DEVOTED TO THE INTERESTS OF SUMMERLAND, PEACHLAND AND NARAMATA

Vol. 4, No. 49

SUMMERLAND, B.C., JULY 5, 1912.

Whole No. 203

Okanagan College Discussed at Convention.

Generous Bequest from the late John Morton

At the British Columbia Baptist Convention held at New Westminster last week, practically the whole of Thursday's three sessions was devoted to the discussion on Christian education.

Principal E. W. Sawyer, B.A., D.C.L., of Okanagan College, Summerland, presented his annual report. The attendance had exceeded that of any previous year, the student enrolment of this year being 120. Last year it was 90.

Miss E. Colwell, B.A., of Acadia University, has succeeded Miss K. C. McLeod, who resigned, as lady principal, owing to ill-health. C. DeBlais Denton, M.A., will return to teach mathematics and science. Miss Phyllis Higgin will assist Director Moore in the music department. There are twelve in the faculty. Fifteen diplomas were granted.

The late John Morton of Vancouver bequeathed to the Board of Education a seven-acre block of land valued at \$30,000. This was not the first donation from his good hand. The ladies' residence is in honor to his memory and will be known as Morton Hall. The arts work followed the McMaster University's course, and the music that of McGill University. Dr. Sawyer announced the gift of a fine piano by the retiring treasurer, C. S. Stevens, who is succeeded by James Ritchie. This year's deficit was only \$1,700 as compared with last year's of \$4,400. An increase in the revenue of \$2,500 is assured this year through a recent change in finances. Considerable satisfaction was expressed by delegates to the convention with regard to this report.

What was probably the most important matter before the convention, namely, the educational question, was discussed for nearly four hours. Dr. Wolverton, of Nelson, chairman of the Education Board, began the discussion, which was a most able and vigorous one, and at the end the following resolution was adopted:

"1.—That there is a present and pressing need for efficient work in each of the four western provinces, the development of such schools being governed by our financial ability.

"2.—The committee recommends that, having decided that for the present, academic work be developed on a sound, financial basis, we look forward, as the next step, to having our theological seminary for the four provinces as soon as \$200,000 is assured for this purpose, the question of a complete university, including arts and theology, being left to the more distant future.

"3.—That this convention put itself on record in endorsing the policy of educational administration by which the Baptist Union of Western Canada will appoint a Board of Education to which will be committed the full administration of all our educational work and which will appoint a committee of management for the detailed supervision of each institution and such other committees as they deem necessary for the best interests of the work committed to them."

PEACHLAND TOWNSITE COMPANY

A special meeting of the directors of the Peachland Townsite Company was held at Peachland on Wednesday and considerable business of importance was transacted. Mr. W. J. Robinson was appointed manager and secretary, and it was decided to change the office of the company to Summerland, and the books will be kept and the accounts collected from here. The Peachland Townsite Company still hold some three hundred acres of land, and have yet a considerable sum due them in deferred payments. The company owns also the irrigation system of that district.

Pentleton is to have a squadron of British Columbia Horse, if enough recruits can be secured. Three troops will be formed in Pentleton, and one each at Okanagan Falls and Kaledon.

BOY SCOUTS CAMP.

The second annual camp of the local troop of Boy Scouts commences on Monday next, July 8. The following Thursday, July 11 has been especially set apart as Visitors Day, and on that day friends of the boys are invited to bring lunch and spend the afternoon and evening at the camp. There will be a bonfire, story telling, sing-song, and other enjoyable features usually connected with life in camp. Visitors will be welcome at the camp at any time, but this will be a special occasion for their reception.

The following Sunday afternoon Divine Service will be held as last year, participated in by all the resident ministers of Summerland. Everyone will be welcomed.

A pressing need will be the supplying of the commissariat department. Considerable quantities of plain, healthy food will be needed to satisfy the voracious appetites of the scouts, and contributions to this department will be greatly appreciated. They may be left at the Review Office, at the residence of Mr. Jno. Tait, or taken straight to the camp.

Camp will be pitched at the same spot as last year, near the mouth of Trout Creek, and the old wharf. The money collected to date totals \$69.36.

SCHOOL REPORT.

PROMOTION LISTS.

The following is the list of names, arranged in order of merit, of those pupils of the Intermediate Fourth Grade of Division I, Summerland Central School, who were successful in passing their examinations:

Ida Johnston, Allan Harris, Kenneth Elliott, James Kean, Lee Hatfield, Ernest Lister, Rita Harrison, May Smith, Dora Stewart, Bertha Johnston, Willie Smith, Roy Stewart, Donald McIntyre.

The diploma for punctuality and regular attendance was awarded to James H. Ritchie, for good deportment to May Smith, for general proficiency to Allan Harris.

The following pupils in Miss Hunter's department of the Consolidated School successfully passed their examinations, and are promoted, as noted below:

Low Fourth—(names are given alphabetically)—Jean Babbit, Eva Bloomfield, Jennie Brewer, Bertha Bristow, Bertram Campbell, Edna English, Hattie Phinney, Gertrude Rines, Jean Ritchie, Helen Robertson, Eva Shields, Ida Shields, Gavin Spaulding, May Thomson, Dorothy Tingley, Mable Watson, Claude Williams, Cyril Woodworth.

High Third—Olive Bristow, William Clark, Ada Darlington, Gertrude Elsey, Marjorie Hatfield, Kathleen Merrill, Frank Stewart, Herbert Williams.

Low Third—Cecil Brown, Gertrude Darke, Roy Darkis, Channon Snow, Opal Thomson.

GRAND FORKS TO BE DIVISIONAL POINT.

An agreement has been passed by the Grand Forks City Council with the Canadian Pacific and Kettle Valley Railways, under the terms of which the two railways agree to make the city of Grand Forks a joint terminal and divisional point for each of their lines. The railways are to commence construction immediately at a point within the city, of a round house of at least ten stalls, a machine shop and all other plant necessary; and will also establish a joint passenger station where the Kettle Valley station is now located. On its part, the city of Grand Forks will grant the property of both railways exemption from taxation within the city for ten years; supply the railways with two hundred thousand gallons of water daily for ten years at \$50 per month; and to furnish a free lot to every C.P.R. employee who is now the owner of a house in Eholt. This arrangement will mean much to Grand Forks, as all train crews on the C.P.R. and Kettle Valley lines east and west of the city will be located there, in addition to the men who will be employed about the shops. The agreement is to be referred to a vote of the property owners for ratification immediately.

Advocates More Mixed Farming in this District.

Official of Canadian Commission of Conservation Visits Summerland.

Mr. C. E. Lawrence, of the Agricultural Branch of the Canadian Commission of Conservation paid this district an official visit this week. The Commission is making what is termed an Agricultural Survey for 1912, gathering all data possible with a view to formulating plans and so advising agriculturists that they may obtain the best returns possible from their efforts. Diseases in animal and plant life, weeds and sanitary conditions on the farms are also investigated.

Speaking of the condition of stock, Mr. Lawrence finds that disease is practically non-existent in the Okanagan. He is disappointed, however, in finding so little stock kept, particularly sheep. Mr. Lawrence is an authority upon this subject, and believes that this is a most ideal country for sheep raising. At his home near Kamloops he has been making a hobby of that branch of agriculture for some years, and with great success. The sheep remain out the entire year. He thinks that two dollars per head net profit can easily be made from every sheep in the flock. He finds here an abundance of land well suited to sheep raising, and now that the governments, both Dominion and Provincial, are making a special effort to give this branch of the industry every support and encouragement, he sees no reason why it should not be entered into quite extensively.

Mr. Lawrence believes that a little more mixed farming should be practiced by our fruit growers. He mentions poultry raising especially as a suitable adjunct to fruit growing, and believes that every ten-acre fruit orchard should have

HOSPITAL DONATIONS.

The Matron of the Hospital acknowledges with thanks the following donations:

Mrs. R. H. Steuart, bottled fruit, lemon syrup and wardrobe curtains. Mrs. A. L. Moreland, bottled fruit.

Mrs. R. H. Agur, rhubarb. Mrs. F. W. Andrew, magazines. Mrs. J. N. Merrill, lettuce. Mrs. C. M. Smith, lettuce.

Mrs. H. J. Fenner, potatoes and strawberries. Mr. A. H. Steven, cord of wood. Mrs. W. Ritchie, jellies, jam and lettuce.

Mrs. Pineo, lettuce. Mr. J. Gillis, \$2. Mr. C. Wharton, lake trout. Mrs. J. E. Phinney, four boxes of strawberries.

Mrs. A. B. Williams, eggs. Mrs. J. Tait, flour. Mrs. W. C. W. Fosbery, lettuce and turnips.

Mr. E. Lind, fresh fruit and ice cream. S. Stephen's Guild, roast beef, cakes and ice cream.

Mrs. F. D. Cooper, jellies. Mrs. A. Hespeler, buttermilk.

SCHOOL RIGS PURCHASED.

The Board of School Trustees have purchased three new vehicles for the conveyance of the school children next year. Two of these are Studebaker School Vans, purchased through W. Ritchie, and the third is a cheaper Canadian make, a lighter rig costing \$275.

One thousand hens which would yield a good profit to the fruit grower directly, as well as indirectly through the value they would be to the orchard and trees in helping to maintain the fertility of the soil and keeping down the insect life.

Regina Swept by Terrific Cyclone.

Storm of Three Minutes' Duration Wreaks Tremendous Havoc.

Struck the City Last Sunday Evening. Twenty-six Known Dead and Hundreds Injured. Enormous Property Losses.

Dominion Day was a sad holiday for Regina. Sunday night the city was in gala attire in anticipation of a day of pleasure. The morning of the holiday found a large section of the city in ruins, many citizens dead, scores in mourning, hundreds injured, thousands without homes and practically ruined. It all came through a terrific cyclone that cut its path through the city shortly before five o'clock Sunday evening.

Twenty-six persons are known to be dead, and the ghastly list may total seventy, for there are heaps of ruins still unsearched, and several patients in the hospitals are suffering from injuries from which they cannot recover. The injured will number possibly 400, while at least 8,000 persons are without homes. In the three minutes which the storm lasted it levelled at least 500 buildings, doing damage estimated at from eight to ten million dollars.

MILITARY IN CHARGE.

The city is now under martial law. Armed men patrol the streets and only those with permits are allowed to visit the ruined sections. At night, every person must be off the street by ten o'clock.

Relief camps have been established in Alexandra and Dominion Parks, where hundreds of the homeless are encamped. Probably close to a thousand slept under tents the first night, while the remainder of the homeless were taken in by citizens.

So far there have been few attempts at looting among the ruins. One man who attempted it was shot through the arm but got away.

CAME FROM SOUTH.

The cyclone began its work of destruction on the north side of Wascana Lake and swept northward between Searth and McIntyre Streets, cutting a swath two blocks wide and almost two miles long. The new parliament buildings on the shore of Wascana Lake, built

of steel and concrete withstood the force of the storm but were badly shaken. The smaller buildings went down like houses of cards. Through the finest residential district of the city the storm swept, and costly homes were left mere jumbled masses of wreckage. Then the churches and public buildings about Victoria Park were struck. The Methodist and Presbyterian churches were wrecked, the new Y.W.C.A. building completely destroyed, Y.M.C.A. building shattered, the tower flung off the Baptist church, and the storm king hurried on to the business section.

The big Donoghue Block was shaken, and the government telephone exchange reduced to ruins. The retail district was next, and the storm had reached the Canadian Pacific tracks. Six lofty grain elevators were swept over in an instant, and several of the largest wholesale houses in the city unroofed.

Those who watched the progress of the storm say that two clouds swept towards the city from the south-east and three from the south-west. They clashed, and a whirling, dark, cyclonic, funnel-like storm swept north across the city striking the city at Wascana Lake.

TRICKS OF THE WIND.

The cupola of the Baptist Church was dropped in the middle of the street, three blocks away.

One of the largest grain elevators facing the railroad yards was picked up bodily and carried a distance of fifty feet from its foundation.

The roof of a factory building was carried three blocks away and crashed through a handsome residence.

The city electric light plant was put out of commission and the darkness added to the confusion and retarded the work of rescue.

Cars were picked up from the Canadian Pacific yards and carried several blocks. One was driven clear through the freight sheds.

Kelowna and the Okanagan Telephone Company.

Agreement Submitted Allows an Increase in Rates.

The editor of the Courier discusses interestingly the agreement drawn up between the Okanagan Telephone Company and the city of Kelowna, a draft of which has been submitted to the city council.

Apart from any clauses covering such matters as placing poles on the streets, the agreement seems to have little value in protecting the public, but the outcry of a few months ago has died out altogether, and the Council lacks the stimulus of keen public interest to drive a better bargain.

The most objectionable feature of the agreement is the proposed increase of rates upon the establishment of a continuous service. At the present net rate of \$3.00 per month for business and \$2.00 for residence telephones, a sixteen hour service will be given. In order to supply a twenty-four hour service the company demands an increase of \$1.00 per month all round, which means that, in order to pay another operator at \$50 or \$75 per month, \$300 more is to be extracted from the public!

The Council, realizing that the company is playing a hold-up game, is seeking to modify the proposed increase by accepting the agreement on condition that the residence telephones remain at the same rate of \$2.00, the business phones only to pay the additional \$1.00 per month. This strikes us as an inequitable compromise, as practically all business premises and offices close at 6 p.m., and business people will therefore gain no advantage from the installation of a twenty-four hour service, yet it is proposed to make them pay for a privilege which will be exercised by householders alone. Instead of the halfway measure proposed, the Council should stoutly resist the increase on the ground that it is not warranted either by the present scale of rates or by the additional outlay caused to the company by the employment of another operator.

FEDERAL FARM GRANTS.

Mr. Burrell, who is conferring with the provincial authorities in respect to the federal grant of \$500,000, to promote the farming interests, has completed the adjustment in Ontario. That province is to receive \$175,000. Mr. Burrell and Mr. Duff, who represent the province, have decided that \$40,000 shall go for the erection of a field husbandry building at the Guelph Agricultural College; \$21,000 will pay the expenses as part of the salaries of the district representatives; \$10,000 is devoted to poultry work; \$12,500 for the purchase of milking shorthorns to develop a class of stock that will be suitable for dairying and beef purposes; \$9,000 for fruit raising; \$7,000 for short courses in stock raising and for a seed specialist; \$20,000 for exhibition buildings; \$10,000 for agricultural work in the public schools; \$5,000 for drainage work; \$5,000 for live stock in Northern Ontario; \$3,500 for Women's Institutes; \$2,500 for the Ontario Veterinary College, with smaller sums for dairy and creamery work.

This Ontario scheme of allotment is interesting, as the problem is to be worked out in all the provinces.

PAINFUL ACCIDENT.

Moyes Clark, a young son of Jas. Clark, last week met with a painful accident and what might have been very serious had not medical aid been close at hand. While playing on the beach near Dr. C. M. Smith's he slipped on some broken glass, cutting two arteries and causing the blood to flow from the wounds very rapidly. Fortunately Dr. Smith was at home and the little lad was taken to the vordah of the doctor's cottage and the wounds dressed and bandaged, not before he had lost a considerable quantity of blood.

The Australian government has inaugurated a bonus system for all babies born in Australia. The bonus for each child is to be \$250.

LETTER TO THE EDITOR.

The Columns of THE REVIEW are open to the public for the discussion of matters of general interest. No notice can be taken of anonymous communications. Letters intended for insertion must be authenticated by the name and address of the writer, not necessarily for publication. The opinions of correspondents are not necessarily those of the Review.

MISS PAULINE JOHNSON.

The Editor,

The Summerland Review,

Dear Sir:

I am in receipt of a letter which states that Miss E. Pauline Johnson, the gifted Indian poetess, is dying in a Vancouver hospital. Before her illness assumed its present fatal character, she wrote an interesting collection of Indian Legends of the West Coast. This her friends published in order that by the sale of the book she might be assisted financially, as she was practically destitute.

I have undertaken to sell fifty copies, and as I have no time to make a personal canvass, I am going to ask the many Summerland friends of Miss Johnson to call at the Drug Store and leave two dollars, which is the subscription price of an autograph copy of "Indian Legends." The book will be delivered in about a week and will serve the twofold purpose of being a valuable addition to your library and a constant reminder of a good deed done, and to-day is the time to act, as otherwise it may be too late.

Thanking you for the space, Mr. Editor, I am,

Yours sincerely,

J. W. S. LOGIE.

Summerland, B.C.,

July 4, 1912.

FRUIT GROWERS' LABOR NEEDS.

As a result of an inquiry conducted by the British Columbia Fruit Growers' Association throughout the various fruit districts of the Province, asking what labor would be required for the current year, it is of interest to note that the fruit districts are much more thoroughly supplied with labor than was the case two years ago when the last general inquiry was instituted. At that time fruit growers made application for 1,450 men; as a result of the present enquiry they have asked for only 800.

Wages in the fruit districts have advanced slightly in two years, and the conditions of the working man have also improved, in that fruit growers are more generally supplying comfortable lodging and suitable board.

From the inquiry it was learned that on Vancouver Island and in the Lower Mainland suitable help can be secured with little difficulty without any special effort on the part of organizations for the purpose. It is true, however, that in these districts the Chinese and Japanese to some extent receive the preference over white men.

The Okanagan, which this year will have the largest crop of fruit in its history, has made the most inquiries for labor, and it is evident that there will be suitable employment for men adapted to the work of harvesting and handling fruit.

MONUMENT TO "McINTOSH RED."

A ceremony unique in the history of fruit growing took place at Dundela, near Morrisburg, Ontario, last Saturday. The farmers of Dundas county, by popular subscription have placed a marble stone close to the spot where stands the original McIntosh Red apple tree, that succumbed only recently after braving the storms and other enemies for over one hundred years.

About one hundred and fifteen years ago, John McIntosh, who came to Canada with the United Empire Loyalists, and settled in Matilda township, found a number of apple trees while clearing a place for a home. One of them produced fruit of such superior color and quality that he named it the McIntosh Red. It soon attracted attention and his son, Allan, propagated from it and commenced to disseminate the variety. In recent years it has been widely circulated, and now is planted in all parts of the continent where apples flourish. In 1898 the old tree was partially injured by fire, but continued to bear on one side until 1908, when it failed for ever.

A Choice Home-Site for Sale

SIX-roomed House & 1 acre of Land
 fronting on three Roads. Soil, rich black loam. 55 bearing Fruit Trees and all kinds of Small Fruits. Large Spring, which never freezes in winter and is ice-cold in summer, runs through one corner of Property, giving an abundant supply of water for irrigation and domestic purposes. This Property—surrounded by all kinds of Shade Trees—was my first choice of Summerland Real Estate; but having interests at Victoria, will let this go at a Bargain. If more land is desired, I can secure it for you.

"A Benevolent Autocrat."

A Study of Sir Richard McBride, K.C.M.G.

By T. P. O'CONNOR, in "T. P.'s Magazine for June, 1912."
 (Continued from our last issue.)

THEN take the steamer, and you reach in a few hours the Island of Vancouver. Never shall I forget the impression made upon me when first I caught sight of the city of Victoria. There are some scenes, which, by their overpowering beauty make you forget everything; that give you something of the ecstasy of the opium eater's dream; And the first sight of Victoria is one of these. Imagine Venice, and combine with that something of the truly British air of Brighton, and it will give you a faint idea of what Victoria is like. And when you get there you find something of the same combination of impressions. Victoria is the political capital of British Columbia, and to make assurance doubly sure, and to prevent any attempt to transfer the capital to the mainland, Victoria has buildings palatial enough to adorn the metropolis of an Empire; a noble Parliament House; in it and around it ministerial buildings; a fine museum, and around it, grounds that have a softness of an English garden and all the spaciousness of a city like Washington. The atmosphere has more sun than ours, and the sun, gilding the water which seems everywhere, gives a sense of surpassing beauty. There is in even this warm atmosphere a tang of that invigorating cold that adds so much to the health-giving properties of the climate of our own Brighton. Like Brighton too, Victoria has its fine esplanades; its perfect pavements; all the signs of an old world and not a new city of the Far West. And the population is English to the core. It is English, too, largely of our own sea-side resorts; the well-to-do and the tired, who, having won in life's battle, desire to spend their closing days in a perfect and a tranquilizing climate; the middle class parents, who desire to live in one of the cheapest and best educational centres of the world; the retired admiral or general, who desires to live under the British flag, in thoroughly British surroundings, with the inspiration of a new, young and thriving country superadded.

BRITISH COLUMBIA'S GREAT NEED

All these things, I say, you will find in British Columbia; but you will have to go a long distance to reach them. Victoria is four thousand miles from the Atlantic coast of Canada and seven thousand from England; and though there is a splendid train service, either by Canadian lines or by a detour through the United States, still it is a long journey. And on the way you are met by tempters from others of the great centres of the abounding life and the growing prosperity of Canada, Montreal with its gigantic population and its throbbing commercial life; Toronto with its great size and its fiercely active spirit; Winnipeg—of rapid growth and a depot between Eastern and Western Canada; Regina, Edmonton and Calgary—all beg you to remain with them and not go farther. And thus it is that populaion has been, and still is, the great want of British Columbia.

FACING THE PROBLEMS

But all these difficult problems were faced by Sir Richard with that extraordinary courage which is one of his greatest qualities. He ignored the banks and the financiers, went straight on with his work, and soon the people of British Columbia realized that at last there was at the head of the Government a man native to the soil, knowing all its conditions; and bringing to its problems exhaustless energy and proud local patriotism. Progress began to be made, not slowly, but rapidly, until in the end, it came to be felt that all the safety and advance of the province were bound up with his personality. And thus there came to pass in British Columbia what has happened in other countries and times—that all the politics of the country were bound with one single powerful and popular personality.

A position like this may be quickly won and as quickly lost. But that has not been the experience of Sir Richard McBride. There have been three general elections since he became Prime Minister for the first time; and each succeeding election has only increased his power.

British Columbia has only one house of legislature; it consists of forty-two members. In the last legislature thirty-nine were supporters of Sir Richard; in the present legislature the three members of the Opposition have been reduced to two; the supporters of the Prime Minister and of his policy thus number forty out of the entire membership of forty-two.

HOW IT HAS BEEN DONE

This extraordinary dominance has not been won by mere force of character; an instinctive adroitness, tact and good sense have been among the contributory causes. Take, for instance, his treatment of what even in British Columbia is not an infrequent occurrence—namely, labor unrest. Labor unrest is serious in any country—but it is most serious in countries where the prospect of the quick returns of mining draws the strong and adventurous and sometimes unruly men of all nationalities. British Columbia is full of great mining camps; and thus the Prime Minister has had to deal, more than once, with situations that, beginning in a dispute about wages or hours of labor, or a conflict between union and non-union, might easily have developed into bloodshed. And bloodshed there would have been if the conflict between elements so stubborn and so resolute as the miners on the one side and the mineowners on the other had not all to be submitted to the cold, clear judgement of the ruler of the country.

HIS POLITICS

For such a momentous position the very contradictions of Mr. McBride's political philosophy made him ideal. He and his friends are called Conservatives in Canada. But the same names mean different things in different countries. What are the party lines that divide men in Canada and in all its provinces? Free Trade and Protection is one great dividing line. And yet that would not be an entirely accurate or exhaustive description, for the Liberals, though their leanings are towards Free Trade, have not in recent years ever adopted an entirely Free Trade policy; they have been moderate Protectionists, but Protectionists all the same. Again, there is a certain, slight—but very slight—difference in point of view on the supreme question of Imperialism. Every Canadian Liberal would claim, and justly claim, that he is a loyal and convinced friend of the Mother Country and of the Empire; and he would argue that closer trade relations between Canada and the United States would not in the least prejudice that feeling. The Conservative holds strongly that Canada is strong enough to be self-sufficing, and that commercial bonds between their country and the United States might soon develop into closer political bonds, and thereby bring America and Canada nearer and England and Canada farther apart. And as everybody knows, this was practically the issue which decided the last election in favor of the Conservatives and against the Liberals.

On the other hand, in such matters as divide us in domestic politics in England, it is hard to see where the Canadian Liberal and Tory differ; if they differ it is not on our lines. Every Canadian Conservative would be in our domestic questions, more in sympathy with the Liberal—perhaps even with the Radical—than with the Conservative. They are—men of both parties alike—democrats; and on such questions as the franchise, the relations between England and Ireland, and taxation the Conservative would be on the side of the Liberals, and even on the side of Mr. Lloyd George.

GREAT DEVELOPMENT AHEAD

The future development of British Columbia must go on at even a more rapid rate than its present enormous advance. In a couple of years from now the Panama Canal will be open to the commerce of the world, and all the Western Coast on the Pacific must receive an immense impetus from this extraordinary new development of ocean traffic. The

thoughts of Sir Richard have been devoted, for some years towards preparation for this momentous revolution. He went to the country a few months ago; and the chief plank in his platform was the construction of railways to the enormous amount of twenty millions sterling; and the result I have already told—a legislature of forty supporters and two opponents. Apart from this extraordinary political triumph, there was the even greater personal triumph of being Prime Minister, with omnipotent hold over the destinies of his province, three times in succession, and after he had already held office for ten long years.

But there are other developments going on under this active and restless man. He is building one of the greatest Universities in the world for his province, and he is searching all Europe for men who are the foremost in educational work. It is his ambition, as he says himself, not to reach as high an educational position as Oxford or Cambridge or Harvard, but to start equal with them.

Finally, one little touch will help to complete one's conception of this remarkable personality. Sir Wilfrid Laurier and he have always been warm personal friends, though equally ardent political opponents. A couple of years before the last general election Sir Wilfrid went on a tour to the West of the great Dominion. Everywhere he had a great triumphant reception. In some provinces he found political friends in office and power; in Saskatchewan Mr. Walter Scott was a Liberal, in Alberta the office was held by Mr. Sifton, also a Liberal; but in British Columbia there was Mr. McBride, the stout Conservative in power. And yet it was at Victoria that Sir Wilfrid received the most enthusiastic and the most sumptuous reception. Great arches spanned the streets, the Government buildings were decorated, the townspeople were all out for a holiday, and there stood Sir Richard McBride, to receive him with the welcome of an honored guest. It was a sublime stroke; it showed at once generosity and shrewdness—the generosity of a naturally warm Irish heart; and the shrewdness of a keen politician who turned what might have been a campaign against to one in favor of himself and his policy.

SOME CONVINCING FIGURES

Finally, a few statistics to show what progress British Columbia has made in the ten years of Sir Richard's rule.

The net revenue has grown from \$2,044,000 in 1902-3 to \$10,500,000 in 1910-11. Whereas the province was heavily in debt in 1903, the public accounts showed at the close of the last fiscal year a balance of \$1,500,000 over all liabilities, and by reason of the surpluses which of late years have been the invariable result, the estimated expenditures for the present fiscal year are more than \$16,000,000.

The population, too, has grown in ten years more than 113 per cent., and is now 400,000.

The figures are the most eloquent testimony to a wise and popular rule. Sir Richard has often been asked to transfer his energies, his gifts and his magnetism to Ottawa; he could have had a cabinet office in the new Conservative Government; but he has preferred to remain in his native province until his work there has been done.—T.P.

QUEBEC APPLE ORCHARDS DEVASTATED

From all indications it is feared that the caterpillar plague will greatly injure the apple crop of the province of Quebec, not only of this year, but probably of next year also.

The difference between orchards which have been scientifically sprayed and those that have been left exposed to the tent caterpillar is very marked. In many instances those that have been sprayed are in perfect condition, while adjoining orchards are leafless.

