

## Council's Policy is Extension of our Public Utilities.

### Grappling With Inadequacies of Electric Light and Water Systems.

Some Street Lights for West Summerland. Material for Smaller Garnett Valley Pipeline to be Procured.

Future policy in regard to the public utilities of Summerland will be governed to a large extent by the understandings arrived at during the course of the adjourned session of the Municipal Council held last Saturday. The pressing questions of water and light extensions were discussed in all their phases, and a possible solution to the problem of the inadequacy of these systems was worked out in the rough.

Reeve Thomson called a full meeting to order shortly before ten a.m. After the minutes of the last meeting had been read and declared adopted, the few communications were dealt with, and some small items of business previously left over disposed of.

#### COMMUNICATIONS.

A letter was read from Muir Stuart, secretary of the Band, stating that the instruments and uniforms had been surrendered to the Council as directed, and also presenting a detailed statement of the indebtedness of that erstwhile flourishing institution. The most pressing of these liabilities was a note from the Bank already overdue, for \$274.80. A motion was passed that this obligation be paid off at once, and the remainder will be dealt with later.

It was unanimously decided to give an assisting grant of \$100 to the Southern Okanagan Poultry Association.

J. W. S. Logie made an application for water and light to be installed in his residence now in course of erection at Peach Orchard. This was referred to the Board of Works.

J. M. Sutherland applied for permission to fell a tree on the road allowance near some property of his. He stated that being hollow and decayed at the base, the tree was dangerous, and if blown down would do considerable damage to adjoining property. Superintendent Mitchell, concurring in this, it was decided to sell the tree to Mr. Sutherland at the usual price of fifty cents a cord.

Tenders were opened for the hauling of pipe now on order for the Paradise Flat irrigation system, from the wharf to that district. That of R. H. English, at \$2.50 per ton, was finally accepted.

#### A MUNICIPAL CEMETERY.

The Clerk brought up the cemetery question. This had been left over from last year, he said, and should be settled. It appears that the cemetery is still the property of the Development Company, and some provisional arrangement for its purchase had been made with Mr. J. M. Robinson last year, but apparently nothing had been done. After some discussion the Clerk was instructed to gather necessary data and information concerning this, and report at the next regular meeting.

#### CHANGES IN ELECTRICAL DEPARTMENT.

A letter from T. P. Thornber, municipal electrician, was read. It suggested a change in the method of his employment to a monthly salary, and defined the duties he would be willing to undertake for \$125 per month.

The proposals he made were not favorably received by the Council; they were regarded as too onerous. In this connection Coun. Robinson again made a plea that the electrical department should be placed under the direct control of Supt. Mitchell. If this were done, Mr. Mitchell would then be responsible to the Council for all the outside municipal work, and all the minor officials would be under his supervision. These sentiments seemed to meet with general approval so long as the departments were not allowed to become at all

disunited. A motion was ultimately passed that the electric light department be placed under the supervision of Mr. Mitchell, on the same basis as the other departments.

#### ELECTRICAL EXTENSIONS.

It will be remembered that a motion was passed at the last session authorizing electrical extensions to the capacity of the plant, the expenditure not to exceed \$1,000. Accountant F. J. Nixon had been asked to ascertain the names of those who wished the light service, and he had divided these into about a dozen district extensions, giving the estimated expenditure and revenue receivable from each. These called for an expenditure in toto of about \$1660, and would bring in an annual revenue of about \$570. Mr. Nixon explained the system upon which he had based these figures, and went into each of the extensions individually and in detail.

Coun. Dale pointed out that in view of the impending erection of various new store and office buildings at West Summerland that would call for additional connections not included in this report, it might not be wise to extend to the utmost capacity at present. These new buildings would need the light more than private residences, and some light should be kept in reserve for these more or less public buildings.

Coun. Robinson considered an outlay of \$1660 that would pay a dividend of thirty per cent, was a good investment for the ratepayers' money. So long as there was power to spare and people wishing for the light service it was their duty to go on extending. And if the number of applications made warranted the installation of a larger plant this should be done.

Coun. Lewes thought that irrigation extension should come before electric light additions. The Council had assumed obligations in connection with the irrigation system and should concentrate on the better fulfillment of their contracts along this line. Irrigation was a necessity, while electric light was almost a luxury. Extensions in all departments would soon be necessary, and provision should be made for expansion all round. He did not consider that electrical extensions on any large scale should be made when so much was needed to perfect the irrigation works.

It was here that the idea was mooted to float a debenture issue to cover the cost of the most pressing extensions. Coun. Robinson expressed the opinion that when electric light connections could be conveniently and cheaply made, as in Peach Orchard, they should be given. Electric light was a paying proposition, and so long as power was available, extensions should be made. Whatever was done in that direction would not affect the future policy of the Council, but in the meantime here was a splendid investment going begging. Now was the slack time of year, just the time to do this kind of work; later on everyone would be too busy to think about it. He wanted to see electric light all over the municipality.

The Reeve pointed out that if any extensions were to be made a considerable saving would be effected by buying the materials in quantities to cover the whole list.

Coun. Lewes again objected to extensions being made in one direction before any other, when it was admitted that all required enlarging. A sum of money should be set apart and each department should be allocated its due proportion.

There was an animated discussion on the question. It seemed to be tacitly admitted that extensions

#### A WRONG IMPRESSION.

In a report of the Council meeting in last week's issue reference was made to Mr. Thornber appearing before the Council asking for a new arrangement between himself and the Council. He was reported to have said that his time, profits on supplies, etc., totalled about \$2,000.00. While not stated this included, of course, Mr. Gray, as well as Mr. Thornber. Mr. Thornber told the Council that under the arrangements he proposed they would save nearly \$500. As his price was \$1,500.00 the \$2,000 was derived in that way. Talking the matter over with Mr. Thornber lately and into details we find the total expenses including profit on supplies was something over \$1,600. Had his proposition of \$125 per month been accepted Mr. Thornber would, of course, have paid Mr. Gray.

#### CANADIAN BANK OF COMMERCE.

Through the absorption of the Eastern Townships Bank by the Canadian Bank of Commerce, the latter institution will have an office in Summerland. The shareholders of the Eastern Townships formally ratified the merger and the amalgamation will date from March 1st. After that date the local institution will be known as the Canadian Bank of Commerce. Next to the Bank of Montreal the Canadian Bank of Commerce will rank as Canada's largest banking institution.

#### UNITY CLUB CONCERT.

The Unity Club concert put on the stage in the Opera House Thursday night drew a large and enthusiastic audience. In fact it was a capacity house. Two boatloads came from Summerland, and quite a number drove up from Penticton.

Every number on the program seemed to be thoroughly enjoyed and to make mention of everyone who appeared to good advantage would be to mention everyone.

Miss Margaret Mitchell's contribution, in which the little tot sang of the difficulties of bringing up the family brought the house down.

Miss Vera Palmer's singing in the girls' chorus; Miss Hazel Wells in the one act farce, and the excellence of Miss Bessie Mitchell's ocularatory efforts were especially noticeable.

The mixed chorus "The Husking Bee," was also well received, and the Butterfly Dance, by Mrs. J. W. S. Logie was quite a unique feature for a Naramata audience, and was welcomed.

The Unity Club ladies have reason to be proud of the entertainment, but to Mrs. Gillespie, to whose untiring and thoughtful efforts the success of the evening so largely due, most of the praises are due.

The Clubhouse will be formally opened on March 8th.

The following was the program:

- 1.—Motor King, Chorus by Naramata boys.
- 2.—Pots and Pans, chorus by Naramata ladies.
- 3.—You are the Ideal of my Dreams, song, Mr. J. S. Gillespie.
- 4.—Take off Your Hats to Ould Ireland, mixed chorus.
- 5.—Bringing up the Family, song and dance by little Miss Margaret Mitchell.
- 6.—Readings by Mrs. Gillespie's Class of Expression.
- 7.—In Loveland, song and chorus led by Miss Vera Palmer.
- 8.—The River Shannon, quartette and chorus, Misses Wells, Mitchell Hayward and Palmer.
- 9.—Butterfly Dance, by Mrs. J. W. S. Logie.
- 10.—Hawaiian Quartette, Mr. and Mrs. Gillespie, Messrs. Mulford and Manchester.
- 11.—Selection by Naramata Band.
- 12.—Farce Comedy by the Class of Expression.

At the conclusion of this part of the program the floor was cleared and dancing was indulged in for a couple of hours to the able accompaniment of Mrs. Capt. Languedoc.

Messrs. Hatfield & Clark are erecting a large boat shop on the piling driven in the lake last fall, off from their former factory. The shop in which they have been previously doing their boat building will be used for machinery, etc.

## Okanagan Telephone Co. Directors Given a Hearing

### Mr. Dobie Dismissed. Not After Government Line

Bought Local Plant First, Then Sent Inspector. Now Disposed to work under L. S. Co.'s Franchise. Many Promises.

Telephone matters still remain the chief topic of conversation. Whenever a group of men are gathered together it is sure to be discussed before they part.

Keen interest has been revived in the last two or three days by the presence in the lower Okanagan of several of the members of the directorate of the Okanagan Telephone Company.

#### PENTICTON HAS ORGANIZED.

The organization meeting of the residents of Penticton referred to elsewhere in this issue was held on Wednesday evening. Enthusiasm was not particularly strong for which two reasons may be given, one being that three of the directors of the Okanagan Company were present ready to state their case, and another, a Penticton lawyer, recently returned from the Coast, has been discouraging the citizens' movement. The organization meeting was carried through, however, after which those present formed themselves into a public meeting to listen to Drs. Holmes and Walker and Mr. Hankey, all directors of the Okanagan Company. These gentlemen spent the greater part of Thursday at Penticton, and came up to Summerland on the ferry late in the afternoon. A telephone message from Penticton Thursday night stated that the people there were still strong for a local company, and that the seeming hesitation shown at the organization meeting had been thrown aside and that the people were now enthusiastic for a local company.

#### THE DIRECTORS EXPLAIN.

For some days the Okanagan people have been trying to get a hearing in Summerland, but it was felt by those in charge of the movement here that such a meeting would be a waste of time, and that nothing would be gained. These gentlemen, however, telephoned from Penticton asking that they might be given an opportunity to speak with the Board of Trade and any others who might be called together, and consent was given to this. Word was sent around and the office of D. H. Watson was crowded shortly after the appointed hour of seven o'clock Thursday evening.

Reeve Thomson was appointed to the chair and asked the visiting gentlemen to state their case.

Dr. Holmes, of New Westminster, who went very thoroughly into details after stating that he had doubted whether he could get a hearing here, apologized most thoroughly for the treatment that the people of the Okanagan had received at the hands of Mr. Dobie. He said that Mr. Dobie had thoroughly deceived the directorate and misrepresented conditions to them. He denied a number of rumors and reports about the company, especially that they were in any way connected with the British Columbia Telephone Company. The shares of the Okanagan Company were distributed among about two hundred shareholders, and ninety per cent. were held at New Westminster. They had come into the field originally through the purchase of the Vernon exchange, which was represented to them as having a promising future. It was in the acquisition of the Vernon system that they had engaged Mr. Dobie, who was an excellent construction man, and had given good satisfaction until recently. It was upon Mr. Dobie's recommendation that the Kalowna and Lakeshore companies were bought out. Dr. Holmes declared that the only instructions so far issued to Mr. Dobie since the purchasing of these companies was to go and take them over, and report what would be needed to put the systems in good condition. He had no instructions to change the rates, and no change had been contemplated at the pro-

posed time by the directors. Throughout his remarks Dr. Holmes maintained the attitude of a deceived investor whose interests had been jeopardized by one whom he said had suddenly acquired a "swelled head" probably due to the increased business of the company of which he was manager. He also made a plea for the innocent investors who had put their money into the business largely through acquaintance with and faith in Dr. Walker and himself, and he promised that they were ready to make any satisfactory terms with the people.

#### MR. DOBIE'S POLICY IS CRITICISED.

Dr. Walker spoke much along the same lines and said they were ready to hear and answer any questions and deal in a businesslike way with the subscribers here.

Mr. Hankey followed and severely criticised Mr. Dobie's actions. He admitted that he was a good construction man and could handle a gang well, but he undertook to handle communities in the same way as he would a crew of men. The directors had nothing to conceal and were here to please and would endeavor to pull with the people as far as possible. He thought that the rates after all were a small matter, and that the company were ready to give satisfaction. Only when improvements justified an increase would the rates be changed. There was altogether a wrong impression abroad as to the policy of the company. He believed that when the situation was explained matters would not seem so bad.

Dr. Holmes brought up the question of profits. He said that were he now clear of the telephone business he could not be again induced to invest. He instanced Manitoba's experience and tried to discourage the Summerland people investing in a telephone company. He denied that his company was trying to get the government line, but said that Mr. Dobie had suggested that with this line rates could be reduced and better service given the public, and at the same time it would be a financial benefit to the shareholders, and his report had been that the government was anxious to dispose of the system. They did write to the government asking if they wished to dispose of the line. When, however, they had learned of the strong objections to this they had receded from this step. On the way up from the Coast they had stopped off at Kamloops and talked with Mr. Palmer, Superintendent of the Government Telegraph Service. Their directorate had also passed a resolution receding from any move towards the acquisition of the government.

#### RATES AND FUTURE POLICY.

To a question from Reeve Thomson Dr. Holmes said that Mr. Dobie had been with the company since the Vernon system had been bought over. The Reeve asked why, even early in January, Mr. Dobie had charged two months at the old rate and four months at the higher rates to a subscriber who made it a practice to pay six months in advance. This, the directors stated, was news to them. Mr. Hankey said that the directors did not know much about rates, and depended upon Mr. Dobie as an expert man to fix the rates.

He admitted that they should have given him instructions. He said there had been no change in the rates in the upper part of the Valley. To a question from Mr. Logie Mr. Hankey said that the rates had not been altered there till after the service had been improved, after a proper system had been installed. The first intimation he had had of any change of rates was from Mr. Taylor, of Kelowna, whereupon he immediately wrote the managing director, Mr.

Jones, of New Westminster, and soon after that went to the Coast himself.

The Reeve wanted to know what the program of the company was. Dr. Holmes replied to this that no program had as yet been formulated. They had bought out the other companies and then sent a man out to see what condition the plants were in. It was their purpose to put in the best possible plant and give an up-to-date service. He admitted that the way affairs had been conducted looked bad for them. Dr. Holmes stated that there was not much money in the telephone business, and Mr. W. J. Robinson said if such were the case he was surprised that they had paid so much for water. Mr. Logie thought that if they could not buy right they could scarcely be expected to run it right and to the satisfaction of the people. Mr. Hankey declared that he did not think that the Lakeshore Company, being a local concern, would stick the purchasing company. Mr. Logie's reply was that the local company did not want to sell and had put a practically prohibitive price on the plant, and yet they had been bought out without hesitation.

D. H. Watson thought that the Lakeshore company had not been a losing game and would not sell for less than their business was worth. It had been admitted that the plant was not a first class one but we did not need to be told this. It had been tolerated because it had been owned by local people. A big price had been paid, and the company would have to spend a lot more money on it to put it in condition. "Where would we get off at the rates must be raised," Mr. Hankey did not think it was so much a question of rates, this was controlled largely by the Governor-in-Council. Mr. Watson contended that there were no standard rates on which charges might be based. He mentioned Calgary and Edmonton each under an automatic system. Calgary was run by the Government with \$86 per year for business phones and was losing money. Edmonton, on the other hand, was managed by the city and at \$30 for business phones was making a large profit. Dr. Holmes said that the government of British Columbia would regulate the rates.

Dr. Andrew contended that while the Government-in-Council would have to approve of the rates, these rates would be based on the amount of capital invested, and because of the over-capitalization the rates would have to figure high. The directors present had brought out three points. First they had explained Mr. Dobie and wiped him off the slate; then they had admitted making a bad buy, and were proposing ultimately to increase the rates. He thought that the rates must first be definitely stated before their proposition could be considered.

#### THE OLD AGREEMENT.

Mr. James Ritchie said that the people of Summerland had in good faith entered into an agreement with the Lakeshore company for ten years. We were now to have an up-to-date system and the franchise controlled the rates, now it had been thrown to the people that they were not taking over this franchise. When purchasing the plant he supposed that perhaps legally they did not have to take over the franchise, but morally the people felt that they should and to do otherwise would seem like sharp practice. He felt that if he had purchased the Lakeshore Company he would have felt morally obliged to carry out their agreement. Dr. Holmes said that no doubt the franchise was a reasonable one and he saw no reason why they could not work under it.

Mr. Hankey said that the directors did not know the nature of the contract. Mr. Stevens may have entered into an agreement that later he found unprofitable and unsatisfactory. He thought that the rates should be in proportion to the service given.

Mr. Morland asked what rates they would need to charge to pay interest on their investment. Dr. Holmes thought that that was not the point. If a bad purchase had been made the company would have to suffer. He did not know that the franchise of the Lakeshore Company was not taken over.

# The Summerland Review

PUBLISHED BY THE REVIEW PRINTING & PUBLISHING COMPANY LIMITED.  
RALPH E. WHITE, MANAGING DIRECTOR

SUBSCRIPTION RATES: \$2.00 PER YEAR, IN ADVANCE. SIX MONTHS \$1.00.

### Advertising Rates:

LEGAL NOTICES.—Twelve Cents per line for the first insertion; Eight Cents per line for each subsequent insertion.

LAND NOTICES.—\$7.00 for 60 days, \$5.00 for 30 days.

WATER NOTICES.—30 days, 150 words and under, \$5.00; each additional 50 words, \$1.00.

THEATRICAL, ETC.—50c. per inch for first insertion, and 25c. per inch each subsequent insertion.

LOCAL NOTICES or Readers, immediately following regular locals, 20c. per counted line; 10c. per line each subsequent insertion. Half these rates when accompanying display advertisements.

LODGE NOTICES, Etc., 25c. per week, per column inch.

FOR SALE Advertisements, Etc., 5c. per word first week; 1c. per word each subsequent week.

Transient Advertisements payable in advance.

Rates for Contract Advertisements furnished on application.

Copy for change of contract advertising must be in the hands of the printer not later than Wednesday noon to insure publication in the next issue.

In accordance with schedule of prices adopted throughout the valley, charges for advertising are now being made weekly. Heretofore when five issues were made in one month the result was a loss. By the new method customers are charged each week for just the amount of space used.

FRIDAY, MARCH 1, 1912.

### AS IT MIGHT HAVE BEEN AND AS IT WILL BE.

IT MAY NOT BE AMISS to do a little figuring among ourselves so that we may realize what we have saved by organizing a local telephone company.

It has been generally understood that the price paid by the Okanagan Telephone Company for the Lakeshore Company's plant was about \$60,000. This was practically confirmed at Penticton by one of the directors who said that \$107,000 had been invested in the purchase of the Kelowna and Lakeshore systems. The price of the Kelowna system has been stated as \$45,000. Practically half of the Lakeshore Company's investment was in Summerland making the price paid for the local system \$30,000. Putting a very conservative estimate of \$7,000 on the cost of the promised improvements the Okanagan company's investment here would be \$37,000. This expenditure for improvements will be absolutely necessary, according to the manager of the Okanagan Company, and we doubt if this amount will be sufficient to cover the outlay.

Again quoting the directors at Penticton it was stated that the life of a plant was about six years but putting it at ten years it would mean a depreciation of ten per cent. and this is conservative. Here is an annual expense of \$3,700. A company of this kind will not be satisfied with less than ten per cent on the invested capital and would probably feel that they were getting near what was right if it were earning twenty per cent. At ten per cent. this would make another \$3,700. If we allow \$3,000 for a mechanical man, three office employees, office and other sundry expenses, which we believe is also a conservative estimate, the total annual revenue required will be \$10,400. To divide this among the one hundred and sixty-eight 'phones now installed here would mean an annual rental on each and every instrument of over \$60. As doubtless the number of 'phones would be reduced the company would need to further increase the rates to probably \$6 per month. These rates are necessary because of the over capitalization.

On the other hand a figure has been given on the installing of a thoroughly good plant including two hundred telephones for \$18,000. Depreciation at ten per cent. would be \$1,800 per annum. The shareholders holding stock as they will in the local company will be well satisfied with eight per cent., making \$1,440 per year. Again allowing \$3,000 for operating expenses, we have a total annual expense of \$6,240 for two hundred 'phones—and the local company is practically certain to have that number of subscribers. This will average about \$31 per instrument. Our people would perhaps not be dissatisfied if they received no returns on the money investing thus reducing the required revenue to \$4800, or \$24 per 'phone. It may and probably will be found advisable to invest as much as \$25,000 to install an automatic system, but if so, the saving in operating will fully justify the increase in capital expenditure.

### PROUD OF SUMMERLAND.

AS A DAUGHTER DELIGHTS in a word of praise, encouragement or congratulation from her father, so we would take it that Summerland will at any time take pleasure in hearing any good words from her "father." In a recent letter from Toronto to the editor of this paper complimenting us on the stands we have taken editorially, Mr. Robinson pays a genuine compliment to our citizens, and though we have not the stated permission to use it, we are taking that liberty, knowing that it will be of help and because it will be helpful we would have the permission of the writer. These are his words:

"I am real pleased to notice that the Summerland people have risen to the occasion with that telephone dispute. I tell you, the Summerlanders are a great bunch of people, and as I view them from this distance, through the columns of your excellent paper, I want to say to you, that I am proud of the Summerland people."

### SIDEWALKS.

THERE IS SOUND REASONING in the letter of "Pro Bono Publico" published elsewhere in this issue. Properties in front of which sidewalks are constructed are very materially and most directly benefited. Probably there will not be a lot owner who will not put a higher price on his lot immediately upon the construction of the sidewalk. The next to be immediately benefited will be the adjoining properties and those on the opposite side of the street. The public in general will also derive some benefit. Probably when any piece of sidewalk is laid it should be made to extend along the whole length of each block. This would make it a more simple matter to apportion the cost. At any time that the majority of the lot owners along any one block ask for a sidewalk the municipality should be prepared to provide it under equitable arrangements. A division of the cost might be made in some such proportion as forty per cent. to the adjoining properties, twenty per cent to the properties on the opposite side of the street, and the balance to be assumed by the municipality as a whole. Or perhaps fifty, ten and forty might be a more equitable division. There are even some reasons why the lots on the opposite side of the street should not be assessed until construction on that side. But as it is a certainty that the laying of a sidewalk immediately enhances the value of property adjoining there can be no good reason why that increased value should not be shared with the municipality—just a division of the "unearned increment." The payment for such improvements may be extended over a period not exceeding twenty years.

### DRY AIR.

A SOCIETY for the prevention of tuberculosis sends out the following bulletin:

Don't complain if your coal bills are high this winter. It will be your own fault. To fill one's home with hot, dry air, as most people do, is both expensive and unhealthy. Tuberculosis, pneumonia and colds lie in wait for persons who live in this kind of atmosphere. On the other hand, properly moistened air does not have to be heated to as great a temperature as dry air in order to be made comfortable. When you feel cold, therefore, instead of seeing whether the furnace needs fuel, find out if the air does not want moisture. On a cold day the windows of your room should have the perspired look of a kitchen window on washday. In very cold weather the panes ought to be frosted. If you find this is not the case the air probably needs a drink. Place a pan of water in the room, or if you have steam heat, allow a little of the steam to escape. You will soon feel comfortable; although the temperature of the room will not have risen. With properly moistened air a room need not be heated to more than sixty-four degrees."

THE PUBLISHER of a newspaper must live as well as the clothier, the dry goods man, or the grocer. To get the wherewith to live he has one thing to sell and another to rent. He sells his paper and he rents the space in his columns. These are his principal sources of income, and can anyone inform us why he is expected to give either away? He may, of course, do so if he chooses, and as a matter of fact he does furnish a good deal of space rent free. But it does not follow that he ought to be expected to do so as a matter of course, and further, when once he does, it ought to be recognized as a contribution just as much as the coffee or sugar given by the grocer. But it is not generally looked at in that light, yet everybody knows that the very existence of a newspaper depends upon the selling of the paper and the renting of the space as much as a merchant's success depends upon the sale of his goods. There is just as much reason for the merchant giving his goods away free as there is for the publisher.

### The HOME CIRCLE.

Crude Thoughts From the Editorial Pen.

MAN, LIKE THE FIRE, is apt to torment women by going out at night.

A STEP TAKEN FOR MOTHER is a pearl dropped into your future diadem.

BE NEIGHBORLY, be obliging, be kind and courteous, and then when sorrow and sickness come you will have sympathy and help.

WE HELP OUR CHILDREN most when we help them to take an honest view of themselves, and this we can never do by flattering their too easily flattered self-conceit.

LET US TAKE TIME to be pleasant. The small courtesies, which we often omit because they are small, will some day look larger to us than the wealth which we covet, or the fame for which we struggled.

THE BEST WAY to keep the boys at home is to make it an object for them not to go out to seek amusements, for these they will have. Every farm home ought to be made a veritable heaven on earth to its inmates.

A CHEERFUL COUNTEenance is a duty we owe to our neighbors and how much more is it necessary in the home! Our friends can get out of our way if we are not good companions, but our family cannot. They are helpless victims, shut up in the same house with us. For the sake of the children, for the sake of the elders, for the sake of all humanity, let us cultivate a pleasant smile, a happy heart and a habit of cheerfulness.

THE WOMAN is the heart of the home. If she is cross, miserable and dispirited, there will be little life and true happiness within. Let her do her part, but let her refuse to labor beyond her strength. A wise, tender mother is of more importance than anything else in the world to young children. Let every mother train herself to a wise neglect of unimportant things that she may be to her own the embodiment of sympathy, hope, gentleness, charity, wisdom and love.

IF THE LITTLE CHILD gets a bump or a fall, or a cut or a skinned finger, mother will say, "Come to your mother and let her pet you," and she will kiss the bumped head and wrap up the hurt finger with a few kind words. Then the child knows you love it and it will love you and always respect you, and when years have passed and gone and they have grown to manhood and womanhood they will look back to their childhood days as the happiest days of their lives.

A word of comfort kindly spoken will many a moment cheer; A word of scorn to a heart that's broken will cause grief for many a year.

LET HOME STAND before all other things. No matter how high your ambition may transcend its duties, no matter how far your talents or your influence may reach beyond its doors; before everything else build a true home! Then from its walls shall come forth the true woman and the true man, who shall together rule and bless the land. Is this an over-wrought picture? We think not. What honor can be greater than to found such a home? What dignity higher than to reign its undisputed mistress? What is the ability to speak from a public platform to large, intelligent audiences, or the wisdom that may command a seat on the judges' bench, compared to that which can insure and preside over a true home, that husband and children "rise and call her blessed?" To be the guiding star, the ruling spirit in such a position is a higher honor than to rule an empire.

## Naramata Notes.

Mr. and Mrs. Hespeler paid a short visit to friends in Naramata on Wednesday.

Messrs. E. and H. Steers have had a cottage built on the property immediately east of the Gibbony house.

Mr. J. S. Gillespie is having the grounds in front of his lot levelled off preparatory to certain other improvements to his grounds.

There is a talk of a football club being organized in Naramata. This is good talk, and it is to be hoped that it will terminate in action.

The fruit lot known as the Law property has again changed hands, Mr. W. Armour being the purchaser. He is already making preparations for development work.

The first sod of 1912 plowing was turned on Saturday last, February 24th, on the four-acre property back of Mr. Mulford's, purchased recently by Mr. Geo. Wolstencroft.

The organ recital next Monday evening to be conducted by Mr. Parr, of Penticton, should draw a large crowd. The choir of the Penticton Methodist Church is to assist in the service of song. Doubtless, this, the first occasion of its nature in Naramata, will be well patronized.

Mrs. Jas. Wells arrived last Friday from Calgary to take up residence in Naramata. She was accompanied by Mr. Ross Price, a grandson, who has expressed a wish to stay in the Okanagan after the experience of the severity of this year's western weather. Our balmy breezes are certainly alluring.

## FACTS ABOUT PITNER LIGHTS

1. A PITNER ARC lights a radius of 75 yards, so that a newspaper may be easily read up to that distance. Could you want a better street light? An arc outside your store is the best ad. you could have.

2. PITNER MANTLES give a light very like daylight. Hence the great value of inside lights in stores and houses. Sixty dollars will install a plant to light your Kitchen, Dining Room and Living Room.

3. The PITNER PARLOR LAMP gives 125 C.P., as much as five oil lamps. It is all metal, never smokes and will burn in any position.

If you need Pitner Supplies of any kind, Write to The

[Continued from Page 1.]  
were called for all round. The question only was how to provide for them.

## APPLICATIONS FOR LIGHT WANTED.

Coun. Robinson suggested that the householders who wished for the electric light at the present time, and who would want it in the near future get their applications in right away, and on the strength of what these applications call for, money be raised to provide for them.

This suggestion he embodied in a resolution seconded by Coun. Dale; that the electric light be extended to Peach Orchard, and that an advertisement be inserted in the paper that any person who desires electric light should make application to the municipality before its next meeting. This motion was not carried unanimously, Coun. Lewes dissenting to the first clause. The object of the latter part of the resolution is to get information as to the amount and location of the extension work that needs immediate attention, in order to facilitate the working out of plans to cover it.

Mr. Nixon was also instructed to get further estimates for the extension of the system to Prairie Valley and to the residences past the old Anglican Church.

## AFTERNOON SESSION.

The afternoon sitting was occupied mainly by an exhaustive discussion on the water systems. A few minor matters were dealt with, however.

Coun. Robinson recommended the appointment of W. Watson as Constable to succeed Jno. Tait, who recently resigned. Mr. Watson was accordingly appointed.

Mr. J. M. Sutherland's claim for damages, resulting from an interrupted water supply, due to alleged municipal negligence, was further discussed. It was pointed out that this occurred away back last year, and any claim should have been put in to the old Council. Claims of this character are not usually recognized after six months have elapsed, and the Clerk was instructed to write Mr. Sutherland to this effect.

The Clerk was also instructed to send a written reply to Mr. J. R. Brown re the waste water complained of on his property.

Mr. Chadwick again waited on the Council in reference to his water grievance. He said he had found a standpipe had been put on to his property, and after consideration he was willing to pay his irrigation rate on one condition. He found that the open ditch running through his property had caused the growth of some bushes and saplings on its bank, and two or three days work would be necessary to remove them. If the Council were prepared to take off the two dollars of accumulated interest on his account, he would remove this growth himself. But if he had to pay the rate and its interest, he would expect the Council to do the work. It was pointed out to Mr. Chadwick that to accede to either of these conditions would be to establish a bad precedent. Open ditches ran through many properties, and to undertake to clear his would be to undertake to clear them all. Mr. Chadwick went away declaring that if this was the case the rate would go on unpaid.

## STREET LIGHTS FOR WEST SUMMERLAND.

Coun. Dale brought up the question of street lights at West Summerland. Their estimated cost was only about \$80, and a motion was put through sanctioning the erection of four lights in that section. They will be placed near the Baptist Church, the Supply Company's Store, the Municipal Offices and the Anglican Church. Two lights are also to be placed on the Gulch Road out of town, one near Mr. Hespeler's, and the other at the fork of the roads above the Hospital.

