## To Open Campaign Here Monday Afternoon For Continuing Associated

### Directors of Big Co-operative Determined to Stand by Decision with Respect to Tonnage—Financers and Business Men from Coast and East to Assist in the Campaign for Membership.

Associated Growers of B. C., Limited, are not going to let their control of the output slip away from them without making a determined effort to retain it. Announcement is made in this paper by the Summerland co-operative of a big mass meeting to be held here at which representative men from the coast, prairies and the Associated will be present.

The decision to make a thorough canvass of the territory was reached at the meeting of the directors of the Associated held at Vernon last week.

At this same meeting, as already announced by The Review, Basil Steuart, the director from Summerland on the Associated board and acting general manager during a good part of last season, was unanimously

selected for the position of general manager. The position on the advisory committee rendered vacant through this appointment has been filled by the election of E. J. Chambers, of Penticton. The advisory committee now comprises the president, A. T. Howe, and Messrs. Scott, Salmon, Arm, Barrat, Kelowna, Chambers, Penticton, and Campbell, Nelson.

Pools are being closed as rapidly as possible and the Associated hope to publish a statement of results about the 15th of this month.

Nine carloads of fruit and three of vegetables were sold during the week ending Saturday last.

Below is a general letter issued to the press this week:

The serious situation confronting the Associated Growers today by reason of tonnage changing hands, which was made the subject of an open letter to growers, was very carefully considered at the session of the full board of directors which closed on Saturday last.

The members of the board were absolutely unanimous that the tonnage necessary to effect control must be obtained, and the resolution, given herewith in full was passed:

"That we affirm that control of the distribution of at least 80 per cent. of the tree fruits produced in the area in which the Associated Growers operate is necessary to the successful operation of the Associated Growers of B. C., Ltd., and without this tonnage the association should not operate."

A committee consisting of Messrs. Barrat, Campbell and Chambers has gone to Vancouver to confer with the Vancouver board of trade in the arrangement of a series of growers meetings to be held at various points in the Valley during the next fortnight.

At these meetings the future confronting the growers, both with and without co-operation will be clearly placed before them and will be followed by a determined canvass in each district for membership which will ensure the necessary tonnage being brought under control. As soon as the itinerary is arranged publicity will be given thereto.

Too much emphasis cannot be placed upon the fact that the board is absolutely determined upon no middle course; that it is to be absolute control of the tonnage to the extent stated or recommendations will be made for operations to cease.

It is hoped that there will be a full muster of growers at all points where meetings are held and that more especially will those who profess to be skeptical as to the determination of the directors to see this through to the bitter end, be there to learn for themselves first hand what a united front the Associated Growers of B. C., Ltd., are presenting against gradual disintegration. The result is in the hands of the growers. Success or failure rests entirely with them and whatever happens they will be entirely responsible.

ASSOCIATED GROWERS OF B. C., LIMITED.

Considerable American money is being invested in British Columbia industries just now, chiefly in lumbering.

## QUICK RESPONSE TO FIRE ALARM

Sudden changing in the direction of the wind, resulting in the scattering of burning weeds, caused quite a scare on Wednesday morning at the home of W. H. Hayes. Mr. Hayes had been burning some tumble weed which had blown on to his lot and they had just started to burn when the wind came up strongly from the south, sending the weeds among some pine needles and other combustible material. For a time outbuildings were in danger and an alarm was sent in by telephone. In a surprisingly short time a large number of citizens had gathered. The danger was quickly averted.

## MAKING PROGRESS ON SCHOOL GROUNDS

Ploughing and preparing the grounds for planting and sowing is proceeding at Summerland's educational centre and a marked change will be effected within the next few weeks.

The high school classes have been allotted prescribed duties, one class taking charge of shrubs and trees, another the lawns and a third the flowers.

## DECLARE LOSS WAS OVER ESTIMATED

Defection of tonnage at Kelowna is not as great as was at first reported, according to an announcement made by the Kelowna Growers' Exchange. The total number of carloads of fruit that have fallen away from the Associated is 120, half of this being represented by the K. L. O. estate, according to a published statement.

The Hedley Gold Mining Company is expected to re-open its mines at Hedley this month and employ about forty men. Since 1904 this company's properties have produced over eight million dollars in gold. The concentrates have to be treated at the Tacoma refinery, owing to their containing arsenic.

Kelowna creamery manufactured 15 per cent. more butter in 1923 than in the previous year.

## CLOSE GAMES AT CHECKERS

### Well Matched Sides in Local Tournament—Challenges Issued.

Eighty-seven to seventy-five was the resulting score of a very interesting checker tournament held at Premier Hotel Monday night. T. B. Young and C. E. McCutcheon having been unanimously chosen as captains they in turn selected their teams, nine to a side. This meant that nine games were being played continuously throughout the evening. Counting two points for each win and one for a draw the result was as follows, W standing for win; L for loss; D, draw, and P for points:

Young's Team	W.	L.	D.	P.
T. Ramsay	6	2	1	13
W. Beattie	6	2	1	13
T. B. Young	5	2	2	12
G. Harding	4	1	4	12
D. Thompson	4	3	2	10
W. Snow	3	2	4	10
S. Rind	4	5	0	8
B. Steuart	4	5	0	8
Dick Miller	0	8	1	1
Total	36	30	15	87

A Summerland checker team will play a Penticton team in the latter town next week and a challenge has been sent to Penticton. It is hoped to arrange a tournament with Naramata.

## MUSICAL TREAT DRAWS LARGE AUDIENCE

### Choral Society Terminates Winter of Pleasant Work With Concert.

The large audience which attended the Summerland Choral Society Concert last Thursday evening in St. Andrews Union Church was treated to a musical programme of more than ordinary merit, and the conductor, Mr. G. W. Cope and all the members of the society are to be congratulated on the splendid success which has attended their long and faithful rehearsals.

While all the choruses were given with splendid precision and finish, special mention might be made of "The Bridal Chorus" from "Rose Maiden," "Moonlight," by Fanning, "Good Night Beloved," by Piusini, and Schumann's "Gipsy Life." The latter with the tambourine and tinkling triangle pleased the audience so much they demanded that it be repeated.

Mr. Cope had promised a surprise and this was revealed in part by the excellent manner in which the three young lady soloists acquitted themselves. Miss Alma Lott in the contralto song, "Temple Bells," sang with fine emphasis and in a manner that was pleasing and effective. Miss K. Nield, whose lyric soprano voice was well adapted to the intricate runs and trills of "Carissima" by Penn, won hearty applause, while Miss C. Graham in the well known Gounod's "Ave Marie" gave a very fine rendering of this difficult selection. A delightful introduction and accompaniment to this song was played by Mrs. Hookham, cello solo and obligato, Mrs. Sutherland piano, and Mr. Thornber, organ. "O Hush Thee My Baby" - unaccompanied - was sung by Mrs. Armitage, Mrs. M. Tait, and Mrs. J. W. Harris, whose voices blended very nicely.

Mr. F. Mossop, a comparatively new comer, has a very pleasing baritone voice. He and R. Purves, who is an old timer, sang a very pretty duet to substitute for the male quartette.

The old favorites, T. Beavis, J. Clements, and Ben Newton were at their best and the audience showed their appreciation with no uncertain sound.

Mrs. Sutherland the accompanist gave splendid support by her intelligent control of the tempo and giving the proper emphasis to the phrasing etc.

It is to be hoped that the Summerland Choral Society will remain a permanent institution. —Cont.

Nearly one hundred dollars was realized by the choral society in admissions. After paying for music and all expenses in connection with the concert the society expects to be able to make a substantial donation to the hospital.

Division I. S. A. MacDonald  
Entrance class, those making over 75 per cent., in order of merit:—Cyril Mossop, Mary Steinbeck, Ivy McKay, Lorna Sutherland, Winnie Cunliffe, Jack Dunsdon, Edna Traylor, Mary Simpson and Jim Purves, Mabell Lockwood, Ethel Steeves, Annie Williams, Violet Atkins, Jack Bowering.

## SAYS INFORMATION WAS PREMATURE

That the information given The Review last week with respect to the case Dominion Bank vs. Hutton was premature, is the statement made to The Review this week. Settlement had not actually been made but it is probable that defence will be withdrawn.

### Alberta Butter Production

Alberta's butter production last year was 18,500,000 pounds, or 2,000,000 pounds more than in 1922, according to reports presented at the annual meeting of the Alberta Dairywomen's Association.

## IS LAST CHANCE FOR VOTERS' LIST

Those not yet on the provincial voters' list are reminded that April 5th is the last day on which to register before the May revision. Application may be made to the police magistrate, or to W. C. Kolley or K. M. Elliott.

## OPERATIC SOCIETY FULL REHEARSALS

The practices for Pinafore by the Summerland Operatic Society is progressing most favorably for their performance to be held in the Empire Hall on April 23rd and 29th. Watch the Review for advertisements containing full particulars.

Mr. G. W. Cope has charge of the vocal parts, Mr. S. B. Snider is in charge of the orchestra, and Mr. G. C. Benmore, president of the society, is director of the opera, and the stage work is advancing rapidly under his capable instructions and direction.

Next week it is expected to commence full rehearsals with the principals, chorus and orchestra meeting together. Cont.

## PUTTING HOUSE IN ORDER FOR VISITORS

Some very effective work was accomplished last Thursday in another general clean-up along Shaughnessy Avenue and West Summerland. The municipality is very greatly improving Shaughnessy Avenue by widening it out at the point opposite the drug store where the lake made an indentation much within the street line.

## NARAMATA WOMEN'S INSTITUTE MEETING

The feature of the meeting held April 1st was an address on the coming provincial convention by Mrs. MacGregor.

With characteristic directness, force and sincerity our district member of the advisory board made a most able presentation of the importance and far-reaching possibilities of this first provincial convention.

The program for the day was in charge of the publicity committee and they conducted a Canadian Magazine guessing contest and an idea competition. Mrs. Mitchell was the only member to submit the full list of magazines, and Mrs. Horswill secured the prize (a potted plant) for the best ideas. Mrs. W. J. Robinson and Mrs. MacGregor of Penticton were the judges. Mrs. Horswill was chosen as delegate to the convention. The publicity committee served tea at the end of the program.

## PUBLIC SCHOOL CLASS LEADERS

### Monthly Report from the Several Divisions of the Central School.

Division II. H. W. Daniel.  
Grade 7, proficiency.—Gordon Nixon, Euldo Koch, Mildred Wilson, Mary Hack, Ethel Nicholson and Ethel Deniko, Eileen Tomlin.  
Perfect attendance.—Dorothy Chew, Norah Clements, Orval Cowan, Ethel Deniko, Willie Gartroll, Mary Hack, Euldo Koch, Ruth McLachlan, Edith Monroe, Ethel Nicholson, Gordon Nixon, Donald Orr, Frank Atherton, Alex Smith, Eric Tait, Eileen Tomlin, Fred Walton, John Daniel, Joan Stevon, Bobbie MacDonald.

Division III. Miss M. Harwood.  
Grade 8, proficiency.—Loretta Ingalls, Maurice Rhlyni, Herbert Simpson, Isabel Dickinson.  
Grade 7, proficiency.—Gone Hottel, Laura Smith, Jenn Munn, Jessie Tullott.  
Perfect attendance.—Violet Beck, Dorothy Barnard, Mary Blansdale, Margaret Caldwell, Alice Doherty, Fred Dunsdon, Arnold Koch, Dorothy Lott, Elizabeth Munn, Joan Munn, Donis Nield, Percy Rand, Robert Scourrah, Edward Smith, Laura Smith, Jessie Tullott, Loretta Ingalls, Arthur Joy, Herbert Simpson.

Division IV. Miss Merle Smith.  
Grade 6, proficiency.—Joan Bonnost, Isabel Zimmerman, John Bonnost. (Continued on Page 8)

## Washington Pool Prices As Paid To Shippers In South Part Of Valley

### Detailed Figures Giving Returns to Omak, Wn., Shipping House Are of Interest Here—Good Prices for Over- size Fruit — Little for C Grade — Winter Bananas Bring Highest Returns.

Of special interest to fruit growers of the Okanagan is an official announcement made by the Wenatchee-Okanagan Co-operative Federation, giving the net prices, f.o.b. Omak, Washington, of the entire tonnage of the Omak local, Omak Fruit Growers. As was predicted last fall, producers will get practically nothing for their C grade. A very noticeable feature of the statement is the relatively higher prices obtained for very large apples and also the good prices realized for Winter Bananas, on the whole higher even than for Delicious.

Under each of the two grades, Extra Fancy and Fancy, apples are divided into three sizes and the C grade into two sizes. Here are the prices—

## LAST CAR APPLES HAS BEEN SHIPPED

Summerland Co-operative Growers' Association shipped out its last carload of apples on Wednesday. At other points in the Valley the apples have been either entirely cleaned up or but small quantities remain and within a few days it will be possible for the Associated to close the pools and distribute the proceeds.

## LIBRARY TO OPEN SATURDAY NIGHT

Summerland public library will be open for the loaning of books for the first time on Saturday next, between 7 and 9 p. m. Miss Mary Vicary, librarian, will be in charge.

Henceforth the library will be open each Saturday evening between these hours and also on Wednesday afternoon from 3 to 5.

## DEPARTING MEMBER GIVEN FAREWELL

Members of St. Stephen's W. A., the Ladies' Hospital Auxiliary and the Women's Institute held an afternoon tea in the Parish Hall on Tuesday in honor of Mrs. O. F. Zimmerman, who, with her children, is leaving shortly to join Mr. Zimmerman in California. During the afternoon, Mrs. Zimmerman was presented with a beautiful bouquet of sweet peas by Mrs. Solly, who expressed the regrets of all present at Mrs. Zimmerman's departure from the community.

Next Tuesday, April 8th, Mrs. Cartwright is entertaining from 3 to 6 in honor of Mrs. Zimmerman, her daughter.

## PROTECTIVE FISH AND GAME ASSOCIATION

### Game Warden Advises Form- ing Organization for this District.

R. M. Robertson, district game warden with headquarters at Penticton, while in town on Monday made the suggestion that it would be advisable in the interests of the community to establish a fish and game protective association here. Similar organizations have been or are being organized at other centres in the Valley. With some such body to speak for the community, game regulations can be effected or amended to suit local conditions. W. Johnston and others are interesting themselves in this movement and an organization meeting will likely be called at an early date.

Forty-nine different countries imported Canadian flour last year.

Winter Bananas, e.f., sizes 36-88, \$2.29; 96-125, \$1.89; 138 and smaller, \$1.49. Fancy in the same sizes brought \$1.89, \$1.53 and \$1.17 respectively. C grade, 138 to 163, \$1.43; 175 and smaller, \$1.02.

Delicious, divided into the same sizes brought, for extra fancy, \$2.16, \$1.91 and \$1.66; fancy, \$1.66, \$1.41 and \$1.15; C grade, \$1.15 and 90 cents.

Rome Beauty, likewise divided as to sizes, brought for extra fancy, \$1.24, 99 cents and 74 cents; fancy, 99 cents, 74 cents and 50 cents; C grade, larger sizes only, 59 1/2 cents.

Other varieties were divided differently as to sizes and Jonathans were split into two pools, one closing October 30th and the other November 10th. The first pool brought higher prices throughout, but apparently the second pool carried the bulk of the Jonathan crop and the average for the two was, e.f., 36 to 125, \$1.25; 138 to 163, \$1.01; 175 and smaller, 77 cents. Fancy of like sizes as above, \$1.00, 76 cents, 53 cents; C grade, 63 cents and 40 cents.

All the other varieties were grouped as were the Jonathans. Spitz prices were: e.f., \$1.65, \$1.40, \$1.15; fancy, \$1.15, 90 cents and 65 cents; C grade, 85 cents, 60 cents.

Stayman: extra fancy, 86 cents, 64 cents; fancy, 64 cents, 43 cents; C grade, 43 cents. None of the smaller sizes in any grade of this variety are listed.

Newtowns: extra fancy, \$1.15, 95 cents, 75 cents; fancy, 90 cents, 70 cents, 50 cents; C grade, 60 cents, 40 cents.

Arkansas Black: extra fancy, 99 cents, 82 cents, 66 cents; fancy, 82 cents, 66 cents, 50 cents; C grade, 58 cents, 41 cents.

Winosap: extra fancy, \$1.54, \$1.29, \$1.04; fancy, \$1.10, 90 cents, 65 cents; C grade, 90 cents, 62 cents.

These are the prices that the local received, f.o.b. cars at packing houses. (Continued on Page 8)

## FINDS GROWERS ARE OPTIMISTIC

M. G. Wilson returned Tuesday evening from a motor trip south as far as Wenatchee.

Speaking of his visit across the line, Mr. Wilson remarked on the spirit of the people there, although fruit prices have been very disappointing and he does not see how the people to the south of the line have any advantage over those of this part of the Okanagan. Referring to the fact that some 8,000 acres of orchards are being planted to the east of the river between Oroville and Tonasket, Mr. Wilson said it was apparent that the fruit growers there were not all pessimistic.

Mr. Wilson left Wednesday afternoon for Vernon.

While on the subject of conditions across the line, mention might be made of the very optimistic tone of the local papers of the several towns in the Washington section of the valley. Oroville reports a large influx of new settlers and Omak apparently is equally buoyant with new people coming in and there is considerable activity in lumbering and other lines.

\* \* \* \*  
The Winter's Tale,  
Scene II, Act IV

The application of the Express Companies for an increased scale of charges seems to have led to the turning up of some evidence which was probably overlooked for by the applicants. Mr. M. E. Lloyd's admissions concerning the impossibility of allocating costs to the several zones of operations may be put in the class of things which one would rather have left unsaid, if that had been possible. If the costs cannot be so assigned, the claim that the west should pay a higher rate than the east is obviously one which has no ground of support, and must fall for lack of foundation. And if there is a loss on operations in general, it may be necessary to revise the agreement between the express companies and the railway systems which own them. It may be all very well for Peter to rob Paul and Paul himself, but when Peter and Paul are one and the same individual, operating under two names, and taking from the public whatever is found necessary to show a profit on both sides, then the public has a right to protest. The average citizen in British Columbia has been fairly docile under the imposition of higher tolls because he has put some faith in the somewhat well worn plea of higher running costs in a mountainous district. Now that he knows these alleged higher costs do not enter into the fixing of express rates at all, he will probably not be satisfied until he finds the discrimination against the west is done away with. As a matter of fact there should be a country-wide demand that the whole matter be looked into, and that the charge for hauling this traffic should be so adjusted that cheaper rates should be possible all over the Dominion.

THAT JOKER.

A certain handler of platitudes in some of the dailies lately declared that if a man would retreat into the depths of the forest THE POWER and remain silent for OF SILENCE. a year, he would not only be able to understand the language of birds and beasts, but would also be competent to talk to them in their own language. It is a precious thought, but like most of the same writer's proclamations, decidedly threadbare. Mark Twain found it for himself many years ago without having to keep silence for a year, or even a single hour. He tells us how he was insulted by a raven, or a crow,—I forget which—who sat on the branch of a tree and croaked disparaging remarks concerning his hat, his vest, and his personal appearance generally, and also called some other feathered friends to join in the conversation. Mark also had a friend named Jim Baker, who was perfectly familiar with bird language, and could tell weird stories about the profanity of his particular friend the blue jay. I don't remember, however, that either of these people became proficient in the art of reciprocal conversation with their bird acquaintances—that is an acquirement which, I believe, still open to competition.

If the gifted writer responsible for the silence theory has really tried the system he advocates, and has become an adept, it would be a great boon to be present at one of his nature interviews, and be given a verbatim report of what passes. I would particularly like him to interview the bee-hawk, and learn from his own lips,—I mean beak—whether he takes bees and drones indiscriminately, or whether he confines himself to the latter only, as some beekeepers claim. Then, esthetically speaking, it would be a real joy to hear this nature wizard's rendering of a query to a screech owl in its own proper language, and, coming more closely to animal life, a colloquy between the gentleman and an excited chipmunk would not be without its thrills. I fear, however, that I shall never have the coveted opportunities, and that the only animal which our widely read author could really hold his own with, would be the Equus Asinus, commonly known as the ass.

It is curious to note how the best laid schemes of an organization can be brought to futility by that ever present factor in human DEPLETING nature, which seems THE RANKS. to forbid permanent unanimity of purpose, even where individual interests imperatively demand it. Differences of opinion may always be looked for in the natural course of events, but these may be, and frequently are, moulded into a practicable policy. When that policy is disrupted to the general detriment by the breaking away of a serious proportion of its framers, it is no longer a matter of diverse views, but of irresolution, instability and even disloyalty. The British Columbia fruit growers, finding themselves confronted by a need for re-organizing called in a world expert, who outlined a policy which was enthusiastically received and acted upon, four-fifths of those interested signing a carefully drawn up agreement, appointing their own representatives, and launching on a new era. In spite of manifold obstacles the new organization brought them out from a year of black disaster to a season of comparative success, and all was ready for the beginning of a fresh season which promised better still. Then there came to light a series of defections in acreage which was supposedly held for a term of five years, and the total strength of the association is reduced below fighting level. In searching for the reason for these defections, it is not enough to accept the bare fact that a considerable acreage has changed hands—it is necessary to ask why the new buyers should feel it necessary to take advantage of the loophole opened by the change of ownership, and to seek other channels of marketing. We are not left in any doubt as to the fact that they do actually propose to sell through other channels—it is even stated that certain alleged sales are no more than wash sales, made with the express intention of escaping from the obligation to sell through the growers' association.

WASHINGTON FRUIT  
GROWERS ORGANIZING

Five orchardists in the State of Washington were appointed a committee by the president of the State Chamber of Commerce recently to advise in the solving of the apple marketing problems of the northwest. Though the committee has not yet made a report, the work of organizing the orchardists in the Yakima Valley is already in progress.

Representatives of several shipping concerns and of the Yakima Valley bank have been selected by the northwest fruit growers' commission as an advisory committee for the new growers' co-operative organizations to be formed in the Yakima Valley.

This, judging from reports, is only preliminary to a plan which is to include all the fruit districts of the northwest. A definite sales plan is now being drawn up and contracts are to be entered into between growers and local units. The plans for the latter have been already completed.

A paper read at a recent meeting of the American Fisheries Society, dealing with the depletion of the Fraser River salmon, disclosed the fact that, unless public sympathy is awakened, this fish will in time be as much a luxury as the Atlantic salmon. The annual catch on the Fraser River dwindled from 1,319,335 cases in 1901 to 559,707 cases in 1917, and the catches in recent years have been also poor, taking them as a whole. Hatcheries in the Interior have been closed for want of sufficient eggs to warrant operations. It is thought, however, that, if permitted to do so, the salmon will restock the Fraser naturally and in time again produce a catch worth approximately \$30,000,000 annually.

There seems to be but one inference to be drawn. It is apparently hoped that independent shippers, operating at slightly lower expense, and enjoying a market which is created, supported, and stabilized by the Association, will be able to pay a rather better price, and any question of loyalty is shelved. It is probable that the danger of the Association deciding to cease operating, and so leave the markets at the mercy of consignment conditions, had not been taken into account, and, for the sake of this valley and affiliated areas, it may be hoped that such a disaster may be avoided. Meantime, one or two points have arisen which should be considered for future handling.

Wash sales should be disallowed. Any transaction made for the purpose of evading existing agreements is directly opposed to the general interests of a community, and should not be accepted by those affected. Notice of genuine sales should be required at least one month before a given date, and no sales not so reported should be accepted. Finally, it seems to be vitally necessary that to protect both sides on the five year agreement, it should be construed as binding on a possible buyer. A long term agreement which can be evaded as easily as the one now in question is not, where time is the essence, worth the paper it is written on.

AUTOLYCUS.

Importation of Bees On  
Combs Is Now Prohibited

Importation of Bees on Combs, etc., into Canada is Prohibited

American foul brood has been the cause of heavy annual losses to Canadian beekeepers. Many of the provincial departments of agriculture have been employing a large staff of inspectors and spending large sums of money each year to control this disease alone.

Owing to the difficulty experienced in supplying the demand for bees from Canadian stock, thousands of combless packages of bees are imported into Canada each year from the United States. During the past two or three years many shipments of bees on combs have also been made, it being thought that a better start could be made with bees on combs than with combless packages.

Such shipments, however, have failed to justify this method of importing bees, because the results expected have not been attained and, what is more serious, many new outbreaks of American foul brood have been traced to such shipments.

Many of these new outbreaks were found in Manitoba, which resulted in the beekeepers of the province passing a resolution at their last convention to ask the Dominion Government to pass such legislation that would prohibit the importation of bees on combs, second hand supplies, etc., into Canada. Copies of this resolution were sent to other associations with the result that similar requests have been received from all over Canada. In accordance with these petitions, and in order to prevent further introduction of American foul brood and other diseases affecting the brood of bees, the following Ministerial Order was issued from Ottawa, on March 11th, 1924.

Under and by virtue of the authority conferred upon me by the provisions of the Order-in-Council of November 30th, 1909, containing regulations relating to Animals Quarantine, issued under authority of the Animal Contagious Diseases Act, Chap. 75, R. S. C. 1906, I, the undersigned, Joseph Hiram, Grisdale do hereby order that :-

"To prevent the further introduction of American foul brood and other diseases which affect the brood of bees, the importation into Canada of bees on combs or of used or second hand hives and bee supplies is prohibited.

The importation of bees in combless packages is also prohibited, unless such packages are accompanied by a declaration signed

by the shipper that the food supplied to the bees and carried in the package is free from disease.

This order shall come into effect on and after March 20th, 1924.

(Sgd. J. H. Grisdale)

Deputy Minister of Agriculture.

As combless packages can be shipped safely to any point in Canada and as they will give equally as good results as nuclei (bees on combs), no difficulty should be experienced in complying with the rules contained in the above order.

(Sgd.) C. B. Gooderham.

Dominion Apiarist.

by the shipper that the food supplied to the bees and carried in the package is free from disease.

This order shall come into effect on and after March 20th, 1924.

(Sgd. J. H. Grisdale)

Deputy Minister of Agriculture.

As combless packages can be shipped safely to any point in Canada and as they will give equally as good results as nuclei (bees on combs), no difficulty should be experienced in complying with the rules contained in the above order.

(Sgd.) C. B. Gooderham.

Dominion Apiarist.

ONION SEED AND SAND

According to the experiments which have been carried out by E. J. Boyles, Pasco rancher, the use of coarse sand in the drill with onion seed is an effective way of eliminating most of the work in thinning out young plants in the field.

Infertile seed has been used with the good seed before as a means of accomplishing the same result, but Boyle says the use of sand gives a cash saving of \$13 per acre in seeding costs.

FOR SALE

- Oats, weighing 42 lbs. to the bushel ..... \$1.80
- Crushed Oats (from same oats) ..... 1.90
- Baled Timothy, Alfalfa and Oat Hay, per ton ..... \$22
- Heavy Team Democrat ..... \$90
- 2 250-egg Wisconsin Incubators with Brooders, each \$50
- Farm and Garden Machinery of all kinds.
- Orchard Ladders.
- Four Second-hand Cars, cheap.

In these days of WORLD WIDE OVERPRODUCTION  
and of LIMITED MARKETS

Growers cannot afford to do otherwise than engage the services of an Organization most capable of marketing their Fruits and Vegetables to the best possible advantage. Let them get it into their heads once and for all that no one Organization ever has or ever will be able to control or create a monopoly in so many lines of perishable products produced in this Valley.

