

The Summerland Review

DEVOTED TO THE INTERESTS OF SUMMERLAND, PEACHLAND AND NARAMATA

Vol. 6, No. 1

SUMMERLAND, B.C., AUGUST 1, 1913.

Whole No. 261

Blown To Atoms

Contractor's Foreman Killed in Explosion.

On Friday, July 25th, Coroner Andrew was called to Kelowna to investigate the cause of death of one Pete Anderson, a Finn, who was killed near the Mission, while employed on K.V.R. construction. Anderson was a foreman, and the evidence revealed the fact that he had been sitting with a can of powder between his knees and was hitting the cover off a tin of detonating caps with his knife. In doing this the caps were exploded, and the force of these set off the can of powder. Anderson was blown almost to atoms, parts of his remains being picked up for a considerable distance around. Two others were injured, and were taken to the hospital. It was from these that the cause of the accident was learned. The man had considerable experience but had seemingly grown careless.

The Coroner did not consider an inquest necessary.

ST. ANDREW'S PICNIC.

Last Saturday's weather conditions were ideal for a picnic, and a large number of people in holiday mood enjoyed to the full the outing of St. Andrew's folk.

The score of conveyances which left the church were uncomfortably filled by the two hundred people who wended their way to the fine picnic grounds at Upper Trout Creek.

The poplar grove on the bank of the stream is a very attractive place for resting and dining, and the level spot just above gives ample room for sports. After the picnic appetites had been appeased from the well-filled baskets, a good program of sports was carried out. These were participated in by several scouts who had tramped from their camp to be present at the picnic.

The ice-cream, cake and peaches at five o'clock were voted by the boys the best item of the day. It was a great day for the bairns, and the big folk.

All South Okanagan Fruit Loaded Here

By Recent Decision of United Growers All Southern Lake Fruit will be Brought to Summerland and Car-load Orders Filled From Here.

Summerland on Tuesday received a short visit from a number of C.P.R. officials, accompanied by Manager Robertson, of the Okanagan United Growers, Limited, the probable result of which will be of much importance to this community. These officers were Assistant General Superintendent G. E. Graham, Vancouver; Superintendent J. M. McKay, Revelstoke; F. W. Sterling, Travelling Freight Agent, and Captain Gore, Nelson, Superintendent of Lake and River Service.

The fact that the provincial government is building a pre-cooling plant here no doubt has some relation to the plan under consideration. It was the practice of the Okanagan Fruit Union to assemble the fruit from the different lake points at Vernon, and make up carload orders there. The new organization proposes to ship directly from southern Okanagan points, and it was arranged for this that the officials accompanied Mr. Robertson here.

It is proposed that a daily barge service be given from this point, and that one of the C.P.R. steamers, probably the "Kaledon," be commissioned to serve the lower end of the lake, gathering the fruit from Gellinty, Peachland, Naramata and Penticton as quickly as it is packed bringing it to Summerland, where, no doubt, it will be pre-cooled before loading.

As far as can be learned the C.P.R. officials seem disposed to assist in every possible way, and will in all probability give the service requested. To do this it will be necessary to have additional track for the storing of reserve cars, as a number of cars must be held here, where they may be held on short notice, instead of being

Pre-cooling Plant

The pre-cooling plant is now rapidly nearing completion. Three exceedingly well built and thoroughly insulated rooms have been built in the south end of the packing house and the machinery is now being installed. The circulating fan is of ample proportions and will be coupled to a 7½ horse power electric motor. On the floor above where the reserved stock of ice will be supplied an ice shaving machine driven by a smaller motor is installed. With this the ice will be ground up small and mixed with salt and put down through hatchways to the fan room. Over and through this mixture of salt and ice the air will be forced. Unless some unforeseen delays occur the plant should be ready for use in more than a week.

TENDERS SOON ON LINE TO HOPE.

Following a conference held last week between Mr. J. J. Warren, president of the Kettle Valley line, and Mr. L. C. Gilman, of Seattle, vice-president of the Great Northern Railway Company, the announcement was made that tenders for the construction of the unfinished link across the Hope Mountains from the Coquella Summit to Hope on the Fraser River, a distance of about sixty miles, will be called for shortly.

According to the terms of an agreement negotiated by the companies several months ago it was arranged that the Kettle Valley line should build, own and operate the section in question, both companies contributing toward the cost, and both enjoying running rights. Various details, including minor modifications in the route, were discussed at the conference.

An early start on construction is assured as the time limit for receiving tenders will be short, and various prominent contracting firms have already inspected the route with a view to submitting tenders for the work.

To be thrown upon one's resources is to be cast into the lap of fortune.—Benjamin Franklin.

Practical Treatise on Fireblight

Mr. Lionel Taylor, Manager of Famed Bankhead Orchards, Gives Experience and Results of Treatment.

The following paper was read by Mr. Thos. Cunningham at the meeting on Saturday last and has been handed to us for publication.

Mr. Cunningham states that Mr. Lionel Taylor is manager of the most successful and probably the best managed orchard in Canada. Any advice coming from such a source is certainly worthy of careful consideration.

It will be seen that Mr. Taylor is a strong advocate of thorough systematic spraying. In this he differs from the gospel that has been preached at Summerland quite recently, and which has produced results not favorable to the best interests of this community. Mr. Taylor has succeeded in making large profits from fruit growing and has established a first class reputation. The Bankhead orchard has been a success. Why have others similarly situated not succeeded? This is a question which should be searched out, and the cause of failure ascertained. Practical results we must have, and have them immediately. Mr. Taylor points the way.

Bankhead Orchard Co., Ltd., Kelowna, B.C., 26th July, 1913.

Dear Mr. Cunningham:

I am extremely sorry that I cannot attend your meeting to-night at Summerland. I only got your note this morning at my camp where I am irrigating, and which I cannot possibly leave.

I should very much have liked to have been able to support your endeavours to bring before fruit growers the absolute necessity of taking the most stringent measures to control Fire Blight.

It may be of some encouragement to growers at Summerland to hear of the success which has attended our endeavours at Bankhead. I think probably the first outbreak in this Valley occurred in our orchard. At any rate, it was detected here three or four years ago, and although it was not definitely identified as Fire Blight for some time, it was treated as such from the start, and measures taken at once to control it. Three seasons ago, I believe, about eighty pear trees, sixteen years old, were affected, mostly Bartlett. These were severely cut back in the Spring, when the affection showed,

but a good deal appeared again in the Fall. Last year there was less infection in these trees, but more in some adjoining, Winter Nellis. A vigorous campaign was kept up throughout the season, the trees being inspected almost daily. Great care was taken to cut well below the infection, and to thoroughly disinfect the shears used in corrosive sublimate after every cut. Although a great deal of fruit was removed on the infected branches, I may say that we had a normal crop of the finest quality, and I believe the trees benefited considerably by the severe cutting they received. During the winter pruning, any infected branches overlooked during the Summer were removed. This year Fire Blight has been almost non-existent; less than a dozen infected twigs have been found in our forty acres of orchard. Last year only one tree was entirely removed, a Vicar of Wakefield, in which the infection had run down the main stem, but owing to its being a poor variety, no attempt was made to save the tree.

The points on which I would lay stress in controlling Fire Blight are as follows:

- 1.—Daily inspection of trees by more than one person. It is very easy to overlook a small twig infection. Where trees are large it is a great advantage to make an inspection on horseback, as quite a different view of the tree is obtained.
- 2.—Cut out infected twigs at once, and thoroughly disinfect the wound and the shears.
- 3.—Do not over-irrigate, especially early in the season when the growth is vigorous. Bearing trees require most water when the fruit is swelling.
- 4.—During winter pruning keep a careful watch for any infection overlooked in the summer when the foliage was on, especially in the limbs.
- 5.—SPRAY, SPRAY, SPRAY, and hereby kill the insects which spread the fire blight. It is absolutely essential to keep all insect pests in control. Winter lime sulphur spray is useful for clearing up the trees and controlling scale insects, and to a less extent red spider and aphid; but spring and summer sprays are the most important. Lime sulphur alone, or with

(Continued on page 5.)

Boy Scouts Break Camp.

Most Successful Yet Held.

The Scouts broke camp on Monday morning, and the "Rich Estabrook Memorial Camp" has been unqualifiedly pronounced the most successful yet held. Practically every day of the encampment the boys were visited by friends and relatives interested in their welfare, and on Thursday probably 200 people or more spent the afternoon on the camping grounds, and again on Sunday afternoon during the devotional service, when Rev. R. W. Lee gave a most appropriate address, fully 100 visitors were present.

The boys got in a good deal of hard work during the week, and a number have now passed as first-class scouts. These were: A. Harris, D. Ross, W. Snow, G. Campbell, V. Merrill, H. Phinney, H. Harris, D. Ritchie, D. McIntyre, B. Taylor.

Prizes were given in competitions as follows:

For best all-round tent for week—1st prize, Kangaroo Patrol, leader H. Phinney, 90 points; 2nd prize, Crow Patrol, leader L. Hatfield, 85 points.

Best Scout for week—Patrol Leader H. Phinney, 92 points.

Some target practice was indulged in. No. 2 won the 1st prize (patrol cup) with an average score of 38.88. No. 2 patrol scored 35.88. No. 3 patrol scored 34.63. No. 4 patrol scored 33.83.

The highest individual score was made by Assistant Scout-Master Turner, making 48 out of a possible 50. L. Johnson scored 45, and H. Harris 45. Prizes were awarded to these in the order named, these being 1st, 2nd, and 3rd, \$3, \$2, and \$1, donated by Musketry-Instructor F. J. Nixon. The shooting was 10 shots each at 20 yards. The boys, officers and council feel very grateful to the many friends who helped to make the camp the success that it was.

The Council are exceedingly grateful for the encouragement given this worthy movement by the many citizens who assisted with and patronized the recent Boy Scout concert, as well as for the most generous grant of Major and Mrs. Hutton in memory of a worthy scout.

During the week fifty-four prof-

Kelowna Regatta.

Preparations for the annual regatta at Kelowna on August 13 and 14, are now well under way, and the affair promises to be the most interesting of its kind ever held in the Orchard City.

Two of the four-oared shells ordered some time ago by the Rowing Club have arrived, and one of the leading features of the programme will be the race between the two boats on the second day. The popular war canoe races will be included as usual, and the Peachland fifteen will battle with the Kelowna crew for the cups. The Peachlanders have been training hard for these races, and will have to paddle their hardest this year to retain the honors won in 1912.

A monster parade of decorated autos will be held on the second day at 10 a.m., and a grand fancy dress confetti carnival will complete the programme. This will be the first carnival of this class to be held in Kelowna. Prizes will be given for best costumes, the best decorated autos and the best decorated launches or steamboats in the motor-boat review in the evening.

If hard work and attention to details make for success, the regatta of 1913 should be "the best ever."

Special return rates at single fare rates plus one-third will be given by the C.P.R. from all points in the Okanagan Valley, good from August 12th to August 15th.

The S.S. Aberdeen will leave Penticton at 7 a.m., on August 14th, returning at 9.30 p.m. of the same day. Special rates will be in effect on this day.

"OKANAGAN" RESUMES SUNDAY SAILING.

Capt. Estabrook of the Str. Okanagan, received a telegram the other day with instructions that his boat be put on a seven day service, as last year, until further notice. The reason for the change is because of the increasing shipments of fruit by express. Express shipments from lake points have been much heavier this year than previously. The increased service begins next Sunday, August 3rd.

Currency badges were awarded. Each of these represents a good deal of study and work among the boys, and by which they have acquired much useful knowledge.

Trout Creek Bridge Fatal Accident.

Workman Hurlled to Instant Death. Gear Breaks Knocking Bridge-builder from Trestle. Drops Nearly 200 ft. to Bottom of Trout Creek Canyon.

Suddenly, and without warning, Archibald Montford, one of the bridge builders working on the steel structure being built across Trout Creek canyon, was hurled to instant death on Monday at noon, just as the whistle blew. Through the breaking of some of the gear a mass of heavy steel cables came down in a heap on the top of the trestle work on which the men had been working. One of the coils caught Montford and without any possibility of escape he was thrown from his footing on one of the beams to the bottom of the canyon nearly 200 feet below, his fall being only interrupted for an instant by a small ledge some 90 feet down, on which he lighted on his back, and rolling from that fell to the bottom near the waters edge.

All of the workmen were still on the scene, and others to witness the accident were K.V.R. Engineer McCarthy and Engineer Nuttall, who is supervising the building of the bridge, Messrs. D. H. Watson and T. McAlpin. Several other workmen had a very narrow escape from the same fate as Montford.

The accident was caused by the breaking of a huge link about two inches in diameter, which link was at the end of the crane from which the steel section was suspended. The gear had been in use under the present foreman for fourteen months, and was supposed to be able to support a weight of 90 tons. But a short time previously it had swung into position a section weighing about 12 tons. That

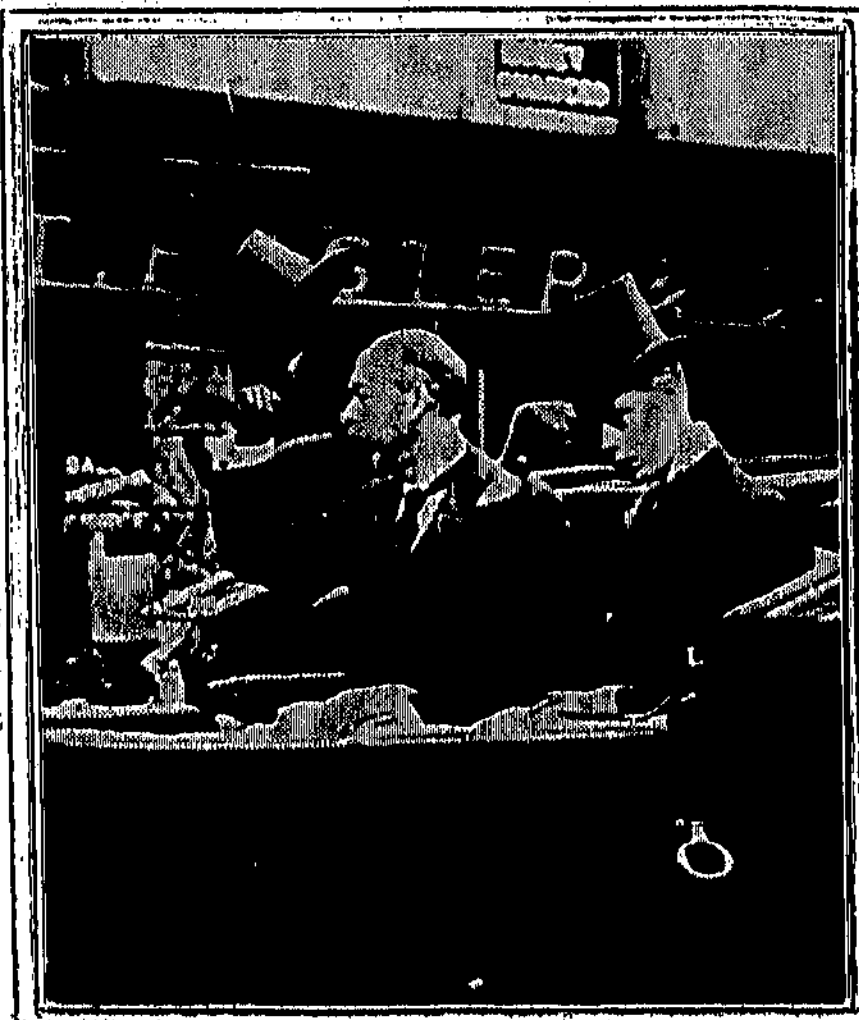

which was being placed in position on Monday noon weighed but six tons. Upon examination of the link it was found that to all outward appearances the weld in the metal had been a good one, yet the break revealed that it was only on the outer surface that a union had been made.

The load had been swung into position and was being raised slightly for the purpose of putting some blocking under it when the 12 o'clock whistle blew. Some of the men had thrown off their gloves preparatory to going up for dinner, and Montford was just in the net of doing so when the mass of steel rope came tumbling down beside him.

The victim of the accident was about 44 years of age, and evidently of Irish birth. His papers showed him to be a member of the Masonic Order, being connected with a lodge in Everett, Washington, and letters were found among his effects written from a hotel in Seattle by a brother. Montford had come here from Vancouver, and was a member of the Bridge-builders Union there.

Coroner Andrew held an investigation on Monday afternoon, and after learning all the facts concluded an inquest unnecessary. The body was shipped to Vancouver on Tuesday morning to the Bridge-builders' Union, and the Coroner also notified the Masonic Lodge in Everett, so that it is expected the remains will be put in the care of relatives and friends.

KING GEORGE AND PRINCE OF WALES.

KING AND PRINCE EN ROUTE TO STATION TO BID FAREWELL TO PRESIDENT OF FRANCE.

King George V, and the Prince of Wales on their way to Victoria Station to bid farewell to M. Poincaré, President of France, following his first official visit to Great Britain. The King and the Prince are seen saluting the crowds that cheered them on the way to the station. M. Poincaré was accompanied by M. Pineau, French Minister for Foreign Affairs, which position M. Poincaré once occupied himself. Mme. Poincaré did not accompany her husband on the English visit.

The Summerland Review

PUBLISHED BY THE REVIEW PRINTING & PUBLISHING COMPANY LIMITED.
RALPH E. WHITE, MANAGING DIRECTOR

SUBSCRIPTION RATES: \$2.00 PER YEAR, IN ADVANCE. SIX MONTHS \$1.00.

Advertising Rates:

LEGAL NOTICES.—Twelve Cents per line for the first insertion; Eight Cents per line for each subsequent insertion.

LAND NOTICES.—\$7.00 for 60 days, \$5.00 for 30 days.

WATER NOTICES.—20 days, 150 words and under, \$8.00; each additional 50 words, \$1.00.

THEATRICAL, ETC.—50c. per inch for first insertion, and 25c. per inch each subsequent insertion.

LOCAL NOTICES or Readers, immediately following regular locals, 20c. per counted line; 10c. per line each subsequent insertion. Half these rates when accompanying display advertisements.

LODGE NOTICES, Etc., 25c. per week, per column inch.

FOR SALE Advertisements, Etc., 3c. per word first week; 1c. per word each subsequent week.

Transient Advertisements payable in advance.

Rates for Contract Advertisements furnished on application.

Copy for change of contract advertising must be in the hands of the printer not later than Wednesday noon to insure publication in the next issue.

In accordance with schedule of prices adopted throughout the valley, charges for advertising are now being made weekly. Heretofore when five issues were made in one month the result was a loss. By the new method customers are charged each week for just the amount of space used.

FRIDAY, AUGUST 1, 1913.

MORE POWER FOR MUNICIPALITIES.

PROVISIONS to protect municipal and public rights are the outstanding features of the new Railway Act of Canada which will be introduced at the opening of the next session of Parliament. Since the original act was passed, there have been a great number of amendments, and for the past year the government has been engaged in consolidating these different amendments. A number of new clauses are to be inserted. The work was completed too late for last session, but the bill will be introduced as soon as Parliament assembles.

It is specifically provided in one of the new clauses that no company shall erect telegraph, telephone or power lines without the consent of the municipality where the works are located. Such consent also is essential to power distribution, while rates to be charged must be approved by the railway commission.

Strong penalties are provided for those who fail to obey the orders of the Railway Board. Railway officers and directors, from president down, who disregard orders, are subject to penalties ranging from \$20 to \$5,000. Similar penalties are made applicable to mayors, aldermen and municipal councilmen.

A company, which, without consent of the railway board, removes a spur line to any industrial establishment, is made liable to a fine of \$1,000.

There are some technical changes respecting proceedings in arbitration, while a new clause provides that the board may order the opening and operating of any new line on its own motion or the initiative of anyone else. The act contains over 400 clauses, and embodies every amendment made since the original act.

It is believed that the increased control given the municipalities in respect to their streets and highways is a result of the litigation which has resulted disastrously to a number of municipalities whose powers are overridden by the sweeping authority conferred on private companies by Federal and Provincial enactments.

BRITISH COLUMBIA WINS.

IN THE Horticultural Section of the Dominion Fair at Brandon the entries by the Province of British Columbia secured thirteen first prizes, two seconds and two thirds, out of nineteen entries of fruit, vegetables and honey.

The British Columbia exhibits practically swept the board. The extent of the exhibits from the Coast province was one of the surprising features of the Dominion Fair. They were located in three separate buildings and comprised displays of fruit, timber, fish, grasses and ores. The exhibits were strikingly displayed and caught the eyes of the thousands of prairie farmers who never fail to ply the attendants with many questions.

MUNICIPAL bond sales for June in Canada totalled \$2,435,726, making a total for the six months of \$11,422,011. Following are the particulars by provinces: Ontario \$812,406; British Columbia \$497,500; Quebec \$400,000; Alberta \$281,820; Saskatchewan \$278,000; New Brunswick \$150,000; Manitoba \$18,000. Total, \$2,435,726.

THE only way to build up a town is for everybody to go hand in hand—every man to the wheel. Banish all feelings of discord, if any; let harmony prevail and prosperity will follow. Talk about your town, write about it, speak well of it, encourage your men at the head of municipal affairs; choke the croakers, gag the grumblers and squelch the scolders. Beautify the streets in every way, patronize its merchants, refrain from sending outside for goods, favor home enterprises always, and if you can't think of some good word to say, keep quiet. Be a hustler and keep it up.

NEWSPAPER ADVERTISING tends to lower the cost of living, according to the consensus of opinion voiced by speakers at the luncheon given by the Hawkeye Fellowship Club in Chicago. If it were not for advertising the public would be bankrupt as the result of soaring prices, it is asserted. The relation of newspaper advertising was summarized by the speakers as follows: It decreases living expenses. It increases the volume of sales. It increases sales to the consumer at lower prices. Advertisements tell people where to buy cheapest. Bargains would go begging were it not for advertising. Advertisements are cheaper than high salaried salesmen.

THERE ARE but few editors in our province who have not made a vigorous and continuous fight against the city mail order house. This has been done in the interest of the homo merchant, and without money and without price. If the editors of the land had received regular advertising rates for all they have said against these enemies of the country merchant they could now be wearing diamonds. Now the department store man appreciates advertising space and is willing to take all the country editor has for sale, and at a good price. What other class of business or professional man would refuse business to help their friends, especially as many of said friends never come in the least disposed to return the compliment or even appreciate it.

Our Philosopher

FORGET IT.

The heat of itself is sufficient burden without adding to it irritation over trifles and outbursts of temper because of petty annoyances. Forget it.

By continual thinking of the hot weather, by keeping an eye on the thermometer and adding to discomfort by a fussy disposition, one draws to his head more blood than that organ should contain, and the result is misery and possible prostration or sunstroke. The wise way is to buckle down to business and—

Forget it.

Smile as you sweat. Sweat and smile. The mental habit of optimism, which includes forgetfulness of small things, will make you fairly comfortable even under uncomfortable conditions. Therefore—

Forget it. And also—

If something has gone wrong with the farm, or the store, or the shop, or office, if the plow is perverse or the store stuffy, or the shop slow or he office oppressive, why—

Forget it.

Life is too short to treasure up the trivial. He who does that only heats his blood and actually poisons it, as laboratory tests have shown.

Whatever your trouble—it is not as big as you think it is—unless you make it so by dwelling on it and brooding over it.

Forget it.

Do not brood. Forget. Do not harbor resentment. Dismiss it. Do not get warm mentally. You cannot afford that. Forget it.

Blessed is the man who is wise enough to forget.

AS we grow older we can't see why pushing the lawn mower is not just as good exercise for a young boy or girl as dancing the turkeytrot to ragtime music.

IF your neighbor is prosperous, let him prosper. Don't grunt, growl or grumble. Say a good word for him and let it go at that. Don't be a knocker. Your turn will come. No one man is the whole show. If you see that the town is moving along nicely, feel good about it. Help things along, shove a little. Try to get some of the benefit yourself. Don't stand around like a chilly old cadaver. Don't waste our time feeling sore because some fellow has a little more sand and sense than you have. Do a little hustling yourself. Don't be a knocker.

High School Exam.

Results Announced by the Department of Education.

Of the 1729 candidates who presented themselves for examination 1218 were successful in gaining sufficient marks to pass.

Throughout the province there were 32 examining centres. Of the 16 examined here 12 were local candidates, 7 of whom passed. This is below the average for the province. Adding the four from Hedley who were examined here to our own unsuccessful ones gives Summerland a very unfavorable standing.

Results by centres are as follows:

Centre.	No. of Candidates.	Passed.
Armstrong	33	14
Bridgeport	32	27
Chilliwack	42	35
Cranbrook	11	6
Creston	12	7
Cumberland	10	10
Duncan	12	8
Enderby	6	6
Fernie	13	7
Grand Forks	18	9
Kamloops	36	28

RIFLE ASSOCIATION.

Twelve members turned out to shoot for the Bank of Montreal Cup on Saturday. The contest was a close one, Geo. Barkwill winning out with a one point margin.

Distances	200	500	600	Total
H.P.S.	35	35	35	105
G. Barkwill	30	31	31	92
F. R. Gartrell	28	30	33	91
J. Dunsdon	30	29	32	91
H. Dunsdon	31	27	31	89
O. Smith	30	29	30	89
G. M. Loomer	32	28	29	89
J. R. Conway	30	28	29	87
W. Nelson	31	30	26	87
F. Nixon	29	29	27	85

There being a tie of 96 each between H. Dunsdon and G. Barkwill for the spoon which goes each month to the highest score, this tie was shot off with the result that H. Dunsdon wins the spoon for the month.

This week the annual class firing takes place, and will be continued the following week. The Price Ellison Cup is offered for the highest score in this class firing. Every member is required to complete this course, for which free ammunition is provided.

Kaleden Comments

Mr. A. S. Hatfield went up to Princeton last Saturday with Mr. Turner, the Commissioner for Roads in this district.

The Misses Davies, of Vancouver, came in this week and are staying with Mr. and Mrs. Louis Korr for a time.

We are pleased to report that Mrs. Louis Korr is somewhat better, and able to go into Penticton for a few days.

Mrs. A. S. Hatfield has been staying for a few days in Penticton as the guest of Mrs. Turner, returning on Monday afternoon.

A number of the men who have been employed on the Penticton and Kaleden road for some time have gone up to Princeton to work on a section of the road there.

Come and take part in the

A. B. ELLIOTT
HARDWARE

Grant sympathy is felt for Mr. and Mrs. Ronald Hewatt, of Fairview, whose little son, three years old, was accidentally burned to death last week. Mr. Hewatt is well known to Kaleden and the district as the Assessor of Taxes.

Mr. and Mrs. Burton Hatfield, of Summerland were down on Sunday with Mr. and Mrs. P. S. Roe and other friends. They returned on Monday morning, taking their son, Bobby, who has been visiting his grandmother, Mrs. C. Hatfield.

On Friday last, as little Florence Preston was playing near a colt she was kicked on the head by the mare and badly cut. Dr. McGregor, of Penticton, was soon in attendance and dressed the wound, which is not as serious as it was thought to be at first.

The Hotel register for last week contains among others the following names: E. H. Hancock, Naramata; Mr. and Mrs. Bergthell

Mozaffapore, India; T. J. McAlpin, Summerland; Jas. Ritchie, and guests, West Summerland; W. F. Brind, Balcom; Mrs. G. N. Gartrell, Summerland; T. H. French, Hedley; Geo. Bury, wife and family, Winnipeg; Percy Thornber, Summerland; J. Rowley and wife, Summerland; D. O. Hughes and wife; P. S. Roe and wife; T. H. Boothe; all of Naramata.

You'd scarce expect one of my age in merchandizing to engage and hope to get a paying trade without the local paper's aid. And yet I did that very thing. I opened up a store last spring, this month the sheriff took the stock. Don't view me with a scornful eye but simply say as I pass by, "there goes a man who seemed to think he had no use for printer's ink." There is a truth as broad as earth, and business men should know it's worth, it is simply this—the public buys the goods of those who advertise.

The Summerland Development Company

Has a few **CHOICE LOTS** left in their great Closing Out Sale. These are offered at the original price, in spite of the fact that the value of the land has been greatly enhanced through the activities of the District.

NOW is your chance to Invest in additional Holdings; or, if you do not own an Orchard, to establish a Home in the Okanagan.

Both Improved and unimproved lands are offered. Those interested will be shown over the District at any time to suit their convenience.

Col. Cody to Cross Ocean in New Type of Hydro-Aeroplane

Col. F. S. Cody, the famous Anglo-American aviator, who is at present at work in England on a new type of hydro-aeroplane in which he asserts he will attempt to fly across the ocean from London to New York. Col. Cody has had extensive experience in flying over large bodies of water, and is thoroughly familiar with flying in high altitudes. The photograph shows Col. Cody in his somewhat remarkable aviation costume, in one of his hydro-aeroplanes. The Colonel adopted his costume with a special view to sudden immersion in water. In addition to carrying pontoons on his flying machine he wears a life belt; guaranteed to keep him up in the water for days. Attached to his costume is also a small store house of food and water, protected in rubber bags and easily reached. Should, by any chance, the aviator land in the ocean, he would be able to sustain himself for days. Inasmuch as he plans to follow the trans-Atlantic steamer route in his flight, should he be forced to descend, or even should he fall and be compelled to rely upon his life belt. It would be a practical certainty that he would be picked up by some passing steamer within a day or so. Col. Cody estimates that he will make an average speed of 90 miles an hour and complete his journey within twenty hours. It is probable that arrangements for several cruisers or torpedo boats will be made for the flight. It will be the object of the war vessels to keep the aviator continually within sight so that assistance may be at hand in the event of accident. "The only danger is," said the Col., "that in a mist or fog I might lose the convoy, then if anything happened I should be up against it."

Ex-Sultan Visits France and Great Britain

RAILROAD TUNNEL PROVED TOO MUCH FOR HIM AND HE SOUGHT REFUGE IN A CORNER WHERE HE WAS FOUND HUDDLED, MUTTERING TEXTS FROM THE KORAN.

Mulai Hafid, Ex-Sultan of Morocco, having entertained and been entertained by France for a number of months and taken the cure at Vichy, is now visiting Great Britain. The photograph shows the former Sultan disembarking at Plymouth. So cordially has Mulai Hafid been received in France and in England, it is safe to say that the atrocities committed in his name have been forgotten. European life was now to the Ex-Sultan when he first visited France. One of the most terrifying moments of the former tyrant's life is said to have been the passage through the railroad tunnel from Marseilles to Vichy. While in the tunnel the ex-Sultan remained huddled in a corner of the coach, muttering texts from the Koran. Not so on his visit to England. He is now thoroughly European, excepting for his costume.

C.P.R. IMPROVEMENTS.

One hundred million dollars has been appropriated by the Canadian Pacific Railway to be spent on improvements to their system, according to a statement made by President Sir Thomas Shaughnessy. This is the largest single amount fixed upon for expenditure by this giant corporation. The announcement coming at a time when there is a general tightness of the money market created considerable surprise, and, of course, is being received with favor. The putting of

one hundred million dollars into circulation, even though spread all over Canada, will help to relieve the money stringency. Sir Thomas Shaughnessy's statement on the subject is as follows:

"The activities of this great corporation, and their influence on the financial, mercantile, manufacturing and labor interests of Canada will be partially appreciated when it is stated that in the current year the company's appropriations for the consolidation of additional railway mileage, for cars and locomotives, terminal facilities at St.

Try Us a Week
 You remember the old saying "The proof of the pudding is in the eating of it." It is so with our GROCERIES and service. Unless you try both you cannot know that they are the best you can get in this town: bought and planned to secure and keep your trade.

We know that a satisfied customer is the best advertisement we have. Try us a week. Send or come with your order, or phone 22 and a messenger will call for it. We are quoting:

The best way to swat the fly is to banish dirt.

Three children have died and others are seriously ill from drinking milk from a cow in Wenatchee. At first the deaths were attributed to dysentery, but later, evidences of arsenate of lead were found. It is now believed that the cow from which the milk was obtained, which cow has since died, was poisoned by eating grass from orchards sprayed with arsenic solution. All orchards in the district were recently sprayed for moths.

Sunday Afternoon Oratory in Hyde Park.

By Mr. J. O. ROBINSON.

The British love of fair play is well known throughout the civilized world. We have only to see him on the field of sports to recognize this quality. Time and again at critical times this has been brought before the world's notice. For an illustration we need turn the pages of history back no further than the year 1912 to see the attitude of Captain Smith on the occasion of the Titanic disaster in regard to the women passengers. "Be British" was the cry, and this slogan sufficiently conveyed its meaning because it and fair play have become synonymous terms. Running concurrently with it is the right for free speech. This right is probably most exercised and advertised during an election campaign but that is by no means the only time you will hear it.

In the great metropolis of London among whose inhabitants perhaps every race under the sun can be found, there are quite naturally differences of opinion in regard to religious faith, philosophy, politics or any burning question of the day. The result is that occasionally a little steam has to be let off to relieve the tension. For a place to gather together a section of Hyde Park has been chosen, it being centrally located and consequently convenient for all classes of people, and, it being a holiday, Sunday afternoons they come to unburden themselves.

For so many years has this practice been followed that it has become a well-known, fixed custom. The result is that sight-seers and tourists are attracted by the thousands as well as those who go through mere curiosity. Last Sunday a section of our household went to see the fun, going by motor-bus via Shepherd's Bush and Marble Arch. Immediately inside the gates were crowds of people standing around excited and fiery orators who were standing on packing boxes which the speakers occasionally referred to as platforms and before rickety stands which they were pleased to call pulpits. One long-whiskered man had the nerve to call a step-ladder a pulpit. The first performer we listened to held an audience of some fifty people spell-bound over the fate of the wicked in the future life. He made the cold shivers run up the spines of his hearers by dwelling at some length on the fire and brimstone theory. His discourse, however, much to his own annoyance was cut short by Salvation Army exponents about twenty feet away who at this juncture started to sing accompanied by music which was mostly drums. We then moved on to listen to an old man who claimed anti-theology as his faith. He waxed brilliant in an attack on the churches which he declared bred nothing but superstition, thus hindering the progress of mankind. The next speaker which held our attention was a middle-aged woman who as far as we could see was toothless with the exception of one tooth on the upper jaw which was very much in evidence every time she opened her mouth. A large placard behind her with a code of rules proclaimed her philosophy as Humanitarian Deism and she soon showed that she was versatile in the way she handled that broad subject. Human happiness through the love of mankind seemed to be the keynote of that cult, but the speaker devoted most of her time in showing her enmity to the church and most especially the Church of England. She loudly demanded the disestablishment of the church, now and then pausing to take a whack at the suffragettes.

