OF THE COUNCIL.

### Big Sheaf of Business Done.

A special meeting of the Council was held on Friday January 20th. in the Council Chamber, at 10 a.m. The following were present: Reeve James Ritchie, Councillors C. J. Thomson, H. Dunsdon, and H. S. Lewes.

The minutes of the last meeting were read and approved.

Mr. A. Agur, of Balcom, with two others, met the Council as a deputation from the Balcom Skating Club, asking a reconsideration of their decision regarding skating on the municipal reservoir at Balcom. The matter was thoroughly discussed and gone into, and for about thirty minutes the case was argued out pro and con. In the end, the Council upheld their original decision, stating that the risk run by the Municipality as a whole was too great, as all the water for drinking purposes came from that particular dam. Although they were sorry to interfere in any way with legitimate sport, yet they were compelled in the interests of the municipality to do so in this particular case.

Mr. A. Hespeler asked the Council if they had decided upon the price at which the ice procured from the reservoir should be sold. As the tenders for this contract had not been let, the question was answered in the negative.

Mr. Wright, engineer, asked the Council if his dismissal was on account of any dissatisfaction or was it owing to the shortage of work as they had intimated to him. The Council replied that it was in no wise due to any dissatisfaction with his work. Regarding the future employment of Mr. Wright, they were not sure of their policy, and nothing definite in the way of making an engagement could be done.

Mr. C. N. Borton, representing the Southern Okanagan Poultry Association, waited upon the Council and stated the finances of the Association, their expenses in regard to the show, etc., and said that they would be left with a deficit of about \$150, and this sum would have to be met by just a few enthusiasts. He pointed out that the chicken industry was very important to the province, but of this fact they were doubtless well aware. He was sure they would acknowledge that the show had been, as a show, a magnificent success.

The Council were quite in accordance, and resolved that the sum of \$150 be granted to the Association to meet the deficit.

A letter was read from Mr. W. A. Doyle, re the erection of a stand pipe near to his residence on Jones Flat. This was referred to the Water and Light Department of the Municipality.

The Secretary of Okanagan College, in a letter, drew the attention of the Council to a few matters in regard to the electric lighting of their various buildings, requesting that a meter be placed in the Gymnasium, and petitioning the Council that the price of electrical current supplied to the College be reduced on account of their great consumption. The meter was ordered to be installed as requested, and in regard to the price of electrical current, the Council decided to go further into the matter and see if it were not possible to arrange some rate of charging, by which all consumers of a certain number of kilowatts would get their current at a cheaper rate than the householder, who consumed so much less.

A letter from Mr. W. J. Docking of Trout Creek, regarding some cordwood on the road in that district, was read, and the matter was left in the hands of Councillor Lewes, who will report to the Council at an early date.

Councillor Thomson was appointed Deputy Reeve for the year 1911.

Resolved that the Board of Control consist of the Reeve, and the chairmen of the Finance and Public Works Committees; the Board to have full charge of the Light and Water Department, etc.

It was resolved that the Reeve and Treasurer be authorized to procure a loan of not more than \$3,000 from the Bank of Montreal, to be used for current expenses and to be paid out of the rates of 1911 when collected.

Resolved that the Assessment Roll be placed before the Council on the first day of April, 1911, and that a Court of Revision be held on the First day of May, 1911, at 10 a.m.

For the removal of ice from the Balcom Reservoir, three tenders were received; and Mr. Mitchell was awarded the contract. He is to pay 26 cents per ton for the ice, and haul it near to the cement dam. He must also keep his team of the ice. The price at which he is to sell the ice when cut is to be not more than \$1.15 per ton.

Mr. Latimer, C.E. of Penticton, was engaged by the Council as consulting engineer at a salary of \$25 per day, and Mr. F. J. Nixon was appointed as accountant to the Water and Light Department at a salary of \$100 per month.

Mr. R. H. English requested the Council to build a road parallel to Shaughnessy Avenue, on the west side running along the back of the business premises there. This was left over for the present.

Resolved that Mr. J. L. Logie be appointed as Municipal Clerk and Treasurer, at a salary of \$60 per month; also as assessor at \$150 per annum.

The clerk was authorized to make arrangements about the procuring of a safe and report on same to the Council at an early date.

It was decided to secure the Municipal Hall for the current year from the Summerland Sup-

## B.C. FRUIT GROWERS' ASSOCIATION.

Victoria,  
January 24, 1911.

The Editor,  
Summerland Review,  
Summerland B.C.

Dear Sir:—

The fruit growers of this province held a meeting recently in Victoria, under the auspices of the B.C. Fruit Growers' Association, which dealt with a number of important matters now before the fruit industry of the province generally.