We submit that the grower in his own interests must select the Firm that

- Is Old Established;
- Has proved itself to have expert knowledge of Home and Export Markets;
- Has the best Export Trade;
- Has the widest connections to secure the maximum of Distribution;
- Who can offer something more than propaganda;
- Has the most economical system of operating its Packing Houses;
- Gives the best Service to the Growers;
- In whom the Financial Interests of the country have confidence and who are Financially Sound.

We offer you the Services of  
an Old Established Firm

Occidental Fruit Co., Ltd.

This charm you  
can keep

Youthful radiance of complexion! Millions of women have learned this simple way

The fresh softness, the radiance of youthful skin need not be lost as the years accumulate. Clever women guard this charm—keep it!—today.

This simple method does that for millions of women. Now you may use it—and keep that school-girl complexion.

You need only do this

Cleanse the skin regularly, authoritatively say, to keep your complexion lovely, radiant, youthful.

But beware of harsh cleansing methods. They injure skin.

Wash thoroughly with Palmolive Soap—each night before retiring. Rub the creamy, foamy lather well into the tiny pores. Rinse—and repeat the washing. Then rinse again.

Then—if skin is dry—apply a little cold cream. That is all. Skin so cared for is not injured by cosmetics, by wind and sun, or by dirt.

The simple, correct way

You cannot find a more effective beauty treatment. Because Palmolive Soap is blended of rare palm and olive oils—famous for mild but thorough cleansing qualities since the days of Cleopatra. And it is inexpensive.

Be sure you get Palmolive—which is never sold unwrapped. All dealers have it. For just one week try this simple method and watch results. You will be astonished, delighted!

Use Palmolive for the bath, too. Thousands do—it is so economical.

Volume and efficiency produce 25¢ quality for

10¢

THE PALMOLIVE COMPANY OF CANADA, LIMITED

Winnipeg Toronto Montreal

Palm and olive oils—nothing else—give nature's green color to Palmolive Soap.

MADE IN CANADA

# FISH AND GAME ASSOCIATION AT NARAMATA

### Church Services — Fire Damages Orchard—Other Local News.

The organization meeting of the Naramata Fish and Game Protective Association was held at the home of Mr. J. W. Graham on Friday evening, when the following officers were elected: president, F. J. de G. Languedoc; vice-president, Mr. J. J. Dunn; secretary-treasurer, Mr. F. U. J. P. Stallard; committee, Messrs. W. B. Green, A. Cook, R. Lawrence, and J. W. Graham. Several Pentiction residents attended, and an interesting talk on the improving of game conditions ensued.

The aim of the association is to foster the spirit of true sportsmanship, and it should secure the support of all who realize the importance of conserving the wild life in our district. The secretary will be pleased to hear from any persons interested in the objects of the organization.

### Church Services

Services were held in the church both afternoon and evening on Sunday, the evening service being the additional Anglican gathering on the fifth Sunday in the month. In the afternoon union service Rev. H. J. Armitage took the life of Jacob as a subject, and referred to the mistake of judging a man's life by its eddies, rather than by its prevailing current. The anthem was, "O Worship the Lord" (Thomas Smith). In the evening the Rev. H. A. Solly preached on the parable of the prodigal son, and dwelt on the actual result of sin on the character. The choir rendered Nevin's "This is my commandment," solo by Mr. Weaver. Mrs. Languedoc presided at the organ at both services.

The regular meeting of the Farmer's Institute was held in the Unity Club, Mr. H. P. Salting presiding. The president gave an interesting talk on evolution, and the business of the evening was interspersed with a song by Miss Seevers and a recital by Miss Glasser.

The Ladies' Aid held their fortnightly gathering at the home of Mrs. Kenyon on Wednesday, being conveyed to and from the meeting by the Paterson bus. Mrs. F. Young presided. Tea was served by the hostess assisted by Mrs. Stallard and Miss Lawrence.

Mr. R. Lyon of Pentiction has purchased the Boone ranch on the upper bench road, and is busy getting it into good condition for the season.

Mr. Walter Lyons of Pentiction was a visitor to Naramata on Friday.

Mrs. Clements of the Syndica Hotel had the misfortune to dislocate a thumb a few days ago through a fall from the stepladder which she was on while putting up some curtains.

Some damage was done on the Partridge ranch on Friday, when a fire started by Mr. Salting got beyond control. Fifteen trees were

burnt before the fire could be checked. A number of neighbors were very soon on the spot, and finally managed to stop further spread.

Frances Willard Day was observed by the W.C.T.U. at their meeting on Wednesday afternoon, papers on the life of Miss Willard being read by Mrs. Armitage and Miss Florence Lyons. Miss Sproule of Vancouver also gave an address.

At the public meeting in the evening, Miss Sproule spoke on present conditions in this province under government control. Miss Rhoda Cargill was presented with the medal won by her in a recent recital contest, and Mrs. Armitage contributed a song. The offering was in aid of W.C.T.U. missions.

Mrs. McGregor of Pentiction addressed the Women's Institute on Tuesday afternoon concerning the coming convention in Vancouver. Mrs. A. T. Horswill was appointed delegate of the Naramata Institute to the Vancouver meeting.

### THE LADIES' AID

The old church bell has long been cracked, its call was but a groan, it seemed to sound a funeral knell with every broken tone. "We need a bell," the brethren said, "But taxes must be paid; We have no money we can spare—Just ask the Ladies' Aid."

The shingles on the roof were old; The rain came down in rills, The brethren slowly shook their heads And spoke of monthly bills. The chairman of the Board arose, And said, "I am afraid That we will have to lay the case Before the Ladies' Aid."

The carpet had been patched and patched, 'Till quite beyond repair. And through the aisles and on the steps The boards showed hard and bare. "It is too bad," the brethren said, "An effort must be made To raise an interest on the part Of members of the Aid."

The Preacher's stipend was behind The poor man blushed to meet The grocer and the butcher as They passed him on the street; But nobly spake the brethren then "Pastor, you shall be paid, We'll call upon the treasurer Of our good Ladies' Aid."

"Ah!" said the men, "the way to Heaven Is long and hard and steep; With slopes of ease on either side, The path 'tis hard to keep. We cannot climb the heights alone, Our hearts are sore dismayed; We ne'er shall get to heaven at all Without the Ladies' Aid."

Wild aquatic birds began returning to Central British Columbia early in February. The lakes and other open waters in the Bulkley valley, in the Smithers district, were full of geese and ducks on their northern flight.

### HER FINISH.

"Your daughter recites very well," the pastor's wife remarked to Mrs. Muddly at the church social. "Yes," said Mrs. Muddly, "I am going to give her a course in electrocution," and she smilingly added, "Sorter finish her off, you know."

# FAVOR WIDER USE OF CRATES

### Upper Valley Men Discuss Various Phases of Marketing.

Business men and fruit growers of Kelowna and Vernon districts met in the latter city last week and discussed a number of matters affecting the packing and marketing of fruit. A similar meeting had been held at Kelowna the day before and the resolutions adopted there were laid before the Vernon meeting.

F. R. E. DeHart, Kelowna, has been carrying on a campaign for the marketing of a much larger proportion of the apple crop in crates and has devised a special crate which he is advocating. These crates would be filled right in the orchard.

Discussion resulted in the adoption of the following resolution.—That this meeting suggest to the Associated Growers that they seriously consider the question of packing all apples up to and including Wealthies as orchard pack in crates, and continued throughout the season if found satisfactory; and that a committee be appointed from this meeting to place this before the directors now in session.

**Selecting A General Manager** Many varied opinions were expressed as to the selection of a man for the position of general manager of the Associated, which led to the adoption of a resolution to the effect that special consideration should be given to the necessity of such a manager possessing the qualities of character, force, initiative, experience and organizing power.

Suggested methods were considered for the disposing of the crop quickly, effectively and profitably. Policies similar to that used in manufacturing industries, it was declared, should be possible in the matter of selling fruit. The employing of men in charge of grain elevators on the prairies to sell fruit on commission was advocated by some, and a resolution "that we earnestly ask the Associated Growers to consider seriously the organization of our markets on some well conceived agency basis with a view to controlling and reducing the spread between producer and consumer prices," was also carried.

**Stay With Association** Before adjourning, the following resolution was adopted and a committee was appointed to lay the resolutions before the directors of the Associated: "That in view of the fact that the returns received from the Associated Growers for the first year of its existence have shown an advance on the general market operations, and this under continuous unfavorable market conditions, this meeting emphatically urge growers to continue to stand by their contracts."

A fact not generally known is that the B. C. Game Conservation Board has two "game farms" on Vancouver Island, situated respectively at Cedar Hill and Colquitz. It is now considered advisable to consolidate these into one establishment, so that a model game farm can be made. At the present time the board is concentrating its energies on breeding pheasants and cross-bred mallard ducks, but eventually a specialty will be made of Hungarian partridge.

### UNJUST DISCRIMINATION

As the matter of express and freight rates enter so largely into the question of the cost of living, everyone should be interested in the investigation now going on at Ottawa on the application of the express companies for increased rates. It seems rather curious that express companies should apply for power to increase their rates—more especially in the West—when their motto in the past seems to have been "all the traffic will bear." Possibly they judged that the day was not far distant when the West would demand lower rates on express, and they are taking time by the forelock that they may compromise matters on the present schedule.

A very peculiar state of affairs has been revealed by the investigation. Express rates do not seem to have been imposed on any fixed principles, but rather to have been based on intuition, which is another name for guess work. Strange as it may seem, this intuition or guess work always penalized the West. For instance, the express rates on fruits, for similar hauls, are about 50 per cent. higher in the West than in the East, and in some cases nearly 100 per cent.

For this state of affairs the express companies seem to be able to offer no excuse or justification. It has been shown conclusively at the investigation that the operating costs are considerably lower in B. C. than in the East. Mr. E. P. Mallory, director of statistics for the Canadian National Railways, an interesting witness, admitted that the operating costs per passenger train mile in the Atlantic division was eighty-six cents per mile, in the Pacific division seventy cents, that the costs per passenger-car mile was thirteen cents in the East and only eight cents in the West. The West is not inhabited by "easy-marks", and once these official figures become known, may be de-

### MORE YARD ROOM

AT O. K. LANDING The Canadian Pacific have a large work train at Okanagan Landing, where they are making extensive improvements in their yards. They will greatly extend their yard accommodation, so that they will be able to store a large number of cars there. Vernon News.

### British Farmers Coming

Five hundred British farmers and their families, coming to Canada under an agreement between the Canadian National Railways and the Empire Settlement committee, will pass through Winnipeg early in April on their way to points in the western provinces along the line of the Canadian National. The families will settle in groups of 20, not in organized settlements.

An officer was showing an old lady over the battleship.

"This," said he, pointing to an inscribed plate on the deck, "is where our gallant captain fell."

"No wonder," replied the old lady, "I nearly slipped on it myself."

"I have not kissed my husband for ten years."

"Is he dead or have you money?"

Susie: "Mother, I want you to whip Tommy. He just broke my doll."

Mother: "He did? How?"

Susie: "I hit him on the head with it."

pend upon to put up a most strenuous "kick" for at least equalization of rates. —Merritt Herald.

## The Newspaper Has the Greatest Advertising Influence

The Women's Advertising Club of Los Angeles, working through the Women's Clubs of that city, conducted a questionnaire on advertising media and their influence, which should be very interesting to the retail advertiser. The computation was made that 90 per cent. of the buying is done by women and that millions of dollars are squandered every year in an effort to gain their attention. All walks of life were covered and the results figured on the basis of one thousand returns.

"Which of the advertising media influence you most?" was the question. The answer was announced as follows:

	Per cent.
Newspapers	30.0
Circular Letters	1.0
Announcement Cards	4.0
Booklets and Pamphlets	1.7
Magazine Advertisements	22.7
Program Advertisements	3.0
Street Car Advertisements	4.2
Billboards	4.4
Did Not Answer—Could Not Decide	23.0

## HUSKY NEW FARMERS ON CANADIAN NATIONAL

**TWENTY-EIGHT** of Canada's new farmer citizens-in-the-making as they arrived in Winnipeg a few days ago in charge of the Salvation Army. This party originally consisted of 50 boys and 12 girls, but those shown in the picture are the only ones who came on to Western Canada to work on the land, the others remaining in Ontario. These boys are the advance guard of a large group of 'teen age lads who are coming to Canada this spring under the auspices of the Salvation Army to work on farms in the west, and never has a more promising looking group of settlers passed through Winnipeg than the young men shown above. They travelled across Canada by Canadian National Railways' special train for immigrants and the picture shows them on their arrival at the Union Station in Winnipeg, and the long train filled with new settlers. Arrangements have been made by the Salvation Army authorities for special equipment to be provided by the Canadian National to bring west the next large party, which is scheduled to arrive from the Old Country the end of March.

# EDITORIAL AND FEATURE PAGE

## Why Eat Apples?

Because they are good to eat. When it comes to splitting this opinion of practically every normal human being who has ever had a chance at a good one into special reasons, we must admit large empty spots in our knowledge. The best analysis we can make shows quite a little water, some sugar, some more or less digestible bodies related to the starches and sugars, an acid and a little flavor, merely a trace by weight, but enough in odor value, from a good specimen, to scent a large room. The apple's fuel value is slight. It is neither what you eat nor what you digest, but what you assimilate that nourishes you, and apples, like some other fruits, appear to do at least three things. In the first place, they start the digestive processes. Just a few chews on a good one is enough, but why, we do not know, any more than we know why sucking a lemon before his eyes will cause the cornetist to gasp and cease. Next, they discourage "germs" using that word in a wide sense, for the apple acid, "malic" acid, if it makes you happier to say it in Latin, seems to be about as good as the milk acid, lactic acid, in the business of suppressing certain sorts of putrefaction. This is not saying that an apple cannot rot, they certainly do, but it is rare that they rot offensively. Lastly, they appear to supply, though in small amounts, minerals needed by the system in a form in which the system can take them in.

How far they carry the curious and scarcely known "vitamines" is not certain, for we do not know what these really are, nor how many there may be of them, but the apple's acids and salts certainly have a gentle stimulating action upon the intestinal peristalsis, which is the pulsing motion which carries the digested food along.

Some think that they have a definite medicinal effect, and if a medicine is "what does you good" they surely have, but there is almost the certainty of an apple habit being established. This craving is only satisfied by the use of several apples per day, and in many cases their constant use has been followed by death between the ages of 80 and 90 years. Mr. Artemus Ward pointed out that it was great virtue in an apple that one day would keep away a doctor, since an onion a day would keep everyone at some distance, but the regular eating of one or more apples certainly lessens the need for "physic", of any sort. A fair amount of the value of apples, to the human system remains with the juice when this is squeezed from the ground fruit, and, although the flavor is slightly the worse for the pasteurizing, the constituents remain unchanged. In many cases the only care taken is to exclude air from the container, while allowing the carbon dioxide to escape. This gas results from the oxidation of a part of the sugar, and so there is loss of food value, but, in spite of this, the fluid continues to be used as a beverage.—Rural New Yorker.

At a recent meeting of the shareholders of the Kamloops Canneries Company, Limited, it was decided to acquire a new cannery building and move the present plant. From a small beginning of 3,000 cases of tomatoes in 1921, the company has increased its output to 24,000 cases of canned goods in 1923.

To master your job, first master yourself.

Member of British Columbia Selected Weeklies.

Subscription Rates—In British Empire, in advance, \$2.50 per year; six months, \$1.40. To U.S.A. and other countries, \$3.00 per year.  
Advertising Rate Cards and information respecting territory and samples of paper mailed upon request, or may be seen at the office of any advertising agency recognized by the Canadian Press Association.

Advertisers must have copy in by Tuesday noon in order to insure changes for standing advertisements. New display advertising copy can be accepted one day later.

All instructions for cancellation or alteration of advertising must be in writing.

Correspondence—Letters addressed to the Editor and intended for publication must be short and legibly written on one side of the paper only. The longer an article, the shorter its chance of insertion. All communications must bear the name of the writer, not necessarily for publication. The publication or rejection of articles is a matter entirely in the discretion of the Editor. No responsibility is assumed by the paper for the opinions expressed by correspondents.

Typographical Errors—In the event of a typographical error, advertising goods at less than the proper price, the newspaper will furnish letters to be posted in the store stating the correct price, but goods may not be sold at the price printed and the difference charged to the newspaper.

Thursday, April 3, 1924

### POSTAGE RATES.

For the improvement of the service our postal authorities might well give some attention to the educating of the public on different phases of the service. Last summer those who attended the Vancouver exhibition had the opportunity of learning much that was of value to the public and the learning of which would directly benefit the postal department.

Not the least feature of the service on which the public should be better informed is that of postal rates. We are advised that every day many letters reach the Summerland post office with insufficient postage. This means delay in delivery and great inconvenience to the addressee. If the letter is for a person on the rural route, it is necessary for the postmaster to send him advice of the fact that the letter is held at his office awaiting payment of the double rate penalty. Very frequently letters of importance addressed to the Review are delayed a day or more for the same reason.

Since the rates were increased during the war, drop letters only, that is, letters to be delivered from the same post office, should bear a two cent stamp. If for any other post office or the rural route service from the same post office, the minimum charge is three cents. Copy for newspapers mailed in unsealed envelopes from any post office requires one cent. Not infrequently the sender seals his package with the result that the copy is held up perhaps until too late for publication.

Recently, we made a special trip to the post office for matter of this kind, only to find that we had to pay four cents in order to obtain ten cents sent by a reader.

### AN APPLE BREAKFAST FOOD.

Cull apples are to be used in an Annapolis Valley manufactory as the chief ingredient in a breakfast food. A syndicate, including many leading fruit growers of the fair Nova Scotia valley has been formed to organize a company to manufacture this new food. Apparently it is neither the old fashioned dried apple so commonly used a couple of generations ago nor the more modern apple ring or evaporated apple, as only very small apples and wheat flour are the ingredients to be used. Reports are that the product will be of superior quality with a distinctive apple flavor.

### WORTH ADVERTISING.

A writer in the Christian Herald thinks the church should use advertising space equal to that used by the movie shows. He seems to hold to the old-fashioned idea that church has something just as good as anyone else and should not be afraid to tell the world. He says the church of today lacks the aggressiveness of the church of the first century, which was not averse to letting outsiders know that she had something worth getting, a Someone worth knowing.—Exchange.

### COMMUNITY LOYALTY.

Have you ever stopped to consider the fact that loyalty to community interests is the highest form of patriotism? Show us the man who is loyal and true to every interest of his own community and we will show you in that same individual a man in whom his country can repose absolute confidence in any emergency that calls for his allegiance.

On the other hand, the man who is careless and unconcerned for the interests of his community is most apt to display the same spirit of indifference toward his government or his county should any serious danger threaten either.

We owe allegiance to our own people, but the prosperity and success of others is in no wise a detriment to us, but rather a help, if each community would develop itself to the utmost—materially, mentally and morally—none would need be envious of others, neither would any need do aught to detract from another's interest.

Let us develop community loyalty to the full—the highest possible form of patriotism.

One nice thing about having a home is it always gives you some place to wish you were when you were away.

Some people have so much artistic temperament that they even pose while winding the phonograph.

## The Pedlar's Pack

By AUTOLYCUS

"A Snapper Up of Unconsidered Trifles."

The Winter's Tale, Scene II, Act IV

"He who steals what isn't his'n, when he's caught, he goes to pris'n." This homely proverb covers conditions in general except where PLAGIARISM the amounts involved are so large as to be automatically raised from the status of mere stealing to that of appropriation. In literary matters it does not apply at all, unless there is sheer piracy, which hardly comes under the heading of plagiarism. I noticed a week or two ago, a plaint from a certain writer to the effect that there were many secondhand scribbles who took the ideas of others and calmly passed them on as their own. It seems to me that the complaint raises an issue which is practically baseless, since the number of ideas which may be classed as original is so small as to be almost negligible. How many original ideas are to be found in Shakespeare's writings, for example? The editor of the "Popular Magazine" relates how he once interested himself in looking up the sources of Shakespeare's plays, and found that there were only two—which were entirely original, all the rest being adaptations of old chronicles from many lands. Did Shakespeare then "steal" these ideas? He did not—on the contrary he took them and clothed them in language which no other man could command, and thus gave the world some of its most beautiful literature. Dumas said of himself, "I do not steal, I conquer" which is a piece of gasconade worthy of D'Artagnan himself, but none the less true. Shakespeare took, and did not attempt to excuse himself—he did not need to do so.

Kipling's character puts the matter in his highly characteristic fashion when he says:—  
"When Omer smote his blooming lyre  
'E'd heard men sing by land and sea,  
And what 'e thought 'e might require  
'E went and took, the same as me."

The fact that it was Apollo, and not Homer, who smote the lyre, does not matter, being a mere detail of poetic license. Kipling, of all writers, is one with whom we generally associate originality, yet here we see him frankly admitting his indebtedness to others. His own genius is shown in the re-clothing of old themes in new garb, and this is true of all great writers. The "second-hand" man is one who gives us copy-book maxims scantily clad in threadbare language, and minus one redeeming beauty to excuse their change of garb.

Secretary Hughes' statement that about twelve thousand new laws are made in the United States each year, and his plain avowal that they are largely ambiguous and inconclusive, supports the belief already held by many people, that our neighbours are past grand masters in the art of law making, however they may rank in the matter of law observance. We may also be excused for conjecturing that a great many of these laws are fathered by persons who are lamentably ignorant of the matters they wish to deal with, and that they are passed by people who don't take the trouble to examine them. Otherwise how can we possibly explain the ever rolling stream of "Thou shalt nots" which takes its ineffectual course along the channels of affairs. And, to take one particular instance, how can we otherwise understand that shining legislative gem lately introduced in the New York legislature to prohibit the keeping of honey bees in any village of one hundred or more population, within five hundred feet of any dwelling or cultivated garden? American bookkeepers are at a loss to understand the purpose of such a bill, but are warned by their journals not to neglect to oppose it, from which it is safe to infer that it may actually become law. It is also safe to decide that the individual who is introducing this latest freak of prohibitive lawmaking, knows nothing whatever of the manners, habits and customs of honey bees. If he did, he would be quite aware that five hundred feet is nothing to a bee in search of nectar or pollen, and that, to keep bees out of a garden it

would be necessary to extend the prohibition area to a distance of at least three miles in every direction, and even then be liable to visitation. On the other hand, a law such as the one reported, would most seriously reduce the production of honey in the districts covered. I cannot suppose that the New York State legislature will be quite so foolish as to pass this absurd measure, but the incident affords a significant commentary on the mental processes at work in some places.

Rather curiously, there happens to be a legal decision concerning bees, reported in a late number of "The Province" relating to a lawsuit brought by the Californian city of Torrance, to force the removal of an apiary from within the city limits. The judge decided that "Charges of being a public nuisance can not be brought against a bee unless the bee that does that stinging is identified." That is simply delightful, and foreshadows the coming into existence of a special squad of detectives, armed with bee veils, microscopes, orders of extradition, and other appliances too numerous to catalogue. These heroes will have to take a complete course of bee culture, which may entail an extra department in the State industries, and give employment to many worthy persons who might otherwise be overlooked. The squad may perhaps be known as the "Sherlock Holmes B. division", and will spend their official life tracking the guilty bee to her home, and investigating her family history for purposes of identification.

Meantime, it might be useful to point out to the general citizen that if there are flowers in his garden (as there ought to be) he will be visited by honey gatherers from many distant points, and that, to avoid their presence, he must live in a flowerless desert.

In a recent announcement of the opening of an enquiry into some of the numerous scandals now being probed south of the

THAT SPIRIT line, it was noted OF LEVITY that the legal luminaries engaged were assembling on the spot and displaying "a spirit of levity". As the proceedings mean to these gentlemen a series of highly profitable days of legal disputation, this hilarity can be comprehended, although the wicked reporter might have refrained from throwing the spotlight on it. What the entertainment will cost the American public is uncertain, and is moreover no concern of ours, but unfortunately we can parallel the vaudeville on this side of the border with our P. G. E. enquiry, and the expense is definitely stated to be about \$2,000 a day. Certainly we get the levity as per schedule, but the price seems high when we consider the poor quality of the humour.

Two thousand dollars a day is too much money to pay for an entertainment which bears a strong resemblance to the squabbling at a school-boy game of marbles. The public is long suffering, and will put up with a good deal, but there is a limit to everything, and it is not surprising to read that interest in the proceedings has dwindled. As a matter of fact the only real humor has been supplied by the Fitzmaurice Cartoons, and they are included in our newspaper subscriptions.

I would suggest that, the curtain having fallen on the P. G. E. enquiry farce, the management should provide a drama which will be worth the price of admission, and which might take the form of completion of the line. The play would then end happily, and the audience go home satisfied.

AUTOLYCUS

Saskatchewan's creamery butter production shows a steady increase. According to the latest report of the provincial government, the output of 1923 amounted to 10,807,010 lbs., as compared with 8,901,145 lbs. in 1922 and 2,716,400 lbs. in 1914. The number of creameries increased from 21 in 1914 to 65 in 1923.

Mrs. Hort—Let me serve you some of this moulded cranberry sauce, Mr. Rural.

Mr. Rural—No, thank you; I don't like anything after it's moulded.

## The Newspaper in Your Community

Gleaned from an Eastern Magazine

There is a clear and definite line of work for the local newspaper, whether it be a daily, semi-weekly or weekly. From no other source can the intimate personal and business news of the small town community be obtained.

There was a period during which the small town newspaper seemed to be smothering under the increasing circulation of the city dailies. The city daily does not and cannot devote space to matter of immediate interest to the small town and the surrounding country. We may say, therefore, that while in the great wall of news that confronts us from day to day, the large stones and bricks will always be furnished by the city dailies, through the various news services that cover the entire world, the chinks and the cement will ever be furnished by the local, country paper's news from nearby, the intimate heart-throbs that come from the local business, social, civic and home activities.

Every town owes it to itself to encourage a good, enterprising, wide-awake, progressive newspaper. Such publications are worth far more to the town than the town usually realizes. By supporting, I mean not only subscribing to the paper and reading it, but also helping it to get the news, by using it as a medium of public discussion and by patronizing its advertising columns.

In too many instances the good local newspaper is taken as a matter of course—about as we consider the act of eating when meal time comes.

But the town which has no medium of local news or for the expression of local opinion is a barren spot indeed. God pity it! What community progress can be made with no vehicle of local publicity? What community ideals and heart can be promoted or maintained with no regular and dependable organ to voice them? What community sympathy and fellowship can be developed where there is no clearing house for the myriad hopes and discouragements, joys and heart-aches, successes and disasters, may be brought together and blended into that intangible, though very real, thing or substance that we call community spirit?

Every community feels the need for a good, level-headed newspaper. It has its work clearly defined for it and if it fulfills its mission it deserves the loyal support of the town and the country 'round. Such a paper can render invaluable service in breaking down that foolish but age-old barrier between town and country by keeping each class supplied with the point of view of the other.

After all, folks are about the same whether in town or country, and the country roads are but extensions of the city streets.

Penticton has been made headquarters for the West Kootenay sub-district of the Royal Canadian Mounted Police.

According to the new redistribution Bill now before the House of Commons, British Columbia will have an increased representation of one member.

