## BREAK IN DAM WAS OCCASION OF MUCH ALARM

### Concrete Surface of Spillway Gave Way, Swelling Creek WAS RE-INFORCED

### Tons of Rock, Brush and Sand Bags Soon Made all Safe, Saving Water

Reports from the upper Garnett valley that the storage dam there was in danger of breaking, and urgent calls for immediate help were received early Saturday morning by Municipal Clerk Nixon, who spread the alarm, and soon there were many carloads of men with tools speeding up the valley intent on saving the dam. Quick work under the direction of Foreman Tomlin removed immediate danger, and by noon Mr. Tomlin was satisfied that the dam was safe.

A large volume of water is held in reserve at that point by a recently constructed dam. This water serves Garnett Valley and Jones' flat and other sections during the period when stored water is necessary for irrigation. The dam is of earthen construction with a reinforced concrete core or wall running through it from bank to bank. Provision for an overflow is made at a spillway against the western bank which is of a rocky nature. A wall of concrete extends up and down the course of the water on each side of the concrete core. From the upper end of this wall and reaching across to a concrete pier against the rocky cliff on the opposite side of the spillway, planks are put in on edge to retain the water. It was at the floor of this spillway under the plank next to the wall mentioned above that the break occurred, and the water came bubbling up with great force from under the corner of the wall and planking.

The marked increase in the flow of the creek was noted by Mr. Randall, who reported the matter by phone to Foreman Tomlin. With many willing hands Mr. Tomlin quickly had several tons of rock, brush and sandbags piled on the face of the dam above the break, and by noon on Saturday he pronounced the dam secure.

Receiving two alarming calls early in the afternoon on Saturday, and not being able to locate the foreman, the reve availed himself of the offer of Engineer Robertson, in charge of construction at the storage plant, to give what assistance he could. Accordingly Mr. Robertson, the reve and Chairman Kirk of the water committee visited the dam, and a careful study of the situation was made, with the result that they were satisfied that Foreman Tomlin had taken all necessary precautions to prevent any break in the dam. The breast work that had been put in in the morning had settled into a more compact mass and greatly checked the flow of water from the broken spillway, and on Sunday this had been further greatly reduced. On Monday Foreman Tomlin reported that there was practically no more water coming out of the dam than would be let out in the ordinary course of events through the gate. The level of the water in the reservoir had dropped somewhat, and the situation in every way had improved. Instructions were given to take every precaution to save the water from wasting. For several days and nights a careful watch was kept on the dam as a precaution against any possible unfavorable development.

Naturally there were a number of people in Garnett Valley and Peach Orchard as well as in those sections between where a break would have occasioned damage, who were quite uneasy.

Some thirteen or fourteen years ago, a log and earth structure known as the Dunsdon dam, constructed a mile or so down the creek, broke and the escaped water made havoc in its pathway down the course of Aeneas Creek to the shore at Peach Orchard. It is quite natural that those who suffered in that mishap should dread a recurrence.

The actual damage done to the dam is comparatively small, and will probably be easily fixed later in the year when the water is below the level of the spillway.

## High School Exams

Twelve students of the Summerland high school will write on the full matriculation exams which will begin on Friday, June 20th. These students are: Laurence E. Beavis, John R. Denike, Isabel F. H. Davidson, Ruth E. Graham, Alva A. Garnett, Thelma M. Hobbs, Robert M. Hatfield, John W. Hatris, Hugh C. McIlroy, Richard G. Turner and Ronald E. White. James Marshall and W. H. Blanchard Munn will write supplementary examinations each on a subject which he failed last year and if successful will gain full standing.

## Summerland Boys at University

We note that at least three Summerland boys have made good showings in the University exams, the results of which have just been published.

Howell Harris has taken first class honors in feeds and feeding, livestock breeding, biology, economics and analytical chemistry, and passes in horticulture and botany.

Allen Harris won first class honors in qualitative chemistry analysis, quantitative chemical analysis, modern English drama and physical chemistry; second honors in electricity and magnetism and passes in organic chemistry and calculus.

Blanchard Munn took second class honors in chemistry and high passes in physics, English, mathematics and history.

## CENSUS MEN ARE NOW BUSY

### Many Questions to be Answered. Work Started Wednesday

Census enumerators W. C. W. Fosbery and R. Purvis started work Wednesday morning, June 1st on taking the census of the Summerland and Mineola districts. At Peachland J. L. Vicary is the enumerator, and Mrs. M. E. Smith received the appointment for Naramata and J. Painter for Westbank.

The returns must be completed before the end of June. Probably three weeks will be required to complete the work here.

Thirty five questions must be answered regarding each person enumerated in the census of population. The average person will not have to detain the enumerator long. There are forms for special occupations but the population form applies to everybody.

Under the heading "Name and residence" the enumerator will set down the name of the individual and of the town and of the district.

"Tenure and class of home" will require details of whether the home is owned or rented, the monthly rental, the class of home, the material of which it is built, and the number of rooms occupied by the family concerned.

"Personal description" includes a statement of the individual's relationship to the family, sex, conjugal state, the age at last birthday.

The country of birth of both the individual and both parents must be specified.

Details of the individual's race, language, and religion are required. Under "education" the ability to read and write and the months spent at school since September 1st last, must be stated.

Several questions come under the heading "profession, occupation and employment," and provide the only problems of any difficulty. The individual is required to give his chief occupation or trade; to state whether he is an employer, an employee, or is working on his own account; to state his principal product if an employer, his place of employment in general terms if an employee and the nature of his work if working on his own account. To give total earnings since June 1st, 1920; to state if he was out of work on June 1st, 1921, if an employee; to give the number of weeks he was unemployed because of illness.

"SLEEPING SICKNESS" - Morris

## SEEKING NEW HOMES IN THE CANADIAN WEST

A party of British farmers photographed at St. John, N. B., on their way to take up land near Lloydminster, Alberta. They brought with them an aggregate of \$175,000 with which to embark upon their career as citizens of Canada.

## ACCIDENTLY SHOT IN FOOT

### While Playing With a Rifle Young Girl Puts Bullet Through Foot

Nellie, the 13 year old daughter of Mr. and Mrs. D. C. Thompson, is in the hospital suffering from a bullet wound in her foot. Last Saturday just after noon she had gone to a shelf in the back porch of her father's home to get a brush, when something prompted her to take down a .22 rifle which had lain on the shelf for a long time. In laying with the rifle she sent a bullet through the bone of her foot leading to the large toe, puncturing the bone, but not breaking it.

Her first aid lessons in school came in handy just then, and, with presence of mind, Nellie directed operations for stopping the flow of blood from a severed artery. Afterwards she was taken to the hospital where satisfactory recovery is being made.

The rifle is one which has not been used for some time, and it was only after the accident occurred that Mr. Thompson recalled that he had put a shell in the gun for a definite purpose and had not used it. The girl, of course, thought the rifle was empty as was usual.

## DISTRICT PRIZES FOR SUMMERLAND FAIR

At a meeting of the directors of the fall fair held last Friday evening to complete the prize list for this year's fair, it was decided to hold a competition between six different districts in the Summerland area. The following districts were decided on: Prairie Valley, Garnett Valley, Jones' Flat and Crescent Beach area, Trout Creek, Lake Front Benches, and Peach Valley and Paradise Flat. The limits of these districts have been prescribed and any seeking information in this regard may obtain same from Mr. "Jack" Tait, or other members of the directorate.

The prizes will be: 1st, a silver cup and \$50; 2nd, a silver medal and \$30; 3rd, a bronze medal and \$20. These prizes, after having been awarded by the prize committee to the different districts, will be awarded by the people concerned to the grower or growers who helped the district most to get the prize. The prizes are to be awarded to the district making the best display of fruit, vegetables, cereals, field crops and dairy produce.

Another B. C. Industry. An immense deposit of calcium carbonate between Spruce and Aspen Grove is to be developed by a group of Merritt business men. They intend to manufacture kalsomine, razor hone paste, silver polish and other commodities.

## STORAGE BLDG. TO BE READY SEPTEMBER 1

### Tenders Called For Erection of Big New Plant

### THREE STOREYS

### Heavy Foundation Will Soon be Ready. Building to be Hollow Tiles

Tenders for erecting the frost proof storage building of the Summerland Storage Co. have been invited, and these will be opened on Saturday, June 7th. Separate contract was made of the foundation which was awarded to Robertson Partners of Vancouver. This work is now well advanced.

The new building will be 300 feet long, and 64 feet wide. For 115 feet of its length it will be three storeys high, and 185 feet two storeys in height. The walls will be hollow tile and the whole structure will be very substantial.

The contractors will be required to have the building finished by September 1st. It is estimated that the total cost of the structure will be \$60,000.

It is expected that work will be started within the next few days on the extension of the C.P.R. track along the water side of the new building.

The existing building will be used this season for packing soft fruits, after which it will be devoted to shipping and storage, as it is also of frost construction.

Manager J. Lawler is now down across the line looking into the matter of graders, and hopes to make a deal for the purchase of larger and more up-to-the-minute machines.

It is confidently expected that the Union will handle by far the largest output in its history. A recent change at the Union building is the opening of new and commodious offices on the floor above the former office. These have just been furnished and are now occupied.

## SUMMERLAND PUBLICITY

### Should Advertise, Says Citizen Now in England. Review Will Help.

The Review is in receipt of a letter from Mr. J. H. Bowering of this place, who is now in England, that has a very direct bearing on the subject announced for discussion at the last meeting of the Board of Trade, viz: "Advertising Summerland."

Mr. Bowering says in part: "I have just paid a second visit to British Columbia House, 1 Regent Street. Must say I was disappointed to find so little information regarding Summerland district. I asked the official in charge for all the information re the Okanagan, and he gave me a copy of the 1919 report of the Okanagan United Growers, a small pamphlet issued by the Board of Trade, Vernon, and a leaflet from Penticton, which I enclose. Why not something from Summerland district?"

The display of fruits, minerals and fish is good, and I dare say one could get information about any part desired, but as one who knows Summerland, I feel satisfied that people visiting here (British Columbia House) would be more attracted by the district which "advertises itself."

Mr. Bowering stated further that many newspapers in British Columbia were on file in that office but he had not found The Review. Needless to say, we immediately included this with several other copies sent to important libraries and other centers for the purpose of advertising Summerland.

## ANOTHER LINK IN PROV. HIGHWAY

### NELSON, B. C. - With the taking over of the Kuskanook wharf by the Dominion government from the builders, Cogle & Leak, the new Sirdar-Kuskanook link in the trans-provincial highway was officially opened, and automobiles are already using the new link, running the cars direct on the Canadian Pacific Railway steamer for Nelson. Until a special slip is built at Balfour, at the outlet of Kootenay Lake into the west arm, the cars will continue to come through to Nelson. Afterward motorists will have the option of landing at Balfour. An enormous tourist motor traffic is in prospect this season from the prairies and points east.

The coming into use of the new link means that the gap between Creston and Nelson has been bridged, and all of the motor traffic of the trans-provincial highway so far as constructed in the interior of this province, with that also from the connecting international roads, may now flow uninterruptedly across Kootenay Lake.

Help yourself during the week of June 20-25. Buy Made-in-B. C. goods, and not only will you help yourself, but you will also help your neighbor, your town, and your province.

The manufacture of spring clothes pins is to be commenced in a few weeks at Nelson. The Kootenay Capital is also to be the home of a match factory.

Included in this suite of offices are a directors' room, general office, and a private office which will be used by Secretary T. G. Beavis. Lavatory accommodation has also been provided in connection with the new office.

The former offices will be used by Manager Lawler and the shipping staff.

## Womens Institute

At the regular meeting of the Summerland Women's Institute it was decided to hold an exhibition of women's work at the Summerland fall fair which will be held early in November.

Delegates appointed to attend the convention which will be held in Vernon in June were Mrs. F. W. Andrew and Mrs. John Tait.

Mr. J. D. Welsh gave a very inspiring address on child welfare. He dealt with character building, the early influences in both home and school life. Mr. Welsh also emphasized the great necessity of having a new public school building in the community.

## Okanagan Students Are Making Good

There will be many Summerland boys who will remember Christopher Riley, a former student of Okanagan College, whose name appears among the list of graduates at Brandon College, as contained in a recent issue of the Brandon Sun, a copy of which has been received by The Review. Mr. Riley has just completed his B.A. work.

Miss Cordelia Belle Mackay of Westbank received the M. A. degree.

Another former student of the local college whose name has recently appeared in print is that of E. W. Armstrong who has just taken his theological work, and who completed his arts work in McMaster last year. It is reported that Mr. Armstrong will go to India this fall.

## PRAIRIE CROPS TO BE HEAVY

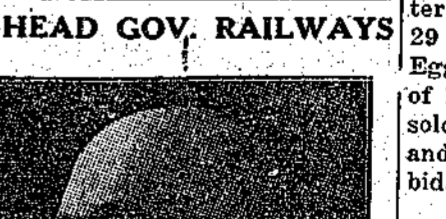

### Ideal Growing Conditions With Abundant Moisture

Crops conditions on the prairies have a direct bearing on the prosperity or otherwise of the fruit grower in the Okanagan. Good crops on the prairies means an assured market for the products of our orchards. Next, therefore, to reports of crop prospects in the local orchards, is there interest for the fruit growers in those of the prairie farmers. That these are excellent is evident from reliable reports from the provinces east of the Rockies.

The first crop report for the season of 1921 issued by the Manitoba Free Press proved a decidedly cheerful document and indeed much more so than was anticipated even by the best posted. The outstanding feature was the fact that wheat acreage so far from being materially reduced is quite as large as last year and possibly even a little larger. Oat acreages will be reduced, but possibly not so much as expected. Barley will be increased, and while flax acreage will be greatly reduced, there is a heavy increase in spring rye and more land than usual will be devoted to forage crops.

After the acreage the most outstanding feature of the report is the uniform abundance of moisture reported and the equally uniform supply of labor at reasonable wage, namely, an average of \$55 per month taking the west as a whole. In regard to moisture districts that have been dry for five years have this year had seeding delayed on account of wet ground. On the

TO HEAD GOV. RAILWAYS

Sir John Flavell, Bart, who it is expected will be chairman of the Canadian National Railway board of directors.

## OPENING UPPER SUMMERLAND-PEACHLAND RD.

### Provincial Road Men Now Working on Bench Road

### A SECOND ROUTE

### Lakeshore Road Badly Damaged. Not Present Intention to Abandon It

Orders were received by Provincial Road Foreman Arkell early this week to reopen the upper or bench road between Summerland and Peachland. This road has not been used except in certain sections for several years, and was abandoned by the provincial authorities when the lake shore drive between the two towns was completed.

The exceptionally high water in Okanagan Lake is playing havoc with the shore road. One man who travels the road frequently and came down over it Wednesday afternoon, said it was the last time for him. He counted twenty six different places in the road where it was broken and unsafe, fifteen of them being between here and Van Hise's.

Mr. Arkell is regrading the old road and putting it in passable shape for through traffic, and expects to have it in condition for use before the end of the week.

When asked as to the government's intentions with respect to the lake shore road, Engineer Gwyer's office informed the revee that it was the intention to keep the upper road open for summer traffic at least. At present there was no thought of abandoning the lake shore drive, but future plans would depend on the condition of the road following a careful inspection.

12th and 13th of May there was heavy frost following the rains, and while this frost undoubtedly hurt wild fruit blossom and some of the vegetables which were up, it had a very healthy effect in checking the hatching of grasshoppers, and while it singed the tops of the wheat in some places it certainly did no harm while the rain which preceded it put an end to the drifting of soil which was occasioning anxiety in some districts, more especially in Saskatchewan, and the amount of reseeding necessary will be small.

The Situation To sum up, the season is late but 95 per cent. of the wheat was in by the 17th of May, which is only seven days later than is what is considered ideal seeding time in the west, namely, up to May 10. It went in on a moist, well worked seed bed, and with anything like normal conditions from now on should do well, and the cool weather means a good root. Furthermore one cold spell is looked for in May in the west and this year it has come and gone at a time when it could do little if any harm so far as grain crops are concerned. Since the frost, weather has warmed up gradually and at time of writing is ideal spring weather with good growth.

So far as the butter market is concerned things are not improving except for the consumer. The price of butter fat at shipping points in the country down to 28 cents, the lowest price since before the war, and Tuesday session of the produce exchange no sales of creamery butter were made. Offerings were at 29 to 30 with bids at 26 to 27.

Eggs were not much better, as out of 1,440 cases offered only 120 cases sold. Current receipts sold at 21 1/2 and "loss off" brought 22 as a best bid.

## SUMMERLAND WEATHER REPORT

Below is a report furnished by the Dominion Experimental Station here for the week ending Tuesday:

Date, 1921	Max.	Min.	Rain	Sn.	Sunshine
May 25	73	57	.....	.....	7.2
May 26	58	39	.....	.....	6.6
May 27	60	45	.....	.....	11.2
May 28	68	36	.....	.....	14.8
May 29	74	40	.....	.....	12.2
May 30	75	48	.....	.....	14.1
May 31	80	50	.....	.....	14.4

Until conditions improve, the B. C. Government Department of Industries will not advance any industrial loans, was the announcement made by Premier Oliver recently.

# The Summerland Review

Established August, 1908

Published at Summerland, B.C. every Friday by THE REVIEW PUBLISHING COMPANY, LIMITED

Ralph E. White, Editor and Manager

Subscription Rates—In British Empire, in advance, \$2.50 per year; six months, \$1.40. To U.S.A. and other countries, \$3.00 per year.

Advertising Rate Cards and information respecting territory and samples of paper mailed upon request, or may be seen at the office of any advertising agency recognized by the Canadian Press Association.

Advertisers must have copy in by Wednesday noon in order to insure changes for standing advertisements. New display advertising copy can be accepted the day later.

Correspondence—Letters addressed to the Editor and intended for publication must be short and legibly written on one side of the paper only.

The longer an article, the shorter its chance of insertion. All communications must bear the name of the writer, not necessarily for publication. The publication or rejection of articles is a matter entirely in the discretion of the Editor. No responsibility is assumed by the paper for the opinions expressed by correspondents.

FRIDAY, JUNE 3, 1921

## THE AMERICAN CALLED STRIKE

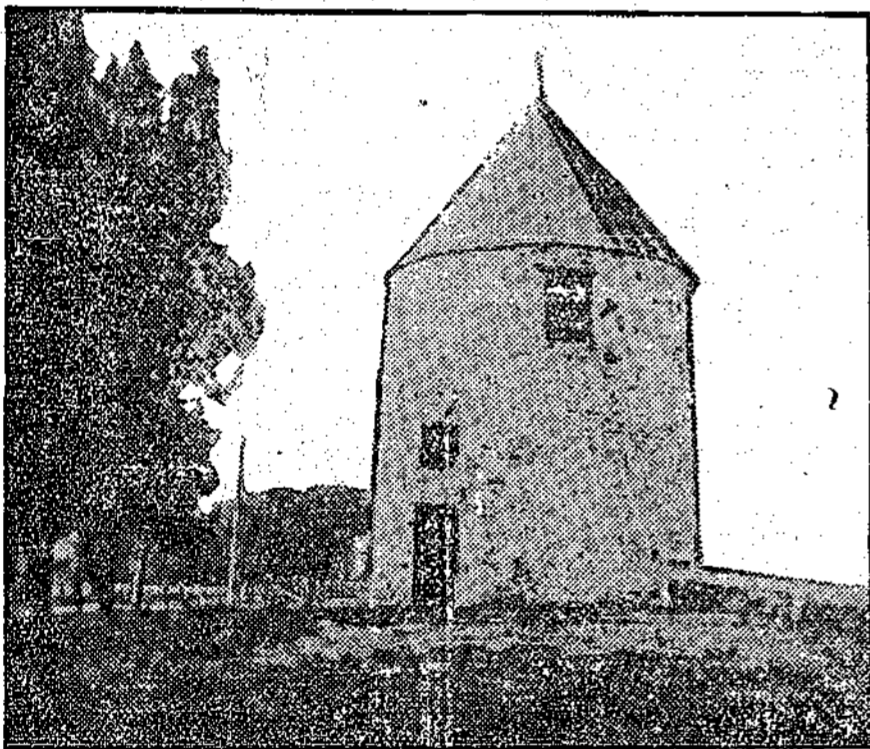

After nearly a month of serious inconvenience and financial loss the publishers of The Review are again running their printing office. For a time an effort was made to carry on with the hope that the former employees would return, and although there were many applications for positions on file, no effort was made at first to fill the vacancies caused by the men being ordered out by the International Union. Later the men were approached by the manager in an effort to effect a settlement, the reply of one man when it was suggested to him that we talk the matter over, was that he did not want any work for the next two months, and then he would want to work only part time. The reply received from the other man on strike was that he had put himself in the hands of the union and was awaiting their instructions. He had been in need of a rest and was able to make good use of the change and time. We advised him that the position could not be held open indefinitely, but that he would be given reasonable time to think the matter over and come in and talk over our proposition. His answer was that he could not come back unless we acceded to the union demands or until he got into touch with the union officials and obtained consent to do otherwise. To both men we made the suggestion that they join the present shareholders and become co-partners. Our latest information would lead us to conclude that the union officials had forgotten this part of British Columbia.

In the meantime one man with whom we had been in correspondence for some months with a view to his acquiring an interest in the business arrived from Alberta, and just as we were on the point of wiring for another, a second man reached town from the boundary country, not knowing there was a strike here. Both men have had much experience, and The Review is now in a position to handle all classes of printing as well as to take care of all advertising that may come in.

## MORE ABOUT OURSELVES

With the object and for the purpose of putting the business in a position to better serve the community, and with certain definite plans in mind that would greatly advertise this portion of the Okanagan, the directors of The Review Publishing Co. Ltd. some months ago decided to increase the capital

## Old Windmills of the Quebec Roadside

By courtesy of the C.P.R.

Landmarks of the Quebec road-sides, everywhere hold one with fascinated interest on account of their connection with the past, and because as a rule they are such as occur nowhere else this side the Atlantic. Shrines, large and small, elaborate and simple, erected by communities, or by some Society or by private persons. Large "Crosses" marking off the miles and cross-roads; and along these roads, at somewhat infrequent intervals, one happens on old mills driven by water-power, or possessed of wind-driven sails, or standing like storm-swept ships at sea when gales have licked away their canvas. The "gales of time" have in many instances made mere "playthings" out of these old mills erected in olden days of the grand seigniors. An especially well-preserved old mill of "the towered wind-mill type" is to be seen on the Varennes road. It arises on the level meadow-lands of the south shore of the St. Lawrence as naturally as its forbears arise on the landscape back in old Normandy. There is an air about this old tower built so solidly of rude field-stones as to make you think it at one time a tower of defence, as it might easily have been against the plundering savages who no doubt frequently came this way when the tower was built. Sometimes I think we do not realize the value which such old buildings and bits of architecture from another age mean to us as an illuminated page of the country's history. This mill is more surely than as "a landmark" of interest only, to voyagers on the

stock of the concern. Among other things contemplated is the opening of an office in the vicinity of West Summerland post office. Further mention of other plans will be made at an early date. In the meantime as there is no building available for our purpose, arrangements must be made for the erection of a building designed to suit our requirements. We would be glad to talk the proposition over with anyone who desires to put money in a building of this kind and would lease same to us with option of purchase.

There is no doubt that Summerland, with perhaps the co-operation of Peachland and Naramata, could successfully handle a chautauqua next summer. It only requires some one to take the initiative. There is no more intellectual people to be found any where, and the class of entertainment that is being put on by the Dominion Chautauqua would be appreciated and largely patronized. We understand that Princeton, Penticton, Kelowna, Vernon, Armstrong and other places in the vicinity have all taken the chautauqua course this summer.

The outlook in British Columbia is what we make it. If we believe in the intrinsic stability of British Columbia; if we realize our problems and meet them with confidence; if we think of progress instead of stagnation; if we prove our faith in ourselves and our province by giving our support, our thoughts and our time to putting our weight behind British Columbia industry; then no one can doubt the outcome.

The Japanese Parliament has enacted a law making the adoption of the metric system of weights and measures obligatory. Are not we Canadians a little behind the times?

## New Use For Choke Found In Starting

Physician Discovers That To Save Battery It Is Misused. Use Choke Before Stopping Motor.

A simple trick which it seems might be employed universally by motor car owners to great advantage in starting their engines, especially in cold weather, has at last been discovered, and credit for the discovery is given to a physician whose case applies to the old adage that "necessity is the mother of invention." He found that the choker is a great labor saving device for those who are compelled to crank their cars, as well as a great time saving invention for those whose cars are equipped with a starter.

All the instruction books put out by the automobile manufacturers, and they would fill a good sized library, and all the "hints to motorists" which fill column after column of newspaper and periodical space, tell the motorist that the choker button was designed to facilitate the quick starting of the motor, and that the choker is to be pulled out when the starter pedal is depressed.

This method, according to the findings of the doctor, apparently puts "the cart before the horse," for he has discovered that the choker is used most effectively if employed at the time the motor is stopped. Thereby the cylinders are filled with a rich mixture, available for starting the next time. It is his experience that when the choker has been used at the time he stopped his en-

gine it has enabled him to start his motor almost instantly with a quick depression of the starter pedal.

The nearest approach to this discovery that the expert automobile engineers have made is to be found in their advice to motorists to open their throttles at the time they stop their motors, thereby filling the cylinders with a rich mixture of gas to be used for the next starting. The physician goes them one better in employing the choker to make the rich mixture still richer.

Whether his discovery is applicable to all types of motor cars is a matter that remains to be proved. However, it is likely that it will be found very effective by motorists who drive cars equipped with valve-in-head motors, and there seems to be no reason why it shouldn't work successfully in "T" and "U" valve type motors also.

Soon after he made the discovery the physician explained it to employees at a service station maintained by the manufacturers of his car, and all admitted that the idea involved practically a reversal of the principle on which the choker device was originated. However, they tested it out and found that the physician was correct, for the discovery is credited to the doctor.

## Join the RED CROSS in British Columbia

The Coming Week of June 6 to 11 will see the greatest Red Cross Membership Enrollment Drive that Canada has ever known. British Columbia must, and will, top the list, else it will defeat its own traditions, so splendidly upheld.

The Red Cross is today a living thing, pulsating with energy. A child of war, it will not be denied its right to manhood in time of peace. Vast as was its work in battle, vaster still are the labors which now confront it—labors which it is pledged to undertake.

Join the Red Cross in British Columbia, and by your example and effort help it to achieve its work in the relief of sickness

and distress. Help it to inculcate its principles and practice amongst the rising generation—the mothers and fathers of tomorrow.

Join the Red Cross in British Columbia, you men and women of our Province, and help it in its greatest endeavor for the improvement of health and the prevention of disease.

Join the Junior Red Cross in British Columbia, you boys and girls. You will be proud to wear its emblem—you will be glad to serve under its banner. Many are the children less fortunate than you whom you can help and cheer.

Senior Enrollment Fee \$1.00  
Junior Enrollment Fee \$0.25

Mail your Enrollment Fee to your Local Branch or the  
CANADIAN RED CROSS SOCIETY  
BRITISH COLUMBIA DIVISION  
626 Pender Street West Vancouver, B. C.

## .. The Winding Trail ..

I lately heard a clergyman commend to his The Old Fashion congregation a certain exhortation in the Book of Common Prayer as being one of the greatest of all admonitions, despite the fact that its language was at times somewhat archaic. To your mind this feature is by no means to be counted against this, or any other discourse, since many of the words are now regarded as more or less obsolete or archaic possess a dignity and force which is often lacking in those that have superseded them. A live language is necessarily always changing, and the English vocabulary in particular is constantly being added to, but it is impossible not to regret the passing away of certain words which have always formed part of our daily lives. We can laugh (goodnaturefully) at the old lady who was affected to tears by "that blessed word Mesopotamia," but we can all easily sympathize with the underlying sentiment. Old associations of thought and memory are not to be despised. And it should not be forgotten that the preservation of old fashions plays an important part in the evolution of language as in most other things. In this respect we owe a great debt to the Church which has fostered literature and music continuously. Even today we have to acknowledge the Bible as the greatest fount of our language, all other considerations apart, and the literature of the Prayer Book, having that collection of writings as its foundation, is incomparable. We daily use expressions and forms of speech which come from that source, although sometimes we may not be aware of it, and occasionally feel uncertain whether the Bible or Shakespeare is the foundation. This is quite excusable, by the way, because Shakespeare ranks only second, and we know by deduction that the Bible entered largely into his reading.

Archaism is not necessarily matter of individual words, but applies also to their form of combination. It is apparent to the careful reader that whole episodes are contained in short passages of composition which would be considered obsolete if used by a modern writer. We recall the exclamation of an editor to one of his reporters who claimed he was not allowed enough space for a story he had to tell:—"Not enough!—young man do you know that the whole story of Creation is told in the Bible in six hundred words?" We may also remember the shortest biography in this or any other language:—"And Enoch walked with God; and he was not; for God took him." No writer of today would venture to cover any ordinary event with so few words—the style is archaic and therefore inadmissible. Nevertheless it is a model of expressive composition.

The old fashion is passing, and must pass without ceasing, but let us hasten slowly, in our progress, and retain all that is good.

### Consider the Other Fellow.

The Pentiction Herald recently had a paragraph concerning a certain preponderance or superfluity of dogs in that town, and made the rather startling prediction of a poison campaign if the nuisance were not abated. A campaign of indiscriminate poisoning, a remedy which does not commend itself to the average man—it is too sweeping in its operation and is liable to work in directions where it should not. Nothing of the sort should be contemplated, and wherever attempted, is a matter for condemnation. But it is impossible to avoid realizing the fact that the dog nuisance at times becomes too pronounced for comfort. Pentiction certainly has a generous share of apparently unattached canines roaming its streets and it seems curious that there is no law to deal with the condition.

When the situation is analysed it will be found that the dog nuisance and many other like irritations arise chiefly from a neglect of consideration of the other fellow's rights. In most cases this is largely a matter of want of thought—it does not occur to the citizen that his neighbor may have a good deal to say concerning such matters, if he cares to say it. Live stock of any kind is kept in a town or village by the tacit consent of the community in general; when it becomes a nuisance the law steps in and imposes certain conditions. In certain instances the sanitary department regulates matters as an affair of routine, and no trouble is possible, but in others, such as the keeping of dogs, cats and fowls, that need is not so imperative; and the laws become indefinite. Thus, unattached dogs may be at large, and it seems no one's business to check the nuisance; and the useful but too enquiring hen is sometimes allowed liberties which are obviously detrimental to the neighbors' premises. In most places these matters are provided for in the provincial or local laws, and where these do not run, there is a sort of lynch law which can be practiced with impunity under certain conditions. But these are bad remedies at best and the really satisfactory solution is to be found in a stricter observance of our duty towards our neighbors. It cannot be considered favourable to the maintenance of community spirit to have to poison your neighbor's dogs or shoot his fowls, and these drastic remedies should not be necessary.

