

The Summerland Review

DEVOTED TO THE INTERESTS OF SUMMERLAND, PEACHLAND AND NARAMATA

Vol. 12, No. 35, Whole No. 686

SUMMERLAND, B.C., FRIDAY, April 1, 1921

\$2.50, Payable Advance

STUART FRUIT COMPANY SELLS

Mutual Fruit Co. Takes Over Business of Local Concern.

That the Stuart Fruit Company had sold its packing and shipping business here to the Mutual Fruit Company was the information received by The Review over the wires on Thursday. Muir Stuart, the manager of the company returned last night from a visit to the prairies and, interviewed by this paper, stated that he had not thought of selling when he left here a few days ago. In conversation with some of the heads of the Mutual, he jocularly suggested that they buy him out. Giving the suggestion serious consideration the Mutual Co. made him an offer which he accepted. The new company takes possession today. Mr. Stuart stated further that he found the management of the business an increasing burden together with the oversight of his several orchard properties. He will give his full time to production.

CANTATA WAS GREAT SUCCESS

Choir of Seventy Voices Delights Large Audience in Gymnasium.

One of the best entertainments held in Summerland this winter was given at the Gymnasium last Friday evening when the oratorio "Olivet to Calvary" was rendered by the Summerland united choirs, under the able direction of Mr. T. G. Beavis.

With the ladies of the chorus dressed in white, the singers numbering about 70 took their places at 8.30, when after the rendition of a quartette taken from "The Holy City" entitled "They That Sow in Tears," and a solo given by Mr. Fred Graham, "Gloria in Excelsis," which elicited well merited applause, the quartette composed of Mrs. Geo. Ross, soprano, Mrs. Geo. Craig, alto, Mr. Ben Newton, tenor, and Mr. Fred Graham, baritone, gave "Crossing the Bar" in memory of the death of the composer of the oratorio, Mr. J. H. Maunders, who has recently passed away.

With Miss Dale as accompanist, Mr. Beavis then assumed his baton and commenced the programme, the opening chorus being especially well rendered. From first to last the audience were held by the sympathetic

MEMBER OF CABINET. PRESIDENT OF COUNCIL.

HON. MARY ELLEN SMITH.

Mrs. Ralph Smith has been made a member without portfolio of the Oliver Government and President of the Council. The office carries no salary but she will be given a private secretary, paid by the Government, and allowed certain expenses.

As she is not being made head of any department with regular salary Mrs. Smith will not have to seek reelection as she otherwise would.

Mrs. Mary Ellen Smith is the first woman cabinet minister in Canada. As President of the Council Hon. Mrs. Smith will preside over the sittings of the Executive, a duty until now performed by Premier Oliver. In the House she had her seat moved up to the position at the right of the Premier.

Later reports from the Capital state that the Premier still claims for himself the Council Presidency.

manner in which the various parts were given, the choir putting expressive interpretation on each passage and showing the results of their leader's efforts to give the best effect to the performance.

Whilst the choruses were excellently given, special mention should be made of the admirable way in which the soloists responded to their parts.

Although there was no charge for admission, an appeal was made for liberal voluntary offerings, and the Summerland Hospital will benefit by quite a considerable donation as a result. The hall was crowded with over 500 people and it is to be hoped that this will be an incentive to the members of the choir to attempt further musical evenings of this kind, which the people of Summerland know how to appreciate, judging by the remarks of approval expressed on leaving the hall.

TOTAL APPLE CROP MARKETED EARLY AT HIGHEST PRICES REALIZED ANYWHERE ON CONTINENT

Okanagan United Growers in Annual Meeting Presented With Splendid Report. Their Selling Costs Further Reduced.

VALUE OF THE GROWERS' SALES AGENCY PROVEN

Obtained Higher Prices Than For 1920 Output. Changes in Selling Force. Field Extended East and South. Selling Costs Lowest on Continent.

With the business of the organization in splendid condition and good prices realized for the growers there was a total absence of complaining or fault finding at the annual meeting of the Okanagan United Growers, Ltd., held last week at Vernon, such as was common a few years ago before the co-operative organization of Okanagan fruit growers had attained the strength and efficiency it has to-day.

President J. T. Mutrie who presided, referred to the difficulties of the past eight years and how they had all been smoothed away.

"If we had not established the Growers' Sales Agency in 1917 we would not be in the position we are in to-day," he declared. "We have the framework of the most efficient sales force in Canada."

He then dealt with the details of the selling organization, and urged the members to increase the tonnage that passes through the warehouses. He paid a tribute to General Manager W. J. MacDowall and Sales Manager C. L. Lowe as well as to the Board of Directors for the success of the past year. He also included Mr. H. A. Renwick in his remarks.

DIRECTORS' REPORT.

The directors' report was then read by Mr. McDowall, the details of which were elaborated. In reply to a question by Mr. J. D. Godwin of Fintry, Mr. McDowall said that the price received for crate apples last season was \$1.98 as compared with \$1.25 for 1919.

The shareholders then discussed the advertising scheme which is being planned by the B.C. Fruit Growers' Association. Mr. E. R. Simpson, chairman of the advertising committee, dealt with the details of last year's appropriation, while Mr. Lowe emphasized the value of advertising. It had helped to sell last year's crop. Continuing he said that from what he knew of other shippers they would all contribute to the advertising fund.

HONORARIUM FOR PRESIDENT.

Mr. G. Thornber of Summerland lauded the work of the President and moved that a honorarium of \$500 be granted to Capt. Mutrie as an expression of the sincere appreciation of the company for his work on its behalf last year.

Mr. Mutrie in a few words expressed his gratitude to the members for the many kind things which they had said about him.

Mr. Thornber then moved, seconded by Mr. Cossitt that the President be paid an annual remuneration of \$1,000. It was unfair, they said, to ask the officer to give of his time without some compensation.

TO BROADEN OUT.

Capt. Mutrie then suggested to the meeting that the members discuss the proposal of organizing other fruit districts with the eventual idea of having them link up with the O.U.G. In this way, he said, the organization would have better control of the crop and would be in a much better way to handle distribution.

A number thought that this was the psychological moment to proceed with the idea and Mr. Edgcombe of Peachland moved the following resolution:

"That this meeting is of the opinion that the time has come for the different fruit districts to co-operate and that the incoming directors will be asked to approach the different centres with a view to their joining the O.U.G. Limited, making one central organization for the disposal of all products."

In a resolution the new directors were also asked to consider the suggestion that some method be decided upon to provide the organization with a capital fund. Several suggestions were thrown out and these will no doubt be considered.

SELLING COSTS.

In reply to a question relative to

OFFICERS FOR 1921.

J. T. Mutrie.....President
E. R. Simpson.....Vice-President
W. J. MacDowall.....Sec.-Treas.
C. E. Barnes: in Charge of Organizing and Advertising Department.

The following directors were elected at the last Annual General Meeting of the Shareholders: E. J. Chambers, Penticton; E. R. Simpson, Summerland; T. Powell, Peachland; E. M. Carruthers, Kelowna; J. T. Mutrie and E. Trask, Vernon; R. Arnott, Armstrong; L. J. Proctor, Enderby; and the following officers were appointed by the new board: President, Capt. J. T. Mutrie; Vice-president, E. R. Simpson; Secretary to the Board, T. Powell; Secretary-treasurer, W. J. MacDowall.

Fourteen directors' meetings were held during the year involving an expense of \$2,161.85, of which \$1,266.85 was expenses, \$895.00 indemnity.

OVERSEAS MARKETS.

In reply to a question regarding the development of Oriental and South American markets, Mr. Lowe stated that this matter depended upon the boat service, but it was expected that apples would be shipped to Singapore this season, as the recently established line of the Canadian Government Mercantile Marine would provide refrigerator space on its ships. He was not hopeful about the Australian market as the Commonwealth would be exporting after supplying the home requirements, two and a quarter million boxes.

TRIBUTE TO MR. POWELL.

Just before the meeting adjourned Mr. Simpson proposed that an honorarium of \$100 be voted to Mr. Powell of Peachland in recognition of his splendid services as secretary to the Board during the year just ending.

Mr. Thornber moved that a vote of appreciation be extended to Messrs. W. J. MacDowall and Mr. C. L. Lowe and the directors for the excellent showing made in 1920.

In replying, Mr. McDowall said that any credit to the officers was because of the loyal support of the growers, and hoped that the same spirit would prevail in the future. Mr. C. L. Lowe "seconded Mr. McDowall's speech."

Directors elected were as follows: Enderby—L. J. Proctor. Armstrong—R. T. Skelton. Vernon—J. T. Mutrie and E. Trask. Kelowna—E. M. Carruthers. Peachland—J. E. Edgcombe. Summerland—E. R. Simpson. Penticton—G. Baskin. Crehan, Moutat & Co. were again the unanimous choice of the members as auditors.

Those present at the meeting were: E. M. Carruthers, Kelowna; A. McLachlan, G. Thornber, E. R. Simpson, C. P. Evans, P. G. Godwell, W. H. Hayes, Summerland; E. Trask, Oyama; J. T. Godwin, Fintry; T. Powell, J. A. Edgcombe, Peachland; E. J. Chambers, H. W. Corbitt, S. G. Finch, W. G. Baskin, Penticton; R. Arnott, L. E. Farr, R. Skelton, J. McCallum, J. M. Wright, Armstrong; L. J. Proctor, J. Emery, Enderby.

In addition to those mentioned there were present the managers of the different Unions and other officials of the organization.

DIRECTORS' REPORT.

The report of the Board of Directors, read by Mr. McDowall follows: To the Shareholders of the Okanagan United Growers, Ltd. Vernon, B.C. Gentlemen,

Herewith we have pleasure in submitting the eighth Annual report of the operations of the Company, together with the Auditors' Report and Annual Statements for the year ended 31st December, 1920.

The year's working shows a surplus on fruit, vegetables, etc. handled for the affiliated local associations of \$5,976.11, to which should be added the surplus on handling charges for unaffiliated local associations of \$84.92, together with interest on savings bank account amounting to \$1,229.13. Profit on fruit and vegetables purchased, \$3,338.88; Profit on Old Country presentation car, \$194.52, and Sprayer account \$379.72. From which has to be deducted interest on loans from growers, \$4,817.73; Reserve for Bad Debts, \$1,000.00; Depreciation, \$1,826.13; Loss on Supplies, \$2,323.31; Loss on Re-packing, \$74.88. Leaving the net surplus of \$1,161.23.

The expenses for the year, less Brokerage Earnings, total \$65,645.49 as against \$62,090.73 for 1919; \$53,737.70 for 1918; \$52,562.19 for 1917; \$63,140.28 for 1916, showing an increase for 1920 over 1916 of \$2,505.21, for which additional expenditure we handled 191,000 more packages.

The cost of handling business on behalf of our affiliated Local Associations was 3.8 per cent. of value of sales as compared with 7.6 per cent. for 1916.

FINANCIAL STATEMENT.

The revenue from handling charges on fruit sold for our Locals was 3.9 per cent. of selling price as against 5.3 per cent. for 1919, 5.6 per cent. for 1918, 7.3 per cent. for 1917.

WORKING CAPITAL ACCOUNT.

The amount now standing under this head in the Balance Sheet is \$126,154.28 which is made up of deductions for the years 1916 to 1920, plus sundry items pertaining to previous years remaining unclaimed. \$25,000.00 of this amount has been invested in the O.U.G. Fruit Products Ltd., and 2,500 shares of ten dollars each have been allotted therefor. Notes covering 1920 deductions will be prepared and issued in due course as usual.

SHIPMENTS Packages shipped on behalf of our affiliated local associations were:

	1919	1920
Soft fruits	205,721	149,330
Apples, pears, and crabs	780,874	550,151
Vegetables and hay	73,339	71,289
Totals	1,059,934	770,770

On behalf of unaffiliated associations:

Soft fruits	29
Apples, pears and crabs	3,922	2,254
Vegetables	413
Totals	9,364	2,254

Purchased Stock:

Soft fruits	2,907	2,553
Apples, pears and crabs	6,679	1,005
Vegetables	73,279	31,611
Totals	82,865	35,169

Making a total number of packages shipped for 1919 of 1,157,163, as against a total number for 1920 of 808,193, showing a decrease for 1920 from 1919 of 348,970.

SALES.

The total sales for the year 1920 amounted to \$2,060,432.21, being made up:

(Continued on Page 2)

FORMER SOLDIER IS CHOSEN AS PILOT.

Major-General A. D. McRae of Vancouver has been appointed director of the Western Colonization Association which plans to bring 500,000 settlers in the next few years.

"CARRY ON" IS ORDER.

Having been appointed to the position of Superintendent of Bridge Construction under the Provincial Department of Public Works, Mr. T. J. McAlpine was preparing to take on the first job of this nature at Rock Creek on April 1st.

These plans have been altered by order from Victoria, by which he has been instructed to carry on in his present capacity in charge of the roads in South Okanagan until April 15th. Until he has further information Mr. McAlpine does not know whether or not plans for his future have been changed by the Department.

Col. Donnelly who was in charge of the road construction on Anarchist Mountain last summer is said to have received the appointment to the position held until now by Mr. McAlpine, with a Mr. Mann, recently of Penticton, as his assistant. Both these gentlemen have been in the Summerland office for the last few days.

UNITED FARMERS.

It is to be regretted that there was not a better attendance at the regular monthly meeting of the Trout Creek Local of the United Farmers of British Columbia, held at the Trout Creek school house on Tuesday evening last. Mr. John Tait gave a timely talk on sprays and spraying which was much appreciated.

During the evening Provincial Horticulturist W. T. Hunter came in and the meeting was favoured by a very instructive discourse on general horticultural topics by this popular expert.

(Continued on Page 4)

RUSHING SPRAY FROM SOUTH

Unfortunate Error in Mixture of Valley Product is Reason.

Somebody has blundered seriously, but its early discovery may avert great losses to our fruit growers. With commendable loyalty local distributors ordered largely a lime-sulphur product of Okanagan manufacture. Almost at the moment when it should be applied to the trees the discovery was made that there was something wrong with the mixture.

Immediately at the request of the manufacturers, notice was sent out to the buyers with instructions as to how to correct the error. To use the mixture according to the new directions will mean a considerable loss in volume and that more lime-sulphur will be required. As soon as the discovery was made, Manager Lawler of the Fruit Union got busy with the wires, and secured a car load at Wenatchee which was delivered by rail to Oroville, and from there is being brought up by motor trucks.

CANADIAN PLAYERS BEING ORGNIZED

Home Theatre at Naramata is Best Little Theatre in Canada.

Mr. Carroll Aikins of Naramata has recently returned from New York where he selected and purchased a model lighting equipment for his little theatre built over the packing house in his orchard.

As a patriotic Canadian enterprise (built for the use of dramatists and actors from every part of Canada), this little theatre has enlisted the interest of many people in the East who have subscribed generously to its equipment. The lighting system just purchased will supply the small stage with a volume of light amounting to 10,000 watts, the equivalent approximately of that developed by three large type Delco systems. This powerful light is run through special high powered floods, spot lights, and X-Ray borders, besides the usual stage lighting. Perfect flexibility of light control is obtained by means of a series of dimmers worked by levers at one central control board. The whole system is easily dismantled and every piece is portable, so that when Mr. Aikins wishes to take his company on tour his unique lighting plant will go with them.

(Continued on Page 4)

LOCAL MEMBER SPEAKS ON GOVERNMENT'S FISCAL POLICY

Mr. J. W. Jones, M.L.A., Pleads Cause of Municipalities. Charges Wastefulness in Provincial Expenditures.

Victoria.—Maximum outlays bringing a minimum of results, was the claim made by Mr. J. W. Jones, Conservative member for South Okanagan, when speaking in the Budget debate in the Legislature. He held that the taxpayers of the Province are not getting results for their money, and he urged that the time has arrived when a halt should be called.

Mr. Jones congratulated the Minister of Finance on the most lucid financial statement ever presented to the Legislature. The Budget was one to which careful consideration should be given. It was the largest ever presented in British Columbia. The receipts were stated at \$17,010,595, and the expenditures, \$19,848,974. What justification was there for such a huge budget? Small wonder that the public were startled at its size. This was the outcome of launching into a number of ill conceived and ill managed propositions. Where was the retrenchment and economy that had been promised. Instead of economising the Government had spent last year a total of \$35,213,362, which was made up of \$17,413,832 expended on current and capital account, and \$17,799,500 borrowed money.

SOMEWHAT PESSIMISTIC.

Looking over the general conditions in the Province, Mr. Jones declared that they must be pronounced far from encouraging. Mining was almost at a standstill and could not

pay any further taxes; lumbering was in a precarious condition and was being conducted at a loss; the agricultural production was estimated at only a trifle more than that of 1919, and there were good reasons for believing that the estimates were too large. When the facts were all tabulated he was satisfied that the agricultural production of 1920 would be found rather less than that of 1919, because it was notorious that the methods adopted for making agricultural estimates in British Columbia were absolutely misleading.

PLEA FOR MUNICIPALITIES.

The municipalities were found to be in a bad financial situation. What was the use of telling the municipalities to be patient and economize? How could they be more patient than they had been? And yet the finances of several of them had reached the point of desperation. This was because the Government was taking from them constantly increasing sums, then giving them nothing in return.

While the Government was telling the municipalities to economize, what was the Government itself doing in setting an example? He found that the form of the budget this year gave in many respects less detail as to votes than the members had a right to know. He found that in the different departments there were blanket votes reaching a total of

(Continued on Page 8)

TOTAL APPLE CROP MARKETED EARLY

(Continued from Page 1).

On behalf of local associations:

Fruit	\$1,478,745.49
Vegetables	67,125.36
Total	\$1,545,870.85

On behalf of unaffiliated associations:

Fruit and vegetables purchased	1,861.52
Supplies for use of local associations	82,683.23
Total	430,016.61

The 1920 decrease from 1919 in sales of fruit and vegetables made on behalf of our local associations is \$131,029.30; the total decrease in all sales from 1919 is \$119,366.97 and increase in 1920 over 1918 of \$472,567.85.

DISTRIBUTION.

The same ratio of distribution was not kept up in 1920 in proportion to 1919, this arising from the fact that with our small crop and demoralized condition of the American markets, which were used much in 1919, the sales force saw fit to place the fruit in the better markets, which this year proved to be the Canadian markets. We, however, believe that with the prospects of a tremendous increase in 1921 over the large crop of 1919, we will have to look forward to even further distribution than was effected in 1919.

Our shipments to New Zealand in 1920 amounted to a total of 3,000 boxes, as against 3,417 boxes in 1919. Shipments to Great Britain dropped from 98,716 boxes in 1919 to 67,780 in 1920, while shipments to United States dropped from 130,471 packages of all fruit to 35,647 packages, these being almost wholly crabapples.

The following is a comparative statement of shipments to the four Western Provinces, Eastern Canada and the export trade.

	1920	1919
British Columbia	11.7	14.3
Alberta	28.6	16.5
Saskatchewan	20.9	18.8
Manitoba	18.9	19.8
Eastern Canada	6.9	8.3
Export	13.0	22.3

These figures will show that we took every advantage of the better markets to get the highest price for our Growers. You will note that Manitoba and Eastern Canada dropped below the percentage of 1919, this arising on account of the tremendously heavy increase in apples and other fruits in Ontario and Quebec during this season.

PRICES.

The average prices received for apples, O.K. varieties were:

	1920	1919
Ones	\$2.62	\$2.14
Twos	2.26	1.76
Threes	1.45	1.21

Showing an increase over 1919 of 48c. per box on ones; 50c. per box on twos; and 24c. per box on threes.

The average prices received for all varieties of apples, including O.K. Brand were:

	1920	1919
Ones	\$2.59	\$2.10
Twos	2.23 1/2	1.76
Threes	1.45 1/2	1.19

Showing an increase over 1919 of 49c. per box on ones; 57 1/2c. per box on twos; and 26 1/2c. per box on threes.

The general average for 1920, on all varieties, ones, twos and threes, amounts to \$2.44 1/2c. per box, as against \$1.94 in 1919, showing an increase in 1920 over 1919 of 50 1/2c. per box.

Soft fruits, cherries and plums show a considerable increase in price over 1919, peaches showing an average of 44 1/2c. more per box, plums 13 1/2c. more per box, and prunes 57 1/2c. more per box.

We would like to point out to our growers the benefit of co-operation as we may safely say that there is no other producing section on the American continent which received anything near their 1919 prices in 1920. As a matter of fact we feel sure that a lot of producing centres did not receive enough to cover the cost of production, and our greatest competitor, the American Box Apple shippers of Washington and Oregon received possibly on an average \$1.00 per box less than our growers. This result has been made possible only by the continued loyal support of the growers constituting this organization and the added strength obtained by further co-operation among all shippers associated in the B.C. Traffic and Credit Association. Selling early as we did, we were able to get the prices obtained before the markets tumbled.

It is our strong impression that 1921 will ask for even greater co-operation than any year since the fruit growing industry in British Columbia has been on a commercial basis. The outlook shows that we will have a tremendously increased crop, and our competitors in the United States in box apples, have the same outlook. This will mean that the

growers of the Okanagan Valley must show a true co-operative spirit, and work together to overcome the competition that will arise through the handling of such an enormous crop.

SUPPLIES.

A loss is shown under this head of \$2,323.31, which was due to our invoicing box shooks to locals at the same price paid by us to the mills, so that after charging the proper proportion of the total expenses for the year to this account, there resulted a deficit as above.

During the year supplies were purchased totalling 170 cars, made up of flour and feed, 14; boxes, 129; spray, 10; nails, 4; paper, 10; sacks, 3; showing a decrease from 1919 of 9 cars. The value of supply sales amounted to \$430,016.61. Included in this amount is the value of a car load of Hardie Power Sprayers, which represents a new departure, and the results obtained fully warrant the extension of this branch, which has already been undertaken.

ADVERTISING.

This business was handled by the same committee as last year, namely, Messrs. E. R. Simpson (Chairman), J. T. Mutrie, W. J. McDowall, and C. L. Lowe. The sum available at 1st of January 1920 was \$6,091.56, of which \$1,889.30 had been suggested as our 1919 contribution to the B.C.F.G.A. emergency fund, of which amount \$1,000.00 only was paid during the year, leaving a net amount of \$5,091.56. During the year deductions from sales amounted to \$6,179.74 whilst the expenditure other than the \$1,000.00 above referred to totalled \$9,218.07. Particulars of this expenditure are given in the Trading Account under the head of "Advertising." The balance remaining being available for 1921 season stands at \$5,053.23.

We have again received appreciative comments from various sources on the style and character of our advertisements, whether in trade papers or otherwise, and feel that this branch of our activities is bearing good fruit and warrants the hearty support of all growers.

SELLING FORCE.

Material changes were made in the selling force during the year under review. It was felt very early in the season that the time had arrived for the extension of our operations further East and into the States. After mature consideration it was eventually decided to open an office in Minneapolis and Mr. A. H. Flack, the manager at Regina, was selected to take over this territory, his assistant at Regina, Mr. G. N. Smith, being continued there in full charge, in which position he has proved himself a capable man. It was natural that the opening of an office in this centre would necessitate a great amount of hard work and it was expected that the results would not be of much financial benefit the first season. The short crop on this side together with the poor market also militated against the office, but it is felt that good results will follow during the present season when there is no doubt every avenue for sales will be needed.

An office was opened in Toronto at the beginning of the season with a sub-branch at Montreal, but as it was found later on that the Montreal business could be handled as satisfactorily and more economically from Toronto, the Montreal office was closed up. Quite a nice business was done in this territory under the management of Mr. David L. Dick and the nucleus of an extensive business has been formed for future needs and distribution.

Mr. G. H. Florance, manager of Winnipeg territory; Mr. Ross Morrison, manager of Calgary territory; Mr. R. M. Hood, manager of Vancouver territory; and Mr. I. H. Kerr for B.C. Interior territory have all done splendid work and exceeded previous records.

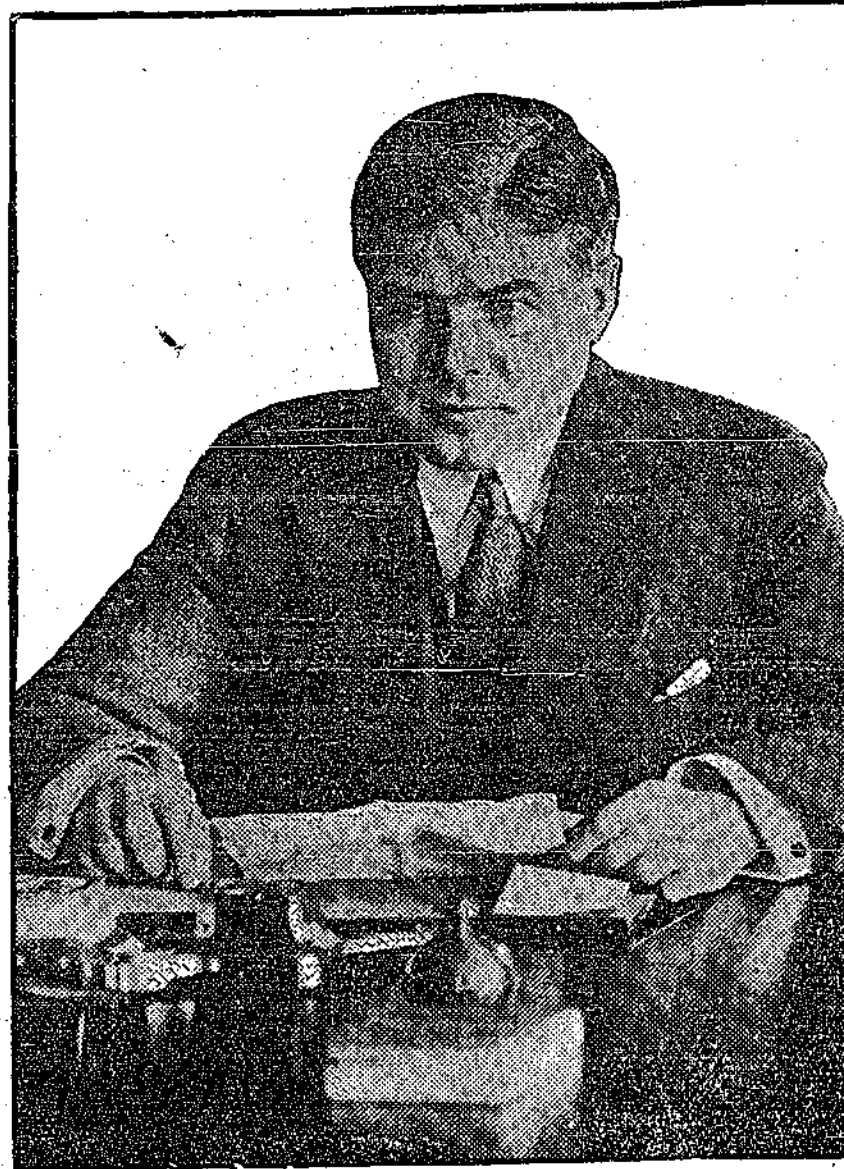

Mr. C. L. Lowe, our Sales Manager, has again demonstrated, in a very difficult year, his ability to dispose of our crop to the very best advantage, and your Board are confident, that working as he does with the loyal backing both of the Local Managers and other officials responsible for the packing and shipping of the fruit, and also of every member of his sales force, including his very able assistant, Mr. H. A. Renwick, he will continue to secure the very best results possible for the growers.

GENERAL MANAGEMENT.

Mr. Walter J. MacDowall, our General Manager, has now completed ten years continuous service for the Co-operative Growers of the Okanagan, and your Directors feel that each succeeding year finds him more firmly entrenched in the confidence and affections of all who come in contact with his work.

During the past year, in addition to his usual careful business management of the Okanagan United Growers Ltd. affairs, his services in connection with the organization of the O.U.G. Fruit Products Limited, have

PRESIDENT BEATTY SAYS CANADA'S GREATEST NEED IS IMMIGRATION.

Mr. E. W. Beatty, K.C., President of C.P.R.

Speaking with a wide patriotism, which for the moment disassociated him from his position as President of the Canadian Pacific Railway, in which he is a commanding national figure, Mr. E. W. Beatty, K.C., pointed out that the future of Canada, and the success of the Canadian National Railway depended upon the adoption of a sane and aggressive policy for attracting to Canada millions of new people.

"I am afraid," he said, "that many people in Canada do not sufficiently realize that the most urgent and essential need today is increase in population, not only to provide traffic for the railways, but also to help pay our enormous national indebtedness. So far as the railways are concerned, the National Railways are even more concerned in this demand for population than the Canadian Pacific, owing to the extent of sparsely populated country in which so much of their mileage is located. It was an aggressive immigration propaganda that built the Canadian Pacific Railway, and without immigration the prospects of the Canadian National are, in my opinion, hopeless. Any legislation which would stem the tide of desirable immigration must inevitably pile up further deficits, for immigration is Canada's great salvation."

been deeply appreciated by the Board.

GENERAL.

The progress of the co-operative idea in the Valley during the past year has been most marked, probably encouraged to some extent by the widespread movement in other sections towards co-operative organization of producers, but more directly due to the uniformly good returns being secured year after year to the growers in the Organization and the realization of the fact that the greater the percentage of the tonnage controlled by our own Sales Force, the

better distribution of our fruit can be made, and the better prices secured.

The present seems a most opportune time for all locals to make a systematic effort to secure additional tonnage and to arrange their building accommodations as to provide adequate handling and storage space for all crops that may be secured. No Local should be content with less than one hundred per cent. of all tonnage in their district.

Signed on behalf of the Board,
J. T. MUTRIE,
President.

SAFETY FIRST.

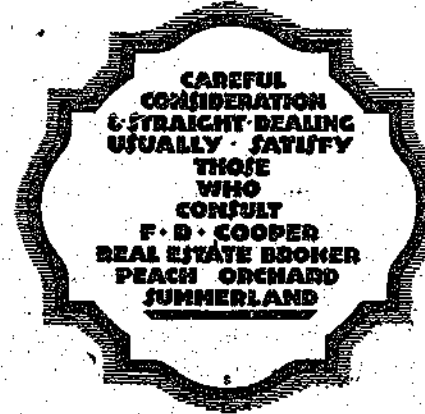

(From Pulp and Paper Magazine.)

An Oklahoma editor tells of an old Indian that came into his office to subscribe for the paper. The editor took the money, then the Indian wanted a receipt. The editor tried to talk him out of it. Mr. Indian insisted on getting the receipt.

After making it the editor wanted to know why he was so persistent about wanting a receipt. The Indian said, "Me die some time. Go to big gate and Saint Peter ask if I been good Indian. I say yes. He say did you pay debts? I say yes. He say did you pay editor for paper? I say yes. He say where is receipt? I no have it. I have to run all over hell to find you and get receipt."

—Exchange.

Note.—Subscribers to Pulp and Paper Magazine get receipts—on asbestos paper if desired.

NOTICE

I beg to inform my friends and patrons that I have sold out the Drayage and Livery Business which I have carried on in West Summerland during the past eight years under the name of G. R. HOOKHAM & CO.

I wish to thank them for their patronage, and to beg them to extend to my successors

Messrs ALEX. SMITH and GEORGE HENRY

who have been associated with me throughout the whole period of operation of this business, the same measure of confidence and goodwill which they have accorded to me.

G. R. HOOKHAM.

CHOCOLATES that delight.

We are now offering a complete line of Fresh Chocolates. TRY THEM!

Fresh Fancy Biscuits in packages and bulk, all priced very close. BANANAS AND ORANGES.

ICE CREAM AND SODAS

Meals and Lunches served at all hours. Home Cooking to order.

READ THIS IMPORTANT ANNOUNCEMENT

Within the past few months, along with all others engaged in the retail business, we have met with serious losses through the rapid reduction in price on all merchandise carried by us. We do not ask for public sympathy, although that might be very well extended to us, as the stocks were accumulated to serve the wants of this community.

We desire to inform the public that all our goods bought before the decline in prices have been absolutely marked down on a basis of present values. We did not wait for opposition to put this into effect, but as far back as November we made a reduction of 20 per cent. on Dry Goods, and Food Stuffs have gradually declined since then. The beginning of the year, however, ushered in the greatest reduction in most lines of groceries, and our prices are cut just as low as a living profit will permit.

So many of our esteemed customers prefer to do their business with us on 30 days credit, because they cannot come into town during the busy season and prefer to telephone their orders and have them delivered, availing themselves of

this service and thus saving time for the more important work on their orchards. Because we value their business, which is considerable, we do not feel justified in declaring for a cash business, as we do not think it would be to the best interests of all the community. On the other hand we realize there are a number who would rather pay cash and take their goods with them, thus saving the expense of accounting and delivery, and we have come to the decision that to those who desire to do business this way we will give a reduction of 5 per cent. on all Groceries, paid for in cash at the counter.

This is an effort to meet the wishes of all, both those who desire to do business on a credit or cash basis.

CARE OF SEED POTATOES AND PREPARATION FOR PLANTING

By W. W. Hubbard
Superintendent Experimental Station, Fredericton, N.B.

SELECTION.

In arranging for the seed supply of tubers from one's crop, the first steps should be taken during the growing season to get the seed from healthy, vigorous, large-yielding hills. When harvesting time comes these hills should be gathered separately from the rest of the crop. The tubers should be sun dried and all showing cuts, bruises or disease of any kind, thrown out. Such supply can then be kept for a seed area for the following season.

Where the main crop is destined for this seed trade, equally good care should be taken in the harvesting and sorting before going into winter storage. If the weather is bad at digging time, and the tubers have to be taken wet from the field, they should be spread out to dry on a barn floor or other airy place and be re-sorted before going into storage.

STORAGE.

The best storage for maintaining vitality of seed tubers has not so far as the writer is aware, been absolutely determined. Seed from a dry cellar with temperature running from 40 degrees to 50 degrees has been equally vigorous with that from a moist cellar at a temperature of 34 degrees to 38 degrees, though, of course, there would be great loss of bulk and weight in the former case. Potatoes kept in pits with excess of moisture and minimum of ventilation have also given vigorous plants.

When potatoes are first stored there should be free ventilation to carry off all latent heat and moisture and to reduce temperature to below 40 degrees. If the floor of storage is very damp the bins had better be raised by a wooden floor. If it is dry there is nothing gained by the floor. If bins are very deep (over six feet) they had better be broken up by hollow partitions placed not more than ten feet apart; though the writer has seen potatoes keeping well in very large, deep bins.

The storage should be so constructed as to keep cool in the spring. It should be possible to keep it below 40 degrees, to prevent sprouting until such time as the tubers are wanted.

FORCED SPROUTING.

For an early crop, it is a common practice to take the seed tubers to a light room of about 60 degrees temperature by the 20th March, to give them four to six weeks to warm up and sprout. A thick green sprout not more than a half inch long is wanted. The exact gain in growth from this treatment has not been determined. In one trial at the Experimental Station, Fredericton, the difference in growth as between seed so treated and seed taken immediately from the cellar, was very slight. Plants from the sprouted seed were only from two to three days ahead of the others.

DISINFECTION.

To kill any spores of common scab, and, to some extent, Rhizoctonia, the potatoes should be treated with a disinfectant. The safest to use is formalin, at the rate of a pint to 30 gallons of water. The tubers are best bagged and then immersed for two hours.

Investigators are now trying out methods of disinfection whereby the use of heat and greater strength of solution will materially hasten the process of disinfection.

CUTTING THE SETS.

Experiments have proven quite clearly that the most economical way

to use seed is to cut to sets weighing not less than one ounce and not more than two ounces, with from two to three eyes to the set. Cutting by a machine or a cutting board may be economical in large commercial operations, but as when using these the size of sets and number of eyes cannot be well regulated nor elimination of internal diseases carried out, the advantage of speed may not be good economy.

To make sure that no sets infected with Black Leg, Fusarium Wilt, Late Blight and other possible troubles are planted, the best procedure is, first, to throw out all cut and bruised tubers, cut a thin slice off the stem end and then discard any tubers showing discoloration. Two knives should be used, one kept standing in a can of formalin solution; immediately a discolored potato is cut, the knife used should be put in the disinfectant and the other knife taken.

As the sets dry out quickly when cut and will heat if left in piles or barrels, they should be coated with dust. Gypsum, or land plaster, is one of the best materials to use, and if from two to four quarts is spread through the barrel of seed the sets will keep cool and firm without deterioration for days and even weeks. Air slaked lime is frequently used and sometimes road dust and sulphur. Lime, if not thoroughly slaked, may injure the eyes and makes the sets unpleasant to handle.

NEXT WEEK'S WORK IN THE ORCHARD

BY R. H. HELMER,
Supt. Experimental Station.

Our land should all have been stirred by cultivation by now, and we can sow all grains, seeding vetches, clovers, and alfalfa and grasses in order, mark for irrigation as soon as sown. This allows the seeds to fall back in the furrow and make a better stand.

Mangels and carrots for feed may be sown now. Spraying should be done as rapidly as possible. Prepare the seed bed for all your crops better this year than last, and we feel sure that we will get better germination of our seeds. Don't over saturate the soil at the first irrigation on your annual crops. Make them develop deep, strong roots to withstand the hot dry weather.

Joseph and Isaac went to hear Billy Sunday preach, and after service, as they were going home Joseph said:

"Vell, Isaac, vat you tink of him?"
"I didn't like him," said Isaac.
"Too much hell. It was hell, hell, hell, all the time. And I don't believe there is any hell, Joseph."
"No hell?" asked Joseph, in amazement.
"No," answered his friend.
"Vell, then, Isaac," said Joseph, "if there is no hell, where is bizness gone?"

Public School Class Leaders

Below is a report giving the names of the class leaders in the March examinations in the Summerland Public Schools, together with the names of the pupils in each division making perfect attendance. During the month the attendance averaged 95.5 per cent., a very high average for any school to make.

High average marks were made by the pupils in the monthly tests.

Division I.—S. A. MacDonald.
Class Leaders: Dorothy Dunsdon, Ella Bowering, Helen White, George Wilson.

Perfect Attendance: Dorothy Dunsdon, Gertrude Arkell, Helen White, Florence Clark, Marjorie Atkinson, Laura McLachlan, Margaret Munn, Ella Bowering, Betty Caldwell, Dorothy Garnett, Thelma Howell, Orville Dunham, James Smith, Leslie Gould, Archie Scott, Willie Ritchie, George Dewar, Mabel Shields.

Division II.—D. Davidson.

Junior Fourth.
Class Leaders: Jean Blewitt, Bessie Tomlin, Emily Wallock, Alice Trayler.

Perfect Attendance: Jean Blewitt, Rose Bardsley, Mary Dunham, Ernest Doherty, Lillian Hunt, Eric Johnson, Arthur Morgan, Jack Nicholson, Jessie Rutherford, Ivor Solly, Nic. Solly, Jim Smith, Nellie Thompson, Willie Thornber, George Ward, Emily Wallock, Myrtle Walden, Harvey Wilson, Archie Nicholson, Cecil Watson.

Division III.—B. Ball.

Senior Third.
Class Leaders: Tom Harris, Edgar Walker, Mary Gartrell, Alannah Sutherland.

Perfect Attendance: Jack Bernard, George Denike, Jack Dunsdon, Rhodes Elliott, Georgia Foster, Mary Gartrell, Nora Hampshire, Tom Harris, Ella Jackson, Marjorie King, Joe McLachlan, Frances Rutherford, Gertrude Shields, Alannah Sutherland, Harold White, George Washington, Margo Riley.

Division IV.—J. Nicholson.

Junior Third.
Class Leaders: Mary Simpson, Ian Campbell and Jim Reid equal, Dorothy May Solly, Kenneth Gartrell and Jim Purves equal.

Perfect Attendance: Violet Beck, Louise Bell, Ralph Blewitt, John Caldwell, Ian Campbell, Carolyn Clark, Norah Clements, Johnnie Cummings, Audrey Davidson, Ethel Denike, Wilbert Devitt, Isabel Dickinson, Albert Doherty, Alice Doherty, Fred Dunsdon, Loretta Inglis, Arnold Koch, Mildred Laidlaw, Dorothy Lott, Edith Monro, Mary Munn, Ethel Pilkington, Percy Rand, Jim Reid, Mary Simpson, Edna Smith, Edward Smith, Dorothy May Solly, Edna Trayler, Fred Walton, Annie Williams, Iris Williams, Arnold Cowan, Maud Hayworth, Gwendoline Riley.

Division V.—A. R. Dale.

Junior Third.
Class Leaders: Euido Koch, Grace Crego, Ruby Crego.

The Summerland Review

Established August, 1908

Published at Summerland, B.C., every Friday by
THE REVIEW PUBLISHING COMPANY, LIMITED
Ralph E. White, Editor and Manager

An independent family newspaper covering Peachland, Summerland and Naramata and adjacent districts.

Subscription Rates—In British Empire, in advance, \$2.50 per year; six months, \$1.40. To U.S.A. and other countries, \$3.00 per year. Advertising Rate Cards and information respecting territory and samples of paper mailed upon request, or may be seen at the office of any advertising agency recognized by the Canadian Press Association.

Advertisers must have copy in by Wednesday noon in order to insure changes for standing advertisements. New display advertising copy can be accepted one day later.

Correspondence—Letters addressed to the Editor and intended for publication must be short and legibly written on one side of the paper only. The longer an article, the shorter its chance of insertion. All communications must bear the name of the writer, not necessarily for publication. The publication or rejection of articles is a matter entirely in the discretion of the Editor. No responsibility is assumed by the paper for the opinions expressed by correspondents.

FRIDAY, APRIL 1, 1921

A good newspaper and Bible in every house, a good schoolhouse in every district, and a church in every neighborhood, all appreciated as they deserve, are the chief support of virtue, morality, civil liberty and religion.

—Franklin.

Is Summerland to maintain its enviable reputation as the producer of the best annual apple show in B.C.? This very creditable position she has held for some years, but last year, whether through loss of interest or for other reasons, the show was passed up. The present members and officers of the Agricultural Society would welcome new blood and wider co-operation. Announcement of their annual meeting to be held next week is made in these columns, and it is the duty of every one interested in our fruit industry to attend this meeting. Personally we are of the opinion that the directorate should be increased in numbers so that the work may be further divided and the burden lightened from the shoulders of a few who have been conducting the show.

May we be permitted to suggest that some additional features be made and that every encouragement be given to that newer branch of the fall fair, the live stock section.

Restoration of public confidence in municipal government is the most important work awaiting action by the Legislature at its present session.

The general municipal condition throughout the Province is one of emergency. At the very instant that financial authorities proclaimed real estate purchases and sales to be an undesirable species of activity, municipalities ceased to be able to get an adequate revenue—because municipal revenue was largely based on land taxes and once real estate dealings ceased revenue ceased because so much land was allowed to revert for taxes.

Municipal necessities continued not only to exist but to

Hon. Manning Doherty: "I went over to git the ban took off you an' they put it on me also."

increase. Maintenance of existing institutions requires more money than is available after meeting fixed charges. New works are of urgent necessity.

The functions of municipal government come into such close contact with the general home life of the people, that it equals in importance any other branch of government.

Legislature and Executive can do no more important work than to restore the credit and efficiency of the municipalities.

Adequate means of securing revenue by a fair apportionment of existing taxes would afford an equitable remedy without imposing any further burdens on the residents of the Province.—Vancouver Sun.

The Manager of the Made-in-B.C. Campaign is asking that a list of the different products of the various districts and communities in the province be sent to his office in order that information may be available for those who wish to know where they can obtain commodities produced in British Columbia.

The value of minerals produced in British Columbia during the past year totalled \$20,580,312, which is an increase of \$2,284,312, or seven per cent. over the 1919 total, according to figures made public recently by the Department of Mines. Big increases were registered in silver, copper and zinc.

ODE TO THE MEN

(By One of the Girls).

Little "Mannie" why that frown,
Let me pull your panties down.
I should think your legs would freeze
With them half way to your knees;
When you started in to dress,
Hitched 'em up too tight, I guess,
And you have such skinny legs,
They sure look like wooden pegs.
Say, your legs are awful small,
They don't look like legs at all.
I guess you want to show your socks
With their pretty colored clocks.
But you surely are a sight
With your pants so short and tight.
Don't you s'pose the girls will laugh
When they see your skinny calf?
If I had a calf like that
I would try and make it fat.
But, perhaps you like it so—
Looks so genteel, don't you know!
Put some spats on, sonny, please,
And try to cover up your knees.
I don't like to see them so
For they are so thin, you know.
I'm afraid that you will fall,
'Cause your leggies are so small.
You are not to blame, poor lad,
'Cause your panties fit so bad.
Then your hair is shaved so high.
Mister Man, you are a guy.
You're a figure, I declare!
Someone's corsets you must wear.
Throw away those corsets, dear,
For they make you look so queer.
Don't you think with that moustache
With the girls you'll make a mash?
Yes, I think it safe to say
You'll be coralled some sweet day.
Some poor girl, it's safe to bet
Will get fooled by mamma's pet.
Then she'll put a strink on you,
Lead you round for folks to view.
Now, I'm going to tell you
What I think you ought to do.
Turn that cuff down on your pants,
Have them long enough to "wance."
Put on good old home-made socks,
Unadorned by fancy clocks,
Cover up your skinny shanks,
Then you'll have the people's thanks.
Take from me this little tip,
Shave that down from off your lip.
Grow some hair behind your ears,
Say farewell to butcher's shears.
Banish, too, that monacle,
It makes you look so comical.
Throw away your cigarette
Lest it run you into debt.
Stand up straightly if you can,
Do not be a "cissy" man.
So long, "Mannie," do not cry,
See you sometime soon;
Good-bye.

Canadian Players Being Organized

(Continued from Page 1).

Another feature of the stage equipment which will be viewed with special interest is the "dome horizon" or plaster sky which Mr. Aikins is constructing as a permanent background for his stage scenes. This has been used with marked success in several theatres in the United States and also in England, but the "dome horizon" at Naramata will be the first to be installed in Canada.

Arrangements are now under way for a series of student productions to be given this summer, also for the board and lodging of such students as may come from a distance. It is hoped that there will be many in the

Valley who may wish to co-operate in this enterprise either as actors, playwrights, scene makers or costume designers. Mr. Aikins will be glad to hear from anyone interested in working along any of these lines. He has taken for this organization the name of Canadian Players, and hopes that from the students working with him this and other seasons he may be able to make up a professional company to tour Canada in a repertory of Canadian plays. The dates of student productions at the Home Theatre will be announced later.

Prince George has a new newspaper "The Leader." It is a bright, clean, well edited paper, and carries much interesting news. The editor is Mr. J. G. Quinn, well known in British Columbia newspaper circles.

The MUTUAL Fruit Company of Vernon

Takes Over

THE STEUART FRUIT COMPANY

The Mutual Fruit Company begs to announce that it has purchased the Steuart Fruit Company which has for so many years served the Fruit Growers of the Summerland and Southern Okanagan districts

The Mutual Fruit Co. is one of the best known shipping agencies in the Okanagan Valley and has, since its inception a few years ago, proved one of the most efficiently conducted organizations. Its service to the growers has been of the highest order.

With its prairie connections wide distribution is assured for Okanagan Fruits and Vegetables. The American connections of this firm leave nothing to be desired. The Mutual methods and business policy assure growers of the highest possible returns.

The Mutual Fruit Company is an organization that has sold thousands of cars of Fruit and Vegetables and has given excellent returns to the growers.

Under the auspices of the Orange Order of Summerland, a concert will be given in the College Gym. on Thursday, April 7th at 8 p.m. in aid of the True Blue Orphanage in Vancouver. Admission 35c. and 50c. C

The West Summerland Women's Institute meets in the Parish Hall on Friday, April 8th at 3 o'clock, when Mr. Helmer will speak on "Gardening." Further donations of eggs for the Hospital will be acceptable. C

At the St. Andrew's Church, West Summerland, on Sunday morning, April 3rd, there will be a reception service for new members followed by the Sacrament of the Lord's Supper. All members of the congregation are requested to be present. Any others who wish to attend are cordially invited to do so. C

SUMMERLAND BOYS HONORED

Two out of four presidents recently elected as heads of undergraduate societies in connection with the University of British Columbia are Summerland boys. The following paragraph is taken from an article in the Vancouver Province covering the student elections:

"Mr. John P. G. McLeod, Arts '22, one of the outstanding members of this year's junior class was the unanimous choice of the arts men for the position at the head of their undergraduate body."

And again: "Mr. G. H. Harris, Agriculture '22 was chosen head of the Agriculture Undergraduate Society for next session. Harris was opposed by Mr. Bert Sweeting, another well known Aggie, and the final vote was 20-17."

The science men, and the student body of the Literary and Scientific departments also elected presidents. John McLeod is well known among Summerland citizens, being a son of Rev. A. W. McLeod, an instructor here in the Okanagan College, and for a time himself an instructor in physical culture in the same institution.

Howell Harris is a resident of Summerland, the eldest son of Mr. and Mrs. J. W. Harris. It is somewhat remarkable that two out of the four presidencies should be secured by Summerland boys, fellow students at Okanagan College during the last year it was in operation. They also enlisted for overseas service in the same battalion the 1916th.

SUMMERLAND WEATHER REPORT

Below is a report furnished by the Dominion Experimental Station here for the week ending Tuesday:

Table with columns: Date 1921, Max., Min., Rain (In.), Sun. shine. Rows for Mar. 23, 24, 25, 26, 27, 28, 29.

Geo. Ross of the C.P.R. spent last week-end at his home here.

The Treasurer of the Summerland Hospital Society gratefully acknowledges the receipt of the sum of \$18.35, being the proceeds of the Open Forum.

Letters received by residents here from friends on the prairies tell of stormy weather and low temperatures. Living in our delightful climate it seems hard to realize that friends east of the Rockies are suffering the discomforts of below zero weather.

The railway extension from Okanagan Falls to the Government Demonstration Farm below Fairview will be made this summer, according to recent reports. The K.V.R. Company last fall completed the grade from South Penticton to the head of Dog Lake, and steel will be laid this spring. From the head of the lake to the Falls service will be maintained by the steamer York.

FOR SALE.—Cheap, good wagon, box, hay rack, doubletrees, complete. E. N. Rowley. 35tf

FOR SALE.—Seed potatoes, excellent stock, bench land grown in the Vernon district. Netted Gem, Carmen, and Early Rose. \$2.75 per bag, \$50.00 per ton. F.O.B. Vernon. Write H. H. Evans, P.O. Box No. 740, Vernon, B.C. 35-37

FOR SALE.—Planet Jr. seeder with fertilizer attachment. G. J. Coulter White. 35,36

Passing Events: Social, Personal, &c.

Dr. and Mrs. Andrew returned on Tuesday morning after a week's visit to the Coast.

A son was born to Mr. and Mrs. Clarence Craig at the Summerland Hospital on Monday, March 28th.

Supt. R. H. Helmer of the Experimental Station here attended the annual bull sale at Kamloops last week.

Advised by wire of the serious illness of his father at Clive, Alberta, Mr. J. L. Crego left last Friday to visit him.

Daily connection with Vancouver by the K.V.R. through Coquihalla Pass is likely to be resumed about the middle of May.

M. Steuart of the Steuart Fruit Co. has been on the prairies for the last week or so in connection with his fruit shipping business.

Mr. and Mrs. J. J. Ring of Crystal City, Man., spent a couple of days at the Beavis home on their way east from Cawston, where they had spent the winter with their daughter.

Mr. and Mrs. P. G. Koop arrived here on Tuesday coming from Victoria, where they had been on a short visit since their arrival from England. They were accompanied by Miss Koop.

Mrs. and Mrs. Jas. Clark and three children have arrived here from Elkhorn, Man., with the intention of making their home in Summerland. They are at present the guests of Mr. and Mrs. D. C. Thompson.

Mr. and Mrs. H. Cox and children are leaving shortly for their former home in Nova Scotia. Their property in Victoria Gardens has been bought by Mr. McIntyre who has been living near the Hospital.

Scott Rand is putting up a store building nearly opposite the Rialto Theatre which will be occupied by W. W. Borton with his plumbing and heating business, as soon as it is finished.

During a heavy squall last Monday evening several electric light poles in the vicinity of the Conway property were blown down, putting a section of the lighting circuit out of commission. Repairs were made next day.

Attention is directed to the change in the schedule of the Summerland-Naramata ferry. The summer time table goes into effect to-day, April 1. It is expected that the new contract with the Ferry Company will require that they make two trips a week to the Paradise wharf.

