Silver Mining Added Industry

Third Prospective Mine to be Developed Here.

Promises Well.

New Proposition on Trout Creek and Garnett Valley Claims to be Worked.

With a silver mining claim on the south-west corner of the municipality and another, of which the owners are hoping much, up Garnett Valley, Summerland now has a third prospective silver mine. Like the other two this one is within easy access, as it can now be reached by motor, so that there are not the transportation difficulties, common to so many claims, to stand in the way of development.

While aware, for some years, of the existence of silver bearing ore in that vicinity, Wm. Brent had not been able to locate the ore body until he recently obtained the assistance of a mineralogist. The expert, Mr. Byrd, who is just now in the north country, commissioned by the government, was not long in ascertaining the direction of the metal bearing vein of ore, and the report of the assayer on a sample sent out that the value of the silver and copper ran to \$480 per ton of ore has further encouraged Mr. Brent and his associates that they have a claim worth developing. Mr. Brent, his wife, and Jos. Brent, his brother, and Mr. Byrd have each staked claims. The property is on the south side of Trout Creek on the side of a hill running up from a bench above the meadows back of the municipal reservoir.

Upon the return of Mr. Byrd, Mr. Brent says further work will be arranged for. It is not his desire to hold the property but, rather, if the ore is found to be there in paying quality and quantity, to turn it over to some corporation with the means to operate it to the best advantage.

Seen this week with regard to the Garnett Valley claim in which he is interested, G. N. Gartrell stated that work would be resumed there in a small way within a few days.

Naramata Will Organize Water District.

The fruit growers of Naramata are going to organize for irrigation purposes under the Dyking and Drainage Act. This decision was reached at a public meeting held a few days ago. An acting committee consisting of G. W. Wolstencroft, F. W. Rolt, and Harry Hook were appointed, and are in correspondence with Victoria.

Another proposal, which has a good many arguments in its favor, was the organizing of the district into a regular municipality, but the meeting finally decided in favor of the more limited form.

A pressing need that must have immediate attention if increased water supply is to be provided for next year, is the building of a storage dam back in the hills. If done at all, this work must be completed before many weeks.

It would now appear that the government intends to make the water rights and the distributing system as well appurtenant to the land, in which case the company which built the system and has since been operating it will receive nothing for the plant. The company will have one compensation, however, in that anything done to improve the water supply and its distribution will add to the value of the land under the system which it still has for sale and will render it more salable.

A country editor out in Missouri recently retired with a comfortable fortune of \$50,000. His successor explains that the money was acquired by industry, economy, conscientious effort to give full value, indomitable perseverance, and the death of an uncle who left the editor \$49,000.50.

Good Money In Fruit & Vegetables

For the Man Who is Equipped and Knows Business.

Some Figures.

Summerland Cantaloupes win Against Odds: Grower Developing New Variety.

A crop return of eight hundred dollars per acre on a nine acre fruit lot looks pretty good to the town man, and perhaps even to many of our fruit growers. Yet this is the amount of sales, gross, made off one Summerland lot with nine acres under cultivation. After deducting wages paid, the amount paid for boxes, nails, etc., taxes, water rates, horse feed purchased, the cost of fertilizer and manure, and sundries incidental expenses the balance sheet of this fruit lot shows net return from the nine acres of \$550 per acre.

These are the results that were obtained last season by J. L. Hilborn on his Jones' Flat lot.

The sale of vegetables, including \$67 worth of plants, made a gross return of \$5,729.55. The vegetables grown included cantaloupes, eggplant, sweet peppers, tomatoes, and cucumbers, the latter being the heaviest of any single item. The total receipts from tree and bush fruits was \$1,465.55, apples being the largest item in these, with apricots coming next, and red currants third.

The total receipts were \$7,195.10, and the expenses deducted were \$2,287.85, leaving a net balance of \$4,907.25. These figures are from the balance sheet as furnished the Department of Agriculture, a copy of which Mr. Hilborn, upon request, gave The Review.

Two further items that the interviewer suggested might have been included in the expenses were the salary of the owner-manager, and interest on the capital investment. Mr. Hilborn explained, however, that the living obtained for himself and family off the place and the annual growth in the orchard largely offset these items. In any case, there are few who would not be satisfied to take the above net profit of practically \$5,000 as ample salary and return on invested capital.

Of equal interest were the figures showing the gross and net returns from the different plots. One test plot of one-eighth of an acre planted to tomatoes gave a gross return of \$161, the actual net proceeds being \$87, or at the rate of \$700 per acre. For some of the other lines, which would be considered specialties, in which only men of experience specially equipped could succeed, even higher results per acre were obtained.

It was presumed that the profits made from these and probably all lines were above the average, and Mr. Hilborn was asked to what he would attribute the better results. His reply was that the production of a really good article was half the market. To do this it was necessary that the grower be properly equipped. Only good plants grown from selected seed, germinated and grown under right conditions and properly "hardened" before being set out would be profitable. For this experience and the right equipment are essential.

Of the B.C. cantaloupe Mr. Hilborn said that when he came west none of the fruit men on the prairies could be interested in melons from this province. They were far from satisfactory, and the dealers could not be induced to buy. He had not been long in Summerland before he was able to convince those same men that no better melons could be produced anywhere than right here. Sample shipments brought orders for more. They had never had such fruit.

Mr. Hilborn is convinced that too many growers are not planting the right varieties. Another trouble is that melons, and also cucumbers and other such vegetables, are not picked at the right stage in their development.

The "Hoodoo" is the one variety of melon that Mr. Hilborn recommends. There are other earlier

Theatre Man Extends Circuit.

Another theatre has been added to the group of amusement houses under the control of the well-known theatre man, J. C. Berry, who has for years operated the Empress Theatre at Vernon. His latest acquisition is the Empire Theatre, Penticon, of which Mr. Berry has taken a long term lease from Mrs. Stewart. To conform with the names of his other houses Mr. Berry has changed the name to "Empress".

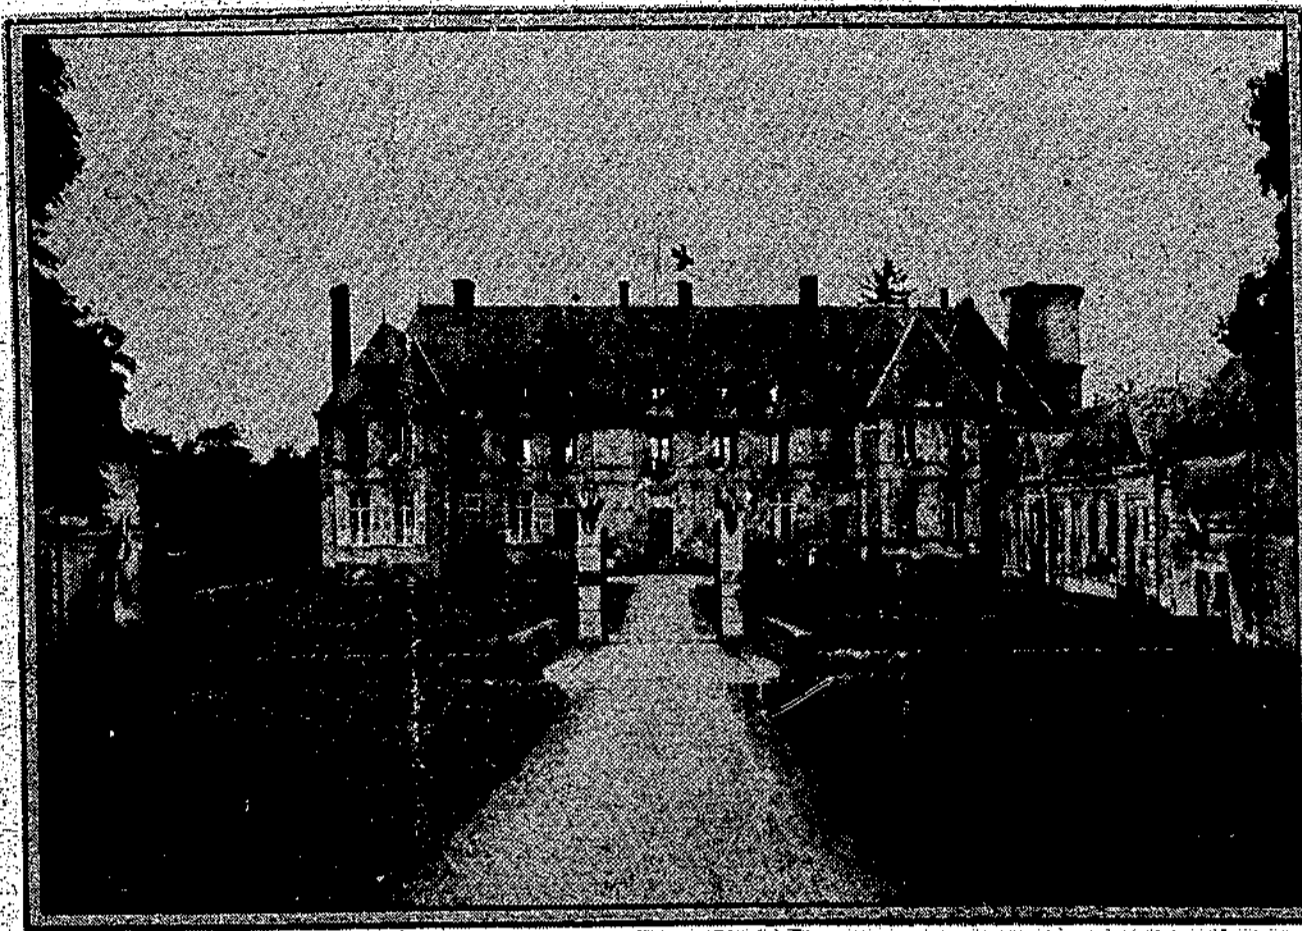

Further additions are likely to be made soon to the chain of theatres now controlled by Mr. Berry and his associates. The old "Empire" has been considerably remodelled, especially in the operating room, which has been rebuilt and enlarged and is being equipped with two up-to-date projectors so that the performances may be carried through without the delays of reloading. Mr. Berry makes a formal announcement of the change of management in another column, and also gives his program for the first few performances.

and larger varieties, but the "Hoodoo" so excels in other features that the other varieties should not be attempted here.

A very interesting story of the propagation of what might be termed an improved "Hoodoo," which Mr. Hilborn has undertaken, was told by him. He aims to have in the new melon, yet unnamed, all the good qualities of the "Hoodoo," but with larger size and maturing earlier. In the production of this a cross was made with the "Hamilton Market," a large early variety, this variety being used as the male plant. The fruit from this cross-broeding is fairly uniform in color, flavor, and quality of flesh, favoring the "Hoodoo." By selecting the fruit of "Hoodoo" type, from the earliest maturing plants producing large fruit, Mr. Hilborn expects in time to have established a new and distinct variety with all the most desirable features. It takes several years to establish a variety of uniform type.

