

### Naramata News

Current Events of  
Town and District

Mrs. M. B. Smith who has been visiting in Ottawa for the past few months, returned to her home here on Saturday.

Mr. Steuart Leckie, of Penticton, spent the week-end with friends in town.

Mr. and Mrs. Languedoc arrived from the Coast on Saturday morning. Mr. Languedoc seems much improved in health and is looking forward to a busy season.

Mr. and Mrs. Bruce Cash have come to reside with us again and are getting settled in their pretty home on the benches. Mr. Cash came in from Vernon and Mrs. Cash came in with Mr. and Mrs. Languedoc from the Coast.

Miss MacKay of Vancouver is visiting her uncle, Mr. Dan MacKay. Miss MacKay has been in training at the Vancouver General Hospital and is on sick leave. She hopes the bracing climate of the Okanagan will bring her back to health.

Mr. Arthur Stiff who has been studying electrical engineering in Vancouver, paid us a visit on Sunday. Mr. Stiff has finished his work at the Coast and will continue his course in Armstrong where he will get practical experience in general distribution.

Mr. and Mrs. George Jonas of Edmonton are here for the summer. Mr. Jones is a returned man and is negotiating for a fruit lot in Summerland.

Mrs. T. H. Boothe of Penticton was a visitor on Sunday.

Mrs. A. Aveson who has been in poor health for some time was taken to the Summerland Hospital for treatment on Tuesday.

Mrs. F. C. and Mrs. M. D. Manchester were in Penticton on Wednesday.

The Ladies' Unity Club met on Friday afternoon. Mrs. Salting was the hostess for this occasion. Plans for furnishing the room in the Hospital at Summerland were discussed and arrangements were made to have the club rooms cleaned and redecorated. Mrs. M. D. Manchester gave a most interesting talk on conditions in the Yukon Territory, describing the handicaps and advantages of the country to women, both from a wage earner's and a housewife's point of view.

The regular meeting of the Farmers' Institute was held on Monday night. The crowd was not large, but those who did come were well paid for their attendance. Numerous matters of importance to the community was taken up. A committee for the entertainment of the next meeting was appointed, being Messrs. Salting, Armour and Rayner. They are to plan some form of entertainment which will probably not be disclosed till the night on which it takes place. It is to be the policy of the organization to have this form of entertainment regularly. A very useful talk on poultry and the varieties of the most benefit to the rancher of this district was given by Mr. Aldridge. He answered numberless questions in regard to his subject and his valuable fund of information was much appreciated. Mr. Hans Salting was elected as Director in place of Mr. Dickon, who has gone to Penticton to live.

A most successful whist drive was given on Wednesday evening by Mrs. Mark Manchester and Mrs. F. C. Manchester at the home of the latter. The party was given for the purpose of raising funds to purchase new china for the Unity Club. Mrs. George Cook and Mr. Gerald Roe received the first prizes and the consolation ones were won by Miss Stonehouse and Mr. Hans Salting.

The Women's Institute held their regular monthly meeting on Tuesday afternoon. After the regular business had been transacted the ladies were given a splendid talk on "Dante's Divine Comedy," by Mrs. Solly of Summerland. A vocal solo was given by Miss Enid Rayner which was greatly enjoyed. Mrs. D. O. Hughes read a highly interesting paper on what women have done and are doing in the world today for the betterment of the race. Roll call was answered by great men in history. There is general regret among the members that the travelling library is not going to be available at present. It is to be hoped that some arrangement may be made whereby it may be secured.

### Correspondence

The Columns of THE REVIEW are open to the public for the discussion of matters of general interest. No notice can be taken of anonymous communications. Letters intended for insertion must be authenticated by the name and address of the writer, not necessarily for publication. The opinions of correspondents are not necessarily those of the Review.

Naramata, B.C.,  
March 1st, 1920.

Editor of the Summerland Review,  
Summerland, B.C.

Dear Editor:  
The wailing of Autolyceus in your last issue reminds me of the ancient tale of the young girl who was weeping bitterly and when asked by her mother the cause of her grief, replied, "Oh, what if I should get married and have a baby and it crawled into the oven and was burned to death! Boo-hoo!"  
When the time arrives that we really have music in our public schools, I am confident the educators who will have it in charge will not procure their music from the ten cent stores. It is to be hoped they will use the same valuable charts and studies which have been in use in the American public schools for generations, or maybe something better yet.

Canadian music teachers certainly know of the excellent public school music published by the Silver-Burdett Co., or the Oliver Ditson Co., of Boston. They know that these studies are carefully compiled with due thought for musical values, good taste, color and harmony.

The several thousand thorough-going finished musicians and educators of the American public schools have been most careful that their instruction should not become "tinged" with "jazz atrocities." They do not classify the "fox-trot-rag-time-jazz variety" as music any more than they classify the prolific efforts of Bertha M. Clay as literature. I believe Canadian music teachers will be equally careful and critical. I believe they know other things than their theory and technique — such things as the musical achievements of different nations. They know that no Anglo-Saxon nation is, properly speaking, a musical nation — and why?

There are very few recognized American composers to be sure, but their works are a creditable acquisition to any musical library, though much too advanced for use in schools other than those where private instruction is given as well as class work. I refer to MacDowell, Nevin, Cadmus, Wilson, Peters, Farwell and Elsa Flemming and as many others whom I cannot name just now off hand. These American composers are as apart from the group of Hebrew jazz concoctors as "Scribners" or "Review of Reviews" are apart from a German hardware trade journal.

It is true there is no "American School" of music meaning "American method." The justly celebrated conservatories of Boston, Cincinnati, and New York frankly employ the Italian method for voice culture; and the other branches taught show the Polish-Russian or German-Scandinavian influence accordingly as the different members studied in Paris or Leipzig.

Canadian musicians know that they can go into almost any private school or college in the United States and hear a well-balanced, well-trained chorus give such things as the "Creation," or "Elijah" with "precision, purity of tone, and clarity of diction." As many of these Canadian musicians have studied advanced music in the United States they can reassure poor Autolyceus in his anxiety over "American educational models" better than I can. All of us who have stumbled along the "Winding Trail," with A., take him (at his obvious own valuation) to be a person of some erudition, but he must not expect to qualify as a musical critic on the strength of his aversion to jazz. Many a person who does not know a "double stop" from an appoggiatura can hate cheap music and enjoy Bach's "High Mass in B Minor." I have known an untaught baby to howl when rag-time was being pounded out, and show the most touching appreciation of the "Moonlight Sonata."

So long as the dancing population of this continent prefers the present day hysterical din to the dignified Strauss dance music of a previous generation the jazz fixers will grind it out for them, but for Heaven's sake let us not call it "American music," thus displaying a most unworthy lack of information.

Is the "Winding Trail" a very narrow trail indeed, bounded upon one side by a high hedge of prejudice and on the other by a deep chasm of misinformation? If not, let us from now on be led by it to a keener knowledge of the great thoughts and

deeds of great men and women everywhere. Give us something to strengthen our love for and faith in Canada with its many untried possibilities. As a people we cannot build up greatness by using unmerited disparagement and false insinuations of a neighbor who at all times and in all places has nothing but good to say of us.

I thank you very kindly for this space.

Yours sincerely,  
MABEL KENISON WALTERS.

Summerland, B.C.,  
March 2nd, 1920.

The Editor,  
Summerland Review.

Dear Sir:  
For the benefit of your correspondent in last week's Review and of any others who profess ignorance of the laws and rules regulating automobile traffic, the following is an extract from the Oregon Motor Vehicle Laws, which are similar, or the same as those in use in this and other countries.

#### Overtaking Vehicles.

1. The overtaking vehicle shall maintain the speed until clear of the overtaken vehicle, and for such dis-

tance thereafter as shall prevent dust and mud throwing upon the overtaken vehicle.

2. The signal to pass shall be given by one blast of the horn, bell, whistle, gong, or other signalling device.

3. Should the overtaken vehicle then not give way, three such blasts shall be given, and upon the failure to comply therewith, the overtaking vehicle may at the next suitable place, safe for both vehicles, go by without further signal.

4. It shall be the duty of the operator of every overtaken vehicle to turn to the right (left in British Columbia) and give one-half of the road to the overtaking vehicle, and shall not increase his pace while being passed.

I might say in addition to the above, that in the early days of motoring in England, the names of those who habitually hogged the middle of the road (road hogs, they were called) preventing faster cars from passing were reported to the Secretary of the various motor clubs, and their names posted in the club rooms, thus soon stopping the practice.

Yours sincerely,  
F. A. C. WRIGHT,  
Summerland Automobile Assoc.

To the Editor,  
The Summerland Review.

Dear Sir:  
In your issue of last week I was very much interested to note that a resident of this town, H. M. Lumsden, lays claim to having attained the speed of 16 miles per hour while driving a car along the Penticton road. Nothing is further from my mind than to belittle Mr. Lumsden's truly admirable performance, but may I bring to your notice the following fact? On Wednesday last, the 3rd instant, travelling on the same road I managed on the straight approach to Penticton Bridge to achieve the speed of 17.2 miles per hour and moreover succeeded in holding this pace for a distance of 71 1/4 yards. I think you will agree a really remarkable achievement. Can any of your readers lay claim to a greater speed than this on this, or indeed, on any road, or does this, as I imagine constitute a local record. I might add that the distance for which I held this pace might have been still further increased, had not the man who was running in front with the red flag failed to hold the pace, or in ordinary English, had not his wind failed.

At the time when I accomplished this feat, I was driving a McAnderson "light five," standard model, standard road equipment, weight, 3500 lbs.

I am, Sir,  
Yours elatedly,  
WOOD B. CHAMPYUN.  
Ed. Note.—Light on the light, please!

### Peachland Doings

A Weekly Chronicle, Furnished By Our Local Representative.

Mrs. J. D. Elliott with her daughter Willa were passengers south on Wednesday of last week to visit her parents and sister in Naramata. After a very pleasant holiday they returned on Monday morning last.

Mr. and Mrs. Willis were passengers north on Thursday morning of last week returning to their home here on Saturday evening's boat.

Charlie Morrison returned home on Thursday morning of last week.

After a few weeks spent at the Coast, Mr. Cudmore of the Peachland General Store returned on Thursday bringing with him Mrs. Cadmore and family. They arrived by auto having come by K. V. R.

Mr. and Mrs. A. Town arrived on Thursday via K. V. R. on their return from Vancouver where Mr. Town has been engaged for some time in trying to locate a residence. Mrs. Town joined him recently and together they decided on a place, and we are sorry to learn they expect to leave here about the middle of March.

On Thursday evening Mrs. D. White and family entertained a few friends when a very enjoyable time was spent principally with dancing.

Mr. Chidley, the barber, and his wife have recently removed to Trempanier townsite, on Mr. H. H. Thompson's lot which Mr. Chidley intends working this year. He expects to continue barbering.

Mrs. D. J. White and family have moved from the cottage on Miss McBean's place to town and have taken up residence in Mr. Murdin's house on 5th street.

The Women's Institute held their regular meeting on Friday afternoon with a fair attendance.

The Friday night checker tournament draw resulted as follows: Mr. Dryden and Mr. Brinson — Dryden 1, Brinson 1 and 2 draws; R. A. F. Moore and Mr. McDonald — Moore 4, Buchanan and Miller — Miller 2, Buchanan 1. We have to correct an error in the report of last week's play between Jas. Moore and J. Brinson. Mr. Brinson was credited with 4, when Mr. Moore had taken 1 out of the 4.

After spending a couple of weeks here visiting her sister, Mrs. J. B. Robinson, Mrs. White returned to Summerland Saturday night.

A special meeting of the Council was called for Saturday afternoon last and was held as scheduled.

Mr. Jas. Darke and family from Summerland accompanied by Mr. Jas. Ritchie, were visitors in town on Saturday and were guests for tea of Mr. and Mrs. L. D. McCall. Mr. Ritchie and Mr. Darke came up to see the old Watson house, with a view to tearing it down and moving lumber to Summerland, provided it does not sell at once. We understand it is necessary that it be sold at once or removed.

Property is again changing hands in the district. Mr. A. McKay has purchased Mrs. Mitchell's fruit lot on the flat and we understand is likely to work it and the Dr. Crompton lot this year. Mr. Jas. Michael has purchased the property adjoining his lot on the north, that formerly was owned by Mrs. Welch.

A party of young people gathered in town Saturday night, boarded Mr. R. A. F. Moore's truck and in a few minutes time landed at the home of Mr. and Mrs. George Keyes. It goes without saying that they spent an enjoyable evening together.

After a few weeks spent in the Summerland Hospital, recuperating after an operation, Mrs. James Moore returned on Monday morning.

Mr. Wm. Langer who has been spending a few weeks in town visiting his old friend, Mr. C. D. Drake, left on Monday to return to Halkirk, Alberta. During his sojourn here he spent a good portion of his time in the store and will be missed from that quarter, as he always managed to make himself useful whenever opportunity offered.

Mr. and Mrs. J. Thorn were passengers north on Monday last to spend a couple of days.

After a few weeks here visiting with his sister, Mrs. Selgried, and their mother, Mr. Chas. Rold left on Monday. Mr. Rold came at this time on account of the illness of his mother and we are pleased to report she is improving nicely.

Mrs. J. Winger returned on Monday from Enderby where she has been spending a week after having accompanied her daughter Essie to that city. Essie contemplates remaining there for a time.

Mr. John McDougald left on Monday night for Summerland where he expects to start operations on his property. It will be remembered that John had this property on the lake front before going overseas and we wish him all success in his operation of what should some day be a revenue producing home for himself and Mrs. McDougald.

Mr. and Mrs. Wray left by Monday night's boat for Naramata, where they expect to sojourn for a short time. Mr. Wray has been helping his brothers-in-law, Weston and Vernon with their wood business and logging.

The School Board met on Monday afternoon to attend to routine business. In addition they discussed the question of so many coughs and colds in the school and as a preventative measure they decided to close the school, with the exception of the High School room, for the balance of the week. It is hoped that by that time the colds will have subsided.

On Saturday night Miss Olive Hayes, Provincial Instructor of Household Science, arrived to be on hand for the lectures scheduled under the auspices of the Women's Institute. These were for Monday, Tuesday and Wednesday afternoons in the Masonic Hall. Monday's lecture was extremely interesting and instructive principally on nutrition. She emphasized strongly the food values of milk, butter, cheese, etc., surprising many of those present by pointing out to them the nutrition which is contained in separated milk. There was a fair attendance. It certainly would have been much larger had it not unfortunately happened that there had been a quilting scheduled for that afternoon which could not very well be postponed. The lectures are still in progress as these lines go for publication, but we will perhaps have further remarks in next issue.

Mr. and Mrs. George Keyes are enjoying a short visit from one of Mr. Keyes' nieces who arrived on Tuesday morning.

Mr. H. E. McCall left by Tuesday morning's boat for Vancouver, where he goes as a delegate from Peachland to the Prohibition Convention.

### BIG SHOWER IN PEACHLAND

Many friends of Miss Olive B. Gummow met at the home of Mrs. N. S. Elliott Thursday afternoon, February 26, and surprised her by leading her into a beautifully decorated room, bidding her be seated, when two tiny girl friends, Elinore Town and Muriel Dennis, drew in a wagon piled high with almost everything that goes to complete the furnishing of a kitchen. After the guest of honor had opened the many parcels she thanked the guests in a few well chosen words. A buffet supper was served.

Miss Gummow has lived here practically all her life. Her parents being the first orchard buyers and settlers on the benches in the Okanagan, coming here over twenty years ago. We understand Miss Gummow, whose marriage is to take place early in March, will be living here for a time at least.

### FLU AT OROVILLE

The Gazette has made an effort to secure the names of those suffering from the influenza so far as possible, but it is difficult to secure a full list owing to the rapid spread of the disease. People who are well one day are down and out the next. From appearances at the present writing it looks as though it will be easier in a short time to keep a record of those who are up and on their feet than to secure a correct list of those confined to their bed.—Oroville Gazette.

Watch For My Adv. Next Week! W. J. ROBINSON Real Estate and Insurance Summerland B.C.

## Orchard and Farm: Topics of Timely Interest and Helpfulness in the complex Business of Farming.

### PRUNING FRUIT TREES AND BUSHES

Fruit trees are pruned for the purpose of getting more fruit and better fruit than they would bear if left to themselves. Orchardists do not differ as to pruning, but they do as to training, that is to say, the forming of the young tree. But if they would remember the copybook motto of their youth, "Circumstances alter cases," they would grasp the fact that differences in method is the result of difference of conditions. Pruning also differs, as nearly everyone knows, with different kinds of fruit trees. The peach is pruned quite differently to the apple because the peach bears mainly upon the young wood, and therefore if fruit is wanted provision must be made for a constant supply of young growth. The same is true of black currants. These should be pruned not at this time of year, but immediately after fruiting, when they should be cut back severely. Then if the soil is rich and kept well cultivated so that it does not dry out, new growth will start at once and form fine branches for next year's fruiting. Red currants fruiting on old wood only need shortening and thinning, which is done now.

Cherry trees require wary treatment, else they will start gumming and may eventually bleed themselves to death. They should be properly shaped while young, the new wood only being cut, and any subsequent work should be done as far as possible in summer. Morellos being of a semi-wild nature, require little or no cutting after the right shape has been attained. It may be added also that these are much hardier than the sweet cherries and will often succeed where the others have proved a failure. Plums make vigorous growth when young, but when they begin to bear much less wood is formed. Leaders should be shortened back only moderately, for hard cutting only results in still more vigorous wood production instead of fruit, which is true of all trees. Then the thin, weaker growth may be shortened to three or four inches, forming spurs upon which fruit buds will develop. The general principle of the art is to maintain just as much wood and leafage as is necessary to mature as large a crop as possible.

Pruning for the purpose of shaping the young tree is too lengthy and detailed to be dealt with in the compass of one short article. To do it successfully experience is required, and a short time spent with a neighbor who knows the business is more illuminating than many treatises. It should be remembered, though, that methods differ according to climate; what is advisable in Eastern Canada does not necessarily apply here.

### DISCOVERED

People who have been wondering what became of Joseph C. Cook, who was associated with Scott in the notorious vote plugging episode in the last Provincial elections in Vancouver, will be surprised to learn that in June, 1918, he was given the job of cashier in a department at Victoria coming under the jurisdiction of Attorney-General Farris.—Ex.

FRIDAY, MARCH 5, 1920

B. C. APPLES IN THE EAST

At the recent convention of the Nova Scotia Fruit Growers' Association, it was stated that 15,000 boxes of British Columbia apples were handled at Halifax and 18,000 at St. John last year. British Columbia, it was admitted, was supplying the fancy trade of cities that are almost within sight of the Annapolis Valley, one of the finest fancy apple producing sections of the world.

Our British Columbia friends deserve every credit for their successful exploitation of the eastern market. They have the goods, they know how to pack, and, most important of all, they know how to advertise and sell them.

Summerland offers an excellent opportunity for a first class resident dentist. With a population of fully 3000 from which to draw his practice, all of whom are now dependent on visiting dentists or must go out to other centres, a good practice would be assured a first class dental surgeon in the very best climate in all Canada.

Something of the quality of the young manhood that is being reared in the country districts of this province is revealed in a recent debating contest at the U. B. C., when the students of the Agriculture department in the University "trimmed" all other classes.

Weather Report

Abstract from the Weather Records for February, 1920, kept at the Government Station, Balcombe Ranch, Summerland, B.C.

Table with columns for January, Max, Min, Sunshine hrs. min, Rain, Snow, Total. Rows for each day from 1 to 29, and averages for 1920 and 1910.

2nd Primer. — Edith Atkins, Jack Shields.

1st Reader. — Bryce McCutcheon, John Blewett.

Junior 2nd. — Jean Robinson, Joan Soul.

Senior 2nd. — Ethel Pilkington.

Regularity and Punctuality: Reginald Atkins, Jack Blewett, John Morrow, Bryce McCutcheon, Lily Pilkington, Jean Robinson, Frank Robinson.

FROM CITY TO FARM

(1) Gold Coin Potatoes grown from hand-selected tubers, and Marquis Wheat plot growing from hand-selected heads, on Rosehurst Farm, Cayley, Alberta. (2) J. W. Lucas, an Eastern Canadian city boy, now owner of this Western Farm. (3) Some of his Porkers. (4) Grade Percheron Horses, used by Mr. Lucas on his Rosehurst Farm.

We are continually hearing about the farm boy who goes to the city, but we hear little about the city boy who goes to the farm. Yet, just as many farm boys have become successful business men in our cities, so there are undoubtedly many city boys who have become successful farmers.

He is now the owner of eight hundred acres of land in a block and is interested, besides, in six and a half sections of land—4,160. On his farm he has produced as much as 139 bushels of oats to the acre and 66 bushels of wheat to the acre.

These are some of the things a city boy has been able to do on a farm. Not only has he become the owner of a large area of land but on this land he is producing crops of the highest quality and a maximum quantity.

Community Calendar of Coming Events

LAKESIDE CHURCH: Rev. Thos. Keyworth of Vernon will be the speaker at the evening service on Sunday, March 7th.

On Tuesday, March 9th, Rev. Thos. Keyworth will give an interesting lecture (illustrated) on the Panama Canal. Silver collection at the door.

Big Developments in Evangeline's Land

The new Dominion Atlantic Railway Passenger Station at Bridgetown.

Not only is the Canadian Pacific Railway making advances in accordance with the necessities of the times, and providing every modern improvement for the convenience and comfort of the public, but all its subsidiary lines are similarly progressive.

When on a trip of inspection over the Dominion Atlantic Railway, at the end of November last, Mr. Grant Hall, vice-president of the C. P. R., expressed the desire to have the D.A.R. equipped in the near future with steel rails much heavier than those at present laid.

The building is very conveniently designed. It has a cement basement. The outside finish is stucco on trussell lath, contoured with plain pobbled dash, with smooth finish above and below.

The "Abordoon" is splendidly situated, and will be made very attractive. It will be made very comfortable and will be made very attractive. It will be made very comfortable and will be made very attractive.

IT Costs You Nothing

To have Your Own Private or Business Stationery

Did you ever figure how much per hundred sheets the ordinary Writing Pad costs? — If not, just try it.

We can supply you with full-size Letter Paper with your Business or Ranch name and address on it for 65c. and 75c. per hundred in lots of 1000; and less in larger lots. Small extra charge if padded. Give us a trial order NOW.

The Review Job Printing Department.

Classified Advts.

Wanted

WANTED. - Clean cotton rags, free from lint, buttons, etc., and suitable for wiping machinery. Will pay 10 cents per lb. Review Office.

WANTED. - Bright young man with good school education to learn printing trade. Apply to Review Office.

WANTED. - To lease or purchase, moderate sized dwelling with modern improvements. Some land around preferred. Apply in first instance to Box 282, Review Office.

WANTED. - Man living nearby to make fires and do other janitor work in printing shop. Apply to Review Office.

For Sale

FOR SALE. - One baby buggy, English style, price \$30. Apply Box 321, Review.

FOR SALE. - One horse, work single or double. Phone 901. R. S. Monro.

FOR SALE. - About 1000 cuttings Boskoop Giant black currants. \$1 per 100. F. D. Cooper.

FOR SALE. - Good mixed farm in best part of Alberta. If interested see James Darke.

FOR SALE. - Large tent house with door and window, double floors etc. Apply Box 283, Review Office.

FOR SALE. - My 1444 acre ranch at the head of Garnett Valley. F. H. Heep, 437 So. Main St., Los Angeles.

Lost and Found

LOST. - Gold watch chain with horse shoe charm with horse inside of shoe. Finder please notify W. R. Shields.

FOUND. - On Shaughnessy Avenue, a pair of spectacles. Owner may obtain same at Review Office.

No Relief in Sight

Simp: How much did that second hand fivver set you back, old dear? Boob: (with a sigh) It hasn't finished yet. - Buffalo Express.

The high salaried office is kept busy trying to dodge the man.

Passing Events: Social, Personal, &c.

Carlyle Clay came in from Vancouver on Wednesday to remain for the summer.

Dr. and Mrs. Lipsett, who have been in California for several weeks, are said to be in Vancouver, and are expected home at any time.

Persons wishing to dispose of pieces of furniture or other goods can list same with A. McLachlan within the following two weeks. J. E. Phinney, Auctioneer.

Every mail is now bringing a flood of circulars and price lists from liquor firms in Alberta, and though some of these are of very questionable standing it is evident they are doing a roaring business.

P. S. Roe was arraigned in Provincial Police Court on Saturday on a charge of allowing his son, who is a minor, to drive his automobile. He was assessed \$5 and costs on two counts. - Penticton Herald.

Mr. S. F. Sharp received a cablegram early this week advising him that his sister, Miss Ella Sharp, had sailed from England for Summerland. Miss Sharp, who is a missionary to South Africa, was a visitor to Summerland some seven years ago when she was on furlough, and is again coming to spend part of another furlough here.

At the regular meeting of the W. A. of the G. W. V. A., Miss Kiel, who has identified herself with the W. A. since she arrived from Scotland, was the surprised recipient of a tea tray and address from the members. Thursday afternoon, February 26th, Miss Kiel was given a shower at the home of Mrs. Holder, when a pleasant afternoon was spent, all wishing the bride-to-be a long and happy married life.

Kelowna Honey Producers Form Organization

Third Division of British Columbia Honey Producers Association

Beekeepers of the Kelowna district have formed a division of the British Columbia Honey Producers Association.

A board of eleven directors was elected from the following districts, which will make up the "Kelowna District Division."

Kelowna, East Kelowna, Benvoulin, Ellison, Glenmore, Glenrosa, Okanagan Centre, Okanagan Mission, Oyama, Rutland and Westbank.

Officers elected are: President R. N. Brown, Vice-President H. B. D. Lysons, Sec.-Treas. P. T. Dunn all of Kelowna.

This is the third division to affiliate with the British Columbia Honey Producers Association, which organization was launched at New Westminster a month ago. A membership roll of close to 800 is now signed up and the directors have every reason to believe that it will reach 700 by the first of June this year.

Three other divisions are forming at the present time, that is, Kamloops, Duncan and one at the north end of Vancouver Island.

The Association has already adopted and had printed and sold 100,000 standard labels to their members. This will go a long way to making honey a popular foodstuff, as the label will be a guarantee of purity to the consumer.

See T. B. Young's ad. for sale of manure in this issue only.

Mrs. Kennedy of the High School staff left this morning for a visit to Calgary.

Beginning the first of March the schools opened and closed on the summer schedule, opening at 9 and closing at 3.30.

John McDougald of Peachland is in town arranging to make his home here. He will work his fruit orchard on the front bench north of Crescent Beach.

Please take notice that Central from this date will not be able to furnish information regarding C. P. R. boat service. Summerland Telephone Co., Ltd.

Mr. and Mrs. J. C. Wilson and young daughter, Stella, returned on Tuesday from an extended visit to Mr. and Mrs. Wilson's former home and neighborhood in the eastern townships of Quebec.

Mr. H. Slater, manager of the Kelowna Growers' Exchange, Mrs. Slater and child, returned on Friday from California, where they had been holidaying for several weeks. - Kelowna Courier.

Mr. and Mrs. A. C. Chalmers of Manitou, Man., were recent visitors to the Valley, having come here to attend the golden wedding of Mrs. Chalmers' parents, Mr. and Mrs. Jas. Findlay, of Kaleden. After spending a few days here with Mrs. Chalmers' sister, Mrs. Jas. Ritchie, they returned to their prairie home.