Remember the Community Bazaar to be held by the Ladies' Hospital Auxiliary on April 28th in the Empire Hall. Every lady in Summerland is requested to make a contribution to one or more of the stalls. Particulars from Mrs. Solly. 35

Two car loads of range cattle arrived here on Monday for Finley Monroe of Meadow Valley. The cattle were unloaded at the C.P.R. station and driven back to the range in Meadow Valley. In doing so two or three animals got away and much difficulty was experienced in finding them.

Mrs. VanAllan and her daughter, Miss VanAllan, have returned from an extended visit in the East. We are informed that Mrs. VanAllan is well pleased with the new hospital building, particularly the Marsden VanAllan memorial wing, which is being built at her expense.

A carload of nursery stock was unloaded here this week by Mr. Hugh Lambie, Okanagan representative of the B.C. Nurseries Co., Ltd. Mr. and Mrs. Lambie, who moved from Summerland to Vancouver last fall, are returning to the Okanagan to reside, and will make their home in Kelowna.

"The Customs, Industries and Scenery of Ireland" was the subject of an interesting informal talk given by the Rev. H. E. Livingstone at the regular monthly meeting of the Summerland Women's Institute, held a few days ago in the parlor of the Lakeside Church. Being a native of the Emerald Isle, Mr. Livingstone was able to give much first hand information of interest to his hearers, and he was accorded a hearty vote of thanks. Mrs. Geo. Ross in her well known and pleasing manner delighted the Institute members with a vocal solo. Following the routine business Mrs. S. Angove and Mrs. W. J. Robinson gave full reports of the District Convention held in Penticton. The members decided to hold a home cookery sale early in April.

Mr. D. L. Sutton of Endiang, Alta., is the guest of Mr. and Mrs. Pennant.

Mrs. Richard Roe and Miss Kathleen Morrison have returned from a visit to Vernon.

A daughter was born to Mr. and Mrs. C. W. Lees at the Summerland Hospital on Saturday last.

Mrs. M. Bennett and family of Penticton were the guests of Mrs. Crego during the Easter holidays.

A daughter was born to Mr. and Mrs. W. J. White on Tuesday, March 22nd at the Summerland Hospital.

Miss Dodge, of the local telephone office, returned on Tuesday from a short vacation spent with friends at the Coast.

Mr. and Mrs. O. F. Zimmerman came in from Vancouver on Tuesday morning after a week or so holidaying there.

The site of the new Storage Company building is being cleared preparatory to construction of the two storey structure.

J. H. Bowering left here Monday en route to his former home in Bristol, England, where he will visit for a few weeks.

Mr. and Mrs. Gorrell who have been residents of Peach Orchard for a year or more, have returned to their former home in Alberta.

Summerland and other southern Okanagan centres will be linked up with the National Railway telegraph lines within the next week or so.

Quite a number of Summerland people were the guests of Mr. and Mrs. Bray at the Penticton Hotel, March 20th, when they entertained about 75 friends at a formal dinner.

The Fruit Union has completed arrangements for a new packing house at Naramata. The additional space is absolutely necessary to take care of its growing business there. Reference is made to this in our Naramata column.

Mr. and Mrs. Robert Robertson of Pilot Mound, Manitoba, spent several days in Summerland recently renewing acquaintances with former Manitobans. While here they were guests of Mr. and Mrs. Wm. Ritchie. They left for the East on Thursday.

Elsewhere in this issue is the announcement that Mr. J. W. Gibson, Superintendent of Agricultural Instructions, will give an illustrated address on "Beautifying the Home Surroundings" under the auspices of the Summerland Agricultural Association. Mr. Gibson is no stranger in this community, and has been for several years actively associated with educational work along the line of horticultural and agricultural instruction for the young, the beautifying of public grounds, etc. As this lecture is open to the public and no admission charged, Mr. Gibson should be greeted with a large audience.

CANADA COPPER COMPANY MAY CHANGE OWNERSHIP

There are rumors in the air that the Canada Copper Company's mine at Copper Mountain, and mill at Al-lenby are to be reopened shortly, and that a considerable change in the ownership of the property is about to take place. Two companies, the Kettle Valley Railway and the West Kootenay Power Company, which virtually are subsidiaries of the C.P.R., have a large amount of money tied up in the railway and power line to this property. Add to this that the Consolidated M. & S. Co. is in need of copper ore to run its large copper smelter, refinery and rod mill, and it is easily possible to draw inferences. —Grand Forks Gazette.

BUILDING HOTELS AT OSOYOOS

(Oroville Gazette). Two hotels are to be erected at once at Osoyoos, one of 20 rooms and the other of 40. It is understood that local carpenters and contractors have put in a bid on the larger building. From the same source it is understood that much building is in contemplation this summer, not only at Osoyoos but on the big irrigation project that is partially completed on the British Columbia side of the line. If the building boom that is predicted is carried out that vast stretch of territory that has been almost without a building since the country was first settled will speedily become covered with neat and comfortable homes, and the erstwhile barren country be made to blossom like the rose.

PRETTY WEDDING AT "STRATHYRE"

Young Scotch Couple Married Here Wednesday.

A particularly smart wedding was solemnized at "Strathyre," the home of Mr. and Mrs. Alec. McGown; on Tuesday last, when Mr. A. C. Muir, an Old Country friend of Mr. McGown's, was united in marriage with Miss Elsie B. Dunn of Perth, Scotland.

The ceremony was performed by the Presbyterian minister, the Rev. W. A. Alexander. The bride was given away by Mr. McGown, and little Sheila and Cameron McGown acted as bridesmaid and page. The groom was supported by Mr. Cameron Barr. The Bridal March from Lo-hengrin was played by Mrs. Geo. W. Johnson at the commencement of the ceremony, and while the register was being signed Mendelssohn's Wedding March was given. The bride was prettily gowned in white crepe de chine with overdress of silver lace trimmed with white heather and orange blossom, and wore a handsome Brussels lace veil. She carried a bouquet of white lilies and pink carnations. The children were daintily attired in silk smocks.

Mr. and Mrs. H. S. Blanchard are planning to leave here about the middle of April to go to Winnipeg. We understand Mr. Blanchard will re-engage in railroad work.

Mr. W. P. Secrest and his son John former residents of Summerland and now residing at their big ranch on Meyers Flats near Fairview, were visitors in town on Tuesday.

Mr. Blethen who has recently arrived here from Washington State, has bought from Wm. Johnston the orchard lot in Peach Valley which he has been holding for the last year or two.

According to our Naramata correspondent, Mr. J. M. Robinson is opening a real estate office in Penticton. Another item of special interest from our sister town, is the report of the recent visit of Bishop Doull, who is considering the purchase of the Naramata Hotel for use as a school for girls.

Output Will Be Restricted By Lack of Shipping Facilities. About 2,250,000 cases of Australian apples will be available for export during the coming apple season, according to estimates published by the Canadian Department of Trade and Commerce. It is doubtful, however, states the paper, whether shipping facilities can be obtained for the movement of anything like this quantity.

In shipping circles efforts are being made to transport the following quantities: From Tasmania, 750,000 cases; from Victoria, 350,000 cases; from South Australia, 150,000 cases; and from West Australia, 200,000 cases. This makes a total of 1,450,000 cases, and each case contains about 40 lbs. Many exporters, however, do not anticipate that more than 1,250,000 cases can be shipped overseas owing to the lack of cold storage facilities on steamships now engaged in the Australian trade.

The season so far has been excellent, but much can happen in the condition of the fruit from the last week of February, when early varieties come on the market, until towards the end of April, when the late varieties are picked.

All Goods Amounting to \$10.00 or Over Delivered Free.

ANNOUNCEMENT.

We take pleasure in announcing that we have sold our fruit packing and shipping business to the Mutual Fruit Company, and we trust that the growers will give our successors the same generous support that they have accorded to us in the past.

We take this opportunity to thank the growers of Summerland for their loyal support during the years we have been in the shipping business.

THE STEUART FRUIT CO.

Many beautiful presents were received by the happy couple. A large gathering of friends had been invited to witness the ceremony, at the conclusion of which they sat down to a real Old Country wedding feast, at which the wedding cake was cut by the bride. The health of the bride and bridegroom was proposed by Mr. McGown, introducing in kindly terms anecdotes relating to his friendship through life with Mr. Muir, to which the bridegroom responded in a happy, humorous manner. Mr. R. Pollock proposed the toast of the ladies, pointing out their ever increasing sphere of influence, to which the Rev. W. A. Alexander replied in a very pleasing little speech. Mr. Geo. W. Johnson proposed the toast to the host and hostess, emphasizing the happy fortune of the bride in finding on her arrival such sincere friends so far from the homeland. A most entertaining musical programme followed in which the majority of the guests took part.

Early in the evening the bride and bridegroom departed amidst a shower of good wishes—and confetti—for their honeymoon, which is to be spent at the Coast cities. A most happy and enjoyable evening was brought to a conclusion about eleven o'clock by the singing of Auld Lang Syne, and general expressions of appreciation.

GROCERTERIA SPECIALS. 2 lbs. CREAMERY BUTTER \$1.25. With every \$5.00 purchase on SATURDAY and MONDAY we will sell 2 lbs. of Creamery Butter for \$1.25. Lux, per pkg. .12. .. The Winding Trail ..

Settling the Whole Matter

It is too bad that responsible Canadian authorities, Federal, Provincial and Municipal, cannot be persuaded to read, mark, learn, and inwardly digest the delightfully simple economic theories of Miss Agnes C. Laut, as given publicity in MacLean's Magazine. Miss Laut is a Canadian lady who, however, lives in the United States, paying Canada periodical visits at intervals of ten years or so, and showing those foolish persons who are mismanaging our affairs, the error of their ways. Two or three years ago, Miss Laut was sent to the seat of war by an American journal, and airily pointed out in its pages how very wrongly matters were being conducted over there. Now, her attention being once more claimed by conditions in her native land, the lady is, or has been, spending a little time in transfixing with discerning eye, the astonishing mistakes we are making, and pointing out the way of salvation if we will only adopt it. In this praiseworthy aim she is incidentally encouraged by one Mr. Seibert, B.A.Sc., who assures the public that Miss Laut's articles are attracting "a lot of attention in the various departments at Ottawa," and who writes of "Our fool land policy" from the standpoint of a Dominion Land Surveyor. Let us grant that Canada, in common with all young countries, has made a few mistakes in her initial efforts at development. Let us also take it for granted that she is likely to make a few more.—It still remains the fact that the term "fool policy" is altogether too sweeping, and is, in that respect, quite in accord with Miss Laut's caption of "For sale for a song" in reference to Canadian properties today.

It may be remembered that, not long ago, I pointed out the absurd inaccuracy of Miss Laut's description of the town of North Bay, Ontario, (in which matter I was afterwards supported by independent testimony from Review readers who knew the district). In the article now quoted from, there appear a few statements which seem to exceed even that in their lack of knowledge. For example, our author says, "In the last ten years, Oriental immigration isn't coming any more to remain. It comes only to work and go back." We who live in British Columbia can tell Miss Laut a different story, maybe. Again, "There are ten jobs in British Columbia to-day for every man there is available to do it." Well, that should be good news for a government which is finding money to feed the unemployed. Then we have this gem of information: "British Columbia cannot feed herself because she cannot clear her heavy timber lands fast enough to raise food for her population." Note the naive simplicity of the word "because." Where in the world has Miss Laut been gathering information concerning this province? One is reminded of the query of a soldier on "blighty" to a sympathetic visitor: "We certainly did enjoy those smokes, lady, but who in ——— taught you how to knit socks? Our Canadian writer (on a visit) seems to imagine a long line of waiting applicants, eager to rush in and fill up tracts of B.C. land just as soon as it can be cleared. She does not appear to have heard, for example, of an area of the most fertile land imaginable, lying south of this district, part of which was lately put on the market on the easiest of terms, and only a moiety of it taken up. She appears to be entirely ignorant of the fact that the C.P.R. have for many years been selling land adjacent to their lines, on twenty year payments, and a cash advance for building and stocking purposes. This estimable Canadian lady (who does not, however, live in Canada) apparently takes it for granted that, given suitable land, the necessary immigrants, possessing the required capability and plenty of capital, will pour in by the hundred thousand, and in ten years would make Vancouver a San Francisco, and Prince Rupert a Seattle! And "clearings, which Labor today could buy at \$200 to \$300, would in ten years sell at, not \$1,000 to \$2,000 for berries, but \$16,000 an acre for suburban lots." Prodigious! Let us get up a few syndicates to buy these magic money making clearings, and then one more to purchase that "big coal mine which the owners will sell for the proverbial song, because they can't get labour to work it—even at \$6 to \$23 per day!

It may perhaps be gathered from these short extracts that Miss Laut's remedy for conditions in B.C. is simply the employment of Oriental labour to clear the timber land we are too lazy to clear for ourselves—and then just watch the rush of immigration! Who is to employ these Orientals, and where the money is to come from, the lady does not state. If the question were put to Premier Oliver at the present moment, his reply might possibly bring a call to order from the Speaker! And the marketing of the valuable timber, felled all at once by those armies of yellow labourers, does not appear to figure in the calculation. As a matter of cold and heartless fact, a great many other considerations are lacking also, and about the only thing quite certain in the matter is, that what Miss Laut does not know about Canada in general, and British Columbia in particular, would fill several large volumes!

Peachland Doings

A Weekly Chronicle Furnished By Our Local Representative.

Friends here of Willie Williams who formerly clerked in the general store will be interested to learn that he is the proud father of a baby girl born recently in Toronto, where they have made their home since marriage.

Mr. R. H. Huston returned Thursday morning after a short visit down the lake.

Mr. J. A. Edgecombe returned on Thursday evening after a short business visit in Vernon.

Mrs. and Mrs. Cuthill and Dianna and Mrs. Tewart left on Friday morning for England where they expect to visit for six months or more.

Mrs. Burrows left on Friday morning for Raymore, Sask. Her daughter, Mrs. Maxwell, whom she had been visiting, accompanied her part way, returning home on Saturday evening.

Mr. Robertson was a visitor to Kelowna on Friday to see his wife and his young son born on the 23rd in the Kelowna Hospital.

On Friday last Mr. Kudelka and family enjoyed a visit from a former neighbor on the prairie, Mr. Frank Dier, who has been employed for the past year on the Experimental Station at Summerland. He was accompanied by his little child and returned on the evening boat.

Mr. and Mrs. R. A. F. Moore and son Jack motored up from Penticton on Friday to close out some business in connection with their former residence here and pack up their furniture ready to move it down to their place at Penticton. They remained here over the week-end and accompanied by Mr. Clarke and with Mr. E. F. Gummow's truck took their furniture down in a couple of loads Monday and Tuesday.

Mr. Jack McKinnon has recovered from his short illness and is about again.

Mr. Bell, former teacher of the intermediate grades in the central school here, now of Armstrong, arrived on Friday evening to spend his Easter holiday here. He is a guest in the home of Mrs. L. Mills.

The C.P.R. barge tied up at the wharf here on Friday with a load of lumber consigned to different parties, among others being the much needed and looked for flume lumber for the Irrigation Committee. This latter had been delayed and consequently held the work up, but available.

able men have been put on and the work is progressing.

Miss Johnson, teacher of the intermediate grades of the central school, left Friday morning for Victoria to spend her Easter holidays in her home there.

Miss Alice Cousins is spending her Easter vacation at her home here, having arrived Friday evening from the Adams Lake district, where she has been teaching.

Passengers north on Saturday morning last were Master Dicky Hardisty and Mr. Wm. Ort, the latter paying a week-end visit to his wife and baby at Kelowna.

C. G. McDougald and Bert Keating came home Saturday evening, remaining over Easter Sunday and Monday.

Mrs. Lupton's daughters came down from Kelowna Saturday evening for a short visit with their grandparents and uncle and aunt, Mr. and Mrs. C. Aitkens and Mr. and Mrs. E. C. Aitkens.

Mr. Ekin spent the week-end at home with his wife and family, returning north Monday morning.

Mr. J. A. Edgecombe conducted an Easter service in the Anglican Church on Sunday morning.

Rev. C. D. Clarke conducted Easter services both in the Westbank Church and the Peachland Union Church on Sunday with special music rendered by the choir. Westbank Church have just organized a choir and Easter Sunday was their first appearance, and the result was very gratifying to the pastor.

Mr. and Mrs. Cartwright and daughter Margaret arrived Monday evening to visit Mrs. Cartwright's parents, Mr. and Mrs. W. J. Moore.

WATER NOTICE.

(Use and Storage). TAKE NOTICE that Naramata Irrigation District, whose address is Naramata, B.C., will apply for a licence to take and use 1,500 acre feet and to store 1,000 acre feet of water out of North Fork, Lequime Creek, also known as Chute Creek, Shoot Creek, and Wild Horse Creek, which flows west and south and drains into Okanagan Lake on or near Lot 212, Group 1, Osoyoos Division of Yale.

The storage dam will be located at a point 1 1/2 miles due west of 12 M.P. Lot 2711. The capacity of the reservoir to be created is about 800 acre feet, and it will flood about 80 acres of land. The water will be diverted from the stream at a point about three miles west of 12 M.P., Lot 2711, and will be used for irrigation, Domestic and Power purposes upon the lands described as District Lots 156, 206, 207, 209, 210 and 211, and 266, and Blocks 205, 221, 222, 223, 245 and 247 of Registered Plan 661 and part of District Lot 286, a full description of which is given below.

This notice was posted on the ground on the Seventeenth day of March, 1921. A copy of this notice and an application pursuant thereto and to the "Water Act, 1914," will be filed in the office of the Water Recorder at Fairview, B.C.

Objections to the application may be filed with the said Water Recorder or with the Comptroller of Water Rights, Parliament Buildings, Victoria, B.C., within thirty days after the first appearance of this notice in a local newspaper.

The description of territory to be served is as follows:— District Lots 156, 206, 207, 209, 210, 211 and 266, and Blocks 205, 221, 222, 223, 245 and 247 of Registered Plan 661, and that part of District Lot 286 described as follows: Commencing at the intersection of the northerly boundary of said block 245, R.P. 661 with the easterly boundary of District Lot 286; thence along the northerly boundary of said Block 245 to the north-west corner of the said block; thence south 59 degrees 28 minutes west a distance of 2 chains 34 8-10 links; thence south 82 degrees 25 minutes west a distance of 1 chain 17 4-10 links; thence north 1 degree 58 minutes west 87 links; thence north 78 degrees 5 minutes west 2 chains 65 9-10 links; thence north 54 degrees west 3 chains 32 3-10 links; thence north 9 degrees 14 minutes east 82 4-10 links; thence north 56 degrees 44 minutes east 4 chains 65 6-10 links; thence north 35 degrees 53 minutes west 90 links; thence north 54 degrees 13 minutes east 12 chains 10 1/2 links; thence south 7 degrees east 1 chain 95 2-10 links; thence south 28 degrees 30 minutes east 1 chain 75 3-10 links; thence south 52 degrees 9 minutes east 5 chains 5 1-10 links, more or less, to the east boundary of said Lot 286; thence southerly along the said boundary to the point of commencement.

WATER NOTICE.

(Storage). TAKE NOTICE that Matt G. Wilson whose address is Paradise Wharf, Naramata P.O., B.C. will apply for a licence for the storage of 200 acre feet of water out of Chute Lake and Chute Creek, also known as Lequime Lake and Lequime Creek which flows South West and drains into Okanagan Lake, about 500 feet from North West corner of Lot 212, Group One, Osoyoos Division of Yale District. The storage dam will be located at the outlet of Chute Lake. The capacity of the reservoir to be created is about 200 acre feet, and it will flood about ten acres of land. The water will be diverted from the stream at a point about 1 mile East of Outlet of Chute Creek and will be used for domestic and irrigation purposes upon the lands described as Lots 86s and S.L. 18 in Block 2711. The licence applied for is to supplement a right to take and use water as per conditional Licence No. 1876. This notice was posted on the ground on the Seventeenth day of March, 1921.

A copy of this notice and an application pursuant thereto and to the "Water Act, 1914," will be filed in the office of the Water Recorder at Fairview, B.C. Objections to the application may be filed with the said Water Recorder or with the Comptroller of Water Rights, Parliament Buildings, Victoria, B.C., within thirty days after the first appearance of this notice in a local newspaper.

MATT. G. WILSON, Applicant. By Naramata Irrigation District, Agent. per F. H. Rounds, Trustee. The date of the first publication of this notice is April 1st, 1921.

Naramata News

Current Events of Town and District

The Unity Club held its regular meeting on Friday last. Preparations were made for "Cemetery Day," April 1st, when residents are asked to be at the cemetery with picks, axes, shovels, and other weapons with which to carry on a general cleaning up programme, and also fencing operations. A hot dinner will be served to the workers at noon at the Club house. The afternoon's programme included a very instructive paper on "Education" by Mrs. Cash; a piano solo by Mrs. Greene, and a cello selection by Miss Gladys Robinson, accompanied by Mrs. Greene. Refreshments were served by the executive.

Mr. and Mrs. Eldon Smith and their small family left last week for their home in Saskatchewan. They were accompanied by Miss Dorothy Arnold, who will remain with them for some months.

On behalf of Mrs. McAfee, Mr. Littlejohn bought recently the orchard owned by Mr. H. W. Lee, and popularly known as the Wellband property.

Mrs. Hunt and her son Roy, of Kelowna, visited Mrs. Geo. Aldridge during the Easter holidays.

Mr. and Mrs. Lincoln Baker had as their guest during the Easter holidays Mr. Baker's father, from Vancouver.

Mr. and Mrs. Rushberry are spending a short time at the Coast, where Mr. Rushberry is having medical treatment for injuries brought on by a fall sustained some time ago.

Mr. Douglas Kerr of Kelowna was a guest of Mrs. Wells over the weekend.

Mr. and Mrs. Earl Hughes spent Easter Sunday with Mr. and Mrs. D. O. Hughes.

Easter Sunday at Naramata Church was marked by special music at both Sunday School and Church services. At the former Mrs. Williams sang "What will you do with Jesus," and at the latter, Mr. and Miss Bracewell sang "Love Divine," and Miss Bracewell rendered a solo, "I know that My Redeemer liveth." A special choir added greatly to the quality of the congregational singing, and contributed an anthem. Mrs. Languedoc presided at the organ at both services. The Church was suitably decorated with daffodils, narcissus, and primulas, the girls of Mrs. Ameron's class being largely responsible for the flowers.

Mr. J. M. Robinson will shortly open an office in Pentiction, under the name of J. M. Robinson & Co., Real Estate Agents and Promoters. Mr. Wm. Robinson will be permanently in this office, which is situated next to Lear's lumber office. It will be opened on April 1st.

Mr. and Mrs. E. W. Noyes of Pentiction spent Easter Sunday with Mr. and Mrs. J. O. Noyes at Naramata.

Mr. and Mrs. Jas. Young have gone to Victoria for a visit of a month or more at the home of their daughter, Mrs. Dempsey.

WANTED

To trade City Property giving a return of \$720 a year for a Bearing Orchard.

For particulars see W. J. ROBINSON

Notary Public, Real Est. & Insurance

BEST VALUES IN THE DISTRICT

We have a good young orchard for \$2,000. Twenty-eight Acres, with 3 room house and one and one-half acres bearing trees for \$3,000. Another good orchard, ten acres, for \$5,000. One acre with good trees and six-room house for \$3,000. Twenty-five Acres at Naramata to rent for term of years. See our prices on residential and business properties. We have large listings and can get you the best values possible.

GEO. INGLIS & CO.

Guests expected at the Syndica House on Wednesday are Miss Dutcher and Mrs. Knight. Reservations have also been made for a party from Vernon consisting of Bishop Doull, Mrs. Doull, and their son and daughter, Judge Chapman and Mrs. Chapman and their son. We understand that Bishop Doull and Judge Chapman are investigating the possibilities of the Naramata Hotel with a view to its possible acquisition for a girl's school.

Dr. and Mrs. Lipsett spent Saturday in Naramata, the guests of Mr. and Mrs. J. M. Robinson.

Mr. Dan McKay has sold to Mr. Rogers the property on the Pentiction Road, lot 20, D.L. 206, which he bought last year.

Mr. Scaife is repairing the damage done to the Syndica Hotel during the recent fire.

A further addition to Naramata's business section is being planned by the Fruit Union, which intends erecting a building beside its present one, as soon as materials can be obtained. The new building will be larger than the present one, being approximately 60 feet by 90 feet, and the athletic organizations are hoping that after the summer work is over, this building will provide them with a more suitable hall for winter sports than they at present possess. The Fruit Union has contracted to handle the crop from 125 acres more than last year, and will therefore make full use of their added accommodation. The first car-load of box shooks for this season's operations arrived this week.

Mrs. Mabel Lyons was a visitor in Naramata on Tuesday, returning to Pentiction by the Sicamous in the evening. Mrs. Lyons has bought a two storey block in Pentiction just beyond the B.C. Hotel, and intends establishing an up-to-date tea room on the lower floor, using the upper floor for a living apartment. Mrs. Lyons has a reputation for success in her undertakings, and her new venture will no doubt make a pleasant addition to Pentiction's business section, as well as being a financial success for herself. Mrs. Lyons is going to Winnipeg in a few days, but will return on May 18th to take over the building and establish her tea room.

Mrs. Lee and her children will leave about the middle of April to join Mr. Lee in Winnipeg.

Lieut. E. F. A. Cooper, an expert accountant of Vancouver, will shortly arrive in Naramata to audit the books of the Okanagan Securities Co., and may remain in Naramata in the employ of the Company.

ISN'T THAT FUNNY?

Two women were married to musicians. The one, a bride of a year, was pushing a baby carriage in which were three fine babies—triplets, all girls. The other woman had been in the bonds of matrimony a couple of weeks. "What beautiful children!" exclaimed the newly married one. "Yes," replied the proud mother; "let me tell you the funniest coincidence. At our wedding supper the boys who played with my husband in the orchestra serenaded him and they played 'Three Little Maids' from 'The Mikado.' Isn't that funny?" "At this the other bride turned pale. 'Mercy!' she gasped. 'At our wedding supper Tom's friends serenaded him, too, and they rendered 'The Sextet' from 'Lucia.'"

Synopsis of Land Act Amendments

Minimum price of first-class land reduced to \$5 an acre; second-class to \$2.50 an acre. Pre-emption now confined to surveyed lands only. Records will be granted covering only land suitable for agricultural purposes and which is non-timber land. Partnership pre-emptions abolished but parties of not more than four may arrange for adjacent pre-emptions with joint residence, but each making necessary improvements on respective claims. Pre-emptors must occupy claims for five years and make improvements to value of \$10 per acre, including clearing and cultivation of at least 5 acres before receiving Crown Grant. Where pre-emptor in occupation not less than 3 years, and has made proportionate improvements, he may, because of ill-health, or other cause, be granted intermediate certificate of improvement and transfer his claim. Records without permanent residence may be issued, provided applicant makes improvements to extent of \$300 per annum and records same each year. Failure to make improvements or records will operate as forfeiture. Title cannot be obtained in less than 5 years, and improvements of \$10 per acre, including 5 acres cleared and cultivated, and residence of at least 2 years are required. Pre-emptor holding Crown grant may record another pre-emption, if he acquires land in conjunction with his farm, without actual occupation, provided statutory improvements made and residence maintained on Crown granted land. Unsurveyed areas, not exceeding 20 acres, may be leased as homesteads; title to be obtained after fulfilling residential and improvement conditions. For grazing and industrial purposes areas exceeding 640 acres may be leased by one person or company. Mill, factory or industrial sites on timber land not exceeding 40 acres may be purchased; conditions include payment of stumpage. Natural hay meadows inaccessible by existing roads may be purchased conditional upon construction of a road to them. Rebate of one-half of cost of road, not exceeding half of purchase price, is made. PRE-EMPTORS' FREE GRANTS ACT

The scope of this Act is enlarged to include all persons joining and serving with His Majesty's Forces. The time within which the heirs or devisees of a deceased pre-emptor may apply for title under this Act is extended from for one year from the death of such person, as formerly, until one year after the conclusion of the late war. This privilege is also made retroactive. No fees relating to pre-emptions are due or payable by soldiers on pre-emptions recorded after June 26, 1918. Taxes are remitted for 5 years. Provision for return of moneys accrued, due and been paid since August 4, 1914, on account of payments, fees, or taxes on soldiers' pre-emptions. Interest on agreements to purchase town or city lots held by members of Allied Forces, or dependents, acquired direct or indirect, remitted from enlistment to March 31, 1920. SUB-PURCHASERS OF CROWN LANDS Provision made for issuance of Crown grants to sub-purchasers of Crown Lands, acquiring rights from purchasers who failed to complete purchase, involving forfeiture, on fulfillment of conditions of purchase, interest and taxes. Where sub-purchasers do not claim whole or original parcel, purchase price due and taxes may be distributed proportionately over whole area. Applications must be made by May 1, 1920. GRAZING Grazing Act, 1919, for systematic development of livestock industry provides for grazing districts and range administration under Commissioner. Annual grazing permits issued based on numbers ranged; priority for established owners. Stock owners may form associations for range management. Free, or partially free, permits for settlers, campers or travellers, up to ten head.

The Review Will Sell It For You—3 Cents per Word

LOCAL MEMBER ON FISCAL POLICY

(Continued from Page 1.)
 \$4,787,873. In addition, there was a blanket vote of \$832,292 for clerical staff salaries, and another blanket vote of \$124,040 for sundry employees under the Provincial Secretary. The House was being asked to grant these sums of money without any information.
 "I think I can speak for the members on this side," said Mr. Jones, "in saying that we are going to ask for this information, and we want it before the votes are passed. We shall expect the ministers in charge of these departments to produce it."
 As to the vote of \$124,040 for sundry employees of the Provincial Secretary, Mr. Jones pointed out that one effect of voting the money this way in a lump sum was to prevent the employees from ascertaining what salary they would receive during the year.
LIQUOR REVENUE.
 He congratulated the Minister upon the increase of revenue during the past year. The revenue had gone up from \$6,906,783 in the fiscal year 1916-17 to \$17,010,595 estimated for the fiscal year 1921-22. He wished to point out, however, that the largest item this year was for liquor. In the past the first place had been occupied by the returns from timber, which heretofore had been about \$2,500,000, but were now considerably decreased. He called the attention of the Government to the remark of a member of the Saskatchewan cabinet who had said that the profits from the liquor industry would damn any government.
 "There is considerable apprehension," said Mr. Jones, "among the members of the House and the cabinet on this question."
 The expenditures for the coming fiscal year were set down at \$19,848,974. This would be about \$40 per head for the population of British Columbia. This expenditure was more than double what it was during the first year that the present Government was in power, and it was four millions more than had been

COUNCIL WRESTLES WITH PROBLEM

(Continued from Page 1.)
 made to lessen the number of irrigation connections on the domestic water mains. The Engineer's recommendation that a flume be built east from Hill Park Gardens at a cost of \$858 was favored. Some repairs now under way on the south main will be made and charged against capital expenditure, to be covered by the balance on hand from the last irrigation loan. The new intake box for the Giant's Head siphon will cost \$103.
 Other expenditures authorized are, Lumsden lateral, \$533, Craig lateral, \$405, Wilson-Bloomfield lateral, \$258, Jones Flat lateral running towards Crescent Beach \$140, Lewes-Monro lateral \$145, to Lewes lot near Zimmerman's \$59, taper section for Garnett Valley siphon and other pipes, \$500, flume near Blair's \$260, other items, \$164, making a total authorized expenditure under this heading of \$7,076. These do not include the general cleaning of the ditches and minor repairs now in process, and which may run to a total of \$2,000.
 An iron and steel plant is to be established on Kaien Island, according to Mr. A. C. Garde, M.E., who has taken an option on the Copper or Zymoet River coal deposits in Northern British Columbia.
 Mr. M. B. Jackson: Is that two per cent. by weight or by volume?
 Mr. Jones: That question is the result of a lawyer representing a farmer's constituency. There was, Mr. Jones contended, something radically wrong with the agricultural situation in the Province. The imports of dairy products last year were \$4,500,000, whereas the Province ought not to be importing a pound or a dollar's worth. The members from agricultural constituencies should get after the head of the department and find out what was wrong. The trouble seemed to be that the department had no policy. All they had been doing was launching into a lot of real estate propositions which promised to result in heavy loss. In the past two years the Province had put into four soldier settlement areas over a million dollars. Thus far they had sold fifty lots at Merville, seven at Fernie, none at Creston, and none at Christian Ranch. The total value of the lots sold was \$49,136. The total investments of the Land Settlement Board were \$1,345,000; and up to date they had sold land to a hundred and twenty-three settlers. The Government's whole colonization policy, in short, must be pronounced a failure.
 Mr. Jones went at some length into the figures connected with the Agricultural Credits Commission and the Land Settlement Board, and especially in connection with the South Okanagan project, showing that in every instance these schemes had been very badly handled and were bound to result in heavy financial loss. He asked the Government supporters to insist upon having these matters looked into and a more careful supervision exercised.
 Mr. Jones next turned his attention to the Department of Public Works, where, he declared, the cost of supervision and overhead was altogether too large a proportion of the expenditure. In the fiscal year 1912-13 the expenditure was \$4,124,000, and the supervision and overhead was \$137,907, or 3.3 per cent. In 1919-20 the expenditure was \$2,367,157, and the supervision and overhead was \$232,357, or 10 per cent. One of the reasons for this was the multiplication of officials. In the Dewdney riding, for instance, with seventy-five miles of road work, there was a superintendent and six foremen receiving \$11,267 out of an expenditure of \$56,000. The Premier had said the other day that "the more you pay, the less efficiency." The condition of the roads in the interior would seem to bear out the Premier's contention in this respect, Mr. Jones said.
 In the Department of Agriculture, Mr. Jones pointed out that the grant this year is \$386,773, or something less than two per cent. of the total expenditure of the Government for the year.

DOUBLE YOUR SALES—REVIEW WILL HELP

YOUR STORE ADVERTISING

"EVERY GOOD STORE, EVEN THOUGH IT BE A SMALL ONE, SHOULD BE ADVERTISED."

Small beginnings, wisely made and persistently followed up, will mean assured growth and larger opportunities for the little merchant—just in the degree that his store merits and earns wider patronage and approval.

A small advertising space costs a small amount of money. Yet it affords a chance to the small merchant to tell why he seeks a wider patronage—what he has to offer that is unusual.

And whether he is located on the beaten pathway of trade or upon an unfrequented byway, his Ad. will lead people to seek him out. And, in due time, he will be able to decide the matter of store location according to his liking rather than according to his necessities.

MUST HAVE NEW SCHOOL FOR FALL TERM OPENING

Trustees Find They Cannot Longer Delay Providing New Eight Room Building. Temporary Quarters Condemned by Inspectors

Thirty thousand dollars for a new school building and equipment will be asked for by the School Board. Acting Secretary R. Pollock was instructed at the School Board meeting on Wednesday to make formal application to the Municipal Council for this sum to be raised by a loan secured by debentures. The members of the Board found no other course open to them, especially after receiving the reports of the inspectors with regard to the existing buildings and the temporary accommodation now being provided.

The following is the report submitted by Mr. J. B. DeLong, Inspector of High Schools:

SUMMERLAND HIGH SCHOOL.

Last summer two class rooms and a small science laboratory were fitted up in the Methodist Church. It was found impossible to properly heat the laboratory; hence it had to be abandoned during the winter months. In my opinion teachers and pupils should not be asked to work under the conditions existing here. The air space is totally inadequate. The location of the blackboard in regard to the light must be a constant strain on the eyes of the pupils. The ventilation is very poor and it is practically impossible to keep the rooms warm in cold weather. The school was certainly fortunate in that we have had such a mild winter. Had the weather been cold it would have been out of the question to carry on. I believe that living in class rooms such as these is a serious menace to the health of the pupils and teachers.

In my opinion the building of a new school cannot longer be postponed—the more especially, as next year a third high school teacher will be a necessity and also because I am led to believe additional accommodation will be urgently needed for the

public school. J. B. DeLONG, Inspector of High Schools. March 15th, 1921.

Another article in this issue tells of the difficulties the Board has experienced with respect to temporary accommodation at the Central.

At the request of the Board, the Department of Public Works forwarded a plan of a two storey building, which it was thought could be built now for \$40,000. The plan after examination was condemned by every member of the Board, too much room being occupied by stairways and halls, the class rooms being much under the minimum size prescribed for the large classes under each teacher here.

Prin. Welsh of the High School, and Mr. Davidson of the Central School staff both told of having inspected a school building in Vancouver built on the unit plan, similar to the plan recently favored by the School Board and endorsed at a public meeting. This building with an assembly hall would cost approximately the same as the less satisfactory two storey building with smaller class rooms and without assembly hall, and the Board decided to proceed with the one storey building minus assembly hall, but with the addition of lunch rooms.

The Board has the promise of the Department of Education to pay one third of the cost of this building. This offer may not be open for another year and in view of the local school situation, the trustees deemed it imperative that a new building should be erected in time for the fall term, if Summerland schools are to be carried on. The secretary was accordingly instructed to write Victoria at once for plans and specifications along the lines adopted by the Board.

THE AWAKENING!—Ireland in the Columbus Dispatch.

Teachers Hear Able Address

A Leading Educationalist Speaks Before Teachers in Convention

The convention of teachers held in Vancouver during the Easter holidays was perhaps the most successful of its kind ever held in the Province. There were nearly a thousand teachers present representing every part of British Columbia, about 35 teachers registering from the Okanagan Valley, two of whom were from Summerland.

Separate meetings of the Federation were held, known as the Public School section and the High School section, for the purpose of considering carefully difficult problems teachers meet with in their work.

The result of these conferences was that several important recommendations with respect to the curriculum were passed and forwarded to the Department of Education. It is gratifying to know that the Council of Public Instruction look upon the Federation of Teachers as deeply interested in the progress of education in the Province and is therefore willing to give careful consideration to suggestions made by teachers actually engaged in the work.

DR. SUZZALLO SPEAKS.

An international coloring was given to the sessions of the convention by the presence of Dr. Henry Suzzallo, President of the University of Washington, who is regarded as one of the most distinguished educationalists on the continent. His addresses were marked by a sympathetic understanding of the teachers' problems, a deep appreciation of the worth of childhood, and a great conviction that the only solid basis of a true democracy is to be found in a fully developed manhood and womanhood.

Below are some excerpts from Dr. Suzzallo's great address on "What constitutes Expert Service in Education." Dr. Suzzallo said that a profession must meet the following tests: It must be true social service, rather than a personal pursuit. The second test was that the element of routine, such as a mechanic, for example, must work under, was not found therein. It required resourcefulness to meet the varying conditions. The third condition was that every real profession was expert service. Any profession failed just to the extent that it tolerated incompetency and narrowness in its ranks. A fourth condition was that the company kept in the profession must be mutually protective of ideals, holding up its own code of ethics, which every profession possesses.

THE REAL GOAL.

Incidentally, he remarked that business would become a profession when it lost the dominant focus as to how many dollars each transaction would bring, and considered instead the benefit to be gained by the other party to the transaction. Dr. Suzzallo added that he could tell the spiritual age of a man just by the route he chose to make life easy. If he preferred the beaten path, shunned initiative and exertion he was old; if every new problem, every new call, appealed to him, then he knew, regardless of sex, that teacher to be young.

"The strength of nations is twofold: It is based on their spiritual height and on their co-operativeness. In their day freedom, liberty, opportunity, individuality, personality have been discussed. Now co-operation is

coming to the fore. The first duty of a nation is to develop the particular gifts of its individuals, and second, to subordinate individuality to purposes of national benefit.

"At one period all the people farmed," he continued, "and then with everyone doing the same work there was no need for imagination or sympathy to understand each other for all thought very much alike. Now with diversity of occupations has come misunderstanding and rifts between the different groups. What is the use of labor to achieve its aims if, thereby, it loses power to co-operate with other groups in the nation?"

POSITION OF THE SCHOOL.

"As an institution the school is in the peculiar position of a bridge between the raw material and finished civilization. You can not make every one equal, for some are born fools," added the speaker, "while some are born wise. The best you can do," he continued, "is to develop every good trait and quality, and give him a free chance to use them. Then he will go out into the world and take the place politically, socially, and economically to which his mental status entitles him."

"I wonder," queried the doctor, "if some policies carried out by educationalists would have been adopted by the people had they been consulted? I doubt it." But after giving instances of the average layman's lack of knowledge as to the progressive educational methods used today, such as in memorizing passages of literature, he considered that the technique of education should be entirely in the hands of the profession. The public, however, had the right to dictate on the subject of how much money should be spent. The public had no business to interfere in the technique of education unless the product was not good. The technique of teaching belonged to the profession and not to the laity.

To the applause of his hearers, Dr. Suzzallo added:

"There is no profession where the public is so loath to give the status of expert service as in the teaching profession. One reason is you are not really experts, and until you are, you must expect the public to be reluctant to give you the respect and reverence which go with expert service. "But the profession must concern itself with guarding its own doors. Teachers could for a time command their price, but not for long, even with the added dramatic appeal of the high cost of living, unless, to use an Americanism, 'you can deliver the goods.'"

NEXT WEEK'S WORK IN THE ORCHARD

BY R. H. HELMER, Supt. Experimental Station.

If you have not already cleaned up your orchard and home lot it's not too late yet. If only man could be inoculated with the spring cleaning bacteria as the housewife gets it, each take fifty per cent. strength, both sexes would benefit and our surroundings be made beautiful.

We should prepare for our spring crops such as tomatoes, well prepared land gives the early start and good cultivation not only retains the moisture but warms the soil as well.

In the earlier districts the time for effective spraying is nearly over. Early peas, beets and carrots may be sown in the garden now.

Is Selling Business

Business changes seem rather frequent in Summerland. One of the latest reports of this nature is that the Ritchie lumber yard has been sold to a prairie concern.

When asked as to the report, Mr. Ritchie stated that the Community Lumber Co. of Lethbridge, which had been desirous of establishing here had asked him on different occasions to sell. In compliance with such request he had recently given them a price and had been advised that this was satisfactory. Although the deal has not yet gone through it probably will, the new owners to take possession May 1st.

Mr. Ritchie has been longer in business here than most of our business men, and will be much missed in business circles.

Two-Year Course In Agriculture

High School Pupils to be Taught at Government's Expense

Beginning with the fall term, the pupils of the Summerland high school will be given a course in horticulture, agriculture, etc. Mr. J. W. Gibson, who has charge of this branch of education in the Province was a visitor to Summerland this week, and definitely arranged with the School Board to commence this work next fall. The instructor, whose salary is paid by the Department, assisted by a grant from the Dominion Government, will arrive here early in August. While versed in all phases of his work, he is a specialist in horticulture and will be ready to give any advice and assistance to fruit growers and farmers of the district, in addition to conducting his classes and demonstration work in connection with the high school.

Mr. Gibson advised the School Board at their regular meeting on Wednesday evening that the Pentecost Board has decided to take up the same course, and the time of the instructor will be divided equally between the two communities. While the time of the instructor is thus divided between the two centres, each will be required to pay half his travelling expenses between the two towns. Mr. Gibson had been prepared to give Summerland the full time of the instructor, had Pentecost not accepted the offer.

While the work of the new instructor will be largely school work, he will visit the home of each pupil who has a garden or orchard plot. He will be instructed to get acquainted with all phases of agriculture in the district.

Half an acre of land will be required in connection with the school, and the course will be a two year one.

Perpetrates a Dastardly Deed

Lynching has been administered in that country for a less heinous crime than that reported by the Orville (Wash.) Gazette as having been perpetrated fifty miles south of here. The story reads:

Last week Nick Barlow, living northeast of Orville, along the international line, discovered that one of his beef steers was ailing and the animal subsequently died. Mr. Barlow secured the services of a veterinary surgeon and a post mortem was held upon the remains. The animal was found to be in a normal condition and the cause of death was not discovered until the head of the steer was inspected and it was found that some cruel, heartless vandal had cut out the tongue. Mr. Barlow has no evidence to establish the guilt of the man who committed this dastardly act, a crime that should be punished by a long term in the penitentiary if the person who committed it could be discovered.

War on Gophers

Further down this Valley on the American side of the line, the farmers, assisted by an official of the United States Biological Survey, are conducting a campaign against the gopher. Practically every section of Okanagan County is participating, and the farmers are in hopes that this work will reduce the loss from these pests.

MANUAL TRAINING CLASSES TO ERECT NEW WORKROOM

Parents Petition School Board for Larger Room for Beginners. Inspector's Report Read. Mr Baker Resigns. Mr. Wishart Elected to Position

One of the rooms being used temporarily as a class room in connection with the Central School has been condemned by both the Medical Inspector and the Public Schools Inspector, and parents have complained that the health of the pupils has been affected, because of the unsatisfactory conditions under which they were being taught. The class is that of the beginners taught by Mrs. Denton in the room built for domestic science and afterwards taken for regular class work.

At the meeting of the School Board on Wednesday evening, a petition signed by the parents of nearly all the pupils was presented by Mrs. O. F. Zimmerman, supported by Mrs. E. R. Simpson and Mrs. I. P. Barnes, asking that accommodation be found elsewhere for this class immediately. Mrs. Zimmerman pointed out that the Inspector had pronounced the room a menace to health, and suggested the removal of the manual training school to permit that room and the room now used by Mrs. Denton being thrown into one, the chief complaint being insufficient air space, and difficulty in ventilation.

Mr. Wishart, manual training instructor was present, and offered to undertake, with the assistance of his boys, to erect a temporary building for manual training purposes, in order that the suggested change might be made. Prin. Welsh of the High School offered to spare a class of his boys for a week if necessary to assist Mr. Wishart.

It is the intention to put very little expense on this temporary building, and to so construct it that the material may be used again. It will be put up without a floor.

An estimate was presented covering the repairs to the old high school building, which, including a new floor, will cost \$485. A stone wall under the building, not considered essential, would cost \$260 extra. Adding another room to the building including the vestibule, providing toilet, etc., would cost nearly \$2,500. No action was taken on this report, estimates in which were prepared gratis by H. W. Harvey.

The Board had invited contractors

to be present for an informal discussion of the contracts and the several problems of conveyance. But one contractor, A. E. Smith, was present.

Rev. Chas. Baker, stating that he would probably remain where he is for some time, tendered his resignation as manual training instructor. Accepting the resignation, the Board appointed Mr. Wishart, who has been substituting for Mr. Baker, to the position.

Supt. MacDonald presented a requisition for school garden equipment, and application will be made to the Municipality for connection with the water main, with the idea of installing the Skinner (overhead) system of irrigation on the school plot.

Reports from Inspectors were read, Inspector DeLong condemning outright the class rooms now used for the high school. Mr. DeLong in his report said "I consider the Summerland Board fortunate in having a principal of Mr. Welsh's scholarship and stability."

Inspector Lord reported very favorably on the work in the Central School, but was pronounced in his condemnation of the accommodation given some of the classes.

Pointing out that it would be necessary to have a third teacher in the High School after the summer holidays, Prin. Welsh said it was essential that there be a lady teacher on the staff. It was his wish to get a staff as efficient as possible, and for that reason he had been looking about for a really capable lady teacher. He believed he had found such an one, and though the Board was not prepared to engage her at this time, they acquiesced in his suggestion that she be informed that there would be such a position open next fall.

Mr. Welsh reported that the convention of high school teachers had recommended that the high school course be lengthened to four years, as at present the course is too crowded. He offered to teach what is called the fourth year in the High School beginning next term if the lady teacher is added to the staff.

Was Pioneer Fruit Grower

With the death of Mr. Thomas Earl on March 25th there passed away a survivor of the historic gold rush to California in 1849. He was not only a "forty-niner," but as such enjoyed the unique distinction of residency in British Columbia during the past sixty-three years, dating from the stirring days of the Cariboo.

Fame came to Mr. Earl not as a miner but as a farmer. He owned one of the finest fruit orchards in the province, at Lytton, and was probably the first to cultivate fruit commercially in British Columbia. He took a keen interest in the annual provincial fair at New Westminster and up to within recent years, when his advanced age caused his retirement from active business, was frequently awarded prizes and cups for his choice fruit exhibits. Thomas Earl's apples captured four gold medals at the Royal Horticultural Society show in 1908.

Mr. Earl was born in the town of Newark, New Jersey, ninety-two years ago, and it was as a lad of 19 he left home for California, via Mexico. Ten years ago this distinguished pioneer sold his Lytton ranch to Mr. R. V. Winch and established himself with his family in Vancouver where his death occurred.

Mr. Earl was an interesting visitor to Summerland a few years ago, coming, as he told The Review, to have one more look over the Okanagan and to note the development in fruit growing, his favorite hobby.

Following the example of a number of Eastern cities, Vancouver is to have a Building Trades and House Furnishing Exhibition, it was decided at a meeting of the representatives of all the trades. A committee to arrange the show was recently appointed.

Gibson Gives Fine Lecture

Urges Hearers to Get Behind Annual Fair

An unusually interesting lecture was given in the Parish Hall last Tuesday evening, when Mr. J. W. Gibson, Superintendent of Instruction in Agriculture, and in charge of the school gardens throughout the Province, spoke on "Beautifying the Home Surroundings." The pictures shown by Mr. Gibson were carefully selected and very pleasing, being beautifully colored to illustrate the lawns, flower gardens, hedges, trees, etc., about the home. Mr. Gibson pointed out the right and wrong way of beautifying the lawn and grounds around the house. He is a strong advocate of the more natural appearance of grounds in contrast to the geometrically laid out plots.

Mr. Gibson prefaced his lecture by a few remarks in which he strongly advocated the maintenance of an annual fair and gave instances of the growth and importance of fairs in other parts of the Province, pointing specially to the prominent part taken by the school children, particularly through their clubs. According to Mr. Gibson, it would be a community calamity to do away with the fall fair.

As the directors of the Summerland Agricultural Society did not consider the meeting representative, no action was taken towards organizing for the local exhibition.

Last year 380,000 acres of timber, or 236,000,000 feet valued at \$299,000, was destroyed by fire in British Columbia. Damage to young growth and range is placed at \$185,000, as the total damage to forests amounts to \$485,000, as compared with \$398,000 in 1919.

Fruit Boats to Sail Regularly

Royal Mail Packet Line Putting on New Service

The announcement is made that the Royal Mail Steam Packet Company is preparing to place nine 15,000 ton steamships, each equipped with 3,000 tons of refrigerated space, on the route between Seattle and Great Britain and Continental Europe. The fleet of new steamers is now nearing completion in Clyde shipyards, and the first one will leave England next month. The others will follow as they are launched and equipped. It is planned to have all nine ships in service by the opening of the apple shipping season next autumn. This new line will operate a joint refrigeration service with the Holland-America Company, which last autumn took the initial steps in carrying apples to Europe through the Panama canal. With the entry of the new fleet into service apples may be transported to the European markets in enormous quantities with much less expense and a minimum shrinkage. It is stated that each boat will be able to load 45,000 boxes of apples in their refrigerator space. According to the Seattle correspondent of the Fruitman's Guide (New York), on January 28, Col. E. J. M. Nash, who was in Seattle as a representative for the Royal Mail Line, had the following to say in regard to the new service:

"Our plans for the new service between Seattle and other coast ports and the ports of England and Continental Europe are all virtually completed. The service will begin early in March, when the first of the new 15,000 ton steamships will sail from England for Seattle and other coast ports.

"The ports on the other side of the Atlantic will include Southampton, where the fresh fruits will be discharged, and London, Rotterdam, Antwerp, and Hamburg. Other ports will be included as business offers. A regular monthly service will be maintained from the first, six ships being employed. Then, as other ships are completed, they will be added to the fleet until by the opening of the fruit season, at the end of the

Convention Was Best Yet

Principal D. J. Welsh of the Summerland High School returned on Sunday from attending the convention of B.C. Teachers held in Vancouver. Mr. Welsh speaks very enthusiastically of the convention which he describes as having been inspirational and instructive as well as interesting. Some very able addresses were given by some of the leading educationalists of the continent. About 1,000 teachers took advantage of the opportunity to hear these speakers, more than 30 of them being from the Okanagan Valley, including 2 from the Summerland teaching staff. Through the pooling of expenses teachers from far away points paid no more for transportation than those near by, or in fact in the City of Vancouver. Mr. Welsh states that his transportation to and from Vancouver cost him less than \$3 by this method.