The Review felt free to ask Mr. Hilborn for a statement of his receipts and expenses because of the relation he has held with the Department of Agriculture. There are many others, we know, who are making money on five, ten or more acres, and we would be very glad to have details to further demonstrate the possibilities of the fruit and vegetable industry here. The other day we were told of a ranch of a little over ten acres that produced a crop last year worth \$3,500. Another and smaller lot, operated with little or no hired help by the owner returned him \$2,200. Still another, of over twenty acres, produced almost a three thousand dollar crop. These were all fruit lots. Still another, a five acre place on which early vegetables were grown, must have netted the owner quite \$2,500.

The Best For The Soldiers

The XIth Century Chateau of Passy, near Sena, France, which has been turned into the "Hospital Francais de New York."

Fruit Shipments Growing Heavier.

Shippers All Busy With Larger Staffs.

Four heavily laden cars of fruit were started rolling from here on Wednesday night. It is estimated that these four cars, together with the numerous express trucks loaded that evening, contained fruit to the value of from \$8,000 to \$10,000. The increase in the volume of fruit being shipped from here is very marked, and, especially has the fruit going out by express shown a heavy increase. Further evidence of the larger crop is in the number of packers required to prepare the fruit for shipment. We are told that last year the Union was employing nine packers at this season, whereas, this year there are twenty kept busy at the Union building. The Steuart Fruit Co. is also employing a larger staff, a considerable extension to its packing house and a re-arrangement of the interior being necessary to accommodate the larger business. Including his staff of pickers and other helpers, T. J. Garnett has more than twenty employees. The Co-operative Orchard Co., W. T. Broad, and others are employing considerable help.

The apricot shipping season is now reaching its height, and early apples, plums, tomatoes, and cucumbers are now coming in in increasing volume. There are ahead many busy weeks in which every moment will be required to gather and market the crops of our orchards and truck gardens.

First White Woman To Cross Rockies.

The death of Mrs. Catherine Schubert at her Armstrong home, on Thursday, July 18, removed from the community the first white woman to cross the Rockies from Eastern Canada to British Columbia. The party she came west with numbered 200 men and only the one woman, and their destination was the Cariboo country in a search for gold. The deceased was 88 years of age, and came to B.C. in 1860. She settled at Armstrong in 1884. She was Irish by birth, and took up residence in Winnipeg, then Fort Garry, in 1857.

Mrs. J. W. Jones yesterday received a letter from her son, Flight Officer Clarence A. Jones, who was injured by a fall some time ago, to the effect that he has been making good progress, and expects to be on his way home to Kelowna by the time his mother received the letter. The letter was written from England. The writer regretfully anticipated that he would still be wearing a splint on his jaw when he reached home.—Kelowna Courier.

Boosting Summerland.

Summerland will be better known to hundreds, yes, thousands of people on the prairies, or wherever our fruit goes, because of a leaflet being put in fruit packages by the various fruit shippers of the district. These leaflets, which were prepared and supplied by the Board of Trade, assisted financially by the municipality, convey to the reader in concise form much information regarding Summerland under the three headings: Summerland, where it is; what it is; and what it has. An invitation is extended to the recipient to come to Summerland and help us grow still more such fruit as was contained in the package with the leaflet.

Fruit Prices Are Not To be Fixed

Sugar Supply Shorter But No Present Restrictions.

Toronto.—Because fruit is not a necessity of life, and it would be unfair to the grower, fruit prices are not fixed, H. B. Thomson, Food Controller, stated here. Besides, he declared, it would discourage production to the detriment of the country if a low price were fixed on fruits.

The Food Controller said that experiments are being made at the present time to ascertain the advisability of going in for the dehydration of vegetables on an extensive scale.

The country's sugar supply, he said, is getting shorter, but no further restrictions are at present contemplated.

Methodists Organize

After fifty or more Methodists of West Summerland and vicinity had signed a paper circulated by S. B. Sneider, signifying their desire for such an organization, they met at the home of Mrs. Harrison last week and formed the Methodist Association, with Prof. W. T. Broad as president, and J. L. Logie, secretary.

Negotiations were later opened with the Presbyterians with the result that the association members have been given all the privileges of membership in the church and representation on the board of management.

While moving a donkey engine up on to the Copper Mountain railway grade last Tuesday evening, Jack Winterbottom, the engineer, was killed instantly by being crushed between his engine and a tree. The engine started to back down the grade, and Winterbottom evidently lost his head and jumped without any necessity for doing so.—Princeton Star.

Giving Attention To Live Stock

Cattle and Sheep Raising Now Attractive.

One Herd of 250.

Many Fertile Valleys Waiting to be Grazed. Sheep Man Trying Out District.

There are, probably, few people in Summerland who have any conception of the number of domestic animals to be found in the valleys and on the hill sides within a radius of but a few miles of their homes. Cattle, horses, and sheep in numbers that would surprise many are to be found on the pre-emptions and on the free range land of the hills behind Summerland. The breeding of horses is not now receiving the same attention, nor is it, perhaps, as profitable as the raising of beef cattle and of sheep. Still there are not a few horses on our ranges. One rancher in the Trout Creek valley still holds quite a few head of young horses of good quality for which he expects to obtain good prices within a short time.

Perhaps the largest single herd of cattle in this vicinity is that of Jos. Brent, who has 250 head grazing on his extensive range land. Most of these animals will be ready to market this fall, and we are told that the herd will be worth \$18,000 then. It is the intention of Mr. Brent to carry over the best animals of his herd, so that little more than the half of the herd will be put on the market this fall.

Not only is Mr. Brent able to graze this large herd, but he also produces hundreds of tons of hay. Some of this he feeds to stock, but much of it will be sold and the animals driven down to bottom lands where they can graze through most of the winter.

In these days of good prices more attention is being given to the raising of sheep. One flock of several hundred we learned of just the other day. These are the property of an American, Mr. Barrass, who came into the Valley but a few months ago, and with his two sons and a herder is herding over four hundred head of sheep in the Bathfield district. Mr. Barrass, we are informed, is trying out what he considers a most promising sheep district, and will probably maintain a flock of several thousand animals next year.

The grazing land in the numerous fertile valleys and mountain sides in this vicinity are capable of maintaining many thousands of head of sheep and cattle.

W. L. D'Aeth Succumbs to Severe Wounds

Valley Resident Meets With Soldier's Death.

The news received on the 14th instant by cablegram to the effect that Mr. W. L. D'Aeth of Kelowna had been dangerously wounded was supplemented on Wednesday evening by the sad information that he had succumbed to his injuries. Mr. D'Aeth left here in the spring of 1916 to serve his Empire in the overseas forces. He joined the Engineers, and was soon busily engaged in warfare near the fighting lines. Although no particulars are to hand, it is believed that he was injured by machine gun fire, as the wire stated that he was injured in several places, the most serious of which was a gunshot wound in the neck.

The deceased soldier was a native of Ireland. He was well-known in Kelowna, where he owned property. He also had interests at Westbank and other parts of the Valley, being well-known on account of his long associations here. He leaves a wife and three children.—Kelowna Courier.

FRIDAY, AUGUST 2, 1918.

THE PRICE OUR GROWERS will obtain for their fruit is almost certain to be more or less reduced from that which otherwise might have been expected by the rationing of sugar in the United States. From now till the end of the year citizens of that country will be limited to one pound of sugar per person each month for the household schedule. An extra pound each will be allowed for cooking purposes. One effect of this reduction in sugar available to the housekeeper will likely be a lessening of the quantity of preserved fruits put up in the homes causing a lowering of fruit prices, and perhaps in driving fruit into Western Canada to seek a better market. America is now on the same basis as regards sugar as is Britain. As the sugar supply is controlled by an international sugar board the supply of sugar for consumption in Canada is sure to be curtailed in the near future.

§ § § § §

DRIED FRUITS such as prunes and evaporated peaches, which have always been imported into Canada in large quantities from California, will not be available to the Canadian trade this year. The United States Government has prohibited the exportation of these commodities. California canned fruits are sure to be equally short in our markets. The southern canning companies report that they already have all the orders they can fill. Canada will have to depend on her own resources for canned and dried fruits.

§ § § § §

THE MOTOR TRUCK was recently approved of for widest possible use by the government of the United States. At a recent meeting of the United States Council of National Defence, the following resolution was passed: "Resolved that the Council of National Defence approves the widest possible use of the motor truck as a transportation agency, and requests the state councils of defence and other state authorities to take all necessary steps to facilitate such means of transportation, removing any regulations that tend to restrict and discourage such use." The motor has become as integral a part of our every day business life as has the telephone or electric power, and the motor truck is proving a most indispensable member of the motor family.

§ § § § §

AIDS TO PROGRESS.

OF COURSE, any man in business can get along without a telephone in his store. He can also get along without show cases and show windows, shelves, counters, etc. He can, no doubt, sell goods from a pile on the floor. But few men would care to do so. A town can get along without sidewalks and graded streets; it can get along without tie posts or watering places and a rest room for tired shoppers. It can get along without these things. It can get along without a newspaper; it can get along without advertising; it can get along without a lot of other things. But it can get along a great deal better with these things than without them. And it is well to note that towns which get along without these modern aids to business and civilization, do so much as a piece of driftwood floating down stream gets along. It is well to note, also, that this kind of "getting along" is not the kind of "getting along" that wide awake, developing towns follow. It is well to note, further, that a progressive business man or community would as soon think of "getting along" without a stock of goods as without local newspaper advertising or the local telephone. Fact is, business men can get along without a lot of things—but they don't. They prefer to pay a little extra and get the added benefit and increased business facilities. And you will notice that it is the business man or the community paying the extra that leads in business and in bank roll.—Okanagan Commoner.

§ § § § §

FROM BRITISH COLUMBIA to Mesopotamia is a long way to ship box shooks, but a considerable quantity is being sent to that far-off land for use by the transport columns of the British army.

§ § § § §

"JANEY CANUCK" is very much opposed to raffles. Speaking recently in support of a resolution to the government to forbid the holding of raffles she said: "It is most demoralizing for raffles to be conducted in the name of patriotism by churches and others, and I recommend that the government should stamp out the abuse by outlawing raffles."

O. ATKINS

STORAGE BATTERY SPECIALIST,
SUMMERLAND

MARY PICKFORD
"Rebecca
of Sunnybrook Farm"
an Arctcraft Picture

At Empress Theatre, Penticton,
Saturday Afternoon and Evening, Aug. 3rd.

NOTICE

We take pleasure in introducing to the citizens of the Southern Okanagan the EMPRESS THEATRE, Penticton, formerly the Empire. We have leased the theatre from Mrs Steward for a number of years and will give you the benefit of our long experience in the Motion Picture business.

In adding this theatre to our chain of Empress Theatres, we are bringing to you the same policy that has won success for us in all the other theatres of our chain. This policy consists of giving you the latest and best photo-plays at the lowest prices, appropriate music, clearly defined pictures, and courteous treatment, and we invite your criticisms and suggestions at all times.