Miss Olive Miller was the guest of honor at a delightful afternoon affair given by Miss Bertha Johnston and Mrs. Harold Smith, at the Johnston home, Trout Creek Point. During the afternoon Miss Miller was given a miscellaneous shower, a novel feature of the presentation being the manner in which it was made. Master Leslie Smith and little Miss Harriet Joy, each about four years of age, were dressed as bride and groom and delivered the numerous presents to the bride-elect in a large basket.

Mail Order Catalogues Arrive by Tons

For several days this week the local Post Offices have been literally jammed with the catalogue of a well known mail order house. These huge books practically filled the letter boxes making it difficult to find room for letters and papers.

It would be interesting to know just how much each one of the many hundred catalogues coming into this district costs the distributors. It would certainly represent a pretty nice sum spent in Summerland for advertising.

Of even more interest to our readers is the fact that this same firm within the last two or three weeks offered to spend a sum of money with The Review for advertising, which had we accepted it, would have made the advertising space occupied by some of our local merchants look pretty small; and it was not because the publishers of this paper can very well afford to turn away any revenue that this business was refused. We realize fully that every dollar sent away to mail order houses retards a natural development of our community and for the present at least we will refuse to accept this class of advertising.

Mrs. J. Lawler has returned from an extended visit to Vancouver.

J. Morrow has bought the C. W. Haddrell cottage situated almost northwest of the Municipal Office.

All parties, excepting Orientals, wishing plants call A. McLachlan. Phone 971.

Mr. R. Purves has been appointed to the position on the municipal staff, applications for which were recently invited.

When wanting an auction consult J. E. Phinney, auctioneer, who conducts sales efficiently and economically. Box 189, Penticton.

Mr. and Mrs. C. W. Lees returned to Kelowna last week-end. Mr. Lees was expecting that schools would reopen there Monday but we are informed that they are still closed.

Fred Anderson has returned from California where he and his brother, George, have been spending a few weeks. George came back as far as Vancouver where he is staying for a time.

Following the decision of the School Board to close the schools for a time, Manager Darkis of the Rialto decided to cancel the regular performances at his theatre. There was no show on Thursday.

Instead of pack horses and saddle ponies Fred Brind will soon have a good sized drove of young horses of a different type. He has recently purchased a big, handsome pure bred Suffolk sire, imported into this province from the middle states by Mr. Thomas of Okanagan Falls.

Those who attended the lecture given by Miss Tarbell under the auspices of the Lyceum Committee in Empire Hall last night enjoyed a rare treat. Time will not permit giving a resume of the lecture in this issue but we will endeavor to give it a measure of the space in our next issue such an able lecture deserves.

A new organization has been formed to create a market in Montreal for the fur pelts of Canada and to prevent their unnatural export to foreign countries for marketing purposes. The organization is known as the Canadian Fur Auction Sales Company. Lord Shaughnessy and the directors of several Canadian banks are among the financially interested.

**SOME ELUCIDATIONS** There are certain words in our language which by laxity of use, have come to stand for things they do not properly mean. Thus the term "temperance" is commonly applied to total abstinence, which is really a very different matter. "Socialism" is used as a name for various forms of most unsocial doctrines — and "co-operation" serves as a title for some narrow theories which are entirely lacking in the real principles of that most comprehensive expression. If order is the first law of nature, co-operation is certainly the second since without it nothing could be achieved. In commercial matters, any two or more partners are obviously co-operating together, and the public they serve are also participating in their venture, insofar as they benefit by their service, and afford them their support. But today "co-operation" in most cases means the getting together of members of certain classes for the purpose of buying and selling in avowed opposition to that oldest co-operator of all, known as the retail merchant. In other words it is frequently misused to denote that "intensive growth of class selfishness" indicated in these notes two weeks ago, and foreshadowed in "Consumer's" previous prediction of a co-operative store for Summerland. To bracket this form of alleged co-operation with such a common-sense and practical amalgamation as a Fruit Growers' Union in a fruit growing district is merely playing with words, and no such inference can be legitimately drawn from anything in my article.

Now, as to the relations between wholesalers and retailers. The question as to "the prescriptive right of any man to come between the producer and the consumer" seems more than a little vague, and certainly has not been raised by me. It is one of those speculative queries which do not lead anywhere, and in this case it is quite wide of the subject. The average wholesaler is in business to supply goods in bulk to the retailer, who in his turn distributes same to his local public. It is not legitimate business for a wholesaler to accept retail orders at wholesale prices, (which was apparently the case in the instances cited by "Consumer") and any firm doing so is breaking the unwritten law which very properly exists between it and its merchant customers. That would be running with the hare and hunting with the hounds, and I am quite sure that a firm which made a practice of such a system would very soon lose its connection among retailers. As a matter of fact, the supposition is so unthinkable that I do not see how it can be seriously suggested.

**THE SUGAR SHORTAGE** I notice that some people in Vancouver have their doubts as to Canada getting all the sugar which is being refined, despite the Federal embargo on export of that necessary commodity. They express a very candid belief that some of it is still finding its way across the border, and are asking for an enquiry into the matter. The sugar refiners, for their part, welcome such enquiry, and meantime plead not guilty. Probably the suspicion arises from the fact that American demand is known to be responsible for shortage of paper, and also for the continued advance in lumber prices. We know that certain Winnipeg papers were forced to suspend publication by reason of Canadian needs being ignored in favor of American buying, and it is an open secret that recent "whirlwind buying" in the United States reacted very unfavorably on lumber buyers this side of the line: it may therefore be somewhat natural to find some speculation as to the influence of the American market in the sugar situation. The suspicion expressed may very well be quite unfounded, especially in the face of the official denial given: nevertheless the general public will not be unduly critical of those who raise the question. To fruit growers in particular the threatened lack of sugar later in the year is a possibility which calls for attention in good time, as it means a restricted demand for the very produce which has to be handled quickly.

It will be interesting to note the result of the proposed enquiry. —AUTOLYOUS.

### LAND REGISTRY ACT Re Lots 8 and 15, Block "H," District Lot 449, Osoyoos Division, Yale District

Whereas proof of loss of Certificate of Title No. 3370D issued to NORMAN SOMMERVILLE DAVIDSON and covering the above land has been filed in this Office:

NOTICE is hereby given that at the expiration of one month from the first publication hereof, I shall issue a duplicate of the said certificate of Title unless in the meantime valid objection thereto be made to me in writing.

**WM. RITCHIE.**

# Coal in British Columbia and Alberta

British Columbia's resources of coal are one-sixth of the Dominion's coal supply and represent 1,023 of the total estimated resource of the globe. The total tonnage of the deposits underlying British Columbia forests is 33,328 million tons, which is made up of 670 million tons of anthracite, 77,290 of bituminous, and 5,968 of lignite. The actual and probable reserves in the province are semi-anthracite 1.9 per cent; bituminous, 85.4 per cent; low carbon bituminous, 3.3 per cent; cannel, 2.4 per cent; lignite, 7.0 per cent.

At present there are three main districts where mining operations are being actively pursued. These are the Crow's Nest, Pass region, in the eastern part of the province; the Nicola Valley district in the central part; and the eastern side of Vancouver Island. Besides these, other coal basins are known and more or less prospected, but the lack of transport and communication have hampered any extensive development yet they constitute a reserve of great possibility.

The Crow's Nest coal field is the most important body of coal being mined in British Columbia, and includes an area of 230 square miles. The coal is high grade bituminous, occasionally running into anthracite, averaging 64 per cent fixed carbon. There are 22 workable seams with a total thickness of 216 feet, 100 feet of which is estimated as workable. In addition to this there are other coal bearing areas in southern British Columbia, notably at Princeton, where there is a field of 50 square miles, and at Nicola, where seams from 6 to 12 feet have been mined. The Nicola coal is sub-bituminous and analysis about 47 per cent fixed carbon, 39 per cent volatile, and 4 per cent moisture.

The total in Vancouver Island underlain by coal seams is about 600 square miles, and these coal fields contain some of the best steam coal on the Pacific coast. The coal of the Comox field is coking bituminous and contains 87.2 per cent fixed carbon, the highest carbon content of all the Vancouver Island coals.

The Nanaimo field has a productive area of 65 square miles, though the areas underlain by coal seams are larger than this. The coal fields of the Queen Charlotte Islands range from semi-anthracite to low carbon bituminous in their deposits, whilst lignite is also found.

In Central British Columbia lignite is found at Alexandria, Quosnel, and Prince George on the Fraser, on the Nazco river, Nechako river, Doan river, and Lightning creek. Three rich bearing seams exist on the Morice river, and three on Goat river.

In the Northern part of the province the most important coals thus discovered are the semi-anthracite and the anthracite of the Groundhog Mountain area. Here, an area of 170 square miles is assumed to be coal-bearing, and contains eight seams with an aggregate thickness of 50 feet.

The location of the British Columbia coal fields has a great bearing on their importance. One of the most productive mines of the Dominion is situated on the seaboard of the Pacific coast, which is of the greatest importance from an industrial and im-

(1) At the Coal Mines, Lethbridge, Alta.  
(2) Coal Mine Building, Fernie, B.C.  
(3) Coal Mine Loading Shed, Fernie, B.C.

perial standpoint. The mine has a considerable submarine extension, and is fortunate in possessing a fine natural harbor. Another fine field, also, is admirably located in the proximity of the metal mining industry and within easy reach of the copper and lead smelting centres of both the southern part of the Province and the adjoining states to the south.

With the United States leading in her possession of a trifle more than one half of the world's coal deposits, Canada ranks easily second with nearly one-fifth of the globe's total supply of this mineral. Nearly ninety per cent of Canada's coal supply lies within the confines of the province of Alberta, or about one-seventh of the resources of the world. In tonnage the enormous deposits of the prairie provinces total 1,182,571 million tons, which may be subdivided into 1,132 million tons of anthracite, 217,593 million tons of bituminous, and 963,798 million tons of lignite. This may be compared with the world's total reserve of 7,397,553 metric tons, or the United States of 4,231,352 million tons.

Alberta possesses by far the most extensive coal area of Canada. The greater part of the southeastern part of the province appears to be underlain with coal, and the miserable coal areas of the province have been estimated at not less than 20,000 square miles.

The coal horizons of Alberta are: (1) Edmonton and Pasakapoc formation; (2) Belly River formation; (3) Kootenay formation. The Edmonton formation forms a wide trough ap-

proximately parallel to the Rockies and extending from the international boundary to about latitude 55°. It is estimated that in these beds there are 789,800 million tons of lignite or sub-bituminous coal, and 11,258 million tons of low-carbon bituminous. The Belly River formation occupies a considerable area in the southwestern part of the province, the most important seam being in the vicinity of Lethbridge. The probable reserves in this area are lignite, 23 per cent; lignitic or sub-bituminous, 10%; per cent low-carbon bituminous 60% per cent.

The Kootenay formation is exposed in and near the Rocky Mountains and is estimated as 1.7 per cent semi-anthracite, and 98.3 per cent high carbon bituminous or bituminous.

The production of the anthracite field, of which Banff is the centre, for the year 1917, was 108,225 tons which represents 2.3 per cent of the province's total output. The total amount of bituminous coal produced from Alberta mines was 2,199,308 tons or 46.4 per cent of output. The lignite production formed more than one half of the province's coal production with 2,428,838 tons or 51.3 per cent.

It has been estimated that the Alberta deposits of coal could supply the whole world's needs at its present rate of consumption for nearly a thousand years.

As seen from these figures the coal resources of the Province of Alberta are barely being tapped, whilst Canada is yearly importing more coal from the United States than her own mines are producing.

## CANADIAN MILLING INDUSTRY

The Canadian milling industry has, since 1914, made progressive strides and flour exports between that year and 1919 increased nearly five times. Today this business has an annual capacity of slightly more than 35,000,000 barrels a year and new mills are being continually added. In 1919 Canada exported 115,099 barrels of flour valued at \$521,333. By 1919 this had increased to 3,064,128 barrels valued at about \$15,000,000. In the fiscal year of 1919, 9,196,806 barrels were milled at a value of \$99,836,696.

Great Britain has been by far, Canada's best customer for flour, her imports from the Dominion of this commodity, for the last fiscal year, being equal to about 60 per cent of the total, or \$56,000,000 out of nearly \$100,000,000.

Exports by countries for the last year were as follows:—Great Britain \$56,270,225; United States \$99,794; British South Africa \$17,309; Newfoundland \$34,147,527; British West Indies \$6,323,527; Other countries \$34,147,500.

The Trade returns for the present fiscal year show that, as yet, the exports of flour are holding their own, though the European countries are again engaged in grain growing and milling. In the last available period of five months, 4,928,164 barrels of flour were exported, as compared with 4,461,313 in the same period in 1918. Of these 3,912,405 barrels went to the United Kingdom; 38,423 to British Guiana; 146,596 to the British West Indies, 297,846 to France; 100,182 to Greece; 55,735 to Italy; 73,109 to Newfoundland; and 228,084 barrels to other countries. Great Britain took a little more than 1,000,000 more barrels than she did during the same period in 1918, and 1,700,000 more than in 1917. Other departments of the milling industry loom large also, as the following figures show: oatmeal \$4,032,567; cereals \$4,247,249; bran, etc., \$1,592,212.

Whilst on account of the change of conditions in Europe, the export trade may fall off considerably, the Canadian milling industry by reason of the activity produced during the war, is in a very strong position and should be able to hold its own in the period of competition which is undoubtedly ahead.

Anyway, there is no room for trouble in an air castle.

## Synopsis of Land Act Amendments

Minimum price of first-class land reduced to \$5 an acre; second-class to \$2.50 an acre.

Pre-emption now confined to surveyed lands only.

Records will be granted covering only lands suitable for agricultural purposes and which is non-timber land.

Partnership pre-emption abolished, but parties of not more than four may arrange for adjacent pre-emptions with joint residence, but each making necessary improvements on respective claims.

Pre-emptors must occupy claims for five years and make improvements to value of \$10 per acre, including clearing and cultivation of at least one acre, before receiving Crown Grant.

Where pre-emptor in occupation not less than 3 years, and has made proportionate improvements, he may, because of ill-health, or other cause, be granted intermediate certificate of improvement and transfer his claim.

Records without permanent residence may be issued, provided applicant makes improvements to extent of \$100 per annum and records same each year. Failure to make improvements or record same will operate as forfeiture. Title cannot be obtained in less than 5 years, and improvements of \$100 per acre, including 5 acres cleared and cultivated, and residence of at least 3 years are required.

Pre-emptor holding Crown grant may record another pre-emption, if he requires land in conjunction with his farm, without actual occupation, provided statutory improvements made and residence maintained on Crown granted land.

Unsurveyed areas, not exceeding 20 acres, may be leased as homesteads; title may be obtained after fulfilling residential and other conditions.

For grazing and industrial purposes areas exceeding 400 acres may be leased by one person or company. Mill, factory or industrial sites on timber land not exceeding 100 acres may be purchased; conditions include payment of stumpage.

Natural hay meadows inaccessible by existing roads may be purchased conditional upon construction of a road to them. Rebate of one-half of cost of road, in made on exceeding half of purchase price, is made on application.

## PRE-EMPTORS' FREE GRANTS ACT

The scope of this Act is enlarged to include all persons joining and agreeing with His Majesty's Forces. The time within which the heirs or devisees of a deceased pre-emptor may apply for title under this Act is extended from one year from the death of such person, as formerly, until one year after the conclusion of the present war. This privilege is also made retroactive.

No fees relating to pre-emptions are due or payable by soldiers on pre-emptions recorded after June 30, 1919. Taxes are remitted for five years. Provision for return of moneys acquired due and been paid since August 4, 1914, on account of payments, less or taxes on soldiers' pre-emptions. Interest on agreements to purchase town or city lots held by members of Allied Forces, or dependants, acquired direct or indirect, remitted from enlistment to March 31, 1919.

## SUB-PURCHASERS OF CROWN LANDS

Provision made for issuance of Crown grants to sub-purchasers of Crown lands, following failure of purchasers who failed to complete purchase, involving forfeiture, on fulfilment of conditions of purchase, interest on moneys advanced by sub-purchasers do not claim whole of original purchase price due and taxes may be distributed proportionately over whole, applications must be made by May 1, 1919.

## GRAZING

Grazing Act 1919, for systematic development of livestock industry provides for grazing districts and range administration under Commission. Annual grazing permits issued based on numbers range; prices for established owners. Stock-owners may form Associations for range management and for partially free, permits for cattle, horses or travellers, up to ten head.

Safety all the Time. Our Passengers are fully insured against accident.

### Board of Health Gives Advice Regarding Flu

With flu so prevalent in many parts of the province and even in some of the Okanagan centres, it is advisable that every person take all necessary precautions against catching the malady. The instructions issued by the Provincial Board of Health published here are for the public guidance.

People are very much given to underrating the effect of this disease and to regard it more as a common cold. Remember, first, that it is very infectious, and you owe it to yourself and to your neighbors to do everything to avoid catching it; and secondly, if you do catch it, that your duty to your neighbors is to prevent them from catching it from you. It begins as a common cold, headache, pains in muscles, chills, feeling of cold in the head, soreness of throat, fever.

The germ of the disease is transmitted by droplets of spray from loud talking, coughing and sneezing; also through drinking and eating out of utensils improperly cleansed; by direct contact. The mild cases are as dangerous for spreading as severe ones. More even, because a man with a mild case comes in contact with a greater number of people. The carrier plays a larger part in the spreading of the disease than is realized, therefore — avoid crowds. There is no vaccine against influenza. There is, however, a vaccine against its complications which is of value.

If attacked by the disease, keep warm, send for the doctor, and keep the other members of the family out of the room. If the children complain, keep them at home, and remember, if care is not taken, that the after effects of the disease are the cause of the deaths. Isolation of the patient will prevent the spread of the disease.

The following are a few general rules:

1. — Avoid needless crowding; influenza is a crowd disease.
2. — Smother your coughs and sneezes; others do not want the germs which you would throw away.
3. — Your nose, not your mouth, was made to breathe through; get the habit.
4. — Remember the three C's: "A clean mouth, clean skin, and clean clothes."
5. — Open the windows, always at home, at flight; at the office when practicable.
6. — Your fate may be in your own hands; wash your hands before eating.
7. — Don't use a napkin, towel, spoon, fork, glass or cup which has been used by another person and not washed.

### MANURE.

We have still about a hundred and fifty tons for spring delivery. Fall terms may be arranged for by responsible parties. Contract your orders now.

### The Day of Automobiles

The wonderful development of the automobile business in Canada, and the enormous increase in the use of this comparatively modern mode of locomotion and traffic since the days immediately preceding the war, are illustrated by the number of registrations made in the different provinces of the Dominion each year from 1913 to date. In the entire Dominion only 50,498 cars were registered in 1913, of which total Ontario contributed 23,700. The sister province increased this number in 1918 to 109,374, and estimates at least 140,000 for 1919. The total number registered in all Canada in 1918 was 269,727, while the estimated total for 1919 was 352,700. The province of Quebec had only 5,452 automobiles in 1913 but had increased the number last year to 28,338, and the estimated registrations for the current year is 40,000. It is noticeable that since 1912 the number of cars in use has approximately doubled every two years.

In the United States the greatest increase in the use of motor cars has been in the agricultural districts. The farmer has found the motor so helpful that it is now as much a necessity as other modern farm implements. In many parts of Canada, the experience is similar, the records of motor vehicle registration showing the largest increase in the use of cars to be in the agricultural districts while the same fact, within the last few years, has been increasingly true of the province of Quebec. —Quebec Telegraph.

Last week a Government motion picture man visited Vasseau Lake for the purpose of taking motion pictures of the big swans that make that beautiful sheet of water their home. These are said to be the only swans of that kind in Canada.

Numerous stories have been told respecting the powers of endurance of the ordinary toad. Many people have been incredulous of the truth of such statements but an authentic instance of this character occurred recently in the Nova Scotia fruit belt. A barrel of run-of-trees apples was opened last week at the Nictaux fruit warehouse which had been headed up on the first day of October, 1919. A toad tumbled out along with the apples and hopped about briskly, apparently none the worse for a confinement of four months. —Exchange.

### BASKETBALL

The league basketball game played here last Friday night was a much more interesting game to witness than the score would indicate. It was the third of the Valley League games in which the Summerland team participated, their opponents being the Penticton Basketball team. From the start the Summerland boys had the better of the game and at the end of the first half the score stood at 10-0 in favor of Summerland. McDonald of Penticton was referee. In the second half of the game Penticton played to better advantage but luck was apparently against them and although they had nearly as many shots as our boys they failed to take advantage of them, and only scored one field basket while our boys didn't waste a shot and collected six more field baskets in this half.

On the whole the game was clean and fast and the checking not so hard as usual.

The final score was 23-3 in favor of the local team. The Summerland team was made up as follows: Snider and Peck, guards; Angove, centre; Brown and Reid, forwards. W. Angove was the chief scorer, netting 5 field baskets and 1 foul; Ralph Brown 4 baskets and Roland Reid 2 baskets.

### LEAGUE STANDING.

### PENTICTON'S LIGHT AND POWER RATES

The electric light rate in Penticton Municipality from May 1 will be 15 cents per kilowatt hour, with 10 per cent. discount for prompt payment. The discount rate was formerly twenty per cent., and the reduction in the allowance makes the net charge 13 1/2 cents per k. w. hour as against 12 cents last year. Above 50 k. w. hours, the rate is ten cents, less 10 per cent. discount. For power, heating and cooking, the rate for the first 100 k. w. hours is five cents, less 10 per cent. discount; over 100 k. w. hours, four cents, less ten per cent. The minimum rate for power service per month is \$3.00, less discount.

### Theosophical Study Class

### BIG GAINS ON ALFALFA HAY

Ninety head of fat cattle were shipped last week by the Land and Agricultural Co. of Canada, from their ranch near Vernon to Vancouver. They were grade Shorthorn and Hereford averaging 1380 lbs. in weight, the total shipment being nearly \$14,000. The Vernon News cites this as an evidence of the advantage afforded by the mild climate of the Okanagan for wintering of stock. The feed consisted entirely of alfalfa hay fed in large open racks in the open, the cattle being sheltered only by brush. From the time they were brought in from the range at the end of November the stock made an average gain of 200 lbs. per head.

The man who calls a spade a spade at all times has more enemies than friends.

## K. V. Railway Will Extend to Boundary

### Rail and Lake Service to New Territory at an Early Date

The K. V. R. will start construction at an early date of a branch line south to Osoyoos. A spur will be run to the head of Dog Lake, on which a tug and barge service will be established to connect with a line extending down the river to the new territory being opened for settlement.

The Company has been granted by the provincial government a charter for the construction of a branch line south from Penticton along the east side of Dog Lake, south to Osoyoos Lake, and thence to the International boundary. It is understood that the construction of the road along the lake will be left until the other portions are completed, barges being used in the meantime.

The Board of Railway Commissioners, it is stated, has already approved of a route map of the projected branch line.

These developments so significant to the future development of the southern interior of the province are coincident with the visit of Mr. J. J. Warren, general manager of the Kettle Valley Line, to Victoria, where he waited upon the government and was promised the charter.

### Opens Up Fairview District

The proposed new line will open up a wide and rich expanse of country, including the Fairview district. The Great Northern Railway also passes through the valley, farther south at Oroville, Wash. and it is said has been looking to the new B. C. field with a view to extensions.

The anxiety of the provincial government to have a Canadian line through the tract can be easily understood, as the government is spending large sums in draining and irrigating the country, with a view to opening it up as a returned soldiers' settlement.

Victoria, March 10. — Speaking of the proposed branch of the K. V. R. to the lower Okanagan the Premier said last evening:

"The agreement has been signed, a bill has been drafted and is now in the hands of the printers and will be brought before the legislature within a few days."

Under the agreement entered into between the government and the railway company, the latter undertakes to commence work at once. It further undertakes within three months to have a line of railway from Penticton to the government nursery plantation a distance of 25 miles.

There are numerous ranches scattered throughout the valley at present, which will thus secure this summer the advantages of railway connection. The new road will be used to bring in the heavy equipment needed this season for constructing irrigation ditches.

The road at first will extend from South Penticton to the head of Dog Lake. A ferry service will be instituted down the lake by the railway company, and the line will then resume its course southwards to the settlement. By the time the volume of traffic warrants, and at a no longer distant date than 10 years from the passage of the bill, the railway company is obligated to construct a line of railway round the shore of Dog Lake, giving continuous rail connection down the valley.

### DID GOOD BUSINESS

As a result of the recent sales campaign put on by the O. U. G. quite a number of power sprayers have been brought into the district. Mr. C. W. Little, who is attending to this business here states: "We have placed a number of machines in Summerland and feel pleased at the live interest now taken in spraying at Summerland, which is necessary to keep up the good reputation of Summerland fruit."

Vancouver will soon boast the largest telescope in the world, with a lens ten feet in diameter, just half a foot larger than the famous telescope at Leipzig.

## Storage Company Elects Directors

### Shares Carry Guarantee of Dividends. Investment is Insurance for Growers

Shareholders in the Summerland Storage Co., Ltd., appointed their regular board of directors at a meeting held in Campbell Hall last Friday evening. The directors are: Messrs. Hayes, Halmer, Hutton, Simpson, G. Thornber, S. M. Young, and Zimmerman.

At a later meeting of the directors the following officers were elected: President W. H. Hayes, Vice-President E. E. Hutton, Sec. Treas. T. G. Beavis, Secretary to Board G. Thornber. Mr. Hayes occupied the chair at the Friday evening meeting and spoke briefly on events and developments which had brought the question of storage to a focus.

Major Hutton and Mr. Simpson both made forcible addresses endorsing the movement and giving their approval to the undertaking as an excellent business investment. Major Hutton looked upon the shares in the new company as a splendid investment and stated that all fruit growers should take an interest in the company.

Mr. Simpson described the new Storage Co. as a doubly profitable investment for the fruit growers. Not only were they guaranteed 8 per cent. dividends on the capital invested, but the erection of a storage plant here would also insure the crop of the fruit growers against loss by frost and put them in a position to take advantage of rising markets.

## Water Agreements May Be Killed by By-Law

### Such is Ruling of Authorities at Capital

Ample authority is given the Municipality under the Municipal Act and the Water Act to charge whatever water rate is necessary irrespective of any existing agreements. Such, in substance, is the ruling of the authorities at Victoria.

In only two districts in the province are the irrigation systems municipally owned and operated, these being Summerland and Penticton. In the latter district a proposal to increase the rates to \$10 per acre met with some opposition from certain land owners who cited their water agreements in support of their claims that their irrigation rate could not be increased. The decision reached by the council of the municipality was to apply to have the system put under the control of the Public Utilities Commission which would have the effect of nullifying all contracts.

The Commission would have the authority to charge whatever rate it deemed equitable. As exactly similar conditions prevail in the Municipality of Summerland the result of the course taken by the neighboring municipality will be of importance, and interest here.

The answer given by the authorities at Victoria virtually turned down the request to have the Penticton irrigation system placed under the Public Utilities Commission but stated that there is ample authority under the Municipal Act and the Water Act for the Municipality by a by-law to raise the irrigation rate, irrespective of any existing agreements.

The Penticton Council sent a deputation to Victoria to go more fully into the question with the government.

