CHARGED WITH VIOLATING THE WATER ACT

Case of Irrigation Water Flowing from One Lot to Other

DECISION SATURDAY

R. Clouston Takes Action To Stop Water Reaching His Collar

The result of a case brought before Police Magistrate Hutton on Wednesday, will be of more than passing interest to land owners under irrigation systems. A charge was laid by R. Clouston against H. Sculthorpe, under Section 29 of the Water Act, the information being that Henry Sculthorpe did unlawfully divert more water than he could beneficially use, to the prejudice of Robert Clouston.

W. C. Kelley conducted the case for Mr. Clouston, while Mr. Sculthorpe had no counsel, although the Magistrate offered to adjourn the court to give him time to arrange for counsel. Much evidence was taken down, including that of Municipal Clerk Nixon, which was for the purpose of proving ownership of the land and that the accused was being served by the municipal system.

The date mentioned in the charge was Monday, August 30th, and Mr. Clouston gave evidence stating that since the beginning of the season water has been entering his cellar to the extent of three or four inches in depth, every time Mr. Sculthorpe irrigated. He told of reporting the trouble to Mr. Sculthorpe and requesting that he prevent the water flowing from the Sculthorpe lot onto his own. There was no other possible source for the water in his cellar, except from the irrigation ditches on the Sculthorpe lot. He was troubled the same way last year and this spring had told the accused he must make some arrangement to prevent the water coming onto his land.

When the trouble commenced again this spring he had notified Mr. Sculthorpe that the water still continued to come. The accused had made a furrow across the foot of his lot, but the water overflowed this ditch. Mr. Clouston had written the Soldiers' Settlement Board, from whom the accused had bought his land. They denied responsibility. A letter to the District Engineer remained unanswered.

Cross-examined by Mr. Sculthorpe, the witness said that a ditch had been put across the foot of the irrigation furrow last month. There was a strong tendency on the part of Mr. Sculthorpe to argue the matter with the witness instead of adhering to the court procedure. When asked if he had not always been bothered with water the witness answered in the negative, the only time he had been being when snow was melting.

Henry Sculthorpe, sworn, stated that the irrigation ditches on his land ran toward the Clouston property. He did not have sufficient water to properly irrigate his trees. When told of the water escaping to the Clouston property, he had tried to prevent it and had cut a deep ditch across the furrow, cutting of some trees from irrigation. He inspected this ditch frequently and claimed that the flow on the day mentioned was caused by a mole hole. This he had stopped as soon as discovered. He admitted the trouble could be stopped but at considerable expense. When cross-examined he said the water was running in this furrow on August 30th, but not enough to get out to the Clouston property. Asked by Mr. Kelley if it would not be wise to use some of this water on the trees which he said were dry, instead of allowing it to waste, the witness replied that the water would not run uphill.

The evidence showed that the water in the cross-ditch was the accumulation of an overflow from the ditches in the tree rows.

V. J. Bernard testified to the putting in of the preventative ditch that he thought was large enough for all the water going into it. In the cross-examination of this witness, Mr. Kelley apparently attempted to show that by irrigating in a different manner the overflow onto his neighbor's lot would be prevented, and Mr. Clouston, when re-called was questioned along this line. He stated that he had been in charge of the lot for 10 years and had made a profit from the fruit crop. In all this time there had been no water escaping to his land.

In addressing the Court, Mr. Kelley pointed out that Mr. Clouston was not taking action for damages but wanted the nuisance stopped, and stated that the whole case was based on the charge that the accused took water in excess of what he could beneficially use, with the result that it flowed onto his neighbor. Mr. Kelley pointed out the status of the water user and quoted from the Act, the spirit of which, he stated, is that water shall not be wasted. Other courses could have been taken to stop this nuisance, but the method which was adopted was the cheapest for all concerned. It was important that Mr. Sculthorpe should realize his legal position.

To this the Court replied that there were many others who did not realize their positions with respect to the use of water. Stating that he desired to look over the lots in question, His Honor adjourned the case to Saturday at 11 a.m.

THE OPEN SEASON FOR PHEASANTS

The open season for pheasant shooting is not the same throughout this part of the province. In the electoral riding of South Okanagan it is limited to the six days, October 20th to 25th. In the Similkameen the season extends to the 30th. The southern boundary of South Okanagan crosses the Valley a short distance south of the Experimental Station. From there to the boundary the longer season will prevail.

A change in the regulations affects minors, the age limit having been raised from 16 to 18. Now no boy under 18 may obtain a gun license without first obtaining the consent of parent or guardian together with an undertaking by him that the youth will always be accompanied by a senior when carrying a gun.

ORCHARD HELP IS AVAILABLE

Some Picking Prices Now Paid in Okanagan

If any of our fruit growers are in need of girl pickers they should apply to Miss Davidson, care of the government labor bureau, 480 Homer street, Vancouver, according to information furnished The Review by one of our fruit growers. The Dominion government also has a man stationed at Vernon, where a labor bureau is maintained; but, according to report, that office has sent men from the Okanagan to help in the prairie harvest fields.

Methods of payment for orchard work seem to vary between the several sections of the Valley, according to our informant. In the Vernon district girls are largely relied upon for picking the fruit. When paid by the hour the rate of payment is 30c. But most of the labor is done by "piece work." From 5c to 7c is paid for orchard boxes of 40 pounds net. This variation in rate is made according to working conditions, and figures out at from \$2.50 to \$3.50 per ton. The higher price is said to be paid in the orchards where trees are high.

From 11c to 15c is paid for 40 pounds of crabs, and 12c to 15c for the same quantity of prunes.

In one orchard our citizen saw a crew of 10 men, whites and Japs, at work. Most of these were being paid by the hour at 40c. Asked how these rates compared with those being paid here, the visitor to the northern end of the Valley replied that, as far as he was aware, these wages did not average as high as is being paid here.

SUMMERLAND WEATHER REPORT

Below is a report furnished by the Dominion Experimental Station here for the week ending Tuesday:

Date, 1920	Max.	Min.	Rain	Sn.	Sun.
August 25	62	60	0.0
August 26	71	55	.05	10.2
August 27	64	55	.02	0.0
August 28	67	48	0.0
August 29	59	44	.10	4.9
August 30	70	49	11.2
August 31	71	45	12.4

A motor truck belonging to the Fruit Union, and carrying about three tons of fruit, broke through the Upper Poach Orchard bridge on Thursday afternoon. One of the rear wheels of the truck broke through the plank, resulting in a bad spill, a portion of the fruit being dumped into the creek.

It is pointed out that Mr. Clouston was not taking action for damages but wanted the nuisance stopped, and stated that the whole case was based on the charge that the accused took water in excess of what he could beneficially use, with the result that it flowed onto his neighbor. Mr. Kelley pointed out the status of the water user and quoted from the Act, the spirit of which, he stated, is that water shall not be wasted. Other courses could have been taken to stop this nuisance, but the method which was adopted was the cheapest for all concerned. It was important that Mr. Sculthorpe should realize his legal position.

To this the Court replied that there were many others who did not realize their positions with respect to the use of water. Stating that he desired to look over the lots in question, His Honor adjourned the case to Saturday at 11 a.m.

SUMMERLAND MELONS PRAISED

All Lines of Vegetables Being Moved in Volume

VALLEY CONDITIONS

General Showers Have Been of Much Benefit Throughout Valley

Crop movements are the subject of a report issued by W. T. Hunter, District Horticulturist, under date of Saturday last.

Treating the Valley first in sections and then of conditions generally, the report reads:

Salmon Arm—Potatoes and beans promise a good yield in the Ashcroft District, although the acreage is greatly reduced as compared with last year.

Fruit is sizing well in the Kamloops District, and the vegetable crops are very promising.

The rain of ten days ago improved the moisture situation at Salmon Arm and as a result the fruit is continuing to size up very well. McIntosh Reds are the most promising. Berry canes have made a splendid thrifty growth in this section and the berry business deserves the most earnest consideration of the growers as being one of their most promising crops in this section.

Where the matter of soil fertility has been given consideration, the moisture supply has held up well through the hot weather and as a consequence the canes compare very favorably with the cane growth of the berry sections on the Coast.

Vernon—Yellow Transparent and Red Astrachan apples are about over. Duchess now coming in in considerable volume. Wealthies will not move for two weeks. On the whole the quality of the Duchess apple is not as good as it should be, due to the fact that the growers as a whole have not paid enough attention to thinning. Duchess trees if allowed to follow their own natural tendency will bear a heavy crop every other year. Provided, however, that the tree is liberally supplied each year with plenty of moisture and plant food very early in the season it can be brought into a thrifty condition where average crops can be obtained each year. Very heavy thinning of the fruit in the early season, as soon after the apples have set as possible, will tend to assist the tree in maintaining its annual crops. As the Duchess apple ripens early in the season and sizes very rapidly from the time the fruit is set, there is naturally a very heavy drain on the vitality of the tree and as a consequence unless the tree is very carefully fed and handled it is not possible for it to bear and set strong fruit buds for the next season.

Potatoes and cabbage are moving slowly and shipments are in considerable volume. Shipments to date out of the Valley fall approximately 100 cars short of being equal to last year at this date.

Kelowna—Weather continues good with cool nights and occasional showers. Duchess apples coming in in fairly large quantities and in good condition. Transcendent Crabs are moving fast and in splendid condition. Pears are good crop. Bartlett's, Clapps Favorite and Bousack are now moving. Apricots and early peaches about over. Tragedy, Burbanks, Abundance, Maynard and Bradshaw plums coming in slowly, condition good. Tomatoes are very slow in ripening this season. Cannery operations hardly commenced at this date.

Pentleton (Keremosis District)—All crops, including apples, pears, peaches, corn and tomatoes making excellent progress. Tomatoes are ripening fast and much ripe fruit is in evidence. Delicious especially showing well. Up to date plenty of water has been available.

Pentleton District—All crops making excellent progress. Duchess, Yellow Transparent, Totofsky, Crabs, Bartlett, Clapps Favorite, Yellow St. John, Hale's Early, Burbank and Abundance, of good quality, are moving through the packing houses. Light showers fell on Wednesday, the 25th inst.

A report has been circulated at the Coast that the Peach crop will not be up to the average, but this is erroneous, as the Crawford and Elberta crop never looked more promising for several seasons as to both quality and quantity, Elbertas giving in particular a promise of being a very fine crop.

Summerland—Some cantaloupes

SUMMERLAND IS SENDING TEACHERS

Several of Summerland's younger citizens are leaving this week-end to take up teaching in various parts of the West. Miss Kathleen Brown is leaving tomorrow for Wayne, Alta., where she will teach. Miss Marion Harwood goes to Arrowhead, B.C.; Miss Gertrude Elsey to Bridesville, B.C., and Miss Edith Bristow to Wabachine. Miss Belle Vandenberg is taking a school in the Arrow Lake District. Miss Susie Wallack will teach near Vernor. Roy Elsey is taking a year off from his University studies and has taken the principalship of a school at Smithers in the northern interior of British Columbia. He left here last week to visit in Vancouver and Prince Rupert. From the latter city he will journey east 200 miles.

TO ORGANIZE NEW PARTY

Liberals and Conservatives Are Invited To Unite

The new political organization in Canada recently formed under the leadership of the Hon. Arthur Meighen of Manitoba and known as "The National Liberal and Conservative Party" will organize a local branch in Summerland on Tuesday evening next at a meeting called in the Parish Hall, of which public notice is given in this issue.

A member to succeed Hon. Mr. Burrell must be elected in this constituency within the next two months and the new party will have a candidate in the field and is anxious that its comprehensive policy for the betterment of Canada be placed before the electors for consideration.

Mr. J. W. Jones, of Kelowna, will address the meeting on Tuesday and otherwise assist in organization work. It is expected that a large attendance of both women and men electors will be present at this important meeting which will mark the initial step of the National Liberal and Conservative Party in this locality.

MANY COLLISIONS ON SHORE ROAD

Collisions on the Summerland-Peachland road are altogether too frequent, and are likely to continue until the road is improved at the points where these collisions occur.

A few days ago, Walter J. McDowall of the O.U.G. was on his way from Summerland to Peachland when his car collided with the Lambie car of Summerland. Mr. McDowall's car had to be brought back for repairs. Yesterday a Dodge car coming south was run into by a car going north. The driver of the Dodge said he saw the car approaching and turned out and stopped, when the other car came around the turn and collided with his.

OKANAGAN CELERY GOES TO U.S.A.

KANSAS CITY, Aug. 20.—A carload of British Columbia celery was received by the R. W. Goes Commission Company Wednesday. This is said to be the first Canadian celery ever received on this market. The stock was of good quality but due to the long trip and to the fact that the car was heavily loaded, some of the celery was heated. The stock was bringing from \$2 to \$4 per crate according to condition.

of excellent quality are rolling from Summerland. Yellow St. John peaches are moving now. All lines of vegetable crops are being shipped in volume, stock cars being used for tomatoes, cucumbers and early apples. Freight shipments from this district run from four to five cars per night. Express shipments are fairly heavy, running about 1200 cases per night. They are not quite as heavy as last season at this time.

Weather Conditions
The nights have been very cool for the past two weeks and as a result tomatoes are not ripening as rapidly as could be wished. The days have been only moderately warm, and heavy showers fell throughout the Valley on Friday, the 27th inst., and will do much to improve the moisture conditions.

Note.—Owing to the meeting of the Western Horticulturists, Entomologists and Pathologists in Vernon last week, no news letter was issued.

ONTARIO IS SHIPPING WEST

Stone Fruits Coming Farther West Than Usual

CALGARY PRICES

Some Prices Being Quoted by Shippers Here and Elsewhere

CALGARY, Aug. 28.—Ontario is shipping her greenage plums further west this year than usual. Three cars are rolling to Alberta now, besides considerable volume of L.C.L. shipments. Edmonton gets two cars of these rolling and Calgary one.

Tomatoes, cucumbers and pickling onions are also coming into prairie markets from Ontario this year.

Duchess apples are being offered for B. St. Catharines at \$1.65 per bushel basket.

B.C. potatoes are still coming forward quoted at \$5 f.o.b. Vernon. B.C. cucumbers are scarce and advancing in price; they are now bringing 75 cents per box. Okanagan tomatoes are better in pack than last year; the 4-basket crate is an improvement on the flats. Kamloops sends some very nice tomatoes in 4-basket crates, being a decided improvement in grade over previous years.

A limited number of Everbearing Strawberries are arriving from the Lower Fraser Valley and Nelson. The price is \$6.00 f.o.b. shipping point.

B.C. Duchesses are arriving in crates and moving freely. Cherries are about past. Crawford Bay sends good cherries rather slack in pack. Mr. S. Savage, of Plunkett & Savage, Mr. Hoskins of P. Burns & Co. and J. S. Fee, of Vernon Fruit Co., are at present visiting B.C., looking after their firms' interests there.

Dairy butter, 40c to 43c straight. Creamery butter, price unchanged, tone of market little firmer.

Fancy butter, 50c, light receipts owing to harvest.

Eggs, advance, price, \$16.50 per case.

Calgary Wholesale Prices—Fruit:

B.C. Apples, unwrapped, per box \$2.75 to \$3.00

Wash. Peaches, Crawfords, per box \$2.75 to \$3.00

Cal. Peaches, Elbertas, box 2.50

B.C. Peaches, Clings, box, 1.75, 2.25

Cal. Pears, Bartlett, box, 5.25, 5.75

Blackberries, crate, 4.00 to 4.50

Greenages, Bradshaw and Yellow Egg Plums, per 15-lb. basket 2.10 to 2.25

Transcendent Crabs, per pear box 1.85 to 2.00

Cantaloupes, Standards, 45c, per crate 4.75 to 5.00

Blueberries, Eastern, 15-lb. bkt. 4.00

Bilberries, B.C., lb. 15c to 22c

Saskatoons, lb. 12c to 12c

Prunes, Wash., peach box, 1.60, 1.75

Plums, B.C., Peach Plums, 4 bskt. 2.00 to 2.25

Vegetables:

Tomatoes, B.C., 4 bskt. 1.15 to 1.40

Tomatoes, B.C. Green, pear box 1.25

Cukes, B.C., peach box90

Celery, B.C., per lb.08

Culms, Pickling, per crate, 1.50, 2.00

Cauliflower, local, lb.05

Turnips, Carrots, Beets & Cabbage, lb.2c to 2 1/2c

Citrus, Marrow and Squash, per lb. 2 1/2c to 3c

Corn, Sweet, per doz. 40c to 45c

Green Peppers, per lb. 15c

Egg Plant, lb. 15c to 18c

Parasols, lb. 4c

Onions, Pickling, White Silver-skin, per 20 lb. case 2.25

Potatoes, Local, ton, 40.00 to 50.00

Below are prices being quoted by B.C., Ontario and Washington shipping points for f.o.b.

British Columbia—

Apples, early, wrapped, box 2.50

Apples, early, crate 2.00

Crab Apples, Transcendent, 1.25 to 1.35

Citron, ton 40.00

Beets and Carrots, ton 30.00

Potatoes, Okanagan, ton 35.00

Celery, lb.05

Corn, doz.30

Green Tomatoes, pear box00

Ripe Tomatoes, flats 1.00

Ripe Tomatoes, 4 bskt. 1.25

Cucumbers, box75

LOCAL REALTY CONTINUES ACTIVE

Several local orchard properties have changed ownership during the last few days. Among the sales recently reported is that of the Edgar Gould property in Prairie Valley to H. C. Handley, of Winnipeg. Another Winnipeg buyer of Summerland realty is Sidney R. Davis, who has bought the Wisner property in Garnett Valley. Both these new citizens are coming to Summerland this month with their families. Both sales were made through the agency of F. D. Cooper. Another sale made by Mr. Cooper is that of the Oldham orchard property in Prairie Valley to Reginald Coldwell. Mr. Coldwell, with his wife and children, have been living with Mrs. Coldwell's parents, Mr. and Mrs. Penant, since coming here from the Northern Interior.

DONATIONS TO HOSPITAL

Local Institution Depends on Public Support Largely

The management of the Summerland Hospital depends largely upon a generous public for much of the vegetables, fruit and many other things required by that indispensable institution. That they do not look in vain is evident from the following list of donations made to the hospital in August. The list has been furnished The Review by the matron, Miss Johnston, who would have this paper express her gratitude to the numerous donors. August donations were:

Mrs. H. Smith, lettuce and cherries; Mr. Pollock, gooseberries, cherries and magazines; Mrs. W. Verity, vegetables; Miss D. Cooper, flowers, cake, magazines, jam; Mrs. Zimmerman, vegetables; Mr. R. H. English, repair of road at entrance to hospital; Mrs. H. C. Mellor, 5 doz. eggs; Mrs. R. R. Chew, fruit; Mrs. J. Treacy, potatoes; Major Hutton, fruit and vegetables; Mrs. E. J. White, jam, pudding; Mrs. Walton, vegetables (Prairie Valley); Mrs. Eckersley, fruit; Mr. J. Logie, loan of gramophone, magazine; Mr. Inabe, tomatoes, fruit; Mrs. Geo. Culver, eggs; Mrs. S. M. Young, fruit; Mrs. R. H. Helmer, vegetables; Mrs. R. L. Theed, vegetables; Mrs. Croil, fruit; Mr. Wm. Armstrong, eggs; Mrs. Millar, eggs; Mrs. W. J. Robinson, fruit; Mrs. Bray, fruit, old linen; Mrs. C. Evans, sack of potatoes; Mrs. W. E. Walters, fruit and vegetables; Mr. H. B. Hume, \$10 for electric iron; Mrs. R. M. Ross, jam, old linen, magazines; Mr. A. J. Beer, vegetables; Mrs. E. R. Butler, jam; Mrs. G. Young, flowers, eggs, vegetables.

Owing to the shortage of vegetables during the winter season it would be a great advantage to the hospital to have some preserved. Old linen or washable material or flour sacks would be much appreciated.

WASHINGTON OPENING APPLE PRICES

For the information of B.C. apple shippers the Fruit Markets Bulletin submits the following apple prices quoted for Canadian markets. These prices are f.o.b. Yakima.

Extra Fancy Fancy Grade C.

Jonathan \$2.35 \$2.20 \$2.00

STORING POTATOES FOR WINTER USE

Supt. Helmer Tells of the Two Best Methods

It will not be long until potato digging time is here. Each returning season brings to mind many questions of how best to care for the winter's supply of this staple article of food. Supt. R. H. Helmer, of the Summerland Experimental Station, says the two methods most used for the storing of roots and potatoes are the pit and the root house. The pit method is excellent but has the disadvantage of not being easily accessible during the very cold weather. To make a pit dig a trench 4 feet wide and 2 feet deep and pile the crop in level with the sides and heap towards the centre, not having any roots higher than three and a half feet at the centre. Before putting in the crop, nail two 12-inch boards together, forming a V-shaped ventilator the full length of the pit and allow them to protrude each end, rest the ventilators on the two boards, a hole being cut in the boards to allow ventilation to come from below. The ventilator shafts are made from 8-in. boards, two sides not boarded up inside the pit but slatted to allow free air passage and at the same time prevent roots from getting into the shaft. When all is in place cover with straw and put on just enough soil to prevent the straw from blowing away, and allow the roots to cool off for a few days. Then add 5 or 6 inches of soil, leaving all vents open both at the top and at the ends. As the weather gets colder add more dirt and in very cold weather close the vents by stuffing old sacks or similar material into them. When the weather modifies remove the sacking.

In root houses similar precautions must be taken. Give the houses as much air as possible when the roots are first sorted and see that the atmosphere is not too dry. In our dry climate we sprinkle the floor well once in three weeks. Should there be the least sign of shrivelling, more water should be put on the floor. Vegetables that have already gone down a little can be brought back by increasing the moisture of the air. During warm spells close the door during the day, leaving it open in the evening till bedtime to cool the air. The temperature in a root cellar or pit should not go above 38 deg. Fahrenheit nor below 32 deg. The moisture content of the air can be taken by a hygrometer.

During long spells of cold weather we watch the thermometers very closely and if any danger is feared we use oil burners in the cellar at night. The exposed walls of a root cellar need air spaces if made of stone or cement. When only a small portion of the cellar is out of the ground, bank well with manure and this will keep the frost from penetrating the walls.

Points To Remember
Allow the roots or potatoes to harden and dry in the field, covering them with tops if the weather is cold. Handle carefully; bruised and damaged products should be kept apart to be used up first. Don't pile up the crop too high.

FALL CARE OF BEES AND THEIR WINTER PROTECTION

By R. G. NEWTON.

Local bee-keepers will profit by the advice given by Supt. Newton, of the Dominion Experimental Station, Invermere, B.C., on the subject indicated in the above heading:

The initial step in the successful wintering of bees commences in September, says Mr. Newton, when the hives are carefully gone through and the weak ones fed a syrup solution consisting of two parts sugar and one of water. An ounce of cream of tartar to 40 lbs. of sugar is usually added to invert the sugar and retard granulation. Continue feeding in October if necessary, and make sure that each hive has at least six full frames of sealed stores.

The hives should be packed or stored away in November and various methods may be adopted. At the Experimental Station, Invermere, we have tried wintering in the cellar, in a pit in the Ontario wintering case, and in the Kootenay hive case. The last method has given the best results, so we shall describe it at length.

The Kootenay hive case is an improvement on the double-walled hive, and has been introduced in the form of a permanent hive case, all made to take the 10-frame hive. There is a three-inch space all around the brood chambers and supers. Up to the top of the brood chamber it is kept permanently packed with moss or planer shavings the year around. This is covered in to prevent the moss or shavings from falling into the hive when open. Here is also a 3-inch space underneath the floor, which is kept permanently packed as well.

The stories, or "lifts" are all alike, and as supers are put on they are added. The flat cover is three-eighths inch larger all round than the top of the case, and small triangular blocks nailed in each corner inside raise it and ensure permanent ventilation.

To pack for winter all that is necessary is to have one "lift" above the brood chamber packed with moss

We make our bins three feet high with a flase bottom over the lower bin, and then fill another three feet. This allows free circulation of the air and can be cooled off very quickly.

Let the air in freely from doors and ventilators and keep the holes in the roof for filling the root house open till danger of heavy frost is near.

Watch the humidity of the house and keep the floor well sprinkled to avoid shrivelling.

Do not allow the temperature to go higher than 38 deg., nor lower than 32 deg.

DR. R. L. DAVISON

DENTIST
Mitchell Block, Penticton
Telephone 79

or planer shavings. To facilitate the packing we usually have pillows made from moss and gunny sacks, just the size of the storey or lift. The cover is then added and the bees are packed for the winter. The only attention now required is to keep the entrance clear of dead bees.

The bees have more protection in this case than in the double-walled hive, and the temperature is kept cooler and more uniform in summer. There is not the trouble of packing in the fall, or unpacking in the spring as in the case of the single-walled hives. It is less expensive than the double-walled hive, as three-fourths inch burlap is largely used in its construction. The bees come through the winter in good shape and commence work early in the spring. Bee-keepers would be well advised to give it a trial, as it has many features that are superior to other methods of wintering bees.

ANCHORING SLIDING MOUNTAIN IN OREGON

An unusual problem in railroad engineering has been solved in Oregon by draining water from under a mountain; at any rate, since the expedient was adopted the mountain has stayed in the same place, and the recurrent need of straightening the railway track seems to be done away with. The mountain rested on a layer of water about an inch deep over the bedrock, and used to slide about 10 feet a year toward the Columbia river, the swift current of which carried away the sliding mountain deposited in it. Naturally the railway tracks on the mountain shifted also, causing constant expense to its owners. Finally the company went to the source of the trouble, drove tunnels into the mountain and released the underground layer of water. The restless mountain settled down permanently and comfortably on a solid foundation, and since then there has been no more trouble with the tracks.

Steps are to be taken by the Provincial Government to secure specific information as to the number of settlers arriving in British Columbia, where they are locating and what they are doing, so that an efficient system of service to the immigrant on the land may be rendered.

WHY SOME EDITORS GO RAVING MAD

Deer folks: Now I know why editors go mad. I been trying to run this paper while the editor is on his vakashun. For three (3) days and nites I ben reading questions and trying to answer them and if I dont quit I'll be going around talking to myself. I'm going to answer a few more and go to the ball game.—Jimmy the office boy.

1. What is limberneck? J. Jones. Limberneck in the country is a strange disease of fowls and chickens. In the city it is a disease of human persons caused by watching fowls and chickens.

2. Do small cows give condensed milk? Mabel B. No, Mabel, condensed milk is made by trying to get a quart of milk into a pint bottle.

3. Please tell me how hash is made. Hash is not made, it accumulates.

4. Is it right to feed hogs corn on the ear? G. K. No, put it in a trough and let them help themselves.

5. I am in love with a homely girl who works for us, but she don't seem to care for me, while a pretty girl with lots of money wants to marry me. What shall I do? Will M. Marry the one you love, and send me the name and address of the other.

6. My hair is beginning to come out. What can I get to keep it in? A sack.

7. Please tell me how to raise a

nice fat hog of about 500 pounds. Z. Get a derrick.

8. How can I tell when the water is the right temperature for bathing baby? Young Mother.

If the baby turns red and hollers, the water is too hot. If he gets blue and shivers, it's too cold.

9. I am 40 years old, have a nice little farm, and am thinking about taking a wife. What would you advise? Old Batch.

I would advise you to be careful about whose wife you take.

10. Our red bull is chasing me around a 40-acre field. What shall I do.

I don't know, but don't give up. Mike the editor will be back in a week.

CHAMPION ATHLETES AND LOVELY CANADIAN SCENES

Athletes Off to Antwerp

The Canadian Pacific Ocean Services Liner Melita sailing from Montreal on Saturday, July 24th had amongst her passengers the Canadian athletes who will represent this country in the Olympic Games, or world championship athletic events, to be held at Antwerp in Belgium this summer.

On Saturday, July 17th the final trials to decide the men who should represent the Dominion were brought off on the grounds of the Montreal Amateur Athletic Association. Contests were brisk and the exhibitions given would warrant the prediction that it is not unlikely a few Olympic honors will be brought to Canada.

The chief performance of the day was furnished by Earl Thomson in the 110 metres hurdles. The big fellow clipped one and three-fifths seconds off the Canadian record, and was just a fifth over the Olympic record. His time for the distance was .15-1-5 seconds and from the manner in which he performed it is evident that there will be a further reduction in the hurdle event when this native son again competes. The previous record, .16-4-5 seconds, was established by George Barber, May 23, 1908, during the Olympic trials at Toronto.

Thomson won from a good hurdler in K. L. Carruthers. In fact an observer would be tempted to declare that Carruthers was the stylist of the pair. Thomson also performed in the jumps winning the high at 5 feet 10 inches, and the distance at 22 feet 7 1/2 inches.

The other feature event of the afternoon was the 5,000 metres run

in which four competed. Walter Knox the Olympic coach very calmly predicted that Thomas Town, the Brandon man, would prove the winner. Indeed Knox had advised Tommy to come with his trunk ready for a sea voyage, so confident was he that the Manitoba entry would size up to Olympic form. The Brandon runner slipped along with a good rhythmic movement and had lots in reserve when he finished with a smart sprint. Altogether it was as pretty a race as old timers confessed to have witnessed on the track.

In this event the first mile was done in 4 mins. 56 secs; the second in 5 mins. 23 secs., and the third in 5 mins. 10 secs. the three miles being completed in 15 mins. 29 secs.

Some of those on the Canadian team at Antwerp will be:

Alex. Ponton, Broadview Y. M. C. Toronto, and Cecil Coates, Grints.

Hector Phillips, West End Y. M. C. A. Toronto, 400 and 800 metres.

P. Lawrence, C. F. R. A.A.A. Montreal, 1,500, 5,000 and 10,000 metres.

T. Town, Brandon, Manitoba, 1,500, 5,000 and 10,000 metres.

E. J. Thomson, Prince Albert, Saskatchewan, 110 and 400 metres hurdles and jumps and Pentathlon.

E. C. Freeman, unattached, Toronto, 3,000 and 10,000 metres walks.

Archie Macdermid, Vancouver, 56 lb. and hammer throw.

John McEachren, Winnipeg, 55 lb. throw and shot put.

John Cameron, Vancouver, hammer throw, Decathlon and Pentathlon.

- (1) Eddie Lawrence, Montreal, the C. P. R. middle distance runner, who won the 1,500 metres race at the sports which decided the Canadian Olympic team.
- (2) A group of the athletes at the meeting.
- (3) John McEachren, Manitoba, (on left) and Arch. MacDermid, British Columbia, who will represent Canada in some of the weight throwing events.
- (4) Earl Thomson, a native of Saskatchewan, but now of Dartmouth College, United States. He stands 6 ft. 2 ins., is 26 years of age and weighs 190 pounds.
- (5) K. L. Carruthers, Ontario, who ran second in the 110-metre hurdles. He stands about 6 ft. 3 ins.
- (6) E. C. Freeman, Ontario (on left) and C. L. Barnes, Ontario, competing in the 3,000 metre walk. Freeman won by a narrow margin.
- (7) Tommy Town, of Manitoba, who ran splendidly in the 5,000-metre race.
- (8) Indians in full dress take part in the Calgary, Alberta, Stampede each fall.
- (9) Albertan Indians and their wigwams pitched at Calgary.
- (10) Mountain goats at Banff.

Viewing the Canadian Rockies

An easy trip from Banff, Alberta, is that to Lake Minnewanka, nine miles distant. There is a good road which passes the various animal reserves where elk, deer, moose, elk, goat and buffalo may be seen in almost natural environment. The mining town of Banffhead is beautifully situated in a pocket of the hills, a location to be envied, but decidedly looks a mining town. At the lake a comfortable chalet is found with good meals to be had and plenty of fishing. A small boat pierces the waters and each afternoon sees cars of all kinds and descriptions arriving with their loads of eight-seers for the trip up the lake. The return trip to Banff may be made in two ways. There is an old Indian trail round the north shore of the lake, then the walker turns south, passes through a short draw, then down Carrot Creek till he reaches the main highway from Calgary and from there, there is a good highroad into Banff. This walk from the chalet to Banff counts up about 31 miles. To lessen the mileage, the motor-boat may be utilized and a request be made to the captain to be allowed to disembark at the above mentioned draw, then walking up the draw and down Carrot Creek to the motor-road, our pedestrian (having phoned for a car before leaving the lake) sinks down into a seat of solid comfort and is howled over a beautiful road back to his temporary home Banff Springs Hotel.

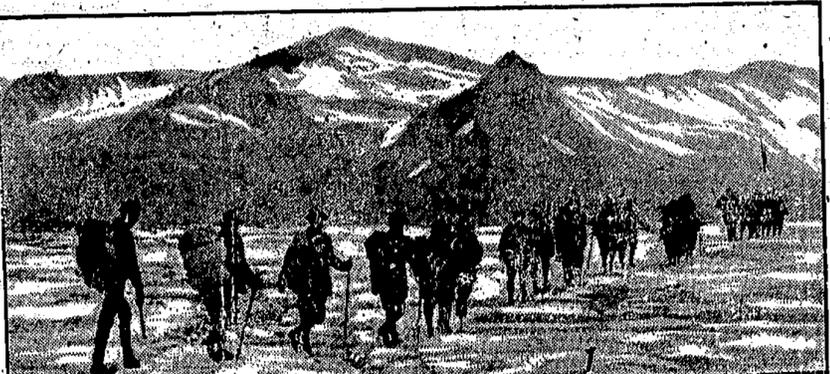

If the one on pleasure bent is a climber by love of the same, he has an amount of work cut out for him well within practical distances. Mount Aspinero at Lake Minnewanka is the highest peak (10,805 ft.). Mount Rundle with its lower wooded slopes and high bleak limestone walls just across the Spray River, comes next in height (9,630 ft.). This latter mountain extends in one long, straggling range for fifteen miles east, at which point Canmore has been built. Cascade Mountain, near the buffalo pasture, has an altitude of 9,800 ft. and has been climbed from its longer and easier slopes at the north. Mount Edith (8,340 ft.) to the north of Bow Valley, is seen to advantage from the Sun Dance Canyon road. To make the ascent the motor-road west is taken to about one hundred yards west of the third Vermillion Lake, where the trail to its base is well

marked. Mount Norquay, (8,225 ft.) to the east of Mount Edith is said by climbers to be one of the best elevations for studying the art of climbing. Banff is a rallying point of climbers.

Many have not the strength or desire for such a strenuous vacation as walking and climbing trips. Do not think you must sit still in Banff on that account. After one's own feet come those of the little four-footed friend of the trail—the mountain pony. He is not much to look at, but live with him, try the trail to the top of Sulphur Mountain, give him his head, do not attempt to attend to the business yourself, and he will bring you back safely. His one motto is "safety first" and he has no intention of ending his days abruptly by falling over a precipice. What is more, he never does. At Banff all trails are perfectly safe; they are Government-made, wide and free of debris and any child who can sit on a pony is safe on them.

By far the most popular means of seeing Banff is by the motor-car. The Government roads in every direction are constantly being improved and each year sees more mileage added to the already long list with improved condition of the older roads. Nothing gives a more comprehensive idea of the Bow River valley than to run down to Calgary (80 miles) by train and return to Banff in a good touring car. If there have not been long rains the roads will be in the shape and the runs may be made in three or three and one-half hours. The incoming stranger travelling by automobile will get a better idea of the foothill country and the amphitheatre of the mountains ahead. The prairie flowers nod a pleasant welcome as you pass, the little kopfers watch with such human curiosity, a coyote may be seen sneaking from the eye holes to another. The mountains seem to come closer all the eye picks out one ugly frowning peak—the Devil's Head (9,175 ft.)—which stares sullenly down on those who dare to come within his precinct. As the car glides into the Indian reserve, that menacing head disappears, behind the lower hills and does not come in view again.

Across the reserve an occasional tepee is seen, the children playing about it, the squaw at her work, the

- (1) Party from Alpine Club Camp crossing an ice field in the Canadian Rockies.
 - (2) Squaw of the Stony Indian Tribe on the Reservation, near Banff.
 - (3) Rocky Mountain ponies that carry the Banff tourists to the mountain peaks.
- horses browsing on the hillside. Perhaps you see an Indian taking his load of wood to the railroad, but they are not a stirring people and if seen, do not take much notice of the passer-by. But trust them to know if you have a feather in your hat, especially if it is red. The literal entrance to the National Park is more carefully guarded, and one is within the confines of the mountains. Near The Gap may frequently be seen a bunch of wild sheep feeding very close to the road. Exshaw, the
- comment centre is passed, Canmore, the mining town, Anthracite, which once turned out a large quantity of coal, but now is only a memory of the "gay old days", and a mile beyond a most picturesque hill up which the car winds and twists showing with each turn more and more of the beauty to come.
- As the last hill is topped the environments of Banff are spread before the eye. The great sweep of country toward Banffhead, marked by spirals of steam and smoke, lies to the right; towering nearby is Cascade Mountain, at its base and sweeping westward, the animal enclosures where once the Indians camped in their hunting season, and far, far toward the setting sun are mountains on mountains whose numbers are almost uncountable.
- Gliding down the long hill-slopes a motorist back to Banff Springs Hotel. In the days to come the pictures of that drive will live in memory where the little Banff in far away wrapped in her winter garments.
- M. S. W.

The Summerland Review

Established August, 1908

Published at Summerland, B.C., every Friday by THE REVIEW PUBLISHING COMPANY, LIMITED
Ralph E. White, Editor and Manager

An independent family newspaper covering Peachland, Summerland and Naramata and adjacent districts.

Subscription Rates—In British Empire, in advance, \$2.50 per year; six months, \$1.40. To U.S.A. and other countries, \$3.00 per year.

Advertising Rate Cards and information respecting territory and samples of paper mailed upon request, or may be seen at the office of any advertising agency recognized by the Canadian Press Association.

Advertisers must have copy in by Wednesday noon in order to insure changes for standing advertisements. New display advertising copy can be accepted one day later.

Correspondence—Letters addressed to the Editor and intended for publication must be short and legibly written on one side of the paper only. The longer an article, the shorter its chance of insertion. All communications must bear the name of the writer, not necessarily for publication. The publication or rejection of articles is a matter entirely in the discretion of the Editor. No responsibility is assumed by the paper for the opinions expressed by correspondents.

FRIDAY, SEPTEMBER 3, 1920

BUILDERS vs. WRECKERS

"The old party alignments are pretty well grown over now. Six turbulent years have done the work. The old battlements are more or less destroyed. There are still, I know, voices tuned to the old music; but the great mass of men and women are thinking and must think along other lines.

"Looking over the world today and then fixing eyes on Canada, I see only two divisions of our people, only two classes in this country. I see on the one side those who hold steady, who walk firmly in the middle of the road, who learn from experience, who believe in industry and ordered liberty, who still have faith in good old British institutions and British principles that have made us what we are. On the other side I see those who have given way to prejudices, to class consciousness, to passion for change and experiment, whose minds are occupied in nurturing suspicion and hostility against other classes of the State.

"On the one side I see the builders of this country on foundations tried and true. On the other side are those engaged in the cheerful exercise of tearing down. I put the question to you: Are you going to be a nation-builder or a nation-wrecker? Let us gather in millions around institutions that we love. Let us gather around a standard that we know and that our fathers knew. Let other people indulge, if they must, in the sport of freak governments and heterogeneous parliaments and experimental policies of State, but let us not forget the lessons of 50 years in our own land, nor what has been written for our instruction abroad. Let us hold to the path and to the principles that have led us into lusty strength, into peace with honor, into relative happiness and plenty and made of us the most vigorous and promising of the younger generations of the earth."—Premier Meighen, at Stirling.

TAX SALE PROPERTY

With how little prevision provincial legislation is frequently drafted has been exemplified at South Vancouver lately in the matter of the sale of property for taxes. In 1919 a business property in the adjoining municipality was disposed of in this way. The purchaser, regardless of the possibility of redemption within the year, proceeded to convert what had been a store into a dwelling house. Within the last few weeks, however, the original owner has taken advantage of his rights, paid all charges and resumed possession. He now wants to know by what right anybody made such radical structural alterations in his building.