The play for the Interior of B.C. tennis championship will be held on the Kelowna courts, commencing June 30.

A creamery will be established at Portage la Prairie, Man. The farmers on the famous wheat growing plains are falling in line with the general movement in the West to get into mixed farming.

An eastern farmer, who had moved to California, had heard that his neighbor raised unusually large potatoes, so he sent his hired man over to get a hundred pounds.

"Go right back," said the Californian, "and tell your boss that I won't cut a potato for any man."

## KIDDIES' MENU ON NATIONAL TRAINS

### DINING CAR MENU FOR THE LITTLE FOLK

WHEN little folk a-travelling go  
There's one important thing to know  
About a dining car—  
The Line whose printed menus tell  
What hungry girls and boys love well,  
AND THAT'S THE C.N.R.!

A MEAL in the Diner is such a treat!  
We find the most wonderful things to eat,  
And what makes everything twice worth while,  
Is to have it served in the "National Style."

THIS is not a page out of any ordinary nursery rhyme book, but is the front and back cover of the Canadian National Railway's new menu for children, which is now in use on all dining cars on the system. No more need the mother travelling with little ones dread the ordeal of trying to choose suitable meals for the children, with two pages of combination menus for breakfast, dinner and tea made up of the most nourishing and appetizing foods obtainable at prices which are in accord with the size of the small patrons who enjoy the meals.

The Canadian National is one of the first railways to cater in this way to the young travelling public and in future each visit to the dining car will be looked forward to by the

little folk with great pleasure if only for the opportunity of seeing again the "little picture book" from which they may choose what they will have to eat. Eight pages of gaily colored pictures and funny little verses combine to make a most delightful story to pass the time while the waiter is getting the order.

So attractive is the "Menu for the Little Folk" and so much enjoyed by children since its introduction on the National trains, that numerous applications have come into the office of the superintendent of dining cars, Mr. Walter Pratt, who feels that he is doing a service, not only to the parents, but to many children who will be taken along on the "very next trip we make, because travelling with kiddies is certainly no hardship

now and it is a shame to deprive them of all the fun they could get out of their own personal dining car service such as this," to put it in the words of one father and mother who travelled west the "National Way" just a few days ago.

In an endeavor to make the dining car service the greatest possible benefit to the travelling public, Mr. Pratt has recently inaugurated a lunch counter service in Colonist cars between Winnipeg and Toronto. These are on trial at present and if they meet with the approval of the public will be placed on all transcontinental trains in the service. Judging from the patronage of the first lunch counter Colonist car sent out, the convenience is much appreciated,

# Local Happenings

Muir Stuart returned on Wednesday morning from a short trip to the Coast.

Dr. Bryce, eye specialist, of Kelowna, will be at Summerland Hotel Saturday, April 5, where he may be consulted.

Two young women arrived here on Wednesday morning's Vancouver train on their way from Australia to Kelowna.

According to reports reaching here from Oliver, early stone fruits suffered injury from frost during the recent cool nights.

C. W. Lees, principal of the Kelowna public school, has been confined to his home by illness since the first of last week.

Miss Elizabeth Smellie of Emerson, Manitoba, is again with her aunt, Mrs. K. S. Hogg. She has recently been visiting relatives in Peachland.

Major Coode has leased the A. C. Turner orchard for this season. Mr. and Mrs. Turner expect to leave here for the Coast about the middle of this month.

Mrs. J. L. Logie returned on Friday morning from Seattle, where she has been visiting her daughter, Mrs. Campbell-Robinson, who had been ill with pneumonia.

A. J. Mann, assistant superintendent of the Experimental Station, went up the lake on Tuesday morning to attend meetings in the Armstrong and Enderby districts.

Mrs. J. L. Brown, who has been the guest for some weeks of her sisters, the Misses Campbell, returned on Wednesday to her home near Pilot Mound, Man.

Methodist Ladies' Aid held a sale of home cooking and afternoon tea on Friday when they realized the very satisfactory sum of fifty-five dollars to increase their funds.

W. T. Hunter, superintendent of the Summerland Experimental Station, went up to Kamloops on Tuesday to attend the bull sale which is held there on the 2nd, 3rd and 4th of April.

Miss Laura Carruthers, who has been for some time with the Summerland Co-operative, went down to Kaledon on Sunday, where she will visit relatives for a time before returning to her home at the Coast.

Those troubled with aching feet during summer heat, or other forms of foot complaint, can consult Dr. Scholl's foot specialist at Beer's Shoe Store on April 23rd. Scholl's appliances are unequalled. Remember the date.

Mr. and Mrs. Hardy, of Agassiz, arrived in Summerland this week and have taken up residence at the Experimental Farm. Mrs. Hardy will have charge of the boarding house there, while Mr. Hardy will be employed on the farm.

Mr. and Mrs. Van Camp and daughter, Lola, arrived on Friday night from Edmonton and are the guests of Mrs. S. J. Conway. Mr. Van Camp returned east again the first of the week, while Mrs. and Miss Van Camp will remain for a time.

About twenty members of the local Masonic Lodge went down to Penticton on Friday night to attend a joint meeting of the Peachland, Summerland and Penticton lodges. Grand Master Tisdale, head of B. C. Masons, who was to have attended, was taken ill at Kelowna and was sent to Vancouver by the next train for treatment.

A. Davidson has taken over from A. E. Cowan the Professor Moore property formerly owned by him. Mr. Davidson is now busy making extensive improvements to the property and Mrs. Davidson and their daughters, who are now in Vancouver, will join him later. Both the Misses Davidson are attending Normal in Vancouver.

## SUMMERLAND WEATHER REPORT

Below is a report furnished by the Dominion Experimental Station here for the week ending Tuesday:

Date	Max.	Min.	Rain	Snow	S.S.
March 26—42	34	.....	0.0	.....	.....
March 27—41	33	.....	0.2	.....	.....
March 28—48	35	.....	0.0	.....	.....
March 29—41	26	.....	5.0	.....	.....
March 30—42	23	.....	1.4	.....	.....
March 31—50	23	.....	5.4	.....	.....
April 1—57	31	.....	0.0	.....	.....

Mrs. T. Joy of Trout Creek is ill at her home, suffering from a nervous breakdown.

Fruit trees — apples, apricots, peaches, cherries, etc.—for sale; also rhubarb roots. T. J. Garnett. 36L 35-36L

Come to the special healing service in the Lakeside Church of God, Sunday 3 p.m. Bring the sick. 36Lp

W. C. Kelley will be chairman of the public meeting advertised in another column to be held on Monday afternoon.

Miss J. Sinclair is expected home this week from Vancouver where she has been attending the W.M.S. convention.

Mr. and Mrs. M. Stuart left on Sunday for Victoria where they will visit Mrs. Stuart's parents, Mr. and Mrs. W. Limmer.

Harvey Walton left on Tuesday morning for Colgate, Sask., to join Mrs. Walton, who has been on the prairies for some months.

Mr. Lionel Munn came in from Toronto recently, planning to spend the summer here. Mr. Munn is a nephew of Mr. and Mrs. A. G. Munn.

Mrs. Cartwright will receive Tuesday afternoon, April 8, from 3 to 6 for Mrs. Zimmerman, who is leaving for California the following day.

Alex Smith, of Smith & Henry, underwent a major operation at the Summerland Hospital on Wednesday and is now making very satisfactory progress.

Rev. E. R. McLean, provincial secretary of the Religious Education Council for this province, with headquarters in Vancouver, was in town this afternoon.

A. E. Richards of the Experimental Station here, left on Tuesday's train on an official tour of illustration stations in B. C. under his supervision.

That the Agur property on the lakeshore commonly referred to as the boathouse, has been sold is stated on good authority, but, so far, the name of the purchaser has not yet been revealed.

Mr. and Mrs. Ernest Campbell and little daughter have moved up from Penticton to their former home in Garnett Valley, until recently occupied by Ira Clarke. Mr. Campbell is a nephew of J. R. Campbell.

Rev. T. W. Read, of Edmonton, came in on Friday night and spent the week-end here, the guest of Mr. and Mrs. J. L. Logie. Rev. Mr. Read took the morning service in St. Andrew's church on Sunday.

R. Duncan, manager at Penticton for Rowellife, Limited, was in town Wednesday morning and states that the current report to the effect that his firm had withdrawn its minimum guarantee of prices, is untrue.

Under the direction of the reeve and council another drive is being made today on the Peach Orchard park with a view to finishing the work of cleaning up the underbrush and preparing the park for the tourist season.

Mr. and Mrs. G. W. Bush of Saskatchewan arrived here last Wednesday night and remained until Monday noon, visiting their son, E. L. Bush. From here they went to Vancouver and will continue on to California, where they may reside.

Mr. and Mrs. J. L. Logie went up to Okanagan Centre on Tuesday. They will spend much of their time there during the coming summer. Their son, Jack, who has been living with them during the winter, has gone back to his cottage on the shore at Peach Orchard.

Mrs. J. H. Ritchie returned on Friday from Seattle, where she has spent the winter. She was accompanied by her sister, Mrs. Lawler, who has been at Vancouver for several weeks. Mrs. Finley and son, Howard, who have been occupying the Ritchie home during the winter months, have returned to their cottage at Crescent Beach.

Mr. and Mrs. J. M. Sutherland expect to leave Summerland shortly after the middle of this month. Mrs. Sutherland and children will go down to Ontario, where they will remain for the summer at least. Mr. Sutherland has not yet fully decided what he will do, but is likely to spend the summer at the Coast. A preliminary announcement of the sale of their household effects is made in another column in this paper.

# Canadian Horticultural Council

A circular setting forth the accomplishments; and indicating the nature of the work being carried out by the Canadian Horticultural Council has recently been issued by the Secretary Treasurer, Mr. L. F. Burrows, Ottawa, from which the following is an excerpt:—

1. The confidence of the various departments of the Dominion Government has been secured and the Council is now recognized as the official mouthpiece of the organized horticulturist both professional and amateur in Canada.

2. A plant registration bureau, having for its object the protection of plant breeders, has been established and is now actively functioning.

3. Numerous questions concerning the sales tax as affecting the horticultural and allied interests have been taken up with the proper officials and satisfactory adjustments secured.

4. Upon the request of the Council the Department of Agriculture has this year undertaken extensive experiments in the dehydration of fruits and vegetables and has commenced a thorough investigation of the breakdown of certain varieties of apples in British Columbia due to which the fruit growers were suffering severe losses.

5. An extensive publicity campaign has been carried on—over two hundred articles covering various horticultural subjects, having been submitted to and accepted by the newspapers and periodicals of Canada.

6. Upon representation by the Council the law concerning the manufacture and sale of soft drinks, particularly fruit juices, is being more vigorously enforced.

7. Certain clauses in the proposed amendments to the Insect and Pest Act unsatisfactory to the nurserymen and florists were, after a conference, satisfactorily adjusted.

8. Dominion incorporation was secured for two of the associations hav-

ing representatives upon the Council. 9. The Council has the assurance of the Department of Agriculture that legislation will be prepared looking to the regulation of the sale of insecticides and fungicides.

10. Through the generosity of Mr. J. E. Carter, Guelph, Ontario, the Council has arranged to present annually, a gold medal having an intrinsic value of one hundred dollars, known as the "Carter Medal" to the person who, in the opinion of the Council, had done the most for the advancement of horticulture in Canada during the year preceding the annual meeting.

11. Continuous pressure has been exerted in numerous directions for a removal of the embargo on Canadian apples maintained by Australia and Japan.

12. Trial plots containing large numbers of varieties of vegetables and flowers have been established at different centres in order that the true variety names may be established and the lists of varieties offered for sale clarified.

The Council is completing arrangements for:

- (1) A national apple day and national apple week.
- (2) A national decoration day.
- (3) A national arbor day.
- (4) Certification of nursery stock.
- (5) A vegetable advertising campaign.

(6) A standard score card for horticultural products, for the use of judges at shows and exhibitions throughout Canada.

The Council is now representative of approximately 85,000 people, and consequently the matters brought to its attention are numerous and varied. It is pointed out, however, that the Council was organized and is maintained entirely by horticulturists, to give service to horticulturists of Canada on any questions that they may see fit to place before it.

## THE ASSOCIATED MAKES CORRECTION

To all Growers.—Following our letter to growers of the 19th of March, in which we made the statement that, through transfers of property, the Associated Growers would lose control of six hundred cars of fruit, certain items appeared in the Valley press, allocating four hundred cars of this loss to the Kelowna district.

Through a misunderstanding of the report originally received from Kelowna, we were under the impression that these figures were correct, but had never authorized their publication. On further investigation we find that this statement has done the Kelowna district a great injustice and we wish to correct the false impression given.

The total tonnage, which, for the time being has passed out of our control, is approximately as stated, 550 to 600 cars, but of these the Kelowna district is only responsible for 125 cars.

(Signed) Associated Growers of B. C., Limited

## MAIL SCHEDULE.

For the convenience of our readers we give below the time of closing of all mails at the local post offices for despatch by boat and train and also interchange between the two offices:

AT SUMMERLAND OFFICE. For all points North, East and West—9 p.m.; Sunday, 6 p.m.

For Naramata, Penticton, South, Similkameen, Boundary and Kootenay—Daily, except Sunday, 6 p.m.

For Vancouver and Victoria—Daily, except Monday, 11 a.m.

For West Summerland—Daily, except Monday, 7.30 a.m. and 11 a.m.; Daily, except Sunday, 6 p.m.

For Rural Route—8.00 a.m. daily, except Sunday.

AT WEST SUMMERLAND OFFICE For Coast Points—Daily, except Monday, 11.30 a.m.

For South, North and East—Daily, 5 p.m.

For Summerland Office—Daily, except Monday, 11 a.m.; and daily, 5 p.m.

# TO DISCONTINUE FEED BUSINESS

### Peachland Union so Decides After Hearing Report of Special Committee.

An extraordinary meeting of the shareholders of the Peachland Fruit Growers Union was held on Monday afternoon March 31st for the purpose of deciding whether or not it was advisable to continue the feed business. The directors and a committee had been appointed at a previous meeting to go into the matter thoroughly and report their findings to the growers. They submitted the following recommendations:— That while a six weeks test has not been conclusive as to the benefits of a checking system in the sale of feed, it is very evident after an examination of the premises that a considerable expenditure would be necessary to put the building in shape for the economic handling of feed. With conditions as they are and considering all the circumstances we feel compelled to recommend that the feed business be discontinued. Opinions on the subject were asked after discussing the matter fully, and the following resolution was carried:—That the report and recommendation of the directors and committee be adopted and acted upon.

President Wm. Douglas, announced that the directors had decided to ask the growers to collect all the apple and orchard boxes in their possession and pile them separately in a position so they could be checked over and counted. Quite a large number of these boxes were scattered throughout various orchards and they felt that if they were collected, repaired and taken care of quite a saving could be effected. Wm. Dryden, Peachland director on the Associated board having just returned from board meetings at Vernon gave the growers a very lucid and detailed report of proceedings at headquarters. It was very evident that Mr. Dryden had done all he could in the interests of the grower and all present felt that while matters are still somewhat unsettled our representative had given his local supporters a very fair account of the proceedings. A hearty vote of thanks was tendered Mr. Dryden.

Mrs. H. Burch of Kelowna, was a guest this week of her sisters Mrs. J. L. Elliott and Mrs. J. Wright.

Mr. Fridge spent a couple of days this week in Peniticon.

Mr. and Mrs. Hyde went over to Kelowna this week, where Mrs. Hyde entered the hospital for a minor operation.

Mr. and Mrs. Stephens and their assistant, Harry, spent a day in Kelowna this week.

W. D. Miller has succeeded in shooting all the logs which he had at the

head of the skidway and has taken part of his gang to finish putting in a small quantity which were left near the Long Ranch from former operations. The Kelowna sawmill tug took away a good sized boom, the finish of the Deep Creek camp run for this season.

Mr. Crooke returned on Thursday morning after a short visit in Peniticon.

S. Hardisty spent Tuesday in Kelowna.

Mr. and Mrs. Edgecombe left last week end for the Coast where they will probably reside for some time. They have made Peachland their home for several years and have formed a large circle of friends and will be greatly missed from the community. Mr. Edgecombe has been a lay reader in the Anglican church, having conducted services many times in the absence of the clergyman, not only in Peachland but as well in Naramata and Summerland. They two have always taken an active part in the work of the church and Sunday school which vacancy will be much felt. Mr. Edgecombe served the fruit growers of the district for a time as director of the local and also director on the central. They were accompanied to the Coast by Mrs. Edgecombe's brother and wife who have been here for the past few weeks.

Mr. S. Murdin spent a day last week in Kelowna.

George Topham and Nelson Keating spent a day in Kelowna last week.

A. West left last week expecting to be out of town for a short time.

The gospel meetings carried on for a couple of weeks in the Municipal hall by the Glenrosa brethren, with Mr. Clifton of Peniticon as leader, were concluded on Friday evening last. It is understood a service will be held by the brethren every two weeks, on the Sunday evening there is no other service in town.

Word has been received this week of the death on Sunday last of Mr. Dave Kirby, late of Vancouver, son-in-law of Mr. and Mrs. John McLaughlin. Mr. and Mrs. Kirby made Peachland their home for several years before moving to Vancouver, and have many friends in the community who were greatly shocked at the receipt of the sad news. He leaves his wife and daughter Annie Margaret. Mr. and Mrs. McLaughlin were at the Coast at the time.

Marconi, the inventor, says that he has perfected a method by which he can send radio messages as a beam, projected in any desired direction. Moreover, the new form of transmission requires only a small part of the electrical energy needed to broadcast throughout a circle the radius of which is the same length as the beam.

# RESOLUTIONS BY ARMSTRONG CO-OPERATIVE

### Want Cheaper Apple Package and Change in Grades.

Following resolutions were passed unanimously at a recent meeting of the Armstrong Growers Co-operative Association.

Resolved that an immediate conference of the directors of the Associated Growers of B.C. be held with the distributors (including the railways), so that the distributors may be fully informed as to the estimated production for the coming season and discuss arrangements for the financing and marketing of the crops.

Resolved that the directors of the Associated Growers of B. C. at their next meeting discuss and determine the possibility of cheaper packages for certain varieties, distinguishing between cooking and eating apples, so that cooking apples may be specially sold as such cheaper than the highest grade of eating apples and that the latter be divided into three classes:

- A. Extra fancy, specially selected, wrapped and boxed;
- B. Ditto for export trade;
- C. High grade eating apples crated and sold at a cheaper price than A.

Resolved that the directors of the Associated Growers of B. C. be requested to discuss with the distributors and producers of small and other orchard fruits the system of zone marketing.

And that these resolutions be forwarded immediately to the association and the representative of this local on the board of directors be instructed to bring same forward at the next meeting of the board.

### Very Scotch

A young Scotsman, shortly after his graduation from the University of Edinburgh, went to America to teach. Thirty years later he revisited the country of his birth.

On his return to his teaching post he was regaling some of his conferees with an account of his trip. "One morning," related the professor, "as I was strolling along a street in Edinburgh I stopped at a tobacconist's and bought some cigars. Finding myself out of matches, I asked the clerk for some. 'Ha'pence a box,' said he. 'What! Why in America when a man buys a cigar he is given a small package of matches.' 'I'm sorry, sir, but they're ha'pence a box here.' And do you know," added the professor, "I had to walk eight blocks to my hotel to get some matches."

"Marriage is a great game, isn't it?"

"Yes; but it always results in a tie!"

### "CATCH MY SMOKE" HERE THIS WEEK

A treat is in store for the amusement lovers of Summerland. For on next Friday and Saturday, there will be shown the William Fox production of "Catch My Smoke," Tom Mix's latest starring vehicle which has been the talk wherever it has been exhibited. Not only does the story appear interesting but the acting, directing and photography are of an exceptionally high calibre, according to the producer. There are also deft touches of comedy throughout.

"Catch My Smoke" tells the tale of a returned soldier from France (Tom Mix) who, upon arriving at his ranch, discovers plans afoot to do away with him when his enemies discover oil upon his property. How he eludes his enemies with the able assistance of his equine pal—Tony—rescues the girl of his dreams and comes into his own ought to provide six reels of absorbing action.

The situations are said to be replete with excitement and the entire plot ingeniously constructed. If this photoplay is as interesting as the others in which Tom Mix has appeared the Rialto Theatre will be jammed to capacity, especially in view of the producer's promise that this photoplay is an exceptional one.

### THE CAUSES AND CURES FOR TUBERCULOSIS

The causes for tuberculosis are many. Principally they are these: Bad housing conditions. Malnutrition. Low and irregular incomes. Ignorance. Alcoholism. Government indifference. The remedies are:— Sanitary homes. Wholesome food. Regular and living incomes. Compulsory education. Prohibition. Governmental Supervision and care.

Canada's potato crop in 1923 was worth \$62,652,000.

### NEWS—HAND IT IN

If only a few friends of The Review will only remember us from week to week in a little way it will help amazingly to make The Review much newer and therefore that much better from the real test of a paper, the subscriber's standpoint.

As you know, the local weekly paper is made up of little items and it is almost impossible sometimes to run down the news. Therefore your co-operation is most cordially asked to help along the making of your paper from week to week.

If you have an item drop in and tell us about it, send us a little story about it, phone us, anyway, so it gets to this office and the business will be promptly attended to.

If you have someone visiting you, or if you know of a friend who has, send it in. If there is a social in your neighborhood don't forget us with an account of it. North, East, West, South, spells NEWS and we want your co-operation from all points of the compass to this end. We try to run down the news, scout for it, but it is a hard matter sometimes to get it all and because of this we are asking you to help us out. Please do this and don't be afraid that items are too trivial for public mention.

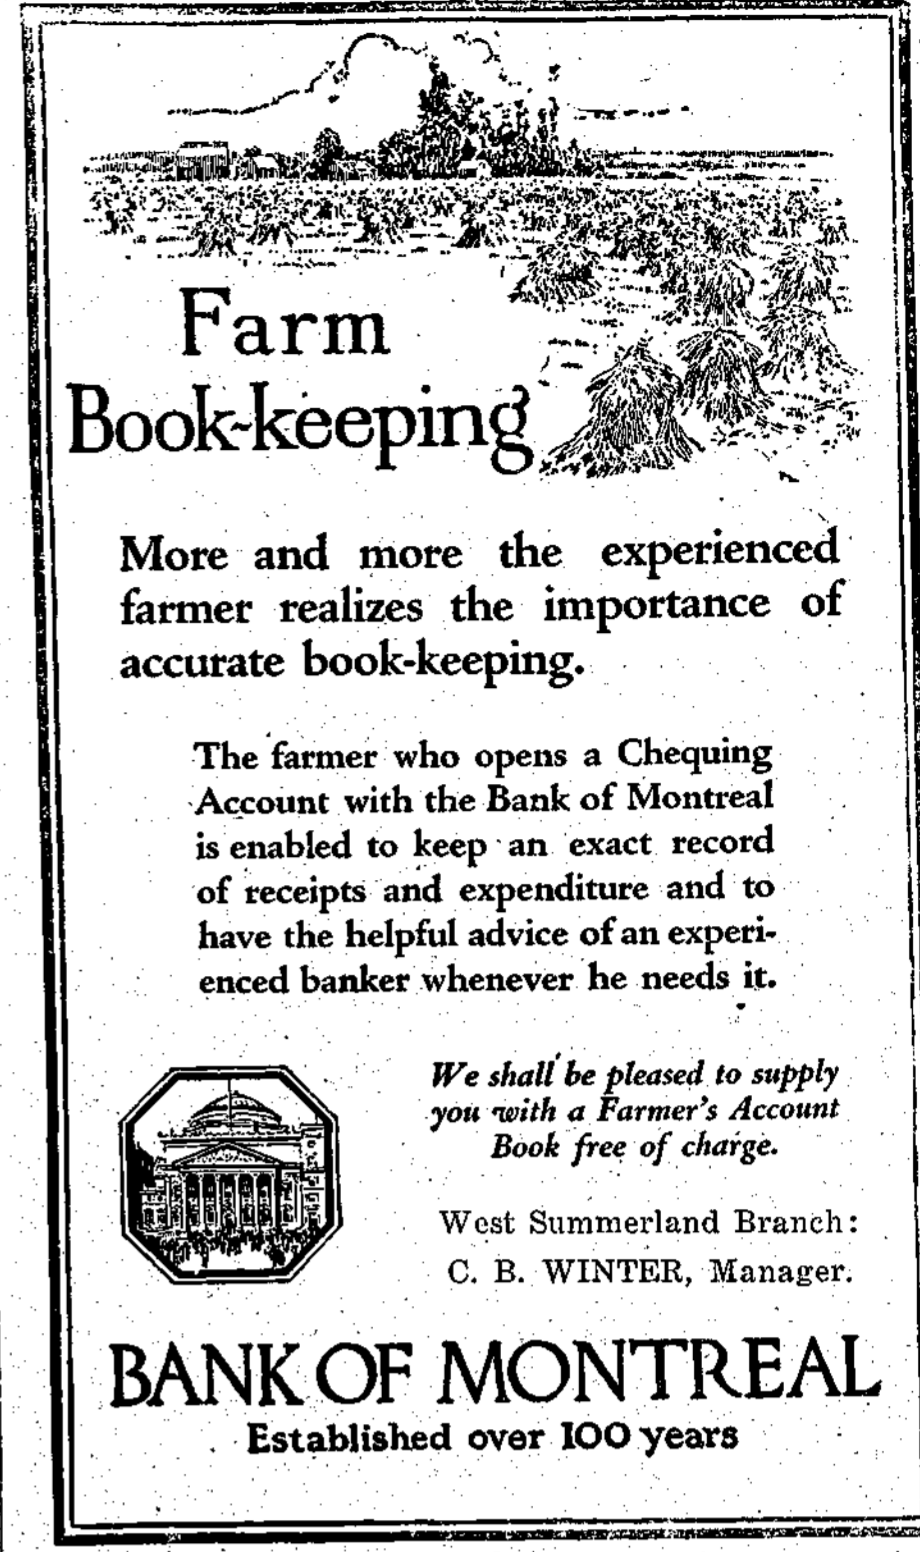

"Despise not trifles though they small appear, Small sands, the mountains, moments make the year"— And trifles make the newspaper.

### Precisely

Aunt—"Can you explain wireless telegraphy to me, Arthur?"

Arthur—"Well, if you had a very long dog, reaching from London to Liverpool, and you trod on it's tail in London, it would bark in Liverpool. That's telegraphy; and wireless is precisely the same only without the dog."—The Passing Show (London).

A widower had a monument erected at the grave of his wife and up on it this inscription: "The light of my life has gone out." Later he married again and shortly this line was cut upon the tombstone: "But I have struck another match."

## Farm Book-keeping

More and more the experienced farmer realizes the importance of accurate book-keeping.

The farmer who opens a Chequing Account with the Bank of Montreal is enabled to keep an exact record of receipts and expenditure and to have the helpful advice of an experienced banker whenever he needs it.

We shall be pleased to supply you with a Farmer's Account Book free of charge.

"Tell it well and the Ad will Sell"

You are no doubt familiar with the old story of the miser who became obsessed with the idea that his horse's feed was costing him too much, and who systematically cut down its rations little by little until he had the animal's feed down to one oat per day.

Then the horse died!

It's just the same with advertising.