Mr. Peter Reid, secretary of the Pomological and Fruit Growing Society of the Province of Quebec, states that the value of scientific spraying has never been vindicated before as it has this year. Five orchards established for demonstration purposes by the Provincial Government, and under the supervision of his society, have proved the real value of spraying, says Mr. Reid.

The best spraying mixtures used have been lime-sulphur and Bordeaux mixtures. The lime-sulphur was prepared by boiling together fresh lime and sulphur; and the Bordeaux by adding four pounds of copper sulphate (bluestone), to four pounds of lime, and reduced with forty gallons of water, dissolving separately before adding the water.

SOUVENIR OF DOMINION DAY

On Dominion Day was issued the new five dollar Dominion bill. On the obverse side it has a well-known Canadian scene—the Wentworth Valley in Nova Scotia with an Inter-Colonial train coming down the famous grade on the Foleigh mountain, and on the reverse side the numeral represented by the bill is repeated over and over again.

It is a remarkably good specimen of paper, the denomination being evident at a glance, and the scene depicted being at once beautiful, artistic and thoroughly Canadian.

THE HOME CIRCLE.

Crude Thoughts From the Editorial Pen.

DON'TS FOR WIVES.

The leader of Rockefeller's church at Cleveland, Ohio, recently took the above heading for his text, and he asked his hearers to put the following don'ts up in their wives' mirrors:

- 1.—Don't marry a man for a living, but for love. Manhood without money is better than money without manhood.
- 2.—Don't overdress or underdress; common sense is sometimes better than style.
- 3.—A wife with a hobble skirt and a husband with patched trousers make a poor pair. A woman can throw more out of a window with a spoon than a man can put into the cellar with a shovel.
- 4.—Don't think that the way to run a house is to run away from it. It is wrong to go around lecturing other women on how to bring up children, while you are neglecting your own.
- 5.—Don't tell your troubles to your neighbors. They have enough of their own. Fight it out yourself if it takes all summer.
- 6.—Don't nag. The saloonkeeper is always glad to welcome your husband with a smile.
- 7.—Don't try to get more out of a looking glass than you put into it. Nature's sunshine is better for a woman than man's powders and paints.
- 8.—Don't make gamblers and drunkards of your children by running whist parties for prizes and serving punch with a stick in it.
- 9.—Don't forget to tell the truth, especially to the conductor about the age of your child; honesty is worth more to you and them than a nickel. A boy who is eight years old at home and six on the cars will soon learn other things that are not so.
- 10.—Don't forget that home is a woman's kingdom, where she reigns as queen.

EFFECTS OF GOOD READING.

Childhood is truly the time to acquire knowledge; a healthy child is never still or idle. Every moment he is awake he is learning something. And all his knowledge of the world is gained through his five senses, or six, as some people count them, but he learns most, as we all do, from what he is told, from what he sees, and from reading. Before he knows one letter from another he will look at pictures for an hour at a time and if he can find any one to read or tell him about what he sees, his tongue is as busy as his eyes. His little brain must do some thinking to keep both members busy. What he learns from a picture book cannot be calculated.

As soon as the child is old enough to read, if he is not provided with reading material, there are only two ways for him to do, either to find books and papers for himself, or to spend his time in some other way. As what a child reads has such a power over his whole life, it is very important that parents be careful about what their children read. If a taste or desire for reading or study is not formed early in life it is probable that it never will be, or if a passion for the worthless, sensational print be acquired it will be difficult to eradicate such a desire. Negligence or thoughtlessness of parents on this question is often the cause of lifelong regret.

"PRESS ON."

This is a speech, brief, but full of inspiration, and opening the way to all victory. It solves the problem of all heroes; it is the rule by which to weigh rightly all wonderful successes and triumphant marches of fortune and genius. It should be the motto of all, old and young, high and low, fortunate and unfortunate, so-called: "Press on!" If fortune has played false with thee to-day, do thou play true for thyself to-morrow. If an unfortunate bargain has deranged thy business, do not fold thine arms and give up all as lost, but stir thyself and work the more vigorously. Let the foolishness of yesterday make thee wise to-day. If another has been false to thee, do not thou increase the evil by being false to thyself. Do not say the world has lost all its poetry and beauty; 'tis not so; and even if it be so, make thine own poetry and beauty by living a true and unblemished life.

WHAT a pure, blessed region is the open country. None should go away from it forever, and some should never leave it, so full is it of purity and beauty. Its beauty is the basis of some of the fine arts, and the inspiration of all. Culture is no more the power to appreciate an orchestra or an opera than the power to appreciate the song of birds. It requires as much culture to appreciate a field of blooming clover as to appreciate a gallery of art. True culture is not the power to appreciate a book, a picture or an opera, it is the power that detects the anthem of the morning larks; that can hear a robin sing without shooting it; the power to walk carefully upon the earth's carpeting of flowers. It spares even the bruised reed. This is the culture of earth and heaven.

NEVER forsake a friend. When enemies gather around, when sickness falls on the heart, is the time to try true friendship. They who turn from the scenes of true distress betray their hypocrisy and prove that interest only can move them. If you have a friend who loves you—who has studied your interest and happiness—be sure to sustain him in adversity. Let him feel that his former kindness is appreciated, and that his love was not thrown away. Real fidelity may be rare, but it exists—in the heart. They only deny its worth and power who have never loved a friend or labored to make one happy.

ABOLISH HOMEWORK.

If the school children are looking for a hero, here is what George Locke, chief librarian of Toronto says: "Homework is the most arid, most inhuman and most futile educational method ever perpetrated on the human race. It should be abolished for ever."

When boiling meat, place a tablespoonful of vinegar in the water. This will make the toughest meat tender.

Yes—but it's more than the quality grocery, it has the lowest prices for the highest quality in this community. Here are the freshest goods — the most exceptional values. And at this Store you get that courteous attention and prompt delivery of your purchases, that means pleasant quality in service.

You are cordially invited to prove every word of this. Call to-day and look over our extensive stock — or phone a trial order. Our quality and prices will positively cause you to give us your custom then — and always.

Copy for change of contract advertising must be in the hands of the printer not later than Wednesday noon to insure publication in the next issue.
In accordance with schedule of prices adopted throughout the valley, charges for advertising are now being made weekly. Heretofore when five issues were made in one month the result was a loss. By the new method, customers are charged each week for just the amount of space used.

FRIDAY, JULY 5, 1912.

FORTY-FIFTH CANADIAN BIRTHDAY.

CANADA this week celebrated, and the British Empire rejoices with her, while the whole world compliments the Dominion on this, her natal day, the forty-fifth anniversary of the Canadian Government. The pioneer stage has been completed, and a vast era of prosperity stretches ahead.

Forty-five years ago the eastern provinces entered into federation, but it was not until the entry of British Columbia into the Dominion that July 1 was set aside as the national holiday, the first "Dominion Day" being celebrated on July 1, 1871.

Vancouver Island and British Columbia were formerly two separate crown colonies, but were united on November 17, 1866. Two years later a convention met at Yale, B. C., to discuss joining the confederation of the older provinces. This was followed by other meetings and representations from the East were discussed for two years. Finally, in 1870, it was decided after due consideration of the terms offered by the Dominion by Governor Musgrave's Council, to join and extend Canada from the Atlantic to the Pacific.

At first it was not anticipated that the new province would have responsible government, but after Mr. H. E. Seely had journeyed to the East on behalf of the province and there proved that British Columbia with its population of 45,000 was capable of independent provincial government, the necessary writ was given for the convention of the first assembly which met under the premiership of Mr. J. F. McCreighton in 1872, and affirmed the terms of confederation.

Since that time the growth of the province has been phenomenal; to-day the population is nearly ten times the number in 1871. Half of this is clustered in and around the city of Vancouver, which twenty-six years ago was a virgin forest. The other provinces are being rapidly opened and its untold natural resources are but commencing to be exploited.—The Vancouver Sun.

DOGS AND DOG DAYS.

THERE USED to be a period of about six weeks during the hottest part of the summer which was called the dog days. This name was applied by the ancients from the helical rising of the Sirius, the dog star, and hence had no canine significance. But these are not the dog days we wish to discuss here. The dog days we are referring to have a more literal meaning than did the ancient appellation.

Perhaps our town does not have the greatest number of dogs per capita in this Dominion, but she certainly has her share. All those who have occasion to be on the streets very much know that almost every species of the canine family is represented. You meet big dogs and little dogs, black dogs and yellow dogs, bull dogs and puppy dogs, and other kinds too numerous to mention. Query: Wouldn't the dog catcher be worked to death—if we had one?

OUR BOYS.

WE CERTAINLY are blessed with an unusual number of bright, young boys in this community—little fellows, just starting on life's journey. They stand on the threshold of life with foot uplifted and hand outstretched ready to begin the journey, and happy in the anticipation of the beautiful and wonderful things they expect to see. To them all is bright and promising; no thought of evil crosses their minds, their imagination clothes everything with rainbow hues. They think little that every rose has its thorn, every pleasure its corresponding grief. They are eager to be off. The path is narrow, and on either side are yawning precipices which threaten to engulf them at every step. Numerous and enticing by-paths seek to lure them from the narrow way that leads to safety and honor. Here it is that the counsels of Christian mothers take root in their hearts, and their saint-like faces will go before them on their journey, guiding stars whose gleam cannot be extinguished no matter how hard the storms of temptation may beat them.

CAMP FIRE PUZZLERS.

HERE is a list of questions for the boys to discuss while in camp next week. Can you answer all of them?

- You can any day see a white horse; why do you never see a white colt?
- How many different kinds of trees grow in your neighborhood, and what are they good for?
- Why does a horse eat grass backward and a cow forward?
- Why does a hop vine always wind one way and a bean vine another?
- Where should the inside of a chimney be the bigger, at the top or the bottom, and why?
- Can you tell why a horse when tethered with a rope always unravels it, while a cow twists it into kinky knots?
- Why do leaves turn upside down just before a rain?
- What is the length of a horse's head—is it as long as a flour barrel?
- What animals have no upper teeth in front, and why?

IT PAYS TO BE GOOD.

THE EDITOR likes boys, they are often abused unjustly. And he often regrets that he has n't the power to emphasize this fact: A boy can have a better time as a polite and well-behaved boy than as a rough.

Having passed through the mill, we know. When we were a boy, we did so many unnecessary foolish things that we spend most of our time now in blushing. Here is one thing that boys can think of with profit: Good boys are always admired. By a good boy we do not mean a "sissy" or a molly-coddle. A good boy can have a better time than a boy whose parents are always worrying about him. There is nothing which promises a good time that good boys may not do. The mean things boys do always cause them trouble. And we firmly believe boys are becoming better all the time. A boy should always bear his future in mind; he is rapidly becoming a man, and it is uncomfortable to become an unsuccessful man. Therefore, boys should remember that good boys are the first to be offered positions. Employers are always contending with each other for the good boys; but of the boy with the bad reputation they say, "He is n't worth the powder and lead to blow him up."

IT IS REGRETTABLE that such a worthy movement as that undertaken by the Over-Seas Club was not better recognized by a larger attendance at the address of the Chief Organizer, Mr. Evelyn Wrench, in Empire Hall, last Wednesday evening. The Club is undertaking a great work, and deserves the support of all true citizens of the Empire. No doubt, the slim attendance was due to the fact that everybody is at this time particularly busy with orchard work. We cannot think that there is the indifference to such matters, as an auditorium not much more than one quarter full would lead a stranger to believe.

MAY WE CALL the attention of our readers to Mr. J. W. S. Logie's letter appearing elsewhere in this issue. It is with regret that we learn of the serious illness of Miss Johnson, and we feel sure that those who have heard her render some of her excellent poems will be glad to assist her in a time of need.

Harry Everett, of the Bank of Montreal, is back from a two weeks' vacation spent in the hills in the vicinity of Osprey Lake. Mr. Everett was accompanied by Mr. Rowley, and they report trout fishing especially good in the upper waters.

A forest fire recently did considerable damage at the head of Jack Creek, between Power's and Trepannier Creeks. The work of extinguishing the fire was under the direction of Fire Warden Hogg and was extinguished at a cost of about \$225. The fire fighters were assisted in their work by rainfall. This district was burned over some six or eight years ago, when it was estimated that about two hundred million feet of lumber was destroyed. There had already been considerable growth according to location and relative rainfall. The more moist parts showed a growth of from about six to twelve feet, and about two square miles of this new growth was destroyed by the recent fire.

Mr. and Mrs. R. J. Hogg, of Peachland, are in town this week.

It was hoped that Rev. Dr. Milligan, of Toronto, would be in Summerland next Sunday. He has written, however, to say that owing to indisposition he will delay his visit for a fortnight.

Owing to the unusually high level of the lake, and the uncertainty as to when the water would recede, no date has as yet been fixed for the annual union Sunday School Picnic. Preliminary arrangements have been made, however, and the date will be fixed as soon as possible. Messrs. Wallace Wright and Cliff McWilliams have been appointed a committee to choose the site and decide on a date. Transportation arrangements will be looked after by Frank Williams and Mr. J. G. Robertson, sports Messrs. J. R. Brown, G. V. White, Geo. Fisher and Robert Pollock. The refreshments will be in charge of the presidents of the various Ladies Aid organizations of the churches.

Local News Items. Local News Items.

Mr. C. M. Woodworth, accompanied by his wife, is the guest of his brother, L. C. Woodworth.

Mr. and Mrs. L. R. Williams left on Thursday morning for Vancouver, on a visit of two or three months' duration.

Mrs. M. M. Robinson went to the Coast on Thursday morning's boat on a visit to her daughter, Mrs. L. N. McKechnie.

J. L. Hilborne has gone to Leamington, Ontario, to bring his family to Summerland. They are expected in about five weeks.

Mrs. A. B. Williams and Miss Williams left on Thursday evening for Kaleden, where they will spend the week-end, the guests of Mrs. J. Lock.

Messrs. Markel & Cook are holding their last Moving Picture Show on Saturday. They complain of lack of patronage, and find receipts insufficient to pay expenses.

Miss Blott, sister of Mrs. F. W. Andrew, who accompanied Dr. Andrew to Winnipeg and remained there until he left for the East, returned to Summerland on Tuesday.

"The Players" of Summerland were very successful in their presentation of "Cousin Kate" at Penticton on Monday evening, where they played to a crowded house.

Mrs. F. W. Hardy was hostess last Tuesday afternoon at a most enjoyable "At Home," given at the Methodist Parsonage. A large number of Summerland ladies were present.

Miss Jean Pattison, of New York State, is the guest of her mother and brother at the Baptist Parsonage. Miss Pattison is accompanied by her friend, Miss Dowd, of Orange, New Jersey.

Mr. and Mrs. George Ross went down to Vancouver at the first of the week. Mr. Ross is having his regular vacation. Mr. J. Becker, who acted as Agent here prior to Mr. Ross' appointment, is relieving him.

Prof. C. D. Denton, of the College Faculty, came in on Saturday night from California, via Vancouver. Mr. Denton, who is greatly improved in health, found the journey somewhat tiresome, and has been resting since his arrival here. He is the guest of Rev. F. W. Pattison.

The Kelowna Courier makes the suggestion that the roads on the east side of the Lake be linked up, claiming that about twenty miles of comparatively easily built road would give a connection from Kamloops on the north down through Kelowna and Naramata to Penticton and south to Grand Forks.

Notwithstanding the showery weather, the Presbyterian Sunday School Picnic on July 1st was a success. A full dozen conveyances fell into line at the church and journeyed to Richardson's Saw Mill Meadow Valley, where the company camped and spent an enjoyable time as unpropitious conditions would permit.

A riding party consisting of Mrs. Lupton, Miss MacKay, Miss McNair, Miss Seaton, Messrs. Alex. MacKay, John McGregor, Will and Lionel Atkins, Ernest MacKay and Norman Pope, all of Peachland, registered at the Hotel Summerland yesterday. The party left Peachland last Saturday on a trip to Princeton and left here again for Peachland last night.

Mr. and Mrs. F. W. Clingan, of Salmon Arm, came in on Sunday night and returned home on Thursday morning. Mr. Clingan, who is a prominent business man of Salmon Arm, owns a fruit lot on Jones Flat, and his visit here was in connection with the gathering and disposal of the fruit therefrom. George and Marlon Clingan, who attended Okanagan College this year, are a son and daughter of Mr. and Mrs. Clingan.

"The Test of a Tree" is the first of a series of sermons on Farming at the West Summerland Baptist Church, on Sunday mornings during July. Later subjects will be, "The Farmer Whom Jesus Called a Fool," and "Gathering the Crop." The Summer Sunday Evening services at the Summerland Church will begin at seven o'clock and last one hour. Hymn selections from the "Men and Religion Movement" book will be sung. Brief addresses upon, "The Homeless Son," will be given. If you do not attend other services you will be welcome.

Miss Georgina Logie was the guest of Miss Gwen Robinson last Monday.

Mrs. R. C. Lipsett and Mrs. J. E. Phinney spent Dominion Day at Peachland.

BORN—On Thursday, the 4th inst., to Mr. and Mrs. E. C. Graham, a son.

Lightning during the shower of Thursday afternoon put some of the telephones out of commission.

Miss Evelyn Brown, who has been teaching at Lower Nicola, returned home on Wednesday evening.

Dr. R. Mathison has gone to Ontario to be present at the golden wedding celebration of his parents. He will be absent until the middle of August.

Dr. F. W. Andrew, who was operated on recently at Winnipeg for appendicitis, left there last Sunday for a visit to his parents in Brooklyn, N.Y. Dr. Andrew has made a rapid recovery, and after spending about two weeks in the East will probably return home.

Kenneth Elliott who only recently recovered from a broken arm, had the misfortune to again break the same arm on Tuesday by a slight wrench. The injured limb was reset by Dr. Smith, and Kenneth will spend a furlough from active Boy Scout duties at camp.

Miss Campbell, of the Zenana Bible Mission in India, was last week the guest of Mrs. Lipsett. Miss Campbell spoke to a number of gatherings while here, on the subject of hospital work in connection with missions in India. She went down to Penticton on the Sunday evening boat.

Mr. J. O. Robinson and Mr. S. R. McEwan, who recently arrived from the East and is at present the guest of Mr. Robinson at Hotel Naramata, will shortly take up their duties in Summerland in connection with the Okanagan Realty Company. Mr. McEwan will also represent the Okanagan Trust Company on this side.

Though Summerland's Football team played an excellent game on Monday, the odds were against them. The Vernon team was in fine trim and had the advantage of playing on their own ground. The local team seemed to lack somewhat the combination displayed by the Vernon eleven. The game was an interesting one all through, however, and by no means as one-sided as the score would indicate. The game ended 3-0 in favor of Vernon.

The boat built for Mr. Mitchell, of Kelowna, last year by the Summerland Boat Works, received some damage in the high wind of Monday night. Mr. Mitchell has gone to Scotland for the summer and sent the boat down here to be beached until next spring. The men who brought her down moored her close to Dr. Smith's boat, and they became entangled on Monday, Dr. Smith's boat doing considerable damage to the planking and stern of the Mitchell craft.

OVERSEAS CLUB PUBLIC MEETING

Those who came together in Empire Hall on Wednesday evening to listen to the address of Mr. Evelyn Wrench, the Chief Organizer of the Over-Seas Club, were well repaid, and heard with a great deal of pleasure the well prepared addresses of both Mr. Wrench and his sister, Miss Wrench. C. H. Cordy, president of the local branch of the organization, was in the chair and introduced the speakers.

Miss Wrench spoke first, and dealt with the question of educating children along patriotic lines. She also gave a talk on the British Flag, what it is, and what it means, and of the protection afforded citizens of the Empire wherever that flag is flown.

Reeve Thompson, in a few complimentary remarks thanked the speaker for her well prepared paper, and he was followed by Mr. Wrench, who kept the close attention of his hearers for an hour or more.

Mr. Wrench spoke briefly of the history of the Club, explaining its origin. The idea was first suggested by a note written by the late Cecil Rhodes to Earl Grey, but it was not for some years that the idea was put into form and the Club organized. As is well known, wherever branches of the organization exist, the chief aim is along the lines of a united empire.

Mr. and Miss Wrench, who are paying their own expenses, were given a hearty vote of thanks, and the meeting closed with the National Anthem.

When Fruits Do Not Set
Cold Weather and Rain are Unfavorable for Fertilization.

THE BLOSSOMS of wild plants very generally set fruits, but under cultivation only a small percentage do so. Fertilization is the process in which the male cell unites with the female cell. It takes place only after pollination, but a flower may, of course, be pollinated and fertilization not take place, a fact always to be remembered.

VALUE OF FERTILIZATION.
Fruits set and develop, for the most part, only after fertilization. Young fruits when first formed have only a slight hold upon life. Unfavorable influences, no matter how slight, may cause them to perish. Fertilization gives the tiny fruit life, and enables it to hold upon the parent plant through the nourishment drawn to supply the embryo which has been formed in the seeds. Thus, fertilization, usually, not always, determines whether a fruit is to live or die. Shortly after blooming time we have the fruit "drop," resulting for the most part from a lack of fertilization.

But fertilization does not ensure the complete development of fruit. Even after a perfect union of male and female cells, so far as it can be determined, much fruit drops in every orchard, and without regard as to whether the trees bear few or many blossoms. What are the causes of failures of fruit to set?

CAUSES OF FAILURE TO SET.
Crops of many varieties of several fruits do not set because of the infertility of the blossoms—that is, with many fruits pollen may be produced in abundance, seemingly perfect in appearance and potent on the pistils of other varieties, but which may wholly fail to fertilize the ovaries of the varieties from which it came. This is a very common cause of failure to set.

There is great difference, too, in the quantity of pollen produced by the varieties of the several fruits, but it is doubtful if insufficiency of pollen is a factor of much importance in the failure of trees to set fruits. The amount of pollen which the flowers of any fruit produce is modified more or less by weather and the vigor of the tree.

Varities that do not set fruit often have abnormal or abortive pistils or stamens. It is certain, however, that even a very large percentage of abnormal flowers may not seriously jeopardize a fruit crop, as trees usually bear several times as many flowers as they can mature fruits. Still, a high percentage of abnormal flowers nearly always indicates a weakness in fruit setting.

STERILITY.
Another cause of the failure to set fruits is the difference in time of maturity of stamens and pistils. When these organs do not mature nearly simultaneously fruits do not set until pollen is supplied from some other source. The female organs of fruits are receptive, however, for several days and the pollen is not shed at once from all anthers, and is produced with such prodigality as in most cases to insure the pollination of late maturing stigmas.

The solution of the problems of self-sterility is, in the main, to so plant that varieties will be cross-fertilized. In the choice of varieties for such cross-pollination two factors must always be considered—simultaneity of blossoming and sexual affinity.

It is obvious, if cross pollination is to play an important part in fruit growing, in planting to secure it, varieties must be chosen which come into blossom at the same time as those that they are expected to fertilize. It has seemingly been found that varieties of fruits have sexual affinities—that is, some varieties will fertilize each other very well, and some will not, a matter that must be looked into as fully as present information permits in selecting varieties for cross pollination.

Weather conditions have much to do with failures of trees to set and more especially with the dropping of fruit. Frost may destroy either blossoms or the fertilized fruits. Prolonged cold prevents the proper union of reproductive cells in blossoms, and later saps the vitality of young fruits and causes many of the more tender ones to perish and let go their hold upon the trees. Rain, whether a dashing shower or a prolonged drizzle at a low temperature, or even an extremely moist atmosphere without a fall of rain, prevents setting, and weakens the chances of full development of fruits if such conditions prevail at or soon after fruit formation. In the Middle and Far West orchard heaters are successfully used to prevent harm from spring frosts, but in the East this method has not proved a success in orchards because frosts do little damage, but cold and rain much.

CAUSES OF DROPPING.
Sometimes a lack of light causes fruit to drop, and thus we may explain the greater number of fruits at the tops of trees, in open-centred trees and in orchards not thickly planted. Fruit growers should regulate light by proper pruning and planting.

The "June drop" especially of the peach, may be explained in part as follows: When the fruits reach a certain size the food stored in the tree the previous year is exhausted. Now, if the leaves of such trees are not fully expanded, and if they are not able to furnish a new supply of food, the young fruits often drop. The June drop is especially liable to take place if there be one or more of the unfavorable conditions mentioned in the previous paragraphs.

With some fruits there is a tendency to drop in late summer, when seeds are making great demands for food. In such cases the trees become exhausted and cast a part of their load.

If at this time there be a drought, or, on the other hand, too much rain, fruit not infrequently drops in considerable quantities. The June and late summer drops can be controlled somewhat by supplying the best possible food and moisture conditions in the orchard.

It seems worth while with trees which habitually drop their fruit to try to direct the food to the fruit bearing branches by pruning out surplus wood, cutting out water sprouts and by stimulating the growth of fruit buds the previous season. All factors which are conducive to the best nutrition of the tree influences its capacity to retain the crop. —Tribune Farmer.

GUIDE TO APICULTURE.

By direction of the Hon. Martin Balfour, Minister of Agriculture, a timely bulletin on bee-keeping has been issued by the federal department of agriculture. According to a statement of the author, Dr. C. Gordon Hewitt, Dominion Entomologist, this work has been prepared to meet a very persistent demand for information by persons who wish to learn how to begin and to continue the industry of apiculture. It was the further object of the author to increase the number of bee-keepers in Canada by indicating the advantages of bee-keeping. It is pointed out that bee-keeping returns the direct profit of a honey crop, and the indirect one of improvement to yields of clover seed and fruit. It is observed that a bullock after being fed and cared for during an entire winter will not realize much more than the

produce of a colony of bees in a single season. Beginners are recommended to start on a small scale with one or two hives, increasing the number annually as experience is gained. This treatise of four pages, which is helpfully illustrated, covers in plain language the whole field of apiculture, including equipment, management, the production of honey and wax, diseases, legislation of the various provinces against the diseases, etc. It is designated "The Honey Bee," Bulletin No. 2, Division of Entomology, and No. 69, Experimental Farms. Copies may be had free by applying to the Publications Branch, Department of Agriculture, Ottawa.

Flannels should not be ironed. Pull out evenly while on the clothes line, fold, and place at the bottom of the clothes basket. This will make them quite smooth.

Bargains for Review Readers

REALIZING that the Home Paper cannot fill all the need for Reading Matter, we have compiled a List of [in our opinion] the most helpful and practical Publications which we are offering our Subscribers in clubbing combinations, at lowest possible prices.

Following is only a partial list of such combinations:

Peachland Notes.

Mrs. Walter Elliott, of Edmon-
ton, was a guest in town during
the week-end.

Miss McDougald, of the Sum-
merland Post Office, spent Monday
with her mother.

Miss Olive Young, of Penticton,
is the guest of her grandparents,
Mr. and Mrs. C. Young.

Miss Montgomery of the primary
department left for her home in
Ladner on Saturday morning.

Miss Campbell, representing the
Zenana Mission of India, was at the
"Chalet" on Wednesday evening.

Jno. Elliott, of Galt, Ont., visi-
ted his brother Thompson from
Thursday last to Tuesday morning.

Mr. Paul Murray left on Monday
morning for the Coast. We are
glad to think that he is coming
back again.

Mr. Murphy, one of the late
Normal Teachers in Vancouver, was
in town on Wednesday examining
the candidates here.

Mrs. J. D. Hunt and children of
Winnipeg arrived on Monday's boat
for a visit with Mr. and Mrs. Log-
an, Mrs. Hunt's parents.

Dr. P. C. McGregor, of Almonte,
Ont., and daughter Miss Grace, of
the Civil Service, Ottawa, passed
down the lake on Thursday after-
noon.