This brings up the whole question of the care of improved property sold for taxes. The purchaser may find that it is absolutely necessary to make repairs to preserve the fabric. Such property is usually derelict and if left untenanted speedily deteriorates. The prospective owner, while awaiting the legal period during which the delinquent may put in an appearance with the moneys required in hand, must either take hold of it at an expense which in the event of redemption he is likely to be unable to recover, or allow the premises to go from bad to worse, which is neither in his interest nor that of the community.

It may seem a simple thing so to amend the law that in addition to paying the taxes due the owner must recoup the purchaser for out-of-pocket expenses, but care would have to be taken that those out-of-pocket expenses were not incurred on a large scale for the specific purpose of making redemption impossible. In any event, the legal position of property bought at tax sale but not transferred needs definition. Even when it is wild land questions as to responsibility for keeping weeds down and carrying out the provisions of local bylaws in general arise which in the public interest, as in that of the parties immediately concerned, ought not to remain in their present unsettled state.—Vancouver World.

Judge—Where did the automobile hit you?

Rastus—Well, judge, if I'd been carrying a license number it would had been busted to a thousand pieces.

S. S. Teacher—What does it mean by "the quick and the dead?"

Small Boy—Those as gets out of the way of the cars is quick, and them that don't is dead.

Peachland Doings

A Weekly Chronicle Furnished By Our Local Representative.

After a very pleasant vacation spent in Peachland as guests at the home of Mrs. L. Mills, Mrs. and Miss Jean McIntyre left on Wednesday evening's boat of last week to return to their home in Merritt, B.C. Miss Jean expects shortly to leave for Vancouver, where she is to attend school during the coming term.

Mrs. J. B. Robinson and Mrs. H. K. Mitchell entertained at a lawn social held on Mrs. Robinson's lawn on Wednesday afternoon of last week, in honor of Mr. and Mrs. C. G. Elliott and family and Mrs. McLennan and her daughter, Jean. A very pleasant afternoon was spent by all who gathered for the occasion. During the course of the afternoon a conundrum contest was put on, Miss Jean McLennan being the winner of first prize.

Miss E. Pentland left by stage last week after a pleasant vacation spent in Peachland visiting old friends and acquaintances. While here she was the guest at the home of Mr. and Mrs. A. D. Ferguson.

Mr. J. L. Elliott, Mr. C. G. Elliott and Mr. R. A. F. Moore motored to Keremeos on Friday of last week, where Mr. C. G. Elliott had some business interest. They returned the same evening.

The Peachland Women's Institute are making arrangements to entertain the Institutes of Summerland and West Summerland here on the 10th of September. A very pleasant time is expected. Further particulars will probably appear in these columns later.

After an enjoyable holiday spent here among old familiar scenes and faces, Mr. and Mrs. C. G. Elliott and family left on Saturday last to return to their home in Edmonton. Many of the old scenes were quite familiar, of course, but they noticed a marked growth on the various orchards which had been coming on when they left here almost half a score of years ago.

The Misses McIntosh spent a few days recently visiting their relatives in Westbank, returning early this week.

In spite of the dry season and the shortage of water throughout many parts of the country, Peachland has fared pretty well to date, but present indications are that the quantities of water will have to be cut from now on.

A case was held in the Council Chambers on Monday evening last, tried before Reeve Hogg, in which Mrs. W. A. Lang, plaintiff, charged Mr. Fred Young, defendant, with an infringement of the municipal by-law providing for the prohibition of stock running at large on municipal highways. The defendant lost the case and was fined \$2.50 and costs.

Mr. A. J. MacKenzie, Mr. Roy McCall, Mr. E. Nightingale and Mr. H. E. McCall returned on Monday night last from their extended motor trip down the Valley and across to Grand Forks. They report having enjoyed the trip despite the misfortune to be held up in Grand Forks a few days owing to a broken propeller shaft in the auto. This happened about eight miles out of Grand Forks on the homeward journey and they had to return to a garage for repairs. The time was not lost, however, as it was taken up by seeing more of the district. They report having seen quite a good district with a promising future when they got an adequate water supply, which they

LANDS FOR SALE

15 Acres of good, dark soil with creek running through bottom land. Ten acres under irrigation, about 7 acres cultivated with three planted with 6-year-old trees. The property of Mr. F. A. C. Wright. SPEAKS ON VALUE OF THE SABBATH

Rev. Dr. Heustis, of the Lord's Day Alliance, addressed a meeting last Friday evening in the Lakeside church on the subject of "The Sabbath." Dr. Heustis also spoke briefly the night before at the Prohibition meeting held in St. Andrew's church.

Dr. Heustis spoke very effectively upon the subject which he defined as being essentially moral and democratic. The old law of the Sabbath, he said, contains the finest possible ideas of democracy and consequently the suggestions for the best possible government for modern times inasmuch as it recognizes master and servant alike.

The remarks of Dr. Heustis centered around a main point which was in effect that the purpose and aim of the organization was to conserve the Lord's Day as a day of rest and supremely to guard the inherent spiritual values of it. It was pointed out that one of the reactions of the war was to promote the disposition to do unnecessary work and hence the great idealism so splendidly fought for in the great struggle may be lost in an unconscious disloyalty to the great standards of the Christian religion and the best traditions of the race. To properly conserve these, greed and selfishness must die within us and the great words of "service" and "sacrifice," so splendidly to the front during the war, must be kept in their honored place, challenging the young life of the land to the best, the hardest and the most lasting and worthy.

expect shortly to commence operations on. They also speak well of the highways over in that portion of B.C. and in fact over the whole route with the exception of about nine miles over Anarchist Mountain east from Osoyoos. This grade, however, is being replaced by a new one which is supposed not to exceed a 7.6 grade and is being built with a good width. As it was, the party made the home trip from Grand Forks in the one day, but when this new grade is completed and in good shape it will be a fairly easy day's trip with scenic beauty and many pretty and interesting ranches scattered all along the way as well as passing through the old mining landmarks such as Greenwood and skirting the Border at Midway. Another point of interest to the traveller is the varied vegetation along the way and the numbers of kinds of woods seen on the trip among which are quite large, towering tamaracks. Even wild game is sometimes sighted en route, this party having sighted a nice brown bear from the road.

Mr. N. H. McLelland has recently bought out Mr. Tom McLaughlan's garage business in town and has opened up in that line, ready to attend to the needs of the unfortunate motorist who finds himself add his car in difficulty of any kind. Mr. McLelland employed himself in the garage business in Vancouver before coming to Peachland.

Mrs. H. E. McCall has been under doctor's care for the past week with a very severe swelling on her thumb, but it seems to have come to a head

HIGH SCHOOL NOTICE

The High School will open Tuesday morning, Sept. 7th. All pupils are requested to be present on that day in order that the classes may be properly organized. On account of the fact that much of the work of the High School is new, it is highly important that attendance be regular and punctual during the first term. Irregular attendance frequently accounts for discouraging results at the end of the year.

Sunday, August 29.—D. Wyejowski, Winnipeg; J. Rowe.

Monday, August 30.—L. A. Page; W. W. Perry, Vancouver; T. H. Harding, Lethbridge, Alta.; A. Ferguson, Peachland.

Tuesday, August 31.—Mr. and Mrs. R. S. Hutton, Calgary; E. Temple, Vernon; A. W. Nesbit, Mineola.

Wednesday, Sept. 1.—R. Mayhew, Coronation, Alta.; John Kean Wright, Vancouver; E. J. Murphy, Winnipeg; F. Wilcock, H. Chiangin, Peachland; H. N. Johnson, Vernon; Mrs. Riley and daughters, Calgary; W. A. Middleton, Vancouver.

Thursday, Sept. 2.—Mr. and Mrs. G. W. Head, Miss Valmai Head, Donald and Alfred Head, Winnipeg; Geo. de la Mothe, Vancouver; T. Luadgold, R. Luadgold, Kelowna; Mrs. J. A. Cowper, Vancouver.

Mrs. E. J. White and little daughter went up the lake this morning to meet Mrs. White's father and sister, who are coming from Halifax to visit them.

After an absence of many months C. Noel Higgin has returned to Summerland. For the past two weeks he has been at Vernon and arrived here last night, having been appointed to the position of fruit inspector under Dominion Fruit Inspector Clark. Mrs. Higgin returned from Vancouver two weeks ago.

Tit for Tat

An elderly lady, telling her age, remarked that she was born on the 23rd of April. Her husband, who was present, observed, "I always thought you were born on the 1st of April."

"People might well judge so," responded the lady, "in the choice I made of a husband."

and she is getting some relief from it now.

Mrs. and Miss Jean McLennan are enjoying a visit in Peachland for a time and while here are guests at the home of Mr. and Mrs. E. F. Smith.

Preparations are now under way for Peachland's Annual Fall Fair, the date set being for October 14th. Further particulars will be given from time to time, however, later.

Mr. F. R. Jeffords has moved his family down to Penticton, where they expect to reside for a time. He is employed for a time, however, in this district on the erection of the home on the Westminster Trust Ranch.

Chocolates

Buy your Chocolates here. You will find them always fresh and tasty. We stock MOIR'S, GANONG'S and other high-class goods, both in bulk and in packages. Ice Creams, Sodas and Soft Drinks

KELOWNA BREAD fresh every day. Try a loaf. You'll like it.

SCHOOL RE-OPENING

Parents are requested to note that when school opens on September 7th, pupils will be admitted to the Receiving Classes at the age of 5 years and 9 months. This change in age is due to the fact that no Receiving Class will be formed in January, as has been the custom.

All beginners should be enrolled by Sept. 17th. By Authority of the School Board:

S. A. McDONALD,

Principal.

Next week we shall be turning out

Sausages by the Yard

Made from strictly fresh meats right on our own premises.

Boy Scout Column

1st SUMMERLAND TROOP B. P. SCOUTS

Headquarters, Ellison Hall

Scoutmaster O. F. Zimmerman

Meets every Friday evening at 7.30 p.m.

In spite of the rain there was a good turnout of both raiders and guards on Friday for the attack on the Ellison Hall. The Summerland boys were raiders this time, while the West Summerland boys guarded. None of the attackers managed to break through Leader Munn's line of defense by 8 p.m., so the guards were judged the winners.

With so many recruits and also through the approaching loss of one of our leaders it will be necessary to re-organize the patrols for winter work, four patrols now being necessary.

Interest of practically every Scout in the world is now being centred on the results of the big Jamboree in London. Its object was to raise money towards the Boy Scouts' Endowment Fund of £250,000. Ten thousand boys, representing 21 nations, took part in the week's entertainment and rally, it being the most wonderful gathering of boys on record. In a message to Sir Robert Baden-Powell, welcoming the Scouts, the King said:

"I am much gratified that the first Boy Scouts' International Jamboree, to the organization of which you have so zealously devoted yourself, should be held in London. I welcome the contingents from abroad who have come to take part in the competitions and displays and whose friendly rivalry cannot fail to act as a healthy stimulant to the boys of all countries. I am fully alive to the great benefits, both physically and morally, which the Boy Scout training assures, and I recognize the admirable results already achieved under your direction. I wish the gathering all possible success."

Perhaps the best description of the opening of the Jamboree is furnished by an ex-Boy Scout writing in the Overseas Daily Mail. Under the caption of "Homage of 10,000 to Those Who Passed On" in the War," he writes:

Ten thousand boys, lively, full-blooded boys, hushed into silence, with bowed heads and closed eyes—that was the miracle accomplished at Olympia in London, on Sunday, Aug. 1. They had foregathered for the great Boy Scout Jamboree.

The vast arena was one sea of khaki. Never before in the history of the movement have so many Boy Scouts been gathered together in one building. The youth of Great Britain, and of the Greater Britain beyond the seas, and of foreign lands girdling the world, flooded the great open space beneath the glass roof, in wave upon wave, rising and falling like a windswept ocean.

The dominant tone of yellow and brown was broken by the bright colors of neckerchiefs and shoulder knots, vivid emerald and scarlet and blue. This surging multitude overflowed the floor space and rose half-way up the tiers of seats on three sides of the enormous hall. The remaining rows above them were packed to the roof with spectators, who were deeply impressed by the spectacle of Innocence and Faith which lay beneath them and which brought a gulp to many a throat.

The whole of one side of the long building was covered with a curtain of dull green, lit up with one splash of gold where the first sunlight of August shone through the high roof. Against this simple background was a simple platform of dull red and yellow stripes.

On this rostrum stood the Chief Scout, Sir Robert Baden-Powell, a lean figure in khaki, and the Archbishop of York, Dr. Lang, white-haired, keen-faced, gorgeous in white and scarlet. A few others, including the Rev. Thos. Nightingale, secretary of the National Free Churches Council, and Mr. Geoffrey Elwes, the Chief Scout Commissioner, occupied the platform, which was lapped by the flood of Scouts, and before which were three flags—the red, white and blue of the King's Colors and the Union Jack, and the emerald of the Scouts' Imperial H.Q. color. Behind, on a red flagstaff, hung another green Scout flag.

Impressive Service

The service began. The bands welded the thousands of scattered worshippers into one great voice with the spell of music, as the Scout's Song (composed by Arthur Poyser, who conducted the singing and the bands) was sung. A white-robed figure on the platform read an intercession; then his voice rang out over the listening congregation in words of thanksgiving. At the end of each prayer he said:

"O Lord, hear these Scouts." Ten thousand voices answered: "And draw our hearts to Thee."

A hymn followed; the Bible lesson was read; and after another hymn the Archbishop of York began his address. His voice swept loud and clear into the farthest corner of the silent cathedral of youth.

He took as his text the words, "Keep what is committed unto your trust," adding, "as a Scout, as a man, as a Christian."

"I am speaking to one of the biggest assemblies of boys that have ever met together in history," he said. "I am almost awed by the huge power of the boys assembled here. How is such a solemn trust as is implied in this movement to be used? There is only one answer—to make a new and better world. You are not to claim rights; but to do your duty; not to care for yourselves, but for others; not to work for the class, but for the commonwealth; not to suspect and fight other nations, but to make comrades and brothers."

After the hymn which followed the address occurred the most striking and most dramatic moments of the whole dramatic service. The Chief Scout, Sir Robert Baden-Powell, called to remembrance those Scouts who had passed on during the great war. He gave the order: "Lower your colors, bow your

Passing Events: Social, Personal, &c.

Mr. and Mrs. C. Napier Higgin returned last Saturday from an extended visit to England.

O. Vaughan, of the Summerland Mercantile Co., returned last Sunday morning from a holiday visit to his home city, Victoria.

S. Angove, of the Summerland Supply Co., has been confined to his bed for some time past with a serious illness, from which he is now speedily recovering.

Miss Amy Brown arrived here a few days ago from Toronto, where she has been engaged in nursing. She will remain at her home here for a month or so.

Miss Angus returned on Wednesday to her home on, Shaughnessy Heights, Vancouver, after a two months' vacation with her cousins, Mrs. A. Milne and Mrs. G. Noble.

Mr. and Mrs. Lister, who have been visiting Mrs. Lister's parents, Mr. and Mrs. T. R. Harwood, left on Wednesday for Montreal, where Mr. Lister is taking a medical course at McGill University.

W. A. Middleton of the University staff was a visitor to Summerland this week. He is carrying on investigating in connection with costs of production in orchards, and has been making periodical visits to Summerland in connection with this work.

George Ross was a visitor to Summerland again this week. He has had a busy summer in connection with the car service of the C.P.R. and, working out of Winnipeg, has covered thousands of miles during the past few months. He had been appointed to a new position here in the Okanagan and as a citizen of Summerland, was looking forward to his new duties, which meant residence in the Valley, with considerable pleasure. Recently, however, another new position, which is in the nature of a promotion, has been offered him, and this he has accepted.

Mr. Ross left here Tuesday morning for Glacier, the western portal of the big Connaught tunnel, where he will be in charge of train operations. Mrs. Ross has been spending the summer here with her father and will leave soon to join her husband at Glacier.

heads in silent honor of these brave men." The long line of Scout colors was lowered to a horizontal position; every head was bowed, every eye was closed. Suddenly, unexpectedly, the voice of the Chief Scout sounded like a trumpet:

"Scouts, hold up your heads! Look wide!"

Twenty thousand bright young eyes were uplifted; like a field of fresh flowers the young faces shone with the light of budding manliness.

Upon them fell the blessing of the Archbishop. Then, like the images of a dream, the great curtain floated up to the roof; the khaki-shirted Scouts faded away in laughing throngs and companies—and the vast arena was empty.

Next week we will publish a contribution to the same paper, which gives a splendid idea of the work that was done by the Scouts during the course of the gathering. The American delegation of 300 was the largest, while that of Slim of 1 was the smallest. Canada unfortunately was unable to send any delegates.

Scott Darkis has been confined to his bed for several days, part of which time he was very ill, but he is now improving.

Any telephone subscriber who has not received a copy of the new directory is requested to advise the manager, phone 1.

Mrs. W. F. Chrisher and Miss Olive Van Hise, of Demorest, Georgia, arrived here last Friday to visit their brother, W. E. Van Hise.

Mr. C. J. Campbell, of Vancouver, and Miss Mabel McGregor, of Seattle, motored from Penticton on Tuesday and paid their brother, A. McGregor, a surprise visit.

Constable Arkell is warning motorists who do not obey the law with respect to parking of cars and the regulation of lights, etc., that the motor regulations must be adhered to.

An airplane passed up the valley about 2 o'clock on Wednesday morning. Where it came from or its destination is not known here as far as can be learned. It did not stop in Penticton.

Mr. and Mrs. C. W. Lees and Mrs. W. H. Hayes have returned from a vacation of two months spent in Victoria and Vancouver. After a day or two here, Mr. and Mrs. Lees went on to Kelowna.

Under the auspices of the Summerland Band, Helen Badgley, a well-known elocutionist, supported by a company of other artists, will appear next Friday evening in Empire Hall. Further particulars are given in our advertising columns.

Mrs. M. A. Sutherland, who has been living in Peach Orchard for about two years, left this month for a visit to Winnipeg. She was accompanied by Mrs. W. R. Black and her son, Ross Black, who have been visiting at Mrs. Black's brothers, H. Sutherland and J. M. Sutherland.

The Summerland Telephone Company this week issued its fall edition of the Summerland Telephone Directory. The new directory shows a healthy growth in the number of subscribers in connection with the local telephone exchange. The new book has the names of 337 telephone subscribers.

D. J. Welsh, Principal of the Summerland High School, returned to Summerland Monday afternoon, having made by motor the triangular trip, via Princeton, Merritt, Kamloops and Vernon, etc. Mr. Welsh was accompanied by Mrs. Welsh and child. While at Merritt, they visited a lumber camp where many millions of feet of lumber are being cut down to save the trees from becoming an absolute loss through the ravages of the pine beetle, which is causing great destruction in the Nicola district.

The gate in the storage dam on Canyon Creek was opened this week. This is the last reservoir to be opened. In a heading on our front page last week, which, by the way, had been altered at the last moment to fit a single column, rather exaggerated the situation, with respect to the water supply. The article itself told of there being no complaints of water shortage. Throughout the season, unfortunately, there has been a lack of water in some sections which it is to be hoped will be remedied before another year.

The high school and public school will re-open next Tuesday morning.

Joe Graham left this morning to return to Toronto, where he is studying dentistry.

Miss Kathleen Galbraith, of Vernon, is a week-end guest of Miss Kathleen Morrison.

Miss Hadley arrived here from the Coast a few days ago to visit her aunt, Mrs. S. Angove.

Mr. and Mrs. G. R. Hookham are now living in the L. R. Williams cottage in Peach Orchard.

Joe Gayton left this week for Victoria to take a course in the Provincial Normal School.

Superintendent R. H. Helmer went up to Malakwa this morning to judge in a crop competition being held there.

Mr. and Mrs. Ward and Mr. and Mrs. Barbor and daughter, of Saltcoats, Sask., are guests of Mr. and Mrs. G. H. Inglis.

Miss Joan Kinnard, the young daughter of Mr. Kinnard, Vernon Fruit Union, is here on a visit to her aunts, the Misses Spencer.

Mr. and Mrs. Spick, who have been visiting Mrs. Spick's sister, Mrs. A. W. E. Fawkes, left by boat this morning to return to Winnipeg.

Mrs. J. D. Wood was operated on in the Hospital last Saturday for appendicitis. The operation was a serious one, but she is recovering nicely.

The new school building erected to the west of the old High School building is now about completed. It will be used for Division 7, the beginners.

Mrs. R. E. White went up to Okanagan Landing this morning to meet her parents, Mr. and Mrs. J. P. Mosher, St. John, N. B., who are coming to Summerland for a visit.

Mrs. Bessette, who is again with the Government telephone service, was a visitor to Summerland this week on her way to Vernon from Princeton, where she is relieving the local operator.

Rev. J. J. Knox Wright, D.D., Provincial Secretary of the Canadian Bible Society, made one of his periodical visits to Summerland this week and on Wednesday night gave an illustrated lecture on South America. His lecture was much enjoyed by all those who attended.

A suit for maintenance was entered in Magistrate Hutton's court on Tuesday, under the new Deserted Wives Maintenance Act, by Mrs. Joe Stewart. The plaintiff was represented by W. C. Kelley. The defendant appeared on his own behalf and, after a brief consultation, the case was adjourned to give the defendant an opportunity to engage counsel.

A very interesting service was held last Sunday in the Summerland Baptist church. The Young People's Society, under the able leadership of Mr. Blackaby, had charge of the service, and the subject was, "The Good News in Song and Story." This was a resume of the life, death and resurrection of Christ. Suitable selections were read by Mr. Blackaby, and recitations were given by others of the young people. The rendering of some of the old favorite hymns and tunes was very fine, and was very greatly appreciated by all present. This is the first of several services the Baptist Young People are expecting to conduct during the coming months.—Con.

WAS SUMMONED ON FALSE CHARGE

Charged with driving his motor car at 10:30 last Monday night without lights, J. L. Logie was summoned at 8 o'clock Tuesday morning to appear in police court at Penticton at 10 o'clock that morning.

Mr. Logie went down, but the charge was withdrawn, as he had little difficulty in establishing the fact that he was asleep and his car in the garage on Monday at the hour stated. Unfortunately Summerland motorists are getting the impression that they are the special targets for Penticton police authorities. In the opinion of one of these, Penticton should be avoided like a town with the smallpox.

FOR SALE—Pool table, at bargain price. Apply Penticton Hotel, Penticton, B.C.

Tait not later than Tuesday next, so that transportation may be arranged for.

Naramata News

Current Events of Town and District

A most enjoyable and successful function was carried out in the church basement on Wednesday night under the auspices of the teachers and officers of the Sunday school. About 65 persons were present. The entertainment was given as a farewell to visiting ladies in the community. Mrs. Ameron had charge of the programme, which was as follows: Three choruses with piano and violin accompaniment. Vocal solo, Miss Sievers. Game (picture gallery). Kathleen Kendall and Stanley Allen won the highest points in this contest. Vocal solo, Mr. Griffith. Cornet solo with piano and violin, Mr. T. Kenyon. Game (telegrams); the wittiest of these were read out and caused much enjoyment. Vocal solo with piano and violin, Miss Margaret Allen. Game (Pinning on the Donkey's Tail). Each number was heartily applauded and responded to an encore. Mrs. Green was an untiring pianist and Mr. Ameron acted in the capacity of violinist.

Mr. Jas. Young very appropriately and with well-chosen words wished our visitors farewell, hoping they would return next year. He thanked all who so willingly contributed to the enjoyment of the evening. Refreshments were served, which contributed not the least to the evening's enjoyment. This party was convened by Mrs. M. M. Allen.

Rev. W. P. Ewing is again back from his holidays and was present at the Sunday service. The address was given by Rev. C. Heustis, D.D., General Secretary Lord's Day Alliance, and was listened to with much interest. Present also were Rev. A. E. and Mrs. Roberts, who while holidaying are taking a trip through the Okanagan Valley. Mr. Roberts is in charge of the Turner Institute, Vancouver, and his work is largely among foreigners. A most pleasing feature of the afternoon service was a vocal solo by Miss Doris Price, of London, Eng.

Weekly prayer meeting was held last Thursday night and was quite largely attended. Mrs. Allen had charge of the meeting.

The Woman's Auxiliary after a six weeks' holiday have taken up fall work, the monthly meeting being held on Thursday of this week in the church basement. Mrs. Robert Gammon served refreshments.

Although there is supposed to be a water shortage in Naramata and the North Bench people are told there is only enough water for domestic purposes, the South Bench people are still irrigating as many as three or four lots in one day. It seems rather hard to solve a problem of this kind. There might be some clever persons whom we have not got in touch with that could explain this through your columns. We feel it needs some explanation. Who is at the bottom of it?

Mrs. F. J. Young returned home from Vancouver last Friday, where she had gone to undergo a very serious operation. She is now making wonderful progress toward recovery and is loud in her praises of the work done at the General Hospital of that city. Mr. and Mrs. Young, through the medium of The Review, wish to thank the many friends who so kindly lent a helping hand during their trouble.

The Girls' Basketball Club held their weekly game on the church grounds on Tuesday night and much enthusiasm was displayed. Those under the leadership of Miss Margaret Symons were the winners on this occasion.

Mr. and Mrs. H. Elsey have as their guests Mr. Elsey's cousin, C. E. Ruth, and his wife and two children, of Beaumont, Texas.

When a girl plays a ragtime so that it sounds like a funeral march, it may be truthfully said that she is murdering the music.

ANNOUNCEMENT

The Office of

Dr. C. J. COULTAS

DENTIST

is temporarily located at the HOTEL SUMMERLAND awaiting completion of the Johnston Bldg., West Summerland, where he will be permanently established.

Favors Local Government Board

Municipal Inspector Baird Has Revived the Proposal—To Aid Municipalities

The establishment of a Local Government Board to act in an advisory and supervisory capacity to the municipal councils of British Columbia, has been under consideration by the Union of British Columbia Municipalities for several years. Two years ago the convention at Penticton went on record in favor of such a board. It was to consist of three or not more than five members, appointed on account of municipal experience and entirely free from political or any other influence. But last year, when the matter again came up for discussion, as there was said to be no assurance before the convention that in the event of the establishment of a Local Government Board its members would be appointed for municipal ability only, those in favor of the board refraining from voting and the proposal was defeated.

Advocates of the Local Government Board, however, have not let the proposal drop out of sight entirely, and in a memorandum on the subject recently issued by Mr. Robert Baird, with the object of the proposed board, he emphasized the advantages of a central advisory and supervisory board, established to assist municipal authorities and not in any way to take from them their present powers.

The result of the establishment of such a board as proposed, it is stated would be to broaden the powers of local councils, in that the authorities, with the approval of the board, would be able to modify in certain circumstances the hard and fast provisions of the Municipal Act so as to insure a more equitable administration. In fact, it is stated, British Columbia is the only province in

Canada which has no Local Government Board or its equivalent. Inspector Baird in his memorandum, which has been forwarded to all municipal bodies, gives as the primary objects of the proposed Local Government Board: 1. The creation of a central board less cumbersome than the legislature through which the strict requirements of the statutes may be relaxed in particular cases.

2. The creation of a bureau for the purpose of giving general information and advisory assistance to municipal councils.

3. The adoption of a system of further inspection of municipal office work so as to place the experience of the whole province in office routine and procedure at the disposal of each official.

4. The providing of a general control over the financial undertakings of the municipalities.

5. The restraint upon councils in the matter of handling municipal funds.

6. Providing for the dealing with special grievances and for the holding of special enquiries.

7. To provide a central bureau for registration of all municipal by-laws.

Inspector Baird in the concluding paragraph of his memorandum remarks:

"If the inauguration of a board of this kind is accomplished under the

most favorable circumstances, namely by the united efforts of the Provincial Government, the municipal councils and the public generally, to advance the interests of the municipalities, not alone in matters of finance but also in the problems of the machinery of government, most important of all public welfare, it should constitute a real contribution to the municipal life of the province."

IMMIGRATION INCREASES

OTTAWA.—Immigration to Canada is increasing rapidly according to a statement issued by Hon. J. A. Calder, Minister of Immigration and Colonization. During the month of June the increase over the same month last year amounted to 109 per cent, while for the three months of April, May and June 68 per cent increase is shown over the same three months of 1919. Of the 49,242 immigrants who entered Canada in the three months named, 28,487 were British, 16,397 were from the United States, and 4,358 from other countries.

CALGARY.—In order to assist farmers in obtaining sufficient labor to harvest crops, the city commissioners have instructed that leave of absence be granted to all civic employees wishing to undertake farm work.

MOTORS AND MOTORING:

A Page Full of Interest to the Owner or Prospective Owner of an Automobile. Happenings in the Motor World.

Construction of Highway Connecting Vancouver and Interior Is Vital Necessity

One of the most pressing matters brought to the attention of the Vancouver business men who toured the upper country recently, was the urgent need existing for the construction of a motor highway to connect interior points with the Coast, says the Vancouver World. This question was vented at nearly every place visited, not by the Vancouver men but by the residents of the various points, and the vital necessity of such a road brought home in convincing manner to every one of the Coast visitors. By facts and figures it was shown that the construction of this road meant the development of not only the interior but also of the Coast cities.

One of the outstanding features of the discussions centering around this question at the various points, says the World, was that without the shadow of a doubt the Interior was united in the belief that connection by motor road between the Coast and the upper country was one of the most urgent problems, irrespective entirely of the question of route and the exact localities through which the road should pass. Of course, all were of the opinion that in the selection of the route every consideration should be given to the territory tapped and the utilization of the road as part of the British Columbia section of the all-Canadian highway.

That the facts laid before the Vancouver men carried with them conviction has been evidenced by the attention given the subject since their return, and the inception of a movement that will take in the Coast cities and the upper country, the object of which will be to impress upon the provincial government the great need that exists for such a highway.

The highways of a country are one of its most important assets, and play a large part in colonization and land settlement. Next to the construction of railways, the construction of good serviceable highways are probably the greatest factor in increasing the value of land, providing adequate marketing facilities, and an important factor in agricultural and urban progress and prosperity.

They mean much to the farmer and much to the merchant, by bringing the two into close touch, and thus affording the one access to markets and the other continental supplies and a wider range in which to sell his wares. But one of the most important phases to not only Vancouver but to the entire upper country, and one, by the way, that has not been lost sight of by the residents of the Interior, is that the road will open up the vast stretch of wonderful scenery and agricultural possibilities in the Interior, to not only the Pacific Coast annually but the thousands that will be attracted here once they learn that the gateway to upper B.C. has been opened.

It has been estimated that the total number of tourists visiting this province this year alone will leave something in the neighborhood of \$20,000,000. This estimate has been made by Publicity Commissioner Davison on actual figures in his possession, and contained in the mass of information he has gleaned are hundreds of letters from all parts of the continent, revealing the fact that had access by auto to the upper country from the Coast been available, that many more would have visited the province.

From the selfish standpoint alone, Vancouver would derive untold benefit from direct motor road connection with the Interior, but in joining with the upper country the men who are behind the movement here have in view only the immense amount of benefit that would be derived by the province as a whole.

TAKE YOUR TIRE TROUBLES TO THE SURGERY

If it is a blowout or bad cut we will build in a new section. If the tread is worn down we will build on a new tread—if the tire is worth it. If it isn't, we'll tell you so.

EVERY MAN IN BUSINESS KNOWS

What HE Has to Sell—But Do Our Readers Know?

GAS FAMINE A DELUSION

Uncle Sam's highly disturbing gasoline famine is purely mental. Supplies, both on hand and accumulating, are increasing, and the motor world can now emerge safely from the cloud of gloom perpetrated by the premature prophets who for several months have been drawing word pictures of a gasless universe, says the Western Canadian Motorist.

In the latest report by the United States Bureau of Mines it is shown that reserve stocks on hand at the refineries totalled over 626,000,000 gallons; that Mexico is almost doubling its shipments of the modern elixir of speed life each year, and that new refining methods are resulting in a 50 per cent. increase in production from oil.

The gasoline panic, a spectre which has swept the country and has caused no little anxiety in automotive circles generally has been purely psychological in the opinion of the Federal Trade Commissioners. The failure in certain of the north Texas fields, the government investigators believe upset some oil operators and made an immediate shortage seem possible.

Midwest refineries, the commission reports, are getting a 35 per cent. gasoline yield from crude oil, although plants elsewhere are registering but 12 to 22 per cent. Installation costs and lack of labor facilities are given as reasons for the delay in general changes in refining processes which eventually will mean a 60 per cent. increase in the American supply.

David White, of the U.S. Geological Survey, further dispels the gloom following an investigation of the shale oil fields.

"Shale oil deposits are a possible source of oil in amounts far greater than all the available natural petroleum in this hemisphere," he declares in his report. "They form an enduring asset, sufficient to sustain an enormous ultimate load for an indefinite period, when sufficient machinery for this industry has been developed."

PROSPERITY

"Yes," said the junk man, who has just gathered in the salient features of three cars that had gone afoul of each other. "I surely have a bumper crop."

CANADA'S MOTOR CAR CENSUS

Many Automobiles in Use in Daily Business Life

In Canada there are approximately 335,000 motor cars, and of these about 150,000 are in Ontario. Allowing an average of \$10 a month for gasoline, oil, tires and repairs—a very modest estimate, which includes the laying up of most cars for four months—there is an operating cost of \$2,500,000 and \$1,500,000 a month respectively. As the average value of the cars is about \$1,000 and depreciation figures at about 20 per cent., the total depreciation is about \$50,000,000 and \$30,000,000. That is, the operating cost and depreciation of the cars in Canada is about \$80,000,000 a year, and of those in Ontario about \$48,000,000 a year. For a population of nine million people in the whole of Canada, and less than two and three-quarters millions in Ontario, this is a heavy outlay. But a large proportion of the automobiles aroused in business, promoting trade and supplementing our railway transportation. They are engaged in earning operations. If the country had to rely entirely on horse vehicles, street cars or steam railway trains, far less business would be transacted per capita. More business per head is done in Canada than in any other country. Thus a large part of the motor car cost is productive of business. Farmers in particular are now buyers of automobiles, finding quick transportation profitable to them. But as the way of economy hits the country, it is likely that some curtailment of expenditure on automobile account will be brought about.—Toronto Mail.

BATTERY REPAIRING

Is it necessary to take a storage battery to an expert for repairs?

This question was recently asked of I. M. Noble, electrical engineer for a large manufacturing concern, who replied:

"Unless a man has made a close detailed study of storage batteries he ought to leave any repairs that may be needed to an expert. He should neither make them himself nor permit a so-called handy man to do them for him."

NO DECISION ON ROUTE FOR ROAD ACROSS PROVINCE

The route which the transprovincial highway will follow has not yet been definitely settled, according to Mr. A. E. Foreman, public works engineer. The Fraser Canyon route, however, is receiving the attention of the public works department.

"The engineer's report was submitted some time ago," says Mr. Foreman, "but is not yet available for the information of the public. Until the important question of railway crossings and possible encroachment on the railway is settled with regard to the Fraser Canyon road, the department will be unable to arrive at any final decision in the matter. In the meantime a survey party is engaged in preparing detailed plans of the crossings, etc., for submission to the Board of Railway Commissioners for their adjudication."

TIRE CODE

Keep tires properly inflated. Be sure to repair little cuts in treads regularly.

Prevent blowouts by avoiding severe jolts.

Have mud boils cleaned out and repaired at once.

Be careful in placing tubes. Avoid sudden starts, quick stops and skidding.

Use tale in casings, but not too much.

Keep out of ruts and car tracks.

Apply chains properly and take them off as soon as the need for them is gone.

Remove grease, oils and acids from your tires at once by using a cloth moistened with gasoline.

Examine clincher rims occasionally for irregularities and rust.

Carry spare tubes in a bag. Keep spare tires covered.

Disabled Car Owners' Rights

That the disabled car, unable to proceed upon its way, is as much a responsibility to drivers of other cars as though its owner was driving it has been ruled in several of the Eastern states. These courts hold that though an owner be compelled to leave a car that has broken down, other motorists must look out for it and are responsible for any damage to other property that adjoins the highway.—Motor Life.

Developing Canada's Wealth Of Natural Resources

MINING, lumbering, farming, stock-raising, fisheries—the fundamental industries on which all of Canada's varied activities of business are built—have received the practical co-operation of Bank of Montreal for more than a century.

IN 1920 our desire is as it was in 1817, to be helpful in every possible way in the development of every kind of Canadian business.

This co-operation extends through and beyond the large business enterprises to the men and the women who make those enterprises possible—to the miners, lumbermen, farmers, stock raisers, fishers, merchants, clerks, workers of every kind, to whom we are rendering an intimate, understanding, personal service through our Branches in every part of the Dominion.

Whatever your banking needs, consult our nearest Branch Manager and thus be in touch with our entire organization, which is working for the upbuilding of Canada.

Direct wire service maintained between Montreal, Toronto, Winnipeg, Vancouver, New York, Chicago and San Francisco

The Winding Trail

THE GUILLESS MR. LANSBURY

It is astonishing how absorbed one may be in other matters when beneficial things are happening which might be hindered by personal recognition. Mr. George Lansbury's denial of any knowledge of the financial arrangements being made by the Soviets of Russia for the benefits of his paper, reminds us of the unconsciousness of the toper who gazed blissfully into space while his companion, with the customary "Say when!" was pouring Dewar's Own into his glass, and vainly awaiting the signal to stop. "Where ignorance is bliss, 'twere folly to be wise." Messrs. Tchitcherin and Litvinoff might fill the glass of the Labor Daily Herald to the extreme limits of their disinterested kindness, but the editor of that publication "knew nothing about the arrangements" which have since been most unkindly revealed by the records of wireless messages. Well, I presume that is a matter which may be left to Mr. Lansbury and his conscience—the important matter to the public is the unquestioned fact that these financial arrangements were being made, and that a presumably independent paper, published in Great Britain, and professing to represent British labor interests, was to be subsidized by money from the Bolshevik government of Russia in return for the propagation of Soviet principles amongst its readers. It is a charming situation, and sheds light on many things. Incidentally, it helps to explain the rosy view of Sovietism in Russia which Mr. Lansbury took upon himself to present to the oppressed workers of his native land on his return from a personally conducted excursion of investigation, and which was passed on to the readers of The Review lately, as a fair and unbiased Labor estimate of conditions in Bolshevik Russia. "You scratch my back, an' I'll scratch your back," wrote Artemus Ward to the local newspaper in Punkville, when heralding the coming of his show. "I like your industrial system immensely," says our Mr. Lansbury to the genial Tchitcherin, "and I should esteem it a great privilege to propagate your doctrines in my own country—if you could do something to relieve the financial straits my paper is in. Even a few Chinese bonds would be acceptable—it is not for me to enquire how you came by them—in fact, I am really ignorant of the whole arrangement, you know!"

Well, there are compensations in most matters, and, as one result of these disclosures, we can congratulate the moderate element in British labor that the revolutionary paper run by the ingenious Mr. Lansbury does not receive enough support to pay its way.

SOMETHING WRONG

With thirty-six thousand laying hens in the vicinity of Hammond alone, it is somewhat of a mystery that the city of Vancouver should not only depend largely on the United States for its egg supply, but should be content to accept No. 2 and lower grades, at which New York turns up its nose, and refuses to accept. Yet this is exactly the conditions which exist, "if we take the statement of Mr. W. A. Brown, Ottawa poultry expert, now touring Canada on his annual trip. Mr. Brown, in fact, goes further than that, stating in so many words that Vancouver consumed more low-grade eggs than any other city in Canada. Since the province of British Columbia is peculiarly adapted for poultry breeding, it is certainly a pronounced anomaly that its biggest city should be reduced to the extremity of meekly receiving the low-grade hen fruit which is not good enough for her neighbors, and we can agree with Mr. Brown when he thinks that the public should be more alert, and insist on B.C. products. When it is remembered that eggs are graded according to size, yet sold by the dozen and not by weight, it is easily realized that Vancouver egg buyers are getting the poor end of the bargain. Specials and No. 1's to New York—No. 2's and lower grades to Vancouver, who is perfectly content! And in the interior of the province, not to speak of Vancouver Island, hens without number! "There's something rotten in the state of Denmark!" —AUTOLYCUS.