## WORK ON IRRIGATION SYSTEM.

The Board of Works submitted a voluminous report dealing with the water systems. It contained a list of improvements and extensions, mostly requirements for the coming season. The Superintendent and Accountant were in attendance, and each clause was taken up separately and investigated. Many of them caused much discussion; indeed, it must be some time since the irrigation system has received such attention. The outcome of the consideration of this document was that work to the extent of

\$20,000 was sanctioned to meet the immediate needs of the coming season. This work consists mainly of extensions and improvements to existing works. Beyond the new Paradise Flat system not much new work will be undertaken.

## PROPOSED ISSUE OF DEBENTURES.

Several schemes for extensions of some magnitude were held over, as being not of immediate necessity. It was recognized, however, that some of these must come in the near future. Among the items so treated were the proposed big Garnett Valley power pipeline scheme, an irrigation system for Trout Creek Point, and domestic water for Peach Orchard. The general feeling of the Council inclined towards going before the people with a proposition to raise a considerable sum of money by debenture issue for extensive improvements and enlargements to the public utilities. It is not probable that anything of this nature will be submitted before the fall, at the earliest. Besides covering the cost of the larger extensions, it is proposed to allow an ample margin to meet any needs that may crop up from time to time.

## GARNETT VALLEY WATER SYSTEMS.

The big Garnett Valley power pipeline scheme received considerable attention. The installation of this line would solve a number of problems. Besides giving additional power for electrical development, this line would probably be used for domestic water purposes as well—something Garnett Valley has been wanting for some time.

Definite steps were taken in regard to the smaller pipeline for this section. This is a line to replace the present flume and ditch which is now inadequate and unsatisfactory. It will give an enlarged service to people in the Valley, and will also bring water to some portions of Sijwash Flat not yet under the water. Coun. Dunsdon pointed out in regard to this that it was no use putting in a small pipe. New land would constantly be coming under cultivation and water must be provided for it. The acreage in that district now under cultivation would be considerably increased in the future and provision should be made for this.

Coun. Robinson emphasized the necessity of making any work done as permanent as possible. Cheap work that would last but a season or two was false economy. When the orchards came into bearing as they very shortly would, the property holders would not object to paying a little more for their water provided they got all they needed.

There was much discussion as to the policy to be pursued in laying this pipe. The idea was brought up of having it put in by competitive tender; another suggestion was to manufacture and install municipally. A sixteen-inch pipe is required at the smallest, and finally a motion was made by Coun. Dunsdon, seconded by Coun. Dale that the Board of Works get quotations for the pipe required for the Garnett Valley Dam works, and if these are lower than can be made locally, this is to be ordered at once.

## ADDITIONAL RESERVOIR SITES.

Another item looking towards the needs of the future was the appropriation of a sum of \$500 to send men back into the hills to look out more reservoir sites. Further conservation of water will become necessary not very many years hence, and it was felt to be necessary that additional sites be located. After the reports of these prospectors are received, the Engineer's advice and opinion will be sought.

Adjournment was made at about five o'clock. The next meeting of the Council will be a regular session on Tuesday morning, the 12th inst.

## FOR EXCHANGE

creased the rates would not the company have taken cognizance sooner. It was only because the people refused to submit to the rates and the future of the company was jeopardized that any notice had been taken by the directors. Mr. Rennie said that if an all night and Sunday service were given the rates would have to be raised. Dr. Andrew pointed out that this service would be obtained by the installation of the automatic system which the Summerland people proposed to put in. He had concluded that the people could not safely make any agreement with the company. The last agreement had been made void by the transfer of ownership and some move would again be made to increase the rates. Local ownership was the only safeguard.

Mr. Mellor said that there would be no mercy shown by the company, and that the business would be run better by the home concern.

### THE COMPANY AND KELOWNA.

Mr. Coates, of Kelowna, was the next speaker. He gave the facts about conditions at Kelowna, and showed up the attitude of the company toward the people there. He said it was demanded of the people there that they immediately sign a yearly contract or have their 'phone removed. Further, the Okanagan Company permitted no person to use any 'phone other than his own and told of instances where a man could not telephone to his own home from any other 'phone.

Mr. Coates said that in the contract made by the Okanagan Telephone Company with the former owner of the Kelowna exchange the company specified that they would recognize no contracts made by the old company and that this agreement was signed by Mr. Rennie himself.

### CONVINCING CALCULATIONS.

Mr. Moreland in his remarks said that he considered the statement made by Mr. Rennie showed some very lax business methods. He could not think that the company really intended to live up to a franchise with which they were not familiar as had been admitted by Mr. Rennie. Mr. Moreland then dealt somewhat with figures, pointing out that it would be necessary for the new company to charge exorbitant rates in order to pay interest and dividends on their investment. He said they had paid two prices for the plant of the Lakeshore Company, and that the purchasers had admitted that the outfit was a very poor one and that a large amount of money would have to be expended to make it satisfactory. Mr. Moreland claimed that the total cost to the Okanagan Company would be nearly three times the cost of installing a new plant, and of course, the rates would have to be made sufficiently high to pay interest and dividends on this inflated price.

There were a good many other speakers, among them being Messrs. Rathvon, Earle, Conklin, Wade, and Greer, of Penticton. The people there assembled unanimously passed a resolution in favor of a local company and fixed Wednesday, February 28, as the date of an organizing meeting.

## Penticton People Discuss Telephones

Explanations of Secretary Rennie Give Poor Satisfaction.

### Local Company Will Be Organized.

Last week the Penticton Board of Trade, telephone subscribers and others interested held a meeting to discuss the advisability of organizing a local company. Mr. J. A. Rennie, secretary of the Okanagan Telephone Company was present, and also Mr. F. S. Coates, of Kelowna, and Messrs. Stark, Mellor, Kirk, Geo. Gartrell and Moreland and Dr. Andrew, from Summerland.

### IGNORANT OF THE SITUATION.

Mr. Rennie put up a strong plea for the Okanagan Company, and endeavored to work on the sympathy of the people, putting the responsibility for what he termed a "misunderstanding," upon Manager Doble, who, he said, was acting without the authority of the directors. Not until Sunday, he declared, did he or any other of the directors know of any trouble in the Southern Okanagan, and he only learned of the situation through Mr. Hankey, of Vernon, whom he met at Victoria. Upon learning of this he had been sent here by the directors. Mr. Rennie undertook to shield the Board of Directors by blaming Mr. Doble for causing the trouble. He even went so far as to say that Mr. Doble had not been instructed to raise the rates and the Company are prepared to adhere to the rates of the old company, and be governed by their franchise. When questioned, however, Mr. Rennie admitted that he had never seen the franchise of the Lakeshore Company, until that afternoon at Penticton. This admission caused the people to doubt the sincerity of the Company to live up to an agreement the nature of which they did not know. Mr. Rennie further said that the Company were prepared to make an agreement with the people.

### SOME AWKWARD QUESTIONS.

Dr. Andrew then followed, and after outlining what had been done here, put a number of questions to Mr. Rennie. The Doctor wanted to know if the Company could take over the plant without assuming the obligations of the former company. Mr. Rennie replied that they would live up to the franchise of the former company. Another question put by Dr. Andrew was that if Mr. Doble had reduced rather than in-

**BEHAVIOR OF FROST.**

**SOME NEW DOCTRINES.**

Not so long ago we were told that the cause of plants being damaged in spring frosts was not so much the freezing of the plant cells as the rapid thawing of them in the sun's rays. Now there is a new theory; in spring there is no sugar in the plant's tissues. A plant can weather the winter because during the cold it develops its starch into sugar, which resists frost, but when the warmer weather comes, the sugar is reconverted into starch, which renders the plant defenceless. Ought we to keep our delicate plants colder than the spring temperatures then, in order to save them?

Another doctrine, though it is not equally subversive of the beliefs of yesterday, explains what some gardeners may hitherto have seemed difficult of explanation. When the sun goes down, and earth and the grasses and plants on it lose heat and become colder than the air, they consequently cover themselves with dew or hoar frost. But in turn, they cool the air next to them, and the cooled air in its turn trickles like water down hill to the valleys. So that the plants on the tops of the hills become surrounded by a new stratum of air which is comparatively warm, while the cooled air which goes on trickling its way down hill collects in hollows on the hillside and in the valley at the bottom; the coldest air always gravitates lowest. Consequently the plants on the top of the hill escape damage, while those in the valley are frozen in icy pools of air.

You get then, the seemingly contradictory conclusions that plants in "exposed" positions are likely to be undamaged by frosts that lie in the shelter of the valley. That is no doubt a fact which the countryman or gardener who has had personal experience of frost in hilly country well appreciates, even though he may not be equally ready with the reason for it.—The Spectator.

**STEAM LAUNDRY.**

A long felt want will in a measure be supplied by the Okanagan Steam Laundry. There has recently been erected at Vernon a large concrete building about 60 feet square, and costing about \$6000, in which has been installed all the latest laundry machinery at a further cost of about \$8000. A thoroughly competent and experienced laundry man has been placed in charge of this plant. This large equipment is in a position to handle any quantity of work, and the proprietors promise to turn out as fine work as is possible for any laundry. A representative of the laundry recently visited Summerland, and while here appointed Mr. T. E. Moore as their local agent. He has arranged with Mr. Moore to call for and deliver all parcels, giving a regular weekly service. Mr. Moore has been supplied with price lists for distribution. The first insertion of the company's advertisement appears in this week's issue.

**GENIUS, FAME, POVERTY.**

Charles Dickens made \$200,000 on one lecturing tour; but his descendants, it is said, are now in want. His oldest son, Alfred Tennyson, whose sudden death was recently recorded, had been travelling through the States delivering lectures in an endeavor to keep the family pot boiling. Tragic incidents of this kind are of daily occurrence, and yet they make as little impression upon us as the rain upon the duck's back. One of our newspapers in commenting on the pathetic facts asked the significant question: "What is to become of us when we are old?" There is but one answer: A man must save in his youth if he will have a "nest egg" in the days when his locks are hoary and his earning powers have departed. But that is not all. He must adopt a system of saving which will not fail him in the hour of trial. This system has been provided under the Canadian Government Annuities Act, in regard to which you may obtain literature from the Postmaster, or on application to the Superintendent of Annuities, Ottawa.

**JIMMY'S LETTER TO DAD.**

Okanagan College,  
West Summerland,  
February 28, 1912.

Dear Dad:

No letter to you and none from you last week. Really there seems nothing to write about. Everybody is studying hard and things are dreadful quiet.

The inter-class basketball league for the Sawyer Cup is almost done. The Matrics have two more games to play, while the Business and First Year have one each. Now the Matrics are ahead, having won three games and lost one by default. The other teams are tied for second place. The Matrics and Business play to-day, and on this game a great deal hangs as to who will finally hold the cellar position in the league. The first place will probably be taken by the Matrics.

Last night the air was rent by wild shrieks as the town juniors played hockey with the College juniors. The score was 9-1 in favor of the town, which about represented the quality of the play. As one of the college players told me about it he expressed himself thus: "They beat the burr off us!"

The football match scheduled for last Saturday did not materialize, but they have promised us a game for sure this coming Saturday. I think one of the Penticton players had just got married, and he couldn't persuade his wife to let him play.

I expect the Sauter-Moore recital of the Tennyson—Strauss "Enoch Arden" will be fine.

This Strauss, you know, isn't the one commonly called the Waltz King; but another. I heard it given in the east once and it was fine. Better come up for the evening. I will write you the date.

How are the snowdrops coming in the lawn, and ask Lou if she has heard a crocus this spring.

Yours as ever,  
JIMMY.

**LETTER TO THE EDITOR.**

The Columns of THE REVIEW are open to the public for the discussion of matters of general interest. No notice can be taken of anonymous communications. **SIDEWALKS.**

The Editor,  
The Summerland Review,  
Summerland, B.C.

Dear Sir:

Your report of Council proceedings in last week's issue leave a doubt in my mind as to the procedure agreed upon relative to the cost of sidewalks.

You say that there was a general feeling among all present that the adjoining property should bear a portion of the cost.

Surely it was not decided to go on and build without deciding this point, and it seems unreasonable to suppose that, contrary to custom in other places, these sidewalks should be built without the property immediately benefitting being assessed with one half the cost.

PRO BONO PUBLICO.  
**MUSIC BY WIRELESS.**

A. W. Sharman, inventor of a system of sending telephone messages by wireless, has succeeded in transmitting musical notes, chords, and even tunes from wireless stations on land to ships at sea, and from one ship to another. By means of his invention he expects soon to be able to furnish ships with a receiving instrument constructed something like a piano, from which brass band, string orchestra, and piano music may be extracted at the will of the operator, miles away. In making his experiments, Mr. Sharman had the apparatus at a land station, and connected with the sand by means of metal rods. In a motor boat, over half a mile away, was the receiving instrument, from which metal plates trailed into the sea. The inventor then sent out several musical notes which were heard distinctly through the receiving instrument in the boat. "My Country," 'tis of Thee" followed, every note being faithfully recorded.

**THE ODISIOUS COMPARISON.**

(The British Callifornian)  
A subscriber calls for certain figures; here they are:  
Population of London over 7,000,000; murders last year, 10.  
Population of San Francisco and Oakland, half a million; murders last year, 534.

[Continued from Page 1.]

The Reeve said that when the Lakeshore charter was granted the people felt sore. All other public utilities excepting the telephone were owned by the people and they did not like the telephone to be put into the hands of the other company. That was the stand of the people to-day; all public utilities must be owned and controlled by the people.

In speaking of the charter Mr. Hankey said that the Okanagan Company could only well operate under their one charter rather than the various local charters. Mr. Logie asked if they assumed none of the obligations of the Lakeshore company, how could they assume any of the benefits of their franchise, and any of the rights of that company. This question was somewhat evaded, but Dr. Holmes stated that he did not think that it would be very hard to live up to both the charters. Mr. Logie declared that there could be no one-sided agreement. "We don't know who you represent, or what authority you have to enter into any agreement. You do not seem to have any definite proposition, to make. Dobie was the only man who knew where he was at. Did you or did you not repudiate the Lakeshore agreement with the Municipality when you purchased their plant? You cannot walk over the people of Summerland. Your company has made some huge blunders; they have paid too much for the plant, and they will find snags in their charter that they did not

anticipate."

**NOTHING DEFINITE ARRIVED AT.**

James Ritchie gave some instances of the shameful treatment to which Kelowna citizens had had to submit since the advent of the Okanagan Company in that city.

Dr. Andrew said that these gentlemen had come to fix things up and he wanted to know what they were going to do. Will they and when will they give the improvements? What will the rate be and when will it be enforced? He thought we should have something definite to work on, as to rates, improvement plans and whether the company intended to work under the Lakeshore's franchise. Mr. Hankey said they would need to take time to consider, and they must see the franchise. They came here to meet the people and to let them know they were not hold-up men. He did not blame the people for forming their own company and they were here to apologize. They were not asking the local people to forego any advantages they may have under their own system, but the Okanagan Telephone Company was not as bad as had been represented.

Mr. Logie promised to forward them a copy of the Lakeshore Company's franchise.

Mr. Hankey assured those present that if the company made any promise they would carry it out, but they could not make any definite offer off-hand.

This closed the discussion and the meeting adjourned.

**Local News Items. Local News Items.**

James Ritchie returned home on Thursday night after more than a week's absence at the Coast.

The junior hockey match between the college and the town was played on Tuesday. The game was a good one and while the score was very one-sided the playing was not so bad. The final score was 9-1 in favor of the town boys.

Mr. C. S. Stevens, who went to Penticton on Thursday night to meet the directors of the Okanagan Telephone Company, went up on the boat with them as far as Kelowna. He is expected to return to Summerland for the week-end.

There will be no service in the Lakefront Baptist Church Sunday evening. Instead there will be a short talk given by Mr. Litch to the Sunday School scholars at 3.30, which will be followed by a regular service at which Mr. Litch will preach. This service will take the place of the regular evening service and the orchestra will be present as usual. There will be service at the West Summerland church both morning and evening.

**SUMMERLAND TELEPHONE COMPANY.**

**NEW SYSTEM SOON AS POSSIBLE**

After the meeting with the Directors of the Okanagan Telephone Company, a number of the Summerland Telephone directors together with a few prominent citizens discussed the situation in its latest phase. They were all unanimous in the opinion that it was advisable to continue on the lines already outlined for the local company. The directors have been gathering information and have practically decided on the automatic system. A representative from each of two different manufacturing houses are now on their way here to lay plans, prices, etc. before the directors. Penticton and Kelowna seem equally fixed in their purpose to have locally owned systems.

**AMONG THE BANKS.**

Mr. E. B. May, manager of the Bank of Montreal, will soon be leaving for California on a month's vacation. Mr. H. J. Collas, manager of the West Summerland branch, has this week returned from England, and Mr. Gault, who has been relieving Mr. Collas has been transferred to the main office. There he will act as accountant, taking Mr. Sackling's position, while the latter acts as manager during Mr. May's absence.

The staff of the Canadian Bank of Commerce has been increased to four. Mr. F. G. Exshaw, from the Revelstoke branch being the latest addition.

**LADIES' AUXILIARY BOX SOCIAL**

At a meeting of the Ladies' Hospital Auxiliary held last week, it was decided and arranged to hold a Box Social in the Men's Club on the evening of Thursday the 11th of April. All the young ladies of Summerland are especially asked to make note of the date, and make preparations accordingly. The late Hospital Board have arranged with the ladies, so that the work for the present will be carried on by them. It is hoped that all will take part in this event, as funds are necessary for running expenses.

**PROVINCIAL ELECTION March 28.**

Victoria, B.C., Feb. 28—The executive decided yesterday afternoon to dissolve the Legislature. A new election will take place on March 28; nominations on March 12.

**POULTRY ASSOCIATION:**

The annual meeting of the Southern Okanagan Poultry Association will be held next Wednesday, March 6th, in the Men's Club.

There will be a report from the president, another from the secretary-treasurer, and also a report from the delegate to the British Columbia Poultry Association. The election of officers will also take place and other routine business transacted.

Revelstoke is to hold a dog and cat show in the autumn.

Ten million dollars is invested in plant for the manufacture of automobiles in Canada. There are fourteen factories and all of them are in Ontario.

Mr. and Mrs. E. R. Simpson have returned from Ottawa arriving on Thursday night.

Leave your subscription to The Canadian Horticulturist with A. A. Derrick, sixty cents per year.

School hours changed this (Friday) morning, March 1st. School now opens at 9 instead of 9.30.

Mr. and Mrs. J. M. Sutherland accompanied by their two little ones went down to the Coast on Monday morning.

It is reported that the acre lot near Geo. Gartrell's, held by Mrs. Snider, of Portage la Prairie, has been sold to Mr. Male.

The Kettle Valley railway survey in the Naramata district is about completed. The line will run about a mile from the town and the lake.

Mr. and Mrs. J. D. Johnston with their three daughters came in from the Coast Thursday night. They have been absent from home for some weeks.

A decidedly novel offer is made by A. A. Derrick in his advertisement of this week which will doubtless create considerable interest among the ladies of Summerland.

Some of the young men of the Gymnasium Class at the College went down to Penticton last Friday evening and gave an exhibition of gymnastic work in connection with an entertainment given by the Penticton Boy Scouts.

The total membership of the Overseas Club is reported from headquarters to be 75,655. An effort is being made to bring this figure up to 100,000 by Empire Day. The members of the Summerland Club are doing their share to attain that figure. It is probable that the local Club will hold a special celebration on Empire Day.

There is an excellent fire-proof safe in the office of Mr. C. H. Cordy, fitted with safety deposit drawers. While most of these drawers have been rented, there are yet a few available. By taking a commonsense precaution against the loss of valuable papers in this way you get the benefit of a safe without its cost for only \$5.00 per year.

**MICHIGAN**

The regular meeting of the Women's Institute was held in the Parlors of the Men's Club, Friday February 16th, with a good attendance, about thirty-five being present. The program consisted of readings and music, both instrumental and vocal. An interesting feature of the meeting was a demonstration of Cream Puffs by Miss Margaret White.

The Overseas Club has formed a Sports Committee, comprised as follows: Messrs. R. H. Helmer, John Weeks, W. Fosbery, W. J. Beattie and G. Fisher. The captain of the football team is Mr. Fisher and Mr. Weeks is vice-captain. The Club is negotiating with the various clubs in the Valley with the formation of a football league in view. The outlook for the coming season is promising and we shall probably hear much of football.

W. C. Kelley, who was called to the Bar of British Columbia last week returned home Monday and has opened a law office at West Summerland, south of Richardson's Lumber Yard. Mr. Kelley is an honor graduate in philosophy of Manitoba University having won the silver medal in that course. He was formerly a member of the law firm of Fisher, Wilson & Ewart, and also conducted a successful practice in Winnipeg for several years. The Review wishes him success.

The Poem Recital mentioned in last week's issue is to be given in Empire Hall next Wednesday evening. It will be a reading of Tennyson's "Enoch Arden" by Mr. William Sauter. Mr. W. H. A. Moore will accompany him with music specially written for this dramatic poem by Richard Straas. Those who have heard it before pronounce it particularly good. To those who have never heard anything of this nature it will be something of a novelty, and it should not be missed if it is at all possible to attend. A portion of the proceeds goes to the Music Department of the College.

Whole No. 187

## Uneventful School Board Meeting.

School Grounds to be Improved.  
Drinking Fountains Ordered.

Special Meeting of the Board to be Held 16th March.

The business dealt with at the regular meeting of the Board of School Trustees last Monday morning was not of exceptional importance. The session was brief and uneventful.

At the conclusion of the reading and adoption of the minutes of the last meeting, the secretary read a letter from the Superintendent of Education, Victoria, concerning two new flags asked for. It stated that these would be forwarded upon the recommendation of Inspector Miller.

### SANITARY DRINKING FOUNTAINS

The secretary submitted two quotations for sanitary drinking fountains, to be installed on the school premises. One was from W. Ritchie at \$9.50 each, and the other from the Borton Plumbing Heating & Co. for different styles varying in price from \$53.00 to \$11.50. It was originally intended to place these only in the Central and High School, but Mr. Robinson took up the question of one being put in the town school as well. He thought that school should be given adequate water facilities. There was now a standpipe on the edge of the lot, and to make a connection and carry the water into the building would be an easy matter. Ultimately two motions were put through in regard to these matters; one that a tap and basin be placed in the town school, thus giving that building an inside water service, and at the other that the quotation of W. Ritchie for four approved sanitary drinking fountains be accepted; two for the Central, and one each for the Town and High Schools.

### ORDERING OF SCHOOL SUPPLIES.

Among the accounts submitted for recommendation to payment were some small items that had been ordered direct by some of the teachers from the local stores without the knowledge or sanction of any member of the Board. This course of procedure gave rise to some comment. It was thought that there should be some authority sought before ordering supplies locally, so that when the account was rendered, someone could vouch for it. There should be no more promiscuous haphazard ordering of goods. To cover this a motion was carried that in future no goods be purchased without the authority of the secretary or some member of the Board.

### BEAUTIFYING THE SCHOOL GROUNDS.

The question of improving the appearance of the school grounds

was brought up and definite action taken. Chairman G. J. C. White said that last year's Board had decided to go ahead with this matter, but the early frosts had prevented the commencement of any work. It had been decided then to take off all the stone, plow and again remove stone.

The opinion of the Board seemed to favor immediate action in regard to these grounds. There was some question as to whether it would be better policy to have the work done by tender, or to engage men by the day. It was thought the land should be levelled, and stoned and plowed to the depth of six inches.

It was finally moved by W. J. Docking and seconded by S. H. Adams that tenders be asked for the removal of the stones on the school grounds, the plowing of the grounds and the removal of all stone over two inches in diameter to the depth of six inches, and the leveling of the ground. The stones to be left outside the street line in an even row, about three feet from the line; tenders to be in by March 15th, and the work to be finished by the 15th of April.

Ultimately a stone wall will be built round the two sides of the grounds facing the road.

A special meeting of the Board will be held on the 16th inst. to open tenders.

Mr. Robinson brought up the matter of the grounds round the town school. This property was not even fenced in. Messrs. White and Robinson will look over these grounds and report at the adjourned meeting on Saturday the 16th.

A complaint by Mr. Adams regarding the smallness of the desks in the Entrance class was discussed and the secretary was instructed to confer with Miss Rothwell and Principal Hunting regarding a rearrangement of the desks.

The monthly reports of the teachers were received and filed.

### ACCOUNTS PASSED.

The following accounts were recommended for payment:

Salaries	\$500.00
Supply Company	22.88
A. Bragini	6.50
Review Company	18.40
A. H. Steven	178.50

Taylor & Co.	.50
C. N. Borton	2.80
<b>Total</b>	<b>859.18</b>

## SUMMERLAND TELEPHONE COMPANY, LTD.

GRANTED CHARTER

Directors Meet Saturday

A charter to the Summerland Telephone Company was issued by the Provincial Government on March 5th. In other words the Summerland Telephone Company was incorporated March 5th, 1912, under the Companies Act of the Province, and is now authorized to transact business. There will be a meeting of the directors at W. C. Kelley's office to-morrow, Saturday, and we may now expect rapid developments.

### BIG PROGRAMME.

British Columbia Premier Gives Details of Railway Policy.

Premier McBride's railway policy as outlined by him just previous to the dissolution of the legislature is briefly as follows:

Aid will be extended for the construction of the Kettle Valley Railway from Coldwater Junction to Hope, a distance of fifty miles, and down the Coquahalla River. The V. V. and E. Railway is to have running rights over this road satisfactory to the Great Northern.

The Canadian Northern Pacific will build a road from Kamloops to Kelowna via Grand Prairie and Vernon, and will also have a branch line to Lumby, a total distance of 145 miles.

The Pacific and Great Eastern Railway will be aided in construction from Fort George to North Vancouver and on by way of the second narrows bridge into Vancouver and New Westminster. This line will come down through the Pemberton Meadows and absorb the present Howe Sound line, coming down Howe Sound and into North Vancouver from the west side. This will be the first link in the railway to tap the Peace River district. It is provided that a ferry service will be maintained between the mainland and Victoria.

The Canadian Northern Pacific will receive a grant for 150 miles on Vancouver from Campbell Bay to Hardy Bay.

The assistance to be given by the Government to these various enterprises will be as follows:

The Kettle Valley line will get a cash grant of \$10,000 per mile, approximately half a million dollars in all. The province is also to give \$200,000 for the construction of a bridge across the Fraser River to Hope. This will afford connection between the Kettle Valley line and the C. P. R. and will provide a short line between Vancouver and the Okanagan and the Kootenays.

The Canadian Northern Pacific will receive a guarantee to the extent of \$35,000 per mile for the construction of its line on Vancouver Island. This line will furnish an entrance to Strathcona Park.

The Canadian Pacific on Vancouver Island will build from Parksville to Comox. The lease of the E. and N. to the Canadian Pacific is authorized so that the road may be used as the Vancouver Island Division of the Canadian Pacific.

The Canadian Pacific will take over the Kaslo and Slokan Railway and for this will receive \$100,000 from the province. It will cost the Canadian Pacific four hundred thousand dollars to take this line over from the Great Northern. The Kaslo and Slokan line is to be standardized.

The line from Fort George to North Vancouver will be built by Foley, Welch and Stewart, who will be given the same guarantee of bonds and assistance as were the Canadian Northern in the construction of their main line in British Columbia.

Knowing that some of our subscribers are keeping a file of the published weather reports we have endeavored to publish this at least once during the month. All through February, however, the January report was crowded out, but in order to make subscribers' records complete we have put it into this week's issue. February's report will follow next week if possible.

## CO-OPERATIVE POULTRY ASSOCIATIONS.

NEW PROVINCIAL BRANCHES.

Victoria, March 6.—The work of the provincial department in connection with the industry of poultry raising is meeting with gratifying success. Mr. R. J. Terry, who was engaged about a year ago as poultry instructor, is to be provided with an assistant, and the department is now looking for a suitable man in the East. Mr. Terry will be known officially as the chief poultry instructor, while his assistant will be styled poultry instructor.

Within the past few weeks eight new branches of the Provincial Poultry Association have been formed. These are at Penticon, Abbotsford, Port Haney, Whonnock, Chilliwack, Greenwood, Kelowna and Burquitlam. That at Penticon is the largest having started with eighty-four members. All of these local associations are buying their poultry food supplies in the prairie provinces by co-operation and are marketing their eggs also by co-operation. All report that they are finding this plan much to their advantage. The Penticon association has made an arrangement to supply the local grocers first and to ship out their surplus. As the local grocers have agreed to pay cash the arrangement is declared to be very satisfactory to all parties concerned.

The poultry business is reported to be developing rapidly in the Fraser Valley, largely owing to the fact that the land is being cut up into smaller holdings. The department here, however, strongly questions a statement that was made the other day in Vancouver to the effect that the Vancouver market was now being supplied altogether with ranch eggs. As a matter of fact the officials of the department state that there are not enough hens in the province to supply the Vancouver demand and, moreover, there is an average of a carload a day of storage eggs coming into the Vancouver market from the United States.

The poultry business is reported to be developing rapidly in the Fraser Valley, largely owing to the fact that the land is being cut up into smaller holdings. The department here, however, strongly questions a statement that was made the other day in Vancouver to the effect that the Vancouver market was now being supplied altogether with ranch eggs. As a matter of fact the officials of the department state that there are not enough hens in the province to supply the Vancouver demand and, moreover, there is an average of a carload a day of storage eggs coming into the Vancouver market from the United States.

### REPORT OF THE PROVINCIAL SHOW

H. Bristow, the delegate to the Provincial Association which met during the course of the Provincial Show at Vancouver, gave a full and interesting report, both of the Show and of the meeting of the Association. He said the Show was a large and interesting one, and a pronounced success. Not only were there many birds but the quality was good. However, compared with our own Show it was no better handled and the average quality of the exhibits were not superior to our own. At the Association meeting it was decided to hold the next Provincial Show at Victoria. The following year the Show will come to the interior, and it is the purpose of the Association henceforth to hold the annual exhibitions somewhere in the interior every alternate year. Grand Forks and Summerland are both after the first show for the interior which will be in January, 1914. Mr. Bristow thought one of the speakers had made a good suggestion, and one which might be adopted here, which was that display cards naming the different breeds on exhibit should be placed over each section of coops. This would make the exhibit more interesting to the novice acquainting him with and causing the public to take more interest in the different breeds.

### AMERICAN SENSE OF HONOR

#### THE PANAMA AFFAIR

There is an element in the people of the United States who take the ethics learnt on the football and baseball fields into their after life and apply them rigorously to their foreign politics. Anything to win is the one rule; victory before honor. Unfortunately this kind of people has of late been too frequently the ruling element. They secured the appointment of partisans to an arbitration tribunal that was to be judicial; they condoned Mr. Roosevelt's support of the Panama revolt against the United States of Columbia with whom they had a treaty guaranteeing its integrity. They have recently read their treaty with Great Britain guaranteeing the neutrality of the canal zone to mean that they could fortify it, though Mr. Olney, the Secretary of State, who signed it for the United States, told them that that was not, nor ever had been his understanding of the treaty; that its intention was to preclude fortification. At present, they are engaged in a discussion of a treaty that touches both ourselves and Great Britain closely. The one thing that the British government insisted on as essential to the welfare of her commerce in making an agreement with the United States by which she would resign her treaty rights in the canal was that when opened it must be for the use of all nations on equal terms. Without that stipulation Britain would have never agreed to the abrogation of her former larger treaty rights with regard to the canal.

