

Trustees Asked To Put On a Second Van

Trout Creek — Giant's Head Route Has Too Many for One Rig.

Trustee Unseated.

Town Petition for usual Conveyance Gets Scant Hearing.

At the regular monthly meeting of the School Board, held on Tuesday evening, a petition was presented asking the School Board to reinstate the van service on the town route. At present that route has only a morning service, the children being required to walk home. The petition received scanty consideration and the question of reinstating the service did not come to a vote.

For the first time in some weeks all the Trustees were present, Mrs Andrew having recently returned from the east.

Business had proceeded but little beyond the reading of the minutes when Mrs Andrew was reminded by another member that she was not now qualified to sit on the Board, having been absent for three consecutive regular meetings. Probably for this reason the above petition was not put to a vote. Judging from the brief comment, had Mrs Andrew not been disqualified, a vote on this question would have resulted in a tie, for, in presenting the petition, Mrs Andrew endorsed it, and Mr Gartrell expressed willingness to grant a request on the evidence presented that the people desire a full service. The other male members were not disposed to permit the reopening of the question, hence a tie would have resulted, and we believe the casting vote from the chair would have resulted in reinstating the former service. The secretary was requested by the chair to learn if the by-law under which the consolidated school was established required that the children be carried to and from school. Messrs Caldwell and Tomlin complained of insufficient van accommodation for the children in their district, stating that a number of children had to walk as the van was already loaded to the limit before it reached them. Experimental Farm and Trout Creek Point nearly loaded the van. Not including the children on the south side of Giant's Head, it was shown that there were thirty-three on that route. The Trustees believe it will be necessary to put on a second rig, and a committee was appointed to investigate the matter and report.

Mr Kyle, supervisor of Manual Training, reported having purchased tools to the amount of \$162.13, and asked that a receipted bill be sent to the Department when fifty per cent. of the amount will be refunded.

The unexpected number of children attending the municipal schools from the Experimental Farm revived the question of remuneration for conveyance and tuition, Mr Garnett urging that this question be taken up with a view to having the government pay for the children of the farm, which is outside the school district. Some weeks ago Inspector Anstey had been commissioned by the Department to look into this matter and report to Victoria. Nothing had been heard of his report, and Mr Garnett asked that the secretary make further enquiries. The Department of Indian Affairs will pay one dollar per month for each child from the reserve attending the municipal schools.

A motion proposed by Mr Marshall, seconded by Mr Garnett, suggested by a complaint received by the Board, prohibits automobiles entering the school grounds, and forbids the riding of bicycles inside the gates. Trustee Gartrell suggested that a shelter should be provided for autos, but other members opposed.

For the first time the monthly budget of accounts presented for approval did not include teachers' salaries. As a result a little over \$200 will pay the month's accounts. Henceforth the teachers' salaries will be paid in ten instalments

Champion French Athletes in Aviation Garb.

The second figure from the left is Georges Carpentier, the famous boxer. He was wounded when driving his aeroplane over the German trenches. Next to him is Somes, French champion cyclist, who won fame in duel fighting with German aviators.

The Perjury Case.

Accused of Serious Crime Two Citizens Are Discharged.

Reeve Blair and former water superintendent J. J. Mitchell appeared before Magistrates Gurnsey and English on Friday afternoon to answer the serious charge of perjury entered against them by Thomas J. McAlpine, government road superintendent. Both the accused were discharged, the case scarcely having gotten into court.

Representing the accused, W. H. Ladner objected to the court taking the evidence of Mr. McAlpine as to what was stated in the alleged perjury, in the hearing of the case, McAlpine versus Summerland, nearly two years before, Mr Ladner maintaining, and quoting authorities in support of his stand, that the court records must be produced to substantiate a serious criminal charge of this nature. The court was adjourned for a short time to permit Mr. McAlpine and his counsel, W. Clayton, to confer, and when the hearing was resumed Mr Clayton stated that his client did not feel disposed to incur the further expense of producing the records demanded, that he felt he had done his duty to bring the offence to the attention of the authorities, and it was now for the Attorney-General to prosecute.

The penalty imposed by law on a citizen found guilty of perjury is fourteen years' imprisonment.

Horse Drops Dead.

A fine horse, one of the team belonging to the Summerland Development Co., took sick and died in a few minutes on Tuesday. The team was being driven in from Prairie Valley, and at the Hutton place the horse began shivering, perspiring, and discharging at the nostrils. G. Marshall, who was driving the team, turned them in at John Dale's, and had a call sent for a veterinarian. In the meantime the horse was unhitched to be led to a shady spot, but dropped dead. Mr Dale was convinced that the horse had been poisoned, and Dr Lipsatt said the symptoms were those of strychnine poisoning.

Mr. Marshall had been gathering fruit at the Angus lot, and while in the orchard the team had been standing in the stable.

during the school months. The following accounts were passed:

S. A. Doniko, on account of wood	\$100.00
W. Atkinson, cleaning	8.00
Mrs A. Martin	8.00
Mrs J. Cornor	5.00
J. H. Bowering	80.00
Secy.	8.00
Okan. Lake Boat Co., car hire	5.00
Summerland Supply Co.,	18.05
Terminal Salvage Co., tools	41.78
W. Ritchie	4.24
Total	\$228.02

Presentation Of S.O.S. Badges.

Last Friday night was an important one for many of our younger male citizens who had identified themselves with the S.O.S. movement. That was the night on which they were presented with the badges which they had won by their work in assisting farm production. Presentation of the badges was made by Mr W. A. McKenzie, M.L.A., in Steward's Hall, Penticton, where the boys of Peachland, Summerland, Naramata, and Penticton had been asked to gather for the occasion. Rev. A. H. Sovereign, Zone Superintendent for Okanagan, gave much interesting information. Of the 1671 S.O.S. enrolled in B.C., over 200 boys were working in the Okanagan.

Mr C. M. Wright, a well-known Y.M.C.A. worker of Vancouver, and Superintendent of the S.O.S. for B.C. and Alberta, gave the boys an interesting and helpful talk.

The list of boys who had fulfilled the requirements necessary to obtain the coveted medal included 28 from Summerland, 19 from Naramata, 11 from Peachland and Gellatly, 25 from Penticton, 2 from Okanagan Falls, and 1 from Kaledon.

The S.O.S. workers of Summerland, Naramata, and Peachland are given below together with the name of the employers who signed their certificates of service:

Memorial Service.

Churches Unite In Respectful Tribute To George Dale.

The Parkdale Baptist Church was crowded last Sunday evening when a memorial service was held in honor of George Crawford Dale, who was killed in action, August 11th. All other church services in town were courteously withdrawn to enable the wide circle of friends of Pte. Dale and his family and relatives to attend.

Rev. G. J. C. White, Rev. H. A. Solly, Rev. W. H. Bates, and Mr W. C. Kelley took part in the service, and the united choirs of the Presbyterian, Methodist, and Baptist churches filled the choir loft, and furnished very appropriate music, and a touching solo was sung by Rev. Chas. Baker.

A feature of the service was the very artistic floral decorations, under the direction of Miss Isabelle Spencer. The military mourning colors of purple and white were profusely and exquisitely blended over a background of white, while a large wreath sent in specially by friends at Vancouver, occupied the centre position.

The service was one of simple dignity, and dealt with the boyhood days and training of Pte. Dale here, and with the manly outlook he had upon the call of the war and the fight for freedom to himself and other Canadian youths. A poem of his own composition setting forth his views on this point was recited during the evening, and a strong appeal was made to the young men and women to give themselves to higher service as a result of his sterling life and sacrifice.

The entire service was a splendid tribute to the high esteem in which he, and his family, and relatives are held in the community, as well as of how extended is the deep sympathy felt for the family and relatives in their bereavement.

Although not specially announced the collection taken at the service has been devoted to the Prisoners of War Fund.

Ideal District For Producing Alfalfa Seed.

Farming Expert Astonished By Summerland Crops.

Illustration Stations.

Superintendent Hopes To Establish Some In The Province.

The production of alfalfa seed will be an important industry in Summerland, Naramata, and other South Okanagan points, if its possibilities are fully appreciated by the farmers. This, in substance, is the prediction of Mr John Fixter, Superintendent of Illustration Stations. Mr Fixter was a visitor to Summerland the first of the week. The illustration stations are enlargements on the experimental farm idea, and are scattered throughout the prairie provinces, Ontario, and Quebec. Had it not been for the war a number of these stations would now have been in operation in B.C. and the Maritime Provinces. These stations are operated on private farms, and cover forty-five to sixty acres along the main road and on uniform soil typical of the district. A definite rotation of crops is grown, and the station visited every three or four weeks, the owner of the farm carrying on the work under supervision and being paid \$5 per acre and furnished with seed, besides having the crop. He must farm the land, which is divided into small plots, according to instructions and keep accurate records. Mr Fixter states that invariably a neighborhood is greatly benefited by one of these stations, better farming methods, bigger and better crops resulting, production of pure seed frequently becoming a staple industry. Mr Fixter was greatly astonished when he saw the alfalfa grown here; the third crop at the Experimental Farm he described as wonderful, he never saw anything like it.

Incidentally he also found there one of the heaviest crops of tomatoes he had ever seen, and had taken photographs of the field and individual plants. Instances of the development of the production of clover seed in a Quebec county was given, 182 acres formerly pastured was now producing clover seed 90 to 230 pounds to the acre at 40 cents a pound. The increased production in this one instance was enough to pay for the illustration stations in all Canada. Likewise pure seed production was being stimulated on the prairies.

Mr Fixter believes this is a perfect district for the production of alfalfa seed, 100, 200, and even 800 pounds per acre can be threshed from the second crop, and at the same time the farmer will be enriching his soil which is craving for humus.

The first crop will be cut for hay, and after removing the seed the second crop will also be used. Mr Fixter, who is one of the oldest employees of the Experimental Farms Branch, hopes to obtain permission to establish illustration stations in this province at an early date.

Election Necessary

There seems to be no alternative course to the electing of a School Trustee to fill the position on the School Board rendered automatically vacant by the absence of Mrs Andrew for a longer time than fixed by the School Act. According to the act when a member is away during three regular meetings his or her position becomes automatically vacant, and it is required that a returning officer be appointed and forthwith an election be held to fill the vacancy. We understand that Mrs Andrew has consented to accept renomination.

Is Convalescing.

W. E. Scott, Deputy Minister of Agriculture, is convalescing, and there is hopes of his return to duty within a short time, this information is contained in the current issue of the Agricultural Gazette. Mr Scott is a valuable public official, and his work in the Department of Agriculture has been productive of considerable results.

Water Committee and Councillors Discuss Irrigation

Committee Approves Council Plans for Increased Water Supply.

Presents Resolutions.

Question of Further Storage Subject of Informal Discussion

The water users committee, appointed at last week's public meeting, met the Council on Tuesday evening and presented reports embodying several resolutions adopted at the meeting of the committee on Saturday night. Prof. Broad, in presenting the report, said the committee had come to the same conclusions as the Council had reached, but had come to them from a different angle. The resolutions submitted were as follows:

1. That whatever scheme is decided on by the Council the main ditch should be capable of carrying a maximum of 2 acre feet per annum for 1,800 acres.

That if this is so Mr Mitchell's plans and specifications are approved of with the following suggestions:

The whole of the main ditch to be cemented and laterals to be made strong enough to carry a full capacity of water for a twenty-four hour system.

2. That by all possible means we endeavor to get some competent water engineer to check up the proposed work on the main ditch from Trout Creek to the reservoir for the purpose of finding if the same is adequate for all possible requirements.

3. That the reconstruction of the Dunsdon dam be more seriously considered as a supplementary supply for Jones' Flat when Trout Creek runs dry.

Mr Broad had gone over the north main and gave his impression of that section of the system.

Mr F. A. C. Wright described the site of the old Dunsdon dam as an ideal one and suggested that the Council look into the matter of building a dam there to hold water until late in the season.

The Reeve replied by stating that the plans had already been made and a permit for building the dam obtained from the government.

Coun. Campbell explained further that the upper dam had been reinforced according to engineer's plans and this dam could now be made to hold five feet more water than formerly. In this way more water can be stored at less cost than rebuilding the Dunsdon dam. He thought that any money available for storage dams should first be spent at Trout Creek headwaters where extensive areas could be flooded at much less cost.

Coun. Johnston advised that provision be made to increase storage on Trout Creek. There was some discussion on the question of completely cementing the main ditch. It was explained that this had been taken into consideration by the Council, but it was doubted if this work could be done in one season, in which case it would be better to widen and wall the ditch preparatory to putting in the bottom layer.

The labor question was also considered, and it was agreed that labor should be brought in if it is found that sufficient labor is not available locally to carry the work through expeditiously.

The committee recommended the employing of Mr Latimer to check up the plans and figures should a water engineer not be available.

Mr Logie reported having just received a wire from Calgary stating that no water engineer was available there.

Reeve Blair told the water users committee that their report was very satisfactory to him.

Prof. Broad assured the Council that a by-law to raise the \$30,000 necessary for the proposed work would receive the approval of the ratepayers, and said the Council should go ahead at once with the idea that the work was all to be done.

It was agreed that a public meeting should be called immediately the plans and figures are approved by the engineer.

The Council gave informal approval of the principle of resolution No 1, with the assurance that they will endeavor to carry it out.

PEACHES—AND PEACHES.

PERHAPS NOT IN THE history of peach growing in this Valley has the necessity of giving the very best attention to the trees and crop and the growing of only number one fruit been so apparent as this season. Some local fruit growers are bringing in large peaches of the finest quality in considerable quantity; but unfortunately much of the fruit that reaches the packing houses is of an indifferent or inferior quality. Particularly for small size most of the fruit must be graded down. There is a keen demand at good prices for the best peaches, according to our shippers, but the market is very indifferent to anything but the best, and too much of our fruit is finding its way to cannery and jam factory. We are assured that the same high quality of fruit that some of our growers are bringing in might be brought in by all if reasonable attention to pruning, spraying, thinning, and condition of soil was given.

CRYING LOCAL NEED.

THE CRYING NEED of this district is an up-to-date cannery. This is no new story; but the last few weeks have strongly emphasized the fact that the most cannot be gotten out of our fruit crop, including tomatoes, until such a plant is in operation here. Our surplus has been shipped to other Valley canneries; but none of them are of sufficient capacity to take all the fruit offered. The time has now arrived when a local company must be formed to operate a cannery unless outside capital with men behind it who can be depended on to operate satisfactorily year after year, can be interested at once to the extent of giving assurance that ample provision will be made for next year's crop.

TO THOSE OF OUR subscribers who "come through" with the "necessary" immediately the subscription date, as shown on their address labels, is reached the publishers are extremely grateful. Others have won our gratitude by responding quickly to notices of expiration of subscriptions. In these most trying times for newspaper publishers a "paid-up" subscription list is essential. We cannot think that any of our subscribers have any desire to be a burden rather than a help to The Review. Prompt renewal of subscriptions will enable us to maintain this belief. Thank you.

"THE DENTISTS out in British Columbia who are trying to get legislation hammered out that will stop dentists from advertising their business in the press are fighting a poor fight," says a Toronto publication.

"And that they will lose is sure as the Rockies are a foot high." "The case put up against publicity on the part of the dentists is a lame duck. If a dentist has the equipment, the knowledge, and the need for business, and advertises that he can pull teeth in such a way that it will be painless, why not let him go ahead?"

"The fact of it being considered unprofessional to advertise is a real good joke. We know of an undertaker once who wouldn't advertise. But he belonged to every lodge in the city; his children went to three different denominations in the matter of Sunday schools; and the whole family spread themselves out as much as a lean hen trying to cover a setting of eighteen eggs. Advertising in the press would have been tame compared to the exertions this chap made to get himself and his business known. And yet that man, when solicited for even a card, pulled his burying-business face, looked the solicitor in the eye with a regular tombstone expression, and after a few wringings of the hands informed him that such a method of getting before the public would not be considered in keeping with the best traditions of the profession.

"As a matter of fact all that talk about advertising not being in keeping with the traditions of the profession is as much pure buncombe. In some cases architects put out the same high and lofty views, and yet they do like to hack and whittle their names on buildings they plan.

"The best way for all these super-professional people to do is to come out straight and honestly with their advertising matter. Let them tell the people in print over their own name what they can do. If a doctor can saw off a leg any better than his competitor, why should he not give the general public the benefit of the information, so that the man wanting a leg off could get the best service? And if a dentist can tinker with decayed teeth and exposed nerves without their owner ever knowing anything about it, why it's a regular business for him to get out and tell about it.

"These publicity haters are nothing short of a nuisance."

THE PURCHASE of One Thousand Dollars worth of Goods from your own town or your own country, instead of purchasing outside, means the addition of one person to your town or country instead of supporting him abroad.

Fruit Crops Totalling Well

With each succeeding week the fruit shipping companies of the Okanagan grow more optimistic over the year's output. It is still held that apples will fall short of last season's production, but this will be more than made up by the heavy increase in shipments of other fruits. Cherries, apricots, peaches, and pears are estimated to be more than double last year's output, while cantaloupes, citrons, and tomatoes also will show a big increase. Crabapples show a remarkably heavy crop in all parts of the Valley, and for the past week or so they have bulked largely in the total shipments.

The Okanagan United Growers state that their turnover this year will be by far the largest in the history of the organization, and other shipping concerns tell the same story.

A Well Ordered Mind.

Men seek out retreats for themselves, cottages in the country, lonely seashores, and mountains. Thou, too, art disposed to hanker greatly after such things, and yet all this is the very commonest stupidity; for it is within thy power, whenever thou wilt, to retire into thyself; and nowhere is there any place where a man may retire quieter and more free from politics than his own soul; above all, if he have within him thoughts such as he need only regard attentively to be at perfect ease; and that ease is nothing less than a well-ordered mind. Constantly then use this retreat, and renew thyself therein; and be thy principle brief and elementary, which, as soon as ever thou recur to them, will suffice to wash thy soul entirely clean, and send thee back without vexation to whatsoever awaiteth thee.—Marcus Aurelius.

CARD OF THANKS.

Mr and Mrs Thos. Dale and relatives of the late Private Geo. C. Dale desire to express their heartiest appreciation and gratitude for the many thoughtful deeds and kind words that have meant so much to them in their hour of deepest bereavement.

"It says here a noted scientist has discovered that the seat of fear is in the brain," said the Old Fogey, as he looked up from his newspaper.

"Then that explains why some of these joy riders have no fear," replied the Grouch.—New Haven News.

Bad Auto Accident.

William King of Kaleden was the unfortunate victim of a collision between two automobiles last Monday at the point on the road southwest of Kaleden where the Marron Valley road turns off. Fred Graham, manager of the Steuart Fruit Co.'s packing house at Kaleden, accompanied by Mr King, was driving south and another car, said to be owned by Engineer J. Crane, but being driven by someone else, was coming down the hill just south of the junction when the truck rounded the turn at the foot of the hill. The cars came together with seemingly great force, both first apparently having turned west. King was the only one seriously hurt. He is now in the Penticton Hospital with a fracture at the base of his skull, and a badly injured arm, the bracket at the side of the seat which supports the top having been driven clear through his forearm. The latest reports are that he is making satisfactory progress, although he is somewhat paralyzed on one side.

A recipe for making what is claimed to be lovely bread with but little wheat flour among its ingredients is reproduced here. The many good housekeepers of which the Review can boast as among its readers can judge of its worth:

WAR TIME BREAD.

In the morning boil half cup of rice in plenty of water. When cooked put in bread mixer with half cup of rolled oats, half cup of corn meal, half cup of stale bread crumbs, three dessert spoons of sugar, and one tablespoon of shortening. Pour a pint of scalding water over this and let stand.

Soak a yeast cake in a pint of warm water and add late in afternoon; add flour to make smooth batter.

At bed time add three teaspoons of salt and make batter stiff with flour.

Next morning turn down and put in pans.

Bake a full hour. This makes lovely bread and uses considerable flour substitutes.

McWILLIAMS' DRUG STORE

THE USEFUL CARROT.

Here is a little-known culinary tip which every housewife should note carefully. Boiled carrots, when properly treated, form an excellent substitute for eggs in puddings. Boil the carrots well, drain, smash, and press through a strainer. The pulp is then introduced among the ingredients. Puddings made in this manner are lighter than if eggs are used, and more palatable. Incidentally, the carrot is the most nutritious of vegetables.

GOOD LOGIC.

"Daddy," said little George, I think I want to get married!" "Do you, my son?" And then the proud parent asked: "And may I inquire to whom?" "I want to marry granny." "Do you indeed! And do you think I would allow you to marry my mother—eh?" "Well, why shouldn't I?" retorted the tender logician. "You married mine, didn't you?"

What The Insurance Man Said.

Registered in accordance with the Copyright Act.)

ARTICLE No. XVIII.

Some time ago a certain interesting exchange of correspondence took place between one of the largest Canadian mail order houses and an insurance and real estate agent well-known in a Western town that it is not necessary to name here.

The insurance man, about two years previously, had sent in an order to the big catalogue concern for a considerable quantity of paint. This was his first and last out-of-town order of such character, but the distant firm in the meantime kept sending him their huge catalogues two or three times a year. One day the insurance man received a letter from the mail order house which read, in part:

"Dear Sir:—For nearly two years we have missed your name from our list of out-of-town customers; we would be pleased to have further orders from you, and to give your name a place again upon our books."

After studying for some little time over this latest system of conducting a retail business by long distance, the insurance man replied to the letter as follows:

"Gentlemen—I have received your letter stating that you have missed my name of late from your list of clients. I may say that I, too, have just completed an examination of my own business lists, and my books do not even reveal that I ever have had the pleasure of serving your concern as a client on a single occasion. I shall be pleased to have you place a portion of your insurance, real estate, collections, and general brokerage business in my hands.

"However, as I am quite positive your firm will be in no wise disposed to place business with me, situated as I am at such a considerable distance from you, I may further state that I, too, do not feel at all disposed to transact business with you for this and other reasons, and you may discontinue sending me your catalogues at as early a date as suits your convenience.

"By the way, I only sent you one order, which was for paint some two years ago; and while the paint was a cheap variety of red, my conscience has had a distinctly saffron-hued feeling ever since the order went in. I have come to the conclusion long since that the place where my friends are, where I am furnished with my living and a few luxuries, and where I am raising my family, is quite good enough a place for me to patronize when I have any orders for goods to hand out.

"While it may be quite true that you do quote a little—very little—lower price on certain articles, I am not quite so sure that your goods have a uniform guaranteed quality. By doing my buying at home, I know where to go if I do not get satisfactory goods, and I know that my local merchants are only too willing to correct any errors made. "But aside from all this, I figure I have hung up my hat in this town, and that it is my duty to support it. So far as I can learn, your firm does not patronize a single business institution in this town, nor any of the farmers in the community surrounding us. Neither do you pay any of the taxes here, nor do you contribute to the

support of a single one of the various enterprises that the business men and citizens of the town are supporting liberally and regularly.

"I figure it out that if even one-half our citizens not sending money to you now would all at once determine to patronize you by catalogue instead of the local business firms, this town would slip back just 100 per cent., and so would that of nearly every concern here. Any time I decide to send away for my goods it will be when I decide that the usefulness of my town is gone and it is time its epitaph was written.—Yours truly, etc."

Citizens Help To Gather Harvest.

Portage la Prairie, Manitoba, understands the importance of saving the wheat crop. Last year stores closed at 4 p.m. during August, and men left for the harvest fields by 5 o'clock. Allowing half an hour for the trip, three hours of daylight still remained. From 250 to 300 men went out from Portage every evening, farmers paying at the rate of 30 cents an hour. Applications for help were made to the Municipal Employment Office. Between 700 and 1,000 acres of grain were stooked in 1917 by the Citizen Stooking Gangs of Portage la Prairie. The scheme is being greatly extended this year.

Next to saving the harvest the most urgent food service at the present moment is to save sugar, and

How To Can Tomatoes.

Select fresh, ripe, firm tomatoes. Grade for size, ripeness and quality. They will cook better if the same degree of ripeness and quality, and will look better. Wash, scald one-half to one and one-half minutes or until the skins loosen, but do not break. Scald means to immerse in boiling water. Cold dip, but do not allow them to remain in the cold water. Cut out the stem end, taking care not to cut into the seed cells or the seed and pulp will later be scattered through the liquid. Remove the skins.

Pack the tomatoes whole in the jars, doing one jar from the beginning to placing in sterilizer, before starting on another. Shake down well, hitting the base of jar with palm of hand, and also press with a tablespoon, but avoid crushing.

