Whole No. 275

## TELEPHONE COMPANY STARTS CONSTRUCTION.

NEW EXCHANGE TO BE READY FIRST OF YEAR.

Will Be Modern In Every Detail.

People Impatient For The Better Service.

This week has witnessed the first actual work on the construction of the pole lines of the Summerland Telephone Company, Limited, and the work of installing the exchange, hanging the cables, running the wires and placing the instruments will be hurried to completion as rapidly as possible. Promptly on November 1st, Mr. Atkins, who had been engaged as superintendent of construction, and Mr. Phillips, his assistant, assembled their equipment and organized their force of about a dozen men, to which more will be added later, and were soon busily at work laying out routes, digging holes and preparing poles. With no unforeseen delays the new plant should be in working order by the first of the new year.

While subscriptions for shares in the Summerland Telephone Company have come in rather slowly, there has been no serious delay for need of funds, and now that construction work has actually begun, any deferred payments and a number of new subscriptions are expected to come in. In fact, it seems quite probable that the stock will soon be in much demand. Predictions are made by those who are on the "inside" that their shares will be worth \$125.00 within a few months at most.

All the equipment, including switch board and other inside material, cables, wires, poles and fittings have been ordered and part has already arrived. These will cost about \$8,000.00. A building, very suitable for the purpose has also been purchased, and will require but small expense to fit it up. This building—the Conway lumber office—is isolated, though conveniently located, and insurance on both plant and building should be low.

As has already been stated in these columns, the company, which holds a charter covering all the Yale district, applied at the last sitting of the Municipal Council for a local franchise. This is now being prepared and will be presented to the public shortly to be voted on as a by-law.

The system will be the very best, and is known as the "central energy," the electrical force being all supplied from the exchange, thus doing away with batteries at every phone. With this system the bell crank is absent, simply taking the receiver from the hook, calls central by a miniature flash light. In this way many more messages can be transmitted and more connections made in a given time.

With the antiquated system now in use here, but one wire is used

with all but the nearest phones. This "grounded wire" method is the cause of inductions and other annoyances. The new system will be all "metallic," that is, each instrument will have a pair of wires forming a separate and complete circuit with the switchboard.

Party lines, most of which have been greatly overloaded, have been a great source of annoyance and inconvenience. The new company are using a different system for party lines, and while the system permits of eight phones, they do not propose to use more than four, and in many instances only two. The call will be made by an electric selective device known as the harmonic system. Each instrument on the line will respond to a different electric current, and only that instrument which is called will ring.

To minimize troubles and maintenance cost many of these wires will be run in cables. A cable with seventy-five pairs of wires will run directly west from the central with a smaller cable branching from it across the west of Mrs. Campbell's property to the Giant's Head Road. Another cable, probably underground, will run south from the central, along Shaughnessy Avenue. Peach Orchard and part of Jones Flat will be served by another running northward from the exchange building.

Of the purchase by the Okanagan Telephone Company of the Lakeshore Telephone Company's system; of the larger company's disowning of the latter's franchise under which it had operated here; of its promise later to live up to this franchise, which promise was never adhered to; of its total disregard of public sentiment and its persistent "do as we say" attitude; of its attempt to get a complete monopoly of telephone and telegraph business; and finally of its effort to punish Summerland for its spirit of independence by removing the best paying instrument on the local exchange, namely, the phone in the government telegraph office; all are now familiar. Finding the value of the local service thus curtailed a number of local phones were ordered out and their removal made those remaining of less use, so that others and yet others have been removed until now but few more than half the former number remain.

Business men and citizens generally are looking forward to the early completion of the new system when they may hope to have a service of sufficient scope to be adequate and own a system that will give pleasure and satisfaction.

filed in Mrs. Norton's eyes for next summer's enjoyment, for Mrs. Norton is a lover of flowers, and of all the beauties of nature.

The management is determined that no other commercial hotel in the Okanagan will be equal to the Summerland for courteous attention to guests and care for their entertainment.

When asked if he intended to canvass for a table license Mr. Wallace said, "No; this is a non-license town, let it stay so. We have come here knowing the conditions and accepting them as they stand; and not to create ill-feeling or stir up strife. We are going to do the best for ourselves and for Summerland that we know how, and that is saying a good deal, for we know the hotel business. What we do look for is a good word from the people of Summerland. Let them speak up for their hotel, for we will make it a stopping place worthy of their recommendation."

Messrs. Cordy & Higgin announce on page 4 an auction of the effects of Mr. T. C. Orr.

## School Trustees Meeting.

The School Trustees held their regular monthly meeting last Monday in the Council Chamber, with all the members present.

The Board was advised by letter that High School Inspector McLaren will probably arrive here this week.

The receipt of a complaint was the cause of a long discussion over the question of discipline in the Consolidated School. It was the unanimous opinion of the Board that, due to leniency and other causes, there is a regrettable lack of discipline, and perhaps even of respect for the teachers and their commands, and that this lack of discipline was probably the principle reason why the pupils of the school have not attained a higher record of late in the annual reports. It is the determination of the Board to uphold the teachers in enforcing discipline and improving the standing of the school. It was pointed out that at one time the school was among the best in the province, and the Board see no reason why it should not again attain and hold that enviable position.

A short verbal report was received from Chairman Robinson and Trustee Caldwell of the Trustees Convention held at Victoria. The beautifying of school grounds and the brightening of the walls of the interior of the buildings with pictures that would tend to elevate the thoughts of the pupils was strongly advocated. In this work, particularly about the grounds, the children should be given a part. That the good work which is being done by this convention could be greatly extended by having the teachers in attendance was shown by a paper read by the Superintendent of Vancouver Schools. This is being done in some of the other provinces. A uniform standard for all Canadian schools was also advocated. The inclusion of courses of agriculture and horticulture in the curriculum was urged, but its supporters were out-voted by city delegates.

Mr. James Dunsdon waited upon the Board with reference to some minor matters in connection with the Garnett Valley School. After the passing of the following accounts the Board adjourned until the afternoon of the 6th when they expected to meet the High School Inspector.

## Earth Fall Near Pentiction Buries Three Men.

### Excavation Undermines Cliff on Lakeshore Road.

News of a most distressing accident, which occurred on the Lakeshore Drive between Summerland and Pentiction, close to the latter place, reached here at noon on Thursday.

The accident, resulting in the death of three men and serious injury to a fourth, was the result of a landslide, beneath which the men were buried.

Quite a quantity of earth had been removed from the side of the road just west of the bridge crossing Okanagan River, and directly under the steep hillside. This earth was being shovelled into wagons and hauled into Pentiction for road building, and a number of men and teams were employed in the work. It was the custom for each team as it returned with an empty wagon to place the wagon into position for reloading and hitch up to a loaded truck. This had been done, and the men were busily engaged loading an empty wagon, when suddenly, and without a moment's warning, a large portion of the hillside, which had been greatly undermined, came down with a roar and a rush, completely burying three of the men, and partly entrapping a fourth. It is stated that fully six feet of earth covered the entombed laborers, the slide itself being about one hundred feet wide, one hundred and fifty feet high and in its deepest place eight feet thick.

## "Guilty" Tho' Innocent.

A trial of more than usual interest was heard before Magistrate English on Wednesday, the defendants being Messrs. A. H. & J. Steven, the charge being that of "falsely marked" fruit. The prosecution was made by Dominion Fruit Inspector Clark. The story, as gathered from the evidence, is practically as follows:

Messrs. Steven had booked an order for four cars of No. 1 Jonathans for Australia. They were, themselves, only able to supply two of these and ordered the other two from a Kelowna firm. They, in turn, could supply only one car, and bought the second from Stirling & Pitcairn. The apples purchased from this firm were No. 2's, and were so marked by the packers, Messrs. Steven had sent their lithographed labels to be used on all the boxes shipped from there, and Stirling and Pitcairn's stencilling was covered by the label, and marked No. 1's. Information that all was not right was forwarded to the Fruit Inspector at Vancouver, and they found upon opening the car that though the boxes on the face were marked No. 2's, those further back still bore No. 1's. The apples were not allowed to go aboard the steamer.

While as shippers Messrs. Steven were found "guilty," the Inspector was satisfied that improper marking was done without their knowledge, and only a nominal fine of \$5 was imposed. The local firm were advised to take action against the real culprits.

Mr. A. H. Steven went to Kelowna the next morning, and we are not able to learn the final outcome of his errand there.

## "SKOOKUM" WRECKED: COLLIDES WITH BARGE

RUN DOWN by CAR-BARGES IN BLACK OF NIGHT

Broken Bones. Near Loss Of Life.

Struck without Warning in Head-on Collision.

Probably the worst accident in the history of our lake traffic occurred early last Tuesday morning, when two of the C.P.R.'s big car barges loaded with freight cars, and pushed by the tug "Castlegar," ran down the "Skookum" in an almost head-on collision. The accident resulted in practically a complete wreck of the "Skookum," and a very narrow escape from drowning of the six men on board. Two of these are now laid aside suffering from broken bones.

As a result of the recently enforced regulations affecting the Boat Company's different vessels, towing formerly done by the "Maude Moore," has of late been done after regular hours by the "Skookum." This has necessitated the "Skookum" being engaged practically all night in this work.

It was while thus engaged in towing a barge of cement pipes from the Pipe Works at Peachland to Pentiction that the "Skookum" met with the unfortunate accident. She was in charge of Captain F. G. Languedoc, and had on board Manager P. S. Roe and four employees of the Dominion Glazed Cement Pipe Company. All regulation lights were burning brightly, according to those on board, and vigilant watch was maintained throughout the trip. The western shore had been hugged pretty closely until after Trout Creek point had been passed, then a slight turn was made to the southeast, guided by Pentiction lights, so as to land at the old Pentiction wharf. At 4 a.m. on Tuesday, when approximately one and a half miles north of Pentiction, with Captain Languedoc at the wheel, and Mr. Roe at his side, both peering into the darkness, and the four other men asleep in the forward cabin, a glimpse was caught of the "Castlegar" through the narrow opening between the two barge loads of cars. These were not more than a hundred feet away. Both men at the time were especially alert in order to pick up land marks and lights that would direct them to their landing. No lights whatever were to be seen on either side of the car barges, according to a statement of those on the "Skookum," and their bulk hid whatever light would otherwise have been visible on the "Castlegar." The first intimation Captain Languedoc had of the proximity of another vessel was when he was passing directly in front of the barges, when the "Castlegar's"

masthead light became visible through the opening. They were then but a few yards distant from the swiftly moving vessels, and no possible escape was afforded, the collision following almost immediately upon the knowledge of the danger. The combined rates of travel of the meeting craft was probably fourteen or sixteen miles per hour so that the impact was instantaneous and severe. In the short space of time an attempt was made to steer the "Skookum" clear, and her changed position probably saved her from being sent directly to the bottom or being over-ridden by the barge. The projecting bow of the latter cut the superstructure of the little craft clean off the hull, which was also badly wrecked. Captain Languedoc and Mr. Roe were thrown down with the wreckage, and their feet and legs pinned in the debris in such a way as to keep them from being swept overboard.

When the men in the wheelhouse saw the tug's lights, all hope of saving themselves, the other men, or the boat, was immediately given up, and it was therefore a surprise, in spite of the calamity, to find themselves alive and suffering no fatal injuries. After Captain Roe had been extricated by the aid of a crowbar, he helped to get Captain Languedoc loose. The latter, whose leg had been entangled, was thrown back in such a way as to cause a bad break in that member. Mr. Roe suffered a crushed foot and break of one of the bones of the leg. Both are now laid aside with legs done up in plaster cases.

As quickly as possible the men on board the "Castlegar" rendered assistance, and the six men were taken on board, and arrangements made to tow the wreck and her scow back to Naramata. The scow, as well as her load of pipe, also suffered in the collision. The Boat Company announces that they are making every effort to maintain the service and expect to replace their flagship as soon as possible. Latest accounts are that Captain Languedoc, though suffering much, is in a satisfactory condition from the physician's point of view, and that Mr. Roe, who suffered considerably from the nervous shock, though he will be confined to his home for some time, is feeling much better.

An investigation will no doubt be held forthwith when the responsibility for the accident will be fixed.

## CHRISTMAS APPLES FOR THE OLD COUNTRY.

A splendid carload of our finest varieties of apples left the C.P.R. wharf, dispatched by the Fruit Union, for all parts of the Old Country and a few to France, on Monday. The fruit, which is timed to reach the Old Folks at Home (and also La Belle France) just in time for Christmas, consisted of Wagoners, Jonathans, Spitzas, Winton Bananas, Spies, and Wine snaps. Five hundred of the boxes

were addressed to private individuals north, south, east, and west, and midlands of the United Kingdom, and the balance of the car is intended "for sale" on arrival.

The ladies of the College Auxiliary have finally fixed on Thursday, November 13th for the date of their sale of fancy work, preparations for which have been going on for some time. A New England supper, and an evening's program of music will be additional pleasing features of the affair. Their ad. appears on page 4 of this number.

### W.M.S. Hold Annual Convention.

The Sixth Annual Convention of the Women's Missionary Society of the Okanagan District was held in the Methodist Church, Vernon, on October 28th. The afternoon session opened at 2 p.m., with the District Organizer, Mrs. J. W. Jones of Kelowna, in the chair. Delegates were present from Penticton, Peachland, Kelowna, Vernon, Armstrong and Knob Hill.

The District Organizer reported seven auxiliaries in the Valley, with a membership of 113, also three Mission Bands.

During the afternoon the regular business of the Convention was transacted. Excellent papers were also given—one by Mrs. Coldron of Penticton, "What the Auxiliary Means to the Home Church," one by Mrs. Cairns of Vernon, on "New China and its Needs," and one by Mrs. H. H. Millie of Kelowna on "Cheerfulness."

A solo by Miss Hunt and a recitation by Maester Harold Galbraith were much enjoyed.

Mrs. J. W. Jones of Kelowna was again nominated District Organizer, and Mrs. B. A. Moorhouse of Penticton was elected Sec.-Treas. The Convention then adjourned.

The evening session opened at 8.15 pm with the Rev. W. Elliot of Vernon in the chair. The address of the evening was given by Mrs. Betts, President of the B.C. branch of the Women's Missionary Society. She gave an excellent report of the Convention of the Board of Managers which she had recently attended in Toronto.

During the evening Miss Kathleen Galbraith gave a recitation entitled "Two Offerings"; Mrs. Charles Whiten of Vernon gave a beautiful rendering of "The Holy City," and Mrs. Richardson delighted her audience with her rendering of the solo entitled "The Beautiful Hills of the By-and-By." The Convention next year will meet at Penticton.

### CHINESE AND LAND OWNERSHIP.

Armstrong District Falling Under  
Control Of Oriental.

(Armstrong Advertiser)

The Oriental problem is assuming serious aspects in this district—far more serious than people generally suppose, and unless a more aggressive campaign is instituted by the white men who are engaged in farming and vegetable growing, supported by the business men of the city and all who wish for a continuous prosperity, this place, we venture to say, in three years' time will be a Chinese town pure and simple.

We are moved to make this statement from the knowledge of facts already to hand of the purchase by Chinese of a considerable block of land within the city limits, and the renting of land by the Chinamen of large blocks of land near town, all of which is to be used for vegetable growing.

Victoria, Nov. 5.—The gigantic sum of \$4,000,000 has been expended by the Provincial Government upon road extension and improvement work within the boundaries of British Columbia during the past season, according to a statement just issued from the department offices of Hon. Thomas Taylor, Minister of Public Works. There is now in hand the sum of approximately \$400,000 for maintenance during the winter months. There are in existence at the present time in the province 18,000 miles of roads and trails.

Vancouver, B.C., Nov. 5.—(Special)—British Columbia will this year have exact figures on the extent of land under cultivation and data on agricultural subjects, such as value of crops and products of the agricultural industries. For the first time in the history of the province the Department of Agriculture will have a complete statement of what has been accomplished in this line.

Australia claims to lead not only the British Empire but the world in the value of its per capita production. During the past year that country produced \$210 for every one of its population. British Columbia can make a much better showing than that, for according to Mr. Price Ellison, Minister of Finance, this province produced \$300 for every man, woman and child during 1912.

A woman may not even want to know her own mind until after she has changed it four or five times.

Vancouver, B.C., Nov. 5.—(Special)—The Provincial Government will soon distribute samples of the new frost and blight resisting potato developed in New Zealand, which, it is believed, will thrive in this province, and prove of great benefit to farmer. Arrangements have been made to get a quantity of the new potato for seed purposes. The Department of Agriculture is also taking steps to improve the seed of grains and other leading crops of the province.

"The California of Canada" is the way Mr. Thomas W. Taylor, M.L.A., of Winnipeg, describes British Columbia, and he predicts that each winter will see an increasing number of people come here from the prairies because of the mild winter climate of this province. He sees no reason why people should go to California and believes they will come here instead,

Impressions of a Fleet Street Journalist

IX.—By L. V. MILLS.

There comes a time in the chronicles of the Happy Valley, when it becomes apparent to the chronicler that a halt must be called in attempts to paint the wonders of Nature as known herein, and a veil dropped temporarily over the picture of outdoor life. With the falling of the leaves—they have fallen very fast this week—and the sinking of the thermometer, (though the sky is still blue, and pine-fragrant), nature herself calls a pause; there is a hush, a holding of the breath, for the final passing of summer, the merging of autumn into dreary winter. What that winter is I do not yet know. I have vague visions of a quiet, snow-shrouded world, of these purple hills ghostly in their white mantle; of freezing winds, and our wild horses wilder still at the sound of the sleigh bells ringing up and down hard roads. But all my anticipations are by hearsay (and there are wonderfully diversified opinions of winter in one B.C. town), and as novelty is the very breath of life—let winter come—say I! At least there will be no choking yellow fog—no grey rain-swept streets with a November rawness that penetrates to your very bones, no cruel lights of London, only half seen through the peapop of a November and December and January and February—atmosphere! In a peaceful, gentle, well-bred sort of way, the Happy Valley is preparing for the icy embrace of winter, and as far as I can yet know, I am prepared sturdily to defend—November in the Valley. There are disadvantages, as seen through English eyes. The Canadian stove with its glowing heat that penetrates every corner of the house, and makes one move uneasily round from chair to chair till one would fain sit on the verandah to get cool, is not the best substitute for the hospitable English fireside, with the flickering coal flames and opportunities for dreams; but the wood fed stove is very necessary, and burning pine logs smell deliciously good to an English nose!

I would not dare to mention such trivialities as the glittering London theatres, the dances, the exhausting concerts, the lamp-lit passing picture of London after dusk on a winter day. The Happy Valley has its simple pleasures in amazing abundance, and the list of teas, socials, chicken-pie suppers, surprise parties, amateur theatricals, choral practices grows and grows, till the "engagement" book of the Fleet Street News Editor would be taxed to enter them all, and send his chroniclers thereto! A social Friday afternoon at the pretty little Unity Club at Naramata? Who cares for a wearying gorgeous, French-cake-provided club tea of the Women Scribblers' in Fleet Street, or the languid, scented interior of the salon of the most famous Ladies' Club in London? A "Cinderella" in the November-rose decorated hotel near the lake at Naramata? Who yearns for an Albert Hall Masque Ball? There is a novelty and charm in a Summerland Thanksgiving Banquet that many a weary London hostess would give half her world to put into one of her season's entertainments. We can find in the pages of the latest novel glittering pictures of the dazzle and enchantment of London at night, of the swift flight of the noiseless taxi through the fairy land of a lamp-lit West End highway, but to us of the Happy Valley, a homeward walk up our quiet hills or by the side of the sleeping lake, under the star jeweled British Columbia sky of a November night, is of more infinite charm. The simplest amusement is to us in our healthy life more full of keen appreciation than London's most wonderful program.

Those who have lived in the Happy Valley for years may hunger a little for the excitement of cities, but to the tired city dweller into whose ears have dinned for years the ceaseless noises of human strife, whose eyes are wearied with the grey twilight of its November days, and the glare of its nights, there is no peace like the ineffable peace of this glorious country, no winds so fragrant and health-giving, no sunlit atmosphere so clear and radiant.

There is so wide a gulf fixed between the life of the average working citizen of the great city I have left behind me, and the life of the Happy Valley's citizen that it is impossible to make comparisons between the two. Both are strenuous, both have one common end and aim, but there the similarity ends. The average young city man of thirty, shackled with the conventions of suburban and office routine merely exists and vegetates mildly, and soothed out of feeling his position by hundreds of small "civilizations" which he would lack in the country. The hard laboring young orchardist of the Happy Valley—well, of him and his life as it contrasts with modern city business and life, I shall have more to say next week.

The groceries sold at this store are, quality for quality, the cheapest you can buy in the town.

ANY of your neighbors will tell you that. We made it a rule when we commenced business—and have rigidly adhered to the rule ever since—to give you the top market value for your money, even if we occasionally lose ourselves. That you appreciate this is shown by the way our trade is growing—and by the selectness of our customers. You are missing a whole lot if you do not come into this store and look at our quality and prices.

British Columbia, said he cannot recall a time when interest in Canadian affairs was as keen as it is at present. The material progress which Canada is making is appreciated abroad, and as soon as the money market resumes its normal condition there will be no difficulty in securing all the financial assistance we may require for legitimate development. He predicts that British Columbia in a few years will establish some world records in nation building.

## Methodist Church Harvest Thanksgiving.

The Harvest Thanksgiving of the Methodist Church was celebrated on Sunday and Monday amidst beautiful evidence of the bounty of Nature and of the thanksgivings of a large gathering both at the Sunday services and on Monday evening when a successful social was held. At both morning and evening services special harvest hymns and anthems were attractive features, the soloist in the evening being Mrs. Morfit, who sang "For Ever With The Lord" very sweetly, and the anthem, "I Will Extol Thee" being well rendered by the choir. Rev. R. W. Lee was the preacher on the morning, and Rev. R. M. Thomson of Penticton at the evening service. The interior of the little church was a perfect picture of harvest with the abundance of splendid fruit and bright flowers displayed to the utmost advantage. The scheme of decoration was really beautiful and elaborate; the centre of attraction was a cleverly-contrived fountain in full play and almost hidden with fresh moss and Oregon grape foliage. On a white draped table in front of the platform were vases of gold and white chrysanthemums, flanked with small ripe fruit, and enormous yellow pumpkins, apples, pears, grapes, and purple egg plant were heaped in lavish profusion everywhere. Vegetables of every kind were cunningly mixed with the fruit and added to the color and effect, and the temporary screen of Oregon grape and crimson crab apples bearing the inscription "Harvest Home" was a pretty finishing touch to one of the most artistic harvest festival decoration

## Shiloh

"The Family Friend for 40 years." A never-failing relief for Croup and Whooping Cough.  
 schemes we have seen for a long time.  
 On Monday evening a large number met for the social evening and concert, although a number of the members were regrettably absent through illness.  
 A capital musical program was rendered, Rev. R. W. Lee in the chair.  
 Though not lengthy, every item gave pleasure to those who composed the audience. Songs were given by Mrs. Robbins, Mr. A. V. Vickery and Mr. T. G. Beavis, and a recitation by Mrs. Lee was much appreciated.  
 Refreshments provided by the ladies were served at the conclusion of the most enjoyable evening.

### Town School Report For October.

Below are the names of the children obtaining 75 per cent. or more of their marks:

**SECOND READER.**  
 Ronald White, 85; Carleton Clay, 82; Roy Tully, 78.

**FIRST READER.**  
 Mahol Shields, 81; Hilda Arnett, 77.

**SECOND PRIMER.**  
 Helen White, 91; Alice Limmer and Arthur Gantrell, 85; Jean Blowitt, 84; Marlon Bonvis, 82; Moyes Clark, 77.

**FIRST PRIMER.**  
 Lily Everton, 88; Isabel Hogg, 86; Mildred Shields, 84.

# The Summerland Review

PUBLISHED BY THE REVIEW PRINTING & PUBLISHING COMPANY LIMITED.  
RALPH E. WHITE, MANAGING DIRECTOR

SUBSCRIPTION RATES: \$2.00 PER YEAR, IN ADVANCE. SIX MONTHS \$1.00.

### Advertising Rates:

LEGAL NOTICES.—Twelve Cents per line for the first insertion: Eight Cents per line for each subsequent insertion.

LAND NOTICES.—\$7.00 for 60 days, \$5.00 for 30 days.

WATER NOTICES.—30 days, 150 words and under, \$3.00; each additional 50 words, \$1.00.

THEATRICAL, ETC.—50c. per inch for first insertion, and 25c per inch each subsequent insertion.

LOCAL NOTICES or Readers, Immediately following regular locals, 20c per counted line; 10c per line each subsequent insertion. Half these rates when accompanying display advertisements.

LODGE NOTICES, Etc., 25c. per week, per column inch.

FOR SALE Advertisements, Etc., 3c. per word first week; 1c. per word each subsequent week.

Transient Advertisements payable in advance.

Rates for Contract Advertisements furnished on application.

Copy for change of contract advertising must be in the hands of the printer not later than Wednesday noon to insure publication in the next issue.

In accordance with schedule of prices adopted throughout the valley, charges for advertising are now being made weekly. Heretofore when five issues were made in one month the result was a loss. By the new method customers are charged each week for just the amount of space used.

FRIDAY, NOV. 7, 1913.

### COMMENDATION FOR MR. BURRELL.

HON. MARTIN BURRELL, Minister of Agriculture, and our own Yale-Cariboo member, is being widely commended throughout Canada for his aggressive agricultural policy. The ten million dollars voted for agriculture has proved exceedingly popular, and by co-operating with the provincial governments Mr. Burrell has evolved a plan which has greatly increased the effectiveness of the agricultural work of both provincial and Federal governments. The "Canadian," a non-partisan weekly published in Toronto, has the following eulogy of the work of Mr. Burrell, which is but typical of the commendation he is receiving from all sides:

"The Englishman who is Dominion Minister of Agriculture, has made a speech at a country fair that ought to be endorsed by every newspaper and publicist in Canada. Mr. Burrell said that the ten million dollars that has been voted for the aid of agriculture in the provinces, will be spent without reference to politics. The apportionment has been made according to the population of the provinces, and before the money was voted, Mr. C. C. James, former Deputy Minister of Agriculture for Ontario, laid out a scheme in conjunction with each province; so that the money will be spent where the best results will be secured.

"Mr. Burrell is a skilled farmer, of high intellectual culture. He is governed by the best traditions of public service. He is of course, a thorough Canadian, which makes it the more gratifying for those who rejoice to call him an Englishman, to render him the warmest tributes of respect for the administration of his department.

"If the agricultural grant shall be allocated according to the population of the provinces, why should not the grant for good roads be similarly treated? The partisan enemies of the government say it is because the funds are intended to be used where they will be of the most electoral advantage, and that that is why the Senate refused to pass the bill.

"It might be argued by a captious purist, that the agricultural grant was devised to benefit the government, and that it is, therefore, as shrewdly partisan as though the manner of its distribution were nakedly political. But such a counsel is a counsel of foolish and impossible perfection. There is no reason why rectitude should put a premium on obtuseness.

"To the pure all things need not be stupid. One of the things that the so-called clever politician does not know is that the best service of the public is the best service of the party.

"Mr. Burrell is too wise a man to set out to wreck his party. He is too sincere a Canadian to be willing to despoil the country of its rightful dues. He is a public servant who knows the political preciousness of a good name. More power to his elbow, more success to his department."

### TEACH AGRICULTURE IN SCHOOLS.

BOOKS are not the only source of inspiration and learning, and it is a satisfaction to know that our educational authorities are not only awakening to a realization of this fact, but are acting upon their conviction. Our local delegates reported that this question came up at the recent Trustees Convention at Victoria, and a motion was proposed asking that certain forms of agriculture and horticulture be added to the school curriculum. This they say was voted down by the city delegates. Following closely upon this adverse report it is a satisfaction to hear from our own member, the Hon. Price Ellison, that it is proposed to introduce such an elementary course of instruction in the schools of the province. The Minister of Finance and Agriculture made this announcement following a conference with Dr. Robinson, superintendent of education; Mr. W. E. Scott, Deputy Minister of Agriculture, and Dr. C. C. James, adviser to the Federal Department of Agriculture.

It is said that Dr. James cordially agreed with the proposal, and was able, by reason of his past experience as a lecturer in the Guolph Agricultural College, to furnish the provincial authorities with valuable information.

As yet the plan has not been carried out to any definite extent, although it stated that a commencement will be made next year. It has been thought wise to give an elementary course in the rural schools for a beginning, and later the work may be extended in a modified form to the schools of the towns and cities of the province. Details as to how far up in the public school course the training will be started, how far carried on, and how much of a course will be prepared for the high schools, have yet to be arranged by the educational authorities. Whether an elementary course in agriculture will be made optional or obligatory has not been settled upon, although it is supposed that it will be obligatory in the lower grades, and possibly optional in the high schools.

Suggestions have been made that fruit farming, composition of soils, rotation of crops, principles of irrigation, stock raising, grain and hay farming, be included in the elementary course.

### AN ALFALFA "CAMPAIGN."

THERE has just been brought to a close in the country direct to the south of us one of the most remarkable "campaigns" that has ever been promoted for the advancement of agriculture. At the instigation

of the Spokane Chamber of Commerce a number of agricultural scientists, experts, particularly in the line of alfalfa and fodder crops and the feeding of live stock, were organized into a lecture and demonstration troop and sent throughout the irrigated districts of Washington, Oregon and Idaho. Some 2700 miles by railroad, and 60,000 miles by auto and team were covered. Their errand was to show the farmers the wisdom of diversified farming and the economic wrong of the one-crop system.

And the farmers were ready for the message brought them, for not only did they show great interest and availed themselves of every minute of the experts' visit to ask questions, but pledged themselves to break out of the old rut and enter the new era dawning. In fact, many were found who had already recognized the truth of what Prof. Holden and his men argued, and had for some time been raising alfalfa and feeding to livestock.

### YELLOW MEN ON THE COAST.

ARCHIBALD MCGOUN has a strong letter in the Montreal "Gazette" protesting against Sir Richard McBride's attitude of hostility towards Oriental immigration into British Columbia. Mr. McGoun argues that we cannot exclude our Indian fellow-subjects.

It is all very well for people in Eastern Canada to take high grounds on a question of this kind, but it would probably be as well if we decided to let the people of British Columbia form Canada's policy in this matter. They are our fellow-subjects, much more truly than are the Hindoos and Sikhs of India. The desire of white men to retain our Pacific Coast as a white man's country is a natural one, and if they can succeed in doing it, the benefit will be shared with the rest of the continent.

WHAT will an acre produce? This question is not as often heard as it used to be, but a definite and authentic answer is always interesting. Here's an undoubted instance of what a one acre lot, situated no better than many an acre here, did this year, and no account was taken of anything but tree fruit. More than 600 boxes were taken from this particular lot, and were sold at \$1.20 box orchard run. The trees are ten and eleven years, and include Stayman's Winesap, Arkansas Black, Gano and Jonathan. Give us some more facts like these.

THERE is nothing, aside from the milk of human kindness, so necessary to the comfort of any family as the milk of a good cow. It is like oil poured upon the troubled water of family life; it is perfect food for the baby; it is an excellent beverage for the children; it furnishes cream for the coffee, butter for the bread, and cheese for the lunch. It shortens the pie crust, and daisies the Johnny cake. even the cats and dogs cry for it.

THE FARMER who went to sleep ten years ago, waking up now, has to learn many new things. He is ten years behind the times. The farmer to-day is ten years behind the time of the farmer ten years hence. For this reason it behoves every man to be awake to the present opportunities, and to look as far into the future as he is able to do. Keep abreast of the times.

### A FALSE REPORT OF SMALLPOX.

A report that a case of smallpox had appeared in Kaleden has been conclusively denied. Misinterpretation of the following report is probably the cause of the circulation. The teacher of the Kaleden school visited some friends in Keremeo for Thanksgiving, and while there came in contact with some people who later developed smallpox. In order to avoid all risk it was deemed advisable to temporarily close the school at Kaleden and to quarantine the teacher until the period of incubation shall have passed.

P. P. Johnston left on Thursday morning, on a business trip to Nelson and vicinity.

C. M. Woodworth of Vancouver, who attended the Assizes at Vernon last week, took the opportunity to visit his fruit ranch here.

Mr. and Mrs. Fetherstonhaugh, accompanied by Miss Heber-Percy, left the first of this week for England for a visit of some months.

Mr. and Mrs. W. Arnett and young daughter left on Tuesday for Winnipeg, where they will remain for some weeks.

Mr. Ed. Garnett and son George, left on Thursday morning for a three weeks' visit to Saskatchewan.

The result of his experiment during the past season in growing early vegetables will be given in an address by Mr. J. L. Hilborn at a meeting of the Farmers' Institute in Campbell's Hall next Tuesday evening.

Mr. W. Ritchie returned early this week from a visit to various Alberta points. Mr. Ritchie says that while the farmer, particularly the man who keeps some live stock, seems to be in comfortable circumstances, all the cities are suffering from the scarcity of money.

A most unfortunate accident befell Mrs. Harry Reynolds during last week-end. In an attempt to separate two of her own dogs, who were having a fight of too much deadly interest to heed their mistress' remonstrances, she sustained a very nasty, though quite unintentional bite from one of them, on her right foot, near the ankle. As a result Mrs. Reynolds is temporarily crippled, and is now at her mother's home in Peach Orchard.

**CORDY & HIGGIN, Summerland, B.C.**

## SALE of FANCY WORK

AT THE

### College Gymnasium,

### Thursday, November 13th

Beginning at 3 p.m.

### A New England Supper

will be served, from 3 to 7 p.m.

### Musical Program in the Evening.

**NO CHARGE FOR ADMISSION - Offertory Only**

Proceeds in Aid of COLLEGE AUXILIARY.

### Water Act and Amending Acts.

Before the Board of Investigation.