A short distance away, a would-be philosopher was holding forth on the development of the race. A listener asked him a question about evolution and that set him off on a tangent, when he mumbled something about devolution and involution. He did not talk very long before we were convinced that he knew no more about it than the box he was standing on did. This grew a little tiresome so we moved on to listen to a young man discourse on patent medicines. A large placard announcing that the British Medical Association had exposed certain patent medicines had attracted a big crowd who were listening to the speaker further explain the investigations. He brought before our notice Beecham's Pills, and declared that they were composed mainly of soap. Other well-known patent medicines were the targets for his flow of eloquence. We then passed on to hear socialists, anarchists and trade unionists give vent to their wrath over existing conditions. One young speaker, standing in a cart which contained a chairman and other officials, bemoaned the fact that the cost of living was going up. He could not understand why the working-man got a starvation wage while trade in the last year had had such a boom.

This was all very interesting, but we wanted some excitement in the form of suffragettes. About a hundred yards away an immense and quite orderly crowd surged around a four-wheeled cart in which were three or four women. They stood under a yellow banner on which was printed "Women Teachers Franchise Union." The teachers have a real grievance, because although their work is just as skilled and hard as the male teachers yet their salaries are lower. There was an entire absence of coarseness about this meeting, and the crowd lent an attentive ear to the addresses which were really clever and logical. At the next stand was a banner announcing "Law Abiding Suffragists." The orator spoke from a coal wagon, and she proved to be more bitter and not so logical as the teachers. She stated that the home was the place for women and women would be found there, and then in the same breath exclaimed that it was impertinent of the nation to say that the place for the woman was in the home. A man in the audience had some fun with her by continually asking questions, and the whole crowd enjoyed it immensely when she lost her temper.

We hurried on to see the real militants in action, and were surprised to see several beautifully-dressed, fine-looking women, sitting in a cart, with a man as chairman. Mrs. Lawrence was speaking with all the cleverness of a finished politician, and drove her points home with clear logical arguments. Occasionally she made some rather bald statements in regard to the law dealing with the hunger strikers which she termed the "Cat and Mouse Bill." She had the advantage of not being followed by an opposing speaker, but this deficiency was to an extent made up for by the crowd which would now and then jeer her. A portion of the listeners had a very amusing and effective way of putting a stop to some of the rabid remarks, for when she would make a statement that was very glaring, they would start to sing and thus drown her voice. The speaker managed to a certain extent to keep her dignity, and never lost her temper, while all of them were up in the art of repartee, and quickly answered all questions asked. The next speaker was even more brilliant in dealing with the subject. She handled the controversy of the Education Bill, and the question of legislation for children in a very able manner. She, too, made some statements which were rather one-sided. She said "Whether we are right or whether we are wrong for heavens sake give us the vote and put an end to this turmoil which is making the British Government the laughing stock of the world." She did not add that they were making the English women the laughing stock of the world.

After the speeches were over we went through the park and sat down by a large bandstand where a military band was playing before an audience of thousands of people of all the classes in the social scale. Beautifully dressed people were enjoying the fresh air, while automobiles and carriages of the wealthy rolled by, their occupants indulging in the luxury of an afternoon drive.

B.C. POULTRY ASSOCIATION TO HOLD CONVENTION.

A convention of the British Columbia Poultry Association is to be held in Vancouver on September 3, during the Vancouver Midsummer Exhibition. The convention will be held in the stock judging pavilion. The indications are that there will be delegates from all over the province, and they will be entertained at a luncheon by the directors of the Vancouver Exhibition Association. As is customary all delegates will also be provided with passes to the fair departments. During the convention Mr. R. N. Barker will give an illustrated lecture on caponizing; Provincial Poultry Superintendent Terry will give a talk, with pictures, on plucking, trussing and marketing fowls, and Assistant Superintendent Upton will conduct a question drawer, answering questions dealing with local conditions affecting fowl raising.

K.V.R. SHORT LINE.

Messrs. F. C. Hitchcock and J. W. Coit, of New York, prominent railway contractors are in this city, and it is understood that their mission here is the inspection of the proposed routes down the Coquihalla pass of the Kettle Valley, the contract for which will now be let in a short time. These gentlemen will, in all probability, make a strong bid for this piece of work. They went up the summit this morning and will make the trip down the pass to Hope.—Meritt Herald.

HOSPITAL DONATIONS.

Mr. Hancock, Naramata—3 doz. eggs.
Mrs. Woodworth—3 qts. preserved fruit.
Mrs. Fosbery—fresh vegetables.
Mrs. Agur—flowers.

BIRTHS.

WILLIAMS—On Sunday, July 27th, to the wife of Dan. Williams, a daughter.
BEAVIS—On Wednesday, July 30th, to the wife of Martin Beavis, a daughter.
Mr. W. Henry of Stirling & Pitcairn, Kelowna, was in town last Saturday.

MAIL CONTRACT.

SEALED TENDERS, addressed to the Postmaster General, will be received at Ottawa until Noon, on Friday, the 5th September, 1913, for the conveyance of His Majesty's Mails, on a proposed Contract for four years, six times per week each way, between Summerland and Rural Route No. 1, from the Postmaster General's pleasure.
Printed notices containing further information as to conditions of proposed Contract may be seen and blank forms of Tender may be obtained at the Post Offices of Summerland, West Summerland and Gartrell, and at the office of the Post Office Inspector.

Local News Items

Miss Kathleen Brown is visiting with Miss Marie Lapsley, of Kelowna.

Mrs. W. H. Hayes is this week under the care of the doctor, suffering from inflammatory rheumatism in the shoulder.

The Choir of St. Andrew's Church will hold its annual picnic to-morrow (Saturday) at Garnet Valley.

Mr. and Mrs. E. B. May left for the Coast on Saturday. During Mr. May's absence Mr. Collas is in charge, while Mr. Rush, who has succeeded Mr. Suckling, is temporarily located at West Summerland.

Eighty-five per cent. of headaches are caused through eye strain, and if you are troubled that way do not fail to consult Dr. S. L. Taube, at Summerland Drug Co's. Store on Wednesday, August 6th, and at their store at Naramata on Thursday on August 7th.

Mr. H. D. Hunting, who this year resigned the Principalship of the High School here, left for his home, Sherbrooke, Quebec, this week, travelling via the Great Lakes and Montreal. He went up the lake on Wednesday morning's boat.

The cherry crop is now about over shipments for the last few days being very small. The quantity shipped from here is a little over that shipped last year. Early peaches and apricots are now beginning to come in, and shipments will be fairly heavy next week.

Mrs. William Ritchie is confined to her home suffering from a broken collar bone as the result of an accident last Wednesday. While attempting to release a cow and calf which had been entangled by the tethering rope, Mrs. Ritchie was tripped and thrown heavily on her shoulder.

Mrs. J. Downton is still an inmate of the hospital at Kelowna. Practically ever since the operation she has been making satisfactory progress. During the last day or two a slight re-accident made it necessary that she keep to her bed. No serious consequences, however, are anticipated.

Mr. R. V. Agur, who has been attending the meeting of the Fruit Growers Association at Nelson, and later visited the Coast, arrived home on Tuesday night. After carefully looking over the Kootenay district as well as the agricultural section of Vancouver Island, he came back better satisfied than ever that the Okanagan is the best fruit growing district in the Province.

Dr. A. Bonquet, who for some time has been connected with the Inspection Department of the Horticultural Branch of the Department of Agriculture, severed his connection with that department at the end of July. Dr. Bonquet will spend a short time at his father's home in Minnesota, and will return here probably two months hence to take up other duties. Dr. Bonquet has not stated what the new duties would be, but said that he would be located in the Okanagan.

The new telephone rates become effective to-day. It is said that already a number of phones have been ordered out and that other users contemplate doing so. At a gathering of business men the other day they decided to pay the increased telephone rates only under protest until the legality of the new rates are investigated. It might be well for all telephone users who are continuing, to pay under protest, and thus avoid the possibility of in any way binding themselves to the new rates or to the company.

Mr. T. E. Clay and two sons arrived here on Friday of last week and Mr. Clay is expecting his wife and daughter early next week. They have taken up their residence in what is generally termed the Campbell house, east of the Shaughnessy Ranch. Mr. Clay is Secretary and Manager of the Okanagan Realty Co., proprietors of a large tract in Meadow Valley. Mr. Clay has engineers on the ground laying out the townsite, and will have within the next few days a crew building a dam on Fish Lake for irrigation purposes. Mr. Clay pronounces himself as highly pleased with conditions here, and thinks his company has an excellent proposition. The Meadow Valley property will be divided into small farms, and mixed farming will be encouraged. Apples, alfalfa, hogs and dairy cattle will be the chief branches of agriculture.

There will be a baseball game next Thursday afternoon between Penticton and Town on the College Campus.

Mrs. R. C. Lipsett was at Peachland last Friday, where she was instrumental in organizing a branch of the Women's Institute.

Mr. and Mrs. J. M. Sutherland and family leave to-night on a prolonged visit to England. They will probably remain six months or a year.

Remember the date of Dr. Taube's visit to Summerland Drug Co's. store on Wednesday, Aug 6th, and if there is anything wrong with your eyesight do not fail to consult him.

Mr. W. J. Wilcox of Salmon Arm arrived in town on Monday night. Mr. Wilcox owns an orchard near the Adamson orchard, and his visit here is to inspect the property.

Mrs. R. B. Wilkinson and her mother, Mrs. Tait, who have been occupying the Moreland cottage during the summer, expect to return to their home in Calgary, leaving here on August 9th.

Presbyterian services will be held in St. Andrew's Church next Sunday morning and evening. A song service in the evening from 6.50 till 7. Mr. Daly's evening subject will be "You and Your Enemies."

The ladies of St. Stephen's Church Guild will hold another of their popular Ten Cent Afternoon Teas at the residence of Mrs. Hanington, Beach Avenue. See their ad. in this number.

The tug "Castelgar" is off for repairs, and the "York" is taking her place. As the latter cannot handle the quantity of cars as can the "Castelgar," traffic is said to be somewhat congested at the Landing.

Ladies competing at the Women's Institute Flower Show for the prize for white cake made from the recipe prescribed by Mrs. J. L. Hillbon are asked to note that the amount of butter required is one third of a pound.

The Western Canada Irrigation Association will hold its seventh annual convention in the city of Lethbridge, Southern Alberta, August 5th, 6th and 7th. The meeting will convene on the morning of the 5th, at 9.30 o'clock.

Work has been ordered to begin at once on the erecting of telephone lines between West Summerland and Summerland. These will converge at the Post Office giving connection with the government telephone and telegraph lines, as well as affording means of communication between town and the outlying points.

Mrs. A. H. Solly is this week in receipt of a license issued under the Hospital Act Amendment of 1913 authorizing her to keep a private hospital. This license expires next May. Mrs. Solly has been advised that a renewal of the license is contingent on her securing premises more suitable for carrying on the work of a private hospital.

About 200 people attended the Union Sunday School picnic at Crescent Beach on Thursday afternoon, about 160 being conveyed there by the "Skookum." The usual sports were indulged in and the little ones were given a good time. Besides the sports quite a number had a snail about the lake on the "Skookum" during the late afternoon.

There was a very good attendance at the special meeting called last Saturday evening by Inspector Cunningham and much useful information was imparted by the speakers. Space will not permit our publishing the addresses, but elsewhere in this number we publish in full a paper written by the manager of the Bankhead Orchards, which paper was read by Inspector Cunningham at the meeting.

Mr. and Mrs. Fred Manchester are now on the ocean homeward bound from England. While Mr. Manchester's friends have not had much detailed information they have learned with great satisfaction that of his speedy recovery of health in England and that his illness was caused by stomach trouble for which he has been successfully treated. They infer that he has had an operation. Some of Mr. J. M. Robinson's family in writing of him said that he had shown marvellous improvement in a short time.

TREATISE ON FIREBLIGHT

(Continued from page 1).

black leaf forty when leaves are breaking is a most valuable spray. Bordeaux, black leaf forty, arsenate of lead, and lime sulphur in any combination should be used as required throughout the summer. Whale oil soap can be used with all, except lime sulphur, as a spreading agent.

Experts are agreed and my own experience has shown that where Fire Blight is likely to occur, the single leader system of pruning should not be adopted, the reason being that if infection gets into the main stem it is difficult to save the tree, or at any rate, a great part of it has to be cut down. This is a point which should, I think, be carefully considered in young orchards. Personally I am not in favor of continuing the single leader system with pears.

I do not wish to minimize the necessity of taking every precaution as regards Fire Blight, but I think every precaution should be taken to correctly diagnose any suspected outbreak. There is a tendency when a disease like this is about to label every likely looking diseased branch as Fire Blight. In the same way it has been customary in the past to put down every sickly symptom in a tree to winter kill or physiological conditions. I have known a good many instances of such a wrong diagnosis and I would like to instance the wilt in the blossoms and leaves of fruit this year, which many people ascribe to Fire Blight, a view which I strenuously opposed, and which I believe had nothing to do with it.

My humble opinion is that fruit growers in this Valley need not be unduly alarmed over Fire Blight, provided the Government continue, as I believe they will, to carry into force the most stringent regulations for the control of the disease. The low atmospheric humidity in this part of the country is a most valuable aid in effectively controlling the disease, and if united action is taken at once there seems to be no reason why it should not be controlled, if not entirely eradicated.

I will not dwell on the question of the quarantine regulations as I do not know what is proposed, but I think that the owner of any orchard where Fire Blight occurs should be put under the strictest quarantine until he has carried out the government instructions. These instructions, however, must be reasonable, and it is useless to order wholesale spraying of orchards without rhyme or reason; to control leaf hoppers, for example, which no method of spraying will affect, as far as I know. The government should also make certain when spraying is enforced that spray material can be obtained in the country. Such was not the case last year. It is to the benefit of every earnest fruit grower to support the government in every possible way in the control of insect and fungus diseases, and would suggest that it would be to the advantage of every district to have a small Vigilance Committee to report to, and co-operate with the government on any matters concerning insect and fungous disease control. It is impossible for the local government inspectors to visit all orchards in their district as often as they should, and the Vigilance Committee might be of great assistance to them in carrying out their work.

I hope the fruit growers of Summerland will take the lead with a progressive policy, and after all, it is needs not words that are required at the present time.

Wishing you all success in your campaign,

I am,
Yours truly,
LIONEL TAYLOR.

The man who is only as honest as he has to be is as dishonest as he can be.

Messrs. Donnison and Barr, two members of the British Associated Press Service who visited this district last week, were taken over the district by Mr. C. H. Cordy, the secretary of the Board of Trade, in his auto. They were given considerable information in addition to visiting the orchards and railway construction and other places of interest.

As soon as two cars of cans arrive for the cannery (and they will probably reach here to-night) everything will be in readiness for the canning of fruit by the Dominion Cannery. The factory looks very trim with machinery all in readiness, and tables and tanks fixed ready for operation. The old packing house is being used for making up cases, and the space there is being rapidly filled.

The Marking of Imported Fruit.

A Disability To Canadian Fruit Removed.

Under the Fruit Marks Act all Canadian shippers of fruits have been compelled to comply with its requirements. This British Columbia growers have faithfully and cheerfully done, though imported products coming in direct competition with Canadian grown fruit was allowed to be sold without hindrance without in any way complying with the law. This situation created a condition of unfair competition which the Dominion Government has previously recognized, but failed to remove.

The B.C. Fruit Growers' Association, last January, passed a strong resolution citing the injustice and unfairness under which our industry was laboring, and asking the Dominion to formulate regulations, making it incumbent on foreign shippers to comply with our Fruit Marks Act before the packages were allowed in Canada. The matter was placed before the Dominion Government. The Honorable Martin Burrill, Minister of Agriculture, met them in a most helpful spirit, and gave all possible assistance; he fully recognized the injustice in the Fruit Marks Act and had legislation prepared to remedy it. Despite the crowded and contentious character of the session, and some opposition, the bill was passed.

Under the Bill regulations were made, published, and given the force of the law.

In these Regulations it is provided that:

"Importer" means the person, firm or corporation in Canada to whom fruit from outside of Canada is sold, shipped, consigned or delivered.

"Fruit" means apples, crab apples, pears, plums and peaches when shipped in closed packages.

Every importer of fruit, or his representative shall cause all grade marks found on closed packages containing imported fruit to be completely removed, erased or obliterated, when such grade marks are different to, or inconsistent with the marking or branding required by these Regulations.

Every importer of fruit, or his representative, shall cause all closed packages containing such imported fruit to be marked or branded in a plain and legible manner, in letters and figures not less than half an inch long, with the grade marks, name of the variety, and the importer's name and address.

The removal, erasure or obliteration of original grade marks or brands on closed packages containing imported fruit and re-marking or branding of said closed packages to conform with the provisions of The Inspection and Sale Act as required by these Regulations, shall be done at the time when the said packages are being taken from the railway car, steamship or other conveyance in which they have been brought into Canada.

The marks or brands specified in the Regulations shall be placed on the end of the packages.

The Association has just received a letter from Mr. J. A. Ruddle, Dairy and Cold Storage Commissioner, who is charged with the enforcement of the Marks Act, saying that a circular is in the hands of the printers for distribution which makes public the Provisions of the law, which must now be obeyed by the importer under penalties.

It should be a matter of congratulation to British Columbia fruit growers that this unfairness has been removed.

The change will assist materially in securing for our fruit a market at a fair price. The success of the B.C. Fruit Growers' Association in this matter will be of benefit to all the fruit growers of Canada and should greatly encourage further improvement in conditions of the industry.

Fresh mint may be always at hand for cooking purposes by growing it at home in a glass of water.

The Government of British Columbia has established five poultry breeding stations throughout the province. They are: Bella Coola; Comox; Graham Island; Wilmer (Columbia River Valley); and Uchelot (on the west coast of Vancouver Island). Free settings of eggs have also been distributed in the Peace River districts.

Peachland Notes

On Friday, Miss Ethel House visited Penticton.

Miss Ikey Chapman was a visitor to Kelowna on Saturday.

Mesdames O. Keating and B. R. Brown were visitors to Kelowna on Friday.

John McDougald spent Sunday with his mother, Mrs. McDougald, of the Post Office.

Mrs. and Mrs. Jno. Gummow visited Kelowna on Wednesday returning the same evening.

Mrs. D. Kirkby, of Penticton, visited her parents, Mr. and Mrs. John McLaughlin last week.

The junior baseball boys were defeated by the Boy Scouts at Crescent Beach on Wednesday last by one run.

Mrs. Kincaid and little daughter Maudie, spent the week-end with Mrs. A. D. Ferguson, returning to Kelowna on Tuesday.

Mr. Sibley, of Ashcroft, who took Mr. A. Clinton's place in the Northern Crown Bank while he was holidaying returned to his home last week.

On Thursday night Mr. A. E. McKenzie returned to town. He had visited Edmonton and Winnipeg, and purposes returning to the north land again soon.

Owing to the difficulties in securing entries, it was decided not to hold a Regatta here this year, but the War Canoe races will take place on Thursday, August 7th.

Mrs. R. J. Hogg, who has spent three months visiting friends in Winnipeg and Toronto, and many other places in Manitoba and Ontario, returned home on Saturday night much benefitted by her trip.

Mr. and Mrs. George Lang and little son Patrick, passed down the lake to Summerland on Thursday evening. They were accompanied this far by Miss Molly Lang, who will stay with friends here for a month or so.

Mr. R. Forsyth, who goes to Summerland next term, was successful in having both his matriculation candidates pass, Miss Rilla Robinson, who wrote in Vancouver, and Miss Olive Gummow who wrote in Penticton. Mr. Forsyth left on Friday morning to spend a holiday in Vancouver.

On Friday afternoon Mrs. R. C. Lipsett of Summerland, met the ladies of Peachland in the Reading Room and told them of the work of the Women's Institute. Much interest was shown by those present, who decided that it would be to the advantage of all citizens if they were to organize. Accordingly the preliminary steps were taken, and a provisional directorate elected, consisting of: President, Mrs. G. Kellogg Mitchell; Secretary-Treasurer, Mrs. J. B. Robinson; Vice-Presidents, Mrs. A. C. Clarence and Mrs. Town. A hearty vote of thanks was given Mrs. Lipsett for her interesting and instructive talk. The meeting then adjourned. Mrs. Lipsett returned to Summerland in the evening.

Naramata Notes.

Miss Crawford spent the week-end with friends in Penticton.

Mr. Norman Mitchell is again a Naramataite, and doing teaming for Mr. H. W. Endacott.

Mrs. Dean Walters, Mrs. Kennison, and Mr. J. H. Wells made the trip to Summerland on Wednesday.

Some very striking posters are now on duty at the various vantage points of town advertising the Unity Club Concert of August 8th.

Mr. and Mrs. J. H. Wells entertained for the week-end Mr. and Mrs. V. L. Watson, Mrs. Alexander and son, and Messrs. Morgan, Van Slight, and Birk, all of Residency 3.

Miss Alma Price and her school friend, Miss Armstrong, from Calgary, will spend their vacation in Naramata with Miss Price's grand parents, Mr. and Mrs. James Wells.

A party from Summerland to the number of about forty spent Wednesday evening in Naramata, taking dinner at Hotel Naramata with an enjoyable dancing party in the hall following.

The first shipments of tomatoes were made this week from the packing house. At the beginning of next week Mr. Hole expects to be kept busy handling the first of the peaches and apricots. He wishes to request the growers to pick the fruit quite firm, as some over-ripe fruit has already been brought in for shipment.

During the rough weather on Monday afternoon a party was out in the launch "Naramata," and much anxiety was felt by onlookers and perhaps by the party itself, when the engines refused to go, and the boat did some dangerous rolling and tumbling. The "Skookum" was sent to their relief and towed them safely to the landing.

Mr. Hamilton Lang, of Vernon, the government Roads Superintendent, together with Mr. W. A. Lang, of Peachland, motored with a party from Penticton on Tuesday, and accompanied by our local road commissioner, Mr. Wm. Nuttall, made a trip of inspection around the newly improved roads in this vicinity.

The many friends of Miss Adelaide Hayward are sorry to hear of her intention to leave for Vancouver by the first of next week. Miss Hayward will take up a business course in that city and subsequently a position there. All this seems to mean an absence of some length which is much regretted, especially by the young people among whom she has been so popular.

The latest acquisition of the Okanagan Lake Boat Co., the former Conner's launch of Penticton, has been re-christened the "Rowena." It is the company's idea to put this boat into commission at Penticton and station Mr. Gerald Roe at that place to look after their interests there. The "Rowena" is conceded to be the finest appointed launch on the lake, and probably the most sea-worthy, as well as being commodious enough to accommodate a goodly number of passengers. In all, it is just the boat for the purposes that the management intends to put it, that of catering to pleasure excursions. This enlargement of the company's transportation force is another indication of the progress they have made in return for the very prompt and efficient service they have given the public from the first.

The management of the Lakeside Hotel, which has been in the hands of Messrs. Gerald and Fred Roe for the past year, will change hands on September first. The Roe brothers now have the work of clearing the Watson lots opposite the end of the dock well under way. They will there erect a medium sized building for a hotel which is to be first-class in every respect and with very reasonable rates. The dimensions of the building will be 60 by 40 feet. It will comprise a nicely equipped dining-room, good kitchen accommodation, large office and pool-room, and twelve sleeping apartments, also the office and waiting-room of the Okanagan Lake Boat Company will be situated in this building. The former bunkhouse belonging to the Messrs. Roe has been recently renovated and improved until it presents a very neat appearance. This will be used as an annex to the new hotel. The whole establishment will be very nicely furnished, and with good service and all conveniences provided its guests, we may be sure of a medium rate hotel which will be a credit to the town, and a management that is right.

Includes a contest announcement: 'WOULD YOU LIKE THIS BEAUTIFUL PIANO AS A PRESENT? WE SHALL POSITIVELY GIVE IT TO SOME ONE OF OUR CUSTOMERS.' Lists 12 rules of the contest.

Last Saturday night a dance was given in Naramata Hall that has been voted the most enjoyable evening spent here for some time. The hosts of the evening were Messrs. Harmount, Backer and Eckstrom of the Grant Smith Construction Company, and the guests of honor was a party of sixteen from Kelowna. These, together with the young people about town and a large number of office men from the near-by construction camps and roadhouses, made a jolly crowd numbering nearly eighty. The night was invariably cool, the music splendid, and the spirit of a Good Time was felt throughout the whole evening. As a benefit dance for the Unity Club, to be held the night previous at the home of Mrs. T.H. Booth, was postponed in order to more thoroughly enjoy the dance of Saturday the hosts very kindly merged the two affairs in one, and the collection taken up was generous, far beyond the hopes of the Club. Later, refreshments, equally as generous and acceptable, were served in the Intermision between dancing. The time for going home came all too soon. The party from Kelowna, arranged by Messrs. Simons and Rounds of that place, was comprised of office men and contractors for the Grant Smith Co., together with several lady friends. They made the trip in the Kelowna ferry, returning on Sunday night, after a day's visit to the camp of Backer & Harmount, where they very thoroughly enjoyed a good dinner and a trip through the works at the big tunnel. Their Naramata friends making this a week-end they say they will not soon forget.

SUMMERLAND, B.C., AUGUST 8, 1913.

Whole No. 262

School Trustees.

Slimly Attended Meeting, and Little Business. Prin. Mott Meets Board.

The regular monthly meeting of the Trustees, held in the Council rooms on Monday, was neither very lengthy nor important. Only three of the Board were present beside the Secretary, Trustees Docking and Caldwell being absent.

Immediately after reading the minutes the detailed report from the Educational Department of the results of the entrance examinations was placed before the Board. These figures were not considered very satisfactory. Out of a possible 1100 marks 750 was the highest score, and of 22 examined only 11 got 550 (the necessary 50 per cent.) or more.

The new Principal of the Central School, Mr. Mott, was present by request to meet the members of the Board. All the members are satisfied that they have made wise selections both in the new principal and assistants, and are anticipating a marked improvement in the schools.

The attention of the Board was called to the fact that the children's gardens and the ornamental trees at the Town School are suffering for lack of water, the stand-pipe having been removed some months ago.

Trustee McIntyre and Secretary Logie was requested to have everything in order at Garnett Valley School preparatory to opening that department.

The following accounts were ordered paid:

Teachers' salaries	\$460.00
Janitor	32.00
Secretary	10.00
Water	9.00
Telegrams	2.70
G. R. Hookham	.50
Summerland Supply Co.	4.60
Total	\$512.80

Whose Will It Be?

Considerable interest is beginning to be manifested in the Piano Contest put on by the Summerland Drug Company. Following is the number and standing of contestants up to Wednesday evening last:

No.	Votes Cast.
2	2,000
5	2,000
6	2,000
7	2,000
8	2,000
9	2,000
11	2,000
14	14,105
15	2,000
17	2,000
18	2,000
19	2,000
20	2,000
21	2,000
22	7,000
23	2,000
24	2,000
25	2,000
26	12,745
27	17,540
28	9,270
33	2,000
34	7,460
35	2,000
36	2,000
39	2,000
44	2,000
49	10,895
62	7,195
63	2,000
64	12,595
65	8,605

There was at first a disposition on the part of some to be discouraged because one or two were recording quite a number of votes. Any one contestant as yet stands as good a chance to win as another. To capture the piano one needs to get their friends busy, and with themselves hustling for votes. There is ample time and opportunity during the coming weeks for each and every one, and all contestants are as yet practically on an equal basis.

By an arrangement with the Drug Company the Revlow will participate in this big publicity scheme, and is prepared to issue a liberal quantity of votes for new or renewal subscriptions, as well as for advertising and job printing. Somebody is going to get this piano. It is yours for the effort. Get in the campaign early, it has as yet scarcely begun.

Next Week's Show.

Next Friday is the day for which the ladies of the Women's Institute have been long making preparation, and everything points to a most successful exhibition of Flowers, Fruits, Fancy Work and Cookings. It is urged upon all who possibly can do so to make entries in as many of the classes as possible. One can never tell who may win a prize, and beside volume of display as well as quality is essential to success. Make your entries as early as possible. It is desirable that all entries be in by the 13th or 14th. The secretary will gladly furnish prize lists and entry forms to any not already supplied.

Summerland Musical Society.

The Summerland Musical Society has now made almost complete arrangements for the coming winter season. An executive meeting was held on Wednesday evening, and definite plans were formulated.

It is requested that all who intend associating themselves with the society this winter will hand in their names to the secretary, Mr. T. G. Beavia. The music is expected to arrive this coming week, and it is desirable that as early a start as possible be made with the rehearsals. To this end it is the desire of the secretary to gather the names of all who will be participating.

Mr. Dan Williams will have the musical directorship, and the stage management will be in the hands of Mr. Wm. Sauter. No pains will be spared to make the presentation of "The Yeomen of the Guard" even more successful than "The Mikado," which was taken up last winter.

The membership fee will be as last year, one dollar, and members are expected to provide their own music.

Teamster Hurt.

One of Messrs. Carlson & Co.'s teamsters employed in hauling lumber from the Garnett Valley Sawmill, met with a painful accident this morning, which, however, is not likely to have serious results. Several teams had loaded at the mill, and about 10.30 were pulling out when one of the drivers, sitting on a spring board device which he had fitted up as a seat, was thrown forward, and in front of the wheels. The loaded truck passed over him, but fortunately the wagon at that time was being drawn over a saw-dust road.

Immediately the accident occurred Mr. Wheeler, the manager of the mill, hitched up his rig and brought the injured man to the hospital.

By enquiry at the hospital it was learned that while no bones were broken the man was badly bruised on one side; his shoulder, arm, and side being badly crushed.

New Store Opened.

Mr. J. E. Phinney threw open the doors of his new store to the public on Tuesday. On page 5 of this number of the Revlow his advertisement will be found. This advertisement intimates something of the line of the policy that will be adopted by Mr. Phinney.

The store has been thoroughly renovated, the interior having been given a coat of paint, and new shelving and counters installed. Fixtures and everything are new and up-to-date. The stock has been carefully selected and everything being so fresh and now gives a very pleasing and inviting appearance to the store.

When questioned as to his prices and treatment of credit accounts Mr. Phinney said that he must adhere strictly to the thirty day settlement, and since he purposes doing this he has marked his prices lower than those usually quoted, as he makes no provision for robbing the usual 5 per cent. for monthly settlements. Mr. Phinney stated further that for cash over the counter he would, for a time at least, offer a 10 per cent. discount off the marked nett prices.

The Queen Mingling With English Working Women.

SHE IS TAKING THE DEEPEST PERSONAL INTEREST IN THE WORKING CONDITIONS OF HER SEX AMONG TOILERS.

Queen Mary of England, taking with factory women at Bury. During her recent tour through England with the King and Prince Albert, the Queen has evinced great interest in the working conditions of her countrywomen.

To Help The Pre-emptor

Provincial Government Plan to Give Irrigation Facilities

Another evidence of the interest the Provincial Government is taking in the welfare of the rural agriculturist of the Okanagan is clearly manifested in the visit to Summerland this week of Mr. Herman W. Grunsky, an official of the Water Rights Branch, Department of Lands, Victoria. Mr. Grunsky arrived on Wednesday evening's boat and went out on Thursday evening. His mission was the deepest concern to all who are interested in the development of outlying districts for agricultural purposes.

The great work the government is now undertaking is the conservation and distribution of water to the pre-emption land lying to the west of Summerland. Genuine efforts are being made to make the large tracts of land now uncultivated attractive to settlers.

To this end the topographical survey now working in this section was sent out. From the report of this survey a reliable estimate of the amount of arable land will be available and also the facilities that can be employed for irrigation purposes. Mr. Grunsky was driven over some of the district to the west on Thursday morning and in the afternoon met as many citizens as could be gathered together on a hurried call sent out by Mr. R. H. English. Before them was laid the desire of the authorities to give this district all reasonable benefits that might assist the bona-fide settler. Mr. Grunsky pointed out

that while the activities planned are primarily for the development of the unorganized districts, the larger rural centres would undoubtedly feel the impetus of the movement.

Many pre-emptions in this district are of little value on account of the inability to secure water for irrigation. This deficiency the government is now working to overcome. Conditions here are such that Mr. Grunsky believes immediate steps should be taken to this end he will make endeavors to have higher officials come in order that they may see the crying need of the district for more water.

A plan, briefly outlined, was the formation of the outlying land-holders into a water company, which would be directly responsible to the government, by whom all surveys and distribution work would be undertaken.

Few people realize the acreage adjacent to Summerland that could be put under the plow profitably if water was available. Much has been said of the agricultural paradox into which this province has been forced by the meteoric development of the city sections, which necessitates the importation of much agricultural produce that could be raised in the interior. Any effort made with the end in view of making British Columbia a self-sustaining and self-contained province is commendable, and the Provincial Government officials will have all the local assistance that can be given them.

Noxious Weeds.

Mr. M. V. Allen of Vernon, Principal Forest Ranger and Noxious Weed Inspector, paid a visit to Summerland and district this week. All Provincial Game Wardens, Fire Wardens and Constables, as well as Forest Rangers, are noxious weed inspectors, and it is the evident intention of the government to enforce the Noxious Weed Act.

Recently Municipal Constable Graham was sworn in as local inspector. He expects to receive instructions at once to inspect the district, notifying all those on whose property weeds are found to destroy same under penalty of fine. It is understood that property owners are responsible for the removal of weeds on streets and roads adjoining their property.

Fire at Naramata.

At an early hour this morning (Friday) fire destroyed the home of Mr. Robt. Reid, Naramata. Only meagre particulars are yet available, but it appears that Mr. Reid was hunting a bush rat in his kitchen with a stick by the light of a lamp. In some way the lamp was broken and the kitchen was soon ablaze, and later the fire spread to the whole house. Little could be done to save either the building or its contents. It is but a short time ago that the home of Mr. Howard Rounds was destroyed similarly. Mr. Reid built his house only last summer.