Do not add water. Hot tomato pulp may be added, otherwise add no liquid whatever. Tomatoes are an exception to the general rule of hot water for vegetables and hot water or hot syrup for fruits. A large part of the tomato is water. It is not necessary to add anything but one level teaspoonful of salt to each quart, and if liked, one-half tablespoonful of sugar. The tomato pulp for home canning, made from large and broken tomatoes, cooked and strained, should have one teaspoonful of salt to each quart, and should be poured hot into the filled jars, allowing it to enter the spaces.

Put on rubber and top, adjust top bail or screw top on with thumb and little finger. Sterilize 22 minutes in hot water bath, or 16 minutes under five or ten pounds steam pressure. Remove, tighten, seal and cool.—Conservation.

The Food Board appeals to every loyal Canadian to do everything to encourage similar conservation by others. This is absolutely necessary in order that our available supply of sugar be stretched until the new crops become available and that it be equitably distributed.

Save The Sugar.

About one-third of all sugar used in the homes is served in tea and coffee. If an average of half a teaspoonful of a cup is left undissolved in the bottom of 12,000,000 cups of tea, coffee, and cocoa used daily in Canada, the waste would be 120,000 pounds of sugar per day.

ANNOUNCEMENT

THE PRINTERS ARE NOW AT WORK ON

WRIGLEY'S

BRITISH COLUMBIA DIRECTORY

Compiled and Printed in British Columbia—Endorsed by B.C. Government, Boards of Trade, Manufacturers' Association and other bodies.

IN FIVE MAIN SECTIONS

BRITISH COLUMBIA YEAR BOOK—One hundred pages of official data, covering Agriculture, Lands, Timber, Mining, Fisheries, Shipbuilding, and Public Works, prepared by the various Departments. This section will cover fully the development in British Columbia.

GAZETTER, describing over 1,900 cities, towns, villages, and settlements within the Province, showing location, distance from larger points, how reached, and by what lines, synopses of local resources, population, etc.

ALPHABETICAL DIRECTORY of all business and professional men, Farmers, Stock Raisers, Fruit Growers, etc., in all towns and districts.

CLASSIFIED DIRECTORY of Manufacturers, Retailers, Producers, Dealers, and Consumers, listing all products from the raw material to the finished article.

TRADE NAMES AND TRADE MARKS—A list of popular trade names alphabetically. If you want to know the manufacturer or selling agent of a trade-name article, look up this section.

INCORPORATED CITIES—All gazetteer information in the Directory of the incorporated cities of the Province will be prepared by either the City Council or the Board of Trade, thereby official.

ADVERTISING BRITISH COLUMBIA—It is necessary to continue to advertise British Columbia outside of the Province, in order that tourists and settlers will continue to come. With this aim in view, a copy of the Directory will be placed in the leading Libraries and Boards of Trade throughout the Canadian Provinces, Eastern Canada, the United States, and abroad. The Directory will be used by prospective tourists and settlers as an official guide of the Province. The subscription price of the Directory is \$10, express paid.

"REVIEW" Offices.

South Okanagan Has Not Had a Fair Deal.

This is the Opinion of a Naramata Citizen Regarding Irrigation Legislation.

That a part of their province should require legislation to permit it to obtain a constant and dependable supply of water seems impossible to members of the House of Assembly representing Coast districts, according to a Naramata writer to the Vancouver World. His contribution to the World on this subject is reproduced below:

When the member for South Okanagan arose in the legislature to tell the other members what was most needed by his constituents, people from South Okanagan were sitting in the gallery to hear his speech and to listen to the discussion that would follow.

What South Okanagan needed more than anything else, was a re-adjustment of its irrigation system. South Okanagan is in the dry belt, that means, little or no water falls there during the summer season at the time when the garden and orchard products (the livelihood of the people) are on their way to maturity.

Mr J. W. Jones, the member for South Okanagan, was elected by his constituents because he understood all about irrigation and knew so well that water and more water was the overwhelming need of fruit growers and gardeners. So you see, irrigation was the subject matter that he was expected to press home to the minds and hearts of the other members of parliament so that they, too, would understand the necessity for water in a dry belt of country as well as the people who lived there understood it. With such understanding, the necessary bills would be passed by the legislature, and the best system of irrigation that experience and money could devise and secure would be built.

I was in the gallery the day of Mr Jones' speech too. To persons who know nothing of the South Okanagan and its need of a thorough system of irrigation the reception of Mr Jones' speech and its interruptions, were quite funny. You see, Victoria, where the British Columbia parliament sits, had been doused with water, off and on, for weeks. People had grown weary of galoches and raincoats, and longed for the day when they could get comfortably to parliament without splashing underfoot and pourings overhead.

That a fellow member should arise and in all seriousness, make the main subject of his speech a plea for "more water" appealed more to the humor of his hearers than to their common sense. Jibes and witticisms were the greetings with which the irrigation question was met!

Those of us in the gallery, who understood South Okanagan's need for water, could not help being amused at first, but when merriment overruled the seriousness of the question we ceased to see the play and waited to hear the matter given intelligent attention.

I went out of the gallery that day, feeling that the South Okanagan had not had a square deal. The people had elected their representative in good faith that his knowledge of the hopelessness of trying to grow fruit without a proper system of irrigation would be so explained that proper legal results would follow and never, for one instant, did they imagine that their needs would be misunderstood and ridiculed.

I had no opportunity of hearing

the discussion that followed Mr Jones' speech, and the press reports were not verbatim.

But, as soon as I got into the South Okanagan, last Monday, I began to be asked about it.

"Had I been in Victoria?—Had I heard Mr Jones?—What did I think of his speech?—What was the government going to do, anyway?—etc."

I had not been able to make out exactly what had happened, and asked questions of women orchardists whose men are at the front. I learned, first, of their disappointment over the reception of Mr Jones' speech by the House.

"Those people at the Coast don't seem to understand what irrigation means to us; they laugh at us," exclaimed Mrs X.

"They are stupid—that's what they are," interrupted Mrs Y. "Having not enough water for our orchards means a good deal more to us than having a car strike means to the city folks; and yet, see how soon the matter of a strike is looked into and settled."

"Yes, but they are really trying to help us," chipped in loyal Mrs Z. "You know they've sent men here to look into the irrigation."

"And I hope they may do some good," began Mrs X.

"Yes, I hope so, too," finished Mrs Y, with sarcastic emphasis on each syllable, and she held the verandah floor while she further expressed her opinion about the good a lot of men from parliament did spending the country's money on jaunts here and there to learn what members had been sent to Victoria on purpose to tell them. "Why couldn't they sit still and listen to Mr Jones when he went on purpose to tell them we needed a better water service? Undignified, I call it, the way they act, not what I

was expecting of a Canadian legislature." (Mrs Y. was born across the line—her husband is a Canadian). Mrs Z. is a peaceful body, but there was a bit of zip in her tone as she chirped in, "But it has done something! Didn't the government confiscate the irrigation plant and haven't three of our own home men been appointed commissioners to look after it? For life, too."

"So they have," agreed Mrs Y., while Mrs X. nodded in acquiescence, "and we'll wait and see what's the outcome before saying too much about it."

So far, in the minds of the orchardists, the question of a systematized and plentiful water supply for Naramata is still unsettled.

Mr Jones passed in his motor just then, and shouted words of good cheer towards the verandah. "He keeps everlastingly at it, and has his duties on his mind every minute of the time—he's a good man to represent us, and I guess we'll come through all right," was Mrs X's final opinion, to which we all agreed.

I walked over to one of the packing houses, when the women had gone, and asked the manager how it was that there was so great a quantity of excellent fruit when the irrigation water was so inadequate to the needs of the orchards.

"Hard work on the part of the growers, and unexpected rainfalls this summer."

Just then a woman drove up who is living on the orchard lot that I had lived on four years ago. I asked her about the water.

"Same old troughs—same old waste of water. We have the cistern with the pipe to the house, but the irrigating water troughs have never been fixed, and they leak worse than ever. Our barn is nearly washed away with the leakage, but when it comes to getting the water where we want it, there's no water left."

SUMMERLAND TROOP BOY SCOUTS.

O. F. Zimmerman, Scoutmaster.
Headquarters, College Gymnasium.

Meets every Friday evening at 7.30 p.m.

Orderly Patrol — Sept. — Wood Pigeons.

Last Friday's meeting was called off owing to so many of the Scouts being S.O.S. boys and having to go to Penticton for their medals.

However, lost time will be made up to-night.

It is with the deepest regret that we have to place the Scout sign (.) "I have gone home," opposite Scout George Dale's name on our "Honor Roll."

George joined the Troop at its organization in May 1911, and was an active member until the time of his enlistment in the Expeditionary Force.

Starting as Scout, George gradually worked his way first to Patrol

Leader, and at the time of his enlistment was physical instructor to the troop. We all certainly missed him in the physical part of the Scout work, and were looking forward to the time when he would again be with us. The sympathy of the Troop is with the bereaved parents and sister.

Because he has learned the "religion of the trenches," which requires absolute self-sacrifice and subjection of individual interests

Sergt. E. R. Davies, Naramata, with the Canadian Artillery in France, was reported slightly wounded on August 8th, but was still on duty.

Roscoe McWilliams arrived on Tuesday from Vancouver to spend his vacation here and at Vernon.

Don't postpone ordering fruit trees for Spring 1919 delivery, until Fall; ORDER NOW. B.C. Nurseries Co., Ltd., Vancouver. tf

Corpl. A. J. Beer and Mrs Beer (nee Miss Lister) arrived from Victoria on Saturday evening. Corpl. Beer leaves to-night in order to be on duty on Monday morning.

Miss Helen Robertson left this morning to enter the Revelstoke Hospital to take a course of training in nursing.

Called to Winnipeg because of the illness of his father, Mr A. E. Hespeler went out by this morning's boat. Hon. Wm. Hespeler is now in his eighty-ninth year.

R. Shaw, accountant in the Bank of Montreal, and E. N. Rowley went out early this week to Albert Canyon, beyond Revelstoke, on a two weeks' hunting trip. We understand Mr Rowley will go to Alberta to purchase a carload of cattle before returning home.

Jack Robinson is now home on a six weeks' harvest leave, having arrived at Naramata from Esquimalt on Tuesday.

Repairs have recently been made to Peach Orchard Gulch road. The Review has been asked to request that for heavy trucking, especially with wagons, this road be used. It is said that the wagons are cutting the big gulch road badly.

One has only to note the conveyance of fruit to local packing houses to realize the extent to which motor vehicles have replaced the farm wagon and democrat. The motor truck is effecting a three-fold saving in time, labor, and feed, all of which are at a premium, the available supply of labor and feed both being very limited.

Miss Stella Dynes, who taught the school at Trout Creek Point last year, has taken a school at Langford, not far from Victoria.

Mr J. W. Jones, M.L.A., has received word that his son, Lieut Clarence Jones, of the Royal Air Force, has sailed from England, having been invalided home. Lieut. Jones was seriously wounded in the face last spring, but is making a good recovery.

Next Wednesday evening at 8 p.m., in St Andrew's Church, an induction service will be held when Rev. W. H. Bates will be formally charged with the pastorate of the congregation. Rev. Ferguson Millar, Penticton; Rev. J. A. Rowland, Peachland; and Rev. Mr Campbell, Rutland, are all expected to take part in the ceremony.

Messrs O. Atkins and K. S. Hogg returned yesterday from a trip to Vancouver, Seattle, etc., the return being made by way of Snoqualmie and Blewitt Passes.

Many of our readers will be glad to learn that they will have an opportunity on Wednesday and Thursday of next week to see an ensilage cutter and filler in operation. The machine arrived here a few days ago, and will be set up on the Balcomo Ranch and operated under the direction of Mr Ferris, the government silo demonstrator.

When R. Mitchell, superintendent of irrigation, went up to Canyon Creek dam a few days ago to raise the gate he was surprised to find that someone had preceded him, and had opened the gate about six inches, thus considerably reducing the supply of storage water. It is the opinion of Coun. Johnston that the gate had been raised by a fishing party for the purpose of lowering the water in the lake to facilitate trout fishing. Should this practice be continued it may result disastrously to fruit growers.

Mrs Hespeler and young daughter went down to Vancouver by Wednesday night's train where Miss Stepany will enter the Braemer School for girls. Miss Mona Adamson, daughter of Mrs Adamson of Aspen Grove, will be a pupil in the same school.

Some very fine specimens of tomatoes have been on exhibition this week in the Review window. Not too large, they are of splendid form, smooth and round, and were brought to the Review by Mr R. H. Helmer, Superintendent of the Summerland Experimental Station. They are the "Banko," a development by selection of the Earlana. Mr Helmer describes them as excellent croppers, early, and with everything in their favor.

Cherries, apricots, plums — all the different fruits are coming in in larger quantity than had been anticipated. Shipping records are being broken every week. Peaches will be a much heavier crop than for some years. It is now predicted that Summerland's apple crop will exceed the good crop of last year. Some idea of the big increase in the output may be gleaned from the fact that the Union shipped during August more fruit than during the whole year of either 1914, 1915, or 1916, and this week is expected to bring the total of this season's shipments through the Union to the total of all 1917, with about three months yet to run before the shipping season ends. Other shipping organizations are also experiencing large increases of business.

James Andrews, who left here over three years ago to enlist has been reported in the casualty list under "Died of Wounds." For several years previous to his enlistment Pte. Andrews worked with F. G. Barnard, and before that was for some time engaged with C. C. Aikins, Naramata.

Land Registry Act.

(Section 24).

In the matter of an application for duplicate Certificate of Title No. 13785a issued to Robert Henry Huston, covering Lot 1174, Group 1, Osoyoos Division, Yale District. NOTICE is hereby given that it is my intention at the expiration of one month from the date of first publication hereof to issue a duplicate Certificate of Title covering the above lands to Robert Henry Huston unless in the meantime I shall receive valid objection thereto in writing.

DATED at the Land Registry Office, Kamloops, B.C., this 15th day of August, 1918. C. H. DUNBAR, District Registrar. 5-9

A motor accident on Sunday afternoon, in which two cars met in a head-on collision on the Penticton road, resulted rather disastrously for both cars. Capt. P. S. Roe was returning from Penticton with passengers and J. E. Phinney's car with several members of the family and driven by Miss Muriel Phinney, was south-bound when they met just south of a turn on one of the higher points about halfway between Summerland and Penticton. Fortunately no one was seriously hurt, though both cars were badly smashed.

Not until his seventh attempt to get past the medical inspectors has "Jack" Smith, eldest son of Mr and Mrs J. O. Smith, succeeded in enlisting in the service of the Allies. While in Victoria, where he held a position as musician, he tried several times to join the colors. Later, after taking a similar position in San Francisco, he was recently accepted into the United States army. Thus encouraged, but preferring to serve under the Canadian flag, he made a final application for enlistment into the Canadians and was accepted. He expects to return to B.C. shortly to go into training.

Dehydrated (dewatered) vegetables and fruits retain the flavor of fresh products. You need no sugar to preserve them. Try drying your vegetables and fruits this summer.

During the last week of August 3,433 boxes of pears imported from the United States, and consigned to Vancouver dealers, were condemned by the inspectors and returned to the American side.

Rev. C. O. Main, for over six years pastor of St. Andrew's Presbyterian Church, Vernon, handed in his resignation to take effect in October. Mr Main intends to disassociate himself from active ministry work for a year or more.

The Kelowna United Church has fitted up a free reading and rest room near the post office for girls and women. Two rooms have been comfortably furnished and telephone installed. Facilities for reading, writing, and resting have been provided. A piano has been provided. The rooms should comfortably accommodate fifty or more occupants, and are intended to administer to the comfort and enjoyment of strangers and visitors to town as well as ladies of outlying districts. The original and chief intention is to provide accommodation for visiting fruit-pickers, cannery and packing-house assistants.

Community Calendar of Coming Events

Peachland Doings
A Weekly Chronicle Furnished
By Our Local Representative.

The regular meeting of the Home Comfort Club was held on Wednesday night of last week. They are making arrangements for the sending of another lot of parcels to the boys.

We are sorry to announce the death of one of Peachland's old timers, who died at her home here early on Thursday morning in the person of Mrs Robert Michael. The funeral took place on Friday morning. A large concourse of friends attended to pay their last respects to the departed one. The sympathy of the whole community is extended to the sorrowing relatives.

After spending a very pleasant few days with their sisters, Mrs D. J. White and Mrs E. House, Mrs Livingston and Mrs Smith with their children left by Wednesday's boat.

Mrs Hards and Miss Eileen and Master Albert, who have been summering here in the Pollard cottage, left for their home in Vancouver on Wednesday evening's boat.

Miss Mary Vicary is spending a time in town renewing old acquaintances.

Mr Wilfred Miller with his wife and two children, who have been enjoying a visit in town the guests of Mr and Mrs Jeffords for a few weeks, left on Wednesday morning's boat.

After spending a very pleasant visit in Vancouver for a few weeks Miss Jean Dryden returned on Wednesday morning to spend a few days at home before going over to Kelowna to attend High School there. Mrs Dryden is remaining in Vancouver for a short time longer.

Mrs Fulton returned on Wednesday morning from a short trip to Vancouver.

J. L. Elliott was a passenger to Kelowna on Thursday morning of last week, to join his wife and two children who were spending a day or so with Mrs Elliott's sister, Mrs H. Burtch in that city. They en-

joyed a very pleasant outing, and while there took an automobile trip to Vernon. They all returned home on Friday night.

Mr Leslie V. Rogers of Kelowna was a visitor in town on Friday night, returning on Saturday morning's boat.

Mrs Alex. McKay and Mrs Carniff were passengers south on Friday evening's boat.

Mrs Iverson and son Robert, Mrs and Miss Elliott were passengers to Kelowna on Saturday last, returning the same evening.

Miss Leone Morrison left on Saturday morning to resume her duties for another term in the Rutland school, where she has been teaching for the past year.

Miss M. Smith, B.A., left on Saturday to take up her position as principal of the Oyama school.

Cecil McSpadden, one of the S.O.S. boys who came from the Coast to work on the Greta ranch for Mr Long, was a passenger to Kelowna on Saturday to attend the S.O.S. presentation of badges.

After spending a time here with her parents, Mr and Mrs W. J. Moore, on the Lambly ranch, Mrs Cartwright and her daughter Margaret Verey returned to Okanagan Landing on Saturday morning last.

Mr and Mrs R. J. McDougall with little Miss Mildred and Master Royal were visitors in town for the week-end, coming in on Saturday morning and returning to Penticton on Monday night.

Mr Horace Oliver came in on Saturday morning and was met here by Mr Goreman of Glen Rosa, who drove him up to that locality. We are sorry to report that Mr Oliver brought bad news of an old timer here, in the person of Mr Bob McKellar, who is very ill in the Kelowna hospital. Mr Oliver states that the doctor holds out little or no hope for his recovery.

Mrs Walter Morsch returned on Saturday morning, after spending a few days with friends in Naramata.

Mrs Woodley came up from Naramata to spend the week-end here with Mrs H. McDougall and was joined on Monday morning by her

daughters, Mrs Kendall and Miss L. Woodley of Vancouver, who spent the day here, returning to Naramata in the evening.

After spending a very pleasant visit in Kelowna, the guests of Mrs Walter Aitken, Miss E. F. Smith and the two boys returned home on Saturday night.

Mr Hugh Ferguson left last week to resume his duties at the Kitsumgallum school, where he has been teaching for some time.

Miss Whitman of Nova Scotia came in on Saturday night to take charge of the High School here.

Miss Newby of Chilliwack came in on Monday morning to take up her duties here as primary teacher, and Miss Ireland came from Vancouver, arriving on Monday night to take charge as principal of the Public School.

As is his yearly custom, Mr W. R. Bartlett of Naramata spent Monday, Labor Day, in town looking after his interests here.

Mrs Dave Kirkby came up on Monday morning to spend the day here with his wife and Annie Margaret, who were spending the week-end with Mrs Kirkby's parents, Mr and Mrs J. McLaughlin.

Miss Jean Dryden left on Monday morning for Kelowna to attend the High School there.

Mr Chas. Sommerville was a passenger to Kelowna on Monday.

Mrs Stevenson and her visiting friend were passengers down the lake on Monday evening, returning on Tuesday morning.

Mrs Woodley and Mrs H. McDougall were passengers for Naramata on Tuesday night.

It was reported at the annual meeting of the Peachland branch of the Okanagan Ambulance League that since August 14, 1917, \$90 had been spent on wool, \$52 on flannelette, \$7.50 on cotton, \$7 on buttons, tape and thread, \$15 sent to the Red Cross headquarters, Vancouver, \$50 collected on tag day for British Red Cross and forwarded to Vancouver, and that a balance in cash is now in the treasury of \$42.18; also that since August, 1917, there had been sent to the Red Cross headquarters, Vancou-

Summerland, B.C.,
5th September, 1918.

The Editor,
Summerland Review,

Sir,
The interesting statement by Prof. Broad in your last issue respecting proposed improvements in our water system is worthy of discussion by every grower.

Respecting the capacity of the steel flume, shortly after the erection of this structure I measured the grade given to it and have calculated its capacity. Running 2.75 feet deep—the safe depth of water it will carry—the capacity is 218,880 cubic feet per hour. From this deduct the water required for

ver, 75 pyjama suits; 213 prs. socks; 36 bandages; 104 stretcher caps; 6 hot water bottle covers; 6 wash cloths; 24 hospital handkerchiefs; 4 scrap books; 12 personal property tags; besides about 50 pairs of socks given to the Home Comfort Club to be put in the parcels for our own boys.

The officers appointed for the coming year were:

President, Mrs Williams
Vice-President, Mrs Keyes
Secretary, Mrs Hogg
Treasurer, Mrs Robison

Work Committee: Mrs Needham, convener; with Mrs Smalls and Mrs Keating as assistants. Mrs Smalls was appointed to take charge of wool and socks.

domestic purposes and the leakage in the reservoir to get the quantity available per hour for irrigation purposes.

There is no more important point in connection with this problem than the quantity of water required.

Fortunately investigators under government authority are available. Bulletin No. 44 of our Provincial Department of Agriculture, under the heading "Duty of Water for Orchards" gives in tabular form measurements made by the U.S. Department of Agriculture in orchards in Washington, Idaho, and Montana, which show that 1.23 to 2.2 acre feet per acre were used on these orchards, with an average of 1.62 feet per acre or about 19 1/2 inches.

Investigations in Idaho as to the water required for alfalfa show that four feet and over were profitably used.

Bulletin No. 4 of the Irrigation Branch of the Department of the Interior on the Duty of Water for Field Crops in Alberta and Saskatchewan shows that two acre feet per acre and upwards were advantageously used for alfalfa and potatoes.

Space will not permit further enlargement on the information given in these and other similar publications, but I trust that I have made it clear that the determination of the quantity of water required in Summerland to produce the most beneficial results in irrigated farming is a matter demanding serious investigation.

Yours truly,
J. A. KIRK.

Success comes in cans—failure in cant's.

- Newspaper Space -

The thing that will make your place a landmark and your name a household word is consistent, truthful, rightly supported newspaper advertising.

"A city that is set upon a hill," says the Good Book, "cannot be hid."

The right kind of advertising will, so to speak, set any man, any town, any worthy business upon a hill.

Play fair, look after things, and dip deeply into printer's ink—and you can no more escape becoming prominent and successful than you can reverse gravity and cause rivers to run up grade.

Carry the stuff—deliver the service—keep up a vigorous fire in the papers—know what you print, and live up to it.

The most precious and desirable thing in a business career is public confidence. Getting over-widening circles of people to believing in you is progress of the first order, but educating strangers to the idea that you're a man not entirely to be trusted, is slipping back—no matter what, for the time being,

**Not
For
Fakirs**

BUT

**For
Honest
Men**

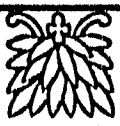

the balance sheet may be saying to the contrary.

Forget that old saying of the circus man, that "people like to be humbugged"—they do, on any circus day—and have a bully time over it—but regular business is different.

The fellow who deliberately sets out to deceive the public is a fool and a piker if he thinks he can get away with it through pages in newspapers. He may manage to put it over for a while, but the backfire will get him in time, and it won't be long before he'll find himself exactly where he deserves to be—nowhere.

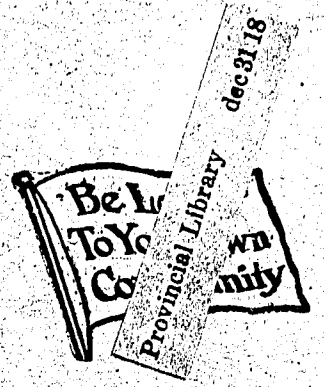

Newspaper space isn't for fakirs—it's for honest men, and every honest business can profit greatly through the use of it. It throws a spotlight upon the scene—and men and things that aren't quite standard will not stand the glare.