Returning by way of Sicamous, he stopped off at Enderby where Mrs. Welsh and their son had spent the Easter holidays. Motoring from Vernon they stopped at Kelowna, where Mr. Welsh gave an address on Sunday morning on "The New Note in Education." On Sunday next, Prin. Welsh goes to Naramata to give an address on the subject which he is making his life work, and which he is constantly studying, the education of the coming generation.

The price of copper in British Columbia has advanced from 11 1/2 to 12 1/2 cents per pound, according to an announcement by Mr. Granby Quinn, comptroller of the Granby Consolidated Mining and Smelting Company. The new price comes as good news to the Granby and other companies operating in copper, because, they state, they have been losing money for some time.

summer, we hope to have nine of the new carriers in the Seattle route. With the nine carriers we will maintain a three weeks' schedule. Regularity and frequency of service represent one of the great needs of commerce. Our fleet will be operated on a regular schedule, precisely the same as passenger steamships."

NEW CITIZENS FOR CANADA

With a population of less than two persons to the square mile compared to England's six hundred, with only five per cent. of her rich agricultural land in the West under cultivation, with a heavy national indebtedness and only a few people to pay the interest in the form of taxes, the reason why Canada is hungry for immigrants can readily be understood. Immigration is the human rain without which Canada must parch and wither up.

If Great Britain had a large surplus of farmers and farm hands, Canada might not have to invite immigrants from any other source. But Great Britain is not so much an agricultural as a merchant and manufacturing centre, and every year grudges more and more the her Colonies for the Dominions. She is quite willing to send out countless city folk in the hope that they may be transformed into farmers in their new environment, but she has fewer farmers to spare than many other countries from which Canada in the past has drawn excellent settlers. This is illustrated by the homestead entries. From 1897 to 1919, only eighteen per cent. of the British immigrants made entry for homesteads in Western Canada as compared to twenty-seven per cent. of the American immigrants and twenty-nine per cent. of the foreign born from Continental Europe.

In certain parts of Europe where there is a genuine land hunger, there is not enough land to go round. Five or six acres per family is all the land available in certain parts of Belgium, and even on that the thrifty Belgian frequently brings up a family of ten. The great immigration of Ukrainians from Central Europe which has given Canada nearly 500,000 of her Western farm population was due to the constant subdivision of farms which were only fifteen acres to start with. These Ukrainians have become a great asset to Canada, and have at their own expense erected four large colleges for higher education. Then again we owe our fine stock of seventy thousand Scandinavian settlers to the lack of sufficient land in Sweden, Norway, Denmark and Iceland.

Have these foreign born made good Canadian citizens? Read "The Education of the New Canadian" by Dr. J. T. M. Anderson, of Saskatchewan, and you will say "Yes!" In one or two groups at first there was opposition to the learning of English, particularly among the older people, but now it is difficult to find sufficient teachers to meet the demands of the schools. And it is not only in the schools where you find the foreign born. More than half the students at the University of Manitoba are of foreign parentage. You find children of the foreign

The Immigrant Tide to Canada. Some Recent Pictures.
 born as leaders in the professions and in the Cabinet of at least one Provincial Government. Canada is after all only repeating on a larger scale the welcome to and the assimilation of the foreign born which has characterized the history of the Mother Country. The Flemish weavers and the Huguenots who found refuge in England, are but a few of the foreign born im-

Peachland Doings

A Weekly Chronicle Furnished By Our Local Representative.

Mr. Alpaugh has almost completed the building of his new garage on Beach Avenue next the general store and has commenced work in it.

After a short visit with friends Mrs. M. McBean with her little girl left on Wednesday last for Winnipeg to join her husband.

Miss Alice Wright went south on Wednesday evening to visit relatives in Naramata. She returned Monday morning.

Having accepted a school near Chaplin, Sask., Miss Ilyva Murdin left on Thursday morning for that point for about three months when she will return to Peachland.

Mr. and Mrs. L. D. McCall went to Peniticon Thursday evening to spend a few weeks.

The high school teacher and pupils gave a concert and entertained their near acquaintances in the Municipal Hall on Thursday evening the 31st March. A nice company were present and a very enjoyable time was spent with games and a very interesting and amusing program. Refreshments were served by the pupils.

Mr. W. Ortt went north Friday morning and returned in the evening accompanied by his wife and young son.

Miss Cora Wilson and her cousin were visitors to Kelowna on Friday.

Mr. R. Harrington went to Armstrong last Thursday to take in the sale of Mr. A. W. Hunter's splendid herd of Jerseys. He returned on Friday, bringing with him a lovely pure bred registered Jersey cow "Lady Armstrong." The herd of fourteen, including three under one year and five under two years old averaged \$300 per head. The highest price paid was for the cow "Interester Camille" which was bid in at \$800. Seven head went to the Coast. The only other animal coming south was the herd bull bought by a Kelowna man. Mr. Harrington intends to keep pure bred stock only, and he is to be congratulated on getting a good one for a start.

Mr. and Mrs. Hendrickson have vacated the house they have been occupying and Mrs. Hendrickson is visiting with her mother for a short time before leaving for Canoe, B.C. Mr. Hendrickson and his brother are busy completing some contract work before preparing to leave.

A slight accident occurred at the wharf while the boat was in on Friday evening. One of the truckers was thrown over the edge of the plank into the water. Unfortunately he was not a swimmer and the Mate jumped in and held the lad up until a rope was thrown to them. Neither of the two suffered any ill effects. All is well that ends well, but had not the Mate been daring and quick to act there is no telling just how it might have gone with the trucker even though help was near.

A masquerade dance was held in the Orange Hall on Friday evening with a jolly crowd present. Mr. Kudelka has recently had the Hall freshly papered and being decorated for the occasion all lent to make the evening a pleasant one. Ice cream was served during the program.

Mr. Robertson went up to Kelowna on Saturday to bring his wife and baby home from the Hospital. Both are doing nicely.

After a pleasant portion of the Easter week spent with her people here Miss Alice Cousins left on Saturday morning to resume her duties in her school at Adams Lake.

Friends here are glad to see the return of Mr. and Mrs. Hackett, who arrived Saturday evening and expect to make their home on their fruit lot bought some time ago from Mrs. E. E. House.

Regular service was held in the Methodist Church on Sunday morning and the fortnightly services held in the afternoon in the Anglican and Baptist Churches. Mr. Layton who used to accompany Mr. Grieves from Peniticon accompanied Mr. Page on this occasion and they were joined at Summerland by Mr. G. Thornber. Mr. Thornber spoke for a few minutes, addressing himself principally to the children.

Mr. S. Michael met with a slight accident on Monday last. When riding one of his horses in from the range it stepped in a hole and in falling gave him a pretty bad throw down the hill. He was somewhat bruised and shaken up, but aside from

this he got off pretty lucky. He is about again. While Dr. Buchanan was down attending Mr. Michael Mr. Willie Gellatly made a rush trip down for him to go and attend his father Mr. D. Gellatly, who had fallen from a seed drill and the horses backed it up over him. He was pretty badly bruised and scratched, but Will did not think at all serious.

Mrs. C. D. Clarke went down to Dog Lake on Monday to visit her sister Mrs. R. A. F. Moore for a few days.

Mrs. J. L. Elliott and daughter Willa returned Tuesday morning after a pleasant visit of a few days among friends down the lake.

Mr. H. H. Thompson on Tuesday morning took his daughter Vivia to put her in charge of one of the teachers of the Banff Boarding School who was going from Kelowna, as also were some other pupils for the same school. Mr. Thompson is having Vivia attend the boarding school in Banff in the hope that the general education given there which includes a considerable percentage of outdoor exercise and sport will do much for her health.

The Drakes and Cudmores are enjoying a visit from a former acquaintance, Mrs. A. W. Fox, accompanied by her little granddaughter, former residents of Halkirk, Alberta, now of Peniticon. They arrived Tuesday morning.

FASHION.

She (after much turning and primping): Do they show?
 Husband: What, your ankles?
 She: No silly, I don't mind my ankles. I mean my ears, of course!

The citizens of British Columbia last year paid \$9,950,000 in exchange alone on the merchandise they purchased in the United States. This represents a direct tax of \$17.50 on every individual in the province. The more that is imported, the greater will be the discount.

HOME-SEEKERS OR INVESTORS WOULD DO WELL TO CONSULT F. D. COOPER REAL ESTATE BROKER PEACH-ORCHARD SUMMERLAND

Why "Auto-Shoes"?

We figure that any automobile casing has a right to be called a "tire"—whether it's good, bad or indifferent. And we agree with the opinion that an exceptionally good casing deserves a distinctive name.

AmesHolden "Auto-Shoes" are miles better in performance than ordinary tires. That has been proved to our satisfaction. So we think it's a good idea to identify such unusual mileage givers by an easy-to-remember name—"Auto-Shoes."

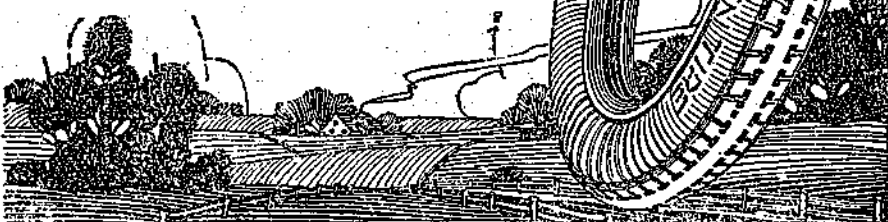

The main purpose of the name is to help you to get cheaper mileage. The guarantee behind AmesHolden "Auto-Shoes" insures that you get it. If necessity for adjustment should ever arise you will find that you will get satisfaction without trouble or red tape.

They are the principal advantages that go with the name AmesHolden "Auto-Shoes." Drop in and let us show you the tires themselves.

Trout Fishing in Canada

Fishing near St. Marguerite, P.Q.

More benefit is derived from recreation in the open country than from any other form of amusement, and fishing is one of the happiest and most health giving of pastimes. Summer is fishing time, and Canada has numerous lakes and rivers where there is abundance of fish of all varieties to tempt the angler. Trout fishing is amongst the most popular forms of this sport.

To fish successfully for trout his habits must be known. His habits in one part of the country will be different from the habits of his brethren in the lakes and streams of other different sections of the country. The trout loves clear swift running streams, whether large or small, the bottoms of which are filled with boulders and gravel. He is wont to hide under the overhanging banks of the streams and under and along fallen trees in deep holes made by these obstructions of the current. It is particularly advantageous to look for trout among the fast moving rapids, or in the eddies along the banks. The trout feeds largely on insects. He is a lively forager for food, and he is often seen chasing the small minnows during the middle of the day, and now and then leaping in the air for black flies and moths. He likes plenty of oxygen, and delights

Trout Fishing at Banff

in the white-capped foaming waters below a fall in the stream. Kaslo, B.C., is the headquarters for trout fishers on the upper Kootenay lake. Holiday makers who are visiting beautiful Banff may catch excellent trout in the Bow river. Splendid trout fishing may be had at Nipigon, Ontario, and in the rivers and lakes among the Laurentian Mountains, Quebec; in fact there is trout fishing to be had in nearly all Canadian waters of any great extent. But those who are seeking a big haul should go to places that are not too much frequented.

AUCTION SALE

The following

LIVE STOCK IMPLEMENTS and HARNESS

will be sold by Public Auction at West Summerland (opposite Blacksmith Shop) on

Thursday, April 14, 1921

at 2 p.m.

SOME PURPOSES OF MUNICIPAL GOVERNMENT

SIR JAMES AIKINS

Every citizen has an inseparable relation to government, federal, provincial and municipal. Being that division of government with which he comes most directly in contact and which is more in evidence in everyday life, municipal government has more of interest to the average citizen than the others, yet with too many that interest is inanimate and abstract in form.

An intensely interesting and inspiring address on the purposes of municipal government was given recently by Sir James Aiken before the Union of Manitoba Municipalities which deserves wider publicity than it has so far received. Commenting on this address the editor of the Canadian Municipal Journal says:

"If more of our public men would realize the importance of efficient municipal government in the life of the nation as does Sir James, not only would a more encouraging outlook be given to those who administer local affairs, but a more co-operative spirit between the three governing units of the Dominion would take the place of the present jealousy."

We are able to publish below but part of Sir James Aikin's address to the representative municipal men assembled in convention.

The true greatness of a nation does not consist in the bigness of its area, in battalions or battleships, not in multitudes of people or accumulated money, but in the virile manhood and noble womanhood of its citizens. What an opportunity for public service! Are we willing to take up our citizen's burden and serve? I know you are. Many others say they are too much occupied with the means of living to live.

The purposes of municipal government in which you are interested are not simply drainage and water supply and the making and maintenance of roads. Those are but the means to an end, that true end of it being the good and well being of the people of your municipality. Hold in your faithful minds that end and, take where needs be any sure and short cuts to attain it, whether it be expressed in the Municipal Act or not. That is its purpose, construe your powers broadly. You have some expressed authority such as relating to public health and comfort; to public safety; to public order and morality; to the care of children—who are the greatest potential asset Canada has, and on whose development, spiritual, intellectual and industrial, depends Canada's future.

PURPOSES OF MUNICIPAL GOVERNMENT.

The chief aim of all government, municipal included, is or should be to produce good citizens. Good! I should have said the best citizens. Your most efficient work will be with the children. Of your municipal work it should be said what was spoken by the great President Elliott of Harvard in respect of higher education—"Public comfort, ease and wealth may be promoted by it, but its great purpose is knowledge and righteousness." Sirs, if you add to those two another, the great essential, industry, which includes no wastefulness, you then have life, for the sum of those three is life—abundant life here, and to that end all the thought and effort of your municipalities should be directed. Given those three things in your municipality, it cannot fail, and all other things will be added, good farming, honest trading, fair dealing, a sacred regard for the rights and property of others, mutual helpfulness, happy life, a public spirit. The statement applied first to Christianity applies generally to a community, for "we are members of one another."

OUR INTERDEPENDENCE.

If one member is weak or disordered or cancerous, all the others suffer. Every ignorant and immoral and indolent person in your community is a menace and detriment to it. You cannot always deport him, but you can surround him with good influence and you can catch the children young and by aid of school and church and community life, you can give them the opportunity of being their best. That is our duty. You have heard the old saying of a person "he is the enemy of no one but himself," a false view. A man who is an enemy to himself whether by his habits or excess or immorality or laziness is an enemy to the community, and his influence in debasing. If we neglect such when we can remove the evil, then the Priest and the Levite who passed by the wounded man on Jericho road may stretch a point and add you to their company.

INDIVIDUAL RESPONSIBILITIES.

Remember, a municipality, that is, a number of persons organized as you are, can do far more than a single individual, but that does not relieve us of individual responsibility. It is a personal as well as a municipal duty to rid our lands of evil while we "drive the road and bridge the ford."

My memory recalls words which I some time ago heard:

Then let us live and labor
Till our work is done;
Helping each his feeble neighbor,
Asking help from none.

In these times of froth and bubble,
Two things are like stone,
Kindness in another's trouble,
Courage in our own.

Since the war there has been so much agitation for united action, for class movement, for organization, for government and municipal control, that we are apt to forget our individual responsibility and with it our individual liberty, for one is the correlate of the other; when one is forgotten, the other is lost. In this lies the glamour of a self-governing people because people fail to see the fact that they are to control and govern themselves, swift to obey the laws they make, and to be vigilant that others do the same. But we are slow to apply the rules of action to ourselves, to limit ourselves to self-denying ordinances, to restrain impulses and cure faults. As I have said, individual liberty is a right, but its correlated duty is individual control. Where we fail to control and govern ourselves then some person else is compelled to suffer. People are disposed to wear the

steel helmets of irresponsibility and so endeavor to avoid the impact of personal duty. A road is out of repair or a culvert displaced, a ditch is dammed up, houses of gambling or immorality exist, indecency is on billboards, and people say, "too bad," "on the municipality is the duty, our councillor is not fit for his position," and so the defect or wrong continues, when one alert resident could take action and so protect the neighborhood. A person's property is stolen or building destroyed by incendiary neighbors. "Sorry, wonder if he has laid the matter before the magistrate and the policeman investigating," whereas the whole neighborhood should be on the path to capture and punish the offender. Yours may be next. That apathy carried to a limit has resulted, as in Russia, in pillage, arson and confiscation. A gambling den or house of immorality is known to exist by those around who say it is not any business but that of the municipal officers. Soon the immorality spreads and catches one of the sluggish families, then there is an outcry. That again going unchecked has in Russia resulted in the nationalization of women and children. Two morality officers are shot to death in the discharge of their duty. People around are scarcely offended instead of being alarmed and swiftly following the murderer. Not our business. Carried a little farther and life is unguarded and destroyed in a welter of blood and crime, again as in Russia.

Where there is a law broken, it is the duty of every citizen to see the violator brought to justice, and swiftly.

AT ELECTION TIME.

A municipal election is about to be held to select those who shall legislate and rule. O what apathy! So often we are misgoverned. We blame the system, not ourselves. If our children are not educated, of course blame the school trustees in whom and whose election we have taken no interest. If our children are not morally good, certainly blame the church or Sunday school which we have failed to attend, but not ourselves, parents or our home. So things go wrong in municipality and community, in school and church. Eternal vigilance and prompt action is the price of liberty. I know that I am not telling this to the right audience, for you are of the public service class. The others will not come to hear. Let us ever bear in mind that the fundamental of our British civilization is personal liberty limited only to the necessary protection of others' liberties and the protection of property lawfully acquired. Municipal gov-

ernment is intended to protect and enhance them. There has in all ages been a conflict between collectivism and individualism, between an enslavement to organizations or combinations and personal freedom. We have had piracy of profiteers and trusts, also the unlimited gall of financial parasites, red socialists, communists and bolsheviks. They produce trouble—that is the one thing they can produce. The former, you, the substantial industrious citizens, have known for many years and have held at bay. The latter are more recent and unknown, but their policy is for the incapables, the ignorant, the indolent and failures to combine to exploit the strong, the industrious, the educated, the thrifty, and divide their savings, and to control and limit their energies. If a man is convinced that he will not pluck the fruit of the tree he plants or reap the harvest of his sowing, he is not likely to plant or sow. Unless he is assured that he and his family are to be the beneficiaries of his own efforts, he will not put them forth. Red socialism or communism would cut the nerve of enterprise and hamstring progress. Therefore, in your municipalities, make ye sure to each his own that he reaps what he hath sown, and give to every man the amplest opportunities for the full exercise in all lawful pursuits of all his talents, and all the children the amplest opportunity for full development, unhampered by the presence of evil. Given a fair chance and personal characteristics and individual qualities will prevail. In the midst of all the perplexing movements going on around us, let us be calm and conscientious in our thinking and our action, and courageous and kindly—in both, so shall we not dread the future, it will give place to better times. We have been given a goodly heritage. Let us see to it that every Canadian is such as to be worthy of it and allow those only to have control in municipal and other government or a voice in that control who will guide it wisely in the way of peace and progress and govern it according to the principles of eternal truth.

A joke is not always a joke when it is on you.

Always Insure Bonds

Cost is Small For Protection That is Given.

Bonds should not be sent through the mail without being insured, especially as the cost of such insurance is very small. Out-of-town investors wishing to send bonds to investment houses in another city for sale can insure them in two ways. They can take them to their local bank, who will undertake to deliver the bonds to their destination, registering and insuring them, or they can notify the investment house that the bonds are being sent. The investment house will at once have them insured and deduct the cost of the insurance from the proceeds of sale. Insurance costs 10 cents per \$1,000 worth of securities represented.

The Summerland Review

Established August, 1908

Published at Summerland, B.C., every Friday by THE REVIEW PUBLISHING COMPANY, LIMITED
Ralph E. White, Editor and Manager

An independent family newspaper covering Peachland, Summerland and Naramata and adjacent districts.

Subscription Rates—In British Empire, in advance, \$2.50 per year; six months, \$1.40. To U.S.A. and other countries, \$3.00 per year.

Advertising Rate Cards and information respecting territory and samples of paper mailed upon request, or may be seen at the office of any advertising agency recognized by the Canadian Press Association.

Advertisers must have copy in by Wednesday noon in order to insure changes for standing advertisements. New display advertising copy can be accepted one day later.

Correspondence—Letters addressed to the Editor and intended for publication must be short and legibly written on one side of the paper only. The longer an article, the shorter its chance of insertion. All communications must bear the name of the writer, not necessarily for publication. The publication or rejection of articles is a matter entirely in the discretion of the Editor. No responsibility is assumed by the paper for the opinions expressed by correspondents.

FRIDAY, APRIL 8, 1921

THE SALARY INCREASES.

Premier Oliver's proposal to increase his salary and that of every cabinet minister will be received by the taxpayers of the Province with much surprise to say the least. It may be that the increase of four hundred dollars to members is justified. Certainly, if each member serves his constituency throughout the year as diligently as do some and he is to be recompensed therefor, two thousand dollars will be none too much.

Considering the poverty stories that have been advanced by the Premier and his associates throughout the session in answer to pressing appeals for hospitals and schools it would seem that this is a very inopportune time to raise his own salary from \$7,500 to \$9,000 and that of each cabinet minister from \$6,000 to \$7,500. "Economy and retrenchment" is a motto that has been repeated many times of late by Premier Oliver.

Of the proposal to increase the sessional indemnities The Victoria Colonist says: "Had this step been taken at the last session of a legislature and at the same time if a decision had been reached to cut down the membership by one-third, there might have been some logic in the course. . . . The Government should have announced this policy at the beginning of the session. At this eleventh hour it is impossible for public opinion to make itself felt."

BRITISH EDITOR'S OPINION.

The Review has just received a booklet entitled, "What British Editors Say About Canada," which has just been issued by the Canadian Department of Immigration and Colonization. It contains brief comments on Canada made by members of the Imperial Press Association who visited this country last summer. The booklet has been issued mainly for circulation in the Old Country, and readers of this paper may have copies forwarded to any friends in the Old Country who are interested in Canada, by sending the names and addresses to the Director of Publicity, Department of Immigration and Colonization, Ottawa. No charge is made for the booklet or for postage on it.

AGRICULTURAL INSTRUCTION.

An insight into the progress that is being made in agricultural instruction, both for adults and juniors, is to be gathered from the report on the Agricultural Instruction Act for 1919-20, recently submitted to the Dominion Parliament. Under this Act \$1,100,000 is now divided annually between the nine provinces of Canada with a view, as the report says, of aiding and advancing the farming industry of Canada. That the objects sought are being attained is shown by the review of the situation regarding agricultural instruction as it now exists in this country. Schools have been established, colleges extended and brought nearer to the farmer, research has been greatly encouraged, the agricultural representative system has been aided and fostered, home life improved, school fairs have been brought into being, and knowledge in every branch of agriculture and domestic science has been made more readily available. How the funds forthcoming under the Act are applied is illustrated by the fact that of an allotment of \$256,413 was devoted in 1919-20 to the Agricultural Representative system, and \$644,070 to instruction and demonstration. Boys' and girls' clubs were extensively aided, and women's institutes, home-makers' clubs and similar organizations had their funds augmented in such a manner as led remarkably to their growth and increased spread of their usefulness. How important a figure in the direct advancement of agricultural instruction the Act is, will perhaps be best appreciated by the fact that in the six years of its existence \$1,890,143 has been allocated to colleges and schools of agriculture, exclusive of veterinary colleges to which a special grant of \$20,000 is made annually. The problem facing those responsible for educational policy, says the report, is to provide adequate educational opportunities for those destined for country life, and that in large measure is the purpose for which the funds granted by the Act are being used.

The Government of the Province proposes to borrow another sum of one million dollars for the Conservation Fund under the Water Act. It is from this fund that water districts are being assisted.

As a recompense to the B.C. Electric Railway for the expense to which it will be put by the changing of the rule of the road, the Provincial Government proposes to make a grant of \$400,000. The "turn to the right" rule was not put into effect on the lower mainland or Vancouver Island last year, as it was here and in the rest of the Province, because of the changes necessary in the street railways. It is understood the change will be made next December.

"See America First" Magazine, published with the object of encouraging and developing travel on this continent, published in its last issue an interesting article on Touring Canada From Pacific to Atlantic, by E. E. B. Reesor. The article is beautifully illustrated with pictures from Vancouver to St. John and Halifax. The writer of this article is well known in this section of the Okanagan, having been for some time a resi-

dent of Naramata and a frequent visitor to Summerland. Mrs. Reesor is now living in Vancouver.

The Allies have demanded from Germany, as indemnity, the sum of 55 billion gold marks. The German Empire has a population of 70,000,000 persons. They have forty years in which to pay the indemnity. This means that the per capita payment is \$5 per annum. The per capita payment of the people of this country to the United States in exchange alone last year was \$17.25—and the Allies won the war. The only way to reduce our exchange is to buy at home.

British Columbia jams, jellies and canned fruits are equal to any produced in the world—yet hundreds of thousands of dollars worth of these commodities have been imported.

THE HOUSE CAT

By Dr. A. K. Fisher,
U.S. Bureau of Biological Survey.

Many an innocent hawk, skunk, owl and weasel has been shot for the deeds of that sleek highwayman, the house cat. It is safe to say that this marauder, which enjoys all the comforts and protection of a home, in the more thickly populated districts destroys in the aggregate more wild birds and young poultry than all the native natural enemies combined. A cat has been known to kill a whole brood of chickens in a day, a feat unequalled by any predaceous animal with the possible exception of the mink. Others in the course of a season have practically destroyed whole covens of quail or grouse, or nests full of young songsters. A well known naturalist estimates that in the New England States alone one and one-half millions of birds are destroyed annually by cats.

The offender is not so often the well-fed household pet as it is the abandoned and neglected outcast known as the wood cat or "wild cat." In 1905 the Society for the Prevention of Cruelty to Animals in New York City killed monthly an average of six thousand sick, injured, or homeless cats, or a total for the year of over seventy thousand. A considerable proportion of these were pets abandoned by people who had gone to the country for the summer. Moreover, summer visitors to the mountains or seashore sometimes take with them their cats, which, on their return home are too often left behind to swell the local overflow and make serious inroads on the birds of the region.

It is safe to assume that in the rest of the state outside of New York City as many cats follow a nomadic life as in the city, and if we assume that each cat kills one bird a week, we have a grand total of over three and one-half millions of birds destroyed annually. In the milder parts of our country, as in the chaparral region of California, where bird life is abundant, cats often revert to a semi-wild state and never re-visit their old homes except for plunder. Sportsmen and bird lovers should be ever watchful and whenever possible remove marauding cats from the covens.

The principle reasons given for keeping cats are their attractiveness as house pets, their usefulness as companions for children, and their alleged value as rat and mouse killers. It is impossible at present to obtain correct figures on the subject, but it is safe to say that few persons during a normal life time ran across more than half a dozen cats which habitually attack rats. Occasionally a hunter cat is found which seems to delight in catching rats, gophers, or ground squirrels. It is a common experience, however, to find premises well supplied with cats overrun with rats and mice. At a certain ranch house in the West a member of the Biological Survey trapped in his bedroom twelve mice in a week, although eight cats had access to the place.

Lovers of the cat should be content with one, or at the most two, of these pets, and should see to it that outcasts do not run at large on their premises. Now that cats are known to carry in their fur the germs not only of ringworm, but also of such dreaded diseases as tuberculosis, diphtheria, scarlet fever and smallpox, and fleas and ticks which transmit bubonic plague and spotted fever, the presence in the household of Tabby is not without its dangers.

A gentle zephyr wafted the following resolutions into our sanctum:

- Resolved to let people mind their own business.
- To assist everybody in every way possible.
- To forgive our enemies, especially those who are bigger.
- To strive to be in love and charity with thy neighbor.
- To subscribe for this paper.
- To patronize home industries.
- To avoid past errors and mistakes.
- To speak kind words often, harsh ones very seldom.
- To attempt something with a purpose and persevere.

"We really must let our sitting room furnished," exclaimed Mrs. Dod to her husband.

"Al right, my dear," he replied, "I'll put an advertisement in the local paper. You leave it to me."

Hunting for his rule he visited the room in question and made some notes.

The days passed by, but no inquiries were made.

"Did you see to that advertisement?" asked Mrs. Dod.

"Rather! I had it in the next day," replied her husband.

"It's disappointing to have no replies. What did you put in?"

He fetched the paper and proudly showed the paragraph, which ran:

"To let, furnished sitting room, suitable for lady or gent, fourteen feet wide and cheerful."

The man who tries to do his neighbors imagines, that they are always trying to do him.

Growers and Shippers Attention Please

Unless we are much mistaken you are at this time thinking seriously over the question as to how you are going to market the coming season's products, in the way that will net you the most money and cause you the least worry. We desire to tell you that we have a method the result of fifteen years' experience that will enable you to get your products sold and receive your returns within a comparatively short time after the fruits, etc., leave your orchards.

You are all no doubt aware that there are increased freight and express rates this year which must be contended with; this together with the fact that the consuming public are buying very cautiously and as economically as possible, means that the best of judgment and the most skillful salesmanship will need to be used and all unnecessary expenses will have to be done away with, in order to cope with the unusual attitude of the buying consumers and the increased transportation charges.

We desire to arrange with a limited number of Reliable Growers or Shippers who have Berries, Cherries, Fruits, Vegetables, etc., to market. We know that all growers and shippers of fruits, etc., are very busy men when the shipping season is on, and it must be a satisfaction for them to be relieved of the anxiety regarding the marketing of their fruits, etc., and thereby be enabled to attend entirely to picking, packing, etc.

We are fully prepared to look after the marketing end of your industry for you and shall be glad to have you write for further information, at the same time giving us particulars regarding the kinds of products you expect to have, the quantities, etc.

Yours truly,
W. V. MOORE, LIMITED,
Calgary, April 7, 1921. 36-38

MILLIONS KILLED IN ACTION

Wonderful news! Millions and millions of germs killed in action and thousands and thousands of victims relieved of bronchitis, asthma, coughs, and colds. There is great rejoicing in the fact that science has at last invented the world's surest death trap for germs—Buckley's Bronchitis Mixture. With the first dose this remedy gets right down to business, and never ceases in its destructive work until every trace of the disease is completely removed and the victim restored to normal health. Letters from all parts of Canada praising this wonderful mixture are literally pouring into headquarters. Read this letter:—"Years of suffering from that terrible affliction, bronchial asthma, ordered by all medical men to close my business in Montreal and go south to a warmer climate, but I noticed your ad. in the 'Montreal Standard' for the above mixture and I said I would give one more trial to health before I leave my native town, and thank the good maker I did. My bronchial tubes are clear, the hacking cough has disappeared, the wheezing cough has ceased as if by magic, and all discomforts have gone since taking your wonderful mixture."—Herbert Corri, 417 McKay Street, Montreal. There is no reason whatever why you cannot be completely and speedily restored to health if you take this remedy. You are satisfied or the money is refunded, according to our guarantee. Don't delay. Buy a bottle now from your druggist.

SOLD IN SUMMERLAND BY THE SUMMERLAND DRUG CO.

FATAL CURIOSITY.

Little Jeanie gazed long and thoughtfully at the young man who was calling on her grown up sister Maude.

"May I climb up on your knee Mr. Green?" she enquired at last. "Yes, of course, dear," smiled the young man, who wanted to make a hit with the family. "Want to pull my hair—eh?"

"No; I want to see if I can find that word," replied the little girl, in bewilderment.

"What word?" asked the visitor.

"I heard Maude say this morning that if a man ever had the word 'idiot' written all over his face that man was you."

The German indemnity figures out at \$5 per capita of the German population. The Canadian contribution to the United States in the way of exchange on our money is just \$17.25 per head—and the Allies won the war!

PRINTING PRICES

During the recent dispute in Vancouver between employing printers and employees, references were made to the fact that higher prices would force Vancouver printing orders to Ontario where wages were lower.

This catastrophe has been averted.

But, do you know, those same prices that were to have tempted Coast orders to the East are being quoted by us?

Some weeks ago we adopted a scale of printing prices that is being very extensively used in the cities and towns of Ontario, and in many of the centres of the Middle West and Eastern States.

With modern equipment and a full range of papers and other printing materials, we are in a position to do your work well and expeditiously and at

Prices that are Right

Summerland Women's Institute meets Friday afternoon next at 3 o'clock in the parlor of the Lakeside Church. Subject, Gardening.

THE TREAT OF THE SEASON

The Arlie Marks Company, which is coming to the Empress next Wednesday and Thursday, must be from all advance reports something unusual, as they are thought well of by the press and public.

Miss Marks, who heads her own company, is the daughter of that famous comedian, Tom Marks. She is an accomplished artiste and the press have praised her for her very clever impersonations and portrayals of different characters and have crowned her with the title of "Everybody's Favorite." She is well supported by some clever performers well known in the theatrical circles as high salaried artists.

One of the features of Miss Marks' show is that there is no wait between the acts (so noticeable in other road shows), as there are five acts of up-to-date vaudeville carried to fill in between the acts, with such features as Madame Salona, the girl with a thousand eyes, who will tell you anything you want to know.

The Great Heverly, the Handcuff King, the only living man that ever escaped from Sing Sing on a wager; Lindsay E. Perrin, the Dancing Demon; Hale and Lambe, that Funny team; Bart Crawford, the Boy with the Big Band Voice.

Miss Marks is presenting latest Royalty plays at popular prices that are within the reach of all.

Mrs. F. A. C. Wright has left England to return to Summerland.

Arrangements are being made to run a passenger steamer excursion from Vancouver to Liverpool and other European ports this summer, the journey being made via the Panama Canal. According to the steamship agents, who are arranging the details of this trip, it will cost \$300 for one-way passage, or \$550 return, the home journey being to some Atlantic port and thence by rail to British Columbia. This will be the first time that a passenger steamer has sailed for Europe from a B.C. port. It is expected that approximately 300 persons will undertake the journey.

No more fish fry may be placed in the lakes of this district until permission has been obtained from the Dominion authorities, according to instructions received by the Fish Warden, G. N. Gartrell.

W. H. Todd, owner of a large ranch between Naramata and Penticton committed suicide on Monday morning. He was nearly 70 years of age. He had been in poor health and was worried over financial matters.

Mrs. Solly, President of the Ladies' Hospital Auxiliary, is in receipt of a letter from the Lyceum Company, stating that owing to the illness of two of the Company, the Rondoliers Concert must necessarily be postponed for a time. As soon as the new date is assigned it will be advertised but meanwhile take note that there will be no Lyceum concert on the 18th.

Two-fifths of the total catch of fish in Canada was taken in the province of British Columbia waters during 1919, and the industry gave employment to nearly twenty-one thousand people, according to statistics compiled by a prominent fishery operator. The year 1920 was equally strong in financial returns though the actual catch was somewhat lower.

Passing Events: Social, Personal, &c.

Mr. P. C. Tees returned Monday night from a holiday visit to Calgary.

News has been received by Mr. A. Milne of the death in Scotland of his mother.

Miss Grace Little is visiting at the home of Capt. and Mrs. Hatfield at Kaleden.

Misses Helen and Jessie Campbell were Easter holiday guests of Mrs. J. P. McIntyre.

Thos. Hickey has rented from Dr. Lipssett the cottage being vacated by H. S. Blanchard.

Twenty-two new members were received into St. Andrew's Church last Sunday morning.

Mrs. R. Clouston returned last Saturday from California where she had spent the winter.

Miss Ruth Dale spent a few days last week with her cousin, Mrs. R. Corner, at Kelowna.

Mrs. R. C. Lipssett received the sad news this week of the death of her eldest sister in New Brunswick.

News was received a few days ago by Mrs. Whiteford of the death of her mother at New Westminster.

The Women's Auxiliary of St. Stephen's Church held a successful sale and tea in the Parish Hall on March 30th.

A carload of fat steers were shipped from here by the Dominion Experimental station to P. Burns & Co., Vernon, today.

Miss Marion Harwood has returned to her teaching at Arrowhead, after spending the holidays with relatives here.

W. A. Pitcairn, of Kelowna, who was one of the firm of Stirling & Pitcairn, Ltd., has left for England, where he will take up his permanent residence.

Willis Walter and his young daughter Inez left on Monday morning for Castor, Alberta, where Mr. Walter will remain for a few days on business.

Miss Kathleen Babbitt came in from Vancouver last Saturday to spend a three weeks' vacation at the home of her aunt, Mrs. T. J. McAlpine.

Miss Susan Wallace, who has many friends here and is now teaching at Vernon, spent a day or two here on her way back from the teachers' convention at Vancouver.

The boys' baseball team of Summerland Central School will play the school team of Penticton at the latter place on Saturday. The Penticton boys defeated the Princeton school team last Saturday, the score being 21 to 14.

Mr. A. M. Leslie who has been stationed at Nakusp, B.C. will arrive this evening to take charge of the C.P.R. station here. He will take up his duties on Monday next, when Mr. Foster, who has been acting as temporary agent, expects to leave for his home in Kamloops.

Mrs. Percy Knowles and family, with her mother and sister, Mrs. and Miss Long came in from Vancouver on Thursday, to join her husband, who has been in the Review office for some time. Miss Long has been granted two months' leave of absence, and expects to return to Humboldt, Sask., toward the end of the month, to resume her duties at the Land Titles Office there, where she has held the position of accountant for some years.

Sales Manager C. L. Lowe of the O.U.G. was a business visitor to Summerland this week.

The Summerland Garage received this week a shipment of fine new McLaughlin cars, which are being greatly admired.

It is expected that Mrs. D. H. Watson and some other members of the family will return to Summerland in May to reoccupy their lakeshore home.

Edgar Gould returned early this week from a visit to the prairies. The Sunday before he experienced 35 below zero, and when he left there was two feet of snow on the ground.

W. Foster, who with his family has been living here for some months, has moved to Oliver, the new Southern Okanagan townsite, where he has purchased a lot on which to build a barber shop, bath room, etc.

We are requested by Findlay Munroe to advise our readers that stock are not allowed to graze on Government lands without the owner having first obtained a permit. Mr. Munroe will furnish the necessary application forms.

The addition of a ladies' parlor is being made to the Baptist Church and a baptistry has recently been built in at the back of the choir. These and other alterations and a general renovating have materially altered the interior of the building.

The Vernon Manager of the Mutual Fruit Co., E. C. Skinner, has been in Summerland this week in connection with the taking over by his Company of the Steuart Fruit Co. J. Gibb who has been in charge of the Vernon branch of Stirling & Pitcairn, Ltd., will be the Summerland manager for the Mutual. Mr. R. L. Stephens of the Mutual's Vernon office is here with Mr. Skinner.

Capt. P. S. Roe returned Thursday morning from Victoria where he had been on business in connection with the ferry contract, which has been arranged for this year. Capt. Roe went down to the Capital on Sunday, and in the meantime the winter schedule has been continued. He states that the summer schedule will go into effect on Monday. He was led to believe that the subsidy may be withdrawn after this year.

Miss Belle Vanderburg left last Friday to return to Arrow Lakes to resume her teaching.

Capt. and Mrs. Chas. Hatfield of Kaleden spent the Easter week here with their daughter Mrs. Block.

W. Arnett came in from Dauphin, Man., on Wednesday on a business visit in connection with his orchard property here.

Mr. and Mrs. R. Walters are removing from here to Kelowna where Mr. Walters has taken a position. Since coming here he has been connected with the Fruit Union.

Bert Edwards, former Vancouver barber, and more recently of Banff, arrived here this week and has taken over the barber shop and pool room in connection with the Hotel. He was accompanied by his wife.

J. L. Crego returned Thursday night from a visit to Lacombe, Alta. He says that one needs to take a heavy overcoat to Alberta even if he visits there in July. It snowed Saturday and Sunday, and when he left, there was 18 inches of snow on the ground. Of course, he says, this is good for the farmers.

The Dominion Apiarist, F. W. L. Sladen, is a visitor to Summerland yesterday and to-day, spending most of his time at the Experimental Station. Mr. Sladen is very enthusiastic with respect to the future of the bee industry in the Okanagan, especially this portion of it. As alfalfa comes more into use in the orchard, this will become a staple and profitable industry under ideal conditions.

The tract of bottom land near Westbank known as Buchrie Point, and which has been owned and operated for a number of years by D. E. Gellatly the well known tomato grower, is soon to be put on the market in small parcels. The property is now being surveyed by a Kelowna firm of surveyors. The land has been in a high state of cultivation for some years, and has its own irrigation system, a wharf, packing house, etc. It is expected that this same wharf will be the shipping point for the large holdings of the Western Orchard Co., owners of a tract of land adjacent to Westbank, which the owners are arranging to have put under irrigation and sold in small lots.

THIS MEANS YOU.

If you have a bit of news, —Send it in;
Or a joke that will amuse, —Send it in;
A story that is true, —Send it in;
An incident that's new, —Send it in;
We want to hear from you, —Send it in.
Never mind about your style
If it's only worth your while
Send it in.

Face cream, hair restorer and other toilet articles are being manufactured in British Columbia.

"Father," said the small boy, "what is a Socialist?"
"A Socialist, my son, is a person who doesn't care what kind of a government he gets so long as it is something else."—Washington Star.

An American with gushing enthusiasm was describing his new car to an English visitor. "It runs so smoothly," he said, "you can't feel it. Not a bit of noise, you can't hear it. Perfect ignition, you can't smell it. And speed, why it simply whizzes, you can't see it."
"My word," exclaimed the awed Britisher. "How do you know the bally thing is there?"

I have often been asked to define the true secret of success. It is thrift in all its phases, thrift as applied to saving. A young man may have many friends, but he will find none so steadfast, so constant, so ready to respond to his wants, so capable of pushing him ahead, as a little leather covered book, with the name of a bank on its cover. Saving is the first great principle of all success. It creates independence, it gives a young man standing, it fills him with vigor, it stimulates him with the proper energy; in fact, it brings to him the best part of any success—happiness and contentment. If it were possible to inject the quality of saving into every boy, we would have a great many more real men.—Sir Thomas Lipton.

Scientific Irrigation to Barren Business

Newspaper Advertising is to Business Enterprise what irrigation is to barren lands. It is a vital necessity.

The land has in it the source of fruitfulness. The water alone is required to render it fertile.

Thereafter the thing is a matter of industry on the part of the planter.

Supply does not create demand nor does demand create supply—in the first instance.

Both are created by Desire; the fruit of Suggestion.

Your Newspaper is the most effective channel to propagate the IDEA of Desire and the means of satisfying it.

The upkeep of Demand—the cultivation of a sensitive and responsive ground, or the REACTION of it, is another phase of the subject.

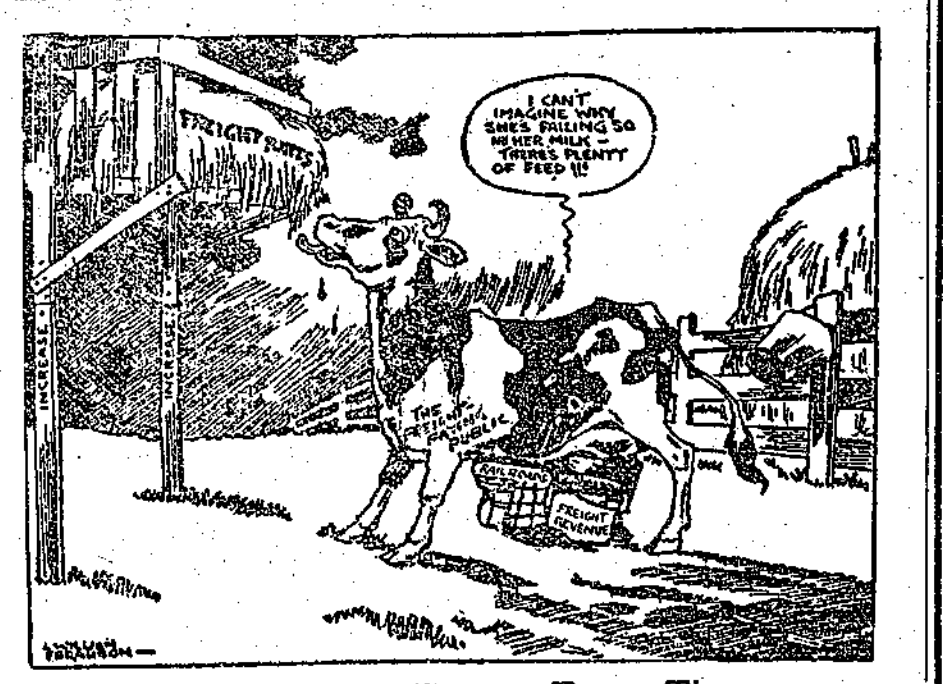

That is the province wherein modern advertising operates.

All the great merchants you ever heard of were, and are, bountiful users of Newspaper Advertising. Eaton, Wanamaker, Marshall Field, Selfridge, Harrods, Hudson's Bay Company.

Isn't that your cue?

Let us Talk it Over.

The Review Publishing Co., Ltd.

They Soak The Farmer Every Time.

.. The Winding Trail ..

Frenzied Finance? The astonishing array of figures laid before the Provincial Legislature by the local member the other day, reads like a brief synopsis of the real estate doings of 1912-13. There is the same merry increase of spending, the same fatal facility of borrowing, and, apparently, the same disagreeable ending to be faced as a sequel.

In one respect there is a difference: when the bottom fell out of the real estate situation, there came about a general adjustment by an enforced give and take process, in which many paper losses were accepted by tacit consent, as being inevitable where the assets had become liabilities, and the security had vanished. The securities of this Province remain, and will continue to grow in value, for which reason it is all the more necessary that they be not squandered in advance by extravagant spending. But if Mr. J. W. Jones' statistics cannot be satisfactorily explained or accounted for, it is a fairly obvious conclusion that the Province has been indulging in a financial orgy, which, moreover, does not show any sign of abatement. And the trouble is, that nobody seems to be any the better off. The Legislature itself is not happy, unemployment in the cities seems to be acute, and the municipalities on their own showing, are being left out in the cold. Nobody loves them, and they feel like going into the garden and eating worms!

Where is all the money going? A revenue which has increased from something under \$7,000,000 in 1916 to something over \$17,000,000 in the present year, ought to have brought some good to somebody. But unfortunately the expenditures seem to have kept a little ahead of the income all the time, the estimates for this year, for example, calling for more than two millions and a half in excess of revenue, a condition of things which leaves Mr. Micawber hopelessly in the shade as a "horrible example." How much of this is accounted for by the high cost of living, it is hard to compute. One thing evident is that part of it is certainly due to a continual increase of the salary list, and that this list is none the less potent because of being blanketed in lump sum appropriations.

Blanket votes by the way, amounting to nearly five million dollars, do not commend themselves to those who have to foot the bill. The man who pays is certainly entitled to know what he is paying for, and is more likely to be particular on that point when he notices new expenses constantly appearing. Business experts are quite unanimous in their keen scrutiny of overhead expenses, and no accountant would allow any blanketing to pass unchallenged. Why, then, should our representatives be called upon to pass estimates of expenditure of which no details are given? When it is noticed that the overhead charges on public works now amount to 10 per cent., whereas they were formerly carried out at about one-third of that proportion; when we find that the proposed expenditures for this year work out at \$40 per head of the population, being three times as much as in Saskatchewan, and four times as great as in Ontario; and when it is further revealed to us that our public debt has actually doubled during the past four years, then it is entirely reasonable that we should at least be shown the details of the accounts now presented for approval. In that blanket vote there might conceivably be some entirely uncalled for items, such as the one entailed by the creation of a new position of lady minister without portfolio, who will be allowed a private secretary and "certain expenses" (unspecified), notwithstanding the lack of any duties pertaining to the position. The member for this district stated that particulars of these cumulative blanket votes will be required. It is certain that the general public will be inclined to support him in this attitude.

The Retort Courteous It is a dangerous thing for a mere man to attempt a criticism of the dress of the fair sex. He is liable to have the mirror held up before him to his most utter discomfiture. Not long ago I read a remark from a lady writer casting scorn on the notion of feminine dress by a sex who had only recently discovered that a shirt could be made which could be put on coat fashion instead of being struggled into from the bottom end—an observation which will appeal strongly to any man who remembers the agony of mind and body daily undergone by him in the days before the coat shirt was invented. Now, a (presumably) feminine writer drops into poetry somewhat after the style of Mr. Silas Wegg, and pens some caustic lines on present day male fashions, her incitement thereto being apparently the appearance of some blank verse lately reproduced in The Review, having for its subject the flimsy theme of "girlies' underclothes." In this encounter the lady seems to be chiefly critical of the attenuated cut of those dual garments which she calls "panties," and it must be confessed she has some grounds for her retort. In the fashion sheets of men's apparel, the object of the artist generally seems to be the production of length without breadth, and one can hardly realize how the wearer of these articles could bend his knees without disaster. Fortunately we do not see many examples of these extremes of fashion outside the magazine advertisements—the hose with silk clocks and the high shaved neck may be more in evidence.

BROWN ROT OF ORCHARD FRUITS

(Experimental Farms Note)
Brown rot is one of the most serious fungous diseases of the orchard. It is most destructive on plums and cherries. Peaches in Canada are usually not seriously affected. Brown rot may also occur on apples, apricots, pears and quinces. In addition to the damage done by brown rot in the orchard, it is the most important rot of the fruits above mentioned while they are in transit or on the market. Losses in the orchard result from the following: In cherries from blighting of the blossoms, and rotting of the green, half ripe or ripe fruit; in plums from blossom blight, rotting of the ripening fruits and occasionally blighting of the twigs; in peaches and apricots from blossom blight, twig blight, rotting of the ripening fruit and as an important primary cause of peach canker; in apples and pears occasionally causing a rot of the ripening fruit.

The fungus causing brown rot hibernates in many places in the orchard. It may live over in the blighted twigs and cankers or in the hanging and mummified fruits. From all these sources there is an abundant production of spores in the spring. These are wind-blown. The important factors which determine a destructive attack of brown rot are high humidity and temperature. Twenty-four hours more or less of these air conditions which are suitable for spore germination lead to wide-spread rotting of the fruit if it is in the susceptible stage. The grower can probably not eliminate enough of the over-wintering material to effect adequate protection by this method alone. However, it is advised that blighted twigs and hanging mummies be removed from the trees before the buds start and that the fallen mummies be plowed under or otherwise removed. All this material should be removed from the orchard or burned. In addition to such eradication measures spraying will furnish fair protection against brown rot. Spraying the fruit while it is ripening has been objectionable because it could not be marketed in a stained condition. Dusting with sulphur may furnish a means of making a late application which will protect the fruit in its most susceptible condition, while it is ripening and in transit. The public would then need to be educated to receive such fruit.

Spraying for brown rot in cherries and plums should approximate the following schedule; Lime sulphur 1-40, first application just before the

blossoms open to prevent blossom blight; second application just after the shucks have fallen and before the fruit enlarges to more than half size; third application just as the fruit begins to colour. The insecticide should be added to these spray applications. For brown rot in peaches lime sulphur must not be used because it will burn the leaves. Self-boiled (not home-boiled) lime and sulphur of the formula 8-8-50, that is eight pounds of stone lime, eight pounds of sulphur, and after this has been thoroughly mixed while the lime is slaking it is made up to 50 gallons by adding water. Make three applications, first just after the blossoms fall, second about three weeks later, and third about one month before the fruit will be ripe. Lead arsenate, 2 lbs. to 50 gallons, should be added to these spray applications to control curculio. Late applications of sulphur and arsenate of lead dust (90-10) should be experimented with on susceptible varieties.

W. H. RANKIN.

ADVERTISERS' MISTAKE.

"One mistake most readily made by the advertiser who is not a deep student of the subject is to curtail or omit his customary expenditure for advertising in periods of dullness or uncertainty; whereas that is the time for a forced march. The keener the competition among producers or sellers and the less eager or more diffident the consumers, the greater is the need for additional activity by the advertiser. This is the time of times to use newspaper advertising."

The Provincial Government is being urged to give preference in all its departments to the products of British Columbia.

STUMPS FOR FURNITURE.

A citizen of Victoria may solve the question of getting rid of the huge stumps on cut-over forest lands in B.C. He is laying before the Department of Industries his plans for putting up small portable sawmills to be sent to various places where the stumps are plentiful. The mills will cut them in slabs, bringing out the gnarled grain of the roots. These slabs, he says, take a fine polish and can be used for various purposes, including the manufacture of furniture.

In the sweet silence of the twilight they honeyspooned upon Main street.

"Dearest," she murmured trembling, "now that we are married I—I have a secret to tell you!"

"What is it, sweetheart," he asked softly.
"Can you ever forgive me for deceiving you?" she sobbed. "My—my left eye is made of glass."
"Never mind, lovebird," he whispered gently; "so are the diamonds in your engagement ring."

