

# The Summerland Review

DEVOTED TO THE INTERESTS OF SUMMERLAND, PEACHLAND AND NARAMATA

Vol. 4, No. 36

SUMMERLAND, B.C., APRIL 5, 1912.

Whole No. 190

## ASSAYIST'S REPORT.

### 184 OUNCES OF SILVER.

Nearly 20 per cent. Lead.

The owners of the local silver mine have received the Assayist's report on samples sent him, and they are highly pleased with the results. The sample, it is claimed, is not such good ore as the mine is now turning out. The assay shows 184 ounces of silver to a ton of ore, and 19.4 per cent. lead. The report is from the Government Assay Office, Victoria.

Silver is worth 56 cents an ounce and lead 4 cents a pound. Thus each ton of ore is worth \$118.56, if in the same proportion as that assayed. From this must be deducted the charges for hauling to the shipping point, transportation charges, and the cost of smelting. This will still leave a margin of about \$75 to \$80 for each ton of ore at the mouth of the pit. The route of the Kettle Valley Railway is within about 300 yards of the tunnel and when that line is built the ore will, of course, be much more valuable. The above, it is pronounced, is very high value for a ton of ore.

It is the purpose of the owners to drift in about 25 feet further along the footwall of the vein in which they are now working, then cross cut the vein. Before the 25 feet is run they expect to cut the old dyke which they were trying to reach by shaft from above, the present working being through a tunnel on the side of Trout Creek Canyon. Already the local holders are in communication with some big mine operators with a view to having them take over and operate the mine.

## TROUBLE IN VERNON HOSPITAL.

### Matron and Nurses Quit in a Body.

The matron and entire nursing staff of the Vernon Hospital, twelve in all, resigned last week in a body. Two of the directors, Messrs. Billing and Ball, have also sent in their resignations. For some time there has been trouble between one of the doctors and the nursing staff, the latter alleging ungentlemanly treatment and abusive language for which they would no longer stand, and hence their resignations. It is stated that all have secured positions elsewhere.

Miss Hadley, one of the nurses, and a niece of Mrs. Angove, spent a day or two in Summerland at the beginning of the week, leaving again on Tuesday morning. She has been engaged by the Nelson Hospital, while most of the other members of the staff have gone to the Vancouver Hospital. All will be paid from the date they left the Vernon institution.

## IMPORTANT REDUCTION IN TELEGRAPH RATES.

### Government Night Lettergrams Fifty Words for Twenty-Five Cents.

On and after April 1, the government will inaugurate a night lettergram or deferred message service, on all government owned lines in the dominion at a minimum charge of twenty-five cents for fifty words, the same as the regular day rate for ten words. There will be a corresponding reduction for longer messages.

The change has been brought about largely through representations from the Yukon and Comox-Atlin districts, which are almost exclusively served by government-owned lines. The government has also arranged with all connecting lines to accept messages at these rates to all parts of Canada and the United States.

Easterners desiring to communicate with the Coast or Yukon territory will be able to avail themselves of these reduced rates and vice-versa.

The assessment of the city of Vernon will this year total over one million dollars.

400,000 coal miners in the Eastern States struck April 1st for higher wages.

4,000 or more of the 5,000 men working on the C. N. R. construction between Kamloops and Hope have quit work. Higher wages were demanded and refused.

## ACCUSED OF MURDER.

### WILSON AND JAMES CHARGED AT KELOWNA.

The desperadoes, James and Wilson, who recently created such a stir in the Okanagan, were not charged with the more serious offence of shooting Constable Aston, being sent up only on the charge of hold-up and robbery, the final result of the shooting being awaited before any other charge was entered. Now that Constable Aston has died from the wounds, the charge of murder has been entered against the prisoners, and they were brought down from the penitentiary at Kamloops for that purpose.

Passengers on the Steamer Okanagan on the Sunday down trip of the boat had a good opportunity to view the prisoners. They were shackled and accompanied by two constables.

The way in which they were placed with the other passengers brought forth some adverse criticism. One lady passenger is reported to have had the pleasure of sitting opposite them at the dinner table. True, the prisoners were shackled and an officer of the law sat on each side of them; yet the lady naturally felt anything but comfortable while at the table. It was felt that they might have dined elsewhere than in the saloon, or at least at another table, or at a time when other passengers were not occupying the saloon.

## FINE HORSE TO BE SOLD.

One of the finest horses in Western Canada is the beautiful Percheron stallion "Duplex," owned by a syndicate of Summerland and Penticton horsemen, organized as the Southern Okanagan Percheron Association. "Duplex" has been held by the Association for four years, and at the annual meeting held recently it was decided either to exchange him for new blood, or offer him for sale. With this object in view, R. H. English was instructed to take "Duplex" to the Calgary Horse Show, which will be held on April 9-13. This celebrated imported Percheron has certainly had many admirers since his arrival from France, and it will be hard to find his equal. His progeny are a very marked improvement over the horseflesh usually found in the British Columbia valleys. He is now eight years old and weighs between two thousand and twenty-five hundred pounds.

A. Richardson, Jas. Ritchie, T. J. Smith, Geo. Gartrell and R. H. English, together with five others of Penticton and district are the present owners.

## PRACTICAL MENU WRITING.

Every housekeeper should be perfectly familiar with the three food products. This is the foundation of menu making. Proteids, carbohydrates and fats are the three divisions into which all foods are classed. Proteids are the muscle builders and are found in meat, beans, peas, eggs and nuts. Carbohydrates are the starches and are found in cereals, sugar and starchy foods. These foods produce fat and energy. Fats, such as oils, butter, lard, etc., give heat to the body. A general knowledge of these food properties as they are found in various foods underlies successful cooking as well as menu making.

A good menu is well balanced in regard to these three food principles. A practical study of these foods is the best way to avoid errors in diet.

Do not serve several foods of the same composition at the same meal, such as potatoes, rice and macaroni. Do not serve bean or pea soup with roast meat, salmon salad and custard.

Try to vary the regular diet. If a heavy meal is served, use a light, easily digested dessert.

To avoid serving several foods of the same composition, have in mind small groups of foods alike in composition. The first and most important group to consider is that of proteid food. Group one—meats, cheese, eggs, nuts, dried peas, beans. If nuts, peas or beans are used for a puree, meat can safely be left out of the menu;—"Woman's World" for March.

## NEW LUMBER YARD.

James Conway is preparing to open a lumber yard in town. He has purchased from James Ritchie a piece of property between the Post Office and the Fruit Union warehouse, on the opposite side of the road. The lot is being graded and a road built through it. An office building is to be erected on the side nearest the Post Office. Mr. Conway already has several carloads of lumber, shingles, etc., on the road.

## REV. MR. DALY ACCEPTS CALL.

The Presbyterian Session received a letter on Monday from Rev. Mr. Daly, of Almont, Ontario, accepting their call to St. Andrew's Presbyterian Church, West Summerland. Mr. Daly is a stranger to the local church and congregation, but comes highly recommended. He is expected to arrive during the latter part of May, and will be inducted into the charge about the end of the month.

## Regular Session of School Board.

### Invite Teachers to Attend Next Meeting, Saturday, May 4.

There was a full attendance at the regular monthly meeting of the School Board, held on Monday last. No matter of outstanding importance came up, and the sitting lasted less than two hours.

The minutes of the regular and special sessions held last month were read and adopted.

Miss Florence Reid, of Mirror Lake, sent in an application to join the school staff here. Her letter was filed.

S. H. Adams drew the attention of the Board to the fact that the Garnett Valley rig was now being driven by a young man. He did not question his ability to drive carefully and capably, but so young a person could not have the same control over the children as an older person.

W. J. Robinson raised the question of the validity of the insurance which had been taken out on the school buildings, on the ground that the company with whom the insurance had been placed had no legal status in this province. It appears that at the time of the payment of the last premium the company had negotiations in hand to obtain registration in this province, but the matter was still in abeyance. The secretary will investigate further.

Mr. Adams brought up the matter of providing awnings over the windows of the school on the south side. The hot days would soon be here, and these windows would need to be sheltered. After a discussion as to the kind of awning most advisable to use, a committee of Chairman G. J. C. White, Dr. J. P. McIntyre and S. H. Adams was named to act in this matter. At the conclusion of the meeting the entire Board repaired to the Central School to look into this and other matters.

Dr. McIntyre reported that Principal Hunting had spoken with him recently, and his remarks raised the question of the relationship of the teachers and the trustees. It was felt that the two bodies were not in close enough touch with each other, and best results could not be expected if this were the case. Mr. White suggested a conference between trustees and teachers, and this is to be acted upon. Since the day of the next regular meeting falls on the date fixed by the Council for the Court of Revision session, the School Board would have to change their date of meeting. A motion was accordingly passed that the next meeting be held on Saturday afternoon, May 4th, at three o'clock, in the Schoolhouse; and that the teachers be invited to be present and confer with the trustees regarding the condition and requirements of the schools, so that the greatest efficiency may be attained.

The secretary reported that the date of Inspector Miller's visit to Summerland was not yet known, but by the next meeting he would know definitely enough to fix the date of the public meeting which Mr. Miller is to address, and at which the ratepayers will have opportunity to discuss the school system of Summerland.

The following accounts were passed:

Salaries	\$500.00
Mrs. J. W. Harris, caretaking	8.00
A. H. Steven, hauling	178.50
J. W. Campbell, do.	57.75
C. S. Stevens, coal	30.90
Supply Company, supplies	13.90
Drug Company, do.	1.10
Wages, work on school grounds	28.45
A. H. Steven, team work	6.60
Total	\$830.20

## WEDDINGS.

### \* Kerstine Washington.

What was looked upon as the most interesting wedding that has taken place in our midst for a considerable time, took place at St. Andrew's Presbyterian Church, West Summerland on the afternoon of Wednesday last, when Miss Mary Washington was indisolubly joined in the happy bonds of wedlock to Mr. David H. Kerstine, of Summerland. Rev. Mr. Miller, of Penticton, was the officiating minister.

The skies were somewhat cloudy, yet the radiance of a real sunbeam flickered across the face of the bride as she was led up to the altar by her brother to the accompanying strains of a wedding march played by Miss Bena Logie. Mrs. Washington, sister-in-law of the bride, was also in attendance.

At the altar the groom had already taken his stand supported by that time-worn veteran, John S. Ritchie, of Glasgow fame. The near presence of John would instill confidence into the most timorous of men on such an occasion in their lives, and the unwavering answer of the groom to the all important question was surely sufficient evidence of this.

The ceremony itself occupied but a short space of time, and ere the assemblage of guests and friends had realized it was over, the happy couple had sped away on the wings of the wind, escaping for a time the showers of rice and confetti which they were to receive later in the afternoon.

A brief reception was held at the home of Mr. and Mrs. Washing-

## C. P. R. REDUCES RATES.

### Company Makes Reductions on Freight Shipped From East to West.

Toronto, Apr. 2.—The Canadian Pacific Railway freight department has decided to reduce rates from Toronto to Winnipeg and points west of that. The new rates will go into effect April 6, and will mean a reduction from two to eight cents per hundred pounds. The figures affecting British Columbia are given as follows:

From class one to class eight and ten, reductions are made. No change is made in class nine. From Toronto the present rates per hundred pounds to Revelstoke for the first eight classes are, \$3.78, \$3.17, \$2.54, \$1.93, \$1.71, \$1.55, \$1.14, \$1.01. Class ten is 98 cents.

ton, after which Mr. and Mrs. Kerstine motored to Summerland there to take the boat on the initial stage of their honeymoon.

If the train of old shoes, top-boots, old rubbers and Teddy bears that followed in their wake as they passed through the streets of our little town is any augury of a happy future, then they have indeed entered upon a happy and prosperous union.

### Robinson-Wetmore.

A quiet home wedding takes place this (Thursday) afternoon at the residence of Mr. and Mrs. Robert Mitchell, Prairie Valley. The contracting parties are Mr. Chris. Robinson, of Prairie Valley, and Miss Wetmore, who recently arrived from England. Mr. and Mrs. Robinson will make their home in the Nappor cottage, Balcom.

## JIMMY'S LETTER TO DAD.

Okanagan College, West Summerland, April 3, 1912.

Dear Dad:

Been great excitement around these parts this last week. Baseball and receptions, and then more baseball and receptions. Last Thursday the Town sent up a few sports, who, with some help from our own boys gave the College team a fine practice, the game ending three to three. Then the College Juniors took a round with the High School team but got beaten by a score of 10-4.

Then the same day the election came off. Great excitement had prevailed and the contest was expected to be close. However, the eloquence of two of the strongest (physically) conservatives won the hearts and hands—especially the hands—of the conservative co-eds, and the day went with a swoop to the liberals. As though to discount the liberal victory the lights refused to act in their usual capacity that night and we had word that they would be off the next night also. For this reason the anticipated good time at Mr. Robinson's was postponed till Saturday night.

Saturday afternoon the Penticton Juniors came up to trounce our Juniors, but left that afternoon with the shoe on the other foot, as they say. It was a fine game, the feature of it being the spectacular catch by Few of a tremendous long fly in the last innings, there being three men on bases and two out. Singularly there was a Much on the Penticton team and a Few on the College nine, while Few was more than Much, who wasn't much. Elliott pitched for the College, while Weir, a student from Penticton, caught.

Saturday night the anticipated treat at Mr. and Mrs. W. J. Robinson's materialized and a very enjoyable evening was spent. Games and contests succeeded each other till supper was served, and some even of the voracious, bemoaned the fact that refreshments were appearing, since it signalled the approach of the end of such a delightful evening. But the end justified the means, as is the doctrine of the Jesuits, and all departed feeling that more could not have been done to add to their enjoyment. Mr. and Mrs. Robinson are ideal hosts and their house is a great place for large gatherings. May their shadows never grow less. Who will be the next?

Sunday was quiet. Do you remember the dedication to Kipling's "Five Nations," how he says after the storm you can remember the indications that one was brewing? Even so it was with us. Calm reigned on Sunday. Unusual? Well, rather! And the storm broke Monday. Surely the youth of this fair land delight to let you know that at least one day in the year they can take you in, sting you, put it all over you, and other things too numerous to mention. Early in the morning, it being the day called All Fools, a faint buzzing was heard in the rooms of the First Year. Curious crowds collected, eager to penetrate the mystery, but all held back. Finally one bold spirit, whether his curiosity overcame his prudence, or he simply forgot, no one knows; but this bold spirit ventured in and was stung. No, it wasn't a bee that did the buzzing, but we never knew what it was. The perpetrators wouldn't tell, and Johnston said, "Go in and see," so it remains a mystery still. Classroom doors which opened alright at the beginning of the period were shut tight at the end. This was likely due to the fact that a rope attached to the doorknob and to some stable object wouldn't stretch well. In the evening an April Fool reception was held in the Dining Room, taking the form of a hod-podge party, with nice cream puffs filled with cotton wool and other delicacies served as refreshments. What with salt in the sugar bowls, and chairs tied together under the tables at breakfast, and a real live baby pig for dinner it was a strident day.

The crowning event of the week was the baseball match, the combined First and Third Years with an extra man against the Faculty and one extra man. The game, scheduled to run seven innings, ran its allotted course, and at the end the score, 20-18 in favor of the combined teams stood a monument to the tremendous efforts of the "has-beens" to overcome the lead the "going to bes" kept over them. At the end of the sixth inning the score was 18-18, but the Faculty let in two runs and then failed to score themselves, going off the field defeated, but not disgraced. A return match would be appreciated. The students turned out in force and roared valiantly. Batteries were: Students—Dupont, Campbell and Corey; Faculty—Baker, White and Stevens. Student team eight men; Faculty team seven men. The Senior baseball team leaves this week for Orville where they expect to play Easter Monday. Hustle this month's check along, please, as I need it. Your loving son, JIMMY.

## ELECTION RETURNS.

### NEW LEGISLATURE IS UNIQUE IN ITS MAKEUP.

#### A Government Practically Without Opposition.

The result of the provincial election was probably a surprise to even the most sanguine conservative. The new government will have to oppose it two socialists—one each from Nanaimo and Newcastle, with possibly, at times, a third, Mr. Foster, an independent conservative. Following are the members of the new legislature and the constituencies they represent:

#### ELECTED BY ACCLAMATION.

Atlin—Dr. H. E. Young, conservative.

Alberni—J. G. C. Wood, conservative.

Chilliwack—S. A. Cawley, conservative.

Grand Forks—Ernest Miller, conservative.

Kaslo—N. F. Mackay, conservative.

Revelstoke—Hon. Thos. Taylor, conservative.

Simikameen—L. W. Shatford, conservative.

Cranbrook—Thos. Caven, conservative.

Richmond—F. L. Carter-Cotton, conservative.

#### ELECTED BY BALLOT.

Cariboo—M. Callanan, conservative; Major Fraser, conservative.

Columbia—Foster, independent conservative.

Comox—W. Manson, conservative.

Cowichan—H. Hayward, conservative.

Delta—F. J. McKenzie, conservative.

Dewdney—W. J. Manson, conservative.

Esquimalt—R. H. Pooley, conservative.

Fernie—Hon. W. R. Ross, conservative.

Greenwood—Jackson, conservative.

Islands—A. E. McPhillips, conservative.

Kamloops—J. P. Shaw, conservative.

Lillooet—A. McDonald, conservative.

Nelson City—McLean, conservative.

Nanaimo—Place, socialist.

Newcastle—P. Williams, socialist.

New Westminster—T. Gifford, conservative.

Okanagan—Hon. Price Ellison, conservative.

Roseland City—Campbell, conservative.

Saanich—Eberts, conservative.

Skeena—W. M. Manson, conservative.

Slocan—Wm. Hunter, conservative.

Vancouver—Hon. W. J. Bowser; A. H. B. Macgowan; G. A. McGuire; H. H. Watson; C. E. Tisdall; all conservatives.

Victoria—McBride; H. B. Thomson; Fred Davey; Behnson; all conservatives.

Yale—A. Lucas, conservative.

Ymir—J. H. Schofield, conservative.

## Dry-Farming Congress.

Hon. Duncan Marshall, Honorary Chairman of the Canadian Board of Control of the Seventh International Dry Farming Congress, to be held at Lethbridge, on October 21—26, is Minister of Agriculture of Alberta, and one of the most progressive agriculture development leaders of the American continent. In educational lines of agriculture, he is in the front rank, while as an organizer of de-

HON. DUNCAN MARSHALL.

monstration farms, experimental stations and seed contests, as well as institutes and fairs, he is par excellence. Mr. Marshall is an enthusiastic supporter of the International Dry Farming Congress, and it has been largely through his efforts that the Dominion Government has granted \$10,000, the Province of Alberta \$10,000 and the business men of Lethbridge \$15,000, to bring to Western Canada the greatest agricultural convention in the world's history.

## SHALL THE MAIL-ORDER HOUSE BE TAXED?

At a meeting of the Board of Trade at Goderich, Ontario, held for the purpose of considering the effect of the mail order business on the merchants and municipalities, a resolution was made:

"That this Board, after careful consideration, is satisfied that the large departmental stores and others which carry on business by the system known as the retail mail order and catalogue systems are doing a serious injury to the merchants throughout the Province, and as they contribute nothing towards the upkeep of the various municipalities:

"Resolved, that an effort be made to remedy, or at any rate, mitigate, this evil, and for that purpose the local Legislature be requested to pass an Act compelling companies and persons conducting such business either to pay a fixed annual license fee to each municipality in which goods are sold and delivered, by said means, or to pay an assessment by way of percentage on the value of the goods so sold and delivered in any municipality other than the one in which they are assessed and have their chief place of business; and further that the various Boards of Trade throughout the Province be communicated with and requested to take this matter up with their local members and urge them to assist in procuring the said legislation."

A bill to provide taxation on the mail order and catalogue business in towns and cities of the Province will be introduced at the present session of the Ontario Legislature by Mr. William Proudfoot, M.P.P. for Centre Huron. Although the detailed plan is not completed, the tax desired will equal the average tax of retail businesses.—Buy Man's Canada.

## USUAL WAY.

"Bought a farm, eh? Pay cash for it?"  
 "Well, I paid cash for what it was worth, and gave a mortgage for the balance."

A city girl who was watching a farmer milking a cow adjusted her glasses and said, "It is all very plain, except that I do not understand how you turn it off."

## DEPARTMENT OF LANDS.

### WATER BRANCH.

TAKE NOTICE that the Board of Investigation, acting under Part III of the "Water Act," will meet at Summerland, on the 19th day of April, 1912, at 10 o'clock in the forenoon, to hear and determine claims to water rights existing on the 12th of March, 1909, on—

- Bath Creek.
- Boucher-Garden Spring.
- Canon Creek.
- Commons Creek.
- Darke Creek.
- Darke Lake.
- Eneas Creek.
- Fish Lake.
- Fox Creek.
- Garnett Lake.
- Kereemos Creek.
- Prairie Creek.
- Sheep Creek.
- Shingle Creek.
- Trout Creek.
- White or Clearwater Creek.

and their tributaries and to unnamed streams in the vicinity.

On the 22nd day of April, 1912 at 10 o'clock in the forenoon, at Peachland, to hear and determine claims to water rights existing on the 12th of March, 1909, on—

- Bald Range Creek.
- Bear Creek.
- Big Horn Creek.
- Cedar Creek.
- Cranberry Creek.
- Clover Creek.
- Davidson Creek.
- Deep Creek.
- Duncan Creek.
- Esparron Lake.
- Fern Creek.
- Hill or Venner Creek.
- Headwater Lake.
- Hill Creek.
- Jacob Creek.
- Jack Creek.
- Keep Creek.
- Finlay Creek.
- Lapsley Creek.
- Miller Spring.
- McDougall Creek.
- Power Creek.
- Rashdale Creek.
- Pigeon Creek.
- Smith Creek.
- Shannon Creek.
- Speer Lake.
- Spring Creek.
- Spruce Creek.
- Tamarack Lake.
- Trepannier Creek.
- Venero Creek.
- Venner Creek.

and their tributaries and to unnamed streams in the vicinity.

On the 24th day of April, 1912, at 11 o'clock in the forenoon, at Okanagan Centre, to hear and determine claims to water rights existing on the 12th of March, 1909, on—

- Beaver Lake.
- Balagno Lake.
- Clear Creek.
- Cattail Lake.
- Clark or Horse Creek.
- Duck Lake Creek.
- Duck Lake.
- Echo Lake.
- Falls Creek.
- Island Lake.
- Lake of the Woods.
- Fahni Lake.
- Long Lake (south end).
- Ribblesworth Creek.
- Short or Biche Creek.
- North Fork Shorts Creek.
- Torrent Creek.
- Sucker Creek.
- Wood Creek.

and their tributaries and to unnamed streams in the vicinity.

On the 28th day of April, 1912, at 10 o'clock in the forenoon, in the Court-house at Vernon, to hear and determine claims to water rights existing on the 12th March, 1909, on—

- Aberdeen Lake.
- Beaver Creek.
- Brower Creek.
- Brown Creek.
- B X or Deep Creek.
- Cedar Creek.
- Coldstream Creek.
- Cottonwood Springs.
- Diamond Dry Lake.
- Dry Creek.
- Deer Creek.
- Fish Lake.
- Five-mile Creek.
- Girod Creek.
- Goose Lake.
- Gurney Creek.
- Haddo Lake.
- Loig Lake Gulch.
- Louis Creek.
- Lulluwaupo Creek.
- Irish or Cayotte Creek.
- Jones Creek.
- King Edward VII Lake.

- Larch Creek.
- Le Duc Creek.
- Long Lake Creek.
- Granite Creek.
- Long Lake (north end).
- Long Lake Creek.
- Lyons Irrigation Ditch.
- Latch Creek.
- Mosgrove Creek.
- Mud Lake.
- Meakins Creek.
- Mountain Creek.
- Nelson Creek.
- North Branch Creek.
- O'Keefe Creek.
- Otter Lake.
- Otter Creek.
- Porteous Creek.
- Reets Creek.
- Rocky Gulch.
- Six-mile Creek.
- Siwash Creek.
- Swan Lake.
- Swan Lake Creek.
- Stoney Creek.
- Sturts Creek.
- Three-mile Creek.
- Vernon Creek.
- Whiteman Creek.

and their tributaries and to unnamed streams in the vicinity.

On the 29th day of April, 1912, at 10 o'clock in the forenoon, at Lumby, to hear and determine claims to water rights existing on the 12th March, 1909, on—

- Beaver Jack Creek.
- Bissette Creek.
- Bonneau Creek.
- Big Creek.
- Blue Spring Creek.
- Bigg Creek.
- Burnyeat Creek.
- Cherry Creek.
- Copper Creek.
- Cashmere Creek.
- Christie Creek.
- Dailey Creek.
- Deafy Creek.
- Dutchman Creek.
- Eight-mile Creek.
- Fall Creek.
- Harris Creek.
- Ireland Creek.
- Mabel Lake.
- Mill Creek.
- Medora Creek.
- Nicklen Creek.
- Putman Creek.
- Perry Creek.
- Rollings Lake.
- Spider Creek.
- Shuswap River.
- Slack Creek.
- Sugar Lake.
- Silver Springs Creek.
- Sow Sap Creek.
- Spallumcheen River.
- Vance Creek.

and their tributaries and to unnamed streams in the vicinity.

Parties who presented claims to the Board in 1910 and have received licences in substitution of the records need not present any statement of claim.

Dated at Victoria, B.C., 28th February, 1912.

By order of the Board.  
 J. F. ARMSTRONG,

**The HOME CIRCLE.**  
 Crude Thoughts From the Editorial Pen.

ALL THE WORLD OVER Easter is a season of great rejoicing, as everything begins to cast off the dinginess of winter and nature herself exhibits the spirit of resurrection.

THE EASTER FESTIVAL of our forefathers covers a period of fifteen days. The week beginning with Easter Sunday was almost entirely given over to sport and games and general merrymaking.

EASTER is a moveable festival. It is always the first Sunday after the full moon which happens upon or next after the twenty-first day of March; and if the full moon happens upon a Sunday, Easter day is the following Sunday.

THE SACRED FESTIVAL of Easter has been appropriately termed "the queen of festivals." It has been observed from the foundation of the Christian religion, and is celebrated in every part of the Christian world with great solemnity and devotion.

THERE are many superstitions connected with Easter Sunday which are significant of the season, and are almost as imperative as laws. One of these is the necessity of having something new to wear on this day in order to insure happiness for the coming year. Hence the Easter bonnet.

PALESTINE, the spot where the resurrection we commemorate took place, is supremely emblematic of the season, because there the spring suddenly bursts forth and all the verdure and flowers spring up as though a magic wand had been waved over the land, for the excessive dreariness of winter is broken in the orient when it is still winter in western lands.

OF ALL the holidays of the year, Christmas and Easter stand more prominently on the page of history than any others. Throughout all the initiations and vicissitudes that have entered into the world's history during the past two thousand years, the two festivals that commemorate respectively the birth and the resurrection of the Man of Nazareth still shine with a lustre that remains unfaded after a lapse of twenty centuries.

WHILE EASTER REMINDS us of resurrection, it may benefit us to call fresh to memory a few facts regarding the burial of the Son of God. Joseph was that mourner, sexton, livery man. He had the entire charge of the whole occasion. Only four people attended the burial of the King of the Universe. Let this be consolatory to those who through small means or lack of large acquaintance, have but little demonstration at the grave of their dead. It is not necessary. A long line of glittering equipages, two rows of silver handles, casket of costly wood, pall bearers scarfed and gloved, are not necessary.

**EASTER IN ATHENS.**

THE STORY of the resurrection is told at Athens amid a blaze of silver and gold. For some time before Easter, Athens wears a picturesque aspect. This is due in great part to the number of shepherds who, with their flocks, have come down from the mountains and are camped in every available open space, engaged in selling their lambs. There is no family so poor as not to break the Lenten fast with an Easter lamb, the value of which is about a dollar, and a veritable massacre of the innocents is going on.

It is late on Saturday night that the real Easter celebrations take place. An immense crowd fills all the approaches to the cathedral and such parts of the church as are not kept clear. Without, a raised platform has been erected and decorated with evergreens.

In the cathedral the royal princes, the ministers of state and the high functionaries of the kingdom assemble to attend the midnight service. As the hour of midnight approaches, the metropolitan, with his assistants, preceded by the cross and banners, advance with lighted tapers. The various notabilities light their tapers from that of the archbishop, and so the sacred fire is communicated to the crowd.

As the midnight hour sounds and Easter succeeds the last day of Lent, the metropolitan, a blaze of silver and gold with his tiara, the silver gospel and the episcopal crozier, ascends the platform outside the church and proclaims to the assembled people the tidings "Christ has risen."

**EASTER PLANT LEGENDS.**

The Christian legends connected with plants generally explain their behavior during Passion week. The aspen still shivers with remorse because when Christ passed, it had boldly faced the heavens instead of bowing its head in company with the other trees. The Savior cast one look on it and the memory of that sorrowful glance is handed down even to this generation.

The willow was used for the scourges and ever since it has drooped its arms in misery. The elder is commonly supposed to be the tree on which Judas hanged himself, and it is not even to be touched as firewood. However, it affords a safe refuge in a storm, for even lightning will not daunt to strike it. A fungus that grows on the elder and is now known as "Jew's ears" was originally called "Judas' ears."