On the question of the market for British Columbia fruit it was made abundantly clear that the principal one for at least the present will be the prairie provinces and particularly the non-competitive area on the Canadian Pacific and to a less extent on the Canadian Northern where British Columbia has an advantage as to freight rates. The report of Mr. Metcalfe, Markets Commissioner, was approved by the meeting and will be issued by the Department of Agriculture later. Prominent fruit growers and shippers from all over the province reported a volume of business this year greater than any before and had, generally speaking, good prices.

With regard to transportation, there is considerable discussion on the need for certain reduction in rates and certain improvements in service. The Association has passed a resolution asking for the appointment of a strong Transportation Committee to deal effectively with these problems by that means. Experience has also shown that we cannot secure from the railways any considerable improvement through the medium of general meetings.

The Association approved unanimously of the present size of the apple box. It also approved unanimously of the pear box  $18\frac{1}{2} \times 11 \times 8\frac{1}{2}$  inside; of the peach box  $18\frac{1}{2} \times 11 \times 4\frac{1}{2}$  inside; of the plum crate,  $15\frac{1}{2}$  square  $\times 4\frac{1}{2}$  deep, and approved generally of the use of the pear and half pear box for crab apples.

On the labor question and on the need for more rapidly colonizing the province by a working class of agriculturists, the resolutions were exceedingly strong. It is hoped that the provincial government will do something in this matter in the near future.

The Association closed last year with the support of practically every prominent fruit grower in the province. It is expected that the coming year will see it very much stronger and more fitted to carry on the work of securing the great reforms necessary to the continued progress of the fruit industry here.

R. H. AGUR,  
President.

R. M. WINSLOW,  
Secretary.

ply Company at a monthly rental of \$25.

The annual grant of \$400 was voted to the Summerland Agricultural Society.

This was all the business, and the Council adjourned until 9 a.m. on the 6th. of February, when a meeting will be held in the Municipal Buildings, West Summerland.

## FARMERS' INSTITUTE MEETING.

Mr. W. W. Samson, Manager of the Okanagan Fruit Union, Met the Growers last Friday.

On Friday evening last, in the Municipal Hall, about fifty members of the Farmers' Institute and a few others interested met to have a talk over the marketing problem. Mr. Samson, from Vernon, the well known manager of the Okanagan Fruit Union, was asked by Mr. Thomson, the president, to give a few particulars anent the marketing of our last season's fruit crop.

Mr. Samson, by way of opening the evening's work, produced a small sample box of apples, and handed the contents round, asking those present to name them. "Stark's Delicious" was the correct name, and Mr. Samson remarked that in his opinion, this apple was going to prove a very good seller, especially in the eastern markets. It was a very suitable apple, he said, to grow in Summerland.

Proceeding, he said, that the present meeting was an open one, and should be used as such. The fruit grower needed the assistance of the association which he represented, just as much as the association needed the fruit grower. Many would not be satisfied with the prices received last year. It had not been possible in the state of the market to get better prices. At the commencement of an association such as theirs, few were successes without apparent sacrifices. Again, at the present, expert labor and high-salaried packers were necessary, but had the business been three times as great this part of the expense would not show any increase, for then they would only have had to employ ordinary packers under the supervision of the experts. Another fault lay in the fact that there were by far too many varieties for the quantity shipped out. For instance, out of Summerland alone, the following were shipped through the Union:—

Cherries	266 crates.	Apricots	298 crates.
		Peaches	
	crates		crates
Alexander	842	Triumph	6,172
Greenboro	285	Red Bird	52
Hale's Early	448	Almons	98
Fitzgerald	143	Champion	1,777
Elberta	9,245	Yellow St. John	2,054
Carmen	266	Crosby	302
Belle of Georgia	2,055	Crawford	704
	Assorted		1,612
Total			26,057 crates.

Plums and Prunes 1,080 crates.  
Grapes 25 Crab apples 378 Tomatoes 1,411  
Pears 35

	Apples		boxes		boxes
Alexander	14	Yel. Transparent	28		
Early Harvest	21	Duchess	70		
Beitigheimer	23	Rome Beauty	38		
Wolf River	88	Ribstone Pippin	178		
McIntosh Red	78	King of Tompkins	36		
Hubbardsons Nonsuch	184	Wealthy	214		
Gravenstein	121	Jonathan	298		
Wagener	762	Red Cheek	23		

Ontario	126	Greening	269
Baldwin	171	Spitzenburg	61
Missouri-Pippin	139	Gano	236
Northern Spy	29	Newtowns	14
Winter Banana	17	Cranberry	23
Pearmains	20	Assorted	215
Total			3,496 boxes.