## Naramata News

Current Events of Town and District

A well attended meeting of the Unity Club was held in the club house on Friday afternoon, when the principal business centered around the hospital report. Mrs. J. M. Robinson and Mrs. Cook, who had attended the hospital opening, gave an account of the building, furnishings, etc., with special reference to the Naramata Unity Club ward. The plate for the door, originally bearing the name of the Club, had been replaced by one in commemoration of the boys who went overseas from Naramata. The expense of this change had been borne by Mr. J. M. Robinson, who was given a hearty vote of thanks in recognition of his generosity in this regard. A vote of thanks was also tendered to the hospital committee. A donation of \$25 from Mr. McLean was acknowledged, and he was made an honorary member of the Club.

A very fine address on education was given by Mrs. Aitkins. Mrs. Hayward entertained with a reception, after which tea was served.

Mrs. McDougall of Peachland arrived in Naramata on Tuesday evening on a visit to Mrs. J. O. Noyes.

Mrs. J. Sibbald who has been spending some weeks with Mrs. Wm. A. McConkey, left on Monday morning for Enderby.

Mr. Mylrea of Peachland, who represents the Grolier Society in the Valley, arrived in Naramata on Monday on a business trip and is spending a few weeks here. He is a guest at the Syndica Hotel.

The family of Mr. G. Weaver of Pentiction arrived in Naramata on Monday to spend some time here at the home of Mr. Weaver's father. The flooding of the Okanagan river had placed a large portion of their land under water in the Pentiction district.

Capt. Languedoc went over to the Summerland hospital on Saturday night by special ferry, remaining in the hospital for treatment.

## JUNIOR AND RED CROSS WORK IN BRITISH COLUMBIA

The peace time program of the Red Cross League of Nations, to which the Canadian Red Cross is signatory, embraces and embodies the very important platform of Red Cross instruction to the children. This branch is known as the Junior Red Cross, and in Canada this is the medium through which the Canadian Red Cross is endeavoring to induce among the children and young people Red Cross instructions and activities of an educational and social value. In this situation the Red Cross aims to enlist the services of the children and young people on behalf of suffering childhood to minister to the needs of those children less fortunately situated than themselves, and more especially, until the post war work of the society is completed, to the children of soldiers or those suffering directly as a result of the Great War. In this respect it will furnish to children and young people a useful and healthful outlet for their energies and present to them a definite purpose for which their talents may be employed.

Dealing with the program of the Junior Red Cross work in the British Columbia Division, it is conceded that the extension of the Junior Red Cross organization in this province is really one of the most important duties which devolves upon the Society. Upon the children in the schools depends much of the Red Cross support of the future. With the warm approval of the Provincial Department of Education, and the various boards of school trustees, the Society purposes establishing Junior Red Cross branches throughout the Province with separately organized units in all the larger schools. This being done, it is proposed to create a "Junior Red Cross Sick Children's Fund," which will be devoted to providing hospital care and treatment for sick children who are not in a position to receive proper treatment. In the extension of this branch, it is also proposed to provide country vacations for delicate or convalescent city children who are otherwise unable to secure such a holiday. The ultimate purpose of the Junior Fund, however, will be to assist in the establishment of a children's hospital or ward in this Province so that our sick children may be assured at all times of the very best care and attention from nurses and doctors specializing in children's work.

From this Junior Branch of the Red Cross, great results are expected. Children, properly enthused in any good enterprise, are oblivious to obstacles and difficulties. Few persons can refuse the plea of a child. None will refuse the children's plea for children.

## Synopsis of Land Act Amendments

Minimum price of first-class land reduced to \$5 an acre; second-class to \$2.50 an acre.

Pre-emption now confined to surveyed lands only.

Records will be granted covering only land suitable for agricultural purposes and which is non-timber land.

Partnership pre-emptions abolished but parties of not more than four may arrange for adjacent pre-emptions with joint residence, but each making necessary improvements on respective claims.

Pre-emptors must occupy claims for five years and make improvements to value of \$10 per acre, including clearing and cultivation of at least 5 acres before 5 years, and improvement of \$10 per acre, including 5 acres cleared and cultivated, and residence of at least 2 years are required.

Pre-emptor holding Crown grant may record another pre-emption, if he requires land in conjunction with his farm, without actual occupation, provided, statutory improvements made and residence maintained on Crown granted land.

Unsurveyed areas, not exceeding 20 acres, may be leased as homesites; title to be obtained after fulfilling residential and improvement conditions.

For grazing and industrial purposes areas exceeding 640 acres may be leased by one person or company. Mill, factory or industrial sites on timber land not exceeding 40 acres may be purchased; conditions include payment of stamp duty.

Natural hay meadows inaccessible by existing roads may be purchased conditional upon construction of a road to them. Rebate of one-half of cost of road, not exceeding half of purchase price, is made.

### PRE-EMPTORS' FREE GRANTS

The scope of this Act is enlarged to include all persons joining and serving with His Majesty's Forces. The time within which the heirs or devisees of a deceased pre-emptor may apply for title under this Act is extended from one year from the death of such person to five years, until one year after the conclusion of the late war. This privilege is also made retroactive.

No fees relating to pre-emptions are due or payable by soldiers on pre-emptions recorded after June 26, 1918. Taxes are remitted for 5 years. Provision for return of moneys accrued, due and been paid since August 4, 1914, on account of payments, fees or taxes on soldiers' pre-emptions.

Interest on agreements to purchase town or city lots held by members of Allied Forces, or dependents, acquired direct or indirect, remitted from enlistment to March 31, 1920.

### SUB-PURCHASERS OF CROWN LANDS

Provision made for issuance of Crown grants to sub-purchasers of Crown lands, acquiring rights from purchasers who failed to complete purchase, involving forfeiture, or fulfillment of conditions of purchase, interest and taxes. Where sub-purchasers do not claim whole or original parcel, purchase price due and taxes may be distributed proportionately over whole area. Applications must be made by May 1, 1920.

### GRAZING

Grazing Act, 1919, for systematic development of livestock industry provides for grazing districts and range administration under Commissioner. Annual grazing permits issued based on numbers ranged; priority for established owners. Stock owners may form associations for range management. Free, or partially free, permits for settlers, campers or travellers, up to ten head.

# In Orchard and Garden

Helpful Advice and Suggestions by Recognized Authorities

## Next Week's Work in the Orchard

By R. H. Helmer.

Having had numerous enquiries recently regarding the control of gophers (or moles as they are often called) we append hereto an extract from the monthly bulletin of the state commission of horticulture of California. This has met with great success wherever tried.

"Pocket gophers are readily caught in any one of the several makes of special traps commonly on the market and a few of these suffice to keep small areas free of the pests. For ridding alfalfa fields, orchards, etc., a very successful and more practical method is to poison them by use of baits of sweet potato or of parsnips placed in their underground runways. The baits should be cut about one inch long and half an inch square and washed and drained. From a pepper box slowly sift 1-8 oz. of powdered strychnin (alkaloid) and 1-10 of this quantity of saccharin (ground together in a mortar) over about 4 quarts of the dampened baits, stirring to distribute the poison evenly. The runways, which are usually four to eight inches beneath the surface can be located by means of a probe made of any strong handle an inch in diameter and thirty six inches long. One end should be bluntly pointed. Into the other should be fitted a piece of 3-8 inch iron rod protruding about twelve inches and bluntly pointed. A foot rest aids in probing hard soils. By forcing down the iron pipe near gopher workings or a foot or two back of fresh mounds the open tunnel can be felt as the point breaks into it. The blunt end of the instrument is then used carefully to enlarge the hole, a bait or two is dropped into the run and the probe hole closed. One soon becomes expert in locating the runs and a man can treat 300 to 500 gopher workings in a day. Baits need be placed at only two points in each separate system of 10 to 30 mounds which is usually the home of a single gopher. Experience has shown that baits placed fairly in the runs invariably succeed.

The two methods of inoculating the land are: Cultures for the seed and distributing soil from a known inoculated field to an uninoculated field. This should be done on a dull day, sown broadcast on the land and worked in immediately. Our hot, dry climate has a tendency to kill bacteria in the soil and it should be

Powdery mildew is very bad in places and this should not be neglected. Spraying should be undertaken where necessary.

Apple thinning can be started any time now.

## SUMMER WORK IN THE ORCHARD

By M. B. Davis, Pomologist, Dominion Experimental Farms.

Summer work in the orchard may be divided among four different headings; spraying, cultivation, cover crops and thinning, with possibly pruning in some instances.

The first is a spring operation which is usually necessary to carry on into the summer, as at least one spray should be put on after the fruit is well set on the trees, this would be about two or three weeks after the bloom is off, and may consist of bordeaux or lime sulphur mixture with some arsenical poison added for biting insects and nicotine sulphate added for aphid control if they are present at that time. For fuller particulars re spraying write your nearest Experimental Farm superintendent.

Cultivation in orchards, except those in sod mulch, should be practised continually until about July first. By maintaining a good dust mulch during early summer the trees can be helped through that trying time in late June when the heavy drops of fruit are so discouraging. Especially in districts where winter injury is a factor, cultivation is discontinued about the first of July and the orchard sowed to some cover crop, such as rape, vetch, clover or field peas, the selection largely depending upon the cheapness of the seed. The following rates of seeding per acre are recommended: buckwheat 1 bus; rape 2 pounds; crimson clover 15 pounds; summer vetch 1 1-2 bus.; field peas 1 1-2 bus.; rye 1 1-2 bus. Where there is much danger of loss of plant food during winter, the winter-rye makes an excellent cover crop, but it is of little value in stopping tree growth during August, as at that time it makes but little growth itself.

Thinning is an operation that will amply repay the orchardist if judiciously applied.

After the June drop has removed its quota, all trees should be gone over and, where there is a heavy crop, some of the fruit should be removed, leaving not more than two to a cluster, and, if a really high class product is desired, leave only one fruit to a cluster.

Where thinning is practised, there is a smaller percentage of No. 3 and waste fruit, which means higher prices per acre for the crop. The orchardist who adopts thinning as a regular practice is bound to be in the front line when it comes to the pack-out returns.

Summer pruning is now generally conceded a place in most young

orchards, as it is difficult to do much pruning when there is a drop on the trees. Mid June is a good time to go over the non-bearing trees and shape up those straggly fellows. Where they are inclined to produce a long, willowy growth with few laterals, nip off the terminal bud, which will induce a lateral growth, probably that season, instead of continuing a long, barren branch which it would be necessary to head back severely in later years.

## PRESENTS B. C. OPPORTUNITIES

In the current issue of the Fruit Grower, published in London, England, and devoted to the interests of the fruiterer, florist and market gardener, special attention is given to the opportunities presented in British Columbia for fruit growing. An article by Mr. Wm. J. Bonavia, secretary of the department of agriculture at Victoria, is given special prominence, in which Mr. Bonavia deals with the various districts and sets forth in detail the peculiarities of each.

For the purpose of giving these details of each district, Mr. Bonavia divides the province, or at least the well known fruit growing portions, into nine different districts, including the Okanagan, the Kootenays, Central B. C. and all of Vancouver Island, emphasizing the particular kind of fruit each section is producing and giving facts and figures relating to last year's crops.

On another page in the same issue Mr. F. C. Wade, K. C., agent general for British Columbia, calls attention to wonderful natural resources of the province, also giving figures showing the output of raw materials, manufactured products, total shipping, etc., of the province for the past year.

## GRASSHOPPER PLAGUE LIKELY TO BE SERIOUS

From extensive field surveys carried out by the Saskatchewan department of agriculture it appears certain that the grasshopper plague will be more serious this year than last.

Indications are that Saskatoon will be the center most seriously affected. Poison bait supplies are being stored in quantities in Regina and Saskatoon and information regarding the methods of combating the plague is being sent broadcast over the province.

## WORK FOR THE BIRDS

Value Equal to One-third Canada's Budget Destroyed Annually by Insects

"The annual loss in Canada to field, orchard and garden crops, due to destructive insects, is, on a conservative estimate, upwards of \$200,000,000. To this huge devastation must be added the enormous annual destruction caused by forest insects, stored produce insects, etc. It is certain that these losses would be much greater if it were not for our insectivorous birds."—Arthur Gibson, Dominion Entomologist, in Agricultural Gazette.

TO COLONIZE NICOLA VALLEY WITH EX-ENGLISH ARMY OFFICERS

Major Goldman, formerly of England and South Africa, has become the sole owner of a township and a tract of about 20,000 acres in the Nicola and Voght valleys.

Major Goldman came out from England a few years ago, went into the Nicola valley and has bought up enough of it to satisfy his desires.

If the major's plans mature successfully, his portion of the Nicola Lake and valley will resemble Cowes by summer and St. Moritz in the winter months.

Major Goldman expresses his appreciation of the assistance given him by the provincial waterworks department in the furthering of his scheme, which includes the building of storage dams and bringing water down from the lakes above the Nicola Valley.

At present he has 1350 head of cattle on his property, but with additional irrigation and pasturage hopes to increase this number to 5,000.

Major Goldman is returning to England for a trip this year.

It is up to you, to all of us, to say the right thing and do the right thing to stabilize business.

Passing Events: Social, Personal, &c.

The stores are closing for a holiday on Friday, June 3rd.

Mrs. Naylor went down to the coast last week on a holiday visit.

Paper rolls for the Burroughs adding machine are kept in stock by The Review.

Russell Roe left this week for Banff where he has taken a position for the summer.

Mr. E. H. Plant returned on Saturday from attending the Methodist conference in Victoria.

Prof. W. T. Broad returned last Friday from attending the Methodist conference in Victoria.

Public meeting, Parish Hall, Tuesday, June 7th, to discuss public school situation in Summerland.

When returning from Peachland a few days ago Capt. Crease saw a beaver in the lake two miles south of Deep Creek.

The hospital staff will move tonight (Thursday) from the Pelix Hotel building to the new institution on Hospital Hill.

W. W. Borton has moved his plumbing and sheet metal business to the new building recently erected by Mr. Scott Rand.

Mrs. Hamilton, of Ocean Falls, who has been visiting Mrs. Ibbertson, left on the K.V.R. train Wednesday noon to return to her home.

Miss Ransom of the nursing staff of the Summerland hospital, has resigned her position, the resignation to take effect from the 30th.

Mr. J. W. Clark has purchased the five acres known as the Woodward property, the deal having been put through by G. Y. L. Crossley.

Wm. Ritchie returned on Wednesday morning by way of Vancouver, from a short visit to Alberta on which he was accompanied by Mrs. Ritchie.

Fred Graham and Walter Munn accompanied Manager J. Lawler of the Fruit Union on his motor trip to Wenatchee, Seattle and other Washington centers.

Miss McWilliams, at one time engaged here with the Co-operative Orchards Co., is a guest at the Inglis home for the week end.

Mrs. R. H. Agur gave a very pleasant informal dance the evening of May 26th, in honor of Mr. and Mrs. Schoch of Vernon.

A son was born to Mr. and Mrs. R. H. Atkinson on Thursday, June 2nd.

Just as we go to press we learn that the Board of Trade committee appointed to deal with the school building question is calling a public meeting for next Tuesday.

Final examinations for the first and second year classes in high school were held this week.

A stone wall along the front and across the end of St. Stephens' Church property, just completed, greatly adds to the appearance of the edifice and grounds.

W. P. Secrest and his son were visitors in town on Tuesday, having motored up from their ranch property near Fairview.

There are many of his friends in Summerland who will be sorry to learn that Allan Stewart, one of the earlier residents of the community and until recently a property owner here, was badly hurt by his team on his newly acquired farm in Alberta.

ST. ANDREW'S CHURCH

West Summerland. Rev. W. A. ALEXANDER, Minister. Preaching service 10:30 a.m. Subject: "Where is Thy God."

Join the RED CROSS. Illustration of a woman in a Red Cross uniform.

Mr. Austin Cooper of Montreal is here on a brief visit to his parents, Mr. and Mrs. F. D. Cooper.

The Board of Trade is calling a meeting for the purpose of discussing and explaining the public school situation as it now stands in Summerland.

Auditors with the chartered accounting firm of Crehan, Mout & Co. were here this week and last, auditing the municipal books.

Major M. J. Crehan has sufficiently recovered from his recent accident to be able to leave St. Paul's Hospital, Vancouver, for his home.

There have been many Summerland people to take advantage of chautauqua week at Pentiction. Perhaps the most popular number of the program for the first three days was the lecture by Dr. Arthur W. Evans.

School Inspector McKenzie has condemned the school buildings at the Port Haney school.

The size of a lion's share depends upon the size of the lion.

### Peachland Doings

A Weekly Chronicle Furnished By Our Local Representative.

#### RE-OPENING OLD BENCH ROAD

Much has been said and considerable fear experienced of late for the lake shore road between here and Summerland on account of the high water line. The fear has not been without cause for much of the road is in danger if a storm of any size should spring up on the lake, and even as it is now there are some places on the road which seem to be undermined. The road foreman and official of the road were over it last week end and some notices have been put up calling the attention of the public to its unsafe condition. Foreman S. H. Murdin started out on Monday morning with a gang to work on the old bench grade and get it in readiness for traffic as soon as possible, and a gang will work out of Summerland this way. The foreman on each end will try to keep the shore road passable till they can get the bench road passable, when they will continue for a time to improve the upper grade.

Mr. A. J. McKenzie was a visitor to Kelowna on Thursday of last week returning on the evening boat.

Mr. R. A. F. Moore's son, Arthur, of Penticton was among the arrivals on Thursday morning's boat, and after a short visit in town took his father's auto back to Penticton for him as he was visiting in the home of Rev. and Mrs. C. D. Clark.

Messrs. West, Ortt and Williams were visitors to Kelowna on Friday on a short business trip.

Mrs. Roland and her sister, Miss Young, left on Friday morning en-

route for the coast. They will probably stop in New Westminster for a time. Miss Ella Young remains here in the employ of Mrs. Clarence in the Edgewater Inn.

Mrs. J. B. Robinson, Mrs. Vivian and Mrs. Lingo returned home on Friday morning after a pleasant visit in Summerland during which time they took in the opening of the Summerland Hospital.

Mr. J. Kudelka paid a short visit to Kelowna on Friday returning in the evening.

Mr. and Mrs. Ruffe are enjoying the company of their married daughter with her husband and their young son who arrived on Friday evening, and expect to remain here with the rest of the family.

The Rev. Isaac Page motored up from Penticton on Friday afternoon last to hold a business meeting with the board of the Baptist church, returning after the meeting.

After spending a few days at home Mr. and Mrs. L. D. McCull returned on Friday evening to Penticton, expecting to be there about a week before returning home to stay.

Mrs. Iverson spent the week end down the lake, returning home on Monday morning.

Rev. Jas. Dunlop of Summerland preached in the Baptist Church on Sunday afternoon last at their regular service, and expects to come again next fortnight to relieve the Rev. Isaac Page, who goes to Oliver to hold services.

The Rev. C. D. Clark preached his farewell sermon in the Methodist Church on Sunday evening last. He made the announcement that the service the following Sunday morning would be conducted by Mr. Welsh of Summerland, formerly

Baptist minister and lately principal of the Summerland high school. He stated that the new minister coming to take charge of this field, in the person of Mr. Coad, would probably arrive during the following week with his wife and child and would take charge of the services commencing the following Sunday. Mr. Clark has been drafted for the field with headquarters at White Rock, B. C. He left on Monday morning intending to motor to Princeton and ship the auto from there across the mountain. He was accompanied by Mr. R. A. F. Moore who is going to take a spell at the Harrison Hot Springs for his rheumatism. However on their arrival at Penticton they learned that there were washouts on the route which would prevent their passage, so Mr. Clark returned to Peachland to store his car for the meantime and Mrs. Clark joined him by the evening boat to make the trip via the K.V.R. Mrs. Clark had intended remaining behind for a short time had they been able to get through by auto.

Reports have been coming in the last few days of damage done by the recent frost, some of which no doubt are authentic, but many of which we hope and trust will prove to be much less than reported. One of our enthusiastic growers and gardeners was on the job with ample precaution when he scented the danger and had smudges set all ready for the occasion. Setting the alarm for a very early hour and then beating the alarm he was up to see the thermometer register a half degree above the freezing point. Fearing the worst he at once summoned the rest of the household and got busy with the smudges and covering the makings of his little summer fortune. The next look at the mercury saw it down the half degree, but there it stopped and right about face to a more tropical degree. This was on Friday morning. The same party had a close watch the previous morning but it was four degrees to the good that morning, these seeming to be the nearest approach we had to frost on the front.

Mr. and Mrs. Wm. Ortt and Mrs. Ortt's mother, Mrs. Spears, left on Monday morning enroute for Brandon, Manitoba, where they will reside for a time. Mr. Ortt found the work on the lot rather too strenuous for his physique, so he sold out to one W. J. Williamson of Brandon, who has been here for a short time and expects his family shortly. The community regret to lose the Ortt and Mrs. Spears, but hope that the move will be for the best for their interests.

Mr. and Mrs. Alex. McGregor left by auto on Monday last intending to motor through Alberta where they expect to settle and try farming for a while again. Before commencing, however, they expect to take a trip down east to visit friends and acquaintances. They were accompanied by Mr. Earl Weitzel who expects to spend a month there and drive his auto out here on his return.

Evangelists Scott and Bowles are continuing holding their Evangelistic

services in the Orange hall, except for an occasional meeting held at the Trepanier townsite school house.

Mr. and Mrs. Roy McCall and son of Penticton were among the arrivals on Monday morning's boat to join Mr. and Mrs. A. J. McKenzie in a motor trip to the Kelowna district where they were looking over some real estate propositions in the fruit growing section.

Wes. Waldriff left on Monday last to take the position of edgerman in Mr. Art. Dobbin's saw mill at Shannon Lake in the Westbank district.

Mrs. Heighway and little daughter were passengers on Monday evening's boat to pay a short visit down the lake.

Mr. Orr of Chilliwack arrived in Peachland on Tuesday morning last and states that it is his intention to build a small house on his lot here on the corner of Beach Ave. and Fifth St. and have it ready for occupancy by himself and his daughter, who is teaching in Trail, B. C., but who expects to spend her summer with him. Old timers here will remember that about twelve years ago Mr. Orr came here with his family and spent a few months in Peachland. His health has failed somewhat of late and he believes that this climate will suit him well for a time. He is at present a guest at the home of Mrs. E. E. House.

Mrs. H. McDougall was a passenger south on Tuesday evening last to visit friends in Naramata for a short time.

Mr. and Mrs. M. N. Morrison and family enjoyed a visit for a few days from Mr. Morrison's brother and his wife from Vancouver. They left on Saturday morning last to return home after a very pleasant visit here.

Mr. J. McKinnon and Mr. W. C. Aitkens were visitors to Kelowna on Saturday last, returning on the evening boat.

The regular meeting of the local branch of the W.C.T.U. was held at the home of Mrs. H. Williams on Friday afternoon last at three o'clock, when the delegates who had attended the recent convention held in Summerland reported the work of the convention. Mrs. J. L. Elliott, the official delegate, read a very interesting report in detail, and a vote of thanks was extended to her. The

election of officers for the ensuing year resulted as follows: Mrs. Murdin, Pres.; Mrs. H. E. McCall, Vice-Pres.; Mrs. J. L. Elliott, Rec. Sec.; Mrs. H. Williams, Cor. Sec.; Mrs. A. J. McKenzie, Treas. It was decided to hold the June meeting at the home of Mrs. A. J. McKenzie.

Every knock one man gives another is intended for a boost for himself.

Even the man who expects the unexpected is apt to be surprised when it happens.

## ARE SUPPORTING STORAGE SCHEME

Growers Responding Excellently to Call for Capital Stock

### TENDERS OPENED

Directors Consider Bids Are High. May consider "Cost-Plus" Method

Tenders received by the Summerland Storage Co. for the construction of the proposed new building were opened this week. A second meeting of the directors was held last night to consider the bids. All the tenders were somewhat higher than had been expected and at last night's meeting it was decided not to accept any of them, and that other ways for construction should be considered. The board decided to ask the architect and the two lowest tenderers to "consider what alterations might be made in the plans to save cost without in any way reducing the usefulness of the building and with a possibility of having the work done on a "cost plus" basis.

Canvassers for subscriptions to the shares of the Summerland Storage Co. are meeting with excellent success. Mr. E. R. Simpson, one of the company directors, and Mr. C. E. Barnes, organizer and publicity manager of the O.U.G., have been making a systematic canvass of the Union growers. First a calculation was made of what each grower should subscribe in proportion of his crop to the whole output of the Union. Seen on Thursday Mr. Simpson said that the response had been remarkable, practically every grower subscribing the amount of his allotment. Some very substantial subscriptions had also been received from several citizens who are not actually growers. Up to the present over \$50,000 have been subscribed by the people of Summerland and Naramata and the canvass is not yet complete. Mr. Simpson said he had every reason to believe that the rest of the canvass would meet with the same success, and he believed that the \$60,000 to \$70,000 can be raised in the immediate district. The canvassers now felt that the building is absolutely assured.

Mr. Simpson stated that through larger membership and the natural increase in the crop the Union will handle this season a volume of fruit, one hundred and fifty per cent. in excess of any previous year. This, in itself, was absolute proof of the imperative need of such a building and that unless a building is provided, he could not see how a loss of from \$200,000 to \$300,000 could be avoided. Summerland lost from \$50,000 to \$60,000 in 1919 for the same reason, and while the C.P.R. have increased its facilities, this increase was not in proportion to the growth of Okanagan fruit and vegetable crops.

## VALLEY ROAD IS BEING SIGN MARKED

What are the new signs along Shaughnessy Avenue and the Shore Road? This and similar questions have been put to The Review since Wednesday.

The signs define the Okanagan Highway as part of one of the provincial thoroughfares, and this and other principal roads of the province are being marked, with the authority of the government, by the Dominion Auto Trail Association, Ltd. The roads are being so marked with one color or another so that it is impossible for a stranger to go astray. Danger warnings and other information are also conveyed by the signs.

## ELECTED MODERATOR OF GENERAL ASSEMBLY

The general assembly of the Presbyterian Church in Canada yesterday elected Dr. Gordon, pastor of St. Stephen's Church, Winnipeg, as moderator. Dr. Gordon is more familiarly known outside of Winnipeg at least, by his nom de plume of Ralph Connor.

## IRRIGATION TO BE DISCUSSED

Strong Program Drawn up for Convention Next Month at Vernon

The arrangements for the fifteenth annual convention of the Western Canada Irrigation Association, which will be held at Vernon on July 27, 28, 29 and 30, are now well advanced. A feature of the convention will be a visit to the celebrated Coldstream Ranch, which lies a few miles from the city.

A strong program of addresses has been drawn up for the convention and among the speakers are: Hon. Duncan Marshall, minister of agriculture for Alberta; Hon. S. F. Tolmie, minister of agriculture for the Dominion government; Dr. John A. Widtsoe, president of the University of Utah, and one of the foremost authorities on practical irrigation farming in the United States; Dr. F. A. Wyatt, professor of soils at the University of Alberta; Mr. L. C. Charlesworth, chairman of the Alberta irrigation council; Mr. R. H. Helmer, superintendent of the Dominion experimental farm at Summerland, B. C.; Mr. C. I. Lewis, of Oregon; Mr. Lienel Stevenson, superintendent of the Dominion experimental farm at Sidney, B. C.; and Mr. A. S. Dawson, chief engineer of the Canadian Pacific Railway's irrigation systems.

Subjects of the greatest importance to irrigators will be discussed, including "Excessive Irrigation and its Dangers," which is the subject of Dr. Widtsoe's address. Dr. Widtsoe says that this is a matter to which considerable attention has been paid in Utah during the last few years and is one of the most important questions in irrigation practice. Mr. Stevens has chosen "Overhead Irrigation" as the subject of his address. This form of irrigation has been practised very successfully on Vancouver Island, where, although the rainfall is fairly high throughout the year, there are frequent dry spells during the growing season. "The Action of Water upon Soils" will be the subject of an address by Dr. Wyatt, who is known as one of the foremost authorities on soils in the country. "The Producing of Dairy Forage Crops on the Irrigated Farm" will be discussed by Mr. R. H. Helmer, while Mr. W. F. Laidman of Vernon and Mr. A. Griffin of Brooks will discuss irrigation district problems, a subject of the utmost interest to irrigators.

## BALLOTING ON SCHOOL BYLAW POSTPONED ON TECHNICALITY

Public Meeting Endorses Proposal of School Board to Erect New Public School Building

### SPIRITED MEETING LARGELY ATTENDED

Municipal Treasurer Nixon Explains Forms of Debentures; Says Nothing in Claim of Opposition that Proposed Loan is Wasteful. Carry on High School Says the Meeting

Ballotting on the school bylaw which was to have been held tomorrow has been postponed. This became necessary by the discovery of the fact that the petition asking the council to re-submit the bylaw should have been presented after the expiration of 60 days instead of within 60 days as had been understood.

The meeting called by the board of trade held on Tuesday evening was largely attended, the Parish hall being crowded. Pres. Freeman of the board of trade occupied the chair and called on several speakers to open the discussions on the various phases of the school question.

Dr. Andrew opened with an address on the Need of a School Building, using figures to show the impossibility of taking care of the school population unless a new building was erected.

Mr. R. P. S. Twizell, architect, spoke on the plans of the proposed school which he pronounced most economical from a financial point of view. It provided 8 rooms of a standard size, each to accommodate 40 pupils. The system of ventilation was perfectly satisfactory as was demonstrated in several other buildings of the same style. Similar buildings have been very critically inspected by the medical health officer at Point Grey, and pronounced in every way satisfactory. The system had also received the approval of the best ventilation expert in B. C. It was proposed to heat the building by the vacuum steam heat method, which cost less to install than the hot water system and was more satisfactory. There was no question as to the economy of heating by this method as compared with hot air.

There were many present who were in a critical mood and closely questioned the architect as well as other speakers on many phases of the question.

"Just What it Means to the Taxpayer" was the second subject of discussion, opened by Mr. J. R. Campbell. He treated this from the point of view of advertising Summerland and seeking new settlers. He told of the many enquiries he had received during his recent visit to the east, and declared that there were many people coming to the Okanagan during the next year or two, what were we to say to the many people enquiring of Summerland, all of whom were concerned in the educational facilities offered by the community in which they were considering locating. We must tell (Continued on Page 2)

## VALLEY BUG MAN GOES TO OTTAWA

Treherne Advised of Promotion to Higher Position

Mr. R. C. Treherne, who has held the position of federal entomologist for British Columbia since the autumn of 1911, has been selected by the Dominion civil service commission, from a number of candidates, to fill the position of chief of the field crop division under the entomological branch of the Dominion department of agriculture. The appointment dates from June 1st, 1921, but it is understood that except for a visit to the east, Mr. Treherne will remain in British Columbia until the autumn months, when he will take up residence in Ottawa.

The position now to be filled by Mr. Treherne was made vacant last autumn by the elevation of Mr. Arthur Gibson, first assistant and chief of the field crop division, to the position of Dominion entomologist, a position in turn, which became vacant following the death of Dr. C. Gordon Hewitt in the spring of 1920 from pneumonia.

British Columbia is honored in having provided for this senior position in the Dominion department of agriculture an officer who has for so many years been actively identified with the agricultural affairs of British Columbia.