L. C. Woodworth received a carload of cattle on Wednesday evening of this week.

Always Talking Okanagan.

Mr. J. M. Robinson, who for some months has been a resident of London, Eng., has of course been talking Okanagan.

One of his latest to come to our attention is an interview given "The Canadian Gazette." This, with two illustrations, one a photograph of Mr. Robinson, the other a view of Mr. Hancock's residence, Naramata, covers one whole page of the Gazette of July 10th.

Much of the interview is taken up with a history of the early development of the Okanagan and its marvellous transformation from a cattle country to a valley of orchards occupied by thousands of people. Given such wide publicity as it will be in the Gazette, which has a large circulation, particularly among people of the old land who are looking towards Canada, Mr. Robinson's story will be valuable publicity for Peachland, Summerland and Naramata with which it principally deals.

Dominion Cannery Ltd. Buy Vernon Cannery

The Dominion Cannery Ltd., are now the proprietors of the cannery at Vernon, which was taken over by them the first of this week. Some months ago an effort was made to buy the plant, but though negotiations were carried on for some time the deal fell through, and until recently no more was heard of it. The arrival here in the latter part of July of one of the directors was evidently taken advantage of to reopen negotiations. Mr. Leitch, the company's Okanagan Manager, informed the Review yesterday that his company were now in possession, and that the cannery, which is now packing beans, would be closed in a few days for a general overhauling and the installing of more machinery. Everything will be in readiness for the handling of the tomato crop.

Mr. Eric Agur has accepted the superintendency of the canning factory here for the Dominion Cannery, and assumed office on Monday morning.

Actual canning operations at the wharf commenced this morning (Friday) and apricots are now being canned in quantities. There is not much call for this fruit, and operations will be limited accordingly. The Oriental labor will not be employed until the need arises. A present seven men and boys are handling all that is called for.

Breaking The Game Law

For some time it has been suspected that illegal shooting of game was being practised in the hills back of Summerland, as well as along the right-of-way above Naramata. A few days ago evidence was placed before Deputy Game Warden Sullivan, who upon further investigation accused three men employed on railway construction of shooting grouse and deer out of season. One of these was brought before Magistrate English and fined, the other two will be tried before the magistrates at Penticton. The Deputy Game Warden at Naramata has also secured some convictions within the last few days.

Mr. Carmichael, manager of the Canadian Bank of Commerce, Keremeos, arrived in town on Thursday by auto.

Uncertainty Regarding New Trackage

It now seems not at all certain whether the additional C.P.R. trackage for fruit car storage will be laid across the road at the wharf, opposite the Fruit Union building, as was announced last week. It was expected that the work would have been commenced before this. In any case, the fact that the level of the road at the entrance to the wharf has been raised considerably by a liberal shaling must add considerably to the labor laying the trackage would entail. It is well known that the scheme was not unanimously endorsed by the people of Summerland. To those who realize the advantage of having adequate car storage at the height of the fruit season, the intelligence that this desirable state of affairs may not come at once, will cause disappointment. The Council as a whole approved, and it will be to the decided detriment of all the best local interests if the C.P.R. are not given to understand that their efforts to meet the unusual situation the fruit season creates are appreciated, and that no obstacles will be placed in the way.

A gang of C.P.R. section men came in at the beginning of the week, in charge of the divisional road superintendent, and spent several days remedying faulty trackage at the wharf. Much trouble has been experienced in the past at the switch, where cars have frequently been derailed, necessitating much extra labor. This has now been put right.

One Day Late.

Four young people, who drove down from Peachland to visit friends here last Sunday were not able to return on schedule time. One of the young men, after delivering the rest of the party, drove up to West Summerland, and upon his return, met with an accident in which the horses ran away, leaving the two-seated buggy piled upon the roadside. The horses were soon caught and repairs were made. However, the two young couples were not destined to reach Peachland that night. Some little distance out from Summerland, having started for home early that evening, the wheels in some unexplained way went from under the buggy, and the party was forced to walk back to town, some of them at least putting up with friends for the night. The homeward journey was made on Monday after further repairs to the buggy.

Fatal Fire at Revelstoke.

Revelstoke, Aug. 5.—In a fire which consumed the old City Hotel, a land mark here, three persons were burned to death last night.

The dead: Thomas Sanford, two unidentified.

The city chain gang is working on the debris of the ruins this afternoon and it is feared that the death toll may amount to five or six victims before a final count. There were sixty lodgers in the house at the time of the fire and were forced to flee for their lives.

J. D. Kay, Provincial Government boiler inspector, was in town at the beginning of the week on inspection business. A hull inspector was with him, and examination was made of all the local craft doing public business.

COUPON

Cut out this Coupon, and present it at The Drug Store, and they will exchange it for 100 Votes in the \$400 Piano Contest.

Advertising Rates:

LEGAL NOTICES.—Twelve Cents per line for the first insertion; Eight Cents per line for each subsequent insertion.

LAND NOTICES.—\$7.00 for 60 days, \$5.00 for 30 days.

WATER NOTICES.—30 days, 150 words and under, \$8.00; each additional 50 words, \$1.00.

THEATRICAL, ETC.—50c. per inch for first insertion, and 25c per inch each subsequent insertion.

LOCAL NOTICES or Readers, Immediately following regular locale, 20c per counted line; 10c per line each subsequent insertion. Half these rates when accompanying display advertisements.

LODGE NOTICES, Etc., 25c. per week, per column inch.

FOR SALE Advertisements, Etc., 3c. per word first week; 1c. per word each subsequent week.

Transient Advertisements payable in advance.

Rates for Contract Advertisements furnished on application.

Copy for change of contract advertising must be in the hands of the printer not later than Wednesday noon to insure publication in the next issue.

In accordance with schedule of prices adopted throughout the valley, charges for advertising are now being made weekly. Heretofore when five issues were made in one month the result was a loss. By the new method customers are charged each week for just the amount of space used.

FRIDAY, AUGUST 8, 1913.

VALUE OF FRUIT INSPECTION.

BUT FEW of our orchardists realize the constant vigilance of the Fruit Inspection Department and the protection this vigilance affords. From time to time reports are seen in the press of some of the work that is being done principally at Vancouver. Vancouver is, of course, the most important port, but there are twenty-one other ports of entry with quarantine officers stationed at each. On Thursday of last week Chief Inspector Cunningham, now in Summerland, received a telegram advising him of what has been done in Vancouver during the last few days. One hundred and twenty-four packages of plums, sixty-eight of peaches and four hundred and sixty-three pears, all made up of small shipments were condemned and destroyed, and on Saturday last a whole carload of mixed fruit containing two hundred and fifty pears, fourteen apples, one hundred and seventy-three plums and three hundred peaches were condemned, as well as a carload of Sacramento tomatoes containing one thousand, three hundred and two boxes. Had this infected fruit been permitted to enter the usual channels of distribution disease would soon become spread broadcast throughout the province. This constant watch is maintained throughout the year.

BOOSTING OKANAGAN FRUIT.

THE PROGRESS CLUB of Vancouver has undertaken a very commendable task with the object of assisting one of the province's chief industries. We refer to the recently announced intention of the Club to encourage householders to await the arrival on the market of British Columbia fruits before doing their canning. The fact that the Coast market is usually well supplied with southern fruits which mature a week or two earlier than our own, has usually resulted in the purchase of the foreign article for canning purposes, and when the British Columbia fruit is offered a few days later it finds an already satisfied market. To acquaint the consumer with the fact that the home product is better and that the supply, though later, is dependable, is a good work for such an organization as the Progress Club to undertake.

It is not always to the best interests of the jobber that this plan be adopted. Evidently one or more fruit merchants, seemingly more interested in selling the imported fruit than the home grown product, has gotten in more free advertising. In the "Province" under date of August 1st, there is a bold headline reading,

"PRESERVING PEACHES ARE NEARING FLOOD."

Below this is the advice "People who are thinking of preserving any peaches this year had better not delay too long in placing their orders, because the flood is approaching." As a matter of fact, British Columbia peaches are just beginning to appear on the market. Only the early table peaches are yet being shipped, and it will be some days yet before the later varieties which are those usually canned will be ready for picking. The Province is doubtless ignorant of the fact that it is assisting the foreign fruit grower to the injury of our own orchardists.

AN EXPERT in financial matters in Montreal who is said to be an authority on the question says that \$300,000,000 has come into the Dominion in the last few months through the exports of grain and through immigration. In addition the sale of securities, municipal, railway and industrial, have added largely to the amount, so that in his opinion, if the money stringency has not already been relieved it will be in a very short time. All the indications point to the easing of the money market in Canada.

MOOSE JAW DEBENTURES.

(By Canadian Press)

Moose Jaw, Sask., July 29.—The City Council has passed a resolution unanimously condemning a local paper, "The Evening Times," for its front page editorial on the financial conditions of the city.

In part the resolution reads as follows: "That this Council desires to place on record its strong disapproval on the article published recently, owing to its gross misstatements of local conditions, wherein the credit of the city and its business men is impugned, and that a copy of this resolution be forwarded to the Board of Trade with request that support be given this motion with a view to restoring confidence in the city which has been seriously impaired by the publication aforesaid."

Moose Jaw, Sask., July 20.—Mayor Pascoe emphatically denies the report published in a local paper announcing that the city's bankers have refused to accept cheques drawn by the city. "Any inconvenience that has been experienced in connection with the city's financial arrangements has been caused by our inability to dispose of the city's debentures," said the Mayor.

WAIT FOR OKANAGAN FRUIT.

A letter was received this morning by the Progress Club from the Okanagan United Growers, with headquarters in Vernon, thanking the club for its efforts to get Vancouver housewives to order British Columbia fruit for preserving and table use. This association states that it is making all arrangements to have a steady supply of Okanagan fruit for the Vancouver market during the fruit season.—Province.

Further letters of commendation for the Progress Club's stand in regard to the use of British Columbia fruit by Vancouver housewives are received daily. This morning the British Columbia Fruit Growers' Association wrote to the club thanking it for its stand and promising that Vancouver would get the best fruit that the Okanagan produces.—Province Aug. 5.

BIRTHS.

WILKINSON—At the Summerland Hospital, on Wednesday, August 6th, to the wife of Mr. C. Wilkinson of Naramata, a son.

In & About Summerland - Five Years Ago

Gleanings From First Copy of "Review."

The Review is now entering upon its sixth year of publication. Exactly five years ago to-day, August 8th, 1908, the first number of the Summerland Review was published. The five years intervening have been eventful years in the life of our infant community. Believing that it will be of interest to our readers we purpose publishing weekly a number of condensed news items taken from the corresponding number five years previously.

Page 1, No. 1, Vol. 1 deals with the beginning of things in Summerland, which at that time was but six years old. The first early resident mentioned is Mr. James Gartrell who, with his wife and family of small children, came over the mountain trail from Sprague, Wash., and pitched his tent on the point of wooded bottom land, now known as Trout Creek Point, and where Mr. Gartrell still resides. The nearest white neighbors were the Ellis family, ten miles to the south. The Garnett's and the Dunsdon's, George Barkley, and Lloyd Jones are the first settlers mentioned, following Mr. Gartrell.

Dunc. Woods had, by the time the latter citizen arrived, appropriated half of Trout Creek point.

Before the first number of the Review appeared Okanagan College was a reality, having been set on the hill before the orchards had begun to yield. Even in those early days electric light and domestic water service were available.

Other items gleaned from our first number are:

Rev. A. T. Robinson, Editor of the Missionary Arena, returned from the Coast on Monday.

E. O. James of Calgary has purchased ten acres in Peach Valley and intends to open a tailor shop in town. He expects to arrive with his family next week.

Mrs. Robt. McIntyre, sen., of Revelstoke, is visiting her son at the Methodist Parsonage.

The C.P.R. has erected a new freight shed and express office on the wharf. Mr. George Röss has been appointed agent.

Mr. J. C. Robson, our new teacher in the public school who is taking Miss Smith's place, has arrived. Mrs. and Miss Robson will arrive shortly.

The Summerland Brass Band gave an open air concert in the band stand Saturday evening.

An application form asking for a Post Office at the store on Siwash Flat has been largely signed by the residents of that section.

Summerland volunteer fire brigade made the first run of the season. A brush fire was soon extinguished under the direction of Chief Watson.

Among others receiving personal mention are Mrs. L. H. McDowell of Hotel Summerland, Mrs. W. J. Lawrence, Mrs. Ireland and daughter, Miss A. E. Mason of Webster City, Iowa, as the guest of her sister Mrs. G. D. Ross, and Miss Alice Furse as the guest of Mrs. E. I. Scott.

Dr. and Mrs. R. C. Lipsett of Naramata stopped off at Peachland returning from a two month's trip from points on the prairies.

Some business names not now appearing in the Review, but which were found in the first number are:

Gartrell & Burch, proprietors of the Summerland Meat Market; H. C. Mellor, carpenter and builder; E. I. Scott, watchmaker and optician; T. F. Guy, barber, who bought out Mr. Oakland; E. A. Eagel, grocer; Wesley A. Peters, architect; Armit & Steenson, bakery and lunch room; Misses Eedy & McIntyre, millinery and dressmaking; F. C. Lever, photographer; A. B. Elliott announces that he will begin business with a full general store in the building recently occupied by Mr. Steel, corner of Shaughnessy Ave. and Fourteenth St.

W. H. MALLETT BUYS COAST JEWELRY STORE.

Mr. W. H. Mallett, who owns an orchard here, and is well known to many of our citizens, moved from Brandon to Vancouver last fall. The following, which appears in a Vancouver city daily, will be read by his local friends with interest:

"A deal was consummated yesterday whereby Mr. W. H. Mallett, until recently of Brandon, Man., completed arrangements to purchase the business of Mr. A. F. McMillan, jeweller, 566 Granville Street. Mr. Mallett was for thirty years a resident of Brandon, and until a few months ago had conducted a jewelry store there for eighteen years continuously. He is known to the jewelry trade both in the East and the West, and intends making Vancouver his home for the future. Included in the deal is the ten-year lease held by Mr. McMillan on the premises now occupied by him on

Granville Street. As soon as the details attending the transfer of the stock have been concluded Mr. McMillan will leave on a trip abroad."

RIFLE ASSOCIATION.

The first stage of the Price Ellison Cup was shot on Saturday, the weather conditions being ideal during the first part, but the storm reduced the scoring at the last distance.

Distances	300	500	600	Total
H.P.S.	35	35	35	105
H. Dunsdon	81	83	82	96
J. Dunsdon	28	34	30	92

Next Week is Flower Show

Fruits, Flowers & Fancy Work

The second ANNUAL SHOW, under auspices of Women's Institute, will be held in ...

Empire Hall - Friday, August 15th (GROUND FLOOR) AFTERNOON AND EVENING.

Refreshments on Sale

Make your Entries early. Upon individual effort depends the success of the Show.

Prize Lists and Entry Forms may be had from the Secretary, MRS. GEO. ANDERSON, Peach Orchard. - Phone Pink 4.

Admission Free - Everybody Come

I WANT ten or twelve men to work on our Irrigation System and other development in our RED APPLE VALLEY proposition.

TO SUCH MEN I have a bang-up proposition, and if you want to get a fair square start on your own account, you want to get in and see me quick.

I WANT WORKERS, and no others need waste their time coming.

T. E. CLAY, Manager - Okanagan Realty Co., Ltd.

GROCERY

Wanted!

One Thousand Men & Women

to take advantage of the CASH Reduction Sale at my Stores for the next two weeks, Aug. 2nd to 16th. A sample of the prices:

100-lbs. SUGAR - \$6.25

100-lbs. FLOUR, any kind \$3.50

Everything on same basis. Now is the time to lay in a supply.

Cash will be King - Profits forgotten

A. B. ELLIOTT

HARDWARE

We have a selection of the choicest

RESIDENTIAL LOTS and ACREAGE

In the district, including 1-acre lots in HILLPARK GARDENS

the nearest sub-division to the railroad.

PRICE

the lowest and terms the easiest, cash payment being as low as

Our Pre-Cooling Experiment

Some Requests for Co-operation by the Growers - Good Advice on Picking.

In the pre-cooling plant which is now receiving its finishing touches, Summerland has the only plant of its kind in Canada. The experiment is different from any that I have ever known to have taken place in North America in that three factors are co-operating to carry it out, viz., the government, the transportation company, and the growers. We must bear in mind that it is an exceptionally generous government that has furnished the funds whereby the plant has been realized, for in the United States, where pre-cooling has been experimented with for some time, the government furnishes only the designs, and the growers, through their associations, install their own plants. The C.P.R. so far has given every concession that I have asked of them, and not only has given us a free hand to alter their warehouse as was necessary, but has also generously promised all the ice that we shall need for experimental purposes this year to be furnished from their stores at Okanagan Landing, as we order it. It remains only for the growers to furnish the fruit and handle it properly in taking part in this triad co-operative experiment, and in a brief way I hope to point out how this may be done.

The shipping system on the C.P.R. is this year to be changed considerably. Instead of having the barge with loaded cars leave Summerland in the early morning as has been the custom in the past, the railroad officials expect to have it leave in the evening. By this system we will be allowed to cool the fruit during the night, while we have electric power to do it with. The cars will be loaded under ice the following morning or forenoon, and the pre-cooling rooms made empty for the days pack, which, in turn, will be chilled in the evening.

This may seem very far away from the operations of the grower, but it is not, for it remains for the grower to pick and handle his fruit so that his methods will work into this schedule to the ADVANTAGE OF THE FRUIT. It has been quite a common practice in the past to bring in the day's pick in the late afternoon, very near six o'clock. This is a bad practice. Most of the fruit brought in at this time has been picked in the middle of the day, and has stored up in it a large amount of latent heat. It is impossible for the packers to get that fruit packed up that night so as to get it in the pre-cooling rooms where the heat may be removed, so it remains in the hot warehouse and fairly cooks till the next day.

In this connection I have some interesting records. By placing thermographs in your peach trees here in Summerland I have taken weekly records of the changes in temperature in your orchards in different parts of the district. I find that temperatures in the middle of the day range around 100 degrees F., while the records that I have before me show that the night temperatures average about 62 degrees F.

In the warehouse the night temperature is about 82 degrees F. By technical study it has been well shown that the velocity of life changes increases two or more times with each raise of 18 degrees F. (van't Hoff & Arrhenius). Hence with a difference of 20 degrees or more between the night temperature of the packing house and that of the orchard the fruit is bound to RIPEN MORE THAN TWICE AS FAST IN THE HOT PACKING HOUSE THAN IN THE COOL NIGHT AIR OF THE ORCHARD, and so I think it should be clear that the only reasonable method to follow is to LEAVE OUR FRUIT IN THE ORCHARD TILL MORNING, when it can be brought into the packing-house in a cool condition, packed and placed promptly in the pre-cooling rooms. Where two hauls per day are made to the packing-house, one should be made early in the morning, and the other just before or after the noon hour, the latter haul bringing in the fruit picked during the forenoon, with no hauls in the late afternoon, unless the fruit is packed and ready to be chilled.

Another point that needs clearing up is about the degree of ripeness at which our peaches may be picked, providing we pre-cool them, as many seem to think this will allow us to pick our fruit ripe. To this I would say that I know of very few, if any, regions in North America where peaches are successfully picked for market when ripe, and I cannot see how we are to be an exception to this rule, even though we do have a pre-cooling plant, when we are 500 to 1000 miles from our markets. Prompt cooling should make a considerable difference in the degree of maturity at which the fruit may be picked, but this can only be determined by careful experiments, some of which I hope to carry out this season. Consequently, I would warn the growers that we cannot expect to ship ripe fruit, and that we should be more strict than ever in making our pickings, so that the fruit does not get ahead of us.

Pre-cooling will never save us from the results of any faulty methods. The best peach-shipping regions co-operate so that but 12 hours elapse from the time the peaches are picked till they are on the road under ice. These regions do not pre-cool their fruit, and still market it in the best of shape. Summerland has never handled her fruit under such a system, but I think that the district is capable of having the best methods in the handling of its fruit, and with a pre-cooling plant to help us WE WILL EMPLOY THE BEST METHODS, from the time our fruit leaves the tree till it leaves our hands in a cold and long-carrying condition, for unless our methods are the best our provincially and perhaps nationally-watched attempt at pre-cooling fruit will be futile, and we cannot afford to allow such results.

RAINCOCK TOO SHARP FOR CHIEF OF POLICE

(Pentleton Herald).

Bargain hunters who attended the recent sale of the J. Raincock estate, and bought articles at dirt prices, creditors of the defunct firm who lived in anticipation of receiving a few cents on the dollar, the chief of police, the municipal council, and sundry persons interested from curiosity are wondering where the stock and effects of Mr. Raincock, sold at the aforesaid public auction, have been spirited away to.

The above constitutes a mystery which threatens to rival the famous fiction dramas of Sherlock Holmes. In other words, people who bought stock at the public auction conducted by Chief Roche, and who at that time paid cash for their purchases, have, up to the present time, been unable to secure any of the articles bought, owing to the fact that same have gone hence. At the sale there did not appear to be anything ghost-like about the fixtures of Mr. Raincock's butcher shop. They appeared to be quite solid, and not at all endowed with the vanishing propensities of the tipping tables and gravity-defying implements used by Spiritualists, at least so the chief alleges. There was a well-defined and fearful odor

of meat that was old which clung faithfully about them—that was all. Now, however, the articles have gone, and with them the odor, which, in spite of its strength, is not sufficient to lead the sleuths who are working on the case, to the hiding place thereof. The alleged solution is this, that after selling the goods they were locked up securely in the store. At the time Mr. Raincock was stated to be in Spokane. He returned and in a surreptitious manner (presumably one dark and stormy night) removed all the articles.

The Chief of Police who discovered the loss is stated to have approached Mr. Raincock, and the following colloquy ensued:

Chief: "Faith, Raincock, the fixtures of your store are gone entirely."

Raincock: "Well, what of it? Were't they mine?"

Chief: "I should say not, man, I sold them at auction."

Raincock: "You did not notify me."

Chief: "!!!!!!?"

Raincock: "Well, I have sold them, and I have got the money for them, now, what are you going to do about it?"

Chief: "????!!!!!"

N.B.—When buying goods at public auction always take same home with you after purchasing.

Try Us a Week
Do you remember the old saying "The proof of the pudding is in the eating of it." It is so with our GROCERIES and service. Unless you try both you cannot know that they are the best you can get in this town: bought and planned to secure and keep your trade.

We know that a satisfied customer is the best advertisement we have. Try us a week. Send or come with your order, or phone 22 and a messenger will call for it. We are quoting:

SUGAR - - - 100-lb. \$6.75. 20-lb. Sack \$1.50
FLOUR, Robin Hood and Royal Household - \$2.00
BUTTER - - - - - 40c. lb.

The Home Circle

Crude Thoughts From the Editorial Pen.

THE true home maker is a happy combination of the "Martha" and the "Mary" sort of women, for while not "troubled about many things," she leaves none of the essential things undone, and yet, "chooses the better part," and gives to love the first best place. Her house is healthfully clean from cellar to attic, but painfully neat nowhere; she is orderly and sympathetic enough to keep the machinery running smoothly, and not so prim that anyone is afraid of incurring reproachful looks or words by misplacing a chair; and if books and papers are now and then left scattered around, one is not told of it next morning at the breakfast table. The meals are well cooked and served on time, the beds thoroughly aired every morning, and sunshine and fresh air coaxed into the farthest corner of every room.

LOOKING AHEAD.

In little things we must look ahead and think of the future. Perhaps the little deed of kindness, the loving word, the sweet smile, or the wrong act, idle word or angry frown, may not affect our lives nor the lives of anyone else to-day. Let us not only think of the present, but looking into the hereafter, see what the influence will be there.

It is in more subtle, and so to speak, higher affairs than these that the wisdom of looking ahead asserts itself.

When Esau, coming in weary and spent from the hunting field, sold to crafty Jacob, for a mess of pottage, the birthright which belonged to the elder brother, he simply did what hosts of men have been doing ever since. He did not look ahead but acted on the moment's impulse. For a temporary pleasure, an apparent present advantage, he bartered his heaven-bestowed right to dignity, consideration and manhood. And yet to-day, many of us, to gratify ourselves for the present in some pleasure which perhaps may be our ruin. It is done without thought for the future.

In Esau was exemplified the fatal weakness which is the besetting danger of strength. Not one of us who forgets to look ahead when accepting some compromise with conscience, or venturing into some doubtful path is the least nobler or wiser than Esau.

Let us look even farther, yet, beyond this transient life to the eternity beyond, and, looking above in thoughtfulness and prayer, prepare ourselves for

The beautiful home over there
 Where flowers eternal bloom;
 And loved ones watching a land so fair,
 For others to join them soon.

SEARCH FOR HORSES.

It is rumored that the provincial police are searching the ranges of the southern country in quest of a number of horses which a Peachland rancher lost recently. These horses are stated to have been taken by a local man and branded. Exact details of the occurrence, however, are not available at present.—Penticton Herald.

He—"I come here so frequently that I'm beginning to think you look on me as a sort of chestnut—a roasted chestnut, as it were."
 She—"Not a roasted chestnut. When a chestnut is roasted, it pops."

Vinegar or yeast should never be kept in stone crocks or jugs. The acid eats off the glazing, which is poisonous.

Afraid of Chiropodist? Hattie, Zoo favorite, enjoys his visits.

JUST NOW, HATTIE, NEW YORK'S FAMOUS CENTRAL PARK ELEPHANT IS UNDERGOING THE FIRST OF HER SEMI-ANNUAL TREATMENTS AT THE HANDS OF HER TRAINER, "BILL" SNYDER.

Hattie enjoys the experience and aids the chiropodist in his work as much as possible, and the foot doctor works anywhere from four to five hours a day. "She doesn't give us the least trouble," said "Bill" recently, as he grabbed the fifteen inch file to take the rough edges off one of the fore feet. "It's a real pleasure to her, for she is just as particular about her feet as some of the women folk over on Fifth Avenue.

Too Much Trouble To Live.

The reason 90 per cent. of the human race never amount to much is because they don't want to—it's too much trouble.

We all want to live in the Glamorous Glades, but darned few of us hanker after building the necessary bridge across the land of Easy Snaps.

Most normal-healthy human beings start out with the intention of doing Something Wonderful when they get hound to it and that's the trouble.

You never get around to anything but your starting point—if you are going anywhere you go ahead.

And going ahead means breaking trails, cutting down trees, getting your feet wet and your hands scratched and horrid things like that.

It's usually possible to pick enough sustenance to keep the body alive from the bushes beside the Common Cow Path, if that's all a man wants out of life.—Steam Machinery.

Local News Items

Mr. F. D. Cooper spent Tuesday in Kaleden.

Rev. and Mrs. F. W. Pattison are expected to arrive home on Friday, August 22nd.

Mrs. Arthur Solly was at Kamloops this week, being absent from home for three or four days.

Mr. and Mrs. J. M. Sutherland and family left on Friday for a stay of some months in England.

We are glad to be able to report that Mrs. W. H. Hayes' condition is satisfactory, and that she is making rapid progress toward complete recovery.

The C.P.R. offices are now located in the new building on the wharf. The move was accomplished with little interruption to business on Monday morning.

Mr. A. G. Henderson, of Vancouver, one of the owners of the Fulton orchard is here looking after the property. He will remain until the crop is gathered.

The Nova Scotian apple crop for 1913 will, it is said, be a normal one. A cold wet spring and June frosts are said to have spoiled prospects of a bumper crop.

Mr. and Mrs. Adam Stark, Miss Blott and Dr. F. W. Andrew and Messrs. L. F. and P. Roe went down to Kaleden in a launch on Sunday morning, had lunch at the Hotel and returned the same afternoon.

The box shocks being used by the Dominion Cannery, as well as by the local Fruit Union are being manufactured locally. This is as it should be, and the Review hopes to see this practice continued throughout the coming years.

Rev. A. W. MacLeod, who has been preaching for some weeks in Revelstoke during the pastor's absence, spoke last week to the Baptist congregation at Dewdney, near Vancouver. For the rest of this month he will be at Chilliwack.

The biggest cargo of fruit yet handled in any one day by the steamer "Okanagan" was that of last Tuesday. Shipments for reloading at the Landing by the United Growers and by Stirling & Pitcairn at Kelowna, as well as private shipments were all heavy.

No less than fifteen phones have been ordered out during the last few days. Increasing the rates notwithstanding the directors' promise to adhere to the Lakeshore Telephone Company's municipal charter is the reason given. It is said that a number more will be ordered out at once.

H. L. Garroway, who was manager of the Okanagan Fruit Union at Vernon, and who later acted as liquidator to that union while he discharged the duties of manager of the Vernon Fruit Union, has resigned the latter position and, last Thursday, left to go into the commission business in Regina.

Women's Institute Flower Show Correction.—Ladies competing at the Women's Institute Flower Show for the prize for the white cake are asked to note that the amount of butter required is one-third of a cup instead of one-third of a lb. Refreshments will be on sale during the afternoon of the Show, and members of the Institute will be called upon to kindly help by contributing toward the same.

Harry Glennie, who has for some time been a travelling salesman with Parkinson & Archibald, wholesale fruits, Vancouver, has accepted a similar position with the Okanagan United Growers Ltd., and is making Regina his headquarters. Jack Conway has taken the position with the Vancouver concern vacated by Mr. Glennie. This will necessitate Mr. Conway's removal to Vernon. Half the month will be spent by him on the main line of the C.P.R. and the other in the Valley.

The ten cent tea and ice cream social organized by the ladies of St. Stephen's Guild was held on Thursday afternoon and evening at the home of Mrs. Hannington, Beach Avenue. There was a good attendance of ladies in the afternoon, and a number of gentlemen appeared later. The sum of thirty dollars was realized for the sale of refreshments, fancy and useful articles, which was a little more than the ladies anticipated. A special feature of the afternoon gathering was the raffle for a hand-made blouse given by Mrs. Lyon. This was won by Mrs. Fotherstonhaugh.

Mr. George Craig spent Thursday in Kelowna.

Mr. Ed. Hayward came in on Thursday's boat.

Mrs. Norman Alexander and Mrs. Hunt spent last Saturday in Naramata.

There are varieties of flowers which with you grow to perfection. Show them next Friday.

Miss Gladys Limmer returned home on Wednesday night after a month's vacation spent at Banff.

Mrs. Hood accompanied by Miss Beatrice Anderson, went to Penticton Wednesday night, returning on Friday morning.

Presbyterian service will be held in the Methodist Church next Sunday evening at 7 o'clock. Rev. C. H. Daly will conduct the service.

The Peachland Canning Company, Ltd., have recently given Mr. Alfred A. Town of that place an absolute bill of sale for \$1003.

The successful participant in the raffle held by the Womens' Hospital Auxiliary for the tea cloth donated by Mrs. F. W. Andrew, is Miss Rust.

B 39 no longer exists as a telephone number. The company will not permit of two business phones on the one line. 61 is the Review's new number.

A meeting of the directors of the Summerland Fruit Union was held on Tuesday evening of this week at the packing house. No business of unusual importance transpired.

Reeve Thomson, Coun. Robinson, and Municipal Clerk Logie, with Messrs. D. H. Watson and H. Sutherland, left for Victoria on municipal business on Wednesday morning.

Quite a number of chinamen have been arriving in town this week in anticipation of finding employment at the cannery. The laundry building has been much enlarged, and accommodation for some sixty Orientals will be provided there.

Members and friends of the Presbyterian Choir to the number of about thirty enjoyed a most delightful picnic up Garnett Valley on Saturday last. Highly propitious weather lent much pleasure to the outing. The party journeyed up the valley past the old mill site.

The management of Empire Hall announce that they have secured an appearance of the Pollard Juvenile Company in Summerland for Thursday night, August 28th. This entertainment squad do not habitually visit towns of small proportions, and in securing it for a local appearance, an entertainment of the highest order is unquestionably assured.

SYNOPSIS OF COAL MINING REGULATIONS.

COAL MINING RIGHTS of the Dominion, in Manitoba, Saskatchewan and Alberta, the Yukon Territory, the North-west Territories and in a portion of the Province of British Columbia, may be leased for a term of twenty-one years at an annual rental of \$1 per acre. Not more than 2,560 acres will be leased to one applicant. Application for a lease must be made by the applicant in person to the Agent or Sub-Agent of the district in which the rights applied for are situated.

In surveyed territory the land must be described by sections, or legal subdivisions of sections, and in unsurveyed territory the tract applied for shall be staked out by the applicant himself.

Each application must be accompanied by a fee of \$5, which will be refunded if the rights applied for are not available, but not otherwise. A royalty shall be paid on the merchantable output of the mine at the rate of five cents per ton.

The person operating the mine shall furnish the Agent with sworn returns accounting for the full quantity of merchantable coal mined and pay the royalty thereon. If the coal mining rights are not being operated, such returns should be furnished at least once a year. The lease will include the coal mining rights only, but the lessee may be permitted to purchase whatever available surface rights may be considered necessary for the working of the mine at the rate of \$10 an acre. For full information application should be made to the Secretary of the Department of the Interior, Ottawa, or to any Agent or Sub-Agent of Dominion Lands.

W. W. CORY, Deputy Minister of the Interior. N.B.—Unauthorized publication of this advertisement will not be paid for.

13 ACRES

10 under Irrigation—6 Plowed. Good Bottom Land, bisected by Eneas Creek. Owned by Mr. Naper.

Price \$2,750.

For Sale by MR. F. D. COOPER, Real Estate Broker, Peach Orchard.

CONTROL PEACH LEAF CURL.

Peach leaf curl is a disease caused by a fungus organism. Its spores germinate early in the spring with the opening of the young buds and develop as the peach foliage develops. The disease is characterized by an early thickness and rolling of the leaf, accompanied at first by a yellow or red color, and finally by a brown to black color. When this stage is reached the fungus is then mature, and its spores cover the surface of the leaves and the foliage is doomed.