Dr. and Mrs. R. C. Lipsett, of
Summerland, spent Dominion Day
with Mr. and Mrs. J. B. Robinson.
They were accompanied by Mrs. J.
E. Phinney.

A number of those interested in
the school picniced on the beach on
Thursday evening. In spite of the
rather cold dip that day, a jolly
time was spent.

Mr. Barker is presiding examiner
at the examinations being held in
Vernon this week. Miss McNaugh-
ton of Kelowna is serving in the
same capacity here.

Miss Kate Miller, who has been
rusticating in town for some
months, left for the Coast on Sat-
urday. She is taking up her work
of nursing in Victoria.

Ben More, once well-known in
town, came in on Tuesday night
and left on Thursday morning. He
came to remove the stock of Stir-
ling & Pitcairn to Kelowna, from
the packing house now operated by
the Farmers' Exchange.

RIFLE ASSOCIATION.

All members are particularly re-
quested to turn out this week for
the third shoot of the series of the
Canadian Rifle League.

Last week's scores:

W. Nelson	31	32	29	92
O. Smith	28	31	31	90
G. Loomer	28	28	32	88
H. Dunsdon	29	27	32	88
A. E. Nelson	28	32	28	88

SEMI-CENTS NOW.

There are bills before the United
States Congress providing for the
coinage of half-cent and three-cent
pieces. The five-cent belt of the
United States, that has sneered at
places where copper is a medium,
is drawing in its horns. The small
coin is growing in favor, and its
territory is increasing; but whether
such a coinage will develop a Latin
thrift remains to be seen.—Calgary
Herald.

SCHOOL BOARD AWARDS TENDERS

FOR CONVEYANCE OF SCHOOL CHILDREN

At the adjourned meeting of the Board of School Trustees held last Friday the tenders for the conveyance of the school children were opened, considered and acted upon. There were not many tenders for the different routes, but for no route with the exception of the town, was there less than two tenders. For the town route there was only one. One of the Studebaker school wagons will be placed on this route, and the other on the Trout Creek route. Another rig, a Canada Carriage vehicle, purchased from Mr. W. R. Shields, will be put on the Garnett Valley route.

A. H. Steven, who had the contract last year for the town route, was again successful in his tender this year, his price being \$2.80 for each round trip; the Board providing the wagon.

H. Dunham, of Trout Creek, put in the lowest bid for that route, and was awarded the contract. His price was \$3.15, the next being \$3.35.

The contract for the Garnett Valley route was awarded to J. R. Campbell for \$2.50 per day.

A. H. Steven secured the contract for the Prairie Valley route at \$2.40 per round trip. He provides his own rig.

The successful tenderers have been asked to come before the Board, when they will be given a clear understanding as to their duties. It is expected that the misunderstandings and dissatisfaction of last year will be avoided, advantage being taken of the experience gained during that period.

SCHOOL REPORTS

PROMOTION LISTS

The following is the list of promotions for Division III, Summerland Central School.

Promoted to Division II.—Gordon Campbell, average 77; Bernard Taylor, 76; Joe Gayton, 75; Cecil Ritchie, 72; Hazel Steuart, 71; Melvin Monro, 68. Conditionally—Eva Smith and Muriel Phinney.

To Senior Second Class—Lily Simpson, 85; Leonard Whitfield, 82; Hugh McIntyre, 77; Alex. Smith, 76; Alva Garnett, 75; James Marshall, 71; Charles Denike, 70; Moses Marshall, 68; Charles Daly, 66. Conditionally—Levi Johnston.

To Junior Second Class—Tom Washington, 79; Ronald Phinney, 78; Delmer Dunham, 68.

To Senior First Class—Eva Watson, 86; Helen Campbell, 79; Carol Graham, 79; Milton Phillips, 79; Ruth Graham, 77; Louis Smith, 72; Dorothy Darlington, 69; Russell Munn, 68; John Denike, 67.

The diploma for general proficiency was awarded to Lily Simpson, the one for deportment to Eva Watson, and the one for regular attendance to Charles Denike.

B.C. FRUIT FOR THE PRAIRIES.

Arrangements are being made by the apple growers of the Kootenay district and by the agents who handle the products of the orchards to market the fruit on a considerable scale this year in the cities and towns of the prairie provinces. No doubt the railway companies will assist in this laudable effort, as the business thus brought to our Canadian railway companies, while not at present very large, perhaps, must become so, as the fruit industry in this province grows. Boldness, a beginning must be made in the handling of this product before long, and the sooner it would seem the better both for the railway companies and the fruit growers.

The superiority of the apples grown in the interior of British Columbia over those of Oregon and Washington has been demonstrated time and time again in late years, at great competitive fruit exhibitions both in the United States and Canada. Our apples have taken first prize at New York and Spokane, and in the London market they are regarded as unexcelled. Despite their superiority, however, the demands of the Canadian

middle west, have been supplied from the adjoining states of the American union, and British Columbia apples are scarcely known in the markets of Winnipeg, Regina and Calgary. It is undoubtedly time that these conditions were altered and that our prairie country should look to this province for its fruit, and not to the United States.—Vancouver Sun.

PUBLIC DEMONSTRATIONS.

Public demonstrations illustrating the best methods for controlling Blight, will be conducted by Mr. Thos. Cunningham and staff, including Dr. Bonquet, an eminent specialist of the disease, in the orchard of Mr. James Gartrell, at Gartrell, at ten a.m., and in the orchard of Mr. Lane, opposite L. C. Woodworth's orchard, at three p.m. on Saturday the 13th inst.

As these demonstrations present an excellent opportunity for the fruit growers to acquaint themselves with the most practical and efficient methods of controlling the disease, large attendances are urgently requested.

PRE-COOLING PLANT FOR SUMMERLAND.

PROVINCIAL GOVERNMENT TO ESTABLISH EXPERIMENTAL PLANT HERE.

For some time there has been a considerable agitation for a pre-cooling plant in this place, it being realized that fruit could be shipped in a riper condition and carry further if cooled before shipment, and we understand that some influential members of our Fruit Growers Association have placed the matter before the Horticultural Branch of the Provincial Department of Agriculture.

The following announcement which recently appeared in the Vancouver Province, points to a successful culmination of the agitation. We are inclined to think, however, that there is some typographical error in reference to the cost of the plant.

Mr. Edward Smith has been appointed temporarily by the Department of Agriculture at Victoria to make investigations and experiments in the pre-cooling and storage of fruit and its transportation, and will proceed at once to Summerland to study the conditions there. The value of paying attention to pre-cooling as a means of bringing fruit to the consumer in better condition has been already recognized by farmers in the United States, where it has been found possible by co-operation to erect a plant at a cost of \$1000 which will deal with three car loads in the hour, and experiments will be undertaken by the Horticultural Branch of the Provincial Department of Agriculture along these lines.

BOY SCOUTS CAMP.

25 UNDER CANVAS AT TROUT CREEK

The Summerland Troop of the Boy Scouts is in Camp this week near the lake shore at the mouth of Trout Creek. The boys are having the time of their lives. This is the second annual camp, and about twenty-five are under canvas in charge of Scoutmaster Borton, Quartermaster Tait, with Harold Kinney as Cook-in-chief. All these officers are popular with the boys, and the inst. named is giving eminent satisfaction by the good things he serves up at meal times. The boy's classic definition of a good time, "feed and fun," is thus adequately provided for. The programs are by no means all play, however, and practical education of a high type, and wholesome work is incorporated into each day's routine.

The troop consists of four patrols, No. 1, the Beaver Patrol, is fortunate in being led by Jas. Turner, a King's Scout, who received his training in England. His patrol won the prizes in connection with the boat tent and boat patrol, and the efficiency of his work was reflected all down the line. His corporal is Jas. Ritchie, Jr. No. 2 is the Wood Pigeon Patrol, under Scout Harvey Phinney, and Corporal Woodworth. No. 3, the Crow Patrol, is led by [Continued on Page 8.]

Regular Council Meeting Proves Uneventful Session

West Summerland Objects to Proposed Chinese Laundry

Sale of Land for Delinquent Taxes in September. By-Law Fixing Current Tax Rate at 12 Mills Finally Approved. Accounts Passed Totalling \$9,000.

The Municipal Council met in regular monthly session on Tuesday morning last. All the members were present. The meeting was called to order shortly before ten o'clock, and continued without interruption until after two o'clock. The business dealt with was mainly that arising from the communications received and the personal interviews granted.

DISCOUNT ALLOWED.

A. E. Hespeler was in attendance at the commencement of deliberations. His case was for discount on water rates. It appears that the original water notice went astray on its journey to Hon. Wm. Hespeler, in Winnipeg. A duplicate was obtained and dispatched, and a remittance made. It failed to reach the Collector before the 31st of May, the time limit set for discount allowances, but Mr. Hespeler claimed that under the peculiar circumstances, should be granted. At a previous meeting it had been disallowed.

The question was again fully discussed, but the Council did not arrive at a definite decision until a little later on, when a motion to allow the discount resulted in a tie vote. The Reeve was reluctant to give his casting vote off-hand, and afterwards gave his decision in the affirmative, thus allowing the discount.

Mr. Hespeler also drew the attention of the Council to the stony condition of the road leading from his entrance down to the gulch road, and also to a spot where irrigation water from a lot above washed on to an adjacent road inconveniencing traffic.

E. O. James also waited on the Council asking for domestic water connection to his property in Peach Valley. The syphon in that locality is shortly to be replaced, and Mr. James said that the connection could be made with little expense beyond the cost of the extra pipe needed. The distance the pipe would have to be laid is somewhat over the maximum distance which the Council has laid down for these connections; but under the circumstances, attention was promised to the application, and the conditions will be investigated.

Mr. James applied further for permission to erect a small building partly on the road allowance behind the premises he at present occupies on Shaughnessy Avenue. It was not probable that this road allowance would ever be used as such; and for this reason he asked permission to allow the building to cross the line. The Council, however, withheld their permission.

Attention was also drawn by Mr. James to a cut through his property, some six or eight feet deep, which carries a main ditch within ten feet of his house.

COMMUNICATIONS.

The routine business having been disposed of at this point, the Clerk read the communications.

W. C. Kelley, solicitor, reported having secured the title deeds to the nuisance ground and the municipal lot recently purchased.

As instructed by the Council he had taken up the matter of the citation of the name of the municipality in the injunction recently obtained against the storage of explosives near town by the railway contractors. He had received a declaration from the solicitors for the plaintiffs that the name of the Council had been dropped from the proceedings which were thus rendered nugatory in so far as the Council was concerned.

Mr. Kelley also submitted legal advice regarding the water agreements of the Garnett Valley Land Company. He gave it as his opinion that the agreement by which the Municipality took over the company's plant did not assign to them the fulfilment of the company's

obligations. Moreover, the original agreements between the company and their water users made no mention of a maximum or minimum rate, merely stating a fixed rate. And, since the shareholders were cognizant of the transfer, the Council were free to keep the water rates in uniformity throughout the Municipality, according to their agreement.

The Clerk submitted correspondence which had passed between W. E. Ward, of Garnett Valley, and himself. Mr. Ward had written to the Council complaining of damage to his property arising through the overflowing of a choked flume. It happens that Mr. Ward himself has charge of this section of the irrigation system. The Clerk replied asking for a little fuller information on what seemed a rather unusual case. Mr. Ward appeared to take umbrage at this reply, apparently feeling that the Clerk had exceeded his duty. The Council, however, did not take this view, and Mr. Ward must explain further before his claim can be fully investigated.

C. P. Nelson protested against the levy of a trade licence on his business. He took the ground that he practices a profession, and is not a trader in the generally accepted sense of the word. The Council upheld the objection, and granted exemption.

Fire Warden R. J. Hogg, of Peachland, wrote regarding the presence of perennial thistles within the municipal limits, and suggesting more stringent local enforcement of the "Noxious Weeds Act." The Clerk will ascertain the relation of the Provincial Government to the local authorities in the matter of the control of noxious natural growth.

F. H. Hole, on behalf of J. P. Kennedy, wrote requesting that the road to this property be made before the time for hauling the fruit came on; he also complained of his water service. Coun. Lewis will take this in hand.

The Womens' Institute acknowledged the grant made to their First Annual Flower Show.

Messrs. E. V. Elsey and A. E. Walker called the attention of the Council to the fact that in replacing the flume on the south side of their properties, the new structure had been so placed as to occupy more of their land. This was left over, as the work is too far advanced to allow of any alteration.

Mr. P. Tully asked why water had not been put on to the high points of the McCutcheon property, as had been promised. The Council were under the impression that this had been done; and the Clerk will ascertain why it is not so.

The request of W. E. Milligan for attention to the road to his property was met, and the Superintendent will be instructed accordingly.

W. C. Kelley brought to the attention of the Council the fact that Stuart Avenue was impassable to traffic except by trespass on his land, owing to the condition of an irrigation ditch. The Superintendent will look into this matter.

A petition from property holders along the road from Mrs. Campbell's to Senator Kirchhoffer's, praying for attention to this road, now in bad condition in some parts, particularly towards the bottom. This was referred to the Board of Works. A report submitted by the Collector on delinquent trade licences showed \$102.50 still outstanding. The Council made a few adjustments and allowances, and decided to take steps to enforce payment of the remainder. The report showed also that 55 dog licences had been taken out to date. The two dollar rate ceased at the beginning of the month.

The Superintendent submitted his monthly report. This document did not appear to be replete enough with detail to meet the wishes of some of the councillors,

since it is the only record they have of the outside work that is being carried on.

The report of the Board of Work was approved; and the Superintendent authorized to proceed as enumerated therein.

The Western Canada Irrigation Association reminded the Council that their annual convention meets in Kelowna on the 13th, 14th, 15th, and 16th inst. prox. and requesting the early submission of resolutions to be discussed.

The Board of Investigation, under the "Water Act, 1909," which sat here a few weeks back, sent notices to the Council calling attention to the lapse of an old water covering the entire district, which apparently affects the validity of all the records held by the Municipality. Personal attendance is demanded at Victoria on August 10. The matter is inexplicable to the Council, and the Clerk will write immediately for further information.

Tenders for a road at Gartrell from W. J. Ross to J. R. Brown's were considered, and that of G. Morgan at \$175 was accepted.

[Continued on Page 7.]

LOCAL TELEPHONE CO.'S STATUTORY MEETING

PROVISIONAL OFFICERS ALL RE-ELECTED

Policy Heartily Endorsed and Plan for Immediate Installation of Plant Approved.

The statutory meeting of the shareholders of the Summerland Telephone Company, Limited, was held in the Men's Club on Thursday afternoon. Mr. W. J. Robinson was elected to the chair, with A. L. Moreland as secretary. The financial report was read by secretary Moreland and adopted as read.

There was a general discussion on the telephone situation as it stands at present, and a marked unanimity of feeling was evident that Summerland should own its telephone system, as it does its other public utilities. It was suggested that the Government be asked to grant municipalities the right to own and operate their own telephone exchanges. Many wanted Summerland to own all her franchises, and it was suggested that we ask our members of parliament to support a bill granting us that right. It was thought, too, that municipalities of the Province should organize if necessary for the purpose of supporting a bill granting all the municipalities a similar right. It was realized, however, that until this was granted by the Provincial Government that it would be necessary for the local company to instal and operate its own exchange, holding itself ready to sell to the municipality at the opportune time, and with this in view the company will hasten the work as rapidly as possible.

The following, who comprised the Board of Provisional Directors, were unanimously re-elected as Directors of the Company: Dr. F. W. Andrew, Messrs. H. C. Mellor, James Ritchie, H. Sutherland, and A. L. Moreland. F. J. Nixon was elected as auditor.

The following motion was unanimously carried: "That this meeting, while endorsing the progressive action of the late Board of Directors, and thanking them for their services, requests the new board to follow along the same lines, and proceed with the installation of the system at the earliest possible moment."

Immediately after the meeting of the shareholders, four of the directors, who were present, met but decided to adjourn their meeting until the return of Dr. Andrew who is expected home in a few days.

David Awauche, the son of Rev. F. W. Awauche, of Penticton, who some months ago was accidentally shot in the foot, has had to undergo the loss of that member, amputation being made at the Vernon hospital recently. It was feared at the time of the accident that amputation would be necessary, but every effort was made to save the foot.

Telegrams reporting the prices of fruit at the Vancouver City Market are being received frequently and copies are being posted in public places.

REV. CHAS. BRITTEN ORDAINED AT PENTICTON

IMPRESSIVE SERVICES ON TUESDAY LAST.

The ordination of Chas. Britten into the ministry of the Baptist denomination, which ceremony was held at Penticton on Tuesday, was the occasion of the visiting of that town by a good number of Summerland people.

Mr. Britten, who has recently been called from the East to the Baptist Church at Penticton, had up to the present been preaching under a license, and, at the request of the Penticton Church, the Baptist Churches throughout the Valley were requested to send representatives to the Ordination Council.

There were delegates present from the churches at Vernon, Kelowna, Peachland, and Kaledon. Those from Summerland were accompanied by a number of others interested in the young candidate.

A party of some twenty-four left here at one o'clock, and returned after the evening service, arriving shortly after 11. The journey, which was greatly enjoyed, was made by launch. The party on the return trip ran in quite close to the Boy Scout Camp at Trout Creek, and upon picking up their camp fire, gave the boys a hearty cheer.

The Council convened in the Penticton Church on Tuesday afternoon when the candidate was given the usual examination after which the Council drew up a resolution recommending the candidate for ordination, which recommendation was presented to the members of the congregation of the church at the evening assembly.

Rev. F. W. Pattison, of Summerland, was Moderator of the Council, and Rev. D. J. Welsh, of Kelowna, secretary. The evening service, presided over by Mr. Pattison was a very impressive one. A unique feature of the occasion was the fact that there were some present of the Council who knew the young candidate while in the East. Rev. H. G. Estabrook was at one time his pastor at Springhill, N.S.; and Rev. F. W. Pattison, who was associated with Mr. Estabrook in the work there was also acquainted with the candidate. Mr. Britten studied at Acadia University, and there came under Dr. E. W. Sawyer, now President of Okanagan College. All these gentlemen spoke very highly of Mr. Britten as a church worker and a student.

The ordination sermon at the evening session was preached by Rev. D. J. Welsh. Dr. Sawyer gave the charge to the church, and Rev. H. G. Estabrook welcomed Mr. Britten to the ministry. Other speakers of the evening were Rev. G. O. Falls, of the Penticton Methodist Church, and Rev. F. Miller, of the Penticton Presbyterian Church.

Special music had been prepared for the occasion. After the service the congregation repaired to the lawn beside the church when ice cream and cake was served.

Those present are unanimous in pronouncing the occasion an unbounded success, and frequent remarks of commendation were heard of the most hospitable manner in which the ladies of the Penticton church entertained the visiting friends.

Mr. Britten's parents preceded him to the West, and have been residents of Summerland for about five years. It was his father's pleasure to be a member of the Ordination Council, and the ceremony was also witnessed by his mother.

K. V. RAILWAY ADVANCE.

A crew has been put at work near Merritt brushing out right-of-way from the loop up the Coldwater to the summit of the Coquihalla. More men would be put to work every day if they could be found.

A party is now down to within a mile-and-a-half of the loop, having completed the work from the Coquihalla end. When the connection is made with the completed section of the road this party will work down the Coquihalla into Hope.

The crew who are re-opening the road for ballasting are now nearing Merritt, and it is expected that ballasting can be begun in a short time.

Crude Thoughts From the Editorial Pen.

THE MODEL HUSBAND.

MUCH has been said and written about the model husband. A quarter of a century ago Ella Wheeler Wilcox penned her ideas of a model husband and we doubt if they have ever been improved upon. "Ella" said if she were asked to define the meaning of a successful man, she would say a man who has made a happy home for his wife and children. No matter what he has done in the way of achieving wealth or honors, if he has done that he is a grand success. If he has not done that, and it is his own fault, though he be the highest in the land, he is a most pitiable failure.

I wonder how many men in the mad pursuit for gold which characterizes this age, realize that there is no fortune which can be left their families as precious as the memories of a happy home.

I heard a daughter say, with bitterness, one day, "I never knew a happy hour in my childhood. My father was so cross and severe he crushed my mother's spirit and destroyed our youth. Nothing can ever recompense me for that." What a memory for a daughter to carry through life! I have known several men who were objects of terror to their families. Laughter ceased, mirth was silenced, callers intuitively took leave, when the master of the house approached. I wonder what such men can live for. I can imagine no honor that can compensate for the loss of those nearest to us.

I think more men than women marry for love. Yet there are fewer good husbands than good wives, take the land over.

If you married a beauty and a belle, or a very popular young lady even, you no doubt felt highly elated over your conquest, and it was your intention to make her happy. But, perhaps, you did not realize that an extra exertion on your part would be necessary as time rolled on. Ardent lovers too often and too quickly become indifferent husbands; not indifferent in heart, maybe, but indifferent in action. The girl who has been sought and admired, and praised by a crowd of enamored swains during her single career, cannot help feeling heart-aches and repinings if she is unnoticed or neglected as a wife. It will not do to let her take it for granted that you still care for her, or still admire her. You must tell her so sometimes—the oftener the better. It may seem foolishness to you, but it is often a matter of life and death import to a wife—a few, fond, admiring words from a husband's lips. It will not cost you anything, and it will make her happy. Praise her discretion, her good sense, and her dignity, and tell her that these qualities are dearer to you than her beauty, and mark my words, she will strive to deserve your praise with renewed ambition. If she does not, she will be very light weight indeed. See to it that no man pays your wife sweeter compliments or appreciates her beauty or worth more than you do.

Tell her that she is the best wife in the world, and that you are sure no one else on earth could make you so happy as she has done. You have no idea, being a man, how much joy such words bring to a wife's heart.

If you come home and find something out of place in the house, or not to your liking, do not let it be the first thing mentioned. Try and find something to praise and appreciate, and then speak of the matter that displeases you and ask to have it attended to.

Women need love, praise, appreciation, and pleasure, as much as flowers need the sunlight; and, as a rule, the best wives are the women who receive considerate kindness and attention from the rightful source—the husband.

NO PLACE LIKE HOME.

One of our most valued exchanges very timely remarks that the best of us are like animals—we rush into holes for shelter. Home is such against the hardness of the world.

Margery Bell, the Toronto girl, who ran away, said on her return home: "You'll never know how much you want and need your mother, your brother, or your father, until you're away from them."

Ah, how strong, how unerring, are the fundamental instincts of human nature. We can never outlive them. The joyous child allured by the bright flowers, the butterflies, the rainbow, may forget and wander far. But when the feet are bruised and the limbs weary and the heart sore, and it seems naught but strangeness, it cries for home.

Men and women have a little stronger limbs and a little stronger hearts; they can chase the butterflies and the rainbows a little farther, and then they, too, like the little child, must see the mocking folly of it all and, weary, heartsick, cry for refuge—home.

For many of us the old home may no longer exist except in memory. But if in memory it is enshrined, then, whatever the disappointments, the deceptions, the despairs of life, we still may turn for new hope, new courage, and new inspirations, as did this poor girl, back to the old home, where love glows against the coldness of the world.

Misfortune has its recompense when it turns us back to set our lips once more to the spring of love that is pure and undefiled.

Amid joys and successes our surroundings seem not so near to us; they are remote in their unreality, their glitter and abundance. And when sorrow comes it finds us sick with loneliness. It is then that in the lowly home of childhood every table and chair and picture seems to take tongue and call and call to us. And the call comes through the distance and through the years like strains of deep-loved and never-to-be-forgotten music, filled with multitudes of sweet associations that make the heart beat quick.

MAYBE, after all, one lot in life is not much better or worse than another, so far as happiness goes, but there are some things in life that seem very necessary to us, big and little, great and small, and that little corner in God's creation we call home is one of them.

THE HAPPY state of mind, so rarely possessed, in which we can say, "I have enough," is the highest attainment of philosophy. Happiness consists, not in possessing much, but in being content with what we have. He who wants little always has enough.

ENTHUSIASM is the element of success in everything. It is the light that leads and the strength that lights men on and up in the great struggles of scientific pursuits and of professional labor. It robs endurance of difficulty and makes a pleasure of duty.

A Choice Home-Site for Sale

SIX-roomed House & 1 acre of Land fronting on three Roads. Soil, rich black loam. 55 bearing Fruit Trees and all kinds of Small Fruits. Large Spring, which never freezes in winter and is ice-cold in summer, runs through one corner of Property, giving an abundant supply of water for irrigation and domestic purposes. This Property—surrounded by all kinds of Shade Trees—was my first choice of Summerland Real Estate; but having interests at Victoria, will let this go at a Bargain. If more land is desired, I can secure it for you.

 Copy for change of contract advertising must be in the hands of the printer not later than Wednesday noon to insure publication in the next issue.
 In accordance with schedule of prices adopted throughout the valley, charges for advertising are now being made weekly. Heretofore when five issues were made in one month the result was a loss. By the new method customers are charged each week for just the amount of space used.

FRIDAY, JULY 12, 1912.

ADVERTISING AS A GUARANTEE.

WHEN a business concern invests a large sum of money in a handsome store and equipment for retail merchandising, the public feels a certain degree of confidence that the concern has goods worth examining. People argue that unless they had established a reputation for fair dealing and unless they had goods that they knew filled a need, they would not dare spend so much money.

Advertising, likewise, acts as a guarantee of substantial business character. When a firm spends money freely on this necessary form of salemanship, the public concludes that it must have goods back of it that have demonstrated their worth, or the firm would not have set apart this sum of money for selling them through the newspapers.

A concern that does not advertise impresses the public as merely an experiment. The fact that it may have been in existence for many years does not help it very much. The public may even look at mere existence for a long term of years as a disqualification, indicating preference for old time methods. It takes advertising to prove that you have confidence in your goods.

COST OF LIVING STILL ADVANCING.

THE COST of living continues to ascend in Canada. According to the latest estimate of the Department of Labor, the continued rise in prices was maintained during May, though not to such a marked extent as during the preceding month. The department's index number, which went up more than a point during April, reached the highest point in the record of the department during May.

The rise of nearly ten points in one year constitutes a record in the history of the department, and it is a noticeable feature that during last year the lowest point was recorded during May and June, while the figures for May this year show an advance over those of any previous month.

Animals and meats advanced to unprecedented levels during May, an unusual feature of the market being that all low grades have advanced as steeply as the choice grades. Grains and fodders showed an increase during the month, as also did fruits and vegetables. Decreases, on the other hand, were recorded in the cases of dairy products and fish.

Construction Work to Begin At Once.

Improved Telegraph Service by First of September.

Government Telegraph Agent L. A. Palmer has everything in readiness for the actual commencement of construction work on Monday next on the telegraph extension from Kelowna to Pentiction via Westbank, Peachland and Summerland. He has two crews ready to begin work.

Mr. E. L. McMillan, of Vancouver, recently of the British Columbia Electric Company, has been engaged by Mr. Palmer, and will locate here in charge of the work from Westbank south. Mr. R. F. Wright, lately of Pentiction will return from the Nicola, where he is extending the Government Telegraph line to the Canford Steam

Mills, and will take up the work at Pentiction working north to meet Mr. McMillan. Mr. Wright brings his present gang with him. Mr. McMillan went over the route between here and Westbank on Wednesday with Mr. Palmer. From the divide, nine miles north of Summerland, to Siwash Point where the cable lands on the west side of the lake, only about half a dozen poles need to be replaced. From the divide to south of town all new poles will be erected, some six hundred of which are now ready. It is estimated that from six to eight weeks will be required to complete the extension.