The wood sorrel was standing at the foot of the cross and received some drops of the precious blood. Those who still carries. The Italians have the same legend and call this little blossom "alleluia," as if the very flowers rejoice in the great gift of the world. The scarlet anemone, too, is said to bear the stains of Christ's blood.

# The Summerland Review

PUBLISHED BY THE REVIEW PRINTING & PUBLISHING COMPANY LIMITED,  
RALPH E. WHITE, MANAGING DIRECTOR

SUBSCRIPTION RATES: \$2.00 PER YEAR, IN ADVANCE. SIX MONTHS \$1.00.

### Advertising Rates:

LEGAL NOTICES.—Twelve Cents per line for the first insertion; Eight Cents per line for each subsequent insertion.  
LAND NOTICES.—\$7.00 for 60 days, \$5.00 for 30 days.  
WATER NOTICES.—30 days, 150 words and under, \$3.00; each additional 50 words, \$1.00.  
THEATRICAL, ETC.—50c. per inch for first insertion, and 25c. per inch each subsequent insertion.  
LOCAL NOTICES or Readers, immediately following regular local, 20c. per counted line; 10c. per line each subsequent insertion. Half these rates when accompanying display advertisements.  
LODGE NOTICES, Etc., 25c. per week, per column inch.  
FOR SALE Advertisements, Etc., 3c. per word first week; 1c. per word each subsequent week.  
Transient Advertisements payable in advance.  
Rates for Contract Advertisements furnished on application.  
Copy for change of contract advertising must be in the hands of the printer not later than Wednesday noon to insure publication in the next issue.  
In accordance with schedule of prices adopted throughout the valley, charges for advertising are now being made weekly. Heretofore when five issues were made in one month the result was a loss. By the new method, customers are charged each week for just the amount of space used.

FRIDAY, APRIL 5, 1912.

### THE SINGLE TAX.

WHILE CITIZENS of Summerland are living under all the advantages of an equitable mode of taxation and have become so accustomed to the plan that they have almost forgotten that it is not yet universally adopted, it will cause a considerable degree of selfish satisfaction, and at the same time, pity for the other fellow to remember that the struggle for a tax system fair to all still goes on and in yet but comparatively few places are the people even ready to consider adopting such a system. Even where the wisdom of Henry George's idea is admitted there is much trouble in devising a plan to change from the old way of taxing everything to the single land-tax proposed by the great economist and so easily adopted in the beginning of a new municipality.

Now that the practicability of the single land tax has been demonstrated many communities are working to that end. In setting the pace we have gained considerable reputation. Speaking of "the battle for equitable taxation," Julian Sale, in the Canadian Courier for March 30 says:

"Chilliwack, Summerland, Penticton, Kelowna in British Columbia have followed the lead. Calgary, Edmonton, and Regina have all made a beginning. And Winnipeg has, according to a press despatch, only a few days since unanimously declared for the exemption of improvements from taxation. The government of British Columbia has just received the report of a commission; appointed some time since, which declares in favor of further concentration of taxation upon land values. The Alberta Government moves somewhat faster, the Hon. Clifford Sifton having introduced a bill making the system obligatory (but by the Vancouver method, carefully and gradually) in the Province of Alberta. Across the line in Washington and Oregon the same condition prevails. Seattle, always jealous of Vancouver, is impatient to apply the stimulus which has proved so effective in the case of its rival city. And Portland, Oregon, is the centre of a state-wide agitation with similar aim.

These western men are not faddists. If they are radicals, they are probably not aware of it. They are plain, hard-headed, sensible business men."

### YOUR DUTY AS A CITIZEN.

NO COMMUNITY, city, town or district will ever prosper, nor approach anything like its possibilities without the united effort of its citizens. The citizens should strive to help each other, for in helping others they invariably help themselves and the whole community is benefitted. There is no man who cannot assist in the growth, prosperity and development of his town. However small his influence it has its effect. No town will prosper and grow when a lack of enterprise and push on the part of its citizens is felt. It is the duty and desire of every true citizen to help his neighbors, encourage business of all kinds, assist in the improvement of his town by making it attractive and giving it a home-like appearance. When this is done people from a distance will form a good opinion of the place, and it will be an inducement for them to locate with us and become permanent and substantial citizens.

### HOW TO KILL YOUR TOWN.

Buy from peddlers as much and as often as possible.  
Denounce your merchants because they make a profit on their goods.  
Glory in the downfall of a man who has done much to build up your town.  
Make your town out a bad place and stab it every chance you get.  
Refuse to unite in any scheme for the betterment of the material interests of the people.  
Tell your merchants that you can buy goods a great deal cheaper in some other town and charge them with extortion. If a stranger comes to your town tell him everything is overdone, and predict a general crash in the near future.  
Patronize outside newspapers to the exclusion of your own and then denounce yours for not being as large and as cheap as the city papers.  
If you are a merchant don't advertise in the home paper, but compel the editor to go elsewhere for advertisements and howl like a sore-head because he does so. Buy a rubber stamp and use it. It may save you a few dimes and make your letter heads and wrappers look as though you were doing business in a one horse town.  
If you are a rancher curse the place where you trade as the meanest on earth. Talk this over to your neighbors and tell them the men are robbers and thieves. It will make your property much less valuable; but you don't care.

THE purpose of store advertising is not merely to sell goods, but to sell more goods—make friends, to build up a patronage that will not only stick but grow. Newspapers reach the greatest number of people in the immediate vicinity in the most natural way, at the least expense, and they are therefore the best of all mediums for stores. In a newspaper you follow the lines of least resistance—you follow with the stream—you talk to an audience already assembled, to the people who want to read—their mental cosmos is right—they are on your wire, and they won't ring off if you hold their interest. Attraction is the basis of all advertising—the store is the sun, the customers the planets who revolve around it.

## A New Phase of the Apple Trade.

### Tendencies Which Indicate that Canada Must Wake Up.

By the Canadian High Commissioner.  
THE REPORTS recently appearing in the newspapers that a million barrels or apples have been received in the United Kingdom this season from Nova Scotia, appear to be substantially correct and it is estimated that another three or four hundred thousand barrels remain to be shipped.

The condition of those already received has not been uniformly good, the keeping qualities having been below the average, owing, it is thought, to the fruit having ripened too quickly. The huge quantity, combined with the disappointing quality, has had an adverse effect on prices.

A member of a well-known firm in the trade states that, although the number of barrels received was so great, he had not heard of one which had been branded "falsely marked," but he had had one very bad instance of fraudulent packing and had heard of several others.

A new feature will be introduced into the trade very shortly by the arrival of six thousand cases of apples from Cape Colony, but these will compete not with Canadian, but with Australian fruit.

It is becoming more evident each year that apple growing on scientific lines is making progress in Britain, and that the efforts which have been made for a number of years to bring about an improvement in the apple orchards here are meeting with success. The better kinds of apples are being planted, the varieties are being limited and the numbers are such that the produce can be marketed in commercial quantities; the trees are being sprayed and the orchards cultivated, and the practice of grading and carefully packing in boxes being greatly extended.

The development has been such and promises so well that a leading firm with branches at all the principal ports, and hitherto engaged in the import trade only, has been compelled to start a department to deal with English fruit. They express the opinion that it will not compete with the Canadian product, but if the movement grows, as it has every appearance of doing, it is difficult to see why the late native apples will not influence the market for the earlier Canadian importations, especially if the latter are not of very good quality.

As the improvement in the English apple is likely to raise the quality standard of the demand generally, the necessity will be perceived for continued watchfulness and effort on the part of Canadian growers.

One of the most significant features of the season was the show of apples which was held last month at Ashford, Kent. There have always been exhibits of specimens of the fruit at horticultural and other shows, but an exhibit, graded, packed and in quantities on commercial lines, is quite a new departure.

The fact that such a show was successfully held in December indicates that the competition to which allusion has been made, is quite possible. The champion cup exhibit, consisting of two boxes of Queen Elizabeth apples, was sold at the close of the show for £3 10s., about a shilling a pound, but this is not a criterion of value, as the bidding at the auction ran the price up for advertising purposes. The remainder, five hundred and fifty boxes weighing about ten tons, and including among other varieties Newton Wonder, Bramley's Seedling and Gasgoine's Scarlet, were disposed of at very satisfactory prices.

As further evidence of the headway which is being made, the report may be mentioned that considerable quantities of English apples have been exported to South America.

### CO-OPERATIVE MARKETING.

The foundation of Denmark's success with market eggs, which has long been held up to the world as a model, was co-operation. It is said also to have been the pioneer in this method. Professor Brown says that Ireland, Holland, Hungary, Italy and Sweden are following Denmark with equal benefit. With central control and guarantee of quality, and with every member interested in maintaining highest quality in the produce, average values of Danish eggs as bought by Great Britain have increased 67 per cent. since 1896. It has been said times without number, that farmers are too suspicious to co-operate. But many kinds of productive work are tending towards co-operation in selling, and satisfactory success lies that way if each member does fairly by the rest. This is the key to the whole matter.

All co-operating plans depend largely upon having a central authority to insist on quality, to formulate standards of work, to promote publicity and make sales.

**SYNOPSIS OF COAL MINING REGULATIONS**

COAL mining rights of the Dominion, in Manitoba, Saskatchewan and Alberta, the Yukon Territory, the North-west Territories and in a portion of the Province of British Columbia, may be leased for a term of twenty-one years at an annual rental of \$1 per acre. Not more than 2,560 acres will be leased to one applicant. Application for a lease must be made by the applicant in person to the Agent or Sub-Agent of the district in which the rights applied for are situated. In surveyed territory the land must be described by sections, or legal subdivisions of sections, and in unsurveyed territory the tract applied for shall be staked out by the applicant himself. Each application must be accompanied by a fee of \$5, which will be refunded if the rights applied for are not available, but not otherwise. A royalty shall be paid on the merchantable output of the mine at the rate of five cents per ton. The person operating the mine shall furnish the Agent with sworn returns accounting for the full quantity of merchantable coal mined and pay the royalty thereon. If the coal mining rights are not being operated, such returns should be furnished at least once a year. The lease will include the coal mining rights only, but the lessee may be permitted to purchase whatever available surface rights may be considered necessary for the working of the mine at the rate of \$10.00 an acre. For full information application should be made to the Secretary of the Department of the Interior, Ottawa, or to any Agent or Sub-Agent of Dominion Lands.

W. W. CORY,  
Deputy Minister of the Interior.  
N.B.—Unauthorized publication of this advertisement will not be paid for.

**TO CANADIAN ARCHITECTS.**

Competition For New University Buildings To Be Erected At Point Gray, Near Vancouver, British Columbia.

The Government of British Columbia invite Competitive Plans for the general scheme and design for the proposed new University, together with more detailed Plans for the buildings to be erected first at an estimated cost of \$1,500,000. Prizes of \$10,000 will be given for the most successful Designs submitted. Particulars of the competition and plan of site may be obtained on request from the undersigned. The designs to be sent in by July 31st., 1912, addressed to THE MINISTER OF EDUCATION, Parliament Buildings, Victoria, British Columbia.

**Water Notice.**

**FOR A LICENCE TO USE WATER.**

NOTICE is hereby given that The Municipality of Summerland, of Summerland, British Columbia, will apply for a licence to use 0.12 cubic feet of water per second from a spring on south side of Trout Creek, a stream flowing in an easterly direction and emptying into Okanagan Lake near Gartrell P.O., B.C. The water will be used for Domestic purposes, under a notice of application for a licence to take and use water, posted herewith, on the land described as D.L. No. 1078, 3104, 440, 441, G.I. Oycous. This notice was posted on the ground on the 22nd day of March, 1912. The application will be filed in the office of the Water Recorder at Vernon, B.C. Objections may be filed with the said Water Recorder or with the Comptroller of Water Rights, Parliament Buildings, Victoria, B.C.

**Local News Items.**

Mrs. Percy Thornber is visiting at Kelowna for a few days.

Mrs. O. Vaughan has returned from a two weeks' visit at the Coast.

Mr. and Mrs. W. J. Robinson entertained the College students and faculty last Saturday evening.

We learn that all the stores both in Summerland and West Summerland will be closed on Easter Monday.

Norman Phinney, who is employed with W. R. Megaw, Vernon, spent Monday with his parents.

V. Taylor, who sold his business some time ago to A. J. Beer, has removed with his wife and family to Kamloops.

Mr. and Mrs. E. B. May, who have been in California for some weeks, are expected home next Monday night.

It will pay you to study carefully the advertisements in this paper. Some exceptional bargains are being offered.

Rev. Mr. Herdman, of Kelowna, will occupy the Presbyterian pulpit both morning and evening next Sunday, April 7th.

Miss Hadley, one of the nurses who resigned from the Vernon Hospital, spent a few days in Summerland this week with her aunt, Mrs. S. Angove.

There is a report from Peachland to the effect that an octogenarian widower of that town is soon to take unto himself a wife, a maiden lady of some three score years.

The new scow being built for the Kelowna-Westbank Ferry Company by the Summerland Boat Works was floated on Monday and is now receiving its finishing touches at the shops of the builders.

The first game of the Valley Football League to be played in Summerland is dated for Saturday next, the 6th inst., on the College Campus, when the local team will meet Penticton.

A Vocal and Instrumental Recital is to be given by the Music Department of the College, on Friday evening, the 12th inst., in the Gymnasium. Tickets may be purchased at the door.

A District Sunday School Convention was held in Kelowna Tuesday and Wednesday of this week. A number of delegates from the different Sunday Schools here went up on Tuesday morning's boat.

It is reported that W. R. Megaw, of Vernon, is opening a branch warehouse here under the charge of R. H. English. A stock of farm implements and machinery will be carried. Mr. English's old stable has been remodeled for the purpose.

"Jimmy's Letter to Dad"—always interesting—is unusually so this week. It pictures truly the care-free, playful, jolly life of the college student. His report of the numerous events in connection with college life during the week, including social gatherings, April fool pranks, baseball games and other events, makes a full and interesting letter.

Mr. Elgin Myers, private secretary to President Warren, of the Kettle Valley Railway, and son of the late E. Myers, Esq., Q.C., of Orangeville, Ontario, spent Thursday and Friday with his father's friend and former family physician, Dr. C. M. Smith.

Hon. G. H. V. Bulyen, Lieutenant-Governor of Alberta, is expected to arrive in Summerland Thursday night. While here he will be the guest of his sister Mrs. R. C. Lipssett. Governor Bulyen has been in Peachland for a day or two looking after his interests there.

The first regular practice shoot of the season of Summerland Rifle Association will take place on Saturday, 6th inst. A rig will leave Gartrell at twelve sharp, Elliott's store 12.30, and the Municipal Buildings, West Summerland at 1 o'clock. A good turnout is expected.

The power plant in the electric light station is not yet giving satisfaction. The armature of the exciter was returned from Vernon Saturday and replaced in position, but the trouble was only partly overcome, and rapidly became worse. A spare armature has been ordered from Vancouver. It is hoped there is one of the required style in stock, otherwise it will have to come from Hamilton, Ontario.

**Local News Items.**

Mr. J. M. Robinson is expected to return to the Okanagan about the 15th inst.

A team of horses is being imported by E. R. Simpson. He made the purchase at Vernon this week.

Jack Conway is making a short visit to his parents in Summerland, having arrived on Wednesday night's boat.

Arthur Wilson, the colored porter who was employed at the hotel about two years ago, has returned to his former position.

Word from Ottawa states that the Kettle Valley Railway is to be given a subsidy for the construction of a branch line from Penticton to Oroville, on the international boundary line.

A. D. Adamson goes to Aspen Grove, Nicola Valley this week, where he will probably remain for some time. It is understood that he is interested with a number of others in a large ranch property there.

A stereopticon lantern lecture will be given tomorrow (Friday) evening at the Lakefront Baptist Church by Rev. G. J. C. White. The views will be of the passion scenes from the life of Jesus. Everyone is welcome.

Word from Vancouver is to the effect that Miss Ruth Fulton has been seriously ill with pleuro-pneumonia. The latest report, however, is an encouraging one. Many Summerland friends of Miss Fulton will wish her a speedy recovery.

Mr. and Mrs. Frank A. Edgar registered at Hotel Summerland last Friday, coming here from Pueblo, Colorado. Both are natives of Ottawa, and Mr. Edgar has been engaged for survey work in connection with the Red Apple Valley (formerly Meadow Valley) property.

**MANY CHANGES IN HOTEL STAFF.**

**A New Manager.**

The new manager of Hotel Summerland, W. H. Peacock, is now in charge of that hostelry. I. E. Beach, who has been managing for some months has taken charge of the restaurant and will give personal attention to the ice cream and soda fountain department. Miss Brunton, the housekeeper, has returned to her duties at Hotel Naramata, and is succeeded here by Mrs. Peacock. Mr. Peacock, who is a brother to Mrs. W. J. Robinson, came direct here from Winnipeg.

J. M. McDougald, who has been in the restaurant during the winter, has again taken up electrical work. A new waitress is expected this week, and another, together with two chambermaids, a week or two later. Mrs. Reid, who has been on the staff for some time is going to Vancouver, while another of the staff goes with Miss Brunton.

**THE GARDEN BEAUTIFUL.**

Probably the most popular flower in the amateur's garden is the dahlia. For rare beauty of form and color it is hard to beat, seeing it is so very easy to grow, and it presents endless variety.

There is no flower better adapted to the gardens of people who have only a little time to spare to attend their garden plants. It is, in fact, spoken of as "the busy man's flower."

There are four types of dahlia. The Show, most commonly grown, Decorative, Pompom and Cactus. The decorative dahlia is favored by many people because of its large size, flowers sometimes measuring ten inches across. The cactus dahlia resembles the chrysanthemum.

Where large blossom is wanted, rich soil is required, and frequent watering in a dry season. A good plan is to mulch well with manure when the plants are about a foot high. By doing so the plants will bloom better, both in size and coloring. Before planting the soil should be well dug at least twice in the spring. The best time to plant is during April after all danger of frost has passed, and with any success at all the flowers should bloom early in July.

The roots should be dug up in the fall, and stored in the cellar away from frost.

Short prayers often last the longest.

As one who folioth a newspaper in a high wind, so is he who argueth with an angry woman.

Letters intended for insertion must be authenticated by the name and address of the writer, not necessarily for publication. The opinions of correspondents are not necessarily those of the Review.

### LOCAL OPTION LEAGUE CHANGES.

Local Option League, 48 Flack Block, Vancouver, B.C. March 26th, 1912.

The Editor, The Summerland Review, Dear Sir:

For the information of your readers permit me to state that the following changes have taken place in the staff of the Provincial Local Option League.

1.—Mr. A. B. McNeill, of Vancouver, has been appointed president in place of Mr. R. H. Cairns, resigned.

2.—Dr. Ernest Hall has been appointed general secretary without salary, taking the place of Rev. Dr. Spencer, resigned.

3.—Miss Maggie Campbell, office secretary, who through ill health has resigned is succeeded by Miss Myrrha MacFayden.

4.—The Leagues of the Province are taking a plebescite on the question of changing the name to 'The British Columbia Alliance.'

5.—The work of local option and provincial prohibition will be continued until the goal is reached.

6.—Rev. Dr. Spencer will evangelize, lecture on prohibition and other subjects bearing upon the great moral issues in Western Canada and will assist the League in any way he can.

Letters will always find him addressed to this office.

D. SPENCER.

### APPLE BOXES.

#### Dissatisfaction in North-West States With Proposed Regulations.

Spokane, Wash., Apr. 1.—Growers of winter apples throughout the Pacific Northwest States, the commercial orchards of which contributed 14 per cent. of the total orchard production of the United States in 1911, are already lining up their forces to defeat a bill that is to be brought forward at the next session of Congress to regulate the size of apple boxes. The box used as a standard the last ten years in the Pacific slope and intermountain country is 2,173.5 cubic inches, while the national apple box proposed in the Sulzer bill, recently abandoned, specified 2,352 cubic inches.

Since the bushel measure as figured out by an English captain of industry, a few centuries ago, a bushel of apples has consisted of a bushel measure heaping full, with a cone six inches above the rim, or 2,747.715 cubic inches, to be arithmetically exact; but on the other hand, the United States customs officials, in the absence of direct legislation on the subject, contended that a bushel of apples is like any other bushel measure, and should contain only 2,150.42 cubic inches, or less than the North western box.

Now comes a decision by Judge Marion DeVries, of the United States Court of Customs Appeals, who holds in brief as follows:

"The bushel has come, by usage in trade and commerce, to be with us the Winchester bushel of English law prior to 1826, the date of the adoption of the imperial bushel in England. By a statute of Anne, A.D. 1801, recognizing a trade usage already in force, apples and pears were required to be sold by heaping measure, and in the absence of any specific declaration by Congress, as to the contents of a bushel of apples or the like, it will be presumed that a bushel of today is a bushel of English law and custom in 1776, and a bushel of apples is not a struck Winchester bushel, but that measure heaped."

#### "IN LOVE."

"Girls in love ain't no use in the whole blessed week. Sundays they're a-lookin' down the road, expectin' he'll come. Sunday afternoons they can't think o' nothin' else 'cause he's here. Monday mornin' they're kind o' dreamy and slippy and good for nothin' on Tuesday and Wednesday. Thursday they git absent-minded an' begin to look off toward Sunday ag'in, an' mope around and let the dishwater git cold right under their noses. Friday they break dishes and go off in the boat room and snivel and look out o' the window. Saturdays they have queer spurts o' workin' like all p'assed, and spurts o' frizzin' their hair. An' Sunday they begin it all over ag'in."

## MAKING SPYS BEAR IN THREE YEARS.

### ANOTHER FRAUD EXPOSED.

"Almost every year some new fake in the horticultural line makes its appearance in Canada. The variety and ingenuity of these frauds is astonishing. Even more astonishing, however, is the number of farmers and fruit growers who are bitten by them: We have had powders, which, when injected into trees would be carried by the sap through all the branches and result in phenomenal yields. Powders, that would protect the trees against all insect life and insure large crops, have had their day. Seedless apple trees that were going to revolutionize the fruitgrowing industry have appeared and disappeared. Now," says the Canadian Horticulturist, "we hear of a Northern Spy apple tree grown by a new budding process, that will insure trees coming into bearing inside of three years."

"The Canadian Horticulturist four years ago warned farmers and fruit growers against a similar fraud. Agents of a Michigan firm were telling their prey that their firm practiced a system of grafting that ensured superior stock in every respect. Probably it is the same bunch of rascals that is now operating but substituting a budding fraud for a grafting one."

"No system of grafting or budding can make Spy trees bear in three years. Even top grafting, with which the methods talked of by these fakirs should not be confounded, cannot make Spy trees bear so early. It is well known that Spy top-worked on Tolman Sweet, Pewaukee, Haas, Wallbridge, McMahon's White and other hardy varieties of early maturity and better root systems will come into bearing sooner than when propagated in the ordinary way, from seven to nine years compared with twelve to fifteen years. Reliable Canadian nursery concerns offer trees top-worked on these varieties."

"These fakirs are also offering 'black knot proof' cherry trees and plum trees. No variety of these is absolutely proof against this disease. Waugh says in 'Plums and Plum Culture': 'It occurs on all sorts of plums' (contrary to the statements of the tree peddler.) Certain vigorous growing varieties are less liable to be affected than others, but none are immune. To claim that plum and cherry stock, grown anywhere, by any process, is 'black knot proof,' is false."

"The agents who represent these concerns are smooth talkers. They know that their frauds will not be discovered by their victims before several years, which enables them to get at least a part of the money they are after and get safely out of the country before their victims discover that they have been defrauded. Such fakirs operate only once in the same locality. They will appear in some other district next year. Their customers have practically no redress as no action can be taken through the Canadian courts without great trouble and expense. Farmers and fruitgrowers, take heed!"

### THE TRANSIENT TRADER AS A DESTROYER.

Merchants of Edmonton, Alberta, are strenuously objecting to transient traders arriving in busy seasons, and with little expense and small license fees, departing "in the night" with the cream of the trade.

There are so many short-sighted city councils in existence that municipalities are suffering in all parts of Canada with the transient trader or evil. The Edmonton merchants contend that transient traders suddenly appear in the city when there is the greatest possible opportunity for selling their particular lines, skim off the best of the trade and depart suddenly, as soon as their season is over, with the people's money.

If this money were spent among permanent merchants, and kept at home, where it would do some useful building for the benefit of the city, the municipality would undoubtedly reap greater advantages.

It is, therefore, a short-sighted policy on the part of city councils to encourage with small fees transient traders to come into the city.

The merchants, at considerable expense, are permanent assets and help build up the municipality. The transient trader, on the other hand, helps pull it down.—Canadian Grocer.

### Will Its Style Suit Your Style

Modern methods of ready-to-wear clothes production have removed man's greatest clothes problem. In the days of custom tailoring you had to imagine how the chosen material would look on you, when made up in the style you selected.

To-day, you can go into a good

shop and try on suits until you find the cloth and style that suit you best.

When everyone admits this great advantage, why not go just a step further and be careful to purchase in a shop where there is endless variety to choose from?

We can show you—in the "Fit-rite" line of high grade clothes—every type of suit and overcoat sanctioned by the prevailing mode.

Shaughnessy Ave. Summerland, B. C.

IT CERTAINLY PAYS TO  
ADVERTISE IN "The Review."

### The Calgary Fruit Combine.

Retail Merchants of that City Will Give all Their Business to the Vernon Fruit Company.

The following from a recent issue of the Calgary Herald will be of interest to many of our readers. The Herald says:

The retail grocers of the city at a large and representative meeting held in the Board of Trade rooms under the auspices of the Business Men's Association, discussed the existence of a limit combine in the city and passed the following resolution unanimously:

"We, the retail merchants of the city of Calgary have come to the conclusion that, if there is not an arrangement between some of the wholesale fruit dealers there is what we call a combine. It is hereby resolved that the merchants give their loyal, moral and financial support to the Vernon Fruit Company in order to protect the citizens of Calgary so that they may be able to buy cheaper fruit and vegetables."

John Irwin, president of the Business Men's Association, presided, and said that an invitation has been extended to the wholesalers to attend the meeting. Manager Fee, of the Vernon Fruit Company, was the only one present.

#### AN UNDER- STANDING.

George Hallett said that while they had no direct evidence of a combine, yet it was a significant fact that a short time ago the wholesale dealers advanced prices and they were all the same on everything, except the Vernon Fruit Company, which led them to believe that an understanding existed.

The trade was generally agreed that these people put the price up to suit themselves and to eliminate competition.

Competition in trade was like salt to the earth and it would be a great benefit both to the retailer and consumer if they had a little more of it in Calgary. It was a great purifier.

He considered that the best way out of the difficulty was to give their business to the Vernon Fruit Company if Mr. Fee would undertake to handle it.

Mr. Fee, manager of the Vernon Fruit Company, said he was prepared to handle their business on the very lowest margin and have a reasonable profit. The cost to the consumer would be reduced by about ten to twenty per cent. if the retailers banded together and put their business through one channel. He thought a committee should be appointed to confer with him frequently as to the details of supplies available, so that they might all be apprised of the facilities available for obtaining the various goods as they required them.

Several other speakers endorsed the sentiments already expressed and the motion was put and carried unanimously.

#### CODLING MOTH.

The Australian orchardists have their own share of trouble to face as regards both insect and fungus foes. Among the enemies familiar alike to the Australian and the Canadian grower, the codling moth (*carpocapsa pomonella*) is conspicuous.

The depredations of this pest are known wherever the apple is grown. Very much can be done to keep the pest in check. In all well-managed Australian orchards systematic spraying with arsenate of lead is carried out. The operation is done three or four times, at intervals, commencing immediately after the blossom falls, and before the calyx closes over the eye or apex of the young fruit. Another precaution is to put bandages of cloth round the stems of the trees, to act as traps for the larva, the bandages being removed periodically and the captured insects killed.

The infested fruit commonly falls prematurely. It should be gathered at once and destroyed. The cocoons are found hidden in the chinks of fruit cases, and it is accordingly very desirable that second-hand cages be not used. The pear and the quince are also subject to attack by the moth. As with many other pests, abandoned orchards are an assured means of perpetuating the codling moth.

Miss Budd—What do you think of the coming man? Miss Spinstor—I think he must have met with an accident.—Harper's Bazar.

### INTERESTING LECTURE.

Mrs. Huntley, of Ponticton, wife of Rev. Mr. Huntley, gave a very interesting lecture on China in the West Summerland Presbyterian Church on Monday evening. Mrs. Huntley with her husband has spent some twenty years in missionary work in China and has the happy faculty of telling very clearly and interestingly of her experiences in that wonderful country. She might well give several lectures without exhausting her subject and all would be equally interesting.

## SCHOOL REPORTS.

### DIVISION I.

The following are the pupils in the Intermediate Fourth Grade who took over 60 per cent. in the examinations during the month of March:

Allan Harris 81; May Smith 76; Eliza Ritchie 68; Kenneth Elliott 68; Dora Steuart 67; Ernest Lister 64; Willie Smith 64; Roy Steuart 64; James Kean 63; Ida Johnston 62; Rita Harrison 61.

The pupils in the Senior Fourth Grade who took over 70 per cent. in the monthly examinations are:

Sidney McCulloch 83; Kathleen Elliott 81; Roy Elsey 80; Gordon Ritchie 76; Harvey Phinney 75; Ruth Blair 75; Minnie Gallagher 74; Willie Gallagher 73; Volney Merrill 72; Edward Logie 70.