### "SEIZING" THE CANAL.

The clause that deals with the matter in the present treaty reads: "The canal shall be free and open to the vessels of commerce and war of all nations observing these rules, on terms of entire equality, so that there shall be no discrimination against any such nation or its citizens."

[Continued on Page 6.]

## Prices of Eggs and Grain Discussed

Organization Necessary for Marketing of Poultry Products  
Annual Meeting of S.O. Poultry Association

Pleased with Present Results, Hopeful of the Future.

The annual meeting of the Southern Okanagan Poultry Association was held in the Men's Club parlors Wednesday night with President C. N. Borton in the chair.

### FINANCIAL STATEMENT.

A statement of finances was read by the secretary and showed a debit balance. The Association will pay off this balance; however, as soon as they receive the grant of \$100 from the Municipality, \$67 was paid for balance due on coops for 1911, and \$100 was spent on additional coops for the recent show. Still more exhibition coops will be needed next season. The Judge's fee was \$85, but the Association have good reason to hope that they will be relieved of this expense for the next Show.

The President stated that the affairs of the Association were never in as good a shape as at present, and this was due to the excellent work of the secretary-treasurer, C. P. Nelson. A unanimous vote of thanks was tendered the secretary for his excellent services.

Mr. H. C. Mellor told of his conversations with the Deputy Minister of Agriculture, Mr. Scott, and of the promise he made to supply a judge for the next Show. The secretary was instructed to write the Deputy Minister thanking him for his kind offer.

### ELECTION OF OFFICERS.

The following officers were elected for the ensuing year:  
Honorary President,  
Deputy Minister Scott,  
Honorary Vice-President,  
Reeve Thomson,  
President, C. N. Borton,  
Vice-President, A. H. Mulford,  
Secretary and treasurer,  
C. P. Nelson,  
Assistant secretary, H. Bristow,  
Additional directors, P. Holder,  
H. C. Mellor,  
Superintendent of Show,  
H. Bristow,  
Auditor, Walter Wright.

The secretary was instructed to write Judge Coates thanking him for the splendid report he had given in the press of the last Show here.

### CO-OPERATION ADVOCATED.

The prevailing price of eggs and of poultry foods was discussed very thoroughly. It was realized that the local market was not sufficiently extensive to consume the present output of the local poultry yards and something must be done to find a market for the surplus production. It was stated that while eggs here were bringing forty cents, sixty cents was the price at Penticon; Vernon and other points. One of the members of the Association reported that at the present time he was shipping out nearly two hundred dozen every fortnight at forty cents. It was the unanimous opinion of all that a plan of co-operative marketing must be inaugurated at the earliest possible date, and at the same time the Association should arrange for the buying of grain at a lower figure. Mr. Bristow reported that the advantage of co-operative buying had been shown in several instances by delegates to the Provincial Show. In two or three places on Vancouver Island and elsewhere wheat had been selling at \$38 to \$40 a ton and had been reduced to \$28 by co-operative buying. In one place mentioned it was not necessary that the Association do its own importing as immediately it became organized and was in a position to ship in, the local dealers came to them and promised to meet the price at \$28 per ton. This is the price paid by members of several co-operative societies. Messrs. H. C. Mellor, C. N. Borton and R. E. White were appointed a committee to look into the matter of a co-operative organization and to report at the next meeting.

### THE OPINIONS OF EXPERTS.

President Borton, in speaking of the recent visit of Mr. Terry, said that the latter had concluded after looking over Summerland that we had more hens for the population than any other place in British Columbia, and, too, that the average quality was better. Judge Coates had said that the birds on exhibition at the last Show averaged higher than any exhibition he had judged before. The average for the whole Show was 88, and the best he had ever seen before was 85. Mr. Terry in his visits to the local poultry yards had also found that they were not by any means free from disease, and urged that every poultry owner look well to his stock and cut out any ailing birds that would in any way spread disease. He had found quite a number of cases of tuberculosis, and other diseases.

### MR. AND MRS. KENNY AND FAMILY

Mr. and Mrs. Kenny and family and Mrs. Beavis, Mrs. Kenney's mother, all of Crystal City, Man., came in on Thursday night. They are the guests of Messrs. Tom and Martin Beavis, sons of Mrs. Beavis. After a visit here they will go up to Armstrong where they will permanently locate.

### SEND IN YOUR QUESTIONS

The annual meeting of the shareholders of the Okanagan Fruit Union will be held at Vernon next Thursday. It is hoped that as many shareholders as possible will go up from Summerland in order that our requirements and views may be made known. From time to time there are complaints about the Union and there is perhaps reason why our people here should have a better understanding of its operations. In order that there may be a better understanding of their affairs we would suggest that any persons having questions which they would like answered or any explanations they would like given that they leave these with the Review and we will undertake to put them in the proper hands for the satisfaction of our fruit growers.

Canada's fisheries are claimed to be the most extensive of any in the world. Last year the catch amounted to \$30,000,000 of which less than \$4,000,000 was contributed by the inland fisheries and all the rest was from sea fisheries.

### RIFLE ASSOCIATION

The annual general meeting of the Rifle Association was held on Monday, February 26th, when a good attendance of members transacted a considerable amount of business. The principal change in the officials was that of Bert Nelson succeeding Will Nelson as captain. A new arrangement will be tried this year to secure a better attendance in the form of an allowance by the Association towards conveying the members to the range each week. A gold watch has been donated by Mr. Adam Stark for competition throughout the season, and there are also several other cups to be shot for. The secretary will be pleased to give any intending members all information regarding this club.

"Little Dave" McDougall, a half breed on the Westbank Indian Reserve, was murdered on Saturday night after an evening of drinking. Albert McDougall, a cousin, has been accused of the shooting, arrested, and committed to stand trial on a charge of murder.

# The Summerland Review

PUBLISHED BY THE REVIEW PRINTING & PUBLISHING COMPANY LIMITED.  
RALPH E. WHITE, MANAGING DIRECTOR

SUBSCRIPTION RATES: \$2.00 PER YEAR, IN ADVANCE. SIX MONTHS \$1.00.

### Advertising Rates:

LEGAL NOTICES.—Twelve Cents per line for the first insertion; Eight Cents per line for each subsequent insertion.

LAND NOTICES.—\$7.00 for 60 days, \$5.00 for 30 days.

WATER NOTICES.—\$0.50, 150 words and under, \$3.00; each additional 50 words, \$1.00.

THEATRICAL, ETC.—50c. per inch for first insertion, and 25c per inch each subsequent insertion.

LOCAL NOTICES or Readers, immediately following regular locals, 20c per counted line; 10c per line each subsequent insertion. Half these rates when accompanying display advertisements.

LODGE NOTICES, Etc., 25c. per week, per column inch.

FOR SALE Advertisements, Etc., 3c. per word first week; 1c. per word each subsequent week.

Transient Advertisements payable in advance.

Rates for Contract Advertisements furnished on application.

Copy for change of contract advertising must be in the hands of the printer not later than Wednesday noon to insure publication in the next issue.

In accordance with schedule of prices adopted throughout the valley, charges for advertising are now being made weekly. Heretofore when five issues were made in one month the result was a loss. By the new method, customers are charged each week for just the amount of space used.

FRIDAY, MARCH 8, 1912.

### NO MISREPRESENTATION.

WE HAVE BEEN ACCUSED of grossly misleading our readers and of distorting or misrepresenting facts. This, of course, is in connection with our stand regarding the telephone question. Just where, or how, though ready to be convinced, we cannot see that we have betrayed our trust. We have said that the Okanagan Telephone Company paid too much for the local plant and we say it again—they did—perhaps not from the vendor's viewpoint, but certainly from that of the subscriber.

We have always supposed—and our supposition has been confirmed—that the price was based on the past earnings of the Lakeshore Company—a very common, business-like and usually equitable way of arriving at the market-value of any going concern. We do not in the least blame the late company for getting all they could for their plant and while there is a disposition on the part of many to accuse them of playing false to their agreement with the municipality by selling the plant without requiring that their obligations be also assumed, we have said nothing on that. The former owners, however, have said that they could not have continued to make the same percentage of profit without an increase of rates. As the rates were controlled by the Municipal Council that body, in a large measure, thus controlled the present and future market value of the business. To separate plant from franchise made a difference.

A thing that we have not said nor do not think have made our readers infer, is that our people will have cheaper phones, or, as a matter of fact, a good service at the present rates, from the co-operative company. It is our opinion that the present rates may in some instances have to be exceeded if a thoroughly satisfactory service is to be given. If such increases become necessary they will not be great, whereas if under the Okanagan Company, we would probably pay to the limit fixed by the Governor-in-Council.

The great advantage with the locally owned plant is not so much in the rates and better service—though these are considerable—as in the guarantee that we will not again be sold into the hands of outside capitalists and that when the proper time comes we will be in a position to transfer the whole thing to the municipality, where it properly belongs. When the necessary power is obtained the individual shareholders can be bought out by the municipality and we have every reason to believe the municipal telephones will be as marked a success as are Summerland's municipal irrigation system domestic water system and electric light plant.

### LOANS FOR THE DESERVING FARMER.

THE AGRICULTURAL INTERESTS are the core of our country. The measure of prosperity that shall come to Canada will depend upon the success which attends the tillage of her wide acres. In a country so essentially agricultural as Canada the only sure foundation upon which a national structure of abiding prosperity can be built is the farmer. The manufacturer trades upon his success and the distributor upon his thrift. The future of our country is with the farmer, and the application of that term must be limited to the grower of "No. 1 Hard" but extended to embrace the practisers of husbandry in its widest range.

If the roots of a plant are not properly cared for the fruit and foliage will suffer. If the interests of the farmer are not studied and his needs met, the forward march of Canada's material development must stop. True, governments in the past have done much along this line, and the good work must not be allowed to cease.

The agricultural emigrant to Canada is given free land, but there government assistance stops short. He has his land, henceforth he must work out his own success. This shortsighted policy is like a woman giving birth to a child and expecting it thereafter to provide for itself. It is good only so far as it goes.

Very few farmers when they get their first piece of land have the capital to develop it to the best advantage. Lack of capital is the great hindrance in the way of the would-be farmer. Were he able to reach out and put his hands on some ready cash on reasonable terms he could use his land to much better national advantage. And here is a golden opportunity for the people's government—to branch out into the money lending business. The country he is helping to build should be the farmers' bank; it should be from this source that any assistance he needs should be forthcoming.

There are at present two courses open to the man who has land, but not the capital to adequately develop it. He can wait till he has earned and saved it—meanwhile allowing his land to remain idle—or he can borrow from what sources are available. It is not surprising that as a rule he adopts the latter course. The quicker he gets his land under the plow, the quicker he will get returns. Consequently he borrows.

The big private banking institutions are chary of lending. Beyond taking care of a man's surplus they have little local interest, and certainly do not cater for the farmer's financial needs. Our stringent banking system allows no risks of this character. Short loans may be obtained at high interest, but of what use is that to the farmer? In this respect we have something yet to learn from our neighbors across the line, whose banks, while perhaps less strong and reliable, are admittedly more accommodating.

To the moneylender, then, our would-be farmer goes; and once there, it is usually some time before he can break away. The thought of ready money brings about the signing of a woefully lop-sided agree-

ment and the land is mortgaged. It is a standing shame to our government that so much of the country's land is allowed thus to pass virtually out of the hands of the farmers into a possession more than nominal of shark financiers. These usurers live on the fat of the farmer's land. Their extortionate interests are only tolerated because they are alone in their field of enterprise; and the pity is that they are allowed to remain so.

The government should take up this work. The national credit is almost unlimited. Money can be raised at a comparatively low rate of interest at almost any time. The farmers need it; the government has it. The actual rate of interest to the borrower, while high enough to cover any expenses the government might be put to, would even then cut the existing rates in half. The repayment of the loans could be spread over a number of years, and the actual transactions could be made through accredited government agencies, or even through the post offices. Once our legislators caught the cry of the burdened farmers; once they could be made to realize what a rough spot on the farmer's road to success this moneylending is; if only it could be impressed upon them that Canada's agriculture prospers only in spite of it; then the administration of law to make good this flaw would be a simple matter.

In this province perhaps more than on the prairie there is a need for government loans on easy terms. Land is of more value, development more costly, and, in our immediate vicinity, returns are longer coming in. Many a plot of orchard land remains unplanted, and many a plot is sold again in bitterness when the realization dawns how much capital is required for development, and it cannot be conveniently procured. Our provincial government has a surplus of several millions of dollars. What better use for a portion of it could be found, and what would give such returns in contentment and prosperity?

The prairie provinces are demanding this help from the government. In our own district the Associated Boards of Trade for the Valley have taken the matter up. It surely cannot be long before the powers that be must unstop the deaf ear and bend to the will of those whose interests they represent.

## Naramata Notes.

Mrs. N. Keck left on Sunday morning's boat for her home in Ackton, Ohio.

Mrs. McColloch has returned from a week's visit to her daughter, Mrs. Guilbeault, of Penticton.

Mr. Jas. Young's new bungalow is being further improved by the skilful work of a painter's brush.

The account of the opening of the Unity Club building on Friday afternoon is necessarily held over till next issue.

Mr. Myers is having a house built on his fruit lot by his brother-in-law, Mr. Large—who, by the way, is some carpenter. See his work—they say, and you'll think so too.

Mr. Aveson is making fine progress on his lot where Mr. Johnson is busy completing a fine large greenhouse. Mr. Aveson purposes going extensively into the growth of tomatoes.

The Ritchie property—a twenty-five acre tract situated immediately east of town and pretty well back is rapidly assuming shape. The contract for clearing and plowing is in the hands of Mr. H. W. Eudacott.

Mrs. C. W. Johnson who recently returned from an extended visit to her brother in Rockford, Illinois, is finding the climatic conditions at home a pleasing relief to the severe cold experienced by her relatives to the south of us.

"Snip, snap, snip," is the song of the pruner's shears as the operator passes from tree to tree with critical eye. This work of pruning is beginning to assume large proportions in Naramata where so many orchards are now coming into bearing.

The organ recital in the church last Monday night by Mr. L. K. Farr, of Penticton, assisted by the choir was a pleasing feature of this week's entertainment. The "Maude Moore," specially chartered for the occasion brought the crowd of enthusiasts from our neighbor town and also a representation from Summerland. After a program of fifteen numbers the ladies of the church served a really fine luncheon which added much to the social side of the occasion.

### NARAMATA WANTS GOVERNMENT TELEPHONE EXCHANGE.

Naramata, March 7.—The telephone situation was pretty well canvassed on Monday night at a citizens' meeting called at the instance of Mr. J. S. Gillespie. As the matter now stands it was thought best to gather necessary information from all available sources and get the government to put in a plant in Naramata for the present looking to the future taking over of the same by the community.

Another meeting is called for Wednesday evening of next week in the Opera House. It is hoped that every citizen having the welfare of the community at heart will turn out and boost for a telephone system.

### SUMMERLAND BAPTISTS WELL TO THE FRONT.

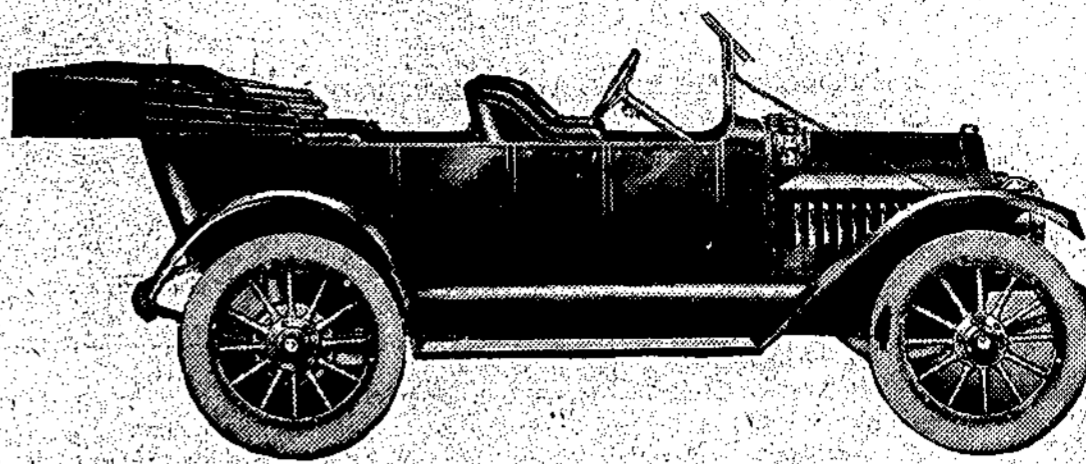

In benevolence, as well as in many other good points, Summerland citizens rank high. This is shown by the recent report of the Western Baptists. There are only three other Baptist Churches in the West giving larger amounts towards mission work than does Summerland Baptist Church. The first Baptist Church of Vancouver leads. The first Baptist Church of Winnipeg gives the second largest, and the Calgary first Baptist Church the third largest amount.

### C.P.R. CHANGES.

About the First of May the C. P. R. will inaugurate a daylight train service from Vancouver to Banff, Alberta. The train is to be composed entirely of Pullmans and observation cars for the benefit of holiday seekers and will stop during the night at Steamboat Junction. This should prove a very popular innovation and should secure a large traffic among holiday makers. In view of the construction along the main line the way freight will be equipped with two passenger coaches for construction crews.

### PRINCETON HAS SERIOUS FIRE.

Fire last Friday morning completely destroyed the Great Northern Hotel at Princeton, injured the plate glass windows of the Campbell Drug Store and those of the New Howse Block, diagonally across the street from the hotel, were broken. The building adjoining the hotel formerly occupied by the Eastern Townships Bank was totally destroyed. Very little of the hotel equipment was saved.

A curious feature of the destruction of the building formerly occupied by the Eastern Townships Bank was the fact that the bank officers had transferred their books and office equipment to the Bank of Commerce the day before the fire broke out, the amalgamation of the two banks having just been completed. The fire originated in the kitchen of the Great Northern Hotel.

The hotel was insured for ten thousand dollars, and it was the intention of the owner to tear the old building down this spring and erect a more up-to-date hostelry. Unfortunately the engineer in charge of the waterworks was sick in bed when the fire broke out, otherwise a great deal of damage might have been prevented. The damage is estimated at thirty thousand dollars.

### HOW B.C. GROWS.

The rapid growth of British Columbia is well illustrated in the very extensive donations that are at present being made for increased school accommodation throughout virtually every portion of the province, in connection with which it is estimated that an expenditure of no less than \$5,500,000 will be made during the present year, this vast sum including civic, municipal and provincial disbursements. —Victoria Colonist.

**D**ON'T think that concrete can be used only for building bridges, silos, walls and walks; because if you do, you will probably overlook all the places where you can use it now.

T. L. Irving, of North Georgetown, Quebec, used concrete for 81 different purposes on his farm in 1911.

There are probably at least a dozen profitable uses for concrete on your farm at the present moment.

Perhaps you haven't thought of concrete, except for a new barn, or a silo, or some other big improvement for which you aren't quite ready yet. That's why you should read

**"What The Farmer Can Do With Concrete"**

It will open your eyes to the hundreds of uses that other farmers have found for this material. In plain language, and with the aid of many photographs, it explains just what these uses are, and how they can be applied to your farm.

Concrete can not only be used for all the purposes to which wood has been applied, but also many others for which wood would never be suitable.

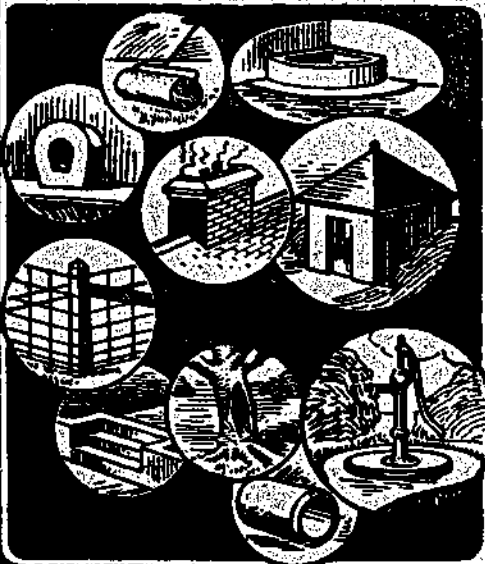

It is not only a building material; it's a "handy" material, something that you'll grow to depend upon more and more, as you learn its possibilities.

So write for this book. You'll find it isn't a catalogue, nor an argument for you to buy our cement. Every one of its 160 pages is devoted to telling you what farmers have done and can do with concrete.

IT'S FREE FOR THE ASKING. Your name on a postal or in a letter, will bring the book to you by return mail. Or use the coupon. Address

splendid. Both teams hit up a fast pace from the start and Pentiction had a little the best of the play for a while. Play was open and for the most part disorganized during this half, and as I said before no score was made. In the second half our men's wind began to tell and we had Pentiction on the run several times. The first score was a touch down made by Gayton from a pass from a mixup which McDougall converted making the score 5-0. The other score was made off a long kick which Marshall followed and fell on making a try which Menzies failed to convert into a goal, and ending the scoring. Everybody was pleased with the way things went and we hope to get Pentiction up here this week if possible and give them a good time and lick them again. Kelowna want us to play again up there but I don't know if we are going or not. I have to go to dinner now and will find out. Had sausages for dinner to-day. That is where "Brother Henry" shines. Saw Menzies, the captain of the football team and he says we will play Kelowna this week and Pentiction likely next week. On Friday a lot of our boys are going up to take part in a gymnastic concert there so they will be on the spot for the game. First Year kids are giving a reception the sixteenth and there is to be a social in the church the fifteenth so we should not lack for excitement that week.

The baseball team is rounding into shape again having practised several times already. Tennis will start again soon and spring will be here in earnest.

Don't forget its past the first of the month and my allowance isn't here yet. Hurry it along as it comes in handy.

Lots of love to all,  
JIMMY.

**LETTER TO THE EDITOR.**

**CANNERY.**

The Editor,  
The Summerland Review,  
Summerland, B.C.

Dear Sir:

At a recent meeting of the Farmers' Institute a committee was appointed to gather information about a cannery and report to a meeting to be called later. The committee is at work and have gathered some information, but await something further essential before making their report.

The indications, as we know now, are that there will be a very large peach crop. If this is also the case in the neighboring states it may be difficult to market all our crop at remunerative prices. In any circumstances we know it is very easy to allow quite a quantity to ripen too much for shipment, and besides, it is considered by some as profitable to can as to ship, when the expenses of packing, etc., are considered. In any case a cannery is a good insurance, ought to pay, get plenty to do and get a good market.

From \$10,000 to \$12,000 at least will be required for plant and working capital. It is most desirable that this be raised by the growers and that they have full control. In consideration of this, it may be well if those interested make their plans to help out this movement, considering it a part of their necessary business expenses and keep the money side in view and not invest in anything that would interfere, even if it seem otherwise desirable and attractive. We have a telephone, and as it now appears, can get along with it; we have no cannery, and no prospects outside ourselves.

G. J. COULTER WHITE.

Nelson is expecting big car shops and additional trackage in connection with the C. P. R. Crow's Nest line. This is in anticipation of the change that will make that the main line across the Province. A pulp and paper mill is also a probability for that city.

**JIMMY'S LETTER TO DAD.**

Okanagan College,  
West Summerland,  
March 6, 1912.

Dear Dad:

I have got something to write about to-day all right. Our football team went down to Pentiction last Saturday and played a great old game of Rugby. We beat them 8-0, but they put up a good fight for it and neither team scored in the first half at all. Most every boy and teacher in College went down as well as some town people. Some went in the ferry boat, the "Maudo Moore," others drove down, while still others walked. The Pentiction boys treated us splendidly, entertaining us while we were there and seeing that everything was done for us that could be done. Unfortunately they had not been practising under the latest rules and we were rather handicapped since they had their coach as referee. However we didn't mind and after we got on to the swing of things we took possession and rolled them right along. None of our boys got seriously hurt though there are several pairs of sore shins and "Shorty" Middleton got an elbow in his eye which causes him to look out of it rather darkly. The day was lovely and the grounds

TO FOUND NEW TOWN.

Mr. J. Norton Griffiths, M.P. for Wednesbury, England, who was in British Columbia a couple of months ago, was interviewed by "Canada," an illustrated weekly published in London, England, on his return to that country, and in discussing the different organizations in the Dominion formed for the purpose of inducing English families to go to Canada he said:

"That brings me to the other side of the question, and this is where I come in. The Canadians are looking after the British immigrant splendidly, but what about the man in England who thinks he wants to emigrate, but is not quite sure? The Wednesbury Imperial League has been established to deal with the situation in the Black Country on this side of the water. It aims at showing people that Canada is not so far off, after all. It does this by saying to the Black Country people that there is a country like theirs in Canada, and that they can stake out a claim on it. What is the use of a coal miner going to Winnipeg, where there is a demand for harvest labor? Neither he nor Canada benefits by that. He wants to go where he can mine coal. Now, the Canadian equivalent for our Black Country lies in British Columbia, where the anthracite coal fields are. A Staffordshire miner who went there would find himself at home. I want him to feel at home in every sense. There is something pathetic in the way in which the early settlers in America gave familiar names to their new homes. It wasn't that they found the new country anything like the old, but they wanted to pretend that they did. There will be no pretence about the towns destined to spring up under the auspices of our Wednesbury League. Staffordshire in England will be linked up with Staffordshire in Canada. Staffordshire men will ply the Staffordshire trades in Staffordshire towns. There will be the same landscape, too—bits of open country between the mines, and wheels on slag-heaps standing out against the sky-line."

"And your own Wednesbury, Mr. Griffiths?" asked "Canada's" representative.

"There will be Wednesbury right enough," said Mr. Griffiths. "Trust me to see to that. But its site is not yet settled. I have had a talk with Mr. McBride, the prime minister of British Columbia, and he is going to make Wednesbury the capital of the Staffordshire that is to be. Nothing can be determined until the railway has got to the coal beds and a scheme for the development of the district has been planned out. We will find out what will be the best centre for that coal mining area, and the centre of that centre will be Wednesbury Town Hall. The city will be built on the latest principles of town planning. I shall have all the plans sent over to the old Wednesbury, and I hope there will be a healthy rivalry between the two towns as to which can make the most of its opportunities. If Wednesbury in Canada builds a new technical school, Wednesbury in England will want to follow suit. I hope," added Mr. Griffiths, "that they will both require large conservative clubs, and that a portrait of Mr. Chamberlain will hang in each."

Mr. J. Norton Griffiths, M.P. for Wednesbury, England, who was in British Columbia a couple of months ago, was interviewed by "Canada," an illustrated weekly published in London, England, on his return to that country, and in discussing the different organizations in the Dominion formed for the purpose of inducing English families to go to Canada he said:

Rev. A. W. McLeod will preach in Pentiction on Sunday.

Mrs. E. R. Butler returned on Saturday night from a visit to her parents.

Mr. and Mrs. J. C. Chadwick returned to their prairie home on Thursday morning.

Scott Darkis, the blacksmith, is having a house built on his town lot at West Summerland.

Peachland intend playing a match with the local football club next Thursday at West Summerland.

Mr. and Mrs. L. C. Woodworth have returned from the Coast after a visit extending over two weeks.

Mr. and Mrs. Yeo, from Manitoba, who have been the guests of Mr. and Mrs. W. J. Docking, went east early this week.

W. R. Shields is opening a branch shop in Naramata. Mr. Dan McKay of that town is erecting a new building which Mr. Shields will lease.

Attention is called to G. A. McWilliams ad. offering ten acres close to the site of the proposed railway station, which is offered for the next two weeks at a special price.

O. Vaughan, who has been occupying Mrs. Ross' cottage, will shortly remove to a new cottage recently built for Mr. Stark on Beach Avenue, opposite Dr. Andrew's.

Rev. H. A. Solly will hold a service in Elliott's Hall Sunday evening. If it is shown that it is desired by the people this service will be held regularly each Sunday evening.

Wm. McDougall of Vancouver, who has been some days in Summerland, has rented the Phinney cottage near Dr. Lipssett's, and has gone to Vancouver to bring his family here.

The Overseas Football Club are having a match with Pentiction on Saturday first, at West Summerland, at three p.m. when the following team will represent them: J. Lacey, W. Atkinson, G. Fisher, J. Weeks, J. Templeton, H. Coles, Lorne Sherk, C. Brind, B. Newton, J. Woods; D. Thomson.

Questions have been asked about the word Michigan which appeared in our last issue, and also appears in this one. On asking the advertiser what it meant he says it will be explained this coming week. In the meantime the explanation can be found in the advertising pages of most of the current magazines. Look it up!

Another important transfer of Peach Valley property has just been reported. The deal was concluded on Wednesday. W. R. McKay, a Scotsman who arrived here a day or two earlier was not long in deciding to remain in Summerland. Through the real estate office of G. A. McWilliams, Mr. McKay has purchased the ten acre orchard formerly the property of J. N. McLean, of Montana.

The first gathering of the Literary and Social Club will be held next Friday evening in the West Summerland Baptist Church. R. P. Baker, Vice-President of Okanagan College will give a paper on "The Beginning of a Canadian Literature." A social time will be enjoyed and the society would like it understood that anyone, whether a member or not, is welcome. The aim of the society is, as its name implies social as well as literary, and it is hoped that more intimate acquaintance will be developed not only among the townspeople, but between them and the College student and faculty.

The reading of Tennyson's "Enoch Arden" by Mr. William Sauter, to Strauss' music rendered by Prof. W. H. A. Moore, of the College, was a pleasing variation in the usual run of concerts in Summerland. The poet's words gained new force in the trained delivery of Mr. Sauter, and effect was added to the more striking passages by the suggestive music. It is to be hoped more entertainments of this character will be given, feeling their popularity is assured. The audience on Thursday evening was not large, it is true, but innovations seldom receive a warm welcome. Those who did attend received an enlarged conception of the pathetic story. During the course of the evening Miss Higgin gave two violin selections, and the applause she received testified to the appreciation of her honors.

SYNOPSIS OF COAL MINING REGULATIONS

COAL mining rights of the Dominion, in Manitoba, Saskatchewan and Alberta, the Yukon Territory, the North-west Territories and in a portion of the Province of British Columbia, may be leased for a term of twenty-one years at an annual rental of \$1 per acre. Not more than 2,560 acres will be leased to one applicant. Application for a lease must be made by the applicant in person to the Agent or Sub-Agent of the district in which the rights applied for are situated.

In surveyed territory the land must be described by sections, or legal subdivisions of sections, and in unsurveyed territory the tract applied for shall be staked out by the applicant himself.