In the program we will present to you, you will find all the popular actors and actresses under the management of the most famous producers such as Arctcraft, Paramount, First National Exhibitors' Association, Goldwyns, Fox and many others, assuring you of the strongest dramas, the most pleasing farces, humorous comedy dramas, and last but not least, clean, laughable comedies, with such stars as Chaplin, Arbuckle, and Fairbanks. Remember, it is only because we are able to book these pictures for a number of towns that enables us to pay the price for them while they are fresh, clean, and not three and four years old, as is usual in towns under the ten thousand population mark.

It would be foolish for us to obtain these high-priced photo-plays and then throw them on the screen before you in the usual way. Our way necessitates heavy expenditure in the best projection machines, lenses, and screens obtainable. We use all the best methods and appliances for removing that annoying flicker so usual in the smaller towns. We pride ourselves that there is not a theatre anywhere that gives their patrons the clear cut, life-like pictures that you see at the EMPRESS.

We have the theatre thoroughly cleaned, and disinfected and painted throughout, and our genial, obliging staff will welcome your valued patronage.

We will open Saturday, August 3, with the splendid photo-play "REBECCA OF SUNNYBROOK FARM," featuring MARY PICKFORD, the world's favorite star, in the leading role, supported by a very strong cast, and an amusing Mac Sennett comedy.

Matinee, 3.30; admission 10c. and 20c. Evening, 7.30; admission, 15c. and 25c.

The above is not a feature bought specially for our opening day, but is one of our regular programs as you will see if you will read the following:

Monday and Tuesday, August 5 and 6—"THE SLACKER," a picture that is sure to please.

Twelve Sound Reasons For Home Buying

Registered in accordance with the Copyright Act.)

ARTICLE No. XII.

1. Because loyalty to a community by its men and women is the first essential to national patriotism.
2. Because the interests of the home dealer and the home consumer are mutual—what hurts one must hurt the other.
3. Because the home business man pays his share of assessment rates and all public welfare donations—whereas the foreign dealer contributes nothing and has absolutely no interest in your community other than the cash he takes out of it.
4. Because prices of farm and town property and local markets go down to zero where there is no healthy, progressive community trading.
5. Because the fundamental law of commonwealth economy is to spend your money where you have earned it.
6. Because your home business man is entitled to your cash. He stands behind the goods he sells, while you have no redress from being "stung" by outside dealers.
7. Because spending your money away from home is like sowing grain in a stranger's field so that he may reap the harvest.
8. Because when you drain your community by diverting the legitimate channels of trade, you also drain it of its young men and young women and of all energy and substance for development.
9. Because the more money circulating in a community the more valuable property becomes, the higher are wages, and the better the general conditions that prevail.

"In unity there is strength," and united home buying builds up a community bulwark that will weather the severest economic storms.

10. Because it is a duty you owe to yourself, to your family, and to posterity to build up your community so that it has a wholesome atmosphere and is advancing with the times instead of drifting into the habits of sloth, ruin and decay.

11. Because you must send cash in advance to the big city dealer and you have no opportunity to inspect the goods. Apart from the hundred and one good, sound reasons for home buying, it never pays to buy a pig in a bag or a suit of clothes in the dark.

12. Because continued patronage of the big city catalogue concerns is a short-sighted, unprogressive, and in the long run economically suicidal practice.

The Internment Camp

(Vernon News.)

Some weeks ago the News produced an article from the Winnipeg Telegram giving some figures relating to the expense entailed in connection with alien internment camps. It is only fair to state that in a recent interview Major-General Sir William Otter informed the News that this statement was misleading. He drew attention to the fact that the figures given to the Senate embraced payments for supplies that may be termed "luxuries," but which are not paid for by the people of Canada. Internment prisoners, he said, were recipients of money from various sources which is deposited with the Government and checked out as required. Hence it followed that vouchers signed for such articles as asparagus tips, tinned lobster, etc., while passing through the Auditor-General's accounts were not paid for by public funds, but were provided from private sources. General Otter further stated that the food of prisoners in the Vernon camp cost the Government only 22 cents per day, any "extras" over this amount being provided by the prisoners themselves. He also wished to make it known that neither he nor the Canadian Government is responsible for the regulations governing these camps, which are conducted in accordance with instructions issued by the Imperial Government and based upon rules laid down at the Hague Tribunal. As the News has occasionally made reference to these matters from another point of view it is only right that we should publish General Otter's statement which throws new light upon the situation.

Death Rate In War

Compared with Life Insurance Figures

A writer in an American magazine compares the mortality percentages in various wars with the death rate in peace times. Taking the ten million men between the ages of 21 and 31, registered for war service in the United States, as an example, he shows from life insurance computations that the average death rate among these men in time of peace is 8 per 1,000 annually. Actuaries' figures show that they die at the rate of 6666 per month or 220 per day.

The writer quotes from an article published in the Economic World of August 4, 1917, in which it is shown that the total death rate per 1,000 per annum, among 2,000,000 men who have taken part in the present war, who were insured by the Prudential Insurance Company of London, England, is 30 per 1,000 per annum. The article estimates that the ordinary death rate among these policy holders in peace times was at least 10 per 1,000 per annum.

The British death rate in the Boer war was 14 per 1,000 per annum for those killed in battle or died of wounds. In the Russo-Japanese war the Russian death rate was 35 per 1,000 per annum killed in action or died of wounds. The Japanese death rate in the same war from casualties was 54 per 1,000 per annum. The deaths from disease in these wars are not given, as in the present war there are very few deaths from that cause among the Allied troops. The soldiers are

far better protected from disease than if they were at home.

The writer of the article in question gives figures to show that in former wars less than four in a hundred were killed in action or died from wounds. In the present war, owing to the more efficient weapons used, the percentage is somewhat higher, notwithstanding the surgical advances and the improvement in the care of the wounded which save many lives.

ANNOUNCEMENT

THE PRINTERS ARE NOW AT WORK ON

WRIGLEY'S

BRITISH COLUMBIA DIRECTORY

Compiled and Printed in British Columbia—Endorsed by B.C. Government, Boards of Trade, Manufacturers' Association and other bodies.

IN FIVE MAIN SECTIONS

BRITISH COLUMBIA YEAR BOOK—One hundred pages of official data, covering Agriculture, Lands, Timber, Mining, Fisheries, Shipbuilding, and Public Works, prepared by the various Departments. This section will cover fully the development in British Columbia.

GAZETEER, describing over 1,900 cities, towns, villages, and settlements within the Province, showing location, distance from larger points, how reached, and by what lines, synopsis of local resources, population, etc.

ALPHABETICAL DIRECTORY of all business and professional men, Farmers, Stock Raisers, Fruit Growers, etc., in all towns and districts.

CLASSIFIED DIRECTORY of Manufacturers, Retailers, Producers, Dealers, and Consumers, listing all products from the raw material to the finished article.

TRADE NAMES AND TRADE MARKS—A list of popular trade names alphabetically. If you want to know the manufacturer or selling agent of a trade-name article, look up this section.

INCORPORATED CITIES—All gazeteer information in the Directory of the incorporated cities of the Province will be prepared by either the City Council or the Board of Trade, thereby official.

ADVERTISING BRITISH COLUMBIA—It is necessary to continue to advertise British Columbia outside of the Province, in order that tourists and settlers will continue to come. With this aim in view, a copy of the Directory will be placed in the leading Libraries and Boards of Trade throughout the Canadian Provinces, Eastern Canada, the United States, and abroad. The Directory will be used by prospective tourists and settlers as an official guide of the Province.

The subscription price of the Directory is \$10, express paid.

DOCTOR GETTING DOCTORED.

A medical journal vouches for this story: A distinguished surgeon while making his rounds through a hospital, was momentarily dazed when a wounded soldier inquired querulously: "Say, doctor, when one doctor doctors another doctor, does the doctor doing the doctoring doctor the other doctor like the doctor wants to be doctored, or does the doctor doing the doctoring doctor the other doctor like the doctor doing the doctoring wants to doctor him?"

Peachland Doings

A Weekly Chronicle Furnished By Our Local Representative.

Mr and Mrs Spackman (nee Miss Alice Harrington) with their two children, accompanied by a lady friend from the prairie, came in on Wednesday night's boat to visit Mrs Spackman's parents, Mr and Mrs R. Harrington.

Miss Marie Phillips came from Calgary by Wednesday's boat to visit with her grandparents, Mr and Mrs G. Keyes. She will probably remain for some time.

Mr J. G. Robison enjoyed a visit of a few days from a cousin, Mr W. Greer, who came in from the Coast on Wednesday morning, and stayed the week-end, going on to Vernon by Monday's boat.

Mr Loveday, Dominion Fruit Inspector for the Okanagan district, who has his headquarters at Vernon, paid a visit to town last week-end.

Mr J. M. Robinson of Naramata came up on Thursday morning to spend the day here, returning again in the evening.

Mrs Cutler, who has been visiting with Mrs E. House and Mrs E. Howell, went on down to Penticton on Thursday night where she spent the week-end with friends there, returning on Monday morning to finish out her visit in Peachland.

Mrs R. E. Taylor and children with her niece, Miss Taylor of Winnipeg, who have been visiting at the Kirkby's in Penticton, returned to Peachland on Thursday morning.

Miss Moule, who has been spending part of her holiday here, at Mrs Mills, returned to Salmon Arm on Friday morning.

Miss Maudie Kincaid returned to Kelowna on Friday morning after her holiday with friends here. Miss Lilian Town accompanied her home for a return visit.

Mr J. E. Kerr, who has been visiting friends at down-the-lake points, returned home on Friday morning. He was accompanied home by his aunts, Mrs E. P. Roe of Naramata and Mrs Woodley of Vancouver, who came to visit for a few days with their sister, Mrs H. McDougall.

Mr J. McIntyre, a Vancouver merchant, came in on Friday morning to join his wife who has been spending the summer here. Mrs McIntyre has been residing at the New Townsite, and Mr McIntyre expects to remain here for a month's holiday.

Mr and Mrs Adam and son, who have been holidaying here for a couple of weeks, left by Saturday morning's boat for their home in Calgary.

Mr O. Keating was a passenger to Kelowna on Saturday morning, returning the same day.

Mr W. D. Miller came up on Saturday morning to pay his week-end visit with his family here.

Mrs Lee Mills was a visitor to Kelowna on Saturday, returning home the same evening.

Mr J. G. and Mrs Robison motored up to Vernon on Saturday evening to spend the week-end with friends there. They were accompanied by Mr Robison's cousin, Mr W. Greer, and on their return trip brought Mr Robison's sister, Miss Robison of Vernon, down. She returned by boat on Monday.

Master Charlie Veroy came down from Okanagan Landing on Saturday night to spend a part of his

holiday here with his grandparents, Mr and Mrs W. J. Moore.

Mr R. J. McDougall and F. Lorne Roe of Penticton paid a flying visit to town, calling on Mrs H. McDougall and Mrs P. N. Dorland. They motored up on Saturday evening and returned on Sunday evening.