Don't think that by saving a few words in writing your advertisement you are saving money. You are not! So much depends on the attractive way you state your proposition, and, of course, in the medium you choose for advertising it.

Write a good, descriptive advertisement and then select the very best medium for getting results.

#### LESS CRITICISM— MORE CO-OPERATION

Naramata, B. C.  
Editor Review.

Dear Sir,—Lily Fosbery's breezy correspondence is interesting from several standpoints but she gets the facts rather mixed for a logical analysis.

In the first place, the Associated Growers organization is not a general cooperative movement, it is at best only a capitalistic attempt at self preservation of the growers and as Lily F. probably knows, it is a limited, Co. limited in several ways.

Limited in the amount of returns dealt out to the growers (but trying to raise the limit), limited in quantity of brains and are therefore constantly looking for more and offering a good price for same and Lily F. admits that those so far secured (the independents) are perhaps the best fitted for the job, of any that could be found

The Association is limited in actual associates to the growers who furnish the products in which the association deals, but does not include the consumer, or the railroads whom we have to transport our goods, or the bank whom we have to supply capital for us, or the "employees" whom we hire to do our selling, office or packing house work

Lily F. deprecates the seeming obligation of the grower to buy in (at his own price) all and sundry independents who may see fit to start in business, but if the growers cooperate in their own organization, how could the independent exist?

I think it would be quite easy to induce many employees to take their pay on a share basis, providing the growers cooperate strong enough to assure the employees a reasonable share, with a fair chance for a better share, but a slipshod cooperation inviting disaster, is no inducement to an employee, who has an offer with a better outlook from elsewhere.

Therefore I believe our salvation lies in less adverse criticism and more cooperation, nearly 100 per cent if you please.

Yours truly  
H. P. Salting

#### THE ASSOCIATED

Peachland, B.C.  
Editor Summerland Review,—

In your issue of March 20 I notice a letter from R. B. Homersham, assistant secretary to the committee at central. The heading of letter "No Extravagance with Associated." It is hardly necessary for me to answer as by looking on front page of same issue we see in big headlines, "Associated not likely to function next year." Surely if that means anything it means mismanagement and extravagance. Granted that market conditions were hard was it not all the more reason why economy should be practised. The writer claims that some growers from lack of knowledge or foresight did not pay sufficient attention to quality or conditions of their shipments which caused rebates galore and consequent lessening of returns all round. I cannot understand his point for as far as this district is concerned, at least the growers make no direct shipments. Their fruit is sorted, packed and shipped under the inspection of local manager and if that is not sufficient what about the extra inspection hired by Associated at almost double the salary of the government inspectors, to be exact I believe the government inspectors receive the sum of \$125 and mileage per month, and the Associated inspectors \$225 and expenses. If I am wrong I am open to correction. Why these inspectors should be worth so much more I fail to see. I imagine a car inspected by the government man and stamped would carry more weight in case of claims than if inspected by an official of the Association. Is there no extravagance there? The writer also blames some growers for shipping through independents after signing up. If that is correct does it not show negligence on the part of Associated that they allowed such.

Surely they had a remedy in their hands. Was it economy to send out bulk shipments of apples and to make up quantity dump crates when there were plenty apples to be had by notifying the locals and they could have been shipped in sacks at very low cost? Who pays for the crates and

packing charges? The poor grower. Is it economy for the growers to have to pay Mr. Lewis of the executive board and who was there to represent the vegetable men. It might be economy for the vegetable men but surely not for the fruit grower who had no right whatever to pay him. Is it economy to pay a secretary a salary of \$5,000 who is either incompetent or negligent of his duties? For proof of this I might say that through his neglect in not furnishing statements to bank as agreed our local Union in Peachland was not able to carry out its agreement with the bank and consequently caused loss to growers. Mr. Howe visited the directors here some little time ago, but we got very little enlightenment on affairs at headquarters. His main object seemed to be to boost Mr. McDonald and Mr. Bulman, which I think was ill-advised. It is to be hoped that a manager will be secured who has the interest of the growers at heart. If so and he has the right men to help him there is no reason why the Association may not yet function successfully. I hope the growers this coming year will have more reliable information than last. We have been deceived from start to finish both in regard to sales and contracts. We find now that all did not have 5-year contracts as we were given to believe. My object in taking up your space is solely to get the growers to take more notice of how things are being done in OUR association and to demand that our business be done in a business-like manner so that we may have some adequate returns for our labor and worry and FRUIT and that it is not all absorbed in salaries, commissions, etc. Sorry to have taken so much of your valuable space, but the fruit business is the main thing this Valley has to depend on. If it does not improve many will have to lose their all which they have invested. Hoping that the Associated Growers may yet function very successfully.

Yours very truly,  
REYNOLDS HARRINGTON.

### FRUIT CONDITIONS IN CALIFORNIA

Editor Review.

Dear Sir,—There has been so much written re the co-operative in your columns of late the items I now furnish you with my interest readers.

Recent law in Maine, U.S.A., says it is a crime to solicit or persuade any member of a co-operative marketing organization to break his contract, or to receive his products for sale. It also is made a crime, punishable by a fine of \$100 to \$1,000 for each offense, knowingly and maliciously to spread false reports about such an association. Such offenders also are liable to a civil suit in the penal sum of \$500 for each offense. This will interest one of your correspondents, in last issue. If Maine can enforce such law, why cannot we?

Many small co-operative concerns down south, 'controlling small' tonnage, are closing down or returning "red ink."

The California Fruit Growers control 67 1/2 per cent. of oranges and 95 per cent. of lemons. They function well, but, do not return as much to growers as some strong independent houses, such as "Mutual Orange Distributors," "Elephant Orchards," etc. The manager of California F. G. has \$15,000 a year. His name is Dezell. He was founder and organizer (not the San Francisco lawyer). Mr. Dezell has a job entailing vast responsibility, work, and organization, long hours, often 14 hours a day. His salary stands alone as to size, his assistants get from \$2,500 to \$4,000, and in some cases, a bonus on RESULTS. The district manager at Redlands has \$4,000, is in his office at 7.30 a.m. and often after dinner till 9.30 or 10 o'clock. He is a wonderfully clever, intelligent and keen business man, much interested in our co-operative problems and full of suggestions which, they find, function well in selling of citrus fruits, suggestions we might to advantage try out. He considers his salary is good. Large salaries are not paid down south, the sums we pay out are, by them, considered fabulous.

The old yarn, so often hurled at us, that a good man is cheap at any price, is by California Fruit Growers considered rubbish, unless he brings great results, and if he does this, he is doing what he is paid to do. With them if he does not bring results he is let out. The Redlands district office, largest outside Los Angeles, is run by a manager, 2 clerks, and stenographer.

"Sunkist Oranges" is the brand name of extra fancy fruit, "Red Ball" almost as good, but much cheaper, is second grade or fancy; this fruit all goes east, and is not shipped north, largely as it is not known.

We think no orange is good unless "Sunkist," one of the many errors we make through ignorance. Packers or house crews do not make nearly as much as our workers get in Okanagan locals—wages are much lower.

Some gossips say we got the wrong man from California to manage our co-operative at its start. There are three men of his name round Redlands and Los Angeles, one is a person, another is a government horticulturist, the third is a fruit salesman, so I guess we got the right one after all. He is a very fine man, but now is, and always was, a strong

independent, or "outlaw," as they are called down south. Yet he came to teach us how to run co-operatively. This is now one of their standing jokes, and no wonder.

Yours truly,  
H. M. LUMSDEN.

#### A GAME WE ALL PLAY

Two small boys were puzzling their brains to invent a new game. At last one of them said, eagerly: "I know, Billy, let's see who can make the ugliest face."

"Aw, go on!" was the reply. "Look what a start you've got!" — Pathfinder.

#### IN VARYING ACCENTS

"What is the secret of success," asked the Sphinx.  
"Push," said the electric bell.  
"Take pains," said the window.  
"Always keep cool," said the ice.  
"Be up to date," said the calendar.  
"Don't lose your head," said the barrel.  
"Make light of everything," said the fire.  
"Do a driving business," said the hammer.  
"Find a good thing and stick to it," said the glue.

The most important automobile brake is under the driver's hat.

## How to Restore the Fruit Business And Make the Old Farm Pay

GROWERS! WILL YOU LISTEN TO A HEART TO HEART WORD OR TWO IN THE REAL INTEREST OF THE FRUIT INDUSTRY, BEFORE THE "LARGE PERCENTAGE" DRAG ALL DOWN TO DESTRUCTION.

We have always said, and, are still saying, that the only safe method of passing your fruit over to any concern for packing and selling is on a fair or reasonable

#### Minimum Guarantee

But this system must be adopted by all shippers or it cannot be worked at all. Anything less than this would be unsafe for all concerned.

Let every grower join up under this plan, and any shipper or concern who cannot operate in this way, let them step to one side, and make room for those who can and will.

This system would work out that the Jobber, shipper and Grower would each take a share of the risk of producing and marketing the crop. Why in the name of common sense should the grower be asked or expected to carry the whole risk by consigning his product to officials who in turn allow it to pass down the road like unto that between Jericho and Jerusalem. Why the Lloyds would not take such a risk as this.

So we say at the top of our voices, let every grower insist that all shippers (no concern to be excluded) make the grower a good guaranteed price in contracting his fruit, and that every load of fruit be weighed as it comes in, this guaranteed price to be paid the grower on the fifteenth of each month, for the fruit delivered the previous month.

If any shipper or concern refuses to contract on this plan, we feel sure that shippers will be available, who will work under the system which is in the real interest of the grower.

Doesn't this sound like real business and ordinary sense? Why of course it does.

Under this system, all shippers would have equal opportunities, just as they should. The market would be stabilized, as no one could sell at starvation prices, or prices lower than the market warrants.

Encourage all the competition possible. Do not discourage it. Build up the tonnage of those shippers or concerns who bring back the most money to their growers, and weed out those who do not get results.

Each shipper would export his proportion of any surplus of the crop that could not be handled to advantage in the home market. This might be covered by a smaller guarantee.

There would be no trouble, whatever, in placing all the fruit of the Okanagan in safe hands under this simple, sane and business-like system.

We are not attempting to create a new method, but simply resurrecting a good old plan that always resulted in satisfaction to the grower, the majority of whom under the new method of last year are being made the goat. The growers must have "Fair prices and prompt payment."

GROWERS! It is largely up to You. Take the safe way. This is no time for further experiment.

This general idle talk of price cutting emanates from the Prairie Jobbers, who want to handle everything that they may be free to take exorbitant profits or margins, with no legitimate competitors with the interest of the Valley at heart to check them up. Beware of this insidious propaganda issuing from those jobbers, the broadcasting of which is deceiving the people.

### SYNOPSIS OF LAND ACT AMENDMENTS

#### PRE-EMPTIONS

Vacant, unreserved, surveyed Crown lands may be pre-empted by British subjects over 18 years of age, and by aliens on declaring intention to become British subjects, conditional upon residence, occupation, and improvement for agricultural purposes.

Full information concerning regulations regarding pre-emption is given in Bulletin No. 1, Land Series, "How to Pre-empt Land," copies of which can be obtained free of charge by addressing the Department of Lands, Victoria, B.C., or to any Government Agent.

Records will be granted covering only land suitable for agricultural purposes, and which is not timbered land, i.e., carrying over 5,000 board feet per acre west of the Coast Range and 8,000 feet per acre east of that Range.

Applications for pre-emption are to be addressed to the Land Commissioner of the Land Commission Division, in which the land applied for is situated, and are made on printed forms, copies of which can be obtained from the Land Commissioner.

Pre-emption must be occupied for five years and improvements made to value of \$10 per acre, including clearing and cultivating at least five acres, before a Crown Grant can be received.

For more detailed information see the Bulletin "How to Pre-empt Land."

#### PURCHASE

Applications are received for purchase of vacant, unreserved Crown lands, not being timberland, for agricultural purposes; minimum price of first-class (arable) land is \$5 per acre, and second-class (grazing) land \$2.50 per acre. Further information regarding purchase or lease of Crown lands is given in Bulletin No. 10, Land Series, "Purchase and Lease of Crown Lands."

Mill, factory, or industrial sites on timber land, not exceeding 40 acres, may be purchased or leased, the conditions including payment of stumpage.

#### HOMESITE LEASES

Unsurveyed areas, not exceeding 20 acres, may be leased as homesites, conditional upon a dwelling being erected in the first year, title being obtainable after residence and improvement conditions are fulfilled and land has been surveyed.

#### LEASES

For grazing and industrial purposes areas not exceeding 640 acres may be leased by one person or a company.

#### GRAZING

Under the Grazing Act the Province is divided into grazing districts and the range administered under a Grazing Commissioner. Annual grazing permits are issued based on numbers ranged, priority being given to established owners. Stock-owners may form associations for range management. Free or partially free permits are available for settlers, campers and travellers, up to ten head.

### HELPFUL HINTS

By Alveda

After Cleaning Clothes.—Very often after cleaning clothes with gasoline a ring will be left. This may be removed by steaming over a teakettle.

Candle Grease on Linen.—Candle grease may be removed from any linen article by putting a blotter under the piece and using a warm iron. Put the iron stand on the material long enough to melt all the grease, which will be absorbed by the blotter.

Making a Vase.—A pretty vase or flower container may be made from an old bottle. That sounds strange, doesn't it—but it's so. First, saturate a cord in either kerosene or turpentine and tie around the neck of the bottle at the place you wish to cut it off. Then light the two ends of the cord and turn the bottle slowly so that the heat may be evenly distributed. Third and lastly, plunge into cold water and the neck will break off evenly.

Table Linen.—Table linen should not be rubbed hard in the wash. It is liable to separate the threads, and besides, the linen does not really need such severe treatment. If linen is put through a wringer the wringer should first be loosened. Never starch real linen. Take down from the line when half dry. The dampness is the better. Fold evenly and iron with a heavy iron. An eight or ten pound iron will make the linen look like new. It needs weight on it, as it should be fairly stiff and starch is not used.

## WASHINGTON POOL PRICES

(Continued from Page 1)

all selling and Federation charges having been deducted. Just what the packing and handling charges are is not stated. Much of the Okanagan fruit is packed by the grower. Presumably the cost would not vary greatly from that at Yakima, which, according to the appended statement is 52 cents. We purposely omit the figure for paper, as it is very evident that there was a typographical error in the publishing of this statement, the cost for paper per box being given as over 25 cents.

### COST OF PACKING

The Yakima Horticultural Union reports its findings on the cost of packing a box of apples, as determined through all its houses as 42 cents per box for the 1923-24 season. The cost is divided as follows, according to O. K. Conant, president of the Union:

Box Shook	18.5
Making Box	1.0
Nails	0.6
Paper	0.6
Packing	5.5
Sorting	4.0
Lidding	0.8
Checking	0.3
Recording	0.5
Table Dumping	0.8
Placing packed boxes on	
Rollers	0.4
Trucking	0.4
Repairing	0.5
Extra Labor	1.0
Foreman	0.8
Lights	0.4
Total	42.0

To this sum the Union added a charge of 10 cents per box for labeling, storage, loading and handling.—Omak Chronicle.

Judge: "What is your occupation?" Hobo: "I used to be an organist." Judge: "A man of your talents come to this. Why did you give it up?" Hobo: "The monkey died."

## Plan to attend this AUCTION

of high grade furniture and household goods, on THURSDAY, MAY 8th when the entire household effects in the ten room residence of MRS. R. CLOUSTON will be disposed of. Full list with all particulars will be published soon.

## CORPORATION OF SUMMERLAND TRENCHING

Tenders are invited for digging and backfilling about 920 lineal feet of trench for 8" pipe to drain "Hilborn Lake." Profile specification and form of contract can be seen at the Municipal Office West Summerland. The lowest or any tender not necessarily accepted. Tenders, marked "Trenching," to be delivered to the undersigned by Saturday noon, 12th April 1924. F. J. NIXON Municipal Clerk. 1st April, 1924.

## WASHINGTON POOL PRICES

(Continued from Page 1)

all selling and Federation charges having been deducted. Just what the packing and handling charges are is not stated. Much of the Okanagan fruit is packed by the grower. Presumably the cost would not vary greatly from that at Yakima, which, according to the appended statement is 52 cents. We purposely omit the figure for paper, as it is very evident that there was a typographical error in the publishing of this statement, the cost for paper per box being given as over 25 cents.

### COST OF PACKING

The Yakima Horticultural Union reports its findings on the cost of packing a box of apples, as determined through all its houses as 42 cents per box for the 1923-24 season. The cost is divided as follows, according to O. K. Conant, president of the Union:

Box Shook	18.5
Making Box	1.0
Nails	0.6
Paper	0.6
Packing	5.5
Sorting	4.0
Lidding	0.8
Checking	0.3
Recording	0.5
Table Dumping	0.8
Placing packed boxes on	
Rollers	0.4
Trucking	0.4
Repairing	0.5
Extra Labor	1.0
Foreman	0.8
Lights	0.4
Total	42.0

To this sum the Union added a charge of 10 cents per box for labeling, storage, loading and handling.—Omak Chronicle.

## Okanagan Apple Pools Now Closed - Some f.o.b. Prices Are Announced

**Statement Made from Public Platform on Net Returns Growers Will Receive on Several Varieties—Central Now Distributing Money Among the Several Locals—Payment Will Soon Be Made to Orchardists—Results Described as Satisfactory by Comparison.**

Apple pools are being closed and resulting prices f.o.b. shipping point figured out by the staff of the Associated. Within a few days returns to the various locals will have been made and covered by cheques. The locals will then be in a position to make up their final returns to members and close the season's operations.

Prices of a number of the principal varieties were announced at the public meeting held here on Monday afternoon, G. A. Barrat, Kelowna director of the Associated, having received the figures from Vernon over the telephone that afternoon. The prices announced by Mr. Barrat and published below are those realized by the Associated and Mr. Barrat stated that approximately 65 cents should be deducted to get the net prices to growers. Fifty-five cents will cover the total charges on crates.

As was the case in the earlier returns, there are many discrepancies between the several grades in like varieties, in some cases C grade bringing more than Extra Fancy. This was the result of losses or low prices on superior quality fruit exported and many feel that the prices should have been adjusted by the Associated before publishing pool prices, so that the better apples would have netted the growers higher prices. However, Mr. Barrat announced that next season the Associated will arbitrarily scale the prices for the several grades in each variety.

Mr. Barrat also announced the receipt of a telegram from a Washington fruit centre giving the net returns on a few varieties: Jonathans, extra fancy, 40 cents; fancy, 25 cents; C grade, 5 cents; Delicious, average price 82 cents; Spitz, average, 29 cents; and from another Washington source he learned the average price on all grades ran between 50 and 55 cents. These, we understand, are the prices paid growers.

(Continued on Page 6)

### Dutch Looking to B. C.

The Minister of Lands has announced that a Dutch organization has offered to purchase 200,000 acres of land in the Stuart Lake district, British Columbia, for the purpose of colonization by Dutch agriculturists.

### Forests Promise Large Revenue

Victoria, B. C.—Three and a half million dollars, or nearly 20 per cent. of the whole revenue of the province, is the estimated direct gain from the timber resources of British Columbia during the coming fiscal year. Timber licenses are expected to produce \$1,250,000, royalties \$1,000,000, timber sales \$350,000, and timber leases \$100,000.

## LIGHTS KILLED BY PHEASANTS

By "Shorting" Current, Fuses Blown—Birds Sometimes Are Killed.

There was a brief interruption in the electric light service shortly after seven o'clock Sunday evening last caused by pheasants. T. P. Thornor, municipal electrician, says that these birds are giving a good deal of trouble, particularly in the vicinity of St. Stephen's church. In flying to roost in the tall trees along the creek during twilight a bird strikes one of the wires, throwing it over against another, causing a short circuit and the blowing of a fuse. Quite a number of birds have been electrocuted in this way. This week he has put in a section of covered wire, so that in that one particular point at least the trouble is not likely to occur again, although this is not the only place where they are shorting the circuit.

## WOULD EXCLUDE FRUIT FROM U.S.

Head of Nash Houses Advocates Embargo to Aid Apple Men.

That an embargo should be put on the importation of all evaporated fruits coming into Canada as a measure of relief to the fruit growers, and especially the apple growers of British Columbia, was the statement made at Winnipeg by J. Symington, head of the so-called Nash house in Canada and a director of the Mutual Brokers, Ltd., Minneapolis. Mr. Symington, who by the way is a Canadian who has worked himself up to his present important position, declares "if an embargo were placed on dried peaches, pears, prunes, nectarines and apricots, Canadian people would turn to apples grown in their own country and thus would save the apple growers of British Columbia, who for the past three years have been exporting to Great Britain and United States 1500 carloads of apples yearly, without getting any returns for them."

## GIRLS HEAR LECTURE ON NARCOTIC DRUGS

By invitation the Baptist C.G.I.T. group in charge of Miss Dale attended the regular meeting of St. Andrew's group at the manse on Friday when about twenty girls in all listened to a very interesting talk by Dr. F. W. Andrew on the narcotic drug evil. Dr. Andrew revealed many sides of the evil of narcotics, explaining its effects on the human system and at the same time telling how to avoid the dangers of this traffic so widely and craftily carried on at the present time, while on the other hand he told how, in some instances, the intelligent use of certain so-called drugs might be beneficial.

## CROWS AND MAGPIES BEING SHOT TODAY

In an effort to reduce the number of the crows and magpies in the district, the Penticton fish, game and forest protective association is holding a crow and magpie shoot this afternoon. Similar raids on these proyers upon game birds will be held later.

## AGAIN PUBLISHING AS WEEKLY PAPER

Beginning with its issue of last week, the Penticton Herald reverted to a weekly. For the past two years it has been publishing twice a week. The editor, R. J. McDougall has taken a position on the editorial staff of the Province and in the meantime the other members of the Herald staff are carrying on.

There is a perpetual Sabbath on the earth. The Greeks observe Monday, the Persians Tuesday, the Assyrians Wednesday, the Egyptians Thursday, the Turks Friday, the Jews Saturday, and Christians Sunday—sometimes.

## DISCUSSING SOFT FRUIT MATTERS

T. C. Macnabb, district superintendent of the C.P.R., Wm. Baskin, Penticton, R. Pollock, Summerland, and the traffic manager of the Associated Growers will meet tonight in Penticton to discuss matters pertaining to traffic referred to them by the soft fruit conference.

## OCCIDENTAL HEAD VISITOR HERE

Leo Hayes, of Kelowna, general manager of the Occidental Fruit Company, Limited, spent two or three days in Summerland this week and with the local manager, G. C. Benmore, conferred with a number of growers. Mr. Benmore states that it is the intention of his company to offer minimum guarantees.

## REDUCING PACKING COSTS AT KELOWNA

Arrangements are being made by the Kelowna Growers' Exchange, according to authentic reports, to reduce the labor cost on apples by two cents a box.

## Seeking Homes for Coast Orphans

"Kiwanis Big Brothers," of Vancouver, in a letter and circular to The Review, make an appeal for homes in the country for orphan and dependent children. Last year this organization placed ninety-four children in homes outside of Vancouver. Nelson A. Harkness is the executive secretary, his address being 509 Richards Street.

"If I could command the language of twenty nations, I would preach courtesy to them all, it is Alladin's lamp to success," said a prominent business man.

## BADLY HURT IN CAR ACCIDENT

Injured Man Left on Roadside While Other Occupant Went for Help.

W. Featherstonhaugh is in the hospital at Penticton as the result of a motor accident Saturday night.

Creighton Rines and his brother-in-law, Featherstonhaugh, motored down to Penticton that evening and on their return ran off the road about a mile north of the long bridge. The car rolled over twice, the driver being more fortunate than his companion. The latter was very badly bruised, his chest crushed and he was severely shaken generally. It is not yet definitely known whether or not some ribs are cracked. Reports yesterday were that Featherstonhaugh was improving.

His companion, after making him as comfortable as possible, ran all the way back to Penticton to get a car to take him to the hospital. Rines states that a Summerland car headed south, came along shortly after the accident and one of the occupants got out and went down to the Rines car. Rines asked this man to take Featherstonhaugh in to the hospital, the reply being that the car was not his but that he would pass on the request to the driver of the car. Upon his return to the car they drove off without offering assistance.

Before reaching the hospital Featherstonhaugh had become thoroughly chilled and for a time pneumonia was feared.

The editor of a Kansas weekly paper recently notified his correspondents that he wants news like his own—strictly fresh. "We prefer," he says, "not to publish a birth after a child is wanted, a marriage after the honeymoon is over, or the death of a man after his widow has married again."

Carrots and turnips that have become shrivelled need not be discarded. They will do nicely for flavoring soups and stews.

## M. G. WILSON HIT BY FIRE

Ranch Residence and Contents Completely Destroyed on Friday.

Fire on Friday afternoon last completely destroyed the large residence of M. G. Wilson on Paradise ranch, a short distance north of Chute Creek on the east side of the lake opposite Summerland. Mrs. Waterman, housekeeper for Mr. Wilson, had motored around from Summerland but a short time before. Arthur Smith and Gordon Southorne were the only other two persons on the ranch.

It is believed that a spark from the chimney lodged on the shingles and started the blaze and not until the fire was well established was it discovered and its progress and fierceness were terrifying. Scarcely a thing was saved. The building was a large wooden one, 64' and 32' of bungalow style with a half story above the main floor and finished with panels and beams and varnished throughout. In addition to the many personally treasured articles that were lost, was a large library of over 1400 volumes. A new wagon loaded with wood had just been drawn up to the back of the house and the horses removed. So rapid was the fire that it too was lost.

The fire was noticed from several points in Summerland and news telephoned to Mr. Wilson's office here. Quickly a number of men were gathered and rushed over on one of the ferry boats, but the building was a heap of ashes by the time they reached there. They were, however, instrumental in saving the warehouse on the wharf, which had just started to burn. Mr. Wilson was in Vancouver at the time and did not know of his loss until he arrived here Saturday morning.

The loss is placed at approximately ten thousand dollars, covered by insurance to about two-thirds of the value.

## OBITUARY.

### MARIA ELLISON

The death occurred at the Hospital on April 7th, of Maria Ellison in her 80th year. Since coming to Summerland over 3 years ago Mrs. Ellison has resided with her daughter, Mrs. E. Eckford. A short funeral service took place in the Methodist church on Tuesday, April 8th, Rev. H. J. Armitage officiating, following which the body was taken to Vancouver for burial.

## TROUT CREEK FARMER'S INSTITUTE

Grafting of fruit trees was the chief subject at the regular monthly meeting of the Trout Creek Farmers' Institute held at the Trout Creek school on Tuesday evening. The demonstrations were very ably carried out by J. C. Blacklock, whose experience in this work extends over a great many years. Branches of trees and sections were brought to the meeting and the numerous methods of inserting the scion were clearly demonstrated. The usual size of the scion recommended is three buds cut from the centre of a good healthy growth of last year. Different methods are suitable for different conditions. For instance, on a thick, heavy branch it is often advisable to employ the "inlay" method. Great care must be taken not to cut away too much of the tree, as the leaves of the tree provide food for the roots, and by cutting too heavily there is great danger of an injured root system. A grafting wax recommended by Mr. Blacklock is made up of the following ingredients: 4 parts rosin, 2 parts beeswax, 1 part tallow.