### DIVISION II.

Pupils in Junior Fourth Class who have obtained over 70 per cent. average in March:

Dorothy Tingley 79; Mable Watson 77; Gertrude Rines 76; Jennie Brewer 73; HESSIE PHINNEY 72; Eva Bloomfield 71; Jean Ritchie 70.

Pupils in Senior Third Class who have obtained over 60 per cent. average in March:

Gertrude Elsey 89; Herbert Williams 86; Marjorie Hatfield 84; Ada Darlington 83; Kathleen Merrill 83; William Snow 67; William Clark 64.

Pupils in Junior Third Class who have obtained over 60 per cent. average in March:

Opal Thompson 77; Gertrude Darke 67.

### INDIANS KILLING DEER.

Several Indians have been arrested near Mara, in the Okanagan district, by game Warden Blurton and Constable Price, and charged with illegally destroying many deer.

The officers discovered no fewer than thirteen carcasses in the bush, and also gathered evidence to show that many others had lately been killed. As a result of careful watching they were able to arrest a number of Indians. The deer are killed to obtain unborn fawns, which are regarded as a special dish by the Indians, who also sell to the Chinese.

The latter pickle the bodies of the fawns in alcohol, and the liquid then attains a high value.

The laws with regard to the protection of deer in the Okanagan are being strictly observed in order that the animals may multiply. At one time there was an appreciable diminution in their numbers.

### DISEASE IN POTATOES FROM EUROPE.

Owing to the shortage in the potato crop this year dealers in and growers of potatoes find it necessary to import large supplies for table and seed purposes from Great Britain, Ireland and other European countries. Bulletin 83 issued by the Dominion Experimental Farm, Ottawa, explains how Potato Canker has found its way across the Atlantic into Newfoundland with potatoes imported from Europe.

Potato Canker is a disease at present unknown in Canada. It is one of the most serious diseases known, affecting not only the farm lands on which potatoes are grown but the disease is also directly injurious to the health of the consumer of affected potatoes. Boiling does not destroy the injurious properties. The disease is characterized by nodular excrescences which may often be larger than the tuber itself. These "cankers" affect the eyes of the potatoe and are very small in the early stages. Any tubers found with smaller or larger outgrowths rising from where the eyes are situated, should under no condition be used for seed or table purposes. The introduction and establishment of the disease would seriously compromise one of the most important agricultural industries of Canada, viz., potato growing. Farmers and consumers should be exceedingly careful in using potatoes that may have been imported from Great Britain or the continent of Europe. Suspicious looking tubers should be destroyed by fire and not thrown on the ground, or the disease, if present, will establish itself into the soil.

The bulletin referred to explains in detail the character of the disease and is available to anyone making application for the same to H. T. Gussow, Dominion Botanist, Ottawa, Ontario.

The largest room in the world is the room for improvement.

## Naramata Notes.

Mr. J. M. Robinson is expected back about the end of next week.

This Friday the Unity Club ladies are being entertained at the Club house by Mrs. Lewis Block.

The Okanagan Telephone Company have at last got busy and were stringing wires in town the greater part of last week.

Mr. James Crawshaw and bride paid Naramata a visit recently being the special guests of Mr. and Mrs. Geo. Wolstencroft.

Miss B. Mitchell paid the parental home a visit on Sunday. She was accompanied by Miss Boyton, who was her guest for the day.

Miss Brunton came across from Summerland on Monday to get ready for the opening of Hotel Naramata in the course of a week or so.

Mr. Moore, of Ottawa, has reached town and on Monday entered upon his duties as gardener and greenhouse manager. Mr. Moore comes very highly recommended and will doubtless give a good account of himself.

Reports from the men employed in pruning the orchards seem to indicate that Naramata will this year make a start as a fruit shipping centre. And if those who are planting small fruits and vegetables and small fruits—particularly tomatoes—are greeted with good success the revenue from this source should amount to quite a considerable sum in the aggregate.

Sunday in Naramata was characterized by a special quarterly review in the Sunday School, an address by Rev. G. O. Fallis at eleven a.m., and an evening service in the Opera House addressed by Mrs. Gillespie on the topic "The Last Enemy." The services were all well attended and bespeak a healthful interest in things spiritual on the part of the now blending citizen.

### BASEBALL SEASON OPENS.

The baseball season has opened in earnest and there is every probability of a full slate through the entire season. On Friday afternoon there will be a game on the college campus between the College and Summerland.

Last Thursday the College played the Town, the score being 3-3, and on the same afternoon the High School team defeated the College Juniors. Last Saturday afternoon a game between the College Juniors and Ponticton Juniors resulted in a victory for the former.

The College Senior baseball team leaves on Friday for a tour through the Similkameen, beginning at Oroville. Summerland will wish them luck.

### PLUM AND CHERRY ROT

The disease known as brown rot, ripe rot, monilia rot, etc., affects the fruits and even the twigs of stone fruits shortly before and during the time of ripening. It is one of the most destructive pests with which the growers of this class of fruits have to deal. It is characterized by the rotting of the fruits, and begins in dark brown spots attacking first the fruits which hang in clusters, and these spots soon become covered with grayish or ashen colored masses of spores from which the disease spreads. Moist and hot weather is favorable to the spread of this disease.

Preventive treatment should begin during the dormant season, and the first step in the control of this disease is the removal and destruction by burying or burning of the mummified fruits remaining on the affected trees. A thorough spraying, which is equivalent to disinfection, with lime-sulphur solution or Bordeaux mixture, using six pounds of copper sulphate, six pounds of lime and forty gallons of water, when dormant, will destroy the spores of the disease. Spores may be carried long distances, however, and treatment as here outlined during the dormant season, is not always fully effective to control the disease, and it is recommended that where much damage by monilia rot is likely to occur this treatment should be supplemented by spraying during the summer with either the self-boiled lime-sulphur solution, made after the formula of eight pounds of sulphur, eight pounds of lime and forty gallons of water.

Short cuts to fortune are often bottomless.

SUMMERLAND, B.C., APRIL 12, 1912.

Whole No. 191

## Regular Meeting of the Council.

### Various Matters of Import Come Up For Discussion.

The regular monthly meeting of the Municipal Council was held at the Municipal Offices, West Summerland on Tuesday morning last, with a full attendance of members. The session was not a protracted one, most of the business arising out of the communications received and grievances presented personally, and an adjournment was called about one o'clock.

#### SOME COMMUNICATIONS.

The minutes of the last session were declared adopted as read, and the communications were then read by the Clerk.

A list of applications for electric light from residents of Prairie Valley and the section immediately east of Giant's Head, was read, and filed with other applications already received. No date was mentioned for a meeting to formulate further the policy of the Council in dealing with these applications.

C. Watson, of Jones Flat, applied for connection with the domestic water pipe, and this was granted him.

F. Atwell Miller, who has property at Meadow Valley, wrote asking permission to loan the municipal grader on the usual terms to get some of his land into shape for planting. The Council felt, however, that it would not be wise to start lending municipal tools, and they accordingly withheld their sanction.

C. Hampshire was granted permission to erect a tent at the foot of the Peach Orchard road with the usual restrictions.

J. F. Armstrong, Chairman of the Provincial Water Commission, replying to the Council's request regarding a change in the place of session for the Commission, wrote that the meeting would have to be held at Summerland since that place had been advertised, but that it might be possible to adjourn to West Summerland to facilitate the examination of the municipal water records.

W. C. Kelley, instructed by A. E. Hespeler, complained of seepage from a municipal ditch on to lot 41, and intimated that the Council would be held responsible for any damage that might be caused thereby.

The Vernon Hospital applied for a grant as in former years.

J. S. Armstrong, on behalf of the Eyre and Cutbill estate wrote accepting the offer of the Council for lot 80 adjoining the Municipal Offices, at \$430 cash.

Muir Stewart, secretary-treasurer of the Citizens' Band, sent in an assignment of liabilities from the Band to the Council.

The Okanagan Telephone Company wrote that having perused carefully the franchise under which their predecessors had operated within the municipality, they were now in a position to assure the people of Summerland that they would continue under the obligations and conditions of that franchise. They hoped, further, that their intention might be given publicity, in order to help allay the friction and smooth out the misconceptions that have arisen in connection with the transfer of the telephone interests.

#### THE NUISANCE GROUND.

W. H. Hayes sent a somewhat lengthy letter to the Council regarding the abuse of the nuisance ground south of town. He contended that the present site, adjoining as it does a main highway out of town, was unsuitable; and besides being an eyesore of long standing, it was now getting offensive owing to the indiscriminate dumping of all kinds of refuse, both vegetable and otherwise. As a suggestion, he thought the site of the nuisance ground might with advantage be changed, and some of the deep gulches between Peach Orchard and Crescent Beach might be utilized for the purpose. No matter what was done, or where the dump ground was, the regulations governing the dumping of refuse should be kept strictly in force.

The Council appeared to be in sympathy with Mr. Hayes' grievance, and the matter was referred to the Board of Works.

Mrs. K. Bentley asked for an approximate date when the irrigation water would be available for her property near Crescent Beach, in order that she might govern the planting of small truck accordingly. Complaint was also made of the inadequacy of the water supply in that section. The Clerk was instructed to inform Mrs. Bentley that the Superintendent now had these matters in hand.

A request from C. W. Haddrell for the continued use of a municipal water connection on lot 48 was referred to the Board of Works.

M. C. Skillicorn protested against the rates and taxes that had been levied on his property for last year. He claimed that he barely had five acres of arable land on the lot, but yet he had been assessed and charged as on ten irrigable acres. Coun. Lewes will look into this matter.

R. S. Munro complained of conditions in Peach Valley. Seepage from a flume was causing alkali to rise on his property. In addition, an inadequate flume had been responsible for a washout, which would soon be affecting his property also. Then, too, the road crossing the alkali swamp was in such poor condition as to render heavy teaming hazardous. The surface of the road had sunk, the water had affected it, and several horses had already been mired there. These matters were referred to the Board of Works.

Three motions were passed giving generous assistance to some local institutions. Coun. Lewes moved and Coun. Robinson seconded that the balance of \$120, due on the accounts against the Citizens' Band be paid by the Municipality as a grant for 1912.

#### GENEROUS GRANTS.

Also that the Hospital be given a grant for 1912 equal to the water and light rates, payable quarterly.

Couns. Dale and Dunsdon moved and seconded that a grant of \$1500 be given to the Agricultural Association, payable as the work progresses on which the grant is payable from the government.

A plan for the sub-division of some town property by the Summerland Fruit Company was submitted for the approval of the Council. It was not agreed to, however, since it was thought to interfere with municipal foreshore rights.

Difficulty is being encountered in obtaining sufficient men to carry on even the most pressing of the outside municipal work. It was proposed as a solution to this problem to raise wages, or shorten the hours, or even both. Work must be done, and extra inducements will be held out at the discretion of the Board of Works and the Superintendent in an effort to get more men to work. A motion was put through in addition, shortening the regular hours for outside municipal work to nine hours per day.

#### INTERVIEWED PERSONALLY.

Messrs. John Stewart and G. W. McLaren waited on the Council pressing for a better water service to their section of Jones Flat. They had been fooling the shortcoming of the present service for a long time; in fact they had been hauling domestic water for some years now. The irrigation ditch which served them was in poor condition, and had not been properly maintained. They asked for a little attention to these matters. The Council informed them that the best possible would be done for them, and also that certain improvements planned in connection with the water service would benefit the property holders there materially when the work could be completed.

C. F. Garnett, representing the Okanagan Jam Company, asked for a rebate of the trade license do-

## Little Girl Seriously Injured

Knocked Down by Horse in Turning Corner

A most distressing accident, and one that nearly resulted fatally, occurred on Tuesday afternoon on the crossing between the Supply Company's Store and the Hotel Summerland.

Little Marion Beavis, the six-year old daughter of Mr. and Mrs. Thos. G. Beavis, was returning home from school after her first regular attendance there, for she only entered after the Easter holidays. While going over the crossing accompanied by one or two other school children, she was knocked down by a horse whose driver for the moment was looking in another direction, and evidently the attention of the little one was elsewhere, also. The rig was being driven by Mr. J. Gillis, of Balcom, who is reputed to be a careful driver. He was turning the corner and came suddenly upon the little one. Mr. Jas. Ritchie's chauffeur, who was standing by his car close at hand saw the dangerous position of the child, and gave the alarm, but too late to prevent the accident. The little one was struck on the head by the horse's breast and knocked to the ground. One of the horse's feet was implanted on her cheek and neck, and it is declared by some that the wheel or wheels of the wagon also passed over her. It was feared that a fatality had re-

sulted, and as quickly as possible the little one was picked up and conveyed to her home in the auto which was standing near. Medical assistance was fortunately close at hand. Upon examination it was found that the jaw bone had been broken and several teeth knocked out. The calk of the horse shoe had made a bad gash in the left cheek and the full imprint of the shoe was left on the cheek and neck which were badly bruised and cut.

Upon later examination it was found that the right collar bone had been fractured and the knee on one limb and the ankle and foot on the other show evidences of severe injury either from the horse's feet or from being run over by the wheels.

On Thursday the little one was suffering considerably and complained of pain in her abdomen. While there is some fear on the part of the parents of internal injuries, the doctor is quite hopeful that there is nothing serious there. The injuries have necessitated putting both the patient's jaw and shoulder in plaster.

Everywhere expressions of sympathy are heard and all rejoice with the parents of little Marion that the accident did not result more seriously, and will hope for her speedy recovery.

## 6,000 Carloads From Okanagan and Kootenay This Season.

### Insp. Cunningham is Optimistic Regarding Horticultural Conditions in This Province.

37 Cars of Imported Nursery Stock Have Been Inspected This Spring.

SHIPMENTS of nursery stock this season according to Mr. Thomas Cunningham, Inspector of Fruit Pests, are bigger than ever before. There have been inspected 37 carloads since the opening of the season, and sixteen men at the fumigating station are kept busy all the time. Mr. Cunningham reported that there was not quite so much infection this year as formerly though there is still room for improvement in this respect. One car is now being held pending decision. It is altogether likely that it will be sent back to the nursery. Nearly all the stock coming is American or European. There is nothing from Ontario this year.

The inspector said that his department had seven power sprayers at work in different parts of the province, and an expert with each, who was teaching not only spraying, but also pruning, thinning, packing, and the cultivation of the soil as well. He had found great difficulty in finding the right class of men to handle anything of this kind, but was confident that from this educational work good results to the fruit growing industry must follow. As a result of their demonstrations last year numerous power sprayers had been purchased throughout the province and he had heard of a carload going into the Okanagan country recently. When the department started the use of the power sprayer two years ago there were only two in the province. During a recent trip through Oregon and Washington he had been greatly impressed with the work being done in power spraying there. Everyone with five acres or more of fruit seemed to own a power sprayer. At the same time he was strongly impressed by the improved conditions in fruit growing that obtained in British Columbia. Here there was not a single case known of the San Jose scale, and the codling moth was also practically extinct, since there was only one little spot in the province to-day which was considered to be at all endangered by this pest. In fact, he had great difficulty in convincing American growers that we had been able to keep this country free from pests.

"We have some trouble still," added the inspector. "Fungoid seems to be the most difficult, and part of my mission was to investigate the best methods of combating the brown spot in the apple which occasioned serious loss to our fruit growers during 1911. I have always been of the opinion that this was a fungoid disease and am more than ever confirmed in my opinion. I believe we shall be able to grapple with it by using fungicides. I hope soon to issue a bulletin on this infection."

Asked as to the prospects for the coming year, Mr. Cunningham said:

"I am glad to state that the prospects for a bumper crop were never better. This is not only true of apples and pears, but of peaches and apricots. In the Okanagan Valley they have favorable weather conditions and are almost sure to have the best crop ever grown in British Columbia. I shall be disappointed if we do not ship 6,000 cars out of the Okanagan and Kootenay districts."

He added that he hoped one result of a good crop would be that there would be more local fruit sold in the home markets, as we had been too long displaying American fruit in our chief cities. We were also importing far too much nursery stock. There was not the slightest excuse for importing 37 carloads this year, as climate and conditions for raising nursery stock were as favorable in British Columbia as anywhere. Favored as they were by freight, duty and inspection, the failure to grow more nursery stock seemed to be a reflection on the enterprise of our own people.

"To-day" said the inspector, "I am sending an expert among the fruit growers on the islands in the Gulf. He is a thoroughly capable man well trained in the Hood river country and will teach pruning, spraying and packing. These islands are well adapted for the production of fruit of the best quality. In fact, the best King apples I have ever seen, and which took first prize at the Apple Show in Vancouver in 1910 were grown on Mayno Island. The little American Island of Orcas shipped to Vancouver last year \$20,000 worth of apples on which transportation, duty and inspection fees were paid. The question arises why cannot we take advantage of our own markets by supplying the fruit which all conditions are favorable for growing?"—News-Advertiser.

## District S. S. Convention is Held

### Nearly Eighty Delegates Attend Eighth Annual Gathering.

The Eighth Annual Convention of the Okanagan District Sunday School Association, held in the Knox Presbyterian Church, Kelowna, April 2nd and 3rd, was a splendid success, "a feast of good things" to all who attended the meetings. Eighty-eight delegates registered coming from all points in the Okanagan Valley.

Rev. J. Robson gave the first address of the Convention, "The Sunday School in Relation to the Christian Conquest of British Columbia." Rev. I. W. Williamson, the provincial general secretary, handled the subjects assigned to him splendidly, giving helpful ideas on the workings of the Sunday School. Many of the delegates wished that they could have Mr. Williamson in their Sunday School for a while to "stir things up."

Mrs. Dr. McKay, of Vancouver, has thoroughly mastered her subject of the Cradle Roll, Beginners and Juniors, and showed by practical demonstration how a class of small boys and girls can be kept intensely interested during a Sunday School lesson.

Rev. F. W. Hardy, of Summerland emphasized the "Personal Note" and Mrs. G. O. Fallis dealt with "The Bible Class" very well indeed. We feel sure that the Methodist Bible Class in Penticton must be an interesting gathering.

The reports from the different Sunday Schools of the Association showed great progress, but it was a noticeable fact that not one Anglican Sunday School reported.

Among the resolutions passed was the following: "Resolved, that we, as a Convention, desire to express our gratitude to Almighty God for the steady advance taking place in the cause of temperance and moral reform and to put our-

selves on record as diametrically opposed to the Liquor Traffic, pending an enactment of a measure giving a provincial local option law, which we believe is long overdue. We stand ready to welcome a well considered campaign with this object in view. We, as a Sunday School Association, will direct the attention of all those in authority and in places of responsibility, to the circulation of immoral literature among our youth as revealed in recent investigations of our courts. And, whereas the Dominion Parliament has enacted a law for safeguarding of youth from the tobacco habit, which contains clauses making it illegal to sell, give or furnish any person under sixteen years of age any cigarette or cigarette papers whether for his own use or not, or to sell, give or furnish to such persons tobacco in any form, we, Sunday School teachers, ministers and officials resolve to see so far as in us lies, that that law shall be enforced in our localities."

The following executive committee was elected for 1912-13:

- Honorary President, Mr. A. L. Fortune, Enderby.
- President, Mr. J. W. Glover, Vernon.
- Vice-President, Mr. G. J. C. White, Summerland.
- Secretary-Treasurer, Mr. H. D. Riggs, Vernon.
- Education Department, Rev. D. J. Welsh, Kelowna.
- Mission Department, Mrs. J. L. Elliott, Peachland.
- Primary Department, Mrs. L. E. Strout, Vernon.
- Moral Reform Department, Rev. J. Robson, Vernon.
- Representative to Provincial Association, M. J. Ball, Kelowna.

## A BAD RUNAWAY.

### HEAVY TEAM CRASH INTO STORE FRONT.

Two runaways, one incited by the other, caused great excitement and some very narrow escapes for a few minutes on Shaughnessy Avenue on Tuesday, and resulted very disastrously for a team belonging to W. J. Docking, of Trout Creek.

Mr. E. R. Simpson drove out with his horse without blinders, and the horse having been used with blinders, it soon became unmanageable. Mr. Simpson, seeing he had lost control of the animal, turned it into a vacant lot down town. As his horse dashed across the sidewalk, Mr. Simpson sprang out of the rig, and was little the worse for the jump. The horse, however, instead of continuing into the lot as was expected, suddenly turned up street towards the Hotel and when reaching that corner turned up Ninth Street.

As the runaway passed the Harness Shop of Mr. A. G. Beer, it alarmed Mr. Docking's team, which was tied to a post outside that store. They got under rapid headway in an amazingly short period of time, running wildly in the same direction as the Simpson horse. Their career was a short one, however, as in attempting to turn the corner, the great headway they had gained threw them toward and directly in front of the Summerland Supply Company's store.

The large concrete and iron pillar on the corner of that building was needed when the full weight of the team and wagon was thrown against it. The high horse seemingly received a blow on the head as blood was coming from its nostrils. Whether this was received from contact with the post, or in its fall to the sidewalk, it is not known. The wreck was a bad one, one horse being beneath the other, and all tangled in broken harness, wagon and gear.

Immediately after the team was brought so suddenly to a stop, the Simpson horse which had dodged several men who had tried to capture it near the Laundry, turned about and came down passing the wreck and narrowly averted a col-

## IMPORTANT MEETING

### CALLED FOR TUESDAY NEXT.

A joint meeting of the Farmers' Institute, Agricultural Association and British Columbia Fruit Growers' Association will be held on the evening of Tuesday next, April 16, in the Men's Club. Mr. McMillan, of the Vancouver City Market, will be present to give further particulars of the facilities of that market for the disposal of fruit and other produce. It is of vital importance that all who possibly can be present.

The committee appointed to investigate and report upon the cannery question will submit their findings at that meeting.

In collision with a carriage occupied by a lady, which was standing in front of the Angove & Stinson Store. Its pace was not rapid, and clearing this obstacle it continued down to the Review Office where it stopped on the sidewalk between the railing and a telegraph pole, where it was captured and made secure.

It was not a moment till there was quite a gathering in front of the Supply Store to offer and give assistance in straightening out the tangle. It was found that neither horse had suffered any broken bones as was feared, and the latest information is that apart from being a little stiff and sore the high horse is little the worse for the accident.

That so little damage was done, particularly to the Supply Company's store is a wonder. The crash was heard from some distance and led all to believe that the plate glass fronts had gone out, but other than a few cracks in the upper lights and a deep dent the under frame work, no damage was done.

A little runaway that made spectators wonder if another accident was to result, occurred on Thursday morning. T. J. Garnett's team of greys started from the C. P. R. wharf up town. Evidently they were only desirous of getting home as they did not seem to have lost their heads. They came down to a trot a short distance from the Hotel, and a little farther on the reins were seized by Mr. C. N. Higgin, jun., and the team brought to a standstill.

Fresh and Cured Meats always on hand. Fish and Game in Season.

TERMS STRICTLY CASH

(Continued from Page 1.)

manded from his concern. He considered that to impose a tax in this particular instance would be to penalize a deserving local enterprise. The Jam Factory bought only locally grown fruit, but did no retail selling here, and Mr. Garnett claimed that he was not trading within the municipality, since his selling market was almost solely outside points. It was decided to get the opinion of W. C. Kelley, solicitor, on this point.

T. P. Thornber spoke with the Council regarding the administration of his department.

## DOG TAX BY-LAW.

By-law No. 39, to impose an annual tax of \$2.40 on dogs, with a discount of one-sixth, if paid before the 1st of April, and providing also for the impounding and destruction after a reasonable detention of all unclaimed canines, was read a first, second and third time. The measure will be finally considered at the next meeting.

A motion was passed that plans and specifications be obtained for the making of a road between districts lots 508 and 2091, at Trout Creek, and that tenders be called for the same.

Another motion was passed that tenders be called for a light rig for the use of the Superintendent. The Board of Works were empowered to act upon the tenders that may be submitted.

Engineer Latimer's report as to roads, bridges and crossings along the route of the K.V.R. in the Municipality was passed upon by resolution as being satisfactory.

## ACCOUNTS PASSED.

The following accounts were ordered for payment upon recommendation of Finance Committee:

Pay Roll	\$1,217.47

The next meeting will be on Monday, May 6th, when the Council as a whole will sit as Court of Revision.

## A SOCIETY WOMAN.

Take a lot of conversation  
 Based on really nothing much.  
 Place it in a late creation  
 Frills and Furbelows and such—  
 Set her on some wide verandah  
 Where she may be soon—and see,  
 Gossip, compliment or slander,  
 There you have her, to a T.

Nothing in arithmetic or grammar is so important for a child to learn as humaneness. As a discipline it is most valuable.

## DEPARTMENT OF LANDS.

### WATER BRANCH.

TAKE NOTICE that the Board of Investigation, acting under Part III of the "Water Act," will meet at Summerland, on the 19th day of April, 1912, at 10 o'clock in the forenoon, to hear and determine claims to water rights existing on the 12th of March, 1909, on—

- Bath Creek.
- Boucher Garden Spring.
- Canon Creek.
- Commons Creek.
- Darke Creek.
- Darke Lake.
- Eneas Creek.
- Fish Lake.
- Fox Creek.
- Garnett Lake.
- Keremeos Creek.
- Prairie Creek.
- Sheep Creek.
- Shingle Creek.
- Trout Creek.
- White or Clearwater Creek.

and their tributaries and to unnamed streams in the vicinity.

On the 22nd day of April, 1912 at 10 o'clock in the forenoon, at Peachland, to hear and determine claims to water rights existing on the 12th of March, 1909, on—

- Bald Range Creek.
- Bear Creek.
- Big Horn Creek.
- Cedar Creek.
- Cranberry Creek.
- Clover Creek.
- Davidson Creek.
- Deep Creek.
- Duncan Creek.
- Esparron Lake.
- Fern Creek.
- Hill or Venner Creek.
- Headwater Lake.
- Hill Creek.
- Jacob Creek.
- Jack Creek.
- Keep Creek.
- Finlay Creek.
- Lapsley Creek.
- Miller Spring.
- McDougall Creek.
- Power Creek.
- Rashdale Creek.
- Pigeon Creek.
- Smith Creek.
- Shannon Creek.
- Speer Lake.
- Spring Creek.
- Spruce Creek.
- Tamarack Lake.
- Trepannier Creek.
- Venero Creek.
- Venner Creek.

and their tributaries and to unnamed streams in the vicinity.

On the 24th day of April, 1912, at 11 o'clock in the forenoon, at Okanagan Centre, to hear and determine claims to water rights existing on the 12th of March, 1909, on—

- Beaver Lake.
- Balagno Lake.
- Clear Creek.
- Cattail Lake.
- Clark or Horse Creek.
- Duck Lake Creek.
- Duck Lake.
- Echo Lake.
- Falls Creek.
- Island Lake.
- Lake of the Woods.
- Fahni Lake.
- Long Lake (south end).
- Ribblesworth Creek.
- Short or Biehe Creek.
- North Fork Shorts Creek.
- Torrent Creek.
- Sucker Creek.
- Wood Creek.

and their tributaries and to unnamed streams in the vicinity.

On the 26th day of April, 1912, at 10 o'clock in the forenoon, in the Court-house at Vernon, to hear and determine claims to water rights existing on the 12th March, 1909, on—

- Aberdeen Lake.
- Beaver Creek.
- Brewer Creek.
- Brown Creek.
- B X or Deep Creek.
- Cedar Creek.
- Coldstream Creek.
- Cottonwood Springs.
- Diamond Dry Lake.
- Dry Creek.
- Deer Creek.
- Fish Lake.
- Five-mile Creek.
- Grod Creek.
- Gooso Lake.
- Gurney Creek.
- Haddo Lake.
- Long Lake Gulch.
- Louis Creek.
- Lulluwane Creek.
- Irish or Cayotte Creek.
- Jones Creek.
- King Edward VII Lake.

- Larch Creek.
- Le Duc Creek.
- Long Lake Creek.
- Granite Creek.
- Long Lake (north end).
- Long Lake Creek.
- Lyons Irrigation Ditch.
- Latch Creek.
- Mosgrove Creek.
- Mud Lake.
- Meakins Creek.
- Mountain Creek.
- Nelson Creek.
- North Branch Creek.
- O'Keefe Creek.
- Otter Lake.
- Otter Creek.
- Porteous Creek.
- Reets Creek.
- Rocky Gulch.
- Six-mile Creek.
- Siwash Creek.
- Swan Lake.
- Swan Lake Creek.
- Stoney Creek.
- Sturts Creek.
- Three-mile Creek.
- Vernon Creek.
- Whiteman Creek.

and their tributaries and to unnamed streams in the vicinity.

On the 29th day of April, 1912, at 10 o'clock in the forenoon, at Lumby, to hear and determine claims to water rights existing on the 12th March, 1909, on—

- Beaver Jack Creek.
- Bissette Creek.
- Bonneau Creek.
- Big Creek.
- Blue Spring Creek.
- Bigg Creek.
- Burnyeat Creek.
- Cherry Creek.
- Copper Creek.
- Cashmere Creek.
- Christie Creek.
- Dailey Creek.
- Deafy Creek.
- Dutchman Creek.
- Eight-mile Creek.
- Fall Creek.
- Harris Creek.
- Ireland Creek.
- Mabel Lake.
- Mill Creek.
- Medora Creek.
- Nicklen Creek.
- Putman Creek.
- Perry Creek.
- Rollings Lake.
- Spider Creek.
- Shuswap River.
- Slack Creek.
- Sugar Lake.
- Silver Springs Creek.
- Sow Sap Creek.
- Spallumcheen River.
- Vance Creek.

and their tributaries and to unnamed streams in the vicinity.