An amendment to the contract for the ferry service between Summerland and Naramata has been agreed upon between the Department of Public Works and the Okanagan Lake Boat Co., which company is operating the ferry. Under the new contract there will be at least three round trips per day between the two points. A single trip will cost 10c, and the company will sell fifteen single trip tickets for \$1.00. This improved service together with reduced charges will naturally bring the water towns even closer together and will be of great convenience to the people of Naramata in putting them in closer connection with the business houses of Summerland.

## 1920 IRRIGATION RATES ARE FIXED BY MUNICIPAL COUNCIL

### Increase on Ten Acre Lot Will Be Two Dollars per Acre.

### Tax Rate is Forty-Five Mills

### Increase in General and Domestic Water Rates. Light Rate Before Utilities Commissioners

Summerland's tax rate for 1920 is 45 mills. This rate was definitely fixed by the Municipal Council on Monday.

On the Saturday before there was a special Council session when the tax rate and the rates for irrigation and domestic water were fixed and the necessary bylaws given preliminary readings. These bylaws were finally approved at the regular session on Monday.

The municipal tax rate is made up of three items, one for general municipal expense, another for school purposes and a third to provide for the municipal debt. The rates for municipal purposes is 13 mills as compared with 12 mills for 1919. The school rate is 17 mills as against 9 mills last year, and debenture rate 15 mills, an increase of 3 mills over 1919.

Taxes are due and payable on or before September 30th. On October 1st a penalty of 10 per cent. is added to unpaid current taxes and if any of the current year's taxes still remain unpaid on November 15th an additional penalty of 5 per cent. is added.

By motion the Council exempted all improvements from taxation, so that the above tax rate applies against land values only.

A general increase was made in the irrigation rate so that all lots with an irrigable area of seven acres or more will be charged at the rate of \$5 per acre for water. On smaller lots the rate per acre increases down to 1 acre. Under the new rate a one acre lot will pay \$10, two acres, \$14.50, three acres \$21, four acres \$24, five acres \$27.50, six acres \$32.00. Last year the one acre lot paid \$6, and the schedule was graded until seven acres was reached when \$8 per acre was charged.

All property on the pipe system pays a general water rate or frontage tax. Formerly this was graded from \$2 for a single town lot to \$12 for a group of eight town lots. Each item on this schedule has been raised \$1 so that one lot will now pay \$3, but is not charged an irrigation rate.

## Demonstrations in Domestic Science Here

Miss Olive Hayes, Provincial Instructor of Household Science, gave a series of lectures to the members of the Summerland and West Summerland Women's Institutes, on Thursday and Friday afternoons, the 4th and 5th of March. The meetings were held in St. Stephen's Hall and those who attended received some valuable information and very useful hints.

The first lecture was "Newer Nutrition and the Relation of Food to Health," taking up the "protective" and "deficient" foods. This was followed by "Food for the Growing Child," the importance of milk was strongly emphasized, it being a "protective" food, because it makes up deficiencies in other foods.

Friday afternoon was a lecture demonstration on dry cleaning, touching on laundry work, bleaching and setting of colors. With her audience living in a dusty country the dry cleaning made a decided hit. To demonstrate, white lddi gloves were soaked in hot gasoline, the dirt removed with a dry cloth, then rinsed (in warm gasoline) dried and with the application of French chalk, looked like new. Hot corn meal was used for white furs and coarse salt for light felt hats. There were other methods also and it was all very interesting. When the lecture came to an end everyone felt she had learned something new.

Miss Hayes stayed over the week-end in Summerland, leaving for Naramata on Monday morning, where she would give her course of instruction.

Heating of gasoline for cleaning purposes as noted above cannot be done on the kitchen stove without impoiling lives and property. Gasoline boils at a low temperature and, as demonstrated by Miss Hayes, can be heated by setting a vessel containing the gasoline in a larger one holding boiling water. Even this must be done in a room cut off from any fire.

## Offers to Furnish Hospital Wards

### First Steps Taken By Board Toward Rebuilding Much Needed Institution

At the regular monthly meeting of the Summerland Hospital Board this week a committee was appointed to take the first steps towards rebuilding the hospital. The committee was instructed to investigate plans together with costs, consult architects and to learn what they could from institutions of similar size in other centres.

The resignation of the matron in charge of the temporary hospital was accepted with regrets and the secretary was instructed to correspond with applicants for the position.

Tenders for the contract of supplying firewood were received but all the prices were considered too high. A new kitchen range, one that will be suitable for the new hospital has been installed in the Felix Hotel building.

Several orders or organizations have written the Hospital Board inquiring of the cost of furnishing a ward in the new building and asking if permission will be given to furnish such wards. Among these inquiries was the G. W. V. A. of Naramata. These offers were greatly appreciated by the Board and a committee appointed to inquire into the costs with a view to affecting uniformity.

On March 1st the hospital charges were advanced 50c per day.

## Opposes Ballot For Japanese War Veterans

### Member for South Okanagan Speaks at Vancouver

Mr. J. W. Jones, M.P.A. for South Okanagan spoke last Friday night before a conservative audience in Vancouver.

Mr. Jones during his speech strongly condemned a bill which was being introduced to enfranchise the Japanese who had served in the Canadian army, stating that the Opposition would fight this measure to the last ditch. Mr. Jones said that the people of the interior realized the danger of the Oriental. Farms were being bought up all through British Columbia by Japanese and Chinese, their policy being to gradually squeeze out the white settlers. The granting of the franchise to the Japanese returned soldiers would mean renewed pressure by all Japanese upon the Government for the vote.

Mr. Jones' speech was largely one of criticism of the Government, particular reference being made to the government's land settlement policy and of the cost of maintaining the Land Settlement Board, giving attention to the various areas selected for settlement with special reference to the Christian ranch near Kelowna. The Board had bought this 440 acres of good land from a supporter for \$39,000, who it turned out simply hold it under an option for \$24,000, thus giving this stalwart a chance to make a rake off of \$6,000. After getting it they discovered that there was no water available to irrigate it, without which it was entirely valueless. Notwithstanding they had gone ahead clearing it at a further expense of \$27,000, making the total cost \$60,000 for a white elephant.

Another statement by Mr. Jones was that the Government had refused applications for grants for hospitals and schools on the ground that it had no money to spare. But, he continued, it had raised the list of civil service salaries from \$1,540,000 to \$2,500,000. He advised "cutting down the staffs and giving adequate pay to those retained."

Mr. Jones also stated that the Government had refused applications for grants for hospitals and schools on the ground that it had no money to spare. But, he continued, it had raised the list of civil service salaries from \$1,540,000 to \$2,500,000. He advised "cutting down the staffs and giving adequate pay to those retained."

## CHRISTIANS AND AMERICANS

A Washington press dispatch, giving the population of the Philippines as 10,350,340, stated that of that number 9,428,857 are Christians, 6,450 being Americans.

Canada produced 55 per cent. of all the shrapnel, 42 per cent. of all the 4.5's and 27 per cent. of all the 6-inch shells used by the British army.

## Council Has Day of Routine Business

### Prospective Settlers Looking For Employment Here in Okanagan

Considerable routine business was disposed of at the regular meeting of the Summerland Municipal Council on Monday. Before the meeting adjourned the Water Committee was instructed to prepare at once for the starting of work on the irrigation system. The report submitted by the engineer covering the work to be done on the various sections of the system was referred to the committee.

Several citizens waited on the Council with various requests. Mr. C. A. Walter, on behalf of Mr. Thos. Cowan, who recently purchased the Hogg cottage north of Peach Orchard, asked for irrigation connection, and was promised early attention to the application.

E. H. Bennett and S. G. Davies, recent purchasers of property in the Paradise Flat district applied for domestic water. The applications were referred to foreman Dickson for particulars.

Early attention was promised to the request of Mr. Arthur Gould that a flume along the north side of his lot in Prairie Valley be replaced by a new one.

Mr. C. A. Walter's offer of \$10 for some old flume near his property was accepted.

Several applications were received for electric light connections, none of which could be granted at the present time.

The Treasurer reported that the cash and other effects of A. Parlee, a laborer who died while in the employ of the Municipality had been turned over to Mr. W. C. Kelley, official administrator for South Okanagan.

The Soldier Settlement Board wrote respecting a Commission in the Old Country which is selecting men suitable for settlement on the land. These men after coming to this country must have at least one year's experience in farming before being allowed to take up land. The Board asked for the names of all farmers in this district who require such help. The clerk stated that he had given the Farmers' Institute a copy of this letter.

Complaint was received from Mr. E. F. Sanborn that seepage from a ditch was doing damage to his property and to the road and his request that the ditch be lined was referred to the Water Committee. Mr. Sanborn also asked the Council to consider a deviation in a road between two of his lots. This was referred to the Roads Committee.

The Clerk reported a recent communication from H. A. Glennie, former owner of a lot in Garpet Valley sold for taxes in 1918 in which the writer stated that he had been informed that he had only thirty days in which to redeem his lot. The Clerk was instructed to write Mr. Glennie giving him the facts respecting his property.

The Clerk was instructed to have the deeds for some lots adjacent to and to be included in the cemetery prepared to be signed by Mr. Wilcox, vendor. These lots were purchased some time ago.

Upon suggestion from the City of Kamloops the Council passed a resolution urging upon the provincial government immediate action in the building of a highway connecting the interior with the Coast.

Representing the Development Co., Mr. J. L. Logie presented a bill for

(Continued on Page 6)

## SUMMERLAND WEATHER REPORT

Below is a report furnished by the Dominion Experimental Station here for the week ending Tuesday:

Date, 1920	Max.	Min.	Rain	Evap.	Wind

# The Summerland Review

PUBLISHED BY THE REVIEW PRINTING & PUBLISHING COMPANY LIMITED.  
RALPH E. WHITE, MANAGING DIRECTOR  
SUBSCRIPTION RATES: \$2.00 PER YEAR, IN ADVANCE. SIX MONTHS \$1.00.

FRIDAY, MARCH 12, 1920

Ten dollars from each and every man between the ages of 21 and 60 who is not already paying at least that amount to the Municipality in taxes would be a most welcome additional source of revenue for municipal funds. Such a poll tax is being considered at Victoria. It may be that females with regular incomes will also be taxed according to their yearly income. It has been suggested that this tax be earmarked for school purposes. This would place some of the burden on citizens now wholly escaping taxation and would effect some measure of relief to the limited number of land owners who only are taxed.

Just when the public were beginning to feel that they would henceforth be able to obtain a reasonable supply of sugar wholesale jobbers announce that their allotment of sugar for March will be just one half that of February. This means there will a smaller supply of sugar for distribution this month than in January. It is said that plenty of raws have been contracted for but the difficulty is in securing ocean tonnage. Looks as if the Government sugar investigation is justified.

An Act to provide for the "Incorporation of Village Municipalities," introduced into the House at Victoria by the Attorney-General will, when passed, make it possible for the inhabitants of any area in which the number of residents does not exceed 750 to become incorporated as a village.

Approximately \$3,000,000 of British Columbia money was sent outside last year for butter, cream and milk. This is exclusive of cheese brought here in large quantities from Eastern Canada, proving absolutely that there is yet a wide field for dairying in this province.

Months ago Uncle Sam went back to the penny postage. Since last July a two cent stamp has sufficed across the line for a letter. The report of the Canadian Postmaster-General shows a net profit for the fiscal year ending early in 1919 of nearly two and one-half million dollars. Is it not about time for Canada to do away with its three cent letter rate?

## .. The Winding Trail ..

**A PASSING** The very interesting letter of Mabel Kenison **DISSONANCE** Walters concerning American music is an example of the value of journalistic suggestion as a means of bringing out expressions of opinion from readers who would otherwise not be heard from. Nothing is more interesting to the reading public than to note the views of their neighbors and friends on matters of general concern, and no one will welcome legitimate comment on these notes more than the writer thereof.

In going over my remarks on school music, and comparing them with the criticism of your correspondent, I find considerably less divergence of opinion than may appear on the surface. My two chief points were, first, that "the national standing of America in the world of music was as yet very low," and second, that the Canadian market is being flooded with music of the fox-trot-ragtime-jazz variety, all coming from America. Your correspondent agrees that "there are very few recognized American composers," and also that "there is no American School of music, meaning American method." These two admissions give my contention a great deal of support, the plain fact being that American music is still in the making, as is the nation itself. I further suggested that American methods were not being improved by their latest developments. My critic says "For Heaven's sake do not call the present day hysterical din American music," but the point is that it is just this "hysterical din" which we are getting the most of, and that it is an American native production. No doubt it is for "the dancing population of this continent" that this stuff is mainly written (although the matter of their "preferring" it is open to question) but it is a significant fact that "jazz" music is finding its way into American places of worship, one minister (in Denver) having recently installed a jazz orchestra in his church to give what he calls "pop" to his services. From the church to the school is an easy step, and I may say here that I have personal knowledge of a Canadian school in another province where I found the young idea being drilled in a grade of music only one degree better than ragtime. Hence my remarks.

As to the schools of instruction in America, it will be permissible for me to state that, being no stranger to the United States, I was neither ignorant nor misinformed as to their existence. And as a frequent purchaser of music through Canadian firms, I naturally know something of American publishers. Such terms as "using unmerited disparagement and false insinuations" are entirely without meaning as far as I am concerned, since I may certainly condemn a class of productions which my critic herself classes as "Hebrew jazz concoctions," without offering any offence to the country which suffers from them. I am not sure but what this slighting reference to "Hebrew concoctions" is far more calculated to offend than any words of mine. Certainly it seems very wide of the mark when we consider that from the time of "the Sweet Singer of Israel" to the day of Felix Mendelssohn Bartholdy, and beyond, the Hebrew element has contributed its full share to the music of the world. However, that is another matter.

In a previous sentence I suggested that it was an open question whether jazz music was really preferred, or whether it was just accepted. Here is an instance which bears on the subject. Some years, one Arthur Farwell, whose name is men-

tioned among American composers, was appointed as Superintendent of Public Music in New York, and found on assuming control, that the bands playing in public places were giving the people little else but "clap-trap" on the theory that "the masses" did not like good music and never could be made to like it. Mr. Farwell disagreed with this theory, and set up one directly opposed to it, claiming, in effect, that the people liked best what they knew best. Acting on this theory, he gave them good music, and they soon began to like it. This account was published in the "Canadian Courier" at the time, and was commented on by the present writer in a series of musical notes then being contributed to another journal. The result of Mr. Farwell's experiment, as far as it had then gone, seemed, and still seems to me to weaken the too common assumption that public preference produces music of doubtful merit, and to support the claim that the public taste is moulded largely by what it is offered. Which brings us straightway back to the original proposition of guarding the young idea from music of inferior grade. —AUTOLYCUS.

## Community Calendar of Coming Events

Advance notices under this heading will be charged for at two cents a word. Minimum charge 25c. first insertion. Each repeat one cent a word. Minimum 10 cents.

The Rev. W. T. Broad will conduct the service in St. Andrew's Presbyterian Church Sunday morning at 10.30. Sunday School and Bible Class 11.45. Young People's Society 7.30.

Service in the Lakeside Church will be conducted by Rev. J. Stoodley at 7.00. Sunday School 11 o'clock.

Parkdale Baptist Church, morning service 10.30. Sunday School 11.45.

If schools are open the regular monthly meeting of the Ladies' Hospital Auxiliary will be held at the home of Mrs. W. J. Robinson on Tuesday, March 16th, at 3 o'clock.

Regular monthly meeting of the Summerland Women's Institute will be held Friday 19th in Oddfellows' Hall at 3 o'clock.

Nelson's fruit fair last year was a money maker to the extent of \$150. For 1920 it is proposed to have a class for the showing of cattle.

Canada today exports sixteen times more bacon than before the war. With equal skill the same results could in a few years be shown for other products of Canadian livestock.

## 24 BELOW ZERO AT CALGARY

Enjoying delightful spring weather as we are here it is not easy to realize that our friends east of the Rockies are still experiencing below zero weather. From all over the prairie comes the same story of continued cold weather. The Calgary Herald of last Saturday evening contains the following:

Since Friday noon there has been a steady drop in the temperature. At that time the thermometer stood at 8 below zero, continuing below up to 6 p.m., and steadily dropped all the way to midnight, when 18 degrees below was registered. There was a steady drop all through the early hours of the morning. At 3 a.m. it was 20 below, at 6 a.m. 24 below, remaining at that figure until 9 a.m., when it started to rise. At 11 o'clock it stood at 12 above and was slowly rising.

A daughter arrived on Sunday at the home of Provincial Constable E. C. Graham, of Kelowna.

Miss Myrtle Ritchie, who has just completed a course in a business college in Vancouver, has returned to her home here.

### Peachland Doings

A Weekly Chronicle Furnished By Our Local Representative.

Mrs. Mitchell who has been visiting her uncle and aunt, Mr. and Mrs. Geo. Keyes, returned to her home in Calgary on Thursday.

Major and Mrs. Thorn who have been visiting in Vernon returned home on Tuesday.

#### CLARK - GUMMOW

Rev. C. D. Clark and Miss Olive Gummow were united in marriage on Wednesday last at the Methodist Parsonage, Vernon. They returned on Thursday evening's boat accompanied by Mr. Clark's brother, Watson Clark, and his wife, who have been spending some time on the Coast.

Mr. and Mrs. W. J. Gush and child who spent the winter with Mr. and Mrs. Maxwell of Trepannier, returned to their home in Raymore, Sask., on Wednesday morning.

Miss Olive Hayes, Government Instructor in Domestic Science, finished her course of lectures here last week and went to Summerland. The members of the Women's Institute found the lectures very instructive.

After spending a few days down the lake Roy Davidson returned to his home here on Thursday morning.

Mr. Thos. Powell spent a couple of days in Vernon this week on Fruit Union business.

Mr. Alex. Miller spent a couple of days visiting up the lake, returning home Friday night.

Mr. Brinson, sen., returned from the prairies on Thursday night.

Nurse Wilson who has been visiting Mrs. Thos. Powell left on Friday morning for Victoria.

Mr. and Mrs. Dickson who have been visiting in Vancouver and Victoria spent a few days here with Mr.

#### Synopsis of

#### Land Act Amendments

Minimum price of first-class land reduced to \$5 an acre, second-class to \$2.50 an acre.

Pre-emption now confined to surveyed lands.

Records will be granted covering only land suitable for agricultural purposes and which is non-timber land.

Partnership pre-emptions abolished, but parties of not more than two may arrange for adjacent pre-emptions with joint residence, but each making necessary improvements on respective claims.

Pre-emptors must occupy claims for five years and make improvements to value of \$10 per acre, including clearing and cultivation of at least 5 acres before receiving Crown Grant.

Where pre-emptor in occupation not less than 5 years and has made proportionate improvements, he may, because of ill-health or other cause, be granted intermediate certificate of improvement and transfer his claim.

Records without permanent residence may be issued, provided applicant makes improvements to extent of \$300 per annum and records same each year. Failure to make improvements on record name will operate as forfeiture. This cannot be obtained in less than 5 years, and improvements of \$10.00 per acre, including 5 acres cleared and cultivated, and residence of at least 2 years are requisite.

Pre-emptor holding Crown grant may record another pre-emption, if he requires land in conjunction with his farm, without actual occupation, provided statutory improvements made and residence maintained on Crown granted land.

Unsurveyed areas, not exceeding 20 acres, may be leased at a maximum price to be obtained after fulfilling residential and improvement conditions.

For grazing and industrial purposes areas not exceeding 160 acres may be leased by one person or company.

Mill, factory or industrial sites on timber land not exceeding 40 acres may be purchased on conditions of payment of stumpage or purchase price, and no payment of purchase price.

Natural hay meadows, inaccessible by existing roads may be purchased on condition of construction of a road to them. Robert of one-half of such road, not exceeding half of purchase price, is made.

#### PRE-EMPTORS' FREE GRANTS ACT

The scope of this Act is enlarged to include all persons joining and serving with His Majesty's Forces, the time within which the heirs or assigns of a deceased pre-emptor may apply for title under this Act is extended from one year from the death of such person, as formerly, until one year after the conclusion of the present war. This privilege is also made retrospective.

No fees relating to pre-emption are due or payable by soldiers on pre-emption recorded after June 30, 1919. Taxes are remitted for five years.

Provision for return of purchase money, due and been paid since August 4, 1914, on account of payments, fees or taxes on soldiers' pre-emption interest on amounts to purchase town or city lots held by members of Allied Forces, or dependants, acquired direct or indirect, remitted from settlement to March 31, 1920.

#### BUY-PURCHASERS OF CROWN LANDS

Provision made for issuance of Crown grants to sub-purchasers of Crown Lands, acquiring rights from purchasers who failed to complete purchase owing to forfeiture, on fulfillment of conditions of purchase, interest and taxes. Where sub-purchasers do not claim whole of original parcel, purchase price due and taxes may be distributed proportionally over the whole area. Applications must be made by May 1, 1920.

#### GRAZING

Grazing Act, 1919, for systematic development of livestock industry provided for granting districts and range administration under Dominion Annual grazing permits issued based on numbers range priority for established owners. Stock-owners may form Associations for range management. Fees, or partially free, permits for settlers, campers or travellers, up to ten head.

and Mrs. Hugh Williams, leaving Monday morning for their home near Regina.

The dance in the Orange Hall on Friday night was well attended. The music, supplied by the Summerland orchestra, was much appreciated.

Little Miss Frances Robinson spent the week-end with friends in West-bank returning on Monday night's boat.

Mrs. and Miss Needham returned on Saturday evening after spending the winter with Mrs. Needham's daughter, Mrs. Dell, who lives near Qu'Appelle, Sask.

Tom Drought, who spent the past few months at Morningdale, Alta., has returned to his home here.

Rev. Mr. Keyworth of Vernon came in on Saturday evening accompanied by his little daughter. Mr. Keyworth filled the pulpit of the Methodist Church on Sunday morning and also gave a lantern lecture on Monday evening on "The Panama Canal."

J. B. Robinson has sold his fruit lot and the family have moved into the house on Geo. Bulyea's fruit lot.

Miss Mary Vicary returned on Monday from a visit down the lake.

Mr. Drake, of Drake & Cadmore, was a passenger north on Monday, returning in the evening.

Rev. W. J. Scott and daughter arrived on Monday night to spend a few days here as guests of L. D. McCall. They will renew old acquaintances before going on to Winnipeg, where they intend making their home.

Mr. J. H. Hyde who was called to Winnipeg owing to the illness of his mother returned on Monday night. Unfortunately Mr. Hyde arrived in Winnipeg after his mother had passed away.

The sad message was conveyed by wire on Monday to Mr. Jas. Michael announcing the death of four children out of the family of his sister, Mrs. Wm. Henry of Oak River, Man., formerly of Peachland. Mrs. Jas. Michael and Mrs. Lee Mills (sister of Mrs. Henry) left on Thursday morning for Oak River.

W. C. Atkins returned from Kelowna, where he has been undergoing treatment for a frozen foot.

W. L. Moore had the misfortune of losing a valuable horse last week. He missed her out of the pasture and found her dead in the bush near the ranch.

Even a wise man goes lame when he attempts to argue with a pretty woman.

### MAIL CONTRACT

SEALED TENDERS addressed to the Postmaster General, will be received at Ottawa until Noon on Friday, the 16th April, 1920, for the conveyance of His Majesty's Mails on proposed contracts for four years, seven times per week each way, between Summerland and West Summerland, and six times per week over Summerland Rural Route, No. 1, from the Postmaster General's pleasure.

Printed notices containing further information and conditions of proposed contracts may be seen and blank forms for tender may be obtained at the Post Offices of Summerland and West Summerland, and at the office of the Post Office Inspector.

#### WILL THIS SOLVE HOUSING PROBLEM?

A new kind of brick so easily made that housebuilding may become almost a children's pastime, will be manufactured in England in large numbers after April.

These bricks, or blocks, are rectangular in shape, and are nearly as large as five ordinary bricks, but in comparison with their size are much lighter and are easily handled. They are hollowed into two or three air layers.

The hollowing is to reduce the difference in temperature between the air and the wall, thus diminishing the danger of condensation and consequently damp in houses.

"These blocks could be made in unlimited quantities in England," said Baron Ernest Barnekow, representing Messrs. Lean & Co., of Stockholm, originators of the Lean system in which these bricks are employed.

"Slag, clinkers, sand and brick dust, mixed with cement, make excellent material. We have portable blockmaking machines weighing 600 to 800 pounds, and they would enable three men, if they worked in three shifts, to build a small house in one day.

"A bricklayer expert with the machine can build a Lean wall of 450 bricks, equal to 2000 bricks, in eight hours. The manufacture of the blocks is simple and an unskilled man can soon learn. Our process is being used in the devastated areas of France. One block would be cheaper than five ordinary bricks."

#### FOR SPRING OF 1921 PLANTING

We have made liberal provision and will have many thousands of trees of leading varieties to offer of choice quality, grown in the Chilliwack Valley, where we got a splendid root system and vigorous growth.

The available supply of NURSERY STOCK is likely to be less than the demands for the coming year. We therefore advise planters to place their orders with us as early as possible and avoid disappointment.

We already have quite a few orders on our books for Spring 1921 delivery. A word to the wise should be sufficient.

#### REMOVE SPARE TIRE WHEN WASHING CAR

When having the car washed, it is advisable to remove the spare tire from the rack, whether it is mounted on a rim or not. If it is not mounted it is particularly imperative that the casing be removed.

Water gets inside the casing, and, unless inspection is made, it may remain there until entirely absorbed.

If the water permeates the casing it is certain to prove destructive. In case of failure to remove the tire first, then it becomes essential to sponge out the water and wipe perfectly dry. When the tire is mounted on a rim there is practically no likelihood of the water permeating the casing but it will collect around the rim, causing it to rust and making it very hard to remove the casing when it becomes necessary to make a repair.

After driving in the rain it is more necessary to remove all signs of water from the spare tires than it is to wipe off the body of the car.

## Naramata News

Current Events of Town and District

Mrs. John Noyes is in Kelowna, taking care of her daughter, Mrs. George Hume, who is ill with grippe.

Mr. and Mrs. H. Lee and family came in this week accompanied by Mr. Lee's brother. Mrs. Lee has been spending the winter at the Coast while Mr. Lee has been looking after his business in Winnipeg.

Mr. Fred Roe was here on Tuesday arranging to open the Syndical Hotel, which he expects to be able to do in the near future. As to who will have the management of the business has not been decided. There are several applicants for the position, so it is assured that we will soon have a place for travellers to stop.

Mr. F. C. Manchester and Mr. E. Mallory were in Penticton on business Tuesday.

Mr. Matt Wilson has returned from the Vancouver Hospital to his home at Paradise Ranch.

Mr. Jim Williams who has been at the Coast for medical treatment has returned much improved in health.

Miss Kathleen Robinson who is in training at the Vancouver General Hospital is seriously ill with pneumonia, and her sister, Dorothy, has gone to see her. The last report was that Miss Kathleen was improving. Miss Dorothy will take a course in commercial work while there.

Mr. J. M. Robinson has gone to the Coast for a few days.

Mr. J. Glenn of Penticton was a visitor here this week.

Miss Olive Hayes of Victoria, Provincial Instructor of Household Science, gave a series of lectures at the Unity Clubhouse on Monday, Tuesday and Wednesday afternoons of this week. The work was done under the auspices of the Women's Institute. Monday's lecture was on "Nutrition and Malnutrition." The subject on Tuesday was pastry making, while Wednesday was devoted to instructions in dry cleaning. The whole course was most interesting and instructive and much appreciated by the ladies of the institute.