Mr and Mrs Spackman, with their friend, Miss Greta Starley were passengers to Kelowna on Monday, returning in the evening.

Mrs Burkett Robinson of Westbank, with her four children, came down on Monday evening to visit Mrs H. McDougall, and meet her other aunts, Mrs E. P. Roe and Mrs Woodley, who are also visiting here.

Mr Hards, who with his family have been spending a holiday here, returned to Vancouver on Monday night. The family remain here for a longer holiday.

Mr J. Tait of Summerland, Fruit Pests Inspector, paid an official visit to Peachland on Monday and Tuesday

Mrs D. J. White received word on Monday that her son Roy had been wounded. We are pleased to note that the word apparently did not signify a serious wound. The same was reported to be about the leg.

Miss May Berch and her friend Hilda Duggin of Kelowna, who have been visiting Miss May's aunt, Mrs J. L. Elliott, for a few days, returned to Kelowna on Tuesday morning.

Mr Spackman, who brought his wife and children here for a vacation, was able to stay here for only a few days, as farm duties necessitated his returning on Tuesday morning. The family will remain for some time.

Mr and Mrs W. Fulton were passengers to Kelowna on Tuesday. They were accompanied by Mr Fulton's brother, who is visiting here. They all returned the same evening.

Mrs E. F. Smith was a passenger down the lake on Tuesday night.

Boy Scout Column

SUMMERLAND TROOP BOY SCOUTS.

O. F. Zimmerman, Scoutmaster. Headquarters, College Gymnasium.

Meets every Friday evening at 7.30 p.m.

The Patrol Leaders have decided on the names of their patrols, which are as follows:

No. 1, Leader, J. Gayton, Lions.
No. 2, Leader, A. Smith, Beavers.
No. 3, Leader, B. Taylor, Wood Pigeons.

At our last regular meeting we unveiled the Honor Roll of our Scouts who are at present on active service.

An open invitation had been extended to all, and, considering that only two days' notice had been given, there was an exceptionally good audience.

A short impromptu program was carried out prior to the unveiling.

Rev. H. A. Solly, president of the local association, acted as chairman, and delivered a fine address on the work of the Boy Scout movement.

Mr J. O. Smith sang, "The Veteran Song," with the whole troop joining in the chorus, after which vice-president Dr Andrew delivered a stirring address on "Our Soldiers and Sailors."

A short exhibition of tumbling was then given by several Scouts, to be succeeded by a vocal solo by Mrs E. N. Rowley, and a dance by Miss Chapin, both of whom motored up from Penticton for the occasion.

AUCTION

At the Vacant Lot, next the Keller Block,

KELOWNA

On Saturday, Aug. 3rd,

at 3 p.m.

I have been instructed by ERIC DART, Esq., to sell without reserve

23 HEAD OF HORSES

Including the following:

Imported Hackney Stallion "AGITATOR"

Imported Thoroughbred Mare "Merry Maid"

Thoroughbred Stallion "Quicksilver," 3 years

by Brockhampton, ex "Merry Maid."

The above horses are registered in Mr. Dart's name, and the papers are in order for transfer.

Balance of Stock includes: HEAVY HORSES, BROOD MARES and FOALS. All are young, and are probably the best set up bunch that it has been my privilege to sell.

TERMS—CASH OR APPROVED NOTES.

J. C. STOCKWELL, Auctioneer.

Mrs C. Laffin kindly accompanied.

Commissioner Heneage, after a brief talk on Scout work, unveiled the Roll, containing thirty-one names, a list of which appeared in The Review a few weeks ago, after which "The King" was heartily sung by all present.

Since the honor roll was completed another name has been handed in, this being that of William Gordon Campbell, grandson of Mrs M. Campbell, who was a member of the Troop since its organization in 1911; until the time of his leaving Summerland a couple of years ago. His name will be added to the Roll immediately.

The local Scouts wish to thank all those who kindly helped out with the program at so short notice, also Mr E. B. May, who presented the Troop with a Union Jack, which we hope to have flying soon outside our headquarters.

To-night Dr Andrew gives a further demonstration of First Aid, and will take all those ready for examination on this subject.

As we are now fixing up the new library room, we would be grateful indeed if any party, having story books that they have finished with, would kindly communicate with Mr Zimmerman at the Bank of Montreal as arrangements would be made to get them. A Librarian is to be appointed to-night.

More Business and Better Business

(Registered in accordance with
the Copyright Act.)

Article No. 13.

More trade means more money
for the merchant.

More money for the merchant
means better buying for the con-
sumer, because the merchant can
afford to cut prices closer by reason
of his increased volume of business
done.

More business means better busi-
ness—both for merchant and con-
sumer.

Obviously, the merchant can only
get more trade by getting more
satisfied customers, and the way to
get more satisfied customers is to
be able to sell good goods at the
most reasonable prices—at prices
that are as low as possible. This,
and a prompt, obliging store ser-
vice.

The merchant has got to have his
profit—he's got to have his per-
centage, just as the farmer and the
blacksmith have got to have their
percentage. Some people act as
though the merchant should have no
profit at all—but this belief is, of
course, nonsensical.

If the merchant does not get his
legitimate percentage of profit he
cannot stay in business. Neither
can the farmer or the blacksmith or
the printer or the undertaker.

And we all want to stay in busi-
ness, don't we?

If we are put out of business,
our town dies. It is business that
makes a town and keeps the con-
tiguous district alive and flourishing.

Streets, houses, trees, churches,
and automobiles do not make a
town. Trade is the important fac-
tor. Trade means that production
and labor are the vital forces be-
hind.

Production would be useless with-
out an outlet through trade and
commerce—except as a means of
sustaining individual life, or bare
existence.

We want more out of life than a
bare existence. We want educa-
tional and social advantages, and
congenial companions that make life
worth while. We want and must
have many, many things, that only
a hearty, interdependent commu-
nity spirit and activity can give us.

"One for all; all for one," is
the natural motto that should in-
spire all normal humans seeking
the ideal existence.

To keep our community intact we
must live and let live. We must
patronize one another, and see that
all worthy going concerns are kept
going, adding new ones as occasion
demands.

If all the business people were to
combine and send their printing out
of town the community would very
shortly lose the printery—one of its
most important, progressive func-
tions. If the farmers of the com-
munity boycott the merchants of
the town, every live business man
would be forced to get out of the
town—and so on until there would
be no town, and no community
worthy of the name.

Keep every dollar's worth of
trade possible within the commu-
nity and there will be work and busi-
ness for each and every one, and
the hundred and one accessory ad-
vantages that only live enterprise
can supply.

It is not live enterprise to help
kill your home institutions—it is
but a plank for your own commer-
cial and social coffin.

British Columbia is now produc-
ing and shipping more aeroplane
spruce every month than was sent
from this province from the time
the war commenced right up to last
November, when the Imperial Mun-
itions Board instituted its produc-
tion department for aeronautical
supplies here last November.

The War and The Sabbath.

By Dr. C. H. Huestis.

An American writer in a current
magazine asks the question, "What
Shall We Win With The War?" and
endeavors to answer the same. He
does not mean what material gains
the United States may expect as its
reward for participation in the fight
for freedom, but what spiritual
gains may be expected. This is
a question every nation engaged in
this world-struggle may well ask,
and the purpose of this article is to
point out that out of the war there
has come a new appreciation of the
purpose and the supreme value of
the weekly rest-day. And curious-
ly this new appreciation has not
come as the result of any sense of
repentance and need of observing
the laws of God, but as a by-pro-
duct of the very struggle itself.
Out of the terrific industrial strain
and stress of these days there is
coming a strong appeal for more
teaching upon the great thought
that lies at the heart of the Fourth
Commandment, a recognition that
it is not an arbitrary law but a
great intuition of the race.

There appeared in the London
Times in September 1915 a thought-
ful and arresting letter by Lord
Sydenham. "At this time of
supreme national effort," he wrote,
"it is vital that the conditions of
labor—of brains and muscle alike
—should be such as to prevent
cumulative fatigue, which may be
palliated by spirits, to conserve the
energies of the workman and enable
him to give his best to the service
of the State without mental or phys-
ical deterioration. In the more
difficult time which will follow the
war the need for increasing econ-
omic production, and at the same
time for jealously guarding the
public health, will be forced upon
the nation by inexorable necessity.
The great principle of compulsory
rest which Moses taught to man-
kind calls for scientific application
to lives far more strenuous and
more complex than those of the
Israelites."

Never has man lived in such a
state of permanent and growing ex-
citement and activity. We are
witnessing to-day the most formid-
able explosion of human energy
that has ever occurred on this plan-
et. That this tension of world
soul and body has its limits and
cannot be permitted to increase in-
definitely has been proved by the
investigation of the munition indus-
try in England, and the warning
of Lord Sydenham has been heeded.
In the earlier stages of the war,
men were widely employed on Sun-
day with the hope of increasing the
output. It was found, however, on
careful investigation by a commit-
tee appointed by Mr Lloyd George
at that time Minister of Munitions,
with the concurrence of the Home
Secretary, that not only were men
and women workers and machinery
breaking down under the constant
strain of toil, but the output was
far from satisfactory. "Time
gained on Sunday is largely lost,"
says the report, "by bad time-
keeping on the other days of the
week." On the question of Sunday
work by exhausted men, one fore-
man said he did not believe in "a
holiday on double pay." Another
remarked that Sunday work gave
"six days' output for seven days'
work on eight days' pay." As a
result of this investigation and re-
port Sunday work in munition
plants was discontinued except in
matters of sudden emergencies and
for repairs, furnaces, certain con-
tinuous processes, etc. (the workers
so employed being given a corres-
ponding period of rest during an-
other part of the week. (See Report
on Sunday Labor, T. Fisher Unwin,
London, 1915, Price 1d. Also
Health of the Munition Worker,
same publisher, 1917, Price 1s. 6d.)

Still another testimony to this
new appreciation of the value of
the Sabbath as a law of physical
efficiency has appeared lately in the
address of Sir Francis Cox to the
Royal Geographical Society upon
the proposed tunneling of the En-
glish Channel after the war. Near
the close of the address these words:
"It was anticipated that the daily
rate of progress would be such as
has never been attained hitherto in
any tunnel. To secure this no work
would be permitted on Sundays ex-
cept for ventilation, pumping, and
cases of urgent repair." Thus from
science and industry there is com-
ing to-day an appeal for a better
Sabbath observance.

Do you know of any exceptions
to the rule that all successful mer-
chants are advertisers? And have
you noticed that the most successful
merchants make the largest use of
newspaper space.

EMPRESS OPENING ATTRACTIONS

Saturday - - August 3rd

ADVERTISING

Is An Evidence of Community Loyalty
as well as Good Business

ADVERTISING will do more than build your business.
It will build your community.

It will encourage the people in your Community to buy at
home more.

It will counteract the effect of outside advertising and keep
so much more money in the district.

And your community, after all, is only the aggregation of
yourself and the rest of us.

Advertising to-day is, therefore, the business and the patri-
otic duty of the business men in this community.