The disease is not difficult to control, however, if the proper precautions are taken. Most of the failures to control peach leaf curl have been due to spraying at the wrong time, or in not taking pains to see that every bud has been drenched with the spray. The proper time to spray is early in the spring, just before the buds open, thus preventing the germination of the fungous spores. Later spraying than this is of no value.

Spray of the ordinary winter strength, such as is made for the San Jose Scale, is best for the leaf curl. Lime-sulphur should always be used. If the commercial article is employed and the reading is from 32.25 degrees Baume, it should be diluted with eight or nine gallons of water for each gallon of the commercial wash. A dilution of one to ten is often recommended, but the experience of growers is that such a dilution is too weak. There need be no fear of injuring the trees if the spray is given before the buds open.

AN ALFALFA COMMANDMENT.

One day recently a man strode carelessly over the alfalfa, just getting green. There was a road nearby, but the big, ruthless foot of this man crushed down the tender plants. He had not learned the rudiments of alfalfa culture. He knew grass, but he had not instinct for legumes. Gently leading him to the roadway, he was made to listen to these words:

"Friend, show respect for this alfalfa. It is a very serious injury to crush it with that foot of yours. Alfalfa trodden upon takes rust and leafspot and all manner of disabilities. Trodden upon when frosted, it is killed to the earth, perhaps forever.

"Please repeat these words after me: 'Thou shalt not walk among, step upon, trample or tread upon any alfalfa growing in thy field, neither thou nor thy man-servant, nor thy maid-servant, nor thy ox, nor thy ass, nor any animal that walks, for alfalfa has a right to be let grow until it is come to bloom; if, then, you wish to depasture it, well and good, but in its tender immaturity it should be a thing sacred and apart; thus will it become a thing of beauty, and your joy will be great upon seeing it, but if you trample and desecrate it now it will be a thing of sorrow in a land already given to overmuch trouble.'"—Robert Jameson, in Weekly Globe and Canadian Farmer.

Naramata Notes.

Mr. Gordon Hayman, of Summerland, was a week-end visitor in town.

Miss Bessie Mitchell, of Penticton, is spending a few days vacation at the home of her parents, Mr. and Mrs. Wm. Mitchell.

All the ladies in our town are busy with planning and making preparations for the Unity Club concert given on Friday night.

Mrs. E. E. Code, of Toronto, and two sons, Cecil and Carman, have been visiting at the homes of Mrs. H. Davies and Mrs. J. H. Pushman for the past few days.

The meetings of the Unity Club will be discontinued until the first Friday in September, when the ladies will be entertained at the Club building by Mrs. George Cook.

Mr. Biddell was joined on Saturday night by Mrs. Biddall, three children and maid. They are now nicely located in the house belonging to Mr. Bartlett on the north shore.

Miss Adelaide Hayward left for Vancouver on Tuesday to which place she carries our best wishes for her success. She was accompanied by her brother-in-law, Mr. Bane, who has been spending a considerable vacation here.

Mr. and Mrs. J. C. Lyons are entertaining Mrs. Bate, of Winnipeg, a sister of Mr. Lyons. Mrs. Bate, accompanied by her nephew, Mr. Burton Livingston, has been spending a most enjoyable two week's visit with friends in Vancouver, Victoria, Seattle and Portland, stopping off on their return for a side trip to this Valley. Mr. Livingston was recalled to Winnipeg shortly after reaching here.

It took a good sized artificial sand storm to put out the blaze on the launch "Kaleden" last Saturday night. The boat has been docked here for the past few days, and its owners from Summerland came over to take the boat across. When they wished to return with the boat, it refused to start, and on investigation the gasoline was found to have leaked from the tank. After filling it, and still getting no response from the engine, a match was struck to find the cause. A quick explosion and a big blaze rather interfered with locating the trouble just then, and the men had to do some quick work to keep the newly-filled tank from exploding. Later, a start was made and the boat returned to Summerland.

Kaleden Comments

Miss Burchall went up to Penticton to spend the week-end with friends.

Work has recommenced on the road on the opposite shore, near Gillis's ranch.

The inspector of fruit trees was in town last Tuesday and reported the trees in a very satisfactory condition.

The first shipment of apricots went out on Tuesday last, and there will be a busy time amongst the lot owners for the next week or two.

The furniture belonging to Mr. Carrol Foss arrived last Saturday evening from the East, and he is expected to arrive with his bride next Saturday evening.

Mr. Turner, Commissioner of Roads, with Mrs. Turner and family came in from Fairview on Sunday last, staying at Mr. A. S. Hatfield's for lunch, on their way to Penticton.

A very heavy thunderstorm passed over Kaleden last Saturday evening. The lightning was very vivid, and the storm lasted several hours, but no serious damage was done.

EVERYBODY BOOST FLOWER SHOW

Get busy. Pick out some of that nice fruit and put it in the Show. In the meantime, make your entries.

You have always prided yourself on your excellent cooking. Bring a sample or two to the Flower Show, and let's see it, and also have the honor of winning a prize.

How about that needlework, or fancy work you've been doing? Better put it in competition for a prize. It'll be an easy winner.

The Piano We Give Away

DESCRIPTION OF PIANO

FINISH

We furnish this Piano in either Oak or Mahogany finish

MANUFACTURER'S DESCRIPTION

The dimensions of the above Piano are as follows: height, 4 feet 9 inches; length, 5 feet 2 inches; depth, 2 feet 4 inches; weighs, boxed ready for shipment, about 800 pounds, and the material and workmanship are of the best. The cases are finished in Mahogany or Oak, double-veneered inside and out to prevent warping or splitting. The Piano has 7 1-3 octaves, repeating action, three pedals, full iron frame covering wrost plank, and built up pin block of five different layers of hard maple, direction of grain alternating in successive layers to prevent to the greatest extent possible the Piano getting out of tune.

The three strings in unison with over strung bass, splendidly pitched scale and excellent sounding board produces the rich, deep, even tone peculiar to the Upton Piano, and so much striven for by manufacturers of high class instruments. The brackets, pedal guards, hammer rail, and continuous hinges are all heavily nickel plated. The case itself is highly polished, making a first-class artistic instrument in finish, appearance and tone.

By comparison this Piano will be found better, heavier, and more artistic than most Pianos on the market to-day. Each instrument is fully warranted.

MANUFACTURER'S WARRANTY

The above Piano is warranted to give perfect satisfaction for a period of ten years, provided it is not exposed to extremes of heat, cold, wet or dampness.

SUMMERLAND, B.C., AUGUST 15, 1913.

Whole No. 263

Survivors of Scott Expedition Received by King.

The sad fate of Captain Scott of the Scott Expedition to the South Pole is still fresh in the memory of the people of all nations, and will live as long as history. The whole world sympathized with him and his countrymen, and felt unbounded admiration for the loyalty of his companions, to whom his last message was devoted when, as death was creeping over him in his tent, where his frozen body was found, he scrawled this thrilling message:

"Had I lived I should have had a tale to tell of the hardihood, endurance, and courage of my companions which would have stirred the hearts of all Englishmen. These rough notes and our dead bodies must tell the tale."

A fitting tribute was paid to Captain Scott and his survivors when all the surviving members of the ill-fated Scott South Pole Expedition were invited by King George to Buckingham Palace; where the King spent nearly a whole afternoon conversing with the crew, and displaying great interest when some of the experiences of the party were retold.

This picture shows the crew leaving Buckingham Palace.

Valley Publishers' Annual Session

C.P.R. Representative Meets With Valley Newspaper Men in Their Third Annual Convention.

Entertained By Board Of Trade.

The newspaper men of the Okanagan met in Annual Convention at Penticton last week, the first meeting of the session being held on Thursday evening, after the arrival of the boat. The Enderby Press, Armstrong Advertiser, Vernon News, Kelowna Courier, Kelowna Record, Summerland Review, Penticton Herald, and Hedley Gazette are included in the organization, and were all represented. Other sessions were held morning and afternoon on Friday. Early Friday evening the press representatives were given an auto ride over the municipality, and later were entertained at a supper by the Board of Trade.

Of the latter nothing but words of praise can be given for the thoughtfulness and attention shown the visitors during their stay in Penticton. Though the press representatives had slipped in quietly during the evening of Thursday, without much notice, yet it was not long before they were discovered by the Board of Trade officials, and shown every possible attention. The banquet tendered on Friday night came as a great surprise to all, and was in every way a pronounced success. The general feeling of fellowship that had prevailed at the meetings of the association was also uppermost at the evening entertainment. All the speeches emphasized the necessity of obliterating petty jealousies, and that such was rapidly disappearing was the prevailing opinion expressed by the newspapermen.

One of the principal speakers of the evening was Mr. F. E. Trautman, special representative of Vice-President Bury of the C.P.R. Mr. Trautman came to the Valley specially to meet the members of the association. In speaking of his visit Mr. Trautman in his evening address revealed a very commendable attitude of Vice-Pres. Bury in his declared purpose of doing every thing possible to satisfy the press, and through the press the public.

Mr. Trautman's special mission is to get in touch with the newspapers throughout the west, and thus learn through them how the service may be made most satisfactory to the people. That the influence of the press is duly recognized is shown by the readiness with which all news pertaining to C.P.R. matters is made available, Mr. Trautman declaring that even the Vice-Pres.'s office is open to press representatives at any time. The attitude of Vice-President Bury in thus recognizing the press will doubtless do much towards bringing the public and the giant corporation to a mutual understanding, much to the benefit of all concerned.

A Wonderful Sight.

A most unusual and magnificent spectacle was witnessed by those who were out and in view of the lake about 11 o'clock on Monday evening. The moon had just gone down behind Giant's Head, and the latter was throwing a shadow over the hills about town, and partly over the lake. The sky was largely overcast, with clouds, and these darkened much of the hills to the eastward. Through a rift, however, the moon shone brightly on a shower crossing the lake north of town, and just touching Naramata. From this was reflected a bright and perfect silver rainbow, and within the arc down to the water was a bright shimmer of reflected moonlight. Outside the arc was the darkness of the shower and the cloudy night.

Big Apple Order.

The United Growers have recently booked an order for more than 30,000 boxes of apples to be shipped to Australia. Before the reorganization of the growers of the Valley a similar order had been booked by one of the local organizations, which order, of course, they were not able to fill after disorganization. After considerable negotiations the larger organization took the order. The price ranges from \$1.45 down to \$1 per box f.o.b. shipping point. The order is for small apples, the largest being 1 1/8's, bringing \$1.45.

Regular Session of Municipal Council.

Free Power For Pre-Cooling Plant. Irrigation Service Evokes Complaints and Criticism.

The Council were late in getting down to business last Tuesday morning when the members met in regular monthly session. With the exception of the Reeve, who had not returned from the Coast, all the members of the Board were present.

POWER FOR PRE-COOLING PLANT.

Immediately after 10.15, when acting Reeve Lewes took the chair, Mr. Edwin Smith, who has been installing the pre-cooling plant here waited on the Board and asked for co-operation from them in the experimental work the department was doing here. Mr. Smith outlined the history of the work, the difficulty of getting the necessary data and preparing plans. The government had gone to much expense in this work, and the C.P.R. had offered to furnish free the ice needed for this season, the first carload being received here last Monday, and all would be in readiness to try out the plant the middle of the week, and Mr. Smith expects to be ready to begin pre-cooling regularly on Monday. A seven horsepower motor had been installed to operate the fan. This was done upon the assurance from the Reeve that the municipality would furnish the power. It was because this assurance had been given that he had not been before the Council earlier, but he now came asking that the municipality co-operate in this way with the government and C.P.R. in the experimental work to be conducted this season. Mr. Smith asked that they be given power from 10 o'clock until 6 o'clock the following morning.

Coun. Lewes saw no reason why power could not be furnished, but at first questioned whether the municipality could afford to give the power free. Both Coun. Robinson and Clerk Logie insisted that the municipality must go thus far, and that the cost would only be about \$30 per month. The motion was unanimously carried granting Mr. Smith's request.

OFFER FOR MUNICIPAL BONDS.

Mr. J. Stewart Campbell, representing Mr. Hill of Glasgow, presented the latter's offer to take up some of the municipal bonds and to endeavor to have other bonds placed on the market through Glasgow friends. Mr. Hill owns a tract of land recently sub-divided, and now known as Hillpark Gardens, a number of lots in which have been sold. The purpose, and one of the conditions of Mr. Hill's offer is to have domestic water placed on the sub-division. The Clerk was instructed to give Mr. Hill the information asked for, and to thank him for his offer.

INSUFFICIENT WATER SERVICE.

Mr. Campbell also complained of lack of water in his orchard, and a vigorous kick on the same matter was registered by Mr. Douglas-Hamilton.

Mr. C. J. Bentley was also present on the same errand, and insisted that the Council do something to relieve the situation at once. Mr. Bentley thought that what was required was better supervision, and declared that the Superintendent was "lax, very lax" in his duties. The undue interference with the flume gates, and depriving others of water due them was complained of.

Most of the remarks were pointed to Coun. Lewes as Chairman of the Board of Works, on whose shoulders much of the burden of responsibility was placed by the complainants. Coun. Lewes did not see how matters could be much improved until ditches and flumes were enlarged to carry an abundance of water for all. Mr. Doug-

las-Hamilton particularly insisted on some immediate remedy whereby his next neighbor could not take all the water and leave him with none. Responsibility for this and similar acts complained of was denied by Chairman Lewes, who declared the Council were doing the best they could under the circumstances.

Coun. Robinson, who had sat throughout the, at times, heated discussion without participating, said that this matter of interfering with the gates was a very serious one and must be put a stop to. The Board were paying men big salaries to justly administrate the water, and if their work was being interfered with those who changed a gate after its being set should be arrested and fined.

Coun. Lewes said that he had heard of no complaints from Mr. Bentley's district, to which Mr. Bentley replied, that it was no use to enter a complaint. "Your attitude, I mean, your personal attitude, totally discourages our entering complaints. You listen to what we have to say and then your reply is equivalent to saying, 'run away, little boy, we don't want to hear any more.'" Mr. Lewes thought he had been misunderstood as he was willing to do all within his power. There would be a shortage of water at the extreme ends of the systems until the main ditches were repaired or enlarged.

Mr. Campbell believed that the people would be willing to vote an extra 1 per cent. on debentures in order to get the money to make the improvements.

Coun. Robinson replied that the rate for irrigation water should have been raised two years ago, sufficiently to put the system on a paying basis. Then it would be an easy matter to get the money for extensions and improvements. Under present conditions it is much more difficult to get financiers to advance money than it would be for a paying proposition. He thought the orchardists had better pay \$5 per acre and get abundance of water than pay half that rate and be short.

Mr. Bentley suggested that they call a public meeting and discuss the situation.

Coun. Dale thought that the Superintendent should look into this matter of uneven distribution, and especially the charge of water stealing, and if he could not adjust the matter he should then report it to the Council to be acted upon by them.

Coun. Robinson suggested that as the Chairman of the Board of Works was disposed to do nothing that the Council have action taken against those interfering with the gates set by the ditchmen, or otherwise interfering with the service. Coun. Lewes did not see what he could do, and thought it was up to the Council. The reply of Coun. Robinson was, "the practice has got to be stopped, and if your men will not stop it fire the whole bunch." It was not until ten minutes, to twelve that discussion on this subject ended, and the minutes of the last meeting were read.

The reading of communications followed, only those needing immediate attention were dealt with, the rest being left over to be taken up at an extra session to be called by the Reeve.

C.P.R. TRACKAGE EXTENSION.

Legal advice, tendered the Council upon request of some private citizens, was read to the effect that the Council could not grant the C.P.R. the right to extend their trackage, as requested, without placing it before the ratifiers. It was the opinion of the Board that all preliminary arrangements could be made and the agreement drawn up, when it would be placed

(Continued on page 8.)

Huerta Embracing Diaz Before the Latter's Departure For Japan.

TURNED BACK AT VANCOUVER DIAZ STARTS FOR LONDON.

The mysterious errand of Diaz to Japan has not been accomplished, due, no doubt, to the fact that international distrust might be created, or that public demonstrations might be made against the United States and in sympathy with Mexico. Diaz was advised before sailing from Vancouver that he could not be officially received.

Coast Town Party Visits Summerland.

There arrived in town late on Saturday evening a party who came as a great surprise to their local friends and acquaintances. This party, which was made up of Mr. David Spencer, and the Misses Spencer of Victoria, Rev. Dr. White and Mr. Harold White, arrived late on Saturday evening from Peachland, having travelled from Lytton in the latter's touring car. Dr. White, who is the Superintendent of Missions of the Methodist Church in B.C., is a frequent visitor here, and is always a very welcome one.

At the Methodist services on Sunday both sermons were preached by Dr. White. At each service Miss Spencer, who has recently returned from Germany where she has been studying music, sang two solos, accompanied by her sister, Miss Sarah Spencer.

On Monday evening a very pleasant social time was spent in the gymnasium, where the members of the congregation assembled to meet the visitors. Happy and appropriate speeches were heard from Rev. F. W. Lee, welcoming the guests, and from Rev. Dr. White and Mr. Spencer. The latter expressed extreme delight with their tour of the Okanagan, and it was very evident from the remarks made that all the party were enjoying the trip immensely. During the evening Miss Spencer again delighted her hearers with two musical selections. Misses Ethel and Evelyn Brown also assisted in the musical part of the program. Later in the evening refreshments, including ice cream, were served.

Much of Tuesday was spent by the party looking over the district, inspecting orchards, etc.

Mr. and Mrs. J. S. Gillespie of Naramata left this week for London where they expect to spend the winter.

Shot in Shoulder.

Mr. G. F. Colebank, one of the party who, under the direction of Mr. J. R. Gareau, is making a survey of Trout Creek and Shingle Creek districts, recently received a bullet wound in a most mysterious way. While washing some clothes in Shingle Creek a stray bullet pierced his shoulder. The missile is supposed to have been from the rifle of a hunter who was getting in before the opening of the hunting season. Mr. Colebank went to Penticton where his wound was attended to. Fortunately it was a clean one, and no serious results are anticipated.

Flower Show To-Day.

To-day is Flower Show Day, and all indications are that this show will be the best ever held. The entries are coming in fast, and there is going to be a large display of both fancywork and flowers. Judging commenced just as the Review went to press. A full report of the winners will appear in next week's issue.

Two Men Killed.

Two more lives have been added to the cost of constructing the K.V.R., these latest fatalities were again at Hildebrandt's camp, near Naramata, in the vicinity of which most of the fatalities have occurred. Numerous stories of the accident are in circulation, and different theories advanced. Probably the exact story of the accident will never be had. Premature explosions, charging of overheated holes, or fuses too short, and other theories are advanced. One man was killed almost instantly, the other lived a few hours. The third man who suffered from the accident was taken to the Mission Hospital, and is in a fair way to recover.

COUPON

Cut out this Coupon, and present it at The Drug Store, and they will exchange it for 100 Votes in the \$400 Piano Contest.

RICHARDSON LUMBER CO.

We beg to announce that we have taken over the Lumber Business of Mr. A. Richardson, and intend carrying a complete Stock of Lumber, Building Supplies, etc.

For the present we are offering per thousand:

DIMENSION and BOARDS	GRADE A (Being Selected and Seasoned)	GRADE B (As Formerly Sold)
(SIZED)	\$23.75	\$20.00
SHIPLAP	\$25.00	\$21.00

A DISCOUNT of 20% on above prices will be given for **CASH.**

We are also prepared to quote Special Prices on all other lumber, and to arrange for very easy terms of payment, if desired.

For those intending to build this fall, now is the time to obtain Lumber and Building Material at a price never before offered in Summerland.

G. M. S. GORDON, Manager.

You Want That Piano

You'll Never Get Another as Easily

We'll HELP YOU

By giving you BIG VOTES for little effort and less cash

For ONE NEW SUBSCRIBER [year] we give 5,000 Votes

For EACH YEAR'S RENEWAL we give 3,000 Votes

DO YOU REALIZE what this means, and how quickly Votes may in this way be accumulated?

Come in, and we'll show you how to

GET THE PIANO

"The Review"

Naramata Notes.

Miss Marjory Carmen of Grand Forks, B. C. is the guest of Mrs. Cash.

Mrs. V. L. Watson is spending a week at the home of her parents, Mr. and Mrs. J. H. Wells.

Mr. Ireland has purchased the building belonging to the I. W. W. association, and is converting it into pool rooms and a reading room.

The Ron Brothers have a number of carpenters at work on the construction of their new hotel, and already considerable progress has been made on the building.

Mr. R. Reid and family are now living in the Lyons cottage. We understand that his home, which was burned last Friday, was insured, and that he will rebuild.

The Methodist Sunday School will hold its annual picnic next Wednesday, August 20th. They extend a cordial invitation to everyone, and wish to announce that there will be sports and games for all.

Mr. J. H. Wells has recently bought the fruit lot belonging to his sister, Mrs. Fred Wells, of Detroit, Mich. Mr. Wells is now the owner of a fine looking horse which he purchased in Summerland on Monday.

Mr. and Mrs. J. S. Gillespie left on Thursday for a six month's stay in England. They are taking a side trip down the Atrow Lakes on business, and sailing from Halifax on the 15th. They take with them the best wishes for a pleasant journey, and regrets for their rather sudden departure.

A very bad accident occurred last Friday in the trap tunnel on the contract work of Mr. Hildobrandt. The men were drilling in the tunnel when a large portion of the roof caved in on them injuring three very seriously. One man died while being brought down to the hospital. Another, whose head was badly crushed, died two days later. Both men were buried in the local cemetery. The third injured man will recover.

Quite a number from this place attended the Peachland Regatta last Thursday.

Miss Jessie Crawford, who has been spending a very enjoyable four months in Naramata with her friends, Mr. and Mrs. Wm. Steele, left on Tuesday morning. She intends visiting Toronto and arriving at her home in Scotland the latter part of September.

Mr. and Mrs. F. Manchester returned from London, England, to Naramata last Saturday night. The trip has been very beneficial to Mr. Manchester's health, and we are all glad that their plans to go to South Africa were changed. They report the best of times while staying with the J. M. Robinson family in London.

That the Unity Club Concert given last Friday night was a decided success seems to be the consensus of opinion. The hall was packed, and the early part of the evening spent with the ladies in charge of the various booths. These consisted of a Sales Table, Fish Pond, Refreshment Counter, and Flower Competition. At nine o'clock the first number of the concert was given. During an intermission the judges awarded the two prizes to the winners of the Flower Competition, Mrs. Geo. Wolstenroft winning one on a handsome bouquet of asters, and Gardiner Moore the other for a fine entry of roses. Later Mrs. Gillespie very ably auctioned the bouquets and thus greatly swelled the proceeds of the evening. Light refreshments were served and the remainder of the concert followed. The special numbers were exceptionally good, and much could be said in praise of each. Miss Marjorie Carmen of Grand Forks gave a violin selection which was especially fine; Mrs. Logie appeared in a classic dance that was thoroughly enjoyed. The Jays brought a laugh from the whole house, a quartette number by Messrs. Gillespie, Manchester, Robinson and Firstbrook; Little Margaret Mitchell is always a success in her songs and this time was no exception; the Coon song given by Mr. and Mrs. Dean Walters was the real thing right from Dixie; the rendering of "Sing me

the Rosary," by Mrs. Walters and Mr. Gillespie was splendid. The girls' choruses were very bright and pretty. The costumes worn by the whole company during the first half were clown suits, and were pronounced the best yet. In the second half the girls were dressed in paper dresses which were very effective. One of the prettiest numbers of the evening was the dance given by the girls in the song "I've a Girl in Havana." It has been conceded to be the best concert given here and in a financial way the affair far exceeded any other attempt given by the Club.

Cleanings from Review of August 15th, 1908.

The Second Meeting of the Western Canada Irrigation Convention was held in Vernon this week.

Mr. A. Zimmerman, M.P., for West Hamilton, is spending a few days in town looking over property with a view to purchasing.

Work has commenced on the new Baptist Church edifice on Siwash Flat. The contractor, H. C. Mellor, will have the building ready for occupancy on Sept. 27th.

A recent real estate deal is that involving the transfer of the Doyle property, Jones Flat to Mr. McLean of Hazel Hill, N.S.

A. S. Hatfield and F. J. Nixon are busy organizing a swimming club.

The handsome residence on Siwash Flat, erected by Rev. Mr. Solly, is about ready for occupancy.

Mr. and Mrs. C. S. Stevens have moved into their new house on College Hill.

The new building being erected on Shaughnessy Avenue by R. H. English will be occupied by Mr. V. Taylor as a harness store.

F. C. Lovor recently bought out C. P. Neilson's photographic business.

C. D. Kerr, late of St. John, N.B., has accepted a position on the Bank of Montreal staff.

The Summerland Review

PUBLISHED BY THE REVIEW PRINTING & PUBLISHING COMPANY LIMITED,
RALPH E. WHITE, MANAGING DIRECTOR

SUBSCRIPTION RATES: \$2.00 PER YEAR, IN ADVANCE. SIX MONTHS \$1.00.

Advertising Rates:

LEGAL NOTICES.—Twelve Cents per line for the first insertion; Eight Cents per line for each subsequent insertion.

LAND NOTICES.—\$7.00 for 60 days, \$5.00 for 30 days.

WATER NOTICES.—30 days, 150 words and under, \$3.00; each additional 50 words, \$1.00.

THEATRICAL, ETC.—50c. per inch for first insertion, and 25c. per inch each subsequent insertion.

LOCAL NOTICES or Readers, Immediately following regular locale, 20c. per counted line; 10c. per line each subsequent insertion. Half these rates when accompanying display advertisements.

FOR SALE Advertisements, Etc., 25c. per week, per column inch.

FOR SALE Advertisements, Etc., 3c. per word first week; 1c. per word each subsequent week.

Transient Advertisements payable in advance.

Rates for Contract Advertisements furnished on application.

Copy for change of contract advertising must be in the hands of the printer not later than Wednesday noon to insure publication in the next issue.

In accordance with schedule of prices adopted throughout the valley, charges for advertising are now being made weekly. Heretofore when five issues were made in one month the result was a loss. By the new method customers are charged each week for just the amount of space used.

FRIDAY, AUGUST 15, 1913.

GOVERNMENT WATER PLANS.

At first thought one will scarcely realize the marvellous development that is likely to follow the adoption of the irrigation scheme now being considered by the Provincial Government, a brief outline of which appeared in last week's Review. As already intimated, the Hon. Wm. R. Ross, Minister of Lands, is taking a keen interest in this important problem, and it was at his instance that Mr. Grunsky, the irrigation expert, recently visited the Okanagan.

The object of the new act is to incorporate in a workable law the acts of the province relating to water and amending acts, together with many new features for the better administration of water, and the purpose of Mr. Grunsky's investigation was to put him in a position to advise the Government as to matters of policy of administration. It is the desire of the department that an act be brought in that will assure the equitable distribution of water to all users, and in sufficient quantity. Mr. Grunsky declares that he will go back to Victoria with many suggestions for the betterment of conditions, and shall try to persuade Mr. Wm. Young, the newly appointed Controller of Water Rights, to visit Summerland and see what is needed in the matter of better water administration, not only in the outlying districts but within the municipality as well. He will further recommend that engineers be put on the ground to investigate the distribution systems, calculate losses through seepage and other wastes, and the proper quantity of water to be used in various districts. He will also recommend that a water bailiff be appointed for the district. This officer would have power to arrest anyone stealing water, as would a policeman for stealing other private or public property. This official, he believes, should act as the guardian of the water user.

To carry the proposed plans to a logical conclusion it would seem necessary that the province adopt at once the long-considered policy of building extensive storage dams throughout the dry belt, thus assuring an abundance of water in reserve. It is not improbable that distribution will be conducted co-operatively in the unorganized districts and that associations for this purpose will be formed along similar lines as the co-operative associations for the marketing of fruit, growing of live stock, etc., financial assistance from the government having been obtained. If Meadow Valley, Shingle Creek, Upper Garnett Valley, and a number of other places can be put under water and made to produce a variety of farm crops the benefits to the community would be almost incalculable, and will be just what is needed to adjust the unbalanced condition of agriculture, due to the general specializing in fruits.

An exchange thus outlines the draft bill, which, of course, may be much amended when finally presented to the Legislative Assembly. It provides that a petition, signed by at least fifty per cent. in value of the registered owners in fee-simple of the land situated within the territorial limits of a proposed irrigation corporation, may be addressed to the Minister of Lands, requesting its establishment. The petition must give certain particulars as to acreage, names of owners, and assessed values, the lands to be irrigated, the streams from which water is to be diverted, and a list of the irrigation systems which it is proposed to acquire or construct. On receipt, the Minister may refer the petition to the Board of Investigation, with directions to prepare a memorandum thereon covering certain preliminary details. Having received the memorandum, the Minister may then decide, upon the information conveyed in it, whether any further action is in the public interest. Should he decide in favor of the petition, he will then instruct the Board to take steps to acquire all necessary information, to make the examinations and surveys required, prepare a preliminary report on the feasibility and the probable cost of the proposed irrigation system, and give notice by advertisement as to the time and place when they will hear the petition, full opportunity being given for lodging objections, if any. Finally, after holding the enquiry, the Board will present a full report covering all details to the Minister, who may approve, disapprove, or amend it. Should he approve, the Minister sets a date for a vote to be taken within the proposed irrigation district, on the question of the adoption of the report and the establishment of the district.

The persons eligible to vote at any election will include those British subjects of the age of twenty-one years owners of land within the district, either registered in the book of indefeasible titles or absolute fees, or as purchasers under registered agreements for sale, or as pre-emptors, homesteaders, or applicants for the purchase of any such land. To carry the question as to creation of the public irrigation corporation, a majority of the votes cast will be necessary, provided that the total vote cast represents over two-thirds in value of the land within the proposed territorial limits. Should the election result in favor of the establishment of the corporation, the Lieutenant-Governor in Council may then issue letters patent creating it.

These are the preliminary steps, we give them rather fully to show the safeguards provided against reckless and indiscriminate establishment of irrigation corporations in localities where they may not prove successful. Lack of space prevents us from going very fully into the other details of the bill, but a few points may be stated. The governing body will consist of trustees, elected by popular vote, the number to be from three to five, to serve two years. The trustees may, by law, raise loans for the construction of irrigation systems taken over by the corporation upon its creation, but all their actions are subject to the supervision of the Board of Investigation, which is to exercise a

wholesome check on reckless expenditure. Power is given the trustees to levy rates on the land benefitted, to cover maintenance, interest on debentures and sinking fund.

KILLING BUSINESS.

While other centres are competing for new business and new industries, to secure which at times considerable sacrifice is made, Summerland, whether through indifference or because of the opposition of a few who probably have not quite grasped the proposition, is in danger of losing a proposed new industry that would mean much to this community. The Okanagan United Growers, Ltd. are very desirous of making up carloads of fruit at this end of the Valley and prefer to do so here. Upon stating their case to the C.P.R. that corporation gave the Growers every assurance of co-operation. But, that the work might be carried on satisfactorily, and no serious inconveniences caused for lack of cars, it was shown that more trackage was needed at the wharf. The offer of the C.P.R. to co-operate in this new industry here was conditional upon their securing space for the storing of cars, and only thus far was our municipality asked to assist in the establishing here of this new business. If we can size the situation up correctly we believe, that in stating their needs the C.P.R. has gone as far as it will go, and that it now rests with those who opposed the proposition to withdraw and overlook any possible inconveniences for the good of all; or for the community, either through the Board of Trade, or perhaps better, the Municipal Council to petition the railway to provide the United Growers with the needed facilities. All public or private rights can doubtless be duly protected when making the agreement with the railway company.

NECESSITY, NOT LUXURY.

Our Municipal Council does not seem to have recognized the difference between a Municipal Irrigation System and a city street paving proposition, and have attempted to justify their inaction in not providing for the increased demands on our present system with the same reasons given by city corporations for delaying the building of cement sidewalks or the paving of new streets. The latter are luxuries which can be done without for the time while the former is a pressing necessity. Our council is no more justified in its attitude toward this utility than would a board of directors of a manufacturing corporation be justified in refraining from increasing its manufacturing plant or keeping it up to the highest standard of efficiency when that corporation had on its books more orders than it could fill with every prospect of continually increasing business. In a case of that kind money would be found even if the price were high. Equally so would it be wisdom on our part to secure the needed capital even at a materially increased rate of interest. The additional capital expenditure would yield large returns in increased crops from our present orchards and the bringing of additional acreage under cultivation. Delay is disastrous.

LET'S NOT DECEIVE OURSELVES.

It was intimated by one of our councillors that as the electric light plant had shown a profit it could stand the expense of supplying power to the pre-cooling plant. To furnish this power without taking any record of it and giving the electric light plant due credit would be a wrong practice and unfair to electric light users and the plant, besides working a deception on the ratepayers. Much the same situation we fear now prevails with the street lights. Everything should stand on its own basis, and the street department should be charged with every kilowatt used. The power that will be used for pre-cooling should of course be charged out as a grant and shown on the electric light plant account as that much earned. This will be fair to all and would be the method of procedure recommended by any municipal auditor.

PICKING AND PRE-COOLING.

The logic employed by the author of the article in last week's Review in reference to the pre-cooling plant and the best methods of picking fruit for pre-cooling, etc., seems excellent reasoning drawn from conclusions arrived at after careful study of the situation. From the growers' point of view the recommendation that the fruit should be picked in the cool of the morning or late afternoon is also practical common sense advice. There seems no reason why pickers should not arrange their hours of work so that they might have a rest during the heat of the day, especially when to do so means the delivering of fruit in a better condition. Probably the article referred to will have been recognized by most of our readers as coming from Mr. Edwin Smith, of the pre-cooling plant. We regret that in some unexplainable way Mr. Smith's name was omitted when lifting the type into the forme, and that through this oversight he was not given due credit for the excellent paper so thoughtfully prepared for the benefit of our readers.

Weather Report

Abstract from weather records for July, 1913, kept at the Government Station, Balcom Ranch, Summerland, B.C.

July	Maximum	Minimum	Barometer Readings	Sunshine hr. min.	Rainfall (Inches)
1913					
1	78.0	58.0	29.52	12.48

Piano Contest.

Interest Just Awakening.

Not Yet Too Late To Begin.