The crook should eschew printer's ink—he should emulate the Hun propagandists—slip around quietly and pass the bunk heart to heart.

Induction Of Local Pastor

Rev. W. H. Bates Formally Made Pastor of St. Andrew's Ch. & Member of Presbytery.

Why were they ringing the bell at St. Andrew's was the question that some of the uninitiated put to themselves on Wednesday evening. The answer is simple. Time tables having fallen to pieces and as the "Seamous" was to bring one or two members of Presbytery appointed to take part in this function, Mr Bates had wisely arranged that when the boat was sighted the bell should call the people together.

The Presbytery had met and, when the last comer appeared, all was ready for the public service. This was conducted by Rev. J. A. Rowland of Peachland, the appointed preacher. It was brief. First came the Psalm. Then followed a short prayer and Scripture lesson, and an anthem, well rendered by the choir. Then the sermon. The preacher took as his text "Paul went through Syria and Cilicia confirming the churches." (Acts 15, 41).

He was mainly concerned to insist on (1) the reality of the apostolic institution of local churches. (2) reasons for their existence which have always been obvious; Christianity being no mere intellectual abstraction but a way of life. The church by common worship fosters the common religious spirit and makes it pervasive of all social intercourse; it also provides instructive guidance and comfort. (3) The responsibility for the health of church rests not solely on the leaders but on all individual members of the one body.

The sermon being ended Rev. J. F. Millar of Penticton briefly recited the fortunes of the congregation since the resignation of Mr Daly and the steps that led to the calling of Mr Bates. After this he put to Mr Bates the appointed questions, and upon satisfactory reply declared him duly inducted to the charge of the congregation, and gave him the right hand of fellowship as being now a fellow member of the Presbytery, in which he was followed by the other members of Presbytery present.

Mr Millar, having prayed for the divine blessing on the pastoral tie now formed, called on Rev. W. Borthwick to address the people. Mr Borthwick delivered an address enlivened by many racy illustrations in which he called the people to self-examination and to a strengthening among other things of faith in God and faith in Jesus Christ, loyalty to church and loyalty to minister, and faithfulness in finance.

Then followed Rev. Mr Campbell from Benvoulin, who addressed the minister. He spoke obviously with much admiration and affection for Mr Bates, whom he had come to esteem very highly whilst Mr Bates was at Benvoulin. He spoke also with much shy humor, and very skillfully, whilst ostensibly addressing the minister, gave much wise counsel to the people. He emphasized especially the power of personality and the necessity of personal spiritual culture on the part of the minister, of whose work, aided by the sympathy of the people, he expressed the highest hopes.

Mr Millar closed the public service with the benediction.

But all was not over yet, for Mr Robertson stepped forward and on behalf of session, manngors, and congregation read a brief appreciation of the services Mr Millar had rendered as Moderator of Session, and asked his acceptance of a Book of Praise as a token of the same—which, however, was still in the hands of the printer. Mr Millar having briefly and genially replied, the ladies of the congregation served refreshments.

Proprietors of public eating places throughout Canada have been notified that they must obtain a sugar certificate from the Canada Food Board by September 1st. A sworn statement must be filed with applications for certificates, stating amount of sugar used between January 31st, 1917, and December 31st, 1917. After September 1st it will be both illegal and impossible for public eating houses to obtain sugar without a certificate.

Summerland's First Silo Being Fitted

Process an Interesting One to Local Farmers.

Quite a number of citizens took advantage of the opportunity afforded this week to see an ensilage cutter and silo filler in operation, a novelty in this district. The first silo in the neighborhood was recently erected on the Balcom Ranch, and this week a member of the staff of the Department of Agriculture, Mr R. J. Ferris, has been demonstrating with a machine sent here by his Department. The whole process from cutting the standing corn in the field to packing it down inside the big cylinder was most interesting. The enterprising management of Balcom Ranch has adopted a device for cutting the standing corn which was invented by Mr Harris of Moresby Island, and described by him while lecturing here. A platform on skids, much like a stone boat, has a V-shaped front end. Fitted on one side of this front is a piece of cross-cut saw, the back of which is ground to a sharp edge. When drawn along the row of standing corn this knife makes quick work of the cutting, and the corn as it falls is piled up between upright sides. At the silo the rapidly revolving knife cuts the fodder into short bits, and a fan running at high speed blows the ensilage through a tube to the top and through an opening in the roof of the silo which is twelve feet in diameter and thirty feet high, with a capacity for sixty-five tons of ensilage. A fair crop of corn on five acres will fill a silo of this size.

Mr Ferris supervised the erection of the first silo in the Kelowna district, where there are now about forty, and is a most enthusiastic booster of ensilage, as the best and cheapest feed for cattle.

A silo being built by Reeve Blair will be completed this week and ready for filling on Monday.

Another year is likely to see several more erected here.

Convention Visitors Next Thursday.

The joint committee of the Municipal Council and Board of Trade met on Monday evening to make preliminary arrangements for the entertaining of the delegates to the Convention of B.C. Municipalities, who will spend next Thursday afternoon in Summerland. Coun. Simpson was appointed to the chair, and Coun. White made secretary of the committee. The Penticton committee proposed that the visitors be taken up the Keremeos road and to Summerland by way of Shingle Creek. A number of cars will be required from here as it is expected there will be about one hundred and twenty in the party. Coun. White was asked to solicit car owners for this purpose.

After a tour of the district a stop will be made at the Experimental Farm, where lunch will be served. How this might be done to the best advantage and with the least burden to our busy women folk was considered at some length. Dr Andrew was finally appointed to confer with presidents of the Farmers' and Women's Institutes on this subject, and make necessary arrangements. The committee will meet again on Monday evening to complete arrangements. Those present were Reeve Blair and Couns. Simpson and White, representing the Municipal Council, and President Andrew, and Messrs Wm. Ritchie and P. G. Koop of the Board of Trade.

One of the horses in the team belonging to T. J. Jackson was badly hurt while at Trout Creek headwaters last week. The horses were tethered out for the night, and it is presumed that a bear or some other animal frightened them as they both broke loose. One was found in a tangle of logs in water, and was extricated only after much work. The other horse could not be found, and it was thought it had started for home, but on the way out the party was overtaken by the missing horse. The injured horse will be laid up for some days at least.

Public Works Chairman Withdraws His Resignation

Constable Instructed to Enforce Motor Traffic Law. Assessment Problem Considered.

Much Routine Business at Regular Meeting of Council.

Immediately after the reading of the minutes at the regular meeting of the Municipal Council held on Monday, some time was spent in conference with Engineer Latimer when the proposal for increasing the capacity of the water system was gone into. Mr Latimer was instructed to examine the plans and estimates already prepared and to make a careful inspection from the intake to the reservoir and around to Jones Flat. He was also commissioned to look into other features of the water system. Mr Latimer gave some information on the amount of water needed on various soils as shown by investigation and experience, stating that for production of vegetables, alfalfa, etc., local soils would require from 1 1/2 to 2 1/2 acre feet. He was informed by the Council that the system was to be enlarged to provide a minimum of 2 acre feet, and was asked to keep this objective in mind. Mr Latimer and Mr J. J. Mitchell spent all day Monday on the system.

An interesting incident of Monday's session was the reading of the resignation of Chairman Johnston, of the Public Works Committee. This was contained in a sealed envelope received by the Reeve some days earlier, but which had not been opened until read. The resignation was an outcome of a motion at an earlier meeting instructing Mr Johnston to put a building over the Trout Creek Point pumping plant. Following this motion Mr Johnston engaged a carpenter, and they two, together with the operator of the pumping plant, decided on what was needed, and an order was placed for the lumber. Taking the stand that the plan should have had the approval of the Council or the Public Works Committee, the Reeve forbade the delivery of the lumber. Thereupon Coun. Johnston handed the Reeve his resignation. The matter was quickly adjusted on Monday, when Coun. Johnston was unanimously requested to withdraw his resignation, which he did.

Complaint of damage by water was received from R. Clouston, James Fyffe, and Wm. Cross. These were referred to the Public Works Committee, with power to act.

The Okanagan Telephone Co. requested the Council to cut down or trim trees along their lines within the municipality, claiming this protection under the municipalities' right to assess them. The clerk was instructed to inquire as to what trees were referred to.

A further communication was read from a Kelowna law firm in support of E. C. Graham's claim of \$11 for damages to his car alleged to have been caused by a bad piece of road at Crescent Beach. The matter has been referred to the municipal solicitors.

After considerable discussion an arrangement was arrived at by which the domestic pipe line will be extended to the John Stewart property, recently purchased by Mr E. F. Sanborn. A section of pipe now laid will be replaced by a larger at municipal expense. Mr Stewart will bear the expense of digging, laying, and covering the extension.

On behalf of interested parties Mr P. D. Cooper asked for an extension of the domestic pipe system to properties east of the Shaughnessy ranch. No arrangement has yet been arrived at.

E. O. James, who has suffered much inconvenience for a number of years through lack of domestic water service, again applied for an extension to his property, stating that he proposed to build a new house provided that he could get the water. He suggested running the pipe up the old siphon. He was given permission to do this at his own expense.

Instructions were issued to the constable to enforce the law respecting motor traffic, complaints having been received of motor vehicles

being run without lights or only partly lighted, and of other infringements, including excessive speed and running of cars by minors.

There was some further correspondence from T. J. McAlpine respecting the lake shore road at Crescent Beach.

John Wernicke, accompanied by W. C. Kelley as spokesman, told of serious losses suffered by reason of water shortage, and urged that immediate relief be given. Chairman Johnston promised to investigate immediately.

Some pine trees on Paradise Flat were sold to E. T. Mountford at 50c. a cord.

The question of assessment for next year's taxes was introduced by the clerk, who recommended that the roll be opened at an early date to be returnable the 10th of January. Nothing definite was arranged as there developed some marked differences of opinion on this subject, Coun. Simpson's views being the most radical. He would, among other changes, abolish the single tax. The question of assessment was laid on the table for future consideration.

The following accounts, recommended by the Finance Committee, were approved for payment:

Wm. Ritchie	\$580.72

Driver and Boy Injured in Runaway.

Team was in Two Mix-Ups In One Afternoon.

A team belonging to William Brent was in two bad mix-ups on Wednesday afternoon. In the second instance the driver, George Narruko and a lad Fred Holding were both injured. Narruko had driven in from Upper Trout Creek where he is operating a wood-sawing outfit, and hitched the horses to a telephone pole opposite the Bank of Montreal. While he was having lunch in the restaurant something happened to frighten the horses and their efforts to free themselves resulted in their tripping the telephone pole which gave way just below the surface of the ground and hung suspended by the wires. There was considerable excitement before the animals were freed, some damage having been done to the democat.

A little later, just as the team was being driven from Darkie's

School Election Not Required.

This is Ruling of Superintendent of Education.

The Superintendent of Education, in reply to an inquiry made by the chairman of the School Board, states that the extended absence from the district of Mrs Andrew, a member of the School Board, has not disqualified her from continuing to hold office. This information was received at a special meeting of the School Board, held last Saturday evening. Mrs Andrew will, therefore, continue until the end of her term. Trustees Garnett and Gartrell, the committee appointed to look into the report to the effect that there were more children on the Trout Creek and Giant's Head route than the van could carry, recommended in favor of additional van accommodation. The discussion which followed resulted in instructions to the secretary to write the Department of Education to ask that a representative be sent here to look into the conveyance question. Mrs Andrew and Mr Garnett were appointed a committee to confer with such a representative, the Board deciding to abide by the ruling of the representative of the Department.

Another matter referred to the Department was the status of the Manual Training instructor, attention of the Board having been called to section 122 of the School Act, which forbids a clergyman of any denomination holding a public school position. A newspaper clipping stating that the present instructor had been given a year's leave of absence by a Lethbridge church, and another containing an advertisement announcing that Mr Baker would preach in a Summerland church were forwarded to the Department with the request that a ruling be made.

School Attendance Growing Apace.

Results in Overcrowded Conditions at Central Building.

The enrollment of pupils at the opening of the fall term in the Central School shows a marked increase over last year, according to Principal Lees. As a matter of fact the principal's room and that of Miss Wolfenden show an increase of fully one-third. There are now forty-nine on the roll in Division I, and fifty-two in Division II, with more yet to come. Division III has thirty-five, and Division IV, thirty-eight. These latter are considered about the maximum number that can be efficiently cared for in any one division. It would seem that the School Board is face to face with a problem of providing additional accommodation with one more teacher for the classes that have been in the past taught in Division I and II. Principal Lees attributes the greater increase in the attendance in these two divisions as compared with Divisions III and IV, to the fact that the three ward schools, in which the same grades are taught as in III and IV, are additional feeders for the higher divisions. A significant feature of the attendance in Division IV, is that twenty (more than half the total) are beginners, the largest number of beginners that have entered in any one year. The ward schools, Town and Trout Creek, each have four beginners. The aggregate for all seven divisions shows a considerable increase over that of any two years ago.

blacksmith shop some of the iron work, believed to have been broken in the first accident, gave way, causing the horses to bolt. Holding was thrown down between the horses and the rig, and received a number of blows on the head from the unshod hoof of one of the kicking animals, afterwards becoming caught in the brake and dragged along the road. The driver was also thrown forward, and had his right arm bruised and cut. After being freed both the injured were taken to the Darkie home and the doctor summoned. Fortunately Holding's injuries were less serious than were feared, and Narruko, though having his arm in a sling, looked upon his injuries lightly.

Visitors Express Great Delight

Good Work being done at S'land's Experimental Station Impresses Kelowna Farmers.

Under the caption "A Trip to Summerland" the Kelowna correspondent of the Vernon News gives a very interesting account of the recent visit of the members of the Kelowna Farmers' Institute to the Summerland Experimental Station. The story is reprinted below:—

The party numbering twenty crossed by the early ferry and immediately started in their cars on the long trail to Summerland. A good many of the party had never travelled this road before, and were much struck with the good quality of the surface and with the engineering of the grades. The scenery through which one passes is very fine, and is very striking to one who views it for the first time. The cars passed Peachland and reached Summerland without mishap, the only bad piece of road being a soft spot caused by overflow irrigation, for which the Summerland municipality are said to be responsible. A stop was made at the Summerland Fruit Union, where the party went in to see the local peaches (was it the crop or the ladies?) and found the place a hive of industry. It was noted in Summerland that all the fruit traction seems to be done by motor trucks, and the place was alive with them. On reaching the Experimental Station Mr R. H. Helmer welcomed the party and expressed himself as pleased to see that most of those who had been of the party last year had come to see what changes there were since 1917. After partaking of a picnic lunch at the tables above the flower garden, a general tour of inspection was made. The flower beds on the plateau overlooking the trestle bridge of the K.V.R. were a blaze of color which was accentuated by the beautiful green turf in which they are set. Particularly striking beds of Dwarf Phlox, Verbena and Asters were in evidence, and other flowers which attracted attention were Brachcome Iberidifolia (a charming dwarf edging plant), Antirrhinum, Gladioli, Salvia, Campanula Pyramidalis, Perennial Phlox, Hollyhocks, and Petunias. Though too late for the first bloom and too early for the fall flowering there was a nice showing of roses in the rose garden, and the newly formed rock garden shows promise of becoming very attractive. The trial vegetable plots were next visited where every variety of vegetable is tested to find out the best yielding sorts, and amongst which an interested-vegetable grower could easily spend a whole day. The members of the party who were tomato growers were particularly interested in a large plot of "Banko" tomatoes being tried out against a similar quantity of the celebrated Langdon's Earliana. Banko is a selection of Sunnybrook Earliana, which has been carefully made for some years by the Bankhead Orchard Co., and the comparison was all in favor of the Kelowna raised variety. It is a smooth, well-shaped sort, throwing the usual big first bunch of the Earliana type, without the rough fruit which the original stock always bears, and therefore lends itself peculiarly to the early shipping business. The total weight of fruit yielded by these trial plots will be taken, so that a complete test of marketable fruit can be recorded. The block trial orchards was then visited—here tests of clean cultivation, alfalfa, soiling crops, and clover rotation is fully tried out. With the aid of cheap, portable fencing, sheep and Berkshire pigs are fed to alfalfa and soiling crops in these orchards, and Mr Helmer recommended these portable fences as far preferable to the use of wire pig fencing which is much more trouble and expense to move about. The self-feeder is, of course, used to supply the pigs with the necessary concentrates that they require, and it is found most economical. There is a large and interesting block of forage plant tests—here were seen Soy Beans (acclimatized to the Okanagan) Navy beans, Hairy and other vetches, corn, alfalfa,

FRIDAY, SEPTEMBER 13, 1918.

A LOCAL GOVERNMENT BOARD FOR B.C.

THE PROVINCIAL GOVERNMENT seeks to establish a Local Government Board to control municipalities in the province.

Details of the proposed measure are not available, but it is presumed that the board will be something on the lines of those already in operation in Alberta and Saskatchewan. It will, however, have wider scope in that it will combine the work of a Public Utilities Commission with control of municipalities.

It might be suggested that the proposed authority should also look after such matters as town planning and the housing problem, which has become so acute in certain parts of Canada. Powers could be taken for these purposes without necessarily exercising them all at once. Town planning is of such vital importance to the future development of our municipalities that laws governing it cannot be too soon enacted.

Generally speaking, a Local Government Board may be of great value to the province.

But there are some dangers connected therewith. One is the risk of over-centralization of control in the hands of a government department. The example of the Department of Education does not inspire unlimited confidence.—The World.

THE SUGAR SITUATION.

THERE SEEMS TO BE A great deal of uncertainty in regard to the sugar restrictions. The situation is such as to make necessary the regulation of and reduction in consumption if an actual famine in sugar before the new crop is available is to be prevented. At the same time it is the apparent purpose of the Canada Food Board to prevent in no way the preserving of fruits.

Considerable literature has been sent out by the Canada Food Board urging housekeepers to "put down" as much fruit as possible, using thin syrup wherever possible, "canning" instead of making jam and jellies.

Mr J. A. Grant, B.C. Fruit Markets Commissioner, as the result of correspondence with the Food Board, makes the following announcement to prairie housewives:

"While the Board desires the loyal co-operation of every housewife to help in their efforts to conserve the sugar supply, still they are anxious to prevent wastage of preserving fruit. In view of the fact that crabapples are almost exclusively for jelly, they agree that sugar will be sold to housewives for this purpose, and for the next thirty days sugar so used will not constitute any breach of the recent sugar restrictions. It would be a waste of sugar to make jam of peaches, plums, or pears. Preserving them in thin syrup in self-sealers or other satisfactory air-excluding sealers is highly recommended by the Board. This is what is meant by canning."

KEEPING BIENNIAL VEGETABLES FOR SEED.

BY THE TERM "BIENNIAL" VEGETABLES is meant one which takes two seasons to produce seed, writes the Dominion Horticulturist in a leaflet giving advice on the "Selection and Wintering of Biennial Vegetables for Seed," which can be had free from the Publications Branch, Department of Agriculture, Ottawa. The vegetables must be stored over the first winter and replanted for seed production the following spring. Some well-known vegetables of this class are beets, cabbage, carrots, celery, parsnips, salsify, and turnips. Seed from these can easily be grown in Canada if the vegetables to be so used are kept in good condition over the winter. Unless a rigid selection is

McWILLIAMS' DRUG STORE

made each year of specimens which are true to type, it will not be long before a larger proportion of the crop will not be true to type; hence great care should be taken to select well-shaped, medium-sized roots, typical of the variety, of beets, carrots, parsnips, salsify, and turnips, firm-headed cabbage true to type, firm-stalked and disease-resistant plants of celery, and firm, shapely onion bulbs. If this is done, and varieties are kept far enough from others so that they will not cross the crop, Canadian grown seed should compare favorably with imported seed in regard to purity, as it does in other characteristics.

The methods of wintering vegetables for seed will vary in different parts of Canada, but in most places it will be necessary to give them some protection. When possible, it is best to store them in a frost-proof cellar. But, if necessary, the vegetables may be stored outside, both in small and in large quantities, except in the case of onions, which must be kept dry, and stored in a cool place where there is little or no frost.

§ § § § §

IT IS QUITE TO BE EXPECTED that the adoption of the universal rule of the road to "keep to the right" would be again advocated at the coming Good Roads Convention. The announcement that Mayor Gale of Vancouver will come out as a supporter of the movement to have the regulations altered so that the traffic on streets and roads of British Columbia will keep to the right, instead of to the left will be welcomed by advocates of that change. As we have stated before "keep to the right" is the rule in the prairie provinces and in the States of the Union. The exception to this rule which exists here in B.C. is doing us injury by very considerably discouraging tourist traffic, and is also causing property loss, and, frequently, suffering to our own people and visitors by accidents. It is understood that the chief obstacle in the way of adoption of the universal practice has been the B.C. Electric. There is further considerable satisfaction in the fact that the mayor of the chief city in which this company operates its street railways is lining up with those who are pressing for the saner practice.

W. E. Scott Superannuated

Deputy Minister of Agriculture Leaves After Ten Years' Service.

W. E. Scott, for the past ten years Deputy Minister of Agriculture in the Provincial Government, has been superannuated with an allowance of \$100 per month. He recently went through a severe illness, which has incapacitated him for work. His successor has not yet been appointed.

Mr W. T. McDonald, Live Stock Commissioner, has been acting Deputy Minister of Agriculture during the absence of Mr Scott.

Mr Scott has many friends in the Okanagan who will learn with regret that his condition of health has made it necessary for him to resign the position which he has so capably filled, and will hope that with rest he may soon again enjoy a good measure of his former health.

A.J. BEER

A Word for the Wage Earner.

Registered in accordance with the Copyright Act.)

ARTICLE No. XIX.

What would we do but for the wage earner?

What would become of all our boasted social and economic structures but for the invariably happy and light-hearted soul who kisses the good wife and kiddies good bye at a comparatively early morning hour and hies himself to his daily toil?

Perhaps he goes to the power house, the blacksmith shop, the town works department, factory, farm, or mill. It matters not—he is the laboring man, the specialist in some line or other of wholesome manual effort, who keeps the hum of industry humming.

And—though few stop to think of it—that man is in the majority. He is the man who makes up the great bulk of the nation's voters. His work is indispensable, and his opinion is one that must and should be respected.

The man who toils with his hands at a hundred and one various forms of labor comprises most of the citizenship of most all our Canadian communities. Without his support and influence the community cannot get very far.

On the other hand, he is dependent directly upon the success and prosperity of the community for his regular employment and his weekly or monthly pay-check. Should the community slump, he is the one who usually feels the slump most keenly.

The writer knows a great many laboring men who are in all truth the most loyal men possible to their community interests.

And this is as it should be! Some say: "I don't owe anything to the business men of this town; I'll do my trading with the out-of-town houses if I feel like it; I believe in buying where I can buy the cheapest."

That is all very well as far as it goes; but, as many can testify, it is left-handed logic in its most pernicious form.

Surely it is hardly necessary to repeat what is already so well known—that the retailer is the life and soul of practically every town on the continent worthy of the name. Where you find a live town you ALWAYS find live, prosperous, retail merchants.

Take these businesses away and you turn a live town into a dead one, just as the setting of the sun

turns day into night.

Your wide-awake working man realizes this, and that is why he is bound to patronize home business houses or suffer consequences in several ways.

The best wages are paid in the liveliest towns—the worker who knows anything knows that. He knows, too, that if he has bought a little nest for his better half and little brood of children, and is paying for it monthly he is foolish to cheat himself out of both a job and the value of his property by systematically sending out to injure or kill his town by spending his wages to help build up far-off communities.

The wise man warms and keeps alive his home community by covering it with the blanket of local loyalty. Who wants to sleep in a house without a roof?

Naramata, B.C.,
8th September, 1918.

The Editor, Summerland Review.

Dear Sir,

In your paper of 6th September, under the heading "Presentation of S.O.S. Badges," my name is given as that of "one of the employers who signed Certificates of Service." This is not the case. I never signed a Certificate of Service. I was never asked to sign one, and had I been asked to sign one in this particular case I should have refused to do so.

The boy for whom I have been made responsible worked for me off and on for several weeks this summer. One afternoon I set him to hoe tomato plants and half an hour later I saw him running down the orchard apparently trying to intercept my wagon which at the time was going to Naramata. He never came near me again, but when I next ran across him he told me that he was able to get 25 cents an hour elsewhere, whereas I was only paying him twenty. Apparently this was good enough reason for leaving me at a moment's not-

ice and without a word of explanation.