Parties who presented claims to the Board in 1910 and have received licences in substitution of the records need not present any statement of claim.

Dated at Victoria, B.C., 28th February, 1912.

By order of the Board,  
 J. F. ARMSTRONG,  
 m15 22 29 a5 12 Chairman.

## Municipality of Summerland.

## COURT of REVISION, 1912.

THE MUNICIPAL COUNCIL of the Municipality of Summerland will hold their first meeting as a Court of Revision, for the purpose of revising or hearing any complaints against the Assessment Roll for the year 1912, in the Municipal Office, West Summerland, on Monday, May 6th, 1912, at 10 o'clock a.m.

## The HOME CIRCLE.

Crude Thoughts From the Editorial Pen.

IN SEEKING the good of others we find our own.

A HOME without children is like a garden and no flowers.

HAPPINESS is a perfume that one cannot shed over another without a few drops falling over one's self.

IF YOU MAKE children happy now you will make them happy twenty years from now by the remembrance of it.

IT ISN'T ENOUGH to believe that "every cloud has a silver lining" and then sit down and wait for the lining to reveal itself. We can, if we will, take the X-ray of determination, and pierce the cloud and find its bright side.

When we learn to be polite, not only as society people, but as husbands and wives, sisters and brothers, parents and children, we shall do well. No home can be happy wherein sarcastic speech and rude disregard for one another's rights is the rule.

THE POOREST girls in the world are those not taught to work. Rich parents have petted them and they have been taught to despise labor and to depend upon others for a living, and are perfectly helpless. The most forlorn women belong to this class. It is the duty of parents to protect their daughters from this deplorable condition.

SOME MEN respond more slowly to the touch of a woman's hand displayed in their homes and upon their surroundings. The task may seem hopeless to the wife at times. But sooner or later the effect will show itself. There is something in every man which responds to a higher and gentler influence. Let his home be rough and he will be rough. But infuse into that home a softening touch, be it ever so simple, and the man feels it even though he may not directly notice it. He imbibes it unconsciously and its effect is sure upon him.

WHILE we carefully guard whatever is womanly in our daughters, let them be trained to more of fibre and firmness. Educate them to self-denial if pecuniary circumstances demand, and not to self-indulgence. Accustom them to be of service in the household, to regard economy as praiseworthy and even heroic, and to add to their other accomplishments, a practical knowledge of work and the possession of some lucrative position or industry by which they can support themselves. Such girls, when portionless, will carry to their husbands dowries in themselves.

GOD INTENDED that there should be one day each week as an especial day for the culture of home ties. A day when the father would be at home from work, and the children home from school, and the mother have less of household care, when all could put on their best clothes, sing their sweetest songs, and enjoy a day of love. The Sabbath should never be made a day of labor in the home. The work of each home should be so arranged that it can be done almost entirely in six days and as evenly as possible in each day. "Six days shalt thou labor and do all thy work."

DO YOU KNOW how many books are in the Bible. Let us tell you one good way to remember, so as never to forget. First write down the words "Old Testament." Now, how many letters are there in the word "old?" Three. How many in the word "testament?" Nine. Put three and nine together and you will have 39, the number of books in the Old Testament. Next write down the words "New Testament." There are also in "new" and "testament" three and nine letters. Now multiply three by nine and you have 27, the number of books in the New Testament. Then by adding 39 and 27 you have 66, the number of books in the Bible. Any boy or girl who will read this over twice will never forget how many books are in the Bible.

**WOMAN'S RIGHTS.**  
 WOMAN NOW HAS, or should have, the right to govern her own home. The right to vote is insignificant when compared to this. She must be its mistress, but never its slave. That she has made it immaculate in cleanliness and resplendent in beauty is not enough. She must feed the love and truth which should unitedly govern it. What power or dignity can reach higher? What is the ability to sway large audiences over a home with such skill that husband and children shall rise up and call her blessed? To be the ruling spirit in such a position is a more sacred honor than to rule an empire. "Woman's rights!" Has man any higher or more noble? And when husband and wife see eye to eye and heart to heart, one in the interests of home, they have reached as near perfection as we are allowed to hope for while on this earth.

**\$3 FOR A LIFE.**  
**Facts About the Chinese Famine.**  
 The area of affected districts is between thirty and fifty thousand square miles.  
 The number of people who may meet death from starvation before next harvest, is between two and four million. In some districts the famine is the worst in forty years.  
 \$1.00 will provide for one person for one month; \$3.00 may save a life; \$15.00 may save a family from starvation.  
 The Review will gladly receive, acknowledge and forward promptly any monies its readers wish to contribute towards the relief of the starving millions of central China.

RALPH E. WHITE, MANAGING DIRECTOR.

SUBSCRIPTION RATES: \$2.00 PER YEAR, IN ADVANCE. SIX MONTHS \$1.00.

### Advertising Rates:

LEGAL NOTICES.—Twelve Cents per line for the first insertion; Eight Cents per line for each subsequent insertion.  
LAND NOTICES.—\$7.00 for 60 days, \$5.00 for 30 days.  
WATER NOTICES.—\$3.00 for 150 words and under; \$3.00; each additional 50 words, \$1.00.  
THEATRICAL, ETC.—50c. per inch for first insertion; and 25c. per inch each subsequent insertion.  
LOCAL NOTICES or Readers. Immediately following regular locals, 20c. per counted line; 10c. per line each subsequent insertion. Half these rates when accompanying display advertisements.  
LODGE NOTICES, Etc., 25c. per week, per column inch.  
FOR SALE Advertisements, Etc., 3c. per word first week; 1c. per word each subsequent week.  
Transient Advertisements payable in advance.  
Rates for Contract Advertisements furnished on application.  
Copy for change of contract advertising must be in the hands of the printer not later than Wednesday noon to insure publication in the next issue.  
In accordance with schedule of prices adopted throughout the valley, charges for advertising are now being made weekly. Heretofore when five issues were made in one month the result was a loss. By the new method customers are charged each week for just the amount of space used.

FRIDAY, APRIL 12, 1912.

### THE FAMINE IN CHINA.

IN ASIA the twentieth century is China's as it is Canada's in America. China is now the scene of a transformation the most marvelous in history, and what is happening there is of importance to us, since in this rapidly shrinking world Canada and China are now neighbors.

Famine at any time is grievous affliction, but added to political revolution as in China it must stir the sympathy of a people so favored as Canadians are with stable institutions, and blessed with abounding prosperity. Here, then, is a unique opportunity to show practically our good will to the new Chinese nation in the time of their sorest need. Scattered contributions are already being sent in through United States channels, but it is the general feeling that our plan of relief, should be carried out on a national scale.

The refunding of part of the Boxer indemnity by the United States made a deep impression on the Chinese people. By emulating the good example of the United States, Canada may prove that this part of the British Empire is not behind any nation in goodwill to China in this crisis.

A central Canadian committee has been suggested through which aid may be sent direct to the Central China Famine Relief Committee, the international body with headquarters at Shanghai which has made an appeal to the world for aid to the famine sufferers, and which is composed of European and Chinese men of standing. Hence the formation of the Canadian National Fund—Chinese Famine Relief, to give any information on the subject and through whom any municipality, board of trade or other body or individual may send aid as coming from Canada direct. The treasurer is Mr. Joseph Henderson, vice-president of the Bank of Toronto. The committee, to give the movement a more national stamp, are asking the Dominion Government to appoint an officer through whom the subscriptions when collected may be cabled direct to China.

The Central Famine Relief Committee in Shanghai is composed of foreigners and Chinese in equal numbers some of the leading business men of Shanghai, and some of the most prominent missionaries are in charge of the fund. It will be wisely and honestly administered.

The funds raised will be used to avert starvation and at the same time to start China upon a policy of conservation. It is not enough to-day to pour rice into the rathole of famine. It is planned to give relief only in return for labor on canals and dykes, except in the case of those unable to work. Competent foreign and Chinese engineers will co-operate in making all such work of permanent value in preventing future floods. The Famine Committee believes that the new government will adopt a program of conservation and, until this can be carried to completion, shoulder the responsibility of relieving famine conditions. The new China is awake to the situation and many influential men are already pledged to such a policy. Canada can raise a lasting monument to her good will to China by lending some irrigation experts and hydraulic engineers for land reclamation works.

By winning the friendship of the leaders of the New China we are doing a good work for Imperialism, and a good thing for Canadian trade and Canadian standards. The new China will respond to friendship.

In an address before the Empire Club of Toronto, Dr. W. E. Taylor, of Shanghai, said:

"British diplomacy is under a cloud at present on account of Great Britain's alliance with the Japanese. The leaders of the young Chinese Republic are distrustful of Japan and naturally fear the political possibilities of that alliance. The natural conservatism of the English people makes it difficult for the British Government to adjust itself rapidly enough to the new situation since the revolution in China. But the Canadians, who are free from entangling alliances and treaties, are also free to come into relations with China on a basis of friendship and thus demonstrate the existence of imperial friendships. Canada, the daughter, can, by friendly conduct, pave the way for China's friendly reception of Great Britain, the Mother Country of the Dominion."

### THE DEADLY PISTOL.

"WHEN YOU ATTEMPT to purchase a deadly poison the druggist questions you and writes your name and address in a register, and frequently declines to sell the drug to you, or requires you to obtain a physician's prescription. But," says the editor of the Saturday Sun-Set, "you can buy a deadly weapon as easily as a cigar or a pound of tea."

"Many more violent deaths and woundings, the result of criminal impulses, are committed with revolvers than with poisons. The employment of poison in crime is now nearly obsolete. In vandettas, in casual assassinations, almost accidental in nature, like the killing of Patrolman Byers; in all allied crimes, like the shooting of Constable Aston, the instrument used is the agile and facile revolver, the deadliest of weapons, always convenient and ready, like the fang of a snake, to jet death from its ugly black tube.

"Poison, seldom employed for criminal purposes are almost unbuyable, and the purchaser can nearly always be traced by the authorities. Pistols are freely sold and as freely carried. This is not logical. The purchase of pistols should be made as difficult as the purchase of poison, or more so. In this country pistols now are never sold or used for sporting purposes. The average citizen who buys a revolver for per-

sonal defence or for the protection of his home is showing little wisdom. There is only one chance in a hundred that he will ever need it, and it is far more probable that some day it will get him into trouble than it is that it will ever have to be used to get him out of it. A revolver kept in the dwelling house of the everyday citizen is a menace to its owner and his family. It may be kept unloaded, but if it is so it is unready, and pistols have an uncanny habit of being loaded when everybody is certain they are not. If the citizen carries the deadly thing on his person he is breaking the law, and unless he is very familiar with the use of weapons, his pistol is small protection if his money or his life should be in sudden peril. But the business of manufacturing pistols is an extensive one, and in the newspapers and magazines there is much space used in advertising that a pistol is a necessity of life and safety which is one of the hollowest of fallacies.

"The sale of revolvers should be limited and restricted. It is a wonder that in our high and progressive state of civilization this has not been done long ago.

THERE IS NO MAN that cannot assist the growth and development of his town. However small his influence it has its effect. Let's get busy.

CANADIAN CONSUMERS of electricity generated by the waters of Niagara Falls, get their current for one-third of the price paid by American consumers, according to a bulletin of the Conservation Commission, because the Ontario Government had stepped in and demanded fair play for the public.

### HON. PRICE ELLISON.

Honorable Price Ellison, Minister of Finance and Agriculture, who is arranging to send a fine exhibit of fruit and vegetables, grown in British Columbia, to the Dry-Farmed Product Exposition, at Lethbridge, October 21-26.

### CANNERY MATTERS.

Mr. Fraser, of the Kelowna Cannery, was in town this week to lay a proposition before the committee who have the matter of a local cannery in hand. It is understood that Mr. Fraser's proposition is to have the local fruit shipped to the Kelowna Cannery this year. The Western Cannery Association are reported to be in control of the Kelowna Cannery and they are so building a cannery at Penticton. Before Penticton could get the Company to build there twenty thousand dollars of local capital was required, and this sum has now been raised. The suggestion is that for this year the fruit for canning be shipped to either one of these points, and for 1913 there will in all probability be a cannery built here by the same concern. The particulars of Mr. Fraser's proposition will be presented at the joint meeting of fruit-growers announced elsewhere in these columns. Already a number of local growers have contracted with the Kelowna Cannery; some of them for a considerable quantity of fruit.

There is ever a new field in the business world for the ambitious.

## SUMMERLAND

### Water Notice.

FOR A LICENCE TO USE WATER.

NOTICE is hereby given that The Municipality of Summerland, of Summerland, British Columbia, will apply for a licence to use 0.12 cubic feet of water per second from a spring on south side of Trout Creek, a stream flowing in an easterly direction and emptying into Okanagan Lake near Gartrell P.O., B.C. The water will be used for Domestic purposes, under a notice of application for a licence to take and use water, posted herewith, on the land described as D.L. No. 1078, 8104, 440, 441, G.I., Onyos.

This notice was posted on the ground on the 22nd day of March, 1912. The application will be filed in the office of the Water Recorder at Vernon, B.C. Objections may be filed with the said Water Recorder or with the Comptroller of Water Rights, Parliament Buildings, Victoria, B.C.

### HOSPITAL CHANGES.

The two nurses, Mrs. Stillingfleet and Miss Thomson, who have been running the Cottage Hospital here for some months, are giving it up, and they will be leaving here on April 18th.

Mrs. Arthur Solly is now negotiating with the Hospital Board for its continuance. The matter has been left largely in the hands of the Ladies' Auxiliary. Mrs. Solly, before she will undertake to continue the institution, requires a guaranteed bonus.

The Ladies' Hospital Auxiliary hold their annual meeting next Tuesday when definite action will be taken. It is understood that if Mrs. Solly takes charge of the Hospital, it will not be in the present building, which has never been quite satisfactory for the purpose. The Gainer cottage on the hill above town is being talked of as the new Hospital.

The Summerland junior football team will play the Pentiction juniors Saturday afternoon on the College Campus.

On the evening of Friday the 26th inst., a Dance will be held in Empire Hall, under the auspices of the Overseas Club. The proceeds will be in aid of the Football Club connected with that organization.

### Local News Items.

Mrs. C. M. Smith went up to Peachland on this morning's boat.

Mrs. J. C. Robson, of Revelstoke, is visiting her daughter, Mrs. E. R. Butler.

Mr. Wm. Skinner, foreman of the Vernon News Printing Office, spent Easter in Summerland.

Mr. and Mrs. David Kerstine are now living in Mr. Mellor's new cottage on the Lakeshore Drive.

H. Trowse, of Calgary, who has held some orchard property on Jones Flat for some years, has come here to reside.

Wm. Moors, formerly of the Review staff, spent Easter in town. Mr. Moors is now employed in the office of the Pentiction Herald.

Mrs. F. Osler, who only recently returned home, is ill with typhoid fever. Mrs. Osler evidently contracted the disease before or while returning to Summerland.

Drinking fountains have been installed in the schools, the last one being put in the Town School where connections with the water main have now been made.

Miss May Conway went up to Kelowna on Thursday morning's boat. She will spend two weeks there with her brother and sister, Mr. and Mrs. Jack Conway.

A very fine semi-speed launch was shipped by the Summerland Boat Works on Tuesday. She was named the "Sicamous Wolf," and was built for use on the Shuswap Lake at Sicamous.

R. H. English has gone to Calgary, where he will offer for sale or exchange the fine Percheron stallion, "Duplex," which has been shipped to the Horse Show now being held there.

The regular monthly meeting of the Women's Institute will be held in the Parlors of the Men's Club, on Friday, April 19th, at three o'clock. The ladies are asked to bring their fancy work.

Mrs. Kenny and family, and Mrs. Beavis, sen., who have been visiting their relatives, Messrs. T. and M. Beavis, went up to their new home at Armstrong this morning. Mr. Kenny went some days ago.

Trapping is by no means an unprofitable occupation in this district. The returns from one man's winter catch near the head of Trout Creek is said to have been between \$1,000 and \$1,100, and there is nothing exceptional in this.

Rev. R. E. Harkness, of the Vernon Baptist Church, will exchange with the Rev. F. W. Pattison on Sunday next. Mr. Harkness will preach in the West Summerland church in the morning and in the Lakefront church in the evening.

Keep in mind the Vocal and Instrumental Recital to be given by the advanced pupils of the Music Department of the College, tonight, at eight o'clock in the College Gymnasium. Admission 50 cents; tickets to be obtained at the doors.

Jack Lawler, the popular packing school instructor and local representative of the Okanagan Fruit Union, has rented the Fulton cottage in Peach Orchard. Mr. Lawler with his bride (nee Warren) of some two months, will return to Summerland in the near future.

The Annual General Meeting of the Ladies' Hospital Auxiliary will be held on Tuesday afternoon next, at three o'clock, at the home of Mrs. Wellington Watson. This is to be a very important meeting, and the president urgently requests all members and ladies interested to be present.

T. J. McAlpin, who for some years has superintended the outside work at Kaleden for Mr. Jus. Ritchie, has resigned that position, and it is understood will go to Princeton where he holds a pre-emption. B. H. Shork has been engaged to take up the work at Kaleden and is now there with Mr. McAlpin getting in touch with the work. Mr. Shork has taken four teams with him from Summerland.

The game of baseball on Easter Monday between the Colloge team and the nine of Oroville, and played in that town, is reported to have been an unusually interesting and close game. Ten innings were played. At the end of the ninth the score was even at 4-4, but in the extra inning Oroville raised their score by one, and the College failing to respond the final score was 5-4 in favor of Oroville.

### SYNOPSIS OF COAL MINING REGULATIONS

COAL mining rights of the Dominion, in Manitoba, Saskatchewan and Alberta, the Yukon Territory, the North-west Territories and in a portion of the Province of British Columbia, may be leased for a term of twenty-one years at an annual rental of \$1 per acre. Not more than 2,560 acres will be leased to one applicant. Application for a lease must be made by the applicant in person to the Agent or Sub-Agent of the district in which the rights applied for are situated.

In surveyed territory the land must be described by sections, or legal subdivisions of sections, and in unsurveyed territory the tract applied for shall be staked out by the applicant himself.

Each application must be accompanied by a fee of \$5, which will be refunded if the rights applied for are not available, but not otherwise. A royalty shall be paid on the merchantable output of the mine at the rate of five cents per ton.

The person operating the mine shall furnish the Agent with sworn returns accounting for the full quantity of merchantable coal mined and pay the royalty thereon. If the coal-mining rights are not being operated, such returns should be furnished at least once a year. The lease will include the coal-mining rights only, but the lessee may be permitted to purchase whatever available surface rights may be considered necessary for the working of the mine at the rate of \$10.00 an acre. For full information application should be made to the Secretary of the Department of the Interior, Ottawa, or to any Agent or Sub-Agent of Dominion Lands.

W. W. CORY,

Deputy Minister of the Interior.

## Peachland Notes.

Received Too Late for Last Week.

Mr. Wm. Freel returned to Vancouver last week after spending a week here inspecting and putting in order his ten acre lot.

Another new family to arrive last week was Mr. and Mrs. Musto, who have come to settle on the Wellband lot, opposite Mr. Hugh Williams.

Mr. Frank Middleton, an old resident of Peachland, now living at Victoria, spent a couple of weeks here renewing old acquaintances and recuperating after a serious operation in the Victoria Hospital.

Mr. and Mrs. Jas. Cripps, with their three children arrived from Saskatchewan last week to take possession of his ten acre lot across Trepannier Creek. He is greatly pleased with the climate and the outlook generally.

Miss Needham and Mrs. J. M. Elliott from the Methodist Sunday School, Miss Dimock, Miss Sharpe, Mrs. H. McDougall and Mr. Geo. Keyes, of the Baptist School, attended the Sunday School Convention in Kelowna during the week.

A good many of the poultry men here have big stories to tell of the wonderful laying powers of their respective flocks. Mr. J. H. Clements, however, has put the rest to rout with a story for which he will give his affidavit; that he got six eggs from five hens one day.

The by-law to raise \$1,000 for the purchase of school sites was voted on last Saturday and carried. As is usual on such occasions when a small amount is being voted upon, very few turned out to vote, and one lone individual voted against the proposed by-law, the vote standing 37 for and 1 against.

Mr. B. S. Brown is in receipt of a telegram, confirmed later by a letter from the Swift Company, telling him that in answer to urgent requests, they have arranged with the C. P. R. for a refrigerator car service to Okanagan Landing. This means that they will be able to deliver meat all the summer to their customers in this district in prime condition. It is reported further that this up-to-date concern also intends putting in a cold storage plant at the head of the lake. Mr. Brown is naturally quite elated over the good news, and feels prepared to guarantee his customers the choicest of cuts at reasonable rates all the year round.

### W.C.T.U. COLUMN.

Temperance Teaching in Sunday Schools.

The liquor traffic has been legislated into existence, and it can be legislated out of existence. Experience is proving that the most direct way of doing this is by educating the children as to the evil effects of alcohol on the body. In many parts of the United States, and in parts of Canada, where there has been effective teaching of scientific temperance in all grades of the schools for a generation or more, results are now being seen. A generation of voters has arisen who are proceeding to abolish the liquor traffic, clearly illustrating also the truth of the saying that "The reformer's bullet is the ballot."

In British Columbia there is scientific temperance taught in only one grade of the public schools, the highest. The education department of this province do not yet see the importance of this teaching in the junior grades of the schools, and until such time as they do come to that conclusion, and make this important change in the school programme, who is to fill the gap? It may be late when a boy reaches the fourth class in school. There are homes that cannot be depended upon to bring the right influence to bear.

The only open door, with the necessary machinery to hand, for the present, seems to be the Sunday School, where there is an opportunity for teaching a temperance lesson four times a year. It is not much, but is better than nothing, although we may lose sight of the fact, and forewarned is forearmed, and formation is better than reformation.—Contributed.

A woman's tears are the water route to a man's heart.

## Kelowna's New Cannery.

Will be Fine Structure.

Work on the new cannery is proceeding rapidly, and the structure will be ready in good time for the coming season, which promises to be the busiest on record.

The new factory is more than double the size of the one it is being built to supersede, which latter is only a comparatively new building itself. But the business of the Kelowna Canning Co. has expanded so rapidly that the new premises are necessary.

The building will be two storey brick on a cement foundation, the space occupied being about 180 by 150 feet, with a loading platform 40 feet wide and 130 feet long. A seven feet high basement 50 feet wide by 150 feet long is provided for storage, and is capable of holding a good many carloads of canned produce.

Sufficient of the building is already completed to realize something of the handsome and imposing appearance which it will present. Its numerous windows give promise of a well lighted interior. The floors are interesting, being composed of dressed 2 x 4 set close together on edge, over 155,000 feet of lumber being required for this purpose alone, and 68 kegs of four inch nails were required to put them down.

Mr. George Ritchie, the contractor, has a large staff of men engaged and the work is being pushed along rapidly.

Some of the shafting and machinery is already being transferred from the old building, but a large amount of new plant is being ordered which will make the local cannery the largest and best equipped of its kind in the province.—Record.

## Watering Horses at Night.

In an inspection of over 150 of the leading livery and boarding stables in Boston and vicinity by representatives of the Work-Horse Parade Association, particular attention was paid to the matter of watering horses at night. In publishing the results of this investigation a bulletin states that all authorities agree, and experience teaches, that city horses should be watered between 8 p.m. and midnight; but it was found that less than half of the stables visited give their horses water after 7 p.m.

"A horse comes in hungry, and he wants his supper so much that he will drink but little, and he ought not to drink deeply at that time, even if he wanted to," was the way a stableman put it. "Then he eats a quantity of dry, heating food. He shouldn't have water right after eating; but if he doesn't get a good drink two or three hours later, he will go through the night thirsty, and the heating food will burn out his insides for the lack of the water that is needed to give the nourishment of the food a chance to do the good it ought to be doing." Moreover, a horse not watered at night is very apt to drink too much in the morning.

This night-watering is not only common humanity in hot weather, but it is almost equally valuable in winter. For appetite comes with the bracing effect of cold weather, and horses eat more than they do in summer. Consequently, if this extra food is to do its part in giving the horse power to resist the cold and the strain of winter work, water must be given at the time when it will do the most good. Nothing does so much toward giving back a return for the food given in the way of extra strength, working endurance and good condition.

The effect of this night watering on the blood and general circulation is far-reaching. The thirst that follows the digestion of a meal is the call of nature for the water. It is that needed to help the good of the food to get into the flesh and blood of the animal; and equally important is the part played by the water in sending the waste matter out of the body with the least possible wear and tear on the organs that perform this indispensable duty. A horse that remains thirsty all night cannot be expected to last so long as one that is watered at the proper time. A distinguished veterinary surgeon recently remarked: "Going too long without water causes more colic in horses than anything else does." —Our Dumb Animals.

### TEN COMMANDMENTS FOR EVERY SON.

Rev. W. B. Millard, of Chicago, is the author of this "Decalogue for Boys."

I. Thou shalt not despise thy father's counsel, neither shalt thou bring tears to thy mother's eyes.

II. Thou shalt keep thyself pure that thou mayest be worthy of thy God, thy mother, and thy wife which is to be.

III. Thou shalt keep thy tongue from profane and unclean speech.

IV. Thou shalt not consume thy strength with strong liquors, poison smoke, or midnight revels.

V. Thou shalt not match pennies, shake dice, bet on ball games, or indulge in any hazard game where money may be lost, or what is far worse—acquired without giving equivalent.

VI. Thou shalt speak truly, play fairly, and work honestly.

VII. Thou shalt not be afraid of an enemy's blow, or a false friend's sneer.

VIII. Thou shalt not exchange school drudgery, with high prospects, for a cheap job which leads nowhere.

IX. Thou shalt not covet the easy job nor aspire to get rich quick.

X. Thou shalt not be guilty of ingratitude, either to thy God who created thee, or to thy parents who reared thee.

### UNIQUE EXHIBIT.

San Francisco, April 8.—Alaska will have a unique exhibit at the 1915 Exposition in San Francisco. It will consist of a copper ball weighing 2,500 pounds made of metal secured from the Copper River Valley, Alaska.

### Naramata Notes.

Miss Vera Palmer was in Summerland over Sunday on a visit to friends.

Messrs. Bennett and Broad Brothers, of Calgary, were in town on Monday looking into a few real estate propositions.

Mr. Ireland, the purchaser of the Davies lot, has taken up temporary quarters on his fruit ranch preparatory to building a residence.

The spring development work is now in full swing and it seems almost surprising to see the amount that is really being accomplished in the way of plowing, planting, etc.

Mr. C. W. Johnson has this week signed up a contract with C. S. Russell, of Penticton, for the carpenter work on a fine residence on the latter's fruit ranch near Three Mile Creek.

The Unity Club held its usual semi-monthly gathering last Friday afternoon in their own apartments and put in the usual social hour or two. Mrs. Lewis' Block was hostess upon this occasion.

Mr. Aveson has actually thousands upon thousands of young tomato plants—just starting. Besides planting heavily himself he has several others—his neighbors who have caught his enthusiasm and who, under his directions will create quite a tomato market here this summer.

Naramata is having its own quota of spring sickness. Mr. Bartlett is just recovering from a severe attack of la grippe. Miss Gillies, of the hotel staff, is laid up with bronchitis. Mr. Howard Rounds, after a determined effort to fight off a cold was obliged to keep to his room on Wednesday. It is to be hoped that with the advent of this delightful spring sunshine that all will be around again soon.

The Ball given this (Friday) evening in Penticton by the Lacrosse Club, of which Hon. W. T. Shatford is president attracted quite a number from this point. The music for the occasion is being supplied by a three piece orchestra consisting of Mr. Duncan, violinist, manager of the Dreamland Theatre, Kelowna, Mrs. T. H. Boothe, pianist, Naramata, and Mr. D. Walters, trap drummer, also from Naramata.

### COLD STORAGE BEEF.

Swift & Co., the big meat packers and distributors, are reported to have completed arrangements for running refrigerator cars down the Okanagan Valley. The cars will run to the Landing and the trade of the lake towns will be supplied from them. The company, it is said, purposes erecting a cold storage plant at the Landing and a sufficient supply of meat will be kept in stock, so that the needs of the various retail dealers may be supplied promptly with properly ripened beef, etc.

### Let the Mirror Guide Your Choice

ONE great advantage of ready-for-service tailoring is that you can select, from a wide variety of shapes and fabrics, the suit that exactly reflects the good points of your own personality.

Yet this important point is only one of many virtues possessed by the "FIT-RITE" tailoring system. Correct style, superior workmanship, fine fabrics, moderate prices—these can only be suggested here.

You owe it to yourself to see this line of high-class clothes for men, before you purchase your Spring Suit or Overcoat.

**JIMMY'S LETTER TO DAD.**

Okanagan College,  
West Summerland,  
April 10, 1912.