## SUMMERLAND WEATHER REPORT

Below is a report furnished by the Dominion Experimental Station here for the week ending Tuesday:

June 3	80	52	.....	.....	11.6
June 4	75	57	.35	.....	4.2
June 5	80	53	.....	.....	6.1
June 6	80	61	.....	.....	6.1
June 7	72	57	.73	.....	10.9

## FORMER SPEAKER VISITS WESTERN CANADA

Right Hon. J. W. Lowther, former speaker of the British House of Commons, as photographed at Winnipeg, with his host, Hon. Robert Rogers. He is going through to Victoria, B. C.

## WM. RITCHIE ON POLICE COMMISSION

Municipal Clerk F. J. Nixon has been advised of the appointment of Mr. Wm. Ritchie to a position on the Summerland board of police commissioners. The appointment was made by the Lieut.-Governor-in-Council because of the failure of the electorate to fill the position at the annual election last January.

The board of police commissioners as now constituted is as follows: The reeve, G. H. Doherty, and Wm. Ritchie.

Reports from Penticton are that the last break down of the Diesel oil engine built at Seattle and installed in the power plant of the neighboring town means that it is definitely out of commission.

HALIFAX.—The Annapolis Royal Nurseries expect to ship about twelve thousand young apple trees to points in the Annapolis Valley this year. This nursery kept its stock of seedlings almost up to normal during the war period and is now in a position to supply the demand. Other nurseries will sell about 8,000 trees this spring, making a total planting of 20,000 trees.

## IAN BROWN IS BADLY BURNED

Gasoline Tank Explosion Results Seriously to Him

Ian Brown, engineer in charge of the government pumping station at Oliver, was badly burned last Saturday night by a gasoline explosion. His hands and one leg were severely injured. He is now at the Penticton hospital and his condition is reported to be as satisfactory as can be expected.

Mr. Brown, who has been a resident of Summerland for several years, having been employed with the Summerland Garage, recently took the position at Oliver.

The gasoline pumping outfit is being operated there because of the recent break in the syphon pipe, and it was when Mr. Brown went to the gasoline tank or barrel to draw a can of gasoline for the engine running the pump that the explosion occurred. He was carrying a lighted lantern and set it on the ground near the can of gas. This ignited the escaping fumes and the barrel exploded.

## HOPE-PRINCETON ROUTE TO BE BUILT

Work to Start at Once. One of Two Routes to Coast

That work will be commenced immediately on the construction of a road between Hope and Princeton was the information gleaned from a visitor in town this week, and who, it is believed, is in a position to know of what he is talking. A blue print showing the route selected was shown to a representative of The Review. The new route is considerably shorter than the one that has been mooted by Princeton for several years and can be built, it is said, for about one third of the cost.

## SHORE ROAD IS NOW CLOSED

Officially Closed on Monday Night Though Still Travelled

### UPPER ROAD OPEN

Floods Have Done Much Damage in Many Places

That section of Lake Shore Drive between Summerland and Peachland has been officially closed on account of the damage done to it by the unprecedented height of Okanagan Lake. For some days the road has been in a more or less dangerous condition because of the cutting away of the outer edge by the waters. On Monday wind squalls occasioned further damage and the road was closed that evening.

Anticipating this provincial road authorities have been preparing the upper or bench road between the two communities, and the work on it was so far completed that it was ready for traffic, when the lower road was declared no longer safe. Road Foreman J. C. Arkell has been working with a crew of men from Summerland end of the road, and Foreman S. H. Murdin has been doing similar work from the Peachland end and Mr. Arkell says the road is in fairly good condition for motor travel at the rate of 10 to 15 miles per hour.

The upper road is the old trail which was later converted into a wagon road, but has not been in use, except in sections, for several years.

We are informed that an inspection will be made of the shore road as soon as the waters recede and that it is expected that the road will be repaired and further improved, and will continue to be used as a section of the Okanagan highway.

Further down the valley roads have been closed in several places. Vancouver Lake has flooded the road near the overhanging rock and travel north and south has been diverted to the upper, or Myers Flat-Fairview road. Still further south at Osoyoos, the waters of that lake have cut off communication between the customs house and the eastern shore so that the Anarchist Mountain road leading to the Boundary country, cannot be reached, and it is now necessary for travellers to go by way of Oroville to get to Grand Forks, etc.

## CHAUTAUQUA HERE NEXT SEPTEMBER

Three Day Program Will be Provided

Summerland is to have a three day Chautauqua course in September. An agreement covering the engagement was entered into this week, some twenty two citizens of Summerland and Naramata getting behind the movement. The program will consist of three evening and two afternoon entertainments, the season tickets for which will cost \$2 for adults and \$1 for children.

Miss P. L. Pue, representing Canadian Chautauquas, Ltd., visited Summerland on Tuesday and readily obtained the names of twenty citizens in support of the three day chautauqua. Touching at Naramata two additional names were secured.

The names of the guarantors alphabetically arranged are: Dr. F. W. Andrew, W. R. Bartlett, T. G. Beavis, W. W. Borton, E. R. Butler, A. B. Elliott, R. H. English, J. C. Freeman, K. S. Hogg, G. R. Hookham, G. H. Inglis, W. Johnston, J. W. S. Logie, C. E. McCutcheon, A. C. Patterson, Jas. Ritchie, J. M. Robinson, L. W. Rumball, R. E. White, T. B. Young, O. F. Zimmerman.

The Board relies on the co-operation of all police officers, municipal and provincial, in the strict enforcement of the new Act and will at all times be pleased to assist you in carrying out and upholding the law.

A. M. JOHNSON, Chairman Liquor Control Board.

## EXCEEDED SPEED LIMIT WAS CHARGE

Fined Ten Dollars and Costs in Police Court

Charged with exceeding the speed limit, Bob Hatfield was fined \$10 and costs in police court last Saturday morning. The charge was laid by James Dunsdon, and he and Mrs. Dunsdon both swore that Hatfield was driving his car at a rate of over 80 miles an hour. It was on the morning of Saturday, May 28th, (Continued on Page 8)

# The Summerland Review

Established August, 1908

Published at Summerland, B.C. every Friday by THE REVIEW PUBLISHING COMPANY, LIMITED  
Ralph E. White, Editor and Manager

Subscription Rates—In British Empire, in advance, \$2.50 per year; six months, \$1.40. To U.S.A. and other countries, \$3.00 per year.  
Advertising Rate Cards and information respecting territory and samples of paper mailed upon request, or may be seen at the office of any advertising agency recognized by the Canadian Press Association.  
Advertisers must have copy in by Wednesday noon in order to insure changes for standing advertisements. New display advertising copy can be accepted one day later.

Correspondence—Letters addressed to the Editor and intended for publication must be short and legibly written on one side of the paper only. The longer an article, the shorter its chance of insertion. All communications must bear the name of the writer, not necessarily for publication. The publication or rejection of articles is a matter entirely in the discretion of the Editor. No responsibility is assumed by the paper for the opinions expressed by correspondents.

FRIDAY, JUNE 10, 1921

## THE RIGHT ABOUT MOVEMENT

"Buy Canadian Products" is the title of a sixteen page pamphlet just off the press, published by the Canadian Reconstruction Association with headquarters at 6 Jordan St., Toronto. Seven subjects are treated, each in a concise and interesting manner, giving the reader a clear understanding of the complex problems confronting the people of this country. "Build Up the Home Market," the first subject touched upon, charges the Canadian people with curtailing prosperity and fostering unemployment by their persistence in buying imported goods.

Under this head the association points out that the past year again saw an unfavorable balance on importation and exportation of merchandise of more than \$64,000,000; nearly back to pre war conditions. This would have been much larger had it not been for the exchange situation. The problem appears at first to be momentous one, but quickly fades into comparative insignificance when the individual is made aware of the important part he must assume if the movement now in full swing succeeds. The successful development of any community depends upon the patriotic co-operation of its people. Its citizenry must stand solidly together. The same thing applies to a province and the Dominion. We must stand firm on the right side to win success.

What more worthy cause could the mind conceive than a firm, united stand in the cause of prosperous communities, substantial homes, the forerunners of better churches, schools and citizenship? What better cause could be espoused for the betterment of mankind? What greater thing can we, of this community, hope to accomplish than build more and better homes for our loved ones?

There is a way we can do these things, and we will if we understand. Just now the need of the hour in Canada is to get rid of that notion that Canadian manufactured goods are of an inferior quality. Let us discard this unfair fancy. It isn't true; we know it isn't true. Everybody knows it isn't, and let's get it out of our system. The next step is to buy only goods made in Summerland or vicinity first. If we need to search elsewhere to supply our needs, let us see to it that they are British Columbia products. If we are forced to go further, stick with the idea and hold out for Canadian products. Every dollar spent at home means more employment, more demand for farm and factory products, and will hasten new industries to come among us; will invite capital to our community and create a more desirable place in which to live.

Other subjects treated in the pamphlet are: "Stimulate Canadian Business," "Reduce unemployment," "Lower Prices," "Increase National Revenue," "Reduce Your Taxes" and "Attract Outside Capital."

This pamphlet should be read by every individual in Canada, for the facts have been so forcibly placed as to at once bring home the necessity of a "right about" movement by the individual in a matter of great concern to Canada and her people's welfare.

## INSTALLING PUMP AT EXP. STATION

Will Lift Water 300 Feet From the Lake

It will not be many days before approximately half the irrigated area at the experimental station will be under a new pumping system. A powerful pump of the latest design has been installed on the lake shore near the southern edge of the farm. This will be driven by a fifty horse power Diesel oil engine. The equipment is guaranteed to lift 200 gallons a minute to a height of 350 feet. The elevation to which the water will be lifted at the farm is 300 feet. A ten inch wood stave pipe has been put in position up the face of the cliff and northward along the side of the hill under the weather station.

## DON'T SUMMER PRUNE

The question is asked many times "Is the summer pruning desirable?" According to one prominent grower, the answer is no, except in a limited way. Small branches and water sprouts may be removed without harm to the trees, but the cutting off of large branches is debilitating. It may be said in favor of summer pruning that wounds made in the growing season heal quickly, and it has been asserted that summer pruning hastens fruit bearing, but this is not fully settled as a matter of fact.

In practice pruning when the leaves are on is very difficult. It cannot be done with a fair degree of speed except in the case of removal of dead branches. When the leaves are in the way one cannot see which branches should be removed without consuming much time; besides, after a branch with leaves on is cut off its removal from the tree is difficult. When the trees are bare and the weather mild is the only time to prune fruit trees.

Never leave long stubs when cutting off limbs.

CALGARY.—Wheat seeding in the province of Alberta is completed, the total area of the land seeded being according to report, somewhat larger than last season.

solicitors in charge of the Dominion Trust and Liquidation, and Mr. Colquhoun was personally in charge of this work. He was at the front for 3 1-2 years and returned in April, 1919, re-entering the Cowan office. He joined Mr. Tunbridge in May, 1920.

The firm have opened offices in West Summerland and the office hours for the present are on Mondays and Fridays from 2 to 5:30 p.m. when Mr. Tunbridge will be present for consultations with clients. These hours will be continued until the business warrants more permanent hours.

## Next Week's Work in The Orchard

By R. H. Helmer.

New infections of fire blight have taken place; watch your trees carefully. Blossom blight on apples has been quite prevalent. Remember the new formula for disinfecting tools and cuts—cyanide of mercury and corrosive sublimate combined, 1-500.

Alfalfa is ready to cut now. Irrigate just before or just after it is harvested to speed the second crop.

Thin peaches, apples, apricots, and remember aphid is coming along and mildew is increasing. This humid weather helps these pests and we must help ourselves.

Makes sure that your land is moist well down, there is lots of water in Trout Creek and there may not be later. A case of being sure that the moisture was well in the ground came to our notice just the other day. Plants had been irrigated once a week for two weeks but showed signs of distress, when we dug with a shovel the moisture was down four inches and very dry condition under that. Don't scratch the soil with your toe and look-wise, get down into it.

## Ocean Rates On Fruit Down Twenty Per Cent

Announcement has been made of a cut in ocean freight rates between Pacific ports on this continent and British ports on dried fruits, beans, rice and tallow, amounting to approximately twenty per cent. It is expected that this lower rate will greatly encourage preserved fruit shipments from Pacific coast ports.

## OPENING LAW OFFICE HERE

In response to the requests of many friends in Summerland the law firm of Messrs. Tunbridge & Colquhoun of Penticton have opened offices in West Summerland. Mr. Tunbridge is a lawyer very well known for a number of years throughout the Okanagan. A graduate of the University of Oxford he practised his profession in Birmingham, England before coming to Canada. He was associated with the firm of Tunper & Griffin in Vancouver, of which Sir Charles Tupper was the senior partner, immediately before coming into the Okanagan to practice. He has been in practice in Penticton for upwards of ten years and is the senior member of his profession in the Southern Okanagan.

A year ago Mr. Tunbridge was joined in his Penticton practice by Mr. M. M. Colquhoun, a very well known barrister of Vancouver. Mr. Colquhoun is an honor graduate of Queen's University and was an overseas man. He has had extensive experience in coast law offices. He was formerly associated with the firm of Bowser, Reid & Wallbridge and a contemporary in the office of Mr. W. H. W. Ladner of the firm of Cochrane & Ladner of Vernon. Subsequently he was with the Vancouver firm of Wilson & Jamieson and then with Cowan, Martin & Grant. This latter firm included S. H. Cowan, former Vancouver M. P., and the well known Joe Martin. They were

## Thinning Demonstration

A practical demonstration of fruit thinning will be conducted in the following orchards in Summerland on Wednesday, the 15th of June, 1921:

Mr. Basil Stewart's, Jones' Flat, at 10 a.m. Mr. S. M. Young's, Prairie Valley, at 1:15 p.m. Mr. A. McGown's, South Giant's Head, at 3:30 p.m.

At Naramata on Monday, the 13th of June, 1921, in Mr. King's orchard at 1:30 p.m. In C. C. Atkins' orchard at 3:45 p.m.

At Peachland on Thursday, the 16th of June, 1921, in Mr. H. Hardy's orchard at 10 a.m. In Major Tallyour's orchard at 1:30 p.m.

It is hoped that everyone will show their interest by meeting the instructor on these occasions.

# .. The Winding Trail ..

The genial Fitzmaurice of the Vancouver Province depicts a purchaser of a liquor permit as waving the precious document aloft and prizing it chiefly as a sort of emblem of liberty. The cartoon has its usual atmosphere of humor, but to the average citizen the funniest phase is the assumption that a government permit to allow the normal, sober individual to slake his thirst with the beverage he prefers, can be regarded as a token of freedom. The moderation act as now handed down to a more or less dubious public, is as full of faults and follies as any piece of legislation could well be, but the crowning absurdity of all is surely the idea of governmental permission to drink. The former practice of interdicting the selling of liquor to known inebriates was reasonable; the reversing of that procedure, and regarding every person as a possible offender in advance, can only be supported on the ground that the sale of permits at \$5 each, will bring in considerable revenue to the administration—which claims to need the money. In this respect the permit idea is in keeping with the spirit which seems to pervade the entire act, it being apparently framed throughout with an eye to profit. If only the federal government could have been persuaded to override all constitutional precedent, and grant to the British Columbia government exclusive importation rights which can only be granted by a plebeian of the people, the harvest might have reached beyond the dreams of avarice, but Ottawa evidently has a clearer vision of what should be than appears on the surface in Victoria. The Oliver government has, therefore, to content itself with sweeping away the natural privileges of hotels and clubs to supply their guests with comparatively harmless beer, and controlling that branch of the business. This, together with the sale of whiskey in liberal quantities (to purchasers of government permits!) may bring in a quite appreciable revenue—whether it will at the same time help the cause of temperance is entirely another matter. To the untutored mind, a policy of restricting the sale of light beverages, and throwing open the door to the whiskey drinker, does not appeal very strongly as a first aid to moderation. There seemed considerable force in the protest of the member for Fernie that his constituents were being forced to drink strong liquors instead of beer. If I am not greatly mistaken there was in the minds of a great many people who voted for moderation, the notion that the sale of light beverages would be thereby encouraged, and it is safe to hazard a guess that such people would not again vote the same way if they could foresee the actual form of legislation to result from their votes.

Time will show how far public opinion will support this measure:—judging from the apathy of Vancouver citizens on the opening day, there is no great eagerness to take advantage of the legal permission to be enrolled as number so and so in the list of drinkers by the grace of the Oliver government. That may have been just the effect of an initial diffidence and may wear off in time. But the measure itself as it stands is a miracle of faulty legislation and could hardly have been worse.

For a climate which is reputed to be consistently dry, there is this season a remarkable redundancy of water—in places. If it could be nicely and comfortably adjusted so that every place received its quota, matters would go more smoothly; as it is, we get a distribution almost as unequal as that which will be the natural outcome of the British Columbia moderation act, and that is saying a great deal. In Penticton, for example, while some land owners are completely flooded out, and stand to lose their entire crop, in other parts of that town, some residents do not get enough domestic water to enable them to take a bath. Happily, this district does not lend itself to catastrophes as in the recent case in Colorado, but minor inconveniences are bad enough. One is driven to ask for information as to what the intended level of the Okanagan Lake is to be, since we know that it was held up at the lower end until the top of the dam was overflowing, and the inrush of waters from various sources constantly increasing. If the level is to be any higher than heretofore, it seems necessary that the river leading to Lake Skaha and the south, should be dredged to carry away the overflow which must occur each spring. And the dam might conceivably be opened a little sooner, and by degrees, instead of being thrown wide when everything is at its height, and the natural channels cannot at once take it. These are only suggestions of a mere layman, who does not profess to understand the technicalities of the matter. But it is the mere laymen who suffer, and that fact is sufficient excuse for some enquiries as to future procedure.

AUTOLYCUS

## Naramata News

Current Events of Town and District

Mr. and Mrs. Brooks, with their two sons, arrived on Saturday from the coast to spend a few weeks holiday in Naramata. They are guests at the Syndica Hotel.

Mr. Gordon Hayman of Summerland spent Tuesday in Naramata.

Mr. Douglas Kerr of Kelowna spent the week end in Naramata, returning to Kelowna on Monday.

The proposed "Naramata Day," June 3rd, for which the N.G. and A. A. had been preparing, failed to materialize. The president of the club, Mr. Frank Hughes, was absent on work at the irrigation dam, and in addition, Penticton was found to be having a sports program on the same day, so the event was postponed. We understand, however, that the postponement is merely temporary, and that a sports day will be arranged by the N.G. and A.C. at a future date.

Mrs. George Hume of Glenmore is visiting her mother, Mrs. J. O. Noyes, in Naramata. Mrs. Hume and her children will spend two weeks here before returning to her home at Glenmore.

The Women's Institute, which met on June 7th in the Unity Club was disappointed in the non-appearance of Mrs. Stainton of Vernon who was expected to give an address on child welfare. Mr. Main, who was to speak on gardens, arrived rather late, but gave a very instructive and interesting address. Some discussion took place with regard to the overflowed area at the creek near Mr. Lyons' house. Stagnating pools have been left by the subsidence of the water, which it is feared will form fit breeding place for mosquitoes and other pests. It was decided to see Mr. Partridge with regard to the matter, and if it did not fall within his jurisdiction, to consult the provincial government.

Mr. Frank Hughes, who has just returned from the dam, reports a plentiful supply of water, and everything very safe.

Mrs. Rushberry, her daughter, and a friend, arrived last week in Naramata to stay with Mr. Rushberry here.

Miss Gwen Robinson was called to Penticton on Sunday on a nursing case.

Mr. and Mrs. Harold Lee and their family left on Saturday to reside in Vancouver.

Mr. McLean of Summerland was a visitor in Naramata on Monday.

## 5,000 FACTS ABOUT CANADA

The annual publication "5,000 Facts about Canada" is a gold mine of information about the Dominion that no Canadian can afford to be without, and its popularity is steadily growing. The 1921 edition is now out and may be had from leading newsdealers or from Canadian Facts Publishing Co., 588 Huron St., Toronto, for 30 cents per copy. Its compiler, Frank Yeigh, is rendering a public service in thus making available, in accessible and condensed form, under fifty chapter headings, ranging from agriculture to the Yukon, the story of Canada in a nutshell. It is a revelation of the wonderful wealth and growth of the country, and is, as well, a fine advertisement of the Dominion. Governments, banks, boards of trade and big financial and industrial concerns use hundreds of copies. It is moreover, an excellent booklet to send to friends abroad, as a unique cyclo-pedia of Canada.

## BLAMES INTERNATIONALS FOR STRIKE IN TORONTO

HAMILTON, June 4.—Rev. J. S. Falls, Methodist book steward and business manager of the Ryerson Press, in presenting his annual report to the Hamilton Methodist conference here yesterday, referred to the strike of job printers, pressmen and bookbinders in Toronto and said not five per cent. would have gone out if they had not been connected with international unions. "Some day," he said, "tyranny in the ranks of labor will crush itself."

The conference endorsed the action of not granting the demand of the men for a 44 hour week.

TORONTO, Ont.—Canadian chocolates are making a good showing against the competing markets of the world, according to the statement made by Charles A. Brodley, secretary Biscuit and Chocolate Industries, at the third annual convention being held here. Many Canadian firms, he said, had representatives drumming up business in Europe, South Africa, New Zealand, South America and in Oriental countries.

QUEBEC.—When the German indemnity is paid to France, the lumber industry in Canada will be greatly benefited, according to the Hon. Philippe Paradis, member of the Quebec legislative council, who has just returned from an extensive tour of France. He states that railways, bridges, and roads in the devastated areas have been repaired, but there was a great lack of houses owing to the financial plight of France.

## Synopsis of Land Act Amendments

Minimum price of first-class land reduced to \$5 an acre; second-class to \$2.50 an acre.

Pre-emption now confined to surveyed lands only.

Records will be granted covering only land suitable for agricultural purposes and which is non-timber land.

Partnership pre-emptions abolished but parties of not more than four may arrange for adjacent pre-emptions with joint residence, but each making necessary improvements on respective claims.

Pre-emptors must occupy claims for five years and make improvements to value of \$10 per acre, including clearing and cultivation of at least 5 acres before receiving Crown Grant.

Where pre-emptor in occupation not less than 3 years, and has made proportionate improvements, he may, because of ill-health, or other cause, be granted intermediate certificate of improvement and transfer his claim.

Records without permanent residence may be issued, provided applicant makes improvements to extent of \$300 per annum and records same each year. Failure to make improvements or record same will operate as forfeiture. Title cannot be obtained in less than 3 years, and improvements of \$10 per acre, including acres cleared and cultivated, and residence of at least 2 years are required.

Pre-emptor holding Crown grant may record another pre-emption, if his farm, without actual occupation, provided statutory improvements made and residence maintained on Crown granted land.

Unsurveyed areas, not exceeding 20 acres, may be leased as homesteads; title to be obtained after fulfilling residential and improvement conditions.

For grazing and industrial purposes areas exceeding 640 acres may be leased by one person or company. Mill, factory or industrial sites on timber land not exceeding 40 acres may be purchased; conditions include payment of stumpage.

Natural hay meadows inaccessible by existing roads may be purchased conditional upon construction of a road to them. Rebate of one-half of cost of road, not exceeding half of purchase price, is made.

### PRE-EMPTORS' FREE GRANTS

The scope of this Act is enlarged to include all persons joining and serving with His Majesty's Forces. The time within which the heirs or devisees of a deceased pre-emptor may apply for title under this Act is extended from one year from the death of such person, to formerly, until one year after the conclusion of the late war. This privilege is also made retroactive.

No fees relating to pre-emptions are due or payable by soldiers on pre-emptions recorded after June 26, 1918. Taxes are remitted for 5 years.

Provision for return of moneys accrued, due and been paid since August 4, 1914, on account of payments, fees or taxes on soldiers' pre-emptions.

Interest on agreements to purchase town or city lots held by members of Allied Forces, or dependents, acquired direct or indirect, remitted from enlistment to March 31, 1920.

### SUB-PURCHASERS OF CROWN LANDS

Provision made for issuance of Crown grants to sub-purchasers of Crown Lands, acquiring rights from purchasers who failed to complete purchase, involving forfeiture, on fulfillment of conditions of purchase, interest and taxes. Where sub-purchasers do not claim whole or original parcel, purchase price due and taxes may be distributed proportionately over whole area. Applications must be made by May 1, 1920.

### GRAZING

Grazing Act, 1919, for systematic development of livestock industry provides for grazing districts and range administration under Commission. Annual grazing permits issued based on numbers ranged; priority for established owners. Stock owners may form associations for range management. Free, or partially free, permits for settlers, campers or travellers, up to ten head.

Meets third Thursday in the month.  
E. R. Butler - W.M.  
E. H. Plant, Secy.

**Peachland Doings**

A Weekly Chronicle Furnished By Our Local Representative.

Mr. A. J. McKenzie was a visitor to Kelowna on Thursday.

After a short visit with friends in Naramata, Mrs. H. McDougall returned home on Thursday morning.

Mr. R. J. Hogg and Mr. A. W. Miller have commenced operations on an extension to the Fruit Union building, needed to accommodate the new apple grader and facilitate the handling of the crop.

Albert Town and Nelson Keating paid town a short visit last week, returning to the Oliver district on Thursday evening.

Mr. Kudelka and Mr. Zold have just returned from a short business trip to the coast.

Bert Keating's smiling face is seen quite frequently around the community the last few days as he is enjoying his holidays.

Mr. and Mrs. Tom McLaughlin have moved to the Dr. Nash house formerly occupied by Mr. and Mrs. R. A. F. Moore.

Our local baseball team, supported by a goodly number of citizens, motored to Rutland on Friday to match their skill against the Rutland team.

Some of the supporters who went with them have made the statement that although the score was against them at the finish by 24 to 18, the boys had played just as good a game of ball as their opponents.

This is encouraging both to the players and the community, but the boys need more real support from the members of the community. Not enough turn out to practise nights to assist in giving the boys a real good practise to better fit them to meet other teams which are putting forth efforts to get to the front line play.

The more encouragement the boys get from their home town friends, the better game they will put up for the honor of their home town and feel more cheer and pride in doing it. All you fellows that are past masters on the diamond, get out on practise nights and give the boys a run for their money. They will enjoy being made to play "some game" to hold their own against the old stiffs.

Miss Huntley of Penticton was a recent guest at the home of Mr. and Mrs. B. F. Gummow. She returned with some friends who motored up for her on Sunday morning.

Road Foreman S. H. Murdin and his crew succeeded in making the Peachland-Summerland bench road passable for traffic by Saturday night last over the portion of which they had charge, while the Summerland end was ready by Monday noon. This does not by any means say that the road is in real good shape, as the idea was to hurry the work to make it passable as soon as possible in case the lake shore route became entirely unsafe to travel. They expect now to go ahead improving the road where it needs it in order to get it in as good shape as funds will allow. Even at the present stage, however, it is reported to be in fair shape, and there are possibilities of making it quite a good road. The lake shore road is considered by many to be none too safe in several places and it is fully expected that with a storm on the lake much of the road would be almost completely destroyed.

Mr. D. J. Welsh of Summerland, with his wife and son, motored up on Sunday last to Westbank where Mr. Welsh conducted union service in the school house in the absence of the pastor. He returned to conduct the service in the Methodist church here in the evening.

Mr. R. E. Baxter, postmaster and druggist at Hedley, B. C. and Mr. J. Robinson, general merchant of the same town, and their wives, motored up to Peachland on Friday to pay a short visit to Mr. and Mrs. George Keyes, old friends of former days in Moose Jaw, Sask. They returned south on Sunday morning.

Mrs. Harrison and baby left last week en route for Duncan, where she expects to holiday for a portion of the summer.

Mrs. J. L. Elliott was a passenger north on Saturday morning having been called to see her sister, Mrs. Burch, who has been suffering a severe illness for some weeks.

After a couple of months spent in Penticton, Mr. and Mrs. L. D. McCall returned to their home here on Saturday morning. They were accompanied by Mrs. Allan McDonald and baby and Mrs. McDonald's mother, Mrs. A. S. McCall, of Gibson's Landing, who has been in Penticton with her daughter for a few weeks. The latter will visit in our town for a few days. Mr. McDonald stopped off the boat on Saturday evening to spend Sunday here with the family and friends and took his post on the Sicamous Monday morning.

Mr. Tripp, representing the firm of Crehan, Mowatt & Co., is spending a few days in town making an audit of the municipal, fruit and water accounts in the municipal hall.

Mr. Orr was a passenger south on Saturday evening to spend the week end in Penticton with relatives.

Evangelists Scott and Bowle who conducted meetings in the Orange hall for a couple of weeks held their last meeting on Sunday evening and left on Monday by auto to conduct a series of meetings in Westbank.

Mrs. Dosland and Miss Dimock were visitors to Kelowna on Monday.

After a week end visit with her sister in Kelowna, Mrs. J. L. Elliott returned Monday evening. Owing to the illness of her sister, Mrs. Elliott brought her sister's baby home with her. Later report is to the effect that Mrs. Birtch's health is improving.

Francis Cousins returned home recently, having been obliged to stop work for a few days on account of a sore knee, but expects to return soon to DeMouths Mill where he and his brother, Eddie, are employed.

Mr. and Mrs. McHollister arrived on Monday evening to spend a few days with her parents, Mr. and Mrs. J. Winger.

The following is a clipping from a recent Moose Jaw Evening Times, giving an account of the sudden death of Robert H. Riddell of that city, who was the son-in-law of Mrs. H. McDougall, and brother-in-law of Mrs. P. N. Dorland, both of Peachland. Robert H. Riddell passed away very suddenly on Saturday afternoon at the age of 60 years. Mr. Riddell went to the basement of his home and after some time he was missed by members of his family and when found life was extinct. Deceased was one of the original settlers in the Moose Jaw district, coming here in the spring of 1883 from Ontario. Mr. Riddell's family have been residents of the city during the 38 years, though Mr. Riddell has operated several farms in the district. Two of these farms now comprise the subdivisions of Richmond Park and Earnscliffe. Five years ago Mr. Riddell suffered an attack of inflammatory rheumatism, and early last winter it returned, with the result that he was confined to his bed the greater portion of the winter. He was around the house during the past few days and Sunday, although not feeling well, intended to have dinner at the home of his daughter, Mrs. J. E. Rundle, who was to call

for Mr. and Mrs. Riddell with her automobile. During his life Mr. Riddell was a staunch Conservative in politics, and a Presbyterian. The funeral will take place on May 31 at 2 o'clock, from the family residence."

Col. Donnelly, assistant district engineer, paid an official visit to town on Monday evening last, and with Mr. W. Dryden, motored over the newly opened bench road between Peachland and Summerland, making an inspection of same, on Tuesday.

Mr. W. J. Williamson's wife and daughter and son arrived last week end from Brandon, Man., and are getting settled in their new home recently bought from Mr. William Ort.

Vernon Winger passed through on the Sicamous on Tuesday morning from Summerland, on his way up to the assizes in Vernon where his case is coming up. His father, Mr. W. J. Winger, and his brother-in-law, Mr. H. McHollister, left on Wednesday morning to appear as witnesses on the case.