Mrs. May of Ottawa is the guest of Mrs. M. B. Smith for a short time.

Naramata schools will be closed for the rest of the week as a safety measure on account of whooping cough and colds that might lead to something worse.

Bluebirds and robins are seen here daily now so we know that spring is near.

Mr. and Mrs. George Wolstenroft have returned from the Coast where they have been for the past few weeks.

Visitor (proudly, to old farmer): "I've just got a letter from my son saying he has won a scholarship. I can't tell you how proud I feel about it." Old Farmer: "I can quite understand your feelings, mum. I felt just the same way when our pig won a medal at the agricultural exhibition."

### LAND REGISTRY ACT

Re Lots 8 and 15, Block "F," District Lot 449, Osoyoos Division, Yale District.

Whereas proof of loss of Certificate of Title No. 8379D, issued to NORMAN SOMMERVILLE DAY, IDSON and covering the above land has been filed in this Office:

NOTICE is hereby given that at the expiration of one month from the first publication hereof, I shall issue a duplicate of the said certificate of Title unless in the meantime valid objection thereto be made to me in writing.

DATED at the Land Registry Office, Kamloops, B.C., the 26th day of February, A. D. 1920.

H. V. CRAIG, District Registrar.

32-80

## Workers and Slackers in the Henhouse

### How to Distinguish the Dead Head

The worker hen — the fowl that produces persistently and economically — usually carries ragged, worn plumage; is a late moulter; has a red, large, sleek, plump comb and white, thin, flat shanks. The neck and ear lobes are white, while the pelvic bones and the ends of the breastbone is wide. The breastbone is soft, pliable, and prominent.

Slacker hens are characterized by neat, clean plumage; early moulting; a pale, small, shrivelled comb; yellow round and full shanks; yellow beak; creamy ear lobes; heavy, rigid and close together pelvic bones. The spread between the pelvic bones and the end of the breastbone is narrow, while the small bones on either side of the breastbone are hard and well covered with flesh. The skin is thick, hard, and underlaid with fat.

In making physical examination of the fowls for production efficiency, hold the hen with the breastbone in the palm of the hand, with the flesh part of the legs firmly on either side of the forefinger. The feeling of the breastbone in the palm of the hand will indicate the quality of the skin, while with the other hand the examiner can measure the distance between the pelvic bone to the rear of the breastbone. As he holds the bird he can also examine the plumage, comb, shanks, beak, ear lobes, and thus accumulate accurate information for his diagnosis of conformation and production ability.

It is essential that he consider all points in respect to their importance, and not place too much dependence on one or more prominent characteristics. — Daily Product News, Seattle.

It is said that the camel, if given the least encouragement, will quickly acquire a smoking habit, and that the camel driver who has a few cigar butts in his clothes for distribution among the thirstless ones, can do wonders with the animals. They carry a bit of wood rudely shaped into a cigar holder and adapted to the camel's mouth, and an animal which is well nigh exhausted can be relied upon to get up and travel many a mile after a smoke.

### Do You intend to Use Lumber or Other Building Material in the Near Future?

We believe some are holding off making alterations, extensions or doing any building, hoping for a general reduction in prices. In this they will be disappointed, we are now convinced. It is no use putting off. Lumber will be dearer instead of cheaper. If you have need for lumber or other building material, our advice is BUY NOW.

We have a new shipment of BEAVER BOARD. The price is a little higher, but much cheaper than lath and plaster.

FOR SALE. — One baby buggy, English style, price \$50. Apply Box 321, Review. 32-33

Mr. and Mrs. C. W. Lees were visitors to Summerland this week returning to Kelowna this morning. The Public Schools, of which Mr. Lees is principal, have been closed for four weeks. It is not certain that they will reopen next week. The Post Office department is again advertising in this issue for tenders for the rural route mail contract and for the contract for courier service between the two post offices.

The schools will reopen on Monday according to a formal announcement published on this page. They were closed a little over a week ago as a precautionary measure against the possible spread of flu which is prevalent in neighboring communities, and a few cases of which were found here. E. H. Bennett, who recently arrived here from Ottawa, has bought the Roy Black orchard and W. C. Kelley lot below it in the Paradise Flat district.

Nearly all the Church services were cancelled last Sunday in compliance with the request of Reeve Campbell, it having been deemed advisable to take this action against the possible spread of influenza. The Reeve has asked The Review to state that there does not seem to be any reason why church services should not be held on Sunday next and that he has withdrawn his request made a week ago. Learning that some of the residents in the neighborhood did not favor the erection of a fruit by-products plant in Peach Orchard, Mr. Walter has given up his intention of building there, stating that he wished to work in harmony with the community and had not desired to put up a plant that would be considered a nuisance by anyone.

SINGER SEWING MACHINES. — Universally used in all clothing factories, by Dressmakers, Tailors, etc. When you buy a SINGER you buy comfort and satisfaction for your lifetime sewing. Why not buy the best? Several bargains in used "SINGER" machines. T. G. WANLESS - AGENT - PENTICTON, B.C.

FOR SALE. — My 1444 acre ranch at the head of Garnett Valley, F. H. Heep, 437 So. Main St., Los Angeles. 23tf

Mr. J. A. Morrison, for a number of years C. P. R. Station Agent at Vernon, has been appointed to the position here rendered vacant by the transfer of Station Agent Sharpe to Mission City. Mr. Morrison is expected to arrive here about the middle of next week. After spending two or three days with the new agent Mr. Sharpe, with his family, will leave for Mission City. A barber shop has been opened in the Hotel Summerland building with Mr. Geo. H. Ingles in charge.

Mrs. J. M. Harrison has sold her orchard and house to Mr. H. K. Lott of Vancouver. Mr. and Mrs. Lott and family will take possession about the first of April. Mrs. Lott, who is a daughter of Mr. and Mrs. S. B. Snider and has many friends in Summerland, is especially interested in the parent-teachers' association movement and for the past year has been president of the Kitsilano branch of the organization. Through somebody's mistake the coast mail for the Summerland Post Office was not put off the train here last Sunday morning although the courier was at the train and was giving the bags for West Summerland. When he enquired for the others he was told that instructions had been given him to carry them on to Penticton. The mail arrived here by boat Monday morning. Further enquiry has brought the information that no such instructions were issued by the Post Office authorities.

Mr. A. E. Sharpe, C. P. R. Agent here, who leaves shortly to take a similar position at Mission City, has sold his fruit lot in the Morningside district next to the home of Mr. S. M. Young to Mr. W. L. McPherson of Norquay, Sask., who has purchased it for his brother-in-law, Mr. Hugh Muir, also of Norquay. Mr. and Mrs. Muir and two daughters are expected here about the first of April and we understand it is Mr. Muir's intention to build a home on his new property.

### Correspondence

The Columns of THE REVIEW are open to the public for the discussion of matters of general interest. No notice can be taken of anonymous communications. Letters intended for insertion must be authenticated by the name and address of the writer, not necessarily for publication. The opinions of correspondents are not necessarily those of the Review.

Editor of the Summerland Review, Summerland, B.C.

Dear Sir: Re Mr. Lumsden's letter in your recent issue:

As one of the older teamsters in this district and knowing that Mr. Lumsden has kept horses for a few years here, I would naturally think he would know that either in meeting or passing another vehicle, each are entitled to half the road.

I certainly congratulate Mr. Lumsden that he got off with a few toots from a horn and a few words, for there are many who would have (perhaps not legally) forced the point home.

Any man with a knowledge of fair play would certainly give ground.

Yours truly,  
E. T. MOUNTFORD.

R. R. 1,  
Summerland, B. C.,  
March 9th, 1920.

The Editor, Summerland Review.

Dear Sir:

I unfortunately placed myself on record in your last week's issue as being "one who knows" something about the laws and regulations pertaining to motor traffic. For the benefit of your correspondent Mr. W. B. Champyyn, and his friends (if he has any) I should like to point out that it is no longer necessary, nor required by law, to be preceded by a man with a red flag when travelling by automobile. The custom became obsolete owing to scarcity of applicants for the job.

As regards the performance of Mr. Lumsden, I am glad, as an eyewitness, to verify his statement as regards his speed, though it looked to me that he was pushed round some of the corners by the following car.

This second car was evidently running away. The driver had undoubtedly lost his head, and in the excitement of the moment had failed to remember the fact, which I have often tried to impress upon him, that the action of blowing the horn does not, on his make of car, automatically close the throttle or apply the emergency brake.

I venture to doubt the statement of Mr. Champyyn as to his performance on the straight road, but, at this time would only suggest that in his calculation, he forgot that his speedometer was running on daylight saving time and his wheel base was out of line.

Yours truly,  
SILENT NIGHT.

Silence on the silent, please, Mr. Editor.

### COUNCIL HAS DAY OF ROUTINE BUSINESS

(Continued from Page 1)

\$200 for land now included in the road running south from the gulch road east of the Hespeler property. One hundred and fifty dollars was the price of the land and \$50 was for the taxes paid by the Development Company on the land during the years since the road was built. The account was laid on the table pending inquiries.

A request from Mr. Wm. Kerr for a level entrance to his property instead of the present approach over a flume was referred to the foreman with instructions to give the approach asked for.

The engineer submitted a report covering a request from Mrs. R. M. Ross to build a bridge across Prairie Creek and thus open a lane at the rear of her property.

The engineer found the cost would be considerable and would not recommend undertaking the work.

### WOULD REGULATE MOTOR HEADLIGHTS

A bill to effect an amendment to the "Motor Traffic Regulation Act" was recently introduced into the House at Victoria. The bill would add the following as a subsection to Section 27, Chapter 169:

3. No lighting device over four-candle power equipped with a reflector shall be used unless the same shall be so designed, deflected or arranged that no portion of the beam of reflected light, when measured seventy-five feet or more ahead of the lamps, shall rise above forty-two inches from the level surface of the road. Provided, however, that this subsection shall not apply to lights known to the trade as "spot-lights," when used as such, but such "spot-lights," if so used, shall not be directed at an approaching vehicle."

During 1919 at Cranbrook there were 117 births, 39 marriages and 31 deaths.

### SIX DEATHS BY INFLUENZA AT PENTICTON

Six deaths from influenza have occurred in Penticton since the outbreak of that disease there, five of the six being little children. Mrs. McWhinnie, whose death occurred on March 4th, was the only adult. Her eight months' old child had died a few days before. Raymond Manning, two months old died on Saturday, the 6th.

On Sunday there were two deaths, the six months' old child of Mr. and Mrs. L. A. Rathvon and the six-year-old son of Mr. and Mrs. Max Ewart. The four-year-old son of Mr. and Mrs. J. S. Porter died on Monday.

The epidemic is now said to be on the wane having reached the peak on Sunday when, it is stated, there were not less than 300 cases.

### POUND NOTICE

The following described animals have been impounded and if not previously claimed will be sold on Saturday, March 20th, 1920, at 2 p.m., at the Municipal Pound:

- One sorrel gelding with white strip on face, white stocking on left hind foot and white fetlock on right hind foot;
- One brown gelding with white face and white spot on nose;
- One aged buckskin mare;
- One white saddle pony;
- One gray pony with U on left shoulder.

## Not Willing to Help Rebuild the Hospital

**Authorities at Victoria Say Sick Can Go to Other Valley Hospitals**

### Sends Delegation

**Will Need Thirty Bed Institution Here is Impression of Inspector**

Dr. E. C. Arthur of Nelson, provincial inspector of hospitals, was a visitor to Summerland last week-end when he inspected the Felix Hotel building, now being used for a temporary hospital. Advantage was taken by the Hospital Society of the inspector's visit to lay before him the pressing need for a new hospital building to replace the one recently destroyed by fire and a special meeting of the Board was held Sunday morning when Dr. Arthur heard the claims of the Board for assistance from Victoria.

During the discussion Dr. Arthur made the statement that Summerland needed a thirty bed hospital.

As a result of advice received from Victoria by wire the Board named the President, Mr. F. A. C. Wright and Dr. Andrew, then at Vancouver, as a committee to wait on the Government to urge that assistance toward the erection of a new building be given. The board has been in correspondence with the Government on this subject and it had become apparent that the local situation was not understood as in one letter from the capital it was stated that Summerland was not suffering for a hospital as there were other towns not far distant where there was hospital accommodation. The delegation was given a hearing by the Hon. J. D. McLean who told the visitors that only \$35,000 has been appropriated for hospital purposes throughout the province. Dr. McLean seemed to lean to the opinion that a hospital building was not greatly needed here a delusion which the delegates did their utmost to remove.

The Hospital Board have not yet given up the hope of obtaining the necessary assistance and will make another effort at an early date.

## O. U. G. Will Show Healthy Growth

The business of the Okanagan United Growers, combining the various unions of the Valley has been growing rapidly according to figures which will be produced at the annual meeting in Vernon this month.

These records will show that the volume of business transacted by the O. U. G. has more than doubled since 1916. In that year the figure was \$1,008,101. In 1917 it rose to \$1,117,748, and to \$1,587,864 in 1918. Last year it reached the high total of \$2,179,799. Coincident with the increase in business is a reduction in the percentage cost of transacting it. The cost of doing business for the locals was 3.4 per cent. of the sales value in 1919, 4 per cent. in 1918, 5 per cent in 1917 and 7.6 per cent in 1916.

The 1919 annual report shows a net profit of \$13,777 for the year, with \$4,246 brought forward from 1918. This is considered to be quite satisfactory in view of the fact that the O. U. G. like its various local endeavours to work on a narrow margin in order to give as big returns to the growers as possible. All outstanding debts, including the Graham, Evaporator liability have been cleared up.

## GOVERNMENT IMPORTING IMMUNE POTATOES

Hon. Dr. Tolmie, Minister of Agriculture at Ottawa, has completed arrangements for the importation from Scotland of thirty tons of immune seed potatoes for B. C. As these potatoes are proof against disease they will be a good thing for Vancouver Island and the whole coast potato crop region where serious diseases have been making the raising of potatoes a risky business there lately.

## Opening Another Garage, Here

Indicative of the development of the motor business in Summerland is the opening in a few days of a third public garage. The large and substantial building erected and used up to the present by G. R. Hookham & Co., has been leased by Ned Bentley who will immediately make necessary alterations and put in the machinery and tools usually found in a well equipped garage. Mr. Bentley went down to the Coast early this week to purchase this equipment and attend to other business in connection with his new undertaking.

Before enlisting, Mr. Bentley, whose qualifications as a machinist are well known, owned and operated the Penticton Garage.

## TELEPHONE CO. EXTENDING SYSTEM

Expanding business has made it necessary for the Summerland Telephone Company to run several new lines. Two of these lines have just been completed, extending to Trout Creek Point and will relieve some of the overloaded lines serving that section.

Having bought as junk the old line of the Okanagan Telephone Co. in the Garnett Valley district the local company has taken down the wires and poles and put in better condition its own lines in that vicinity.

## Wedded Yesterday in St. Andrew's Church

REED-HARRISON

St. Andrew's Presbyterian Church was the scene of a very pretty wedding on Thursday, March 18, when Beatrice Kathleen, daughter of Mrs. J. M. Harrison, was married to Thomas William Reed, of London, England. Rev. Mr. Stoodley officiated.

The bride, who was given away by Mr. J. L. Logie, entered the Church to the strains of Mendelssohn's wedding march, played by Mrs. A. J. Beer.

The church was beautifully decorated for the occasion and an arch was formed of pussy willow, daffodils and palm.

The bride looked charming in a gown of ivory eolienne georgette embroidered with pearls and iridescent beads. Her veil was of white net with a wreath of orange blossoms and she carried a bouquet of white carnations and fern. Miss Ruth Dale acted as bridesmaid and wore a frock of pale pink crepe-de-chêne with white picture hat. She carried pale pink carnations and fern.

The groom was supported by Mr. F. H. Tennant of Vernon. During the signing of the register Mr. Ben Newton sang "The Voice That Breathed O'er Eden."

After the ceremony about forty guests repaired to the home of the bride where a dainty luncheon was served.

Mr. and Mrs. Reed left for Penticton en route for Coast cities. The bride's going-away costume was navy blue serge with black picture hat. —Contributed.

## BIG COAL FIND AT EAST PRINCETON

Princeton, March 16. — A seam of first class coal, over 12 feet in thickness was struck this week on the property of the Harvard Coal Company at East Princeton. This is the biggest find ever made on the property, and the coal is of such good quality that no time will be lost in making arrangements to ship the product. Coal bunkers which will hold 200 tons will be built at once at the railway spur near the cement plant. James Gray, the superintendent, said this morning that he thought that the shipping of coal could commence early in April at which time a force of from 30 to 40 men would be employed.

This property is better known as the United Empire. Last fall the company was reorganized and the name changed to the Harvard Coal Company. The stock is controlled almost entirely by Spokane people.

## Growers' Organization Has Reached Huge Proportions

**Office of the Okanagan United Growers Give Some Interesting Figures**

### Summerland Fruit Union Holds Annual Meeting

**Has a Very Successful Year. Reports Well Received. Board of Directors Elected**

To market their 1919 crop cost shippers through the Okanagan United Growers 3.4 per cent, according to General Manager Walter J. McDowall, who spoke before the members of the Summerland Fruit Union in annual meeting here yesterday. Mr. McDowall gave a number of figures which showed that huge proportions the growers' organization has attained and as the business has grown it has cost the growers less to market their crop. In 1916 the cost for selling and head office expenses was \$63,140 for marketing a crop which returned \$1,063,000. The 1919 output, nearly two and a quarter millions, was sold at a cost of \$62,090. Mr. McDowall said that the selling and head office expenses for marketing the 1919 crop was 7.6 per cent. of the value of the sales. In 1917 the cost was reduced to 5.3 in 1918 to 4 and in 1919 to 3.4.

The speaker gave figures showing the annual increase in turnover, both in the volume of fruit handled and in value. In 1918 sales totalled \$456,000; in 1914, \$559,000; in 1915, \$802,000; in 1916, \$1,063,000; in 1917, \$1,117,000; 1918, \$1,587,000, and in 1919, \$2,179,000. The O. U. G. had effected wide

distribution of the crop, thus avoiding the glutting of the home markets. Of the 1576 cars sold 219 went to the United States, 128 to the Old Country and 5 to New Zealand, 1224 being sold in Canadian markets. Further analyzed the speaker stated that 14.3 per cent was marketed in British Columbia, 16.5 in Alberta, 18.8 in Saskatchewan and 19.8 in Manitoba. Eastern Canada took 8.3 per cent. and 22.3 per cent. was exported.

Better prices had been obtained for apples than for 1918. On all varieties of No. 1 apples the returns averaged \$2.10 as compared with \$1.95 for 1918 fruit. The general average return for all varieties, Nos. 1, 2 and 3, was \$1.94.

Mr. McDowall said that the final results of the year's operations was that the old Graham suspense account of \$17,481.84 had been paid off and a profit of \$13,777.98 had been carried to the balance sheet, making a total now to the credit of the profit and loss account of \$18,024.60.

The organization was now investigating the matter of establishing by-product plants and for this purpose Mr. W. A. Ferguson, who had

## Resuming Work on Summerland Irrigation System

**Council Approves of Work as Outlined and Orders Work to Start**

Some two or three weeks ago, the municipal engineer submitted a report covering work contemplated for this season on the irrigation system. The report was referred to the water committee for examination and approval and on Monday last the committee submitted its report on that of the engineer. The engineer reported that the levels on the north main had all be taken and plotted. All the concrete lining has been placed and a considerable amount of lumber fluming but there still remains to be done further fluming requiring 46,000 feet of lumber; according to the engineer's estimate. This committee approved of the engineer's report, subject to a postponement suggested by the engineer of work at the north end which would effect a present saving of \$200 for labor and 17,000 feet of lumber.

The engineer's recommendations covering the south main were approved by the committee. There is about 6,000 feet of this main to be cement lined but the engineer suggested that only about 2,000 feet of the worst be done this season. He advised that the entire main be excavated to size so that it will carry the amount of water the lined portion of the ditch will deliver. He also advised that the flume portion of this ditch, about 500 feet, be replaced with a larger flume.

Engineer Pawkes reported that about 1,400 feet of concrete lining had been placed in the Thompson ditch and that there is about 2,000 feet more to place together with 55,700 feet of steel lining. Seven hundred bags of cement are now on hand and an additional 250 bags will be required to complete this work. The committee recommended carrying out the work on this ditch according to the report to about station 7500. From this point to the lower end of the channel, whether of earth or flume, to be put in workable repair; completion to be deferred until a later date.

Having decided to extend a lateral flume from the Jones Flat main along the south edge of the Flat the

engineer was asked to prepare plans for same. This lateral, which will permit the taking of much of the land on Siwash Flat off the pipe system, will be made of 1,586 feet of 20 x 14 flume, 2,046 feet of 14 x 12 and 800 feet of 12 x 10 flumes. The engineer proposes to use a certain amount of second hand lumber on this lateral. The work was recommended by the water committee to be carried out in full.

Postponement of the work on the Prairie Creek main, until further information has been obtained as to the area to be watered, was considered advisable by the committee.

The engineer reported the Giant's Head main and lateral in bad shape and requiring considerable repairs, and submitted details of reconstruction and enlargement. Those details were approved and the committee recommended that where needed the unlined ditch be trowel flashed with cement.

The Paradise Flat main is also in poor shape and the engineer suggested that 1,500 lineal feet of flume be replaced this season. In addition to this the committee recommended that, where needed, the unlined ditch should be trowel flashed with cement.

The water committee's report stated that if full benefit was to be obtained from the Eneas Crook storage about 3,000 feet of the Garnett Valley main should be reconstructed or repaired. The report stated further, "It is important that provision should be made for an unfloating supply of water by providing an overflow and a second gate. A steady, uniform volume of water is of the first importance. It can only be ensured by works on the line suggested. The engineer should report upon the needed work with an estimate of cost at an early date."

The council adopted the committee's report and after inspecting the plans prepared by the engineer for the Jones' Flat lateral, instructions were issued by motion to the effect

(Continued on Page 6)

## Teachers to Hear Valuable Addresses

Public school teachers throughout the province, members of the British Columbia Teachers' Federation, are planning a convention to be held at Victoria on April 8th and 9th, Easter vacation week.

The program includes an address by the president of the Washington University, Professor Suzzallo; and an address by Hon. J. D. McLean, Minister of Education. Consolidation of schools will be the subject of an illustrated address by G. T. Lockhart, architect for the state of Minnesota. A second address will be given by the president of the University of Washington on "Economy and Efficiency in Our Rural School Program." Members of the cabinet, Legislature, School Boards, City Councils and other public organizations will be specially invited to hear these addresses.

## OKANAGAN BOAT FOR THE SHUSWAP

It is stated on the authority of General Superintendent Peters, that a deal is under way for the purchase of one of the C. P. R. boats plying on Okanagan Lake, for service on Shuswap Lake. The steamer is presumably the "York" which has a steel hull and was originally brought to Okanagan Landing in sections and assembled there. She has been little used of late, hence the probability of her sale. —Kelowna Courier.

## Changes Made in Mail Service

Beginning April 1st two improvements in the mail service, affecting especially the West Summerland post office, will go into effect. At the same time V. J. Bernard, who has been given the contract, will take over the courier service between the K. V. R. station and the two post offices.

Since the upper post office was opened it has been the practice to have the courier, whose duty it was to take the mail from the evening boat to the upper office, wait at the downtown office until the letter mail had been sorted. This was done to avoid the holding over at the lower office for a day the letters addressed "Summerland" to persons being served from the West Summerland post office. This waiting will be discontinued after the end of the month, thus making it possible to deliver the evening mail some 20 minutes to half an hour earlier at the West Summerland office. In addition to the former duties Mr. Bernard, who will deliver Coast mail from the morning train to the upper and lower offices, will be required each morning to take from the lower office the mail for the upper office arriving from the south on the morning boat. This has been lying over until evening. At the same time any misdirected mail which had arrived on the boat on the night previous will be taken to the upper office.

## DOMINION CANNERS SHOWS LARGE PROFITS

More than half a million dollars was added to the profit and loss account of the Dominion Cannery, Ltd., as a result of the success of last season's operations. The company now has more than \$20,000,000 undivided profits in addition to a reserve of \$150,000. The above balance was what remained after paying 7 per cent. on preferred stock and payment of bond interest.

The remaining profits would have been sufficient to pay nearly 20 per cent. on the common stock. The directors decided not to pay this dividend, and the reason no doubt being that they desired to use the money for expanding the business of the company.

## TO LICENSE REAL ESTATE SALESMEN AND AGENTS

Licensing of real estate agents and real estate salesmen is provided for in a bill brought down in the Legislature by the attorney-general. The former will pay a license fee of \$10 a year, the latter \$2. Inspectors will be appointed by the government by whom complaints of wrongdoing by agents or salesmen will be investigated.

## Apples Keep Best When Stored in Okanagan

**Local Experience Supports This Claim. Fruit Rots at Coast**

### Shipping Ended

**Amount of Fruit in Storage Here Small. Holdings Elsewhere**

The last of the apples held in storage here by the Summerland Fruit Union were shipped this week. Other stocks in storage here are getting low. Both the Union and the Stewart Fruit Co. have been making regular shipments of late and Mr. Isaac Blair shipped this week one of three cars of Yellow Newtowns he has carried over.

The advantages of holding surplus stock here are many, not the least being that a better condition is maintained by apples held in storage in this climate. Mr. Blair's apples were picked in apple boxes and put in storage last fall. The fact that every five boxes of these loose apples are making four packed boxes is evidence of their excellent condition as they came out of storage. It was stated at the Fruit Union meeting yesterday that a carload of Rome Beauty shipped from here to Vancouver last fall were recently found to be in bad condition. Some of the same stock was held here in storage by the Fruit Union and when shipped a short time ago was still in prime condition.

Nearly all the apples held in the Valley through the winter have been shipped. The report just to hand of the Dominion Department of Agriculture, Fruit Branch, shows that the 45,000 boxes in storage in the Okanagan on January 31st had been reduced to 20,000 by the end of February.

Dealers in Vancouver held 35,000 boxes at the beginning of this month, more than was reported in storage in Alberta and Saskatchewan, these having 14,000 and 18,100 respectively. Vancouver reports that apples there are moving out rapidly and that the trade is anticipating higher prices.

## OPOSES GRANTING TAX EXEMPTION

Penticton is opposing the granting of exemption from taxation to the Kettle Valley Railway as contained in the bill now before the house covering the agreement for railway connection between Okanagan and Dog Lakes. The bill referred to would grant exemption from taxation for the existing spur from South Penticton to the wharf, as well as from the yards south to Dog Lake, and beyond. The municipality falls to see why the old spur should be exempted.

"Pave the road and double the load" is a good roads slogan which is rapidly gaining popularity.

## CANNED FRUIT PRICES HIGHER

That the prices of California canned fruits will be higher this year than in 1919 is the view expressed by the California Cannery in a letter to its customers in America and Europe.

The facts that are given to justify this prediction are that "the price of sugar to the canners will be fully 70 per cent. higher in 1920 than in 1919," box shooks will be 60 per cent. higher and labor 30 per cent. higher than when the 1919 prices were named. The scarcity of dried fruit throughout the world furthermore will tend to keep up prices.