WATER NOTICE.

(Use and Storage). TAKE NOTICE that Naramata Irrigation District, whose address is Naramata, B.C., will apply for a licence to take and use 1,500 acre feet and to store 1,000 acre feet of water out of North Fork, Lequime Creek, also known as Chute Creek, Shoot Creek, and Wild Horse Creek, which flows west and south and drains into Okanagan Lake on or near Lot 212, Group 1, Osoyoos Division of Yale.

The storage dam will be located at a point 1 1/2 miles due west of 12 M.P. Lot 2711. The capacity of the reservoir to be created is about 800 acre feet, and it will flood about 80 acres of land. The water will be diverted from the stream at a point about three miles west of 12 M.P., Lot 2711, and will be used for Irrigation, Domestic and Power purposes upon the lands described as District Lots 156, 206, 207, 209, 210 and 211, and 266, and Blocks 205, 221, 222, 223, 245 and 247 of Registered Plan 661 and part of District Lot 286, a full description of which is given below.

This notice was posted on the ground on the Seventeenth day of March, 1921. A copy of this notice and an application pursuant thereto and to the "Water Act, 1914," will be filed in the office of the Water Recorder at Fairview, B.C.

Objections to the application may be filed with the said Water Recorder or with the Comptroller of Water Rights, Parliament Buildings, Victoria, B.C., within thirty days after the first appearance of this notice in a local newspaper.

The description of territory to be served is as follows:— District Lots 156, 206, 207, 209, 210, 211 and 266, and Blocks 205, 221, 222, 223, 245 and 247 of Registered Plan 661, and that part of District Lot 286 described as follows: Commencing at the intersection of the northerly boundary of said block 245, R.P. 661 with the easterly boundary of District Lot 286; thence along the northerly boundary of said Block 245 to the north-west corner of the said block; thence south 59 degrees 28 minutes west a distance of 2 chains 34 8-10 links; thence south 82 degrees 25 minutes west a distance of 1 chain 17 4-10 links; thence north 1 degree 58 minutes west 87 links; thence north 78 degrees 5 minutes west 2 chains 65 9-10 links; thence north 54 degrees west 3 chains 82 3-10 links; thence north 9 degrees 14 minutes east 82 4-10 links; thence north 56 degrees 44 minutes east 4 chains 65 6-10 links; thence north 35 degrees 58 minutes west 90 links; thence north 54 degrees 13 minutes east 12 chains 10 1/2 links; thence south 7 degrees east 1 chain 95 2-10 links; thence south 28 degrees 30 minutes east 1 chain 75 3-10 links; thence south 52 degrees 9 minutes east 5 chains 5 1-10 links, more or less, to the east boundary of said Lot 286; thence southerly along the said boundary to the point of commencement.

NARAMATA IRRIGATION DISTRICT, Applicant. F. H. Rounds, Agent. The date of the first publication of this notice is April 1st, 1921.

WATER NOTICE.

(Storage). TAKE NOTICE that Matt G. Wilson whose address is Paradise Wharf, Naramata P.O., B.C. will apply for a licence for the storage of 200 acre feet of water out of Chute Lake and Chute Creek, also known as Lequime Lake and Lequime Creek which flows South West and drains into Okanagan Lake, about 500 feet from North West corner of Lot 212, Group One, Osoyoos Division of Yale District.

The storage dam will be located at the outlet of Chute Lake. The capacity of the reservoir to be created is about 200 acre feet, and it will flood about ten acres of land. The water will be diverted from the stream at a point about 1 mile East of Outlet of Chute Creek and will be used for domestic and irrigation purposes upon the lands described as Lots 86s and S.L. 18 in Block 2711.

The licence applied for is to supplement a right to take and use water as per conditional Licence No. 1876.

This notice was posted on the ground on the Seventeenth day of March, 1921. A copy of this notice and an application pursuant thereto and to the "Water Act, 1914," will be filed in the office of the Water Recorder at Fairview, B.C.

Objections to the application may be filed with the said Water Recorder or with the Comptroller of Water Rights, Parliament Buildings, Victoria, B.C., within thirty days after the first appearance of this notice in a local newspaper. MATT G. WILSON, Applicant. By Naramata Irrigation District, Agent. per F. H. Rounds, Trustee. The date of the first publication of this notice is April 1st, 1921.

Naramata News

Current Events of Town and District

The Women's Institute meeting on Tuesday was largely attended. Reports were received concerning the cemetery fencing and the financial results of the St. Patrick's tea, which added \$26.30 to the treasury. The whist drive held the next evening brought in \$12.00. The treasurer reported a balance in the bank of \$81.84. The sum of \$50 was voted to the School Library committee for the purchasing of books.

A letter received from Prof. Angus, secretary of the U.E.C. extension committee, announced a projected lecture tour by Dean Coleman next week. He would be available for an address at Naramata on Saturday, April 16th. The date being subject to change. Much interest was expressed in the proposed lecture, and the committee was authorized to make necessary arrangements.

An address on "Woman's Kingdom" was given by Mrs. McConkey. Mrs. Aitkins later spoke informally on the work now in progress at the "Little Theatre." Residents who would like to co-operate toward the production would be welcomed, and given an opportunity which would be an education along certain lines to themselves, and also a help to the new undertaking.

Mr. Stanley Dicken gave much pleasure with a violin solo, accompanied by Mrs. Green.

The On-we-go girls' club was entertained on the evening of Friday, April 1st, at the home of Mrs. Myers, guests in addition to the club being Mrs. McConkey and the girls of Mrs. Myers' Sunday School class, Miss Vera Partridge, Miss Marguerite Salting, and Miss Marie Hancock. Mrs. Ameron gave a short talk on astronomy, illustrating by means of charts the position of planets and stars, Miss Estelle Ameron later giving a practical demonstration of these positions from the Heavens themselves as viewed from the elevation on which Mr. Myers' house is built.

"All Fool's Day" proclaimed itself when tea was served, certain innocent looking cookies which occasioned consternation in the eating, proving to be camouflaged brown paper. After refreshments the girls dispersed, thanking their hostess for a very pleasant evening.

Miss Catherine Hancock, who has been spending several weeks at Hedley, was expected home early in the week. Her small brother, Percy, left on Tuesday to attend Chestersfield School in Kelowna.

The girls of Mrs. Ameron's S.S. class have taken over the cleaning of the Church basement as well as the auditorium, at an increased remuneration to be paid by the Ladies' Aid Society.

Mr. Cooper, accountant at the Okanagan Securities Co., arrived in Naramata last week, accompanied by Mrs. Cooper and are at the Syndica House. Other guests at the Syndica are Mrs. Morrish and her little daughter Pauline. Mrs. Duke, in view of the increasing number of permanent

guests, and in anticipation of the influx of summer transients, is fitting up additional rooms in the upper part of the building known as the Morsch Block.

Mr. L. Robinson is opening up a pool room and barber shop in the Morsch block.

The substantial financial aid so liberally given by the Ladies' Aid Society in support of the Naramata Church was the subject of an appreciative letter received from the Quarterly Board at last Wednesday's meeting of the Ladies' Aid Society. The letter expressed the thanks of the Board for help given ever since the organization of the Church, and particularly for the recent payment in full of the balance of the Church debt. The Society is now undertaking to assume the lighting expenses of the Church and to purchase bulbs. Mrs. Williams was asked to procure information re. cost of establishing a light at the basement door. A visitor, Mrs. Hunt of Glenmore, was welcomed during the afternoon, and also the return of a former member, Mrs. Cash. Mrs. Kenyon served tea, after the completion of the afternoon's work and business.

We are informed that the committee who looked over the Naramata Hotel with a view to its acquisition for the accommodation of the girls' school now at Vernon, were very favorably impressed. It is hoped that the transfer of the school here will finally be decided on.

"Cemetery Day" after many postponements, took place on Friday, April 1st, with a good attendance of workers. Much cleaning up was done and all the post holes dug for the fence. Another day will have to be utilized for putting up the fence. A hot dinner was served at the Club house, and the whole day proved an enjoyable one, in addition to the value of the work accomplished.

"Quarterly Promotion Day" will be observed at the Naramata Sunday School on April 10th. Certificates will be presented by Mr. King to those attaining certain standards of excellence in the Sunday School during the quarter. A special program is being prepared, to which Mr. D. J. Welsh, Principal of the High School at Summerland will contribute an address; Mrs. Walters, a vocal solo; and Mr. Stanley Dicken, a violin solo. The public are invited to attend.

Mrs. Bruce Cash entertained at tea at the Unity Club on Thursday of last week in honor of her house guest Miss Bertha Dillan of Vernon. Small tea tables centred with bowls of early spring flowers made the room specially attractive. Miss Dillon sang several selections very acceptably during the afternoon, accompanied

by Mrs. Languedoc. Perhaps what gave greatest pleasure to those present was Miss Dillon's rendering of a lullaby by Pauline Johnson, the music of which she had composed herself. Mrs. Ameron contributed to the entertainment of the guests by a recitation. Those present were Mrs. Howard Rounds, Mrs. J. M. Robinson, Mrs. Cash, Miss Mason, Mrs. Languedoc, Mrs. Hancock, Mrs. McConkey, Mrs. Campbell Robinson, the Misses Robinson, Mrs. Ameron, and Mrs. Duke.

Miss Dillon, who spent a week with Mrs. Bruce Cash, returned to Vernon on Friday of last week.

Mr. J. Lyons has bought Mr. Wolstencroft's bungalow on the lake shore, and intends to reside there shortly. Mr. and Mrs. Wolstencroft, who will be much missed in Naramata intend removing to Pentiction.

Mrs. Logie and Miss Grace Logie spent last Wednesday in Naramata, the guests of Mrs. Campbell Robinson.

Synopsis of Land Act Amendments

Minimum price of first-class land reduced to \$5 an acre; second-class to \$2.50 an acre. Pre-emption now confined to surveyed lands only.

Records will be granted covering only land suitable for agricultural purposes and which is non-timber land. Partnership pre-emptions abolished but parties of not more than four may arrange for adjacent pre-emptions with joint residence, but each making necessary improvements on respective claims. Pre-emptors must occupy claims for five years and make improvements to value of \$10 per acre, including clearing and cultivation of at least 5 acres before receiving Crown Grant.

Where pre-emptor in occupation not less than 3 years, and has made proportionate improvements, he may, because of ill-health, or other cause, be granted intermediate certificate of improvement and transfer his claim. Records without permanent residence may be issued, provided applicant makes improvements to extent of \$300 per annum and records same each year. Failure to make improvements or record same will operate as forfeiture. Title cannot be obtained in less than 5 years, and improvements of \$10 per acre, including 5 acres cleared and cultivated, and residence of at least 2 years are required. Pre-emptor holding Crown grant may record another pre-emption, if he requires land in conjunction with his farm, without actual occupation, provided statutory improvements made and residence maintained on Crown granted land.

Unsurveyed areas, not exceeding 20 acres, may be leased as homestead title to be obtained after fulfilling residential and improvement conditions. For grazing and industrial purposes areas exceeding 640 acres may be leased by one person or company. Mill, factory or industrial sites on timber land not exceeding 40 acres may be purchased; conditions include payment of stumpage. Natural hay meadows inaccessible by existing roads may be purchased conditionally upon construction of a road to them. Rebate of one-half of cost of road, not exceeding half of purchase price, is made.

PRE-EMPTORS' FREE GRANTS ACT The scope of this Act is enlarged to include all persons joining and serving with His Majesty's Forces. The time within which the heirs or devisees of a deceased pre-emptor may apply for title under this Act is extended from one year from the death of such person, as formerly, until one year after the conclusion of the late war. This privilege is also made retroactive. No fees relating to pre-emptions are due or payable by soldiers on pre-emptions recorded after June 26, 1918. Taxes are remitted for 5 years. Provision for return of moneys accrued due and back paid since August 4, 1914, on account of payments, fees or taxes on soldiers' pre-emptions. Interest on agreements to purchase town or city lots held by members of Allied Forces, or dependents, acquired direct or indirect remitted from enlistment to March 31, 1920. SUB-PURCHASERS OF CROWN LANDS Provision made for issuance of Crown grants to sub-purchasers of Crown Lands, acquiring rights from purchasers who failed to complete purchase, involving forfeiture, on fulfillment of conditions of purchase, interest and taxes. Where sub-purchasers do not claim whole or original parcel, purchase price due and taxes may be distributed proportionately over whole area. Applications must be made by May 1, 1920.

GRAZING Grazing Act, 1919, for systematic development of livestock industry provides for grazing districts and range administration under Commissioner. Annual grazing permits issued based on numbers ranged; priority for established owners. Stock owners may form associations for range management. Free, or partially free, permits for settlers, campers or travellers, up to ten head.

Retail Merchants and Price Decline

Selling at Margin Over Replacement Cost Makes Profit, Not Loss.

Losses caused by the depression in prices have been felt by the retail merchants here as keenly as elsewhere, but a somewhat new light has been thrown on this subject by men well versed on the situation. "The attitude of the workers must change before we can get back to normal times," states Mr. D. A. Cameron, general manager of the Canadian Bank of Commerce. Mr. Cameron said he had stood up for the workers until the present time, but money made in munition work had led to exaggerated extravagance. Mr. Cameron blamed the merchants, especially the retail merchants, for the present state of things commercially. The manufacturer and many of the larger retail dealers had written off their losses, he said, but the smaller retailers were holding on to their goods, and the longer they held the goods the greater would be their loss.

Some interesting explanations of the question of writing off losses were given by Secretary Macdonald, of the Georgia Wholesale Grocers' Association. He points out that when a merchant sells his merchandise at a fair margin of profit over the present replacement price he doesn't lose money on the stock he has on hand, no matter what price he paid for it. His loss was made

when the goods declined, not when he makes the sale, unless the two conditions happen simultaneously. In the case of most retail grocers the loss was made many months ago, but they continue to fool themselves by valuing their merchandise at its book cost instead of its replacement cost.

Take, for example, a can of tomatoes on the merchant's shelf. Say this can cost him 15 cents. Say that the same brand of tomatoes can today be bought by the merchant at 9 cents. Suppose that merchant sells that can which cost him 15 cents at 11 cents, has he made or lost money? Almost every merchant will tell you that he has lost 4 cents, when as a matter of fact he has made 2 cents. For with 9 cents of the money that he has taken in he can buy another can of the same tomatoes, making his stock exactly the same as before, and he still has 2 cents more that he had before.

Every merchant must look at the replacement value and not the book cost of his merchandise. Unless he realizes now that the only way for him to figure it at a reasonable profit over his replacement value he will be left in a short while with nothing but merchandise and no trade. He should be able to see that he can make a profit by selling this merchandise out and replacing it with the same goods, that this method of merchandising will make him richer, not poorer, and that although he may think that when he sells goods below the book cost he is losing money, in reality to-day he is making money if he makes a margin above his replacement price.

Save Time and Avoid Worry

Most farmers have sales notes due them at some time or other, but busy days make collections difficult.

Let us look after payments and credit collections to your account while you do your farming.

Have You HATCHING EGGS FOR SALE?

or do you purpose offering BABY CHICKS?

Many readers of The Review will be ready to buy either or both if they know where to buy what they want. Tell them in this column of what you have to offer.

ADVERTISING in these columns pays well. That is what those who have tried Review want ads. tell us.

FOR SALE.—White Wyandotte eggs for hatching, \$2 per setting. Balcom Ranch. 36tf

FOR SALE.—White Leghorn eggs for hatching, from 250 egg strain. Price \$2.50 per setting. Runner duck eggs from pen headed by drake imported from England; first prize,

YOUR STORE ADVERTISING

"EVERY GOOD STORE, EVEN THOUGH IT BE A SMALL ONE, SHOULD BE ADVERTISED."

Small beginnings, wisely made and persistently followed up, will mean assured growth and larger opportunities for the little merchant—just in the degree that his store merits and earns wider patronage and approval.

A small advertising space costs a small amount of money. Yet it affords a chance to the small merchant to tell why he seeks a wider patronage—what he has to offer that is unusual.

And whether he is located on the beaten pathway of trade or upon an unfrequented byway, his Ad. will lead people to seek him out. And, in due time, he will be able to decide the matter of store location according to his liking rather than according to his necessities.

SUMMERLAND, B.C., FRIDAY, April 15, 1921

\$2.50, Payable in Advance

COUNCIL WAS CONFRONTED BY UNUSUALLY HEAVY AGENDA

Afternoon Taken Up By Visitors to Council Chamber. Tax Sale Properties Find Buyers. Preparing School Loan By-law

WOULD DRAIN PRAIRIE VALLEY MEADOWS

Water Committee Submits Report on Several Matters. Municipality to Meet Half Cost of Garnett Valley Flume Repairs

Though the council met at 1.30 on Tuesday there was only one item of business on the agenda, beyond the reading of the minutes and the passing of the monthly accounts disposed of when an adjournment was made at 6.20 for dinner. Most of the afternoon was taken up in conferences with ratepayers and others, including that with the managing director of the West Kootenay Light and Power Company, the Trout Creek Water Community, and the Assistant District Forester, M. V. Allen, all of which are covered by articles under other heads in this issue. The council sat until within five minutes of midnight, and left much uncompleted business to be dealt with at an extra session.

Mr. P. G. Koop waited on the council seeking better irrigation service in his lower orchard, of which he had written the council from England several months ago. He expressed the desire to have a measuring box placed on the flume serving that orchard, the cost of which he was willing to pay. Mr. Koop was advised by Chairman Kirk of the water committee that certain improvements had been made in that section and he felt sure there would be a better service this year. A request by Mr. Koop for improvements to a road in his vicinity was referred to the roads committee.

Complaint was made by R. Johnston of poor lighting in his house during the hours the Baptist Church nearby was lighted. The electric light committee was asked to investigate.

Asking that the council co-operate with the Summerland Development Company to drain the sloping adjacent to his property, E. O. James told of the damage the water was causing. He offered to get the written permission of nearby property owners to have an old drain opened up. The matter was referred to the water committee.

On behalf of water users in the neighborhood, Wm. Beattie asked that a siphon carrying irrigation water across a road near Mrs. Holder's be enlarged. The insufficiency of this siphon has made it impossible to get enough water through to the properties concerned.

By-law No. 135, a by-law to regulate the number of connections to individual lots was given preliminary readings.

The Clerk was instructed to write the Lieut.-Gov.-in-Council, asking for cancellation of the street end on the shore near the Union building, and giving approval to its proposed transfer to the Union.

The offer of J. C. Arkell for the purchase of a tax sale property in Peach Valley, commonly known as the Oil Co. property, for a price of \$800 on terms was accepted.

By-law 136, authorizing the sale of Lots 7 and 8, Block 7, D.L. 456 to the

NEW PROPOSAL FROM TROUT CK.

Water Community Has Less Expense Plan For Covering District.

A new proposal from the Trout Creek Water Community with respect to the irrigation system in that section was laid before the Municipal Council on Tuesday. The new plan would require considerably less immediate expenditure, and would make it possible to put the Evans and adjoining properties under the community system in a short time. Under the new plan, the ditch through the J. R. Brown property running north-eastward from the dam would be used, and the eight inch pipe now served by the pump would be moved and 940 feet of additional pipe laid to carry the water around to the high point to which the water from the pump is now delivered. Existing flumes would be relocated where necessary.

The suggestion is that the Municipality contribute the pipe and existing flumes in consideration of the Community serving the area now supplied by the pump. Further, The Community, which has recently been reorganized and is a responsible, chartered body, would raise the necessary money to make other local improvements instead of the Municipality doing so. The Community is looking to the Municipality to contribute additional pipe, etc., required up to the sum of \$2,000, provided the material at present on the ground which it proposes to take over, does not come up to that figure in value. The municipal water committee was instructed to learn the value of the pipe and existing flumes owned by the Municipality.

ORGANIZE TO FIGHT FIRES

Forestry Branch Seeking Municipal Co-Operation to Protect Water Sheds.

Better organization for the protection of our water sheds and forest areas is the aim of the Forestry Branch, and particularly of Mr. M. V. Allen of Vernon, assistant district forester and officer in charge of fire protection in the Okanagan district. Mr. Allen met the Municipal Council on Tuesday and asked for the co-operation of the Municipal authorities in guarding against fire. It was very apparent to the members of the Council that Mr. Allen is an enthusiast, and is putting his whole heart in his work.

In 1920 there were 132 fires in this district, burning 6,500 acres of standing merchantable timber, 4,000 acres of new growth, 12,000 acres of new stocking, and 3,000 acres of grazing land. Thirty-one of these fires were caused by lightning, and 101 by the agency of man, all of these latter being preventable, according to Mr. Allen. Mr. Allen hopes with the co-operation of the people generally to eliminate, to a large extent, the fires on Okanagan water sheds. He was with the Department before going overseas, and as a result of the war the work was much disorganized. In the district bounded on the north and west by the Dominion Railway belt, on the south by the international boundary, and the eastern boundary of which extends along the divide east of the Okanagan, there are now four rangers with assistants, a total staff of 21.

Mr. Allen's purpose in coming to the Council was to ask for the fullest possible co-operation, and particularly that the Council name some official whose duty it will be to advise the nearest forest ranger immediately a fire is detected, and who will until the arrival of that official, jump in and fight the fire.

Though land-owners are individually responsible for fires on their land, yet the Forestry Branch wish to be advised immediately a fire starts, no matter where it may be, and will be ready to give assistance to prevent spreading to other lands. Mr. Allen expected also to appoint some local representative who would be authorized to call out a limited number of men.

Mr. Allen proposes to carry on a campaign of prevention, detection, and control. The Council agreed to appoint the Municipal Foreman to co-operate with the Forestry Branch.

MARY P. McCALLUM GETS IMPORTANT POST WITH FEDERAL FARMERS.

Miss Mary P. McCallum, who has been given important duties with the federal farmers organization. It is understood that Miss McCallum's appointment will mean that a woman's department corresponding to those of the affiliated provincial organization will be established in the federal body.

COMPETITION IN GARDENING

The Women's Institute Adopts Rules for Summer Contest in Vegetable Growing.

At the regular monthly meeting of the West Summerland Women's Institute on Friday last, members and a number of visitors listened to a most interesting address on Gardening, by Mr. Helmer, in which particular attention was paid to the competition in the growing of winter vegetables proposed as part of the year's programme.

In addition to most clear and timely advice on soil preparation, seeding, cultivation, irrigation, harvesting and storing of winter vegetables, the speaker submitted complete and practical rules for the governing of the competition which were accepted with gratitude by the meeting.

A number of members entered as competitors and it is hoped that many more from both local institutes will send their names as soon as possible to Miss Cartwright, secretary, and obtain copies of the appended rules, with full explanatory notes on varieties, standard of perfection, and points of importance in the summer scoring of the plots. While tea was served Mrs. G. J. C. White conducted a demonstration in buttermaking, in which interest was manifested among the members engaged in various branches of dairy work.

RULES OF COMPETITION.

- PLOT size 1/2 acre—104 by 52 feet.
- SOIL PREPARATION may be done by teams and hired help.
- SEEDING to be done by competitor.
- THINNING to be done by competitor.
- MARKING FOR IRRIGATION may be done by hired help.
- IRRIGATION may be done by hired help.
- WEEDING AND HOING to be done by competitor.
- CULTIVATION may be done by hired help.
- ANY EXTRA WORK so essential to good vegetables, such as raking down rows, must be done by competitor.
- HARVESTING may be done by hired help.
- SELECTION AND CLEANING OF EXHIBIT to be done by competitor.
- EXHIBIT—six varieties: six specimens of each.
- HAND BLOWN OFF.

Charlie Harvey, a boy of 2 1/2 years while playing outside the family residence at Glen Rosa, near Westbank, found a detonating cap, apparently intended for use on road construction. He took it into the house, and after playing with it for a time struck it with a hammer. The explosion blew off the child's left hand and caused lacerations of the face and injured the left eye. His mother was in the room at the time, but had not noticed the nature of the child's toy. Medical aid was summoned and the child hurried to the Kelowna Hospital.

A man put a woman's head on the silver dollar, and now women are trying to get their hands on it.

SUNDAY WATER IS A PROBLEM

Council Agrees to New Plan of Control. Some Ditches Ready for Water.

Instructions were given by the Municipal Council on Tuesday to turn the water into portions of the irrigation system next week. Foreman Tomlin stated that he would be able to put water down the south main and through some of the other ditches. As a good rain has come since probably it will not be necessary to start irrigating so soon.

When the water is once turned in, it is kept going seven days in the week throughout the season. In the past there has always been trouble all over the district with respect to rights to the water during Sunday, and the foreman has complained that during the irrigating season Sunday is his busiest day, as the ditchmen were not on the job and the duty of apportioning the water on Sundays has fallen to him. On more than one occasion he has asked for a change in this respect. For the sake of the flumes and in order to satisfy water users, the water should be kept flowing on Sunday, and at Tuesday's meeting of the Council the foreman stated that he believed a fair apportionment of the water could be made by each ditchman on Sunday morning, and upon his recommendation the council decided that each of the eleven ditchmen would be required to apportion the water on his section on Sunday mornings. As compensation it was decided that the men should be paid the same monthly wage as last year, the contemplated reduction not being made in view of the extra work.

SPRING RAINS VERY WELCOME

Crop Prospects Throughout the Valley are of the Best. A Pest Warning.

It is seldom that this section of the Okanagan enjoys two days of steady gentle rainfall such as has been experienced this week. The rain coming at this time brings delight to the fruit and vegetable growers. It has put the soil in prime condition and especially will it stimulate the growth of small seeds.

Crop prospects throughout the Okanagan are reported to be of the best. We have escaped frosts which are said to have destroyed 50 per cent of the prospective stone fruit crop in the Yakima district, and has done much damage in the Niagara district.

Our fruit pest inspectors are warning growers to take special precautions against fruit pests, the past winter having been a very favorable one for them.

CANADIAN APPLES IN ENGLAND

Writer in Toronto Saturday Night Comments on Her Gift.

A van stopped at the door the other day and presently came the statement: "A case for you and please sign the book." Now, what do you suppose was in that case? asks Mary Isabelle Moore in Toronto Saturday Night. You'd never guess. You'd most likely think of a pet snake, or a box of books, or a new table, or something of the kind. So I shall tell you. The case contained Canadian apples.

And such apples! Are there any apples in the world like ours, and if so, I should like to know where they are. Since those apples came I have become a boastful person, calling attention by means of the rosy checked apples to the superior attractions of Canada, dragging the apples into every conversation and making them in fact a sort of King Charles' head, which was Mr. Dick's obsession. You have to know what it is to buy scrubby apples by the pound, and at a jolly high price too, to appreciate a whole box of apples at one time. I brood over them in my leisure moments, I generously offer gifts of apples to friends in order, partly, to have a chance to mention that they came from Canada, and if I had a gift that way, I should burst into verse in praise of the wonderful fruit from Canada.

KOOTENAY POWER LINE HERE BY MIDDLE OF SEPTEMBER

This is Promise of Managing Director Subject to Approval of his Board. Mr Campbell Interviews Council on Subject.

NO STEPPING DOWN STATION REQUIRED

Company Will Deliver Power to Central Point to be Selected by Council for Distribution. Will Submit Draft Contract

Electrical energy will be delivered to the Municipality of Summerland by the West Kootenay Light and Power Company by the middle of September next. This was the promise made by the managing director of the Power Company, Mr. Lorne Campbell, who met the Municipal Council on Tuesday and discussed with that body, in an informal way, plans for extending the Company's power line to Summerland, and outlined the proposed contract.

Mr. Campbell, who at first suggested that the Municipality should build the power line from Penticton, agreed that his company would build the line to any central point in the municipality that the council should name. He further agreed to sell power to Summerland at the same price which the company will charge Penticton, viz., 3c. per kilowatt, if the total consumption is 50,000 kilowatts or more per year. Higher rates of 1/2c. each were quoted on two smaller minimums, but as it is expected that the 50,000 total will be exceeded in the first year, the council was only concerned with the 3c. rate.

Energy will be delivered at a voltage of 4,600, which will permit the use of transformers to step the voltage down to 110 or 220 as required. This will dispense with the necessity of erecting a stepping down station here which would cost from \$70,000 to \$80,000. Mr. Campbell explained that the higher power would be carried up the Valley as far as Penticton, and one stepping down station made to serve both communities.

The company will require a ten year contract with the municipality. The transmission line will probably be built early in August, but it might be after the first of September before the stepping down station was complete, as it is not yet possible to get quick delivery of all the materials needed. All this is contingent upon the recommendations of the manager being adopted by the directors of the power company and the company's ability to finance the Okanagan extension.

In reply to a question from the Reeve, Mr. Campbell expressed a willingness for his company to take over the local distribution, as the company does in Trail and Rossland, but he agreed with the Reeve that the ratepayers would probably oppose entering into a contract of that nature.

To the wholesale price of 3c. the municipality must add the cost of distribution, and will probably charge enough in addition to take care of the (fortunately) small yearly sinking fund and interest on the present hydro-electric plant. No doubt two rates will be fixed, one for power purposes and the other for light.

It seems more than probable that the Kootenay Co. will extend its power line to the northern part of the Valley. Mr. Campbell was at Vernon and Kelowna this week, and interviewed the councils there. While leaving the impression that the 60,000 volt line would be built up the east side of the lake to these centres, he advised that it would be better that they carry on as at present for another year, when construction costs will be lower.

DEAN COLEMAN SPEAKS ON SUNDAY

Dr. H. F. Coleman, dean of the General Arts and Science Department of the University of B.C. will speak here at the Lakeside Church on Sunday evening on National Ideals in Education. Dean Coleman, whose lecture is one of those included in the extension course by the University faculty, is one of the most sought after speakers of the faculty, and the announcement of his coming here on Sunday and to Naramata on Saturday should result in large audiences at both places.

The citizens are asking the council at Kaslo to put through a daylight saving by-law this year, so as to enable them to move the clock an hour ahead from May to November.

Unless the city council comes through with a grant of \$500 Vernon brass band will discontinue operations. The organization has no intention of passing the hat amongst the citizens.

WOMEN HERE IN CONVENTION

The annual Presbyterian meeting of the Women's Missionary Societies of this district was held for the first time in Summerland this week with about 30 delegates in attendance, the meetings covering two days, Wednesday and Thursday.

On Tuesday evening the visiting delegates who arrived by boat were entertained by the women of St. Andrew's Church, and on Wednesday evening, the St. Andrew's Mission Band repeated its pageant descriptive of life in India, to a very appreciative audience of delegates.

We are promised a report covering the convention for our next issue.

APPLE PRODUCTION.

The production of apples in Canada to-day barely equals the output of 25 years ago, according to the statement of Dominion Fruit Commissioner C. W. Baxter at the annual meeting of the Ontario Fruit Growers Association.

STARTING WORK ON STORAGE

Placing of Heavy Foundation Under New Fruit Store-house Now Begun.

Work on the Storage Company's new building will commence next week. The site has been cleared and details as to the foundations agreed upon. Piling will be driven along the edge of the lake and in other places where needed. Concrete caps will be built on these and where piling is not needed large concrete piers will be built. The main beams connecting these piers will be of reinforced concrete.

The work will be done by Robertson Partners, of Vancouver. Mr. Robertson, of this contracting firm, has been here this week, accompanied by S. Birds, of Twizell, Birds & Twizell, architects in charge of the work.

HOPE SPRINGS ETERNAL.

—Morris

Peachland Doings

A Weekly Chronicle Furnished By Our Local Representative.

Mrs. J. Winning and family left last week via K.V.R. to return to Vancouver after having spent some months in Peachland. Mr. Winning expects to follow later.

Work is progressing favorably on the repairing of the irrigation system. A gang has been at work on the Lang flat making necessary improvements to that section. A number of measuring boxes have recently been made, and are being distributed to where needed.

Mrs. Mussen left on Wednesday morning for Vancouver to visit relatives for a short time before sailing for England.

The B.C. and Layritz nursery stock has arrived and is being distributed to the various purchasers. We note that there are a few peaches still being included in the shipments so it is to be hoped that the fame of the name will continue.

Mrs. W. Fulton enjoyed a visit last week of a friend from Penticton, Mrs. Brewer, a former Calgary acquaintance. She spent Wednesday in town and accompanied Mr. and Mrs. Fulton on a visit to Kelowna on Thursday.

Mr. Clarke, Mr. and Mrs. Cudmore and Mrs. H. E. McCall motored to Kelowna on Wednesday of last week, enjoying a very pleasant trip.

Mr. W. L. Williams and Mr. W. Shaw motored to Penticton on Wednesday evening returning on Thursday evening.

Mr. O. and Mrs. Martin Hendrickson with Mrs. Hendrickson and baby left on Thursday morning for Canoe, B.C. to visit with Mr. Hendrickson's people for a time.

Miss Doris Charlton left on Thursday morning for Vernon to remain for a time.

After spending a good portion of the winter with his family Mr. Robertson left on Thursday morning to look after his prairie farm. The family will remain here for at least the season.

Mr. and Mrs. Heighway and daughter Margaret moved down from the mill last week and have taken up residence again in the house they formerly occupied before moving up to the mill.

Mr. W. C. Aitkens returned Thursday evening and will probably remain here for some months.

The regular meeting of the Peachland Women's Institute was held in the Municipal Hall on Thursday evening. An invitation had been extended to the men to attend, to witness a demonstration of spinning given by Mrs. Allan Wilson. Mrs. Wilson took the wool as it comes from the sheep, carded and spun it before gathering. It proved a very interesting feature of the program, as many of the audience had never before witnessed the old art. She also had on exhibition a pair of mittens which she had knit from the wool spun by herself and they were ample evidence of what we might term "good goods." The audience was also treated to some vocal and instrumental music and a recitation, Mrs. Stewart giving a number of piano selections. A very pleasant evening was brought to a close by the serving of refreshments.

A hint of the good old summer time was given on Friday evening when ice cream was put on sale in the Orange Hall by J. Kudelka & Son. Tables were provided in the Hall and card games were indulged in by any who wished to play.

Mrs. Harry McHollister arrived on Friday evening to spend a few days here with her parents, Mr. and Mrs. J. Winger. She returned to her home at Kelowna on Monday morning.

The case Wray vs. Winger was given a preliminary hearing in "closed court" here on Saturday before Magistrate Guernsey of Penticton and Mr. Thos. Powell, J.P., of Peachland. N. F. Tunbridge of Penticton appeared for Mr. and Mrs. Wray and W. C. Kelley of Summerland for the defendant. The accused was committed for trial. Messrs. Guernsey, Tunbridge and Mr. and Mrs. Wray motored up from Penticton while Mr. Kelley in company with Mr. D. J. Welsh motored up from Summerland, and all returned the same evening.

Mr. and Mrs. A. E. Drought and family having sold their property in the Trepanier Townsite moved to Westbank on Saturday to take up residence on the property purchased there. The new owners of the

Drought ranch being Mr. and Mrs. Martin and Miss Gamble have taken possession and are getting the land in shape for the season's crop.

The Municipal Council have a man employed this week making repairs in the sidewalk which in some sections were badly needed. In most of the places new planking was all that was necessary, but in others new stringers had to be put down.

A deal which was reported some time ago and which was at that time supposed to be closed, fell through, being the sale of the butcher shop, premises and business by Mr. W. Fulton. However, he has made a sale now, Mr. H. Williams being the purchaser. Mr. Williams took charge of the shop on Monday morning, and Mr. and Mrs. Fulton moved to the cottage vacated by Mr. and Mrs. Hendrickson. Mr. and Mrs. Williams and family move in this week, and will continue to keep a full line of meat.

Mr. Webber and Harvey of Glenora have finished their contract of cutting wood for J. Kudelka & Son, and moved back home. Before leaving, they were employed by the Municipal Council to cut down a fairly large fir tree which has been standing with quite a lean towards the butcher shop, and which several bush men have refused to tackle. It has been the source of considerable concern on the part of those who had lived on the premises hitherto. The felling was successfully done with the aid of a cable attached to a tree farther up the hill to swing the falling tree sideways.

A concert and dance was held in the Orange Hall on Tuesday evening, conducted by Jack Williams, "King of Entertainers." The audience was well pleased with the program and were loud in their praise of Mr. Williams as an entertainer. He rendered vocal and instrumental selections including sentimental, comic and rag time, performed some very amusing magic tricks and addressed the audience on subjects of interest such as China and her development during past centuries. The dance was held at the close of the entertainment.

The death of Mrs. Hamilton occurred on Tuesday at their residence at the Cement Works. The decease came very sudden following a stroke in the morning from which she did not recover. One son, Jack, was in Victoria attending Normal, and Mr. Hamilton Sr. was away on the prairie. Word was telegraphed at once. It is very unfortunate that one of the sons had recently been taken quite ill and had to be removed to the hospital for treatment.

Miss Masters, Home Counsellor for the Home Branch of the Soldier Settlement Board, gave demonstrations on Monday and Tuesday of this week under the auspices of the Peachland Women's Institute. On Mon-

CANADIAN HAPPENINGS

CHRONICLED IN BRIEF

Vernon.—An increase of eighteen per cent in the number of phones in 1920 over 1919 is shown in the annual report of the local telephone company. The telephone service was much improved, and, in addition, three hundred and thirty miles of wire were strung, while eight hundred new poles were erected.

Chilliwack.—A factory for the manufacture of powdered milk will be erected here shortly. It will have a capacity of 80,000 pounds daily, sufficient to handle the entire output of the district. It is expected to be in operation by May fifteenth.

Victoria.—Statistics compiled by the Forest Branch of the Provincial Government show that during last year 390,000 acres of timber were burned in British Columbia. This represents a loss of 236,000,000 feet, valued at \$299,000. The damage to young growth is estimated at \$186,000, or a total of \$485,000, as compared with \$393,000 in 1919. Of the season's fires 345, or 28 per cent, were caught and extinguished before they had reached a quarter of an acre in size, and 391, or 31 per cent, were extinguished before they had reached ten acres. Wireless telephones were tried out with satisfactory results.

Vancouver.—The manufacture of toys, from British Columbia materials will be commenced here shortly by a company which was recently incorporated with half a million dollars capital. It is the intention of the company to confine manufacture to toys and doll houses.

Prince George.—The Indians of

day she demonstrated the adapting of commercial patterns to fit different figures and also gave useful hints on cleaning and renovating clothes. On Tuesday she canned beef and chicken, boning the fowl, telling of the food values of different parts as she worked. All who attended considered the demonstrations very helpful and her talks instructive.

Rev. Isaac Page of Penticton motored up on Tuesday afternoon to attend the quarterly business meeting of the Baptist Church here held in the evening. Mrs. A. D. McCall accompanied him to attend the meeting and visit with the rest of the family here. They returned to Penticton at the close of the meeting.

Recent word of Dave Kirkby is that he is gaining strength after his severe illness.

this district, unable to understand the stabilizing process which the fur trade is undergoing, have laid aside their traps and taken up tie making. The frisky marten—of which there is an abundant supply—is left strictly to his own devices, and it is expected that Nature will soon have replaced the heavy kill of the high-price seasons.

Calgary.—A scheme of important proportions in connection with the Western Canadian cattle industry under consideration by the executive of the United Farmers of Alberta, has for its object the shipment of Canadian meat to Europe in a chilled state. Exhaustive investigation of the project has been made by an appointed committee who have decided favorably upon its practicability. The scheme entails the establishment of killing and chilling stations, and a fast system of transportation in specially constructed cars. In addition, storage facilities will have to be secured in Great Britain in order that meat may be placed on the market in proper condition when required.

Calgary.—Prospectors, geologists, and others interested in the oil discovery at Fort Norman are going north in order to be the first in the new oil field with the opening of spring. The Edmonton, Dunvegan and British Columbia railway has been doing a record-breaking business, and trains which have left Edmonton recently for Peace River Crossing, the jumping-off place for the north, have been literally crowded with people anxious to get into the Northland, and accommodation has been taxed to the utmost limit.

Calgary.—Enthusiasm ran high among the large crowd of dairymen and stockraisers, who visited the experimental farm of the Canadian Pacific Railway at Strathmore, in order to see at first hand results of the feeding of sunflower silage to cattle. In commenting upon this fodder, E. S. McRory, manager of the Western Division of the United Grain Growers' Company stated that it would go a long way towards solving the feed problem of the West.

Regina, Sask.—The total value of agricultural and live stock products in the province of Saskatchewan in 1920 was \$549,997,969, according to the final statement of the Department of Agriculture. Of this sum, \$308,967,214 was for agricultural products, while the balance was taken up by live stock products. Wheat, with a total yield of 113,135,274 bushels, valued at \$175,359,674, formed the major part of agricultur-

al products and 948,280 horses and mules valued at \$151,724,800, was by far the largest single item of live stock revenue.

Regina, Sask.—Between 4,000 and 5,000 farm laborers will be required on Saskatchewan farms this spring, according to the Superintendent of the Employment Service of the Bureau of Labor and Industries. Already, over 1,500 orders for farm help have been received by the various offices of the Saskatchewan government employment service. These orders have been placed in advance for help that will be required about April 1st, when it is expected seeding will be in sight.

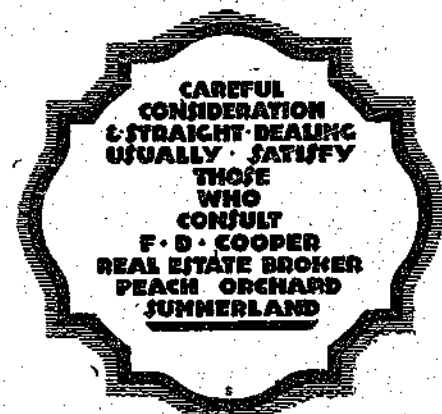

Winnipeg.—Fifty American farmers arrived in Winnipeg recently from Iowa, Minnesota, North and South Dakota, Illinois and Wisconsin en route to Western points, the majority of whom emigrated to Canada as a result of having friends in the West. They claim a large number of famers in the United States are contemplating coming to Canada as soon as present holdings can be disposed of.

A large order for railway ties has been placed with British Columbia mills from Egypt.

FERTABS

PILLS FOR PLANTS contain all the nourishment necessary to plant life. No manure required. Dose: One pill per plant per month. In 25c., 75c., and \$1.50 packets.

The Winding Trail

"All the world's a stage" quoth Jacques, "and all the men and women merely players." I suppose we might, if we were curious enough, trace from the truth contained in this aphorism the universal delight taken by mankind in mimic presentations of the comedies and tragedies of human life. The things which happen to us all, in varying degrees and divers ways, are the things which must always be of supreme interest to us, and not satisfied with their daily occurrence all around us, we crave for their reproduction to entertain our periods of relaxation. From the contortions of an Italian marionette to the finished acting of a Forbes Robertson or Martin Harvey is a very long step, but the craving which underlies them is the same in both extremes. The marionette, with legs and arms more or less under control of the wires which manipulate them, were of enthralling interest to their audiences not so very long ago. Dickens tells us of his experience in Genoa, where he saw the play of "The Death of Napoleon" reproduced by a noted company of puppets, and describes Napoleon (reading a book) as "bending over the volume like a boot jack, and his sentimental eyes glaring obstinately into the pit." Napoleon's medical attendant, by the way, "in consequence of some derangement of his wires, hovered like a vulture, and gave medical opinions in the air." To the visitor the sight was "unspeakably ludicrous," but was received as a matter of course by the general audience. I am not sure but that some of the "Hezekiah Hayloft" stuff offered us now and then on the screen, would seem as ludicrous as the antics of the marionette, if we had not been getting more or less hardened to it. However, that may be chiefly a matter of taste.

Speaking of the screen presentations, by the way, brings to mind those curiously prophetic lines by Wordsworth, which might easily be taken as aimed at the present day sway of the moving picture film. "Avaunt, this vile abuse of pictured page! Must eyes be all in all, the tongue and ear nothing?" It is quite certain that Wordsworth was not referring to the "pictured page" as we know it, and his couplet must be read in conjunction with Tennyson's prediction of "the navies of the skies," written when aerial navigation was unknown. But it will be admitted that his protest is particularly seasonable at this time, when the essence of the art of "movie" acting seems to be an ability to display the whites of the eyes to excess, and the wearing of a cowboy hat and woolly breeches by the male characters, and a look of wild horror (or a bewitching smile, as the case may be) by the ladies of the cast. The moving picture is a great institution, and, with the elimination of much of the wearisome twaddle which now spoils it, will remain a source of pleasure and education. But its lack of the real essentials of acting must for ever relegate it to the second place. It is not enough to see a great actor gesticulate and go through the motions called for by the text: we must hear his voice, and listen to the poetry which the author has put into his mouth. The power of language is the supreme attribute of man, and a great speaker can sway a crowd of thousands by his eloquence. Where, then, can be the full satisfaction of dumb show, and why should we lose the chief element of representation? Even the Italian puppets speak, by their hidden interpreter, and the boy of a past generation was not content to produce an array of characters in his toy theatre without declaiming their parts from his book of the words. Polonius, listening to and observing the player speaking before Hamlet, cries: "Look, whether he has not turned his colour, and has tears in 's eyes. Prythee, no more." Would the mere counterfeit of dumb show have so wrought upon the actor?

I have been led into these reflections by the reference in a recent issue of this paper to the Little Theatre overlooking the Lake we call our own. There seem to be great possibilities in that building. It is abundantly evident that the public taste for real acting has by no means been lost: it is merely suffering from lack of opportunity to gratify itself. In a country of long distances, it is practically impossible for good companies to visit the smaller places, and only the cities of big populations are so favoured. Yet the taste is alive, and seeks means of gratification. One such opportunity seems now within reach, and, if the plans of its founder are carried out, as doubtless they will be, I can foresee many an hour of enjoyment before those who will care to grasp them. Just how far and in what directions local co-operation is desired, has not yet been made clear. As the scheme approaches completion, no doubt some definite announcement will be given. In the meantime, the experiment will be watched with very great interest by many well wishers, amongst the number being

AUTOLYCUS.

Gassing Peach Borers

Regardless of its tongue twisting name, the results of what is known as the para-dichlorobenzene treatment for the eradication of the peach tree borer lead experts of the United States Department of Agriculture to believe that a practical means has finally been found of ridding orchards of this disastrously destructive pest. Previously, the only effective method of fighting the borer was by removing the soil around the base of the tree and digging the grubs out of their galleries with a knife.

The para-dichlorobenzene method was first used extensively by Nited States orchardists in 1919. It consists in sprinkling fine crystals of the insecticide on the soil around the base of the infested tree and covering with earth to hold the gas. The substance is highly volatile and forms gas when the soil is between 74 and 80 degrees F. The gas is five times heavier than air and sinks down through the soil. A pound of the insecticide, costing not more than 25 cents, is sufficient for 8 or 10 trees. It is highly effective against the borer. The labor is scarcely one-third of that formerly required. The saving, therefore, is great.

Last year, the para-dichlorobenzene process was used extensively in the Georgia peach belt, some localities buying as high as 50,000 pounds and large individual growers as high as two tons each. The growers there declare that it is one of the greatest accomplishments in the history of the Department. It is hoped that when used in Canada it will have not only practical value but also a practical name.

—Canadian Horticulturist.

PLEASE PASS THE APPLES.

When every pool in Eden was a mirror
That unto Eve her dainty charms proclaimed,
She went undraped without a single fear or
Thought she had need to be ashamed.
'Twas only when she'd eaten of the apple
That she became inclined to be a prude,
And found that evermore she'd have to grapple
With the much debated problem of the nude.
Thereafter she devoted her attention,
Her time and all her money to her clothes,
And that was the beginning of Con-vention,
And Modesty, as well, I do suppose.
Reactions come about in fashions re-cent,
Now girls conceal so little from the men,
It would seem, in the name of all that's decent
Someone ought to pass the apples round again.

—Exchange.

Dangers of Celluloid

Celluloid is being used to a greater extent than formerly for the manufacture of toilet articles, including combs and backs of hair brushes, and for children's toys. The very inflammable nature of this material represents a serious fire hazard, and one which has received much attention from insurance and fire protection associations. Stringent regulations are laid down for safety of employees and property during the processes of manufacture, while very little attention is paid to the dangerous nature of celluloid in the hands of the public.

The Professional Fire Brigades Association of England at a meeting recently dealt with this subject. It was suggested that legislation should be passed prohibiting the use of celluloid for children's toys, owing to its inflammability. The National Fire Protection Association in its quarterly bulletin, refers to the ignition of a celluloid comb through friction while combing the hair.

Owing to processes of manufacture many products are placed on sale which are imitations of non-hazardous materials, such as tortoise shell, ivory, etc. These should be distinctly marked, to prevent accidents. It is of the utmost importance that care be exercised in the use of celluloid or similar inflammable substances under a variety of names.

Victoria and Vancouver Island are organizing a strong campaign for the increased sale of British Columbia products. Mr. Herbert Pendray of Victoria has been elected chairman, and Mr. W. A. Jameson, vice-chairman.

SPRING MANAGEMENT OF BEES

Experimental Farms Note.

To secure a maximum honey crop, it is necessary for the bee-keeper to have all his colonies up to maximum strength in time for the main flow of honey. This can only be accomplished by careful management during the spring.

Bees that have been wintered inside should be taken from the cellar at the time the willows begin blooming. To reduce drifting, a dull day should be chosen for bringing them out. All entrances should be reduced to about one inch, these can be enlarged as the season advances.

In some parts of Canada where the spring is long and cold the bees will need protection when first placed outside. In any place they should be protected against cold winds by the use of windbreaks.

As soon as the weather permits all colonies should be examined for stores and queen. Each colony should have from ten to fifteen lbs. of stores, colonies with less can be helped from those having a surplus. Before equalizing stores, however, be certain that American foul brood is not present. If no colony has a surplus and the beekeeper has no combs of honey saved from last year's crop, the bees must be given a thick sugar syrup. If the bees have been well housed and well supplied with stores in the fall, feeding and equalizing of stores will be unnecessary in the spring.

Water is essential to the bees for brood rearing. If there is no water near the apiary, it is advantageous to provide a watering place in some sheltered place in the apiary. Running water is best.

All weak and queenless colonies should be united. One good strong colony is worth many weak ones. Do not unite two weak colonies but unite the weak to the colonies of medium strength. Weak colonies having a queen can be united to strong, queenless colonies.

Brood should not be taken from strong and given to weaker colonies too early in the spring, but this can be done later in the season after the

hives are well filled with bees. Spreading brood is not advisable as it may result in a lot of chilled brood.

Colonies wintered outside are all the better if kept in their cases until the first super is well filled with bees. Hives in which the bees have died should have all the entrances closed at the first examination to prevent other bees from robbing them.

Clipping the queen's wings is advantageous in the control of swarming and it is advisable to clip the queen's wings at the beginning of the first honey flow.

As the season advances and the queen is laying to her full capacity, a single brood chamber will not have sufficient space for maximum production of brood. As soon as the hive becomes well populated with bees, the brood chamber should be enlarged by adding a second storey without a queen excluder.

G. B. GOODERHAM,
Apiarist.

Five hundred freight cars will be required to move the 1921 berry crop of British Columbia, according to the estimates of the British Columbia Berry Growers' Association. This means a production of approximately 2,500 tons of small fruits. Production is expected to be more than fifty per cent. over last year, when the crop brought in \$1,000,000, there being about 2,800 acres under this cultivation. The newly formed Association will endeavor to enlarge the market for British Columbia berries.

The Summerland Review

Established August, 1908

Published at Summerland, B.C. every Friday by

THE REVIEW PUBLISHING COMPANY, LIMITED

Ralph E. Wise, Editor and Manager

An independent family newspaper covering Peachland, Summerland and Naramata and adjacent districts.

Subscription Rates—In British Empire, in advance, \$2.50 per year; six months, \$1.40. To U.S.A. and other countries, \$3.00 per year.

Advertising Rate Cards and information respecting territory and samples of paper mailed upon request, or may be seen at the office of any advertising agency recognized by the Canadian Press Association.

Advertisers must have copy in by Wednesday noon in order to insure changes for standing advertisements. New display advertising copy can be accepted one day later.

Correspondence—Letters addressed to the Editor and intended for publication must be short and legibly written on one side of the paper only. The longer an article, the shorter its chance of insertion. All communications must bear the name of the writer, not necessarily for publication. The publication or rejection of articles is a matter entirely in the discretion of the Editor. No responsibility is assumed by the paper for the opinions expressed by correspondents.

FRIDAY, APRIL 15, 1921

OUR SCHOOLS.