Each application must be accompanied by a fee of \$5, which will be refunded if the rights applied for are not available, but not otherwise. A royalty shall be paid on the merchantable output of the mine at the rate of five cents per ton.

The person operating the mine shall furnish the Agent with sworn returns accounting for the full quantity of merchantable coal mined and pay the royalty thereon. If the coal mining rights are not being operated, such returns should be furnished at least once a year. The lease will include the coal mining rights only, but the lessee may be permitted to purchase whatever available surface rights may be considered necessary for the working of the mine at the rate of \$10.00 an acre. For full information application should be made to the Secretary of the Department of the Interior, Ottawa, or to any Agent or Sub-Agent of Dominion Lands.

[Continued from Page 1.]  
zens or subjects in respect to the conditions or charges of traffic." It would seem impossible to draw up a more explicit and binding clause, yet there are many who, caring for nothing but their own interests, or the material success of their nation, are advocating with persistence and influence that it be evaded by the United States government collecting toll fees from all ships alike, and then returning to United States built ships the money collected from them. Mr. Lewis Nixon (ship-builder), leaving all honor out of the question, lays down the following propositions in the "Editorial Review":

1.—"It is our canal under our sovereign control."  
2.—"The commerce of other nations should bear the main cost of operation."

3.—"Tolls for foreign built vessels under foreign flags, a dollar a gross ton register; foreign vessels built in the United States, thirty cents; United States vessels in foreign trade, twenty cents; in the coasting trade, ten cents; United States men-of-war, free; foreign warships, the same as merchant vessels, ships in ballast half rate."

This is simply advocating the breaking of a most solemn national agreement. Mr. Nixon's pretext that the clause of the treaty quoted above guaranteeing equal treatment to the ships of all nations, means to all nations except the United States who own the canal only adds pitiable hypocrisy to the offence.

**THERE IS AN HONORABLE CLASS.**

There is another large class of people in the United States who are possibly the majority though not having power because not aggressive. These depreciate the dishonorable course of their nation in its foreign dealings, and feel chagrined when having to stand responsible for them. For instance, the New York "World" and "Times" among many other papers are constantly asking that what reparation is possible in the way of money grant be made to the United State of Columbia for the act of treachery to treaty obligations by which Panama became a separate state. There was much protest against the fortification of the Panama Canal and those who contemplate an attempt to make discriminating tolls are meeting opposition. None of these measures has, however, stirred up such an enduring division in the country as has the taking of the Philippines. All through the country there are people, brought up to hold sacred the first principle of the Declaration of Independence, that the government should rest on the will of the governed, who dislike intensely the imposition of United States rule on an unwilling foreign race. Senator Works, of California, said in the Senate, that the United States Government "was puffed up with power and wealth, and consumed with the lust for more power and greater wealth." He declared that the Government could remove the greatest obstacle to the attainment of peace and save millions of dollars of unnecessary expense by surrendering the "additional territory across the sea, acquired by little better than a sham naval battle, followed by a course of deceit and intrigue. We have subjugated and held in practical slavery," he added, "a whole nation, half civilized and speaking a foreign tongue. We have taken over other countries and other peoples with no better reason or excuse. We have no right in law or equity to hold or interfere with the territory or liberty and independence of these people."

THE TWO VIEWS.  
We have to recognize in the United States as in an individual a better and a worse spirit striving together for the mastery. They are well typified by President Taft and Mr. Roosevelt in their general attitude toward foreign affairs. We say nothing of the President's reported remarks on the matter in hand. The President with his dove of peace in the arbitration treaties, and Mr. Roosevelt with his big stick as exemplified by the Panama incident. At present the peace party is splendidly in the ascendant. The Senate has agreed to

vote on the general arbitration treaties on the fifth of next month. This is looked on as an indication of success as were the Senators going to kill the measure, they would in all probability do it in some other way than by open votes. To be sure the Lodge resolution, have greatly vitiated the binding strength of the treaty so far as that in words lies, for the Senate has reserved to itself the right to pass on any special agreement for arbitration proposed by a Commission. Still the grand fact remains that President Taft is probably about to carry into effect his principle of a universal arbitration treaty with both Great Britain and France, and that this treaty at least binds each nation to the delay of war for one year at the request of the other nation to the dispute as far as a treaty can bind. As seen above this is not an obligation that can be relied upon. If treaties can be broken and often are broken in times of peace, when it is plain, as in the Panama revolt case, and in this case with Great Britain, that the other nation is not going to war to secure their enforcement, it is still more uncertain that they will be held sacred in times of international anger. With invulnerable powers, like the United States, the world's hope is in the moral sense that abhors the name of traitor. That spirit is growing. The passage of the act will mean that the President's crusade for peace has made a multitude of converts, and tremendously strengthened the godly spirit of the nation on which the fulfilment of the obligation will rest.

**Mighty Michigan**

THE PANAMA GRAB.  
The New York World advises the United States Government to follow Canada's example and advocates a free Panama Canal. Editorially it says: "Canada has provided more than \$100,000,000 to provide ship canals from the Atlantic Ocean to the Great Lakes. It is a larger expenditure relative to the population and resources than the United States will make at Panama. The cost of maintenance and improvement are relatively larger. "Nevertheless, American vessels are allowed to go toll-free through these costly Canadian waterways. The American tonnage through the Welland canal is larger than the Canadian. The tonnage of both countries through the American and Canadian canals at the Soo is larger than that of the Suez and larger than that will be at Panama. But Canada rejects the policy of cost-tolls or profit-tolls, where they could be so easily collected." It adopts the policy of making its artificial waterways as free as the high seas. The United States does the same with its canals at the Soo. "Can the United States afford to adopt a Panama Canal policy less generous to Canada or the nations than this Canadian canal policy is to the United States? Protests are being made in the Dominion Parliament against preferential tolls for the American ships in the Panama Canal. Canada has a right to protest. It has an equal right to ask for a canal without tolls, and this country will perform a world of service of greater profit to itself than can be computed in money by adopting the policy of a free canal."

**THE BOY SCOUT MOVEMENT.**

The Boy Scout Movement is one of the greatest and most expanding influences of the new century. The real live boy is a unity of pent up energy. In the past when that energy was properly directed its possessor was a good little boy; if that energy was misdirected he was a very bad little boy. The Boy Scout idea aims at furnishing a useful objective for this pent up energy by harnessing the force known as small boy and diverting it to a channel which will yield a dividend of entertainment to the small boy and a dividend in useful citizenship to the state. As a result both sides will be the gainer.—Ottawa Citizen.

**A CEMENT FOR LAMPS.**

Cement adapted for attaching the brass work to oil lamps is made by boiling three parts of resin with one part of caustic soda and five parts of water. The composition is then mixed with half its weight of plaster of Paris. It sets firmly in one-half to three-quarters of an hour. It is of great adhesive power, not permeable to petroleum, a low conductor of heat, and but superficially affected by hot water. Zinc white, white lead, or precipitated chalk may be used instead of the plaster of Paris, but they harden more slowly.

# The Summerland Review

DEVOTED TO THE INTERESTS OF SUMMERLAND, PEACHLAND AND NARAMATA

Vol. 4, No. 33

SUMMERLAND, B.C. MARCH 15, 1912.

Whole No. 187

## TO TELEPHONE SUBSCRIBERS

The Okanagan Telephone Company desires to inform its subscribers that no change will be made in the present rental rates until such time as improvements to the system and service warrant it.

The demand of the company's late manager for increased rates at the present time was unauthorized by the Board of Directors and was immediately stopped as it came to their knowledge.

The company wish to state that it is their intention to give the city and district a system, and a service which is both modern, and up-to-date and which will be in keeping with its growing needs.

The company further wish to state that they have read over and examined the franchise granted by the Municipality of Summerland to the Lakeshore Telephone Company, Limited, and have no hesitation in stating that it is their intention to live up to and observe the terms imposed by that franchise in its entirety, which among other matters governs the rates that the company may charge for its service.

The company regrets very much the exaggerated reports that have been circulated regarding the price which they paid the Lakeshore Company for its systems, as such reports are harmful in every way. The Board of Directors much regretted to learn that there had been incivility and discourtesy on the part of its late manager towards its subscribers in the Lake towns, and they have taken effectual steps to prevent its recurrence and trusts that the new manager, Mr. C. M. Sullivan, who will arrive in your midst this week, will extend every

## OBITUARY.

### Hugh Lorimer Estabrook.

Hugh Lorimer Estabrook, second son of Rev. H. G. and Mrs. Estabrook died in Vancouver on Monday morning. The little fellow had suffered an attack of measles, and complications ensued which terminated in bronchial pneumonia. He celebrated his seventh birthday only eight days before his death, the sad news of which cast a gloom over all who had known his sunny face.

Rev. H. G. Estabrook brought the remains to Summerland, arriving on Tuesday evening. He was met at the wharf by a large number of friends who shared his grief in silent sympathy. A brief and simple service was conducted by Rev. F. W. Pattison at the residence of Mrs. W. Estabrook, after which interment was made in the cemetery nearby.

Mr. and Mrs. Estabrook made a host of friends during their stay in Summerland, and all who knew their little son unite in heartfelt sympathy with them in their bereavement.

At the conclusion of the regular evening service at the Lakeshore Baptist Church last Sunday evening the ordinance of baptism was administered to five candidates.

courtesy and civility that is in his power to all our subscribers and the public at large.

By Order of the Board of Directors.

J. A. RENNIE,  
Secretary.

## Council Meet in Regular Session.

### To Meet President Warren of K. V. Rly. at Special Session.

#### Trade Licenses to be Strictly Enforced. Dog Tax By-law to be Drawn up.

Reeve Thomson presided over a full Council at a regular session held last Tuesday. Although it was well into the afternoon before the meeting adjourned, it cannot be said that the business dealt with was of special moment. Several matters of old standing were brought up and some disposed of, however.

#### PERSONAL INTERVIEWS.

Following the reading and adoption of the minutes of procedures at the last meeting, it was decided to hear the cases of the several ratepayers who were present to speak with the Council in person.

Messrs. W. J. Ross and R. Johnson, of Gartrell, presented a petition signed by a number of affected property holders, relative to the spread of the Canada thistle, which they said constituted a growing menace to a section of that district. It appears that this extremely noxious weed is spreading among some brush on the road allowance and on some private property. The petitioners suggested some preventive measures, and urged that the Council take immediate steps to help control and eradicate the weed. A motion was passed that the Road Superintendent be instructed to clear and burn the thistles and brush on the road allowance.

D. L. Sutherland, of Peach Orchard, waited on the Council in regard to two trees at the junction of the Peach Orchard and switchback roads. Permission had recently been given to J. M. Sutherland to remove one dangerous tree in this section, and there were two others nearby which appeared to him to be equally dangerous. They could be felled in the same direction on to the same property, and if this were done immediately it would avoid any inconvenience and perhaps damage which might occur later when the land was put under cultivation.

Coun. Robinson urged that the trees be spared if possible, for the natural wood growth in Peach Orchard was one of the attractions of that district. This matter was referred to the Board of Works who will examine and act. Mr. Sutherland made another request regarding some leaf mould he wished to haul for Mr. W. Arnett, from a road allowance between his property and Mr. Blewitt's. There were several high spots on this road that the removal of several loads would level, and this would leave it in good shape if ever it had to be opened up. It was pointed out that last year a rule had been made that for every load of material removed from road allowances a load of shale be brought in exchange, and it was not desirable that any different arrangement be made this year. No definite action was taken.

T. B. Young asked for permission to erect a cement horse trough on the road outside his feed store at West Summerland. This would be a public convenience, and he would have it erected if the Council would grant the space and the water connection. The Council seemed favorably inclined to this public spirited request, and referred the matter to the Board of Works.

W. Fosbery wanted the assurance of a better water service this coming season. He proposed raising extensive small crops on his property above Crescent Beach, and needed a better irrigation service than he had last year. The Council informed him that the new pipe line which was being laid through Garnett Valley and across the northern part of Siwash Flat would also benefit some of the lots in that section. Mr. Fosbery also drew the attention of the Council to a dangerous corner on the road near Mr. Brittan's which badly needed attention. Both those questions were left with the Board of Works.

Mr. A. E. Hespeler complained of the narrowness and the bad con-

dition of parts of the road from Mrs. Campbell's to his property. A day's work would remedy the trouble, and he had a petition now circulating among property holders along this road, which he would forward to the Clerk. This was also referred to the Board of Works.

#### COMMUNICATIONS.

Among the communications received and read was one from the administrators of the Eyre and Cutbill estate, regarding the price of some property held by that firm adjacent to the municipal buildings. The Clerk reported that the two lots could probably be secured for \$850, but the Council felt that only one was needed, and a motion was passed authorizing the Clerk to offer the vendors \$430 for lot 80 adjoining the municipal offices on the south.

The secretary of the Okanagan Telephone Company wrote regarding the telephone poles the Council wished removed. Mr. Woodburn had been instructed to ascertain the wishes of the Council and to act accordingly. This letter was conciliatory as Mr. Dobie's letter on the same subject had been insolent and blustering.

Regarding the nuisances complained of by Jno. Tait, near his residence, the Clerk reported that a settlement had been arrived at, but the party who was to remedy the trouble had not yet been able to see to it.

Tenders were opened and discussed for the hauling of cement pipe from the wharf to Garnett Valley, for the pipeline which is to be laid through there. The following quotations per ton were submitted: R. Tingley, \$1.98; W. J. Smith, \$2.75; T. B. Young, \$3.00; A. H. Steven, \$3.20. The tender of R. Tingley was accepted.

Mr. H. C. Mellor wrote protesting against the application made him for the payment of a trade license. He was not in business of any public nature, and had done no work of any kind that would call for a license during 1911. This protest was upheld.

A letter was read from Government Agent Norris, of Vernon, acknowledging the receipt of the application for water rights on a spring near Paradise Flat. It is hoped to provide a domestic water system for this new residential district, that is being opened up this summer, from this spring perhaps by means of a hydraulic ram.

The Accountant recommended that someone be authorized to effect the insurance of the power house. This was given verbally to the clerk.

#### CEMETERY IS PURCHASED.

The clerk submitted the registered plan of the Summerland cemetery, as directed at the last meeting. The cemetery as now used forms part of a five-acre block, which has been held by the Development Company. The question has been discussed at previous meetings, and it being already decided that the cemetery should become municipal property, all that remained to be done was to finally provide for its purchase. Coun. Lewes moved and Coun. Danadon seconded that the block including the cemetery be purchased from the Summerland Development Company at the price agreed to by J. M. Robinson, namely, \$1,500.

#### DO WE NEED A LOCK-UP?

The Reeve brought up the question of the advisability of providing some sort of a lock-up. A recent incident had emphasized the necessity for this. Then, too, railway construction camps would be in Summerland this summer, and it was well to be prepared for any contingency.

The Clerk suggested a building 21 x 14, divided into three compartments, one 12 x 7, and two

cells 7 x 6. This would satisfy all requirements for years to come.

Some of the Council thought that this should be left till further need arise. More pressing matters were calling for attention. No action was taken.

#### THE RAILWAY AND SUMMERLAND.

Several phases of the relationship of the Kettle Valley Railway to the municipality were discussed.

Coun. Robinson asked how the irrigation rates on the property being acquired by the railway company would be adjusted. When the property holders sold the land for right-of-way they would certainly not be liable for the rates on those parts of their orchards. Would the company become liable, or would the property be exempt? The company are acquiring some thirty acres in all, so that the irrigation rates would be considerable. J. L. Logie, who is acting as right-of-way agent for the railway company, reported that President J. J. Warren expected to be in Summerland in about two weeks' time, and desired to meet the Council. Such questions as Coun. Robinson had raised, and others, such as the matter of level crossings, could then be discussed and settled before construction was commenced within the municipal limits. The exact date of Mr. Warren's visit would not be known for a day or two, but the Reeve would be notified and a special meeting convened.

#### DOG TAX BY-LAW.

A long threatened municipal enactment at last looks like materializing. The question of a dog tax was raised and the Council unanimously expressed its approval of this tax. A suggestion was made to amend the existing Pound By-law to include a dog tax, but it was not thought practicable. The license will probably cost the dog owner about \$2.50, but this was not finally fixed. The Clerk was instructed to draw up a by-law to provide for the imposition of a tax on dogs in the form of a license to be issued to the owners. It is hoped in this way that many of the numerous ownerless dogs that are becoming a nuisance to the town will be disposed of.

#### TRADE LICENSES.

Trade licenses are to be enforced. The Council are determined to press for the payment of these permits to the utmost extent allowed by the law. No exceptions are to be made; anyone who carries on business as defined in the Municipal Act will have to take out a trade license. A refusal to pay will be met by a summons, and followed up with conviction, which means a fine, imprisonment or restraint upon chattels. This praiseworthy decision was embodied in a motion made by Coun. Lewes and seconded by Coun. Robinson that all parties who are liable to pay a trade license and to whom the proper notice has been sent must at once take out the same; in the case of any failure to do so, the constable is instructed to take steps at once to prosecute in accordance with the Municipal Act.

Superintendent Mitchell reported that there were seventy cords of wood on Paradise Flat belonging to the municipality. He wanted instructions as to its disposal since some would have to be moved to allow the laying of the pipe in that vicinity. It was decided to advertise for tenders for the purchase of fifty cords of this wood, the remainder to be brought to the municipal offices and the power house.

Mr. Mitchell also reported that he had been compelled to spend a lot of time clearing the road allowance of obstructions in order to clear the way for a pipeline. Land had been cleared and the brush thrown on to the road. This brought up the question of keeping the road allowances clear. There have been complaints of this in the past, and it was felt something should be done. The Superintendent was instructed to deal with obstructions on the roads, using his discretion.

The matter of electric light extension was left over to be dealt with at a subsequent meeting. Further applications for light are anticipated and complete information as to the cost and locality

## PRICE ELLISON UNANIMOUSLY CHOSEN

### NO LIBERAL CANDIDATE. SOCIALIST WILL RUN.

At a convention of Conservatives of the Valley held in Vernon at the beginning of the week, Hon. Price Ellison, Minister of Finance and Agriculture was again chosen to champion the cause of the McBride government in the forthcoming provincial elections for the Okanagan constituency. The choice was unanimous, and the outcome of a very enthusiastic convention. Although nothing definite is known as yet, it is probable that Mr. Ellison will make a tour of his constituency to lay clearly before the electors the issues of the campaign.

The Liberals have decided not to offer any candidate in opposition to Hon. Price Ellison. This decision was reached at a party caucus held this week at the upper end of the Valley. It has been left to the Socialists to provide opposition to the government. George F. Stirling has entered the field in the interests of the red flag, and has already commenced an educative campaign. He will speak here in Elliott's Hall on Monday evening March 18th at eight o'clock.

Polling day is Thursday, 28th March.

of the necessary extensions will be set before the Council. The whole question will then be dealt with at length.

The Council then adjourned to meet in special session in about two weeks' time at the call of the Reeve.

#### ACCOUNTS PASSED.

The following accounts recommended for payment by the Finance Committee were passed:

Pay Roll	\$1142.64
Supply Co., supplies	22.23
A. Richardson, lumber	1722
W. Ritchie, lumber	21.12

School Board, requisition	859.18
Dobouture Interest	50.00
Total	\$3,870.39

Socialist meeting, Elliott's Hall, Monday March 18, at eight o'clock. Candidate G. F. Stirling will speak.

## A PAYING TELEPHONE SYSTEM.

### Alberta Well Pleas'd with Provincial Ownership.

(The Commercial Review).

In 1908 the Government of Alberta bought out the lines and business of the Bell Telephone Company in that province, paying the company therefor \$675,000. Some independent lines were also bought for \$53,000 making a total investment of \$728,000. For this sum the province came into possession of all the telephone lines in Alberta except the Red Deer system which was—and is—municipally owned. The lines of the provincial system have been extended in every direction and into all the more settled parts of the province, until now the system comprises 4,000 miles of long-distance line touching some 270 points, 4,800 miles of rural line supplying 5,00 subscribers, 120 exchanges carrying 12,000 subscribers, and represents a total investment at the present time of approximately \$3,800,000. This sum includes the cost of the purchased lines and of the extensions that have been made. It does not include any part of the cost of operating the system, nor any other charges properly and commonly assessed against the earnings of an enterprise of the kind. The revenues of the system have been found sufficient to meet the cost of operation, to provide for the maintenance of the apparatus and for renewals of a minor character, and has beside paid 4 per cent. interest on the money put into the system. This enterprise has not, therefore, been a charge upon the revenues of the province, either for its operation or for the payment of the interest on the money put into it. It has been made self-sustaining, and for the accommodation of it has been and is to the public there is no compensating disadvantage in the shape of a deficit or of a diversion of funds from some other purpose to prevent a deficit. Nobody has paid, or pays, anything toward the upkeep of the telephone system except those who use telephones, and the charges collected from the users of the system are reasonable and moderate. That is to say, the man living out of town pays for the use of his telephone the same as the man living in town pays, and is free to call up any 'phone in town without charge, and also any 'phone on any rural line connected with that exchange. These terms also apply in the cases of rural line

radiating from the privately-owned system of Red Deer, and the municipal system of Edmonton.

The rates charged on the provincial system for day service only are: residential 'phones, \$15 per year; business 'phones, \$24 per year. A day and night service is given on demand when there are over 75 subscribers on an exchange. The rates for continuous service where there are fewer than 300 subscribers in the exchange, are \$18 for residence 'phones and \$28 for business; and where there are over 300 and fewer than 500 subscribers, \$20 for house and \$30 for business; where there are between 500 and 1,000 subscribers, \$20 for house and \$32 for business; where there are more than 1,000 subscribers, \$20 for house and \$35 for business 'phone. The charges for continuous service for house 'phones is the same in all exchanges having 300 or more subscribers.

For use of long-distance lines there is a minimum time limit of three minutes, with half-rate between 6 p.m. and 6 a.m. The charges for use of a long-distance line are based on the rate of 1 cent for the first ten miles and six-tenths of a cent for each subsequent mile, per three minutes. How the rates work out is shown in the following list of charges made: Edmonton to Wetaskiwin, 25 cents for three minutes; Edmonton to Lloydminster, 90 cents; Edmonton to Calgary, \$1.05; Edmonton to Lethbridge, \$1.75. These rates, it is understood, are now being readjusted with a downward tendency on the longer distances.

In the construction of rural lines the province bears the entire cost, putting the line into the farmer's house free. The average number of subscribers on the rural lines is twelve and the limit fifteen. This limit is sometimes slightly exceeded to accommodate contiguous settlers until a reconstruction of the circuit in the locality becomes possible.

The people of Alberta are open to a large measure of congratulation on the successful working-out of this provincial undertaking. While the Province of Manitoba, which also bought out the Bell system a few years ago, is now faced with the necessity of boosting rates to an almost prohibitive figure, the rates in Alberta have been found sufficient to bear the proper burdens laid upon the revenue of a concern of the kind, and with such readjustment of rates as is made necessary by changing conditions there is every reason to suppose the system will support itself in the future as it has done in the past.

# The Summerland Review

PUBLISHED BY THE REVIEW PRINTING & PUBLISHING COMPANY LIMITED.  
RALPH E. WHITE, MANAGING DIRECTOR

SUBSCRIPTION RATES: \$2.00 PER YEAR, IN ADVANCE. SIX MONTHS \$1.00.

### Advertising Rates:

**LEGAL NOTICES.**—Twelve Cents per line for the first insertion: Eight Cents per line for each subsequent insertion.

**LAND NOTICES.**—\$7.00 for 60 days, \$5.00 for 30 days.

**WATER NOTICES.**—30 days, 150 words and under, \$3.00; each additional 50 words, \$1.00.

**THEATRICAL, ETC.**—50c. per inch for first insertion, and 25c per inch each subsequent insertion.

**LOCAL NOTICES or Readers.** Immediately following regular locals, 20c per counted line; 10c per line each subsequent insertion. Half these rates when accompanying display advertisements.

**LODGE NOTICES, Etc.** 25c. per week, per column inch.

**FOR SALE Advertisements, Etc.** 3c. per word first week; 1c. per word each subsequent week.

Transient Advertisements payable in advance.

Notes for Contract Advertisements furnished on application.

Copy for change of contract advertising must be in the hands of the printer not later than Wednesday noon to insure publication in the next issue.

In accordance with schedule of prices adopted throughout the valley, charges for advertising are now being made weekly. Heretofore when five issues were made in one month the result was a loss. By the new method customers are charged each week for just the amount of space used.

FRIDAY, MARCH 15, 1912.

### TELEPHONE STATISTICS.

JUST AT THIS TIME when so much is being said of the cost of installing and operating telephones and the earnings (or lack of earnings) therefrom, a few authenticated statistics will not be amiss. We have not been able to get all the figures of the Lakeshore Telephone Company, but as the sale was made on its past earnings we know the net revenue was highly satisfactory to the shareholders.

There is a little town in this province not very differently situated from our own that has 194 miles of galvanized wire serving only 68 'phones. The cost of their equipment and property was \$8,791.00. Their yearly revenue is \$1,355.20 and the operating expenses \$1,052.80.

The Revelstoke, Trent, Lake and Big Bend system cost \$26,000.00 with 217 instruments. The yearly revenue is given as \$4,984.60 with operating expenses \$3,663.00. This works out at about \$120 per 'phone for equipment with an average yearly rental of nearly \$23 per 'phone, and an operating cost of nearly \$17.00 per 'phone. Up to June 30th, 1911, the Okanagan Telephone Company had invested \$84,268.55 in property and equipment. Their revenue for the year ending on that date was \$8,162.74, while their operating expenses were \$4,937.18. As they had 303 'phones the average operating cost per 'phone was \$16.29, while their average 'phone rental was nearly \$27.00.

### A NATIONAL TRAGEDY.

HERE is a tragic situation. In China, through drought and flood, 3,750,000 human beings are starving and will perish this spring and summer if relief does not come. In Canada foodstuffs worth millions of dollars are spoiling because the crops were too heavy for the railways to ship to the East. And this is happening while the Chinese nation is in the agonies of a new political birth. Has the world ever beheld such an appealing need as China, or so urgent a call for "first aid" to the suffering as that which comes to Canada? The facilities for shipping grain westward to the Pacific and on to China are better than for sending it east to the Atlantic. To save this unusable surplus from wanton waste and to send it where it is so sorely needed is our first and most compelling national duty. In how many ways will it come back to us as individuals and as a nation? The United States, alone among the nations, refunded a large part of the Boxer Rebellion indemnity on condition that the money be spent on the education of Chinese students in United States colleges and universities, and already the American nation is reaping a reward in the confidence and goodwill of the people of China, who now have a thousand students in the United States who will return as missionaries of international goodwill. This generosity is being kept alive by the American people whose churches are now appealing for money and food to send to the relief of the famine victims. The Chinese are a grateful people, and no movement of such a humane kind will go unrewarded here and hereafter.

With such a glut of grain and a more general prosperity than exists in the United States, what are the people of Canada going to do? China is the centre of world reformation to-day, and the real yellow peril is not an educated and progressive China, but a China remaining in poverty, ignorance and spiritual darkness. In any case Canadians can make no mistake in relieving distress of such an unparalleled extent, no matter how political events may shape. To stop our ears to this cry of woe is to invite calamity to our own doors, for the law of compensation is still in force, nor should we forget that a country's harvest is a gift of heaven.

Therefore, let our government and people unite immediately to send liberal supplies of wheat, oats, flour and other food; and follow this up later with scientific advice and help in forest restoration, flood prevention and improvement in agricultural methods, the lack of which has brought the present troubles.

Last year 55 delegates representing various chambers of commerce in the United States visited China and were received with a warm welcome by Chinese commercial bodies, and American and Chinese scientific men, merchants and manufacturers are already co-operating for the improvement of China's material, as well as moral condition. Geographically, Canada, with the United States, stands as the mediator by which the civilizations of Europe and Asia can be harmonized for the peace of the world, and there has been no time when the white-winged steed of opportunity waited to invite us to fill the great office as it does to-day.

Will press, and people, and parliament take it up?

IN THE PROVINCE of Ontario there are twenty-one municipalities owing and operating telephones, also ninety co-operative and seventy-five private telephone companies. Eighteen partnership and one hundred and fifteen stock companies make a total of three hundred and nineteen for the province.

EARLY IN THE CAMPAIGN for locally owned and controlled 'phones we expressed some doubt as to the final results at Penticton. Our contemporary there thought we had no reason to doubt and assured us that the citizens of that town would install and operate their own exchange. The latest reports, however, would indicate that our first opinion was not far from correct. We would rather have been mistaken than see the division and seeming lack of co-operation in the people's interests that has recently been made manifest.

THERE IS NO WAY of improving a place as much as by encouraging good merchants, good schools and live churches, and, too, good people to settle among you, and this cannot be done unless you spend your money at home.

WHILE CANADA last year imported two and one half million dollars' worth of agricultural implements, at the same time she exported nearly four and a half million dollars' worth of implements of Canadian manufacture. Australia is Canada's best market for exports of this character.

THE CITY OF NEW YORK now has 1,265,000 Jews, more than live in any other city in the world. Only two or three years ago the Jewish population was stated to be 800,000 and eight years ago there were only half the present number in the city. It is predicted that within the next ten years that they will rule New York politically.

## Naramata Notes.

Mrs. Languedoc will entertain next Friday, March 22, at the Unity Club House.

Mrs. Stewart, of Penticton, spent the week-end in Naramata, the guest of Mrs. W. W. Mitchell.

Miss Grace Wilson and Miss Gillies have returned to town after several months' absence at Vancouver.

The subject announced for next Sunday morning by Rev. G. O. Fallis is "God's Call To Womanhood."

Master Ralph Boothe entertained a number of friends on Monday afternoon upon the occasion of his seventh birthday.

At a largely attended meeting in the Opera House the preliminary steps were taken toward forming a branch of the Farmers' Institute.

Miss Parmenter, after having spent an enjoyable winter here as the guest of Mrs. F. J. Young south of town, left on Tuesday for her home near Edmonton.

Mr. N. Mitchell was laid up for a few days this week as a result of getting pinched by part of a load of fence posts which had upset. It was just one more of the "fortunate escapes" for, but for his alertness the accident might have had serious results.

The third and last in the series of card parties was held on Tuesday evening at the home of Mr. and Mrs. J. S. Gillespie. At the close of the game the total results were announced. Mrs. Dean and Mr. N. Mitchell won first place and the consolation went to Mrs. McKay and Mr. E. Steers.

Mr. C. W. Johnson closed the heaviest real estate transfer for the season so far, when on Monday of this week he disposed of a block of land comprising some 338 acres in the neighborhood of Three Mile Point to the Penticton Lumber Syndicate. The deal figures close to the five figure mark and was paid in cash.

Mr. W. R. Shields, blacksmith of Summerland, has opened a branch of his business here in a neat little shop erected for him by D. McKay back of Mr. Block's new store. Mr. Shields assures us that the public can depend upon getting the very best service, and that he employs none but capable workmen. The shop opened for business on Thursday morning with Jas. Monagan in charge.