### BIRTH

A son was born to Mr. and Mrs. C. H. Sismoy on Tuesday, March 10,

Salmon Arm District Council will carry out an extensive scheme of permanent road improvement this year, including grading and metalling, and will issue bonds to raise the necessary funds.

### Naramata News

Current Events of Town and District

Mr. and Mrs. Humphries of Sask. are visiting Mrs. Humphries' sister, Mrs. A. S. Lawrence, for a short time.

Mr. Matt. Wilson caught a bad cold on his way in from the Coast and has gone to the Summerland Hospital for treatment.

Miss Ruth Waterman who is in training at the Vancouver Hospital is very ill, and her mother, Mrs. Waterman, of Paradise Ranch, has gone to the Coast to be with her.

Mr. W. J. Robinson was a visitor at the home of Mr. J. M. Robinson on Friday.

Dr. and Mrs. Lipsett who recently returned from California, visited Mr. and Mrs. J. M. Robinson on Saturday.

Mrs. W. Morsch of Peachland was here visiting friends for a few days this week.

Mr. Dean Walters went up to Peachland on business on Monday.

Mr. Ralph Brown, with the Soldier Settlement Board, was here on business on Saturday.

Mr. Percy Wheelton and Mr. Miner of the prairies are visiting Mr. A. S. Lawrence. Both are returned men of the 8th Battalion. Mr. Wheelton is a building contractor and Mr. Miner was formerly agent for the International Harvester Company at Lethbridge.

Mr. Len Smith is happy as his new ready cut house has arrived and is being transported to his home on the benches.

Tenders are being called for improving the School grounds and the general arranging of the gardens according to a plan now in the hands of Mr. Rayner, the secretary of the school board. These plans call for grading and clearing the grounds and building a stone wall along the street, also laying out walks and planting shade trees, etc. These improvements will insure a fine up-to-date place in which to educate our young folks.

Mr. W. B. Greene one of our new residents, and a practical butcher, is going to open a meat market at once in the old market stand on Robinson Avenue. This is an industry that is badly needed in the community and all will be glad that it is really going to happen.

The Syndica Hotel will shortly open under the management of Mrs. George Jones, of Edmonton. The house will be thoroughly overhauled and furnishings completely installed. Mrs. Jones has had a considerable experience in this line of business and intends to run a first class place for the benefit of the public. This will be good news to the citizens as well as to the general travelling public who have long wanted a place to get good room and a meal in Naramata, but who have been obliged to cut their visits to our town short on account of the lack of this convenience.

The barge belonging to the Okanagan Lake Boat Co. that has been

### FRESH AIR WILL BEAT THE FLU

Those Recovering From 'Flu Should Get as Much Fresh Air as Possible

Many persons who are recovering from influenza and pneumonia lack appetite and feel weak. Fresh air is one of the best tonics. It will arouse appetite, bring color to pale cheeks and strengthen lungs if they have been weakened by influenza or pneumonia.

One should remain in the open air as much as possible and be clothed warmly but not too warmly. Any draughts should be avoided, windows should be open at the top and bottom in every room of the home, especially in the bedroom. The outside air at night and in rainy weather is just as necessary as it is during the day or in fine weather; therefore, do not shut your bedroom and living room windows at night or when it rains.

Persons who in recovering from influenza or pneumonia, have lost in weight or strength, should not depend upon medicine alone. Good food is a more valuable tonic. Food should be of the kind that gives the greatest nourishment.

Eggs and meat are excellent food for persons, but when they are fried they can not be readily digested by some persons.

Meals should be taken at regular hours so that the stomach has time to digest the food. However, if one has lost weight, one should take a glass of milk and a slice of bread and butter or jelly between meals.

Milk is recommended as one of the most important foods for building up a weakened body.

Food should be chewed slowly and well.

on the shore here for so long, is now fitted up for the water and will be used to carry heavy equipment in the ferry service. Capt. Roe is getting everything in shape to inaugurate the improved ferry service which will start the 1st April.

Buttercups are in bloom and people are beginning to break up the ground for gardens. A great deal of building is going on and everything points to a prosperous season.

### Correspondence

The Columns of THE REVIEW are open to the public for the discussion of matters of general interest. No notice can be taken of anonymous communications. Letters intended for insertion must be addressed to the name and address of the writer, not necessarily for publication. The opinions of correspondents are not necessarily those of the Review.

Editor of the Summerland Review,  
Summerland, B.C.

Dear Sir:  
Will you kindly allow me more space in your forthcoming issue? Thank you!

In my recent letter to the Review I unintentionally gave a wrong impression to one person, and possibly to others, through a heedless employment of the word "Hebrew." I wished to differentiate the music (?) under discussion as un-American, and the expression "a group of young Hebrews," should have shown that I was not referring to the whole race.

In my humble estimation, the Jews are the most wonderful and interesting people on earth. The brilliant accomplishments of individuals among them in music, art, literature, medicine and law are the brightest spots in the world's progress. The serenity and harmony of their home life, together with the chastity of their youths and maidens are a beautiful example to the whole world. If I were an expert at rhetoric and syntax I should enjoy writing at some length to better convey my admiration and appreciation of this race.

So much for this digression from the topic at issue.

The reason for my dwelling upon the high standing of American Conservatories of Music and the splendid musical instruction given in their public and private schools was that Autolykus, by reason of what he did not say, gave out the impression that the only music (?) composed (?) published and used in the United States was the rag-time variety. His subsequent article shows that he knows better, and what I supposed to be a specific and definite intent to

#### Synopsis of

#### Land Act Amendments

Minimum price of first-class land reduced to \$5 an acre; second-class to \$2.50 and an acre.

Pre-emption now confined to surveyed lands only.

Records will be granted covering only land suitable for agricultural purposes and which is non-timber land.

Parties to pre-emption abolished, but parties of not more than four may arrange for adjacent pre-emptions with joint residence, but each making necessary improvements on respective claims.

Pre-emptors must occupy claims for five years and make improvements to value of \$10 per acre, including clearing and cultivation of at least 5 acres, before receiving Crown Grant.

Where pre-emptor in occupation not less than 3 years, and has made proportionate improvements, he may, because of ill-health, or other cause, be granted intermediate certificate of improvement and transfer his claim.

Records of permanent real estate may be issued, provided applicant makes improvements to extent of \$50 per annum and records same each year. Failure to make improvements or record same will operate as forfeiture. Title cannot be obtained in less than 5 years, and improvements of \$10.00 per acre, including 5 acres cleared and cultivated, and residence of at least 2 years are required.

Pre-emptor holding Crown grant may record another pre-emption, if he requires land in conjunction with his farm, without actual occupation, provided statutory improvements made and residence maintained on Crown granted land.

Unsurveyed areas, not exceeding 40 acres, may be leased as homestead; title to be obtained after fulfilling residential and improvement conditions.

For grazing and industrial purposes areas exceeding 40 acres may be leased by one person or company.

Mill, factory or industrial sites on timber land not exceeding 40 acres may be purchased; conditions include payment of stumpage.

Natural hay meadows inaccessible by existing roads may be purchased conditional upon construction of a road to them. Rebate of one-half of cost of road, not exceeding half of purchase price, is made.

#### PRE-EMPTORS' FREE GRANTS ACT.

The scope of this Act is enlarged to include all persons joining and serving with His Majesty's forces. The time within which the heirs or devisees of a deceased pre-emptor may apply for title under this Act is extended from for one year from the death of such person, as formerly, until one year after the conclusion of the present year. This privilege is also made retroactive.

No fees relating to pre-emptions are due or payable by soldiers on pre-emptions recorded after June 26, 1911. Taxes are remitted for five years.

Provision for return of moneys accrued, due and been paid since August 4, 1911, on account of payments, fees or taxes on soldiers' pre-emption.

Interest on agreements to purchase town or city lots held by members of Allied Forces, or dependants, acquired direct or indirect benefit from enlistment to March 31, 1918.

#### SUB-PURCHASERS OF CROWN LANDS.

Provision made for issuance of Crown grants to sub-purchasers of Crown Lands, acquiring rights from purchasers who failed to complete purchase, involving forfeiture or fulfillment of conditions of purchase, interest and taxes. Where sub-purchasers do not claim whole or original parcel, purchase price due and taxes may be distributed proportionately over whole area. Applications must be made by May 1, 1920.

#### GRAZING.

Grazing Act, 1919, for systematic development of livestock industry provides for granting districts and range administration under Commission.

Annual grazing permits issued based on numbers ranged; priority for establishment of owning stock-owners may form Associations for range management. Free, or partially free, permits for settlers, campers or travellers, up to ten head.

disparage American music turns out to be just a little plunge into generalities. The words "educational models" no longer rattle around disturbingly and jarringly inside my cranium. (Handshaking all around!) I still believe that Canadian schools could in no way deteriorate by the acceptance of American educational models but for an obscure nonentity like myself to champion such models would be the acme of absurdity when they stand in no need of defending.

I love Canada immensely, British Columbia particularly and Naramata especially. (I append "easy on the adverbs, please" Mr. Editor, to save you the trouble) and I am keenly interested in everything pertaining to our development and advancement. It therefore follows that should the jazz germ seek ingress to our public schools I should like Autolykus to consider me a loyal ally when it came to "straffing" the invader.

Sincerely yours,  
MABEL K. WALTERS  
Naramata,  
March 15th.

Summerland, B.C.,  
11 March.  
The Editor, Summerland Review,  
Dear Sir:

I read with much interest in your last issue Mr. F. A. C. Wright's letter stating the Oregon Motor Vehicle laws, and am now wise on some points I was in the past uncertain about. On the evening two weeks ago, when I was pursued by the candidate for road records, I could easily have increased my pace to 17.3 miles per hour, but presuming the hoot of his foot was an indication of his mental condition, I refrained—too bad—as he would have then by one decimal point, have beaten his own standing record.

The other production signed by Wood B. Champyuu conveys to my mind but one impression, that he is a champion, not as a driver of "Mc-Anderson light fives" but as the owner of a head made of the first name in his nom-de-plume.

Yours truly,  
H. M. LUMSDEN.

#### LITTLE WATER FOR IRRIGATION

Oroville Gazette.—Owing to a shortage of snow in the mountains this winter, which means the dangerous curtailment of the supply of water next year on the government irrigation project round Omak and Okanogan, the orchardists of the two towns are figuring on putting in an immense pumping plant to supply the necessary water. That is going to be an expensive proposition, according to reports reaching this locality, but some provision must be made for an adequate supply of water or the source of income that the land owners depend on will be cut off.

At least one testy old bachelor is with the teachers in their requests for better compensation. "Anybody," he says, "who takes the kids off the streets for six hours a day is entitled to all she can get."

#### HORSE POWER

Any grower requiring a good orchard team for the coming season would do well to get in touch with us now.

Order of the Star in the East, Every Tuesday evening at 8.00.

#### SHILOH 30 DROPS COUGHS

#### PUBLIC UTILITIES COMMISSION BRITISH COLUMBIA.

Take notice that application has been made by the Corporation of the District of Summerland to the Public Utilities Commission for permission to increase its Electric Light Rates as follows:

	Existing Rate	Proposed Rate
	per KWH	per KWH
From 0 to 500 Kilowatt hours, per quarter	15c	18c
From 501 to 1000 Kilowatt hours, per quarter	12 1/2c	15c
Over 1000 Kilowatt hours, per quarter	9 3/4c	12c
Minimum Charge, per quarter	\$3.60	\$5.40
With a discount of one-sixth of above amounts for prompt payment.		

Any further information may be obtained from the Municipal Clerk, West Summerland.

Objections to this application stating concisely the grounds therefor may be filed with the Municipal Clerk and with the undersigned, Court House, Vancouver, within ten (10) days from the date of the last publication of this Notice.

Date of last publication,  
26th March, 1920.  
S. J. REMNANT, Secretary,  
Public Utilities Commission.  
38-35

## THE DESERTED FAMILIES

One of the distressing results of the war has been the deserting of their families by a large number of returned soldiers, creating a situation which the Federal Government has been very slow to realize or, if appreciated, little seems to have been done so far to cope with this unfortunate development. In a community such as ours such unhappy developments are not looked for but unfortunately one man who served with the Pioneers in Scotland has seen fit to leave a large family unprovided for. As a community we cannot permit the deserted mother and children to suffer want and some measure of relief is being extended to them by the Municipality. It would seem that the only course open to the Municipal Council is to have the head of the household arrested and brought back on a charge of desertion. Under the circumstances it would seem more proper that instances of this kind should be dealt with by other authorities and in the meantime families of soldiers thus deserted might well be provided for from the Emergency Relief or Patriot Fund.

It is estimated that fully \$350,000 of the Emergency Relief Fund will remain unexpended and it is stated that there is several millions still remaining of the old Patriot Fund. With all this available there seems no reason why women and children thus deserted should not be immediately given such assistance as their circumstances require.

Is it not well within the province of the G. W. V. A. and perhaps some more official organization to bring all possible pressure to bear on the authorities to extend this much needed relief?

## OUR INSURANCE RATES

We have long felt that insurance rates in this province, more particularly the rate asked by the board companies for risks in Okanagan towns, were exorbitant. The report on fire insurance companies doing business in Canada in the year 1918 which report was recently submitted to parliament would seem to substantiate this belief.

Of the amount collected in British Columbia in premiums only 28 1/4 per cent. was returned to the insured in payment of losses by fire. Taking the average all over Canada only about 50 per cent. of the \$38,000,000 collected in premiums was paid out for losses by the fire insurance companies. In British Columbia \$4,140,647 was thus collected and the insured received \$1,198,047 for losses. A fact which renders the situation more unsatisfactory is that less than 20 per cent. of the business goes to Canadian companies. Pointing out this latter fact a writer in the Vancouver World asks: "What is the matter with the people of B. C., through their government, going into the insurance business?"

## SOVIET PLAN REDUCES RUSSIAN LABOR TO SLAVERY

From no less a person than M. Shliaprickor, commissary of labor under the soviet government, comes what is perhaps the most striking coincidence of the ghastly failure of the attempt to give practical effect in Russia to communistic principles that has yet been supplied. M. Shliaprickor's testimony is particularly impressive because he is a member of the Bolshevik regime, he could not have gained his present position unless strongly for Bolshevik principles, and he has a better opportunity than any other to gather information upon the subject with which his recent report on the labor situation in Russia deals.

Reporting on labor conditions he says the average output of all industries in 1918 declined by 50 per cent. from pre-war conditions, while the period from January to August, 1919, shows a further decline below the 1918 figures, of 85 per cent. Individual industries fell off as much as 60, 73, 78 and 83 per cent. As a result adequate supplies cannot be obtained at any price.

The workers, says the Bolshevik commissioner of labor in seeking for cause, have no discipline and their number has been reduced by three-fourths. The whole industrial fabric, he says, is tottering to ruin.

A 12 hour day and an 84 hour week are to be enforced as remedies. The right to strike is removed and striking is made a penal offense. Industrial conscription is to be applied. The Bolshevik commissary says that 20 per cent. of the increase in production is due to the maladministration and pig-headedness of the factory councils. They—the very backbone of sovietism—are to be suppressed and, says the decree, "at the head of important concerns dictators with absolute power of life and death over the employees" are to be established.

A 12 hour day, the right to strike denied, forced labor, with dictators having power of life and death over employees ordered to force men to work—these are the drastic methods Lenin and Trotsky have been forced by the failure of their Bolshevik doctrines to adopt. Russia under the Romanoffs; galley-slavery of sixteenth century France, middle age serfdom know of no such bondage and misery for the workers as the attempt to apply the false and impractical doctrines of communism and the abolition of property have brought upon Russia.

## FARMER IS NOT INDEPENDENT

"Organization, co-operation and education are going hand in hand throughout the agricultural districts of the country," is the opinion of W. J. Rutherford, Dean of the Saskatchewan College of Agriculture, who expresses the following views in the Agricultural Gazette for January. He says:

"Farming is not the independent self-contained occupation that it was a generation ago. Conditions have changed from the pioneer days, and production has not only to do with

supplying the demands of the home but it must aim to create an export trade. Farming is a real business, successfully carried on by men and women who are not only skilful in the art and practice, but are versed in the science of agriculture. Farmers today are not content to know only how to grow good crops they want to know also how to market them to good advantage. They are interested in the economic problems of their own communities and to a great extent in the problems of their customers in the city. Agriculture is both industry and commerce and affects both the rural and the city population. The agriculturist of today is not merely a practical farmer but is necessarily a social worker. Rural communities have problems which require college trained men to solve."

## A SERIES OF TALKS ON MUSIC

There are many of this generation whose never ceasing regret, it is that they did not have in childhood the musical opportunities we are determined shall not be denied our children. The childhood of so many of us was at a period in the country's history when music was too generally regarded as something that could very well be done without, while a musical instrument was only for the homes of the well-to-do.

But we shall see to it that music shall not be denied our children. Music is the God-given right of children, and to deprive them of it is a serious matter. Only two per cent. of all children born are tone deaf. The other ninety-eight per cent. are capable of receiving musical instruction in some form.

We envy the rising generation. There is dawning upon parents and educationists a realization of the necessity of music in character building, in nation building and in developing citizenship. No home and no school should be without music. Music will keep boys and girls at home when parental commands fail.

The study and practice of music develops the child mentally and physically. It makes the boy or girl more nimble of mind, trains him to think rapidly and accurately, trains the eye and the ear, teaches discipline. Music is more than refining. It is practical. Gradually music is getting on the curriculum of public and high schools and the time is coming when it will not be necessary for parents to bear the expense of private musical instruction for their children.

The Review believes that its readers will appreciate the series of musical talks by Prof. C. C. Laughler, publication privileges of which have been secured exclusively for this section of the Okanagan. The first of the series is in this issue. Readers who are but casually interested in music should follow these musical talks as well as readers who are anxious for the musical development of our community.

The author of them is a graduate supervisor of high and public school music. He is teacher of music and singing in the public schools of Bowmanville, Ont. The series was written by him to help the musical development of his town and particularly for the benefit of the children.

## GROWERS' ORGANIZATION HAS REACHED HUGE PROPORTIONS

(Continued from Page 1)

been with the Dominion Cannery at Vernon and Penticton, had been engaged to make a thorough investigation. Mr. McDowall stated that it was the aim of the directors to establish such side industries as will make for the highest returns to the growers on their raw products.

Of equal interest were the figures given by Sales Manager C. L. Lowe, who compared the 1919 exports with those of 1918. Briefly stated these were:

### EXPORTS TO UNITED STATES

(In quantities of carloads)	1918	1919
Prunes	15	15
Crabapples	13	77
Plums	1	4
Winter Banana	5 1/2	1
Delloious	1	42
McIntosh Red	13	74
Jonathans	13	74

### TO GREAT BRITAIN

Apples	128
--------	-----

### EAST OF WINNIPEG

(Including Fruits and Vegetables)	1918	1919
	41	131

Two more sales offices have been established by the O. U. G., one in Toronto and the other in Minneapolis. Mr. Lowe said that the O. U. G. expected to further widen its sales territory and he predicted further success in the sales department.

Speaking of the need of storage, Mr. Lowe stated that the Vernon warehouse had paid for itself twice over, in making it possible to save fruit from freezing and to more efficiently handle the crop. Frost last year had destroyed enough fruit which, if saved would have paid for building the very finest warehouse big enough to care for the requirements of the next ten years.

The speaker maintained that there is not a business of any consequence on this continent that has reduced its cost of business in any proportion to that achieved by the O. U. G.

The meeting was presided over by President Simpson, of the S. F. U. who spoke briefly on the financial statement.

By motion the meeting authorized the incoming board to pay a dividend of 6 per cent. on the paid up capital.

At the request of Mr. R. V. Agur, speaking for the B. C. F. G. A., the secretary was authorized to circulate the members respecting mem-

bership in the B. C. F. G. A., stating that if no objections were received membership in the Association would be taken out for the members of the Union and the fees charged to each member.

Messrs. Hayes and Hutton of the Storage Co. spoke briefly on the importance of giving financial support to this undertaking.

The members passed a resolution approving of a small tax per package to assist in establishing a reserve fund for the B. C. F. G. A.

The members of the 1920 Board of Directors are: Messrs. Simpson, Rolt, G. Thornber, Hayes, S. M. Young, Dodwell and C. Eisey.

Resolutions were carried unanimously expressing appreciation of the management of the O. U. G. whereby its markets had been expanded in the domestic and foreign fields while economy has been a characteristic feature of the operations; expressing gratitude to the retiring directors for the very efficient management of the local Union, and that the members of the Board be paid in the future \$3.00 per day for each meeting of the Board.

## COVERING IRON WITH IRON

During the war many worn parts of aircraft machinery and motor vehicles used by the British forces were rapidly repaired in a remarkable way. The metal worn away was replaced by depositing a film of iron by means of electricity. This process was applied in the case of ball bearings and other parts where even a minute amount of wear was so serious that scrapping would be necessary. It was also used with good results in saving from the scrap heap any parts of machinery which had accidentally been made a few thousandths of an inch too small. The problem of electrically depositing iron is a very difficult one, but the methods, applied by British engineers were most successful. By means of heat treatment the deposited film becomes so closely welded to the metal that microscopic examination can detect no dividing line. Much of the research work in this matter was carried on at Sheffield University.

### What Thoughts

The most consoling thing about going to the movies is seeing so many women in the pictures opening their mouths and not saying a word you can hear.

## Highly Praises B.C. on Fight Against the Codling Moth

### Wenatchee Horticulturist Cites Practice in This Province Example for His State

British Columbia as a fruit growing country was given some valuable publicity recently by an address delivered in Spokane at a joint meeting of Washington State Horticultural Association and the North West Fruit Growers when Mr. P. S. Darlington, district Horticulturist of Wenatchee, highly praised the Dominion and Provincial horticultural officials in British Columbia for the successful manner in which they have kept this province practically free of the codling moth.

The speaker said in part: "The codling moth was introduced into this state many years ago and has pretty thoroughly disseminated itself over the older apple growing sections of the state. In 1918 the Wenatchee district alone spent about \$500,000 in an attempt to control this pest and then took a direct loss of \$4,000,000. In contrast to this, British Columbia had no direct loss from codling worms in 1918. In British Columbia it has not been a question of codling moth control, but of its extermination.

"Codling moth has been introduced into British Columbia, but in each case a quarantine has been thrown around the infested area and rigid measures taken to stamp out the pest before it became widespread. Today British Columbia has 40,000 acres of orchards, mostly apples. In 1918 these orchards produced about 3,000 carloads of apples and production is rapidly on the increase and still British Columbia is a codling worm free province with the exception of two or three small areas now under quarantine and in the process of moth extermination.

"Today there are in this state certain apple growing localities of more or less limited area to which the codling moth has not yet migrated. Are the growers in these infested or slightly infested districts going to play a game of watchful waiting while the worms slowly encroach upon them year by year? I incline to the belief that it is possible to exterminate the codling moth even in the old badly infested districts. In 1918 Sunnyslope was the wormiest community in the whole Wenatchee district, but the infestation in a year has been reduced from 20 to 2 per cent."

There were only four automobiles in the United States in 1896.

A British paper makes the announcement that Lord Byng of Vimy may be the next Governor-General of Canada.

Passing Events: Social, Personal, &c.

Mrs. Russell McFadden has gone down to Sault Ste. Marie to visit friends.

E. Tucker of Chilliwack is a visitor to Summerland, intending to purchase an orchard.

On his way home from Victoria, Mr. Reg. Galloway of Pilot Mound spent last Sunday with the Elseys here.

Dr. F. W. and Mrs. Andrew arrived home Wednesday morning from a visit to South California and Hawaiian Islands.

Scott Rand has bought from James Ritchie a block of land just north of the corner lot that is to be used by Wm. Ritchie as a lumber yard.

H. S. Detjin, son-in-law of Jos. Brent is negotiating through the Soldier Settlement Board for the purchase of the Bowen Ranch southwest of the municipal reservoir. Her many friends will regret to

learn that Mrs. B. L. Hatfield has been losing in strength during the last few days. Throughout her long illness she has made a spirited fight but it is feared that the end is not far off.

Mrs. M. M. Robinson has about reached the end of a long and active life. She has been ill for the last few days and relatives have been advised by the attending physician that the end may be expected at any time.

On a recent Saturday night and Sunday morning a private citizen of Penticton unloaded and put in his cellar a carload of liquor shipped from Montreal. The consignment comprised 611 cases which totalled 7332 quart bottles.

Much sympathy is expressed for the Rev. W. H. Bates and family, practically every member of which household has been ill, and especially because of the more serious illness of the eldest son, Willie, whose condition is now said to be somewhat improved.

Although there are here and there throughout the district households in which influenza is to be found the local authorities have not thought it necessary to keep the schools closed longer. The Board is making formal announcement in this issue of the re-opening of the schools on Monday.

The highway between Mineola and Summerland is reported to be in a very bad condition, especially that portion of the road north from Faulder station to Mineola. For a time it was quite impassable and the Summerland Lumber Co. were forced to put some men to work on the road in order to re-establish communication with the railway and Summerland.

His many Summerland friends are delighted to note the success John MacLeod, a former Summerland boy, is meeting in his studies at the University. Recently he was selected as one of the undergraduates to represent the University of British Columbia in debate with the students of Washington University. We can be sure that he did credit to his class. John was a former student of Okanagan College here and before leaving Summerland was physical instructor at the College. He is the second son of Rev. A. W. and Mrs. MacLeod. Their third son, Leighton, is also a student at the University. Both boys were overseas.

A practical committooman, in presenting diplomas to a graduating class spoke as follows: "Girls, in presenting you these diplomas, if, by their significance you are led to allow your mother to do all the work, bake all the bread, sweep all the floors because you can read Latin or demonstrate a theorem in geometry, then has your school been a most unfortunate course, and in all the teachings you have ever received at my hands, I trust there has been no lesson that has weaned you away from the dish pan. Boys, if from this graduation you go out into the world too nice to carry wood and swill the hogs, if need be, then has our school failed in its purpose and sown the wrong seed."

No Need Music Teacher: You should pause there. Don't you see that it is marked rest? Yes, teacher, but I won't tread.

Mr. J. A. Morrison, the new C. P. R. agent here arrived on Thursday with his wife and two daughters from Vernon.

Mrs. Hurd, who has been visiting here with her daughter, Mrs. A. S. Peck, left on Tuesday to return to her home in Vancouver.

Mr. and Mrs. R. S. Jackson, formerly of Calgary, are now in possession of their orchard property on Jones' Flat bought from J. Wernick. They were for a few days the guests of Mrs. A. C. Stuart.

Mrs. Marie Matilda Brent, wife of Ferdinand Brent, of Shingle Creek, died on Sunday morning following an attack of influenza. Her death has rendered six young children motherless, several of whom are ill with flu as is also the bereaved husband.

Capt Weeks of one of the C. P. R. tugs took an involuntary plunge into the lake a few days ago. He pronounced the water very cold. It was while the tug and barge were moored to the wharf here that the accident occurred. Capt. Weeks was walking a plank from the barge to the wharf when it tipped and gave him a straight drop into the lake.

The Gartrell block, until recently occupied by the Drug Co., Devitt's Meat Market and others, is being torn down. Insufficient foundation for the springy soil on which it was erected is the reason the building is being razed. Some of the plate glass and other material has been bought for the new Summerland Garage building and more of it for the new meat store Reeve Campbell is building for J. Dowton.