The policy of the School Board in deciding to erect an eight roomed public school at a cost approximately of \$40,000, and therefore of submitting a by-law to the people to raise \$30,000, deserves the most careful consideration by all interested in the welfare of Summerland.

For several months the Board has been faced with the necessity of providing increased accommodation for the public school, as well as suitable buildings for the high school. The delay has been due to the fact that the Board has been endeavoring to solve the problem in the most economical and satisfactory method possible. In this matter the trustees have merited the appreciation of the citizens.

The type of building decided upon, while not so imposing as those being erected in other districts, provides ample facilities for most efficient teaching at less than one-third the cost of the two storey brick building.

There are many considerations that urge the hearty support of the by-law which will be submitted to the people in a short time.

Besides the fact that the present buildings are overcrowded; that the health of the children is being in some cases actually impaired by inadequate heating and ill ventilating; that the standard of teaching cannot be maintained at the high level desired; it must also be recognized that the demands for Government assistance have been so great that the amount allotted for the erection of school buildings may shortly be entirely absorbed. Inspector Lord made the statement on the occasion of his last visit to Summerland that, had the Government granted the requests for assistance of this nature in his inspectorate last year the entire appropriation for the Province would have been taken up.

Some people contend that the Government should take over the entire responsibility for education. But that is not the policy of the Government at present and it is doubtful if it ever will be. In any case Summerland cannot afford to wait until a change of policy is instituted. We must proceed on the most economic basis possible consistent with the highest efficiency in the education of our children. This is the policy of the School Board and it well deserves the hearty endorsement of the people.

A SECOND SESSION.

With the demands of the municipalities of the Province unmet, and, from the public viewpoint, little else done than putting through the new liquor bill, the Provincial Legislature has prorogued, but with the promise of a fall session to receive the report of a commission to be appointed to make an investigation into the whole question of municipal finances.

Holding a second session in the year is a precedent, we believe, in this Province, but the present needs of the municipalities probably justify it, particularly since the "Act to Provide for Government Control and Sale of Alcoholic Liquor" took up nearly all the time of the regular session.

Despite the great amount of time given to the liquor control bill, there were in all eighty-five measures disposed of by the legislature. Among these were an Act authorizing the taking over and maintaining of the Tranquille Sanatorium as a provincial institution; an Act respecting superannuation of public servants; enactments relating to night employment of women, and limiting hours of work, and fixing minimum age for admission of children for industrial employment. The "Companies Act" was amended and consolidated, some amendments made to the "Municipal Act," and, of course, some time given to voting monies for public works and other expenses of government.

BUY B.C. PRODUCTS.

The campaign being conducted to educate the residents of British Columbia to buy the products which they themselves produce, is meeting with success. The movement, which was initiated by the business men of the industrial centres, now includes in its ranks as active workers representatives of the farming interests. The movement is not being carried on for the benefit of any class or section of the Province, but for the general benefit of all residents of the Province. The efforts of the campaign committee are directed towards educating the buyers of the Province to give preference in making their daily purchases to the products of farm and factory—farm and factory—and if this is done to the extent of but only 25 cents a day more than at present, it will mean employment almost immediately for from 12,000 to 15,000 persons.

THE TRANSPORTATION BURDEN.

The labor problem of the railroads is twofold. There is not only the situation that under the McAdoo award wages have been put on a basis which is out of line with those paid in the other industries, but the other situation that the increases have been followed by a material decline in production and efficiency. This not only holds in the United States but in Canada where there is perhaps a better opportunity to judge results under government and private control.

A railroad man, who has made a close study of conditions under government operation, both in the United States and Canada, whose name can hardly be given in view of his present position, tells that the recent experiences proved that it is impossible, under human conditions, to get the same efficiency

under government control as under private control. He instanced that when the American railways went under government control they increased their section men from three to four for each section and the larger gangs did less than the smaller had previously done. When these railways came back under private control there was a reduction from four section employees to three as formerly, and a certain amount of work was set for a certain time. In a short time three men were doing almost 25 per cent. more work under private operation than four men under Federal control.

The importance of efficiency in the operation of great organizations like the Canadian railways cannot be too greatly emphasized. Cheap transportation is a vital factor in agricultural and industrial production in any country, and particularly so in one of vast distances. A prosperous Canada demands that not only should the country be relieved of the burden of railway debt, but that transportation costs be actually reduced.—The Financial Post.

Never was there a newspaper in any locality that got all the local happenings. Frequently someone comes or goes and the newspaper reporter does not hear of it. It may happen that a family is missed on several occasions. They get the impression that the paper does not care to mention them. That's a mistake.

Help your paper get the local news. Do not be afraid to tell the editor that you have some friends visiting you. There are a number of people interested in your friends. You owe it as a duty to them, to tell the editor about their comings and goings. Possibly you think The Review shows partiality, but give it a chance and it will treat you right.

TIPS FOR MOTORISTS

WARPED VALVE STEMS

If there is a lack of compression and on examination the valve heads seem clean and perfect, inspect the valve stems carefully to see if they have not become warped by the intense heat of that part of the engine.

SAVE IGNITION CURRENT

If you use battery for ignition and your battery is weak, do not use self-starter to crank the engine and expect good ignition at the same time. Better crank the engine by hand and save as much current as possible for ignition.

CAUSES OF KNOCKING

Here are seven things which will cause a motor to knock: spark knock caused by too far advanced spark on slow speed; excessive carbon in the cylinders and on piston top; loose crank shaft bearing; loose connecting rod bearings; motor running too slow on high gear or on a heavy road; too much space between valve stem and push rod; overheating of motor.

ADJUSTING CARBURETOR

If you will experiment with your carburetor a little you will probably find you will not get as good mileage from your gasoline by having your carburetor set so weak that it does not pull well. Adjust your carburetor so it runs as good as it is possible to make it after the engine has become thoroughly warmed up, and you will find that you will get more mileage to the gallon than when it is set so weak that you have to use the choke every time you want it to pull hard.

USING ENGINE AS BRAKE.

No harm will be done the engine if it is used as a brake as on the hills, providing that it is done at the beginning of the hill, or, if not used at the beginning it is first speeded up equivalent to car speed before the clutch is engaged. If the car is allowed to go down a hill independent of the engine as in coasting and if when the bottom is reached the gears were engaged and clutch let in without first speeding up the engine, the result would be a very sudden stacking of car speed and the strain in breaking this speed would all be taken by the driving system. This has been the result of wrenching the clutch universal, transmission or differential out of alignment or the breaking of some member of the drive system. When you have reached the bottom of the hill before letting in the clutch start your engine and speed it up to car speed.

OVERHEATING DUE TO IMPROPER DRIVING

Don't always blame the cooling system when the engine overheats. The mixture supplied by the carburetor may be causing the trouble, perhaps being too rich. Possibly the spark is not advanced far enough; maybe the oiling system is clogged; or for some other reason is not properly lubricating the mechanism of the power plant. It might even be possible that the fan belt is slipping, thus preventing the fan from doing its full duty. Then there are the brakes. They may be dragging because the bands are too tight, a condition which can only be discovered by jacking up the rear wheels and noting whether or not they turn freely. Overheating is often chargeable

to improper driving—using the low gear too long when the car should be running in high.

LEAKY CARBURETOR

If there is a constant dripping of gasoline from the carburetor the float valve mechanism is not operating as it should. When the level of fuel in the float bowl reaches the proper height, the needle valve controlling the flow of gasoline into the reservoir of the carburetor should be shut off. If it does not work properly, the adjustment should be checked up, and the valve and its seat examined for dirt or grit. Perhaps the needle valve is worn, in which case it should be carefully ground into a good seat.

VALVES SHOULD BE GROUND IF LEAKING

For the first few thousand miles the valves will probably need no attention aside from the periodical oiling they will require if they are of the overhead type. In motors of the L- or T-head type, this oiling is generally taken care of automatically.

Then it is likely that misfiring will develop when the engine is idling or when the car is running very slowly, though the spark plugs and the carburetor be in perfect condition. The car owner may then consistently look for a leaky valve, usually caused by carbon being burned irregularly on the valve or its seat; by the valve or its seat being pitted, or by a slight warping of the valve, due to the excessive heat of the exhaust valves after explosions.

In any case, the valve must be made to fit perfectly on its seat, and this is generally done by what is known as valve grinding. The valve spring is disconnected, the valve is removed, the seating surface is covered with some form of grinding compound, the valve is replaced and then turned first in one direction and then in the other until the surfaces of both valve and seat are smoothly polished.

This is an operation which had best be left by the amateur to an experienced man. In grinding valves care should be exercised so the grinding compound does not get into the cylinder or on the piston, or it is liable to damage the cylinder walls.

After the valves have been ground the tappets require adjustment as the grinding generally causes the valves to drop down farther than they did before. Hence the push rods will not be of the correct length. On most engines there should be about two-thousandths of an inch space between the push rod and the stem of the inlet valve and three- to four-thousandths on the exhaust valve. The correct distances for these adjustments of the motor are generally given in the instruction book which comes with the car.

If too much space is allowed, the valve tappets will be noisy; if not enough, the valve stem will ride and will not permit the valve to seat properly. Quiet and proper operation of a motor depends much on the adjustment of the valve tappets.

A light car with flanged wheels placed on the railroads of Alaska and drawn by dog teams is known as a "pupmobile."

YOU DON'T SAY SO!

"The latest cars have condensed milk in the radiators."

"Not really?"

"Well here's the advertisement in the newspaper: 'On a farm; wanted, a young man to milk and drive up-to-date car.'"

It's easy to see the point of a joke that's on the other fellow.

FRUIT GROWERS ATTENTION

We have secured the services of Mr. James Gibb to represent us in the Summerland territory.

Mr. Gibb is one of the most successful and longest experienced Packing-house Managers in the Okanagan.

The Policies of the Steuart Fruit Company will be adopted in all our dealings with you.

A complete line of Orchard Supplies and Feed will be carried at all times.

Call on Mr. Gibb and let him assist you in your Financial and Marketing Problems.

MUTUAL FRUIT COMPANY, LIMITED

PRINTING PRICES

EAST and WEST

During the recent dispute in Vancouver between employing printers and employees, references were made to the fact that higher prices would force Vancouver printing orders to Ontario where wages were lower.

This catastrophe has been averted.

But, do you know, those same prices that were to have tempted Coast orders to the East are being quoted by us?

Some weeks ago we adopted a scale of printing prices that is being very extensively used in the cities and towns of Ontario, and in many of the centres of the Middle West and Eastern States.

With modern equipment and a full range of papers and other printing materials, we are in a position to do your work well and expeditiously and at

Coming Events

Notices under this heading are inserted at 3 cents a word. Each repeat, 2 cents a word; minimum charge, 50 cents. Contract rates on application.

The regular meeting of the Ladies' Hospital Auxiliary will be held at the home of Mrs. W. J. Robinson, on Tuesday, April 19th at 3 o'clock.

United missionary meetings will be held on Thursday, April 21st, at the Lakeside Church at 3 p.m. and the Parish Hall at 7 p.m. Speaker, Miss Campbell, travelling secretary for the Zenana Missions. Collection in aid of the Summerland bed in the Denares Zenana Hospital.

At the St. Andrew's Church, West Summerland, morning service at 10.30, evening service at 7.30. Preacher, Rev. W. A. Alexander.

T. B. Young was over to Similkameen Valley this week on a business trip.

Dr. Coleman, dean of the faculty of Arts in the University of B.C., will speak in the Lakeside Church next Sunday evening, April 17th at 7.30 p.m. on "National Ideals and Education." Dr. Coleman is one of the outstanding leaders in educational work in this province. He is much sought after as a speaker at gatherings of various organizations interested in problems of education. The people of Summerland will have the privilege of hearing Dr. Coleman on Sunday evening on a great theme. Everyone interested in Summerland's educational problem should hear him.

COLLAR BONE BROKEN.

Mr. J. G. Henry, one of our newer citizens, is in the hospital, suffering with a double break of his collarbone, and shock, resulting from a motor accident. From what we have learned, Mr. Henry had just purchased a Ford, and was driving it on one of the hills near T. J. Garnett's when it overturned. The accident occurred on Monday, and Mr. Henry is doing as well as could be expected under the circumstances.

NOW A LAWYER.

T. Finley McWilliams, a former Summerland boy, who since his return from overseas has been articled to H. W. D. Ladner, barrister, of Vernon, has been admitted to the bar, and intends practising his profession in Kelowna. Mr. McWilliams is a graduate in Arts of McMaster University and enlisted in the B.C. Horse at the outbreak of the war. He served with the C.M.R.s in France until invalided out of the service in 1917.

Codling Moth at Kelowna

Codling moth (Carpocapsa Pomonella) has been found to be established within the city limits of Kelowna, and the Department of Agriculture, acting under the powers conferred by the Horticultural Rules and Regulations, Section 6, Sub-sections 1 to 7, is grappling at once with the outbreak by establishing a quarantine area, extension of which will be made as the season advances, if, in the opinion of the officer in charge, the circumstances warrant such action. Among other requirements no fruit or fruit packages can be removed from the quarantined area, except by permission of the officer in charge.

MORE CONFIDENCE IS A NECESSITY

Ever since the builders of the C.P.R. laid the steel rails that linked British Columbia with the rest of Canada, the people of this province have been talking about the "wonderful natural resources of this portion of the Dominion." At the same time they have been seeking capital from the East, South, and Europe, to develop the latent wealth of British Columbia. Wherever the subject of the natural wealth of the mines, forests, waters and soil of the province is mentioned, can be heard the expression "All that is required is capital."

Capital will not venture investments in any place where the citizens have no confidence in themselves. Residents of this province to a large extent lack faith in their abilities. This is evidenced in everyday purchasing of merchandise. There exists in the minds of many the idea that if a commodity is produced in B.C. it must of necessity be inferior to the product of a distant community. This attitude bespeaks a lack of confidence in the ability of the workmen of this province. The artisans of British Columbia are, as a matter of fact, just as capable—and often more so—than those of other localities. The proof is to be found in the goods.

Passing Events: Social, Personal, &c.

Geo. Rowcliffe, Ltd., of Kelowna, has been incorporated with an authorized capital of \$20,000.

E. R. Simpson, Summerland, and J. A. Edgecombe, Peachland, attended a meeting of the O.U.G. directors at Vernon on Wednesday.

A Dominion Government surveyor reports discoveries of asbestos in the Princeton district, and also west of Okanagan Falls in this Valley.

Vernon News: Misses L. and K. Lynch of Westbourne, Man., who have been visiting Mrs. F. Botting, went down the lake to Summerland on Wednesday.

Rupert Wright, second son of the late F. A. C. Wright, went down to Victoria on Wednesday to prepare for entrance examinations for the naval school at Esquimalt.

The W.A. of St. Stephen's Church and the Junior W.A. yesterday united in a shower in honor of Miss Peggie Ritchie, whose marriage to Mr. Ben Newton will take place next Wednesday.

Capt. Mutrie, president of the Okanagan United Growers, and other officials of the big co-operative concern got off the boat here on Saturday night, and motored through to Pentiction to attend a meeting of the citizens interested in providing storage for fruit.

It is said that the growers of Keremeos have agreed to accept a price of \$17 a ton offered by the Dominion Cannery for tomatoes, but another report has it that there will be very few tomatoes grown, and that the acreage in sight is not sufficient to enable the cannery to operate.

Under the auspices of the United Farmers of Trout Creek, W. C. Kelley will give his popular lecture on Victor Hugo's character, Jean Val Jean next Tuesday, April 19th at 8 p.m. in the Trout Creek school house. Miss Barkwill will sing. Collection; proceeds for Hospital. 37p

Dr. McEwen who has been substituting in Kelowna, and more recently took care of Dr. Sutherland's Revelstoke practise while the latter attended the session at Victoria, was a visitor to Summerland this week. We understand that Dr. McEwen contemplates engaging in practise here.

J. W. Jones, M.L.A., has returned from the Capital to Kelowna.

W. J. McDowall of the O.U.G. has returned to Vernon following a visit to prairie centres and Minneapolis.

Kelowna is preparing for a sweet pea show to be held in August by the Amateur Sweet Pea Association of that city.

Vernon council will this year plant Norway maples as shade trees along the streets in the residential section, at a cost per tree of \$1.20.

It is reported that A. A. Derrick and family plan to return from the Coast to their orchard property here some time this month.

Jas. Gibb, recently with Stirling & Pitcairn, Ltd., has been appointed manager of the Summerland branch of the Mutual Fruit Co., and is now in charge.

The property on Paradise Flat held for some time by A. Stewart, now living in Ontario, has been bought by R. W. Cope who arrived here recently to take possession.

A. C. Muil was injured in a driving accident this week which necessitated some stitches in his scalp. Mr. and Mrs. Muil have but recently returned from their honeymoon trip to coast cities.

In order to obtain a better strain of horses, Okanagan farmers are importing many pure bred sires. Recently, a syndicate of farmers paid ten thousand dollars for a prize-winning Pecheron stallion.

Residents along the lake shore are noting that the lake is unusually high for this season of year, and are beginning to wonder if the water is to be held back to permit the lake to raise still higher. It is said to be higher now than it has been for the last ten years at this season of the year.

Summerland Masons and Oddfellows on Monday evening jointly celebrated the opening of their new hall in the Campbell block. Including a few visitors from Pentiction there were over 60 in attendance. A jovial time was spent in songs, readings, mock trials and humorous speeches, refreshments being served shortly before midnight.

H. S. Blanchard and family are leaving this week for Winnipeg.

It is reported that the G.W.V.A. is negotiating for the purchase of the College Gym.

Mrs. W. Estabrook left on Wednesday's train to visit her son, Rev. H. G. Estabrook, in Vancouver.

Mr. and Mrs. T. W. Stirling of Kelowna are removing to Victoria to take up residence there.

Mr. and Mrs. J. A. Morrison have visiting them their nieces, the Misses Lynch of Westbourne, Manitoba.

Isabel Helmer, daughter of Mr. and Mrs. R. H. Helmer, has gone to Vernon to attend boarding school there.

Mrs. R. C. Lipsett, Mrs. J. M. Robinson and Miss Marguerite Robinson went down to Vancouver on Wednesday.

Vernon city council has reduced the motor licenses fee from \$25 to \$10 but chauffeur's licenses now cost \$5 instead of \$2.50.

Mrs. Seeley who is in charge of the boarding house at the Experimental Station is enjoying a visit from her mother Mrs. Barrett.

Apricot trees are now coming into bloom, and here and there over the district, peach trees are a mass of pink. Soon orchards all over the district will be full of bloom.

Mr. F. R. Cross who has been running a wholesale and retail fuel business in Winnipeg, has left the prairie capital to take up his residence on his orchard property at Naramata.

Mrs. Clarence Eley entertained about three score members of the Baptist W.A. last Saturday afternoon, when a pleasing program was carried through. The house was tastefully decorated with the colors of the W.A.

The Co-operative Orchards Company purposes operating its own packing plant again this season. Last year Walters Ltd. had the packing house. Clarence Eley is now with the Orchards Co., and will be in charge of their business here this season.

While horseback riding on Sunday, Kirk Sutherland was thrown to the ground and suffered a break of one of the bones of his forearm. The accident occurred near Mineola, and he walked to L. B. Otley's whence he was brought home.

Fred Gibson of the Experimental Station has visiting him his father and mother, Mr. and Mrs. Burrough of Ottawa. They have been for two years at Ellensburg, Wash. with their daughter and are now returning to their eastern home.

W. C. Kelley attended a sitting of the Police Court in Peachland last Saturday as counsel for the defence in the Winger case, which was heard in closed court, a note of which is made in our Peachland column. Mr. Kelley was accompanied on the trip by Mr. D. J. Welsh.

Mr. C. Tice, soil crop instructor with the Department of Agriculture, Victoria, was a visitor to Summerland on Saturday. Mr. Tice is in charge of the seed certificate work and is giving special attention to the improving of potatoes through selection of seed. Growers wishing to produce certified potatoes will be given at least three inspections of their crops, twice while they are growing and once for the matured tubers.

The new town of Oliver on the Government irrigation settlement near Fairview is moving ahead, although the lots were placed on the market only a month ago. A grocery store is open and doing business, a Government land office has been opened, a recreation hall with floor 75 by 45 feet has been built, and hardware, builders' supplies and general stores, a building for the Canadian Bank of Commerce, a concrete block and several houses are either under construction or will be erected this year.

The most successful meeting of the Baptist Young People's Society was held on Monday evening, when games were undertaken under the direction of Miss K. Babbitt and Mr. M. Clay, and "blowing the feather" evoked much merriment. "Statues" brought to light some latent artistic talent, and the pianoforte solos by the Misses Hatfield and Cowan, and a vocal solo by Miss Carol Graham, "Where My Caravan Has Rested," were very much enjoyed by the large number of young people of 17 years and upward who attended.

CHINAMAN SUICIDES.

Fong Hang, Chinaman, of about 35 years who had worked at the Bankhead Orchard near Kelowna for the past four years, committed suicide a few days ago by hanging himself from the substructure of the aquatic grand stand on the lake shore beside the park. Despondency as a result of news from China to the effect that his father's house had been destroyed by fire and the fact that his financial position did not permit his sending aid, was the cause of the suicide.

A. Davidson has sold to F. LeRoy Black and Wm. Angove his orchard property situated on the front bench overlooking Trout Creek Point and close to the Caldwell orchard. Mr. Davidson has business interests on the prairies to which he finds he must give closer attention, and he and Mrs. Davidson and family will return to the prairie for a time at least.

Growers and Shippers Attention Please

Unless we are much mistaken you are at this time thinking seriously over the question as to how you are going to market the coming season's products, in the way that will net you the most money and cause you the least worry. We desire to tell you that we have a method the result of fifteen years' experience that will enable you to get your products sold and receive your returns within a comparatively short time after the fruits, etc., leave your orchards.

You are all no doubt aware that there are increased freight and express rates this year which must be contended with; this together with the fact that the consuming public are buying very cautiously and as economically as possible, means that the best of judgment and the most skillful salesmanship will need to be used and all unnecessary expenses will have to be done away with, in order to cope with the unusual attitude of the buying consumers and the increased transportation charges.

We desire to arrange with a limited number of Reliable Growers or Shippers who have Berries, Cherries, Fruits, Vegetables, etc., to market. We know that all growers and shippers of fruits, etc., are very busy men when the shipping season is on, and it must be a satisfaction for them to be relieved of the anxiety regarding the marketing of their fruits, etc., and thereby be enabled to attend entirely to picking, packing, etc.

We are fully prepared to look after the marketing end of your industry for you and shall be glad to have you write for further information, at the same time giving us particulars regarding the kinds of products you expect to have, the quantities, etc. Yours truly, W. V. MOORE, LIMITED. Calgary, April 7, 1921. 86-38.

Tailoring

Where a High Standard Holds

The selection of material for suit or overcoat is important. The best work of designer and workmen may be spoiled through poor taste shown in material made up.

We can always help in a selection, and our range of materials is of a size to give the widest choice.

But all other things being equal, it is the skill shown in designing and workmanship that makes or mars the suit.

The House of Hobblerlin is justly credited with fixing the standard for high-grade tailored-to-measure clothes.

It is the fit and finish of all garments carrying the name of this House that has given the House first place in all parts of Canada for ideally built clothes—always made-to-measure—always high grade.

Sole Agent for: Hobblerlin Tailoring

Scientific Irrigation to Barren Business

Newspaper Advertising is to Business Enterprise what irrigation is to barren lands. It is a vital necessity.

The land has in it the source of fruitfulness. The water alone is required to render it fertile.

Thereafter the thing is a matter of industry on the part of the planter.

Supply does not create demand nor does demand create supply—in the first instance.

Both are created by Desire; the fruit of Suggestion.

Your Newspaper is the most effective channel to propagate the IDEA of Desire and the means of satisfying it.

The upkeep of Demand—the cultivation of a sensitive and responsive ground, or the REACTION of it, is another phase of the subject.

That is the province wherein modern advertising operates.

All the great merchants you ever heard of were, and are, bountiful users of Newspaper Advertising. Eaton, Wanamaker, Marshall Field, Selfridge, Harrods, Hudson's Bay Company.

Isn't that your cue? Let us Talk it Over.

ANGLO-SAXON IDEALS UNDER FIVE HEADS

Dr. Suzallo, President of University of Washington, Enunciates Some of the Principles of British Democracy.

Under the title "Some Ideals of the Anglo-Saxon Race," Dr. Suzallo, President of the University of Washington, Seattle, enunciated for a Victoria audience a few days ago five principles which were, in his opinion, the basis of English speaking Democracy.

Briefly the principles set down by Dr. Suzallo were found in the following five points:

First, that in the freedom of democracy it must be remembered there should be no loss of obligation to obedience, but merely the substitution of obedience to principles for obedience to man.

Second, that a government by the people is not as significant in telling what a democracy is as the phrase "government for the people." Mere control by a majority does not make democracy. The essence of democracy is the ability of majorities to be considerate of other individuals. There is no successful democracy without developing individual character and development of institutional character.

Third, democracy arrives through growth in nationality. It is through discussion, not agitation, that democracy finds itself at its best, and discussion must be intellectual and polite in order to be rational.

Fourth, leadership is essential in an Anglo-Saxon system. Not the old caste leadership, but the alternating leadership which distributes command and fellowship to each man in turn as he discloses a special talent to solve the problem of the moment.

"Under a right conception of Anglo-Saxon solidarity followership of the right leader is as glorious as leadership," claimed the speaker.

Dr. Suzallo's fifth point was that the tendency of mankind was to glorify a last achievement. Tolerance was one of the late blessings of civilization, but intolerance was just as necessary, and always had been, claimed the speaker.

"We cannot tolerate brutality, injustice, and many other evils," he said by way of defence of the principle of intolerance. "The Anglo-Saxon world has always stood both for freedom and for law and order, each in its own place. It has always stood for the stubborn defence of principles, and yet has maintained the righteousness of compromise when the principles were not clear."

CAREFULLY BALANCED PLAN.

Dr. Suzallo, at the beginning of his address, stated that he was an Anglo-Saxon by spiritual adoption, his ancestral connection being otherwise. He therefore spoke without passion when he maintained that "of all systems of politics and government yet developed that of the Anglo-Saxon people represents that carefully balanced plan of idealism and realism that makes both effective."

"We are rated in history as a people of large tolerance," he maintained, adding that all through their history it was this willingness of the British to listen to the other man's opinion that had given them such an approximation to representative government for the people.

"In politics the British are the most stubborn people in the world, in battle they are equally stubborn, and yet we are compelled to say that they are the greatest compromisers that the world has ever known. No nation in the world reveres liberty so much as the Anglo-Saxon people; yet we appreciate the other man's point of view. This means tolerance. Yet no one would say that we are a completely tolerant people in our civilization. We could not have existed so long if we had been; the race could not have continued if it

had allowed tolerance to run to that liberty which is licence. It is just as important to the safety of a nation that it shall be as intolerant of some things as it is tolerant of others.

A GREAT DANGER.

"One of the great dangers of the present time is that under the system of majority government which characterizes the Anglo-Saxon peoples there is a substrata which is tending to get its philosophy, not vertically as an amendment and reform of Anglo-Saxon politics, ideals and traditions, but horizontally from some place else; for instance, Russia or even Germany. And this means that there is a conflict of philosophies; but I think that the rational and not the coercive will win," said Dr. Suzallo at one point.

The lecturer referred to the "tyranny of the crowd and of the majority," which at times threatened to be just as hateful as in the past had been the tyranny of one. Tyranny in any form was a thing which the Anglo-Saxon heart despised. Anglo-Saxon genius must learn to control rationally tyranny by the crowd degenerated into the mob.

"Do not think that because we have glorified liberty there is any such thing as escape from discipline and responsibility," he continued. In Anglo-Saxon history, liberty and law and order had always gone together. The chief characteristic of democratic government was not to be found in mere ways and means of majority rule; in the last analysis it was a spiritual thing, and meant, primarily, an increase of considerateness for the other fellow. Dr. Suzallo explained the value of ceremonial, Parliamentary procedure, polite formalities which were devised for the specific purpose of keeping people rational, cool and dispassionate enough to discuss questions with a minimum of prejudice and a maximum of open mindedness to the other man's views.

"The purpose of free speech is nothing more than a bridge to get your idea across to the other man's mind. If this freedom is used insolently in such a way as to make the other man bristle with indignation it has failed of its purpose, for it closes the door of the mind to which you are appealing." In politics it was the same. The polite ceremonial prevented the friction which license of speech might create, and from the group discussions were taken away the patchwork truths which often afforded the solution for some grave problem.

PUBLIC MONEY WASTED.

The Government has wasted money in sending a representative to Great Britain to inquire into the question of liquor supplies. It will also be wasting money in appointing a purchasing agent. The best brands of liquor, and in fact, any brands which are or will be in use in this province, are known and their prices are set by interests over whom our Provincial Government can have no control. These prices are uniform, and only vary according to the quantities purchased. There is no brand of liquor which the Government cannot purchase through British Columbia agents, and the liquor control board should be perfectly capable of reaching whatever decisions are necessary, especially when the purchases are to be made in such large quantities. The creation of a purchasing agent implies a lucrative and easy post, but since it will be purely routine and involving little work it may assume many of the features of a sinecure.—Victoria Colonist.

WHAT WE BUY.

(Winnipeg Tribune).

During the year ending September 1920, we purchased from the United States goods to the value of \$919,367,000, four-fifths of all our purchases abroad. Let us offer that market, or as much of it as can be diverted, to other people who will buy from us—and see that they get it.

Here is a table of some of our chief imports during the same period, the year ending September, 1920:

Iron and steel	\$193,000,000
Cotton	127,000,000
Sugar and molasses	95,000,000
Wool	89,000,000
Coal (anthracite)	33,000,000
Coal (bituminous)	43,000,000
Silk	42,000,000
Vehicles	35,000,000
Breadstuffs	29,000,000
Chemicals	26,000,000
Hides and skins	22,000,000
Rubber	21,000,000
Tobacco	16,000,000
Flax, hemp & jute	19,000,000
Leather	16,000,000
Furs	14,000,000
Tea	11,000,000

Let our Government, with the spirit of the people behind them, attack that list, break it up, and analyze it with three objects in view:

(1) To see what we buy in the United States we can do without, and make us do without it, as we cannot pay for it;

(2) To see what we buy in the United States that we can provide for ourselves, and make us provide it for ourselves;

(3) To see what we buy from the United States which we can get elsewhere from people who will buy from us, and use our shipping, and make us go to them.

AGRICULTURE IN THE HIGH SCHOOLS OF BRITISH COLUMBIA

By J. W. Gibson, Director of Elementary Agricultural Education.

At the present time agriculture is taught in ten high schools in the province. The course, which covers two years' work, begins with the second year in high school, and is usually preceded by a course in general science which affords a very suitable introduction to agriculture. Girls as well as boys take the high school work in agriculture. The subject is optional with the other sciences, and equal with them as matriculation subjects. Students taking three science subjects, one of which may be agriculture, are required to take only one foreign language for junior matriculation. The same standing admits to Normal school. Those students who complete the Normal school course who have taken the agricultural option in high school are granted a special rural science diploma—the equivalent to the diploma issued by the Department to teachers devoting their full time to rural science for at least two summer sessions. As in most of the provinces, this diploma entitles teachers to a special bonus in recognition of work accomplished in the

teaching of elementary agriculture. We already have a few of these young men and women teaching in our public schools, and there is every reason to believe that they will do more efficient work along agricultural lines than will most of the teachers who have not had this special preparation.

In every case instruction in agriculture in high schools is in charge of agricultural graduates who have also had teaching experience. The direct method of instruction through laboratory, garden and farm excursion is followed, the agricultural text book idea being practically eliminated. In some cases special garden houses in addition to the regular agricultural laboratory class room have been provided and in one case a greenhouse has been provided.

The high school agricultural course is growing in popularity amongst the girls as well as the boys. It is of recognized advantage practically as well as educationally. It seems to meet to a degree the needs of those communities and those high schools where it has been in operation. It appeals to boys and girls who have some first hand knowledge of rural things, and also to those on the other hand who wish they had. It appeals to boys, particularly, who look forward to advanced studies in agriculture in the university, and as an evidence of their interest in the subject as well as of the thoroughness of the instruction given in it, all of the students who wrote on the matriculation examinations last June were successful and many of them made very excellent records. We hope to include a few additional high schools in our agricultural programme during the present year.

Victoria is organizing the Made-in-B.C. Campaign on Vancouver Island.

LANDS FOR SALE.

An extraordinarily good bargain is the Jarvis Orchard at \$4,750. Should pay for itself in about 2 years. 13 acres, 7 planted in best varieties, including large number of Apricots. Close to the Rippin Meadows.

4½ Acres good soil at Trout Creek also many other bargains in that locality.

The Bird and the Cherry

A writer in the New York Herald and Sun says of the farmer who wants to kill off the birds that eat his cherries, "Of course there wouldn't be any cherries if there were no song birds. The bird puts the cherry on the tree; why shouldn't he eat his own cherry? The farmer only holds a second mortgage on that cherry. He may think otherwise and kill the bird. Then the bird won't get the cherry, and neither will the farmer." As to spraying, the writer says: "One might as well undertake to moisten Arizona with a medicine dropper as to clean all the trees of all outdoors with a spray, and if it were possible how would the cost compare with the value of what the birds eat?"

City of Port Coquitlam treasury notes that matured on March 15th in New York have been met. The city has been in financial difficulties for some time and is relying on passage of a bill giving it power to borrow money against tax sale lands, to raise funds for wiping off the treasury notes on which default has been made.

The Highest Powered, Most Reasonable Priced, Snappiest Appearing, Four Cylinder Car in the Market To-Day.

Mr. T. B. Young, West Summerland.

Dear Mr. Young,

In reply to your letter enquiring as to whether I am satisfied with the Oldsmobile car you sold me recently, and my opinion of it, I can assure you that I am delighted with it. For power, for riding ease, for room and general comfort, as well as in detailed attention to finish, this car in my opinion equals, if it does not excel any car in its class of which I have experience, and is certainly ahead of some cars of decidedly higher cost.

At the present time I have only run some eight hundred miles, but the engine is satisfactorily "run in," and I have no doubt from its general behaviour that the car will stand up.

If this expression of my opinion is of any use to you, it is quite without prejudice, and you are welcome to use it in any way you please.

Yours truly,

Summerland, April 13, 1921.

WATER NOTICE.

(Use and Storage). TAKE NOTICE that Naramata Irrigation District, whose address is Naramata, B.C., will apply for a licence to take and use 1,500 acre feet and to store 1,000 acre feet of water out of North Fork, Lequime Creek, also known as Chute Creek, Shoot Creek, and Wild Horse Creek, which flows west and south and drains into Okanagan Lake on or near Lot 212. Group 1, Osoyoos Division of Yale.

The storage dam will be located at a point 1 1/2 miles due west of 12 M.P. Lot 2711. The capacity of the reservoir to be created is about 800 acre feet, and it will flood about 80 acres of land. The water will be diverted from the stream at a point about three miles west of 12 M.P., Lot 2711, and will be used for Irrigation, Domestic and Power purposes upon the lands described as District Lots 156, 206, 207, 209, 210 and 211, and 266, and Blocks 205, 221, 222, 223, 245 and 247 of Registered Plan 661 and part of District Lot 286, a full description of which is given below.

This notice was posted on the ground on the Seventeenth day of March, 1921. A copy of this notice and an application pursuant thereto and to the "Water Act, 1914," will be filed in the office of the Water Recorder at Fairview, B.C.

Objections to the application may be filed with the said Water Recorder or with the Comptroller of Water Rights, Parliament Buildings, Victoria, B.C., within thirty days after the first appearance of this notice in a local newspaper. The description of territory to be served is as follows:— District Lots 156, 206, 207, 209, 210, 211 and 266, and Blocks 205, 221, 222, 223, 245 and 247 of Registered Plan 661, and that part of District Lot 286 described as follows: Commencing at the intersection of the northerly boundary of said block 245, R.P. 661 with the easterly boundary of District Lot 286; thence along the northerly boundary of said block 245 to the north-west corner of the said block; thence south 59 degrees 28 minutes west a distance of 2 chains 34 8-10 links; thence south 82 degrees 25 minutes west a distance of 1 chain 17 4-10 links; thence north 1 degree 58 minutes west 87 links; thence north 78 degrees 5 minutes west 2 chains 65 9-10 links; thence north 54 degrees west 3 chains 82 3-10 links; thence north 9 degrees 14 minutes east 82 4-10 links; thence north 56 degrees 44 minutes east 4 chains 65 6-10 links; thence north 35 degrees 53 minutes west 90 links; thence north 54 degrees 13 minutes east 12 chains 10 1/2 links; thence south 7 degrees east 1 chain 95 2-10 links; thence south 28 degrees 30 minutes east 1 chain 75 3-10 links; thence south 52 degrees 9 minutes east 5 chains 5 1-10 links, more or less, to the east boundary of said Lot 286; thence southerly along the said boundary to the point of commencement.

NARAMATA IRRIGATION DISTRICT, Applicant. F. H. Rounds, Agent. The date of the first publication of this notice is April 1st, 1921.

WATER NOTICE.

(Storage). TAKE NOTICE that Matt G. Wilson whose address is Paradise Wharf, Naramata P.O., B.C. will apply for a licence for the storage of 200 acre feet of water out of Chute Lake and Chute Creek, also known as Lequime Lake and Lequime Creek which flows South West and drains into Okanagan Lake, about 500 feet from North West corner of Lot 212, Group One, Osoyoos Division of Yale District. The storage dam will be located at the outlet of Chute Lake. The capacity of the reservoir to be created is about 200 acre feet, and it will flood about ten acres of land. The water will be diverted from the stream at a point about 1 mile East of Outlet of Chute Creek and will be used for domestic and irrigation purposes upon the lands described as Lots 86s and S.L. 18 in Block 2711.

The licence applied for is to supplement a right to take and use water as per conditional Licence No. 1876.

This notice was posted on the ground on the Seventeenth day of March, 1921. A copy of this notice and an application pursuant thereto and to the "Water Act, 1914," will be filed in the office of the Water Recorder at Fairview, B.C.

Objections to the application may be filed with the said Water Recorder or with the Comptroller of Water Rights, Parliament Buildings, Victoria, B.C., within thirty days after the first appearance of this notice in a local newspaper.

MATT. G. WILSON, Applicant. By Naramata Irrigation District, Agent. per F. H. Rounds, Trustee. The date of the first publication of this notice is April 1st, 1921.

Naramata News

Current Events of Town and District

At the special service at the Sunday School on April 10th, promotion certificates were presented to the following:

Grade I. Bernice Young, Catherine Robinson, Robt. Robinson, Douglas Amaron, Percy Hancock, Isabel Bailey, Ada Bailey, Mary McConkey, Donald Mallery.

Grade II. Ralph Symons, Howard Symons, Arthur McConkey.

Grade III. Stanley Allen, Robt. Symons.

Grade IV. Margaret Allen, Gwyneth Amaron, Alice Myers, Mary Young, Nessie Rushberry, Margaret Symons, Marie Hancock, Catherine Hancock, Lester Mallery, Howard Symons.

Grade V. Mrs. DeWitt, Mr. J. M. Myers. Mr. D. J. Welsh of Summerland, gave an interesting and convincing address on the educational value of Bible study, and Mrs. Walters and Mr. Stanley Dicken contributed to the musical programme, accompanied by Mrs. Languedoc. Special music was also rendered at the church service following.

Mr. and Mrs. Cooper, who have been staying at the Syndica Hotel, have moved into Mr. J. M. Robinson's house boat, which has been remodelled, making it a very pleasant summer residence.

Considerable building activity is manifest throughout the district at present. The new post office building on front street is well on the way toward completion. Plans and specifications for the new Fruit Union building have been completed and orders placed for material, the first shipment of lumber being awaited in order to begin building. Mr. Geo. Routh's house is nearly completed and he contemplates moving in next week. Mr. Albert Routh is planning to build on his fruit lot in the near future.

A delightful children's party took place on Saturday last week, when Miss Marguerite Nuttall celebrated her 6th birthday. A large number of children were present and all passed the time very happily in games, outdoor play, and in partaking of the liberal feast of good things dear to the hearts of children. The birthday cake was plentifully provided with rings, buttons, and nickels, and proved a source of great excitement and interest. The afternoon proved a very merry one for all.

Mr. J. E. Smith has bought the ten acres which is known as the Ireland lot. Miss Wells spent the week-end in Kelowna visiting friends. Mr. Iverson of Peachland is in Naramata, working on the Post Office building on Front Street.

Mrs. Gray, of Summerland, was a visitor in Naramata on Sunday, spending some time with Mrs. Noyes.

Mrs. J. O. Noyes and Mrs. D. O. Hughes entertained at tea in honor of Mrs. Wollstencroft on Tuesday afternoon. Those present were Mrs. Geo. Aldridge, Mrs. Wollstencroft, Mrs. McConkey, Mrs. W. H. Irwin, Mrs. Bailey, Mrs. Morrish, and Miss Greene. Mrs. Wollstencroft is leaving shortly to reside in Pentiction, and will be much missed in Naramata.

Dean Coleman, of the University of B.C., will lecture on "National Ideals in Education" on Saturday evening in the basement of the Church. A silver collection will be taken up to defray expenses.

FACTORS INFLUENCING SEED YIELDS IN MANGELS

(Experimental Farms Note.) During the last few years many of the Dominion Experimental Farms particularly in the East and in British Columbia, have been engaged in mangel seed growing on quite an extensive scale and many observations have been made as to under what conditions the heaviest seed crops may be expected.

It goes without saying that the first condition for profitable seed crops is the use of vigorous and perfectly sound roots. Their size is of minor importance, which is evident by the fact that, where mangel seed is produced extensively for the trade, small roots one to two inches in diameter are generally preferred to larger ones.

Of great importance is early planting of the seed roots. The earlier the roots are planted out in the spring the larger seed crops may be realized. Several years' observations have convinced us that the seed roots should be planted out as soon as the ground can be worked, even if it should be somewhat cool. In fact, planting in cool, damp soil often seems to be preferable to planting in warmer soil, particularly if the roots have been stored in a cellar during the winter and have come through somewhat lacking in crispness. They will, if planted early, have a most beneficial chance of regaining their crispness and therewith their full vigour before they begin to throw out seed stalks in earnest.

Besides early planting, richness of the land is a most important factor influencing the size of the seed yields. Since 1915 a few experiments have been conducted with a view of ascertaining the influence of the state of fertility of the soil on the seed yields. The first experiment, which was conducted on a rather small scale, clearly brought out that a heavy application of manure or an

application of a complete fertilizer very materially increased the yields. A following more extensive experiment, in which different rates and combinations of manure and artificial fertilizers were applied, brought out that, while either manure or a complete fertilizer greatly increased the seed yields when applied alone, the heaviest seed crops may be secured if the land is heavily manured and in addition is given a liberal dressing of a complete fertilizer.

Most striking evidence bearing on the all important influence of rich soil on the yield of mangel seed was gathered last year at the Central Experimental Farm at Ottawa. Half an acre was planted to mangel seed on rich land which the previous year had been used as a pig run. The roots used were all perfectly sound and in best possible condition so that a full stand of vigorous seed producing plants was secured. This half acre yielded 1,020 pounds of first class cleaned seed, i.e., at a rate of over 2,000 pounds per acre. And yet, a considerable quantity of seed was lost on account of a hail storm when the seed crop was in the stooks. Had no loss been suffered from this cause and from shattering before stooking, the yield would have been at the rate of close to 2,500 pounds to the acre.

M. O. MALTE, Dominion Agrostologist.

Too many men are looking for trouble instead of work.

THE "FLU" Dare Not Return

The "Flu" will certainly get a warm reception this winter if it dares show its ugly head in our peaceful midst, for the people are confident now that they can deal it such a smashing blow it will never survive. In every village, town and city in Canada, families are fortifying themselves with the greatest "Flu" ammunition known to science—Buckley's Bronchitis Mixture. Colds, coughs, etc.—the advance guards of Flu—are met with withering fire, and relief from these troubles is sure to gain time. One hundred thousand Canadians are only too willing to testify to the great healing power this remedy contains. It has conquered coughs of 35 years' standing. It cannot fail to do for you what it has done for others. You have everything to gain and nothing to lose, as it is sold under a money-back guarantee to banish coughs, colds, bronchitis, bronchial asthma, and prevent you from getting the "Flu." It is not a syrup, but a scientific mixture, 20 times stronger than any other cough cure. One dose gives instant relief. Price, 75 cents. Take no substitute. None genuine without my signature. Ask your druggist.

Interest on agreements to purchase town or city lots held by members of Allied Forces, or dependents, acquired direct or indirect, remitted from enlistment to March 31, 1920. SUB-PURCHASERS OF CROWN LANDS

Provision made for issuance of Crown grants to sub-purchasers of Crown Lands, acquiring rights from purchasers who failed to complete purchase, involving forfeiture, on fulfillment of conditions of purchase, interest and taxes. Where sub-purchasers do not claim whole or original parcel, purchase price due and taxes may be distributed proportionately over whole area. Applications must be made by May 1, 1920.

GRAZING Grazing Act, 1919, for systematic development of livestock industry provides for grazing districts and range administration under Commissioner. Annual grazing permits issued based on numbers ranged; priority for established owners. Stock owners may form associations for range management. Free, or partially free, permits for settlers, campers or travellers, up to ten head.

Synopsis of Land Act Amendments

Minimum price of first-class land reduced to \$5 an acre; second-class to \$2.50 an acre. Pre-emption now confined to surveyed lands only. Records will be granted covering only land suitable for agricultural purposes and which is non-timber land. Partnership pre-emptions abolished but parties of not more than four may arrange for adjacent pre-emptions with joint residence, but each making necessary improvements on respective claims. Pre-emptors must occupy claims for five years and make improvements to value of \$10 per acre, including clearing and cultivation of at least 5 acres before receiving Crown Grant. Where pre-emptor in occupation not less than 3 years, and has made proportionate improvements, he may, because of ill-health, or other cause, be granted intermediate certificate of improvement and transfer his claim. Records without permanent residence may be issued, provided applicant makes improvements to extent of \$20 per acre and records same each year. Failure to make improvements or record same will operate as forfeiture. Title cannot be obtained in less than 5 years, and improvements of \$10 per acre, including 5 acres cleared and cultivated, and residence of at least 2 years are required. Pre-emptor holding Crown Grant may record another pre-emption, if he requires land in conjunction with his farm, without actual occupation, provided statutory improvements made and residence maintained on Crown granted land. Unsurveyed areas, not exceeding 20 acres, may be leased as homesteads; title to be obtained after fulfilling residential and improvement conditions. For grazing and industrial purposes areas exceeding 640 acres may be leased by one person or company. Mill, factory or industrial sites on timber land not exceeding 40 acres may be purchased; conditions include payment of stumpage. Natural hay meadows inaccessible by existing roads may be purchased conditional upon construction of a road to them. Rebate of one-half of cost of road, not exceeding half of purchase price, is made. PRE-EMPTORS' FREE GRANTS ACT

The scope of this Act is enlarged to include all persons joining and serving with His Majesty's Forces. The time within which the heirs or devisees of a deceased pre-emptor may apply for title under this Act is extended from one year from the death of such person, as formerly, until one year after the conclusion of the late war. This privilege is also made retroactive. No fees relating to pre-emptions are due or payable by soldiers on pre-emptions recorded after June 26, 1918. Taxes are remitted for 5 years. Provision for return of moneys accrued, due and paid since August 4, 1914, on account of payments, fees or taxes on soldiers' pre-emptions. Interest on agreements to purchase town or city lots held by members of Allied Forces, or dependents, acquired direct or indirect, remitted from enlistment to March 31, 1920. SUB-PURCHASERS OF CROWN LANDS

Provision made for issuance of Crown grants to sub-purchasers of Crown Lands, acquiring rights from purchasers who failed to complete purchase, involving forfeiture, on fulfillment of conditions of purchase, interest and taxes. Where sub-purchasers do not claim whole or original parcel, purchase price due and taxes may be distributed proportionately over whole area. Applications must be made by May 1, 1920.

Breadth of Banking Service

EVERY Department of Banking Service finds full and adequate expression in the Bank of Montreal. Its Branches cover the Dominion of Canada from end to end; it has its own offices in the financial centres of Great Britain, France and the United States, and its correspondents in every part of the world.

No matter what form of banking service may be required, whether it be in connection with the Savings Department, the financing of business or the carrying on of foreign trade relations, adequate facilities for such service are afforded by this Bank. The Manager of any branch will be glad to have you discuss your requirements with him.

A Direct Wire Service is maintained between the Bank's offices in Montreal, Toronto, Winnipeg, Vancouver, New York, Chicago, and San Francisco.

Council Confronted by Heavy Agenda

(Continued from Page 1)

Mr. Clark had not replied. On motion it was agreed to tax each lot owner with half the cost of repairs.

A letter from Premier Oliver was read, asking the opinion of the council as to what date proposed municipal legislation should be made effective. In the opinion of the Reeve and Councilors, the letter did not convey sufficient information to permit of making an intelligent answer. Irrigation connection to Peachland Townsite Co. property near the Hospital was granted.

Following the reading of the request of the School Board that a school loan by-law be submitted to the ratepayers, the Clerk was requested to have such by-law prepared.

Reports that the sidewalks in front of the Canadian Bank of Commerce and between the Post Office and the C.P.R. wharf needed repairs were referred to the works committee with power to act.

This committee reported that the road near the W. R. Tweedy property was being repaired.

British Columbia Hens The Best Layers.

The Province of British Columbia has amply demonstrated its adaptability for poultry raising. In the egg laying tests carried on over Canada last year British Columbia gave the highest production. At the Agassiz Farm seventy miles east of Vancouver, 200 egg hens were quite common, 250 and 270 by no means rare, and at the Vancouver Island Station, a White Wyandotte flock of 200 pullets gave an average of 195.97, 29 of which were about 175 eggs, 32 above 200. There the highest production was reached by a pullet that laid 300 eggs within the year. At the Vancouver Island Station no bird is considered worth keeping for breeding that does not lay 200 eggs the first year, and no cockerel is retained unless his mother laid 250 eggs in her pullet year. This improvement has been brought about by the pedigree breeding carried on by the Experimental Farms System, which in recent years has been giving special attention to the development of high producing strains of fowls.

A WHITE BEAVER.

A very rare specimen caught in the English River, north of Fort Francis, Ontario. It is pure white and weighs 31 pounds.

WHEN THE GERMAN WON.

A somewhat typical Boche was brought into prison camp in France in which an Englishman and an American were on duty. One day a skunk sneaked into the camp and entered a small building. The American bet the Englishman that he could not remain in the building ten minutes with the skunk. The bet was taken, and the Englishman went in. In six minutes he came out.

The American was challenged to enter on the same terms. He went in and came out in five minutes.

The Boche who had witnessed the defeat of the Englishman and the American, offered to bet that he could remain inside with the skunk for ten minutes. His bet was taken and he disappeared within. In exactly one minute the skunk came out.

SINGLE TAX BREAKS DOWN.

In British Columbia, as in Alberta, the single tax theory was tried out. There, as here, the theory has broken down and let the municipalities into the swamp. It is being discovered that it is by the people, not by land, that taxes are paid. Whether or not people own land is incidental which neither accurately gauges their ability to pay taxes nor warrants imposing upon the share of the general burden that should be borne by their neighbors.—Edmonton Bulletin.

YOUR STORE ADVERTISING

"EVERY GOOD STORE, EVEN THOUGH IT BE A SMALL ONE, SHOULD BE ADVERTISED."

Small beginnings, wisely made and persistently followed up, will mean assured growth and larger opportunities for the little merchant—just in the degree that his store merits and earns wider patronage and approval.

A small advertising space costs a small amount of money. Yet it affords a chance to the small merchant to tell why he seeks a wider patronage—what he has to offer that is unusual.

And whether he is located on the beaten pathway of trade or upon an unfrequented byway, his Ad. will lead people to seek him out. And, in due time, he will be able to decide the matter of store location according to his liking rather than according to his necessities.

APR 25 1921

DEVOTED TO THE INTERESTS OF SUMMERLAND, PEACHLAND AND NARAMATA

Vol. 12, No. 38, Whole No. 689

SUMMERLAND, B.C., FRIDAY, April 22, 1921

\$2.50, Payable in Advance

1921 TAX RATE TWO MILLS LOWER THAN LAST YEAR'S

Higher Valuation of Land Brings Down Mill Rate. Municipal and School Rates Each Down One Mill.