CALGARY.—Proof of the development of the Alberta coal industry is provided by official figures recently published showing production during first six months. To the end of June the output was 3,040,000 tons compared with 2,069,000 tons for the corresponding period last year. Figures include bituminous and lignite product. Operators state more coal has been marketed than in any other corresponding period in the history of coal production in Alberta.

Synopsis of Land Act Amendments

Minimum price of first-class land reduced to \$5 an acre; second-class to \$2.50 an acre.

Pre-emption now confined to surveyed lands only.

Records will be granted covering only land suitable for agricultural purposes and which is non-timber land.

Partnership pre-emptions abolished but parties of not more than four may arrange for adjacent pre-emptions with joint residence, but each making necessary improvements on respective claims.

Pre-emptors must occupy claims for five years and make improvements to value of \$10 per acre, including clearing and cultivation of at least 5 acres before receiving Crown Grant.

Where pre-emptor in occupation not less than 3 years, and has made proportionate improvements, he may, because of ill-health, or other cause, be granted intermediate certificate of improvement and transfer his claim.

Records without permanent residence may be issued, provided applicant makes improvements to extent of \$300 per annum and records same each year. Failure to make improvements or record same will operate as forfeiture. Title cannot be obtained in less than 5 years, and improvements of \$10 per acre, including 5 acres cleared and cultivated, and residence of at least 2 years are required.

Pre-emptor holding Crown grant may record another pre-emption, if he requires land in conjunction with his farm, without actual occupation, provided statutory improvements made and residence maintained on Crown granted land.

Unsurveyed areas, not exceeding 20 acres, may be leased as homesteads; title to be obtained after fulfilling residential and improvement conditions.

For grazing and industrial purposes areas exceeding 640 acres may be leased by one person or company. Mill, factory or industrial sites on timber land not exceeding 40 acres may be purchased; conditions include payment of stumpage.

Natural hay meadows inaccessible by existing roads may be purchased conditional upon construction of a road to them. Rebate of one-half of cost of road, not exceeding half of purchase price, is made.

PRE-EMPTORS' FREE GRANTS ACT

The scope of this Act is enlarged to include all persons joining and serving with His Majesty's Forces. The time within which the heirs or devisees of a deceased pre-emptor may apply for title under this Act is extended from one year from the death of such person, as formerly, until one year after the conclusion of the late war. This privilege is also made retroactive.

No fees relating to pre-emptions are due or payable by soldiers on pre-emptions recorded after June 26, 1918. Taxes are remitted for 5 years.

Provision for return of moneys accrued, due and been paid since August 4, 1914, on account of payments, fees or taxes on soldiers' pre-emptions.

Interest on agreements to purchase town or city lots held by members of Allied Forces, or dependents, acquired direct or indirect, remitted from enlistment to March 31, 1920.

LAND

Provision made for issuance of Crown grants to sub-purchasers of Crown Lands, acquiring rights from purchasers who failed to complete purchase, involving forfeiture, on fulfillment of conditions of purchase, interest and taxes. Where sub-purchasers do not claim whole or original parcel, purchase price due and taxes may be distributed proportionately over whole area. Applications must be made by May 1, 1920.

GRAZING

Grazing Act, 1910, for systematic development of livestock industry provides for grazing districts and range administration under Commissioner. Annual grazing permits issued based on numbers ranged; priority for established owners. Stock owners may form associations for range management. Free, or partially free, permits for settlers, campers or travellers, up to ten head.

Rights, Parliament Buildings, Victoria, B.C., within thirty days after the first appearance of this notice in a local newspaper.

E. N. ROWLEY, Applicant, Summerland, B.C.

The date of the first publication of this notice is Sept. 3rd, 1920. 5-0

WATER NOTICE.

Use and Storage.

TAKE NOTICE that Esme Norton Rowley, whose address is Summerland, B.C., will apply for a licence to take and use 100 acre feet and to store 100 acre feet of water out of Trout Creek, which flows southeast-ward and drains into Okanagan Lake about 3 miles south of Summerland, B.C.

The storage-dam will be located at the point of intersection of northwest and southwest survey line of Lot 1103 and Trout Creek. The capacity of the reservoir to be created is about 100 acre feet, and it will flood about 100 acres of land. The water will be diverted from the stream at a point about 900 feet northwest of District Lot 2099, Group 1, Osoyoos Division of Yale District, B.C., and will be used for irrigation purpose upon the said Lot described as Lands 2098 and 1103.

This notice was posted on the ground the 18th day of August, 1920. A copy of this notice and an application pursuant thereto and to the "Water Act, 1914," will be filed in the office of the Water Recorder at Vernon, B.C.

Objections to the application may be filed with the said Water Recorder or with the Comptroller of Water

ORGANIZE NEW POLITICAL PARTY

First Steps To Form Branch of Government Supporters

APPOINT DELEGATES

These To Attend Convention for Selection of Candidate for Ottawa Seat

On Tuesday night, at a meeting of the citizens who favor giving Premier Arthur Meighen's government a chance to show their ability to properly conduct the affairs of the country, four delegates were named to attend a convention of the new party, the National Liberal and Conservative Party, which convention will be held in Penticton on Thursday. The purpose of this convention is the selection of a candidate for membership for Yale. The meeting on Tuesday, which was held in the Parish Hall, left the four delegates, Dr. Andrew, E. R. Simpson, J. A. Kirk and J. L. Logie, free to decide which candidate, if more than one were offering, they would vote for at the convention.

Mr. J. W. Jones, M.L.A., spoke briefly at the meeting, which was presided over by F.A.C. Wright, and at which preliminary steps were taken to organize a local branch of the new party. Mr. Jones referred briefly to the change which the war had brought about, with respect to the old political parties. In the West particularly, where the party lines were never so clearly drawn, it was now more a matter of men and their attitude toward the questions of the day than of former party affiliations. Mr. Jones outlined the formation of the Union government which had given no attention to party politics. Many have felt that it was a great pity that Sir Wilfred Laurier could not take the lead of the Union Government. The attitude of his own province was responsible for this.

FIRST WESTERN PREMIER

The Union Government had accomplished much, more than any party government could have done. How well they had succeeded was shown by our soldiers. Canada in the war had won a name for herself. The speaker touched upon the arduous tasks which lay before the government when peace was declared. There were war casualties in the ranks of the government as in the army. Many upon whom responsibility lay heavily would have been glad to retire from office. It was strenuous war work that weighed Sir Robert Borden down and broke his health, making it necessary that the reins of office be handed over to another. Many shrank from this task with its post-war problems. There was some surprise when the task fell upon the shoulders of a young man of 42 and the first western premier. Sufficient has been given in the press to indicate that Arthur Meighen has shown great ability. It is said that following his first speech, Sir Wilfred Laurier congratulated Premier Borden on that day, having introduced a man to the house. Mr. Jones had special reasons for hoping that the new Premier would measure up to the task.

Among the changes made in the government was one which affected this riding. Our member, Hon. Martin Burrell, had done much as a private member. His handling of the Agricultural Department was strong and in the right direction. He had made a name for himself, the old party and the Union government.

PARTIES UNITE

The government is anxious to fill all vacancies at the earliest date, and Mr. Jones upon being approached was persuaded to take on the duties of organizing Yale district. At first he demurred, but felt there was an obligation, especially as to the question of the tariff, which he believed would be brought to the fore considerably. The speaker told of the organization of the new party, and the reason for selecting the name "National Liberal and Conservative." Years ago when an climax had been reached, Liberals had joined Sir John McDonald and formed the Liberal-Conservative government. Again strong men of different parties have united for the good of the country. Mr. Jones expressed the hope that Premier Meighen would visit Yale during the campaign, when more information with respect to the policy of the government would be learned. The question of the tariff is an important one to Yale, which is larger

(Continued on Page 4)

WAS A PIONEER OF SUMMERLAND

Many Summerland people will learn with regret of the death of W. A. Doyle, which occurred on Wednesday at Brantford, Ont. Mr. Doyle was one of the earlier settlers in Summerland, and removed from here to Long Beach, Calif., about seven years ago. Born in Charlotte-town, P.E.I., nearly 77 years ago, Mr. Doyle fought in the American Civil War. Later he moved west to Manitoba, being among the pioneer settlers of that province. After a residence there of about 30 years he came to Summerland. He leaves two sons, Russell and Murray, both of Manitoba, and three daughters, Mrs. Fosbery, of Summerland; Mrs. King, a citizen of Alberta; and Mrs. Ballachey, of Brantford, Ont., with whom he had been since last spring.

MEETING OF PRESBYTERY

Hears Favorable Report from Summerland Congregation

The semi-annual meeting of the Kamloops Presbytery, of which the Okanagan forms a part, was held a few days ago at Penticton. Ministers and laymen were present from all along the main line of the C.P.R. and from many points of the Interior. The business was largely of a routine nature, dealing with the problems of different congregations and the general mission work of the church. A delegation was present from Summerland consisting of Messrs. Robertson, Munn and Logie. After hearing them the Presbytery expressed gratification that Summerland congregation intended to become self-sustaining and call a new minister in the near future.

The situation regarding the position of ministers incapacitated from service gave rise to a very profitable discussion. The feeling was expressed that steps should be taken to remedy the matter. A committee has been formed.

Permission was given the Nicola congregation to sell the old manse property and the application from the sister congregation of Meritt for a grant of \$1,000 and a loan of \$500 from the church and manse building fund was approved.

Mr. S. E. Beckett of Moose Jaw was recommended for the chair of systematic theology in Westminster Hall and D. M. Solandt, who has had charge of the Patriotic Fund in Manitoba, was recommended for the position of business manager for Presbyterian publications.

Some mission problems took up a good deal of time in their discussion. The report was presented by Rev. Mr. Millar of Penticton. Not for six years have the various missions been so fully manned as now. This is indicated by the fact that the many missions of the Presbytery received \$11,000 assistance last year. The work was reported as being in unusually fine condition. Presbytery approved of the committee's action in releasing Rev. W. W. Peck, L.L.D., from his work, to organize the prohibition campaign. All Mr. Peck's expenses are to be met by the church. His unusual organizing ability will be a distinct gain to the temperance party. The mission contributions of the Presbytery last year were \$5,108 as compared with \$2,800 in 1918. This year the allocation is \$6,500.

Assistance was granted Meritt and Clinton congregations for the erection of new manse. Princeton reported that tenders were being called for the erection of a new church, while the committee had made provisional selection of a site for a church on the new townsite at Penticton.

The Forward Movement committee reported the financial drive as quite successful, Presbytery being asked for \$15,570 and contributing \$21,250. The total for the church was now \$5,200,000. Stress was laid by various speakers upon the necessity of keeping the spiritual objects of the movement to the front.

MAINTENANCE SUM ORDERED BY COURT

The first case of its kind to be heard here was a suit entered in the police court by Mrs. Joe Stewart, for a maintenance fee under a new provincial act. In the opinion of the court it had not been proven that the wife had been deserted by the husband, but they were living apart, and the court ordered Stewart to pay his wife \$12 per week maintenance money. Under this order, the defendant will be no longer responsible for debts contracted by his wife.

GROWING SCHOOL POPULATION

Board in Straits To Provide Class-Room Accommodation NEARLY 100 MORE

The Domestic Science Teacher Resigns—Room To Be Used for Overflow

Perhaps no better proof, short of a census, of the rapid growth of the population of Summerland can be had than in the marked increase in the number of pupils entering public school this year. When all the children are enrolled the increase in school attendance will be little short of 100, as compared with September, 1919. When the children assembled for school on Tuesday morning, the teaching staff and the school board faced a dilemma as the number of little tots entering the receiving class greatly exceeded all expectation and an emergency meeting of the School Board was called for Wednesday night to deal with the problem. There were 44 beginners and 20 of the first primer, too many for the new class-room to accommodate, and in addition there were prospects of six more to come.

When the trustees met on Wednesday night, they were presented with the resignation of Miss Mutchall, who had just arrived to take charge of the Domestic Science Department. Miss Mutchall found the school a much larger one than she anticipated and felt unequal to the responsibility. The Board, believing that they would have some difficulty in filling the position so late in the season, decided to convert the Domestic Science room into a class-room for beginners, and the secretary was instructed to wire for a necessary supply of desks. This will make the eighth grade in the central school, for which an extra teacher has been telegraphed for.

Including the high school, Summerland's school population will be close to 400. In the public school, Principal Macdonald has enrolled 81 in the entrance class, with two or three others to come. In Division 2, Mr. Davidson has 30 pupils. In Division 3, Miss Ball has 36, with two to come. Miss Nicholson in Division 4 has 47, and Miss Dale in Division 5 has 41. Miss Elliott in Division 6 has 40, and Division 7 and 8, yet to be formed, will have a total of about 70. Miss Banks now has this large flock to look after. There are 21 pupils in Division 9, Trout Creek, which is five more than a year ago.

High school opened with an enrollment of 52, with a few others to enter shortly. There will be at least 12 in the matriculation class, and 21 have taken up the first year work. Unfortunately Mr. Toes, assistant to Principal Welsh, was ordered to the Coast a few days ago for an operation, and it is expected that he will be absent the greater part of this month. In the meantime, Mrs. R. C. Robinson has come again to the relief of the Board, and is assisting Mr. Welsh.

Much disappointment was expressed by Principal Welsh in the inability of the pupils to obtain necessary text books. For this he does not blame local dealers, but says it has been the practice of publishers for several years to be behind in their deliveries. This occasions great inconvenience and delay in the school work.

A FAREWELL PRESENTATION

The home of Mr. and Mrs. G. J. Coulter White was the scene of a delightful social gathering last night, when about 60 members of the Baptist congregation "supplied" Mr. and Mrs. Walter M. Wright. Mr. and Mrs. Wright are leaving on Thursday evening of next week for Renfrew, Ont. Mr. Wright's former home, and where his father is extensively engaged in business, taking as active a part as ever, though more than 80 years of age. His son is going East for the purpose of relieving Mr. Wright of some of his responsibilities, but he says that he looks forward to a return to Summerland. A very pleasing program was arranged for last night, including addresses, songs and recitations, the feature of the program being an address and presentation tendered Mr. and Mrs. Wright.

Don't submit to the inevitable until you have positive proof that it is the inevitable

JUDGMENT IN WATER CASE

On Saturday last, Police Magistrate Hutton gave judgment in the Sculthorpe case. The accused was found guilty of permitting irrigation water to escape to his neighbor's lot, and was taxed with costs. As this was the first case of its kind tried here, and it was shown that the Sculthorpe lot was an extremely difficult one to irrigate, the court was disposed to be as lenient as possible. For the present the accused was ordered to double the capacity of the cross-ditch which he had dug to catch surplus water and was required to give an undertaking to alter his method of distributing the water on his lot, also that ditches will not terminate in such a position as to allow the surplus water to reach the Clouston lot below.

CONVENTION TO MEET NEXT WEEK

Looks Like a Three-Cornered Contest for Ottawa Seat

The call has been issued for a convention to be held at Penticton on Thursday, Sept. 16, at 8 o'clock in the evening, at which a candidate will be placed in the field to contest the constituency of Yale as the standard-bearer of the National Liberal and Conservative Party.

Organization work has now nearly been completed throughout the riding, and associations in support of the Meighen Government have been formed in all the principal centres. The convention promises to be a large and representative gathering.

At present the names mentioned as coming before the convention are those of J. A. McKelvie of Vernon and J. M. Robinson of Naramata, though it is possible that others may be entered in the lists for the nomination.

It is stated that the Liberals are not likely to put a candidate in the field. The United Farmers have decided to hold a convention with a view to considering the nomination of a candidate, and this will also be held at Penticton on Monday, Sept. 27.

The Labor Party has already nominated Tom Richardson, a former Labor member for Whitehaven of the British House of Commons, so present indications are that there will be at least three candidates in the field.

WAS STUDENT UNDER LOCAL INSTRUCTOR

The following interesting paragraph is clipped from the Yorkton (Sask.) Enterprise:

Mr. Harvey Smith of Yorkton, a graduate of Yorkton public schools and collegiate institute, has been appointed Manual Training instructor on the collegiate institute staff and has commenced his new duties. Mr. Smith received his training in this work under Rev. Chas. Baker, and was the best qualified of any of the applicants applying for the position, having had considerable experience as a teacher in rural schools. He will later take a special course in Manual Training to better fit himself for the position.

Mr. Baker received a very tempting offer to resume his old position with this school which he held while in Yorkton, but for the time being he will remain in Summerland.

MAKING BRICK AT OK. LANDING

Vernon News: The company which was organized with a view to developing the clay deposits at Okanagan Landing has now commenced active work, and splendid brick have been turned out during the past few days. The clay seems to be working up very satisfactorily, and the test holes on various parts of the property indicate a very large deposit of exceptionally high-grade clay. While the clay near the surface will be used for brick-making, it is expected that the purer clay, which is of excellent quality, may be suitable for higher class work. The clay is now being tested by experienced men, and by spring of next year important developments may be expected.

MONTREAL.—Over 100 steamers left Montreal during the month of July, carrying full cargoes of produce, and merchandise of Canadian manufacture, to the European market. The high prices realized on produce gives farmers plenty of ready cash which circulates freely, and makes collections good.

CONSIGNMENTS BREAK PRICES

Prairie Vegetable Market is Wavering, as Result

FRUIT IN DEMAND

Market Commissioner Tells of Market Conditions—Buyers Looking for Apples

Market Commissioner J. A. Grant gives the following interesting information in his latest markets report filed from Calgary:

Last week-end the market was flooded by an overstock of tomatoes, resulting in many wholesale houses lowering the price to clear early. This week the price was increased, but with too heavy consignments to a wholesale house it was again cut. There is every chance of a rising market on tomatoes.

Cantaloupes are still in the hospital, the public seem tired of them. Some B.C. cants of pink flesh variety and also Rockyfords have come here too hard and flavorless, but future shipments will no doubt be found of good quality and more mature.

Ontario Green Gage plums arrived by car lot express this week and were somewhat under-ripe. They cleaned up well. Another shipment from Ontario is now due and also a car of peaches.

There is a good demand for all fruits, especially apples. Vegetables are hard to sell.

Edmonton spuds reported selling at \$25 per ton digging time; quality and crop reported good.

Butter market remains about the same, no change in prices. Creamery butter, market stronger, price unchanged.

Eggs are advancing in price, dealers quoting \$16.80 and \$17.50 per case.

A. Campbell, fruit inspector, of 111 Albion Bazaar, Glasgow, called at this office en route for the Okanagan Valley. Mr. Campbell has fruit interests there and in addition to looking them over he intends to secure a supply of apples for his extensive trade in Scotland.

Mr. G. H. Taylor, of J. H. Goodwin & Co., Manchester and London, England, is visiting the Okanagan Valley this week. Mr. Taylor met your market commissioner in Chicago and since that time he has gone thoroughly over Eastern and Western orchards, buying largely for British consumption.

O.U.G. CANNERY TO OPEN SOON

Satisfactory progress is now being made with the completion of the extensive new warehouse and plant of the O.U.G. Fruit Products Company at Vernon, says the Vernon News of Sept. 2nd, which was informed by Manager Ferguson that he expects canning operations to begin in ten days' time and the evaporator end of the new enterprise in about three weeks.

The constructional work had been considerably delayed during the past five weeks by the difficulty in getting lumber supplies forward. The builders are now making good the loss of time at a rapid rate, and the roofing stage has now been reached. The canning work of the new plant is already well organized, so that an early start with this highly important addition to the industries of Vernon and the Okanagan is assured. In addition, it is satisfactory to learn from Mr. Ferguson that the machinery and equipment for the evaporator is well in sight or is rolling.

LIFE INSURANCE FOR VETERANS

Favorable Features of Government Policies

The Returned Soldiers' Insurance Act, passed by Parliament last session, came into effect Wednesday, Sept. 1. Applications are now being received and policies issued as rapidly as possible.

Any returned soldier who served in the naval, military or air forces of Canada in the Great War, or who was domiciled or resident in Canada on August 4, 1914, and served in any of His Majesty's naval, military or air forces or in the forces of any of the Allied or associated powers, will obtain life insurance under the act. The applicant must, at the time insurance is issued, be domiciled and resident in Canada.

Widows of returned soldiers who have died after retirement or honorable discharge from the service and before the expiration of 12 months from the coming into force of the act, are also eligible for insurance under the scheme. Policies will be issued for a minimum of \$500 and in multiples of \$500 up to \$5,000.

For Dependents The Act was framed primarily with the object of giving to the returned man whose physical condition, by reason of war service, prevents him from obtaining life insurance at normal rates, an opportunity to protect his dependents. It is open, however, to all returned men, whether of impaired physical condition or otherwise.

The Government insurance policy is different in some respects from policies issued by regular insurance companies as the object of the scheme is protection of the dependents of the insured. Only immediate dependents may be named as beneficiaries and no provision is made for policy loans. The insurance money is not subject to claims of creditors of either the insured or the beneficiaries and cannot be assigned. Only one-fifth of the policy is payable at death in a lump sum, the balance to be appropriated as annuity under various plans to be selected by the insured.

Unusual Benefits

An exceptional advantage of the policy, it is said, is the provision made for a disability benefit, not given elsewhere at such advantageous rates. Under this claim, should the policyholder become totally and permanently disabled, he is at once relieved from paying further premiums and the insurance is paid to him direct, as an annuity of one-twentieth of the amount of his policy for a period not exceeding 20 years. Should he not survive this period, the balance due is paid to his beneficiaries.

Policies may be taken out on several limited payment plans or for whole life, and premiums may be paid monthly, quarterly, half-yearly or annually, according to the convenience of the insured.

Explanatory booklets and application forms have been forwarded to the various returned soldier organizations. The commissioners of the Returned Soldiers' Insurance have their offices in the Transportation Building, Ottawa.

VANCOUVER.—The Canadian Robert Dollar Company announce the purchase of the 11,550 ton freighter "Parisian" at London. The vessel will operate on the Oriental run from this port as the "Father Dollar," and makes the sixth steamer sailing from here to the far East under the Dollar flag.

LATE ESTIMATE OF APPLE CROP

Comparisons With Output of Last Year

FALLING SHORT

Crab Apples Now Rolling in Carload Lots—Pears Bulking Large

The weekly news letter issued from the office of the District Horticulturist contains the following interesting information on condition of crops throughout the district:

Salmon Arm and Main Line. Yellow Transparent and Red Astrachan apples are about all cleaned up. Duchess are coming in slowly, also Transcendent Crabs and early plums.

Wealthies will not be moving for a week or ten days yet, and are sizing up fairly well. Tomatoes, cukes, corn and green beans are going out. Late rains have started second growth on potatoes in some sections, and indications are that crop will not be heavy.

Vernon

The onion harvest has commenced and the crop appears to be of very good quality, although running a trifle small in many instances, and in some cases the onions are not as well ripened as they should be. Growers would be well advised to leave their onions until thoroughly ripened in the field before shipment, as there must of necessity be a considerable tonnage of onions stored in this fall in order that they can be marketed to the best advantage.

The curing of onions in crates stacked in the field is not practised, to the extent that it should be, and growers will need to pay more attention to the thorough curing of their bulbs if they are going to continue in the game, and would do well to make a thorough study of this practice. There is a very heavy movement in cabbage, celery and all truck crops from both Vernon and Armstrong districts, but the market is rather sluggish. Pumpkins and squash are coming in freely.

The following are the percentages of the crop as compared with 1919 for this district: Wealthy, 75; McIntosh, 90; Jonathan, 45; Wagner, 55; Newtown, 65; Rome Beauty, 100; Winesaps, 85; Delicious, 85; Grimes Golden, 90. Other varieties, 60. Crab apples, 75. No. 1 shipments of crab apples will be about 50.

Kelowna

Pears are moving freely and quality is very fine; will equal 1919 tonnage. Plums and prunes will run about 75 per cent. of last year.

APPLES: McIntosh tonnage will run 85, Delicious nearly 100, Jonathans, Wagners and other winter varieties about 55 per cent. of 1919. Early apples of the Duchess and Yellow Transparent class are about over, and Wealthies will move the first of next week. The quality will be good.

Field crops in general are in excellent condition, but tomatoes are ripening very slowly owing to cold, backward weather. Canneries are not yet in full operation.

Summerland, Naramata, Peachland and Westbank

Weather conditions fine, warm during the day and cool nights seem to be giving fine color to the apples, but some varieties such as Jonathans, Newtowns and Winesaps will have to get a move on to get a better size. Crabs are moving out in carload lots now, also tomatoes, both packed and cannery. The cuke crop is still coming along. Cantaloupes commenced to move at the beginning of the week.

In the Summerland district pears are a good average crop, but are not up to size of former years, the hot weather seemingly maturing them before full growth, and no thinning being done. Clapps Favorite are about over.

PEACHES: Yellow St. Johns are about over; Crawfords, Champion, Bello of Georgia, and Carman are moving now. Elbertas promise a good average crop and will size up well.

The following are the apple crop percentages for this district as compared with 1919: Spies, 80; Winesaps, 85; McIntosh, 60; Winter Bananas, 90; Jonathans, 50; Wagner, 85; Newtowns, 70; Delicious, 05; Wealthies, 75; Transcendent Crabs, 60; Hyslop crabs, 70.

PEACHLAND: McIntosh, 50; Jonathans, 50; Wealthy, 80; Wagners, 75; Delicious, 90; Winesaps, (Continued on Page 4)

Peachland Doings.

A Weekly Chronicle Furnished By Our Local Representative.

A number of our young people left last week-end for Victoria to commence their Normal training, having successfully passed in the final examinations. These were: Miss Ilyva Murdin, Miss Alice Cousins, Masters Eddie Morsch, Baird Iverson, Jack Hamilton. Having spent a portion of his holiday with his people here, Joe Morsch left the same day with the Normalites to return to take up his teaching duties for another term.

Having accepted the position of teacher at Agassiz, Miss Whitman left on Friday evening's boat of last week en route via K.V.R. from Pen-ticton.

The Echert concert given in the Orange Hall on Saturday evening last proved to be very pleasing and interesting. The audience were well pleased and satisfied that they had received their money's worth.

Labor Day was celebrated at Pen-ticton on Monday, where a number of our townspeople went, including the baseball nine. Those who went down enjoyed a very pleasant day's outing, the weather being ideal. The baseball boys were in pretty good trim and managed to bag half a hundred for the club fund.

A party comprising Mrs. Burkett Robinson and family, Mrs. H. McDougall, Mr. J. E. Kerr, Mrs. Borsland and son, Hugh, and little Miss Mildred and Royal McDougall enjoyed a picnic outing to Westbank on Saturday last for mid-day lunch. A portion of the party motored up in Mr. Kerr's car and Mr. R. J. McDougall of Penticton came up and took the balance of the party in his car. Mr. McDougall remained over till Sunday paying his friends here a short visit.

Mr. Burkett Robinson has moved his wife and family down from the mill, where they have been living during the summer. They came down in time to get settled before the opening of school in order to let the children get in at the commencement.

It will be interesting to local readers to learn that the culprit who lifted some auto parts recently belonging to various persons in town has been caught by the police at Ver-

non and is being held there. Word has been sent to our local constable, Mr. Martin Hendrickson, to come up and bring some of the owners of the missing parts in order that they may identify them. Besides tools, etc., a battery was taken from a car which was not owned locally but which, we understand, belonged at Fernie, B.C.

The opening of the school has brought back some of our teachers who have been away on their summer vacations. Among them, Mr. McCleod, who arrived by auto stage on Monday last to resume his duties as Principal. Word has been received from Miss Morley, who had intended to be back to take up where she left off, that she is ill and will not be able to get here for a month. Mrs. A. Henderson will substitute for Miss Morley. The vacancy left by the departure of Miss Whitman from the high school room has been filled by Mr. Black, who arrived last week and has taken up quarters at the home of Mrs. and Miss Needham. The vacancy left by Miss L. Morrison is filled by Miss Carter, of Vancouver. Miss Carter expects to have her mother here with her in a short time. Until then Miss Carter is staying with Mrs. L. Mills. When her mother arrives they intend taking a house or rooms for their use during their sojourn here.

Miss A. Elliott has resumed her duties in the Trepannier school for another term.

After a pleasant vacation and visit spent in Peachland with her brother and his wife and family, Miss L. Hyde left on Friday last to continue her trip west, expecting to spend a week in Vancouver before returning to her position in Winnipeg.

Mrs. Ben Gummow is enjoying a visit from her sister, Mrs. P. B. Schurrah, of Victoria, B.C., who arrived on Saturday last intending to spend a week here before continuing her journey to Beaverdell to visit her parents.

Mr. R. A. F. Moore left on Monday morning en route for Vancouver on a business trip. He was uncertain as to how long he would be absent, but possibly some little time.

Mr. Tomlins, of Taber, Alta., spent

a short visit in town, looking over the fruit growing industry and comparing it with dry farming in the section of Alberta in which he is located. He says this country looks good to him, and that in all probabilities he will sell out where he is and be back here this fall. While here he was a guest of Mr. Emmet Brinson and family.

The Women's Institute furnished seed to the school children here this spring, and arranged with them to plant gardens in competition with each other. The children took it up and have shown great interest in the contest. The institute secured the services of Mr. R. J. Hogg and Mr. Grant Lang as judges. These gentlemen inspected the various gardens in the contest, and judging by the following standard awarded the marks: Size of garden, 15 points; regularity, 15 points; cultivation, in three sections, neatness, 10; freedom from weeds, 10, and freedom from pests, 10 points, making a total of 30 points; growth, 25 points, and yield, 15 points, making a grand total of 100 points possible. The gardens were in two classes, both judged by the same standard. The marks as awarded in Class 1 are as follows: Gertrude Hohensee, 87; Paxton Morsch, 85; Jack Moore, 82; Hugh Dorland, 68; Aylmer Cousins, 65; Isabelle Taylor, 65; Ruth Brinson, 65, and Edgar Taylor, 60. In Class 2 the following: Hertha Hohensee, 85; Teddy Smith, 80; James Clements, 72; Teddy Clements, 67; Harold Cousins, 64; Arthur McCall, 63; Molly Cousins, 63; Henry McCall, 61, and Annie Taylor, 60.

THE EFFICACY OF LICKING A WOUND

It has been held that licking and sucking a wound is the speediest possible way to heal it, and there is a great deal of truth in this, as all know. I quote what one doctor says: "Licking a wound is the simplest and oldest of treatments—far older than man, in fact. Every dog licks his wounds, and no one ever saw a dog with an infected wound except on a part of his body that his tongue could not reach—the top of the head, for instance. There are two reasons for this. The first is that the saliva has an antiseptic and healing power which is best proved by the rapidity

GROWING RICH ON SUGAR CROP

Cubans Have So Much Money They Are Ceasing Work

Cuba is growing rich to the degree of rottenness through the world shortage of sugar. So great is the demand for Cuba's chief product that she is practically able to set her own price, and her citizens are waxing so rich that they are indifferent to anything but speculating in sugar, and in their refusal to carry on the business of the country as usual are doing their native island much injury, as it is apparent from the trouble experienced by ships calling at Havana for sugar.

The Ward liner "Mexico," which reached New York Monday, was delayed for 22 days at Havana, at a cost of \$2,000 a day to the line, because the longshoremen at that port were too busy speculating in sugar to load that vessel or any other. The congestion at that port is the worst in its history.

These deplorable conditions are due to the prosperity of the Cubans. The merchants seemingly do not care whether they obtain shipments of goods. Whenever their supply of a commodity runs low they boost its price.

Many ships have lain in Havana harbor for four months while their cargoes rotted. Nothing has been done to relieve conditions and it is believed generally that nothing will be done so long as public interest centres on the sugar industry.

with which a wound in the mouth heals. The second is a little more difficult to understand, but is none the less scientifically correct. It is that the discharge from a wound, whether this be infected or not, if taken into the stomach sets up a production of the so-called anti-bodies which kill the particular bacteria that may be starting trouble in the wound. This is called autotherapy and is well recognized in medicine. The strangest fact about this is that licking one's own wounds is far more efficacious than having them licked by someone else. If one cuts or bruises the hand one cannot do better than to lick and suck the wound at frequent intervals."

Their Glory Shall Not Fade

In the special order issued to the Canadian troops on March 27, 1918, General Sir Arthur Currie wrote: "To those who will fall I say, 'You will not die but step into immortality—your names will be revered forever and ever by your grateful country, and God will take you unto Himself.'"

The pledge thus given is being faithfully fulfilled in relation to employees of the Canadian Pacific Railway Company by the placing of bronze memorial tablets at over a score of its principal offices and stations. Furthermore two imposing bronze statuary groups have been designed for the great C.P.R. Stations at Montreal and Winnipeg to stand forever as tribute to the heroism and self-sacrifice of C.P.R. men who died in the cause of freedom. Far-flung and scattered are their graves, but single was their spirit and their ideal, the service of their country.

Out of 11,802 employees who were reported as joining the Forces, 1,096, or nearly ten per cent paid the supreme sacrifice. These came from every rank of the company, from every department, and they served by air, land and sea—faithful unto death.

The bronze tablet, replicas of which will be placed at the principal railway centres in each province of Canada, and also in London, Liverpool and the Orient, has been designed by Mr. Archibald Pearce, of the Chief Engineer's Department of the company, and is being engraved at Worcester, England, by the Bromsgrove Guild and Applied Arts. The tablet depicts an advancing army of infantry, cavalry, artillery, supplies, munitions, tanks and railway transport flanked on either side by a warship and a C.P.O.S. liner with aeroplanes flying overhead. Britannia's outstretched hands to the Overseas Dominions and points out the road to death and glory while underneath is a scroll with the list of the chief battles in which the C.P.R. men fell. The inscription commemorates:

"Those in the Service of the Canadian Pacific Railway Company who at the call of King and Country, left all that was dear to them, endured hardship, faced danger, and finally passed out of sight of men by the path of duty and self-sacrifice, giving up their own lives that others might live in freedom. 'Let those who come after see to it that their names be not forgotten.'"

The large bronze statuary group which will be duplicated for the C.P.R. Stations at Windsor Street, Montreal and at Winnipeg, is the work of Coeur de Lion MacCarthy, the well known Montreal sculptor. In majestic and impressive allegory, it represents the uplifting of the soul of a hero from the battle lines to "that home from which no traveller returns." The armed figure of a soldier clad in khaki, battle-stained, yet tranquil in death, is borne heavenwards by a winged and laurel-wreathed Angel of Victory. The figures in the group are of heroic proportions, over seven feet high, supported upon a marble pedestal. Thus shall the memory of the gall-

ant dead remain in inspiration to their comrades and to the world at large. By their sacrifice for the Empire, they kept clear and open the

PRICE VS. VALUE

In buying Shoes---and everything else as well--- it's VALUE you want. Imported Shoes cost more because of the freight, duty and exchange. These things don't add to the VALUE of a Shoe. They only increase its COST.

This store has one mission in life. That is to give you the best values. Made-in-Canada Shoes are today better value, grade for grade, than Shoes imported from any country. They reflect the very latest and best styles and shapes. The material is honest. Workmanship is high grade. And so, because the prosperity of this store depends upon service to our customers, we sell and recommend Made-in-Canada Footwear, knowing that we can thereby give you the best value and satisfaction.

SPECIAL DISCOUNTS To Clear

- On Men's Oxfords from 10 to 50 per cent.
- On Women's Oxfords and Slippers from 10 to 50 per cent.
- On Women's Rubber Soled White Canvas Pumps from 10 to 25 per cent.

NOTICE

WATER ACT, 1914

The Proposed Peachland Irrigation District
NOTICE is hereby given that a petition has been filed with the Comptroller of Water Rights for presentation to the Lieutenant-Governor in Council praying for the incorporation of a tract of land comprising Lots 912, 1189, 1184, 1185, 1800, 2584, 2588, Lot 224, except Blocks 11 and 12 of Map 177 and Lot 400, except Blocks 1 to 7 inclusive of Map 44, all in Osoyoos Division of Yale District, into an improvement district under the name of THE PEACHLAND IRRIGATION DISTRICT, pursuant to the provisions of Division 4 of Part VII of the Water Act, 1914. The objects of the said proposed district are the acquisition and operation of works and means for the storage, delivery and carriage of water for irrigation purpose and such incidental purposes as are authorized by the license it acquires. Objections and suggestions submitted in writing to the Comptroller of Water Rights, Victoria, B.C., on or before the 15th day of September, A.D. 1920, will be considered by the undersigned before the said petition is presented to the Lieutenant-Governor in Council. Dated at VICTORIA, B.C., this 8th day of August, 1920.
G. R. NADEN, Deputy Minister of Lands.

The Summerland Review

Established August, 1908

Published at Summerland, B.C., every Friday by THE REVIEW PUBLISHING COMPANY, LIMITED
Ralph E. White, Editor and Manager

An independent family newspaper covering Peachland, Summerland and Naramata and adjacent districts.

Subscription Rates—In British Empire, in advance, \$2.50 per year; six months, \$1.40. To U.S.A. and other countries, \$3.00 per year.

Advertising Rate Cards and information respecting territory and samples of paper mailed upon request, or may be seen at the office of any advertising agency recognized by the Canadian Press Association.

Advertisers must have copy in by Wednesday noon in order to insure changes for standing advertisements. New display advertising copy can be accepted one day later.

Correspondence—Letters addressed to the Editor and intended for publication must be short and legibly written on one side of the paper only. The longer an article, the shorter its chance of insertion. All communications must bear the name of the writer, not necessarily for publication. The publication or rejection of articles is a matter entirely in the discretion of the Editor. No responsibility is assumed by the paper for the opinions expressed by correspondents.

FRIDAY, SEPTEMBER 10, 1920

AWAIT THEM HERE

The fruit growers of the Grand Forks district are considering the formation of a water municipality and the installing of an irrigation system. The Grand Forks Gazette refers to a suggestion that fruit growers of that district make excursion trips to Penticton and Kelowna in order to familiarize themselves with irrigation methods. We would suggest that our neighbors in the Boundary country visit the Dominion Experimental Station here and also carefully inspect the Summerland municipal irrigation system. They can not find a better in the Valley and Summerland has attained some fame from its excellent water system, which has been successfully managed by the people themselves for a dozen years. At the Experimental Station here they will find irrigation practiced under the most approved methods with a wide range of crops. They will also find that Superintendent Helmer and his staff are most ready to give them all the information they have acquired in years of practical experience under conditions very similar to those they will find in their own beautiful valley.

OPPORTUNITIES PASSING

Our people in the Okanagan have been so involved in building up their own homes and little local enterprises—the load upon each has been so pressing and the need so steady—few have felt that they could indulge in the broader view and mellow up to the pleasures which are possible of development on all sides. Few of us have had time to play or could afford the luxury of a summer's outing. And, being thus involved, we have failed to recognize the great possibilities of the future in the matter of pleasure. Our one insistent thought has been to business. Not because we desired it to be so but because it had to be. Not having the necessary capital to plunge, we stepped easy.

It is, perhaps, better that it has been so. But isn't the time ripe for the development of that other side? In a small way we have journeyed some way along the road to playland. We have our little holiday celebrations, which, by the way, would be considered hard work if we were paid for doing it. Not a few will save their earnings for weeks and months and, when celebration day comes, spend it in a few hours. They scarcely may know who they are, how they are, where they are, how they got there, nor why they came, but conclude they must have had a big time if feelings count.

There is a saner pleasure—that out in the open—in the mountains—by rippling waters and placid lakes—camping, fishing, hunting, playing with Nature in Nature's way.