And the logical medium is your home paper, as it reaches
every buyer in the whole district.

Regular Meeting Of School Board

Rev. Chas. Baker favored for Manual Training Instructor.

Tenders Rejected.

Cost of Caretaking considered high.--New Coal Order given.

The regular meeting of the Board of School Trustees was held on Tuesday evening in the High School building, all the members, with the exception of Mrs. Andrew, being present.

Among the communications was a letter from R. H. English, accompanied by a letter to him from the manager of the Bankhead mine, stating that he could not fill his contract for the Bankhead coal because of inability to obtain the coal, as the mine manager's letter showed. He suggested Princeton coal, and quoted \$9.00 per ton delivered at the school. G. R. Hookham & Co. offered Coalmont coal at \$10. Upon motion of Trustees Marshall and Garnett Messrs. Hookham's tender was accepted.

An increase in salary of \$60 per annum was granted C. D. Denton of the High School upon motion of Trustees Gartrell and Marshall, this action being the result of a formal application by Mr. Denton for an increase. The secretary was instructed to advise Mr. Denton that the Board felt that this was all that could be done under present conditions.

Tenders were received for the position of caretaker for the Central and High Schools, only two being submitted. C. J. Gale asked for \$65 a month for the four winter months, and \$85 for the other eight months. The present caretaker also submitted an offer, his figures being \$60 and \$45. Upon motion of Trustees Gartrell and Garnett neither tender was accepted, the chair reminding them that there was only a month in which to engage a caretaker.

The question of caretaking opened the subject of destruction of school furniture and other property, it being pointed out that there was considerable destruction in the High School building during the noon hour. The discussion ended in the appointing of Mr. Marshall a committee to interview the principals of the High and Public Schools to point out their responsibility as prescribed in the school law.

An application for the position of manual training instructor was received from Rev. Chas. Baker, who spent a few minutes with the Board. Mr. Baker comes here from Lethbridge, Alberta. Mrs. Baker and young son are here for the benefit of their health, and Mr. Baker is spending his vacation with them. His desire to remove to a lower altitude, we are informed, has prompted him to take advantage of this opening by putting in an application. A similar vacancy has occurred at Penticton, and Mr. Baker has applied for that position with the understanding that the instructor, whoever he may be, will teach three days at Penticton and two days here. A certificate of his qualifications received from the Yorkton, Sask., Collegiate Institute, was read and considered very satisfactory.

In a few brief remarks Mr. Baker asked that his application be considered only on the basis of the service he could give the public in the position.

On motion of Trustees Gartrell and Garnett Mr. Baker's application was accepted, conditional upon Penticton also engaging him. Mrs. Kolley and Messrs. Garnett and Marshall were appointed a committee to confer with the Penticton School Board.

A committee of the three male members was appointed to arrange for a suitable place of meeting for the Board.

A report from the Medical Inspector stated, among other things, that the improved heating system at the Central had effected a diminution of epidemics of colds. Sanitary conditions were also improved through additional plumbing.

Success never roasts on the banner of a man who cannot rely on himself.

The Toll of Battle

Comrades and foes lying side by side after a fierce conflict in France.

Growers Losing by Rough Handling

Some Prairie Prices for Fruit and Vegetables.

This week brings to an end several of the perishable fruits, writes J. A. Grant, Prairie Markets Commissioner for B.C. Currants, raspberries, Loganberries, and sweet cherries are almost over. There is a great need for a reform in the manner of shipping these fruits by express. The growers are now taking losses that should be a charge on the express companies. What with careless loading, inattention to ventilation, and transfers in transit it is little wonder that jobbers are complaining about buying f.o.b. shipping point. Next season, if we are on the job, we will take up this question in a systematic manner, with a view to making conditions tolerable. We are assured of the cordial co-operation of the express companies.

We are now receiving B.C. cukes and tomatoes (field grown).

Cucumbers are selling wholesale at \$2.00 per box of 2 1/2 dozen.

Tomatoes are wholesaling at \$2.00 per 4 basket crate.

Sour cherries are being quoted from Okanagan at \$2.00 and \$2.25 per 4 basket crate.

Peach plums have appeared from B.C. in considerable quantity, and are selling at \$2.00 per 4 basket crate.

A car of B.C. apricots arrived to-day (Friday) and they sold readily at \$2.40 a 4 basket crate.

Peaches on the market are largely Crawford and slappy varieties from Washington, and Triumph and St Johns from B.C. B.C.'s are costing \$1.50 to \$1.85, f.o.b. Okanagan.

Apricots are selling for from \$1.75 to \$1.85 f.o.b. Okanagan.

Apples, early, crates, \$2.25 to \$2.50 f.o.b. Okanagan.

FRUIT PRICES IN REGINA.

Regina, Aug. 2.—There are a few mixed cars arriving from Yakima, but the assortments are not of the most desirable. Yakima appears to be short of peaches and plums. Peaches in mixed cars are offered at \$1.00, plums at \$1.25, Bartlett's \$1.75, and Italian prunes will be ready for shipment next week at \$1.00. Early apples are being quoted at \$1.75 to \$1.85. A few mixed cars from British Columbia are rolling containing apricots, peaches, plums, and early apples. Apricots \$1.75 on 1's and \$1.50 on 2's. Plums, \$1.75; crate apples, \$2.50, all f.o.b. shipping point.

Crop conditions are not favorable and the demand is not very active.

The Rialto Theatre is not able to care for the crowds that come to see the movies. We are informed by Manager Darkis that work will be started shortly on an extension of thirty feet to be added to the rear of the present building.

Government Not Interested in Our Water Problems

Minister & Comptroller Here. Not Prepared to Assist With Storage.

Following a telephone advice that Hon. T. D. Pattullo, Minister of Lands, and Mr. W. Young, Water Comptroller, were on the way from Kelowna to Summerland and would like to meet the Council to discuss irrigation matters, the members of the Council were called together last Friday afternoon at the Council chamber, and adjourned to the hotel, where a short conference with the visitors was held on the verandah.

It quickly developed that there had been some misunderstanding, the minister stating that he understood that the Council had expressed a wish to meet them for a specific purpose, while Reeve Blair replied that he had been informed that the minister and the head of the Water Branch were coming with a proposition with reference to our irrigation problems.

Nothing of any local value came out of the short conference other than that the minister informed the Council that there were no water difficulties here requiring government attention. The government, he said, had no general policy of water storage and administration.

Mr. Young was asked if his department could send a boring machine to bore for water at the mouth of Garnett Valley, but he replied that all the government machines were engaged for some time in advance. He was not disposed to undertake any boring other than for water for domestic purposes in arid districts.

Mr. L. V. Rogers, Kelowna, accompanied the visitors, and the party was joined here by Mr. W. C. Kolley, all going from here to Naramata, returning here later for dinner at Hotel Summerland. Matters relating to the situation at Kaledon were discussed that evening with Mr. Jas. Ritchie.

Predicts Will Be No Car Shortage

Calgary.—Those that are in the know predict that there will not be any repetition of the last few years in car shortage this year. Washington growers have that assurance from railway companies, and discussing the prospects for car supply with a well-informed railway man, he firmly believes that cars will be long instead of short.

His arguments were logical. The wheat crop is short and the cars will not be needed for hauling wheat to the extent that we would like, hence the plenty for fruit hauling.

Apricot Crop Bulks Up Well

Local Shipments Far Exceeds All Records.

Despite the serious inroads on the local apricot crop caused by the late May frost, the output is still away ahead of any previous year and greatly exceeds the revised estimate.

We are informed that the Union has shipped to date thirteen carloads, including the output of their Naramata house, and that at least three more carloads remain to be shipped. Their total shipments last year were six carloads.

The Stuart Fruit Co. is also making heavy shipments, and are bringing apricots here from Naramata, Kaledon, and Penticton. Asked how the local output compared with last year Mr. Stuart said he had not made any calculation, but he thought it would at least equal last year's.

Opening Prices For Apples.

Reports are in our hands of advance sales of apples as follows, says Prairie Markets Commissioner, J. A. Grant in his weekly bulletin:

Mackintosh Red, No 1, from \$2.50 to \$2.75 per box. In this class also comes the Spy, Delicious, Newtowns, Spitz, Winesaps, and owing to their scarcity, the Jonathans, Romes, Wagners, Kings, Grimes, etc., are opening at approximately \$1.75. The spread between the No. 1, No. 2, and No. 3 in the latter class will be 15c., while the former will vary considerably.

Transcendent crabs will open at \$1.40, and Hyslops at \$1.75.

Early apples, orchard run, in crates, are quoted at \$1.65.

These prices are f.o.b. Okanagan Valley points.

Pears are showing up bigger and better than was anticipated. Yakima estimated earlier in the season that they would ship 1,350 cars this season, now they figure on having 1,650 to 1,775 cars.

Apricots and cherries from Washington are almost past.

Cherries have been a very satisfactory deal for growers this year.

Latest reports from reliable sources place the apple crop of the Pacific Northwest much lower than was at first estimated. The June drop has been very heavy, and many of the standard varieties are having an off year. This is particularly true of Jonathans, Rome Bonuts, Delicious, Bon Davis, Gano and Arkansas Red. The whole northwest will not exceed 75 per cent. of last year's crop. Yakima Valley, that was first estimated to produce 11,500 cars, is now placed at 7,250 cars, and Idaho, that produced 3,500 cars last year, will not

Minimum Load For Cars Based on Cubical Capacity

Railway Tariff Changes of Importance to Carload Shippers.

Some important changes of interest to fruit shippers have just been announced in the railway tariff relating to carload shipments of fruit and vegetables. It will be remembered that early in the year in conference with chief officials of the C.P.R., and particularly with the traffic manager, Mr. W. B. Lanigan, a schedule of minimum carloads for fruit and vegetables was agreed upon, the minimums fixed being in most cases very considerable increases upon the old schedule with a view to conserving car space and making fuller use of available equipment. This schedule was based upon minimum weights of the various kinds of produce, a plan which has not been found to work to entire satisfaction owing to the variation in the size of cars used for fruit hauling. In the smaller cars the minimum weight would often be too much for the capacity of the car, while the larger cars could be loaded still heavier without inconvenience.

In a telegram received from Ottawa by Dominion Fruit Inspector Loveday, the revised tariff is given, the basis for minimum loads being the cubical contents of the car.

The following figures are given:

Fresh Fruit, 60 per cent. of cubical capacity of car.

Fruit and Vegetables (mixed cars), 66 and two-thirds per cent.

Apples (June 1st to Sept. 30th), 75 per cent.

Apples (Oct. 1st to May 31st), 90 per cent.

Vegetables (early, June 1st to Oct. 15th), 66 and two-thirds.

Vegetables (Oct. 16th to May 31st), 80 per cent.

These figures are not to apply to refrigerator cars of less than 1,500 cubic feet capacity.

Adopted Soldier Writes Friends.