The new building popularly known as the Club House, belonging to the Unity Club, was formally opened last Friday afternoon and evening. The ladies held a short business session in the afternoon. An informal reception followed which was kept up till far into the evening. This was followed by a free and easy program consisting of speeches and rollicking choruses. The ladies certainly have splendid facilities for entertaining their friends and for conducting their various enterprises.

## Peachland Notes.

Mr. Geo. Mitchell spent Wednesday in Kelowna.

Miss Annie Seaton is leaving this week for a month's holiday with friends at the East. Her Peachland friends wish her a pleasant holiday and a safe return.

While repairing the telephone line here on Monday a rotten pole fell with one of the linemen and severely injured his back. It was found that he had sustained internal injuries as well.

Mr. T. D. McCall left Monday to take up again his work of running the government pile driver. He was accompanied by Mr. J. K. McLennan, and his son Mr. Alvin McLennan.

Mr. H. McDougall returned last week from Vancouver where he has been spending several weeks with relatives. While he enjoyed his visit, Mr. McDougall was glad to get back to the Okanagan sunshine. A half day of sunshine in six weeks is not "laying it on very thick."

The municipality has sold the old fire protection by-law to the firm of Nay & James of Regina for \$1000, less the accrued interest, amounting to \$125, and they have an offer of \$975 for the \$1,000 school site debenture issue now being put through, and which will be voted on the 30th inst. It is to be hoped that the repayments will give the by-law their endorsement on polling day.

### JUNIOR HOCKEY GAME.

The second hockey game between the juniors of West Summerland and the College was played at the rink on Monday night. The ice was in excellent condition, and a fast game was played. In spite of the score being 12-0 in favor of Summerland the College boys put up a plucky game. Had they had a good goal tender the score might have been only one half. Campbell, on the College defence played a good game. Patten as usual, made some brilliant rushes but always failed to carry the puck more than ten feet. Menzies, who came on at halftime, played right wing and was a good forward man. Lorne Sherk, on the Summerland left wing, played a whirlwind game and scored five goals. Harvey Phinney, the captain, although closely watched by the College defence made four scores. Tingloy, who was brought up forward at half time located the net twice and did much checking. Lemur Sherk, centre, also scored. Dale, in goal, stopped some hot ones and did not allow a score. The West Summerland boys, with a little better combination would make a fast team, and they are talking of challenging for the Stanley Cup.

DEPARTMENT OF LANDS.

WATER BRANCH.

TAKE NOTICE that the Board of Investigation, acting under Part III of the "Water Act," will meet at Summerland, on the 19th day of April, 1912, at 10 o'clock in the forenoon, to hear and determine claims to water rights existing on the 12th of March, 1909, on—

- Bath Creek, Boucher Garden Spring, Canon Creek, Commons Creek, Darke Creek, Darke Lake, Eneas Creek, Fish Lake, Fox Creek, Garnett Lake, Keremeos Creek, Prairie Creek, Sheep Creek, Shingle Creek, Trout Creek, White or Clearwater Creek

and their tributaries and to unnamed streams in the vicinity.

On the 22nd day of April, 1912 at 10 o'clock in the forenoon, at Peachland, to hear and determine claims to water rights existing on the 12th of March, 1909, on—

- Bald Range Creek, Bear Creek, Big Horn Creek, Cedar Creek, Cranberry Creek, Clover Creek, Davidson Creek, Deep Creek, Duncan Creek, Esparron Lake, Fern Creek, Hill or Venner Creek, Headwater Lake, Hill Creek, Jacob Creek, Jack Creek, Keep Creek, Finlay Creek, Lapsley Creek, Miller Spring, McDougall Creek, Power Creek, Rashdale Creek, Pigeon Creek, Smith Creek, Shannon Creek, Speer Lake, Spring Creek, Spruce Creek, Tamarack Lake, Trepannier Creek, Venner Creek, Venner Creek

and their tributaries and to unnamed streams in the vicinity.

On the 24th day of April, 1912, at 11 o'clock in the forenoon, at Okanagan Centre, to hear and determine claims to water rights existing on the 12th of March, 1909, on—

- Beaver Lake, Balagno Lake, Clear Creek, Cattail Lake, Clark or Horse Creek, Duck Lake Creek, Duck Lake, Echo Lake, Falls Creek, Island Lake, Lake of the Woods, Fanni Lake, Long Lake (south end), Ribblesworth Creek, Short or Blehe Creek, North Fork Shorts Creek, Torrent Creek, Sucker Creek, Wood Creek

and their tributaries and to unnamed streams in the vicinity.

On the 26th day of April, 1912, at 10 o'clock in the forenoon, in the Court-house at Vernon, to hear and determine claims to water rights existing on the 12th March, 1909, on—

- Abordeen Lake, Beaver Creek, Brewer Creek, Brown Creek, B X or Deep Creek, Cedar Creek, Coldstream Creek, Cottonwood Springs, Diamond Dry Lake, Dry Creek, Deer Creek, Fish Lake, Five-mile Creek, Girod Creek, Goose Lake, Gurnoy Creek, Haddo Lake, Long Lake Gulch, Louis Creek, Lulluwanne Creek, Irish or Cayotte Creek, Jones Creek, King Edward VII Lake.

- Larch Creek, Le Duc Creek, Long Lake Creek, Granite Creek, Long Lake (north end), Long Lake Creek, Lyons Irrigation Ditch, Latch Creek, Mosgrove Creek, Mud Lake, Meakins Creek, Mountain Creek, Nelson Creek, North Branch Creek, O'Keefe Creek, Otter Lake, Otter Creek, Porteous Creek, Reets Creek, Rocky Gulch, Six-mile Creek, Siwash Creek, Swan Lake, Swan Lake Creek, Stoney Creek, Sturts Creek, Three-mile Creek, Vernor Creek, Whiteman Creek

and their tributaries and to unnamed streams in the vicinity.

On the 29th day of April, 1912, at 10 o'clock in the forenoon, at Lumby, to hear and determine claims to water rights existing on the 12th March, 1909, on—

- Beaver Jack Creek, Bissette Creek, Bonneau Creek, Big Creek, Blue Spring Creek, Burnyeat Creek, Cherry Creek, Copper Creek, Cashmere Creek, Christie Creek, Dailey Creek, Deady Creek, Dutchman Creek, Eight-mile Creek, Fall Creek, Harris Creek, Ireland Creek, Mabel Lake, Mill Creek, Medora Creek, Nicklen Creek, Putman Creek, Perry Creek, Rollings Lake, Spider Creek, Shuswap River, Slack Creek, Sugar Lake, Silver Springs Creek, Sow Sap Creek, Spallumcheen River, Vance Creek

and their tributaries and to unnamed streams in the vicinity.

Parties who presented claims to the Board in 1910 and have received licences in substitution of the records need not present any statement of claim.

Dated at Victoria, B.C., 28th February, 1912.

By order of the Board, J. F. ARMSTRONG, m15 22 29 a5 12 Chairman.

JIMMY'S LETTER TO DAD.

Okanagan College, West Summerland, March 13th, 1912.

Dear Dad: Another football match to tell you about this week, but not a victory this time, I am sorry to say. But the defeat was glorious. Our team did not seem to be able to push the ball over for they had it on their line three times but Kelowna bucked up and pushed us back. "Moses" got a glorious black eye and bruised nose, but the rest came back without any visible signs of the encounter. Seven of the team went up to Kelowna on Friday morning to take part with some others in an athletic concert there. The others went up on Saturday. This is our third game with Kelowna and we have not had any victories though we managed one draw. This time the score was three to nothing and the game was anybody's all through. This week we play Penticton on our own campus Saturday, which will finish the football season. The senior and junior baseball teams are both working out three times a week and the former expect to take quite a trip this spring. We have a reception and social this week so I shall be awfully busy the last part of it. Got the money, for which many thanks. Money seems to be handy stuff sometimes, doesn't it? JIMMY.

There is nothing so kingly as kindness, and nothing so royal as truth.

Shiloh's Cure QUICKLY STOPS COUGHS, CURES COLDS, SWELLS THE THROAT AND LUNGS. SO ONCE

PENTICTON TELEPHONES.

MR. DOBIE GIVES HIS VERSION.

There has been an agitation started in Penticton to drop the local telephone company proposition and have the Okanagan Telephone Company supply a service. There was another meeting there this week at which some of our citizens were present. It is the opinion of these that those who are favoring the Okanagan Company have personal reasons for so doing.

Summerland representatives were rather surprised to find Mr. Dobie at Penticton, and he was not averse to being interviewed and giving his version of the story. Mr. Dobie said that he did not approve of the Okanagan Company buying the Lakeshore Company's plant, and, as they had a charter empowering them to do so, he urged that they go ahead independently and extend their own system down through the Valley. Mr. Dobie is further reported as saying that he had instructions from the directors to make the rates throughout the system uniform, though he advised them that to do so would cause trouble at the south end of the lake since it would in some cases double the prices. The Company now found themselves in trouble, and he accused them of wrongly putting the blame all on him and unjustly throwing him down. It had been said by some representatives of the Company that they intended to live up to the contracts of the Lakeshore Company, but Mr. Dobie stated that in the agreement between the two companies it was plainly specified that the Okanagan Company would not be required to do this. Mr. Dobie resents the abuse given him and said he would not continue with the Company though he had been asked to do so. He severs his connection with them to-day, March 15th.

REMARKABLE DECLARATION.

A remarkable declaration, signed by over sixty business firms of all sorts, transacting more than 95 per cent. of the business of Learnington, Ont., has recently been published. This declaration sets forth that "the sale of intoxicating liquors has been legally prohibited in our town since May, 1910, and from that day until this we have found business steadily improving; collections considerably better; more building being done than ever before; no buildings in town for rent; the morals of the entire community greatly improved, and probably not more than ten per cent. of whisky consumed as formerly, and possibly not ten per cent."

CHURCH NOTICES.

St. Stephen's Church (Anglican).—Holy Communion every Sunday at 8 a.m., except on the first Sunday in the month. First Sunday in the month Holy Communion at 12 noon. Matins 11, Evensong 7, each Sunday. Rev. H. A. Solly, B.A., Rector.

Methodist Church.—Services: Morning, every Sunday at 10.30. Sunday School at 11.30. Evening, Fortnightly at 7, alternating with West Summerland.—Frank W. Hardy, M.A., B.D., Pastor.

Baptist Church.—At West Summerland every Sunday at 10.30 a.m. Sunday School at 11.45 a.m. At the Lakeshore Church 7 p.m. Sunday School at 4 p.m. F. W. Pattison, Pastor.

Presbyterian Church Services: St. Andrew's Church, West Summerland, every Sunday morning, 10.30 a.m., Sunday School, 11.30 a.m. Evening, Fortnightly at 7 p.m., alternating with the Methodist Church.

**FERRY-OKANAGAN LAKE, AT KELOWNA.**

IN ACCORDANCE with chapter 85, R.S.B.C., 1911, "Ferries Act," the Government of British Columbia invite applications for a charter for a ferry to ply between Kelowna and a point on the opposite side of Okanagan Lake known as Westbank Ferry Slip.

Applications will be received up to 12 o'clock noon of Monday, 25th day of March, 1912.

The charter will cover a period expiring on the 31st March, 1914.

The ferry shall make two trips each way every day, weather permitting.

The time of departure from and arrival at Kelowna shall be arranged so that connection can be made with the Canadian Pacific Railway Company's steamers.

Applicants shall give a description of the vessel or vessels it is proposed to use, which must conform in all respects to the requirements of "The Canada Shipping Act, 1906," and amending Act.

Applicants shall state the tolls it is proposed to ask for—

- Each adult passenger:
  - .. child (not in arms) under 13 years.
  - .. head of cattle, horse, mule, or donkey, etc.
  - .. calf, sheep, goat, or swine, etc.
  - .. vehicle with one horse and driver.
  - .. cart or wagon with one horse and driver, loaded.
  - .. vehicle, with two horses and driver, unloaded.
  - .. vehicle, with two horses and driver, loaded.
  - .. parcel of 25 pounds and under.

Freight, per 100 lb. and under, non-perishable goods.

Freight, per 100 lb. and under, perishable goods.

To the successful applicant the Government of British Columbia will pay at the expiration of every three months of satisfactory service the sum of two hundred and fifty dollars (\$250).

The Government of British Columbia is not necessarily bound to accept any application submitted.

J. E. GRIFFITH,  
Public Works Engineer.  
Department of Public Works,  
Victoria, B.C., 6th March 1912.  
m 15-22

**SYNOPSIS OF COAL MINING REGULATIONS**

COAL mining rights of the Dominion, in Manitoba, Saskatchewan and Alberta, the Yukon Territory, the North-west Territories and in a portion of the Province of British Columbia, may be leased for a term of twenty-one years at an annual rental of \$1 per acre. Not more than 2,560 acres will be leased to one applicant. Application for a lease must be made by the applicant in person to the Agent or Sub-Agent of the district in which the rights applied for are situated.

In surveyed territory the land must be described by sections, or legal subdivisions of sections, and in unsurveyed territory the tract applied for shall be staked out by the applicant himself.

Each application must be accompanied by a fee of \$5, which will be refunded if the rights applied for are not available, but not otherwise. A royalty shall be paid on the merchantable output of the mine at the rate of five cents per ton.

The person operating the mine shall furnish the Agent with sworn returns accounting for the full quantity of merchantable coal mined and pay the royalty thereon. If the coal mining rights are not being operated, such returns should be furnished at least once a year. The lease will include the coal mining rights only, but the lessee may be permitted to purchase whatever available surface rights may be considered necessary for the working of the mine at the rate of \$10.00 an acre. For full information application should be made to the Secretary of the Department of the Interior, Ottawa, or to any Agent or Sub-Agent of Dominion Lands.

W. W. CORY,  
Deputy Minister of the Interior.  
N.B.—Unauthorized publication of this advertisement will not be paid for.

**APPLICATIONS FOR ELECTRIC LIGHT.**

There have not been as yet very many applications made to the Municipality for electric light. There is a considerable amount of power yet available, and it is desirable that all wishing electric light send in their application without delay. Seemingly a number have not taken this step thinking that they could not be supplied. If it is known just how many would take the service if it could be had, and there are sufficient numbers to warrant it, the service will probably be given.

**DEPLORES SCHOOL BOY SPEECH.**

"It is regrettable that Canadian children should lack culture and be unable to speak pleasing English, a condition which leads many employers to prefer English boys to Canadian boys in their offices. This might be largely overcome if Canadians acquired a softer and more musical intonation in their vowels," declared Bishop Farthing in the course of his address of welcome to the Protestant teachers at a Montreal convention recently.

He urged on the teachers the necessity of inculcating high ideals of culture in the children under their charge, and said, "teach them to speak English, to breathe through their noses, and speak through their mouths, as God intended them to do, instead of reversing the order, for I do not consider it desirable, even in the eastern townships for speaking through the nose to be encouraged."

Bishop Farthing acknowledged that he was probably treading on dangerous ice in giving utterance to such expressions, but stated that he was nevertheless firmly convinced of the correctness of his deductions.—Ex.

"An obstinate man does not hold opinions—they hold him."

**REV. DR. MATTHEWS OF SEATTLE ON GOOD CITIZENSHIP.**

Extracts from Address at W.C.T.U. Convention at Victoria.

(Contributed by the Woman's Christian Temperance Union.)

A citizen of a country must live within certain geographical boundaries, but he must also pay taxes, and he does also contribute to the social life of the community.

Money is not enough to make a man a good citizen. First of all he must have a clean character. A moral degenerate, inflamed with criminal intent, sought to be deprived of the privileges of citizenship. A man with the bubonic plague would not be allowed to land on our shores, but one of those immoral men, who prey on human bodies and souls, is a worse menace than the plague.

The second essential contribution toward good citizenship, is a righteous christian home. This is the unit of a community, and progression is built on this alone, not on the material wealth of individuals. Christian homes are wanted, such homes as will produce sons and daughters that will build a nation, and this can be built only on such a foundation.

The third essential feature is the willingness to live an unselfish life for the benefit of the community. The most disagreeable man is the selfish man. No good man should be too busy to give up some time to citizenship. If a reform campaign is started, some men are too busy to take any part in it. Such a man is a chronic parasite. He stolls not, neither does he spin, yet he reaps abundantly.

The men who are dangerous to a reform cause are the men who are too cowardly to risk the loss of a few dollars for the sake of the community. If something is brought about which benefits the community, what signifies the loss of a few dollars?

The population of London and suburbs is now 7,252,963.

**OUR APPLES SPECIALLY ACCEPTABLE TO INVALIDS.**

Summerland apples meet with highest praise wherever they go. The following is from a letter referring to some apples sent by a Summerland citizen to friends in England, and shows conclusively the superior quality of our fruit: "There was hardly a speck on any of the apples; only one that was really part gone. Everyone has admired them, and not only so but those with whom we have shared them have found them all. I have not been able to enjoy an English apple for a long time, but I could eat and enjoy and digest the Okanagan apples. An invalid friend has found the same experience, and been able to enjoy an almost forgotten meal. I have not tasted any apples like them for years, so thoroughly 'cooked' through by the sun and so soft without being tough or tasteless. The best of luck to Summerland and the new industry."

The directors of the Summerland Telephone Company met on Thursday night in Watson's Realty Office and discussed further their plans for the immediate future. A representative of an automatic telephone system is expected shortly from Chicago and until his arrival to decision as to which system shall be used is to be made. It was decided by the directors to make the first call on stock which call will be \$10 per share. It is possible that a few citizens may not have been called upon or have been missed in some way, and the directors will be glad if any such will advise them.

**Local News Items.**

Mrs. Hood is making a short visit to Penticton.

Mr. R. F. Theed returned home on Tuesday night's boat.

J. W. S. Logie is moving into his new cottage at Peach Orchard near G. N. Gartrell's.

Mrs. R. M. Ross has returned from Webster City, Iowa, arriving on Tuesday night's boat.

The Canadian Bank of Commerce inspectors of branches paid the local office a short visit this week.

W. A. Doyle, who has been at Brantford, Ont. for some time left there for Summerland on the 11th.

Socialist Candidate G. F. Stirling will speak in Elliott's Hall on Monday evening the 18th inst., at eight o'clock.

Summerland meet Peachand on the football field on Saturday afternoon. They will journey up the lake in the Maude Moore.

Miss Mary Washington and Mr. David Kirstine will be married in St. Andrew's Presbyterian Church on Wednesday April 3rd, at 2 p.m.

Mrs. Milne begs to intimate to her customers that she has received her stock of spring and summer hats. They may be seen at Mrs. Hood's store.

The Ladies' Hospital Auxiliary will hold their regular monthly meeting at the home of Mrs. J. N. Merrill next Tuesday afternoon at three o'clock.

Next Sunday morning at the Baptist Church, West Summerland the first of a series of two sermons on "The Will" is to be given, the subject being "I Would If I Could."

Eighty-five per cent. of headaches are the result of eye strain. If you are troubled that way consult Taube the eyesight specialist at the Drug Store on his visit here.

Seven miners lost their lives by an explosion in the Diamond Vale Collieries last week. This is the mine operated by the company of which Mr. T. J. Smith is president.

A smoking concert, athletic and boxing exhibition is to be given on March 20th by the Overseas Club. Musical and dramatic specialties are also to be included in the program.

George F. Stirling will address the electors of Summerland in Elliott's Hall on Monday March 18th at eight o'clock. Mr. Stirling is the Socialist candidate for the Okanagan.

There is being erected on Shaughnessy Avenue adjoining Dr. Mathison's Dental Parlors a new store and dwelling. This is being built for Mrs. Milne, who will occupy it as soon as possible.

If you have your house wired you may now have your housecleaning done by the vacuum process. Mr. T. P. Thornber has an electrical vacuum cleaner for public use. Have him do your house cleaning.

Through a teaming accident Ernest Campbell is now lying at the Hospital with a broken thigh bone. The team he was driving were going at a rapid pace, and in some manner became detached from the wagon. It is thought that a wheel of the heavily loaded wagon passed over his leg.

Remember the day and date of Taube the eyesight specialist, of the Taube Optical Company, Vancouver and Calgary. Will be at Summerland Drug Store on Thursday the 28th of March. If there is anything wrong with your eyesight don't fail to consult him. All work guaranteed as tested.

Mr. W. Mallett and Miss Mallett of Brandon, Man., have been in town this week and will probably leave on Saturday morning's boat. It is understood that they are just returning from California where they have been spending the winter. In addition to being a property holder here Mr. Mallett is the donor of the Mallett Cup in connection with the Apple Show, which is the envy of all the fruit exhibitors and is always keenly competed for.

**CARD OF THANKS.**

Permit me through the medium of your paper to thank the friends of Summerland for their many expressions of sympathy on the occasion of my recent visit. All aided me more than words can tell to ease the burden of bereavement upon hearts not a few.

On behalf of Mrs. Estabrook and family,  
H. G. ESTABROOK.

## TELEGRAPH OFFICE TO BE OPENED HERE.

### IMPROVEMENT IN GOVERNMENT TELEPHONE SERVICE.

The Okanagan Lake district is soon to be served with a telegraph line. At the present time the Government Telegraph service ends at Vernon. There have been numerous petitions and agitations for the extension of the government telegraph line down through the Valley. In the estimates which are soon to be passed by the Dominion Parliament for the fiscal year beginning 1912, an appropriation is included for this purpose and also one for the further extension and improvement of the existing telephone service. The telegraph line will be extended immediately to Pentiction with offices at all the more important points. An additional telephone wire connecting Vernon, Kelowna, Summerland and Pentiction will also be strung. This will relieve the present congestion of telephone and telegraph business and it is confidently hoped by the government officials that the improvements will meet all the present requirements of the people in the southern Okanagan.

### CANADIAN FRUIT EXPORTS.

The success of the exportation of apples from Canada has encouraged Canadian growers to seek European markets for other of their fruits. With the aid of the government of the Dominion, experimental consignments of peaches, pears, grapes and tomatoes have been sent to the British Isles, and have arrived in London, Glasgow and elsewhere in excellent condition. Thanks to care in packing, to cold storage and to continuous records of temperature during the journey, the difficulties of long distance transportation appear to have been so thoroughly overcome that Canadian Anjou pears are to be bought in Birmingham.—Gardener's Chronicle, England.

Greatness is rarely hereditary.

## OBITUARY.

### Mrs. G. A. McWilliams.

Annie Findlay McWilliams, beloved wife of G. A. McWilliams, was born on May 18th, 1858, at Smith's Falls, Ontario, and entered into rest March 16th, 1912.

With the passing of Mrs. McWilliams there has gone from our midst "the fair white flower of a blameless life." A devoted family and an unusually wide circle of sympathetic neighbors and friends of long standing, to-day mourn with a sense of deep bereavement the loss of one who possessed to a remarkable degree the faculty of winning and holding the personal affection of all who knew her.

The family are among the best known and earliest residents of Summerland, coming here from Crystal City, Man., seven years ago. At that time Mrs. McWilliams was suffering from pulmonary trouble and residence here was taken with a view to securing a favorable environment in which to resist the progress of her malady. The invalid entered into the battle for health with all the will power of a strong personality, and the prolonging of her life through periods of great physical weakness is a tribute to the tender care of a fond family; modern medical treatment, the suitable climate, but above all to the sufferer herself. Her courage never faltered, and her cheerfulness was habitual. On many occasions her will to live, supplemented by the unremitting devotion of a husband and sons, dominated the limitations of physical frailty and gave renowned periods of comparative health. During recent years, however, life's silver cord was very slender and after a sharp illness of very brief duration she came, suddenly, painlessly and peacefully.

She lived to realize her desire of

## BRIEF SCHOOL BOARD MEETING.

Messrs. G. J. C. White, S. H. Adams and Dr. J. P. McIntyre were present at a special session of the Board of School Trustees held on Saturday morning last. The meeting had been called to open tenders for the improvement of the Central School grounds, and to hear the report of a committee appointed to look over the grounds of the Town school with a view to their beautification.

In the matter of the former, only one tender was submitted, by A. H. and J. Steven, for \$210 and a time extension until May 1st. The secretary reported that he had spoken with other contractors and most of them would not undertake to tender on work of such an uncertain nature. After some discussion it was concluded that it would be more satisfactory and perhaps more economical to have this work done by the day. A motion was accordingly passed that the secretary be authorized to have the work on the school grounds proceeded with on the day work system at the ordinary rates, under the supervision of himself and Dr. McIntyre.

Mr. White reported that he and Mr. Robinson had inspected the grounds of the Town School and it was their conclusion that it would be inadvisable to undertake much work thereon. Plans regarding the future of this school had not been formulated and any work done now might have to be undone later. They therefore recommended that beyond having the ground cleared and perhaps a few shade trees planted nothing should be done. This recommendation was embodied in a resolution authorizing the secretary to purchase one dozen shade trees, six each to be planted on the grounds of the Central and Town schools.

The next meeting of the Board will be a regular session on the first Monday morning in April.

The Sacrament of the Lord's Supper will be dispensed at the morning service at St. Andrew's Presbyterian Church, West Summerland, on Sunday first, at 10:30, by Rev. Ferguson Miller, of Pentiction.

The following Sunday, the First Anniversary will be celebrated by special services both morning and evening. Rev. Peter Henderson, of Armstrong will preach at both services on that occasion.

remaining with her family until her four sons were all past their childhood days, and had the happiness of knowing that their careers give promise of doing her credit. The eldest, Lloyd, is the West Summerland druggist, Cliff, Findlay and Roscoe are all undergraduates of Okanagan College. All four are prominent socially, and deeply interested in Sunday School and Church work.

The funeral on Wednesday was one of the largest ever seen here, all classes of the community uniting in heartfelt sorrow to pay a tribute of respect to one well beloved, and to offer sincere sympathy for the deep grief of the bereaved husband and sorrowing family.

The pall bearers were Messrs. T. Beavis, T. Stinson, Jas. Conway, H. C. Mellor, Jas. Ritchie and H. E. Elsey, all old family friends. Before her marriage Mrs. McWilliams was a school teacher at Snowflake, Man., and some of her old pupils now resident here fondly cherish the memory of those early days. She had a keen and well stored mind, and her well informed opinions on all questions of current interest made her a delightful companion. She was a gracious hostess, never happier than when she was strong enough to welcome guests, a devoted mother, a loyal, happy wife, a kind, thoughtful, generous neighbor. She suffered much but with a quiet heroism that breathed no word of morbidness, self-pity, or rebellion against her lot. She was an influential member of the local Methodist Church, where a service to her memory will be conducted next Sunday evening. To a host of friends the long suspended last farewell has brought keen sorrow. To all who extend sympathy, with the reminder that the one whose passing we mourn will ever live again in lives made better by her presence.

## Provincial Constable Aston is Shot on Str. Okanagan.

### Prisoners, After Shooting, Coolly Eat Breakfast and Leave Boat.

#### Exciting Chase Before Recapture.

Robbery, shooting of a constable and an escape from custody with a final recapture has created sensation and excitement enough in the past week to do the quiet Okanagan for many a long month. The universal assistance given the officials by the citizens should convincingly show these outsiders that British Columbia is no place for them to play their game.

#### A DARING HOLD-UP.

Last Saturday evening a daring hold-up was perpetrated at Charter & Taylor's store, South Okanagan, near Kelowna, when two men named James and Wilson robbed the proprietor of \$70 in cash at the point of their revolvers. One of the men had worked at the Naramata Sawmill, while lately both had worked around Kelowna and were well-known. One is said to be a deserter from the American army, and a noted shot with a revolver.

A description of the robbers was forwarded to Pentiction, and on Monday they were arrested there by Provincial Constable Ashton, who took them aboard the steamer Okanagan, with the intention of taking them back to Kelowna. This was late in the evening after the boat crew had gone to bed so the men were unknown to the officers. Next morning the steward saw two strangers come out of a stateroom and sit down at the breakfast table. He asked for their tickets, as is generally done before meals are served, but they replied that they had left them in their state room. They paid for their breakfast and calmly ate the meal, nothing about their appearance or behavior attracting attention. When the boat reached Peachland the purser saw two men going ashore, and called to them to stop, as he had not seen their tickets. They kept on going, however, and he concluded that they were beating their way.

#### A GHASTLY DISCOVERY.

Shortly after leaving Peachland, the mate heard a sound of groaning in the stateroom which the men had occupied, and on opening the door was horrified to find a man lying on the floor, partly covered by rugs, and in an unconscious condition. Investigation showed that it was the unfortunate constable, who had evidently been shot in the head, a bullet wound being found in his forehead. Marks of blood were found on the wall by the upper berth. His pockets were turned inside out, and his handbag had been cut open. A small amount of loose silver was found on the floor, and an empty cartridge of .22 calibre. The wounded man was taken to Kelowna in a still unconscious condition, and no hopes are entertained for his recovery.

It is thought that he must have put his handcuffed prisoners into the lower berth, and fallen asleep in the upper one. From marks on his head and body it seems evident that he was first stunned by a blow, probably from a revolver butt, and the desperadoes then cut open his valves, got the keys of the handcuffs and released themselves. It is likely that he recovered consciousness and made a struggle when the shooting occurred. If this happened when the boat was making a landing at Summerland or Naramata, the noise of the whistle would have prevented a shot from a .22 calibre weapon being heard.

#### THE PURSUIT COMMENCES.

Upon the discovery of the wounded man, the boat put into Gellatly, and the news was immediately telephoned back to Peachland. Chief Constable Routh, of Vernon, and Constable Tooth, of Kelowna, immediately proceeded to organize

posses, and started out in pursuit of the robbers.

All points in the Valley were notified of their escape and Peachland was asked to watch and track the men from there. Mr. S. N. Cutbill and another started out and followed two men nearly through to Summerland, then passed them and came in to notify Magistrate English of their whereabouts.

All that day (Tuesday) Summerland was the centre of interest. Early in the forenoon a posse comprised of A. D. Adamson, Oliver Smith, C. W. Haddrell, Bert Nelson, Muir Stewart, C. N. Borton, Alex. Milne, George Barkwill, W. Watson, Harry Dunsdon and James Dunsdon were sent north to meet the two men. They had not gone far when they found four men, two of whom they suspected to be their quarry. They were searched, interviewed and allowed to enjoy their freedom, and the searchers proceeded towards Peachland. A little later the four were reported to be at West Summerland, two carrying packs and two without. The latter were generally believed to be the men wanted and information as to their whereabouts was telephoned to Mr. English's office, where a number of citizens were gathered watching developments with the keenest interest. With the description given it was confidently believed that these two were the men wanted. Telephones were kept in constant use. The movements of the four suspects were closely watched and as they had enquired the way to Pentiction, residents along the roads leading that way were notified to watch for them and report immediately they passed. It would remind one of dispatches to a general's headquarters reporting the movements of an approaching enemy to hear the messages coming over the phone. They were watched all along the highway to T. J. Garnett's, and the Messrs. Nelson and others were requested to take their guns and either follow or arrest the men and bring them in. At the same time Fred Gartrell and a number of others at Trout Creek were notified of their probable approach, and were asked to intercept them should they get that far. With Mr. Gartrell and his party ahead of them and the Nelson party behind it could only be a matter of a few minutes before they were captured. When first searched by the Adamson posse they had been found to be unarmed, so that no great trouble was anticipated.