Dear Dad:  
Holidays are over and nearly everybody is back again. Some few went away for the entire holiday and when the boys that went to Oroville got away, and then on Monday we who were left went down to Penticton, there were not many left in the College. Baseball continues to be the chief topic though tennis comes in for its share of attention. Friday being a holiday our senior team had scheduled a game with Peachland, and even had the bills out and all arrangements made. Peachland could not come and word reached us too late to make any arrangements with another outside team so we played the town team and had a fine game. When the game was over the score of 5-5 told the tale of a hard fight. It was good practice for the Southern trip, but expensive, for Morelock got his leg sprained very badly, so he was not in good shape to play next time.

Saturday morning, when the eastern horizon was still rosy with the promise of a lovely day (some poetry, eh?) the seniors started on their long drive to Keremeos, where they took the train to Oroville. Here they found a very cordial welcome waiting them and before bed time knew most everybody in the town. Oroville isn't very big, but it can give Summerland some pointers on sport. Seven hundred people is what the census says, yet they have a fast senior team and two splendid junior bunches which are developing the senior material. Sunday was spent in various manners, sight-seeing taking very little time since it is a typical western town, "a mile long and a foot wide," as Bret Harte characterized the towns of 49. Monday at two the game was called, and the College boys were greatly surprised and highly delighted to hear a College yell as they posed for their pictures and a motor car with three enthusiasts rolled in from Penticton. The only drawback to the game was the dusty diamond. Everytime a foot was moved a cloud of dust rose with it. After a grand automobile parade, Morelock, whose leg had been the subject of many hot fomentations and bandages hobbled on to the field as captain; the team strung themselves out, the Mayor hurled the first ball over the plate, and the umpire yelled "play ball!"

And they played ball! Oroville say it was the best opening game they have had for years and we let it go at that.

McDougall and Corey, the regular College battery performed, with Stevens on first, Cunningham on second, Finnis third, Morelock shortstop, and Ryan, Dupont and F. Menzies in the field. The score did not mount rapidly, being tied several times in the game. The College came to bat in the ninth inning with the score 4-2 against them. Good hitting and a little loose play and two runs were scored before three men were down and the score stood 4-4 at the end of the ninth. The tenth decided it: Morelock's stiff leg prevented him from getting under a fly and Oroville scored, which the College boys were unable to do. Final score, 5-4. Tuesday the return trip commenced and a tired but happy bunch of athletes reached the College at half past seven.

Monday the juniors went down to Penticton to play a return match and to take another fall out of them. But they reckoned without their hosts this time. Campbell ran foul of a stray lacrosse ball that was pretending to be an aeroplane, and had his left optic closed, which interfered with his usefulness. Elliott, pitching for the College was a little wild the first two innings and opened up a lead for Penticton which the ferocious hitting and consistent playing of the College kids couldn't overcome later. The score, 10-6 typifies the play very well. Penticton started well and ended poorly while the others reversed, playing loosely at first and tightening up later. The absence of Dupont who was playing with the seniors also weakened the team.

We had a great feed of eggs at Easter that the town people sent up and we surely appreciated it. I think everybody had as many as they wanted, and that meant a lot with some of them.

We hope to start a tennis tournament next week and I'll tell you about that as well as the recital on Friday. This recital is only the advanced pupils, the others performing next week.

Yours, as ever,  
**JIMMY.**

**THE BOY SCOUTS.**

A meeting of the executive of the Boy Scouts was held on the evening of the 9th in C. N. Borton's Office. It was decided to change the regular time of meeting of the Boys to Friday evening at seven o'clock. This Friday night the meeting will be as usual in the Agricultural Hall. Arrangements are being made, however, whereby future meetings will be held in the College Gymnasium, and it is expected that after next week the meetings will be held there. Mr. R. Pollock has been appointed Scout Master, with Messrs. Tait and Bentley as Assistants. Rev. F. W. Pattison was elected chairman of the Library Committee. Dr. Smith will give First Aid instruction. Former Scout Master Borton will give all the help that his limited time will permit.

On Friday of next week there will be a general muster of the Scouts at the home of Mr. Pattison at seven o'clock, when a full attendance is requested of the executive, officers and boys. The plans for the season, including the summer camp, will be talked over and arranged. A few books have been gathered as a nucleus for a Boy Scout's Library, and these will be available for inspection and distribution among the boys. The Library Committee will greatly appreciate the thoughtfulness of any citizens who will send in any books suitable for boys for the library, or notify Mr. Pattison, who will have them collected.

**RIFLE ASSOCIATION.**

The season's shooting on the range is now in full swing, there being a good attendance on Saturday last. While a tricky wind and a rather hazy light made high scoring difficult, the average was well maintained. Leading scores:

	200	500	600	Total
H. Dunsdon	32	33	22	88
B. Steuart	31	31	25	87
M. Steuart	29	31	26	86
W. Nelson	30	27	27	84
O. Smith	28	30	26	84
G. Loomer	29	27	24	80
J. Dunsdon	28	29	23	80

Conditions, seven shots and a sighter at 200, 500 and 600 yards; highest possible score, 105.

More members are required, and the present is the best time to join, so as to take full advantage of the prize shooting, which extends right through the entire season.

Saturday first, 18th inst., the long distances will be shot over, 600, 800 and 900 yards, and members are reminded that the rig leaves as usual at 12.30, Elliott's Store, and 1 o'clock, Municipal Building, West Summerland.

**FOOTBALL—Summerland v. Penticton**

The above match was played on the 6th inst., on the College Campus. Penticton had a much stronger team than the last game, and Summerland lacked the combination that they had shown before. Fisher failed to score from a penalty, and at half time the score was 0-0. On the restart Summerland pressed hard but failed to beat the Penticton custodian, who undoubtedly is a good man. After a hot run the Penticton inside right managed to outwit Thompson with a curving ball, and when the whistle blew the score was 1-0 in favor of Penticton. All through the game Fisher was very closely watched. Following is the team: D. Thompson; J. Woods, B. Newton; L. Sherk, H. Coles, C. Brind; J. Weeks, C. Marshall, G. Fisher, W. Atkinson, J. Templeton.

The next League game to be played in Summerland is scheduled for Saturday, the 20th inst., when the locals meet the eleven from Okanagan Mission.

**DREADED FRUIT PEST: May Prohibit Hawaiian Fruit**

Ottawa, April 8.—Hon. Martin Burrell, minister of Agriculture, is considering the advisability of prohibiting the importation into Canada of fruits from the Hawaiian Islands, owing to the prevalence on those islands of the Mediterranean fruit pest. This insect would do just as much damage to fruit grown in Canada as to the productions of a tropical climate, if it once got a foothold. The United States government is also considering the advisability of prohibiting Hawaiian fruit, and it is possible that joint action may be taken by the two governments.

Big plans do not balance small performances.

## The Cannery.

### Working Capital Is Not Forthcoming.

#### May Arrange With Western Cannery, Limited.

The committee appointed at a recent joint meeting of the Farmers' Institute, Agricultural Association and Fruit Growers' Association, to investigate the cannery question reported at the public meeting on Tuesday night. Messrs. G. J. C. White, H. C. Mellor and H. Bristow, the three members of the committee were all present and each spoke on the subject.

Mr. Mellor said that although the T. J. Smith cannery could be bought at a reasonable price and the present premises rented, ready cash to the extent of at least \$12,000 would be required to finance for this season. Two cars of cans would cost about \$5,000. All the sugar, labor and cans must be paid for before any of the product is marketed. While he would like to see this proposition taken up, he doubted very much if the amount of cash could be raised. Mr. Fraser, of the Kelowna Canning Co., which will be known hereafter as The Western Cannery, Ltd., had discussed the matter with the committee. As rapidly as possible the Western Cannery purposed covering the whole Valley. They are building a new cannery at Kelowna and will have warehouse facilities for one hundred cars. Their plan is to have canneries at Penticton, Summerland, Armstrong and perhaps Peachland. That at Penticton will be built at once, largely with local capital. Before building in any of these places they will require \$20,000 of local capital, 25 per cent of which will go to the original company as a bonus. Mr. Mellor did not like that part of the proposition, but admitted that they had the lead and were in the better position to can and market economically.

Mr. Fraser had made the proposal that no cannery be built here this year but that our fruit be sent to either of the canneries they are building at Penticton and at Kelowna. An objectionable feature of this was that they would not guarantee to take all our crop, but only promised to do their best. Their ability to do so depends on their getting the necessary labor. The Kelowna cannery had already bought three hundred tons of peaches. At least four of our citizens had contracted with that company. They will take only yellow fleshed fruit. The price is 1 1/2 cents per pound for Early Crawfords and Elbertas and 1 1/4 cents for others. The question resolved itself into this: shall we try to raise the necessary funds for a local cannery or fall in line with the Western Cannery's proposition? He did not feel like advising the latter course, as he felt that 25 per cent. bonus was too much commission to pay on floatation. Mr. Mellor said that the Western Cannery would be controlled by the Trust, in fact, they were now selling by permission of the Trust. The Trust so controlled the trade in Canada that they are in a position to dictate to the buyers, telling them that they must buy all or none of their canned goods from them. Hence, if a jobber buys our peaches he may be refused other lines by the Trust. A stipulation under which the Kelowna company is granted this permission is that they must not under sell the Trust. It will be impossible for the Kelowna company to handle the crop of the Okanagan. We are practically certain of an immense crop of peaches and should have a local cannery. The present plant will can ten thousand a day with the necessary help.

Mr. White pointed out that to get the help it would be necessary to contract for foreign labor, and if we were to have a cannery this year we must start at once. He thought the co-operative cannery the ideal thing. If we are to have it we must get busy as it is necessary to sell the crop before hand, buy the cans and sugar and procure the labor. He thought \$8,000 or \$10,000 cash would be enough to start with, some of this to be raised at once and the balance not later

than August. The Kelowna Cannery had bought their experience and were entitled to a bonus, but he thought their present demand was excessive. For instance, this year they were buying their sugar from St. Thomas, British West Indies, having found it better and stronger sugar for the purpose. Mr. White thought that it might be well to ask the Kelowna people, in view of their coming here next year with a plant of their own, to operate the local plant for this season. They would be glad to get our fruit to mix with their vegetables when selling.

There was general discussion as to how the co-operative company might be financed, and Mr. White offered to put up \$500 towards the necessary amount. Messrs. Mellor and Woodworth also offered to assist, but it was soon evident that the necessary amount was not forthcoming from those present. A motion was presented to ask the Western Cannery, Ltd., to arrange for the running of the local cannery this year, and also that Summerland fall in line with Kelowna along the lines of Mr. Fraser's proposition.

The meeting then adjourned.

## Railway Construction

Preparations are being made for the early commencement of actual construction work on the Summerland section of the Kettle Valley Railway. Already a number of men have arrived and are encamping along the route. Mr. A. Richardson is now erecting camps for more men. Mr. McArthur's engineering camp will remain about where it is in Peach Valley, and another is being opened near Dean's, on the upper Trout Creek. It is stated upon good authority that Messrs. G. A. Carlson & Co. have the contract for that portion of the line between Trout Creek Canyon and the summit, about 30 miles. A representative of that concern was in town this week. It is understood that this company will erect a warehouse for equipment and supplies and that they have secured a site for this purpose immediately adjoining the Fruit Shed on the waterfront, and will build beside the track there. They already have a carload of provisions at the dock, and equipment will arrive forthwith. It would appear that the Kettle Valley Railway Co. will themselves build the big steel bridge across Trout Creek.

### ANNUAL MEETING.

The annual meeting of the Ladies Hospital Auxiliary was held at the home of Mrs. W. Watson, on Tuesday afternoon last. The following officers were elected for the ensuing year:

President, Mrs. R. C. Lipsett.  
1st Vice-President, Mrs. F. W. Andrew.  
2nd Vice-President, Mrs. R. Clouston.  
Recording Secretary, Mrs. W. H. Hayes.  
Corresponding Secretary, Mrs. J. Tait.

House Committee—Messdames A. L. Moreland, W. J. Robinson, G. Anderson, S. Angove.

Finance Committee—Messdames R. M. Ross, Pattison, J. Downton, Angwin, T. C. Stinson.

Following is the financial statement for the year 1911-12:

Balance from 1911	250.81
Subscriptions	24.00
Donations	38.00
Proceeds of Regatta	80.95

Total \$393.76

For articles supplied to Hospital	57.28
Expenses at Regatta	48.85
Rent of Hospital for three months	75.00
Balance at Bank	217.08

Total \$393.76

Audited and found correct, F. J. Nixon, Feb. 15, 1912

### EMPIRE DAY.

A meeting to make arrangements for the celebration of Empire Day will be held in the Men's Club, on Saturday, the 20th inst. Every body come.

## Vancouver Wants Summerland Fruit

### MANAGER CITY MARKET HERE ON THAT ERRAND

### His Proposition Well Received

Indications Point to Large Shipments to that Market this Season

IT WAS a thoroughly representative gathering of fruit growers that came together in the Men's Club Tuesday evening to meet Mr. John McMillan, manager of the Vancouver City Market. His coming had been advertised, and now that an immense crop is practically assured, all were desirous of learning of the possibilities of putting their fruit in the hands of the consumer through that channel. Much interest was shown throughout the discussion which was largely general and enthusiastic. A great deal of information was obtained and there is evidently a determination on the part of local fruit growers to ship extensively to that market.

Mr. McMillan explained how the market was managed; the fruit or other produce quickly reaching the consumer in prime condition. The charge made by the market was a commission of 7 1/2 per cent. on carload lots and 10 per cent. on less than carload lots. The speaker urged upon his hearers—and evidently with good effect—the advisability of capturing the Vancouver market. The time is most opportune and he is disposed to prominently feature Summerland fruit and assured those present that if good fruit and produce in sufficient quantity was placed before the buyers of Vancouver, a sure and good market would be created. He expressed himself anxious to get Summerland fruit, whether rightly or wrongly he could not be sure, but he thought he was right. The demand for fruit in Vancouver is rapidly growing and there is now an excellent opening for the Summerland product, which has gained considerable reputation. During the height of the peach season it is Mr. McMillan's purpose to keep the local shippers posted on the market conditions by nightly wire. He pronounced the city merchants as being wary this year about arranging for American peaches.

Upon being questioned as to whether he would advertise the fruit from here as Okanagan fruit, he said that he would, and he would go further than that, and advertise it as Summerland fruit. He could handle not less than a car of peaches a week which could be shipped in fairly ripe condition, and not less than two cars of apples. During the strawberry and peach season, auction sales will be held every morning at nine o'clock, and after that every other day. They had as many as one thousand and as few as one hundred attending the sales. Last year's average would be about two to three hundred.

Only a few boxes of apples were sent from Summerland last year for which \$2 to \$3 was received. Mr. Sidney Sharpe had sent some early apples which netted him \$1.85.

A number present expressed their dissatisfaction at the very heavy express charges, claiming that 41 cents on peaches and tomatoes from Summerland to Vancouver was altogether unreasonable and practically prohibitive. Mr. McMillan threw out the suggestion that as Mr. Goodeve, provincial member for Kootenay, a practical British Columbia fruit man, was a member of the Railway Commission, we should ask that he have the rate cut down to at least 20 cents, which was quite sufficient, and even then we would be asking no favor. It cost the Washington grower 15 cents duty and 5 cents freight to land tomatoes in Vancouver. In shipping in carload lots the rate would be further reduced.

(Continued on Page 4.)

## Most Appalling Marine Disaster in World's History.

### Mammoth New Ship "Titanic" Sinks with Twelve Hundred People

SAILING ON HER MAIDEN VOYAGE from Southampton, England, on the afternoon of April 10, for New York, the White Star liner "Titanic" had on board a large passenger list, a large proportion being men and women of wealth and prominence on both sides of the Atlantic. No thought of mishap entered the minds of the passengers on this powerful leviathan, until suddenly, about ten o'clock on the night of April 14, within a day's run of her port, she struck an iceberg with terrific force. Even then there was not much alarm as the ship was thought to be unsinkable.

When the Titanic struck the iceberg which sent her to the bottom she was going eighteen knots an hour. The impact was so terrific that the decks were broken through, her sides crumpled and the bulkheads forming the watertight compartments, upon which such reliance was placed, were crushed in from the bow to nearly amidships.

This version of the wreck is credited to the British steamer "Bruce," on route to Sidney, Nova Scotia. She is supposed to have picked up the story by wireless from other ships near the Titanic. The great liner is declared to have struck with such speed and momentum as to rear half out of the water, tearing her bottom off on the jagged submerged ice from the bow clear to amidships. The compartments flooded at once and she began to settle by the head.

The officers succeeded in keeping perfect order for a time, long enough for most of the boats to be launched, but less than a thousand persons had been embarked when the cry went up, "She's sinking!"

From order the crowd changed to frenzy and rushed madly for the lifeboats within reach. Some of these were swamped by overcrowding; others were smashed to pieces against the davits as they were being lowered away.

By the time the boats that had got clear were away from immediate danger, the water had reached the engine room, the engines were rendered useless, the wireless failed, and all the lights were out.

Though a wireless call for help had been sent out and there were ships all round her, none were near enough to reach the scene of disaster till after the Titanic had gone down—less than four hours after striking. The Cunard liner "Carpathia," which was the nearest, picked up some 800 survivors who were in the lifeboats, but all hope of any of the remaining twelve or thirteen hundred people is abandoned. Those saved were mostly women and children.

The Titanic was 882 1/2 feet long and 92 1/2 feet wide. She had a displacement of 66,000 tons and a registered tonnage of 45,000. She was the most magnificently equipped ship ever built.

## College Boys Make Good Impression.

### Baseball Game at Oroville is Exciting Contest.

#### Return Game Hoped For.

The senior baseball team of Okanagan College, which journeyed to Oroville, Wash., at Easter to play a game in that town, certainly created a good impression by their visit. The following, from the Oroville Weekly Gazette, gives a full and interesting account of the game, which appears to have been an exceptionally close one.

The first ball game of the season in Oroville took place Monday afternoon when the local lads met a team made up of students from Okanagan College, at Summerland, B.C., and for the opening of the season a better game with a better aggregation of young sports could not have been desired. On the strength of the game Monday was made a gala day for Oroville. All the business houses closed from 2.30 to 4 o'clock in the afternoon, and a large crowd assembled at the grounds at the hour set for the game. Those present were well repaid by witnessing one of the cleanest and most interesting contests ever pulled off in Oroville. The game was far from perfect, but slips could be expected from the fact that the players have had no practice this spring. It was an auspicious opening, and if future games are to be as close and exciting as the initial contest the ball season of 1912 promises to be very interesting.

The college boys had to travel a long distance to get here. The party had to drive over to Kere-mos and from there take the train for Oroville, instead of driving direct to this point, which greatly increased the distance as well as adding materially to the expense. The visitors arrived on Saturday night, remaining over until Tuesday morning. They were highly pleased with the reception they received in Oroville, and went home happy and contented, even though they failed to win. They came so near winning that defeat under the circumstances was no disgrace. The team is made up of clean cut, jolly, manly young college lads.

Prior to the game the players paraded the streets in automobiles. At 2.30 after the warming up process, Mayor Reese stepped into the pitcher's box with Chas. Powell, sr., facing him. The mayor did not propose to let Mr. Powell have the satisfaction of belting the ball, and in order to keep it out of reach threw it over the grand stand.

Dr. Masters acted as umpire, and as usual was fair and impartial in his decisions. The weather was ideal for ball playing, but the heavy dust made it unpleasant to both players and spectators. After the first inning the game was constantly in doubt, and its very closeness made it intensely exciting. The teams were evenly matched and it was anyone's game to the very end. Every good play was loudly applauded, and the crowd was impartial in that respect. The visitors had a puzzling pitcher in McDougal, and he seemed as strong at the end of the tenth inning as when he fired the first ball over the plate. The score was tied in the seventh, and again in the ninth, requiring an extra inning to decide the question of supremacy. The fielding in the main was clean and sharp, while the batting was weak. The features of the game were great catches by Wilson, Hart, Finnis and Morelock, and the infield work of Frank Bartoll, Powell, Cunningham and Stevens. Powell led at the bat with a screeching three-bagger in the eighth inning. The following tells the story of the game by innings:

#### FIRST INNING.

Summerland—The game opened rather inauspiciously for the home boys, and for a time it looked as though the visitors had Hedger's goat at the start. Although Corey, the first man up fell on three strikes—Geo. Bartoll dropping the

third strike and spearing the runner at first. Stevens placed a safety in short left, and Finnis immediately duplicated the hit. Stevens trying to make home on the hit was caught plate by a peg from Frank Bartoll. McDougal could not dodge an in-shoot and was bored in the ribs; Cunningham reached first on a dropped third strike. With the bases full the situation was serious, but Finnis attempted to score on a short passed ball and was tagged out, catcher to pitcher. No runs.

Oroville—Hart made first through a bad fumble by Corey; Powell was given life when Finnis was slow in retrieving a hit towards third; Hart took second; Wilson drove a sharp one to centre, and Hart trying to score on the hit was nailed at the plate, short to catcher, Powell taking third on the play. Frank Daniel failed to hit the sphere; Blacker hit to short and gave up the ghost at first. One run.

#### SECOND INNING.

Summerland—Menzies opened the second with a clean hit to right for one base; Ryan failed to connect, and was out on three good ones; Dupont, who is a midge, was hit on the foot and took his base; Corey succumbed to three twisters; Stevens put one in Powell's preserves and never reached first. No runs.

Oroville—Frank Bartoll fell down on three strikes; Stansbury pushed one down to first and was put out by Stevens; Cunningham juggled Geo. Bartoll's grounder and the batter was safe; Hedger could not find the ball and the side was out. No runs.

#### THIRD INNING.

Summerland—Finnis pushed up a high fly and Wilson captured it after a long run; McDougal tried the same game, driving the ball far out into the centre, and again Wilson got under it; Cunningham hit to Powell, and the ball beat him to first.

Oroville—Hart hit to second and never reached first; Powell's career was cut short by precisely the same play; Wilson fell down on three strikes. No runs.

#### FOURTH INNING.

Summerland—Morlock fell a victim to three of Hedger's deceptions; Menzies placed a fly back of first that was taken in by Stansbury; Ryan placed a high fly over in Hart's ballwick and there was nothing to it. No runs.

Oroville—Six men went to bat in this inning and two base hits were made with some loose fielding, but the locals were able to get but one run over the plate. Frank McDaniel, first up, poked a single to left; Blackler's third strike was dropped by the catcher, but he was headed off at first. Frank Bartoll duplicated the three miss act, and the catcher again missed the third strike getting the runner at first, McDaniel having taken second in the meantime. Stansbury singled to right; George Bartoll sent a fly to short which Morlock dropped, McDaniel scoring and Stansbury taking second; while the pitcher had the ball in his hand Stansbury stole third; there he was left as Hedger went out second to first. One run.

#### FIFTH INNING.

Summerland—Dupont fell down on three strikes; Corey beat out on a bunt, and being a whirlwind stole to second and third while Stevens was striking out. Finnis lifted a beauty over centrefield for two bases scoring Corey; in attempting to steal third Finnis was thrown out, catcher to third. One run.

Oroville—Hart, who gets hampered around by about every pitcher he faces, took one in the diaphragm and reached first, going to second at once on a wild pitch. Powell lifted a high fly out to Ryan in left, and retired to the bench; Wilson was given a life by Cunningham who threw wild to first, Hart taking third. McDaniel put one between first and second, but Cunningham headed off the ball, spearing Mc at first, Hart scoring on the play and Wilson going to second. Blackler flew out to short, Morelock running in and making a pretty catch. One run.

#### SIXTH INNING.

Summerland—Emile McDaniel relieved Hedger in the box and struck out Cunningham, the first up. Frank McDaniel juggled Morlock's grounder, dropping the

# Commercial Onion Culture.

By P. E. FRENCH, Assistant Provincial Horticulturist.

THERE HAS RECENTLY ARISEN a method of culture in which the seed is sown in March in hotbeds and the plants set out in the field in May, when about the size of a lead pencil. The advantages of this method are:—

- 1—Less seed is required;
- 2—There is a larger and more uniform crop, in which the expenses of weeding and thinning are almost entirely obviated; and
- 3—The crop is harvested earlier.

The disadvantages are the cost of labor entailed by transplanting, and the cost of the preparation of suitable hotbeds. Where the soil is not well prepared, or moisture becomes deficient in August, or where labor is reasonably inexpensive, this method is worthy of consideration, but is not at present used in this Province.

## THE OLD METHOD OF ONION-GROWING.

Used almost altogether in the Province for commercial purposes, this does sufficiently well, especially in the districts of the Delta, Chilliwack, Armstrong, Vernon and Kelowna, where a long growing season, suitable soil, and a knowledge of the requirements of the business combine to make it a success.

## SELECTION OF SOIL.

The selection of soil is of the greatest importance, as it will not pay to grow onions on poor soil. The mechanical condition of the soil is of first consideration. Heavy clay soils should be avoided because they are difficult to work, usually deficient in organic matter, and often improperly drained. They cannot be worked as early in the spring as is desired, and the surface bakes and cracks after a rain unless stirred at the proper time.

Soils rich in decomposed vegetable matter are the most valuable for the cultivation of onions. A rich sandy loam is a very good soil, especially where irrigation is practised. A black muck soil that has been well drained is one of the best soils for onion culture. It has the power of retaining moisture which is so essential to the growth of onions. Fields which have been overrun with weeds should be used for other crops before planting with onions.

## THE SEED.

The seed should be of the very best quality to obtain the best results. Do not buy seed because it is cheap. The cost of seed is very small compared with the other expenditures in growing a crop of onions. It is always best to test the vitality of the seed before planting each year, a very good method being to place a few seeds in a damp woollen cloth or moist cotton, and note the number germinating. Order the seed early, because you are then sure of getting the firm's best quality.

## VARIETY TO GROW.

This depends almost entirely upon the market to which you are catering. The onion to grow is the one which will command the highest price on the market. As a rule, this is an onion—hard and compact in structure, mild and sweet in flavor, with a thin skin, small neck, and as nearly globular in form as possible. It should also be bright and handsome in appearance, productive, and of superior keeping quality. As a reliable market variety, to be grown in the old way, and for general purposes, the Yellow Danvers has probably not yet found its equal.

## FERTILIZING.

Barnyard manure is indispensable unless the soil naturally contains a large amount of humus. It should be plowed under in the fall unless very well rotted, when it might be applied to the surface and harrowed in. If applied on the surface when not well rotted, it has a tendency to hinder the working of the soil drill and wheel-hoe. A good heavy dressing—15 to 20 tons per acre—every three or four years gives very good results. Hen manure—one ton per acre—is very highly recommended for onions. It will produce the best results when applied as a top dressing before planting. Care should be taken that all manures used are free from weed seeds.

Of the nitrogenous commercial fertilizers, nitrate of soda is largely used. From 200 to 400 pounds per acre are applied in four equal dressings. The first application should be made broadcast just before seeding, and mixed with the surface soil by harrowing. The other dressings are made by a drill at intervals throughout the growing season.

To supply potash wood ashes are frequently used. Ashes are applied in the fall, winter, or early spring, and should be harrowed in, at the rate of about 1 1/2 tons per acre. Bone-meal or other phosphates are beneficial if phosphoric acid is required.

Each grower should study the requirements of his own soil. A few experiments should be made before applying commercial fertilizers to any large extent.

## PREPARATION OF THE SOIL.

Fall plowing is preferable in most places, as it gives the vegetable matter a better chance to decay, and the alternate freezing and thawing pulverizes the soil. The ground can also usually be worked earlier in the spring, which is sometimes of great advantage. No labor should be spared in putting the soil in a fine condition. It should be harrowed four or five times and rolled two or three times, depending, of course, on the natural firmness of the soil. A plank drag is a very good implement to level the surface and make it smooth for planting. It is very important to have the ground firm and smooth on top and free from sticks, stones, etc.

## SOWING THE SEED.

As soon as the land can be prepared in the spring the seed should be sown. The distance between the rows will depend somewhat on the variety grown, but for ordinary purposes the seed should be sown in rows 14 or 15 inches apart and covered about 1/2 inch deep. Where the horse cultivator is to be used, or where irrigation is practised it is advisable to plant two rows close together, about ten inches apart, and the next two rows far enough apart for the horse cultivator to work, about 24 to 26 inches. If the soil is rich and in good condition, about 3 1/2 pounds of seed per acre is sufficient, but if the soil is not extra rich, or if there is danger of much loss from depredations of the cutworm or onion maggot, more than this amount should be used. More seed than is necessary should not be used, as the work of thinning onions on a large scale is rather an expensive operation. It is important to have the seed sown in straight rows. Crooked rows are not only harder to cultivate but are always an eyesore.

(This article will be concluded in an early issue.)

## TO STOP DECAY IN APPLES.

### Government Investigators Find the Reason and the Remedy.

Portland, Ore., April 15.—Lovers of apples will be interested in the conclusion reached by government investigators that decay of this fruit in cold storage can be prevented through the destruction of the anthracnose germ by the use of the well-known bordeaux mixture. This conclusion is the result of extensive experiments made by B. B. Pratt, of the Department of Agriculture, and Professor W. H. Lawrence, a local investigator of apple growing.

The anthracnose pest has been

known to orchardists for years, and formerly it was the custom to chop down the trees that became infected. The work of investigators brought the remedy several years ago, however, and various infected orchards were sprayed and cleared of the anthracnose and so made into good producers again.

It has been found that the mere ridding of the trees of the pest is not sufficient, for the wind will blow the anthracnose from infected orchards a considerable distance, and a single spore alighting on an apple is sufficient to cause the decay. Now, however, a treatment for the apples themselves is being perfected so as to rid cold storage of this menace.