In the matter of Bald Range Creek, Bear Creek, Big Horn Creek, Bold Creek, Bouchor Garden Creek, Cedar Creek, Clover Creek, Cranberry Creek, Davidson Creek, Deep Creek, Deer Creek, Eparron Lake, Fern Creek, Hill Creek, Jack Creek, Keef Creek, Miller Creek, McDougall Creek, Power Creek, Pigeon Creek, Rashdale Creek, Shannon Creek, Smith Creek, Spoer Lake, Spring Creek, Spruce Creek, Tamarack Lake, Trepannier Creek, Vernon Creek, Venner Creek, tributaries of Okanagan Lake in the neighborhood of Peachland, and of all unnamed streams tributary to or in the vicinity of any of the said streams.

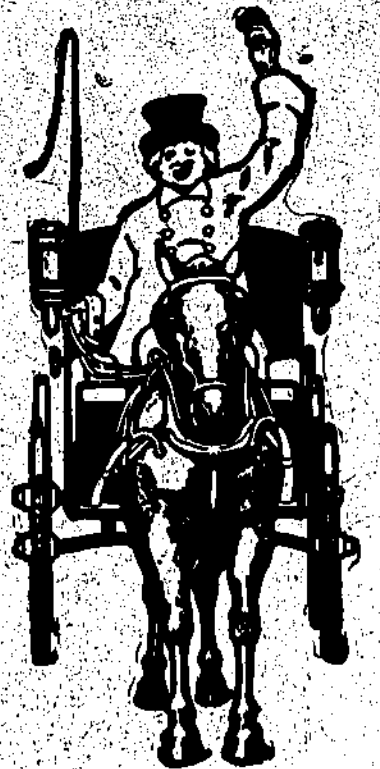

NOTICE is hereby given that a meeting of the Board of Investigation will be held at Peachland on the 21st day of November, 1913, at nine o'clock in the forenoon when all claims which have been filed, all objections thereto, and the plans prepared for the use of the Board will be open for inspection. All persons interested are entitled to examine these and to file objections thereto in writing if they deem fit.

At this meeting claimants shall prove their title to lands to which their water records are appurtenant. This may be done by producing, in case of Crown Granted lands, the title deeds, or the certificate of title, or a certificate of incumbency, or in case of lands not held under Crown Grant, by producing the pro-emption record or the agreement of sale, &c.

Objections will be heard forthwith if the party objected to has received sufficient notice of the objection.

The Board, at the said meeting, will determine the quantity of water which may be used under each record, the further works which are necessary for such use, and will set dates for the filing of plans of such works, and for the commencement and completion of such works.

Dated at Victoria, B.C., the 7th day of October, 1913.  
For the Board of Investigation,  
J. F. ARMSTRONG,  
Chairman.

Vancouver, B. C., Nov. 5. —  
(Special) — "Magnificent" is the  
word used by Mr. A. W. Smithers,  
Chairman of the Board of Direc-  
tors of the Grand Trunk railway  
system, upon his return to Lon-  
don, in describing the way Cana-  
da passed through the recent finan-  
cial stringency. He said the fine  
spirit of courage shown by Cana-  
dians has been rewarded by a re-  
cord harvest. Despite heavy ex-  
penditures by the Canadian Govern-  
ment in railway and harbor build-  
ing, but little was added to the  
national debt. Few governments in  
the world, said Mr. Smithers, are  
in a more satisfactory condition.

Passing Events: Social, Personal, &c.

Mr. George Anderson is away in  
the mountains again enjoying some  
hunting.

Mrs. A. L. Moreland and two  
children returned to her home in  
Kelowna this morning.

Messrs. A. H. & J. Steven are  
shipping a carload of apples of  
mixed varieties to the prairies to-  
day.

Among those who travelled up  
the lake on Wednesday from Sum-  
merland were Mrs. and Miss Kerr  
and Mr. R. V. Agur.

A daughter was born to Mr. and  
Mrs. Edgar at the Hospital early  
this morning. Both mother and  
daughter are doing well.

A car of Christmas apples is be-  
ing shipped to England next week  
by Alex. Stewart. Orders for fruit,  
or space only, will be taken at same  
prices as by Union. ad

Indian Agent J. R. Brown left  
for Victoria on Wednesday morn-  
ing. Mr. Brown goes down to the  
capital to attend a sitting of the  
Royal Indian Commission.

The buying of Christmas presents  
has already begun, and there are  
some very attractive special articles  
to be found in our stores this week  
suitable for sending home to the  
Old Country.

Eighty-five per cent. of head-  
aches are caused through eye-strain,  
so if you are troubled that way do  
not fail to consult Dr. S. L. Taube  
at Summerland Drug Store on Wed-  
nesday, November 19th.

Presbyterian services will be  
held next Sunday in St. Andrew's  
Church in the morning and in the  
Methodist Church in the evening.  
Mr. Daly will conduct both ser-  
vices. Mr. D. McKellar will sing  
at the evening service.

Principal E. W. Sawyer of the  
College had a most interested au-  
dience of young people at Vernon  
on Monday night when he deliv-  
ered a lecture on "Christian Cul-  
ture," to the Young People's So-  
ciety of the Baptist Church there.

All holidays will soon be quite  
over, and our town workers have  
been returning daily during the  
past few weeks. Mr. C. T. O.  
Rush, accountant at the Bank of  
Montreal is expected back to-mor-  
row after a six weeks' holiday.

The Summerland Musical Society  
has decided to put on "The Mik-  
ado" this season instead of "The  
Yeoman of the Guard." Practices  
will be held every Wednesday at 8  
p.m., conducted by Mr. Dan Wil-  
liams. Cast rehearsals on Mon-  
days, managed by Mr. Wm. Sauter.

Mr. and Mrs. G. M. Ross return-  
ed on Wednesday evening from  
their long holiday, and have had a  
thoroughly enjoyable time. Mrs.  
Ross has had a happy reunion with  
many friends in Webster City,  
Iowa, during the latter part of  
their vacation.

Flotsam and jetsam and pieces of  
wreckage from the accident to the  
"Skookum" have been picked up  
along the shore from Penticton to  
above Summerland. At Trout  
Creek the first intimation of an  
accident was by the washing up of  
a portion of the deckhouse. The  
strong south wind of the week has  
been responsible for the far and  
fast travelling of wreckage.

As the "Okanagan" was ap-  
proaching the wharf last night a  
Chinaman caused much excitement  
by falling off the wharf. Going  
down the wharf at an angle, and  
directly toward the brilliant head-  
light of the approaching steamer  
he was evidently dazzled by the  
latter, and did not know he had  
reached the edge of the wharf un-  
til too late. He was quickly res-  
cued.

A pleasing innovation, and one  
which shows marvellous possibili-  
ties has been the colored pictures  
of local scenery shown at Empire  
Hall every night during the past  
week. These pictures, made by  
what is known as the Lumiere  
Autochrome Process of direct color  
photography, are the work of Mr.  
C. P. Nelson, and are being much  
admired. The process is naturally  
much more intricate than ordinary  
photography. Nothing better could  
be used to illustrate the fruit in-  
dustry in all its phases than could  
a set of slides made by this pro-  
cess. The Departments of both the  
Province and the Dominion, inter-  
ested in getting immigrants, might  
well order some Summerland pic-  
tures for use abroad.

A daughter was born to Mr. and  
Mrs. S. A. Denike on October  
31st.

Mrs. A. W. McLeod, accompan-  
ied by the three youngest of her  
family, left on Wednesday evening  
to join Rev. A. W. McLeod at  
Chilliwack.

Our congratulations, no less  
heartily because they are a little  
belated, are due to Councillor and  
Mrs. Dunsdon, who are the proud  
parents of a fine little son.

Mr. and Mrs. J. Pushman, sen-  
ior, who have been spending the  
summer on their orchard, formerly  
the Mark Manchester, have gone to  
live with their son at Naramata  
for the winter.

Mr. W. C. W. Fosbery has  
been appointed by the Department  
of Agriculture to undertake statisti-  
cal work on the west side of Ok-  
anagan Lake. Major Feldtmann  
takes the east side.

There is quite an epidemic of  
feverish colds and in some cases  
"grip" in town this week, and a  
considerable number of our folk  
have been confined within doors,  
unhappy sufferers from it.

The home of Mr. and Mrs. J. J.  
Mitchell presented a gay scene last  
Friday night when a party of young  
people assembled to celebrate Hal-  
low-e-en, which, needless to say,  
was held in a very happy way.

Miss Myrtle Clay went up the  
lake on Wednesday morning to Kel-  
owna where she was met by some  
friends from Halifax and spent a  
delightful day with them motoring  
in and around the neighborhood.

By telegraph to his sons at Nara-  
mata we learn that Mr. J. M. Rob-  
inson had landed by s.s. "Megan-  
tic" and is now staying at Ottawa  
in his visit east. He is not ex-  
pected here until the end of Novem-  
ber.

Track-laying has now reached  
the mouth of Meadow Valley.  
There a siding will be laid, and  
this will be the base of operations.  
The camp which has been located  
near the bridge will be moved early  
next week.

Considerable interest has been  
aroused as to the name of the suc-  
cessful tenderer for the construc-  
tion of the new wharf. Several  
local tenderers have had their  
checks refunded, thus intimating  
that their tenders were too high.

After spending about a week  
with his family and visiting  
friends here, Mr. David Lister re-  
turned to his charge at Lumby last  
Saturday. Mr. Lister is at pres-  
ent engaged in the Home Mission  
field of the Presbyterian Church  
in Canada.

A meeting of basketball enthu-  
siasts has been announced for next  
Monday evening, when organiza-  
tion will be completed. Several  
preliminary meetings have been  
held, and there is every prospect  
of a large and enthusiastic club  
this winter.

per day, or 400 post holes per day.  
Write the Ducrest Stump Puller &  
Tools Mfg. Co., Burnside Road,  
Victoria, B. C. n7,14p

Hilda Arnett and Earle B. Wil-  
son, of the Town School, were  
awarded prizes this week for their  
School Gardens. The prizes were  
offered through the local Women's  
Institute, and thanks are tendered  
to the Institute officials for their  
kindly interest in, and their recog-  
nition of the children's work in  
gardening.

A very fine picture showing in  
detail the manufacture of paper,  
from the log to the finished article,  
was shown at Empire Hall on  
Thursday night, and will be rep-  
eated to-night. The various mech-  
anical processes were very clearly  
shown, with all machinery in mo-  
tion. This will be included with  
other educational features at Sat-  
urday's matinee.

The abandonment of the per-  
formance of "Good for Nothing,"  
by the "Summerland Players," on  
Tuesday last was most unfortunate  
and much regretted by those who  
had been looking forward to an  
evening's enjoyment. An accident  
sustained by Mrs. Harry Reynolds,  
who was to have played "feminine  
lead" in the part of "Nan," made  
it impossible for the Players to  
appear.

Remember the date of Dr. Taube's  
visit to Summerland Drug Store  
on Wednesday, November 19th,  
and if there is anything wrong  
with your eyesight do not fail to  
consult him.

The winter time table of the  
C.P.R. went into effect last Sun-  
day. One of the four through  
trains on the main line has been  
cancelled. Any changes between  
Okanagan and Vancouver or Cal-  
gary, are noted in our "traveller's  
guide" shown elsewhere in this  
number. There is no change in the  
lake service.

This is the season of the year  
when typhoid is heard of. Fortu-  
nately Summerland does not suffer  
much from this scourge. We re-  
gret to learn, however, that there  
are two cases near Victoria Gar-  
dens—one a young Mr. Vander-  
berg, who is now convalescent; the  
second, Mrs. Dow, who has been  
ill for several days.

Mr. G. A. Gayton, wife and  
daughter, who have for some days  
been the guests of Mr. C. H. Gay-  
ton, brother of the former, left last  
Thursday for their home in Cali-  
fornia. They will visit Vancouver,  
Victoria, and other Coast cities.  
They came to the Okanagan by way  
of the Kootenay. Mr. Gayton has  
been a conductor on the Southern  
Pacific Railway for twenty-five  
years.

Shiloh  
The family remedy for Coughs and Colds.  
Small dose. Small bottle. Best since 1870.

Snow falling on the 7th of Nov-  
ember, but in Summerland gardens  
the following June varieties of  
flowers were carefully counted this  
morning—carnations, verbenas, an-  
tirrhinum, sweet peas, Sweet Wil-  
liam, pansies, double petunia, mig-  
nonette, and nicotina. A perfectly  
formed and perfumed La France  
rose was cut in the garden of Mr.  
John Tait.

Some very fine pictures are being  
shown in Empire Hall, some of  
which have been prepared at very  
great expense. Next week a long  
play in which four reels are used  
will be given. This, Mr. Shaw  
says, is the longest picture ever  
shown in this part of the country.  
Following closely after this the re-  
markable picture "King Robert of  
Sicily" will be shown. Mr. Shaw  
has been trying for some weeks to  
get this picture and it was only by  
chance that he was able to get it.  
It is being shown in one of the  
Coast cities and must be returned  
to the same city after two days  
here. It is said that the cost of  
producing this picture play was  
\$250,000.

The  
Summerland  
Development  
Company

Has a few CHOICE LOTS  
left in their great Closing Out  
Sale. These are offered at the  
original price, in spite of the  
fact that the value of the land  
has been greatly enhanced  
through the activities of the  
District.

NOW is your chance to In-  
vest in additional Hold-  
ings; or, if you do not  
own an Orchard, to es-  
tablish a Home in the  
Okanagan.

Both improved and unimproved  
lands are offered. Those in-  
terested will be shown over  
the District at any time to suit  
their convenience.

The Summerland Development Co.  
NARAMATA - B.C.

# OUR NARAMATA SECTION:

Everything of Business and Social Importance  
Transpiring in South Okanagan's Newest Town

## FOREWORD.

This week we open a new department in the Review, and while an experiment, we hope to make it permanent.

Naramata is steadily growing in importance, and we are ready to do our share to foster its further development. Nothing will so assist as publicity. A page of current events and of business news as reflected in the advertisements of her business men is the best kind of publicity. And it also has the further advantage of being the cheapest.

To be a success it must be co-operative. The Review is prepared and willing to go to considerable expense to gather and publish Naramata's current home news, and every column of printed news costs more dollars than is generally realized. For the supply of store and other business news we must have the co-operation of Naramata's business men, and upon them will depend the success of our attempt to "boost" Naramata.—Ed.

## Current Events — OF — Town & District

Mrs. Myers has been sick with tonsillitis this week.

Mr. H. J. Wells made a business trip to Penticton last Saturday.

Mrs. H. J. Wells and daughter Lois, went to Kelowna on Wednesday.

Mr. J. L. Logie paid a visit to his little grand-daughter on Saturday.

Mesdames Mitchell, Wells, Manchester and Cook were in Summerland on Monday.

## UNITY CLUB WINTER PROGRAM.

The ladies of the Unity Club are planning to do their share in contributing towards the winter's entertainment. They will give a series of monthly dances and also several whist drives. The dance committee are arranging for some very enjoyable parties. Their New Year's Ball is booked to be one of the nicest events given in Naramata. Something original is planned for the later dances. The whist drives will be given in the Club house. A stove has recently been purchased which in addition to the cheery fire place will make the building a very cozy place to pass away a winter evening. Both series have always been popular and good times are always had at any Club function.

This Space For Sale

## SYNDICA HOUSE, NARAMATA

THIS NEW and Modern Hostelry will be completed and Furnished ready for Permanent Boarders and Transient Lodgers on OCT. 1st THE DINING-ROOM IS NOW DOING BUSINESS.

Cuisine Excellent, Rooms Large and Airy,  
Building Steam Heated, Good Bath Accommodation,  
Satisfaction Guaranteed.

For Rates, which are very reasonable, apply to F. L. ROE, Manager.

## HALLOW-EEN PARTY AT HOTEL NARAMATA.

A most picturesque and cheery little affair altogether was the Halloween party at the Hotel Naramata held by resident guests, and participated in by many favored with invitations from the town and from some of the Summerland side of the lake. The program was that of a simple merry party, with all the time-honored games and fun peculiar to Halloween, and was thoroughly enjoyed until a late hour on that eventful evening. A big fire of logs blazed cheerily on the hearth in the wide comfortable hall, and a tempting little dinner was laid for the guests in the adjoining tea room, brightly decorated with flowers and foliage. After dinner the excitement of the evening began. Ducking for apples caused much hilarity, and popping corn told fortunes good and bad.

Music occupied a good part of the evening, and songs and recitations made up an excellent impromptu program of talent. It looks as if Naramata will have a social reputation for enjoyable dances and parties and concerts this winter that will be envied of the Valley.

## BEAUTY OF FALLS RUINED BY RAILWAY WORK.

To the many Naramata people who have formerly enjoyed the trail to the falls on Camp Creek, the present appearance of the falls will come as a decided disappointment. The railway line crosses here, with large rock cuts on each side of the ravine made by the Creek. At the end of the cut, on the south side of the Creek, which is very near the falls, is a large dump of loose rock which mounts about half the height of the rock face forming the falls. Thus their beauty is utterly destroyed. It only needs an unsightly bridge and a thundering train to completely spoil the picture. But still we practical people will prefer our bridge and train.

About half-way across the ravine of the creek is a large ridge on the top of which the line is conveyed. Between this ridge and the south cut will be constructed a big bridge spanning Camp Creek. Between the ridge and the big cut on the north will be a big fill. A "drift" has been made into the side of the ridge, which rises and extends back parallel with the creek, and a "trap" tunnel is used to get the dirt from it to make the fill.

The big cut and fill are the chief works yet to be done on this contract. The cut, roughly speaking, is within two hundred feet of being through, and work is being done at both ends of it. All the work here is at a very interesting stage now, and is being rushed by the present manager, Mr. Peterson. This work is expected to be completed by February at the latest.

## ACCIDENT AT TUNNEL.

Early Wednesday morning occurred the first accident of any consequence at the camp of Bacher and Harmount, an explosion in the tunnel, with two men injured. Patsy Santel, while levelling off for wall plates in the big tunnel, exploded a quantity of dynamite, causing serious injury about his eyes, face and hands. At the present writing it is not known whether or not he will lose the sight of both eyes.

Mike Raper, who was some distance away, was hit in the face and head by flying stones. He will probably lose the sight of one eye. Both men were sent to the Mission Hospital and from there will likely be sent to Vancouver and put under the care of Dr. Glen Campbell, the eye specialist.

Unconfirmed reports are current that another man lost his life in this accident. Nothing of this could be learned from the Grant Smith office.

Just as we are going to press information of another accident at the tunnel above Naramata has been received. A special boat has been sent across the lake for the doctor. Details of the accident could not be learned.

## GUNNING ACCIDENT.

A very peculiar accident happened to one of the workmen from the construction camps last week. He was out hunting with a shot gun and while climbing over some dead-fall he caught the trigger of the gun some way and discharged the shot into his back. He walked down to our local hospital to receive first aid from Mr. Mazini, the nurse in charge there.

We are sorry to learn of the illness of one of Mrs. Dean Walters' children.

The pile driver was making some needed repairs at the government wharf the first of this week.

Mr. Frank Gibson, late in the employ of Hotel Naramata, left on Monday for Vancouver.

Miss Bessie Mitchell of Penticton made a short visit at the home of her parents on Sunday.

We are glad to know that Mrs. Ronald Smith has returned and is now staying with her parents.

The "Skookum" took a crowd of over forty to Summerland on Saturday night to attend the picture show.

Mr. Bert Noyes left on Friday for Vancouver to accept the offer of a very good position in that place.

Can this be beaten? Bouquets of roses and sweet peas gathered from Naramata's flower gardens in November!

We are glad to note that Ina Ireland is continually improving after an illness of alternating relapses and gains.

Mr. Oswald Price, who has been doing carpenter work at the Syndica Hotel, left on Monday for Vancouver.

Lois, the little daughter of Mr. and Mrs. Dean Walters is quite sick, necessitating a visit to Dr. Andrew on Monday.

Miss Orca Williams will give a School Concert in Naramata Hall, December 19th. It is sure to be worthy the attendance of all.

Among the residences receiving additions and improvements before the coming of winter we notice those of Mr. Salting and Mr. Fred Simpson.

A baby daughter has been born to Mr. and Mrs. Gilbeaux, of Penticton. Mrs. Gilbeaux will be remembered as Miss Kate Smith. Congratulations.

Mr. and Mrs. Blair were down from their camp last week, returning Saturday. Mrs. Blair will again reside in the Wilson house after the last of December.

A Unity Club dance will be held at Hotel Naramata on Friday, November 14th. A fine dancing floor and splendid music should make a combination not to be missed.

The Ladies' Aid will hold their annual bazaar in the church basement on December 8th. Great preparations have been made to make this as good as former ones.

Mr. and Mrs. Pushman, who have been living on their ranch in Summerland during the fruit season, returned on Saturday to remain for the winter at the home of their son, Mr. J. H. Pushman.

Mr. Edgar Peacock is selling household furniture and stock in preparation for moving back to his former home on the prairies, near Winnipeg. Mr. Peacock expects to have all arrangements for leaving completed this week. We are very sorry indeed to lose Mr. Peacock.

Mr. Davidson, of Peachland, Rev. F. W. Pattison, of Summerland and Mr. Bartlett, of this place made a trip to the tunnel camp last Friday taking dinner with Mrs. V. L. Watson there. They were successful in getting some very good pictures of the work.

## Summerland Meat Market

J. DOWNTON, Proprietor.

Fresh and Cured Meats always on hand. Fish and Game in Season.

TERMS STRICTLY CASH

Water Act and Amending Acts.

Before the Board of Investigation.

IN THE MATTER OF—

Trout Creek, Bath Creek, Darke Creek, Darke Lake, Eneas Creek, Fox Creek, Prairie Creek, tributaries of Okanagan Lake in the neighborhood of Summerland and of all unnamed streams tributary to or in the vicinity of any of the said streams.

NOTICE is hereby given that a meeting of the Board of Investigation will be held at West Summerland on the 19th day of November, 1913, at nine o'clock in the forenoon when all claims which have been filed, all objections thereto, and the plans prepared for the use of the Board will be open for inspection.

All persons interested are entitled to examine these and to file objections thereto in writing if they deem fit.

At this meeting claimants shall prove their title to lands to which their water records are appurtenant. This may be done by producing, in case of Crown granted lands, the title deeds, or the certificate of title, or a certificate of encumbrance or in case of lands not held under Crown grant, by producing the pre-emption record or the agreement of sale, etc.

Objections will be heard forthwith if the party objected to has received sufficient notice of the objection.

The Board at the said meeting, will determine the quantity of water which may be used under each record, the further works which are necessary for such use, and will set dates for the filing of plans of such works, and for the commencement and completion of such works.

Dated at Victoria, B.C., the 7th day of October, 1913.

For the Board of Investigation,  
**J. F. ARMSTRONG,**  
Chairman.

## Peachland Notes.

Wednesday was Guy Fawkes Day and nothing doing.

On Thursday Mr. Wm. Douglas paid a visit to Kelowna.

Mrs. Dr. Buchanan and daughter spent Saturday in Kelowna.

Bert Elliott and Alex. Seaton visited Kelowna on Wednesday.

Mrs. William Logan is spending a few days in Kelowna this week.

Miss Jean Gellatly was the guest of Mrs. Michael over the week-end.

Mr. and Mrs. Ed. Taylor are visiting relatives in Penticton this week.

Mr. Wm. Logan of Kelowna spent the week-end with his family here.

Mrs. J. B. Robinson and Mrs. A. D. Ferguson spent a couple of days last week in Vernon.

Miss H. Irene Elliott and Miss Ethel House are spending a few days with friends in Penticton and Kaledon.

Mrs. Herbert Logan left on Wednesday morning on a visit to Regina. She expects to be gone about a month.

While in town for the Methodist Anniversary Rev. Mr. Switzer of Kelowna was the guest of Mr. and Mrs. Wm. Douglas.

Messrs. Jas. Miller and Harold McColl returned on Thursday from Vernon, where they had been serving on the petty jury.

Rev. A. Henderson was absent in Kelowna on Sunday, filling the place of Rev. Mr. Switzer, who conducted the anniversary services here.

Mrs. Mitchell is desirous of extending her thanks to all those who so kindly helped last Wednesday in fixing her house up more comfortably for the winter. A shed was also built at the back so that her wood might be kept dry and ready.

On Thursday evening, October 30th, a number of the young people gathered at the home of Mr. Alf. Town to congratulate him on having safely reached another mile-post in his life's journey. Music, singing, games, and dancing crowded the evening with pleasure. Many of those present have expressed the wish that Mr. Town had several birthdays in the year instead of only one.

A monster banquet was served in the Orange Hall on Monday night, when the culinary art provided many viands tempting and delicious. When ample justice had been done the tables, the people moved over to the church, where an equally good "bill of fare" of another kind was "dished up" to an attentive and appreciative audience. We extend best wishes to the Methodist Church for many happy birthdays.

In the early hours of Tuesday morning the "Skookum" which was taking a barge load of cement pipes from the works here to Summerland was run down by the "Castlegar," and practically put out of business. The men who were aboard the small barge received a good shaking up. The "Castlegar" took them into Naramata, which place they reached just in time to board the "Okanagan" for home. They have no desire to repeat the experience.

Hallowe'en, the small boys holiday, passed quietly, nothing serious in the way of jokes occurred, although the usual number of gates refused to remain in their proper places, and found their way into some very unusual spots, "where no gate should be." We also noticed that Lieut. Gov. Bulven's front door has a rather strange looking carriage drawn up at it (the road grader), in which His Honor would be strongly tempted to drive, if he wore here.

### Peachland Methodists Celebrate Church Anniversary.

Peachland Methodist Church celebrated its second anniversary on Sunday last. The church was decorated in true birthday style, flowers being everywhere. Father Frost seemed to have stayed his word in order that the asters, chrysanthemums, and other garden flowers might be had in perfection. Special music was given by the choir, under the leadership of Mr. R. J. Hogg, both morning and evening. Mr. J. Marshall of the Baptist Church assisted with the evening service. In the morning Rev. Mr. Switzer based his sermon on the parable of the prodigal son,

All work is Guaranteed absolutely as tested.

## Summerland Drug Company

and in the evening he spoke of Christ's selection for the pillars of His Church. Both sermons showed deep thought and careful preparation, and were listened to by attentive and much interested congregations. On Monday night a banquet was held in the Orange Hall and an excellent program was given in the church.

Our idea of a true heroine is a woman who could talk back but doesn't.

Two cases of smallpox have been discovered in a home at Koremcoos. Smallpox is said to be almost epidemic on the south side of the International boundary, and this is the first case that has been discovered on the north side of the line.

There is no compensation for the woman who feels that the chief relation of her life has been a mistake. She has lost her crown.—George Elliot.

**SYNOPSIS OF COAL MINING  
REGULATIONS.**

COAL MINING RIGHTS of the  
Dominion, in Manitoba, Saskat-  
chewan and Alberta, the Yukon  
Territory, the North-west Terri-  
tories, and in a portion of the Pro-  
vince of British Columbia, may be  
leased for a term of twenty-one  
years at an annual rental of \$1 per  
acre. Not more than 2,560 acres  
will be leased to one applicant.  
Application for a lease must be  
made by the applicant in person to  
the Agent or Sub-Agent of the dis-  
trict in which the rights applied for  
are situated.

In surveyed territory the land  
must be described by sections, or  
legal sub-divisions of sections, and  
in unsurveyed territory the tract  
applied for shall be staked out by  
the applicant himself.

Each application must be accom-  
panied by a fee of \$5, which will  
be refunded if the rights applied  
for are not available, but not other-  
wise. A royalty shall be paid on  
the merchantable output of the  
mine at the rate of five cents per  
ton.

The person operating the mine  
shall furnish the Agent with sworn  
returns accounting for the full  
quantity of merchantable coal  
mined and pay the royalty thereon.  
If the coal mining rights are not  
being operated, such returns should  
be furnished at least once a year.  
The lease will include the coal min-  
ing rights only, but the lessee may  
be permitted to purchase whatever  
available surface rights may be  
considered necessary for the work-  
ing of the mine at the rate of \$10  
an acre. For full information ap-  
plication should be made to the  
Secretary of the Department of the  
Interior, Ottawa, or to any Agent  
or Sub-Agent of Dominion Lands.

W. W. CORY,  
Deputy Minister of the Interior.  
N.B.—Unauthorized publication of this adver-  
tisement will not be paid for.

**Cleanings from Review  
of Five Years Ago.**

Lack of space has compelled us  
to withhold these notes for several  
weeks.

Sept. 26.—The first annual ban-  
quet of the Summerland Brass and  
Reed Band was held in Hotel Sum-  
merland. On this occasion a hand-  
some silver loving cup was presen-  
ted to J. W. S. Logie, secretary-  
treasurer.

Dr. F. W. Andrew of Kelowna  
paid Summerland a professional  
visit.

Mrs. J. Blewitt arrived in Sum-  
merland last Friday to join her  
husband.

The Fruit Growers Exchange  
shipped 178 crates of peaches last  
Friday.

NARAMATA.—Mr. R. C. Lip-  
sett, Real Estate Agent of Nara-  
mata, contemplates moving to Sum-  
merland in a few weeks.

Oct. 3.—His Excellency Earl  
Grey, Governor-General of Canada,  
with his suite, visited Summerland  
this week.

Summerland this year contributes  
345 boxes of apples to the Pro-  
vincial Exhibit for the London  
Horticultural Society's Exhibition.  
Contributors — Messrs. Gartrell,  
Brown, Ritchie, Dale, Doherty,  
Fetherstonhaugh, and T. J. Smith.  
For the first time Jonathans were  
included in Summerland's exhibit.

Mr. A. A. Derrick proposes to es-  
tablish an up-to-date dairy in Sum-  
merland.

Mr. J. A. Kirk, C.E., announces  
his intention of removing to Sum-  
merland from Rossland.

**WOMEN'S WORK.**

After the devotional exercises at  
the W.C.T.U. meeting in the Pres-  
byterian Church on Monday after-  
noon, several matters of business  
were attended to.

It was reported that a valuable  
parcel of clothing and other goods,  
contributed by the ladies, with  
Mrs. Merrill in charge, had been  
sent to the new rescue home in  
Vancouver.

Mrs. Daly presented the subject  
of "The Responsibility of Parents"  
in an impressive manner. Tea-  
chers, preachers, and others cannot  
relieve parents of this responsibil-  
ity, hence the need of special train-  
ing for the important position of  
parenthood.

This subject chosen by Mrs. Daly  
was timely, as leading up to the  
topics to be studied at the Mothers'  
Meeting to be held at the home of  
Mrs. McAlpine on the first Monday  
of December.

On account of the short days it  
was decided to meet at half-past  
two instead of three, during the  
winter.

**FIELD COMPETITIONS.**

The field crop competitions insti-  
tuted last year among the Farmers'  
Institutes has met with much suc-  
cess. Many Institutes that did not  
hold competitions this year are like-  
ly to open such next year.

After giving the matter some  
consideration our local Institute  
did not hold a competition. It is  
hoped, however, that next year  
there will be competitors for prizes  
in the growing of alfalfa, fodder  
corn, and sugar beets, mangolds and  
potatoes.

The Deputy Minister of Agricul-  
ture is now having some printed  
matter prepared dealing with this  
year's and next year's competi-  
tions. This will be mailed to In-  
stitute members at an early date.

**B. C. FRUIT IN WINNIPEG.**

Winnipeg, Nov. 5. — Manager  
Griddale of the Scott Wholesale  
Fruit Company of this city, says  
that the reason that British Colum-  
bia fruit growers make such poor  
headway here is because their ag-  
ents are selling more fruit than  
they are producing, and promised  
carload shipments do not material-  
ize.

He adds that British Columbia  
growers appear to be overlooking  
their own market, inasmuch that  
Grand Forks, B.C., has been ship-  
ping in peaches from Marcus,  
Wash., and paying duty, because  
growers at Keremocs, B.C., though  
shipping through Grand Forks to  
Trail and Rossland, actually neglect  
this market at their own door.

Mr. Griddale thinks the British  
Columbia producers need more  
competent selling agents.

# The Summerland Review

DEVOTED TO THE INTERESTS OF SUMMERLAND, PEACHLAND AND NARAMATA

Vol. 6, No. 16

SUMMERLAND, B.C., NOVEMBER 14, 1913.

Whole No. 276

## Council in Regular Session

Agreement Made by Members with K.V.R. Approved by Board.

Proposal For Lining South Main Falls Down. All Work Likely To Go Over To New Council.

There was a full attendance of members at the regular monthly council meeting held last Tuesday morning.

There was a revision made in the minutes of the last meeting in order to provide for later developments with reference to finances. At that meeting it had been decided to cancel all the last debentures issued except \$12,000. As \$3,000 of debentures had been sold for the purpose of piping from Trout Creek to the reservoir it was unanimously agreed that the minutes should be revised to read \$16,000.

### LEGAL BILL SETTLED.

There were a number of communications, perhaps the most important being that from Messrs. Billings & Cochrane, reminding the council of the balance of their account. The council instructed the treasurer to issue a cheque for the amount. This account is rather ancient history. At the time that the irrigation systems were taken over by the municipality from the Development Company and the Garnett Valley Land Co., Messrs. Billings & Cochrane held the rather unique position of counsel for all concerned, and while advising that their account of some \$660 should be apportioned to all three parties interested they billed the municipality only, advising that the Garnett Valley Land Co. pay \$100, and the Development Co. \$200. The municipality paid its portion of \$360 at the time. According to the clerk, Mr. J. M. Robinson for the Development Company, contended that \$200 was an excessive charge for his company, and refused to pay. The Garnett Valley Land Company also withheld payment until such time as the Development Company settled. Some months ago the council promised Messrs. Billings & Cochrane that they would pay the balance; hence their instructions now to the treasurer. It is their purpose now to arrange a meeting between the treasurer and Mr. Robinson and Mr. Ritchie to have the matter adjusted.

