WILL RESTRICT PIPE SERVICE

Water Committee Presents Report. Asked to Apply Fence Law

THE SHORE ROAD

Municipality to be Asked to Pay Portion of Cost of Temporary Highway

A lengthy report on the irrigation system and its administration was laid before the municipal council on Tuesday by Chairman Kirk of the water committee. Among other things the report pointed out that that section of the main canal above the reservoir in the form of a wooden flume is running to capacity. This particular section was not enlarged when the recent improvement was made.

The report stated further that Water Engineer Norrington suggested that a man should be stationed at the dam at the head of Aeneas Creek during the flood period. During discussion on this, Municipal Clerk Nixson suggested wireless communication, as without this or a telephone service one or two men at head waters would be of little value.

It was reported that the dams at the head of Trout Creek were full. Chairman Kirk stated further that he had had a conversation with Mr. Norrington on the subject of surveying and preparing plans of the municipal dam on Canyon Creek, when Mr. Norrington had favored delaying this work until along in August.

An extension of the domestic water pipe line along the street running west, south of the Baptist church, was recommended, provided the parties interested would finance the same. A valve in the water pipe near the C. H. Elsey property was recommended. This would not in any way affect the service to water users further down.

The report pointed out that some 1800 feet of pipe above Crescent Beach was in bad condition and must be replaced. Flume could be substituted for about 1000 feet of this. It is necessary that this work be done before another season.

Several other repairs and improvements to the system were suggested. The report was adopted.

Mr. J. C. Dufresne made personal application for the position of municipal engineer. No action was taken at Tuesday's meeting.

The chairman of the water committee was authorized to engage a draughtsman to lay out on a map the location of the pipe lines and the various valves and connections.

James Fyfe asked for an order compelling neighbors to erect their share of line fences. He was asked to make application in writing for the appointment of fence viewers, giving the required notice to the other parties.

The public works committee reported that a cement culvert is being built across the flume near the Shannon property at Garnett Valley. They asked that the K.V.R. be reminded of an earlier request for a

URGING SUNDAY LAKE SERVICE

The importance of a seven day lake service throughout the fruit shipping season is being urged upon the C.P.R. Without a Sunday boat to take care of express shipments shippers claim they suffer considerable loss and no little inconvenience. The matter has been taken up by the several boards of trade in the valley, and a petition to the railway company asking for the seven day service has gone forward from these boards.

BUILDING LOAN OFFERED COUNCIL

In order to expedite the distribution of the better housing fund, the municipality of Summerland was asked by wire this week to accept \$8,000, the money to be taken up by the municipality as soon as it becomes available to the province from the Dominion fund. As a reply was required by telegraph, the reeve instructed the clerk to ask if a larger sum would be available, stating that the smaller sum offered would not justify the expense incidental to handling this fund.

crossing at the southern end of Peach Valley.

A letter from District Road Engineer Col. Donnelly intimated that the municipality would be charged with 25 per cent of the cost of opening the upper road from Jones' Flat to Van Hise's. The council did not consider this their responsibility and thought this emergency road should be constructed at provincial cost. In pointing out the considerable expense to which the municipality is likely to be put when the province repairs the lake shore road, the reeve stated that a considerable portion of this road must be outside the municipal limits in that it was built under cliffs outside highwater mark.

D. C. Thompson was appointed pound keeper in place of John Dale, resigned. Mr. Thompson has built a corral on his property on the west end of Jones' Flat. Formal notice of the change is given in this issue.

A. Rutherford asked for a culvert under the K.V.R. He was told that the clerk had written to the railway company on his behalf, but that no answer had been received. The railway cuts Mr. Rutherford's property in two.

It was left with Councillor Thornber to arrange for a culvert on the road leading to the shore at Troff Creek point.

As a result of complaint of lack of pressure in the Giant's Head main, the clerk was authorized to insert an announcement in The Review warning citizens against using domestic water for irrigation purposes or for the sprinkling of lawns and gardens between the hours of 7 a.m. and 7 p.m. Offenders will be prosecuted.

In answer to a request for an increased grant to the hospital, the clerk was instructed to point out to the society that the municipal contribution to the hospital for capital and current account totalled nearly \$2,000, and further that the tax levy had already been made.

CANADIAN PLAYERS' DEBUT

Delight Critical Audiences in Two Playlets

"The Neighbors," a charming one act drama of human interest by Zona Gale, and "Will-o'-the-Wisp," also a one act drama, were the opening bills presented by the Canadian Players Thursday, Friday and Saturday evenings at the Home Theatre, recently completed at the farm home of Mr. and Mrs. Carroll Aikens, near Naramata. All three performances were attended by capacity houses. Saturday evening was designated as Summerland night and the audience was made up of people from this place, many motoring around the lower end of the lake, while many others took advantage of the special boat service arranged for the occasion.

Every seat was occupied when the curtain rose at 8:30 and for two hours the audience enjoyed a real and worth while program, responding with generous applause in appreciation, repeatedly filling the air with bursts of laughter at the mirth provoking incidents portrayed by the various members of the cast.

"The Neighbors" was presented first, and put the audience in good humor. The play presented a picture of rural life. Diantha Abel, the widow and village busybody was exceptionally well presented by Mrs. Aikens.

There was something so realistic about the whole affair that it left a deep impression upon all present. The sitting room in Mrs. Abel's home, with rag carpet and homespun rugs, the old armchair near the open door and "grandma" sitting there sewing more carpet rags and listening patiently to the prattle of her daughter, the widow, Mrs. Abel, busy with the family ironing.

The village grouch poked his head in the window and offered protest against someone piling cordwood on his premises and making dire threats what he would do, etc. The young clerk in the village grocery, in love with Inez, the widow's charming daughter, was there and as usual got tangled up in grandma's carpet rags in his awkwardness. Then there was Mrs. Trot, a neighbor whose life was made delightfully miserable by the discovery of a "buffalo bug" nest in her parlor rug that very morning.

Personal troubles, though numerous enough and of great importance to hear them related, were suddenly cast aside when it was announced that Mrs. Ellsworth, the village spinster, (Continued on Page 2)

CANADIAN TEAM TO REPRESENT CANADA AT BISLEY

Front row: Lieut. Col. Stark, Sir A. Bertram, Brig-Gen. E. W. Wilson (Pres. Dominion Rifle Assn.), Lieut. Col. Peck, V.C., D.S.O., M.P., Brig-Gen. Labelle, Gen. Armstrong, Brig-Gen. W. R. Ross, Major C. W. Butler, (Adjutant.)

Second row: Major George Mortimer, (G.C.F.G., Ottawa), Major F. Richardson, (16th C.S., Victoria, B.C.), Lieut. Patterson, (G.C.F.G., Ottawa), Capt. Swayne, Major C. R. Fruit Crop Prospects Still Continue Favorable is Horticulturist's Report

Planning Another Excursion of Growers to Study Orchard Practices in Wenatchee District

Although the June drop has been heavy there is still much thinning to do in many fruits, according to the weekly news letter of the horticultural branch of the department of agriculture, sent out last Saturday. The report follows:

Salmon Arm.

Tree fruit situation here much the same as last week. Thinning, and the last scab spray are in progress. Fruit is very clean to date.

Strawberries are coming in slowly, the plants are in fine shape with ample moisture to fill out the late berries.

Raspberries and loganberries look like a record crop. Raspberries will be ready a week or ten days earlier than last season.

Gooseberries and rhubarb are moving out.

Vernon.

The June drop of tree fruit in the Vernon district is now practically at an end, and from general observations of the whole district, there is apparently a good crop of most varieties of apples in sight. McIntosh, Wealthy and Duchess generally, are carrying a good load. Wagners are a good crop although apparently "off" in some orchards. Jonathans have taken a heavy drop, but taking the district as a whole, the trees are carrying a very fair load.

Duchess and Wealthy will need heavy thinning in many cases, but on other varieties this work will not be as heavy.

The Delicious throughout the whole district has suffered a very heavy drop, and this is one variety that will really show signs of lightness at harvest time.

Plums and prunes are practically through their stoning period, and indications point to a really good crop of these fruits.

Pears have dropped quite heavily, but generally speaking there is still a fair load left on the trees and this crop may prove a little lighter than last year.

The strawberry shipments are at their peak and the crop has been quite good. Other small fruits are coming along in very good shape and show promise of a good crop.

Early cherries, such as Governor Wood, Black Tartarian and Montmorency are now rolling in.

All fruits seem to be developing this season and most fruit trees are showing good size and color for the time of year.

Early vegetables are now much in evidence and we learn that the first car of mixed vegetables in which will be included the first shipment of new potatoes from the Vernon district will roll out on the 25th.

All truck crops are looking in very fine shape, excepting where depredations of the onion maggot has created many blank patches in the fields. Haying is in full swing and the crops are good. Grain crops generally have not looked as well for several seasons past.

Weather conditions are ideal for all growing crops.

Kelowna. Showery weather still prevails in the Kelowna district. Fire blight is still active and the outbreak has not yet ceased. Nevertheless the fruit crop is looking good, and given good weather, excellent quality should be produced.

Growers are finding that there is considerable thinning to be done notwithstanding the heavy June drop.

Stone fruits particularly have set well and considerable time is being taken to thinning this crop.

Tomatoes are coming along fast and other ground crops are in really good condition.

Penticton.

The weather is still cool and showery.

The June drop in Keremeos has been somewhat heavier than expected, and the trees are still carrying a very fair crop, which should size up well. Early sweet cherries are being shipped but the quantity is small.

Tomatoes and potatoes are looking well, and early varieties of potatoes are blossoming freely.

In the Penticton district fire blight does not appear to be spreading, but growers will have to watch it closely and cut promptly should it start to move.

Apples and pears are looking well.

MAY BAR OUT B. C. APPLES

Australian Authorities Have Fear of Fruit From Fire Blight Districts

An intimation that Australia proposes to put an embargo against all B. C. apples from districts which are reported as effected by fire blight, has been received by Fruit Inspector W. H. Lyne. The matter was the subject of discussion at the plant quarantine conference held at Victoria in which representatives of all the western states and provinces, Hawaii and Mexico were present.

"The threatened embargo will affect apples grown in Vernon, Kelowna and the Okanagan Lake area. Keremeos fruit will not be affected as that district is free from fire blight," says Inspector Lyne, who estimates the apple shipments from B. C. to Australia at from 30,000 to 70,000 boxes.

"Australia naturally wants to protect itself against any risk of contagion, just as we protect ourselves against any reported contagion," states Mr. Lyne.

At the conference, although the opinion of all the experts was that no apple affected by fire blight could possibly pass the packer, and that therefore the risk of infection was practically nil, yet none of the pathologists would stake his reputation that fire blight could not possibly be transmitted.

and although the June drop has been somewhat heavy, the trees are still carrying a good crop. Peaches are showing up much better than earlier in the season and a fair crop in most cases will be harvested.

Summerland.

Weather conditions have improved, and although showery it is much warmer.

Trees are putting on a good growth and the fruit is sizing up well.

Thinning of apricots and peaches is now practically finished, but in a few instances some growers are behind with this important operation.

The thinning demonstrations have created a good impression, and has resulted in many growers making a systematic attempt to carry out this very essential work.

There has been no serious outbreak of twig blight this season so far.

Governor Wood, Black Tartarian and Early Richmond are moving out. A few growers are shipping early cucumbers.

That rains in the coast districts are greatly hindering the harvesting of the small fruit crop is apparent from bulletins from the Lower Mainland and the Islands.

Vancouver Island and Gulf Islands.

Rain has again interfered with the harvesting of the strawberry crop. Heavy showers on Saturday morning, the 18th inst., interfered with picking on that day and the following day, up until late in the morning.

Very heavy rains on Monday prevented any picking on that day at all. On the 21st there was a heavy tonnage picked but some berries had a tendency to be overripe and soft due to the rains.

The first two carsloads finished loading on the night of the 15th and rolled the next morning. The Gordon Head Fruit Growers' Association and the Saanich Fruit Growers' Association each loading a car. Two more cars were loaded on the 16th, one from each association. On the 21st inst. Saanich Fruit Growers' Association loaded one car and Gordon Head Fruit Growers' Association got away two cars, making a total of 9 cars shipped to date.

Lower Mainland. An exceptionally wet week end delayed strawberry picking and resulted in a heavy loss from overripe berries. The weather has now improved and with the Magoons in full crop better shipments are to be expected. Between 1500 and 2000 are coming into Vancouver daily. With low prices the demand is good and there is a big sale for jam purposes.

In organized districts many patches are not being picked, and there is a big wastage of berries on the ground. The canneries are taking practically nothing.

Shipments have been retarded on account of the lack of firm dry berries fit to carry. Up to the present 25 cars have gone east from Hatzie. The fruit generally is badly mud splashed, and poorly colored on under side, on account of the failure to use

straw. Picking has materially improved, but there is still a lack of care being shown in selection of berries suitable to ship.

A few crates of raspberries have been shipped from Mission district. Expectations are for a big crop.

Oregon Champion gooseberries are being shipped as the growers take the time to pick them.

A few crates of Early Richmond cherries are on the market, mainly from Chilliwack.

Apple scab is very prevalent throughout the Valley and the prospect of much clean fruit is small.

Growers Excursion to Wenatchee. The next excursion of fruit growers to Wenatchee will leave Penticton on July 12, and it is planned to reach Wenatchee the same night. It is hoped that a large number of growers will take advantage of this trip. Further announcement will be made relative to this trip in the press.

Cover Crop. That clean cultivated orchards should be sown early in July to hairy vetch is the advice of district horticulturist W. T. Hunter. He says:

The most generally accepted time for the seeding of hairy vetch will be at hand shortly. Those who are best informed on the growing of vetch advise us that the first two weeks of July will give the best results. If sown earlier than that the vetch may come into bloom and will be winter killed, but as a good catch can be secured at any time up to the 15th of July, it is advisable to seed early in that month, as a better stand, particularly a better root development, will be secured before winter. While admitting that alfalfa sod much may be the most economical and the best all round system of soil treatment, we are not assured that our water supply is sufficient at the present time in many of our districts and we would strongly advise the growers at this time to make every effort to get in at least a part of their orchards to hairy vetch.

The advertising aims to tell housewives about the crop, when it will be arriving on the prairies and coast markets, and urging housewives to place their order with their dealers early so that they will be assured of a supply of fruit, and also in this way helping to keep down the shrinkage from decayed fruit in the retail stores.

PROMOTIONS IN PUBLIC SCHOOLS

Report Reflecting on Work of Term Just Ended

Names in order of merit throughout.

Division I.....S. A. MacDonald. Promoted to high school on principal's recommendation. Possible, 1100.

Ella Bowering, 784; Helen White, 753; Dorothy Garnett, 752; Orville Dunham, 751; Alice Limmer, 72 Hazel Harding, 718; Charlie Clark, 711; Isabel Hogg, 704; Mabel Shields, 699; Gertie Arkell, 690; Laura McLachlan, 688; Eva Johnston, 683; Alvin Wilson, 680; Willie Ritchie, 672; Ella Morrison, 662; Margaret Munn, 658; Cyril Taylor, 657.

Division II..D. Davidson.

To entrance class: Alice Trayler, Jean Blewett, Willie Thornton, Bessie Tomlin, Emily Wallock, Rose Bardsley, Mildred Shields, Lillian Hunt, James Smith, Jessie Rutherford, Nellie Thompson, Stella Wilson, John Nicholson, Ernest Doherty, Mary Dunham, Lester Arkell, Eric Johnson, Nicholas Solly, Ida Parro, Zoe Fudge, Edith James, Adrian Howell, Kathleen Monro, Archie Nicholson, Harvey Wilson, James Clark, Cecil Watson. On trial, George Ward and Myrtle Walden.

Division III.....Miss B. Ball.

To Junior fourth: Doris Jackson, Alannah Sutherland, John Plant, Agnes Ramsay, Margo Riley, Jim Wilson, George Denike, Mary Gartrell, Jack Bernard, Margaret Ritchie, Tom Harris, Edgar Walker, Rhodes Elliott, Doreen Soul, Violet Atkins, Joe McLachlan, Kenneth Nicholson, Marjorie King, Campbell McAlpine, Harry Dunsdon, May Walker, Jack Purves, Harold White, Bertha Riley, Charlie Tait, Gertrude Shields, Ted Dunsdon, Jack Dunsdon, George Washington, Nora Hampshire.

Division IV. Miss J. Nicholson

To Senior third: Jim Reid, Mary Simpson, Kenneth Gartrell, Edna Trayler, Ian Campbell, Jack Bowering, Ralph Blewett, Loretta Inglis, Mary Munn, Dorothy Lott, Tommy Terai, Annie Williams, Jim Purves, Iris Williams, Mildred Laidlaw, Robert Spearman, Norah Clements, Carolyn Clark Albert Doherty, William Reid, Audrey Davidson, Wendell Cline, Arnold Koch, Isabel Dickinson, Johnny Cummings, Fred Dunsdon, Edna Smith, Percy Rand, Clifford Welsh, John Ramsay, Gwendoline Riley, Roselle James, Edward Smith, Dorothy Solly, Arthur Joy, Edith Monro, Violet Beck. On trial,

TO PUSH SALE OF B. C. FRUITS

Extensive Advertising Campaign Soon to be Launched

CO-OPERATING

Several Organizations Concerned Are Undertaking Biggest Canadian Fruit Publicity Campaign

Plans for an advertising campaign to help sell this year's crop of fruit, which were discussed at the annual meeting of the B. C. Fruit Growers' Association held at Nelson in January have been perfected and the first advertisements will appear early in July. Preserving fruits will be advertised first, then apples, each variety receiving attention.

The B. C. Fruit Growers' Association asked the B. C. Traffic and Credit Association, Vernon, to look after the details of the scheme and this organization together with the Western Canada Fruit Jobbers' Association, which included one hundred and forty wholesale fruit houses on the prairies, has worked out the details for the carrying out of the advertising campaign.

The advertising aims to tell housewives about the crop, when it will be arriving on the prairies and coast markets, and urging housewives to place their order with their dealers early so that they will be assured of a supply of fruit, and also in this way helping to keep down the shrinkage from decayed fruit in the retail stores.

In addition to the advertising in the newspapers, farm journals and magazines circulating in the territory where British Columbia fruits will be distributed, are to be used, while many other advertising features will be employed making better known the surpassing qualities of B. C. Fruits. This campaign, it is said, will be the biggest fruit advertising campaign ever conducted in Canada and should make British Columbia fruits better known than ever before.

Louise Bell, Ethel Pilkington, Arnold Cowan.

Division V. Miss R. Dale. Junior Third, (promoted in January.) Class Leaders: Enid Koch, Dorothy Chew, Mary Hack.

To Junior third: Eileen Tomlin, Winnifred Mann, Allan McKenzie, Jack Naylor, Stanley Taylor, Orval Cowan, Donald Orr, Dorothy Hunt, Joan Stevan, Alex. Smith, Reggie Eckerley, Elizabeth Munn, Gordon Nixon, Agnes Fisher, Kittie Beattie, Jean Robinson, Virginia Van den Nest, Jimmie Gould, Veronica Solly, Laurie Riley, Jean Rovers. On trial, Ralph Gillespie.

Division VI.....Miss K. Elliott. To Senior second: Joyce Plant, Jean Munn, Dorothy Bernard, Alastair McGowan, John Betuzzi, Gene Betuzzi, Laura Smith, Meri Betuzzi, (Continued on Page 6)

TO SEARCH FOR STORAGE SITES

Final arrangements have been made by the water branch of the department of lands for an examination of the water shed of Trout Creek for the purpose of locating storage sites and getting of other necessary information such as capacity, size of dams required, etc. Engineer J. C. Dufresne of Penticton has been assigned to this work by Provincial Water Comptroller Cleveland. Mr. Dufresne starts work at once.

EXTENDING GOV. TELEGRAPH SERVICE

Summerland now has restricted telegraph service over the government lines via Kamloops and Canadian National. Some months ago it was announced that a direct service would be given from the government telegraph office here. This service is now established, connection being given with all points except Vancouver, New Westminster and Vancouver Island, and The Review is informed that it is expected that this territory will be covered by the government telegraph service within a few days.

The Summerland Review

Published at Summerland, B.C., every Friday by THE REVIEW PUBLISHING COMPANY, LIMITED

Subscription Rates—In British Empire, in advance, \$2.50 per year; six months, \$1.40. To U.S.A. and other countries, \$3.00 per year. Advertising Rate Cards and information respecting territory and samples of paper mailed upon request, or may be seen at the office of any advertising agency recognized by the Canadian Press Association. Advertisers must have copy in by Wednesday noon in order to insure changes for standing advertisements. New display advertising copy can be accepted one day later. Correspondence—Letters addressed to the Editor and intended for publication must be short and legibly written on one side of the paper only. The longer an article, the shorter its chance of insertion. All communications must bear the name of the writer, not necessarily for publication. The publication or rejection of articles is a matter entirely in the discretion of the Editor. No responsibility is assumed by the paper for the opinions expressed by correspondents.

FRIDAY, JULY 1, 1921.

THE CANADIAN PLAYERS

In his efforts to encourage wholesome and worth while productions among local people, Mr. Carroll Aikens is performing the community double service. The growing generation will greatly benefit in an educational way and the public will be served a long felt want in the nature of opportunities to enjoy desirable performances.

Mr. Aikens has gone to no end of expense in the erection of a beautiful and well arranged playhouse, equipped with every modern appliance. No pains or expense have been spared, and judging from the many expressions heard since the Canadian Players appeared in their opening roll last week, the public is going to receive Mr. Aikens' efforts with sincere appreciation. This is as it should be and The Review joins the public in its praise and appreciation of his commendable work. To the Canadian Players we also offer congratulations upon their first appearance, and predict that success will crown their future productions.

OKANAGAN'S OPPORTUNITY

An apple show in which many sections in Canada are taking a lively interest is to be held in London this fall. There has not in a long time been offered a better opportunity to obtain extensive and valuable publicity for this and other sections of the Okanagan as is given in this proposed national apple show. Will we take advantage of it?

The importance of the show is referred to by J. Forsyth Smith, Canadian fruit trade commissioner, in a recent bulletin. He says:

"The indications are that the London Fruit Exhibition will be much more important from the standpoint of advertising Canadian apples in the United Kingdom than any exhibition previously held. This is because of the strong emphasis that is being laid, in all arrangements, upon the commercial side, the requirement that all exhibits shall be in commercial packages, to the exclusion of plate exhibits, the special propaganda facilities offered by the co-operation of the Daily Mail, the arrangements to be made by the Fruit and Potato Trades Federation (an organization of importers, wholesalers and retailers) for advertising the value of the apple as an article of diet, in connection with the exhibit, etc. The English apple growers will be strongly represented, not only in the British Empire and United Kingdom sections, but also owing to the fact that three important fruit growing areas, which hold annual local exhibitions of their own, have agreed to merge these in the London Exhibition. This will provide a considerable number of extra classes open only to growers in each of the respective sections, and will result in getting together a very considerable display. It is important, therefore, that Canadian growers should spare no effort to make sure that Canada is adequately represented. It is particularly important to have strong entries in the British Empire section, the only one in which commercially packed English and Canadian apples will enter into competition."

"SHEEP THAT LAY GOLDEN EGGS"

"Begorra! some of the best Irish bulls are English," said an Irish M. P. not long ago, and he was right.

When the Gladstone umbrella was all the rage, an Opposition candidate was heard to declare: "We, too, have an umbrella, and its voice will soon be heard; and when it speaks, it will speak with no uncertain sound."

Quite as good as the assertion of an M. P. who said: "I see a vision before mine eyes. I see the car of progress, rolling along in its majesty, gnashing its teeth as it rolls."

A better known M. P. is credited with the statement that "the British lion, whether it is roaming the deserts of India or climbing the forests of Canada, will not draw in its horns

nor retire into its shell," while another speaker averred that "all along the untrodden paths of the future we can see the hidden footprints of an unseen hand."

It was a politician, too, who some time ago declared that "the government keep cutting the wool off the sheep that lays the golden eggs."

Another speaker once stated that the union of England and Ireland would turn barren hills into fertile valleys.

But one M. P., speaking on total prohibition, rather overstepped the mark when he said: "The glorious work will never be accomplished until the good ship Temperance shall sail from one end of the land to the other, and with a cry of 'Victory' at each step she takes, shall plant her banner in every city, town and village of our country."

FORMIDABLE OPPONENTS

The picture shows Dempsey and Carpentier who will meet in the ring on July 2nd at Jersey City to battle for the world's honors.

CANADIAN PLAYERS' DEBUT

(Continued from Page 1)

was about to receive a boy from the family of a deceased relative. Instantly all topic turned to the big event. Though proud and greatly respected the spinster was very poor, and while little better off in a financial way themselves, plans were laid to assist her by collecting apparel and food from the neighborhood and presenting them at a shower party. It was all so human and lifelike, each character being well presented, and deserving more than mere mention.

At the close of the first play the audience was given its second pleasurable treat when Miss Elsie Craig of Penticton appeared, and rendered several vocal selections, accompanied by her sister, Miss Monica Craig.

The "Will-o'-the-Wisp" was of an entirely different nature. The settings for this play were beautiful and unique. On the shores of a lake a poor, kindly old mother bent with years of toil, anxiously awaited word from her long absent son.

Her humble lot was shared by "Will-o'-the-Wisp" in the guise of a dumb waif awaiting the return of the poet who found inspiration in the surroundings of the place. The Jealousy appears to learn what brought about the inspired influence. With her maid she was received by the hospitable widow, who told her that it was her home that the poet visited occasionally.

The poet's wife observed the waif sitting beside the fireplace, and unpleasant remarks followed. When all had retired for the night, leaving the waif in her accustomed place by the fireplace, the waif removed the cap from her head, letting flow to the waist an abundance of golden locks, and began a weird dance. Slowly at first she circled about the room, then by her secret charms enticed the poet's wife from her sleep to the edge of the distant cliffs. A dim red spot appears on the distant horizon and from the cottage window the widow and maid realize the fate of the poet's wife.

In this play the scene was made most wonderful by a combination of colors made possible by the use of a late model device for stage light regulating, purchased by Mr. Aikens in New York.

Beryl May gave a fine interpretation of the lonely widow. Mrs. J. L. Miller, the poet's wife, and Lila Young, her maid, were all that could be desired. Gladys Robinson, as the waif, was simply grand, her graceful dancing winning the hearts of all.

It is only fair to state that the first appearance of the Canadian Players in the Home Theatre captivated the audience, and won for all time the confidence of the public, and their next appearance will be heartily welcomed.

To oblige those who were unable to attend the performance last week, another presentation was given last evening.

Bountiful Harvest Promised

With the exception of the far eastern portion of Canada the country everywhere has every prospect of good crops. The third crop report of the season issued from the head office of the Bank of Montreal covers the subject as follows:

Prairie Provinces
Edmonton district: Conditions very favorable, sufficient moisture and no damage of any kind reported.

Calgary district: Crop making excellent progress. Considerable danger from grasshoppers in some parts but these are being combated. Lethbridge district: Conditions excellent south and east (on Sterling Weyburn line.) Elsewhere rain needed. Damage by cutworms at Lomond, Retlaw, Bow Island; unfavorable report from Retlaw, Regina district: All grains making strong growth under ideal conditions. Grasshoppers in south but no damage and precautions taken. Saskatoon district: Wheat uniformly good. All grains growing rapidly with indication heavy wheat and oat crop. Winnipeg district: Conditions continue excellent. Rains and prospects good.

Province of Quebec
Reports generally indicate that while recent rains have greatly improved growing crops, more moisture is badly wanted. Hay prospects poor. Grass pasture sorely in need of rain. Fruit prospects only fair.

Province of Ontario
Weather conditions this month have been very favorable to growing crops which as a whole have made excellent progress, and general outlook most favorable. Recent rains have been very beneficial. Fall wheat is headed out in some districts, average yield expected. Other grains satisfactory. Small fruits plentiful. Other fruits promise good yield. Hay is light in places, but fair yield is assured. Cutting now in operation.

Maritime Provinces
Lack of rain has retarded crops in all districts and rain is needed in practically all sections. Hay is expected to be light; fruit prospects continue fairly good.

Prince Edward Island
General conditions are good. A fair hay crop is expected, grass improving.

Province of British Columbia
Weather continues favorable with heavy rains more or less general. Field crops very satisfactory. Hay particularly heavy in all districts. Roots progressing favorably, with acreage below average; eighty per cent. yield predicted. Tomatoes and vegetables looking well. Tree fruits are passing through heavy June drop, but reports from Okanagan estimate apples and pears will equal crop of 1919. Stone fruits not as heavy as early set indicated. Berries abundant. Cherries below average. Pasture excellent.

A modern Saint George.

THE COST OF A BOX OF APPLES

Committee of Bankers Figure Cost of Apple Production At Wenatchee

A committee of Wenatchee bankers have prepared an estimate of the cost of producing a box of apples under 1921 conditions as to prices for labor and materials. This report was submitted at the recent annual convention of the Washington State Bankers' Association and will be used by the Federal Reserve Bank as a basis for regulating loans to growers.

This report shows that the average box of apples will cost \$1.19 including taxes, water fees and other overhead charges, delivered at the warehouse in the fall. The report follows: Itemized cost of producing one box of apples under present 1921 costs. Based on an average crop of 320 boxes per acre with 80 trees per acre of four packed boxes per tree.

Cost of tree with four boxes:	
Pruning, removing and burning brush	\$.25
Cultivation and ditching ready to irrigate	.10
Lime sulphur spray	.12
Calyx spray	.08
First cover spray	.05
Irrigation for two months	.15
Thinning	.13
Second cover spray	.05
Cost per tree with four boxes of apples as at July 1	.93
Cost per box July 1	.23
Cost per tree July 1 with four boxes per tree	.93
Cost of third and fourth cover sprays	.10
Irrigation and propping remainder of season	.20
Cost per tree of four boxes ready to harvest	\$1.33
Cost per box ready to harvest	.33

COST PER BOX	
Production cost	\$.33
Box complete made up	.18
Paper for box	.06
Picking	.06
Packing complete	.15
Orchard and market hauling	.05
Total	\$1.33
Taxes per tree	\$.40
Interest on investment per tree	.90
Water assessment per tree	.13
Overhead cost per four boxes	1.43
Per box	.36
Total cost per box	\$1.19

Correspondence

Summerland, June 27, 1921.
Editor The Review:

I think your editorial of June 24 re irrigation rates and land taxes is timely, and a discussion of these questions in the columns of The Review, with your permission, would be of great service to the community.

Without a doubt a large number of rate and tax payers are unable to understand why such an important utility as our municipal irrigation system does not stand upon its own merits and pay for itself. Considering that irrigation is an absolute necessity, and without it the greater part of Summerland property would be valueless, greater consideration of irrigation matters as a whole should be given.

There is a strong feeling around that under the present system of irrigation rating and taxation many are paying far too high for what they get, while others are getting far more than what they pay for.

Under the present system too, we are taxed and threatened with penalties if we do not pay in advance for what the council cannot guarantee to deliver.

Again, under the present system water users are frequently treated as though they had no right to ask for what they already have paid for in advance, but cannot get.

Who will blame underwriters for seeing in our most imperfect system what is clearly apparent to the next settler in our midst, that our irrigation system is still being run on

MORE ABOUT THAT NEW WORM

More about the new green worm which has made its appearance on the Washington side of the line in this valley is contained in the last issue of the Oroville Gazette, and is mentioned in other papers further south. After cleaning up the Russian thistle, they turned their attention and activities to the tender leaves of garden truck. One man who lost heavily, reports that the worm is dying off rapidly on his place.

The following official warning has been published by the Okanagan County Agent:

A very severe outbreak of a worm that closely resembles the true army worm is being reported from all sections of the Okanagan Valley. The first worms are almost always seen in large numbers during the day on young Russian thistles, but quickly spread to all garden truck as well as young alfalfa and corn.

Every farmer in the valley should examine his farm at once for a small green worm varying from 1-2 to 1 and 1-4 inches in length, which closely resembles a cut worm, especially the larger worms. These worms travel in large numbers about four o'clock in the morning. During the day a few will be seen feeding on plants.

If these worms are present on a farm quick action is necessary because they will practically destroy a garden in one or two days. The following control measures are advocated:

1. Scatter poison bran bait as follows: To 50 pounds of wheat bran and one pound of Paris green (or two pounds of arsenate of lead) add the juice of six oranges or lemons. Then bring the mass to a stiff dough by adding a thin, low grade molasses or syrup (molasses preferred) and scatter broadcast in small pieces throughout the field or along the rows. This poisoned bait may be safely used in alfalfa fields and where it is desirable if possible to save the crop for forage purposes. Keep away from chickens.

2. Poison them by spraying crops not intended for forage with arsenate of lead, 2 pounds to 50 gallons of water. Where spraying is not practicable the use of poisoned bran is recommended.

3. In case the worms are crawling in large numbers ditches may be dug in front of them or around them and the worms crushed. Post holes may be put in these ditches at a distance of ten feet and the worms trapped and killed with oil or by crushing. Poisoned bran may also be used in these ditches.

The above poisons are very dangerous and must be kept away from children, live stock or chickens. Where a farmer has some chickens they may be herded on the garden or infested section and control of the worms to a degree effected.

antiquated lines. It has not yet been placed on a business basis.

My intention in writing at the present time is to commence a friendly discussion. The reeve and the council are no doubt interested just now in the possibility of raising the irrigation rate so as to help solve the municipal financial problems. That is all right in its place. But water users are also interested in securing an efficient service and equitable rating. To get upon the latter basis every property should be considered, and a decision made as to the amount of irrigation water needed to supply its wants. Such irrigable acreage can surely be defined each year with but little trouble. When such total irrigable acreage for each year is considered and decided upon, and when total costs are considered, then, and only then, can those who have such responsibility, fix an equitable rate. It may be that the expense of measuring devices will have to be faced. If such devices are at all accurate, they should be adopted. The question of increasing the rates so as to make the utility pay for itself can then be considered, and there will be little opposition.

But, Mr. Editor, you will find a great deal of opposition against increasing the rates while the system is in such an imperfect state. Hitherto the whole system with its many imperfections has been patiently tolerated. Citizens have paid water rates when they have received no water. Others have paid double or treble for what they have had grudgingly doled out to them. Under such circumstances to have the present rate doubled would be increasing the injustice already perpetrated.

Yours truly,
Oliver E. Martin.

ROBINS HAVE GREAT RESPECT FOR SNAKES

Growers Can Make Use of This to Protect Fruit Trees

The fear which the robin holds for black snakes is being utilized by some fruit growers to good effect, in regard to the protection of their trees against this bird and its fondness especially for cherries, strawberries, etc.

The winter sojourn of the robin in the south, it is believed, is responsible for its aversion to snakes, it having learned that these reptiles have a particular fondness for robin meat. It is Connecticut, one of the fathers of the Weeks-McLean Migratory Bird Act that first made the suggestion for using the bird's aversion to snakes as a means of protection for fruit trees, and the plan he offers, he declares, has never failed to work.

Black snakes are not so easy to obtain, nor are they desirable to have around, but Senator McLean points out that the use of an old garden hose cut into four foot lengths, serves just as well. The placing of a piece of the hose in each cherry tree will cause the robins to give the tree a very wide berth, he says.

Numerous complaints have been received by professional and amateur growers in different sections of the country, who contend that the damage done to the trees by robins every year amount to a considerable sum of money. These growers have requested permits to destroy the birds, but Senator McLean says that if the plan suggested by him is carried out it cannot fail.

**NEW PASTOR IS
GIVEN WELCOME**

In the Municipal Hall on Thursday last a reception was tendered the Rev. F. Coad and Mrs. Coad and Master Leslie Coad who recently came from Gibson's Landing where Mr. Coad has been laboring under the Methodist Board for several years. Mr. Coad succeeds the Rev. C. D. Clarke in the Union church here and at Westbank. The Womens Circle and Ladies Aid of the two churches made the necessary arrangements for a short program including vocal and instrumental music. Addresses of welcome were given from the various churches of the town, to which Mr. Coad very suitably replied. The Rev. A. Henderson, former pastor of the church, took the chair for the evening. Refreshments were served by the ladies, which brought a very enjoyable evening to a close, and all felt that a better bond of union between pastor and people was the result.

The Lake Shore stage brought Mr. J. Sanasac on his return home last Thursday after a short trip to Seattle. He brought back with him another housekeeper and her young son. Another passenger on the same stage was the Rev. C. D. Clarke, who came to get his auto and run it over to the coast. He spent a few days in town before the return trip, and on leaving took with him Nelson and Albert Town for a short business trip to the coast.

Miss Vivian Thompson returned on Thursday, having spent the past term in school at Banff. She expects to return to school after a short visit here with her people.

Major Hardisty and son, Dick, were passengers north on Friday morning, returning on the evening boat.

Mr. J. W. Jones, M.L.A. for this riding was among the passengers arriving here on Friday morning's boat. Mr. Jones had motored here from Kelowna a few days earlier to look over the bench road between here and Summerland and to confer with Engineer Gwyer to see if something could be done to resume work on the road. Mr. Jones left his auto here and Mr. W. Dryden, municipal clerk for Peachland, took him over the road to Summerland. The local council took every possible means, working in conjunction with others interested, and as a result of combined efforts a further grant was allowed and the gangs have resumed work to spend a thousand dollars.

Mr. H. Slater of Kelowna, one of our former Union managers, accompanied by Mrs. Slater and some friends motored through on Friday, stopping for a short call at the Edgewater Inn.

School closing took place on Friday but as there was no program very few of the parents attended. Some of the senior classes had finished their work and had been dismissed earlier in the week and the examinations were being conducted in the high school room. The primary grades under Miss Carter and the intermediate grades under Miss Johnson, were dismissed earlier in the day to repair each to a picnic ground, there to enjoy life to the full (stomachs). Miss Carter entertained her scholars on the beach in front of the school and Miss Johnson hers on the beach in front of Mr. Allan Wilson's home. Needless to say an extremely enjoyable time was spent by all. The respective teachers treated their pupils to ice cream to top off their picnic dinner. Bathing and a few sports were indulged in as well.

Passengers south on Friday evening's boat were Miss Mary Vicary, Miss Hardisty and Mrs. N. S. Davidson.

The regular meeting of the W.C.T.U. was held on Friday afternoon at the home of Mrs. A. J. McKenzie. A goodly number were present, although a few were detained through sickness. This was the last regular meeting of the summer, the next regular being September.

Mr. Joe Fleming, a former resident of Peachland previous to the war, and now a rancher just outside Princeton, arrived on Saturday for a short visit. He was a guest at the home of his former pal, Wm. B. Sanderson, and Mrs. Sanderson. Joe is now in the dairy business on a fairly large scale, milking between 20 and 30 cows, and has demand for all his product from the ranch. His brother-in-law, Harry Chapman, is with him, having two ranches between them. He was pleased to note quite a change for the better in Peachland during recent years and hopes to pay the

community a visit at shorter intervals from now on.

The first of our teaching staff from the Central school to leave for her holiday was Miss Johnson, who left on Saturday evening to return to her home in Victoria. The community regrets very much the fact that the Central school is to lose three of its teachers, Miss Johnson, Miss Carter and Mr. McLeod. It is understood that arrangements are being made to close Miss Elliott's school at the Tripanier Townsite and bring the children in to the Central school. Teachers are called for for the conveying of the children.

It is quite apparent that teachers who spend one or more terms in Peachland find a weak spot in their hearts for either the place or the people, or perhaps both, judging from the fact that some of them have from time to time made their life choice here, and others find it pleasant to "Wander Back Again" to spend their holiday season. The parents and scholars are always glad to welcome any such event, be it only for the vacation. We have two of these in our midst now, Miss Whitman, former high school teacher, and Mr. Bell, former teacher of the intermediate grades. Also, two of our local girls who have had schools the past term and are enjoying the holiday at home, namely, Misses Lily and Alice Cousins and Miss M. Smith.

Mrs. and Mrs. James Moore motored up from Summerland on Sunday for a short visit with friends and relatives in town.

A party comprising the Drydens, Millers and Clements enjoyed a pleasant motor trip up to Okanagan Center this week, returning the same evening.

Mrs. L. Mills paid a short business trip to Kelowna on Monday last, returning on the evening boat.

Mr. J. Tait paid an official visit to the community this week, spending parts of two days.