The following is an extract from a letter received from L.-Corp. M. D. McCharles, who for almost three years was a prisoner of war in Germany. L.-Corp. McCharles was a prisoner "adopted" by a circle of friends here in Summerland. At the end of April this year he was exchanged to Holland, and is now at the Hague. "No doubt you are wondering what I am doing here in Holland when I should be looking hopefully through barbed wire and waiting for the end of the war. I came over here with a party of N.C.O.'s from Langensalza April 30, and if all goes well at the convention that is sitting at The Hague now I may be in England before so very long. Let us hope so any way. I have been in two hospitals and three camps in Germany, but the last one, Langensalza, capped the climax. For fifth, lack of attention to sick and wounded, and for the brutality of the authorities, I don't think it can be beaten in Germany, and that's anything a lot. I have seen cripples and wounded men made to work in the swine pens where the stench and mud were enough to make a strong man sick. I have seen our wounded, who had been behind the line for a month without medical attention, taken into the camp, and if it had not been for our own medical stores sent by the Red Cross from England they would have been another month without it. I shall never forget those nights. Talk about the front and the trenches, one needs to be a prisoner before he realizes what war really means. Were it not for the parcels we received from home one half the British prisoners in Germany would never see England again. Conditions are no better now than in 1914. They are worse, and food and clothing, and especially surgical dressings are needed more than ever. How I wish every Britisher were out of it."

have in excess of 700 cars this year. Jonathans are the leading variety there, and they are off everywhere.

Manual Training For the Fall Term

Director Here, and Arranges Details with Trustees.

Girls' Class, Too.

Teacher will Spend Two days Here and Two in Penticton.

It now seems probable that a department of manual training will be opened in connection with our High and Public Schools this fall. Mr. John Kyle, Director of Technical Education in the province, was here last Saturday, and, so we hear, met the School Board at a special meeting that evening.

Penticton has been sharing with Kelowna the time of Mr. Mitchell, manual training instructor, but he is now to spend all his time in the Kelowna district, taking on some of the country schools. This leaves Penticton open, and some progress was made by the committee appointed by the Summerland Board to confer with the Penticton Trustees toward an arrangement whereby the two towns can employ the same instructor.

We understand that the question of a suitable building was one of the matters discussed with Mr. Kyle at Saturday night's meeting, and that he favors making an addition to the High School building for manual training purposes, with provision for a further enlargement to accommodate domestic science classes.

Another meeting of the School Board was held on Thursday morning, at which, according to a telephone conversation with the secretary just as we go to press, Mr. Baker was engaged for two days each week to teach the manual training classes. Summerland will pay him one-half of four-fifths of the prescribed salary, \$1,800, less the portion paid by the province, Penticton having agreed to pay a like amount for two days' service, and Mr. Baker having consented to an engagement for four days out of the five. The principals of the High and Public Schools were invited to attend at Thursday's meeting to confer with the Board and the manual training instructor with reference to the new classes. Principal Lees found it impossible to attend on the short notice given.

We are further informed that the girls will be permitted to take up manual training. This, because of the fact that it has not yet been possible to get a domestic science teacher.

B.C.'s War Gardens

Frederick Abraham, Hon. Chairman of the Vacant Lot and Home Garden section of the Canada Food Board, reports that there has been enthusiastic response to the appeal for the planting of War Gardens throughout the West.

"The British Columbia War Gardens could supply the Prairie Provinces with fresh vegetables for many months in the year," says Mr. Abraham, "if the transportation problem could be solved. I believe this is only a question of time. Everything seems to grow in greater abundance in British Columbia, and many of the vegetables have two crops in the season."

Mr. Abraham reports that the school children of British Columbia have joined the school garden plot movement with splendid enthusiasm and the crop produced will make a material difference to the local supply.

Food Conditions Are Still Serious.

Mr. John R. Clynes, who succeeded the late Baron Rhonda as Food Controller in Britain, reports to the Canada Food Board that the food situation in the United Kingdom is improved, generally speaking, but that the season of anxiety is not yet over. Food Controllers of all the Allied countries met Mr. Hoover in conference in England on July 22nd.

FRIDAY, AUGUST 9, 1918.

THE IRRIGATION CONVENTION is a thing of the past, and from which no material of any great value in the solving of our local irrigation problems has been obtained. And the Minister of Lands and the head of the Water Branch have again visited us only to confirm the impression held by this journal that no assistance can be hoped for from the government. There remains only the one course for us. It is up to us to put this matter right ourselves. The task is not such a difficult one that we need longer hesitate. We know what we want. Unless we are mistaken, we need not go abroad for the money necessary to carry through the improvements. Nor should the procuring of the necessary labor be an insurmountable difficulty. We are a united people on the question of an increased supply of water. Action is what is needed.

\$ \$ \$ \$ \$

THAT THERE ARE NOW GOOD PROSPECTS for the early establishing of a manual training department in connection with our schools is a matter of great satisfaction to The Review. As our readers are aware, this paper has long advocated the inclusion of this subject in the school curriculum. Further evidence of our interest in this matter is the publishing in this issue, at some expense, an article by Mr John Kyle, head of this work in B.C., and sent to us by him. There may have been good reasons why The Review was not extended the usual courtesy of an invitation to meet Mr Kyle with the members of the School Board on Saturday evening. Certainly it was not an oversight, for, when asked why he had not given the press the usual notice, the secretary's reply was to the effect that he had been instructed otherwise.

\$ \$ \$ \$ \$

REDUCTION OF HOUSEHOLD consumption of sugar in Canada to a ration of one and one-half pounds a person a month for personal use, is requested by the Canada Food Board in a statement just issued. The utmost possible conservation is urged in addition to the restrictions now in force upon all manufacturers who use sugar. Householders are also asked to use yellow sugar instead of the granulated product wherever possible, because in order to get the most efficient economic results from the refining of sugar it is necessary that about 30 per cent. of yellow sugar be produced by the refineries. The Food Board's appeal is made as a result of a conference of the International Sugar Commission and a full review of the raw sugar situation, the balance of crop on hand and the Allies' requirements.

\$ \$ \$ \$ \$

WHO WERE AT RED CROSS last meeting, and how many hours work did each put in? That may seem a rather pertinent question. But, in looking through an exchange that comes to us from a small town across the line we note that it contains a list compiled from the Red Cross register in which, it is evident, each worker is registered and a record made of the hours of work each member puts in. In this same register is entered the donations received each week. Perhaps in this there is a suggestion that may be of value to our faithful Red Cross workers.

\$ \$ \$ \$ \$

OKANAGAN'S APRICOT CROP is a complete failure! So says an advertisement in the Nanaimo Free Press. With this statement and another to the effect that only a very limited quantity of apricots will be available, the Nanaimo firm asks that orders be placed with it at once, presumably to be filled with imported fruit.

IT WOULD BE A thousand pities to produce vegetables or fruit in response to the War Garden appeal and then have more on hand than could be used so that quantities would perish. All surplus vegetables over immediate requirements should be canned, dried, and stored away, for winter will follow a season of plenty, and all the world will be short of food.

ARRANGEMENTS HAVE BEEN COMPLETED by the Canada Food Board with the United States Food Administration by which 15,000 tons of linseed oil cake and meal will be distributed to dealers, to relieve the scarcity of feed and fodder. Applications should be sent direct to the Canada Food Board on regular import application blanks, with sworn statements of quantities sold during the three years prior to January first. Allotments will be made on that basis.

WM. RITCHIE.

BAKERS, CONFECTIONERS, public eating places, and private households must use one pound of substitutes to every nine pounds of wheat flour, until further notice, according to a Canada Food Board order. The order, which was to have gone into effect on July 15th increasing this proportion of substitutes in Eastern Canada, has been deferred until further notice, owing to the limited supplies of substitutes for wheat flour at present available in Canada.

\$ \$ \$ \$ \$

THERE WILL BE NO SUGAR from Java available this year for British consumption, according to a recent statement of the Chairman of the Sugar Committee. The Cuban crop is 300,000 tons less than estimated. Conservation of sugar for preserving time is imperative upon every householder.

\$ \$ \$ \$ \$

THE WAR IS GIVING PUBLIC CONTROL of public utilities a great boost. The latest move in this line is the taking over by the government of the telephone and telegraph systems of the country on the first day of August.

LARGER IRRIGATION SYSTEM.

WHEN THE PRELIMINARY PLANS now being prepared by the Municipal Council for doubling the carrying capacity of the upper ditches are represented to the ratepayers at the meeting on Tuesday, August 27th, it will be up to the ratepayers to approve of the expenditure and to get behind the Council in raising the necessary money. We believe the issuing of debentures of small denominations will be found popular and that these can be largely, if not wholly, disposed of locally. Every ratepayer who can possibly attend should be at that meeting. This is a question in which every citizen is concerned.

\$ \$ \$ \$ \$

THE COST OF PROVINCIAL GOVERNMENT.

A PUBLICATION RECENTLY ISSUED by the Vancouver Board of Trade gives some startling figures regarding the cost of our provincial administration. It is reviewed by the Golden Star in an illuminating article which is well worthy of the attention of the electorate. The Star says:

"Without going into the subject at too great a length, the facts brought to light are of so startling a character that some extracts will not be out of place. It must be borne in mind that British Columbia is of large area and sparsely populated, consequently administrative costs would be higher per capita than in a province of smaller area and more densely peopled. Nevertheless, the figures are still alarmingly high. To take one outstanding item, namely the civil government salaries, we find that during the years mentioned the expenditures on this item alone have been as follows:

1910 \$389,701; 1913 857,092; 1917 1,477,611; 1918 1,453,256.

"The population of British Columbia to-day is little more than in 1910, and yet our provincial government's salary bill has increased 350 per cent.

"By way of parenthesis, the report goes on: 'It is often contended that B.C. has an enormous amount of development work connected with its administration which warrants a high ratio of expense. It will be found, however, that a large revenue is already derived from such items as Timber Sales and Mineral Tax, which are in the nature of revenue derived from the sale of a portion of her natural resources and might well be absorbed by expenditure on permanent improvements.'

"Comparison is made of similar expenditures in other provinces in Canada, namely the civil government salaries, the cost of education, and the cost of public works during the year 1916. As to civil government salaries, B.C. was \$1,555,562, or more than double Ontario, which amounted to \$826,653. Education in B.C. cost \$1,325,308, as against \$2,261,801 in Ontario, \$1,545,079 in Quebec, and \$907,408 in Alberta. Public Works cost \$2,529,105, as against \$3,344,039 in Ontario, \$935,851 in Quebec, and \$553,962 in Alberta. The population of British Columbia amounts to 400,000 and Alberta 500,000, whereas the civil government administration cost \$1,477,611 in British Columbia in 1917, and \$379,507 in Alberta the same year. The report contends that the total expenditure in the various branches has grown out of proportion to the increase in population, and it has been put forward without any wish to embarrass the government, but with a view to obtaining further information and of ascertaining whether assistance could be offered to the government in carrying out reforms in the administrative costs. The report was read in the British Columbia Legislature during the last session; and the government was asked to consider the advisability of appointing an expert to investigate the whole question of government administration, and suggest adequate remedies. The premier was not very sympathetic to the suggestion, doubting that any practical result would be forthcoming or the expense justified. He admitted the abnormal cost, but blamed the mass of arrears of work and complicated problems left over by their predecessors, which had prevented them from tackling the question of expenditure. If the Vancouver Board of Trade have no adequate remedy to suggest for the rotten state of affairs they have unearthed, at least the publicity given the matter should have some effect. It should then become evident to the meanest intelligence that we have an over-elaborate system of government for a population of our size, to say the least. The machinery of government in vogue should be capable of administering an empire, let alone 400,000 people."