Just then the whistle of the steamer bringing Constable Tooth and three special constables from Kelowna was heard, and preparations were made to hurry them to Trout Creek. They had not gone far, however, when they met Mr. Gartrell in his democrat with the four men, closely followed by a number of armed citizens. By this time a large crowd had gathered at English's stables awaiting their arrival. The men were questioned individually and collectively, and satisfied the authorities to an extent of their innocence.

#### ON THE WRONG TRACK.

About this time another dispatch came in from up the lake that two men had called at Greta's demanding food, which was given them. These were thought to be the criminals. For the purpose of identification the four men who had been detained were taken aboard the Okanagan for identification. Immediately the crew had seen them it was established that they were not the men wanted. They were, however, taken down to Pentiction.

A further description received over the wire of the two men who had appeared at Greta's satisfied the authorities that neither were those the men wanted. Just then a report came from Peachland that two other men had climbed the hills

## PRINTERS MEET.

The Okanagan Printers' Guild held their regular session annuals at Vernon, Friday and Saturday of last week. There were present, J. Williamson, Pentiction Herald; J. Leathley, Kelowna Record; J. C. Rose, Kelowna Courier; L. J. Ball, Vernon News; H. M. Walker, Enderby Press; J. H. Mohr, Armstrong Advertiser; R. E. White, Summerland Review. While in such an organization there might be the possibility to boost prices, there was no evident inclination to do so. Rather the chief aim of all seemed to be to learn how to give the best value possible for the price, and at the same time make a reasonable profit on each job.

towards the west, and these tallied to the description given better than any other. The police were positive that now they had their men sighted, and found that they had gone up over the hill and turned towards Summerland. Perhaps seeing that they were being followed, or deciding that it would be too risky to attempt to come this way, they turned back, following along the snow line, and were reported later to have demanded food at Westbank. The description sent in from there made the police doubly sure that they were now on the right track.

#### TAKEN BY SURPRISE.

Chief of Police Routh had arrived from Vernon and took charge of the search, directing the movements of the various parties through the long distance office here. A number of men, including some Indians from the Reserve near Westbank were put on the trail. As darkness had set in, the search was given up for the night, patrols being put out to make their escape practically impossible. The lake was also watched, a boat from Pentiction and another from Summerland putting out to prevent escape in that direction.

Early Wednesday morning men were again on the trail of the fugitives, and quite early in the day two residents near Wilson's Landing, came across the escaped prisoners sitting on a log.

Their pursuers got within a few yards of them before they were aware they were being approached. On being ordered to throw up their hands, James drew his revolver and was about to take aim when he was told that if he made another move he would be shot instantly. After momentary hesitation he opened his hand and let his revolver drop to the ground. Both men were made to hold their hands up with fingers extended, and in this way were marched some distance before the muzzles of the rifles to a neighboring ranch. Here ropes were obtained and the prisoners were securely tied and taken down to the wharf at Wilson's Landing. When the steamer Okanagan called there the men were taken aboard, tied back to back, and secured to the mast on the forward deck. Their captors stayed by them until they were landed in the jail at Kelowna. The party was met at Kelowna by a large crowd, and the prisoners being securely tied with the ropes, handcuffs were not used.

#### THE INJURED CONSTABLE.

The prisoners were brought before the magistrate at Kelowna on Thursday, and the case was still being heard this (Friday) morning. It is probable that the hearing will be closed to-day, when the prisoners may be sent up for trial, or they may be remanded to await developments in the condition of Constable Aston.

Constable Aston was regarded as one of the best officers in the district. He had served a term in the Royal North-West Mounted Police with credit, previous to coming to British Columbia. He resided in the boundary district before being stationed at Pentiction where he had been for about a year. The bullet is embedded in the brain, causing partial paralysis and it is not expected that he will regain consciousness. He spent a very restless night Thursday, but his respiration and temperature are about normal.

The man who stints his wife to keep up his club has no business to wonder why marriage is a failure.

## JIMMY'S LETTER TO DAD.

Okanagan College, West Summerland, March 20th, 1912.

Dear Dad:

The football season is now over and we have made a pretty fair record. Last Saturday we played our last game when we met Pentiction on our own campus and beat them five to nothing. It was a good game throughout and when time was called both teams were quite ready to stop. While the College players were rather inclined to run back with the ball instead of going ahead the passing was better than usual, and the only try scored was obtained from a bit of unselfish work on the part of Menzies the captain, who passed to Ryan when about three feet from the line, allowing Ryan to score. Another time in this half it looked like a score but the ball was found to be six inches outside the line when twenty or so fellows were hauled off it. Twice the College carried the ball over the line in the second half only to be tackled in goal and a five yard scrum given them. Sometimes I feel sorry for the ball when it comes out of a mix-up; twenty men on it, and then to be kicked around some more. Mr. White refereed and did pretty well. Our record this year has been pretty good for a bunch which never played before. We have played five games, won two, drawn one, and lost two. Our first game we lost to Kelowna on our own campus, the second we played to a scoreless draw against Kelowna on her home grounds, while we won our third game at Pentiction, were beaten again by Kelowna there and beat Pentiction on our home campus.

Politics is the great talk up here now. The boys have organized a campaign and chosen candidates who are stumping and have supporters working for them. Mr. Harry C. Packham represents the Liberals, while Mr. A. C. Riley takes up the cudgels for the Socialists. Some of the strongest speakers in the school flaunt the red flag and a good deal of discussion is indulged in.

Friday night the Enoch Arden recital will be repeated in the College Gymnasium. It was splendid last time and should be even better then.

Saturday night Court will meet in the College chapel and a breach of promise case will come up for trial. Heavy bonds are up for the appearance of the defendant, a respected member of the community who has erred in loving not wisely but too well.

Your son,  
JIMMY.

## SUMMERLAND FOOTBALL CLUB.

Summerland now has a live, well-organized football club, an auxiliary of the Overseas Club. The first home game was that with the Pentiction team, played on the College campus on the 9th inst. That game showed that the Summerland team was a good combination. The team on that occasion was as follows:

D. Thompson; J. Woods, B. Newton; H. Coles, J. Weeks, C. Brind; J. Tompleton, W. Atkinson, G. Fisher, Lorne Sherk, J. Lacey. Fisher is by all odds the best man of the team. The score in the game with Pentiction was 7-1, and Fisher scored four of the seven. Thompson made a good goalkeeper and was the right man in the right place.

Two delegates representing the local club, Messrs. Fisher and Beattie, have been appointed to go to Kelowna on Saturday to arrange fixtures for the recently formed Valley League. The president of the Vernon Club is putting up a cup as a trophy.

R. H. Holmer is president, W. J. Beattie secretary-treasurer of the local team, and the sports committee of the Overseas Club is comprised of Messrs. Holmer, Weeks, Feabery, Fisher, Atkins and Beattie.

A game had been arranged with Peachland for last Saturday afternoon, and arrangements had been made to make the trip up in the "Maud Moore." Peachland sent word in the morning, however, that they were unable to raise a team, and the game was unavoidably called off, much to the chagrin of the local enthusiasts.

PUBLISHED BY THE REVIEW, PRINTING & PUBLISHING COMPANY LIMITED.  
RALPH E. WHITE, MANAGING DIRECTOR

SUBSCRIPTION RATES: \$2.00 PER YEAR, IN ADVANCE. SIX MONTHS \$1.00.

### Advertising Rates:

LEGAL NOTICES.—Twelve Cents per line for the first insertion; Eight Cents per line for each subsequent insertion.

LAND NOTICES.—\$7.00 for 60 days, \$5.00 for 30 days.

WATER NOTICES.—30 days, 150 words and under, \$3.00; each additional 50 words, \$1.00.

THEATRICAL, ETC.—50c. per inch for first insertion, and 25c per inch each subsequent insertion.

LOCAL NOTICES or Readers, immediately following regular locals, 20c per counted line; 10c per line each subsequent insertion. Half these rates when accompanying display advertisements.

LOGGERS, ETC.—25c. per week, per column inch.

FOR SALE Advertisements, Etc., 3c. per word first week; 1c. per word each subsequent week.

Transient Advertisements payable in advance.

Rates for Contract Advertisements furnished on application.

Copy for change of contract advertising must be in the hands of the printer not later than Wednesday noon to insure publication in the next issue.

In accordance with schedule of prices adopted throughout the valley, charges for advertising are now being made weekly. Heretofore when five issues were made in one month the result was a loss. By the new method customers are charged each week for just the amount of space used.

FRIDAY, MARCH 22, 1912.

### THE BEST ROADS IN THE WORLD.

IN FRANCE, where they have the best roads of any country in the world, the highways are divided into several classes, but all of them are supervised by the national government, which maintains a bureau of roads and bridges, and supports a school for the education of the engineers and inspectors who are employed in the bureau. This method of building and maintaining roads in France was started by the first Napoleon, who appears to have been the earliest European statesman to see clearly the economic advantages of proper highways, and at the same time had the power to carry out what he wished. The effect of these good roads in France has been wonderful. They have brought the various parts of the country nearer together; they have made the country life less lonesome, and they have reduced the cost of the transportation of country produce to a minimum. France is the only country in Europe where the agricultural classes are not dissatisfied, and where they do not feel that they have a harder time than those who labor in other vocations.

Civilized nations have good roads—savage and unenlightened countries do not. The highways of travel are a gauge of the progress a people have made from barbarism to civilization.

The price at which a farmer will sell for is regulated by its nearness to a market, and the quality of its neighborhood roads. To increase the selling price of your farm, work for good roads.

Good roads will benefit the farmer more than he ever dreams of. On an average, the farm products of this country must be hauled by wagon miles to a market or a shipping point. There is more room for saving in this wagon haul than in a railroad haul of one thousand miles.

### FORESTRY IN EUROPE.

THE PRODUCTIVE FOREST AREA in 1908 on the Grand Duchy of Hesse in Europe amounted to 182,263 acres. In general the standing timber is composed of sixty-nine per cent. hardwood and thirty-one per cent. coniferous forest. The fir ranks first among the coniferous species. The total yield of lumber in 1908 was 4,575,000 cubic feet. Refuse, in so far as it is not suitable for lighter lumber, such as laths or for pulp, is used for firewood. The expenditures for salaries, forest cultivation and road building amounted to approximately \$754,000, and the total gross income from lumber and firewood was \$1,161,931. The capital represented by the forests, \$52,665,854, brought interest accordingly at 2.21 per cent. Where intensive forestry of this kind is practised, forest fires are unknown. Sufficient money spent on Canadian Forest Reserves would greatly reduce the fire danger, maintain an adequate lumber supply for the country and in time become a source of revenue to the Government.

## Naramata Notes.

**BORN**—To Mr. and Mrs. R. H. King, on Friday March 15th, a son.

**BORN**—To Mr. and Mrs. A. R. Large, on Wednesday March 13th, a daughter.

The Trust Company are making preparations for considerable extensions and improvements to their irrigation system.

Rev. H. A. Solly, of Summerland, was in Naramata on Thursday and while here took advantage of the opportunity afforded of calling upon some of his parishioners.

Miss Bessie Mitchell has gone to Penticton where she has accepted a position in the millinery and dressmaking establishment of Mrs. Stewart, recently purchased from Mrs. Colwell.

The Socialist meeting held in the Opera House on Tuesday and addressed by Geo. Sterling, of Salmon Arm, opposition candidate, was very well attended. It looks as though our honorable friend, the Minister of Finance, may find a few votes missing at the polls next week.

Mr. W. H. Mallett, of Brandon, on his return from a trip to California where he has been spending the winter season with his family, took a trip down the Okanagan for short visits to Summerland and Naramata. While here he was the guest of his sister, Mrs. W. W. Mitchell.

At the meeting of citizens held last week a number of questions of local interest were discussed. But the topic that seemed to be nearest the heart or the heads was the Herd By-law. What can Naramata do to get rid of the cows wandering all over town? It was felt that the citizens should make a start toward beautifying their town and the street in front of their homes, at least. It is useless to attempt this, however, until the cows are kept within bounds. A committee named by chairman H. J. Wells has been empowered to consult the owners of the herd with a view of remedying the evil.

### TO TELEPHONE SUBSCRIBERS.

The Okanagan Telephone Company desires to inform its subscribers that no change will be made in the present rental rates until such time as improvements to the system and service warrant it.

The demand of the company's late manager for increased rates at the present time was unauthorized by the Board of Directors and was immediately stopped as it came to their knowledge.

The company wish to state that it is their intention to give the city and district a system and a service which is both modern and up-to-date and which will be in keeping with its growing needs.

The company further wish to state that they have read over and examined the franchise granted by the Municipality of Summerland to the Lakeshore Telephone Company, Limited, and have no hesitation in stating that it is their intention to live up to and observe the terms imposed by that franchise in its entirety, which among other matters governs the rates that the company may charge for its service.

The company regrets very much the exaggerated reports that have been circulated regarding the price which they paid the Lakeshore Company for its systems, as such reports are harmful in every way. The Board of Directors much regretted to learn that there had been incivility and discourtesy on the part of its late manager towards its subscribers in the Lake towns, and they have taken effectual steps to prevent its recurrence and trusts that the new manager, Mr. C. M. Sullivan, who will arrive in your midst this week, will extend every courtesy and civility that is in his power to all our subscribers and the public at large.

By Order of the Board of Directors,  
**J. A. RENNIE,**  
Secretary.

A little help is worth a deal of pity.

## Concrete-mixing is Easily Learned

It is no more difficult than mixing bran mash, once the simple instructions have been read.

The materials—sand, crushed rock or gravel and cement—each play a separate part. The rock provides the bulk of volume at very low cost. The sand fills in all crevices between the pieces of rock or gravel. The cement, mixed with water, forms a "bond," in other words a rocky "glue," that binds the other materials firmly together.

with a strength that increases with time. Concrete is really artificial rock, more firmly bound together than natural rock, which often has cracks, veins, fissures and other weaknesses.

Any farmer can learn how to mix Concrete and to apply it to the hundreds of uses to which it is fitted. But in order to be absolutely sure that his proportions are correct and that his materials are properly suited to the purpose, he should send for the book.

### "WHAT THE FARMER CAN DO WITH CONCRETE."

and read the careful directions for mixing Concrete for all purposes. It also describes in detail hundreds of ways in which Concrete may be used to make the farm more comfortable, more convenient, more profitable and more valuable.

Just send us your name and address—in a letter or on a postal card—and the book will be sent to you by return mail free. Address

Agent.

### DEMONSTRATION ORCHARDS ALLOTTED.

Arrangements have just been completed by the provincial department of agriculture for the allotment of five demonstration orchards which will fully determine the best varieties for planting and the most successful processes to adopt in the growth of fruits in the different sections of the Kootenay district.

One of these orchards will be established at Cranbrook very centrally situated at about one mile distant from the town. Here conditions are found distinctly representative of a very extensive territory; in fact, representative of the entire upper Kootenay. The soil is good, and most satisfactory results are confidently looked for.

Another demonstration orchard has been assigned to Baynes Lake, (Waldo), property showing conditions thoroughly representative of a large area of south-east Kootenay. Another has been located at Windermere which will be useful in experimentation with regard to conditions in the lower Columbia Valley, while those of the upper Columbia will be fully observed at a farm in the locality of Golden.

Another recently granted demonstration orchard goes to New Denver, where property conditions generally representative of the Slokan are encountered.

**Kaleden Comments**

Stephen C. Trewitt, who has  
again been under the doctor's care,  
is improving.

Excavating has begun for the  
basement of the Kaleden Supply  
Company's new store.

Mr. Harry Chapmel has returned  
to Kaleden for the summer. He  
will have charge of the flume build-  
ing.

Mr. Carroll Foss, late of St.  
John, N.B., is making preparations  
to build on his fine property west  
of the townsite.

Mr. P. Simpson is preparing the  
ground for the foundation of a  
comfortable dwelling which will  
be constructed for him during the  
summer.

The plumbing in the Kaleden  
Hotel is completed, and Mr. D. J.  
Morgan, who has had the work in  
charge, left on the 14th inst. for his  
home in Kamloops.

**POULTRY IN THE OKANAGAN.**

I was up the Okanagan recently  
and was pleased to see the quality  
of stock kept. One of the most  
pleasing features in connection with  
the high-class stock seen during my  
trip was the fact that nearly all the  
ranches up there are stocked with  
birds from the West. No, I have  
not made a mistake. I inspected  
both utility and exhibition stock  
that had been purchased from Coast  
breeders, and they were a credit to  
their original owners.

At Summerland I visited a ranch  
that is unique in a way. Single-  
comb Brown Leghorns were the only  
birds kept, and there were about  
600 birds of this variety, and a  
pretty sight they looked. The nest  
boxes looked prettier still. The  
owner was not at home and did  
not know that I was coming, so the  
nests had not been "salted."

I like to happen around unawares  
occasionally, especially about half-  
past three in the afternoon, so as  
to see the eggs collected. That's  
the time to catch them.

As usual, I learnt something new  
on this trip. I found out how to  
tell the best layers without trap-  
nesting or "pottering," or "Hog-  
anizing." I wonder how it is that  
I had not thought of this idea be-  
fore. However, it was left to a  
fellow-countryman of Mrs. Clancy's  
to discover this trick. 'Tis a  
pity I am so honest or I would be  
selling the idea as a secret at \$1  
each.

Whilst visiting this gentleman  
from the Emerald Isle, I was struck  
by the appearance of a pen of  
White Leghorns. They appeared to  
be covered from head to foot in  
blood. Upon asking what the  
trouble was Shamus says with a  
smile, "Shure, an' it's paint; red  
paint, me frind. It's a mighty  
foine idea; it is that. I'm just  
after selling a mather of about  
170 hins to a Chink, and begorra,  
Oi foiled the same Chink proper.

"He was after buying th' best  
lookin' birds. Sez Oi to him, sez  
Oi, 'Yez shall have all th' burds  
but thirty if yez want thim at all,  
at all. After blatherin' a bit he  
daysided to take th' burds and Oi  
tould him to come around in a  
wake's toime. Oi done some  
mighty quare thinkin' for an hour  
or so an' got me a pot ov paint and  
plastered up iviry wan ov th'  
nests with rid paint. Iviry marnin'  
Oi gave th' nests a dose, an' it's  
a foine soight th' hins are after  
lookin' by th' same token. Phwen  
Mister Chink comes, Oi sez, 'Yez  
can take all the clane phwite burds  
an' lave th' rist. Begorra th' next  
mornin' Oi got more aigs frum th'  
thirty burds liff than Oi did frum  
th' whole two hundred."

I can readily believe him because  
the thirty hins have the same space  
now as that occupied by the two  
hundred.

I expect to see a whole lot of  
"rid" Leghorns next November,  
after giving publicity to Shamus'  
scheme.

The secretary of the Vernon  
Poultry Association told me of one  
of the members of this association  
who has a simple way of telling  
whether his hens are good layers  
or not. He just kills off all the  
hens that have long claws. He  
says they can't be any good or else  
they would wear their claws down.  
As Mrs. Clancy's boy (he's been  
to collogo) says, "Ancora imparvo,"  
which translated into slang means,  
"We are still larnin'."

- Speer Lake.
- Spring Creek.
- Spruce Creek.
- Tamarack Lake.
- Trepannier Creek.
- Venero Creek.
- Venner Creek.

and their tributaries and to unnam-  
ed streams in the vicinity.

On the 24th day of April, 1912,  
at 11 o'clock in the forenoon, at  
Okanagan Centre, to hear and de-  
termine claims to water rights ex-  
isting on the 12th of March, 1909,  
on—

- Beaver Lake.
- Balagno Lake.
- Clear Creek.
- Cattail Lake.
- Clark or Horse Creek.
- Duck Lake Creek.
- Duck Lake.
- Echo Lake.
- Falls Creek.
- Island Lake.
- Lake of the Woods.
- Fahni Lake.
- Long Lake (south end).
- Ribblesworth Creek.
- Short or Biche Creek.
- North Fork Shorts Creek.
- Torrent Creek.
- Sucker Creek.
- Wood Creek.

and their tributaries and to unnam-  
ed streams in the vicinity.

On the 26th day of April, 1912,  
at 10 o'clock in the forenoon, in  
the Court-house at Vernon, to hear  
and determine claims to water  
rights existing on the 12th March,  
1909, on—

- Aberdeen Lake.
- Beaver Creek.
- Brower Creek.
- Brown Creek.
- B X or Deep Creek.
- Cedar Creek.
- Coldstream Creek.
- Cottonwood Springs.
- Diamond Dry Lake.
- Dry Creek.
- Door Creek.
- Fish Lake.
- Fivo-mile Creek.
- Girod Creek.
- Goose Lake.
- Gurnoy Creek.

FERRY—OKANAGAN LAKE, AT KELOWNA.

IN ACCORDANCE with chapter 85, R.S.B.C., 1911, "Ferries Act," the Government of British Columbia invite applications for a charter for a ferry to ply between Kelowna and a point on the opposite side of Okanagan Lake known as Westbank Ferry Slip.

Applications will be received up to 12 o'clock noon of Monday, 25th day of March, 1912.

The charter will cover a period expiring on the 31st March, 1914.

The ferry shall make two trips each way every day, weather permitting.

The time of departure from and arrival at Kelowna shall be arranged so that connection can be made with the Canadian Pacific Railway Company's steamers.

Applicants shall give a description of the vessel or vessels it is proposed to use, which must conform in all respects to the requirements of "The Canada Shipping Act, 1906," and amending Act.

Applicants shall state the tolls it is proposed to ask for—

- Each adult passenger.
- child (not in arms) under 13 years.
- head of cattle, horse, mule, or donkey, etc.
- calf, sheep, goat, or swine, etc.
- vehicle with one horse and driver.
- cart or wagon with one horse and driver, loaded.
- vehicle, with two horses and driver, unloaded.
- vehicle, with two horses and driver, loaded.
- parcel of 25 pounds and under.

Freight, per 100 lb. and under, non-perishable goods.

Freight, per 100 lb. and under, perishable goods.

To the successful applicant the Government of British Columbia will pay at the expiration of every three months of satisfactory service the sum of two hundred and fifty dollars (\$250).

The Government of British Columbia is not necessarily bound to accept any application submitted.

J. E. GRIFFITH,  
Public Works Engineer,  
Department of Public Works,  
Victoria, B.C., 6th March 1912.

**The HOME CIRCLE.**

Crude Thoughts From the Editorial Pen.

**PUSH! PUSH!** It is just the word for the grand, clear morning of life; it is just the word for strong arms and young hearts; it is just the word for a world that is full of work as this is. If anyone is in trouble and you see it, don't stand back, push!

IT IS ALWAYS BEST to wait for evidence before passing judgment. When you hear reports detrimental to young ladies or gentlemen, don't be hasty in forming conclusions. It is better to be charitable when anyone is in trouble. To-day it is someone else's boy or girl; to-morrow it may be yours.

**SOCIAL REFORMERS** and workers all over this broad land of ours are constantly trying to remedy problems of vice and install new reform methods; and it behooves every mother of our Home, Sweet Home to do her share by exerting preventive measures upon her boys and girls. Prevention is better than reform.

**"WE HAVE SEEN** a picture by Harris entitled, "No more Home?" We can't forget it. For the first time the young husband staggers into that rich home intoxicated. And it is a rich home; notice the draperies, the pictures, the furnishings. The baby's cribs, which the young mother prays may become its casket, rocks to sleep innocence. A thousand things are worse than death. The husband wears a flashing diamond, but lacks the diamond of character. See the roses dropping from the vase, withering, dying. See the roses dropping from the wife's heart, withering, dying. The closed piano—music is dead. The light is going out. "No more home." God help those who live in homeless houses—houses where a husband gives black looks and vile oaths; where a woman's sarcastic and nagging tongue drives a man to drink quicker than snake bite; where a lazy son gives abuse and heart-break instead of gratitude; where a shallow, thankless daughter believes her chief end and aim in life is to dress well and marry a bank account and an auto, as though happiness always travelled in a touring car! Deliver us from such a home! Close it up quick! Put up the sign "House For Sale." Better sit on a stump of a tree out in the woods with an umbrella over your head and call that home.

**"TWAS** Oliver Wendell Holmes who said "Happiness consists of four feet on a fender" another way of spelling h-o-m-e Understand, one can get considerable "pleasure" elsewhere, coarse or refined. There's considerable gratification in a night of fellowship with the "boys" at the lodge. One may be wildly hilarious at a "fun factory" at the theatre, but when it's all done, after the last guffaw at the "factory," after, with more or less treacherous memory, you've sung "Auld Lang Syne" then you start—homeward. The cheap tinsel of regalia, the hollowness of ritual, somehow crowd in on you. The trite saying of the "suverin gran potentate" as he gave you goodnight grip at the street corner, "We can go home, Jim, when we can go nowhere else," strikes in still deeper. To Adam paradise was home; to you home is paradise. There the "kiddies" are; there "the best woman God ever made" greets you with face and eyes bright as June morning. What do the Chinese say? "It takes a hundred men to make an encampment; it takes a woman to make a home." Any influence that makes men think less of home is traitor to the man. The strength of this Dominion is built on the Canadian home. It's a political safeguard. No anarchy for the man with a home. "No home" means Goths and Vandals. It's the strength of the church, too. Hearthstones were laid before altar stones. To the true home angels might be invited to stay and not find themselves amiss.

**SYNOPSIS OF COAL MINING REGULATIONS**

COAL mining rights of the Dominion, in Manitoba, Saskatchewan and Alberta, the Yukon Territory, the North-west Territories and in a portion of the Province of British Columbia, may be leased for a term of twenty-one years at an annual rental of \$1 per acre. Not more than 2,560 acres will be leased to one applicant. Application for a lease must be made by the applicant in person to the Agent or Sub-Agent of the district in which the rights applied for are situated.

In surveyed territory the land must be described by sections, or legal subdivisions of sections, and in unsurveyed territory the tract applied for shall be staked out by the applicant himself.

Each application must be accompanied by a fee of \$5, which will be refunded if the rights applied for are not available, but not otherwise. A royalty shall be paid on the merchantable output of the mine at the rate of five cents per ton.

The person operating the mine shall furnish the Agent with sworn returns accounting for the full quantity of merchantable coal mined and pay the royalty thereon. If the coal mining rights are not being operated, such returns should be furnished at least once a year. The lease will include the coal mining rights only, but the lessee may be permitted to purchase whatever available surface rights may be considered necessary for the working of the mine at the rate of \$10.00 an acre. For full information application should be made to the Secretary of the Department of the Interior, Ottawa, or to any Agent or Sub-Agent of Dominion Lands.

W. W. CORY,  
Deputy Minister of the Interior.

Mr. James Conway recently spent a few days at the Coast.

Harry Glennie, of Penticton, has been visiting the home of his sister, Mrs. E. Graham.

A Memorial Service to the memory of the late Mrs. G. A. McWilliams will be held at the Methodist Church on Sunday evening.

Out of respect to the late Mrs. G. A. McWilliams, the schools and all places of business, were closed on Wednesday afternoon, the day of the funeral.

The Penticton Football team played the College fifteen a game of rugby on the campus last Saturday afternoon. It was a good game throughout and the final score was 5-0 in favor of the College. An interesting account of the game will be found in "Jimmy's" home letter.

Mr. J. W. Chapman, late of Methow Valley, has recently purchased several hundred acres of land near the headwaters of Trout Creek. The sale was put through by Messrs. Arnold & Lucas, of Penticton. Mr. Chapman is an Englishman who has had considerable experience in fruit growing and mixed farming and will probably make his home in Summerland. When interviewed, he had not quite decided whether Peachland or Summerland would be his headquarters. He preferred Summerland unless there was very much more convenient access to his property through Peachland.

**LETTER TO THE EDITOR.**

The Columns of THE REVIEW are open to the public for the discussion of matters of general interest. No notice can be taken of anonymous communications. Letters intended for insertion must be authenticated by the name and address of the writer, not necessarily for publication. The opinions of correspondents are not necessarily those of the Review.

**TELEPHONE COMPANY'S "COURTESY."**

Gartrell P.O., B.C.  
The Editor,  
The Summerland Review.  
Dear Sir:  
I read an article in the Summerland Review from the Okanagan Telephone Company a week or two ago in which it was stated that they (the Telephone Company) would extend to their customers every courtesy. Now, I do not know the manager of this branch of the service, but what I do object to is to have a man walk into a house without knocking or asking permission, or even explaining his business. There have been at least two houses treated in this way. If this is the Company's courtesy, I for one do not want a repetition of it.  
Yours sincerely,  
S. F. SHARPE.

**INVESTMENTS AT PRINCETON.**

Already a number of Summerland citizens have been reported as investing in East Princeton real estate. Following are recent notes from the Princeton Star:  
"C. Featherstonhaugh, of Summerland, has bought two lots on Cement Street."  
"S. Angove, of Summerland, intends building on his lots on Cement Street."  
The latter upon being questioned said that the idea of building was new to him. He had merely purchased the two lots as a speculation.

**CARD OF THANKS.**

We take this opportunity to thank our many friends for their kind assistance and sympathy shown us during our recent bereavement.  
G. A. McWilliams and Family.

**Water Notice.**

**FOR A LICENCE TO USE WATER.**

NOTICE is hereby given that The Municipality of Summerland, of Summerland, British Columbia, will apply for a licence to use 0.12 cubic feet of water per second from a spring on south side of Trout Creek, a stream flowing in an easterly direction and emptying into Okanagan Lake near Gartrell P.O., B.C. The water will be used for Domestic purposes, under a notice of application for a licence to take and use water, posted herewith, on the land described as D.L. No. 1079, 8104, 440, 441, G.1, Osoyoos.  
This notice was posted on the ground on the 22nd day of March, 1912. The application will be filed in the office of the Water Recorder at Vernon, B.C. Objections may be filed with the said Water Recorder or with the Comptroller of Water Rights, Parliament Buildings, Victoria, B.C.

MUNICIPALITY OF SUMMERLAND,  
Applicant.  
J. L. Logie, Clerk.

W. A. Lang, of Peachland, registered at Hotel Summerland on Wednesday.

A. J. Miller, of Peachland, was a guest at Hotel Summerland last Saturday.

Maj. and Mrs. Hutton returned from California at the beginning of the week.

Mrs. O. Vaughan went down to the Coast on Monday's boat for a two weeks visit.

The "Enoch Arden" recital will be repeated in the College Gymnasium to night.

Mr. and Mrs. Alex. Grieves and family, of Penticton, were recently guests of Mr. Grieve's sister, Mrs. T. McAlpin.

Mr. John George, manager of the Cement Company at Princeton, is in town this week, having registered at the Hotel on Wednesday.

C. M. Sullivan, the new manager for the Okanagan Telephone Company, spent last Saturday in town, going from here to Penticton.

A. Vaughan, brother of the local grocer, spent a day in town recently. Mr. Vaughan is a traveler for a wholesale grocery house.

Don't overlook the Spring Millinery Opening of The Angove & Stinson Company, Limited on Wednesday March 27th. Tea served from 3 to 6 o'clock p.m.

The Box Social which the ladies of the Hospital Auxiliary had planned to hold on the evening of Thursday the 11th of April, has been postponed.