After a pleasant visit to the Old Country, Mr. and Mrs. Fred Young returned on Monday and have settled down for the season's activities at home. They say that although they enjoyed themselves very much and the association with their friends and acquaintances, "yet home is home" and they are glad to be back again.

Miss Hardisty was among the passengers south on Monday evening.

Mrs. J. Winger was a passenger north on Tuesday morning for a short visit with friends up the lake.

Another of our teachers to leave this week was Miss E. Carter, accompanied by her sister and mother who came in from Vancouver to reside with her for some months. They left on Tuesday to return to Vancouver, going by auto as far as Penticton and taking the K.V.R. from there. Miss Carter says that it is possible she may return to Penticton after the holiday.

Mr. J. Marr arrived on Wednesday morning to join his wife and little daughter, Alice Zella, who have been residing with Mrs. Marr's mother for a few months.

Mr. and Mrs. Fish, accompanied by a friend, motored up from Penticton on Tuesday last when the doctor

or came up to treat his patients here. They returned the same day.

Master Royal McDougall of Penticton came up on Wednesday morning to visit relatives for a portion of the holiday.

Mr. George Robinson motored to Penticton on Tuesday to attend the wedding of his friend, Ralph Brown of Summerland, and Miss Phinney.

Wes. Waldriff returned on Wednesday from Westbank where he has been working in Art Dobbin's mill for some time and expects to spend a few days at home.

Mr. A. J. McKenzie left on Tuesday with his first load and to take up operations on his new property in the Kelowna district. He was accompanied by his son Wallace.

Mr. and Mrs. George Keyes left by auto on Tuesday to make a short visit with friends in Hedley.

Westbank Notes

The packing houses are once more in full swing, and all three look for a very busy season.

Mr. Arthur Dobbins' sawmill is now working daily, and supplies No. 1 lumber for all the new buildings now being erected.

Nature has certainly provided some lovely nights for the young couples of Westbank to promenade the highway from Westbank to the lake.

Mr. Tait, the pest inspector, was in town Tuesday.

A party of Westbank picnickers spent a very enjoyable afternoon at Bear Creek on Sunday.

"Night hawks" are doing away with quite an amount of cherries here.

Mr. and Mrs. Drought were visitors to Kelowna on Monday.

The Misses McIntosh and Howlette enjoyed themselves Monday afternoon by going for a pony ride.

Powers Creek has been decreasing very rapidly, and fishing is quite a success.

Haying is now in full swing and a good crop is being harvested.

Westbank boasts of its first up to date ice cream parlor.

The main road has been gravelled through town and a water wagon would not have a bad effect on it.

Thursday, June 24, being the end of the school term, was celebrated here by a picnic with sports and base ball in the afternoon, and a dance in the evening. The ball game did not proceed well owing to the heavy rain.

JUNE RAINFALL

This month has been an unusually wet one, showers having been frequent throughout. Up to the 28th there had been a total rainfall of 1.81 inches at the Dominion experimental station here. This is double the average for the previous five years, the records for June being: 1916, 1.55 inches; 1917, 1.25 inches; 1918, 0.19 inches; 1919, 0.58 inches; 1920, 0.98 inches. Average for the five years, 0.91 inches.

SUMMERLAND WEATHER REPORT

Below is a report furnished by the Dominion Experimental Station here for the week ending Tuesday:

HER SECRET

We occasionally meet a woman whose age is as beautiful as the bloom of youth. We wonder how it has come about—what her secret is. Here are a few of the reasons:— She knew how to forget disagreeable things. She kept her nerves well in hand and inflicted them on no one. She mastered the art of saying pleasant things. She did not expect too much from her friends. She made whatever work came to her congenial. She retained her illusions and did not believe all the world wicked and unkind. She relieved the miserable and sympathized with the sorrowful. She never forgot that kind words and a smile cost nothing, but are priceless treasures to be encouraged. She did unto others as she would be done by.

PASSING EVENTS

LOCAL, PERSONAL, SOCIAL & OTHERWISE

Capt. Mangin of Peachland was in town last Saturday.

Mr. J. W. Harris is home from Vancouver Island where he has been teaching.

The matriculation class at the high school held a picnic on Tuesday at Siwash Bay.

Miss Helen Currie, of the Kamloops school teaching staff, is the guest of Mrs. J. C. Freeman.

A son was born to Mr. and Mrs. T. Charity of Happy Valley on Friday, June 24, at the Summerland hospital.

Miss Orr, of Calgary, is the guest of Mrs. George Inglis and her mother, Mrs. James Ward. She is a sister of the latter.

Bargains in white canvas footwear are still going strong at Beer's Shoe Store. Many new offers are now being shown.

His many friends will be interested to learn that Rev. A. Henderson has returned to the Valley after an extended visit to the east.

The municipal council this week passed a resolution asking that the jurisdiction of the small debts court over which Major Hutton presides be extended to include Naramata, Mincola, etc.

Rev. W. A. Alexander is expecting his mother and sister, Mrs. Wes. McLellan, with the latter's son and daughter, Bryson and Eva. They are due here tonight (Friday) from their home in Manitoba.

Mr. and Mrs. Croil gave an enjoyable picnic tea at Chute Creek on Tuesday for Miss Rind, who is staying with them for the summer. The Review learns that there were many thrills connected with the landing, but these, and the mosquitoes, only added to the enjoyment of the party.

Notwithstanding that the limits for dumping refuse on the nuisance ground have been defined and signs put up, surveyed roads and land outside the limits continue to be littered by loads of refuse. It is the intention of the authorities to prosecute any offenders. Instructions have been given to tidy up the grounds outside the actual dumping area.

At the last meeting of the directors of the Telephone Co., Mr. C. J. Huddleston was elected to the vacancy on the board occasioned by the resignation of Mr. S. M. Young. A proposition to have the municipality take over the system and operate it in conjunction with the electric light system was discussed, but no decision was reached.

A resolution urging upon the provincial government the necessity of the province taking charge of and constructing storage dams at head waters will be presented for discussion at the approaching irrigation convention. This was decided on at a meeting last week of representatives of the water districts of the Okanagan, at which Summerland was represented by Councillor Kirk.

Summerland Boy Scouts went into camp at Miller's Point on Saturday. Though the weather is a bit showery, reports are that the boys are having a splendid time. A special excursion to the camp grounds has been arranged for today, July 1, particulars of which are announced elsewhere in these columns. The camp has been in charge of Asst. Scout Master Tees who leaves for the coast this week when his place will be taken by Scout Master O. F. Zimmerman.

The Canadian Girls in Training of St. Andrews church congregation are camping this week at Crescent Beach, with Rev. W. A. Alexander, Mrs. Alexander and Miss Munn in charge. Wednesday was visitors' day, and a party of mothers and friends made a special boat trip up the lake to be entertained by the girls. Each visitor was supposed to take a supply of home made candy. A very enjoyable time was spent, the party returning at about 7 p.m.

The team from the Summerland Tennis Club, comprised of Messrs. P. G. Dodwell, R. G. Russel, Mrs. Dodwell and Miss Koop, for the Inter-Valley Open Tournament, held this year in Kelowna, and competed in by players from the coast, left on Tuesday morning. Those who are conversant with tennis matters will notice that there is new material on the team this year from whom the Club expect great things. The Review takes this opportunity of wishing them success.

Miss Cohoe of Australia is the guest of Mrs. W. J. Robinson, a friend of girlhood days.

Take an outing on the lake. Excursions arranged for for any time, any place. Okanagan Lake Boat Co. Phone 13.

The Woodworth lot, so called, situated on the front bench south of town, has been bought by J. W. Clark, who is building a house there.

Arrangements are being made to hold the annual picnic of the Summerland Baptist church at Naramata on the afternoon of Thursday next.

Miss Munn, of Montreal, is visiting at the home of her brother, Mr. A. G. Munn. Miss Munn has many acquaintances here, made during a visit six years ago.

Mr. Ralph Brown and Miss Hattie Phinney, two former Summerland young people, were united in marriage at the home of the bride's parents at Penticton on Tuesday.

We clean or dye soiled or faded garments, house furnishings, etc. Let us mail you price list. Permanent Dye Works Ltd., 1641 4th Ave. West, Vancouver, B.C.

Rev. A. T. and Mrs. Robinson arrived Wednesday night to visit relatives here. They are guests at the home of Mr. Robinson's mother, Mrs. M. M. Robinson.

Several who have travelled along the lake shore road on horse back between Summerland and Peachland state that it could be repaired at no great cost. The worst break in the road is at a point between Crescent Beach and Peach Orchard.

Fruits and vegetables are greatly needed at the hospital, and The Review is asked to announce that any one wishing to make donations can leave same at Mr. Devitt's store. Empty jars will be returned to the owners calling at the hospital.

The Baptist Young People's Society gave a very pleasant lawn party and strawberry social at the home of Mrs. George Graham on Jones' Flat on Monday evening. There were over forty young people there who pronounced the evening a great success.

Complaint was made by James Fyffe to the municipal police that some of his cattle had been killed and buried close to the railway track where it crosses the Shingle Creek road. It was found that the carcasses were outside the municipal limits, and he was advised to take the matter up with the provincial police.

Mr. A. Stark has taken over the furniture and undertaking supply of the old company and intends to open in business under the style of the Stark Supply Co. He has taken a lease on the corner store in the Empire Block and has moved his gasoline pump across the street. He also proposes carrying a stock of kitchen utensils, gents' furnishings and boots and shoes.

Mr. George Ross, who has been on the road for the C.P.R. for some time, has taken a position as station agent in the Kootenay district and is here this week preparing to move his family. For two or three days last week he relieved Station Agent Leslie while the latter attended the annual gathering of agents and divisional officials at Vernon.

The wonderful photoplay, 'Kismet,' will be shown at the Rialto two nights next week. This already famous picture is drawing large audiences wherever shown and no doubt the people of Summerland will show their appreciation of the enterprise displayed by the local house in booking this expensive production by giving them a full house both nights.

The Scouts' dance held in the Elison hall last Friday evening was a great success and declared by some to be the best dance of the season. It was not as well attended as had been hoped, but the hundred and fifty or so who were there enjoyed the extra floor space. The cabaret feature was an added attraction, refreshments being served quickly and at a moderate price. The Review learns that about \$130 was cleared, which will go a long way toward the expenses of the usual summer camp.

The Made-in-B. C. is part of the Made-in-Canada, and Trade within the Empire movements. Boosting British Columbia industry by purchasing B. C. goods helps to build up a greater province, a greater Canada and a greater Empire.

WEDDINGS.

STEERS-ROE

A very pretty wedding was solemnized on Saturday morning, June 25, at the home of the bride's parents, Capt and Mrs. P. S. Roe, when their daughter, Edith Pearl, was united in marriage to Mr. Harold Arthur Molineux Steers, second son of Mr. and Mrs. W. J. Steers of Brighton, England.

The bride entered the drawing room on the arm of her father, to the strains of the Lohengrin wedding march. She wore a beautiful dress of white satin with panels of satin over an accordeon pleated white georgette skirt. Her veil was of tulle with a wreath of orange blossoms, and she carried a bouquet of cream roses and wore a peridot and pearl brooch, the gift of the groom.

The bridesmaid, Miss Ethel Gray, wore maize satin, trimmed with maize and blue rosebuds, and carried a bouquet of yellow roses. Mr. Ernest Steers acted as groomsmen.

The ceremony was performed by the Rev. James Dunlop under an arch of syringa and roses, while the rooms were decorated tastefully with roses and honeysuckle. During the signing of the register, Mrs. C. H. Eisey sang 'Love's Devotion,' which was excellently rendered. The bride's mother looked handsome in a gown of blue satin.

The happy couple left on the noon train for Vancouver and coast cities. On their return they will reside in Penticton.

The out of town guests were: Mrs. G. B. Moore and daughter, Miss Gladys, and Miss Lois Pirie, all of Vancouver.

The young couple were the recipients of numerous and valuable wedding gifts.

NOT A WHISPER

One day the children were having an object lesson on the blue heron. The teacher called attention to the small tail, saying, 'The bird has no tail to speak of.' Next day she asked the scholars to write a description of the bird, and a little girl wound up by saying: 'The blue heron has a tail but it must not be talked about.'

The world knows little of failures and cares less. The world only watches success. If British Columbians give preference to British Columbia goods, British Columbia will succeed; it will draw the attention of the world, and that means more people, more industries and more prosperity.

British Columbia experimental farms are leading those of the whole Dominion in the matter of egg production, according to official reports from Ottawa. It is reported that at the Agassiz farm 200 eggs from one hen a year is a common thing, while from 250 to 270 are not considered rare. At the Vancouver Island station 200 pullets gave an average of 195.97, eighty two going above 200.

Synopsis of Land Act Amendments

Minimum price of first-class land reduced to \$5 an acre; second-class to \$2.50 an acre.

Pre-emption now confined to surveyed lands only.

Records will be granted covering only land suitable for agricultural purposes and which is non-timber land.

Partnership pre-emptions abolished but parties of not more than four may arrange for adjacent pre-emptions with joint residence, but each making necessary improvements on respective claims.

Pre-emptors must occupy claims for five years and make improvements to value of \$10 per acre, including clearing and cultivation of at least 5 acres before receiving Crown Grant.

Where pre-emptor in occupation not less than 3 years, and has made proportionate improvements, he may, because of ill-health, or other cause, be granted intermediate certificate of improvement and transfer his claim.

Records without permanent residence may be obtained provided applicant makes improvements to extent of \$300 per annum and records same each year. Failure to make improvements or record same will operate as forfeiture. Title cannot be obtained in less than 5 years, and improvements of \$10 per acre, including 5 acres cleared and cultivated, and residence of at least 2 years are required.

Pre-emptor holding Crown grant may record another pre-emption, if he requires land in conjunction with his farm, without actual occupation, provided statutory improvements made and residence maintained on Crown granted land.

Unsurveyed areas, not exceeding 20 acres, may be leased as homesteads; title to be obtained after fulfilling residential and improvement conditions.

PRE-EMPTORS' FREE GRANTS ACT

The scope of this Act is enlarged to include all persons joining and serving with His Majesty's Forces. The time within which the heirs or devisees of a deceased pre-emptor may apply for title under this Act is extended from one year from the death of such person, as formerly, until one year after the conclusion of the late war. This privilege is also made retroactive.

No fees relating to pre-emptions are due or payable by soldiers on pre-emptions recorded after June 26, 1918. Taxes are remitted for 5 years.

Provision for return of moneys accrued due and been paid since August 4, 1914, on account of payments, fees or taxes on soldiers' pre-emptions.

Interest on agreements to purchase town or city lots held by members of Allied Forces, or dependents, acquired direct or indirect, remitted from enlistment to March 31, 1920.

SUB-PURCHASERS OF CROWN LANDS

Provision made for issuance of Crown grants to sub-purchasers of Crown Lands, acquiring rights from purchasers who failed to complete purchase, involving forfeiture, on fulfillment of conditions of purchase, interest and taxes. Where sub-purchasers do not claim whole or original parcel, purchase price due and taxes may be distributed proportionately over whole area. Applications must be made by May 1, 1920.

GRAZING

Grazing Act, 1919, for systematic development of livestock industry provides for grazing districts and range administration under Commissioner. Annual grazing permits issued based on numbers ranged; priority for established owners. Stock owners may form associations for range management. Free, or practically free, permits for settlers, campers or travellers, up to ten head.

Tests Show That Many Apple Boxes not Properly Made

Washington, D. C.—Apple growers, finding that a certain standard type of bushel boxes in which they have been shipping fruit broke in many instances before it reached the market, recently asked the Forest Products Laboratory of the United States Department of Agriculture to investigate the cause of the breakage.

Several of these standard apple boxes packed with fruit as for shipment were tested in the revolving box drum at the laboratory. Before they had gone a "journey" of average length in the machine most of the boxes had broken open and the drum was dripping cider. On investigation it was found that usually the parts of the box to loosen and give way first were where the four nails were holding the edge. Two more nails were therefore driven into each nailing edge of the remaining boxes. With this simple change the boxes stood just about twice as much rough handling.

Inadequate nailing is the chief fault of almost all the boxes examined by the laboratory. A few more nails would save shippers millions of dollars of fruit losses annually.

(Continued from Page 1.)

The pound law was referred to the public works committee for recommendation covering advisable changes.

Pointing out that the work was greatly in excess of what he had anticipated when he accepted the position, Police Magistrate Hutton asked that his salary be fixed at \$400 otherwise he would be compelled to tender his resignation. He has been receiving \$50 per quarter. The increase was granted.

The works committee was instructed to place signs on the road from Gartrell's corner to the upper road leading to Peachland.

Rear Admiral Sims of the United States Navy, who has been active in developing closer relations between Great Britain and the United States, and thereby earned the ill will of the Irish element in the population of the latter country, is a Canadian by birth.

LAKE LEVEL MUST BE LOWERED IN READINESS FOR FRESHETS

Should Be Two Feet Lower Than This Spring's Minimum To Take Care Of Normal Run-off. Some Valuable Statistics On Water From The Lake Water Shed

An interesting and valuable report on the subject of the water level of Okanagan Lake was submitted a few days ago by Major J. C. Macdonald to Mayor D. W. Sutherland of Kelowna. In this he points out that the level of the lake at the approach of the freshet season must be two feet lower than it has been held of late to avoid recurrence of this year's flood conditions. Major Macdonald says:

The average run-off of the Okanagan River at Okanagan Falls for the four years 1916-1920 was 288,000 acre feet. The run-off during 1920 was below normal, and was undoubtedly held back by the present control at the outlet of the lake. Had this control not been in place, the figures for 1920 would probably have been sufficiently higher to bring the average up to 300,000 acre feet. Of this quantity it is estimated that an average of 48,000 acre feet comes in between the outlet of the lake and the falls, leaving an average quantity out of the lake of, roughly, 260,000 acre feet.

Of the total of 485,000 acre feet, it can be conservatively estimated that 80 per cent. or, say, 390,000 acre feet, comes into the lake during the months of May and June.

The highest mean monthly flow of the river recorded during the above four years was 1,230 cubic feet per second. In a river flowing from a lake of this size the highest mean monthly rate very closely approximates the maximum rate of flow. Within the last two weeks the flow of the river has risen as high as 2,000 cubic feet per second, but this can only occur after the lake has risen to such a height as to cause serious damage and inconvenience to property holders along its margin. The safe capacity of the river can not be considered as anything higher, particularly since the present control has been installed, and should not be placed above 1000 cubic feet per second. This rate of flow in 60 days will carry away 120,000 acre feet; evaporation during the months of May and June does not probably exceed 60,000 acre feet.

This indicates that the water entering the lake during these two months is some 210,000 acre feet in excess of that going out. Though the rate of run-off from the hills during the present year was abnormally fast, the amount of run-off was in no way unusual, and, while the rise in the lake has been more rapid than usual, it is not an excessive amount. A similar rise is bound to occur in any normal year, unless the level of the lake is very considerably lowered before the spring run-off commences. The years 1916-1920, on which these figures are based, were normal years.

Records kept for the past ten years on some of the creeks flowing into the lake indicate that the annual run-off may easily double the average of these years. Had an unusually high water occurred this season, the consequences would have been undoubtedly disastrous.

A study of the above figures shows beyond doubt that the present high water will be an annual occurrence, unless the level of the lake is lowered in anticipation of the spring run-off.

My knowledge of the dimensions of the control at the outlet of the lake is limited to what I have gained by casual observation in passing, but I am of opinion that the average rate of run-off during the time the lake level is rising from a point two feet below that at which it was held throughout the past winter, to a point one foot above that, would not much exceed 500 cubic feet a second, or a quantity in two months of 60,000 acre feet. That, together with an evaporation of 60,000 acre feet, would leave a surplus in a normal year of inflow over run-off of 270,000 acre feet, or sufficient to raise the level three feet. It would appear that it will not be safe to approach the run-off season without lowering the lake two feet and, even if this is done, serious high water can be anticipated in any abnormal year.

WHO SAID COAL?

WAS PIONEER OF PENTICTON

Funeral of Late Charles Greer Was Largest in History of Neighboring Town.

Following a week of illness during which death was momentarily expected, Mr. Charles Greer, one of Penticton's pioneer citizens passed away on Wednesday last week. He had been attending a social function the week before when he suffered a rupture of a blood vessel in his head, causing partial paralysis.

The funeral, conducted on Thursday afternoon, was the largest in Penticton's history. The esteem in which Mr. Greer was held was shown by the great crowd which assembled at the family residence to offer last respects to the departed. There were many flowers in evidence also.

The service at the home was conducted by Rev. Mr. Perley, of the Penticton Methodist Church, assisted by Rev. Ferguson Millar. At the grave Rev. Mr. Perley also conducted a brief service, after which the Masonic brethren of Okon Lodge No. 51, of which Mr. Greer was a member, performed the last rites.

The concourse of citizens completely filled the house and grounds, spreading out on to the street. The auto procession wending its way over the benches to the cemetery was the longest Penticton has seen.

The funeral arrangements were carried out by Mr. Ben Priest. The pall bearers, members of Okon Lodge were Messrs. W. A. McKenzie, J. Power, J. R. Mitchell, M. Nicholson, J. W. Jackson and R. J. McDougall.

BORN IN ONTARIO

The late Mr. Charles Greer, was born 57 years ago in Violet Hill, Ont. He was married 36 years ago and came west with Mrs. Greer 19 years ago, spending some time in Michel and Edmonton, coming into Penticton at the beginning of 1905. He was very well known and highly respected in this district, where for several years he followed the contracting business, later going into real estate and subsequently into the auto business as Ford agent. In August, 1919, Mr. and Mrs. Greer took a year's auto tour through Eastern Canada and the States.

He occupied a prominent position in the community life of Penticton filling at various times a number of important public offices. He was a councillor some years ago and took a seat in the council again at the beginning of this year. He was a member of the Methodist Church; in politics a Conservative. He was both a Mason and an Odd Fellow.

British Columbians are proud of their province, and believe in its future. They believe in it for their children—but only by building up British Columbia industries can they guarantee its future.

It's the little things that separate us from success—not the big ones. Insisting on every article, no matter how small, bearing the Made-in-B.C. brand, means the success of the Made-in-B.C. movement.

OKANAGAN WILL HAVE BIG CROP

Fruit Shipments Will Be 9 Per Cent. More Than in 1919, The Banner Year.

Vancouver.—Okanagan fruit shipments this season are expected to break all past records in point of volume.

At a meeting of general superintendents of western lines of the C.P.R. held in Calgary last week, the question of the traffic outlook for the general west and the methods of handling it, were discussed, among others the Okanagan fruit outlook. Mr. F. W. Peters, general superintendent for British Columbia, reported that agents of the company estimated the B.C. crop would be 9 per cent. greater than in 1919, the banner year in the Okanagan, and about 25 per cent. greater than 1920.

Mr. Peters also reported a new movement in British Columbia freight in the shipments of carloads of strawberries that have been sent to the prairies from the Fraser Valley. In all about forty cars of berries have been shipped from this district. In former years the berries were mostly purchased by the preserving plants, but these being still well stocked from last year, a new market had to be found, with the result that the prairie cities benefited.

For the first time in history strawberries from the Fraser Valley were being sold at Calgary, early in the season, at two boxes for 35 cents. They were bringing 20 cents a box at Edmonton.

Mr. Peters, who returned on Sunday, stopped over at Vernon en route on Friday, where he attended a meeting of British Columbia officers of the C.P.R., and agents of the company throughout the fruit districts of the interior from Notch Hill to Sicamous and down as far as Penticton on the branch line, at which details in reference to fruit shipments were discussed.

C.P.R. officers reported at the Calgary meeting that never in the history of Manitoba, Saskatchewan, and Alberta were harvesting prospects better at this time of year. Preparations are being made by the railway to move a bumper crop. Those who attended the meeting say that a feeling of optimism is in evidence all through the wheat belt and everyone is looking forward to a busy fall and a more prosperous winter than last year.

SPENDING NO MONEY ON ROAD

Nothing Being Done to Improve Communication With North

TWO ALTERNATIVES

Department May Abandon the Shore Road and Build Better Upper Road

Before any further money is spent on either the lakeshore road or the high road between Summerland and Peachland the Public Works Department intends to make a thorough examination of the whole situation.

According to Engineer W. T. Gwyer the Department has two alternatives. One to abandon the lower road altogether on account of the heavy upkeep required on it, the necessity of widening out the rock corners and the danger of tie-ups from slides and washouts. The abandonment of the lower road would mean the relocation and reconstruction of the high road in order to make it a first class highway.

The other alternative is to repair the lower road but also to keep the high road in its present condition for use in case of blockades on the lakeshore highway. This alternative would not provide for any further improvement of the upper roadway, beyond its present condition.

Engineer Gwyer's personal opinion is said to be in favor of abandoning the lakeshore road and relocating and reconstructing the upper highway so as to provide a road which will be out of danger of high water washouts, seepage trouble and slides.

A BUSINESS CHANGE

Announcement is made in our advertising columns in this issue to the effect that Mr. E. E. Steers has taken over the Victoria Cafe. Mr. Steers intends featuring the restaurant business, and is renovating the ice cream parlor and will also give this branch of the business special attention.

He has had a number of years' experience in the hotel and restaurant business, and believes there is a good opening here for a business such as his.

ANNUAL SCOUT CAMP BROKEN

Was Finest Outing in History of Boy Scouts

Sunday afternoon saw the close of perhaps the most successful camp yet held by the local scouts. Although the weather was by no means ideal, the boys had a fine week of it; everyone appearing well satisfied with the outing.

Leaving the Government wharf on Saturday at 2 o'clock the troop was soon at its destination, Miller's Point, and the disembarkation quickly took place. Mrs. W. Miller, our genial chief cook was there to meet the boys and soon had a fine supper going.

When the "fall in" blew some 32 scouts lined up on the wharf with A.S.M. Tees as Acting Scout Master, A.S.M. Harris and Troop Leader Blewett in charge.

The four leaders then drew lots for tents and positions following which each patrol set to work getting the tents up for the night.

After a good swim everyone felt ready for supper, and certainly did justice to the splendid meal ready for them. After supper the scouts started into work on the grounds, getting into shape for inspection next morning. Generally the first night in camp is one of general hilarity, but it was not until early morning that there were any signs of sleeplessness.

With reveille at 7 a.m. the boys were soon up and after a wash spread out the blankets for an airing. Parade followed, and after the flag had been hoisted and saluted, and prayers the troop adjourned to the cookhouse for breakfast.

Then followed a hurried, final clean up before inspection. At the whistle each leader called together his boys and when the officers arrived had them all called to attention. Inspection then began.

Blankets had to be neatly folded, equipment tidily packed, while paper, orange peel, etc., on the grounds, detracted from the patrol marks. It was surprising how neat the boys

managed to keep their uniforms, the neatest boy on parade each day winning a point for his patrol. A further incentive was offered, in that the winning patrol each day were allowed the tumbling mats to sleep on.

Points were awarded each day as follows:

Neatness of patrol	5
Conduct during day (and night)	5
Condition of tent	5
Condition of grounds	5
Equipment	5

That the patrols were eager in the competition can be seen from the total number of points won. The Kangaroos, Leader Jack Harris, led with 187.5. The Eagles, Leader Ronald White, and the Owls, Leader Ivo Harris tied for second place with 187, while the Coyotes, Leader John De-nike followed closely with 186.

Too much cannot be said of the artistic display of the grounds of the Kangaroos and Eagles, the Kangaroos winning an extra point over the others on the interior of the tent the final day.

For perhaps the first time at any camp at which the writer has been present, there was no "kick" at the rations. For breakfast there was always plenty of porridge, ham or eggs, and pancakes or bread and jam.

Lunch always saw plenty of soup, roast or steak, vegetables and pie or pudding, while for supper macaroni and cheese or rice pudding, cake and fruit filled the menu. One wonders when one thinks, how Mrs. Miller managed to find time to bake for so many hungry youths, but she did, and the three hearty cheers given by the boys at the close of camp were genuine to the core.

While the camp was without doubt one of the happiest yet, it was marred by the fact that it was the last time we would be able to have with us one of the hardest working and most capable A.S.M.'s the troop has ever been fortunate to have. Owing to his leaving Summerland for Vancouver, Mr. Tees leaves a gap that will be hard to fill. Energetic to the core, "Pete" worked with the boys getting the utmost from them, developing them in sports, P.T. and signalling. Wherever he may go, "Pete" may be assured that the heartiest wishes for his welfare follow him from the Summerland Troop.

For the coming winter Mr. George Guy has kindly consented to act in the capacity of physical instructor, so the boys may rest assured that the work started by A.S.M. Tees will be ably carried on.

After Mr. Tees' departure on Friday the camp was in charge of A.S.M. Harris. At no previous camp has such interest been shown in the passing of tests for proficiency badges.

A total of 101 badges were ordered this week, including four King's Scouts. To Ronald White goes the honor of being the first scout to obtain this badge since the reformation of Mr. Zimmerman, and thus wins the prize offered.

Ronald has also qualified for 14 proficiency badges entitling him to wear the Grade B all round cords. Some ten scouts passed their first-class tests while all the tenderfoot gained their second class badge.

Friday was sports day, and a fine program was drawn up, but unfortunately the day was rather a handicap to the swimming events. The Skookum arrived loaded to capacity with visitors, whilst several cars made the trip as well. Next week we will publish the best diary of camp handed in together with the individual results of the sports.

The Owls carried the day, in sports, the signalling and the tenderfoot competition, thus making a clean sweep. Several amusing incidents occurred during camp. After lights out one of the officers on making his rounds, hearing talking in one of the tents stopped and listened. Presently a pair of feet emerged from the back of the tent followed by a boy who began to crawl off in the direction of another tent and nearly over the watching A.S.M. "Who goes there?" was asked. "Only me," answered the crawling figure, rising. It turned out to be the leader of the patrol who had that day won the mats for conduct, and who at that moment was supposed to be sleeping on them. As he had been on a cake raid and had been disappointed, he was let off with a caution to stay in his tent at that hour and not start an inspection of the camp.

The camp fire at night was always a big event. After a hearty sing song the rest of the evening was passed telling yarns, after which lime juice and crackers and cheese filled out the bill.

One night some of the scouts decided

(Continued on Page 8)

SHOULD REPAIR LAKESHORE ROAD

To Abandon It Would Be Bad Business, Says Visitor

TOURIST TRAVEL

Camping Sites Proving Valuable Assets to Communities Providing Them

Ardent enthusiasts in favor of good roads, and the encouragement of tourist travel, Mr. and Mrs. J. N. Cushing of Kelowna passed through Summerland on Thursday, returning from a combination pleasure and business trip to Wenatchee.

Mr. Cushing, who is a director of the Kelowna Fruit Growers' Exchange, stated that he understood an unofficial report was being circulated that nothing would be done at present towards the fixing of the lake shore road. In his estimation, this would be a bad piece of business, as he considered it one of the most picturesque driveways in the Okanagan Valley, and would very much deplore the fact that it was not going to be attended to at once.

"The time is ripe, I believe," said Mr. Cushing, "for co-operation between the people of the various districts in the Okanagan, for the purpose of encouraging and accommodating the touring public, by supplying them with all possible facilities for that purpose. The municipality at Kelowna has recently opened a large park as a camping site, providing domestic water, tables and seats, etc., and with painted signs and directions bidding touring motorists to rest awhile."

Mr. and Mrs. Cushing are making preparations for an auto trip into California next year. During their outing this year to Wenatchee they took advantage of the camping site opened by the people of that city, and other places, and are enthusiastic over the welcome reception they received everywhere.

Penticton Sports Well Attended

There was a large attendance at the sports program at Penticton during the afternoon on Dominion Day, many Summerland people driving down to take in the events. The baseball game between Penticton and Kelowna was a fine exhibition. The lads from up the lake carried back the victory and the long end of the purse by the close score of four to two.

There were several good horse races and others that were not so good, but as a whole the races were good. The auto races were slow and uneventful, but the bucking contests helped a lot to make the program an interesting one. Three boxing contests were staged between young boys and these were enjoyed. The last contest was between two blind-folded youths. This contest afforded the crowd much amusement.

The lacrosse game between Penticton and Kelowna resulted in a victory for the Penticton team.

On Saturday afternoon a fair sized crowd witnessed the sports, chief among which was the baseball game between Penticton and Orville, the former winning by the close score of 3 to 0.

UNITED FARMER PARTY SCORE VICTORY IN MEDICINE HAT

Mr. Robert Gardiner, the candidate, who rolled up a huge majority.

A vain man is always willing to admit his modesty.

CANADIAN GIRLS IN TRAINING

Enjoy Week of Camp Life at Crescent Beach

The C.G.I.T. Club, consisting of the Ok-we-su and Pollyanna girls, with Mr. and Mrs. W. Alexander and Miss Munn in charge, returned on Saturday from Crescent Beach following a week's holiday. Mr. and Mrs. Alexander were in charge of the Ok-we-su girls and Miss Munn of the Pollyanna girls, Miss Logie being absent at the time. A more enjoyable week was never spent by the girls before. There were nineteen enrolled at camp, eleven Ok-we-su and eight Pollyanna girls.

The week was devoted to many means of amusement. Everyone was in excellent spirits and out for a good time.

Bathing was allowed three times a day, and many of the girls who could swim devoted their time to learning new strokes and modes of diving, etc. Camp inspection took place each morning and if any untidiness was found, the penalty of fatigue duty was placed on the unfortunate individual. The silent hour was rigidly kept by everyone remaining silent and not moving for one hour. The evenings were devoted to bonfires, storytelling, etc. The Pollyanna girls gave the Ok-we-su girls an interesting little program one evening and wound the affair up by giving them a little parody that they had made up about the suckers that they had enjoyed in the afternoon, sung to the tune of "I'm For Ever Blowing Bubbles."

I'm for ever sucking suckers,
Sweet suckers in our hands,
They go so quick till they reach the sick,
Then we get sick and have colic.
Don't you think it funny,
When it hurts our tummy?
I'm for ever sucking suckers,
Sweet suckers from Johnston's
Marshmallow roasts were greatly

enjoyed by all; ghost stories caused much excitement about bed time.

Visitors' day was on Wednesday, and all the mothers came to see how camp life was suiting their daughters, a very pleasant afternoon was spent. The girls gave Mr. and Mrs. Alexander a little celebration on the Thursday, by way of showing their appreciation of their kindness and also to congratulate them on the anniversary of their wedding day. A very enjoyable evening was spent. The girls were all sorry when Saturday arrived and they had to pack up to come home, and they felt greatly indebted to Mr. and Mrs. Alexander and Miss Munn for the very pleasant holiday they had given them. A hearty three cheers were given by the girls at the breaking up, and all are looking forward with pleasure to the camp next year.—Cont.

Magistrate Guernsey Removed From Office

Official notification was received last Friday by Mr. G. F. Guernsey, police magistrate of Penticton, from the Provincial Secretary, rescinding his appointment as police magistrate, stipendiary magistrate and magistrate of small debts court. It is stated that Mr. T. A. Pope who has been a resident of Penticton for about a year, has been appointed to the position.

For several years there has been a certain amount of friction between the magistrate on the one side and the city council and police commission on the other. Definite requests for his removal were made to Victoria by Penticton authorities on two or three occasions. These were opposed, however, by Mr. Guernsey's friends, who contended that the applications were largely of a political nature.

The opponents of the magistrate contended that his personal opposition to the prohibition legislation had been manifested by his rulings on the bench.

Some people never stop to count the cost, realizing that they haven't got the price anyway.

SUMMERLAND WEATHER REPORT

Below is a report furnished by the Dominion Experimental Station here for the week ending Tuesday:

	Max.	Min.	Rain	Wind	S.S.
June 29	72	60	0.8
June 30	70	59	.09	...	3.1
July 1	68	52	3.3
July 2	73	50	2.2
July 3	77	50	6.0
July 4	74	51	13.5
July 5	70	52	9.8

Frankness makes people disagreeable, but all disagreeable people are not frank.

Peachland Doings
A Weekly Chronicle Furnished
By Our Local Representative.

Mrs. H. McDougall and son Mr. Kerr motored to Summerland last week to attend the wedding of Mrs. McDougall's niece.

Mrs. Keating and daughter Lexie went south on Wednesday evening's boat last week to visit in Pentiction for a short time.

Major Hardisty is enjoying a visit from his mother who came in on Thursday morning's boat last, accompanied by Major Hardisty's daughter.

Mr. Ed. Robins of Stettler, Alberta, is a visitor at the home of Mr. and Mrs. Evans. He has been employed on the works at Oliver, B.C.

Mrs. Drake and family left on Thursday a.m. to visit her people in Oakland, Iowa. They expect to be away about two months. Mr. Drake accompanied them up the Valley a piece, returning Friday evening.

Mrs. J. Winger returned on Thursday evening after a short visit up the lake.

Mr. Black, teacher of the High School, left on Thursday evening to spend his holiday elsewhere. He will return to take up his work after the holiday.

Old friends and acquaintances of Rev. A. T. Robinson will be interested to know that he and Mrs. Robinson are in the Valley again, having come to Summerland recently.

Mrs. Ekin was a visitor to Kelowna on Friday.

Mr. and Mrs. John McDougall drove up from their ranch on the 1st of July to spend the holiday with their people in town.

Dr. R. C. and Mrs. Lipsett were visitors in town on the 1st, guests at the home of Mrs. Lipsett's sister, Mrs. J. B. Robinson.

A number of our townspeople took advantage of the holiday excursion to Pentiction on Friday, the 1st, and spent the day at the sports in Pentiction. A few went north and enjoyed the day in Kelowna and district.

The new apple grader for the local Union has arrived and they are busy getting it ready for the apple crop this fall. Cherries are rolling in pretty well now, with some of the crops looking up better than has been anticipated for a short time back.

Mr. Highway came up last week end from Oliver, where he has been working for a short time.

Mrs. C. W. Aitkens was a passenger north on Saturday morning to visit with friends.

After a pleasant visit of a few weeks here with Mrs. Melway, her two sisters left on Saturday morning.

Mr. Denton of Vancouver arrived on Saturday morning to relieve Mr. Harrison as manager of the Royal Bank here while he enjoys a two weeks' vacation. Mr. Harrison left on the south bound stage to catch the westbound K.V.R. train to join his wife and baby who preceded him a short time ago and have been visiting on Vancouver Island. Mr. Denton spent the week-end down the lake, going down Saturday night and returning Monday morning.

Mr. Joe Morsch returned Saturday morning to spend his vacation with his parents and the rest of the family. Joe is not taking a school next term, but expects to attend University, and climb higher.

Mr. Smith of Victoria arrived in town Saturday evening to relieve Miss Jean Dryden as clerk in the Royal Bank here. Miss Dryden is having her two weeks' vacation and accompanied by her mother, on Sunday motored down to catch the K.V.R. train and spend the two weeks with relatives in Vancouver.

Mr. Alpaugh is enjoying a visit from his father who resides in Nelson, B.C.

Mrs. B. M. Whyte and baby are visiting in town with Mrs. Whyte's parents Mr. and Mrs. A. W. Miller. They arrived on Sunday.

Mr. A. J. MacKenzie left on Monday morning for Kelowna to resume his work on his recently purchased property in that vicinity. He had come home early last week to take Mrs. MacKenzie and the family and Miss M. Smith over on the 1st of July to enjoy the holiday picnicing on the ranch. They motored over and back the same day.

Dr. Windeler of Summerland has discontinued motoring to Peachland for the time being owing to the condition of the road, and came up by the S.S. Seacomus on Monday.

The Rev. F. Coad paid a visit to Kelowna on Monday, going over on the boat.

Mr. McLeod, who has been teaching the senior grades in the Central School has tendered his resignation and left on Monday by north-bound stage.

Mr. and Mrs. S. H. Murdin and Mr. Chas. Somerville motored to Kelowna on Saturday, returning in the evening.

Mr. Earl Weitzel returned from Alberta on Monday, having driven his auto through by way of Nelson and Grand Forks, and down over the Anarchist Mountain at Osoyoos. When Earl left here the lake shore road was in use and he was quite disappointed in the drive home over the bench road between here and Summerland. He states that it was without any doubt or exaggeration the worst piece of road he had driven over in his entire trip from Alberta here. It is too bad the work has to be suspended on a thoroughfare such as this and have it left that tourists can make such statements as the above in referring to it. Earl was accompanied on his return trip by Mr. Work of Three Hills, Alberta, who has come to visit the district for a time.