R. C. Palmer then took up the theory of this work and illustrated his remarks by actual grafts made in previous years. Stone fruits can be successfully grafted but as a general rule this is inadvisable. When grafting over a tree care should be taken not to put a vigorous tree on one of slow growth or vice versa. The meeting which proved most interesting and instructive, closed with a hearty vote of thanks to the speakers.

## EGG SHIPMENTS STEADILY GROW

More than three thousand dozen eggs were handled by the Summerland Poultry Produce Association during March. This means one hundred dozen a day, including Sundays. During the same month many members were packing eggs for home use later in the season. This means increased output.

## FINE NEW BARN AT EXPERIMENTAL FARM

There has recently been completed at the Farm a fine new horse barn, erected near the cattle building. It is a two-storey building, 32x63, with feed loft and will accommodate 30 horses in addition to two box stalls. The barn has been well built and nicely finished and painted cream with brown trimmings and green roof.

## NEW FARM PUMP IS WORKING WELL

Following a day's trial, the electrically driven pump recently installed at the Experimental Farm has been pronounced a success. Approximately 700 gallons a minute was lifted by the pump from the creek at a point just above the railway bridge crossing the canyon, to the tank above, from which all the irrigation used on the farm is distributed.

After being diverted from the creek, the water is passed through a tank for the purpose of allowing the sediment in the water to settle before it reaches the pump.

With this plant it is now possible for the Experimental Farm people to turn in water at an earlier date than that fixed by the municipality for beginning the regular irrigation season and, further, it will make available a greatly increased supply of water for a considerable portion of the season.

## DONATIONS BY CHORAL SOCIETY

Hospital and G.W.V.A. Given Cheques from Concert Receipts.

Summerland Choral Society has made generous donations from its funds to the hospital and the G.W.V.A. building fund.

For the following report of the decision of the society with respect to these and other recent activities we are indebted to the secretary.

A business meeting of the Choral Society was held in St. Andrew's Hall on Tuesday evening, with a good attendance. Mr. G. W. Cope, the president, being in the chair. The report and balance sheet submitted by the secretary, Mr. J. C. Barkwill, showed a balance in hand of nearly \$70 after meeting present liabilities. It was unanimously decided to donate \$30 of this to the hospital, \$20 to the G.W.V.A. building fund, and to carry forward the small balance for the operations of the society next year.

Mr. Cope pointed out that the society was in a somewhat unique position in that no entrance fee or subscriptions were charged members and it was generally recognized that it afforded really excellent recreation during the winter months with the minimum of expense.

Votes of thanks were passed to the board of the Baptist church for loan of piano and organ, to the ministers of the various churches for announcements, etc., to the Penticton choral for loan of music, to Mrs. D. L. Sutherland for her invaluable services as accompanist and of course to the founder and president of the society, Mr. Cope, for all the time and attention he had given during the past season.

It was decided to hold a social evening after Easter, the arrangements being in the hands of a small committee consisting of Messrs. Cope, Purves, Mossop, D. Lorne Sutherland and Mrs. J. W. Harris, Mrs. C. Schwann, Mrs. J. A. Read, and Mrs. Magnus Tait.

## Coast Business Men Give Their Views On Co-operative Marketing

**Brings Encouragement from Milk Producers' Organization and Promises of Support and Co-operation By Wholesalers and Retailers—Banks Will Assist if Growers Work as Unit—All Insist Failure to Support Associated Will Result in Disaster to Okanagan.**

Many arguments were advanced by experienced business men, each viewing the question from his own angle, for the continuing and strengthening of the co-operative fruit marketing movement, when several hundred fruit growers in Empire Hall faced a large delegation from the Vancouver Board of Trade and other well known citizens of the province in the opening meeting of another campaign.

A. T. Howe, president of the Associated, welcomed the visitors from the Coast, who, he said, came as friends and some of whom had given much help in the organization work a year ago. Through organization, the fruit growers have, for the first time, said Mr. Howe, been able to do away with a consignment market. This, he thought, was a wonderful accomplishment. In its one year of operation the organization has gained the confidence and the support of distributors. When fruit is consigned to the jobbers, they never know where they are at, but when they are required to purchase it at an f.o.b. price, they feel that the market is stabilized and they can proceed with confidence.

## WAS VETERAN OF GREAT WAR

Arthur Stokoe Removed from Hospital Here to Coast Passes Out.

Arthur Stokoe, a resident of Summerland for the past two winters, died on Sunday at Vancouver, according to a telegram received here from the chief of police of that city. Mr. Stokoe while here made his home with Mr. and Mrs. D. Thompson.

He came here in the fall of 1922 and was greatly improved in health by his stay here. Last summer he went to Elkhorn, Manitoba, his former home and returned last fall, again in poor health. Recently he has been in the Summerland hospital and was sent down to the military hospital last week. His trouble was due to injuries, while with the Canadian forces in France.

Mr. Stokoe came to Canada forty years ago when a lad of sixteen. His mother resides in Bedford, England. Friends here advised Vancouver police to have the S.C.R. arrange for burial in Vancouver, stating that he had ample funds in the bank here to meet all expenses.

Mr. Stokoe came from a good family in England, his father, now dead, having been a prominent physician.

## MORE PUBLICITY FOR ART LEAGUE

Jack Logie and the Log Cabin in Peach Orchard were the subjects of an interesting write-up in a recent number of the Vancouver Sunday Sun. Photographs of Mr. Logie and of the Log Cabin illustrated the article, which told of Mr. Logie's successful efforts to establish cottage industries through the Summerland branch of the Arts and Crafts League.

About a column and three-quarters were devoted to the illustrations and descriptions of the various lines of endeavor successfully launched by Mr. Logie and the League. The story was written by J. J. Atherton.

## NELSON IS IMPOSING HIGH SCHOOL FEES

Faced by heavy increases in school expenditures the trustees at the Nelson, B.C., schools have adopted the high school fee also. Local students will be required to pay ten dollars a year for the first three years and out of town pupils, fifty dollars per year. For the fourth year all pupils will be required to pay seventy-five dollars a year.

## WILL OPERATE THE CANNERIES

By United Action Tomato Growers Succeed in Getting Living Price.

Dominion Canners have reconsidered their decision and will operate their plant at Kelowna, according to an article appearing in the Kelowna Courier of last week. The company has consented to pay the arbitration price of seventeen dollars for Enlilanna and nineteen dollars for John Inor tomatoes. The Occidental cannery, it was pointed out, had right along agreed to pay the price and there had been no difficulty with this company.

Both canneries will now operate and each will contract for 225 acres of tomatoes. Growers will not be allowed to pick semi-ripened off the canning acreage. The outcome is declared to be a distinct victory for solid co-operation through the British Columbia Tomato Growers' Association.

# EDITORIAL AND FEATURE PAGE

## The Summerland Review

Established August, 1908.

Published at Summerland, B.C., every Thursday by THE REVIEW PUBLISHING COMPANY, LIMITED  
Ralph E. White, Editor and Manager

An independent family newspaper covering Peachland, Summerland and Naramata and adjacent districts.

Member of Canadian Weekly Newspapers Association.  
Member of British Columbia Selected Weeklies.

Subscription Rates—In British Empire, in advance, \$2.50 per year; six months, \$1.40. To U.S.A. and other countries, \$3.00 per year.

Advertising Rate Cards and information respecting territory and samples of paper mailed upon request, or may be seen at the office of any advertising agency recognized by the Canadian Press Association.

Advertisers must have copy in by Tuesday noon in order to insure changes for standing advertisements. New display advertising copy can be accepted one day later.

All instructions for cancellation or alteration of advertising must be in writing.

Correspondence—Letters addressed to the Editor and intended for publication must be short and legibly written on one side of the paper only. The longer an article, the shorter its chance of insertion. All communications must bear the name of the writer, not necessarily for publication. The publication or rejection of articles is a matter entirely in the discretion of the Editor. No responsibility is assumed by the paper for the opinions expressed by correspondents.

Typographical Errors—In the event of a typographical error, advertising goods at less than the proper price, the newspaper will furnish letters to be posted in the store stating the correct price, but goods may not be sold at the price printed and the difference charged to the newspaper.

Thursday, April 10, 1924

### FINANCING THE CROP.

Conclusion of arrangements whereby the crop for the coming season will be financed on a commodity basis, removes one of the serious handicaps to co-operative marketing and will be welcome news to many.

Last season the Associated was compelled to retain the money from the sale of earlier fruits to permit it to finance later crops.

Another phase of the financial situation is contained in the statement made by a well known banker to the effect that should the Associated collapse through lack of support, retailers in all the fruit districts would find their credit with the wholesalers very much curtailed and that the retail stores would practically all go on a cash basis or close up. Further, if such condition does develop, the banks will refuse, says our informant, to finance either the growers direct or through the shippers, believing that consignment conditions and chaos would follow should the Associated Growers of B. C., Limited, fail to function.

### LOYALTY TO HOME BUSINESS.

Many times we have called attention to the wisdom of patronizing Summerland merchants. There are many people in this territory who send away to mail order houses for many of their purchases. They do this in the belief that better bargains are offered them by the distant business places, and that they can make a better deal. But this is a mistaken idea, and, were it true, it would yet be outweighed many times by other considerations. This community would be quite sufficient for itself and far more prosperous if the money that is made here were also spent here. But the mail order houses get a good share of it. In sending this money away the mail order house customer fails to take into consideration many matters that rightly hold a claim upon his attention.

The home merchant is your neighbor and your friend. He is in touch with your affairs and concerned about your success. He bears his part in building the community and the advantages it offers. He pays taxes to keep going schools, government and provide improvements. He contributes liberally to churches and a hundred activities of one kind and another that help to make the community a better place in which to live.

Within the past year numerous demands have been made for contributions for various purposes. Always it is the business and professional people of Summerland who must bear the big load in these drives. And they do not shirk these demands. We have failed to learn of a single instance where a request was made upon a mail order house for contribution. And if it had been made the request would have been ignored. And yet there are mail order houses that receive more money out of this community each year than do many local business houses.

The former pay no taxes, they build no schools or churches, they build or maintain no streets, they add nothing to the progress or the life of this community.

This matter was brought forcibly to our attention the other day when somebody stated to us he had just mailed \$40. to a distant house for an order of goods. He could have bought these goods from any one of several places in Summerland, and just as cheaply. He would have had the further privilege of inspecting them before buying and taking them with him that day. Yet he sent his money away. This case becomes more subject to criticism in face of the fact that this particular individual is carried on the books of at least two local business houses for some hundreds of dollars. When credit must be extended, the home merchant is asked to carry the load, and when cash can be paid the mail order house gets it. That attitude is all wrong. The progress and the development of Summerland lies in the hands of the people now living here.

Loyalty to this community in all matters is a primary requirement for its progress. One way in which to give expression to that loyalty is by spending our money at home with Summerland business establishments.

### ROADS INVESTMENT PROFITABLE

More than sixty million dollars have been invested by the province of Quebec in development of highways. But little more than a decade ago Quebec had the unenviable reputation of

having the worst roads in Canada. Such an increase in tourist traffic has followed this highway development, which covers the province, that one hundred and thirty American cars visited Quebec last year, and the deputy minister of roads says: "If commercial activities created by autotraffic alone are taken into account, and if we consider the amount of money spent here by foreign tourists, we find that our roads policy is one of large returns for the Province as a whole, as well as for each municipality and individual."

### THE COUNTRY PRESS

"Running a country newspaper is not all cream and honey," says The Cranbrook Courier. The Kamloops Standard-Sentinel, after conducting a semi-weekly for years, is being issued as a weekly.

"The Standard-Sentinel has had one of the greatest struggles of its journalistic career to keep afloat, despite the fact that it has at its head one of the most capable editorial and news writers in the province in the person of Mr. J. J. Kerr.

"There are few towns in the country that can support two papers and the time is fast approaching when towns of five thousand and less will have but one paper." — Cowichan Leader.

### HIGH SCHOOL ISSUES THEIR SECOND PAPER

Summerland high school students have just issued the second volume of their monthly publication, "The High School Tonic," which contains several interesting and newsy articles on various phases of school life. This periodical record of student activities, both educational and

in their sport life, is a very neat edition which reflects much credit on the editorial staff.

"My friend," remarked the physician, "you are suffering from a chronic complaint."

"I know it, doc, but please lower your voice," cautioned the patient. "She's in the next room."—Legion Weekly.

## Recommendations for Advancement of Canada's Growing Fruit Industry

### Canadian Horticultural Council in Annual Meeting At Ottawa.

### Okanagan Represented by Mr. Thos. Bulman of the Associated.

Many phases of the fruit growing industry were covered by resolutions adopted at the last annual meeting of the Canadian Horticultural Council held at Ottawa. A very full report of this meeting has been received from Thos. Bulman, who attended the meeting. A summary of the resolutions of particular interest to the Okanagan is given here.

**Minimum Size for Canned Apples.** Amendment of the Fruit Act urged so as to limit the size of apples permitted to be sold in crates to 2 1/2 inches for summer apples and 2 1/2 inches for Duchess or later varieties.

**Abolition of Combination Grade.** On the ground that the combination grades for box apples, as provided in the Fruit Act, have not proven satisfactory either to growers or dealers, the Council advocated amendment of the Act so as to eliminate all combination grades.

**Proper Naming of Fruit Varieties.** Owing to the confusion caused by the different names given to the same varieties of fruit, especially cherries, plums and pears, the Dominion Fruit Branch was requested to secure and recommend standard descriptions of standard fruits for supply to all inspectors and packing houses.

**Removal of Duty on Materials.** In view of the present high cost of production together with the depressed state of the horticultural industry, the Dominion Government was urged to remove the duty on oils to be used as an insecticide having a Roaume gravity of 10 or heavier, also on nicotine dust, black leaf 40, acid phosphate, basic slag, flower and vegetable seeds and fruit and vegetable grading machinery.

**Dumping Duty.** Products of the soil being frequently offered from foreign countries at prices which are considerably less than cost of production, the Minister of Finance was requested to bring in an amendment to the Customs Act at this session of Parliament making inapplicable to natural products that portion of Clause 6 reading: "Provided that the said special duty shall not exceed fifteen per cent ad valorem in any case."

**Luxury Tax.** Reports having been received by the Council from all part of the Dominion indicating that farmers, especially those engaged in supplying vegetables during the winter, spring and early summer months are gradually being driven out of business by the importation of cheap, field-grown products of the semi-tropical parts of the United States, the Council expressed the belief that those who are

in such a financial position as to be able to encourage this condition should make compensation, in so far as possible, for the resultant loss of Canada, and therefore resolved to petition the Minister of Finance to impose a 10 per cent tax, in addition to the present taxes, on fruit and vegetable imports of a kind produced in Canada but which are a luxury in the seasons during which Canadian fruit and vegetable growers find competition impossible.

**National Advertising.** The per capita consumption of Canadian fruits and vegetables being considerably less than what it should be, the Council decided to take under consideration the advisability of undertaking a national advertising scheme, to improve the home market.

**Abolition of Sales Tax.** Owing to the heavy losses maintained during the past two years by farmers and fruit growers, and the fact that the imposition of the sales tax is reducing the sale of all kinds of fruits and vegetables to canneries, jam factories and pickling works, the Department of Finance was asked to cancel the existing legislation permitting the imposition of sales tax on jams, jellies, pickles and canned goods of domestic production, and on spray material and machinery.

**Inspection Service.** It having been found of great benefit to have a government certificate of inspection attached to all cars whose such shipping point inspection is in operation, the Dominion Government was urged to provide for the inspection of fruit and vegetables at landing point, on the request of buyer or shipper, and for the issuance of certificates of inspection for such produce.

**Dehydration and By-products.** Pointing out that there is a large market for dried or dehydrated fruit and vegetable by-products in Canada and abroad, that every available market for fruit and vegetables is required, and that the economical dehydrating of fruit and vegetables so as to retain their flavor is not yet well understood by horticulturists, the Council expressed appreciation of what has already been undertaken by the Dominion Department of Agriculture in experiments and demonstrations in dehydrating fruit, also its regret that the experimental work along these lines at Pontleton had been interrupted by destruction of the plant there by fire, and asked that the works be further prosecuted as speedily and thoroughly as possible. The Government was also requested to undertake investigation of the best methods of utilizing low grade fruit surplus to fresh fruit market requirements and the by-products thereof.

**Export Fruit Markets.** While expressing keen satisfaction with the work being carried on by Mr. J. Forsythe Smith, Canadian Fruit Trade Commissioner in Great

Britain, the Council drew attention to the fact that the returns from the Canadian exports of fruit to the Old Land have been so disastrous that export cannot be continued unless there is a great improvement, and therefore resolved to petition the Dominion Department of Agriculture to request the Agricultural Agent and Fruit Trade Commissioner to co-operate, if feasible, with a representative from Australia and from any Canadian fruit shipping district to carry out further investigation, with a view to submission of a comprehensive report on the present fruit marketing arrangements in Great Britain and elsewhere.

**Guaranteed Analysis for Sprays.** Legislation by the Dominion Government was asked for which will require that all spray and dusting materials be sold in Canada under a guaranteed analysis.

**Change of Jurisdiction.** At present, the administration of all matters concerning the jam, canned fruit and vegetable industries is very inappropriately placed under the Veterinary Director-General. The Council took the view that these industries could be made of considerably more benefit to fruit and vegetable growers if under a branch of the Department of Agriculture more naturally in sympathy, and the Department was therefore asked to transfer their supervision from the Veterinary Director-General to the Fruit Branch.

**The Sale of Chemical Vinegar.** As the sale of pure vinegar is being greatly curtailed by the use of vinegar containing chemically made acetic acid, the Council requested the passage of federal legislation prohibiting the sale of such vinegar.

**Diseases of Vegetables.** As onions, tomatoes and potatoes are suffering from the ravages of certain insects and diseases, and there is insufficient knowledge at present available as to varieties suitable for various districts and climates, the Council requested the Experimental Farms to extend their experiments to cover such crops, their culture, storage and varieties.

## AGED CITIZEN HAILED TO COURT

### Peachland W. C. T. U. Holds Happy Social Function—Other Happenings.

Mr. Seth Davidson was summoned to appear before Police Magistrate Thos. Powell at 3 p.m. Saturday last on a charge of killing two hens, the property of Mr. D. Frigo, by shooting on the 22nd day of March. At the time called Mr. Davidson did not appear, consequently the magistrate issued a warrant for his apprehension. Upon Constable Crook's going to Mr. Davidson's house for the purpose of arresting him the doors and windows were all found to be securely fastened from the inside. Constable Crooks called to Mr. Davidson whom he saw through the window, to unfasten the door. Mr. Davidson took no notice of the request and went up stairs. Not wishing to act harshly toward Mr. Davidson, who is an old man, Constable Crooks left the place, intending to wait a favorable opportunity for making the arrest. On Sunday the 6th of April, Mr. Davidson surrendered himself to Constable Crooks and the original charge of chicken killing was disposed of the following day the magistrate finding the defendant guilty and imposing a fine of \$25 and costs totalling in all \$31.25. The charge was then preferred against Mr. Davidson of willfully obstructing Constable Crooks whilst in the execution of his duty. Defendant stated that the constable did not try to break his way in, apparently implying that this was what he expected. Magistrate Powell tried to impress on the defendant the seriousness of the offense committed and stated that he could not allow the law to be set at defiance with impunity. He therefore, in consideration of his great age, imposed a fine of only \$35 and costs or one month hard labor in default. Defendant was given a week in which to decide which alternative he would accept.

Mr. Gilbert Thornber of Summerland preached in the Baptist church on Sunday afternoon last and expects to conduct service on the following Sunday evening. He was accompanied by his wife and some boy friends.

The Rev. H. A. Solly of Summer-

land conducted the regular service in St. Margaret's Anglican church here on Sunday afternoon.

The Rev. T. A. Sadler conducted the regular afternoon service at Westbank on Sunday afternoon.

The home of Mr. and Mrs. Bulyea was the scene on Friday evening of a splendid social gathering under the auspices of the W.C.T.U. There were forty-three present. Mr. Bulyea in a few well chosen remarks referred to the work of the organization and stated that he liked very much the idea of the local branch in getting the citizens together in this way. He believed it would be better for the community and for the work the organization stands for if there were more such gatherings. On behalf of Mrs. Bulyea he assured the citizens of a warm welcome at their home and hoped it would not be the last one of such gatherings. After a quartette by Mrs. Bulyea, Mrs. McCall, Mr. Keyes and Mr. McCall, Reeve G. Lang spoke encouragingly of the work of the organization and stated emphatically that they should receive the support of every good citizen because they were doing a very important work. This and other organizations working toward the same end were doing their best to make this country of ours a cleaner and a better place to live in. He spoke in no uncertain terms of the deplorable state of affairs at the present time with regard to liquor law administration and emphasized the great need for improvement along these lines. Miss Ruth Brinson, a silver medalist, favored the company with a recitation and Mrs. J. L. Elliott rendered the verse of a well known song and all joined in the chorus. The Rev. T. A. Sadler gave a short and pleasing address, bearing principally on the economic phase of the temperance question. Although Mr. Sadler brought in many anecdotes which caused a good deal of mirth, he brought out many very important facts. Among other things he showed the very foolish and extreme waste throughout the country of thousands of dollars spent on that which only inebriates and does not satisfy. He furnished figures of the immense expenditure of money through the liquor stores in our own valley where people and merchants are having such struggles to get on during these trying times, and went on to show that the insignificant sum the communities got in return for this expenditure was a mere pittance. Miss Murdin pleaded the audience with a recitation suitable to the occasion. The new song, "The Old Okanagan," was introduced and sung several times by the company, Mrs. Bulyea officiating at the piano. Dainty refreshments were served by the hostesses. During this

time the ladies received some new members and also received some honorary members from among the men folk present, which gave quite an impetus to their organization. It is expected that the W.C.T.U. convention would be held in Peachland some time in May.

Mr. W. Dryden addressed a meeting of growers at Westbank on Friday on Associated business.

Mrs. Schultz, Mrs. Baptist and Miss McEwen were visitors to Kelowna on Saturday. Mrs. Schultz brought her niece, Mrs. Hyde, back with her from the hospital there, where she had been for a short time following a minor operation. We are glad to be able to report that Mrs. Hyde is improving nicely since her arrival home.

Miss Grieve, who has been assisting as nurse with Miss McDonald, left on Saturday morning's boat.

Mrs. Vicary of Summerland paid a short visit to friends in Peachland, arriving on the Saturday morning boat.

G. A. Barrat, campaign manager for the Associated Growers, was in town for a short time this week.

The Misses Jean Dryden and Flossie Clements and Mr. Moffat of Vernon spent last Sunday in Peachland.

Mr. Brown, of Vancouver, representing the B.C. Fire Underwriters, was in town recently checking up particulars relative to insurance rates.

Provincial Constable Pentecost, Kelowna, spent a day of last week in town. He attended to requirements for 1924 auto licenses, and arranged for the turning loose of a shipment of pheasants which he had obtained for this district.

Friends of Mrs. Lambly were very sorry to learn of her recent bereavement through the death of her father, Mr. DeBeck, of Penticton, on Friday evening last. He had been suffering a severe illness for some weeks during which time Mrs. Lambly visited him frequently.

Westbank school girls basket ball team played a game with the Peachland girls on Saturday. It was a good, clean and interesting game. Westbank proved too much for the local girls, the final score being 16 to 8 but the local girls were good sports and showed themselves to be good losers. After this game some of the boys got busy and chose a couple of teams, Westbank and Peachland, and staged a fast and furious game. It was lots of fun for the spectators and warm work for the players. For the first part of the play Westbank had the best of it, but toward the end the Peachland boys got their bearings, found the basket quite frequently and the score ended in their favor 17 to 13. There is likely to be a ball game here next Saturday between Westbank and Peachland junior teams.

**SYNOPSIS OF LAND ACT AMENDMENTS**  
**PRE-EMPTIONS**  
Vacant, unreserved, surveyed Crown lands may be pre-empted by British subjects over 18 years of age, and by aliens on declaring intention to become British subjects, conditional upon residence, occupation, and improvement for agricultural purposes.  
Full information concerning regulations regarding pre-emptions is given in Bulletin No. 1, Land Series, "How to Pre-empt Land," copies of which can be obtained free of charge by addressing the Department of Lands, Victoria, B.C., or to any Government Agent.  
Records will be granted covering only land suitable for agricultural purposes, and which is not timberland, i.e., carrying over 5,000 board feet per acre west of the Coast Range, and 8,000 feet per acre east of that Range.  
Applications for pre-emptions are to be addressed to the Land Commissioner of the Land Recording Division, in which the land applied for is situated, and are made on printed forms, copies of which can be obtained from the Land Commissioner.  
Pre-emptions must be occupied for five years and improvements made to value of \$10 per acre, including clearing and cultivating at least five acres, before a Crown Grant can be received.  
For more detailed information see the Bulletin "How to Pre-empt Land."  
**PURCHASE**  
Applications are received for purchase of vacant and unreserved Crown lands, not being timberland, for agricultural purposes, at the price of first-class (arable) land is \$5 per acre, and second-class (grazing) land \$2.50 per acre. Further information regarding purchase or lease of Crown lands is given in Bulletin No. 10, Land Series, "Purchase and Lease of Crown Lands."  
Mill, factory, or industrial sites on timber land, not exceeding 40 acres, may be purchased or leased, the conditions including payment of stampage.  
**HOMESITE LEASES**  
Unsurveyed areas, not exceeding 20 acres, may be leased as homesites, conditional upon a dwelling being erected in the first year, title being obtainable after residence and improvement conditions are fulfilled and land has been surveyed.  
**LEASES**  
For grazing and industrial purposes areas not exceeding 640 acres may be leased by one person or a company.  
**GRAZING**  
Under the Grazing Act the Province is divided into grazing districts and the range administered under a Grazing Commission. Annual grazing permits are issued based on numbers ranged, priority being given to established owners. Stock-owners may form associations for range management. Free or partially free permits are available for hunters, campers and travellers, up to ten head.

# Coast Business Men Give Their Views On Co-operative Marketing

**Brings Encouragement from Milk Producers' Organization and Promises of Support and Co-operation By Wholesalers and Retailers — Banks Will Assist if Growers Work as Unit—All Insist Failure to Support Associated Will Result in Disaster to Okanagan.**

(Continued from Page 1)  
Mr. Howe declared that the failure of the growers to fully co-operate last year had cost the Valley at least a quarter of a million dollars in the five, ten and twenty-five cents per box lower prices than otherwise would have been received.

D. McNair, who is said to be slated for the position of sales manager, made a very favorable impression. He spoke as a former independent shipper and one who had no animosity to any independent house.

He declared the situation a peculiar one. The buying power of the prairies last year was at a low ebb. B. C. had a seventy-five cents handicap on fruit exported to United Kingdom as compared with Ontario. Railway statistics showed that the Associated had handled 76 per cent. of the crop and the independents 24 per cent. The latter would tell of better prices and of the delayed settlement of the Associated. Trying to market our apple crop at home was like one trying to put a quart of water in a pint bottle and he declared that the independents did not take their due share of the overflow—their percentage of export business, and he quoted a number of figures showing the relative proportions of export sales. The Associated, he declared, got a larger share of the prairie business, although the independents were cutting from five to twenty-five cents a box.