B.C. FRUIT AT PRAIRIE FAIRS.

The British Columbia Government has arranged to have fruit from this province prominently displayed at all the principal fairs to be held in the three provinces this season. The presidents of the various Farmers' Institutes, and others, have been given instructions by the Government to collect exhibits of the different fruits representative of their districts. Those collections are shipped to a representative in charge of the exhibits. The first display will be at the big Winnipeg Fair, and from there the fruit will be taken to Brandon for display at the annual show in that city. These exhibits will be kept fresh, and will contain seasonable fruits as the season progresses. Each collection will bear a display card showing the district from which the fruit was sent, and by whom it was grown. Already some sample packages have been sent from Summerland for the Winnipeg Fair.

In every part and corner of our life to lose one's self is to be a gainer; to forget one's self is to be remembered.

A SEASONABLE RECIPE.

TOMATO JELLY—Put half a teaspoonful of gelatin to soak in half a cup of cold water. Meanwhile cook together a pint of good, ripe tomatoes, a large slice of onion, four peppercorns, two whole cloves, a scant teaspoonful of salt, a teaspoonful of sugar, a spray of parsley, a small bay leaf, a dash of cayenne and a tiny blade of mace. Unless the tomatoes are quite acid, add a teaspoonful of vinegar, and just before straining a tablespoonful of Worcestershire sauce. Simmer for fifteen minutes and then strain. Add the gelatin while hot and stir until dissolved, and then turn into individual moulds, or in a border mould, and, if you wish, put salad—shrimp, lobster, chicken or mixed vegetable—in the centre. Celery and nut salad goes nicely with the tomato jelly border.

Nearly eight thousand school gardens exist in Austria. They are connected with both private and public schools, and are used for purposes of practical instruction in horticulture.

A SPEEDY LAUNCH.

Mr. G. W. Morfitt has had shipped here direct from the factory at Brockville, Ont., a very fine motor launch which he has named the "Calgary." She is a boat thirty feet long, with a fifty-eight inch beam, and is fitted with a thirty horsepower four-cylinder St. Lawrence two-cycle engine. The boat itself is up-to-date in every particular, and has a fine mahogany deck, and a glass wind shield similar to that in use on many autos. The cockpit is nicely carpeted, is fitted with very comfortable armchairs, and has a "Kenyon" style top on. The engine is forward, under the deck, and the boat is controlled by an auto steering gear. The craft is guaranteed to make twenty knots an hour, and is to be tried out to-day.

Local News Items. Local News Items.

BORN—On the 5th July to Mr. and Mrs. Tavender, a son.

The Summerland Supply Co. have just imported another "Indian" Motor Cycle. This is a four-horse power machine, and the purchaser is E. R. Simpson.

Mr. J. M. Robinson's launch, "Naramata," brought a large party of Hotel guests across to Summerland. Hotel Naramata is now well filled with holiday people.

Mrs. J. W. Merrill, mother of Mrs. Wellington Watson, left for Milwaukee on Tuesday morning. Mrs. Merrill was unexpectedly called away by the serious illness of her sister.

Rev. R. E. E. Harkness, of Vernon, has leased the Gainer cottage. It will be occupied by his mother and an invalid brother. Rev. Mr. Harkness, it is understood, has resigned from the pastorate of the Vernon Baptist Church, but his plans for the future have not been learned.

Mr. G. W. Morfitt, one of Calgary's most prominent citizens, and at present an alderman of that city, arrived in Summerland on Wednesday evening. Mr. Morfitt was preceded some days ago by his family, and they will spend the summer at their orchard home on Jones Flat.

An Ice Cream Social will be held on the College Campus, on the evening of Saturday, July 20th, at seven o'clock. This will be under the auspices of the Football Club, and the receipts will go towards the expenses of that organization. The boys are hoping to receive generous donations of cake from the ladies for that evening.

Rev. J. H. White, D.D., who will conduct the Anniversary Services of the local Methodist Church next Sunday, is one of the most widely known of all British Columbia preachers. He is a son of Rev. Edward White, pioneer missionary to the province in 1859. He has been Superintendent of Missions since 1902. Previous to this he filled important pastorates, the last being at Nelson, B.C. He has a kind and genial personality, that makes friends everywhere, and is a forceful, practical speaker.

Mr. and Mrs. R. H. English entertained about one hundred guests at their home and grounds on Thursday evening. The night was perfect for an outdoor gathering, and lawn games were heartily enjoyed. Refreshments were served and before the crowd dispersed, Rev. H. C. Daly asked for order and in a pleasing address called for ward Mr. T. P. Thornber, whose music has been a feature of both Methodist and Presbyterian services for the last four years. Mr. English then on behalf of the Presbyterian congregation presented Mr. Thornber with a purse of gold, and a beautiful gold locket and chain. Mr. Thornber was completely surprised, but made fitting reply.

RIFLE ASSOCIATION.

Better weather conditions prevailed for the third shoot of the Canadian Rifle League, on Saturday last, and the team scoring consequently showed an improvement over the previous two shoots.

	200	500	600	Total
J. Dunsdon	88	84	84	101.
F. Gartrell	83	82	82	97
J. Conway	81	83	87	91
W. E. Ward	20	30	30	89
W. Nelson	20	33	22	89
A. E. Nelson	28	31	29	88
G. Loomer	26	26	82	84

Members are reminded that this week the fourth and last shoot of this series takes place, and they are urged to attend and help maintain the standing of the local club.

B.W.M. CIRCLE.

The Mission Circle of the Baptist church met on the afternoon of Wednesday, July 10th, at the West Summerland Church. Among other items of business was the election of officers for the ensuing year.

The following were elected:
President—Mrs. R. C. Lipsatt.
First Vice-President—Mrs. E. A. Pattison.
Second Vice-President—Mrs. W. Estabrook.
Corresponding Secretary—Mrs. R. E. White.
Recording Secretary—Mrs. G. J. Coulter White.
Treasurer—Mrs. W. H. Hayes.
After the meeting adjourned Mrs. J. E. Phinney very kindly served ice cream and cake to the ladies, which was greatly appreciated by all.

Mrs. C. M. Smith went up to Peachland on Wednesday morning.

Mr. and Mrs. G. M. Ross returned Thursday from a vacation trip to the Coast.

Mr. G. A. McWilliams left for Manitoba on Wednesday morning. He expects to be absent for several weeks.

The Okanagan Jam Company would like it understood that they do not receive fruit after six o'clock and that no fruit is taken on Saturday.

Mr. R. B. Wilkinson, of Calgary, is here again on a short visit. Mrs. Wilkinson and her mother are spending the summer here. They are occupying A. H. Steven's tent house next to Dr. Mathison's office.

H. L. Collins, representing the Herald Publishing Company, Calgary, has been in Summerland for some days in the interests of his paper. He was joined here by Mrs. Collins who, arrived on Thursday evening.

A number of local Orangemen went up to Kelowna on the boat this morning to attend the 12th of July celebration there. This is the Jubilee year for the order in British Columbia the first lodge being organized half a century ago in New Westminster.

A meeting of the College Auxiliary is called for Thursday, July 18th, at the home of Mrs. W. Estabrook, Peach Orchard. All members are requested to be present and bring some work, or come prepared to assist with work that will be supplied by Mrs. Estabrook for the Auxiliary.

A number of applications have been made to members of the Government Horticultural staff, some of whom are now in this vicinity, for employment in fruit work. In some cases whole families are ready to come and engage themselves in fruit gathering, packing, etc. In one instance a Methodist minister intimates that he would like to bring his family here for this purpose for the summer. These applications have been handed over to Mr. J. Lawler, manager of the Fruit Union, and some of our readers may be glad to avail themselves of the help thus offered.

The staff of the Review are grateful to Mr. S. M. Young for some very fine cherries of the Royal Anne variety, brought to this office on Monday of this week. They were certainly beauties, very large, and if Mr. Young can bring all his cherry trees to produce such fruit he is to be envied. Mr. Young states that he shipped the last of his Tartarian cherries on Thursday of last week. The Governor Wood crop has also been cleaned up, and he is now shipping Royal Anne and Lambert. His Lamberts were also very large, some that were packed this week having 72 to the layer, layers being 8 x 9, while the Royal Annes were 10 x 10.

UNION SUNDAY SCHOOL PICNIC.

The committee appointed to decide on a suitable time and place to hold the annual union Sunday School picnic, has decided that the most suitable place will be the site of the Camp of the Boy Scouts, and the date, next Thursday, July 18th.

The "Maude Moore" and the ferry launch will make trips from the long wharf at 1.30 p.m. returning to make another trip if necessary at 2.30. For those at West Summerland who prefer to drive, arrangements can be made for conveyances to leave that section at about the same hour. The provision of refreshments has been left in the hands of the various ladies' organizations of the different churches. A program of sports will be drawn up for the children, and nothing will be left undone to give everyone the best of good times. It is hoped that all connected with the Sunday Schools of Summerland will make an effort to be present, and make the outing a success in point of numbers as well as in enjoyment.

NOTICE TO CONTRACTORS.

NORTH KELOWNA SCHOOL.

SEALED TENDERS superscribed "Tender for School-house, North Kelowna," will be received by the Hon. the Minister of Public Works up to 12 o'clock noon of Wednesday, the 24th day of July, 1912, for the erection and completion of a large one-room frame school-house at North Kelowna, in the Okanagan Electoral District, B.C.

Plans, specifications, contract, and forms of tender may be seen on and after the 3rd day of July, 1912, at the offices of J. S. McKenzie, Esq., Secretary of the School Board, Kelowna, B.C.; the Government Agent, Vernon, B.C.; and the Department of Public Works, Parliament Buildings, Victoria.

Each proposal must be accompanied by an accepted bank cheque or certificate of deposit on a chartered bank of Canada, made payable to the Hon. the Minister of Public Works, for the sum of \$225, which shall be forfeited if the party tendering decline to enter into contract when called upon to do so, or if he fail to complete the work contracted for. The cheques or certificates of deposit of unsuccessful tenderers will be returned to them upon the execution of the contract.

Tenders will not be considered unless made out on the forms supplied, signed with the actual signature of the tenderer, and enclosed in the envelopes furnished.

The lowest or any tender not necessarily accepted.

J. E. GRIFFITH,
Public Works Engineer,
Department of Public Works,
Victoria, B.C., June 29th, 1912.

District Exhibits at Vancouver Fair.

An Opportunity For This District.

District exhibits from all parts of British Columbia will be a strong feature of the Vancouver Exhibition which is being held from August 10 to 17. The management is making a strong bid for these feature displays, and to induce the agricultural districts to show their capabilities they have endeavored to be as liberal as possible with the prizes, so that the different agricultural societies and organizations are expected to take advantage of these handsome offers and use every endeavor to make a creditable showing.

For the best district or agricultural display of fresh fruits, preserved syrups and jellies, grains, agricultural seeds, roots and vegetables for the table, forage plants, dairy products, roots and vegetables for stock, and the perfect arrangement of the exhibit, a first prize of four hundred dollars is offered, also a diploma, the winning of which will practically point to that district as supreme in the Province of British Columbia in the growing of the above products. A second prize of three hundred dollars, and a third of two hundred, with diplomas in each case is also offered. Districts or societies which have not won a prize before will be assisted to the extent of one hundred dollars towards the expense of collecting and making up the exhibit.

The highest possible number of points which can be obtained in the judging is 2,000, divided as follows:

Fruits, fresh,	300
Fruits, preserved, syrups and jellies	200
Grains and Agricultural seeds,	250
Roots and Vegetables for table,	250
Forage Plants	250
Dairy Products	250
Roots and Vegetables for stock	250
Arrangement	250
Total,	2,000

For the information of exhibitors it was decided that the dairy products (250 points) should be described as follows: butter, 100 points; cheese, 60 points; bacon, 40 points; honey, 30 points; and eggs 20 points.

In grains and agricultural seeds it was decided that the amount exhibited should not be less than 25 lbs: each of wheat, oats, peas, rye, barley and corn, and that for grass seed and clover, in bottles, the amount should not be less than one pint.

Entries for the above class must be mailed to the General Manager, H. S. Rolston, 424 Pacific Building not later than July 15. All districts intending to compete should send in their entry early so that the proper allotment of space can be made.

For individual exhibitors the number of prizes for plate displays has been increased, and a better opportunity for fruit growers who specialize in certain varieties presents itself.

THE UNION JACK.

"Canadian Defence" says: It is gratifying to notice in the columns of the daily press that the Colonial Secretary has issued an official statement regarding the use of the flag. The people of Canada have, by usage, acquired the idea that the red ensign with the coat-of-arms in the fly is the particular property of our people. This is a mistake. The Union Jack is the one and only flag that a British subject is entitled to use on land. It is the flag of the British Empire. It is the flag that represents the strength and unity of that empire. It is the flag that embodies in its composition the best traditions and history of our race. It is the flag of freedom, of equal rights before the law, of justice, of civilization, and of humanity. It represents the highest ideals of civilization, the noblest aspirations of the Anglo-Saxon race and the strength of purity and truth. It is an honor for us to be privileged to use such a flag. No higher honor can be bestowed on any citizen in the whole world.

The red ensign which is seen most frequently in Canada is the special flag of the Canadian merchant marine, and it is out of place when used on land, except for decorative purposes. It may be used with a number of other British flags, such as the white ensign, the blue ensign, or flags of the merchant marine of other dominions in decorating interiors for some special occasion, but it should never be flown from a jack staff on land.

"My GURNEY OXFORD jumped right in and helped with my housekeeping"

Dear Edith,

In a general way I have wished you all the good things I know of, so now I am going to descend to the practical and give you some sound advice from the store I have accumulated since I started housekeeping.

Housekeeping naturally suggests the kitchen first—its equipment and management, or in other words, THE RANGE

My range, as you know, is a Gurney-Oxford. I never enjoyed much of a reputation as a cook in my younger days, so when I thought of being responsible for three meals a day my heart sank. I imagined myself battling all day with a sulky range, trying to coax it into a good humour, and covered with mortification because of late or spoiled meals. But my dear, my Gurney-Oxford seemed to sympathize with my inexperience. From the day it came it

jumped right in and helped. It has become my good right hand, and I go my way confident that my Gurney-Oxford will not disappoint me.

It has the cleverest arrangement for regulating the drafts, well named the Gurney Economizer. One small lever put up or down does everything. The fire will stay in all day, hardly burning any coal at all—then, presto! It is burning brightly, ready to bake or roast. An arrangement of flues keeps the oven always properly heated, so that the biscuits or bread come out light and crisp and brown. Yes, Edith, as Bob says, I have developed into "some cook," and I often tell him he must give at least half the credit to our Gurney-Oxford.

You will understand my enthusiasm better after you have had your Gurney-Oxford a month or so.

Sincerely Yours,

MARY HOUSEWIFE.

THE MAN WHO SAVES YOU \$

(Continued from Page 1.)
Mr. Wilson, of Balcom, waited on the Council pressing for a road to his property that had been promised for some time. He pointed out that at the present time he was without road connection, his property being accessible for a team only through the favor of an adjoining owner. Superintendent Mitchel will take this matter in hand.

AN UNUSUAL PETITION.

A new departure in petitions was presented by Messrs. C. W. Haddrell and W. Ritchie. The document was signed by property owners in the two townsite blocks at West Summerland, and revealed the fact that two enterprising celestialists from the Flowery Kingdom wish to start a laundry in that section. Up to the present they have not been successful in inducing anyone to sell them land for this purpose; but the petitioners pointed out that in the course of time they might succeed in purchasing, and if their business was once established, it was probable that surrounding property would deteriorate in value. The petition asked that the Council enact preventing the Chinese from establishing.

The Clerk read statutes covering the question, showing that while the Council could regulate the situation and operation of laundries, they could not discriminate against nationality. To prohibit a Chinese laundry would be to prohibit any laundry.

H. J. Fenner's complaint regarding the domestic water in the hospital building will be looked into by the Superintendent and Coun. Robinson.

DELINQUENT TAX SALE.

The Collector advised that the time was at hand for the annual sale of land for delinquent taxes. A motion was passed that the Municipal Collector be instructed to proceed to sell all lands on which the taxes have been delinquent since the 31st of December, 1910, said sale to take place at the Municipal Offices, West Summerland, on the 30th September, 1912, at 10 a.m., unless said taxes are paid with all costs prior to that date.

By law No. 40, fixing the current tax rate at 12 mills, was finally considered and adopted.

Before the meeting closed the Clerk brought up three matters of more or less moment. He suggested a readjustment of the bounds of Wards 3 and 4, by taking block 3640 from the former and adding it to the latter. Ward 3 had an assessment well in excess of the other wards and this would balance up the figures. Any adjustment must be made prior to the revision of the Voters' List in November.

The other two matters were the damage to the property of Mr.

Kaleden Comments

Mr. and Mrs. Pitman with their infant son left for Penticton during the week.

The ranchers are busy with the second cutting of alfalfa, and report a very good crop.

Now that school has closed, Miss Purdy has gone East, to the regret of her many friends.

Mr. and Mrs. M. C. Henderson, with their children, went up on Monday's boat on a visit in Penticton.

Mr. Tavendale left this week for Penticton, where he will be engaged for some time in the painting of the new C.P.R. hotel there.

The Mission Band, under the leadership of Miss Annie Findlay, held a most enjoyable picnic on the lake shore last Thursday afternoon.

Mrs. Seaman Hatfield with her son, Harley, arrived home from Nova Scotia on Sunday evening last, after an absence of three months.

Mrs. W. R. Rourke and son, from Vernon, spent last Saturday at the Hotel with Mr. Rourke, and expect to return shortly to take up their residence here.

Mr. J. C. Findlay with several friends drove to Penticton on the 9th inst., to be present at the service of induction for Rev. Chas. Britton, the new pastor of the Penticton Baptist Church.

Mrs. A. B. Williams, who has been the guest of Mrs. J. Lock for a few days, returned on Wednesday evening to her home in Summerland. Miss Williams is remaining until the end of the week.

Male, Peach Orchard, caused by the recent bursting of a water main, which will be investigated; and the replacement of lost dog tags.

THE NEXT examination for the entry of Naval Cadets will be held at the examination centres of the Civil Service Commission in November 1912; parents or guardians of intending candidates should apply to the Secretary, Civil Service Commission, Ottawa, for entry papers before 1st October next.

Candidates must be between the ages of 14 and 16 on 1st JANUARY, 1913.

Cadets are trained for appointment as Officers in the Naval Service, the course at the College being two years, followed by one year in a Training Cruiser, after which Cadets are rated Midshipmen.

Further details can be obtained on application to undersigned, G. J. DESBARATS, Deputy Minister of the Naval Service, Department of the Naval Service, Ottawa, May 6th, 1912.

je28 jy 12 20

Wm. Angove and Corporal Gordon Ritchie. No. 4, the Ram Patrol, has for its leaders Leighton MacLeod and Volney Merrill.

The camp site is the same as last year and is well located on the Creek bank, with an abundance of pure water, and with a splendid bathing beach nearby. There are seven tents, including a hospital tent and a guard tent, a splendid tent, kindly loaned for the purpose by Carlson & Co.

Two guards, two cook's helpers, and two milk boys are appointed each day. Harvey Phinney is mounted dispatch carrier, and Edward Logie is camp doctor, with Allan Harris as assistant. So far some minor casualties are reported, but the Hospital Corps would have little to do were it not for the prevalence of a malady known as mosquitoitis. This bacillus disease, communicated by a well-known stinging insect of parasitical instincts, is much milder in form than was anticipated at first and hardly any discomfort has occurred.

Reveille sounds at 5.30, with a bathing parade at 6, drill at 6.30, breakfast at 7. The day's program is varied and is occupied with signalling, tenderfoot examinations, study for 2nd class scouts, bridge building, drill and scout games with a second bathing parade at 4 o'clock, and a camp fire, stories and scout games in the evenings. Last Post, the finest of all bugle calls, is at 9 o'clock, with Lights Out at 9.30. As all the boys can swim this year, and playing with rafts is strictly prohibited, the bathing is conducted with due regard for safety.

Monday was an exciting day with all the adventures incident to the journey and pitching camp. The novelty tended to wakefulness, and there was little sound sleep the first night. Tuesday night the Camp Fire Tale was by Rev. C. H. Daly, who dealt with the history of fire. Wednesday saw the military bridge over the Creek complete. Owing to a defect in the work of the engineering corps, the bridge gracefully collapsed when tested, settling from its designed lines of beauty to utilitarian lines of flatness at the water level. In spite of this, however, free access was afforded to a splendid new bathing beach. Wednesday night, Rev. F. W. Hardy was to have led the Camp Fire with tales of Primitive Scouting by our native races, but just at dusk the railway contractors set off a big shot that seemed to let down the whole mountain towards Penticton. It was thought that an accident had occurred, and a picked corps made a forced march with first aid. It was found that the immense rock slide was caused purposely by a tremendous blast that shattered the whole hillside that has to be removed. It was a very tired but still excited crowd of boys who got home just in time for lights out. In spite of parched throats and feet blistered and full of cactus thorns, the returning boys eluded the guard and captured the camp.

Thursday was Visitors' Day, and a large number inspected the Camp, including Medical Officer Smith, who reported on sanitary conditions. The patrol leaders were a committee to arrange for sports for the day. These passed off well, Jno. Tait acting as starter, and C. N. Borton and F. W. Pattison as judges. Following is the program: Hop, step and jump—1st, Angove, 27 ft. 4 in.; 2nd, Darkis, 27 ft. 3 in.; 3rd, Phinney, 27 ft. 2 1/2 in.

Broad jump—1st, Logie, 11 ft. 9 in.; 2nd, MacLeod, 11 ft. 7 1/2 in.; 3rd, Phinney, 11 ft. 7 in.

100 yards race—1st, Gayton; 2nd, Kean; 3rd, Snow.

Three legged race—1st, Horon and McIntyre; 2nd, Phinney and Kean; 3rd, Ritchie and Elsey.

Relay race—1st, Beaver Patrol; 2nd, Wood Pigeon Patrol; 3rd, Crow Patrol.

Dress Race—1st, Merrill; 2nd, Phinney, 3rd, Arkell.

50 yards dash—1st, Jas. Ritchie; 2nd, Kean and Arkell (tie).

Swimming race, 50 yards—1st, Harris; 2nd, Angove; 3rd, MacLeod.

Swimming race, 100 yards—1st, MacLeod; 2nd, Hatfield; 3rd, A. Harris.

Undress race—1st, Merrill; 2nd, MacLeod; 3rd, Ross.

Swimming under water—1st, MacLeod; 2nd, Ross; 3rd, A. Harris.

Rev. H. A. Solly led the Camp Fire Story that night, and a surprise display of fireworks, concluded a big day of happiness for all the boys and their friends.

On Sunday a religious service will be held, conducted by all the resident clergy. Camp will break up on Monday, and, needless to say, the boys find the days passing all too rapidly.

NARAMATA

An Ideal Location for the Tourist. A Haven for the Homeseeker and Investor

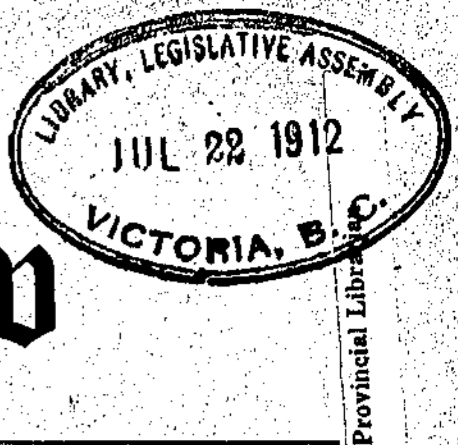

Start of Double Canoe Race at one of Naramata's Regattas

Take a trip to the Okanagan this summer and stop at Naramata. Got acquainted with this lovely Canadian Summer Resort. A splendid Tourist Hotel with every convenience overlooking the Lake is at your service. One summer spent in Naramata means every summer spent there until you finally conclude there is no real living anywhere else. Then a nice 5 or 10 acre fruit farm on the benches solves the question and makes you independent for ever afterwards.

Communicate with THE HOTEL NARAMATA for rates, and information regarding accommodation, amusements, etc. OR THE OKANAGAN TRUST CO., Ltd. J. M. ROBINSON, F. C. MANCHESTER, Manager, Agent, NARAMATA, B.C. SUMMERLAND, B.C.

DEVOTED TO THE INTERESTS OF SUMMERLAND, PEACHLAND AND NARAMATA

Vol. 4, No. 51

SUMMERLAND, B.C., JULY 19, 1912.

Whole No. 205

COAL DISCOVERED IN BANK OF TROUT CREEK

QUALITY REPORTED GOOD. DEVELOPMENT SOON.

Summerland, and with her the whole Okanagan district, is likely to be materially benefited by the recent discovery of a coal seam beside Trout Creek. Some weeks ago John D. Rice advertised in the Review his purpose of applying for a license for prospecting for coal in that vicinity.

For some time Mr. Rice has been busy on the claim which is a mile square, and is surrounded by the Commercial Orchards Co.'s property on Paradise Flat, and what gives very appearance of being a valuable seam has been opened up.

The coal is out-cropping some 300 yards, and a drift has been run in several feet by Mr. Rice. Beginning with a seam of 3 feet it widened to 5 feet after a few yards of excavation, and is of a blanket formation, covering, it is estimated, an area of several acres.

A sample of the coal, which is bituminous, was sent to Provincial Mineralogist Robinson, and he reports it to be of high quality.

Mr. Rice will not immediately go in for extensive development, but will await the completion of the Kettle Valley Railway. He has already secured a right-of-way from the railway line to the pit. When more development work is done it is probable that Mr. Rice will look for additional capital so that the proposition may be worked on a large scale.

This new find, together with the silver mine and several other mineral claims in that vicinity, promises great things for this district. The various miners are only waiting the advent of the railway to proceed with their work. With coal to smelt the silver and other precious minerals which are likely to be mined, prospects are exceedingly bright for the development of unexpected industries in our midst.

NARAMATA'S NEWEST INDUSTRY.

The Okanagan Carbonating Company commenced operations in Naramata yesterday. The business has been established in a new and attractive factory located on the lake-front near the government wharf, and there has been installed the most up-to-date and efficient machinery for the production of carbonated beverages of every description.

The sanitary conditions are ideal, and cleanliness in every department is being carried to an extreme. All the water used in the preparation of the syrups and for the washing of the bottles and utensils passes through a system of filtration that insures absolute purity.

The proprietors, Messrs. F. L. and G. R. Roe have secured at considerable expense the right to produce in Canada carbonated goods under the famous Stearns and Gordon process, and they claim for their products an exceptionally high standard of excellence. This office has been favored with a generous sample of the first goods produced, and personally we are inclined to think that their claims are justified.

Visitors are welcome at any time at the Naramata factory, and the proprietors will welcome every opportunity to demonstrate their methods of production.

FOR PICNICERS.

The Okanagan Lake Boat Co. are having built an especially constructed scow for picnics and excursions. This scow, which is expected to be ready by the 25th of this month, is 40 ft. long by 16 ft. wide. There is a substantial railing all round the deck. At one end there will be a portable counter for the dispensing of refreshments, at the other provision will be made for a band. The "Maude Moore" will be the motive power.

The latest proposition is for the construction of a Tourist Hotel on the northern shore of Lake Skaha. Bathing facilities are good, and the beautiful surroundings should be an inducement to those who want to spend a pleasant and quiet holiday.—Penticton Herald.

PEACHES RIPE.