The persons in control of the S.O.S. movement may, so far as I am concerned, give medals where and how they please. Their doings are no business of mine, but I do most strongly object to having my name made use of without my permission, and if they think that this particular boy deserves his medal I don't agree with them.

F. W. ROLT.

Summerland, B.C.,
11th Sept., 1918.

The Editor, Summerland Review.

Dear Sir,

If the scheme advanced by our Council for increasing the water supply is to be of one hundred per cent. efficiency the main ditches must be kept running at full capacity both day and night throughout the season. The supply must be as certain and unvarying—barring accidents—as the daily rising of the sun if the growing of fruit and produce in Summerland is to rank with first class business propositions.

It is proposed to augment the present supply from the natural run of water in Trout Creek so long as it lasts. Then to rely for the immediate future upon existing impounded waters from the headwaters of Trout Creek with its tributaries and Eneas Creek—the impounded area of the latter to be increased.

Judging by the past we may expect to tap the storage supply in the first or second week in July, and—if drawn upon at the rate of two acre feet per acre per season—they will be dry in less than three weeks, so far as the Trout Creek supply is concerned. It is obvious that unless the supply is reduced during this period the fumes fed from this source will be dry by the end of the first week in August or sooner. The resulting water famine will come when fruit trees must have abundant water if the growth of the season is to yield maximum results as to quantity and quality when it reaches maturity.

This seems to have been realized

in a dim way, for the Council proposes as follows: I quote Prof. Broad's statement, "IF AND WHEN TIME ALLOWS make provision to increase the storage capacity of the dams at the headwaters." The emphasis is mine.

It is more urgent for us to have an unvarying and ample supply through the season next year than in the dim and distant future when we may be elsewhere. It is there-

fore imperatively necessary that we increase our impounded areas AT ONCE, not "if and when time allows."

As to the cost—it may come high—considerably higher than the esti-

mate of \$5,000, but increased returns would undoubtedly soon return the outlay.

Yours truly,
J. A. KIRK.

Peachland Doings

A Weekly Chronicle Furnished By Our Local Representative.

After spending a portion of the summer in Peachland again, enjoying once more the balmy air of the sunny Okanagan, Mr and Mrs J. McGregor, with the two children, left for their home in Swift Current, Sask.

Mr J. McKinnon was a passenger to Kelowna on Wednesday, returning on Thursday evening.

Miss Jean Robinson of Victoria, who was teacher in the High School here for a time, came in on Wednesday evening's boat for another visit with friends here.

Mr G. Hohensee with his family, moved down from the McKinnon place, into the Ritchie house in town, on Wednesday last.

Mr and Mrs Geo. Weaver of Kelowna came in on Thursday, Mr Weaver making his customary rounds of the Valley towns, getting all the pianos tuned and in order for the winter. He does not expect to call in Peachland again till his spring trip.

Mrs J. Wells of Calgary, who has been spending a few weeks' vacation with her son in Naramata, came in on Thursday morning's boat to spend a couple of days here, the guest of Mrs Walter Morsch.

Mr Johnston came in on Thursday to spend a short while with Mr J. McKinnon.

After a few weeks' visit at the Coast with Miss Verna, Mrs A. Town returned via K.V.R. Mr Town and Mr Smith motored down and met the train at West Summerland, bringing Mrs Town home with them, thus saving the extended trip on to Penticton and home by boat. Mrs Town reports Verna as doing nicely, but as it was thought best that she have a little more rest before travelling, she remained for a short time with her cousin, Mrs Dr McKechnie.

After a few days' visiting friends here, Miss Mary Vicary returned to Kelowna on Friday morning.

Mrs Chas. Somerville was a passenger up the lake on Friday, returning in the evening. She accompanied her aunt, Miss Galbraith,

who had been visiting her brother-in-law, Mr Thos. Elliott, and was returning to her home in Ontario.

Mr and Mrs W. J. Rutherford, who have been visiting with Mr and Mrs Thos. Powell for a short time, left on Friday night's boat to return to their home in Vancouver.

Miss Nicholson of Summerland came off the boat on Friday morning, to take charge of the Trepanier Ward School. She is boarding with Mrs and Miss Elliott.

Mr J. D. McDonald and Miss Montgomery of Penticton, came up on Saturday morning to visit in the home of Dr Buchanan at the Townsite.

Mrs and Master Hugh Dorland, with Mrs Birkett Robinson and two of her children, Mr A. and Master Gordon Town, Mr B. B. Smith, Mr Iverson and two children, and Mr E. Fulton were passengers to Kelowna on Saturday, returning in the evening.

Mr Frank Lloyd of Winnipeg came in on Saturday evening to visit old family acquaintances in the persons of the Lang's and the McDonald's. At present he is the guest of Mrs and Miss McDonald.

The present warm spell is bringing the fruit in very fast these days, and the packing houses are very busy places from early morning and throughout the day. The drivers on the road lose no opportunity to get into line for the weighing-in door, knowing if they do, their wait may be long. Two complete cars were shipped from here on Sunday, one of them being a straight car of No. 1 Elberta's, containing 1,200 boxes, and the other one a mixed car. They were booked for Winnipeg. We are told that the express shipments to date well exceed over a thousand pieces in advance of last season.

Miss Pearl Law was a passenger to Penticton on Tuesday night to enjoy a short holiday with her uncle and aunt there, Mr and Mrs E. Law.

Destructive Fire At Peachland.

The Peachland population was aroused on Saturday night last by the unwelcome sound of the fire alarm, rung shortly after ten o'clock, when the house owned by Mrs A. J. Miller, and just vacated by Mrs Stevens, was found to be on fire. Unfortunately there were few pedestrians on that street just at that time, and the fire, which had evidently started inside, had made considerable headway before it was noticed. Two boys passing by noticed the fire, and as soon as they could get to town gave out the word. Owing to it being shopping night, and the boat being exceptionally late, there were quite a number in town, who were able to lend their assistance to the volunteer fire brigade, in getting the apparatus down on the job. The fire had made such headway inside before breaking through in sight of the public that there was very little could be done except to protect the adjoining property, that of Mr Robert Michael, and down the fire as quickly as possible, to make all possible effort to save any of the contents. A small portion of the same was found after the fire was sufficiently subdued to get into the remains of the building, but in most cases was pretty well damaged by fire or water. Unfortunately for Mrs Alex. McKay, who, on returning to the Coast from here, left two boxes stored in this house, she loses the most of the contents, which were to her very valuable;

Passing Events: Social, Personal, &c.

Miss Nicholson of Garnett Valley is a teacher in the Trepanier School, Peachland.

Don't postpone ordering fruit trees for Spring 1919 delivery, until Fall; ORDER NOW. B.C. Nurseries Co., Ltd., Vancouver. tf

Fred Pardee is again at the mill having been dismissed from military service because of his failure to get past the medical inspectors.

The treasurer of the Okanagan Ambulance League acknowledges with thanks the receipt of \$51.20 from the Fruit Union Packing House dance.

Mrs E. H. Lock and little son left on Wednesday morning for New Westminster, where Mr Lock has accepted a position on the High School teaching staff.

Mr and Mrs Geo. Weaver, who have been residents of Kelowna for some time, are now living for a short time in the Sharp cottage, Trout Creek Point.

Mr J. M. J. Mowatt, formerly with the Bank of Montreal here, and now with the same institution in their New Westminster branch, is spending his vacation here, having arrived last week.

The fall fair season has now opened and Supt. R. H. Helmer of the Experimental Station went out on Tuesday morning to Kelowna, to supervise the educational exhibit of the Dominion Experimental Farms.

Those of our readers who are contemplating spending a day or more in the hills will be glad to learn that they can obtain the necessary gun licenses at the Municipal Office. Collector Pollock now has the authority to issue these, and is equipped with the forms.

A big new lamp of high candle power, recently installed by the municipal electrician for the C.P.R., now gives excellent light for all night users of the C.P.R. wharf. Very large quantities of fruit are being received nightly to be forwarded by express by the early morning boat. The light makes easy the distributing of the fruit packages on the several trucks according to destination.

Cows for Sale

1. Grade JERSEY, due to freshen in December; gentle, good milker; \$85.
2. Grade HOLSTEIN Heifer, freshened in April; heavy milker; \$95.
3. Grade HOLSTEIN-AYRSHIRE; freshened in May; \$110.

Meets on the Thursday on or before the full moon.
Rev. H. A. Solly, W.M.
K. S. Hogg, Sec.

Work has been started on the addition to the High School building.

Prof. W. T. Broad is having a concrete residence built on his Jones' Flat orchard property.

Mr W. C. Kelley attended County Court at Penticton on Tuesday attending to several routine matters.

Dr W. L. Robinson is one of several members of the staff of the Toronto General Hospital who are leaving shortly to go to the University Hospital near London.

T. E. Bustard and T. J. Jackson went to Trout Creek headwaters on Tuesday with instructions to open all the dams including the beaver dams. Two men went up last week but were unable to locate some of the dams.

Interested residents of Ward I. are wondering just how the matter of conveyance would now stand had Mrs Andrew been permitted to vote at the last regular meeting of the School Board, as it now appears she had the right to do.

Mr Geo. Weaver will be here for a week or more, and piano owners who wish to have their pianos attended to are asked to drop him a card in care of general delivery or phone their orders to the Summerland Drug Co., or Review Office. 7

The foundation has been laid this week for a 32 by 26 feet extension to the Rialto Theatre, the addition being wider than the main building by several feet. It is proposed to put in a stage large enough to accommodate travelling theatre companies.

Pte. J. H. Henderson, son of Rev. A. Henderson, has been recommended for repatriation to Canada. Various reports of his condition have been in circulation since recent information brought the first news that he was incapacitated. His brother, Arthur, has written that he is suffering from severe shell shock, while cheering news has been forwarded to his father by the Red Cross in that he is showing improvement since his arrival at the Lord Derby Hospital, Warrington, England. Pte. Henderson enlisted immediately after war was declared, and has been in nearly four years of constant service in France. It is hoped that later news will tell of further improvement to his shattered nerves, and that he has embarked for home.

A Los Angeles young woman invited 1,000 friends to her wedding, rented a big hall, and charged 50 cents admission, and gave the proceeds to the Red Cross.

The regular Red Cross meeting will be held next Monday at three o'clock at the home of Mrs Beavis.

We are informed that the Gunning lot, near the Steuart packing house, has recently been purchased by Mr H. H. Elsey.

Mr and Mrs Dagleish and Rev. Mr Campbell and Mrs Campbell of Rutland were guests this week at the home of Rev. W. H. and Mrs Bates, having motored down on Wednesday.

The cottage now occupied by G. L. McWilliams, the property of Mr W. C. Kelley, has recently been sold by him to Mr Peter Edwards. We understand the new owner will move in next month.

The girls of the Union Packing House staff gave a very successful dance on Tuesday evening in Empire Hall. Over \$50 net was realized, which has been turned over for Red Cross purposes.

Despite the shortage of labor there has been a good demand all season for lumber, and Mr William Ritchie reports the demand on his stock this month as being particularly heavy. The local market for box shooks is also large.

Attention is directed to the attractions offered for next Wednesday by the Penticton Turf Club, of which announcement is made in the advertising columns of this issue. A stampede always has compelling attractions and draws the crowd. The good music and the splendid large floor are special drawing features of the dance the same evening.

Among the interesting letters read at the Home Comfort Club meeting on Wednesday evening, was a short note from Gordon Ritchie from Witley Camp, Surrey, England, in which he speaks very favorably of the camp, and says that Cliff McWilliams and Basil Steuart are also there. James Kean had left for France a few days before.

War Efforts of Red Cross Totals Well.

At the annual meeting of the Okanagan Ambulance League held on Monday afternoon the following officers were elected for the coming year:

President Mrs F. W. Andrew
Vice-Presidents:
Town, Mrs R. E. White
W. Summerland, Mrs W. Ritchie
Trout Creek, Mrs G. Thornber
Treasurer, Mrs H. A. Solly
Secretary, Mrs E. B. May

Methods of raising funds were discussed, and it was decided to organize a Red Cross Drive in place of the annual auction sale so that by a house-to-house canvass everyone would be given an opportunity to contribute to the cause. The secretary was instructed to write to Vancouver to ascertain if the Red Cross were sending apples to the soldiers this winter.

The treasurer's report shows a considerable increase in receipts over those of the year previous, though the membership had fallen off from 167 to 108. During the year just closed 10 boxes of hospital supplies containing 2502 articles including 683 pairs of socks had been sent to Red Cross headquarters in Vancouver. Below is shown the receipts and expenditures for the past twelve months:

Receipts.	
Balance on hand	\$85.15
Members' Fees	28.30
Donations	226.42
Entertainments	1,048.58
Sale of Wool	80.90
Collecting Box	.50
Total	\$1,417.85
Expenditure.	
To Red Cross Society	\$245.00
Halifax	50.00
Serbian Relief	23.00
French Red Cross	50.00
Materials	812.77
Freight on Materials	7.65
Postage	3.50
Filling Comfort Bags	30.00
Rent	38.50
Incidental Expenses	4.80
Balance in Hand	150.63
Total	\$1,417.85

In addition to the above, \$565.65 received from various sources as local contributions to the Prisoners-of-War-Fund had been forwarded by the treasurer.

Market Outlook For Apples.

The restrictions on sugar recently imposed by the Food Control Board, and much misunderstood by the public, have had a very detrimental effect on the sale of some lines of fruit, especially crabapples, plums, and prunes. The proverbial "ill wind," etc., has done some good to the apple market prospects. We wish to point out the situation over in Washington, as their condition reflects largely in B.C. Up to this date over 3,000 cars of Washington apples have been sold to jobbers by cash buyers and growers' associations at extremely high prices, and there is no reason to expect any decline in demand or price. But there are several reasons why they might advance in price. The sugar shortage has greatly reduced home canning, and this will certainly stimulate a greater demand for apples, as they require little sugar for cooking, and none at all for dessert. Inquiries are commencing to pour in on B.C. shippers for winter apples, and in some cases the poor varieties which have been pushed first are now cleaned up. B.C. growers and shippers are more optimistic than the prairie jobbers. The shipping end is not over anxious, and expect to get rid of the balance of their entire output of splendid apples at nice prices. The Markets Commissioner has just returned from B.C. and can vouch for the quality of this year's apple crop. It is up to "the best ever."—Prairie Fruit Markets Bulletin.

Wonder Workers Coming.

Cunning and his company of Modern Wonder Workers come to the Empress Theatre, Penticton, for one night, Tuesday, Sept. 17th. In addition to the wonderful illusions and Indian sorcery he presents some 40 minutes in modern commutivity, oftentimes called mental telepathy, and more times called mind-reading. Cunning claims that both are wrong. Most readers of the present time are aware of the great interest that is being taken throughout the world in occult phenomena, which is being taken more seriously than ever before. Many sober thinkers and matter-of-fact persons have gone into psychic researches. Maeterlinck relates in one of his recent volumes one baffling experience after another.

Cunning, along similar lines, really does some wonderful things. Manager Berry of the Empress Theatre has been to quite an expense in getting this attraction in order that theatre-goers of this district may see the world's greatest mystery show next Tuesday, Sept. 17th.

VISITORS EXPRESS DELIGHT.

(Continued from page 1.)
millet, and innumerable varieties of grasses. There is a fair-sized block of potatoes—and it was noted that the rows of the potato and root crops were all three feet apart, it being found that this distance is better than thirty inches by reason of allowing better cultivation. The seed-raising industry is getting a complete try-out at the farm, as, apart from flower and vegetable seeds from trial plots there are acres of stecklings of mangels and

carrots, etc., and quite a large crop of mangel and carrot seed was being harvested from stecklings raised last year. The farm is not without its land girls, several of them being occupied in harvesting and cleaning seed. The new office which is the start of the administrative buildings is in a commanding position in the centre of the land. This building now contains a quantity of the seed that is being harvested, and a unique machine which is the invention of Mr Helmer for cleaning carrot seed was seen in operation. Mention must be made of the complete system of irrigation which has been constructed, and of the cement settling tank, through which all the water passes. The use of this is to collect weed seeds and foreign matter, and prevent it being distributed by the flumes all over the land. Apart from weed seeds a variety of rubbish is stopped here including fruit, kittens, chickens, and young pigs. The party left for Kelowna about 5.30, having thoroughly enjoyed both the visit to the farm and the very pleasant motor drive both coming and going. Before leaving, Mr L. E. Taylor moved a hearty vote of thanks to Mr and Mrs Helmer for their kindness and hospitality. Mr Helmer, in responding, expressed his pleasure at all times to meet the farmers, and others, who were interested.

CANADA

NOTICE!

To United States Citizens in Canada

By the United States Military Service Convention Regulations, approved by the Governor-in-Council on 20th August, 1918; Male Citizens of the United States in Canada, within the ages for the time being specified by the Laws of the United States prescribing compulsory military service, except those who have diplomatic exemption, are made subject and liable to Military Service in Canada, and become entitled to exemption or discharge therefrom, under the Canadian Laws and Regulations. The regulations governing this liability are published in the Canada Gazette (Extra) of 21st Aug., 1918; copy whereof may be obtained upon application through the post to the Director of the Military Service Branch of the Department of Justice at Ottawa.

United States Citizens of the description aforesaid who were in Canada on 30th July, 1918, have sixty days from that date within which to exercise an option to enlist or enroll in the forces of the United States, or to return to the United States; and those who for any reason subsequently become liable to Military Service in Canada have thirty days from the date of the accruing of such liability within which to exercise the like option. It is stipulated by the Convention also that certificates of diplomatic exemption may be granted within the optional periods aforesaid. Every citizen of the United States to whom the regulations apply is required to report to the Registrar under the Military Service Act, 1917, for the province or district within which he is, in the manner by the regulations prescribed, within ten days after the expiry of his optional period, and will be subject to penalties if without reasonable excuse he fail so to report. For the information of those whom it may concern, Sections 3 and 4 defining the requirements of registration, with which it will be necessary strictly to comply, are set out substantially as follows:

REQUIREMENTS

3. Every male citizen of the United States within the ages for the time being specified in the laws of the United States prescribing compulsory military service, not including those who have diplomatic exemption, within ten days after the expiry of the time limited by the Convention within which the Government of the United States may issue him a certificate of diplomatic exemption, shall truly report to the Registrar by registered post, and in writing which is plainly legible, his name in full, his occupation and the date of his birth; stating also whether he is single, married or a widower; and if the latter, whether he has a child living, also if married, the date of his marriage; and stating, moreover his place of residence and usual post-office address in Canada; and, if he reside within a city or place where the streets and dwellings are named and numbered, the name and number of his street and dwelling; or if he reside in another place, the lot and concession number, section, township, range, and meridian, or other definite description whereby his place of residence may be located, having regard to the custom of the locality in which he lives; and if without reasonable excuse he neglect or fail to report in the manner and with the particulars aforesaid, within the time limited as aforesaid, he shall be guilty of an offence, and shall be liable upon summary conviction to a penalty not exceeding Five Hundred Dollars, and to imprisonment for any term not exceeding six months, and moreover, he shall incur a penalty of \$10.00 for each day after the time when or within which he should have registered during which he shall continue to be unregistered.

4. Every United States citizen who has diplomatic exemption, although not otherwise subject to these regulations, shall within ten days after the granting of the same truly report to the registrar, in like manner and with the same particulars as required by the last preceding section; and in addition he shall embody in his report a true and complete statement of the particulars of his certificate of diplomatic exemption. Neglect or failure without reasonable excuse to comply with the requirements of this section shall constitute an offence punishable in the manner and by the penalties provided in the last preceding section.

Issued by the Department of Justice, Military Service Branch.

Engineer Submits Report On Proposed Enlargement Of Irrigation System.

Will be Considered by Municipal Council and Water Users' Committee Tonight.—Public Meeting Monday.

Engineer Latimer's report on the proposed enlargement of the irrigation system has been received. Awaiting the receipt of this report and approval or otherwise by the ratepayers little progress has been made toward starting this important construction work. The joint committee meet to-night to consider the report, and a ratepayers' meeting is called for Monday evening. Engineer Latimer's report is as follows:

The Reeve and Municipal Council, Summerland, B.C.

Sirs:— In accordance with your request to examine into the condition of water supply and capacity of main irrigation ditch from intake in Trout Creek to the Reservoir and also North Main to each Siphon delivery to "Jones' Flat," I will report as follows:—

1st. TROUT CREEK MAIN.

Adopting the acreage compiled in Municipal Office, which I understand, is confirmed by engineers of Water Rights Branch, as 1,800 acres, it being required to convey sufficient water to irrigate one-third of this acreage—600 acres at one time, the latter requirement, however, is more a question of method of distribution.

To convey 1 ac. foot in 100 days requires an average constant flow of .005 cu. feet per sec.

Owing to there being a considerable area of land in the Municipality which has a gravelly or other porous soil or subsoil and that in recent years more attention is being devoted to growing alfalfa, clover, and other cover crops, as well as gardening, and evaporation, seepage, and other losses at duty at the main headgate of 3 ac. feet per acre is not too much to assume. For the Experimental Farm 60,000 cub. feet per 24 hours, will require in addition 0.7 cub. feet per sec. average flow. On this basis, the Trout Creek Main should be able to carry 5,400 ac. feet in 100 days at an average flow of 27 plus 0.7 equals 27.7 cub. feet per sec.

Up to the present, experience in the southern end of the Valley seems to show that for the earlier portion of the irrigation season, a large percentage of season's requirements may be needed, varying, according to care in use and local conditions from 50 to 100 per cent. greater than the average minimum flow. I have, therefore, adopted a two-third increase above the average or a maximum flow requirement of 27.7 plus 18.5 equals 46.2 cub. feet per sec. Since the loss from the reservoir is considerable an additional allowance has been made, and a concrete lined channel having the wetted surfaces made smooth, 6 ft. wide on bottom, the water running 2 feet deep, and fall of .00167 per 1000 has been adopted which will carry 58 cub. feet per sec.

The question of moving the Intake higher up stream in Trout Creek was considered, to secure a greater fall in ditch. This was investigated some years ago and found that the ditch could not be raised at about half a mile below Intake without either requiring a considerable addition to length of flume on trestle or else make a long detour around a deep depression and so materially lengthening the ditch. In addition, with an open earth ditch of size constructed, the velocity of flow when running 2 feet deep would tend to scour the bottom unless concrete lined. The cost of rebuilding Intake weir and whole main ditch or flume would be at least 50 per cent. more costly than the method proposed.

To secure the maximum capacity of the ditch it is essential, however, that the bottom of ditch be kept closely to uniform grade. It was suggested that the ditch lining be made with cobble stones and rock laid in cement concrete, the thickness of wall being 12 inches, which is about the minimum thickness that can be conveniently laid

in that manner. I am inclined to think that if sufficient stones can be conveniently obtained measuring not more than 4 inches in one direction, a channel with 4 feet 10 inch concrete floor and walls of concrete and stone braced with concrete buttresses every 3 feet can be constructed for about 20 per cent. less cost and can be constructed as quickly. It would be advisable to screen the sand through 1/2 inch mesh screen and the gravel through a 1 inch mesh, and use in the proportions measured loosely of

- 1 Cement
- 2 1/2 Sand
- 4 Gravel

approximately, the best proportion having to be determined by trial, and depending on proportion of fine and coarse particles in sand available.

It will be necessary to enlarge the existing flumes, etc., to give a cross-sectional area of 92 x 30 inch deep, the trestle being made stronger to carry the additional weight of water contained, the dimensions being as in sketch prepared by Mr. Jas. Mitchell.

All allowance for concrete footings for trestle posts has been included.

It will be necessary to raise the walls of concrete running to K.V.R. culvert, 12 inches higher and make hood over entrance to culvert.

From levels taken previously, I find that the crest of spillway of weir at intake is two feet above flow of concrete entrance to main ditch, so that all that is required is to remove the obstructions to a free entrance to ditch now existing in bed of creek.

I would suggest that lining of ditch be commenced on portions where seepage is greatest, such as down from lower end of Maginnis flume through gravelly cut past road crossing to wood flume.

The estimated cost of this work from Intake in Trout Creek to Reservoir is

Clear out bed of Trout Creek at Intake	\$ 50.00
Concrete line ditch approximately 2734 ft. at \$8.00	8,202.00
Wood flumes enlarge to make 92 in. x 30 in. clear, strengthen, and rebuild trestles, concrete footings with trestle posts	3,223.80
Runway to K.V.R. culvert, enlarge concrete	110.00
	\$11,585.80
With 10 per cent. for Supt. and Contingencies	1,158.20
	\$12,744.00

NORTH MAIN DITCH.