The regular monthly meeting of the Women's Institute was held in the municipal hall on Tuesday afternoon and took the form of an "at home." Special invitations had been sent out to all the ladies in the community. The appointing of delegates to attend the convention to be held in Vernon next week was part of the business transacted. Mrs. Keating and Mrs. Buchanan being appointed. Also a child welfare committee was appointed consisting of Mrs. Williams, Mrs. Murdin and Mrs. Dryden. During the afternoon refreshments were served and a social hour much enjoyed by about fifty ladies. Mrs. Wright and Miss Betty Buchanan each rendered a solo very acceptably and Mrs. Stewart enlivened the hour with instrumental selections.

Mrs. J. Michael and Mrs. Ekin returned Tuesday evening after a pleasant visit to the coast.

After spending a few days in town with relatives, Mrs. Allan McDonald and her mother, Mrs. A. S. McCall of Gibson's Landing, returned to Penticton on Tuesday.

BALLOTING ON BYLAW POSTPONED

(Continued from Page 1).

them. The truth and if we expect to obtain settlers we must go ahead and build the school; otherwise we must tell them that we cannot provide for them and advise them to go to other points. From the taxpayers' point of view we were apt to take a narrow point of view. By providing the school and encouraging the coming of monied citizens, we lighten taxation which, for school purposes, could and should be broadened.

Mr. E. R. Simpson spoke along the same time, and during his remarks it was brought out that the new school would add to the taxes of the average land owner seventy cents per acre.

The system of financing was dealt with by Municipal Clerk Nixon. In opening he pointed out that last year it took ten mills to meet the deficit on the irrigation system. Speaking of the method of raising the loan, Mr. Nixon explained the nature of the sinking fund bond and the serial bond. The latter was not new in the commercial world, but was not commonly used by our municipalities.

Mr. J. G. Coulter White said that the council had elected to issue this kind of bond and if the bylaw were turned down we would have no high school and many children would be kept out of public school. Those who had been responsible for the defeat of the bylaw had a big sin to answer for.

Mr. W. J. Robinson was another supporter of the bylaw though favoring the serial bond. Mr. Nixon quoted correspondence from bond-houses and others to show that as good a price would not be realized for the serial as for the sinking fund bond.

The meeting was thrown into a state of confusion when the statement was made by Mr. J. W. Logie, Prof. Broad and others, that the petition was out of order because of the time in which it was presented.

Stating that this was unfortunate, Mr. E. R. Simpson proposed a motion that the council be requested to re-submit the bylaw at the earliest legal date, which was carried by a large majority.

issue and before the meeting adjourned stated that all were of accord in that the school was necessary and on other essentials with the exception that he still stood for the serial bond, and asked that the bylaw be changed in this respect so that all might support it. The style of school proposed may have had something to do with the defeat of the bylaw, but in this he was not greatly interested, giving the nature of the bonds as his reason for voting against the bylaw. He argued that the serial bond was as readily sold, and in closing suggested waiting a while before building. He wanted to see a good building, and something that would be a credit to Summerland. Before sitting down, Mr. Logie took an apparently pessimistic mood with respect to fruit growing conditions which did not appear to be very well received.

Trustee Garnett condemned this attitude and took quite the opposite view. W. C. Kelly spoke in favor of the bylaw and advised keeping within our financial ability. The architect had said that the proposed building met all the requirements. He had always had some considerable respect for Mr. Logie's views on municipal finance, but this was lessened after hearing his remarks. Mr. Logie had based his objection on the four per cent. interest paid by the bank. Municipalities all over the country were investing at six per cent. and more. An investigation of the issues all over the country offered revealed no serial bonds, with one exception. Four provinces recently issued sinking fund bonds of 20 and 30 years to yield six per cent. or more, and all of these were open to municipalities for investment. Serials were payable yearly and if we should default we would have a black eye for many years. We were living here under advantages almost equal of those of the city (calls of "better, better") and we should maintain our schools at a high standard.

Mr. J. G. Coulter White said that the council had elected to issue this kind of bond and if the bylaw were turned down we would have no high school and many children would be kept out of public school. Those who had been responsible for the defeat of the bylaw had a big sin to answer for.

Mr. W. J. Robinson was another supporter of the bylaw though favoring the serial bond. Mr. Nixon quoted correspondence from bond-houses and others to show that as good a price would not be realized for the serial as for the sinking fund bond.

The meeting was thrown into a state of confusion when the statement was made by Mr. J. W. Logie, Prof. Broad and others, that the petition was out of order because of the time in which it was presented.

Stating that this was unfortunate, Mr. E. R. Simpson proposed a motion that the council be requested to re-submit the bylaw at the earliest legal date, which was carried by a large majority.

Pointing out the situation with respect to the high school which would result from the delayed action, R. E. White suggested that the meeting give expression to its views on this subject for the guidance of the board, and the motion of Messrs. Simpson and MacLachlan that the trustees be asked to make provision for the high school was carried without a dissenting voice.

PASSING EVENTS LOCAL, PERSONAL, SOCIAL & OTHERWISE

As we go to press, information is received that the result of the Stewart case held today is that the defendant has been sentenced to one month's hard labor, and bound over to keep the peace for one year.

A daughter was born to Mr. and Mrs. Reg. Coldwell on Tuesday last. Miss Hattie Phinney has been the guest of Mrs. Lipsett for a few days.

A son was born to Mr. and Mrs. D. Taylor, Garnett Valley, on May 30th. A daughter was born to Mr. and Mrs. Andy A. Fenwick on Thursday, June 2nd.

Mr. and Mrs. A. J. Beer went out on the Sunday noon train for a visit of a week or more in Vancouver. From several sources we have learned of the picking of a few ripe cherries on Sunday last, June 5th.

Wm. Ritchie is re-opening his old office and will be selling box shooks of all kinds during the fruit shipping season. WRIGHT—At Renfrew, Ontario, May 28, born to Mr. and Mrs. Walter M. Wright, a daughter, Audrey Jean.

Mr. M. L. Grimmer of Merritt, Provincial Grand Master A.F. & A.M., was in Summerland on Wednesday, on an official visit to the local lodge. Mrs. C. W. Haddrell was the subject of a major operation at the hospital yesterday, the first in the new institution. She is reported to be making satisfactory progress.

Engineer R. A. Barton was the successful one of four candidates for the position of municipal engineer at Penticton. His duties with that municipality commence on June 15. Mr. and Mrs. R. Graham and daughter, Clara, arrived here from Brandon last Friday and are guests of Mr. and Mrs. R. Johnston. The visitors have many acquaintances here, having been residents of Trout Creek Point and Summerland for a year or two.

H. W. Harvey has recently added some additional machinery to his woodworking plant, and in addition to making much of the material used in building he intends to take up furniture and cabinet work. He expects to employ several hands on this branch of work throughout the year.

Notwithstanding the fact that the shore road between Summerland and Peachland has been officially closed, there are motorists still traveling it, preferring to do so rather than manipulate the tortuous bench road. By using care they have so far been able to get by the breaks in the road made by the lake.

A large party of members of the Young Peoples' Society of the St. Andrews congregation motored to Okanagan Falls last Friday, the King's birthday, where a pleasant outing was enjoyed. Most of them stopped at Penticton on the return journey to attend the theatrical performance at the Chautauqua.

Jack Lawler returned a few days ago from a motor trip south. Everywhere he found evidences of flood waters, the roads being inundated in places. Along the Okanagan River south of Oroville he had to make a detour. At some places the river had spread out over the fields, sometimes running in several courses and cutting homes off so that boats were necessary to reach them.

Col. Donnolly, engineer in charge of the roads in South Okanagan, was a visitor in Summerland on Tuesday, having motored over the recently re-opened road from the north. While here he took up with the municipality the matter of improving the Okanagan Highway through the district. Under the new Act the municipality pays twenty five per cent. of the cost of upkeep.

A son was born to Mr. and Mrs. James Mitchell, Jr., on Sunday, June 5th. On Wednesday, June 1st, a daughter was born to Mr. and Mrs. T. C. Ross of Happy Valley.

Miss Gertrude Darke of the Dominion Bank staff is spending a two weeks vacation in Calgary and other Alberta points. Mrs. J. Le Roy Ross of Winnipeg arrived here this week to spend the summer with her mother, Mrs. G. I. Gray, at Grason Ranch, Paradise Flat.

The regular meeting of the Ladies Hospital Auxiliary will be held at the home of Mrs. T. B. Thornber on Tuesday next, the 14th inst., at three o'clock. Having about completed their motor tour on the coast, Mr. and Mrs. Muir Steuart will leave Vancouver this week end on the home journey, according to advice received by friends here.

Mr. Gray, who has been clerk in charge of the upper office of the Dominion Bank, has been transferred to Calgary. His successor here is Mr. E. D. Kellman, who comes from Vancouver. While proceeding along the lake shore road north of the C.P.R. wharf, Gordon Blewett in George Gartrell's car met an auto and in endeavoring to pass in a narrow part of the road found he could not do so, and put on the brakes. The latter, however, would not hold, and the car went over the bank into the lake, fortunately without any mishap, although to an observer on the spot where he left the road, it seems a miraculous thing that the car did not overturn.

There has recently reached The Review editorial desk a beautifully gotten up folder advertising the city of Vancouver. It is nicely illustrated and well printed and is issued by the Vancouver Publicity Bureau. The folder comes to us "with the compliments of E. B. E. Reesor, editor," of the bureau. SAYS LAKE DAM WAS OPENED EARLY

Man in Charge of Dam at the Foot of Lake Makes Statement

With respect to the unusually high level of the lake and current complaints that the dam at the foot of the lake was not opened soon enough, the Penticton Herald says: "Information that the caretaker of the dam at the Summerland bridge started opening it up this year about a month ahead of any previous season was obtained by the Herald this week in an enquiry in connection with the high water on the meadows. There had been many complaints to the effect that one of the reasons for the flooding of the meadows was that the dam had not been opened up before high water came. Thus when the lake level rose the river was unable to take care of the greatly increased supply.

Mr. W. A. Wilson, who is in charge of the dam, was asked by the Herald for information with regard to the situation. He stated that last year extreme high water in the lake was at June 30 when the level reached 2.1 feet above low water mark. This year the extreme high level so far was on May 25 when the water stood at 3.1 feet above low water mark, or a foot higher than the previous year. This year he started opening the dam a month before any previous year, making a start on April 22. From that date to May 10 he took out the whole 32 top logs in the dam, thus opening to its full capacity.

The lake level started to rise on April 25, rising slowly to May 5, when it began to climb rapidly. At the present time the water is flowing over the highest point of the cribbing in a flood 18 inches deep and some of the water is flowing around the ends of the dam.

# LATE REPORT ON CROP CONDITIONS

## Weekly News Letter Covering Fruit Districts of the Province

Damage in a small way to fruit crops is reported in some of the northern fruit districts according to the weekly crop report issued by District Horticulturist W. T. Hunter. The bulletin reads:

**Vancouver Island and Gulf Islands**  
The first ripe strawberries of the Marshall variety were picked at Gordon Head on May 26th. Magoons and Paxtons are sizing well. The warm weather of the last few days has brought the strawberry crop along in good shape. Picking should be general on early varieties in a week's time.

There is considerable strawberry weevil showing up, but prospects for a crop are good so far.

The rain fall for May which was above the average was of great benefit to the strawberry crop. Victoria had 304 hours 36 minutes of bright sunlight for May, an average of almost ten hours daily.

Strawing of the strawberry plantations is in general vogue at the present time. By the end of the week practically all patches will be strawed.

**Lower Mainland**  
Weather conditions have been very favorable throughout the Fraser Valley for all farm activities. On top of last week's rain and a well moistened soil, we have had excellent growing weather. Towards the end of the week there has been a day or two of hazy weather very suitable for planting out.

Strawberries are coming in and first shipments are being made from the district the latter part of this week. Dependent upon weather the showing is excellent for a big crop, the fruit setting being exceptional and fruit very uniform.

Raspberries are also looking well. The bloom is coming on fast and the bees getting busy.

The opinion among the growers in the district appears strongly in support of the proposed co-operative cannery at Hatzic. The matter is now in the hands of the B. C. Berry Growers Association. Plans are in hand this year to send berries by water to Hatzic from other districts

on the river for shipment from that point.

**Okanagan**  
A heavy frost occurred in some parts of this district on the night of May 27th. Some injury has taken place to apples, stone fruits and strawberries, but at the present time it is impossible to accurately estimate the damage.

No serious frosts have occurred since May 27th.

Most growers have their Calyx spray on now. Moisture conditions are good but rain would benefit grain and vegetable crops.

**Vernon**  
Growing conditions in the Vernon district during the past week have been very favorable, but owing to the drying action of the steady wind which has prevailed, more or less the whole of the week, a good steady rain would be of great benefit to the crops.

The damage caused by the frost during the last week of May does not seem to be as severe as was anticipated at the time it occurred. As the fruit is now steadily developing it is becoming apparent that the setting of fruit is not as heavy as the blossoming indicated. This is not a serious fault as there is apparently enough of a set to insure a good crop and the lighter set will save both time and money in thinning. More on this subject can be said within the next two weeks.

All ground crops are coming along in good shape.

**Kelowna**  
Kelowna district was visited by an unexpected frost on the 26th and 27th of May. On some of the lower lying orchards some damage was done, particularly to prunes and pears. It is impossible yet to tell the amount of damage done, but at the present time it does not seem to be as serious as previous years. It is interesting to note that on one orchard in the Rutland section where the W. C. Scheu heaters were in operation practically the whole of the crop was saved.

Tomatoes and truck crops also suffered but to no great extent.

**Penticton and Keremeos**  
In the Keremeos section the apples are well formed and appear to be of normal size for this period. Pears are dropping rather heavily on some lots but the crop on the whole will be good. Tomatoes and other truck crops are looking well although the acreage is much smaller than last year. The district as a whole is in

good shape and haying has commenced.

Apricots are sizing up well in the Kaleden section and will require quite heavy thinning. Apples are looking very well. Sweet cherries appear to be light.

In the Penticton and Dog Lake sections apples are developing well, also pears. Very little dropping has been observed so far and heavy thinning of most varieties will be necessary in order to secure well sized fruit. Sweet cherries and peaches promise to be only fair to light. Apricots are sizing up well and a little thinning has been done.

**Summerland**  
Apples have set well in most all varieties. The cherry set is lighter than last year.

Although the weather turned cold no injury from frost has been reported in this district. The weather has turned warmer and the vegetable crops are coming along in fine shape.

**Creston**  
Considerable rain fell during the night of the 26th throughout the valley, which changed into snow during the early hours of the morning. The temperature continued low the greater part of the following day.

During the early part of the week growers were applying the Calyx spray to McIntosh, Wagner, Wealthy and early apples.

Strawberries on southern slopes are very promising. Early bloom set well and if we get continued fine weather many of the shippers will be picking within the next two weeks.

Sweet cherries have set a medium crop, although on the whole it will be heavier than last year. This condition may be partly due to the continued drought last summer and the severe frost the year before. The same may be said of the other stone fruits.

At Camp Lister over six thousand trees have been planted in orchards on the square system thirty feet apart. This week the last five acre tract being planted. This makes a total of twenty nine settlers with trees planted on their first five acres. Oats, clover and potatoes are the principal intercrops on the new land, with a small area in vegetables.

The period of bloom up to the present was favored by warm, sunny weather. The prospects for a good crop are very bright. Wealthy and Wagner are a little patchy, about seventy five per cent. bloom. Jonathan, Delicious, Ontario and Rome Beauty are good.

**Onion Maggot Control**  
NOTE.—Growers of onions should not forget that all "culls" and "volunteer traps" should be destroyed by burning not later than the 15th in order to control the second family of the onion maggot.

# SERIOUS MOTOR ACCIDENT AT FALLS

## Three Men Badly Injured When Car Plunges From Road

When returning to Penticton from Okanagan Falls last Friday evening, June 3rd, a Penticton car with four men ran off the road a few yards north of the bridge crossing the Okanagan River at the Falls, and all four men were more or less seriously injured. The car was driven by Harry Hughes, jitney driver, and with him were Walter Stout, J. Flanigan and W. J. Armstrong, all of Penticton. The car left the road at a turn near the McClelland house and rolled down the bank, falling on to the grade of an old road some dozen feet below, and continuing to roll farther down, landing in growing shrubbery at the bottom. The accident was soon discovered, among those early on the scene being G. N. Gartrell of this place, the sight being a horrible one with much blood in evidence.

Hughes and Stout were seriously injured and Flanigan only a little less so. Armitage with some assistance was able to walk to a nearby house. The three former named were placed on a truck and taken back to the hotel at the Falls, Dr. Apleck being telephoned for in the meantime. Mr. Armitage was taken to the same place in a car a little later. Afterwards Messrs. Hughes and Stout were taken to the Penticton hospital, and Flanigan to the Nicola where he is employed, and Mr. Armitage to his home.

Hughes, whose case was considered the worst, sustained severe injuries to his head and the outcome was in doubt, and Stout's condition was also considered serious.

The big Willys-Knight car which Hughes was driving is said to be a total wreck.

Frank Stuart and Archie Chisholm, who both supported his evidence that he was not going more than 15 miles per hour, that he had just turned a corner and saw the horse and rig coming and could have stopped much shorter than he did. He was sure the apparent speed was greater to Mr. Dunsdon than it really was.

When pronouncing sentence, Mr. Hutton declared the whole Garnett Valley road was a dangerous one.

## DEPARTMENT IS READY TO ASSIST

Supt. Helmer Tells of Conditions Under which Grant Will be Given

**\$3523 ASKED**

For by Council to Improve the South Main. Farm May Be Extended

Desiring to improve and enlarge at certain points the irrigation channel known as the south main and the main ditch and flumes leading round south of Giant's Head, which work would render it possible to give a better service to the experimental farm, the council has requested Ottawa to contribute to the expense of the cost of this improvement. Early in the year a statement was sent to Ottawa, accompanied by the request that the sum of \$3,523 be contributed by the government towards this work.

Supt. Helmer of the experimental farm on Tuesday advised that the department had consented to make this contribution under certain conditions. Mr. Helmer stated that at first the department was opposed to making the grant as some former councils had not been in sympathy with the farm, and that the previous foreman took a similar unfriendly attitude. During the last visit of the director to the farm Mr. Helmer told him that there was now a change of attitude and that the council and foreman were endeavoring to give a good service. As a result of his representations, Mr. Helmer was now in receipt of a letter from the department expressing a willingness to give the requested grant.

One condition stipulated that the money must be spent on the line serving the farm. This Mr. Helmer declared had not been done with the previous grant. He also wanted some assurance that the farm would be given every possible consideration, and that if more land was put under irrigation, the municipality would be willing to give an additional supply during the time that Trout Creek was in flood. Mr. Helmer explained that the authorities were considering acquiring 160 acres additional bench land from the Indian reserve.

To a question from the reeve Mr. Helmer replied that the department would of course pay for the cost of enlarging the system where necessary to carry this additional water. Another requirement stipulated by the department was that the proposed grant be expended under the direction of a competent engineer. Mr. Helmer was asked to put the proposition from the department in writing.

At the June meeting of the Penitentiary Hospital Board it was decided to raise the general level of rates fifty cents a day, starting July 1st. An exception was made of maternity cases, the rates for which will remain as before.

## NEW STORAGE BUILDING TO BE READY BY SEPTEMBER 1

Robertson and Partners to Get Contract. Work to Start First of Next Week. Foundation Now Complete

Robertson & Partners are the successful tenderers for the construction of the big frost proof building to be erected by the Summerland Storage Co. This firm will complete today the construction of the foundation of the building done under separate contract.

The decision to accept the proposal of the Robertson concern was reached late last night at a meeting of the directors of the Storage Co., at which the directors of the Fruit Union were represented. Details of the contract are not available, but we understand that the plans have been altered to leave off the third storey, but that this may be added at the option of the Storage Company during the period of construction. The head of the contracting firm is expected here within a day or two to close the contract. Work will be started on the building the first of next week and it is to be completed by September 1.

Seen this morning, Engineer Robertson in charge of construction, said that he expected 15 carpenters would be employed and about a dozen bricklayers with eight or ten laborers.

The building will be 300 feet by 64 feet, and of hollow tile construction.

Former commander of the Canadian forces in France whose appointment as Governor-General of Canada is officially announced.

## OUTING AT FARM WAS GREATLY ENJOYED BY VISITORS FROM NORTH

United Farmer Party from Vernon Learned Much by Day Spent Here at Experimental Station

Thirty members of the U.F.B.C. at Vernon visited the experimental station yesterday and were, according to their own words, well repaid for their trip down from Vernon. The visitors were greeted on their arrival by Supt. Helmer and were shown over the garden before lunch, some of the visitors, finding their way to the strawberry plots, didn't seem to care much about stopping for lunch. After a delightful lunch Mr. Helmer, in a short speech, welcomed the party and told them how glad he was to see them taking an interest in the station, saying that he and his staff would be glad to see visitors at any time and would try to answer any questions and explain any points about which there might be doubt.

Mr. French, the president of the Vernon local, replied, thanking Supt. Helmer for his pleasing address of welcome as well as for the excellent lunch.

During lunch Mr. Galbraith and his party, who had been left behind at the Kelowna ferry, arrived and were enthusiastically received. The afternoon was spent in a trip over the farm when Mr. Helmer, explaining that the station was only six years old and should be twenty, told of the different methods used in the treatment of orchards there. He explained that there were six different treated orchards on the farm, the first clean cultivated, giving nothing back to the soil, the second the Wenatchee method, alfalfa mulch, the third, for which Mr. Helmer solicited attention, was treated according to what is known as the soil method, a combination of grasses and vegetables, adding humus and nitrogen to the soil. The fourth had been consistently in clover. This had been doing so much harm that he had decided to remove it entirely as, even as an object lesson it was too expensive. This orchard has now been planted to alfalfa and, owing to its having been planted on a firm seed bed, this showed tremendous growth, interesting the Vernon growers very much indeed. The fifth orchard was treated as a truck garden, as many of the growers treat their orchards. The sixth orchard was kept in a five year rotation, three years clover, one manure, and one wheat. A great many questions of interest were asked and explained by Supt. Helmer, Asst. Supt. Mann and Mr. Palmer, the orchardist. However, space will not permit further elaboration of their work here, including their water methods, seed methods, varieties of silage grown, treatment of soil, etc., but, from the questions asked it was obvious that the visitors were very much interested.

Returning to the pavilion, stopping in at the office on the way, the party was served with tea, strawberries being in evidence again. Col. Edgett again thanked Supt. Helmer and his staff for what he called an educational treat, saying that the work here had been stupendous and the visitors felt amply repaid for the few hazards of the trip down. He was very interested with the station motto of "Help Others to Make This a Better Canada." Mr. Laidman seconded the motion of thanks to Mr. and Mrs. Helmer and the staff, saying that he was satisfied that money expended at experimental stations was justified and advised more to avail themselves of the opportunities afforded.

The party included Col. and Mrs. Edgett, Mr. Laidman and son, Miss Wiseman, Mr. and Mrs. Galbraith, H. H. Evans of the department of agriculture and Mrs. Evans, Sam and Tom French, Mr. B. Robinson, supervisor of agricultural education, Mr. T. Richmond, Mr. J. R. Brown, Mr. Wynn of the Yorkton, Sask., Enterprise, and Mr. Ed. Spice.

LORD BYNG

## THINNING URGED UPON GROWERS

District Horticulturist Points Out its Special Importance This Year

## BLIGHT AT KELOWNA

Emphasises the Importance of Keeping Orchards Free of Cankers. Crop Prospects Continue Good

District Horticulturist W. T. Hunter gives the following report covering crop conditions during the past week.

Okanagan.

On Monday night heavy rains fell throughout this district. This will be of great benefit to small fruits, especially strawberries and vegetable crops.

Indications are that the "drop" will be heavy on apples. In most orchards this will merely effect a saving in the cost of thinning, however, as the trees are loaded far past capacity.

Some growers have started thinning their early varieties, and it is expected that thinning will be more thoroughly carried out this year than in the past.

The fruit is developing well, and trees are showing more vigor and growth than for several years past.

Vernon.

Rain to the extent of 1.17 fell on Monday night and will be very beneficial to the ground crop as well as to tree fruits. Haying is about to commence.

The fruit crop is setting well and former indications of good crop are being upheld.

It is very evident that much thinning of the fruit will have to be done in order to secure a crop of high quality. Much emphasis is being placed on this important orchard practice at this time by all those interested in horticultural work in the Valley.

Kelowna.

During the past week a very severe outbreak of fire blight has occurred in this district. Greater care must be taken during the pruning season to see that every, and not nearly every, canker is carefully cut out. If every canker is removed then the chance of an outbreak is reduced to a minimum, but if one single canker is left the grower is not only laying himself open to trouble but also his neighbors. In visiting several ranches during the past week, and on examination of the trees effected, small

(Continued on Page 6)

## STEWART CASE TO HIGHER COURT

Appeal of Assault Case will be Heard at Fall Assizes

Joseph Stewart, through his solicitor, W. C. Kelley, has appealed against the sentence of one month's imprisonment with hard labor which he received in the police court last Friday afternoon. The case will be heard at the Assizes in September.

The case as tried was under the charge of common assault, the second or more serious charge having been withdrawn. According to the evidence, the trouble between the defendant and his wife, who have been living apart, was precipitated by her and there was considerable provocation before Stewart struck her, which was not denied by the defendant. Mrs. Stewart brought Dr. Andrew and Ralph Gillespie, a lad of 12, as witnesses. According to medical evidence, she had received a severe thrashing, fist and foot having been used.

It was brought out that the assault occurred at the home of Mr. Gillespie, on the Robinson ranch, where Mr. Stewart had been getting his meals, and where it was said, Mrs. Stewart was working, and when Joe went in for breakfast, the trouble was started by Mrs. Stewart making accusations against him, and continuing to provoke him, until his temper was aroused.

The only witness for the defendant besides himself was Walter George Say, lately employed by Thos. Pilkington, who told of the verbal abuse received by the defendant.

The charge of assault having been admitted, Major Hutton found the accused guilty and imposed the sentence already mentioned.

## PRAIRIE FARMERS ON ORCHARD VALUES

An interesting evidence of the lack of knowledge of conditions in this valley of fruit farms is contained in a recent enquiry received by a local real estate agent. A prairie farmer writes that he has 320 acres of land which he would exchange for 100 acres of bearing orchard. He states that he has been offered \$38 per acre for his farm, and this would mean that he would pay \$121.60 per acre for 100 acres of bearing orchard. We cannot believe that the enquirer has any idea of what he would be undertaking in assuming charge of 100 acres of fruit trees.

Another writes wanting a small place close to a school with house, barn, water, etc., for which he would be willing to pay \$1,500.

Robertson & Partners who are constructing the foundation for the storage warehouse here have been awarded a contract for building a new road in the vicinity of the Soldier lands near Oliver. The new section of road will be 9 miles in length and will run from McIntyre Creek to the demonstration plot and will in a general way follow the course of the river at a height above it to insure avoiding any floods.

M. S. Peacock and his partner, H. Leir of Penticton, have purchased a box factory at Langley Prairie which they are shipping to Penticton to be operated in connection with their mill there. Mr. Peacock went from here this spring to enter the milling business with Mr. Leir.

## Two Prominent Divines

Left—The Right Rev. J. A. Newham, Bishop of Saskatchewan since 1903, who has sent in his resignation which takes effect in September.

Right—The Right Rev. Joseph Lofthouse who has resigned the See of Keewatin. He has worked in north west Canada for nearly forty years.

## WORKMAN DROWNED IN RIVER AT OLIVER

Jos. Naylor was drowned on Sunday afternoon at Oliver while bathing in the river near Camp 4. It had been his custom to take a plunge in the pool there. No one was with him at the time, but men in camp heard his call for help. They saw him being carried down the river and clutch at over hanging shrubs, but these failed to hold, and he quickly disappeared and was lost to sight before aid could reach him. According to late reports the body had not been recovered. The deceased came from Alberta and owned teams working on the government project.

## EXCURSION TO WENATCHEE WAS ONE OF PROFIT TO FRUIT GROWERS

Party Headed by Supt. Helmer Cordially Received by Orchardists in Washington Fruit Districts

Asked for a write-up of the excursion last week of fruit growers to Wenatchee, Mr. R. H. Helmer, Supt. of the experimental station here, who conducted the party, has kindly furnished The Review with the following:

The trip to Wenatchee was most instructive. The roads were in good condition and the weather fine and for the information of some of the writer's many friends he did not break any of the laws of the U.S.A.

Thinning and the alfalfa mulch system were the two main points that we wanted to observe. Thinning was just being started and I think we all were surprised at the small amount of thinning that is necessary on their trees. We, at first, thought that they had a very light crop, but on asking several of the growers, Mr. Darlington and others of the horticultural men, we were assured that the crop was heavier than the previous year. Their method of thinning does not differ from our own, but they do make a point of seeing that every tree is gone over and those who were fortunate enough to hear Mr. Hunter's excellent talk in the orchards on Wednesday, had gathered the same idea that the Wenatchee people are carrying out. Some of our party to Wenatchee tried to obtain a definite rule for the thinning of apples from Mr. Thayer, one of the most successful growers in Wenatchee. His answer was that thinning was the same as all other business, the man with the best judgment made the best thinner. No two trees are alike, each has its own problem.

Collar rot is a big problem with them as with us and they are taking no chances with their trees, they uncover them in the spring, and allowing the air free access to the collar and some main roots, and our growers who are troubled with this or suspect its presence will do well to follow this method, filling the dirt in again in the fall.

The alfalfa mulch I think appealed to us all notwithstanding the fact that Mr. Darlington had the misfortune to have had part of his orchard burnt out by a neighbor lighting a brush pile in a very high wind before the alfalfa had made much growth and the mulch quite dry. Mr. Darlington assured us he would not change his methods one iota and by our own observations we cannot blame him as he has this year the heaviest crop we saw in Wenatchee district. We again visited some of the orchards in which hay had already been cut, checking them with orcharders under the mulch system the trees

where hay was being taken looked as though they were wondering why they had been planted in a hay field, while the others were just on tiptoe with vitality. Vetch is being used with good success, but the labor is much greater.

We all came back feeling that we wanted to go again and felt that it would well repay any of our growers to make the trip. We found Peter Pan the best place to have meals and the Ellman Hotel is quite nice, only ask for a room facing out.

I cannot say too much for the kindness of the men we visited in their orchards and it is a pleasure to go and discuss problems with men who are so generous with information and so courteous to strangers going into their district and the kindly interest in our doings in British Columbia.

In conclusion: I came away with these outstanding points in mind: Soil building must go on year after year. Whatever method we employ we must do it thoroughly. Thinning must be done systematically and well. Individual attention to trees pays, and spraying must be included in our orchard operations.

According to recent announcements, the provincial government will have engineers make a survey of the bench on the Indian reserve west of Penticton for the purpose of determining the best method of irrigating it. The tract comprises about 1000 acres, and three methods of providing water have been suggested, viz: from storage on Trout Creek, from storage on Shingle Creek, or by pumping from Okanagan Lake with electrically driven pumps.