Sweet Corn 11 crates

Of course this huge variety would not matter so much later on when carloads or half carloads lots could be shipped. But at present the dealer would not accept cars containing such a number of different varieties. Apples this season had practically approximated \$1.35 f.o.b. Vernon, and for number two fruit \$1.25 had been received, f.o.b. Vernon.

The Union this year had shipped 175 carloads—not a bad showing for the first year in business—and the total received would probably amount to \$125,000, but the final statement was not yet issued. The reason why Summerland growers had extra local freight to pay was because carload lots could not be forwarded last season as a rule, and hence they had to be made up at the Landing or Vernon with fruit from other points. Assorted carload lots generally fetched more on the markets, and often the extra local freight paid was more than equalized by the higher prices paid for such shipments.

At the present time the business of the Union was done almost exclusively through the jobber, and he did not see how this could be changed for some considerable time to come.

In regard to the peach crop, competition had been very keen, and at the end of the season cars had been very difficult to place. One car had lain at Moose Jaw for a week before it could be disposed of. Had they been in a position to know what quantity was likely to be shipped, better prices would have reigned, as better contracts could have been made with the jobbers; but this not being the case, and our friends below the line shipping in so many cars on consignment, the market was utterly demoralized for some considerable time. During the rush of the peach crop, several cars were sent to Vancouver, and sold at 42c. to 47c. f.o.b. Vancouver. These same peaches retailed at 75c. The prairie markets gave 50c. f.o.b. Vernon, the whole of the season.

Mr. Samson had to answer many questions—everyone present seemed to have a suggestion as to shipping, or some way of improving the system. Some of them were very good indeed, and were discussed at length. A very practical suggestion was one to the effect that seeing overhead expenses were almost as great now as they would be when the crop is trebled, why not carry forward some of the expense to future seasons, and by this means balance the charges somewhat? Mr. Samson thought that this would be good policy, and no doubt, if suggested at the annual meeting, would receive proper consideration.

The growers seemed satisfied with Mr. Samson's remarks and although the prices they had received were not so satisfactory as they had expected, they knew he had done as well as any other such organization, and although one or two had cold shivers, the optimistic vein of the fruit grower came out on top, and no doubt better prices will be received this season, especially so seeing that the facilities for shipping are so much improved. Cars can now be packed here, and if, as promised, the express rates are lowered, then this will be yet another source of profit to the grower.

## To The Shrewd Business Man

A commercial Orchard is a good income producer while you live, the best real estate agent you ever had when you are ready to sell, and a valuable asset to leave to your widow and orphans when you have reached the end of life's journey.

Mr. and Mrs. James Ritchie left yesterday, Friday, for a trip to the Old Country. They expect to be away about two months.

On Monday, the 23rd. inst., Doreen Marie, infant daughter of George E. and Margaretta Raincock, passed away after a short illness. She was laid to rest the following day. The sympathy of the community, in which the Review joins, goes out to Mr. and Mrs. Raincock in their sad bereavement.

The report of the B. C. Poultry Association is to hand. In it is to be found a full list of officers, and the constitution and bylaws of the Association, articles on incubating and brooding, egg production, marketing, co-operation system, etc. etc. There is also a directory of breeders, which is in itself a very valuable list, showing where one may procure sittings of almost every variety of fowl. This report should be in the hands of every poultry breeder and fancier, and as the membership fee is only \$1 per year, and reports are furnished only to members, you had better join now.

A theatrical event of more than ordinary importance here is the engagement of the Lyceum Players under the auspices of the Men's Club, on Friday February 3rd., This clever company will be seen in an evening of tabloid drama, presenting the best in farce and comedy drama. As a special feature Signor Romanilli, the Italian harpist will be heard in several selections. Others in the company are Walter McRaye, Gladys Noxon and Violet Hunt.

The hospital Ladies Auxiliary met on Tuesday last at the home of Mrs. Ross, on Beach Avenue. After the business had been transacted tea was served, and the ladies, ever practical, paid ten cents or more as they wished. By this means, the sum of \$6.40 was collected which same will be used to help along the funds of the Auxiliary. Everybody thoroughly enjoyed themselves, and it is pleasing to record that this very useful association is gaining in popularity every day.

The St. Bernard dog "Colonel" caused quite a scene this week, when his master, arrived back from the east after a few months absence. He would not be suppressed, and Mr. Derrick had to put up with his gambols and barks of pleasure for quiet a considerable time. After a while, 'Colonel' allowed others near his master, but still watched him with a very jealous eye, and at times would nose up to him just to see if Mr. Derrick had really come back, or if it was another case of hallucination.

### BAND FOR NARAMATA.

There is every indication that Naramata will have a band of its very own this season. That Naramata has had for some time the nucleus for a fair sized organization everybody knows. The boys themselves have been sufficiently interested as to purchase a set of instruments of their own which as the organization grows older and stronger will become the property of the band. This movement is a very creditable one indeed and will doubtless have the hearty co-operation of the citizens.