Your patronage respectfully solicited.

FRIDAY, AUGUST 23, 1918.

THE IRRIGATION PROGRAM.

THE PROSPECTS that work on enlarging the irrigation system whereby double the volume of water now possible will be carried from the creek to the reservoir, the pipe and north ditch systems given separate intakes at the reservoir and material improvements and enlargements made in the distributing systems of both pipe and ditch, will be cheering news, particularly to citizens in the northern section of the district.

No engineering difficulties lie in the way of doubling the water supply. The question is merely one of money, material, and labor. The total cost is trivial when compared with the increased production which the larger supply of water will make possible. It would not be surprising to us if the increase in the crops on Jones' Flat alone would be sufficient to pay for the whole cost of the improvements in one or two years.

In the past we have looked to outside money markets when money for capital expenditure was needed. Changed conditions now put us on our own resources, and much of this \$30,000 must be raised locally. The money is here, the price is attractive, the purpose of the loan is most worthy. This expenditure will give large and immediate returns to the community, and the security is of the best. The raising of \$30,000 should not be a difficult matter.

Labor in sufficient volume to carry the work through expeditiously and economically will be needed. Every citizen who can do a good day's work should offer himself, otherwise, provision must be made to bring in outside labor. The work must not be held up for lack of this essential.

§ § § § §

WHY NOT FOR OKANAGAN?

FREE FERRY SERVICE across the Fraser River at three different points on the lower mainland is maintained by the Provincial Government. According to a recent newspaper statement these ferries carry an average of fourteen cars each trip. The ferry between Mission and Matsqui makes sixteen round trips daily, that between Ladner and Woodward six round trips, while between Rosedale and Agassiz five round trips are made. These ferries give connection between the north and south bank of the lower Fraser, presumably, where it is impossible to span the river with bridges, or where it is more practicable to operate ferries than to build bridges.

Here in the Okanagan the government has built a trunk road which from Vernon south to Kelowna lies on the east side of Okanagan Lake running to the water's edge at Kelowna. To continue the journey southward it is necessary to cross the lake, as the government trunk road runs from Westbank Ferry southward on the west side of Okanagan Lake. Residents of Lower Okanagan points and tourists who come into the Valley from the south who wish to motor to northern points in the Valley have no course but to cross the lake from Westbank to Kelowna, for though a road has been built northward beyond Westbank Ferry we are informed that much work is yet to be done to make it passable for autos. The ferry then is an essential link in the provincial highway traversing this Valley. If it is right that the province should maintain three ferries in the lower Fraser it should also give a free ferry service across the Okanagan, at least until such time as the road from Westbank northward to Vernon and beyond is made suitable for motor traffic.

§ § § § §

GOOD ROADS WITHOUT TAXES.

THE STATE OF WASHINGTON is to have from 1,800 to 2,000 miles of the best paved roads in the world, if the plans adopted at the recent state convention of County Commissioners and County Engineers

are carried through. These roads are to be built without an additional cent of taxes on farm or town properties. Not only are these paved roads to cost the realty holders nothing, but the plan contemplates the tremendous saving to the automobilists of the state, the increased mileage, in gasoline, in tires and in equipment, while opening still greater avenues for utility and enjoyment. Millions of dollars will be saved annually to the people of the state. Conservative statements placing the saving at \$75 minimum per car per year.

Briefly the plan contemplates the bonding of the automobile revenues of the state for a period of years. By placing the credit of the state behind such a bonding plan and enlarging the revenues of the automobile department to meet the increased charges and sinking fund, the trucks and automobiles using the system for profit and pleasure would provide all the money needed for paving the proposed highways, while the regular road revenues now available would be devoted to the preparation of road beds, the laying out and improving of new roads, and the maintenance of many roads now sadly neglected because of the requirements of arterial highways.

Not only will this plan give the state a marvellous system of automobile and traffic highways, solving the problem of inter-city communication, but it will release road money in the various county and state funds to benefit the roads in the remotest corner of Washington.

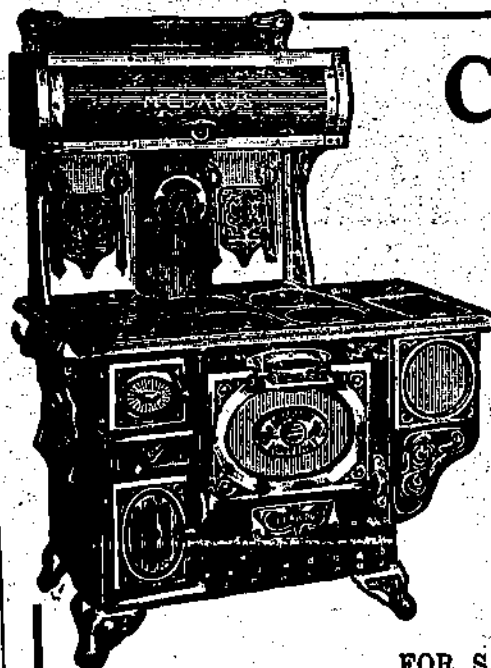

If Washington decides to go forward in this development it will place her in the forefront of the progressive states, only one other in all the nation having actually adopted this simple and effective plan for meeting the problem of hard-surfacing its roads, to stand up permanently under the pressure of modern traffic.

§ § § § §

THAT THE MUNICIPALITY is not equipped to take advantage of the brief seasons of wet weather to grade and drag the roads is much to be regretted. The showers of the last few weeks have put the surface of the roads in good condition to work, at the same time emphasizing the need of repairs.

§ § § § §

AS IS OFTEN THE CASE: stories of crop failure in the prairie provinces are now being followed by reports of great improvements brought about by frequent showers. A Winnipeg report says that conditions generally are improving with plenty of labor available. Manitoba will have a fifty million bushel wheat yield, one million more than last year, while both the oat and barley crop are above the average. Since the middle of last month it is estimated that late rains have added 20 per cent. to the grain yield of the three prairie provinces. The improved outlook should result in greatly stimulating the buying of fruit.

Controlled Heat

The oven in the Kootenay Range is surrounded by an envelope of heat which is at every moment under your instantaneous control. With the Kootenay Range the heat control is so easy and accurate you can use all the heat from your fuel without waste.

GERMANY'S RUINED TRADE.

THE GREAT GERMAN shipping master, Albert Ballin, is a broken man as the result of the war, according to former American Ambassador Gerard. Ballin is looked upon as the creator of Germany's merchant marine which up till 1914 had been expanding rapidly, carrying the German flag on every sea. Ballin was opposed to the war for he saw that nothing the war lords promised could possibly compensate for the inevitable loss of Germany's overseas trade. What Ballin predicted has come to pass. Not a German merchant ship is afloat anywhere. Even her home ports are closed and her industries, except those maintained for war purposes, are at a standstill. Not for many years, if ever, will the nations of the world be ready to buy of her manufactures or to supply her with raw materials. The carefully pre-conceived and established world trade created by such men as Ballin has been for ever ruined by German Junkerdom.

RATEPAYERS CONSIDER IRRIGATION PLANS.

(Continued from page 1)

thirty-seven and a half cents per acre.

When asked if he could reply to Dr Andrew's questions, Mr Logie referred to an early survey of the district made by a government engineer, and from memory gave the number of acres of irrigable land, good land, and area now irrigated.

In a general discussion which followed, marked differences of opinion as to the amount of water per acre required were shown.

Prof. Broad expressed considerable disappointment in the reports. Summerland is the best place in the world, the only drawback being shortage of water. The place is growing; but its growth has been hampered because the water system is too small. The war and lack of capital have been advanced as excuses for not making improvements. But Summerland now has a lot of rich men and can put up \$100,000 if necessary. He had attended the meeting of the Council when the several items of work in the improvement program had been considered. Three quarters of this had been left out of the report that night. With others he had gone over the system on Saturday, and he had come away with a very respectable opinion of the water system. The council's scheme is to double the water supply largely by stopping waste. After having heard J. J. Mitchell's discussion of the work for the canal he thought that Mr Mitchell was the man to carry out that work. He predicted that there would be no difficulty in raising the money locally, \$5,000 a day was coming in by mail with orders for soft fruits. Prof. Broad ended his forceful speech, which showed that he had obtained a good grasp of the water situation, by proposing a resolution to the effect that the ratepayers accept the report and authorize the Council to raise the necessary money and proceed with the work with all speed. Some doubt was expressed by the ratepayers that the double supply of water would be sufficient, and later a proposed amendment by W. C. Kelley resulted in the appointment of a water users committee, consisting of F. A. C. Wright, R. H. Helmer, Prof. W. T. Broad, J. L. Hilborn, and A. Moyes to confer with the Council and to obtain full

LOCALS.

"Every good store even though it be a small one should be advertised."

The world's champion cow has produced 32,000 pounds of milk in twelve months. Through a typographical error in an article in these columns last week this production was given as 3,200 pounds.

In a recent letter to his father, Rev. A. Henderson, Pte. Douglas Henderson stated that he was then in hospital and expected to be sent back to Canada. He did not state why he was in hospital.

Messrs C. C. Chittenden and T. B. Turner, together with their wives and all their camping paraphernalia necessary for stops en route, left last Tuesday afternoon on an extended motor and fishing expedition, says the Penticton Herald.