## SYNOPSIS OF COAL MINING REGULATIONS

COAL mining rights of the Dominion, in Manitoba, Saskatchewan and Alberta, the Yukon Territory, the North-west Territories and in a portion of the Province of British Columbia, may be leased for a term of twenty-one years at an annual rental of \$1 per acre. Not more than 2,560 acres will be leased to one applicant. Application for a lease must be made by the applicant in person to the Agent or Sub-Agent of the district in which the rights applied for are situated.

In surveyed territory the land must be described by sections, or legal subdivisions of sections, and in unsurveyed territory the tract applied for shall be staked out by the applicant himself.

Each application must be accompanied by a fee of \$5, which will be refunded if the rights applied for are not available, but not otherwise. A royalty shall be paid on the merchantable output of the mine at the rate of five cents per ton. The person operating the mine shall furnish the Agent with sworn returns accounting for the full quantity of merchantable coal mined and pay the royalty thereon. If the coal mining rights are not being operated, such returns should be furnished at least once a year. The lease will include the coal mining rights only, but the lessee may be permitted to purchase whatever available surface rights may be considered necessary for the working of the mine at the rate of \$10.00 an acre. For full information application should be made to the Secretary of the Department of the Interior, Ottawa, or to any Agent or Sub-Agent of Dominion Lands.

W. W. CORY,

Deputy Minister of the Interior.  
N.B.—Unauthorized publication of this advertisement will not be paid for.

## Municipality of Summerland.

### COURT of REVISION, 1912.

The one who makes money is the one who buys land. It is the foundation of all values. So, young man, make an effort to get wealth by securing some of the great bargains that are being offered by the Summerland Development Company in their closing out sale.  
 See W. J. Robinson, who is exclusive agent for the company.  
**DO IT NOW!**

**The HOME CIRCLE.**  
 Crude Thoughts From the Editorial Pen.

**BEAUTY** is a dangerous gift. It is ever so. Like wealth, it has ruined its thousands. Thousands of the most beautiful women are destitute of common sense and common humanity. No gift of heaven is so general as the gift of beauty. In too many cases it makes her silly, senseless, thoughtless, giddy, vain, proud, frivolous, selfish, low and mean. We think we have seen more girls spoiled by beauty than by any other one thing. "She is beautiful and she knows it," is as much to say she is spoiled.

**LET US** stop to think of the aged. For us, too, the evening shadows will close at length, and we shall, perchance, be left at desolate hearthstones. We shall need to be remembered then.

**MARRYING** for money is no worse than marrying for poverty.

**HE WHO CAN** suppress a moment's anger may prevent a day of sorrow.

**A MAN** will grant his wife any right more cheerfully than the right to be sick when he feels bad himself.

**MEN FREQUENTLY** lose interest in their homes by their failure to make them interesting and pleasant.

**EVERY TEMPTATION** resisted, every noble aspiration encouraged, every sinful inclination suppressed, every bitter word withheld adds its little item to the impetus of that great movement which is bearing us and all humanity onward toward a richer life, a higher character and a nobler destiny.

**WANTED—A BOY.**  
 A jolly boy.  
 A boy full of vim.  
 A boy who scorns a lie.  
 A boy who will never smoke.  
 A boy who will "stick-to-it."  
 A boy who takes to the bath-tub.  
 A boy who is proud of his big sister.  
 A boy who thinks hard work is no disgrace.  
 A boy who does chores without grumbling.  
 A boy who thinks that an education is worth while.  
 A boy that plays with all his might—during play hours.  
 A boy who listens not to unclean stories from anyone.  
 A boy who thinks his mother above all mothers is the model.  
 A boy who does not know more than all the rest of the house.  
 A boy who does not think it inconsistent to mix praying and playing.  
 A boy who does not need to be called a second time in the morning.

**CHEERFULNESS AND HEALTH.**  
 People never break down in health so long as they keep a happy, joyous heart. It is the sad and despondent heart that tires, and whatever the load, we should always keep a cheerful spirit within. There are two ways of meeting a hard experience. One is to struggle and resist, refusing to yield. The result of this is the wounding of the soul and the intensifying of the hardness. The other is to quietly accept the circumstances or restraints and make the best of them by enduring all cheerfully. Those who live in the first way grow old in the middle of life. Those who take the other way keep a young and happy heart down to old age, and often find the last days the best days and old age the happiest time of life.

**SUNSHINE** in the face, sunshine in the heart and sunshine in our homes if we would be healthy and happy. Catch the sunshine in all the living rooms, roll up the shades and let the flowers and the children—those dearer human flowers—bask in the sunshine, the life of the world, that is now in the spring time calling the grass, the wild flowers and all vegetation from their cold, damp beds to answer to its greeting. The sweetest flowers of the springtime are now peeping out from beneath their coverings to greet its warm smiles, the sweet song birds trill forth their sweetest melodies at sunrise. And in winter how we welcome the sunny days. It changes our gloom to gladness. Then let us gather in all we can, that when the dark days come we can still have its beams radiate our faces, purify our hearts and glorify our own lives and also the lives of others. Let us sing daily the bright song of sunshine.—Aunt Prue.

**INDOLENCE AND THE HOME.**  
 Indolence is an enemy to home. Some men are too lazy to provide decent conveniences at home. It is a crime against the happiness of the home for a man to neglect to provide the little conveniences that will add to the beauty and comfort of the home. Put a carpet on the floor and a few pictures on the shelves and give your family a paper or two to read. Study to make yourself useful, and to rob the home of its bleakness, by providing things that add to its comfort and brightness. Make the children feel that home is a Paradise in which the thrushes of love ever sing high up in the clear blue sky of the humble heart and you will have no fear of turning out thieves and harlots in years to come.

**RIGHT KIND OF ASSESSOR.**  
 There is an assessor in a neighboring district that is certainly doing business with a proper spirit. When he goes out to assess and three or four dogs meet him at the gate he proceeds calmly to the proprietor of the farm, makes his assessment and asks how many dogs he has. If the proprietor says he has none, but that a few dogs just "hang around the place," Mr. Assessor just pulls out a revolver and speedily dispatches the canines in sight. He says he may not be elected assessor again but he is going to get the dog tax of his township while he is on the job. There should be more assessors of this kind in every province.

Lumby, a small town some miles north of Vernon, had an attempted robbery at its local bank about midnight Wednesday of last week. The robbers were amateurs and after firing one shot which wounded the manager who slept on the premises, they became alarmed and fled. Constable Fraser, the successor of Constable P. G. Routh, arrested three men and lodged them in the Vernon jail. They were at the Lumby Hotel. They are Milo Roberts, 28, a laborer of Lumby; Frank Ofner, 29, a Bohemian of Enderby; Louis Oliverius, a young Bohemian, also of Enderby.

Mrs. Dan Williams, a former resident of Summerland, and now of Pentleton, was a visitor in town this week.

### Local News Items.

Miss Dora Day, a grand-daughter of Jas. Gartrell has been visiting at the home of the latter.

The Dominion Government have had a car of telegraph poles landed at Summerland wharf this week.

The local telephone office will in future be open on Sundays from 9.30 to 10.30 a.m.—long distance hours.

The Summerland friends of Miss Ruth Fulton will be glad to learn that she is rapidly recovering from her recent illness.

Owing to the Okanagan Mission Football Club withdrawing from the Valley League all matches with them have been cancelled.

Ed. Garnett's new car, a McLaughlin-Buick four passenger, has arrived and Mr. Garnett is already learning to operate it himself.

Mr. J. M. Robinson, and daughter Miss Gwen, arrived in the Valley Sunday night and made their first visit to Summerland on Tuesday.

Mr. J. M. Robinson is to establish a steam laundry at Naramata this summer. Machinery is being purchased for the purpose and will arrive shortly.

Claude W. Munro returned on Thursday night's boat from Guelph, Ont. Mr. Munro has been taking a course in horticulture at the Agricultural College there.

Tickets for the Overseas Club Ball, in aid of the Football Club, can be had from committee members, John Ritchie's store, West Summerland, or from B. Newton, Naramata.

The party of citizens from Ottawa arrived Thursday night and put up at Hotel Naramata. They have about decided to take up land at North Naramata. There has been some delay in opening up Apple-dale.

Mr. J. A. Black, who has been spending the winter in Amherst, N.S., where he has business interests, has returned to Summerland. Mr. Black reports finding a great improvement in business in the maritime provinces.

The Provincial Water Commission held its first session in Summerland this Friday morning in Empire Hall. The object of the Commission is to investigate water rights, and permanently fix the rates to the lots to which they belong.

The Summerland Telephone Company have made their first call on stock, and the call has been responded to quickly and satisfactorily. The Kellogg Company have submitted prices which will be considered and acted upon at an early date.

There will be a meeting of the Local Option League on Sunday afternoon in the Baptist Church, Summerland, at three o'clock. Matters of importance will be brought up. All interested in temperance and moral reform work are urged to be present promptly at three o'clock.

A large gasoline engine weighing some seven thousand pounds has been brought in by Messrs. Hatfield & Clark for the Western Okanagan Orchards Company. This concern is erecting a saw mill at Prairie Valley, and this engine will be used as the motive power. The fuel will be crude oil.

Okanagan Falls will again celebrate on June 3. Horse racing, athletics and aquatics will be indulged in, and every effort is being put forth by those in charge to make the day a success. Anyone desiring information regarding the program, etc. should write the Secretary, Sports Committee.

Mrs. K. S. Hogg and Miss McLaren returned on Wednesday night's boat. Mrs. Hogg has been absent for some months, and has been as far east as New York, where she spent some weeks, and in the return journey she has visited a number of the more important cities. Miss McLaren has spent a large portion of the winter in prairie towns.

Mr. and Mrs. J. H. Pushman and their three little ones, and probably Mr. and Mrs. Pushman son, who have just arrived from Ottawa, will be residents of Summerland. Mr. Pushman has bought the Mark Manchester lot on the hill and will take charge of the books of the Summerland Development Company, practically the position formerly held by Mr. I. B. Fulton.

### WEDDINGS.

#### OTTLEY—GODWIN.

A quiet wedding was solemnized at the Anglican Church at 3.30 on Monday afternoon. The contracting parties were Mr. L. B. Ottley, of Prairie Valley, and Miss Dorothy Godwin, a young English lady, who has been a resident of Summerland for about a year. After the ceremony the wedding party repaired to the home of Mr. F. A. C. Wright, where a wedding dinner was given. Miss Godwin has made her home with Mr. and Mrs. Wright since coming to Summerland. The happy couple will reside on Mr. Ottley's fruit ranch.

#### WEEKS—GARDNER.

At West Summerland, on Thursday last, at 3.30, John Weeks, the popular baker, and Miss Marion A. Gardner were united in wedlock, Rev. F. W. Pattison officiating. The wedding was held in their future home. The bride has been a resident of Summerland for about eight months. Mr. Weeks is a native of England.

### URGES PATRONAGE OF HOME INDUSTRIES.

Among the members of the Prince Edward Island legislature this year is Professor Alexander McPhail, of Queen's University, Kingston, who is sitting for the Fourth district of Queen's, in which Orwell, his old home, is located. The professor, in his maiden speech, made a strong appeal for the revival of the once flourishing industries of his province, of weaving goods, both woollen and cotton, carding wool, tanning, carriage manufacturing and others.

In the House, Mr. McPhail wears as an object lesson to the members, a very becoming grey homespun suit, made of cloth woven in his native district. The professor is also an enthusiastic potato grower, and is associated with his brother, Dr. Andrew McPhail, the well-known litterateur of Montreal, in experimental work at their farm at Orwell.

The professor moved in the House a resolution asking the government to take steps to prevent the much-dreaded potato canker from finding a foothold in the province. The question was referred to the agricultural committee.

Mrs. R. C. Lipsett will not receive next Wednesday.

Two interesting games of baseball were played on the College Campus last week. On Saturday the High School boys played a team from Pentleton and were victorious by a score of 10-11. The other game, last Tuesday, was between the High School and the College Juniors. The College won out 16-11.

### JIMMY'S LETTER TO DAD.

Okanagan College, West Summerland, April 17, 1912.

Dear Dad:

Big recital, little recital and junior baseball game made up the activities of this past week. The baseball game was with the high school team and our youngsters pulled out ahead for the first time this year. It was a good game though the runs did come in pretty fast, and even our boys admit that the score is not a good criterion of the play. The high school should have won but a couple of bone-head plays, a long drive by Few, and a general batting rally swept them off their feet, and before they realized the truth eight runs had been added and the game was irretrievably sewed up. The final score was 16-11.

Friday night the advanced pupils in the Music Department gave another of their recitals. It was better patronized than the others, and a better concert, showing that the efforts of Professor Moore have not gone unrewarded. Perhaps the event of the evening was the playing of Miss Loa Scheeler. She proved that she could handle a piano in great fashion. Round after round of applause swept after her and she deserved all she got. Miss Scheeler would seem well qualified to act as assistant in pianoforte. After Miss Scheeler perhaps Miss Leone Morrison pleased her audience most in the piano department. The finished way in which her left hand travelled over the keys seemed almost marvellous. She played entirely with this one hand and there seemed enough for both to be kept pretty busy. Though I liked these two, the best I could not pass the rest of the piano work without saying they all did remarkably well and if they made any mistakes I didn't know it and it all sounded great.

And the vocal part was splendid. Miss Anna Hayes, soprano, has sung here before but she certainly never had a song which suited her as well as "Love, the Pedlar," and she sang it as if she meant all she sang. Her two other songs were admirably sung and even omitting her first entitle her to first place in this department. Mr. Wallace Wright, baritone, was very good in his song which is world famous. All the vocal work was of the same high order as the piano, and was highly liked. This is the entire programme:

- 1—Humoresque Dvorak.
- Miss Helen Phinney.
- 2—Songs (a) Love's Dream, Freeman.
- (b) It Isn't the Thing You Do, Dear, White-Watts.
- Miss Laura Denholm.

- 3—Sextette from Lucia de Lamermoor, Donizetti. Arranged as left hand study by Lischetizky. Miss Leone Morrison.
- 4—Romance Schnett. Miss Jean Stevens.
- 5—Song, Mother O' Mine Tours. G. V. White.
- 6—La Melanchonia Moszkowski. Miss Edna MacLeod.
- 7—Song, Swing High, Swing Low, Haesche. Miss Helen Sawyer.
- 8—Polonaise in A, Chopin. Miss Effie Morrison.
- 9—Song, Love, the Pedlar, German. Miss Anna Hayes.
- 10—The Two Larks, Lischetizky. Miss Watson.
- 11—Summer Night, D'Hardelot. Miss Annie Campbell.
- 12—Novellette in F, Schumann. Miss Edna MacLeod.
- 13—Song, The Wanderer, Schubert. Wallace Wright.
- 14—Polka de la Reine, Raff. Miss Edith Thomson.
- 15—Song, The Road to Mandalay, Oley Speaks. G. V. White.
- 16—(a) Witches' Dance. Pagginnini. (b) Love's Dream, Liszt. (c) Valse Caprice, Newland. Miss Loa Scheeler.
- 17—Songs, (a) Knowest Thou the Land, Thomas. (b) O, That We Two were Maying, Nevin. Miss Anna Hayes.
- 18—Rhapsodie, No. 2, Liszt. Miss Loa Scheeler.

### GOD SAVE THE KING.

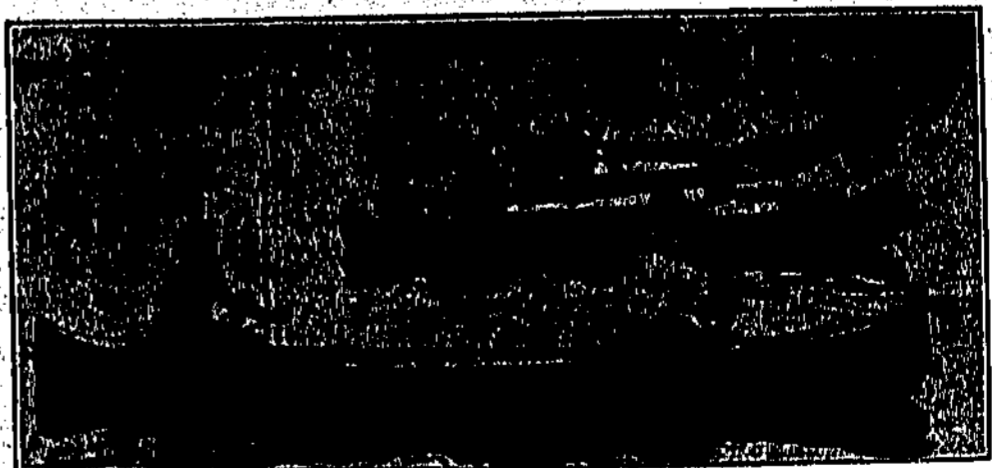

The junior recital which came off on Tuesday was pretty fine considering the youth of those who took part, and it was much appreciated. We liked Miss Graves' song very much and thought she did very well, as she has only been working in the vocal department for a short time. Miss Esther Hammar led the piano work with Miss Johnson a close second. Miss Marjorie Hatfield was a diminutive player but performed like a veteran.

The tennis tournament is going to start on Friday. Send some more money soon, please. Lovingly, JIMMY.

Mr. R. H. English returned from the Calgary Horse Show on Thursday night. He says he had a good time and the display of horses was the finest he has ever seen both in quality and quantity. While at the show Mr. English exchanged the horse "Duplex" for an imported dark bay Clydesdale stallion, which is expected to arrive to-night. Mr. English also purchased an orchard team for Major Hutton which will arrive at the same time.

Letters intended for insertion must be authenticated by the name and address of the writer, not necessarily for publication. The opinions of correspondents are not necessarily those of the Review.

### MAKING SPYS BEAR IN THREE YEARS.

Naramata, B.C., 10th April, 1912.

The Editor, The Summerland Review, Dear Sir:

Your article in 5th April number "Making Spys Bear in Three Years" is most opportune, and must have been read by every thoughtful and experienced fruit grower with great interest. It is a fine thing to expose all such frauds, and all papers who do that deserve every possible praise.

In this present strenuous age too much notice is taken of every new process—generally a fake—to bring young trees into early bearing, and much better would it be if just ordinary attention were paid by each owner to his orchard, and let nature do the rest. We do too much in that impatient "hustling" spirit, to improve, to correct nature, "to lick creation" in fact, as the vulgar American phrase has it. I have seen a good many orchards in my time. For many years I visited each spring time that premier fruit growing country, France. It is still the custom in even most modern and model orchards there, not to let young trees bear fruit in their first and second and even third year of their full bloom. When such a young tree is shaken the bloom petals easily fall off, or are easily removed. A peach tree, younger than five years, is not strong enough, has not vitality enough to bear fruit, an apple tree not under seven years. Fruit from young trees often looks well but has a watery taste, no flavor, no sugar. This, I consider, is the reason why we hear now and again of the want of flavor in the Okanagan Valley fruit. Full grown trees of kinds suitable to the Dry Belt, bear as luscious fruit here as they do in the Niagara district, Nova Scotia, France, England, or anywhere else.

Many will no doubt say, "Nous avons change tous sela" in this up-to-date fruit province of ours, but the old countries, such as France, where fruit growing has been made a study, an art, for more than two hundred years still produce those wonderful apples, second to none, which the Hon. Price Ellison sold in Regent Street W., at a shilling (25 cents) a piece, a price which made his mouth water, and from such experienced countries we can only learn, i.e., gain knowledge and wisdom.

I named above the assertion of some wisecracks interested in other fruit districts, that Okanagan Valley fruit though looking fine and tempting, lacked in flavor and solidity, that its strawberries, its cherries and peaches were tasteless or sour, or watery, that its apples were short of that firmness and juicy eating which apple lovers enjoy so much and which qualities were always found in the fruit from the XYZ district. I have heard such talk before. It is the usual stone thrown on every new fruit district. Generally it is a myth. It belongs to the same category as that well-known lawyer maxim "if you cannot pick a hole in your opponents' argument sling mud at him."

The first time I heard of this want of flavor in the fruit of this district was in 1907 when on board the Aberdeen, I came across a gent who at first was a mystery. He let out that he had come to look at the famous apples of the Okanagan. He had been at Vernon and Kelowna, at Peachland and at Summerland, and was going on to Penticton. I met him a few days after going back. I of course pumped him as regards what he had seen and learned. He told me there was a great future for the valley which I valued as an empty compliment, worth a large O—but now I waited for the gist of the matter and it came—the fruit, the apples have no flavor, fine to look at, make hellef, but no flavor. The gent was a talkative person and as you can get anything out of an old woman of the male gender if you go diplomatically about it, I wished him on parting, "bon voyage," coupled with the hopes that he would reach his home and dear ones very soon. For which he thanked me letting out that he had to go quite a long way. "How far may I ask?" I replied, "Oh, quite in the east, in the Niagara district

## The Standard

MONTREAL THE STANDARD is the National Weekly Newspaper of the Dominion of Canada. It is national in all its aims.

It uses the most expensive engravings, procuring the photographs from all over the world. Its articles are carefully selected and its editorial policy is thoroughly independent.

A subscription to The Standard costs \$2.00 per year to any address in Canada or Great Britain.

TRY IT FOR 1912! Montreal Standard Publishing Co., Limited, Publishers.

I represent that fruit growing district—being an expert in fruit culture." Aha, I thought, they sent you to sniff round here and probe to the bottom that new fruit country on the Okanagan, so much talked about, and your report will be "No good, no flavor, no keeping qualities, all water."

Personally I have tasted here as good, as sweet and as well flavored fruit as ever I tasted during the many years I visited (twice a year) France and Italy. I have always been a great fruit eater. In Italy we often discarded all meat and lived on soups, macaroni and fruit, washed down by the red wine of the country, from the genuine Chianti down to the "vin ordinaire" of the peasant.

I may add that I sent last fall two boxes of Jonathans grown in the valley to relatives in England. I asked them to give me their honest opinion without fear. The receiver of one, my brother-in-law, a great apple connoisseur, says: "those apples were grand, never tasted better, they arrived in prime condition, and were enjoyed by all this Christmas just over." The other man, my nephew, says: "my word these are fine fruit. I can allow myself the luxury of having a first-rate apple every morning for breakfast. If this is a fair sample your valley ought to have no difficulty of getting first-class prices in all markets where you ship to."

I shall feel honored if you will see fit to give this letter publicity in your valued paper, and beg to remain,

Dear Sir, Your obedient servant, JULIUS W. A. BLOCK.

## ALTER ROUTE TO TOUCH PRINCETON.

PLANS OF K. V. R. MATERIALLY ALTERED.

That the route of the Kettle Valley line has been changed in order to tap Princeton with the main instead of with a branch line, has been officially announced. The Fraser River will be bridged at Hope and connection made with the main line of the C. P. R. Construction is in progress north-west of Midway near the summit of the west fork of the Kettle River, and between Penticton and Summerland. From Summerland to Osprey Lake construction will begin at once.

From Osprey Lake, the revised line will follow Five Mile Creek and the Similkameen River to Princeton and from thence up the same river to the Tulameen River and from thence up that stream to the west fork of Otter Creek to a point two miles from the place where the Merritt branch will tap the main line.

A survey party will shortly be placed in the field to revise the location between the junction point and the summit of the Hope mountains at the headwaters of the Coquahalla River, which flows down the Fraser slope. A contract for the construction of the line lying between the junction and the summit will be let within a month or two as it is intended to start grading work long before July 1, the date fixed under the agreement with the provincial government. No action will be taken in regard to the section between the summit and Hope until the Railway Commission decided as to the merits of the applications of the Kettle Valley and the Great Northern Railways for the approval of their respective location surveys.

The main line of the Kettle Valley system will tap all the coal and metalliferous camps in the vicinity of Princeton.

## GREAT VOCALIST COMING.

It will be welcome news to the music loving people of Summerland to hear that complete arrangements have been made for the appearance of H. Ruthven MacDonald, the famous Basso-Cantante, in the Empire Hall on Saturday evening, April 27th. Mr. MacDonald is accompanied by the Toronto Glee Club, a musical organization second to none in the Dominion of Canada. This will probably be the greatest musical event in the history of the Valley, and should be greeted by a crowded house. No price over \$1.00 will be charged.

A sweet biscuit may be made with ordinary biscuit dough, with the addition of chopped dates. Roll the dough quite thin spread with plenty of soft butter, and then put on a thick layer of chopped dates. On top place another layer of dough, and cut out with small cutter. Bake in a hot oven.

## Naramata Notes.

Mrs. T. H. Boothe spent a few days in Summerland this week visiting friends.

Mr. J. C. Lyons purposes taking temporary residence for the summer months on his fruit lot north of the mill.

The sick folk of town are now in the convalescent stage, thanks to the attentions of the nurses and the doctor.

Mr. J. M. Robinson and daughter Miss Gwen returned on Sunday after several months residence in Toronto.

Mr. J. S. Gillespie has had the grounds about his home beautifully levelled off and terraced with a view to creating a fine lawn.

Mr. J. Paxton and bride, from Butte, Montana, are here for a look round and may possibly take up residence here a little later.

The residence of Mr. Jas. Young certainly presents an attractive appearance since the finishing touches have been added by the decorator's brush.

Mr. Peterson, who for some time has been running the tug "Kelowna," has accepted a position in New Westminster, and left on Tuesday for the Royal City.

Mr. Jas. Ritchie sent a force of five men headed by W. Atkinson, from Kaleden, to stake out and plant his twenty-five acre orchard property. The boys have been hard at work all the week and have made good progress. Robt. Barkwill has assumed charge of the property for the season.

Hotel Naramata opened its doors for the season on Monday the 15th inst., with Miss Brunton in charge. This will doubtless be welcome intelligence to the travelling public and to the numerous prospective tourists who are rapidly acquiring the habit of spending their holidays at this popular resort.

### GET IN LINE.

"No business man in any town should allow a newspaper published in his town to go without his name and business being mentioned somewhere in its columns," says an exchange. This applies to all kinds of business—general stores, dry goods, grocers, furniture dealers, manufacturing establishments, automobile dealers, mechanics, professional men and, in fact, all class of business men. This does not mean that you should have a whole or half or even a quarter of a page ad. in every issue of the paper, but your name and business should be mentioned if you do not use more than a two line space. A stranger picking up a newspaper should be able to tell just what business is represented in a town by looking at the business mentioned in the paper. This is the best possible town advertiser. The man who does not advertise his business does an injustice to himself and his town. He is the man who expects the newspaper to do the most free boosting for his town. The man who insists on sharing the business that comes to a town but refuses to advertise his business is not a valuable addition to any town. The life of any town depends upon the live wide-awake and liberal advertising business men.

### NEW CONTRACTS ON K.V.R.

Three more contracts on the Kettle Valley Railway were let this week. Clyde H. Williams & Co. secured six miles; Milligan, Dussault & Co. nine miles, and Porter & Connely ten miles. These contracts are all for the extension of the line west of Carleton Place and will bring the new line within fifteen miles of the summit. The contractors were in the city on Monday making financial arrangements for the carrying on of the work, and also for the necessary supplies required in the different camps.—Grand Forks Gazette.

Salt will keep meat, but it requires "sand" to keep a good resolution.

In 1905 only about 500 automobiles were owned in the whole of Canada, valued at \$1,000,000, while to-day there are upwards of 15,000 running on Canadian roads, and representing over \$200,000,000.

Mr. \_\_\_\_\_  
your Name

your Post Office \_\_\_\_\_ your Province \_\_\_\_\_

**WRITE** your name and address in the lines above, clip out this ad, and mail it now. We will send, by return mail, a book that tells how to make yours a "Twentieth Century" farm.

You wouldn't be satisfied to use a scythe to cut your grain, when a modern harvester can do it so much better, would you? Nor to use the old soft-iron plough-share that your ancestors walked behind, when you can get an up-to-date riding plough? Every Canadian farmer realizes the advantages of Twentieth Century implements.

The next step is

**The 20th Century Material—Concrete**

Concrete is as far ahead of brick, stone, or wood as the harvester is ahead of the scythe or the riding-plough is ahead of the old iron plough-share.

Concrete is easily mixed, and easily placed. It resists heat and cold as no other material can; hence is best for ice-houses, root-cellar, barns, silos and homes. It never needs repair; therefore it makes the best walks, fence-posts, culverts, drain-tiles, survey monuments, bridges and culverts. It cannot burn; you can clean a concrete poultry-house by filling it with straw and setting the straw afire. The lice, ticks and all germs will be burned, but the house is uninjured.

It is cheap—sand and gravel can be taken from your own farm. Cement, the only material you must buy, forms from one-seventh to one-tenth of the whole volume.

Do you want to know more about Concrete on the Farm? Then write your name and address in the lines above, or on a postcard, mail it to us, and you will receive by return mail a copy of

**"What the Farmer Can Do With Concrete"**

Not a catalogue, but a 160-page book, profusely illustrated, explaining how you can use concrete on YOUR farm.

[Continued from Page 1.]

lock's hit, and the runner was safe at first; Morlock pilfered second the first ball pitched, and in trying to reach third on the next ball was thrown out, catcher to third, thereby losing the game in all likelihood, as Menzies lined out a single over short; he got no further than first, as Ryan fell down on three strikes. No runs.