Westbank Notes

Mr. Murray Smith was a passenger to Pentiction on July 1st, accompanied by Mr. J. Edgell.

Mr. Ken. Keeler motored to Pentiction on July 1st, accompanied by Mr. and Mrs. Featherstonhaugh, Mr. H. Brown and Miss J. Brown.

A picnic party went fishing up Powers Creek on Friday. The members of the party were Mr. and Mrs. A. Nichol, Mrs. Fulton, Mrs. J. Nichol and son, and Mr. S. Burton.

Misses Marguerite and Irene McIntosh were passengers to Kelowna on Wednesday.

The water shortage has been somewhat relieved by the recent rains.

Dominion Day was celebrated here by a picnic at the Westbank wharf. An excellent program was arranged by Messrs. T. Drought and H. Jones, but the weather being unfit for bathing, the program was useless.

A party of young people left after the picnic for Kelowna, expecting to see Queen's Hawaiian Minstrels, but to their surprise it was only a 35c. show.

Mrs. Drought was a passenger to Kelowna on Monday.

Mrs. Laing was a passenger north on Tuesday.

Mr. J. Jones and sons Ralph and Frank made a business trip to Kelowna on Monday.

Messrs. J. Jones, G. McIntosh and W. B. Gore made a flying trip to Kelowna on Saturday to arrange for the money to build the new school house here.

Everybody was greatly pleased by the way Miss Boyd handled our school here. This was shown by the recent examinations, in which all the pupils were advanced.

Naramata News

Current Events of
Town and District

Mr. and Mrs. Littlejohn have as their guests their son with his wife and family, who make their home at Eston, Saskatchewan, 150 miles s.w. of Saskatoon. Mr. Littlejohn will return to Eston in two weeks, but his wife and family will remain for two months with Mr. Littlejohn's parents here.

Mr. Morrish of Vancouver arrived in Naramata on Friday morning to spend a ten days' holiday with his wife and daughter here.

Interesting visitors to Naramata last week-end were Mr. and Mrs. W. A. Clark, of Vancouver, who were touring the Valley on a combined business and pleasure trip. They visited Vernon and Pentiction, and spent several days in Naramata, staying at the Syndica Hotel. Mr. Clark, who has large financial interests in Vancouver, was deeply interested in the possibilities of Naramata, both as a health and summer resort and as a fruit growing district. Mr. and Mrs. Clark left on the ferry for Summerland, expecting to spend a day there before returning to Vancouver.

It is learned that the C.P.R. have named one of their new steel sleeping cars "Naramata." These cars are equipped in the most luxurious manner, and are the very acme of comfort and convenience. The naming of one of them after this district is good advertising for Naramata.

Miss Marjorie Green spent the week-end in Pentiction visiting Miss Alice Top, who returned with her and spent Monday in Naramata.

The Ladies' Aid held an anniversary social in the Church grounds on Monday evening. The weather was unseasonable but the very fair attendance did their utmost in the way of disposing of the ice cream, lemonade and other hot weather luxuries provided. The grounds were suitably decorated with flags and flowers, and a tennis net erected for the accommodation of players.

STEAM IS USED IN NEW \$1000 CAR

American Manufacturers to Market Unique Motor Car of Simple Design

Rumors current at the New York and Chicago shows that an important enterprise in steam motors is soon to be launched have been definitely confirmed by an Indianapolis, Ind., capitalist and representative of large steam interests.

He announced that he will manufacture and market a five passenger six cylinder steam touring car of 110 inch wheel base, with electric lighting and starting, to retail at about \$1000 in the States.

On the same chassis he will also build a commercial speed wagon for all light delivery purposes.

The boiler is of the combination fire-and-water-tube type, so arranged that it will go under a hood of any shape.

The insulated steam line leads directly to the rear axle with divided flow to each half of the axle, the direct application of the steam to the wheels absolutely eliminating the gearing differential.

The rear axle is the engine, or the engine is the rear axle, whichever way you choose to consider it.

Engine, axle and differential function all in one, the engine in its housing being just about the size of the

ordinary rear axle gear case. The housing of each half of the axle carries three fixed cylinders set at 120 degrees apart, or one third the circle. These cylinders are exactly like those of the automobile engine, with poppet valves, pistons and connecting rods. The bore is 2 3/4 inches, stroke 3 inches. Three connecting rods in each half are pivoted to a crank pin integral with the drive shaft of each wheel. At a speed of forty miles an hour the engine is running at the very low speed of 500 revolutions per minute.

It will be observed that an overlapping stroke is obtained. Before one cylinder is entirely off pressure another has begun to take hold and the third is completing its exhaust.

In tests the cars are doing 20 to 40 miles on one gallon of kerosene.

With the steam and water cycle, one filling of the water tank runs the cars from 300 to 500 miles.

The exhaust steam is taken by a return pipe to the condenser, which is located in front of the boiler in the position of the ordinary radiator.

The initial heating for starting is electrical, controlled by a switch on the cowl board.

The vital point of difference between the steam car and the other is its store of reserve energy. In the new car the great energy stored in the boiler is always instantaneously available. It is built up in advance, is on tap for any emergency. It does not have to wait on combustion. It is a constant flow of power—free from the vibrations. The flywheel is its only point of storage and power can be stored there only

Canadian Players Repeat Plays

A full house was the result of the extra performance of the Canadian Players at Naramata on the 30th June which was arranged for the accommodation of those who were not able to get seats at the three advertised dates of the week previous. A large party from Summerland crossed on the steamer and the ferry, and were amply repaid for their trip.

The same program was carried out, and for nearly two hours the audience was delighted with the very realistic way in which the two little one-act plays were given, Miss Gladys Robinson as Will o' the Wisp being particularly worth mention, although Mrs. C. Atkins made a great success in her parts. At the intermission Miss Craig's singing was well received, and encores being required on each occasion.

It is safe to say that news of further productions of the Canadian Players will be awaited with interest, and will be given the support the enterprise deserves. Such seemed to be the opinion of all who attended the opening numbers.

About the best way to induce a woman to keep a secret is to keep it to yourself.

by speeding up—after the need of extra power is on the car.

The car, completely equipped, weighs less than 1800 pounds.

Peachland Notes

Miss Monteith is enjoying the companionship of a friend, Miss Dawes, who came in on Monday evening from Alberta to spend a few months here.

Mrs. Morgan and Mrs. West paid a short visit to Kelowna, returning Monday evening.

After a few days' visit with Mr. and Mrs. Neil Evans and son Neil, Mr. Ed. Roberts left on Monday morning.

Mr. W. White on Monday made an overnight visit to Penticton.

Mr. S. H. Mordin spent Tuesday in Kelowna.

Harold Miller accompanied his sister Mrs. B. M. Whyte on her return home to Okanagan Centre after a short visit with her parents here, and expects to spend a few days in that vicinity.

Vernor Winger returned Tuesday morning after a short visit to Penticton.

After a pleasant few days in Penticton with friends Mrs. and Miss Lexie Keating returned Tuesday morning accompanied by Mrs. and the Misses Elizabeth and June Jeffords, who came for a short visit as guests of Mr. and Mrs. Keating.

Mrs. C. W. Aitkens returned on Tuesday evening after a short visit up the lake.

Mr. Roberts came in from Alberta on Tuesday evening and is visiting friends here while he looks over the

Synopsis of Land Act Amendments

Minimum price of first-class land reduced to \$5 an acre; second-class to \$2.50 an acre.

Pre-emption now confined to surveyed lands only.

Records will be granted covering only land suitable for agricultural purposes and which is non-timber land.

Partnership pre-emptions abolished but parties of not more than four may arrange for adjacent pre-emptions with joint residence, but each making necessary improvements on respective claims.

Pre-emptors must occupy claims for five years and make improvements to value of \$10 per acre, including clearing and cultivation of at least 5 acres before receiving Crown Grant.

Where pre-emptor in occupation not less than 3 years, and has made proportionate improvements, he may, because of ill-health, or other cause, be granted intermediate certificate of improvement and transfer his claim.

Records without actual occupation, provided statutory improvements made and residence maintained on Crown granted land.

Unsurveyed areas, not exceeding 20 acres, may be leased as homesteads; title to be obtained after fulfilling residential and improvement conditions.

For grazing and industrial purposes areas exceeding 640 acres may be leased by one person or company. Mill, factory or industrial sites on timber land not exceeding 40 acres may be purchased; conditions include payment of stumpage.

Natural hay meadows inaccessible by existing roads may be purchased conditional upon construction of a road to them. Rebate of one-half of cost of road, not exceeding half of purchase price, is made.

PRE-EMPTORS' FREE GRANTS

The scope of this Act is enlarged to include all persons joining and serving with His Majesty's Forces. The time within which the heirs or devisees of a deceased pre-emptor may apply for title under this Act is extended from one year from the death of such person as formerly, until one year after the conclusion of the late war. This privilege is also made retroactive.

No fees relating to pre-emptions are due or payable by soldiers on pre-emptions recorded after June 26, 1918. Taxes are remitted for 5 years. Provision for return of moneys accrued, due and been paid since August 4, 1914, on account of payments, fees or taxes on soldiers' pre-emptions.

Interest on agreements to purchase town or city lots held by members of Allied Forces, or dependents, acquired direct or indirect, remitted from enlistment to March 31, 1920.

SUB-PURCHASERS OF CROWN LANDS

Provision made for issuance of Crown grants to sub-purchasers of Crown Lands, acquiring rights from purchasers who failed to complete purchase, involving forfeiture, on fulfillment of conditions of purchase, interest and taxes. Where sub-purchasers do not claim whole or original parcel, purchase price due and taxes may be distributed proportionately over whole area. Applications must be made by May 1, 1920.

GRAZING

Grazing Act, 1919, for systematic development of livestock industry provides for grazing districts and range administration under Commissioner. Annual grazing permits issued based on numbers ranged; priority for established owners. Stock owners may form associations for range management. Free, or partially free, permits for settlers, campers or travellers, up to ten head.

DOUBLE YOUR SALES—REVIEW WILL HELP

THE SEALING INDUSTRY

The seal pack in the Northern Pacific waters is considered to be the most valuable herd of wild animals in the world, its value being placed at \$75,000,000, and yearly increasing.

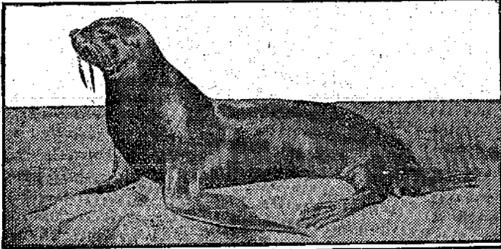

After a conference in 1911 between the United States, Russia, Japan and Canada, all of whom are interested

naturally of gratifying proportions, and will be more so in the future. It has been computed roughly that one million seal skins are marketed every year, and to this aggregate the largest single collection is contributed by the sealers of Newfoundland operating on their own coast and off

700,000 seals have been slaughtered by the entire Newfoundland fleet in a single season.

A novel method of hunting seals, under the auspices of the Government of Newfoundland, is to be introduced in the spring by two Nova Scotia aviators which, if successful, may revolutionize the entire industry. The party of three men, with two aeroplanes and dirigibles of the type used so successfully during the war to "spot" submarines, will leave Montreal to join the Newfoundland sealers at St. John's, the augmented party of thirty-five or forty, leaving for the Labrador ice fields.

Hitherto the locating of seal herds has been done by men in the rigging of ships whose range is naturally limited. This work it is intended to do with planes, "spotting" being possible by this means within a radius of fifty miles. The method, then, is as follows: The aeroplanes, which

The Fur Seal.

In sealing in these waters, a close season was established for fifteen years, and pelagic sealing forbidden. According to the treaty signed at the same time, Canada receives fifteen per cent of the catch of these waters. The Dominion's credit has been allowed to accumulate, and when a settlement is made, which will probably be done at the end of the present year, it is expected that Canada will receive something like \$800,000 as her share of the catch since the opening of the season. With the beneficial effect the protection of the herd has had and is still experiencing, it is predicted that in a few years Canada's revenue from this source will be in the neighborhood of \$1,000,000 per year.

All the year round fur seals, which are great roamers, have been in the habit of infesting the Fraser River and the Gulf of Georgia, in habiting inaccessible flats, and by consuming large quantities of fish already taken in nets, have constituted themselves a general nuisance. Various methods of combatting this pest have been tried unsuccessfully, and experimentation is continuing, in the belief that a successful method of trapping will not only terminate the mischief these animals are doing, but result in the creation of a new and important industry on the Pacific Coast.

The hair seal is valued partly for its hide, which is used in making various kinds of leather, and on the Pacific Coast, for use in the manufacture of fertilizer. The hair seal is a particularly valuable animal at the present time, his hide selling for as high as \$175. A recent development in the seal industry is the utilization of the skins of old males, a hitherto unprofitable article, which considerably enhances the value of the seal catch to any country. Canada draws revenue from seal fishery on both the Atlantic and Pacific coasts, and the amounts accruing from these are, at the present time,

The Hair or Common Seal.

the shores of Labrador. In the year 1919, Newfoundland's share of the seal fishery accounted for \$1,295,000. The industry on the island accounts for the employment of 1,685 men and numerous vessels take part in the often hazardous undertaking.

The seal industry originated in Newfoundland in 1763, and for some years after that the annual catch did not exceed three or four thousand skins per season. With the increasing demand for oil and skins, however, the industry grew, and more men and vessels came to engage exclusively in it. By the beginning of the nineteenth century, the annual catch exceeded 60,000 skins, and larger and larger vessels were built for the pursuit, till later these were superseded by fast steamers. At the present time, though there are some sailing vessels still engaged, the steamer is the big unit in the activity and accounts for five-sixths of the catch.

Of late years the seal catch of Newfoundland has fallen off somewhat due to the heavy toll and indiscriminate killing which is now regularized by legislation. The 1908 catch, for instance, numbered 213,863 seals and that of the following year 269,230 animals. A single vessel has been known to bring in to St. John's a catch of 42,000 and a total of nearly

carries five men besides the pilot and mechanic, descends to the ice where the animals are despatched by bullets from pump guns. The skins are then packed in bundles about the base of poles to which a flag is attached. This kind of hunting continues to the end of the season when the ice breaks up, the hunters proceeding from place to place transported by plane as new herds are "spotted". At the close of the season the vessels visit the ice breaks and pick up the bundles, being materially assisted by the planes in locating and signalling.

Close upon the announcement of the projected activities of these aviators there arrived in St. John's two "humps" or war straggle, a present to Newfoundland from the Imperial Government. These birds intended to use in the seal fisheries in the same manner, the cost of operation, estimated at \$70,000, being borne jointly by the Newfoundland Government and the owners of the sealing vessels assisted in their catch.

The co-operation of the government in this new venture would augur a belief in the practicability and success of the novel enterprise, and doubtless their success, which is highly probable, will have a marked effect upon sealing on both coasts, and tend to bring about a revolution in hunting methods.

LANDS FOR SALE.

15 acres of good dark soil with creek running through bottom land; about 7 acres cultivated; property of the late Mr. F. A. C. Wright. A well built bungalow in excellent condition; hot and cold water; Delco light, good outbuildings. \$7,500.

A SUITABLE CAMP SITE.

Each year brings an increase in tourist travel to the Okanagan Valley and the future will see the number grow from hundreds to thousands. Summerland should provide a suitable camping site for those who come this way. Other municipalities are doing so and we must not lag in this respect. This municipality fortunately owns a beautiful natural park with pure spring water in abundance, and with a little energy expended clearing away the underbrush, it could be made an ideal camp ground.

The sign posted which reads "No camping" should be changed to "Municipal Park: Tourists, Campers Welcome," or similar signs posted at the entrance.

The Review suggests that the civic improvement committee of the Board of Trade take the initiative in the work. We believe that there are many public spirited citizens who would gladly turn out and give a half day of their time, or more, in clearing up the park for this purpose if the committee saw fit to call for help.

That a place of this nature should be provided has long been recognized and that it would be a big advertisement for the municipality goes without saying.

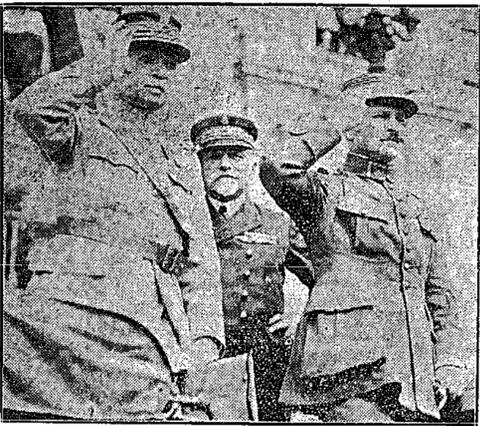

A TRIBUTE TO CANADA.

Canada to-day is unique among the great nations, in that she has no serious labour troubles, and in that she appears to be effecting the difficult process of readjustment to after-war conditions as painlessly as may be. Montreal reports that in most cases where wage reductions have been necessary they have been made without friction, and that this holds true of the Pacific Coast and the Middle West, as well as of the more industrial Ontario.

The attitude of the Dominion and Provincial Governments toward business has been helpful, but, fundamentally, such successful readjustment must be due to the exercise of plain common sense on the part of both labor and capital. It is not the first time that Canada has set an example worth studying.

One thinks of Canada as primarily an agricultural nation, and it is still true that her wheat and other grains outrun any other commodity. But the Dominion has turned more and more to manufacture, and its industries grow at a tremendous pace. Doubtless the growth may continue as further water power is put to use, and more resources in coal and minerals are opened up and her net-work of railroads extended.—New York Sun.

FRANCE THANKS CANADA

Marshal Fayolle of the French army arrived in Ottawa this week. He is shown taking the salute of Veterans at the City Hall, Montreal. He is thanking Canada officially for helping France.

IMPLICIT FAITH IN ABILITY OF C. P. R. TO MEET DEMANDS

Head of Railway Expects U. S. Readjustment of Wages and Rates to React On Canada.

At the annual meeting of the C.P.R. Mr. E. W. Beatty, President of the Company, made the following interesting statement regarding the affairs of the Company:

"The operations of the Company during the year, the Annual Report for which is now submitted for your approval, have been conducted under conditions which were so exceptional as to merit, as to make it unique in the Company's history, as well as in the transportation annals of Canada. The shareholders are aware of the general conditions which so strongly influenced the results for the year in question but I doubt if a full appreciation of them is possible save with a very intimate knowledge of the details, the aggregate of which is so vividly reflected upon the Company's revenues. The cost of labor, materials and fuel reached their peak during the year and extraordinary added costs, such as high exchange and taxes, added their quota to the expense."

"The back pay which accrued before the increased freight and passenger rates became effective amounted to a little less than seven million dollars and the additional amount required to pay exchange on coal and other purchases, four million dollars. The total, including provision for income taxes, involved additional costs of approximately thirteen million, five hundred thousand dollars which were charged to the expenses of the year. All these extraordinary and abnormal expenses the Company was able to absorb and pay its fixed charges and usual dividends. This result was only possible because of the excellent character of the Company's facilities provided by you in previous years at large capital expense and the possession by it of equipment used with the greatest possible efficiency, which enabled the heavy fall movement of traffic to be effected with a despatch which has rarely, I think, been equalled. I cannot speak too highly of the loyal and effective work done by the officers and men of the Company, without whose efforts such favorable results could not have been secured."

"When the condition of the Company's property has never been permitted to deteriorate, due to the provision made for its upkeep to a high standard in pre-war years, there were expenditures, which had to be incurred in 1920 which, except for the intensive use of equipment and the shortness of labor and materials during the War, would either not have been included in the expenses for that year in their entirety or would not have had to be incurred at all. The Company's equipment was put to a great strain from 1914 to the end of 1919, and both freight and passenger business have been postponed until price conditions were more favorable, it was necessary, unless the Company were to suffer in prestige, that the work should be gone on with as soon as possible."

"About the middle of December a pronounced contraction in business took place, resulting in diminished traffic of all descriptions. This depression still continues, but by rigid economies the net results for the first three months of this year are somewhat in excess of those of the corresponding period of last year notwithstanding the greatly increased costs of labor prevailing in 1921."

"As you are aware, the parity of conditions which has existed in United States and Canada resulted in the forced adoption in Canada of what is known as the 'McAdoo Award' and amendments and of the award of the United States. Labor Board made in August, 1920. Increases in wages may have been justified at that time by the abnormal increase in the cost of living, but they were accompanied by alterations in working conditions of such a character as to impose heavy and, in the view of the companies, unnecessary burdens on the transportation agencies of North America. The combined effect of them has been to greatly increase the cost of the operations of all companies. The conditions which rendered them necessary being rapidly ameliorated, it is apparent that readjustments will be essential. The effort to secure reductions in wages and alterations in working conditions has already been commenced in the United States and is proceeding in a sane, orderly and legal manner. What is accomplished there will undoubtedly reflect on the rates of pay and working conditions in Canada. These increases in wage scales, while not the only element which entered into the

E. W. Beatty, President of the C.P.R.

increase in freight and passenger rates, were still a very outstanding and potent factor and when the readjustment of wages takes place it is only right that the rate situation should be again re-considered with a view to revision downward. The rates are high but I am not one of those who believe that the existing scale of wages and consequent high freights is responsible for the present business depression; the causes of that go much deeper than the mere standard of wages paid to any given class and are world wide. While reduction in wages does carry with it a reduced purchasing power in the individual such reduced purchasing power is not represented by the difference in the scales of wages because of the general decrease in prices of the commodities to be purchased. Nevertheless, a reduction in both wages and freight rates would have a pronounced and beneficial effect on the general sentiment in the country through the encouragement it would give, and the confidence that normal conditions had been more nearly reached."

"The general trade depression has, of course, reflected itself in the results during the present year's operations of the Company's steamers but the passenger business is well maintained and the prospects of immigration on a large scale are very promising. The construction of the new steamers for the Atlantic and Pacific, to which reference is made in the Annual Report, has been very seriously delayed by the Joiners' Strike in Great Britain, which is still apparently far from settlement and which will defer the delivery of these steamers until at least the end of the present year. These ships are of a class that would render great service during the Summer and Autumn of this year and the fact that they will not be available is to be regretted. As both the direct and indirect benefits of a continuance of an adequate service are very great it may be desirable to purchase other ships, if these can be obtained at moderate prices."

"As indicated in the Annual Report, your finances are in excellent shape. While the balance in the Bank is not, of course, as large as it was at the end of the last fiscal year, the amount is nevertheless a very substantial one, and there is still unissued or undeposited of over Sixty-seven Million Dollars of Consolidated Debenture Stock the issuance of which has been heretofore authorized or that you will be asked to sanction at this meeting. Even in the trying times during and immediately succeeding the War the progress of the Company has been steady and sure and the Assets Statement shows an increase since 1914 of an amount in excess of One Hundred and Seventy Million Dollars."

"Your Directors have recently accepted a proposal for the acquisition by London, England, interests of a substantial amount of Four Per Cent. Consolidated Debenture Stock at a price which was very favorable. This is the first application for the acquisition of Debenture Stock from England since the outbreak of hostilities in 1914, and, in the opinion of your Directors, is an incident of the utmost significance as indicating the resumption of interest in your principal capital security in Great Britain. It may conceivably be the first step towards the re-establishment of a market in England for the ranking securities of the Company which cannot but have an important influence on its future financing."

"As explained in the Annual Report, you will be asked at the special general meeting to be held immediately after this meeting to approve the issuance of Bonds, Debentures or other securities collateral to Consolidated Debenture Stock which the Company is or may hereafter be empowered to issue and for the same amount, such securities to be payable in such currency and at such times and places and bearing such interest as your Directors may think proper."

"While it is not easy to designate in advance the exact purposes for which money may be from time to time required, it is thought by your Directors that your approval should be asked to the creation and issue of such securities as will enable them as conditions warrant to provide money for extensions and new steamers and also restore the cash reserves of the Company, substantial amounts of which have, during the last few years, been expended on Capital Accounts of the Company."

"The Company's enterprise is now so extensive that in providing for normal and proper expansion large sums of money are quickly absorbed. You will, I feel sure, recognize the desirability of having your financial arrangements in such shape that your Directors can, without avoidable delay, secure funds for your purposes at intervals as circumstances may justify or require and to that end will invest them with the proposed powers."

BIRTHS

At Summerland Hospital on July 5th, 1921, to Captain and Mrs. H. H. Creese, a son. 49p

AT HOME

The home of Mrs. Basil Steuart was the scene of a very pretty reception on Thursday afternoon last when she and her mother (Mrs. Van Tassel of Vancouver) were at home to nearly fifty ladies.

The home had been profusely decorated with flowers and no efforts spared to make the guests enjoy themselves. Miss Dorothy Chew opened the door and Mrs. Steuart and her mother received the guests. Extremely dainty refreshments were served in the dining room by a number of ladies, Mrs. Logie and Mrs. Munn presiding at the tea tables, while Mrs. T. B. Young and Mrs. McCutcheon cut the ices.

Miss Whiteford played several selections during the afternoon, which were much enjoyed.

Mrs. J. Crawshaw of Vernon, with her children, is spending a week or two with her sister, Mrs. Geo. Gartrell.

Naramata is experiencing quite a revival in building activity. Most of the new buildings going up are on the ranches of the district. More than 100,000 feet of lumber has been taken over from Summerland to Naramata by the Okanagan Lake Boat Co. this spring.

In addition to an order-in-council giving the Summerland Fruit Union possession of the street end now covered by the foundation of the new storage building, a quit claim deed from the Municipality was also necessary. This was authorized at this week's meeting of the Municipal Council.

The secretary of the Lakeside Sunday School reports that the school has recently closed its banner year with an average attendance of 108. Receipts for the year were \$340. Of this \$77 was given to Missions, and a contribution of \$33 was made to the Chinese Famine Fund.

The Mutual Fruit Co. shipped its first carload of cherries on Wednesday of last week. The fruit was assembled at Kelowna and loaded there. Other carloads were shipped on the nights of Tuesday, Wednesday and Thursday of this week.

Mr. Hage, general manager of the Community Lumber Company was a visitor at the local office of the company last week.

Mr. and Mrs. Robson have come over from Rossland, B.C., where he is in charge of the public schools, to spend the summer vacation at the home of their daughter, Mrs. E. H. Butler.

Mr. R. S. Shaw, at one time accountant with the Bank of Montreal here and now with the same institution in Vancouver, was a visitor in Summerland on Monday. He was accompanied by his wife. They are spending a month's vacation on a motoring trip and were going through as far as Kamloops intending to return here later.

Messrs. M. F. O. Connor, general merchant, and A. H. McDermott, dealer in orchard supplies, etc., both of Okan, Wash., were members of a motor party to Summerland last week end.

Mr. J. A. MacKelvie, M.P., was a visitor to Summerland on Tuesday. While here he met a number of his supporters and discussed local matters with them. He went from here to Peachland on Wednesday afternoon.

Mr. M. S. Logan, a well known public man of Vancouver, was a visitor in Summerland early this week.

Mr. and Mrs. Benson of Kelowna were guests of Mrs. Benson's parents, Mr. and Mrs. F. D. Cooper, over the week-end. While here Mr. Benson made a visit to his pre-emption at Thirsk, accompanied by Mr. Barpes also of Kelowna.

Miss Davis of the Columbian College staff, New Westminster, was the guest of Mrs. G. W. McLaren for a few days last week.

Attention is directed to the announcement in this issue of Messrs. Peckham & Crawford who have taken over the Summerland Garage. It will be noted that they also have the local agencies which Mr. Hatfield, the former proprietor, has held.

Mrs. Jack Conway of Vernon is visiting Mrs. S. J. Conway.

Mr. and Mrs. Geo. Gartrell left for the south Monday for a short holiday trip by motor.

Mr. John Gowans of Simpson & Gowans went down to Vancouver this week on a buying trip.

Miss Moran will leave next Wednesday on a visit to her home at Renfrew, Ont. She will be accompanied as far as Portage la Prairie by Miss Ruth Dale, who will spend part of her vacation in the prairie province.

Mrs. McMillan has as her guests Miss Perry and Miss Russell of Vancouver. They will return to the coast this week end.

On Thursday afternoon, June 30, Mrs. J. Lawler was the hostess to a large number of guests at an At Home given by her on her beautiful grounds in Peach Orchard.

Wm. J. Mack, son of Mr. and Mrs. W. Mack, has resigned his position with the Union Bank at Vancouver, and is now with his parents here. He has taken a position with Walters Ltd.

Mrs. S. J. Conway has sold her orchard and home to a man from Alberta who was a visitor here this spring. She expects that he will arrive in a few days to take possession.

The C.G.I.T. girls of St. Andrew's Church while in camp at Crescent Beach remembered the anniversary of Mr. and Mrs. Alexander's wedding day by presenting them with an address, a beautiful bouquet of roses, and an elaborate wedding cake. Several members of St. Andrew's Church dropped in to extend congratulations and best wishes.

WILL SOON BE IN NEW OFFICE

Within a short time The Review expects to be established in its new uptown office. Arrangements have been made this week whereby the company will have ample accommodation in a new concrete building, the erection of which is to commence immediately.

Mrs. Thos. Behan of Penticton is here on a visit to her mother, Mrs. S. J. Conway.

Accompanied by his wife and son, Marshall, Mr. H. R. Sinclair of Gull Lake, Sask., is here on a two months' visit to his brother, Geo. F. Sinclair.

The ladies of both missionary auxiliaries of St. Andrew's congregation held a lawn social at the home of Miss Sinclair, following a regular business meeting on Thursday afternoon.

The first open air concert of the season was given by the Summerland Band in the bandstand opposite Hotel Summerland on Tuesday. Another one will be given next Tuesday in the vacant lot next to G. H. Inglis & Co's office.

Two young men who were found in the Lakeside Church as a place of abode were warned against repeating the offence on Saturday. Someone noticed that there was a fire in the building and when Constable King was notified he found that the two men had been sleeping and eating there. It is said that this is not the first time that strangers have so used the building.

Mr. J. F. Kane, general merchant, of Okanogan, Wash., accompanied by his wife and family, and Mr. Town,

jeweller of the same city, with his wife, son, and Mr. Mullin, were a motoring party here on the 4th, having been north as far as Westbank ferry. They were guests for a time at the home of Mr. and Mrs. R. E. White. Like many others who have been over the upper Peachland road they were strunk in their condemnation of the temporary highway. The roads from here south they pronounced good. Vasseaux Lake still covers the road to about a foot in depth at the overhanging rock, but the road

bed is good. The bridge over the Similkameen River below Oroville has been repaired and re-opened to traffic. Many American cars, some from distant states visited this part off the province during last week-end.

KISMET AT RIALTO

It was a crowded house that greeted the initial performance of Kismet at the Rialto, Wednesday night. Though the audience had to await

the arrival of the films on the "Siamous" which was late, they were well repaid. The unusual nature of the plot, the exceptional playing of the performers, and the insight it gave to Mohammedan customs made the feature most interesting. The picture is a reproduction of the famous play of the same name in which Otis Skinner ran for three years on the stage.

The scenes made possible by the picture are said to make it far surpass the earlier production.

Some Business Enterprises Are in the 'Wetted Clay' Stage!

"No man ever wetted clay and then left it, expecting that there would be bricks by chance and fortune."
—Plutarch.

STORES do not prosper by chance and fortune, either. The good store, before it is adequately advertised, is in the wetted clay stage of brick-making. The materials are there—but the "making process" must be followed to its conclusion.

—For a successful store is a creation, whose status must be first reached and then maintained THROUGH ADVERTISING.

—As with a newspaper, the store must be constantly made anew. Every day brings a new task of service—an imperative summons to greater effort. Last week's value-giving may have made many new friends—these must be held through this week's value offerings, and these must be ADVERTISED, that the new friends and the old may BE POSTED.

—The good store, the good business enterprise of any sort, will never really 'arrive' until ADVERTISING has placed it in close touch with its public—has carried its message, has MADE KNOWN ITS APPEAL FOR PUBLIC FAVOR.

ORIGINAL LUSTER CAN BE RETAINED

Some Important Rules on the Care of Finish of Motor Cars

If proper care is given an automobile from the first it will retain its first luster for a long time, and, in fact, never reach the stage of being "shabby." The last few years have produced a number of preparations designed to make it easy for the car owner to maintain the original appearance of his car. In fact, there is no excuse for shabbiness except ignorance or laziness.

One of the new ideas in preserving the finish of the car is the so called wax polish, which gives admirable results when it is properly applied. In the use of wax polish the first step is to give the body of the car a thorough cleaning. Then the polish is applied with a piece of cheese cloth and another similar cloth is used to distribute the wax evenly all over the surface. The common mistake on the part of the car owner is to assume that the more wax used the better. As a matter of fact, the thinnest possible film of wax is needed. After the wax has been applied, the finish so imparted will last from four days to a week, and when it begins to get a trifle dull again a new rubbing with clean cheese cloth will bring the luster back. The wax polish may be used for the body, fenders, hood and such other polished surfaces as may be found. It is also a good idea to thoroughly clean the under sides of

the fenders and apply the wax polish, after which mud and dirt will not adhere there as rapidly as before.

Polish Is Sprayed On

The other type of body polish, which is, comparatively speaking, a recent development, is that which is sprayed on the surface with a big syringe-like affair. In the use of this sprayed polish also the body must first be thoroughly cleaned with water. If the surfaces to be treated are merely dusty, the polish may be sprayed on, and the excess, be wiped off with clean cheese cloth. In fact, this is the accepted method of using sprayed polishes, the spraying and then removing the excess with cheese cloth. No vigorous rubbing is necessary with this type of polish.

And after we get through with all these polishes we must return to the fundamental fact that plain water is still the prime essential in cleaning the car. Washing the car is not the casual job that too many owners seem to assume. The lustrous finish of the modern motor car is a delicate thing; it can be damaged irreparably by careless or ignorant handling.

To begin with the car should be washed as soon as possible after it has become muddy or dirty. If mud is allowed to dry on the surface its removal is likely to leave traces behind. In washing the car plain water should be used at a temperature of about 50 degrees Fahrenheit. Water either too hot or too cold is likely to damage the finish. Never turn a stream of water on the body surface. The water is quite likely to carry grains of sand or grit into the enamel and scratch it. Perhaps the best way to deal with the water is to use a large sponge, which should be sopped in the water and then squeezed out

at the top of the panel. The water flows down over the surface in a gentle stream and floats off the mud, which is the proper method.

Unwise to Use Soap

It is unwise to use soap about the body of the car except possibly to eradicate grease or oil spots. In that case a cloth soaked in castile soap suds may be used to remove the offending spots. The hood must never be washed while it is hot after a run, as that will discolor the surface.

To clean the radiator turn a stream of water through it from rear so that water passes out in front instead of getting into the engine and mechanism.

In drying the body a chamois skin, which is really a split sheep skin, is the best weapon to use. Rub in a straight line and never in circles. Tar spots or dabs of road oil may be removed by covering them with salt butter, which softens them so that they may be gently wiped off.

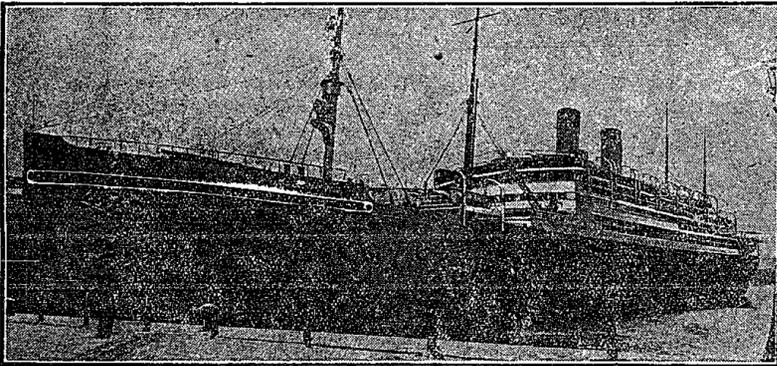

Finally let us call the attention of the average car owner to the condition of the running gear of his car. It is usually incrustated with dirt inches deep. This should be removed with a stout splinter of wood and then the parts should be scrubbed with a soft brush, plentifully supplied with soap and water.

CONSOLATION.

Some of these fellows who are always complaining that the world does not understand them ought to be glad of it.

The Sarnia, Ont., hatchery this season sent 12,825,000 white fish eggs for distribution in British Columbia waters, according to a report from the Dominion fisheries branch.

Largest Canadian Atlantic Ship

THE EMPRESS OF SCOTLAND.

The largest liner ever assigned to the St. Lawrence route is soon to make her initial appearance at Quebec according to announcements made by the C. P. R. This steamer is their newly acquired liner, the Empress of Scotland, formerly the German liner Kaiserin Auguste Victoria and she is expected to arrive at Quebec during the first week in August.

The C. P. R. purchased this liner

from the British government last winter when it was seen that the company's own steamers, which are now being built in England, would not be ready this season on account of the delay arising from the big strike in the ship yards there.

The new Empress of Scotland is of 25,000 gross tons. The liner ran, after the armistice, under the Canadian house flag from Liverpool to New York. She is a first, second

and third class carrier with luxurious cabin equipment. The liner was built in 1906 and was especially designed for the New York service.

The Empress of Scotland will make her first sailing from Quebec on August 11. The new liner is the largest in the Canadian Atlantic service. Her dimensions are: Length, 700 feet; breadth, 77 feet, and draft of water, 34 feet.

What's a Guarantee?

Our idea of a guarantee is that the manufacturer who gives one—which hasn't any tags and loopholes—believes in his product.

So much so that he stands ready to make good any loss suffered by the purchaser through defective material or workmanship.

It's mainly because of the guarantee that goes with them that we are selling and recommending Ames Holden "Auto-Shoes."

Of course, we know they give the cheapest mileage too—that they are dependable tires for any make of car, anywhere. But it's the guarantee that we talk about most. It's the straight and clean-cut, without time or mileage limits. It shifts our responsibility on to the manufacturer and he lives up to every letter of it. Come in and let us tell you about the guarantee that goes with

HARVESTING THE APPLE CROP

Timely And Valuable Suggestions By R. H. Helmer, Supt. Dominion Experimental Station, Summerland.

We must remember that many towns in the Pacific Northwest depend on the apple crop for their existence and it behooves us to make sure that the crop is well harvested and safely stored from inclement weather conditions. When an apple stops growing it has attained its perfection, and if by over watering or heavy rains it is induced to take up too much moisture, water-core may start, which not only ruins the quality of the apple but also very materially spoils its keeping properties. It will readily be seen then, that a definite date should be set to have our picking done.

From many years' experience in the Okanagan we find that a safe date to pick is "all off by the 15th of October." Some growers have criticised this as being too early, but we have found all apples well matured by that time and they have kept well in storage. We have also seen many apples picked after that date spoil in storage from water-core and over maturity. We have seen apples left on to colour up a little more deteriorate very badly in storage, have no flavour, turned quite mealy and, compared with apples that were not so coloured but picked earlier, very much inferior. So, in order to keep up the high standard of our apples we must give thought to an early harvest.

If the supply of boxes is short or for any other reason not available, don't stop picking if the season is well advanced; get some hay, straw, or anything to put on the ground, and pile the apples on it, covering them from the weather.

When apples are picked in boxes during the heat of the day it is well to allow them to cool off before storing them in large piles close together. If the weather is fine, allow them to stand in the orchard all night and haul early in the morning. When storing apples for home use see that the ventilation is good as apples sweat when picked and, when badly ventilated, are liable to deteriorate in flavour and keeping quality.

Eliminate the cull at harvest time. If they have a value store them at home and work them off later. Give the number ones your first consideration, get them safely on the markets. The safest test of a cull apple is, if there is a shadow of a doubt in your mind as the apple comes in your hand whether it is good enough to send to the packing house, don't waste time by turning it over three or four times, let it go in the culls.

Orchards Guarded Against Infection From Outside

How Quarantine Regulations Are Enforced For Protection of B.C. Growers

Something of what is being done by the Province to protect the orchards of British Columbia from pests and disease infection was told to Inspector W. H. Lyne at the third annual conference of the Western Plant Quarantine Board held a few days ago at Victoria.

Inspector Lyne said in part:—

QUARANTINE REGULATIONS.