**A TRACKLESS TRAIN**

The initial meeting of the Okanagan Renard Train Co. which was organized recently by Vernon and Kelowna capital, was held at Kelowna last week, and the officers and directors named. Speaking of the objects of the company, the Kelowna Courier says:

"The objects of the local company is to purchase from the Canadian Renard Road Transportation Co., a Vancouver corporation which owns and controls the patent rights for the Dominion of Canada, one of their trains which is now being assembled in Vernon, with a view to place it in operation at an early date between that point and here.

The Renard Road Train as patented by Cpt. Renard, an officer in the French Army, and manufactured by the Daimler Motor Works, Coventry, England, operates on ordinary country roads. . . . The train is not a competitor of any transportation system, but simply acts as a feeder. In other words, taking the place of horses and not being confined to two lines of steel, it is able to go into a farmers ploughed field, pick up his crop and carry it to the nearest point of shipment at a fractional cost of that of horses.

The Farmers Institute will meet next Thursday at 8 p.m. in the Council Chamber, when the delegates report to the convention at Victoria will be read, also the delegates report to the B.C. Fruitgrowers' Association.

### THE BOARD OF TRADE.

This institution in Summerland, has for some considerable time, been of little account. The reason for this state of affairs is not evident; but certain it is, that it has existed, and has been patent to every member, and likewise to every individual throughout the municipality.

The annual meeting was held last Tuesday, having been postponed in the hope that there would be a larger attendance. This was not to be—there were only twelve members of the old Board and three new ones present.

It seemed to us that the few who were there were fully alive to what a Board of Trade might accomplish, and a feeling of optimism was in the atmosphere.

Summerland has an irreproachable name—a name for doing great things. Whatever goal she makes for, she seems, somehow or other, to get there. In our midst we have men of undoubted business acumen, men with large experience and men who though lacking any great outstanding ability, still have the interest of the community at heart. Let us all get together, let us all work for Summerland, just as much as for our individual selves. Our interests are here, our livelihood is here, we want our town to grow, and just so much as she flourishes, so also shall we, as individuals, share her prosperity.

The Board of Trade in Vernon was some little time ago in a more or less dormant condition now it is one of the most enterprising organizations in the interior of British Columbia. And why not Summerland? We must progress, our place is in the vanguard of enterprising municipalities, therefore rally round your Board of Trade; make it an organization worthy not only of Summerland, but also of British Columbia, and let the office bearers feel that they have the active support and not merely the passive sympathy of the ratepayers of Summerland.

### THE SUMMELAND SPIRIT.

It does not seem to make any difference what the people of Summerland tackle. They always succeed in convincing the visitor that they know their business and can deliver the goods.

When Sir Thomas Shaughnessy witnessed the apple show last fall, he turned to Mr. J. M. Robinson with, "Robinson this is marvelous; but I thought you said this was the peach belt!"

"It is," quietly replied Mr. Robinson. "Visit us when the peach season is on and we will show you peaches." Perhaps if Sir Thomas had seen the Poultry show last week he would have made a remark about this being the fruit belt, and wondered at the fine display of birds and the able management of the show. At all events, this was the remark of some of the poultrymen who visited the show after exhibiting at Ashcroft, Revelstoke and Enderby. They were more than pleased, not only with the high standard of the birds on exhibition, but also with the facilities afforded them to display their birds and the able management of the show.

What struck them most forcibly was the spirit of progress which asserted itself in so many ways, and particularly in the desire expressed by our poultrymen to hold a general interior district exhibit of poultry at Summerland next winter. This, they felt, was a splendid indication of what the future shows at Summerland would be.

### MASTERY OF THE AIR.

Nothing in the world's progress in invention can compare with the brilliant success which has been achieved in the past ten years in the science of aeronautics. And the crowning achievement was without doubt, the feat of Eugene D. Ely, last week at San Francisco, Cal., when he flew from the aviation field in South San Francisco a distance of twelve miles and landed upon the deck of the warship Pennsylvania, had luncheon with the commander and left on his aeroplane and returned to the aviation field. The aviator covered the twelve miles and accomplished a landing on the warship in fifteen minutes from the time of starting. A specially constructed platform above the quarter-deck of the Pennsylvania afforded a landing place. Ropes weighed down with sandbags were stretched across the platform and hooks especially installed on the flying machine caught up these ropes and the aeroplane came to rest within thirty-five feet of the spot where it touched the platform. The landing and get-away were accomplished without a perceptible jar and the whole thing was so successfully carried out as to prove beyond a doubt the value of an aeroplane in naval warfare.