Not as many as were anticipated took advantage of the opportunity to get extra votes that was offered at the Drug Co.'s special sale last week. Probably the contestants had not realized the value of having their friends take advantage of the sale. Similar offers will be made from time to time, and doubtless will henceforth be more largely patronized. The tempting offer that is being made by the Review should at once be taken advantage of, as a generous number of votes can be earned with little effort. The standing of contestants last Wednesday is as follows:

No.	Votes Cast.
2	9,000
6	9,000
7	9,000
8	9,000
9	9,000
11	9,000
14	28,660
15	9,000
17	9,000
18	9,000
19	9,000
20	9,000
21	9,000

College Matters.

Miss Messinger has resigned her position on the teaching staff of Okanagan College.

Miss Malita Skillen has recently received an appointment on the faculty as Instructor in Advanced English.

The position of Professor of Science and Housemaster is yet to be filled, but Principal Sawyer believes he has a line on a man suitable for the position.

Kamloops is to be a divisional point of the Canadian Northern Railway.

Friends here will regret to learn of the death of the infant daughter of S. P. French, Jr., of Vernon.

Miss Johnston of Port Moody is this week the guest of her friend, Miss Evelyn Brown. Miss Johnston, who is principal of the Port Moody School, reached here last Saturday.

Mr. Arthur C. D. Blanchard, late Chief Engineer of the city of Lethbridge, is expected to arrive here to-night. While here he will be the guest of his sister, Mrs. G. J. C. White.

Presbyterian services will be held in St. Andrew's Church next Sunday morning and evening. Professor Moore will sing in the evening. Rev. C. H. Daly's subject will be "Songs in the Night."

W. C. Kelley is having another block built on his corner lot near the Presbyterian Church. It will contain two stores, one of which will probably be occupied as a barber shop. J. A. Darke is the builder.

The Drug Company's piano has arrived and is now on exhibition in the Flower Show rooms. It is a beauty, and will, no doubt, strengthen the purpose of many of the competitors to win the coveted prize.

These will be sold at a Big Reduction, and at terms to suit the buyer.

J. W. S. LOGIE.

RIFLE ASSOCIATION.

The event for decision on Saturday last was the final stage of the Price Ellison Cup, class-firing conditions, with scoring as follows:

Distances	200	200	200	200	Total
Position	Prize	Knock-out	Knock-out	Knock-out	Prize
H.P.S.	35	35	35	35	140
W. Nelson	32	25	25	30	112
H. Dunsdon	32	23	28	27	110
F.R. Gartrell	30	32	30	18	110
O. Smith	28	28	27	25	108
G. Barkwill	26	27	27	25	105
J. Dunsdon	32	26	27	17	102
F. Nixon	31	26	26	19	102
G. Loomer	32	20	25	24	101
W. E. Ward	29	25	24	22	100
W. Smith	28	22	28	22	100
S. A. Liddell	24	26	26	21	97

These scores, when added to those made last week, decided the Cup winner, who proved to be H. Dunsdon, the captain of the association, with a total score of the same as last year's winner.

	1st Stg.	2nd Stg.	Total
H. Dunsdon	96	110	206
F. Gartrell	89	110	199
J. Dunsdon	92	102	194
W. Nelson	82	112	194

This week one of the most interesting competitions ever shot on the range commences. This is a competition based on the King's Prize (Bisley). The same distances, shots and conditions are observed, the event being shot in three stages, viz.:

1st Stage—7 shots at 200, 500, and 600 yards to-morrow.
 2nd Stage—10 shots at three hundred and 600 yards on Saturday, 28th inst.
 3rd Stage—15 shots at 900 and 1000 yards on Labor Day, 1st September.

There will be the three medals to be won, bronze for first stage, silver for aggregate of the first and second stages, and gold for the aggregate of the three stages, together with a special silver medal for those members who compete with neck rifles. These latter will receive certain points start over those members using match rifles. Everyone is urged to turn out and take part in this contest.

Local News Items

James Ritchie was at Vernon this week on a business trip.

Miss McQueen of Gladstone, Man., is a guest at the home of Mr. J. L. Logie.

Mr. and Mrs. A. B. Williams spent the first half of this week with friends in Kaleden.

Mr. and Mrs. J. Avar Black are expected here soon. It is understood that they will remain for about two months.

Mrs. A. H. Steven is contemplating a trip to her old home in "Bonnie Scotland" about the beginning of next month.

A. H. Clouston, son of Mr. and Mrs. R. Clouston, is visiting his parents here, having arrived on Saturday evening's boat.

Quite a number of Summerland people took advantage of the special trip to attend the Unity Club Concert at Naramata last Friday.

Mrs. Mason and her daughters, Barthea and Rubae, who have been visiting here and at Naramata, return to the prairies this week-end.

Mrs. Nelson Mitchell of Vancouver, sister-in-law of Mr. J. J. Mitchell, is at present on a visit at the latter's home in West Summerland.

The slick little motor launch, which has been the property of C. Noel Higgin has recently been purchased by Campbell Robinson, Naramata.

Miss Lucilla Garnett, daughter of Mr. E. Garnett, has returned to Calgary from Vancouver and Seattle, where she went after a week's visit with relatives here.

Rev. Mr. Habershom of Innisfail, Alta., preached to both morning and evening Baptist congregations last Sunday. Mr. Habershom will be here next Sunday as well.

Mr. Walter Wright of Okanagan College leaves shortly for a trip through the upper Valley in the interests of the College. Mr. Wright will make a special effort to get students to take the business course—his own department.

The Summerland Fruit Union has, through the Central Agency, recently received a large order from one jobber for peaches. This is for ten cars of Triumphs. While the price was not high yet it was said to be satisfactory, and will nett the growers a reasonable price.

Norman Alexander of the ferry service has been confined to his home for some days with a lame ankle. He received the injury while about his duties, but continued to work. Later it was found that ligaments had been torn, and he is only now getting about again.

Mr. A. J. Saunders, a former resident here, and now of Chicago, and who paid a visit to this place early this summer, expects to remove to New York city in the near future. He will there take charge of the New York office of the Birtman Electric Co., with whom he is now engaged.

Mr. and Mrs. Jos. Wells, formerly of Brandon, who have been guests at the home of their daughter, Mrs. J. N. Merrill, left for the Coast on Monday morning. They were accompanied part way by Mrs. Merrill and daughter Marjory. It is probable that Mr. Wells, who has sold his interests in Brandon, will permanently reside in Victoria.

Probably well over one hundred people from Summerland went up on Thursday to Kelowna to attend the Rogatta. A few went on the "Okanagan," more went later on the "Aberdeen," while both the "Skookum" and "Rowena" each took parties. A few returned on the "Okanagan," but many came on the "Aberdeen," arriving after midnight. The "Rowena" came early, while the "Skookum" remained until after the dance, arriving home early this morning.

The many friends of F. W. Pattison and of Mrs. Pattison will regret to learn of the latter's recent illness, necessitating an operation. News has been received here that she expected about two weeks ago to enter the hospital, and after an eight day's stay there would be taken to her home where she must remain for some days before undertaking the journey west. Some weeks before her marriage Mrs. Pattison was operated on for appendicitis, and it is supposed that she resumed her duties too soon after the operation.

Miss Eley has been visiting relatives at Peachland.

The date of the Fall Fair has been set for 30th and 31st of October.

Mr. and Mrs. E. B. May returned from the Coast on Monday evening's boat.

Mr. Alex. Steven is having a new packing house erected near the livery at West Summerland.

Announcement of the recent change in the Richardson Lumber business is made on page 2 in that company's advertisement.

Mr. and Mrs. Fred Manchester returned to Naramata from England on Saturday night. Mr. Manchester was about town early this week and looks in excellent health.

Miss Elora Lewis, who until early this spring was on the local school staff, is visiting at the home of Mr. J. L. Hilborn. Miss Lewis arrived here last Saturday night.

Some forty-five head of high-grade cattle are to be auctioned at Vernon by the Provincial Department of Agriculture. Attention is called to the ad. elsewhere in this paper.

The return limit on excursion tickets to the Vancouver Exhibition will be Sept. 9th not 19th as has appeared in the C.P.R. advertisement during the last two or three weeks.

In our report of last week's meeting of the School Board, Trustee Docking was stated as being absent. Those present were Chairman Robinson, and Trustees Docking and McIntyre.

Reeve Thomson arrived home from Victoria and Vancouver on Tuesday evening. Miss Thomson, who accompanied her father to the Coast, will remain with relatives in Vancouver for a short time.

Rev. Mr. Henderson and Mr. John Marshall of Peachland came down on Monday night to locate grounds for the Peachland picnic which is to be held on Tuesday, August 19. Crescent Beach was selected as the most suitable place.

Mrs. McKecknie, wife of Dr. W. C. McKecknie of Vancouver is a guest at the home of her brother, Mr. W. J. Robinson. Mrs. McKecknie came back with Mr. Robinson when he returned from Victoria early this week. Dr. McKecknie is expected here shortly.

If experiments being made by the Provincial Government are successful our lake will soon be stocked with a quantity of whitefish eggs. Harrison Lake has been so stocked, and it is the purpose of the government to stock Okanagan, Shuswap, and other lakes with whitefish, if found practicable.

Miss Edna MacLeod, who has so efficiently filled the position of local agent for the Okanagan Telephone Company, has resigned, her resignation to take effect on September 1st. Miss MacLeod has accepted a position on the teaching staff of the College. Her position in the telephone office will be filled by her sister, Miss Jean MacLeod. Miss Marjory Limmer will join the staff as an operator.

Mr. R. V. Agur has offered to put up a cup for dinghy racing which is to be competed for once a year at either Summerland, Naramata or Penticton. Mr. Agur's purpose in doing so is to encourage sailing races, and the best way to accomplish this is, he believes, through the comparatively inexpensive dinghy. It is probable that the first race for Mr. Agur's cup will be at the Penticton Rogatta, August 21st.

What might have been a serious fire was noticed early on Tuesday night at the packing house, and was extinguished before any serious damage was done. A quantity of planer shavings had been brought down from the mill in bags late that afternoon and thrown on the platform in front of and against the packing house. A few minutes later several of the bags were seen to be on fire. Those were removed from the others and thrown to the street where the fire was quickly extinguished. It is supposed that a cigarette stub, carelessly thrown away by a passer-by was the cause of the blaze. The packing house was closed and but four the timely appearance of Mr. C. N. Borton and another the fire might have gained considerable progress.

R. H. ENGLISH
 Early this week Inspector Cunningham's department condemned 250 boxes of apples, 240 boxes of pears at Vancouver for Codling Moth, also 125 boxes of peaches for worms. Mr. Cunningham asks if, in view of this, quarantine is not needed. He thinks only fools would import fruit from infected countries.
 The annual convention of the Union of B.C. Municipalities will be held in the Assembly Room of the Progress Club Chambers, Vancouver, on September 3, 4 and 5. Some time ago the club wrote to the union offering its quarters, and the invitation was accepted. On Wednesday, September 3, the members of the union will be the guests of honor at a luncheon to be given by the club.

Turks Recapture Adrianople.

THE MUCH-BESIEGED CITY WAS CAPTURED WITH VERY LITTLE RESISTANCE ON THE PART OF THE BULGARIANS.

With the entrance of Rumania into the present Balkan strife, having taken up arms principally against Bulgaria, the Sublime Porte has taken advantage of the situation and ordered her broken army to remarch on Adrianople. According to vague reports the much-beseiged city was captured with very little resistance on the part of the Bulgarians, who only had a small defending force. This picture, taken during the Bulgarian march on Adrianople, shows one of the many trenches that the Turks remained in for many days, and were almost starved out before the combined allied dash, while defending the now recaptured city.

CHARGE DISMISSED.

A charge was entered against Mr. W. B. Raincock at Penticton last week for removal of certain goods at the store formerly occupied by him, knowing these goods to have been sold at public auction previous to their removal. The trial resulted in dismissal of proceedings. It was shown that at the time the goods were seized Mr. Raincock was in Spokane and was not served with the usual warrant of distress. Upon his return he disposed of some of the goods and removed the remainder to other quarters, doing this, according to the evidence submitted, without knowledge that part of the goods had been sold by the sheriff.

AUDITOR CREHAN AGAIN BEREAVED.

Little Grace Crehan, the 15-year-old daughter of Mr. M. J. Crehan, municipal auditor, died last Friday at the family home, after an illness of five months. She was in a serious condition some time ago, but later it was thought that she would recover. However, a relapse occurred quite recently to which she succumbed. It is just five months ago since a sister, Mercy Ellen, aged 6, died. Grace took sick about two days after the death of her sister.

"Newspaper space costs money, but it's a wise investment."

U.S. Army Activities in Pacific.

PUTTING TWELVE INCH MORTARS IN POSITION IN FORT RUGER, OVERLOOKING THE CITY OF HONOLULU.

This photograph shows members of the Engineering Corp of the United States Army in Hawaii putting twelve inch mortars in position in Fort Ruger, which is the crater of Diamond Head Mountain. This fort occupies a commanding position overlooking the City of Honolulu.

While it is stated that the present American military activity is only part of a program laid down many months ago, the present dispute with Japan over the Californian Land Bill emphasizes this activity of the United States in strengthening its defences.

To remove the deposit from the inside of kettles, fill the kettle with water and add to it a drachm of sal ammoniac. Let it boil for an hour, when the fur found on the metal will be dissolved, and can be easily removed. Rinse the kettle well, then boil out once or twice before using the contents.

The secret of success is constancy of purpose.—Lord Beaconsfield.

Review "For Sale" Column.

APPLEDALE

Owing to the fact that a Kootenay proposition has been put on under the above name, we have had to make a change, and in doing so we desired to adopt such a name as would express some idea of the kind of property we have to offer.

To do this properly would be impossible on paper, but still we think in view of the great growing capacity of our lands, and the wonderful results obtained in that district from crops already grown, that there is no other name so admirably suitable as:

MEADOWLAND

This gives us Peachland, Summerland, and MEADOWLAND, and take it from us that the last is not the least.

SYNOPSIS OF COAL MINING REGULATIONS.

COAL MINING RIGHTS of the Dominion, in Manitoba, Saskatchewan and Alberta, the Yukon Territory, the North-west Territories and in a portion of the Province of British Columbia, may be leased for a term of twenty-one years at an annual rental of \$1 per acre. Not more than 2,560 acres will be leased to one applicant.

In surveyed territory the land must be described by sections, or legal subdivisions of sections, and in unsurveyed territory the tract applied for shall be staked out by the applicant himself. Each application must be accompanied by a fee of \$5, which will be refunded if the rights applied for are not available, but not otherwise.

The person operating the mine shall furnish the Agent with sworn returns accounting for the full quantity of merchantable coal mined and pay the royalty thereon. If the coal mining rights are not being operated, such returns should be furnished at least once a year.

Peachland Notes.

Regatta Day — Thursday 7th — broke with promise of fair weather, but before very long the wind rose making the water very cold and rough. Boats from Kelowna, Naramata, and Summerland began to arrive about noon, but the crowd was not nearly so large as other years because of counter attractions elsewhere.

Boys under 7 years — 1st, Gordon Town; 2nd, Douglas Morrison. Boys 7 and under 10 years — 1st, George Topham; 2nd, St. Wood. Boys 10 and under 13 years — 1st, W. Walkins; 2nd, Sam Whyte; 3rd, D. Chapman.

Miss Alice McDougald and Mr. Marr of Penticton spent Sunday with Mrs. McDougald. On Thursday morning Mr. Harry Urquhart left for Vancouver, where he will stay for some time.

Mrs. Jno. Robinson, senr., of Summerland, accompanied by Miss Maria McKechnie of Vancouver, are guests of Mrs. McDougald of the Post Office. Mrs. Harold McColl entertained on Monday afternoon in honor of her friend Miss Elsey of Summerland, who has been spending a short time with her.

A number of the Chinamen who recently arrived here, in anticipation of finding employment in the cannery, have left. It is quite probable, however, that at an early date Oriental labor will be needed.

MUNICIPAL COUNCIL

(Continued from page 1)

before the ratepayers for approval, and they were of the opinion that almost unanimous sanction would be received. No vote was taken on the matter. The discussion of this topic brought the inquiry if a report had been received from a meeting of Peach Orchard residents, the enquirer stating that that meeting was a picked one, and its action should not be taken as representing the wishes of the citizens of that neighborhood.

The Medical Health Officer reported that, with Constable Graham, he had inspected the slaughter house, and had given instructions that liquid refuse be conveyed by cement flume to a considerable distance beneath the surface of the earth, and that other refuse be burned further away from the slaughter house.

The accountant reported that \$4719.40 had been expended to bid in lots at the recent delinquent tax sale. A letter from Messrs. Mather-Yuill & Co. revealed the fact that less than \$500 would be required to put the town street lights in good condition.

ACCOUNTS PASSED. The following accounts were passed for payment upon recommendation of the Finance Committee: Pay Roll \$1376.58, Wm. Ritchie, lumber 46.94, R. H. English, feed 54.30, Dominion Glazed Cement 145.49, Pipe Co. 55.12, Robertson-Godson Co., pipe 32.90, Empire Man. Co., fittings 112.00, C. H. Cordy, insurance 98.50, J. J. Mitchell 21.94, Review Publishing Co., advertising 15.00, T. P. Thornber, electrical work 17.00, Postage 70.42, Freight and Express 22.50, Bank Interest 518.80, Employers Liability Assurance Co. 800.00, Municipal School Board, July 97.31, Expense five delegates to Victoria, Sundries, small items \$8,015.65

After discussion of several other minor matters the Council adjourned to meet again at the call of the Reeve.

The Piano We Give Away

DESCRIPTION OF PIANO

FINISH We furnish this Piano in either Oak or Mahogany finish MANUFACTURER'S DESCRIPTION

The dimensions of the above Piano are as follows: height, 4 feet 9 inches; length, 5 feet 2 inches; depth, 2 feet 4 inches; weighs, boxed ready for shipment, about 800 pounds, and the material and workmanship are of the best.

The three strings in unison with over strung bass, splendidly pitched scale and excellent sounding board produces the rich, deep, even tone peculiar to the Upton Piano, and so much striven for by manufacturers of high class instruments.

By comparison this Piano will be found better, heavier, and more artistic than most Pianos on the market to-day. Each instrument is fully warranted.

MANUFACTURER'S WARRANTY

The above Piano is warranted to give perfect satisfaction for a period of ten years, provided it is not exposed to extremes of heat, cold, wet or dampness.

SUMMERLAND DRUG COMPANY

RICHARDSON LUMBER CO.

We beg to announce that we have taken over the Lumber Business of Mr. A. Richardson, and intend carrying a complete Stock of Lumber, Building Supplies, etc.

For the present we are offering per thousand:

DIMENSION and BOARDS (SIZED)	GRADE A (Being Selected and Seasoned)	GRADE B (As Formerly Sold)
- - -	\$23.75	\$20.00
SHIPLAP - - -	\$25.00	\$21.00

A DISCOUNT of 20% on above prices will be given for **CASH.**

We are also prepared to quote Special Prices on all other lumber, and to arrange for very easy terms of payment, if desired.

For those intending to build this fall, now is the time to obtain Lumber and Building Material at a price never before offered in Summerland.

G. M. S. GORDON, Manager.

You Want That Piano

You'll Never Get Another as Easily

We'll HELP YOU

By giving you BIG VOTES for little effort and less cash

For ONE NEW SUBSCRIBER [year] we give - 5,000 Votes

For EACH YEAR'S RENEWAL we give - 3,000 Votes

DO YOU REALIZE what this means, and how quickly Votes may in this way be accumulated?

Come in, and we'll show you how to

GET THE PIANO

"The Review"

Naramata Notes.

School begins next Monday.
 Mr. Howard Rounds of Kelowna spent the week-end in town.
 BORN—To Mr. and Mrs. Burnett on August 8th, a daughter.
 Mrs. Bate, visiting her brother, J. Lyons, left on Thursday morning.
 Mr. Harold Steers of Summerland spent Sunday at the H. J. Wells home.
 Miss Louise Edwards of Moose Jaw is visiting at the home of Mrs. J. H. Pushman.
 Mr. Gerald Roe is entertaining his friend, Mr. John Day of Montreal, for a few days.
 Miss Orca Williams will return on Saturday from her summer's vacation at the coast.
 Mr. J. Biddal and family have moved from the Bartlett residence to reside in Summerland.
 Mrs. Hill arrived from Montreal on Sunday night for a month's visit with her daughter, Mrs. Jas. Dean.
 Mr. Ernest Noyes of Victoria is spending his three weeks' vacation with his parents, Mr. and Mrs. Wm. Noyes.
 Miss Evelyn Brown, of Summerland, and her friend Miss Johnston were guests of Mrs. R. C. Robinson on Wednesday.
 Mrs. Mason and daughters, Rubae and Thea, returned to their home on the prairies on Saturday. We are very sorry to lose them after their three months' stay here.
 The Sunday School picnic held on Wednesday, in a very delightful

spot in the park grounds was well attended, and a jolly time was had as at all their outings.

Mr. E. H. Lye, Fire Underwriter for the Western Insurance Co., was in town the latter part of the week adjusting the claim on the house of Mr. R. Reid, which was recently burned.

Mr. Harvey Atkinson of Ottawa is visiting in town, coming over from Summerland, where he formerly resided. Mr. Atkinson is looking over his fruit lot in Summerland.

The Flower Show in Summerland last Friday drew a large attendance from this place and several prizes on various entries were brought back here, Mr. Geo. Wolstencroft being especially successful in receiving seven first prizes on flowers which he entered.

The Kelowna Regatta was fairly well attended from this place. The "Skookum" made the trip, also the "Rowena" with a party invited to remain for a dance at the Mission. The affair was given by the Grant Smith & Co., Contractors from the Kelowna end of the line. All report a splendid regatta and a good time.

Mr. Wm. Mitchell, while driving to one of the railroad camps on Sunday had the misfortune to have a tip-over on route. Mr. Mitchell was thrown out and received several bad cuts about his head, and also wrenching his shoulder. Later crystals set in in the wounds of his face, which necessitates confinement at his home for a time.

Mr. George Nuttall is handing out some very neat cards announcing that Mr. and Mrs. Nuttall have taken over the Lakeside Hotel, recently carried on by Messrs. Roe

Bros. Mr. and Mrs. Nuttall have made arrangements for the refurbishing of the whole building. The hotel will be re-opened on September 1st, and we wish the proprietors all success, which we are sure their establishment will command.

Cleanings from Review of August 22nd, 1908.

An account of the visit of a C.P.R. survey party appears in the number of August 22, 1908.

"The party came by way of Princeton, up Five Mile Creek, and down Trout Creek. The new survey starts at Merritt, a new town in the Nicola, and runs down to Hope Mountain to the divide between Coldwater and the west fork of Otter Creek, which is crossed, then follows Summer Creek to Five Mile Creek, up this to the head of Trout Creek, and to the lake front. When questioned as to whether road would tap Summerland Mr. Carry would not volunteer any information beyond the fact that it would be on some bench to the west of the town. Chief Engineer Cartwright, brother of Col. Cartwright, accompanied the party."

Naramata held its first regatta on the 21st.

Mrs. Van Allen and daughter of Toronto are the guests of Mr. and Mrs. R. H. Agur. They will spend some time here before returning east.

Mr. G. A. McWilliams reports a deal whereby Mr. G. N. Gartrell disposed of his 20 acre fruit lot to Mr. Zimmorman, M.P., West Hamilton.

Peachland cannery is in full operation now, packing at the rate of 2000 cans per day.

... You can SELL IT if You Offer It in The ...
 Review "For Sale" Column.

The Summerland Development Company

Has a few **CHOICE LOTS** left in their great Closing Out Sale. These are offered at the original price, in spite of the fact that the value of the land has been greatly enhanced through the activities of the District.

NOW is your chance to Invest in additional Holdings; or, if you do not own an Orchard, to establish a Home in the Okanagan.

Both Improved and unimproved lands are offered. Those interested will be shown over the District at any time to suit their convenience.

F. Nixon	30	26	28	—	—	84
G. Barkwill	31	25	24	—	—	80

The second stage, at 300 and 400 yards, will be shot to-morrow.

A Wonderful Spectacle

Aviation The Sport Of All Sports.
Its Serious Relation To World Politics.

By Mr. J. O. ROBINSON.

The great sensation in world politics of recent years has been the race in armaments by the big nations. The central figures in this controversy are Germany and Great Britain, consequently lending an interest to Canadians which is personal. For the most part, in so far as Great Britain is concerned, the greatest attention has been paid to the navy, and the maintenance of her proud position as mistress of the seas. Germany's great strength lies in her magnificent army; however, she has lately been paying some attention to the upbuilding of her navy, with the result that the various war experts have had to sit up late at nights and figure overtime in order to properly compute the standing of the different powers. These expert scientists, however, have much more than that to worry them, because what is perhaps destined to upset all calculations in modern warfare is to be found in the wonderful strides made in the science of aviation. The possibilities of its effectiveness in the course of a conflict are only beginning to be realized, and the great powers are now spending a great deal of attention and much money in rushing the art towards perfection. It looks as though perhaps the balance of power might rest in this field, consequently the interest of the public has been worked up to fever heat over it. Besides being a necessity for the very existence of a nation, it furnishes a sport for the public in which only the wealthy may participate, although the cost of witnessing the feats of daring are only nominal. The Englishman is a true sportsman, consequently the pastime thrives over here. A company has been incorporated called the "Graham White Aviation Co., Ltd.," being named after that famous "bird man" who first leapt into fame through his daring effort to overtake Paulhan during the historic London-Manchester flight. They are the proprietors of the London Aerodrome, which is a magnificent tract of level ground, having an area of two hundred and twenty acres, situated at Hendon; and surrounded by delightful open country. The London Aerodrome, with its motto, "Wake up, England," is acknowledged to be the best flying ground in the world. Exhibition and passenger flights are given daily, weather permitting, throughout the year, and special displays are given every Thursday, Saturday, and Sunday afternoon. Race meetings are held every Saturday and holiday during the season; and during the summer illuminated night Flying Displays are also given.

For July 24th a Grand Aerial Fete and Battle of Flowers, under the patronage of the Lord Mayor of London, was extensively advertised, and in the morning, it being almost a perfect day we decided to go to Hendon. We took a motor bus north along Edgware Road, and had a delightful ride along the beautiful green boulevards of Maida Vale. After passing through Cricklewood we came into open rolling country, and drove along delightful green fields bordered by fine large beech trees, where a deep breath of fresh air is fully appreciated. In passing through the gates of the Aerodrome into the ground, the first sound that greeted us resembled the exhaust of a big locomotive. It was a biplane circling over our heads, and looked like half bird and half beast with wings at full spread. We got seats close to the course, and for a short while watched the aeroplane going up with passengers. For this purpose at first the biplanes alone were used. A boy would give the long wooden propeller a start and the engine would start to buzz. As the aviator gave her more gas the machine would slowly start to ascend with all the grace of a swan. After getting higher up he would give her more speed, and would glide along like a yacht at full sail before a stiff breeze. Occasionally some of the more experienced and daring drivers would do some stunts that would fairly make your hair rise. Excited spectators would gasp and try to smother screams as the aeroplane would turn quickly, making a spiral course down to the earth with its planes tilting at an angle of about 45 degrees. As he would get within two or three hundred feet of the ground he would make a straight shot for the earth. Just as you would be looking for a mangled machine, he would straighten out and alight on the turf daintily, and scurry along the ground like a duck on the surface of the water.

The very picture of speed in tangible form is the long narrow monoplane with wide spread wings. It looks like a huge beetle or devil's darning needle. As the first one slowly ascended into the air quite a commotion was manifest among the spectators. On attaining a great height it shot through the air like a huge thunderbolt. The extent of the fancy work performed in these machines is dipping down and then shooting up again, but for the most part a straight course is held. In preparing for descent, the driver would shut off his engine, and leaving behind him a trail of white vapor, would hurl himself to earth like a falling star. Like in the biplane, he would land just as easily and peacefully as the stopping of a motor car.

At 3.30 three machines lined up for the first heat of the Grand Speed Handicap. The course was marked by six tall pylons or pillars in each of which a man is stationed to see that they are not fouled. The first to start was a biplane, which flew from three to ten feet off the ground. The next was a more powerful machine, which flew from 25 to 50 feet up. The third was a monoplane, which flew away up in the air, and took the corners with wide sweeps, going at a terrific pace. The other races had four machines entered with a powerful monoplane flying high up. It was a pretty sight to see those biplanes turn the corners by sudden tilting of the planes, and thus keeping well on the inside of the track, while the monster monoplanes had to swerve far out, describing wide circles. Those machines, flying at the same altitude, would pass each other by shooting up to a greater elevation, and thus going over the opponent's head. The finish of the final was about as exciting as any race I have ever witnessed. The monoplane was slightly behind but passed the other competitors by shooting down towards the earth, and was thus assisted by gravity.

After the race, motor cars, decorated with flowers, drove by the judges, and the crowds were allowed on the field, where confetti, streamers of paper and flowers were scattered. Everybody popped everybody else with those weapons, making a pretty sight, which the moving picture men were not slow to avail themselves of. Large bombs were hurled into the air, and as they would burst thousands of flowers would be released on to the heads of the crowd. In the midst of this wild scene we seized the opportunity of inspecting some aeroplanes which to us was an eye-opener, so far as light weight and great strength are concerned. The engines, although of great power, are made as light as possible, one small sized one having ten cylinders. This battle of the flowers was a fitting and brilliant ending to one of the most spectacular events one could wish for, and if we had not so far to go to reach home, the chances are that we would have been the last to leave the field.

Inspector Cunningham early this week condemned a car-load of apples which arrived at Vancouver from California. Upon opening the car the fruit was found so badly infested with the Codling Moth that the larvae were crawling over the boxes. The car was at once sealed up again and ordered back to California.

T. B. Young has purchased the two former Sherk lots (opposite the Ritchie Lumber Yard) from W. C. Kolley. It is the intention of Mr. Young to erect immediately another feed store there for the storage of hay and chop. A feature of the new warehouse will be the installation of a gasoline engine and up-to-date grain roller grinder.

And Put Money in the Bank

The increasing cost of living has hit us as hard as it has hit you. It has meant fewer sales and smaller profits to us. We have had to sit down and consider how to overcome the trouble. We have had to find better markets and buy our goods more keenly. But the quality has been maintained

What we have accomplished in economy is YOUR gain if you buy here. You can now purchase cheaper and better, and you can put what you save in this way in the bank. Come in today, and compare our prices with what you have been paying.

Rates for Contract Advertisements furnished on application.
Copy for change of contract advertising must be in the hands of the printer not later than Wednesday noon to insure publication in the next issue.
In accordance with schedule of prices adopted throughout the valley, charges for advertising are now being made weekly. Heretofore when five issues were made in one month the result was a loss. By the new method customers are charged each week for just the amount of space used.

FRIDAY, AUGUST 22, 1915.

NOT YET.

We came away from the Council Rooms last Tuesday disappointed—sorely disappointed. Learning by chance just that morning that a meeting had been called we went hoping to hear a plan or plans outlined whereby matters of pressing importance would have prompt and due attention. But 'twas only another session of inaction, with nothing accomplished. Hours of desultory, aimless discussion ended without anything really being done.

Time is going rapidly. Much of the work to be done, if done at all, must be begun immediately.

Must this drifting process continue till a new board is elected? Were our public utilities the property of private corporations, and additional capital were needed for enlargement and improvement, the money would soon be found. Because they are municipally owned should not be, and is not, a handicap. Capitalists need only to be informed to distinguish our financial needs and municipal business ventures from those of a city wishing to erect fine public buildings or to build boulevards, and, with all due respect for the reeve's opinion to the contrary, the Review still believes in the advisability and practicability of issuing six per cent. debentures (perhaps short terms—if the market is likely soon to improve) to provide the necessary capital to increase the municipal plant. Every member of the board admits the urgent need for immediate action, yet not one came forward with a definite plan, unless it was Mr. Robinson with his proposal for the \$100,000 bonds.

If the debenture route is not feasible then what of Mr. Watson's proposition? There must be some way out of the difficulty! Anything rather than the present inanimate state. As the street light question has drifted, as the railway flumes question is drifting, and other matters are drifting, so is this likely to drift till the beginning of another year.

NEEDED CHANGE.

Next week the children of this community of horticulturists, situated in a valley where soil cultivation is almost the sole occupation, will reassemble to study. To study what? To become better agriculturists than their fathers can ever be? To know the why, how, and when of irrigation, or of the latest and best in the growing of fruit scientifically, or even to get the rudimentary knowledge leading up to these? No. 'Tis not for this that school curriculums are ordered. It would seem that everywhere the course of studies for our schools, whether urban or rural, was prescribed by the city man, who had in mind the training of the boy for a university education, or a place behind the counter, or at the desk; but never a thought for the broader life of the much needed tiller of the soil, who can go about his work as the chemist with his drugs.

And before we can hope to teach the young along such lines of practical knowledge we must find the teachers qualified so to teach, for very few of our teachers have been trained in agriculture, much less in horticulture. Is it not time our department of education was doing something to impart to our young some of the elements of education needed in our noblest and soon to be largest industry?

There is a ray of hope. A precedent is being created. An exchange says Ontario is making an earnest effort to reform its rural schools by adapting the teacher to rural needs. A summer school is being held at Guelph Agricultural College to give inspectors, normal school leaders, and others a broader view of the possibilities of agricultural education. Time B.C. got busy.

LOCAL NEWS.

We presume there never was a newspaper in any locality that gave all the local happenings. It is often that someone comes or goes that the reporter does not see. It happens that a family is missed several times. They get the impression that the editor does not care to mention them. This is a mistake. In most country towns the local work is the hardest work connected with a newspaper. A man may be a good editorial writer, but a flat failure in the local work, and vice versa. Editorial material is obtained by study, by reading newspapers, sometimes by using scissors. Persons and local happenings can't be read and clipped from other papers, not by a jugful. It takes physical as well as mental exertion to get out four or six columns of local news in a town of this size. Most people take the local paper to get the local happenings. Don't be afraid to tell the editor or reporter that you have friends visiting you. There are lots of people who are interested in your friends. You owe it as a duty to them to let your friends know of their doings. Perhaps you think the paper shows partiality, but just see if the paper doesn't treat you right if you give it a chance.