The peach season has begun. Some very fine specimens of this delicious fruit, of the Mayflower variety, have been on display this week in the window of the Review Office. These were gathered on Monday, July 15th, by Mr. Magnus Tait, in his orchard at Trout Creek. While not large they have every appearance of being excellent fruit. Mr. Tait expects to have Alexanders ready very soon, and with the advent of this variety the peach season will be well under way. Mayflower peaches ripens ten to fourteen days earlier than Alexanders.

ONLY SEVEN PASS.

The results of the urban high school entrance examinations are announced by the Department of Education. Miss Hazel McConnell, of the Victoria South Park School, with a total of 857 marks, ranks first in the province.

As His Royal Highness the Governor-General has not expressed his pleasure in respect to the number of medals which he intends to award, the announcement of the winners is deferred for the present.

The result for Summerland is not very satisfactory. The fact that the school year was much broken up no doubt largely accounts for this.

Examinations were conducted at the following centres:

	Number of Candidates	Passed
Armstrong	29	21
Chilliwack	45	37
Cumberland	18	6
Duncan	31	10
Enderby	17	5
Golden	7	2
Kamloops	30	24

Vancouver, South	104	76
Vernon	24	19
Victoria	231	170

Total 1765 1206

Summerland—Edith A. Bristow, 649; William G. Ritchie, 623; James H. Ritchie, 571; Gordon C. Campbell, 562; William E. Gallagher, 550; George E. M. Logie, 550; Margaret Ritchie, 550.

Penticton—Irene A. H. Huntley, 761; Victor F. Gow, 701; Constance M. Kinney, 685; Roderick C. Bird, 659; Margaret R. Layton, 652; Mildred J. DeBeck, 589; Anna J. McKenzie, 588; Wilfrid F. Roberge, 579; Mary P. Gignac, 561; Valerie M. Gignac, 550; Jessie M. McConnachie, 550.

IRRIGATION EXPERT HERE.

Dr. Samuel Fortier, Chief of Irrigation Investigations, United States Department of Agriculture, who, with his assistant, Mr. W. H. Grinsky, are investigating the subject of water administration in the province for the British Columbia Government, paid a visit to the Okanagan this week.

Dr. Fortier, who is recognized as one of the foremost irrigation experts on the continent, was greatly impressed with the Okanagan as a fruit growing centre, as well as with the excellence of the irrigation and water systems installed in the Valley. The up-to-date methods of cultivation, modern irrigation practice and splendid road systems also came under his favorable comment. In these respects, as well as in its scenery and general climatic conditions, Dr. Fortier considers that the Okanagan has many advantages over California, and others of the older settled fruit districts of the United States.

Dr. Fortier is to be one of the prominent speakers at the convention of the Western Canada Irrigation Association, to be held in Kelowna, August 18th to 16th.

Wise men make more opportunities than they find.

R. H. AGUR DEAD.

SUMMERLAND SUFFERS LOSS OF VALUABLE CITIZEN

THOUGH AILING, DEATH CAME SUDDENLY AND UNEXPECTEDLY.

The news of the sudden death of R. H. Agur, which spread rapidly through the community Tuesday morning, came as a great shock. But few were aware that he was ailing, and still fewer that he had returned home from an extended business trip. Though not in the best of health for some time, no serious result from his ailment was anticipated. Last week Mr. and Mrs. Agur spent a few days at Long Lake, the guests of Mr. and Mrs. Kidston, and while there Mr. Agur was suffering considerably. They reached home on Sunday's boat. Mr. Agur was feeling quite ill when he arrived, and, in fact, had had medical attendance on the boat to relieve his suffering. On Monday night he became worse, and expired early Tuesday morning.

Although born in Ontario, Mr. Agur was really a Western man. For some years he resided in Winnipeg, and was manager for the three prairie provinces for the Massey Harris Company. His able management of the business of that concern in the early days on the prairies is largely responsible for the strong position now held by that company. He was one of the best known men in the West, and had a wide connection with men of large business interests.

Mr. Agur came here in 1905 and early made his influence felt in his quiet way for the good of the community. He was one of the members of the first Council Board of the Municipality, and was Reeve during 1909 and 1910.

It was not long before Mr. Agur occupied a prominent place among the fruit growers of British Columbia, and through his death the province suffers serious loss. He was president of the British Columbia Fruit Growers' Association, and it is largely owing to his tact and exceptional business ability that this organization now holds its present important position. He was associated with Messrs. Ricardo, Kidston and others in the promotion of the Okanagan Fruit Union, of which he was a director.

Mr. Agur was a man of reserve; and though he accomplished much, little was heard of his work. Time only will reveal the loss the fruit growers and the community has suffered through the cessation of his activities. Upright and con-

scientious in all his actions, his recognized business ability won for him the respect of all who knew him. Being able to meet on a par with our leaders in business and political life, he frequently placed before them the needs of this young and growing community, achieving results that might otherwise have taken years to accomplish. Among his latest achievements are the excellent facilities here for fruit packing, the reduction of freight and express rates, and, we believe, the promised pre-cooling station for Summerland is largely due to his influence.

In addition to his holdings here he has large interests at the Coast and throughout the prairies. Mr. Agur leaves a widow and four sons, Allen, Eric, Athol and Philip, all at home, to mourn their loss, and to them goes out the sincerest sympathy of the residents of the community in this their hour of deepest affliction.

The funeral was held on Thursday afternoon, and was very largely attended. It was preceded by a private family service at the house. The public service was held at St. Stephen's Church, Rev. H. A. Solly officiating. The pall bearers were Colonel Cartwright, Reeve C. J. Thomson, Major Hutton, R. H. Helmer, Adam Stark and James Ritchie. Large floral wreaths were sent by the Reeve and Council, the Over-Seas Club, the Board of Trade, J. M. Robinson, A. D. Adamson, Miss Higgin, and others. The Municipal Council and the Board of Trade each attended in a body.

The procession, which was the largest funeral procession ever seen here, was made up in the following order: Clergy, Municipal Council, Pall Bearers, Hearse, Mourners, Employees of the Summerland Supply Company, of which Mr. Agur was president, his employees, Board of Trade and the general public.

After the service at the Church, the procession proceeded to the Anglican Churchyard, where interment was made. Among those present from outside were W. C. Ricardo, manager of the Coldstream Ranch, Vernon; G. A. Henderson, District Manager, Bank of Montreal; and John Kidston, managing director, Okanagan Fruit Union.

HON. PRICE ELLISON ILL.

Hon. Price Ellison, Minister of Finance and Agriculture, was hurriedly taken to Vancouver on Monday night from Kamloops on the supposition that he was suffering from appendicitis. He has so far recovered that he expects to leave for Victoria on Wednesday.

When the minister arrived in Vancouver it developed that his ailment was not appendicitis, but a short rest was ordered, and he remained in the Bute Street Hospital for some time.

THE BOY SCOUTS.

The Boy Scout Council met at the office of C. N. Borton last night and discussed future plans for that organization. The work will henceforth be more equitably divided among the members of the Council, and will be somewhat as follows: C. N. Borton will be instructor for the Bugle Band; Dr. Smith will give lessons in First Aid; A. Bentley will be Signal Master, with patrol leader Turner as assistant; Jno. Tait and Geo. Ross will be teachers of scout games, compass work, knot tying, etc. R. Pollock and A. W. MacLeod will instruct in military and physical drill.

Mr. James Conway brought to this office this morning (Friday) some samples of early apricots which he gathered in his orchard.

Out of respect to the late R. H. Agur, the Union Sunday School picnic arranged for last Thursday was postponed. Announcement of the new date will be made later.

PROMINENT C.P.R. OFFICIALS IN SUMMERLAND.

A number of C.P.R. officials are touring the Okanagan this week on the steamer York. They called at Summerland on Tuesday morning. Among the party were A. E. Stevens, of Vancouver, Assistant General Superintendent, and also in charge of transportation; T. Kilpatrick, Divisional Superintendent at Revelstoke; J. C. Gore, Superintendent of Steamers, Nelson; F. W. Stirling, Travelling Freight Agent, Vancouver. These gentlemen were here to investigate the crop conditions, being interested, of course, in the transportation of it. They were taken over a considerable portion of the district by Mr. James Ritchie, and pronounced themselves as greatly delighted with the conditions here.

Very complete arrangements to ensure the expeditious shipment of the fruit crop of Okanagan Valley, which promises to be a record one, will be adopted by the C.P.R., according to Mr. F. W. Peters, general superintendent of the British Columbia division. Mr. S. W. Sterling, freight agent, and Capt. Gore, superintendent of the lake steamer service, are now on a visit to the various fruit-growing centres in the valley to ascertain the exact requirements.

The company will soon have ample facilities provided to ship fruit to the various markets without a moment's delay. The barge service on Okanagan Lake will also be increased during the rush which is confidently predicted.—Province.

NEW SUB-DIVISION.

"Victoria Gardens" is the latest Summerland sub-division, and comprises a very fine ten acre orchard directly north from the Central School and at the foot of the hill leading up to Jones Flat. This property has been held for some time by T. G. Marcham, a former resident of Summerland, and a partner, a citizen of Victoria. Mr. Marcham is now also a resident of Victoria, but has been here for some weeks, and has had the property surveyed and cut into good sized building lots. Allowance has been made for a road directly across the property, and the plot has been divided into thirty-three building lots of a little over a quarter of an acre each. The lots run from 61 to 66 feet frontage with a depth of 165 to 198 feet. The property thus divided and lying as it does in close proximity to the business centre of West Summerland, makes an admirable place for homesites and the lots are rapidly being taken up. Before the property had been surveyed and blue prints made several lots were spoken for. Among those who have already purchased are the Presbyterian Church, who have bought a corner lot for a manse; Ed. Butler, who has bought the opposite corner, Alex. Smith, Thos. Beavis, Jas. Smith, David Thompson and J. N. Merrill. Some nine lots have already been sold. Mr. Marcham says that he has put such a low price on these lots that they may be immediately re-sold at a good profit, the lots being larger than two of the ordinary lots, and the price so low, or lower than is usually asked for a twenty-five foot building lot. He believes that the lots will be reselling within a few weeks at not less than \$500 each.

Fifty dollars is the amount asked for first payment, and a similar amount falls due a year later. Mr. Marcham has an advertising scheme that will relieve any active purchaser of the necessity of making the second cash payment. His advertisement will be found elsewhere in this issue. Mr. Marcham may be seen any evening on the property.

Athol and Phillip Agur, youngest sons of the late R. H. Agur, had a long and adventurous tramp last week. They have been attending school at Victoria, and on leaving there, purchased tickets to Hope. There they left the train and started on a cross-mountain tramp, spending some six days tramping over the Hope mountains, across the Nicola Valley Country, and over the range between the Okanagan and that Valley.

Two members of the staff of Crehan, Mount & Co. auditors, paid the Municipal Office a quarterly visit early this week to make the regular quarterly audit.

Among those who registered at Hotel Summerland this week were Hamilton Lang, Vernon; Grant Lang, Peachland; Mrs. Clingan, Virden, Man.; Mrs. Clingan, Toronto, Mr. and Mrs. W. J. Wilcox, Salmon Arm. The last named are former residents of Summerland.

DOES OK. TELEPHONE CO. MEAN TO BUILD?

ANOTHER BROKEN PROMISE.

The Okanagan Telephone Company, in its renewed or continued effort to buy out the Government Telegraph service in the Okanagan Valley, is not acting at all in accordance with the promises made by some of its directors while touring this district some months ago. The Review learns from good authority that the company have all along been making representations at Ottawa intended to discourage the Government's continuance in the business in this district. At the same time repeated rumors, evidently originating with the company have been given out by persons connected with them that they intended to proceed with the erection of a trunk line, and that cable, wire, etc., had already been ordered, and work would begin shortly. Whether these are facts or another bluff to have the Government withdraw from the field remains to be seen.

In view of the fact that the Government is extending its telephone system here and throughout British Columbia, it does not seem at all probable that they will withdraw from this district, especially in view of the fact that there is good business for the extension of the telegraph service to which the government is connected.

At the present time the government telephone system is being extended west from Kamloops to Wadhachin, and it is the intention to build in the Kootenay, running from Kootenay Landing up the east side of the Lake, crossing at Balfour and up to Nelson. Later this line will be continued to Robson and up to Edgwood at the head of Fire Valley. This will be a good opening to Lumby, where connection will be made with the Okanagan system.

Judging from the volume of business done in the southern Okanagan district, we do not think there is much likelihood of the Government having competition, especially as nearly all of the receipts are from telegraph messages. As near as we can learn the annual receipts at Kelowna, Summerland and Penticton total about \$100 per month, and of this \$80 is for telegraph messages. The Government telegraph line will soon be extended, thus relieving the telephone line of a greater portion of the business. The Okanagan Telephone Company, if it built a trunk line, would either have to do the business at a loss, or materially increase the rates; and we are not disposed to think that they have any intention of taking up a losing proposition.

That the Okanagan Telephone Company have gained the day in Kelowna and Penticton is not at all certain. The latest report is that while the agreement drawn up between the Company and Council has been ratified, it had not been signed and delivered; and there is such a popular objection to the agreement, that it may not be. Kelowna is also said to be ready for a fight if any hostile move is made to cut in on the Government business.

TWENTY TONS OF CHERRIES.

This week will likely see the end, or nearly the end, of the sweet cherry season. Early this week the total amount of cherries shipped from here by the Okanagan Fruit Union was something over two thousand crates, in addition to a few shipped in ton lb. flat boxes. This will mean a shipment of about twenty tons of cherries by the Fruit Union alone. There have been quite a few cherries shipped by private individuals to Vancouver, Calgary, and to private customers at other points. This season's total is greatly in advance of that of any previous season.

Prices in prairie markets have not been any too satisfactory, there being an abundance of cheap fruit from across the line. It is probable, however, that our growers will not soon get eight cents per pound, and according to Manager Lawlor, this is a very satisfactory price, as he says five cents per pound net is considered good by California cherry growers. The profit lies in the quantity.

THE HOME CIRCLE.

Crude Thoughts From the Editorial Pen.

GOOD breeding is like affection; one cannot have too much of it.

TO BE WILLING to take trouble is the great condition of being useful to others.

THERE is always a ray of light to pierce our gloom, if we will not close our eyes and refuse to see it.

THERE are a great many things in this world that we are not sure of but there is one thing we may be sure of—"Be sure your sins will find you out."

WOMEN are the majority in the church on earth, and it is reasonable to suppose they will be three-fourths of the population of heaven.

WOULD that our busy toilers could realize that they must enjoy passing days, if they would be happy. The pleasure to which they look forward seldom comes. The man or woman who has not learned contentment and how to find delight in the present, has little reason to expect it in the future.

BE CONTENT to do the duty that lies nearest you, and look not to man for praise and approval. 'Tis not so much what to do as what we are, and as to "what we are" we speak most forcibly through our actions; but we cannot act unless there is something within that impels us to action. We are touching our fellow beings on all sides. They are affected for good or evil by what we say and do, even by what we think and feel.

MANY in their great anxiety for gain undertake too much and work like slaves to accomplish it, only to find at the end of the year they have gained little by it. Think more and work less. Life is short and it was meant that you should enjoy it. Are you fretted and despondent? Then rest. Take more sleep; have a holiday. Get cheered up and cheer up those about you. While your life should be a busy one let it also be a happy one. Do not undertake too much. Be not too anxious. Be cheerful, truthful, hopeful and contented.

SUCCESS AND FAILURE.

Energy, temperance, perseverance and sound judgment will enable any man to gain a competence, or even more, but this spirit having once seized upon a man, needs wise control, for it will not willingly loose its hold. It drives him on and on. So many paths are open, so much is to be done, such rare prizes are in sight. No wonder the brain grows heated, and the determination to rise higher fixed.

Many succeed—so many that it furnishes example and spur to multitudes of others. But by far the larger number are only partially successful, while not a few fail altogether. Failure, or partial failure, may be due to things one can or cannot control—to foolish investments, gambling in stocks, extravagance, evil habits, or to ill-health, family sickness, the care of dependent relatives, or the fury of the elements. The result is a large number of overworked, soured, embittered lives. And the number is by no means all made up from the unsuccessful people. Many of the most successful, as the world counts success, become such by wearing out their own bodies and brains, and often those of their wives and children. How many men reach the point where they mean to enjoy life only to find that the physical and mental power to do so is gone. Enjoyments come to them too late.

A WORD TO HUSBANDS.

Love and appreciation are to a woman what dew and sunshine are to a flower. They freshen and brighten her whole life. They make her strong-hearted and keen-sighted in everything affecting the welfare of her home. They make her cherish her husband when the cares of life press heavily upon him; and to be a very providence to her children. To know that her husband loves her and is proud of her and believes in her; that even her faults are looked upon with tenderness; that her face, to one at least, is the fairest in the world; that the heart which is to her the greatest and noblest, holds her sacred in his innermost recesses above all other women, gives a strength and courage and energy and sweetness and vivacity which all the wealth in the world could not bestow. Let a woman's life be pervaded with such an influence, and her heart and mind will never grow old but will blossom and sweeten and brighten in perpetual youth.

LATEST PICTURE OF BORDEN.

The recent change of government has made R. L. Borden the central figure of our Canadian public life. Many would like a good picture of him. We can supply one FREE. We will send anyone our paper for one year, and the Weekly Mail and Empire, (the regular rate of which is \$1.00 per year), for the same period, the two together, to include the free picture of the new Canadian Premier, for \$2.50.

The Borden picture is on fine paper suitable for framing, in photo tints, 18 x 24 inches, and is in itself as a work of art, easily worth the price of a year's subscription to either paper.

Send all orders to the office of The Summerland Review.

COCOANUT PUDDING.

Take three ounces of desiccated cocoanut and sugar and two and a half teaspoonfuls of bread and crumbs. Mix together in a pie dish with a pint of milk. Then beat up two eggs and place on the top of the dish. Bake till brown.

WISHES.

Mary Wilder Pease.

Four-leaf clover in the grass, Tell me, do you bring to pass All the wishes good and true Little children ask of you?

Do your magic leaflets hold Secrets fairies must have told? I have wishes, one, two, three; Will you grant them all to me?

First of all, I want to know Where the first spring flowers grow. "Pilgrim buds," that, pink and shy, Hide away when I pass by.

My next wish, O clover dear, Grant to me when summer's here. Then I want so much to know Where the berries thickly grow.

My last wish, the best of all, To go nutting in the fall! And find walnuts, crisp and brown, That come gaily tumbling down.

Now my wishes for the year I have told you, clover dear. Please to grant them one and all. In the spring-time, summer, fall.

Transient Advertisements payable in advance.

Rates for Contract Advertisements furnished on application.

Copy for change of contract advertising must be in the hands of the printer not later than Wednesday noon to insure publication in the next issue.

In accordance with schedule of prices adopted throughout the valley, charges for advertising are now being made weekly. Heretofore when five issues were made in one month the result was a loss. By the new method customers are charged each week for just the amount of space used.

FRIDAY, JULY 19, 1912.

A LOSS TO SUMMERLAND.

DEATH HAS REMOVED in R. H. Agur a man in whose life, both public and private, was embodied the highest type of citizenship. As a community Summerland is the richer for the few years of his residence here. In that brief space our town has developed from a scattered, unorganized district into a stable and well-established corporate municipality; and in all the stages intermediate to this expansion, Mr. Agur is one of the few upon whom the chief responsibility rested. This was an onerous burden, but it fell upon capable shoulders.

The first few years of any organized community form the most critical period in its history. To the early constructive stages in the history of Summerland, when confidence, foresight and administrative ability were called for even more than at the present time, Mr. Agur gave liberally of his time and his wide public experience. To his energy, capability and enthusiasm we owe in large measure the unique position we hold to-day among districts of our kind.

Full scope for such experience as he had gathered could not be found locally. In his chosen sphere of fruit growing his influence was called into provincial and even national prominence. As president of the British Columbia Fruit Growers' Association his work became more extensive than in the local activities with which he voluntarily associated himself, but Mr. Agur characterized it with the same thoroughness that marked his local work. His efforts on behalf of the grower have been strenuous and well-directed, and crowned with success to a degree that again points to his fitness for service to the public.

Summerland has lost a citizen whose public record leaves his fellows indebted; whose private life is without reproach; one worthy of emulation.

LOVE THINE ENEMIES.

IT APPEARS to be considered the duty of the newspaper to boost and keep on boosting for the town and its business men, its institutions, schools, churches, etc., but how often do the residents of a town or community let themselves be heard boosting for the local paper? A local paper should boost for its town and its business men. It is its editor's duty, because the paper derives at least seventy-five per cent. of its support from home people of which it is a part. It is the duty of every man, woman and child within the municipal limits to stand stalwarts to their town, and to say a good word and do a good deed whenever an opportunity presents itself and in this a newspaper should ever be found in the front ranks with such a band of town boosters. As has been said, a newspaper gets much of its support from the town and the community, and thus in return owes its support to the town; but what can be said of the printer may be said of the grocer, the butcher, the clothier and the restaurateur, the dry goods man, the tailor, and any other who may come to mind. You owe a debt of gratitude to your fellow merchant for being here: for what would the place amount to with only one business house? What would there be here to attract people and induce them to build comfortable homes, pay taxes, etc?

The merchant has much of his stock shipped in, yet a good portion of his trade is in that which he has purchased from the farmer or the gardener, thus deriving the patronage of everyone. The farmer gives his patronage to the merchant, and the merchant to the farmer. Each is enabled to make a profit and all is serene.

Yet there are merchants who will not patronize each other, who will send away their printing, hardware, groceries, furniture, harness, drugs, etc. Some even walk rather than give the local liveryman his fee. This is not all though, for the merchant complains that the farmer buys goods in some large city and will not spend the cash he has earned here with local people. It's a sad condition of affairs with a cure hard to find. One merchant states that the trouble is an easy one to overcome if all will unite in a determined effort to make their place and conditions ideal; co-operate, and ever boost and work for one another. Let us, one and all, make it a resolve to help our neighbor, advertise our municipality, and, in fact, co-operate in every manner possible.

If we will but love our enemies they will soon cease to be such, and in the end prove our most faithful friends.

OUR SUMMER SHOWERS.

THE South Okanagan country is having, up to the present at least, an "unusual" season. Its "unusual" weather, however, is not "bad" weather—that would not be possible in the sunny Okanagan. As a matter of fact, the season is none the less pleasant because of the "unusual." Its only sin of transgression lies in its treating us to occasional delightful showers, delightful in their freshness and delightful in their more frequent recurrence.

Why are we getting these occasional showers in what is usually the dry season in the "dry belt" is a question asked by many, one that is being generally discussed, and a number of different reasons for the change are put forth. None of these, however, carry with them sufficient proof to satisfy.

Perhaps the most frequently offered and generally accepted theory is that the showers come because the railway builder, with his explosives, is here.

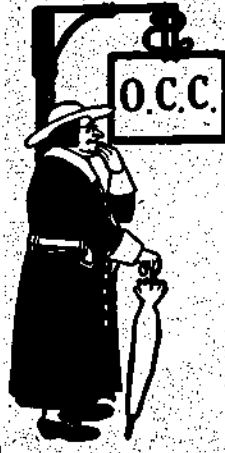

The attempt to produce rain by the use of explosives was made years ago and at one time the scheme met with considerable favor, and the governments of some of the European countries, and a few of the

Southern States carried out exhaustive experiments with the view to arriving at some reliable and practical way of bringing on a precipitation by explosives when at any time crops were in need of rains.

Coincidences of rain for a time gave this scheme some credence but further experiments soon proved its failure.

A recent attempt at Battle Creek to create rain by the use of explosives brings out the following from the Montreal Witness:

"Just how the belief arose that the firing of guns or the exploding of large masses of powder created rain, it is hard to say, though it is generally attributed to the coincidence of great battles with sudden showers. The idea has spread everywhere in the 'civilized world' and no end of attempts have been made from Austria to Alaska to force the atmosphere to yield its burden of moisture. Another attempt is being made at Battle Creek, the home of the faddist. There are two conditions that make for rain. One is cold and the other a lessening of the weight of the atmosphere. Hot air holds more moisture than cold air, and heavy air holds more moisture than light air. Were the gas that emanated from the explosion of gunpowder light and cold, they might be expected to have some effect. On the contrary, they are both heavy and hot, and are thus far better calculated for the use they are put to in Austria, of breaking up a hailstorm to save the vineyards than to that of precipitating rain. It would be a bold man, however, who would say that some day man will not be able to make rain. We know that the air is continually laden with moisture, and all that is necessary is to make the moisture collect into drops. We know that this is done by the snow capped peaks of the mountains, which in many cases produce almost continuous rain in their vicinity. It is not beyond possibility that means may be found of imitating this cooling process by the liberation of cold gases or liquid air. Whether it would ever pay is another matter."

Old Fashioned

ideas are out of date so we are not going to wait to become acquainted in the regular way but are going right after your friendship and your patronage.

We are going to use this space to introduce ourselves, and to tell you some interesting things about our business.

Hunt us up every week when you get your paper every week.

Local News Items. Local News Items.

Mr. and Mrs. J. M. Robinson returned on Monday from a trip to Victoria.

Mr. Rudderick Dominion Dairy Commissioner, paid this district an official visit this week.

Rev. H. A. Solly went across to Naramata on Sunday, where he conducted service in the Hall.

Mr. G. J. Coulter White, with two of his family, and friends, are enjoying an excursion to the lower lake this week.

Big stock of the famous Joseph Rodgers Superior Pruning Knives now to hand. The Summerland Supply Company.

Miss Gladys Limmer, Miss Blott, G. A. McLaine and Dr. Coulthard, were a launch party to Kaleden and return early this week.

T. C. Stinson and little son, Russell, went to Vancouver on Sunday morning last. Mr. Stinson is taking a two week's vacation.

Master Jack and Miss Marie, young son and daughter of Mr. T. J. Smith, are spending a few days with relatives in Summerland and Naramata.

Rev. H. G. Estabrook, Superintendent of Baptist Missions in British Columbia, spent last week-end here the guest of his mother. Mr. Estabrook, who had been in the Valley for a few days, returned to the Coast early this week.

Motor-boating from Summerland to Kaleden is now very popular, the high water in the river making the trip very enjoyable. Among others to make the trip this week were Messrs. A. Stark and Jas. Ritchie, in the former's launch.

One hundred thousand young trout, which were being shipped by the Dominion Government for the stocking of the southern end of Okanagan Lake, died in transport owing to a delay of six hours at Seacombs, where the water was not fitted to preserve them.

Last Sunday's Anniversary Services in the Methodist Church were well attended. Rev. J. H. White, D.D., who is well-known here, and who was largely instrumental in establishing the Methodist Church here, conducted both services, and delivered excellent addresses.

Mrs. Howard Hole has arrived here from Brandon, Man. Mr. Hole, who has spent a good deal of his time here during the last four years, has property at the foot of Giant's Head, between that of Messrs Pollock and Robertson. It is understood that Mr. and Mrs. Hole will now reside here permanently.

Mr. G. W. Morfitt's new launch, "Calgary" evidently came up to expectation, at least as far as speed is concerned. Recently it made a trial run to Penticton and return, and it is stated that on the return trip, with the canopy up and a number of passengers aboard, the journey was made in twenty-eight minutes. The distance is said to be nine or ten miles.

Mr. Alfred Richardson, the lumber merchant of West Summerland, has purchased a fine forty horsepower Case automobile from Geo. N. Gartrell. The Case Manufacturing Co. are offering a silver cup for an endurance contest from the Coast to Racine, Wisconsin for Case cars. Mr. Richardson intends to enter the contest and expects to leave for the Coast with his car at an early date.