The Okanagan Valley is rich in opportunity in this regard. And, as for its financial side, if we must look to it, the development of this phase of industry by our own people soon would bring a rich harvest from tourists who would be attracted this way by the pleasure opportunities offering.—Okanagan Commoner.

WHAT OUIJA REALLY DOES

The relation between the subconscious mind and the ouija board forms the theme of helpful studies by Dr. Kemp in the New York Outlook and Professor Lorraine in the Popular Science Monthly. So much mischief is done by the ouija to those who take its performances in earnest that a service will be rendered to the public by stating the views of the psychologists in regard to what really happens when the ouija is imagined to be a revealer of truths unknown.

The mind beneath consciousness is stored with very many more facts or experiences than consciousness can be aware of at a given time. When the two users of the ouija unconsciously begin to move the board toward spelling out words related to something that the two are thinking about the mental centres associated with their thought are aroused. The energy awakened finds expression through the muscles. These obey the unconscious as well as the conscious mind and move the board as the mental associations beneath consciousness direct. The subtle connection between what is consciously thought and willed and what is stored in unconsciousness causes the response of the ouija.

Nothing is brought into consciousness except what has been in the unconscious mind. Mental activity aroused in the mind, whether this be aware or unaware of its thoughts, seeks utterance through the muscles. The ouija offers the opportunity for expression by means of the relaxed fingers of the operators. The message declared, letter by letter, and word on word, arrives through the path of association between the past and the present.

CALGARY—Keen demand for Alberta cattle on the United States markets is the report of A. A. Walters, of Walters & Dunbar, Livestock Commission Merchants, of Chicago. This demand is expected to increase in about 30 days when farmers have harvested their corn. "Canadian cattle," Mr. Walters declared, "are prominently suited for finishing purposes. They will withstand the winter better than those from the Southern States and there is no doubt that stock raisers on the other side of the line will be able to absorb at good prices all the feeders and stockers that Alberta can supply."

"They're selling things cheap at the corner store."
"Are, oh?"
"Yes, thirteen 2-cent stamps for a cent and a quarter."
"Exactly."
"Why?"
"Same as the postoffice—twenty-six cents. Ain't that a cent and a quarter. Ain't that a cent and a quarter—of a dollar?"
It is easy to be cheerful when those around you are cheerful—so, from a selfish standpoint, it is worth while to try to make happy those you associate with.

CONSIGNMENTS BREAK PRICES

(Continued from Page 1.)

Potatoes, mixed cars, per ton. 35.00
Potatoes, straight car, per ton 30.00
Onions, Fall, delivery, per ton 35.00
Coast dealers expect B.C. potatoes to go lower. Chinamen have stopped digging, crop less than expected and prices stiffening. Onions and potatoes should not go lower than \$35.00.
Washington—
Apple prices raised slightly.
Pears, Bartlett, fancy 3.00
Pears, Bartlett, choice 2.75
Peaches Elberta (very scarce) 1.60
Plums, 4 bskts. 1.75
Gravensteins, Wealthy, Wolf
River, etc., wrapped 1.90

Avoidable Losses

We notice this year that losses in transit have been greatly reduced proportionately. Fewer have been reported this year than at any other time. The bulk of the B.C. shipments have moved in car lots and overloading has in some cases resulted in loss. Celery is one of the products that will not stand close loading, air space between the crates being essential to prevent heating. We have noticed some very careless loading of celery and heating in transit has resulted. This can be prevented by more "horse sense" at shipping point.

The "speed bug" in making up crates from the "knock down" in the packing houses has been responsible for considerable losses this year. Crates made on the "skew angle" will not stand up well in the car. We have seen many crates that suggested to us that they were made by an old woman with a flatiron for a hammer. It is a crime to destroy carefully grown and packed fruit by carelessness in making up crates. The nailers are the chief sinners. We have seen well-packed plums bruised and damaged in placing the lid without a cleat inside to raise the lid free from the top of the fruit. We think we are safe in saying that most of the grief this year has been traceable to carelessness in the packing house. The plums that arrive from the U.S. are better filled as a rule; no bruising mars their appearance. Cheap packing is not necessarily good packing. We need more care in B.C.

Consignor Has Rights

Consignment by small growers in an unorganized district may at times be a necessity. Consignment by individual growers in a well-organized district is a menace to the organized growers. We can give abundant evidence to prove that the minority volume is the price setting factor for the majority volume.

B.C. fruit is sometimes sold at prices out of proportion to competitive market values due to price control of consignments being in the hands of the consignee. Coming down to "brass tacks," this office is maintained in part for the purpose of looking after the interests of the absent B.C. shipper; we have correspondents who can serve in this capacity if drafted to do so, and who represent to us critical situations as they arise. We have been recognized by consignment dealers as having a right to examine sales, report conditions of arrival and by carrying companies in watching the handling of transfers. We have on rare occasions been consulted as to market conditions and the price for which consigned No. 1 goods should sell for, consistent with market, or what competitive similar stuff is procurable at. Consignees consult the retail trade, but rarely, if ever, the consignees' representative.

We have watched this market for four seasons and in every season the consignee has been responsible for lowering prices below ruling values. We have occasionally protested and while we usually are resented in this capacity, we have lessened the disturbance. We draw attention to those who must consign, that they should insist on being represented before sales are made of first-grade goods at less than current prices. This would protect the cash buyer at shipping point as well as the consignee, and would place the consignee in a stronger position with his clients.

Correct

Willis, Sr. — "My son, I am afraid you do not know the real value of money."
Willis, Jr. — "Sure I do. It's just about half what it was a few years ago."

GONE BUT NOT FORGOTTEN

Are caterpillars good to eat?" asked little Tommy at the dinner table.
"No," said his father; "what makes you ask a question like that while we are eating?"
"You had one on your lettuce, but it's gone now," replied Tommy.

IMPOUNDED

One bay gelding, work-horse. A blurred brand on right shoulder, skin thickened on each knee. If not previously claimed, will be sold Saturday, September 18, 1920, at 2 p.m., at the Municipal Pound, West Summerland.
JOHN DALE,
Poundkeeper.
Dated at West Summerland, September 7, 1920. 6-7

ORGANIZE NEW POLITICAL PARTY

(Continued from Page 1.)

in area than all of Great Britain. Here our chief industry is fruit growing. Last year British Columbia shipped two and one-quarter million boxes of apples. Eighty or 90 per cent. of these went from the Okanagan Valley. We have enjoyed a protection duty of 30c per box, equal to \$675,000 on our shipments. This year the United States has a surplus of four million boxes of apples, for which a market must be found, and the Americans would be very glad to break in on our market. They can place apples earlier than we. Our capital investment of \$35,000,000 in the fruit industry must be protected.

TARIFF AT LOWEST

Today Canada has the lowest tariff in 40 years. In 1896 it averaged 20 per cent. Under the proposed reciprocity plan, it was to be 17 1/2 per cent. Today the average duty paid is 14.2 per cent. Under the old policy 35 per cent. was paid on agricultural implements. Today this duty is 12 1/2 per cent. The duties are being kept down as low as possible. Mr. Jones then told of the effect the removal of the duty on apples would have on the fruit growing industry of Summerland.

The Dominion government has appointed a tariff commission, which will soon visit the Okanagan Valley. A local committee is preparing to lay information before the commission.

In selecting a representative at Ottawa we should send one who is in touch with the fruit industry and will support the Meighen government, which has laid down its policy. If an opposition man were sent, the government would conclude that we were not interested in their policy of protection for the fruit industry.

The tenor of Premier Meighen's speeches has appealed to the people, and they will give him a chance to make good. His sympathizers here should organize.

J. A. Kirk expressed the indebtedness of the meeting to Mr. Jones and presented a resolution in favor of organizing a new party. He referred to the old bitterness of party warfare. Before confederation, opposing parties had gotten together for the common good, resulting in the birth of the Dominion of Canada. We owe the existence of our country to the getting together of hostile parties for the common good. When the war broke out, opposing factions for the second time were called upon to work together. We cannot go back to pre-war days. The new government promises well for the country. The speaker pointed out the value of local organization.

TO ORGANIZE

Following an amendment to his motion, which was seconded by S. M. Young, temporary officers were elected; these being F.A.C. Wright, chairman; W.C.W. Fosbery, secretary, with Messrs. Simpson, Davidson and Kirk, the nucleus of an organization committee who were instructed to draw up a constitution.

Telling of his early acquaintance with the Premier, Mr. J. L. Logie described him as quite unassuming, quiet, but one who will fight for his principles. Mr. Logie was ready to give the new government a fair chance. He approved of local organization, but time should be taken to accomplish this in order to give everyone an opportunity to identify themselves with the new National Liberal and Conservative party.

Mr. Jones explained that there still remained a Liberal party under Mackenzie King, but that many of the old Liberals have joined the new party.

Correct

Willis, Sr. — "My son, I am afraid you do not know the real value of money."
Willis, Jr. — "Sure I do. It's just about half what it was a few years ago."

LATE ESTIMATE OF APPLE CROP

(Continued from Page 1.)

65; Grimes Golden, 55. Pears and peaches same as Summerland. NARAMATA: Winesaps, 90; Rome Beauty, 55; Jonathans, 35; Wagners, 45; Winter Banana, 60; Delicious, 65; McIntosh, 50; pears, 125 per cent. of last year. WESTBANK: McIntosh, 40; Jonathans, 50; Rome Beauty, 50. Peaches are very small; pears 120 per cent. of last year.

Kerecoco

Weather particularly fine and tomatoes ripening fast, picking being very heavy each day. Canneries are operating at full blast. Apple crop sizing very nicely due to the splendid moisture conditions, and Jonathans which were reported light are going to be heavier than anticipated. Delicious and other varieties holding up well, and quality promises to be excellent with heavier yields of all varieties than last year. McIntoshes show beautiful color, and some growers are expecting to start picking operations on this variety in about 10 days. Jeffries, Gravensteins and Wealthies rolling at present.

Penticton

Bradshaw, Burbank and Greengage plums rolling in considerable quantities. Some nectarines are being shipped in small quantities.

Plums and prunes will average about 85 per cent. of last year.

Crawfords and Yellow St. John peaches rolling, the former being of good average quality and showing only a moderate percentage of wormy fruit. Crawford peaches will run about 100 per cent. of last year. Elberta peaches are filling well and the crop promises to be very heavy and of fine quality, and will run about 110 per cent. of last year.

Pears are being picked and shipped in increasing quantities and tonnage will run 10 per cent. heavier than last year.

Winesaps, Winter Bananas and Rome Beauty apples average about 80 per cent.; Delicious, McIntosh Red and other winter varieties from 50 to 60 per cent. of last year.

Considerate Mule

A negro was trying to saddle a fractious mule, when a bystander asked, "Does that mule ever kick you, Sam?"
"No, suh, but he sometimes kicks where I se jes' been."

Coming Events

Notices under this heading are inserted at 3 cents a word. Each repeat, 2 cents a word; minimum charge, 50 cents. Contract rates on application.

St. Andrews Presbyterian church: Rev. David Lister will conduct the morning service at 10:30. Young People's Society, 7:30 p.m.

Good program, Rialto Theatre next Thursday, and each Thursday thereafter. See ad, for Thursday and Saturday features.

Sale of home cooking on Saturday, September 18, in the old barber shop on Shaughnessy avenue, Summerland. Also in the Better 'Ole, West Summerland. Proceeds for the Prohibition campaign.

VANCOUVER.—Work in erecting the Government seaplane base here is proceeding rapidly. Hangars have been erected and two seaplanes have arrived, while two more will reach here from England at the end of this month. Along with eight others shortly, they will be used for fire, forest and fishery patrols, as well as survey work.

LAKESIDE CHURCH

Summerland Sunday School, 11 a.m. Adults invited to Bible Class. Service, 7:30 p.m. Pastor will preach. Subject: "God's Love for Backsliding Israel." Prayer Meeting, Wednesday, 8 p.m. Visitors and Strangers Welcome. REV. H. E. LIVINGSTONE, Pastor.

SUMMERLAND BAPTIST CHURCH

Pastor, Rev. I. Page Phone 563 Sunday, Sept 12— 10:30 a.m.: Subject, "Faith." 7:30 p.m.: Subject, "The Needs of the Day." Y.P.S. Monday, 8 p.m. Prayer meeting, Wed. 8 p.m. Strangers cordially invited.

HOUSEHOLD HINTS

Pickled apples are quite as good a relish with meat as pickle peaches.

While sugar is scarce serve the salad as a last course in place of dessert.

One may roast meat and bake a sponge cake at the same temperature.

Four rice boiled potatoes go further than six plain boiled ones. Sprinkle with salt and pepper, slip in the oven to brown lightly.

Rinse cut glass in blueing water. Rinse a sauce pan in cold water before heating milk in it.

Beefsteak pie may have a crust of small baking powder biscuits.

To get rid of ants sprinkle a little ground cinnamon where they are most common.

Let sugar cookies cool in a covered earthen jar lined with a clean cloth.

Coffee will be better if one or two cups are poured off and back again just before serving.

To prevent splashing when frying meat, sprinkle a little salt in the pan before putting in fat.

Cheese pared thinly, smeared with butter and wrapped in a cloth will keep soft in a cool place.

Dried peaches, raisins, walnut meats, sugar and lemon and orange juice make a delicious conserve.

Calves' and lambs' hearts boiled and combined with onion make a good and inexpensive lunch dish.

To soften an old brush in which the paint has been allowed to dry, heat some vinegar to the boiling point and allow the brush to simmer in it for a few minutes. Remove and wash well in strong soapsuds and the brush will be like new.

WOULDN'T DO IT

Dugan—So you called me a prevaricator? Cassidy—Ye're a liar. Oi did not.—Boston Transcript.

"The Bible says there will be no marriages in heaven," said Willie. "I wonder if that is true!" "Of course it is," replied his little sister Hazel. "How can the women marry when there are no men in the place?"

Passing Events: Social, Personal, &c.

Mrs. Van Allen arrived from the East last Saturday, to spend a short time in Summerland.

Mrs. A. B. Williams has returned from New Westminster, where she has been spending some weeks with her daughter, Mrs. Ernest Lock.

Mr. and Mrs. D. J. Welsh are moving from the college hill to the Gartrell cottage, close to the Methodist parsonage, and near the high school.

Intending to remain in the Old Country through the winter, P. G. Koop left on Thursday for England. Mrs. Koop will go to England later in the fall.

Beginning with Thursday of next week, two programmes a week will be given in the Rialto. Next Thursday's feature is given in the regular space of the Rialto Theatre.

R. Shaw, recently accountant with the Bank of Montreal here, and who was transferred from the local office to Kimberly, is now with the same institution at Cloverdale, on the Lower Mainland.

Mr. Simes, Dominion Fruit Inspector here during the summer, has been transferred to the Boundary country with headquarters at Grand Forks. This change was made when C. Noel Higgin was sent here to his home town.

The dance held in Empire Hall on the evening of Monday, Labor Day, by the Summerland Band, was well attended and a success in every way. The proceeds from this event have given the band enough funds to pay off all liabilities. From the next entertainment staged by the band the management hopes to realize enough to buy some much-needed music stands. The boys are yet without uniforms, but between now and next spring they hope to accumulate enough to pay for a smart uniform for every member of the band.

"Papa, was Moses the first man to have the stomach ache?" "Why do you ask, Tommy?" "Because the Sunday School teacher said the Lord gave him two tablets."

To arrive: 1 car Briquettes and 1 car Galt Nut Coal. Book your orders now. Capt. P. S. Roe.

At a special service in the Lakeside church last Sunday afternoon, nine young people, three boys and six girls, were baptized.

Rev. David Lister, now pastor of the Mt. Tolmie Presbyterian church, Victoria, and Mrs. Lister, are spending their vacation at their orchard home in Prairie Valley.

A benefit dance given last Friday evening in Empire Hall was largely attended. The proceeds, amounting to somewhere around \$200.00, will be used for the benefit of a citizen who has been unfortunate.

Miss Jean Glover, who has been visiting her sister, Mrs. Lambie, will leave on Monday to return to London. Miss Glover was serving as a nurse all through the war, and will take up her profession on the staff of the St. Thomas Hospital, London.

The Odd Fellows of the Okanagan, with their families, assembled at Kelowna on Monday, Labor Day, where a large picnic was greatly enjoyed. Six or eight members of the Summerland Lodge, with their families attended. It was decided to make this picnic an annual event, to be held some time earlier in the season.

Mr. and Mrs. E. Kercher have returned to Summerland from a visit to their old home in Ontario. Mr. Kercher is negotiating for the purchase of Mr. H. Lambie's house and furniture. The exchange will probably be made within the next day or two. Mr. and Mrs. Lambie will go to Vancouver, and their son, after a short stay at the Coast, intends to go to the Prairies.

BIRTH

DODWELL—On Tuesday, September 7th, to Mr. and Mrs. Phillip G. Dodwell, a son.

SOULE—On Tuesday, September 7th, at the Summerland Hospital, to Mr. and Mrs. A. C. Soule, a son.

HADDRELL—On Thursday, Sept. 9th, to Mr. and Mrs. C. W. Haddrell, a son.

OTTAWA.—The pulp and paper exports from Canada increased from \$8,639,000 in 1911 to over \$110,000,000 in 1920, raising the pulp and paper industry to the status of Canada's leading manufacturing industry. This industry ranks second in the amount of its capital investment and third in the value of its annual exports.

Orchard For Sale

Fifteen acres bearing orchard, known as "Parker Orchard." Heavy producer and money-maker. Six-room house, stable, tool house and garage. Ten acres bearing orchard adjoining above. Both in the heart of the district, with domestic water and electric light available. These will be sold separately or together, with or without packing house, horses and equipment. Good terms and attractive prices to responsible parties. Possession given after present crop is harvested.

Corporation of the District of Peachland

BY-LAW NO. 84 A By-Law of the Corporation of the District of Peachland for raising the sum of Two Thousand Five Hundred Dollars (\$2,500) for the purchase of a Municipal Hall.

WHEREAS it is deemed expedient in the interest of the Corporation of the District of Peachland to make provision for the purchase of a Municipal Hall;

AND WHEREAS it is necessary for such purpose to raise by way of loan upon the credit of the said Corporation of the District of Peachland, payable on the first day of October, One Thousand Nine Hundred and Forty (1940), the said sum of Two Thousand Five Hundred Dollars, bearing interest in the meantime, payable half-yearly, at the rate of six (6) per cent. per annum, the principal of such loan when raised to be applied for the purpose aforesaid;

AND WHEREAS for the payment of the said principal it is necessary to raise the sum of Eighty-three Dollars and Ninety-five cents (\$83.95) by rate in each and every year on the said Debentures.

AND WHEREAS for the payment of the said interest it is necessary to raise the sum of One Hundred and Fifty Dollars (\$150.00) on the said Debentures.

AND WHEREAS the said sum of Two Thousand Five Hundred Dollars is the amount of the debt which this By-law is intended to create; AND WHEREAS the whole rateable land and improvements within the said Municipality according to the last revised Assessment Roll is Five Hundred and Eighteen Thousand, Seven Hundred and Ninety-five Dollars (\$518,795);

AND WHEREAS the total amount of existing Debenture Debt of the said Municipality (except for works of local improvement and for school purposes) is Twenty-seven Thousand, Three Hundred Dollars (\$27,300), of which none of the principal or interest is in arrears;

NOW, THEREFORE, the Reeve and Council of the Corporation of the District of Peachland, in open meeting assembled, enact as follows:

1. It shall be lawful for the Reeve of the said Corporation of the District of Peachland to raise by way of loan from any person or persons, body or bodies corporate, who may be willing to advance the same on the credit of the said Corporation of the District of Peachland, by way of the Debentures hereinafter mentioned, a sum of money not exceeding in the whole Two Thousand Five Hundred Dollars, and to cause all such sums so raised and received to be paid into the hands of the Treasurer of the said Corporation for the purpose and with the object hereinbefore recited.

2. It shall be lawful for the said Reeve to cause any number of Debentures to be made for the sum of not less than Five Hundred Dollars (\$500) each, bearing interest at the rate of six (6) per cent. per annum, not exceeding in the whole the sum of Two Thousand Five Hundred Dollars (\$2,500), and all of such Debentures shall be sealed with the Seal of the Corporation of the District of Peachland, signed by the Reeve and countersigned by the Treasurer of the said Corporation.

3. The said Debentures shall bear date of the First day of October, One Thousand Nine Hundred and Twenty, and shall be made payable in Twenty (20) years from such date at any agency of the Royal Bank of Canada, in Canada.

4. The said Debentures shall have coupons attached for the payment of interest at the rate of six (6) per cent. per annum on the amount of the said Debentures, and such interest shall be payable half-yearly on the First days of April and October in each and every year, and such coupons shall be payable at any agency of the Royal Bank of Canada, in Canada. The signatures to such coupons may be either written, stamped, printed or lithographed.

5. A rate on the dollar shall be levied and shall be raised annually in addition to all other rates on all the rateable land or land and improvements within the Municipality sufficient to pay interest on the debt hereby created, during the currency of the said Debentures, and to provide for the payment of the said debt when due.

6. The sum of One Hundred and Fifty Dollars shall be levied and shall be raised annually by a rate on all the rateable land or land and improvements within the said Municipality in addition to all other rates, during the currency of the said Debentures, for the payment of the interest on the said Debentures.

7. The sum of Eighty-three Dollars and Ninety-five Cents (\$83.95) shall be levied and shall be raised annually by a rate on all the rateable land or land and improvements within the said Municipality in addition to all other rates, during the currency of the said Debentures, for the payment of the interest on the said Debentures.

8. This By-law shall, before the final passage thereof, receive the assent of the Electors of the said Municipality in the manner provided for by the "Municipal Act" and amending acts.

9. This By-law may be cited for all purposes as the "Peachland Municipal Hall Purchase Loan By-law, 1920."

Read a first time by the Municipal Council, this 20th day of July, A.D. 1920.

Read a second time by the Municipal Council this 20th day of July, A.D. 1920, pursuant to Section 22 of By-law No. One.

Read a third time by the Municipal Council this 11th day of August, A.D. 1920, pursuant to Section 22 of By-law No. One.

Received the assent of the Electors of the Corporation of the District of Peachland, this day of, A.D. 1920.

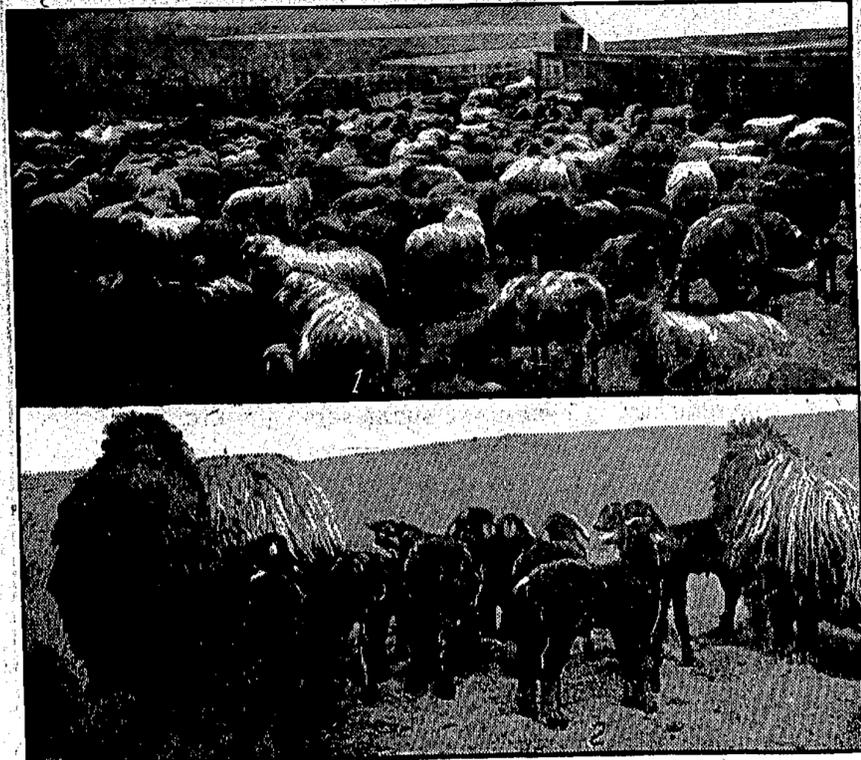

RECONSIDERED AND FINALLY PASSED by the Municipal Council this day of, A.D. 1920.

Take Notice that the above is a true copy of the proposed By-law upon which the vote of the Municipality will be taken in the Peachland Council Chambers, on Saturday, September 25th, 1920, between the hours of 9 a.m. and 7 p.m.

PUBLIC NOTICE is hereby given that the vote of the electors of the Corporation of the District of Peachland will be taken on the above-mentioned By-law at the time and place above mentioned.

WM. M. DRYDEN, Municipal Clerk.

Canadian Persian Lamb

(1) A Karakul flock gathered for inspection. (2) Karakul sheep and lambs.

The aggressive and enterprising spirit of the Canadian farmer coupled with the diversity of climates to be found throughout the Dominion result in a continual branching out into new lines of agricultural activity. A recent introduction which has apparently taken vigorous hold and will probably assume important proportions, developing into a commercial industry of magnitude, is the breeding of Karakul sheep, the animal whose young produce the fur variously known as Persian lamb, Astrakhan, and Karakul. This breed is but little known on the American continent although interesting experiments have been made with this breed at Pomona, New Brunswick, and in Prince Edward Island. The home of the Karakul sheep is on the vast sandy deserts of Bokara, which are largely inundated in the spring by the river Zerafshane swollen to overflowing by the accumulation of winter's snow in the Altai Mountains. Many deep-rooted bushes grow in this region, the tender shoots of which form the favorite

food of the sheep in the summer, whilst their berries supply winter forage. For the supply of pure, the lambs are killed within three days from birth when the wool is curly, a property it maintains afterwards in the most humid atmosphere. If the animal is permitted to live, the growth gradually becomes straight, losing every vestige of flexure at maturity. In the year 1912 the Karakul sheep was first introduced into the United States direct from Bokara, and in the following year small herds were established in Alberta and British Columbia. Here they have thrived and propagated successfully and give every indication of making the industry in the west permanently profitable. Recently, P. M. Dawley, an Inspector of the United States Bureau of Husbandry for New York, who has been running a herd of 48 animals north of Calgary, Alberta, located in the Kamloops district of British Columbia, on which he proposes establishing a similar ranch. He believes the district to be particularly adapted to the raising of Karakul sheep on account of its elevation, climate and winter conditions closely approximating the animals' native Bokara in Turkistan. Previous to the war attempts were made to acclimatize Karakul sheep in Belgium and Northern Germany, with some success. The climate of certain sections of Canada, however, provides more ideal conditions, and indications are that the foundation now laid in the Dominion for a new line in the livestock industry, which should prove a very profitable one to Canadian farmers.

Before the war almost the entire Karakul fur crop from Bokara known as Persian lamb or Astrakhan, was treated and dyed at Leipzig, where two houses alone received 750,000 skins valued at about \$2,700,000 (at pre-war prices). A full-blooded Karakul sheep is worth about \$2,000; three-fourths blooded, \$800; half-blooded, \$150 to \$200. Skins at the present time range from \$20 to \$25 each.

Naramata News

Current Events of Town and District

Mr. W. R. Bartlett visited his Peachland fruit lot on Monday and incidentally called on a few old time friends.

Mrs. H. P. Salting, who has been visiting in the East for the past few months, returned home last week. Mrs. Salting stopped over to see friends in Dakota, and other points along the line were also visited.

Ambitious hunters have been scouring the district and the surrounding country for deer but with no success as yet. Most of the game pursuers came home with a few grouse, but all say that there is a great scarcity of even these. There will be more excursions soon, however, and better luck is anticipated.

Miss Cathie Hancock and her brother, Percy, who have been in Hedley on a visit, are expected home this week.

Miss Bruce Cash is back from the Summerland Hospital, where she has been receiving medical attention and is doing nicely.

Mrs. E. Leeson and daughter, Ura, who have been the guests of Mrs. J. M. Robinson for some time, returned last week to their home in Vancouver.

Mr. Forbes of Edmonton, who is interested in a fruit lot here, came in last week to look over his property.

Mr. Stanley Dicken and family have returned from Pentiction and expect to remain here. Mr. Dicken has taken up his duties with the Naramata Supply Co. store. They will reside at present at the home of Mr. T. I. Williams.

A very pleasant dancing party was held at the Syndica house on Thursday night and a most enjoyable time was the experience of all who attended. Mrs. Jones intends making these parties a feature of the hotel policy and will hold them regularly for the entertainment of her guests and patrons. The music was furnished by Mr. and Mrs. Manchester.

Our old friend, Noel Higgin, paid us a call on Monday and his friends were all glad to see him after so long an absence.

Mr. Daniel Good and wife, of Pennsylvania, Mr. F. Servier, Mr. Phillip Shaw, of Kelowna, Mr. E. H. Crossley, of Summerland, and Mr. and Mrs. Morrish and daughter, of Vancouver, were all guests at the Syndica House this week.

Mr. Harris, the new principal of the school has arrived and is staying at the Syndica. School started on Tuesday.

The school grounds are taking on a most attractive appearance and will be a great improvement to the town. There is still a great deal to be done, but we can see what it will look like when completed.

Mr. Whitaker, the engineer in charge of the survey party who are working on the new highway project, was in town Tuesday and said that the worst half of the survey was finished and they would be moving this week to McClure's, the other side of Squally Point and work towards Kelowna. Mr. Whitaker stated that the work was going on nicely and that an excellent grade was being laid out. The great importance of this road to this district can readily be seen and we are all hoping that the actual work of construction will be started this winter.

Many pleasant functions have been given this week in honor of Mrs. A. L. Gillespie and her friend, Mrs. Secreter, of Battle Creek, Mich. Mrs. E. Wells tendered them a theatre party at Pentiction. Informal teas were given at the homes of Mrs. J. M. Robinson, Mrs. R. C. Robinson and

ANNOUNCEMENT

The Office of

Dr. C. J. COULTAS

DENTIST

is temporarily located at the HOTEL SUMMERLAND awaiting completion of the Johnston Bldg., West Summerland, where he will be permanently established.

Mrs. M. D. Manchester, and other plans for their entertainment are being made.

The regular meeting of the Unity Club was held on Friday and a reception was given by the members to Mrs. Gillespie, who organized the club about 12 years ago. Mrs. Gillespie was elected as honorary president of the club for life. Vocal solos were very nicely rendered by Miss Leeson and Miss Price and a reading given by Mrs. Howard Rounds was greatly enjoyed. Mrs. Gillespie then addressed the ladies on importance of the club and its work in the district. The canvassers for subscription to the Cemetery Fund were appointed and plans formulated for the carrying out of this branch of the work. It will be up to the citizens to subscribe something to this fund and if everyone gives a little the work can go on and improvements that will be started at once can be completed in short order.

A meeting of the National Liberal and Conservative Party was held in the Hall Monday evening for the purpose of electing a delegate to the convention which will be held in Pentiction on the 16th of this month. Mr. J. W. Jones, M.L.A., was present and talked to the meeting concerning the policy of the party and the bearing which a proper organization will have on our political operations which are just a little in the future. Mr. J. M. Robinson, who is to be a candidate in the running, was elected as delegate to the convention. Mr. Robinson's remarks showed that he was alive to the situation and urged the meeting to take active interest in the politics of today for their own good. There were a number of old time friends of Mr. Robinson present from the ranks of both Liberals and Conservatives, and their interest in the meeting was no doubt due to their friendly feeling for Mr. Robinson and his connection with the present political movement. The meeting for permanent organization was postponed for two weeks. There were a great many ladies who attended the meeting and showed a keen interest in all that took place and also a desire to take their station in the affairs that before had been handled almost entirely by the male population, and while the situation is going to be hard to dope out, there is one thing we may be sure of and that is that the women are in the game to stay and they will never hesitate to do their share toward working out the problems of their country.

A MODERN INDUSTRY

A motorist while touring got stalled in a tenacious mudhole. While making a vain attempt to escape, a boy appeared with a team of horses. "Haul you out, mister?" "How much do you want?" "Three dollars." After a long and fruitless argument the motorist was pulled to dry land. After handing over the money the motorist said: "Do you haul many cars out in a day?" "I have pulled out 12 today." "Do you work nights, too?" "Yes, at night I haul water for the mudhole."

Those who live the most are not the ones who live the fastest.

MAY ENTER MAIL ORDER BUSINESS

So Much Money Going East Coast Merchants May Act

Vancouver merchants are being urged to develop the mail order business throughout the province. Too much business is being lost by this province to eastern mail order houses and the advantages to be derived by Vancouver merchants who would enter into this line of business were laid before the retail men at a recent meeting in Vancouver. The arguments advanced in support of the proposition, the evident purpose of which was to keep the trade at home seems equally applicable to the business of local merchants throughout the province. One speaker emphasized the appeal that ordering by mail had for those living on the farm and in isolated places, picturing the romance that lay for such clients in sending away for merchandise. It was the old case of "far-off hills

Household Furniture

We are now opening up and putting on sale one of the largest shipments of Furniture to reach this part of the Okanagan in a long time. It is all well made, the product of reliable manufacturers and every piece has been priced. Below are given a few of the newest lines now being shown:

- NURSE ROCKERS \$3.75
- ARM ROCKERS \$6.00 to \$7.75
- ARM CHAIRS 5.50
- OAK CHAIRS, with art leather cushions 27.50
- OAK ROCKERS, with art leather cushions 29.00
- OAK MORRIS CHAIRS, with art leather cushions. Something really comfortable and tasty in design and finish 27.50
- KITCHEN STOOLS 2.50
- OFFICE CHAIRS, swivel 13.00
- BRASS BEDS, 4 ft. 6 in., with 2-in. continuous posts 50.00
- BRASS BEDS, 4 ft. 6 in., with 2-in. posts 35.00
- STEEL and IRON BEDS 11.50 to 25.00
- BED SPRINGS 7.00 to 15.00
- MATTRESSES 11.50 to 22.00
- DINING EXTENSION TABLES, fumed maple, 6 pieces 35.00
- DINING CHAIRS, fumed maple, set of 6 55.00
- BUFFET, fumed maple 55.00
- Another large shipment of GRASS CHAIRS AND ROCKERS in several popular styles 13.00 to 15.00

Many other lines of Furniture not mentioned above are in stock here. If you are thinking of Furniture, come in and see our stock.

The Summerland Supply Co., Ltd.

looking green," he said, and he added that Vancouver merchants should take opportunity in this field for extending their business.

Another urged the necessity for going after up country business, and pointed out that there were 2,149 places in British Columbia of which only 826 could be covered by post-offices. The rapid growth of population in the province was shown in the fact that in the past year 107 new communities had been placed on the map in the province. Calgary and Edmonton business houses were now invading B.C. territory, pushing as far west as Chilliwack, and it was argued that it was necessary for B.C. merchants to bestir themselves if they were to maintain supremacy in their own province.

In German automobile factories, junior engineers, with full academic and practical training, are paid as little as \$17.50 a month. Clerical workers receive still less.

MOTORS AND MOTORING:

A Page Full of Interest to the Owner or Prospective Owner of an Automobile. Happenings in the Motor World.

NEW HEADLIGHT LAW

Well Known Lighting Expert Will Submit Data to Government

"Every motor vehicle other than a motor-cycle shall be equipped with two headlights, one mounted in a conspicuous position on each side of the front of the motor vehicle, and every motor-cycle shall be equipped with one headlight mounted in a conspicuous position on the front thereof. During the period from one-half hour after sunset to one-half hour before sunrise such headlights shall be kept lighted whenever the motor-vehicle is in motion on any highway. Every headlight, equipped with a reflector shall be so constructed, equipped, or mounted that no portion of the beam of light therefrom when projected 75 feet or more ahead of the headlight rises above a plane 42 inches higher than and parallel with the plane on which the motor-vehicle stands."

A request for some changes in the above light regulations is to be put up to Attorney-General Farris by Inspector Hood and others, with a view of making the regulations against the glare nuisance more effective.

Mr. P. D. Chamberlain of Seattle, who is attending a conference of lighting experts to be held in San Francisco, has been invited by local motorists to lay some data before the Attorney-General in connection with the headlight nuisance.

The intention of the new Act is good, but the effect is not always what was intended, unless the candle power of the light in the lamp is taken into consideration this precaution does not prevent glare.

Under some circumstances, though the main beam of light is thrown on the ground, the glare still persists. Makers of cars, Mr. Chamberlain says, install a light of a candle power to suit the sort of lens they supply with the car. The owner may install another type of lens, or what more frequently happens he breaks a lamp of 16 or 17 candle power and thinks to improve matters by putting in one of twice that power. The result in either case may be an annoying and dangerous glare, no matter though the light is deflected.

It is recommended that the system in vogue in Washington, Oregon and California be resorted to, where a

THAT NEW MOTOR CAR

"When your new car is delivered," says a writer in the current issue of American Motorist, "remember that all working parts are new, fitted very tightly, and should be handled slowly until the car is run several hundred miles. It is advisable to drive slowly and carefully for the first 500 miles, giving such parts as motor bearings, pistons and various other parts fitted tightly a chance to wear in somewhat."

See that your car has been gone over thoroughly for oil and grease, particularly the motor, transmission, rear axle and all grease cups.

The radiator should be flushed out and filled with clean water, as sediments of solder or other foreign matter sometimes remain in new radiators and many work into water pump or other working parts, causing damage.

Have the storage battery examined to note that same is properly charged and full enough of distilled water. Often new cars remain in storage before delivery is made, which would cause battery to run low from standing. If battery is used in this weakened condition, it often happens the entire battery is ruined.

In certain cars a loosening of the engine bolts, those which hold the motor in place, may cause a misalignment of the engine, with serious trouble as a result. Even though the looseness be but slight it may allow the motor support to hammer and thump. In time this may result in an actual breakage of the supporting arm.

maximum candle power of lamp is fixed by law for use with each certain lens, according to the results shown by tests.

In these States the manufacturer is obliged to send a pair of lenses to the authorities with a cheque for \$5 to cover the cost of the test. The test is carried out by proper experts under scientific conditions. There is no guess-work. The result is better both for the man behind the headlights and the man in front of them. All an officer has to do if he gets complaint of a car is to stop it and check up the candle power of the light with the make of the lens. Motorist, Vancouver.

MANY SQUEAKS IN LIGHT CARS

Nearly every car which costs less than \$2,000 has a squeak, groan or rattle, which offends the ears of driver, passenger and pedestrian as well. It may be a tiny squeak where two unlubricated surfaces rub together from vibration, or the rattle of loose brake linkage, or some other loose part, but it goes to make up the chorus of every busy highway. In higher priced cars money has been spent to eliminate the causes of most noise, though occasionally one of the luxury cars will develop a squeak of prodigious proportions.

Not all noises of cheaper cars can be eradicated. But although there may be some such noises which are indigenous, the great majority can be prevented and overcome by intelligent action. Riding in a taxicab a few days ago, an annoying squeak jarred the nerves. I found that the vibration of the car and loose hinges made the door shake. The catch rubbed against the stop and the squeak was the result. A drop or two of oil will end such a noise for a time.

This same vibration might cause body and dash to rub and squeak if not bolted tight, or if no felt strip be interposed to prevent noise. Nearly all light cars vibrate excessively, partly because the frame is so light that it is not perfectly rigid, as are the frames of the heavier cars, and it bends and gives with the unevenness of the highway and jolting over car tracks and other bumps. Where such is the case it is almost impossible to prevent all sorts of noises.

If the body is not bolted tight to the frame it will rattle. It used to be considered good form to put in a felt strip to overcome this; a strip of cotton tape is used in most cases today. But be sure to keep the nuts on the fastening bolts tight, with lock washers to keep them from slipping.