An application was received from the Jam Company for permission to cut down dead trees in the park. This is the third or fourth application for these trees. The matter was left with Coun. Lewis to decide what trees might be removed, and to get the best price possible.

George Bloomfield asked permission to cut four trees near James Fyffe's property, offering 50 cents each. It was thought inadvisable to cut down any trees except where necessary.

C. H. Cordy applied for electric light for his new hotel, and Mr. Dodwell for the skating rink. Both applications were referred to the Board of Works.

### DEMANDS FOR WATER REBATES.

E. R. Simpson objected to a charge for domestic water for his foreman living on the same property with himself. The Board of Works will investigate.

W. H. Hayes complained of inadequate water supply at his Trout Creek ranch, and objected to paying his water rates. Coun. Lewis declared his case was no different from any others in that district, and that had not so many depended on rain there would have been plenty of water for all when hot weather came. The Board of Works was asked to investigate and put in a report.

J. M. McDougald who has not been receiving water at his ranch property was allowed a rebate.

Complaints from Mrs. Kate Bentley and G. R. Raincock were referred to the Board of Works.

Mr. Tate, son of C. H. Tate, asked for a rebate of the irrigation rate charged against the C. S. Stovens property on the side of Giant's Head, there being no connection. At the same time he applied for ser-

vice for next year. The rebate was granted and the Public Works Committee will look into the question of putting all the property along that section under irrigation.

An estimate of \$84 for putting domestic water on the Carefoot property was submitted by the Superintendent. As there were no funds for such work the council decided that it could not undertake it at present.

A. E. Hespeler again asked for metes and bounds of the Gulch Road so that he might give the municipality a deed.

### PROPOSED BIG IRRIGATION WORKS.

Coun. Robinson made a proposition that a by-law be prepared for the raising of \$40,000 or \$50,000 for irrigation purposes, and that plans be prepared and tenders asked for cement lining of the south main, which is about two miles long. Coun. Robinson emphasized the urgent necessity of undertaking this work at an early date, so that a great waste would be saved and the ditch would carry more water than at present. There is also a danger of damage to the railway which runs along beneath the ditch. Under the plan proposed by Coun. Robinson, the preliminary work could all be done by the present council and everything left in readiness for the new council to rush through the work early in the spring. In fact, the straightening of the ditch, cleaning it out and enlarging it could be done in December before the ground freezes. Coun. Robinson proposed that, if necessary, a meeting of ratepayers be called to get their approval before proceeding. His idea was that the work could be done by contract. This would not only give the council a better opportunity to finance it, but it would result in a big saving to the municipality. He declared that the people have been getting fifty cents worth of work for each dollar paid by having adopted the "day's work" method.

The plan proposed met with the approval of the Reeves, but some objections were made by Coun. Lewis. Looking into the question further, it was decided that under the existing law the present council probably had no right to incur obligations for its successors, and Coun. Robinson did not press his proposal further.

### RATES IN ARREARS.

A list of those who are in arrears with their irrigation, domestic water and electric light accounts was laid before the council. A motion had been carried at a previous meeting ordering the Superintendent to cut off the service of those who were much in arrears with domestic water or light. This had not been done, and Coun. Lewis insisted that were it done the accounts would be paid and service again applied for. Coun. Robinson contended that practically all on the list were quite willing to pay, but were at present without funds. He declared it would be a mistake to use any drastic measures. Those on the list who could pay could be forced to do so by other means, and with those property owners who couldn't pay, it was better to charge up the account against the property than to discontinue service. Both Councillors Lewis and Dunsdon were of the opinion that the council could not continue business under this plan; Coun. Lewis insisting that if they could not be collected the accounts should not be allowed to increase. Coun. Dunsdon said it did not seem fair for the municipality to finance a number of men whose names appeared on the list.

A monthly report of arrests, fines, etc., was submitted by Constable Graham. He also reported trouble with cattle from the Indian

(Continued on page 2.)

## Water Rights Board

Sits Here Next Wednesday.

The Provincial Water Rights Board proposes to visit several points in the Okanagan district this month, coming to Summerland on November 19, Peachland Nov. 21, Penticton Nov. 24. Nearly 1000 water record claims have to be dealt with in this district. A final settlement will probably be made in most of them. The preliminary arrangements were made at a previous visit of the water board some time ago.

In all, the board has 7335 water records claims to take up in the province, and Commissioner Armstrong has stated that this would mean sessions extending over two or three years. It is proposed to deal with mining records, power records, and those for domestic service on the Coast during the next year. The board will probably also pay a visit to Atlin next year. Very little work along this line has yet been undertaken by the board on the Coast, Duncan being the only point visited. Practically all of the sessions in the past have been confined to the irrigated belt of the province.

Under the policy recently laid down, particularly with respect to irrigated land, the water belongs to the land," says Mr. Armstrong. "This is recognized generally among the ranchers now, although we have some difficulty with companies who obtained large records in former days, laid out a system and sold all or nearly all of their land. Some of them believe that they still have a right to the water records, although owning but little land now, and selling their water year by year to the purchasers of their tracts. The policy now is that the water goes to the land, and the companies can only act in the capacity of carriers."

### WATER GOES WITH LAND.

That this is the proper policy to follow out is universally admitted, it is claimed. Roughly speaking, under this arrangement each fruit rancher in any certain district is assured of a share of the available water for irrigation purposes equal to the proportion his property bears in area to the total area of cultivated land. The flows of the streams available are measured by engineers, the area of the tilled land is also computed, the record then being arrived at on an arithmetical basis. This applies particularly where companies have recorded the flow of a stream and have sold large tracts of fruit land, annually supplying water through their own systems.

### MR. THOS. CUNNINGHAM IS NOW A DOMINION OFFICIAL.

Mr. Thomas Cunningham, Provincial Inspector of Fruit Pests, has received official notice from Ottawa that by order-in-council of the Dominion Government he has been appointed a Dominion Inspector under the "Dominion Destructive Insect and Pest Act," with full authority to enforce the provisions of the act. This appointment will remove all doubts regarding the jurisdiction of this provincial officer, so that the question of interfering with trade and commerce in future cannot be raised regarding any action that the inspector may deem necessary to take for the better protection of British Columbia from the danger of importing injurious insect pests and plant diseases.

The relations between the Dominion and the Provincial authorities are now of the most cordial character, thanks to the intelligent and comprehensive grip Dr. C. Gordon Hewitt, the Dominion Entomologist has on British Columbia conditions and the important interests involved.

Dr. Hewitt has just issued instructions, by circular letter, to the effect that all nursery stock and plants entering Canada which are found to be visibly infested with San Jose scale must either be returned to the shipper or destroyed. This regulation conforms in every particular to the practice which has prevailed in British Columbia for the past twenty-one years, and is a practical endorsement of British Columbia horticultural methods. This province is gradually coming into its own.

## R. H. English Injured.

Runaway Accident This Morning.

It is with great regret that we record a serious accident which befel Mr. R. H. English, early this (Friday) morning. As a result, Mr. English is, at the time of going to press, lying at his residence suffering from considerable injuries, the exact extent of which we are unable yet to state.

It appears that Mr. English was taking a wagon load of empty boxes down to the Dominion Cannery about eight o'clock, when just turning the corner by the Supply store, a pile of the boxes upon which Mr. English was sitting, became dislodged. The sliding startled the horses, and Mr. English, not being in a position to control them, they bolted to the end of the wharf, their driver being flung heavily just outside the Cannery.

Jack Stevenson and Dan McKellar, who were working at the Cannery, ran to the injured man's assistance, and also called Miss McAloney, who was passing. Mr. English was conveyed to the Supply store, and Dr. Andrew summoned, and was subsequently removed to his home on a stretcher. He has sustained nasty cuts about the head and face, and it is thought the wheels passing over him may have injured his chest, though it is hoped there is no serious internal injuries.

The horses bolted to the extreme end of the wharf, and then turning, waited quietly for some time until brought back by Lawrence Hatfield.

## Ladies' College Auxiliary

Sale of Work and New England Supper

Successful to the point of entirely clearing the stalls of their useful and pretty stock was the Bazaar held yesterday by the Ladies' Auxiliary of the College in the Gymnasium, while the "New England Supper" following proved a thoroughly enjoyable and characteristic repast. The final event of a long day was a very pleasant program of music.

The Gymnasium was crowded in the afternoon, making a pretty scene of activity and business. It seemed as if most of our lady residents were present, either as buyers or sellers.

The following stalls were loaded with saleable articles: Candy, Fancy Work, Dolls, Seeds and Plants.

At five o'clock the New England Supper was served at daintily laid little tables. Menu—Baked Beans, Brown Bread and Butter, Pumpkin Pie, Tea and Coffee.

At eight o'clock Professor W. H. A. Moore informally opened the musical program, and the following ladies and gentlemen took part. Piano Duet, Miss Hurschmann and Miss McLeod; Vocal Solo, Miss Myrtle Clay; Piano Solo, Miss McLeod; Vocal Solo, Mr. A. Bentley; Violin Solo, Miss Higgin; Piano Duet, Miss Hurschmann and Miss McLeod. A silver collection was offered and the proceedings closed with the National Anthem.

A sum of about \$160 was realized by this effort and is to be devoted to College funds, with especial reference to some immediate furnishing needs.

## SUMMERLAND WINNINGS AT BRANDON.

Mention was made in these columns some weeks ago of a gold medal won by Reeve Thomson, for the best collection of fruits at the Dominion Exhibition, Brandon. This district has not gone in very extensively for small fruits, confining itself principally to tree fruits, but that the smaller stuff and of the highest quality can be grown here was again proven by an exhibit in this class sent from here to this same exhibition.

Mr. W. J. Brandrith, in a recent letter to the Reeve complimented Summerland on the quality of its fruit, particularly the strawberries which came into competition and won over those shown by James Johnston, of Nelson, the famous strawberry grower. First prize was taken by Summerland fruit in each of the following varieties: White Currant, Red Currant, Black Currant, large Gooseberries, small Gooseberries, and Strawberries.

## Talk On Early Vegetables

First Fall Meeting Of Farmers' Institute An Interesting One.

President Hilborn Has Great Faith In Tomato Business. Success Awaits Practical Man.

An "experience meeting" was the term applied by President Hilborn to the first fall meeting of the Farmers' Institute, which was held in Campbell's Hall, on Tuesday evening.

There were a good number of growers present, and Mr. Hilborn, in opening the meeting, commented on the good work done by the Institute, and pointed out the possibility of further service for the benefit of its members. Mr. Hilborn gave a general review of local conditions as they impressed him, and offered some suggestions whereby losses might be eliminated and mistakes avoided. Had he come here at the time that most of our fruit growers did, he probably would have followed the same course, but with his experience as a fruit grower in Ontario, he believed many serious blunders had been made here in orchard planting.

He strongly disapproved of the practice of "filling," and said that peach trees should never be mixed with apple trees. He would plant his permanent trees in rows thirty feet apart, seventeen feet between trees in the row. Prunes or plums might be used for fillers, if desirable, but he preferred using the ground for vegetables, small fruits, fodder crops, etc. He urged that the poorer trees be taken out just as a dairyman would cull out his unprofitable cows. Even some full bearing apple trees scarcely pay cost. It was a simple matter to change these over to good varieties by top grafting or by budding, which seems to be the more common practice here. He believed much more could be made from the land, and at the same time, its fertility maintained or improved by growing crops between permanent trees rather than fillers, which would have to be taken out about the time they began to bear profitable crops.

Mr. Hilborn had found the soil in his orchard very rich in phosphoric acid and potash, but lacking in nitrogen and humus. These latter could be easily added to the soil by clover, or what he thought better, hairy vetch, which could be alternated with vegetable growing.

In treating of the financial situation that at present exists, Mr. Hilborn corroborated the Review's argument, when he said that imports should be cut down and every effort made to increase our exports. Hogs, cows and poultry should be much more general in the orchards.

Too much has been expected from apple trees. Until eight or nine years old profitable crops could not be expected. After this, large and profitable crops should soon be general.

There are not enough gardens in Summerland. As a result, grocery bills are too big and, though a healthy community, doctors' bills could be further reduced by the more general use of vegetables in the household. Perhaps small fruits could not be very extensively grown for export, but more could be grown for our own tables, further reducing the meat bill.

Referring to blight which had appeared in our orchards, Mr. Hilborn said our trees were growing too fast, and this was largely the result of pruning too heavily. He thought blight was spread by cutting during wet weather.

He predicted greater prosperity from now on, and was sure the new railway would better marketing conditions. Summerland should look forward to establishing a store in Vancouver, and perhaps in Calgary. This was not his own idea.

The speaker then took up the growing of early vegetables, which is his speciality. Nearly a year ago he had told the members that he intended to experiment in this work. After one season's trial, he had found the business better than he had expected, with as good prospects as any other crop. For himself he felt he could do better at this than at anything else.

With the cool, wet weather of June the season had not been as good as usual, but the crop had been fairly good. He found that much must be learned by our growers before early tomatoes would be the success they should be, and declared that Ontario would get our prairie markets for tomatoes, cucumbers and peppers if British Columbia does not soon do so—and it is a very large market. These things can be grown as well here as in the East. He had grown here this year the highest quality of cantaloupes he had ever produced. The showers of the East followed by hot sun caused blight on melons, but not so here. A dealer in Calgary to whom he had shipped for years, pronounced the melons he had sent him from here is of the very highest quality, better than anything received from the American side. Sunshine and lack of rain was the reason for this. Rain in some way spoils the flavor of cantaloupes. Heavier crops per acre can also be grown here than in Ontario. Because of the presence of phosphoric acid and potash it was not necessary to incur the large expense of buying bone meal as he had done in the East.

In reviewing some of his own mistakes, he mentioned that of setting his tomato plants too close to his apple trees as one of these. Those near the trees scarcely produced half a crop, while the others yielded abundantly. Good rich land was required for cucumbers, peppers and melons, with plenty of humus. Ordinary ground, well ploughed and cultivated, would be better for tomatoes. If too rich the plant would run to vines and foliage rather than fruit.

Mr. Hilborn could not give details of cost and revenue as, while he had made records from day to day, these had not been worked out. Speaking of this, Mr. Hilborn urged upon every grower to keep records. A simple method of accounting requiring very little time could readily be adopted. With this the grower would always know where his profits or losses were.

When asked if he could grow tomatoes at \$12 per ton, the speaker said he could not get rich very quickly at that price. He would prefer selling his early crop on the market, and then taking the later fruit to the cannery. Perhaps if a straight crop for cannery purposes were grown more than wages might be obtained. He thought a cannery a splendid thing for a community, and should be encouraged. It was a fact that communities in Ontario in which canneries were operating were more prosperous.

(Continued on page 2.)

## COUPON

Cut out this Coupon, and present it at The Drug Store, and they will exchange it for 100 Votes in the \$400 Piano Contest.

**Women's Institute**

A meeting of the Summerland Women's Institute will be held at three o'clock in the High School building, West Summerland, on Friday, November 21st.

A full attendance is requested for the following reasons:

At the meeting arrangements must be completed for the Dress-making Classes to be held about the 27th of November, and the names given in of those wishing to take advantage of these valuable lessons.

The Institute having entered the "Best Average Attendance" competition, it is important that good attendances at regular meetings be secured for the remainder of the year.

The question of forming a separate Institute at West Summerland must be decided at the meeting.

Program for the afternoon is "Christmas cooking, Christmas menus and talk on vegetables."

A family who lived in California had one of those domestics of the heavy hand. One afternoon the town experienced a slight shock of earthquake. Pictures were thrown down, crockery and furniture rattled about. In the midst of the tumult the mistress went to the head of the stairs and called out in a resigned tone: "Lizzie, what are you doing now?"

The only way to get your money's worth is to live a cheerful life.

**SHILOH** CURES COUGHS & COLDS

**The Summerland Development Company**

Has a few CHOICE LOTS left in their great Closing Out Sale. These are offered at the original price, in spite of the fact that the value of the land has been greatly enhanced through the activities of the District.

NOW is your chance to Invest in additional Holdings; or, if you do not own an Orchard, to establish a Home in the Okanagan.

Both Improved and unimproved lands are offered. Those interested will be shown over the District at any time to suit their convenience.

Call on or Write:

**The Summerland Development Co.**  
NARAMATA B.C.

**FARMERS' INSTITUTE MEETING.**

(Continued from page 1.)

Perhaps more than anything else that should encourage our growers to give more attention to tomato growing was Mr. Hilborn's remark that to be successful much better plants than he has seen here should be used. The people here were setting out plants that in the East would not be considered worth putting in the field. Given a good plant, almost anyone can grow tomatoes, and we can grow a better tomato here than can Ontario. Mr. W. H. Bunting, who was appointed by the Federal Government a year or two ago with others, to look into agricultural conditions throughout Canada, had visited this district, and on his return had asked Mr. Hilborn and a neighbor, Mr. Fraser, an extensive tomato grower to meet him. The three were old friends. In conversation with Mr. Bunting, Mr. Fraser had asked of the possibility of British Columbia ousting Ontario from the prairie tomato market, and had made particular enquiry of the Okanagan, which he seemed to fear would get the tomato business. Mr. Hilborn at that time was talking of moving to the Okanagan. Mr. Bunting's reply to Mr. Fraser was, "If the people in the south Okanagan ever find out how to grow tomatoes, they will crowd you hard. The best thing you people can do is to buy Hilborn off and not let him go there to show them how." Mr. Hilborn said that what Mr. Bunting meant was that we were not growing the right kind of plant for setting out. He had found since coming here that "Earliana" which he recommended to be the best—but of which there

were very many varieties, and was generally grown here—was a much better tomato than the "Earliana" grown in Ontario. It had a nicer skin, was more meaty and hence a better shipper. It had much less seed, and the green core so prevalent in the eastern fruit was almost totally absent.

When asked if he would have any plants for sale next spring, Mr. Hilborn emphatically said no. He had made a mistake in selling a few this year, but he was going to harden his heart against all next year. Growers must figure on putting more cost on their plants. He advised four transplantings, and when ready for the field, the plant should have a stock as large as a finger. He preferred cutting out the centre, leaving four branches, and at transplanting there should be some fruit and plenty of buds. In this way the crop would come in much earlier.

W. H. Milligan was called on to give his experience in tomato growing. He declared the only successful way to grow the plants was under glass. He had found that Mr. Hilborn, with fewer plants, had grown a much larger crop. Deep plowing, to loosen the soil, and constant cultivation were necessary. The more cultivation, the more fruit. He had found it best to plant his rows in pairs, two and a half to three feet apart with three feet between. This offered advantages in picking, irrigating and cultivation. He set his plants three and a half feet or more apart in the row. Mr. Milligan in 1912 had kept a record of the cost of one acre of tomatoes. This he found was \$84, including the plants come up to the time of picking.

Mr. Hilborn, in reply to a question, said that good plants cannot be grown under five dollars per hundred; to another that a peach orchard should never be bare. Weeds were better than nothing, and he would not clean them off in the fall. There were too many weeds grown here, and fodder or cover crops should replace them. He suggested that the Farmers' Institute offer a number of prizes for the places kept in best shape.

He regretted that paint could not be purchased at a more reasonable price, and be more extensively used. He, with a neighbor, was arranging to get in a car of glass, but he thought that now dealers were prepared to sell this much cheaper.

Replying to yet other questions, Mr. Hilborn advised the starting of tomato seed about the 20th or 25th of February. The plant must be kept growing, as if stunted, it was no good. When set out the root should have about six square inches of earth around it.

Mr. Walter Wright also gave a very acceptable report of the experience of his brother and himself in tomato growing. They had found Mr. Milligan's plan of planting the best. Next year they will avoid deep cultivation close to the plants, and they had found it a mistake to plant shallow. Constant cultivation was essential. From seven hundred plants they had this year shipped three hundred boxes of ripe fruit and fifty pent boxes of green. They had planted on three different soils. Manured soil gave viney, leafy plants which did not yield very abundantly. On unmanured land the plants were not so shady, and fruit was plentiful. Alfalfa soil had not done so well as the unmanured land.

Mr. Wright said he had been making a study of intercropping, and he was satisfied that a rotation of crops was best, and was better for tomato growing. First a sod, the corn, and for the third year a hood crop. There was a good market for early green corn, and then the stocks could be forced and used as fodder. He advised that near neighbors get together and build small silos.

Mr. Wright also emphasized the necessity of farm accounting, and said that he had been giving this special attention, and was now teaching a course in farm accounting in the college. Mr. Hilborn had helped him by giving him access to his books.

Mr. G. J. C. White read the motion passed at the last meeting of the Fruit Union directorate which is published elsewhere in these columns. There was some criticism of the stipulations set forth in this motion, but Mr. White replied that while the directors wished to aid all they must go into this carefully and conservatively; and they would welcome the advice of any whereby they might be broader than they seemed to be.

The next meeting of the Institute will be held two weeks later in the Men's Club, when Dr. Lipsatt will talk on Live Stock. Lecturers have been secured on the care of the dairy cow and on hogs.

**COUNCIL MEETING**

[Continued from Page 1.]

Reserve crossing to Trout Creek point properties, and suggested that Granville Morgan be appointed pound-keeper for that vicinity. A motion making the appointment moved by Coun. Robinson, seconded by Coun. Dale, was carried, Coun. Dunsdon voting nay.

Plan of Block 26 on Trout Creek Lakefront, owned by Adam Stark, was submitted for approval. This property had been divided into building lots, and as the act had been complied with, approval was given.

**PIPE LINE FINANCED.**

An agreement made with President Warren of the K.V.R. and W. A. Lang of the Dominion Glazed Cement Pipe Company, whereby the former took 2000 debentures for \$1800, and W. A. Lang 1000 for \$375, the proceeds to be used in laying a 10 inch pipe between the Trout Creek intake and reservoir, was approved by the council. The engineer's report, required a steel pipe for this work, but the members of the council could see no reason why a cement pipe could not be used. Upon reference to Engineer Latimer he approved of cement pipe for nearly all the work, which will result in a large saving in the capital cost.

An enquiry was made by Coun. Dunsdon of the Telephone Co. by-law. The clerk replied that Solicitor Kelley had been ill practically ever since he was asked to prepare the by-law.

That he had arranged with Supt. Mitchell to go on half pay after December 1st, was the statement of Coun. Lewes, but he supposed that the new work being undertaken would upset this arrangement.

**A MONTH'S ACCOUNTS.**

The following accounts were recommended by the Finance Committee, and order for payment passed by the board:

Pay Roll, October	\$1382.89
Summerland Supply Co.	15.80
R. H. English, feed	42.04
E. N. Rowley, packing	25.00
J. J. Mitchell, horse hire	30.00
Robertson-Godson Co., pipe	78.31
Northern Electric Co.	27.90
Can. Westinghouse Co.	11.20
Can. Fairbanks-Morse Co.	20.10
Sundries, horse hire	30.00
F. H. Latimer	37.50
Postage	18.50
C.P.R.	14.82
Bank of Montreal, interest	104.65
School Board	1070.00
Sundries, small accounts	32.21
<b>Total</b>	<b>\$2940.92</b>

**Peachland Notes.**

The High School here was visited by Inspector McLaren, of Victoria, last week.

Mr. and Mrs. Ed. Taylor returned on Monday from Penticton where they spent a very enjoyable holiday.

Miss Kate Miller left last Wednesday for Vernon where she has charge of a private case in the hospital.

Mrs. McCutcheon and daughter, Miss McCutcheon, of Winnipeg, accompanied by their friend, Mr. Smith, are visiting at the home of Mr. and Mrs. Town.

Voting on the extension of the electric light to the new townsite at Trapannier Creek took place last Wednesday, and passed, there being only one dissenting vote.

Mr. A. E. Kochaly, a Porlsan, who is studying to fit himself as a missionary to his own people, gave a very interesting talk on Porlsan customs in the Baptist Church last Tuesday. It was doubly interesting to the people as he was dressed in Porlsan costume.

An interesting meeting of the Women's Institute was held on Tuesday afternoon in the usual place. Recipes for mince meat were given by Mrs. L. Mills and Mrs. B. S. Brown. Christmas cake recipes were given by Mrs. A. W. Miller and Mrs. A. Town. Candy recipes were given by Miss Dimock and Miss Irene Elliott, with samples. Madame Grants, of Glasgow, was present, and begins her class in the Anglo-Parisian system of dress cutting and fitting. So many of the Institute members are taking up this work that it was found necessary to organize two classes, one in the morning, and one in the afternoon.

Some people grumble because the road to success isn't paved.

Mines of the Atlin district in Northern British Columbia are rivalling those of the Yukon. The past year has been the best in the history of the camp. One nugget weighing 79 ounces has just been brought to Vancouver. This is the biggest nugget ever found in Canada. If Atlin were as far away as Shusanna, there would undoubtedly be a big rush to the district.

Grazing privileges recently granted by the government on crown lands will, it is expected, have the effect of greatly stimulating livestock growing, particularly sheep farming. Another step in the same direction is the plan of the government to bring in thoroughbred cattle and sell them to farmers for the purpose of improving the dairy stock in the province.

A judge was trying a case recently and was much disturbed by a young man who kept moving about in the rear of the room, lifting chairs and looking under things. "Young man," the judge called out, "it seems to me that you are making a great deal of unnecessary noise. What are you doing?" "Your honor," replied the young man, "I've lost my overcoat and am trying to find it." "Well," said the judge, "I have seen people lose whole suits in here without making the disturbance you are."

He says construction is proceeding more rapidly at present than at any time since work was started.

Lots of easy marks have been done in the name of charity.

## Cleanings from Review of Five Years Ago.

Oct. 17.—Miss Minnie Robson, daughter of our esteemed principal of the Public School, arrived in Summerland last week, and will be a welcome addition in social circles.

Mr. E. B. May left early in the week for the east, where he will join Mrs. May on her return from an extended visit to the Old Country.

Oct. 24.—Thomas Garnett left for Virden, taking along a car-load of choice apples.

R. H. English disposed of his livery business this week to the Summerland Fruit Co. Ltd., and has taken over the management of that company.

A company is being organized to be known as the Okanagan Lake Boat Company, and has purchased the boats, etc., of the Summerland Navigation Company.

Oct. 30.—A notice appears in the Review of this date with reference to the application for letters patent to incorporate a district municipality under the name of "the Corporation of the district of Peachland."

Mr. and Mrs. W. J. Lawrence who have resided in Summerland for the past five years, left on Wednesday for Spokane where they will reside in future.

Harry Reynolds arrived in town on Tuesday, having made the trip from Quesnel to Summerland on horseback.

Nov. 7.—The tri-weekly mail service was inaugurated this week, and for the next six months citizens will be deprived of daily communication with the outside.

Nelson Bros. have been awarded the contract for the new public school building (now the High School).

Nov. 14.—Messrs. W. J. Ross and William Simpson are busily engaged packing an exhibit of Summerland apples for the Spokane National Apple Show.

The C.P.R. has just completed a preliminary survey of the route which the extension of the Spence's Bridge-Nicola line may take from Nicola to Penticton.

This number contains an interesting account of the "Fall round-up" of the "Summerland Broncho Busters."

Some of the business men of town met informally to talk over the question of forming a Board of Trade.

Some slight changes have been made in the sailing dates of the White Star Line, whose advertisement appears on page 7. The "Megantic" carries all classes of passengers, while the "Canada" and "Teutonic" carry second and third only.

### FROM "LOWRY'S LEDGE."

A hotel for women is being started in Vernon.

Counterfeit Canadian coins are plentiful in Vancouver.

Frost proof potatoes from New Zealand will soon be grown in B.C.

The Halyon Hot Springs are attracting rheumatic patients from all parts of the West.

A German colony will settle next spring upon 10,000 acres of land up the Skeena River.

Miners believe that the recent storm and tidal wave at Nome washed up sufficient gold-bearing sand to pay for the damage to the town.

Ten tons of milk and half a ton of cream are shipped daily from Chilliwack to Vancouver. About the same amounts are also shipped from Sardinia and South Sumas.

After being closed for over two months the saloons are again open in Nanaimo. If the saloons were always closed there would be fewer strikers. Booze is a greater enemy to the working man than the capitalist.

Vancouver, B. C., Nov. 12.—(Special)—Roads of the province have been much improved during the past season, for \$4,000,000 has been spent in road extension and betterment work. British Columbia now has 18,000 miles of roads and trails. Almost \$1,000,000 has been spent this year on bridges.

## HANDS ACROSS THE SEA.

Not a volume of The Youth's Companion is published that does not contain a number of contributions by British contributors—Mr. Gladstone, the Duchess of Sutherland, Rudyard Kipling, Lord Tennyson have in past years written for this great family paper.

During 1914 the Duke of Argyll, formerly Governor-General of Canada, will have something to say about "The Scot"—his character and characteristics; Jane Barlow will tell of the "Big Houses of Ireland"; Sir Ernest Shackleton will describe the qualities which lead to success in an explorer; Sir William Ramsay, the great chemist, will write upon "Waste, and How to Remedy It"; Sir John Murray will tell about "The Deepest Parts of the Sea"; Dr. C. W. Saleeby, eminent English physician, will describe "The Beauty That Endures."

This tells very little of what The Companion will bring its readers in 1914. As it is to-day, The Companion is as entertaining as you may remember it. But it is larger now, with special Family Pages, Boys' Pages, Girls' Pages. There are fifty-two issues in a year, not twelve.

If you do not know The Companion as it is to-day, let us send you sample copies containing chapters from Frank Lillie Pollock's great Canadian serial, "The Timber Treasure," with the Announcement for 1914.

Every new subscriber for 1914 in Canada will receive free all the issues for the remaining weeks of 1913—from the time of subscription until January, 1915—all for \$2.25.

THE YOUTHS' COMPANION, 144 Berkeley St., Boston, Mass.

New Subscriptions Received at this Office.

British Columbia will have a very strong exhibit at the United States Land Show to be held in Chicago November 20-December 8. A large space has been secured and special care is being taken in the collection of a striking showing of the resources of the province.

## Shiloh

The Family Friend for 40 years. A failing relief for Croup and Whooping Cough.

Water Act and Amending Acts. Before the Board of Investigation.

IN THE MATTER OF—Trout Creek, Bath Creek, Darke Creek, Darke Lake, Eneas Creek, Fox Creek, Prairie Creek, tributaries of Okanagan Lake in the neighborhood of Summerland and of all unnamed streams tributary to or in the vicinity of any of the said streams.

NOTICE is hereby given that a meeting of the Board of Investigation will be held at West Summerland on the 19th day of November, 1913, at nine o'clock in the forenoon when all claims which have been filed, all objections thereto, and the plans prepared for the use of the Board will be open for inspection.

All persons interested are entitled to examine these and to file objections thereto in writing if they deem fit.

At this meeting claimants shall prove their title to lands to which their water records are appurtenant. This may be done by producing, in case of Crown granted lands, the title deeds, or the certificate of title, or a certificate of encumbrance or in case of lands not held under Crown grant, by producing the pre-emption record or the agreement of sale, etc.

Objections will be heard forthwith if the party objected to has received sufficient notice of the objection.

The Board at the said meeting, will determine the quantity of water which may be used under each record, the further works which are necessary for such use, and will set dates for the filing of plans of such works, and for the commencement and completion of such works.

Dated at Victoria, B.C., the 7th day of October, 1913.

For the Board of Investigation, J. F. ARMSTRONG, Chairman.

# What Every

# Woman Knows

The groceries sold at this store are, quality for quality, the cheapest you can buy in the town.

ANY of your neighbors will tell you that. We made it a rule when we commenced business—and have rigidly adhered to the rule ever since—to give you the top market value for your money, even if we occasionally lose ourselves. That you appreciate this is shown by the way our trade is growing—and by the selectness of our customers. You are missing a whole lot if you do not come into this store and look at our quality and prices.

PUBLISHED BY THE REVIEW PRINTING & PUBLISHING COMPANY LIMITED.  
RALPH E. WHITE, MANAGING DIRECTOR

SUBSCRIPTION RATES: \$2.00 PER YEAR, IN ADVANCE. SIX MONTHS \$1.00.

### Advertising Rates:

LEGAL NOTICES—Twelve Cents per line for the first insertion; Eight Cents per line for each subsequent insertion.

LAND NOTICES—\$7.00 for 60 days, \$5.00 for 30 days.

WATER NOTICES—30 days, 150 words and under, \$5.00; each additional 50 words, \$1.00.

THEATRICAL, ETC.—50c. per inch for first insertion, and 25c. per inch each subsequent insertion.

LOCAL NOTICES or Readers, Immediately following regular local, 20c. per column line; 10c. per line each subsequent insertion. Half these rates when accompanying display advertisements.

LODGE NOTICES, Etc., 25c. per week, per column inch.

FOR SALE Advertisements, Etc., 5c. per word first week; 1c. per word each subsequent week.

Transient Advertisements payable in advance.

Rates for Contract Advertisements furnished on application.

Copy for change of contract advertising must be in the hands of the printer not later than Wednesday noon to insure publication in the next issue.

In accordance with schedule of prices adopted throughout the valley, charges for advertising are now being made weekly. Heretofore when five issues were made in one month the result was a loss. By the new method customers are charged each week for just the amount of space used.

FRIDAY, NOV. 14, 1913

OUR provincial authorities are becoming almost, if not quite, as strict with reference to the importation of milk from infected districts as Inspector Cunningham would have them be with fruit and fruit trees from districts infected with codling moth and other fruit pests. A circular being issued by the Deputy Minister of Agriculture, W. E. Scott, and Live Stock Commissioner, W. T. McDonald, urges that every district require that all milk sold within its limits be from cattle which have been tested in accordance with provincial requirements. As is generally known the Mainland Coast cities derive a large part of their milk supply from points south of the International Boundary. The provincial act provides that if the American dairies do not satisfy the local B.C. authorities that district may refuse to permit American milk to be disposed of within its boundaries. An active campaign to wipe out all traces of tuberculosis in B.C. cattle is now being carried on. To obtain the best results a straight quarantine must be maintained. Are not these regulations practically identical with those which our authorities have been asked to enforce in order to further protect the fruit industry?