The record of the progress in man's conquest of the air reads like a dream. We have to go back only to the year 1888-9 for the actual starting point of the investigation which ultimately rendered human flight possible. Indeed, outside a very small circle of gifted engineers and scientists, human flight at the beginning of the twentieth century was

still regarded as a dream of the visionary. And today, before the first decade of the century has run its course, not only has man learned to fly, but he is flying so far, so high, and so swiftly, and landing when and where he pleases, that there is a warrant for the boast recently made by a leading aviator that the absolute conquest of the air has indeed been accomplished.

### BETWEEN ME AND HANK

Afer all these years of knocking about the world, and being knocked, I am thoroughly convinced that it is a waste of effort to undertake anything that isn't worth the best you can put into it. And I would never allow myself to think of the kind of friend such and such a person will be to me. If I were you I would only think of what kind of a friend YOU are to everyone else you meet. Our friends will be to us what we are to them. We cannot make friends if we have'nt got the heart to be one, and no man can make life a success who is not ready to work hard to serve others. If it is true that "mine own shall come to me," it is also true that "mine own can never be taken from me." Fill your job as if you were the only one who could fill it. Not egotistically, however, but humbly and earnestly. A town where every individual job is thus filled, cannot but bring to it the best the world has to give, of intelligence, wealth, beauty and art. And from it shall go forth vibrations of real worth that cannot but do the world good.

### OF INTEREST TO TREE PURCHASERS.

The following excerpts are from the Provincial Horticultural Board Act, and are here inserted at the instance of the Board of Trade:

"No person shall sell within the Province, as principal, agent, solicitor or otherwise, fruit trees, plants or nursery stock without the license therefor by this act required.

"Any person may obtain from the Provincial Board of Horticulture a license to sell within the Province fruit trees plants and nursery stock, upon payment of a license fee hereinafter provided, and upon filing with the said Board a bond to His Majesty, satisfactory to said Board, in a penal sum not exceeding two thousand dollars, conditioned that the obligator shall pay all damages that may be occasioned to any person in the Province through the sale to such person by the licensee, his agent or agents, of any infected fruit trees, plants or nursery stock, or of any fruit trees, plants or nursery stock, that are not of the variety and character represented by the licensee, his agent or agents at the time of sale.

"Any person in this Province who shall sustain damage through the sale to him by the licensee, his or their agent or agents, of any infected fruit trees, plants or nursery stock, or of any fruit trees, plants or nursery stock that are not of the variety and character represented by the licensee, his or their agent or agents, at the time of sale, shall have a right of action in the Courts of this Province upon said bond for such damages, notwithstanding the provisions of any contract or agreement to the contrary."

## The Summerland Review

### JUDGE'S CRITICISMS OF OUR POULTRY.

The following letter contains some of the criticisms by Mr. Coats, the Judge at the Show of poultry exhibited last week. Mr. Coates has a provincial reputation as a successful poultryman, and his criticisms merit the careful study of all who hope for success in that line.

West Summerland,  
January, 21st., 1911.

The Editor,  
Summerland Review,  
Summerland, B.C.

Dear Sir:—

Many people have asked what the Judge thought of our Poultry Show, so perhaps a few remarks along this line would not be amiss. As you no doubt know, I acted as secretary to the judge and on this account am possibly in the best position to give the desired information.

The show was a surprise to him. He, like other coast men, had no idea that we could put up the brand of bird and the large numbers which we had on exhibition.

Now let us see where we excelled and where we were lacking. Our best class was the Brown Leghorn a very large class having some thirty two entries, one bird scoring as high as 92½ out of a possible 100 with many others scoring in the nineties. The largest class was the White Wyandotte. They were there in large numbers, but were shy on quality. There were of course some very fine specimens, a few good ones, and many which could only be termed fair. The greatest fault was that they had not been put in good exhibition form. Of this I shall speak later. Another fault was one on which quite a number were disqualified, namely, having stubs or feathers on the toes. Tipping was also very noticeable in this class, and men who make a practise of showing birds should either not enter one with these faults, or should remove them and show the bird in its natural condition. This is called by some legitimate faking. There was also a tendency to poor quality in the color of the eye, the shades ranging from a bright red, which is the proper color, all the way down to green, the color of a cat's eye.

Then came the White Leghorns, and here again we were up against the stubs and poor eye quality combined with poor show condition, although their general quality was better.

The Plymouth Barred Rocks were knocked hard for having occasional black feathers in their plumage, and here again the natural conditions would come in. They also showed a tendency to white in the face instead of red.

Next let us take the Buff Cochin class. These were light in weight, one so light that it was disqualified on that account. Their tails were too long and high, resembling the Rock tail, instead of being round in appearance

(somewhat as though they had been docked.)