He did not agree with the statement that too many apples were being produced. Our home markets have not been able to buy nearly the quantity they would under normal conditions, but there are, he said, too many varieties, 153 being handled by the Associated last year. The independents select the orchards that will give them the varieties they desire; to the Associated is left the off varieties. Of the entire crop only 16 per cent are late keepers; 84 per cent had to be marketed before December first. The demands of the trade are for standard varieties and if we cannot fill their orders, they will go across the line. The off varieties are killing the price of the better stock and Mr. McNair urged that this situation be remedied.

In support of his statement that there was no actual over-production, he quoted statistics showing a steady falling off in production of apples from 1920 to 1923, there being a very material depreciation in that time.

Mr. McNair declared that co-operation has not yet been tried out in the Okanagan Valley. The same scheme was propounded by Mr. Robertson in 1913 and the O.U.G. had done as well as could be done with the proportion of the crop it handled. Only because the growers are broke have they got together again, but as soon as they did they began to mill around to break loose.

The speaker ridiculed the high salary argument of their opponents and declared that total salaries of the several independents amounted to much heavier charge than the salaries of the Associated.

Too many handicaps were put on the co-operative movement. There were too many "general managers" in the valley who knew how to run the business. The best man in the world could not do any better than has been done unless the organization has control. "When you elect a representative," advised Mr. McNair, "elect a fruit grower with common sense, one who is vitally concerned in the welfare of the industry."

Co-operation in the Fraser Valley among the milk producers, proved a very interesting illustration of what may be accomplished, as it was handled by W. L. Macken, head of the milk producers' organization and chairman of the Associated Boards of Trade.

Mr. Macken declared that British Columbia is beginning to realize the necessity of production of a new wealth. "We have been living too long on bond flotations and sending too much of our money out of the province," he said. Okanagan growers have produced wealth but have not been able to convert it into the medium of exchange.

He could fully sympathize with the growers and from his experience he declared that as far as farm market-

ing was concerned, the only sound plan was co-operation.

There was no occasion for discouragement. "You are suffering from growing pains," said Mr. Macken. "Not a single co-operative marketing organization has succeeded without such experience and it is indicative of sound growth."

He described the growers as manufacturers in a small way; therefore not able to control their market. Co-operative marketing has lifted out of the slough of despond many lines of farming. The Fraser Valley Milk Producers' Association now controls 90% of the local production and the speaker was confident that if the growers of the Okanagan will stand with the Associated they will be equally successful. The independents, he said, are not interested in the prosperity of the growers but in their own success.

Mr. Macken declared there was only one enemy of co-operative marketing and that enemy works from the inside and the outside. It is the dominating sin of mankind—selfishness. Why tolerate, he asked, the conditions of the past instead of putting co-operation over after the wonderful start which has been made. "We now have the advantage of the knowledge and experience gained elsewhere and Mr. Macken declared that the publicity obtained by the Okanagan through this movement was worth hundreds of thousands of dollars to the growers. They should capitalize the start given the movement twelve months ago.

Mr. Macken told of the ups and downs of the co-operative movement among the milk producers, of the murmurings and fault findings. "Stop knocking," he admonished. All over this continent co-operative marketing, wherever it has been tried, has put the farmer on his feet. "Co-operative marketing must not be made a vehicle for marketing all your refuse." Produce what the market demands and make the organization so perfect that it will efficiently carry your produce across to the consumer. When the growers are in absolute control of their own produce they will not have to sell in the foreign market." Co-operation, declared the speaker, would take "self" out of selfishness and put the "co" in control. It is the "do unto others" as had been propounded 1000 years ago and, lived up to, it will mean success.

W. J. Parks, president and general manager of the milk producers' association, spoke from his long experience as a farmer, from the producers' viewpoint. He told of the strenuous times through which the Fraser Valley farmers had passed, how they

had faced nearly certain ruin after years of hard work and, finally, of their winning out through organizing into one big company, an organization of which they are proud and in which they have an investment of over half a million dollars, all owned by milk shippers, and Mr. Parks expressed the opinion that unless fruit growers can become a unit in marketing, they might just as well quit.

Removal of co-operation from the Fraser would be disastrous. Only by regulating the supply with the demand are they able to continue and only by putting the fruit through one channel can our growers succeed. "You must boost the organization. It is yours. You are a part owner. Push with that feeling and there will be no chance of failure."

A Brencley is the general manager of F. R. Stewart & Co., Ltd., one of the largest and best known wholesale fruit houses on the Coast. He admitted that he never attempted public speaking but felt that the crisis was so serious that he would not be doing his duty if he did not accept the invitation to give the wholesalers' views on the subject.

If co-operation failed it would be a serious blow to the industry. Mr. Brencley added, "If you knew what is in my heart after the experience of twenty-nine years, you would control your commodity right down to the consumer. In early days supply was below demand but today it is a different problem. You have a heavy investment and if you do not think enough of it to see that your commodity is duly merchandised, it is you who will suffer."

There were some merchants, he continued, who would like to see things up side down with a consignment market, but most merchants prefer the stabilized market and will do what they can to help the growers maintain a stable market. "If you don't co-operate, then you will lose the privilege of control and the opportunity to become prosperous. Co-operation is the only way to prevent a consignment market and competition. If you are not conservative enough of your own best interests, we can't help you."

Mr. Brencley said he knew something of the serious problems of the growers, one of them the surplus of early apples and only through 100 per cent co-operation can these be handled.

Vancouver never had as satisfactory a season as with the controlled

market of last year. Mr. Brencley further declared that if Okanagan growers compared their prices with those realized by Wenatchee, they would be well pleased, and he assured his hearers that the Vancouver wholesalers were willing to co-operate with the growers as to reserving the Coast markets for them and he briefly referred to the misunderstanding of last year with respect to stone fruits, particularly prunes, when many Washington prunes were brought in. He hoped the growers would realize that it is in their own best interests to stand together 100 per cent strong. If so they will meet with splendid success and we will soon have a prosperous valley.

W. J. Blake-Wilson, general manager for P. Burns and Company, described co-operation as true fellowship—the treating of the other fellow as you would have him treat you. Co-operation had sold a thousand more cars of fruit on the prairies in spite of really hard times. He believed the worst was over and that larger sales and better prices will follow.

"The Okanagan is the finest place in Canada in which to live," declared the speaker, "but people cannot live on scenery and mountain air. Get together as the Fraser milk producers have and soon you will have accomplished something well worth while."

These speakers had been introduced by W. C. Kelley, chairman, but Mr. Howe asked the privilege of introducing Mr. A. Melville Dollar and in doing so he referred briefly to the great help Mr. Dollar had been as a director of the Associated.

Mr. Dollar spoke but briefly and referred to the many complaints of mismanagement, extravagance, etc., and complimented the growers on the wonderful success obtained in their first year and apparently gave little credence to the damaging reports. He found, in talking with business men that they all had the one idea of one selling organization for the handling of British Columbia fruit.

Mr. Dollar read a letter from the Retail Merchants' Association at Vancouver, in which that organization expressed willingness to plan with the growers and wholesalers for a better distribution of the fruit. The merchants' association believed it better to have only one marketing organization.

Water Street says the situation was never as satisfactory; we have (Continued on Page 6)

**CORPORATION OF SUMMERLAND TRENCHING**  
Tenders are invited for digging and backfilling about 920 lineal feet of trench for 6" pipe to drain "Hilborn Lake."  
Profile specification and form of contract can be seen at the Municipal Office West Summerland.  
The lowest or any tender not necessarily accepted.  
Tenders, marked "Trenching," to be delivered to the undersigned by Saturday noon, 12th April 1924.  
F. J. NIXON  
Municipal Clerk.  
1st April, 1924.

This was the caption of an announcement a week or two ago, referring to the investigation begun into the rights and wrongs of the conditions leading to the recent transport strike in Britain. So far as it indicated an attempt at the settlement which has since been made there is nothing in it to complain about, but the mystery which must necessarily arise in most minds centres on the lack of foresight shown by leaving the enquiry until the strike was actually begun, and bringing about the inevitable compromise before the public had been put to loss and inconvenience and the traffic of the country dislocated. If a settlement was possible a week after the strike had been in progress, why in the name of common sense could it not have been arrived at a week before? Every one concerned knew the grounds of argument on both sides, and it seems absolutely ridiculous that the dispute could not be arranged without the friction and waste of a strike.

Human nature apparently is permeated with a sort of unreasonable obstinacy which seems to give way to calm reason, however beneficial that would be to its own interests. Needless strikes perhaps afford the most persistent series of examples in modern times, and close on their heels in the quality of folly come trade disputes such as the one lately in evidence among the grain interest in Vancouver. The action of the Harbour Board in arbitrarily suspending certain long standing rules of the Canada Grain Commission, and bringing about a prompt stoppage of business, was a miracle of trade stupidity, only equalled by the naive statement that it was never for a moment conceived "that the commission would act as it did." The Grain Commissioners took the proper course under such open defiance of existing rules, and the members of the Harbour Board have none but themselves to blame for any loss their clients may have sustained. If the registration rules in force can with advantage be modified, that modification should be sought by legitimate means and not by such proceedings as those attempted. As a matter of fact, the same spirit which is responsible for ninety per cent of the labour strikes, was glaringly apparent in this case, aggravated by the fact that an existing law was flatly defied by men who should have known better.

The suggestion of Mr. W. A. Macdonald that the Native Sons of Canada will do well to shorten their title by omitting the first word is one of the best propositions yet made in connection with that organization. By so doing the members will lift themselves from the realm of parochial bodies and enter the area of national societies. It is surprising that the leaders of this organization have not earlier seen the fundamental objections to the title as it now stands, and the fallacies which are inseparable from it. Every naturalized citizen in the Dominion is a Son of Canada, and the narrow view which seems to arrogate a certain preeminence to Native born Canadians is both illogical and offensive. The present title actually forbids membership to the great majority of Canadians who fought in the great war, and that fact alone condemns it. "One of our objects," says Mr. Macdonald, "is to remove racial and provincial differences—why then erect new barriers by fencing off those who can boast of native birth? Such a policy creates needless resentment."

It may be hoped that the organization will take to heart this opinion of one of its founders, and that we shall be able to note a broader tone in its future pronouncements.

According to the gist of argument in the booklet lately issued under this title by the Canadian Bankers' Association, it is not THE BANK as easy to secure the deposits of the public as some people imagine. After pointing out the fact that, under the safeguards contained in the new Bank Act, such a ghastly failure as that of the Home Bank would have been practically impossible, this pamphlet goes on to give some particulars of guarantee schemes tried out—and abandoned—in some of the States to the south of us, and to show why they failed.

**"A Snapper Up of  
Unconsidered Trifles."**  
\* \* \* \* \*  
The Winter's Tale,  
Scene II, Act IV

The State of Oklahoma was the pioneer in such systems, passing a guarantee act in its first legislative session within four weeks of its assembling, and just one month and one day after the state itself came into being. This was late in 1907, during the well remembered panic of that period. The law went into force on February 14th, 1908, and continued in operation until 1922, when it was repealed unconditionally, having been found to be a too expensive luxury. During the first twelve years of its existence, fifty seven banks failed, and the losses to the honest bankers and the trusting depositors totalled \$15,000,000, of which sum \$10,000,000 is still unpaid. The State of Washington enacted a similar law in 1917, but gave it up in 1921, following the failure of the Scandinavian-American Bank, with a loss of over \$10,000,000 in deposits.

These details afford cold comfort to those who look to parliament to evolve some legislation which will provide an absolute guarantee against loss by depositors. The reason given for the failure of the American attempts is that the guarantee seemed to create a feeling of carelessness and a sense of false security in the minds of some of the bank officials, and a certain recklessness was the result. In one case the manager simply used the surplus deposits to swing personal speculations of his own, and here we see indicated a contributory negligence of auditing.

The contentions of the booklet now under review is that the guarantee system is unjust in that it requires the good to carry the bad without giving any sort of control—that it differs completely from ordinary insurance, in which the insured pays for his own protection—that it has been tried and found wanting,—and that it is based on wrong principles. The problem which seems now to confront the Ottawa parliament is whether a practicable insurance scheme can be devised to meet the demand for public security without breaking through established business laws.

A commercial gentleman, speaking to an assembly of business men in Vancouver, informed his audience that the oration of "TO WHAT MARK ANTONY OVER BASE USES—!" the body of Julius Caesar was a fine specimen of "sales talk," and commended it to them as "one of the greatest instances of salesmanship the world has ever known." He also illustrated his points of "the approach, the making and completion of a sale" from the Roman orator's speech, and thus established a notable precedent in the treatment of our great poets. Salesmen handling drugs, for example, might find good material in the deaths of Romeo and Juliet, vendors of incubators could use Macduff's burst of grief, "What all my pretty chickens, at one fell swoop!" and so on, according to taste. They must, however, be careful not to follow Mark Antony in one respect. In the opinion of the cultured person addressing his Vancouver audience, the great Roman lacked sincerity, which is essential to success in salesmanship. It seems altogether too bad that Shakespeare failed to inject into the famous oration the one quality which a salesman must have, but there is a possible explanation of the oversight in the fact that he did not intend to portray Mark Antony as a model commercial traveller!

**NOW OUT AND OUT FOR CO-OPERATION**  
Editor Review.  
Dear Sir,—I want the people to know that I am out and out for co-operation and I say come on boys one and all and make the business go. From now on let us stand as one man for our valley and our homes and for each other. Let us throw aside criticism and selfishness and acquit ourselves like men and we shall grow strong. Yours for our common weal.  
H. H. ELSEY.

**IS READY TO DEAL WITH ASSOCIATED**

**B. McDonald Says Co-operation Necessary—May Sell Through Co-operative.**  
B. McDonald, late sales manager of the Associated Growers, who with some associates recently purchased the K. L. O. ranch at Kelowna, is ready to deal with the Associated with respect to marketing the crop of that ranch, according to an interview published by a Valley paper last week. Mr. McDonald is reported to have stated, "We are not at all averse to working with or in the Associated. For myself, I certainly believe that some form of co-operation of all interests in the sale of British Columbia's fruit crop is necessary." He made it clear that there would be every desire on the part of the new owners of the K.L.O. to work with the Associated, either by selling through the organization and paying the regular Central commission or by some other arrangement in connection with marketing.

**CHAMBERS HEADS HOLDING COMPANY**

E. J. Chambers, recently elected by the Penticton local to the directorate of the Associated Growers, has been appointed by that body manager of the central holding company. Mr. Chambers has just returned from Vancouver where he attended to various legal matters in connection with the company's affairs. The position given Mr. Chambers does not carry any salary other than the remuneration allowed members of the advisory committee of the Associated during the time members are actually engaged in the company's business. J. J. Campbell of Willow Point, Kootenay district, held the position for a short time, but relinquished it in order that one more centrally located might take up the work. Last year the position was held by Thos. Bulman.

**PAPER ON IRRIGATION AGAIN PUBLISHED**

"The Story of Irrigation," the excellent paper given by J. A. Kirk before the Trout Creek Farmers' Institute at its February meeting and which was published in full by The Review, has been reprinted by the Agricultural Journal, a monthly publication issued by the Department of Agriculture, Victoria, B. C.

**DOG LAKE TREES SUFFERED BADLY**

It is now apparent that more trees than those actually felled at the head of Dog Lake during the gale suffered by the storm. Thirty-eight or forty trees were brought down at that time. Later reports are that a number of others whose roots were loosened or which otherwise suffered have since fallen.

Many a bad egg is married by a girl because she doesn't like to drop it.

**AIMS TO DRIVE DOWN THE PRICE OF BOX SHOOK**

Marvellous is the intelligence of the modern linotype machine. Many a person who has seen the Model 14 in the Review office in action has pronounced it almost human. During the past year or two it has told a good many hard luck stories of our fruit industry and apparently it has been sympathetic. Last week on its own initiative, and probably with a purpose, it announced the fact that our fruit growers would pay 14 1/2 cents for apple box shook and perhaps they will, but for the present the price is 17 1/2 cents. The slipping in of one single wrong mat in the whole story effected the difference, making the price, as announced on the front page of The Review last week, 14 1/2 cents instead of 17 1/2 as quoted by the box makers' association.

It has since developed that D. Leckie, manager of the Kelowna Growers' Exchange, has had much to do with the reduction in the price of shook, which, according to one estimate, will mean a saving of between fifty and sixty thousand dollars to the growers of the Okanagan. Impressed with the necessity of saving money for the growers in every way possible, Mr. Leckie entered into communication with the manufacturers' organization, with the result that he was invited to go to the Coast and confer with the members on the subject. There he addressed the box manufacturers' association and returned last week with the report that the association had granted a concession of 1 1/2 cents, reducing the price from 19 cents to 17 1/2 cents. A former reduction of one cent from the opening price of 20 cents had been made.

Local Happenings

Alex Smith is making good progress at the hospital following his recent operation.

Jack Harris has been transferred from the Bank of Montreal at Armstrong to the Vernon office.

Some particularly attractive bargains are being offered by J. C. Melvin this week in hosiery and other lines.

Fishing season opened on April first and the lakes in the hills are being invaded, particularly by our younger citizens.

It has been necessary to postpone the Easter flower sale at the Misses Spencer's to Thursday afternoon next, April 17th.

Miss Thelma Lockwood returned the first of the week from Bellingham, Wash., where she has been studying music.

For Moorpark and Blenheim apricots, Bing and Lambert cherries, J. ples, and rhubarb roots see T. J. Garnett.

Mr. and Mrs. T. J. Behan and daughter, Marguerite, came over from Princeton on Friday and are guests at the home of Mrs. Behan's sister, Mrs. W. R. Shields.

Mr. A. C. Turner left for the Coast last Friday, expecting to be back in a few days. He and Mrs. Turner plan on going to the Coast about the end of the month, where they will reside.

Members of the Students' Council of the Summerland high school have sent out invitations to a reception to be held on Friday evening of this week in the public school. We believe this is their first attempt of this kind.

Mr. and Mrs. J. R. Conway, who have been in Penticton for some time, have decided to again make Vernon their home and Mr. Conway went up the lake early this week, Mrs. Conway and Miss Eileen going up later in the week.

Mr. and Mrs. Basil Stewart motored down from Vernon and spent the last weekend here. A. T. Howe, president of the Associated, came down from Kelowna with them on Saturday afternoon and remained here until after the public meeting on Monday.

L. E. Tripp, of Crehan, Mount and Company, chartered accountants, has been here for some days auditing the books of the Co-operative, which work he completed last night. Printed copies of the annual statement will be sent to the members at once.

By cutting the building up in sections, the residence of Mrs. Pardee has been moved from Mineola to her recently acquired lots near the Baptist church. As soon as the building is ready for occupancy, Mr. and Mrs. Wheeler and Mrs. Pardee will move down from Mineola.

Mrs. C. P. Evans left last week for Brandon, accompanied by her niece, Miss Jean Bonnest, who has been visiting in Summerland for some time. Miss Bonnest, whose home is in Brandon, will remain there and Mrs. Evans will visit in that city before returning to her home here.

Mr. Jacques, Sr., Mr. Harry Jacques and Mr. Edwin Wahloy, all of Michel, B. C., came in on Tuesday night to visit relatives here, Mr. and Mrs. Mark Sourrah. Mr. Wahloy, who is suffering from the effects of a bad attack of flu, came to the Okanagan in the hope that the climate might benefit his health.

Mr. and Mrs. C. L. Widen with their two children arrived on Thursday last from Wetaskiwin, Alta., to visit Mrs. Widen's father, Mr. H. H. Elsey, and relatives Mr. Widen left on Wednesday for a visit to Vancouver, Mrs. Widen and children remaining here. While here they are guests at the home of Mr. and Mrs. C. H. Elsey.

SUMMERLAND WEATHER REPORT

Below is a report furnished by the Dominion Experimental Station here for the week ending Tuesday:

Table with columns: Date, Max., Min., Rain, Snow S.S.

Mrs. Bateman, of Vancouver, was a guest last weekend of her sister, Mrs. Thos. Dale.

Mrs. J. J. Baker returned on Thursday evening, last, from Toronto, where she had spent the winter.

Remember Uncle Joseph, Rialto Theatre Easter Monday. Home-made candy on sale.

Mrs. A. M. Leslie went up to Okanagan Landing on Friday morning, where she met her mother, Mrs. Vipond, who will visit with her for a time.

Mrs. H. J. Armitage entertained the members of the Naramata Ladies' Aid at her home on Wednesday afternoon, the party making the trip both ways by ferry.

After a short visit with relatives in Kaleden, Miss Laura Carruthers returned to Summerland on Saturday, leaving again on Wednesday to return to her home at the Coast.

Mr. and Mrs. Frith, who resided in Summerland for a year or more and afterward in Peachland, and have since been at Kamloops, sailed from Vancouver recently for a visit to Honolulu, then to New Zealand and Australia. Afterward they will return to California, in which state they will remain for a time.

Geo. Ross came over from Castlebar on the noon train Saturday to visit his mother, who but a few days before had returned from California. He left again for his station on Sunday. He and Mrs. Ross are leaving shortly for Cleveland, Ohio, where he will attend a railway telegraphers' convention. During their absence in the east, their daughter, Helen, will remain here with Mrs. Ross.

MR. A. E. WARREN
General Manager, Western Region,
Canadian National Railways

Women you envy have only this secret

You, too, may employ it to keep the radiance and bloom of youthful skin

Radiant, with the charm of youth still theirs, millions of clever women are admired—and envied—today.
Yet they have no difficult, hidden secret—no great gift.
Only this simple method—which is for you, too. To give you, as well, the charm you envy in them.

thorities say, to keep your complexion lovely, radiant, youthful. But beware of harsh cleansing methods. They injure skin.
Wash thoroughly with Palmolive Soap—each night before retiring. Rub the creamy, foamy lather well into the tiny pores. Rinse—and repeat the washing. Then rinse again.
Then—if skin is dry—apply a little cold cream. That is all. Skin so cared for is not injured by cosmetics, by wind and sun, or by dirt.

The simple, correct way
You cannot find a more effective beauty treatment. Because Palmolive Soap is blended of rare palm and olive oils—famous for mild but thorough cleansing qualities since the days of Cleopatra. And it is inexpensive, so that thousands now use Palmolive for the bath.
Make sure that you get Palmolive—which is never sold unwrapped. All dealers have it. Get it, and try for one week this simplest of all treatments. See how delightfully and how quickly it benefits your skin.

Volume and efficiency produce 25c quality for 10c

THE PALMOLIVE COMPANY OF CANADA, LIMITED

### COAST BUSINESS MEN GIVE VIEW ON CO-OPERATION

(Continued from Page 3)  
only got started with them and if the organization failed it would be a catastrophe. If maintained, it will be a surprise even to ourselves, concluded Mr. Dollar.

Mr. Howe made the very satisfactory announcement that the operating costs of the Associated had been well within the estimate and he expected there would be \$35,000 to the good. The directors are determined to bring in all growers on the outside and are willing to enter into a one-year agreement with the big orchards, providing the local in the territory concerned consents. This, he believed, would have the effect of putting the growers in a position to control the market.

Described as one of the "young fellows" of the Vancouver Board of Trade and certainly one of its most energetic and progressive members and for a time its president, Nichol Thompson is not a stranger in the Okanagan and when asked to speak was heartily welcomed. Mr. Thompson had spent his birthday traveling to Summerland from the Kootenays to meet the other members of the Vancouver Board of Trade here and he received many congratulations on the 71st anniversary of his birthday. Quoting the motto, "In union there is strength," Mr. Thompson urged the growers to stick together; only by so doing could they attain success.

E. J. Chambers, Penticton, V. C. Irons, Vancouver, and G. A. Barrat, Kelowna, also occupied chairs on the platform. Mr. Barrat's address is given elsewhere.  
Chairman Kelley, on behalf of the people of Summerland, expressed gratitude to the Vancouver men and hoped their interest would not cease with this visit. He had been surprised that there was so little knowledge at the Coast, of the Interior. People of Vancouver cannot build up a large city unless the Interior is developed. Ours is a large province, resembling a sloping giant, requiring a good deal of effort to get it moving and he pleaded for greater co-operation between Coast and Interior.

A number of questions were propounded from different parts of the house and in answer to one, G. I. Gray, president of the local, said he personally favored the one-year marketing agreement.

Mr. Lyons, of Penticton, told how the local there had gone after bootleggers; one had paid the local 25 cents a box on all fruit sold; another had his orchard plundered, the balance of his crop seized and the local had won the case in court, defendant having to pay \$200 costs.

In answer to a question as to the likelihood of the Associated continuing, Mr. Howe stated that unless it got proper support, the organization could not operate successfully coming might as well quit. He seemed hopeful, however, that the necessary control would be obtained.

Bill Jones, the constable, received a circular showing six different photographs of a man wanted for murder. Two days later he wired the Chief of Police, "I have five of the men. Am going after the sixth tonight."

### NARAMATA NEWS

Current Events of Town and District

Mr. F. C. Manchester was in Kelowna last week and sang "The Old Okanagan" by invitation at The Empress Theatre, the Mason's banquet, and the Gyro's club. The Elberta Piano Co. of Calgary, will broadcast this song at the convention of Canadian composers to be held in that city this week.

Walter Lyons of Penticton, has purchased a cow from T. L. Scaife, who has gone up to Kelowna to work on a boat building contract there.

A farewell party and dance was given by the Girl Guides on Friday evening at the Unity Club, in honour of Miss Dorothy Partridge, who has been living with the McKaye family, and who is going to Australia. Miss Partridge left on Monday

The members of the Women's Auxiliary met on Friday at the home of Mrs. Routh, Mrs. Languedoc presiding. Tea was served by the hostess.

The Ladies' Aid held a sale of work and a cafeteria supper on the evening of April 1st. There was a good attendance, and a pleasant time was spent in a series of games initiated by Mrs. Armitage of Summerland

At the Union Service on Sunday the Rev. H. J. Armitage preached on the subject of the forty years in the wilderness, and compared the timidity and irresolution of the Israelites of that period with that of the world to day. The anthem was Himmel's "Incline thine ear." Mrs. Languedoc presided at the organ.

The Board of Trade meeting called for Monday evening was postponed to allow of the members to attend the growers' meeting at Penticton. A large number of Naramata people attended the Penticton gathering.

Mrs. Irwin returned from the coast a few days ago, after some weeks visiting with relatives in Vancouver.

Mr. H. C. Davies spent the weekend here, previous to his departure for the prairies and points east.

Mr. J. M. Robinson is reported to have been in bad health in Vancouver, but now somewhat better.

### HELPEFUL HINTS by Alveda

**Home-made Cement.**—It is not necessary to buy cement. A very good one may be made by following this simple recipe: Mix some plaster of Paris with the white of an egg to the consistency of cream. This is as good as any prepared cement and a good deal cheaper.

**Pipes.**—The pipes in a sink need never become stopped up if just a little precaution is exercised. If a cup of kerosene is poured down the drain once a month, followed by two gallons of boiling water the next morning, there should never be any trouble. The kerosene cuts the grease and the boiling water washes it away.

### FOR JUICY PIES

Pies made of juicy sorts of fruit have a way of bubbling over into the oven. Try little "exhaust pipes" of

macaroni placed upright in the top crust. Here the juice will bubble and splutter contentedly while the pie is baking, and when the pipes are removed, the juice returns to the pie where it belongs.

### SHILOH STOPS THAT COUGH

Your grand-parents used it. Safe, sure and efficient. Small dose means economy and does not upset the stomach. Get Shiloh, at all dealers 30c, 60c and \$1.20.