Though assurance was given by the Post Office authorities that no instructions had been issued altering the rules respecting Coast mail arriving for the Summerland post office on the Sunday morning train, such mail was carried by again on Sunday last being the second Sunday that this has occurred. The courier was at the station and was given the bags for the upper post office and was told that was all there was for him.

The Lakeside Stock and Dairy Co. property, about 65 acres, has been bought by Mr. Claude Evans. Mr. and Mrs. Evans, who since they were married some months ago, have been in California and at the Coast, arrived here a few days ago and are now making arrangements to live on their new property. Mr. Evans' father is the owner of the orchard operated by F. G. Barnard. His brother, James, was a resident here for a time about eight years ago.

IT CAN BE DONE!

Somebody said that it couldn't be done, But he, with a chuckle replied That "maybe it couldn't," but he would be one Who wouldn't say so till he'd tried. So he buckled right in, with a trace of a grin On his face. If he worried he hid it. He started to sing as he tackled the thing That couldn't be done, and he did it!

Somebody scoffed: "Oh, you'll never do that; At least no one ever has done it." But he took off his coat and he took off his hat. And the first thing we know he'd begun it. With the lift of his chin, and a bit of a grin, Without any doubting or quiddit; He started to sing as he tackled the thing That couldn't be done, and he did it!

There are thousands to tell you it can't be done; There are thousands to prophesy failure; There are thousands to enumerate, one by one, The dangers that wait to assail you; But just buckle in with a bit of a grin, Then take off your coat and go to it; Just start in to sing as you tackle the thing That "cannot be done," AND YOU'LL DO IT! —Edward A. Guest.

Rev. T. W. Reed was the speaker at the morning service in St. Andrew's Church last Sunday.

Mr. and Mrs. John Wernick and family left last Friday to return to their former home at Antala, Astoria, Russia.

Fred Brind is negotiating through the Soldier Settlement for the purchase of the Koop property in Meadow Valley.

Ned Fulton is again out of hospital where he was for a few days suffering from rheumatic fever. He has taken an office position with G. R. Hookham & Co.

Two ten acre blocks, Nos. 4 and 10, of the Agur property just west of George Carr's orchard lot have been bought by Messrs. F. M. Duncan, H. McDougall and J. W. Mitchell, three young men from Manitoba who have been in the district for some weeks.

The K. V. R. ran a special train to Westbridge in the Kettle Valley the other day to take Dr. White to the section foreman's family, the members of which were all down with the flu. K. V. R. men offered their services gratis to operate the engine but the company decided to go the whole way with the gift. —Penticton Herald.

SUMMERLAND WEATHER REPORT

Below is a report furnished by the Dominion Experimental Station here for the week ending Tuesday:

Table with columns: Date, 1920, Max., Min., Rain, In., Sunshine. Rows for Mar. 10, 11, 12, 13, 14, 15, 16.

Nothing annoys a gabby man more than to bump into someone who can talk just as fast and just as long as he can.

Butter is being sent through the post offices in fairly large quantities to England. This traffic has grown throughout Canada in a surprising manner, and has taken such a place in the parcel post business that the postal authorities in Ottawa have issued regulations instructing the public how butter must be packed.

It is a strange fact that eggs of sea fowl are almost conical in form, so that they will only roll in a circle. As many of them are laid on the bare edges of high rocks this provision of nature prevents them from rolling off.

WEDDING

EMBREE-MILLER A very pretty wedding was solemnized at the home of Mr. and Mrs. Fred S. Miller on Tuesday, at 3 p.m. when Miss Alice Gertrude Miller was united in marriage to Mr. John Jory Embree, both of Trout Creek. The bride entered the drawing room on the arm of her father who gave her away. The ceremony was performed by the Rev. Jas. Stoodley in the presence of a number of friends. Miss Reeta Bender was bridesmaid and Mr. Lloyd Miller supported the groom. The bride wore cream silk crepe de chene and carried a bouquet of white carnations and sweet peas. The bridesmaid was dressed in pale blue silk and carried pink carnations. Miss Bertha Johnston played the Bridal Chorus. Five o'clock tea was served and the bridal party left amid the ringing of bells and an abundant shower of confetti to board the Sicamous en route to Calgary and other places for a short honeymoon, after which they will be at home to their friends in their cottage at Trout Creek. We wish them much happiness. —Contributed.

OBITUARY

ELEANOR RANDALL WHITE On Thursday afternoon Miss Eleanor White, elder daughter of Mr. and Mrs. G. J. C. White passed to her rest following a brief illness of influenza from which pneumonia developed. She was the second of a family of three, being 31 years 9 months of age. Beside her bereaved parents she leaves one brother, Gilbert V. White, and one sister, Mrs. Walter M. Wright. The funeral will be held from the home on Saturday afternoon at 3 o'clock.

PUBLIC SCHOOL NOTICE. Notice is hereby given that the Public Schools and High School of the Municipality of Summerland will re-open on Monday morning next, March 22nd. By Order, J. H. BOWERING, Secretary.

Postponed! The Re-Opening of The Rialto Theatre has been postponed Until Saturday, March 27. Watch For Announcement Of Programme.

## .. The Winding Trail ..

**MORE ABOUT SUGAR**

The enquiry into the whys and wherefores of the sugar shortage has brought to general attention some facts which doubtless were known already in a hazy sort of way, but which were not properly appreciated. Amongst other things emphasized we have to note that the world is consuming much more sugar than it used, and that there is actually a world shortage—also that the past season's shortage in this part of the world was greatly aggravated by Vancouver strikes, eleven thousand tons being lost to us at one fell swoop when a certain ship carrying that quantity was forced to divert her cargo to San Francisco because Vancouver longshoremen refused to unload it. This was in addition to the fact that Vancouver refineries were idle for thirty days at a stretch through strikes of other operatives. It is well to keep these facts in mind, because strikes have been largely aggravated by the slow awakening of public opinion, which is, after all, the real arbiter of these matters. The first realization of this truth came with the formation of the Citizens' League in Winnipeg, and it is quite easy to trace the beginning of the end of needless and abortive strikes since that time. However, that is by the way. The matter of an actual world shortage of sugar is a factor which seems impossible to get around—if it is really true. We have at various times, been confronted with these "world shortages" by food experts, and have found them often based on some error of calculation, which only became evident by the logic of facts. A shortage of wheat, for example, has been more or less regularly demonstrated—on paper—for the past few years, but in no case has the actual position supported the expert calculation. Therefore we may perhaps accept this latest dictum with a large grain of salt (unless mayhap there is a shortage of salt also) and look to other avenues for explanation. Prohibition is no doubt a factor in the situation through the increased consumption of soft drinks and candies, but whether it works to such an extent as indicated, is uncertain. The advocate of moderation—the really temperate individual—may at least claim one subdued growl at being kept short of sugar in his coffee, as well as deprived of his glass of wine, by reason of what he considers intemperate legislation.

On the whole it seems as if much of the past sugar shortage in this part of the country was directly due to an amazing waste of time in the various strikes which held up production. As the strike remedy is fast becoming obsolete, it may be reasonably hoped that this particular form of leakage is stopped, and that the sugar refineries will be able to handle all the raw material they can get—also that none of the latter will, in future, be driven away from our docks for want of hands to unload it. For the rest—it lies with the Canadian people to keep intelligent watch on affairs through their representatives, to the end that none of their fair proportion of this necessary commodity shall be diverted elsewhere for the sake of increased profit. The cries of a "world shortage" and the needs of "starving Europe" are doubtless sincere, but they are too abstract and nebulous to appeal permanently to those who hear them so often. They bear a certain analogy to the "mission" of Mrs. Jellyby to ameliorate the condition of the natives of Borribooola-Gha, while her own children were tumbling up through life as best they could. And we have yet to be shown that this old world cannot produce all the commodities it needs, if it will give its mind to the work.

—AUTOLYCUS.

## Britain Desires Okanagan Apples

**Better Grading Causes Growing Popularity with Greatly Increased Sales.**

British Columbia apples are increasing in popular favor in Great Britain, due to the approved manner of grading and high color which appeals to the English buyer. This information is contained in a letter written by Mr. J. Forsyth Smith, Canadian Trade Commissioner, to the agent-general for British Columbia. During the season which is now drawing to a close Okanagan growers have shipped 300 carloads to the Old Country as compared with 25 to 35 cars in previous years. The letter in part is as follows:

"This year, however, has been an entirely new departure. Very greatly increased quantities with some of the best pack and quality, have come forward, and have marked the first step toward British Columbia assuming that important place in the apple market, which the superior quality of her apples entitled her to occupy.

"Including, besides actual arrivals, some lots that are definitely expected, the total shipments this season are 196,171 boxes, or over 300 standard cars, an immense stride in advance as compared with 25 to 35 cars in previous years. It is quite likely there may be some increase in this before the season is over.

"Already the effects of the season's shipments are seen in the greatly enhanced reputation of the British Columbia product, and if our province continues and develops her present policy of shipping large quantities of her best packs regularly to the four principal apple markets in this country, Liverpool, Manchester, Glasgow and London, no long period will

elapse before British Columbia apples are generally recognized as they are already in some quarters, as among the best received in the United Kingdom.

### Most Popular Variety

"With regard to varieties, I may say that Yellow Newtowns are especially appreciated, and that Cox's Orange Pippins, little appreciated on the home market, are prime favorites over here, bringing the very highest values when of good color and medium size, and when the market is unrestricted British Columbia has a great advantage over her American competitors in the production of this popular English variety and it is scarcely shipped at all from Washington and Oregon. The fact that it has been planted in fair quantities in British Columbia is probably due to the fact that our English settlers have carried across with them their preference for a variety that stands first among the products of the English orchards, in the estimation of the consumer, as it is not especially appreciated on the American and Canadian markets.

"The Jonathan, which is the variety most largely grown in British Columbia, is very highly thought of, on account of its attractive red color and apart from the Orange Pippin, which is received in limited quantities, has attracted most attention among apple buyers.

### McIntosh and Delicious

"The McIntosh Red is not yet fully appreciated in the United Kingdom

as this is the first year in which considerable quantities have been received in the box pack (Washington and Oregon are not producing this variety) and the barrel pack usually fails to arrive in satisfactory condition. So far it has generally failed to secure the values brought by the Jonathan, but I am confident that its outstanding quality will eventually secure it due recognition. Delicious, regarded in British Columbia as one of the best varieties produced, has only reached this market in small quantities, and it will surprise our shippers that it has so far fetched 1s. to

2s. below the Jonathans, though comparative values on the home market may be illustrated by the fact that when Jonathans No. 1 are sold at \$1.25 f. o. b. a corresponding value for the Delicious is \$2 to \$2.25.

"It may be of interest to state that this year, representations made to British importers as to the rapid development of the British Columbia industry were instrumental in inducing a considerable number of them to visit that province for the first time, where they have been successful in forming promising connections."

# WEAR CANVAS

The family problem today, at present High Cost of Living is fast becoming one of "What shall we eat, what shall we drink, wherewithal shall we be clothed?"

Parents with fixed incomes are finding it more and more necessary to exercise the most rigid economy.

The need of substitutes, brown sugar for white sugar, cotton clothing for woollen clothing, canvas footwear for leather footwear and so on is increasingly a real one. To alleviate this situation the manufacturers of Canvas Footwear have produced a range, both leather soled and rubber soled, calculated to

meet the needs of every wearer from the smallest child to the largest man, either for indoor use or fine street wear or the roughest use in workshop or field.

My

# Musical Talks.

Written by Prof. C. C. Laugher, Mus. Bac., Bowmanville.

## No. 1—TALE OF THE ORCHESTRA

(C. C. Laugher, Mus. Bac., Bowmanville, Ont.)

The word "orchestra" was originally used by the Greeks to designate the front of the stage. Later it was reserved for distinguished visitors and now it refers to the place where the musicians are stationed and is also the name used for a collection of musical instruments forming a full band.

The last named is what I wish you to remember as the Orchestra of my talk, but from what and how came the orchestral instruments?

We will go back to the beginning and review from the days of the savage.

The savages danced around the big fire, weird dancing, jumping dancing, yet this dancing was regular and rhythmical, but not so graceful as we now understand dancing. Now with all dancing there must accompany it rhythmical expression or noise to announce the strong and weak accent. This was done by the orchestra (3 persons clapping their hands) emphasizing the rhythm. The hand clapping formed the natural instrument. Following this the rattles, clappers and drums were invented, these giving more taps producing variations with greater expression, which was heard at a greater distance.

The whistle of the mouth suggested the tube whistle or reed, or of a hollowed stick.

The wind instruments (horn) were suggested from the whistle of the mouth with hands placed around lips forming a bell to produce bigger tone. The horn of the antelope and the elephants' tusks were used and was the outcome of it.

The drums may be considered the most useful of that period and many sizes and shapes were made. The natives hollowed out the trunk of a strong tree and stretched across the top a strong piece of dried skin. Another drum in use is from a smaller tree, hollowed out but leaving a thin sheet of wood at the top. The drums were played with two sticks.

Gongs, castanets and blocks of wood and a rude form of xylophone added.

Stringed instruments were suggested by the twanging of the bow string (bow and arrow).

These primitive instruments form the basis of our modern orchestra which is now a wonderful combination of instruments, all well fitted for refined musical purposes. The orchestra used for operatic purposes is chiefly for the instruments to reinforce the various characters.

Now to mention some of the composers that I think were most instrumental in producing the advancement of the orchestra.

Lulls of the 17th century brought together various instruments and developed the orchestra.

These primitive instruments form the basis of our modern orchestra which is now a wonderful combination of instruments, all well fitted for refined musical purposes. The orchestra used for operatic purposes is chiefly for the instruments to reinforce the various characters.

Now to mention some of the composers that I think were most instrumental in producing the advancement of the orchestra.

Lulls of the 17th century brought together various instruments and developed the orchestra.

Rameau introduced the clarinet and reed instruments.

Bach gave the orchestra free and independent instrumental development.

Haydn (Grandpapa) gave a humorous expression to the orchestral compositions.

Beethoven the great master of symphonics introduced the technical mastery of the individual instruments.

Wagner gave character to the instruments which at that time was a daring innovation.

Berlioz introduced music of a program nature that was said to cause one eye to laugh and the other to weep, being distinctly conflicting sentiments.

Now a word of advice— Seek to hear the wonderfully matured symphony orchestra of our time, and note the broad, musical and educational influence.

How to appreciate the music when listening to the orchestra.

This humorous phrase may suffice: "After the orchestra had reached the first part of the symphony, a woman sitting just behind Dave Morrison began telling her companion at great length and in a decided loud undertone, how delightful it was to listen to the music with the eyes closed. Morrison put up with the muttering as long as he could, then tur-

ing to her said, "Pardon me, madam, but did you ever try listening to the music with the mouth closed?"

Next article will be on the most popular musical instrument of the day.

### A FLY FACTORY

Delegates who visited Penticton when the Goods Roads League Convention was held there a year ago, will read with lively interest of the determination of Penticton citizens to have a "white restaurant." That hash house run by Orientals there in 1918, which the convention delegates had to patronize on occasions when they failed to get a satisfactory meal at any of the hotels, was certainly a blot on fair Penticton. It was really a fly factory. — Western Canadian Motorist.

### FOR SPRING OF 1921 PLANTING

We have made liberal provision and will have many thousands of trees of leading varieties to offer of choice quality, grown in the Chilliwack Valley, where we get a splendid root system and vigorous growth.

The available supply of NURSERY STOCK is likely to be less than the demands for the coming year. We therefore advise planters to place their orders with us as early as possible and avoid disappointment.

We already have quite a few orders on our books for Spring 1921 delivery. A word to the wise should be sufficient.

### Peachland Doings

A Weekly Chronicle Furnished By Our Local Representative.

The regular meeting of the W. C. T. U. held at the home of Miss M. Smith was an interesting one, with a fair attendance. A committee was appointed to arrange with the prohibition committee for a joint meeting to hear the report of the prohibition convention held in Vancouver, as given by the delegate, Mr. H. E. McCall.

Mrs. Henry Burtch of Kelowna spent a few days of last week in town visiting her sisters, Mrs. J. L. Elliott and Mrs. John Wright. She left by Monday's boat for points down the lake.

After spending a few days here visiting his brothers, Mr. Ephraim Brinson with his wife left on Wednesday for Pentiction where they purchased a home. They have rented it till the fall as they do not wish to settle there till that time, and returned on Saturday to Peachland to visit for a while before extending their visit westward and southward.

Mrs. Musson returned to Peachland on Friday last expecting to remain here indefinitely, after having spent a few months visiting her daughter on the Coast.

The finals of the checker tournament which has been reported from week to week was not finished owing to some of the players not having turned out at times to play the scheduled games. However the tournament was closed with Mr. J. Brinson and Mr. Wm. Dryden in the lead as follows: Mr. Brinson 23 wins out of 9 games played and Mr. Dryden 20 wins out of 8 games. A new tournament has been started with two classes A and B. It was found through the playing in the last tournament that it would be well to have these two classes in order to have more even play in each class. Class A consists of the following players: Mr. Dryden, Dr. Buchanan, J. Brinson, R. A. F. Moore, W. E. Morsch, C. G. McDougald, H. Miller. They have played two draws as follows: Thursday, March 4; W. Dryden and Dr. Buchanan — Dryden 2 and 2 draws; J. Brinson and R. A. F. Moore — Moore 3 and Brinson 1. Others not on deck: March 11th; W. Dryden and R. A. F. Moore — Dryden 2; Moore 1 and 1 draw; Dr. Buchanan and J. Brinson — Buchanan 2, Brinson 1 and 1 draw; W. Morsch and H. Miller — Miller 2, Morsch 1 and 1 draw. The B class consists of the following: M. D. Ross, A. E. Henderson, E. F. Brinson, R. White, R. Walters, J. G. McDonald. March 4th draw resulted as follows: M. D. Ross and A. E. Henderson — 1 each and 2 draws; R. White and E. F. Brinson — White 4. March 11th draw; M. D. Ross and E. F. Brinson — Ross 4.

### St. Patrick's Day Celebration

The 17th of Ireland was celebrated in Peachland by the Women's Institute putting on an Irish concert. The hall was packed by a very appreciative audience. The door receipts totalled about \$37 which was very good considering the admission fee was only 25c. Reeve R. J. Hogg acted as chairman. Mention must be made of two of the numbers of the program, being composed by local people. The first item, solo—"The Irish Do Their Part," sung by Mrs. Mitchell, was composed by Mr. S. J. McGirr. The play in three scenes was written by Miss M. Smith. Mrs. Mitchell acted the part of the Irish Count. The city relations were Mrs. Dryden (mother), Mrs. Walters and Miss Ilyva Murdin (her two daughters) Mr. Smalls and H. E. McCall as Horace de Weirs and Dr. Lawrence were suitors for the hand of Miss Neil. Mr. M. D. Ross acted the part of butler to perfection.

#### Program of St. Patrick's Day Entertainment.

- Audience The Maple Leaf, verse and chorus.
- Chairman's Address.
- 1 Solo "The Irish Do Their Part" Mrs. Mitchell
- 2 Violin Selections Mr. W. Fulton
- 3 Duet Serenade Mrs. Elliott and Mrs. Wright
- 4 Recitation Irish Names Miss Frances Clements
- 5 Solo Ireland, I love you, Acushla Machree Mrs. Mitchell
- 6 Irish Reading Mrs. C. L. Miller
- 7 Solo The Old Green Isle Mrs. Watson Clark
- 8 Duet Last Night Mrs. Elliott and Mrs. Wright
- 9 Solo The Tumbledown Shack in Mrs. Wright Athlone
- 10 Play An Irish Aunt's Visit to Her City Relations 1st Scene
- 11 Solo Dear Old Pal of Mine Mrs. Elliott 2nd Scene
- 12 Solo Phil the Flutters Ball Mr. A. H. Cutbill 3rd Scene

Mrs. R. Walters spent the weekend in Vernon, returning on Monday.

The regular meeting of the Women's Institute was held on Friday last. After the usual business was transacted a short program was carried out when Miss Smith read an address on behalf of the Institute to Mrs. A. Town and a beautiful bouquet with streamers was presented. Mrs. Town replied in a few well chosen words. She has been an ardent member of the Institute ever since its organization here and will be very much missed.

Saturday afternoon saw the first auction sale held here for a number of years. The Rev. Wm. John Scott put up for sale a portion of his household goods. Mr. Ephraim Brinson acted as auctioneer and Mr. H. E. McCall as clerk. The bidding was for the most part lively and the various articles sold brought a fair and satisfactory returns. On the whole Mr. Scott was well satisfied and those who bought, bought at quite a saving in most instances as compared with the present high costs prevalent. Mr. Scott and his daughter continued their visit over Sunday and Mr. Scott filled the pulpit in the Baptist Church on Sunday afternoon. The theme of his message was "Have Faith in God" which was well and clearly put before the congregation and it would not be out of place to mention that the speaker is a marked exemplification of the practice of this exhortation in his recent bereavement. They left on Monday morning en route for Winnipeg where they go to reside with the married son in that city, and we voice the thoughts of his friends here when we wish him God speed.

After the auction sale on Saturday last Mrs. Town entertained many of her friends and acquaintances to a very dainty afternoon tea, which was enjoyed by all.

Mr. W. D. Miller spent the weekend at Pentiction, returning Monday morning.

Mr. R. A. F. Moore left on Saturday morning accompanied by A. Town and J. Hyde for Vancouver by the auto route to Princeton, then by rail to Hope and on to Vancouver with the auto. Mr. Moore was engaged by Mr. A. Town to take his auto to the city. He and Mr. Hyde may return by truck over the same route.

Mr. and Mrs. A. Town and family left Monday on route for Vancouver where they have taken a house. Their many friends here were down at the boat to bid them goodbye and wish them well. They will be greatly missed in the community, having

### RESUMING WORK ON IRRIGATION SYSTEM

(Continued from Page 1)

that work on this flume be started at once. The engineer was also instructed to proceed with any other approved work as quickly as weather conditions will permit and men can be obtained.

It will require over 1,100 feet of pipe to carry domestic water to the lot east of Paradise Flat bought recently by S. E. Davies, according to a report submitted by Foreman Dickson. Until this pipe is laid a stand pipe will be provided.

The Clerk was instructed to arrange with the municipal solicitor to take the necessary steps to apprehend A. E. Walker, now said to be in Vancouver and who the Council has been formally informed, has deserted his wife and family.

The Reeve reported having sold both municipal teams, the blacks to Mr. V. J. Nicholson for \$450, including harness and the larger team to a lumberman operating near Pentiction for \$475, with harness. The black team will remain with the municipality until April.

An application made by R. H. Atkinson for irrigation water to the east half of block 47 D. L. 675 was granted.

The Clerk was instructed to prepare the necessary by-law to cover the exchange of roads in Peach Valley being made with the Development Company, this bylaw to be approved by the municipal solicitor.

Supt. R. H. Helmer, of the Experimental Station, wrote pointing out the vital importance, especially to land owners on the lower levels, of having irrigation water much earlier than last year, otherwise there will be poor germination of seed and light yields of hay crops. He suggested that an early irrigation be given before repairs were undertaken. The members of the Council agreed that every effort should be made to give an early watering and the work will be so arranged as to permit this wherever possible.

Application was made by T. J. Garnett for water to several lots on the hill south of the park. Referred to foreman.

R. Kercher was granted irrigation connection to a piece of land in Garnett Valley.

A request from W. Mack for the use of two lots beside his home, for garden purposes, was referred to the Properties committee.

A request from W. R. Shields for irrigation water was referred to the foreman.

Application was made by the owners of blk. 4, one of the Agur lots in Prairie Valley, for direct irrigation connection. This was referred to the water committee.

J. Tait waited on the Council and urged his request made more than a year ago for irrigation to lots east of S. B. Snider's. He was told that a survey of this district had been made and that a decision would be made by the Council as soon as the engineer's report was received.

Gasoline sold for 6 cents a gallon in 1908.

been at all times ready and willing to help with anything for the good of the community.

Mr. and Mrs. J. M. Robinson of Naramata were visitors in town on Monday last, and while here were guests of Mr. Robinson's sister, Mrs. M. E. McDougald.

Mr. E. Brinson was a passenger north on Monday last to meet a cousin and his wife who were coming down the Valley to visit our district.

Francis and Eddie Cousins arrived home on Monday last from DeMuth's mill where they have been working most of the winter.

The Stock Breeders' Association held a meeting on Monday night to further discuss the cow pasture question. After a very lengthy discussion the members present decided to call a public meeting of all citizens to deal with the question.

John McDougald came up from his ranch with his team and wagon and is spending a few days in town before leaving with Mrs. McDougald to return to the ranch.

Mr. Chidley left on Tuesday evening on route for Vancouver to spend a few days.

Mr. E. J. Waters spent Tuesday in town a guest of the Morsch family.

### MORE 'FLU DEATHS AT KELOWNA

Last week's Kelowna papers recorded the death from flu of four more citizens, all of them being mothers with families.

The death of Mrs. T. A. Woods, already noted in these columns, occurred on Friday, March 5th. She leaves three young children, the eldest of whom is now in Summerland with the late Mrs. Wood's aunt, Mrs. J. Downton.

Only two weeks after the death of her sister, Mrs. J. Leathley, Mrs. F. V. Royle passed away on Monday the 8th.

On the 8th Mrs. E. Gauvan was added to the toll of the flu epidemic in that sorely stricken community. She leaves six young children, all under eleven years of age, the youngest a baby of but a few weeks.

Another Kelowna victim of the epidemic was Mrs. Wm. Shand, of Okanagan Mission.

Information from Kelowna this week indicated that the epidemic is subsiding and it is probable that schools will re-open next week.

### Be Prepared

The war has taught us the importance of preparedness.

Sickness may overtake you without warning— are you prepared?

Open a savings account to-day and possess the assurance of your ability to meet all emergencies.

### THE DOMINION BANK 555

SUMMERLAND BRANCH, O. F. ZIMMERMAN, Manager.

The Vernon branch of the Retail Merchants' Association has decided to keep the stores of its members open on Thursday in weeks containing a statutory holiday.

The current of commerce gets its name by a corruption of the word Corinth. The port of Corinth, Greece, was originally the point from which these goods were shipped. They are produced in the Ionian Islands. It is really a small variety of grape.

The Vernon Great War Veterans Association has sent a strong letter of protest to the City Council in connection with the recent leasing of city property to Orientals.

Such was the success of the excursion last summer to the Okanagan of members of the Vancouver Board of Trade that another trip into the Interior is being planned. The party will visit the Boundary and Kootenay districts.

## NO INCREASE IN LIGHT RATES UNTIL APRIL FIRST

Such is Ruling of Public Utilities Commission. Council Appeals to Contractors For Help.

At times there was barely a quorum at the regular meeting of the Municipal Council on Monday. Councillor Johnston who has been in poor health for several weeks was not able to attend and one or another of the councillors were absent for parts of the session which extended into the evening. The agenda was largely one of routine with a good part of the afternoon taken up with several ratemakers each coming with a request to the Council.

Not a very promising report was made by Foreman Tomlin on the application of T. J. Garnett for water for six acres on the hill south of the Park. This was referred back to the foreman for further particulars respecting a possible pipe connection from near the school building.