The quarantine regulations framed in accordance with the Agricultural Act were as usual carried into effect. All imported fruits and vegetables including stored products, such as rice, corn, peas, beans, peanuts, etc., were inspected at their respective entry ports. Imported nursery stock was forwarded to the fumigation and inspection station at Vancouver, where it was closely inspected, and outdoor stock fumigated with hydrocyanic acid gas.

A considerable quantity of apples and pears, principally from the state of Oregon, Washington and California were condemned for codling moth and returned. Certain shipments of peaches, apricots and plums infested with peach worm, scale and brown rot shared the same fate.

A few shipments of Mexican tomatoes were condemned and returned owing to their being infested with tomato or corn ear worm.

About a hundred tons of New Zealand potatoes were condemned for tuber moth and refused entry, and three cars of U.S. potatoes for excessive rot.

Some sweet potatoes from China and Japan were rejected for sweet potato weevil.

NURSERY STOCK EXAMINED.

Miscellaneous nursery stock imported from several sources of supply and found to be infested with important insect pests or infected with disease, was rejected, and if of sufficient value the shipper had the option of the stock being returned to him at his expense.

Considerable stock from the United States, Europe, Japan, Australia and New Zealand was condemned owing to miscellaneous scale infestation, root borer, root aphid, root gall, canker, sour lap, black heart, etc.

White grub larvae closely allied to the Japanese beetle, *Popillia japonica*, were found embedded in the roots of some ornamental shrubs and Iris plants from Japan. Brown tail nests and gypsy moth egg clusters were dis-

Value of Hawks and Owls To Farmers

Are As Useful As Are The Small Insectivorous Birds.

The injury to trees, crops, and grass by insects is not the only evil that threatens man as a sequence to the destruction of birds. Rapacious birds hold a chief place among forces which are appointed to hold in check small rodents, which breed rapidly, and unless kept within bounds are exceedingly destructive. Yet, notwithstanding the unanimous testimony of careful students of birds and their food habits to the effect that almost all hawks and owls are beneficial, a widespread prejudice still exists against them. They are slain as relentlessly as if they were enemies instead of friends of the farmer.

The destructive habits of the small rodents, which are the natural prey of hawks and owls, are much the same all the world around. They do an incalculable amount of damage to standing corn, to corn in the stock or when stacked, to grain, to root crops when growing or when piled on the ground or stored in pits, to orchards and forest trees, to the roots of clover and other grasses, to ground growing fruit, and to gardens, both flower and vegetable. In addition to this list of crimes, certain rodents are active agents in carrying and disseminating the germs of plague and other diseases.

In England, though on account of their small size and secretive habits they are often undiscerned by man's dull eyes, they swarm in such numbers

covered on ornamental shrubs from France.

A few shipments of nursery stock were inspected for export to United States, China and Australia.

Hon. G. H. Hecke, director of the California State Department of Agriculture, presided over the conference. Included in the representatives were Messrs. O. A. Pratt, representing Mexico; D. B. Mackie, California; Chas. A. Park, Oregon; F. H. Gloyd, Washington; D. C. Mote, Arizona; H. J. Webb, Utah; W. H. Wicks, Idaho; Dr. Warnock, Deputy Minister of Agriculture in B.C.; Dr. Mienecke, U.S. Forest Pathologist of San Francisco; S. B. Detweiler of the U.S. Bureau of Plant Industry, Washington, D.C.; F. Maskew, U.S. Federal Board of Agriculture, San Francisco; R. C. Traherne, Dominion Government Entomologist for B.C.; J. W. Eastham, Provincial Plant Pathologist; H. R. Hagen, Professor of Zoology; University of Utah; W. A. S. Robertson, B.C. Horticulturist; E. B. White, Assistant Horticulturist; M. W. Tice, Field Crop Instructor; W. J. Bonavia, Secretary Department of Agriculture; and Professor Barre, of Carvalla, Washington.

bers in the fields and hedgerows that the damage they do must prove a steady drain on the resources of the farmer.

The number of small rodents eaten by the rapacious birds is almost as remarkable in proportion to their size as is the number of insects eaten by small insectivorous birds. During the summer of 1890 a pair of barn owls occupied a tower in a building at Washington. After their departure there were found in the regurgitated pellets, with which the floor was strewn, 454 skulls of small rodents.

The young of hawks and owls remain a long time in the nest, and require a great quantity of food. During this period the resources of the parents must be taxed excessively in the effort to satisfy the hunger cravings of their off-spring, and it is not to be wondered at if some individuals are forced occasionally to snap up a chicken. But what is the worth of the chicken, or of the young pheasant occasionally taken, compared with the hundreds of thousands of dollars' worth of damage that is wrought in the orchards and fields by rodents that hawks and owls, had they been spared, would have fed upon for the maintenance of their species.

In 1885 the Legislature of Pennsylvania passed an act, known as the "scalp act," which provided a bounty of 50 cents each on hawks and owls killed within the State limits, and a fee of 20 cents to the notary taking the affidavit. As the result of this act \$90,000 was paid in bounties during the year and a half subsequent to the passage of the act. An irruption of small rodents followed and did damage to the agricultural interests of the State amounting to \$8,850,000 and even these figures, enormous as they are, do not represent the entire loss. Years must elapse before the balance of nature, which was destroyed, can be restored.—Firelighter.

Agricultural Education At Universities

Agriculture being the basic industry of the country, every advance made in the development of agricultural education is of national value. Recently, several provincial universities have presented extension courses for the benefit of farmers and others. To this end the educational authorities have co-operated with farmers' organizations with highly encouraging results. In the case of Manitoba a course of lectures was given on rural economics and sociology, supplemented by special lectures on a variety of subjects appealing to other sections of the community. In Ontario also, the University of Toronto was induced to give a similar course.

A noteworthy feature of the course was the taking of students to the stock-yards, the abattoirs, and other places of a practical illustrative value. It is felt that the alliance thus established between the agricultural industry and those engaged in educational work will tend to a better understanding of economic problems which affect the welfare of town and country alike.

Grand Forks Seeks Lower Freight Rates

Grand Forks.—The question of transportation charges was discussed at length at a recent meeting of the board of trade, it being pointed out that District Freight Agent Bamford of the C.P.R. had failed to take any notice of the matters which had been brought to his attention with reference to discriminating rates against Grand Forks. It was pointed out how it was possible to bring in a carload of automobiles from the east through Grand Forks and unload them at Penticton, 165 miles further, and motor them back to Grand Forks and save money. The same thing was the case in all lines of freight; express rates were also so high as to be discriminating against this city as a shipper.

A case was cited where a shipment received in Saskatchewan recently, one from Grand Forks and one from the Okanagan; the rate on the one from Grand Forks, for a shorter distance, was greatly in excess.

SCOUT CAMP BROKEN

(Continued from Page 1.)

ed they would like to try for the Entertainers' badge, so the rest of the troop acted as judges. Only two were allowed to try, the scouts refusing any further insult by the weird attempts at music, and the would be entertainers had to flee for their lives.

Perhaps the best example of the spirit with which the boys behaved was shown on the Tuesday night. A.S.M. Tees and the leaders were in town and visitors arrived. Seeing them back to their car after the camp fire, the A.S.M. left the boys to entertain themselves. From the top of the hill, judging from the sounds, they were having a fine time, but on the way down a weird mixture of melody floated up and after a hard struggle one was able to pick out the strains of the National Anthem, and by the time camp was reached there was not a sound. The flag had been hauled down, evening parade called, and the boys had gone to bed without an officer in camp.

The troop wishes to thank Mr. Stark for his generous donation of chocolates and chewing gum, which were certainly enjoyed around the camp fire. Mr. Stark has always been one of the troop's best friends since its inception in 1911, and the boys certainly appreciate his kindness.

Mr. Devitt won a warm spot in the boys' hearts by his gift of sausages which were certainly appreciated after a hard day at sports.

Once again we must thank Mr. C. J. Huddleston for his gift of \$10 to camp expenses. For some years past Mr. Huddleston has contributed to

the camp fund and the boys wish to thank him for the kindly interest he has always shown in the scout organization.

A.S.M. Taylor, while unable to be present during the camp, did not forget the boys, sending down chocolates for them, which were certainly enjoyed.

Complete lists of the scouts who have qualified for King's Scout and all round cords will be ready next week.—Cont.

PEACHLAND NOTES

(Continued from page 3)

district with an old prairie acquaintance, Mr. Evans.

Mr. Art. Henderson received word the other day that he was the proud father of a fine baby boy born in Kelowna. He paid mother and baby a visit since and reports both doing nicely.

Mr. W. J. Robinson of Summerland was a visitor in town on Tuesday, motoring up and returning on the evening boat.

Miss Bertha Bradbury arrived on Wednesday morning from Penticton to spend a short holiday at home with her people.

Among visitors in town on Wednesday were Miss Newton, Miss Pollock and Master Hunter, guests at the Edgewater Inn, while they looked over the community.

Mr. and Mrs. Lamby of Kelowna were guests at Edgewater Inn on Wednesday in passing through by auto.

The Rev. H. A. and Mrs. Solly of Summerland motored through town on Wednesday and left their two daughters, the Misses Dorothy and Veronica to visit for a short time with Mrs. Clarence at the Edgewater Inn.

Mr. Atkinson, manager at the Union, is enjoying a visit this week from his mother, who came down from Vernon Tuesday evening.

Rev. A. T. Robinson who has been visiting relatives in Summerland, came up to Peachland Wednesday morning to visit his sister Mrs. McDougald. Mr. Robinson has the distinction of having been the first minister to a Peachland congregation. It was then a union gathering, being in the days when Peachland was prac-

INDIAN RECORD ON TROUT CREEK

Subject of Investigation by Water Board. Municipality Interested.

CREEK FALLING

May Draw On Reserve Supply Next Week. Assessor Appointed.

At Tuesday's meeting of the Municipal Council it was decided, upon the recommendation of the water committee, to have the Municipality represented by Solicitor W. C. Kelley and Municipal Clerk F. J. Nixon at the sitting of the Water Board on July 21st, when it is the intention of the Board to investigate the Indian water record on Trout Creek.

It is reported that signs directing travellers to the upper Peachland road had been placed, and also that a number of other road signs, painted some time ago for the Board of Trade were being put up by the Municipal Council.

J. Dunsdon in a communication complained that water was being backed up on to his property by a small irrigation dam on Aeneas Creek, which he claimed had no right to be there. He intimated that he would require compensation for alleged damage done, and assurance that the trouble would be removed. Referred to water committee.

It was reported that a barn and ice house the property of the Municipality and located west of the Empire Hall block, though occupied, had been bringing no rent to the Municipality. Instructions were given to bill the occupant at the rate of \$5 per month.

The water committee's report told of repairs to the north main through the Cartwright property and the necessity of building a new flume at Hillpark Gardens, which was now being done. The extension of the domestic water main along Campbell Avenue was authorized on the understanding that Mr. G. J. White, the Baptist Church, and others interested would finance the extension.

The report of the water committee also covered the investigation of several complaints with respect to water service.

Mr. John Tait asked for assurance that water would be conveyed to his and other lots east of Giant's Head before next spring. He was told by the Reeve that the Council had this and other capital expenditures in mind and that they would be submitted to the ratepayers in due course. Mr. Smith, of the same neighborhood, now served by the pipe line, and Mr. P. G. Koop complained of the service they were receiving. Every effort to improve the services was promised.

Mr. C. Noel Higgin enquired as to the re-opening of the road to Crescent Beach. Campers and others were not now able to use their properties there. Very small outlay would be required to repair the road, he said. He was told that this was a provincial matter but that attention of the authorities was being drawn to the situation.

Foreman Tomlin reported that the volume of Trout Creek had dropped rapidly so that there was not more than enough for daily needs. He was authorized to send men to headwaters next week to open the gates, if the flow of the Creek should decrease in the meantime. Mr. Nixon reported that Engineer Dufresne had advised him that the dam on Canyon Creek, recently closed, was filling satisfactorily.

The public works committee recommended the rebuilding of several culverts and lengthening others. After considerable discussion it was agreed that the repairs be made under the direction of the committee at the least reasonable cost. Two new culverts, between lots 46, 50 and 51, D.L. 475, Prairie Valley, were also authorized.

The appointment of an assessor being introduced, Coun. Scott moved that tenders be invited, but he did not get a seconder. On motion of Couns. Thornber and Kirk Mr. W. C. Kelley was appointed to the position at a salary of \$500.

Teacher—What do we learn from the busy bee?
Small Boy—Not to get stung.

An ideal woman is one we frequently hear about but seldom see about.

THE WOMEN'S INSTITUTES.

On Friday, the 8th, instead of the regular monthly business meeting the West Summerland Women's Institute held a garden party at the home of Mrs. Coulter White. Some forty members were present, and a most enjoyable afternoon was spent in the pretty garden.

During the afternoon Mrs. Coulter White and Mrs. Zimmerman who were both delegates at the Women's Institute Conference held in Vernon recently gave most interesting reports of the Conference; after which afternoon tea was served on the verandah. There will be no meetings of the Institute during the summer months, the next one coming in October.

Investigates Water Complaint

Engineer Norrington of the Water Branch was a visitor here a few days ago, when he investigated the complaints with respect to the water flowing from the Zimmerman gulch on to the roads and nearby properties. We are informed that he arranged with Mr. F. R. Gartrell, the chief sufferer to allow the water and mud to flow on to his meadow as soon as the hay crop is off. He promised Mr. Gartrell to recommend to the Municipal Council that it arrange to have the owners of land about the gulch pay Mr. Gartrell to take care of the water.

Suspends Work On Prov. Road

Foreman Arkell Told to Lay Off All Workmen

No work has been done on the government roads under the charge of Foreman J. C. Arkell since July 8th when he received instructions to suspend all operations. The municipal authorities and others have been confidently expecting that the government would make much needed improvements in the lakeshore road which is now a primary highway and under the control of the department of public works.

About the time Foreman Arkell was prepared to go to work on this road, he was ordered to open up the upper road between Summerland and Peachland, because of the washouts near Crescent Beach and beyond.

It is not known whether it is the intention of the department to do any more work this season. If not, this part of South Okanagan will be left in an extremely unfortunate position. It is urged that a comparatively small expenditure would put the lake shore road in as good condition as before the washouts.

We understand that Mr. Arkell has been making estimates on work that may be done under next year's appropriations.

A thing done right today means less trouble tomorrow. If we all get behind local industry by insisting on the products grown or manufactured here, the future of this province will have no trouble or worry for any of us.

TO LEAD ELECTION FIGHT FOR UNITED FARMER PARTY.

Mr. H. W. Wood who is putting up a strenuous fight in order to return a healthy number of members in the Alberta Legislature.

CANADA'S FRUIT CROP PROSPECTS

Generally Good in B.C. Dry Weather Injurious to Eastern Orchards.

Here is what Ottawa statisticians say of Canada's fruit crop prospects according to a recent bulletin wired from the capital:

Reports from Canada's six apple growing provinces point to a crop of this fruit generally in excess of last year. There was a very heavy "drop" in June, however, which, if it continues much longer, will materially reduce the prospects.

According to the July fruit and vegetable crop report of the Department of Agriculture, British Columbia orchards, as well as those in New Brunswick and Quebec, offer promise for a 10 per cent. increase over 1920. Ontario prospects are for a 20 per cent. reduction. Baldwins, Spies, McIntosh and Russets are heavy, but Ben Davis light.

Prince Edward Island expects a big crop of all varieties. In Nova Scotia dry weather and a heavy drop have reduced the outlook. Baldwins are set heavy and a total crop is expected of 10 per cent. in excess of last year.

British Columbia expects a fair to good crop of peaches, but Ontario only looks for 85 per cent. of average. Yellow St. Johns best, Elbertas and Crawfords light.

Plums promise well in Quebec, but Ontario and Nova Scotia will probably produce only a 50 per cent. crop. In British Columbia a fair to good crop is anticipated.

Pears in Ontario and Nova Scotia also promise a 50 per cent. crop, while the prospects in British Columbia are generally good.

Fruit Prices Guaranteed

The New Zealand Government has guaranteed its fruit growers a return of 10 per cent. on the cost of production during 1921 to the extent of 200,000 cases of approved varieties and classes of fruit. The guarantee is limited to fruit grown and shipped on consignment by bona fide fruit growers and fruit growers' co-operative societies, through the New Zealand Fruit Growers' Federation. The Federation must provide equal shipping facilities to all concerned and all fruit must be inspected by the Department of Agriculture and comply with export regulations.

Cloud Lifted From Kaleden

Development Work Being Resumed Under New Control.

As a result of a change of ownership Kaleden and its surrounding fruit lands are to experience a taste of former boom days.

Since the control of the Kaleden Fruit Lands Co. fell into the hands of British interests there has been little done towards the development of that promising fruit district.

Information has recently been received that Sir William Hutcheson Poe of Ireland has purchased the interests of Capt. Banbury, who had foreclosed upon the mortgages he held on the Kaleden properties. A representative of Sir William Poe visited the district a few days ago, and arrangements are being made to form a water district and to put on the market some 2,000 acres of land. Major J. C. MacDonald of the Water Rights Branch of the Department of Lands is now making a report upon the irrigation conditions of Kaleden district in preparation for the organizing of a water district. Particularly cheering to the pioneers of Kaleden is the news that all litigation has been cleared up and holders of agreements of sale from the old Company will now be able to obtain their deeds.

Beginning Easy.

Apparently one still has to go to Naramata for the making of records. Plymouth Rock pullets, purchased this spring by Mrs. Marson as day-old chicks, have begun to lay at the tender age of four months, commencing their appointed duty before their own brothers have even learned to crow. More power to the eternal feminine!

Convention of Irrigators to Be At Vernon

Fifteenth Annual Meet of the Western Canada Irrigation for Okanagan City.

Natural Resources Will Be Exploited

Ranges Contain Many Reservoirs of Water Which May Be Utilized.

The Western Canada Irrigation Association is this year holding its fifteenth annual convention at Vernon, July 27, 28, 29 and 30, having been formed in 1907. In the official guide to the first convention, which was held at Calgary, July 17 and 18 of that year, it was stated that it was gradually dawning on the minds of thinking people that the most significant development in agriculture that Western Canada has yet witnessed is the movement to utilize the ground mountain streams in aiding the farmer largely to eliminate the element of uncertainty of his operations.

NATURAL RESERVOIRS.

Our mountain ranges contain natural resources only awaiting the finishing touch of skill and labour to save water sufficient to irrigate vast areas, in addition to those which are now and can be provided for by our normal water supply. A propaganda so vast and fraught with such far-reaching interest that enters so closely into the whole problem of Western Canada's colonization and prosperity, of deep concern to every resident of the Great West and imperatively demands the impetus, constructive guidance and moulding influence that can only be effectively brought to bear by a strong and competent organization.

This, then, was the object for which the association was formed, and in its fifteen years of existence the Western Canada Irrigation Association has played no small part in the progress of irrigation development in Western Canada.

Early in March, 1907, a few enthusiastic irrigationists had concluded that irrigation in Western Canada had advanced to a point where it was important that a convention should be held and some cohesive effort made, looking to intelligent legislation on the subject. Invitations were issued to representative men throughout the three provinces of British Columbia, Alberta and Saskatchewan to attend a meeting at Calgary the following month. Among those who attended this meeting were: William Pearce, of Calgary; W. H. Fairfield, of Lethbridge; Col. J. S. Dennis, of Calgary; C. D. King, of Raymond; J. T. Hall, of Medicine Hat; I. S. G. Van Wart, of Calgary; J. R. Wheeler and Martin Woolf, of Cardston; E. L. Richardson, of Calgary; and C. W. Peterson, of Calgary.

At the meeting the basis of representation was drawn up and it was voted that a convention should be held at Calgary the following July. The first convention was opened by the Lieutenant-Governor of Saskatchewan, A. E. Forget, and among those who gave addresses were: The Hon. W. E. Cushing, Minister of Public Works in the Alberta Government; the Hon. F. J. Fulton, Commissioner of Lands and Works for Saskatchewan; A. E. Ashcroft, of Vernon; W. E. Fleming, C. W. Peterson, W. E. Fairfield and William Pearce.

VERNON CHOSEN.

The first convention having proved very successful, it was arranged that the second one should be held in British Columbia the following year, and Vernon was the city chosen. This convention was opened on August 8, 1908, and lasted two days. It was attended by 104 representative delegates, who came from British Columbia, Alberta, Saskatchewan and Manitoba. The chief subject of discussion was that of legislation applied to irrigation, and speeches on this question were made by J. S. Dennis, the Hon. F. J. Fulton, Charles Wilson, K.C., J. M. Robinson, of (Continued on Page 8)

The Chef—Too many broths don't spoil this cook. This clever cartoon is based on one of the most discussed Academy pictures by Sir William Orpen.

Hospital Now A Busy Place

Cares For Good Many Patients During Month of June.

Three hundred and fifty-nine days' treatment were given patients at the Summerland Hospital during June, the largest number of patients in the hospital on any one day being nineteen. There were actually thirty-three patients in the hospital during the month. For the first six months of this year 211 patients were in the hospital, the average time per patient being a little over 8 1/2 days.

At the meeting of the Hospital Board held last Monday accounts for June totalling \$1,231.87 were passed for payment.

Miss Johnson, the matron, was granted one month's vacation to be taken as soon as convenient.

Mr. G. J. C. White undertook to arrange if possible to obtain fire hose from the College building.

Dr. Herald, surgeon, of Kelowna, operated on several patients at the hospital this week, among them being Dr. F. W. Andrew.

Summerlands' Are Finest Cherries

Coast Reports on Shipments Sent Down From Here Past Week.

According to reports published in the Vancouver papers the Summerland district is fast coming into the limelight in the coast metropolis as a high class fruit producing section. The Province said on Thursday: "The showing of Black Tartarians and Bing cherries from Summerland was by far the best shown this season. The blacks brought from \$2.75 to \$3.00 per four-basket crate, and the Bings about 20c."

The World's market page mentions the cherries from the Okanagan thusly: "Cherries from the Okanagan were plentiful and included Black Tartarians, Bings and Royal Annes. The Bings were of excellent quality and found a ready market at \$4.50 a lug of about twenty pounds net. Royal Annes and Tartarians sold for \$2.50 a box."

The Princeton Co-Operative Association has assigned.

The radical idea of a free country is one in which the judge invites the prisoner to pronounce sentence.

More Inspectors Are Appointed

Government Will More Strictly Enforce Fruit Market Act.

A general tightening up in the enforcement of the regulations of the Dominion Fruit Marks Act will come this year, according to a statement of Dominion Fruit Inspector B. M. Whyte, of Vernon, who has charge of the Dominion work of inspecting the grading and packing of fruit in the Okanagan.

In past years the Department has made a practice of giving ample warning to fruit shippers of the grades which must be kept up. Now that the shipping business is on a firm basis, the Department feels that a rigid enforcement of the regulations should be followed out. From now on therefore, the inspection will be of such a nature as to require all shippers to live up to the Act in every detail.

In 1919 Mr. Whyte was the only Dominion inspector south of Kelowna. Last year there were two south of Kelowna. This year there will be six in the Valley, three of them being south of Kelowna. Mr. Whyte is in charge of the force.

There will be two men in Vernon, two in Kelowna, including Peachland and Westbank, one in Summerland and Naramata and one for Keremeos and Penticton.

This year's staff is as follows: Vernon, Stanley French and Douglas Henderson; Kelowna, G. E. Dereham and C. N. Higgin; Summerland, W. Buchanan; Penticton, E. S. Rogers.

New Fruit House For Naramata

The Fruit Union will erect at Naramata a two storey fruit warehouse, 49 x 90 ft. The new building which will be located immediately north of the building which the Union now occupies will be of semi frost proof wooden construction. H. W. Harvey of this place has been awarded the contract and Mr. Harvey states that he will begin work on the new building next Monday. The new warehouse is to be completed and turned over to the Union on September 1st.

Made-in-B.C. goods will be a feature of the Vancouver Exhibition this year, according to Manager Rolston, who states that nearly all available space in the manufacturers' building has already been spoken for. "There will no doubt be a record showing of provincial goods," he said, "and much attention will be paid to the quality of goods displayed."

SCHOOL BY-LAW TO BE UP AGAIN

Ratepayers' Meeting Strongly Favors The Building Scheme.

PAYING RENT

Board Under Heavy Expense. Would Pay Interest On \$20,000.

Summerland ratepayers will again vote on the school bylaw, which failed to get the required three-fifths vote a few weeks ago.

At a well-attended meeting, held last Tuesday evening in the Rialto theatre, there was an almost unanimous vote in favor of an amendment proposed by Mr. W. C. Kelley and seconded by Mr. S. F. Sharp to the effect that the municipal council be requested to again submit the bylaw to the ratepayers as soon as possible.

Prof. W. T. Broad dealt with the school question from the cost standpoint. Among other things he pointed out that the Department of Education is paying 50 per cent. of the cost of conveyance according to the contracts, and in addition \$100 per year extra per teacher, in view of the fact that this is a consolidated school district. These two combined meant that the department paid four-fifths of the \$4000 which it cost to operate the school vans during the school year of 1920-1921.

Another feature of the local school situation which was pointed out was that the rents which the board will be required to pay during the school year of 1921-1922 will be \$1500, and that this \$1500 would pay interest at the rate of 7 1/2 per cent. on \$20,000 invested in the needed school plant.

Early in the evening Mr. G. J. Coulter White, submitted a resolution to the effect that the voting on the school by-law be stood over until the annual elections. Later, he asked to be allowed to withdraw this motion, but his seconder Mr. S. A. Denike, would not permit. The amendment as noted above was then proposed and carried with a large vote.

Resignation to Attorney General

Police Magistrate Hutton Resigns—Objects to Attitude of Victoria.

Just before going to press, The Review learns that Police Magistrate Hutton had tendered his resignation to the Attorney-General. This, we understand, is the result of a letter from the Department of the Attorney-General which seemed to criticize the action of the Council in increasing the salary of the magistrate. The letter stated that the increase seemed to be unusually high, and asked that information justifying such an increase, before having had the assent by a minute-in-council, be supplied to the Department.

At Tuesday's meeting Municipal Clerk Nixon was instructed to forward the letter from Magistrate Hutton in which he asked for the increase and pointed out the volume of work required of the police magistrate, and in which he proposed resigning unless an increase were granted.

The letter from the Department of the Attorney-General was to be handed to the magistrate.

Cannery Pack Will Be Small

The Dominion Canners, B. C., Ltd., operating at Penticton, will pay the growers 4c a lb. for peaches. No cherries have been packed this year by that cannery, and there will be only a small pack of apricots, for which the growers will be paid 4 1/2c and 5c. An unsatisfactory market, with low prices being paid by American packers, is said to be the reason for the small pack by the Dominion Canners.

DO WE FULLY APPRECIATE THE BEAUTY OF OUR SURROUNDINGS?

"Newcomer" Gives His Impressions of The Natural Beauty And The Latent Possibilities of This Section of The Okanagan.

It occurred to me the other day that many readers of The Review would be interested in some of the things that have presented themselves to me, a newcomer, concerning Summerland district, and the community in which it is located. With this in mind I am submitting for your consideration a series of short articles for publication, should they appeal to you as worth while, after your perusal.

As I have said I am a newcomer here, a stranger in a strange land. Even the customs of your people are new to me, and although interesting, they have had some puzzling effects upon me, and several amusing incidents might be mentioned, but I shall refrain from doing so inasmuch as the point of the joke generally landed where I least expected.

I don't want to "get in bad" with your readers, and ask forbearance should I seem to transgress upon sacred grounds of traditional opinions and customs. I shall not attempt to be "funny," and that which may appear to be an attempt at witticism on my part should be taken not as such, for I assure you that I am anything but a humorist. In fact what I have to say is said in all seriousness and sincerity.

I wonder if those of your readers who have lived in this district any length of time really appreciate the wondrous beauties of their surroundings? Some do, of course, but many, no, I would say. I have talked with many since my arrival in Summerland. Some whose homes are situated in the outlying parts of the district and others whose homes are among the orchards in the Naramata district across the lake. You would be surprised at the variant answers given to my query upon the subject. I will not dwell upon this point here, although many of those I have talked with have assured me that they do realize that they reside in a glorious district, a delightful climate and that the future holds possibilities that they never dreamed of a few years ago.

It is upon the point of possibilities that I intend to confine my remarks, if you please. The writer has visited every state in the Union across the boundary line and nearly every province in Canada. A native of the great state of Iowa, a resident of South Dakota for six years, a cowboy on the Wyoming plains before fencing obliterated the trails and in later years engaged in business that took him to all parts of the western world.

In all my travels I have never witnessed a more beautiful country than that surrounding this place. Your climate is almost ideal. The summers are not too hot nor from what I can learn, the winters too cold. There seems to be a happy medium here in that respect. Your towns, as we would call them in Yankeeland, are built upon the shores of one of God's great nature gifts—the Okanagan Lake, surrounded by friendly pine covered mountains whose gentle slopes to the water's edge have been reclaimed from their natural state and converted into thousands of orchard tracts, with full bearing orchards and homes dotting the landscape as far up and down the lake shores as the eye can travel.

There have come great changes in this Valley in the past fifteen years, when last the writer visited here. There were towns scattered along the lake shore then, and here and there bearing orchards were yielding forth delicious fruits, mostly peaches, as I remember, but those who resided here a decade and a half ago will bear me

out in the statement that a great change has come and the Valley has forged ahead amazingly.

We need only take a peep into the past to forecast the future of a community of this nature. One man said to me—he has resided near Summerland twenty-two years—that the growth will be slow in the future, because all the available land has been reclaimed, and that which is left is not worth while. How many times have I been told the same story during the past twenty years in my travels about the western world. I would not say positively, but believe it would be safe to say an hundred times or more. Yet we find that the wheels of progress drifting westward have opened the eyes of even the wisecracks to possibilities in their own communities that they never realized existed and on and on have come the hordes of people looking for and building homes in the land away from the congested centres.

I shall make a prediction here that may seem wild to some, but one that I believe will prove me not far wrong. The next decade will see greater advancement and development in the Okanagan Valley than that which has come during the past fifteen years. It is of the future that I propose to deal in the articles that follow. The first of these will be captioned: "When the Awakening Comes," and will appear in these columns next week.

As it seems to be the fashion to sign articles for publication by using a nom-de-plume, please put me down as—

NEWCOMER.

DISSIDENT

I do not see the beauty that you see in city streets. Rather I seem to find a discontent, a blur across the mind. I need the open country and the sea. With both the town and city far behind.

I do not see the beauty that you see in stores and theatres, subways dark and grim, Whirled madly by a mob. Rather I need Companionship of trees at far earth's rim, Where flowers doted the woodland and the mead. Here I know silence, fortitude and peace, Which all your city glamour may not give, And when the dusk creeps up the valley ways I hold out arms to meet it—and I live. —Harold Vinal.

LANDS FOR SALE.

15 acres of good dark soil with creek running through bottom land; about 7 acres cultivated; property of the late Mr. F. A. C. Wright. A well built bungalow in excellent condition; hot and cold water; Delco light, good outbuildings. \$7,500.

CHEAPER GASOLINE ATTRACTS TOURISTS

Travel From States To B.C. Is Heavier: Many To Settle Here.

Dropping gasoline prices are having a distinct effect upon tourist traffic to Vancouver and other B.C. points, according to the city's information bureau, which reports a marked increase over last year's figures, largely occasioned by the return of the cost of "gas" to more nearly normal levels.

The high prices of railroad and sleeping car accommodation which have prevailed in recent times have been keeping many people at home who otherwise would have been vacationing in distant fields. The dropping cost of motor travel has, however offset this to a considerable extent this year and the roads leading up from the border are bearing a steady stream of visitors to the province.

From the hundreds of enquiries received monthly by the bureau, it is evident that in addition to those seeking recreation in our hunting districts and summer resorts, there are increasing numbers of prospective settlers who believe that British Columbia offers better opportunities for fruit farming, cattle ranching and other agricultural pursuits than are to be found in the American Pacific states.

The desirability of completing the road between Hope and Princeton is emphasized by the bureau, the management stating that a very large proportion of the enquiries received come from parties who wish to motor from Vancouver to Banff, which is impossible till the gap between the two points mentioned is filled by a good motor road.

SHOULD RE-INVEST 2 P.C. IN ADVERTISING

Newspaper advertising was strongly urged upon the druggists at the annual convention in Toronto of the Ontario Retail Druggists' Association by Frank Stockdale, conductor of the Retail Merchants' Institute, Chicago, and formerly chief of the lecture bureau, Associated Advertising Clubs of the World. Mr. Stockdale advised the druggists to seriously consider the newspaper proposition if they desired to increase their sales and add new customers to their lists of patrons. The druggist should place his advertisements on the basis of 2 per cent. sales, Mr. Stockdale said.

It isn't difficult to like a man after you discover that he thinks you a world-beater.

Still, trying to maintain a greater navy than the neighbor's doesn't cost the world a great deal more than trying to dress daughter better than the neighbor's.

Retail Agent:
H. W. HARVEY, West Summerland, B. C.

The above is a local industry with Sawmill and Box Factory at Mineola about 9 miles from Summerland, and has been operating in this district since 1907. Manufacturers of all kinds of Building and Flume Lumber, Box Shooks and Fruit Packages, employing about 65 men, including 21 married men with families and 23 returned men.

The monthly payroll of approximately \$7,000.00 circulates mostly in Summerland and district. Supplies, material, etc., as far as possible are bought locally.

The lumber is shipped to Eastern Points, used locally, and in the manufacture of Fruit Boxes.

The output of the Box Factory is mostly used by the local Fruit Packing Organizations.

Wholesale shipments are made from the railway point at Faulder, B. C., and retail shipments through the local agent, H. W. Harvey, West Summerland, B. C.

Boy Scout Column

1st SUMMERLAND TROOP B. P. SCOUTS

Headquarters, The Gymnasium.

Scoutmaster O. F. Zimmerman

Meets every Friday evening at 7.30 p.m.

July 12th, 1921.

By the enthusiasm shown by the boys at Friday's meeting there is going to be a good summer's work at Scouting. Thirty-five scouts were present for roll call and the evening's work commenced. First thing on the programme was the election of two new patrol leaders, the troop has grown so that four patrols is inadequate.

When the ballots were counted it was found that Second Noel Wright and Colin Chisholm were elected and were accordingly appointed leaders. This meant a complete readjustment of patrols; so new seconds were appointed and the scouts appointed to the several patrols.

As the troop now stands there are six patrols with leaders and seconds as follows:

No. 1, Eagles: Ronald White; 2nd, Ken. Walden.

No. 2, Kangaroos: Jack Harris; 2nd Jas. Smith.

No. 3, Coyotes: John Denike; 2nd, Lloyd Whiteford.

No. 4, Owls: Ivor Harris; 2nd, Ralph Purves.

No. 5, —: Colin Chisholm; 2nd, Mac Laycox.

No. 6, Lynx: Noel Wright; 2nd, Clyde Caldwell.

This gives seven boys to each patrol, which is quite enough for the leader to manage properly.

We are glad to welcome Scout W. Mack to the troop. He will be acting A.S.M. for the summer.

The young boys of Summerland will be interested to know that a cub pack is to be formed shortly with Mr. S. Sharp as Cubmaster. Rules and guide for the formation of such are expected shortly when enrollment begins.

As intimated last week we publish below a full list of winners at the annual sports July 1st, also a diary of camp life.

75 Yards Dash, Junior: A. Howell, Kangaroos; R. Purves, Owls; J. Wilson, Kangaroos.

220 Yards Open: R. White, Eagles; J. Denike, Coyotes; E. Wilson, Owls.

Senior Broad Jump: Wilson, Owls;

R. White, Eagles; J. Denike, Coyotes.

Junior Broad Jump: R. Purves, Owls; A. Howell, Kangaroos; George Graham, Owls.

Hop, Step and Jump, Junior: R. Purves, Owls; Howell, Kangaroos; Wilson, Coyotes.

Senior Hop, Step and Jump: Wilson, Owls; Denike, Coyotes; Walden, Kangaroos.

Signalling Competition, Patrol: Owls; Eagles; Kangaroos.

Scouting Competition: Owls; Eagles and Coyotes tie.

Putting the Shot, Juniors: George Graham, Owls; Purves, Owls; Howell, Kangaroos.

Putting the Shot, Seniors: Walden, Kangaroos; Wilson, Owls; Denike, Coyotes.

100 Yard Dash, Open: R. White, Eagles; Wilson, Owls; Denike, Coyotes.

150 Yards, Junior: A. Howell, Kangaroos; Purves, Owls; N. Solly, Eagles.

Throwing the Baseball: Walden, White, Ivor Harris.

Juniors: Purves, Owls; Nicholson, Eagles; Graham, Owls.

Senior High Jump: Wilson, Owls; Denike, Coyotes; J. Harris, Kangaroos.

Junior High Jump: Ivor Solly, Eagles; Howell, Kangaroos; Purves, Owls.

Patrol Relay Race: Owls; Kangaroos; Eagles.

Trick Diving: Clyde Caldwell; Ivor Harris; K. Gartrell.

Dive: Gartrell; I. Harris; J. Harris.

Relay Swimming Race: Owls; Coyotes.

The water was too rough to hold further water sports.

THE CAMP DIARY.

Saturday: At last the day! 1.30 saw us all at the wharf ready for camp, and we were soon on board under the orders of A.S.Ms. Tees and Harris. We were sorry to have to leave our S.M. on the wharf, he being unable to come, so we gave him three hearty cheers as the boat pulled out. We were soon at our destination, good old Miller's Point, and had our packs on the wharf.

After the grub had been safely stowed away in the cookhouse, we drew lots for tents and sites, and then beat the officers in getting the canvas raised.

After a swim we sat down to a wonderful meal which made Mrs. Miller famous, and then started to get the tents in shape for a hurried inspection.

After camp fire we retired and stretched out on the ground and tried to sleep, but the mattress didn't seem conducive to rest. Didn't we envy the Kangaroos who won the privilege of using the mats for hav-

ing the neatest tent. However we finally dozed and forgot all until morning.

Sunday: Awakened bright and early by early birds from the patrol across the way. No more sleep until Reville blew at 7. After getting blankets out to air we had a hurried dip and then scrambled into our uniforms for hoisting flag and prayers.

Breakfast came along at 7.30 and we were ready for it, after which we were given until 9 o'clock to make our tent and grounds as pretty as possible. At 9 we had to fall in, in front of the tent for the trying ordeal of inspection. After everyone had inspected the other for dirty knees, etc., we thought we were ready. Evidently not so. Here a piece of chewing gum paper, an orange peel, socks on inside out or something, all seemed to have been overlooked—except by the A.S.M., so we did not win the mats again and had to listen to the Kangaroos crow again, and think of the cold, cold ground. However, we were soon in the middle of P.T. and forgot about inspection.

From 10 o'clock to 11 we were given a chance to study for our tests and at 11 we all felt like a swim.

The general orders for camp were posted to-day as follows:

ROUTINE FOR CAMP.

6.45 Orderlies rise, proceed to cook house.

7.15 Reville, blankets out.

7.20 Washing parade.

7.30 Hoist flag and prayers.

7.30 Parade, breakfast.

8. Free. Ready for inspection.

9. Fall in (patrols). Inspection.

9.15 Fall in. P.T.

9.30 See daily orders.

11. Swimming parade.

11.30 Fatigue work; wood for camp fire.

12. Lunch.

1. Compulsory rest—no moving about camp.

2. See daily orders.

4. Swimming parade, compulsory.

4.30 See daily orders.

6. Supper.

7. Games.

8.30 Camp Fire.

9.15 Ready for bed.

9.30 Lights out, no more talking.

Monday: Routine work until 9.30, but all appeared to be feeling better as the ground didn't seem quite so hard the second night. At 9.30 the A.S.Ms. were kept busy passing tests, each patrol seeming to be bent upon having the largest number of first class scouts. From 10.30 on we began to work on our tenderfoot work (which we are still supposed to know) ready for the patrol competition in the afternoon.

Swim at 11 as usual followed by the usual wonderful dinner. We all felt ready to rest so the hour of en-

forced quiet did not annoy us, and we felt quite ready for the competition at 2. Unfortunately we didn't win. We should have though. However, we had better luck in the fireman's lift race, landing our men in far ahead of the others, so felt very snugly satisfied.