### Brew This Fine Spring Tonic Yourself

Brew a cup of this gentle and effective remedy and take it at bedtime three times a week for three weeks.

### Celery King

It will purify the blood, make you feel vigorous and healthy at a cost of only a few cents. Give it to the children, too. Everyone needs a spring tonic—30c and 60c, at druggists. 2

## Reports on Canada's Crops

At frequent intervals throughout the season the Bank of Montreal issues reports on the progress of the crops in Canada. These reports, telegraphed to headquarters from the Managers of the Bank's 550 Branches, cover every Province and form a reliable index of crop conditions.

The reports are furnished free. Upon request at any Branch of the Bank your name will be placed on our mailing list.

## Working To Improve Soft Fruit Industry

### Conferences of Fruit Men and Railway Men on the Subject.

### RAILWAY MEN ARE WILLING TO HELP

### Better Lake Service and More Care in Handling—To Ventilate Cars.

Much good work has been done in the interests of soft fruit growers through conferences between grower and transportation interests, the most recent of which was held at Penticton last Thursday. Those present were T. C. Macnabb, divisional superintendent C.P.R.; R. Helme, superintendent Dominion Express and O. E. Ford, travelling representative in B.C. for the express company; L. R. Stephens, traffic manager of the Associated; Wm. Baskin, Penticton, and R. Pollock, Summerland. The suggestion of Mr. Pollock that provision be made on the steamer carrying fruit to keep it apart from the boilers and that fans be installed to force the cool air from the lake surface through the fruit, has been favorably received by Mr. Macnabb. He and Mr. Pollock will make a trip on one of the boats shortly with the idea of working out such accommodation. The C.P.R. has promised supervision that will assure proper piling of fruit packages so as to avoid protection of the fruit. There have been many complaints of damage resulting from careless stacking. Another assurance is that fruit for re-shipment, which frequently has been badly mixed in transit or at delivery point, will be properly segregated at Kelowna or the Landing so as to keep the fruit of each shipper separate. Markets Commissioner J. A. Grant had reported that damage had been done to fruit shipped in the Bohn cars through keeping them too tightly closed. The car vents should be left open for a short time after they are started rolling in order to permit fruit to dry. Mr. Helme stated that the same difficulty was met at the Coast and that it is necessary to keep the vents open to permit a sufficient current of air to allow the fruit to dry, otherwise there is sweating and moulding. The traffic department of the Associated are investigating and will give such instructions as will remove this trouble. (Continued on Page 3)

## CIVIC STREET IMPROVEMENT PROGRESSING

### Avenue Widened at Narrow Point—Shade Trees Planted.

CIVIC IMPROVEMENTS as provided by the Women's Institute program are proceeding apace. Already splendid progress has been made. The work of widening Shaughnessy Avenue between the handstand and R. H. English's stable, which was started by the municipality, has been continued by the Institute and a very noticeable improvement made there, the street having been sufficiently widened to permit carrying the tree planting past there without a break. From Elliott's corner to the big trees at the handstand, a row of trees has been planted, these being Mountain Ash and Norway Maple, alternated. The trees were set out according to a plan for street improvement adopted five years ago, which plans were drawn up by A. W. Ellison, Penticton, municipal engineer. This plan provided for a second row of trees on the other side of the street, but which will not be put in for the present at least. Formal approval of the location of the trees, which had been staked out, was given by the municipal council on Saturday.

## CARS COLLIDE ON KEREMEOS ROAD

In a head-on collision on Sunday, K. S. Hogg, while going south on the Keremeos road, had his car considerably damaged.

He was just rounding a bad turn in the road, at which such collisions are not infrequent, when he noticed Joe Cawston, a half breed, coming down the grade. The cars were then but a few feet apart and though both were moving slowly, collision was unavoidable. Cawston's car was put out of service through the smashing of radiator and other damage and was towed into Penticton by Mr. Hogg, who has since discovered that his car suffered worse than he first thought.

## BIAGIONI GETS THE CONTRACT

### Will Do Excavating for Pipe Line to Drain Seepage Area.

BIAGIONI has been awarded the contract of digging the trenches for the new pipe to be laid between Hilborn Lake and Trout Creek canyon. The pipe will follow along the same course as the smaller one laid several years ago but will be put on a better and more uniform grade. Biagioni's price is \$140. There was only one other tender received, that of A. E. Smith, whose bid was \$288.75. D. Dickson, municipal foreman on pipe systems, was appointed inspector and the actual laying of the pipe will be done by him. The cost of the pipe for this job is \$500.

## DIRECTORS IN JOINT MEETING

### All Locals of Associated Considering Question of Future Operation.

THAT THIS meeting recommend that the Associated Growers refuse to operate unless 90 per cent of the estimated tonnage of tree fruit in the area in which the Associated Growers operate be under control for 1924. "Further, that we aim to secure control of 100 per cent of the tonnage, control of at least 90 per cent to be obtained by April 30th." Above is a resolution adopted at a joint meeting held last night of the directors of the several locals affiliated with the Associated Growers, who are now in session at Kelowna. The directors were called together by the Associated for the purpose of thoroughly canvassing the district with respect to control of the crop and will be in session all day today or longer. A proposal, which is said to come from the independents, is that the Associated and other shippers unite in forming a board of control. Under this plan an office would be opened at Vernon, under two representatives from the Associated and two representing the independents. Those representatives would work together to control prices and distribution, would allocate the orders and proportion the amount of fruit of one house to be exported. This plan will probably be considered by the men now in session at Kelowna.

## Will Refuse Water to Delinquents

Water was turned into most of the mains of the municipal irrigation system early this week. Foreman Tomlin reported to the council on Saturday that he had never seen the wooden flumes so shrunken and upon as they were at that time. Some flumes which had been gone over and made tight with oakum had shrunken so much further that the oakum was falling out. He referred particularly to the flume at the south end of the municipality which feeds the Experimental Farm. Tinning and other measures are being resorted to to make the flumes tight. Instructions were given the ditchmen to give no water to properties on which rates were owing for 1922 and prior. This subject of arrears of rates is causing our elected representatives no end of worry. It is only through the collection of rates that they are able to find money to pay wages for operating and to meet necessary maintenance expenses.

## TO FINANCE ON CURRENT TAXES

Twenty-five thousand dollars has been placed to the credit of the municipality by the Bank of Montreal, being a loan against the current year's taxes and covered by the usual by-law and treasury note. This is a class of business that banks are glad to have, which fact emphasizes the suggestion that if the Associated fails to function this season, the municipality should go slow in using this credit.

## PACKING COSTS LOWEST HERE

### Efficient Management Shown By Annual Report Just Issued.

IT WILL BE a great satisfaction to the members of the Summerland Co-operative Growers' Association to learn that their packing charges are the lowest of any local in the Valley. On apples the total deduction is 49 cents. Penticton Co-operative Growers charged their members 52 cents, and Naramata, Kelowna and Vernon all had a cost of 53 cents. The annual reports by the directors and auditors, including the financial statements, together with details of packing charges are now in the hands of members. The statement is a very creditable one and reflects very favorably on the efficiency of the administration, both of the directors and officials. No such favorable result could have been attained and costs kept down to such a relatively low figure had it not been for the wise administration and sound policy of both directors and officials. The Review has learned from good authority that several of the directors will not be open for re-election. This will be unfortunate particularly at this time, when any material change, no matter how good their successors, will interfere with efficient operation.

## INSPECTOR'S REPORT VERY SATISFACTORY

Reports from the inspector of public schools on the Summerland Consolidated were read before the regular monthly meeting of the school board and found very satisfactory. Tenders for remodelling the smallest school building were opened but in view of the present shortage of cash the board decided to let the matter stand over for the present. Permission was given the manual training instructor to have his department enter the provincial bird house competition. Fifteen dollars was voted to the Okanagan Valley Schools Athletic Association. Appreciation was expressed of the splendid gift from C. J. Kingsoll of a good sized chestnut tree, which he had transplanted from his own property to the school ground. Application will be made to the Department for a new flag. Regular monthly accounts were examined and passed for payment. While it never pays to neglect your wheel brakes, every driver of an auto should remember that the best brake he can use rests under his hat.

## SCHOOL TAXES LESS BY ONE MILL ON DOLLAR

### Municipal and Debenture Rates as Last Year—By-law Submitted.

SUMMERLAND municipal tax rate will be one mill lower than the tax rate of last year, according to a by-law introduced at the regular meeting of the municipal council on Saturday and given the customary first three readings. The reduction of one mill is made on the rate for school purposes. This reduction places the levy for municipal indebtedness and for school purposes on the same level. The 1924 rate as provided by the by-law will be 39 mills, 15 mills each for debenture and school purposes and 9 mills for general municipal expenditure. The rate last year was 40 mills. Taxpayers will be given until November 1st on which date a penalty of fifteen per cent will be added. Last year this penalty, which is provided by provincial legislation, was divided into two penalties, ten and five per cent, but it was stated that ratepayers apparently took no advantage of this and the second and smaller penalty apparently did not stimulate late collections.

## SEEK EXTENSION DOMESTIC WATER

Extension of the domestic water system to the bench north of Peach Orchard is requested by property owners there. T. Cowan, representing these interests, addressed the council on the subject on Saturday. He stated that Walters, Limited; E. C. Mellor, Geo. Sato, A. A. Derrick and Mrs. Derrick, his sister-in-law, now in Germany, and Mr. Cowan himself all desire domestic water service. In order to lessen the cost of extension, A. A. Derrick offered, according to Mr. Cowan, to permit the pipe being laid on his property. The request was referred to committee for investigation as to costs and revenue.

## MUCH INTERESTED IN BASKET WEAVING

Basket weaving was the demonstration given before the Summerland Women's Institute last Friday afternoon in the parlor of the Methodist church. There was a good attendance of members, who were pleased to see so many visitors. The members of the basketry industry of the Summerland branch of the B. C. Art League were the demonstrators. Some were busy from the foundation of reed weaving baskets, others at tray making, while others showed how to proceed with pine needle articles, all of which appeared very fascinating work. Many beautifully finished articles were on exhibition, from tiny little trays and baskets to tea trays and lamp shades. One had only to see all this to realize the wonderful opening in our midst for a home industry. Another attraction was a sale of home cooking. The object of the sale was to raise funds to carry on the improvement work which the Institute is doing on Shaughnessy Ave. About forty trees have been planted on the lake side of the road and also between Beach Avenue and Thirteenth. The idea is to make "the gateway to Summerland" as attractive as possible. Miss Cartwright leaves in a few days for Vancouver as official delegate to the provincial convention of Women's Institutes.

## FINAL PRICES ON APPLES ARE WORKED OUT

### Fifty Thousand Dollars Yet to Be Distributed by Local.

AVERAGE NET returns to growers on all packed apples shipped by the Associated will be 50 cents and on crates 20 cents, the average of both being 47 cents. Of those prices growers are required to invest five cents per package in purchase of the storage building and two cents to provide working capital for the co-operative. This information was given by R. Pollock, secretary of the Co-operative, who stated that Central had advised that growers would have received from 10 to 25 cents per package better prices if the organization had been in full control of the crop. Average prices on most of the varieties were also furnished by Mr. Pollock.

Variety	Packed	Crated
Snow	.71	.40
Cox's Orange	.60	.30
Dellelous	.85	.85
Spitz	.63	.27
Newtown	.60	.38 1/2
Grimes	.33	.30
Stayman	.71	.27
Wagner	.31 1/2	.27
Whooop	.87 1/2	.36 1/2
McIntosh	.70	.48
Spy	.60	.27
Rome	.55	.20
King David	.30	.32
Jonathan	.30	.20
W. Innana	.48	.31
"Main Crop" group	.34	.22

Approximately fifty thousand dollars net will be distributed to growers, this representing the total due after making all deductions, including payment on account and capital investments.

## WILL DITCH ROADS AT TROUT CREEK PT.

Work of ditching the road near the Duncan Wood's property at Trout Creek Point and also the F. R. Gartrell road, has been put in the hands of the roads committee to be carried through as soon as possible. The work was approved by the council on Saturday, Reeve Campbell volunteering to supervise the work, as the municipal foreman is now very busy on the irrigation system.

## CARS WRECKED IN COLLISION

### Bad Corner North of Peachland Scene of Car Accident.

A BAD SMASH-UP between the Kelowna stage and a Chevrolet occurred on the Trepanier hill on Monday morning, fortunately with no loss of life or serious injury to the occupants of the cars. Proceeding south on its regular daily trip the stage being driven by Jimmy Brunette was carrying a passenger, Mr. Cousins, a commercial man, and when turning the sharp corner a Chevrolet driven by R. J. Baldoek, of Penticton, crashed into it. The stage driver immediately got his brakes working, and in an endeavor to avoid collision headed his car for the rock bank, smashing the front beyond repair, while the Chevrolet rebounded from the impact and hung perilously over the embankment. Mrs. Baldoek, who was the other occupant of the Chevrolet, was badly cut about the face from broken glass, but beyond a severe shaking up of all participants there were no other injuries. Both cars are badly wrecked, the stage, a McLaughlin seven passenger being put permanently out of commission for future runs, and a new car is being put on the run in a few days. The Chevrolet was towed to Peachland, while a service car with crane took the wrecked stage to Kelowna the same evening.

## Naramata Growers In First Annual Meeting

### CONCLUSION OF SOCIAL SEASON

At the last meeting of the winter series of socials, cards and dancing, held by the W.A. of the G.W.V.A. at the Veterans' Hall, the season's prizes were presented to those who were fortunate to win them. The W.A. gave a vote of thanks to those merchants, in both upper and lower towns, who so generously donated the prizes, and to all those who were so kind in helping to a happy finish which has proved a most successful attempt at providing wholesome and enjoyable recreation for young and old at a nominal cost. The entire proceeds have been turned over to the veterans' building fund toward finishing their hall.—Cont.

## WILL BE GUESTS OF EXP. FARM

### Ex-President of Ontario Agricultural College to Visit the Valley.

D. R. G. C. CREELMAN, ex-president of the Ontario Agricultural College, and Mrs. Creelman will be entertained at dinner on April 23rd at the Incola Hotel, Penticton, by students, ex-students and friends. All those who are desirous of renewing acquaintances with Dr. and Mrs. Creelman and of attending this dinner are requested to get in touch with R. P. Murray, Penticton, at once in order that arrangements may be completed. Dr. and Mrs. Creelman will be the guests of the staff of the Dominion Experimental Station here during their stay in the Okanagan Valley.

## FEW PATIENTS IN HOSPITAL

### Revenue Very Low as Result—Insurance Fund Drive Slow.

Patients were few in the Summerland hospital throughout March, the average per day for the whole month being only five, at least two below the minimum required to permit an even break in finances. The daily per capita cost mounted to \$4.40, according to a report submitted at the board meeting on Monday. Accounts for the month totalling \$1,159.12 were examined and approved for payment. C. P. Nelson, auditor, tendered his resignation. This was accepted with regret, and the municipal auditors, Messrs. Crehan, Mount and Company, will be asked to renew their offer to audit the hospital books free of charge. To date little more than half the thousand dollars, the goal of the drive, and which sum is required to renew insurance, has yet been realized. Not much more than \$400 has been collected in this manner, but the Ladies' Auxiliary have contributed an additional \$140, leaving about \$450 yet to be raised. Penticton municipal council has voted a grant of \$300 to the Board of Trade of that town for publicity and other purposes.

## Reports Shows Profit on Season's Operations—Packing Charges Down.

### APPRECIATE WORK OF SECRETARY

### Directors Elected—Want 80 Per Cent Control—Wages Discussed.

The annual meeting of the Naramata Co-operative Growers' Exchange was held in the Naramata Hall on the afternoon of Tuesday, April 15th, Mr. F. W. Rolt presiding. There was a large attendance, and considerable interest taken in the proceedings. The chairman stated that the business of the meeting was to receive the annual report and financial statement of the organization, to elect a board of directors for the coming year and to deal with any other matters which might be necessary. The minutes of preceding meetings having been read and approved, the directors' report was read by their secretary, Mr. A. T. Horswill, and showed a total of 33 meetings held during the past season. It also contained some recommendations as to improvements to the warehouse, together with an appreciation of the work of the co-operative's secretary, Mr. C. H. Sisney, and a recommendation to the incoming board that his services be retained at a salary more commensurate with his qualifications. The packing charge on apples was shown as 53 cents, which was rather under the estimate made at the beginning of the season. Some criticism was made of the charges paid for hauling boxes to the various ranches, and the possibility of some change in that respect was referred to the new board for consideration. Mr. Sisney read the auditor's report, which was considered satisfactory, and was followed by the financial statement, showing a profit of 403.55 and assets of \$50,589.97 as against liabilities of \$50,186.42. The amount of the carry-over of \$10,281.60 for boxes, paper and nails was remarked on, and explained in part by miscalculations in estimating the crops, and also by the fact that several thousand crates had to be bought late in the season, leaving standard boxes in excess. The question of wages to employees was brought up, but the chairman pointed out that there could hardly have been much over-payment in that branch, or the packing (Continued on Page 3)

## RECEPTION BY HIGH SCHOOL STUDENT BODY

### Parents Given Opportunity to Witness Session of Student Council.

SUMMERLAND High School Students' Council entertained parents and guardians at a reception given in the public school last Friday evening. The Students' Council is a new organization here and was formed under the direction of the principal, J. O. Steeves. Through this organization the students take an active part in all matters relating to the school, including rules and school discipline. Meetings are held at least once a week when a brief program is carried through and school matters dealt with. On behalf of the students, Principal Steeves welcomed the guests and briefly referred to the school work, which, he said, was progressing very favorably, considering the poor start that had been made. He referred with gratitude to the improvements being made to the school grounds and of the desirability of beautiful and inspiring surroundings and of their influence on the young people. He referred to the desirability of parents meeting with the students in (Continued on Page 6)

## Okanagan Branch Almost Assured

Completion of the Okanagan Branch of the Canadian National Railway is almost assured. T. G. McBride, member at Ottawa for Kamloops, has written the Board of Trade of that city to the effect that he had interviewed a number of senators and without exception they had agreed to support the Bill for the completion of the Kamloops-Kelowna branch, which bill had already been adopted by the House of Commons. Mr. McBride thinks it practically assured that the line will be completed in the near future. For the repairing of the roadbed built some years ago and building of the bridges and laying of steel, about two and a half million dollars will be required. It is believed that upon the completion of this branch the Canadian National will establish a boat and barge service on Okanagan Lake to link up with the railway terminus at Kelowna.

# EDITORIAL AND FEATURE PAGE

## The Summerland Review

Established August, 1908.  
 Published at Summerland, B.C., every Thursday by  
**THE REVIEW PUBLISHING COMPANY, LIMITED**  
 Ralph E. White, Editor and Manager  
 An independent family newspaper covering Peachland, Summerland and  
 Naramata and adjacent districts.

Member of Canadian Weekly Newspapers Association.  
 Member of British Columbia Selected Weeklies.

Subscription Rates—In British Empire, in advance, \$2.50 per year; six  
 months, \$1.40. To U.S.A. and other countries, \$3.00 per year.

Advertising Rate Cards and information respecting territory and samples  
 of paper mailed upon request, or may be seen at the office of any advertising  
 agency recognized by the Canadian Press Association.

Advertisers must have copy in by Tuesday noon in order to insure  
 changes for standing advertisements. New display advertising copy can  
 be accepted one day later.

All instructions for cancellation or alteration of advertising must be in  
 writing.

Correspondence—Letters addressed to the Editor and intended for publica-  
 tion must be short and legibly written on one side of the paper only.  
 The longer an article, the shorter its chance of insertion. All communi-  
 cations must bear the name of the writer, not necessarily for publication. The  
 publication or rejection of articles is a matter entirely in the discretion of  
 the Editor. No responsibility is assumed by the paper for the opinions  
 expressed by correspondents.

Typographical Errors—In the event of a typographical error, advertising  
 goods at less than the proper price, the newspaper will furnish letters to  
 be posted in the store stating the correct price, but goods may not be sold at  
 the price printed and the difference charged to the newspaper.

### SUMMERLAND AND HER NEIGHBORS.

"What has happened the Summerland Board of Trade?"  
 This is a question which has been put to The Review on a  
 number of occasions by representative men of other centres  
 and several of our citizens tell of similar enquiries.

Reports published in papers in the Valley of late have con-  
 tained unofficial statements of Summerland's views on matters of  
 general Valley interest. Not infrequently subjects of much  
 moment to Summerland are considered at joint meetings of  
 boards of trade, an instance being a conference held at Oro-  
 ville by representatives of towns all up and down the Valley,  
 at which joint action was decided upon to divert northward  
 as much as possible of the traffic passing east and west along  
 the Sunset highway. Practically every board of trade in the  
 Okanagan has been busy on different phases of the fruit mar-  
 keting crisis and its possible results.

Again, at a meeting held at Penticton at which Naramata,  
 Penticton and other boards of trade were represented, arrange-  
 ments were made for united action on subjects of interest  
 to southern Valley centres.

Summerland may or may not desire to link up with the  
 neighboring towns in these plans, but her citizens have had  
 but little opportunity to consider or decide on these points.

True, there have been many other distracting subjects  
 requiring our attention, but these others should not be passed  
 by, and a board of trade, which we are supposed to have, or  
 some representative organization, is the proper body to deal  
 with them.

Much might be said on the value of a good live board  
 of trade to a community, but, surely there are few who do  
 not fully appreciate its importance.

### AN INJUSTICE RIGHTED.

Fruit growers of this province will be grateful to Thos.  
 Bulman and the delegation which accompanied him to Ottawa  
 for the victory which they have gained for British Columbia  
 fruit growers in connection with anti-dumping regulations.

Press despatches on the budget brought down at Ottawa  
 late last week tell of proposed amendments which will stiffen  
 the regulations against dumping. To this time regulations  
 had provided that the dumping duty would not apply when  
 the difference between a fair market value and the selling price  
 to Canadian importers did not exceed five per cent of the  
 fair market value. This feature has been repealed and the  
 dumping duty will apply on all such importations except in  
 the case of goods bought before April 15th and entered for  
 consumption not later than June 15th.

It has been the claim of our fruit growers that American  
 apples were sold during the past season cheaper in Vancouver  
 than in Seattle or Portland.

### BRIGHTENS OUR PROSPECTS.

Prices of soft fruits, particularly the earlier fruits, are  
 likely to be very materially affected to the advantage of our  
 fruit growers by an outbreak of the dreaded cattle disease in  
 California. Already Washington and other northwestern  
 states have put an embargo on all importations that would  
 be likely to carry the germ, including fruit, vegetables, dairy  
 products, live stock, poultry, hay and straw, animal products  
 and fertilizers.

Vancouver's Water Street wholesalers are looking for an  
 embargo on southern importations. This will mean that they  
 will have to depend entirely upon British Columbia growers  
 and much better prices to producers should result.

### COUNTRY VS. CITY PRESS

Turning from the city newspapers to the rural exchange  
 which comes to our desk, says The Lake Crystal Tribune, is  
 like stepping from the slums full of vile odours into an old-fash-  
 ioned garden sweet with honeysuckle. The pages of the big  
 dailies are so full of murder, thievery, immorality, the break-  
 ing up of homes by infidelity and selfishness that the better  
 news is obscured. One puts the paper aside with a feeling of  
 depression and heartache that the world is so full of such ter-  
 rible and unhappy things.

Then, picking up the papers that record the happenings of

the smaller towns around us, one gains renewed faith in life.  
 Here are set forth only that which uplifts a community—the  
 activities of the business men, the church news, the civic good  
 accomplished by the women, school items, the happy social  
 gatherings of the people, the marriages, births, and deaths,  
 farmers' items and all the thousand and one daily occurrences  
 that make up the simple annals of the great common people  
 who are really the foundation of this broad country of ours.

Scandals are seldom published in the country newspapers,  
 but if it so happens that decency demands it, the uglier details  
 are omitted, or are given a kindly touch that is widely different  
 from the unfeeling publicity of the city press. No wonder.

The offenders may be our neighbours, or people we have  
 rubbed elbows with all our lives. They are real human beings,  
 while to the great dailies they are merely grains of a sort that  
 are ground out hourly in their newsmill.—Cowichan Leader.

## Sermon On Co-operation

By The Bishop of Kootenay

THE RT. REV. A. J. Douli, D.D., all callings, amongst all professions.  
 Bishop of Kootenay, made co- Where you find the politician who  
 operative marketing the sub- in order to gain votes will support  
 ject of a sermon which he preached measures which he knows to be con-  
 in All Saints' Church, Vernon, on trary to the principle of Christian  
 Sunday, March 30th. A synopsis ethics and Christian morality and  
 of the sermon has been forwarded to inimical to the highest and best in-  
 The Review with the request that it terests of the people, you have a  
 be published. Pilate sacrificing his God for the  
 "And so Pilate, willing to content sake of material prosperity and the  
 the people, released Barabbas unto gratification of worldly ambition. It  
 them, and delivered Jesus, when he matters little whether the politician's  
 had scourged him to be crucified." sphere be in the wider area of the  
 Amongst all the actors in the Pas- Imperial or Dominion Houses, or the  
 sion who were arrayed against our humbler sphere of Provincial or mu-  
 most Blessed Lord, Pilate is the one nicipal activity.

Whenever you find the business man who is willing to follow the  
 Christ and to conduct his business according to the Christian principles  
 of honesty and truthfulness, up to that point where fidelity to that which  
 is right comes into conflict with self-interest and business prosperity, and  
 who then does wrong for the sake of positive gain or to avoid actual  
 loss, there you have a Pilate sacrific-  
 ing the Christ for the sake of temporal, personal gain or advantage.

Or take the world of society and again you find Pilates abounding  
 amongst our women and our men. There is much that characterizes  
 our modern society today which is far from being in accordance with  
 Christ's ideal and standard of right and wrong, and whenever you find  
 the man or woman, the boy or girl, who will do or countenance things  
 which they know that Christ would not approve, or doing them, or coun-  
 tenancing them to win some cheap popularity and to stand well with the  
 world, there you have a Pilate who, willing to content the people, anx-  
 ious not to offend or to appear in anywise "behind the times" is per-  
 fectly willing to deliver Jesus to be crucified. Verily the Pilate Spirit is  
 far from being dead or even slumbering.

It is the Pilate Spirit which is today threatening dire disaster to  
 the fruit growing industry of this Province and more especially of this  
 valley. Fifteen months ago it did seem as if the people of this Pro-  
 vince, who were interested in the fruit industry, had grasped the truth,  
 that success in any business depends upon loyalty to the principles of eth-  
 ics enunciated by Christ and promul-  
 gated by Him as a law of His king-  
 dom. Christ taught that men are brothers, that they must love one another, that is serve one another, the strong bearing the burdens of the weak, and the weak the burdens of the strong. Christ taught co-opera-  
 tion amongst men, bidding men look not upon their own interests but upon the interests of others, substituting the law of service for the law of self-pleasing and self-advancement.

And fifteen months ago, when at the request of the growers them-  
 selves I attended their meeting in Kelowna to invoke the blessing of God and His guidance, it did look as if at long last men, at least in this valley, were coming to their senses and about to give to God and His commands that respect and obedi-  
 ence upon which, ultimately, all permanent and abiding prosperity will be found to depend.