Squeaky Brakes

Worn brake linings may cause the heads of the rivets holding the linings to the hand to strike the drum. This brings the squeak when you apply the brakes. To correct this, remove the bands and sink the rivet heads below the linings, or, if the linings are too thin, renew them.

MUNICIPAL ADVERTISING

Municipal publicity well and wisely done is an important force which in Canada has already proved itself in many cases of the makers of prosperity. It is not only necessary to make a town known to the outside world; those responsible for the good administration of the town, those who possess municipal authority, should make it their first duty to make the town known to its people. It seems ludicrous to think of teaching citizens the value of their own surroundings, but when once you try to question a man in the street about his own town, you will generally find that he knows much less about it all than the ordinary stranger who steps out of the train with a guide book in his hand.

Municipal publicity stimulates civic consciousness, and this means general interest, which promotes civic pride and results in civic improvements. Try and persuade the citizens of Hopedown that the meadows adjoining the city boundary can be turned into a beautiful park of which they will be proud, and funds will be forthcoming to buy the site, the women will organize church bazaars and concerts and everyone will help to promote the scheme. Tell these same people that the fire station is defective and they are in danger of death if a bad outbreak was to take place, and they will at once proceed to ameliorate matters. Nothing is as bad as stagnation. This same mu-

nicipal publicity will help people to know who's who in their own town, from which of their neighbors they can get what they need, in fact may be used to secure very definite and positive results of an increased home market for a town's products, teach the people that the secret of success for a growing town is for everybody to buy at home until the commercial possibilities of the place have outgrown its population, and it can supply the markets of the world. As for the value of making a city known to the outside world, this hardly needs demonstration.—Exchange.

In western Samoa, motor vehicles were a curiosity seven years ago. Today there are 49 passenger cars, 19 motor trucks and six motor cycles.

A California magistrate struck a new note recently when he jailed a motor car for speeding and allowed the speeder to go free. There are great possibilities in this line of reasoning. For a five-day period, at least, that motor car was out of harm's way and the owner, presumably not having a second car, would also be safe for a like period of time. On the second offense the magistrate might fine the car one tire, and if it still persisted in "fitting it up" a second tire might be pinched and so on until finally His Honor would have a complete car at his disposal. These suggestions are not patented. Any Canadian police magistrate may adopt them without fear of infringement.—Saturday Night.

NOTICE

WATER ACT, 1914

The Proposed Naramata Irrigation District

NOTICE IS HEREBY GIVEN that a petition has been filed with the Comptroller of Water Rights for presentation to the Lieutenant-Governor in Council praying for the incorporation of a tract of land comprising District Lots 150, 206, 207, 209, 210, 211 and 208 and Blocks 205, 221, 222, 223, 245 and 247 of Registered Map 691 and a part of Lot 236 (containing approximately 15 acres) lying immediately north of said Blocks 245 and 247, all in the Osoyoos Division of Yale District into an improvement district under the name of THE NARAMATA IRRIGATION DISTRICT pursuant to the provisions of Division 4 of Part VII of the Water Act, 1914. The objects of the said proposed district are the acquisition and operation of works and licenses for the storage, delivery and carriage of water for irrigation purposes and waterworks purpose and for the storage, diversion and use of water for generating power and for the distribution, delivery and sale of electric energy and such incidental purposes as are authorized by the licensees it acquires. Objections and suggestions submitted in writing to the Comptroller of Water Rights, Victoria, B.C., on or before the 20th day of September, A.D. 1920, will be considered by the undersigned before the said petition is presented to the Lieutenant-Governor in Council.

Dated at VICTORIA, B.C., this 3rd day of September, 1920.
G. H. NADEN,
Deputy Minister of Lands.

.. The Winding Trail ..

TROUBLE MAKERS

In the issue of The Review for September 3rd, there is an extract from a recent speech by Premier Meighen, in which he speaks of "the two great divisions of our people—those who learn from experience, and believe in industry and ordered liberty"—and that other division "who have given way to prejudices, to class consciousness, and to passion for change and experiment." On the same date "Fitzmaurice" has in the Vancouver "Province" one of his characteristic cartoons depicting the round world resenting a reproach from "the people" concerning its present-day conditions of wars and strikes. "MY wars!! MY strikes!!!" exclaims the injured planet.—"I give you all you want to eat and drink, and YOU make all the trouble!" The Premier's speech and the cartoonist's picture both follow the same line of thought, and are worth a little consideration. If we could imagine some colossal intelligence, able to read the thoughts of mankind while observing their actions, what limits could be put on the amazement felt by such an observer at the unbelievable folly displayed in the conduct of human affairs? Nation against nation—nations divided against themselves—religions split up into myriad sects, each tenacious of its own particular tweedledum or tweedledee—capital and labor squandering their substance and their energies in senseless warfare—and fighting and turmoil almost universal. Our imaginary onlooker would be quite unable to reconcile what he saw with any principles of reason, and would probably fall back on a theory of an ineradicable instinct for quarreling, and a natural love of fighting for fighting's sake.

Some such theory seems unavoidable when we consider some doings of the present day. For instance, what manner of rhyme or reason can be found in the "cheerful exercise of tearing down" now being attempted by Mr. Robert Smillie and his colleagues by a threatened strike to paralyze British trade, and overthrow the existing order of things? It is not to be found in the demand for more pay, since the miners are already overpaid in proportion to many other sections of wage-earners and have more money than they know how to spend—it is not to be found in the demand for cheaper coal, since coal is already being sold to the home public at cost, and the only profit made is on the export trade. It is simply and solely to be found in the restlessness and "passion for change" which seeks to overthrow the established government of the country and substitute something we have not tried, but which is seen to be failing elsewhere. In a word, it is an attempt at revolution, which differs from some others in that it has absolutely no grievance to excuse it. The strike will fail, even if it ever begins, but the desire for tearing down is there, nevertheless.

What of Ireland? The "wrongs of Erin" have flooded the press with enough false and sickly sentiment to disgust people who are able to view the situation free from prejudice. The plain man sees in Ireland a country whose people are prosperous in direct ratio to their connection with the rest of Great Britain, and which is suffering no wrong whatever which is not also shared by England, Scotland and Wales. It is, in fact, receiving better treatment than the rest of the Kingdom in some respects, which are common knowledge, and has been a pampered sister any time these forty years or more. Yet today it is a hotbed of civil war,—murder and outrage on every hand—simply because a section of its people claim to want separation from the rule which ensures them safety, prosperity and justice! And a demand is made for the abrogation of the law in the case of a prisoner who deliberately elects to starve to death, notwithstanding the fact that this man's use of the code which he stole was responsible for the murder of many police while exercising their duty to the community. To crown the inconsistency of it all, the priest in attendance, instead of forbidding his penitent to persist in suicide, as he should have done, aids and abets the act by the administration of the sacraments of his church!

"I see on the one side those who hold steady, who walk in the middle of the road, and who learn from experience." Good words these, and worth remembering.

—AUTOLYCUS.

Water Notice

Use and Storage.

TAKE NOTICE that Esme Norton Rowley, whose address is Summerland, B.C., will apply for a license to take and use 100 acre foot and to store 100 acre feet of water out of Trout Creek, which flows southeast-ward and drains into Okanagan Lake about 3 miles south of Summerland, B.C.

The storage-dam will be located at the point of intersection of northwest and southwest survey line of Lot 1193 and Trout Creek. The capacity of the reservoir to be created is about 100 acre feet, and it will flood about 100 acres of land. The water will be diverted from the stream at a point about 900 feet northwest of District Lot 2093, Group 1, Osoyoos Division of Yale District, B.C., and will be used for irrigation purpose upon the said Lot described as Lands 2099 and 1193.

This notice was posted on the ground the 18th day of August, 1920. A copy of this notice and an application pursuant thereto and to the Water Act, 1914, will be filed in the office of the Water Recorder at Vernon, B.C.

Objections to the application may be filed with the said Water Recorder or with the Comptroller of Water Rights, Parliament Buildings, Victoria, B.C., within thirty days after the first appearance of this notice in a local newspaper.

E. N. ROWLEY, Applicant,
Summerland, B.C.

He who betrays another's secret because he has quarrelled with him, was never worthy of the sacred name of friend. A breach of kindness on one side will not justify a breach of trust on the other.—Emerson.

Synopsis of Land Act Amendments

Minimum price of first-class land reduced to \$5 an acre; second-class to \$2.50 an acre.

Pre-emption now confined to surveyed lands only.

Records will be granted covering only land suitable for agricultural purposes and which is non-timber land.

Partnership pre-emptions abolished but parties of not more than four may arrange for adjacent pre-emptions with joint residence, but each making necessary improvements on respective claims.

Pre-emptors must occupy claims for five years and make improvements to value of \$10 per acre, including clearing and cultivation of at least 5 acres before receiving Crown Grant.

Where pre-emptor in occupation not less than 3 years, and has made proportionate improvements, he may, because of ill-health, or other cause, be granted intermediate certificate of improvement and transfer his claim.

Records, without permanent residence may be issued, provided applicant makes improvements to extent of \$300 per annum and records same each year. Failure to make improvements or record same will operate as forfeiture. Title cannot be obtained in less than 5 years, and improvements of \$10 per acre, including 5 acres cleared and cultivated, and residence of at least 2 years are required.

Pre-emptor holding Crown grant may record another pre-emption, if he requires land in conjunction with his farm, without actual occupation, provided statutory improvements made and residence maintained on Crown granted land.

Unsurveyed areas, not exceeding 20 acres, may be leased as homesteads; title to be obtained after fulfilling residential and improvement conditions.

For grazing and industrial purposes areas exceeding 640 acres may be leased by one person or company. Mill, factory or industrial sites on timber land not exceeding 40 acres may be purchased; conditions include payment of stumpage.

Natural hay meadows inaccessible by existing roads may be purchased conditional upon construction of a road to them. Rebate of one-half of cost of road, not exceeding half of purchase price, is made.

PRE-EMPTORS' FREE GRANTS ACT

The scope of this Act is enlarged to include all persons joining and serving with His Majesty's Forces. The time within which the heirs or devisees of a deceased pre-emptor may apply for title under this Act is extended from for one year from the death of such person, as formerly, until one year after the conclusion of the late war. This privilege is also made retroactive.

No fees relating to pre-emptions are due or payable by soldiers on pre-emptions recorded after June 20, 1918. Taxes are remitted for 5 years.

Provision for return of monies accrued, due and paid since August 4, 1914, on account of payments, fees or taxes on soldiers' pre-emptions.

Interest on agreements to purchase town or city lots held by members of Allied Forces, or dependents, not required direct or indirect, remitted from enactment to March 31, 1920.

SUB-PURCHASERS OF CROWN LANDS

Provision made for issuance of Crown grants to sub-purchasers of Crown Lands, acquiring rights from purchasers who failed to complete purchase, involving forfeiture, on fulfillment of conditions of purchase, interest and taxes. Where sub-purchasers do not claim whole or original parcel, purchase price due and taxes may be distributed proportionately over whole area. Applications must be made by May 1, 1920.

GRAZING

Grazing Act, 1919, for systematic development of livestock industry provides for grazing districts and range administration under Commissioner. Annual grazing permits issued based on numbers ranged; priority for established owners. Stock owners may form associations for range management. Free, or partially free, permits for settlers, campers or travellers, up to ton load.

WORK ON NEW HOSPITAL WILL COMMENCE NEXT WEEK

Architect's Plans as Amended Receive Approval of Hospital Board of Directors

MRS. VAN ALLEN ADDS TO DONATION

Will Meet Full Cost of Splendid Self-Contained Wing To Be Completely Equipped

The contract for the erection of Summerland's new hospital has been let and work is to commence next Monday.

Some alterations have been made in the plans to meet the condition under which Mrs. Van Allen is meeting the cost of a splendid wing, to be erected to the west side of the site of the old hospital, and which will be known as the Marsden Van Allen Memorial wing. This wing will be a complete unit, having a splendidly equipped operating room and a dispensary in addition to four private wards and will be connected with the main building through a sun parlor, and Mrs. Van Allen, whose original offer of \$10,000 was found insufficient to meet the cost of the wing as planned, has undertaken not only to pay for the cost of the building but also to completely furnish it. Including the Marsden Van Allen memorial wing, the contract price for the hospital is \$40,000 and the contract was awarded to H. W. Harvey at a special meeting of the directors held on Wednesday evening.

We have not yet seen the plans, as altered, but hope to have a complete description of the building for our issue of next week.

COUNCIL ADOPTS LIGHTING REPORT

Referred to Committee for Recommendations

DOUBLE POWER

New Section of Pipe Line Is Required—Other Business

A capital investment of approximately \$20,000 will be required to put Summerland's electric lighting system into condition to provide for the lighting requirements of the community. A full report has been received from Yull & Knight, electrical engineers, and on Tuesday this report was referred to the electric light committee, with instructions to bring in a summary showing the probable cost of the power unit selected, together with the cost of renewing the lower portion of the pipe line.

By replacing the present worn-out pipe of 6 and 8-inch diameter with a 10-inch pipe, approximately 2,000 feet in all, much of the large frictional loss will be overcome. A 90-horsepower wheel, being the smallest of the several power units described in the engineers' report, was favored by the council as one which would not use more water than is required by the present plant, and which would give double the power of the equipment now being used. The electric lighting committee was instructed to make some provision for extensions to the present distributing lines.

During the discussion on the report, Reeve Campbell expressed the opinion that the plans outlined by the engineers was well within the means of the municipality, and would give the required power. Councillor Johnston, chairman of the electric light committee, declared that it was a case of either putting in a new generating outfit or very soon be entirely without electric lights. Another statement by the Reeve was that Summerland should have a plant that would provide light for the whole community, and he believed that the people would approve of the investment if they were given a chance.

The electric light committee was instructed to have its recommendation ready for the next meeting of the council.

A report with recommendations of work to be done on water systems and roads was submitted by Foreman Tomlin. This was referred to the water committee, with instructions to outline certain work to be undertaken by the foreman immediately. Other work will be approved after the report has been considered by the committee. Mr. Tomlin was authorized to have the road grader knives

MUNICIPAL BY-LAW TO REGULATE TRAFFIC

Street traffic in Summerland is to be regulated by a municipal by-law. At a sitting of the police commission on Tuesday it was decided, after hearing a report by Constable Arkell, to request the council to provide a by-law to regulate street traffic and the parking of cars on the principal thoroughfares.

Recently local police authorities have been attempting to regulate traffic, especially as to the parking of cars and the crossing of streets to the wrong side, but have been handicapped by the lack of a local by-law. So far the police have done nothing more than give warnings and make requests. After the by-law is enacted, and its requirements made known, the offenders will be prosecuted.

WILL BUILD BOX FACTORY HERE

Summerland Lumber Co., Ltd., Preparing for Erection of Up-to-date Plant

ON RAILWAY SPUR

Site Secured and Plans for Rail Connection Gets Approval of the Council

Within a short time Summerland will have a box factory equipped with modern machinery, located in Peach Valley, north of the railroad station. Some months ago a site for such a plant was bought by the Summerland Lumber Co., Ltd., which company is now operating a saw mill and box factory at Mineola.

At a recent meeting of the municipal council, J. W. Wheeler, the manager of the Lumber Co., and T. H. Riley, secretary, presented plans for a railroad spur from the K.V.R. station across the road to Block 7, D.L. 439, the site of the proposed factory.

The plans received the approval of the council, subject to submission of a formal written application, accompanied by complete plans. The plans for the railroad spur must receive the approval of the commission before the extension to the factory site can be made, but no difficulty is anticipated in this respect.

The erection of a factory near the railroad will mean another addition to Summerland's industries, and the building of the factory will be sure to result in the erection of a number of dwellings in the immediate vicinity. We understand that it is Mr. Wheeler's intention to build a house on the upper end of the property, not far from the factory. With an up-to-date plant located on the proposed site, the company will be in a position to greatly increase its output of box shooks. It will also be in a position to draw material from different sources, instead of being limited to the output of its one mill at Mineola.

FRONTIER DAYS AT OSOYOOS

Many Americans Attend Labor Day Celebration

POLICE BUSY

Many Drunk, Much Fighting Sales Are Stopped

Labor Day at Osoyoos was such an one as a movie artist would have liked to attend to get a bit of real "Wild West" to work into a screen plot.

Of the doings there the Ponticton Herald says:

The Osoyoos celebration on Labor Day drew a big crowd. Whether it was a real success or not depends largely upon the point of view.

"It was not my kind of a celebration," remarked ex-Councillor Burpee, in referring to it the next day. The show, according to the bills, was put on by Messrs. J. S. Heales and J. A. Brown.

Provincial policeman in attendance at the scene state that there were nearly 600 American cars and over 15 B.C. cars on the grounds. Two beer stalls were going full swing all morning and J. A. Brown's establishment was also a success for the thrifty. At 3 o'clock in the afternoon, when he arrived from Ponticton, Provincial Constable King closed

HUGE SLIDE WRECKS BARN

H. C. Mellor's Barn Destroyed by Avalanche of Earth

STOCK ESCAPED

Though on Provincial Road, Municipality Had To Clear Road for Traffic

Considerable property damage was done early Thursday morning, when a large slide came down from the face of the dirt opposite H. C. Mellor's house and wrecked his hay barn and stables and completely demolished a tool house. On Monday a small slide at the same place had interrupted the traffic on the lake shore road for a time, but the road had been cleared by the municipality.

The second slide was of much greater proportions and came down with such force as to move the Mellor stable for a distance of 20 to 30 feet, swinging it around quite out of line with the foundation. In this was one horse, which suffered no injury whatever. On the south end of the stable Mr. Mellor had a tool house in which was a large supply of carpenter's, builders and numerous other tools. This was completely buried and probably some of the tools will never be recovered.

To the north of the stable was a hay barn, on the ground floor of which there were stalls for a team of horses and other stock. This building was struck with such force that it was badly wrecked, and is perhaps beyond repair. When the building to the south of it was pushed away, the floor of the hay loft at one end was left free and it settled down over the horses, one of them being found next morning in a space of about 4 or 5 feet. The slide extended well into the Mellor yard and was, in places, perhaps 8 or 10 feet deep on the highway. It was on that section of the lake shore drive, within the municipal bounds, which the provincial authorities had agreed to keep in repair, but when the first slide occurred on Monday Road Foreman McAlpine refused to clear the road, claiming that the slide was caused by irrigation water, and therefore it was the duty of the municipality to clear the road.

When Mr. Mellor discovered his wrecked barns and the precarious position of his horses, he telephoned Municipal Foreman Tomlin, who gathered up a crew of men and went to his assistance. Later in the day, municipal employees were put to work opening up a passageway through the slide.

Brown's place for the day and also put the kibosh on the beer stalls, which were selling without any license whatever.

Chief Constable Fraser and Provincial Constable Stewart of Midway were also present, watching the stampede, which was held some little distance from the drinking centre.

A good many Ponticton men were in attendance to give the day a boost along. D. S. Riordan was on hand with a genial smile. He operated a stand where the bystander spun a wheel for a big doll. These stalls are common on the Vancouver and Westminster fair midways.

It was quite evident, even from casual observation, that the drinkables comprised more than beer. In fact, unopened bottles of rye whiskey were found in numbers on the grounds, and men must be pretty drunk those dry days to overlook sealed bottles of Gooderham & Worts wet goods.

"I saw about 200 drunks there," said one provincial policeman.

According to general report the stampede and other celebration events were a frost. In fact, the whole success of the day lay in the excitement and conviviality induced by the spliffs and near-spliffs.

Fights were plentiful. An Indian named Jack was badly beaten up by two American Irishmen named Hannigan and McCloskey, and but for the arrival of the police, it is said that he would undoubtedly have been all in. Hannigan and McCloskey were fined \$20 and costs each by Government Agent J. R. Brown on Tuesday at Fairview.

Louis Martin, an American Indian, got into a rumput and in arresting him Constable King sustained a broken finger. Constable Stewart was hit over the head with a bottle. Martin was fined \$20 and costs or one month by Government Agent Brown.

Oh, it was a wild day for Osoyoos, Ponticton.

MAY DISPENSE WITH PUMPING AT POINT

It is more than probable that the Trout Creek pumping plant will be dispensed with after this season. The pumping of water onto the land there has been an expensive undertaking and not wholly satisfactory to the owners of land under the system.

The discontinuing of the pumping service has been a subject of discussion at different times at council meetings and recently Councillor Johnston was delegated to interview the users of water under the pumping system. At a meeting of the council held a few days ago he reported having seen the several water users, and stated that all except C. P. Evans and R. H. English were willing to make arrangements for irrigation water from some other source than the municipal water system. These two wished more time in which to consider the matter.

LOCAL STORES TO CLOSE EARLY

Summerland Retailers Decide To Restrict the Hours for Doing Business

ASK FOR BY-LAW

Necessary Majority Having Been Secured, Council Must Comply With Petition

The retail stores of Summerland are to be regulated as to their hours of business by a municipal by-law. Such a by-law will be prepared at once and brought into force within the next few weeks. This action on the part of the council is being taken at the request of the local retailers themselves.

In addition to establishing a weekly half-holiday the provincial act provides for early closing regulations, the enactment of which is optional with the municipality, or with the retailers.

In any municipality the council may pass such a by-law, or if 75 per cent. or more of the retailers of a community petition the council for such a regulating order, the council has no option in the matter, but must proceed to provide such an enactment.

At a regular meeting of the municipal council on Tuesday, Messrs. Freeman and Walden presented a petition asking for a by-law compelling retail stores to close at 6 o'clock on every evening except Thursday, when the stores close at noon, and on Saturdays and on the three days before Christmas. After some discussion with the delegates from the retailers, the matter was referred to the clerk with instructions to have the by-law prepared.

The council was informed that the Provincial Act establishing the weekly half-holiday is not being adhered to by all stores.

COUNCIL HOLDS EXTRA SESSION

Fix Grade Line for Granville Road Walk

ENTER COMPLAINTS

Water Users on Front Benches Ask for Better Service

Summerland municipal council has been holding frequent meetings of late. In addition to the regular meeting held on Tuesday last, a special meeting was called on Thursday of last week and after the transaction of some routine business was adjourned until Saturday. On Thursday approval was given to the plan for a railroad spur in Peachland valley, and Councillor Johnston's report on the Trout Creek pumping plant was received, both of which are reported more fully elsewhere. An arrangement whereby A. C. Mull, recent purchaser of the Treffy lot on Paradise flat, will be given domestic water connection was approved. Mr. Mull will advance the cost of making

a sort of remainder of frontier times in the States a couple of decades ago when everything was loose and the sky the limit.

The United States being pretty dry, the wet goods, of course, came from Ponticton.

MAC KELVIE IS UNANIMOUS CHOICE OF PARTY CONVENTION

Heard in Brief Address on Political Topics Following His Appointment as Candidate for Ottawa

YALE DISTRICT IS ORGANIZED

Summerland Man Is Representative for South Okanagan on Executive of New Political Organization

J. A. MacKelvie, of Vernon, is the candidate of the National Liberal and Conservative party of Yale. Mr. MacKelvie was the unanimous choice of the convention held last night in Ponticton. There were 65 of a possible 72 accredited delegates at the convention, Grand Forks five failing to appear. Following the proposal of Mr. MacKelvie, J. M. Robinson moved that he be made the unanimous choice of the convention.

Mr. MacKelvie's address in acceptance of the nomination left a good impression. A former volunteer soldier, a life-long worker and a close student of politics and economics, national and provincial, Mr. MacKelvie is in a position to view the questions of the day from many angles. He touched briefly upon the aims of the Socialist-Labor element and brought out some alleged mistakes in their policy. He stated he would oppose any revolutionary scheme. Mr. MacKelvie also touched upon the movement of the farmers to enter politics, one of his remarks being that it would be suicide for the farmer of British Columbia to follow the policy of the prairie farmer. He did not think it advisable or necessary for the ex-service men to put a man in the field. Mr. MacKelvie's activities on behalf of the soldiers is well known and he expressed himself as being in sympathy with returned

men. He was opposed to any bonus, but favored increased pensions, where such were necessary. Mr. MacKelvie dealt at some length with the question of tariff and declared that under existing conditions, national and international, a tariff for revenue was necessary. He pointed out that Canada has a much lower tariff than most countries.

Government supporters organized for Yale at last night's convention. J. E. Burne, of Kelowna, being elected president; W. E. Haskins, Ponticton, secretary; T. H. Bothe, Ponticton, treasurer. Mrs. Daly, of Keremeos, was elected vice-president, and from each of the five provincial ridings in Yale one representative was elected to the executive, Dr. F. W. Andrew, Summerland, being the representative of South Okanagan.

At a meeting of the executive, plans were inaugurated for the coming campaign, when Premier Meighen will probably speak, probably at three points in the district, and Colonel Cy Peck and Mr. Stacey, of Cloverdale, will be heard.

YOUTH HAD STOLEN CAR

This Is Belief of Police in the Logic Case

CLAIMED EXPENSES

Ponticton Regrets His Being Hailed to Court

Writing of the charge laid against J. L. Logie in the Ponticton police court of driving his car at night without lights, and the article in The Review on the same subject, the Ponticton Herald says an explanation from Ponticton might not be out of place. Police Chief Doidge, Constable Hill and a third person all identified the number on a car driven through Ponticton streets without lights. The third person also identified the driver as a Summerland youth.

The number as read by the three was Mr. Logie's and he was accordingly summoned. He stated in court that the number of the car ordinarily driven by the Summerland boy in question was very much similar to that on Mr. Logie's car, hence he was sure there had been a mistake. Mr. Logie admitted that his garage was not locked and said it was possible that Summerland joy-riders might have had the machine out, although he did not think it probable. In order to save Mr. Logie further inconvenience, Chief Doidge withdrew the charge, although he said he was certain that the car bore the Logie number. Then Mr. Logie asked for witness costs for his expenses in having to appear in court. This was refused.

The net result of the matter was that while Mr. Logie did not establish any fact whatever, the Ponticton police withdrew a charge against him rather than cause him inconvenience, when in any case he could not have been to blame in the matter, but was merely the victim of joy-riders.

Summerland motorists are by no means "the target for the Ponticton police." The local police very seldom know the owners of cars until they look up the numbers they have taken. The fact of the situation is that probably the provincial act and the local by-law are more strictly observed here.

Mr. Logie wrote to the council on Thursday night complaining of the treatment accorded him and suggested that the municipality reimburse him for the trouble he was put to, as well as pay his expenses and those of the two witnesses he brought with him.

The council, after hearing the evidence of Chief Doidge, instructed the clerk to write Mr. Logie to regret that he was hailed to court. It is pointed out that in cases of this kind the owner of the car is always summoned to appear and not the driver.

Summerland, Sept. 14th, 1920.
To the Editor of The Review:

Dear Sir.—When a committee was appointed by the ratepayers to go into the question of improving our irrigation system, the point most insisted upon by all the members of that committee and by nearly every speaker at the various public meetings, was that the work must be continued from year to year until our system was in thoroughly good shape from head waters to distributing laterals. We know that great improvement has been made, but there is still much to be done; above all, there is the question of increased storage must be taken up. The necessity for economy is plain enough to everyone, but is it sound economy to spend large sums on our system and then to stop when it is half completed? If we do we shall have increased our indebtedness without deriving anything like the full benefit from our expenditure.

For several years we have been fortunate in getting timely showers to help our fruit ripen towards the end of the season when water was getting short, but I wonder if the fruit growers fully realize what would happen if we were to get a winter with a light snowfall followed by an early dry spring and a long, hot, dry summer. We have had those conditions in the past and if we have them again with a heavy crop on the trees our loss could easily run into some hundreds of thousands of dollars. Surely the immediate provision of increased storage would be cheaper than that. The trouble with the Trout Creek storage seems to be that when the water is let down in hot weather there is great loss from evaporation. Storage in Garnett Valley is close at hand and is protected from evaporation. I believe that if the present Garnett Valley dam were raised to its full capacity, and the old dam which was washed out some years ago were rebuilt, we shall have taken a long step toward solving our storage troubles; because when Trout Creek gets low Garnett Valley storage water could be used as far as the ditch running by Pinio's Corner, and Trout Creek water kept for the rest of the district.

I am, Sir,
Yours truly,
C. J. HUDDLESTON.

To the Editor of The Review:

Dear Sir.—I noticed in your last week's issue that our respected friend, Autolyus, is once more taking a round out of those who want a change in the social order of things. To a previous letter of mine on this subject he set up an insurmountable barrier, Human Nature. Now he is charging us with all the world's present troubles. I intended replying to the "Human Nature" argument, but from sheer lack of time I was prevented from doing so. I have frequently heard this argument advanced by good living members of the Christian Church, much to my astonishment, and almost invariably backed by the remark that what we want is the Grace of God, not changes in the social system.

Can anyone imagine a more astounding "Arms folded, leave it all to the Grace of God" attitude? Put your shoulders to the wheel, Christian friends, and apply practical demonstration of the Grace of God by the lives of his followers.

In "Uncle Tom's Cabin" we read of Southern church going, so-called Christian whites, who endeavored to prove the justice of the chattel slavery system of that day, according to the Bible. It was not popular to speak against slavery in that country, at that time. History repeats itself and today many people are unconsciously adopting the same attitude. The social evils of the day, the child labor and the sweating systems which nothing can check so long as private ownership and a competitive system hold sway, the slums, resulting not alone from drink but from underpay,

are nothing to them. They are not their brother's keepers. Human Nature, as my friend J. Logie, pointed out, is a very pliant thing. It has been said that nine-tenths of our characters are due to our environment. If Autolyus or I had been born in China we would eat with chop-sticks and think in the Chinese manner. If we had been born in the Stone Age, we might probably have followed the fashion of that day and obtained a wife by clubbing the beloved one over the head.

The lesson of this is to change our environment if we wish to assist in hanging human nature. The present competitive system (I go up if you go down order) undoubtedly tends to make us selfish, cunning, crafty, deceptive, suspicious and cruel. Co-operation, on the other hand, tends to kindness and all that is good. I imagine I hear Autolyus say, "Then let Labor and Capital co-operate." This is exactly what we want, but we don't want 3 per cent. of the population to own 80 per cent. of the capital of the country, as at present in Canada. Make the nation the sole capitalist and then Labor and Capital can co-operate; in other words, government ownership of all means of production.

The power of money in sufficient quantity to make money without any further effort on the part of its owner than that of investing in good securities is what makes the root of all evil. It causes the uneven distribution of wealth, with all its greed and miseries. By making the nation the sole capitalist that evil is abolished. The argument that human nature stands in the way is weak and might just as well have been applied in the days of the Magna Charta, about the obtaining of the franchise. Those people caused a lot of unrest, thank God, in those days. They, also, had a "passion for change and experiment" without which progress would cease.

Autolyus speaks of wars and strikes almost as if they were initiated since 1915. "Wars and rumors of war" have filled the lifetimes of our oldest citizens. Count the wars of the last 20 years, for example, whilst strikes are equally ancient and will continue until the STATUS, not the wages, of the worker is changed. Yes, we have a passion for change; we would hang our heads in shame if we had not.

Autolyus charges us with all the world's ills, yet prior to the World War Socialists from all countries subsequently at war met at Stockholm to prevent the war by an international strike. The, at that time, "King of all Capitalists," Kaiser William, succeeded in nipping the effort in the bud. German capitalism caused the war and capitalism has caused all the wars. The producers (the Labor party, whether they know

Boy Scout Column
1st SUMMERLAND TROOP B. P. SCOUTS
Headquarters, Ellison Hall
Scoutmaster O. F. Zimmerman
Meets every Friday evening at 7.30 p.m.

We publish below a further description of the Scout Jamboree as in the Overseas Daily Mail:

The Jamboree Described
A rolling sea and rock-girt strand, and a high forest, dark and mysterious, with native huts in its shadows. It was the scene of the Jamboree of Boy Scouts at Olympia. One side of that vast hall was filled with vivid landscape after the pattern of the dream-scenes of boyish romance. Behind the rocks was the towering prow of a wooden ship from which Sea Scouts were gazing.

The solitary figure of a boy—a Wolf Cub in green—came out of the forest and walked toward the sea, and, of a sudden, he turned round to the forest with fingers to mouth and gave the Cub whistle. Instantly from strand and trees rushed two shouting torrents of Cubs to commingle and form a council circle. The forest side was alive with 500 Cubs. Then the Head Wolf mounted a rock, and at his signal the Cubs gave the grand howl with fearful and wonderful effect. Each was proud of his part in one of the chief noises of the show.

One had to be prepared for shocks. A Scout ran round the arena screaming "Fire!" and almost immediately the familiar jangling of a fire-bell could be heard and a brand-new motor-fire-engine which was built to go to Mandalay and had been lent

it or not) fought the wars, driven by these capitalists in most cases.

The statement that experiments of the kind we want seem to be failing elsewhere, needs to be made more definite to be fair, and granted time and the courtesy of space in The Review, I will endeavor to answer as I believe I can. —SOCIALIST.

Notary Public, Real Est. & Insurance

Welsh Scouts erected a pit-head in the arena, miners went down to their work, and an explosion was heard soon after. Then some Scouts who were camping near rushed to the scene to find that the cage, was damaged and unusable. So they erected a single-pole derrick and saved the miners by that means.

There were generally three or four different things on at the same time in the huge arena. For instance, while this colliery scene was being enacted by Welsh Scouts, Herefords showed the working of an old cider-mill and press. Here a lad was bitten by an adder and an ancient charm was used to cure the bite. In other places Scouts were giving a gymnastic display, others were wrestling, fencing, or boxing, and still another contingent was giving a fire-fighting and ambulance exhibition.

The Jamboree, being a jollification of boys, was a study in the superlatives of clamor. Whatever noise was raised it was in excess, and Olympia was no place for timoröls folk. Nothing can give a better idea of the international character of the Jamboree than the result of the Tug-of-War competitions:
Holland beat Gibraltar A.
Denmark beat Greece.
Union of South Africa beat Scotland.
Luxembourg beat Ireland.

Habitués of Olympia and the regular officials of the place say that the finest of all the many spectacles staged in the hall was the grand procession of the nations. Scouts of 21 nationalities, some of whom are represented by as many as 300 delegates, took part in this scene.

Headed by the band of the American delegation, the long and varied train of Scouts came walking down a defile in the rocky cliffs. There were Sea Scouts in their blue, killed Scouts, colored Scouts, and the South African contingent had its Cubs with it—the only Cubs from overseas.

The Siamese delegation was one lone little fellow, trudging along carrying his national flag, looking rather pathetic, but he seemed anything but sorrowful about it. Of course, the larger the number of Scouts around him, the greater his company of brothers.

A realistic colliery explosion and rescue were staged by Northumberland Boy Scouts, who had an exact representation of pit-heads and underground workings, with cage, tramways, miners and pit-ponies.

Peachland Doings

A Weekly Chronicle Furnished By Our Local Representative.

On Wednesday of last week Mr. J. W. Jones, member for South Okanagan, addressed a public meeting here in the Orange Hall for the purpose of organizing a Peachland National Liberal and Conservative Association. There was not by any means a large representation of the voters of the district, but those who attended gave the member a very attentive hearing as he ably spoke on the various issues of the day. The meeting was led to organize at the close of the address with the following officers and executive: President, Mr. J. L. Vicary; vice-president, Maj. Hardisty; second vice-president, Mrs. Hardisty; secretary-treasurer, Dr. Buchanan; with representatives from the municipal wards as follows: Mr. J. S. Drought for Ward 1; Mr. A. N. Cutbill for Ward 2; Mr. M. N. Morrison for Ward 3; and Mr. H. Hardy for Ward 4, with Mrs. H. Drought to help represent the ladies, completing the executive. The question was brought up as to appointing delegates to the convention being held in Penticton this week, but it was decided best to leave the appointment to the executive. It was agreed that the first executive meeting should be held on the following Monday. During the course of his remarks Mr. Jones stated that he hoped his riding would have the opportunity and pleasure of seeing and hearing Premier Arthur Meighen, as it was expected that he would be visiting the riding at some time during the campaign. Mr. Jones stated that he had asked for four meetings in the riding, but if it was impossible to get four he would try for as many as possible, and arrange them in the best places possible to convenience the whole riding.

Mrs. McLellan left for the Coast last week, where she expects to spend a short time both on business and pleasure.

Mr. Roy McCall, who came in from Manitoba a short time ago, and has since been visiting with his cousin, Mr. H. E. McCall, took a position on board the steamer Sicamous last mid-week and will probably continue during the fall and winter. He expects to have his wife and son out shortly and in the meantime will make his home in Penticton.

After a pleasant vacation and visit among old Peachland friends for a couple of weeks Mrs. McLennan and daughter, Miss Jean, left last week to return to their home at Edmonton. While here they were the guests of Mr. and Mrs. E. F. Smith.

Miss Bertha Bradbury paid her parents and family a short visit recently, returning to Penticton last week. She was accompanied on the visit by a friend from Penticton, Mrs. Crosby.

Mr. McLellan of the Peachland Garage took a short vacation in company with the Samburg Brothers, combining hunting and fishing. They got some fish, all right, and plenty of hunting, but like many others who have tried their luck this fall, the hunt is all they had.

As had been advertised for Saturday evening last, Miss Helen Badgley entertained a Peachland audience in the Orange Hall. The audience was well pleased and glad they had been able to attend.

Mrs. Wm. Haug of Kelowna is a guest with Mrs. R. A. P. Moore, having come down last week-end.

Peachlanders will do well to note that notice has been given that a vote of the electors of the Corporation of the District of Peachland will be taken on September 25th, 1920, on a proposed by-law for raising the sum of \$2,500 for the purchase of a municipal hall.

After a pleasant visit spent here with her sister, Mrs. P. B. Schurrab, of Victoria, B.C., left on Monday evening's boat for Bonavon Dell, where she expects to visit her parents for a short time.

Mothers Van Hise, Sr., and Jr., were

visitors in town on Wednesday, having motored up from their ranch with some friends.

Electric light poles have been erected north from the corner of the Glen Robinson road at Mr. Fred Young's place. This is one of the extensions that has been talked of for some time, and which seems soon to be realized.

It is proposed to hold an organization meeting on Sunday evening, the 19th of September, for the purpose of re-organizing the Prohibition Committee. The meeting will be held in the Presbyterian church at 7:30.

Mr. R. J. McDougall, of Penticton, motored through town this week, accompanied by other friends on a hunting and fishing tour extending as far north as Kamloops.

Mr. A. J. MacKenzie and Mr. E. Nightingale left on Wednesday morning on a short tour through the Vernon district and possibly as far as Armstrong and Enderby. These two gentlemen are on the lookout for a suitable place to locate for mixed farming and before settling down wish to see the various parts of the country suited to this class of farming.

Mrs. Rose Henderson addressed a public meeting in the Orange Hall here on Monday evening last, dealing with the labor question.

The regular meeting of the Women's Institute was held on the lawn at Mrs. A. Wilson's on Friday. After the regular business our institute entertained the Summerland and West Summerland Institutes. About 20 Summerland members responded to the invitation and were entertained with music, etc. A picnic supper was served and a very pleasant afternoon was brought to a close with the singing of Auld Lang Syne.

One of the most interesting features of the civic banquet given to the touring delegates of the Imperial Press Conference, at which 400 guests were present, was a presentation to A. P. Calder of C.P.R. headquarters, who acted as the party's cicerone on the journey across Canada. Lady Burnham, on behalf of the party, made the presentation of an album of autographs containing the name of every member of the conference, and many speakers paid personal compliments to Mr. Calder for his admirable service, and appreciation was expressed for the splendid manner in which they had been entertained by the Canadian Pacific Railway.

A considerable movement of British settlers from the Orient to British Columbia and western Canada farms has been noted this year, and is expected to continue. The latest of these is a party of ten families, who have long been residents of Shanghai and are settling in the Columbia Valley.

The Minister of Lands for the province announces that in order to encourage the establishment of more pulp mills in the province, the Government may cut in half the timber license fees on areas better suited to pulp and paper than to lumbering. The section of Prince George is believed to one that will benefit very largely from this concession. French and United States interests have been obtaining information with a view to establishing pulp mills in this area.