Liberal quantity of votes at the Drug Co.'s sale next week. See their ad. on page six.

Mr. W. G. Raby has recently purchased a thoroughbred driving mare. This mare has been quite a favorite among the horsemen in Calgary where she was purchased, and has participated in the derby races in that city.

Mr. and Mrs. R. J. Hogg of Penland are guests at the home of Mr. and Mrs. K. S. Hogg.

The residents of Upper Trout Creek are to meet at the home of F. A. Miller at 10 a.m. on Thursday, September 4th, for the purpose of defining the boundaries of their school district. All interested are urged to attend.

Conscience, Common Sense and Co-Operation.

Essentials to the Ultimate Success of Fruit Growing.

Mr. Smith's article on pre-cooling and picking fruit is worthy of commendation, and it is to be hoped that it will be read more than once by our fruit growers. It will be a great gain for the fruit, and greatly expedite work at the packing house if the fruit is brought in during the morning, and the afternoons be left free to prepare it for market and ship it.

If the best returns are to be secured for our fruit it will be necessary that all do their part in supplying the fruit in the best condition. It may be that some of it is rather small this year, and damaged by hail, and many of the peaches are wormy. We need to use our consciences and common sense in picking, sorting and sending in so as not to add to the expense of packing and cause a large proportion of culls. We should endeavor to have peaches not smaller than 90 to the box, though some a little smaller of Triumphs may be taken. These should not be as hard as bullets and yet need to be quite firm in order not only to stand up during the time necessary to get them to the consumer but also endure the much handling to which they have to be subjected owing to our complicated transportation service. Wormy peaches may not be quickly detected in picking as the little brown fellows hide at the stem end so the pickers need to look carefully as their presence condemns the fruit.

Recently a half car of peaches were condemned by the inspectors in Vancouver on this account, and the other half of the car of apricots because too ripe. The Central recently received quite a large shipment of peaches which they were puzzled to know what to do with both because they were too ripe to stand anything but a short journey and 10 per cent. of them had worms. In none of these cases was Summerland fruit involved.

Florence crabs, except picked early, will not hold up but be a loss, they should now be all in and Transcendents as well should be picked. Plums and prunes should be picked for shipment when about three-quarters colored. The season for same is past already. It is expected that there will be a market this year for most all apples, even if small or hail injured.

Another word. This is a trial year of the new unions and the Central Selling Agency. We feel confident that success is going to crown our efforts. There are a number of growers who are privately marketing their fruit or disposing of it through other agencies who say, "we will come in with you next year if you are successful." That is to say they are ready to share the benefits and take no risk, or to laugh at the failure and say "we told you so." This is not true co-operation, and however much we may have their good wishes they do not count for much. I would like to tell them that their small concerns and rival businesses are in many cases helping to lower prices both to themselves and us. Failure to co-operate, if continued, will be death to the fruit-growing business. If any of the independents have any superior wisdom or knowledge they will be most benefited in the long run by sharing with the rest and presenting an united front to the trade. Instances could be given to show that prices have been lowered this year in the way referred to and it has been calculated that many thousands of dollars will be lost to the growers of the Valley by splitting up the business among so many concerns.

G. J. Coulter White.

GEORGE ATKINS.

Death has removed from our midst a most excellent young citizen in the person of Mr. George Atkins.

Mr. Atkins, who has been an invalid for many weeks was well and favorably known throughout the district as an artist of unusual ability and a man of excellent character.

The deepest sympathy of the community goes out to the bereaved young wife who came here from her home in England but a few short months ago, as well as to the brother of the departed, to whom he was so devotedly attached.

Interment was made in St. Stephen's Church Burial Grounds, the services at both house and grave being conducted by the Rev. H. A. Solly.

Fruit Condemned.

Under big headlines declaring Okanagan fruit as unsatisfactory the Vancouver dailies have been announcing the arrival of a car of apricots and peaches in that city as unfit for use. This is doubly regrettable because of the fact that householders had been asked to wait for this fruit for canning purposes.

In a telephone communication with the head office of the Okanagan United Growers, Ltd., the Review learns that this car, which was shipped from Penticton, was inspected by Mr. Robertson the Manager, and until further information can be obtained it is not wise to make further comment, other than that there is a possibility of another side to the story. It is said that much opposition has been raised among the jobbers against Okanagan fruit; due to its being offered direct to consumers at the City Market. This latter information is not from the United Growers. Mr. Robertson, the Manager, is now in Vancouver in connection with the condemned car.

LOCALS.

Miss Edith Sharp went out on Wednesday morning to resume her teaching duties at Nanaimo.

Mrs. B. L. Hatfield and daughters Marjorie and Marian spent the week at Kaleden with friends.

The Players will go to Kelowna on Saturday where they will give an entertainment that evening.

A number of railway men recently walked all the way from Hope to Summerland in search of work. This is a tramp of about 65 miles over the roughest kind of country.

Mr. J. H. Kennedy, engineer for the V. V. & E. Railway, stationed at Vancouver, came into the Valley this week on a tour of inspection of the K.V.R. and V.V. & E. routes.

Prof. Broad of Calgary College preached in the Methodist Church last Sunday. Prof. Broad will continue to assist Mr. Lee, who gives part of his time in the next few weeks to the Naramata district.

Mr. T. E. Clay's wife and daughter have joined the rest of the family here. Mr. Clay and the boys have been living in the Campbell house but the family are now moving into the Moreland cottage.

Athol Agur, with the K.V.R. survey party near Princeton, walked all the way home on Saturday night, arriving early Sunday morning. Mr. Agur returned on horseback and will be absent for about two weeks.

The Faulder house, which of late has been used by the K.V.R., has been moved from the right-of-way. Mr. J. J. Warren, President of the K.V.R., has kindly lent this building to the trustees of the Upper Trout Creek school district for a school until more permanent quarters are provided.

Local News Items

Mrs. R. C. Lipsett will not receive next Wednesday.
 School opens for the fall term next Monday morning.
 Mr. J. Avard Black returned here on Wednesday evening.
 Pay up your Review subscription and secure the piano votes given free.
 A car-load of fat steers arrived here on Wednesday for L. C. Woodworth.
 Mrs. Mason and the Misses Mason left for home last Saturday evening.
 Mr. C. F. Garnett of the jam factory went up the lake on Wednesday's boat.
 Muir Stewart was a passenger to Vernon on the Okanagan Wednesday morning.
 Just think of it! Three thousand votes on the piano for a year's renewal to the Review.
 Mr. R. B. Forsyth, the new principal of the High School, arrived here on Monday.
 Mr. G. L. McWilliams went down to the Coast on Wednesday morning where he will remain for perhaps two weeks.
 If you have no use for a piano you can make some friend happy by helping to get it, and it costs you nothing.
 The Women's Institute gratefully acknowledge receipt of \$5 from Mr. J. McLean, towards the Flower Show Prize List.
 Do you realize what this means? A high grade piano to be given away. Get votes at the Drug Store and Review office.
 Mrs. L. Munro of Vancouver, who has been the guest of Mrs. Arnett, returned to the Coast on Wednesday morning.
 Mr. G. J. C. White attended a meeting of the directors of the Okanagan United Growers, Ltd. at Armstrong on Monday.
 Miss A. E. Williams, teacher of the Town School, who has been spending part of her vacation at Kaleden, returned on Wednesday.
 Mr. and Mrs. Charles Hatfield, parents of B. L. and A. S. Hatfield, left for Prince Albert on Thursday morning where they will visit Mrs. Hatfield's sister.
 The Government Sale of Dairy Cattle, which was to have been held on August 22nd at Vernon, has been postponed for one week. Attention is called to the official ad. elsewhere in this paper.
 The Peachland Sunday School held their annual union picnic on Tuesday at Crescent Beach. About 60 or 70 were brought down by the "Skookum" while quite a few attended from Summerland.
 Miss Phyllis Pitt of the Government Telegraph Office, Kelowna, will spend this week-end with Miss Limmer. Miss Pitt also spent last Sunday here, and was so delighted with the place that she arranged to return.
 Ed. Garnett has disposed of one of his orchards, the 10 acre lot on which he now resides, to Mr. F. J. Beggs of Vancouver. The deal was made through the Vancouver and local offices of Mr. G. A. McWilliams. Mr. Beggs will probably come here this fall to reside.
 Mr. H. C. Moller recently lost a hog which he valued at about \$30. The pig died suddenly and the only explanation which Mr. Moller can give is that it had an over-feed of green alfalfa, resulting in bloat. It had not been accustomed to alfalfa, and had been turned into a field of it shortly before.
 A number of Summerland citizens attended Penticton's first regatta, held on Thursday afternoon. The "Skookum" took a number down, while others drove. Among the events was a dinghy race for a cup offered by Allen Agur. This was won by the Agur dinghy, and the cup therefore comes back to Summerland.
 Mr. J. F. Smith, Provincial Market Commissioner, went this week to Washington and Oregon to investigate conditions there. Mr. Smith is very optimistic regarding the prairie market for B.C. fruit. Prospects are good for profitable prices throughout the season. The Provincial Government has recently started a campaign of advertising B.C. fruit in Alberta papers, under the direction of Mr. Smith.

Tea Special

J. E. PHINNEY

LOCALS.

Who gets the piano?
 Rev. F. W. and Mrs. Pattison are expected to arrive to-night.
 Mrs. Van Allen is suffering from an attack of typhoid fever.
 Mr. J. Beddell and family are now occupying the J. M. Sutherland cottage.
 Did you hear and examine the much talked of piano at the Flower Show?
 Miss V. Lawson of Oyama has been engaged as teacher for the Upper Trout Creek school.
 Jas. Mitchell, son of J. J. Mitchell, left on Thursday morning for a visit to friends on the Prairies.
 Senator and Mrs. Kirchoffer expect to return east next week. The Senator has greatly improved in health during his visit here.
 The Women's Missionary Society of the Methodist Church held a picnic on the private grounds of Mr. W. J. Robinson on Thursday afternoon.
 The Presbyterian services will be held in St. Andrew's Church in the morning, and in the Methodist Church in the evening. Rev. C. H. Daly will conduct both services.
 Prairie Chickens, which have been protected in the Okanagan for several years, may be shot between Sept. 15th and Oct. 15th, according to a recent order-in-council. The season for grouse, deer, duck, etc. begins Sept. first.
 The Cannery this week has been experimenting with Triumph peaches and they find that it is impossible to remove the skins. All the peaches put up had to be peeled with a knife. On this account they have stopped buying Triumphs. They inform us, however, that they will require twenty tons of Yellow St. John's.
 Mr. C. Kennenburgh of Calgary terminated a pleasant visit here by taking the boat from Penticton on Sunday evening. While here he was the guest of Mr. and Mrs. W. Raby. Mr. Kennenburgh expressed himself as charmed with Summerland and what he saw here, and declared that it was his intention to make this his home at some future date.
 The Lawn Social, given by the Woman's Auxiliary on the rectory grounds last night, was a most successful affair. The evening was perfect, and the grounds were illuminated by electric lights. Throughout the evening music, both instrumental and vocal was enjoyed by the large number present. The ladies are also delighted with the financial results.

Cash Notice

As it requires Cash to run my business, as in other lines of trade, I therefore must insist on my patrons settling their Accounts promptly at the 15th of each month.

LETTERS TO THE EDITOR.

The Columns of THE REVIEW are open to the public for the discussion of matters of general interest. No notice can be taken of anonymous communications. Letters intended for insertion must be authenticated by the name and address of the writer, not necessarily for publication. The opinions of correspondents are not necessarily those of the Review.

THE STREET LIGHTS.

The Editor, Summerland Review.

Dear Sir:

I notice by the last issue of your paper in the report of proceedings of the Municipal Council, that they had received, in response to their request, an estimate of the costs of putting the street lighting system into proper repair, truly a step in the right direction. I do not, however, gather that any action was taken or ordered. Is it possible that the matter rests there for a further period, no one knows how long?

And then I suppose Councillor Lewis will say that "nobody has made any complaints to him."

We had the honor and credit of having the first electric light plant under operation in the Valley, and it was a good one and a credit to the place. Now every town in the Valley has its electric plant, and we have the worst of the lot, and it has come to that point under municipal mismanagement, and I am

SORRY FOR IT.

Summerland, B.C.
 16th August, 1913.

THE C.P.R. TRACK EXTENSION.

The Editor, Summerland Review.

Dear Sir:

Respecting the proposed grant to the C.P.R. of some four hundred feet of the roadway opposite the Fruit Packing Buildings, near the wharf for use as a siding.

The main objection to the proposal raised at the recent meeting in Peach Orchard was based on the following particulars:

The roadway is sixty feet wide. Only forty feet is available for traffic. This is due to the steep hill covering the westerly twenty feet the removal of which, including the construction of a retaining wall, would be so expensive as to be prohibitory. The platform in front of the buildings takes up eight feet, the company would probably require fourteen feet. Eighteen feet of available road would be left. Wagons lined up at the platform when fruit is being unloaded require, say, another seven and a half feet. This would leave at such times, a roadway of ten and a half feet, or two thirds the width of an ordinary lane, for traffic, at this point on the road that is the main highway along the west shore of the lake.

Wagons turn without backing in from twenty-five to thirty feet, and in almost every case teams leaving after unloading fruit have to turn for the return journey.

How the fruit business and ordinary traffic can be carried on under such conditions without congestion and being a menace to safety proved unsolvable to the meeting.

I may add that the details mentioned were not discussed at the special meeting of the Council at which the motion approving of the grant to the C.P.R. for space for a siding on the road allowance was carried.

Yours truly,

J. A. KIRK.
 Summerland, B.C.
 August 18, 1913.

Got Off Easy.

Some half dozen boys, all old enough to know better, got themselves into trouble last Sunday and were fortunate in being allowed to go with a severe reprimand and an order to keep away from the C.P.R. wharf in future. For some time both the car slip and wharf have been favorite places for youthful bathers, and the privilege has of late been much abused. On Sunday, with no one around to prevent, there was considerable rowdiness, and one of their mis-deeds was to put one of the express trucks over the end of the wharf. The bunch were rounded up the next day by Constable Graham, and though at first disposed to plead innocent they at last admitted guilt, and as the agent was not disposed to push the case they were allowed to go with the understanding that they must in future keep away from the C.P.R. property.

Some mean tricks have also been played at the other wharf, including the dumping over of heavy joints of cement pipe and if continued the perpetrators are not likely to get off so easily as in this case.

College Notes.

Reference was made in the last issue of the Review to appointments on the staff of Okanagan College. Possibly some fuller statement may be desirable.

Miss Melita H. Skillen has been appointed instructor in Advanced English and German. Miss Skillen is a native of New Brunswick, a graduate of the Brooklyn, N.Y., High School, and a B.A. of Cornell University. She graduated with honor in English, receiving her degree in 1911. During the past two years she taught Advanced English and German in the High School at Olean, New York. For two summers, while a student at Cornell, she was engaged in one of the noted Settlement Centres in New York City. She is Vice-President of the Student Volunteer Movement of New York State, and has much experience in Y.W.C.A. work. She has fine recommendations as a teacher, and should make a valuable addition to the College staff.

Mr. J. H. Montgomery has been appointed House Master and In-

structor in Chemistry and Physics. Mr. Montgomery is a native of Oshawa, Ont. After graduating from the High School at Oshawa and taking a normal course at Whitby, Ont., he went to North Dakota and engaged in teaching. Soon however, he entered the University of North Dakota, from which he graduated with high rank, particularly in the Natural Sciences. He has taken post-graduate work in Chemistry, Physics, and Biology at the University of North Dakota and at the University of Chicago, from the latter of which he expects to receive the degree of M.A. this month. He was Principal of the High School at Crystal, North Dakota, and Principal of the High School and Superintendent of the Public Schools in Forest River, North Dakota. Mr. Montgomery is strongly recommended by those who have known his record, and by the Board of Recommendations of the University of Chicago. He is an athlete, a leader among young men, and has always taken a deep interest in the welfare of his pupils. The College Board has reason to believe that Mr. Montgomery will prove a capable and efficient House

Gurney-Oxford The Aristocrat of the Kitchen

After a glimpse into the kitchens of thousands of well managed homes throughout Canada, the Gurney-Oxford Range may truly be spoken of as the "Aristocrat of the Kitchen." It is the first range to-day in Canada both in point of appearance and cooking efficiency.

A bright nickel trimming that never tarnishes, a smooth polished top that never requires black lead, this range is to woman just one beam of gratification.

But besides its handsome appearance, the Gurney-Oxford more than fulfils the purpose every range is built for—successful cooking. It contains

a device called the Economizer which not only actually saves one ton of coal in every six burned in the ordinary range, but so regulates the heat in the oven that deliciously dainty cakes, golden brown biscuits, and light flaky pastry are sure results from every baking.

It is a range which elevates woman from the constant toil and labor in the kitchen to a higher level of life. Its Economizer allows her to go visiting or shopping and keeps a low fire ready for her return, when by simply turning the lever a hot fire is quickly produced.

Employ the Gurney-Oxford in your household.

Bulletin on Pear Blight

(Fire Blight of Apple and Pear.)

By J. G. HALL, Plant Pathologist, Washington Experiment Station.

This disease is common and very serious in many parts of eastern and central Washington upon pear and apple trees. The disease is caused by a bacterium that lives in the layer just between the bark and the wood of the twigs, and sometimes the trunk. It causes this tissue to decompose and turn black. It spreads through this layer up and down and around the twig or trunk of the tree, and may eventually kill it. After the layer between the bark and the wood has been dead for a short time the bark above it also blackens. This surface blackening is usually a few inches behind the blackening beneath the bark. The leaves of the pear turn black, and those of the apple a brownish black.

The disease spreads most rapidly in the spring, the bacteria being picked up on the feet and mouth parts of aphids, bees, beetles, and flies, and deposited upon trunks, branches, or flower clusters by them as they fly about the orchard in search of plant juices for food.

To fight the disease the affected parts should be cut out and burned at once so as to prevent any further spread of the trouble. In removing the diseased portions be sure to cut far enough below the affected parts to get all of the diseased tissue, usually several inches below the outward appearance of the disease. After each cut the knife should be disinfected by dipping it into a solution of corrosive sublimate, 1 part to 1000 parts of water. The cut ends of the twigs or the wounds made by the removal of cankers upon the trunk or large limbs should be wiped over with a sponge or cloth saturated in the same solution, and, when dry, painted with a good oil paint in order to prevent the entrance of other troubles.

If the disease is severe in the orchard it will be advisable to reduce the amount of water to a minimum in irrigated districts, and in case the orchard is in clean cultivation it should be put into a sod of some sort, for a time, so that the growth will be checked and hardened.

Great care should be taken in the fall to see that there are no diseased parts left in the orchard to produce spring infection. Frequent inspection trips should be made through the orchard during the growing season, and any signs of the disease promptly removed. These trips may be made every two weeks with good advantage.

Pear blight can be controlled if prompt, careful, and thorough attention be given it by ALL.

International Egg Laying Contest

The Second International Egg-Laying Contest, held under supervision of the Provincial Department of Agriculture, at the Exhibition Grounds, Victoria, began December 2, 1912, to August 2, 1913.

Total Eggs laid from December 2, 1912, to August 2, 1913.

(Pen 36 contains 5 birds only)
Average price of eggs, 35 cents per doz. Pen temperatures—highest, 100 degrees; lowest, 40 degrees; mean, 69.2 degrees. Rain fell on one day only. The past month has been the hottest experienced during the contest. The birds in Class One were able to stand the heat better than Class Two, as far as egg production was concerned.

In Class One Pens 15 and 17 are still fighting it out for premier place. 17 reduced 15's lead by seven eggs last month, and on the last four days have laid four eggs more than 15. Both pens have had one bird broody, each. The next four pens are so close up that the final issue will be hard to predict. Pen 4 displaces 18, which drops to fifth place. The former pen distinguished itself by producing 143 eggs during the month. Pen 14 following with 133. On July 3rd, Pen 20 laid eight eggs between sunrise and sunset, all being laid in the nests.

In Class Two Pen 32 still lead, increasing their score over Pen 39 by eight eggs. Their position, however, is by no means impregnable, as through broodiness during the last week, they only laid 11 eggs. Pen 31 were leaders with 120 eggs, gaining 14 eggs on Pen 39. The latter pen are still, however, nearly 100 eggs ahead of 31.

This year 120 birds in Class One have laid more eggs in eight months than Class One last year (138 birds) laid in twelve months.

Total eggs to date—Class One, 16,308; Class Two, 12,688; Grand Total, 28,996. Total eggs for month, 4,060. Next Contest starts October 28th; twenty additional pens are to be built immediately.

A delicious filling for tomato salad is to fill the tomato shells with minced pineapple, celery and chopped nuts. Mix with mayonnaise and garnish with green.

What we accuse others of is often the very thing of which we are guilty. Be sure you are clean and wholesome before looking for dark spots on your neighbor's character.

APPLEDALE

Owing to the fact that a Kootenay proposition has been put on under the above name, we have had to make a change, and in doing so we desired to adopt such a name as would express some idea of the kind of property we have to offer.

To do this properly would be impossible on paper, but still we think in view of the great growing capacity of our lands, and the wonderful results obtained in that district from crops already grown, that there is no other name so admirably suitable as

MEADOWLAND

This gives us Peachland, Summerland, and MEADOWLAND, and take it from us that the last is not the least.

SYNOPSIS OF COAL MINING REGULATIONS.

COAL MINING RIGHTS of the
Dominion, in Manitoba, Saskat-
chewan and Alberta, the Yukon
Territory, the North-west Terri-
tories, and in a portion of the Pro-
vince of British Columbia, may be
leased for a term of twenty-one
years at an annual rental of \$1 per
acre. Not more than 2,560 acres
will be leased to one applicant.

In surveyed territory the land
must be described by sections, or
legal sub-divisions of sections, and
in unsurveyed territory the tract
applied for shall be staked out by
the applicant himself.

Each application must be accom-
panied by a fee of \$5, which will
be refunded if the rights applied
for are not available, but not other-
wise. A royalty shall be paid on
the merchantable output of the
mine at the rate of five cents per
ton.

The person operating the mine
shall furnish the Agent with sworn
returns accounting for the full
quantity of merchantable coal
mined and pay the royalty thereon.
If the coal mining rights are not
being operated, such returns should
be furnished at least once a year.
The lease will include the coal min-
ing rights only, but the lessee may
be permitted to purchase whatever
available surface rights may be
considered necessary for the work-
ing of the mine at the rate of \$10
an acre. For full information ap-
plication should be made to the
Secretary of the Department of the
Interior, Ottawa, or to any Agent
or Sub-Agent of Dominion Lands.

W. W. CORY,
Deputy Minister of the Interior.

FALL FAIRS.

There will be 52 fall fairs held
in B.C. this year, thoroughly
covering the province, which has
been divided into numerous cir-
cuits.

The dates for the towns included
in circuit four are as follows:

Salmon Arm - Sept. 23 and 24
Kamloops - Sept. 24 to 26
Kelowna - Oct. 1 and 2
Armstrong - Oct. 8 and 9
Penticton - Oct. 27 and 28
Summerland - Oct. 29, 30 and 31
Vernon - Nov. 4 to 7

Peachland Notes.

Mr. W. J. Robinson of Summer-
land spent Thursday in town.

Mr. C. C. Inglis of Okanagan
Landing spent part of last week at
the home of Mr. Thos. Powell.

Mrs. W. C. McKechnie (Dr.) of
Vancouver was the guest of her
sister, Mrs. McDougald for the
week-end.

Mesdames J. B. Robinson, W. A.
Lang, and Geo. Mitchell attended
the Flower Show in Summerland
last week.

Mrs. Wm. Logan returned on Sat-
urday night from a trip through
Manitoba, and as far north as Ed-
monton.

Mr. Thos. Holmes and family of
Claresholm, Alta., who have been
living in the Bulyea House for
some time left for home this week.

At a public meeting held on Mon-
day evening it was decided not to
hold another regatta here this year,
the committee having withdrawn
the cups for 1918.

A district meeting of the Method-
ist Church was held here last Thurs-
day. Several ministers from out-
side places were present. A public
meeting in the evening was attend-
ed by all denominations.

Mr. Robert Forsyth, late High
School teacher here, came in from
Vancouver for the opening of the
Masonic Hall and institution of a
lodge here. He will proceed to
Summerland for the opening of
school on Monday.

Miss Nancy Buchanan won the
championship of the Okanagan for
swimming (lady's) at the Regatta
in Kelowna on Wednesday. Thurs-
day's sports were rather disappoint-
ing to Peachlanders as the canoe
crews were defeated in every race
by Kelowna.

The united Sunday Schools pic-
niced at Crescent Beach on Tuesday
going thither by the "Skookum"
and barge. A very enjoyable time
was spent, especially by the little
folks. A game of baseball was play-
ed between the little boys and the
men, which resulted in favor of
the boys by—"We don't like to
say how much." The trip home
over the placid bosom of the Okan-
agan was a dream, as one young
lady remarked.

On Tuesday, August 12th, "Tre-
panier" Lodge of Free Masons was
instituted by District Deputy Ham-
ilton Lang of Vernon, in the hall
lately fitted up by Mr. A. W. Mil-
ler. Several visitors from Ver-
non, Kelowna, and Summerland
were present. The officers elected
for Trepanier Lodge are as follows:
W. A. Lang, - W.M.
Grant Lang, - Sr. W.
Albert Chilton, - Jr. W.
A. W. Miller, - P.W.M.
Thos. Powell, - Secy.
Dr. Buchanan, - Treas.
Capt. Tewart, - Chap.
Robt. Forsyth, - Sr. D.
Jas. Moore, - Jr. D.
Arthur Pope and
Wm. Riach, - Stewards
Jos. Fleming, - Guard
Oct. Pope, - D.C.
John Hyde, - Tyler

A banquet had been daintily
prepared by the ladies of which the
Masons partook, when the business
of the evening was concluded.

The Piano We Give Away

DESCRIPTION OF PIANO

FINISH

We furnish this Piano in either Oak or Mahogany finish

MANUFACTURER'S DESCRIPTION

The dimensions of the above Piano are as follows: height, 4 feet 9 inches; length, 5 feet 2 inches; depth, 2 foot 4 inches; weighs, boxed ready for shipment, about 800 pounds, and the material and workmanship are of the best. The cases are finished in Mahogany or Oak, double veneered inside and out to prevent warping or splitting. The Piano has 7 1-3 octaves, repeating action, three pedals, full iron frame covering wrost plank, and built up pin block of five different layers of hard maple, direction of grain alternating in successive layers to prevent to the greatest extent possible the Piano getting out of tune.

The three strings in unison with over strung bass, splendidly pitched scale and excellent sounding board produces the rich, deep, even tone peculiar to the Upton Piano, and so much striven for by manufacturers of high class instruments. The brackets, pedal guards, hammer rail, and continuous hinges are all heavily nickel plated. The case itself is highly polished, making a first-class artistic instrument in finish, appearance and tone.

By comparison this Piano will be found better, heavier, and more artistic than most Pianos on the market to-day. Each instrument is fully warranted.

MANUFACTURER'S WARRANTY

The above Piano is warranted to give perfect satisfaction for a period of ten years, provided it is not exposed to extremes of heat, cold, wet or dampness.

No More Triumphs

Canery Now Ready For Tomatoes and Late Peaches.

New Machinery Installed.

This week will see the last of the canning of Triumphs at the Canery. In all less than three carloads of this variety have been canned, and all have been put in 10 lb. tins to be sold as pie fruit. Triumphs being cling stones the skin only has been removed and the fruit canned whole.

For some time about twenty Chinamen and a number of girls, and perhaps a dozen or more men have been employed.

Quite a lot of new machinery has been installed, including a rather complicated machine for the purpose of filling tomato tins, a machine called an exhauster, through which the tins filled with fruit are passed before the covers are put on. This exhauster brings the temperature of the fruit up to about boiling point during the three minutes the cans are passing the fruit from one end of it to the other. Treated thus it is not necessary to puncture the tin before cooking, and hence the labor of puncturing and soldering is dispensed with. A new automatic capper for the placing and sealing of the covers has been installed. This, in addition to the older machine, which is used for the larger tins. After the cover has been fixed the tins are placed in a large iron basket and lowered into a steam retort, two of which have but recently been installed. In this way the contents are cooked under steam pressure at a temperature of about boiling point. From here the basket of tinned fruit is plunged into a vat of running water, when it is quickly cooled, and then removed to the warehouse. Before placing in the cans the fruit is all dipped in boiling water and skinned.

Other new appliances put in by the new management are some copper steam jacket kettles for the making of syrup.

The next to be canned will be tomatoes and Fitzgerald, Crawford and Elberta Peaches, in fact the local manager states that they will take the most peaches from the man who delivers the most tomatoes, as the sale of their canned peaches depends upon the quantity of canned tomatoes they can offer. It is expected that tomatoes will be coming in the first of next week.

RIFLE ASSOCIATION.

The weather conditions on Saturday at the range were very trying, a tricky, gusty wind being difficult to overcome. The event was the second stage of the Special competition based on the King's (Bisley) conditions, 10 shots at 300 and 10 at 600 with scoring as follows:

Distances	300	600	St.	Tl.
H.P.S.	50	50		100
G. Loomer	45	48		88
W. Nelson	44	39		83
Rev. D. E. D. Robertson	37	36	10	83
G. Barkwill	43	37		80
H. Dunadon	44	34		78
F. Gartrell	44	31		75
O. Smith	43	31		74
J. Dunsdon	38	35		73

*Start given for those using government rack rifles. The leading scores in this competition are:

	1st Stage	2nd	Tl.
G. M. Loomer	85	88	173
W. Nelson	86	83	169
F. R. Gartrell	93	75	168

There will be practice at the long ranges on Saturday next, and on Monday, Labor Day, the final stage of the competition will be decided, 15 shots at 300 and 15 shots at 1000 yards.

Constable E. C. Graham went east to Winnipeg leaving here last Wednesday morning. Mrs. Graham, who has been for some weeks in Hamilton, Ontario, but is now in Winnipeg, will return with Mr. Graham. The serious illness of an aunt is the occasion of Mr. Graham's going east. During his absence Mr. C. N. Borton will do police duty.

Labor Sunday.

Special Sermons At Churches Next Sunday.

"Labor Sunday" will be generally observed in the churches not only of Summerland but throughout the continent next Sunday, the day immediately preceding Labor Day. This is being done at the suggestion of the American Federation of Labor and the Federal Council of the churches of Christ in America.

Labor Sunday was inaugurated by the Department of the Church and Labor of the Presbyterian Board of Home Missions, now known as the Bureau of Social Service, and for several years was observed exclusively by the Presbyterian Churches. It has now become an interdenominational international occasion.

Both sermons in St. Andrew's Church will be along this line. Rev. C. H. Daly's subject for the evening will be "You and your Job." He has not announced his morning topic. Mr. D. McKellar will sing at this service.

Rev. R. W. Lee of the Methodist Church will preach in the evening on "Christianity and the Modern Social Crisis."

Rev. F. W. Pattison will preach on "The Gospel of Labor" in the morning and "The Carpenter of Nazareth" in the evening.

Professor Broad will preach at the Methodist Church next Sunday morning.

Car Shortage.

Fruit Being Held For Cars.

The value of the pre-cooling plant as a storage for delayed shipments has been shown this week. At present there is a serious shortage of refrigerator cars, and though there is more than a carload in storage, and more fruit coming in rapidly, no cars are yet in sight.

Three straight cars of peaches have been shipped by the local Union this week, and the fourth lies in cold storage awaiting shipment. Considerable fruit is being shipped by express by private citizens and the smaller shipping companies, while Mr. A. Stuart will probably ship his second straight carload at the end of this week. This will go to Regina.

Will Wed Next Week

Two Former Members of College Faculty will be Married in Nova Scotia.

Miss Eunice Winnifred Haines and Professor A. G. Campbell will be married next Thursday, September 4th, at Freeport, N. S., the home of the bride. The wedding will be in the Freeport Baptist Church at 2 p.m.

Miss Haines was for several years one of the teachers at Okanagan College, being a member of the faculty when it first opened. Professor Campbell was a member of the teaching staff at the same time, but has spent the last two or three years in Chicago. After the wedding ceremony Mr. and Mrs. Campbell will leave for Quebec, where they will board ship for England. Their many Summerland friends will, with the Review, wish them a long and pleasant and prosperous life.

POSTERS PROHIBITED.

We shall have a tidier post office lobby henceforth. Many a citizen must have regretted the unsightly appearance of the walls of the lobby of our post offices, for which condition the Postmasters were in no way responsible. The town office particularly has been used as a public bill board much to the annoyance of Postmaster Hayes, and no doubt at times a sore trial to his patrons. A recent order issued by the Deputy Postmaster General changes all this. The posting of any notices other than those directly connected with post office work is henceforth prohibited. Not even religious notices or notices relating to lost articles will be permitted to be posted.

Harry K. Thaw And His Host.

SECRETARY OF STATE BRYAN REFUSES TO ACT OFFICIALLY.

This photograph shows Harry Kendall Thaw as he appeared when entering the jail and courthouse at Sherbrooke, Quebec, in the custody of Chief of Police Bourdreaux, of Sherbrooke.

That Sherbrooke appreciates the honor of having Harry K. Thaw as its guest for an indefinite period is shown by the cordiality with which they have received him. He has been given the best "room" in the "house," and his highness, the Chief of Police, has shown his solicitude by heartily greeting Harry every morning, and inquiring of him if he could do anything further to add to his comfort.

Sherbrooke is in a high state of excitement over this sudden publicity, but it has arisen to the occasion and already the city's merchants are congratulating themselves on this not unwelcome advertising.

How long will he stay? Secretary of State Bryan has, however, telegraphed to William Sulzer, Governor of New York State, that the United States Government could not act officially in the Thaw case.

Girl Of Thirteen Wins Wireless License.

THIRTEEN PROVED TO BE HER LUCKY NUMBER.