## ASK INCREASE TO HOSPITAL

Delegation Proposes Doubling Money Granted to Local Institution

## COUNCIL MEETS

Change Proposed in Location of Travelled Road in Gulch South of Town

Representing the Hospital Society, Messrs. Lipsett and Helmer asked the council on Tuesday for an increased municipal grant. They suggested that the present grant of \$500 be doubled and that the hospital be given free light and water and a grant of \$3,000. No definite action was taken on this at Tuesday's meeting.

Telling of the very unsatisfactory service he is receiving, Capt. Temple urged for early action to improve the service through the pipe line covering the front benches. The council fully appreciated the situation and Capt. Temple was assured by the reeve that the matter was receiving consideration, but that improvements can only be made after the passing of a money bylaw.

Appearing for D. C. Barr, D. C. Kelley complained that James Fyffe had entered the pound and taken out some of his cattle impounded by Mr. Barr without the formality of paying impounding and pound fees. This is receiving the attention of the council.

K. McKenzie complained that the creek running through his property was saturating the soil so that he could not work it, and asked that the council deepen the channel of the creek, or make a new channel for it. The council took the view that this creek was not, in any way, a part of the irrigation system, and that the municipality was not responsible for flood conditions or the damage it might cause, and suggested that Mr. McKenzie and others affected should get together and deepen the channel.

Scott Darkis, who with two or three others own bench land on the east-side of Garnett Valley, not now served by the irrigation system, suggested that a pipe extension could be made at small cost to cover this land. He was promised that this matter would be looked into.

C. H. Eley suggested a change in the grade of the pipe, or a valve, that he might have better pressure from the domestic pipe line running past his home. Referred to water committee.

The works committee was instructed to move the sign posts and restrict the dumping area at the nuisance ground and make the necessary roadway, and also to make repairs and improvements to the road leading up the hill beside it.

An extension of the culvert at the foot of the gulch road was also ordered. The upper end of the present culvert begins well within the road allowance, and is dangerous to traffic.

(Continued on Page 2)

## SUMMERLAND WEATHER REPORT

Below is a report furnished by the Dominion Experimental Station here for the week ending Tuesday:

Date, 1921	Max.	Min.	Rain	In. S.	Sun- shine

The publication or rejection of articles is a matter entirely in the discretion of the Editor. No responsibility is assumed by the paper for the opinions expressed by correspondents.

FRIDAY, JUNE 17, 1921.

## UNKNOWN MAN DROWNED IN LAKE

### Body Found Floating Near C.P.R. Wharf at Penticton

A man's body, which had evidently been in the water for some days, was found in the lake Friday morning near the C.P.R. wharf at Penticton. Mr. A. A. Swift, chief clerk at the K.V.R., discovered the corpse floating head above water just off the end of the pier.

Provincial Constable McConnell took charge of the matter, seeing to the removal of the body from the water. The long immersion rendered it impossible to make any attempt at identification as the man's face was disfigured beyond any chance of recognition.

The only distinctive details obtainable from observing the corpse after its removal from the water were that the man was evidently on toward middle age, clean shaven and dressed in a black shirt, rough trousers and heavy shoes. A large crowd of the curious gathered at the wharf when the tragic discovery was made.

The inquest failed to throw any light on the identity of the man. Mr. A. A. Swift gave evidence of the discovery of the corpse at 8:30 Friday morning. Dr. Affleck, who performed the autopsy examination, informed the court that he had been unable to find any signs of violence or disease. He judged that the unknown man had met his death through drowning. There was no evidence of other cause of death.

He placed the man's age in the neighborhood of thirty five and estimated that the body had been in the water from two to three weeks. The man was five feet ten inches tall and weighed about 160 pounds. There were no papers or other means of identification on his person, the only contents of his pockets being a watch, a small lady's ring and a five cent piece. The jury turned in the verdict of "death by drowning of an unknown man."

## ASK INCREASE TO HOSPITAL

(Continued from Page 1).

Writing for the Development Co., Mr. J. L. Logie objected to the survey made by Engineer Latimer, locating the gulch road, particularly as it affected lots 22-25, on the north side opposite the Rowley property. This plan was ordered registered in February, 1919, and takes varying portions of the lots mentioned as originally surveyed. Following some discussion, the clerk on motion of Counc. Kirk, was instructed to write the company that the council considers that a highway not less than 50 feet is necessary through the lots

## KOOTENAY POWER IN OCTOBER

### Contract Between Company and Neighboring Municipality is Closed

Power from Bonnington Falls may be flowing up the Okanagan Valley in October or by the first of November. The last details of the contract between the Kootenay Power Co. and the municipality of Penticton were arranged on Saturday, and at a meeting of the council of the municipality in the evening, the contract was closed. Mr. Lorne Campbell, manager of the Power Co., stated that he had material on hand ready for constructing 15 miles of the new line, and under the terms of the agreement, the company is ready to deliver power by November first, but it is understood that the current may be turned on a month earlier.

Under the new contract, current for lighting purposes will cost the municipality three cents, and for power it will be the same price up to 30,000 k.w.h. per month, and two and a half cents for all over that quantity.

The power company retains the right to supply current direct to industrial concerns requiring fifty horse power or more.

More than 8,000,000 pounds of butter were produced in Manitoba in 1920, according to L. A. Gibson, provincial commissioner. Of this amount 3,000,000 pounds were exported.

25-22, and that location of said road as made by Mr. Latimer and shown on the plan signed by him on the 29th January, 1919, and approved by council must be maintained. The council therefore cannot consent to the change requested by the Summerland Development Co.

The clerk was instructed to write the K.V.R. on behalf of A. Rutherford asking for a culvert for irrigation water from one portion to another of Mr. Rutherford's property, and which he desires to irrigate.

Mr. H. C. Mellor complained that there was an excessive supply of water being delivered to the lot above his house and stated that he would hold the council responsible if further damage resulted.

The reeve, the chairman of the water committee, and Councillor Thornber, were appointed delegates to attend the Western Irrigation convention in July.

Upon recommendation of the finance committee, the treasurer was authorized to invest \$15,000 of the \$18,000 sinking fund monies now in the bank in 1934 Victory bonds. These are now available at a price to yield 6 per cent. or better.

## HIGH SCHOOL PROMOTION RESULTS

The high school closed today, Friday, June 17th. The matriculation examinations begin on Monday, June 20th, and will continue all the week. Mr. D. Davidson of the Central public school staff, will be in charge. Mr. Tees, of the high school will preside at the entrance examination.

The results of the high school examinations are very satisfactory. The majority of the pupils in each of the classes put energy and effort into the work during the year. As a consequence a good foundation has been laid for the work of the next year.

Although an overcrowded condition prevailed throughout the year, yet a very high average attendance was maintained. The number of cases of absence on account of sickness was very small. The general interest of the pupils in their work was of great assistance to the teachers, enabling them to cover the prescribed work of the year in each grade.

A detailed report of the year's work of each pupil has been sent out to the parents, and if those interested will take the time to study these they will be able to note the relative strength and weakness of the pupils in each subject. In a few cases pupils did not respond to any effort to guide them in the pursuit of knowledge with the consequent failure. Frequently neither parents or pupils are aware of the real worth of a year's diligent application in high school.

Before the war it was computed that the average earning of the public school graduate was \$600, while that of the high school graduate was \$1,500 a year. The average income of the university graduate is over \$4,000. Judged from the monetary point of view alone a year lost in high school is a loss of \$1,500 since it sets the student one year farther away (other things being equal) from that earning power.

The aim of the high school course is not to increase the earning power of a student, but to direct the intellectual activity of the pupil along well recognized and proper channels that in due time he shall assume the responsibilities of maturity quite naturally and easily and thus render to society that real service it has a right to expect of him. This is the aim of Summerland high school and some progress has been made in this direction during the past year. With better conditions under which to teach and the right sort of equipment the principal is assured that results could be secured that would be most gratifying to the people of the community.

The following is the ranking of the matriculation class obtained in the recent examinations:

Ronald White, 82; Edgar Hobbs, 76.4; Alva Garnett, 75.9; Thelma

Hobbs, 75.3; Ruth Graham, 72.2; Hugh McIntyre, 67.6; Isabel Davidson, 67.5; Jack Harris, 62.6; Richard Turner, 58.6; Laurence Beavis, 56; Robert Hatfield, 44.

John Denike, who was not present at the examinations on account of illness is to be reckoned as one of the best pupils in the class. All of the above pupils will write next week on the university matriculation.

Promoted from second year to matriculation class. Passed with credit in each subject.

Dorothy Tomlin, 83.7; Phyllis Freeman, 82.4; Merle Smith, 77.3; Ewart Bowering, 76.8; Dorothy Foster, 76.5; R. R. Munn, 76.3; Davessa Cowan, 75.6; Jessie Munro, 72.8; Marion Beavis, 71.5; Zanda Garnett, 69.5; Delmer Dunham, 68.6; Kenneth Walden, 68.1.

The following are granted supplemental examinations in one or more subjects as indicated in reports sent out:

Marion Hatfield, Ivor Harris, Ralph Purves, Irvine Adams, Sylvia Washington.

Promoted from first year to the second year. Passed with credit in each subject.

Muriel Davidson, 83.1; Maude Haynes, 79.7; Amy Smith, 76.6; Grace Garnett, 76.1; Irene Harris, 73.3; Clifford Laycox, 71.4; Alex. Munn, 71.2; Harry Hobbs, 67.9; Phyllis Cline, 65.7; Needa Cline, 65.1; Noel Wright, 81.

The following are granted supplemental examinations in one or more subjects as indicated in reports sent out:

Mary Hanna, Clyde Caldwell, Frances Nicholson, William Keen, Donovan Simpson.

All supplemental examinations in first and second years must be written off on the opening day in September.

## ROADS FURTHER DAMAGED BY FLOOD

### Lakeside Highways Destroyed by High Waters

Heavy, though brief, wind squalls on the Lake put the shore road between Summerland and Peachland definitely out of commission, the waves of the swollen lake cutting badly into the road.

The roughened waters of Dog Lake tore up the road along the north east edge of that sheet of water and for a time cut off communication with Kaleden and points south, except by way of Allen Grove and Marion Lake. The road at that point has been repaired.

Recent reports were that the road at the overhanging rock on Vasseaux Lake was nearly two feet under water.

There has been a steady increase in the height of Okanagan Lake, but it is hoped that the cooler weather will effect a check in the rush of waters from the mountains.

There is usually a woman in the case—and too often she is the wrong one.

## BOARD WILL TRY TO GET CLASSROOMS

### Temporary Accomodation must be Had if Schools to Operate

At a special meeting of the school board held in the court room on Tuesday night, committees were appointed to investigate and make arrangements for additional accomodation for public school and high school of the coming year. There is now a list of 60 children who have reached school age within the past few months who will be seeking admission to the school when it opens next September. This list may be increased to 75 or 80 by that time. High school attendance will show a considerable increase and a third teacher is necessary, and a third class room is being sought. This will somewhat relieve the over crowded conditions in the present temporary quarters. A chemical laboratory is a necessity, which will also be used, if possible,

in connection with the new course in agriculture.

The ground floor in the Summerland Hotel Annex has been offered by Mr. McCallum for high school purposes.

Acting Secretary Pollock was instructed to advertise for teachers for the high school, and to have particulars of the help required filed with the teachers' bureau at Victoria.

The board decided to spare no effort to secure the very best temporary accomodation for the schools until such time as additional building or buildings are erected.

## ALFALFA AS AN ERADICATOR OF CANADIAN THISTLE

R. H. Helmer, Supt. Summerland Exp. Station on Value of Alfalfa as Weed Destroyer

Some years ago we saw a case where alfalfa was supposed to have cleaned out the Canadian thistle from the land. We had not had an opportunity to observe the land before or after, and remained pessimistic about such an easy method of getting rid of this serious weed. About five years ago we discussed the same question with a man who hoped to reclaim a farm by pumping, large areas of which were badly infested with Canadian thistle. He seeded these areas to alfalfa. The newly seeded alfalfa was clipped as soon as high enough, which also clipped the thistles; this was done three times during the season. Two years later we again visited this farm and we were invited to find any Canadian thistles, and we had to hunt amongst the alfalfa to find about six very weak specimens, and today there are no more.

People are taking this method of eradicating thistles, and if alfalfa once has a chance to get established and is kept clipped so as to prevent the thistles which are well established from smothering the young alfalfa until it can outgrow the thistle, the method will succeed. Every farmer who is cursed with this pest can harvest good crops of alfalfa whilst he is killing this enemy. We find with alfalfa that a seven year rotation fits in very well and will make thistles impossible on your farm.

- 1st. Hoed crop. (Corn, roots, vegetables.)
- 2nd. Grain crop seeded to alfalfa if water is plentiful.
- 3rd. Seeded to alfalfa without a nurse crop where water is scarce.
- 4th. Alfalfa.
- 5th. Alfalfa.
- 6th. Alfalfa.
- 7th. Alfalfa plowed just before or just after the second cutting, kept clean all rest of summer and fall and manured for hoed crop next year.

How far this eradication will apply to land under dry farming methods we cannot say, but under irrigation we can recommend it most strongly as alfalfa responds so well to applications of water, starts early and grows late, is a soil builder, in fact does everything the farmer wants it to do. If you are waging war on Canadian thistle make alfalfa do it for you, but be kind to it while young by giving it a perfect seed bed to germinate in, a uniform moisture supply and give the young plants air by clipping the thistles. By the second season the young plants can take care of themselves and will fight your battles for you, to say nothing of the fine stacks of hay in your stock yard.

er the dew is off and, soon after, raked into windrows, as the longer it remains in the swath the more it will become bleached and discolored in the sun. It should be left in the windrows a day or two or until about half dry and then placed in small cocks, where it is left until sufficiently cured for stacking or placing in the barn. The main point to keep in mind is to dry it out with as little exposure to the sun and elements as possible.

Clover is cut when the plant is in full bloom or when about one third of the leaves have turned brown. It is cut when the dew is off and allowed to wilt. The tedder is run over it once or twice to loosen and shake it out so that it will cure evenly. After it is partly dry it is put in windrows and coked. As long as there is no dew or moisture on the hay it is not essential that all the sap be evaporated from the plant before stacking, as it can be safely stacked much greener than most people think.

Timothy for cattle should be cut when in the second bloom or when the stem has burst their pollen. The plant is then in full sap and when cured is relished by the cattle. For horses it should be cut from a week to ten days later, as when cured it is less washy and does not scour. It is cut when the dew is off, shaken up with the tedder and, when wilted, it is placed in cocks to finish curing. It is one of the easiest crops to cure and keeps well.

Rain during haying is injurious, as it delays the final curing, causes discoloration and lessens the aroma and palatability. After a rain it is necessary to turn the cocks over and thoroughly dry them. A well built cock will shed a great amount of rain. They should not be made by rolling the hay up in bunches, but should be carefully built up of layers, keeping the center of the cocks high. The three main essentials of good hay making are: First, cut the crop at the proper stage of development; second, handle the hay no more than necessary; third, cure the hay largely in the cock.

Below will be found a brief synopsis of telegraphic reports received at the head office of the Bank of Montreal from its branches, a copy of which has been furnished The Review. The branch managers have complete and intimate knowledge of each local situation and are in close touch with crop conditions in all sections of the districts shown.

**Prairie Provinces**

Seeding of wheat has been completed in practically every district under favorable conditions and farmers are now finishing the seeding of late coarse grains. Edmonton district—wheat well up, oats above ground. Calgary district—growth well advanced, particularly wheat. Conditions now favorable. Lethbridge district—early grains well up, no damage by wind or frost. From Lomond, Retlaw, Bow Island and Meleod there are reports of damage by cutworms rendering some reseeded necessary; grasshoppers are also appearing causing some anxiety. Pasture excellent. Regina district—fifty per cent. of the wheat is up, general conditions good. In the region of Yorkton continuous rains have delayed operations. Saskatoon district—wheat up in healthy condition. Conditions generally satisfactory. Winnipeg district—Crops generally well advanced and making good progress; grasshoppers reported in some districts.

**Province of Quebec**

Reports from all sections indicate that crops are suffering from drought and in some instances reseedling has been necessary. Grass pasture and hay are in need of heavy rains; fruit prospects are fairly favorable.

**Province of Ontario**

Conditions in general are very satisfactory and recent rains have been beneficial. Weather conditions of late have improved fall wheat, the growth of which is well up to the average. Other grains most satisfactory. Roots making good growth, fruit prospects fair. Condition of hay and grass pasture is excellent. Tobacco a small acreage; planting now in full swing.

**Maritime Provinces**

In New Brunswick and Nova Scotia seeding has been completed and operations generally are well in advance of last year. Grass pasture is in good condition but rain is needed in certain districts. Fruit crop prospects are favorable. In Prince Edward Island seeding is well under way and finished in some districts. Pasture is good. General conditions excellent.

# SHORTAGE OF FRUIT PREDICTED

The state agents of the bureau of crop estimates, United States department of agriculture, report that there will be a short fruit crop this year. The shortage will be fairly general east of the Rocky Mountains, except in portions of Michigan, New York and New England. The reports refer particularly to stone fruits such as cherries, plums and peaches, but also indicate that there will be a material shortage of apples and grapes, but not as extensive as that of the stone fruits. It is too early they say to make an estimate of the probable yield of blackberries and raspberries. With the shortage of stone fruits it is expected that the fruit supply for domestic canning purposes will be limited in many sections. While considerable frost damage has occurred in some parts of California, the general outlook for deciduous fruits on the Pacific coast is still regarded as good.

**LIQUOR VENDOR APPOINTED**

Fred Lorne Roe has been definitely appointed liquor vendor in Pentiction. Citizens of that community had put forward the names of two others and for a time it was thought that the government might drop their first choice. The G.W.V.A. pressed for the appointment of a returned man and a group of citizens urged that Mr. C. A. C. Steward be given the position. Liquor Commissioner J. H. Falconer, who was in Pentiction last week, confirmed Mr. Roe's appointment. The commissioner stated that two carloads of liquor were now on the way to Pentiction.

# Synopsis of Land Act Amendments

Minimum price of first-class land reduced to \$5 an acre; second-class to \$2.50 an acre.

Pre-emption now confined to surveyed lands only.

Records will be granted covering only land suitable for agricultural purposes and which is non-timber land.

Partnership pre-emptions abolished but parties, of not more than four may arrange for adjacent pre-emptions with joint residence, but each making necessary improvements on respective claims.

Pre-emptors must occupy claims for five years and make improvements to value of \$10 per acre including clearing and cultivation of at least 5 acres before receiving Crown Grant.

Where pre-emptor in occupation not less than 3 years, and has made proportionate improvements, he may, because of ill-health, or other cause, be granted intermediate certificate of improvement and transfer his claim.

Records without permanent residence may be issued, provided applicant makes improvements to extent of \$300 per annum and records same each year. Failure to make improvements or record same will operate as forfeiture of claim.

Records in less than 5 years, and improvements of \$10 per acre, including 5 acres cleared and cultivated, and residence of at least 2 years are required.

Pre-emptor holding Crown grant may record another pre-emption, if he requires land in conjunction with his farm, without actual occupation, provided statutory improvements made and residence maintained on Crown granted land.

Unsurveyed areas, not exceeding 20 acres, may be leased as homesteads; title to be obtained after fulfilling residential and improvement conditions.

For grazing and industrial purposes areas exceeding 640 acres may be leased by one person or company. Mill, factory or industrial sites on timber land not exceeding 40 acres may be purchased; conditions include payment of stumpage.

Natural hay meadows inaccessible by existing roads may be purchased conditional upon construction of a road to them. Rebate of one-half of cost of road, not exceeding half of purchase price, is made.

**PRE-EMPTORS' FREE GRANTS ACT**

The scope of this Act is enlarged to include all persons joining and serving with His Majesty's Forces. The time within which the heirs or devisees of a deceased pre-emptor may apply for title under this Act is extended from one year from the death of such person, as formerly, until one year after the conclusion of the late war. This privilege is also made retroactive.

No fees relating to pre-emptions are due or payable by soldiers on pre-emptions recorded after June 26, 1918. Taxes are remitted for 5 years.

Provision for return of moneys accrued, due and been paid since August 4, 1914, on account of payments, fees or taxes on soldiers' pre-emptions.

Interest on agreements to purchase town or city lots held by members of Allied Forces, or dependents, acquired direct or indirect, remitted from enlistment to March 31, 1920.

**SUB-PURCHASERS OF CROWN LANDS**

Provision made for issuance of Crown grants to sub-purchasers of Crown Lands, acquiring rights from purchasers who failed to complete purchase, involving forfeiture, on fulfillment of conditions of purchase, interest and taxes. Where sub-purchasers do not claim whole or original parcel, purchase price due and taxes may be distributed proportionately over whole area. Applications must be made by May 1, 1920.

**GRAZING**

Grazing Act, 1919, for systematic development of livestock industry provides for grazing districts and range administration under Commissioner. Annual grazing permits issued based on numbers ranged; priority for established owners. Stock owners may form associations for range management. Free, or partially free, permits for settlers, campers or travellers, up to ten head.

**Peachland Doings**

A Weekly Chronicle Furnished By Our Local Representative.

Miss Masters, home councillor for the home branch of the soldier settlement board, paid town an official visit last week, arriving on Thursday morning.

Dr. Buchanan and Mr. Grant Lang were down the lake on Thursday evening of last week in connection with Masonic doings.

Announcement has been made of the marriage recently in Regina of Mr. George Jones of Odessa, Sask., and Mrs. Hattie K. Mitchell of Peachland, who are at home after the first day of June, at Odessa, Sask. Mrs. Jones has many friends and acquaintances in Peachland since her residence here for a number of years.

Having been drafted to this circuit by the recent Methodist conference held in Victoria, the Rev. Mr. Coad, formerly in charge of the field at Gibson's Landing, Howe Sound, with Mrs. Coad and their young son, arrived on Thursday evening and are taking up residence in Mrs. Elliott's house, Mrs. Elliott and daughter moving into Miss Elliott's house recently vacated by the Rev. and Mrs. Clarke.

Mrs. J. Wright paid a short visit to her sister, Mrs. Birch of Kelowna, last week, going up by stage and returning by boat on Thursday evening. Friends and acquaintances here will be pleased to learn that Mrs. Birch is improving somewhat in health.

The Peachland baseball team is spending an evening occasionally getting in form for the coming games of the season. A few of the "would be stars" and the young lads get out and make some of the practices interesting for the team. This is what they need and they enjoy it.

According to a telephone message from Vernon Winger, sent from Vernon, the judge of the court had thrown out the case in which he was to appear as defendant on a charge laid by Mr. and Mrs. Wray of Penticton. The evidence was not given, the judge deeming the case too trivial to be brought before the grand jury. Mr. Winger, Vernon and his brother-in-law, Mr. Hartly McHollister, returned home on Friday evening.

Masters Ed. March and Jack Hamilton recently returned from Victoria where they have been taking their Normal training.

Miss Doris Long returned last week from Vancouver where she has been attending business college.

Friends and acquaintances here of Mr. George McClure, who formerly resided at the McClure ranch across the lake, and who recently sold his ranch and took Mrs. McClure to California on account of her illness, will be surprised to learn of his sudden death following a stroke. He was, while here, quite robust. For some time before leaving Mrs. McClure was in declining health, but we are informed that since going south she is improving.

Mr. Eph. Brinson of Penticton was a visitor in town on Monday, returning on the evening boat.

Dr. Fish, chiropractor of Penticton, made his first visit to Peachland on Friday to hold consultations and treat any cases who care to come to him.

The Rev. James Dunlop of Summerland conducted the service in the Baptist church in the afternoon, having brought with him some members of his home church who assisted in the service of song. Mr. Riley and Miss Graham each rendered a solo. Mr. Dunlop announced that he would come up again on Sunday next to conduct a service to take the place

of the following Sunday when he expects to be in Vancouver attending the convention. He hinted that if the roads were in condition he might be bringing with him a number of his Summerland workers.

Mr. William Douglas was a visitor to Kelowna last week, spending a day and returning home in the evening.

At the regular meeting of the municipal council held on Wednesday afternoon, June 8 at 2 p.m., there were present the reeve and Councillors Huston, Harrington and Lang. A decision was made to secure a 24 inch cement pipe made into a trough and place it near the Union on the side of the street where the main is laid, to be used as a horse watering trough. In connection with the planting of trees at the cemetery it was considered to be too late for spring planting; further action being deferred till fall. A motion was carried to the effect that the bed of the water wheel and the fly wheel in the power house be inspected at once and if the electric light committee deem advisable to put in new timbers they are authorized to do so. Another motion passed as follows: That the municipal hall committee be empowered to spend what money is necessary in keeping property in repair and necessary improvements.

An afternoon tea was held at the home of Mrs. William Dryden, secretary of the local branch of the Zanana Mission, in the interests of the Mission and particularly to aid in raising funds for the upkeep of the memorial bed in the hospital at Lucknow, India, which Peachland has been supporting for some time. The sum of \$18 was realized during the afternoon. It is the intention of the local committee to hold a like tea every quarter for the same purpose.

The Union service in the Methodist church was conducted on Sunday morning by the newly arrived pastor, the Rev. Mr. Coad. The Westbank service is also under his charge and he drove out to hold the service there in the afternoon.

Mrs. Ben Gummow left on Saturday evening for coast cities to spend a month visiting friends and relatives.

Some people thought some time ago that the water had reached its height, but it does not seem to have done so as yet. There is a patch of the road just north of the Trepanier bridge which has recently become submerged and it is only by dodging that a pedestrian can pass along that portion of the road dryshod, and we understand that the lake shore road is being continuously damaged.

Having finished working down at Oliver, Albert Town and Nelson Keating have returned to Peachland.

Mr. W. Sanderson and Mr. W. Ashley have been sent up to the North Fork dam to place some brush along the dam as a preventative measure to keep the lashing waters of the lake from damaging the dam.

**OKANAGAN VALLEY HAS GREAT FUTURE**

Promised Land of Plenty is Described by English Writer

A recent copy of The Field, the leading country gentleman's paper of England, contains a most interesting article on the South Okanagan government irrigation scheme. The writer, Mr. Dennis Crane, describes in charming language the wonderful profusion of the choicest fruits which can be grown upon the irrigated area and forecasts a settlement of at least three to four thousand families on the thirteen thousand acres which are being developed. He points out that transportation facilities are being provided and that at least two new towns will arise as distributing centers. "Within a few years," says the writer, "this once sterile desert will be exporting choice fruits, not merely to the insatiable prairie provinces, but to Europe and the far east."

**B. C. PLANT INSPECTION HAS PROVED EFFECTIVE**

The British Columbia method of inspecting imported nursery stock has proved effective, and so far as the express and freight shipments are concerned, strict supervision is maintained, according to W. H. Lyne, provincial inspector, in some statements he made at the session of the Western Plant Quarantine board held at Victoria a few days ago. The topic of inspection occupied the greater part of an afternoon session.

When a young widow asks a man whether he has his life insured he's awfully slow if he doesn't take the hint.

After a short visit out of town Mr. Townsend returned on Tuesday.

Mr. J. L. Vicary has been busy of late fulfilling his duty in getting the census of Peachland recorded.

Mrs. Buchanan and Mrs. Keating left via the S. S. Sicamous on Monday morning for Vernon to attend the Women's Institute convention being held in that city this week. They were appointed as the Peachland delegates from the Peachland Institute.

Mr. Williams has turned over the butcher business to Mr. White, who comes from Kelowna, and has rented the premises occupied by Mr. Williams and intends to carry a full line of supplies generally carried in a butcher shop, and give continuous service. He has rented the dwelling section of the building as well and has moved his family down. The meat purchasers who were not satisfied with the two days a week service, as recently given, will appreciate a regular daily service now, and the community is glad to welcome another family as residents.

**HORSES SWAM ACROSS LAKE**

(Kelowna Courier)

Two horses—a mare and a yearling—performed the remarkable feat during the first week of May of swimming across the lake from Manhattan Beach to Mr. R. A. Pease's ranch. The hardy animals first made for the direction of the Aquatic Pavilion, on nearing which they changed course and headed for the west side of the lake. Apparently disdaining to take the shortest route by landing at Siwash Point, they made straight for their objective and were seen to land by Mr. L. Lefroy, who had watched them for some time. They landed in good order, seemingly none the worse for their immersion. A similar feat was performed several years ago in the winter time, when two horses swam from the west side to Manhattan Beach. They were coated with ice when they landed and one of them succumbed to the effects.

**LAND REGISTRY ACT**

TO ALL WHOM IT MAY CONCERN  
Re Lot 2, Block 7, Map 44, Peachland.

WHEREAS proof of loss of certificate of title No. 14851A, issued to George Needham and covering the above land has been filed in this office,

Notice is hereby given that at the expiration of one month from the first publication hereof, I shall issue a duplicate of the said Certificate of Title unless in the meantime valid objection thereto be made to me in writing.

DATED at the Land Registry Office, Kamloops, B. C., the 8th June A.D., 1921.

H. V. CRAIG,  
Registrar.

**OKANAGAN BETTER THAN CALIFORNIA**

(Oroville Gazette.)

Friday last a Dodge five passenger car was checked out of this place en route to Vernon, B. C., containing Mr. and Mrs. Foquette and eight children, besides a large quantity of camping paraphernalia. Some of the younger children rode with their legs hanging over the sides of the car, and it would have required careful calculation to have crowded an extra postage stamp in to the vehicle. The Foquettes had driven from Fresno, California, and insisted that they had had a very pleasant trip. Two years ago they passed through Oroville headed for California for the purpose of locating, but the call of the north was irresistible and they were homing back to their first love.

Words are all right when backed by brains.

**Notice!**

To Advertisers and Review Readers

For the purpose of better service to advertisers and reading public. The Review will in future be issued on Thursday afternoon in time for distribution before the arrival of the evening boat, this arrangement being twenty four hours earlier than in the past.

The Review will therefore reach Naramata readers Thursday evening, while Peachland and the rural route will be served on Friday morning.

This change is made in order that advertisers may make announcements of Friday and Saturday bargains, and others who desire can make week end announcements to the public. Under the circumstances it is necessary to call the attention of all advertisers to the following:

Change for display advertisements must be received not later than Tuesday noon, to insure change being made. Classified advertisements and readers will be received until an early hour on day of publishing.

Believing that this alteration in date will better serve and represent the progressive spirit of this splendid community, the management ask the full co-operation of advertisers and contributors to that end.

Retail Agent:  
H. W. HARVEY, West Summerland, B. C.

The above is a local industry with Sawmill and Box Factory at Mineola about 9 miles from Summerland, and has been operating in this district since 1907. Manufacturers of all kinds of Building and Flume Lumber, Box Shooks and Fruit Packages, employing about 65 men, including 21 married men with families and 23 returned men.

The monthly payroll of approximately \$7,000.00 circulates mostly in Summerland and district. Supplies, material, etc., as far as possible are bought locally.

The lumber is shipped to Eastern Points, used locally, and in the manufacture of Fruit Boxes. The output of the Box Factory is mostly used by the local Fruit Packing Organizations.