IN CONVERSATION with a Vancouver wholesale fruit merchant the other day the demand for cantaloupes (or musk-melons) in the Coast markets was mentioned, and figures were quoted showing that Summerland growers of this fruit could reasonably expect 5 cents per lb.

Picking up an eastern rural weekly we find a very interesting article on the growing of cantaloupes in Ontario. By starting the plants under glass, and transferring them to the open about May 20th, fruit is ready for picking about August 10th. After that date, continuing until frost, the crop is usually heavy. \$2000 from 4 acres of melons is the return given in one instance. Between \$400 and \$500 per acre in another. \$250 nett is counted on from year to year. One advantage of this crop is that it does not deplete the soil. With such a good market close to hand is it not worth our growers' while to give this annual a trial.

### Route Is Approved.

The establishment of rural mail delivery has been approved by the Postmaster General and the service will begin at the earliest possible date. Residents all along the route have been asked to remit \$3.25, their deposit on the rural mail box and fittings, which will be forwarded immediately upon receipt. The action of the Post Office Department in thus establishing this route deserves much commendation, and should meet with the quick response of all interested. It is hoped that the remittances will all be sent out by the end of this week as it is desired to have everything in readiness before the ground freezes.

The name of the successful tenderer for Courier has not yet been announced.

The matrimonial odds—two to one, offered and taken.

Borton, the plumber, is distributing among his customers a very neat and serviceable article in the form of a combined barometer and thermometer. Incidentally it advertises Gurney-Oxford Stoves.

The shareholders of the Summerland Fruit Union are, we understand, to be called together some time next week to discuss matters of importance and to meet Manager Robertson. The action of the directors in offering to loan its shareholders money for livestock purposes will be submitted to members for approval.

A Chinaman, Yuen Yee, was arrested on Wednesday night on the charge of following girls and young women about the streets. He was brought before Magistrate English on Thursday afternoon and proven guilty. A fine of \$10 and costs was imposed with an order to get out of town the next morning. Yuen is said to be an opium "fiend."

### Weather Report

HIGH CLASS MEN'S & LADIES' TAILORING.

Why have the disappointment of finding your ready-made suit does not fit when it comes, when you can have high class tailoring done so near home, with the privilege of trying on before garments are finished? It is difficult to persuade our customers to again wear ready-made clothes.

## Our SPRING STOCK

reaches us this Season early in January.

## Our CLEANING & PRESSING Dept.

FURS and FUR RUGS cleaned. In this department we make a specialty of alterations and remodelling of Ladies' Suits and Coats to prevailing styles.

Leave all Parcels at **W. J. ROBINSON'S Office.**  
All parcels left in time to go by Thursday's boat will be returned by end of week.

## Basketball Club.

Basketball promises well for the coming season and bids fair to be exceedingly popular among our local athletes.

A fine team is now formed, and capital games and practices are in full swing for the winter. A business meeting was held on Monday at which officers and committee for the club were elected, and there was a representative attendance of local residents, which showed interest in being taken in the development of the club. More residents are wanted, however, to support the Basketball Club, and it is urged that the young men of Summerland will get enthusiastic this winter and make our team one of the ablest on the Lake.

The following were elected: Hon. President J. Rowley; President Adam Stark; Vice-Presidents, Dr. Andrew, E.B. May, H. Bristow; Secretary-Treasurer Chas. Lavis; Captain, Cliff McWilliams; Vice-Captain H. Bristow.

Matches are arranged for one night a week and practices on another, so that bi-weekly games will keep the team in splendid form.

## PROVIDING AGAINST POSSIBLE WATER SHORTAGE.

Work is being rushed on the new pipe line between Trout Creek and the reservoir. This will be a 10 inch main, and is being put in as a precaution against freezing of the open ditch, which now conveys the water from the creek to the reservoir, and will assure an abundant supply through the dry winter months for all domestic purposes as well as for the needs of the K.V.R. No guarantee of a constant supply could have been given the railway company without it, and because of this fact President Warren consented to purchase municipal bonds so that the work might be undertaken without delay.

Already the cement pipe and cast iron pipe necessary has been purchased and delivered near the reservoir. A cement intake chamber has been built at the creek and Superintendent Mitchell with a crew of men is pushing the work with all possible haste. It is hoped that the water may be turned into the pipe early in December.

Absolutely uncalled for—an old maid.

## BORTON'S

Water Act and Amending Act.

Before the Board of Investigation.

In the matter of Bald Range Creek, Bear Creek, Big Horn Creek, Bold Creek, Bouchor Garden Creek, Cedar Creek, Clover Creek, Cranberry Creek, Davidson Creek, Deep Creek, Deer Creek, Esparron Lake, Fern Creek, Hill Creek, Jack Creek, Keef Creek, Miller Creek, McDougall Creek, Power Creek, Pigeon Creek, Rashdale Creek, Shannon Creek, Smith Creek, Spear Lake, Spring Creek, Spruce Creek, Tamarack Lake, Trepannier Creek, Vernon Creek, Venner Creek, tributaries of Okanagan Lake in the neighborhood of Peachland, and of all unnamed streams tributary to or in the vicinity of any of the said streams.

NOTICE is hereby given that a meeting of the Board of Investigation will be held at Peachland on the 21st day of November, 1913, at nine o'clock in the forenoon when all claims which have been filed, all objections thereto, and the plans prepared for the use of the Board will be open for inspection. All persons interested are entitled to examine these and to file objections thereto in writing if they deem fit.

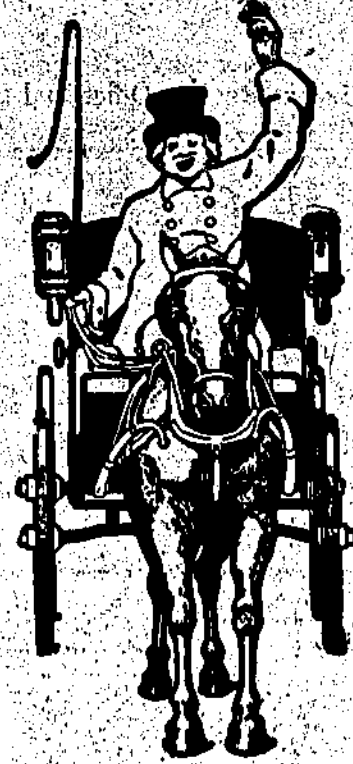

At this meeting claimants shall prove their title to lands to which their water records are appurtenant. This may be done by producing, in case of Crown Granted lands, the title deeds, or the certificate of title, or a certificate of Incumbence, or in case of lands not held under Crown Grant, by producing the pre-emption record or the agreement of sale, &c.

Objections will be heard forthwith if the party objected to has received sufficient notice of the objection.

The Board, at the said meeting, will determine the quantity of water which may be used under each record, the further works which are necessary for such use, and will set dates for the filing of plans of such works, and for the commencement and completion of such works.

Dated at Victoria, B.C., the 7th day of October, 1913.

For the Board of Investigation.  
J. F. ARMSTRONG,  
Chairman.

LETTERS TO THE EDITOR.

The Columns of THE REVIEW are open to the public for the discussion of matters of general interest. No notice can be taken of anonymous communications. Letters intended for insertion must be authenticated by the name and address of the writer, not necessarily for publication. The opinions of correspondents are not necessarily those of the Review.

Editor of the Summerland Review,

Dear Sir— Just what is the matter with the Directors of the Fruit Union? Are their actions the outcome of conservative and philanthropic principle, or merely a case of swelled head and pure cussedness?

Some of us wish to take advantage of the government's offer of the 80 per cent. loan to bring to the municipality of Summerland thoroughbred stock. The Directors of the Fruit Union step in and say "We have already taken advantage of government help to start our Union. Now, before we sanction in any way the request for means to bring in anything outside of fruit that will add to the bank accounts of our people, we demand that everyone who wishes to invest in cattle shall become a member of the Fruit Union, and export through us all their fruit."

Since when, such high-handedness in a new country? Are we all to buckle and knuckle down to the dictates of a small body of directors who happen to have a balance in the bank? Tut, tut! No rod of discipline for fruit growers. Such actions savor of the nursery or the tyrant. We are away from such measures here. Men and women who have grit enough to leave old conditions behind and strike out for themselves in a new land do not calmly submit to the pressure of manikins who can see no further than their own interests.

The idea is absurd. Whisk it away and bring in the cattle.

ONE FOR THE THOROUGHBREDS.

Summerland, B.C., November 13.

Editor of the Summerland Review.

Dear Sir: Would you be so good as to extend to me the courtesy of answering the following questions?

1.—Is it true that the directorate of the Summerland Fruit Union has a deposit of \$5,000 or \$6,000 in one of our banks, upon which it is receiving interest at the rate of three per cent?

2.—Is this part of the government loan on which the Union is paying a four per cent. interest?

3.—Have the promoters of the Thoroughbred Stock Association of Summerland offered to borrow this \$5,000 or \$6,000 from the Fruit Union at a five per cent interest?

4.—Have the directors of the Fruit Union refused to loan the money at an advance of one per cent., preferring the loss of one per cent. rather than encourage a proposition the returns from which might not pass through their hands?

Thanking you in anticipation, Faithfully yours,

PUZZLED.

Summerland, B.C., November 13.

Ed. Note.—We must admit that we are not in a position to fully answer these questions, but will attempt a brief answer to each.

1.—We believe that the Union has some of the working capital advanced by the government still lying in the bank, probably \$1,000 of which will be used to pay for packing house equipment, etc., and more will be required to build an ice house and provide ice for next season. We understand from the decision of the directors that the Union is prepared to make loans to its members at once from this balance which they will replace later by monies obtained later from the government on new shares. This also answers question 2.

3.—We do not think that the promoters of the Thoroughbred Stock Association have offered to borrow any money from the Union. Individual citizens have applied for government loans through the Union.

4.—This question cannot be answered in all its phases in a few words. One of the directors has stated that it is worth one per cent. to have this money available when needed for the purposes mentioned above. Further, we cannot believe that the Union does not wish to encourage anything that will help Summerland. We however, may differ with them in their opinion as to how this can or should be done.

Many a woman can't remember what her husband said when he proposed, because she did the proposing.

Passing Events: Social, Personal, &c.

Mrs. F. W. Pattison will not be at Home next Tuesday.

Jas. Ritchie went to Vancouver on Tuesday on a hurried business visit. He is expected to return tonight.

W. C. Kelley, who has been severely ill for some days suffering from pleurisy, is now steadily recovering.

Mrs. Harry Reynolds has, we are glad to say, almost entirely recovered from the results of her recent accident.

Miss Bena and Miss Grace Logie and Mr. Will Robinson crossed the lake on Sunday and lunched with their relations at the Naramata Hotel.

We are sorry to hear that Mr. George Grey is one of the latest victims to grip, and has been suffering from a very heavy cold all the week.

Messrs. Borton, Bentley, and Dan Williams went over to Naramata on Sunday, and while there looked up some former choral members with regard to the proposed Christmas performance of the "Mikado."

Eighty-five per cent. of headaches are caused through eye-strain, so if you are troubled that way do not fail to consult Dr. S. L. Taube at Summerland Drug Store on Wednesday, November 19th.

Mr. R. McGeorge, authorized Piano Tuner and Regulator for Mason & Risch, Limited, intends being in this district within the next two weeks. Parties requiring his services for Tuning, etc., will kindly leave their address with The Review. 14-21

There has been quite a little outbreak of tea-parties among the ladies of Summerland this week, and induced probably by the bright, crisp weather, they have been very busy issuing and accepting invitations. This is the beginning of the indoor social season and we hope Summerland will be as gay as usual this winter.

Coming. Dr. Kilburger, Eye-sight Specialist, representing the Toric Optical Co., Vancouver, will be in McWilliams' Pharmacy, West Summerland, Wednesday and Thursday, November 26th and 27th, and will be pleased to have persons with defective eye sight call and consult him. See notice on page 4.

Messrs. Nelson, contractors, who have finished their particular contract on which they were working for the K.V.R., went through Summerland on Tuesday, having broken up their construction camp. Messrs. Nelson are now, we understand, retiring from business and have bought a large ranch some fifty miles from Spokane, where they are settling immediately.

Superior fancy leather cushion covers, especially suited for Christmas presents, can be obtained at the Leather Store. Bring a photograph of your friend and have it copied in beautiful hand-painting on the front side of cover. Samples of same are shown in our windows. One month is required to reproduce photographs, and remember it is only six weeks to Christmas. ad

A delightful day's trip was enjoyed by Mr. and Mrs. W. J. Robinson on Friday last when they drove from home, on the way to Okanagan Falls. Mrs. Robinson remained at Kaleden for lunch while Mr. Robinson proceeded further, on a business visit to the Falls. They say the roads are in excellent condition for travelling, and the country around looking well in this mild fall weather.

One of the quaintest and most interesting frocks of nature is to be seen in the Review window this week—a bird's nest which has snugly sheltered a pair of Wagener apples, instead of its orthodox occupants all spring and summer! The fruit has budded and formed on a bough upon which a nest had been built, and so expanded and grown that it entirely took possession of the tiny bird's home, stretching the wonderful fabric of mud and twigs to suit itself, and altogether precluding any egg-laying projects of the poor little mother bird. The curiosity was found in the orchard of Mr. A. A. Dorrlick.

Shiloh The family remedy for Coughs and Colds. Small dose. Small bottle. Best since 1870

Miss Alcock of Vancouver is a guest at the home of Mrs. George Gartrell.

Mr. Reynolds of the Bank of Montreal has been transferred to Vernon, and will leave here shortly to take up his new duties.

A meeting of the Poultry Association will be held next Monday at 8 p.m., in Borton's plumbing shop, to plan the winter show. ad

Mr. Van Allen, senr., and Mrs. Miss Van Allen, are, we hear, leaving Summerland for the winter, and will probably stay at Toronto for a while.

Robt. Pollock, Junr., who has been in Glasgow, Scotland, for about a year, sailed for home on November 5th. He will stay for a few days in Winnipeg.

On the list of those suffering from colds, and not able to get about as usual in the early part of the week, we are sorry to note the name of Professor W. H. A. Moore of the college.

If you are afflicted with Headache, Squint or Cross-eye, do not fail to consult Dr. Kilburger, Specialist, in McWilliams' Pharmacy, Wednesday and Thursday, November 26th and 27th. ad

Miss Cooper gave a pleasant "girls' tea-party" to a number of her young friends on Thursday afternoon as a good-bye occasion in honor of Miss Van Allen, who is leaving Summerland for the winter.

Mr. C. T. O. Rush, accountant of the Bank of Montreal, returned from his holidays on Saturday night's boat, and resumed his duties on Monday as usual. He has had a most delightful trip of some weeks' duration.

Major and Mrs. Hutton will remove to Victoria for the winter, leaving here about November 24th. They will be accompanied by Mrs. Hutton's daughter, Mrs. Ackland, and her husband, who have been their guests for a time.

Stump Pullers, guaranteed, pulling green stumps and trees 24 to 48 inches diameter. Prices \$50 up. (Make your own terms). Our \$8 Well-Borer Outfit, cap. 20 to 30 ft. per day, or 400 post holes per day. Write the Ducrest Stump Puller & Tools Mfg. Co., Burnside Road, Victoria, B.C. n7,14p

Both Captain Languedoc and Mr. P. S. Roe are progressing favorably towards recovery, though the former is still confined to a room at the Syndica Hotel. In both cases severe shock to the nervous system has been no small factor in their sufferings. Mr. P. S. Roe is pluckily getting about, though still on crutches, and will be unable to put his injured foot to the ground for some three weeks yet.

The glorious moonlight nights of the present week, after days of bright sunshine and clear air, have brought all the younger members of the community out to enjoy them. It is a little too chilly for boating excursions by moonlight, but a moonlight drive or a walk? There are few things so enchanting to youth. Moonlight parties to "the pictures," too, have been quite a feature of the week's social life.

There are sympathies and bonds of fellowship in new communities that are altogether lacking in great cities, and they are very good for us. Members of the Anglican church congregations were reminded on Sunday last that five of their number were crossing the Atlantic on their way home to the Old Country, by the announcement of the hymn "For those who Travel by Land or Water." The beautiful words of the immortal prayer in vorse, "For Those in Peril on the Sea" were heartily sung by the choir and congregation.

The wonderful properties of our mountain air have been demonstrated in a rather practical way just lately during the epidemic of colds and catarrh which seems to have afflicted some of our community. One or two members of a party who started out last week on a hunting expedition were suffering from severe colds, but within twenty-four hours in the exhilarating glorious air they had entirely lost them. This with a foot of snow on the ground! Snow is lying thickly on the hills north of the lake, while we are enjoying the best of the clear and sparkling frosty air with warm sunshine.

FOR C.P.R. TO ANSWER.

Recently much publicity was given to the fact that the C.P.R. had landed a car of apples in Liverpool eleven days after leaving Vernon. This was a car shipped by the Provincial Horticultural Department. One of our citizens asks if the C.P.R. can do this for the department, why it requires 17 or 18 days to ship a car from here to Montreal, or 25 to 28 days to England?

LOCAL ORCHARDIST GETS COAST APPOINTMENT.

Mr. Gabriel Marshall, who has during the past year been employed as foreman on E. R. Simpson's ranch, Paradise Flat, has accepted a similar position at Chilliwack on a three hundred acre ranch chiefly devoted to raising vegetables for the Coast markets. Mr. Marshall will have a large number of men under him. He leaves Summerland to-morrow (Saturday).

His wife and family will not accompany him, remaining for the present on Mr. Marshall's newly acquired orchard, south of Giant's Head, where a cottage has just been completed for their occupancy by H. Tomlin.

At a special meeting of the St. Andrew's Society last night, Mr. Marshall was presented with an address, accompanied by a bound volume of Burns' works, as a token of the esteem in which he is held by brother members.

WANTED—To buy, grain sacks. T. E. Young. d5

Fred Baker has taken employment in the railway tie camp on Upper Trout Creek.

Mrs. T. Washington and family and Mrs. D. Kirstine leave tomorrow (Saturday) on a visit to their old home in England. They expect to be away all winter.

Messrs. Dobie and Webster, District Manager and Local Superintendent, respectively, of the Okanagan Telephone Co., were about town early this week. Other than to further cut down local expenses, and personally instal an instrument at the hotel, nothing could be learned of their errand here.

Good progress is being made on the pole lines of the Summerland Telephone Company. By to-night it is expected that the holes will be dug from the central to Trout Creek. The line runs over the hill to St. Stephen's Church, and from there around Giant's Head, down over the bench to Trout Creek point. The poles will have been delivered over all this route, and most of them set. The pole line from St. Stephen's Church northward to Jones Flat has also been staked out.

There is an effort being made in the Okanagan to establish a regiment of horse. Several squadrons have already been organized, the nearest being Ponticton. F. J. Nixon has been given full particulars, and has been asked to ascertain if it is possible to establish a squadron here, including both Naramata and Penland if necessary. Uniform, etc., is supplied the men free. Mr. Nixon will be glad to give any information and take the names of any who are likely to join.

The School Board met an official from the Department of Education who is interested in the introducing of Manual Training in the schools. After listening to the government's proposal the Board concluded to open a branch of manual training next fall. It is probable that a part of the packing house near the school will be utilized. The equipment will cost about \$1200, of which the government pays three-quarters. The total cost for the year has been estimated at \$750, with classes two days in the week. The instructor will likely make Kolumna his headquarters, teaching there three days.

# OUR NARAMATA SECTION: Everything of Business and Social Importance Transpiring in South Okanagan's Newest Town

## An Appreciation

Many words of appreciation have come to us for the "splendid" Naramata page we had last week. We must confess that as a first attempt we were quite proud of it ourselves. Praise, however, will not keep it going, but something more substantial is coming at once.

We had expected "ad. copy" from two or three business houses this week, but it was too long delayed. The Review is giving Naramata citizens a rare opportunity to "boost" their town, and we believe that they will back us up with advertising as well as subscriptions in sufficient quantity to satisfy her most patriotic residents.—Ed.

## Current Events OF Town & District

Mr. and Mrs. Carrol Aikins spent Thursday with friends in Summerland.

Sunday visitors to Naramata were Mr. C. N. Borton, Mr. Alex. Bentley and Mr. Dan Williams.

Mr. G. S. Harmount, from the tunnel camp spent Sunday searching around town and district for strayed horses.

Mr. Gilbert Brandt has broken up his camp which has been occupying a position some four or five miles above Naramata.

Mr. C. G. Grant, superintendent of the Grant, Smith Co. came in to Naramata on Tuesday night on a visit of inspection to the district.

The construction camp of Mr. Frank Parrotta, which has been working hard on the summit all summer is now closed down for the winter.

The Misses Bena and Grace Logie and Mr. Will Robinson, of Summerland, spent Sunday with Mr. and Mrs. R. C. Robinson at Hotel Naramata.

Mr. A. McCulloch has, we hear, been successful in recent navigation examinations, and has now obtained his Master's Certificate. He has gone to Nelson.

Business has been brisk in town this week as one or two construction camps have been closed down and members of them have passed through spending a few days here shopping.

Spending a part of their honeymoon at Naramata, Mr. and Mrs. Norman Robinson—by the way, no relation to our Robinsons—of Okanagan Centre, were guests for the week-end at Hotel Naramata.

There is nothing like pluck! Captain P. S. Roe, still on crutches, though, we are glad to say, getting back his energy rapidly—went across on the "Rowena" on Tuesday afternoon from Naramata to Summerland in company with his crew.

Miss Blanchard spent Saturday in Penticton. The Unity Club are having a dance (this evening) at the Hotel Naramata, and as a number of invitations have been accepted both from Summerland and Naramata, a very delightful little affair is anticipated.

A delightfully arranged children's party was given by Mrs. Fred and Mrs. Mark Manchester on Tuesday, some twenty girls and boys having a thoroughly good time in celebrating the eighth birthday of Master Raymond Manchester. This fortunate small boy was the recipient of a number of nice birthday presents.

"The Italy of Canada" is not a misnomer for our Valley. The roses that are still blooming profusely in Naramata strike a wonderful note of summer. Mid-November is associated usually with frost, fog and rain in a good many places on the map, or at least November traditions are not of roses and other midsummer blooms. But in Naramata this week there are plenty of roses, cream, red and pink, of delicate perfume and fine color which well suggest Italy or the south of France rather than Canada.

### Going South.

J. W. S. Logie informs the Review that he has fully decided to remove to Arizona with the intention of eventually locating on the West Coast of Mexico. Mr. Logie is perhaps somewhat of a restless spirit, and he has on previous occasions seriously considered trying new territory, but he is still enjoying life in the Okanagan. This time he says there is no backing down.

Mr. Logie has several near relatives in Arizona, and will probably engage in newspaper work with an uncle, now editor of a daily paper there, later joining a relative who has some large concessions in Mexico, extending along 300 miles on the West Coast which will be opened for development as soon as the political disturbance is ended. Mrs. Logie, who is a native of Texas, is also urging a return to the south.

## Naramata Fire Brigade Going Strong.

With all the necessary fire fighting apparatus now in hand the Naramata Fire Brigade will shortly be a force to be reckoned with in the town, and the assurance of protection to property which such an organization gives is indeed a valuable and long-needed asset in the town's welfare and progress. The necessary reels and hose, and hydrants have all been established, there being two of the latter, one near the store and another on Robinson Avenue. Two reel houses have been built to protect the reels and hose. The high pressure system, of no less than 215 lbs., will be in operation, so the real value of the new arrangement is incalculable.

H. J. Wells is at present head, and will probably be Brigade Chief. A meeting is called for next week and all men of the town interested, are asked to attend. A brigade will then be formed of those residents willing to serve. Most of the men in the town are keen on the brigade, so there will be no difficulty in getting together a sturdy band of fire-fighters. A practice and trial was held on Wednesday, which proved highly successful.

### Ferry Service.

#### All Regular Trips Resumed.

The Okanagan Lake Boat Company is making rapid progress towards getting its service back to its usual standard of efficiency, after the disorganization caused by the late accident to the "Skookum." The "Rowena" has been making trips for the last week as usual and has been well patronized. Tuesday, for instance, was quite a record for numbers of passengers between Summerland, Naramata and Penticton.

Plans for a fine new vessel that shall be comfortable for the winter passenger traffic are being made, and in the meantime, a sturdy steamer, the "Clovelly," has been leased, and will, from now until further notice, make all regular trips.

### Will Be Here For Christmas.

Mr. J. M. Robinson plans to enjoy a Naramata Christmas, spending the festive season with his sons, daughter-in-law and little granddaughter at the Hotel Naramata. He is now in Toronto and on his journey here is staying a short while at Chicago, Winnipeg and Calgary. Mr. Robinson is expected here on December 1st, and would not therefore find it possible to return to the Old Country in time for Christmas, as he originally intended.

The time has come for the annual fruit waste in Canadian orchards. While travellers pay ten cents a piece for poor apples on our trains, thousands of tons of delicious fruit rot under orchard trees. We work from both ends of the line, and the great chasm in the middle, not covered by our activities, is filled with the fruits of our folly.—Toronto Globe.

Even churches are coming to realize the advantages of advertising, which is necessary to the progress of both business and church. Here is an interesting ad. which appeared recently in an American newspaper:

Stolen, Strayed, Lost or Mislaid: Mislaid—Last Sunday, many families from church.

Stolen—Several hours from the Lord's Day by many people.

Strayed—Half a hundred lambs; went in the direction of no Sunday School.

Mislaid—A quantity of silver coins owed to the Lord.

Wanted—Scores of young people. When last seen were walking up 'Sabbath Brankor's Lane,' which leads to 'No Good.'

Lost—A lad, carefully reared. Not long from home. Supposed to have gone to Husk Lane, Prodigal Town.

Any person assisting in the discovery of the above shall in no wise lose his reward.

Whitestone M. E. Church. Get the habit.

SEALED TENDERS, addressed to the undersigned and endorsed "Tender for Construction of Wharfs at Victoria Harbor, B.C.," will be received at this office until 4.00 p.m., on Tuesday, December 9, 1913, for the construction of Wharfs at Victoria Harbor, B.C.

Plans, specification and form of contract can be seen and forms of tender obtained at this Department and the District Engineers' offices at New Westminster, B.C., Victoria, B.C., Confederation Life Building, Toronto, Ont., Post Office Building, Montreal, P.Q., and on application to the Postmaster at Vancouver, B.C.

Persons tendering are notified that tenders will not be considered unless made on the printed forms supplied, and signed with their actual signatures, stating their occupations and places of residence. In the case of firms, the actual signature, the nature of the occupation, and place of residence of each member of the firm must be given.

Each tender must be accompanied by an accepted cheque on a chartered bank, payable to the order of the Honorable the Minister of Public Works, equal to five per cent (5 p.c.) of the amount of the order, which will be forfeited if the person tendering declines to enter into a contract when called upon to do so, or fail to complete the work contracted for. If the tender is not accepted the cheque will be returned.

The Department does not bind itself to accept the lowest or any tender.

By order,  
**R. C. DESROCHERS,**  
Secretary,  
Department of Public Works,  
Ottawa,  
October 27, 1913.

Newspapers will not be paid for this advertisement if they insert it without authority from the Department.—45197.

## Naramata Shipments

Will Henceforth Be a Factor In Okanagan Exports.

Facts and figures make the most valuable evidence, and some idea of the growth and expansion of Naramata may be gleaned from the records of fruit and produce shipped through the Fruit Union from this, the southern Okanagan's newest town.

"Naramata has done excellently during the past season," said a prominent official of the Fruit Union to a Review representative this week. "There is no doubt about it, the fruit we have obtained from Naramata, has been of beautiful quality and fine in flavor, and so of first-class commercial value. Naramata peaches were superb, and her tomatoes by no means to be overlooked in a list of excellencies.

"In addition to the properly listed fruits we have had from Naramata this year a fine collection of egg plants and cucumbers. Her by-products will be coming to the fore presently." That Naramata and Summerland have run well together, and hand in hand for progress this year is the opinion of those who are watching the growth of these Valley towns, and the enthusiasm and industry of Naramata growers is shown by the fact that there was shipped from Naramata this season between four and five cars of finest fruit:

APRICOTS—22,000 lbs.

PEACHES—18,000 lbs.

TOMATOES—21,000 lbs.

PLUMS and APPLES— together 24,000 or 25,000 lbs.

## November Weather In The Valley.

While blizzards and unprecedented storms have been sweeping the Eastern States and country south of the Great Lakes, the Southern Okanagan, snug between sheltering hills, has been basking in November sunshine that would be warm and welcome as May weather. The most terrible stories of privation and damage done to transportation, and the crippling of all wire communications have occupied columns in the papers during the past week.

We find it impossible to realize this state of affairs, as we go about our work here comfortably and happily, with flowers still in our gardens, and a general feeling of being on good terms with the weather office.

We are enjoying all this week clear and radiant beautiful atmospheric conditions, with crisp, light frosts morning and evening. Brilliant sunshine from 7.30 a.m. till afternoon, and after quiet sun-down the great full moon steals quietly up behind our hills flooding the land and lake with its splendour, and a pathway of rippling light seeming to form a silver link between Naramata and Summerland. The most unobscured among us, and those quite accustomed to our local scenery, have been making a topic of conversation out of moonlight and sunlight all this week, and commenting on the wonderful color effects to be witnessed both at sunrise and sunset.

## Children's Concert.

The school children are very busy just now practising for the Christmas concert, the eagerly anticipated event which marks the closing of this year for the holidays. Mrs. Fred Manchester and Miss Oren Williams are taking a great deal of trouble training the children and the program is going to be a very pretty one.

# AUCTION

Acting under instructions from Mr. T. C. ORR, who is leaving the district, we will sell the following valuable Indoor & Outdoor Effects by Auction, at his residence, south-east of Mr. G. J. Coulter White's house,

**On Wednesday, Nov. 19th, 1913**  
at 1.30 p.m. sharp.

## CATALOGUE:

AUCTIONEERS, SUMMERLAND, B.C.

## Development at Meadowland

Mr. T. E. Clay, Manager of the Okanagan Realty Co., Ltd., who leaves shortly for the Old Country for the purpose of securing settlers for Meadow Valley, seen by the Review this week was very optimistic in his plans and expectations for that district. Asked how the work was progressing and what was being done Mr. Clay replied "everything going fine. Our survey is nearly half finished, and in another two weeks all the north half of our property and the townsite will be ready to go on the map."

Men are at work clearing out the roads, burning dead trees, etc., and putting things in shape generally, and will later clear up the plot intended as an experimental plot."

"Do you intend having an experimental plot?" was asked. "You bet your life," was the reply, "and a dandy at that, and when our plans are complete in this connection we will have something to talk about."

"Mixed farming is to be our line," Mr. Clay continued, "and we expect to show people around here a thing or two before long."

"What can we grow there? Say, that question does make me smile. We can grow anything they can grow in Summerland, except perhaps peaches and grapes, and I rather think we could do something with peaches if we wanted to, but we don't."

"It's really amusing to hear some people talk about what you can grow. Why, if you remember, when Mr. Robinson first began developing Peachland the people all over the country gave him the loud laugh, because he claimed they could grow peaches. Well, what do you think? Can they grow them?"

"We had ripe tomatoes in Meadow Valley this year as soon as if not sooner, than you had in Summerland, and they were not irrigated either, and do you know that Mr. Deans at the mouth of the valley captured a number of prizes at the late Apple Show, among them the first prize for a plate of 'Wealthies,' and third for 'Gravensteins,' and if Mr. Deans had not been so anxious to show size in the latter he might have had first in that also. Oh yes, we can grow a few things, don't you forget."

"My trip to England is just on that account. I want to secure the kind of men who know how to grow the things we can grow. No, I'm not looking for gentlemen farmers, I am after the real thing. Men used to working small holdings and who will work them to a finish."

"Will I get them? You just bet I'll get them. The country over there is full of them. I spent last winter over there making connections, and already I have a good line-up waiting my arrival. I would have been gone by now but for meeting unavoidable delay last month."

"The first forty I expect will arrive early in April."

"What do I mean by my ad. of making Meadowland a household word?" Just what I say.

"If my plans carry, and you can bet they will, Meadowland will be the best known place in B. C. in five years. Everything that comes out of Meadowland will be ready for the consumer, and that's the party it will go to as well. No middleman will get our cream, not if we can help it."

"Say," said Mr. Clay, "as he started in to do some work, 'this country has a lot of room to wake up in, do you know, and it only needs someone to make a noise to wake someone. Think of nearly \$30,000 a year from this town for butter, eggs, canned milk, bacon, and hams. What do you know about that? You watch Meadowland.'"

### LIGHTING UP TIME.

One evening, just at dusk, a man drove through the village with a handsome car equipped with all the modern devices. Hardly had he proceeded a square before a constable loomed large in the vista. "See here, young feller," exclaimed the official, "you will have to jump out and light your lamps." "All right, old pal," cheerily answered the motorist, "just as you say about it." With this he touched a button, and instantly the powerful light gleamed forth. For a moment the constable was stunned. It was his first experience with electric lights in an automobile. But he recovered. "Say, young feller," he exclaimed, moving nearer the car, "don't try to get gay with me. When I tell you to light your lamps, I mean for you to stop out and light 'em!"

**SYNOPSIS OF COAL MINING  
REGULATIONS.**

COAL MINING RIGHTS of the  
Dominion, in Manitoba, Saskat-  
chewan and Alberta, the Yukon  
Territory, the North-west Terri-  
tories, and in a portion of the  
Province of British Columbia, may be  
leased for a term of twenty-one  
years at an annual rental of \$1 per  
acre. Not more than 2,560 acres  
will be leased to one applicant.  
Application for a lease must be  
made by the applicant in person to  
the Agent or Sub-Agent of the dis-  
trict in which the rights applied for  
are situated.