Several of our boys were successful in doing the mile at scout pace in 12 mins. One can do it nicely in less but rules are rules, so 12 minutes it had to be, with 15 seconds leeway. If anyone thinks it is easy let him try it. After supper we chose up sides for football, and being a game it didn't matter if we did kick the A.S.M.'s shins. We did, and our side won.

Round the camp fire that night there was great excitement. The comet or something was supposed to hit us. Unfortunately the sky was cloudy so we couldn't see just where it was going to hit, so we thought around the camp fire was as safe a place as any. A.S.M. Tees began to tell us all about the stars, and by the time he had finished we were all figuring how many million miles away the comet was going to miss us by. So we went to bed contented.

The diary will be continued in next issue.

The troop will parade in full uniform to-morrow (Friday) at Ellison Hall.

A permanent blush can now be supplied by the beauty specialist. Just the thing to wear with some of the evening gowns we have seen lately.—London Opinion.

Synopsis of Land Act Amendments

Minimum price of first-class land reduced to \$5 an acre; second-class to \$2.50 an acre.

Pre-emption now confined to surveyed lands only.

Records will be granted covering only land suitable for agricultural purposes and which is non-timber land.

Partnership pre-emptions abolished but parties of not more than four may arrange for adjacent pre-emptions with joint residence, but each making necessary improvements on respective claims.

Pre-emptors must occupy claims for five years and make improvements to value of \$10 per acre, including clearing and cultivation of at least 5 acres before receiving Crown Grant.

Where pre-emptor in occupation not less than 3 years, and has made proportionate improvements, he may, because of ill-health, or other cause, be granted intermediate certificate of improvement and transfer his claim.

Records without permanent residence may be issued, provided applicant makes improvements to extent of \$300 per annum and records same each year. Failure to make improvements or record same will operate as forfeiture. Title cannot be obtained in less than 5 years, and improvements of \$10 per acre, including 5 acres cleared and cultivated, and residence of at least 2 years are required.

Pre-emptor holding Crown grant may record another pre-emption, if he requires land in conjunction with his farm, without actual occupation, provided statutory improvements made and residence maintained on Crown granted land.

Unsurveyed areas, not exceeding 20 acres, may be leased as homesteads; title to be obtained after fulfilling residential and improvement conditions.

For grazing and industrial purposes areas exceeding 640 acres may be leased by one person or company. Mill, factory or industrial sites on timber land not exceeding 40 acres may be purchased; conditions include payment of stumpage.

Natural hay meadows inaccessible by existing roads may be purchased conditional upon construction of a road to them. Rebate of one-half of cost of road, not exceeding half of purchase price, is made.

PRE-EMPTORS' FREE GRANTS

The scope of this Act is enlarged to include all persons joining and serving with His Majesty's Forces. The time within which the heirs or devisees of a deceased pre-emptor may apply for title under this Act is extended from one year for the year of the death of such person, as formerly, until one year after the conclusion of the late war. This privilege is also made retroactive.

No fees relating to pre-emptions are due or payable by soldiers on pre-emptions recorded after June 26, 1918. Taxes are remitted for 5 years.

Provision for return of moneys accrued, due and been paid since August 4, 1914, on account of payments, fees or taxes on soldiers' pre-emptions.

Interest on agreements to purchase town or city lots held by members of Allied Forces, or dependents, acquired direct or indirect, remitted from enlistment to March 31, 1920.

SUB-PURCHASERS OF CROWN LANDS

Provision made for issuance of Crown grants to sub-purchasers of Crown Lands, acquiring rights from purchasers who failed to complete purchase, involving forfeiture, on fulfillment of conditions of purchase, interest and taxes. Where sub-purchasers do not claim whole or original parcel, purchase price due and taxes may be distributed proportionately over whole area. Applications must be made by May 1, 1920.

GRAZING

Crazing Act, 1919, for systematic development of livestock industry provides for grazing districts and range administration under Commissioner. Annual grazing permits issued based on numbers ranged; priority for established owners.

Stock owners may form associations for range management. Free, or partially free, permits for settlers, campers or travellers, up to ten head.

IMPERIAL Polarine MOTOR OILS

Keeps Motors Smooth Running

Quality maintains economy. You may pay less "per gallon" for other lubricating oils but you get more lubrication "per dollar" when you buy Imperial Polarine Motor Oils.

USERS of Imperial Polarine Motor Oils enjoy a singular freedom from engine trouble, which is at once a source of profit and pleasure to them. Every bearing and rubbing surface is cushioned with an unbreakable oil film which relieves friction and minimizes wear. Good compression is also maintained, saving both fuel and oil and increasing power. Lessened repair bills, lower upkeep costs, better satisfaction and longer service from your car follow the use of Imperial Polarine Motor Oils.

Consult our Chart of Recommendations for the grade of Imperial Polarine best suited to your motor. See Charts at your dealers or write to 50 Church Street for "Automotive Lubrication," a booklet which contains the Chart and other valuable information.

IMPERIAL OIL LIMITED

Branches in all Cities

FOR A CLEAN EFFICIENT MOTOR.

The crank case of your motor should be drained, cleaned and refilled with fresh Imperial Polarine every 1,000 miles or less. Dealers who display this sign give expert crank case cleaning service, using Imperial Flushing Oil, a scientific cleaning agent which removes all dirt, grit and impurities, which are so harmful to your engine. It will pay you well to employ Imperial Polarine Crank-Case Service to-day.

WE GIVE IMPERIAL Polarine CRANK-CASE SERVICE

The Summerland Review

Established August, 1908
Published at Summerland, B.C., every Friday by
THE REVIEW PUBLISHING COMPANY, LIMITED
Ralph E. White, Editor and Manager
An independent family newspaper covering Peachland, Summerland and
Naramata and adjacent districts.

Subscription Rates—In British Empire, in advance, \$2.50 per year; six
months, \$1.40. To U.S.A. and other countries, \$3.00 per year.

Advertising Rate Cards and information respecting territory and samples
of paper mailed upon request, or may be seen at the office of any advertising
agency recognized by the Canadian Press Association.

Advertisers must have copy in by Wednesday noon in order to insure
changes for standing advertisements. New display advertising copy can
be accepted one day later.

Correspondence—Letters addressed to the Editor and intended for publi-
cation must be short and legibly written on one side of the paper only.
The longer an article, the shorter its chance of insertion. All communi-
cations must bear the name of the writer, not necessarily for publication. The
publication or rejection of articles is a matter entirely in the discretion of
the Editor. No responsibility is assumed by the paper for the opinions
expressed by correspondents.

FRIDAY, JULY 15, 1921

THE LAKESHORE ROAD AN ASSET.

It is hoped that the road officials will find a way to quickly repair and widen the lakeshore road between Summerland and Peachland. It is true that the high water this spring has done much damage to this thoroughfare and that it will cost considerable money to put it in good repair again, but we believe the benefits will justify the expenditure. A movement is under way to take care of the flood waters in the future and it is not likely that their reappearance will prove as disastrous to roads in the future.

There is one thing that must be borne in mind when we determine upon making changes and improvements in our roadways. Not only must we provide suitable roads for the accommodation of local people, but we must remember that the tourist travel must be encouraged. There is nothing that will bring tourists into this section of the province as will good roads.

A picturesque driveway, like the lakeshore road, is an asset worth more to the community than many realize. There has been little effort or pretense made in the past to develop the tourist travel into the interior districts of British Columbia, but the future will bring great changes in this respect. There is a movement on foot to induce the Government to undertake the work of advertising the beauties of this province. In another place in this issue of The Review appears an article upon the subject that should receive the attention of our readers. While the writer, Mr. Arthur Lineham, tells of the beauties of the upper and western portion he does admit that the whole province is included in his picture of the great north-west wonderland.

It will be up to each individual district to place before the world the attractive things it has to serve, and it will likewise be well to preserve and improve such assets as the lakeshore road, for as sure as day follows the night, the Okanagan Valley will be among the first of the wonders in the great "Switzerland of America" recognized by the visitors.

TURN ABOUT FAIR PLAY.

For some months past there has been a movement on boosting trade at home. We all realize that the movement is a good one and that the people of a patriotic nature will follow out the logical suggestions set forth. There is another phase of this matter that we have heard very little about, but which, according to our way of thinking, is just as important, if not more so. It is the need of a strong movement urging the city people to purchase farm products grown in the province. If it is proper that the people of the rural districts buy only goods manufactured in B.C., or Canada, as the case may be, in order to build up the manufacturing centres and keep our idle men employed, then why would it not be right and proper that the city buyers of farm and orchard products purchase from the orchards and gardens in their own province, as long as they are able to get as good or better home grown produce as from other places?

We believe the people of the cities would gladly respond if the papers in the large cities would take up the cause with as much "pep" as they have the "Made-in-B.C." movement.

While it may be argued that the movement covers the products of the rural districts as well as the manufactured goods from the cities, to the average ruralite very little has been observed in the propaganda distributed that would indicate a thought from this angle had entered into the plan. It is not too late, however, and it is hoped that this feature of the plan will become a little more conspicuous in the future.

We have a concrete example of how this matter works out. The Vancouver papers the past week have been telling us that the cherries from Summerland and the Okanagan arriving on the metropolitan markets are of the highest order, and in fact fruits from the States that have hitherto held the place of honor are forced into second place, yet we read in those same papers that Wenatchee and other southern fruits are arriving daily and our own fruits must not only outclass in quality that from the older fruit sections, but share the limited markets in our own centres.

While we are not complaining, for we know we can produce the goods to meet the test of any market in competition with these older districts, yet there is a feeling that the city folk should give preference to home grown products. By doing so they will not only encourage greater home production, but provide a more substantial and staple market for the growers, and thereby help a great deal in bringing about a more friendly feeling and a better understanding between the people of the rural districts and those of the manufacturing centres.

Appropos of the Hospital Bonds issued by the Municipality of Summerland, the remainder of which are now being offered our citizens, we note that the City of Kamloops has recently made a successful sale of school bonds to its citizens, and has now decided to give them a further opportunity to invest in city bonds. This new issue is for \$35,000, 7 per cent. twenty year school debentures, and the issue is being offered at par.

Dates of Fall Fairs Are Fixed

The dates of the fall fairs throughout the province have been confirmed by the department of agriculture. For fair purposes the province is divided into several circuits, of which the Okanagan is one. The Summerland Fair will be held on November 2nd and 3rd. Peachland's date is October 12th, and Naramata's October 20. Lumby, Armstrong, Pentiction and Salmon Arm fairs are all held in September, and Kelowna early in October.

FIRST FRUIT OF THE SEASON CAME FROM NARAMATA

It is generally conceded that Summerland and Naramata are the earliest fruit districts in the Valley and there has been more or less of a friendly rivalry between the two places as to which of the two brings forth the first ripe fruit of the season. Naramata placed the first cherries on the market this year, with Summerland a few hours behind, but Summerland beat her sister town across the lake on peaches, the first box arriving on the local market Saturday. They were brought in by Magnus Tait of Trout Creek and were of the Mayflower variety. The first cherries offered from the Naramata district were of the Governor Wood variety.

The Bings began coming in the latter part of last week and Lamberts are now arriving from local orchards. Both varieties are of the best, both as to color and flavor.

WHY HE REFUSED

A young theologian named Fiddle refused to accept his degree, "For," said he, "it is enough to be Fiddle. Without being Fiddle, D.D." —Philadelphia Public Ledger.

WEDDINGS.

Phinney—Forbes.
On Wednesday, June 29th, a quiet but pretty wedding was solemnized at the Presbyterian manse, Pentiction, when Miss Hazel Kennetta, eldest daughter of Mr. and Mrs. A. M. Forbes, of Lulu Island, became the bride of Mr. Harvey Brown Phinney, of Pentiction. Rev. A. Ferguson, Miller officiated. The bride, who looked very lovely in a pretty suit of cream jersey cloth and a large white picture hat, wore a corsage bouquet of pale pink rose buds and orange blossoms, and was given in marriage by her father. Mrs. Charles Stuart, matron of honor, was most becomingly gowned. Mr. Stuart supporting the groom. After an appetizing luncheon was partaken of Mr. and Mrs. Harvey Brown Phinney left on their honeymoon tour, and on their return will reside in West Summerland, in their new home. The bride's mother was attired in black silk, with pale mauve trimmings. The groom's mother wore a beautiful costume for the occasion. The bride, who was a very popular native daughter of Vancouver, was one of the young ladies who zealously assisted the Daughters of the Empire, for "our boys" overseas, during the war, and was one of the officers of the Victrola Chapter when organized at Marpole. One of the numerous costly presents received was a beautiful silver tea service with tray, from the bride's brother, Mr. Oakley Forbes, who was absent from home.

THE MODERN MARY

Mary had a little calf that she found was a scrub, She sold it, bought a pure-bred one, and joined the Girls' Calf Club. To-day her other pure-bred calves sport ribbons on the show, And little Mary may be seen in her own big auto. —Thos. McGillicuddy.

K.V.R. Employees Getting Less Pay

Kettle Valley Railway men are being paid a reduced wage since July 1st, the reduction, generally speaking being eight cents an hour. This reduction covers engineers, conductors, firemen, and brakemen. Machinists are now getting 77c. instead of 86c., track labour is being paid 40c. as against 48 1/2c. Telegraphers are being paid \$130 per month. For some time they have been receiving \$142.

SUMMERLAND WEATHER REPORT

Below is a report furnished by the Dominion Experimental Station here for the week ending Tuesday:

	Max.	Min.	Rain	Wind	S.S.
July 6	75	55	5.0
July 7	80	55	2.6
July 8	72	57	Trace	6.2
July 9	73	47	14.9
July 10	80	49	12.4
July 11	81	57	10.1
July 12	83	56	13.4

Mining operations in Northern British Columbia are on the increase, new properties are being worked, and old ones re-opened.

When you hear a woman say that she is on the sunny side of forty, it means that she is trying to keep her age shady.

Fashions are naturally regulated by trade conditions. Nearly all garments are worn longer in dull times than in prosperous ones.

The man who makes only penny contributions is usually a cheerful giver.

It's better to be fresh than stale—but don't get too fresh.

ENCOURAGING CANADIAN FORESTRY

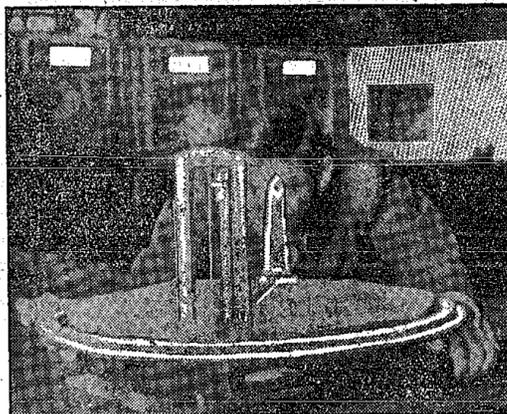

Scene of a Forest Fire.

It was only during recent years that the public of Canada began to fully realize the value of the trees of the country, and the necessity for protecting them. One never knows the worth of a tree until its shade is gone. Canada was so rich in forests that the people imagined that their forests were inexhaustible. But year after year devastating fires swept over the wooded areas to such an alarming extent that the people at last realized that steps would have to be taken to save the trees. Twenty years ago the Canadian Forestry Association was inaugurated. To-day under the presidency of Mr. C. E. E. Usher, passenger and traffic manager of the Canadian Pacific Railway, it is one of the most flourishing organizations in the Dominion.

The produce of the forests is one of the greatest assets of Canada. The pulp and paper business and the lumber business supply tens of thousands with profitable employment. The object of the Canadian Forestry Association is to preserve existing forests, to encourage tree planting, and provide the most up to date forestry administration.

The Association has now 12,500 members, the majority of whom are not financially interested in timber limits, saw mills or paper mills. It is completely independent of government departments and commercial bodies and has the more easily, on that account, won public confidence and attained great influence through its aggressive educational campaign. From the beginning the association has aimed to encourage a spirit of intelligent partnership between the federal and provincial governments and the wood-using industries in connection with the protection and management of the forests.

To diminish much more than in the past the destruction of the forests by fire is considered by the association to be by far the most important problem. After that it gives due consideration to replanting and general forest management. The very effective results of its educational campaign are due to the variety of practical methods that are followed. These include public speakers' bureau of three hundred voluntary workers; travelling lecture cars in the East and in the West; the preparation of travelling

The new Forest Fire Finder, an instrument recently invented to locate a fire quickly. It is expected to reduce the danger and loss from fires to a minimum. The instrument has been installed in the look-out towers in California forests and a fire can be detected 50 miles away.

lecture sets of lantern slides, and lecture manuscripts; the placing of "sermonettes" on the menu cards in railway dining-cars, and little warnings in cigarette packages, etc.

Tree planting in the Prairie Provinces is making rapid headway at present. On April 10th, 1921, a tree planting campaign was started. There are now more than 50,000 plantations of trees in the three prairie provinces, and more than 50,000,000 seedlings have been furnished from the Dominion Government nursery at Indian Head, to prairie farmers. Fully 90 per cent. of them have been successfully grown. A railway car equipped as an auditorium with motion picture machines visits many districts, and lecturers explain the object of the tree planting campaign. It is expected that 200 prairie communities will be covered before the present year closes. The primary object is to enlist the personal interest of settlers in con-

ALL THE READERS OF THE REVIEW SHOULD BE YOUR CUSTOMERS. ARE THEY?

Through unavoidable accident The Review appears a few hours late this week.

Messrs. M. P. Morris, J. A. and R. M. Johnson are here representing the Vancouver World this week. They expect to cover the field in two week's time.

Miss Belle Vanderburg has returned from the Arrow Lakes, where she has been teaching. She spent a week with friends at Nakusp before coming home.

Mr. W. Limmer has sold his cottage on Shaughnessy Avenue to Mr. Wilberforce. Mr. and Mrs. Limmer and daughter Alice have been in Victoria for a few weeks and, we understand, it is their intention to reside there.

Three car loads of cherries were consigned to prairie points from the Summerland Fruit Union this week, besides many express shipments. The Union employs twenty-two packers at present.

PASSING EVENTS

LOCAL, PERSONAL, SOCIAL & OTHERWISE

Mrs. C. E. Bell is visiting at the Coast.

Mr. and Mrs. G. N. Gartrell are away south on a motoring trip.

Miss Ruby Potter of Vancouver is the guest of Mrs. Robt. Mitchell.

Roy Eelsey is home for the vacation. He has been teaching at Smithers, in the northern interior.

T. E. Young is making quite an extensive addition to his garage building.

Penticton bakers have reduced the price of bread from two loaves for 25c to 10c each.

Mrs. W. C. W. Fosbery and young daughter are visiting with friends near Ewing's Landing.

Miss Hazel Harding, who has been living with her aunts the Misses Spencer, went up to Kelowna last week to visit her father.

Walters Limited claim to have made the first shipment from Summerland of cucumbers, the date being July 8th.

Miss Harwood of this place has been appointed to a position on the Summerland Public School teaching staff.

Mr. and Mrs. Harvey Phinney have returned from their honeymoon trip and are living on their orchard property south of Giant's Head.

The Young People's Society of St. Andrew's Church have sent a shipment of cherries to the Vancouver home for tubercular patients.

Mr. J. H. Bowering, who recently returned from a visit to the Old Country, states that he is feeling ninety per cent. better as a result of his vacation.

We clean or dye soiled or faded garments, house furnishings, etc. Let us mail you price list. Permanent Dye Works Ltd., 1641 4th Ave. West, Vancouver, B.C. 48tf

Among the law students admitted to the Bar a few days ago, we note the name of Kenneth Murray Elliott, son of Mr. and Mrs. A. B. Elliott. Kenneth is now a barrister and solicitor.

The survey is now being made of the bench land on the Indian Reserve west of Penticton. The feasibility of watering the land from either Shingle Creek or Trout Creek is being investigated, and an estimate of the cost of same will be made.

Mr. and Mrs. S. M. Young are expected here this month to visit for a while at the home of their son, Mr. T. B. Young. They will motor from Vancouver.

Secretary J. H. Bowering received by wire from Matsqui, B.C. the acceptance of Miss Miller to the position of second assistant to Principal Welsh at the High School. The appointment of first assistant is pending.

Another special attraction is announced this week by the Rialto Theatre. H. B. Warner the famous screen star will be seen next Tuesday and Wednesday in "One Hour Before Dawn." The effort of the Rialto people to furnish entertainments above the ordinary will doubtless be appreciated by theatre patrons who will show this appreciation by attending. Large houses greeted the special attraction last week.

Miss Zona Gale, author of "The Neighbors," recently staged by the Canadian Players at the Home theatre, Naramata, requires, in lieu of cash payment for the privilege, that rural communities plant a fruit tree for each performance of the playlet. Mr. Aikins, realizing that trees are already here in abundance, has sent \$10 in cash instead to the Summerland hospital.

Anything from town lots and one acre lots to 1000 acre stretches, ranging in price from \$7 an acre to \$1000 or \$1300 for full bearing orchards.

COULD LIMIT FRUIT WASTE

M. B. Jackson Explains How Growers Could Improve Conditions By Use Of Local Factories.

The "appalling waste and loss" of fruit on the farms, markets and in the factories of British Columbia could be avoided by co-operation, according to M. B. Jackson, M.P.P. for the islands, who publishes a long article on co-operation in agriculture in the Agricultural Journal.

"By local factories involving but small expense, the lowest grades could be converted into jam or pulp or cider, and so marketed throughout the year, or even held over to strengthen supply in following years," Mr. Jackson states. "Meantime the manufactured product could be financed upon."

"There is a great importance in avoiding glut on the market and extending the period of sale."

"Co-operation certainly should be applied to the matter of fruit growing, stock raising, poultry ranching, and dairying. By co-operation you could watch and know the market and control supply so as to meet demand, spreading the period of marketing over the entire season, getting the fancy products in fancy condition to

the fancy market and securing the fancy price. Have the standard products always honestly up to standard, properly and attractively packed, and ready for the market and put upon the market when the market demands it."

The directors' annual statement and auditors' report for the Summerland Storage Co., Ltd., is being printed in pamphlet form this week for distribution among stockholders.

"This season's bathing suits will reveal new lines."—Fashion note. It sounds impossible.

"Some ha'e jobs and willna work, And some would work that want it, But we ha'e jobs and we will work, Our common sense be thankit."

There are two kinds of parents: those who have sense enough to raise children, and those who always believe the neighbor's little boy started the fight.

Some Business Enterprises Are in the 'Wetted Clay' Stage!

"No man ever wetted clay and then left it, expecting that there would be bricks by chance and fortune."
—Plutarch.

STORES do not prosper by chance and fortune, either. The good store, before it is adequately advertised, is in the wetted clay stage of brick-making. The materials are there—but the "making process" must be followed to its conclusion.

—For a successful store is a creation, whose status must be first reached and then maintained
THROUGH ADVERTISING.

—As with a newspaper, the store must be constantly made anew. Every day brings a new task of service—an imperative summons to greater effort. Last week's value-giving may have made many new friends—these must be held through this week's value offerings, and these must be ADVERTISED, that the new friends and the old may BE POSTED.

—The good store, the good business enterprise of any sort, will never really 'arrive' until ADVERTISING has placed it in close touch with its public—has carried its message, has MADE KNOWN ITS APPEAL FOR PUBLIC FAVOR.

DISTRICT AGENT

Peachland Doings
A Weekly Chronicle Furnished
By Our Local Representative.

Mrs. Morris of Calgary, her son and daughter are spending a month or so in Peachland, guests of Mr. and Mrs. A. J. Miller on Beach Avenue.

Mrs. Iverson went south on Wednesday evening of last week for a short visit.

The community is pleased to welcome again for the summer season Mr. and Mrs. Eddy and their boys, and are hoping that on one of these trips they will take up permanent residence among us.

After a short visit here with her son Mrs. Atkinson took the south-bound boat on Wednesday evening of last week.

Miss M. Smith was a visitor to Kelowna on Thursday.

After several weeks spent visiting in the Trepanier section Miss Montgomery went south on Thursday evening, returning again on Saturday morning accompanied by her sis-

A. J. MacKenzie met him by auto at the Kelowna-Westbank ferry to bring him this far, while Mr. Atkins and Mr. Riley of Summerland met him to take him on to Summerland for the evening service.

Mr. J. Duncan of Westbank arrived by boat on Saturday evening for a week end visit with his sister Mrs. H. McDougall and her son J. E. Kerr. He returned by auto on Sunday afternoon.

Mr. D. A. Cameron of Calgary, representing the Massey-Harris Co., arrived on Monday morning to spend the day with local agent H. E. McCall. During the day they motored to Westbank where they arranged a sub-agency under Mr. McCall's agency. Mr. Cameron left Tuesday morning for Calgary.

After a few days in town Mr. Roberts and sons left on Monday morning.

Citizens spending Monday in Kelowna were Mrs. L. Mills and Major R. G. Hardisty.

The Rev. F. Coad took the boat on Tuesday morning for Westbank, where he visited members of his con-

B.C. at St. Margaret's Church on July 27th at three o'clock.

Miss C. E. Weston has returned from her vacation spent with her pack pony "Old Dick" along the banks of the Okanagan, sleeping wherever night overtook her, and as she says "having a real rest." She tells us that travelling here is quite a different story to taking a jaunt at home, where it has been her custom to go on a walking tour at least once a year. However the beautiful scenery and the lovely lake more than compensated for the up and down roads that she had to travel over. Miss Weston resides at Major Hardisty's ranch and is organist at St. Margaret's Church at Peachland.

Master Earl Law, son of Mr. R. E. Law, recently left Peachland for Golden, B.C., where he has accepted a position with a dairyman there to assist at the dairy and take the milk route. He writes that he is enjoying the life there.

A watering trough has been installed on Beach Avenue, on the main pipe line just across from the Union packing house and near the Royal Bank. It should prove quite a boon to the ranchers hauling fruit

ADVERTISE---

ROBINSON CRUSOE DID

Here is a piece of advertising propaganda that has been going the rounds that strikes us as being about as conclusive and unanswerable as anything that has ever been written on the subject. We don't know who the author is, but he has the right idea:

"One of the most persistent advertisers in the history of success was Robinson Crusoe. He knew what he wanted—a ship—and he put up an ad. for one. He flung a shirt on a pole at the top of his island; that, in the language of the sea, was plain to every sea-faring man.

"The circulation was small—there was no other medium—but Crusoe kept at it, and despite the fact that he got no enquiries for a long time. He changed his copy—as one garment after another frayed out—and in the end got what he wanted.

"Suppose Crusoe had taken down that signal after a time and declared 'Advertising doesn't pay.' Where would he be now?"

"Put up your signal and keep it there. Crusoe advertised under very discouraging circumstances. You've got a sure thing—it is only necessary to have the patience, persistence and pluck of Robinson Crusoe—and the good ship "Better Business" will soon tie up 'longside your pier."

The woman who hesitates is—last.

CALIFORNIA FRUITS INFERIOR TO CANADIAN

Says Trade Commissioner.

Canadian canned fruits have in general a better flavor than Californian, though the appearance of the latter, no doubt due to climatic reasons and methods of packing, is superior. It is stated in a bulletin of the Department of Trade and Commerce by Major Gordon B. Johnston, Canada's trade commissioner in Glasgow. He says further that Canadian packers pay too little attention to the important matter of grading, both in size and quality. For this reason alone, he asserts, a large amount of business which might be Canadian is allowed to go to California.

LINCOLN ON PROPERTY

Property is the fruit of labor; property is desirable; is a positive good in the world. That some should be rich shows that others may become rich, and hence is just encouragement to industry and enterprise. Let not him who is houseless pull down the house of another, but let him work diligently and build one for himself, thus by example assuring that his own shall be safe from violence when built.—Abraham Lincoln.

Dead men tell no tales, but their friends do.

Don't attempt the things you can't do—and some of the things you can.

HOW WINNIPEG KIDDIES ENJOY SUMMER DAYS.

A scene at a swimming pool attached to one of the school playgrounds, which attracts hundreds of kiddies every day.

ter, Mrs. Mabon and family from Vancouver.

Mrs. Jupp of Moose Jaw, Sask., with her little boy and girl en route to the Coast stopped off here to spend a week with an old acquaintance, Mrs. Robertson, and her family.

Mrs. H. A. Solly of Summerland is a guest with Mrs. Clarence at the Edgewater Inn.

Mr. Wm. Coldram is enjoying a visit from his sister who arrived on Thursday evening of last week.

Mr. and Mrs. Wm. Suddaby visited Kelowna on Friday, going up and back by stage.

Mr. and Miss Metcalf are enjoying a visit from their sister Mrs. Tees, who arrived on Friday. Mrs. Tees is the mother of Mr. Percy Tees who lived here for a short time and is well known to many citizens.

Mr. J. B. Robinson went south on Friday evening's boat to visit with friends.

Visitors to Kelowna on Saturday were the Misses Alice and Ruby Cousins, Mrs. Keys and Mrs. Phillips and Mr. W. J. Moore.

Mr. Kenneth Wright, Mrs. Wright and family motored down from their home at Kelowna on Saturday to visit his brother Mr. John Wright and family here. They motored back the same evening.

After a pleasant visit at home with her parents and sister, Miss Mary Miller left by stage to return to the Coast. Mr. M. N. Morrison was also a passenger south on the same stage.

A few of the young people joined forces at the Orange Hall on Saturday evening and enjoyed a portion of the evening tripping the light fantastic.

Mr. Lanby of Kelowna is spending a portion of the week in the vicinity canvassing for nursery stock orders.

The Greata wharf has been in bad shape for some time but we understand that satisfactory information has been received that the wharf will be put in repair shortly.

The Rev. J. Willard Litch of Vancouver, former pastor of Ruth Morton Church in South Vancouver, and now Superintendent of Missions for the Baptist denomination preached to the congregation in the Baptist Church on Sunday afternoon. Mr.

gregation and cycled home in the evening.

Mr. and Mrs. D. K. Bell and baby of Vernon arrived on Monday evening to visit Mrs. Bell's parents, Mr. and Mrs. W. White and family.

Mrs. A. J. Miller and Mrs. Morris returned Monday evening after a short visit up the lake.

Mr. Smellie of Shoal Lake, Man., with a brother from Ontario are visiting Mr. and Mrs. R. J. Hogg.

Major and Mrs. R. G. Hardisty are announcing the engagement of their daughter Margaret Victoria (Ris), grand-daughter of the late Senator Hardisty and Mrs. E. V. Hardisty of Edmonton, Alberta, to Roy Colrick Herne, son of Mr. and Mrs. Edmund Herne of Vancouver, B.C. The marriage is to take place in Peachland,

to town, as well as the usual traffic. It will also be a convenient place for autoists to fill up their radiators with nice clean cold water. This fixture has been put in by the Municipal Council and with the drinking fountain put in by the Women's Institute last year should amply supply the long felt need of the thirsty, both man and beast.

The cherries are still rolling in plenty, the various varieties crowding each other perhaps a little more so than other years. With us the crop seems all to be rushing on a little earlier than usual, but none the less in quality, as many of the varieties have developed to a larger size and better state of perfection this year.

What is the difference between the north pole and the south pole? All the difference in the world.

HOW TO BRING PROSPERITY TO B.C. THE "SWITZERLAND OF AMERICA"

Arthur Lineham.

During the period from 1843 to date, approximately half a million people have settled within the borders of British Columbia, and we are inclined to think we have achieved wonderful things, but if we compare our progress with that of other more remote parts of the Empire, we shall find there is not so much reason to sit down and feel entirely satisfied with the results obtained during the past seventy-eight years. For instance, like the Dominion of New Zealand, which was first settled in 1839, (four years ahead of this province), and which now has a population of approximately 1,200,000 people on her 103,000 square miles of territory, although the New Zealanders have been colonizing under an enormous handicap in some respects compared with ourselves. Why is it they have so far outstripped us in the race for settlement and development? The reason is, because they have consistently exploited and developed their principal asset—the pastoral and agricultural land. Everything else has been of secondary importance. They knew perfectly well that industries of all kinds would follow population. What line have we taken? The assets which have absorbed our attention are fish, minerals and timber, each of which requires a large preliminary outlay, and employs only a nominal amount of labour, and it might be added that a large percentage of the labour employed in these industries is Oriental or Slavic. The process of building up a population, and continued prosperity, in a territory as large as ours, out of the three assets mentioned, will be so slow that generations will be required to do it, without we make further effort and we have entirely overlooked the greatest feature we possess, namely, the Scenic Beauty of the Province. This is in every way the largest and most valuable asset we have, if we develop it and exploit it in an aggressive and consistent manner. British Columbia has an approximate area of 356,000 square miles, of which 148,000 square miles are mountain tops; 144,000 square miles timber land; 40,000 square miles water, rock and muskeg, unproductive, below timber line; 20,000 square miles suitable for use when cleared and 4,000 square miles improved and partly so. An instant's thought will convince the most skeptical that our main asset is scenery, as the timbered land can be included in that category for many years to come, until it is cut, and that the logical thing to do is to develop what we have got most of. The scenic attractions in every part of British Columbia are unrivalled on the continent of America. We have a playground equal to twenty-four Switzerlands, with a variety of beauty that would be a dream of delight to thousands in Eastern Canada and the Eastern and Middle States, if the same were known to them. All that is necessary is to finish essential works that are now under way and advertise in an aggressive manner, so that the one hundred and fourteen millions on this North American continent know what we have to show them. The task is too great for any city or municipality to undertake alone, and is entirely the duty of the Provincial Government to inaugurate and carry out for the benefit of the whole province. The main highway through the province from Vancouver to Alberta is already being constructed, but the sections which are not yet under construction should be commenced at once and rushed to completion. This road alone would give access to 600 miles of the grandest scenery in the world, and would be an enormous attraction to tourists from all parts of the Dominion and the United States. It would mean that private enterprise would put on local services at all points of interest; new communities would spring into existence at the different central points. To bring the tide of tourist travel to British Columbia, the logical summer playground for the hundreds of thousands who travel during the hot unbearable weather in the greater portion of this continent, it is necessary to open up roads and trails to every point of interest in the province, and to provide accommodation at points where at the inauguration of the scheme, no private enterprise could be induced to undertake. For instance, a government hotel should be built and operated in both Strathcona and Jasper Parks. Not elaborate structures, but hotels after the style of those owned by the New Zealand Government; to cost not more than \$100,000 each equipped and ready for business, with accommodation for, say, one hundred guests each. Open a tourist bureau in four of the principal cities in the province,

namely, Vancouver, Victoria, Prince Rupert, Nelson, and also in Banff and Edmonton, each with a display of enlarged photographs of everything of interest to be seen during the tourist's stay. The personnel of each office should consist at the start of two men, a manager and junior, both of whom should have travelled everywhere in the province and know from first hand experience what they are selling. They would make out a complete itinerary for any section the traveller asks for, and aid him in choosing his route and sell him coupon tickets to cover every means of transportation available. The advantage of coupons lies in the fact that the prospective tourist has paid for his complete trip before he leaves the office and when he has once bought his transportation he will undoubtedly use it. The cost is forgotten when the money is paid and he will consider it his duty to get value for what he has spent; he will use the coupons the same as he would use a car or club tickets. Every day he can be induced to stay in the province means an expenditure of at least \$5 per day for living expenses. If he is simply directed to go from one point to another and the bureaus are not in a position to sell him coupons, the system is incomplete, and the chances are, the prospective tourist will quit before he has completed any itinerary which is given him. Arrangements should be made with every transportation company in the province whereby Government coupons sold in the bureaus would be accepted by the companies, the same to be paid for as sold by the Government and the companies allowing a commission on the sale of tickets. Finally, expert and aggressive advertising should be done on a scale that will bring results. \$100,000 for the first year is only a small amount, and the Government can increase the sum annually according to results. I am of the opinion that half a million dollars will not be considered too much within five years of the commencement of the scheme. When the different cities and districts can see definite results from the increase in the tide of tourist travel, they will need no urging to develop the attractions which they possess; neither will the Government hesitate to spend all the money needed to augment the revenue of the province. If this article should meet the eye of the man who lacks faith and vision and who has a doubt about the results to be obtained, I would point out the record of Switzerland proper. It is the country which most resembles British Columbia, (the "Switzerland of America"), but is only one twenty-fourth the size. The difference between the two lies in the fact that our scenery is on a larger and grander scale; our mountains are higher and more rugged; our rivers, lakes and waterfalls are more immense; and the variety of colour from forest, undergrowth and natural meadow exceeds that of Switzerland, because we have it in all its original beauty. Switzerland, during the course of many centuries, has cleared all its valleys, and they resemble huge meadows, nearly devoid of timber, and are all under pasture or cultivation. Before the Swiss realized the value of their country's scenic charms and when they depended entirely on the sale of dairy produce, they were the poorest nation in Europe, but to-day there is no more prosperous people, owing to the enormous tourist travel which they enjoy, not only during the summer months, but also in winter from the winter sports. Which latter could be developed in British Columbia when the time arrives. Take Los Angeles as another instance of the result of aggressiveness and advertising. "This city is situated in latitude thirty-four degrees north in Southern California, on the main line of the Southern Pacific Railway, about twelve miles from the ocean, in the centre of what was a dry arid plain. In 1892 it had a population of 50,395; to-day, as a result of boosting its climate, and the magnificent community spirit which it created, it boasts of an estimated population of 611,000 in the city alone, besides a number of adjacent communities, some of which are as large as Victoria, and which were hardly in existence when their campaign was first commenced. To-day, the estimated number of tourists visiting Los Angeles and Southern California is 500,000 yearly, and the estimated revenue from tourist travel in the city and adjacent districts is \$60,000,000 per annum. Los Angeles is not satisfied with its record. They have started an "All Year Club" to bring tourists there during the summer months as well as the winter season, and are raising a fund of \$900,000 to be spent in special advertising over a period of three years, to explain to

the American people that theirs is not only a winter but a summer climate. The "All Year Club" in reporting back to the main body declare that Los Angeles is the most prosperous city in the world, and that, in going after the summer business, they are only insuring a continuation of the prosperity which they have enjoyed for so many years. The committee also gives credit to the Los Angeles Chamber of Commerce for the results they have obtained, and states that their population consists of 60 per cent. of those who originally were tourists. What Los Angeles has done we can do, only we can get bigger results. They were a city only, we are a province. They had fresh air and climate only to sell. We are the "Switzerland of America," and have the greatest aggregation of the finest scenery on the North American Continent to show to the same population they draw on. We have a summer climate that is heavenly compared to thirty-four degrees north or south, and one that will appeal to thousands who intend to take a vacation when ever possible. A trip through British Columbia by means of any transportation whatsoever, whether it be by private motor car or, for the less fortunate, by public conveyance, is an experience that will make the tourist think he has tasted paradise, and cause him to be a living advertisement for others intending to take a holiday. Let us adopt this plan and develop the greatest asset we possess and at

the same time follow the line of least resistance. The cost is small and the risk nil. One hundred and fifty thousand dollars a year will cover every expenditure for bureaus and advertising. The finishing of the roads and trails and the building of the two hotels will provide employment for the unemployed during the coming fall and winter, and the situation at present indicates there will be an unemployment problem. There need be no further expense beyond the salary of a general manager, who would be under the honorary commission of, say, two men and a cabinet minister as chairman. With tourists will come an average of two permanent residents to

take care of the wants of every five travellers; a certain percentage of tourists will return to settle; industries will follow the growth of population; land clearing will be carried out as demand requires; one thing will lead to another and we shall accomplish more in the next five years than we have done in the last thirty. Let us get together and do it, and not keep on waiting from year to year for something to turn up, and continually asking the Dominion or Provincial Governments for temporary works to carry us over hard times. The remedy is in our own hands. Much so-called love is only lip deep.

Branches in London (England), Paris (France), New York, Chicago, San Francisco, Spokane, Mexico City, and Newfoundland. Correspondents everywhere.

Westbank Notes

Mr. H. Brown paid a business visit to Kelowna on Saturday.

Mrs. Lundin was a passenger north on Saturday.

The Westbank Boy Scouts, under Scoutmaster James went on their monthly hike into the hills. The troop left at about 11 o'clock, camping at noon on Powers Creek and had lunch consisting of many delicacies, also fish caught by the scouts in the creek.

After lunch the scouts were examined for their tenderfoot tests, then there was an hour of instruction by the Scoutmaster.

At about 5 p.m. the camp broke up and the Fox patrol under Patrol Leader Thos. Drought laid a trail and the Eagle patrol under Patrol Leader Howard Jones tracked them home, ascertaining the trail by the helpful scout signs.