Mr. Davies, new owner of the Kelley lot east of Paradise Flat, with Mr. Kelley as chief spokesman, again pressed for immediate domestic water connection. Until a new pipe is laid he was promised a standpipe to empty into a flume which will carry the water to his lot. Mr. Davies purposes putting some livestock on the place as soon as water is available. He reported some bad holes on the road near the Gray ranch, formerly the Aitchison ranch, to which attention was promised.

A change in a road on the north side of Jones Flat asked for by E. F. Sanborn had been referred to the roads committee. Mr. Sanborn waited on the Council on Monday when the report was considered and on motion the road was ordered changed from its present surveyed route to one following along the edge of the hill above the ditch and on Mr. Sanborn's property.

A standpipe near Orr's corner was promised. W. A. Caldwell who had applied for domestic water to his

## Pushing Work on Main Flumes

Contractors Loaning Men for Essential Work

With the additional help of carpenters loaned by the local contractors splendid work is being done on the municipal flumes. A good start has been made on the trestle work to the east of Jones Flat and on the Thompson ditch where some of the gullies have been spanned and several of the bad curves greatly improved. All along there the trestle will support the steel flume, which is being put in position as the lumber structure is being erected. A small crew of men are working on the south main putting in new and larger flumes and a start has also been made on the flume work on the Giant's Head main running south from the James ranch. Another crew is at work on the Jones Flat lateral flume.

The patriotic response made by the contractors and their employees to the appeal for carpenters deserves much praise. Without this help it is doubtful if some very essential work could have been completed in time for the beginning of the irrigation season. Those for whom the contractors were building houses or doing other work will also win the gratitude of the water users in their allowing the work to be suspended for a week or two while the carpenters went to the Municipality.

Penticon's 1920 tax rate has been fixed at 46 mills. This is one mill higher than the Summerland rate.

## Are Free Everywhere But Here

Interesting Data on Ferries of the Province

Considerable interesting information respecting ferries has been made public through questions put to the Minister of Public Works by Mr. J. W. Jones, representative for South Okanagan. Detailed answers are reported in Votes and Proceedings of the Legislative Assembly of British Columbia show that fifty free ferries are being operated in the province by the government. Each of the fifty are named together with the number of passengers, horses and vehicles, autos and trucks transported, also the amount invested in these ferries by the government and the cost of maintenance.

Only six ferries are operated under subsidy. All of these charge tolls.

The information brought out by Mr. Jones would tend to confirm the argument advanced for free ferry service on the Okanagan Lake, more especially that between Westbank and Kelowna.

Of the six privately owned ferries four are in this section of the province, one on Shuswap Lake, two on the Okanagan and one on Dog Lake. The other two are at Fort George and on Arrow Lake.

Last year the Summerland-Naramata ferry carried 1574 passengers and received a subsidy of \$1,500. The Kelowna-Westbank ferry carried 10,180 passengers, 555 horses and 2,910 autos and auto trucks, receiving as subsidy \$3,500. The Dog Lake ferry carried 462 passengers and was subsidized for \$1,250. Shuswap Lake ferry carried 423 passengers, being subsidized at \$4,000.

## TO BE SEED GARDEN OF CONTINENT

In an address before the Canadian Seed Growers' Association at Ottawa last Saturday afternoon Mr. G. H. Clark, Dominion Seed Commissioner, made the prediction that within the next ten years British Columbia will become the seed garden of North America. Hon. S. F. Tolmie, Minister of Agriculture, also addressed the gathering. One remark made by the British Columbia Minister was that some persons engaged in the discovery and selection of seed production were of more use to the country than some of those who bore political titles.

Dr. J. W. Robertson, Ottawa, was re-elected president.

Mr. G. H. Sawdon represents British Columbia directorate.

## Union Directors Elect Officers

Now Has Larger Share in Valley Organization

Mr. E. R. Simpson was again elected president of the Summerland Fruit Union at the first meeting of the new board of directors held last Monday afternoon. All the other officers were re-elected. They are as follows:

Vice-President..... W. H. Hayes  
Sec.-Treas..... T. G. Beavis  
Sec. to Board..... G. Thornber

The other members of the Board are F. W. Rolt, S. M. Young, C. Elsey and P. G. Dodwell.

Since some time last year the Summerland Fruit Union has had a larger representation in the Okanagan United Growers than previously. For several years there has been a feeling among the local fruit growers affiliated with the organization that the Summerland Fruit Union, the second largest shipping organization affiliated with the central, did not have a due share in the management of the Valley organization. A change was effected some months ago whereby Summerland now has seven shareholders, each having a vote in the Okanagan United Growers, Ltd. Each one of the old board held one of these shares in trust.

A meeting of the O. U. G. is being held at Vernon this week and the directors of the local Union are attending as shareholders. Mr. Simpson went up to Vernon on Wednesday to attend an executive meeting and the other shareholders went up Thursday morning.

## School Board Special Meeting

Teacher Short When High School Re-Opened

Schools in Summerland re-opened on Monday after being closed a little over two weeks as a precautionary measure against the possible spread of influenza which had made its appearance in the community.

The absence of Mrs. Kennedy, one of the teachers of the High School, was the occasion of a special meeting of the Board of School Trustees on Monday evening. It would appear that Mrs. Kennedy had gone out of town without the formality of obtaining leave of absence. Knowing that she was in Calgary the secretary had written Mrs. Kennedy advising her that the Board was of the opinion that schools should re-open on the 10th. On Monday a letter from Mrs. Kennedy was read in which she stated that she had been advised by her physician to remain in Calgary for some days longer. It was stated at the Monday meeting that the school law requires that a teacher upon absenting herself, or herself, must provide a substitute satisfactory to the board and that no such substitute will be permitted to continue for more than ten days without the approval of the Educational Council. As no substitute had been provided in this case the board again called on Mrs. R. C. Robinson, who has on several occasions in the past year come to the assistance of the board. Mrs. Robinson is now assisting Principal Tees at the High School.

The secretary was instructed to reply to Mrs. Kennedy stating the regrets of the board that she was not in the district at the time of the reopening of the school and to ask what provision had been made for a substitute during her absence. The secretary was also instructed to ask for a doctor's certificate to justify her continued absence.

## NO TIME LIMIT ON K.V.R. EXTENSION

No time limit has been placed on the construction of the railway down the Valley from Dog Lake to Osoyoos.

When the bill for the construction of this line came before the house on Monday, Mr. J. W. Jones of South Okanagan commented upon the absence in the bill of a time limit. To this the Premier replied that the completion of the stretch referred to would depend on conditions. The Premier explained that line was being built at the request of the Government and under these circumstances it was hardly in a position to impose terms. The bill was passed.

It would now appear that a spur to Dog Lake will be constructed

## GOVERNMENT SCHOOL GRANTS ON BASIS OF SALARIES PAID

This is Suggested as Means Toward Increasing Efficiency. Summerland School Estimates For the Year.

Increasing costs in everything pertaining to our public schools, from the salary list down to the smallest item in the school supplies, is fast developing a crisis. All up and down this Valley and in every part of the province school taxes have mounted to such a rate that taxpayers everywhere feel that some radical change must be made in the financing of our schools. As already pointed out in these columns the provincial government is paying no more toward the salaries of the teachers than was paid when salaries were half what they are now. Not so long ago the Department of Education paid about two-thirds of our teachers' salaries. Under the new schedule the province will be paying something less than one-third.

At a recent meeting of the Summerland Municipal Council the following resolution, presented by the Duncan (V. I.) consolidated board of school trustees was read and will no doubt have the approval of every ratepayer as well as of each member of the Council:

Whereas Section 19 of the Public School Act provides for a certain definite per capita grant from the Government for each teacher employed in Municipal Schools:

And whereas such a policy is not calculated to encourage the employment of the most efficient and more highly paid teachers, but the direct contrary;

Be it therefore resolved that the Provincial Government be urged to make its school grant upon a basis of the fixed proportion of the salaries actually paid, with a view to the encouragement of a higher standard of teaching efficiency in this Province;

And be it further resolved that a copy of this resolution be forwarded

Teachers' salaries	\$9,940
Conveyance	2,000
Secretary's salary	1,120
M. H. Officer	125
Caretaking	1,200
Fuel	1,000
Repairs:	
Rigs	75
Buildings	250
Furniture and Equipment	300
Manual Training Equipment	150
Domestic Science Equipment	150
School Library	50
Postage	25
School Supplies	500
Insurance and Advertising	150
Rent	650
Incidentals	550
Over-Expended in 1919	1,650
Sinking Fund and Interest	1,926
Total	\$20,811

## Cost of Apple Production

Dean Clement Says \$1.54 1/2 Is the Average

At the recent Western Canada Fruit Jobbers' convention held in Vancouver some interesting figures were given to the delegates by Dean F. M. Clement of the University College of Agriculture on the cost of production of apples in British Columbia. Dean Clement's address was listened to with rapt interest by the prairie fruit men, who, in many cases had never heard just how much it costs to grow, pick, pack, market and ship a box of apples.

Amongst other things Dean Clement said that there were, in fact, no statistics could tell, between \$3,000 and \$5,000 orchards in the province. Speaking of the average investment per acre in the apple growing sections he quoted the following figures: North Yakima, \$1,000; Hood River, \$900; Wenatchee, \$1,925; West Colorado, \$685; British Columbia, \$1,162.22.

The yields in British Columbia for a period of five years average as follows:

- Trees five years old average 2.32 boxes per tree.
- Trees seven years average 4.32 boxes per tree.
- Trees eight years old average 4.74 boxes per tree.
- Trees nine years old average 6.14 boxes per tree.

After the trees have yielded for nine years there is practically no increase, having reached their maximum. This means, figuring on a basis of seventy-five trees to the acre a yield of 480 boxes per acre.

In the figures showing the yield for the various orchards, varying in size from one to twenty acres and more, the following interesting figures were quoted by the professor:

- Orchards one to five acres, yield 6.5 boxes per tree.
- Orchards six to ten acres, yield 5.01 boxes per tree.

(Continued on Page 8)

## Naramata-Kelowna Road Extension

Government to Survey Suggested Route

Government surveyors will start next month on a survey of a route for a road between Naramata and Kelowna. For some years construction by the government of a road over the hills to connect Naramata and Kelowna has been advocated by the citizens of these two centres and others interested in extending the highway up the east side of the lake to connect with the Kelowna-Vernon road.

It has long been claimed that a practical route for such a road can be found and the government has now consented to investigate. Should it be found that the cost of constructing such a highway is not prohibitive and a road with satisfactory grades can be built the opening of such a channel and the improvement of the existing highway north and south of Naramata would doubtless divert a lot of traffic from the present route along the west side of and across the lake between Kelowna and Westbank.

We are informed that the survey will be made under the direction of Engineer Gwyer.

## Stock Men to Hold Meeting

Local Dairy Situation To Be Considered

As is generally known purebred bulls of different dairying types have been maintained for some years past in this district through the efforts of the local associations, these sires being loaned to them by the Dominion Government. Probably the most active of these associations has been the Summerland Pure Bred Stock Association which has been the custodian of pure bred Holstein bulls for some years. These sires have made dairying possible for the many growers who have decided that the cow is a valuable and economic addition to their fruit farms.

The district is now faced with the probability that there will be no association bull of any breed maintained here this season. The seriousness of this matter is very evident. The directors of the Summerland Pure Bred Stock Association have made every endeavor for many weeks past to try and find a caretaker for their bull for the coming year (an application for exchange of bulls on the first of April having been made to the government) and while every cow owner visited admits the serious loss he will sustain if there is no community bull in the district, at the same time not one is willing to act as caretaker although the terms offered by the Association are such as to cover all expenses and allow a reasonable profit.

The Directors, therefore, in fairness to all concerned, both producer and consumer of milk, have called an emergency meeting as per notice in another column of this paper (Continued on Page 8)

## Ex-Imperials Coming to Okanagan

Kelowna to be Headquarters in the Valley

The Imperial Veterans' Association has opened an office in Kelowna which will serve as headquarters in the Valley for ex-Imperials coming to the Okanagan with the intention of taking up land under the Soldier Settlement Board. Such settlers are not permitted to launch out for themselves until they have had a year's experience in the country.

The Kelowna office will serve as a clearing house for these intending settlers and with the co-operation of the Soldier Settlement Board everything will be done to welcome the new men and have them congenially located. The office will be under the charge of General A. R. Harmon, prominent among the Imperials in the Valley.

Already there are jobs awaiting for over 200 of those intending farmers, many of whom are now on their way to Canada. A field supervisor will be provided by the Vernon office of the S. S. B. who will be a long experienced farmer, understanding thoroughly the local conditions and who will take care of all the newcomers.

## Stock Men to Hold Meeting

Local Dairy Situation To Be Considered

without delay and the service extended to south end of the lake by barges and tug. From Okanagan Falls traffic will have to be by motor trucks or other vehicles until stool is laid.

# Orchard and Farm:

Topics of Timely Interest and Helpfulness in the complex Business of Farming.

## Fire Blight Causes Annual Heavy Loss

Some Facts About This Disease. How It May Be Eliminated

By H. H. EVANS, Vernon, District Field Inspector, Department of Agriculture.

The period is now fast approaching when active growth will be again starting in the orchard trees, and a few timely hints may be helpful regarding the clearing up of Fire Blight.

The complete elimination of this malignant disease from infected trees, by careful cutting out of all overwinter cankers, is the first consideration that should now engage the earnest attention of every fruit grower wherever infected trees exist.

The apple, crabapple and pear are the trees most subject to infection, and same should be given close attention by the orchardist.

The loss annually in B.C. from this disease amounts to many thousands of dollars, as it not only destroys the crop by killing of blossoms, but in hundreds of cases destroys the whole tree.

Trees worth keeping are worth taking care of. If you do not think so pull them out and grow crops you think are worth while.

With the advent of the sap flow in the trees, a gummy exudate will ooze out from overwintering cankers not properly cut out.

Do your Fire Blight cutting before pruning. It is not possible to cut blight and prune at the same time, or Blight Cankers are bound to be missed.

The writer has noticed this winter where Blight Cankers have been cut through with the pruning tools, and it hardly fair to ask the men pruning to undertake the responsibility of the double work.

The orchard owner would gain a decided advantage if he would train one responsible man working in the orchard, in the detection and cutting out of this disease, and make him responsible for the work.

Do not forget the need of using a disinfectant for both pruning tools and wounds when on blight work.

Disinfectants (1)—Bichloride of Mercury (Corrosive Sublimite) 1 to 100 parts, or (2)—Cyanide of Mercury 1 to 500 parts, should be used.

Horticultural Regulations, Sec. 6, Subsection 1: "Fire Blight infected trees shall be cleaned up during the dormant season by the proper cutting out of all Blight Cankers.

Apply to your nearest inspector for any further information regarding Blight Control, that you may desire. The circular fully describing Fire Blight and its control is obtainable by making application to your local representative of the Department of Agriculture.

The minister in making an announcement for the evening meeting said: "Elder Jones will present a paper on 'The Devil.'" Then he added earnestly, "Please be prompt in attendance, for Brother Jones has a carefully prepared paper, and is full of his subject."

## The Pear Leaf Blister Mite

A Pest Found in Some of Our Orchards. Methods of Control

The pear leaf blister mite is a troublesome pest in apple and pear orchards when not kept in control. It has made its appearance in some of the orchards at the lower end of Garnett Valley and in the west of Prairie Valley and around the south of Giant's Head in the Summerland district and has also occasioned some concern to fruit growers in Peachland and Naramata.

The leaves of pears and apples are often disfigured by reddish or greenish-yellow blisters which later in the season turn brown. These blisters are caused by colonies of minute, whitish, four-legged mites, 1-125th inch in length, living within the tissue of the leaf.

The leaves of pears and apples are often disfigured by reddish or greenish-yellow blisters which later in the season turn brown. These blisters are caused by colonies of minute, whitish, four-legged mites, 1-125th inch in length, living within the tissue of the leaf.

## Correspondence

The Columns of THE REVIEW are open to the public for the discussion of matters of general interest. No notice can be taken of anonymous communications. Letters intended for insertion must be authenticated by the name and address of the writer, not necessarily for publication. The opinions of correspondents are not necessarily those of the Review.

To the Editor, Summerland Review, Summerland, B.C.

Dear Sir:

It is with considerable hesitancy that I enter the debate going on through the medium of your columns, but I would like to express my views re popular music and will try therefore to be as brief and concise as possible. Personally I agree with the views of Autolytus. The call at the present time by the vast masses of the people is for jazz music and cheap songs. To emphasize my point let me say that I happened to go into a local store where was exhibited a list of the latest productions of a well known gramophone record manufacturer and out of a number of about thirty there were perhaps two that a true lover of music and poetry would ever dream of listening to. That is indicative, I think, of popular taste. Further, I happened to go into one of the best music houses in Vancouver last summer, and what did I find on all sides - in the window also - nothing but cheap music - "Kiss Me in the Moonlight" style, and if my memory serves me rightly, they featured only one song that was worthy of attention. I asked a lady attendant if she could show me the best and latest songs both secular and sacred and immediately was asked "What song do you want?" I did not need to ask for the latest jazz, it was there before my eyes.

In the early days in Summerland we had one of the finest amateur chorals in the Valley, but where are they now? I doubt if you could get half a dozen who would attend for the pure love of good music, but if you put on a dance or a jazz concert you doubtless get a good house any night in the week. It is true that in the larger centres you have choral societies, etc. It would indeed be a calamity if such could not be found, for there are exceptions to all rules. But in the main the majority of music lovers of the higher class will admit that the popular demand is for music and words that to say the least are not very elevating. What the remedy is I am not prepared to state in this short purview.

Yours truly, MUSIC LOVER.

"What's the child's name?" asked the priest of the grandfather at the christening. "I dunno," the grandfather replied, and turned to the father and whispered hoarsely, "what's the name?" "Hazel," replied the father. The grandfather threw up his hands in disgust. "What d'ye think av that?" he asked the priest. "With the calendar av the saints full av gurl names an' 'im nam'in' his after a nut!"

Do You Intend to Use Lumber or Other Building Material in the Near Future? We believe some are holding off making alterations, extensions or doing any building, hoping for a general reduction in prices. In this they will be disappointed, we are now convinced. It is no use putting off. Lumber will be dearer instead of cheaper. If you have need for lumber or other building material, our advice is BUY NOW. We have a new shipment of BEAVER BOARD. The price is a little higher, but much cheaper than lath and plaster. 'Phone 28. WM. RITCHIE.

## Annual Cover Crops in Old Orchards

By R. H. HELMER

Superintendent, Summerland Experimental Station.

The question of handling our older orchards from a cultural point of view is becoming more and more important each year. A few advantages of the annual cover crops may prove of use to our growers. They supply nitrogen, so essential to the growth and fruiting of the trees; they supply humus to keep our soil loose and friable and hold heat and moisture, and give us the advantage of clean cultivation at the time when most needed, that is during the period of the year when water shortage may occur. They can be usefully applied in ripening up our season's growth and thereby allowing the trees to go into the winter well matured, which, with our changeable winters is of such great importance in the prevention of winter injury. Some of our orchards which have received shallow irrigation and have been in clover or sod for a number of years have a very shallow root system and must be handled very carefully to avoid cutting too many large roots, and in some cases the annual cover crop should be disced in. But ploughing is to be preferred as no operation so thoroughly stirs up the soil and puts it in such good condition to store moisture and sunshine.

The procedure is—seed every other row in the middle of August or the beginning of September with one to one and a half bushels of hairy or fall vetch to the acre, this allows wagons to haul fruit on the unseeded rows and the pickers will do very little harm by walking on it. This plant stands our winters very well and starts early in the spring and makes a rapid growth. As soon as the ground is workable seed the unseeded rows with spring vetch, one to one and a half bushels to the acre. By the end of May or the middle of June the vetches are ready to plow under. Just before ploughing we give the crop a good irrigation, roll before we start to plough and put on a very sharp rolling coultter and keep it high enough just to enter the soil a couple of inches. Then disc the land and harrow. If the soil is moist and warm the vegetable matter is soon rotted and with good cultivation is soon distributed through the soil. Where large amounts of manure are not available this method puts our land in the best possible condition to apply fertilizers when needed. A few years of this treatment will give us good results in increased growth and crops.

## HAD HEAVY RAINS DOWN THE VALLEY

Oroville Gazette, March 19. — Heavy rains in the hills east of Oroville were a freak of the weather Saturday, especially as only a few drops fell in this part of the Valley. Very heavy and ominous clouds hung low on the eastern hills during the day, and cloud bursts were predicted as a result. Possibly there were no cloud bursts, but at Molson and other points the rain for a time came down in sheets. At Antwynne Crook this side of Tonasket, debris was washed over the tracks of the Oroville-Wenatchee line to such a depth that the train due here Saturday night could not get through and was hung up at Tonasket until 2 o'clock Sunday afternoon, reaching here at 8 o'clock. The creek east of town, which did so much damage on a portion of the East Okanogan Valley Orchard Tracts last winter, and dammed the Okanogan river for weeks, again discharged a surplus of water on the flat, washing out the road and threatening to repeat the damage of last winter.

## THE IRISH DO THEIR PART

Reference was made last week in the report of the St. Patrick's Day entertainment given by the Peachland Women's Institute to the fact that the words of the solo "The Irish Do Their Part" were composed by Mr. S. J. McGirr. Below are the verses composed by Mr. McGirr for this occasion.

Wherever Britain's mighty power Rules over land and sea, And noble thoughts, through English tongue, Spread Light and Liberty; In times of peace and times of war; In Letters and in Art; Along with English and with Scotch The Irish do their part.

### CHORUS

Yes! in attaining virtues, Which elevate our race— And in the march of progress, The Irish keep the pace. And in each British battle, Among the fallen there— Who die to aid the Empire— Old Ireland gives her share.

To lofty heights of sentiment The sons of Erin rise— Thus Moore and Goldsmith charm alike: The simple and the wise— O'Connell's wit and Grattan's fire, Have helped to mould the state; And Burke, with thrilling eloquence, Has sway'd Great Britain's fate.

Brave Beresford's, and Wolsley's, deeds

Enrich the scroll of Fame; And Britons loved, while foemen feared,

Lord Roberts' deathless name; From British ships the gallant Howe Compell'd the foe to flee, And we need no invasion fear Whilst Beatty guards the sea.

### The Reason

"What's his reputation?" "Rather good. He never lived in a small town."

## WHAT IS WORRY?

Worry is a feeling of fear, but is never of the present. It is always about something that may happen or that has happened. It is generally in the future, sometimes in the past, but never in the present.

An animal that knows neither future nor past cannot worry. Babies living only as they do in the present cannot worry. All creatures, excepting human beings, live only in the present and therefore they do not worry for such creatures cannot remember what happened in the past, or guess what is going to happen.

A human being after arriving at a certain age is given such powers that his mind can go back to the past and cast itself forward into the future as he thinks it will be, because he has imagination. As a matter of fact we live less in the present than in the past or future.

### "We Did It"

### PREPARE FOR A BIG CROP

Under the above caption the Farmers' Magazine says: The year 1920 will likely be marked with a big production of farm products, all of which will in all likelihood be marketed at paying figures. The world is still hungry for food, clothing and machinery. In supplying these, the farmer stands at the point of vantage. All he can raise and take care of will be needed before a twelvemonth goes by.

It is true that labor is scarce and high priced. But we have weathered worse times and worked under worse handicaps. Machinery for production is coming in as fast as the raw material can be produced, and with their service on the farm, none of us are working under as great disadvantages as did our forefathers who wrestled against primeval conditions in a wooded Canada.

The farmer deserves all he can reap. If anybody drives a motor car that somebody should be a working farmer. If anybody needs the comforts of a good house, running water and electric lights that person is the rural resident, and he is going to get them. Agriculture everywhere is coming into its own. Let no one sell his birthright now for a mess of urban pottage.

\$ \$ \$ \$

The Kaslo Kootenian is being published by one of the old-time editors of this province, having leased plant and publication from the proprietor. Naturally his chief interest is to make what he can out of it during the time of his lease. Certainly it would not be expected that he would continue to publish a paper for Kaslo each week at a loss to himself. An announcement by him on this subject will give an insight into the publishing situation generally in these times of high wages and high costs of paper and everything else that enters into the publishing of a newspaper.

Here is his announcement:

With this issue the form of the paper is slightly changed, giving less home news space and more outside. Heretofore we have been setting too much type for the patronage received, taking up time on the paper that could be more profitably employed on job printing. The subscription list of a weekly paper is, at best, a losing proposition. The paper that does not carry at least fifty per cent. of its local space in advertising, is wasting time that should be devoted to job printing. The Kootenian is now giving more reading matter but less local space. The form adopted in this issue is the only solution we can see of the problem of giving our subscribers as much or more news and the staff more time to devote to other work. It has been a continuous grind of about eighty hours a week for seven months, with the paper late and job work hanging fire. In the future the paper must pay for itself or go to the devil. The staff will work eight hours a day, Sunday off, for the next five months, when our present agreement expires.

\$ \$ \$ \$

The case of the fruit growers of B. C. in respect to the sugar situation in Western Canada will be laid before the Sugar Committee at Victoria today. At their request the president, Mr. C. E. Barnes, and Mr. R. M. Palmer, of the executive of the B. C. Fruit Growers' Association, will be heard by the committee recently appointed by the legislative assembly to investigate the shortage of sugar.

\$ \$ \$ \$

Taking the stand that utilities must be self supporting the Public Utilities Commission has ordered an increase in Peachland's electric light rates. Peachland, one of the best lighted towns in the Valley, has long boasted a low light rate. The system has been efficiently and economically operated but the rates are not sufficient to cover present day costs.

\$ \$ \$ \$

A recent reduction of one cent a pound in the price of refined sugar by the two leading refining companies in the United States is heralded as a favorable indication. The decline is not a result of the falling off of the demand but was made voluntarily in view of the decline in the prices of raw sugar.

### CONSCRIPT WEALTH IN ANY FUTURE WAR, ADVOCATES EDITOR

ARTHUR HAWKES

Speaking before the Independent Labor Party in Toronto a short time ago, Arthur Hawkes, editor of the Toronto World advocated conscription of wealth in preference to conscription of men in the next war in which Canada might be engaged.

"Instantly on the declaration of the next war, Canada should conscript all businesses engaged in the provision or transportation of war supplies," Mr. Hawkes said. "No concern in the event of another war, financial or otherwise, should be permitted to retain more than 5 per cent. on the capital actually invested, and the heads of these concerns should be conscripted into national service and receive exactly the same remuneration as a colonel on the actual fighting front."

An amendment to the Water Act making the act applicable to municipalities as well as unorganized districts as at present, will soon be brought down to the house at Victoria.

### He Could Prove It

Johnny — "These pants that you bought me are too tight."  
Mother — "Oh, no they aren't."  
Johnny — "They are too, mother. They're tighter'n my own skin."

## NOTICE

### TO OUR ADVERTISERS

In order to meet the ever-increasing costs of publishing a newspaper we have been forced to advance our advertising rates.

This increase will come into effect with the first issue of The Review in May.

During the past years when every other commodity that is sold has doubled and more than doubled in price our advertising rates have remained the same—with the exception of a rearrangement of our rates last May — which in many cases meant a lowering of rates—we have made no change in our advertising charges.

Our changed rate card will appear in an early issue.

R. E. WHITE, Manager.

# Fruit Growing Now A Pleasant and Profitable Work

## Members of Peachland Fruit Growers' Union in Annual Meeting

The annual general meeting of the Peachland Fruit Growers' Union was held on Thursday of last week when the following report was submitted by the directors.