In surveyed territory the land  
must be described by sections, or  
legal sub-divisions of sections, and  
in unsurveyed territory the tract  
applied for shall be staked out by  
the applicant himself.

Each application must be accom-  
panied by a fee of \$5, which will  
be refunded if the rights applied  
for are not available, but not other-  
wise. A royalty shall be paid on  
the merchantable output of the  
mine at the rate of five cents per  
ton.

The person operating the mine  
shall furnish the Agent with sworn  
returns accounting for the full  
quantity of merchantable coal  
mined and pay the royalty thereon.  
If the coal mining rights are not  
being operated, such returns should  
be furnished at least once a year.  
The lease will include the coal min-  
ing rights only, but the lessee may  
be permitted to purchase whatever  
available surface rights may be  
considered necessary for the work-  
ing of the mine at the rate of \$10  
an acre. For full information ap-  
plication should be made to the  
Secretary of the Department of the  
Interior, Ottawa, or to any Agent  
or Sub-Agent of Dominion Lands.

W. W. CORY,

Deputy Minister of the Interior.

**To Encourage Live Stock.**

Financial Assistance to be  
Given by Union.

For some time there has been a  
movement among a number of our  
people to take advantage of the  
Provincial Government's offer  
of financial assistance in the stock-  
ing of farms with pure bred or high  
grade cattle, hogs, etc.

Under the provincial law agri-  
culturists can organize themselves  
into co-operative associations and  
receive financial assistance for this  
purpose as has the Fruit Union for  
its particular object. As the one  
act covers both, the government is  
not disposed to create a second or-  
ganization in the same community,  
but will give the necessary assis-  
tance through the existing organi-  
zation. For some time the direc-  
tors of the Fruit Union have been  
urged to arrange for this, and at  
their regular meeting last Monday  
evening the following motion was  
carried after much discussion, and  
the original had been consider-  
ably amended.

Moved that Summerland Fruit  
Union is prepared to advance the  
funds for the purchase of live stock  
up to the sum of \$6,000. The same  
to be advanced subject in every case  
to the approval of the directors to  
anyone holding shares in the Sum-  
merland Fruit Union to the amount  
so held, and on which 20 per cent.  
has been paid, over and above any  
shares held by them for the pur-  
pose of handling their fruit, under  
the conditions set forth in the by-  
laws, and who is under contract  
with the Union, if a fruit grower.

All loans to be made for one year  
subject to renewal, if approved of  
by the directors, the rate of inter-  
est to be 5 per cent. per an-  
num.

The ownership of said live stock  
to be invested in the Summerland  
Fruit Union until said loan is  
paid in full.

All shares on which a loan is  
granted to be deposited with the  
treasurer during the continuance  
of the loan.

This to be approved of by the  
Minister of Agriculture.

**Not Enough Water.**

**Kamloops Section Must  
Resort to Dry Farming.**

Victoria, November 12. — That  
because of lack of sufficient water  
for irrigation purposes, much of  
the agricultural land surrounding  
Kamloops will eventually be used  
for dry farming is the belief of Mr.  
J. F. Armstrong, of the provincial  
water rights board, who, with  
Commissioner J. S. T. Alexander,  
has just returned to the capital  
from a trip to the interior, during  
which water record claims were  
received at Lytton, Spence's Bridge  
and Kamloops.

Mr. Armstrong stated that there  
would eventually be a scarcity of  
water in the Kamloops district  
when the available agricultural  
land was taken up, and there not  
being enough to go around the nat-  
ural result would be that the land  
would have to be used for grazing  
purposes or for dry farming. It  
is understood that even at the pres-  
ent time some difficulty is being  
experienced in finding sufficient  
flow in the streams in that dis-  
trict to provide for the records  
which have been filed, and many  
ranchers on irrigated holdings com-  
plain of being unable to get what  
they deem is the proper amount of  
water for their crops.

In the Okanagan district there  
will be sufficient water for every  
one, the Water Board Chairman  
thinks, if it is properly stored.  
Mr. Armstrong believes that dry-  
farming will be successful in Kam-  
loops, or those portions of that dis-  
trict where the water flow is small,  
and many settlers have already  
taken it up.

It is good to have a true concep-  
tion of Empire, and sometimes the  
English emigrant to Canada has  
amusing lessons to learn. One of  
the settlers from the "Great Little  
Island," had quite a shock this  
week. A small Canadian born, nay,  
more, Summerland born, had some  
lessons in geography this week, of  
which the newcomer was an inter-  
ested spectator. "Now show us  
where grandma lives," he was bid-  
den. The four year old Canadian  
born took the little gaily colored  
globe in his tiny hand, and after  
a brief search among the countries  
of the world—"On that little wee  
spot there," he said, placing a  
small forefinger on the green pre-  
sentment of the British Isles!

Even a wise man can't help look-  
ing like a fool at his own wedding.

## Completion of Railway Work.

### Some Astonishing Figures.

The laying of steel on the K.V.R. grade running west from Summerland is being pushed forward with all possible haste. The management are desirous of getting as much laid as possible before snow falls, but purpose continuing to end of grade in spite of snow if it does come. Of the 32 or 33 miles from Trout Creek westward, over 20 miles has been laid. Permanent steel bridges are yet to be put in at miles 23, 24, and 37 at which points the line crosses Trout Creek, the big bridge being at mile 7. At 23 and 37 there will be 50 ft. spans, and at 24 a 70 ft. span.

With reference to bridges a typographical error in our columns two weeks ago made it appear that the cost of the big bridge was \$11,000. The error was obvious. The total cost of the bridge will probably exceed a quarter of a million dollars, including piers and approaches.

The construction of the grade from Trout Creek point to the Summit at Osprey Lake has now been completed, the last camp having been broken a few days ago.

That the construction of this piece of road has meant much heavy work is generally known, but probably few realize the immensity of the undertaking, and the expense entailed. Some idea of this may be had when the following figures are considered:

When the work was its height no less than 1500 men were employed between Summerland and the Summit, with about 200 horses and mules. To feed the latter a million and a half lbs. of oats were required, and about the same quantity of hay, while for the men more than three quarters of a million lbs. of groceries were brought in, and 71,000 lbs. of cured meats, 40,000 lbs. of fresh meat, and 58,000 lbs. butter were distributed among the various camps.

To level down the rock over this distance almost one million lbs. of explosives were required, over 980,000 lbs. having been used.

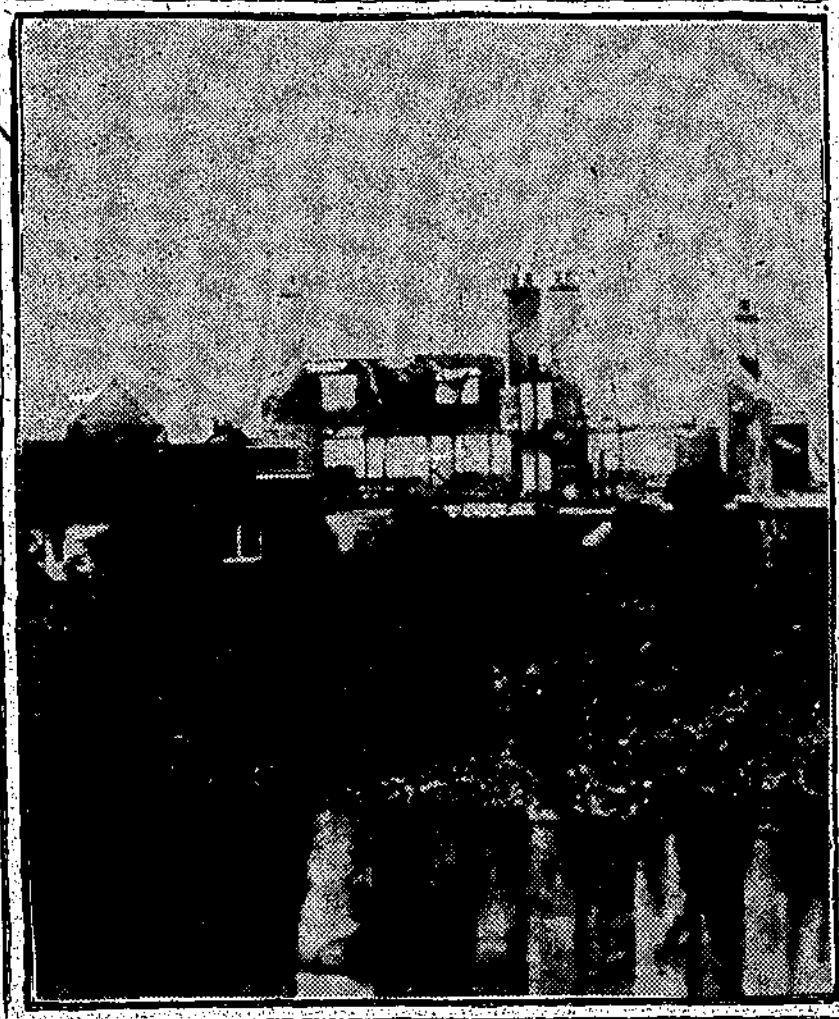

That not more than one life was sacrificed to construct these 32 miles of difficult grade is remarkable, and is subject for congratulation. This is in marked contrast to the usual experience in work of this nature. That not more lives were sacrificed is said to be due to the experienced and careful foremen employed.

A watering tank supplied by the municipal pressure system has been erected at the station site in Peach Valley, and there will be another at mile 20, supplied by gravity from Canyon Ranch. Yet another tank is to be placed at mile 29, and for this, water from Deer Creek will be used. It is expected that a tank will also be placed near Osprey Lake.

The only portion of the K.V.R. line not yet located is that between Osprey Lake and Coldwater Summit, south-east of Merritt. For this two alternate routes have been surveyed, and while it is generally supposed that the higher route will be taken, official announcement has not yet been learned. This higher route will be more expensive to build, and will cut some of the towns of the lower valleys, notably Princeton, but it has the advantage of being more direct, and will be cheaper to operate. An early announcement of the route selected is expected, and the public generally are hoping that this remaining portion will be rushed to completion at the earliest possible date.

Direct railway communication between the Okanagan and the Kootenay is expected to be established by the middle of next summer.

## "Cat and Mouse" Policy Has Not Deterred Wild Women.

IT IS THOUGHT THAT THE DESTRUCTION WILL CONTINUE JUST SO LONG AS THE HUNGER STRIKE REGAINS FREEDOM FOR THE MILITANTS.

Despite the assertion that the "cat and mouse" policy of the British Home Office has caused militancy to abate, the fact remains that the "wild women" are as active as ever in their campaign for the destruction of property. Those who oppose the policy of releasing those who are on a hunger strike and re-arresting them following their restoration to health declare that this latest scheme of the British authorities is working more harm than good.

The photograph shows the ruins of a \$150,000 mansion in Horwich Lane, London, burned by militant suffragists. No clue has been obtained as to just who was responsible for this outrage. It is declared that the campaign of destruction will continue just so long as the Home Minister is willing to order the release of suffragettes who starve themselves in jail.

## Water Board Sits Here.

### Government Plans Materializing.

The Board of Investigation, which is enquiring into matters and conditions appurtenant to the administration of water for arable land in unorganized districts, was delayed one day in arrival here by the late disorganization of the main line of the C.P.R. The party came down the lake on Wednesday evening, but journeyed on to Penticton, where they spent the night, returning to Summerland the next morning.

The Board was hampered in its work here by the fact that baggage supposed to accompany the party did not reach here till Thursday evening. On this account the Board were unable at their sessions earlier in that day to look into any business requiring reference to their own records and books. Much preliminary business was nevertheless disposed of. Minor difficulties and points of law not of prime interest were dealt with and cleared up. Sessions will be held later, when cases requiring detailed treatment will be received.

There were many in attendance when the Board commenced its informal session. These were either watching their own interests, or were delegated to inquire into the rights of absent property owners and record holders.

The new policy laid down by the Water Branch of the Department of Lands is obviously going to work itself out in the best inter-

ests of the rural homesteader and pre-emptor, particularly in the repeal of anomalous conditions. The main object in view is to ensure the equitable distribution of all available water over irrigable land. Existing water records providing for exorbitant rights are being curtailed, and corresponding assistance is given those who could rightfully use water which they cannot now obtain.

The "dry belt" of the province, not otherwise provided for, has been divided into districts. In charge of each of these will be a District Engineer, who will be vested with authority to settle difficulties which arise when interests conflict. Upon the competency of these engineers, therefore, will depend, in no small measure, the equity of distribution which the law has designed. Summerland is included in an area which embraces the southern end of the Okanagan, and the engineer in charge is at present in Penticton.

The Investigating Board consists of three members, under the chairmanship of Mr. J. F. Armstrong. The other members are Messrs. J. R. Mountain and J. F. T. Alexander. A stenographer is also attached to the party. The Board spent today (Friday) in Peachland, and will return here again to make final settlement in several disputations which require more consideration.

## The Boy Scouts.

### Annual Inspection of Summerland Troop

Rev. H. A. Heneage, Provincial Secretary of the B.C. Boy Scouts held the Annual Inspection of the Summerland troop at the Central Schools yesterday (Thursday) afternoon. Twenty-five out of the thirty-six of the troop attended, and Rev. C. H. Daly, President of Council for Summerland was also present.

Rev. H. A. Heneage expressed his great satisfaction at the proficiency shown by the boys and their general advancement in knowledge of their duties, and briefly addressed them. The troop turned out very smartly, and lined up for inspection made as thoroughly efficient and gallant a little band of Boy Scouts as one could wish to see among the sixty troops of B.C.

In the evening the Rev. H. A. Heneage addressed a Council Meeting at C. N. Borton, Troop Scoutmaster's store, and the Provincial Secretary gave a most interesting account of the movement throughout B.C. The subject of the resignation of the Scoutmaster came under consideration. Press of private work and business reluctantly compels Mr. Borton to give up his duties as Scoutmaster of the troop, and his successor must be found soon. The Rev. H. A. Heneage suggested calling a mass meeting of the parents of the boys to ascertain their wishes on the subject of the appointment of a new Scoutmaster, and it is hoped that an efficient and enthusiastic successor will be found to fill the vacant appointment.

## Nearing The End.

### A Time of Suspense and Anticipation

As the end of the popular voting contest for the \$400 piano put up by the Summerland Drug Company draws near, excitement increases and intense interest is sure to be maintained through to the end. Although a large number of votes have been cast, and one or two have quite a lead over others, the final result is yet very uncertain. There is still room for those who have been lagging behind to climb to the top. In their advertisement on page 7 the Drug Company are offering a large variety of reasonable articles much in demand just now, and every purchase means votes.

To win the piano the contestant must not depend only on the efforts of friends. The hustler will win the prize.

The Review now offers an excellent opportunity for the contestant who will exert a little effort and induce his or her friends to do likewise. For a limited period the Review will issue 10,000 votes for every year's new subscription obtained, and 7,500 for every advance renewal, and 5,000 for arrears. Many distant friends interested in Summerland will be glad to subscribe to the Review and help you pile up votes. Many others are ready to order the paper as Christmas presents to friends, resident and non-resident. Get busy at once. As a further inducement you may offer the Review free from now to January 1st, 1914, with one or more years' new subscription.

Mr. and Mrs. T. C. Orr leave tomorrow morning for Ontario, where they will remain for some weeks at least. During their absence their property will be occupied by a tenant.

## Okanagan Telephone Company Meets Its Match In Enderby.

The Okanagan Telephone Company came in for much discussion at a special meeting of the city council at Enderby last week. As has already been stated in these columns, the company has endeavored to force the same rates there as they are charging elsewhere throughout the Valley, and at the same time have reduced the hours of service. There has been quite a fight over their charges, and Enderby has threatened to dispense with the service of the company entirely. At last week's meeting legal advice was received to the effect that it was time the company was brought to time "as it is certainly getting

too high handed." The result of the discussion was a motion that the Okanagan Telephone Company be notified that it must return to the hours and rate provided in its agreement by the 10th of December 1913. Failing that the city will then enforce its option provided in that agreement, which in effect is, that if the company does not adhere to the agreement, or wilfully make default in "substantially complying with the terms thereof, all the rights and privileges granted shall at the option of the municipality forthwith cease and determine."

## The Last Night.

Mr. J. L. Shaw, who has been promising his patrons to put on Longfellow's King Robert of Sicily in natural colors, has met with some disappointment. This high-priced picture was promised him in colors, but at the last moment he was advised that it could not be supplied in the natural colors as ordered. However it will be shown on Saturday night in two long reels, and to more than make up the lack of color the magnificent play, The Martyr, in natural colors, will also be given. This magnificently colored film of Roman life in the early days of Christianity is one which will hold every spectator bound from beginning to end. A noble Roman becomes converted and is baptized. He is suspected by his enemy the proconsul of being a Christian, and he is put to a test in the Temple of Diana. Here he destroys the image of the fair goddess, and is condemned to death. While imprisoned, awaiting his doom, he is visited by the woman he loves, whom he converts, and who finally dies with him on the funeral pyre.

These two most excellent plays will doubtless draw a crowded house, especially since it is Mr. Shaw's last performance.

It is with regret that Mr. Shaw makes the announcement that due to insufficient patronage he finds it essential to go elsewhere.

## Bridal Shower.

Much interest is felt by her many friends in the approaching marriage of Miss Ethel Brown to Mr. Gerald McLaine, and plans to give the bride pleasure are very rife among those with whom she has always been so popular. A "linen shower" given by Mrs. K. S. Hogg yesterday afternoon, was attended by a host of the bride's friends, and Miss Brown was the lucky recipient of many charming and pretty gifts in the form of additions to her linen store. The shower was most gracefully and originally arranged. A large fortune chart in the shape of a heart was hung up, and all the girl guests as well as their elders wore of course ogor to have their fortunes told. When the bride's turn came to approach the chart, she was showered with a bewildering variety of parcels daintily packed. The wedding is to take place quietly at the residence of the bride's parents on December 18th.

Mr. Eric Agur went up by the "Okanagan" yesterday morning, and intends making a brief visit to the Coast.

Mr. Vnn Allen, Mrs. Vnn Allen and her daughter, left by yesterday morning's boat for the Coast. After a few days' stay there they are proceeding East and will tour Europe during the coming winter.

## St. Andrew's Society Elects Officers.

The Summerland St. Andrew's and Caledonian Society held its annual general meeting on Monday evening last, the 17th inst., in the Campbell Hall. There was a good attendance of members.

Routine business occupied the first part of the meeting. Two new names were proposed for membership, and these were duly accepted. A financial report submitted by the retiring treasurer showed the society to be in a flourishing condition, there being a balance of nearly thirty dollars in hand.

The chief business of the evening was the election of officers for the ensuing year. The following were appointed:

- Honorary President William Ritchie, son.
- President John G. Robertson.
- First Vice-President James J. Mitchell.
- Second Vice-President James O. Smith.
- Secretary George Fisher.
- Financial Secretary David Thompson.
- Treasurer John D. Wood.
- Chaplain Rev. C. H. Daly.
- Trustees Messrs. D. McKellar, Alex. Smith, D. Kean, J. Stewart, and J. Campbell.
- Auditors G. W. McLaren, Prof. D. H. McIntosh.
- Bard David Lister.
- Standard Bearer John S. Ritchie.

The suggestion was made at the meeting that the hall be thrown open to the general public once a week, for social and recreative purposes. It was felt that this would widen the scope of the society in a manner at the same time needful, and acceptable. Accordingly, every Friday evening the Campbell Hall will be open to all who desire to pass a short time in a quiet social atmosphere. Reading matter will shortly be provided, and also a few of the most well-known and popular games. It is further proposed that every other Friday evening be occupied by ses-

## Summerland Fruit Union.

The meeting of the shareholders of the Summerland Fruit Union, which it was expected would be held this week, has been deferred for a few days. Manager Robertson is at present attending a conference held in connection with the Spokane Apple Show, and is therefore not able to be here this week.

Mr. G. J. C. White, President of the Union, informs the Review that he has written the Minister of Agriculture stating the local situation with reference to assisting the live stock industry, and asked for his advice. He expects to have a reply which he will lay before the meeting, together with his letter, which meeting will probably be called for some day next week.

## Institute Dress-making Classes.

The first of the series of dress-making classes will be held at 10 a.m. in the parlor of the Men's Club on Wednesday, November 28th. The course of twelve lessons will be on measuring, drafting, cutting out and making up of garments by the Anglo-Parisian system. Madame Groat, Principal of the Anglo-Parisian School of Dress, Victoria, is the instructor, and the only expense to the Institute members will be the purchase of the charts at 75 cents each.

sions of a Mock Parliament. Further particulars of this will be announced later.

St. Andrew's Day, November 30th, will be observed by the society on Friday evening, the 28th inst. The celebrations will consist of an invitation social gathering and dance in the Campbell Hall, at which refreshments will be served. On the evening of Sunday, the 30th, the annual divine service for the society will be held in St. Andrew's Presbyterian Church. Members will gather in the Campbell Hall and march to the church. The service will be conducted by the Chaplain, Rev. C. H. Daly.

## COUPON

Cut out this Coupon, and present it at The Drug Store, and they will exchange it for 100 Votes in the \$400 Piano Contest.

### Kaleden Comments

The bungalow for Mr. Battye is approaching completion, and will be a great addition to the place.

Arrangements are being made for Rev. Chas. Britten to take charge of the Baptist Church here for the future.

School was re-opened on the 11th after being closed for about a week by order of the Medical Officer of Health.

Miss Vera King came down from Penticton to visit her parents, remaining from Friday until Tuesday morning.

Mr. and Mrs. Clarence Fenner and child, late of Armstrong, have been visiting Mr. and Mrs. O. E. Tomlin for the past week.

Capt. and Mrs. Hatfield went up to Summerland on Tuesday to meet Mrs. McLaughlin, who is Capt. Hatfield's sister, and has recently come from Nova Scotia.

A mass meeting for Orangemen was held in the hotel on Wednesday evening the 12th, when a special speaker came down. A branch of the order was formed after the meeting.

Mr. and Mrs. Beddall, with their family, arrived last week and intend, after a time to settle on their lot recently purchased from Mr. Jas. Harrison. They are staying in the hotel for the present.

Rev. Chas. Britten of Penticton was down for last week, staying with Mr. J. C. Findlay, and making acquaintance with the people. There were special services each evening, with the exception of Wednesday. There were very good attendances, and general interest was shown.

### Peachland Notes.

Miss Kate Miller returned on Sunday evening from Vernon, where she had been nursing a private case.

On Monday morning Mr. R. M. Angus, late constable of Peachland, left for his old home beyond the waters. The time of his return is indefinite.

Mr. A. E. McKenzie and family, and Mr. Paul Brown and son, returned about the end of last week from their trip into the north country, where winter has begun in earnest.

On Monday morning Mr. Harry Slater, manager of the packing house, having spent a week or so with friends in the woods, hunting, left for Victoria. His many friends, especially the young people, will miss him very much.

A pleasant afternoon was held on Friday at the home of Mrs. A. Town, when she, with her Winnipeg guests, Mrs. and Miss McCutcheon, received the ladies of Peachland. A great many callers gave themselves the pleasure of being present.

Madame Groate, principal and proprietress of the Anglo-Parisian School of Dress, of which the headquarters are at Glasgow, Scotland, is at present conducting two classes in her system of dress-cutting and designing. Madame Groate comes here under the auspices of the Women's Institute, and is well recommended, having had twenty years experience in the work. Our Institute has now a membership of sixty-three, of which thirty are attending the class.

### BIG MONEY IN TRAPPING FUR BEARERS.

A. B. Shubert, Inc., Chicago, U.S.A., the largest house in the world dealing exclusively in American raw furs, and whose ad. appears on page 3, in a letter to the editor says in part as follows:

Does the average farmer stop to consider the thousands and even millions of dollars that are paid out every year by the large fur houses for the skins of the "farm yard pests?" The mink, a menace to the chicken coop, the skunk, muskrat, weasel, and other fur-bearing animals, classed as "varmints," and considered a nuisance to the crops, all have their intrinsic value, and it would be well for many to forget the nuisance end of the story and look at the profit side.

The money picked up by the wise farmer boy in a season, to say nothing of the professional trapper's revenue, is something that would make a great many people sit up and take notice. Just a few years ago it was hardly worth while to skin these animals and ship the fur, but since the supply of nearly every fur-bearing animal, with the possible exception of the skunk, has decreased at an alarming rate within the last few years, the prices have gone up accordingly, until now it is a mighty profitable occupation during the winter months. Fifteen years ago 75 cents was good value for a skunk, \$1 was considered a high quotation for a mink, and ten to fifteen cents was all anyone ever expected for a muskrat. Compare these prices with the present day values, \$4 to \$5 for a black skunk, \$8 and \$10 for a prime mink, and fifty to sixty cents for spring muskrats taken on the average. Over 300 per cent, and in some cases 500 per cent, increase in value in a comparatively short length of time. Is it any wonder that the farmer boy finds it profitable to get out and trap the "varmints?"

However, many a dollar is lost to the man who does not exercise good judgment and common sense in gathering his collection of raw fur. How many thousands of rats, mink, and other furs are graded down to second and third class every season because the shipper did not have sense enough to leave his gun on the rack, and purchase a comparatively cheap steel trap.

The money that is saved by trapping one or two mink or skunk will more than make up for the cost of the traps, and it is easily the best in the long run.

A chicken never should be eaten the day it is killed. The tenderest freshest-killed chicken will be tough immediately after the animal heat has left the body. In about twelve hours, however, the muscles will relax, and it then becomes acceptable for food.

### B.C. MUST BE "WHITE."

A white British Columbia is being agitated for by a special committee of the Progress Club of Vancouver. A mass meeting is soon to be held, and it is expected representations will be made both to the Provincial and Dominion Governments, strongly urging the exclusion of Asiatics. Attention will be called to the fact that about 8000 Orientals have come to British Columbia this year.

Among the members of a work-gang on the railway not a hundred miles from here is an Irishman who claims to be very good at figures. The boss, thinking that he would get ahead of Pat, said the other day to him: "Say, Pat, how many shirts can you get out of a yard?" "That depends," answered Pat, "on whose yard you get into."

### WHITE FLESH PEACH

Would Attract English Buyer More Than Yellow Variety.

London, Oct. 23.—If the Canadian peach grower would produce a white flesh peach, his returns from sales in Great Britain would be about three times as large as he gets from the yellow flesh variety. This is the opinion of dealers of Covent Garden market.

The first shipment of Ontario peaches has done fairly well on the market. They were well packed, arrived in good condition, the color was good, and the flavor excellent. Prices ruled in the neighborhood of \$1.25 the case. Much of this fruit has been sold to dealers on the continent, and from Germany comes the very interesting story that the peaches were at first taken for large greengages, this being due to the color of the flesh.

This question of growing a white flesh peach for the English trade is one which will need to be considered by Canadian growers. On every side one hears praise of the color and quality of the fruit, mingled with expressions of regret that these excellences are not made complete by providing a white flesh variety.

### A MILLION DOLLARS FOR GOOD ROADS.

One of the most important of the many road improvement plans now under way in various parts of Canada, is that just launched in Essex County, Ontario. At a meeting of the council on Thursday, October 16th, a by-law was drawn up for presentation to the voters next January. This bylaw calls for the raising of a million dollars to provide for concrete roadways covering no less than 150 miles, and connecting all the important communities of Essex County. The proposed routes of the concrete roads will completely encircle the county, and afford the finest type of highway connection to the farmers for reaching Windsor or any of the smaller towns.

With the assistance of Engineer Huber of the Ontario Government, the committee appointed at the last session of the council went over the different roads proposed for paving. Basing his recommendation upon the fact that the route will be used for much heavy traffic, Mr. Huber made his report in favor of using concrete throughout.

To some women a clear complexion seems to be of more consequence than a clear conscience.

## Cleanings from Review of Five Years Ago.

November 21, 1908.—Mr. F. F. Busted, General Superintendent of the Western Division of the C.P.R., and several others visited Summerland this week for the purpose of selecting a site for wharf, car slips, etc. Advantage was taken of the occasion to ask the officials to establish a daily boat service for the winter months. The assurance of such was given, the "Aberdeen" to alternate with the "Okanagan." The Board of Trade already has in hand the matter of arranging with the Post Office Department for a daily mail.

At a well attended meeting at Hotel Summerland last Friday a number of business men organized themselves as a Board of Trade, and elected a council.

Mr. John Downton was given a pleasant surprise when a number of men assembled and presented him with a gold watch and chain. Mr. William Simpson made the presentation in a few well-chosen words, the recipient responding and expressing his surprise and pleasure. Mr. Downton left for Kelowna where he will join the ranks of the benedicts.

NARAMATA.—Final plans of the Naramata Hotel have been prepared by Mr. W. A. Peters. Tenders will be called for immediately.

## Boiled Apples Are Best Insists Fruit Epicure.

Apple dumplings, fritters, pies, sauce, and all the other 219 different ways of preparing the "king of fruits" have the approval of Donald Bradford, field representative of the Sixth National Apple Show and Fruit Products Congress; but he claims that boiled apples win the prize for palatability. Mr. Bradford qualifies as an expert by reason of having sampled apples cooked after all the best ways in the various apple districts of the northwest.

Here is his recipe for boiled apples: teacup of sugar to seven average apples; cover with water and boil until the cores are done; before cooking do not pare or core the fruit, and use no seasoning. "By cooking in this way," he says, "none of the strength is lost, and you get the fruit with all its wealth of juice."

Prepared in this way more apples can be consumed, and less work is required in the preparation and cooking. By eating more apples you benefit your health. By reducing the labor of cooking you add to the happiness of your wife. Therefore, try boiled apples and gain health, and happiness.

## Our Canal.

Much is heard and read these days of the Panama Canal. Few, perhaps, of Canada's citizens are aware that we have the greatest canal in the world—greatest at least in the volume of traffic passing through it. The Saulte Ste. Marie Canal—popularly known as the "Soo"—will carry more freight this season than Suez, Manchester and all the famous canals of Germany taken together. The "Soo" has transported an average of more than 10,000,000 tons per month since navigation opened, and its total record for the year will not be less than 75,000,000 tons. Figures like these make traffic on other artificial waterworks look petty and tame. The great lakes carry more commerce than any other body of water less in size than the open ocean, and the most important stream of trade on the lakes has to pass through the "Soo" Canal.

## IRRIGATION IN INDIA.

Thirty years ago sixty-six irrigation projects were in operation under the public works department in India, on which the total capital outlay was about thirteen million pounds sterling. Twenty years later the number of irrigation projects had increased to one hundred and twenty-four, with a capital outlay of about twenty-eight million pounds sterling. At the present time there are in operation one hundred and eighty-eight irrigation systems having a capital value of nearly thirty-six million pounds sterling, bringing in a net revenue of nearly two million seven hundred thousand pounds sterling. There are now in operation more than fifty-three thousand miles of canals and distributaries. The present area under irrigation is about twenty-three million acres.

## Effect Of Alfalfa On Soil

The unqualified recommendation as a soil improver that is continually being given alfalfa is responsible for the very common belief that this crop is one which should be grown extensively on poor or unproductive soils. No greater mistake could be made than to sow alfalfa on land which is not in a good condition of fertility.

It is true, says Family Herald and Weekly Star, that, being a legume, it benefits the soil through the addition of nitrogen fixed by organisms forming nodules on its roots, and through its root it not only supplies considerable quantity of humus but greatly improves the mechanical condition of the soil.

In producing profitable yields of hay, alfalfa utilizes large quantities of phosphorus and potassium, which must be obtained either directly from the soil or from added fertilizer.

Whether alfalfa is a soil improver is a question which cannot be answered without some explanation. In the sense in which the term is commonly used, alfalfa is not a soil improving crop, since it cannot be utilized in the same manner as cowpeas, soy beans, crimson clover or hairy vetch for the building up of wornout or depleted lands. On the other hand, it enriches the good soils through the nitrogen and humus added to the soil by its roots and crowns when the old field of alfalfa is broken up, and also by the mechanical action of its roots upon the soil. Furthermore, the preparation of the land prior to seeding the alfalfa, and the treatment in the way of top dressing and fertilizing which follow during the few years of its existence doubtless have a very beneficial effect on the crops succeeding it.

In actual practice, then, alfalfa improves good land, but cannot be considered in connection with poor land, as it is not a profitable crop to grow on unfertile soils.

## Crime North and South Of The Boundary Line.

An American and a Canadian, fellow passengers in a Canadian train, were engaged in conversation. It turned on the Thaw trial.

"Of course, he will get free eventually," said the American, "and of course lots of our other bloods will feel more free to shoot to kill when the spirit moves them. In the United States," he proceeded, "we want more of your Canadian style of law. I come from the State of Washington. Across the border is British Columbia. We are pretty much the same people on both the same sides of the line. We have pretty much the same conditions and the same sort of civilization. British Columbia has capital punishment. The State of Washington does not permit the death penalty. And I think, if I remember right, there are a hundred murders in the State of Washington to every murder in British Columbia."

## A BIG INCREASE.

The census bulletin on British Columbia agriculture shows substantial progress has been made during the decade ending with 1911. At that time there were more than five times as many farm holdings under 50 acres as ten years before. Area in orchards and nurseries has more than quadrupled, and land used in vegetable growing shows almost a like increase. Livestock in the province was worth more than seven times that of ten years before, while dairy produce much more than doubled. The value of field crops nearly trebled in the decade.

## Postal Revenue Index To Country's Progress.

Postal revenue figures for the first seven months of the fiscal year show that the country is as prosperous as ever, and indicate an ever-expanding development. The figures for the seven months show an increase in 1918 of half a million dollars. Compared with the postal revenue for the same period a decade ago the figures for this year show an increase of five millions, the total to October being \$8,007,400. The revenue for the month amounted to \$1,347,700, as compared with \$1,318,426 for October.