Oroville—The session was quickly over for the locals. Frank Bartell placed a fly far back of third that looked perfectly safe, but Finniss made a sensational one-handed catch after a long run backwards; Stansbury pushed a short fly to pitcher, and Geo. Bartell could do no better than to send a little one to Morlock. No runs.

SEVENTH INNING.

Summerland—Dupont, the little fielder, fell a victim to three strikes; Corey rolled the ball down to Powell at third and that settled it for him. Then the trouble did begin for the home boys and the game was tied and almost lost. Stevens reached first on four wide ones and celebrated the event by stealing to second; Finniss placed a grounder to left making first and scoring Stevens; Finniss proceeded to race around to second and third; McDougall was knocked out temporarily with a hot one in the side, but pluckily took first and worked his way to second; a wide one scored Finniss, tying the game. McDougall tried to score on a ball that bounded from the catcher's mitt, but George Bartell threw the runner out at the plate, McDaniel doing the tagging. Two runs and three all.

Oroville—Emile McDaniel shot a high fly in the infield and very accommodatingly stood at the plate to see Finniss drop the ball. The error was excusable as two or three players were racing for the ball. Finniss recovered it and sent it down to first in time to retrieve his error by putting out the runner. The game could have been won here had McDaniel made first, which he could easily have done, for although Hart went out second to first, Powell made the greatest hit of the game sending a high fly down the left field foul line far over the head of the fielder. Powell reached third amid the uproar of the multitude; a passed ball let in the run; and as it was the third strike on Wilson, that batter reached first; in attempting to steal second Wilson was thrown out; Corey to Cunningham. One run.

EIGHTH INNING.

Summerland—Cunningham fell down on three good ones; Morlock did likewise; Menzies reached first on four balls, took second on a passed ball, and in attempting to steal third was thrown out, Geo. Bartell to Powell. No run.

Oroville—Frank McDaniel swiped the air and retired; Blackler hit to second and perished at first; Frank Bartell put up a fly to Morlock and jumped the job. No run.

NINTH INNING.

Summerland—Some wild playing almost threw the game away at this stage. Ryan was given his base on four balls; Dupont hit between the plate and pitcher, McDaniel recovering the ball in time to put out Ryan at second, Dupont being safe at first; in attempting to catch

Dupont at first Stansbury fumbled and the little fellow made second; Corey rolled the ball to third and never reached first; Frank McDaniel booted Stevens' grounder and the runner was safe, Dupont going to third; Stansbury muffed a ball thrown to head off Finniss and Dupont scored, again making it even up amidst great excitement. McDougall could not connect. One run.

Oroville—The hopes of the home team went glimmering when Stansbury struck out, Geo. Bartell rolled a little one to McDougall and was out at first, and Emile McDaniel could do no better than to send one to short, who got it in time to beat the runner. No runs.

TENTH INNING.

Summerland—The tenth inning started with the crowd pushing down near the base lines, every one keyed up to the highest pitch. Cunningham could only push the ball to the pitcher and was put out at first; Morlock started the crowd cheering by striking out; then danger loomed, Menzies driving a grounder to Frank McDaniel, who could not pick it up in time and the runner was safe on first; Menzies stole second, but in his anxiety to get the run attempted to steal third and was caught, Geo. Bartell to Powell. No runs.

Oroville—Hart had three strikes called, when the catcher dropped the third and made a wild throw to first, which was the fatal error of the game; Hart stole second while Powell was going out on strikes. Frank Wilson came to the rescue with a timely hit to centre upon which Hart scored by an eyebrow, and the game was won after one of the closest and prettiest contests ever seen on the home grounds.

LADIES' HOSPITAL AUXILIARY.

A meeting of the Ladies' Hospital Auxiliary was held on Tuesday last at the home of Mrs. W. Watson.

The present matron and nurse having resigned their positions, the Hospital Board decided to leave the fate of the Hospital in the hands of the Ladies' Auxiliary.

After much discussion it was resolved that the Hospital is far too necessary and important an institution to be allowed to close for want of the assistance, and therefore, for the good of the community at large, The Auxiliary has decided to come forward and endeavor by every means in their power to procure the funds needed to enable the matron to run the hospital at something better than a dead loss.

It was decided that Mrs. Arthur Solly be invited to take up the work at the Hospital, and that she should be guaranteed the rent, telephone, electric light and water. The last two items, we understand, have already been guaranteed by the Council, and it remains for the Auxiliary to collect the money necessary for the rent and telephone.

Attention is drawn to the fact that the Hospital is not a private concern, but a very public one, and therefore it is to the public that the ladies intend to look for funds. No hospital has ever yet been a paying concern, and the Summerland Hospital cannot be expected to be an exception. Neither is the Hospital intended for a favored few; it is for anyone and everyone in Summerland who requires nursing and care, and it is therefore only fair that anyone and everyone should contribute yearly or at least periodically towards its maintenance. Then when sickness or accident comes—and who in this world is exempt from either?—he or she can enter the Hospital walls with a clear conscience, and a satisfactory feeling that they have done their share towards its upkeep.

So much for the present. But the ladies ask one and all to keep these facts in mind, and when they come a little later on to solicit subscriptions, be ready to subscribe willingly according to his and her means.

Oroville—Hart had three strikes called, when the catcher dropped the third and made a wild throw to first, which was the fatal error of the game; Hart stole second while Powell was going out on strikes. Frank Wilson came to the rescue with a timely hit to centre upon which Hart scored by an eyebrow, and the game was won after one of the closest and prettiest contests ever seen on the home grounds.

OROVILLE.

Table with columns AB R H PO A E and rows for Hart, Powell, Wilson, McDaniel, Blackler, Bartell, Stansbury, Bartell, Hedger, McDaniel.

OKANAGAN COLLEGE.

Table with columns AB R H PO A E and rows for Corey, Stevens, Finniss, McDougall, Cunningham, Morlock, Menzies, Ryan, Dupont.

\*One out when the winning run was made.

Summary table for Oroville and College.

FOUL TIPS.

The return game will be looked forward to with the greatest interest.

McDougall had the old reliable Oroville batsmen guessing, and they generally guessed wrong.

A motor load of Summerland boys ran down to Oroville Monday, arriving just in time to root for their team.

Corey was severely hurt in the tenth by a ball that struck him on the knee cap. He was down and out for several minutes, but pluckily finished the game.

Dupont the visiting right fielder, is in the juvenile class. He was played as a substitute, one of the regulars being off. He had nothing to do in the field, but managed to score one of the four runs.

## USES OUR APPLES AS IDEAL.

PROPERLY GROWN—LONG KEEPERS.

Best Fruit in America Grown in Summerland.

Secret Lies in Proper Irrigation.

That the keeping qualities of British Columbia apples could be indefinitely improved by proper methods of irrigation and cultivation, is the opinion of Mr. Thomas Cunningham, inspector of fruit pests. As proof positive of his theory Mr. Cunningham shows in his office a number of fine and well-preserved specimens of Ribstone Pippins and Spitzenbergs.

"These apples," he remarked, "are usually off the market altogether in January, and yet these specimens have been taken from my own cellar only a day ago, and you will note that in color and flavor they look little worse than in October."

"It is often suggested," he added, "that British Columbia apples are deficient in flavor and keeping quality. This reputation has been given, not because there is anything wrong with the climate or the scenery, but because of excessive irrigation and too late cultivation. During my recent trip through Washington and Oregon I was very much impressed by this fact, which I have long suspected, and to which I have repeatedly called the attention of local fruit growers. I have found in the best fruit sections I have visited, namely, Hood River, and Wenatchee, that as little water as possible is used. In Hood River I found that irrigation had become an unusual thing, and in Wenatchee the growers are limited to two-fifths or half-an-inch of water to the acre, while in Okanagan sometimes two and three inches or more are used, and the effect is that apples are produced deficient in flavor and in keeping qualities. I was in Summerland in October last and selected my winter supply of fruit. I placed them, not in cold storage, but in my own cellar, where the temperature is kept fairly even but there is no artificial heat, and you see this fruit which I took out of the boxes on Saturday. They are in perfect merchantable condition to-day. The chief reason for it is that the man from whom I got them understood irrigation and its effect. In fact we have not lost a dozen apples in the entire winter's supply and we used a large quantity, so that I am glad to prove to you now, and through you to the fruit growers, that given a fair chance and with the intelligent use of water British Columbia can well compare with any other country on earth both for the flavor and keeping qualities of its fruit. In fact I believe we grow better fruit, as these samples show, than can be found in any other part of North America."

When asked his opinion as to the proposed action of the Dominion Government to exclude Hawaiian and Australian fruit, Mr. Cunningham said he was not so particular about Hawaiian as about Australian fruit, because he believed we were now on the point of a great development in trade between Australasia, Fiji and Canada. He instanced the recent arrangement made by the Minister of Trade and Commerce with the West Indies. He thought it would open a good market in the tropics for the harder Canadian fruits and we could well afford to take from the West Indies bananas and citrus fruits. A similar arrangement with Australia would be of great advantage to British Columbia, as their seasons were opposite to ours. He knew that during the off season in Australia there was an immense demand for apples grown on the Pacific Coast, but unfortunately, so far in British Columbia the supply had not been large enough to permit of taking advantage of the opportunity offered, so that all the trade had gone to the United States instead. During the present year there was every prospect of a bumper crop in the province and there should be a large quantity of fruit for export. In view of this he thought it would be unfortunate if unnecessary restrictions were placed on the importation of Australian fruit in exchange for ours, though, of course, all proper precautions should be taken against the introduction of dangerous pests, and for this reason it was undoubtedly the duty of the Dominion Government to investigate conditions thoroughly.

In this connection he had been asked if he was in favor of running the risk of introducing from Australia that dangerous pest known as the Mediterranean fruit fly. He could answer emphatically that he was not, but he believed there were portions of Australia where the fruit fly was comparatively unknown. They needed to know exactly what danger there was before merchants should be expected to exclude Australian fruit. "I contend," he added, "for a fair exchange between Australia and Canada provided no risks are taken of introducing pests, and I cannot see how any objection can be taken to this stand."

Coming back again to the question of irrigation and its effect on local fruit, Mr. Cunningham stated that this summer experts from his department would go throughout the Okanagan and Kootenay and give advice on the question of irrigation. He added that it might not be generally known, but it was nevertheless true, that irrigated fruit was much more liable to fungus than that which depended upon natural moisture. For this there was a physiological reason which in future he would describe at greater length.

There will probably not be more than two claims along the right-of-way of the K. V. R. that will need to be settled by arbitration. It now looks as if this would be the only means of adjustment in two instances. In one case, an orchard near the canyon, a price of something over \$2000 is demanded, while the right-of-way agent Logie says that \$900 is as much as he would be justified in paying. In the other, on the Alkali Flat, a sum of \$3750 has been asked, while Mr. Logie states that he has had many of the best men in the community put a value on this land, in no case has the value exceeded \$500. He is willing to pay that amount but no more.

There are not many buildings on the selected right-of-way. Some however, will have to be removed. All of Mr. Bohan's buildings are included except his house, while Jas. Fyffe's stable will need to be moved. The most unfortunate one in this respect is Mr. E. R. Faulder, the route including his house and other buildings, also his garden and all similar improvements.

### THE RAILWAY ROUTE.

There will probably not be more than two claims along the right-of-way of the K. V. R. that will need to be settled by arbitration. It now looks as if this would be the only means of adjustment in two instances. In one case, an orchard near the canyon, a price of something over \$2000 is demanded, while the right-of-way agent Logie says that \$900 is as much as he would be justified in paying. In the other, on the Alkali Flat, a sum of \$3750 has been asked, while Mr. Logie states that he has had many of the best men in the community put a value on this land, in no case has the value exceeded \$500. He is willing to pay that amount but no more.

There are not many buildings on the selected right-of-way. Some however, will have to be removed. All of Mr. Bohan's buildings are included except his house, while Jas. Fyffe's stable will need to be moved. The most unfortunate one in this respect is Mr. E. R. Faulder, the route including his house and other buildings, also his garden and all similar improvements.

### "HIS IRISH HONOR."

An audience representing a large percentage of the theatre goers of this town will attend the performance of "His Irish Honor" which Mr. Marks and his excellent company of associate players will appear in at the Empire Hall on Thursday, May 2nd, and the indications are that the capacity of the house will be tested. This is greatly to the credit of the local public for it shows that many people have heard of Tom Marks. Mr. Marks is said to have a most notable supporting company this season, including several players of considerable prominence, who have earned enviable reputations in support of other well known stars, and the company throughout have been receiving enthusiastic praise, both from the press and the public. Mr. Marks' vaudeville specialties introduced between the acts are said to be entirely new and numerous, and are a feature of the program. His engagement promises to be one of the successes of the season.

If wishes were wings good works would soon cease.

### MR. LAWLER RETURNS.

Mr. and Mrs. Jack Lawler have returned to Summerland and expect to reside in Peach Orchard.

Mr. Lawler had expected to go east to teach apple packing for the Ontario Government, but he has been kept busy all the winter in this province and has only now completed his packing school work. For the next few days he will be in Kelowna in charge of a demonstration spraying outfit sent there by the Horticultural Department.

Mr. Lawler says that in all his journeys throughout the province he has not found anything that could equal Summerland's apples. What pleased Mr. Lawler more than anything else was some crab apples he saw at Calgary. These were grown in the orchards of J. A. Darke and S. M. Young, and were of the Hyslop variety, selling at \$5 a box. Mr. Lawler said they were just as good as when packed at the Fruit House last fall.

### NEW ZEALAND FRUITMAN HERE.

Mr. Chas. H. Capes, a New Zealander operating extensively in fruit, paid Summerland a visit a few days ago. Mr. Capes brought with him from New Zealand some five or six thousand packages of fruit for Vancouver and Calgary. Having heard much of Summerland and its possibilities he came down here to make business connections, and, if possible, to arrange for consignments to the New Zealand markets. Mr. Capes pronounced himself as being greatly delighted with conditions here, and was pleasantly surprised by the orchards he visited. He says they show more growth of wood and appear to be stronger trees generally than the New Zealand orchards. He was shown some apples which had been kept through the winter and without hesitation he pronounced them the finest he had ever seen. Mr. Capes expects to visit this district again a year hence.

## "BE BRITISH, MY MEN!"

### CAPT. SMITH'S CALL OF INSPIRATION TO HIS CREW

Unparalleled Tale of Heroism and Devotion to Duty

1600 go to their Death with the Band Playing "Nearer, my God, to Thee"

Later accounts have further increased the total of deaths resulting from the sinking of the steamship Titanic. Of nearly 2,400 passengers and crew only 705 survived, 1,635 going down with the ill-fated ship. The White Star Company have for some days had a cable ship at the scene of the disaster searching for bodies. Already about one hundred have been recovered many of them with lifebelts on, and quite a proportion have been identified. The unidentified bodies are again committed to the sea after being weighted. Religious service over these bodies is conducted by a minister from Halifax sent with the ship for that purpose.

Only those who were in lifeboats and were picked up by the steamer Carpathia survived the disaster and, as previously reported, these were mostly women and children. But for the unparalleled self-sacrifice and heroism of Captain Smith and the officers of the Titanic, the sea would have claimed an even greater toll. From the bridge Captain Smith called through the megaphone "Be British, my men," and that became the rallying cry of officers and men. When the signal was given to lower the boats some of the crew pressed forward, and it was then that the rallying cry came from the captain. Every man faced death calmly. They knew there was no hope and as the big, strong English seamen assisted the women and children into the boats, they gave no sign that they realized that Captain Smith's words had sealed their fate. They remained at their posts and died like men. Many tales of heroism on

the part of officers, crew and passengers are reported, ameliorating Britain's sorrow, and causing a feeling of pride throughout the Empire.

There was no panic or undue display of excitement. Men high and low, rich and poor, assisted in getting the women and children into the lifeboats. As the great ship went down her band played "Nearer, my God, to Thee."

Among the lost were the following men of world-wide reputation: W. T. Stead, England's great journalist; Chas. M. Hays, president of the Grand Trunk Pacific; John Jacob Astor, Isador Strauss, Benjamin Guggenheim, George D. Widener, Henry B. Harris and F. D. Millet. These men were big in industry, development, commerce art and literature, and the ship's commander, Commodore Smith, was an old, gray seafaring man who had witnessed the development of steam navigation almost from its beginning.

A United States Senate Committee is now holding an investigation which is proving in many ways sensational. It is meeting with much disapproval, criticism and ridicule from the other side. Judging from the criticisms the committee is not considered a competent body. The British Admiralty is now arranging for an investigation. A Board of some of the nation's ablest seamen is being organized for the purpose.

The property loss is now placed between twenty and twenty-five million dollars. The loss to insurance companies will exceed fifteen millions. A large amount of mail matter went down with the wreck.

## A Brief History of Summerland.

Written For, and Read at the Meeting of the Women's Institute, April 19

This paper was to have been written on "Summerland," but I should like to go back for some time before, when it was known as Trout Creek. There were three or four settlers doing mixed farming, the largest holder being a Mr. Barclay, whose land, comprising some three thousand acres, Mr. J. M. Robinson ultimately purchased.

As far back as the late eighties and the early nineties there had been a succession of short, open winters, and the settlers thought they were in a Paradise. They started raising cattle and horses, growing their own feed, but in 1892-3 a very severe winter set in. The lake was completely frozen over and the cattlemen suffered much loss of stock. At this time they started a few orchards which did very well, and in later years it was a common sight to see the crop waste on the ground, there being no market for it.

The C. P. R. boat "Aberdeen" was built in 1893, and commenced running between Okanagan Landing and Penticton three times a week that spring. The nearest store and post office for the Trout Creek settlers was at Penticton.

So the land which is now—thanks to Mr. Robinson—a vast orchard was in those days a sago brush waste with a few cattle running over it.

After a year or two in Peachland, which he was successful in dividing into fruit lots and disposing of, Mr. Robinson turned his attention to larger fields. In the summer of 1902, he bought out the Barclay estate, including the stock for \$50,000 for some three thousand acres of land. He commenced operations in the fall of that year, with the town, the present one, on the lake front, which was at that time a very pretty spot sloping quietly to the lake with the creek running through it.

With men and horses it was soon changed as excavations were started for the Hotel. Soon a store and a post office combined were erected, and also a schoolroom which was used as a church at first. Good progress was made the first winter.

The Hotel was pushed to completion, roads were built, the town surveyed and other buildings erected. As spring opened up, people began to come in and plant out their properties. The first year, as in all new settlements, the people were as one big family. The school was opened, there was a union Church and Sunday School, a literary society, and many social functions and amusements were carried on. It was not long before the small schoolroom down town became too small, and the school on the hill near Mr. McWilliams' residence was then built, and this answered also as a church until the old Empire Hall was built, when they held the services there. I might mention there was an Anglican church on the benches built about fifteen years ago by the early settlers on an acre of land given by Mr. Barclay.

Summerland grew steadily. Settlers came in and homes were built, and in 1907 the Garnett Valley property was purchased by Mr. Jas. Ritchie, which added about eighteen hundred acres to the place, and later Mr. Ritchie purchased a hundred and sixty acres of Indian Reserve which is now West Summerland. The same year the College was built and since has been added to extensively. The settlers had faith in the country and in fruit raising, as prizes for apples grown in the old orchards had been won several years in succession in the Old Country, and now we can compete with the world.

1908 saw great advancements. We formed ourselves into a municipality with Mr. J. M. Robinson as Reeve and Messrs. Agur, Thomson, Ritchie and Brown as Councillors. We now boasted of telephone and electric light systems, new roads were built and old ones repaired, and an up-to-date domestic and irrigation system started.

During the short time of government by our city fathers affairs have been pushed ahead very satisfactorily and Summerland now stands in the front rank among the communities of the Okanagan.

## Royal Patronage Extended to Canadian Highway Association

Duke of Connaught Becomes Patron.

Moved by the same public spirit and the single purpose of bringing the roads of Canada up to a standard that will be a credit to the nation, and an example to the world at large, His Royal Highness the Duke of Connaught, and W. J. Kerr, hold the two highest positions in the gift of the Canadian Highway Association, that of patron and president respectively.

The Canadian Highway will be an accomplished fact within the next few years, and the outside world will then know that in this broad Dominion there is a road more than three thousand miles long over which an automobile can travel from coast to coast in safety and in comfort. The country that offers the wealthy tourist the splendid opportunities of investment, will reap a large harvest from its visitors. This association was formed in New Westminster, B.C., last November, and it was at this meeting that Mr. Kerr, a wealthy resident at the coast, and the principal mover in the convention that resulted in the formation of the association, was elected president. Some time later the Governor-General of Canada, whose activity in the cause of good roads is well known to those interested in this work, was approached and requested to permit his name to be used as that of Patron. The following resolution was forwarded to him after a meeting of the executive of the association:

Moved by President W. J. Kerr, Seconded by Vice-President A. E. Todd, "His Royal Highness the Duke of Connaught, Governor-General of Canada, having in many ways shown his interest in good roads, and more particularly by his speech from the throne at the last formal opening of parliament, be it therefore,

"Resolved, that the secretary extend to His Royal Highness the thanks of the officers of the Canadian Highway Association for lending his influence to the cause of roads improvement, and further, "That the secretary respectfully informs His Royal Highness that it is the earnest desire of the members of this association that His Royal Highness should consent to become Patron of the Canadian Highway Association."

The following reply was received a few days ago by P. W. Luce, secretary of the Association:

Government House, Ottawa.

Dear Sir, I am desired by the Governor-General to acknowledge receipt of your letter, and to inform you in reply that His Royal Highness will be pleased to become Patron of the Canadian Highway Association as requested by your executive committee.

His Royal Highness is much interested in the subject of good roads, and wishes your association every success. I am, Yours faithfully, Arthur F. Sladen, Private Secretary.

The Duke of Connaught has long been interested in good roads and has shown in many ways that he is strongly in sympathy with any movement that will tend to better the transportation facilities of this or any other country. Travelled man as he is, and trained in observations of things that make for the public weal, His Royal Highness has put to practical use the knowledge gained in Canada, England, on the continent and in foreign countries, and he believes he has acted wisely in allowing his name to become associated with the enterprise fostered by the Canadian Highway Association.

"Good roads are a social and economic necessity, and good roads we will have all over Canada before I am ready to acknowledge that the work of the Canadian Highway Association is finished," says president W. J. Kerr. And he means every word of it.

## Tomatoes as a Field Crop.

By P. E. FRENCH, Assistant Provincial Horticulturist.

### GROWING THE PLANTS.

Tomato seed should be sown in hotbeds or flats about the middle of March. It requires about one ounce of seed to produce enough plants for one acre. When the second leaf shows the plants should be transplanted about two inches apart each way, into flats, and allowed to develop in these quarters until they have attained a height of four to six inches. They are then transplanted to about four inches apart each way in flats or into berry boxes, pots, etc., and these quarters to the field.

In growing the young plants it is very important to keep the temperature fairly even and not allow drafts to strike the plants. The less water used so long as the plants are growing well the better. It is very important that the plants should be well hardened off before set in the open ground.

### SOIL AND ITS PREPARATION.

Tomatoes if given proper treatment can be grown on almost any well drained soil which is in good condition, but probably a rich, sandy loam will give the best results. The treatment of the soil previous to planting is very important. Tomatoes do well after clover sod. The ground should be plowed in the Fall or early Spring and deeply cultivated in the Spring.

### FERTILIZERS.

Barnyard manure may be applied in the Fall and plowed under, or if well rotted it might be applied as a top dressing in the Spring and worked into the soil. Since the tomato belongs to the potash consuming class of plants, the fertilizers should be especially rich in potash.

### SETTING AND CULTIVATING THE PLANTS.

The plants should be set in the field as soon as all danger of frost is over. If the plants are transplanted from flats to the field, cut the soil in the flat into cubes two or three days before removing the plants. Soak with water two or three hours before transplanting. If the plants are to be allowed to run over the ground they should be set about four feet apart each way. If trimmed and tied to stakes they may be planted in rows three feet apart, and eighteen inches apart in the rows.

Tomatoes need thorough cultivation. Cultivate fairly deep the first time, but all later cultivations should be shallow as the tomato is a surface feeder.

### PRUNING AND TRAINING.

Tomato plants under field cultivation are generally allowed to run over the ground in any direction. For early market it will not pay to leave more than three sets of fruit. Even for the main crop it will pay to take off all the small fruit and cut back the young shoots about the middle of August, especially if the plant is growing rapidly.

### SELECTION.

Tomato seed should be saved from the best tomatoes, from vines producing a large amount of fruit. The crown setting is always the best for seed purposes.

### VARIETIES.

A good variety is one which bears medium-sized, smooth, spherical fruits, which ripen evenly and have small seed cavities and thick walls. Some of the common varieties grown in Canada are: Red—Earliana, Bonny Best, Wealthy, Chalk's Jewel, Success, Livingstone, Baltimore and I. X. L.; Pink—June Pink and Globe.

### HARVESTING AND MARKETING.

The fruit should be gathered two or three times a week if the tomato is grown as a truck crop. If used for canning purposes the harvesting periods need not be quite so close. For home markets the fruit should be allowed to ripen on the plants. If the fruit is to be shipped long distances it should be harvested just as the ripening process begins. Only sound fruit should be marketed. In packing tomatoes for the market the fruit should be graded and those that are symmetrical in form and uniform in size and of a like degree of ripeness packed in any one receptacle.

## Dry-Farmed Alfalfa as a Human Food.

By MARK C. RICH, Alfalfa Expert and Practical Dry-Farmer, Hot Springs, South Dakota.

THE CEREALS have been man's supply since the beginning of the world, but if you will turn to your histories you will see that where the beautiful fields of grain were waving, in many instances now, the fields are barren. We have lived to see the last day of cheap grains, for it is taking all we can possibly raise to feed man and beast. The government and states are spending thousands of dollars every year teaching the people how to grow more grains and how to keep man from depleting his soil, and yet, the population of the world is increasing far more rapidly than grain production per capita.

### EVERYTHING BEING USED BUT ALFALFA.

We are using everything we possibly can but alfalfa for human food, and now we find that it is a good food product.

All feeding tests by the state or national governments prove the great value of alfalfa for food for all kinds of animals. If it has food value for animals, it certainly has for man, the human animal. Apples are not fit for food unless gathered at the right stage. The same of plums, grapes, peas or corn for table use. The same of wheat or any thing now used for human food. The same is true of alfalfa. As a human food it must be gathered at the right stage.

Look at any of the human products and you will not find any of them at the fibrous stage. Now, alfalfa has its two stages, the mucilaginous and the fibrous. The first is the human stage of consumption and the second the animal stage. The same is true of all other products that have two stages.

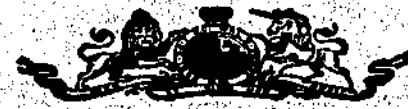

The East cannot raise alfalfa and knows nothing about it, excepting on paper, and the West has been using it so long for stock food, and not being of an investigative turn of mind, has been content. I know of several men who have tried alfalfa as a food, but took it up in the fibrous stage, and so passed it up. Necessity has not demanded it yet, but the time is surely coming when the cry for more bread will be heard by all nations of the world.

It does not need much figuring or reasoning to see where our wheat supply will be at in forty years more with the population of the world increasing. Anything from which bread can be made will be readily accepted by the public.

### WHAT CAN BE DONE WITH ALFALFA.

I have found after over three years of research and use that the alfalfa plant can be made into all the necessary foods that man must have. From it I make flour, with which I make bread, cakes, cookies, crackers, biscuits, pancakes, shredded biscuits and flakes for my breakfast food. From it I make a coffee and tea substitute that is a delicious and healthful drink. From it I also make a syrup, and from this syrup I make candies of all kinds. From the alfalfa I make an ice cream flavor, also essences, tinctures and extracts that will enter into medicines, soda fountain drinks, flavors, etc.

Through all these products is found the health-giving properties that are found in the alfalfa plant. It is the only plant that stores away for man's use—as well as animal's use—the medicinal and the nutritious elements so necessary to the human system, and for the rebuilding of waste tissue. It is nature's health drink.

## SYNOPSIS OF COAL MINING REGULATIONS

COAL mining rights of the Dominion, in Manitoba, Saskatchewan and Alberta, the Yukon Territory, the North-west Territories and in a portion of the Province of British Columbia, may be leased for a term of twenty-one years at an annual rental of \$1 per acre. Not more than 2,560 acres will be leased to one applicant. Application for a lease must be made by the applicant in person to the Agent or Sub-Agent of the district in which the rights applied for are situated.

In surveyed territory the land must be described by sections, or legal subdivisions of sections, and in unsurveyed territory the tract applied for shall be staked out by the applicant himself.

Each application must be accompanied by a fee of \$5, which will be refunded if the rights applied for are not available, but not otherwise. A royalty shall be paid on the merchantable output of the mine at the rate of five cents per ton.

The person operating the mine shall furnish the Agent with sworn returns accounting for the full quantity of merchantable coal mined and pay the royalty thereon. If the coal mining rights are not being operated, such returns should be furnished at least once a year. The lease will include the coal mining rights only, but the lessee may be permitted to purchase whatever available surface rights may be considered necessary for the working of the mine at the rate of \$10.00 an acre. For full information application should be made to the Secretary of the Department of the Interior, Ottawa, or to any Agent or Sub-Agent of Dominion Lands.

W. W. CORY,

Deputy Minister of the Interior.