The Scoutmaster and scouts greatly enjoyed the outing.

The Westbank people held a picnic at the lake on Saturday, July 9 and enjoyed themselves immensely swimming, boating and fishing. In the evening the crowd was entertained by Mrs. McIntosh, thus ending a very pleasant day in a very pleasant manner.

The fruit crop here is larger than at first expected and a fine lot of cherries are now being brought into the packing houses.

Miss Winnifred McIntosh has returned to her home here coming in on Friday's boat. Miss McIntosh for the past year has been teaching at Hillsdown, Alberta. She was given a hearty welcome.

CONVENTION OF IRRIGATORS TO BE AT VERNON.

(Continued from Page 1.)

Summerland; other addresses were delivered by Professor Carpenter, of Denver, Colorado; Price Ellison, M.P.P.; R. E. Campbell, Dominion Superintendent of Forestry; Duncan Ross, M.P.; and the Hon. Martin Burrell.

This also was a very successful convention. Several inspiring and instructive speeches were given, and the delegates were entertained very hospitably by the citizens of Vernon. After the convention was over the Mayor, Mr. Timmins, asked the delegates to stop over a little longer so that the city could show them some more tangible hospitality and he invited all of them to a banquet given by the city.

PAST CONVENTIONS

Since 1908 the Eastern Canada Irrigation Association has held conventions east and west of the mountains in alternate years, with the exception of 1920, when for two years in succession the convention was held in Alberta. The convention in 1919 was held in Medicine Hat at a time when the movement for the development of co-operative irrigation schemes in Southern Alberta had al-

most reached a deadlock. The guarantee of Government assistance was required by the irrigation districts in the course of formation and neither the Provincial nor the Dominion Governments could see their way clear to give this guarantee.

Meanwhile three dry seasons had made matters desperate for hundreds of farmers on whose lands it was possible to bring water if only irrigation systems were constructed. The centre of the movement for irrigation extension was Lethbridge. The fine crops grown on the irrigated lands around Coaldale and elsewhere had convinced the people of Lethbridge of the great possibilities of the surrounding country if only water were brought on the land wherever it was possible. They brought their case before the convention at Medicine Hat. The opinion at this convention extension in Southern Alberta and in Western Canada generally would be better favored by holding the fourteenth convention at Lethbridge instead of at some point in British Columbia, and a motion was made by one of the British Columbia delegates to the effect and seconded by a delegate from Saskatchewan and passed by the convention unanimously.

RETURNS TO VERNON

This year the convention is returning to Vernon after a lapse of fourteen years. Since it was last in this city conventions have been held at Calgary, Lethbridge (three times), Bassano, Maple Creek, and Medicine Hat, east of the mountains and at Kamloops (twice), Kelowna, Penticton, and Nelson, in British Columbia. Three times in the history of the association has the convention been held in the Okanagan Valley—at Vernon in 1908, Kelowna in 1912, and at Penticton in 1914. All of these conventions were successful from every point of view, but from present indications this year's convention at Vernon is expected to surpass all previous ones.

\$2.50, Payable in Advance

SEASON'S FIRST CROP ESTIMATE HAS BEEN MADE PUBLIC

Totals Up Much Better Than Had Been Expected. Detail of Crops in Sections of the Country.

GOOD PROSPECTS FOR MARKETING

Shippers and Jobbers Are Co-operating in Selling and in Publicity Campaign.

The season's first crop estimate by the district horticulturist for the fruit district from the C. P. R. main line to Keremeos has just been issued and shows a big increase over predictions of a few weeks ago. In a prefacing estimate the government officials state that the report is justified at this time owing to the quick development of fruit and the close check which has been made throughout the valley.

A total of 4019 cars is given for the apple crop. This compares with approximately 1800 cars last year, and 2800 in 1919, which was the bumper crop year of the Okanagan. In view of the expected increase in the production of apples, fruit shippers are not worrying over the marketing problem. They point out that more strawberries were eaten on the prairies this year than ever before, and that as prices are less than those which prevailed during the war, the fruit will go into consumption quite readily. The demand for British Columbia apples from overseas has been quite good, while New York and other eastern and Canadian markets have already enquired for McIntosh Reds and other better grade apples.

In addition, the growers of British Columbia and the jobbers of Western Canada are co-operating this season in the handling of the fruit. One of the co-operative schemes is an advertising campaign, the biggest fruit advertising idea ever attempted in the Dominion, to which both are contributing. The transportation will be equal to the demands of the valley and no particular difficulties are expected in this connection.

Below is the estimated number of boxes and cars for each section in the district. Car loads are estimated on the following basis: Apples, 700 boxes to the car; crabapples and pears 800 boxes to the car; cherries, plums, prunes, apricots and peaches, 1,000 boxes to the car.

Peachland.

MOTION FAVORED THE UPPER ROAD

Automobile Association Meeting Asked For Its Improvement.

It is almost impossible to get a good attendance at meetings at this season of the year. This was true of the Auto and Good Roads Association meeting called for Monday, when less than a dozen were present.

A committee was appointed to take up with the Municipal Council the question of changing the position of some of the road signs, and it was decided to write to Mr. A. Lineham, the writer of the article on tourist traffic published in last week's Review, drawing his attention to the Okanagan - Kamloops - Similkameen scenic route.

A sign will be placed at the junction of Mineola and Bathfield roads. After some discussion it was decided by the members present to ask the Public Works Department to make the upper road the permanent highway between Summerland and Peachland, and a committee was appointed to draft a letter accordingly. This letter is appended.

The closing of the Lake Shore road between Summerland and Peachland necessitating the re-opening of the upper road, makes a decision as to which road will be chosen as the permanent highway (Continued on Page 8)

NOW REPAIRING SHORE ROAD

Road Gang Started Work on Thursday Morning. Motorists Using Road. Engineer Making Inspection

Work on repairs to the lake shore road was started Thursday morning by Road Foreman J. C. Arkell. Wednesday afternoon Mr. Arkell received instructions from Col. Donnelly, who is in charge of the roads in South Okanagan electoral district, to gather men and teams and commence repairs between here and Peachland Thursday morning.

We learn that Mr. Arkell is working on the worst piece in the road, namely, between Mel-lor's and Crescent Beach.

Since the Kelowna car mentioned elsewhere came though on Tuesday a number of other cars have been using the shore road between Summerland and Peachland, and preference has been expressed for it even in its present condition rather than the poorly constructed upper road.

Engineer Gwyer and Col. Donnelly were to inspect the Summerland - Peachland road on Thursday.

DISCUSS SCHOOL BY-LAW AGAIN

Board of Trade Members Advocate Its Support.

WATER STORAGE

To Issue Advertising Folder. Ask For Action on Road Question.

Though the attendance at the Board of Trade meeting on Tuesday night was small, considerable business was transacted. President J. C. Freeman occupied the chair, and four new members were admitted.

Messrs. R. H. Helmer and J. R. Campbell, with a third to be nominated by the president, were elected delegates to the irrigation convention next week at Vernon.

A letter was read stating that the Vernon Board of Trade had heartily endorsed the resolution of the Summerland Board asking government action in removal of all signs along highways except those pertaining to traffic.

Sec.-Treas. S. A. McDonald was

MAY TAKE PRIVATE ACTION

This is Intimation in Telegram to Department of Public Works. Inaction a Disgrace.

On Sunday several local cars got through to Crescent Beach, the first since the road was washed out by the high water of the lake. This was made possible by the efforts of four or five men who spent about four hours with shovels fixing the grade so that light cars could get through.

The break in the lake shore road between Bentley's Point and Crescent Beach is said to be by far the worst piece in the road between Summerland and Peachland, and the fact that the road was rendered passable by that much effort has occasioned much dissatisfaction with the inaction of the provincial road authorities, who have made absolutely no effort to render the lake shore road passable.

On Tuesday a light car from Kelowna made the trip through to Summerland and return all the way over the lake shore road. Coming across the Westbank ferry at 9 o'clock they made Summerland before 12, but a few minutes behind another car which came over the upper road, a short stop being made at Peachland. The party consisted of F. M. Buckland, president of the Kelowna Branch Good Roads Association, Mr. J. W. Jones, M.L.A., Mr. Lloyd Jones and Mr. Graham, all of Kelowna, and Rev. R. J. Hogg, of Peachland.

The party called at the Review Office and told of the small difficulties they experienced in coming over the damaged road, and all were agreed that with two small crews working, one from each end, the road could be put in passable condition in from three to six days.

The Kelowna people are very much incensed over the fact that nothing has been done up to the present to repair the road, declaring that there has been practically no tourist traffic, and that visitors will not go over the upper road in its present condition.

The Kelowna visitors after lunching here, returned north over the short road intending to connect with the 4 o'clock ferry to Kelowna, and reached Peachland from Summerland in one hour.

Kelowna, Peachland and the Board of Trade at Pentiction are all said to be pushing vigorously for at least sufficient repairs to the lake shore road to make it reasonably passable. Summerland Good Roads League on Monday passed a resolution favoring the improving of the upper road, while on Tuesday night the Board of Trade decided to urge that Engineer Gwyer immediately inspect both roads, and that one or the other be put in safe condition.

Below are telegrams sent from Kelowna on Tuesday on the subject:

The Honourable the Minister of Public Works, Parliament Buildings, Victoria, B.C.:

Summerland-Peachland Road - A delegation from Kelowna and Peachland drove over lake shore section today. Road has been closed six weeks. Less than five hundred dollars would put this section in passable condition. Unless government will take immediate steps to repair, private individuals will be forced to raise the funds at once. Tourist traffic completely stopped, due to dangerous condition of upper road. Would urge everything possible be done by your officials to put lake shore road in condition for traffic. Would appreciate reply.

KELOWNA AUTOMOBILE AND GOOD ROADS ASSOCIATION.

Hon. J. H. King, Minister Public Works, Victoria:

Okanagan highway, lake shore Summerland-Peachland, been closed six weeks. No inspection in that time by government officials. Kelowna-Peachland party of five went over lake shore road in car today and returned without difficulty. Repairs could easily be made in five days and made passable for all travellers. Present condition affairs disgrace. If road gangs not at work this week citizens of these towns will organize and do the work. Urge your immediate action. Kindly reply.

J. W. JONES.

LOADING TENTH CAR CHERRIES

Union Ships Large Quantity of Cherries by Car Lots.

VALLEY OUTPUT

Thirty-two Cars Moved Out to Last Saturday. Selling in States.

To-night, Friday, the Union will start the tenth carload of cherries rolling from here. The official estimate for this season from Summerland and Naramata is nine cars.

Cherries from Peachland and other points have been brought here for shipment in the cars being loaded here. There have also been large quantities of cherries shipped from here by express. Large quantities of the same kind of fruit have gone from here for reshipment in cars loading at other points.

Up to Saturday night thirty-two cars of cherries have been shipped from the valley, according to a report from Vernon. Approximately 90 per cent of the total going east and the rest going to the coast.

A full carload of Bing cherries was shipped by the Okanagan United Growers to the states a few days ago, in spite of the increase of duty from ten cents a bushel to three cents a pound, equal to \$1.50 a bushel.

It is said that choice cherries will net the growers 17 cents a pound.

NOW USING STORED WATER

Storage water was turned into the irrigation system at 5 o'clock on Tuesday. The gate at the headwaters of Trout Creek was opened Sunday at 6 a.m., the water reaching here in 47 hours. Other gates behind the main dam were opened to supply the latter.

Mr. R. Johnston who opened the gate found the water overflowing the dam, but the level of the water in the dam dropped two inches in 24 hours.

The Showman—"Hullo! You'd better be careful how you go to work with that saw."
The Man Up The Tree—"That's all right mate. I don't care; it ain't my tree."
—Passing Show, London.

Boy Scout Column

1st SUMMERLAND TROOP B. P. SCOUTS

Headquarters, The Gymnasium.

Scoutmaster O. F. Zimmerman

Meets every Friday evening at 7.30 p.m.

July 22, 1921.

The Court of Honor was held last Wednesday evening to wind up the camp affairs, and statements were presented. As the troop will be about \$15 short a levy of 50c. per boy will be made so as to have a clear sheet.

The evening meeting on Friday was in the form of a raid, three patrols guarding Empire Hall block and three raiding. This time the raiders managed to get more men through than were captured, so were adjudged winners. After the whistle had blown, to call in those who were still out, the motion passed at the Court of Honor, asking for two meetings a week was put before the scouts and carried unanimously. This means that Tuesday nights will be devoted to scout work whilst on Friday nights scout games and patrol competitions in swimming, football, etc., will be held.

The Cub Handbook has arrived, so it only remains for those boys interested to hand in to Mr. S. F. Sharp certificates for their parents stating their willingness to have their boys join the movement. A meeting will then be called and the object of the cubs outlined. Enrollment will then begin.

To become a wolf cub a boy must be over 8 years and under 12. He must satisfy his cubmaster that he knows the wolf cub law, signs and salute. He then makes the following promise:

- 1—To be loyal to God, the King, and the law of the wolf cub pack.
 - 2—And to do a good turn to somebody every day.
- The law of the wolf cub pack is:
- 1—The cub gives in to the old wolf.
 - 2—The cub does not give in to himself.
- He is then a tenderfoot and is entitled to wear the wolf cub badge.

THE CAMP DIARY CONTINUED.

Tuesday, June 28.—Awoke this morning quite surprised at finding ourselves still on this planet, but no time for reflections. Daily routine until 9.30, when instead of P.T. we went on a hike to Greata Ranch. Going up the cliffs to the upper road we felt very much like the flies in the popular little ditty, but a feed of cherries at the other end helped to remove the dust which we had swallowed, and the homeward trail did not now seem so long.

After lunch A.S.M. Tees and three of our leaders left us to go into town so the headquarters tent has A.S.M. Harris as its sole occupant. It was too hot to have any games so Allen asked us whether we would rather go on with scout tests, which we did.

The leaders' and officers' table was sadly depleted at supper, but the same wonderful quality was there, so we didn't miss them. After supper just as we were getting ready for football visitors arrived so of course we had to entertain them. Bernard was down too and round the campfire produced a box of chocolates. Did we like them?—Oh no! The A.S.M. escorting the visitors back to their car left us to enjoy ourselves as best we could. After tossing one of the boys in a blanket and trying out some

of the tenderfoot scouts' vocal powers, bed was suggested and just to show that we could go to bed without being sent we all went, and it was a quiet camp that the A.S.M. found on his return. He was evidently so pleased he brought us round lime juice and cheese and crackers for being good boys.

Awakened at 3 a.m. by heavy foot-falls and find the leaders returning from town. After muttered invectives from the roused slumberers all was quiet.

Wednesday.—Awakened by the first blast of the bugle and find myself humming those lines about murdering a bugler, but on second thoughts decided swiping the instrument would be nicer. Great commotion round the Owls' tent, one of the occupants swearing that a lynx had sat outside the tent all night purring. Nasty thing; it needn't have purred if it wanted to stay and spoil the boy's slumbers.

Managed to get in a good morning's work and passed lots of tests so am feeling quite proud of myself. We had a good game of circle ball before lunch and were ready for the rest hour. Swimming and games filled out the afternoon. Two of the Coyote patrol went out after the cows and seeing one of their fellows turned round and headed back for camp with only one cow, so some of the bigger scouts went for the others.

Had a good game of football after supper. It's a great game for getting one's own back. I found that out. After a good wash we got the camp fire started and after singing till we were ashamed of our own row Mr. Tees told us the story of Westward Ho!

Got into bed and waited for the hard tack and cheese. Saw the A.S.M. go by with it, but lights went out and still waiting.

Thursday.—First thing went and found out the reason for non-appearance of edibles, and found that supplies had given out at Kangaroos; reason, inability of troop leader to count.

Start getting ready for sports, but rain seems to want to visit us, but manage to get all ready. A.S.M. builds bike stand, so now my bike needn't rest on the sands. Several of us tried our Rescuers' badge, and after some instruction from Mr. Tees found it wasn't really so hard after all. Personally I believe it must be much more pleasant to be rescuer than rescued. He gets more air.

Garrett Livingstone of the 14th Vancouver Troop pays us a visit and we utilize him in our forward line. Pete has now learned to respect his shins, so he umpires. Have a good game but lose. Must play better tomorrow.

Oranges, around camp fire, and Pete continues his yarn. Bed a little earlier so as to make records tomorrow. Actually have the mats to sleep on to-night; almost too comfortable to sleep.

Friday.—July 1st and all's well.

HOME-SEEKERS OR INVESTORS WOULD DO WELL TO CONSULT F. D. COOPER REAL ESTATE BROKER PEACH ORCHARD SUMMERLAND

Feeling fine, so get down to work, and get grounds fixed up as visitors expected. Sports start at 10.30, so get through several before lunch. 12 o'clock, the lunch gong and the Skookum's load sound simultaneously. So we first welcome the crowd on her and then get down to real business. Only half an hour rest today, then we tried to show what we could do. Why the lake had to be so rough one cannot tell, but it wasn't at all nice doing overhands when you didn't know whether there was going to be too much or no water. However, the visitors were too generous. I didn't feel like any supper but it was so tempting I gave way. Then I played football. Mr. Tees left camp without a word, for Victoria. We would have liked to have given him a send off, but he just melted away. We were glad to see our S.M. with us again. The old camp ground looks more like home when he is about, but unfortunately he couldn't stay.

Round the camp fire everyone was too tired to sing so some of the intellectual highbrows began a discussion of radium, and then got A.S.M. Allen Harris to tell about the recent discoveries in it. We soon found ourselves interested in something we knew nothing about, but decided it was "great stuff." After the inquisitive and seekers after knowledge had finished asking questions we went to bed, wishing we had a ton or two of said radium.

Saturday.—Awakened by the appalling thought that this is the last full day in camp; also by having to get up 15 minutes earlier for cook-house duty. Dragged myself over to the commissary and was soon mixing mush, turning eggs and tossing flapjacks. Ha-ha! we thought, this isn't too bad a job at all. No parades, use of boat, etc. So after helping wash the pans we rowed around and saw the patrols lined up for inspection. Everything went well until the Eagle's turn arrived. Trust the A.S.M.'s not to miss anything. Cashed away where no one would think of looking was a large pail of lemonade, biscuits, cake, everything. Wished I had known, the Eagles

will exchange property in Granville Townsite, Vancouver, for small property in Summerland.

would have had a visitor last night. Nobody seemed to claim the edibles, so it is marched to H.Q. for claimant.

Court of Honor in afternoon decides on mock trial for evening. Scout Lloyd Whiteford accused by Scout Mac Laycox of stealing cherries from plaintiff's kit bag. Prosecuting attorneys, Ronald E. White and Colin Chisholm. Defending attorneys, Noel Wright and Jack Harris.

All afternoon whisperings kept on as the case was being prepared.

After football again, the courtroom was prepared.

At a whistle the juryman, grave faced and silent, filed in. Then came the attorneys fully equipped with wigs and gowns (even if they did have to use blankets and towels). Then came the judge, preceded by crier and mace, whereupon the Court rose until His Lordship had firmly enshrined himself upon a Coca Cola box. The prisoner was then brought in and the case proceeded. At times the counsels become heated, and accused each other of perverting, but knowing them to be so the judge ordered such proceedings to stop and the case to advance.

After a lengthy adjournment, the jury pronounced a verdict of guilty, so the sentence was imposed.

After lights out, and when we were trying to slumber, a visitor from one of the other tents arrived. Why he thought we had anything for him to eat we don't know, so we shoo'd him away and chuckled as he fell into the hands of the A.S.M. as he was on his way home. That will teach him not to invite himself here again and disturb peaceful citizens.

Sunday.—The last day—an awful sensation. Had a thorough inspection to-day to see that no one had lost his kit, and then started the heart breaking work of striking camp.

The Owls managed to be ready first, but we were not much behind. Then we went for a dip and the Skookum arrived. After taking our final meal in camp we gave Mrs. Miller three cheers, which she certainly deserved, and then packed our belongings aboard.

As the boys wanted a hike through Buckley canyon the boat took us across the lake and we had a delightful stroll. Even though we were through the gorge last year, one never gets tired of it as it is magnificent. We landed home shortly after six, and I think we are all agreed that it was the best camp yet. Next year we all hope finances will permit of a two week's camp, as it is certainly the best time we have during the year.

FINIS.

Friday night the troop will meet in full uniform in Ellison Hall at 7 o'clock, when there will be a paper chase, followed by a swim, so scouts are asked not to forget their bathing suits. A.S.M.

C.G.I.T GIRLS IN TRAINING CAMP AT OYAMA, ON WOODS LAKE

Forty-four Young Ladies From Okanagan and Thompson Valleys, Gather for First Encampment Under Leadership of Miss Trotter This Week.

The Canadian Girls in training movement is rapidly enlisting the teen age girls of Canada in training for Christian service. It is promoted by the National Girls Work Board, a committee of the Religious Educational Council of Canada. On the National Board are appointed representatives of all the leading denominations. The program promoted is a four-fold one seeking to develop the girls physically, intellectually, spiritually and socially; so that they may learn to cherish health, know God, seek truth and serve others.

One of the most successful means of promoting the C.G.I.T. program is through the summer camps held annually all over the Dominion. At these camps a standard four-fold program is carried out. Leadership is for the most part local, but it is aimed to have one representative of the National Girls Work Board at each camp.

The Okanagan and Thompson Valleys are holding their first camp this year. Forty four girls are in attendance. The camp is in charge of Miss Trotter, a member of the National Board, and the girls are fortunate in having such a refined and all round Christian young lady for their leader. Miss Trotter is assisted by four group leaders: Miss Coles of Fernie, Mrs. Amaron of Naramata, Mrs. Hulbert of Vernon, who is also camp mother, and Miss Ford of Armstrong.

The camp is situated at Oyama, an ideal spot on Woods Lake. Mrs. Gray and Mrs. Conklin are in charge of the cooking, the girls taking turns by groups at the dishwashing. The schedule for the day is as follows:

- 7. am. Rising, setting up exercises, dip.
- 7.45. Morning watch.
- 8.00. Breakfast, camp house-keeping.
- 9.30. C.G.I.T. Bible study.
- 10.15. Freedom.

- 10.45. C.G.I.T. midweek session. Freedom.
- 12.00. Dinner, quiet for resting, reading.
- 2.30. Games or hike.
- 3.30. Cool off.
- 4.00. Swim, rest.
- 6.00. Supper, camp fire, vesper.
- 9.15. Bed.
- 9.45. Lights out.

The mid-week sessions consists of a talk and activity.

Each group has its own name, motto, colors, yell and song. There is a daily paper, edited in turn by the groups. The editorials are serious and well thought out articles. The personals and current events are looked forward to with much interest, and the continued story is a hair-raiser, each group being particular to finish their part at a most exciting moment of the story.

No swimming teacher is on hand, but the camp is fortunate in having as one of its members, Miss Gwyn Amaron, holder of the lifesaving medal, and the girls are making much progress under her expert teaching.

The officers of the camp groups chosen by the girls themselves are: President, Miss Amaron, Naramata; Secretary, Miss Hilda Cryderman of Vernon.

The meals are excellent and the girls are in excellent health and spirit.

Sunday they will attend divine service at Oyama in the morning. The afternoon will be given to Bible tableaux, and in the evening the Rev. Mr. Dean will come from Vernon to address the camp. Monday there will be land sports, Tuesday water sports, Wednesday stunts, and Thursday will be visitors' day, when a splendid program will be run off. The camp will break up Friday morning.

The surface soil of Florida is rich in phosphates.

BENEFICIAL EFFECTS OF SCHOOL FAIRS

School fairs are to the boys and girls of the land what the larger fairs are to adults. By this time they should be thoroughly organized; prize lists published and circulated and programmes of proceedings prepared, the two indeed given in one publication. These fairs increase in number every year and are proving of inestimable value in the agricultural education of the young and even in beneficially influencing the more mature. Of course boys' and girls' clubs are the principal feeders of the fairs, but entries are usually accepted from children who are not members of any such organization.

Agricultural representatives all testify to the splendid effects the fairs are having upon form life and agricultural pursuits generally. One, for instance, writes "I do not know of any one thing which is a greater factor in improving the farm production and the farm industry of the country than the school fairs. In addition to bringing direct, practical results, school fairs have had a very effective influence in encouraging

teachers to take up the teaching of agriculture in the public schools." Another says: "The importance of the school fair cannot be over emphasized. It teaches our future farmers how they can take the most out of the soil. It makes our rural people better and happier." In recognition of the old adage "All work and no play makes Jack a dull boy" a program of sports is usually included in the day's list of proceedings.—Press Bulletin, Dept. of Agriculture.

Some boys have a fair chance to amount to something, and others know they will inherit the old man's money.

C. OUTHETT,
Deputy Registrar.
50-54

Synopsis of Land Act Amendments

Minimum price of first-class land reduced to \$5 an acre; second-class to \$2.50 an acre.

Pre-emption now confined to surveyed lands only. Records will be granted covering only land suitable for agricultural purposes and which is non-timber land.

Partnership pre-emptions abolished but parties of not more than four may arrange for adjacent pre-emptions with joint residence, but each making necessary improvements on respective claims.

Pre-emptors must occupy claims for five years before making improvements to value of \$10 per acre, including clearing and cultivation of at least 5 acres before receiving Crown Grant. Where pre-emptor in occupation not less than 3 years, and has made proportionate improvements, he may, because of ill-health, or other cause, be granted intermediate certificate of improvement and transfer his claim.

Records without permanent residence may be issued, provided applicant makes improvements to extent of \$300 per annum and records same each year. The improvements or record same will operate as forfeiture. Title cannot be obtained in less than 5 years, and improvements of \$10 per acre, including 5 acres cleared and cultivated, and residence of at least 2 years are required.

Pre-emptor holding Crown grant may record another pre-emption, if he requires land in conjunction with his farm, without actual occupation, provided statutory improvements made and residence maintained on Crown granted land.

Unsurveyed areas, not exceeding 20 acres, may be leased as homestead; title to be obtained after fulfilling residential and improvement conditions.

For grazing and industrial purposes areas, exceeding 640 acres may be leased by one person or company.

Mill, factory or industrial sites on timber land not exceeding 40 acres may be purchased; conditions include payment of stumpage.

Natural hay meadows inaccessible by existing roads may be purchased conditional upon construction of a road to them. Rebate of one-half of cost of road, not exceeding 40 acres of purchase price, is made.

PRE-EMPTORS' FREE GRANTS ACT

The scope of this Act is enlarged to include all persons joining and serving with His Majesty's Forces. The time within which the heirs or devisees of a deceased pre-emptor may apply for title under this Act is extended from one year from the death of such person, as formerly, until one year after the conclusion of the late war. This privilege is also made retroactive.

No fees relating to pre-emptions are due or payable by soldiers on pre-emptions recorded after June 26, 1918. Taxes are remitted for 5 years. Provision for return of moneys accrued, due and been paid since August 4, 1914, on account of payments, fees or taxes on soldiers' pre-emptions.

Interest on agreements to purchase town or city lots held by members of Allied Forces, or dependents, acquired direct or indirect, remitted from enlistment to March 31, 1920.

SUB-PURCHASERS OF CROWN LANDS

Provision made for issuance of Crown grants to sub-purchasers of Crown Lands, acquiring rights from purchasers who failed to complete purchase, involving forfeiture, on fulfillment of conditions of purchase, interest and taxes. Where sub-purchasers do not claim whole or original parcel, purchase price due and taxes may be distributed proportionately over whole area. Applications must be made by May 1, 1920.

GRAZING

Grazing Act, 1919, for systematic development of livestock industry provides for grazing districts and range administration under Commissioner. Annual grazing permits issued based on numbers ranged; priority for established owners. Stock owners may form associations for range management. Free, or partially free, permits for settlers, campers or travellers, up to ten head.

A Fish Story From Vancouver Island

View of Sproat Lake, Vancouver Island.

"Truth," said one of the sages, "lives at the bottom of a well." She is also to be encountered in the great silent spaces. I met her on the pine-fringed shores of Sproat Lake, in the heart of Vancouver Island. She sprang unannounced from the lips of a handsome dame of healthy appetites and vigorous mind.

Think of the opportunities and industries there are in this little beauty-spot of three hundred miles by eighty, all sea-girt and serene. Lumbering, pulp-making, mining, fishing, canning, poultry keeping, hog-raising, farming, fruit-growing, dairying, manufacturing. There is a man here who makes cement and at the same time cultivates one of the loveliest gardens on the American Continent, and another who grows flower seeds—nothing but flower seeds—for the biggest seed merchants in the world.

As for play, it is manifold and unending. Sproat Lake is in the heart of the island, reachable at present, through some of the most romantic timbered country God ever made, only by auto, though the steel rail from Fort Albert is pushing ahead.

A hustriss in moccasins and velvet-teens receives you, revolver, jack-knife and cartridges slung about her waist and her rifles hard by. This lady, who has a cultured mind as well as a stout heart and a brassy air, shoots cougar before breakfast, pots bear in the forenoon, hunts deer before tea, and before sundown traps beaver and rodents—all in their season, of course, and when there are no guests around. Just now she receives you in her house-boat, on the southern shore,

In a few moments you and your baggage speed over the still waters to a distant chalet, nestling among the hemlock and jack pines, and encircled by tents.

Have you ever bathed in the sweet waters drawn direct from surrounding hills? Under the moon and the stars, when the velvety surface is perfect and unbroken, except by the plop of a jumping trout? In the early dawn, when the sun puts his lips to the brim of his breakfast bowl, and sucks up his ration of creamy mist? In the late afternoon, when the heat makes every thirsty pore drink its fill as you plunge into the emerald depths? Have you sat by the camp fire at night and, dreaming, watched the sparks fly upward? No? Then you have never lived.

One day we had a fish adventure. In outline, Sproat Lake is like the impress of a giant paw. The middle digit, Taylor-Arm, runs up fourteen miles to the mouth of the Taylor River. We packed a lunch-basket, and leaving the women at home, set out early to fish this lonely inlet.

We had a gay farewell. Our wives came down to the beach to see we had everything aboard. Their faith in their husbands' skill with the rod was touching—and they were promised fish for next day's breakfast. Amid smiles and benedictions we were off.

Our tackle was wondrous—the tackle of amateurs always is. We soaked to the waist in the chilly waters of Taylor River. We troited with worms and spinners for fourteen miles. We cast on this side and we cast on that. We cursed, we prayed. But between the whole bunch of us we had never a strike,

never a bite. As the sun dropped the chillet dove in sight. On the beach awaiting us were two figures in white. We looked into each others' eyes and groaned.

"Hullo! Hullo!" The cry came from a tiny cove. Three fishermen, swarthy as Indian braves, beckoned us. They had the most primitive tackle, a tangle of tin cans and clothes lines. But in the bottom of their skiff lay a gleaming pile.

"We are camping out," they cried, "and our catch will go bad on our hands. Would you care for a few? There was no answer but a gulp. Four pairs of eager hands went out and soon five three-pounders and some smaller fry were snug in our basket.

"Our luck is good, but they'll be useful up at the chalet," we said. The white-clad figures had seen us now and were waving their welcome. We answered in kind and held aloft our string of beauties. Fishermen never lie, and there was no need to begin. The fish just told their own tale.

For three days we were complimented and our advice was sought by every newcomer. Then one evening a visitor arrived. He was uncassily familiar. We were all seated on the stoop.

"You remember our giving you those fish?" quoth he. "My boy had lost a finger-ring, and we wonder whether by any chance it dropped into your boat when we were passing you over the fish."
"For goodness sake!" exclaimed two women's voices in unison, as four figures faded stealthily away. D. G.

NEW OLDS FOUR
The Car That Is Taking America By Storm
It has come to our ears that another car dealer is advertising quite generally the fact that this New Olds car is a Baby Grand camouflaged and sold at a higher price. We will admit that the engines of these two cars are similar but contend that any price difference is amply justified by construction value. This we are willing and anxious to prove. Both cars are manufactured by the General Motors, and prices naturally regulated by value. Our best boosters are the owners, ask one, he will tell you he is delighted.

The Summerland Review

Established August, 1908
 Published at Summerland, B.C., every Friday by
 THE REVIEW PUBLISHING COMPANY, LIMITED
 Ralph E. White, Editor and Manager
 An independent family newspaper covering Peachland, Summerland and
 Naramata and adjacent districts.
 Subscription Rates—In British Empire, in advance, \$2.50 per year; six
 months, \$1.40. To U.S.A. and other countries, \$3.00 per year.
 Advertising Rate Cards and information respecting territory and samples
 of paper mailed upon request, or may be seen at the office of any advertising
 agency recognized by the Canadian Press Association.
 Advertisers must have copy in by Wednesday noon in order to insure
 changes for standing advertisements. New display advertising copy can
 be accepted one day later.
 Correspondence—Letters addressed to the Editor and intended for publi-
 cation must be short and legibly written on one side of the paper only.
 The longer an article, the shorter its chance of insertion. All communica-
 tions must bear the name of the writer, not necessarily for publication. The
 publication or rejection of articles is a matter entirely in the discretion of
 the Editor. No responsibility is assumed by the paper for the opinions
 expressed by correspondents.

FRIDAY, JULY 22, 1921

A JUST REBUKE.

In a communication to The Review, which appears in another column this week, W. M. Dryden, secretary of the Peachland Fruit Growers' Union, takes exception to certain statements made in an article in this paper last week to the effect that Summerland and Naramata were earliest in the market with cherries this year. Mr. Dryden is quite right in his contention, and The Review agrees to stand corrected.

We feel quite certain that Mr. Dryden and the other good neighbors up Peachland way will accept our humble apology when we explain that the parties from whom the information was gathered, had only Naramata and Summerland in mind, whereas the writer had the entire valley in view when the information was sought. The Review is more than pleased to make this statement, and acknowledges indebtedness to Mr. Dryden for calling attention to the incorrect statements published.

Another matter in Mr. Dryden's letter also deserves attention and action, viz.: fruit express shipments from one point grown in another. The Review has seen a large number of express shipments made from Summerland during the past week to individuals in the prairie provinces, labelled from Kelowna, although the cherries were grown in the vicinity of Peachland, Naramata and Summerland.

The cherries, no doubt, were being shipped by a Kelowna concern, and in many cases the name "Kelowna" was crossed out by a pencil mark, and the name "Summerland" substituted with pen and ink. No doubt the shipper intended to be fair to the district from which the fruit was purchased, hence the pencil mark, but the fact remains that the pen and ink alteration would give the recipients of the fruit an impression of the inconsequence of the real shipping point.

Another point is that for various reasons fruits grown in Peachland, Naramata or any other district should be so labelled, irrespective of the point from whence it is shipped. This point is regulated by legislation in many of the older fruit sections, and the practice, we believe, is a good one and eminently fair to all parties.

PROVIDING FOR TOURISTS.

Two weeks ago we pointed out in this column the importance of providing a camping site for tourists and suggested that the Civic Improvement Committee of the Board of Trade take the initiative in establishing such a municipal asset in the park in Peach Orchard. Here is what the city of Nelson is doing in this respect, as told by the Nelson News:—

"A camp de luxe for camping motor tourists will immediately spring up in the lower section of Houston Park, the members of the city council decided yesterday afternoon, meeting in committee session. Acting Mayor John Bell presided over the session, at which Aldermen A. D. Emory, W. M. Cunniff and L. H. Choquette were also present.

"Motor parties enjoying the shade of the stately conifers there will have the choice of three means of cooking. Several camp fire-places will be built of stone, mortar and boilerplate. About 100 feet of gas pipe will be laid, giving connection with the gas main on Front street. For the start the gas fixtures will be at only one point, though later there will be fixtures at four or five points in the area. Electric stoves will also be installed, with one at a central point for a start. Free wood will be furnished the campers for the fire-places.

"Water will of course be laid on from the main on Front street, and the grove will be well lighted with festoons of lights. The camp sanitation will also be taken care of.

"Men will be put to work immediately clearing out the underbrush, while W. L. Affleck, city engineer, and G. T. McGuire, city electrician, will collaborate in laying out the grounds.

"It is claimed that fifty parties can be accommodated in this area. For a start about a dozen camp sites will be provided."

In this issue The Review publishes one of the most interesting crop reports that has been sent out by the Horticultural Branch of the Department of Agriculture in a long while. The department is doing a great work for the growers in the Okanagan valley by keeping conditions before them through the medium of the country newspapers and as time goes on the fact will become more and more generally recognized. Without the department's help there would be confusion and much uncertainty facing the growers. "So long as good men are available for the various posts, who are willing to give the public the benefit of their observations and other means of help, so long may we expect the fruit industry to thrive in this province. The growers should get behind the department and spur it on to further achievements, and they will.

Summerland's Board of Trade resolution asking the governmental authorities to forbid the placing of advertising signs along the public highways has been endorsed by the Pentiction Board of Trade. We recall, that when the rule of the road was changed, the road engineer prohibited all road signs except those pertaining to traffic. If he had the authority to do so then, he probably has it now.

With drives for this and that to the right of us, and drives for this and that to the left of us, propagandists on top of us and leagues all around us, where in blazes are we at? At least these are some of the thoughts that come to men and committeemen who are called upon these days to go out and get the money for any worthy cause. At the Board of Trade meeting Tuesday evening, a member of a committee appointed to devise ways and means to defray the expense of an exhibit at the Provincial Fair this fall, expressed similar sentiments. Just the same, the Summerland district cannot afford to be among those missing at the coming fair and while we all realize that the committeeman's work of collecting funds is an undesirable task these days, we must raise that money somehow. Here is an opportunity for some wise head to come forward and make his presence felt in the community. All he will need to do is shown us "how it can be done."

"Ullswater, the lake from which former Speaker Lowther will take his title on being created a peer, is one of the loveliest of the four or five sheets of water embosomed in England's lake district. Larger lakes bordered by higher mountains are to be found almost anywhere in British Columbia, but so far Shuswap has not found its Wordsworth, nor Okanagan its Coleridge. We have a thousand Lodoes but no Southey."—Vancouver Daily World.

All very true, to be sure, but we pause to remark that the visitor from Vancouver to the Okanagan will experience no difficulty in finding a Summer-land.

There is a feeling here that the road officials are laying down on the job, as far as the repair work along the Lake Shore road between Summerland and Peachland is concerned. This matter is a serious one and we believe should command the attention of the aforesaid officials at once. There is little apparent reason for delay, so far as the average individual can learn, and the possibility of early resumption of traffic to the north concerns the people of this community.

Elsewhere appears an account of the C. G. I. T. camp activities on the shores of Woods Lake, and a brief summary of the object of the organization. We believe the work of the National Board will bring great blessing to the young womanhood of Canada. The aim of the organization is deserving of the highest praise, and may the noble women who give their time, study and help to carrying out the splendid work realize to the fullest extent the well wishes and gratitude of all parents.

We may be mistaken, of course, as we all frequently are, but we believe that if one tries as best he can to be of service to mankind he will be rendering a service to his God, and, indirectly, in time, to himself. Honor, honesty, optimism, sunshine and good cheer, are things we want to get hold of and keep close to, and help others to get them also.

The bathing beaches along the water front are well patronized these warm days. Even many of the old soaks are taking to water of late without dire consequences that it is little wonder that others take courage. Water is not at all dangerous to the human system, inside or out, once one gets used to it.

And what do the school histories say about Prohibition—anything?" asks an American contemporary. We think not. The school histories of the States have not yet settled the battles and problems of the Civil War.

There are 13,324 Canadians living in the city of Seattle, the largest of any foreign nationality. Swedes come second with 10,253. Spokane has 3,692 Canadians.

As a woman grows older she learns that it is much more important that a man be a good provider instead of a good dancer.

It must have been the farmerettes who elected the Farmers in Alberta.

FROM PEACHLAND CAME THE FIRST SEASONS' CHERRIES

Residents of Sister Town Up Lake Says Summerland and Naramata Are Not Earliest Producers—Peachland Five Days in Lead in Cherry Shipments.

Summerland Review Publishing Co., Summerland, B.C. Gentlemen:

I notice in last week's issue of The Review the statement "that the first fruit of the season came from Naramata, with Summerland a few hours behind." If the comparison is confined to Naramata and Summerland no exception could be taken, but the preceding statement that "it is generally conceded that Summerland and Naramata are the earliest fruit districts in the Valley" leaves the matter open for contradiction. On reading the report I felt certain that Peachland, the pioneer horticultural point on the lake was being overlooked.