It is desired to convey water for first irrigation for "Jones' Flat," "Siwash Flat," and adjacent lands from Trout Creek which is said to be available at an earlier date than from Enons Creek.

To determine the required capacity of ditch an approximate estimate was made of acreage requiring water and probable duty of water depending on nature of soil and subsoil.

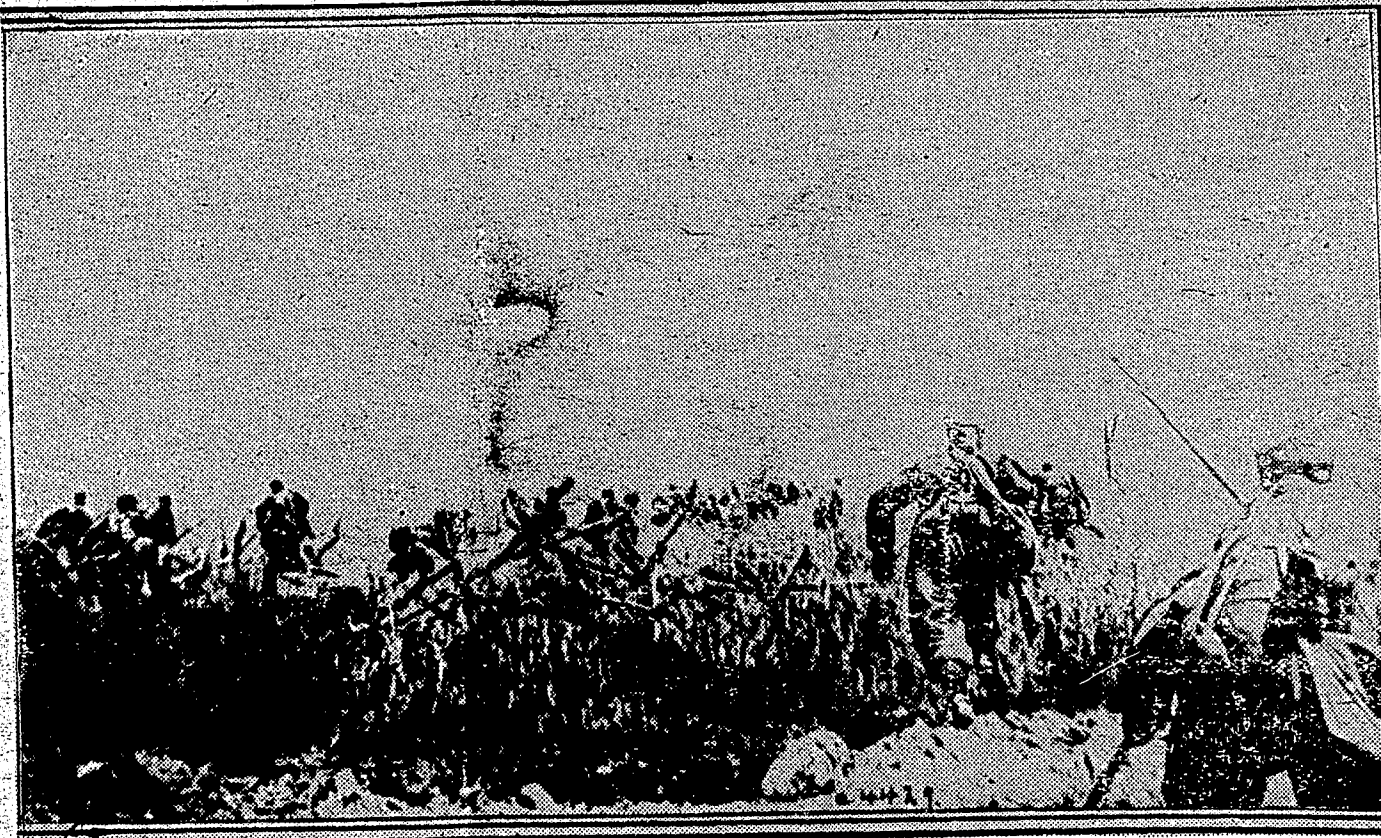

Below Block 18, Lot 2543, I estimate that approximately 534 acres will require for the season;

650 acres 2 ac. ft.	1800 "
75 " 2 1/2 "	.187 "

1208 " may require in the season 3350 " which requires an average minimum flow of 16.78 cub. ft. per sec. or with allowance of 50 per cent. a maximum flow of 25.17 cub. ft. per sec. and from thence to Intake of North Main, an additional amount to make a total maximum requirement of 31 cub. ft. per sec.

With a fall of .002 per 1000, a flume 46 inch x 32 inch will be sufficient and a concrete lined ditch of size, similar to concrete lined channel at Intake to South Main 5 ft. 0 in. over 3 ft. 0 in. by 2 ft. deep.

Storming Barbed Wire Entanglements Before Enemy Trenches Would Change Rule of the Road

This extraordinary photograph shows the famous French Zouaves storming through barbed wire entanglements erected before German trenches.

Convention Avoided Discussion of Best Route for Trans-provincial Highway.

The Good Roads Convention which met at Penticton on Tuesday, adopted the resolution of last year favoring changing to the right hand side.

Mayor Gale of Vancouver, strongly supporting the change, stated it was not likely it could be made at once. Expenditure of \$600,000 to change over the B.C. Electric equipment and the question of compensation for such changes would have to be considered.

The convention adopted a resolution to the effect that the Dominion and Provincial Governments be asked to investigate and determine, through engineers, the route which the trans-provincial highway should take to be most beneficial and advantageous to the people of the province.

A suggestion from Hon. John Keen, Speaker of the Legislature, that an issue of five million dollars worth of highway bonds be made, the money to be spent on permanent road work, received considerable sympathy.

Attorney-General Farris, speaking for Dr. King, Minister of Public Works, stated the government was heartily in sympathy with the work of the Good Roads League, explained the financial situation of the government in respect to public works. The government was very anxious the trans-provincial highway be completed, but the question of finance must first be decided.

Summerland delegates to the convention were Couns. Johnston and Campbell, Dr. Andrew, F. A. C. Wright, K. S. Hogg, and T. J. McAlpine.

Mayor Gale of Vancouver is the new president, and J. S. Heales, Penticton, secretary.

S. Ok. Pheasants More Protected.

The season for shooting cock pheasants in the South Okanagan district has been shortened to three days only by an amendment to the game regulations which has just been published. Instead of the season remaining open until Nov. 8, the period in which cock pheasants may be shot in this district will expire on Oct. 28. No change is made in the opening day of the season.

The official notice is as follows: Notice is hereby given that the game regulations for 1918-19 have been amended in respect of killing, taking and possession of pheasants in the South Okanagan electoral district. The open season for cock pheasants in the South Okanagan electoral district has been fixed from Oct. 26 to Oct. 28, 1918, both dates inclusive. No person may have in his possession more than three cock pheasants on any one day.

It is clear that too many services have been taken from the pipe line and it will be necessary to have a separate outlet from the reservoir to North Main, which will practically relieve the shortage on pipe line.

An arch culvert 24 inch bottom with 24 inch walls with fall of 3.3 ft. in 204 will be sufficient. The walls and bottom would be of small rubble concrete, the arch ring of cement concrete 1 : 2 : 4.

In renewing the first flume below Intake it would be best to carry the new flume across the depression on trestle. The shortening of length of flume and improvement in alignment will more than compensate for trestle required.

In addition to the old section of lining which it is proposed to replace, the other lined ditches will be too small for proposed requirements, and will need to be enlarged. Also all flumes down as far as Block 20, D. Lot 2543 will need to be enlarged to 40 in. x 22 in. in clear, and cleats and braces put in not more than 5 ft. 4 in. centre to centre, and better 4 ft. centre, to prevent any possible springing of sides and starting of leaks.

The general proposed changes by Mr. Jas. Mitchell are concurred in, excepting size of entrance culvert, and long flume (3248 ft.) near east boundary of Lot 2543. This 20 in. x 12 in. would better have bottom widened an additional 12 inches and sides raised 4 inches.

For the inverted siphon, a 12 in. wood pipe with fall of 0.5 feet in 1525 feet will deliver 0.5 cub. ft. per sec.

A concrete chamber at outlet of siphon would be advisable to break the force of the current. The estimated cost of bringing up the North Main as thus outlined to required capacity is \$12,526.00, or with 10 per cent. allowance for superintendence and contingencies \$13,780.00.

F. H. LATIMER, M.C.I.E.

Express Delight With Visit to Summerland

Delegates to Municipal Convention Entertained Here Yesterday.

More than a quarter of a thousand people sat down to the splendid lunch served by the ladies of the Women's Institutes to the visiting delegates at the Summerland Experimental Station on Thursday afternoon. The visitors, representing the municipalities in all parts of the province who have been attending the Convention of the Union of B.C. Municipalities at Penticton, were conveyed by motor cars from Penticton to Summerland via Shingle Creek, the route being through Prairie Valley over to Jones' Flat, down the switchback to Peach Orchard, and around to the Fruit Union packing house, where a stop was made and the visitors shown through the building, where the fruit packers were busy and the grading machine in operation. When the journey was resumed the party was escorted to the flower gardens at the Experimental Station, where the entertainment committee, with the ready assistance of the ladies, had prepared lunch.

After the lunch, which included a bounteous supply of fruit, had been partaken of, Dr. Andrew, chairman of the entertaining committee, called upon Mr. J. W. Weart of Burnaby, ex-speaker of the house, who told the visitors some of the things he had learned of the activities of the people of Summerland, and gave special praise to the women of the community for their work for Red Cross and similar war efforts. The Summerland Red Cross had raised a larger amount of money per capita of population than any other community in the province. The Home Comfort Club every two weeks was sending off twelve boxes addressed to twelve Summerland soldiers and containing articles much appreciated by the boys. Besides, two hundred boxes were sent each Christmas to the two hundred Summerland men overseas, \$6,000 in money had been raised. Mr. Weart, in concluding, declared that no pen picture, or no words could convey an impression of the beauties of the Okanagan Valley.

A pleasing innovation was the entertainment given by Coun. Diggon of Snanich, who performed some sleight-of-hand tricks that were marvellous to the uninitiated. Coun. Diggon, through this month of entertainment, has earned \$15,000 for Red Cross.

Attorney-General Farris spoke briefly. Next to sincerity and honesty of purpose is courage. He found the best way to attain courage was to travel around and meet the courageous people of this province. He urged that we should know each other better, and ad-

Third Son Is Killed in Action

Professor W. T. Broad received a telegram from Ottawa this morning conveying the sad intimation that his son, Lieut. T. H. Broad, had been killed in action on Tuesday.

The sympathy of the whole community goes out to the stricken family upon the loss of this, their third, son to lay down his life in the great world-struggle for freedom's cause.

Thanksgiving Day, Monday, Oct. 14

Thanksgiving Day this year has been fixed by the Government for Monday, October 14.

In selecting Monday the Government has conformed to the practice adopted in recent years. Formerly Thanksgiving Day usually fell on a Thursday in late October or November, but the Commercial Travelers' Association and other bodies agitated for a Monday holiday, to increase the opportunity for family reunions during the season of thanksgiving.

visited the city man, zealous for the progress of his city, to learn more of and co-operate with the other parts of his province.

Mayor Gale of Vancouver proposed a vote of thanks to the ladies and gentlemen of Summerland and Okanagan district for the splendid manner in which the delegates had been entertained. This motion was seconded by Mayor Perry, Prince George, who said this was quite unexpected from Summerland, and commented on the spirit of co-operation shown in thus assisting a neighboring town.

This was followed by three cheers for the ladies, and upon the suggestion hats were passed around and more than \$67 was gathered as a contribution for the local Red Cross work.

Mayor Smith of Penticton, in a brief word or two stated that he appreciated enormously the co-operation of Summerland.

Reeve Blair assured the visitors that their visit was appreciated, and hoped that they would again return.

Cheers for Supt. Holmer for his material assistance in making the event a success, brought him to the front where he spoke briefly.

After the singing of the National Anthem the party again boarded the cars to return to Penticton.

The closing sessions of the convention are being held to-day.

The members of the joint committee of the Municipal Council, Board of Trade and Institutes are congratulating themselves on the success of the tour and lunch, and are exceedingly grateful to the car-owners, the ladies, and all others to whose co-operation the success is due.

Demand will be Strong for B.C. Apples.

The brief review of the apple situation contained in the following paragraphs compiled by Prairie Markets Commissioner, J. A. Grant, give promise of a strong market for Okanagan apples:

Nova Scotia will only have 400,000 barrels to sell this year, or just half of last year's output.

The embargo will not be removed on British markets this year.

Quebec Famause or Snow apples have been frozen so badly last winter that replanting will be necessary.

Eastern Ontario has a medium crop of some apples. There is a fair crop in Central Ontario.

Western Ontario has only half a crop of fall apples, and only 35 per cent. of winter varieties.

British Columbia is reported as having 10 per cent. less than last year, but better in quality and size.

Reports from all points in the United States tell of a smaller apple crop than last year except Hood River, Oregon. Their crop consists largely of Spitzenburg and Yellow Newtowns.

The prairie jobbers are now showing keen interest in B.C. offerings.

Reconstruction after the war will rely largely on co-operation. Co-operation of men and women in kindred industries, of those in agricultural pursuits with those engaged in manufacturing, of capital and labor. It is of first importance, therefore, to remove the causes for suspensions and mistrust between all classes, in order that the social revolution that will come at the end of the war, may be a peaceful and beneficial one.

Senger Wheeler, the noted Sas-katchewan wheat grower, has developed a variety of wheat that is claimed to mature ten days earlier than the famous Marquis wheat, and is, therefore, practically immune from rust and early frost on the prairies.

FRIDAY, SEPTEMBER 20, 1918.

THE DEFINITE ANNOUNCEMENT made a few days ago by the Department of Agriculture at Ottawa, that there is no possibility of the removal or modification of the embargo on the shipments of apples to Great Britain until there is a change for the better in shipping conditions will not be received with surprise, though the information will come with regret especially to Nova Scotia and Ontario shippers. Their inability to export to the British market will, of course, have some effect on the prices received for British Columbia apples, but the general situation is such as to minimize this effect.

§ § § § §

WHENEVER AN APPEAL has been made to the people of B.C. to voluntarily economize on any commodity the response has been immediate and general. The appeal made last week by the government to automobile owners to save gasoline met with the same remarkable consent on the part of the loyal population. This request was to dealers to refrain from selling "gas" and to automobile owners to abstain from Sunday riding. It is estimated that there was a saving of 25,000 gallons last Sunday in this province alone, and this will be greatly augmented when the request becomes more generally known. Not a gallon of gasoline was sold anywhere in Canada last Sunday the country over. The saving must have been tremendous.

§ § § § §

THAT THERE SHOULD BE any relation between peaches and gas masks seems unbelievable, yet we learned this week that down in Washington State large quantities of peach stones are being saved up by householders and collected by the government to be converted into charcoal for use in the manufacture of the life-saving gas mask. Each school child has been asked to collect seven pounds of these pits—enough for one mask.

Apple Scald and Jonathan Spot

In a recent paper (Journal of Agricultural Research, Vol. XI, No. 7), there are given some very interesting notes on these two storage troubles of apples, and since present conditions demand most careful preservation of all food materials, the Central Experimental Farm, through its pathological service, issues a statement which should be of especial interest to every Canadian who has apples in his cellar or warehouse. The following short account of these two apple troubles, based largely on the article in question, aims at pointing out the means that may be taken to avoid scalding and spotting of our scanty but valuable supply of this fruit in storage.

Scald in apples is a browning of the skin and outer tissue. It is different from rots, because in rots browning goes very deep into the tissue, whereas scald only affects the skin and the flesh immediately beneath. Rot spots are usually

definite in outline, while scald areas are often more or less irregular in shape. However, scald areas are very often invaded by rot fungi so that ordinarily one may expect to find all sorts of combination of the two.

The "Jonathan Spot," so called from its being found very frequently on the Jonathan variety, also develops in storage on several standard varieties such as Northern Spy, Greening, etc. The spots are usually small, less than 1/4 inch in diameter, and are sunken and brown. The flesh under the skin is brown and somewhat dry and corky. There is another spot disease, the Baldwin Spot, or Stippen, which may be mistaken for the Jonathan Spot. The Baldwin Spot, however, develops when the apple is growing, and will be present when the fruit is picked, whereas the Jonathan Spot develops during storage. Moreover, the Baldwin Spot may be found all through the fruit, while the Jonathan Spot occurs as small sunken brown spots on the surface only.

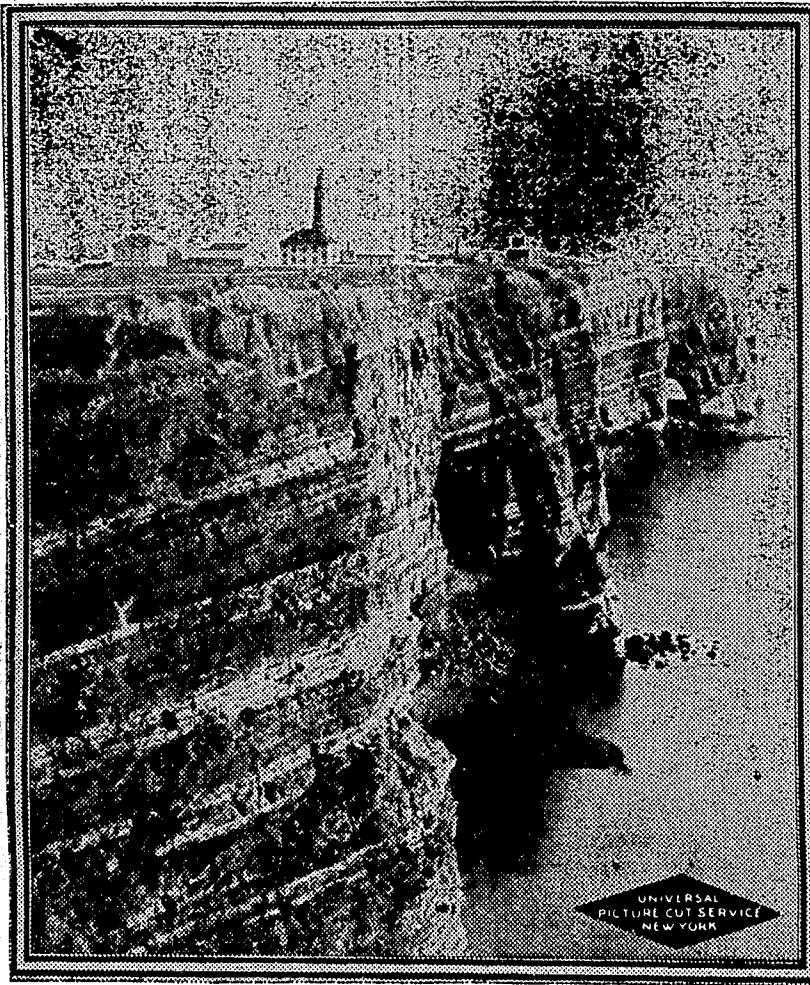

Both Spot and Scald arises from improper storage conditions, and will likely be worse on fruit that

has not matured properly before being picked. The three storage conditions that favor Spot and Scald development are, (1) high temperature, (2) humidity, and (3) stagnant air. It should be understood that the fruit is not completely dormant during the storage period, but there is a constant, if small, continuation of growth processes throughout the whole period. These processes result in maturing or mellowing the apple, and the chemical processes which occur during them, involve the absorption of oxygen from the air and the giving out of carbon dioxide. It is, in fact, a slow breathing process. When apples are stored in a place where they have no free access to air they are "smothered," and the scald which develops on them is due to abnormal chemical changes brought about because of an inadequate air supply. If the room is too warm, the growth processes are quickened and scald or spotting is increased. Very moist or humid air also aggravates these troubles. It is obvious that in an ordinary cellar, spotting and scalding can be largely avoided by a little attention

to the needs of the fruit for cool, dry conditions and a continuous supply of fresh air during the storage period.

It is recommended (1) that apples should be stored in small lots rather than in large close piles or bins. They should preferably be kept in open slatted boxes or other similar containers which will allow all the fruit to have free access to air. (2) That the temperature be kept as low as is consistent with protection from frost, and (3) that plenty of ventilation be provided. If the air is changed frequently in the cellar, the incoming supply will not only renew the oxygen but will drive out the old, stagnant air which is laden with moisture and over-charged with carbon dioxide. The method of ventilation can best be determined by conditions; in some instances air shafts can be used, while others the opening of doors and windows on mild days will be possible. In almost all cases some simple means of securing frequent change of air can be readily adopted and the fruit thus kept free from scald and spot troubles.

German Submarine Base at Heligoland

This island is strongly fortified, and is considered almost impregnable.

Can NOTHING that can be kept without canning. Dry such vegetables as corn, string beans, navy beans, lima beans, etc. Store mature potatoes and other roots in bins, cellars, or pits. Can EVERYTHING else.

British Columbia canned herring is meeting with a growing demand. It is estimated that 250,000 cases will be packed this year, an increase of 150 per cent. over 1917.

In Chicago they tell a story of a sick man who had just emerged from a long delirium.

"Where am I?" he asked, very feebly, as he felt the loving hands making him comfortable. "Where am I? In heaven?"

"No, dearie," said his wife gently, "I am still with you."

The seven trawlers operating in Canadian waters bring in 1,000,000 lbs. of fish weekly.

Values of Farm and Town Property

Registered in accordance with the Copyright Act.)

ARTICLE No. XX.

After an absence of several years, the writer last winter visited a certain community in the southern peninsula of Ontario. He found a once promising town gone to "rack and ruin," to use a well-worn phrase.

We will not attempt to describe the scene—the tale is really too pitiful. But we will mention the fact that houses and lots were vacant in plenty, and one could buy a complete property for from \$200 to \$450 that cost from \$2,000 to \$4,000 fifteen or twenty years ago. Many of the houses that were formerly in the town—or rather the remnants of a town—had been bought up for much less than the value of the lumber they contained and were moved out on to farm property in the neighborhood. There were a few straggling business places left. Business, however, was dead—and so was any spirit of enterprise among the handful of citizens who were left. In two instances that came under our notice people transferred their property to others for the nominal sum of a one-dollar bill, in order to be relieved of the burden of paying taxes upon that which was absolutely dead from any practical investment standpoint.

The death of this town had a saddening effect upon the farms of the neighborhood. Instead of increasing in value, as one would suppose, with agricultural enterprise constantly spreading, these farm lands were actually lower in price than they were fifteen years ago, when there was still a lively town in the centre, which offered good marketing and the multitude of other essential facilities that every live town does hold for the surrounding territory. PEOPLE DID NOT EVEN WANT TO FARM IN THE VICINITY OF A TOWN THAT WORE "A SHROUD." It seemed too much like abutting one's residence against a cemetery.

What was the question, please? Oh, yes, to be sure, the reason for the decadent conditions described was community disloyalty—ABSOLUTELY. Slowly but surely the cankerworm of the big catalogue ate into the heart of that community by scattering the live merchants who conducted its retail trade. And there were live merchants there some few years ago. But when the disease of the catalogue

habit began to assume the proportions of an epidemic, they fled to fresher and fairer fields.

Several of the oldest, and once the most promising towns in Manitoba have travelled the same route. Others are on the down-grade in other sections of Canada. One does not have to go far to find them, these days.

And one thing you will find that's invariably true—FARM PROPERTY CONTIGUOUS TO A DEAD TOWN HAS HALF THE VALUE OF SIMILAR PROPERTY NEAR A LIVE TOWN. It would seem to be good business, therefore, to keep one's town alive.

It IS good business both for the resident of the town and for the resident of the adjacent farm property.

This question of mail order buying to the detriment of the home dealer resolves itself into this—IT IS EITHER RIGHT OR IT'S WRONG.

The distant mail order concern is either a good thing for the community or it is a bad thing.

Put your local business men out of business and what have you left? Where is the value of your property?

If community suicide is a good thing, then the mail order habit is worthy of encouragement. It's up to YOU AND ME to decide.

USEFUL HINTS, ON CANNING BEETS.

Use only small beets for canning. Wash, scrubbing if necessary, and get very clean. Cut off all but an inch of leaf stems. Grade and blanch five minutes. Cold dip and scrape off skin and stems. Beets averaging one inch in diameter may be packed whole, but larger ones may be cut in convenient size for packing.