Nearly one thousand head of dairy cattle have this year been imported into this province by the B.C. Department of Agriculture.

# What Every

The groceries sold at this store are, quality for quality, the cheapest you can buy in the town.

## ANY of your neighbors will tell you that. We made it

a rule when we commenced business — and have rigidly adhered to the rule ever since — to give you the top market value for your money, even if we occasionally lose ourselves. That you appreciate this is shown by the way our trade is growing — and by the selectness of our customers. You are missing a whole lot if you do not come into this store and look at our quality and prices.

PUBLISHED BY THE REVIEW PRINTING & PUBLISHING COMPANY LIMITED.  
RALPH E. WHITE, MANAGING DIRECTOR

SUBSCRIPTION RATES: \$2.00 PER YEAR, IN ADVANCE. SIX MONTHS \$1.00.

### Advertising Rates:

LEGAL NOTICES.—Twelve Cents per line for the first insertion; Eight Cents per line for each subsequent insertion.

LAND NOTICES.—\$7.00 for 60 days, \$5.00 for 30 days.

WATER NOTICES.—30 days, 180 words and under, \$8.00; each additional 50 words, \$1.00.

THEATRICAL, ETC.—50c. per inch for first insertion, and 25c. per inch each subsequent insertion.

LOCAL NOTICES or Readers, Immediately following regular locals, 20c. per counted line; 10c. per line each subsequent insertion. Half these rates when accompanying display advertisements.

LODGE NOTICES, Etc., 25c. per week, per column inch.

FOR SALE Advertisements, Etc., 2c. per word first week; 1c. per word each subsequent week.

Transient Advertisements payable in advance.

Rates for Contract Advertisements furnished on application.

Copy for change of contract advertising must be in the hands of the printer not later than Wednesday noon to insure publication in the next issue.

In accordance with schedule of prices adopted throughout the valley, charges for advertising are now being made weekly. Heretofore when five issues were made in one month the result was a loss. By the new method customers are charged each week for just the amount of space used.

FRIDAY, NOV. 21, 1913.

### THE RURAL MAIL ROUTE.

Along some twenty miles of municipal roads, forming roughly a circle around our municipality, there will soon be placed one hundred or more free delivery mail boxes. What impression these one hundred or one hundred and fifty boxes will give to the stranger driving along these roads, or what feeling of pride and satisfaction, or otherwise, they will impart to ourselves depends very much on how they are placed.

We have seen rural routes along which the boxes were set up in so indifferent and slovenly a style as to give the district a dilapidated and run-down appearance. Now while many of our fences and roadsides and some of our buildings are not in as "smart" an appearance as they might be and as we hope soon they will be, just how these mail boxes are going to be mounted will greatly improve, or as greatly mar, the appearance of the route. An excellent suggestion has been made by one of our citizens which should meet with the commendation and hearty support of every subscriber on the route. The Department demands a regulation post five inches square and of fir to be placed three feet in the ground with four feet six inches above the ground line and to be morticed to receive the box bracket. How much more pleasing the effect will be if these posts are uniform, is apparent to all, and as they are something which all will hope may be needed for many years, they should be of as permanent a nature as possible. Realizing these facts the citizen referred to has very commendably busied himself to have neat and properly treated, and yet inexpensive, posts of uniform design made available to all. The proprietors of the local saw mill have kindly offered to supply these posts according to the Department's specifications properly morticed, stained and treated for a nominal price of sixty cents each, delivered, provided orders are received for fifty or more, and both Postmasters Hayes and Ritchie are now ready to receive requisitions for these.

We trust that every subscriber will take advantage of this arrangement and will place their order promptly so as to expedite the opening of the route at the earliest possible date.

Let there should be any delay in opening the route because of neglect of a number to remit promptly we would urge that all those who have not done so would send in the required amount to the Post Office Department without further delay.

### FRUIT BY MAIL.

Some Ottawa officials of the Post Office Department have stated that we are to have a parcels post system early in the new year. The prime object of the calling into existence of the parcels post system is to bring producer and consumer closer together. Such has been the effect of the parcels post in the United States.

This method of transporting small packages of merchandise has great possibilities for the grower of soft fruits and early vegetables, and every effort should be made to take advantage of it. Small packages of tree ripened fruits could be sent direct from the orchards to the table of the consumer, and by this method be delivered to the latter in such condition, and at a price, that would immediately tempt re-ordering. In thus eliminating all intermediate expenses except that of postage, a good price could be had by the grower.

Our sister Dominion, New Zealand, already has an arrangement whereby fruit is carried by parcels post. Canada therefore in introducing such a scheme would not be entering upon an altogether untried experiment. In New Zealand the various post offices display lists of the different fruit-growing associations participating in the scheme, together with a price list for the various sized packages of fruit offered, and the postmaster acts as agent for the buyer. An interesting account in detail of the method used in New Zealand is given in a recent number of the *Nor-West Farmer*. Fruit is apparently delivered by the grower at a sub-station of the post office at the railway station or wharf and, where house-to-house delivery of mail matter is in vogue the fruit is delivered at the other end, direct to the home of the consumer. Arrangements for bulking the packages going to the same destination make the scheme very practical. The new scheme came into operation in New Zealand at the beginning of this year, and while yet more or less of an experiment, is seemingly giving satisfaction.

### THE CANNERY.

The Dominion Cannery have this week removed from their warehouse the last of the season's pack. Most of their output has been shipped, but a portion is now stored in the Fruit Union ready to be loaded into cars.

Just what the company's plans are for the next season could not be learned. An effort has been made to sign up contracts with growers for next season's pack, but at the price offered there was not much inducement for the growers to obligate themselves. It is probable, however, that a large quantity of tomatoes will be grown next year.

Through some unavoidable delay in connection with the switch-board ordered by the local Telephone Co., it is probable that there will be a month's delay in beginning the service.

An immense rock slide at Sea Bird Bluff about two miles west of Ruby Creek on the C.P.R. main line in the Rockies greatly disarranged traffic for two or three days this week in the mountain division. The slide occurred early Sunday morning, completely blocking the double track for a distance of more than 300 feet, and in some places was more than 60 feet deep. It was mainly composed of rocks, some of which weighed more than 100 tons.

We are very glad to be able to report continued improvement in the condition of Mr. R. H. English. Though recovery is necessarily slow, after so serious an accident, the absence of any complications precludes all further anxiety. Mr. English is only able as yet to sit up for a few moments at a time, and is still almost helpless as the result of wounds and bruises to his body and arm, but the scalp wounds are healing satisfactorily, and his general condition steadily improving.

"What is your last name?" asked the teacher of a new pupil. "Arthur, ma'am," replied the boy.

"Arthur!" exclaimed the teacher. "What is your other name?"

"Cooke," said the boy.

"Then, Cooke is your last name, of course," said the teacher, looking at the boy with considerable severity.

"No'm," replied the child, respectfully. "My name was Cooke when I was born, but mother says they didn't name me 'Arthur' for most three months."

### LOCALS.

Mr. Gerald G. Coop, who is interested in the properties here formerly held by T. J. Smith, came in on Tuesday, principally to be present during the session here of the Water Commission.

Mrs. Atkins, wife of Supt. Atkins of the Summerland Telephone Co., who has been dangerously ill, is convalescent, and Mr. Atkins is hopeful of being able to move his family from Penticton here in a short time.

We regret that the name of Miss Anna Hayes was inadvertently omitted from among those who were mentioned as contributing to the musical program given at the College New England Supper and Sale of Work last week.

"Billy" Bentley, who has been very seriously ill for some weeks, and who was brought home from the Coast by his aunt, Mrs. McLansborough, about two weeks ago, has been rapidly improving since that time. He drove into town to-day with his father.

A fine climb to the top of Rattlesnake Mountain was enjoyed by a party of professors and students of the college last Saturday. They had intended to make the ascent from the lakeside, from a point higher up the lake, but were prevented by the southerly gale, and proceeded "overland" instead.

With the dazzle and gleam of brilliant sunshine reflected on the snowy summits above us and a warm still air at midday on the lakeshore, we have enjoyed this week weather and scenery that rivals Switzerland. The mountains at the north end of the lake are a still pure white stretch of snow, while above Naramata the snow is heaped ruggedly on the tops of the thick pine growth of the hills.

With power to spare it is regrettable, as well as being the cause of considerable annoyance, that the Council's instructions to place lights further up the Gulch Road have not been carried out. A light is also needed at the brow of the hill above the packing house, and which could be put in by extending the present line but a few feet further. At this point the bright lights from the streets below are very bewildering, especially to the stranger. One light at this corner would make a vast improvement.

### ERNEST J. ROWLEY, Artist - Photographer

#### Home Portraiture.

### Water Act and Amending Act.

Before the Board of Investigation.

In the matter of Bald Horn Creek, Bear Creek, Big Horn Creek, Bold Creek, Boucher Garden Creek, Cedar Creek, Clover Creek, Cranberry Creek, Davidson Creek, Deep Creek, Deer Creek, Esparron Lake, Fern Creek, Hill Creek, Jack Creek, Keef Creek, Miller Creek, McDougall Creek, Power Creek, Pigeon Creek, Rashdale Creek, Shannon Creek, Smith Creek, Speer Lake, Spring Creek, Spruce Creek, Tamarack Lake, Trepannier Creek, Vernon Creek, Venner Creek, tributaries of Okanagan Lake in the neighborhood of Peachland, and of all unnamed streams tributary to or in the vicinity of any of the said streams.

NOTICE is hereby given that a meeting of the Board of Investigation will be held at Peachland on the 21st day of November, 1913, at nine o'clock in the forenoon when all claims which have been filed, all objections thereto, and the plans prepared for the use of the Board will be open for inspection. All persons interested are entitled to examine these and to file objections thereto in writing if they deem fit.

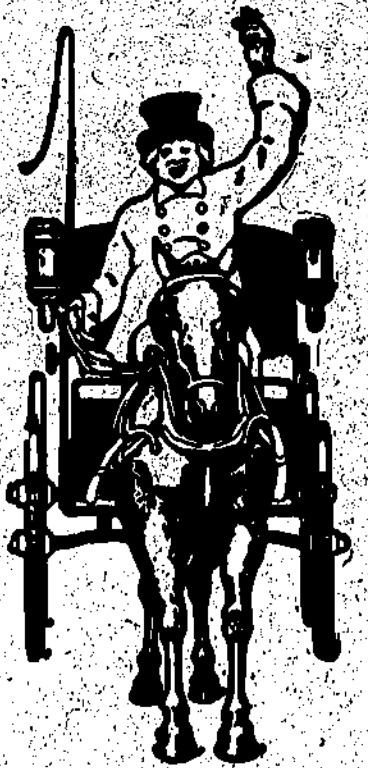

At this meeting claimants shall prove their title to lands to which their water records are appurtenant. This may be done by producing, in case of Crown Granted lands, the title deeds, or the certificate of title, or a certificate of incumbency, or in case of lands not held under Crown Grant, by producing the pre-emption record or the agreement of sale, &c.

Objections will be heard forthwith if the party objected to has received sufficient notice of the objection.

The Board, at the said meeting, will determine the quantity of water which may be used under each record, the further works which are necessary for such use, and will set dates for the filing of plans of such works, and for the commencement and completion of such works.

Dated at Victoria, B.C., the 7th day of October, 1913.

For the Board of Investigation,  
J. F. ARMSTRONG,  
Chairman.

The evening service at 7 p.m. will  
be held in St. Andrew's Church,  
West Summerland, when Profes-  
sor Everton will again be the  
preacher.

Coming. Dr. Kilburger, Eye-  
sight Specialist, representing the  
Toric Optical Co., Vancouver, will  
be in McWilliams' Pharmacy, West  
Summerland, Wednesday and  
Thursday, November 26th and  
27th, and will be pleased to have  
persons with defective eye-sight  
call and consult him. See notice  
on page 4. ad

According to persistent rumor it  
is not improbable that Messrs.  
Grant-Smith & Co., who are build-  
ing the grade of the K. V. R. on the  
east side of the lake may take the  
contract for building the only por-  
tion of that line not yet in the  
hands of the contractors, namely  
the section between Osprey Lake  
and Coldwater Summit.

The time of Rev. F. W. Pattison  
and Mrs. Pattison in Summerland  
grows short, as the date of their de-  
parture is probably fixed for shortly  
after Dec. 18th. Mr. Pattison, char-  
acteristically, is making the most  
of the little while remaining of his  
ministry here, and is devoting more  
time than he can well spare from  
necessary preparation, to his people.

Mr. Gerald Allen has for some  
days been a guest at the home of  
Mr. A. G. Munn. Mr. Allen has  
for some years been with the Bank  
of Commerce, and was last stationed  
at Edmonton. He has, however,  
severed his connection with the fi-  
nancial institution and plans spend-  
ing the winter at the Coast. Mr.  
Allen states delight in what he has  
seen here, and it is very probable  
that he will come here to live.

David Kean, who a few months  
ago had the misfortune to fall from  
the roof of a barn which he was  
building, had a second similar ac-  
cident befall him. Last week  
while assisting in the erection of a  
building the scaffolding on which  
he was standing gave way, and he  
fell to the ground. On examina-  
tion he was found to have sustained  
a broken rib, besides being severely  
shaken up. Latest reports are that  
he is making a satisfactory recov-  
ery.

Mr. J. L. Hillborn called on the  
Review this week and asked to  
have his meaning made plain with  
reference to planting orchards. The  
distance between rows he recom-  
mended to be 30 feet, with 17 feet  
between the trees in row. At the  
same time he condemned the prac-  
tice of using fillers. As a matter  
of fact this space of 17 feet per  
mits of every other tree in the row  
being a filler, but he recommended  
that the full 30 feet between  
the rows be kept open. On this a  
cover crop should be grown about  
every third year to keep up the fer-  
tility of the soil, and in this space  
early vegetables or other crops  
should alternate with the cover  
crop.

WANTED—To buy, grain sacks.  
T. B. Young. d5

Mr. Will Robinson spent Sunday  
with his relatives at Naramata,  
and there was a pleasant lunch  
party at the hotel.

Major and Mrs. Hutton are leav-  
ing at once for Victoria. They will  
be absent from their home here for  
probably four months.

Mrs. G. M. S. Gordon went out  
on Tuesday morning's boat and is  
proceeding to Toronto, where she  
will visit awhile. Mr. Gordon ac-  
companied her as far as Sicamous.

Mr. Hayman of the K. V. R sur-  
vey went over to Naramata this  
week and is staying there for a  
few days. He is then leaving for  
the Old Country for Christmas.

Mrs. W. J. Robinson with their  
two little ones, spent Monday at  
Naramata as the guest of Mr. and  
Mrs. R. C. Robinson, and were in-  
troduced to their tiny grand-niece.

Calendars, Views, and Post  
Cards for Christmas will be ready  
the end of November. These sell  
very quickly, so do your Xmas  
shopping early. C. P. Nelson, the  
Photographer in your town. tf

Rev. R. W. Lee went up the lake  
this (Friday) morning to Vernon,  
and will fill Sunday duties at that  
place, so will be absent from his  
congregation this week end. He  
is returning on Wednesday next.

If you are afflicted with Head-  
ache, Squint or Cross-eye, do not  
fail to consult Dr. Kilburger,  
Specialist, in McWilliams' Phar-  
macy, Wednesday and Thursday,  
November 26th and 27th. ad

The passing of flocks of geese  
over the land and lake this week  
heralds the arrival of winter within  
a short time for us. We noted  
the snowy flock with a shiver,  
and went to get out our furs. The  
arrival of consignments of hand  
sleighs at the stores is yet another  
omen!

Miss Bena Logie, Miss Grace  
Logie, and Miss Kathleen Alcock,  
who is the guest of Mrs. Gartrell,  
crossed the lake in spite of a rather  
rough trip on Friday night, to  
the Naramata Hotel Dance, and  
were weather-bound over the week-  
end, thoroughly enjoying them-  
selves, we hear.

There has been a boom in sur-  
prise parties lately, and quite a  
few—very successful and very sur-  
prising—have gone off enthu-  
siastically. To have a little party of  
musicians arrive at your lonely  
ranch, give you a program of  
songs and music, and stay all  
night is, for instance, enjoyably  
surprising!

Professor Sawyer presided over  
the Annual Meeting of the Brother-  
hood of the Baptist Church, held in  
West Summerland on Tuesday even-  
ing. There was a good gathering  
of members, and several interesting  
addresses were given. The social  
entertainment of the evening pre-  
ceding the business part of the  
program consisted of a supper party  
enjoyed by the members and their  
friends, commencing at eight  
o'clock.

To see poetry in material things  
is a valuable gift, but to be able  
to recognize the beauty of a mud  
dredge is surely unique. One of  
our young citizens, who knows the  
West well, is certainly "some  
poet." "I just love that bit of  
dredge machinery," exclaimed she,  
lingering long in the sunshine to  
watch the mud travelling. "It  
just reminds me of some big black  
tulip, coming up with its load, and  
bursting into flower as it empties  
overboard." Oh! for her happy gift!

Another evidence that the grow-  
ing of early fruit is a good branch  
in which to engage here is in the  
fact that A. McLachlan has acquired  
a five acre lot with the purpose of  
engaging in that branch of the in-  
dustry. Mr. McLachlan stated to  
a representative of the Review  
nearly a year ago that he purposed  
watching his friend Mr. Hillborn  
with whom he was at one time in  
partnership in the same branch of  
agriculture in the east, and if the  
latter's venture here was a success  
he would take up the work on his  
own account. Mr. McLachlan has  
acquired the Solly lot near Mr.  
Hillborn's, and expects to have some  
glass ready for the growing of his  
plants next spring.

SEALED TENDERS addressed to  
the undersigned, and endorsed  
"Tender for Drill Hall, Victoria,  
B.C.," will be received until 4.00  
p.m., on Thursday, December 11,  
1913, for the construction of a  
Drill Hall at Victoria, B.C.

Plans, specification and form of  
contract can be seen and forms of  
tender obtained on application to  
the office of Wm. Henderson, resi-  
dent architect, Victoria, B.C.; on  
application to the Postmaster, at  
Vancouver, B.C., and at this De-  
partment.

Persons tendering are notified  
that tenders will not be considered  
unless made on the printed forms  
supplied, and signed with their  
actual signatures, stating their  
occupations and places of residence.  
In the case of firms the actual sig-  
nature, the nature of the occupa-  
tion, and place of residence of each  
member of the firm must be given.

Each tender must be accompanied  
by an accepted cheque on a char-  
tered bank, payable to the order of  
the Honourable the Minister of  
Public Works, equal to ten per cent  
(10 p.c.) of the amount of the ten-  
der, which will be forfeited if the  
person tendering decline to enter  
into a contract when called upon to  
do so, or fail to complete the work  
contracted for. If the tender be  
not accepted the cheque will be  
returned.

The Department does not bind  
itself to accept the lowest or any  
tender.

By order,  
R. C. DESROCHERS,  
Secretary.

Department of Public Works,  
Ottawa, November 11, 1913.

Newspapers will not be paid for  
this advertisement if they insert it  
without authority from the Depart-  
ment.—49438. 63 1 n 21-28

On and after this date the ferry  
will on its last regular trip leave  
Summerland at 5.30 p.m. instead  
of 6 o'clock as heretofore.

# OUR NARAMATA SECTION: Everything of Business and Social Importance Transpiring in South Okanagan's Newest Town

## Program Of The Unity Club

In addition to the dance described elsewhere on this page, the Unity Club has had a fairly busy week socially. A few nights ago the first whist drive of the season for the benefit of the Club was the occasion of a very pleasant and large gathering, the hostesses were Mrs. H. J. Wells and Mrs. W. H. Mitchell, and some excellent rubbers were enjoyed.

The usual afternoon business and social meeting on Friday afternoon attracted a full attendance of members, and a delightful tea was provided by Mrs. Chas. Lyons and Mrs. J. Hayward, who were hostesses for the afternoon. The next meeting is to be on the 28th inst., when Mrs. W. Mitchell will be hostess. The next Club dance will be held at the Hotel Naramata on Dec. 5th, and all the members are looking forward eagerly to the New Year's Ball, which as usual is arranged for New Year's Eve, and is always a great social event.

At the December 5th dance the ladies themselves are providing a refreshment buffet, and an extra charge will be made to the gentlemen.

## Naramata Fire Brigade.

With a thoroughly efficient and excellent equipment the Naramata Fire Brigade is now an accomplished fact and a town improvement that has long been urgently needed.

The first practice with the new hose and hydrants took place during the week, and proved entirely to the satisfaction of those who are interested in it—and they are all the town. Far from there being any lack of water or difficulty in getting it on, a common complaint with fire equipments, the pressure at the practice turned out to be too strong, and will have to be considerably reduced. The eight or ten hearty townsmen who turned out with the hose were rather dismayed at the force they found themselves confronted with, and it took all their enthusiasm to get it under control, but after a few mishaps, they had conquered the conquerer. A far-carrying hose and a powerful stream of water, handled by a sturdy brigade now gives Naramata complete protection against the "fire-fend."

The risks of a fire breaking out in the centre of the town, which has grown very rapidly of past months, has been recently much discussed, and given a strong wind and one of the centre buildings alight, terrible possibilities might well be feared. But all fears of such danger are now at rest.

## Railway Activities.

The mild weather is a great factor in the rapid railway developments on the K.V.R. this year, and the recent activities are calling for satisfied comments among the workers and those interested. A striking difference is noted between the "open" weather of this November and the conditions last year, when the snow came down much earlier. Every advantage is being taken now of what is described by an official as "ideal weather for construction work."

Mr. C. G. Griffin, District Superintendent, accompanied by Mr. Grant Smith of Grant Smith & Co., and Mr. Benson, came up from Penticton by motor on Friday last, and the party began a somewhat arduous tour of inspection.

They first walked from the great tunnel to Blair's Camp at the Summit, and thence all along the line to Kelowna. A drive was attempted for the journey to Kelowna, but was found impossible, so the team was sent back and the party did the rough journey a-foot, and returned by boat to Naramata and Penticton on Monday night.

The three mile and four mile bridges on the K.V.R. between Naramata and Penticton are now finished, and F. O. Bamber's gang are hard at work cutting and taking out ties.

The s.s. "Aberdeen" brought down the lake on Monday, a very heavy consignment of timber for bridge and tunnel work.

Mr. W. Nuttall and Mr. W. Land are this week cutting out wood for the timbering of the big tunnel. It is thought likely that Grant Smith & Co. may get the K.V.R. contract for the work from the end of that recently finished by Messrs. Carlson to Merritt.

## Bowling Club For Naramata

There is to be a Bowling Club added to the attractions of Naramata, and it is likely that as soon as the ground is ready, a committee and officers will be appointed. This fine old English game, played in the spacious days of Queen Elizabeth, and famous for ever as the gay defiance offered by the old sea dog, Sir Francis Drake, to the invader, Philip of Spain, is a capital summer and winter sport, as popular with the old as the young. Mr. J. B. Ireland has just begun to lay out a nice little bowling alley at the rear of the International Restaurant.

Nurse Gordon left on Monday to answer a call from a Penticton patient.

Mr. W. R. Bartlett, post-master, made a business trip to Summerland last Friday.

Mr. Frank G. Roe from Montreal was a visitor over Sunday last to his relatives here.

A splendid colt has been bought at Penticton by Mr. Doswell, who is having an active time breaking it in.

Mr. Duncan Munroe has, we hear, gone up to Paradise Ranch, where he will work for Mr. Matthew Wilson.

Rev. F. W. Pattison is holding a farewell service for his congregation and friends of Naramata on the last Thursday in this month, November 27th.

Though the roses of Naramata are not yet all gone, the Queen of Autumn, the chrysanthemum, reigns supreme, and there are some beauties grown here. A magnificent display of blooms of many colors and varieties is under glass at Gardener Avesson's.

"The Kid" is not so easily duped and will be on the war path shortly! Certain voraces, beautifully typed on unlawfully acquired paper, ascribed to an anonymous author, and offered to the Review for publication, without the author's consent, will have a sequel shortly!

A party of our sturdy hunters, including Mr. O. C. Davidson and Mr. K. C. Griffin went up the hills in search of deer on Saturday. Nothing fell to their guns, but better fortune awaited them at home! Returning to camp tired and disappointed, great was their delight on finding five charming "deer" "hung up" in the commissariat! Dinner for several and a team wherewith to convey them home was the order of the evening.

## Current Events - OF - Town & District

Mr. E. H. Burnett made the trip down to Penticton on Monday.

Miss Cooper and Miss Cartwright were the guests of Mrs. Carrol Aikins on Monday.

Mr. A. H. Schacht spent Sunday with his wife and little daughter at the Hotel Naramata.

Mr. Carrol Aikins left on Monday morning's boat, en route to the Coast, where he intends spending a few days.

Mr. Harold Endacott went out on Tuesday morning's boat, on a business trip to Calgary, and will be absent a few days.

Mrs. Brons, who was one of the guests from afar at the Unity Club Dance, spent Friday and Saturday with Mrs. J. W. S. Logie.

Mr. Hancock, who has been putting in a few days' shooting, bagged a rabbit or two, rather a rarity in this district. Bunnies proved very toothsome morsels.

Mr. Hayman who has been on the K.V.R. survey on the Summerland side all summer, is in town for a few days previous to leaving for the Old Country, where he is to spend Christmas.

Two minor accidents have been treated at the Cottage Hospital this week; a broken ankle, and a torn ligament in a leg. The sufferers were at once given ease by Dr. W. Robinson, and were detained for rest.

Mr. Loudin of Calgary, who has been spending a few days at Naramata, has bought the ten acre lot owned by Mr. A. Price, C.P.R. District Superintendent of Calgary. Mr. Loudin will probably come into residence with his family in the spring.

Mrs. Jack Logie had a birthday on Saturday, and celebrated it right royally with a small party of friends. Five ladies had a luncheon and card party, and later drove to Griffin & Hunt's camp to dinner, making a delightful trip home by moonlight.

Townpeople well patronized the Unity Club Dance at the Hotel, a party came over from Summerland, and a number of engineers from the camp made an expedition down. The Summerland party were weather-bound, some of them over the week-end, because of the tempestuous state of the lake on Saturday.

An interesting visitor at the Hotel Naramata last week was Miss Wolfe, a young English newspaper woman (on the business side), from Vancouver, whose industry and energy were much noticed. Miss Wolfe spent many hours walking over miles up at the camps in a campaign of securing subscribers for her paper.

We are very glad to report the excellent progress towards recovery of Captain Languedoc and Captain P. S. Roe. The latter hopes to be about his duties again very soon, and Captain Languedoc had his leg removed on Tuesday from the "box" in which it has been confined since the accident, and it is now in plaster of Paris. This is a great relief, as the invalid will now be able to sit up in bed.

Miss Curry, who has been a resident since early summer, and all that time in charge of patients, left on Saturday for Vancouver. Miss Curry, who is a skilled and careful nurse, has made a great many friends during her stay in Naramata, where she will be very much missed socially and professionally. She now intends retiring from her work and plans living "on the land" later.

Two ferry loads of merry-makers had a thoroughly good time on Monday night, setting out down the lake to Penticton to witness a performance of Rex Beach's play, "The Barrer." Some of the male members of the party were more or less enjoying "French leave" from above, and 'tis said that there was a passenger aboard the incoming "Okanagan" who looking over the side on the departing ferry, recognized certain of his men, but no more need be said — or was said — and all was well!

## Pretty Dance At Hotel Naramata.

One of the largest and most successful dances yet held by the members of the Unity Club and their friends took place at the Hotel Naramata on Friday night. A most charming scene was presented by the decorated ball-room, when some thirty couples took the floor. The green-filled conservatory was hung with gaily colored Japanese lanterns, and green branches of the Douglas fir were heaped here and there. The cosy rotunda was transformed into a delightful "sitting-out" room, while chrysanthemums and flowers were everywhere. Contributing to the success of the evening was the presence of a goodly number of men who were keen dancers, including several engineers from the camps, who thoroughly enjoyed the social delights of the evening.

Capital music was supplied as usual by Mr. and Mrs. Walters' piano and drum, and these clever musicians rendered one or two new numbers of their own composition, which were greeted enthusiastically. The ever popular waltz and two-step fairly well filled the program, but there was a good deal of fun extracted from the merry "Tag two-step" and the "Broom Waltz." A very pleasant feature of the evening was the attendance of a number of the older folk who sat in the rotunda and made contented and self-constituted "wall-flowers," thoroughly enjoying the pretty scene.

Some unusually pretty frocks were worn, and — noted! Much admired were a certain gracefully draped gown of pale turquoise blue crepe de chine, and one of some soft filmy material in foam green with a pretty tunic effect. Yet another was of fine black and white point d'esprit net over shell pink satin.

For lessons in amateur photography apply to Messrs. O. C. Davidson and R. C. Griffin, care of Griffin Hunt & Co.!

Mr. E. Peacock and sister left on Tuesday's boat, en route for Winnipeg, where they will probably remain until next spring.

Mr. W. Nuttall will be very busy for a while making an inspection of government roads and trails, to note and report all that will be necessary for next year's improvements.

Dances, whist drives, theatre and birthday parties — not to mention moonlight drives and rides! Certainly Naramata has been given over to gaiety for the past week. There is no lack of social activity in this gay little town; and every advantage has been taken of bright sunny days and fine nights, not only to visit from place to place, but to plan merry makings and surprises within doors. If November's program is a foretaste of December's doings, then the society chronicler is in for a pretty arduous time.

Some consternation was caused at the wharf on Monday night by an accident that was, at least, a most unpleasant experience for the one concerned. The ferry was drawing in, bringing with her a scow loaded with meat for the camps. In some way the scow broke loose, just as the "Okanagan" appeared on the scene. In the ensuing confusion, and in his endeavors to capture the stray, the new captain of the ferry fell overboard. He was, however, soon aboard again, and after a change of clothing and a meal rejoined his boat.

It is fine to have a gallant Fire Brigade, and splendid to have a 115 lbs. pressure force of water, but if the town doesn't want to be burnt, it cherishes equal objections to being drowned. The enthusiasm that turned the hose on the church, and fired the high pressure stream bang through an open window into the centre of a peaceful sewing circle of ladies in the basement was promptly resented by the Ladies' Aid, who vigorously rebuked their ardent male protectors. It was a clamping of ardor in two senses. Several residences were sprinkled later, and the women folk of the homes of the Fire Brigade had several criticisms to offer on the subject.

### Farm "Capital Account."

The first of a series of articles on Agricultural Book-keeping, written for the Review by Walter Wright, Commercial Instructor, Okanagan College.

On Tuesday night of last week at the meeting of the Farmers' Institute, the discussion seemed to trend a little in the direction of Book-keeping by the lot owners here.

There has been within the past two or three years, a great sentiment expressed by the leading agricultural journals, favoring the adoption by agriculturists of some system of book-keeping that will result in their knowing more definitely just what crops are paying them to raise. For this reason it would appear that a suggestion would be appreciated with regard to how this can be done by people who know to a very limited extent the principle upon which they should base their entries in a set of books.

The first great principle in all commercial enterprises that would govern a set of books, is how to arrange the capital account. Many farmers would be far better off to sell out their place and invest their money at 5 per cent. and 6 per cent., and if they kept a set of books they would see this. They lose track of the idea that the money they have invested has an interest earning value. This being the case let us look at the principle which would govern the practical arrangement of a capital account in connection with the lots here in Summerland.

The first item that would enter in would be the cost price of the land; not what it is worth at present, or what we estimate it is now worth, but what it has actually cost to purchase it. To this we must add from time to time such items of expenditure that are placed against permanent improvements. Just by way of illustration we will suppose that a man comes in and buys a ten acre lot at \$2000, his capital account will then start with an item of \$2000. It costs, we may say, \$1000 to clear, plow, stone, and grade this property for working. This \$1000 would be added to this capital account. We may say that he is on a pressure line of water service, and he decides to pipe or flume the water on to his place, this is a permanent improvement. The cost of pipe or flume, and the labor used to install it, costs \$100. This would be applied against his capital account, likewise he might have other items, such as \$200 for fencing, \$300 for stable, \$500 for horse, harness, implements, etc. He spends a few days' time planting shade trees, making a lawn, and a few other such improvements to the extent of \$100. This then would give him a capital account of \$3600. Here is the money that he has invested in his business. It is upon this that he must make dividends, and in figuring out whether his farm pays him or not, he must take this into consideration. Consequently, if the owner, of the farm we have sighted, can't make an interest of 6 per cent. on his investment, it is far better to sell his place and invest his money in bonds, or else find out just where and how he is losing his money. Only a set of books will enable him to do so.

Next week we will discuss Cost Insurancy in connection with the raising of crops. These crops are the source of his dividends.

### THE PERFECT WOMAN.

A well-known lecturer in the course of one of his addresses said: "There's no such thing as a perfect man. Anybody present who has ever known a perfect man, stand up."

Nobody stood up.