We learn upon good authority that several tons of potatoes are being shipped here for consumption in the railway camps, notwithstanding the fact that there is a larger crop of potatoes in Summerland than usual. The reason given is that local growers are asking a price considered prohibitive by the consumer. In some cases four cents per lb. is asked for the new crop. Shippers at the upper end of the Lake are quoting thirty dollars per ton.

Wanted.

WANTED—By young lady, room and board in private home. Address, stating rate per month, etc. to "Lodger," P.O. Box 168, Summerland.

WANTED—Apple boxes, job lot wanted cheap; new or second hand, any number up to 500. Quote price Summerland wharf. Box 100, Summerland.

WANTED—Bright, intelligent boy or young man to learn printing. Apply Manager, Review.

Review Want and Sale ads. give Good Results.

Mrs. J. N. Merrill has returned from a trip to the Coast.

Mrs. Geo. Gartrell is visiting her former home in Vernon.

Miss Beatrice Anderson, of Toronto, is visiting her aunt, Mrs. C. D. Anderson.

Inspector Thos. Cunningham and Dr. Bonquet went up to Vernon on Monday morning.

Miss Mildred Hardy, sister of Rev. F. W. Hardy, is a guest at the Methodist parsonage.

L. C. Woodworth, who recently bought the Harris cottage, has made an exchange with Ralph Kent for his ten acre lot near T. J. Garnett's.

Geo. Gartrell recently sold his Case touring car to A. Richardson, taking as part payment Mr. Richardson's seven horsepower motor cycle.

Mr. B. A. Moorhouse, C.E., of Penticton, has been for some days surveying Government property in the upper Trout Creek district near the Faulder property.

Dr. F. W. Andrew left New York on the 17th inst., and is expected to arrive home about a week hence. He will stop for a day or two in Minnesota on his way.

Rev. R. E. E. Harkness, late of Vernon, accompanied by his mother and invalid brother, Richmond, arrived in Summerland on Tuesday night, and are now occupying the Gairner cottage.

Mr. J. M. Robinson has placed his houseboat, the "Lily of the Valley" at the disposal of the committee at Kelowna for the accommodation of delegates to the Irrigation Convention in that city from August 13 to 16, both days inclusive.

Mr. S. Angove has purchased from Mr. H. D. Suckling a double lot between the residences of Dr. C. M. Smith and that of Mr. W. Limmer. Mr. Angove is having the lot cleared, but we have not learned anything definite of his building plans.

Will all those who are gathering up magazines for the camps please hold them for a few days. At the present time the camps are short-handed, and there is sufficient literature for all the men. Additions to the crews are expected shortly when all available literature will no doubt be needed.

At a general meeting of the Summerland branch of the Overseas Club held on Thursday evening, a resolution expressing the sincerest sympathy of the Club with the family of the late Mr. R. H. Agur in their bereavement, was unanimously passed by a standing vote, on the motion of Rev. H. A. Solly, who impressed on those present the great loss, which not only Summerland, but the whole of the Okanagan had suffered.

The Boy Scouts broke camp early Monday morning after a week brimful of wholesome pleasure. Quite a number of interested citizens visited the camp on Thursday, and the Church Service on Sunday was well attended. Mr. C. N. Borton, who had charge of the boys for the week, deserves great praise for the able and careful way in which he conducted the camp through what was doubtless a very happy week.

The Okanagan Fruit Union is this year operating at Penticton. They have engaged temporarily the Canadian Pacific Railway sheds on the old wharf and preparations are being made to handle the crop. The building has been altered somewhat to meet the needs of the fruit packing business, and a car of box shooks went down last week. It is reported that a fifteen thousand dollar packing house will be erected for the Union on the Kettle Valley Railway tracks near the end of Main Street, construction on which will commence within the next few weeks.

JOHN Mc MILLAN - - Manager

"Highly Recommended."

"I would certainly recommend that you get a Gurney-Oxford, Mary. Mother had one, and when I furnished my house, I got one. Every maid I ever had has been enthusiastic about the Gurney-Oxford."

"What are its good points?"

"Well, the best is that it cooks and bakes like a dream. I never tasted such golden brown biscuits or such flakey pastry as my Gurney-Oxford turns out, and roasts, fowls and puddings are always a success."

"Is it easy to operate?"

"My dear, it's simplicity itself. The Gurney Economizer, which you cannot get on any other range, regulates the fire simply by putting one small lever up or down. You never heard of anything so simple. And by a system of divided flues the oven is always uniformly heated. You know what that means—biscuits, bread, roasts, not one half overdone and the other half underdone, but properly done all through. Yes, my dear, you take my advice as I took mother's, and get a Gurney-Oxford Range."

Borton Plumbing & Heating Co.,
SUMMERLAND, B.C.

Naramata Notes.

Rev. H. A. Solly, rector of Summerland, conducted service here on Sunday last.

Mr. Rudderick, Dominion Dairy Commissioner, was here for a short while this week.

Mr. J. M. Robinson returned to town on Monday from a business trip to the provincial capital.

Mr. and Mrs. Saunders, of Edmonton, after a pleasant holiday season at our fashionable summer resort Hotel, left for home on Monday.

Can a man make a living on five acres? This is a question being answered in the affirmative by a number of ambitious ones here today.

Master Jack Smith and his sister, Marie, of Vancouver, came in on Monday with Mrs. Robinson their aunt, on a vacation trip to Naramata and Summerland.

It has been reported that there is a possibility of the mill north of town being moved this fall to a point much farther up the Lake, Short's Point, where the plant would be much nearer the base of supplies.

Mr. E. A. Dagg, of Calgary, accompanied by his wife and three children, spent their holidays here this year. Mr. Dagg owns a splendid orchard here and was delighted to see the splendid growth it had made in the two years of his absence.

Mr. Jack Lawler, of the Okanagan Fruit Union, Summerland, was over to see our fruit growers and interviewed practically every one who has any quantity of fruit to sell. The fruit is all bought and sold on a commission basis. The growers agree not to sell to any party outside of the town.

Three prominent officials of the western division of the C. P. R., Capt. Gore, Thos. Kilpatrick and Mr. Stevens, got off Tuesday morning's boat to have a look over the Naramata fruit lands with a view to ascertaining the requirements for transportation. It would appear that as soon as there is anything to ship in quantity from Naramata, the railway will be prepared to meet the demand. Already there is talk of a new wharf to be built somewhere along the north shore of the point, possibly in front of Third Street, with a slip back for cars as in other Okanagan towns.

RIFLE ASSOCIATION.

At the last of the Canadian Rifle League matches on Saturday, Summerland finished up with an average of 85 per man over the whole series.

Scores for the week:

	200	500	600	Total
F. Gartrell	32	33	25	90
F. J. Nixon	27	31	31	89
B. Steuart	31	31	27	89
M. Steuart	28	29	31	88
H. Dunsdon	29	29	29	87
G. Loomer	31	31	25	87
W. Nelson	33	31	21	85
W. E. Ward	29	24	28	81
J. Dunsdon	28	29	23	80

TWO RHUBARB RECIPES.

RHUBARB MARMALADE—Now is the time to make rhubarb marmalade, an inexpensive and delicious preserve. Cut about one pound and a half of rhubarb sticks into pieces two inches long, and put them into a preserving pan with one pound of loaf sugar broken small, the peel of half a large lemon, cut thin, and a quarter of an ounce of bitter almonds, blanched and divided. Boil the whole well, put it into pots and cover it in the usual way.

Some housekeepers make a very nice preserve with rhubarb and oranges mixed. The proportions are six oranges to a quart of rhubarb. The oranges are peeled, the white rind and pipe removed, and the pulps sliced into a steppan with the peel cut very small. These are then boiled with the rhubarb and a pound and a half of loaf sugar.

His Royal Highness the Duke of Connaught, Governor-General of Canada, is expected to visit the Southern Okanagan on October 4 and 5.

Provincial Constable John Tooth, whose residence is in Kelowna, was recently joined in wedlock to Miss Mary Kate Thompson, of the same city. Penticton friends offer their congratulations and good wishes to the happy pair.—Penticton Herald.

Kaleden Comments

Mr. Harris, of Penticton, will remain in charge of the nursery work here.

Mrs. Alex. Grieve, of Penticton, with her two children, are the guests of Mrs. Grieve in town.

Miss Jean Babbit was accidentally bitten by a dog last week while playing. The wound is only a slight one, and is progressing very favorably.

Mr. G. J. Coulter White, of Summerland, with Mr. Gilbert and Miss Margaret, arrived in town on Tuesday evening, and are staying at the Hotel.

Captain and Mrs. Hatfield, with Mr. and Mrs. A. Seaman Hatfield and son Harley, went up to Naramata last Saturday. Captain and Mrs. Hatfield will remain for a time on a visit to their daughter, Mrs. Lewis Block.

Among those registering at the Hotel during the past week were Miss B. Green and Mr. Webster, from Horn Lake; Messrs. Jones and Harris from Penticton; Mr. H. C. Turner, Government Commissioner of Roads; and Mr. Henry Nicholson, from Fairview; Miss Limmer and Miss Blott, from Summerland; Dr. Coulthard, Vancouver; E. H. McLaine, Victoria; Mr. C. Longhurst, Nelson; Mr. S. M. Holard, Toronto; W. H. Finsen, Oroville, Wash.; Mr. A. Stark, Summerland; Mr. Jas. Ritchie, Summerland; Mr. J. E. Weldon, from Alberta; Mr. Chas. T. Pebison, Oroville, Wash.

"THE CANADIAN HIGHWAY."

A book which is "somewhat different" has just reached the office of the Review. This is a publication issued by the Canadian Highway Association, and deals in an interesting way with the work accomplished by that body since its organization on November 3 and 4, 1911.

It contains an interesting mass of valuable information concerning roads, and road conditions, in different parts of Canada, but more particularly in British Columbia. The book is splendidly illustrated with photographs of road scenes and of scenes at the planting of the first post on the west coast of Vancouver Island. Photographs of President W. J. Kerr and his fellow officers add a personal touch to the work.

The mission of "The Canadian Highway" is to educate the public to the advantages of good roads, and anyone interested in this work may obtain a copy by addressing Secretary P. W. Luce, New Westminster, B.C.

The following extract will give Good Roads advocates an inkling of the contents of this book:

AIMS AND OBJECTS OF THE CANADIAN HIGHWAY ASSOCIATION.

To assist in having a Canadian Highway established from the west coast of Vancouver Island to Halifax, Nova Scotia.

To promote good roads.

To endeavor to get the connecting links of this road constructed as soon as possible by the different governments and municipalities through which this road passes. To have the Canadian section of the Pacific Highway, which runs from Tia Juana, Mexico, to the Alaskan boundary, completed.

An endeavor to have all public money expended on roads spent to better advantage.

To carry on a campaign of education in order to enlighten the people regarding the benefits to be derived from good roads.

To co-operate with the different governments with a view to bettering the standard roads for which federal or provincial grants are made.

To capitalize our climate and scenery in building roads that will bring tourists here from all parts of the world.

The world is a cradle, and God rocks it, and hears every cry and knows its need.

To clean bronze ornaments, rub with a soft flannel dipped in sweet oil. Polish with a soft duster, and then give a final rub with chamois leather.

Poultry droppings make an exceedingly rich manure which gives remarkable results in the garden. In order to utilize poultry manure economically it should never be put into piles and allowed to heat, but mixed with the soil as soon as possible. Try it for such crops as rhubarb, celery and cabbage.

A SNAP New Land

233 Acres on Okanagan Lake for \$12,000

THE MAN WHO SAVES YOU \$

DESTROYING THE MOSQUITO.

Every little bit helps towards the destruction of the mosquito pest, and the terrible torment who so disturbed one's slumbers may not have come from the great pond a mile away, but from the rain barrel in one's own back yard.

Two of the commonest household receptacles of water left about residences, and their destruction means the abolition of all such receptacles. Where the rain water barrel or the rain water tank are necessary they should be screened—a fine mesh wire being used.

About the house the waste places should be carefully searched for tin cans, bottles, wooden or tin boxes in which water can accumulate, and all such receptacles should be destroyed or carted away. The roof-gutters of the buildings should be carefully examined to make sure that they are not clogged so as to allow water to accumulate. The chicken pans in the poultry yards, the water troughs for the domestic animals, the water cup of the grindstone, are all places in which mosquitoes will breed, and in them water should not be allowed to stand more than a day or so at a time.

In the house mosquitos breed in

SYNOPSIS OF COAL MINING REGULATIONS.

COAL MINING RIGHTS of the Dominion, in Manitoba, Saskatchewan and Alberta, the Yukon Territory, the North-West Territories and in a portion of the Province of British Columbia, may be leased for a term of twenty-one years at an annual rental of \$1 per acre. Not more than 2,560 acres will be leased to one applicant. Application for a lease must be made in person to the Agent or Sub-Agent of the district in which the rights applied for are situated.

In surveyed territory the land must be described by sections, or legal subdivisions of sections; and in unsurveyed territory the tract applied for shall be staked out by the applicant himself.

Each application must be accompanied by a fee of \$5, which will be refunded if the rights applied for are not available, but not otherwise. A royalty shall be paid on the merchantable output of the mine at the rate of five cents per ton.

The person operating the mine shall furnish the Agent with sworn returns accounting for the full quantity of merchantable coal mined and pay the royalty thereon. If the coal mining rights are not being operated, such returns should be furnished at least once a year. The lease will include the coal mining rights only; but the lessee may be permitted to purchase whatever available surface rights may be considered necessary for the working of the mine at the rate of \$10.00 an acre. For full information application should be made to the Secretary of the Department of the Interior, Ottawa, or to any Agent or Sub-Agent of Dominion Lands.

W. W. CORY,
Deputy Minister of the Interior.
N.B.—Unauthorized publication of this advertisement will not be paid for.

many places where they may be overlooked. Where the water in the flower vases is not frequently changed mosquitoes will breed. They will breed in water pitchers in unused guest rooms. They will breed in pipes and under stationary washstands where these are not frequently in use, and they will issue from the sewer traps in backyards in city houses during dry spells in the summer time, where the sewers have not been recently flushed by heavy rains.

Old disused wells in gardens are frequent sources of mosquito supply, even when apparently carefully covered, and here the nuisance is easily abated by the occasional application of kerosene. The same thing may be said of cess pools.

NOTICE TO CONTRACTORS.

NORTH KELOWNA SCHOOL.

SEALED TENDERS superscribed "Tender for School-house, North Kelowna," will be received by the Hon. the Minister of Public Works up to 12 o'clock noon of Wednesday, the 24th day of July, 1912, for the erection and completion of a large one-room frame school-house at North Kelowna, in the Okanagan Electoral District, B.C.

Plans, specifications, contract, and forms of tender may be seen on and after the 3rd day of July, 1912, at the offices of J. S. McKenzie, Esq., Secretary of the School Board, Kelowna, B.C.; the Government Agent, Vernon, B.C.; and the Department of Public Works, Parliament Buildings, Victoria.

Each proposal must be accompanied by an accepted bank cheque or certificate of deposit on a chartered bank of Canada, made payable to the Hon. the Minister of Public Works, for the sum of \$225, which shall be forfeited if the party tendering decline to enter into contract when called upon to do so, or if he fail to complete the work contracted for. The cheques or certificates of deposit of unsuccessful tenderers will be returned to them upon the execution of the contract.

Tenders will not be considered unless made out on the forms supplied, signed with the actual signature of the tenderer, and enclosed in the envelopes furnished. The lowest or any tender not necessarily accepted.

J. E. GRIFFITH,
Public Works Engineer,
Department of Public Works,
Victoria, B.C., June 29th, 1912.
24.7.12.

Bargains for
OUR Subscribers

REALIZING that the Home Paper cannot fill all the need for Reading Matter, we have compiled a List of [in our opinion] the most helpful and practical Publications which we are offering our Subscribers in clubbing combinations, at lowest possible prices.

Following is only a partial list of such combinations:

BARGAIN No. 1

Vancouver Daily Province - \$3.00
Better Fruit - 1.00
The Review - 2.00-6.00
The three for **\$5.00**

BARGAIN No. 2

Canadian Courier - \$3.00
Canadian Horticulturist - .60
The Review - 2.00-5.60
The three for **\$4.60**

BARGAIN No. 3

Vancouver Daily Sun - \$3.00
Country Life in America - 5.00
The Review - 2.00-10.00
The three for **\$8.00**

BARGAIN No. 4

Canadian Horticulturist - .60
Canadian Poultry Review - .50
The Review - 2.00-3.10
The three for **\$2.70**

BARGAIN No. 5

The Busy Man's Canada - \$1.00
World's Work - 3.60
The News-Advertiser, Daily - 3.00
The Review - 2.00-9.60
The four for **\$7.00**

BARGAIN No. 6

Winnipeg Telegram (or Free Press) - \$2.00
B.C. Saturday Sunset - 2.00
Canadian Magazine - 2.50
The Review - 2.00-8.50
All four only **\$6.60**

BARGAIN No. 7

World Wide - \$1.50
Farmers' Advocate - 1.50
Free Press, Weekly - 1.00
The Review - 2.00-6.00
The four for **\$4.75**

BARGAIN No. 8

British Columbia Magazine - \$1.50
Toronto Mail and Empire - 1.00
Farmers' Advocate - 1.50
The Review - 2.00-6.00
All four for **\$4.50**

BARGAIN No. 9

Calgary Herald - \$3.00
Collier's (Canadian Ed.) - 5.50
The Review - 2.00-10.50
The three for **\$8.90**

BARGAIN No. 10

Vernon News - \$2.00
Toronto Saturday Night - 3.00
The Review - 2.00-7.00
The three for **\$5.85**

BARGAIN No. 11

Canadian Pictorial - \$1.00
Windsor Magazine (13 mos.) 3.25
The Delineator - 2.00
The Review - 2.00-8.25
The four for **\$5.75**

BARGAIN No. 12

Rod and Gun - \$1.00
Poultry Review - .50
Nor'-West Farmer - 1.00
The Review - 2.00-4.50
All four for **\$3.90**

BARGAIN No. 13

The Garden Magazine - \$1.85
Canadian Courier - 3.00
The Review - 2.00-6.85
The three for **\$5.75**

BARGAIN No. 14

Weekly Edition of either—
The Province -
Calgary Herald -
Winnipeg Telegram -
Winnipeg Free Press -
Family Herald and Weekly Star -
Toronto Mail and Empire (and Borden Picture) -
or
Montreal Witness - 1.00
Canadian Sportsman - 2.00
McLean's Magazine - 2.00
The Review - 2.00-7.00
The four for **\$5.40**

If none of these combinations suit you, make up one to your liking, and we will quote you a price on the selection.

We are also Subscription Agents for—

The Ladies' Home Journal - \$2.00 | Country Gentleman - \$2.25
Saturday Evening Post - 1.50 | The Fruit Magazine - 1.50
Successful Poultryman - .50

These Offers are for old or new Subscribers. If present Subscribers are in arrears it will be necessary to pay to date before these Bargains become available.

pect.

Peachland Notes.

Mrs. Holden visited Kelowna last
week.

Mrs. David Kirkby, of Pent-
icton, spent Wednesday at her moth-
er's, Mrs. M'Laughlin.

Dr. and Mrs. C. M. Smith, of
Summerland, were the guests of
Miss Minnie Smith last week.

Miss Olive Young left on Wed-
nesday morning to spend her holi-
days with her sister in Caron, Sask.

Mrs. Somerville returned from a
month's sojourn with her son at the
Coast, on Wednesday evening's
boat.

Mrs. Robt. Micheal, who has
been the guest of Vernon friends
for a week or two, returned home
on Wednesday evening.

Miss Retta Scott left for her
home in Caron on Wednesday, hav-
ing spent about six months with
her grandparents, Mr. and Mrs.
Chas. Young.

The cherry harvest is drawing to
a close. It certainly kept the pack-
ers busy early and late while it
lasted. Apricots and green apples
are plentiful now.

On Wednesday evening Rev. C.
W. Whyte, of Victoria, with his
sons, Gordon and Farrell, returned
to town where they will spend the
holidays, looking after their fruit.

Great preparations are being
made by the Aquatic Club for the
season's sport. Posters for Kel-
owna Regatta, August 7 and 8 are
out. The war canoe crews are be-
ing selected. The date fixed for
the home regatta is August 29th.

Mrs. C. G. Elliott and children
left on Thursday morning for Ed-
monton, where they will rejoin
Charlie at the Clover Bar Mine.
Mrs. Elliott was accompanied by
Miss Alice E. Elliott and Master
Ronald Elliott, who go to spend
their holidays.

A union meeting of the young
people was held on Monday even-
ing in the Baptist Church, when a
society was organized which we
hope may be alive to the interests
of all the young people, and which
will endeavor to promote a greater
friendliness amongst their number.

BRICKMAKING AT PENTICTON.

Brick making at Penticton is at
last an accomplished fact, the first
ever made on an extensive scale
having been burned this week on
the property recently acquired by
Mr. J. Winger, of Peachland, on
Fairview Avenue, near Penticton
Creek.

The clay, which was found by
Mr. Winger last winter, consists of
a bed forty feet deep, which on
being burnt, turns to a light
cherry red, the result of oxidized
iron. Mr. Winger shipped in
machinery about three months ago,
but was unable to burn his first
kiln consisting of forty thousand
bricks until this week.

The finished article has a clear,
bell-like ring when struck, is of a
close grain, and fire proof. They
have been made in two sizes, 8 1/2 x
4 1/2 x 2 1/2, and 9 x 4 1/2 x 2 1/2, which
are found to be the most servicable
for all building purposes. While
the brick is of the finest quality,
the price is lower than the same
class of brick made elsewhere. At
the present time outside brick is
being sold at \$17.50 per thousand,
while the home made article costs
\$15.00 per thousand. To the con-
tractor this may mean all the differ-
ence between profit and loss on a
contract.

Already several contractors and
others interested in building, have
visited the manufactory and ex-
pressed their surpriso at the quality
and cheapness of the brick. Mr.
Crowley, the contractor for the new
Penticton school, along with Trus-
tee McDonald, have also inspected
the brick, and were satisfied with
the quality. It is most likely that
the first brick school in the town
will, therefore, be built with Pen-
ticton brick. In this case, two
hundred thousand will be required,
and other contracts have been pro-
mised.

Mr. Winger has had seventoon
years experience in brick, tile and
pipe making in various parts of
Canada, but nowhere has he met
with better material for brick mak-
ing or tile work than the bed he is
now working.—Penticton Herald.

To preserve boots and shoes, be-
fore wearing them rub the soles
with bottled linseed oil every other
evening for a week. The oil hard-
ens the leather and prevents the
wet from penetrating through.

One gives nothing so liberally as
advice.

NARAMATA

An Ideal Location for the Tourist. A Haven for the Homeseeker and Investor

Start of Double Canoe Race at one of Naramata's Regattas

Take a trip to the Okanagan this summer and stop at Naramata. Got acquainted with
this lovely Canadian Summer Resort. A splendid Tourist Hotel with every convenience
overlooking the Lake is at your service. One summer spent in Naramata means every
summer spent there until you finally conclude there is no real living anywhere else.
Then a nice 5 or 10 acre fruit farm on the benches solves the question and makes you
independent for ever afterwards.

Communicate with **THE HOTEL NARAMATA** OR THE OKANAGAN TRUST CO., Ltd.
for rates, and information regarding accommodation, amusements, etc.

J. M. ROBINSON, F. C. MANCHESTER,
Manager, Agent,
NARAMATA, B.C. SUMMERLAND, B.C.

Experts Give Optimistic Addresses.

Emphasize Necessity of More Frequent and Thorough Spraying.

Conditions Here are Ideal for Fruit Raising. Comparative Immunity from Serious Pests and Diseases. Prospects Excellent for the Future.

A number of officials of the Provincial Horticultural Department were in town on Tuesday, and their visit was the occasion of the calling together of the members of the Farmers' Institute and others interested in horticulture. But a short notice of their arrival was received and many of the citizens were not aware of their presence in our midst, with the result that the attendance was not as large as it otherwise would have been.

Mr. J. M. Robinson acted as chairman for the evening, and on the platform were Messrs. Thos. Cunningham, W. H. Lyne, Earle Barnhill, Simms, N. Rex Hunt, Forsell and Dr. Bonquet, of the Horticultural Department. Reeve Thomson, Mr. J. Lawler and Mr. F. Rayburn, of Okanagan Centre, also occupied chairs on the platform.

INSP. CUNNINGHAM.

Mr. Cunningham made a few introductory remarks speaking particularly of his work as Inspector of Fruit Pests. His message was largely one of warning, emphasizing the necessity of orchardists always being on the look-out for possible development of insect pests, fungus or other diseases. Speaking of the thoroughness with which his Department carried out its work, he instanced the three years' fight the Department had once experienced in overcoming an invasion of the codling moth near Kamloops. All men were treated alike and no favors were shown, even a high sheriff and the Lieutenant-Governor had suffered the necessary removal of infected trees and shrubs by his Department. He spoke complimentarily of the able staff under him, saying they were all pure, clean men, conscientious and determined to do their duty. He felt grateful to the University at Pullman, Wash., for sending to him several of their best men, some of whom have since decided to remain in British Columbia indefinitely. They have found here an opportunity to do good, and have decided to remain.

He had asked of the Government sufficient money to keep men all over the Province. He hopes to have an expert in Summerland, and will have one in Vernon.

Inspector Cunningham then spoke of the unsatisfactory telegraphic communication the Okanagan Valley has with the outside world. He mentioned a serious delay with a telegraph message he was anxious to send from Vernon late Saturday evening. It was, however, held up until Monday morning. He had registered a complaint, with the result that the telegraph operator there would now have an assistant. Speaking of the Summerland service he asked, "Why does this office now close at 7.30? By the time the man get through with their orchard work and get to town, the office is closed." He felt that they should have constant connection with the outside world, and that telegraphic enquiries should be made of, and received on the market conditions. Across the line in little country places the telegraph offices were open till midnight. Mr. Cunningham then spoke of the pleasure he derived from his work, saying that some people felt that at his time of life he should retire and enjoy more leisurely the few remaining years, but he felt that it was his duty to be working, as in that way he could best serve his fellow man.

MR. REX HUNT.

Chairman Robinson, in a few pleasing remarks, complimented Mr. Cunningham upon his work, and his wonderful success in keeping British Columbia orchards so free from pests and diseases. He then called upon Mr. Rex Hunt, who spoke on Summerland's advantages in raising apples from the standpoint of climate.

Mr. Hunt reviewed the history of apple growing in the Pacific States and compared conditions there with the revival of apple

growing in the East, and of the increased competition the East is giving the West. The apples grown further south, while of high color and of good shape, lacked the flavor of the northern grown apple, and he found that here we not only grew apples of excellent flavor, but of good keeping qualities. This was one of our advantages. Again, in Washington and Oregon they had many pests to contend with of which he enumerated a few: leaf curl, shot hole fungus among the peaches; scab, four varieties of fruit spots, black spot canker, and other fungus diseases among apples. In many places year after year, there is only one-third of the crop free from fruit spots, and there were many varieties of canker. With a little cleaning up of our orchards, none of these would be seen here. We have some insects here, but nothing serious, while to the South they are much more plentiful and of greater variety. There they have the bud weevil, San Jose scale, codling moth, none of which are to be found in British Columbia. The San Jose scale requires constant spraying, and after a number of years it has become immune to the sulphur-lime spray, and oils are now being tried similar to those used in the Eastern States. In the Eastern States the scale has become immune to the oils, and they are there trying the lime-sulphur. If it should become immune to both, he did not know what the result would be. Until recently they sprayed nine times for the codling moth alone, but of late, by doing it just at the opportune time, as much was accomplished by three or four sprayings. He wished it understood, however, that they were not out of business down there by any means. We have here no San Jose scale or codling moth, only the lesser evils to contend with. Here the laws were respected and enforced; down there laws were being made only to be as continually evaded, and the officials were never able to enforce them. Since he had come here, he had had a request from a prominent man in Washington for a copy of the British Columbia horticultural laws, which were reputed to be the best. In Washington public opinion is the only law of enforcement, and if a man displeased his neighbors in the breaking of a law, he might be tarred and feathered and ridden out of town on a rail. The officials, however, were unable to enforce horticultural regulations. He mentioned the trouble they were having this season in Yakima and other districts with fire blight. He knew one man who had lost \$10,000 in a ten acre orchard from this cause alone. He thought we were a people to be congratulated.