Add 1 level teaspoonful of salt to each quart jar, and cover the pack with boiling water. Put on a new rubber and the top, dipping them both in hot water just before placing. Adjust the top bail or screw on the top with thumb and little finger.

Sterilize 90 minutes in hot water bath, or 60 minutes at 5 to 10 pounds steam pressure. Remove from sterilizer, seal tight and cool.

Correspondence.

Summerland, Sept. 16, 1918.

Editor Review, Summerland, B.C.

Dear Sir,

I notice in a recent issue of the Review that the Council will shortly consider the taxation of improvements and wish to say a word or two on the matter.

Advocates of the single tax on land values seek first of all to place every encouragement before the owner and actual user of the land so that he will make the very best of what advantages it may possess, to discourage speculative, non-resident ownership, and in every case to place the land in the hands of those who will use it. Any system of taxation which has not these ends in view is directly opposed to the best interests of a rural community, and single taxers even go so far as to demand taxation up to the point of confiscation in cases where land is allowed to lie idle or to deteriorate through lack of proper cultivation.

Drive anywhere through the municipality and notice the glaring difference between those lots whose owners have lived on them and those which have had absentee proprietors. The proper thing to do is to penalize those lots which are a blot on the landscape and not those real homes whose owners by their industry, perseverance through many difficulties, and unflinching faith in the ultimate success of the community, have won through the lean years and are now on Easy Street and walking fast.

Any system of taxation will have its weak spots, but when the municipality was organized, the people were practically unanimous in favor of the single tax, and no contingency has since arisen which would warrant any departure from that principle. Any step towards the taxation of improvements will be a

retrograde movement, and after sounding the opinions of representative citizens I am convinced that the people of Summerland will so regard it.

Yours truly,
J. W. S. LOGIE.

ANNOUNCEMENT

THE PRINTERS ARE NOW AT WORK ON

WRIGLEY'S

BRITISH COLUMBIA DIRECTORY

Compiled and Printed in British Columbia—Endorsed by B.C. Government, Boards of Trade, Manufacturers' Association and other bodies.

IN FIVE MAIN SECTIONS

BRITISH COLUMBIA YEAR BOOK—One hundred pages of official data, covering Agriculture, Lands, Timber, Mining, Fisheries, Shipbuilding, and Public Works, prepared by the various Departments. This section will cover fully the development in British Columbia.

GAZETEER, describing over 1,900 cities, towns, villages, and settlements within the Province, showing location, distance from larger points, how reached, and by what lines, synopses of local resources, population, etc.

ALPHABETICAL DIRECTORY of all business and professional men, Farmers, Stock Raisers, Fruit Growers, etc., in all towns and districts.

CLASSIFIED DIRECTORY of Manufacturers, Retailers, Producers, Dealers, and Consumers, listing all products from the raw material to the finished article.

TRADE NAMES AND TRADE MARKS—A list of popular trade names alphabetically. If you want to know the manufacturer or selling agent of a trade-name article, look up this section.

INCORPORATED CITIES—All gazeteer information in the Directory of the incorporated cities of the Province will be prepared by either the City Council or the Board of Trade, thereby official.

ADVERTISING BRITISH COLUMBIA—It is necessary to continue to advertise British Columbia outside of the Province, in order that tourists and settlers will continue to come. With this aim in view, a copy of the Directory will be placed in the leading Libraries and Boards of Trade throughout the Canadian Prairies, Eastern Canada, the United States, and abroad. The Directory will be used by prospective tourists and settlers as an official guide of the Province.

The subscription price of the Directory is \$10, express paid.

Peachland Doings

A Weekly Chronicle Furnished By Our Local Representative.

Mrs W. A. Lang returned on Wednesday night after a short trip up the lake.

Mrs Stevenson met two lady friends at the boat on Wednesday evening who came to visit with her.

Miss Rose Law was unfortunate enough to meet with a somewhat serious accident recently, when she received a severe blow in the face with a cow's horn. Flies were bothering the cow, and in swinging her head around rather savagely at them she struck Miss Law a blow that caused her to stagger. Fortunately for her it was the side of the horn which struck instead of the end, while it broke the flesh over the nose and bruised the cheeks the wound was not deep. She is recovering rapidly.

While riding his colt the other day Mr Geo. Keyes was suddenly thrown to the ground and considerably bruised. He was practically bedfast for a while and suffered a good deal, but we are glad to report that he is able to be out a little again and move around with the aid of crutches.

Thursday being one of the best days of the Kelowna Agricultural Fair, Peachlanders who were able to get away availed themselves of the opportunity of seeing what was being done in that section in the agricultural line. We were fairly well represented in the persons of the following: Masters Herbert, Ned, and Eric Drought, Mr John McKinnon, Mr Dan McLachlin, Mr Thos. Bell, Mr J. E. Kerr, Mr John Brown, Mr and Mrs H. H. Thompson and family. They were for the most part well pleased with the day's outing, and report a good exhibit.

Masters Allan and Baynard Iverson were passengers arriving on Thursday evening, having taken the boat at Westbank in the morning going north.

Mrs J. Wright returned home on Friday morning after a short trip down the lake.

Mr J. Lighthouse of Vancouver, with his wife and two boys, came in on Friday morning to visit friends here for a short time.

They are spending most of their time as guests of Mr and Mrs J. McLaughlin, old Winnipeg acquaintances; also are visiting the Taylor's and MacKenzie's. Mr Lighthouse has been managing a very successful and up-to-date apartment house in Vancouver, "The Alexandria," in the west end.

Mrs R. C. Lipsett of Summerland spent Friday in town, returning by the evening boat.

Mr B. A. Moorhouse of Penticton, the surveyor, who had been camped back in the hills west of here, doing some work, moved his camp and left for Westbank on Saturday morning. Mr and Mrs Moorhouse went with their auto while his helpers, one of them being a local resident in the person of Mr Roscoe E. Law, went by boat. They had a very pleasant sojourn while west of here, and one who can testify to the pleasantness of the camp portion of the operations there, is Mrs L. Vivian, who was very hospitably entertained by Mrs Moorhouse for a few days.

Mr J. McKinnon arrived home on Saturday morning after a short trip down the lake.

Mrs W. Dryden and Mrs Hamilton spent Saturday in Kelowna.

Mr Otto Hendrickson left by Monday night's boat after spending a few days here, the guest at the D. J. White ranch.

Mr Lowndes left on Tuesday evening's boat on a business trip to Vancouver.

Mr and Mrs Cutbill are having a splendid holiday, camping away back in the mountains for a short while. They are making their headquarters at Sandy McKay's shanty.

At a meeting of the Water Users of Peachland, called for Monday afternoon at 4.30, a fair representation was present, and the following resolutions were passed:—A resolution to accept the \$5,000 available from the government for assistance in furthering the im-

provements and addition to the reservoir for irrigation purposes; A resolution to ask the government to make some necessary improvements on the road to enable getting in the necessary supplies for the work on the reservoir.

The Women's Institute held their first meeting following the summer vacation, on Friday of last week. There was a goodly number present, and an enjoyable and profitable time was spent. Mrs R. C. Lipsett of Summerland gave a paper on "The B.C. Laws With Regard to Women," and was able to explain very plainly that the laws were certainly not in women's favor. Mrs Stevens sang a very pleasant solo, an American War Song.

The Peachland Fruit Growers' Union shipped another car of Elberta peaches last week.

We regret very much indeed to report a rather heavy casualty list for Peachland this week. John Seaton is reported to have been wounded, "gunshot in the leg;" F. Topham, "gun shot in the elbow," and Osborne Needham has been reported missing. The sympathies of the community are extended to those who are nearest interested, and we sincerely hope the wounds of the two may not be severe, and that Osborne will turn up safe and sound soon.

In one of the recent issues Mr Robert Howell was reported to have been wounded by gun shot, but Mrs Howell heard direct from him that it was a shrapnel wound, and that he is getting along nicely, and ex-

pects to be able to go back into the trenches in about six weeks.

The air is rather heavy with smoke these days from a couple of fires burning back of us here, one west and one north. The fire wardens have them both in hand and no trouble is anticipated.

The open hunting season has started the blood tingling in a good many hunters' veins since Saturday, but owing to the rush of fruit, which is engaging most of the men, there have been few able to get to the trail. We understand there have been a few out, but none reported luck as yet.

Mr and Mrs W. Dryden were passengers down the lake on Tuesday evening of this week.

Mr Iverson and Mr T. Powell were passengers north on Tuesday.

The Alberta Department of Agriculture, acting in conjunction with the Dominion authorities, have taken steps to equalize fodder and cattle conditions in Alberta by arranging to winter cattle from the southern drought-affected districts in the north where early frosts have increased the supply of fodder.

ADVERTISING

Is An Evidence of Community Loyalty as well as Good Business

ADVERTISING will do more than build your business; It will build your community.

It will encourage the people in your Community to buy at home more.

It will counteract the effect of outside advertising and keep so much more money in the district.

And your community, after all, is only the aggregation of yourself and the rest of us.

Advertising to-day is, therefore, the business and the patriotic duty of the business men in this community.

And the logical medium is your home paper, as it reaches every buyer in the whole district.

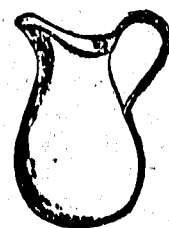

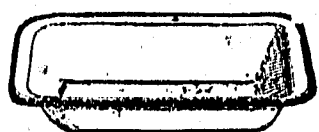

The Review Summerland

Passing Events: Social, Personal, &c.

A son was born to Mr and Mrs A. E. Smith on Wednesday, September 11th.

Mrs J. W. S. Logie and her sister, Miss Harris, will leave on Monday to spend several months in Texas.

Owing to the increasing cost of feed the charges for drayage and teaming have been increased by the local livery firms from this date. 8

Don't postpone ordering fruit trees for Spring 1919 delivery, until Fall; ORDER NOW. B.C. Nurseries Co., Ltd., Vancouver. tf

Penticton is contemplating an increase in electric light rates. Advancing cost of fuel, oil, and materials are the reasons given for the increase.

Will the boys and girls who are intending entering the Canadian Bankers' Competition please get busy and attend to their stock as per rules given out in the Summerland Fair Prize List. If you have not a Prize List get one at once from the Secretary, Jno. Tait, Summerland.

Pte. William Beattie is now in hospital in Middlesex, England. He was sent to hospital early in July with heart and kidney trouble, but latest information is that he is improving. Beattie was among the first to enlist from here, and has been in France for three years or more.

The cheering news that his son, Pte. J. H., is doing well and expects to be sent home was received this week by Rev. A. Henderson in a letter written by the invalid soldier. He is now in a convalescent hospital and is making satisfactory recovery from the nervous breakdown. Upon his return to Canada he expects to be discharged from the army.

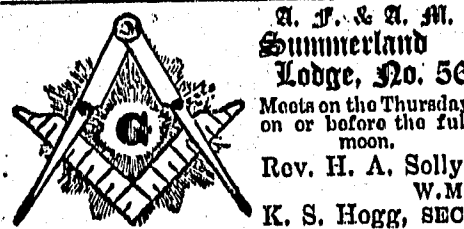

The strike habit seems to have reached the Okanagan section of the C.P.R., another strike having occurred on the steamer Okanagan this week. On Monday the Japanese crew of that now busy craft quit, and the boat was tied up for a day. The steamer was back on the route again on Wednesday with a crew from the C.P.R. shipyards at Okanagan Landing.

Cows for Sale

Mrs. F. D. Cooper is at present on a visit with friends in Nelson.

President E. R. Simpson of the Summerland Fruit Union attended a meeting of the Central directors at Vernon on Tuesday.

Rev. W. Keyworth of Vernon, chairman of the Okanagan district of the Methodist Church, was a guest of Rev. A. Henderson this week.

Mrs. Benson, accompanied by her little daughter, arrived here recently from Kelowna on a visit to the home of her parents, Mr and Mrs F. D. Cooper, Peach Orchard.

Miss Graham, who has been visiting with her aunt, Mrs Anderson, Peach Orchard, left for Vancouver the first of the week where she will visit for a time before returning to Toronto to resume her duties as nurse.

W. M. Wright leaves to-night to resume his studies at the University of British Columbia. He will be followed shortly by Mrs Wright and little one. Dr and Mrs Mathewman will again occupy the Wright cottage.

Miss Annie Blair left by Tuesday evening's train for Willow Point, near Nelson, where she will assist her sister, Miss Ruth Blair, who went over to the Kootenay two weeks ago to take charge of the packing of the fruit to be shipped from Willow Point.

Mrs James McDonald and young son of Boyle, Alberta, who has been spending several weeks here with her aunt and cousins, Mrs Minnie McLaughlin, Mrs Hatfield, and Mrs Elliott, left on Monday for a visit to the Coast before returning to their home in the prairie province.

On Wednesday of last week a record shipment of fruit and produce from Kelowna was made when twenty-three cars were started rolling. On the Saturday previous twenty-one cars were shipped. The Kelowna Record says that earlier shipments from that point are averaging from eighteen to twenty cars, not including fruit and vegetables shipped by express.

An animal believed to be a mountain goat was seen on the east side of Giant's Head on Thursday morning. Collector R. Pollock, one of those who saw the animal, declares that its horns and general appearance will not permit him to believe that it was anything else than a mountain goat. Alex. Smith, who was quite close to the animal, is positive it was a mountain goat.

Home Seekers or Investors

Would do well to consult

F. D. COOPER,

Real Estate Broker,

Peach Orchard, Summerland.

Miss S. Dimock, who has been visiting friends here, returned to her home in Peachland this morning.

J. M. Robinson returned on Wednesday from the provincial capital where he has been on a business trip.

Pte. Harry Pitman, a popular resident of Naramata, and well known in Summerland, who enlisted about three years ago, is reported seriously ill.

Seventy Doukhobor girls went up the lake on the boat on Tuesday morning en route from the Boundary district to Kelowna where they will work in the cannery. Forty more are expected to-morrow.

Mrs Mahar of Vancouver, who has been teaching a public school at Faulder, has resigned the position caused by the illness of two of her three children, and the resignation has been accepted by the trustees. Mrs Mahar's sister, a nurse, is with her, taking care of the children. They will return to the Coast.

As an outcome of the collision in which the cars belonging to J. E. Phinney and P. S. Roe came to grief, a charge has been entered against Miss Muriel Phinney by Provincial Constable McDonald for failing to keep to the left side of the road. The charge was laid at Penticton and the case is being heard to-day.

Arrangements have been made with the Home Comfort Club of Summerland and Captain George J. Dyke to have the famous English Society Entertainer, Mr Leslie Grossmith appear here at the Empire Hall, Summerland, in one of his unique performances on Saturday next, Sept. 28th, at 8.15 p.m. The event will conclude with a dance, which will commence at 10 o'clock, to be kept up for 2 1/2 hours. It has been arranged that the reserved seats, 75 cents, will include both the concert and the dance.

The K.V.R. daylight train service is being continued throughout this month but will likely be discontinued with the coming into effect of the winter time-table early in October, after which the tri-weekly schedule between Nelson and Vancouver will maintain the passenger train service. The management is said to be looking forward to operating through the Coquihalla Pass next winter, the train being routed that way instead of by Spence's Bridge unless slides and heavy snowfalls block the Coquihalla line.

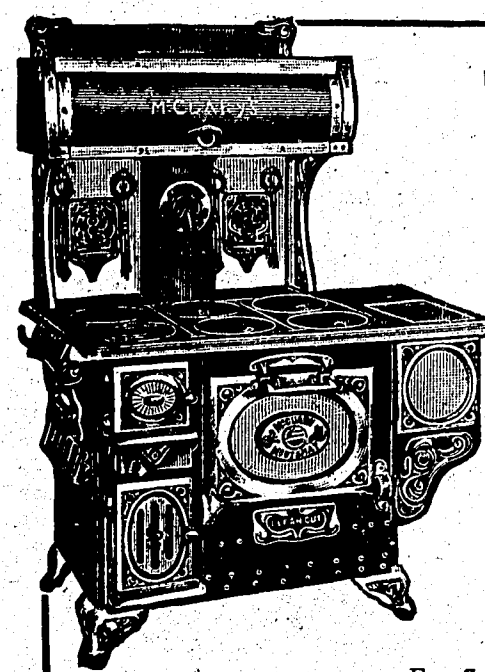

The setting of the poles which are to carry the high tension line of the West Kootenay Light and Power Co. from Greenwood to Princeton will begin this month. A force of over one hundred men is now at work clearing the right of way and building the necessary roads for this power line. It is not expected that the wire will be strung until next spring, and it will not be until the end of next year at least that the extension will be completed. No definite plans, it would seem, have yet been made for the building of the suggested branch line from Fairview north up the Okanagan Valley.

ODDITIES OF THE HUMAN BODY.

The two sides of a person's face are never alike. The eyes are out of line in two cases out of five, and one eye is stronger than the other in seven persons in ten. The right eye is as a rule higher than the left. Only one person in fifteen has perfect eyes, the largest percentage of defects being among fair-haired people. The smallest interval of sound can be distinguished better with one ear than with both. The nails of two fingers never grow with the same rapidity, that of the middle finger growing fastest, while that of the thumb grows slowest. In fifty-four cases out of one hundred the left leg is shorter than the right.

President Wilson says the coal shortage is the most serious danger now facing the United States.

A number of Mexicans have been imported to pull flax and look after the sugar beet crop in Lambton county, Ontario. They are said to be good workers.

The Real Proof of a Range

The firebox of your range is the first and last proof of its usefulness and durability.

The Kootenay Range firebox is made of tough, pure semi-steel—in nine pieces to allow expansion and contraction and to prevent cracking.

Met Death While Giving Aid To Wounded Comrade

Summerland Boy Gives Interesting Account of the last moments of George Dale.

In a very newsy letter to his parents Howell Harris gives a very graphic account of the movements of George Dale Arnold Gayton, and himself just prior to the time that George Dale met instant death while giving assistance to another wounded man on the way to the dressings station. That portion of Pte. Harris' letter referring to the death of George Dale is reproduced here:

France,
Aug. 15, 1918.

You have no doubt heard the sad news of George's death a couple of days ago. I guess I saw him the last of anybody, too. As you probably know we signallers get switched around differently—so many to each company and so many to H. Q. This time I was with George's company for duty to keep the company in touch with H. Q. For this last bit back we have been having it pretty tough, and being with the same company for the trip George and I were together most of the time.

The night before we "hopped the lid," or as you say went over the top, we spent out in the open in little holes we dug. We three signallers had one hole by which we had an electric signal lamp. George and one of his machine gunners were in another hole not 10 yards away. That night we both had the same hours for shift—he on the gun and I on the lamp, so we sat and "chewed the fat" all the watch.

Next morning when we went over we three Summerlanders, Arnold Gayton, George, and myself, were all close together. George's company first (he was in the rear of that) then we signallers in the extreme rear of the company. Next came Arnold Gayton, being a scout of D company, and as D company followed us he was ahead of it connecting George's company with his. Just before the "kick off" I was talking to Arnold, and we shared a

few Fritz cigarettes we had salvaged—then away.

Machine gun bullets whistled by—fellows dropped in front and each side of you—it was like going through a rain shower without getting wet, to get through that.

We got to our final trench, and as I jumped in I looked around for George. There he was alright just a few yards in front of me—no worse except for a tiny piece of shrapnel in his arm. I asked him if he was going out with it, he said, no, it was nothing at all, and not worth going out for. I then had to move on and find a place to set up my lamp again to get in touch with H. Q. and other companies.

Shortly after George came up to wish me "bon chance" as the ambulance had persuaded him to go out, and had put a bandage on his arm, as everything was quiet again by then.

I never doubted for a minute, nor did he, but that he was very lucky,

as he would get out of the rest of the scrap.

He went off smiling as I jokingly told him to give you my love when he got back to Summerland with his blighty, as it wouldn't have got him far back but just out of danger.

Imagine the shock I got when next day a runner came up and told me that Dale had been found lying dead with another chap by him on his way out.

They think when going out he picked up this other chap, who was badly hit, and started to carry him, when along came an odd shell, and if he was carrying the other chap he wouldn't have had time to drop quick enough, any way some shrapnel got him in the head.

Last night I went to see the chaplain to see if he could give me any more information, as nobody else seemed to know anything, and I would hardly believe he was dead. The chaplain said he found the

body lying there (the chaplain and the doctor did some great work fixing up the wounded that trip). He took all particulars he could find, although somebody had evidently searched the body before. He is writing home to his mother, and sending what he found on him, and particulars, and, believe me, he had a "good word" to say for him. The day after he got killed his leave for blighty came through. The fates indeed are cruel at

times and the gods alone decide our destiny.

Arnold Gayton came through all right.

I am writing Ruth (as it was a compact between us that if anything should happen the other would write home) and the chaplain is writing Mrs Dale.

As ever,

HOWELL.

In All Classes

PRIZE LISTS will be available next week. See you get one from the

SECRETARY,

Summerland Agricultural Association.

- Newspaper Space -

The thing that will make your place a landmark and your name a household word is consistent, truthful, rightly supported newspaper advertising.

"A city that is set upon a hill," says the Good Book, "cannot be hid."

The right kind of advertising will, so to speak, set any man, any town, any worthy business up on a hill.

Play fair, look after things, and dip deeply into printer's ink—and you can no more escape becoming prominent and successful than you can reverse gravity and cause rivers to run up grade.

Carry the stuff—deliver the service—keep up a vigorous fire in the papers—know what you print, and live up to it.

The most precious and desirable thing in a business career is public confidence. Getting ever-widening circles of people to believing in you is progress of the first order, but educating strangers to the idea that you're a man not entirely to be trusted, is slipping back—no matter what, for the time being,

Not
For
Fakirs

BUT

For
Honest
Men

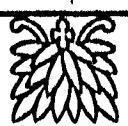

the balance sheet may be saying to the contrary.

Forget that old saying of the circus man, that "people like to be humbugged"—they do, on any circus day—and have a bully time over it—but regular business is different.

The fellow who deliberately sets out to deceive the public is a fool and a piker if he thinks he can get away with it through pages in newspapers. He may manage to put it over for a while, but the backfire will get him in time, and it won't be long before he'll find himself exactly where he deserves to be—nowhere.

Newspaper space isn't for fakirs—it's for honest men, and every honest business can profit greatly through the use of it. It throws a spotlight upon the scene—and men and things that aren't quite standard will not stand the glare.

The crook should eschew printer's ink—he should emulate the Hun propagandists—slip around quietly and pass the bunk heart to heart.

The Summerland Review

DEVOTED TO THE INTERESTS OF SUMMERLAND, PEACHLAND AND NARAMATA

Vol. 11, No. 9. Whole No. 530.

SUMMERLAND, B.C., SEPTEMBER 27, 1918.

Celebrate Diamond Wedding Anniv'sy.

Mr. and Mrs. Alexander Fraser receive Congratulations of Large Circle of Relations and Friends. Married 60 years ago

To have this week celebrated the sixtieth anniversary of their wedding day was the unique and happy privilege of two of Summerland's most respected citizens, Mr and Mrs Alexander Fraser. Mr and Mrs Fraser were married in the village of Cummingsville, Ont., on the 24th day of September, 1858. They now have living four sons, four daughters, twenty-one grandchildren and one great-grandchild. The sons are Herbert, Harold, and Kenneth, all of Vancouver, and William of Glennella, Manitoba; the daughters, Mrs John Moffat, Victoria, Miss Mary Fraser, Gainsborough, Sask.; Mrs Flatt, wife of Dr C. E. Flatt, who is now serving in France, and Mrs W. J. Fullerton of Durban, Man.

Both Mr and Mrs Fraser were born in Scotland, Mrs Fraser coming to Canada with her parents when only fourteen months old. As a lad of seventeen Mr Fraser came across the Atlantic alone in a sailing ship. He had scarcely passed his twenty-first birthday and she, as Miss Mary Montgomery, had not quite completed her eighteenth year when they were married.

For over twenty-five years Mr Fraser taught school in Ontario.

This week letters by the score have been reaching Mr and Mrs Fraser congratulating them on the attainment of their diamond wedding anniversary. So numerous have been the local friends who have called upon the happy couple to offer them congratulations and express their wishes for many more happy years that Mr and Mrs Fraser were kept busy during the first three days of the week receiving callers.

Numerous and expensive presents bore further evidence of the esteem in which they are held. Among the letters received was one from the Lakeside Sunday School accompanied by a set of sterling silver spoons. Another congratulatory letter was received from the Women's Institute of which Mrs Fraser is a member.