To corroborate my opinion I made enquiry as to the shipping dates from the above mentioned places with the result that Peachland was five days ahead of Naramata or Summerland in the shipping of cherries this season.

Again on the front page of your paper you give prominence to the fact that "Summerland's Are Finest

Cherries." It is very gratifying to all interested in fruit growing to know that the cherries grown in the district are the best. To give Summerland all the credit is quite excusable from a Vancouver point of view as the cars are shipped from Summerland. It does not follow, however, that all the cherries so shipped are grown in Summerland. Peachland Union has contributed this season between 1700 and 1800 crates of cherries to Summerland for shipment.

My object in drawing your attention to the above is not done with the intention of detracting from the praise coming to Summerland, but to secure a share of the publicity for the other points contributing their share of fruit shipped.

As your paper is devoted to the interests of Summerland, Naramata and Peachland I trust you will in your next issue, give this matter the publicity it deserves.

Respectfully,
 W. M. DRYDEN, Secy.

SUMMERLAND WEATHER REPORT

Below is a report furnished by the Dominion Experimental Station here for the week ending Tuesday:

	Max.	Min.	Rain	Wind	S.S.
July 13	85	57	12.5
July 14	90	53	13.5

Read The Advertisements

THE PUBLISHERS of this paper draw your attention to the advertising columns, and particularly to the advertisements of our merchants.

These merchants have invested their money in goods to satisfy the needs and desires of us all.

Their enterprise is a distinct service to our whole community. For this reason we should buy from them to the best of our ability and in so far as our needs and judgment of value dictate.

Then, too, the general commodities advertised in our columns are worthy of consideration. It is desirable that readers should ask merchants to supply advertised goods wherever possible. By doing so the cycle of trade is kept alive and inter-community commerce stimulated.

WE REPEAT—READ THE ADVERTISEMENTS.

Mr. and Mrs. E. Gould were visitors to Armstrong over last week-end, making the journey by motor.

A very fine field of alfalfa was cut at the Experimental Farm a few days ago, being the second heavy crop this year.

Postmaster W. H. Hayes returned Monday from a week-end visit at the home of his daughter, Mrs. C. W. Lees at Kelowna.

The new Summerland Telephone directory has over 360 names. Quite a list as compared with that of two or three years ago.

Miss Nicholson of the Summerland school teaching staff was operated on for appendicitis on Monday, and is reported as doing well.

Two church picnics were held on Thursday afternoon, one the Methodist, at Crescent Beach, and the other, the St. Andrew's, at upper Trout creek.

Municipal Clerk Nixon and Solicitor W. C. Kelley attended a sitting of the Water Board at Penticton on Thursday of this week in the interests of the Municipality.

Miss M. M. Currie, B.A. of the Medicine Hat High School staff, has been visiting Mrs. J. C. Freeman for the past week. She came over to be present at her sister's wedding.

Several auto loads of local people enjoyed an outing Sunday afternoon at Okanagan Falls. The roads in most places between Summerland and the Falls are in excellent condition.

Mr. C. B. McCallum is again on duty behind the register counter at the Hotel Summerland after a week of confinement at the Hospital, where he underwent a successful minor operation.

Mr. W. S. Stout of Toronto, president of the Dominion Express Co. and Mr. R. Helme of Vancouver, British Columbia Superintendent of the Express Co., were visitors to Summerland this week.

R. H. Helmer and M. S. Middleton were at Trail a few days ago giving evidence as experts in the investigation of a complaint made by citizens that the fumes from the smelter are destroying trees and other vegetation.

A special committee appointed by the president of the local Board of Trade have been meeting the past week planning a new pamphlet for Summerland, which the Board members hope to have ready by Provincial Fair time, which comes this year on September 7th to 16th.

Mrs. H. A. Solly was honored by the W.A. of St. Stephen's Church when she was presented with a life membership in that organization at a recent meeting. The presentation including a gold pin and certificate, was made on behalf of the members by Mrs. F. A. C. Wright in a very appropriate address.

The Summerland Band made its appearance on Tuesday evening in the third open air concert of the season. While many of the instruments are in the hands of beginners, the rendition of several selections was very creditable, and Bandmaster Cline is deserving of a great deal of credit for his work of rounding into shape a splendid musical organization of this nature.

H. Finley went down to the Coast a few days ago on a buying trip.

Mrs. Connell of Kelowna is relieving the nurses at the hospital during the vacation period.

Mrs. J. Givillman of Carleton Place, Alta., arrived Tuesday evening for a visit with friends here.

Edna M. Kennedy arrived in Summerland Tuesday from Veteran, Alta., for a brief visit with friends.

Mrs. Wm. Beattie entertained ten girl friends of her daughter, Katie, on the occasion of the latter's 13th birthday.

The new telephone directories are now out. Any subscriber who has been overlooked in the distribution of same is asked to phone Central.

A guy-wire on the Okanagan Telephone lines caused considerable trouble to the local lighting plant before the leak which it occasioned was located. Most of the community was without light on Saturday night.

Miss Johnston, matron of the Summerland Hospital, left on Thursday for a month's vacation at the Coast and on Vancouver Island. Her position at the hospital will be filled by Miss Hibbs, who has been doing work for the S.C.R. since the war.

A fire which started in Trout Creek canyon spread up over the hill Thursday afternoon and caused some damage to trees and fences at the east end of Paradise Flat. A call for help was made about five o'clock and the fire was soon under control.

While handling an adze on Thursday afternoon at the new storage building, a carpenter by the name of Campbell, cut his shin badly. While the doctor was being called his leg was tied up and later he was removed to the hospital. Mr. Campbell came here from Vancouver.

Good progress is now being made on the construction of the new storage building of the Summerland Storage Company. The main floor timbers are all in position and covered with two layers of floor boards with paper between strips and a heavy floor will be later put on these. The first of the timbers for the wall and the second floors are now going up and demonstrate further the very substantial nature of the construction. The first shipment of hollow tile for the walls is now on the ground.

When a man says that a college education isn't worth anything he is calling attention to the fact that he has become great without one.

WEDDINGS

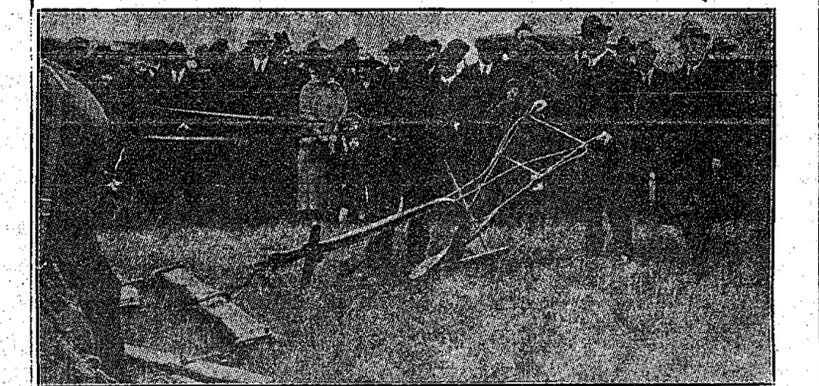

Miss Helen S. Currie of Tatamagouche, N.S. and Mr. David Dodding Jr. of Lower Nicola, B.C., son of one of the leading Nicola Valley ranchers, were quietly married at the home of Mr. and Mrs. J. C. Freeman on Thursday, July 14, by the Rev. W. A. Alexander.

The living room where the ceremony was performed, was prettily decorated with a profusion of cluster roses, gypsophila and trailing vines. Mr. and Mrs. Dodding left on a motor trip to Nelson, which it to be their future home.

NEWSPAPER ADVERTISING IS FAVORED BY THE PUBLIC

T. M. Humble, a well-known writer of Toronto, in an address before the retail merchants in convention a prospective purchaser and customer that city recently, said in part:

"Every reader of a newspaper is name appearing in a reputable paper per actual thousand people reached than any other form of publicity, not counting the prestige of one's per every week. And," he continued, "there never was a time in merchandising when newspaper advertising was more necessary or potent

in its power to get business." Newspapers are the safest, cheapest and best means of reaching the greatest number of people. This fact has been recognized by the large merchants in the cities for many years, but it has only recently come to the country merchant that what

was good for the city man ought to be good for his business, and as a result of the experiments that have followed the idea, the rural merchant has come, in most instances, to understand that money spent in judicious newspaper advertising is one of his best investments.

Peachland Doings
A Weekly Chronicle Furnished
By Our Local Representative.

Masters Frank and Fred Cottle of Calgary, arrived Tuesday evening of last week to spend their vacation with their relatives here, Mr. and Mrs. L. D. McCall and family.

Rev. J. Harkness, of Vancouver, provincial secretary of the Social Service Council of B. C., spent two days in town last week while making a tour of the Valley in the interests of the work. He was disappointed not to have been able to arrange a meeting here and to arrange for support from here. He left on Wednesday morning for Westbank.

After a pleasant visit here with his son and family, Mr. Alpaugh, Sr., left last week to return to his home at Nelson.

After a lingering illness, during which time she suffered much pain, Mrs. Macdonald passed away on Tuesday evening of last week. After a short service at the house interment took place on Thursday morning. The Rev. F. Coad conducted the services at the house and graveside. She leaves to mourn her loss in the home, her daughter, Miss Hattie Macdonald, and nephew, Mr. Grant Lang. Another nephew, Mr. Hamilton Lang, of Vernon, with Mrs. Lang, came down Wednesday evening to attend the funeral.

Miss M. Smith left on Thursday morning for Kelowna to undergo an operation at the hospital.

Mr. George White, of Kelowna, came down on Thursday evening of last week to spend a short time here with his parents and the rest of the family, who recently moved down from Kelowna to run the local butcher shop.

After a pleasant visit at the home of Mr. and Mrs. Keating and family, Mrs. Jeffords and the Misses Elizabeth and June left on Thursday evening to return to their home in Pentiction.

Miss Bertha Bradbury returned to Pentiction on Thursday evening after a pleasant visit here with her parents and the rest of the family.

Major K. C. Tailour paid a short visit down the lake last week returning Saturday morning.

Mrs. H. Williams and son Robbie were visitors in Kelowna on Friday.

Mr. Oliver Keating and family are now enjoying the privilege of riding in an Overland which they purchased on Friday.

Mrs. Heighway had the misfortune one day last week to step on a rusty nail and having it enter her foot to quite a depth. It caused her considerable pain and inconvenience, but she is improving nicely.

Mrs. E. Aitkens went north on Saturday morning to visit friends in Kelowna. Mrs. M. N. Morrison was another visitor to Kelowna on Saturday.

After a two weeks' visit at the Coast our local manager of the Royal Bank, Mr. Harrison, with Mrs. Harrison and baby returned by Lakeshore stage on Saturday morning.

Mr. Mann, of Kelowna, assistant to District Engineer Col. Donnelly, took a week-end outing in Peachland coming down by row boat Saturday evening. Mr. Mann takes a good deal of pleasure from an outing such as this.

Miss Lackey of the teaching staff of the Edmonton schools arrived Saturday evening to spend a vacation here at the home of Mr. and Mrs. Hackett.

A public meeting was called for Saturday evening last in the Municipal Hall for the purpose of dealing with the question of a fall fair here this year. So few attended that those present felt if the people did not have any more interest in the matter than was evidenced by the attendance it would be unwise to go ahead with an exhibition, but finally it was decided that it would be better to postpone the meeting and in the meantime do some personal advertising and make an effort to get a good representative crowd together on Monday week to give the matter fair consideration. The Women's Institute have decided to hold their annual flower show and as the department was pressing for a fixed date for the fall fair the Institute decided on Thursday, October 6th, and hoped that the community would arrange for a general exhibit and find it possible to unite on that occasion. The women of the Institute

have been pressing for action on the part of the male members of the community on this question.

Naramata News
Current Events of
Town and District

Mrs. Wm. Dryden and daughter, Miss Jean, returned on Sunday after a two weeks' visit to Vancouver and Victoria. They were accompanied on their return by a nephew of Mr. M. N. Morrison and Master Gordon Town, who have come to holiday here.

Mr. Fred Young has received word of the death of his mother, Mrs. Chas. Young, well-known to many old-timers here, she having lived here with her husband for some time prior to his death. The date of her decease was July 11th.

Passengers north via the Seacombs on Monday morning were: Mrs. Jas. Michael, Mrs. Hardisty, Sr., and Miss Victoria Hardisty, Mrs. Smalls and son Sydney and the Rev. F. Coad.

Mr. Ernest Wells, of Caron, Sask., left on Monday after a short visit here with Mr. and Mrs. Fred Young on his way home from the Coast.

Mr. Denton and Mr. Smith, who have been in charge of the Royal Bank here during the absence of Manager Harrison and Miss Dryden, left on Monday. Manager Denton went to Lumby.

At a recent meeting of the Municipal Council the clerk was instructed to get in touch with Col. Donnelly with the view to having necessary repairs done to the Lakeshore road south of town and if the government refused, to get permission to allow the Council to do so.

The 1921 cherry crop in Peachland is fast drawing to a close now

Mr. and Mrs. J. M. Robinson and the Misses Robinson entertained at a delightful tennis tea on Saturday afternoon at their residence. Several friends from Summerland came over for the afternoon, including Dr. and Mrs. Lipsett, Mrs. Craig, and others.

Miss Madge Sibbald of Marpole, is spending a short holiday in Naramata with her sister, Mrs. Wm. A. McConkey, and will visit later at points further up the lake.

Several of the younger girls of Naramata are spending a holiday at the Girls' Camp near Vernon. The girls from Naramata are chaperoned by Mrs. Ameron, and anticipate a very pleasant week's outing.

Mr. Ridgeway Wilson of Vancouver, a returned soldier, is visiting in Naramata and vicinity and is a guest at the Syndica Hotel. Mr. Wilson is the son of Colonel Ridgeway Wilson of Victoria, who was well known at Vernon during the war and has many friends in the Valley.

A niece of Mr. J. M. Robinson's, Miss Grace Smith of Vancouver, has gained high honor in the matriculation examinations, being awarded one of the Governor-General's silver medals and a scholarship of \$100. Miss Smith is a daughter of Mr. T. J.

and the peaches on the move. We have been informed that Peachland led in the date of the shipping of first cherries this season.

Smith of Vancouver, a brother in law of Mr. Robinson's, and a pupil of King George High School. She was one of the five leading students in B.C. at the examinations.

Miss Alice Myers of Naramata leads the list of successful candidates at the Matriculation examinations at Pentiction, with a total of 713 marks. Congratulations are extended to Miss Myers.

Miss Vera Salting's young friends gave a surprise party for her at the Unity Club last Friday evening on the occasion of her birthday. A pleasant evening was passed in dancing.

Mr. and Mrs. A. T. Robinson, who have been visiting for some time in

Summerland and Naramata have acquired a five acre plot of ground near Mr. Saltings and intend having it planted with fruit trees.

GRAND FORKS TO HAVE GOVERNMENT LIQUOR STORE

According to reports from Grand Forks that place is to have a Government liquor store and preparations are now under way for opening the establishment before the close of the present month.

The islands of Asia cover one-sixth of her territory.

Always tell your wife the truth—but not more than necessary.

WORK TO START ON GRAND FORKS IRRIGATION SYSTEM

Plans for that portion of the Grand Forks irrigation system which it is proposed by the Irrigation Board to construct this year are completed, and have been forwarded to the Department of Lands at Victoria for approval, according to the Grand Forks Gazette.

The plans include three complete sets showing the estimated cost by constructing the distribution pipes of wood, of concrete, and of galvanized iron. It is understood that the efficiency of the galvanized iron piping has been favorably considered by the engineer and by members of the Irrigation Board.

proved by the Department, tenders will then be invited for the construction work. It is hoped by the Irrigation Board that approval of the plans will be obtained in the course of a week or ten days.

R.C.M.P. HOLDING ANNUAL RIFLE PRACTICE THIS WEEK

Patrols from various cities of this portion of the province are holding their annual rifle practice at Grand Forks this week. Some high scores are reported. Pentiction is represented at the gathering.

Some people are failures because they devote most of their energy to looking for chances to bring suit for damages.

**An Announcement of
Special Interest to Every
Motor Owner of Summerland
and Surrounding Districts**

Messrs B. J. PECKHAM and J. CRAWFORD, late of Vancouver, wish to announce to the people of Summerland and the South Okanagan country generally, that they have taken over the business of the

**SUMMERLAND
GARAGE**

which business they will continue under the same name.

A Full Line of Accessories, Oils and Gases will be carried.

MR. PECKHAM is already well-known to many motorists of the Okanagan, having been travelling mechanic with the Giant Truck Company for over two years.

MR. CRAWFORD has been for the past three years foreman of the workshops of the Giant Motor Company, before which he was with the Dodge and the McLaughlin concerns.

Associated with them they will have two other first-class mechanics and are in a position to

**Absolutely Guarantee First-Class
Workmanship**

Consult this firm of mechanics, each a specialist in his own line, when you think your Car or Truck requires attention.

When The Awakening Comes

Second Installment of a Series of Articles by
A NEWCOMER

To-day offers the opportunity to the Government officials and engineers to engrave their names on the future of centuries hence as builders of a great highway around the Okanagan Lake, for what building or institution would provide a more uplifting education for mankind than that which makes accessible the natural beauty spots which the Great Architect has placed in this part of British Columbia? Nothing built by man can call forth the reverential fear for the Divine Being that is inspired by the natural wonders of His handiwork.

With comprehensive planning by far seeing men such communities as we live in will be ready to connect with highways leading from densely populated centres to such beauty spots, and we must not lag behind others in getting started, for the time is at hand.

The writer has seen deserts bloom into wonderful productive areas within a period of four years. He has witnessed great transformation in old settled districts of the west in little more than an overnight period of time. He has seen towns blossom into cities, untenanted lands converted into producing fields and gardens and the rural population multiplied by ten and more within half a decade and he can see as great or a greater future for this Valley when the people awaken to the need of concentration upon the question of good roads.

The foundation is already laid for a wonderful district, and roads or no roads, in time this Valley will become the home of ten times the present population, but good roads will speed up this desirable condition far greater than any other agency that the ingenuity of mankind may contrive.

It is going to take far more space allowed me to treat the good roads question from all angles, and for this reason I propose to touch first upon the need for co-operation on the part of the people of the various communities in the Valley to bring about the betterment of public highways.

Let us say that the local Automobile Association officials take the initiative in the matter by first issuing invitations to like organizations located in other parts of the Valley to meet in Summerland at a near date. Let the local club prepare a program treating on means and plans of procedure. At this gathering call upon the officials of the Northwest Tourist Association and the Good Roads League to send representatives prepared to place before the meeting plans for a permanent organization in this Valley which will affiliate more closely with the larger ones. Let them explain plans for future legislation pertaining to road building and explain how the local organizations can best co-operate with the larger ones and be of more mutual help. Let the citizens of the community get behind the club and help to entertain the visitors, and by all means hold open sessions and increase the membership at every opportunity for the time for co-operation is at hand. Every resident of the valley will benefit from the results of these gatherings and the efforts stimulated by the knowledge that all see the worth of concentration for better highways. The world around us is travelling a faster pace than ever before and we must realize that it is necessary for us to keep up with the band wagon or we shall be left far behind before we know it and miss the good things that come to those who keep apace with the procession.

The good things that will follow will compensate us for the time given to the study and carrying out of the plans if there is no shirking of duty.

It is but folly to "sit pretty" and wait till "all things come to him who waits." That old-fashioned rule is a little out-of-date in this day and age and it is the individual or community that bestirs that "brings the bacon home." The mere fact that a community is a live one with energy and foresight to go after the things that build upward makes whatever work it has before it many times less arduous. Such a reputation is worth working for, and among the foremost of good things that such a community will go after is co-operation and permanent highways.

The benefits of good roads may be classified as social, educational and financial. They promote social intercourse among the residents of a country district by making travel easy and pleasant. Where the roads become impassible during a portion of the year, the residents are practically isolated at the period of greatest leisure and lose that intercourse with their neighbors which is a most important means of enjoyment and development. Attendance at church and public meetings is facilitated by good roads. The rural mail delivery depends for its efficiency upon the good condition of the roads.

The consolidation of rural schools and establishment of rural high schools, made possible by good roads, is an important advance in educational methods, and places rural communities more nearly on an equal with the cities in educational advantages offered to children.

Roads that can be travelled all year admit of marketing the products of our orchards and farms at any time which may be most advantageous, enabling the farmer to take advantage of favorable conditions and prices, or to transport his products at a convenient season, when he can do the work without interference with other duties of men and teams.

And, we might go on with column after column of argument in favor of better roads, setting forth facts gathered here and there substantiating the claims that money judiciously expended in the construction and maintenance of good roads will return to the taxpayers many fold in benefits. How tourists are attracted to a community by good roadways, and the benefit to a community from this angle is by no means a small matter, but the greatest benefits derived from good roads are in the increased comfort, convenience and pleasure of the people living near them, and in the social and educational advantages which they make possible and which add greatly to the attractiveness and happiness of rural life.

The writer believes that the people of this valley can do wonders for themselves by a little spirit of co-operation and

effort along the lines above mentioned, and he can see as plain as day the changing of the pleasant surroundings, at present, to those more pleasant, and a population many times greater than now. Through long association with publicity work he also understands what movements of the kind mentioned mean, and offers his criticism in all good faith. He fully understands that to accomplish anything these busy days that it means a sacrifice of time and a little money, and it takes grit and energy along with the rest of it. But we will all agree that good things seldom come to an individual or a community without effort, or when they do come they are so long about it that they are usually out of date.
(To be continued.)

LOWER PRICES PROMISED FOR GAS SAYS DISPATCH

Promises for lower prices for gasoline are contained in the following despatch from Montreal:

Loaded with two and a quarter million gallons of gasoline from the oil fields of Baku, the San Ungo docked at Montreal at noon to-day.

She is one of a fleet 147 vessels chartered by the Shell Oil Co., of England in carrying out the competitive program which has recently been the subject of much debate in United States oil circles.

Officials of the Shell company have arrived from New York to supervise the unloading and disposal of the cargo. Other ships are carrying more oil to this port and it is stated locally that the Pacific harbors will shortly be invaded by the Shell fleet carrying gasoline in quantities that will assure a lower price for motorists. The Ungo has been moored away from other vessels and about two miles down the harbor to avoid danger of accidents.

Shell gas is now being advertised in some of the interior towns of B.C.

"Very Pretty."

HADN'T THE PRICE

Returning home from the dentist's where he had gone to have a loose tooth drawn, little Raymond reported as follows: "The doctor told me 'fore he began that if I cried or screamed it would cost me a dollar, but if I was a good boy it would only be fifty cents."
"Did you scream?" his mother asked.
"How could I?" answered Raymond. "You only gave me fifty cents."—Continued.

Less Troublesome Adjustments

As a rule the adjustment you get on a defective tire, doesn't quite satisfy you. Mainly, we suppose, because we are all human and want a little more than we are entitled to.

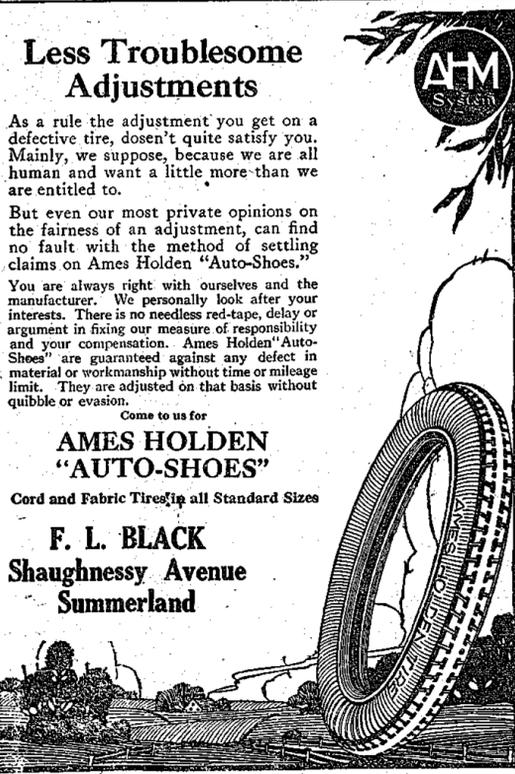

But even our most private opinions on the fairness of an adjustment, can find no fault with the method of settling claims on Ames Holden "Auto-Shoes."

You are always right with ourselves and the manufacturer. We personally look after your interests. There is no needless red-tape, delay or argument in fixing our measure of responsibility and your compensation. Ames Holden "Auto-Shoes" are guaranteed against any defect in material or workmanship without time or mileage limit. They are adjusted on that basis without quibble or evasion.

SEED CROP IS BECOMING HEAVY

Okanagan Valley a Factor in Production of Seeds.

British Columbia, and particularly the Okanagan Valley, is becoming a heavy exporter of field, root and garden vegetable seeds. One hundred and fifty thousand pounds were marketed last year through the United Seed Growers, Ltd., whose head office is at Penticton.

During the year Canada's export trade in seeds has made a considerable advance, due largely to the joint efforts of the Agricultural Department and the Department of Trade and Commerce. Seed exports were made to the United States, Great Britain, France and Newfoundland. Approximately one million dollars' worth of flax seed was exported to Ireland during last year. The Dominion Experimental Farms have entered quite extensively into seed growing and sold 75,000 pounds of mangel, swede turnip and field carrot seed at wholesale prices to Canadian farmers.

FIRE LOSSES IN SOUTH COUNTRY

Osoyoos Mill Destroyed, and Home Burned at Vasseaux Lake.

There were two serious fires down the Valley during the past few days, one eleven miles east of Osoyoos which destroyed the mill of the Osoyoos Lumber Co.

The other was south of Vasseaux Lake and destroyed the home and household effects of Capt. W. C. Bate on Tuesday afternoon. It is said the fire started from clearing fires made by the road gang opening the new right of way to Oliver. The fences of the Kennedy and Swan Lake Ranches were destroyed and implement shed and tools of the Parham Ranch.

MATRICULATION EXAM. RESULTS

Successful Candidates in Summerland and Nearby Schools.

Seven out of twelve of the junior matriculation class of the Summerland High School passed the required fifty per cent mark, but four of these are required to write supplementary exams. Ronald White, Alva Garnett and Ruth Graham got through on all subjects. Three of the four granted supplementals are, Thelma Hobbs, Edgar Hobbs and Hugh McIntyre. We have not learned the name of the fourth.

Less than 700 candidates of the 1,546 throughout the province passed on all subjects. More than 400 were granted supplementary examinations.

The result for Summerland and other nearby centres are given below:

SUMMERLAND HIGH SCHOOL.
Junior Matriculation, maximum marks 1000.—Ronald E. White, 690; Alva A. Garnett, 639; Ruth E. Graham, 551.

Granted supplemental examinations
4. Completed junior matriculation, James Marshall, W. H. Blanchard Munn.

PEACHLAND HIGH SCHOOL.
Junior matriculation, maximum marks 1000.—Gladys M. B. Edgecombe, 708; Bayard O. Iverson, 706.

Completed junior matriculation.—John W. H. Hamilton, Ilvya Murdin.

PENTICTON HIGH SCHOOL.
Third class, non-professional; maximum marks, 900.—Gladys T. Rogers, 488.

Junior matriculation, maximum marks, 1000.—Alice E. Myers, 713; Elise M. Linke, 673; Kathleen M. Lundy, 666.

Granted supplemental examinations
6. Senior matriculation, maximum marks, 1100.—Mabel Wilcox, 709.

General Smuts whose logical utterances are constantly being praised in the newspaper world. The masses of all classes display great confidence in his wisdom.

DISCUSS SCHOOL BY-LAW AGAIN

(Continued from Page 1).

under the direction of the Provincial Government.

Mr. Jackson said that he had heard that \$5,000 would raise the Garnett Valley dam another three feet.

Mr. Campbell, speaking on the School By-law, said the Board had purposely kept down the sum asked for because it realized that money would be required for the water system. He asked: "If you do not build the school what are you going to do? Pay rent or close the school?" If by building the school we attract more people to the community it will be easy to pay for the school and further improve the irrigation system. We can do both if we go about it right.

To a question put to the principal of the school, the latter stated that the law required that the Board must provide school accommodation for children of six years or more.

The discussion ended in a resolution proposed by Mr. Huddleston and seconded by Mr. Kelley that the Council be requested to obtain figures as to the approximate cost of water storage on Aeneas Creek and Trout Creek, and to lay these figures before the ratepayers at the earliest possible moment.

Introduced by Pres. Freeman, the question of a satisfactory road between Summerland and Peachland occasioned much discussion. Rev. H. A. Solly championed the upper road, while others, including Mr. Helmer, were as positive that the lake shore road should be repaired and improved. Mr. Campbell also favoured the constructing of a new upper road.

R. E. White told of efforts being made by Kelowna, Penticton and other

MOTION FAVORED THE UPPER ROAD

(Continued from Page 1).

manent road imperative.

Should the lower road be chosen a large sum will have to be expended to blast sufficient rock to make a breakwater and to cut off dangerous corners, and the road must be straightened and widened. But when this is done there must always be a very heavy maintenance bill. The road is a made mud road, surfaced with gravel, along which water is continually seeping from the hill above during the winter months, rendering it soft and boggy, added to which it will always suffer from erosion from the lake on the one side and from slides which are constantly falling from the cliffs on the other.

Should, however, the upper road be chosen as the permanent road, less cost would be incurred, in spite of the fact that parts of the road would have to be changed to eliminate unnecessary grades, that much would need to be widened, and several corners, consisting of mud and gravel, be cut out. The natural bed is very good and material for surfacing at hand, while the cost of maintenance would be very light. There are long stretches of straight road, which together with the higher altitude renders motoring far more pleasurable than a road of continual turns, such as the lower road.

It must be borne in mind that the road to be adopted will be part of a very picturesque circular drive from Penticton through Vernon, Kamloops and Princeton, and therefore the scenic value is worth considering. Whatever may be said of the lower road from this standpoint, the fact will ever remain that in travelling over it one would always have a bare rock on one side and the level of the lake on the other; consequently it cannot compare in scenic beauty with the attractions offered by the upper.

As a result of these considerations the Summerland Automobile and Good Roads Association at their last meeting passed unanimously a resolution favouring the adoption of the upper road as the permanent road between Summerland and Peachland.

H. A. SOLLY, President, Summerland Automobile and Good Roads Association.

er valley centres to have the shore road repaired. The discussion resulted in a resolution asking Engineer Gwyer to inspect both roads at the earliest possible moment.

It was agreed that there should be no August meeting unless called by the executive council.

Some men are like some horses, they will stand without hitching, but tie them to a post and they will proceed to kick over the traces.

LAKE SHORE ROAD WORK WILL RESUME AT ONCE SAYS DR. KING AFTER INSPECTION TOUR

IMPORTANCE OF ROAD IS RECOGNIZED BY VISITING OFFICIALS.

NOT PRIMARY ROAD

Minister Declares That Highland Road Not Feasible—Engineer Gwyer and Supt. Donnelly Accompany Him on Visit Here Monday.

Work of repairing the Lake Shore road between Summerland and Peachland was resumed on Wednesday morning, following suspension since last Friday. Road Foreman J. C. Arkell received instructions on Tuesday to proceed with the work, first going over the road and putting it in passable condition and then proceeding with more permanent work. This order was the result of a visit here on Monday of Dr. King, Minister of Public Works.

In an interview with Reeve White on Monday afternoon, Dr. King gave assurance that he would issue instructions that afternoon to have the work on the Lake Shore road proceed without delay. Dr. King stated that he appreciated the importance of the road, and would have it put in passable shape at the earliest possible moment, and that more permanent work would follow.

As a result of information he had obtained he had decided that it would not be wise to build a permanent road on the higher bench, although he thought the upkeep of the lower road would exceed that of the upper.

Dr. King had just driven over the shore road, having visited Kelowna and Peachland, as well as points further north. He was accompanied by Engineer Gwyer and Superintendent Col. Donnelly.

It was with much surprise that the reeve learned from Dr. King that the Lake Shore road had not yet been declared a primary highway. In fact, the minister stated that no roads had yet been so declared although this and others had been decided upon, and it yet required an order-in-council to so classify them.

Asked as to the classification of other roads in the district, Dr. King, though not committing himself, left the impression that the road from Shaughnessy avenue to Mineola would be classed as secondary.

When told that the municipality had left the repairs on the Lake Shore road to the government, Dr. King expressed regret that there had been a misunderstanding here and elsewhere with respect to the classification. When told that the municipality believed the act was in operation when it made its appropriation, Dr. King promised to do what he could to make some of these repairs.

Asked as to the completing of the trans-provincial road, which would greatly increase the tourist business in the Okanagan, Dr. King stated that as soon as the Christina Lake link, which was now being built, was finished, there would be a road through from the prairies. There only remained the road over the coast range, and work would be started on it next year. He was fully alive to the value of a road which would enable tourists to come or go between the interior and the coast.

STORAGE COMPANY IN ANNUAL MEETING

W. H. Hayes Re-Elected President, Major Hutton Vice.

At the general meeting of shareholders of the Summerland Storage Company, Ltd., held in the Parish Hall on Monday, the first annual report of the directors, with financial statement, was presented and adopted almost without comment.

President W. H. Hayes occupied the chair and spoke briefly on the progress being made on the new storage building.

The directors were authorized to pay a dividend of 8 per cent. on the paid-up capital.

A vote of thanks was tendered to

ARTISTS INTERESTED IN HOME THEATRE

Noted Entertainers Booked by Mr. Aikins for Coming Season.

Mr. and Mrs. Carroll Aikins have recently returned from Seattle where they spent a most interesting ten days making arrangements for a series of concerts and plays to come to the Home theatre of the Canadian Players at Naramata. The immediate object of the trip was the formal opening of the new theatre at the Cornish school by the Maurice Browne and Ellen van Valkenberg Repertory company in "The Philanderer," by Bernard Shaw. It was an occasion of real dramatic importance to the Pacific Northwest, says Mr. Aikins. Mr. Browne hopes to establish there permanently a Repertory theatre of the type of the Manchester or Birmingham, England, Repertory theatres, and he and Mr. Aikins expect to co-operate eventually in maintaining a Pacific-Northwest circuit for their Repertory companies. It may interest our readers to know something of the Cornish school which is fostering these beginnings of a dramatic art and is also sending to Naramata artists of the first rank in a series of programs, beginning with the second week in August, when Ellen van Valkenberg (Mrs. Maurice Browne) will bring us a complete program of her famous impersonations of leading actresses in modern plays. It will add greatly to the interest of these amusing impersonations that she herself will be seen again at the Home theatre later in the season in some serious and exciting roles.

Miss Cornish, founder of the Cornish school, has by her individual effort built up in Seattle a school of the plastic arts unique on the continent. It is the only school where all kinds of music, vocal and instrumental, dancing and all the arts of the theatre are taught in one building and that building a remarkably beautiful one—just completed for Miss Cornish by the citizens of Seattle. At the summer school now in session, Miss Cornish obtains the services of the world's leading artists and Mr. Aikins has been successful in interesting both Miss Cornish and many of her visiting artists in his Home theatre at Naramata, so that the names announced on his program for the coming season will be Dean Wells and Mr. Armstrong, pianist and violinist, and other members of the Cornish permanent staff. There will also be, it is expected, several programs of dancing, including a visit from Adolph Bolm, chief exponent of the Russian ballet in America, and leading choreographer at the Metropolitan Opera House, New York.

The Seattle Repertory will give a full week's performances in September, the plays to include "The Philanderer," by Bernard Shaw; "A Doll's House," by Ibsen, and "Dr. Faust," by Arthur Davidson Ficke.

People in the west have been heard to say that the only drawback to life out here is the lack of musical and dramatic entertainment of the first class. These are among the people Mr. and Mrs. Aikins count on to support their theatre in its attempt to bring to the Okanagan the best the world has in music dancing and the drama.

the retiring directors for the efficient manner in which they had handled the finances.

The company's property when the new building is completed will represent an investment of approximately \$80,000; \$63,300 capital has been subscribed, and the balance of the \$80,000, after further anticipated subscriptions are received, will be financed by mortgage.

The retiring directors, Messrs. Hayes, Hutton, Simpson, Zimmerman, Helmer and G. Thornber, were re-elected, with Mr. P. G. Dodwell, a new director, to fill the vacancy caused by the resignation of Mr. S. M. Young.

At a meeting of the directors, Mr. Hayes was re-elected president, and Major Hutton, vice-president.

RESULTS OF ENTRANCE EXAMS ARE GIVEN

Results of the entrance exams always awaited with impatience and feelings of hope and fear, were announced early this week.

Summerland's public school principal has the privilege of passing 60 per cent. of the pupils without final examinations, while the remaining 40 per cent. and any others seeking honors must write.

Examination results for Summerland, Naramata and Peachland are: Summerland—Dorothy B. Dunsdon, 733; Theodore J. McIntyre, 688; George B. Wilson, 682; Nora O. Thompson, 674; Arthur N. Gartrell, 651; Bessie G. Caldwell, 645; Marjorie Morrison, 610; Archibald E. Scott, 598; George Dewar, 595; M. Irene Eckford, 578; Lillian A. Darke, 555. Promoted on recommendation—Gertrude L. Arkell, Ella M. Bowering, Charles S. Clark, H. Orville Dunham, Dorothy A. Garnett, Hazel R. Harding, M. Isabel Hogg, Eva I. Johnston, Alice E. Limmer, Laura M. McLachlan, Ella Morrison, Margaret L. Munn, William R. Ritchie, Mabel G. Shields, Cyril C. Taylor, Helen M. White, Alvin D. Willson.

Meadow Valley—Robert M. Darke, 652.

Peachland—Reynolds C. Harrington, 681; D. Douglas Morrison, 660; Ira E. Brinson, 658; Myrtle I. Iverson, 652; M. Alexandra Keating, 631; Earle L. Murdin, 613; Doris I. E. Winger, 596; Aimey D. M. Winger, 550; Fred Topham, 550; C. Earl Law, 550.

Naramata—Raymond M. Manchester, 643; Donald Salting, 593; Margaret E. Symons, 569.

POWER OFFICIALS WILL COME HERE

Will Discuss Extension of Lines to Summerland Soon.

That he would be here in about three weeks to discuss with the municipal council the proposal to extend the Kootenay power lines into Summerland, was the information received from Mr. Lorne Campbell early this week at the municipal office. Mr. Campbell intimated in his letter that financing is not of the easiest.

Some delays in delivery of necessary material has set back the date when the line is expected to reach Penticton. October 1st was the original time set for the arrival of the new power, but it is now believed that it will be a month later.

CAUGHT BLAZE IN TIME TO AVOID SERIOUS LOSS

On Saturday last a fire occurred at the boarding house on the Experimental station, which at one time looked like being disastrous. At about 12.30 the alarm was given; a spark, presumably from hot ashes, having started the conflagration.

The men were just at lunch and within a few seconds upwards of a score were on the scene and although the fire had got a good start, the platform to the south of the building being ablaze, it was soon under control. Fortunately the building is equipped with fire hose, which is kept in constant readiness, and the promptness with which this was put in action, together with the great protection afforded by the outside plaster, saved the building and the damage was only slight.

Alfred the Great built England's first fleet in 878.

FRUIT DAMAGED BY HEAVY STORM

Hail and Downpour of Rain on Monday Plays Havoc.

ROADS DAMAGED

Garnett and Prairie Valleys, Paradise Flat and South Part...Escape Hail Storm.

A careful estimate by the Fruit Union of the actual loss suffered by the community by the hail storm, places the total loss on apples at \$10,000 to \$12,000, and not more than \$15,000 at the most.

The Union has been offered \$40 per ton for all hail marked apples, which price has been refused.

The damage to soft fruits and early vegetables will not be nearly as great as at first believed. The Review is informed that arrangements have been made by the Union with a jam factory for all marked apricots at a price that may exceed the price received for No. 1 and 2 cots.

Several thousand dollars loss to the fruit growers will result from an unprecedented hail storm which hit part of the Summerland district on Monday afternoon. The loss is variously estimated, some guesses being as high as \$100,000. Others place the loss at \$50,000 or less, and though serious, one man prominent in the fruit shipping business pointed out that this is after all a small part of a crop which is believed may run to a million dollars.