MR. EARLE BARNHILL.

Mr. Earle Barnhill was the next speaker called upon. Mr. Barnhill is Government Plant Pathologist at present stationed at Kelowna, but the whole Okanagan is his field. He has been experimenting in spraying and had with him some badly spotted apples which he had brought from that district. There was an orchard with some fifteen year old trees that had not produced clean fruit for eight years. He had, however, been giving it special attention, and prepared a special spray which was used just as the buds were bursting, and again a little later, with the result that this year the fruit was almost wholly clean for the first time in eight years—this the result of spraying. The speaker said that while our orchards are clean now, they cannot be kept so without more spraying; one spraying will not do it. He ridiculed the little hand sprayers so generally in use, and said that in order to make spraying effective power machines with a pressure of two hundred pounds should be used. When he sprayed, the speaker said he sprayed three sides of the tree up and down. He sprayed against the wind using glasses to protect his eyes. We have got to come to the point of better spraying.

Mr. Cunningham explained something of the good work that Mr. Barnhill was accomplishing, and his announcement that Mr. Barnhill was here to stay was received with applause.

MR. W. H. LYNE.

Mr. Lyne then followed, speaking of the present outlook for fruit growing. Our prospects, he said, were the brightest, or as bright as any fruit district on the continent. We were starting under new conditions and would be able to benefit by the experiences of the older districts to the south of us. Our success, however, depended largely upon ourselves. We must heed the commercial demands of the business. Too many looked upon fruit growing as something to retire to. A man had much better sell out at once than engage in the occupation with that impression. Fruit growing required just as hard and intelligent work as any other line of business. We were starting here with a clean slate, and he urged that we keep it clean. Mr. Lyne then spoke of the work of the Department in preventing the spread of disease. Every imported box of fruit was inspected, and much fruit was condemned. He mentioned particularly a shipment of some fifty boxes of apples which arrived in Vancouver, and which he would not allow to be put on the open market. The shipper was notified that the apples must be repacked or shipped back to the orchard, as he would not allow them to be sold. The grower went to Vancouver and repacked the fruit, getting sixteen boxes of No. 1 out of the fifty, and realized more for these than the wholesaler would have paid him for the original fifty. The growers have commercial obligations. They must pack and ship their goods according to standard and quotation. The condemning of nursery stock was next touched upon by the speaker, and he again used one particular instance where a Washington nursery man was notified that he could not sell a certain shipment of considerable proportions in B.C. The shipper came to Vancouver and spent a week there trying to get his stock past the Inspectors; but finally shipped them back to Washington, and before leaving complimented the Inspectors on their work, saying that after all their thoroughness was a help to his business as of some thirty nurseries in that state not one half dozen dared ship to B.C.

MR. FORSELL.

Mr. Forsell of Pullman then followed, reading a prize essay he had prepared in Washington on "How To Make Country Life More Attractive." The paper, while an interesting one in itself, was not as well listened to as it would have been at any other time. The audience were impatient to hear more from the orchard specialists who were present.

DR. A. BONQUETT.

Immediately following Mr. Forsell, the chairman called on Dr. A. Bonquet, who has already made considerable reputation for himself. Dr. A. Bonquet said that he had intended to speak on the life history of a fruit tree, and also on something of the man behind the tree, but due to the lateness of the hour he preferred to speak of the man only and of him he only had one thing to say. Formerly the man behind the plough or the man behind the tree lived largely within himself, but times have changed, and man must live and work for the good of all. "Unless you understand this, you will vanish from the world's activities; it is your duty," he said. At times we were called upon to make sacrifices for the benefit of our neighbors. As the noble men on the "Titanic" realized and did their duty, so we, in our occupation, must consider others and work for the good of all. "I know the nobilities of your hearts," he continued, "and know you will all work together."

It was only after an urgent request had been made by Mr. Cunningham, supported by the audience, that Dr. Bonquet continued, taking up the history of the fruit tree. He first spoke of the work of the cell of which new things are being learned all the time. Then he dealt with the seedling, showing how that after the planting of the seed and the first season's growth of the little seedling it was taken

up from the soil, the top cut off, a new top grafted on, put in storage for the winter, and replanted the following spring and made to grow. And a nurseryman certainly knows how to make a tree grow. Their ability to do so lies in their knowledge of root growth. The little tree springs to a good height in one summer. The whole plant is forced by irrigation. Soon there will be frost again, and the trees must be out of the field. To remove them is a good process, but not the best for the fruit growers. The nurseryman, however, must fill the demand and produce a tree to your fancy. The little tree is taken out, defoliated either by machine or hand, pruned, its roots cut back and then stored for another winter. The tree then goes into the hands of the buyer and is planted. There is usually a good root system but frequently no tap root. A tree starts to grow soon after the planting and tries to penetrate the soil. Usually the root growth is superficial, spreading out immediately below the surface, but with no tap root it does not grow down. Herein is the trouble of all orchardising. The tree has not a solid root system which is the cause of many troubles. Irrigation is begun, and generally it is superficial; the roots grow towards the water and the root system, therefore, stays superficial instead of going down. If irrigation is not frequent this superficial root system quickly dries, the tree cells become inactive, and the tree suffers. This may occur several times in a season, frequently causing

[Continued on Page 8.]

FRUIT INDUSTRY SUFFERS A SEVERE LOSS.

DEATH OF MR. R. H. AGUR CAUSES GENERAL REGRET.

The death of Mr. Robert H. Agur, of Summerland, President of the British Columbia Fruit Growers' Association, has aroused the keenest regret throughout the province, and it is generally agreed that his loss is almost irreparable. Hon. Price Ellison, Minister of Finance and Agriculture, expresses his very deep regret at the death of Mr. Agur, and his sense of the loss this would be to the fruit industry.

Mr. Agur was the very head and front of fruit-raising, not only in the Okanagan, but in the whole province, says Mr. Ellison. "I doubt if there was a man in British Columbia who was more optimistic in regard to it, and certainly none more ready to give his time and means to the advancement of the industry in all its branches. The department looked upon him as a wise counsellor, and was glad to profit by his great knowledge. The Fruit Growers' Association, of which he was so long the President and the moving spirit, will feel his loss greatly. He was a keen business man, and his advice on that very important side of the industry, which really few growers are in a position to appreciate, not having had a business training, was invaluable. He was always ready to give all the information and advice he could to all who called upon him, and it will be long before we have another among us who will be able to fill his place."

The deepest regret was expressed by Mr. W. E. Scott, the Deputy Minister of Agriculture, at the death of Mr. Agur, an old personal friend of his own, and a gentleman whose loss to the fruit growing industry of the province and to the Okanagan district would be very deeply felt. Mr. Agur, in addition to being the President of the B.C. Fruit Growers' Association, was the first Vice-President of the Western Canada Irrigation Association, President of the Okanagan Fruit Union, and Councillor and Reeve of Summerland. His influence in his own district was immense, and he spared no effort to advance the interests of fruit growing in British Columbia. A keen business man, yet he was always doing something for those who came for aid or advice.

At Summerland Mr. Agur had some fifty acres of fruit trees, and operated a cannery in conjunction with his ranch.

Mr. Wm. Winslow also voiced his sense of the loss sustained by the province. — Victoria Colonist.

Municipal Council In Special Session.

Evening Meeting to Relieve Forthcoming Regular Session.

Main Business is Consideration of Communications. New Sub-Division At West Summerland is Approved

A special meeting of the Council was held at the call of the Reeve on Wednesday evening in the municipal offices. The object of the special meeting was to clear up some business that had accumulated so that too much would not be waiting the regular meeting. All the members were present. The Council got down to business about eight o'clock.

A MISUNDERSTANDING CLEARED UP.

The minutes of the previous meeting were read. Objection was taken by Coun. Lewes to the statement that the Reeve had later voted in favor of granting Hon. Wm. Hespeler the discount as read from the minutes and similarly reported in the Review. It was claimed by both Couns. Lewes and Dunsdon that the Reeve had voted against the request, saying that he would take legal advice before approving of the rebate. This was admitted by the Reeve, who said that he had later upon consideration granted the request. The vote had been two for and two against, the Reeve holding the casting vote. After some further discussion of the way in which this rebate was granted, the Council approved of the Reeve's action, so that it might be quite in order and the minutes were approved as read.

COMMUNICATIONS.

Communications were then taken up, there being a number of letters before the Clerk. They included communications from T. G. Marcham, Provincial Water Commissioner J. L. Armstrong, J. Rowley, John D. Calder, the secretary of Okanagan College, W. E. Ward, Mrs. Bentley and others.

Mrs. Bentley complained about an irregular supply of water. The Superintendent, who was present, reported that everything was now satisfactory, and the Clerk was instructed to advise Mrs. Bentley that the matter had been remedied. Mr. Ward's letter brought forth a long discussion on the present condition of the Garnett Valley flume. Mr. Ward has suffered some injury to his property due to an overflow. Coun. Dunsdon said that while he had no desire to champion Mr. Ward's cause, he declared that the flume was in a dangerous condition in that it might overflow at any time and make the Municipality liable for damages. He had examined the flume recently, and found it low in a number of places, and while it would not be very full in some part in others it would be as high as within half an inch of the top. A little blockade might cause a serious overflow at any time. How the difficulty might best be remedied without interfering with the water service seemed a problem. The matter was finally referred to the Board of Works.

Mr. T. N. Ritchie, secretary of Okanagan College, wrote saying that the management objected to

the manner in which they were billed for electric light. The arrangement with the Council is that the College be charged 9.6 cents on a minimum of five hundred kilowatts. There are four metres in the two buildings, and the municipal office had billed the two buildings separately, neither of them coming up to the five hundred kilowatts, but together totalling more than that amount. It was pointed out that the four metres were placed in the buildings for the convenience of the Municipality, and from the College point of view the whole service might as well go through one metre. Justification of the claim was admitted, although Coun. Robinson said that by including the two buildings in one charge an awkward precedent might be created.

J. Rowley objected to the water rate charged on a ten acre property situated above Trout Creek near Mr. Zimmerman's, which lot he claimed, contained only three or four acres that could be planted. No flume had been laid to the lot and no road opened up. The Clerk advised that he had adjusted the assessment with Mr. Rowley some two or three years ago, taxing him on five acres out of a total of ten. It was suggested by Coun. Robinson that he be charged a water rate on five acres, which suggestion met with the approval of the Board.

The Boy Scouts are organizing a Bugle Band, with C. N. Borton as master, and the latter applied to the Council for the loan of some drums. Reeve Thomson objected to making the loan, but the other members were favorable to granting the request under certain conditions. There was a possibility of the old band being reorganized, and the instruments might be needed. Coun. Robinson suggested that the drums be loaned to the Scouts for three months, and Coun. Lewes in supporting this felt that two ratepayers should sign for the instruments, making themselves responsible for their return in good condition. The loan was also supported by Coun. Dale, who recommended that a proviso be included to have the instruments returned if at any time they were needed.

F. J. Nixon's guarantee policy for \$3,000 was ordered renewed.

K. V. RAILWAY CHANGES.

The Kettle Valley Railway has cut off a corner of the McTaggart property, and in doing so crosses the road allowance when entering and again when leaving, making a small triangular corner, and the railway had proposed, instead of having these two crossings, to divert the road, making it parallel with the railway. While no definite action was taken, this seemed to meet with the approval of the Council provided sufficient width was given for the road. This question was brought up by a letter

[Continued on Page 4.]

DUKE OF CONNAUGHT'S VISIT.

While it has been known for some time that the Governor-General of Canada, the Duke of Connaught, was to honor us with a visit, no definite announcement as to the time of his arrival had been made. Reeve Thomson, however, received on Thursday morning a telegram from the Governor-General's secretary, advising him that the Duke with his party would arrive here on the morning of October 5, and would spend the time between 11 a.m. and 12.30 p.m. in Summerland.

HEAVY DEMAND FOR CANADIAN FRUIT.

The Canadian Trade Commissioner at Birmingham, England, Mr. Ray, in a communication to the Trade and Commerce Department, gives fruit shippers an important tip on the advisability of shipping straight lines of not more than six

varieties. Large assortments, he says, are the source of loss and disappointment on both sides. There will be a heavy demand in the Old Country for Canadian fruit this season.

CERTIFICATES GRANTED.

Miss A. E. Williams, who taught at the Town School last year under special permit, has been granted a First Class Teaching Certificate by the Education Department of British Columbia. Miss Williams submitted her English credentials to the Department, and on the strength of her standing there, was granted a first class certificate for this province. Miss Williams will again have charge of the Town School for the coming year.

Mrs. D. Lister, of Balcom, in virtue of her Old Country Teaching Certificate, has also been granted a First Class Teacher's Certificate, valid for life, by the British Columbia Education Department.

Try Us a Week

You remember the old saying "The proof of the pudding is the eating of it." It is so with our GROCERIES and service. Unless you try both you cannot know that they are the best you can get in this town: bought and planned to secure and keep your trade.

We know that a satisfied customer is the best advertisement we have. Try us a week. Send or come with your order or phone and a messenger will call for it.

O. VAUGHAN
GROCER & COMMISSION MERCHANT

WEDDING.

NELSON-DUGDALE.

A quiet wedding, but one of considerable local interest, was solemnized on Saturday evening last, July 20, when Miss Betsy Dugdale, daughter of the late John Dugdale, of "Clanfield," Long Preston, Yorkshire, England, was married to Mr. Charles Peel Nelson, son of Robert Peel Nelson, Great Baddow, Essex, England.

The ceremony took place at the home of Mr. and Mrs. A. B. Williams, Peach Orchard, in the presence of a few invited friends. Rev. F. W. Pattison officiated. The room was tastefully decorated for the occasion.

The bride was becomingly gowned in cream liberty voile, and carried a charming bouquet of sweet peas. She has been resident in Summerland since last August. Her sister accompanied her here, and remained for some three months.

Mr. Nelson is well-known throughout the district, having been here for about seven years.

The bride will receive at her home, about to be erected on Beach Avenue, on October 16 and 17.

CHURCH NOTICES.

Methodist Church Services, Sun. day, July 28. 10.30 a.m. subject: "Prevention." 7 p.m., "Modern Thought of Future Punishment." Both services down town.

Frank W. Hardy, Pastor.

Presbyterian Church Services: St. Andrew's Church, West Summerland, every Sunday morning, 10.30 a.m., Sunday School, 11.30 a.m. Evening, Fortnightly at 7 p.m., alternating with the Methodist Church. Rev. C. H. Daly, Pastor.

St. Stephen's Church (Anglican).—Holy Communion every Sunday at 8 a.m. except on the first Sunday in the month. First Sunday in the month Holy Communion at 12 noon. Matins, 11. Evensong 7, each Sunday. Rev. H. A. Solly, B.A., Rector.

Baptist Church—At West Summerland every Sunday at 10.30 a.m. Sunday School at 11.45 a.m. At the Lakeshore Church 7 p.m. Sunday School at 11.30 a.m. Rev. F. W. Pattison, Pastor.

Kaleden Comments

Mr. G. D. Marson with Mr. Muir Steuart drove down from Summerland last Sunday.

Mr. and Mrs. J. C. Findlay returned with Mr. and Mrs. Jas. Ritchie on Wednesday for a visit.

Mr. John Eustace, of London, England, who has considerable interests here, is staying at the Hotel.

Mrs. T. N. Ritchie, of West Summerland, with her two daughters, are the guest of her sister, Mrs. Grieve, in town.

A number of young people drove up to Summerland last Saturday evening to attend an Ice Cream Social there, returning on Sunday evening.

The Misses E. M. and A. G. Brown, accompanied by Mr. G. McLaine and Mr. G. Dinning motored down from Summerland last Sunday.

An excellent road has been made recently from the wharf past the Hotel and store. When the cement sidewalks are put in this will make a fine entrance to our rapidly growing town.

The Misses Archina and Florence Preston, from Penticton, are staying with their parents for a visit. Miss Gertrude Preston went up to Summerland to stay with Mrs. H. Elyse there.

Mr. and Mrs. Jas. Ritchie, of West Summerland, motored down last Tuesday. They were obliged to travel through the Indian Reserve, as the lakeshore road is still badly flooded.

It is expected that the new store will be ready for occupancy next week, and the Kaleden Supply Company contemplate moving in immediately. It is a fine, handsome building, replete with all the newest fittings.

The Hotel registered amongst other guests this week, Mr. W. H. Main, Penticton; Mr. C. O. Brownell, Vernon; the Misses E. M. and A. G. Brown, Mr. G. McLaine, Mr. G. Dinning, Mr. G. D. Marson, Mr. Muir Steuart, all of Summerland; Mr. and Mrs. A. A. Forbes, Callard, Penticton; Mr. and Mrs. R. Venner, Vasseaux Lake; Dr. and Mrs. McGregor, Penticton; Mr. Richard H. Parkinson, Kelowna; Mr. John Eustace, London, England.

CARD OF THANKS.

Mrs. Agur and family wish here-with to convey to those who have been so kind their sincere thanks for the many expressions of sympathy received in their recent sad bereavement.

SHIPPING LAST YEAR'S WAGENERS.

Some specimens of Wagener apples grown last season were recently brought out and found to be in an excellent state of preservation. The apples were stored all the winter in the cellar of Mr. James Doherty, and were in such fine condition when brought to light this week that some of them were procured and sent to be included in the British Columbia Fruit Exhibit at Brandon Fair.

THE HOME CIRCLE.
Crude Thoughts From the Editorial Pen.

TWO PERSONS will not be friends long if they cannot forgive each other's little failings.

WORDS OF CHEER are words of help. Words of gloom are words of harm. There is a bright side and a dark side to every phase of life, and to every hour of time. If we speak of the bright side, we bring its brightness into prominence; if we speak of the dark side, we deepen its shadows. It is in our power to help or to hinder by a word, any and every person whom we are with. If we see a look of health or of hope in the face of an acquaintance whom we casually meet, and we tell him so, he goes on his way with new life in his veins. If we see a look of failing strength and of heaviness of heart in one to whom we speak, and we emphasize the fact that he looks poorly, we give him a push downward as our contribution to the forces which effect his course. A look or a word can help or can harm our fellow. It is for us to give cheer or gloom as we pass on our way in life; and we are responsible for the results of our influence accordingly.

THE MOTHER HEART does not need soft satin and lace and embroidered linens and rose-hooded candles to make itself felt. It beats just as devotedly and happily under cheap cottons as under silken folds; it watches in the silence of the night by the lowly couch of some little sufferer as tenderly as it does by the side of some other little patient in the splendid mansion; it reaches out to the convict behind prison doors with the same love that glories in the success of a renowned statesman. Mother love in its countless combination furnishes a theme as old as the hills perhaps, but one from which the noblest of inspirations are drawn. In nearly all relations of life, from those of blood to those of friendship, wonderful combinations can be made—combinations which illustrate to the world the great heights which a pure love can attain, combinations which act as gigantic reflectors which not only send light into dark places, but which draw all within reach into the circle of their brightness.

TAKE TIME, young man, to go out with your sister. If she is a good girl she is much more desirable company for you than that other girl who flirts with you so desperately.

OUTDOOR LIFE.

It is very certain that all the physical universe takes the side of health and activity, wooing us forth into nature, imploring us hourly and in unsuspected ways, to receive her blessed breath into body and soul, and share in her eternal youth. For this are summer and winter, seed time and harvest given; for this do violet and blood-root come, and gentain and witch-hazel go; for this do changing sunsets make yon path between the pines a gateway into heaven; for this do pale meteors wander nightly, soft as wind-blown blossoms, down the air; for this do silent snows transform the wintry woods to feathery things that seem too light to linger, and yet too vast to take their flight; for this does all the fair creation answer to every dream or mood of man, so that we receive but what we give. All is offered to us to call us from our books and our trade, and summon us into nature's health and joy. To study with the artist, the least of her beauties; to explore, with the man of science, the smallest of her wonders; or even simply to wander among her exhaustless resources, like a child, needing no interest unborrowed from the eye—this feeds body, and brain, and heart, and soul together.

IN THE RUSH AND HURRY of modern life do we think as much as we might of the happiness of those who are growing old. They have lost so much! Their youth, often their health, most of the friends and companions who started with them on life's journey, and yet we often grudge them the brightness and joy we might so easily put into their lives. We will not stay to hear the recollections of old and happy days which they love to tell us, we let them see so plainly that their day is over, and ours has come! That those who have borne the burden and heat of the day, toiled and struggled and worn themselves out for others, should be left to feel lonely, and neglected is sorrowful. We can and ought, each and all, in our own place and way, do something to bring the glow of summer and the remembrance of the day of roses and love into the lives fast nearing their winter and their end.

LATEST PICTURE OF BORDEN.

The recent change of government has made R. L. Borden the central figure of our Canadian public life. Many would like a good picture of him. We can supply one FREE. We will send anyone our paper for one year, and the Weekly Mail and Empire, (the regular rate of which is \$1.00 per year), for the same period, the two together, to include the free picture of the new Canadian Premier, for \$2.50.

The Borden picture is on fine paper suitable for framing, in photo tints, 18 x 24 inches, and is in itself as a work of art, easily worth the price of a year's subscription to either paper.

Send all orders to the office of The Summerland Review.

A hen is not supposed to have much sense or tact, yet every time she lays an egg she encloses forth the fact. A rooster hasn't got a lot of intellect to show, but none the less most roosters have good sense enough to crow. But man—the greatest masterpiece that nature could devise, will often stop and hesitate before he'll advertise. Put your advertising in this paper.

ROYAL NAVAL COLLEGE OF CANADA, HALIFAX, N.S.

THE NEXT examination for the entry of Naval Cadets will be held at the examination centres of the Civil Service Commission in November 1912; parents or guardians of intending candidates should apply to the Secretary, Civil Service Commission, Ottawa, for entry papers before 1st October next. Candidates must be between the ages of 14 and 16 on 1st JANUARY, 1913.

Cadets are trained for appointment as Officers in the Naval Service, the course at the College being two years, followed by one year in a Training Cruiser, after which Cadets are rated Midshipmen. Further details can be obtained on application to undersigned.

PUBLISHED BY THE REVIEW PRINTING & PUBLISHING COMPANY LIMITED,
RALPH E. WHITE, MANAGING DIRECTOR

SUBSCRIPTION RATES: \$2.00 PER YEAR, IN ADVANCE. SIX MONTHS \$1.00.

Advertising Rates:

LEGAL NOTICES.—Twelve Cents per line for the first insertion; Eight Cents per line for each subsequent insertion.

LAND NOTICES.—\$7.00 for 60 days, \$5.00 for 30 days.

WATER NOTICES.—30 days, 150 words and under, \$3.00; each additional 50 words, \$1.00.

THEATRICAL, ETC.—50c. per inch for first insertion, and 25c. per inch each subsequent insertion.

LOCAL NOTICES or Readers, Immediately following regular locals, 20c. per counted line; 10c. per line each subsequent insertion. Half these rates when accompanying display advertisements.

LODGE NOTICES, Etc., 25c. per week, per column inch.

FOR SALE Advertisements, Etc., 3c. per word first week; 1c. per word each subsequent week.

Transient Advertisements payable in advance.

Rates for Contract Advertisements furnished on application.

Copy for change of contract advertising must be in the hands of the printer not later than Wednesday noon to insure publication in the next issue.

In accordance with schedule of prices adopted throughout the valley, charges for advertising are now being made weekly. Heretofore when five issues were made in one month the result was a loss. By the new method customers are charged each week for just the amount of space used.

FRIDAY, JULY 26, 1912.

BETTER FRUIT REGULATIONS.

THE Federal Department of Agriculture is taking a very commendable step in improving the methods of fruit inspection in Canada. The consuming public of this province have reason to appreciate any efforts which will make for better regulations in the marketing and sale of fruits. In the past they have suffered severely, and they have not had less reason to protest because the inferior articles for which they paid high prices were in most cases imported from south of the boundary line.

In fact, our own products have been seriously handicapped by the immunity enjoyed by the American producer, as far as Canadian regulations were concerned. Accordingly the safeguards to be instituted against the entry of inferior United States fruit will not only be in the interests of the consuming public but in the interest of our own fruit growers, and should encourage the industry in British Columbia.

Hon. Martin Burrell, the Minister of Agriculture, is himself a practical fruit grower and understands the requirements of the industry, both here and in the East, as few men do, and he may be relied on to employ his knowledge for the best interests of the public.—Vancouver Sun.

INDIVIDUAL LOCAL PRIDE.

NOWHERE does individual effort count more than in improving the appearance of a town. If every citizen would consider himself a committee of one to help beautify his home the question of a clean, attractive city would be settled. Too often one man waits for another, or individuals wait for some organization or the city authorities to move first, with the result that little is done.

It requires no committee of organization for a man to sweep the sidewalk or trim the grass on the roadside in front of his house, keep the lawn, house and garden neat, to remove pots and pans, broken bottles and other rubbish from the back yard, but it all helps to make the town more beautiful. One trouble is that here and there is a man who is too indifferent or too indolent to do these things, and one such man can mar the beauty of a whole neighborhood.

Another trouble is found in vacant lots. It is the owner's place to keep the weeds down and it is to his interest, but generally he fails to do it, and the lot is given over to weeds and rubbish.

What is needed is local pride on the part of the individual and a general public spirit that will not tolerate disfigurements.

ELEVEN GOOD REASONS.

A WRITER of more than ordinary ability gives eleven good reasons why he should buy at home instead of placing his patronage elsewhere. While apparently directed against the mail order houses, they apply equally as well to that class of individuals who are so long on bargains and so short on civic pride, that they place their orders in another community, to the disadvantage of the present and future prosperity of their own. Here they are:

- Because my interests are here.
- Because the community that is good enough for me to live in is good enough for me to buy in.
- Because I believe in transacting business with my friends.
- Because I want to get what I buy when I pay for it.
- Because my home dealer carries me when I run short.
- Because every dollar I spend at home stays at home and works for the welfare of my town.
- Because the man I buy from stands back of the goods.
- Because I sell what I produce here at home.
- Because the man I buy from pays his part of the taxes.
- Because the man I buy from gives value received always.
- Because when ill luck, misfortune or bereavement comes, the man I buy from is here with the kindly greeting, his words of cheer, and his pocket book, if need be.
- Here I live and here I buy.

BRITISH COLUMBIA is the only country that is free from the codling moth, according to Inspector Cunningham, and our Government are determined that it shall be kept free. A staff of inspectors costing \$2000 per month is maintained, and last year some 50,000 boxes of apples were either destroyed or sent back to the point of shipment.

WHEN are we going to be given a good opportunity to hear Dr. Bonquott? Many citizens went to the meeting on Tuesday night expecting to hear him in a full, practical, interesting and instructive lecture on fruit growing, but were disappointed. Not that the other speakers were disappointing, but our fruit growers have had just enough of Dr. Bonquott's practical knowledge to want more of it, and will not be satisfied till he is given an opportunity to impart to them in his pleasing continental English more of his fund of practical science in horticulture.