The Buff Orpingtons and the Golden Dotts mostly looked as though they had needed to climb the College Hill for a living, they were so rangy.

Regarding the Buff Bantams—they were too fat. One was thrown out on this point, and their vulture hocks were too long.

Now for some general remarks. In the dark colored birds there was a noticeable amount of purple barring, and we frequently met with white tipping. The chief points on which all classes were deficient were poor combs and shallow breasts. The breasts were most noticeable in the American classes. The appearance of these birds, commencing at the beak and following down and around to the tip of the tail, should be somewhat the same as the outline of a kettle-drum.

Then again, many of the birds in the Mediterranean classes had their flight feathers clipped, and all classes had some with broken feathers. For this they were scored as the Judge was unable to tell whether they had been clipped to prevent them from flying or because of foreign color on the tips.

Many of the birds had their combs and wattles frozen and while it did not so much matter this year it will put them out of the running next year. I might say in passing that camphorated oil rubbed on the frozen parts is the best remedy to remove the frost and prevent the parts dropping off.

Making up the Show condition of the birds. They were very nervous and scary, so much so that in some cases it took us about five minutes to get them to stand quietly to be judged and even then they would not show themselves properly. This places them at a disadvantage as it is almost impossible for any man to judge the properly when they are in this condition. The light colored birds were very dirty not having been washed, and here again came a difficulty. How was the Judge to tell whether it was dirt or foreign color? He had to do his best, but in some cases it was almost guess work. Directions for washing birds for exhibition were given in the December issue of our provincial poultry paper, "Successful Poultryman," by Mr. Coats.

Mr. W. M. Coats of Vancouver, who was the Judge, is considered one of the best, if not the best, judges at the coast, and he certainly was very careful, painstaking and thorough in his work. Any show of which he is judge may depend on it that the awards will be correct, and Summerland was very fortunate in securing his services.

Just a word in closing. Let the exhibitors when they receive their score cards go over them thoroughly and see wherein their birds lacked, and then get down to business and remedy these faults.

Yours very truly,  
WALLACE A. WRIGHT.

P.S.—The only thing against the turkey and duck exhibits was that they were mostly small in size. Their plumage was of excellent quality.

Summerland, B.C.

**:: Naramata Notes ::**

Mr. Howard Rounds paid a visit to Kelowna on Tuesday last on business.

Mr. Morsch has commenced the construction of a store and new dwelling on the site recently secured on Robinson Avenue.

The ferry service has much improved in regularity since the recent cold snap. Let us hope that the improved service will continue.

A Valentine party by the young ladies of the Sigma Delta club is one of the coming events. Better stick the date up—Tuesday, 14th February.

Naramata has a daily mail—has enjoyed that privilege for nearly a year. Yet there are some people who still think of the old schedule of Monday, Wednesday and Friday.

The Unity Club were entertained recently at the home of Mrs. McCullough. A very enjoyable session terminated with a delightful sleigh ride by the entire crowd. The next meeting will be held at Mrs. Mulford's, on February 10th.

Mr. D. Munroe who has so ably conducted the business for the past year on Mr. Aikin's ranch has it is said passed in his resignation in order to accept a position with Messrs. Niblock and Endacott. Mr. Munroe's resignation will take effect about the middle of February.

To write a full account of the various social gatherings held this week might well lead to the conclusion that Naramata was a very frivolous place indeed. The fact is that Naramata is a very fine place to spend a quiet winter amongst almost ideal surroundings. Amongst those who entertained recently were Mr. and Mrs. Dean, Mr. and Mrs. Mitchell, Mr. and Mrs. McCulloch and Messrs. Nuttall, Land and Kenyon.

The party held on Thursday of last week, January 19th, by the "January Birds" and known as the "Hard Times" party proved itself a good fun getter. Nearly everyone in town was out and appeared according to instructions in appropriate and ludicrous costume. The fun was conducted thuswise. Upon entering each guest was conducted to the Collector of Customs for examination and he decided upon the fines to be levied for any breach of Hard Times rules. After which he or she was admitted to a seat among the happy throng when a copy of the evening's program was presented to them. The program included a few readings, a quartette, and a number of popular and old time dances. From the popularity of this venture by our January citizens it is probable that this may develop into an annual affair.

**DATES FOR FAIRS SET.**

The dates of the B. C. Fairs for the year have been fixed at the annual meeting of the B.C. Fairs Association. Those covering this district are as follows: Vernon, Sept. 19-21; Kelowna, Sept. 26-27; Salmon Arm, Sept. 28-29; Armstrong, Sept. 21-22; Summerland, Sept. 17-18; Peachland, Aug. 29-30.