EDMONTON—Alberta's butter production will be in excess of 12,000,000 pounds this year, according to the province's leading creamery authority. He states that it will far exceed the notable record of 1919.

Phone 843.

EDMONTON—According to a report from the north, oil has been struck by the Imperial Oil Company at a point just within the Arctic circle north of Great Slave Lake, and close to the Mackenzie River. The flow of oil is small, being about ten barrels per day, but it is regarded as a sure indication that a heavy flow is to be expected in the locality. Other enterprises of the company at other points are regarded favorably, especially in the Czar region, where a well has already reached a depth of 2,000 feet.

CALGARY—"Judging by the reports which have been received, the grain harvest of 1920 is likely to prove the biggest thing in the history of Alberta," says the provincial minister of Agriculture. The last record in wheat was established in 1915, when approximately 65,000,000 bushels were threshed, whilst the largest harvest of oats was garnered in 1917 with a total of 102,000,000 bushels.

REGINA—The yield of spring wheat in Saskatchewan will be approximately 14.3 bushels to the acre this year, according to a preliminary crop estimate issued by the Bureau of Statistics of the provincial Department of Agriculture and based on the reports of 421 correspondents throughout the province.

WINNIPEG—Manitoba's wheat crop this year is worth approximately \$117,500,000 to the producers. This is the estimate value reached by computation based on the report of the provincial Department of Agriculture on crop conditions. This gives an average yield of 17.5 bushels to the acre, and the estimated acreage sown to wheat in the province is 2,687,000 acres, giving a total estimated crop of 47,022,500. Grain men report that the farmers will realize \$2.50 per bushel for the wheat this year.

Corporation of the District of Summerland

ASSESSOR

Applications are invited for the position of Assessor for the 1921 Assessment of the Municipality.

Applications, stating remuneration required, to be forwarded to the undersigned (from whom any further information can be obtained) on or before Monday, 27th inst.

F. J. NIXON,
Municipal Clerk.

13th Sept., 1920.

7-8

CORPORATION OF THE DISTRICT OF SUMMERLAND

BY-LAW NO. 125

A BY-LAW to enable the Corporation of the District of Summerland to raise by way of loan the sum of Three Thousand Dollars (\$3,000) for school purposes.

WHEREAS, it is deemed expedient to borrow the sum of Three Thousand Dollars (\$3,000) for the purpose of erecting a temporary classroom for school purposes.

AND WHEREAS, it is necessary for the purposes aforesaid to raise by way of loan upon the credit of the said Municipality the sum of Three Thousand Dollars (\$3,000) payable on the First day of November, 1920, bearing interest in the meantime payable half-yearly at the rate of six per cent. (6 per cent.) per annum, the principal of such loan when raised to be applied for the purposes aforesaid.

AND WHEREAS, the said amount of Three Thousand Dollars (\$3,000) is the amount of the debt which this By-law is intended to create.

AND WHEREAS, for the payment of the said principal it is necessary to raise the sum of Two Hundred and Forty-nine Dollars and Eighty-seven Cents (\$249.87) by rate in each and every year.

AND WHEREAS for the payment of the said interest it is necessary to raise the sum of One Hundred and Eighty Dollars (\$180.00) by rate in each and every year.

AND WHEREAS, the amount of the whole rateable land and improvements of the Corporation of the District of Summerland according to the last revised Assessment Roll is Three Million, One Hundred and Twenty-four Thousand, Nine Hundred and Seventy-six Dollars and Fourteen Cents (\$3,124,977.14).

AND WHEREAS, the total amount of the existing debenture debt of the said Corporation of the District of Summerland is Four Hundred and Forty-six Thousand, One Hundred Dollars (\$446,100.00), of which none of the principal or interest is in arrears.

NOW, THEREFORE, the Municipal Council of the Corporation of the District of Summerland in open meeting assembled, enact as follows:

(1) It shall be lawful for the Reeve of the said Corporation of the District of Summerland to raise by way of loan from any person or persons, body or bodies corporate, who may be willing to advance the same on the credit of the Municipality by way of the Debentures hereinafter mentioned, a sum of money not exceeding in the whole the sum of Three Thousand Dollars (\$3,000) and to cause all such sums so raised and received to be paid into the hands of the Treasurer of the Corporation of the District of Summerland for the purposes and with the objects hereinafter recited.

(2) It shall be lawful for the Reeve to cause any number of debentures to be made for a sum not exceeding One Thousand Dollars (\$1,000) each, bearing interest at the rate of Six per cent. (6 per cent.) per annum, not exceeding in the whole the sum of Three Thousand Dollars (\$3,000) and all such debentures shall be sealed with the seal of the said Corporation, signed by the Reeve and counter-signed by the Treasurer of the said Corporation.

(3) The said Debentures shall bear date the First day of November, 1920, and shall be made payable in ten years from the date thereof, at the Agency of the Bank of Montreal at Summerland, British Columbia.

(4) The said Debentures shall have coupons attached for the payment of the interest at the rate of Six per cent. (6 per cent.) per annum on the amount of the said Debentures and such interest shall be payable half-yearly on the First days of the months of May and November in each and every year and the signatures to such coupons may be either written, stamped, printed or lithographed.

(5) An amount shall be raised and levied annually by a rate sufficient therefor on all the rateable land or land and improvements within the Municipality, in addition to all other rates, to pay interest on the debt hereby created during the currency of the said Debentures and to provide for the payment of the said debt when due.

(6) The sum of One Hundred and Eighty Dollars (\$180) shall be raised and levied annually by a rate sufficient therefor on all the rateable land or land and improvements within the Municipality in addition to all other rates for the payment of the interest on the said Debentures.

(7) The sum of Two Hundred and Forty-nine Dollars and Eighty-seven Cents (\$249.87) shall be raised and levied annually by a rate sufficient therefor on all the rateable land or land and improvements within the Municipality, in addition to all other rates for the payment of the debt hereby created when due.

(8) This By-law shall before the final passage thereof receive the assent of the Electors of the said Corporation of the District of Summerland in the manner provided for by the Municipal Act, 1914, and Amending Acts.

(9) This By-law shall come into force and take effect on the First day of November, 1920.

(10) This By-law may be cited for all purposes as the School Loan By-law, 1920.

DONE AND PASSED by the Municipal Council the day of _____, 1920.

RECEIVED THE ASSENT OF THE ELECTORS of the Corporation of the District of Summerland the _____ day of _____, 1920.

RECONSIDERED AND FINALLY PASSED by the Municipal Council the _____ day of _____, 1920.

Reeve,
Clerk.

TAKE NOTICE that the above is a true copy of the proposed By-law upon which the vote of the Municipality will be taken on Wednesday, 29th September, 1920, between 9 o'clock a.m. and 7 o'clock p.m.

THE POLL will be held at the following places:

Municipal Office, West Summerland, B.C.
W. J. Robinson's Office, Summerland, B.C.

PUBLIC NOTICE is hereby given that the vote of the Electors of the Corporation of the District of Summerland will be taken on the above-mentioned By-law at the time and place above mentioned.

F. J. NIXON,
Municipal Clerk.

J. E. PHINNEY, Auctioneer.

The Summerland Review

Established August, 1908

Published at Summerland, B.C., every Friday by THE REVIEW PUBLISHING COMPANY, LIMITED
Ralph E. White, Editor and Manager

An independent family newspaper covering Peachland, Summerland and Naramata and adjacent districts.

Subscription Rates—In British Empire, in advance, \$2.50 per year; six months, \$1.40. To U.S.A. and other countries, \$3.00 per year.

Advertising Rate Cards and information respecting territory and samples of paper mailed upon request, or may be seen at the office of any advertising agency recognized by the Canadian Press Association.

Advertisers must have copy in by Wednesday noon in order to insure changes for standing advertisements. New display advertising copy can be accepted one day later.

Correspondence—Letters addressed to the Editor and intended for publication must be short and legibly written on one side of the paper only. The longer an article, the shorter its chance of insertion. All communications must bear the name of the writer, not necessarily for publication. The publication or rejection of articles is a matter entirely in the discretion of the Editor. No responsibility is assumed by the paper for the opinions expressed by correspondents.

FRIDAY, SEPTEMBER 17, 1920

SUMMERLAND'S WATER SYSTEM

Many of our readers will agree with Mr. C. J. Huddleston who, in his letter published in this issue, states that the municipal program, inaugurated about two years ago for making permanent improvements to and enlargements of Summerland's irrigation system, should be continued until completed. About \$100,000, chargeable to capital account, has been expended and another \$50,000 will probably be required. With this expenditure the mains will be enlarged and improved so that for many years to come it should be possible to maintain the system from the annual irrigation rates.

The work done on the system to date has effected a very marked improvement in the service. Unfortunately, there have been some weak links and administration has not been all that is desired, resulting in a shortage of water to some properties on the extreme end of the ditches, notwithstanding the fact that very much more water has been put through the system this year than in any other season.

Until further expenditure is made, much water will be wasted. Had the south main, for instance, been in the same condition this year as the north main, our available water supply would have gone much farther. A huge volume of water has been lost through seepage from the ditches not yet lined. This work should be done even in advance of providing further storage.

Mr. Huddleston's statement that the dam in Garnett Valley should be raised, will also meet with general approval. A large additional volume of water can be stored there at small expense, practically every gallon of which will be available to the land. Unfortunately but a small proportion of water stored at the head of Trout Creek reaches the orchards under our system; hence storage sites close in should first be utilized.

COUNCIL HOLDS EXTRA SESSION

(Continued from Page 1)

The result of the discussion which followed was a recommendation to the next council that a number of properties be taken off the pipe line, and served through the Jones Flat ditch. J. M. McDougald, also in the northeast section, describing himself as "another tail-ender," complained of lack of water, stating that he was not getting enough for domestic purposes.

A. Milne wrote complaining of the condition of the side-walk on Shaughnessy Ave., and telling of injuries received by his wife through alleged carelessness in not keeping the side-walks repaired.

The clerk was instructed to make formal objection to the application to E. N. Rowley, for permission to build a dam on Trout Creek.

The design for posts for burial lots in the cemetery was approved and instructions given that a quantity be ordered and placed in position.

MINISTERS' SALARIES

Headline in the news, "Ministers' salaries to be \$2,000," gave us a start, until we read down and found that they were ministers in the Methodist church. Saving Canada for democracy, we might note, is a better paid job than attempting to save souls.—Ottawa Citizen.

One Sunday morning a clergyman was accosted by an old lady, who said to him:

"I want to tell you, sir, how much I enjoy going to church on the days when you preach."

"Oh," replied the clergyman, "I'm gratified to hear it."

"Yes," she went on, with appalling candor, "I get such a good seat then."

What sculpture is to a block of marble, true education is to a human soul.—Addison.

FORGET IT

If you see a tall fellow ahead of a crowd,
A leader of men marching fearless and proud,
And you know of a tale, whose mere telling aloud
Would cause his proud head to in anguish be bowed,
It's a pretty good plan to forget it.

If you know of a skeleton hidden away
In a closet and guarded, and kept from the day
In the dark, and whose showing, whose sudden display
Would cause grief and sorrow and life-long dismay,
It's a pretty good plan to forget it.

If you know of a thing that will darken the joy
Of a man or a woman, a girl or a boy,
That will wipe out a smile, or the least way annoy
A fellow, or cause any gladness to cloy,
It's a pretty good plan to forget it.

—Laboratories' Data.

SH—SH

"Your husband dresses very quietly, doesn't he?" remarked one lady to another.

"Well," was the response, "not always. You should have heard him this morning when he couldn't find a collar stud!"

FRUIT PRICES IN OKANAGAN AND ELSEWHERE

Market Reports Are Optimistic of Apple Prices

Writing from Calgary, Prairie Markets Commissioner Grant says:

Slight showers, some clouds, but usually fine, is this week's weather. The country trade is very good owing to the crop conditions being satisfactory. The outside demand in general is greater this year for apples and other fruits than has been for several years. The new freight rates caused quite an excitement amongst dealers here and the general opinion is that the award is in excess of reasonable need. Fruit shippers are more concerned in express rates, and it is hoped that the expressed public opinion in regard to what is termed "excessive freight rates" will have the effect of preventing express rates from mounting too high. There is little doubt but that an advance will take place. The producers of food stuffs will demand a hearing before a decision is given.

Ontario plums are offering in Calgary in large quantities, mostly Greengage and Damson. The demand for them has been good. Some of the merchants for convenience removed the plums from the 11-qt. baskets and placed them in 4-lb. baskets. This was a poor move, as they look small and green when thus displayed. There is a bright rose-colored gauze placed on the lid or window of the 11-qt. basket that helps to make green plums look rosy and ripe. It is "camouflage," but very effective in selling the fruit.

Several car lots of Ontario Crawford peaches will arrive next week, and will sell wholesale at about \$2 per basket.

Calgary Wholesale Prices

B.C. Apples, wrapped	\$3.35 to \$3.75

Thursday, Sept. 16.—S. R. Gibson, H. B. Meausette, C. V. Prosser, F. Sherman, C. H. Rhuedeman, Princeton; J. A. Nicol, Pentiction; E. R. Simpson, W. Summerland.

Plans for a big pulp mill on the Queen Charlotte Islands are being prepared by the Masset Timber Co. The company's output of logs totals 10,000,000 feet per month.

FRUIT PRICES IN OKANAGAN AND ELSEWHERE

(Continued from Page 4.)

Peach Boxes, \$1.00 per 100, no bonus. Prunes are handled entirely by day work. Present Crop Conditions in the Okanagan Valley. Peaches (scarce) in mixed cars for Crawfords and other good varieties, \$1.65. Pears, Bartlett and Flemish Beauty, No. 1, 3.50. Pears, Bartlett and Flemish Beauty, No. 2, 3.25. Plums, 4-basket crate, 2.00. Prunes, quoted from, per straight car, 1.10 to 1.15. Prunes, mixed car, 1.35. Tomatoes, in mixed cars, 1.00 to 1.25. Potatoes from Vernon, limited movement, in mixed cars, per ton, 35.00. Onions for fall delivery are booking rapidly at, per ton, 35.00. Onions, present delivery, per ton, 40.00 to 50.00. It is now practically assured that the apple crop will not exceed 55 per cent. of last year's output. Ontario and Great Britain have booked heavily from B.C. Crab apples are going nicely. Transcendents sold out, shipments to the U.S. will be about 90 cars of this variety. Eastern booking of apples exceeds 1919. The export to the United States has fallen off. Rollers unsold are practically nil this year. The demand far exceeds the supply in most fruits. One shipper says that at least 200 cars of apples more than there are available could be readily sold on the basis of \$2.75 for No. 1 and \$2.50 for No. 2, all of which makes selling a pleasure this season.

Weather and Prairie Crop Conditions. Moderate temperatures throughout the West during the week. General rains in Manitoba and Saskatchewan, and light showers in a few scattered localities in Alberta. Manitoba—Weather conditions are now favorable and work proceeding rapidly. Cutting of all grains completed except late oats and barley intended for food; 15 to 20 per cent. threshing accomplished, outturns are good, as to yield and grade. Help reported scarce in a few districts, but general situation in this respect satisfactory. Saskatchewan—Wheat cutting is completed, oats and barley 80 to 90 per cent. done. Threshing becoming general, yields fully up to expectations, and grade good. Alberta—Good harvest weather except for light showers in Edmonton district. Cutting in southern and central districts practically completed, and 80 to 90 per cent. in the north, which will finish this week. Threshing started in a few districts, and will likely become general by the end of the week. Frost in some parts of province—no damage.

DOMESTIC CASUALTY

This conversation was overheard in an English muniton canteen after a serving of some heavy and half-cooked pudding. Sam: "This 'ere puddin' ain't 'air 'onvy stuff." Bill: "That's nothing. My missus made some one day that we couldn't eat, so she gave it to our ducks. A few minutes later a little boy knocked at our door and said: 'Mrs. Jones yer ducks have sunk.'—Vernon.

Passing Events: Social, Personal, &c.

Mr. and Mrs. Hurd, of Vancouver, are here on a visit to their daughter, Mrs. A. S. Peck.

Don't forget to attend the Auction at Peach Orchard on Thursday, Sept. 23rd, at 1:30 o'clock.

Mr. and Mrs. Walter M. Wright boarded the boat last night, on their way to Renfrew, Ont., where they will reside for a time.

Reeve Campbell, with his wife and daughter, will leave here next week to visit Mr. and Mrs. Campbell's former home, in Quebec province, near Montreal.

Capt. T. D. Shorts, who operated the first steamer to ply on the waters of Okanagan Lake, was taken ill while visiting Pentiction recently and taken to the hospital there. His home is at Hope.

The Okanagan Telephone Company is building a second trunk line from end to end of the Okanagan Lake. Already the second line has reached south to a point about midway between Summerland and Peachland, and the latter town is now connected with the northern end of the Valley through the second wire.

A donation which will be much appreciated and one which fills a long felt want has been made to the Central School by the West Summerland Women's Institute. This is a first aid equipment including a cot, mattress and blanket, and the customary cabinet of first aid medicines and appliances.

The Women's organizations of the churches of Summerland have arranged to hold simultaneously six prayer services between three and four o'clock on Monday afternoon. These services will be held in different sections of the municipality, when the coming prohibition campaign will be a special subject of prayer.

Summerland again heads the list for membership in the B. C. F. G. A., though still short of last year's total. Naramata is included in the district of which R. V. Agur is the representative on the board. To date he has enrolled 167 members, of whom 30 are life members; also the largest list of any district in the province. Last year had a total of 200 members, of whom 27 were for life. The Pentiction district comes second to Summerland with a life membership of 17 and a total of 108.

Pentiction Herald: Mr. Muir Stewart of Summerland wrote the council recently asking them to refrain from using shale from his property, lot 149, D.L. 187, formerly owned by Mr. Alfred Jones. The council, prior to the change of ownership, had a contract with Mr. Jones whereby they were to receive 1,000 loads of shale for \$200, settlement to be made on October 1 of each year. The clerk was instructed by the council Tuesday night to write Mr. Stewart and arrange for him to meet the public works committee of the council, when it is hoped a similar arrangement will be entered into.

THE BAGPIPE

(New York Tribune)

Was the bagpipe English? "Never" says the gentleman of Scottish descent, whose one vice is his love for the so-called music of that queer instrument. From the "Miscellany" of the Manchester Guardian, however, he will learn: The Scots may have acquired their love of bagpipes from England, not from Ireland, as suggested by Commander Kenworthy in the House of Commons. In 1865 Mr. James Moncreiff, then Lord Advocate, told an Edinburgh meeting that the bagpipe was essentially an English institution. "The English," said he, "were the original bagpipers. Shakespeare, who was an authority on music, often refers to the bagpipers, but he does not introduce them into 'Macbeth.' The armies in 'Macbeth' do not march on Dunsinane to the sound of a bagpipe; but he speaks of the drone of the Lincolnshire, and the Yorkshire bagpipe, and of a person 'laughing like a plover at a bagpiper'—all without the slightest allusion to the Scotch bagpipe. And when we look at the works in the Register House, which show how our former monarchs spent their income, we find their expenditure for music put down in such entries as 'To the English piper, 3s 6d.' The Scots were not pipers; they wore harpers."

To hear patiently and answer precisely are the great perfections of conversation.—Disraeli.

Anyone wishing to purchase an Organ that is as good as new should attend the sale on Thursday next in Peach Orchard.

Mr. and Mrs. Charles Comber, of Ocean Falls, B.C., are the guests of Mr. and Mrs. Albert Hibertson, Victoria Gardens.

Miss Annie Lei Kahilau, a native of Honolulu, arrived here on Monday and is a guest of Dr. and Mrs. F. W. Andrew.

A son was born on Friday, Sept. 10th, to Mrs. H. L. Foster, of Spokane, who is visiting at the home of her parents, Mr. and Mrs. T. R. Harwood.

Sale of home cooking on Saturday, September 18, in the old barber shop on Shaughnessy avenue, Summerland. Also in the Better "Ole," West Summerland. Proceeds for the Prohibition campaign.

Dr. Eric C. H. Windler, of Regina, has decided to come to Summerland to practice medicine. Dr. Windler, who is an ex-service man, was a visitor here recently, and was much taken with the place. A telegram announcing his decision to come here was received in Summerland early this week.

The Summerland School Board has been so fortunate as to secure the services of Mrs. C. D. Denton as teacher for Grade VII of the Central. What was expected to be the Seventh Grade, with Miss Banks as teacher, has been divided into two classes, Miss Banks taking the Eighth Grade.

The members of both local Women's Institutes were invited to a picnic given by the Peachland Institute last Friday. Unfortunately the weather, which had been unpromising for several days, continued unsettled and resulted in a disappointingly small attendance of the invited guests. Further reference is made to the outing in our Peachland section.

The Summerland Band has discontinued its open-air concerts for this season, as some of the boys are not able to keep up the practice just now with the rush of fruit harvesting. Virtually two bands are now practising, the second being a group of younger citizens who are being trained under the efficient tuition of Band Master Hutchinson. As members of this auxiliary develop, they will be drafted into the regular band. During the coming winter much time will be given to practising by both sections.

Orchard For Sale

Fifteen acres bearing orchard, known as "Parker Orchard." Heavy producer and money-maker. Six-room house, stable, tool house and garage. Ten acres bearing orchard adjoining above. Both in the heart of the district, with domestic water and electric light available. These will be sold separately or together, with or without packing house, horses and equipment. Good terms and attractive prices to responsible parties. Possession given after present crop is harvested. Colin W. Lees, KELOWNA, B.C.

Our Mail Order Department

is prepared to take your subscription and attend to renewals promptly at \$2.00 per year, payable in advance.

SO DO WE

Colonel Smaehem was dining with some friends at a restaurant. When dessert was served, the lady sitting next to the Colonel inquired: "Do you like bananas?" The Colonel, unfortunately, was rather deaf, and coldly replied: "Madam, I do not. I prefer the old-fashioned night-shirt."

John was divorced from his first wife. William, his friend, was an infidel. They were walking together near St. Martin's church. "Ha!" said John, "I was married in that church."

"Indeed!" said William, "and I was christened in it."

"It is not a good shop," reflected John. "Their work don't last."

THE REVIEW

Box 168 Summerland, B.C. (Advertising Copy is Not "Barred")

CROP MOVEMENTS FROM THE VALLEY

Feeding of Soil Necessary To Produce Best Fruit

Crop movements from several sections of the Valley are commented upon as follows by District Horticulturist Hunter in his report issued last Saturday.

Vernon Wealthies have started to move. Crabs are rolling. Duchess have packed out about 80 per cent of last year.

Onions are being harvested in very heavy quantities and it is greatly to be regretted that in many cases they are being taken from the field too quickly and are not in prime dried condition. A little more time and care spent in the drying and curing of onions would save the growers thousands of dollars through losses in storage and transit.

Kelowna Bartlett and Flemish Beauty pears are moving in considerable quantities and the quality is reported fine. Boussocks and the earlier varieties are about all out.

Wealthy apples are rolling and also the first of the prunes. Tomatoes are ripening more heavily and the average yield of 20 tons to the acre is expected. The canneries are operating at full capacity.

The weather has broken and light showers tend to enhance the color of the later apples. McIntosh Reds are showing up particularly well.

Pentiction Bartlett, Clairgeau, Anjou, Duchess, Flemish Beauty and Clapps Favorite pears are moving out in considerable quantities and so far are of fine quality.

Italian prunes and the following varieties of plums are moving out: Yellow Egg, Wickson, Columbia, Bradshaw, Green Gage, Purple Gage, Black Diamond, Victoria, Sugar, Elbertas, Carmen, Green Mountain, Hale's Early and Yellow St. John are moving out. Early Crawford peaches are about off and the Elbertas are starting to move very heavily.

As was expected the Crawfords fell down slightly in their quality, taking the crop on the whole, owing to the fact that as the Crawford peach is a very shy feeder, and very little attention has been paid to the feeding and proper thinning of this variety, it has naturally followed that the quality was lowered. Elbertas, on the other hand, being gross feeders, are holding up better, but the time has arrived when it is essential that the growers pay more attention to improving the quality of their fruit, particularly the Crawford peach and apricots, by feeding their soils more liberally. A cover crop of vetch planted now and plowed under next spring with an addition of about two pounds of nitrate of soda applied as soon as possible in the spring and another pound just before the first irrigation will tend to very greatly remedy the deficiency of plant food in the peach orchards.

Apples: Duchess, Wolf River, Gravenstein, King, Jeffries, McIntosh Red and Wealthy are moving out and some Cox's Orange were picked this week and were particularly fine quality.

Hyslop, Whitney and Transcendent crab apples are moving. A few tomatoes and cucumbers are still going through some of the packing houses.

Nectarines are nearly over for the season, but some of the packing houses are handling a few.

Summerland Peaches, pears, plums and prunes and fall apples are moving fairly strong. Crawford peaches are about over, and Elbertas should be moving by the 15th.

Some shipments of Wealthy, Gravenstein and Grimes are being made up for British markets, and will go next week.

Apples are maturing rapidly and are coloring up well. Express shipments are holding up well, with anything from 1,100 to 1,500 per night.

NO LONGER DEAF

Officer: "Is your brother, who was so deaf, any better?" Bridget: "Sure, he'll be all right in the morning." Officer: "You don't say so." Bridget: "Yes, he was arrested yesterday and gets his hearing in the morning."

Hotel Dunsmuir

SEEDLESS APPLE

An Oregon fruit grower has perfected a seedless apple. In form it resembles a banana. Though elongated it is plump, and its fruit is more tasty than the ordinary apple.

Obedient Boy

"Did you deliver my message to Mr. Smith, Tommy?" asked the manager of the new office boy. "No, sir," replied Tommy. "He was out and his office was locked up."

"Why didn't you wait for him as I told you to?" "There was a notice on the door, sir, saying 'Return immediately,' so I came back here as quickly as I could, sir."

RED CROSS IN POST-WAR HEALTH CAMPAIGN

Co-operating With Provincial Health Department, It is Endeavoring To Elevate Health Standards

For many years the outlying districts of the province have felt a great need for trained nurses and, recognizing this need, the provincial department of public health has been quietly working along lines best calculated to remedy the deficiency. The plan followed has been to encourage the establishment of health centres in various parts of the province. The Women's Institutes, through the agency of the secretary, and the Victorian Order of Nurses, representatives of the health department, municipal councils and various women's organizations, and latterly the Red Cross, have taken an active interest in the work and are co-operating with the department, realizing that the safeguarding of the public health is one of the most important phases of community work.

To Train Nurses The plan now being followed, according to the Hon. J. D. MacLean, is to have a properly trained nurse, with a special knowledge of public health nursing, placed in such localities as are not conveniently situated to medical and nursing service. The training of such nurses is given voluntarily by the B.C. University, the first university in Canada to establish a faculty of nursing, in connection with which is a special course on public health nursing. The practical part of the course is carried on in Vancouver and Saanich under the supervision of the Victorian Order of Nurses, who for the past 18 months have been working in co-operation with the Provincial Board of Health.

The Red Cross has endowed the chair of public health nursing in the University of British Columbia for three years. The Provincial Red Cross Society is carrying out its peace-time programme, adopted by the International Red Cross Society at the meeting at Cannes, of devoting their energies to health work and are working as an active auxiliary to the Provincial Board of Health. They are rendering financial assistance when required towards the establishing of health centres and the assistance given to soldier settlements is being made a special feature of their work. The programme undertaken by the Red Cross is a transference of their war-time activities to the work of a war against disease, promotion of better living conditions, the education through the public health nurse of the people along health lines, and especially emphasizing the importance of the prevention of disease and giving special prominence to the care of school children in order that they may grow up physically able to have a fair chance in the competition of life.

Under Public Health Department The placing of the nurse depends on the activity of the organizations in the localities desiring such a service, but no nurse is sent to a district without the sanction of the Provincial Health Department. The nurses are supported financially by local effort, with the assistance of the Red Cross. The health department of the Provincial Government made a contribution to the centre at Saanich in return for which the institution trains the future health nurses in field work. At the present time there are 10 such nurses in training who will be placed as local demands warrant. A health centre is an institution from which, through the medium of specially trained nurses, information is given and assistance rendered with reference to the following:

- (a) Prenatal instruction to mothers.
 - (b) Maternity nursing.
 - (c) Child welfare work.
 - (d) Follow-up work in connection with medical inspection.
 - (e) Contagious and infectious diseases.
- Maternity Nursing Specialized In the maternity nursing, this is carried on principally in the homes of the poor. The prospective mother

How Long Does Life Last?

"The days of man are three score and ten," wrote the Psalmist, although he allowed that some might reach a greater age. If you read the following table, you will see that only a few creatures exceed that age, but that, beside the trees of the forest, the oldest of mankind is very short-lived.

Duration of Life Day fly, 24 hours; May bug, 6 weeks; May bug, (larvae), 3 years; butterfly, 2 months; flea, 2 months; fly, 3 to 4 months; mosquito, 6 months; ant, 1 year; hare, 6 to 10 years; rabbit, 8 years; sheep, 8 to 10 years; dog, 10 to 12 years; viper, 10 years; nightingale, 12 years; wolf, 12 to 15 years; cat, 12 to 15 years; frog, 15 years; bison, 15 years; canary, 15 to 20 years; toad, 20 years; goldfinch, 18 years; ox, 25 years; horse, 25 to 30 years; eagle, 30 years; stag, 30 to 40 years; swan, 35 to 40 years; camel, 35 to 40 years; orang-outang, 40 years; salamander, 40 years; heron, 50 years; lion, 50 years; bear, 50 years; raven, 80 years; pike, 100 years; carp, 100 years; elephant, 100 years; sturgeon, 100 years; parrot, 100 years; turtle, 100 years. Trees—Ivy, 200 years; elm, 300 to 400 years; acacia, 400 years; oak, 400 to 500 years; larch, 800 years; linden, 500 to 1,000 years; fir, 700 to 1,200 years; yew, 2,000 to 3,000 years; baobab, 2,000 to 5,000 years; dragon tree, 3,000 to 5,000 years.

is taught how to care for her health. She is encouraged to visit the health centre where she can get reliable advice. The young mother is taught how to care for herself and her infant child. The nurse teaches by actual demonstration at the bedside the women in attendance how to care for the mother and baby.

Under the heading of child welfare work the mother is taught how to feed her children; how to prepare the food if the child is being fed artificially; the proper care and routine treatment for the care of the child; how to follow the instructions of the doctor in the care of children who are below normal size and weight, the two best evidences of a lack of proper development. In short, the mother is given hints regarding the proper care of the child in its life and its activity.

For some time it has been felt that the province is not getting the full benefit from the expenditure made for medical inspection of schools, so that follow-up work has now been arranged. The public health nurse will see that the treatment advocated is carried out, will visit the school at frequent intervals; will make arrangements by which minor operations can be performed free in the case of indigent parents.

Prevention of the spread of contagious and infectious diseases is the great endeavor of the nurse under this phase of the centre's activity. The value of isolation and the carrying out of the instructions of the medical man is emphasized. Prevention of disease is the keynote of the public health nursing system and it means instruction in hygienic living, watchful care of mother and babe, correction of physical defects in school children, and insistence on proper sanitary conditions.

Nurses have already been established at the following points: Saanich (2), Colwood, Duncan (2), Meriville, Waldo, Arrow Lakes, Colista and Keremeos.

LANDS FOR SALE

15 Acres of good, dark soil with creek running through bottom land. Ten acres under irrigation, about 7 acres cultivated with three planted with 6-year-old trees. The property of Mr. F. A. C. Wright. A well-built and finished bungalow, six rooms, large bathroom and attic. Closed-in veranda, hot and cold water, gasoline pump to two large tanks in attic. Good stable, garage and other outbuildings. 1 1/2 miles from town on rural route. Will be sold for \$7,500. With DeLoo light plant and fittings, \$8,500.

Ten acres with about 250 trees, on the cliff overlooking Trout Creek Point. Deep soil. Price \$2,200 on terms.

Choice Residences. Large and Small Orchards. Stock Farms. Meadow.

The Winding Trail

PETTY PILFERING

It is said that the trifling ills of life are just the ones which are the most irritating, and that their effect is altogether out of proportion to their magnitude. Amongst the everyday vexations of the kind may be classed such visitations of providence as mosquitoes, slamming doors, jazz music, pet corns, elusive collar studs, and so on, while in a community sense I suppose straying cattle, snapping dogs, and the other fellow's hens in our garden, will rank as first favorites. But the easy winner of the exasperation stake is to be found in that shadowy individual of retiring disposition who is given to the practice of appropriating to himself, his heirs, administrators and assigns, such articles of portable property as may seem desirable to him, leaving their rightful owners to seek and search and to finally wonder what manner of person has passed by. The community pilferer does not seem particular in his selections—from a monkey wrench to a sack of sugar, all's fish that comes to his net, the only proviso being, apparently, the fact that the articles are not screwed down. Sometimes there seems to be a certain connectiveness in his acquisition, as in the case where a sack of grain and a pail were taken from the same premises not so long ago. Obviously, a pail was necessary for the proper handling of the grain later on, and the acquisitive one must have deemed that benign fortune was smiling on him, in that he should find both treasures ready to his hand.

In Kelowna it appears that the present taste in pilfering runs to the stripping of the family clothesline, when left full and exposed overnight, and in such cases the remedy is easy. But where the field of choice is so wide as it is generally found to be, there is no such remedy in sight. To protect all the various odds and ends in daily use around the ranch, or even the average householder, would entail a system of gathering together and locking up which would not be practicable, and should not be necessary. A community in which nothing is safe cannot pride itself on local conditions, and this leads to a consideration of the serious side of the matter. Opinions are pretty well agreed that these miserable thefts are generally the work of some person or persons belonging to the community itself, and this belief naturally creates an atmosphere of distrust and suspicion which is exceedingly undesirable. In some instances the thefts have been practically traced to the offender, and have been passed over from a neighborly feeling of consideration which is very natural, but ill deserved, and possibly injudicious in the long run. In such cases, there should, in fairness to others concerned, be at least a private bringing home of the charge, and a warning against future doings of the kind.

Unless we are justified in explaining this petty pilfering as a sort of kleptomania, and condoning it on that very shaky ground, it is incumbent on every community affected to put an end to the nuisance by the mere force of public opinion, made effective in such ways as circumstances may suggest.

THAT SOVIET MONEY

Mr. Geo. Lansbury seems destined to receive a few disagreeable exposures, these days. The announcement of the London "Daily Herald" that \$375,000 of Soviet money from Russia have been received by that paper, seems to very effectively clinch matters as far as the denials of Mr. Lansbury are concerned, and that gentleman, who so freely branded the British Government as "a notorious liar," now finds that description accurately applied to himself. Sane people, the world over, know that the British Government does not lie, and Mr. Lansbury was already self-condemned by his foolish utterance, but that is of very little importance. The real feature of the case is that the labor organ has been forced to acknowledge the receipt of Russian Bolshevik money, and there is no longer any doubt as to the ultimate aims and ends of that section of labor which Messrs. Smillie, Lansbury and Company represent.

Water Notice

Use and Storage.

TAKE NOTICE that Esmo Norton Rowley, whose address is Summerland, B.C., will apply for a licence to take and use 100 acre feet and to store 100 acre feet of water out of Trout Creek, which flows southeast-wardly and drains into Okanagan Lake about 3 miles south of Summerland, B.C.

The storage-dam will be located at the point of intersection of northwest and southwest survey line of Lot 1193 and Trout Creek. The capacity of the reservoir to be created is about 100 acre feet, and it will flood about 100 acres of land. The water will be diverted from the stream at a point about 900 feet northwest of District Lot 2098, Group 1, Osoyoos Division of Yale District, B.C., and will be used for irrigation purpose upon the said Lot described as Lands 2098 and 1193.

This notice was posted on the ground the 18th day of August, 1920. A copy of this notice and an application pursuant thereto and to the "Water Act, 1914," will be filed in the office of the Water Recorder at Vernon, B.C.

Objections to the application may be filed with the said Water Recorder or with the Comptroller of Water Rights, Parliament Buildings, Victoria, B.C., within thirty days after the first appearance of this notice in a local newspaper.

E. N. ROWLEY, Applicant, Summerland, B.C.

The date of the first publication of this notice is Sept. 3rd, 1920. 5-9

OTTAWA—During the month of July, 1,547 persons left the United States to live in Canada, according to records kept from Port Arthur, Ontario, to Kingsgate, British Columbia. Of these, 65 were British born, 70 returned Canadians, 1,268 born in the United States, 2 French, 86 Scandinavians, and 58 from other countries. Farmers numbered 418, farm laborers 165, ordinary laborers 50, mechanics 142, railroaders 16, clerks 32, domestic servants 19, miners 17, professional men 18, women and children 620, and others 50. They brought with them \$423,739 in cash, and effects valued at \$83,753. Of these immigrants, 69 had Ontario destinations, 354 were for Manitoba, 355 for Saskatchewan, 690 for Alberta, and 79 for British Columbia.

OTTAWA—This month a trans-Canada air flight will be attempted commencing at Halifax and flying to Vancouver, with stops at Sault-Ste-Marie, Winnipeg, Calgary and other places. It is estimated that the trip can be made in between 40 and 50 hours, including the time of stoppages, but much depends on the kind of weather encountered. The flight will be made partly by seaplane and partly by airplane.

OTTAWA—During the first six months of the present year, Canada threw open her doors to 68,857 emigrants, of whom 37,261 were from the United Kingdom and 25,183 from the United States. Settlers from the United States brought, with them more than \$6,000,000 in cash and goods worth about \$2,000,000.

Synopsis of Land Act Amendments

Minimum price of first-class land reduced to \$5 an acre; second-class to \$2.50 an acre.

Pre-emption now confined to surveyed lands only.

Records will be granted covering only land suitable for agricultural purposes and which is non-timber land.

Partnership pre-emptions abolished but parties of not more than four may arrange for adjacent pre-emptions with joint residence, but each making necessary improvements on respective claims.

Pre-emptors must occupy claims for five years and make improvements to value of \$10 per acre, including clearing and cultivation of at least 5 acres before receiving Crown Grant.

Where pre-emptor in occupation not less than 3 years, and has made proportionate improvements, he may, because of ill-health, or other cause, be granted intermediate certificate of improvement and transfer his claim.

Records without permanent residence may be issued, provided applicant makes improvements to extent of \$300 per annum and records same each year. Failure to make improvements or record same will operate as forfeiture. Title cannot be obtained in less than 5 years, and improvements of \$10 per acre, including 5 acres cleared and cultivated, and residence of at least 2 years are required.

Pre-emptor holding Crown grant may record another pre-emption, if he requires land in conjunction with his farm, without actual occupation, provided statutory improvements made and residence maintained on Crown granted land.

Unsurveyed areas, not exceeding 20 acres, may be leased as homesteads; title to be obtained after fulfilling residential and improvement conditions.

For grazing and industrial purposes areas exceeding 640 acres may be leased by one person or company. Mill, factory or industrial sites on timber land not exceeding 40 acres may be purchased; conditions include payment of stumpage.

Natural hay meadows inaccessible by existing roads may be purchased conditional upon construction of a road to them. Rebate of one-half of cost of road, not exceeding half of purchase price, is made.

PRE-EMPTORS' FREE GRANTS ACT

The scope of this Act is enlarged to include all persons joining and serving with His Majesty's Forces. The time within which the heirs or devisees of a deceased pre-emptor may apply for title under this Act is extended from one year after the death of such person, as formerly, until one year after the conclusion of the late war. This privilege is also made retroactive.

No fees relating to pre-emptions are due or payable by soldiers on pre-emptions recorded after June 26, 1918. Taxes are remitted for 5 years.

Provision for return of moneys accrued, due and been paid since August 4, 1914, on account of payments, fees or taxes on soldiers' pre-emptions.