Wholesale shipments are made from the railway point at Faulder, B. C., and retail shipments through the local agent, H. W. Harvey, West Summerland, B. C.

# PASSING EVENTS

LOCAL, PERSONAL, SOCIAL & OTHERWISE

Mrs. Chittenden of Penticton has been visiting her mother here, Mrs. W. Limmer.

Mr. Donald Davidson of the Central school is leaving to spend his vacation in Ontario.

Mr. C. B. McCallum of Hotel Summerland was recently a business visitor to Vancouver.

Special music as advertised in this issue, will be a feature of the Sunday evening service in the Baptist church.

Provincial Electrical Inspector Muirhead was a visitor to Summerland in an official capacity last Saturday.

Messrs. E. R. Simpson and C. E. Barnes left here on Tuesday for Vernon, intending to start from there on Friday on a business trip to Winnipeg in the interests of the O.U.G.

Mr. and Mrs. A. Lambert of Reigate, Surrey, are expected here this week end. Mrs. Lambert is a sister of Mrs. Fudge, and they are coming here to reside.

R. G. Russell, C.E., of Vancouver, has bought the Matheson lot immediately south of the Salter property, and is preparing to build on it with the intention of residing here.

The Summerland baseball team defeated the Peachland team yesterday afternoon by a score of 9 to 0. The game was part of a day's program which will be covered in our next issue by our Peachland correspondent.

Miss Wilson of Vancouver has taken a position at the hospital rendered vacant by the resignation of Miss Moran. The latter is visiting with friends before leaving for her home in Ontario.

Advertisers and contributors to our columns are directed to an announcement made on page four of this paper, by which it will be noted that the Review will be issued on Thursday afternoon instead of Friday as in the past.

The treasurer of the Summerland Hospital Society acknowledges receipt of the sum of \$42.85 as a donation to the hospital funds from the Summerland Baptist Church.

Mr. W. Limmer has gone to Victoria, hoping that the change for a few months will be of benefit to his health. He will be joined by Mrs. Limmer and their daughter, Miss Alice this week end.

News was received by wire on Wednesday, June 15, by Mr. and Mrs. W. Harvey, of the birth that morning of a grandson, the proud parents being Mr. and Mrs. J. H. Baldwin of Vancouver.

Mr. P. C. Tees of the Summerland high school staff, has resigned his position and after spending some time in Victoria expects to go to Vancouver to teach. He also plans continuing his studies in connection with the university.

Mrs. Agur of Victoria Gardens was taken down to the coast this week for treatment at the Provincial Hospital for Nervous Diseases. The patient, who is a war widow, has been living alone with her little daughter, and her condition of late has made it unsafe to leave her longer without a constant attendant.

Mrs. Miller of Grand Forks, who has been visiting her daughter, Mrs. McKim at Salmon Arm, came in on Wednesday's boat, and stopped over a day with Mrs. Rutherford and the K.V.R. Mrs. Rutherford and Miss Andrews accompanied her to Grand Forks, and they will visit friends there for a few days.

Evening service - 7:30  
Preacher: Rev. James Dunlop

Rev. J. A. Banton, pastor of the Green Lake Baptist church, Seattle, came in on Tuesday morning for a short visit with his daughter, Mrs. O. A. Atkins.

Later reports are that Harry Hughes and Walter Stout, the two most seriously injured in the motor accident at Okanagan Falls on June 3rd, continue to make satisfactory progress.

Principal D. J. Welsh of Summerland high school intends leaving immediately after his school closes to study in the Ontario school of Education which is connected with Toronto University. Mr. Welsh will take a course in pedagogy in which, if successful, he will be awarded the degree of D. Paed. He will be accompanied east by Mrs. Welsh and their young son, Clifford, who will spend the summer with relatives at London, Ont.

James Fyffe was fined \$10 and costs and ordered to pay D. C. Barr twenty dollars damages and his costs as a result of a charge laid against him in the police court, and which was heard on Thursday. Fyffe was found guilty of having deliberately let down the bars of the pasture where Barr's horses were grazing, and driving them into the open, and causing them to be lost to the owner. The case occupied several hours, and there was rather a sensational ending when the defendant asked to be sent to jail, as he did not have the fifty or sixty dollars demanded by the court. He was ordered to pay up.

Mr. and Mrs. Muir Steuart returned by K.V.R. on Tuesday, having left their car at Hope. Mr. Steuart reports having enjoyed a pleasant vacation motoring through Washington and on Vancouver Island. Their motor drive from Vancouver to Hope through the Fraser Valley under flood conditions was anything but enjoyable, and Mr. Steuart said that had he understood the conditions he would have returned through Washington. Motoring over roads buried to the axle in water, with the possibility of dropping deeper at any moment, was a unique though not particularly enjoyable experience.

The Hedley Gold Mining Company is arranging to resume development at Hedley, where the Nickel Plate mine is located. There was a loss in operation at the mine last year, owing principally to high-labor charges, but it is thought this condition will improve now. There is a general improvement in the gold situation in Canada, it is said.

Mr. Carroll Atkins announces in this issue the first public performance in his "Little Theatre" at Naramata. Considerable interest has been aroused both in the Valley and elsewhere in the announcement that Mr. Atkins plans to bring Maurice Brown's company from Seattle to play Ibsen's "The Doll's House," and Shaw's "The Philanderer."

Had they not paid up promptly next morning for liquid refreshments taken without permission from a local restaurant, two citizens would have been before the police magistrate that morning. Given a description of the car in which the goods were supposed to have been moved, the constable found it occupied by a man and girl. He learned, however, that the two friends of the driver had had the car. They got ahead of the constable by making good.

Mr. J. H. Stokes, recently appointed representative of the Sun Life, was a visitor to Summerland this week. Mr. Stokes has leased the Routh house at Naramata and will move his wife and three children from Vernon where they have been temporarily located. He served as lieutenant in the R.A.S.C. Imperials, and before enlisting was a resident of Morden, Man. Mr. Stokes is also writing fire, accident, sickness and automobile insurance. His advertisement appears in this issue.

**EVERYBODY WELCOME**

Edith Turner, Spirella Corstier of Penticton will be in Peachland Tuesday and Wednesday, June 23 and 24.

Accounts totalling \$16,724.79 were passed by the Summerland municipal council at their regular semi monthly meeting on Tuesday. This unusually heavy budget was made up largely by interest due on debentures which totalled \$9,047.36. Two other large items were the May pay roll and the school board requisition for the same month. These were \$3,086.70, and \$2,712.60 respectively.

Reports from Victoria are to the effect that the Okanagan Wood Products Company has completed arrangements for the extensive manufacture of fruit crates and boxes. Mr. W. F. Laidman, well known through his connection with the United Farmers movement, is quoted as stating that the demand for material had led to the venture and that much pine timber will be located at Chute Lake at a point on the K.V.R. some few miles north east of Naramata.

**SPECIAL AT RIALTO**  
Rialto Theatre is advertising a two day special for next Tuesday and Wednesday, the title of which is "The Fortune Teller." The picture, those who have seen it say, tells a morality story in an immortal way. "The Fortune Teller" is a powerful story with compelling situations. The theme—mother love—is inextricably bound up with psychic phenomena, a subject which Sir Oliver Lodge, the noted scientist and spiritualist, has done so much to popularize as a study.  
The narrative abounds with human

interest situations rich in dramatic expression. It tells of regeneration where none seemed possible, and the influence of mother love in the upbringing of a child. It tells eloquently of the triumph of mother love over material things, over science, jealousy and devilry. It tells a story which the stage with its limitations could not tell.

Current Events of Town and District

The first shipment of cherries, consisting of 11 boxes, was sent out June 10 from Naramata by Mr. Littlejohn. Gooseberries were shipped on June 8 by Mr. Simpson and Mr. Routh. The first strawberries were shipped by Mrs. M. B. Smith from Louninden Ranch, Mr. Jack Young following with a shipment of strawberries on June 10. Strawberries, gooseberries and cherries will be fairly plentiful by the end of the week.

**THINNING URGED UPON GROWERS**  
(Continued from Page 1).

Left-over cankers were found. These may have seemed dried out, but owing to the warm, moist weather prevailing for some time past, have suddenly become very active. The result is that very nearly every tree in the orchard is affected. It is absolutely impossible for an inspector to go over every branch of every tree in the district, but it is the duty of every grower to see that whoever prunes his trees also thoroughly cleans up fire blight. Unless this is done every year the adverse results to the fruit growing industry of this district cannot be estimated.

**SERIAL LYCEUM NUMBER IN FALL**  
Local Committee Adopts Proposal of Managers for Filling Contract

The holders of the lyceum season tickets have been asking when the fourth entertainment of the course will be held. In order that all interested may know how matters stand, the committee thought it wise to publish the following letter from the manager of the White-Ellison Lyceum Bureau.

Portland, Ore., June 10, 1921.  
Dear Mr. Robinson:  
I left for Chicago the first day of May, and thought we had everything arranged with the Canadian office to furnish you the Jess-Coffer Company to take the place of the Rondoliers, who were unable to fill their date in Summerland.

The Okanagan Telephone Co. is installing new equipment in its Vernon exchange which will do away calling central. The new system will with the antiquated method of be similar to that in operation here by the Summerland Telephone Co. for some years. The Okanagan Co. proposes making a similar change in Penticton at an early date.

W. J. Robinson of Summerland was a visitor in Naramata on Thursday, returning to Summerland by the 5 o'clock ferry.

Mr. Andrew Allen, who is a new arrival in Canada from the north of Ireland, came to Naramata Monday. Mr. Allen is at present at the Syndica Hotel, but will shortly move to the cottage formerly occupied by Mr. W. H. Irwin on Robinson Ave.

Mrs. Margaret Bayne, superintendent of the provincial girls' industrial school, was a visitor in Naramata yesterday, spending the day with Mrs. Wm. A. McConkey. Miss Bayne visited Rossland and other points in the interior on official business, returning to Vancouver on Monday.

Mrs. Walker and her daughter Dorothy from Kerrisdale, Point Grey, arrived in Naramata on Thursday on a short visit to Mrs. McConkey, returning to Vancouver by the evening boat. Mrs. Walker is staying in Penticton in the interests of her daughter's health.

Mr. W. B. Greene has started building a cottage of four rooms on his fruit lot. Mr. Lumsden is also about to have a small building erected on his place.

The high water combined with a strong wind from the south on Monday afternoon caused some damage to the wharf at the grand stand, a considerable part of it being broken up and washed up on the shore. The grand stand also is being damaged by the water.

Friday marked the last lesson of the dancing course which has been conducted for the last three months in Naramata by Miss Adelaide Smith of Penticton. On Saturday a closing class was held to which parents were invited. The children gave a very interesting exhibit of their training in graceful exercises, and also danced the fan dance, the spring dance, sailor's hornpipe and minuet, the larger girls rendering a Spanish dance. Though the time had been too short for the perfecting of these dances the demonstration showed the value of the class for training in bodily grace and precision and control of movement. After the class, children and parents adjourned to Mrs. Campbell Robinson's where tea was served. It was regretted by all that Miss Smith, who had come up

from Penticton to conduct the class, was ill, and not able to take part in the performance to any extent herself. Miss Smith returned to Penticton on Saturday evening's boat.

Mrs. Morrish and her daughter, Pauline, are moving for the summer to the vacant cottage on the Naramata Hotel grounds.

It is much too early to give an estimate on the crop, however, it is noticeable that there will be a very heavy June drop. This applies particularly to Jonathans. Present indications are that there will be a fair stone fruit crop. Tomatoes are looking well after the rains of the past week.

**Penticton and Keremeos**  
Crop prospects still continue good with reference to apples and pears in this district. Cherries, however, will be light, and peaches, especially Elbertas, will be under normal crop, except in those orchards which have been well fed and cared for. Apricots are sizing very fast and will run a good average in quantity. Seasonal rains and weather conditions have been all that could have been desired. Powdery mildew and fire blight are rather prevalent but no extensive damage is feared.

Thinners. The thinning season is approaching, in fact with many varieties is at hand, at the time of writing. The best advice that we can give at this time is to thin and to thin heavily at once. Avoid paying too much attention to the tops of the tree where high ladder work is necessary, but devote the greater part of the work to the lower parts of the tree. This is where the inferior fruit will be produced. If the set of fruit is uniform and heavy, thin to one fruit to a spur every six or eight inches. However, if the set of fruit is not regular but scattered, judgement will have to be used as to which should be left. In any event there is more danger of under thinning than over thinning at this time. Good time can be made in this operation by using a pair of regular thinning shears and a short three or four foot ladder.

I regret this very much, Mr. Robinson, but I do not see how we are going to arrange to send you an attraction at this time. Mr. Erickson suggested in his last letter that they would be glad to send you a number in the fall. I wonder if you cannot announce that the fourth number will be delivered in the fall. Trusting that this suggestion will meet with your approval, I am  
Yours truly,  
Walter Ricks, Mgr.,  
White-Ellison Bureau.

## HUMIDITY FAVORS SPREAD OF PESTS

District Horticulturist Warns Growers to be on the Watch. June Drop Heavy

### FRUIT THINNING

Planning Second Excursion of Fruit Growers to Wenatchee Fruit District

Fruit crop conditions throughout the province are covered by his weekly news letter sent out by District Horticulturist W. T. Hunter last Saturday. The letter reads in part:

**Lower Mainland.**  
Weather conditions this week on the lower mainland are spoiling the early strawberries. Last week finished up cold and wet. This week considerable rain has fallen in showers, alternating with short spells of hot weather. Magoons are starting and with a little drier weather we expect a firmer berry to carry to eastern points.

The horticultural branch is conducting strawberry demonstrations this week at all berry shipping points on the lower mainland, and on account of the rush season many growers are being visited on their own patches.

As a result of the showery weather and the resultant mud splashed berries, growers are becoming more persuaded to the necessity of "strawing." Up to the present this has been neglected in many parts but there will be more of it done next year.

**Salmon Arm.**  
Heavy rains have fallen during the past week, and the ground is thoroughly saturated. Strawberries are just beginning to come in and there is every indication of a good crop. Other small fruits are in fine condition.

The drop has started in apples and looks like being very heavy. Delicious are dropping particularly heavily in most sections. Vegetable and grain crops are in excellent condition.

Rhubarb, asparagus and a few early strawberries are going forward.

**Vernon.**  
The rains which have fallen in the Vernon district during the past week will have very beneficial effects on all growing crops, and their effect of lowering the temperature is aiding the hay and grain crops very considerably.

It has been noticed during the past few days by the horticultural branch that these same rains are having the effect of what may possibly prove to be a heavy infestation of apple scab, as many infestations are becoming quite noticeable on the leaves of apple trees. Growers will be well advised to get busy and apply their cover spray for scab control, following the Calyx application immediately. If allowed to go on and the showery weather continues there is a great possibility of a lot of scab infestation.

What is known as the "June drop" is now in progress among tree fruits, and it is quite evident there will be a heavy drop in most varieties of apples. Duchess, Wealthy and Rome Beauty seem to be three varieties which have set and will hold well. One or two other varieties could be placed on this list, and such varieties should be taken in hand immediately by the thinning gangs and this work pushed forward. Jonathans, Winesaps, Wagners and many other varieties are dropping quite heavily and it is hard at present to make any forecast regarding crop estimates. One thing can safely be said, we will not get the crop which was anticipated by many at the time the trees were in blossom.

Pears will apparently be a good crop.

The stone fruits are not nearly as heavy as the early set of these fruits indicated. Cherries which are now going through the stoning period are dropping quite heavily and showing many undeveloped fruit.

The stoning period for plums and prunes is at present on, so we are not able at the present time to say anything definite as to this crop, but more on these two stone fruits can be given in next week's news letter.

A certain amount of frost injury due to the heavy spring frost of recent date is showing up on the developing fruits on certain locations. Drouth spot is showing up in many places. This trouble can no doubt

(Continued on Page 8)

At the threshold of normalcy. —Fitzpatrick in St. Louis Post-Dispatch.

## ANOTHER PUBLIC MEETING SOON

Board of Trade Orders Committee to Stay in Harness

Much Business Comes Before Regular Monthly Meeting

"Advertising Summerland" was the announced topic for discussion at the regular meeting of the board of trade Tuesday night. Many other subjects came up requiring attention. Some of these are mentioned under other headings in this issue. However some progress was made in that the board decided to have a fruit exhibit worthy of the district sent to the provincial fair, and a committee was named to take up the subject of issuing a folder or pamphlet.

Messrs. J. Shepherd, R. S. Jackson, C. A. Walter and Willis Walter were elected to membership. The council of the board was instructed to appoint three delegates to represent the board at the irrigation convention at Vernon July 27-30.

A proposal from a motion picture concern to enter into a contract for an Okanagan film to cost \$1,000 was tabled.

A suggestion from Penticton Good Roads Association to buy a road map issued by that organization for distribution by the Summerland board was filed. The map, while considered good advertising for Penticton, was not suitable for Summerland purposes.

Supt. F. C. McNab of the C.P.R., in answer to a letter from the secretary, stated that the transparent sign picturing Summerland which had been displayed at Steamous in a reversed position would be put right.

The local school situation was discussed at some length. Mr. A. E. Smith was asked to make a report for the board of trade committee on this subject. The general opinion seemed to be that another public meeting should be called, Messrs. J. R. Campbell, A. McLachlan and others supporting this proposal. The committee was instructed to carry on and call a public meeting when ready.

As a result of a proposal made by Ned Bentley, the board of trade passed a resolution asking the government to forbid the posting of signs on trees etc., along the highways. These signs are confusing and unsightly. The secretary was instructed to forward the resolution to other Valley boards seeking their endorsement and to have same laid before the associated boards of B. C.

The board decided to ask the municipal council to place road signs between Gartrell's corner, Peach Orchard, and the beginning of the upper Peachland road on Jones' Flat. It was pointed out that it was impossible for strangers and many of our citizens to find the way out.

Messrs. Morkill, White, Crossley, Kelley and McDonald were appointed a committee to go into the subject of issuing a board of trade pamphlet advertising Summerland and district.

It's a wise traveling man who knows when and where to stop.

It's surprising what a lot of noise masquerades as music.

## ASKS IF COUNCIL WILL PAY SHARE

Intimation that Improving Upper Road Depends on Municipality

The municipality received a letter from Col. C. Donnelly, who is in charge of the roads in South Okanagan electoral district, asking what the municipality was prepared to spend as its proportion of opening the upper road between Summerland and Peachland. Several miles of this road are within Summerland municipal limits, the boundary being at about Van Hise's, and within which considerable work should be done to make the road reasonably safe.

Under the new road act, the municipalities are required to pay twenty five per cent. of the cost of construction and upkeep of primary highways. The lake shore road is in this grade. The municipal understood that the government was providing an emergency road at its own expense. The matter will come before the council next Tuesday.

## NEW FIRM BUYS SUPPLY STOCK

Messrs. Simpson & Gowans Will Carry on Business Took Charge Monday

Two commercial men of Vancouver C. D. Simpson and J. Gowans, were the successful tenderers for the stock of the Summerland Supply Co. Ltd. They arrived here on Saturday morning and took possession of their purchase on Monday morning.

The store was closed the first of the week for stock taking, and has since been reopened.

A sale at bargain prices is announced in this number. Both men express themselves as delighted with the business prospects here, and are looking forward to doing a large volume of business.

A dinner that appeals to the eye doesn't always appeal to the stomach.

## WILL EXHIBIT AT WESTMINSTER

Board of Trade Preparing to Enter in District Exhibit Class at Provincial Fair

Summerland will enter an exhibit in the district fruit exhibition class at the provincial fair to be held in New Westminster on September 12 to 17. A decision to this effect was reached by the board of trade on Tuesday, provided a man can be found who would take charge of the exhibit.

The exhibition association will make a grant of \$200 towards the expense of making the exhibit, and besides, offers district prizes of \$50, \$25 and \$10.

Last year plans were well advanced for sending such an exhibit, but at the last moment it was found impossible to find a person who would

## ORDER ISSUED TO MAKE UPPER ROAD SAFE

Peachland and Summerland Urge Necessity of Maintaining Safe Communication

### CLOSED ALL SUMMER

Slim Prospects of Lake Shore Drive Being Repaired Until Fall. Safe Road Must Be Provided

The Review learned from Mr. J. W. Jones, M.L.A., late last evening that District Engineer Gwyer had issued instructions yesterday to Col. Donnelly to further improve the southern end of the Summerland-Peachland upper road, the total expenditure not to exceed \$1,000.

Mr. W. M. Dryden, C. M. C., of Peachland, has been active in having a reasonably safe road opened between Peachland and Summerland following the washing out of the lake shore drive. Peachland council has put through a resolution urging the minister of public works to that effect. On Tuesday Mr. Dryden and Road Foreman Murdin were visitors to Summerland and interviewed the reeve on the subject.

The question was introduced by the reeve at the board of trade meeting that evening, when Mr. J. W. Jones, M. L. A., who had come down over the road in company with Messrs. Dryden and Murdin, told of the condition of the road. From Peachland to Greata the road was in reasonably good condition. There is about a mile near Van Hise's which should be relocated and graded and the road from there south widened. Two or three thousand dollars would put the road in good shape, but on Saturday Foreman Arkell and Murdin had received instructions not to do any more work. Mr. Jones got in touch with Engineer Gwyer and learned that Victoria had given instructions to spend no more money on the upper road, and further that it would be a matter of several months before the lake shore drive could again be used. The situation was serious as travel was dangerous with the present condition of the upper road, and further this would seriously interfere with tourist traffic. Up to the present \$1,600 had been spent on the upper road. The road grant for South Okanagan district was \$35,000, and an additional \$12,000 from the Dominion road grant will be forthcoming. Peachland had taken action, Kelowna would do so at once, and he felt that Summerland should press upon the department the necessity of rendering the upper road safe, otherwise there would be serious accidents.

The meeting was a unit in insisting that the road should be made safe, and Secretary MacDonald and R. E. White were appointed a committee to prepare a telegram to be sent to the minister of public works, and mail a copy of same to Engineer Gwyer.

While returning from attending county court at Penticton on Tuesday, Mr. W. C. Kelley, accompanied by several others, had a narrow escape from a plunge in the lake. The accident occurred about three quarters of a mile south of the experimental farm pumping plant. Meeting a car going south, Mr. Kelley turned toward the edge of the road, and in doing so the outer wheels broke through the road. While the car did not overturn it stopped at a dangerous angle, and it was necessary to get a team of horses before the car could be gotten back on the road. With him in the car were Mrs. Kelley, Mrs. Rau and Donovan Simpson.

Good fortune nearly always finds a man in a receptive mood.

take charge of it, and the board of trade's plan fell through.

On Tuesday night, Messrs. J. Tait, R. H. Helmer, A. McLachlan, R. C. Lipsett and C. J. Huddleston were appointed a committee to look up a man, to ascertain the expenses necessary and to report at the next meeting of the board. The names of several well known citizens were advanced as possible persons to under-

## CHANGE IN RURAL ROUTE SCHEDULED

Courier Ordered to Await Coast Mails

Citizens residing on the rural route will be receiving their mail a little later in the day than has been the case up to the present. An order has been given instructing the courier to delay departure from the post office long enough to take care of the incoming morning mail, including the papers from the coast. This he must do unless the train is more than an hour late.

This order will delay the working of the mail and will give the courier perhaps as much as three hours work on many mornings before he can start out on the route. It is understood that this change has been made in order to satisfy those on the rural route who are subscribing to coast dailies.

Mr. W. H. Hayes, president, and Mr. R. H. Helmer, a director of the Storage Co., went down to Vancouver on Sunday to attend to some business matters in connection with the new storage plant.

## INSTITUTE OFFERS SCHOOL PRIZE

Women Considering Formation of Parent-Teacher Association

A cash prize of \$5 will be awarded to the Summerland Women's Institute to the pupil making the highest marks in the entrance examinations of Summerland consolidated schools. This decision was made at the regular meeting of the institute held last Friday afternoon in the parlor of the Lakeside church.

Mrs. H. K. Lott addressed the institute on the Parent-Teacher Association movement. She told of the good work being carried on in the coast cities through these associations.

Mrs. J. D. Welsh very ably led the discussion on this subject, and spoke of what is known in Toronto as the "Art League," carrying on a similar great work.

A committee was appointed to meet with a committee from the West Summerland institute to consider the advisability of forming a Parent-Teacher Association here.

## FINANCIAL NEEDS ARE NOW SOUGHT

Minister of Finance Sends Out Questionnaires to Civic Bodies

Questionnaires pertaining to the financial needs of municipalities of the province are now being sent out by the Hon. John Hart, minister of finance, of Victoria, one of which was received by the municipal council and was read at the last meeting.

This action on part of the finance minister is due to promises made by him and Premier Oliver some time ago that the government would fully investigate the financial position of the different cities. The reports must be in by June 30 and Municipal Clerk Nixon is now getting the required information.

## TOWN PUPILS TO TROUT CREEK

Possible Course of School Board. Make-shift Arrangements Costly

It is not improbable that a number of down town children will be conveyed to the Trout Creek Point school next term. The school board is wrestling with the difficult problem of finding accommodation for all children of school age who will be ready to attend school next September.

A member of the board recently pointed out to The Review that one way in which partial relief may be obtained will be to refuse admittance to children under seven years of age. It is predicted that the make shift arrangements that will be necessary will cost considerable, and that the money thus spent will be largely a waste.

## BICYCLE RIDER HURT BY HORSE

Run Down by Horse and Rider, Jap Receives Serious Injuries

Last Friday evening K. Mori was knocked off his bicycle by a horse and rider, and suffered serious injuries. The accident occurred at Dale's corner shortly after dark, the bicycle rider being run down by the horse. He was hurried to the hospital and the doctor summoned and it was found that he was suffering from concussion of the brain and a broken collar bone as well as other injuries. The injured man is about twenty-five years of age and works with Jimmie Shimizu, a fellow Japanese. The rider of the horse is said to be Dick Holding.

### GETS SALARY INCREASE

His Summerland friends will be pleased to learn that Mr. C. W. Lees' abilities as a high school principal have been further recognized by the Kelowna school board in that they have tendered him another increase in salary which brings this up to \$2,700 a year.

## WITH MADE-IN-B.C. MOVEMENT HERE

Summerland Board of Trade Planning for Public Meeting to Encourage Home Industries

Summerland has definitely lined up with the Made-in-B. C. movement. The board of trade at its meeting on Tuesday endorsed the campaign for the purchase of the products of B. C. farms and factories. This decision followed the reading of correspondence from the manager of the Made-in-B. C. campaign and a short address by Mr. J. W. Jones, M.L.A.

Mr. Jones said the movement was of vital importance. We all know of the heavy rate of exchange, the employment situation and the idle industries of the province. Every loyal citizen should demand that the goods he purchases are produced within the empire, in Canada, in B. C., and best of all, in Summerland. Kelowna, he said, is arranging to hold a big public meeting in the interests of this campaign. He told of Okanagan stores offering tomatoes packed in Ontario, and canned fruits put up in the United States.

Pres. Freeman told of learning recently of articles manufactured in this province which he had not known were made in B. C. These were just as good as those made at a distance and should be advertised.

The consumer as well as the retailer should be educated. The whole matter hangs on advertising, declared Mr. A. E. Smith. As the government has assisted some of these industries by advancing capital they should assist them in an advertising campaign.

R. S. Jackson told of manufacturers in Vancouver of which the general public did not know the existence. After further general discussion, the council of the board of trade was authorized to arrange for a public meeting, when further information and outside speakers will be provided.

It's a poor lawyer who can't contrive a law in more ways than one. It is better to fall out than to be kicked out.

## NEW MINISTER IN CABINET OF SASKATCHEWAN

Hon. C. M. Hamilton has been appointed minister of highways in Premier Martin's reorganized Saskatchewan government.

## WOMEN MEET IN CONVENTION

District Gathering of Institutes of Okanagan and North Thompson Valleys

### ORGANIZE PROVINCE

Plan Floated to Have Provincial Body as in Other Parts of Canada

Endorsement was given the proposal to organize a provincial Women's Institute by the Okanagan and North Thompson Women's Institute conference held last week in Vernon. The Summerland institutes were represented by Mrs. G. J. C. White, Mrs. O. F. Zimmerman, Mrs. F. W. Andrew and Mrs. John Tait.

There was effected closer organization of the district and officers and directors elected, these being: president, Miss Reekie, Kelowna; vice-president, Mrs. Maxwell, Rutland; secretary-treasurer, Mrs. Pixton, Okanagan Center; directors, Mrs. Buchanan, Peachland; Mrs. Shanks, Wood Lake and Mrs. Matlew, Oyama.

At present local institutions hold district conferences. It is now proposed to further organize these and to group them all under one provincial body. British Columbia is the only province without such a body and its lack has occasioned inability to cooperate with the federal organization. The department of agriculture will be asked to finance a bi-annual provincial conference, and it is proposed that each district shall finance its own.

On the first day Miss M. A. McKenzie, director of public health nursing, British Columbia, gave an address emphasizing the need in her work of having the vision to see an ideal rehabilitated community toward which to strive.

On Tuesday afternoon Mr. J. H. McVety, inspector of employment agencies in B. C., spoke to the conference on the vital question of the employment of women and girls for fruit picking. He stated that the government employment office in Vancouver had placed 6,000 women. This address was followed by one on Parent-Teacher work by Mr. T. H. Calder, principal of the Vernon high school, who expressed the opinion that such a system was more effective in the larger cities while the institute was more fitted to carry on the work in smaller centers.

In the evening Dr. R. B. Hills of Penticton gave an interesting address on the Canadian navy, pointing out the necessity of its upkeep for protection in commerce as well as in war.

Mr. Laidman of Vernon explained to the conference the "Made-in-B. C." campaign. Mr. Laidman is the Okanagan representative to this movement.

On Wednesday a very excellent paper prepared by Miss Marion Cartwright of the West Summerland Institute, was read, the subject being "Our Immigration Laws and How They are Enforced." Miss Cartwright is a member of the standing committee on immigration.

"Legislation for Women and Children" was the subject of another interesting paper given by Mrs. McGregor, covering recently enacted laws.

Mrs. W. C. W. Fosberry, who is a member of the standing committee for agriculture, presented a paper on "Agriculture for Women," which was pronounced a very good paper indeed, and was well received. This and Miss Cartwright's paper were both read by Mrs. G. J. C. White.

Mrs. McGregor of Penticton was again nominated as representative on the provincial advisory board which position was held for a number of years by Mrs. Lipsett of Summerland.

The conference will be held at Kelowna next year.

The delegates speak highly of the manner in which they were entertained by the Vernon institute. The program was interspersed with musical numbers and the delegates were treated to a drive through the Coldstream and to a banquet and dance.

Reports from Alberta are that rains were general throughout the province last week and the crop conditions have accordingly been greatly improved. A record production is now looked for.