The ladies of St. Andrew's Church sent Mr and Mrs Fraser a letter of congratulation accompanied by a present as a token of the esteem in which they are held by the members of the Ladies' Aid.

For more than nine years Mr and Mrs Fraser have been residents of Summerland, and are actively engaged in fruit growing, their orchard being one of the most successful small orchards of the district and in many ways a model.

May they long be spared to continue as an inspiration to their many Summerland friends.

Summerland Realty In Good Demand.

The Parker orchard, one of the well-known properties in Summerland, has been purchased by C. W. Lees, Principal of the Summerland Consolidated School. Mr Lees has been operating, under lease, the Sutherland orchard immediately to the south of the Parker property. We understand he will take possession of the latter immediately after the end of this year.

Mr Lees owns a lot immediately west of the Sutherland orchard and which has about one hundred feet of fence line in common with the Parker property.

The sale of the Parker property was made through F. D. Cooper, who has been acting as agent for Mr Parker, now a resident of Vernon.

Another property in the immediate vicinity to change ownership is the Kirchoff lot of sixteen acres at the high flume, which has been sold by Mr F. D. Cooper to Mr Joseph Pennant.

The J. C. Brown orchard, immediately west of the Parker lot, and sold by Mr Brown to Mr Traube, a non-resident, has been purchased by Mr Joseph Davidson of Regina. We understand that Mr Davidson is coming here about the end of October to reside.

In addition to his recent purchase

Delegates Well Pleased With Summerland.

Mayor Gale Determined Coast People Shall Know Us Better.

Numerous were the expressions of surprise and pleasure of the municipal delegates in their visit to Summerland last week. The extent of the district, with its broad areas of orchards was a surprise to many. The visit to the packing house, where the fruit grader was in operation, and where Mayor Gale of Vancouver said that for the first time in his life he had all the melons he could eat, and where others seemed to greatly enjoy the fruit, also gave much pleasure.

Mayor Gale informed the Review that he had no idea that such fruit as he had seen here was produced in this province, and expressed a determination to have a display of our fruit made in Vancouver City Hall. Vancouver's chief magistrate is also determined that citizens shall get more of our fruit and at lower prices than it costs them at present. His plans for this he outlined at greater length in his speech at Kelowna last Friday, where he spoke of the subject of co-operation between city and country. He will endeavor to have a thousand boxes of Okanagan fruit placed each week in the Vancouver City Retail Market, his object being to get more direct connection between producer and consumer.

A formal expression of appreciation of the entertainment given the delegates by Summerland has been received, and is as follows:

Union of British Columbia Municipalities.

Office of Secretary-Treasurer, New Westminster, B.C., Sept. 20th, 1918:

To the Reeve and Council of Summerland.

Your Worship and Gentlemen:—

The Union of B.C. Municipalities wishes me to convey to you the very best thanks of all delegates for the kindly manner in which they were received at Summerland on the 19th inst., appreciating very much the hearty co-operation of your Municipality with the Municipality of Penticton in providing entertainment for them.

All express themselves delighted with what they saw of your beautiful district, and with the success which attended the efforts of your Citizens in providing an enjoyable time.

Kindly convey to your workers who did so much our heartfelt thanks for their many kindnesses.

Yours very truly, E. H. BRIDGMAN, President.

CARROLL C. AIKINS GOING TO PARIS.

Mr Carroll C. Aikins, Naramata's largest fruit grower, accompanied by Mrs Aikins and their two children, left this week for Stanstead, Quebec. After a short stay there Mr Aikins will go to Paris, where he has been given a Y.M.C.A. appointment, and will have an excellent opportunity of meeting the B.C. soldiers on leave from the front, and helping to administer to their needs and comforts. Mr Aikins will be away for the winter at least, and perhaps longer. He has left his large orchard property in care of Mr R. E. J. Hunt, who has looked after the place and tended to the winter work for the past two or three years.

Mrs Aikins and children will remain with relatives in Stanstead.

Of the cottage now occupied by G. L. McWilliams, Mr Peter Edwards has purchased the Traylor lot of two acres close by.

Of the properties which have changed ownership within the past two years or more, most of them have been acquired by our own citizens either for themselves or for friends. In fact, real estate men state that it is now easier to sell our own people land than to sell to strangers, as experience has proved to people resident here that the values are in the properties.

Plans For Bigger Irrigation System Endorsed at Meeting of Ratepayers

Committee's Report in Favor of Scheme Unanimously Adopted.

Greater Storage -- Larger Flow

Council Asked to Raise \$35,000 to so Improve System that All Will Have Water In Plenty.

At a meeting of ratepayers held on Monday evening in Campbell's Hall, endorsement was given the Municipal Council's plans for the enlargement and improvement of certain sections of the irrigation system, and enlarging the storage area at headwaters, an addition being made to the original program by insisting on more permanent work.

At a meeting held four weeks earlier a committee had been appointed by the ratepayers to look carefully into the Council's proposition and report. The meeting of last Monday evening was for the purpose of receiving this report, which in substance approved of the Council's plans.

Prof. W. T. Broad, chairman of the committee, in presenting the report said that Summerland has too many pessimists; there is too much fault-finding. He suggested that a boosting club be organized, and that the people co-operate with those in charge of public affairs. Summerland is well worth boosting. She is the gem of the Okanagan, and the Okanagan is the best part of B.C. God has given us a wonderful climate, exceedingly productive soil, and abundance of water. He expressed great faith in the people of Summerland, and confidence in their ability to work together and to achieve their desire to increase the water supply.

After stating that the committee had held several meetings with the Council, and had examined the plans as prepared for the Council by Mr James Mitchell, and also the report of Engineer Latimer, Prof. Broad submitted the following report:

We understood we were appointed not with any idea of hostility to the Council or of being critics of their past action and inaction, but as helpers, and to try to improve matters by carefully considering the present position and its possibilities and making an independent report thereon to the ratepayers.

We were appointed to consider the irrigation question for the whole municipality and not for any one special section of it. It has been said that we were appointed specially to satisfy growers on Jones' Flat. It is nothing of the kind. In our discussions we never once considered any special section, but our suggestions aim at giving, and we consider will give,

- (1) more water for the south main,
- (2) a better supply of domestic water all over the municipality,
- (3) a direct benefit to Garnett Valley by drawing less on the waters of Enns Creek and the Garnett Valley dam,
- (4) a better supply to Slawish Flat, Slawish Flat gets its supply now from Garnett Valley supplemented by some from Trout Creek. By making a larger ditch and flume we aim to give more from Trout Creek early in the season, and thus relieve the drain on the Garnett Valley supply,
- (5) A much better supply to Jones' Flat. This point we wish at start to lay stress on so as to remove current misconceptions of what we had to do.

Our first duty was to estimate our local needs. At present we do not get an acre foot of water during the season. After careful consideration of experimental work in the Experimental Farm, and in the State of Idaho specially, we came to the conclusion that we should aim to get as near to four acre foot of water as we could, and a minimum of at least two foot.

Then knowing the acreage to be served and its needs varying with soil and subsoil we were able to estimate the cubic foot of water the

system needs to supply each day during our irrigating season of about 125 days.

Mr Latimer quotes in his report that we require for 1 acre foot of water delivered in 100 days .005 (or five thousandths) of a cubic foot of water each second for each of the 1,800 acres to be served from Trout Creek main, that is a total of 9 cubic feet each second. To give 3 acre feet of water we shall need a system to deliver three times this amount, or 27 cubic feet per second. The Experimental Farm needs .7 cubic feet per second, and if we increase its supply three-fold as the rest, we must give it 2.1 cubic feet per second. This will total 29.1 cubic feet per second. To allow a bigger flow early in the season, allowing two-thirds increase on this, will increase the total to 50 cubic ft. per second, while if we allow for seepage in the reservoir, we need make it 60 cubic feet per second. This is our fundamental need and minimum supply to give us a really good water system. Our calculations are based on giving a system that will supply growers with 3 acre feet of water at least.

We have come to the conclusion unanimously, and we wish to make it very emphatic that whatever work we do must be finished and done thoroughly, and aim to supply all future probable needs. With that in view, we advise that Mr Latimer's additions to Mr James Mitchell's plan be accepted and carried out though it will mean several thousand dollars additional expense. We have suffered too much in the past from construction being far too small for our needs, and from a lot of work having been done anything but thoroughly, and hence the tremendous waste by leakages and seepage. We aim to conserve all the water entering the Trout Creek main, and hence advise thorough work on a scale big enough for all our needs all the way down.

To accomplish all this we adopt Mr James Mitchell's suggestions in the main with sundry alterations and improvements suggested by Mr Latimer and Council and Committee. They are thus, and we recommend the following work to be done at once:—

1. Raise the dam at the Trout Creek Intake 15 inches higher so as to turn a much bigger supply into the gate and ditch.
2. The ditch from the Intake to the steel flume to be walled both sides and the bottom finished with cement and stone with smooth face. Walls to be 42 inches high each side, and bottom of ditch 8 feet wide, and walls to be 12 inches thick and bottom of ditch 8 inches thick. This ditch will be 1050 feet long, and cost about \$3 per foot to build. Its height will need be 6 inches above the sides of the steel flume for an evident reason.
3. The steel flume is 89 inches deep, six feet wide at top, and semi-circular in shape. We consider it will carry the water we need, and if the need increases in the future we can put another flume alongside to increase the supply. Nothing needs doing to the steel flume now, as we consider it is ample for our purposes at present.
4. From the steel flume down to the wood flume, make a ditch with walls and bottom like the first ditch mentioned.
5. Strengthen and widen the wood flume as per Mr Latimer and Mr Mitchell, widening it 36 inches so as to give it 92 inches by 30. It is now 57 inches wide. Widen it by three 12 inch planks or about 35 inches actually. Strengthen the trestles and place them on concrete supports.
6. At the cutting between the two hills near the reservoir make a

New Municipal Act Considered by Convention.

Wider Powers For Councils Under Government Board.

The most important item in the program of the Convention of B.C. Municipalities, held at Penticton last week was the consideration of a draft of the new Municipal Act presented by F. A. McDiarmid, solicitor for the Union, who had been engaged by the government to make the draft.

Mr McDiarmid proposes to divide the existing municipalities of the province into four classes, and to create a new class of districts for carrying out special works such as irrigation, drainage, dyking, etc. This last class would be composed of portions of municipalities, or parts of unorganized districts. Provision is made in first and second class cities for election of the mayor from the body of the council; in bodies of the third class it is provided that the mayor shall be elected annually; in municipalities of the fourth class both mayor and council are suggested for annual election. In the first three classes it is provided for the council members to be chosen for two years.

There are a number of clauses dealing with financing, valuation, assessment, and publication of estimates of expenditure. Three remedies are suggested for the non-payment of rates: A lien on the property, enforcement by action in the courts, and the sale of land for taxes. It is also suggested that there shall be a compulsory sale annually.

There is the suggestion that the police board be abolished, and their duties turned over to the councils with greater control to the attorney-general in the administration of justice. Mr McDiarmid proposes to set up a system of county crown attorneys as is done in Ontario; all prosecutions to be handled by such attorney, and direct control of that officer to be vested in the attorney-general. This would abolish the office of city prosecutor.

No reference is made to revision of school trustees' duties, as had been expected in some quarters. Appeals and questions of law from the local government board's decisions are proposed to be taken to the provincial court of appeal, and in matters of discretion and policy to the lieutenant-governor-in-council.

In view of the fact that the various councils had not had the opportunity to consider the new act a committee was appointed to deal with this important matter, a number of changes having first been voted.

Several of the resolutions which had been presented for the consideration of the convention were referred to this committee.

MANUAL TRAINING.

The foundation having been prepared carpenters are busy this week on the addition to the High School building in which accommodation will be made for manual training and domestic science classes. Instructor Baker informed the Review this week that he expects to start classes on Monday, and that these will be held in the Parish Hall until the building is ready. Equipment, tools, and material are being assembled, and it is expected everything will be in readiness the first of the week.

cement ditch as before, 322 ft. long.

7. Where the South Main branches off, raise the spillway 12 inches each side, and build a hood at the entrance to the culvert at the bottom to prevent the water splashing out. These items planned from the Intake to the Reservoir will necessitate cement lining to ditches for a length

From the Intake to the Steel Flume of 1050 ft. From Steel Flume to Wood Flume along the K.V.R. 1065. In the cutting near the Reservoir 322.

A total of 3337.

This at \$3 a foot as per estimate of Mr Latimer will cost \$10,011.

Besides the ditches there will be the widening and strengthening the (Continued on Page 6.)

Start Construction on Water System

Council Loses No Time on launching work for Increased Water-supply. Indications are Money Needed is Available.

At a special meeting of the Municipal Council held on Tuesday afternoon the Public Works Committee was instructed to have a shack for workmen and a corral for horses built at once at Trout Creek headwaters. This work will be put in charge of R. Mitchell, Superintendent of Irrigation, as will also the construction work on the dams there. This work is to be rushed so that as much as possible can be accomplished before cold weather interferes.

It was the unanimous opinion of the Council that Mr J. J. Mitchell should be asked to take charge of the work on the irrigation system, including the completion of the dam in Garnett Valley. This work, we understand, Mr Mitchell has consented to take up. His instructions are to get together the necessary material and to organize the several crews so that the work may be pushed through in the shortest time possible. Much of the details were discussed in Council, but Mr Mitchell will be given full charge of the work, and will be in no way interfered with by the Council in the working out of the details.

A Toronto brokerage firm, who has dealt in Summerland bonds, learning that a new issue was proposed, wrote asking for information, at the same time laying first claim to the new issue because of past relations. The Council was informed that one man was likely to take \$15,000 of the new debenture issue, and another man \$10,000. Two or three prospective sales of \$500 each were also mentioned. If the two larger blocks are disposed of by private sale as intimated, it was felt that there would be no need to put the bonds on the market in the usual way. The idea of the Council since the improvements were first considered has been that the money necessary would be raised locally and secured by the usual debentures. The Toronto firm will be so advised.

The engaging of a teamster was left with the Public Works Committee. Three applications for the position were received and read.

The assessor was instructed to commence the Assessment Roll on the first day of October, the same to be returned on the tenth day of January.

The Okanagan Telephone Co. would have the Municipality keep its line along the Lakeshore road free from trees, special mention being made in a letter to this effect of the trees in front of the Stark and Andrew homes.

Their Only Son Called Home.

After an illness of about eight days Allen Dockstader, the three and a half year old child of Mr and Mrs A. A. Dockstader of this place, passed away at 11 o'clock on Friday morning, Sept 20th. The funeral service was held on Saturday at the house at 2.30, and was conducted by Rev. W. H. Bates, the burial being in Peach Orchard cemetery. During the service places of business in the vicinity were closed out of respect and sympathy for the stricken parents.

The floral tributes were numerous and beautiful, being as follows: wreath, Stewart Fruit Co. staff; spray, Minnie and Irene Carafot; wreath; Mr and Mrs Korchor; wreath; Mr and Mrs T. Ramsay; spray, Mrs J. C. Arkell; wreath; Mr and Mrs S. Darkis; wreath; Mrs M. McLaughlin; spray, Peggy and Catherine Ramsay; cross, Mr and Mrs J. S. Ritchie; spray, Nora and Allan Clements; spray, Mabel Kroh; spray, Mr and Mrs C. Pineo; cross, Mr and Mrs Shaw; wreath; Mr and Mrs J. T. Washington; spray, Charlie Darkis; cross, Mrs Kroh; spray, Robert and Mrs Cook; spray, Mrs Bates; spray, Mrs McIntyre and family; bouquets of asters from Mrs A. B. Elliott and Mrs Hunt.

Louis Smith, James Smith, Walter Ramsay, and Kenneth Bates were the pall bearers.

EXPERIMENTS AND TESTS.

THE ANNUAL REPORT of the Dominion Experimental Farms for the year ending March 31st, 1917, is a comprehensive document of some 150 pages, containing matter well worth studying by progressive farmers. It describes briefly and concisely the experiments and tests which have taken place at every farm and station, including, of course, a report from Superintendent Helmer of the Summerland Experimental Station. Just as there is not a branch of agriculture undealt with, so there is not a district the capabilities and possibilities of which have not been tried in the matter of better production by improved methods. In former years the report has been given in two and three volumes, and contained accounts of the scientific experiments that have been made during the year, or that were still in progress, written by professional experts of the Experimental Farm system, but henceforth these are to be given in bulletin form and the report confined to statements of the year's doings at the score and more farms and stations at different parts of the country. The report, which, as has been said, will well repay study, can be had free on application to the Publication Branch, Department of Agriculture, Ottawa.

§ § § § §

THE MAIL ORDER CATALOGUE.

UNDER THE CAPTION "Trading With Toronto," the Peterborough, Ontario, Review again points the moral that the best way to meet the mail order competition is to fight advertising with advertising. We reprint the editorial herewith, trusting that it may make an impression on some merchants:

"Several dray loads of the trade catalogues of a well-known department store in Toronto have just been delivered in Peterborough. The post office is cluttered up with these volumes, every one of which weighs over a pound, and the letter carriers are weighted down with them on their rounds. The rural mail deliverers, too, are finding their duties somewhat more than doubled for a few days in the work of distribution, as a large percentage of these catalogues go to the country.

"Every such catalogue so received is a dead loss to the city as it will divert money to Toronto, money that would be better invested at home. And the pity of it is that anything listed in the catalogue can be secured in Peterborough on terms just as advantageous as those offered by the department store. It is the advertising that draws the custom to the larger centre, and the tide can be turned by the home merchants making the same free use of printer's ink."—Canadian Grocer.

Five Students For University.

Four Summerland High School students went out to Victoria on Monday to enter the University of British Columbia. These were: Miss Susie Wallack, Donald McIntyre, Allen Harris, and Roy Elsey.

Harris and Elsey have been working at the Summerland Fruit Union packing house, and last Friday night the Union staff entertained the boys at a corn roast at Okanagan Falls. The same evening the Stuart packing house staff gave a dance in honor of Donald McIntyre. During the evening Donald was presented with a signet ring by the girls and with a fountain pen by the boys.

Another student from here at the University is W. M. Wright, who left last week to enter on his second year.

All five representatives of Summerland at the University have the best wishes of the Review and its readers and their every confidence that they will do themselves and their home town credit as students in the University of British Columbia.

Big Bill of Costs Claimed by Ok. Co.

Messrs H. C. Mellor and K. S. Hogg, president and secretary respectively of the Summerland Telephone Co., spent the earlier part of the week in Vernon in connection with the taxing of the costs in connection with the judgment obtained by the Okanagan Telephone Co. against the local concern.

An itemized bill of costs, totaling about \$1,800 had been filed by the larger company. Many of the

Mountain Goat Or Sheep, Which?

Has a mountain goat been making its home on Giant's Head for the past week or more? The suggestion is ridiculed by many, and one man who claims to have seen the animal pronounced it only a stray domestic goat. Those first reported to have seen it will not accept this theory.

During the past week many boys and several long out of their teens have been climbing the sides of Summerland's mountain in search of the mysterious animal.

By using glasses L. B. Ottley got a good view of the much talked of animal and declared it to be a mountain goat.

We are informed that Dave Dickson succeeded in getting within a few feet of it, and is positive that it is a mountain sheep. Those who first pronounced it a goat will probably accept this opinion of Mr Dickson as being correct, as sheep have been seen occasionally in this part of the province.

California produced more than half the peaches grown in the United States this year, according to a special report of the Department of Agriculture. The commercial crop of California was 11,663,000 bushels, and of the entire country 20,546,000 bushels. Of the California crop 88 per cent. is either canned or dried.

Items were objected to, and though the court's decision had not been given when the officials of the local company left for home, very material reductions had been made, and it was believed the total would be reduced to twelve or thirteen hundred dollars.

Corporation of Summerland

TENDERS INVITED

Tenders will be received by the undersigned up to the First of October next, for all or any part of the old Flume on the North Main.

J. L. LOGIE,
Municipal Clerk,

West Summerland, B.C.,
10th Sept., 1918.

The late Lieut. T. H. Broad.

The service in the Lakeside Church last Sunday evening was of a memorial nature in honor of Lieut. T. H. Broad. The pastor, Rev. A. Henderson, in a splendid sermon, spoke with much feeling, and in words of cheer and comfort for the bereaved parents.

Mr and Mrs Broad, just previous to receiving the news of the loss of this their third son to fall in battle, had received a letter from him written from a base camp where Lieut. Broad had been for about four months training men. In the letter he gave expression to his desire to get up to the front where things were being done. His desire was evidently granted, and he could have been there but a few days at the most before he was killed.

The preacher makes two one and the divorce judge takes one from one and leaves two.

PATENTS PROMPTLY SECURED

In all countries. Ask for our INVENTOR'S ADVISER, which will be sent free. MARION & MARION, 364 University St., Montreal.

Women's Institute.

The Summerland Women's Institute held their meeting last Friday afternoon in the Elliott Hall.

A letter was read from Mr W. C. Scott resigning his position as Deputy Minister and Superintendent of Institutes.

Delegates were appointed to the Women's Institute conference which will meet in Kelowna on October 8-10, the official delegate being Mrs Lipsett. Other delegates are: Mrs Solly, Mrs Lees, Mrs Ross, and Miss Aitchison.

In the absence through illness of Mr Kelley, who was to have addressed the ladies, Mrs Solly read a very interesting chapter from "A Student in Arms."

Mrs Angwin gave a few recipes and hints on the art of crystallizing fruits. Another feature of the program was a Women's Exchange, which realized quite a nice sum of money for Prisoners of War Fund, to which the Institute subscribes monthly.

McWILLIAMS' DRUG STORE

Boy Scout Column

SUMMERLAND TROOP BOY SCOUTS.

O. F. Zimmerman, Scoutmaster, Headquarters, College Gymnasium.

Meets every Friday evening at 7.30 p.m.

At our last regular weekly meeting the last of the boys passed their Second Class Tests, while the rest practiced on the mat, some with the "gloves" and others wrestling. We are hoping to be more skilled at this before many meetings have passed, for Mr T. B. Young and Mr Lawler have consented to help us.

The meeting was dismissed shortly after nine o'clock, the Court of Honor sitting for a few minutes, this latter meeting ending by a Patrol Leader challenging the Scoutmaster to a scrap with the gloves, which resulted in the Scoutmaster declaring himself defeated.

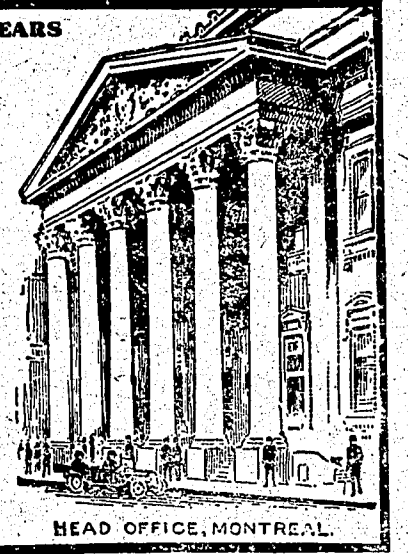

We, all and every Scout, have great cause to regret the departure of Assistant Scoutmaster Allon Harris, who left for Vancouver this week. He is the only Scout belonging to the troop when it was first formed, a matter of eight and one-half years ago. He gradually worked himself to the rank of Patrol Leader, passed his King Scout Badge last year, and he was promoted to the position of Assistant Scoutmaster. And when we thought that it was impossible to run the troop longer he persuaded Mr Zimmerman to take up the Scouts with such success as can only be appreciated by the Scouts themselves. Everyone will join in in saying that he was a good Scout, and could hardly have done more than he did for the troop; and in wishing him a happy and successful year, hoping that on his return to Summerland in good time he may find the work which he aided so generously, carried on to his satisfaction.

Summerland Telephone Co.

Limited.

Kitchener was right

when he said—

"Either the Civilian population must go short of many things to which it is accustomed in times of peace or our armies must go short of munitions and other things indispensable to them."

NOW, the only way we can possibly live up to that obligation is by going without in order that our soldiers may have. For the money we waste is not money at all—it is equipment, clothing, shot and shell that are urgently needed in France.

By denying ourselves, therefore, we enable Canada to procure to the fullest extent the materials and labor which she and our Allies need for the successful prosecution of the war.

What happens when we fail to save?

A pull on labor by the Government in one direction and a pull on labor by the people in the opposite

direction. Hundreds of millions of dollars are of no use to the country if goods and services can be secured only to the extent of eighty millions of dollars. So we must do everything in our power to release both goods and labor for the purposes for which Canada needs them.