Jones Flat is said to have suffered most, the hail falling heavily there and all along the front benches to a point near Giant's Head. Garnett Valley, Prairie Valley and Paradise Flat, the section south of Giant's Head and Trout Creek Point and the benches above escaped, as did also the extreme north end of the front.

There have been in other seasons small tracts where hail has hit, but usually the stones have been small and not very numerous. On Monday the hail stones were unusually large, the size of small marbles and almost covered the ground in places. Fortunately there was little or no wind.

The heavy downpour which accompanied the storm did much damage to the roads, especially on the hillsides, and has occasioned an unlooked-for demand on the remaining part of the comparatively small appropriation made by the municipality for road purposes.

During the storm there was one flash of lightning and which struck a hollow tree at the rear of the Cline property, and near the Ladies' College building, setting the tree on fire.

KOOTENAY LANDS TO BE RECLAIMED.

Victoria, B.C.—The visit of Governor Davis of Idaho to the province is believed to indicate a joint undertaking to reclaim land on the Kootenay River. The flats are at the boundary and there are 25,000 acres on the United States side and 30,000 on the Canadian side, which are at present producing only hay and which it is believed can be reclaimed at a cost of about \$25 per acre.

BEAUTIFUL WINDOW GIFT TO LOCAL BAPTIST CHURCH

On Sunday morning the pastor of the Baptist Church referred to the placing of a stained glass window above the choir loft, and to the fact that the donor, who was a member of the church, did not wish any reference to be made of the gift. He said it was typical of the British spirit to do good by stealth. He thought the gift was the manifestation of a new spirit in the church. That the church was beginning to develop the aesthetic sense, and see close relationship of art to worship, and the value of material aids to worship. That it was more inspiring to see the King in his beauty than to see him arrayed in sack cloth and ashes.

The window measures 10x5 feet, and is made up of five Gothic shaped panels, the mounting of each being 4 inches wide. The diamond cuts are of amber color, the centre cuts being in rose color, and the cuts around the framework, purple. It is an interesting fact that through this combination of colors, the brilliant rays of the sun produce prismatic shades of most wonderful description which are constantly changing their hue as the sun moves in the heavens.

TO ESTABLISH BIG FLAX FACTORY

Calgary, Alta.—It is reported that a three million dollar factory for spinning and twisting flax will be erected in this city, a commencement being made in the fall. The choice of the site is said to lie between Winnipeg and Calgary with the Alberta city the more favored.

ADVERTISE FRUIT IN THE EAST

Campaign Started to Put B. C. Products to Fore.

The first advertisements of the big fruit campaign which is being carried on throughout Western Canada this summer to stimulate the sale of British Columbia fruit, have already appeared in the newspapers and with the publication of a large list of farm papers there will hardly be a publication issued in the west but which will carry the advertising.

Already newspapers have given considerable space to the campaign and have referred to it in their news columns.

The wholesale fruit dealers of the prairies are lining up behind the campaign and prominent Okanagan shippers who have just returned from the prairies tell of the enthusiasm which is being displayed by the jobbers and their travellers.

They realize the importance of advertising and how it helps to sell fruit.

The advertising will appeal to the housewives to place their orders with their grocers early lest they be disappointed. They are also being kept informed as to when the different fruits are available and when they will be on the market. The advertisements also give information as to the crops and when the next fruit will be arriving.

A folder is now being prepared and will be sent to 8,000 fruit retailers from the Great Lakes to the Pacific coast.

The jobbers have all been told about the campaign and are co-operating in every way possible.

When an awkward man lends a hand he is apt to put his foot in it.

CROP CONDITIONS COMING UP TO EXPECTATIONS OF GROWERS THROUGHOUT OKANAGAN VALLEY

MISSIONARY GIVES INTERESTING TALK

West China School Principal Visited Summerland Last Week.

A most interesting meeting was held in St. Andrew's Church on Wednesday evening of last week, the main feature of which was an address by Miss Florence Jack, of West China.

Miss Jack is principal of a girls' boarding school at Tzelintzing, a school built and supported by the Canadian Methodist Women's Missionary Society. Miss Jack is taking a year's furlough and is spending a part of that time visiting the different missionary societies in the province and speaking in the interests of her work.

In her splendid talk on Wednesday evening, Miss Jack gave a very vivid description of the journey of two thousand miles inland from Shanghai which must be accomplished before the mission station is reached. Eighteen hundred of this is up the Yang Tse river, the remainder by sedan chair.

She told of some of the difficulties encountered in mastering the Chinese language. Sometimes these are rather annoying, sometimes very amusing.

She spoke at length on the manners and customs of the Chinese people, and of her own work amongst them, stating that the difficulty lies, not in arousing the interest of the people and in obtaining pupils, but in the supplying of teachers and schools adequate to the need.

Miss Jack carries with her a number of Chinese curios and specimens of handiwork which she exhibits.

Special music was rendered by the St. Andrew's choir, which was much appreciated, and refreshments were served by the West Summerland Auxiliary.

EMIGRANTS' HOME AT SOUTHAMPTON

Montreal.—The North Atlantic shipping companies, including the White Star, Cunard and Canadian Pacific lines are establishing a large emigrants' home which will be capable of accommodating 2,080 people at the port of Southampton. Two big aerodromes and other buildings that were used for war purposes a few miles outside the port are being converted for this purpose, and will be known as Atlantic Park. The aerodromes will become dormitories and dining hall whilst ample bathing, washing and other facilities will be provided. The establishment will be under the direction of a man of wide experience in emigration with a capable staff of interpreters, matrons, medical men and nurses.

MANY B. C. APPLES TO BE SHIPPED FROM BOSTON

Large shipments of British Columbia apples will be made through the port of Boston this fall, according to E. M. Haggerty, freight traffic manager of the Cunard Steamship Line at Boston, who recently visited this province.

Shipment of fruit through the port of Boston is facilitated by the modern sheds in which the temperature can be regulated at all times. The apple shipment last fall was a record breaking one.

STRAWBERRY CROP WAS RECORD ONE.

Victoria, B.C.—The excellency and volume of the provincial strawberry crop has made a much larger quantity available for export to the prairie provinces this year. Whereas in 1920 only twelve cars of this fruit were shipped to the prairies, twelve have already been shipped this year with the expectation of another thirty cars before the end of the season. The cars contain from 800 to 1,000 crates each.

A woman never makes a fool of a man. She merely tells him he is a wonder and lets Nature take its course.

With Cherries About Out of the Way Growers Turn to Other Fruits.

APRICOTS COMING ON

Warm Weather Past Week Bringing Yellow Transparent Apples in Evidence—Blackberries and Dewberries Promise Well—All Varieties Excellent.

Fruit crop conditions continue good throughout the Okanagan, according to the weekly report of the district horticulturist issued last Saturday. The report follows:

Vernon. The weather during the past week has been quite hot and bright. This has had more or less effect in checking up the rank growth in the orchards. There are now very few instances of running blight, the hot weather having proved beneficial in checking up this disease.

The cherry crop is about finished. There will be a few shipments for possibly another week. The quality of the fruit which has been shipped of the later varieties of the sweets leaves little to be desired. The tonnage for the valley as far as can be ascertained at the present, will run fairly close to the estimate as given out in last week's report.

Apricots are beginning to move freely from the south end of the valley and the Yellow Transparent apple is in evidence. We expect to see Duchesse moving by the first week in August and from then on the different varieties are beginning to move out steadily.

Peach plums will be moving this coming week. Strawberries are now a thing of the past and raspberries are in full swing. From observation there appears to be a generous crop of fruit.

Black currants have been quite good and the blackberries and dewberries give promise of a good crop, if we have no excessive heat to interfere. Haying and harvesting is general throughout the district, the second crop of alfalfa in some places being out. The grain fields of the district show what appears to be a heavy yield.

All truck crops are doing exceedingly well and many vegetables are moving out.

Kelowna. The weather has been exceedingly warm in this district during the past week. The cherry crop is finishing up and from reports has passed the estimate given a few weeks ago. All varieties have been of excellent quality especially the Bings and Lamberts.

Apples and pears are sizing up well. Yellow Transparent apples will be moving in a few days.

Hot house tomatoes are moving in quantity and semi-ripe (outdoors), are expected to be in during the next few days. All other ground crops are coming along fast.

Haying is almost over and the crop is good. Second cutting of alfalfa will commence in a few days.

Summerland. Conditions are similar to last week. The weather has turned very hot which is ripening up apricots and tomatoes fairly well.

The cherry season is about over. Lambert and Olivet picking should be about finished this week. Apricot picking will be general next week.

Yellow Transparent apple picking should commence next week. Sneeds and Alexander peaches are being shipped in small lots.

Penticton and Keremeos. The general outlook for this season's crop in the Keremeos district is very favorable. Apricots and a few early peaches are coming in.

Tomatoes are beginning to ripen. Potatoes in most cases are looking well.

The Penticton district generally is looking well and the early promise of a good crop of apples, pears and apricots still holds.

Early peaches are moving in small quantities. Tomatoes and apricots are coming in from Osoyoos in small quantities.

The Summerland Review

Established August, 1908

Published at Summerland, B.C., every Friday by
THE REVIEW PUBLISHING COMPANY, LIMITED
Ralph E. White, Editor and Manager

An independent family newspaper covering Peachland, Summerland and Naramata and adjacent districts.

Subscription Rates—In British Empire, in advance, \$2.50 per year; six months, \$1.40. To U.S.A. and other countries, \$3.00 per year.

Advertising Rate Cards and information respecting territory and samples of paper mailed upon request, or may be seen at the office of any advertising agency recognized by the Canadian Press Association.

Advertisers must have copy in by Wednesday noon in order to insure changes for standing advertisements. New display advertising copy can be accepted one day later.

Correspondence—Letters addressed to the Editor and intended for publication must be short and legibly written on one side of the paper only. The longer an article, the shorter its chance of insertion. All communications must bear the name of the writer, not necessarily for publication. The publication or rejection of articles is a matter entirely in the discretion of the Editor. No responsibility is assumed by the paper for the opinions expressed by correspondents.

FRIDAY, July 29, 1921

INVASION A DOMINION PROBLEM.

Mr. J. S. Cowper, special correspondent and representative of the Vancouver Daily World, has been covering the Okanagan Valley the past three weeks on his rounds through British Columbia studying and writing up the Oriental situation. From the articles published to date, a reader at all familiar with the Oriental question on the west coast will recognize in Mr. Cowper's writings a wonderful opportunity to bring attention to the world of a rapidly growing menace in this province, a menace, the magnitude of which few people of the east realize, and a fear is entertained that the eastern residents of the Dominion will fail to awaken to this western peril until too late, as was the case in the United States.

For years the people of California pleaded with their eastern brothers to aid them in their efforts to check the advance guards of the Oriental into their states. In vain did they denounce the inaction of the officials at Washington. At last there came a day when official Washington, too, awoke to the realization of the stern fact that the white families of California were rapidly being replaced by Japanese; that schools were abandoned in many localities; churches closed, and entire communities deserted by the white man and controlled by the childless and family-less Japanese.

The same situation is facing British Columbia, but few outside the districts in which the Oriental organizations are operating know or recognize that the same forces are at work here as in the States to the south. When the white people of California appealed to the officials at Washington they were told to go back to their homes and leave such matters to the government, or in other words, to mind their own business. The result of such curt dismissal was that the appellants simply deserted their farms to the Oriental, who, with a smile in his sleeve, had been awaiting just such a development. The white man prides himself on his astuteness, but if he took the trouble to investigate he would find that the Oriental far excelled him in this direction, and that the Japanese and others realize the situation even better than we do, and a cleavage between the eastern peoples and the western provinces is what they confidently hope and look for.

The World, through Mr. Cowper, should receive the admiration of British Columbia residents for the public and fearless way in which they are placing the facts as to the Oriental menace before the people, and it is to be hoped that by this means a fire has been started which shall increase in volume and never die until this question has been finally and fully consummated. Vigorous representation must be made in the right quarter accompanied by insistent protest until those who are able shall be forced to deal with the situation, otherwise it is possible that regrettable drastic remedies may be used by those who are menaced by this insidious invasion.

THE MINISTER'S VISIT.

The visit of Dr. King, Minister of Public Works, to Summerland on Monday to confer with the people concerned in the repair of the Lake Shore road, and to personally assure himself of the feasibility of maintaining the project, has been attended with gratifying results.

No one who has once travelled the winding scenic road along the celebrated Okanagan Lake can have two minds as to its beauty and value as an ideal route through the interior of British Columbia, and the decision of the Minister of Public Works in the matter at once settles a question over which there might have been quite a controversy but for his timely visit.

We hope that all the available resources of the government will be used to speedily improve the chosen route, and make it an added attraction to incoming tourists and settlers.

Marriage is the most sacred institution ever established on earth, making the father, mother and child a veritable Holy Trinity, but it is rapidly degenerating in some of the Southern States, if one can judge by the published records of the decreased matrimony and the increase of divorce. It more resembles an unclean humbug, in which greed, instead of God is recognized and modern gall is high priest. Too many now consider their fortunes rather than their affections, acquiring husband or wife much as they would a poodle, and getting rid of them with about as little compunction.

President Harding has chosen a very opportune time for a disarmament conference. A time when all is peace and quiet. Nobody fighting except the Bolsheviks, Finns, Letts, Croats, Italians, Jugo-Slavs, Czechoslovaks, German-Austrians, Poles, Bavarians, Soviets, Hungarian revolutionists, Siberians, Lithuanians, Ukrainians, the Irish and Mexicans, and Japan trying her darndest to build a navy that will whip the rest of the world.

Discovery recently of a large body of high grade asbestos some twenty miles south of Revelstoke, on the Arrow Lake branch of the C. P. R., may mean much to this province. The mineral is said to be very similar to the asbestos of Quebec, which province has been the headquarters of the asbestos industry in Canada.

Peachland Doings

A Weekly Chronicle Furnished By Our Local Representative.

Mr. M. N. Morrison returned on Thursday after a short visit to the Coast.

Mr. W. L. Williams has been appointed fire ranger for this district. He returned this week after fighting a fire down in the vicinity of Oliver.

The Misses Alice and Ruby Cousins were visitors to Kelowna on Friday.

Mrs. Hayward returned to Naramata on Friday after a short visit in town with her daughters, Mrs. J. Wright and Mrs. J. L. Elliott.

A meeting of the National Liberal Conservative Association of Peachland was held on Friday evening for the purpose of electing officers for another year. Mr. McKelvie, M.P., was present and addressed the meeting for a few minutes, dealing with Federal matters. Owing to the fact that those present thought the meeting not a fully representative one it was decided to postpone the election till a future date and Dr. Buchanan, the present secretary, was delegated to get into personal touch with the leading Liberals in the place and try and arrange for a gathering together of the interested parties and elect a representative board of officers.

Mr. J. Hyde, Mr. Fawcett and Mrs. Hohensee were visitors to Kelowna on Friday, the latter remaining over and returning on the Saturday evening boat.

Miss M. Smith returned on Saturday evening from Kelowna, where she has been in the hospital undergoing an operation.

Mr. Mangin spent the week-end in Summerland, returning home on Monday morning.

Wm. Buchanan, Jr., was a week-end visitor to his home in Trepanier.

Mrs. J. Fleming, of Princeton, B.C., spent a few days of last week visiting old friends and acquaintances in town, leaving on the Saturday evening boat to return to her home.

Mrs. E. House was a passenger south Saturday evening for a short visit with friends in Summerland.

Miss Maud Kincaid, of Kelowna, arrived on Wednesday evening of last week, to spend a portion of the vacation at the home of Mr. and Mrs. A. D. Ferguson.

Mrs. Arthur Henderson, with her young son arrived home from Kelowna on Wednesday evening of last week.

Mr. and Mrs. Edgcombe, with their daughters Gladys and Brenda, went to Vernon on Thursday morning for a short visit.

Mr. Lee, representing the Dominion Express Company, paid an official visit to town on Thursday in the interests of the company.

Miss Jack, a W. M. S. Missionary, on furlough to Canada from Western China, where she has been laboring for a number of years, addressed a gathering in the Methodist church on Thursday evening. There was a fair turnout and Miss Jack gave a very interesting talk, explaining the work being done in that portion of the mission fields, and at the close exhibited a number of curios which she had brought back with her and as well some exercise books showing the work of the pupils in her school there and also some pictures of the educational buildings of the mission.

Motorists who utilize the road between here and Summerland are expressing pleasure at the suggestion of getting back over the old Lake Shore route. Since last mid-week a number of cars have used the road and the drivers pronounce it, even in its much-wrecked state, to be better than the bench road in its present condition.

The Union Sunday school held their annual picnic on Thursday afternoon at Deep Creek. There was a large attendance and all spent a very enjoyable afternoon. There were sports for the boys and the girls both young and old and the usual portion of the afternoon's program at which all hands do their bit, the refreshments which were bountiful and good.

Mr. Janett, of Calgary, is a guest of Mr. H. H. Thompson.

Our early vegetable producer, Mr. H. H. Thompson, put some produce on the market pretty early this year as shown by the following dates: Picked the first ripe tomatoes for the table, June 25th; shipped the first, July 11th, while he shipped the first cucumbers, July 7th.

Peachland growers have a great deal to be thankful for this year in connection with the irrigation supply. There has been ample supply to give each and all a good supply till

well on in the season before having to shut down two days and even then the supply has been very satisfactory considering the heat and dryness of the soil. Only last week were they obliged to make the first demand of the supply at the dam, and that only the south fork. When we hear of the scarcity of irrigation supply in other places and realize that our crops are pretty well assured as far as water is concerned it helps to make it easier to bear the extreme expense of a satisfactory water system.

Mrs. Lane (nee Miss Elsie White) is here from the coast to visit her mother, Mrs. D. J. White and the family.

After a pleasant visit in town, guests at the home of Mr. and Mrs. R. J. Hogg, Mr. Smellie, of Shoal Lake, Man., and a brother from Ontario, left on Monday of last week.

Miss Amy Winger returned Monday evening after a short visit up the lake.

Mrs. Fletcher and her daughter, Mrs. Page of Gladstone, Man., were last week guests of Mr. and Mrs. S. H. Murdin, Gladstone acquaintances of former years.

Mr. A. J. MacKenzie was a passen-

ger to Penticton on Monday evening, returning Wednesday morning.

Mr. Heighway returned home from the south settlement on Wednesday.

Mrs. E. Atkins returned Tuesday evening after a day or two in Vernon.

Mrs. J. Winger and Mrs. Adams paid an over-night visit to Summerland on Tuesday of last week.

The postponed citizens' meeting was held in the Municipal Hall on Monday evening to discuss the advisability of holding a fall fair here this year. Those present were in favor of taking action and a committee was appointed to organize and arrange for the fair to be held in conjunction with the Women's Institute Flower show, on October 6th. The meeting requested the committee appointed to consider the advisability of forming an organization to manage this and other shows which may be held in the future. The committee was as follows: Dr. Buchanan, Mr. H. Hardy and Mr. R. J. Hogg.

Kamloops, B.C.—A government seaplane will be stationed here during the present summer to assist the federal and provincial forest service in combating fires in this district.

NEW ENGLAND CONSERVATORY OF MUSIC.

Boston, Mass.

Haines Bros.

Gentlemen: After our initial order for 30 Haines Bros. Pianos placed with you in 1909 we purchased additional pianos from you in 1910 and 1914.

All of these pianos have given excellent satisfaction in every respect, although subject to an average of six to eight hours of practice daily for forty weeks each year.

Yours very truly,
RALF L. FLANDERS,
General Manager.

T. G. Wanless, Penticton, is local agent for these famous pianos. Buy for cash and save big money. 51-2

CO-OPERATIVE SELLING OF APPLES IN N. S.

Halifax, N.S.—The United Fruit Companies of Nova Scotia, which controls 40 per cent. of the apple shipping of the province, has just issued their ninth annual report which shows the turnover for the past year to have been \$3,292,550, the largest in the history of the company. The average price per barrel packed of all grades was \$3.85.

An Announcement of Special Interest to Every Motor Owner of Summerland and Surrounding Districts

Messrs B. J. PECKHAM and J. CRAWFORD, late of Vancouver, wish to announce to the people of Summerland and the South Okanagan country generally, that they have taken over the business of the

SUMMERLAND GARAGE

which business they will continue under the same name.

A Full Line of Accessories, Oils and Gases will be carried.

MR. PECKHAM is already well-known to many motorists of the Okanagan, having been travelling mechanic with the Giant Truck Company for over two years.

MR. CRAWFORD has been for the past three years foreman of the workshops of the Giant Motor Company, before which he was with the Dodge and the McLaughlin concerns.

Associated with them they will have two other first-class mechanics and are in a position to

Absolutely Guarantee First-Class Workmanship

Consult this firm of mechanics, each a specialist in his own line, when you think your Car or Truck requires attention.

When The Awakening Comes

Third Instalment of a Series of Articles by
A NEWCOMER

In last week's article we endeavored to point out the good road of today is a neighborly thing, a means of communication between friends and communities, of bringing in supplies to remote localities, of marketing products in the least time and at a lower cost. We hope to point out in this article that good roads can be made to pay their own way and in communities such as this in which we live will become a cash asset, a dividend paying investment from still another angle.

The lure of a good road is a mighty thing today. It appeals to many millions of people who can ride in their own cars. The good road to the autoist is what a promising pool is to the fisherman, it lures him to his favorite sport as inevitably as a magnet. When to the lure of a good road is added a longing for out doors, fresh air, majestic scenery, the coolness of the lake front, camp sites and bathing beaches, we have a magnet that will draw people from their homes in eastern provinces and states across the line, and when here they will distribute a part of their wealth along the roadway.

Western Oregon, Washington and British Columbia have more to offer the tourist than any other section of the continent in the way of scenery and climate, and when the people awaken to the realization of the importance of providing good roads and giving a little publicity to the community the tourists will come. Each community must look to its own people to bring to the attention of travelers the advantage and pleasure of visits to their favored locality. Just "come and see" is not sufficient. There must be detailed "whys and wherefores" set forth, and friends, it will take a lot of careful study and work to do these things and do them right, but the returns will prove as interesting for us as they have in other localities where the system has been tried out.

For the benefit of the Doubting Thomases, we will give an instance which has recently been called to our attention, showing how one small city finds the returns come in. Five years ago there was very little tourist travel into the city of Walla Walla, Washington. At that time a Tourist Association was organized and affiliation made with the Northwest Association. It may be well to point out first, that when the local association was organized there were many Doubting Thomases there who declared that the interior cities and districts, devoted to farming and fruit growing, would receive very little benefit from operations of a tourist association. Following is the heading appearing on the front page of the Walla Walla Bulletin on August 7th, 1919: "Motor Tourists Leaving \$50,000 a Month in City. Figures Based on Federal Statistics, Auto Travel is Steadily Increasing." And from the body of the article we take the following: "About eleven families liked the city so well that they stayed and will make their permanent home here. Several brand new automobiles and one big motor truck were sold to tourists through here in July."

Here is a concrete example of the thing in a nut shell. If Summerland and the Okanagan had nothing more than Walla Walla had to offer the visiting tourist there would still be plenty of proof in that one article, above quoted, to justify intelligent expenditures or road money in this locality. Walla Walla is a very pretty little city. Its streets are paved and both sides lined with beautiful maple, whose friendly branches spread nearly to the centre of the streets and driveways, affording a great canopy of shade over the streets of the city. But who wants to go to a city for an outing these days? From the cities is where a great portion of the tourists come and they want the fresh air of the country roadside. They are searching for camp sites on the shores of friendly lakes, where they may dip water from the cool, pure mountain streams and return to their homes with a new life brought about by close contact with nature, and these are some of the things we have to offer tourists that no city in the interior or central states or provinces have or ever can have to offer.

Then it is evident that we, of the Okanagan, with every natural advantage at hand must turn our attention to building good roads and internationally advertising our wares, if we are to come into our own. This we will do, and more, when the people awaken to the possibilities. It is the combination of good roads and publicity that is going to make the Okanagan Valley famous, not only as a paradise for motorists, but as a territory rich in natural resources, possessing the most equable climate on the continent, offering the most delightful attractions and advantages to homeseekers and new residents.

Next week we propose to give a few pertinent points on "How to Treat and Welcome Strangers." There is a definite relation between inviting strangers into our midst and their treatment after they get here. In the coming article I propose to treat the subject from the point of view gathered since my arrival in Summerland in my own case and other newcomers with whom I have come in contact.

C. B. McCALLUM, Manager

Boy Scout Column

1st SUMMERLAND TROOP B. P. SCOUTS
Headquarters, The Gymnasium.
Scoutmaster O. F. Zimmerman
Meets every Friday evening at 7.30 p.m.

Perhaps the most interesting evening of the year was spent Friday by the local troop a paper chase being the order of the day. P. L. R. White, second Kenneth Walden and the A. S. M. were the hares and each provided with two haversacks of "scent" left the hall at 7.30. By laying numerous false trails through the bush the hares increased their ten minutes' lead to twenty while the hounds were chasing along every trail but the right one. Ronald lead a false trail unconsciously past a hornet's nest. Evidently they did not mind a sole trespasser, but when some thirty others trotted along the trail they became rather excited—and they also took the trail. Considerable excitement reigned among the boys for several minutes as each became registered its protest. Consequently the hounds pursued the trail with added zest, as many were planning revenge on the trail makers. However, after following the trail (and numerous others) across Jones' Flat, around West Summerland and then as far as the Gym, the light failing the hounds lost the scent so the hares were victors. Next Friday they will be given another chance to redeem themselves.

At Cubmaster Sharp's request those boys desirous of joining the Cub movement are asked to be present at the Scouts' test meeting on Tuesday, August 2nd, at 7 p.m., when an outline of the work will be given and the boys will also have a chance to see the Scouts at work on the different tests. After this night the Cubs will meet on a different date from the Scouts, although three junior Scouts will at present act as sixers until the recruits can show their ability. Each prospective cub must present a certificate as follows on Tuesday, otherwise enrollment will be refused.

Application for Membership.
I hereby apply for membership in the Summerland Pack of the Wolf Cubs' Association and agree to be guided by the rules of the Pack and to do my best to keep the Wolf Cub law.

Signed _____
Residence _____ Phone _____
Church connection _____

I hereby certify that _____ was born on _____ 190____
I have read the Wolf Cub law and promise and am willing and desirous that he become a member of the Summerland Pack, and I will assist him in observing the rules of the association.
I also certify he is in good health and physical condition (except _____)

Signed (Parent or Guardian)
The following Scouts have successfully completed the requirements for the King's Scout badge, having had their maps for the Pathfinders badge passed last week: Patrol Leaders, Ronald White, Jack Harris, Colin Chisholm, Ivor Harris, Second Ralph Purves, Troop Leader Gordon Blewett and A. L. M. Tees.

We are delighted to hear that our Scout Master, Mr. Zimmerman, has been appointed to the Provincial Council of the Boy Scouts' Association. He, with S. M. Wadell, of Kelowna, are the only two members elected from the interior, so the honor conferred is certainly an appreciation of the work being done.

The following excerpt from the Daily Province gives the new executive, and will be of interest to local Scouts: Brig-General Victor Odium has been chosen president of the British Columbia Council of the Canadian Boy Scouts' Association. Mr. Ross Sutherland, of Victoria, has been named provincial commissioner and His Honor Lieutenant-Governor W. C. Nichol has consented to become patron of the new organization.

Announcement of the names, together with the other members of the recently constituted provincial council was made by Dr. J. W. Robertson, chief commissioner on the Canadian general council of the association, who has been spending several weeks in the West in connection with reorganization of the scout movement and with Red Cross matters. The full provincial council announced by the Dominion commissioner is as follows:

Brig-General Odium, Ross Sutherland, Victoria; R. P. Ray, New Westminster; E. C. Weddell, Kelowna; L. W. Masters and G. E. Evans, Vancouver; O. F. Zimmerman, Summerland; Col. J. A. Hall and Rev. T. R. Henegage, Victoria; Col. W. D. S. Korison, Col. F. W. Foster and Col. L. Cook, Vancouver; H. H. Rolley and H. Scarrett, Victoria; and C. Plowden, Vancouver. The election of vice-president and honorary secretary was deferred until the next meeting of the council.

It was explained by Dr. Robertson that immediately the council was appointed it met in accordance with the constitution of the association to make recommendations to His Excellency the Governor-General, who is chief scout for Canada, for patron, provincial commissioner, etc. This had now been done and the council is in a position to actively pursue its work.

The chief commissioner is much impressed with the outlook for the association's work in this province and is confident, in view of the officers now appointed, that its membership will very materially increase in the near future.

The troop wishes to acknowledge with thanks the kind donation of \$5 from Mrs. Wright. The gift is very much appreciated.

We are wondering if the person who for the past two weeks has removed our globes from the Ellison Hall, really needs them worse than the Scouts do. If so we will willingly give them, hard up as we are, though it would have been nicer to have asked. If not, we wonder if he would return them, if only for Tuesday and Friday nights, as finances will not permit of any further purchase and nights are drawing in.

Example of a perfect will: "I give all that I have to my wife." This is also an example of a perfect domestic policy.

PASSING EVENTS
LOCAL, PERSONAL, SOCIAL & OTHERWISE

Mr. J. Crawford, of the Summerland garage, was a business visitor to Vancouver this week.

Mr. and Mrs. J. Tait and Mr. and Mrs. F. J. Nixon motored to Vernon on Wednesday, the men to attend the irrigation convention.

Mr. J. R. Campbell suffered a sprained ankle a few days ago which prevented his representing the Board of Trade at the irrigation convention.

While driving her car down the hill from her home Miss Sinclair, early this week, had the unpleasant experience of having the car turn over on its side. Losing control, she turned it toward the inner edge of the road when the wheels of one side ran up the bank and overbalanced the car. Fortunately Miss Sinclair escaped with only minor injuries.

Mr. John Gayton and daughter, Anna, of Santa Cruz, Calif., left on Thursday morning to return south after a brief visit here with his brother, Mr. C. H. Gayton. They were accompanied by Mrs. Jones, Mr. Gayton's sister, a resident of Boston, who has been here at the Gayton home since Christmas. Mrs. Jones will go from Vancouver to New York.

The Department of the Attorney-General has sanctioned the increase in salary to Magistrate Hutton, recommended by the municipal council. The magistrate has already tendered his resignation to the department chiefly, we understand, on the question of salary. He will meet the council at an early date to discuss the situation.

The Rev. Jas. Dunlop returned last week from a vacation visit to the Coast. He occupied the pulpit at both services in the Baptist church last Sunday.

Mr. and Mrs. J. L. Logie and son, Edmond, Mr. and Mrs. K. S. Hogg and family, and Mr. and Mrs. Campbell Robinson, made up a motoring party in two cars which left here on Monday morning to visit Portland, Ore., and other coast cities.

About 35 or 40 members of the Y. P. S. of the Baptist church had a delightful outing at Miller's Point on Monday evening, having chartered the Skookum. Round a camp fire refreshments and ice cream were served by the ladies of the party, and bathing, of course, was indulged in. It was after midnight when the party returned to the government wharf.

By campers leaving a camp fire burning at Miller's Point on Sunday, Mr. Miller was put to considerable work in extinguishing a fire which had grown to be a menace to the grove near his house.

Rev. C. H. Daly, a former pastor of St. Andrew's church, arrived in Summerland on Wednesday from Ladner, accompanied by his wife and family. Rev. W. A. Alexander, the present pastor, and Mrs. Alexander, have gone down to the Coast, and will spend his vacation at Ladner. Mr. Daly will occupy the pulpit at the local church and Mr. Alexander in the Ladner church during the Sundays of their vacation periods.

Mr. W. E. Matthews and son and daughter, Samuel and Dorothy, of Hull, Que., were visitors here for a day at the home of Mr. and Mrs. Geo. I. Gray. They were on their way from California to Hull, where Mr. Matthews is prominently connected with the meat packing industry.

Through the prompt response to the call given by Mr. G. I. Gray, the fire in his neighborhood last week was quickly extinguished. Mr. Gray is very grateful to the citizens who came to his assistance.

Mr. R. Johnston, who visited the head waters of Trout Creek lately, reports that the tools stored in the municipal cabin beside the reservoir there, have all been stolen. These tools included cross-cut saws, axes, shovels, etc. Even the dishes were removed. These tools are very necessary, of course, and it is a great convenience to have them on the site, and their removal has caused much annoyance.

G. H. Inglis & Co. report the sale of the Thomas Whitfield property to a Mr. Farrow, who has recently arrived here from Vancouver.

The Labor party will conduct an open forum at Crescent Beach every Sunday afternoon at 3.30, during the summer months. Subject next Sunday, "Unemployment, Its Cause and Cure." All are cordially invited.

Mr. W. M. Armstrong, well known in Summerland, has resigned the principalship of Cranbrook High school and accepted an appointment to the staff of the Duke of Connaught High School, New Westminster.

SUMMERLAND WEATHER REPORT

Below is a report furnished by the Dominion Experimental Station here for the week ending Tuesday:

	Max.	Min.	Rain	Wind	S.S.
July 20	78	63	11.3	
July 21	83	51	14.6	
July 22	85	58	12.3	
July 23	83	59	14.4	
July 24	90	59	11.4	
July 25	88	61	12	7.9
July 26	84	56	22	11.0

Naramata News
Current Events of Town and District

Miss Madge Sibbald, who has been spending a week in Naramata, left on Tuesday morning for Enderby, where she will spend some time before returning to Vancouver.

Mr. Moule, who has been a guest at the Syndica Hotel, left Tuesday morning for his home.

Miss Mabel Moule returned last week to Kamloops, after spending a two-week's vacation in Naramata.

Mr. and Mrs. Campbell Robinson left on Monday morning to join Mr. and Mrs. Logie, of Summerland, at Penticton, from which point they will motor to Portland, U.S.A. After visiting friends in Portland they expect to return by Seattle and perhaps pay a short visit to Vancouver. They will be away about two weeks.

A camping party from Naramata spent last week-end at McCullough, with the avowed intention of luring members of the finny tribe from their accustomed habitat to the fishermen's hook. They report the fish not rising to the bait very freely, but secured a fair number to bring home, nevertheless. The party comprised Captain and Mrs. Languedoc, Miss Lipssett, of Summerland, Mr. Leckie, Mr. Stuart Leckie, Miss Helen Leckie, Mr. and Mrs. Cooper and the Misses Gladys, Dorothy and Marguerite Robinson.

Union building on the lot adjoining the present building, and is progressing rapidly.

Mr. Denis Collard, of Vancouver, is a new-comer in Naramata, and is staying at the Syndica Hotel.

Among those who went down to the open-air dance at the Incola last Saturday were Mr. and Mrs. Duncan and party, Mr. Ira Hughes, Mr. Clarence Crowe and others. Capt. Roe runs a special ferry down to Penticton on most Saturday evenings, and the trip is a very enjoyable one during the hot weather.

The Unity Club was the scene of a community picnic last Thursday evening, when most of Naramata turned out to enjoy the pleasant coolness of the shade near the club-house and the excellent supper provided by the ladies. Ice cream and lemonade were on sale and freely patronized, and there were foot races for the small girls and boys.

An event which is arousing much pleasurable anticipation in the district is the garden social to be held on Mr. J. M. Robinson's grounds on August 18th, under the auspices of the Women's Institute. The Salvation Army Citadel band, which is touring the Okanagan, has been secured as the chief attraction and will put on a varied programme. In addition there will be other attractions and home-made candy, ice cream and other hot weather delicacies will be for sale. Special ferries will be run from Summerland and Penticton, and it is understood that the price of tickets in those places will include the cost of ferry. Attractive posters are now advertising the event in these towns and there is every indication that there will be a banner attendance and a good time for all.

It is learned from a creditable source that Mr. Lincoln Baker, principal of the Naramata Superior school, will not be back next term, Mr. Baker having accepted a more lucrative position in the Cranbrook High school.

Theatre-goers are looking forward to the appearance of "The Bait," a Maurice Tournier production, starring Hope Hampton, which will be

seen at the Rialto on Saturday night. It is an admirably produced photoplay, full of thrills and heart appeal. The supporting company is of the finest class. The picture has proved a powerful drawing card.

To be shown here as a special, "Help Wanted: Male," a photoplay adapted from the story of Edwina Levin, "Leona Goes a Hunting," will be shown at the Rialto at an early date. The picture registers a laugh in its first few feet of film, and keeps it up to the end.

It is the story of the amusing and entirely unexpected adventures that befell a small town telephone operator who wanted a rich husband badly enough to spend a thousand dollar legacy (all she had) in an effort to get him.

Bootleggers, thieves, millionaires, aviators, motorboats and hydroplanes play important and conspicuous parts in this comedy riot.

INTERESTING REPORT ON CROPS SENT OUT BY BANK OF MONTREAL

Crop Conditions Throughout Canada Were Treated in a Brief Synopsis of Telegraphic Reports Gathered From All Sections and Issued from the Head Office on July 21st.

Below will be found a brief synopsis of telegraphic reports received at the head office of the Bank of Montreal from its branches.

Prairie Provinces. Edmonton District.—Sufficient moisture. Wheat practically all headed out.

Calgary District.—Prospects north half district better owing to rains since last report.

Lethbridge District.—All wheat headed. Estimate average yield throughout, twelve bushels.

Saskatoon District.—Wheat and oats doing well and former nearly all headed.

Winnipeg District.—While crops have suffered slightly from heat there have been beneficial showers.

Province of Quebec. Indications point to a light crop. Hay probably 50 per cent. of the normal.

Province of Ontario. The prolonged dry weather has checked growth and only moderate crops are now expected.

large percentage of crops. Cutting and threshing of wheat is now in full progress. While in some localities, notably around Guelph and Paris, returns of over forty bushels per acre are reported.

Maritime Provinces. Crops generally are still greatly in need of moisture although recent rains have improved prospects.

Province of British Columbia. Hay cutting nearly completion. Crop heavy throughout.

THERE IS ONE FUNDAMENTAL THAT MAKES MUSIC. With this there is music in a monotone. Without it even melody can be mere noise.

Westbank Notes

A large crowd of picnickers again gathered at the lake on Saturday afternoon. Many interesting sports were had, such as swimming, diving, boxing, etc.

Scout Frank Jones, of the Eagle Patrol here, saved a child, Saturday afternoon, from a watery grave. It seems that Master G. Bell was fishing from the end of the wharf and fell in.

Mr. S. T. Elliott was here on Monday canvassing for the Kelowna Agricultural Society. He succeeded in securing about thirty members.

Mr. Griffin is now the owner of a fine new Briscoe car.

At the scout meetings last Sunday the scouts were greatly disappointed that their scout master, Mr. C.

Synopsis of Land Act Amendments

Minimum price of first-class land reduced to \$5 an acre; second-class to \$2.50 an acre.

Records will be granted covering only land suitable for agricultural purposes and which is non-timber land.

Partnership pre-emptions abolished but parties of not more than four may arrange for adjacent pre-emptions with joint residence, but each making necessary improvements on respective claims.

Pre-emptors must occupy claims for five years and make improvements to value of \$10 per acre, including clearing and cultivation of at least 5 acres before receiving Crown Grant.

Where pre-emptor in occupation not less than 3 years, and has made proportionate improvements, he may, because of ill-health, or other cause, be granted intermediate certificate of improvement and transfer his claim.

Records without permanent residence may be issued, provided applicant makes improvements to extent of \$300 per annum and records same each year.

Unsurveyed areas, not exceeding 20 acres, may be leased as homesteads; title to be obtained after fulfilling residential and improvement conditions.

For grazing and industrial purposes areas exceeding 640 acres may be leased by one person or company.

Mill, factory or industrial sites on timber land not exceeding 40 acres may be purchased; conditions include payment of stumpage.

Natural hay meadows inaccessible by existing roads may be purchased conditional upon construction of a road to them.

PRE-EMPTORS' FREE GRANTS ACT The scope of this Act is enlarged to include all persons joining and serving with His Majesty's Forces.

Interest on agreements to purchase town or city lots held by members of Allied Forces, or dependents, acquired direct or indirect, remitted from enlistment to March 31, 1920.

SUB-PURCHASERS OF CROWN LANDS Provision made for issuance of Crown grants to sub-purchasers of Crown Lands, acquiring rights from purchasers who failed to complete purchase, involving forfeiture, on fulfillment of conditions of purchase, interest and taxes.

GRAZING— Grazing Act, 1919, for systematic development of livestock industry provides for grazing districts and range administration under Commissioner.