## In Orchard and Garden

Helpful Advice and Suggestions by Recognized Authorities

### ORIENTALS HOLD MUCH B. C. LAND

1080 Asiatics Control 26,918 Acres, According to Survey Just Made

VICTORIA, June 8.—A survey just completed by officials of the department of agriculture to determine the number of Orientals holding land in the province has disclosed the facts that there are 1080 Asiatics controlling 26,918 acres, of which 367 acres are orchard lands, 2341 acres of small fruit, 10,659 acres of truck farms and 3077 acres land used for mixed farming.

There are 492 Japanese and 116 Chinese owning land to the extent of 14,050 acres. In orchard lands the Japanese own 176 acres whilst the Chinese only own 14 acres. In small fruits the Japanese own 2096 acres and the Chinese 25 acres. In truck farming and mixed farming the Chinese own much larger areas, having 1632 acres of truck farms as against 281 acres owned by Japanese, and in mixed farming 1228 acres as compared with 631 acres owned by the Japanese.

**Chinese Truck Farms**  
In leased lands 103 Japanese control 1781 acres whilst 369 Chinese control 11,087 acres, making a total acreage of 12,868. In orchard lands the Japanese have under lease 139 acres and the Chinese 37 acres. In small fruit the Japanese hold under lease 155 acres and the Chinese 64 acres. In truck farming the amount of land under lease to Japanese is 560 acres, whilst the Chinese rent 8184 acres.

In dairy farming the Japanese are shown as holding under lease 434 acres whilst the returns do not indicate the Chinese as carrying on that class of agriculture. In mixed farming also the Japanese fall far behind the Chinese in the amount of land held by lease. Under this heading the Japanese control only 226 acres, whilst the Chinese control 1581 acres.

**Japanese Enter Dairying**  
It might be noted that in the dairy phase of agriculture the Chinese are not reported as holding any land either as owners or tenants. On the other hand the Japanese are shown as being the owners of 80 acres used for dairypurposes.

A detailed report covering each district of the province is being forwarded to Hon. S. F. Tolmie, federal minister of agriculture, for use at the Imperial conference to be held in London this month.

### GAS STORAGE FOR APPLES IS APPROVED

In storing apples there is a very interesting alternative to cold storage, known as "gas storage." The apples are placed in an air tight chamber filled with the gas produced by the respiration of the apples themselves. An electric instrument is used to determine whether at any time the proportion of carbon dioxide in this gas becomes excessive, and when that condition occurs air is admitted to dilute the gas. The air is kept in slow circulation by its own temperature variations and means are taken to remove excess moisture. It is stated that this system doubles the time during which apples can be kept in good condition and that the cost of working is very much below that of any kind of cold storage. The merits of the system are being closely studied by the British Investigation Board.

### BERRY GROWERS TO HAVE LARGE PLANT

New Westminster.—The cold storage plant of the St. Mungo Canning Company has been purchased by the B. C. Berry Growers' Association, and is already under operation by the new owners for the storage of strawberries from Mission, Hatzic and other Fraser Valley points. The price at which the property changed hands is not announced, but the plant cost in the neighborhood of \$70,000, when it was built and equipped six years ago, at a time when materials were in the main cheaper than they are today.

The plant will also be used as a concentration and distributing point, berries being shipped here and then re-shipped to the wholesalers in their fresh state when the occasion arises.

The main object of the purchasers is to put berries in storage for jam purposes and for canning, and to prevent glutting of the market in years when there is a heavy surplus over the requirements of the fresh fruit market and consequent disastrously

### WASHINGTON HAS NEW ORCHARD PEST

The following, clipped from the Oroville Gazette, tells of the appearance of a new pest just south of the border.

"W. H. Sesson reports the appearance of another pest in the shape of a small worm from half an inch to an inch and a half in length that feeds upon the tender leaves of vegetables and trees. This worm is of a light greenish color with two lighter green stripes down the back. They have appeared on Mr. Sesson's tract in East Oroville by the millions. The voracious creeper started in on weeds, stripping the Russian thistle to the stocks, and then switched their attention to vegetables and trees. Mr. Sesson had two acres of cantaloupes growing in a most flourishing condition. These little fellows with a stevedore appetite hit that patch and there are not ten hills left. Some idea may be formed of the vastness of this army of destroyers when it is stated that from a small tree not two feet high Mr. Sesson picked off 129 of these worms, all of them busy denuding the tree of leaves. Mr. Sesson discovered that the trees can be protected by binding a strip of wood around the trunks, as Mr. Worm with all his agility, cannot crawl over such a barrier. The presence of the worm is reported in other parts of the valley. Joe Miles has had some experience with the nasty little pests on his place at Ellisforde, but in his case, the visitors so far have confined their depredations to growing beets and other young tender plants. It would seem that if it is not one thing it is something else, and the worm is the latest trial."

### KILLING SHADE TREES

Undesirable shade trees, such as Norway poplar and Balm of Gilead may be killed by girdling the trees about four feet from the ground; then the bark should be stripped to the roots. This will cause the tree and its roots to die; later the entire tree may be removed and the stump grubbed out.

When a tree is sawed off at the ground without girdling, the stump and roots of the poplar variety immediately send out hundreds of small sprouts which are difficult to destroy.—Ohio Experiment Station.

### WHEN NOAH WON OUT

"You remember Noah had to work a long time on that ark. It was up hill business, too, at best, building a boat way out on dry land, while the local anvil-and-hammer club sat around spitting tobacco juice on his lumber, whittling up his pine boards with their jackknives, and telling him what a fool he was for expecting a big rain in a country that was too dry to grow alfalfa. But he kept at it. Finally the flood came and every mother's son of the croakers was drowned. This is the only instance we know, either in sacred or profane history, where a bunch of knockers got exactly what was coming to them.—Ex.

Johnny the Precisian  
"Johnny," said a mother, as she looked at her son distrustfully, "some one has taken a large piece of cake out of the cake box!"  
Johnny reddened guiltily.  
"Shame on you!" said his mother. "I didn't think it was in you!"  
"Well, mother," was the feeble reply, "it isn't all in me. Part of it is in Elsie."

CHILLIWACK.—There is an enormous run of Colachans in the river. Many tons have been caught at one bar near here. Fishermen were taking 50 to 100 at one dip of their nets. One Indian family caught a ton and a half in a few hours. The Colachan is a very delectable food, highly popular in season, and it is only a few inches long. The run lasts only a short time.

### CANADA'S DOLLAR AND UNCLE SAM

Letter is Losing More Through Present Exchange Situation Than is Canada

The superstition that Americans make a profit out of the premium on their funds in Canada dies hard, in spite of the evidence to the contrary. Everyone realizes that Canadian trade with Europe is falling off, due to the depreciation of European funds in Canada. Many of course do not realize that the currency of one country has no legal status in another country, and that a Canadian dollar is not a legal dollar in the United States, but merely a promise to pay a dollar in Canada.

Similarly an American dollar in is only a promise to pay, which must be collected in the United States. It is at a premium in Canada because our currency is depreciated to the extent of our inability to redeem our promises to pay in specie. This is no fault of the United States, and they are doing their best to correct it by the purchase of Canadian securities. Of the total Canadian bond sales of \$324,914,687 last year more than two thirds, or \$223,084,000, were sold in the United States. This does not look as if they were pinching our dollar to hear it squeal. True they hope for a profit from the purchase of these securities, but neither they nor we are in business for fun. They pay the market price and the Canadian sellers are satisfied.

The present premium on New York funds in Canada is a distinct detriment to American trade with Canada, and the fact that a number of hotels and shops in that country are advertising that Canadian money will be accepted at par is sufficient evidence of their desire to retain it, even foregoing a considerable part of their legitimate profit to do so.

Much of the criticism here is on account of the demand for certain classes of American goods in Canada, which helps to swell the balance of trade against us, but this is a rather matter, due entirely to the belief of the public that they are getting better value in quality or style for their money, and while this belief lasts, so will the trade, unless of course the premium makes the prices too high. Those who prefer American wares must be willing to buy even at the retail prices in Canada, which must allow for the duty as well as the premium on American funds.—The Financial Post.

### THE LOCAL NEWSPAPER

The local newspaper must always be the mainstay of any advertising campaign designed to catch the eye of the masses of the people—the buying public. By no other means can so large a proportion of the best trade of the community be reached. The local merchant should not get this idea:

"Oh, my dear fellow, I can not lay off my clerk without losing him; I cannot change my location without losing it; I cannot suspend my insurance without losing my protection—but advertising, that is different! Advertising is a faithful dog, I can kick him into the street whenever I feel like it and he wags his tail, comes back when I want to wipe my feet up on him."

This is not true. Advertising is not different. It is a great force in business and many great and many foolish claims are made for it, but it is not greater, not more powerful than any other factor of business. If any good is to come from it it must be kept on the job.

The local merchant should set aside a definite sum to be spent in a year. His expenditure should be based upon a percentage of last year's business and he should spend it systematically. Don't let the question of "copy" frighten him to death; don't let him get the idea that "copy is the whole thing to advertising. To be sure there is a great difference in the effectiveness of advertisements; but if he will forget all about fine writing or being smart and clever; if he will forget the big sounding, pat phrases which have been used so often that they mean nothing, and sit down and talk to the people of his community, about his store and his stock and his service, he will write a good ad. without knowing it.

Is there any reason in the world why the local people should buy the merchandise he sells. Let him tell them the reason; and tell them again and keep on telling them. That's advertising—good advertising. Has he anything in stock that Mrs. Jones or Miss Smith or Hank Brown would be interested in? Let him tell them about it, and tell them about something else next week, and keep on telling them, until they know beyond all doubt that he has just about the "niftiest" stock of merchandise ever brought together in his neck of the woods.

That's advertising—good advertising.

### THE WOMEN'S INSTITUTES.

The West Summerland Women's Institute held its monthly meeting on Friday, June 10, at 3 p.m. in the Parish Hall. The roll call answered by quotations from James Whitcomb Riley.

The committee, arranging the prize list for the Institute section of the fall fair reported that this had been done. Mrs. Solly read an appeal from the Red Cross asking for a membership canvass of the district. This was arranged for, Mrs. Solly kindly consenting to act as secretary-treasurer.

Mrs. Lott gave a splendid paper on the Parent-Teachers' Association, which was followed by a discussion led by Mrs. Zimmerman and Mrs. McGown, which all proved very interesting to those present.

The meeting then adjourned and was followed by afternoon tea. Mrs. Zimmerman and Mrs. G. J. Coulter White were the delegates appointed from West Summerland to be present at the Okanagan and North Thompson conference held in Vernon this week.

Mrs. F. W. Andrew and Mrs. Jack Tait were elected to represent the Summerland Institute.

### STEEL MAY SOON BE LAID ON C.N.R. LINE

People directly interested in the construction of the proposed C.N.R. railroad between Kamloops and Kelowna are of the opinion that the long talked of branch will be built this season. Thirty carloads of steel have arrived at Kamloops and construction engineers have left Ottawa for the district. This, together with encouraging word received from Mr. J. A. McKelvie, M.P., gives ample grounds for the contention that operations will begin soon.

While many have given up the idea that the road will come for years yet, others have maintained all along that, in view of the large district it would serve, the matter would receive the attention of the officials at once. They now point to the arrival of the steel and other movements as substantiating their contention.

Star gazing pays the astronomers, anyway.

Justice is just what the unjust are anxious to avoid.

And there's the rest cure; but don't take it too often.

A nobody is a man who is always boasting about his ancestors.

Smiles cost less than electric lights and they make the home brighter.

### SASKATCHEWAN STEERS FOR GLASGOW

Eighty head of prime beef raised on the prison farm at Prince Albert. The average weight of the eighty head is 1,385 pounds. It is hoped that they will be a fine advertisement of the cattle fattening possibilities of the Canadian northwest.

### CULLING THE FLOCK

The hatching season should now be over on the well regulated poultry plant and attention directed to culling the flock to make room for the growing youngsters.

In the first place there should be vigorously culled from all flocks all birds that show any physical defects such as crooked beaks, backs or breasts, excessively long toe nails, sunken eyes and long "crow" head, knock knees or other sign of post-stamina and low vitality.

At this season, if they have not already been discarded, the hens over two years old, unless possessing the characters of extra high production and retained as breeders on this account, should be marketed as soon as they stop laying, show signs of broodiness or moult.

When trap nests are used, this condition is readily noticeable, but if not, the hens that have stopped laying can be easily distinguished by their shrinking comb and fading color of face and wattles, also by the contraction of the pelvic bones.

These bones, slightly protruding on each side of the vent, remain spread to the width of about three fingers placed perpendicularly between them, as long as the hen is laying. In the poor producer they will be found closed to the width of only one finger and when the latter condition is evident early in the season, when she should be still producing, it is a fairly good indication that the bird has given up too soon and is not the type that makes the high record.

W. T. SCOTT,  
Poultry Division, Experimental Farm,  
Ottawa.

Vigor, health and high producing qualities are shown by distinctly visible characters and all birds that do not carry these qualities in a marked degree should disappear from the flock.

The high producing characters of primary significance are: full, red comb, bright, bulging eye, long keel bone, with lots of width between stern extremity and pelvic bones showing depth of body with capacity for feed and room for the producing organs; fine pelvic bones spread well apart and an elastic, velvet texture to the skin of the abdomen.

Hens that moult late in the season and in the yellow skinned varieties those individuals that fade out white in the sections that show pigment, namely the skin, beak, shank and ear lobe, also indicate the possibility of high production and should be kept in preference to those that do not carry these qualities.

There are more intricate decisive characters that help in the selection of good from poor layers, but the foregoing will be of some use in an elementary way, to the farmer in selecting his breeders to carry over to the next season. If carefully followed, they will eliminate most of the undesirable specimens that are a source of expense without profit and rob the deserving hens of the flock of their creditable record.

W. T. SCOTT,  
Poultry Division, Experimental Farm,  
Ottawa.

It's an easy matter to obtain peace; all you have to do is to let the other fellow have his way.

### Synopsis of Land Act Amendments

Minimum price of first-class land reduced to \$5 an acre; second-class to \$2.50 an acre. Pre-emption now confined to surveyed lands only.

Records will be granted covering only land suitable for agricultural purposes and which is non-timber land.

Partnership pre-emptions abolished but parties of not more than four may arrange for adjacent pre-emptions with joint residence, but each making necessary improvements on respective claims.

Pre-emptors must occupy claims for five years and make improvements to value of \$10 per acre, including clearing and cultivation of at least 5 acres before receiving Crown Grant.

Where pre-emptor in occupation not less than 3 years, and has made proportionate improvements, he may, because of ill health, or other cause, be granted intermediate certificate of improvement and transfer his claim.

Records without permanent residence may be issued, provided applicant makes improvements to extent of \$300 per annum and records same each year. Failure to make improvements or record same will operate as forfeiture. Title cannot be obtained in less than 5 years, and improvements of \$10 per acre, including 5 acres cleared and cultivated, and residence of at least 2 years are required.

Pre-emptor holding Crown grant may record another pre-emption, if he requires land in conjunction with his farm, without actual occupation, provided statutory improvements made and residence maintained on Crown granted land.

Unsurveyed areas, not exceeding 20 acres, may be leased as homesteads; title to be obtained after fulfilling residential, and improvement conditions.

For grazing and industrial purposes areas exceeding 640 acres may be leased by one person or company. Mill, factory or industrial sites on timber land not exceeding 40 acres may be purchased; conditions include payment of stumpage.

### NATURAL HAY MEADOWS INACCESSIBLE BY EXISTING ROADS MAY BE PURCHASED CONDITIONAL UPON CONSTRUCTION OF A ROAD TO THEM. Rebate of one-half of cost of road, not exceeding half of purchase price, is made.

### PRE-EMPTORS' FREE GRANTS ACT

The scope of this Act is enlarged to include all persons joining and serving with His Majesty's Forces. The time within which the heirs or devisees of a deceased pre-emptor may apply for title under this Act is extended from one year from the death of such person, as formerly, until one year after the conclusion of the late war. This privilege is also made retroactive.

No fees relating to pre-emptions are due or payable by soldiers on pre-emptions recorded after June 26, 1918. Taxes are remitted for 5 years.

### PROVISION FOR RETURN OF MONEYS ACCRUED, DUE AND BEEN PAID SINCE AUGUST 4, 1914, ON ACCOUNT OF PAYMENTS, FEES OR TAXES ON SOLDIERS' PRE-EMPTIONS.

Interest on agreements to purchase town or city lots held by members of Allied Forces, or dependents, acquired direct or indirect, remitted from enlistment to March 31, 1920.

### SUB-PURCHASERS OF CROWN LANDS

Provision made for issuance of Crown grants to sub-purchasers of Crown Lands, acquiring rights from purchasers who failed to complete purchase, involving forfeiture, on fulfillment of conditions of purchase, interest and taxes. Where sub-purchasers do not claim whole or original parcel, purchase price due and taxes may be distributed proportionately over whole area. Applications must be made by May 1, 1920.

### GRAZING

Grazing Act, 1919, for systematic development of livestock industry provides for grazing districts and range administration under Commission. Annual grazing permits issued based on numbers ranged; priority for established owners. Stock owners may form associations for range management. Free, or partially free, permits for settlers, campers or travellers, up to ten head.

# The Summerland Review

Established August, 1908

Published at Summerland, B.C., every Friday by THE REVIEW PUBLISHING COMPANY, LIMITED

Ralph E. White, Editor and Manager

Subscription Rates—In British Empire, in advance, \$2.50 per year; six months, \$1.40. To U.S.A. and other countries, \$3.00 per year.

Advertising Rate Cards and information respecting territory and samples of paper mailed upon request, or may be seen at the office of any advertising agency recognized by the Canadian Press Association.

Advertisers must have copy in by Wednesday noon in order to insure changes for standing advertisements. New display advertising copy can be accepted one day later.

Correspondence—Letters addressed to the Editor and intended for publication must be short and legibly written on one side of the paper only. The longer an article, the shorter its chance of insertion. All communications must bear the name of the writer, not necessarily for publication. The publication or rejection of articles is a matter entirely in the discretion of the Editor. No responsibility is assumed by the paper for the opinions expressed by correspondents.

FRIDAY, JUNE 24, 1921.

## THE "WEEKLY" IN OUR NATIONAL LIFE

The value and importance of the weekly newspaper is recognized and a splendid tribute is paid to the weekly newspaper men of Canada and the part they play in our national life by the Vancouver Daily Province. The editorial was occasioned by the recent gathering of weekly newspaper editors and publishers of Canada in convention in the coast metropolis. The Province says:

"Vancouver extends a hearty welcome to the representatives of the weekly press of Canada, who have honored this city by holding their convention here. To the weekly journals the daily press must yield the precedence on the score of seniority and of numbers. Weekly journals were published in Canada more than eighty years before the first daily appeared. Everywhere on this continent the weekly has been the pioneer newspaper. It followed close on the discovery of gold, the occupation of the prairie, the establishment of the first settlements on the edge of the forests. A recent cabinet minister hauled his newspaper plant by ox team eight hundred miles to the place of publication. It would not surprise the country to hear that an outfit had been sent to Fort Norman by airship. Such has been the spirit of enterprise in the weekly press. There is nothing to beat it in modern daily journalism. The weekly press is spreading the light in hundreds of Canadian communities today, where a daily paper is hardly ever seen, and is thus continuing to perform the service begun a hundred and seventy years ago.

Not only from the nature of his service, but also on the score of his varied attainments and resources is the successful producer of a weekly paper a person of note. He must know how to do more things well than any person employed on the daily press is required to perform. He is a writer, a reporter, a business man and artificer. Those who conduct weekly papers sometimes make merry over their various accomplishments. But in fact, the men who bring out a good country or town newspaper, covering adequately the activities and interests in their district, and are able to make the enterprise a moderate success, must possess sound business qualities, good judgment, adaptability and patient industry. To say nothing of power to write well on many topics. We say in no spirit of conventional compliment, much less in any patronizing mood, that some of the best newspaper writing in Canada and the United States is found in the weekly newspapers. This means the regular newspapers of the towns and villages, and not especially the journals of opinion and of classes and of interests which appear in the larger cities. The influence of George Brown, Joseph Howe, W. L. McKenzie, D'Arcy McGee, Sir Francis Hincks and many other journalist politicians was largely gained through their weekly message. In his later days Goldwin Smith preferred to address the people through a weekly paper.

During the last year or two a considerable mortality has been reported among the Canadian daily papers. The weeklies seem to have a greater power of endurance. A reaction was due from the tendency to turn flourishing, serviceable and popular weeklies into small and badly supported dailies. Those well established and well conducted weekly journals, whose proprietors resisted this temptation, have in many cases justified their conservatism by the greater satisfaction they gave the average reader, and by the greater return they bring their owner."

## FRUIT GROWERS ARE OPTIMISTIC

The first copy of a crop report of the fruit commissioners' branch of the department of agriculture at Ottawa, reached The Review desk this week. The report is published in pamphlet form and contains a fund of information regarding present conditions in the various fruit sections of Canada.

Fruit Commissioner Baxter, in his opening remarks, says there has been a marked increase in the interest being taken in fruit growing in Canada. He declares that there is a feeling of optimism among orchard owners as a result of prospects for a bumper crop and the understanding reached by most growers that even bumper crops may be disposed of at a profitable price if the fruit is of good quality.

In a section of the report devoted to apple prospects for the present season attention is drawn to Summerland and several other Okanagan Valley points.

Besides giving a comparative table showing the average maximum and minimum wholesale prices at which apples sold in Toronto, Ottawa and Montreal during the season of 1918-19, 1919-20, 1920-21, many other points are brought to the attention of the reader. Reference is made also, to the great fruit exhibit planned to take place in Britain between November 2nd and 15th, and the commissioner believes this to be Canada's opportunity to advertise the unexcelled quality of her fruit and to increase her sales in the United Kingdom.

## IRRIGATION RATES AND LAND TAXES

"We understand that the future of your irrigation system is still uncertain."

"According to your financial statement your chief public utility shows a large deficit."

These and similar comments are frequently received by municipal authorities from financial houses or possible buyers

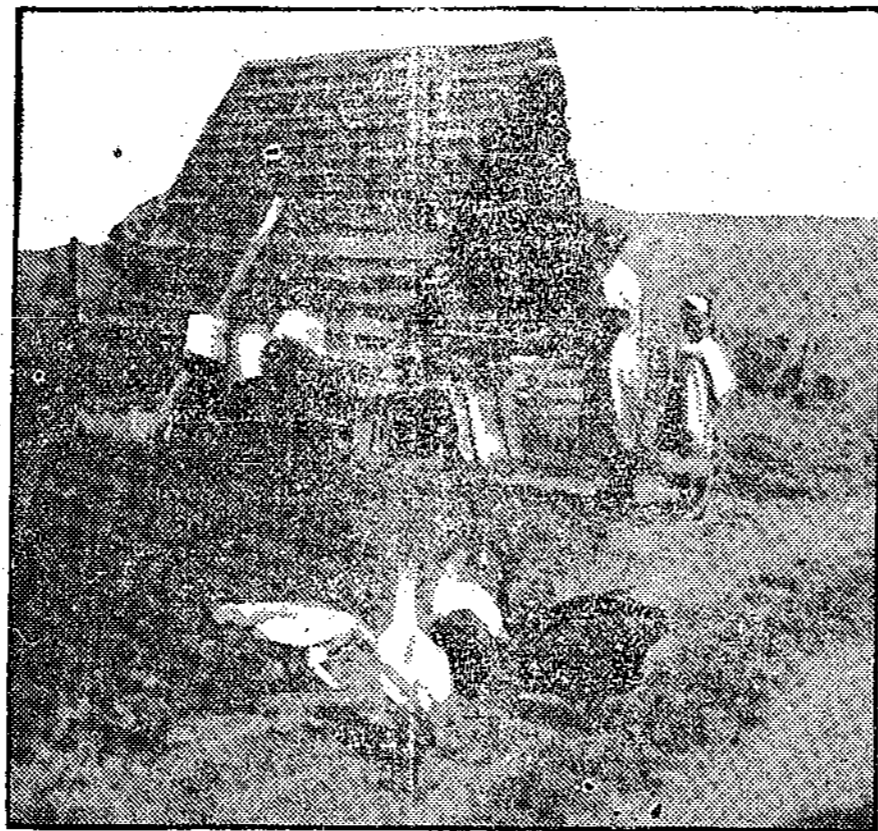

of Summerland municipal bonds. The fact that the irrigation rates are not sufficient to meet the annual operating and other charges against the system is without doubt leaving a bad, if wrong, impression with such people.

True, the deficit is made up through taxes which has been the policy of the municipality since the irrigation system was acquired, but the fact cannot be gainsaid that the deficit shown each year is having a marked depressing effect on the market value of the municipal loan issues.

Looking at this matter from the tax point of view, we find that it has the same ill effect. We are putting ourselves in a false position before enquirers and any who are contemplating settling in Summerland. The prospective buyer is more concerned in the tax rate than he is in the price he is to pay for water, in fact, if you talk with people in sections up and down this valley where water is short, one would conclude that the water user is quite willing to pay almost any price to be assured of an ample supply of water throughout the season, but that same landowner protests against an unduly high tax on his land. Were Summerland to make its irrigation system practically self supporting the lowered tax rate would be an excellent advertisement, and we would be put in an enviable position in this respect in comparison with practically all other municipalities in anyway similarly situated.

More and more it is becoming apparent that we are doing ourselves an injustice and in a measure deceiving ourselves when we continue to hold the irrigation rate to the basis of \$5 an acre.

## The Spell of Quebec's Roadside Oven

By courtesy of the C.P.R. A Quebec Roadside Oven.

No housewife in America is so independent of the price of coal and oil as the habitant woman of Quebec, with an out-of-door brick oven at her beck and call.

These roadside-ovens, — and nobody knows exactly what whim or fancy possessed the Quebecois mind for carrying his baking apparatus so far from home, unless it was fear of the roaring fire which must be set up in order to bake the large quantity of bread necessary to fill the many mouths of the grande famille, — are not only landmarks in Quebec but indications of the habitant housewife's hospitality. They seem to say to the passer-by, "Now you know you are in Quebec, and Quebec is the land of home-made bread." Mais oui. "Entrez-vous. For a mere song Madame will cut you some thick slices and bring out a pitcher of milk." Oui, the grand oven is undoubtedly the symbol of Quebec! There is a friendly look about these old wayside ovens which arises out of the fact that they are made by hand and fit in perfectly with the landscape and the scheme of life in general obtaining in this province, so pre-eminently the land of the home-made.

In many months of tramping in Quebec we have encountered scores of these ovens. But because they are home-made, each one is different. Each architect builds to suit his own fancy or else to come in to the possibilities as to shape and size contained in the material at hand. Leaks are overcome with smudges of plaster and added coats of white wash. Till the oven often resembles

—a frosted cake. Or else an extra roof is attempted with bits of old board, and then the oven resembles some queer little maison doll's house for the children to play in, or a large kennel for the chow that draws the little cart. Seeing these ovens for the first time you fancy yourself somewhere in the Old-World. But then a similar fancy seizes you about everything in Quebec, which in atmosphere, is all foreign and different. On all occasions, even in the matter of these ovens, Quebec is just herself. It is a Quebec loaf baked here and not the "little bread" of France, nor yet its "wardstick" just a four or five pound loaf that will cut the generous slice that the child at play, or garcon helping with the hay, finds satisfaction in.

These ovens along the Quebec roadside stand for two important factors in our national life. They stand for rural life, for farm life and the development of the country parts. And they stand for family life without which attempts at rural development have proved vain. The women of Quebec are among the most hard working women in Canada and among the most contented. Given a little house with a curved roof, a tiny balcony and an out-of-door oven by the roadside, your habitant woman asks nothing more of life except a host of children to eat her bread. Every day may be "baking day" for all she cares with grain growing in her own fields, for flour, and an oven of character that can always be stretched to hold another loaf.

# Beer's Shoe Store

# PASSING EVENTS

LOCAL, PERSONAL, SOCIAL & OTHERWISE

Mrs. P. S. Roe has as her guests her aunt, Mrs. G. B. Moore and niece, Gladys Moore, who arrived here from Vancouver last Friday.

There has been a small but appreciable fall in the level of the lake, probably three inches from the high point reached nearly two weeks ago.

Mrs. Basil Steuart will receive Thursday, June 30, from three to six. Her mother, Mrs. Dan Cassel, of Vancouver, will receive with her.

Messrs. Robertson & Partners who were awarded the contract for building a government road at Oliver, are subletting the work among two or three contractors.

Mrs. T. J. McAlpine went down to Vancouver last Saturday morning. She will represent the women of the local church at the Baptist convention which opens this week.

Miss Laura Catruthers is again spending the summer here. She is employed with R. Pollock in his fruit shipping business and is living at the home of her aunt, Mrs. Vanderburgh.

A basket picnic to take the form of a reunion will be held by the Summerland people formerly residents of Castor, Alberta. This reunion will be held on July 1 at the experimental station.

The pastor, Rev. James Dunlop, and Messrs. W. C. Kelley and H. H. Elsey are delegates from Summerland church to the Baptist convention to be held during the next few days at Vancouver.

This is the last week of school. Some of the classes have already been dismissed. Third year high school pupils are writing their matriculation exams, and the entrance class is also writing.

Dr. H. S. Timberlake will be at the Summerland Drug Co. next Tuesday, June 28th, from 9 to 12 in the Summerland store, and from 1:30 to 5:30 at West Summerland store. Patients wishing to see him would do well to make their appointment at the earliest possible date.

Two police court cases identical in form were heard on Thursday by Major Hutton. Alec. Steven and Andrew Fenwick were each charged with allowing a stallion over one year old to run at large. Both were found guilty with extenuating circumstances and were fined \$5 and costs. The court intimated that but for the extenuating circumstances their fines would have been much heavier.

Mrs. Dan Cassel of Vancouver is here on a visit with her daughter, Mrs. Basil Steuart.

Mrs. C. E. Pineo returned on Monday from Vancouver where she has been visiting since last October.

Mr. K. Shimizu, who is working as a missionary among his fellow countrymen under Dr. S. S. Osterhout, superintendent of Oriental missions in Canada under the Methodist church, is a visitor in Summerland this week. He is arranging to hold a meeting of local Japanese in St. Andrews church next Sunday for the purpose of organizing a mission here.

His many friends will be pleased to learn that the name of A. W. Vanderburgh recently appeared in the list of students who passed the second year in medicine at Toronto University. Mr. Vanderburgh is spending his holidays here with his parents. Another Okanagan College boy, Harry Jennings, has also completed his second year in medicine at the same university.

Mr. and Mrs. Helmer were hosts at an exceedingly pleasant garden party and dance at the experimental station last Friday. The dance was held in the new pavilion, which was tastefully decorated with cut flowers. The gardens are now in full bloom and earlier guests were delighted with the pretty scene which met their view. Supper was served at Mrs. Helmer's home, after which the guests returned to the pavilion.

Many Summerland motorists who made his acquaintance while here this spring will be interested in the announcement in our advertising columns of the decision of Mr. Peckham, formerly of the Giant Motor Co. of Vancouver, to locate here. Mr. Peckham is taking the repair end of the Summerland Garage business. He has the reputation of being one of the foremost auto mechanics in the west, and Summerland motorists are fortunate in having his services.