IRRIGATION RATE INSUFFICIENT

To Make Utility Self-Supporting. Fifteen Mill Debenture Tax To Provide Sinking Fund and Interest on Water System.

Summerland's tax rate for 1921 will be 43 mills, 2 mills lower than the 1920 tax rate. This does not mean that the land owner will pay less taxes this year than he did a year ago, as the basis of assessment has been increased.

The 1921 estimates were considered at a special meeting of the Municipal Council held on Saturday. It will require a rate of 16 mills on the present assessment to cover the requisition submitted by the School Board. This is one mill less than the 1920 rate. For general municipal purposes the tax rate last year was 13 mills. With the view to keeping down expenses to the lowest practical point, the Council agreed on a rate of 12 mills. The proposed debenture tax rate is 15 mills. This will yield an estimated revenue of \$20,204, practically all of which is absorbed by the estimated deficit on the irrigation system. There will be, according to estimate, a revenue of \$20,462 on existing irrigation rates, \$8,500 from domestic water users, and \$5,268 from the domestic general water rate. The following are the estimated expenditures on the irrigation system: Maintenance and operating, including overhead charges \$18,200; Debenture Interest 17,805; Sinking Fund 8,304; Estimated domestic water expenses are:

Maintenance and operating, including overhead charges	4,500
Capital Expenditure	500
Debenture Interest	3,100
Sinking Fund	1,105

It will be noticed that these figures show a profit on the domestic water, and a loss on irrigation. Combining the two, the net deficit is \$19,286, which is nearly equal to the sum to be collected through irrigation rates. This deficit is made up through the debenture tax which will be 16 mills, the same rate as last year, higher assessments yielding what amount is needed in excess of last year.

The estimates covering the electric light department show a small nominal profit of \$400, the rate levied being estimated as being quite sufficient to cover the estimated expenditures in that department.

The Board of Trade were referred to the Board of Health.

A request from Basil Steuart for another irrigation connection to serve a high spot in his orchard property was left over until later in the season when the pressure in the pipes in that section would be known.

Geo. Carr asked for renewal of the flume supplying his lot. Referred to water committee with power to act.

Upon the suggestion of Council, the Clerk was instructed to write to the Kettle Valley Railway asking for two gates and an ordinary crossing across the railway track at a point at the southern end of Peach Valley.

Approval was given to repairs to the flumes to the McArthur and Kerr lots.

Following a question from one of the councillors there was some discussion on the charge made the Experimental Station for domestic water. It was stated that there were now several houses and barns being served, and in addition there is a lawn service. It was decided that the present monthly charge should be increased and that Supt. Helmer be notified by the Clerk of this intention, the object being to put the charge on the same basis as that to properties within the municipality.

Some pressing capital expenditures came up for discussion when the Reeve urged that early action be taken.

(Continued on Page 8)

COUNCIL HOLDS EXTRA SESSION

Some Carried Over Business Cleaned Up. Penalty For Non-Payment of Taxes.

At an extra meeting of the Municipal Council held on Saturday afternoon, a number of business items left over from the regular meeting on the Tuesday before were given attention.

Having received the written promise of the owners interested to pay \$400 towards the cost, the alteration in the location of the irrigation ditch running through the Muir Steuart, W. C. Kelley, J. H. Ritchie, and H. L. McPherson properties was authorized.

Instructions were given to the foreman to prepare an inventory of the fire fighting apparatus and a report on its condition and how the same is cared for. Instructions were also given to have a fire by-law prepared. This will cover the construction of chimneys in townsites areas. This action was taken as a result of a request from the Board of Trade.

Matters pertaining to sanitation referred to in a communication from

TO EXPERIMENT ON FRUIT STORAGE

New Buildings For Experimental Station. To Have Plant Pathologist.

It is the intention of Supt. Helmer of the Experimental Station to erect a horticultural building this summer, permission having been obtained from Ottawa for the expenditure. The building will be a two storey structure, the upper floor of which will be used as a workshop and where boxes will be made. The main floor will be used for packing fruit and it is the intention to eventually put in a grading machine.

A plant pathologist's laboratory will also be built this spring, and Mr. Helmer hopes to have a plant pathologist on the farm this summer.

With the erection of the new horticultural building it is the superintendent's intention to carry on experiments in the storage of apples, particularly as to the moisture content of the atmosphere. The basement of the new building will be divided into four cellars, in each of which apples of a like variety and condition will be stored, the humidity of each cellar being maintained at a different degree. We believe this is the first attempt in this part of Canada at least at a thorough experiment of this nature, and the result will be of vast importance to the fruit growing industry.

BOARD OF HEALTH.

Following the adjournment of the Court of Revision, the Municipal Council sat for a short time as a Board of Health. The annual report of the M.H.O., Dr. F. W. Andrew, was received and read, and a letter from the Board of Trade to the Council was presented to the Board of Health for consideration. Several matters were discussed in a general way, and the meeting adjourned to resume at an early date, when definite action will be taken on some matters before the Board.

Cranbrook looks for a big falling off in police court business this year. In 1920 the revenue from this source was over \$11,000, while for 1921 the best that is hoped for is less than \$5,000.

HEAR APPEALS ON WATER RATES

Council Sits as Court of Revision of Irrigation and General Water Rates.

Sitting as a Court of Revision on the irrigation rates, the Municipal Council on Monday disposed of a number of appeals for rebate of charges for several causes. The Court opened shortly after 10 a.m. and adjourned at 5 o'clock.

Several requests were made for rebate of charges on lots in Prairie Valley meadows, each applicant claiming that water was not needed, and that under present conditions their properties were suffering from an excess of water. The rebates were granted in two instances where no irrigation connection existed, and the Court decided that the cost of giving connection did not justify the expense in order to retain the rate. Such rebate was made C. J. Ripplin for this year on Block 11, D.L. 475, and to John Dale on Block 22, D.L. 474.

Mr. Ripplin's appeal for rebate of rates on Blocks 47 and 51, D.L. 475 was not granted, and the rates charged John Dale on Block 12 D.L. 474, 7 acres out of a total of 11.4, and Block 54 D.L. 475 were sustained.

P. B. Agur also asked for a rebate on the half of 6, D.L. 475. It was explained that the Council was preparing a proposition to submit to the land owners interested whereby the meadows would be drained and the water table lowered. In view of this fact the appellants in attendance did not further press their claims.

Mr. Ripplin's request for relief of part of 18, D.L. 475 was referred to the water committee. He stated that the trees had been killed by too much water, claiming that this was caused by leaks from the south main. It is thought that a measure of relief can be given this year.

W. R. Tweedie was given a rebate on irrigation rates on 3 acres in Bk. 30, D.L. 476, being waste land.

H. W. Tavender was granted a rebate on general water rate charged on Block 23, D.L. 675, it being shown that the pipe line did not extend to that lot. At his request his two lots 21 and 22 (each two acres) will be treated as a 4 acre lot when fixing the irrigation charge.

E. H. Bennett, owner of a broken

(Continued on Page 8)

SAYS: CLEAN UP SUMMERLAND!

More Attention to Appearance Would be Good Investment.

GOOD PUBLICITY

Supt. R. H. Helmer Heard in Forceful Address on Civic Improvement.

Members of the Board of Trade who attended the meeting held in the Parish Hall on Tuesday evening, heard a splendid address from Supt. Helmer of the Experimental Station, on "Enhancing the Beauty of Our Community." Describing himself as a farmer, Mr. Helmer said he felt rather diffident in talking to a meeting of business men. Boards of trade in this province had done much, and could do much more if they would take themselves seriously.

Touching upon district advertising Mr. Helmer pointed out the importance of a good apple show, and stated that the last four shows had been visited by notable men from abroad. Summerland's apple show has always been the best in the Valley, and a splendid advertisement. He noted that the business men were advertising more in the local paper and commended their action in so doing. The Dominion Experimental Farm advertised by making tours of the farms. Summerland should advertise itself more. The Board of Trade in its advertising matter has asked people to come here and settle. Any town is attractive or otherwise according as its people make it. If visitors see empty cans and other refuse laying around they immediately decide that that community is a dead one. He had heard people comment on the beauty of Summerland and of its splendid class of citizens, but when the untidiness of the district is noted, they would say, "God forbid that we should live amid such surroundings." The speaker urged that something should be done so that Summerland may not acquire such a reputation.

Stating that he was here at the birth of Summerland, having come to take over for the buyers the then

(Continued on Page 8)

YOUNG PEOPLE'S GIFT TO CHURCH

Extensive Improvements to the Baptist Structure During Recent Months.

For some well nigh two months, the Summerland Baptist Church has been spending considerable time, thought and money on improvements. This work practically came to an end on Saturday with a very beautiful climax.

It is always difficult to modernize an old structure, but this difficulty has been fairly well overcome by the resourcefulness of the building committee.

Through the enterprise of Mr. G. J. Coulter White, Superintendent of the Bible School, books have been accumulated and a circulating library set in motion, with a room set apart for literature for the children.

The Ladies' Auxiliary has built and equipped a ladies' parlor, with direct connections with the church kitchen. A "dumb waiter" and other culinary expedients have been introduced to facilitate labor in view of the social work of the church.

The interior of the auditorium has been altered and decorated. There has been a change in the lighting system, pews have taken the place of chairs, and a baptistry has been introduced. Eight rooms are now available for class work and the purpose ultimately is to have a through connection with the school rooms apart from the main auditorium.

A very pleasing surprise awaited the pastor who discovered that the Young People had, on the quiet, completely furnished his study. The walls had been very tastefully decorated, the floor carpeted, and the room thoroughly equipped.

The Sunday morning sermon had some very apt poetic allusions and the pastor assured the Young People that it must have been the psychological effects of the poetic surroundings of the new room. In any case the Young People's gift was a poetic climax to the past two months' effort to make an old building function like a modern church.

At the evening service, there was a large congregation, both side rooms being thrown open to provide accommodation. The sermon on "The King" was the third of a series of addresses on Religious Outcasts in Hebrew History. A solo, "Comes at Times a Stillness," was excellently rendered by Mr. Frederic Graham, and Miss Muriel Banks gave a violin recital.—Con.

TO ERECT STOCKYARDS.

A sequel to the resolution adopted at the recent convention of the United Farmers of British Columbia urging the Government to establish stockyards in British Columbia is the announcement of President Copeland, of the United Farmers, that that organization will in all probability erect stockyards at New Westminster to assist British Columbia stockmen and farmers to hold the local market. Over 16,000 head of beef cattle were shipped from this province to Alberta in 1920.

Mr. P. Burns, of P. Burns & Co., predicts that the shipping of cattle on the hoof to England will be superseded in Canada by the system of transportation in the dressed state, in the next ten years.

1921 APPLE SHOW TO SPREAD THE FAME OF SUMMERLAND

Board of Trade Links Up With Agricultural Society to Make Annual Fruit Exhibit the

BEST IN ALL CANADA

Live Board With Committee Already At Work. Will Be Distinctly Fruit and Vegetable Exhibit.

Summerland is to have this fall the best of the many good apple displays ever exhibited here. This means a good deal, as Summerland has long had the reputation of putting on the best apple show in B.C.

Success for the 1921 show was practically assured by the action of the Board of Trade at its meeting last Tuesday evening, when seven members of the Board were added to the list of directors of the Summerland Agricultural Society, and the fullest co-operation of the Board was pledged.

The question was opened by Supt. R. H. Helmer during his address on civic improvement. Mr. Helmer recalled that the fall fair had always been Summerland's big day when all the citizens met and viewed what their neighbors had grown. It was a day of education and inspiration. A few years ago Summerland apples won all prizes. These prizes were taken so easily that our people became careless in the selection of their exhibits and in the packing, with the result that at the last fair Kereemos took many of the prizes, just through exercising more care as to packing. Mr. Helmer urged that the Board of Trade back up the show directors, work for membership in the Agricultural Society and boost the show. Membership cost but \$2 and entitled the member to free exhibits and free admission for himself and family.

J. Tait told of the apparent lack

of interest, as when the annual meeting of the society was called very few attended. He suggested a larger directorate, and a further division of the work. There is to be a national apple show held at Toronto this fall, and he urged that Summerland have an exhibition and from the fruit so displayed exhibits be sent to Toronto.

A MacLachlan questioned the wisdom of adding live stock to the prize list under the present conditions.

Mr. Helmer pointed out that during the war period Summerland carried on, making good shows each year and there should now be more enthusiasm.

A number of other citizens including E. J. White, A. B. Morkill, P. Gray, J. S. Ritchie, J. R. Campbell, R. E. White, and G. Y. L. Crossley spoke in support of the apple show, and several special prizes were promised. Prin. MacDonald of the Public Schools said that the schools would put in as large an exhibit as space could be got for.

Upon a vote being taken the two dozen or more present voted unanimously to become members of the Society and work for the fair, and after the Board of Trade meeting was adjourned, the following were added to the show directorate: Messrs. J. R. Campbell, E. J. White, E. R. Butler, P. Gray, G. Y. L. Crossley, A. B. Morkill and Prin. MacDonald.

The directors previously elected were A. MacLachlan, H. Bristow, J. Tait, R. H. Helmer, A. Moyes, C. Craig, R. V. Agur.

A meeting of the larger board was held on Wednesday evening when C. Craig was elected president, E. J. White first vice-president, H. Bristow 2nd vice-president, and J. Tait secretary. The community was divided into seven districts for canvassing purposes, two directors being allotted to each. A preliminary revision was made of the prize list, when it was decided to eliminate live stock for this year, as it was felt that sufficient provision in the way of buildings and otherwise could not be made.

The following committees were appointed: Advertising—Crossley, Gray, and Agur. Hall and Grounds—Butler and Mellor. Box and Plate Exhibits—Helmer, Bristow, Morkill and White. Vegetable Exhibits—MacLachlan and Moyes. School Exhibits—MacDonald and Campbell.

DEAN COLEMAN IN ABLE ADDRESS

Large Audience Hears New Ideas on Subject of Practical Education.

Dr. H. F. Coleman, Dean of Arts in the University of B.C. delivered a very able and interesting address in the Lakeside Church on Sunday evening to a large and appreciative audience. Under the title "New Occasions and New Duties" the professor dealt with the great question of Education. Dr. Coleman said in part:

The work of training the young is essentially a religious duty. We are getting more and more away from the idea of compartments in education, and are beginning to see that there must be an all round and symmetrical development of the personality. The athlete who over trains his muscles suffers rapid decline of physical powers. The student who over trains the intellect suffers socially and mentally to a terrible degree.

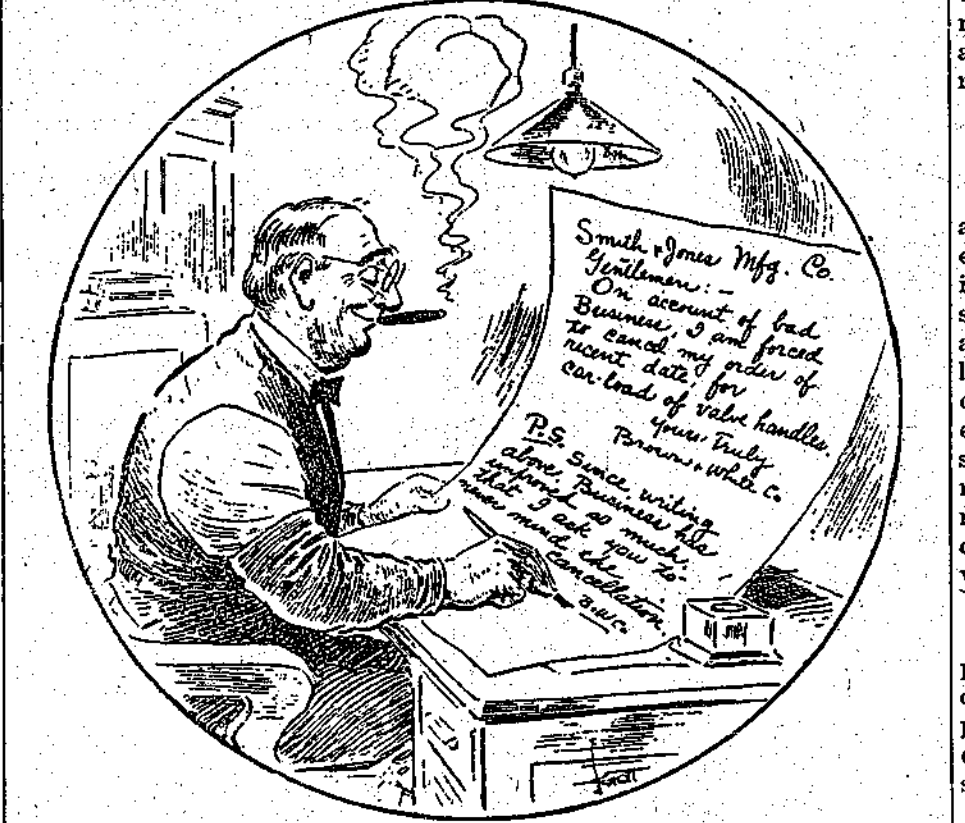

The lecturer went on to say: Truth is not static but dynamic. It grows and changes with the lives of men. Old forms and statements of truth are never adequate for a new age. Our world of human relationships has changed with great rapidity during the past few years. We must adjust ourselves constantly to the new conditions. This is most difficult for us to do. We are by nature traditional and conservative. We are afraid of the new. Whether we like it or not we must recognize the respects in which the world has changed.

(1) The world has changed politically. New nations have sprung into existence, old nations are in the dust, while others have been shaken out of their ruts.

(2) The world has changed economically. This change was foreseen long before the war and reached its crisis with the outbreak of that world catastrophe. England is an example of the vast economic changes that have been taking place. The Empire is yet in danger and no one can tell what the end may be.

(3) The world is changed socially and industrially. Men are feeling after a new and adequate expression of the term Democracy. Along with Democracy we have the demagogue. It is not always the man with a logical mind, a reasoned statement, and a clear purpose, but the man with the loudest voice and who appeals to popular

THEY'RE BEGINNING TO WRITE POSTSCRIPTS TO THEIR CANCELLATIONS.—Knott in Dallas News.

J. C. ARKELL NEW ROAD FOREMAN

J. C. Arkell has been appointed to the position of road foreman under the Provincial Department of Public Works. Mr. Arkell will have charge of the roads on the west side of Okanagan lake from Peachland south to the lower boundary of South Okanagan, a short distance below the Experimental Station.

The policy of the Department has been somewhat changed, the district being more subdivided. The district from Peachland north to Westbank Ferry is under the charge of another man.

Under the Government's new road policy it is expected that the lake shore road right through Summerland will be maintained by Mr. Arkell, and probably the road between the lake and Mineola as well. Just what other roads within the Municipality the Government will be concerned in depends on the grading of the highways.

THE WOMEN'S INSTITUTES.

Mr. A. J. Mann, assistant superintendent of the Summerland Experimental Station, was present at the meeting of the Summerland Women's Institute, which was held last Friday afternoon, and gave a most interesting as well as instructive talk on Gardening.

Mr. Mann dealt with the preparation of soils, methods of planting, and told of the many various vegetables which could and should be grown in the home plot.

Many questions were asked Mr. Mann, all of which he was pleased to answer.

The Institute has decided to give a prize for the best school garden; also a prize to the scholar passing highest from Public School to High School at the close of this term. The examination to be written.

Next Week's Work In The Orchard

By R. H. Helmer.

What with the \$1,000 rains and the Board of Trade alive to the advantages of the Fall Fair, Summerland farmers should now plan to have an exhibit at it. As one director put it, if each grower only put in one box and one plate, a splendid fair is assured. If your neighbours told you you hadn't a box fit to show or couldn't get a show plate of apples—well!

The land is in perfect condition to receive all small seeds such as alfalfa, clover, grasses, vegetable seeds, etc. If your soil bakes on the surface, the harrow over or before seeding conserves moisture. Water will soon be turned on. Don't oversaturate your soil, especially the surface soil; deep marking for food crops pays early in the season.

ROBERTSON NEW HORTICULTURIST

Popular Departmental Official Appointed Chief of Fruit Branch.

W. H. Robertson, district horticulturist for the lower mainland, has been appointed provincial horticulturist, according to a Victoria despatch. He has had many years of experience in British Columbia and is considered one of the best posted men in the industry.

Mr. Robertson was born in Nova Scotia, but in his late teens went to Ontario, where for some time he worked on fruit farms in the Niagara district. He then entered the Ontario Agricultural College at Guelph, where he specialized in horticulture. After graduating he was engaged in the fruit business in Ontario, but later came to British Columbia and helped to plant out the orchards of the Kamloops and Waltham fruit blocks. His ability was quickly recognized and he was added to the provincial horticultural staff, being given Vancouver Island and the Fraser Valley as his territory. In 1916 he joined the artillery and served in France with the 68th Battery until October, 1918, when he was severely wounded in the leg. He lay for many weeks in a Boulogne military hospital, his leg being encased in a plaster cast. From the French hospital he was transferred to a Manchester institution, subsequently returning to Canada after passing through a number

(Continued on Page 5)

Peachland Doings
A Weekly Chronicle Furnished
By Our Local Representative.

Geo. Robinson is the proud possessor of a brand new Oldsmobile touring car, bought in Summerland last week.

Mr. Wm. Fulton went south on Wednesday of last week to spend a few days looking around the lower points on the lake.

After a pleasant visit here with his uncle, Mr. Thos. Elliott, and cousin, Mrs. C. Somerville, Mr. Reginald Elliott with his little son left on Thursday morning to return to the prairie.

Mr. J. Kudelka spent Thursday in Kelowna on business.

The Peachland Fruitgrowers' Union received another carload of flour and feed this week.

Miss Doris Charlton returned on Thursday evening after a short visit to Vernon.

The whist drive and ice cream sale held Thursday evening had a goodly number in attendance and a pleasant evening was spent.

Mrs. Cartwright and daughter Margaret left on Friday morning after a short visit with relatives here.

Mr. Wm. Taylor spent Friday attending a meeting in Kelowna.

Mr. Jack Hamilton arrived home on Friday evening from Victoria, having been called home by the death of his mother.

Mr. and Mrs. L. D. McCall came up on Saturday morning from Penticton where they are spending a few weeks. They remained over the week-end, returning to Penticton Monday evening.

Mr. and Mrs. J. Hyde and family moved on Saturday last from where they have been living on Beach Ave. and have taken up residence in the new house just completed by Mr. and Mrs. Mills on their lake front property.

The funeral took place on Saturday evening last of Mrs. Hamilton, whose death came quite suddenly following a stroke last week. Mr. Hamilton, who was on the prairie, was summoned and arrived just in time for the funeral. Rev. C. D. Clarke officiated with a short service at the grave side. Mrs. Hamilton leaves her husband, five sons and a daughter. Three of the boys have been living here with their mother and attending the central school, while one son, Jack, has been attending Normal at Victoria. He will return to finish his training at the Normal. The fifth son is married and employed in the Post Office at Regina and was here on a holiday when his mother was taken with the stroke.

Mr. and Mrs. Mylrea and family arrived in town on Saturday last to take up summer residence in the Tewart bungalow. Mr. Mylrea is the representative for this division of the country for The Grolier Society of London, and will make this his home when his duties allow him any spare time.

The fortnightly services were held as usual on Sunday afternoon in the Anglican and Baptist Churches, conducted respectively by Rev. H. A. Solly, Summerland, and Rev. Isaac Page, Penticton.

Gordon McDougald is enjoying his holidays working hard down on the ranch and motored home on Sunday. He was accompanied by his sister-in-law, with Mrs. Gray and Mrs. Robinson, Sr., from Summerland. They all returned in the evening.

Mr. Ekin returned north again on Monday morning last after spending the week-end at home with his wife and family.

Mr. and Mrs. Wm. Fulton returned home on Monday morning after a few days spent down the lake on business and pleasure.

Mr. Metcalf is again enjoying the companionship of his sister who arrived on Monday evening to remain here for some time.

A few old timers in attendance at the south bound boat on Monday evening saw and had a few words with a former Peachland resident, Essie Brown, who was passing through. She expects to pay Peachland a visit some time this month.

The three Drury brothers, brothers of Mrs. Emmet Brinson, left on Wednesday morning for Calgary where they will probably remain at least till fall. They had hoped to remain here for the summer but unsettled

water conditions did not warrant their going ahead with permanent improvements to their place. While the water problem is being settled they will summer on the prairie. Mr. Emmet Brinson will look after their interests here while they are absent.

Mr. and Mrs. Drake and Mr. Fulton were passengers north on Tuesday morning last, returning by auto in the afternoon.

Another family arrived in Peachland last week from the prairie, friends of Mr. Kennedy who recently bought the old Bulyea fruit lot, and have taken up residence in the old Hamilton cottage on Mr. Trimble's lot.

SAUCE FOR THE GROUCH.

A bright little newsboy entered a business office, says The Argonaut, and approaching a glum looking man at one of the desks, began with an ingratiating smile, "I'm selling thimbles to raise enough money to—"

"Out with you!" interrupted the man.

"Wouldn't you like to look at some nice thimbles?"

"I should say not!"

"They're fine, and I'd like to make a sale," the boy continued.

Turning in his chair to fully face the lad, the "grouch" caustically inquired, "What do you think I want with a thimble?"

Edging toward the door to make a quick escape, the boy answered, "Use it for a hat."

A new story is going around about an old southern Negro who was asked by the proprietor of a store how he happened to need credit when he'd such a good crop of cotton.

"De ducks got 'bout all dat cotton, sah," was the mournful reply.

"What do you mean—the ducks got it?"

"Well, you see," explained the old man, "I sent dat cotton up to Memphis an' dey deducts the freight, an' dey deducts the storage charges, an' dey deducts the commission, an' dey deducts the taxes—yes, sah, de ducks got 'bout all dat cotton an' dat's why I'm here."—Boston Transcript.

"I've just 'eard, Mrs. 'Uxtable, as 'ow my Ned is behavin' so well that his sentence is bein' redooed by six months."

Mrs. 'Arris—Wot a comfort it must be to you to 'ave a son what does you so much credit."

Growers and Shippers Attention Please

Unless we are much mistaken you are at this time thinking seriously over the question as to how you are going to market the coming season's products, in the way that will net you the most money and cause you the least worry. We desire to tell you that we have a method the result of fifteen years' experience that will enable you to get your products sold and receive your returns within a comparatively short time after the fruits, etc., leave your orchards.

You are all no doubt aware that there are increased freight and express rates this year which must be contended with; this together with the fact that the consuming public are buying very cautiously and as economically as possible, means that the best of judgment and the most skilful salesmanship will need to be used and all unnecessary expenses will have to be done away with, in order to cope with the unusual attitude of the buying consumers and the increased transportation charges.

We desire to arrange with a limited number of Reliable Growers or Shippers who have Berries, Cherries, Fruits, Vegetables, etc., to market. We know that all growers and shippers of fruits, etc., are very busy men when the shipping season is on, and it must be a satisfaction for them to be relieved of the anxiety regarding the marketing of their fruits, etc., and thereby be enabled to attend entirely to picking, packing, etc.

We are fully prepared to look after the marketing end of your industry for you and shall be glad to have you write for further information, at the same time giving us particulars regarding the kinds of products you expect to have, the quantities, etc.

Yours truly,
W. V. MOORE, LIMITED.
Calgary, April 7, 1921. 36-38

"FROM THE VASTY DEEP."

Fish leather may reduce the cost of boots and shoes. The appearance of leather made from the skins of the finny tribe is heralded by tanners and shoe manufacturers as the beginning of a new national industry. Experts say fish leather will soon be used for all kinds of footwear, from the finest of women's shoes to heavy hunting boots. It will also be in demand for bookbinding, bags, trunks and harness. Leather made from fish skins, it is said, equals in quality that made from land animals.

Little white lies soon become soiled.

SUMMERLAND WEATHER REPORT

Below is a report furnished by the Dominion Experimental Station here for the week ending Tuesday:

Date, 1921	Max.	Min.	Rain	Su.	Sunshine
April 6	51	29	10.7
April 7	53	26	11.5
April 8	57	27	11.5
April 9	59	30	11.0
April 10	64	35	8.6
April 11	69	43	6.8
April 12	55	41	0.0

It's safer to guess than it is to predict—and it is equally uncertain.

A FAMILY RE-UNION IN WINNIPEG.

We Are Selling Cheaper Mileage

You may get extraordinary mileage out of any one tire—but that's not the way to figure mileage.

Get the average of mileage given by a pair of tires or a set—and you will get nearer to the actual cost of mileage to be charged to the upkeep of your car.

It's just because we've taken the trouble to figure values that way, that we recommend Ames Holden "Auto-Shoes."

We know they are giving real mileage over the worst roads in the country and their "average" performance leaves no doubt in our minds that Ames Holden "Auto-Shoes" will give you the cheapest mileage you can buy. And they are guaranteed without time or mileage limits. Drop in and let us show you and tell you about

.. The Winding Trail ..

The "gentle reader" of this paper may have noticed in last week's issue, a warning as to the danger lurking in that innocent looking material generally known as celluloid, but sometimes, apparently, designated as ivory. On or about the same date there appeared an account of a sad mishap which occurred to a gentleman who essayed to unite the two pleasures of cigarette smoking and piano playing, and found they did not make very good running mates. To give freer expression to his musical inspiration, this player laid his lighted cigarette on the keyboard, and proceeded to lose himself in an *Andante affettuoso* movement, which was, however, suddenly changed to an *Affrettando Incalzanda* by the discovery that fire was running along the keys and curling around his finger tips. The explanation was simple—the instrument was a cheap one, the "ivories" were not ivory at all, but composed of some inflammatory material described as ivory, and his cigarette had set them on fire.

Two discoveries were presumably the outcome of this experience, the one being that the low priced article is not always cheap, and the other that the keyboard of a piano does not lend itself to use as an ashtray, that being a purpose for which it was never designed.

Mr. Geo. Lansbury, editor of the Labour Herald, possesses a great capacity for making mistakes, not the least of which is his declaration concerning the split in the so-called

Triple Alliance. He declares that Labour has suffered its heaviest defeat in the memory of man. As a matter of fact it has scored a notable victory over the extreme elements which have been, and no doubt still are, aiming at the destruction of constitutional methods of reform, and the substitution of what they term "direct action," but what most people recognize as revolution. And the really important feature of the situation lies in the fact that it is the rank and file of labour, rather than their leaders who have provided the common sense and moderation which were required to avert a national catastrophe. It was discovered by the executives of the railway and transport unions that their members could not be relied on to respond to a strike order, and that settled the matter. The calm reason of the average worker very naturally revolted against an order which would have plunged the Kingdom into commercial chaos, and must have led to a death struggle between labour and the nation at large, with the issue not for one moment in doubt. Mr. Geo. Lansbury and his following cannot be expected to see matters in their proper light, since "prejudice squints when it looks." To such persons, the frustrating of the general strike is a defeat: to the impartial and sympathetic observer it is the greatest of victories.

I believe Isaac D'Israeli wrote a book on "Curiosities of Literature" or some such title. It has never yet been my good fortune to read this work, but I have often thought the title an extremely comprehensive one, and capable of considerable enlargement. One curiosity which amounts to a positive mystery, is the fact that the jingling rhymes of one Walt Mason, find so much favour with a reading public which seems never to have appreciated his writings in good, honest prose. He himself has told us that he never achieved anything like success in all the years he pursued, or indulged in, literature of the ordinary variety, but that both fame, (of a kind) and fortune were his as soon as he conceived the idea of putting things into "rippling rhyme." I am bound to confess that, after struggling through a very limited number of these jingles, I cultivated the habit of letting them alone in favour of something better, as I could not discover any wit or humour in them. Yet this same writer in his right mind, as it were, has the most delightful style, and reminds one of Stephen Leacock at his best. Why the reading public should have been indifferent to his prose gossip, and yet apparently now read and enjoy his forced rhymes, is a "curiosity of literature" which D'Israeli might very well have included in his book—if he had lived later than he did.

Here is a passage from one of Mason's ordinary papers, which may be enjoyed by some over zealous housewives. Speaking of the woman who wears herself out with unsystematic house work, he says: "She would consider it a crime to sit down to rest in the daytime. She sweeps when a broom isn't needed, scrubs floors already clean, and pounds rugs that have no dust in them. She takes all the furniture out of the house—and carries it all back again. She makes her house so hideously clean that no sane man could live in it. If she would only learn to take it easy, she could have all her housework done by noon." Reading this one can at once recall Dickens' redoubtable Mrs. MacStinger on one of her great cleaning days. "The chief object of this institution seemed to be that Mrs. MacStinger should move all the furniture into the back garden at early dawn; walk about the house in pattens all day, and move the furniture back again after dark." On these occasions her lodger, Cap'en Cuttle, was reduced to sitting on a chair "on a very small desolate island, lying about midway in an ocean of soap and water, and seemed waiting for some friendly bark to come that way and take him off."

I wonder how many strenuous housewives have ever taken this picture to heart?

DIVINE REVELATION.

(Ottawa Citizen).

Through all the shocks of circumstances those things which cannot be shaken remain. The enduring facts concerning God and man and the world stand where they have stood from the beginning. The upheaval is driving man from a trust in the temporal to a confidence in the eternal mind. This fact is revealed in the longing of the peoples of Europe for that book which reveals the eternal rock. Never before did the world need the Word of God more than it does to-day. Never before did the people seek the Word of God more than they are to-day. They are realizing the truth of the words of the late Hon. W. E. Gladstone, himself a great lover of the Bible, when he said: "Talk about questions of the day, there is but one question and that is the gospel. It can and will correct anything that needs correction. My only hope for the world is for bringing the human mind into contact with the divine revelation."

A man may be a complete master of himself and yet have nothing to boast of.

OUR CANADIAN APPLES

Farmers' Magazine.

No orchards grow such good apples as the Canadian ones. For flavor and quality there is no superior.

Why, then, are we not able to buy a box of our celebrated Spies, our Greenings, or our Cravensteins at any of our big centres at any time we need it?

How is it that everything except Canadian grown apples can be bought on our big city markets and served up on our big urban dinner tables?

Here, again, is where Canada is paying freight rates to the American railways! When will the people wake up to the fact that Canadian home-grown products are being sidetracked by an ultra-loyal people.

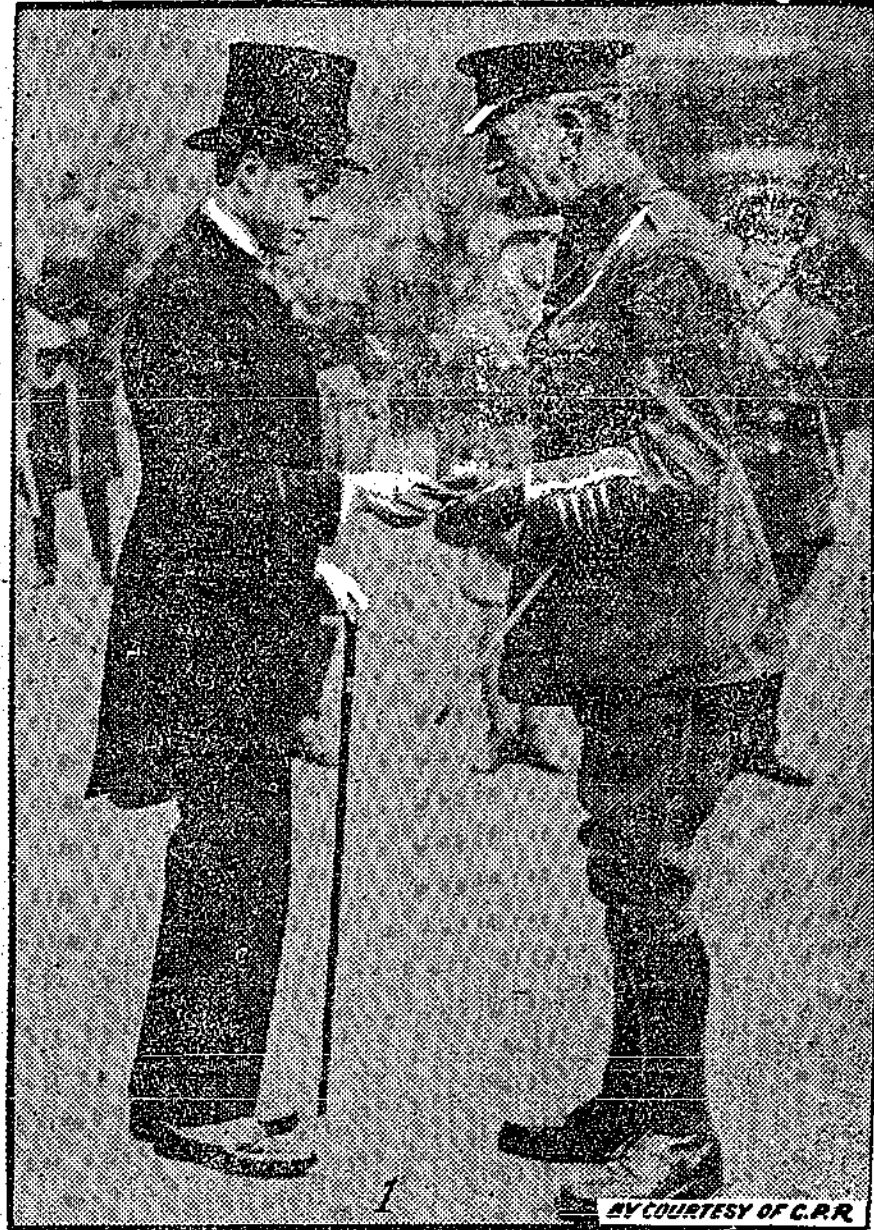

They were looking at the kangaroo at the zoo when an Irishman said: "Beg pardon, sir; what kind of a creature is that?"

"Oh," said the gentleman, "that is a native of Australia."
"Good hiven!" exclaimed Pat; "an me sister married wan of thim."

FARM PRODUCTS INCREASED.

The total value of agricultural production in British Columbia in 1920 was \$63,004,953, an increase of \$2,620,397 over the previous year. There was an increase in practically every branch. Livestock accounted for more than \$14,000,000, and the value of dairy products substantially increased. The market for provincial potatoes was considerably extended, more than a hundred cars going to the prairies, and in the first half of the year potatoes to the value of \$790,830 being exported to the United States.

Regina, Sask.—The manufacture of a firelighter from clay deposits, found on his land, is being undertaken by a Waldeck farmer. The deposit is the only known one of its kind on the American continent, although considerable quantities of this clay are also found in Germany. The firelighter is in the form of a brick. It is soaked in kerosene for a few minutes, and when it has absorbed a quantity, a match is applied. The brick will burn for half an hour with a steady flame, and when exhausted can be replenished with kerosene and used indefinitely. Other uses to which this clay can be put are: kalsomine, filler for paper, Dutch cleanser, white shoe polish, and brick or tile of the very best quality.

The Summerland Review

Established August, 1908

Published at Summerland, B.C., every Friday by THE REVIEW PUBLISHING COMPANY, LIMITED

Ralph E. White, Editor and Manager

An independent family newspaper covering Peachland, Summerland and Naramata and adjacent districts.

Subscription Rates—In British Empire, in advance, \$2.50 per year; six months, \$1.40. To U.S.A. and other countries, \$3.00 per year.

Advertising Rate Cards and information respecting territory and samples of paper mailed upon request, or may be seen at the office of any advertising agency recognized by the Canadian Press Association.

Advertisers must have copy in by Wednesday noon in order to insure changes for standing advertisements. New display advertising copy can be accepted one day later.

Correspondence—Letters addressed to the Editor and intended for publication must be short and legibly written on one side of the paper only. The longer an article, the shorter its chance of insertion. All communications must bear the name of the writer, not necessarily for publication. The publication or rejection of articles is a matter entirely in the discretion of the Editor. No responsibility is assumed by the paper for the opinions expressed by correspondents.

FRIDAY, APRIL 22, 1921

THE CITY MANAGER.

The "city manager" idea in municipal administration has been given considerable thought in the past few years. It has been adopted by more than one hundred and fifty cities in the United States, and the general plan, with some variations, has been put into effect in a number of cities in Canada.

Canadian Finance, a journal devoted to financial and public affairs, in an article headed "Are You Interested in The Reduction of Taxes?" reviews the history and results of the city manager plan on this continent; its conclusion is that this method of administration is an economical and efficient system of handling civic affairs for both large and small cities. "The proof of the pudding," declares Canadian Finance, "is in the eating thereof, and our American cousins have eaten enough of this particular pudding to know what it tastes like."

Mr H. S. Gilbertson, a well known expert on municipal affairs, writing in the Montreal Star on this subject describes what he calls "the Dayton way of city efficiency" as follows:

1. THE PEOPLE elect on a non-partisan ballot—
2. THE COUNCIL, a representative body of citizens, usually five or seven in number, who serve without pay, or for merely nominal salaries, and give simply the time needed for council meetings. They hire, and have the power at any time to fire, the—
3. CITY MANAGER, a non-political sub-executive, who is their agent and subordinate and who appoints and supervises, the—
4. DEPARTMENT HEADS, who in turn appoint and supervise—
5. THE RANK AND FILE of the municipal administration, under the usual Civil Service rules.

Mr. Gilbertson adds that business men will be quick to see its likeness to a corporation.

"It is the only way to organize anything, whether it be an afternoon picnic or a great industry. The feature of the plan is its straightforward simplicity. No lines criss-cross. Responsibility is clear-cut and undivided."

The Calgary Herald, commenting on the city manager plan, says: "There are still some citizens who think that a city's business cannot be administered by a skeleton organization similar to that of a large industrial corporation. On the other hand, there is a growing conviction that the municipal methods so generally accepted in the past can be improved upon, with results which will prove highly satisfactory to the taxpayers."

MUNICIPAL AND REAL ESTATE FINANCE IN CANADA.

The pamphlet entitled "Municipal and Real Estate Finance in Canada" just issued by the Commission of Conservation touches upon some of Canada's most difficult financial problems. It is a clear and convincing statement by Mr. Thos. Adams, Town Planning Adviser to the Commission, regarding housing, land speculation and high taxation, resulting from municipal waste and mismanagement.

No national problem in Canada is of greater importance than that which has to do with the conservation of human and financial resources in our cities and towns. This publication emphasizes the fact that until we employ saner methods in developing our community life any efforts being made to conserve our national resources must be nullified as a result of the careless way in which the wealth derived from these resources is dissipated by bad forms of land development.

This pamphlet may be obtained free on application to the Commission of Conservation, Ottawa.

Canada is soon to have a nickel coin, and unlike the American "nickel" it will be genuine, as it will be 100 per cent. pure,

whereas the U.S. nickel coins contain 75 per cent. copper and 25 per cent. nickel. The new coin will be legal tender in Canada up to \$5.00

CANADIAN FLAGPOLE IN ENGLAND

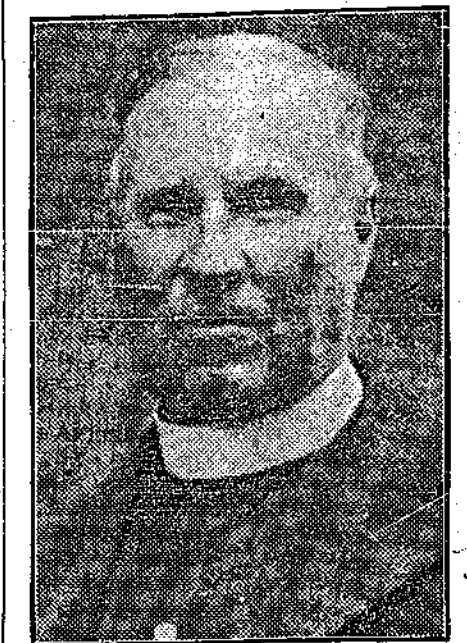

B. C. Shipbuilder Presented Flagpole to Glasgow Hospital.

Vancouver has a direct interest now in the Red Cross Ralston Hospital in Glasgow, Scotland—a new and additional interest it should be said, created in a manner gratifying to all British Columbians who take pride in their great forests and their matchless timber.

Some time ago a leading shipbuilder of Vancouver presented a flagpole to that Glasgow hospital—a single spar 115 feet in length, straight as an arrow and beautifully formed. It was landed at Portsmouth, England, and thence forwarded to Glasgow. It was at once erected and from its top now flies the Scottish flag, the silver saltire of St. Andrew, but the hospital authorities have given the donor of the flagpole the assurance that the Canadian ensign will fly from the pole on Canadian holidays.

The people of British Columbia last year used 19,042,884 eggs that were not produced in British Columbia. They aided the local poultry men by importing from foreign countries—principally China, Japan, and the United States—1,073,567 dozen eggs. Imports from other provinces amounted to 512,340 dozen.

CANADIAN CLERGYMAN OFFERED IMPORTANT OFFICE.

Rev. Canon H. J. Cody, of Toronto who has been invited to accept office as archbishop of Melbourne, Australia.

By an amendment of the Municipal Act at the recent session of the Legislature the property qualification for candidates for police commissioner is made the same as for alderman or councillor. Hitherto no property qualification was required. This amendment will not affect persons now holding office as police commissioners until their term expires.

PRINTING PRICES

During the recent dispute in Vancouver between employing printers and employees, references were made to the fact that higher prices would force Vancouver printing orders to Ontario where wages were lower.

This catastrophe has been averted.

But, do you know, those same prices that were to have tempted Coast orders to the East are being quoted by us?

Some weeks ago we adopted a scale of printing prices that is being very extensively used in the cities and towns of Ontario, and in many of the centres of the Middle West and Eastern States.

With modern equipment and a full range of papers and other printing materials, we are in a position to do your work well and expeditiously and at

Prices that are Right

OBITUARY.

JAMES ENGLISH.

The death of James English occurred Tuesday morning at the home of his brother R. H. English. The deceased was 67 years of age, and came here from Manitoba a few months ago suffering with asthma and heart trouble.

Besides the bereaved widow, who accompanied him to Summerland, there is left one son, Alex, and a married daughter, both living in Manitoba. The remains are being taken east for interment, accompanied by the widow and son, the latter coming from the prairie provinces for that purpose.

PRETTY CHURCH WEDDING

Newton-Ritchie Nuptials Celebrated on Wednesday.

A very pretty wedding took place on Wednesday last at St. Andrew's Church, when Miss Margaret (Peggy) Ritchie, eldest daughter of Mr. and Mrs. John S. Ritchie of this place became the bride of Mr. Ben Newton, also of Summerland.

The Church had been beautifully decorated for the occasion, yellow and white being the chosen colors, the bridal party standing under a huge bell of Oregon grape suspended from which were streamers of yellow and white crepe paper, while baskets and bowls of sunflowers along with greenhouse plants made a brilliant and artistic background.

The bride entered the Church on her father's arm to the strains of the Wedding March played by Mr. T. P. Thornber. The Rev. W. A. Alexander was the officiating minister and the attendants were Harry Thornthwaite, the groomsmen, and Miss Jean Ritchie as bridesmaid. The bride looked very sweet in a simple gown of white crepe de chine trimmed with fruit embroidery and crystal beads with lovely veil of Brussels net and wreath of orange blossom.

While the register was being signed, Mr. Beavis sang "Love's Devotion" very acceptably.

There was a reception in the hall adjoining the Church and over 60 guests extended congratulations to the happy couple. Before sitting down to a sumptuous supper the usual toasts were proposed, that of the bride being given by the Rev. W. A. Alexander and replied to briefly by Mr. Newton.

The happy couple left later on to board the boat at Penticton for Wallaheia and Coast cities, the bride travelling in a smart tweed suit and a becoming grey and pink hat. They received a cordial send-off from the assembled company, who afterwards returned to the hall and spent a happy social and musical evening.

WERE MARRIED AT KALEDEN

Hatfield-Little Wedding at the Home of Groom's Grandparents.

The marriage of Miss Grace Hilda Little, of Staines, Surrey, England, to Charles Lee Hatfield, Summerland, B.C. was solemnized on Wednesday, the 20th inst. at the home of the groom's grandparents, Capt. Chas. and Mrs. Hatfield, Kaleden, by the Rev. James Dunlop, Summerland.

The bride wore a dress of maize satin with an overdress of georgette crepe of the same color, softly relieved by an embroidery of delicate pearls. She carried a very pretty bouquet of freesias, pink carnations and ferns.

The wedding room of the Hatfield home had been prettily decorated for the occasion. Deft hands with simple art had gathered the wild flowers which make Kaleden the "beautiful garden" and framed them into a little garden bower for the wedding ceremony. The pink blossoms of the peach trees commingling with the cherry blossoms around the little lawn which was bathed in sunshine, gave an idyllic and poetic touch to the surroundings.

After the ceremony, lunch was served in the home. The guests who had gone from Summerland waited until the newly-weds sped off to spend their honeymoon camping somewhere beyond human ken.

WEDDINGS.

HATFIELD-LITTLE.

At Kaleden, B.C., April 20th, by the Rev. James Dunlop: Grace Hilda Little, of Staines, England, to Charles Lee Hatfield, of Summerland, B.C. At Home after May 15th, Beach Avenue, Summerland.

Summerland Band is arranging to give a dance in the College Gym. on the evening of May 24th.

Vancouver.—Greater Vancouver's population increased by 14,900 last year, making a total at the present time of 123,050. The death rate in 1920 was 13.18 per thousand, a decrease of one per cent., and the birth rate 27.25 per thousand, an increase of three per cent.

Passing Events: Social, Personal, &c.

Miss Stella Thompson of Calgary is the guest of Mrs. G. S. Drewitt, having arrived on Wednesday.

Mrs. Ernest Graham and her little son Glennie, came down from Kelowna a few days ago to visit Mrs. K. S. Hogg.

The Steuart Fruit Company has shipped several carloads of apples recently. These were stored in the Empire Hall block.

The Hospital have on hand a considerable number of fruit sealers belonging to the community, which the owners can obtain by calling for them.

Walter J. MacDowall, general manager of the O.U.G. accompanied by his wife and family, left on Wednesday for a three months holiday in the Old Country.

W. Arnett, who has been here for the last few days on business connected with his orchard property, left on Thursday morning to return to Dauphin, Man.

Mr. and Mrs. E. N. Rowley plan on leaving here shortly for a visit to Mr. Rowley's home in England. They will motor to Montreal, and will take their car across with them, as they desire to have it with them in England.

The Treasurer of the Summerland Hospital Society acknowledges receipt of the sum of \$73.40 from the Choral Society, proceeds of the cantata recently given. This is given towards the furnishing of the nursery in the new hospital.

The ice cream parlor, soda fountain and restaurant business known as "The Better 'Ole" has been repurchased by Scott Darkis from J. L. Crego. Mr. Darkis states that it is his intention to give the best possible service and to make his ice cream parlor a pleasing retreat for shoppers and others.

Prin. S. A. MacDonald of the Central School has bought the McIntyre cottage just east of the new hospital, Mr. McIntyre having purchased the Cox property in Victoria Gardens, to which he will be removing in a few days. Prin. D. J. Welsh of the High School will occupy the Watson cottage when it is vacated by Prin. MacDonald.

Last Friday evening the members of St. Andrew's Church Choir and a few friends presented Miss Peggy Ritchie with a dinner set. At the same time a pleasant social evening was spent. The bride-elect has been a member of the choir for some years, and since his return from overseas, Mr. Newton, the groom, has also been a member.

Wm. Beattie has bought the 10 acre lot in Garnett Valley until now owned by Mrs. V. T. Eagle of Victoria, the transfer having been made by G. H. Inglis & Co. The same local real estate office made the sale of the McIntyre property to Mr. S. A. MacDonald noted elsewhere in these columns. The sale of the Davidson property reported last week was also made by G. H. Inglis & Co.

A deanery meeting of the Anglican Churches of the Okanagan Diocese covering the territory from Revelstoke to Penticton was held here on Tuesday and Wednesday of this week. Public meetings were held on Tuesday morning and evening and on Wednesday morning. Among the visiting clergymen were Bishop Doull, and Rectors Grettton of Revelstoke, Stewart of Ducks, Cheffshire of Salmon Arm, and Despard of Oyama. On Tuesday afternoon Bishop Doull gave an address on "Church Union" at a meeting in the Parish Hall, attended by the ministers of the several local churches and a number of citizens interested in this subject.

Hilton Snider went into the hospital at Kelowna this week for a nasal operation by Dr. Herald, specialist.