**THE HOME CIRCLE.**  
 Crude Thoughts From the Editorial Pen.

**THE IDEAL HOME.**  
 (A lady subscriber has sent us in three articles on "The Ideal Home," that we believe will be read with interest as they appear from week to week. The writer certainly has an "ideal home" and we regret that at her request we have to suppress the name.)—Editor.

MY IDEAL HOME is not necessarily adorned with the trappings of wealth; neither must it be saddened by pinching poverty. A competence there must be; which, with industry and thrift will preserve its inmates from painful anxieties.

In this home, the husband is the bread winner, the wife the home maker, and together they reign as king and queen over the little realm. The children—for there are children in my ideal home—are loyal and obedient subjects, everyone; and it never occurs to them to question the divine right of their king and queen to rule.

Order and system prevail; but love and self-sacrifice for Love's sake, animates all hearts within this home, and to be good and to do good is their constant rule of conduct. Health, the smiling goddess, stands at its portal and scatters happiness and prosperity with lavish hands. The table is not only the place where nature's recurring wants are daily supplied, but a school of manners; yet here harmless mirth disports itself unrebuked, and thought unfettered flows. Books there are in abundance, bringing the culture of all countries and all ages within the reach of this charmed circle. Flowers bloom in the window and smile at you from the garden paths with their suggestion of beauty and refinement. Yet, whatever else may be there, the guests who frequent this house are its choicest, and most valued ornaments.

LET A CHILD FEEL you are displeased not at him, but at the sin he commits. Can an angry parent do this?

PEOPLE WHO MAKE MISTAKES are those who quarrel with one another before their children; or who allow the latter to grow up in idleness; those who talk about their troubles before strangers; the father who tells his children to go the way he does not go himself, and the young woman who does not make a confidant of her mother.

IT IS VERY IMPORTANT for the comfort of a home that harassing and depressing subjects of conversation should be excluded, except when it is absolutely necessary to talk about them; and that a habit should be formed of talking cheerfully and good-humoredly, and of refraining from what jars on other people, such as rudeness, impatience and fault-finding.

MANY A MAN is rich without money. Thousands of men are rich with nothing in their pockets, and thousands without even a pocket are rich. A man born with a good, sound constitution, a good stomach, a good heart and limbs, a pretty good head piece, is rich. Good bones are better than gold; tough muscles, than silver; and it is better than a landed estate to have the right kind of father and mother. The man is rich who has a good disposition, who is naturally kind, patient, cheerful, forgiving, hopeful and who has a flavor of fun in his composition. The hardest thing to get along with in this life is man's own self. A cross, selfish fellow, a despondent and complaining fellow, a time and careburdened man, these are all born deformed on the inside. They do not limp, but their thoughts sometimes do.

TRUE HAPPINESS lies not in doing for ourselves alone, but in the performance of every duty that will ameliorate the condition of mankind in general. It seems to have been part of the divine plan to put man into the world in such condition that from his birth to his grave he is dependent on some one. When we look around us we see our every interest interlocked and lives and hearts overlap each other to such an extent that we cannot live in happiness unless we possess some degree of benevolence, and were it not for this Divine plan the pathway of many would be cheerless indeed. When we consider the frailty of human life and the common lot of all, we often wonder at the indifference of some to attain that greater happiness and nobler life, which can only be found in the golden text, "Do unto others as you wish to be done by."

THERE IS NO BETTER TEST of purity and true goodness than reluctance to think evil of one's neighbors and absolute capacity to believe an evil report about good men, except the most trustworthy evidence.

TEACH THE CHILDREN to work and to save; to save things as well as money. Some day they will bless you for it.

**WOMEN'S INSTITUTE MEETING.** The Women's Institute held their monthly meeting on Friday afternoon, April 19. Although not as well attended as usual, a bright and happy time was spent. The members while engaged in needlework, listened to music and papers read on "Summerland," "The Work and Aims of Women's Institutes," "Methods of Coining Time in Household Work," and other subjects. A letter was read from Mrs G. J. C. White resigning her office of president. By a unanimous vote the resignation was not accepted, and the wish was expressed that Mrs. White continue to hold office, Mrs. Hayes, vice-president, acting as president till Mrs. White is again able to take up the work. At the next meeting, on the third Friday in May, there will be another cooking demonstration.

**PENTICTON AND THE TELEPHONE**  
 Telephone matters at Penticton have taken a peculiar turn. As in Summerland a local company was organized some weeks ago. Recently there have been some changes in the make-up of the directorate, and now the company originally formed to establish a local telephone system take the unique position of recommending the Penticton Council to make a contract with the Okanagan Telephone Company, which company the Penticton Telephone Co. was organized to supplant. Messrs. A. H. Wade and J. C. Dufresne waited on the Council for this purpose. Mr. Wade read the clauses in the proposed agreement, and said the provisional directors had tried to get Kelowna and Summerland to join them in their proposals, but no replies were forthcoming from those towns. It is impossible to say just what action the Penticton Council will take, and the matter has been left to a special committee.

## The Summerland Review

PUBLISHED BY THE REVIEW PRINTING & PUBLISHING COMPANY LIMITED,  
RALPH E. WHITE, MANAGING DIRECTOR

SUBSCRIPTION RATES: \$2.00 PER YEAR, IN ADVANCE. SIX MONTHS \$1.00.

### Advertising Rates:

LEGAL NOTICES.—Twelve Cents per line for the first insertion; Eight Cents per line for each subsequent insertion.

LAND NOTICES.—\$7.00 for 60 days, \$6.00 for 90 days.

WATER NOTICES.—30 days, 150 words and under, \$8.00; each additional 50 words, \$1.00.

THEATRICAL, ETC.—50c. per inch for first insertion, and 25c per inch each subsequent insertion.

LOCAL NOTICES or Readers, Immediately following regular locals, 20c per counted line; 10c per line each subsequent insertion. Half these rates when accompanying display advertisements.

LOGGE NOTICES, Etc., 25c. per week, per column inch.

FOR SALE Advertisements, Etc., 3c. per word first week; 1c. per word each subsequent week.

Transient Advertisements payable in advance.

Rates for Contract Advertisements furnished on application.

Copy for change of contract advertising must be in the hands of the printer not later than Wednesday noon to insure publication in the next issue.

In accordance with schedule of prices adopted throughout the valley, charges for advertising are now being made weekly. Heretofore when five issues were made in one month the result was a loss. By the new method customers are charged each week for just the amount of space used.

FRIDAY, APRIL 26, 1912.

### SHIPPING PEACHES TO ENGLAND.

WHERE AND HOW to market the peaches to get the best returns is, or soon will be, a very live question with many. The near market is too often looked upon as the only market for the more perishable fruits. While the attention of some has been called to the possibility of shipping tender fruits to the English market, few have given it serious thought, though some have made small shipments.

The Dominion Department of Agriculture has been in various ways urging Canadian growers to ship to that market and it has in the past assisted materially in making trial shipments from Ontario. In 1910 several trial shipments were made by the Department itself and perhaps might be induced to assist in a trial shipment from Summerland.

A bulletin (No. 27) from the Dairy and Cold Storage Branch of the Department, on these experiments, has been prepared and about a dozen copies have been sent here for distribution among those who might be interested. It is brimful of advice and valuable information and if read may convince some of our growers of the advisability of sending peaches to that distant market. Mr. R. Pollock now has the few copies of bulletins on this subject and will be glad to hand a copy to interested growers.

### THE FERRY SERVICE.

NOW THAT North Naramata is a peopled townsite there is an immediate need for a ferry service. The government gives a grant for the purpose of maintaining such a service between Summerland and Naramata, and application supported by our Board of Trade should be made for a grant to establish a similar service between Summerland and North Naramata, with perhaps a three-cornered service.

And while a change is being made in the service, provision should be made for its improvement. A better boat is much needed and with only the additional expense of a little fuel more frequent trips might be made. The present boat could be held for the frequent special trips to points up and down the lake which it is called upon to make, and for towing, picnics, etc.

### OUR STEADY PROGRESS.

IN THIS PUSHING WEST, where community development is going on at a pace that is nothing short of phenomenal, steady, if perhaps not rushing, progress excites no comment. We have accustomed ourselves to take the rapid expansion of our country as a matter of course. Now it is only the extraordinary and mushroom-like growth that attracts particular attention.

The development of our community has been continual and steady. No unhealthy "booms" have inflated land values. Upon its own merits, and by virtue of its own possibilities, now proven, Summerland has progressed; not spasmodically, or hindered by untoward retrogressions; but steadily and substantially.

It must be borne in mind that, after all, our town is only ten years old. The brief sketch of "Summerland History" appearing elsewhere in these columns pictures Summerland in 1902 as "a sage brush waste with a few cattle running over it." The contrast of then and now is an encouraging retrospection. We are seeing clearly what the pioneers saw far off ten years ago. The confidence and foresight of those who planned their faith to the possibilities they saw in those early times is being justified. Moreover the first decade is the most precarious in any existence. We shall now take greater strides and make faster progress.

### PROBLEMS THAT WILL PRESS.

THE YOUNG TOWN presents public problems that are, proportionately, more difficult of solution than those that face the established city. Step by step our municipal organization is being built up and extended. Until now attention has wisely been concentrated upon the utilities, the efficient maintenance of which may be said to control Summerland's most vital interests. But the time has now come when we must be prepared to go beyond this. It is not difficult to look into the near future and see some new questions that our very expansion will force upon us.

The coming of the railway into our midst, for instance, while it undoubtedly marks the opening of a new epoch of progress for Summerland, will also, it is equally certain, bring in its wake conditions we have not yet known. When the first train steams through Summerland we shall assume a new relationship with the outside world. We are, at present, admittedly a little "off the beaten track," and this fact has been a prime factor in the upbuilding of this unique community. Isolation—if such it may be termed—has hitherto been a natural barrier that has done good service in keeping Summerland tolerably free from that more or less undesirable floating population that every railroad town gathers, especially trunk line points. We have, fortunately, seen little of the irresponsible nondescript who travels aimlessly from place to place living by the nimbleness of his wit on the slowness of others; of the professional hobo who beats his way picking a precarious existence from generosity sadly misplaced; and others of the motley throng that sit to and fro along the railroad lines on business of no repute.

With the advent of a strain of population of this calibre, there will arise a need for more stringent protection of person and property. We are proud that hitherto this has not been called for, but, pleasant of

contemplation as it would be, this condition of things can hardly be expected to continue much longer. Our orchards in particular will become subject to frequent depredations by those who drift in and out. And, unfortunately, not our orchards alone.

Another problem that faces us, and one that presses more as it is left untouched, is the disposition of sewage and refuse. It is not sufficient to own a nuisance ground on which garbage may be dumped indiscriminately. Destructible refuse may perhaps be temporarily dealt with in this way, but so long as the matter is left in the hands of the individual citizen, nothing can be expected. There must soon come a system of municipal scavenging, embracing household and street refuse. "Clean-up days" are good so far as they go, but the refuse of a year cannot be cleaned up in a day. Some one must be kept at it all the time, and only then can we expect a physically clean and presentable Summerland.

Then we must certainly have more satisfactory means of coping with the fire fiend. Immunity from his ravages has lulled us into a false sense of security, but a rude awakening may come. Money spent on precautionary measures is not wasted. It was never truer than in this connection that procrastination is a "penny wise and pound foolish" policy.

These are a few of the questions with which Summerland as a municipality will have to deal sooner or later. Others must arise—it would be a sign of stagnation if it were not so. The district is growing fast, and it is incumbent upon the municipal powers to keep abreast of progress.

WITH EVERY PROBABILITY of a crop totalling one hundred and fifty carloads of fruit, the labor question will be approaching serious proportions.

The preliminary trial of the three prisoners arrested in connection with the attempted hold-up at Lumby when Manager Murchison of the Northern Crown Bank was shot in the hand, was resumed this week at Vernon, and the suspects have been remanded until next Monday. There would seem to be no doubt but that they are the guilty ones.

C. H. Cordy motored to Princeton and back this week. He left here on Tuesday and returned Thursday. He was out in the recent rains and found the road in places between Penticton and Keremeos very bad. From Keremeos to Princeton, he says, there is a stretch of forty or forty-five miles of the finest road he has seen in British Columbia.

## Cabbage Production.

By P. E. FRENCH, B.S.A., Assistant Provincial Horticulturist.

THERE ARE three groups of cabbage commonly grown; the Red, White and Savoy types. The Red Cabbage is commonly used for pickling. The White Cabbage is commonly used as a vegetable, while the Savoy Cabbage, which is of the best quality, is little cultivated because production is not so abundant as with the common kinds. The three types of cabbage as to shape are the pointed, round and flat. The pointed are early, the round medium, while the flat are late varieties.

### SOIL AND MANURE

The best soil for cabbage is a rich loam, moist, yet well drained, and in fine condition. Early cabbage usually need richer soil than late cabbage. It is a good plan to occasionally change the land. Cabbage are gross feeders and need lots of rich manure. A small quantity of hen manure placed around each plant and mixed with the soil will give very good results, especially with early cabbage.

### EARLY CABBAGE.

Seed should be sown in the greenhouse or hotbed, about the middle or end of February. If only a few plants are required they can be grown in shallow boxes in the house. When the plants are about two inches high, transplant them into flats, placing the plants one and one-half to three inches apart, depending whether they are to be transplanted once or twice before setting in the field. The ground should be plowed in the fall and well prepared in the spring, and the plants should be hardened off before setting them out in the open ground.

It is important that early cabbage should be planted out as early as possible in the spring and set deep enough to bring the base of the leaves below the ground. Cabbage plants will grow at a low temperature. They may not show much increase in the leaf surface at first, but they form roots rapidly. The distance apart for planting depends somewhat on the variety grown, but the usual distance for early cabbage is eighteen inches apart in rows thirty inches distant. If there is very hard frost after planting, the plants may be covered with earth for two or three days, but should be immediately uncovered if the weather turns fine. Cultivation should begin as soon as possible and continued every week or ten days, and after every rain till the heads are well formed.

The crop should be ready for market from July 1st on. If the land is at once plowed when the early cabbage is harvested, it can be used for some late crop, as beans, spinach or celery, in some districts. If the market is over supplied, the heads may be retarded by pulling the plant to one side and breaking off some of the roots.

### LATE CABBAGE.

The seed for late cabbage is sown in a seed bed in the open ground. Sow the seed four to six weeks before you want to transplant in a well-prepared seed bed. Sow in rows about twelve inches apart. The ground should be well prepared before planting. If necessary, late cabbage land can be used for some early crops, such as peas, in the spring. If horse cultivation is to be employed, set the plants not less than two feet apart in rows three feet distant. During the fore part of the season the cabbage can be cultivated both ways. If this is done very little hand labor is required.

### HARVESTING AND STORING LATE CABBAGE.

Late cabbage may be harvested and sold at once, or stored for marketing during the winter. They are usually marketed with the outside leaves trimmed off and are shipped in crates.

Cabbages will stand ten degrees or more of frost, but severe freezing or repeated freezing and thawing is injurious. They are seldom injured very much unless the stump is frozen solid.

Cabbages are generally stored in cellars or specially constructed pits in the field. If stored in the cellar they are placed in shelves, and the cellar should be cool and moist, but not wet. The pits are made by constructing an A-shaped wooden structure, which is covered over with earth. This is made about eight or nine feet wide at the bottom and the point about six feet high. A false floor is put in to keep the cabbage off the earth and to allow the air to circulate through. While in storage cabbage should be well ventilated and kept as cool as possible without freezing.

Soft cabbage may be stored for the winter by setting them in a trench, roots upward, and covering the heads with about six or eight inches of soil and mulch to prevent hard freezing. The roots will show above ground. Soft cabbages stored in this way will harden up by spring.

### RAISING SEED.

For raising seed, cabbage are placed together, in a trench about eighteen inches deep, head upwards, and covered with soil and mulch to prevent severe freezing. Hard heads give a good quality of seed but a small quantity. Medium hard heads give a fair quality and a medium quantity, while soft heads give a poor quality and a large quantity.

## EARLY B.C. HISTORY.

WILL BE KEPT FRESH BY CARIBOU BROTHERHOOD.

A new society has been added to the large list of secret organizations. It is known as "The Caribou Brotherhood," and was recently founded at Ashcroft, B.C. This society has been organized for the purpose of perpetuating the famous rush for gold to the Ashcroft country which commenced in 1858. It is purposed also to establish a Women's Auxiliary. There will be a fund for the relief of widows and orphans of deceased brethren.

The following is an extract from the Ashcroft Journal regarding the new organization: The Caribou Brotherhood was organized at Ashcroft, B.C., on January 31st, 1912, in order to preserve and perpetuate the history of the Caribou District, as the early participants in the rush to the Caribou gold fields in 1862, are rapidly dying out, and without some organization to record and preserve the many important events which occurred during that period would be lost to posterity.

### OBJECTS AND AIMS.

The Caribou Brotherhood, therefore, is founded on actual happenings, collected from eyewitnesses and actual participants, and documents now in possession of the officers. The objects and aims of the Order are to inculcate patriotism, loyalty to the Canadian Flag, Canadian Ideals and Institutions, and to extend a helping hand to all Brothers. Every member of the order will be expected and pledged to assist any other Brother, if worthy, to the limit of his ability, under all circumstances. In this way it is hoped to build up one of the most powerful and widely extended secret orders in Canada.

### EDUCATIONAL POSSIBILITIES.

Owing to the fact that the province is rapidly filling up with people from the East and South who have very little knowledge of the past history of British Columbia, it is felt that an organization such as the Caribou Brotherhood fills a crying need. It is realized that, as the discovery of gold in the Caribou was the cause of the opening up, not only of British Columbia, but also of the wonderfully fertile territories lying to the East, and was also, indirectly, the cause of the building of the first transcontinental railway, the history of the incidents, tragic, pathetic and comic, attending the discovery of gold should not be lost sight of, and it is one of the chief aims of the Caribou Brotherhood to collect and preserve in its archives, and later to issue in book form, the wonderful story of adventure in which the pioneers of the Caribou participated.

### ORGANIZATION OF THE ORDER.

In each Subordinate Lodge there will be an officer called an Historian whose duty it will be to collect and compile such incidents in the lives of the pioneers or their descendants as might be of interest to future generations, and which might never be brought to light, but for the instrumentality of this Order.

It is intended, after the organization shall have reached a sufficiently advanced stage, to appoint Lecturers whose duty it will be to visit the different subordinate lodges and deliver illustrated lectures, which will prove intensely interesting on account of the unlimited amount of material in existence which can be collected for the purpose.

Mr. Jas. A. Teit, of Spences Bridge, the well-known author of numerous works on Ethnology, and whose appointment as Field Ethnologist to the Dominion Government is about to be gazetted, has given his unqualified endorsement to this new Society, and has accepted the office of Supreme Historian to the Order. He has also expressed his willingness to edit all data which may be collected by the Historians of the Subordinate Lodges to the end that the same may be properly compiled for future publication in book form.

Many societies have of late years been brought to the notice of the public, which have had nothing of interest to attract the members, after the novelty of the initiation ceremonies had worn off, and whose names merely represented a collection of zoological designations.

The Caribou Brotherhood, while it bears the name of a quadruped indigenous to British Columbia, is not intended to represent an animal, but the district in which the incidents occurred which the Order designs to perpetuate and preserve; and the emblem of the Order, therefore, consists not of an animal's head, but of the working tools of the miner, prospector and rancher, who inhabit this wonderful district.

Any student of the history of British Columbia recognizes the fact that the principal cities of the province owe their earlier successes to the gold which the Caribou miner brought down and dispensed with a lavish hand. In those days there were no authors to chronicle passing events or to describe either in prose or in verse the romantic story of the greatest stampede for gold in the early history of Canada, and it therefore behoves us, the present inhabitants of the country, to do all in our power to preserve the wonderful story of the hardships and perils undergone, and the successes achieved by the pioneers, who did so much to open up this marvelously rich province to the world.

### TO PROVIDE READING CAMPS.

### Committee to Confer With Contractors.

A meeting of the Local Option League was held in the Lakefront Baptist Church last Sunday afternoon. This organization will in future be known as the British Columbia Alliance, and will be affiliated with the Dominion Alliance. The changing of the name was one of the objects of the meeting, and with the change of name there will also probably be a change in methods, as well as a general extension of the work of the organization along the lines of moral reform, and the extending of a helping hand to the unfortunate.

The coming of some two thousand men to work on the construction of the Kettle Valley Railway through this district was brought to the attention of those present by the president, and it was felt that something should be done toward the entertainment and comfort of these men. It was thought that the Alliance could be of assistance to the contractors and of service to the men themselves by co-operating with the former in the work of preventing the smuggling in of intoxicants, but that probably the greatest demand upon the alliance would be along the line of reading camps and the providing of reading matter and Sunday Song Services for the different railway camps. A committee of the different ministers and the president, Mr. G. J. C. White with Mr. J. L. Logie was appointed to confer with the contractors to offer the services of the Alliance along these lines.

### THE OPEN BRIDLE.

In a recent number of "The Team Owner's Review," Mr. W. D. Quimby, a large team owner in Boston, has a most excellent article on "The Horse." We are greatly pleased to read the following from this thorough horseman who speaks out of a long experience during which many hundreds of horses have been owned and handled by him:

"A horse should never be worked in a closed bridle. Please notice the next time you are on the street how many horses you will see with open bridles that are fat and sleek and perfectly happy.

A horse wearing a closed bridle and not having a great deal of confidence in his driver, is working in fear and trembling all the time, whereas if he had an open bridle he could see everything around him and would not be frightened.

I have broken a great many pulling horses by putting open bridles on them. If you have a horse that pulls too much, or is frightened, put on an open bridle and see how he acts differently. Soon the confidence which you have in him will increase his value more than one-half.

### GENEROUS GIFT BY KELOWNA RESIDENT.

Mr. Rembler Paul, a wealthy resident of Kelowna, has made a generous offer to the board of trade of that city of the free gift of a tract of land, one hundred and sixty acres in extent, on the lake shore, for the purpose of a home for the aged and infirm of the valley.

Mr. Paul further offered to erect the building and to endow it to the extent of two thousand dollars a year, the sole condition being that the government would assist in the upkeep to the extent of one thousand dollars per year.

This splendid offer, which was gratefully accepted by the council, is equivalent to the gift of over one hundred thousand dollars.

## Naramata Notes.

Mr. and Mrs. Wolstencroft spent the week-end in Vernon.

Mr. and Mrs. Hydes and family, from Toronto, recent arrivals in town have taken possession of one of Mr. Robinson's houses on the avenue.

The machinery for a steam laundry for Naramata has been ordered and upon arrival will immediately be set up. Mr. Edgar, a recent arrival from Pueblo, Cal., will be in charge.

Mrs. Colby, mother of Mrs. Aikins, and the latter's sister, Miss Colby, after spending the winter in California, have arrived to pass part of the spring and early summer at "Rakadome," the attractive home of Mr. Carrol Aikins.

Mr. Harry Endacott has joined the ranks of the benedicks. The happy event took place in Vernon on Monday in the presence of a few of the immediate friends of the contracting parties. The bride, Miss Moreen, was for some time a resident of town, and already has a large circle of friends here.

At the recent meeting of the Unity Club Ladies held on Friday of last week, it was decided to give a whist party for the pleasure of those that wished to attend, charging a nominal admission fee. This party was held on Wednesday of this week, but the attendance was disappointingly small owing to the recent rains.

Mr. Steel, the recent purchaser of the Wellband fruit farm has come to town with his household effects, and is already busy making improvements on his property. The dwelling house is being overhauled and when completed will add greatly to the attractiveness of the place. The contract for the decoration work has been let to our local man, Mr. J. C. Lyons.

The folks from Ottawa who had at first intended to take up land at Appledale, the prospective town west of Summerland, have, as previously hinted, switched off to North Naramata, and are already a humming little community. After spending Friday and Saturday in looking over the various propositions here and in Summerland the whole party left on the Houseboat on Monday for their new holdings. Amongst those in the list were: Mr. and Mrs. P. S. Roe and four children, Mr. and Mrs. Jack Pushman and three children, Mr. and Mrs. Pushman senior, Mr. and Mrs. H. T. Davies and son, Sherwood, Mr. B. McGan, Mrs. E. P. Roe, Montreal and Mr. Gerald Roe, also of Montreal.

### NORTH NARAMATA.

Summerland is to have a new neighbor across the lake. North Naramata is now a reality as a place of habitation. The colony that recently arrived from Ottawa is almost wholly located at North Naramata. Mr. J. M. Robinson has moved his houseboat the "Lily of the Valley" to North Naramata for the temporary accommodation of the party. The new arrivals are already busy clearing their town lots and a hotel and store will be built at once. Temporary homes will be erected on the townsite. Steps are being taken to have a post office opened there.

Mr. Peter S. Roe, formerly mechanical superintendent at the Royal Mint, Ottawa, has been appointed superintendent of the development work at North Naramata, and will also be in charge of the hotel, store, etc.

Mr. Gerald Roe, a brother, has taken a position in Hotel Naramata, while Mr. H. T. Davies, another of the party, until recently a traveller, will be in direct charge of the store in the new townsite. There are now some three families and a number of individuals permanently located at North Naramata, in all some twenty people.

Mr. Fred L. Roe, formerly of Ottawa and now of California, is coming to Naramata soon where he will commence the manufacture of soda water. Mr. Roe has been engaged in this line in the south and is said to be an expert in his work. He will be accompanied by his wife.

A new pool table has been put into the Hotel annex making a total of four tables in that hostelry, two billiard tables in the main building and two pool tables in the annex.

That soul is truly lost that gathers darkness of the light.

Instinct and Reason Both Point to "Fit-rite"

MEN are wont to scoff at woman's judgment in the matter of clothes. But is there really foundation for this attitude? Men who have put their wives and sisters to the test have found the contrary. Next time you buy a suit, take her along. You'll find her woman's instinct will guide you unerringly to the right clothes shop—chances are she'll set the seal of her approval upon a "Fit-rite" suit. Having once worn a "Fit-rite" garment, reason will dictate continued patronage of this high-grade line.

The new "Fit-rite" styles include many features sure to interest you. Your visits here are welcome—whether you come to buy or just to look.

### RIFLE ASSOCIATION.

The short ranges were the order of shooting on Saturday, six men passing the 80 mark. This week the same ranges will be shot over, with the additional interest that it will be the first Dominion Silver shoot of the season. Scores:

	200	500	600	Total
W. Nelson	31	29	28	88
A. E. Nelson	30	31	27	88
J. Dunsdon	32	25	30	87
B. Steuart	26	34	27	87
G. Loomer	26	30	29	85
H. Dunsdon	27	34	23	84

The rig will leave town as usual to convey members to the range.

### LEAVES FOR BRITISH COLUMBIA.

(Ottawa Journal)

Mr. Peter S. Roe, mechanical superintendent of the Royal Mint, has tendered his resignation. He has been appointed superintendent of the irrigation works of the Okanagan Realty and Investment Company, with headquarters at Appledale, B.C. He will have charge also of the electric power and light system, and the domestic water supply of the district.

Mr. Roe was appointed mechanical superintendent by the Imperial Government, prior to the opening of the mint, and has proved himself a man of capacity and value.

He is a native of Thurso, Quebec, where his father, Mr. Robert Roe, was well known to Ottawa people.

Mr. Roe goes West next month.

(Mr. Roe has since accepted the superintendency of development work at North Naramata.—Ed.)

### BASE OF OPERATIONS.

(Penticton Herald)

Interviewed in reference to an article which appeared in the Summerland Review lately, stating that all material, for the forty miles of Kettle Valley Railway construction, from Summerland to the Summit, would be handled from that town, Mr. J. J. Warren, president of the company said that the statement was hardly correct. The intention is to work out from Summerland as far as Trout Creek, and all material for that section will be conveyed through Summerland, including the steel for the bridge over Trout Creek. For the other portion of the contract, however, the shipping centre will be Penticton.

Mr. J. J. Hughes, representing the contractors, Messrs. Rice and Co., has been in town several days in connection with the contracts to the east. Already they have been awarded the contract, and are working from Midway in this direction. About forty miles have been graded, and are almost ready for laying the steel, and camps are being formed preparatory to commencing on another forty mile section. It is hoped to complete the whole of the work and reach Penticton by the fall of next year.

### ARE YOU REPRESENTED ?

"No business man in any town should allow a newspaper published in his town to go without his name and business being mentioned somewhere in its columns," says an exchange. This applies to all kinds of business—general stores, dry goods, grocers, furniture dealers, manufacturing establishments, automobile dealers, mechanics, professional men and, in fact, all class of business men. This does not mean that you should have a whole or half or even a quarter of a page ad. in every issue of the paper, but your name and business should be mentioned if you do not use more than a two line space. A stranger picking up a newspaper should be able to tell just what business is represented in a town by looking at the business mentioned in the paper. This is the best possible town advertiser. The man who does not advertise his business does an injustice to himself and his town. He is the man who expects the newspaper to do the most free boosting for his town. The man who insists on sharing the business that comes to a town but refuses to advertise his business is not a valuable addition to any town. The life of any town depends upon the live wide-awake and liberal advertising business men.

One woman with a tea kettle filled with water at 212 degrees Fahrenheit put to rout 125 "I Won't Works" in the Fraser Canyon the other day. About a dozen more women like her and a dozen more kettles would do more to restore peace and allow work to go on in that locality than a force of militia or constabulary.—Hodley Gazette.