R. H. English is having some alterations and repairs made to his old stable building which he purposes using as a warehouse for carriages, etc. Nelson Bros. are doing the work.

Dr. and Mrs. R. C. Lipsett left Sunny Slope, California, on the 19th inst. for Summerland, via Vancouver. They will remain in the latter city for a few days.

Eighty-five per cent. of headaches are the result of eye strain. If you are troubled that way consult Taub, the eyesight specialist at the Drug Store on his visit here.

Mr. and Mrs. Crawshaw, of Vernon, have this week been the guests of Mrs. George Gartrell, Mrs. Crawshaw's sister. They arrived in Summerland by last Saturday's boat.

The telephone poles along the Peach Orchard road, which were left in dangerous positions when the road was widened recently, were this week moved to the roadside by employees of the Okanagan Telephone Company.

I. Cutler, who not long ago visited Summerland as Poll Tax Collector, has this week been in town serving notices to lot owners to appear before the Water Commission to prove their claims to water rights. The Commission sits here April 19th, 1912.

George F. Sterling, Socialist candidate for the Okanagan, addressed a gathering of the faithful in Elliott's Hall, on Monday night. Mr. Sterling is a school teacher by profession, and gave his audience a very satisfactory talk, making an excellent impression.

Mr. and Mrs. Wm. McDougall have taken up their residence in the Phinney cottage. Mr. McDougall has been a prominent citizen of Vancouver, being head of the shipbuilding yard there, as well as one of the chief officials of the Royal Vancouver Yacht Club.

Remember the day and date of Taub's eyesight specialist, of the Taube Optical Company, Vancouver and Calgary. Will be at Summerland Drug Store on Thursday the 28th of March. If there is anything wrong with your eyesight don't fail to consult him. All work guaranteed as tested.

The building, the property of the Summerland Supply Company, until recently occupied by White & Company, is being thoroughly remodelled and enlarged. It is the purpose of the proprietors to alter the building to make it suitable for a retail store. While the property has not a wide frontage, yet with the annex in the rear, to which a second storey will be added and which is well lighted, it gives a large floor area well adapted to retail purposes. When asked to what use the building would be put the proprietors said that nothing had been definitely decided.

DEVOTED TO THE INTERESTS OF SUMMERLAND, PEACHLAND AND NARAMATA

Vol. 4, No. 35

SUMMERLAND, B.C., MARCH 29, 1912.

Whole No. 189

## Railway Construction Will Begin At Once. Summerland Base of Operations for Forty

### Miles of New Line.

#### Route Approved and Contract Signed.

#### Steel Ordered For Large Bridge.

PRESIDENT WARREN has decided to begin construction on the Kettle Valley Railway in this municipality and work out from here. J. L. Logie, Right-of-Way Agent, has about completed his duties and this week President Warren, accompanied by Chief Engineer McCollough, visited Summerland and inspected the route. Both gentlemen were pleased with the survey and at an informal meeting with the Council requested that Engineer Latimer be instructed to go over the right-of-way with the Kettle Valley Railway's engineer to adjust the matters of crossings, flumes, ditches, etc. These will be arranged without delay and the recommendation of the Engineer submitted to the Council for final approval.

Already the ironwork for the big steel and concrete bridge across Trout Creek has been ordered. There will be some forty miles of construction work handled from here, extending from Trout Creek to the summit, all material, etc. being landed here. Already the contract has been signed with the construction company, and immediately the few remaining preliminaries are arranged work will begin.

Engineer McCarthy is already encamped in Peach Valley with his men. Construction camps will be erected at once and the outfit is expected immediately.

Mr. Logie has practically arranged for all the right-of-way with the exception of one lot. This, it is understood, is the property of Dr. Munroe, on or near Alkali Flat, for which he is asking \$1,500 per acre. The price will probably be fixed by arbitration.

### Interesting Police Case.

#### To Stop Petty Stealing at West Summerland.

Found Guilty. Out on Suspended Sentence.

A most unusual case came up before Magistrate English this week. There have for some time been rumors and reports of petty stealing at West Summerland. Numerous complaints have been made to municipal constable J. Arkell, particularly of stealing from various wood piles. He determined to put a stop to it, and lay in waiting hoping to catch the culprit. The watch he kept led to his laying a charge against James Templeton, before Magistrate English, for stealing wood on the night of March 16th, from the wood pile belonging to the Overseas Club, and the charge was entered accordingly.

The case came up for trial on Monday afternoon in Elliott's Hall, where a number of citizens from the West Summerland district were present to watch proceedings.

Constable Arkell was first sworn. He saw Templeton with an armful of wood. There were two piles close together, and complaints had been made that wood was being taken from them. He laid in wait and saw Templeton carrying some wood about 11.30 on the night of March 6. He did not say anything to him then, as he was laying in wait for another party. He saw him split the wood and take it into the tent. He heard Harry Lintern, his tent-mate, say to him, "Well, I guess you have enough wood to last over Sunday." Templeton's reply was "Pretty good wood, Harry, lots of pitch." He saw

meeting of the present situation in reference to a cannery. Mr. T. J. Smith would be willing to sell his plant, but it would be necessary that from ten to twelve thousand dollars be raised for operating during the present season. A meeting will be called at an early date and he asked that all present do some thinking along this line.

After voting hearty thanks to Mr. Garroway for his thorough discussion of fruit marketing, the meeting adjourned.

Templeton the next day and accused him of taking wood from a pile belonging to T. Darkis, but Templeton denied this and said he got the wood that night at the Overseas Club. He then asked if anyone gave authority, and the reply was in the negative. He then said, "Then you know you were stealing?" and Templeton replied, "Yes, I know I was stealing a little wood."

No more was said that day. He spoke to Mr. Darkis and his brother about missing some wood. Mr. Darkis said he had been speaking to Templeton, who had denied taking his wood but said that what he had taken was from the Overseas Club. He then took Templeton to Mr. Darkis, because Templeton had told Darkis that it was not him but Mr. Arkell himself who was taking the wood. Mr. Arkell continued "I went to Taylor's tent and found him, and took him to Darkis and asked him to say who it was had seen me taking wood. After pressure he said Wm. Haddrell had seen me taking wood. I have known or seen Templeton for six or eight months, and I don't think he has done much work in the last four months. He has been boarding with Mr. Taylor."

Magistrate—Have you reasons to suspect that he has been taking wood or other property from anyone else?

Mr. Arkell—I have seen him taking wood to shack, and several have complained of losing wood at different times, among them being the Municipality. Several people have complained of losing money as well.

Wm. Haddrell was next sworn. He had known the accused since last September. Work had been scarce, but he believed Templeton worked when he could get anything to do. He would not substantiate the charge. He had seen wood taken from the municipal woodpile but it was not Templeton who had taken it. Mr. Haddrell continued "Templeton was present last Sun-

day morning when I mentioned the stealing from the municipal woodpile, but I mentioned no names. Have never seen Templeton taking wood. Mr. Darkis had me measure some wood on two different occasions, the first six weeks ago when a cord and a half was seven feet short, and again eight days ago when another cord and a half was six feet short. Each time the wood was delivered in the evening, and I measured it next morning. On the night of March 16 I went over to the Store about ten o'clock, and from there to the tent occupied by Templeton and Lintern, reaching there about 10 after 10. One man was in bed and the other got in while I was there. I was there for about ten minutes. Just after I left the tent I heard some fellows come along and put a bag on their stovepipe."

Mr. Arkell was again called. He said "There were two others lying in the brush at the same time with me, saw the whole proceedings, and then went to my house and had ice cream. We were about thirty feet from Templeton and heard the whole conversation."

This was all of the direct testimony, but there was an inclination on the part of many to say something on the case. As these did not bear directly on the charge, however, no further evidence was taken.

A representative of the Overseas Club stated that the Club knew of no wood being taken, nor had any charge been made.

The magistrate pointed out that it was not necessary that the owner enter a charge. It was sufficient for an eye-witness to do it.

As there had been a direct charge and as direct a denial, Mr. Arkell was told to produce his witnesses. He asked for a postponement of the case to give him time to do so, and an adjournment was made till Tuesday evening at eight o'clock.

News of the case had been spread, and when the court convened Tuesday night there was a large attendance.

Scott Darkis was first sworn. "Do not know Mr. Templeton personally, Mr. Arkell brought him to me about the stolen wood. Mr. Arkell accused Templeton of taking my wood. He denied it but said the wood he had taken was from the Overseas Club pile."

Mr. Haddrell, who was conducting the case for the accused, asked the witness if Templeton had been warned that anything he said would be used against him. The witness said "No." Mr. Arkell asked the Court that Mr. Haddrell be made produce witnesses to prove that he had taken wood from the municipal pile. Magistrate English replied that he could not mix that with this case. Mr. Arkell could if he wished bring a charge for defamation of character.

Robt. Milne was next called and sworn. He had gone for ice cream and had put a bag over Lintern's chimney about 10.15. They were not then in bed.

Mr. Lintern testified that the first sack had been put over the pipe about 10.15 and the second at eleven o'clock or a little later. Jimmy—meaning Templeton—put his boots on and took the sack off the pipe. He, the witness, had taken wood from his sister's pile when he went to the tent, split it and then went to bed. He heard the fellows slam the door as they came out of Arkell's and came across and put the sack on the pipe. He recognized their voices and called out to them.

W. E. Thomas was sworn. Magistrate—What do you know about this wood stealing?

Witness—Don't know anything about it. Was in Mrs. Taylor's tent with Templeton and Lintern and all went to bed at the same time. Heard Lintern shout to the fellows when they put sack over pipe.

Mr. Taylor sworn. "The boys were in my tent all evening and [Continued on Page 8.]

### FRUIT UNION DISCUSSED.

#### MANAGER GARROWAY TALKS ON UNION MATTERS.

##### Ready For a Large Crop.

Mr. H. L. Garroway, manager of the Okanagan Fruit Union, paid Summerland a visit on Thursday, March 21st, and met a representative number of fruitgrowers in the Men's Club that evening. In his talk, Mr. Garroway dealt quite fully with the operations of the Union in the marketing of fruit. He claimed that the Union had been organized ahead of its time, but by being so organized it was now in a position to handle any crop, no matter how large it might be. He urged the growers to be loyal to the Union, and took up the matter of binding each grower to give all or none of his output to the Union.

He admitted that the Union had not been prepared to handle the big peach crop of 1910. That was early in the life of the Union, and they had not been able to gauge the crop properly, or to determine what portion of it they might have to handle. They had made preparations to handle 20,000 crates of peaches, and had handled that number satisfactorily. Altogether, however, they had been given 35,000 crates to handle, and it was the extra quantity that had caused trouble. There were 60,000 crates marketed in the Valley that year.

#### UNCERTAIN OF QUANTITY.

This uncertainty would be overcome by having each member of the Union bound to market his fruit through the medium of the Union only. Without some such arrangement the Union really had no fruit to sell. Every Association south of the line required this of its members. Mr. Garroway read the contracts, or extracts from them, used by the Hood River Fruitgrowers' Association, Wenatchee, Yakima, Rogue River, Grand Junction, and other associations, and said that it was only after this rule was put into force that the organizations became successful. He instanced the California Fruitgrowers' Exchange which had grown to such enormous proportions. The tendency now was towards large unions covering one or more states. Washington, Oregon and Idaho now have one large controlling association. Instead of the Okanagan district being divided as had been suggested by some, we should work towards a large provincial organization. Such an organization could gather the necessary statistics and market the product of the orchards of the Province to greater advantage. This would do away with the possibility of one district competing with another.

#### MORE FRUIT WILL COME.

The Okanagan now has twelve or thirteen thousand acres in orchard, and it would require a strong organization to compete successfully with the larger and longer established organizations south of the border. There is an immense acreage on the American side planted in trees only one-fifteenth of which is bearing. British Columbia can now only supply twenty per cent. of the fruit required by the Northwest market. There was no danger of an over production, as the American crops were annually getting less, and there is now only about one-half the quantity produced in that country that were grown sixteen years ago. Of the twelve thousand acres in the Okanagan only two thousand are yet in full bearing. From statistics gathered, Mr. Garroway thought we would soon have 2,500 to 3,000 cars of fruit going out of this Valley, and it would be a bad day for the Valley if it got into the hands of the buyers. An organization such as the Union was

imperative, and he urged his hearers to work towards strengthening the Union, which he described as being, after all, the fruitgrowers organized.

#### SOME QUESTIONS ANSWERED.

The meeting was then thrown open for general discussion. S. M. Young thought that 35 cents per box was too great a charge for expert packing. Mr. Garroway said that of this amount 25 cents was cash outlay for box and material.

In reply to a question from J. R. Brown, Mr. Garroway said the Union could this year handle all the fruit of the Valley at remunerative prices. Upon being asked who fixed the price, he said that this was controlled by market conditions. The selling price was ascertained, and the jobber was given the fruit at a figure slightly below this, giving him a moderate margin of profit. Much had been said of the so-called "trust" among fruit men in Calgary. Mr. Garroway said this was an organization helpful rather than injurious to price. It was to prevent price cutting one against another and the overloading of the market with certain lines at the same time. Last year had been an exceptional one in the prairie apple market. Nova Scotia had sent quantities of cheap apples West.

#### INSTRUCTION IN GRADING.

The matter of grading apples was discussed. It was generally conceded that the grower must first grade the fruit before sending it to the packing house. The question of Summerland getting due credit for its high grade fruit was brought up and Mr. Garroway assured those present that every box of fruit shipped from Summerland would be plainly marked as Summerland fruit. The packages used here would have "Summerland" printed on them.

Mr. Kitson, the managing director of the Union, who was also present, stated that he had asked Mr. Ruddick, of the Dominion Horticultural Department, to send inspectors to the Okanagan to teach the people here just what each grade is, as there was constant difference of opinion in grading. There is a good chance of having such a man come here.

Mr. Garroway said that the time would soon come when the Union would handle only the fruit produced by its members. The contracts must be signed before May 15th. The directors will formulate rules for packing peaches.

#### PLAN FOR QUICK SETTLEMENT.

The matter of the time taken for settlement for fruit going through the Union was brought up by G. J. C. White. Mr. Garroway pointed out that prices could not be definitely ascertained in a short time. One man's fruit was sent here another there, and the prices varied. It would not be fair to pay one man a lower price and another a higher price, because the Union had been able to market the one to better advantage than the other. The proceeds must be pooled and divided proportionately. The Union is now endeavoring to work out a plan to make an early and substantial payment, leaving the balance to be adjusted later.

According to Mr. Garroway, it has now become necessary to sell more shares, and a further call on stock will be made in October.

When asked if the Union would handle vegetables the reply was in the affirmative. Vegetables will not, however, stand the local freight, and so must be produced in such quantity that they must be shipped in carload lots.

#### THE CANNERY QUESTION.

Mr. G. J. C. White took the opportunity to inform those at the

### MEMORIAL SERVICE

#### TO MEMORY OF LATE MRS. G. A. McWILLIAMS.

##### An Appreciation and Tribute.

The regular evening service at the Methodist Church on Sunday last, conducted by Rev. F. W. Hardy, took the form of a Memorial Service to the memory of the late Mrs. G. A. McWilliams. In spite of her physical infirmities, Mrs. McWilliams was an ardent church worker, and an enthusiastic member of many uplifting organizations, both within her church and without. The respect she commanded from the people of Summerland generally was attested in the large and representative audience. From every part of Summerland and from every denomination came worshippers to honor her memory in reverence.

Mr. Hardy based a strong, sympathetic sermon upon two extracts from the story of the anointing of Christ. "She hath wrought a good work on me, and it shall be a memorial unto her." "She hath done what she could," and one from the words of David to his son, as they made preparations to build the temple, "Thou mayest add thereto." The address was a memorial, a tribute and a plea; memorial to a life of unselfish devotion, a tribute to a noble and far-reaching influence, and a plea for the consideration of the Christian motive that gave rise to these characteristics. The significance which modern thought attaches to death—that of transition from a world of limitations to a sphere of unhampered action—was emphasized.

A strong choir rendered appropriate music. An anthem "God shall wipe away all tears," a ladies' trio "Gone to her rest," a duet "Some day the silver cord will break," and Handel's "Dead March" from "Saul," were included in the musical service, giving an added impressiveness to an occasion which would have been sad indeed, were it not lightened by the rays of Christian hope for the future.

Many of us were hindered by time and distance from placing the flowers she loved over the place where her dust was laid, but I feel sure that we all miss the brave heroine who has "passed over."

Amid years of suffering, never free from pain, never with any strength to spare, yet always cheerful, always a tower of strength to her home, her church, her friends, and all who needed sympathy and help. Time and again her very presence at the church service has spurred us to fresh endeavor, who were so much better able than she. No complaint ever passed her lips, no refusal to take the strong one's share in the work of her church, Ladies' Aid, W. C. T. U. entertaining the ministers, or any others who called on her. Many of us could toll of the little personal kindnesses done, the courteous remembrance, and perhaps no one but the Master knows how and where the needy found help from her loving hand. Personally I have been honored many times by her neighborly kindness, when she would have been justified in forgetting all but herself.

Who will take up her work, her place in the Master's service? for it is a large vacancy. H.I.

A number of Miss Mary Washington's friends gave her a linen shower at the home of Mrs. William Ritchie, on Tuesday afternoon of this week. A very enjoyable time was spent by those present, and after partaking of light refreshments and tea, cake, etc., the friends joined in wishing her a very happy future. Miss Washington was very happily surprised with a large number of choice linen presents. Mrs. Ritchie proved herself an excellent hostess.

**WHY COME TO CANADA?**  
AND THE ANSWER.

Winnipeg, Man., Mar. 27.—A new phase of the nation-wide exodus from the United States, the effects of which are now being felt with daily increasing force in Canada, is pointedly shown up in the current issue of Winnipeg Once-A-Week, under the caption, "Still Trekking Northward—and Why." It has been shown, according to recent press dispatches, that no less than 75,000 American farmers came to Western Canada between July 1910 and July 1911, and hundreds of thousands before that time, this great army of homeseekers bringing with them about \$1,000 per capita. "No wonder," says the correspondent, "there is grave concern now felt in American commercial centres in view of the situation, and that United States officials are engaged in a desperate search for arguments that might dissuade their fellow-countrymen from a well-formed purpose." The writer asserts however that there is a serious flaw in this method of procedure on the part of the United States authorities inasmuch as while their attention is being concentrated so vigorously upon this great publicity campaign designed to advertise the advantages and opportunities open in the States another powerful array of forces is to be found engaged with equal determination in a campaign of a different sort—a rather loud and blatant campaign which has raised serious question in the minds of many Americans as to whether after all life is not too short to be spent in its entirety under guard, and surrounded by din and tumult and the alarms of demagogues and agitators.

The correspondent then takes up the notorious dynamite conspiracy recently unearthed as a result of the McNamara trial at Los Angeles, and which had ramifications in all the great industrial centres of the United States. Under these conditions it is easily understood why large numbers of thoughtful Americans are carefully considering the question whether life and property are not just a bit more secure under the guarantees and safeguards of the Dominion Government. However, were these attacks upon the established order of organized society merely the output of the loafer and the street-corner agitator, peace-loving Americans would feel no special cause for alarm. The case takes on an entirely different aspect, however, when men holding positions of power and leadership in public life assume the role of the demagogue and conduct a systematic campaign of social and political upheaval year after year—and especially every fourth year. "It is in view of an approaching national election," concludes the writer, "that many foresighted Americans to-day are regarding it expedient to turn their faces northward; and from present indications the movement during the coming season appears likely to break all records." As if in confirmation of these statements, J. S. Dennis, head of the Natural Resources Department of the C. P. R., has just announced that from careful estimates he looks to see 200,000 Americans settle in Western Canada in 1912.

**BURNING RUBBISH.**

To those who study the life histories of insects the presence of any kind of waste material in the orchard, such as fragments of limbs, old bark, parts of weeds, the prunings of trees, or rotten or mummied fruits on the trees, is recognized as a menace to the trees and fruits, in that, during the winter season they harbor insects and germs of disease, thus carrying them safely over into the summer season, when they emerge and re-infest the trees and crops. Thus the codling moth is now rearing beneath fragments of bark on the trunk and under the trees near the point where the wormy apples, from which the larvae crawled, dropped last fall. Mummied fruits of the plum and apple on the trees harbor the spores of the monilia or brown rot and bitter rot, and all should be removed and burned or buried prior to giving the orchard a general treatment of disinfection by means of spraying.—Selected.

In British Columbia, "all debris, prunings and other rubbish must be burnt up at the time of pruning."

The Hotel Penticton recently changed hands, Mrs. S. Barnes resigning her interests in the business to Messrs. J. H. McDonald and T. Johnson, who have leased the premises for a period of five years.

**PRIZES OFFERED.**

Locally-Grown Potatoes Should be Entered.

Victoria, B.C., Mar. 26.—The British Columbia Department of Agriculture, with the assistance of the Honorable the Minister of Agriculture for the Dominion, offers for 1912 prizes for fields of grain, potatoes, corn, field roots and fodder crops.

These competitions are to be organized by the Provincial Department of Agriculture, and conducted under the auspices of the Farmers' Institutes, and each Institute may provide competitions for not more than two kinds of crops. Competitors will be allowed one entry in only one Institute, and fields entered must lie within the area governed by that Institute.

Notification of competitions proposed, with crops selected must be forwarded to the Department of Agriculture, in Victoria, not later than May 15th. Ten bona fide entries must appear for each competition, and an entry fee of not less than fifty cents and not more than \$1.00 will be required.

In each competition not less than \$75.00 must be offered in cash prizes: First \$20.00, Second \$15.00, Third \$12.00, with prizes for every additional five entries over ten as follows: Fourth \$10.00, Fifth \$8.00, Sixth \$6.00, Seventh \$4.00. Of this amount \$60.00 will be paid by the province, the remaining \$15.00 partially defrayed by entry fees, to be contributed by the Institute. The British Columbia Department of Agriculture, at its expense, will furnish judges; but where necessary, the Institute must furnish an uninterested guide to the country. Further regulations governing the competitions will be announced later.

**W.C.T.U. CONVENTION, VICTORIA**

Further Interesting Extracts From Dr. Matthew's Address.

Published by request of W.C.T.U. "There are five elements opposed to reform, and the first is the subsidized press. The second is the public corporations engaged in political activities. The third is the liquor associations with their ramifications reaching out all over the continent. The fourth is so closely intertwined with the third, that both must be considered together, the white slave traffic. The fifth is the morganized magazine press. A large and increasing number of American magazines are being utilized to foster and still further entrench the liquor traffic.

There are those who would compromise with evil for the sake of peace, but that policy is wrong. Christ came first to be a king of righteousness, and until righteousness reigns there cannot be peace. The church is not only to hold the fort of righteousness, but to storm the fort of wickedness, and it is fighting a winning battle. In twenty-five years the saloon will have passed out of existence in the United States.

The labor unions are fighting all the corporations that are holding down the working man. The unions should fight first of all the liquor corporation, which is the most dangerous association, and the most injurious to the working man, as well as to the whole community."

**VERDICT OF ACCIDENTAL DEATH.**

Management and Inspector Criticised.

Merritt, March 25.—The coroner's jury, after the investigation of the Diamond Vale Coal Mine disaster, when seven miners lost their lives, unanimously agreed that deceased met their death by the explosion of gas combined with coal dust coming into contact with a naked light in the Diamond Vale Collieries. And further found that there had been manifested gross negligence through not providing efficient equipment and the disposition to evade the rules specified in the Coal Mines Regulation Act, and that there had been laxity upon the part of the Inspector of Mines in not seeing that the forms of the said act were strictly enforced.

The Kelowna Tobacco Company, Limited, has been taken over by the British North America Company, Limited, who will operate the business in future.

**FINISH LINE AHEAD OF TIME**

It has been officially announced that the contract for the construction of the Kettle Valley line over the Hope mountains will be awarded early next month, and that construction work will be started not later than May 1st. The section in question will have a length of forty-five miles. It was also announced that every effort would be made to finish the contract before the end of 1914, or six months ahead of the time limit, July 1, 1915, fixed by the Provincial Government.

Construction will be started at mile 25 of the branch line completed south from Merritt in the Nicola Valley. The line will extend ten miles up the Coldwater River Valley to the summit on a maximum grade of one per cent. There will be 35 miles of line down the west slope of the Hope range to Hope, where the Fraser will be bridged to form a connection with the main line of the C.P.R. The route west of the summit will follow the Coquehalla River with a maximum grade of 2.2 as against eastbound traffic. Construction on both slopes will be very heavy and several thousand men will be employed. The survey has been approved from the starting point at mile 25 across the range and down the west slope to a point 25 miles from Hope. Several long tunnels will have to be driven.

The main line of the Kettle Valley system between Midway and Merritt, traversing the Kettle Valley, the Okanagan and Similkameen districts, a distance of 260 miles, will, it is also announced, be completed by the end of 1913. Of that section eighty miles have been graded and sixty-five miles of steel have been laid.

The line south from Merritt, thirty miles long, will be a branch or feeder to the main line, which it will join at mile 25 as previously stated. It was recently inspected by Mr. J. P. Orde, Provincial Government engineer, who pronounced it to be one of the best sections of railway he had ever examined, thus reflecting great credit on the engineering staff of the railway company.

The cost of construction of the main line down the west slope of the Coquehalla River is estimated at \$75,000 per mile.

Friends do not freeze to a frozen heart.

**Naramata Notes.**

The first consignment of nursery stock to reach Naramata for this season came in early this week.

Mr. Reg. Boothe has gone to Vernon where he has accepted a position in the grocery store belonging to Mr. W. H. Smith.

Mrs. Herbert Wolstencroft's father, Mr. Ruston Cunliffe, from Accrington, England, arrived in town on Sunday's boat.

A young horse belonging to Mr. H. Endacott, while being "broken in" on Wednesday, threw itself over its tethering ropes and broke its neck.

A service in the Opera House on Sunday night is announced by Mrs. Gillespie. The topic for the occasion is "The Last Enemy." All are welcome.

Mr. and Mrs. W. H. Peacock, of Winnipeg, who, it is understood, are to assume charge of the Hotel Summerland on April 1st, spent a part of the week at Kenwood Ranch.

Miss Brunton, who last season made such a "hit" as housekeeper in Hotel Naramata, is expected back on Monday to make preparations for opening up the tourist hotel for the season.

Mr. J. S. Gillespie journeyed to Fairview on Tuesday to place before the Water Commissioner, Mr. J. R. Brown, the claims of the Okanagan Trust Company to certain water reservations in the upper lakes.

On Tuesday March 19th, Rev. H. A. Solly, Rector of St. Stephen's, Summerland, came over by the 8.00 a.m. ferry to administer Holy Communion in Naramata's little church. After the service Mr. Solly spent the day visiting his numerous friends in the town and on the benches and returned to Summerland on the evening ferry.

The recent exceptionally fine days have called forth the rusty shovels, hoes, rakes and other garden tools and on all sides is to be seen the hustling efforts of one's neighbors busy with the usual spring clean up. This is as it should be and if the good work could by an organized effort be carried to the whole of the streets and lanes wouldn't it be splendid. Surely we are not going to let the other towns along the lake be ahead of us in this general "clean-up" movement.

**TO MOVE JAM FACTORY.**

**Doukhobors Will Establish Plant at Brilliant, North of Trail.**

The Doukhobor Society, which last year operated the Columbia-Kootenay jam factory at Nelson, will this year move the factory to their own lands at Brilliant, north of Trail.

The new factory will be equipped with the latest appliances and a high grade product only will be put up. The society is already contracting with ranchers in the district for this year's crop.

A new contingent of Russians arrived in the Grand Forks valley this week from Saskatchewan and have purchased four ten-acre tracts of unimproved land east of the city. For three of the tracts they paid at the rate of \$100 per acre, while for the fourth they paid \$125 per acre, the total transaction amounting to \$4,250.

**LOCAL OPTION LEAGUE OF B.C.**

Vancouver, March 19th.—Rev. Dr. Spencer, Supt. Local Option, has just returned from attending the National Prohibition Congress recently held in Toronto, and reports that it was a large and enthusiastic congress throughout. The work of the Dominion Alliance was outlined with a view to Provincial and then Dominion Prohibition. Mr. R. H. Cairns of Chilliwack and Mr. W. J. Paris of Vancouver were elected Vice Presidents of the Dominion Alliance, and Dr. Ernest Hall and Dr. Spencer members of the executive. After the congress Dr. Spencer visited his former pastorates and received a hearty welcome by large congregations and friends in Ontario. He reports that great interest in B. C. is evident in every place visited, many expressing their determination to come to this land of sunshine, showers and flowers.

**Alterations are seldom necessary in a "Fit-rite" garment**

In the early days of ready-to-wear clothes, the purchase of a suit was attended by much trouble—both for the merchant who sold the clothes and for the man who bought them. Almost invariably, extensive alterations were required.

The wonderful development of tailoring methods by some of our leading clothes producers has made it possible for almost any man to drop into a good clothes shop, try on a few suits, and walk out of that shop wearing the garment that suits him best.

Foremost in this respect are the makers of "Fit-rite"—a line of high-grade ready-to-wear clothes that comprises garments built for every type of figure. We advise an inspection of their new Spring models.

Rates for Contract Advertisements furnished on application.  
Copy for change of contract advertising must be in the hands of the printer not later than Wednesday noon to insure publication in the next issue.  
In accordance with schedule of prices adopted throughout the valley, charges for advertising are now being made weekly. Hereafter when five issues west, made in one month the result was a loss. By the new method customers are charged each week for just the amount of space used.

FRIDAY, MARCH 29, 1912.

### THE PROMISED PROPOSITION.

WHEN the three directors of the Okanagan Telephone Company were here some weeks ago they promised to draw up and submit to the people of Summerland an outline of an agreement with the Municipality under which they would be willing to work. Whether because they foresaw the futility of such a thing or not, they have not as yet done so. The only proposition that has been made is the general circular letter published in two issues of this paper.

While it might be possible that a basis of agreement could be arrived at, it seems very doubtful. Our citizens would require an up-to-date and in every way a satisfactory service. They would also demand a guarantee as to rates. This would have to be for a fixed number of years.

To save the field to itself all this might be granted by the company to the satisfaction of our people. But at the end of that period what would happen? This would be the time when the company would, if possible, make up for lost time. In order to avoid any such trouble at that time our Council should arrange for a renewal contract on satisfactory terms, or require that the company sell its plant to the Municipality. Just here is where the most serious obstacle would be met. How would the price be arrived at. Certainly we should not be expected to pay the company's purchase price plus improvements, extensions, etc. Nor should we pay anything for goodwill. Before any agreement is entered into the company should be required to undertake to transfer its plant to the Municipality at what it would cost the Municipality to instal the same system less a reasonable allowance for depreciation. If this cannot be embodied in any agreement that may be entered into by the Municipality with the company, then Summerland had much better carry out its present plans.

No matter how we look at it we are yet satisfied that the present course is the safer one in any event. Not that we would advise that a people's company enter into the telephone business as a permanent affair, but merely to hold the ground until the Municipality obtains the necessary power to issue debentures and acquire the stock of each individual shareholder. Our people will then get dollar for dollar in their investment and the Municipality a plant at first cost, putting it in a position to charge reasonable rates and give the service the people require.