See A. G. Parker if you intend buying a car. He will save you money. See adv. on page four.

Thos. Figgis is building a bungalow on his orchard property, formerly the Moreland orchard, lying east of H. G. Fisher's property.

C. J. Duncan has bought the fruit shipping business of the Naramata Fruit Co., and has also taken over the orchards which that company has been working.

A slide on Tuesday on the Peachland road a short distance north of Crescent Beach interfered with traffic for a short time. The road was cleared under the direction of the new foreman, J. C. Arkell.

In the Empire Hall last Thursday evening a very pleasing concert program was given by Penticton artists under the auspices of the Summerland Orange Lodge. The proceeds of the entertainment were in aid of the True Blue Orphanage in Vancouver.

A. Davidson left last week for Regina, Sask., by auto. He was accompanied as far as Grand Forks by Mrs. Davidson and daughter Audrey, who later returned to Summerland by train. Mr. Davidson was one of the first through the Crow's Nest pass this year by motor. He reports some snow in the pass, elsewhere the roads are in fairly good shape.

Under the auspices of the United Farmers of British Columbia Mr. W. C. Kelley delivered his splendid lecture on Victor Hugo's famous character, Jean Valjean, at the Trout Creek school house on Tuesday evening last. This was greatly enjoyed by the citizens present. A collection was taken on behalf of the Summerland Hospital and after expenses were paid a cheque for \$5.67 was forwarded to the secretary.

No action will be taken till next fall at least to launch the co-operative store scheme. The committee comprised of Messrs. Helmer, Logie, Bentley, Nixon, and Mrs. Pentland, appointed at a recent meeting called to consider this subject, have completed their report. While not discouraging the idea of a co-operative store, the committee, in view of the unsettled business and financial conditions, does not consider the present time a favorable one for starting a new venture, and suggests that the matter be laid over until next fall.

Two local men, M. S. Peacock and W. J. Robinson are among the principals in a new company now being organized to be known as the Penticton Sawmills, Ltd. This company will take over the mill and plant of the Lear Lumber Co. and has secured some ten million feet of standing timber near Naramata. Mr. H. Lear and former associates will be identified with the new concern. Mr. Peacock will take charge of the manufacturing end of the business. We understand it is the intention of the company to manufacture box and building material, and to deal in fuel.

Coming Events

Notices under this heading are inserted at 3 cents a word; Each repeat, 2 cents a word; minimum charge, 50 cents. Contract rates on application.

A community bazaar in aid of the Hospital in Empire Hall on Thursday, April 28th. Tea and supper will be served.

Penticton Aquatic Association, Limited. Season Opens on May 1st and Closes on Sept. 30th.

OPENING DANCE ON MAY 6th.

Admission, \$1.00 each, Including Supper. The first Fortnightly Dance will be held on May 13th, and every fortnight thereafter during the season. RATES FOR NON RESIDENTS: Family Tickets \$5.00 Single Tickets \$4.00 Admission to the fortnightly dances will now be restricted to MEMBERS ONLY. No admission by payment.

List your car for sale with A. G. Parker. He will sell it for you. 38

Col. and Mrs. Cartwright entertained a number of friends last Tuesday evening in celebration of the tenth anniversary of the wedding of their daughter, Mrs. O. F. Zimmerman.

Dr. Windeler returned this week from a visit to the Coast. He has decided to move to Buckley Valley, in the new north country, believing the new territory offers a good opening for a young man.

The Women's Missionary Societies of the four local churches held united missionary meetings on Tuesday afternoon and evening, the first in the Lakeside Church and the second in the Parish Hall, the speaker on both occasions being Miss Campbell, travelling secretary of the Zenana Missions.

DECLARES UNIONS RUN BUSINESS

Attack by Lorne Campbell on Plans of B.C. Telephone Company to Raise Rates.

Nelson.—A slashing attack on the B.C. Telephone Company for applying in the Kootenay a wage scale framed to suit Vancouver was made before the Railway Commission here by Lorne Campbell, general manager of the West Kootenay Power and Light Company, representative of the Rossland Board of Trade. Mr. Campbell declared that rather than being entitled to ask for an increase the Company should be making a reduction in rates.

If mining and smelting had to pay overtime on each shift, the country would not last four months. The cost of living had come down 26 per cent. in the Kootenay, and the Telephone Company should recognize this fact. Mr. Campbell said the contention of the Company that its wage scale could not be revised was not sound. The fact was, it did not control its business, but let the unions run it, and the upper country was made to suffer for this. He made a decided comparison of the Consolidated Mining and Smelting Company's scale with that of the Telephone Company.

T. A. Robley, for the Trail board, supported the Rossland board. Commissioner Carvell stated he would require the Telephone Company to answer "the very practical case submitted by Rossland," and would require it to show what proportion its Kootenay wage cost bore to the Company's total wage cost.

Women's Missionary Convention Here

The fourth annual meeting of the Kamloops Presbyterial of the Women's Missionary Society, Presbyterian Church of Canada, Western Division, met in St. Andrew's Church here on Wednesday and Thursday, April 13th and 14th.

This organization has been in existence but four years, a mere child, but active and vigorous. Twelve out of the fourteen societies within the Kamloops Presbyterial were represented at this gathering. Reports were good; membership had increased and givings were well in advance of previous years. The speaker at the afternoon sessions was Miss McGregor of Toronto, travelling secretary and organizer for the West. Both addresses, one on Home and the other on Foreign Missions, were very inspiring and left no doubt in the minds of the audience as to the need and worthiness of the cause.

The morning sessions were given up to reports of all the departments of the work, such as care of strangers, sending of literature to lonely ones in this presbytery, distribution of the Missionary Magazine, the Home Helpers, etc.

On Wednesday afternoon greetings were received from the Presbytery, given by Rev. W. A. Alexander; from the Provincial Secretary of the W.M.S., and from the sister societies in Summerland, Mrs. Solly representing the Anglicans, Mrs. Broad the Methodists, and Mrs. Coulter White the Baptists.

Mrs. Inglis, the retiring president, in her address urged all to increase their giving as the amount necessary for exchange alone over and above salaries and supplies for foreign countries was over \$50,000.

Mrs. S. A. MacDonald sang "Leave it With Him," a little poem by Rev. E. B. Miner. Her sweet voice and clear enunciation made it very impressive.

On Thursday afternoon Miss Susie Whiteford played a violin solo of sacred music, which was very much appreciated.

Before giving the closing words Miss Sinclair on behalf of the Presbyterial presented Mrs. Inglis with a Life Membership.

The pageant on India, given by Miss Sinclair and St. Andrew's Church Mission Band, was very much appreciated by the visiting members. Indeed, Summerland's kindness and hospitality will long be remembered by the Kamloops Presbyterial. \$26.50 was realized for the Chinese Famine Fund.

E. THOMPSON, Secretary.

Mr. and Mrs. T. Rumball arrived in Summerland a few days ago from Bowden, Alberta. They have come with the intention of making their home in Summerland, and are at present living at the home of their son, L. W. Rumball.

Tailoring

Where a High Standard Holds

The selection of material for suit or overcoat is important. The best work of designer and workmen may be spoiled through poor taste shown in material made up.

We can always help in a selection, and our range of materials is of a size to give the widest choice.

But all other things being equal, it is the skill shown in designing and workmanship that makes or mars the suit.

The House of Hoberlin is justly credited with fixing the standard for high-grade tailored - to - order clothes.

It is the fit and finish of all garments carrying the name of this House that has given the House first place in all parts of Canada for ideally built clothes—always made - to - measure—always high grade.

Sole Agent for: Hoberlin Tailoring

The Man Who Saves You \$ \$ \$ —Two Stores— Summerland and West Summerland

It's Up To You Mr. Fruit Grower!

Recognizing its great value to the community as a whole, business men as well as fruit growers, the Summerland Board of Trade has gotten solidly behind the

Summerland Apple Show

and has determined that the 1921 Show shall be the best of all the splendid fruit and vegetable exhibits held in Summerland—and that means in all B.C.

That is, the Board of Trade, operating with the Show Directors, has determined this provided—

The proviso is that every grower of fruit and vegetables pledge his or her support.

The Decision Will Soon Be Made.

A strong committee of boosters is out to canvass the district and to get the co-operation of you and your neighbors. You see

It's Up To You.

Be ready for the canvasser, or—should he miss you—communicate with our Secretary, John Tait.

Summerland Agricultural Socy.

Naramata News

Current Events of Town and District

HYDRO-ELECTRIC LIGHT AND POWER IN NARAMATA BY SEPTEMBER.

Mr. J. M. Robinson, who has been unremitting in his efforts to forward the project of a hydro-electric light and power system for the Valley, has now obtained a definite undertaking with regard to getting this service for Naramata. Mr. Robinson had an interview with Mr. Lorne Campbell, the manager of the West Kootenay Light and Power Company last Wednesday. It has been suggested and generally understood that the West Kootenay Company would supply Pentiction and that Naramata would obtain its supply from Pentiction. Mr. Robinson, however, put to Mr. Campbell the suggestion that "the Company give this district direct service, and after a full discussion of the question, Mr. Campbell agreed that the quickest way to assure the service to the Naramata people was for the Company to take the power off the Pentiction line at Four Mile Creek, and carry a secondary line on their main line poles through Naramata. This service will be available in September, so the Naramata people may get busy wiring their houses.

DEAN COLEMAN AT NARAMATA.

Dean Coleman, of the University of B.C., lectured in the Naramata Church on Saturday evening on National Ideals of Education. He emphasized the influence of environment on the development of personality, using the comparison of the iceberg, seven-eighths submerged and one-eighth showing above the water, to illustrate his claim that while direct teaching of ordinary school subjects was directed to the smaller part, the conscious self, the greater part of the personality—the sub-conscious self—was being played upon unconsciously by many surrounding influences. In this regard he pointed out the value of pictures, music, and the drama. The speaker ended his lecture by reading an allegory depicting Democracy teaching a school composed of the various sections of the Community, which with its pointed analogy and happy humour, brought home more completely the points of the lecture.

The lecture was held under the auspices of the Women's Institute, Mrs. M. B. Smith taking the chair. A vote of thanks to the speaker was moved by Mrs. Ameron, and seconded by Mrs. Allen.

Dean Coleman announced in the course of the evening that though the appropriation for the extension committee had been cut off for the ensuing year, that the University still hoped to keep up these lectures as a means of keeping in touch with the people.

Mr. Duke and his second son Robert arrived in Naramata on Friday evening last. On the same boat Mr. Duke brought six fine cows. Mr. Duke is a veterinary surgeon, and his services in this line will no doubt be of value to the district.

Summer sports will begin in Naramata on Thursday afternoon, when the N.G. & A.A. intend playing baseball and football on the sports ground opposite the school. It is hoped there will be a good turn out of the young people.

NARAMATA SCHOOL LIBRARY.

Contributions to the Naramata school library have been made by the following: Mr. Bruce Cash, Mr. T. H. Rayner, R. H. King, W. S. Young, Miss M. S. Gordon, Mrs. M. M. Allen, E. H. Hancock, J. M. Myers, J. H. Rounds, James Young, J. E. Smith, Captain Languedoc, Mr. Partridge, Mr. Munro, Mr. Littlejohn, Mr. Mitchell, Mr. Gammon, F. W. Rolt, C. C. Aitkins, Captain Lawrence, M. Block, Mrs. Bailey, Mrs. Morrish, Mrs. Amerson, Mrs. Mallory, Mrs. May, Mr. Wollstencroft, J. M. Robinson, W. A. Robinson, Mr. Stanley Dicken, Mr. Bartlett, Mrs. McConkey, Mrs. Hughes, Mrs. Rushberry, Mr. Ritchie, Mrs. Mark Manchester, Geo. Weaver, Mrs. Routh, Hilton Snider, L. T. Baker, H. A. Mitchell, Mrs. Harold Lea, Mr. Hardman, Mr. Fred Manchester.

The committee are much gratified with the ready and generous response made by the community to the request for funds for the starting of a library. Many \$5.00 subscriptions were given, and many valuable contributions of books were made. These were, in many cases, gifts of valuable sets of volumes of standard works, or of specially compiled children's books.

The committee would like it understood that though they started out to canvass the whole community they were not able to see everyone; so there are many names missing from the list given above, who would have subscribed if given the same

opportunity. They would, therefore, ask those not yet called on to leave their contributions with Mr. Bartlett at the Post Office this week if possible, as they intend closing the list, and starting the purchasing of books shortly.

Mr. Cross, who some time ago bought the Maybelle Ranch, arrived in Naramata last Friday evening, his wife and children staying for a few days in Kelowna, and coming in on Monday evening. Mr. Cross's carload of household effects also arrived on Monday. The family for the present intend living in the Russell Wells house, and will later build on their ranch.

Mrs. Goldsmith, of Vancouver, arrived in Naramata on Tuesday, to spend some time with her daughter, Mrs. Bruce Cash.

Mr. Lumsden, of Vancouver, spent a short time last week looking over his property here. He is hoping to build soon, and bring here his son, who is in bad health at present.

Bishop Doull is again in the district, carrying on further negotiations regarding the acquirement of the Naramata hotel property.

A merry children's party took place at "Rekadom" last Saturday afternoon, when Mrs. C. C. Aitkins entertained some of the smaller children in honor of the 4th birthday of

her little son Colby. The children report having spent a very happy afternoon.

Mr. J. W. Wheeler, manager of the Summerland Lumber Company, was in Naramata on Monday.

The Naramata Gymnastic and Athletic Association held a dance on Tuesday in the Fruit Union hall. Mr. and Mrs. Manchester and Mr. Stanley Dicken supplied the music, and the girls of the Association served refreshments. A pleasant evening was passed by those present, and a considerable sum was added to the funds of the Association.

Mr. Teddy Senior, of Victoria, is visiting Mr. Frank Hughes. He intends spending the summer here.

Mr. Dan MacKay bought recently another piece of property consisting of an acre on Robinson Avenue, behind the Ranch cottage. Mr. MacKay is having the property cleared.

Mr. Hilton Snider left on Tuesday morning for Kelowna where he will be operated on by Dr. Wilson Herald at the Kelowna Hospital.

Mr. Bud Rounds has purchased a new Ford truck, and will carry on a general transfer business.

Miss Margaret Weller was much gratified at the receipt of a gift of money recently from the Women's

CANADIANIZING THE FOREIGNER.

The problem of Canadianizing the foreign born is a serious one in every province of the Dominion. In Saskatchewan the Canadian born population is estimated at only 54.5 per cent. of the whole, and the provinces of Alberta and Manitoba have about the same proportion of native born population. In British Columbia, while the proportion of the native born is larger the problem is made even more difficult by the fact that the foreign population is composed principally of Orientals whose standards of civilization are totally at variance with those of the Anglo-Saxon.—Canadian Municipal Journal.

A SHATTERED ROMANCE.

The motorist mopped up another mile of dusty road, turned a corner, and came upon a delightful little inn. He promptly dismounted and called for a drink.

"Wait a minute and I'll get you another mug. That's Geraldine's," the boy told him.

"I don't mind," said the customer, and drained it off. "I'm proud to drink from Geraldine's mug. She's your sister, isn't she?"

"No," said the boy. "She's our dog."—Ottawa Journal.

Institute members to help her replace a coat lost in the recent Naramata fire. She would like to express her appreciation of the kindness of these members.

The Ladies' Aid Society spent a very pleasant afternoon last Wednesday at the home of Mr. R. H. King.

Mr. Lloyd George visited Birmingham and received the freedom of the city. The Premier delivered an important speech chiefly with regard to the revision of the peace treaties.

OLDSMOBILE FOUR

The Car that is taking America by storm.

EVERY INCH AN ARISTOCRAT

The Highest Powered, Most Reasonable Priced, Snappiest Appearing, Four Cylinder Car in the Market To-Day.

Mr. T. B. Young,
West Summerland.

Dear Mr. Young,

In reply to your letter enquiring as to whether I am satisfied with the Oldsmobile car you sold me recently, and my opinion of it, I can assure you that I am delighted with it. For power, for riding ease, for room and general comfort, as well as in detailed attention to finish, this car in my opinion equals, if it does not excel any car in its class of which I have experience, and is certainly ahead of some cars of decidedly higher cost.

At the present time I have only run some eight hundred miles, but the engine is satisfactorily "run in," and I have no doubt from its general behaviour that the car will stand up.

If this expression of my opinion is of any use to you, it is quite without prejudice, and you are welcome to use it in any way you please.

Yours truly,

Summerland, April 13, 1921.

G. R. HOOKHAM.

WATER NOTICE.

(Use and Storage).

TAKE NOTICE that Naramata Irrigation District, whose address is Naramata, B.C., will apply for a licence to take and use 1,500 acre feet and to store 1,000 acre feet of water out of North Fork, Lequime Creek, also known as Chute Creek, Shoot Creek, and Wild Horse Creek, which flows west and south and drains into Okanagan Lake on or near Lot 212, Group 1, Osoyoos Division of Yale.

The storage dam will be located at a point 1 1/4 miles due west of 12 M.P. Lot 2711. The capacity of the reservoir to be created is about 800 acre feet, and it will flood about 80 acres of land. The water will be diverted from the stream at a point about three miles west of 12 M.P., Lot 2711, and will be used for Irrigation, Domestic and Power purposes upon the lands described as District Lots 156, 206, 207, 209, 210 and 211, and 266, and Blocks 205, 221, 222, 223, 245 and 247 of Registered Plan 661 and part of District Lot 286, a full description of which is given below.

This notice was posted on the ground on the Seventeenth day of March, 1921.

A copy of this notice and an application pursuant thereto and to the "Water Act, 1914," will be filed in the office of the Water Recorder at Fairview, B.C.

Objections to the application may be filed with the said Water Recorder or with the Comptroller of Water Rights, Parliament Buildings, Victoria, B.C., within thirty days after the first appearance of this notice in a local newspaper.

The description of territory to be served is as follows:— District Lots 156, 206, 207, 209, 210, 211 and 266, and Blocks 205, 221, 222, 223, 245 and 247 of Registered Plan 661, and that part of District Lot 286 described as follows: Commencing at the intersection of the northerly boundary of said block 245, R.P. 661 with the easterly boundary of District Lot 286; thence along the northerly boundary of said block 245 to the north-west corner of the said block; thence south 59 degrees 28 minutes west a distance of 2 chains 34 8-10 links; thence south 82 degrees 25 minutes west a distance of 1 chain 17 4-10 links; thence north 1 degree 58 minutes west 87 links; thence north 78 degrees 5 minutes west 2 chains 65 9-10 links; thence north 54 degrees west 3 chains 82 3-10 links; thence north 9 degrees 14 minutes east 82 4-10 links; thence north 56 degrees 44 minutes east 4 chains 65 6-10 links; thence north 35 degrees 53 minutes west 90 links; thence north 54 degrees 13 minutes east 12 chains 10 1/2 links; thence south 7 degrees east 1 chain 95 2-10 links; thence south 28 degrees 30 minutes east 1 chain 75 3-10 links; thence south 52 degrees 9 minutes east 5 chains 5 1-10 links, more or less, to the east boundary of said Lot 286; thence southerly along the said boundary to the point of commencement.

NARAMATA IRRIGATION DISTRICT, Applicant. F. H. Rounds, Agent. The date of the first publication of this notice is April 1st, 1921.

WATER NOTICE.

(Storage).

TAKE NOTICE that Matt G. Wilson whose address is Paradise Wharf, Naramata P.O., B.C. will apply for a licence for the storage of 200 acre feet of water out of Chute Lake and Chute Creek, also known as Lequime Lake and Lequime Creek which flows South West and drains into Okanagan Lake, about 500 feet from North West corner of Lot 212, Group One, Osoyoos Division of Yale District.

The storage dam will be located at the outlet of Chute Lake. The capacity of the reservoir to be created is about 200 acre feet, and it will flood about ten acres of land. The water will be diverted from the stream at a point about 1 mile East of Outlet of Chute Creek and will be used for domestic and irrigation purposes upon the lands described as Lots 86s and S.L. 18 in Block 2711.

The licence applied for is to supplement a right to take and use water as per conditional Licence No. 1876.

This notice was posted on the ground on the Seventeenth day of March, 1921.

A copy of this notice and an application pursuant thereto and to the "Water Act, 1914," will be filed in the office of the Water Recorder at Fairview, B.C.

Objections to the application may be filed with the said Water Recorder or with the Comptroller of Water Rights, Parliament Buildings, Victoria, B.C., within thirty days after the first appearance of this notice in a local newspaper.

MATT G. WILSON, Applicant. By Naramata Irrigation District, Agent. per F. H. Rounds, Trustee. The date of the first publication of this notice is April 1st, 1921.

WANTS ORIENTAL ORCHARD INFLUX STOPPED

Elimination of White Race on Pacific Coast Will Happen Otherwise, Says Visitor.

Asiatic Question in Victoria and Okanagan is Growing Serious.

"It's a matter of life and death for our civilization to exclude Orientals of all kinds from this continent," stated Mr. Paul Finlay, of the California Fruit Growers' Exchange, in discussing the Oriental problem before the provincial growers' convention at Vancouver last week. The problems in the United States were the same as those of Canada in this regard, except that in addition they had the Negro problem. Mr. Finlay advocated that in America they get rid of the Asiatic, who would drive the white man out, not because they did not respect and admire their virtues which were outstanding, they being highly civilized people, and with education and opportunity splendid citizens, but the white race and the colored races simply could not blend satisfactorily.

Canada and the United States required immigrants who in two generations would be indistinguishable from the rest of the population, he said. If the Oriental menace was not stopped, in his view there would be millions of Orientals on the Pacific coast within two generations, and they would never be dislodged. He went further, and asserted that this advance guard for the millions of Asia would ultimately, by direct competition, eliminate the white race.

Following the lecture Mr. Finlay was asked about the white interests in the Orient. He said that these would have to be removed; their continuance was not as important as the preservation of this continent for the white race.

Dealing especially with conditions in this country, some of the members stated that conditions for grocers in Victoria had become desperate, the Japanese and Chinese being ten per cent. of the population and a tremendous power in business.

Mr. A. E. Howse, Princeton, warned the gathering that the Okanagan was confronting a Japanese question of increasing magnitude.

A convention at which the federal members could be present to agitate for total Oriental exclusion from Canada was proposed by several speakers. It was pointed out that the matter was a federal affair, and that apart from British Columbia and Alberta, the rest of the country was utterly indifferent.

Railways intend to initiate Day-light Saving on May 1st this year, according to an announcement just made.

ORCHARD CULTIVATION

By W. S. Blair, Supt. Experimental Station, Kentville, N.S.

It is a well known fact that growth in the orchard tree is made during the months of June and July, after which the growth fills out and ripens. It is also known that early cultivation stimulates growth. The loosening up of the earth aids in the warming of the soil and makes it possible for soil organisms which liberate plant food to become active earlier; air will penetrate better and these organisms will become to a greater depth than if cultivation is not given. Hence the importance of early spring cultivation to furnish suitable soil conditions for the tree and the organisms upon which the tree is dependent for the liberation of plant food.

Uncultivated areas may be made suitable for the tree by supplying nitrogen in an available form early through the use of Nitrate of Soda and by using a mulch to conserve moisture, but on the whole the practice most suitable for general orchard areas is early cultivation followed by frequent cultivation at intervals of a week or ten days to the middle of June or July 1st, after which orchard cultivation should cease.

The first cultivation may be shallow plowing, four to five inches deep, after which surface cultivation with the disc and smoothing harrow to maintain a surface mulch of fine earth is all that is required. Deep cultivation is not desirable, as the feeding roots naturally grow in the surface soil and deep cultivation may injure them. Shallow cultivation prevents the formation of a surface crust; thus checking excessive evaporation of moisture and retaining it for continuous growth of fruit, and insuring a proper moisture supply for the tree later in the season. As soon as the ground is dry enough after rain it is wise to start the harrow, producing thereby a dust mulch.

After the middle of June a cover crop should be seeded to occupy the ground during the fall; take up excess plant food, and develop humus for the following spring. The com-

mon vetch seeded at the rate of 1 1/2 bushels per acre is the best cover crop. This plant can extract nitrogen from the air and increase the store of nitrogen as a result. This crop makes vigorous growth on most soils but will do better if the soil is limed. It is a crop fairly easily turned under and it is satisfactory at picking time, as it flattens down after making considerable growth. This cover crop may be plowed under in the fall or not until the following spring, but the usual practice is to fall plow and work with the disc harrow in the spring, which is considered the best method.

The area close to the base of the tree looks better if kept well cultivated, but the cultivation of this area is not necessary and very often much injury is done to the main roots from plowing too deeply close around the tree. It usually is better to leave this space untouched and keep the grass cut to give a neat appearance.

The domestication of Karakul sheep, which supply Persian lamb skins, as well as mutton and wool, has proven a success in the province of Saskatchewan.

Wholesale Arrests Canadians With Coughs

Halt! Who goes there? Someone with a cough. Pass friend! Stop cough! you are under arrest. Thousands of such arrests are being made every day in all parts of Canada. Too long have coughs and colds evaded justice and caused untold suffering to humanity, but at last they have been cornered and overpowered by Canada's famous cough detective—Buckley's Bronchitis Mixture. Did you ever hear of this wonderful remedy? Why, everybody is talking and writing about the great work it is doing in curing coughs, colds, bronchitis, asthma, etc.

The following is one of thousands of letters received:—'Kindly accept my sincere thanks for the benefit my wife derived by the use of one of your bottles of Bronchitis Mixture. For over thirteen years she has suffered acutely. After spending dollar after dollar upon various remedies, no relief was obtained. Hearing of your most marvelous remedy she decided to give it a trial and I am glad to say one bottle has made her well. You are at liberty to use my name and should be only too pleased to answer any inquiries. Sincerely yours, John Holmes, Yorkville Ave.' The original of this letter may be seen at W. K. Buckley, Limited, 142 Mutual St., Toronto. Don't allow a cough or cold to linger with you. Away with it! Hail Buckley's Mixture and have cough arrested. This remedy never fails. On every bottle is a guarantee to refund the money if not satisfactory. Delays are dangerous. Order now from your Druggist.

Synopsis of Land Act Amendments

Minimum price of first-class land reduced to \$5 an acre; second-class to \$2.50 an acre. Pre-emption now confined to surveyed lands only.

Records will be granted covering only land suitable for agricultural purposes and which is non-timber land.

Partnership pre-emptions abolished but parties of not more than four may arrange for adjacent pre-emptions with joint residence, but each making necessary improvements on respective claims.

Pre-emptors must occupy claims for five years and make improvements to value of \$10 per acre, including clearing and cultivation of at least 5 acres before receiving Crown Grant. Where pre-emptor in occupation not less than 3 years, and has made proportionate improvements, he may, because of ill-health, or other cause, be granted intermediate certificate of improvement and transfer his claim.

Records without permanent residence may be issued, provided applicant makes improvements to extent of \$300 per annum and records same each year. Failure to make improvements or record same will operate as forfeiture. Title cannot be obtained in less than 5 years, and improvements of \$10 per acre, including 5 acres cleared and cultivated, and residence of at least 2 years are required. Pre-emptor holding Crown grant may record another pre-emption, if he requires land in conjunction with his farm, without actual occupation, provided statutory improvements made and residence maintained on Crown granted land.

Unsurveyed areas, not exceeding 20 acres, may be leased as homesteads; title to be obtained after fulfilling residential and improvement conditions. For grazing and industrial purposes areas exceeding 640 acres may be leased by one person or company. Mill, factory or industrial sites on timber land not exceeding 40 acres may be purchased; conditions include payment of stamp duty. Natural hay meadows inaccessible by existing roads may be purchased conditional upon construction of a road to them. Rebate of one-half of cost of road, not exceeding half of purchase price, is made.

PRE-EMPTORS' FREE GRANTS ACT

The scope of the Act is enlarged to include all persons joining and serving with His Majesty's Forces. The time within which the heirs or devisees of a deceased pre-emptor may apply for title under this Act is extended from one year from the death of such person, as formerly, until one year after the conclusion of the late war. This privilege is also made retroactive.

No fees relating to pre-emptions are due or payable by soldiers on pre-emptions recorded after June 26, 1918. Taxes are remitted for 5 years. Provision for return of moneys accrued, due and been paid since August 4, 1914, on account of payments, fees or taxes on soldiers' pre-emptions. Interest on agreements to purchase town or city lots held by members of Allied Forces is deferred; acquired direct or indirect, remitted from enlistment to March 31, 1920.

SUB-PURCHASERS OF CROWN LANDS

Provision made for issuance of Crown grants to sub-purchasers of Crown Lands, acquiring rights from purchasers who failed to complete purchase, involving forfeiture, on fulfillment of conditions of purchase, interest and taxes. Where sub-purchasers do not claim whole or original parcel, purchase price due and taxes may be distributed proportionately over whole area. Applications must be made by May 1, 1920.

GRAZING Grazing Act, 1919, for systematic development of livestock industry provides for grazing districts and range administration under Commissioner. Annual grazing permits issued based on numbers ranged; priority for established owners. Stock owners may form associations for range management. Free, or partially free, permits for settlers, campers or travellers, up to ten head.

COUNCIL HOLDS EXTRA SESSION

(Continued from Page 1).
en to submit by-laws to the rate-payers to authorize extending the irrigation service to that part of the Morningside district now demanding water, and to make an extension of the ditch service on Jones Flat as proposed by the water committee, and also to remedy the extremely unsatisfactory condition with respect to the pipe lines serving the front benches. With regard to the latter it was discovered last summer that a 6 inch pipe from the tank house at Dale's corner to a point below the power dam serves two pipes of like size running from the latter point. This explained the very unsatisfactory service given the country south of the gulch road served by one of the pipes, and the Hospital hill and Peach Orchard districts served by the other. Possible relief of a temporary nature was suggested by Coun. Kirk, who thought one of these pipes might be served through a closed flume built from the tank house to the power dam. Further information as to the cost of these improvements will be required before action is taken.
As noted elsewhere in these columns, a tax rate of 43 mills was struck, the penalty of 15 per cent. for non-payment as fixed by the Provincial Statute being divided into two additions to the tax rate 10 per cent. to be added on October 1st, and 5 per cent. on November 15th.
The Council agreed to sell to J. C. Freeman a building lot owned by the Municipality and lying immediately north of Mr. Freeman's home property, the price being \$350.

A Japanese baron visited the University of California, and on leaving was put aboard a party filled local car.
At a junction the party transferred to a much crowded through car. Japanese courtesy weathered the test so far as matters went, but the baron could not resist the question, "Why do we leave the comfortable car for this one which is so crowded?"
He was told, "Oh, we save two minutes getting into San Francisco."
"Ah," said he, "and what will we do with the two minutes?"

SAYS: CLEAN UP SUMMERLAND

(Continued from Page 1).
cattle ranches of the district, Mr. Helmer claimed that he might reasonably have an interest in the welfare of the district. What he wanted was a practical campaign to clean up the towns. If the business sections inaugurated a movement to tidy their buildings and surroundings, the farms would follow. Trees and shrubs would come later. Mr. Helmer looked upon town cleaning as an investment and regretted the seeming indifference which would permit a tree on the roadside which had been tilted over by some vehicle to remain in that condition for months.
Referring to recent criticism he said that public lavatories were needed at Summerland and West Summerland in inconspicuous places.
He ridiculed the past efforts at organization for fire protection, stating that some day there would be a fire when business men would wish they had been better organized.
The speaker suggested that the idea adopted at Chilliwack, when a civic hall was needed, that prizes won at the fall fair be pooled for the purpose of starting a civic improvement fund. He did not think many fruit growers would turn this suggestion down.
Mr. Helmer closed by urging that a general cleaning up and tidying be carried through before a start was made in beautifying by way of putting out shrubs, trees, etc.

Ten new members were admitted to the Board.
Victoria Chamber of Commerce, outlining a plan for a memorial avenue in the Capital city along which trees would be planted, one for each B.C. citizen who fell in the great war, whether a member of the C.E.F. or Imperial Forces. The Summerland Board of Trade was asked to forward a complete list of Summerland men who made the supreme sacrifice, and such a list was promised the secretary by J. S. Ritchie.

Chairman J. Tait of the civic improvement committee reported that the committee had not yet held a meeting.
On the suggestion of J. Tait who explained the situation, the Board heartily endorsed the suggestion of a change in the location of the lake shore road near Trepanier wharf. At that point the road turns at right angles, and cars going north turn to a steep grade. With the proposed change the grade will be lessened and the sharp turn eliminated.
The matter of the civic clean up was left with the civic improvement committee with power to act.
President J. C. Freeman occupied the chair.

HEAR APPEALS ON WATER RATES

(Continued from Page 1).
lot on Paradise Flat appealed on the grounds that his irrigation acreage did not exceed 7 acres. Upon recommendation of some of the board it was agreed to reduce the charge to 8 acres.

Reduction was made in the charge for a second connection given Jas. Shepherd.
W. C. W. Fosbery appealed against a charge for a second connection which had been in existence for some years. Charge sustained.

Charge for second connection given D. Keen was reduced from a two to a one acre basis.

C. H. Taylor, Block 6, D.L. 508 was allowed a 2 acre reduction on his acreage charge.

G. J. C. White was granted a rebate for 1 acre of side hill.

Alec. Stewart appeared in person supporting his claim for a rebate of last year's irrigation rates on some hill property near the north entrance to Prairie Valley. It having been shown that he applied for irrigation connection, but that same had not been given, the charge was rebated.

The Court granted his request that Blocks 12, 18, 19 and 20 be grouped as one property, and that the irrigation rate on same should be based on 15 acres.

The application of Mr. J. M. McDougall for a lesser acreage charge on Block 1, D.L. 2562 was laid over until further information was obtained.

A reduction equal to a total of 1 acre on 3 lots was given W. H. F. Welsh on Lots 1, 2 and 3, Block 11, D.L. 3397, part being above the ditch.

W. E. Rines asked for a rebate of charge for extra connection. Granted in part.

J. McLean asked for a reduction of 4 acres on Lot 17, D.L. 439. Two acres rebated.

Dr. L. M. More, non-resident owner of Block 11, D.L. 454 asked if it were not possible to give him a reduction in his charge for irrigation water. As there was no apparent basis for this claim, it was filed.

A. L. Clayton, owner of a group of 8 lots, Blk. 14, D.L. 474, Hillpark

(Continued from Page 1).
ular passion who gets the ear of the people.

At the present time we have government by representation in order to include larger districts. Parliamentary procedure such as rules of meetings are intended to safeguard democracy. We are beginning to think to-day of a partnership in industry which will do away with class war such as we have in Great Britain at present.

(4) The world has changed religiously. Years ago great debates took place on doctrinal questions, many of little importance. It is scarcely so now, and yet people are not less devout and Christian than they were forty years ago. One hesitates to offer any criticism of the Church which has again and again been the saviour of civilization, but it may be stated that the Church fails to-day to accomplish her greatest service largely because she is attempting to put the new wine of thought and life into the old bottles of outworn creed and dogma.

(5) The world has changed educationally. The old log school house did many things for us, but it left undone many things of great importance. It was situated in the midst of a simple life. To-day even our country life has changed and become complex in a high degree. Education has had to take cognizance of that fact. Formerly life was more or less isolated socially and otherwise. We did not have the press, the railway, the telegraph, and the telephone. To-day our boys must be citizens of the world with a world outlook.

It was formerly thought that all children needed was a free education up to the age of 14 years, and within the past month a political leader in this province has given utterance to the same sentiment. But the three "R's," reading, writing and arithmetic, are habits and do not in the least constitute an education. They are simply a part of the means to an end. An education is possible only by a continuous growth of the individual from within. It can't be given, it must be caught; and that largely by the growing mind's own activity. Hence any scheme of education that turns boys loose at 14 years of age breaks down at the most vital point.

England has recently wakened up to this fact and is now dealing with adolescent and adult education. Higher education is absolutely indispensable for every one, in the sense that all must keep growing intellectually, and in a special sense for a large number in order to secure leadership.

All the future is dark with clouds. We need hope and optimism, but we also need ability and insight. Therefore we must search out and train our leaders. Democracy means that we shall have confidence in the common sense of mankind. It seeks to enlist the spark of moral insight in every bosom. The problems passed up to our leaders are largely the fruit of the severe thinking of the common people.

In conclusion Dean Coleman emphasized the fact that the nation needs to exercise a great confidence and trust in God. This is God's world and we are God's children. He may be leading us by ways we do not fully understand, but His own great purpose is being realized.

Principal Welsh who introduced the speaker, made favorable reference to the splendid work being done by the University Extension Committee, which by such series of lectures as we were having in Summerland, was giving opportunity to parents to hear and know something definite of the professors under whom their children might sit as students in the near future.

Rev. H. E. Livingstone in very suitable words on behalf of the audience thanked Dr. Coleman for his very able address.

Gardens, was also given a combined rate.

Blks. 31 and 32, D.L. 3640, W. H. snow, were combined at the request of the owner.

Mrs. K. Bentley asked for a combined rate on 3 lots in Blk. 19, D.L. 473 where she now resides. As water had been laid to each of these small lots, and a connection given on each, the court did not favor the application.

Asking that 4 acres be relieved of irrigation rates because of alkali, Geo. Craig was given a combined rate of 18 acres on two lots totalling 19.9 acres.

An application from G. Drewett for a reduction in his general water rate on the plea that he had been given a reduction on irrigation rate was not entertained.

The Summerland Development Co. asked for a rebate on irrigation rate on Blk. 9, D.L. 2196. Rate sustained.

It being shown that there had been no connection last year to Blk. 2, D.L. 3640, Jas. Ritchie was granted a rebate of the 1920 irrigation charge.

HYDRO-ELECTRIC CONTRACT IS UP FOR DISCUSSION

Some Criticism Offered and Changes Proposed. Left in Hands Of Electric Light Committee.

A tentative contract for supplying the municipality with hydro-electric energy was received by the Municipality last week. Though forwarded from the office of the Kootenay Company, the draft contract is between the Okanagan Water Power Co. and the Corporation of the District of Summerland. The electric light committee examined the contract at a special meeting on Saturday evening, and submitted a report to the regular meeting of the Council on Tuesday.

In several respects the proposed contract differed from the understanding of the Council with regard to the verbal proposal submitted by the manager of the Kootenay Power Company, Mr. Lorne Campbell. Particularly did the graded scale of prices occasion disappointment. The Power Co. proposes a price of 4c. for a K.W. hour for the first thirty thousand K.W. hours per month. For the next 20,000 the price submitted is 3 1/2 c. For all over 50 K.W. hours per month the quotation is 3c.

Commenting on the proposed agreement, the Reeve expressed disappointment in the voltage at which the company proposed to deliver electrical energy here, viz., 4,200 volts, as against the original suggestion of 4,000 volts, the latter being a standard. The lower voltage would require special transformers. The Reeve stated further that he had taken this matter, and other phases of the contract, up with an electrical engineer, and in the latter's opinion it would not be practicable to carry a 4,600 volt current over 10 miles of line, as the company proposes to do. This engineer recommended that the voltage at which the current is delivered be not less than 11,000. This change could be effected by stepping up the voltage at the Pentiction end of the wire, and reducing it again here. Without such a voltage, there would be annoying fluctuation in the brilliancy of the light, and unsatisfactory current for motor use. It was stated further that the price quoted would not permit general use of the current for power purposes.

When Mr. Campbell was before the Council two weeks earlier the Reeve asked if his company would be willing to take over the distribution within the municipality. Mr. Campbell's reply was in the affirmative, but doubt was expressed both by him and the Reeve as to the ratepayers favoring the company such a franchise. At Tuesday's meeting Coun. Kirk expressed disappointment that the company had not submitted a second proposal covering local distribution, and declared himself as strongly opposed to the Municipality continuing in the light and power business. The Clerk was instructed to invite an offer from the company to take over the distribution, with the idea that both plans might be considered and laid before the ratepayers.

After a short discussion, the Council referred the contract back to the electric light committee with full authority to confer with Pentiction, which municipality is considering a similar contract, and also to obtain advice, when necessary, of an electrical engineer.

Vancouver.—A shipment of five tons of cascara bark from the coast valleys of British Columbia has revealed the fact that the only known supply of this valuable medicinal bark in large quantities, is in British Columbia, the forests of Washington and Oregon having been completely stripped. Owing to the deprivations of Jap loggers, who ship to American and British drug firms, this valuable provincial asset is in danger of being exterminated, and steps are being taken to protect this valuable herb in order that it may be properly cultivated and in time become an established industry of British Columbia.

By insisting on Made-in-B.C. goods the people of British Columbia will help their province through the present difficult period, by keeping men at work in B.C. factories. This will keep money in circulation in this province, and when money is circulating all share in prosperity.

A CHANCE TO KILL TWO BIRDS AT ONCE. Orr in The Chicago Tribune.

Hospital Bazaar is Huge Success

Ladies Will Realize About \$800 Toward Furnishing New Building. Probably the largest and most successful event of this nature ever held in Summerland was the Hospital Bazaar held yesterday afternoon and evening by the Ladies' Hospital Auxiliary. The ladies had gone to much trouble in the way of fitting up stalls and decorating Empire Hall, where the bazaar was held, and the contributions of articles for sale were numerous and valuable. Approximately \$900 was taken in, and the ladies are expecting a net result of about \$800. The above includes the proceeds from the supper and dance held in the evening.

Mr. J. W. Jones, M.L.A., formally opened the bazaar in his usual gracious style, in which he complimented the ladies upon the extent and quality of their undertaking. He also paid tribute to the excellence of Summerland's new hospital building, which he described as one of the best in the province. The Review is asked to express the appreciation of the members of the Ladies' Hospital Auxiliary for the generous support given them both by contributors and purchasers. Time will not permit of giving a detailed report of the bazaar in this issue. We hope to do so in our next.

New Union Offices

New and larger office accommodation is being provided by the Summerland Fruit Union for its office staff. For several years the very limited office space on the main floor has been detrimental to the efficient working of Secretary Beavis and his staff. The new office will be on the upper floor and will include a board room, general office and an inner or private office. A good sized cloak room and wash room is also being installed with a lavatory adjoining. A change will be made in the stairway at the north end of the building leading to the upper floor. The present offices will be used by Manager J. Lawler and the shipping clerks.

Up to the present the Board has held its meetings in the office building erected by Carlson, the railway contractor, which building will now have to be razed to make room for the new storage building.

Architects Submit New School Plans

Strongly Favor One Storey Building on Unit System. Plans for a consolidated school building have been submitted to the School Board by Twizell, Birds & Twizell, the Vancouver architects who prepared the plans for the new storage building.

The plan is for a one floor structure on the unit system, provision being made for 8 class rooms, two lunch rooms, accommodation for teachers, and other usual requirements. This unit can easily be converted into a 12 room building and the plans provide for the eventual inclusion of science rooms, auditorium, and an ultimate expansion to 24 class rooms. A second plan illustrating an 8 room unit of two stories capable of development into a 16 room building was also submitted, but the architects state that they do not recommend the two floor building as in their opinion where financial conditions do not permit the erection of fire proof school buildings, these should be limited in height to one storey and particularly where large open sites are available. The architects strongly recommend that a heating system be put in using the vacuum steam method.

The plans provide for ventilation from fresh air inlets and natural exhaust ventilators, the architects guaranteeing to entirely change the air in every class room under normal conditions at least once in every 20 minutes. The estimated cost of the 8 room one storey building, including lunch rooms, furnace room, and providing for architects' fees, is \$35,000.

TO LAY STEEL IN OKANAGAN

Canadian National To Complete Okanagan Branch Lines.

The following telegram from J. A. McKelvie, M.P., will be of great interest to citizens of the Okanagan: Contracts have just been let by the Government to the Algoma Steel Mills for a quantity of rails, and work will be proceeded with on several branches where grading has already been done. I have the assurance day from the Minister of Railways and Supt. Hanna that the Kamloops-Kelowna branch will receive its share of these rails. They state that work must start at Ducks and proceed continuously in order to give satisfactory results. This is the first order for rails that has been placed this year in Canada from any source.

SUMMERLAND TO RECLAIM EMPIRE DAY AS ITS OWN

Large And Enthusiastic Gathering of Lovers of Sports Lay Good Foundation For Big Event.

The well attended and enthusiastic meeting held last Wednesday evening to prepare for a community sports day on May 24th, is a practical assurance that the event will be a huge success. The meeting was called by the G.W.V.A., and R. S. Jackson occupied the chair. Many good ideas were advanced and committees named, the latter with their chairmen being as follows: Transportation - C. E. Bentley; Finance and Prizes - A. B. Elliott; Grounds - O. Vaughan; Advertising - C. J. Huddleston; Catering - Keith Elliott; Sports and Program - Dr. Windeler. The above named chairmen were made a general committee with C. E. Bentley as chairman.

Crecent Beach was the place selected at which to hold the sports. Naramata and Peachland will be invited to co-operate. It is the intention of the committee to make children's sports a prominent feature, and it was also decided to carry out the program promptly on schedule so that there will be no lagging. The High School and Boy Scouts will take part. The proceeds will be divided equally between the Hospital and the G.W.V.A.

If anyone has any suggestions to make, or is willing to co-operate, he is requested to get in touch with the chairman of the committee concerned.

MUNICIPALITY ANSWERS T.C. COMMUNITY

Agrees to Turn Our Existing System and Change Its Location.

In reply to a proposition from the Trout Creek Water Users Community the Municipal Council has offered to move and relay the 1,550 feet of 8 inch pipe now a part of the Trout Creek pumping system, and also to move and re-build 1,008 feet of fluming and to contribute these and other existing fluming in the district to the Community, for which they will require the latter to include with its system, the Evans, English, and other properties that have been served by the Municipal pumping plant.

When the proposal from the Community came before the council recently, it was referred to the water committee with instructions to put a valuation on the existing system and make an estimate of the cost of making the alterations so as to include the area under it with the other portion of Trout Creek Point.

At Tuesday's meeting of the council, the water committee reported that the present value of the pipe was \$733; moving and re-laying would cost \$330; value of material in flumes which must be moved and rebuilt was placed at \$296; moving and rebuilding same, \$192; present valuation of other flumes, \$905; total valuation when in new position, \$2,456. In all cases due allowance was made for depreciation. It will be necessary for the Water Community to provide about 1,100 feet of pipe to connect this altered system with a ditch at the corner of the Gartrell property.

BRITISH COLUMBIA TOBACCO CROP

The British Columbia tobacco crop of 1920, grown on eighty-one acres totalled 60,000 pounds. Most of the tobacco is still in the growers' hands. In 1919 the total crop of 93,000 pounds was sold to a Quebec manufacturer at 23c. per pound.

Shore Road Is Primary Highway

So Classed By Government, Which Assumes 75 per cent. of Upkeep.

The lake shore drive running through the municipalities of Summerland and Peachland has been classified by the Provincial Government as a primary highway. This will settle a long standing dispute between the municipalities and the Government with regard to the upkeep of this road. Built by the previous government as a link in the Okanagan highway, disputes arose between the province and the local authorities as to the maintenance of the highways within the municipal boundaries, following the present government's coming into power. There is approximately seven miles of this road within the bounds of Summerland, and practically the same within the Peachland municipality. In both municipalities parts of the road cannot be considered in any respect as municipal, having been constructed purely for through traffic purposes. Recently under an understanding, the Government has been maintaining a portion of the road in each municipality.

Now that the road is classed as a primary highway, the Government will assume 75 per cent. of the cost of maintenance, and the municipalities will be required to pay 25 per cent. The other roads in these municipalities have not as yet been classified.

EVENTFUL CAREER BROUGHT TO CLOSE

Late Mr. Hespeler Prominent in Manitoba For Many Years.

An historic figure in the development of Western Canada and more particularly that of Manitoba, passed away in Burnaby, B.C. last week in the person of Mr. William Hespeler, former commissioner of immigration and agriculture, builder of the first grain elevator in Manitoba, the first man to use brick in building in Winnipeg, speaker in the Manitoba legislature in 1899, and for 20 years German consul in Manitoba and the Northwest Territories. The late Mr. Hespeler was in his 92nd year and has been living with his son, Mr. Alfred E. Hespeler at Burnaby since just prior to the latter removing from Summerland to the Coast. The body was shipped to Winnipeg, where all services were held. The late Mr. Hespeler came west from Waterloo, Ont., in 1870, and became commissioner of agriculture and immigration for the Dominion shortly afterwards. He arranged for bringing to Canada the first colony of Mennonites, and erected the first apartment block in Winnipeg. On his retirement in 1907 from office as German consul he was awarded the decoration of the Red Eagle by the Kaiser.

In 1899 Mr. Hespeler was elected to the Manitoba legislature for Rosendfeldt, and became speaker of the House. He was also connected with various financial and philanthropic interests. He was a frequent visitor to Summerland, his son having been resident here since the early history of the district as a fruit growing country. Fredericton, N.B.—In summing up the fruit situation in New Brunswick during the past year, A. C. Turney, provincial horticulturist, stated that within the past few years there had been a steady departure in the establishment of commercial test orchards, some six or eight varieties of apples being grown. Referring to the profits to be made from fruit growing, Mr. Turney stated that at Douglas, York county, the average profit per acre was \$176 in 1920, while one farmer in King's county made as much as \$1,500 an acre from the growing of small fruits. The first balloon ascension in a free balloon was made in 1783.

SYMPATHIZER WITH IRISH TO FACE JURY.

For uttering seditious in Vancouver, Mr. Esmond will be tried. He is accused of urging the active spread of the Irish revolution.

WILL SUBMIT SCHOOL BY-LAW

Telephone Company Proposes Line Extension. Council Disposes of Much Work in Long Session.

At the regular meeting of the Council on Tuesday, the school loan by-law was given its preliminary readings, and the Clerk was authorized to advertise same. The by-law is published elsewhere in these columns, has been asked for by the School Board for the purpose of erecting much needed school accommodation.

Chairman Kirk of the water committee presented an extensive verbal report covering the work that had been done on the irrigation system this spring. He stated that the repairs effected would put the system generally in condition to give a better service than was given last year. A bit of a dispute arose when Chairman Kirk reported that, with the approval of the Reeve, he had taken advantage of the fact that the engineer was available, to have him do some preliminary work on the ditch through Prairie Valley meadows. Coun. Scott objected to this procedure, declaring the matter should have come before the Council. Other members of the Council claimed that this had been approved in a general way. The Reeve explained that he had approved of the suggestion of Coun. Kirk, and pointed out that the committee had power to expend up to \$50, and that the matter had been placed in the hands of the committee at an earlier meeting. When the report was put to vote, Coun. Scott was the only one who did not give approval. The public works committee recommended that the road crossing the

(Continued on Page 8)

SPOKE HERE ON CHILD WELFARE

Large Audience Hears Very Able Speaker On Important Subject.

Rev. E. S. Bishop of Edmonton, who is Field Secretary of Evangelism and Social Service for the Methodist Church in Alberta, was the special speaker at Lakeside Church on Sunday evening, the 24th. A large and attentive audience listened to a strong, forceful statement on the duty of co-operation in business, community and church work, with its bearing on social service in its many phases—prohibition of alcohol, abolition of vice, etc. At the same place on Monday afternoon, Mr. Bishop kept some forty women spellbound for two hours as he handled, in a masterly fashion, the question of Child Welfare. In the course of his address he showed the sacred duty of mothers and fathers to talk over with their children in a sympathetic way matters that are too often tabooed. After the speaker had finished many mothers gathered a-

COURT FINISHES REVISION OF WATER RATES

Rebates Will Reduce Revenue By Nearly \$300. Fifty Foot Town Lots Are Occasion of Discussion.

An adjourned meeting of the Court of Revision on Irrigation Rates was held at 1:30 on Tuesday afternoon when the business of the court was wound up and the roll, as amended, declared to be the roll for 1921 for the assessment of irrigation and general water rates.

J. M. McDougall was granted a reduction of 3 acres on a 10 acre lot at the northern extremity of the municipality because of cliffs on the lake front of his property. W. E. Rines was allowed 1 acre for a precipitous section on the east side of his orchard.

For purposes of assessment two adjacent blocks owned by E. F. Sanborn will be grouped as one with one connection. Two or three reductions in area charged for second connections were granted, and in two other instances charges for extra connection were rebated, it being shown that these connections did not now exist or were out of use.