Interest on agreements to purchase town or city lots held by members of Allied Forces, or dependents, acquired direct or indirect, remitted from January 1 to March 31, 1920.

SUB-PURCHASERS OF CROWN LANDS

Provision made for issuance of Crown grants to sub-purchasers of Crown Lands, acquiring rights from purchasers who failed to complete purchase, involving forfeiture, on fulfillment of conditions of purchase, interest and taxes. Where sub-purchasers do not claim whole or original parcel, purchase price due and taxes may be distributed proportionately over whole area. Applications must be made by May 1, 1920.

GRAZING Grazing Act, 1919, for systematic development of livestock industry provision for grazing districts and range administration under Commissioner. Annual grazing permits issued based on numbers ranged; priority for established owners. Stock owners may form associations for range management. Free, or partially free, permits for stockmen, campers or travellers, up to ten head.

MOTORS AND MOTORING:

A Page Full of Interest to the Owner or Prospective Owner of an Automobile. Happenings in the Motor World.

RURAL EXPRESS AND THE PUBLIC HIGHWAY.

Modern Nations Might Well Follow Example of Ancient Rome—Must Build System of Highways

It has been said that when things have grown so old that they are almost forgotten they again become new and are adapted to meet our present-day needs. Transportation over the highways is one of them. It comes to us from the misty past. We have always held to the highways in a sense, but in our endeavor to modernize things we have neglected highway transportation to our detriment, and almost, we might say, to our peril. In a way this neglect has not been intentional, for the reason that in these days of rapid progress we have not had a proper medium to use over them until the advent of the motor truck.

We have witnessed the opening up of the West by the prairie schooner. We have seen how the waterways have served in building up a mighty nation, and how the railroad has made us a homogenous nation.

It is all in the march of events and now after centuries of neglect we again turn to the highways for the proper solution of our transportation problems today.

Rome could never have attained her pristine greatness without the aid of her highways. She could not have aspired to imperial domination of the world if it had not been for the great military highways, which brought remote parts within easy reach of the seat of empire, and which made the old saying, "All roads lead to Rome," a true one.

Her highways were so well built that they have weathered the lapse of time and today stand as a monument to her everlasting credit.

We should build, as Rome built, a system of highways that will bear the burden of war if need be, and carry the commerce of the world without a break.

Rails will carry just as much and more, but the highways, with the motor transport and efficient system of rural motor express, can and will bear any burden thrust upon it, but the highways are the natural arteries, while the motor truck is the transportation medium that will bind us all together as a nation.

MOIST AIR HARMFUL TO AUTOMOBILE TIRE

Now and then in the course of an automobile trip a car has to pass through a stream, and the question is sometimes discussed whether the action of the water is harmful to the tires. The same question arises when a car is out in a heavy rain.

A large tire company answers the question by stating that the effect of such a wetting is practically nothing at all, either for damage or improvement. At any rate, the effect on the tire is not harmful. The two chief constituents of a tire are rubber and cotton; both vegetable substances, and as a rule water does not injure vegetable matter.

If running through a brook resulted in cooling a tire, the effect would be decidedly beneficial, but a quick dash through the water has little effect on the heated air within the tire and consequently the temperature change in the tire after its bath is negligible.

Water itself apparently does no harm to tires, but the combination of air and moisture commonly known as humidity is very destructive, especially on the cotton in ordinary fabric tires. The moist air works in between the layers of fabric and rots them out, sometimes even before the tires leave the dealer's storeroom.

The harmful effect of moist air is the chief reason why when tires are stored they should be kept in a dry atmosphere. As sunlight is harmful, the storage place should be dark.

NEW TRAFFIC CODE FOR PEDESTRIANS

The following rules for pedestrians were proposed by Eddie S. Wilman, chief clerk, City Engineering Department, Rochester, N.Y.:

Rule 1.—Pedestrians crossing boulevards at night shall wear a white light in front and a red light in the rear.

Rule 2.—Before turning to the right or the left the pedestrian shall give three short blasts on a horn at least three inches in diameter.

Rule 3.—When an inexperienced driver is made nervous by a pedestrian he shall indicate the same and the pedestrian shall hide behind a tree until the automobile has passed.

Rule 4.—Pedestrians shall not carry

"ROAD HOG" GROWS IN PUBLIC DISFAVOR

Motorists Should Observe With More Care Some of the Simple Rules of Fairness and Safety

With the rapid increase of motor travel on the nation's highways, there is a growing demand that all motorists observe with greater care some of the simple rules of fairness and safety.

The driver who refuses to show courtesy to other cars is growing in disfavor, and his unpopularity bids fair to increase rather than grow less.

One of the most despised types of discourteous driver is the one termed "road hog." He is the fellow who insists on taking two-thirds of the road when you meet him, or who refuses to turn out so you can get by when you overtake him. By his tactics he not only takes joy out of the lives of other motorists but also actually endangers their safety.

In their pockets any substances which when broken will be apt to cut automobile tires.

Rule 5.—In dodging automobiles pedestrians shall not run more than seven miles an hour.

Rule 6.—Pedestrians shall register at the beginning of each year and pay a license fee of \$5.00.

Rule 7.—Pedestrians will not be allowed to emit cigarette smoke on any boulevard in an offensive and unnecessary manner.

Rule 8.—Each pedestrian before receiving his license to walk upon a boulevard must demonstrate before an examining board his skill in dodging, leaping, crawling, and extricating himself from machinery.

Rule 9.—Pedestrians will be held responsible for all damage done to automobiles or their occupants in collision.

Bracing Running Board

To give the running board of the Ford car the stiffening it usually needs, bolt the ends of an old iron bed rail just behind the front fender. Long hooks are next connected to the centre of the rail and to the frame of the car. This gives the running board the bracing it needs.

FIND RATTLE

If the grease cups of the car have not been neglected, one of the main sources of trouble has been avoided. However, many an elusive rattle or squeak may come from some other cause.

For instance, loose bolts. The fender may rattle, or the lamps, or the radiator, and often even the engine may work loose and give out a roaring, out-of-balance sound. The cure for these is to keep all bolts and nuts tight.

Also, watch the brake link rods. Squeaks here are hard to find, but can be detected by coasting down hill with someone on the running board.

The hood clip may squeak or the windshield rattle, but most elusive is the top. A squeak from there is like the croak of a frog in a swamp. It's there, and then it isn't.

The best preventive is oiling wherever metal parts touch.

DANGERS OF CRANKING

In the table published by the Travelers in its recent bulletin, showing accidental claims paid during 1919, next to occupational of 6,139, automobiles headed the list with 2,681, amounting to \$450,741. The automobile accidents are classified, and cranking heads the list with 792, for \$65,737; collisions come next with 514, for \$150,513; skidding and ditching, 341, for \$114,585.

BLAMED SPEED TO POOR GAS

WILLIAMS, Cal.—Claiming that his speed was enforced because he was operating his machine upon a mixture of kerosene and gasoline and could not travel less than 20 miles an hour, a San Francisco motorist, who gave the name of Cannon, pleaded with the justice of the peace here not to be fined. The judge said the plea was unusual, but relented to the extent that the fine was made a nominal one of \$10, when the autoist, who said he was a travelling salesman, explained the mixture of the two oils was necessary because of his inability to obtain a sufficient supply of gasoline.

UNEVEN FIRING

Many people wonder why their cars do not always run as smoothly as they think they should, but a great deal of this trouble is due to uneven firing. Using different makes and styles of plugs in the different cylinders, or even if they are all of the same make and one or two of them happen to be partly fouled or shortened it is liable to make a motor run poorly, owing to weakness and lack of steadiness in its firing power.

Fill Small Tire Tears

A small tire tear should be filled with putty and a large one should be vulcanized. Careful care of the tire will add hundreds of miles to their lives.

NEW SCHEDULE OF THE LAKESHORE STAGE

SOUTHBOUND	
Leaves Kelowna	9.00 a.m.
Arrives Peachland	10.30 a.m.
Summerland	11.30 a.m.

WRITER REJOICES IN MODERN WOMAN

"Fifty years ago we were told that our women were over-feminine. Today we are told that they are becoming masculinized. Apparently we are on the eve of the deterioration of both sexes, the subjection of man and a complete revolution in the social status of man and woman," says a writer in the London Daily Mail.

"The improved physical development of the rising generation of women is surely not a cause for lamentation. Strength is quite compatible with beauty, sympathy, and tenderness in women, and frailness of body and semi-invalidism do not always ensure the virtues known as distinctly feminine.

"Nor need we fear the intellectual advancement of women so long as education is humanistic, broad, and sane. A girl can retain all the charm of femininity and even enhance it by a truly liberal education.

"The flagrant defect of the woman of the era when physical attractiveness was considered the chief or only charm was insipidity. Nowadays women are beginning to recognize that a vacuous mind lends no beauty to the countenance, and that a lively intelligence is in itself a valuable feminine asset.

"I grant that a proportion of women in revolt against the old order tend to mimic the manners and customs of men. They affect masculinity as a protest against over-femininity, and frequently render themselves ridiculous by their attempt to combine an air of manliness with an exacting demand for man's continued chivalry and courteousness.

"I cannot discover an alarming decrease of womanliness. Despite the bodily and mental development of the women of today, the great majority of my sisters retain the engaging, bewitching, variable character-

ANNOUNCEMENT

The Office of
Dr. C. J. COULTAS
 DENTIST
 is temporarily located at the HOTEL SUMMERLAND awaiting completion of the Johnston Bldg., West Summerland, where he will be permanently established.

Tourist traffic to the province from the United States has been easily 300 per cent. greater this year than ever before, according to figures given out by the Tourist Information Bureau.

istics that we recognize as specifically womanly.

"I can discern no sign of a diminishing interest in personal adornment. The wisest of our 'sweet girl graduates' cannot resist the entertainment of a milliner's shop window.

"A woman B.Sc. to whose lecture I listened a few days ago was attired in the newest fashion. The strongest minded women are still wont to fall in love, to marry, and to exhibit maternal feelings in a quite natural manner.

"There is the same April tendency that has provided problems for man throughout the ages. Sweet moods, tears, tantrums, vanity, music, self-sacrifices, sensitivity, intuition, fortitude and timidity—all these manifestations of femininity remain in spite of higher education and rapid body growth in youth."

HOW A MONKEY PICKS FRUIT

In Borneo there is a very intelligent monkey called a macaque, or brok. The animal is trained by the Malays to gather coconuts. In his book, "A Naturalist in Borneo," Mr. R. W. C. Shatford tells how this is done. A cord is fastened around the monkey's waist and it is led to the coconut palm, which it rapidly climbs. It then lays hold of a nut, and if the owner judges the fruit to be ripe for plucking, he shouts to the monkey, which then twists the nut round and round till the stalk is broken and lets it fall to the ground. If the monkey catches hold of an unripe fruit, the owner tugs the cord and the monkey tries another. I have seen a brok act as a very efficient fruit-picker, although the use of the cord was dispensed with altogether, the monkey being guided by the tones and inflections of his master's voice.

TOO TIGHT

Johnny—"These pants you bought for me are too tight."
 Mother—"Oh, no, they aren't."
 Johnny—"They are too, mother. They're tighter'n my own skin."
 Mother—"Now, Johnny, you know that isn't so."
 Johnny—"It is too. I can sit down in my skin, but I can't sit down in my pants."

TRULY A SORROWFUL TALE

Consider now the Editor. Yea, consider the Editor: he weareth purple and fine linen. His abode is amongst the mansions of the rich. His wife hath her limousine and his first-born sporteth a racing car that can hit her up in forty flat.

Lo! All the people breaketh their necks to hand him money. A child is born unto the wife of a merchant in the bazaar. The physician getteth ten golden plunks. The Editor writeth a stick-and-a-half and telleth the multitude that the child tippeth the beam at nine pounds. And the proud father giveth him a Cremona.

Behold, the young one groweth up and graduateth. And the editor putteth into his paper a swell notice—yea, a peach of a notice. He telleth of the wisdom of the young woman and of her exceeding comeliness. Like unto the roses of Sharon is she, and her gown is played up to beat the band. And the dressmaker getteth two score and four iron men and the Editor getteth a note of thanks from the sweet girl graduate. The daughter goeth on a journey. And the Editor throweth himself on the story of the farewell party. It runneth a column solid. And the fair one remembereth him from afar with a picture card that costeth six for a jitney.

Behold, she returneth, and the youth of the city fall down and worship. She picketh one, and lo, she picketh a lemon. But the Editor calleth him one of our most promising young men and getteth away with it. And they send unto him a bid for the wedding feast, and, behold, the bids are printed by Montgomery Hawbuck in a far city.

Flowery and long is the wedding notice which the Editor printeth. The minister getteth ten bones. The groom standeth the Editor off for a twelve-month subscription.

All flesh is grass and in time the wife is gathered unto the soil. The minister getteth his bit. The Editor printeth a death notice, two columns of obituary, three lodge notices, a cubit of poetry and a yard of thanks. And he forgetteth to read proof on the heading, and the durn thing cometh out, "Gone to her last roasting place!"

And all that are akin to the deceased jumpeth on the Editor with exceeding great jumps. And they pulleth out their ads and cancelleth their subscriptions, and they swing the hammer unto the third and fourth generations.

Canst thou beat it!—Rural Canada.

SECOND SLIDE HITS HOUSE

H. C. Mellor's Lake Shore Property Again Suffers

NO ONE HURT

Highway Barely Passable—Water and Mud Still Flow

In the Review of last week was given an account of a slide on the Lakeshore Road, north of Peach Orchard, which fell on the highway directly behind H. C. Mellor's barn, moving his buildings some distance and causing havoc generally. But that slide was a small one as compared with one that came down on Friday afternoon and which buried the road many feet deep and which reached well across Mr. Mellor's property, and the outer edge of which was checked by his house, to which much damage was done. The huge volume of earth was the top soil of the cliff more than 100 feet above, and when it broke away, thoroughly saturated with water, it brought with it several apple trees and shot out from the face of the cliff and fell down the cliff side, where it seemed to rebound and spread over the road and across the Mellor property. The stable was shoved a further six feet from its original position; several fruit trees were torn up; bee hives buried, and piping which had been laying in the yard and other material were carried across to the house. There, doors and windows were smashed and earth piled up in the back porch and thrown through the broken windows to the other side of the house.

Fortunately no one was in the house or yard when the huge mass of earth came down, else the result might have been much more serious. The house has not been occupied since the second slide occurred. Mr. and Mrs. Mellor staying with their friends, but returned at once.

Mr. Mellor has been busy ever since, with the help of two men and a team, clearing away the earth from his yard.

The road is still buried deep, but by cutting around on the shoulder of the slide over the site of the Mellor stable, a passageway has been made over which cars are passing, but frequently they become stuck in the mud on one side or the other of the slide.

Mr. Mellor advised Road Foreman McAlpine soon after the second slide, of the condition of the road, but the latter refused to do anything toward removing the slide, but later he received instructions from Victoria to keep the road open.

There will be much material to be moved before the original road can be cleared. There is still quite a stream of water trickling over the cliff, but while it is thought that more earth may come down, it is not believed that it will be in any great volume. The grey clay, of which so many of our cliffs are formed, seems to have been little affected by water, as none of the face of the cliff has come down, the earth which has fallen being of excellent orchard material.

The road now blocked by the slide is on a section of the Lake Shore drive built by the Provincial Government and, beyond the fact that it lies within the municipal limits, cannot be considered a municipal thoroughfare. Consequently, the municipal authorities do not look upon clearing the road, as in any way their responsibility. The situation has been laid before the provincial authorities, in a letter from the municipal office.

Officer: "Can you tell me, Corporal Murphy, what a blank file is?"
Murphy: "Yes, sir, I can. A blank file is an empty space between two men occupied by the man that's not there!"

Titus Titmouse was infuriated, but the editor of The Western Wind shut him up in two seconds.
"Is this the newspaper office?" inquired Mr. Titmouse.
"It is," responded the man at the desk.

"Didn't this paper say I was a liar?" and he began prancing.
"It did not."
"Didn't it say I was a scoundrel?"
"It did not."
"Well, some paper said it."
"Possibly it was our contemporary down the street," suggested the editor, picking up a paper weight.
"This paper never prints stale news!"

ORCHARD SOIL FERTILITY

In order to study at first hand the problem of soil fertility and its relation to the annual cropping of apples, a party of Okanagan growers are leaving Penticton by motor on the morning of October 8th, weather permitting, for Wenatchee, Wash.

This party is being arranged by the horticultural branch of the Department of Agriculture, and will be conducted by Mr. R. H. Helmer, Summerland, and Mr. W. T. Hunter, District horticulturist. Arrangements are being made to have the party met at Wenatchee by those engaged in the State horticulture work and who are in a position to give the party the very best of advice, and it is hoped that much useful information will be gathered.

The problem of securing an annual crop of apples is one in which every grower in the Okanagan Valley is interested, and as the Wenatchee growers have solved this problem to a greater extent than in most other sections, these excursions give the Okanagan growers a splendid opportunity to investigate their results and study their methods at first hand.

A cordial invitation is extended to every grower in the Okanagan to join this party, and anyone desiring to take in the trip should notify their District Inspectors at least three days ahead in order that arrangements can be made for transportation and accommodation en route.

UNITED FARMERS OF TROUT CREEK

Valuable Paper on Production of Apples—Hear J. W. S. Logie on Socialism

A goodly number of Trout Creek residents and visitors gathered at the school house for the September meeting of the Trout Creek Local of the U.F.W.C. on the evening of the 21st.

Mr. S. F. Sharp in his address on "The Production of Apples from Your Packing Charges" gave excellent advice which might be summarized under five heads: (1) Attention to and thorough cultivation of the soil; (2) judicious pruning; (3) spraying at the right time; (4) conscientious thinning; (5) picking of fruit in the cooler hours of the day.

Mr. Sharp concluded his instructive address by advising fruit-growers to cut out the poorer varieties by top grafting or budding, and to let Summerland be known far and wide as the home of good standard varieties.

President H. Smith then called on Mr. J. W. S. Logie to address the meeting on "Current Events" from the standpoint of the laboring and farming classes.

Mr. Logie reviewed the political situation in several European countries and pointed out the indications of the growth of the Labor movement and the increasing insistence and persistence of those who are weary of the existing order of things whereby Capital rules, and rules to its own advantage.

As in those other countries, so also in Canada, the burning question was not tariff but government—whether the Big Interests or the people should rule. The speaker drew attention to the evils of the present system of trade, where the guiding principle is either monopoly in the interests of a few or adverse competition—adverse to the producer and consumer, whereas the new order of things as advocated by Labor would for these evils substitute co-operation for the good of all.

In concluding his self-styled "rambling" and yet very interesting remarks, Mr. Logie made a plea for Farmer and Laborite, whose interests as producers and consumers were in the main identical, to get together on a common platform and so work for the welfare of the vast majority.

It need hardly be added that to both of the speakers the meeting accorded expressions of sincere appreciation.

BANK CHIEFS HERE MONDAY

Heads of Dominion Bank To Visit Summerland

Will Be Shown Over District and Much of Valley

Summerland will be visited on Monday by seven of the head officials of the Dominion Bank, perhaps the largest delegation of bank officials that ever visited this province in a single group. The party has been visiting a number of centres in B.C. and will arrive here from the Coast in their private car "Boston" on Monday morning's train. They are C. A. Bogert, Toronto, general manager of the Dominion Bank and president of the Canadian Bankers' Association; F. L. Patten, Winnipeg, assistant general manager, Dominion Bank; Sir Augustus M. Nanton, vice-president, and A. W. Austin, R. J. Christie, R. S. McLaughlin and W. W. Near, directors. They will be met by O. F. Zimmerman, manager of the Summerland office of the Dominion Bank, the only branch of that institution in the Okanagan Valley, and will be shown over, as much of the Valley by Mr. Zimmerman, as time will permit.

They will board their car again at Penticton, and continue their journey eastward on Tuesday by way of the Crows' Nest.

POTATO MARKET AGAIN WEAKENING

Kamloops Spuds Selling at \$40—B.C. Canned Crab Has Displaced Jap

VANCOUVER, Sept. 20.—The local potato market is weak, Kamloops offering this morning on Water Street at \$40 per ton, while locals went as low as \$38. Arrivals are plentiful, and the feeling of the trade seems to be that a still lower adjustment is in order.

Malaga grapes are practically off the market, and Tokas have eased off to \$4.50 and \$4.75 per lug. The present weather is not conducive to their ready sale. Tomatoes, peaches, prunes and pears were selling well today, a big outward movement being noted along the Row. Prices are largely unchanged from last week. Green peppers, imported from Seattle, are bringing 15 and 20 cents a pound.

A pooled car of Keremeos Gravenstein, Wealthy and McIntosh Red apples rolled in over the week-end. In addition there was a car of green-gage and other plums from the Okanagan which will sell at from \$2.25 to \$2.50 per fancy 4-basket crate. The banana car reached here Sunday.

Northern B.C. canned crab is now selling, and first indications are that it will entirely replace the Japanese imported product, inasmuch as it has a much finer texture and flavor. The price is \$4.75 per dozen.

Lard is up again. Top-grade eggs are quoted today at 80 to 82 cents.

Everybody should be busy, but no one should be a busybody.

MORE POLITICAL CONVENTIONS

Representatives of the different local organizations throughout the electoral district of Yale will meet at Penticton Monday afternoon with the object of selecting a candidate for the approaching contest for representative in the House of Commons at Ottawa. F. J. Nixon will represent the Summerland G.W.V.A. at Monday's convention.

On the same date a convention of United Farmers will be held at the same place, and it is probable that they will also put a candidate in the field. A. T. Howe of Vernon is mentioned as one whose name will be submitted to the convention, and R. A. Copeland, president of the U.F.W.C., is another possible candidate.

FRUIT VOLUME INSUFFICIENT

Prairie Markets Would Take More of Our Fruit

Market Conditions and Prices at Shipping Points

Dated from Calgary, Market Commissioner Grant's weekly market report reads:

Owing to the heavy rains and train delays in B.C., the supply of fruit and potatoes has been considerably less than the demand, causing a flurry amongst local jobbers. Country trade continues exceptionally good. The car shortage from Eastern points has retarded the trade. Ontario Crawford peaches arrived here in good condition, all except the last car—many of them had to be repacked. Seven cars of Elberta peaches have been placed on order by a Calgary jobber in Ontario.

A car of ripe tomatoes arrived here from the Okanagan and are now in storage awaiting their shipping. They were shipped too green.

Very little complaints are made on the quality or pack of B.C. fruit this year. The only complaint we hear is insufficient volume.

There is a new Potato Growers' Association formed in Edmonton. The spud crop is good in the North, but help is hard to get to dig them.

About 30 cars left Edmonton for Minneapolis last week, the price quoted from Edmonton today being 90c per bushel.

Some very fine Wealthies from B.C. are on exhibition in the fruit store windows.

Washington prunes are over. Idaho is now shipping.

Several car lots of apples are sold from B.C. shippers, but confirmation is still withheld.

Northern vegetables are selling at a low price, which reflects on the B.C. supply on this market. B.C. spuds advanced to \$5.00 per ton this week and a general stiffening in prices may be looked for.

Eggs advanced 50c per case, now quoting at \$18.00.

Dairy butter is moving very slowly with no change in price. Creamery butter advanced 3c per (Continued on Page 4).

RAIN SLACKENS FRUIT PACKING

Will Benefit Late Varieties of Apples

Will Cause Considerable Loss to Tomato Growers

Of crop conditions in the Okanagan the District Horticulturist says:

Armstrong and Enderby. The early cabbages are no longer in demand, although the supply is far from exhausted. There is much loss of early cabbages owing to weak demands this season.

Celery is moving quite satisfactorily in small express shipments. Large orders are not usual, but the growers and shippers are kept busy with the small orders. A few local tomatoes are moving but there are no large growers of tomatoes in this district.

There is a strong demand for potatoes, but growers are not digging much yet. They refuse to sell at the present price. Demand exceeds supply in this case owing to small offerings in price.

Vernon. On account of the inclement weather of the past ten days fruits and vegetables have been very slow in moving in this district. The average for the past week is possibly 14 cars per day, which have been rolling out. Wealthy apples are now in the flush of picking and another week should see this variety practically cleaned up. Packing of McIntosh just started and will be fairly general by the early part of next week. The color, size and quality of this variety is excellent and barring damaging winds during the next ten days will show a good output of fruit running high to No. 1's. Transcendent Crabs are cleaned up and Hyslops are moving out freely. Prunes are still rolling but are past their heavy end, and all other stone fruits are about cleaned up. Ponds Seedling and Yellow Egg are about the only ones left. Neither of these will be a very heavy crop. Judging from the appearance of the stuff which is rolling, they will be of fair quality. The rains and cooler weather of the past week is having good effects on the later varieties of apples which are showing signs of much faster development than has been noticed for some time. Pears are now moving freely and are proving up excellent as to size and quality. The tonnage of this fruit will be good.

Vegetables. The vegetable movement is somewhat slow partly on account of weather conditions and partly on the slow market. Shipments of potatoes are not heavy and prices on this commodity are stiffening. The tubers appear to be of good quality. Crop not as heavy as was expected. The onion harvest is now general, but the movement is slow as the market for this is weak at the present time. The crop is very good and in the majority of cases bulbs are well grown. As it is possible considerable storage of this vegetable may happen over the coming winter, growers should pay (Continued on Page 8)

FRUIT BULKING WELL

Up to the present freight shipments of fruit from Summerland compare favorably with those of the same period last year. Up to a few days ago, when picking was interrupted by showers, the Fruit Union was not much short of its last year's record for the same period. Shipments by other concerns, though not quite as heavy as a year ago, will not fall far behind the total of 1919 shipments for a like period.

Until interrupted by the rain, express shipments of fruit from Summerland have been heavy. Although one or two of last year's large shippers are not in the business this year, it is understood that express shipments are being well maintained as compared with those of a year ago, when they were the largest in the history of Summerland's fruit industry.

Sugar prices are on the downward grade, several changes in price having been made during the past four or five weeks, each change being a reduction. Early this week, the B.C. Sugar Refinery announced a second reduction within a fortnight; the new prices being \$21.00 for refined and \$20.00 for yellow. It was on August 17th that the first reduction was made. For some time previous to that date, the refinery price was \$23.00. Wholesalers are predicting further reductions.

B. C. GAME LAWS TO BE OBSERVED

The Dominion Regulations on Migratory Birds Will Be Ignored

British Columbia game authorities will ignore the laws set forth by the Dominion Government in a bulletin issued under date of June 20, Attorney-General Hon. J. W. deB. Farris has advised the minister of the interior at Ottawa. In a telegram to Ottawa, the attorney-general points out that the migratory birds regulations passed by the Dominion Government not only conflict with the British Columbia laws but are less stringent, and although the official notices from Ottawa have been distributed throughout the province the attorney-general has advised all provincial constables and game wardens to remove them and forward them to headquarters of the B.C. Game Conservation Board.

Dr. A. R. Baker, chairman of the B.C. board, stated today that British Columbia's suggestions concerning the migratory birds regulations were discussed with Mr. W. W. Cory, deputy minister of the interior, during the latter's visit to the Coast this summer, and it was agreed that the B.C. laws were satisfactory in the main and that there should be no drastic changes. The Dominion Government regulations just issued do not conform with the provincial laws, however, and the attorney-general in his wire indicates that the procedure adopted by the Dominion Government in distributing the game law bulletins throughout the province with a request that they be enforced will not be countenanced by the provincial authorities. Serious confusion, he points out, will arise as a result of the action of the department of the interior at Ottawa.

His telegram to Ottawa follows: "Am advised your government passed regulations migratory birds conflicting with our regulations. This contrary to arrangements made between Cory and our department. Harkin without authority from me has instructed our police post notices federal regulations. Such procedure will not be countenanced by this department. Serious confusion will result action your department."

"It was understood that there should be no change in our regulations," Dr. Baker said. "Mr. Cory agreed with all of the principal suggestions proposed by us at our recent convention and it was understood that our laws should remain in effect. The federal laws conflict with ours in a number of instances. Under the former it is permissible to shoot 250 ducks in a season. The B.C. laws allow but 150. Again, the federal government allows the use of the pump gun, while we do not permit the use of more than one cartridge in the magazine of a pump gun. We provide for a maximum penalty of \$300 for violations of the law, while the federal authorities impose a maximum fine of but \$100.

"Under federal laws shooting may be carried on between sunrise and sunset. In British Columbia shooting is not permitted one hour after sun-

TO ESTABLISH EIGHTH ROUTE

School Vehicles Overcrowded—Board Asks for Tenders

THIRD TOWN VAN

Temporary Relief Will Be Put on Next Week

Summerland's rapidly increasing school population is giving the School Board much concern. Temporary class-room accommodation has been provided, but the number of school pupils on the seven motor routes are too numerous for the seven motor vans being operated by the contractors. When the town school was closed this summer it was thought that two vans would be sufficient to transport the children from the town section to the Central School, but the board now finds it necessary to provide further conveyance accommodation. The trustees propose to change the route of the van running from Trout Creek Point. As there is a school there for the younger grades, there are not many children from the Point attending the Central School. These will be brought along the shore road into town. Ten or twelve other children will be picked up there. This will relieve the Hospital Hill and Peach Orchard routes.

The Giant's Head route is also overloaded and to provide for the children in that district who have been riding on the Trout Creek Point van, and to relieve Contractor Rines' route, the trustees are advertising for tenders for an eighth route, running between Munn's corner and Central School.

In the meantime, for the purpose of relieving the congestion, temporary arrangements are being made for further conveyance from Trout Creek via town.

APPLE ESTIMATE SHOWS DECREASE

Will Be Quarter of a Million Barrels Less Than Crop of 1919

The commercial apple crop of the Dominion, despite the large increase in Ontario over last year, now indicates a decrease of one quarter of a million barrels from 1919, according to the September report of the fruit commissioner's branch. The quality of the crop marketed to date is decidedly better than last year.

In British Columbia the crop is now estimated at from 50 to 55 per cent. of 1919. Ontario's exports to the United Kingdom this season will show a substantial increase over the 1919 season, and this with the established markets in the West and Western Quebec, will absorb the balance of the crop at satisfactory prices. Quebec will have only 50 per cent. of a normal crop, while the exportable surplus from New Brunswick will be small.

SUMMERLAND WEATHER REPORT

Below is a report furnished by the Dominion Experimental Station here for the week ending Tuesday:

Date, 1920	Max.	Min.	Rain	Evap.	Sun-shine
Sept. 15	68	51	0.0	2.0
Sept. 16	61	46	0.4	0.0
Sept. 17	77	46	7.6	7.6
Sept. 18	64	53	.01	10.8
Sept. 19	64	41	1.4	1.4
Sept. 20	65	40	.03	4.0
Sept. 21	66	52	.00	4.0

"Woman! You have ruined me with your extravagance. I am penniless. There is only one place for me now. Good-bye. I am going!"

"Where?"
"To the river!"
"Well, you'll be passing the post office. Do you mind posting this letter?"

at and one hour before sunset. Mr. Cory agreed that with more twilight in the West that the British Columbia regulations should apply. We also disagree on the question of open seasons and in this respect they have not conformed with the agreement reached with me at the Ottawa convention in February, 1910. At that time we were informed that we could use our own judgment re the fixing of dates, provided, of course, that they did not conflict with the federal provisions.

Princess Mary inspecting the Girl Guides at St. Andrew's Hall, Norwich, England.

Naramata News

Current Events of Town and District

Mr. Harold Mitchell and his bride came in from Seattle last week.

Hon. Walter Scott and Mrs. Scott of Victoria were the guests of Mr. and Mrs. J. M. Robinson for a few days last week.

Miss Olive Stafford of Vancouver is the guest of Mrs. J. M. Robinson.

Mrs. Aveson has gone to the sanitarium at Kamloops for medical treatment and very favorable reports are being received of her condition.

Mrs. M. B. Smith will speak to the women of Oyama this week on fruit preserving and evaporating.

Mr. J. O. Robinson is here and will visit his people for a couple of weeks and also renew old friendships.

Miss Lily Scott of Brandon, niece of Mrs. J. M. Robinson is paying her first visit to Naramata.

Miss Kenison, who has been nursing in Summerland and Penticton during the past six months, is preparing to return to her home in Vermont the last of this week.

Mrs. R. C. Robinson has been acting as a substitute teacher in the Summerland high school for some time.

Mr. J. W. S. Logie of Summerland came over on Sunday to attend Mrs. Gillespie's lecture.

Mrs. Harold Mitchell held her first reception at her pretty home on Thursday. The affair was well attended and Mrs. Mitchell proved herself a charming hostess.

A number of teas have been given during the week in honor of Mrs. Gillespie and Mrs. Seereiter at the homes of Mrs. W. Nuttall, Mrs. E. Wells, Mrs. D. Walters and a dinner at the home of Mrs. H. P. Salting was also given for them on Sunday.

The young folks are very busy rehearsing for the entertainment which will take place on Monday for the cemetery fund.

Mrs. A. L. Gillespie delivered a splendid lecture in the hall on Sunday night. There was a large attendance and all expressed themselves as being delighted with this most interesting talk.

The Naramata Gymnastic and Athletic Club held their first field day on Saturday and it was a most successful affair. Mr. Ameron, who has been working with the club and acting as instructor in games and contests, had a most complete program of events arranged and the whole list was carried out on time.

Shot Put (open)—Ben Hoy, 1st; Mr. Nagel, 2nd; Harold Mitchell, 3rd.
Field judges on contests were: B. Hoy, W. Hardman, R. Harvey, A. Noyes, F. Manchester.
Starter, H. Mitchell. Clerk of the Course, E. C. Ameron.
The Basketball League (Boys) standing:
Tin Lizzies 760
Sure Fires 692
Never Sweats 684
Red Demons 498
Dorothy Partridge team won the championship in girls' basketball games and Dorothy Partridge was also winner of individual championship medal.
The J. M. Robinson Cup was won by the Tin Lizzies. A medal was won by S. Allen. The Unity Club medal was won by F. Hughes.
After the contests were over a good snappy ball game was played and was won by Roy Anderson's team, the score being 9 to 8. F. C. Manchester, umpire.
At the close of the sports all the contestants lined up in front of the grandstand and were presented with ribbons, medals and the cup by Mr. J. M. Robinson.
The individual championship of the contests for girls was won by Gwen Ameron with 10 points and the same for boys was won by Harold Allen with 17 points.

Some men even like to brag about what they owe.

Boy Scout Column

1st SUMMERLAND TROOP B. P. SCOUTS
Headquarters, Ellison Hall
Scoutmaster: O. F. Zimmerman
Meets every Friday evening at 7.30 p.m.

Arrangements are now being made to transfer Headquarters to the College Gym for winter. With the return of A.S.M. Tees we will now be able to go ahead, again with the P.T. work, which has certainly been missed during the summer months.

Leader Blanchard Munn left for Vancouver Tuesday to begin his course at the University of B.C., and the best wishes of the entire Troop follow him.

With 40 Scouts enrolled and several on the waiting list, there is certainly material for three good basketball teams, basketball, indoor baseball, boxing, etc., being the features of the winter's training. It is proposed also to have one Friday a month devoted to music, when practicing songs, etc., for next year's concert will be done.

We are certainly glad to be able to say that Canada was, after all, represented at the Jamboree, though not by an official detachment. Frank and Billy Adams, sons of Mr. and Mrs. Adams of Caulfield, and members of Chesterfield Troop, North Vancouver, happened to be in London, and with a boy from Winnipeg determined that the Dominion should not go unrepresented in the big rally. Frank carried the Canadian Flag and was also in the guard of honor for Prince Arthur of Connaught when he opened the Jamboree, which was the name selected by Chief Scout Baden-Powell for the boys' gathering.

Everything we are is slowly but surely helping to change the ways of men.

THE WINNIPEG KIDDIES

The funniest and fastest vaudeville show in the world is booked for the Empress Theatre at Penticton on Thursday, Sept. 30.

Canadians who doubt that their own country can produce the best stage talent on the globe are due for a big surprise when they see The Original Winnipeg Kiddies, who have smashed scores of records in both Canada and the United States—and whose history is more astounding and unique than any other show in existence today.

The performance given by these Kiddies is a riot of color and comedy, of melody and mirth. You forget all about them being kids after the first five minutes, and you settle down to enjoy a show that has broken records made by big New York successes.

These kiddies started out when they were about seven years old. Their aim was to raise funds for patriotic purposes. That was in 1915. They played in the villages and small towns, undergoing many hardships without a whimper, and working for years for nothing. In this work, in which they raised thousands upon thousands of dollars for war widows, war orphans and like needs, they gave freely—one of them losing an eye, and two others narrowly escaping death by drowning.

They grew in numbers and talent until they began touring the big cities. When the United States entered the war, the Kiddies were requested to assist American recruiting missions, and made a couple of successful tours of the American Northwest, also playing the cantonments by request of Washington, and creating a veritable furor. They were feted and dined and entertained by governors of states and many other high dignitaries, and always the theatres were packed to the doors. In one big city several business men paid \$100 a seat, knowing that the funds were going to recruiting purposes. But the complete history of this remarkable troupe would require many columns of space. They do not dwell on past records, but on the merit of their show. They are now on a commercial basis.

Judge Ben E. Lindsey was lunching one very hot day, when a policeman passed beside the judge's table. "Judge," said he, "I see you're drinking coffee. That's a heating drink. Did you ever try gin and ginger-ale?" "No," said the judge, "but I have tried several fellows who have."—Christian Intelligencer.

Peachland Doings

A Weekly Chronicle Furnished By Our Local Representative.

Mr. Harrison, manager of the bank here, accompanied by his wife, returned last week after a pleasant vacation trip. He is again on duty and Mr. C. G. McDougald, also of the bank, has started on a couple of weeks' vacation.

Wes. Ramsey has his "bug" fixed up again and is to be seen enjoying the thrills of motoring as per usual.

Mr. J. E. Robinson and family have recently been enjoying a visit from his brother and wife, accompanied by their daughter, from Vancouver.

Miss Jean Dryden has taken a position in the local branch of the Royal Bank of Canada.

Mrs. Martin, who has been residing with Mrs. Morgan, has taken the rooms recently vacated by Mrs. E. House and Mrs. Howell.

Word has been received from the Keyes that they are on their way home via Ford. They expected to arrive this week.

Recent reports show that there is an occasional deer in the country, as some of our hunters have succeeded in dropping one. Several bear stories are in the air around here, but none of them show any hides or hair. However, they undoubtedly have been seen.

Mr. E. Cudmore returned home last week after taking Mrs. Cudmore to Mayo Brothers, Rochester, Minn. Their friends are very much pleased to hear the report brought back by Mr. Cudmore to the effect that her condition is found not to be nearly as serious as it had been feared and she is improving in health. She and their daughter are at present visiting sisters of Mrs. Cudmore in Saskatchewan.

Mr. and Mrs. Wiggins and their little boy and girl spent a few days in town visiting friends and continuing on to the Coast.

After a pleasant visit spent as a guest of Mrs. R. A. F. Moore, Mrs. Wm. Haug returned to Kelowna on Friday.

Mr. Roy McCall, who has been working on the Sicamous for a couple of weeks, spent the week-end with his relatives here, going on duty Monday morning.

Mr. A. J. MacKenzie and Mr. E. R. Nightingale returned home on Friday from Vernon and district. They did not come back as they went, however, having bought a Ford in Vernon and brought it home over the road, to add one more to Peachland's list. They have not as yet succeeded in locating a suitable property for their future home.

Mr. and Mrs. C. Drake have been enjoying a visit from Mrs. Drake's sister and her husband, Mr. and Mrs. J. C. Piles, of Oakland, Iowa. They spent last week-end here, leaving on Tuesday to return home, visiting other points on their way.

Rev. Andrew Grievie of Penticton again visited town on Sunday to fill the Baptist pulpit. He was accompanied by Mr. F. Layton and a couple of other friends from Penticton.

Rev. H. A. Solly of Summerland was in town on Sunday last, taking charge of the service in the Anglican church here.