"Those who have ever known a

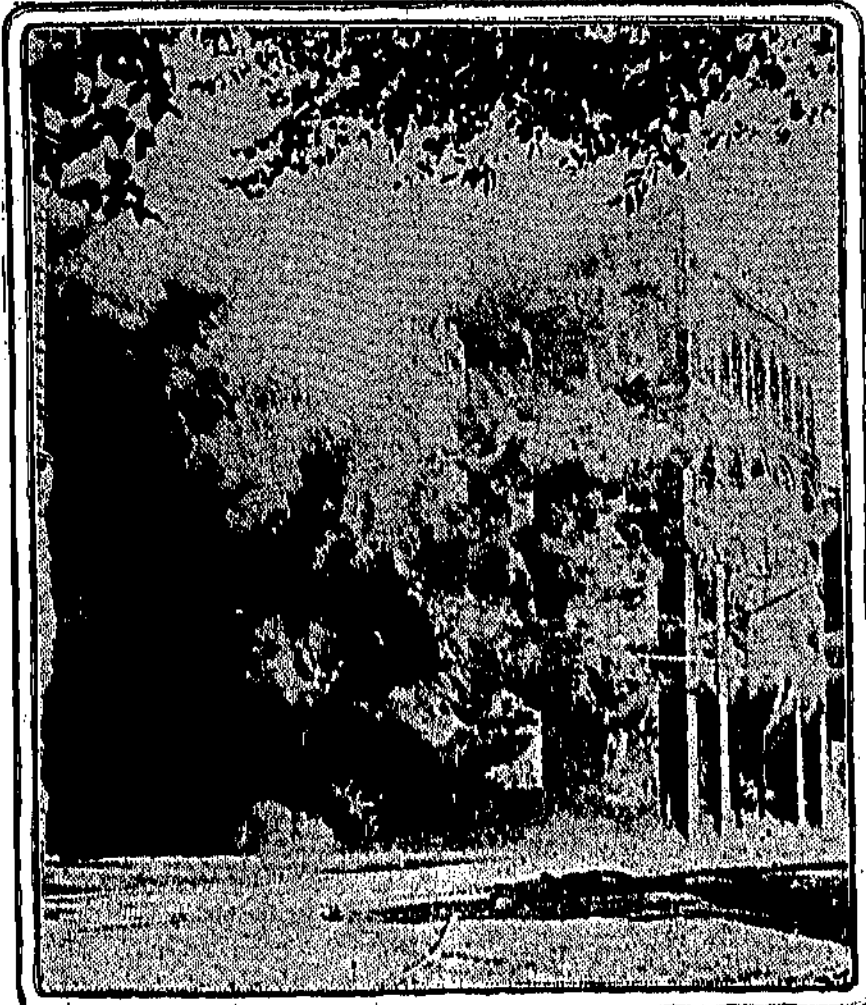

perfect woman, stand up."

One demure little woman stood up.

"Did you ever know an absolutely perfect woman?" asked the lecturer, somewhat amazed.

"I didn't know her personally," replied the little old woman, "but I have heard a great deal about her. She was my husband's first wife."

### The Great Binghampton, N.Y., Factory Fire.

STARTED FROM A CIGARETTE STUB. SEVENTY-FIVE GIRLS PERISHED IN THIS TERRIBLE HOLOCAUST.

Only thirty-eight out of one hundred and eleven persons in the building escaped unhurt. The president of the company attributed the cause of the fire to the carelessness of an employee in throwing a lighted cigarette under a stairway.

**SYNOPSIS OF COAL MINING  
 REGULATIONS.**

COAL MINING RIGHTS of the  
 Dominion, in Manitoba, Saskat-  
 chewan and Alberta, the Yukon  
 Territory, the North-west Terri-  
 tories, and in a portion of the Pro-  
 vince of British Columbia, may be  
 leased for a term of twenty-one  
 years at an annual rental of \$1 per  
 acre. Not more than 2,560 acres  
 will be leased to one applicant.  
 Application for a lease must be  
 made by the applicant in person to  
 the Agent or Sub-Agent of the dis-  
 trict in which the rights applied for  
 are situated.

In surveyed territory the land  
 must be described by sections, or  
 legal sub-divisions of sections, and  
 in unsurveyed territory the tract  
 applied for shall be staked out by  
 the applicant himself.

Each application must be accom-  
 panied by a fee of \$5, which will  
 be refunded if the rights applied  
 for are not available, but not other-  
 wise. A royalty shall be paid on  
 the merchantable output of the  
 mine at the rate of five cents per  
 ton.

The person operating the mine  
 shall furnish the Agent with sworn  
 returns accounting for the full  
 quantity of merchantable coal  
 mined and paying the royalty thereon.  
 If the coal mining rights are not  
 being operated, such returns should  
 be furnished at least once a year.  
 The lease will include the coal min-  
 ing rights only, but the lessee may  
 be permitted to purchase whatever  
 available surface rights may be  
 considered necessary for the work-  
 ing of the mine at the rate of \$10  
 an acre. For full information ap-  
 plication should be made to the  
 Secretary of the Department of the  
 Interior, Ottawa, or to any agent  
 or Sub-Agent of Dominion Lands.

W. W. CORY,  
 Deputy Minister of the Interior.

**Annual Poultry  
 Show.**

If the energy which is being  
 exerted by the directors of the  
 Southern Okanagan Poultry Assoc-  
 iation is any criterion, Summer-  
 land is to have by long odds the  
 best Poultry Show this fall ever  
 seen here. At a representative  
 meeting last Monday evening plans  
 were laid and enthusiastic commit-  
 tees appointed. A secretary to  
 boom the show is to be engaged,  
 and every possible effort made to  
 make it the best ever held in the  
 interior. The directors have de-  
 cided to hold the exhibition in  
 the Empire Hall block, expect-  
 ing, by making the change, to  
 have a much larger local atten-  
 dance.  
 Demonstrations and lectures are  
 likely to be a part of the program.

**Home Portraiture.**

An interesting story of how the  
 abandonment of a business intended  
 for life, to take up a more fascinat-  
 ing line of work, is that of Mr.  
 Ernest J. Rowley, son of our re-  
 spected townsman, Mr. J. Rowley.  
 Educated to follow his father's  
 trade of jeweller, Mr. Rowley dis-  
 covered he preferred photography,  
 and going in for it, found art.  
 Since his plunge he has had a suc-  
 cessful and interesting time, has  
 proved himself an adept at art  
 photography. He has a distinguis-  
 hed connection, and spent four  
 days at the White House, Wash-  
 ington, after the Democratic vic-  
 tory, and was responsible for all  
 the presidential pictures, taking  
 the first and only groups of the  
 new United States Cabinet. As a  
 specialist in home portraiture Mr.  
 Rowley has had among his patrons  
 in Montreal, Lady Montagu Allen,  
 Lady Hibbert Tupper, Lady Shaugh-  
 nessy, and many other society  
 leaders. He gave up studio work  
 long ago, and now specializes as a  
 home photographer, and secures  
 charming portrait pictures of his  
 clients in their happiest surround-  
 ings. Mr. Rowley will be here for  
 a few weeks only, and has decided  
 to do some home portrait work. His  
 advertisement appears in another  
 column.

**British Columbia  
 Apples**

Win Important Awards at Sheffield  
 and Edinburgh.

More honors have fallen to Brit-  
 ish Columbia apples. A cable re-  
 ceived by Sir Richard McBride  
 from Hon. J. H. Turner, Agent-  
 General in London, states, that the  
 biggest awards offered had been  
 won by this province in open com-  
 petition at Sheffield and Edinburgh  
 for a display of apples.

The apples exhibited were select-  
 ed by Mr. W. E. Scott, Deputy  
 Minister of Agriculture, and were  
 grown in different parts of the  
 Valley.

Two carloads of these apples  
 were shipped to England and will  
 be shown not only in competition  
 with other fruit from all parts of  
 the world, but as a special display  
 in the leading cities of Great Brit-  
 ain and Ireland.

The quality of milk a cow yields  
 is due to heredity; the quantity,  
 however, is influenced by her feed  
 and care.

# The Summerland Review

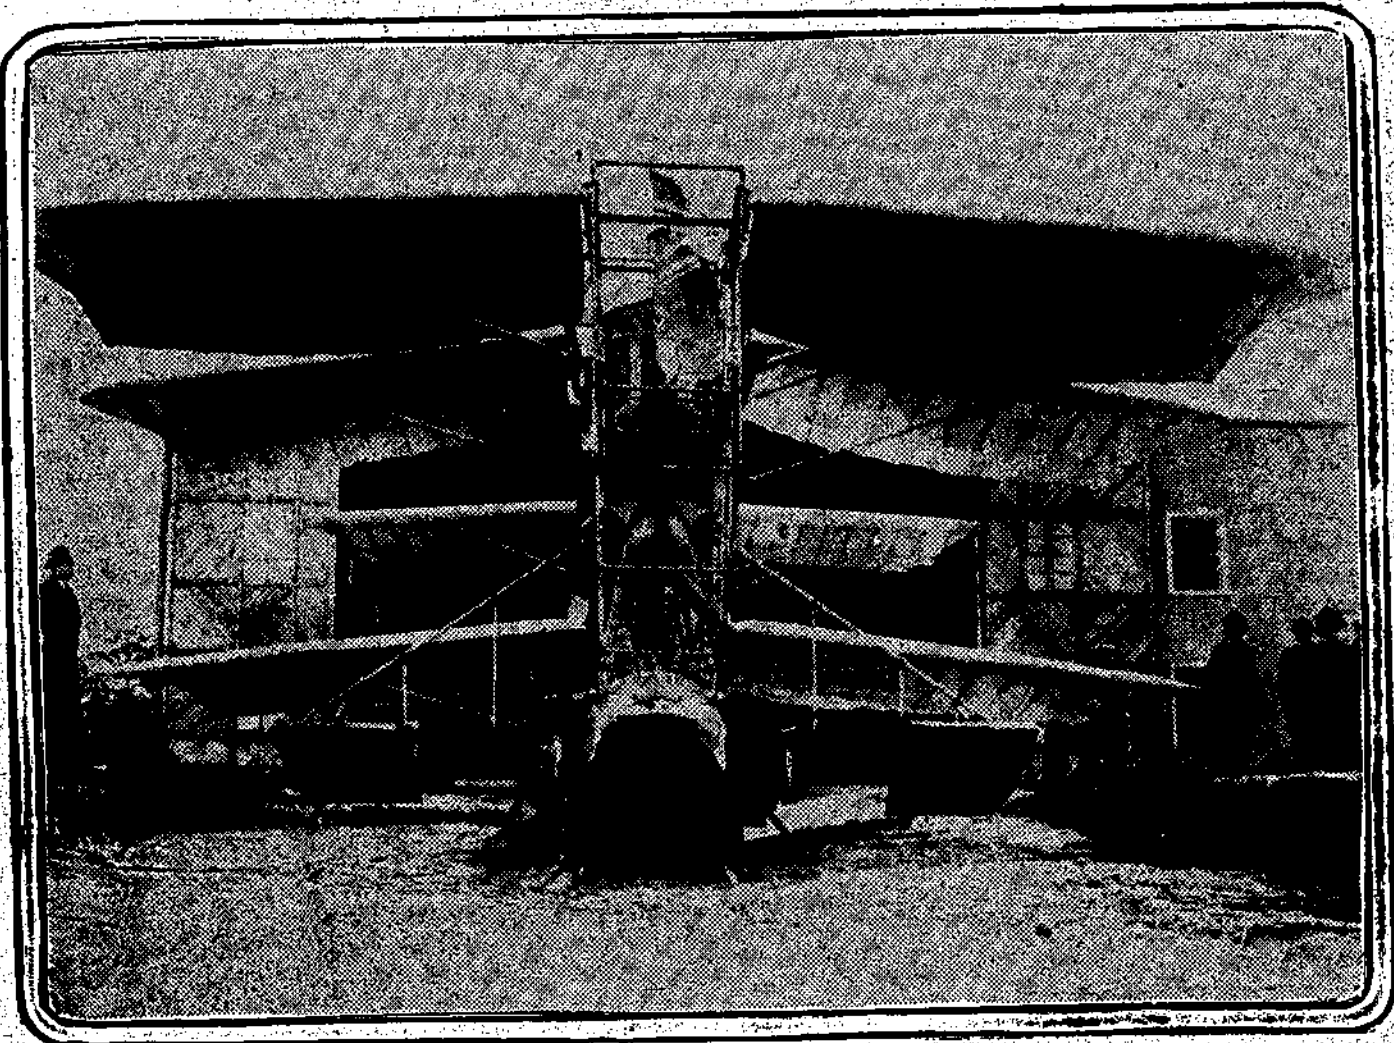

DEVOTED TO THE INTERESTS OF SUMMERLAND, PEACHLAND AND NARAMATA

Vol. 6, No. 18

SUMMERLAND, B.C., NOVEMBER 28, 1913.

Whole No. 278

## New Hydro-Aeroplane Ready For Real Test.

The Batson hydro-aeroplane, built to carry both passengers and freight which has been under construction on Dutch Island, near Thunderbolt, in the neighborhood of Savannah, Georgia, is now ready for a try-out.

To the layman the craft looks a little top heavy, the flying part of the structure being the height of a man's head above the boat body. There are twelve wings. Eight

are arranged about the upper work, four on each side, while the other four are immediately above the decks of the boat body. The craft, the inventor expects, will skim along the surface of the water at sixty miles an hour, and in the air be able to maintain a hundred miles an hour. Three powerful engines have been installed. The crew will consist of six men beside the pilot. The vessel is equipped

with wireless telegraphy. The great propellers are arranged in the central part of the machine fore and aft.

Captain Batson will give the craft a thorough tryout in local waters before attempting any long flights. Captain Matthew Arlington Batson, U.S.N., retired, is the inventor of the machine. He organized the first Philippine Scouts.

## Minister Will Open Show.

Valuable Prizes And Cups Will Be Awarded.

Hon. Price Ellison will open the Southern Okanagan Poultry Association's big show which is to be held here on December 30 and 31st. The Minister's acceptance of the invitation is now in the hands of the secretary of the association.

J. R. Terry, well, and favorably known as one of the leading poultrymen in the West, will also attend the show and will give illustrated lectures, dress poultry demonstration, etc.

The association has been most fortunate in securing the services of Wm. Coates as judge. Mr. Coates has judged at the local show on two previous occasions. Last year he was in the employ of the American Government, getting \$100 per show, and will be one of the judges at the Panama Exposition, San Francisco.

A large list of cash prizes and a number of cups and special prizes will be awarded. Provincial Championship badges will also be awarded in the various classes. The prize lists are now in the printer's hands, and will be issued soon.

There will be ample accommodation for the birds, and those coming from outside points will be given the best of care. The show will be held in Empire block, which is considered particularly well adapted for the purpose.

The show will be under excellent management, and the organization has a fine system for handling entries and keeping records. The exhibitors will greatly facilitate the work by making their entries early.

## BIRTHS.

GARTRELL—At the Hospital, on Wednesday evening, November 26, to Mr. and Mrs. George Gartrell, a son.

WEEKS—On Sunday evening last, November 23, to Mr. and Mrs. J. Weeks, a son.

## Contract Awarded.

The Federal cabinet on Tuesday let the contract for the building of the new public wharf for Summerland. Andrew McConnell, whose bid was \$12,265, was given the award. It has been current rumor that some of the bids from local contractors were below this figure. Direct confirmation, however, has not been obtained.

## Sad News.

The friends of Mrs. H. C. Howis have heard with the sincerest regret and sympathy of the death of her sister, Miss Ruby Tiffin, which has just taken place at Cocker-mouth, Cumberland. News of Miss Tiffin's serious illness was received a fortnight ago, and on Tuesday cable advice reached Mr. and Mrs. Howis that she had passed away at her home.

Miss Tiffin, who was resident here with her mother for three years, had many friends in Summerland, where she was held in the warmest esteem and the sad news has been sorrowfully received by them.

The most heartfelt sympathy is expressed in the town, both with Mrs. Howis and with Mr. Gilbert Thornbor, who sailed from Montreal only on Saturday last in the hope that he might reach the home of his future wife's parents before the end came.

## Five Medals For B.C. Apples

London, November 24.—The British Columbia Government has won gold medals for its apple exhibit at five fruit shows in England, the latest being at Chester and Ipswich.

A carload of household effects, the property of J. R. Conway, was sent up to Vernon last week. Mrs. Conway will remain here for a short time.

## FARMERS DISCUSS LIVESTOCK.

CAUTION ADVISED. FIGURES GIVEN.

## Jam Factory Manager Given Evening.

Evaporating And Vinegar Making Also Brought Up.

A shower, with its attendant darkness, which came up on Tuesday evening just about the time of the meeting of the Farmer's Institute no doubt kept some who intended being present from attending that meeting. The forty members present were much disappointed by the absence of Dr. Lipsett, who was to give the principal talk of the evening on the subject of "livestock." The evening, however, was fully occupied by a discussion of business matters and in listening to addresses of several members on timely topics.

The meeting decided to ask that two packing schools be held during the winter, and that applications of intending pupils be in before January 15.

Secretary Tait reminded the members of the prizes offered for field competitions, and urged that a competition be opened. He also made mention of the coming poultry show, and suggested that all members having poultry select their best birds for exhibition. There are many fine birds now to be found in many orchards.

## A LOCAL MARKET FOR SMALL FRUITS.

President Hilborn, who was in the chair, after expressing disappointment in the non-appearance of Dr. Lipsett, who had been called to Naramata during the afternoon, and had found it impossible to return till the following morning, said he had been called on personally by the manager of the Jam Factory, and had been given some interesting information with reference to this local industry. Mr. Hilborn said the manager was desirous of knowing just to what extent local growers intended providing the factory with small fruits, etc. The speaker stated that such a home market is an excellent thing, and should be cultivated.

He thought the possibilities here for an evaporating plant were excellent. The fruit that would be furnished for evaporation was superior to that supplied similar plants in the East. Windfalls and other apples that would otherwise be refused could be utilized. Even skins and cores are evaporated and sold, for making apple-wine, etc. A jam factory and evaporator are good things for any fruit growing district, and should yield good profits. "If younger, and not so lazy," Mr. Hilborn declared that he would seriously contemplate building an evaporator and vinegar factory as a business venture.

After listening to Mr. Hilborn the Institute decided to set apart an evening for Manager Garnett of the Okanagan Jam Company, which will probably be the evening of January 9th. December's meeting will be "Resolutions Meeting." Messrs. Mellor, White, and Caldwell were appointed a committee to receive resolutions or suggestions from members and put same in proper form for discussion at that meeting.

## H. C. MELLOR ON LIVESTOCK.

The chairman called on H. C. Mellor to give a short talk on his

experience with live stock. Mr. Mellor promptly responded in an interesting report of his experiments with hogs and the keeping of a cow. He cautioned members not to make stock a too important part of their work. Fruit will always be the big thing, and he believed that some orchards in a few years will not bother with stock at all, while others will continue with a few. If members don't know much about stock (referring particularly to hogs), and do not grow plenty of feed, the speaker urged that they go carefully. His experience in keeping a cow was that it was a very nice thing to have, but he believed could not say that it was a great revenue producer. He believed, however, that with a good cow a profit of \$1.25 per day net could be had even at the present price of feed. Barnyard manure was a very valuable thing in the orchard, and should be considered in the question of keeping livestock. If one must buy all the feed for hogs, the speaker advised keeping out of the business. If, however, fifty per cent. of the feed can be grown, that proportion of the price of the dressed hog would be had in return. With suitable soil and plenty of alfalfa, the results would be even better. If it became the practice to keep a few pigs in each orchard, Mr. Mellor recommended that some local organization do the curing, and thus save the heavy expenditure Summerland now incurs for its

bacons, hams and lard. With his experience, he was satisfied that there was good money in poultry. One should breed only from the good layers and look after his flock. At least \$1.50 per year per bird profit could be had.

OTHER EXPERIENCES WITH STOCK.

Mr. Hilborn gave some of his experience with hogs in the East, stating that he had engaged in livestock solely for the purpose of having the manure for his garden work. His hogs ate up the waste and did well after a few weeks on tomatoes and later with melons, growing well on the former and fattening with the latter. He urged, however, that this district was specially adapted to fruit, and this should be kept chief. It was advisable to keep a cow or two to provide the household with milk.

He had never seen as good a district for poultry keeping as this. It was necessary to cull all along the line, and Mr. Hilborn again took the opportunity to urge culling the unprofitable trees in orchards.

As one long experienced in livestock, Mr. Thomas Dale was asked to make some remarks, and in his short talk threw out some very valuable suggestions. Conditions here, he said, made this place particularly adaptable to fruit growing, and if the people are as well adapted, they will succeed in that line. Mr. Dale foresaw the possibility of cows that were naturally good milkers not proving such here.

[Continued on Page 8.]

## St. Andrew's and Caledonian Society.

### St. Andrew's Day Celebrations.

The festival of the patron saint of all good Scots, St. Andrew, is being faithfully observed by the loyal sons of Northern Britain, whose homes are here. St. Andrew's Day, being Sunday, November 30th, the Caledonian Society are attending a special service in St. Andrew's Church in the evening.

To-night the national day's merry making will take the form of a Social Gathering in the Campbell Hall, invitations for which have been sent out. A most enjoyable program is anticipated.

On Friday next, December 5th, at eight o'clock in the evening, a meeting of the Society will take place, when members will gather to form a Mock Parliament, for the discussion of current political topics. The public are invited to attend this special meeting. The Mock Parliament will have its sittings every alternate Friday from henceforward.

## WOMEN'S INSTITUTE.

The demonstrations given by Madame Grohe on scientific dress-making and cutting by chart form the interest of the Women's Institute this week, and many local ladies are busy morning and afternoon at the Men's Club room. Madame Grohe is a very clever and painstaking teacher, and her lessons are proving very valuable. Next week the classes will be at the Flat.

The meeting of the Institute in the High School rooms last Friday was a largely attended one, between fifty and sixty members being present. Business occupied the greater part of the program, and the principal subject for discussion was the formation of a separate Institute for the residents on the Flat. It was finally decided that the Institute as now formed should be divided into two organizations, one for the Lakeshore and one for the Flat. No definite formation was drawn up, and the officers and committee, etc., are to be elected later. Mrs. Geo. McLaren was appointed provisional treasurer, and steps for the formal organization will be taken immediately.

## GIRLS' BASKETBALL CLUB.

On Thursday next, December 4th, at eight o'clock, a meeting has been called in the Ladies' Parlor of the Methodist Church, by a number of young ladies of our town to arrange for the immediate organization of a Girls' Basketball Club. The suggestion was made by one or two who felt that some such opportunity for healthy fun was badly needed this winter, and has been enthusiastically taken up. All girls who are interested are asked to attend and enter heartily into the scheme for making the Club a working success at once. The Club is an excellent idea, and will probably form the nucleus of quite an important and useful social society.

A committee and officers will be elected on Thursday, and a program of practices and games drawn up for the season.

## METHODIST SERVICES.

Special services will be conducted in the Methodist Church on Sunday next, November 30th, as follows:

The preacher at the morning service at 10.30 will be Principal A. M. Sanford, B.A., D.D., of New Westminster. Dr. Sanford's work in Vancouver is well known amongst British Columbia Methodists, and his appointment to the principalship of Columbian College was extremely popular.

The evening service will be conducted by Rev. R. W. Lee, while the sermon will be preached by Rev. F. W. Pattison.

Rev. R. W. Lee wishes to state that the services announced to commence at Prairie Valley on Sunday next will, owing to unforeseen circumstances, commence on Sunday, December 7th.

## TRY IT AND SEE.

Every time you go to town And start to throw your money 'round; Say, home made goods are the stuff for me Because they spell pros-per-i-ty. The dollar you send to the Eastern store Says, "Good-bye, Bill," for evermore, But the dollar you spend in your Western town Keeps comin' and comin' and comin' aroun'.

## EVANGELISTIC SERVICES.

Evangelistic services will be held in St. Andrew's Church every night except Saturday, beginning next Monday, December 1st. The meetings will last for two weeks. On Monday evening there will be a Song Service. On Tuesday evening Rev. J. R. Henderson of New Westminster, will preach. For the balance of the week, Rev. Ferguson Millar of Penticton will be the preacher. Alexander's great gospel hymns will be used. Excellent music will be provided. Song service every night, beginning at 7.50 o'clock. Everybody welcome.

## OUR FLOWER GARDENS.

The Editor is exceedingly grateful to Mr. John Tait for a beautiful bouquet of roses handed him on Thursday afternoon. It served as a most acceptable apology for his late arrival for dinner that night. The roses were of the Duke of Edinburgh variety, bright scarlet in color, and were grown in Mr. Tait's garden. The plants have had no particular care or attention for weeks. To-day Mr. Tait is picking some ten roses of the "Winnie Davis" variety, of very dainty color.

A beautiful bouquet of roses was brought across the lake this week by Mrs. J. Rowley. These were gathered in Mr. Wolstencroft's garden.

## HOUSE-BUILDING.

Carpenter work on Municipal Clerk Logie's new home is being pushed forward rapidly, and the frame is now up and boarded ready for outside finish.

The barn built by D. L. Sutherland on his orchard beside the high flume is now completed and work on his house is progressing satisfactorily.

F. J. Nixon's new house has also taken shape and the exterior work will soon be finished.

Mr. and Mrs. Hall will soon have their new cottage on the Fulton lot ready for occupancy.

Messrs. Nelson Bros. have now completed the bungalow built for Mr. and Mrs. Harold Rivington, who are already in possession of their new home.

D. H. Watson returned on Tuesday night from a trip to the Coast.

The Summerland Development Co. NARAMATA B.C.

## Alfalfa

Alfalfa is the king among the hay crops. It comes nearer to giving something for nothing than anything else on the farm. It will produce more hay per acre, and hay of a higher feeding value than timothy, brome grass, or western rye grass. While giving that valuable crop of hay it will at the same time leave the soil richer in nitrogen and humus every year that it occupies the land. It supplies the very things that the grain crops take out the fastest and leave the soil in the greater need of. Still the whole story is not told, as weeds cannot grow readily after the alfalfa gets a good stand, and if they should grow a little the alfalfa is cut before the weeds are ripe so they cannot go to seed. The roots go deep, and so open up the soil better than the subsoiler.

The one disadvantage in growing alfalfa is that it is a little difficult to start; so when a good stand is secured it ought to be left for several years. It is not a good rotation crop like clover. This is really no great drawback, as it will produce a crop that is worth more than any other crop that can be grown.

Where will alfalfa grow, and how should it be started? Alfalfa will grow on any good soil that is well drained, in sand it will not do so well, and hard pan interferes with its root growth. Standing water is death to it. When starting alfalfa it must be kept in mind that alfalfa has bacteria living in nodules on its roots. These germs furnish the plant with nitrogen which they take from the soil air. They put it into a form that the plant can use, and so supply the alfalfa with the nitrogen that it needs and more too. The alfalfa plant has in a measure lost the power of taking nitrogen from the soil as the other crops do, so it cannot make much growth alone. It in turn furnishes the germs with food of a different kind, so it is a co-operative affair, each furnishing that which it can secure the easiest.

When the alfalfa is starting it does not have the germs on its roots, and so is very delicate and must be given good care. The germs will multiply faster in the soil if it contains manure, and if the germs are not in the soil it may be necessary to introduce them. The best way to do that is to get some soil from a field that has been growing alfalfa successfully for a few years and sow it on the new field at the rate of 200 pounds per acre.

The best way to prepare the soil is to manure for a crop of corn—clean cultivate the corn—then sow the alfalfa on the disced corn stubble, putting in eight to ten pounds per acre—and with the drill so as to get the seed buried, one or two inches—do not sow any nurse crop with it. A bare fallow that has been kept free from weeds will also be a good preparation, as will also potato ground. But in any case it should be manured.

When the alfalfa is up eight to ten inches it should be cut back. This will not hurt the alfalfa; in fact will do it good—but will be hard on the weeds. Prof. Shaw recommends harrowing the alfalfa when it is up five to six inches. This will kill weeds and remake the dust mulch. When sown with the drill the plants will be so deeply rooted that it will not pull out many plants if the harrow teeth are set with a backward slant.

The amount of seed sown should vary with the rainfall; under irrigation, or where the rainfall is abundant, more seed than specified above should be sown. It was found at the Dickinson sub-station that where the plants were nine inches apart three cuttings were secured, and the yield was nearly two and a-half tons, while where the plants were only two inches apart only one cutting of about half a ton was secured. In digging out the roots it was found that where the plants were far apart the roots went down seven to eight feet, while in the case of the plants that were close together the roots did not go down more than three feet. Another important point is to have a good covering on the field in the fall to hold snow.

The best seed to sow is that which is northern grown. The Grimm has proven to be one of the most hardy strains. However, seed that is northern grown is in itself an evidence that it is hardy.

The alfalfa is not a pasture plant. It will not stand pasturing well, and cattle and sheep very easily blout on it. It is, however, an ideal pasture for hogs. It will likely last two or three years under such treatment.

In starting alfalfa better start on a small patch and learn how to do it before experimenting on a large field. Use plenty of manure. Plant on corn, potato or summer fallow ground. Introduce the germs. Sow without a nurse crop. Do not use too much seed. Remember that the alfalfa is delicate till it gets its partner on its roots—look for the nodules. — W. C. Palmer in Dry Farming.

## Peachland Notes.

Miss M. L. Pryor spent Friday in Kelowna.

Miss Irene Elliott and Miss Ethel House were visitors to Kelowna on Thursday.

Mr. Robert Howell, of the steamer "Okanagan," spent the week-end in town at the Hotel.

Mrs. Albert Smalls and Master Sidney were guests of friends at Penticton for a couple of weeks.

The Water Commission sat here all day Friday. Several parties from Westbank and Kelowna were present also.

Peachland is becoming lively. A few days ago two young people mysteriously disappeared. Query—what does it mean?

Mrs. Ernest Pratt, of Vernon, spent the early part of the week at the home of her parents, Mr. and Mrs. William Moore.

Mrs. Ed. Lang and Miss Gwendoline returned on Monday evening to their home here, having spent the summer months in Manitoba.

Miss Wolf spent Monday in town, rustling subscriptions for her paper, the News-Advertiser, of Vancouver. As an increasing inducement to subscribers to the daily paper, a set of maps was given.

Thimble Teas seem to be the order of the day. On Monday another was held at the home of Mrs. Dorland, in honor of her guests, Mrs. H. Cossar and Mrs. William Dawson, who left for Penticton the same evening.

Mrs. A. N. McCutcheon, Miss Eva McCutcheon, and Mr. Smith, who have been guests of Mr. and Mrs. A. Town for about three weeks, left this morning for California. They expected to meet Mr. McCutcheon at Sycamorus.

A delightful time was spent on Friday at the home of Mrs. Town, when the younger portion of Peachland's ladies gathered with their workbags to spend a few hours with Miss Eva McCutcheon before her departure for San Diego, California.

Mr. C. C. Inglis left on Monday morning for the Kootenay, where he has accepted a position as clerk. Owing to throat trouble he was forced to resign from the ministry of the Presbyterian Church, which regrets to lose him as a harvester in the field of the world.

On Tuesday afternoon was held the last of the classes conducted by Madame Grohe, the instructress of the Anglo-Parisian system of drafting, cutting and fitting dresses. As a slight token of their appreciation of her services, the ladies of the Institute served afternoon tea in her honor. A couple of hours were spent with her in a social way before it was time for her to take the boat for Summerland.

## BURYING CHEMICAL FERTILIZER.

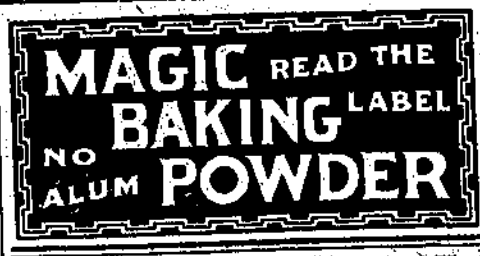

It has heretofore been customary in applying commercial fertilizer to fruit trees to spread the fertilizer on the ground at a certain distance from the trunk. This method is rather unsatisfactory because the fertilizer is slow to penetrate into the ground, and its action is therefore delayed in taking effect.

A French scientist has been making experiments in which he buries the fertilizer in holes made with an iron rod having an expanded point. In order that the roots may not suffer injury from the caustic action of the fertilizer it is necessary that it be mixed with crumbled earth. From four to six holes are made, placed about a foot from the trunk. The depth of the holes is increased along with the growth of the tree.

This method has been found to produce remarkable results—trees of five years' growth, thus treated, attaining the development of other trees at twelve years.

**SHILOH** CURES COUGHS & COLDS

The value of some British Columbia mines not yet developed is indicated by a legal action that has been started to secure the payment of a \$100,000 bond on the Silver Creek group of claims in the Bulkley Valley, near Smithers. There are immense mineral deposits, chiefly silver, lead, coal and copper, in the northern interior awaiting development.

Opportunity is laid behind. Unless you grasp it by the forelock, it is gone forever.

## Farm "Capital Account."

The first of a series of articles on Agricultural Book-keeping, written for the Review by Walter Wright, Commercial Instructor, Okanagan College.

As stated last week the interest that is to be made on the invested capital must come from crops raised, and on the gain only that is made on these crops. Therefore we must know how to figure our gains, we must be able to calculate exactly or nearly so the cost of raising these crops, and deduct this from our returns. We will take one crop as a basis. We can make it very intricate, but it is preferable that we make it practical, and avoid unnecessary complications. Let us take an acre of tomatoes as an example. With this as with all other crops, if the cost of growing an acre is found, it can be taken as a basis for succeeding years, if conditions are at all average. The items of cost will be, applications of fertilizer; its cost and time taken to apply it; the plowing of the land, whether fall or spring; the cost of growing plants or cost of plant if bought. Of the irrigating rates this acre should be charged with its proportion of the rate. (This applies also to taxes). If we take the time used by the man and horse running out the furrows, and looking after the water for once or twice during the season, then we can charge against the tomatoes this amount of time for each irrigation, and we should charge at the same rate as we could hire the work done, unless we know exactly what it costs to keep a horse for a year, and wish to figure on that basis. If we time the hoeing once or twice, then we can charge this against the account at the same rate each time that it is done. All that is necessary is to jot down the date on which the hoeing is done, and at the end of the season we know exactly the amount we should charge against the crop for hoeing.

The carting of the crop to the packing house or shipping station should also be charged, and is generally one of the items overlooked. This can be figured out on the same basis as the hoeing or cultivating, and once or twice, timing of this is all that is necessary. The cost of marketing should be considered and charged against the crop, and it is astonishing what investigation here reveals. On a London, Ontario, market, this summer, it was found that some farmers paid more than a quarter of their returns to market their goods—having no railroad charges). One—and an average one—spent seven hours with a team paid 60 cents, and sold his load at \$5.25. Co-operation to put out bigger loads would solve that kind of error.