A. J. F. Anderson was allowed a rebate for the present year on a piece of land not now served by the irrigation ditch. Rebated irrigation rates were made to K. McKenzie and J. L. Crego on land at the east side of Garnett Valley not now under the irrigation system, the Crego property being the same lot on which S. Darkis has been asking for increased service. As owner of several building lots with 50 foot frontage, Jas. Ritchie asked for a reduction on general water rate charged on these lots. The rate for a 25 foot lot is \$3, while the owner of two 25 foot lots pays \$5. The office had treated Mr. Ritchie's 50 foot lots as two 25 foot lots, but as there was no definition in the By-law of a town lot, the court could do nothing but reduce the charge on each lot to \$3. These are the only town lots in the district larger than 25 feet, and a recommendation was made to the Council that the by-law be amended to cover the larger lots.

A. H. Steven was rebated an irrigation charge covering several years on the north half of 82D, D.L. 3640, a fraction of an acre on which his house is situated, this charge having been made in error, as no irrigation service had ever been given. Mr. Steven also succeeded in obtaining a rebate for general water charge his property not being on any street on which there is a municipal pipe line. He had laid, at his own expense, a pipe from the Mercantile corner to his house.

In all, the reduction granted by the Court of Revision will total a little less than \$300 in 1921 irrigation and general water rates. The court concluded that it was almost as necessary to have an assessor fix the irrigation charges on the individual lots as it was to have him assess the land for taxation purposes. More than 250,000 tourists from the United States passed through B.C. from Washington during the year 1920, according to U.S. Consul General Frederick M. Ryder.

round him to get further information about particular problems. In the evening the Lakeside Young People also listened to a treat from Mr. Bishop, when, by humorous illustrations and catching phrases he brought to their attention something of the great heritage that is theirs, and the wide field of usefulness which awaits them. He urged them to prepare themselves, physically, intellectually and morally, so that they may not be drifters, but leaders in some useful sphere of life. Mr. Bishop has left much food for thought to those who heard him.

Peachland Doings

A Weekly Chronicle Furnished By Our Local Representative.

Peachland To Erect Monument

The postponed meeting called by the Memorial committee was held in the Municipal Hall on Tuesday evening with a better attendance than the former meeting. Reeve R. J. Hogg took the chair. The Secretary read the report of the work of the committee up to the present, the substance of which was as follows: When the committee had gone into the matter of a memorial for Peachland, they decided on a monument, and so reported to a public meeting. The public meeting, after a lengthy discussion, adopted the suggestion of the committee. After some discussion as to a site, the matter was referred to the committee to decide. Canvassing the community for the necessary funds was the next duty of the committee. There was some difficulty in making the canvass at the time, and consequently the matter was more or less dormant for some time, until the committee met recently and decided to call the public together again to see if there was any change of opinion as to the memorial, hence the present meeting.

This meeting endorsed the former decision to have a monument and a recommendation was made to the committee that the site be either at the end of Second Street and next the C.P.R. wharf, or in front of the Municipal Hall, the decision to be with the committee. The committee having lost some of its former members asked to have a few new ones appointed, and the following were elected: R. Harrington, F. Topham, J. E. Kerr, Mrs. Buchanan, and Mrs. B. F. Gummow.

At the close of the meeting the committee made arrangements for the immediate canvass of the community.

Mrs. Murchie of Glenrosa spent a couple of days in town last week.

Mrs. R. Walters and baby came up from Summerland on Thursday morning of last week and is a guest of Mr. and Mrs. Albert Smalls. Mr. Walters came down from Kelowna on Saturday evening for the week end and returned to Kelowna, where he is now located, on Monday morning accompanied by Mrs. Walters for the day.

Having been called here from the prairie on account of the death of his wife, Mr. Hamilton remained for a couple of days with his sons and left on Thursday morning last to return to the prairie. The married son left on Monday to resume his duties in the Post Office at Regina. The younger boys have moved and are now living in the home of Mr. and Mrs. Walter Morsch.

Mr. and Mrs. Hackett were passengers north on Thursday morning on a short business trip.

Mr. Jas. Michael is quite ill, having been confined to the house for a couple of weeks. He has a slight congestion of the lungs, the result of a severe cold.

Mr. H. E. McCall, local agent for the Massey Harris Co., had a visit last week from Mr. F. H. LeQueune, general agent for Central British Columbia. They spent a day in Westbank and report having done a nice day's business. Mr. LeQueune returned in the afternoon to Kelowna, where he makes his headquarters. Old timers will remember Mr. LeQueune as a resident of Peachland some twelve years ago. Since then he has spent a large portion of his time in the East.

Mrs. John Marr of Vancouver, accompanied by her little daughter Alice Zella, came in via K.V.R. and Lake Shore Stage last week to visit her mother, Mrs. M. E. McDougall and her brothers and sisters. She will probably spend the most of the season in the Valley, expecting to be joined here by Mr. Marr during the holiday season of the schools.

Mr. J. Seaton of Okanagan Centre paid Peachland a short visit this week looking after his interests here, and visiting friends.

Among the arrivals on Saturday evening last were Mr. and Mrs. Geo. Phillips and family from Calgary. Mr. Phillips to spend a few days, while Mrs. Phillips expects to remain the greater portion of the summer. At present they are guests of Mrs. Phillips' parents, but hope to rent for the summer down near the lake. Mr. Phillips will continue his services for the Osborne Art Calendar Co. On Monday last Mr. and Mrs. Keyes and Mr. and Mrs. Phillips motored to Kelowna to spend the day.

Mrs. Stewart moved from the Lang cottage on Third Street into the cottage on Beach Avenue just vacated by Mr. and Mrs. J. Hyde.

Mr. R. J. McDougall with his wife and family motored up from Penitence on Sunday to visit relatives here. On their way up they had a head on collision with another car, but although quite a little damage was done to the car they were able to complete the trip. On their return they were accompanied by Mr. and Mrs. Dorland and Mrs. H. McDougall. Mrs. Dorland came home on Monday morning while Mrs. McDougall returned on Wednesday.

At the Union service in the Methodist Church on Sunday evening Rev. C. D. Clark had the pleasure of calling on Miss Campbell, deputation secretary to the Canadian Auxiliary of the Zenana Bible and Medical Mission, to address the congregation. She had addressed two meetings in Summerland and was driven up here on Saturday by the Rev. H. A. Solly to meet the friends in Westbank and here. The congregation on Sunday evening listened with keen interest to the address given and an explanation of the work being done by the Mission. She spoke of the bed which Peachland had been keeping up in the Lucknow Hospital in India, and also explained that Peachland had a share in a memorial dispensary which had been erected in connection with the Hospital. She spoke of some of the conditions there and how they are faced and gave a very interesting account of the work in general.

Mr. D. D. Lapsley, representing J. Leckie & Co. of Vancouver, spent Monday here on a business visit. Having once been a resident he has many friends and acquaintances in town.

A mission meeting was held at the home of Mrs. Dryden on Monday afternoon last addressed by Miss Campbell, deputation secretary to the Canadian Auxiliary of the Zenana Bible and Medical Mission. Peachland supports a bed in the Lucknow Hospital, but as there has hitherto been no society and no one responsible for getting the money away, needless to say

all wished to carry on the good work. Following a lengthy discussion the Zenana Mission Society of Peachland was formed with the following officers: Mrs. J. B. Robinson, President; Mrs. Murdin, Vice-President; Mrs. Dryden, Sec.-Treasurer. The rest of the committee will be chosen at a later meeting. It is the desire of the society to have all local churches represented on the committee. They

are planning to serve tea at the home of the Secretary, Mrs. Dryden, on Wednesday, the 4th of May, from 3 to 5 p.m., and a collection taken to start the amount required to support the bed for the present year. This has been done up to the present for \$50.00 a year. Now, however, it cannot be maintained much under \$75.

Mrs. Vivian and Mrs. J. B. Robinson went down to visit friends in Summerland on Tuesday for a couple of days and to take in the Hospital Bazaar being held there.

While handling logs on Tuesday, Mr. Sam Michael got a pretty bad bruise and cut in the palm of the hand from a canthook.

Mrs. Clarence, proprietress of the Edgewater Inn has had the front lawn of the property graded and artistic and substantial fence put across the front of the property, and intends having the grounds beautified. This will make a great improvement to that portion of the town.

Build that Home of Beauty with

ENDERBY, The Natural Red Brick

Our first kiln of the season is now lighted and will be ready for the market May 5th.

Our brick is made from the best natural red brick clay in British Columbia, proven so by the public buildings and residences built with it during the last fifteen years, and the demand it has created.

We can supply you with this brick at less money than you pay for a poor one. Let us hear from you whether your requirements are small or large. There will be no shortage of our brick from now on.

Fifty per cent. of our kiln run brick are facing brick that cannot be got from any other source of supply at one and one-half times the price we ask for them.

Write for free sample brick to be mailed to you.

OLDSMOBILE FOUR

The Car that is taking America by storm.

EVERY INCH AN ARISTOCRAT

The Highest Powered, Most Reasonable Priced, Snappiest Appearing, Four Cylinder Car in the Market To-Day.

Mr. T. B. Young,
West Summerland.

Dear Mr. Young,

In reply to your letter enquiring as to whether I am satisfied with the Oldsmobile car you sold me recently, and my opinion of it, I can assure you that I am delighted with it. For power, for riding ease, for room and general comfort, as well as in detailed attention to finish, this car in my opinion equals, if it does not excel any car in its class of which I have experience, and is certainly ahead of some cars of decidedly higher cost.

At the present time I have only run some eight hundred miles, but the engine is satisfactorily "run in," and I have no doubt from its general behaviour that the car will stand up.

If this expression of my opinion is of any use to you, it is quite without prejudice, and you are welcome to use it in any way you please.

Yours truly,

Summerland, April 13, 1921.

G. R. HOOKHAM.

.. The Winding Trail ..

Cleaning up Mr. Helmer's remarks on the "ubiquitous tin can and kindred articles of ornamentation, are pleasant reading to this present scribe. The misplaced tin can has been the intermittent burden of my song for a long time past, and it is gratifying to find that some one else is taking up the refrain. To my mind, nothing is more astonishing than the indifference shown by many people with regard to the disposal of their household flotsam and jetsam, and the apparent lack of any notion of responsibility in the matter. In the cities, where carelessness would mean widespread disease, the laws are sufficiently strict to ensure proper disposal of all such accumulations, and the authorities are themselves the responsible persons, but in smaller places, the degree of systematic handling is measured by the growth of the community, and much depends on the individual. This idea seems to be worked to a very fine point in a neighbouring town just now, those premises which conform to the requirements of cleanliness as set by the municipality, being adorned with a more or less artistic placard, on which are the mystic letters O.K., together with some commendatory remarks as to the conditions obtaining on the precincts thus ornamented. The scheme seems open to possible criticism, on the ground that the casual observer is apt to mistake the sign for a warning against infection from mumps or some other unpleasant malady, but the underlying idea cannot be assailed.

Accompanying this scheme there seems to be a fixed resolve that the place in question shall "be a clean town by May 1st"—a most meritorious determination. The weak point in this and similar resolves elsewhere, is that the clean up involved is too much of an annual affair—a sort of moral spasm, followed by eleven months and three weeks of lethargy! A passing visitor, by the way, appears to have been talking to the local editor on these things, and thinks "there should be 365 clean up days in every year, and one extra in leap year," which is doubtless correct, if one allows for a certain laxity on Sundays, for the benefit of the housewife—and the Lord's Day Alliance.

With regard to home conditions, the "untidiness of the district" as noted by Mr. Helmer, is a truism. I have heard remarks made by travellers on the C.P. boat, concerning the appearance of Summerland lake front which would, or should, make many ears tingle. Not many places have an approach which is more susceptible of picturesque treatment than Summerland possesses, yet its possibilities are practically ignored, and the best uses we seem to be able to put it to is to litter it up with all sorts of rubbish, and permit the doorways and walks of its public buildings to remain disfigured with the obscene scribbles which have tainted them for years past!

Advertise Summerland by all means, but see to it that the first impressions of the visitor who is attracted shall be in keeping with the prospects offered in the advertising.

The tentative proposition put forward by Baron Shaughnessy concerning the fusion of certain of the National railways with the C.P.R., is one which opens up a wide field for discussion—which it will doubtless receive. The prospect it suggests, of an immense saving, is calculated to appeal to most of us, and, if that were the only consideration involved, there would be little doubt of the popular verdict. But the suggestion that the Grand Trunk be left out of the merger is a feature which does not seem to fit in with the rest of the proposition. If the Government is going to operate any railways it may as well operate all it is now committed to, and if, on the other hand, Government control is to be relinquished, it should be given up wholly, and not in part. We all feel fairly confident that C.P.R. management would mean all that is claimed in the way of lower cost, and the country might feel considerably relieved if the budget were lightened in that direction, but it seems a somewhat incomplete transaction as it now stands suggested. And it is certain that national control of railways has not yet been fully tried out in Canada. The experiences of certain other countries has been so financially disastrous that no time was lost in relinquishing control, but on the other hand it is said that it is succeeding in some places, and may yet arrive as part of the world scheme. The Hon. F. B. Carvell will have none of it, and his experience on the Railway Commission should make him a competent critic. Moreover, it must be admitted that with the unquestioned supremacy of the C.P.R. management as an object lesson of the efficiency of private enterprise, emphasized by the comparative failure of national control of similar public utilities, his contention against it is strongly supported.

The Shaughnessy suggestion is full of public interest, and the various opinions it will probably elicit should be worth studying.

AUTOLYCUS.

Naramata News

Current Events of Town and District

WOMEN HAVE STARTED A "MADE-IN-CANADA" CAMPAIGN.

The executives of the Women's Institutes of Naramata, Penticton, Summerland, and West Summerland were called together at a meeting held in the Unity Club last Thursday to discuss the subject of Canada's international debt, and the adverse exchange rate.

The meeting was called at the instance of the Naramata Institute, which has been interested in this question. After a full discussion a resolution was passed that the meeting "put itself on record to endorse and propagate a 'Made-in-Canada' campaign in each district with the purpose of reduction of our international debt."

A social hour was spent at the conclusion of the business meeting, the members of the Naramata executive entertaining the visiting executives at tea.

Dr. F. W. Andrew, Summerland, spent last Thursday in Naramata in the inspection of the three school-rooms. He was assisted by Miss Gwen Robinson. Dr. Andrew found a higher level of physical fitness than in past years, though there are still a considerable number of tonsils and adenoids in need of attention.

A very enjoyable dance took place at the Fruit Union on Thursday evening, the music being supplied by Emmerton's orchestra. A very nice supper was served in the new tea room of the Syndica House during the evening. A large party came over from Summerland by special ferry to be present.

Miss SeEVERS, who has been visiting her brother in Calgary, has returned to Naramata, and will spend some time with her mother here.

Mr. and Mrs. Wollstencroft, who have recently purchased Mr. Latimer's house in Penticton, left Naramata on Tuesday to take up their residence there.

Mrs. J. M. Robinson and Miss Marguerite Robinson arrived home on Tuesday morning, after a short visit in Vancouver. Miss Kathleen Robinson is expected home for a short visit on Monday.

Mrs. Duke, of the Syndica House, has fitted up a very attractive tea room in the room formerly occupied by the pool tables. The decorations are carried out in blue and white. The usual refreshments are served and some home-made cooking will be sold as well.

An addition is being built to the Rusberry store, which will be conducted as an ice cream parlour during the summer months.

KAISER BRONCHITIS IN EXILE

Thousands Liberated

What! have you not heard the joyful tidings? Bronchitis has been expelled—kicked right out of society—and 100,000 Canadians liberated from the bondage of this disease. Every trace of bronchial trouble is blown to atoms by the world's most effective disease-destroyer, Buckley's Bronchitis Mixture. No wonder people are rejoicing! No longer do they dread the effects of coughs, colds, asthma, etc., and so anxious are they that others should benefit also, hundreds of letters have been written proclaiming the merits of this wonderful miraculous remedy. Here is one letter:—

To Whom it may Concern: "This is to certify that I had been suffering for over three weeks with bronchitis and was advised to try Buckley's Bronchitis Mixture. I purchased a bottle and after the third dose I received relief, and before the bottle was finished, I was perfectly well. In making the above assertion I have no hesitation in saying it is the best remedy I ever came in contact with for heavy colds and bronchitis."—(Signed) Mrs. M. Harding, c/o Dustless Brush Co., Toronto. The original of this testimonial may be seen at W. K. Buckley, Limited, 142 Mutual St., Toronto. This mixture, proven in thousands of Canadian households, will give you sure relief. It cannot fail. Seventy-five cents is the price that stands between you and the road to health. Take no substitute—insist on the bottle with the "Satisfaction guaranteed or money refunded." Ask your druggist.

What's a Guarantee?

Our idea of a guarantee is that the manufacturer who gives one—which hasn't any tags and loopholes—believes in his product. So much so that he stands ready to make good any loss suffered by the purchaser through defective material or workmanship. It's mainly because of the guarantee that goes with them that we are selling and recommending Ames Holden "Auto-Shoes."

Of course, we know they give the cheapest mileage too—that they are dependable tires for any make of car, anywhere. But it's the guarantee that we talk about most. It's the straight and clean-cut, without time or mileage limits. It shifts our responsibility on to the manufacturer and he lives up to every letter of it. Come in and let us tell you about the guarantee that goes with

The Summerland Review

Established August, 1908

Published at Summerland, B.C., every Friday by
THE REVIEW PUBLISHING COMPANY, LIMITED
Ralph E. White, Editor and Manager

An independent family newspaper covering Peachland, Summerland and Naramata and adjacent districts.

Subscription Rates—In British Empire, in advance, \$2.50 per year; six months, \$1.40. To U.S.A. and other countries, \$3.00 per year.

Advertising Rate Cards and information respecting territory and samples of paper mailed upon request, or may be seen at the office of any advertising agency recognized by the Canadian Press Association.

Advertisers must have copy in by Wednesday noon in order to insure changes for standing advertisements. New display advertising copy can be accepted one day later.

Correspondence—Letters addressed to the Editor and intended for publication must be short and legibly written on one side of the paper only. The longer an article, the shorter its chance of insertion. All communications must bear the name of the writer, not necessarily for publication. The publication or rejection of articles is a matter entirely in the discretion of the Editor. No responsibility is assumed by the paper for the opinions expressed by correspondents.

FRIDAY, APRIL 29, 1921

THE REVIEW MAY NOT PUBLISH NEXT WEEK.

At the time of publishing this issue of The Review there is every indication that the International Typographical Union, with headquarters at Indianapolis, Ind., will call a strike on May 1st in this and other book and job printing offices all over the continent, which are employing printers who are members of that organization.

In the Okanagan there are several points of difference in dispute between publishers and employees, the two outstanding and the two that most directly concern the public, are the demands of the Vernon Typographical Union (as the Valley organization is named) for increased wages and the International demand for a reduction in hours of work.

The minimum wages fixed by the Vernon Union is \$39 per week of 48 hours with time and a half for overtime. This is a general rate throughout the province, but in Vancouver and some other cities the scale is \$40.50 per week. The local Union demands the Vancouver city scale and insists that the new contract stipulate that this be further increased at any time that the Vancouver Union may succeed in obtaining an increase.

The employers argued that working conditions would not permit them paying the same as Vancouver city; but, if all other points could be settled at once, there was some disposition to grant the increase for this year.

At a recent meeting of the employers and employees, the latter flatly refused to consider such a proposition, and the employers were told by a representative of the International Union then in the Valley, and who was chief spokesman for the union men, that the men could not enter into such an agreement; the International had decided on a 44 hour week and intended to insist on it, and our men had no option but to strike on May 1st if this demand was not granted.

The proposed shorter work week and increase in pay would mean an increase of approximately 14 per cent. in the

cost of production based on the "productive time" or "saleable hours."

The publishers, while anxious to effect an adjustment that would be fair and would hold for them the good will of their staffs, maintained that with lowering living costs there was no justification for an advance in wages, and further that they did not propose to submit to an increase in the cost of printing and advertising which would have to be passed on to their patrons.

There was, therefore, no alternative but for the publishers to refuse the demands of the Union, and unless the continent wide strike is called off, or the local men reconsider their action, this office and the printing offices of the Valley will be closed for a time.

Much as this is regretted by the publishers, it seems likely that there will be no "Review" next week, or at any rate, not in its usual form.

Famous Aviator Had Relatives In Peachland

Eastern Paper Tells of Death of Prominent Airman.

The following is a clipping from The Ottawa Journal, paying last respects to a famous airman, who is nephew to one of our old timers, Mr. Thompson Elliott and cousin of Mrs. Chas. Somerville:

ALMONTE HONORS LATE CAPT. MURRAY GALBRAITH.

The funeral of Capt. Daniel Mur-

ray Bayne Galbraith, Canadian Air Force, D.S.C. and Bar, who was killed in a motor car accident at Camp Borden on Tuesday, took place on Saturday from his home in Almonte to the Presbyterian cemetery at Ramsay. It was only a year since Almonte and Carleton Place were decked with flags to welcome home the well known aviator after his triumph in the war. On Saturday there was only one flag in evidence at Almonte. It was on the Town Hall tower and at half mast. Almonte's hero had "gone west" in the language of the flying men. Hundreds of sorrowing friends gathered at the home to offer their last respects to Murray, as he was known by nearly all with whom he came in contact.

After the service the hearse with its valiant burden headed a procession of more than 150 mourners through

the country lanes where Murray had spent his boyhood, to Ramsay Cemetery. Here the body was placed in a vault pending the return of the aviator's parents, who will arrive back from California this evening.

At the home services were conducted by Rev. J. D. McCrae, B.D., of Almonte; Rev. Capt. J. F. Tupper, B.D. of Camp Borden, who escorted the body back from camp; and Rev. W. A. Dobson, B.D. of Zion Church, Carleton Place, who had known the aviator from his earliest childhood. Dr. Dobson spoke feelingly of the Captain's associations with his friends in Carleton Place and the surrounding district. The Galbraith family had long been residents in this locality. Daniel Galbraith, Capt. Galbraith's grandfather was one of the first settlers in the district and represented Lanark in the House. He was one of the Fathers of Confederation. Mr. and Mrs. Robert Galbraith, the parents, left for California last fall. Capt. Galbraith leaves a wife, formerly Miss Maureen O'Berger, of Ireland, and one young son, Daniel.

When the news of the sad accident appeared in the papers, an old school girl friend of Mrs. Murray Galbraith, who also comes from Ireland and was living less than 20 miles away unaware of her friend's close proximity, hurried to her side to console her in her great trouble. This was Mrs. G. Cowan, formerly Miss Pat Hamilton. The bereaved wife's mother, Mrs. O'Berger was also with her. At the cemetery Rev. Mr. Dobson read a short service. The pallbearers who were boyhood friends of the deceased were Capt. Douglas Findlay, R.A.F. who was with Capt. Galbraith overseas, Donald Campbell, Gordon Black, Charles Black, Donald and John Taylor. The last four were cousins of Capt. Galbraith. The Air Force was well represented at the funeral. Many beautiful floral wreaths were received, not a few came from distant points in Canada, and bore eloquent testimony to the wide range of friendships enjoyed by the departed aviator. Wreaths were noticed from the Air Board, the G.W.V.A., and the

Masonic Order of which he was a member. It is understood that the citizens of Almonte and Carleton Place intend holding a public memorial service in the Town Hall, at a near date, when representatives will be present from the Masonic Order, and the Canadian Air Force. The propeller of one of Capt. Galbraith's airplanes, suitably inscribed is to be hung in the Town Hall.

This report can perhaps best end with a quotation from the address of Rev. Captain Tupper: "And so he who was so dear a friend to all of us, so manly a man, and so gallant a warrior, has gone aloft for the last time, and will not land again. He is now awaiting the final Reveille. In the language of his fellow officers, Murray has "gone west."

We learn from Mr. Elliott that Capt. Galbraith has to his credit during his service overseas fifteen Ger-

mans. His sudden death was caused by the overturning of his auto on his way home at Camp Borden, where he has been employed as instructor at the Camp.

ARE YOU INTERESTED?

Have you been reading the newspaper reports coming from the FORT NORMAN OIL FIELDS? These reports indicate that the Imperial gusher is but a fair indication of what may be expected from other wells in the FORT NORMAN FIELD this spring. Undoubtedly, the FORT NORMAN DISTRICT will make many wealthy men. Perhaps there is no other form of speculation which presents the money making possibilities that LEGITIMATE oil speculation offers to the small investor. For instance, \$100 invested in Union Oil earned \$150,000!

We represent a Company that owns fifty-eight producing oil wells. Don't confuse this Company with wild cat propositions. At least give it the benefit of a thorough investigation. You will find that it is a legitimate Company paying handsome and regular dividends to its shareholders. This Company has secured five of the choicest leases in the FORT NORMAN DISTRICT. A limited number of shares in the Parent Company are being used to meet expenditures in connection with drilling operations on our FORT NORMAN PROPERTIES. We offer you all the tremendous possibilities of speculation in the FORT NORMAN DISTRICT, plus an absolutely safe dividend-paying investment in a Company that will stand a most searching investigation.

Are you interested in the possibilities in the FORT NORMAN DISTRICT? If so, simply send your name and address. We will be glad to send you all the information regarding this district which we have.

SKILLFUL WORKMEN

¶ If your suit or coat is designed, cut to your own measure and made by workmen who are skilled in their craft, you will not suffer disappointment when you come to wear it.

¶ But how disappointing it is to have clothes sent home to you wanting in those fine touches that tell of work done by those who are skilled in the ways of making fine apparel.

¶ Complete safety is yours if your clothes are tailored by Hoberlin workmen. Only skilled workmen find employment here—from the chief designer—the highest paid craftsman in Canada—down through each and every grade of workmen. Every garment made to measure.

HEAVY PROGRAM OF WORK PROPOSED FOR SOLDIER LANDS

Three Quarters of a Million Dollars Appropriated— Says Minister.

Following an inspection of the situation on the southern soldier lands Hon. T. D. Pattullo declared that a heavy program of work would be undertaken on the tract this year, this year's appropriation for the project being \$750,000.

The present force on the project is about eighty men, but it is believed that this will be swelled to about 300 by summer. Work is to open up on the area about the first of May, according to present indications.

The Government plans to have 3,300 acres ready for the market by fall. This in addition to the area already on the market, or sold to intending settlers, means 4,500 acres for settlement before the end of the year. That amount is about one-third of the total acreage capable of being irrigated for fruit, seed or vegetable culture.

Hon. Mr. Pattullo declares that he is greatly pleased with the outlook in the south and considers that the whole development scheme means the opening up of the finest land of its kind to be found anywhere. He is particularly taken with the growth of the young town of Oliver.

BRIDAL SHOWER.

A very pleasant afternoon was spent by a number of friends and neighbors at the home of Mrs. Willis Walter in Peach Orchard on Tuesday afternoon, the 26th, the occasion being a shower for her sister-in-law Miss Stata Walter. The reception room was tastefully decorated with daffodils, the color scheme of yellow and white being carried out in the dainty refreshments.

The bride elect was the recipient of many beautiful and practical gifts. During the four months the bride has been in Summerland she has made many friends whose best wishes will follow her in her new home.

Miss Walter will leave on Saturday's boat for Revelstoke, where her marriage to Mr. Geoff. Flamank will take place. After a honeymoon spent at the home of the groom's parents in Victoria, the young couple will reside at Glacier.

The great part British Columbia is taking and the important position it will assume in the near future, in regard to the world's supply of pulp and paper, is revealed in the figures showing the output of this industry for the past year in Canada. This province is known to contain the largest resources of pulpwood in the world. Last year the output of this industry in Canada was \$168,000,000, and if pulpwood extracts are added the total would be \$178,000,000, as compared with \$107,000,000 for 1919.

Passing Events: Social, Personal, &c.

T. J. McAlpine returned Thursday morning from a business visit to the Coast.

Miss K. Finley and Mr. and Mrs. King, Sr., of Kaleden, were week-end guests of Mr. and Mrs. Jas. Ritchie.

G. H. Inglis & Co. have sold a triangular lot in Prairie Valley held by the Municipality to Lawrence Mitchell.

J. J. Mitchell of this place is in charge of a gang of men at Oliver on the new Government project making cement pipes.

A practise of the Senior Baseball team will be held next Monday at 7 o'clock at the Central School grounds. The boys are requested to bring all bats, balls and gloves possible.

Municipal Constable Arkell has tendered his resignation, and the Police Commission are inviting applications for the vacancy. Mr. Arkell is now in charge of the Government roads in the district.

The Treasurer of the Summerland Hospital Society acknowledges receipt of the sum of \$5.67 towards the funds of the hospital, being proceeds of the lecture entitled "Jean Valjean" given by Mr. Kelley to the Trout Creek Local of the U.F.B.C.

It is the announced intention of the Imperial Oil Company to put on a motor tank truck service to cover Summerland, Naramata, Penticton, and points south. General Manager C. M. Rolston was a visitor to the Valley a few days ago, and decided on introducing this service. He believes the price of gas will remain practically unchanged, and his company does not expect there will be any shortage in this commodity.

Next Week's Work In The Orchard

By R. H. Helmer.
Weeds grow well now and the liberal application of the hoe saves moisture and will liberate us up to take part in the big Sports on the 24th.

Vegetable gardens should be in now and peas planted each week for a succession. Plant garden beets, and carrots now for early use and plan to have another planting in June for winter storage. This is the way to get quality, flavour and colour in them.

Water will be on next week, study it more this year and make it work for you to better advantage. You want to wash the fertilizers that you have bought into the soil, but not through it. Coarse, gravelly subsoils must be irrigated often and in small quantities. This means that ten acres of gravelly subsoil should be all irrigated once a week or two weeks as the case demands. Better subsoils could be irrigated five acres at a time with double the water. Cultivate the minute the soil crumbles after each irrigation.

R. Pollock is on a business visit to the Coast.

Willis Walter returned last week from a short business visit to Castor, Alberta.

The Rev. James Dunlop went down to the Coast on Wednesday morning for a short visit.

Mr. J. G. Henry, who suffered a broken collar bone in a motor accident recently is able to be about.

Joe Graham arrived home on Tuesday night from Toronto, where he has been taking a course in dentistry.

C. W. Lees and Mr. Montague, manager of the Kelowna Fruit Co., were visitors to Summerland last week end.

In contemplation of his departure from Summerland, Dr. Windeler was entertained at an informal dance last Saturday evening.

Dr. Windeler has reconsidered the question of removing to the northern interior and informed The Review this week that he had decided to continue practising in Summerland.

Miss Nicholson of the Central School staff has been off duty suffering from appendicitis. She expects to be back with her class on Monday, Mrs. J. R. Tate having been in charge in the meantime.

Summerland Oddfellows held a Church parade on Sunday morning, accompanied by a number of visiting brethren. They marched to St. Andrew's Church, where the Rev. W. A. Alexander gave them an address on the subject of "Brotherhood."

Mr. and Mrs. McEwen of Winnipeg arrived here recently with the intention of locating, and are at present the guests of Mr. and Mrs. E. Vandenburg. Mrs. McEwen, nee Miss MacFarlane, has been a visitor to Summerland on former occasions.

LATEST STYLES IN FANCY WAISTS

Admission to the fortnightly dances will now be restricted to MEMBERS ONLY. No admission by payment.

K. S. Hogg is visiting his father in Vancouver.

The contractors are now blasting the stumps on the site of the new storage building.

Announcement is made in this issue of the formal transfer of the Ritchie lumber yard to the Community Lumber Co.

Miss K. Babbitt returned to Vancouver on Wednesday after a short visit here at the home of her aunt, Mrs. T. J. McAlpine.

His Summerland friends will learn with regret of the serious illness of Carl Bray, who is now in the Penticton Hospital, suffering from double pneumonia.

Just received—A shipment of unlined men's work gloves, and also half-inch and five-eighth rope, all at new and lower prices. Beer's Shoe Store.

Miss Bertie Carter of Kerrisdale came in from the Coast on Thursday to spend a day with her friend, Mrs. D. J. Welsh, afterwards proceeding to Peachland, where her mother and sister reside.

The Summerland High School base ball team played the Penticton team at the latter town last Saturday, and gained a victory of 18 to 6. The Penticton team is expected here tomorrow to play a return match.

W. C. Kelley has sold his corner property opposite the McIntyre corner to A. C. Patterson, local manager of the Community Lumber Co. Mr. Patterson has erected temporary quarters on the lot and his family has joined him here. He purposes erecting a house at an early date.

AN ANNOUNCEMENT

RUSSELL V. HOYT, Optometrist and Optician, has opened his offices in the Kendall Block, on Front Street near Main, Penticton, where he will specialize in the correction of errors of refraction for better and more comfortable vision.

Mr. Hoyt is a graduate of two of the best optical colleges known, having studied two years in each, and has also taken post-graduate courses several times with a view to maintaining his position as an optical specialist equal to any. Twenty odd years of successful practise has proven his position.

Mr. Hoyt has all of the modern scientific instruments and appliances, electrical and other, for eye-sight examination and testing. Necessary instruments will accompany him to points he visits regularly.

In some instances of poor or painful vision it happens that the cause is not of the eyes, but another trouble entirely. In such cases patients will be so advised and directed to the medical practitioner, dentist, or other as appears best.

The sum total is to be—

BEST GLASSES WHEN NEEDED, BEST ADVICE ALWAYS.

Mr. Hoyt has established his home offices in Penticton, and will endeavor to be in Summerland, Naramata and possibly Peachland once or twice each month.

He will be in
SUMMERLAND, Monday, May 2nd at Summerland Hotel;
NARAMATA, Tuesday, May 3rd at Naramata Supply Company Store.

APPRECIATED

In formally advising the public of Summerland that I have sold my Ice Cream, Confectionery and Catering Business to Mr. Scott Darkis, I wish to thank the people for the patronage they have given me, and I bespeak for my successor the same generous support which I have enjoyed.

J. L. CREGO.

WATER NOTICE.

(Use and Storage).

TAKE NOTICE that Naramata Irrigation District, whose address is Naramata, B.C., will apply for a licence to take and use 1,500 acre feet and to store 1,000 acre feet of water out of North Fork, Lequime Creek, also known as Chute Creek, Shoot Creek, and Wild Horse Creek, which flows west and south and drains into Okanagan Lake on or near Lot 212. Group 1, Osoyoos Division of Yale.

The storage dam will be located at a point 1 1/2 miles due west of 12 M.P. Lot 2711. The capacity of the reservoir to be created is about 800 acre feet, and it will flood about 80 acres of land. The water will be diverted from the stream at a point about three miles west of 12 M.P., Lot 2711, and will be used for Irrigation, Domestic and Power purposes upon the lands described as District Lots 156, 206, 207, 209, 210 and 211, and 266, and Blocks 205, 221, 222, 223, 245 and 247 of Registered Plan 661 and part of District Lot 286, a full description of which is given below.

This notice was posted on the ground on the Seventeenth day of March, 1921.

A copy of this notice and an application pursuant thereto and to the "Water Act, 1914," will be filed in the office of the Water Recorder at Fairview, B.C.

Objections to the application may be filed with the said Water Recorder or with the Comptroller of Water Rights, Parliament Buildings, Victoria, B.C., within thirty days after the first appearance of this notice in a local newspaper.

The description of territory to be served is as follows:—District Lots 156, 206, 207, 209, 210, 211 and 266, and Blocks 205, 221, 222, 223, 245 and 247 of Registered Plan 661, and that part of District Lot 286 described as follows: Commencing at the intersection of the northerly boundary of said block 245, R.P. 661 with the easterly boundary of District Lot 286; thence along the northerly boundary of said Block 245 to the north-west corner of the said block; thence south 59 degrees 28 minutes west a distance of 2 chains 34 8-10 links; thence south 82 degrees 25 minutes west a distance of 1 chain 17 4-10 links; thence north 1 degree 58 minutes west 27 links; thence north 78 degrees 5 minutes west 2 chains 65 9-10 links; thence north 54 degrees west 3 chains 82 3-10 links; thence north 9 degrees 14 minutes east 82 4-10 links; thence north 56 degrees 44 minutes east 4 chains 65 6-10 links; thence north 35 degrees 53 minutes west 90 links; thence north 54 degrees 13 minutes east 12 chains 10 1/2 links; thence south 7 degrees east 1 chain 95 2-10 links; thence south 28 degrees 30 minutes east 1 chain 75 3-10 links; thence south 52 degrees 9 minutes east 5 chains 5 1-10 links, more or less, to the east boundary of said Lot 286; thence southerly along the said boundary to the point of commencement.

NARAMATA IRRIGATION DISTRICT,

Applicant, F. H. Rounds, Agent. The date of the first publication of this notice is April 1st, 1921.

WATER NOTICE.

(Storage).

TAKE NOTICE that Matt G. Wilson whose address is Paradise Wharf, Naramata P.O., B.C. will apply for a licence for the storage of 200 acre feet of water out of Chute Lake and Chute Creek, also known as Lequime Lake and Lequime Creek which flows South West and drains into Okanagan Lake, about 500 feet from North West corner of Lot 212, Group One, Osoyoos Division of Yale District.

The storage dam will be located at the outlet of Chute Lake. The capacity of the reservoir to be created is about 200 acre feet, and it will flood about ten acres of land. The water will be diverted from the stream at a point about 1 mile East of Outlet of Chute Creek and will be used for domestic and irrigation purposes upon the lands described as Lots 868 and S.L. 18 in Block 2711.

The licence applied for is to supplement a right to take and use water as per conditional Licence No. 1876.

This notice was posted on the ground on the Seventeenth day of March, 1921.

A copy of this notice and an application pursuant thereto and to the "Water Act, 1914," will be filed in the office of the Water Recorder at Fairview, B.C.

Objections to the application may be filed with the said Water Recorder or with the Comptroller of Water Rights, Parliament Buildings, Victoria, B.C., within thirty days after the first appearance of this notice in a local newspaper.

MATT G. WILSON, Applicant, By Naramata Irrigation District, Agent.

per F. H. Rounds, Trustee. The date of the first publication of this notice is April 1st, 1921.

THE PLANTING OF FRUIT TREES

BY M. B. DAVIS, Assistant Horticulturist, Central Experiment Farm, Ottawa.

Below is an interesting article on the subject of fruit tree planting. This has only now been issued from Ottawa and is still in time to be of help in Eastern fruit districts, but rather late for British Columbia. Ottawa should wake up to the fact that we are weeks ahead of the East and give us this advice in time to be of fullest value.

This is the season for setting out young fruit trees, and it should be done just as early as possible. As soon as the ground is in condition to work, preparations should be made for the planting of the young orchard. A good, deep ploughing, if the land was not fall ploughed, should be given, followed by a thorough disking.

After the land has been worked into good condition, proceed to lay out the orchard. As it is desirable to get the trees lined up in all directions, this laying out should be done with care. Start at one corner of the field and plant a stake, then run a straight line parallel to a fence, or in the desired direction. Having established this line, it is now necessary to run another line at right angles to it.

Go back to the first stake planted; with a stout cord measure off eight feet on this line and make a mark at that point; now shorten your line to six feet and by holding one end of the cord at the first stake planted, draw a circle on the ground. Having this done lengthen the cord to ten feet and hold one end of it at the point you marked off eight feet from the first stake, and draw another circle. Where this circle cuts the first circle made, plant a stake. The line made by this stake and the first one planted is at right angles to the line first run.

After having run this second line as far as desired the same procedure can be used to complete the third side of the square, and so on until there is a complete square around the field.

Now decide upon the distances apart your trees are to be placed. For apples it is generally 30 feet by 30 feet or 35 feet by 35 feet. For plums 20 feet by 20 feet.

If the thirty foot distance is chosen, mark off thirty-foot distances on all four sides of the square and plant a stake at each place.

To fill in the centre of the square three persons are required, one to hold stakes, and the other two to sight. One sighter lines up the stake holder for one direction and the other sighter lines him up for the other direction. When in line in both directions he plants the stake and then proceeds to the next point, and so on.

Bargain List

- McLaughlin Buick Runabout good cord tires all round...\$450.00
490 Chev., overhauled, run 6,000 miles, new tires all round 650.00

W. J. ROBINSON

Notary Public, Real Est. & Insurance

R. C. LIPSETT

VETERINARY SURGEON
Residence: Hospital Hill. Phone 693

Where it is impossible to obtain the services of three people, two persons may use the following alternative method: After lining up all sides of the square, a wire may be stretched from one side of the field to the other and drawn taught, and the proper distances measured off and stakes planted. The rest of the procedure is the same in both cases.

After all stakes are planted, bring into use the planting board. This is a board about six or eight feet long with a notch at either end and one directly in the centre.

Its use is very simple. Place the centre notch over one of the stakes which is located where a tree will eventually be planted, drive a peg through each of the notches at the ends of the board. The board and the stake may now be removed and the hole for the tree dug.

After the hole is dug it is easy to get the tree in the same place as the stake was by bringing back the board and fitting it over the two end pegs. The tree, if then placed in the centre notch, will be in position.

In planting young trees a few precautions must be observed. The trees should not be allowed to become dry at any time before planting, but should be taken to the field wet.

The hole should be large enough to accommodate the roots without jamming. All broken parts of roots should be trimmed off neatly.

When planting the tree, the surface soil is generally put in first and the soil should be continually tramped or rammed as the planting proceeds. Rough handling in this manner can do no harm, but will do good.

After the trees are set, the top

'WAY DOWN EAST' IS GREAT PICTURE

A human interest drama with an epic sweep—that is D. W. Griffith's masterly screening of "Way Down East," which comes to the Empress Theatre at Pentiction on May 9-10. Griffith has taken the tawdry, sentimental melodrama of a score of years ago and by his art has transformed it into something that approximates a truly great play. He has done for "Way Down East" what Joseph Jefferson did for "Rip Van Winkle."

Lillian Gish's portrayal of Anna Moore never sinks to the commonplace or to maudlinity. To the character of the betrayed girl she imparted a dignity and restraint in excellent keeping with the high note struck by Griffith. Richard Barthelmess makes a convincing and attractive hero. The remainder of the cast has been selected with an eye to the pictorial and human possibilities of the widely varied roles.

Owing to advance bookings, "Way Down East" will not be shown in adjacent towns to Pentiction. Those desiring to go from Summerland and vicinity are urged to phone, call or write the Big Four Drug Store, and make their reservations.

Only three performances will be given: Monday and Tuesday evenings at 8.15 and a special matinee on Tuesday at 2.15.

Should be cut back about one-third or one-half, and constant cultivation given until mid-summer, when a cover crop or weeds may be permitted to grow.

Synopsis of Land Act Amendments

Minimum price of first-class land reduced to \$5 an acre; second-class to \$2.50 an acre.

Pre-emption now confined to surveyed lands only.

Records will be granted covering only land suitable for agricultural purposes and which is non-timber land.

Partnership pre-emptions abolished but parties of not more than four may arrange for adjacent pre-emptions with joint residence, but each making necessary improvements on respective claims.

Pre-emptors must occupy claims for five years and make improvements to value of \$10 per acre, including clearing and cultivation of at least 5 acres before receiving Crown Grant.

Where pre-emptor in occupation not less than 3 years, and has made proportionate improvements, he may, because of ill-health, or other cause, be granted intermediate certificate of improvement and transfer his claim.

Records without permanent residence may be issued, provided applicant makes improvements to extent of \$300 per annum and records same each year. Failure to make improvements or record same will operate as forfeiture. Title cannot be obtained in less than 5 years, and improvements of \$10 per acre, including 5 acres cleared and cultivated, and residence of at least 2 years are required.

Pre-emptor holding Crown grant may record another pre-emption, if he requires land in conjunction with his farm, without actual occupation, provided statutory improvements made and residence maintained on Crown granted land.

Unsurveyed areas, not exceeding 20 acres, may be leased as homesteads; title to be obtained after fulfilling residential and improvement conditions.

For grazing and industrial purposes areas exceeding 640 acres may be leased by one person or company. Mill, factory or industrial sites on timber land not exceeding 40 acres may be purchased; conditions include payment of stumpage.

Natural hay meadows inaccessible by existing roads may be purchased conditional upon construction of a road to them. Rebate of one-half of cost of road, not exceeding half of purchase price, is made.

PRE-EMPTORS' FREE GRANTS ACT

The scope of the Act is enlarged to include all persons joining and serving with His Majesty's Forces. The time within which the heirs or devisees of a deceased pre-emptor may apply for title under this Act is extended from one year from the death of such person, as formerly, until one year after the conclusion of the late war. This privilege is also made retroactive.

No fees relating to pre-emptions are due or payable by soldiers on pre-emptions recorded after June 26, 1918. Taxes are remitted for 5 years. Provision for return of moneys accrued, due and been paid since August 4, 1914, on account of payments, fees or taxes on soldiers' pre-emptions.

Interest on agreements to purchase town or city lots held by members of Allied Forces, or dependents, acquired direct or indirect, remitted from enlistment to March 31, 1920.

SUB-PURCHASERS OF CROWN LANDS

Provision made for issuance of Crown grants to sub-purchasers of Crown Lands, acquiring rights from purchasers who failed to complete purchase, involving forfeiture, on fulfillment of conditions of purchase, interest and taxes. Where sub-purchasers do not claim whole or original parcel, purchase price due and taxes may be distributed proportionately over whole area. Applications must be made by May 1, 1920.

GRAZING

Grazing Act, 1919, for systematic development of livestock industry provides for grazing districts and range administration under Commissioner. Annual grazing permits issued based on numbers ranged; priority for established owners. Stock owners may form associations for range management. Free, or partially free, permits for settlers, campers or travellers, up to ten head.

Business Change I wish to inform the public that I have sold my Lumber Yard and Business to the COMMUNITY LUMBER COMPANY, and would respectfully ask that my successors be given the same generous support that I have enjoyed. I take this opportunity to thank the people of Summerland for their patronage and confidence during the years I have been engaged in the Lumber Business. Respectfully, WM. RITCHIE.

WILL SUBMIT SCHOOL BY-LAW

(Continued from Page 1)

ravine near the Koop property be raised 4 feet, the culvert lengthened and that section of the road shaled. Report adopted.

Among the correspondence was an appeal from G. W. Johnson for domestic water extension to his home. He pointed out that he had been asking for this service for nine years, and that other extensions had been made. The matter was discussed at some length, and it was shown that 1,400 feet of pipe would be necessary to give him connection and Mr. Johnson was not prepared to contribute to this expense in the customary way. It was suggested that connection might be given through private property at less expense, and this will be looked into.

Mr. W. H. Hayes protested against the fact that the council had not laid a second or larger pipe between Dale's corner and the Y from which two six inch pipes lead, one to the south benches and the other to Hospital Hill and vicinity. He claimed that this was to have been undertaken, the pipe at Trout Creek Point to be utilized for this purpose. The Reeve emphasized the urgency of this connection, and more especially as

further demands were being made on these pipe lines. The matter is one requiring capital expenditure, and until a loan is raised by by-law there are no funds with which to make this and other pressing improvements.

Representing the Telephone Company H. C. Mellor asked for permission to erect a pole line west from the power dam to the Mercantile corner along the south side of Granville Road. He pointed out that the existing lines were overloaded, and more wires must be run. At present that section is served through a cable which is loaded to capacity. General approval was given, with the request that the position of the poles be marked when a representative of the municipality would pass on same.

It was nearly midnight when the council meeting ended, an immense amount of detail incidental to the existing method of government, and particularly because of the irrigation system, having been disposed of.

Lots of things children would never think of doing if their parents did not forbid.

Naramata To Have 9 Hole Golf Course

J. M. Robinson has been interesting himself in the establishing of a nine hole golf course on the benches south of Naramata. A syndicate, of which Mr. Robinson is the head, has purchased a 100 acre tract at Four Mile, upon which it is intended to lay out links with the idea of adding another attraction for tourists to Naramata's many charms. Mr. Robinson has been very active in obtaining electric power for Naramata since it became apparent that the Kootenay Power would be built up the Valley, in which he has been successful. Mr. Robinson is hopeful that the beautifully situated hotel property at Naramata will soon be taken over and operated as a Ladies' College.

William Hollins & Company, Limited, Mansfield, England, have been incorporated in British Columbia with a capital of \$2,000,000, and will enter into the manufacture of all kinds of textiles.

CORPORATION OF THE DISTRICT OF SUMMERLAND.

BY-LAW NO. 140.

A By-Law to enable the Corporation of the District of Summerland to raise by way of loan the sum of Thirty Thousand Dollars (\$30,000), for School Purposes.

WHEREAS it is deemed expedient to borrow the sum of Thirty Thousand Dollars (\$30,000) for school building purposes;

AND WHEREAS it is necessary for the purposes aforesaid to raise by way of loan upon the credit of the said Municipality the sum of Thirty Thousand Dollars (\$30,000), payable on the First day of August, 1941, bearing interest in the meantime payable half yearly at the rate of seven per cent. (7 per cent.) per annum, the principal of such loan when raised to be applied for the purposes aforesaid;

AND WHEREAS the said amount of Thirty Thousand Dollars (\$30,000) is the amount of the debt which this By-law is intended to create; AND WHEREAS for the payment of the said principal it is necessary to raise the sum of One Thousand and Seven Dollars and Forty-seven Cents (\$1,007.47) by rate in each and every year;

AND WHEREAS for the payment of the said interest it is necessary to raise the sum of Twenty-one Hundred Dollars (\$2,100) by rate in each and every year;

AND WHEREAS the amount of the whole rateable land and improvements of the Corporation of the District of Summerland according to the last revised assessment roll is Three million, two hundred and seventy-two thousand, eight hundred and eighty-seven Dollars (\$3,272,887); AND WHEREAS the total amount of the existing debenture debt of the said Corporation of the District of Summerland is Four hundred and fifty-seven thousand, five hundred Dollars (\$457,500), of which none of the principal or interest is in arrears;

NOW THEREFORE the Municipal Council of the Corporation of the District of Summerland in open meeting assembled, enact as follows:

(1) It shall be lawful for the Reeve of the said Corporation of the District of Summerland to raise by way of loan from any person or persons, body or bodies corporate, who may be willing to advance the same on the credit of the Municipality by way of the Debentures hereinafter mentioned, a sum of money not exceeding in the whole the sum of Thirty thousand Dollars (\$30,000), and to cause all such sums so raised and received to be paid into the hands of the Treasurer of the Corporation of the District of Summerland for the purposes and with the objects hereinbefore recited.

(2) It shall be lawful for the Reeve to cause any number of debentures to be made for a sum not exceeding One thousand dollars (\$1,000) each, bearing interest at the rate of Seven per cent. (7 per cent.) per annum, not exceeding in the whole the sum of Thirty thousand Dollars (\$30,000), and all such debentures shall be sealed with the seal of the said Corporation, signed by the Reeve and counter-signed by the Treasurer of the said Corporation.

(3) The said Debentures shall bear date the First day of August, 1921, and shall be made payable in twenty years from the date thereof, at the Agency of the Bank of Montreal at Summerland, British Columbia.

(4) The said Debentures shall have coupons attached for the payment of the interest at the rate of seven per cent. (7 per cent.) per annum on the amount of the said Debentures, and such interest shall be payable half yearly on the First days of the months of February and August in each and every year, and the signatures to such coupons may be either written, stamped, printed or lithographed.

(5) An amount shall be raised and levied annually by a rate sufficient therefor on all the rateable land or land and improvements within the Municipality, in addition to all other rates, to pay interest on the debt hereby created during the currency of the said Debentures and to provide for the payment of the said debt when due.

(6) The sum of Twenty-one hundred Dollars (\$2,100) shall be raised and levied annually by a rate sufficient therefor on all the rateable land or land and improvements within the Municipality in addition to all other rates for the payment of the interest on the said Debentures.

(7) The sum of One thousand and Seven Dollars and Forty-seven Cents (\$1,007.47) shall be raised and levied annually by a rate sufficient therefor on all the rateable land or land and improvements within the Municipality in addition to all other rates for the payment of the debt hereby created when due.

(8) This By-law shall before the final passage thereof receive the assent of the electors of the said Corporation of the District of Summerland in the manner provided for by the Municipal Act, 1914, and Amending Acts.

(9) This By-law shall come into force and take effect on the First day of August, 1921.

(10) This By-law may be cited for all purposes as the School Building Loan By-law, 1921.

DONE AND PASSED by the Municipal Council the Twenty-sixth day of April, 1921.
RECEIVED THE ASSENT OF THE ELECTORS of the Corporation of the District of Summerland the _____ day of _____ 1921.
RECONSIDERED AND FINALLY PASSED by the Municipal Council, signed by the Reeve and Clerk, and sealed with the Municipal Seal this _____ day of _____ 1921.

Reeve. _____
Clerk. _____