WHETHER it be food, coal, wool, steel, leather, labor or transportation, the result in all cases is the same. Whoever competes with the nation by freely satisfying his own desires, selfishly appropriates to his own use that which is so urgently required for our fighting men in France.

For the sake of your country and the boys "over there," spend cautiously. Think of what Lord Kitchener has said, and ask yourself first, "Is this something I really need or can I do without it?"

ARTICLE No. XXI.

That each one of us must play our part, must do our share, to make our community life as near to the ideal as possible, is very true. It takes all classes to make up a desirable and progressive community.

But who is it, after all, who is utterly indispensable to the welfare of your home town?

Who is it that is the real "U" in Community?

Is it not the man of business? Certainly!

In this age everything is subservient to Commerce.

Commerce, define it as you will, sets the pace—and we all come tumbling after.

This is a national truth, and a communal truth. We must bow to the fact.

Kill off your community commerce, and you have left—Stagnation—Decay.

We arrive, then, at the point where it behooves each one of us to ask ourselves: "What must I do to preserve the commercial life of my community, so that there will be advancement and life instead of rust and stagnation, and so that I shall obtain my just share of the prosperity and comfort of this life?"

The answer is not far to seek.

In order to preserve intact communal attainments and institutions, and to stimulate the development of the germ of commerce, we all must perform a simple economic duty—the duty that every man and woman OWES to his or her community.

Each one of us must assist in the generation of home trade, and in circulating the wealth of the community within the community to the greatest possible extent.

We must conserve at home the fruits of home production, in order that the necessary nourishment for healthy home growth be at hand.

We should make this our permanent, patriotic policy—our unalterable resolve—and we should glory in the stand, for it will bring rich rewards.

Starve your home trade and you must "hit the trail" or dwindle on an empty stomach and shattered hopes.

Don't think you can get by if you simply buy the essentials of life at your home business places,

while you send away for the cream of your requirements. No one can get half-drunk and remain wholly sober.

The half-drunk man cannot fool his family and friends very long; neither can the half-hearted home patriot fool the local business man or, more properly, local business conditions.

As the main-stay of the community, the business man must have stability in evidence on all sides. No merchant can afford to put in large and up-to-date stocks unless he knows there is going to be a local demand for these goods.

The business man must have confidence in the town in order to go the limit of his community usefulness. We must back him up or he cannot back us up. The arrangement must be mutual—the co-operation all-embracing.

Community pride and community loyalty make for permanency and growth and confidence.

With such a spirit, almost any community can get anything in reason. It has a mind to go after.

The situation is in our own hands.

As we stand at the base of a mountain we are awed by its majesty; having topped it, we recognize ourselves as its master.

GET BUSY!

Try Potato Bread.

Every household where home-made bread is baked can save wheat flour by an increased use of potatoes in the bread and still have a most appetizing loaf.

Save the left-over potatoes from noon dinner, including the water in which they were boiled unless it happens that you have boiled them with the jackets on.

In this case it is better to use fresh water. Mash the potatoes thoroughly while they are still warm and freshly cooked, and a small quantity of lukewarm water in which the yeast has been dissolved with the required amount of salt and set aside until next morning, then mix into a stiff dough in the ordinary way.

Set aside again to prove, and when light knead down once; then let the dough rise until light and mould into loaves. Put into the pans. Let the loaves rise again until light. Bake in a moderate oven.

Little Jam in Great Britain

Only about One Ounce per Week in Sight for the Civilians.

The British Ministry of Food has announced that on account of the comparative failure of the fruit crop in Great Britain and the requirements of the Army, only about one ounce of jam will be available for the civil population, and there is no certainty even that this amount will be available.

An agitation for the rationing of jam has developed, but the Ministry has issued a statement as follows:—"At present it is impossible to say exactly how much jam will be available, and therefore it is impossible to ration it. Later on, when the fruit crop is all gathered and the amount available is known, there is no doubt that arrangements will be made by the British Ministry of Food for fair distribution of jam.

In the meantime the only thing is for all who have fruit to make as much jam as they can, and for the rest of us to be as sparing as possible in our use of it, so that those who are in the greatest need of it—children and soldiers—shall not go short. It must not be forgotten that jam is essential to the health of the army, and when you thoughtlessly eat more than you need, you are depriving our fighting forces of some of their fighting strength."

The jam shortage overseas makes it certain that there will be an exceptionally heavy demand for butter from Canada this coming fall and winter.

Canadian housewives who make all the jam they possibly can will be helping to save butter for our Soldiers and Allies, because a large supply of jam will facilitate conservation of butter.

In France, as well as in the British Isles, the fruit harvest this year will be below normal.

You can use potatoes up to 50 per cent. of the total amount of dough required, but when a large proportion of potatoes is used the dough must be very much stiffer accordingly.

ANOTHER WAR VICTIM.

"What's become of Bliggins?" "He's laid up, a victim of the war."

"I didn't know he had enlisted." "He hasn't. He sprained his larynx telling how things ought to be done."

Marriages which should make one out of two often result in sixes and sevens.

ANNOUNCEMENT

THE PRINTERS ARE NOW AT WORK ON

WRIGLEY'S

BRITISH COLUMBIA DIRECTORY

Compiled and Printed in British Columbia—Endorsed by B.C. Government, Boards of Trade, Manufacturers' Association and other bodies.

IN FIVE MAIN SECTIONS

BRITISH COLUMBIA YEAR BOOK—One hundred pages of official data, covering Agriculture, Lands, Timber, Mining, Fisheries, Shipbuilding, and Public Works, prepared by the various Departments. This section will cover fully the development in British Columbia.

GAZETTEER, describing over 1,900 cities, towns, villages, and settlements within the Province, showing location, distance from larger points, how reached, and by what lines, synopsis of local resources, population, etc.

ALPHABETICAL DIRECTORY of all business and professional men, Farmers, Stock Raisers, Fruit Growers, etc., in all towns and districts.

CLASSIFIED DIRECTORY of Manufacturers, Retailers, Producers, Dealers, and Consumers, listing all products from the raw material to the finished article.

TRADE NAMES AND TRADE MARKS—A list of popular trade names alphabetically. If you want to know the manufacturer or selling agent of a trade-name article, look up this section.

INCORPORATED CITIES—All gazetteer information in the Directory of the incorporated cities of the Province will be prepared by either the City Council or the Board of Trade, thereby official.

ADVERTISING BRITISH COLUMBIA—It is necessary to continue to advertise British Columbia outside of the Province, in order that tourists and settlers will continue to come. With this aim in view, a copy of the Directory will be placed in the leading Libraries and Boards of Trade throughout the Canadian Prairies, Eastern Canada, the United States, and abroad. The Directory will be used by prospective tourists and settlers as an official guide of the Province. The subscription price of the Directory is \$10, express paid.

Peachland Doings

A Weekly Chronicle Furnished By Our Local Representative.

In last week's issue we reported Osborne Needham as missing, but it is with deep regret that we are called this week to report that his mother and sister got word that he had been killed on Sept. 2nd. According to any word to hand from the boys suffering from illness or injuries, they are doing as well as can be expected.

After spending a day or two in Penticton Mr Johnston, who has been working for Mr J. McKinnon, returned on Thursday morning.

Mrs J. Wright was a passenger to Summerland on Thursday night of last week, and will probably remain there for nearly a month.

Mr Graham, the evangelist, who with Mr Mess held meetings here this spring for quite a time, came in on Thursday night's boat last week to renew acquaintances made while here before. He stayed here the week-end, leaving by Monday morning's boat.

Passengers to Kelowna on Friday last were Mrs and Miss Gwen Lang and Mr Rowland, returning in the evening.

Mr A. Town and Mr J. McKinnon were passengers north on Saturday last to send the day in Kelowna.

Mr and Mrs W. Dryden returned on Saturday morning from Penticton, where they spent several days attending the Municipal Convention held there.

A young "old timer" stepped off the boat on Saturday morning last in the person of Cecil Brown. Cecil surprised his associates of former days, not only by his presence, but by his stature. He spent a time in the Peace River country, and since has been in the Edmonton district for nearly a year, and has evidently not forgotten to grow all this time. He may stay in town for an indefinite period. He reports his father still in the Peace River district, and says he seems to be satisfied with the country.

Mrs W. Lupton with her little boy came in on Saturday night to spend the week-end with her parents here.

Mr and Mrs Lighthouse with their two boys, who have been visiting here for a few days, left on Saturday night's boat for their home in Vancouver.

Mr E. Fulton came in on Saturday night to spend Sunday here with his brother and sister-in-law. He returned on Monday morning.

After spending Sunday in Summerland with her people, Miss Nicholson returned on Monday morning to resume her duties at the Trepanier School.

Mr J. Michael and Mr Seth Davidson were passengers to Kelowna on Monday, returning by the evening boat.

Mr Lowndes returned on Monday night from his business trip to Vancouver.

Mr and Mrs Robison with Mrs J. Hay motored to Penticton on Saturday evening last.

Mr and Mrs A. Town are enjoying this week a very pleasing outing, being entertained by Mr and Mrs J. M. Robinson of Naramata to a motor trip down to Idaho, where Mr Robinson has his interest in the mine. Mr R. A. F. Moore and Mr B. B. Smith drove Mr and Mrs Town down to Penticton on Monday where they joined the Robinson party for the trip south. Messrs Moore and Smith returning, Mrs Town was pleased to be able to leave her house and family under the able care of Mrs Sanderson.

After spending a few weeks' enjoyable holiday in Peachland as guest of Mr and Mrs A. Town, Mr B. B. Smith left on Tuesday morning to return to his home in Winnipeg. One of the pleasing parts of Mr Smith's holiday here was a deer hunt with Mr A. Town and Mr R. A. F. Moore and himself as a party. They motored out the main road to camp, but we are sorry to report that there were no horns projecting from the car on their return. However, their effort was not entirely in vain for they saw two on their way out.

Startling Results From Irrigation.

Irrigation farming is a branch of agriculture separate and distinct in itself. It has been practised since long before the dawn of history, and as the food requirements

of the world increase it will be adopted and reduced to a scientific exactness everywhere where good water is obtainable. In no other form of agriculture are the results so certain or the yield per acre so large. Some of the greatest engineering feats in the world are embraced in the work of the Reclamation Service of the United States. Included in these are the Roosevelt dam, the Arrowrock dam, and the Elephant-Butt dam. The entire cost of the development of the projects is assessed against the land reclaimed and repaid to the government in instalments.

In 1917 the 29,000 farmers on 1,000,000 acres of land reclaimed by the Reclamation Service, Department of the Interior, U.S.A., went over the top with a crop valued at \$50,000,000, according to the report of the Bureau recently made to Secretary of the Interior Lane.

Such returns should at least allay the apprehensions, if any now exist, that these farmers will not be able to return the investment of money which has been made by the government in constructing the irrigation system. On several of these projects a single crop will suffice to return the entire investment.

We apparently have trained the tastes of two black bear to a liking for fruit delicacies, proven by their frequent visits made on some of the outlying orchards. Several hunters have been trying to make short work of them, but have been unsuccessful so far. The bears not only have been eating some of the plums, etc., but destroy the trees, so it is hoped the hunters will soon have luck.

ADVERTISING

Is An Evidence of Community Loyalty as well as Good Business

ADVERTISING will do more than build your business. It will build your community.

It will encourage the people in your Community to buy at home more.

It will counteract the effect of outside advertising and keep so much more money in the district.

And your community, after all, is only the aggregation of yourself and the rest of us.

Advertising to-day is, therefore, the business and the patriotic duty of the business men in this community.

And the logical medium is your home paper, as it reaches every buyer in the whole district.

Miss Beckworth of Victoria is visiting Mrs G. J. C. White.

Don't postpone ordering fruit trees for Spring 1919 delivery, until Fall; ORDER NOW. B.C. Nurseries Co., Ltd., Vancouver. tf

We learn with regret that Mr W. C. Kelley, who has been laid aside with a severe attack of pleurisy, is still confined to his bed.

McIntosh Red apples shipped from Keremeos were bringing \$3.25 wholesale in Vancouver last week according to Market Commissioner Abbott.

Extensive alterations have been made to the interior of the Rialto Theatre. Beside the addition already mentioned, a new floor has been put in with a gradual slope from entrance to stage.

Mr. Frith, who with Mrs Frith, has been living at Peachland since moving out of the Agur boathouse, was a visitor to Summerland this week. He is much improved in health and expects to return to Vancouver next spring.

Mr and Mrs J. M. Robinson, Mr and Mrs A. Town and Mr R. C. Robinson left by motor car on Monday for Spokane where the men of the party will attend the annual meeting of the company owning a mine near Silver City, Idaho, and of which they are shareholders.

Sergt. Jack Craig, who was twice wounded at the front, and has been giving instruction in physical culture for the past year in England, has enlisted for service in Siberia, according to information received this week by his brother, George. It is hoped that he will be able to visit Summerland before crossing to Siberia.

Miss Mary Kersteman, the friend of Miss Amy Brown, who came with her from Toronto, left on Monday morning to visit with friends in Winnipeg. It is expected that she will remain there until after Miss Brown leaves here to return to the Ontario capital, and that they will journey together from Winnipeg east. Both these young ladies have signed on for overseas service and unless called earlier expect to leave for Europe almost immediately after they arrive in Toronto in October.

Mr F. D. Cooper is open to accept a few more listings of properties in Peachland and Naramata as well as Summerland. 9

Mr and Mrs J. B. McTaggart of Edmonton, registered at Hotel Summerland this week. Mr McTaggart has an orchard property in Peach Valley.

Mr and Mrs H. M. Lumsden went out this morning by K.V.R. for a short visit to Vancouver, Victoria, Seattle, and other Coast points.

Mrs Wellington Watson returned on Tuesday morning from a brief visit to Vancouver bringing with her a seven weeks' old baby girl which she has adopted.

Harry J. MacLeod and Finlay Munro, both on active service in France, have made recent acknowledgement to the Home Comfort Club of parcels received by them.

Ten tons of tomatoes are being gathered daily, we are informed, on the Lakeside Stock and Dairy Farm. These are being shipped to the Broder Canning Co., New Westminster.

Prof. Clements of the University of B.C. is authority for the statement that there are 13,000 farmers in British Columbia, 15,800 of whom own their own farms. This is 90 per cent., and is a larger average than in any other province in Canada.

Hon. Martin Burrell, Minister of Mines, and Mrs Burrell left Ottawa on Tuesday afternoon for British Columbia. While on a short visit to his constituency Mr Burrell will look into the production of zinc and lead. He will also give some attention to the production of platinum, a platinum plant having been recently installed in the Vancouver branch of the Dominion Mint.

Mr F. A. F. Nuttall has had word that his youngest brother, Lieut. Orrell H. H. Nuttall, of the Royal Irish Rifles, was wounded at Kemmel on the 22nd. He has been moved to Lady Evelyn's Mas-on's private hospital, London. Mr Nuttall's second brother, Pte. Ino L. K. Nuttall, of the 31st Canadian Batt., was killed at Kemmel in 1915. The latter was on the staff of the Canadian Bank of Commerce at Stratheona, Alta., before joining up.

One of the horses of Mr C. H. Gayton's team was badly injured in a runaway last Friday night. Taking fright at some cars being switched on the C.P.R. wharf the horses bolted and broke the tongue of the wagon to which they were hitched, and ran wildly up town turning in at English's stable. The breaking of the tongue caused horses and wagon to swerve from side to side of the street, and a sliver of the broken wood penetrated deeply into one of the heels of the injured horse, causing a wound from which it may never fully recover.

The Prisoners of War branch of the local Red Cross is preparing for a tag day to-morrow, Saturday. The school children are being organized under the direction of the teachers and will make a thorough canvass of the district. The money collected will be turned over to the government for the purchase of necessities for distribution among the 2,500 Canadians now held as prisoners in Germany. It has been established beyond question that without the food, etc., thus provided these men could not exist. \$200 annually is required to provide for each prisoner.

TUESDAY, THURSDAY AND SATURDAY
No. 10, West Summerland - 7.28 a.m.
[Through Train for Nelson, all points East and South]
No. 4, West Summerland - 8.01 p.m.
[Local Vancouver to Penticton only]
T. A. OLIVER, Agent.

A. A. Derrick arrived by K.V.R. on Thursday morning on a short business visit to Summerland.

Mr S. G. Tobin of Leduc, Alta., who owns property near T. J. Washington's, has been a guest at Hotel Summerland this week.

Mr S. J. Broad of Calgary, son of Prof. and Mrs W. T. Broad, arrived here on Monday evening accompanied by his wife and baby.

Canadians are numerically as otherwise featuring strongly in the British air service. Forty per cent. of the men in that service are Canadians.

Dr Wilbur Watson, who at one time attended Okanagan College here, and is now a successful dentist in Vancouver, is the guest this week of Mr and Mrs Thomas Dale.

Kenneth Elliott, who has been training for the air service, has nearly finished the course in flying. We are informed that he expects to leave for England about Christmas, and will then be ready for service.

Word has been received here from Grande Prairie, in the Peace River district, that William Dow who, previous to removing from Summerland, was engaged in trapping, has suffered a paralytic stroke.

Word has been received to-day by Mr and Mrs Thos. Dale that Pte. F. Hilton Snider of the Canadian Artillery had been admitted to the 57th casualty clearing station, wounded, suffering with concussion in back of head.

Mr and Mrs Hespeler returned on Tuesday from Vancouver having left their daughter at the Braemar School for Girls. Since leaving here, Mr Hespeler visited his father in Winnipeg, and from there went to the Coast.

The clocks throughout Canada will be set back one hour at 2.00 a.m. on Sunday morning, October 27th, according to an order recently issued by Ottawa. The daylight saving plan will be thus suspended for the winter months.

Mrs Hespeler received news yesterday of the death of her only brother, Pte. Harry Jermyn, at the Ogden Convalescent Home, Calgary. Pte. Jermyn had spent three years in the trenches, and was very badly gassed about five months ago.

Mr and Mrs Crawford of Vancouver are spending a few weeks in Summerland, and are now living in the Agur cottage on the lakeshore. Mrs Crawford (nee Miss Willans) is well acquainted here, having spent some months in Summerland at the home of her sister, Mrs Rivington.

It having been proven that Miss Muriel Phinney was on the wrong side of the road during the recent automobile collision in which the car she was driving and that of Capt. Roe came to grief, a nominal fine of \$5 was imposed in addition to the costs. Action had been taken by the provincial police.

Gordon Robertson, who has been in training in the aviation camp near Toronto, is home on a short visit previous to his going over to England. He arrived last Saturday evening, and will leave by Saturday morning's boat. He has completed his course in "ground work," and when he arrives in England will commence training in flying.

CARD OF THANKS.

Mr and Mrs A. A. Dockatander wish to convey to the many kind friends and neighbors their deepest gratitude for their many thoughtful and helpful acts of kindness and expressions of sympathy during their recent and bereavement.

The funeral of Harry Wellband, a brother of Thomas Wellband of Vancouver, took place at Winnipeg on Sunday.

At Vancouver 3,000 crates of raspberries have been placed in cold storage and will be shipped to Baltimore in December.

After almost two years of negotiation church union at Fernie is now assured. The new organization will be known as the United Church, and a brand new pastor will be called.

Empress Attractions

Friday and Saturday, Sept. 27-28

PLANS FOR BIGGER IRRIGATION.

(Continued from Page 1.)

supports of the wooden flumes, and the work at the spillway at the Reservoir \$2,733. These recommendations will make a complete and thorough job from the intake to the Reservoir. Mr Latimer estimates the total cost of these to be about \$12,750. Mr Mitchell's estimate for a part of the work only was about \$7,000. We advise your adoption of the larger job so as to make a thorough and complete and finished work. To do a part now and another part in the future at increased cost we think unwise. Better do well what we do and finish as we go.

Next we come to the North Main from the Reservoir around to Garnett Valley. We advise here:

8. Making a culvert or cement pipe 204 feet long, made for the first twelve feet, 6 inches higher than Mr Latimer's report to give a better and larger entrance for the water. The main point is to make a good entrance: below the 12 feet it is large enough. This culvert or pipe will separate the two supplies for Domestic Water and Irrigation Water here, and will greatly improve the Domestic Water supply all over the municipality.

9. Beyond the culvert build a wooden flume 160 ft. long 46 inches x 22 inches straight across the depression.

10. Then cement 2,400 feet of ditch as in the South Main, walls and bottom to be finished complete, 3 1/2 feet wide at bottom with sides 2 feet deep and the concrete to be three inches thick.

11. On the other side of the road at the corner of Mr David Clarke's lot, follow down the present ditch and replace it with a new one as above for a distance of 519 feet.

12. Make the flume between these two ditches 46 inches x 22 inches.

13. Increase the size of the flumes thereafter as per Mr Mitchell's report, and line 726 feet and 874 feet of ditch with cement work as above.

14. Build 3248 feet of flume down to the siphon pipe, this flume to be 36 inches x 22 inches.

15. Put in a new siphon pipe across the valley, 12 inches in diameter, and make a concrete cham-

ber at its end to receive the water. This brings us to Jones' Flat.

These details will require lining ditches with cement for a total distance of 4,625 feet, at an estimated cost by Mr James Mitchell at \$1.60 per foot or \$7,400.

The rest of the work on the North Main is work on the wooden flumes, building new in places and enlarging in others.

Mr Latimer estimates this whole work on the North Main will cost \$13,780. The whole of our recommendations are estimated to cost a total of \$26,524. Mr Mitchell's total was about \$15,000 for the part of the work he advised to be done immediately, and to be finished at some future period. We advise doing the whole now if possible.

This Report so far only deals with one part of our water supply, and it is as much as we can possibly get ready for next season's irrigation. The Garnett Valley dam must be finished this fall if pos-

sible, and we suggest \$5,000 for that work and other items needed in Garnett Valley.

The work at the headwaters is imperative, too, at an early date, perhaps next year. But the time for doing work now is only a few weeks now. Hence we advise that the work on the Trout Creek and North Main portions be started at once and if possible completed this fall and next spring, and also the dam be raised at the Garnett Valley dam this fall. This will necessitate the ratepayers authorizing the Council by a by-law to raise some \$30,000 by debentures to cover the cost only of the work that we can do this time. We must leave the completion of the work in Garnett Valley and necessary work at the Headwaters till next year and ask then for another sum of money to make our irrigation and water system really adequate to our needs.

In closing, Prof. Broad strongly urged that the report be accepted

and adopted as "with our magnificent water possibilities we can cheaply and easily make our irrigation and water system one to be really adequate to our needs and one to be proud of."

Mr Broad's motion that the report be adopted was seconded by Mr C. H. Tate. In the discussion which followed there was some considerable criticism of the suggested

delay in making provision for increased storage at the headwaters; the outcome of which was the adding of \$5,000 to the sum of \$30,000 stated above; the additional money being for the purpose of increased storage on Trout Creek as already contemplated by the Council.

The motion asking the Council to raise the \$35,000 by a debenture issue was carried unanimously.

Newspaper Space

Not
For
Fakirs

BUT

For
Honest
Men

The thing that will make your place a landmark and your name a household word is consistent, truthful, rightly supported newspaper advertising.

"A city that is set upon a hill," says the Good Book, "cannot be hid."

The right kind of advertising will, so to speak, set any man, any town, any worthy business upon a hill.

Play fair, look after things, and dip deeply into printer's ink—and you can no more escape becoming prominent and successful than you can reverse gravity and cause rivers to run up grade.

Carry the stuff—deliver the service—keep up a vigorous fire in the papers—know what you print, and live up to it.

The most precious and desirable thing in a business career is public confidence. Getting ever-widening circles of people to believing in you is progress of the first order, but educating strangers to the idea that you're a man not entirely to be trusted, is slipping back—no matter what, for the time being,

the balance sheet may be saying to the contrary.

Forget that old saying of the circus man, that "people like to be humbugged"—they do, on any circus day—and have a bully time over it—but regular business is different.

The fellow who deliberately sets out to deceive the public is a fool and a pikor if he thinks he can get away with it through pages in newspapers. He may manage to put it over for a while, but the backfire will get him in time, and it won't be long before he'll find himself exactly where he deserves to be—nowhere.

Newspaper space isn't for fakirs—it's for honest men, and every honest business can profit greatly through the use of it. It throws a spotlight upon the scene—and men and things that aren't quite standard will not stand the glare.

The crook should eschew printer's ink—he should emulate the Hun propagandists—slip around quietly and pass the bunk heart to heart.

FAIR DATES: **OCTOBER 30th & 31st**