We must know the cost before we can know our gain, we must know our gain before we can know if our investment is good.

Next week we will see how easy and practical it is to get the cost figured out.

# What Every

## Woman Knows

The groceries sold at this store are, quality for quality, the cheapest you can buy in the town.

## ANY of your neighbors will tell you that. We made it

a rule when we commenced business—and have rigidly adhered to the rule ever since—to give you the top market value for your money, even if we occasionally lose ourselves. That you appreciate this is shown by the way our trade is growing—and by the selectness of our customers. You are missing a whole lot if you do not come into this store and look at our quality and prices.

## Gardens Of A Quebec Consolidated School.

This picture represents a beautiful school garden in the province of Quebec. Modern educationalists realize that the training of the young should not be confined to books. Work in the open air is not only healthful, but stimulates the children's interest in nature's wonderful life processes. Parents should insist that more attention be given to this phase of educational work in our own schools. Manual training and domestic science, though very valuable, are not as strong factors in bringing out the best that is in the child, as is the caring for nature's own, and assisting in its development.

## Cleanings from Review of Five Years Ago.

The fruit crop of 1908 has now been practically all marketed. Probably the least said about the way it has been handled the better. The trouble did not occur at the point of shipment, the local exchanges doing their work in a thorough manner.

There is at present a project on foot for the establishment of a cannery by the Summerland Fruit Company, the site having been already purchased.

A pretty wedding took place at the home of Mr. and Mrs. George Graham on Wednesday the 25th, when Miss Alice Holder was joined in the holy bonds of matrimony with Mr. Magnus Tait. Rev. James Hood officiated. Miss Chrissie Tait, a sister of the groom, acted as bridesmaid, and Mr. Alex. Staven supported the groom.

Summerland Oddfellows held an organization meeting on Tuesday evening, when final arrangements were made for the institution of a branch of the order.

NARAMATA.—Mr. H. J. Wells of Battle Creek, Michigan, has been the guest of Mr. and Mrs. Gillespie during the week.

Capt. J. Niblock, Supt. of the Western Division of the C.P.R. from Winnipeg to Calgary, and a party of friends, were the guests of Mr. J. M. Robinson during the week. The captain bought a large block of land when here last spring.

Copy for change of contract advertising must be in the hands of the printer not later than Wednesday noon to insure publication in the next issue.

In accordance with schedule of prices adopted throughout the valley, charges for advertising are now being made weekly. Heretofore when five issues were made in one month the result was a loss. By the new method customers are charged each week for just the amount of space used.

FRIDAY, NOV. 28, 1913.

### LIVE STOCK AND FRUIT.

Live-stock has been a general topic of discussion for many weeks, and whenever you will find a group of fruit-growers you can safely gamble that the question of live-stock will be discussed before they separate.

The Review looks upon the question as one of a great deal of importance, and practically every week for a number of weeks more or less space has been given to this question. Last some readers conclude that the Review looks upon the live stock industry as of greater value to Summerland than fruit growing we wish to again state our views on the question.

The Review never had more confidence in the fruit industry than at the present moment, and is also satisfied that there is no better district for the industry than our own. The business of fruit-growing and marketing has not, however, attained to that degree of perfection which is essential to success in its fullest form, and it never will until there is a considerable change made in the present methods. Happily, we believe, our growers are now facing in the right direction. The growing and marketing of fruit is not dissimilar to a manufacturing business, and the sooner we, as fruit growers, adopt the methods of the manufacturer the sooner the goal will be reached.

It has often been said that the big meat packing houses of America, centred in Chicago, make nothing on their beef, pork, etc., and that were it not for the economical utilization of the by-products, beef, and pork would need to be sold at much higher prices to enable the giant corporations to pay a profit on their capital. The fabulous earnings of these concerns is derived from the manufacture of the by-products of the slaughter house.

If the dairyman skimmed his milk, sold the cream, and threw the remaining portion away as waste matter, his practice would be but little worse than the method largely in vogue in the marketing of our orchard products. The best of the peaches, apples, etc., are exported. The culls, which have cost just as much to produce, are waste. To utilize this and other waste or by-products of the orchards so as to yield the best returns is the problem that must be solved. Other valuable by-products such as may be produced on vacant or otherwise waste land must also be considered. Under this heading would come alfalfa and other fodder crops, and some cover crops. While evaporators and vinegar factories, canneries, and jam factories are all valuable adjuncts of the orchard, it would seem that the "porker" is equally essential, and there is the advantage of an ever ready local market, and an almost unlimited market in this province for pork products.

Poultry as a means of utilizing waste, and a provider for the table, also has its place in the orchard. The cow, too, is scarcely less essential.

By no means to be overlooked is the opportunity these give of maintaining the fertility of the soil. For this purpose nothing equals the barnyard manure.

Fruits, and tree fruits at that, will always be our chief source of revenue, but the domestic animal will greatly aid in bringing the industry up to its best and maintaining it at that point.

### TO START SPORTING CLUB.

On Thursday, December 4th, a public meeting will be held in the Campbell Hall West Summerland, at eight o'clock, to discuss plans for the formation of a Sports Club.

It is proposed that a large room or hall shall be hired for the purpose of carrying on boxing, wrestling, fencing, etc.

A committee has been appointed to make enquiries about a hall, initial expenses and other details. All those interested in the furtherance of such a sound scheme are earnestly requested to be present.

While taking some flashlight photographs on Tuesday a sudden explosion of the apparatus inflicted bad burns on Mr. C. H. Cordy's left hand.

Rapid progress is being made with the line contract work for the Summerland Telephone Company. Practically all the holes are dug, and more than three hundred of the four hundred poles prepared have been set. Another carload of two hundred is expected daily and will be placed as rapidly as possible.

A pleasant social evening took place among the members of the Baptist Young People's Bible class at the residence of Mrs. A. B. Williams, Peach Orchard, yesterday evening. The gathering was called to plan a program for the Christmas Sunday School Social. After business was disposed of music and games were indulged in and light refreshments served.

### BUSINESS BRISK.

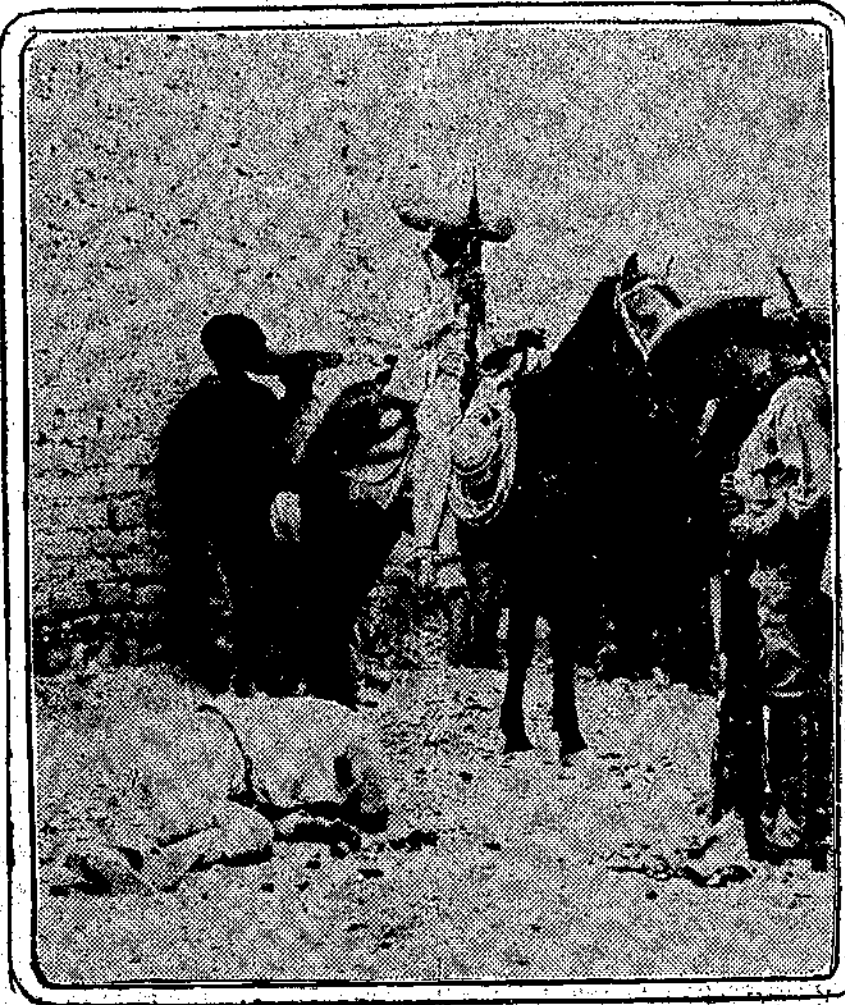

There does not seem to be a busier establishment anywhere in town than that of C. N. Borton. For weeks his staff has been particularly busy installing heating plants, plumbing, etc. Among the work just finished is plumbing for T. J. McAlpin, plumbing in the new cottage built by W. C. Kelley, and now occupied by Mr. Mott, and heating and plumbing for J. H. Bowring. Mr. Borton has just been awarded the contract for hot water heating and plumbing for the Cordy Hotel. The heating plant will be modern in every respect, and there will be baths with separate toilets on each floor. Another contract just closed is for the heating of R. H. English's home.

One thousand boxes of apples and pears were shipped by a Vancouver house this week to Australia by the R.M.S. "Niagara."

The total shipment of the Okanagan will this year be approximately 1,800 cars, with an estimated value of about \$1,850,000.

The death of Inspector of Indian Agencies T. J. Cumiskey occurred last Friday at Vancouver, following an operation performed in St. Paul's hospital. His death is directly due to a strain caused by lifting when one of the autos which toured the Valley recently with the Indian Commission became stalled on the road.

### Federal Officer Shot As A Spy.

The peremptory execution by a rebel firing squad of a federal officer who tried to escape the capture of Juarez, Mexico, last week, by General Pancho Villa, the Carranza leader. The federal officer endeavored to make his escape disguised in civilian's clothes. Things are done with despatch in Mexico. Following his capture, and establishment of his identity as a federal officer, he was promptly lined against the stone wall, shown in the photograph, and shot to death by the soldiers, seen at the left, under command of the rebel officer shown on horseback.

Rules of war, seldom observed in Mexico, by the way, made the victim of the firing squad a spy. Caught within rebel lines, a federal officer, not in uniform, becomes a spy, and as such, is given little consideration or mercy. A drum head, or field court-martial is held, and within a few minutes after the convening of the court, the spy, blindfolded, is backed up against a wall and shot.

It is understood that the cottage vacated this week by Mr. and Mrs. Robbins has been rented by Will Grieve and his mother, who will move in at once.

We are glad to learn that Mrs. Conway is recovering from a serious attack of "grip," which in the middle of last week turned to pleurisy. The invalid hopes to be out and about in a few days.

The St. Andrew's Society of Summerland and district will observe the national day by attending divine service in a body at St. Andrew's Church, on Sunday evening at seven o'clock.

The C.P.R. tug "Castlegar" grounded last Saturday morning on the bar near the car slip. Two calls were given the "Okanagan," then approaching Naramata, for assistance. The passenger steamer replied to the second call, and gave the necessary aid on arrival here. The government dredge has been at work deepening the approach for some time, but the steady lowering of the lake offsets the progress made.

The first government-owned and government-operated elevator at the head of the lakes, and which is the first of the system to be built by the government, is now in full swing, and receiving commercial grain. It is pronounced by experts to be the best equipped and most modern grain handling house in the continent. The elevator has a capacity of 3,250,000 bushels, approximately 8,000 cars.

Get one pound of raisins for ten cents at A. B. Elliott's. ad

Miss M. Clay and Miss Dorothy Harrington droye down to Penticton yesterday.

Mrs. Wm. Kerr and Miss Kerr, who have been on a visit to Vancouver are expected home next week.

A very painful accident happened this week to Clarence Elsey, who sustained a broken wrist by the falling of a heavy log.

The regular monthly meeting of the W.C.T.U. will be held at the home of Mrs. T. J. McAlpine, on Monday, Dec. 1st, at half past two.

We are glad to note that Professor Moore who has been suffering from a severe chill and loss of voice has now taken a decided turn for the better.

Rev. F. W. and Mrs. Pattison celebrated the American Thanksgiving Day yesterday (Thursday) by entertaining a party of friends at the parsonage in the evening.

Portraits for Christmas—Last year many were disappointed by leaving it too late. It takes at least two weeks to finish portraits. C. P. Nelson, the Photographer in your town.

Rev. R. W. Lee, who preached at the Sunday morning service of the Vernon Methodist Church last Sunday, visited Armstrong on Wednesday and is returning from that place by to-night's boat.

Miss Clubb of Vancouver, who is spending the winter here, entertained a small party of friends at her home on Tuesday evening, music and games making a most enjoyable program.

Mr. and Mrs. A. G. Simms, who have been living in the Steven tent houses, Shaughnessy Avenue, have removed to the cottage recently vacated by Mr. and Mrs. Jack Conroy. The latter are now residing at Vernon.

We have to congratulate Mr. and Mrs. Magnus Tait on the fifth anniversary of their wedding-day last Tuesday. They spent the day in a pleasant trip to Meadowland, driving out to visit Mr. and Mrs. Munro there.

Contractors are still looking the two Kettle Valley routes over on a second tender said to have been called by President Warren. A few days more ought to see actual work begun on the five mile section.—Star, Princeton.

The monthly social of the Baptist Church is being held to-night at the Parsonage by invitation of Rev. F. W. and Mrs. Pattison, instead of as usual in the church. This will be the last social before the departure of Mr. and Mrs. Pattison.

What might have been a very serious accident befel Mr. Bentley of the Bank of Montreal on Sunday night. Riding rather fast in the dark a jagged tree branch struck him on the eye, inflicting a nasty wound on the lower lid. It was a narrow escape enough of losing an eye.

Are you giving a whist drive, Christmas party, children's party, or Christmas tree during the forthcoming festive season? Daintily printed little programs, or invitation cards would give just the right little touch of distinction to your party. Why not let the Review print some for you?

The Board of Investigation of the Provincial Water Branch, Department of Lands, held further sessions at West Summerland on Saturday last. The Board was occupied for the most part in probing the water records held by the municipality. Mr. Norrington, District Engineer, was also here. The party came up from Penticton by automobile during the morning.

A meeting of the shareholders of the Summerland Fruit Union will be held on Tuesday evening, December 2nd, at 7.30 o'clock, in the Men's Club, Summerland. The relation of the Union to the livestock question will be considered, and Robert Robertson, manager of the Central Selling Agency, will be present, and give some account of the year's business, and also an account of his visit to the Fruit Grower's Conference at Spokane. G. J. Coulter White, President. a.

Shiloh The family remedy for Coughs and Colds. Small dose. Small bottle. Best since 1870

WANTED—To buy, grain sacks. T. B. Young. d5

Mr. F. Gibbs of Upper Trout Creek left early this week for a visit to the Old Country, going via Chicago.

Among the number of local people who are booking passages for the Old Country is Mr. T. Hocking, who will leave early in December.

Inspector Simms has returned after spending some weeks inspecting nursery stock at Grand Forks and Coldstream. At both places a large stock has been cellared.

A carload of fine apples was dispatched to the Old Country yesterday by Mr. Alex. Stevens and Mr. Alex. Steuart, just in time for the Christmas festivities in the "home-land."

Calendars, Views, and Post Cards for Christmas will be ready the end of November. These sell very quickly, so do your Xmas shopping early. C. P. Nelson, the Photographer in your town. tf

Mrs. A. Harkness, who has given five sons to the Gospel ministry, is seriously ill at the home of her son, D. B. Harkness, Winnipeg. She was on her way to Chicago when stricken down.—Western Outlook.

Mr. J. Tait is just finishing a week's work on a very neat, low stone wall around his residence on Beach Avenue. It is a good specimen of handicraft, and a great improvement to the appearance of that pretty thoroughfare.

We congratulate Mr. R. H. English on his reappearance out of doors. Though very much shaken and ill, Mr. English has been able to drive out for a short while every day this week, and cheerily greet his friends again.

Mrs. R. C. Lipsett gave a little farewell party in honor of Mrs. Robbins on Monday evening, and all the friends of Mrs. Lipsett's class had a very delightful evening. Mr. and Mrs. Robbins, who are to make a tour of the Coast cities, left this morning, and will make their first stop at New Westminster.

An always acceptable and very dainty Christmas present for a lady friend is a box of good and artistic note paper and envelopes. Pretty boxes of white and cream hand made paper with envelopes to match are stocked at the Review Office. There could be nothing nicer. Address heads or initials could be added if desired.

One of the shacks up at Meadow Valley caught fire early on Sunday morning, and a party of bachelors who are "batching" in the bunkhouse nearby had an uncomfortable time putting out the flames. It was snowing hard and the men had to carry buckets of water from Darke Creek. Fortunately not much damage was done.

Rev. F. W. Pattison is occupying his last week or so among us very strenuously. Driving to Penticton on Sunday, accompanied by Mrs. Pattison, he held a service there, and then motored with a party to Khleden on Monday for another service, returning on Wednesday morning. On Friday last Mr. Pattison visited Meadow Valley and held a brief service.

The beautiful winter picture which our town and surroundings presented on Sunday was very fleeting, and too soon disappeared. A light, fast fall of snow transformed the sage scrub into blossoming white bushes, and Douglas firs with their feathery white load wore immense Christmas trees, and in the gardens the bright tints of lingering flowers shone gaily through a snowy white mantle. It was a snow fairyland for a few hours, till the Chinook crept up. Spring came back with a warm soft breeze and golden sunshine.

The Bazaar in connection with St. Stephen's (Anglican) Church next Wednesday, December 3rd, promises to be a most successful affair. The Women's Auxiliary are organizing it, and at 2 p.m. punctually the doors of the Men's Club will be open. It is hoped that a crowd of visitors will be present. Many dainty and original articles for Christmas presents will fill the well-stocked stalls. Children's clothes and a Doll Stall are also to be specialties. Afternoon tea and supper at 6.30 will be served, and a musical program given.

Piano Contest

Standing of Contestants.

Table with 2 columns: No., Votes Cast. Lists names and vote counts for piano contest.

Mr. F. F. Hanington, manager of the local branch of the Canadian Bank of Commerce, who has been relieving at Vernon, returned to Summerland last night.

SEALED TENDERS addressed to the undersigned, and endorsed "Tender for Drill Hall, Victoria, B.C." will be received until 4.00 p.m., on Thursday, December 11, 1913, for the construction of a Drill Hall at Victoria, B.C.

Plans, specification and form of contract can be seen and forms of tender obtained on application to the office of Wm. Henderson, resident architect, Victoria, B.C.; on application to the Postmaster, at Vancouver, B.C., and at this Department.

Persons tendering are notified that tenders will not be considered unless made on the printed forms supplied, and signed with their actual signatures, stating their occupations and places of residence. In the case of firms the actual signature, the nature of the occupation, and place of residence of each member of the firm must be given.

Each tender must be accompanied by an accepted cheque on a chartered bank, payable to the order of the Honourable the Minister of Public Works, equal to ten per cent (10 p.c.) of the amount of the tender, which will be forfeited if the person tendering decline to enter into a contract when called upon to do so, or fail to complete the work contracted for. If the tender be not accepted the cheque will be returned.

The Department does not bind itself to accept the lowest or any tender.

By order, R. C. DESROCHERS, Secretary.

Department of Public Works, Ottawa, November 11, 1913.

Newspapers will not be paid for this advertisement if they insert it without authority from the Department.—49488. 63 1 n 21-28

## The Ferry Service. "Rowena" Licensed.

The Okanagan Lake Boat Com-  
pany has plans now in operation  
that settle any immediate uncer-  
tainty on the ferry service. Two  
officials of the Victoria branch of  
the Dominion Marine Department  
spent the week-end at Naramata.  
Mr. F. F. Pickard, Inspector of  
Hulls, Mr. W. J. McCullum, In-  
spector of Machinery, and thor-  
oughly inspected the "Rowena."  
As a consequence they granted full  
license to the Lake Boat Company  
to run her as a thoroughly seawor-  
thy and satisfactory vessel for lake  
ferry service. The "Clovelly,"  
engaged for a short time, is there-  
fore returning to her owners at  
Kelowna.

Messrs. Pickard and McCullum  
were guests at the Hotel Naramata.  
We are very glad to see Capt.  
P. S. Roe very much better, and  
discarding his crutches, can now  
walk more easily with the use of  
a stick till his injured foot is en-  
tirely mended.  
Captain Languedoc is out of his  
room, and though still at the Syn-  
dica Hotel can now get about a  
little each day with crutches.

## Naramata Improvements.

Several improvements in and  
about the town are noted for this  
week. The Okanagan Trust Co.  
has been doing some electrical  
work which was needed for the  
dark mornings and evenings, and  
has renewed all the street lights.  
The result is a very brilliant light-  
ing scheme, and the effect from  
the Summerland side of the lake  
is of a sudden enlargement of the  
town, which presents a front of  
dazzling lights reflected in the dark  
waters.

British Columbia is probably the  
best game hunting ground in all  
Canada. A man from Masset spent  
three weeks on the west coast of  
Graham Island recently, and shot  
15 bears.

What is said to be the highest  
suspension bridge in the world has  
just been completed at Hagwilgate,  
in Northern British Columbia. It  
crosses the Bulkley River at a  
height of 250 feet.

The Okanagan Valley has made  
a good showing this year, having  
shipped fruit and produce to the  
value of over \$1,800,000 so far,  
with more yet to be marketed.  
For the week ending November  
19th, 58 carloads were sent out.

The Indian potlatch is threatened.  
Two chiefs have been arrested for  
participating in one, and other  
chiefs are now taking legal counsel  
to learn if they can maintain this  
ancient custom. The Indian De-  
partment contends the potlatch has  
a demoralizing influence on the  
natives.

The biggest single shipment of  
fish ever made out of Northern Bri-  
tish Columbia waters was that sent  
south from Prince Rupert during  
the past week when the steamer  
British Columbia sailed with about  
500,000 pounds of fresh halibut  
feed, and frozen halibut. The bulk  
of the shipment is consigned to  
eastern markets.

The British Columbia Govern-  
ment has under consideration the  
building of a wireless station at  
Chatham Point, which will com-  
plete the chain along the Coast so  
that steamers plying between Van-  
couver and Prince Rupert will be  
in constant communication with  
land stations. At present there is  
one section where vessels cannot be  
reached by wireless, and it is de-  
sired to fill this gap with the pro-  
posed improvement.

## Current Events — OF — Town & District

Mrs. Carrol Aikins was the guest  
of Mrs. Burnett at lunch on Tues-  
day at the Hotel Naramata.

Mrs. G. Van Hise spent three  
days of this week with her daugh-  
ter, Mrs. J. W. S. Logie.

Mr. Dan McKay is building a  
very comfortable looking and pretty  
residence on the Endersby lot  
which he has recently acquired.

The farewell service by Rev. F.  
W. Pattison at the Methodist  
Church has been postponed from  
last night to next Thursday, Dec-  
ember 1st.

Mr. Lyle, Manager of the Man-  
ufacturers Life Insurance Co. of  
Vancouver, spent three days at the  
Hotel Naramata, on a visit to his  
company's agent, Mr. T. H. Boothe.

Mr. Pete Stewart is sending out  
invitations for a Thanksgiving Sup-  
per to be held at his camp (Griffin  
& Hunt's) next Thursday. A real  
good time is being anticipated.

Some beautiful roses of almost  
June perfection were cut this week  
in the gardens of Mr. Carrol  
Aikins. Another proof of the won-  
derful mildness of this happy Nov-  
ember.

Mr. Harold Endacott has return-  
ed from his business trip to  
Calgary. He has brought with  
him some fine yearling cattle  
which he will range on the hills  
behind Naramata.

There have been several acci-  
dents treated at the Cottage Hospi-  
tal during the week. One rather  
severe injury was sustained by a  
man at the tunnel camp, who had  
his foot terribly cut.

Among the recovered invalids  
whom we are glad to see out and  
about again are Mrs. H. J. Wells,  
who has had an attack of la-  
grippe, and Mr. C. Stiff, who has  
recovered from pleurisy.

Miss Blanchard left for Kam-  
loops on Saturday morning for a  
few days' visit, returning on Wed-  
nesday night. Mrs. H. P. Salting  
has been looking after her duties  
at the hotel during her absence.

We are very glad to see Mr.  
Carrol Aikins has returned from  
Vancouver and has almost entirely  
recovered from the effects of the  
recent operation to his throat,  
which has greatly benefited him.

The Mark Manchester bunga-  
low is rapidly approaching com-  
pletion, and has just received the  
first coat of stucco, looking exceed-  
ingly attractive and picturesque.  
Mr. Manchester hopes to have it  
all ready for occupancy by early  
spring.

The latest arrival in Naramata  
as a probable settler is Mr. War-  
rington Strong from London, Eng-  
land, who arrived at the Hotel  
Naramata on Sunday night. Mr.  
Strong's plans for the future are  
not yet made, but he will probably  
decide to become a resident worker  
of our community.

The Ladies' Aid of the Metho-  
dist Church is making active prepa-  
ration for the annual bazaar, to be  
held next Wednesday, December  
3rd, in the church basement. Many  
pretty and useful things for Christ-  
mas gifts are to be a specialty at  
this sale, and stallholders will be  
glad to receive all contributions to  
their stock as early as possible.  
Don't forget the good old adage,  
"Come early and often."

**SHILOH**  
quickly stops coughs, cures colds, and heals  
the throat and lungs. 25 cents.

**50 YEARS' EXPERIENCE**  
**PATENTS**  
TRADE MARKS  
DESIGNS  
COPYRIGHTS &c.  
Anyone sending a sketch and description may  
quickly ascertain our opinion free whether an  
invention is probably patentable. Communications  
should be addressed to MUNN & CO., Patent Attorneys,  
360 Broadway, New York, N.Y.  
Scientific American.  
A wonderfully illustrated weekly, containing  
information of any advertising journal. Terms for  
Canada, \$10 a year, postage prepaid. Sold by  
MUNN & CO., 360 Broadway, New York  
Branch Office, 225 F St., Washington, D. C.

The third of the series of Unity  
Club dances is to be held to-night  
(Friday).

Mr. J. M. Robinson is expected  
by his sons to arrive by Sunday  
night's boat.

The Misses Baker of Penticton  
had a pleasant day here on Sun-  
day with friends.

Miss Cooper has been a visitor  
for the past week at the residence  
of Mrs. Carrol Aikins.

Mrs. Simpson, senr., is spending  
a week with Mrs. Endacott dur-  
ing Mr. Endacott's absence in  
Calgary.

Mr. G. L. Adams, from King,  
Walsh & Co., came in from the  
Coast on Monday night's boat, and  
is spending a day or two here.

Mrs. George Wolstencroft was  
visiting friends in Summerland on  
Monday, and brought over gifts of  
some beautiful chrysanthemums.

Dr. W. L. Robinson rode down  
on Monday morning to the Okana-  
gan Mission Hospital to relieve  
the resident doctor there until  
Tuesday night.

A hurried trip on the "Clovelly"  
was run for Dr. R. C. Lipsett on  
Tuesday night who was telephoned  
for to look after a very valuable  
horse, sick at one of the camps.  
The owner of the horse fears it is  
not possible to save it.

Some of the ladies of Naramata  
have taken the idea into their  
pretty heads that if there is to  
be a bowling alley and a men's  
bowling club therein, that a ladies'  
bowling club is but a natural se-  
quence. Why not indeed?

The illness of both Mrs. R.  
Campbell Robinson and her five  
weeks old baby daughter has occa-  
sioned some anxiety during the  
past week. Both are now, how-  
ever, happily nearly well. Mrs.  
J. L. Logie spent three days with  
her daughter.

Have you chosen the Christmas  
gift for your father yet? If not,  
here is a welcome suggestion.  
Business or private letterheads on  
good paper with Post Office Box  
and name of ranch or residence  
clearly inscribed should be order-  
ed at the Review Printing Office.

Mr. R. C. Robinson and Mr. J.  
O. Robinson, with their uncle,  
Mr. W. J. Robinson, went down by  
the "Okanagan" to Penticton to ap-  
pear before the Water Commission  
in support of the Okanagan Trust  
Company's various water records.  
They drove home later in the day  
to Summerland.

An accident that might easily  
have ended much more seriously  
befell one of the reckless Naramata  
small boys on Tuesday afternoon.  
Stanley Stiff, the ten year old son  
of Mr. C. Stiff, fell out of a birch  
tree which he was climbing, and  
was picked up unconscious and  
taken home on a stretcher.

Busy looking up old friends and  
inspecting his property here, Mr.  
Hector McDonald from Ottawa  
has been spending a pleasant few  
days in town. Among old play-  
mates with whom he renewed ac-  
quaintanceship were Mr. H. T.  
Davies and Mr. J. H. Pushman,  
who were delighted to welcome  
their visitor.

A newspaper is an index of the  
community it represents. When  
it is filled with local ads., the world  
at a distance is liable to come in  
with its money, for generosity and  
progression attract those with simi-  
lar ideas. When a paper has a lean  
array of ads, within its columns  
the world sighs, and exclaims,  
"That poor town is dead or dying,  
let us send a bunch of flowers to  
the funeral."—Ex.

There has been much coming and  
going up and down for the last  
week. Some one hundred and fifty  
men from the camps partly filled  
with a desire to get home to their  
own lands for Xmas, and partly  
made discontented by an all round  
reduction on wages of 25 cents,  
"came out" on Saturday and Mon-  
day. A party of men to fill their  
places came down from Kelowna by  
Monday's boat. In consequence of  
this movement it was a good week  
for business in the town, the  
storekeepers being kept very busy.

Canada captured nearly every  
first prize for individual entries  
on wheat, oats and flax, both  
threshed and in the sheaf, in the  
International Dry Farming Con-  
gress at Tulsa, Okla.

**SYNOPSIS OF COAL MINING  
REGULATIONS.**

COAL MINING RIGHTS of the Dominion, in Manitoba, Saskatchewan and Alberta, the Yukon Territory, the North-west Territories, and in a portion of the Province of British Columbia, may be leased for a term of twenty-one years at an annual rental of \$1 per acre. Not more than 2,560 acres will be leased to one applicant. Application for a lease must be made by the applicant in person to the Agent or Sub-Agent of the district in which the rights applied for are situated.

In surveyed territory the land must be described by sections, or legal sub-divisions of sections, and in unsurveyed territory the tract applied for shall be staked out by the applicant himself.

Each application must be accompanied by a fee of \$5, which will be refunded if the rights applied for are not available, but not otherwise. A royalty shall be paid on the merchantable output of the mine at the rate of five cents per ton.

The person operating the mine shall furnish the Agent with sworn returns accounting for the full quantity of merchantable coal mined and pay the royalty thereon. If the coal mining rights are not being operated, such returns should be furnished at least once a year. The lease will include the coal mining rights only, but the lessee may be permitted to purchase whatever available surface rights may be considered necessary for the working of the mine at the rate of \$10 an acre. For full information application should be made to the Secretary of the Department of the Interior, Ottawa, or to any agent or Sub-Agent of Dominion Lands.

W. W. CORY,  
Deputy Minister of the Interior.

**FARMERS DISCUSS LIVESTOCK.**

[Continued from Page 1.]

Holsteins came from Holland's low meadows, rich with luscious grass. Our bunch grass was dry and fattening. One must either be content to let the cow go and take what she will give, or "keep her up," and feed all she will take. The silo would be the ideal thing. The British Columbia Experimental Farm was growing fifteen tons of fodder corn to the acre, and this can readily be grown here.

**HOGS AND ALFALFA  
SHOULD BE RAISED.**

D. H. Watson was next called on, and in his usual witty style supported the movement for the general importation of livestock, claiming at the same time that, while this must be secondary to fruit growing, it was the best and most practical way of getting ready returns and building up the orchards. The hog was the poor man's friend, and there was always meat and money wherever they were grown. The growing of alfalfa and raising of hogs should be made an adjunct to fruit growing. Alfalfa grows exceedingly well here, and will support twenty hogs to the acre. The quick returns to be had from hog-raising would greatly assist in the perfecting of orchards. Dr. Lipsett had told him that his hogs had been grown to market size on less than four dollars' worth of grain each. With alfalfa, five dollars spent for grain to finish off would be sufficient. While Mr. Hilborn might grow his early vegetables and small fruits between his trees many others could not be so successful without years of experience; while all but a few could make money with alfalfa and pork. A cow or two should also be found on every ranch.

That he had raised pork for 10¢ cents per pound, dressed, after allowing himself 25 cents an hour for all time given to one hog, was the report of Mr. Walter Wright, who pronounced himself a crank on accounts. He had paid four dollars for the pig, had fed it on peaches and weeds, with some shorts and oats. This year his results were not quite so satisfactory because he had not had the shorts. He thought it must be a good cow that would pay here. If three or four neighbors would co-operate in building a silo, this would be a good idea. Our bunch grass, he said, was full of sugar, and would tend to fat rather than milk-flow. For himself, he would use his range land for horses and anticipated good profit. He endorsed the proposition to engage in pork raising, and declared himself struck on the

(Concluded in next column.)

chicken business. He advised trap netting, giving some surprising results of his own experience in this line.  
Messrs. W. A. Caldwell, G. J. C. White and others also took part in the evening's discussions.

Work on the Oroville-Wenatchee branch of the Great Northern Ry. is steadily progressing. The rails are now laid to Browster, and on Wednesday of last week the first train loaded with workmen was run to that point, although regular train service has not been established. The foreman of the bridge crew at Ophir stated that he would give the contractors the privilege of running trains over the bridge this week. — Star, Princeton.