### RAILWAY CONSTRUCTION.

THERE is no citizen who will not rejoice to learn that construction work on this section of the Kettle Valley Railway is to begin at once. It means more business for our merchants, work for laborers and superintendents, an additional market for garden and poultry products, and better than all it provides an early direct rail connection with the big centres of Western Canada, which, of course, means a more rapid development of the community as a whole.

"TAKE AWAY WOMEN, and what what would follow?" asks a writer. That's easy! The men, of course.

THE EDITOR of the Greenwood Ledge forecasts the result of the provincial elections thus: Socialists two, Liberals three and Conservatives thirty-seven. He might have relieved the suspense by naming the opposition members.

"IT IS AN ILL WIND that blows nobody good." The great coal strikes in Great Britain has set many people thinking, and as a result a proposal, which, if adopted would revolutionize the coal mining business of the world, has been launched by Sir William Ramsay, the noted English scientist. He suggests that much of the expense of coal mining and handling might be avoided if the coal were turned into gas in retorts in the bowels of the earth. The gas thus generated could either be distributed by pipe lines, or used at the pit head for producing electricity, which could be distributed from there.

PROGRESS AND PROSPERITY mean increased expenses for any community. The advent of the railway, while it brings us increased prosperity, will also bring additional expense for the municipality, and it must be ready to meet it. We have boasted much of the fact that this fair district has had no need for a jail. We are justly proud of the fact that our citizens are not of the kind that are likely to make a place of detention necessary, but the events of the past few weeks have shown positively that we are liable to be visited by such who should be behind prison bars. The coming of the railway navy makes the providing of a jail and police a wise and necessary precaution.

IN GIVING, as in many other things, Summerland is a leader. The leading position in missionary contributions of the local Baptists, of which recent mention was made in our columns, surprised us. Just now we have before us the 1911 report of the British Columbia auxiliary of the Canadian Bible Society, (non-denominational), and are again surprised to note that Summerland is in the front rank in the total of contribution from the cities and towns of this province. Only the cities of Vancouver, Victoria and Prince Rupert gave more and the last named not very much more. The cities of Chilliwack, Cranbrook,

Kamloops, Nelson, New Westminster, North Vancouver, Revelstoke and Vernon were all out-distanced by Summerland. This is indeed a matter for congratulation.

### DRY FARMING.

LETHBRIDGE is nothing if not progressive. That city has been successful in securing the Seventh International Dry Farming Congress, which will be held October 21st to 26th, 1912.

The Lethbridge Board of Trade is advertising this fact very extensively and systematically. They have recently been granted the use of a cancellation stamp upon all outgoing and incoming letters at the Lethbridge Post Office announcing the Congress. This is the first time the use of a cancellation stamp of this nature has been sanctioned in Canada by the postal authorities and it is, no doubt, a recognition of the fact that the coming Congress will be among the largest and best expositions of farm products ever held in this country. We show here a cut illustrating the cancellation stamp now in use in the Lethbridge Post Office.

### Ottawans as Pioneers for Appledale.

#### Citizens from the Capital Will Arrive about Middle of April.

(Ottawa Journal, March 21)  
To the West is a slogan many people in Ottawa are accepting. Mr. J. H. Pushman, of 35 McKay Street, accountant at the head office of the W. C. Edwards Company, New Edinburgh, is leaving them to go West. Workers of Mr. Pushman showed their esteem for him by presenting him with a silver tea service. Mr. Pushman has been with the W. C. Edwards Co. for 22 years, and is one of several families who are leaving Ottawa for Red Apple Valley, near Summerland. They go away about the second week in April.

Red Apple Valley is a new colony, and Mr. Pushman and family, with several of their relatives are going as pioneers.

Fourth Avenue Baptist Church will suffer a severe loss by the migration. Seventeen members of the church are emigrating to the new settlement. Those leaving are Mr. and Mrs. H. T. Davies, and one boy; Mr. and Mrs. Pushman and family of three; Mr. and

Mrs. Pushman, senior; Mrs. R. A. Roe, mother of Mrs. H. T. Davies and Mrs. J. H. Pushman; Mr. and Mrs. P. S. Roe and family of four.

Mr. and Mrs. H. T. Davies have lived in the Glebe for the past seventeen years, and have been active workers since the church of which they are members started. They will be greatly missed, but what is Ottawa's loss in a great gain for Red Apple Valley.

### COLLEGE ELECTION RETURNS.

There has been a very exciting and interesting election campaign carried on at the College. Several meetings have been held when speeches supporting the candidates were given, and politics have been much discussed. The results of today's election is as follows:

A. C. Riley, Socialist, 20.  
H. C. Packham, Liberal, 48.  
Spoiled ballot, 1.  
Total votes cast, 69.

**SYNOPSIS OF COAL MINING REGULATIONS**

COAL mining rights of the Dominion, in Manitoba, Saskatchewan and Alberta, the Yukon Territory, the North-west Territories and in a portion of the Province of British Columbia, may be leased for a term of twenty-one years at an annual rental of \$1 per acre. Not more than 2,560 acres will be leased to one applicant. Application for a lease must be made by the applicant in person to the Agent or Sub-Agent of the district in which the rights applied for are situated. In surveyed territory the land must be described by sections, or legal subdivisions of sections, and in unsurveyed territory the tract applied for shall be staked out by the applicant himself. Each application must be accompanied by a fee of \$5, which will be refunded if the rights applied for are not available, but not otherwise. A royalty shall be paid on the merchantable output of the mine at the rate of five cents per ton. The person operating the mine shall furnish the Agent with sworn returns accounting for the full quantity of merchantable coal mined and pay the royalty thereon. If the coal mining rights are not being operated, such returns should be furnished at least once a year. The lease will include the coal mining rights only, but the lessee may be permitted to purchase whatever available surface rights may be considered necessary for the working of the mine at the rate of \$10.00 an acre. For full information application should be made to the Secretary of the Department of the Interior, Ottawa, or to any Agent or Sub-Agent of Dominion Lands.

**W. W. CORY,**  
Deputy Minister of the Interior.  
N.B.—Unauthorized publication of this advertisement will not be paid for.

**TO CANADIAN ARCHITECTS.**

Competition For New University Buildings To Be Erected At Point Gray, Near Vancouver, British Columbia.

The Government of British Columbia invite Competitive Plans for the general scheme and design for the proposed new University, together with more detailed Plans for the buildings to be erected first at an estimated cost of \$1,500,000. Prizes of \$10,000 will be given for the most successful Designs submitted. Particulars of the competition and plan of site may be obtained on request from the undersigned. The designs to be sent in by July 31st, 1912, addressed to THE MINISTER OF EDUCATION, Parliament Buildings, Victoria, British Columbia.

**Water Notice.**

**FOR A LICENCE TO USE WATER.**

NOTICE is hereby given that The Municipality of Summerland, of Summerland, British Columbia, will apply for a licence to use 0.12 cubic feet of water per second from a spring on south side of Trout Creek, a stream flowing in an easterly direction and emptying into Okanagan Lake near Gartrell P.O., B.C. The water will be used for domestic purposes, under a notice of application for a licence to take and use water, posted herewith, on the land described as D.L. No. 1078, 8104, 440, 441, G.1, Oyoops. This notice was posted on the ground on the 22nd day of March, 1912. The application will be filed in the office of the Water Recorder at Vernon, B.C. Objections may be filed with the said Water Recorder or with the Comptroller of Water Rights, Parliament Buildings, Victoria, B.C.

**Local News Items.**

The schools will be closed on Good Friday and Easter Monday.

George Raincock and family have removed with their household effects to Penticton.

Mr. W. C. Kelly has been embellishing his cottage by the addition of a verandah on the south side.

Miss Wallace, of Brownlee, Sask., has been the guest of Mr. and Mrs. Alex. Fraser for the past week.

Indian Agent J. R. Brown went south on Tuesday on business in connection with the Indian Department.

Excavating has begun on the cellar of the new store building about to be erected at West Summerland for T. E. Moore.

Dr. Lawrence, of Vernon, is this week the guest of his friend, Mr. H. D. Hunting, Principal of the High School.

Seven thousand dollars has been voted by the Federal Government for the Kelowna-Summerland-Penticton telephone lines.

Chas. H. Cordy has been appointed to be a Registrar for the purposes of the "Marriage Act" for Summerland and district.

D. H. Watson who has been on the prairies for a few days is expected to return the latter part of this week or the first of next.

There was not very much enthusiasm shown in the election yesterday. The total vote here was only 98—80 for Ellison and 18 for Sterling.

It is reported that W. F. Forester, of Vernon, who was in town a few days ago has purchased a lot here and will return shortly with his family.

The first local match to be played in the Valley Football League will take place on the College Campus Saturday, April 6th, Summerland versus Penticton.

A new cottage is being erected just south of Dr. Andrew's on Beach Avenue. Manager Wood, of the Canadian Bank of Commerce will occupy it upon its completion.

The new real estate office of Jas. Ritchie at West Summerland is now open. Alex. Steven is in charge of that office while Mr. T. N. Ritchie is at present looking after the other part of the business in the old office.

Plowing has now begun in earnest, every available team being requisitioned to "turn the sod." Spraying is still going ahead, having been in progress for some weeks now. Pruning also continues in full swing.

General Superintendent Osborne, of the C. P. R., successor to Mr. Busted, made his first tour of inspection in the Valley this week, going down as far as Penticton and returning to the Coast on Wednesday.

Superintendent Mitchell's men started Wednesday morning to lay the pipe for Paradise Flat. Considerable repair work has been done on the roads and last week two hundred feet of pipe was laid to the Zimmerman lot.

There is a probability of more business blocks being erected along the water front. The plans have not yet been worked out, but we may expect to hear something definite within the next few days. The Supply Co.'s building is rapidly undergoing a change.

Messrs. Ramsay and Seeley, of Wilson's Landing, the two men who were successful in capturing James and Wilson last week, passed through Summerland this week. Mr. Ramsay has a pro-emption back on Trout Creek and he and Mr. Seeley have gone there to spend some days.

Rev. J. Knox Wright, B.D., the British Columbia district secretary of the Canadian Bible Society, spent a few days of this week in Summerland in the interests of the Society. Rev. Mr. Wright reports meeting with a generous response to his requests for financial support of the Society.

Mr. E. Garnett has purchased through the local agent, C. H. Cordy a fine McLaughlin-Buick car. It is expected to arrive this week and is a five passenger touring car with 24 horsepower Buick engine. Mr. Cordy has purchased from Mr. Garnett the valuable lake shore property on which Mr. Garnett has been living for some time.

**Local News Items.**

Mr. James Crawshaw and bride (nee Miss French) have returned to their home in Vernon.

Jack Moore, who has been employed in the office of W. J. Robinson has gone to Calgary.

The Municipal Council sits as the Court of Revision on Monday, May 6th, at the Municipal Offices.

Thos. H. Hocking who has been spending the last few months in Princeton has returned to Summerland.

The local W.C.T.U. will meet at the home of Mrs. J. R. Brown on Monday afternoon, April first, at three o'clock.

On and after the 1st of April the all-night electric light service will be discontinued. Light will be shut off at 12.30.

Rev. F. W. Hardy last Tuesday began a series of Bible Studies to be given each week in the Lakefront Baptist Church.

T. J. Smith was in town for a day or two early this week. His visit was partly in connection with the possible sale of his cannery.

A Vocal and Instrumental Recital by the Music Department of Okanagan College is announced for Friday, April 12, at the College Gymnasium.

All football players who have not been approached and who would be willing to join the Overseas Club team, will please send their application to Mr. W. J. Beattie.

Mr. and Mrs. J. Thompson and family have removed from the house occupied by them on the Manuel lot to a new one erected on D. H. Watson's lot, Jones Flat.

The Boxing Match, posters for which were out, was called off. One of those who was advertised to take part in the match is a student at the College and was forbidden to participate.

Next Friday being a holiday next week's number of the Review will be published on Thursday. Any copy for changes of ads should be in Tuesday instead of Wednesday as usual. New ads can be handled later.

Special services will be held in St. Andrew's Presbyterian Church, West Summerland, on Sunday next, the occasion being the First Anniversary of the opening. Services will be at 10.30 a.m. and 7 p.m. The preacher, both morning and evening will be Rev. P. Henderson, of Armstrong. Special music will be rendered by the choir.

A lecture on China will be given by Mrs. Huntley, of Penticton, in St. Andrew's Presbyterian Church, West Summerland, on Monday evening, April 6th, at eight o'clock, under the auspices of Ladies' Aid. Mrs. Huntley has been resident in different parts of China for over twenty years. From her long experience of Chinese customs, Mrs. Huntley may be relied upon to give an interesting account of a nation at present in the throes of a revolution. A collection will be taken to defray expenses.

The town was in darkness Thursday night, though for a time part of the current was on. There will be no lights to-night. The "agitator," one of the machines used in connection with the generating plant, has not been in good repair for some time. The armature of that machine is worn and will need to be put in a lathe and turned, and perhaps re-wound. Just why a spare part had not been procured in view of the fact that this has been anticipated has not been learned. The electrician says he reported the matter to the municipal Board of Works months ago.

**WHAT IT'S COMING TO.**

The insurance company's examining physician at Summerland had reported that the man seemed to be all right, and the man himself certified that he was not engaged in any dangerous occupation. "I lead a sedentary life," he told them. "I work in an office and we have no danger or excitement." "How about sports?" asked the examiner. "Do you play football? Baseball? Do you box? Belong to an athletic club?" No—none of that stuff. I guess I'm a safe risk. "Do you scorch?" "What do you mean?" "Do you drive your car faster than the speed limit?" "I have no car." "What? how do you get about?" "I walk." "Risk refused. A scorcher is a dangerous risk, but a pedestrian has no chance at all. Buy a car, old chap. Sorry—good-night!"

## PENTICTON TELEPHONE COMPANY.

Will Proceed to Obtain Charter Unless Okanagan Telephone Co. Agrees to Rates.

A meeting of the subscribers to the Penticton Telephone Company was held last week when, according to the Penticton Herald, the following resolution was adopted:

That it is the opinion of the Board of Provisional Directors, that no steps should be taken toward the installing of an independent system in Penticton, until all methods of arriving at an amicable and satisfactory agreement with the Okanagan Telephone Company have been exhausted. Meanwhile your Provisional Directors would advise:

(a) That they be given power to call a joint meeting of the delegates from Kelowna and Summerland to arrive at a basis of rates to obtain in the three towns, and submit the same to the Okanagan Telephone Company for their approval.

(b) That they be empowered to incorporate and obtain a charter for the Penticton Telephone Company, if they deem it advisable, and for this purpose they make a first call on the subscribers.

(c) That if such a satisfactory agreement can be arrived at with the Okanagan Telephone Company, the legal costs and expenses connected therewith, be borne equally by the three towns, and that in Penticton the agreement should be made as between the Penticton Municipal Council and the Okanagan Telephone Company.

Mr. E. Foley-Bennett presided over a representative attendance.

The feeling was general that strong action should be taken immediately, if the Company do not sign up an agreement on the lines laid down in the interview with the provisional directors, and the municipal council will be requested to have the agreement drawn up to its satisfaction.

It was also decided to request the delegates from Summerland and Kelowna to meet the Penticton directors in Kelowna, to confer together in order that joint action may be taken in whatever course is adopted.

## FOOTBALL.

### The Season's Programme.

At a meeting held on Saturday, March 23rd, at the Bank of Montreal Rooms, Kelowna, a Valley Football League was formed consisting of teams from Vernon, Kelowna, Okanagan Mission, Summerland and Penticton. Summerland was represented by Messrs. Fisher and Beattie.

Below are the fixtures; matches to be played on the ground of the first named, except where otherwise mentioned:

April 5—Kelowna vs. Mission.  
 April 6—Summerland vs. Penticton.  
 April 20—Summerland vs. Mission.  
 April 27—Vernon vs. Kelowna.  
 May 4—Kelowna vs. Summerland.  
 May 11—Penticton vs. Vernon (at Kelowna)

May 24—Summerland vs. Vernon.  
 May 24—Kelowna vs. Penticton.  
 June 1—Penticton vs. Mission.  
 June 8—Summerland vs. Kelowna.  
 June 15—Kelowna vs. Vernon.  
 June 20—Vernon vs. Mission.  
 June 29—Mission vs. Kelowna.  
 July 1—Vernon vs. Summerland.  
 July 1—Penticton vs. Kelowna.  
 July 6—Mission vs. Penticton.  
 July 13—Mission vs. Summerland.  
 July 20—Mission vs. Vernon.  
 July 27—Penticton vs. Summerland.  
 Aug. 10—Penticton vs. Vernon (at Kelowna).

## MARCH "ROD AND GUN."

"An Experience Off the Coast of Newfoundland: Hunting the Hair Seal," opens the March issue of Rod and Gun in Canada, published by W. J. Taylor, Limited, Woodstock, Ontario, and the interest of this article is a criterion of the interest of those that follow, which include articles descriptive of outdoor life from the Atlantic to the Pacific. Among these is the first of a series of articles on the Culture of the Black and Silver Foxes, which should prove of value to the many seeking practical information on this subject. A new feature this month is the creation of a Game Conservation Department, edited by Mr. Frank Hyde, wherein matters pertaining to the subject of game conservation will be freely discussed. As this subject is a live one at the present time, and is likely to be for some time to come, or until the improved laws for which good sportsmen are negotiating have been enacted, this department should prove of exceptional interest.

## ALFALFA WILL GROW EVERYWHERE.

While experts have been declaring that alfalfa would only grow in certain soils and in certain climates, it has proven adaptability to nearly all climates, and almost all soils. It produces with a rainfall as scant as 14 inches, and in the Gulf States flourishes with 65 inches. It gives crops at an elevation of 8,000 feet above sea level, and in Southern California it grows below sea level to a height of six feet or over, with nine cuttings a year, aggregating ten to twelve tons. An authenticated photograph in possession of the writer shows a wonderful alfalfa plant raised in the (irrigated) desert of Southern California, sixty feet below sea level, that measured considerably more than ten feet in height. Satisfactory crops are raised, but on limited areas as yet, in Vermont and Florida. New York has grown it for over one hundred years in her clay and gravel; Nebraska grows it in her western sand hills without plowing, as does Nevada on her sage brush desert. The depleted cotton soils of Alabama and Missouri each respond generously with profitable yields to the enterprising farmer, while its accumulated nitrogen and the sub-soiling it effects are making the rich land more valuable and giving back to the crop-worn land the priceless elements of which it has in successive generations been despoiled by a consciousnessless husbandry.

—Coburn's "Book of Alfalfa."

## UNIQUE B.C. NEWSPAPER.

In British Columbia there is a little newspaper, the "Kamloops Wawa," circulating among several tribes of North American Indians. The unique feature of this journal is that it is printed in shorthand. Some years ago the Rev. J. M. LeJune, a Breton missionary, arrived in British Columbia to take charge of a territory some fifty miles square. According to the "Strand," he found the greatest obstacle to his work to be the absence of any means of written communication, as the natives had no written language of their own.

His repeated efforts to teach them to read and write by ordinary methods failed entirely. The missionary was acquainted with the simple French Duployan shorthand, and then conceived the novel idea of teaching the Indians to write their own language phonetically by means of the shorthand characters.

He adapted the stenographic signs to the Chinook language, and the experiment proved a complete success. There are to-day three thousand Indians able to read and write their own language by no other means than shorthand. "Wawa" means "talk" in the Chinook, and hence the title of the little newspaper, which has been the natural outcome of the missionary's undertaking.—Witness.

## BLACK KNOT.

Black knot is a most uncommon and unsightly disease, which attacks plum and cherry trees. It appears on all woody parts of the trees; but mostly on smaller twigs, first as a slight swelling, and later as a rough, knotty excrescence covering the twig from one to five inches or more. As soon as this knot forms a complete ring about the twig or limb, the nutriment of the tip portion is completely cut off, and it dies.

Treatment.—Cut out and burn all diseased portions, six or eight inches below the knot during the dormant season, and spray with lime sulphur, and cut out knots during the summer or whenever they appear. Paint over the cut ends with disinfectant solution of copper sulphate, one pound to one gallon of water, or house paint. Spray with Bordeaux mixture before the buds burst, using three pounds of copper sulphate, five pounds of lime and forty gallons of water, or with lime sulphur solution, and follow this with a spray of Bordeaux mixture made by using one-half the above quantity of copper sulphate as soon as the petals drop, and again ten days or two weeks thereafter.

The city of Nelson has suffered of late from a number of incendiary fires, among the latest being the destruction of the Yale-Columbia sawmill resulting in a heavy loss. There is now offered a reward of \$2,500 for the capture of the incendiary.

**BORTON, the Plumber**

A HEALTHY CHILD is always active. It must jump and scream, fall down, cry when it gets a hurt, and jump up only to repeat the same thing. But to keep it still means unhappiness, and nearly, if not quite, death. Let them be gay. That is their element.

SUPPLEMENT what the children learn at school with reading lessons at home. Reading aloud is good, will improve the reading of the reader, and give information to the members of the home circle who may be obliged to work with their hands in the evening.

YOUNG MEN, study yourselves. Choose your work and if it satisfies you move on. Bid defiance to all obstacles. Do not surrender to phantoms—they will ever challenge you; fight it out on some line "if it takes all summer." Our boats are headed up the river and just so sure as we drop the oars so sure will we float down. Keep rowing.

 SUMMERLAND, B.C.

THE COTTAGE and the mansion differ very much in structure and in furniture, but a pretty flower, carefully watered and tended, blooms as well in a cottage as in a palace window. Then the flower speaks to the inmates of the home and tells them of the wisdom and love of God; how he sent these beautiful flowers into the world to please the eye of man.

THE GLAD HEARTS! How welcome they are in this old world! The hearts that wear a smiling face and extend the glad hand! They scatter sunshine wherever they go. They inspire us with good thoughts and the desire to noble things. They smooth down the rough places in life. They remove the obstacles from our paths, and sweeten the pleasures of this old world.

SHOW US A BOY who obeys his parents, who has respect for age, who always has a friendly disposition, and who applies himself diligently to get wisdom and to do good toward others, and if he is not respected and beloved then there is no such thing as truth in this world. Remember this, boys, and you will be respected by others, and grow up and become useful men.

LEGISLATE LAWS against early marriages. "I can't tolerate children," said a little simpleton to us the other day, "but I adore dogs!" and yet that girl had an engagement ring on her finger. There should be a special seclusion for such girls until they develop some instinct of womanliness, and they should no more be allowed to marry than should a Siwash chief be allowed to take charge of a kindergarten.

HOW MUCH would neighbors rise in value, and how much would neighbors rise in beauty, if all would lay aside habits of criticism, and neighborhood scandal, and petty feuds and ridicule. And if men would study the things that make for peace and the things that make for happiness, everybody trying to make everybody else happy, what a revolution there would be!

THERE is a wise, old German saying that "Only a god or a brute can dwell in solitude." Men and women need congenial companionship, both for the sake of health and happiness. Just as your lungs, after using up all the oxygen in a close room, need to be filled with fresh, out-of-door air, so your mind needs contact with other minds to get new ideas. There is such a thing as mental as well as physical hunger. Herders on the cattle ranches of the West frequently become mad from the isolation they are forced to endure. Women on lonely farms and in small villages grow morbid and mildly insane, and people do not guess that the cause is want of companionship.

IT IS OFTEN by doing too much for the children, by over-governance, over-indulgence, that their individuality, their aggressive, vital initiative quality, their self-dependence and self-reliance are weakened. Henry Ward Beecher says, "Many children grow up like plants under glass. They are surrounded only by artificial and prepared influences. They are house bred, room bred, nurse bred, mother bred—everything but self bred. The object of training is to teach the child to take care of itself; but many parents use the children only as a kind of spool on which they reel off their own experience, and they are bound and corded until they perish by inanity or break all bonds and cords and rush to ruin by reaction."

**New Steel Steamer for Kootenay Lake.**  
 Nelson, B.C., March 28th  
 Captain J. C. Gore, who returned from the East a few days ago, announces that a contract has been let for the construction of a passenger steamer to be the finest in the interior, for use on Kootenay Lake between Kootenay Landing and Nelson. The boat will be all steel, 240 feet long. It will be built in Nelson, costing \$100,000. Construction will start early in July and one hundred men will be employed.  
 The ship is intended to improve the service in view of the completion of the Panama Canal and of the Kootenay Valley Railway, giving a new main line for the C. P. R. to the Coast.

Property Owners wishing to Sell or Exchange should consult

MR. F. D. COOPER, Real Estate Broker,

Ballycrystal, Peach Orchard, Summerland.

## JIMMY'S LETTER TO DAD.

Okanagan College, West Summerland, March 27, 1912.

Dear Dad: We didn't have any mock trial after all. I expect it will be held soon but am not sure when. The prosecution asked for an adjournment to allow certain incriminating documents, letters and telegrams to be secured. They intimate that they are very sweet and of the real lovey-dovey kind.

Last Friday night a second performance of "Enoch Arden" was given in the College Gymnasium. The people here are awfully slow to find out what things are good and what are not. They crowd the hall for a fourth-rate play at one dollar a seat (and that means two dollars a night for most of them) while if a first class local performance is put on at a cheaper rate they shrug their shoulders and say, "but dear, it's only Mr. So-and-so" and stay at home. Surely a prophet hath no honor in his own country.

The political campaign and the development of the baseball team go rapidly on. The final Socialist meeting of the campaign was held last night and was a great success; while the last Liberal rally is to take place to-night when great things are expected. An unusual amount of speaking talent has been unearthed and developed among the students, which more than justifies the time and energy expended in the campaign.

And the baseball team! Well, it is getting into shape more and more all the time. The present expectations are that the team will tour the Similkameen Valley, playing games with Princeton, Kere-meos, Hedley and Oroville, though it is not fully arranged yet. More will be known soon and if the trip comes off the team will likely leave Thursday the 4th of April.

Another musical recital is announced by the Music Department to be given on Friday evening, April 12 in the college gymnasium. It is going to be even better than the previous ones, so you had better start planning to come. I may sing a song myself!

Friday night we are to be entertained by Mr. and Mrs. W. J. Robinson at their home down town. We have every prospect of having a fine time. I'll try to remember not to ask for a second piece of cake, and say I had a good time when I leave. Oh, I am getting great on manners since I came up here. Trust a co-ed school for that.

Yours as ever, JIMMY.

## CONSTABLE ASTON DEAD.

### PRISONERS CONFESS.

Charge of Murder will be Entered.

At the preliminary trial of James and Wilson, the two desperadoes arrested for the shooting of Constable Aston, James, the principal in the case, shouldered the entire blame, having, as he confessed, compelled Wilson, at the point of the gun, to accompany him in his depredations. James, who robbed the store at Mission and also, he says, shot Aston, seems indifferent to the whole affair. Wilson stated that he had been terrified by his companion James, into participating in the assault upon Aston. His story is that the two men suddenly seized Aston in the state room of the steamer, when James shot him in the head. They were committed for trial on the charge of robbery of the store at South Okanagan, the more serious charge of shooting the constable being held in abeyance, pending the termination of Aston's injury. They were taken to Kamloops jail on Saturday by Constable Tooth, of Kelowna, and Inspector Smith, of Vancouver.

Constable Aston died at three thirty Thursday afternoon.

G. H. Aston was well known in the Boundary country, having been a constable at Midway some years ago.

Irony is added to the tragedy by reason of the fact that Aston served through the Zulu and Boer wars in Africa, and was known as "Lord Roberts" by his many friends in Greenwood. That he should now fall by the cowardly bullet of a common desperado, after having escaped the shot of the Boer and the assassin of the Zulu is another of the freaks that Fate hands out.

Next Friday being a holiday, next week's number of the Review will be published on Thursday. Any copy for change of ads. should be in Tuesday, instead of Wednesday as usual. New ads. can be handled later.

[Continued from Page 1.]

left about ten o'clock." Was asked if he were positive of this, and replied that he could not be, as they had no clock.

This concluded the case for the defence and the evidence was reviewed by the Magistrate. "Mr. Arkell testifies that Templeton took the wood and that he admitted it. Mr. Darkis swears that Templeton admitted taking wood from the Overseas Club. For the defence Mr. Haddrell had produced evidence to show that the two men had gone to bed about ten. Another witness had sworn that wood was being cut about eleven o'clock, and the defence had not been able to show that the men had not gone out again after going to bed at ten."

Court was adjourned and the evidence was considered by Magistrate English together with Reeve Thomson. After about half an hour's deliberation the accused was declared guilty. The magistrate said he would allow him out on suspended sentence, and he must be in readiness to present himself at any time when required. He was also charged with the costs, \$5.

Young Templeton arose to address the Court and in no very respectful manner proceeded to condemn the action of the Court. Mr. Haddrell tried to get him to desist but he turned on him also. He was called to order by the Court and cautioned to be more careful in his remarks and while he was still talking the Court adjourned.

Templeton is a young man from Aberdeen, Scotland, who came direct from there about eight months ago.

## PREFERS THE OKANAGAN TO CALIFORNIA.

Dr. and Mrs. R. C. Lipsett arrived on Thursday night's boat from California where they have spent a good part of the winter. The Doctor says that while California is a good place for a holiday, he by all odds prefers the Okanagan. When asked if he had to make a choice of permanent residence between the two places he pronounced his preference for the Okanagan. In the Interior of California where he spent the winter the weather was pretty warm and he thought the summers would be unbearable. The air was not clear and pleasant as here, being so filled with a fine dust as to be actually hazy at times. This, the residents said, was due to the winds raising the dust from the not far distant deserts, and the dust remained suspended in the air for a long time. The scenery could not compare to that of the Okanagan. We could grow more fruit to the acre here than they could, and while our people had to spend only a few months of the year in orchard work, there twelve solid months of work was necessary.

He thought the opportunities were much better here.

## FINE MILLINERY DISPLAY.

The Angove & Stinson Millinery Opening held Wednesday afternoon was a great success and showed conclusively the value of local newspaper advertising. To add to the attractiveness of the display the weather was all that could be desired. The new department recently opened on the second floor for this purpose held an excellent display of millinery and white goods tastefully arranged. Tea, cakes, etc., were served on the same floor at small, neatly decorated tables. Extra help was on hand to serve the large crowd of ladies and in every way this event, one of the most important of the season to lady shoppers, was pronounced a complete success. The newly remodeled front of the store adds much to its appearance. Further alterations and improvements are to be made.

## TELEPHONE MATTERS.

L. H. Baldwin, representing the Kellogg Switchboard and Supply Co., Chicago, spent several days in town recently. He is now at Penticton. Before coming to Summerland he visited Kelowna and reports that town will have independent telephones at an early date. Mr. Baldwin has looked into the situation here thoroughly and will report to his head office. He will make an estimate of the cost of installing a plant, and prices for a switchboard installed together with instruments will be quoted by the firm. No order has yet been signed. As a representative of the Northern Electric Company is coming, it was thought best to wait until prices were submitted by both concerns.

A start has been made with the improvements on the grounds of the Central and High Schools.