To the shareholders of the Peachland Fruit Growers' Union.

Gentlemen:  
Your directors beg to submit the seventh annual report of the Peachland Fruit Growers' Union and an account of the operations for the past twelve months.

During the seven years that have passed since the co-operative organization was established, the position of the fruit growers has been greatly improved, and the fruit growing industry in the Valley is now recognized to be not only a pleasant but a profitable occupation, based on sound commercial principles.

The output of your Union is increasing each year. The total number of boxes shipped last year was 73,365, an increase over the previous year of 5,685 boxes.

The time has come when steps will have to be taken to materially increase the accommodation of the packing house. It was the intention of your board to have had a new packing house in operation during the coming season, but owing to the difficulty of raising the necessary funds, this project will require to be held over for another season.

It has been proposed to install an elevator and use the upstairs portion of the building for packing, leaving the under portion of the building free for the receiving of fruit.

If this arrangement can be carried out it will relieve the situation to a great extent and would be the means of providing a more comfortable place for the packers, with the advantage of better light than can be had in the under portion of the building.

It gives your directors great pleasure to submit a balance sheet showing a profit on the year's operations of the fruit department of \$1,079.58 in spite of the fact that wages had increased, also the price of boxes, paper, nails, etc., were considerably higher than the previous year.

The charges to the grower for packing and overhead expenses were not increased from last year which makes the result of the year's operations most gratifying. Comparison of the charges at other points will be submitted for your benefit.

The turnover of the feed department shows an increase of \$3,927.09 over last year. This department is very much handicapped during the fruit season through lack of accommodation for the storing of supplies. This has the effect of reducing the profit of this department very much as purchases have to be made in small quantities with extra freight charges which practically leaves no margin of profit to the Union.

Arrangements have been made to secure early delivery of box shooks so that the growers will be able to secure a supply in time for the picking of their fruit.

The board would esteem it a favor if estimates of the number of boxes required would be handed in as soon as possible to facilitate the proper distribution of orchard boxes and shooks.

The retiring directors wish to thank the shareholders for their help during the past year and take this opportunity of impressing all shipping members to do all they can this coming season by co-operating with the management in all things pertaining to the best interests of the Union.

Respectfully submitted,  
WM. BUCHANAN,  
President.

The report was adopted. Director Douglas gave a report on the proposed alterations to the building, whereby the upstairs portion could be used for a packing house by the installing of an elevator and the taking down of the partitions. J. A. Edgcomb and J. L. Vicary moved that the meeting of shareholders empower the 1920 directors to take steps to compel all shareholders who are not contractors to pay a pro rata share of anticipated improvements. Carried.

Director Hardy proposed the following resolution:

"Whereas the bringing in of apples to the packing house of a variety before that variety is wanted on the market, and consequently

cannot be shipped out, is responsible for considerable congestion at the packing house; And whereas the providing of apple boxes in shooks, or made up as desired by the growers, will allow the picking of such variety or varieties to be done should the grower so desire; Be it therefore resolved that this meeting of shareholders in annual meeting assembled pledge themselves to comply with instructions from the manager as to what variety is wanted, and to bring only such variety or varieties as are called for by the manager from time to time during the season." The resolution was seconded by Wm. Douglas and carried. Election of directors resulted as follows: Dr. Buchanan, Wm. Douglas, Thos. Powell, J. L. Vicary, J. A. Edgcomb.

Motions were carried as follows: That the financial year end on the 31st of January and that the annual meeting be held on the third Monday in February.

Votes of thanks to the retiring board and also the secretary for the manner in which they have performed their duties during the past year.

That Mr. H. Hardy be given a hearty vote of thanks for his services on the board. He has been a member of the board since the inception of the Union and was retiring on account of his health. Needless to say this motion met with very hearty applause.

Messrs. McDowall and Lowe had intended being at this meeting, but had been prevented by bad roads.

At a meeting of the 1920 board of directors of the Peachland Fruit Growers' Union held on Friday last, Dr. Buchanan was re-elected president; Thos. Powell, vice-president and Wm. Dryden secretary.

Mr. Dryden was appointed with the understanding that he was to have any help he might need during the busy season.

On motion by Directors Vicary and Powell the board took the opportunity of thanking Mr. Dryden for his co-operation and help especially in giving extra time and service since holding the position of secretary extending over seven years. The convenorship over the Fruit and Feed Departments was held over till a full board was present, there being one of the directors absent from this meeting. The regular meetings of the Board are to be held on the first Friday in each month, but the next meeting will be held on Thursday, April 1st.

Mr. W. D. Miller and Mr. Arthur Day were passengers to Kelowna on Saturday. Mr. Day had been down looking over some timber limits in this vicinity.

After having spent the winter in this vicinity on a trapping line with Mr. F. R. Jeffords, Mr. Daley, with his wife and family, left on Tuesday morning to return to the prairie. We understand that Mr. Daley and Mr. Jefford collected quite a number of pelts for their winter's work.

At a joint meeting of the W. C. T. U. and the Prohibition Committee held in the Presbyterian Church on Tuesday evening, Mr. H. E. McCall gave a report of the recent convention held in Vancouver which he had attended as a delegate from here. He emphasized the spirit of enthusiasm which was very manifest at the convention, and urged the necessity of the same spirit in the smaller organizations. The convention had been a very important one and was spoken of as having been the "best yet."

The nomination on Monday last to fill the vacancy left in the Council by the resignation of Councillor Taylor resulted in the election of Mr. Grant Lang as Councillor for Ward 3, there being only one nomination.

Mr. John Tait of Summerland was a visitor in town on Monday.

### MAIL CONTRACT

SEALED TENDERS addressed to the Postmaster General, will be received at Ottawa until Noon, on Friday, the 10th April, 1920, for the conveyance of His Majesty's Mails on proposed contracts for four years, seven times per week each way, between Summerland and West Summerland, and six times per week over Summerland Rural Route, No. 1, from the Postmaster General's pleasure.

Printed notices containing further information as to conditions of proposed Contract may be seen and blank forms of Tender may be obtained at the Post Offices of Summerland and West Summerland, and at the office of the Post Office Inspector.

J. F. MURRAY,  
Post Office Inspector,  
Post Office Inspector's Office,  
Vancouver, B.C.,  
5th March, 1920. 33-35

## Would Amend the Pound By-Law

### Peachland Cattle Men Would Have Cows Run at Large

A public taxpayers' meeting was held in the Orange Hall on Monday afternoon for the purpose of further discussing the cow question. The point in question was to decide as to the advisability of having the present by-law annulled and allowing stock to run at large. Reeve R. J. Hogg took the chair. Mr. Smith, president of the Stockbreeders' Association, spoke at length, explaining the necessity of cows to the community. He expressed the feeling of the Association that owing to the fact that the Municipality was carrying too great a burden of responsibility under existing conditions, and in view of the fact that it was considered quite a hardship by the cow men not to be able to let their stock run, they considered some amicable arrangement should be arrived at.

It was suggested that it would be well to annul the present by-law. Quite a lengthy discussion followed. It appeared, from legal advice obtained, that either all stock had to be allowed to run, or none, but the stockmen pledged themselves to see to it that, if the by-law were done away with, only milch cows and heifers eighteen months old and upwards would be turned loose.

Major Hardisty suggested that it would be wise to approach the Government to change the law whereby discrimination could be made as to the kind and age of stock allowed to run. Mr. Powell spoke in favor of this idea and went further to say that he considered it would be a good plan for the stock association to take steps to have all other like associations throughout the province approach the government on the same subject.

After several other speakers addressed the meeting and gave their views, it was finally decided to frame up a petition to be circulated and handed to the Council. Dr. Buchanan, Mr. E. L. Smith and J. L. Vicary were appointed to draw up a petition asking the Council to annul the existing by-law, but to arrange to retain the pound law within the 'sidewalk' area, formerly known as the restricted area. This petition was drawn up and circulated at the meeting in order to catch those present for their signatures.

W. L. Williams came home on Saturday to enjoy a short visit.

Mr. Chidley returned on Monday evening after a short visit to the Coast.

Mr. and Mrs. Arney returned from Penticton on Friday to spend the day here with the Brinson Brothers before leaving for the prairie on Saturday morning. Mr. Arney has bought a ten acre lot at Penticton.

Mrs. Wm. Coldham and her little boy returned on Tuesday evening after a short trip up the lake.

Mr. H. E. McCall spent a portion of Saturday last in Westbank, on a business trip.

Mr. F. Layton of Penticton brought Rev. Andrew Grieves up by auto on Sunday to preach in the Baptist Church. They report the road in very bad condition.

Quite a jovial crowd gathered in the Orange Hall on Friday evening and enjoyed a dance.

Having received a telegram on Tuesday night of last week from their son in Lamont, Alta., to the effect that his wife was given up by the doctor, Mr. and Mrs. Wilson left on Wednesday morning. Word has come that they were too late, the daughter-in-law having died just before they got there. Her baby also died and the husband has been quite sick since. Two others of the family are also in the hospital, but now out of danger. The Wilson family have the sincere sympathy of the many friends they have made since their sojourn in Peachland.

Miss Pearl Gellatly and friend, Miss Doris Hannam, came down for the Irish concert on Wednesday and visited till Friday morning as guests in the home of Mr. and Mrs. George Keyes.

After a few days spent in his old home here, Mr. John McDougald, with Mrs. McDougald set out for their ranch near Summerland where they are setting up a home intending to get a portion of the land under cultivation this season.

Mr. John Long returned on Thursday after a week spent at the Coast on business.

Mr. E. M. Whyte was a passenger south on Thursday evening returning on Saturday morning.

The Public Utilities Commission held a sitting here recently and it is reported as a result that Council has been instructed to raise the charge for electric lights. The Commission claim they have been too low for some time.

Mr. Sam Michael has been enjoying a visit from a friend from Vancouver. He left again on Monday morning.

Mr. and Mrs. Arney returned from Penticton on Friday to spend the day here with the Brinson Brothers before leaving for the prairie on Saturday morning. Mr. Arney has bought a ten acre lot at Penticton.

Mrs. Wm. Coldham and her little boy returned on Tuesday evening after a short trip up the lake.

Mr. H. E. McCall spent a portion of Saturday last in Westbank, on a business trip.

Mr. F. Layton of Penticton brought Rev. Andrew Grieves up by auto on Sunday to preach in the Baptist Church. They report the road in very bad condition.

# Musical Talks.

Written by Prof. C. C. Laughler, Mus. Bac., Bowmanville.

(C. C. Laughler, Mus. Bac.)

## No. II. — A PIANO TALK.

Just listen to the master pianist, Paderewski. When a child of three years he played to a party of children for dancing. When he was seven he wrote his first musical composition, "A Set of Dances." When Paderewski became renowned some critics were very hard on him and lay his great charm to hypnotism. He certainly has a magic power that holds both the musically educated and the ignorant.

Let us investigate where this magic box — the piano — came from and how it got here.

**The Lute**  
You may have read about the lute and the dulcimer, the lute of the fifteenth and sixteenth centuries was very popular.

The body was pear shaped with a neck or fingerboard, and across the frets on the fingerboard are stretched eight strings tuned in pairs like a mandolin, and plucked with a pick held in the right hand.

**The Virginal**  
An instrument called the Virginal is like a big lute with a keyboard attached; when a key is pressed down a mechanical pick inside plucks the string, but with the virginal each key operates one string only — and the tone is very weak. The virginal was very popular and fashionable for young ladies to play upon. Queen Elizabeth was quite a proficient performer upon the virginal.

**The Harpsichord**  
An improvement on the virginal is the harpsichord. The keyboard is similar but has two and sometimes three strings to each key. Dr. Burney describes the tone as "a scratch with a sound at the end of it." The harpsichord sometimes has two and even three keyboards, the upper keys playing on one string only, the lower on two strings.

### LANDS FOR SALE

The Wisner Estate, originally the old Garnett Homestead, comprising 16.76 acres and 40 acres of timbered range. 10 acres well watered by 2 fumes and a ditch, also Aeneas creek flowing through the bottom lands. Five acres of bearing trees and five acres under alfalfa. Good dark soil and deep subsoil. House, Stable and Garage. Price \$8,000. Terms

The Oldham Orchard in Prairie Valley. 10 acres planted and 10 acres of timbered range. Good varieties of apples, cherries, plums and peaches. Ages up to 15 years. Small shack and stable, domestic water and R. R. Price \$5,000. Terms

About five acres of strong soil with deep subsoil, well planted with bearing trees, sheltered position overlooking the lake between the Munn and the J. S. Campbell orchards. Small clean house and a garage. Domestic water and R. R. Price \$1,750 cash

Well Built Cottage with four rooms and wide verandah, on one acre of land. Next Mr. George Gartrell's, on the lakeshore. Price \$1200. Terms

F. D. COOPER, Real Estate Broker, Peach Orchard

### THE WORST OF FIRE

is that It Comes at the Wrong Time. But INSURANCE will always Come at the Right Time. Put enough on your house and furniture so that in case of fire you can rebuild. If you have insured with others put some on with me.

WALTER M. WRIGHT — Phone 771 — 84-85

Stops were added on this instrument which attempted to produce something like the effect that pedals of our pianoforte produce. Some had a venetian swell which opened and closed, producing a sort of crescendo and diminuendo.

**The Clavichord**  
Now the clavichord came next, and in the place of picking the strings it was termed "a struck string" but not like our modern instruments. Yet it is the direct predecessor of the pianoforte. Handel, Haydn, Mozart, Beethoven and Bach thought a lot of the clavichord. The first clavichord had 36 notes but later the number was increased.

**The Pianoforte**  
Then came the pianoforte with struck strings. The inventor of the pianoforte went back to the dulcimer for the idea of striking the strings, the dulcimer being an instrument with steel strings stretched across a kind of sounding board. The wires were struck by two hammers held in the hand of the performer. The first pianoforte was made in 1710 by a man named Christofori. This was a crude instrument. Johann Stein improved the action in the 18th century which he called the Viennese action. It would be well for each piano student to lift the front of the piano which will reveal the action which comprises a system of levers, hammers and rods, and examine the accuracy and delicacy of its movement.

The first time a pianoforte was used as an accompaniment was at a

program of an opera entitled "The Beggar's Opera." It read: "Miss Bricklet will sing accompanied on the new instrument by Mr. Dibden." The first solo announced for the pianoforte was played by Mr. J. C. Bach in London, June 2nd, 1768. Mr. Broadwood of London invented pedals to be used with the feet. Mr. John Hawkins of New Jersey made the first upright piano in 1800. Bach and his predecessors played with just pressing down the keys like the organ action and produced what is termed the powerful school of pianoforte playing.

"How came the name 'Pianoforte'?" The pianoforte is the first instrument that gives easy access to extremes of power. The first part of the word, piano, means soft. The playing of this instrument may be made in an extreme whisper. The second part of the word, forte, means loud, and with a competent player the imitation as of a great orchestra may be made, hence its name — Piano-forte — capable of extreme softness and loudness.

What piano playing now is, is largely due to such men as the following. They had been called to other employment, but afterward received the real call to music: Hadyn — a priest; Handel — a doctor; Dvorak — a butcher; Chopin — a book-keeper; Berloiz — a doctor; Strauss

— a bank clerk; Schumann — a lawyer.

The Pianoforte is the instrument which is second to the orchestra in its possibilities. Years of application are necessary to acquire the art of playing which will comprise a mastery of the "even touch," staccato and legato playing and correct fingering. Seek to understand the pieces you play that you may feel it as a conversation or dialogue and not as the following conversation would seem to suggest in this little skit:

Jones — "Miss Banglout is going abroad to finish her musical education."

Brown — "Where did she get the money?"

Jones — "All the neighbors gladly chipped in."

### FOR SPRING OF 1921 PLANTING

We have made liberal provision and will have many thousands of trees of leading varieties to offer of choice quality, grown in the Chilliwack Valley, where we get a splendid root system and vigorous growth.

The available supply of NURSERY STOCK is likely to be less than the demands for the coming year. We therefore advise planters to place their orders with us as early as possible and avoid disappointment.

We already have quite a few orders on our books for Spring 1921 delivery. A word to the wise should be sufficient.

# Your Income Tax Return Should be Filed at Once!!

All persons residing in Canada, employed in Canada, or carrying on business in Canada, are liable to a tax on income, as follows:

Every unmarried person, or widow, or widower, without dependents as defined by the Act, who during calendar year, 1919, received or earned \$1,000 or more.

All other individuals, who during calendar year received or earned \$2,000 or more.

Every corporation and joint stock company, whose profits exceeded \$2,000 during the fiscal year ended in 1919.

#### CLASS 1

Forms to be used in filing returns on or before the 31st of March, 1920.

Trustees, executors, administrators, agents and assignees must use Form T 3.

Employers making a return of the names and amounts paid to all directors, officials, agents or other employees must use Form T 4.

Corporations and Joint Stock companies making a return of all dividends and bonuses paid to shareholders and members during 1919, must use Form T 5.

NOTE.—Individuals comprising partnerships must file returns in their individual capacity on Form T 1 or T 1 A.

#### PENALTY

Every person who is required to make this return, who fails to do so within the time limited, shall be subject to a penalty of \$10.00 for each day during which the default continues—and all such penalties shall be assessed and collected from the person liable to make the return in the same manner in which taxes are assessed and collected.

#### Time Limit

All persons in Class 1, as shown hereon, must file on or before the 31st of March, 1920.

All persons in Class 2, as shown hereon, must file on or before the 30th of April, 1920.

#### General Instructions

Obtain Forms from the Inspectors or Assistant Inspectors of Taxation, or from Postmasters.

Read carefully all instructions on Form before filling it in.

Pre-pay postage on letters and documents forwarded by mail to Inspectors of Taxation.

Make your returns promptly, and avoid penalties

#### CLASS 2

Forms to be used in filing returns on or before the 30th of April, 1920:

All individuals other than farmers and ranchers must use Form T 1.

Farmers and ranchers must use Form T 1 A.

Corporations and Joint Stock companies must use Form T 2.

#### PENALTY

Every person required to make a return, who fails to do so within the time limited, shall be subject to a penalty of twenty-five per centum of the amount of the tax payable.

Any person, whether taxable or otherwise, who fails to make a return or provide information duly required according to the provisions of the Act, shall be liable on summary conviction to a penalty of \$100.00 for each day during which the default continues. Also that any person making a false statement in any return or in any information required by the Minister, shall be liable, on summary conviction, to a penalty not exceeding \$10,000, or to six months' imprisonment or to both fine and imprisonment.

Address of Inspector of Taxation for this District:

VANCOUVER, B.C.

1

R. W. BREADNER, Commissioner of Taxation.

GIVE YOUR CHILDREN PLENTY OF MILK

Some Reasons Why This Is An Indispensable Food for Growing Humans

A quart of milk a day for every child, if possible, a pint without fail. Plenty of milk will help give all your children, big and little, the chance for health they ought to have.

Besides well known food substances it has something special which they must have to grow. Your children can get a little of this from other food, but not enough.

Give your boys and girls milk for their chance to grow.

Look at children who do not get milk, but get tea and coffee instead. Aren't most of them pale and sickly? There are always very many sick children in cities and in countries where milk is scarce.

Milk gives your children lime, iron and phosphorus and other salts which they need.

There must be plenty of lime and phosphorus in their food, for a great deal of it is needed for their bones and teeth.

Iron is needed for their blood and other parts of their bodies. Right food, not drugs, is what children need.

Big boys and girls and grown people, as well as children, need the minerals in milk.

Dr. H. C. Sherman, of Columbia University studied the dietary of ninety-two families. He found 33 per cent. suffering from lack of phosphorus and 46 per cent. from lack of lime.

Milk is a lime food. It contains more lime than does lime water.

What has become of the old time bowl of porridge and milk? There is no better—cheap, nourishing, and palatable.

Its larger use everywhere would decrease living costs and add much to the joy of living.

Don't skim the milk for children. Let them have it with its cream.

Plenty of it makes them grow. It gives them rosy cheeks, bright eyes, strong bodies, good brains.

Refuse the children tea and coffee, but always give them milk. Encourage them to drink it. Put it on their cereals.

Pour it on the toast. Make it into puddings. Mix it into custards. Stir it into soups. Use milk, and use it freely.

Milk gives to your children the body building protein, one of the materials from which their bodies are made.

Milk is like eggs and meat in this. This body building substance, the protein of milk, is not new to you, for curd is milk protein.

Cottage cheese is curd separated from milk. When we drink milk or eat cheese we give our body proteins, which are changed and become part of our muscles, blood and other parts of the body.

The milk protein is good for everybody and especially good for children. They need a great deal of it because their bodies grow so fast.

Milk should not be the only food for children, of course. They need vegetables, fruits, and cereals. But even the bigger boys and girls should have milk.

Milk is good for grown people, too. They still need its lime and protein and its other substances. Don't think of it only as a refreshing drink, but also as a good nourishing food.

Milk is a food. One quart of milk is equal as an energy food to any one of the following: 1 quart of oysters, 2 pounds salt cod fish, 3 pounds fresh cod fish, 1/2 pound tondorloin steak, 3 large eggs, 1/2 pound cottage cheese, 1/2 pound cheese.

The first six cylinder car was produced in England.

NO INCREASE IN LIGHT RATES UNTIL APRIL 1st

(Continued from Page 1)

doubt was expressed by the Council of the ability of the staff to get the work done in time for the coming irrigation season.

Foreman Tomlin in charge of the carpenter work on the irrigation system reported that he had been unable to get carpenters.

Mr. Tomlin was instructed to appeal to the contractors for help, pointing out the urgency of the situation and to ask that work be suspended on buildings for a few days in order that water might be gotten to the land.

By motion the foreman was authorized to pay up to \$10 per month more for ditchmen than was paid last year.

The Clerk was authorized to write H. A. Glennie offering him a lot in Garnett Valley, formerly owned by him, for \$600 and legal charges, provided the offer was accepted promptly.

The house occupied by C. E. Pineo is partly on the lot bought by the Municipality from A. McLean.

A request from A. M. Temple for pipe connection was referred to the foreman.

Domestic water was granted to W. Atkinson for a lot in Victoria Gardens and to H. C. Riddall, Jones Flat.

A building lot east of Mrs. Angwin's on the Giant's Head road was sold to J. Dale for \$75, subject to usual tax sale conditions.

The resignation of C. E. Craig as constable was read and accepted.

The Collector in answer to an enquiry on the subject was advised by the Public Utilities Commissioner that he could not authorize the sale.

which it is hoped will be well attended and that from those present some one will be found willing to take on the work of caretaker of the association bull, otherwise it will be necessary to immediately wire the government, cancelling the application and Summerland will have to go back to the point where she was some ten or fifteen years ago and depend on the tin cow for milk supply.

COST OF APPLE PRODUCTION

(Continued from Page 1)

Orchards eleven to twenty acres, yield 4.8 boxes per tree.

Orchards of more than twenty acres show that as the size of the orchard increases the yield per tree decreases.

Basing his averages on a yield of 378 boxes to the acre, Dean Clement quoted the following figures:

Labor cost \$86.95 per acre, on a basis of 35 cents an hour; handling cost \$49.48 per acre; grading, packing house charges \$210.34 per acre; total material cost \$18.39 per acre; fixed cost, 6 per cent., equipment cost, depreciation, insurance, etc., \$94.24 per acre.

This makes a total cost of 378 boxes of apples, \$459.40, or \$1.21 1/2 per box. Adding to this the cost of management, etc., the cost is brought up to \$1.54 1/2.

It is doubtful if any of Dean Clement's listeners realized that the box of apples which they sold cost as much as they do.

The figures which he had quoted, he pointed out, were average figures which he had just gathered in an effort to find out just how British Columbia apple production compared with other sections.

ing of the increased light rate retro-active as from January 1st. The increased rate if authorized will not be applicable until April 1st.

land of men men

Minimum price of first-class land reduced to \$5 an acre; second-class to \$2.50 an acre.

Pre-emption now confined to surveyed areas only.

Records will be granted covering only land suitable for agricultural purposes and which is non-timber land.

Partnership pre-emptions abolished, but parties to not more than three arrangements for adjacent pre-emptions with joint residence, but each making necessary improvements on respective claims.

Pre-emptors must occupy claims for five years and make improvements to value of \$10 per acre, including clearing and cultivation of at least 5 acres before receiving Crown grant.

Where pre-emptor in occupation not less than 2 years, and has made proportionate improvements, he may, because of ill-health, or other cause, be granted intermediate certificate of improvement and transfer his claim.

Records without permanent residence may be issued provided applicant makes improvements to extent of \$300 per annum and records same each year. Failure to make improvements or record same will operate as forfeiture. Title cannot be obtained in less than 2 years, and improvements of \$10.00 per acre, including 5 acres cleared and cultivated, and residence of at least 2 years are required.

Pre-emptor holding Crown grant may record another pre-emption, if he requires land in conjunction with his farm, without actual occupation, provided statutory improvements, maintenance and residence maintained on Crown granted land.

Unsurveyed areas, not exceeding 20 acres, may be leased for 21 years; title to be obtained after fulfilling residential and improvement conditions.

For grazing and industrial purposes areas exceeding 40 acres may be leased by one person or company.

Mill, factory or industrial sites on timber land not exceeding 40 acres may be purchased on conditions include payment of stumpage.

Natural hay meadows inaccessible by existing roads may be purchased conditional upon completion of a road to them. Route of road, if not exceeding half of purchase price, is made.

PRE-EMPTORS' FREE GRANTS ACT

The scope of this Act is enlarged to include persons joining and serving with His Majesty's Canadian Forces within which the heirs or devisees of a deceased pre-emptor may apply for title under this Act is extended from one to two years after the death of such person, as formerly the case.

No fees relating to pre-emption are due or payable by soldiers on pre-emptions recorded after June 20, 1918. Taxes are remitted for five years.

Provision for return of money advanced, due and been paid since August 4, 1917, on account of payments, fees or interest on soldiers' pre-emptions, or taxes on allotments to purchase of town or city lots held by members of Allied Forces, or dependents, acquired direct or indirect, remitted from enlistment to March 31, 1920.

SUB-PURCHASERS OF CROWN

Provision made for issuance of Crown grants to sub-purchasers of Crown lands, acquiring rights from purchasers who failed to complete purchase involving forfeiture, on fulfillment of conditions of purchase, interest and taxes. Where sub-purchasers do not claim whole or original parcels, purchase price and taxes may be distributed proportionately over whole area. Applications must be made by May 1, 1920.

GRAZING

Grazing Act, 1919, for systematic development of livestock industry providing for grazing districts and range administration under Commission.

Annual grazing permits issued based on numbers ranged; priority for established owners. Stock-owners may form Associations for range management. Free, or partially free, permits for settlers, campers or travellers, up to ten head.

THE WHY OF THOSE SHOE PRICES

(Continued from Page 1)

The Central Leather Co., of the United States, annual report for 1919 shows a surplus, after all dividends, charges and interest are deducted, of \$8,384,470, or nearly \$2,000,000 more than in 1918.

The net income last year was \$14,288,481 or the equivalent of \$31.11 a share on the common stock after providing for all preferred disbursements.

The head of a household who has been compelled to buy shoes for the family during 1919 was aware that something of the kind was happening. The official report of the company now makes it clear just what.

One never knows how foolish some men can act until they break in to the father class.