Mr. Chas. Baker, manual training instructor, and Mr. Welsh, high school principal, both of Summerland, motored up with their wives and several friends, to address a public meeting being held in the Presbyterian church Sunday evening in the interests of Prohibition. Those friends of Prohibition are willing helpers of any district possible for them to help and spoke many helpful words in the course of their addresses. The purpose of the meeting had been to re-organize the local committee and Mr. Welsh spoke on the necessity for organization, explaining how and why, also dealing with many important points of interest in connection with the work. Mr. Baker dealt with some of the pro and con arguments on the Prohibition subject and, altogether those gentlemen gave the gathering much data and information which opened their eyes and made them to see the immensity of the situation in hand. Mr. Welsh spoke on the results obtained from a study of the intellectual deficiency of children. He gave much interesting detail in connection with this important study, which time and space will not permit here, but among other figures he stated that in the neighborhood of three per cent. of the chil-

dren of our province were intellectually deficient and that out of this number 90 per cent. of these were deficient as a direct result of the use of intoxicants by the parents. He also pointed out that it was not only the heavy drinking which caused this result, but also the drinking in moderation as well. It would be well for men, women and children to see to it that this state of affairs was remedied, said Mr. Welsh, so that we might, instead of a deficient people, have increased efficiency. We can help to this end with our ballots. The committee was organized with the following officers and executive: Mr. R. J. Hogg, president; Mrs. Williams, vice-president; H. E. McCall, secretary-treasurer, and Rev. C. D. Clarke, Mr. Ferguson, Mr. J. L. Elliott, Mr. R. H. Huston, Mr. McCleod, Mr. Black, Mr. Cudmore, Mrs. Hogg, Mrs. Murdin, and Mrs. Gummow forming the executive. The executive met following the close of the meeting to appoint working committees to enter on the work at once.

The Misses McIntosh, who have been spending a portion of the summer here with their sister, Mrs. Willis, left on Tuesday evening last to return to their home in Vancouver.

Mr. McLelland paid a short business visit down to Penticton on Tuesday evening last, returning the following morning.

It would seem that there is a good opening in Peachland for someone to put up a few cottages for renting purposes, as it is quite frequent these times that persons wanting houses have great difficulty in securing them, if they get one at all.

The Kokanee run which is on now does not seem to be very good this season, possibly due to the shortage of water in the creeks, but some of the fishermen are having fair success.

Mrs. N. Peck: "From the way you are always whining about matrimony anyone would think that you thought it the worst thing in the world. I bet that if I was to die you would marry again inside of two years, wouldn't you? Well, why don't you answer? You know you would, don't you?"

Mr. N. Peck: "Just you try it and see."

REAL ESTATE

Best values in the district. We have a good young orchard for \$2,000. A good bearing orchard at \$4200; another fine orchard for \$4750, and another 6 1/2 acres with house for \$3,000. One modern house, 6 rooms with bath on 1/2 acre for \$2600. These are values that cannot be surpassed. Let me show you some of these. See our List of other good properties, some with modern homes.

WAS CELEBRATION IN NAME ONLY

Americans Came From Long Distances for Booze

Of the "celebration" at Osoyoos on Labor Day, a report of which recently appeared in this column, the Oroville Gazette says:

"A regular procession of autos and teams passed through Oroville Monday, headed for the promised celebration at Osoyoos, which proved to be a celebration only in name. Customs Officer Grube issued 203 permit cards for vehicles to cross the line and only half a dozen of these cards were issued to drivers of teams, the balance being to auto owners. As each vehicle contained at least five passengers—a very moderate average—over 1,000 people passed through Oroville Monday en route for Osoyoos. These cars came from all parts of the valley, as far south as Brewster and some from a great deal longer distance, for besides the promise of a day's sport there was an opportunity to break the drought that has prevailed in Washington for many years, and judging from the reports received, a large per cent. of the crowd did a vast amount of irrigating. The heira shows the readiness of the average citizen to cut loose from his home surroundings and travel long distances for a touch of excitement, and the tremendous travel further showed that if Oroville had staged a real celebration, with real attractions to amuse a crowd, on Labor Day, an enormous crowd would have responded."

LILLIAN BECK.

one of the members of the Winnipeg Kiddies, the world's most famous juvenile troupe, coming to the Empress at Penticton on Thursday, Sept. 30—matinee at 4:15, night at 8:30. All of these Kiddies have done important stage work in various branches. For instance, little Miss Beck appeared in the film version of Ralph Connor's "The Foreigner."

AUCTION SALE

\$8,000 WORTH OF LIVE STOCK, FARM IMPLEMENTS & HARNESS

I am instructed to sell by Public Auction, at the Ranch of G. L. Courtenay, six miles south of Keremeos and one mile south of Cawston, in the South Similkameen,

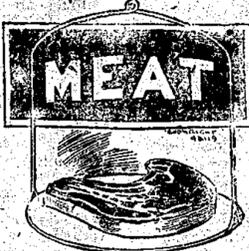

Thursday, September 30th, 1920

at 1 o'clock in the afternoon, the following Live Stock, Farm Implements and Harness:

Corporation of the District of Summerland

ASSESSOR

Applications are invited for the position of Assessor for the 1921 Assessment of the Municipality.

Applications, stating remuneration required, to be forwarded to the undersigned (from whom any further information can be obtained) on or before Monday, 27th inst.

18th Sept., 1920.

F. J. NIXON,
Municipal Clerk.

CORPORATION OF THE DISTRICT OF SUMMERLAND

BY-LAW NO. 125

A BY-LAW to enable the Corporation of the District of Summerland to raise by way of loan the sum of Three Thousand Dollars (\$3,000) for school purposes.

WHEREAS, it is deemed expedient to borrow the sum of Three Thousand Dollars (\$3,000) for the purpose of erecting a temporary classroom for school purposes.

AND WHEREAS, it is necessary for the purposes aforesaid to raise by way of loan upon the credit of the said Municipality the sum of Three Thousand Dollars (\$3,000) payable on the First day of November, 1930, bearing interest in the meantime payable half-yearly at the rate of six per cent. (6 per cent.) per annum, the principal of such loan when raised to be applied for the purposes aforesaid.

AND WHEREAS, the said amount of Three Thousand Dollars (\$3,000) is the amount of the debt which this By-law is intended to create.

AND WHEREAS, for the payment of the said principal it is necessary to raise the sum of Two Hundred and Forty-nine Dollars and Eighty-seven Cents (\$249.87) by rate in each and every year.

AND WHEREAS, for the payment of the said interest it is necessary to raise the sum of One Hundred and Eighty Dollars (\$180.00) by rate in each and every year.

AND WHEREAS, the amount of the whole rateable land and improvements of the Corporation of the District of Summerland according to the last revised Assessment Roll is Three Million, One Hundred and Twenty-four Thousand, Nine Hundred and Seventy-six Dollars and Fourteen Cents (\$3,124,967.14).

AND WHEREAS, the total amount of the existing debenture debt of the said Corporation of the District of Summerland is Four Hundred and Forty-six Thousand, One Hundred Dollars (\$446,100.00), of which none of the principal or interest is in arrears.

NOW, THEREFORE, the Municipal Council of the Corporation of the District of Summerland in open meeting assembled, enact as follows:

(1) It shall be lawful for the Reeve of the said Corporation of the District of Summerland to raise by way of loan from any person or persons, body or bodies corporate, who may be willing to advance the same on the credit of the Municipality by way of the Debentures hereinafter mentioned, a sum of money not exceeding in the whole the sum of Three Thousand Dollars (\$3,000) and to cause all such sums so raised and received to be paid into the hands of the Treasurer of the Corporation of the District of Summerland for the purposes and with the objects hereinafter recited.

(2) It shall be lawful for the Reeve to cause any number of debentures to be made for a sum not exceeding One Thousand Dollars (\$1,000) each, bearing interest at the rate of Six per cent. (6 per cent.) per annum, not exceeding in the whole the sum of Three Thousand Dollars (\$3,000) and all such debentures shall be sealed with the seal of the said Corporation, signed by the Reeve and counter-signed by the Treasurer of the said Corporation.

(3) The said Debentures shall bear date the First day of November, 1920, and shall be made payable in ten years from the date thereof, at the Agency of the Bank of Montreal at Summerland, British Columbia.

(4) The said Debentures shall have coupons attached for the payment of the interest at the rate of Six per cent. (6 per cent.) per annum on the amount of the said Debentures and such interest shall be payable half-yearly on the First days of the months of May and November in each and every year and the signatures to such coupons may be either written, stamped, printed or lithographed.

(5) An amount shall be raised and levied annually by a rate sufficient therefor on all the rateable land or land and improvements within the Municipality, in addition to all other rates, to pay interest on the debt hereby created during the currency of the said Debentures and to provide for the payment of the said debt when due.

(6) The sum of One Hundred and Eighty Dollars (\$180) shall be raised and levied annually by a rate sufficient therefor on all the rateable land or land and improvements within the Municipality in addition to all other rates for the payment of the interest on the said Debentures.

(7) The sum of Two Hundred and Forty-nine Dollars and Eighty-seven Cents (\$249.87) shall be raised and levied annually by a rate sufficient therefor on all the rateable land or land and improvements within the Municipality in addition to all other rates for the payment of the debt hereby created when due.

(8) This By-law shall before the final passage thereof receive the assent of the Electors of the said Corporation of the District of Summerland in the manner provided for by the Municipal Act, 1914, and Amending Acts.

(9) This By-law shall come into force and take effect on the First day of November, 1920.

(10) This By-law may be cited for all purposes as the School Loan By-law, 1920.

DONE AND PASSED by the Municipal Council the Fourteenth day of September, 1920.

RECEIVED THE ASSENT OF THE ELECTORS of the Corporation of the District of Summerland the day of 1920.

RECONSIDERED AND FINALLY PASSED by the Municipal Council the day of 1920.

Reeve. Clerk.

TAKE NOTICE that the above is a true copy of the proposed By-law upon which the vote of the Municipality will be taken on Wednesday, 29th September, 1920, between 9 o'clock a.m. and 7 o'clock p.m.

THE POLL will be held at the following places:
Municipal Office, West Summerland, B.C.
W. J. Robinson's Office, Summerland, B.C.

PUBLIC NOTICE is hereby given that the vote of the Electors of the Corporation of the District of Summerland will be taken on the above-mentioned By-law at the time and place above mentioned.

F. J. NIXON,
Municipal Clerk.

Corporation of the District of Summerland

The Summerland Review

Established August, 1908

Published at Summerland, B.C., every Friday by THE REVIEW PUBLISHING COMPANY, LIMITED
Ralph E. White, Editor and Manager

An independent family newspaper covering Peachland, Summerland and Naramata and adjacent districts.

Subscription Rates—In British Empire, in advance, \$2.50 per year; six months, \$1.40. To U.S.A. and other countries, \$3.00 per year.

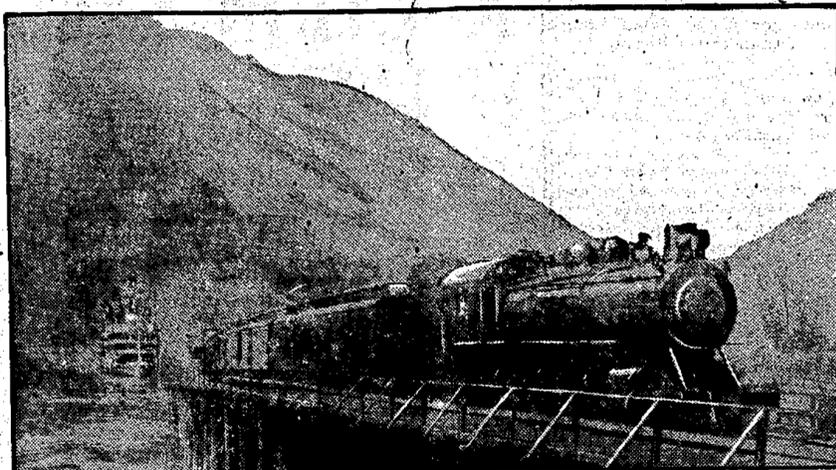

Advertising Rate Cards and information respecting territory and samples of paper mailed upon request, or may be seen at the office of any advertising agency recognized by the Canadian Press Association.

Advertisers must have copy in by Wednesday noon in order to insure changes for standing advertisements. New display advertising copy can be accepted one day later.

Correspondence—Letters addressed to the Editor and intended for publication must be short and legibly written on one side of the paper only. The longer an article, the shorter its chance of insertion. All communications must bear the name of the writer, not necessarily for publication. The publication or rejection of articles is a matter entirely in the discretion of the Editor. No responsibility is assumed by the paper for the opinions expressed by correspondents.

Kootenay and Its Mines

C. P. R. Train at Kootenay Landing Connecting With the Steamer Nasookin, From Nelson.

The trade travel and exploration of the Kootenay are a romance of progress. The day of the fur trader gave way to that of the placer-miner. In passing, the placer-miner left beside his trail of rocker, and sluice, shaft and drill, a still deeper mark on the country and its future. He stayed long enough to make history. The Toad Mines, near Nelson, discovered in 1886, saw a great stampede. The discovery of the Silver King Mine, about 1887 by Hall Brothers, and its development, was the beginning of Nelson, and following the arrival of the miners, a townsite was laid out. The Granite Poor Man Mine, developed as a gold mine, was first worked by Lincoln Davenport in 1889. He built the first stamp mill and the whole was in operation about 25 years and produced an immense amount of gold. The "Molly Gibson," twelve miles north of Nelson, a silver lead mine was developed on a large scale and is owned and operated by a Trail enterprise. The "Ainsworth," on the main Kootenay Lake, 23 miles north of Nelson, is one of the first developed mining camps, dating back to 1885 and opened by Mr. Ainsworth. This is a free silver mining district and has natural hot springs. A visit to the Board of Trade rooms in Nelson is of interest. Typical of the district, attractive ore exhibit cases line the walls and tell of the local mineral riches. There are specimens from Slocan City, Ymir, Lardeau, Boundary, Sheep Creek, Fort Steele, East Kootenay, and there are smelter products from Trail. Fort Steele is of historical interest, as one of the oldest towns in the province. Old-timers even claim that it put British Columbia on the map. It was named after the late Major-General Sir Samuel Steele, who commanded the North West Mounted Police in Western Canada for many years. A detachment of Mounted Police was stationed there in the early days and the barracks still remain. In 1864, it was the scene of one of the most phenomenal gold rushes in history and, in less than two years, many millions of gold were taken out of Wild Horse Creek. Many big game parties outfit there before proceeding on hunting expeditions. In the early days travel was difficult. The first mails went into Nelson on the back of a mule and all supplies were brought in by pack train—a string of mules. On these narrow trails around the mountains, the sure-footed mules were a marvel.

FRUIT VOLUME

INSUFFICIENT

(Continued from Page 1.)

lb., the price now being 62c per lb. and 58c for straights.

No. 2 Creamery is quoted at 58c per lb.

The weather is cool and clear with frosts. Potato digging is being advised by experts to prevent being caught in a freeze, such as was the case last year.

Nova Scotia Gravensteins, are being quoted \$6.00 per barrel for No. 1 and No. 2, and Domestics are quoted at \$5.00 per barrel f.o.b. Nova Scotia shipping points. They will not sell No. 1's and No. 2's with a proportion of Domestics.

Alfalfa hay, second cutting, is being offered at \$28.00 per ton f.o.b. Brooks and Lethbridge.

Thirty cars of Edmonton spuds

rolled to Minneapolis last week. Ed-

monton now quoting 90c per bushel.

Winnipeg

Last week probably the finest car

of peaches ever received from B.C.

arrived on this market, being Early

Crawfords from Penticton Co-opera-

tive Growers and wholesaling at

\$3.00. Two cars of Transcendents

also cleaned up very nicely this past

week; some cars of apples from B.C.

on the market, mostly Duchesse but

some Wealthies, poorly colored. The

first car of McIntosh in from Wash-

ington, fair color, selling at \$5.00;

very little other B.C. fruit, as Ontario

soft fruits coming strong yet.

Wholesale prices:

Ontario—

Plums, blue, Greengage, 11 qts.,

\$1.25 to \$1.50

Pears Bartlett, 11 qts., 1.50 to 1.75

Apples, Duchesse, crate 3.00

Apples, Duchesse, box 3.50 to 4.00

Crab Apples box 2.50

Imported—

Apples, Gravensteins, Wealthies 4.50

Pears, Bartlett 5.50

Plums, 4 bskt. 2.75 to 3.00

Italian Prunes 4 bskt. 2.75

Italian Prunes, box 1.75

Arrivals—Ontario, 3 cars apples,

5 cars mixed fruit, 1 car plums; B.C.:

6 cars apples, 1 car crabapples; im-

ported: 2 cars apples, 4 cars pears,

2 cars prunes, 1 car mixed fruit.

Vancouver

Rains interfered with the move-

ment of fruit and vegetables from

Water Street Row this week reducing

the movement far below expecta-

tions; the accumulated perishables

may have to be cut in price to be

moved. Pears are the best sellers.

Plums and peaches are the slow

factors. Kereomeos sent in two mixed

cars of toms and apples. Peaches

and pears came from Wenatchee, and

a car of peaches (Salway) from Cal-

ifornia. With the fine crop of Okla-

hogan onions, one wonders at this

town having to buy Walla Walla

stock. Well graded stock is popular

Wholesale prices:

Apples, per box \$2.00 to \$4.50

Pears, per box 2.00 to 5.00

Peaches, per box 2.50

Plums, per box 1.25 to 2.25

Peppers, lb.15

Eggplant, lb.30

Cantaloupes, standard crate 3.50

Grapes 3.50 to 5.00

Cukes, per doz. 50c to 1.00

Onions, per sack 2.25 to 2.50

Tomatoes, per box 1.25 to 2.00

Celery, doz. 1.00

Potatoes stiffening considerably

since last week. They are now

wholesaling at from \$35.00 to \$40.00

Onions

The market for onions will be

rather slow at shipping time owing to

the congested state of the onion mar-

ket in the East. Onion growers

should give extra special care in har-

vesting onions, to see that they are

well graded and cured. The best

way to meet the present situation is

to feed the market from storage.

Buyers will hesitate to buy in great

quantities ahead unless at a price

that will be hard on the growers.

Onions that are not well cured or

small should not be stored, but sold

now.

Potatoes

We have seen some fine potatoes

of the Nettle Gem variety from B.C.

The grading left nothing to be de-

sired; these spuds sold at retail for

7 lbs. for 25c; while ungraded sold

8 lbs. for 25c, and at that difference

in price the graded spuds were the

best buy; they were all sold out be-

fore the ungraded stock commenced

to go.

This is a year to feed the market

with spuds. We do not anticipate

that there will be a gold mine in stor-

ing large quantities of spuds this

year; however, the crop is not out of

danger from frost and the situation

will be influenced by the condition at

pitting time.

Social unrest is sometimes sheer

laziness.

The REVIEW

Job Printing Department

Correspondence

To the Editor of The Review:

Dear Sir.—May I be allowed the use of your columns to draw attention to the terrible state of affairs in Northern China, as set forth in the pages of the Vancouver Daily Province of the 14th and 17th inst.

The cables read as follows:

"Peking, Sept. 14.—The famine situation in the Province of Chi li Honan and Shantung is more serious than is generally believed. The famine belt extends for 90,000 square miles, and affects a population of 30 or 40 millions. The funds required for adequate relief conservatively estimated are \$200,000,000 (two hun-

dred million dollars), which is beyond the present power of the government. A presidential mandate orders the Ministers of Finance and Interior to co-operate with the Civil Governors of the affected provinces in establishing rice and grain stores, selling at low prices, and exempting customs dues. This, however, is insufficient, and foreign diplomats are organizing relief committees.

Chinese witnesses report that in many villages fathers are poisoning their families to save them from death by starvation. Fleeing families tie their children to trees to prevent their following them. The horrors are indescribable. Girls are being sold for \$1.00 cash."

I have had considerable experience in Famine Relief in another part of

China, and should like to enlist the sympathy of your readers on behalf of these poor sufferers.

The China Continuation Committee has a fine organization in Shanghai, which is representative of all foreign missions in China, and they will be procuring supplies and appointing reliable men for the distribution of relief, so that any funds sent in can be forwarded to them.

At a meeting held in the Summerland Baptist church a committee was formed, and all the other churches have been asked to co-operate.

Donations may be sent to Mr. C. H. Gayton, who was appointed treasurer, or through The Review office.

Thanking you, dear Sir, for your courtesy, I am,
Yours truly,
ISAAC PAGE.

FRASER CANYON ROUTE FAVORED

Natural Highway for Railways and Wagon Roads, Says Hon. Dr. King

MERRITT—Announcement of the intention of the department to finish the One-Mile Creek cut-off road between Merritt and Princeton this year was made by Hon. J. H. King at a gathering here the other night. Dr. King also suggested inferentially that the Fraser canyon route "had the call" in the transprovincial highway argument.

The Merritt Herald story is: "Getting down to the particular road matters urged upon his attention by the board of trade of Merritt, and referring to the One-Mile road first, Dr. King said the government fully realized that it was important this road should be completed this year. It was important to this district and to the adjoining district. Representations had been made to the department by the local engineers, a short time ago, that additional appropriations would be required to enable this to be done. The necessary financial arrangements had been made, the minister added, amid applause, so that it will be possible to complete the One-Mile road this year."

"With regard to the Brookmore-Kingsvale road, Dr. King briefly sketched the history of a survey of the Brookmore-Thalia route, which had been found to be a good deal more costly an undertaking than had been estimated. If the construction of the inter-provincial highway was to be delayed indefinitely, he would be disposed to push the construction of this little link, the Brookmore-Kingsvale road, to give better highway connections in the district. But it was not the wish or purpose of the government to have the big work delayed. The government felt it was very necessary that the inter-provincial highway, connecting the Coast and interior portions of the province, should be built at a very early date. To that end, the government was having various small links, for example, over Anarchist Trail, constructed this year.

"In the matter of the great connecting link between the Coast and the Interior, and the Fraser Canyon route, which was the natural highway in this province for wagon roads and railways, we had two railways through that great highway, said Dr. King, which had raised some difficulties with regard to the construction of the inter-provincial highway by that route. The government had had thorough surveys of all possible routes made, and it has been found to be feasible to construct the inter-provincial highway by the Fraser Canyon route. There were matters of crossings and other questions to be carefully considered and adjusted with the railways and the Dominion government, however, before going ahead. In these negotiations, the provincial government had been met by no spirit of objection, but a spirit of co-operation, and he (Hon. Dr. King) was confident they would overcome all difficulties. They were determined not to make a false start, but to go ahead when everything was all right. The government were dealing with this inter-provincial highways as a provincial matter, and when we get this road and we are going to get it' (applause), continued Dr. King enthusiastically, 'you will have thousands of people touring British Columbia by automobile to every one that you have now.' Another link the government was constructing this year, added Dr. King, was a 90-mile road from Quesnelle to Fort George, which would give communication between the northern and southern portions of the Interior and give practically uninterrupted communication as far as Hazelton, and also open up a good agricultural country.

Hon. Dr. King went on to enlarge upon the part which the Dominion government, under the Dominion Highway Act, would take in the development of highways throughout the country \$20,000,000 having been appropriated for that purpose by the Dominion, out of which British Columbia would get \$1,250,000 within the next five years, though, if we were ready, the Dominion contributing 50 per cent. to such roads as the inter-provincial highway, the money could be spent within less time than five years.

"The minister's address, of which the foregoing is only a sketchy summary, was listened to with the closest attention throughout and frequently punctuated with applause.

"At the conclusion, President Cleasby appreciatively reviewed the remarks and assurances of the minister of public works on the various subjects touched upon, which had given the greatest satisfaction to the board of trade, none more so than the minister's evidently favorable consideration of the Fraser Canyon route for the inter-provincial highway, which was right in accord with the people of Merritt, who looked at the question of routes solely from the point of view of the interests of the province as a whole and without any local bias."

For Clear Windshield

To keep the raindrops from collecting on the windshield and obscuring the view, apply with cheesecloth or gauze the following solution: One ounce of water, two ounces of glycerine and one-eighth ounce of salt.

There are 4,617 privately owned passenger automobiles in Calcutta, India.

Illinois, Michigan and Massachusetts permit the operation of motor trailer trains 60 or 65 feet in length.

The use of the motor as a brake is well known to thousands of automobile drivers. Too few use this means of saving brakes. It is the most economical system and well worth while. It saves brakes and wear and tear on the car.

When a rear wheel is in a mud-hole so that it spins, apply the emergency brake gently. This will give enough resistance to the spinning wheel to let the other wheel pull the car out. The decrease in engine speed because of the brake pressure can be made up by opening the throttle a little.

When the electric starting system refuses to start and the crank has been left home in the garage, the motorist still has methods of getting the car going. The best way, perhaps, is to jack up one of the rear wheels and turn it by hand with the clutch engaged and high gear shifted in. The spark should be retarded and only a small throttle opening allowed. Before removing the jack, the gears should be shifted to neutral again.

YES, HOW DARE HE?

Cop (angrily, to fair motorist): "The next time ye don't stop at me signal, I'll pinch ye!"
Fair Motorist, (coloring): "How dare you!"

The state of Ohio has more motor trucks than any other state in the Union.

There are 355,433 automobiles and trucks registered in the nine provinces of Canada.

Before the year closes it is expected that 7,602,000 motor vehicles will be in operation in the U. S. A.

The question of right of way is sometimes a question of courtesy. Use your own judgment—and your brake.

Registration fees for automobiles in Auckland, New Zealand, cost \$2.43, with an additional charge of \$1.94 for two license plates.

Women drivers in the Argentine country are practically unknown because of the rigid examination they have to pass to be considered able to drive.

The Imperial Oil Co. will spend \$2,000,000 for oil explorations in Alberta this year. One well will be drilled south of Pincher Creek and one each at Fort Norman and Great Slave Lake. A well is being put down in the Czar district and the Brazeau region may be examined.

LETTER "E" FORTUNATE

Reasons Why We Could Not Do Without It

Someone has advanced the opinion that the letter "e" is the most unfortunate character in the English alphabet, because it is always out of cash, forever in debt, never out of danger, and in hell all the time. But we call attention to the fact that "e" is never in war, and always in peace. It is the beginning of existence, the commencement of ease, and the end of trouble. Without it there would be no meat, no life, no heaven. It is the centre of honesty, makes love perfect, and without it there would be no editors, devils or news.

In reference to the foregoing, a Calgarian remarks that "e" completed a helpmate for man, for it was the beginning and end of Eve. It starts lovers' engagements and completes their marriage. It is the most fortunate, for it always comes in late and is always in time. It will make butter better and put finish to the taste, and after all it has done, and is doing, it is just the beginning of the end.

Canada purchased 8,822 passenger automobiles and 2,164 trucks in the United States last year.

Canada is no longer an assembly centre for auto parts made in the U.S.A. The made-in-Canada auto is now a reality.

NEW SCHEDULE OF THE LAKESHORE STAGE

SOUTHBOUND	
Leaves Kelowna	9.00 a.m.
Arrives Peachland	10.30 a.m.
Summerland	11.30 a.m.
K.V.R. Station, West Summerland	12.00 a.m.
Penticton	12.15 p.m.

NORTHBOUND	
Leaves Penticton	1.00 p.m.
Arrives Summerland	1.45 p.m.
Peachland	2.45 p.m.
Kelowna	4.30 p.m.

Stage connects with K.V.R. westbound train at West Summerland, which arrives in Vancouver 11.15 p.m. the same day.

FARES	
Kelowna to Peachland	\$2.00
Kelowna to Summerland	4.00
Kelowna to K.V.R. Station, West Summerland	4.50
Kelowna to Penticton	5.00
Penticton to Summerland	1.00
Penticton to Peachland	3.00
Penticton to Kelowna	5.00

THE VALUE OF ADVERTISING OF AND FOR LIVESTOCK

(Experimental Farms Note.) To the well-known, established breeders of livestock any advice on the value of advertising is superfluous, for in the large majority of cases it has been by proper advertising of high-class goods that they have built up their business.

LARGE vs. SMALL HIVES

To contain the combs in bee-hives, the Langstroth frame measuring 17 1/2 inches wide by 9 1/2 inches deep has for many years been the size employed by most beekeepers.

The question of large hives is, however, chiefly one for the beginner, and those who intend to enlarge their apiaries. Those who already have 8-frame hives can make them satisfactory by using two chambers instead of one, that is to say, a second hive body placed as a super over the regular brood chamber.

True beauty of character gleams out unconsciously and without effort. While experiments with the larger hives will be continued, and we are favorably impressed with the 10-frame Jumbo for certain conditions, we have not yet sufficient data to modify the general advice that has been given to beginners to adopt the 10-frame Langstroth hive.

The Winding Trail

"The logic of our adversary" once "HUMAN NATURE" wrote a certain Editor Riley, "resembles the peace of God—in that it passeth all understanding." I do not claim that these words will apply exactly to the logic of the exponents of Socialism as we have it presented by recent correspondents, but they most certainly do apply to the fanciful and baseless deductions drawn by those correspondents.

The other bubble I wish to explode is the gratuitous misreading of the "human nature" contention. Both "Socialist" and his friend, J. Logie, persist in saddling me with their own interpretation of this expression. J. Logie calmly took it for granted that by "human nature" I meant "natural depravity" or "cussedness," to use his own expression, and that I subscribed to the doctrine that we were all "miserable sinners."

Just one word more. "Socialist" says, "Make the nation the sole capitalist, and then Labor and Capital can co-operate." Well, we have today a concrete instance for our guidance:—in Bolshevik Russia that is the exact condition of affairs.

ONLY CONCERN IS HIS PROFIT

How the Mail Order Man Works To Get It While He Can

The idea upon which the mail order man works is to get the money while the getting is good. If the customer is satisfied with the goods which he receives, all well and good. The mail order man knows that the customer is the kind of a man or woman who likes to take a chance or he wouldn't have sent in his order in the first place.

It is well for the customer to remember these facts if he is ever tempted to take a chance on the offerings of the mail order house. The home merchant has something at stake in every sale he makes. The mail order man has nothing at stake for it is to his interest to get all that he can out of each sale, knowing that he may never have another chance at that particular customer.

Synopsis of Land Act Amendments

Minimum price of first-class land reduced to \$5 an acre; second-class to \$2.50 an acre.

Pre-emption now confined to surveyed lands only. Records will be granted covering only land suitable for agricultural purposes and which is non-timber land.

Partnership pre-emptions abolished but parties of not more than four may arrange for adjacent pre-emption with joint residence, but each making necessary improvements on respective claims.

Pre-emptors must occupy claims for five years and make improvements to value of \$10 per acre, including clearing and cultivation of at least 5 acres before receiving Crown Grant.

Where pre-emptor in occupation not less than 3 years, and has made proportionate improvements, he may, because of ill-health, or other cause, be granted intermediate certificate of improvement and transfer his claim.

Records without permanent residence may be issued, provided applicant makes improvements to extent of \$500 per annum and records same each year. Failure to make improvements or record same will operate as forfeiture. Title cannot be obtained in less than 5 years, and improvements of \$10 per acre, including 5 acres cleared and cultivated, and residence of at least 2 years are required.

Pre-emptor holding Crown grant may re-occupy another pre-emption, if he requires land in conjunction with his farm, without actual occupation, provided statutory improvements made and residence maintained on Crown granted land.

Unsurveyed areas, not exceeding 20 acres, may be leased as homesteads; title to be obtained after fulfilling residential and improvement conditions.

For grazing and industrial purposes areas exceeding 640 acres may be leased by one person or company. Mill, factory or industrial sites on timber land not exceeding 40 acres may be purchased; conditions include payment of stumpage.

Natural hay meadows inaccessible by existing roads may be purchased conditional upon construction of a road to them. Rebate of one-half of cost of road, not exceeding half of purchase price, is made.

PRE-EMPTORS' FREE GRANTS ACT

The scope of this Act is enlarged to include all persons joining and serving with His Majesty's Forces. The time within which the heirs or devisees of a deceased pre-emptor may apply for title under this Act is extended from for one year from the death of such person, as formerly, until one year after the conclusion of the late war. This privilege is also made retroactive.

No fees relating to pre-emptions are due or payable by soldiers on pre-emptions recorded after June 26, 1918. Taxes are remitted for 5 years.

Provision for return of moneys accrued, due and been paid since August 4, 1914, on account of payments, fees or taxes on soldiers' pre-emptions.

Interest on agreements to purchase town or city lots held by members of Allied Forces, or dependents, acquired direct or indirect, remitted from enlistment to March 31, 1920.

SUB-PURCHASERS OF CROWN LANDS Provision made for issuance of Crown grants to sub-purchasers of Crown Lands, acquiring rights from purchasers who failed to complete purchase, involving forfeiture, on fulfillment of conditions of purchase, interest and taxes. Where sub-purchasers do not claim whole or original parcel purchase price due and taxes may be distributed proportionately over whole area. Applications must be made by May 1, 1920.

GRAZING Grazing Act, 1910, for systematic development of livestock industry provides for grazing districts and range administration under Commissioner. Annual grazing permits issued based on numbers ranged; priority for established owners. Stock owners may form associations for range management. Free, or partially free, permits for settlers, campers or travellers, up to ten head.

Water Notice

Use and Storage.

TAKE NOTICE that Esme Norton Rowley, whose address is Summerland, B.C., will apply for a license to take and use 100 acres foot and to treat Trout Creek, which flows southeast only and drains into Okanagan Lake about 3 miles south of Summerland, B.C.

The storage-dam will be located at the point of intersection of northwest and southwest survey line of Lot 1108 and Trout Creek. The capacity of the reservoir to be created is about 100 acres of land. The water will be diverted from the stream at a point about 300 feet northwest of District Lot 2093, Group 1, Osoyoos Division of Yale District, B.C., and will be used for irrigation purposes upon the said Lot described as Lands 2093 and 1108.

This notice was posted on the ground the 18th day of August, 1920. A copy of this notice and an application pursuant thereto and to the "Water Act, 1914," will be filed in the office of the Water Recorder at Vernon, B.C.

Objections to the application may be filed with the said Water Recorder or with the Comptroller of Water Rights, Parliament Buildings, Victoria, B.C., within thirty days after the first appearance of this notice in a local newspaper.

E. N. ROWLEY, Applicant, Summerland, B.C. The date of the first publication of this notice is Sept. 3rd, 1920. 5-9

THE CASH VALUE OF A PEDIGREE

All animals have a pedigree of some sort, whether pure-bred or scrub. Only the pure-bred animals have their pedigree registered and have pedigree certificates issued. A pedigree is valuable only when it proves some fact that is worth while about an animal, either favorably or otherwise. We frequently hear comments of some such nature as "I do not care about the papers; it is the cow I want." Speaking broadly, that may be good business for a butcher, but the real stock breeder is paying more attention to pedigree than ever before and we often hear him say, "That is a beautiful creature, but I do not like her breeding."

The man who attaches the most value to a pedigree is the one who knows the most about its true value. The pedigree student may learn of a cow that has had a brilliant showing career. She may be particularly pleasing to the eye in type, form and conformation. He studies her pedigree and finds that she has sprung from ancestors that were of little value and immediately decides to let her alone, regarding her as a freak. On the other hand, he may find a cow that is not a particularly fine individual in type, but he studies her pedigree and finds that she has for her ancestors some of the very best animals of the breed. He decides to buy the cow, doing so on what he knows about her ancestors. He has made use of the pedigree to select a cow, but he has not, as so many are inclined to state, paid a big figure for papers.

Pedigree does not make value; it decides value by establishing the history of ancestry. The cow backed by several generations of good producers is much more liable to be the dam of producers than the cow whose dam only, of all ancestors, is a producer. This does not of course always hold true. Just as we frequently find a good individual with a poor line of ancestors, so do we find poor individuals with strong ancestors. Like, as a general rule, produces like, but the law of variation is also felt. The pedigree student studies these laws and draws his conclusion.

When a cow is purchased for a

breeding herd two things are kept in mind: first, the value of the cow for what milk she will produce and, secondly, the effect she will have upon the future of the herd. A good judge of dairy cattle can estimate closely her value as a milk producer, but her worth as a herd improver must be determined chiefly by pedigree.

Individual merit is very important and should not be overlooked, yet it must not be the main deciding point. History shows us some excellent individuals who have apparently sprung from inferior stock and later have become wonderful foundation cows. Such animals are valuable if properly developed, but the owner must have skill and patience to handle a problem of this kind, as often after a few generations there may be a reversion back to the old ancestral type.

Some herds have been built almost to perfection with the exception that possibly a single defect may be noticed through the entire herd. The owner is a true stock breeder and wishes to have as perfect a herd as possible. He decides to secure a new sire and correct this fault. He selects an animal not only strong itself where the defect is shown in the herd but the breeder finds that the animal is from families perfect in this respect. This sire is more certain to correct the fault than an animal who is strong individually but part, or all, of his ancestors are weak.

This is where the real value of a pedigree is recognized. It is not so important to know simply that an animal is pure-bred as it is to know that the strain in the herd is of the very best.

Country School Teacher — Now, Johnny, can you name a cape in Alaska?

Johnny (stumped) — No'm.
Teacher — None; that's right, Johnny. Now next boy name another.

"That was the last card Oi dealt ye, Mike?"

"A spade."

"Oi knew it was. Oi saw ye spit on yer hands before ye picked it up."

"Young man, we need brains in our business."

"I know you do. That is why I am looking for a job here."

SEWING MACHINE PRICES—No advance since November, 1919, until August, 1920. For a very short time we are giving our customers the benefit of 1919 prices. Buy now and save \$10.00. Have a Piano Bargain at \$225.00.

RAIN SLACKENS FRUIT PACKING

(Continued from Page 1)

strict attention to the proper curing and gathering of the bulbs to avoid heavy losses by rot and storage. A moderate movement of other vegetables in mixed cars is apparent. The mixed car movement up to date seems to have a strong lead, but from this on it is expected straight cars will take the lead in shipments.

The movement of the tomato crop has been quite free; most growers seem to have no difficulty in disposing of this vegetable. The rains of the past week are likely to cause considerable loss, as it is noticed that a severe splitting of the vegetable is now taking place.

Kelowna
McIntosh and Wealthies are moving very heavily. Wealthies are about finished. McIntosh are of nearly perfect condition both as to size, color and quality. Bartlett and Flemish Beauties are about cleaned up. The quality and quantity are good.

Prunes are moving very heavily, and the crop, judging from present indications, will about average. Ponds Seedlings, Yellow Egg and Black Diamond Plums are now moving out freely and are excellent both as to quality and quantity.

Crawford and Elberta peaches are now moving through the packing houses in good quantities, showing excellent condition. Hyslop Crabs are moving heavily and this crop shows close to a normal tonnage. Judging McIntoshes from the rate they are moving, the crop will show 80 per cent. of last year's tonnage.

Tomatoes are very backward on account of wet, cool weather, and are very slow in ripening. The onion harvest is about just finishing, but growers are not anxious to sell at prevailing prices.

Penticton
Elbertas of good quality in large quantities are taxing the packing houses to capacity these days.

Crawfords are practically over. Italian Prunes are moving fast.

Make Use of Your Pasture

Have your good pasture going to waste? If so, increase your herd and make use of it.

This Bank makes a special feature of loans to farmers. Have a talk with our local manager.

THE DOMINION BANK
SUMMERLAND BRANCH,

WEST SUMMERLAND BRANCH—A. E. Morkill, Manager

Some Plums are moving, mostly Green Gage. Flemish Beauty and Duchess pears are moving. A few McIntoshes of excellent quality are coming in. Tomatoes, green and semi-ripe, mostly Earliana, are moving.

Order of the Bath
"Do you know what the Order of the Bath is, Mickey?" the teacher asked.
"Sure, ma'am," replied the boy. "In our house it's Katy, then me brudder, then me."