In our issue of last week there was published a report of a police court case in which it was stated that James Fyffe was found guilty of having let down the bars of a pasture where the plaintiff's horses were grazing. We are now advised that the charge laid against Mr. Fyffe was with having "spoiled" the horses referred to, and that it was on this charge that Mr. Fyffe was found guilty, without any finding on the question of his having let down the bars or opened any fence deliberately or otherwise. The report was written on unquestioned information.

T. B. Young has recently unloaded his third car of Oldsmobile cars.

Mrs. Ibbitson is recovering from a serious illness and is again able to be about.

Mrs. H. H. Elsey returned last Thursday evening from a visit to her daughter in Duhamel, Alta.

Duncan Wood has returned to his mining claim at Hedley, the gold mine there again having started operation.

Mr. and Mrs. J. W. Richmond of Victoria arrived here on Wednesday to spend a vacation with her parents, Mr. and Mrs. Darkis.

Summerland was visited a few days ago by officials from the North West Fruit Exchange who were looking over the district to learn of conditions. They motored here from Vernon.

Theatre goers will learn with pleasure that the management of the Rialto Theatre has booked the famous picture, "Kismet," which will be screened in the local theatre on July 6 and 7.

Official announcement is made in this issue by the municipal tax collector that the poll tax is now due and collectable. Any who are liable to this tax who do not pay at the municipal office will be receiving a call from the constable.

Chairman Kirk of the water committee represented the municipality at a preliminary committee meeting in Kelowna on Wednesday when matters of importance to the district were prepared to be presented at the approaching irrigation convention.

Under the direction of the department, Inspector J. Tait is making a survey of the cellar and other fruit storage space of this district which includes Summerland, Naramata, Peachland and Westbank. A survey of crop prospects will be made at an early date.

Mr. J. McLachlan, editor of the Virden (Man.) Advance, was a recent visitor to Summerland on his way back from attending the press gathering at Vancouver. There are a number of Summerland people, formerly residents of Virden, who were glad to have a visit from Mr. McLachlan.

A party of some twenty eight ladies of the neighborhood, organized by Mrs. Angove and Mrs. Walden, gathered at the home of Capt. and Mrs. P. S. Roe last Saturday evening, and surprised their daughter, Miss Edith, with a shower of things greatly appreciated by a prospective bride. A very pleasant social evening was enjoyed, refreshments being served by the ladies. The marriage of Miss Roe to Mr. Harold Steers of Pentiction will take place on Saturday of this week at the home of her parents.

### SPECIAL EXCURSION STEAMER

S. S. Okanagan will leave Kelowna at 7:30 a.m. for the Pentiction Dominion Day celebration, calling at Peachland, Summerland, Naramata and all intermediate points. Returning boat leaves Pentiction at 8 p.m. Special attractions this year.

Mrs. J. W. Naylor returned on Monday from a two or three weeks visit to Vancouver.

The burning out of a wire in the generator put churches and homes in darkness last Sunday evening the latter part of the usual hour for church service.

### Next Week's Work in The Orchard

Fire blight is taking a turn for the worse. Watch your trees and for the guidance of our new comers we would say call in your inspector and ask him to demonstrate methods of handling this serious disease. And don't forget the combination disinfectant which can be procured from the drug stores.

Some cherries seen on Water Street, Vancouver, by the writer, which came from the interior of British Columbia were a positive disgrace to the name of "cherry." They were sitting by the side of prime Wenatchee Bings, and the advertising B. C. fruit got as the crowds passed by and saw them was the kind that kills all our efforts to get out literature and boost the Okanagan. That kind of stuff, whether cherries, plums, apples or any other commodity, never has paid, will not pay now and never will pay.

It is mighty bad hay weather but it is better to leave the hay in coils till well dried before stacking. A damp stack makes mouldy, dusty hay.

There never was a war in which each side couldn't prove the other the aggressor.

The wooden bridge crossing the Similkameen River south of Oroville has been condemned, and a guard placed in charge. The Oroville Gazette speaks of the guard letting through traffic across the bridge at driver's risk. A new concrete bridge will be built by the state to take the place of the condemned structure. The cost of the new bridge is placed at \$57,000.

What HE Has to Sell—But Do Our Readers Know?

**Peachland Doings**  
A Weekly Chronicle Furnished  
By Our Local Representative.

Mr. K. C. Tallyour returned home on Wednesday morning from a short visit down the lake.

Mr. J. Wright spent a couple of days in the Kelowna district, returning home on Wednesday evening. He has been laid off for some days with poisoning in his thumb caused by a thorn.

Mr. Orr left on Wednesday to spend a few days in Pentiction. Since coming here he has made a great improvement by cleaning up and clearing the beach in front of his property. It was his intention to erect a small dwelling on the lot, but some changes make him uncertain whether or not to build at present.

Mrs. W. Charlton is enjoying a week's visit from her sister, Mrs. C. Griffiths and her husband, who came in from Vancouver last week.

After a pleasant visit in Pentiction with her mother and his wife, Mr. and Mrs. E. Law, Mrs. L. Vivian returned on Thursday.

Mr. J. Edgecombe returned home on Friday evening from a short business trip up the lake.

Peachland fruit growers were given some first hand instruction on fruit thinning on Thursday last. District Horticulturist W. T. Hunter and Inspector J. Tait gave a public demonstration in Mr. H. Hardy's orchard in the forenoon and in the afternoon in Major K. C. Tallyour's orchard in the Trepanier district. Quite a number of growers availed themselves of this privilege and went away feeling that this time was well spent. Not only did these gentlemen give a very interesting demonstration on the thinning of the fruit, but incidentally touched on many other phases of the orchardists' pleasures and difficulties. In demonstrating the thinning of an apple tree, Mr. Hunter advised eight inch spacing, but stated that while it was impossible for any person to thin a tree so that the fruit would all be eight inches apart, a person was forced to use common every day sense and erect the tree as a whole. That is to say, where you have a branch say 24 inches long, thin to leave three of the fruit to mature and in carrying out this system you averaged your crop on the tree at eight inch spacing. Mr. Hunter explained that some advocated leaving the largest fruit formed, and stated that other points being favorable, he would prefer to leave the largest, but explained that it did not always necessarily follow that the fruit which showed largest at time of thinning would be the largest at the finish, because there is a short space of time in the growth of the fruit when the growth for a time ceases, and very often in the next start off some of the smaller size would even up on the larger. One other point to consider was the formation of the fruit and in every case the fruit which showed any sign of blight or deformity should be the one to remove. Another and quite important point is the position of the fruit on the limb. The fruit which hangs in a downward position is the best to leave because it is less liable to be broken off by the wind. Quite a store of information was given on the matter of pests and valuable information given as to the kinds of spray for each and as well the proper time for the use of the spray.

Mr. C. Drake and Albert Town took the stage for Kelowna on Tuesday last, returning home by the evening boat.

After a visit of six months to coast cities, Mrs. E. Howell returned on Thursday last.

Miss Mary Vicary was a passenger south on Friday evening's boat for a short visit.

Mrs. J. Michael was a visitor to Kelowna on Saturday, returning on the evening boat.

Mrs. A. S. McCall of Gibson's Landing, who has been spending a few weeks in Pentiction with her daughter, Mrs. Allan McDonald, is visiting relatives here. She came up on Saturday morning's boat and after a short visit expects to leave for her home.

Miss Ilyva Murdin returned on Saturday after having taught school for a term in Saskatchewan. She expects to write on her "French" this week.

Mr. Joe Sanasac left last week on a short business trip to Seattle. His housekeeper recently left for the east.

On Thursday the Peachland base ball boys put on an afternoon and evening of amusement. The first event was a ball game, the score of which will have been noted in the last issue of The Review. The boys removed the old dressing room and refreshment booth from its former location at the old base ball grounds, placed it on the present grounds and served refreshments. In the evening they put on a concert, a box social and dance, all of which proved a howling success. The Summerland orchestra supplied the music in the evening. Quite a representation of Summerland folks were up for the ball game and a number of them stayed for the evening program.

Mrs. Leverington and family spent the week end in Summerland with Mr. Leverington who is working there.

Miss Jean Dryden received quite a surprise on Monday evening when a number of her young friends gathered at her home to help her celebrate her birthday. She had been successfully kept in the dark about the little affair until the crowd arrived at the house. A very enjoyable evening was spent in social intercourse and playing various games. Dainty refreshments were served, including ice cream, and the party broke up just before midnight by singing "For She's a Jolly Good Fellow."

Miss Dancer of Summerland was in town on Monday, spending part of the day with Mrs. E. House and Mrs. Howell, and part with Mr. and Mrs. N. S. Davidson. She returned home on the evening boat. Miss Dancer has just recently returned from a trip home to the Old Country.

Mrs. Crouch and Miss Turner of Pentiction are in town this week, the guests of Mrs. L. Vivian. Miss Turner is the representative of the Spirilla Corset Co.

Mr. Orr has returned after a short visit with friends in Pentiction.

A little one has arrived to bless Rev. C. D. and Mrs. Clarke since they moved from here to the coast a few weeks ago. Mr. Clarke is expected here shortly to take his auto over.

Mrs. Keating and Mrs. Buchanan returned on Thursday last after attending the Women's Institute convention in Vernon.

**Naramata News**  
Current Events of  
Town and District

The earliest shipment of Bing cherries from the Okanagan was sent out on Wednesday, June 23, by the Naramata Fruit Union. The cherries were brought in from Mrs. Jack Young's ranch, and were of good size and fully ripe. The Governor Wood and Early Richmond varieties are being shipped in moderate quantities this week, but there will be increased activity at the packing house next week, when cherry picking will be in full swing at Mr. Lyons' fine cherry orchard and various others.

The engagement is announced of Miss Daisy Margaret Weller and Mr. Thomas Scaife, who carries on a boat manufacturing business in Naramata. Both are well known and liked in Naramata, and hearty congratulations are being extended to them by their many friends.

Mr. A. J. McKenzie has closed a deal for a twenty one acre fruit lot in the Belgo orchards back of Kelowna, about two miles from Rutland, planted to trees, just enough being left for a good building site. He will take off the crop and look after the place but does not expect to build or move over this year.

Mr. Mangin went down the lake on Saturday evening, returning Monday morning.

Miss Moran, from the Summerland Hospital, spent some time last week visiting at Mr. J. M. Robinson's.

As is customary, the proposed school bylaw was submitted to the municipal inspector at Victoria for his approval, following the decision of the council to re-submit it to the ratepayers as the result of the largely signed petition. In returning the bylaw, the inspector says that it appears to be in order, not having noted anything wrong with the presenting of the petition. This letter crossed another from Municipal Clerk Nixon pointing out that the bylaw was out of order because of the irregularity of the petition and informing him of the postponement of the balloting.

One of the best things out is a defunct tooth.

Mr. J. W. Jones, M.P.P., spent Wednesday in Naramata in the interests of the district.

The Ladies Aid spent a very pleasant afternoon at the home of Mrs. Lyons on Wednesday, business and sewing being followed by refreshments and a social hour. Mrs. Livingstone was the guest of the Society on this occasion, Mr. Livingstone, the new pastor also coming in at the latter part of the afternoon for tea. Arrangements were made for the holding of a church social at an early date on the church grounds. Several new members were received.

Dr. Wm. A. McConkey who has been practising his profession for the last year on the prairies, spent last week in Naramata visiting Mrs. McConkey and his children. He left on Tuesday morning's boat for points further up the lake.

Mr. Hugh Fraser and Mr. Hugh Russell, of Pentiction, were guests at the Syndica Hotel on Friday, June 17. They came up to attend the dance given at Paradise Ranch, returning later to Pentiction.

The Syndica Hotel has recently acquired a new Chinese cook in preparation for the summer trade which is expected to be fairly heavy.

Miss Bryden, who is in training for the nursing profession at Vancouver General Hospital, is visiting Mr. and Mrs. Fred Young. She will return on Friday to the coast.

Miss Moran, from the Summerland Hospital, spent some time last week visiting at Mr. J. M. Robinson's.

As is customary, the proposed school bylaw was submitted to the municipal inspector at Victoria for his approval, following the decision of the council to re-submit it to the ratepayers as the result of the largely signed petition. In returning the bylaw, the inspector says that it appears to be in order, not having noted anything wrong with the presenting of the petition. This letter crossed another from Municipal Clerk Nixon pointing out that the bylaw was out of order because of the irregularity of the petition and informing him of the postponement of the balloting.

**CANADIAN HAPPENINGS**

**CHRONICLED IN BRIEF**

In giving evidence before the fuel committee at Ottawa, Mr. J. G. Scott, chairman of the British Columbia Skeena Coal Co.; stated that the coal field, situated on the upper Skeena, had a total area of about 1,200 square miles; that the quality of the coal is anthracite and semi-anthracite; the estimated quantity to exist on the 47 miles controlled by his company is very large, and that the building of 150 or 180 miles of railway would give this valuable deposit an outlet to the Prince Rupert, Victoria and Vancouver markets.

It is estimated that one thousand silos will be built in the three prairie provinces of Canada during this year. It is reported that one firm in the States, which has made a specialty of erecting silos, have secured orders for two hundred of these structures to be erected in Manitoba alone. Saskatchewan farmers will build several this season, while in the south west of Alberta, where fifty silos were erected last year, another fifty will be built this summer.

VANCOUVER.—Lumber business on the coast during the past couple of months has been very active, shipments being made to Egypt, South America, India, United Kingdom and other distant countries. Recently, the H. R. McMillan Export Co. secured an order for 3,500,000 feet of ties for delivery at Buchang, China, in June. They have also an additional order from the same buyers for 1,500,000 feet of lumber, which is to be shipped at the same time the other order goes forward.

HALIFAX.—The 1921 Nova Scotia apple crop will be between one and a half to two million barrels, according to estimates made by A. E. McMahon, general manager United Fruit Co. of Nova Scotia, Ltd., and George E. Sanders, Dominion entomologist. Spraying is being carried on according to Mr. Sanders' recommendations, and the only influence that can prevent a full crop is a heavy black frost during blossom week.

ST. JOHN.—Grain shipments by the Canadian Pacific Railway through the port of St. John during the season just closed aggregated 9,414,000 bushels. Of this amount, 6,468,000 bushels were wheat, 498,000 bushels oats and the balance other grains. An interesting comparison is shown by statistics compiled in 1897-98. In that season, shipments totaled 3,583,321 bushels, of which quantity wheat absorbed 947,174 bushels, oats 1,565,481 bushels and the balance other grains.

Announcement is made by P. H. Fraser, managing director of the Canadian Iron, Steel Smelters, Ltd., that British capital has been secured to build and operate a large electric smelter in Vancouver. An initial 50 ton plant will be operating by August. The company has been given five thousand tons of ore by the provincial government as an inducement to commence operations. This ore will smelt about four thousand tons of pig iron.

Speaking at Prince George, Mr. B. Westcott of the immigration branch of the G. T. P., predicted greater settlement in central British Columbia this year than ever before.

The changing of the municipal irrigation system on Trout Creek Point in order to link it up with that of the Trout Creek Water Users' Community cost \$527.47, including 10 per cent. charge for overhead expenses. Under the agreement between the municipality and the water community, the former undertook to do the work at a cost not to exceed the estimate of \$522. The actual cost for labor and material was \$479.52, to which the municipal clerk added 10 per cent. for overhead.

What is believed to be the highest rental ever paid for a ranch property in the Creston Valley has been agreed upon for this year's hire of the Tornico ranch, which has been taken over for one year at a rental of \$1,000 for ten acres. This does not include the use of the house. The place is planted entirely to trees and small fruits.

VANCOUVER.—United States buyers are now in Vancouver bespeaking British Columbia logan berries for supplying their logan berry wine, flavoring and cider factories. Prohibition in the United States has created a great demand for fruit juices, and the juice of the logan berry has taken a popular place.

British Columbia business is solid; at heart British Columbia men and women are sound. We must show the world, each other, ourselves, what the B. C. spirit means. If we boost for B. C., work for B. C., and give our support to everything that is identified with B. C., we can make up our minds to go ahead.

VICTORIA.—British Columbia will use airplanes to fight forest fires this year. Twenty thousand dollars have been set aside by the government for this purpose. The planes will be used for locating the exact position of a fire and then rushing fire fighters and equipment to the scene.

LETHBRIDGE.—Wet gas, ascending like smoke from the drill hole, has been struck by the Imperial Oil Company's No. 2 well, south of Pincher Creek, and in the vicinity of Waterton Lake. Oil men are enthusiastic over the showings made in this district.

There is a possibility of an Angora woolen industry being started on Vancouver Island, utilizing the wool from the Angora rabbit, which, it is claimed, can be spun into the finest and softest wool. The rabbits from which the test was made were bred at Prospect Lake, a short distance from Victoria.

Business in British Columbia is getting into its stride again. It is setting a steady pace that it can keep. Let us swing along with it by getting behind the industries in our midst. If the manufacturer and farmer are prosperous, so will everybody else share in the prosperity.

PRINCE RUPERT.—During the first two weeks of May approximately one million eight hundred thousand pounds of halibut were caught on the fishing banks of this coast. Of this catch all but two hundred thousand pounds entered this port.

**INTERCROPPING THE YOUNG ORCHARDS**

One of the difficulties of fruit growing, either as a main industry or as an incidental to general farming, is the length of time that must elapse before the orchard begins to yield returns. When, as in some sections this spring, a freeze destroys or greatly reduces the expected crop, the loss to many growers, including those who expected to harvest their first fruit in 1921, is likely to be serious. The loss under some conditions can be partly offset and other benefits can be gained by growing vegetable crops between the rows of young fruit trees, say specialists of the United States department of agriculture.

**Vegetables Between the Rows**  
Experienced orchardists frequently find it advantageous to grow crops between the tree rows until the trees reach bearing age. After bearing begins it is impracticable to "double crop" an orchard. As a rule, intercropping cannot be practised in a peach orchard after the third season from planting. Six to eight years is usually the limit for an apple orchard, the exact time depending on the variety, vigor and growth, and other factors. Further the trees will usually shade the ground too much for the growing of vegetable crops by the time the ages mentioned are reached.

In an "off year" with an orchard that was expected to come into bearing for the first time, many fruit growers will find it to their advantage to plant crops of corn, beans or peas, between the orchard rows. The growing of potatoes in an orchard is a doubtful practice, since the digging of them amounts to practically a late cultivation of the ground and under some conditions this might stimulate a late growth of the trees, which would be undesirable. In this way the farmer can utilize about half the space of his orchard land without injury to the trees or seriously hampering the temporary crop. Tomatoes and other truck crops may also be grown in the orchard. These are sometimes classed as "catch crops"—crops planted for a quick growth.

Where such crops are planted, it is well first to make a hasty survey of the operations of the other farmers in the vicinity and of the available market, since often where similar conditions prevail throughout an entire locality there is a tendency for many farmers to enter on a certain line of temporary agriculture, with the result that the supply far exceeds the local demand. A little foresight may prevent disappointment.

These rows between the trees are somewhat more difficult to cultivate than in the open field, and may require considerable hand work, but in many cases the crops which are planted yield a comfortable profit. The intercropping of young orchards has an additional purpose besides the mere direct financial gain. It furnishes an incentive to keep the orchard cultivated, and as a rule this is highly desirable from the standpoint of the trees.

It furnishes an incentive to keep the orchard cultivated, and as a rule this is highly desirable from the standpoint of the trees.

**Sowed Crops**  
Profit may sometimes be found in a sowed crop. Buckwheat is often a good thing when sowed among young trees. The buckwheat may not pay to harvest for grain, but if mowed before fully mature it makes a good mulch, or if permitted to mature, enough grain may be obtained to materially cut down the expenditure for poultry feed. Buckwheat can be sowed in June or even in July and still make a satisfactory growth. Field peas, cowpeas and various other crops that make good forage can be used as occasion suggests, and the soil be improved thereby.

The fruit grower should realize that it is the abuse rather than the use of double cropping systems that may result adversely to the trees. And again, an interplanted crop which is to be harvested and not used entirely for soil improvement, should be looked upon as a means of reducing the expense of maintaining the trees rather than a crop which represents a definite cash income.

**Not His Name**  
In Dublin a zealous policeman caught a cab driver in the act of driving recklessly. The officer stopped him and said:

"What's your name?"  
"Ye'd better try and find out," said the driver peevishly.

"Sure, and I will," said the policeman, as he went round to the side of the cab where the name ought to have been painted; but the letters had been rubbed off.

"Aha!" cried the officer. "Now ye'll git yersel' into worse disgrace than ever. Yer name seems to be obliterated."

"Ye're wrong!" shouted the driver triumphantly. "Tis O'Sullivan!"

"Getting busy" often takes a hard fall out of a fit of blues.

Sometimes you see a woman who looks pretty when she is angry.

**Instruction for the Young**

Yells from the nursery brought the mother, who found the baby gleefully pulling Billy's curls.

"Never mind, darling," she comforted, "Baby doesn't know how it hurts."

Half an hour later wild shrieks from the baby made her run again to the nursery.

"Why, Billy," she cried, "what is the matter with baby?"

"Nothing, mother," said Billy, calmly, "only now she knows."—Tit-Bits.

**Surely Not**  
Inspector: "Do you teach observation?"

Teacher: "Yes."

Inspector: "Then I will test the class. Now children, shut your eyes and sit still." Following this the inspector made a slow whistling sort of noise, and followed with, "Now, children, what did I do?"

For some time there was no answer, but ultimately one little boy piped out: "Kissed teacher."

A burnt speculator dreads the hot air.

**LAND REGISTRY ACT**

TO ALL WHOM IT MAY CONCERN  
Re Lot 2, Block 7, Map 44, Peachland.

WHEREAS proof of loss of certificate of title No. 14851A, issued to George Needham and covering the above land has been filed in this office,

Notice is hereby given that at the expiration of one month from the first publication hereof, I shall issue a duplicate of the said Certificate of Title unless in the meantime valid objection thereto be made to me in writing.

DATED at the Land Registry Office, Kamsloops, B. C., the 8th June A. D., 1921.

H. V. CRAIG,  
Registrar.  
46-50

**Corporation of the District of Summerland.**

**POLL TAX**

A Poll Tax of \$5.00 for the current year from male persons in the Municipality above the age of 18 years and who have been resident in the Province over one month and who are not liable to pay municipal taxes on land is due and payable either to the undersigned or to the Municipal Constable.

C. E. PINEO,  
Collector.  
Municipal Office,  
West Summerland,  
21st June, 1921.

**We Are Selling Cheaper Mileage**

You may get extraordinary mileage out of any one tire—but that's not the way to figure mileage.

Get the average of mileage given by a pair of tires or a set—and you will get nearer to the actual cost of mileage to be charged to the upkeep of your car.

It's just because we've taken the trouble to figure values that way, that we recommend Ames Holden "Auto-Shoes."

We know they are giving real mileage over the worst roads in the country and their "average" performance leaves no doubt in our minds that Ames Holden "Auto-Shoes" will give you the cheapest mileage you can buy. And they are guaranteed without time or mileage limits. Drop in and let us show you and tell you about

**AMES HOLDEN "AUTO-SHOES"**  
Cord and Fabric Tires in all Standard Sizes

**F. L. BLACK**  
Shaughnessy Avenue  
Summerland

Quality maintains economy. You may pay less "per gallon" for other lubricating oils, but you get more lubrication "per dollar" when you buy Imperial Polarine Motor Oils.

**IMPERIAL Polarine MOTOR OILS**

**CUTS OPERATING COSTS**

THE economy of using Imperial Polarine Motor Oils extends over practically every item of motor operation.

The lubrication afforded at every friction point and the gas-tight piston-to-cylinder seal means a big saving in fuel bills and a noticeable increase of power.

Through perfect protection of all motor parts, undue repair bills are avoided and depreciation is greatly reduced. By using Imperial Polarine Motor Oils you can save dollars this year on maintenance alone. Besides, you realize more profit and greater usefulness from your car.

Always use the grade of Imperial Polarine recommended on our Charts for your type of motor. See Charts at your dealer's or write to 56 Church Street, Toronto, for a copy of our interesting booklet, "Automotive Lubrication," which contains the complete Chart of Recommendations.

**IMPERIAL OIL LIMITED**  
BRANCHES IN ALL CITIES

**WE GIVE IMPERIAL Polarine CRANK-CASE SERVICE**

For a Clean, Efficient Motor

Dealers displaying this sign will thoroughly clean the old oil and the grit and the dirt out of your crank-case; will flush your motor crank-case with Imperial Flushing Oil and refill it with fresh lubricating oil. Your crank-case should be cleaned every 1,000 miles or less. It means more economy and more satisfaction to employ Imperial Polarine Crank-Case Cleaning Service.

**LETTERS OF CREDIT**

PRINTED ENVELOPES cost little more than plain envelopes, and they give a much better impression to your customers and correspondents. Ask The Review Job Department for samples and prices.

Curtain lectures should be delivered behind the scenes.

**HUMIDITY FAVORS SPREAD OF PESTS**

(Continued from Page 1)  
be traced to malnutrition from some source or another.  
There has been a heavy infestation of the blossom form of fire blight this season in many districts. Although a lot of this will cause no further trouble, very careful watch should be given to the trees by all growers where fire blight is showing, and on any indication of the disease staying active and travelling in the wood, cutting should be immediately commenced, making sure that where the work is done it is done carefully and the disinfectants necessary for the tools and wood are used to save further spread from the tools.  
Kelowna.

The weather during the past week has been changeable. Slight showers have fallen and the nights have been cold.

The outbreak of fire blight, as reported last week, has become more general. Although in many cases it is only a twig infection, growers would be well advised to keep a close watch in case of this becoming more active. The only method to adopt then is to cut well back on the affected branches.

Droth spot on McIntosh has again showed in some orchards. It is interesting to note that Delicious apples are also affected. In some cases whole trees are affected while in others it is only showing up on a few apples. At the time of writing we are planning out a campaign to ascertain the causes of droth spot and also the remedy.

A heavy June drop is taking place on almost all varieties. Stone fruits are, however, showing up well. Tomatoes are looking well at the present stage but there has been considerable damage to the onion crop by

the onion maggot.  
Pentiction and Keremeos.  
During the past week the weather has been somewhat cool and showery. Apples are dropping rather more heavily than was expected, but the trees are carrying in almost every case a good load. At Keremeos Governor Wood and Early Richmond cherries are ripe and some Black Tartarians are being sold on the local market. Tomatoes set out in this district are going ahead fast.  
The fire blight infestation from present appearances does not seem to be as serious as at first thought, but every precaution will have to be taken to keep the outbreak under control.

Summerland.  
The many local showers of the past week have greatly benefited the vegetable crops, although the nights are still keeping cool.

Summerland had a hail shower which caused some slight damage to the apples.

Fire blight is showing up slightly in some orchards. Trout Creek section suffered to some extent with blossom blight.

Shipments of cherries, (Governor Wood) commenced on Monday, June 13, being twelve days earlier than last year.

The June drop in apples has been fairly heavy in all sections.

Thinning Demonstrations.  
The thinning demonstrations conducted by Mr. W. T. Hunter in the South Okanagan the past week, have proved of great interest to the growers in the districts where they have been held, and judging by the attendance, have been much appreciated. At Pentiction there was an attendance of 90 and at Summerland an attendance of 100.

Of the growers' excursion to Wenatchee Mr. Hunter says in part: The orchards of Wenatchee are reported as being in very high class condition at this time. The trees

by their vigorous foliage and growth and by the splendid crop which they are setting, give every promise of upholding that high standard which they have established. This existing condition very conclusively proves to us the soundness of their soil cultural methods. The Wenatchee growers have all realized that to obtain maximum returns on their investment and operating expenses, it is imperative that very great attention must be paid at all times to their soil.

Thinning is now in full swing and all the orchardists are, as usual, devoting very considerable time to this important operation which must not be neglected. The British Columbia party were much impressed with the attitude of the Wenatchee growers towards this question.

Growers of the Okanagan Valley should keep in mind the fact that a second party will be conducted to the Wenatchee district by the horticultural branch early in July. All who have visited Wenatchee report the trip well worth taking, as the information obtained at first hand has been of inestimable value to them.

**SUMMERLAND WEATHER REPORT**

Below is a report furnished by the Dominion Experimental Station here for the week ending Tuesday:

**A Banking Service at your Farm Gate**

Banking by mail is a great convenience to the farmer.

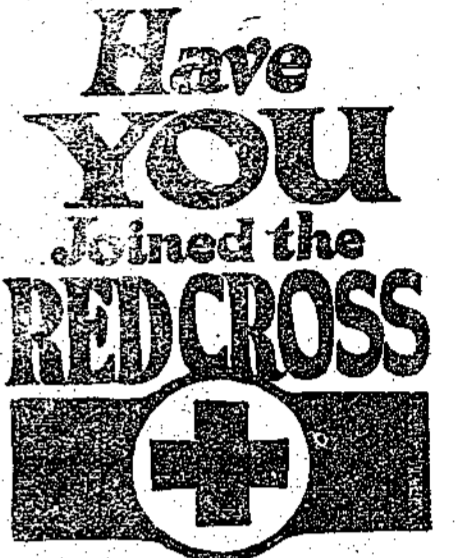

He has no time in his busy season to be driving to town to deposit cheques or pay his bills.

But, having a bank account with us, he can do all this by mail. Consult the Manager.

**THE DOMINION BANK**

Summerland and West Summerland Branches,

O. F. ZIMMERMAN, Manager.

Consumers of electric power in the municipality of Pentiction are put to serious inconvenience through the last mishap to the semi Diesel engine installed in the power plant there last year. It is stated that \$8,500 will be required to repair the damage done in the last smash up. The municipality is looking around with the object of devising some method of carrying on until the Kootenay power is available. Using the steam engine in the saw mill to help carry the night load has been suggested.

Give a little more than you promise, but don't promise too much.

Love is blind until it bumps into an eye opener.

**A NEW GARAGE**

Messrs. C. V. Nesbitt and G. M. Forster, automobile mechanics of Vancouver, hereby inform the public of Summerland and vicinity that they have taken a lease of the R. H. English building on the west side of Shaughnessy Ave., which they are having remodelled, and will open as a garage on or about July 1.

Tires, Accessories, Gasoline, Oils, etc., will be stocked

F. M. Black, treasurer, and F. J. Collyer, director, who have been sent to England and the continent by United Grain Growers to find an increased market for farmers' cooperative shipments of cattle. Seeking new markets for western cattle now practically excluded from the United States through tariff legislation, Mr. F. J. Collyer, a director, and Mr. F. M. Black, treasurer of United Grain Growers Limited, hope to make arrangements so farmers' cooperative shipments of cattle can be carried through to Old Country markets. They are also to search out an outlet for western beef on the continent of Europe, wherever conditions are settled enough to make trade likely.

In the few weeks which have elapsed since the United States imposed a tariff of thirty per cent. on all cattle entering that country, prices on Canadian live stock markets have fallen severely. This is a time of year when the run of cattle is light and the result on prices of the heavy run of cattle that begins in the fall is bound to be serious. Consequently the farmers' organizations are making every effort to find an outlet for export cattle before the fall commences.