William Sulzer, dethroned Governor of the State of New York, has thirteen letters in his name, and he was impeached on the thirteenth day of August; on the other hand thirteen figures conspicuously throughout the life of Woodrow Wilson, President of the United States, but instead of being a hoodoo for him it seems to figure in his lucky column.

Allice McConaughty, the thirteen-year-old Cinesnati school girl who is the first person to obtain an operator's license under the new laws regulating wireless telegraphy on the Great Lakes of the United States; in her case thirteen proved to be a lucky number.

The license was issued before the inspector noticed he had made a mistake in the age given in her application.

"I did give them the right age," declared Allice, whose father is a national bank examiner in Ohio. "I sent for the blanks, and filled them out myself."

Her work on the demonstration set was perfectly satisfactory. Miss McConaughty installed her own apparatus at home, doing all the wiring, and even erecting the fifty foot "aerial."

A. J. Woodburn, who left the Government Telegraph and Telephone service to join the Okanagan Telephone Company, re-entered the employ of the government some weeks ago.

Mrs. J. Downton, who recently underwent an operation at the Kelowna Hospital returned home last week-end, and is making good progress toward full recovery of her usual health.

Municipal Schools

Opening Of New Session.

The educational work of Summerland and district is now in full swing for the autumn session, and teachers and pupils alike, invigorated by the long summer holiday, have entered upon what will be a full and interesting program till Christmas. The enrolments this session are markedly satisfactory, and the usual readjustment of the classes, etc., accounting for the alteration in figures as compared to this time last year.

At the Central School there are 136 pupils enrolled for the session's work. Mr. Mott's enrolment being 23, Miss Rothwell's 38, Miss Ballantyne's 37, and Mrs. Lister's 35.

Miss Williams is again the teacher at the Town School, and her enrolment this year is 30 as compared with 38 of last year.

At the Junior School, Garnett Valley, Miss Lister has a class of eight, and is expecting that the total number will not exceed eleven.

Piano Contest.

Campaign Begins. Livelier Interest in Competition For Piano.

Considering with what little effort on the part of themselves and a few friends will be required to make a contestant for the Drug Company's piano the sole owner of the beautiful Cabinet Grand Upton Piano now on exhibition, it is strange that more of those nominated have not entered into the campaign with a determination to win. It is not yet, however, too late for anyone of those with low scores to enter into the campaign and shortly outdistance the leader. In fact such a thing would not surprise us. After all it would only need half a dozen new subscribers to the Review and a few renewals and some small purchases at the Drug Company's special sale to put the tail-end in the front.

The most active contestants are numbers 14, 26, 27, 49, 64, and 65. Numbers 15, 28, 33, 34, and 36 have not done much as yet. The co-operation of a few friends with a little activity from the contestant might put any one of these in the lead. The question is, who is going to own this \$400 piano. Anyone may have it who will enter into the contest with a determination to succeed.

Here is a list of the standing of the contestants on Wednesday, August 27th:

Air Dried Apricots

Successful Experiment by Inspector Lyne.

Will Save Big Waste.

Growers need not hereafter lose over-ripe apricots. Inspector W. H. Lyne in a recent interview advised the Review that to throw away apricots because of over-ripeness is not only a serious loss but an unnecessary waste. Inspector Lyne, who at one time was a California fruit grower, is familiar with the process used in that state for the drying of prunes, peaches, and apricots, and has been experimenting here on the latter fruit. He showed the Review some excellent samples of local sun dried apricots which he said should be worth not less than 10 cents a lb. to the grower, which would be equal to 2 cents a lb. for the ripe fruit. \$10 would equip any orchard with the necessary outfit, and the expenditure of but little labor is required. Mr. Lyne has promised the Review to give our readers a bulletin describing the process so that any grower may dry his own fruit. It will be from the utilizing of what is now too often culled in the various fruits grown here that the greatest profits will accrue.

THE POLLARDS AT EMPIRE HALL

A large and appreciative audience assembled in the Empire Hall on Thursday night for the one night performance of "The Last Waltz," excellently produced by Pollard's Australian Juvenile Opera Company. Summerland residents turned up in full force, and a large contingent of the audience came over from Naramata, the "Skookum" running a special trip for their convenience.

The two scenes of the light variety entertainment were full of brightness in song and dance, and several members of the company evidenced particular talent, and scores were frequent. The solo and chorus dances, particularly the Hawaiian, were picturesque and pleasing, and each individual member of the caste worked hard in order that there should be no slackening in movement or interest throughout the evening.

The very slight plot is used excellently to give force to the operatic effect, and both scenes are laid at the Manor house of a certain impecunious Irish landlord.

Among those whose play is worthy of particular commendation were Miss Queenie Williams, who, as La Belle Butterfly, was full of vivacity, dancing and singing delightfully, and earning hearty applause. Teddy McNamara made a capital comedian, and was well received, and Miss Patsie Hill as Phillis, proved herself the possessor of a pretty voice and dainty manner.

The songs of the Misses Nellie McNamara and Phyllis Phillipson were also very popular during the evening, especially their duet from "Il Trovatore." Messrs. Willie Bevan, Willie Pollard, Leslie Donagney, and Charley Bennett also did well.

The entertainment went well from start to finish, and the light humor of the dialogue and the gaiety of all the musical numbers make of "The Last Waltz" a most enjoyable evening's program. The company are playing to-night at Ponticton.

The regular monthly meeting of the W.C.T.U. will be held on Monday afternoon next at three o'clock in the West Summerland Baptist Church.

COUPON

Cut out this Coupon, and present it at The Drug Store, and they will exchange it for 100 Votes in the \$400 Piano Contest.

Review Want and Sale ads. give Good Results.

SEALED TENDERS addressed to the undersigned and endorsed "Tender for Jetty and Dredging at the North Arm of the Fraser River, B.C.," will be received at this office until 4.00 p.m., on Tuesday, September 30, 1913, for the construction of Jetty and Dredging at the North Arm of the Fraser River, B.C.

Plans, specification and form of contract can be seen and forms of tender obtained at this Department, and at the offices of C. C. Worsfold, Esq., District Engineer, New Westminster, B.C.; W. Z. Earle, Esq., District Engineer, Winnipeg, Man.; J. S. MacLachlan, Esq., District Engineer, Victoria, B.C.; J. L. Michaud, Esq., District Engineer, Post Office Building, Montreal, P.Q.; J. G. Sing, Esq., District Engineer, Confederation Life Building, Toronto, Ont., and on application to the Postmaster at Vancouver, B.C.

Persons tendering are notified that tenders will not be considered unless made on the printed forms supplied, and signed with their actual signatures, stating their occupations and places of residence. In the case of firms, the actual signature, the nature of the occupation, and place of residence of each member of the firm must be given.

Each tender must be accompanied by an accepted cheque on a chartered bank, payable to the order of the Honorable the Minister of Public Works, equal to five per cent (5 p.c.) of the amount of the tender, which will be forfeited if the person tendering declines to enter into a contract when called upon to do so, or fail to complete the work contracted for. If the tender be not accepted the cheque will be returned.

The Department does not bind itself to accept the lowest or any tender.

By order,
R. C. DESROCHERS,
Secretary,
Department of Public Works,
Ottawa,
August 18, 1913.

Newspapers will not be paid for this advertisement if they insert it without authority from the Department.—45074.

Naramata Notes.

Mr. Carroll Aikins is reported to be on the sick list for the past few days.

Mrs. George Nuttall and Mrs. Hill were in Penticton on Monday on business.

Miss Marjory Kermen returned to her home in Grand Forks on Sunday morning.

Mrs. Hugh Davies conducted business for the new Roe Hotel in Penticton on Wednesday.

Miss Orca Williams opened the school work on Monday with an enrolment of thirty-nine pupils.

Mr. Wm. Mitchell is still confined at his home with the injuries received from his recent accident while driving.

The road gang has discontinued work for this season after finishing some very acceptable improvements on the roads nearby.

We are glad to know that Mr. Bunt will not leave his charge here to do the church work in Princeton, as was first reported.

Mrs. Blair and son Frank were down from the construction camp two days of last week, spending one in Penticton on shopping duties.

Roy Boothe and Joe Morsch are both attending school in Summerland. The former is taking his second year's work at Okanagan College and the latter is starting his first year in High School.

Messrs. Walter Land and Thomas Kenyon had a bad accident on Sunday while driving down the steep road above Ritchie's lot. The buggy was loaded and without a brake. The horse started running and the drivers were unable to stop it. When they reached the bottom at the turn the buggy was overturned and the horse broke loose, being caught farther down the road, entangled in his harness and a barbed wire fence. Both Mr. Land and Mr. Kenyon were badly shaken and bruised, but considered it a lucky escape at that.

Fruit Crop Prospects Reported Poor.

There is every probability of a short apple crop all over the continent with resultant good prices. The last monthly bulletin on fruit crop conditions issued from Ottawa on August 15th reports very light crops with total failures in some parts of Ontario, with prospects of less than a 50 per cent. average. Nova Scotia will fare little if any better. The lower mainland of B. C. will have somewhat more than 50 per cent. of a full crop but quality is likely to be poor. Prospects are better in the interior valleys of B.C. than anywhere else in Canada.

Plums are yielding a satisfactory crop in nearly all districts.

In B.C. the peach crop is good with every prospect of its being harvested in good condition. In the Niagara district it is fair with generally satisfactory crops throughout.

One of the best cherry crops yet harvested in Canada was that of 1912. Some of the early B.C. fruit was soft but later varieties were very favorably commented upon in the markets that they reached. Throughout Great Britain and the continent weather has been unfavorable, resulting in short crops or poor quality or both.

The history of the apple crop in the United States for the last month has been very similar to that of Canada, a slight deterioration in all directions. With normal conditions in their home markets they will be able to absorb practically all the apples grown, with the exception of the boxed fruit from the Pacific Coast. There are, however, so many substitutes for apples that anything like high prices in European markets would easily draw out an export quantity equal to last year. Trade conditions, however, are looking normal in the United States, and there is no particular reason for anticipating any unusual limitation in consumption.

Kaleden Comments

Mr. and Mrs. J. B. Findlay have a niece staying with them from Vancouver for a time.

Mr. H. H. Elsey, of West Summerland, came in last Friday to gather the remainder of his large crop of apricots, and to clear up his lot.

Mr. Thos. Dale, of West Summerland, accompanied by his brother Mr. John Dale and Mr. Fred Brind called here last Thursday on their way to Fairview.

Captain and Mrs. Hatfield left on Wednesday last for Edmonton and Prince Albert, Saskatchewan. They expect to be absent visiting various friends for several weeks.

Mr. Russell B. Hunter, of Armstrong, came in last Saturday to teach the public school here. He commenced work on Monday morning when there was an attendance of seventeen scholars.

The Misses Davies, of Vancouver, who have been visiting their aunt, Mrs. Louis Kerr, for the past month, went up to Penticton last Friday to stay with Mrs. Addie Kerr before returning to the Coast.

Miss Pardie and Miss Burchell left Thursday after spending the summer here and will resume their work of teaching at the Coast. A fire broke out at Walter Gillespie's place last Friday, but with the prompt assistance of Kaleden friends it was speedily extinguished.

FALL FAIRS.

There will be 52 fall fairs held in B.C. this year, thoroughly covering the province, which has been divided into numerous circuits.

The dates for the towns included in circuit four are as follows:
Salmon Arm - Sept. 28 and 29
Kamloops - Sept. 24 to 26
Kelowna - Oct. 1 and 2
Armstrong - Oct. 8 and 9
Penticton - Oct. 27 and 28
Summerland - Oct. 29, 30 and 31
Vernon - Nov. 4 to 7

When turnips are young, wash them carefully and boil without peeling.

A SNAP

If Sold This Week.

Complete Camping Outfit or House-Tent, consisting of 12' x 14' Tent, 14 by 17 Fly, all necessary Siding, Studding, Ridge-pole, etc.; Two Doors; One Window; Folding Bed, with genuine Felt Mattress; Folding Cot and Mattress; Four-Hole Cookstove; 10 x 12 Rug; Folding Table and Kitchen Cabinet (both home-made); Four Chairs; a few Dishes, Cooking Utensils, Tubs, etc., thrown in. Everything is new, used only since last March, and is in fine condition, and cost me about \$120.

The FIRST OFFER OF

\$50.00 Cash

takes the lot. This week only. Apply to owner, c/o Mr. Dunrobin, Hotel Summerland.

Vivid Glimpses at Real Warfare.

A Realistic Reproduction at the Imperial Services Exhibition.

By Mr. J. O. ROBINSON.

In London, the centre and capital of one of the greatest Empires known in history, sights are afforded to the visitor which are of the deepest interest. What merely satisfies the curiosity of the foreigner in this hub of our Empire means more to us, and much goes on which inflames and thills the Imperial sentiments of the British subject, and so far as outward appearances are concerned none can surpass the Canadians. For the first few weeks of one's visit to the Old Country he gets into the whirl and turmoil of the commercial world, and is battered hither and yon, drifting with the mad rush like a ship without a rudder. On every hand you see families go down and out, overcome by the struggle for gold, with the consequence that their social positions, by them held so dear, are forever lost, and from all appearances little or no sentiment is wasted over them. It is, without a doubt, a cold blooded world, and the poor victims, with broken spirits, mix with such lower classes, or perhaps even exist on the embankment, doing their best to evade the vagrancy laws, and going from workhouse to workhouse in order to keep body and soul together. After a few such morbid sights, one's fine Imperial convictions begin to waver, and a great feeling of pity for these poor wretches of humanity springs up. But then these are only the outward signs, which are manifest in the early part of your visit. After a time, when you meet different people and get more intimately acquainted with the true life of the nation, you see things in a different light. No phase of British life is more absorbing as a study than that true broad Imperial spirit, to which the statesmen devote their lives, and very often most of their money.

A visit to the Imperial Services Exhibition, held at Earl's Court, gave us a splendid insight into work being done along these lines by statesmen and prominent Imperialists. The exhibition is designed to provide a national object lesson in the making and keeping of the British Empire. A number of the most distinguished members of the Army and the Navy have formed, under the patronage of Field-Marshal H.R.H. The Duke of Connaught, H.R.H. Princess Christian of Schleswig Holstein, the First Lord, and the Board of Admiralty, the Secretary of State for War, and the Army Council, a General Committee which provides not only practical knowledge of the mechanism of modern warfare, but also the spirit of true Imperialism. That convincing atmosphere of reality, which is everywhere visible in the exhibition, is the result of unselfish and ardent work of prominent naval and military men, with deep knowledge of their respective professions.

The first feature of special interest was enough to stir the enthusiasm of any Britisher, because the gallant dash of the Antarctic heroes for the South Pole, and the noble way in which they faced death was vividly brought before us, by seeing all the appliances used by them in the frozen south. Tents, huts, snow banks, with their sledges, furs and sleeping bags lying around, also the interiors of their shacks, just as they used them, were shown. It was so cleverly arranged that we could get an insight into their struggle through the long winter much more intimately than through magazine stories. All their weapons and means of transportation were on exhibition. The scientific instruments used by the party were there also, the most interesting of which was that instrument by means of which the location of the pole was found. The camera which took the pictures attracted much attention, but the most interesting and valuable of all was Captain Scott's diary.

From here we went through various departments of the huge building, where all the weapons and uniforms of the army were on display, to an open space where in a pond was a facsimile reconstruction of the after part of the cruiser "Lion"—one of the newest and most powerful of British battle cruisers. The people who go aboard are treated as guests of the ship, and are permitted to explore the living quarters of officers and men where "life below decks" is fully revealed. The immense guns and torpedo nets on the deck are shown by men who, in their time have been in the service, and consequently know what they are talking about. Nearby is a complete wireless telegraphy installation in working order. It is in charge of an expert wireless operator, and demonstrations are given of the theory and practice of this wonderful science. After passing through another large building, where the commercial men exhibit their wares, we came into the midst of the "Midway," where the merriment was in full swing. Shoot the chutes, merry-go-rounds and hurdy-gurdys were going at full blast, while many side-show barkers were announcing and promising the most wonderful shows on earth. It was interesting and even exhilarating to hear them shout. Before going to the Empress Hall to see the grand spectacle of Naval and Aerial Warfare, about which we had heard so much, we took a walk around the grounds and saw a real armoured train which stands on a track near the underground station. Near it is an entrenched camp, a fine replica of military engineering, which affords an extraordinary, vivid impression of the realities of active service in a foreign country.

The show itself was little short of a marvel. We secured seats in the vast amphitheatre, and the sight before us was some 5,000 square yards of water about three feet deep, denoting the sea. On the opposite side was the model of a strongly fortified city, made realistic by painted scenery which stretched from one side of the building to the other. The management claim that this spectacle of the British Fleet is no mere scene presented by a showman with a sense of the dramatic, although being dramatic enough, it adds to it an actuality, a high purpose. The object is to give the public an opportunity of observing at close quarters a naval bombardment and battle, fought under modern conditions, and the manner in which our great warships are handled in war and in peace. In their programs they state, "It behoves us all of this nation—whose liberty, security and prosperity have largely been won by fighting, and can only be preserved by continual readiness to fight again—to know, so far as we are able, what fighting really means."

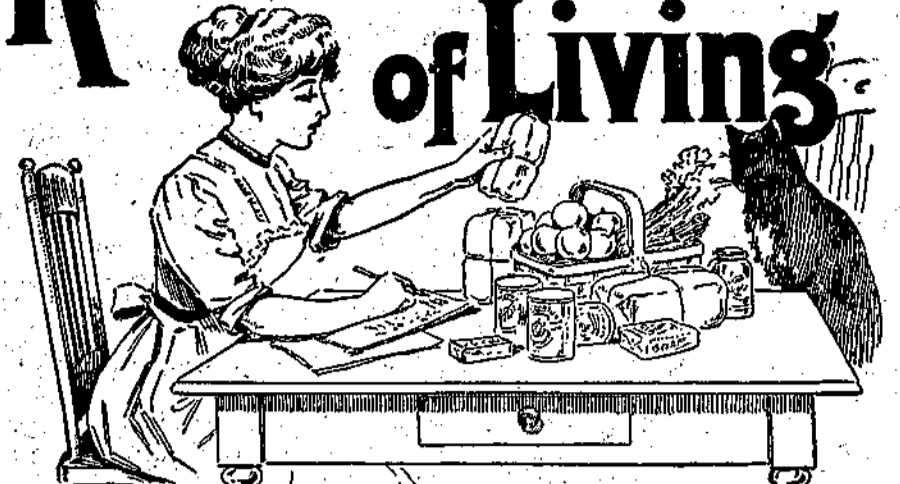

The first part of the program was devoted to the manoeuvres of models of the great ships (which are about 20 to 30 feet long, driven under their own power) in time of peace. Before the entry of the ships the band struck up the Spanish National Anthem, and King Alfonso of Spain and his party appeared in a box quite close to us. The second part of the program was devoted to the bombardment of the city. The warships circled around into position, and roared and spat fire with deadly effect on the fort. The enemy answered in similar fashion, while aeroplanes swooped high in the air, dropping bombs which exploded on reaching the earth. Submarines also worked in deadly fashion, finally sinking and burning two of the ships. The playing of the guns on the fort at length got it afire in several places, and the scene was so realistic that I found myself sympathizing with the wounded and dying, and those left destitute by the ravages of fire. It is about as close as anyone could get to the real thing, and fully bears out the truth of that old saying, "War is Hell."

After the flying of the white flag signifying the surrender of the city, and the departure of the fleet, one boat came up to the royal box, where two men arose from the interior and King Alfonso was shown the workings and inner mechanism of the machine, when he manifested a keen interest, evidently being much impressed, as everybody seemed to be, with the mimic battle.

IT CERTAINLY PAYS TO

ADVERTISE IN "The Review."

Reduce the Cost of Living

And Put Money in the Bank

The increasing cost of living has hit us as hard as it has hit you. It has meant fewer sales and smaller profits to us. We have had to sit down and consider how to overcome the trouble. We have had to find better markets and buy our goods more keenly. But the quality has been maintained

What we have accomplished in economy is YOUR gain if you buy here. You can now purchase cheaper and better, and you can put what you save in this way in the bank. Come in today, and compare our prices with what you have been paying.

The Summerland Review

PUBLISHED BY THE REVIEW PRINTING & PUBLISHING COMPANY LIMITED.
RALPH E. WHITE, MANAGING DIRECTOR

SUBSCRIPTION RATES: \$2.00 PER YEAR, IN ADVANCE. SIX MONTHS \$1.00.

Advertising Rates:

LEGAL NOTICES.—Twelve Cents per line for the first insertion; Eight Cents per line for each subsequent insertion.

LAND NOTICES.—\$7.00 for 60 days, \$5.00 for 30 days.

WATER NOTICES.—20 days, 150 words and under, \$2.00; each additional 50 words, \$1.00.

THEATRICAL, ETC.—50c. per inch for first insertion, and 25c per inch each subsequent insertion.

LOCAL NOTICES or Readers, Immediately following regular locals, 20c per counted line; 10c per line each subsequent insertion. Half these rates when accompanying display advertisements.

LODGE NOTICES, Etc., 25c. per week, per column inch.

FOR SALE Advertisements, Etc., 2c. per word first week; 1c. per word each subsequent week.

Transient Advertisements payable in advance.

Rates for Contract Advertisements furnished on application.

Copy for change of contract advertising must be in the hands of the printer not later than Wednesday noon to insure publication in the next issue.

In accordance with schedule of prices adopted throughout the valley, charges for advertising are now being made weekly. Heretofore when five issues were made in one month the result was a loss. By the new method customers are charged each week for just the amount of space used.

FRIDAY, AUGUST 22, 1913.

COUNCIL AND PROGRESS.

NO APOLOGY need be offered for again referring to the Municipal Council's attitude toward the question of increased water storage facilities and enlarging and improving the mains and laterals of the distribution system. That there is pressing need for immediate action—action that will result in much of the work being done before frost comes—will be admitted by all who are familiar with the increasing demands on the water service, and must be doubly apparent to the members of the Council who so frequently listen to the demands of our citizens, and therefore this point need not be argued.

But while ready to admit the justice of the demands made upon them, and agreeing that to meet the requirements increased storage facilities are needed, and the south main ditch must be lined, the Council immediately dodges behind the plea of "no money" as an excuse for not supplying these needs, and lets the matter rest at that, evidently considering that this now time-worn excuse amply justifies their failure to grapple with the situation which has arisen since the authorization of the five per cent. debentures.

Granting that the necessary capital could not be procured through the customary channels, were there no other means of providing the labor and material needed? Neither is the recent suggestion of a citizen whereby these might be made available necessarily the only other way out of the difficulty. Had our councillors shown an unanimity of purpose, and an enthusiastic determination to face their obstacles, a way out of the difficulty would have been found ere this.

Though we have suggested that the rate of interest on the recent bond issues be altered to meet the change in the money market, it may be that the money actually needed for this work could have been found by other means, even though a high rate of interest were paid for a short time. It were better that even ten per cent. be paid, and the work be proceeded with, than that we wait for a possible easing of the money market.

But what is the truth about the money question, and has the Review been taking the absurd stand with reference to selling our bonds that the Reeve believes we have? Months ago the "war scare," without doubt, caused a general world-wide stringency, but the strings were gradually loosened when the probability of a general European conflict became remote. In fact, so far has the reaction gone that London has invested more money in Canada during the first six months of this year than in any six months previously. At no time has there been a serious lack of capital for legitimate business, though the banks have had a good excuse to check the wild speculations in sub-divisions, and of curbing would-be cities in over-expenditure on streets, sewers and other public works. But where have bona-fide utilities, revenue-producing, suffered for additional capital, provided the current price was offered?

The trade returns prove that business has not suffered. July 1913 shows a revenue to the Dominion Government greater by one million dollars than July 1912, and in the four months ending July 31 Canada's revenue showed an increase of five millions over the corresponding months of 1912.

Money may be had, but not as cheaply as two years ago, and with industries offering good returns and the stock market low with many "bargains" going it is not likely to be cheap.

Here is what no less an authority than the Assistant General Manager of the Canadian Bank of Commerce says of the money situation:

"In the so-called financial stringency of the past year it is a mistake to say that money has been tight for legitimate purposes. So far as our bank is concerned I know that not one legitimate application from business men, traders, manufacturers or others has been refused; we renewed credits, and in many instances actually increased them.

"The position of Canadian municipalities, generally speaking, has also improved owing to the cleaning up process that has been in progress for a year. The lesson taught many of them will, I hope, prove wholesome. They will not be prepared to undertake large improvements until they first know whence the money is to come."

He also says "I don't look for 'cheap' money."

Pay the price and we'll get the goods, and we can better afford to pay than to do without.

Perhaps it is useless to offer six per cent. debentures, but all do not see it that way. Kelowna is marketing some recently authorized five per cents, and as they do not expect to get more than 85 for them it is proposed to issue some \$27,000 of six per cents. to make up the discount. These are for sewers and schools, compared with which ours might almost be termed "industrial." It is certain that a wise expenditure of even a considerable sum of money on our utilities would at once increase the value of our properties, both as revenue producers and marketable propositions many times over the amount so "co-operatively" invested.

THAT INFANTILE PARALYSIS and the disease known as Limber neck in chickens are caused by one and the same germ is the declaration of a bacteriologist who has for years been investigating the disease so fatal to infants. His theory has been confirmed by other scientists. The malady, which is very prevalent in some sections, appears during the fly season, and it has been shown that the disease, which originates among the fowls is transmitted to the children by the larvae of the fly. This disease has baffled medical skill for two hundred years.

THE TRUTH PLEASE

WHAT do you think of this? "Vernon last year held the First Apple Show in the Valley." This from a press dispatch which is being sent to the press throughout the province and elsewhere by the secretary of the Vernon Board of Trade, in opening his publicity campaign for the Vernon Apple Show to be held on October 22 and 23. The secretary of the Board of Trade of that city must either be a recent arrival in the Valley, and has made no effort to ascertain the facts, or is intentionally misrepresenting. For years Summerland has held an Apple Show, nor has it been patronized locally only. Penticton, Naramata, Peachland, Kelowna, and even the towns to the extreme north end of the Valley compete for the prizes offered. In fact the Apple Show held annually at Summerland has attained a province-wide reputation. When arranging the dates for the Fall Fairs for 1913 throughout the province, October 29, 30, and 31st were allotted to the Summerland Apple Show.

Why should not the credit of our province be extended to the municipality for the purpose of securing money at the cheapest possible price for the further storage of water and other municipal needs? To make a direct loan for that purpose might be creating a precedent. But, if as was recently reported in a Vancouver daily, the Provincial Government is to negotiate a loan of nearly half a million dollars for greater Vancouver sewerage purposes; a precedent would already have been created justifying the province's going security for a short term loan made by our municipality for an equally worthy purpose.

GOOD INTENTIONS are seldom negotiable for cash. Ask the lazy school boy why he doesn't study and advance with his class. He will tell you that he intends to sometime, but he never does. Ask any improvident man or woman why they don't lay up something for a rainy day. They will tell you that they intend to sometime—but they never do. Ask any slow, unprogressive business man why he doesn't discard his old antiquated ways of business and adopt new, up-to-date progressive methods of sales and advertising. All such will tell you they intend to next week or next month or next year—but they never do.

BRITISH COLUMBIA will have as visitors during the late summer, a large number of noted geologists, who will come to inspect the principal coal areas of the Province, and of the Yukon, at the close of the session of the International Geological Congress to be held in Toronto early next month. The visitors expect to make a thorough inspection of the chief colliery areas, visiting among others, the extensive hard coal deposits now being opened up by the Grand Trunk Pacific. This is the first time the International Geographical Congress has been held in Canada. One of its chief objects is to make a complete study of the coal supplies of the globe.

SWEDEN IS LIKELY to be the first nation to adopt prohibition. The Prime Minister of that country recently declared that prohibition was the only effective means of preventing drunkenness, and that all other attempted means of reform had proved ineffective and insufficient to stop the evil. In political circles his speech is taken as an indication of his government's policy and his belief to foreshadow the introduction of a bill for the prohibition of all spirituous drinks in Sweden. In this the Prime Minister will be supported by the King, the Crown Prince and many national leaders. France, which country supplies Sweden with most of its intoxicating drinks, is likely to be the greatest hindrance to the enacting of the law.

Governor Of New York State Who Faces Impeachment Charges.

New Yorkers live on excitement, and all the state is a stage upon which is enacted sufficient comedy and tragedy to keep the nerves of the most temperamental at large. One who doth tread upon another's heels, so fast do they follow. A police official has been sentenced to death for inciting murder, many other police officials have been sent to prison for grafting, a state senator has just "gone up" for demanding money for public service, and now the Governor of the State is charged with gambling campaign funds. Conditions look very serious, but Governor Sulzer, it is said, will not submit to impeachment by the Legislature. He is defiant, and insists that he will remain in office, and continue to exercise his authority if he has to sit and sleep in the executive office in order to retain possession.

Our Philosopher

HAVE the courage to cut the most agreeable acquaintance you have when you are convinced that he lacks principle; pass a friend's infirmities but not his vice. He that does a base thing in zeal for his friends, burns the golden thread that binds their hearts together.

A WISELY paternal government is that which directs the affairs of nation and people of Japan. The physical health or welfare of the individual is not overlooked.

Here are the official health rules of the "flowery kingdom":

1. Spend as much time out of doors as possible. Bask much in the sun and take plenty of exercise. Take care that your respiration is always deep and regular.
 2. As regards meals eat meat only once a day, and let the diet be eggs, cereals and vegetables, fruits, and fresh cows' milk. Take the last named as much as possible. Masticate your food carefully.
 3. Take a hot bath every day and a steam bath once or twice a week if the heart is strong enough to bear it.
 4. Early to bed and early to rise.
 5. Sleep in a very dark and very quiet room with windows open. Let the minimum of sleeping hours be six or six and one-half hours. In case of woman eight and one-half hours is advisable.
 6. Take one day of absolute rest each week in which you must refrain from even reading or writing.
 7. Try to avoid any outbursts of passion and strong mental stimulations. Do not tax your brain at the occurrence of inevitable incidents or of coming events. Do not say unpleasant things nor listen, if possible to avoid it, to disagreeable things.
 8. Be married! Widows and widowers should be married with the least possible delay.
 9. Be moderate in the consumption of even tea and coffee, not to say tobacco and alcoholic beverages.
 10. Avoid places that are too warm, especially steam-heated and badly ventilated rooms.
- 'Tis sound advice given in rule seven; the eighth is not far behind it. In fact they are all good. Better cut them out and paste them in a conspicuous place for your own guidance.

NOTICE

Beginning September First next, I shall conduct my business on a strictly CASH basis

Owing to the necessity of paying promptly for material, I find it essential to the satisfactory conduct of business to require payment on delivery of work.

Thanking my many friends for the business they have given me, and assuring all careful & prompt attention to all orders placed with me I hope to merit a continuance of their business.

W. R. Shields

A New Hotel.

The "Syndic House," the new hostelry of Messrs. Roe Bros. at Naramata, will be open to the public on Monday morning, September 1st.

Cash Notice

As it requires Cash to run my business, as in other lines of trade, I therefore must insist on my patrons settling their Accounts promptly at the 15th of each month.

Prompt payments make lasting friends.

Yours truly,

Scott Darkis

Upper Trout Creek School.

A PUBLIC MEETING

will be held in the house of F. A. MILLER, on Thursday, Sept. 4th, 1913, at 10 a.m., when all interested are invited to attend

SALE OF DAIRY CATTLE.

The B.C. Department of Agriculture, Live Stock Branch, will sell at Public Auction, on Friday, August 29th, 1913, at 1 p.m., at the Vernon Fair Grounds, Vernon, B.C.,

A FINE LOT OF GRADE DAIRY CATTLE.

These cattle are principally high-grade Holsteins, there being one pure-bred Holstein in the lot. The shipment consists of 30 COWS, 10 TWO-YEAR-OLDS in calf, and 14 YEAR-LING HEIFERS.

These have been carefully selected, and all are tuberculin tested.

Terms of Sale—CASH. W. T. McDONALD, Live Stock Commissioner.

Excursion Rates TO THE COAST

Table with columns: Going Date, Return Date, Fare. Includes Vancouver Exhibition, Victoria Exhibition, Westminster Exhibition.

Fares and particulars on application to H. W. BUDDE, G. M. ROSS, G.P.A. Vancouver, Agent, Summerland.

Local News Items

Senator and Mrs. Kirchoffer left for the East on Monday evening.

Another shipment of cattle and hogs was received by L. C. Woodworth last Monday.

Mr. C. F. Garnett of the jam factory returned on Thursday evening from a business trip to Calgary.

Mrs. F. D. Cooper returned on Thursday evening having accompanied Mrs. Kirchoffer as far as Sicamous.

Summerland Baptists will gather at the west church this (Friday) evening to meet and welcome Mrs. Pattison.

Mr. H. Atkinson left last Sunday morning for his home in Ottawa after spending a week here and at Naramata.

Mr. W. A. Doyle who has been in California for several months, has returned home, via Manitoba, where he remained for a week or two.

Rev. F. W. Pattison occupied his pulpit last Sunday both morning and evening, having reached here last Friday, accompanied by Mrs. Pattison.

Coun. W. J. Robinson has been invalided for about a week but is now improving. Mr. Robinson has been suffering from a mild attack of typhoid.

Mrs. J. H. Baker and little son Dodge leave shortly for a visit to friends in Portland, Oregon. They will probably be absent for two months or more.

Fred Anderson left for Toronto last Sunday. He will probably be accompanied on his return journey by his mother, who is spending the summer in Ontario.

Rev. Mr. Habershon and family, who have been guests at the home of Mr. J. H. Bowers, boarded the steamer on Thursday night for their return journey to Innesfail, Alta.

Mr. J. O. Robinson is now en route across Canada on the home trip from England. Mr. Robinson will shortly take up his residence in Vancouver, where he will enter the legal profession.

Mr. Sutherland, a representative of the American Tin Can Company of Vancouver, visited here last Saturday. Mr. Sutherland is making a tour of the Valley in the interests of his company.

Miss Sawyer, who has been a guest for some weeks at the home of her brother, Dr. E. W. Sawyer, started on her homeward journey to Boston on Thursday morning, going via Vancouver and Seattle.