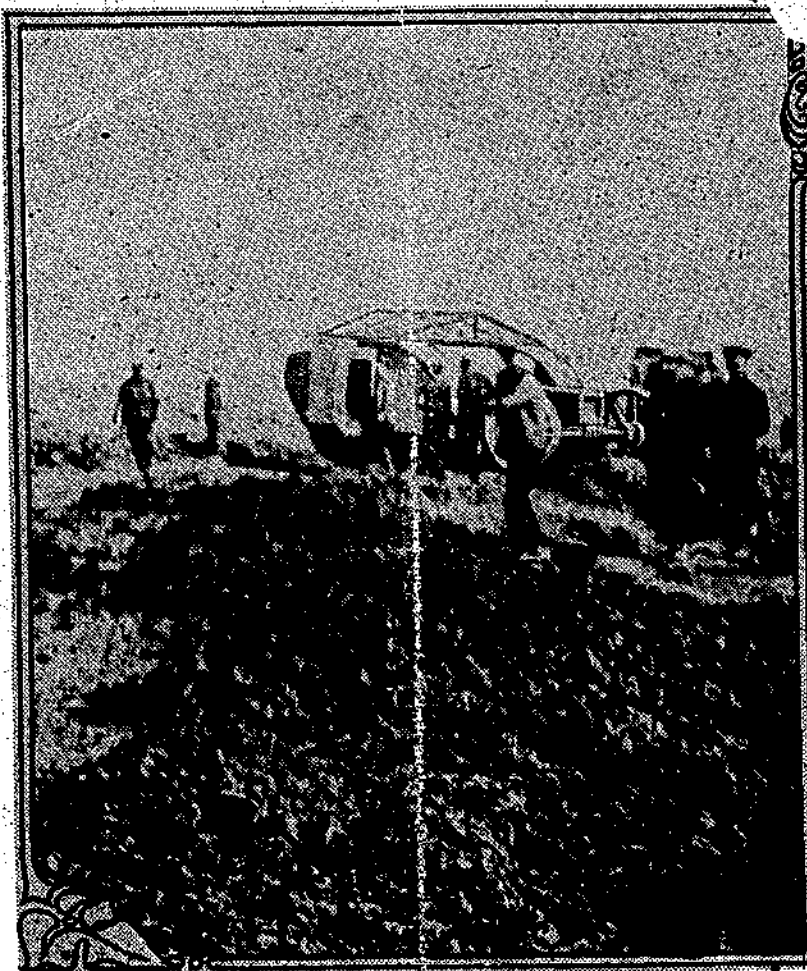

The party went via Princeton and Hope to Vancouver and will visit Camp Lewis, near Tacoma, Mount Ranier, and other Coast points, and will return by Seattle and Wenatchee.

McWilliams' ad. in this issue is of special interest to school children.

John Stuart, now of Tees, Alberta, arrived here on Tuesday night to attend to some matters in connection with the sale of his orchard property. He will remain a few days before returning to the prairie province.

Mr E. F. Sanborn has bought the John Stuart property on Jones' Flat. This property consists of thirty acres of orchard and range land, about eight acres being in orchard. The sale was made by F. D. Cooper.

Famous Caterpillar Forts.

These travelling forts, built on the idea of the caterpillar farm tractor, heavily armored, carrying quick-firing cannon and machine guns, have created havoc in the German ranks.

Rev. Chas. Baker Given Leave of Absence.

The members of the Baptist Church refused last night to accept the resignation of their pastor, Rev. Charles Baker, which was offered on account of ill health of his family. It was formally agreed after a frank discussion to grant Mr Baker a year's leave of absence. This was acceptable to Mr Baker, conditional to the effect that the church reserve the right to invite another pastor at any time should the church think it of the best interest of the church. Mr Baker will return to the Okanagan Valley to teach manual arts in the Penticton and Summerland schools for the coming school year.—Lethbridge Herald.

Mr Baker is expected to arrive here to-night and will be ready to take up his new duties with the beginning of the school term.

It is hard to tolerate in others things that we often tolerate in ourselves.

The only reason some men marry is because the woman wants a home and the man wants a servant.

Only the wrong kind of education unfits a man for earning an honest living.

If a man is his own worst enemy he has a one-sided fight on his hands.

The only thing green about a grass widow is in the fellows who hang around her.

B.C. Editors.

(Kamloops Sentinel-Review.)

The editors of the province will meet in Vancouver on the 24th and 25th of this month. They are, as a rule, during war time, just making a living, and some of them hardly that, yet if you ask anyone of them how their section of British Columbia is getting along, you will see his face brighten up and in a confidential tone he will tell you, "We are lucky this year; our section of the country is the best in British Columbia, and business in every line is flourishing." Not a knock, no pessimism, everything optimistic, and although he may be wearing the same suit he wore at the convention last year, and his wife wearing a dress that has been made over, with the same hat she had for three years, yet his text and his slogan will be first the success of the war, and then for the progress and prosperity of the British Empire and British Columbia. Those who were young enough and were fit, went overseas, and some are buried there. Those who were compelled to remain at home have written and preached patriotism from the day the war began to the present. They have not quarrelled about wages that they might earn; they have not complained as the business slackened up; they have freely given for the cause in time and money, and what is more, they have the utmost faith in British Columbia and are doing all within their power to make this province better and greater than ever after the war closes. That is the stuff the newspaper men of British Columbia are made of, and each one is leaving behind him the trail of labor and love for his country and for those who are sacrificing so much in Flanders and France. And to each it matters not whether the trail is covered in the course of years with the dead leaves of forgetfulness. What they have done has been done for the present and posterity. They have asked for no praises while they are working and expect no eulogies when they are dead. They never strike except for the good of the people and humanity. And poor as they are, as a rule, they go on in the same manner. If it became necessary for one less meal a day or a smaller house to live in, they meet the condition cheerfully. That's what we think of the editors of British Columbia, and since we have been in the business in this province for twenty-one years, we should know what we are talking about.

This Business Was Built Up by Advertising.

Concrete Example of a Firm Achieving Success by Handling Advertised Goods and Advertising the Goods they Themselves Handle.

G. Albert Garver is a general merchant doing business at the town of Strassburg, Ohio, about eighty miles from Cleveland. Strassburg has a population of about one thousand. Within the twenty-five mile radius from Strassburg are the following towns: Mansillon, population 18,000; Canon, population 90,000; Akron, population 125,000; Canal Dover, population 9,000; Dennison, population 17,000. Cleveland, the sixth largest city in the United States, is only 85 miles away, and is on a direct trolley line. This is the kind of competition that Mr Garver faces, in addition to the mail order trade. Makes some of our problems look pretty small, doesn't it?

Mr Garver's father started business in Strassburg fifty years ago. The best yearly turnover he had was \$12,000. G. Albert Garver with his brothers took over the business from their father. They had practically no experience in the store business, but had lots of initiative and a desire to learn. Their business grew. In 1916 their turnover was \$472,700. In 1917 it was over \$600,000. It is still growing.

COUNCIL'S PLANS FOR INCREASED WATER SUPPLY.

(Continued from Page 1.)

irrigating. Not more than this is ever likely to be needed to be irrigated. Of this, 2,500 acres are now cultivated and irrigated as well. This acreage is supplied with water thus:—

a. TROUT CREEK system cares for about 1,000 acres, and the pumping system about 125 acres additional.

b. ENEAS CREEK in Garnett Valley irrigates 900 acres, and 400 more could be irrigated.

c. PRAIRIE CREEK irrigates 350 acres.

d. The three above total 2,375 acres and leave 600 acres to be irrigated from Trout Creek, with whatever assistance can be got from the other sources.

The question then resolves itself into this. Will the suggested work

to double the present capacity from the intake down, furnish this need? And has the present steel flume capacity enough? The steel flume is the crux of the whole system as suggested.

In an acre there are 43,560 square feet, and in 600 acres about 26 1/2 million square feet. Each square foot of land irrigated should get a foot of water. Hence we need 26 1/2 million cubic feet of water per annum, delivered during the 125 days of our irrigation system. That is, 210,000 cubic feet per day.

Will the steel flume carry so much? What is its carrying capacity?

Now the steel flume is semi-circular in shape, having a diameter of six and a half feet and a height of three and a quarter feet. The sectional area of such a flume is sixteen and a half square feet, or 2,376 square inches. Last Saturday the water was running in the flume about three miles per hour, or about four and a half feet

per second. Take this sectional area, and multiply by the speed of the water, and we get 74 cubic feet of water per second as its capacity. If it runs half its capacity, it would deliver 37 cubic feet per second, or 133,200 cubic feet per hour.

The Provincial Water Act specifies a miner's inch as being the water to be given to each acre per second. A miner's inch is 28 thousandths of a cubic foot per second, or approximately 100 cubic feet per hour for 12 hours a day. Will the steel flume carry 600 times this amount, namely 60,000 cubic feet of water per hour? We have just seen that it will carry more than double what the Act specifies.

Then if these figures and calculations are correct, we do not need to waste money in doing more than the Messrs Mitchell report as being necessary to be done. What we principally need now is to conserve all the water that enters the intake. At present an exceedingly large proportion of it is lost en route by seepages and leakages. The pro-

posed work aims to stop this, and, as well, to double the capacity of the present system. No system is better than its weakest parts. These require to be improved and increased: The steel flume is the strongest item in our system as far as capacity is concerned, and it is estimated that it will deliver all we need.

Time is of utmost importance now. The work should be started at once so that the improved supply may be ready at the beginning of the next season.

Summerland is well able to finance the work. Short-term debentures in terms of a hundred dollars at eight per cent. will be a good and paying investment, and should be snapped up locally. The extra levy to pay off the expense was last night shown to be only two mills on the dollar per annum, thus proving that the municipality is in a splendid financial condition. Hence these debentures should prove exceedingly popular to our population as a good investment for spare cap-

ital. The need for more water for irrigation purposes is apparent and granted by all. The only weak thing about Summerland is its present irrigation system. More water will mean bigger and better crops, and more money coming into the place. We have a magnificent watershed and water opportunities. Lakes and creeks furnish an abundant supply. It is up to us to conserve and store an ample supply, and see that it gets to the orchards in ample amount. By law each user is entitled to 100 cubic feet per hour per acre and if we can get it we can do well. If we have the will to get it, it is there for the taking. The cost is trifling, the benefits immense.

REVIEW PUBLISHING COMPANY

EMPRESS ATTRACTIONS

To-Night, Friday, Aug. 30:

"Countess Charming"

Julian Eltinge's first appearance in Penticton. The World-Renowned Woman Impersonator. A society drama with plenty of comedy. Including a good comedy, Billy West, a good impersonator of Charlie Chaplin, in "The Slave."

20c. and 35c.

Program for Sept. 2 and 3:

"Barbary Sheep"

ELSIE FERGUSON

A story of Algeria and the nomadic tribesmen who inhabit that wonderful country which lies between the beautiful Mediterranean and the vast, mysterious Sahara. Robert Hitchins' great story.

"Taming of Target Centre"

No matter what your troubles are, a Mack-Sennett Comedy will fix you up.

Wednesday, Sept. 4:

"Pendleton Round-Up"

Pendleton, Oregon, is famous for its great annual round-up. The spirit of the Old West is once again revived in this great contest of steer-roping and buck-jumping.

Thursday and Friday, Sept. 5 and 6:

"The Mysterious Miss Terry"

BILLIE BURKE

The reckoning in this mystery drama has in store for you some surprising revolutions.

Saturday, Sept. 7:

JACK PICKFORD

"The Varmint"

Cantankerous, scrappy, yet a loyal and generous little "varmint." Owen Johnson's great "Saturday Evening Post" story.

ADVERTISING

Is An Evidence of Community Loyalty as well as Good Business

ADVERTISING will do more than build your business. It will build your community.

It will encourage the people in your Community to buy at home more.

It will counteract the effect of outside advertising and keep so much more money in the district.

And your community, after all, is only the aggregation of yourself and the rest of us.

Advertising to-day is, therefore, the business and the patriotic duty of the business men in this community.

And the logical medium is your home paper, as it reaches every buyer in the whole district.