The following guests registered at the hotel during the past few days: J. T. Chisholm, J. T. Doble, C. A. Godfrey, A. L. Patrick, R. G. Strachan, R. D. Douglas, D. S. Hardie, G. W. Acton, Colin Brown, and R. B. Borden from Vancouver; E. E. Samson, Vernon; Miss Hazel Wells, Naramata; A. Vaughan and R. M. Winslow, Victoria; H. Copeland and Jno. Brown, Kelowna; D. Williams and F. H. Latimer, Penticton; R. M. Kellar and W. Turnbull, Glencoe; C. O. Douglas, Toronto; H. Whittler, Armstrong; J. H. Black, Winnipeg; C. C. Clark, Kamloops; M. S. Middleton, Kamloops. W. Haug, Kelowna.

# The Summerland Review

## SUMMERLAND BOARD OF TRADE.

### Annual Meeting.

On Tuesday last, at three p.m. in the Council Chamber, the postponed annual meeting of the Summerland Board of Trade was held. There were about fifteen present.

In the absence of both the president and vice-president, Mr. Clouston was appointed to the chair.

Mr. Cordy, secretary to the Board, intimated that it was impossible to present the President's report, owing to his absence from home, but announced that when the report was forthcoming it would be given publicity in the Review.

The minutes of the last general and quarterly meetings were read, approved and passed.

A few new members were nominated, after which Mr. Clouston, as chairman of last year's advertising committee made some very trite remarks re advertising. He pointed out very forcibly that the Board had been very lax in many ways during the past year, and especially in regard to advertising. Many propositions had been forthcoming from his committee and every time they had been turned down. He trusted that during the coming year, something definite would be done in the way of advertising, so that people outside of our municipality might know what we have here. Mr. Stevens also spoke very much to the point on this subject, and suggested what he thought would be the best method of advertising the district, viz. that of inserting a small descriptive pamphlet in the ordinary business correspondence.

Mr. Cordy then gave a brief resume of the work accomplished during the past year.

The election of officers then took place and resulted as follows:

President, R. H. Agur. Vice-president, H. C. Mellor. Secretary-treasurer, C. Stackhouse.

Members of the Council, Messrs. Cordy, English, Richardson, McWilliams, Stevens and Watson.

Standing committees were elected as follows the first named in each case being the chairman:—

Civic improvements, Messrs. Watson, Lipssett and Borton. Finance, Messrs. English, Richardson and May. Immigration and advertising, Messrs. Cordy, Stevens and White. Transportation, Messrs. Ritchie, Stevens and J. M. Robinson. Conventions, Messrs. Cordy, McWilliams and Watson.

Messrs. Agur and Cordy were appointed as delegates to the Convention of the Associated Boards of Trade of the Okanagan to be held at Summerland on Tuesday and Wednesday January 31st, and February 1st, and the general arrangements and entertainment of the delegates were placed in the hands of the Convention committee with full power to act.

It will be noticed in the foregoing list that a new secretary-treasurer has been appointed, viz. Mr. Stackhouse.

Mr. Cordy, who has occupied this position for some considerable time tendered his resignation at this meeting, his work having in-

creased to such an extent that he finds himself unable to act any longer as secretary to the Board. In a few brief but appreciative remarks, Messrs. McWilliams and Watson proposed and seconded a vote of thanks to Mr. Cordy, which was carried unanimously, and Mr. Cordy suitably replied.

The wharf and the Peach Orchard road came in for a little discussion, but nothing of moment was done at the meeting, and at the end of two hours it was adjourned.

The following is the list of special prize winners at the recent poultry show.

Lang Cup; H. Bristow; Borton Shield, W. Dawson; Rowley & Orr Cup, T. Pound; Supply Co. special, V. Taylor; Drug Co. 1st, P. Laneway, 2nd, T. Pound; Peachland best display, W. Dawson; Armstrong do. P. Laneway; Enderby do. T. Pound; Revelstoke do. F. Fluthan; Naramata do. W. Munro; Summerland do. Borton & Lundy, W. J. Robinson, special, T. Pound; Beattie special J. Beattie; J. B. Woods special, Mrs. Cartwright; W. R. Shiel's special, 1st and 2nd, W. Dawson; White & Co, 1st and 2nd, T. Pound; F. Callender, 1st and 2nd, W. Dawson, 3rd, Geo. Anderson, 4th, W. Dawson.

Messrs. Angove and Stinson have purchased from the Supply Company several of their departments, and will open up business in the old Fruit Company's block about the beginning of the month. Mr. Stinson is well known to all, and Mr. Angove to a good many in the community, having resided in the district close upon two years, and we wish the new concern just launched every success. We here would like to emphasize the fact that Summerland depends upon its residents—every dollar expended out of the district means a dollar less in the community, and it never comes back. If we, as a district, support our tradespeople, we are not only keeping the money in local circulation but we are helping to build up a much stronger community, and the tradespeople would not, by any means, be the only ones benefitted—all would share in the general progress made.