Beginning the first Sunday in September an evening service will be inaugurated in the Naramata Methodist Church. This service, which will be held at seven p.m., will be additional to the regular morning service at 11 o'clock.

Rev. and Mrs. Baker, who have been spending the summer on the pre-emption of their son, Professor Baker, returned to their home in Calgary on Thursday evening. They were accompanied by Mrs. York of Toronto, who has been spending a few weeks with them here.

If you have amongst your friends a responsible party whom you would like to see located in Summerland, tell him about the bearing fruit lot advertised on the last page of this issue. It is a rare opportunity to secure a bearing orchard on a present investment of only \$200. The owner, who is non-resident, is moving to the eastern states, and wishes to dispose of the property.

There was for a few minutes considerable excitement created at West Summerland on Wednesday morning by a runaway. Mr. Borton's horse and buggy was left standing in front of one of the stores here, and while peacefully waiting an unharmed horse which had broken loose came running over the sidewalk, and a clerk rushing to the street to learn the cause of the trouble added enough excitement to the occasion to cause the Borton horse to decide that it was time that he too was moving. After crossing and re-crossing corner lots and sidewalks and overturning the buggy the horse freed itself, but was soon captured little the worse of its exciting run. The buggy was sufficiently repaired to be used in the return journey to town.

Mr. and Mrs. Wm. McCulloch of Revelstoke are visiting Mr. and Mrs. G. Morgan.

Mrs. Thompson and daughter of Kelowna spent last week-end at the home of Mr. James Conway.

Roscoe McWilliams, who has been with his father at Vancouver for some weeks, arrived home on Friday.

Mr. J. W. Harris left last week for Merritt having accepted a position as Principal of the schools of that city.

Mr. and Mrs. James Clark and their two youngest children went down to Vancouver on Wednesday morning.

Mrs. R. C. Lipsett went down to Victoria this week to attend a meeting of the Advisory Board of the Women's Institute.

H. H. Millie of the Government Telephone Service, Kelowna, was in town one evening early this week on business in connection with the telephone service.

H. T. Gussow, Dominion Botanist, is soon to visit the Okanagan. He is now making a tour of the western provinces, and part of his mission westward is to study fire blight which has mysteriously made its appearance in this Valley.

The steamer "Aberdeen" came down the lake last Sunday afternoon bringing a party of C.P.R. officials who were on a tour of inspection through the Valley. From the Okanagan the party went down the Arrow Lakes and through Crow's Nest.

Mr. Marshall, who is in charge of the Baptist congregation at Peachland, was a visitor here early this week. Mr. Marshall will resume his studies at the College when that institution opens, but will continue to preach at Peachland going up Saturday morning and returning Monday evening.

Mr. G. W. Morfitt and his friend Mr. Lang, who with his family has been spending some months at the home of the former, returned to Calgary this week. Both Mr. Morfitt's family and Mr. Lang's family will remain here for a year at least. Some of the children entered school at the opening of the term last Monday. They find the climate here so much superior to that of their prairie city that they were loathe to leave, and finally decided to remain through the winter.

Miss L. Victoria Mills of the National Press Agency, London, whose first impression of the Valley appears in another column has come over to Summerland from Naramata, where she has been staying since Aug. 8th., at the Naramata Hotel as the guest of Mr. and Mrs. Robinson. Miss Mills is a journalist of nine years' experience in Fleet Street, where she has been connected with some well-known journals, and dailies, having been on the news staff of the London Daily Chronicle, and also with Messrs. Cassell & Co. (Toronto and London). She intends contributing articles to the London Press concerning this district in general, and while acting as Publicity Commissioner—so to speak—for the Okanagan Trust Co. Ltd., will also work on the Review.

FUTURE LOOKS GOOD.

Mrs. C. W. McKechnie, with her two children, left for Vancouver on Saturday last. Mrs. McKechnie is club editor of the Society and Club Magazine published in Vancouver and organized in detail the children's Automobile Day recently inaugurated for the poor children of the city, to be observed annually. She expresses herself as delighted with the Valley and its fascinations, and after five year's absence considers the true note of success has been struck and that the only pioneers may well look forward to better days. After living among brick walls and stone pavement the seductive power of this incomparable scenery, fragrant with the odours of flowers and fruit is fascinating to a degree. She considers it a distinct asset to the whole Province and that in all the unparalleled panoramic beauty of the lower Okanagan Summerland reigns queen over all.

Mirrors are best cleaned with a cloth dipped in alcohol, then polished with a piece of tissue paper.

Local Talent To Appear In Empire Hall.

"The Summerland Players" met with great success in Grundy's play, "In Honor Bound" which they will repeat in their excellent performance to be given in Summerland on Thursday, Sept. 4th.

"IN HONOR BOUND."

At the opening of the play Sir George Carlyon, K.C., is discovered reading over some briefs, when he is interrupted by the arrival of Phillip Graham, who has just returned from a voyage round the world. During the course of conversation Phillip announces to Sir George that he is engaged to be married to a charming girl he met on the voyage home, but that there is some difficulty, in the shape of an old love. Rose Dalrymple, Sir George's ward, who has just returned from the theatre with Lady Carlyon, no sooner enters the room than it is discovered that she is the girl to whom Phillip is engaged. Lady Carlyon then comes upon the scene, and we are not long left in doubt as to who the old love is.

Sir George, although exceedingly fond of Phillip, feels that he cannot give his consent to their marriage until he has received some proof from the old love that Phillip is honorably free to marry, the proof to consist of a letter from the lady in which she must state that Phillip is free.

Although this love affair has not been of a serious nature, it is impossible for Phillip to explain the situation to Sir George without disclosing the fact that the lady concerned is Sir George's own wife. Matters become exceedingly complicated, but fortunately for all concerned they are settled in a satisfactory, though unexpected manner.

MR. AND MRS. A. L. SOAMES.

The Summerland "Players" are fortunate enough to receive the co-operation of Mr. and Mrs. A. L. Soames of Kelowna, who were both seen here not long ago in "Charley's Aunt," Mr. Soames being responsible for the production.

They will be seen in a short play by L. N. Parker, "The Man in the Street," which received a glowing tribute from the London "Times." Mr. and Mrs. A. L. Soames, like so many other actors and actresses, find that the nervous strain of stage life is best counteracted by an out-of-doors occupation, which accounts for the fact that they, like several other members of the theatrical profession, have found their way to the Okanagan. They have both held important positions in the best London companies, one of Mrs. Soames' last engagements being with Sir Herbert Tree.

Mr. Sauter will also be seen in "The Man in the Street"

Between the two plays, Mr. Alex. Bentley will sing, and Mr. Sauter will be heard in "The Lady of Shallot." Miss Phyllis Higgin will accompany them.

"The Players" returned from Kelowna on Sunday in the "Skookum," having thoroughly enjoyed their little trip, which was something in the nature of a picnic.

They supped, slept and breakfasted on board, and altogether were thoroughly comfortable, thanks to the excellent arrangements made by Mr. Roe. The trip to Kelowna was made in 2 1/2 hours.

Gold is good in its place; but living, brave and patriotic men are better than gold.—Abraham Lincoln.

A clean cloth dipped into hot water and then into a saucer of bran will speedily clean white paint without injury.

NOTICE to CONTRACTORS

PENTICTON LOCK-UP.

SEALED TENDERS, superscribed "Tender for Pentiction Lock-up," will be received by the Honourable the Minister of Public Works up to noon of Monday, the 22nd day September, 1913, for the erection and completion of an addition to the Lock-up at Pentiction, in the Okanagan Electoral District.

Plans, specifications, contract, and forms of tender may be seen on and after the 26th day of August, 1913, at the office of Mr. L. Norris, Government Agent, Vernon; the Provincial Constable, Pentiction; and the Department of Public Works, Victoria, B.C.

Intending tenderers can, for the sum of ten dollars (\$10), obtain one copy of the plans and specifications by applying to the undersigned. This sum will be refunded when the plans are returned in good order.

Each proposal must be accompanied by an accepted bank cheque or certificate of deposit on a chartered bank of Canada, made payable to the Honourable the Minister of Public Works, for a sum equal to ten per cent. of tender, which shall be forfeited if the party tendering declines to enter into contract when called upon to do so, or if he fails to complete the work contracted for. The cheques or certificates of deposit of unsuccessful tenderers will be returned to them upon the execution of the contract.

Tenders will not be considered unless made out on the forms supplied, signed with the actual signature of the tenderer, and enclosed in the envelopes furnished.

The lowest or any tender not necessarily accepted.

J. E. GRIFFITH, Public Works Engineer. Department of Public Works, Victoria, B.C., August 23rd, 1913. au28-19

GIRL GUIDES AT SUMMERLAND.

Summerland suffers a charming invasion this week-end! A party of twenty Girl Guides are coming up on the "Skookum" from Pentiction this afternoon (Friday), comprising the Girl Guide Company of that town. The girls, who are under the escort of their Scout Mistress, will camp under canvas in Summerland until Monday, and are bringing with them all the equipment for their business-like picnic.

They will attend church service on Sunday, and are returning to Pentiction on Monday morning. We heartily wish them sunny weather. a22-1120

Impressions of a Fleet Street Journalist

By L. V. MILLS.

BUT A LITTLE more than three weeks ago to-day I was turning out "copy" for the ever impatient "lino" hand in a Fleet Street office, where chimneys and enormous grey buildings hid the blue sky from my eyes, and where the smell of printer's ink was but a poor substitute for the fragrance of "God's good earth." To-day my eyes are dazzled with the blue of heaven above, reflected beneath on the glorious waters of the lovely Okanagan, and I am saying over and over to myself "Never have I before seen the sunshine." Golden and uninterrupted it seems—the sunshine I have hitherto seen has lacked the quality of brilliance that is warming to vivid ripeness the fruit of the Okanagan orchards.

Novelty is one of the keenest of human delights, and a veritable kaleidoscope of sparkling novelty has danced before me as I have hurried across the Atlantic from that little green island home of mine, the heart of the greatest Empire, which I am already learning to call "The Old Country." From the tiny detail of stopping my ears against the persistent clang of the immense bell suspended on the great transcontinental train engine, to the awe-struck holding of my breath at the grandeur of the snow-capped Rockies—everything has been an endless succession of novelty—delightful novelty.

And novelty of the most entrancing kind is this peaceful, wonderful Valley, these sombre, purple-mantled hills that embrace the fathomless blue waters of the Okanagan Lake. Can you, who breathe this radiant air all the year round, realise what it is to a newcomer from London's great city with its seven and a half million inhabitants, to fill her lungs with full breaths of the sparkling, champagne-like ozone? I don't see how you can!

Picture, too, how astonishing it is to one who is used to Covent Garden prices for fruit, to see the pink velvet skinned beauties, the peaches of Summerland, and to learn their price is something like two cents a pound! Miracle of miracles! It seems a pity to bruise the exquisite damask of their skins! In London, Mayfair society is giving half a dollar each to make a plateful of not such lovely fruit wherewith to decorate a dining table!

Peaches, and a sky bluer than any I have seen even in the lovely Devonshire of England—these are the two wonders of my very first impressions of the Okanagan. Add to these the first sunset I saw over these hills, the first starry sky of a tropical radiance, where I traced the same old "Plough" that glitters over old London town. You will forgive me if my first week in the Okanagan has turned me into a would-be poet. How is it possible to help it?

As a fresh arrival on Canadian soil, I may be allowed to express a wish that I could see the waxen white cheeks of many girl workers in the East end of London whom I know, sunkissed to the brown warmth of the glowing face of Miss Canada! It is sometimes said that English women are forgetting how to laugh. I have heard ringing, hearty laughter from maid and matron alike in the Okanagan. I think it is the sunshine. It is difficult to be very miserable when the sun shines wholeheartedly as it does here.

I have done a little wandering up and down the fruit orchards of Summerland and Naramata (now and then remembering vaguely and and ridiculously the warning of a foolish Fleet Street colleague "Keep an eye on the 'rattlers.'") I have taken in the beauty and usefulness of these shining green oases, ripe already to the harvest. England has no counterpart to the Okanagan "benches," except the sweet cherry orchards of Worcestershire and Devon, and English cherries are a drug on the market by the time railway transport from country to town is paid.

I would like to see some hearty young men from England and Scotland joining in the work, where nature goes hand in hand with manly effort. City life and strain shortens life. It looks to me as if the tiller of the soil in the Okanagan ought to live to a hearty old age. Better a one acre lot on these hills than an office stool in the shadows of murky Lombard Street for fifteen years, the fate of many.

I am learning to look at the sun without being blinded. I have tasted the succulence of Johnny cakes, the novel flavor of pumpkin pie. I know that succotash is a good thing. I have confirmed my suspicions that maple syrup (tasted in London) is a more wonderful thing in the home of its manufacture. I understand that "dandy" is just the cutest bit of descriptive language I have yet heard, and I have realised (with a little sigh) the exchange value of a dollar. (I wish it were just a little more—who doesn't?)

I have added to my creed the belief that the lovely length and breadth of the Okanagan Valley surely comprises the most beautiful corner of this new world into which I have ventured.

CONVENTION OF FARMERS' INSTITUTE WORKERS.

The 8th Annual Meeting of the American Association of Farmers' Institute Workers will be held at Washington, on November 10 and 12. Probably not many residents of this Valley will be in attendance, but no doubt the reports of these sessions will be watched with interest by those interested in Farmers' and Women's Institute work. The co-operative movement so far as it affects our institutes has been established on a sound basis, and the reports of what is being done on the other side of the line in the cause of co-operation will strengthen that movement. The papers to be read, and the subjects to be discussed are compre-

hensive and interesting, including such as the organization of institutes by the Federal Government in co-operation with the States, Demonstration of Improved Methods, the Local Unit for Institute Organizations, the Tenant Farmer, the Non-resident Owner (this latter will be of particular interest to our readers concerned in the welfare of this municipality), the Recent Immigrant, etc.

"As ye advertise so shall ye be known."

INDUSTRIAL MISSION PLACED ON THE MARKET.

Mission City Board of Trade Endorses Plans of Owners

The announcement that Industrial Mission would be placed on the market early Monday morning, created considerable favorable comment in real estate and financial circles to-day. For nearly four years this addition to Mission City has been upheld pending the adjustment of the Morton estate. Not until recently have matters permitted the sale of the property.

Industrial Mission is located in the heart of the Fraser Valley, at Mission B.C. It enjoys the distinction of having the cheapest electrical power on the North American continent, and this, together with the fact that it is the junction point of four Canadian and American railroads, makes it a favored manufacturing district. Industrial Mission and Mission City are but forty miles from Vancouver and the ocean, and ten miles from the international boundary.

The fact that industrial concerns will be offered free sites with cheap power and excellent rail and water transportation will have an important bearing on the development of Industrial Mission. Already manufacturers have opened negotiations for sites.

At a recent meeting of the Mission City Board of Trade the plans of the owners were discussed and approved without a dissenting vote. It was through the efforts of this body that it was made possible to secure free sites for new industries. The future of Industrial Mission seems assured.

LIVE CANOE CLUB.

Peachland Sports in Excellent Condition.

Peachland, B.C., Aug. 27.—The final meeting of the Peachland Regatta Committee was held in the Reading Room on Thursday, Aug. 21st.

We cannot commend too highly the way that the ladies of Peachland have worked over the Regatta—the result being that they were enabled to turn in the sum of \$240 odd, after all the accounts had been settled. On the motion of Mrs. Dryden, seconded by Mrs. Town, it was resolved that a small debt on the building of the new Canoe Clubhouse be paid out of this fund; and on the motion of Mrs. A. Miller, seconded by Mrs. House, it was also resolved that the total assets from the Regatta be devoted by the Canoe Club to the erection of the new Clubhouse.

A cordial vote of thanks was moved by Mr. Marshall, and seconded by Mr. Angus, to the ladies who have, as in times past, always been the mainstay of Peachland athletics. Votes of thanks were also passed to all those who helped to augment the funds of the Regatta, and to the various committees.

A very easy and excellent paste for cleaning silver can be made by mixing whiting and ammonia.

Insects do not like ether salt or alum, and a small quantity sprinkled in the carpet will keep them away.

Control Your Coal Expenditure

In the Gurney-Oxford range you will find more exclusive features, more essential improvements that appeal to the thrifty housewife than have ever before been found in any one kitchen range.

But most important of all is the Economizer.

This clever device for regulating the drafts saves 1 ton of coal in every 6 that you would burn in the ordinary range. It takes the smell of cooking out of the kitchen and sends it up the chimney. You know what that means.

The Economizer enables you to absolutely control the amount of coal you wish to consume and still have a perfect heat for cooking. It will enable you to keep your fire going while you go out shopping or visit your neighbor, and all that is necessary for you to do on your return is to press the small lever and you are assured of a hot fire in a very few moments.

A Gurney-Oxford stove is sanitary—no dirt can accumulate on its beautifully smooth surface.

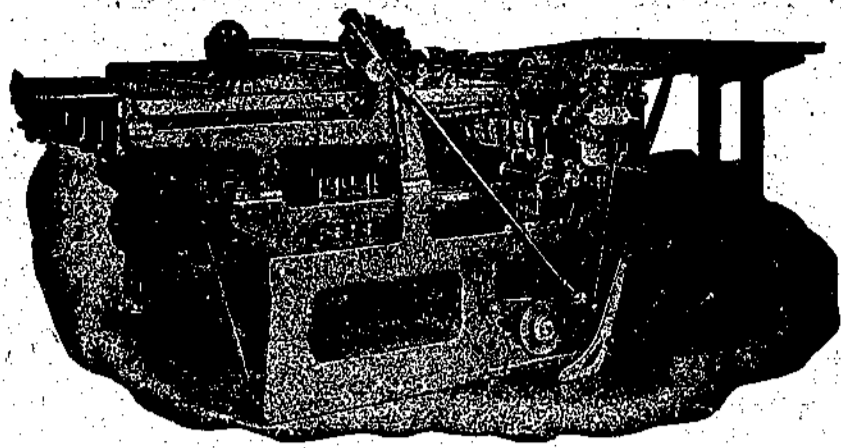

Its top is polished steel which abolishes forever that dreadful operation—blackening the stove.

Of paramount interest also are the other remarkable and exclusive attachments—the Special Grate, the Divided Flue and the Broiler.

Every woman who knows owns a Gurney-Oxford.

REVIEW

Job Department

Peach Twig and Fruit Borer

Anarsia Lineatella

This insect attacks the peach, apricot, and plum. The adult is a small brown moth with wings expanding about $\frac{3}{4}$ to $\frac{1}{2}$ an inch. There are two distinct broods during spring and summer, and in some latitudes a later brood in the fall.

As soon as the new growth appears, the larvae or worms that have wintered over in the bark of the tree, commence to bore into the tender new twigs, the tips of which soon wilt, and upon examination the larva about a $\frac{1}{2}$ an inch in length may be found burrowed into the heart of the twig, just below the wilted portions. In the course of a month the larva leave the young twigs, and spin cocoons which they secure in a crevice in the limbs of the tree with a few cross webs. These pupate, and in about two weeks the moths begin to fly. After mating the females deposit their eggs on or near the fruit, usually preferring the stem end. When the new larva hatch out, they immediately commence to bore into the fruit, just under the skin, and gradually work further in as they grow older; thus the second brood are fruit borers. Some of these leave the fruit before it is picked, and spin their cocoons in the crotches and crevices of the trees, as did the first brood; others of the later brood bore into the bark, spend the winter in the larval stage, and so are ready to operate on the young growth directly it appears in the spring. I think this irregularity of habit depends greatly upon latitude and atmospheric conditions.

The loss resulting from the attack of this insect in some districts is enormous. Hundreds of tons of peaches, apricots and plums being condemned as culls. Many carloads are condemned after being carefully packed and delivered at points of distribution.

When the egg or the young larva just hatched out is the only evidence of infection at the time the fruit is being packed, one can easily realize how hard it would be to guarantee a carload free from infection; and what is still worse, one wormy peach has often been responsible for the rotting of a whole tier of boxes in a consignment or carload lot.

METHODS OF CONTROL.

The remedy adopted so far consists of winter spraying with lime sulphur, 1 to 9 of water, just before the buds open in the spring, or as late as possible without injuring the young growth. This will also act as a check to the peach curl leaf, mildew, peach and plum rot, etc. By way of extra precaution spray again with arsenate of lead, 3 lbs. to 50 imperial gallons of water, when the new growth of foliage starts.

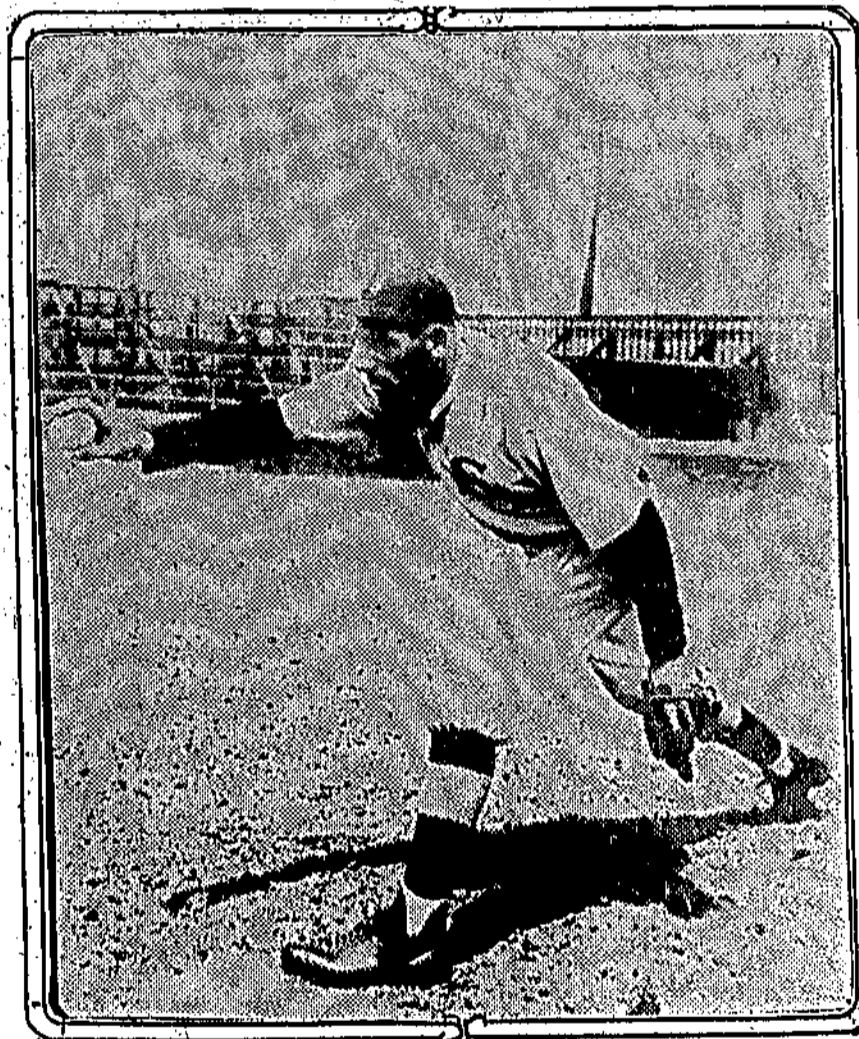

In order to protect the fruit from the second brood of worms, many growers spray again with the same formula, arsenate of lead, just about the time the moths commence to fly, which would be about the middle of July in this latitude. Some object to spraying the fruit of the peach on account of the adhesive tendency of the spray on the rough surface of the skin which is not easily rubbed off; but the justification of this excuse is doubtful.

All worms found in the fruit should be destroyed. Every worm that escapes is an agent for reinfection next season. Thus all culls in the orchard or packing house should be effectually disposed of. If they are to be dried the worms can be carefully cut out during the process of taking out the pit. Otherwise the culls should be burnt, or buried so deeply that there would be no danger of the worms coming to the surface.

W. H. LYNE.

(The life history of the peach Root Borer, sanninoidea exitiosa, may appear in a future issue of this paper.)

New American Giant In Action.

THIS PICTURE SHOWS THE \$10,000 DELIVERY OF THE GIANT'S LATEST ACQUISITION.

"Rube" Schauer, the pitcher of the Superior Club of the Northern League, who has been purchased by Manager McGraw, of the New York Giants, for \$10,000. This is the largest price ever paid for a "class C" twirler. Schauer celebrated his new honors by winning a game from the once famous "Rube" Waddell.

Cleanings from Review of August 29, 1908.

The new name for Siwash Flat will be either Ritchie or Giant's Head. Such was the decision of a number of residents who met for the purpose of discussing a name for the post office to be shortly opened there. A committee was appointed to see Mr. Ritchie with regard to the matter before taking definite action.

Temporary rooms have been opened to provide accommodation for the senior grades over the Supply Company's branch store until the new public School has been completed.

Naramata Sunday School held their first picnic last Saturday.

The result of a baseball game at Kelowna was 11-2 in favor of Summerland, with Summerland leading in the league.

Major Hutton and wife, and Mr. Van don Nest arrived in town on Saturday and intend taking up their residence here.

PEACHLAND.—Our fine new five roomed school was formally opened by Mr. Price Ellison. The speakers of the evening were Mr. Price Ellison, Mr. G. A. Henderson, Lieut.-Gov. Bulyen, C. G. Elliott, W. A. Lang, Rev. T. N. Ritchie and Rev. C. W. Whyte.

NARAMATA.—Miss Babbitt, of Peachland, and Miss Bartholomew, the sweet soprano singer from Summerland, spent a few days with Miss Gwon Robinson.

INDUSTRIAL MISSION HAS THE STAMP OF APPROVAL OF MISSION CITY BOARD OF TRADE

BUY IN INDUSTRIAL MISSION NOW AND REAP THE BENEFIT OF BIG PRICES

INDUSTRIAL MISSION has just been placed on the market. For years the adjoining territory has been developed and is now famous throughout the world. INDUSTRIAL MISSION affords the greatest investment opportunity ever offered to the people of Western Canada.

Here are a few "Reasons Why"

INDUSTRIAL MISSION is located in the heart of the Fraser Valley, forty miles from Vancouver, in the most perfectly developed area in British Columbia.

INDUSTRIAL MISSION has the cheapest electrical power on the North American Continent, assuring its becoming a great manufacturing centre.

INDUSTRIAL MISSION has unrivalled rail and water transportation. On main line Canadian Pacific and four other railways. At the head of deep water navigation on the Fraser river.

These factors assure a wonderful opportunity to those who act now.

"Wait For Canadian Fruit."

(Nor'-West Farmer).

The Nor'-West Farmer has never to any extent caught up the "made in Canada" slogan. As a matter of fact, we believe that every article should commend itself on its own merits, without any regard whatever as to its origin. But at this time of the year, when the housewife is scouring out the preserving kettle, we should like to put in a word for Canadian fruit, not so much for the sake of the grower as for the sake of the user. Within recent years it has become annually more and more evident that the housewives of Western Canada were unintentionally and unknowingly giving a preference to United States grown fruit as against our Canadian raised. The reasons for this are very plain upon only a few moments reflection, although they may never occur to anyone at first blush.

With every kind of fruit that grows in United States and Canadian latitudes, the process of ripening always begins in the southern areas of the producing zone, and then gradually creeps up northward. Thus we find for example, that peaches first come to us about the end of June, being imported from Southern California and similar early latitudes. These are exceedingly high in prices and are sold mainly in our cities and large towns. Then the same class of fruit comes along somewhat later from Oregon, then from Washington, Idaho and Colorado, and then later from British Columbia. The difference in the season

issue that an early peach, such as the Triumph, which would come from Southern California about July 1st, would reach us from the Okanagan Valley in British Columbia about August 20. And so it is with apples and plums, and pears and tomatoes, and other classes of fruits.

Now, as we have stated, we advise our readers, from the standpoint of their own interests, to patronize Canadian fruit much more than they hitherto have done. Taken on the whole, the quality of Canadian fruit is quite equal to that from across the line, and in every Canadian province that is seriously undertaking to cater for the prairie trade there is being given more and more attention to careful, honest packing and genuine intrinsic value. To this is added the fact that the markets have always settled down to good buying levels by the time our Canadian fruits have come forward. Last year, for example, early peaches from California sold in Winnipeg for 35 cents a dozen, which is equal to around \$2.80 or \$3 a case, while the same variety from British Columbia, of really higher merit because of shorter shipping, came into the market later at \$1 per case.

The whole point that we wish to make is this: It will pay prairie housewives to purchase most of their apples, pears, peaches, plums, apricots and tomatoes at the time when the Canadian fruits of these classes are on the market; and that simply because this is the time of year when as a rule the best fruit is being sold at the lowest prices. And then, quite in addition to any satisfaction that may come from better buying, there is the satisfaction of knowing that when Canadian fruit is purchased, Canadian and not American horticulture is being built up.

FOR SALE

Ten Acres

Over 600 Trees

Half of which are now bearing. First class condition. To responsible party who will guarantee to keep Orchard in good condition, will sell on following terms:

PRICE \$3,500.
Payments—Cash \$200. One Year \$300. Two Years \$500. Three Years \$500. Four Years \$1000. Five Years \$1000.

Interest 10 per cent. per annum, payable yearly. This lot was recently gone over carefully by an expert with a view of ascertaining a fair valuation, and he said it was worth not less than \$4,000.

For name of owner and information regarding lot, enquire of Mr. JOHN TAIT, Summerland. The advertiser has also for sale a Lot next to Mrs. A. Milne's store, and some Crescent Beach Lots.

Peachland Notes.

Mr. Norman Pope left on Wednesday morning to join a surveying party for Fort George.

Miss Olive Gummow left on Thursday morning to attend Normal School in Vancouver.

Mr. Woods and family left on Tuesday morning for Calgary, Alta. their former home.

Misses Street and Grierson of Whitewood, Man., were the guests of Mrs. A. W. Miller on Friday.

On Thursday morning Miss Leone Morrison left for Armstrong to spend a few days with a school friend.

Dr. Geddes and family of Kelowna came over in their car on Wednesday to visit Rev. A. Henderson and family.

Mr. C. C. Inglis of Okanagan Landing, who is staying in town at Mr. Thos. Powell's, took Rev. A. Henderson's place in the union pulpit on Sunday morning.

Peachland Notes.
The ubiquitous stork visited town again on Monday morning and left a bouncing boy at the home of Mr. and Mrs. Jno. Nichols.

Mr. Stevens of Summerland has bought Jno. Gummow's bumper apple crop, for the Australian trade. Packers arrived to-day and will soon have all arrangements made for picking and packing.

The teachers who were holidaying at their homes here have all returned to their schools. Miss Gertrude Gummow to Penticton, Miss Alice Elliott to Enderby, Miss Minnie Smith to Woods Lake, and Mr. B. F. Gummow to Westbank.

On Wednesday afternoon of last week the scow which has been under construction here for some time, was completed and launched. Mr. L. D. McColl christened it with a bottle of grape juice, naming it G.P.B. No. 1. The young people who were aboard cheered lustily as it slipped gently down into the water.

School re-opened here on Monday morning with a fair attendance except in the High School, where the pupils think that there are still two weeks of the holidays due them, as most of them had to wait that much longer for their examinations. Miss Pentland is again in charge of the Public School, with Miss Cousins of Vancouver as assistant. Mr. Rogers of the High School, late of Revelstoke, arrived last week.

A very good way to reheat a joint is to wrap it in thickly greased paper and keep it covered while in the oven.

SYNOPSIS OF COAL MINING REGULATIONS.

COAL MINING RIGHTS of the Dominion, in Manitoba, Saskatchewan and Alberta, the Yukon Territory, the North-west Territories, and in a portion of the Province of British Columbia, may be leased for a term of twenty-one years at an annual rental of \$1 per acre. Not more than 2,560 acres will be leased to one applicant. Application for a lease must be made by the applicant in person to the Agent or Sub-Agent of the district in which the rights applied for are situated.

In surveyed territory the land must be described by sections, or legal sub-divisions of sections, and in unsurveyed territory the tract applied for shall be staked out by the applicant himself.

Each application must be accompanied by a fee of \$5, which will be refunded if the rights applied for are not available, but not otherwise. A royalty shall be paid on the merchantable output of the mine at the rate of five cents per ton.

The person operating the mine shall furnish the Agent with sworn returns accounting for the full quantity of merchantable coal mined and pay the royalty thereon. If the coal mining rights are not being operated, such returns should be furnished at least once a year. The lease will include the coal mining rights only, but the lessee may be permitted to purchase whatever available surface rights may be considered necessary for the working of the mine at the rate of \$10 an acre. For full information application should be made to the Secretary of the Department of the Interior, Ottawa, or to any Agent or Sub-Agent of Dominion Lands.

W. W. CORY,
Deputy Minister of the Interior.

The Piano We Give Away

DESCRIPTION OF PIANO

FINISH
We furnish this Piano in either Oak or Mahogany finish
MANUFACTURER'S DESCRIPTION

The dimensions of the above Piano are as follows: height, 4 feet 9 inches; length, 5 feet 2 inches; depth, 2 feet 4 inches; weighs, boxed ready for shipment, about 800 pounds, and the material and workmanship are of the best. The cases are finished in Mahogany or Oak, double veneered inside and out to prevent warping or splitting. The Piano has 7 1-8 octaves, repeating action, three pedals, full iron frame covering wrest plank, and built up pin block of five different layers of hard maple, direction of grain alternating in successive layers to prevent to the greatest extent possible the Piano getting out of tune.

The three strings in unison with over strung bass, splendidly pitched scale and excellent sounding board produces the rich, deep, even tone peculiar to the Upton Piano, and so much striven for by manufacturers of high class instruments. The brackets, pedal guards, hammer rail, and continuous hinges are all heavily nickel plated. The case itself is highly polished, making a first-class artistic instrument in finish, appearance, and tone.

By comparison this Piano will be found better, heavier, and more artistic than most Pianos on the market to-day. Each instrument is fully warranted.

MANUFACTURER'S WARRANTY

The above Piano is warranted to give perfect satisfaction for a period of ten years, provided it is not exposed to extremes of heat, cold, wet or dampness.

SUMMERLAND DRUG COMPANY