[Continued from Page 1.]

from John D. Calder, asking that a road be opened up to his property.

The railway route crosses the Trout Creek ditch and flume system in several places. The railway, with the approval of the Council, have undertaken to build a new channel for the water, and this is being done by Mr. T. McAlpin. It was mutually agreed that the work should meet with the approval of Supt. Mitchell before the water is diverted into the new channel. Mr. Mitchell, who was present, reported that he had been asked to pass the work, but he did not find the ditch satisfactory. It would require a considerable amount of additional work and the new flume trestles would need to be braced better. The Council cautioned the Superintendent not to take over the new work until it was made thoroughly satisfactory. This work is all above the reservoir, and the proposed changes were approved by Engineer Latimer.

Mr. T. G. Marcham submitted for the approval of the Council a blue print of a recent sub-division he had made at West Summerland, and also requested that they adjust the water rates on the new building lots. On motion of Coun. Robinson, seconded by Coun. Dale, the plan was accepted and the Clerk

authorized to sign approval of same. As the general and irrigation rates are now fixed for 1912 the Council took no action on these rates.

WATER EXTENSION.

Reeve Thomson then raised the question of improvement work for the fall, and whether the Council should plan to raise money by debenture for the extension of the water system. Engineer Latimer is expected to make surveys of some lakes in the hills, with a view to conserving more water. It has been called to the attention of the Council that there is a large lake some thirty miles back, which, it is claimed, can be transformed into a large storage reservoir. Coun. Lewes asked if someone should not precede Engineer Latimer and make a preliminary report thus saving him much time. The lake is some seventeen miles north-west from Sullivan's, and it would take three or four days to make the trip. Chairman Dunsdon of the Board of Works, and Superintendent Mitchell will visit the lake and report.

S. M. Young complained of an overflow on his lot near the old Anglican Church, this being the second, he said, inside of two weeks.

The meeting then adjourned.

Now that the lake level is gradually lowering the Government have a gang of men at work between Summerland and Penticton building up the Lakeshore drive so that it may not again be inundated by an unusually high water level.

Local News Items.

Dr. and Mrs. R. C. Lipsett spent Monday at Peachland.

Messrs. Muir Stuart and G. D. Marson visited Kaleden last Sunday.

Dr. F. W. Andrew is expected home either on Saturday or on Tuesday, probably the former.

Mrs. T. N. Ritchie is visiting her sister, Mrs. Grieve, at Kaleden. She is accompanied by her two daughters.

Big stock of the famous Joseph Rodgers Superior Pruning Knives now to hand. The Summerland Supply Company.

A new plank sidewalk has been laid at West Summerland, extending from the Municipal Offices to the main street.

Mr. and Mrs. J. C. Findlay, from Kaleden, are the guests of Mr. and Mrs. James Ritchie, returning with them on Wednesday.

Miss Kerfoot and Miss Ferguson, nieces of Mr. G. A. McWilliams, who have been visiting at his home for a few days, left on Wednesday morning.

L. C. Woodworth is building a cottage on his orchard property. A foundation of stone has been built just opposite the residence of Mrs. Campbell.

Mr. and Mrs. James Ritchie paid Kaleden a visit this week going by motor. It is still necessary to use the upper road between Trout Creek and Penticton, the lakeshore drive being flooded.

A Kettle River Valley Railway Survey party has again camped at Chute Creek evidently with the purpose of making a re-survey of the route between Penticton and the summit eastward.

An invitation will be sent to the delegates at the Irrigation Convention meeting at Kelowna on the 13th, 14th and 15th of August to come to Summerland to visit the Flower Show which is to be held on the 16th prox.

On Thursday morning the Okanagan Lake Boat Company launched a staunch new scow, or barge, for use by picnickers and excursion parties. It was immediately put into commission and made its first trip from Summerland to Trout Creek, conveying the union Sunday School picnic to the grounds there.

The annual union Sunday School picnic was held at Bulyea point on Thursday afternoon and was largely attended. All the Sunday Schools of Summerland united for this occasion, including the Baptist, Presbyterian and Anglican Sunday Schools of West Summerland, and the Methodist and Baptist schools of Summerland.

The following additional special prizes have been donated to the Women's Institute Flower Show: For the best pan of home made bread baked from Royal Household flour, offered by the Royal Household Milling Co., through Mr. J. E. Phinney; 1st prize, 98 lb. sack of Royal Household flour; 2nd prize, 49 lb. sack of Royal Household flour. Two and a half dollars has been donated by Mr. J. R. Brown towards the prize fund.

A few cherries are yet being shipped, but of the sour varieties only. Apricots are now coming in quite freely, as are also tomatoes. Some Yellow Transparent and Tetofsky apples are also being shipped. The fruit Union are exporting a few cucumbers and are buying potatoes which, however, they are marketing locally, mostly to the railway contractors. The packing house at West Summerland is not yet receiving fruit but the Union expects to commence packing there the 1st of August.

An interesting league football game was played at Penticton on Thursday afternoon by the Summerland and Penticton teams, resulting in a score of 4-1 in favor of Summerland. In addition to gaining another two points in the league standing, the Summerland boys captured a purse of \$20 which had been put up by the Sports Committee of Penticton for the winners. Fisher again showed himself a strong man and was successful in scoring two of the four goals, Lacey and Templeton each scoring one also. There is yet one game to be played in the league. This is between Vernon and Penticton, at Kelowna. The present league standing is Vernon 8 points, Summerland 6 points, Kelowna 4 points, Penticton 4 points.

Local News Items.

Mrs. J. Downton is visiting friends at Vancouver.

Mr. and Mrs. J. R. Brown spent last week-end at Peachland.

E. R. Agur expects to commence canning fruit at the Balcomo Cannery on Monday next.

Mr. and Mrs. J. W. S. Logie and Miss Georgina Logie were at Hotel Naramata last Sunday.

At a suit tried at Vernon recently, James Fyfe obtained judgment against F. von dem Hagen for \$139.00.

The Presbyterian Church choir held their annual picnic last Saturday. About forty people in all drove to Upper Trout Creek.

L. C. Woodworth has purchased the Cross orchard at the head of the Gulch road hill, and immediately east of Thos. E. Moore's orchard.

The Dominion Government is arranging to place additional Fruit Inspectors in British Columbia and the prairie provinces, and hope soon to have a thoroughly efficient staff at work. The object of the increased staff is to assure that the provisions of the Fruit Marks Act are strictly adhered to.

A meeting of the Southern Okanagan Poultry Association is called for Monday next at eight p.m. at the office of the secretary, Mr. C. P. Nelson. It is necessary that arrangements for the Show be made at once, and the British Columbia Association notified, if the local association is to get the usual grant.

A Toronto dinghy (a small boat with one mast and one sail) has just arrived here for Mr. Allen Agur. The boat is of pleasing design and neat construction and finish. Its length is 14 feet over all, with a beam of 5 feet 6 inches, and it is fitted with a balanced steel centre board. It is quite probable that a number of boats of this design will be built in the local factory this winter, and if so we may expect to see some interesting and exciting sailing races in the dinghy class.

NEW SPEED LAUNCH

The boat which was ordered by Mr. Rowley from the Summerland Boat Works has been finished and will be delivered to-morrow. She is without doubt the finest purely speed boat on the lake, being of very graceful mode and easy lines. The boat, which has been named "Lil", is 35 feet long by 5 feet beam, cedar planked with half inch stuff on white oak ribs, and all copper riveted. She is finished with mahogany, upholstered in khaki, and the body paint is a battle gray. The deck is well crowned, covered with union silk, and is also painted gray. The fore deck is 16 feet long and the engine pit 6 feet 6 inches, and the cockpit, which has two cross seats, 6 feet, and the after deck 5 feet. The engine is a 40 horse power Scripps, 4 cylinder 4 cycle, and fitted with an aluminium base to reduce the weight. The engine itself weighs about 865 lbs., the total weight of the equipment being probably 950 lb. She has an auto steering gear and double ignition. Her fittings throughout are either aluminium or brass. The makers have already given this boat a trial run and find her very speedy. She will probably make 25 miles an hour with ease.

FREIGHT RATES.

Winnipeg, July 22.—Commissioner D'Arcy Scott made a clear statement of the present position of the railway freight case at the sitting of the Railway Commission at the City Hall. Mr. Scott said that at previous sessions a case had been made out for the shippers. It has been shown that the rates in the West were excessive as compared with those which obtained in the Eastern Provinces. It has also been shown that the density of traffic was as great or greater in the West, and that the cost of operation in the West was as low or lower than in the East. It was therefore, incumbent on the companies to show cause why a reduction in the rates should not be ordered. The proof rested wholly on the railways. Further evidence was not required from the shippers.

Mr. Scott said, however, that any further statement which shippers desired to make would be considered.

Woman's Rights

It is your inalienable right to demand in a range—Economy, Promptness and Satisfaction. It is your privilege to expect the same attention, progress and efficiency in the things you use in your daily work as have been brought about in other and often less important lines of endeavour.

The Gurney-Oxford is the foremost example of cooking efficiency.

The Gurney Economizer regulates all the drafts by lifting or dropping one small lever. It keeps the fire alive for hours with practically no coal consumption. It saves 1 ton of coal in 6. The Gurney Economizer is found only on the Gurney-Oxford range.

The Gurney-Oxford Oven is absolutely and always heated the same on all sides and in all corners because the heat is evenly distributed.

This is a sure and unfailing guarantee that whatever comes out of the Gurney-Oxford Oven is crisp and light and delicious—this is the final test and the point most often advanced by those who cook on a Gurney-Oxford, those who believe it is woman's right and privilege to have in her kitchen the labor, time and money saving principles embodied in the Gurney-Oxford.

Borton Plumbing & Heating Co.,
SUMMERLAND, B.C.

Naramata Notes.

Miss Ida Wilcox, of Salmon Arm, is visiting her friend Miss Orca Williams.

Mr. Reg. Booth, of Penticton, was home for Sunday on a brief visit to his folks.

Full account cannot be given till next week of the entertainment given by the girls on Thursday evening in the Clubhouse in aid of the Unity Club.

Mr. and Mrs. H. F. Powell with their daughter, Miss Mildred, of Battle Creek, Michigan, are here on a holiday, guests of Mr. and Mrs. H. J. Wells.

An elegant climbing rose, "Dorothy Perkins" found in front of Mr. Gillespie's verandah is a lovely sight. There are literally hundreds of clusters of shell pink flowers.

Mrs. Carrie Bacon, of Poplar Bluffs, Missouri, is visiting her sister Mrs. H. J. Wells. Miss Dora Brown, of Goshen, Indiana, is another American friend who is holidaying at Naramata.

At a recent citizen's meeting held in the school, the officials for the ensuing year were elected; Messrs. Hancock, J. C. Williams, and Mrs. A. B. Allen, trustees, and Mr. George Wolstencroft auditor.

A few of the outside guests registered at Hotel Naramata are Mrs. J. H. Adams, N. R. and J. V. Adams, of Toronto; John Barr, and wife, Calgary; Mrs. Prowse and two children, Kelowna; M. S. A. S. Irwin, Winnipeg; and Mrs. George Meikle, Kelowna.

A number of pedagogues are finding the lakeshore town a pleasant summer resort from the thralldom of the school room. Miss Tuck of Calgary, is the guest of her sister, Mrs. Jas. Reid, Miss Orca Williams is under the parental roof, as is also Miss Chambers. Miss Edna Bennett, the latter's friend, hails from Chicago.

The Unity Club ladies at their recent meeting, decided upon August 1st as the date, and Trout Creek as the place of the next annual outing. At the close of the meeting a farewell address and presentation were tendered one of the Club's departing members, Mrs. C. W. Johnson, who leaves next week to take up residence in Victoria.

That the powers that be are not yet satisfied with the railway survey leading from North Naramata seems evident from the fact that the line is again to be gone over as far north as Kelowna. A camp was formed this week at Chute Creek with Engineer Brooks in charge. Quite a number of our own boys have enlisted, Messrs. V. Watson, H. Mitchell, C. Grimaldi, R. Gamman, Geo. Nuttal, Sherwood Davies, and others.

Heard about the sport promised for Saturday night? Briefly it is this; a "joy ride" on the new scow built recently for use by the boat company is promised all who wish to avail themselves of the opportunity. Refreshments will be served at one end and music will be provided for those who wish to amuse themselves in the merry mazes of the dance. Mr. Brodie, it is understood, will act as pianist. In this connection it might not be out of place to express on behalf of the people of Naramata their appreciation of the splendid ferry service that has been put into operation this season.

KAMLOOPS CENTENARY.

Kamloops, ever growing and expanding in size and productiveness, is not unmindful of the past, and on August 17, 18, 19, the town will celebrate its centenary.

Honor is to be paid to the town by His Royal Highness the Duke of Connaught, who visits it on the 17th from 3 to 6.15 in the afternoon. The primary object of his stay-over is to open the new Royal Inland Hospital, which by then will have been completed, and the ceremony will, without question, be a popular one, apart from the interest attaching to the Duke's first visit to the place.

To provide for this and the other functions that have been arranged for these three days, a civic fund has been opened and with remarkable color the citizens are contributing in no unattained degree. More than this, encouragement is being given to the promoters by the equally excellent response from people outside the town.

Kamloops lingo will, every evening, be the scene of a water carnival, and through the day sports and manifold attractions will engage the attention of the many thousands who are expected to assist in these centenary celebrations.

A root cellar like this won a prize last year.

THE drawing was made from a photograph of the root-cellar with which D. A. Purdy, of Lumsden, Sask., won a cash prize in last year's contest. In that contest there were 36 prizes. There will be three times as many prizes (108) in the

1912 FARMERS' PRIZE CONTEST

THUS you will have three times as many chances of winning a cash prize. You do not have to use any certain amount of Canada Cement to win a prize. There are absolutely no "strings" to this offer. There are twelve prizes for each Province (three of \$50; three of \$25; three of \$15; and three of \$10) and you compete only with other farmers in your own Province and not with those all over Canada.

It makes no difference whether you have ever used cement. Many of last year's winners had not used it until they entered the contest. When you write for full particulars, we will send you, free, a book, "What the Farmer Can Do With Concrete," which tells everything you need to know about concrete. It is absolutely free, and you are under no obligation to buy "Canada" Cement or to do anything else for us.

WRITE your name and address on the coupon, and mail it, or use letter or post card, and we will send you at once the book and full particulars of the 1912 Prize Contest.

Address: Publicity Manager, Canada Cement Company Limited, 504 Herald Building, Montreal.

 SUMMERLAND

PROVINCE TO EXHIBIT AT DRY-FARMING CONGRESS.

At the Lethbridge Dry-Farming Congress, which is to be held from October 21 to October 2, the provincial government, through the Department of Agriculture, have decided to make a large display and to secure exhibits for that occasion which will prove a credit to the province, and efficiently advertise the great resources of the land.

In order to do this efficiently the Department have asked for the assistance and co-operation of the several boards of trade in the province, and have stated their willingness to take over at the point of shipment any exhibits collected by these bodies; pay all the costs of transportation to Lethbridge, efficiently stage the same, and take care of them during the time that the exhibition is in progress.

The disposition of the exhibit at the conclusion of the congress will be undertaken as directed by each board of trade, and each exhibit will be staged separately, and the district from whence it was secured will be properly advertised. The whole will appear as a provincial exhibit.

The space to be occupied by each exhibit must not exceed ten feet by ten feet. Other provinces are getting into line for the purpose of turning out a great exhibition of the wealth of the place, and it behoves the people of this province not to be behind.

**POSSIBILITIES OF RED
APPLE VALLEY.**

**AN EXPANSE OF AGRICULTURAL
COUNTRY NOT REALIZED.**

It was the writer's privilege last week to visit some of the hill country west and north of the Municipality of Summerland; and the visit was a revelation to him, giving, as it did, an entirely different conception of the surrounding country and its possibilities.

The Trout Creek Valley is no doubt well-known to most of our residents. Leaving that valley at the present site of Richardson's mill, and turning directly north, one drives for some miles through a beautiful valley, most of it wider, but in many ways quite similar to Garnett Valley. The elevation of this valley is very little greater than the latter, and the wonderful transformation that has been accomplished in Garnett Valley will no doubt soon be repeated in the other, which is now well-known as Red Apple Valley. The upper end of this valley opens out into a broad stretch of beautiful country, much of it perfectly level, and of sufficient extent to be suggestive of the broad acres of the meadow farms of the East. Along the west and north of this broad piece of prairie lies some of the finest benches to be found anywhere, easily approached, of gentle slope, soil evidently of the best, and nearly all of it without stone. This is unquestionably destined to be a great apple producing district. At the northern and widest portion the valley is divided into two, one part opening up to the north-west and the other to the north, and while some of this will also be fruit land, great stretches of it, together with the higher benches to the west of the broader valley is ideal country for grazing, and now that the sheep industry is to be given every encouragement from the government, we may soon expect to find thousands of sheep grazing on these green hillsides. Dairying will also, no doubt, be engaged in, especially if the growing of alfalfa is taken up.

Near the middle of this broad, open district is the proposed townsite for Appledale. Appledale may be reached from Summerland via Garnett Valley or via Trout Creek and Red Apple Valley, and a drive round the circuit will be a pleasant surprise to many. Recently the Government has extended the Garnett Valley road farther up that valley to beyond the reservoir on Eneas Creek, which is bridged immediately above the reservoir. Another road leaving the Appledale townsite has been built along the edge of what was formerly Darke's Lake, but now transformed—by diverting the water supply—into excellent orchard land, and continues north along the northern branch of the valley, and down a long hill on an easy grade to meet the Garnett Valley road at the new bridge. To anyone who can possibly make the trip we would highly recommend this drive as one of the best and most picturesque to be found anywhere. By using a little care on the newly graded hills, the journey can be made equally well by auto.

In addition to building the new road mentioned above, connecting Red Apple Valley with Garnett Valley, the Government road gang is extending the Garnett Valley road to the north-east to meet the Peachland road. In fact, the road is now so far advanced as to make it possible to reach Peachland by that route.

Old scraps of soap should be collected, placed in a saucepan on the stove with enough water to cover them, and allowed to dissolve. Then roll into balls and place on one side to dry. They can be used for scrubbing.

**Bargains for
OUR Subscribers**

REALIZING that the Home Paper cannot fill all the need for Reading Matter, we have compiled a List of [in our opinion] the most helpful and practical Publications which we are offering our Subscribers in clubbing combinations, at lowest possible prices.

Following is only a partial list of such combinations:

BARGAIN No. 1

- Vancouver Daily Province - \$3.00
 - Better Fruit - 1.00
 - The Review - 2.00-6.00
- The three for **\$5.00**

BARGAIN No. 2

- Canadian Courier - \$3.00
 - Canadian Horticulturist - .60
 - The Review - 2.00-5.60
- The three for **\$4.60**

BARGAIN No. 3

- Vancouver Daily Sun - \$3.00
 - Country Life in America - 5.00
 - The Review - 2.00-10.00
- The three for **\$8.00**

BARGAIN No. 4

- Canadian Horticulturist - .60
 - Canadian Poultry Review - .50
 - The Review - 2.00-3.10
- The three for **\$2.70**

BARGAIN No. 5

- The Busy Man's Canada - \$1.00
 - World's Work - 3.60
 - The News-Advertiser, Daily - 3.00
 - The Review - 2.00-9.60
- The four for **\$7.00**

BARGAIN No. 6

- Winnipeg Telegram - \$2.00 (or Free Press)
 - B.C. Saturday Sunset - 2.00
 - Canadian Magazine - 2.50
 - The Review - 2.00-8.50
- All four only **\$6.60**

BARGAIN No. 7

- World Wide - \$1.50
 - Farmers' Advocate - 1.50
 - Free Press, Weekly - 1.00
 - The Review - 2.00-6.00
- The four for **\$4.75**

BARGAIN No. 8

- British Columbia Magazine - \$1.50
 - Toronto Mail and Empire - 1.00
 - Farmers' Advocate - 1.50
 - The Review - 2.00-6.00
- All four for **\$4.50**

BARGAIN No. 9

- Calgary Herald - \$3.00
 - Collier's (Canadian Ed.) - 5.50
 - The Review - 2.00-10.50
- The three for **\$8.90**

BARGAIN No. 10

- Vernon News - \$2.00
 - Toronto Saturday Night - 3.00
 - The Review - 2.00-7.00
- The three for **\$5.85**

BARGAIN No. 11

- Canadian Pictorial - \$1.00
 - Windsor Magazine (13 mos.) - 3.25
 - The Delineator - 2.00
 - The Review - 2.00-8.25
- The four for **\$5.75**

BARGAIN No. 12

- Rod and Gun - \$1.00
 - Poultry Review - .50
 - Nor'-West Farmer - 1.00
 - The Review - 2.00-4.50
- All four for **\$3.90**

BARGAIN No. 13

- The Garden Magazine - \$1.85
 - Canadian Courier - 3.00
 - The Review - 2.00-6.85
- The three for **\$5.75**

BARGAIN No. 14

- Weekly Edition of either—
- The Province - .
 - Calgary Herald - .
 - Winnipeg Telegram - .
 - Winnipeg Free Press - .
 - Family Herald and Weekly Star - .
 - Toronto Mail and Empire (and Borden Picture) - .
 - or
 - Montreal Witness - .
- Canadian Sportsman - 1.00
 - McLean's Magazine - 2.00
 - The Review - 2.00-7.00
- The four for **\$5.40**

If none of these combinations suit you, make up one to your liking, and we will quote you a price on the selection.

We are also Subscription Agents for—

- The Ladies' Home Journal - \$2.00
- Saturday Evening Post - 1.50
- Country Gentleman - \$2.25
- The Fruit Magazine - 1.50
- Successful Poultryman - .50

These Offers are for old or new Subscribers. If present Subscribers are in arrears it will be necessary to pay to date before these Bargains become available.

LETTER TO THE EDITOR.

The Columns of THE REVIEW are open to
the public for the discussion of matters of
general interest. No notice can be taken of
anonymous communications. Letters intended
for insertion must be authenticated by the name
and address of the writer, not necessarily for
publication. The opinions of correspondents are
not necessarily those of the Review.

A PROTEST.

The Editor,
The Summerland Review,
Dear Sir:
The local hooligans who graced
Peach Orchard with their presence
on Tuesday evening need feel no
pride on account of their visit. In
this community, where one is
accustomed to meet with refine-
ment, such ill-mannered and objec-
tionable demonstrations are not only
unlooked for, but serve to remind
us that Summerland is not alto-
gether free from an undesirable
element of rowdyism as has been
our boast. Such practices cannot
be justified on the plea of "cus-
tom," and the annoyance to sur-
rounding residents more than meets
the argument of "harmless amuse-
ment." We are glad that exhibi-
tions of this nature are seldom
heard of; and after such a display
of execrable taste, and such a vul-
gar exhibition of elementary ruffi-
anism, the most manly thing the
perpetrators can do is to offer
apologies to the many whom they
inconvenienced. There are conven-
tional ways of showing friendship
that bring forth more pleasure and
appreciation than the unmannerly
charivari. If the party contained
persons of responsible age, it is
certainly not to their credit; but
we prefer to think of the occur-
rence as the unaided work of un-
thinking children.

Yours, etc.,
PEACH ORCHARD.

Summerland, B.C.,
July 24, 1912.

(Continued from Page 1.)
ing disaster. The speaker empha-
sized the need of getting the root
growth well down into the soil.
Speaking of conditions here, Dr.
Bonquett said that it was very easy
to make a start with virgin soil,
and this is an ideal way.
He then followed with a talk on
spraying. The people here do not
know what spraying is. Spraying
should be the daily work of the
orchard man. They must not wait
until they see the things to spray
for, but must spray in order not
to see these things. Dr. Bonquett
said, "You are producing the best
kind of fruit, but let difficulties
and pests increase, and where will
you be?" He urged serious appli-
cation and felt that more knowledge
was needed. He next touched upon
irrigation, taking the ideal tree as
an exception. The tree has grown
a good root system, and in order
to properly irrigate this tree the
structure of the soil is the orchard-
ist's guide. The speaker illus-
trated by blackboard the relation
of the rootlets to the soil particles
and the water they held, and par-
ticularly cautioned his hearers
against over irrigation, showing
some of its evil effects. One or-
chardist with whom he had been
talking said that he had a right to
eleven inches of water and he must
use it. In doing so, however, he
was killing his trees. He had
found the trees with shrunken
leaves and withered spurs which
had ceased to grow. At the base
of the spurs the growth had again
started. Nature is always very
good, and had done its best to
repair the man's foolishness by
starting new growth.

A good rule in pruning is never
to lose a piece of wood more than
one year old. Cut back your young
tree to, say, about eighteen inches,
select three good, well-located and
balanced branches, cutting out all
the others. Each of these will grow
and only selected branches of these
should be permitted to remain.
And so on, he followed through
the growth of the tree. A tree
pruned in this way to a proper vase
shape will produce in the fifth year
—this if it has a good root system.
Roots must also be pruned; the
new roots will be vigorous and pro-
per pruning will produce tap roots.

MR. SIMMS.
Chairman Robinson, who had
followed the speaker very closely,
said that he was beginning to get
a new conception of irrigation. He
had always said "Water is king,"
but now he began to realize that
too much water was used and not
enough cultivation. The dry farm-
ing idea was getting him.

The next speaker was Mr. Simms,
another member of the horticultu-
ral staff who has spent some years
in California, and was later in New
Zealand, where he was Nursery In-
spector. We here had no idea of
the New Zealander's difficulties to
get fruit. They must spray and
spray all the time. He had seen
there some of the most perfectly
pruned apricot trees. They pruned
the spurs in such a way that the
tree right down to the main trunk
would be filled with fruit spurs.
The codling moth was formerly a
serious nuisance, but the govern-
ment had taken up systematic spray-
ing, with the result that where
there had been a former loss of 75
per cent. there was now only 5 per
cent. The industry was given every
encouragement from the govern-
ment.

Mr. E. Smith, an expert on cold
storage who was in the audience,
and who had just arrived in Sum-
merland, was asked to speak. He
said he had not much to say on this
subject; he was simply here to in-
vestigate along the line of pre-
cooling and transportation. It was
a well-established fact that unless
the fruit was pre-cooled it could
not be delivered in a satisfactory
condition. He did not find it pos-
sible to establish such a plant this
season, but would get the necessary
data for the establishment of a pre-
cooling plant next year.

RIFLE ASSOCIATION.

The attendance at the range last
Saturday was somewhat reduced by
the counter attraction of a choir
picnic, which some of the younger
members were unable to resist.
The average scoring of those who
did attend, however, was well
maintained.

Table with 4 columns: Name, 200, 500, 600, Total. Rows include O. Smith, H. Dunsdon, G. Loomer, W. E. Ward, F. Gartrell, J. Dunsdon, F. J. Nixon, W. Neilson.

NARAMATA

An Ideal Location for the Tourist. A Haven for the Homeseeker and Investor

Start of Double Canoe Race at one of Naramata's Regattas

Take a trip to the Okanagan this summer and stop at Naramata. Get acquainted with
this lovely Canadian Summer Resort. A splendid Tourist Hotel with every convenience
overlooking the Lake is at your service. One summer spent in Naramata means every
summer spent there until you finally conclude there is no real living anywhere else.
Then a nice 5 or 10 acre fruit farm on the benches solves the question and makes you
independent for ever afterwards.