The new offices and headquarters of the Lake Shore Telephone Company are now completed and, no doubt, are the finest suite of offices in town. On the ground floor are situated the large general office, private office, and also the long distance call office. On the second floor the telephone exchange and night operators room, also a large storeroom. When the cable arrives from the east, the exchange will be removed from the old office, and all the business of the company transacted in their new premises. The new building is not only the headquarters of the local system, but also of the Kamloops-Okanagan Government system, of which Mr. Stevens is likewise manager.

Dont' forget the lectures to-day on fruit growing, the full program of which we published last week. It will be worth your while to attend as it is utterly impossible to know too much about your business in life.

NEWS FROM THE EAST.

(From our own correspondent.)

Montreal, Jan. 23.—The dearth of school teachers, ever a live topic in the rural districts of the country, bids fair to become even more acute in the near future on account of the legislation foreshadowed by Sir Lomer Gouin at the opening of the Quebec Legislature concerning advancement on educational projects in the Province of Quebec. Sir Lomer says that special inducements are to be offered for the engagement of male school teachers by the different school boards, and that in this way, he hopes to be able to see education in the country parishes equal that of the cities. At present as soon as a school teacher procures a diploma he or she invariably moves westward. Sir Lomer says that now he will have work for them to do near home, and that the expanding west must look elsewhere for its supply.

The speech from the throne also contained another announcement of considerable interest to the whole of Canada. It was that the Government had pledged itself to the furtherance of the good roads movement, and that large sums of money would be asked to build up and maintain public highways.

Excitement in the Houndsditch battle between anarchists and London police some time ago received new impetus here when it became known that orders had been issued from Scotland Yard to all the police and detective departments in Canada to keep a sharp watch on all suspicious characters in their districts, and to be particularly careful to see to it that they were under direct surveillance for the few weeks prior to the Coronation. As a result of this the Dominion police, under Colonel Percy Sherwood, have been most active and a large force has been sent down to the border to inspect trains coming in from the ocean ports of the United States to Canada. This work was being done quietly and effectively but this week Inspector Parkinson held up a party of four at Rouse's Point, coming into Montreal from New York. There were two women and two men in the party. The inspector told them, in his usual quiet manner, that they would not be able to enter Canada. One of the women, becoming angry, drew a long hat pin and tried to stab the inspector.

The consequent small riot in the sleeping car aroused the curiosity of the passengers and the story leaked out. Later the Inspector announced that never before had the authorities turned back so many people, under one circumstance or another, as in the past two weeks.

If there is any faith to be put into figures, Canada's parole system of dealing with criminals has proved its value during the eleven years it has been in operation. Dominion Parole Officer Archibald, in the course of an inspection trip at the St. Vincent de Paul penitentiary, said that of the three thousand and seventy-two prisoners who have been released on parole during that period, two thousand have justified their right to freedom by living the lives of self-respecting and industrious citizens, nine hundred and ninety-nine are still reporting to the authorities, and only sixty-two have found their way back to the courts through the lures of their old habits and activities.

Municipal Clerk.

The basketball game last Friday evening between College and Town, resulted in a win for the former. The score was 11-6 and the game throughout clean and very close. The spectators were very impartial in their cheering, and voted the game as being the best yet held. The juniors of the college also won their match, and with a little more combination, these teams promise good games in the future.

### RICH RED BLOOD.

You Will Never Have It as Long as You Have Dyspepsia.

Just as long as you have dyspepsia your food will not properly digest, and the nutritious elements in the food will not be extracted or absorbed, and impoverished or watery blood will follow.

This condition may not be apparent at first, but it will come just as sure as the sun will rise again.

Any stomach ailment, including all forms of indigestion, can be promptly cured by using Mi-o-na tablets, a scientific treatment unsurpassed.

It stops fermentation, belching of gas and taste of sour food almost at once.

The mighty power of Mi-o-na to invigorate and restore the stomach to perfect condition is known everywhere.

Mi-o-na cures by building up—by banishing the cause. For thin people it is a great flesh builder, because it causes the stomach to give more and purer nutrition to the blood. It cures sea and car sickness and vomiting of pregnancy almost immediately. The Summerland Drug Co. sells Mi-o-na for 50 cents a large box, and guarantees it to cure or money back.

## HYOMEI

(PRONOUNCED HIGH-O-ME)

CURES CATARRH, ASTHMA, Bronchitis, Croup, Coughs and Colds, or money back. Sold and guaranteed by

Summerland Drug Company