But alas, self-interest has come into clash with the Christian ideal of brotherhood and co-operation. The people of this valley know perfectly well that the teaching of Christ regarding co-operation and brother-  
 hood, and helping one another, and bearing one another's burdens must be right and can alone ensure ultimate, permanent prosperity; and yet, when self-interest comes into conflict so many turn Pilates and are willing to sacrifice their brother and his welfare without a thought, pro-  
 vided they can thereby secure a temporary advantage for themselves and promote their own personal self-interest. Like Pilate when it comes to the real vital point they are not willing to stand by the right if it is going to cost them personal loss; they are not going to allow admiration for the Christ and His example and His teaching to jeopardize for an instant their own selfish interests, they will not stand shoulder to shoulder with their brothers suffering for the time being in order to promote and ensure ultimate victory and success.

Christ can be crucified if His teaching or His ideals touch my pocket or conflict with my own material welfare and prosperity. So speak and so act the Pilates of today as their proto-type spake and acted nineteen hundred years ago.

What is the cause of it, why did Pilate fail so hopelessly at the supreme moment of testing? The answer will be found I think when we discover that Pilate was a shallow agnostic. His contemptuous, cynical, half jeering query "what is truth" whilst he stayed not for the answer, reveals the character of the man towards religion. True he was a heathen and knew not the true God but he knew the difference between right and wrong and it is because he chose the wrong and crucified the right, that he stands today condemned at the bar of public opinion, and before the tribunal of his erstwhile prisoner.

His bid for popularity and personal success availed him but little. Very soon he was again in trouble with the Jews; very soon the report to Rome which he dreaded was sent. Dismissed from his high office he died in banishment, a suicide's death according to tradition.

It never pays to do wrong even from a worldly standpoint. Pilate may find mercy, for after all he was a heathen, when the positions are reversed and he stands before the judgment seat of Christ.  
 But what of us, if we are Pilates? We cannot plead insufficient knowledge, for the full truth is ours if only we accept it, hold fast by it and live in accordance with its principles. What of us, how can we escape, if we sacrifice right to policy, if we crucify the Christ in order to save or benefit ourselves?  
 If we would escape the risk of acting like Pilate in the day of testing we must avoid that shallow agnosticism which made Pilate what he was, and which always makes Pilates of men and women. We must deepen our belief in God. Not one more belief that there is a God, or in the truths and facts that have been revealed about Him, but our

belief in Him.  
 To believe in God is to trust Him, to put my whole confidence in Him, to know that even though all seems dark and the way of right to point to disaster, yet I must stand by the right because God is right, and even under all circumstances identified with it.  
 We cannot be Pilates if we believe in God and trust Him through and through, and know that He does govern the ordinary week day affairs of men and women. We cannot crucify the right and hand our brother over to his doom if we have that profound belief in God as our Father, the Eternal Source of right and truth and love.  
 We shall believe in Him, and be-

lieving in Him we shall ever follow Him under all circumstances knowing that if we seek His Kingdom and the righteousness thereof all things material as well as spiritual, shall be added unto us.

Mrs. C. B. McCallum went down to New Westminster the first of the week to be with her daughter, Mrs. Bray, who is to enter the hospital for an operation on Tuesday.

When you change your name  
 New and old friends will see in your choice of Stationery an expression of good taste and personality.

**SYNOPSIS OF  
 LAND ACT AMENDMENTS**

**PRE-EMPTIONS**  
 Vacant, unreserved, surveyed  
 Crown lands may be pre-empted by  
 British subjects over 18 years of age,  
 and by aliens on declaring intention  
 to become British subjects, condi-  
 tional upon residence, occupation,  
 and improvement for agricultural  
 purposes.  
 Full information concerning regu-  
 lations regarding pre-emption is  
 given in Bulletin No. 1, Land Series,  
 "How to Pre-empt Land," copies of  
 which can be obtained free of charge  
 by addressing the Department of  
 Lands, Victoria, B.C., or to any Gov-  
 ernment Agent.  
 Records will be granted covering  
 any land suitable for agricultural  
 purposes, and which is not timber-  
 land, i.e., carrying over 5,000 board  
 feet per acre west of the Coast Range  
 and 5,000 feet per acre east of that  
 Range.  
 Applications for pre-emption are  
 to be addressed to the Land Com-  
 missioner of the Land Recording Di-  
 vision, in which the land applied for  
 is situated, and are made on printed  
 forms, copies of which can be ob-  
 tained from the Land Commissioner.  
 Pre-emption must be accepted for  
 five years and improvements made  
 to value of \$10 per acre, including  
 clearing and cultivating at least five  
 acres, before a Crown Grant can be  
 received.  
 For more detailed information see  
 the Bulletin "How to Pre-empt  
 Land."

**PURCHASE**  
 Applications are received for pur-  
 chase of vacant and unreserved  
 Crown lands, not being timberland,  
 for agricultural purposes; minimum  
 price of first-class (arable) land is \$5  
 per acre, and second-class (grazing)  
 land \$2.50 per acre. Further infor-  
 mation regarding purchase or lease  
 of Crown lands is given in Bulletin  
 No. 10, Land Series, "Purchase and  
 Lease of Crown Lands."  
 Mill, factory, or industrial sites on  
 timber land, not exceeding 40 acres,  
 may be purchased or leased, the con-  
 ditions including payment of  
 stumpage.

**HOMESITE LEASES**  
 Unsurveyed areas, not exceeding 20  
 acres, may be leased as homesites,  
 conditional upon a dwelling being  
 erected in the first year, title being  
 obtainable after residence and im-  
 provement conditions are fulfilled  
 and land has been surveyed.

**LEASES**  
 For grazing and industrial pur-  
 poses areas not exceeding 640 acres  
 may be leased by one person or a  
 company.

**GRAZING**  
 Under the Grazing Act the Prov-  
 ince is divided into grazing districts  
 and the range administered under a  
 (Grazing Commissioner. Annual  
 grazing permits are issued based on  
 numbers ranged, priority being given  
 to established owners. Stock-owners  
 may form associations for range  
 management. Free, or partially free  
 permits are available for settlers  
 campers and travellers, up to ten  
 head.

**AN EXAMPLE  
 OF PROTECTION**  
 Peachland.

The Editor, Review.  
 Dear Sir,—The enclosed part of wrapper off a packet of sweet potatoes I had ordered to send to Oregon shows that Canada may not ship sweet potatoes into the U.S.A. It puzzled me rather a sto why such a law exists, as it does not seem to be a condition that is likely to exist at any time. At the same time it goes to show better protection for the sweet potato growers to the south of us than we fruit growers can claim against southern importations. I can send sweet potatoes to the Department at Washington and any of the State Colleges without any hindrance, as I have done so several times. This was the first private request.

Sincerely yours,  
 H. H. THOMPSON

**IS MUCH READ**  
 Box 46, Winnipeg Beach, Man.

The Editor, Review,  
 I thought you would probably like to know how much The Review is enjoyed down here. It arrives on Monday evening and we read it ourselves, then put it in our travellers' sitting-room, and I think every visitor we have reads it and enjoys it and comments on the contents. Of course, some of them have had the good fortune to travel through the Okanagan and know Summerland, but every one is interested.

Yours truly,  
 C. I. SEELEY

**THE ASSOCIATED**  
 Editor, Review.

Dear Sir,—I am sorry to again trespass on your space, but would

**IMPROVING SOFT  
 FRUIT INDUSTRY**

(Continued from Page 1)  
 Railway authorities were emphatic in their statement that traffic will not warrant a Sunday boat and train during the soft fruit season.  
 A request from Summerland that the Co-operative be permitted to deliver express and local fruit to the wharf early Monday morning instead of Saturday night was granted. It was pointed out that the storage building is a much better place in which to hold the fruit over Sunday than is the shed on the wharf.  
 Car bracing has also been receiving considerable attention and blue prints and specifications of the most approved plan will be sent to each local.

Complaints had been registered that the C.P.R. did not keep the different units together when unloading shoo. The railway officials agreed to use the necessary care in this, provided the material is delivered to the car in like manner.  
 Mr. Pollock states that the C.P.R. and the express company show a willingness to meet shippers in every possible way that will tend to efficiency, economy and better service.  
 Rates on fruit shipped to eastern Canada as compared with rates from Washington points to the east, both Canada and the States, were brought to the attention of the railway officials. There is a marked difference in favor of the American shipper, which permits the Washington fruit grower to put cherries and other soft fruits into eastern Canada at prices that B.C. growers cannot meet. The railway men were told that average in Bings and Lamberts is increasing and shortly we will be faced with the problem of finding a market for those. The east is our legitimate market and a lower rate was advocated so as to permit competition with American fruit.

Mr. Helme replied that the question of rates was outside his province but this subject was now under consideration.  
 Mr. Pollock states that the traffic manager of the Associated is alive to the demands of the situation and will doubtless do everything possible to have this handicap removed.

Alfred—Do you know, old fellow, that I've always had a wonderful one for music?  
 Ernest—Is that so?  
 Alfred—Yes. At the age of two I used to play on the linoleum.—Tiger.

like, if possible, some one to throw light upon some of my darkness. When is the great canvass and drive for new tonnage for the Associated to start, and who are to be the "whips"? Why was there not one during winter months, when no one was busy? I consider it was necessary as an ordinary precaution, before it became a vital necessity. How Messrs. Howe and McNair make out, in theory, that prairie markets can more than take our fruit output, is to me a statement very closely connected with some of Sapristi Blowho's vaporisings. Will growers ever get "wise" as to that individual's methods? Why is our acting sales manager so very aggressive and dogmatic? Of course he is young and has something to learn yet. To me a salesman should be well posted, polite and above all TACTFUL. I can well imagine our young friend saying, if he sees this, more advice from one of those round-the-corner-building-supporter-wise men. I do not get a large salary for saying it at any rate.  
 I was surprised to see an article like Makovski's appearing in the official organ of the B.C.F.G.A. He says we associated growers want to form a Fruit Trust under the garb of co-operation. Why not? I wish we could, then, like other big trusts we would for ever be "independent co-operators."  
 Independent in as much as we would from now on have big profits and large bank balances.  
 I do not like the idea even as proposed by "the wise men from Vernon," of some growers being offered a yearly contract while men who made things go signed a 5-year one. Whether one year or twenty, we should and must be all alike.  
 Yours truly,  
 H. M. LUMSDEN

**NARAMATA GROWERS  
 IN ANNUAL MEETING**

(Continued from Page 1)  
 charges would have been higher, instead of being on an approximate level with similar charges in other places in the Valley. A motion to cease advance payments to truckers who hauled fruit for the co-operative was lost, and one to reduce the number of directors from five to three shared the same fate. The matter of remuneration to the directors was left open, the feeling of the board apparently being against receiving such.  
 Before the taking of the ballot, the chairman stated that the new directors had been requested by Mr. Howe to attend a general meeting to be held at Kelowna the following day to formulate a policy under the circumstances which had recently

arisen. Messrs. Languedoc, Walters and Nuttall were selected by the chairman as scrutineers, and the ballot papers were issued. The candidates were Messrs. Rolt, Irwin, Young, Horswill, Partridge, Manchester, Littlejohn, Armour and Rosser, and on completion of the count the first five were declared elected.  
 The delegates to Kelowna were authorized by the meeting to use their discretion in voting there, with the understanding that an eighty per cent control was considered necessary.  
 The meeting closed with a vote of thanks to the retiring board.  
 Gilbert and Sullivan's "H. M. S. 'Pinafore'" Empire Hall, April 28th and 29th.  
 The regular monthly Anglican service was held on Sunday afternoon, Rev. H. A. Solly officiating. The sermon dealt with the benefits of Lenten observance as a preparation for the Easter season. Special music was rendered by the choir, Mrs. Languedoc presiding at the organ.

**\$5 REWARD**  
 will be paid the reader of The Review who finds the most errors, typographical or otherwise, in the display advertisements in this paper from April 10th until May 31st.  
 Letters containing corrections must be in this office within seven days after the issue of the paper in which the errors appear.  
 You will, while studying these advertisements, find much in them that will be to your profit.  
 Remember, too: without advertisements The Review could not be published at a subscription price that the many would pay. As you appreciate the weekly arrival of The Review to your home give those business houses who are users of Review space your best encouragement—your patronage.  
 This competition is not open to anyone directly or indirectly connected with The Review, nor to any printer or ex-printer or members of his family.  
**THE REVIEW**

**CHAMPIONS  
 AT CHECKERS**

**Summerland Again Defeats  
 Penticton—Local Championship Disputed.**

By a score of 48 to 24 Summerland defeated Penticton in a checker tournament held at the home of Mr. and Mrs. T. H. Boothe, Penticton, last Friday evening. This was a return match, the previous tournament having been held here March 13th, when the score was 24-8 in favor of Summerland. Summerland team was made up of the same six citizens, but their opponents replaced two of their men with the idea of strengthening their team.

The visitors report having a very enjoyable evening, the score, which is based on two points for a win and one point for a draw, being as follows:

PENTICTON	W	L	D	P
Cattee	3	3	0	0
Gilley	2	2	2	6
Thomas	2	2	2	6
Pife Moore	2	4	0	4
Boothe	0	5	1	1
Fox	0	5	1	1
Total	9	21	6	24

SUMMERLAND	W	L	D	P
Ramsay	4	1	1	9
Young	4	1	1	9
McCutcheon	4	2	0	8
Jackson	4	2	0	8
Walden	3	1	2	8
Butler	2	2	2	6
Total	21	9	6	48

The above named six are not the only expert checker players in Summerland, as was shown in a tournament played recently in the Premier Hotel and it is rumored that they are to be challenged to mortal combat by an entirely distinct aggregation of Summerland checker enthusiasts.

The challenging team are reported to be disputing the right of the other to represent Summerland in contests with other towns.

**PREPARING FOR  
 GENERAL ELECTION**

Liberals of South Okanagan riding will hold a convention in Kelowna on the 25th to select a candidate. Summerland government supporters will meet earlier in the week to select delegates. Three different citizens of the constituency have been mentioned as possible candidates. W. C. Kelley, Summerland; Chas. Latta and Dr. Knox, Kelowna.  
 The Labor party, said to be stronger here than elsewhere in the constituency, will hold a convention in Summerland on the 28th for the same purpose.

**POLICE CHIEF LOSES  
 HIS CAR BY THEFT**

Chief of Police H. Venus, Penticton, had his Ford stolen early Monday morning of last week. An Indian from across the line is suspected.

He had been seen Sunday night acting in a suspicious manner around some cars on Main street and was told to move along by the constable. Shortly afterward the Indian is said to have taken a Ford car belonging to a garage employee, which he abandoned near the school buildings after a closed pet cock deprived the engine of gasoline. Balked in this attempt he seems to have backed Chief Venus' car away from its location at the rear of the chief's residence and when at a safe distance started the engine and continued his journey southward. He was reported to have been seen at Oroville and is believed to have turned eastward into the Indian reserve somewhere south of that town.

In his announcement on a Sunday morning the vicar regretted that money was not coming in fast enough—but he was no pessimist.

"We have tried," he said, "to raise the necessary money in the usual manner. We have tried honestly. Now we are going to see what a bazaar can do.—Savannah News.

**FETHERSTONHAUGH  
 TELLS OF ACCIDENT**

Below is the report of the Rines-Featherstonhaugh motor accident as published last week by the Penticton Herald. Relatives here of W. H. Featherstonhaugh state that he suffered no broken bones.

The Herald story reads:  
 Left with broken ribs and hip bone broken for two hours on the side of the road without assistance, after appealing to a young man and woman for help, was the experience on Saturday night, of W. H. Featherstonhaugh, of Summerland, who is now in the local hospital recovering from injuries sustained when an auto driven by C. Rines, of Summerland, pitched over the steep bank at the first turn in the road north of the Summerland road bridge. The car was completely wrecked.

The injured man's story of the accident is that late on Saturday evening he and Rines were returning from Penticton to Summerland, when Rines, who was driving very fast, was unable to make the turn in the road. The car leaped off the road and turned over three or four times down the steep bank into the

*To bring you foot comfort  
 a demonstrator from Chicago  
 will be in our store  
 WEDNESDAY,  
 APRIL 23rd*

Every foot sufferer in town should meet this man and learn how easy it is to be free from all foot aches and pains. He will explain the merits of the well-known Dr. Scholl's Foot Comfort Appliances and Remedies, which have brought foot comfort to thousands of sufferers. There is a separate appliance or remedy for every form of foot trouble. Tell the demonstrator your foot troubles—and walk out of our store with feet like new.  
 Jot down the date—it may mark the end of your foot misery.

**Beer's Shoe Store**  
*"Watch Your Feet"*

held at the bottom. The last time the car turned over it struck him on the side, breaking his ribs and hip. As Rines was badly shaken up, he, Featherstonhaugh, crawled part way up the bank and succeeded by shouting, in stopping a car driven by a young woman, who was accompanied by a young man, from Summerland, both of whom he knew. The car stopped at a short distance past him and the young man came back to see what was the trouble. Featherstonhaugh says he told him of the accident and asked to be taken to a doctor or that assistance be obtained. The young man replied that the car did not belong to him and he would ask the lady what they could do. He went back to the car and they drove away. Rines, who had recovered somewhat and found he was not seriously hurt, said he would return to Penticton and get a car. Nothing was apparently done by the two who had passed in the car, Featherstonhaugh states, as no help arrived until Rines came back, two hours later, with a car in which he was conveyed to the hospital.

"A Snapper Up of
Unconsidered Trifles."

The Winter's Tale,
Scene II, Act IV

Speaking before a committee of
United States representatives assembled
to discuss the annual appropriation

THE FATE OF department of
TRUTHFUL JAMES. justice. Will-
iam J. Burns,
chief of the bureau of investigation
in that department, gave some sur-
prising evidence concerning the ac-
tivities of Moscow communists in
American affairs, and declared that
a deliberate plan to overthrow the
United States government is being
directed and financed from Russia.
He stated that in every strike which
has occurred he was able to trace,
on overwhelming evidence, the work
of Moscow radicals, and declared that
they are organized in all the shops
and factories, as well as in the army
and navy. Furthermore, their prop-
aganda is being spread in the
churches, schools and colleges
throughout the country, and has a
radical press of five hundred and
sixty-seven papers printed in twenty-
six different languages and circulated
all over America. Of these news-
papers about two hundred are printed
in the United States, the balance
coming in from abroad. Being asked
whether his investigations supported
the recent statement of Secretary
Hughes as to the existence of an or-
ganized plan to overthrow the gov-
ernment, Mr. Burns replied that there
was no question in the world about
it, the proof being overwhelming.

The revelations are remarkable,
but should not surprise any person
who recalls the Russian financial sup-
port tendered two or three years ago
to the "Labour Herald" of London,
England, and who also remembers
the various activities of Moscow in
India, Afghanistan and other portions
of the British Empire. The really
surprising part of the matter is the
apparent assumption that the retire-
ment of Chief Burns will be a natu-
ral development as soon as one Mr.
Harlan F. Stone takes over the office
of attorney-general. Mr. Stone, it is
said, desires to build up his own staff
of investigators, and moreover does
not believe that the danger pointed
out really exists. Thus we see that
it is a very dangerous thing for a
detective to find out too much, or at
least to make his discoveries public
to the people he is paid to protect.
It would be much better for him to
preserve a discreet reticence and go
on drawing his salary!

A Vancouver letter dated April 5th,
appearing in the "Daily Province"
on the 7th, deals with the method of
the British Columbia
AWARDING PUBLIC works depart-
ment in the matter of
CONTRACTS. tenders for contracts.

The correspondent
states that the custom has been for
the minister to open these tenders in
private instead of in the presence of
the contractors who have put them
in, and suggests that it would be very
much better if the latter plan were
adopted. It is fairly safe to con-
jecture that most people will agree
with him on that point, and it is also
very likely that many will be surprised
to learn that such has not been the
custom all along. To most minds
it would seem natural for the minis-
ter himself to object to a system
which obviously leaves openings for
criticism, while, as far as the public
interest is concerned it is plain that
there are serious drawbacks. The
"Province" correspondent states that
he knew of three of the city's largest
contractors who held aloof from
tendering on the six University
buildings because of a persistent
rumor that a certain favored contractor
was slated to get the contract, or
to "have a chance to meet the low
figure." Now, this is not a desirable
state of affairs, since it indicates an
atmosphere of suspicion which ought
not to have any foundation where
public expenditure is concerned. It
may be a mere coincidence that the
"favored firm" has actually got the
contracts, and it is doubtless true
that its tender was "considerably
lower" than the other bids received
—nevertheless the facts remain that
several contractors declined to ten-
der, and that the public get very
little information concerning the
whole matter. The situation shows
an extraordinary lack of business
method, and the procedure should be
amended.

The vexed question of evolution
seems to be a subject of considerable
discussion lately. It figures largely
in the disputes of
THE PRIDE OF Modernists and Fun-
ANCESTRY! damentalists across
the line, and in
Kentucky has led to a few free fights,
although it is not clear how that

method of argument can help to-
wards a solution of the problem.
Between the two queries of where
we came from and where we are go-
ing to, mankind certainly has a range
of conjecture, assertion, denial and
argument which can hardly fail to
provide a practically inexhaustible
scope and it is probably a good thing
for the world that the great major-
ity of us are content to accept the
fact of existence as something we
cannot alter and to do our best while
we are here. There are enough mat-
ters for dispute as it is, and if we
were called upon to fight over the
theory of evolution, we might eventu-
ally share the fate of the Kilkenny
cats.

When we come to think of it, there
does not seem to be much exhlara-
tion to be imbibed from the belief
that our ancestors were at one time
just apes, and one may reasonably
wonder at the zeal of those who are
prepared to do actual battle for the
honor of such an ancestry. This
aspect of the matter was brought
home to a friend of mine who was
arguing the case with an anti-evolu-
tionist, and had exhausted his oppo-
nent's patience. "So you're convinc-
ed we descended from monkeys?"
said this man, "Well,—looking my
friend up and down in critical fash-
ion—"I don't know but what you're
right. There's certainly a strong
family likeness!"

A certain world reformer named
Alexander Marky, in an article con-
demning the Versailles Treaty and
all its works, has
FUNNIOSITIES. the following sen-
tence: "One of the
sanest of Englishmen, Thomas Car-
lyle, said in 1871: 'No nation has
ever had so bad a neighbor as Ger-
many has had in France for the last
four hundred years.'" We can pass
over the fact that Carlyle was no-
toriously a worshipper of things Ger-
man, and was by no means sane on
that point, but it is permissible to
express a little wonder as to where
Mr. Marky learned that Thomas Car-
lyle was an Englishman! The pre-
vailing belief is that he was Scotch,
even though he lived in Chelsea for
some time.

A little slip of the same kind
occurs in a paragraph noted else-
where concerning the economy of a
beehive. The writer uses the bee as
a pattern of industry and foresight,
pointing out that "he" stores honey
all the summer and is thus provided
for all the winter. The fact is that
every worker in a hive is of the
feminine persuasion, and it is also
a melancholy truth that the honey she
gathers is never tasted by her, seeing
that she is dead before winter
begins, only the younger bees, inno-
cent of work, surviving.

The funniest sentence I have seen
for some time, however, is the fol-
lowing: "He might have passed for
a musician, had it not been for a trace
of humor about his mouth."

PLANNING TO REDUCE
TEACHERS' SALARIES

Kelowna school board, according
to the mayor of that city, is going
into the question of salaries in order
to investigate the possibility of ef-
fecting decreases and it is probable
that the city council may take up
the matter of civic salaries at the
same time.

Great lawyers, great physicians,
great salesmen, great executives, men
of pro-eminnence in all walks gen-
erally will be found to be courteous;
Surely what the best of us find neces-
sary the rest of us should not dis-
pense with.

The Summerland Telephone Co

PEACHLAND DOINGS

A Weekly Chronicle Furnished
By Our Local Representative.

Okanagan Telephone gang left
last week after a few days on repair
work along the line both north and
south of town. While here they put
up at the Edgewater Inn.

Gilbert and Sullivan's "H. M. S.
Pinafore" Empire Hall, April 28th
and 29th.

Dr. and Mrs. R. C. Lipsett, of Sum-
merland, motored up last week, the
doctor making a professional visit.
They were accompanied by Mr. and
Mrs. J. B. Robinson and Mrs. White,
all visiting while here at the home
of Mr. and Mrs. Bulyea.

The regular fortnightly meeting
of the L.T.L. was held in the mun-
icipal hall on Tuesday afternoon.

Mr. and Mrs. A. H. Young have
adopted a lad of eleven years from
the True Blue Orphanage, New West-
minster. He arrived last week and
is getting acquainted with his new
surroundings before starting to
school.

Mr. and Mrs. A. D. Ferguson at-
tended the marriage of a friend, Miss
Jean Kincaid, Kelowna, last week.

Roy O. McCall of Penticton paid a
short visit with relatives in Peachland
last week.

A. J. MacKenzie was advised by
telegram on Thursday of last week
of the sudden death of his brother,
Allan, who is known to a number of
Peachlanders, having been a resident
here in former years. He suffered
a severe illness last fall from which
it was thought he would not recover,
but, to the surprise of doctors and
nurses, he got well enough to leave
the hospital and although not strong
was able to be about. Mr. MacKen-
zie left by K.V.R. for Vancouver, im-
mediately after receiving the word.

H. Lang, a former resident of
Peachland, and Major MacDonald
paid a short business visit in town
last Thursday.

Mrs. Lambly returned Thursday
morning after having spent several
days in Penticton following the death
of her father, Mr. DeBeek.

Mr. Seth Davidson spent Thursday
in Kelowna.

J. U. Gellatly, of Gellatly, B. C.,
spent two days of last week in Peach-
land interviewing a number of pro-
gressive residents who are setting out
nut trees of the various choice var-
ieties that can be grown success-
fully in our district. Mr. Gellatly
states there will be more nut trees
planted this year in the Valley than
in any one year to date. Mr. Gel-
latly photographed some fine speci-
mens of nut trees to obtain pictorial
proof of the quick thrifty growth
attained by nut trees in this Valley.
It is his intention to visit Kelowna,
Summerland, Naramata and Pentic-
ton next week to procure photographs
of interesting specimens of nut trees
in those districts also.

The Lady Orange B. Association
held their regular monthly lodge
meeting on Thursday afternoon, when
the Mistress, Mrs. Young, gave the
report of the Grand Lodge.

The Women's Institute held a tea
and sale on Friday afternoon in the
Municipal Hall at which a goodly
number were present. In view of
existing financial conditions the af-
fair was quite successful.

The board of the Peachland Fruit
Union and a number of growers mot-
ored to Westbank to attend a meet-
ing held there on Friday afternoon.

The Peachland board held a meeting
with the Westbank board previous
to the open meeting and had an in-
terview with Messrs. Ilwo, Barrat,
and McNair, members of the central

board. These latter three were the
speakers in the open meeting, giv-
ing the growers some details in con-
nection with last year's operations.
Before closing their remarks they
read out some of the apple returns
according to recently closed pools,
and while no large prices were in
evidence those shown were better
than some recent reports would in-
dicate.

Mr. Gilbert Thornber, Summer-
land, assisted at the Sunday School
service in the Baptist church last
Sunday and also conducted preach-
ing service in the evening. He was
accompanied by his wife and Mrs. S.
Sharp.

We are glad to be able to report
that Miss Illya Murdin has recover-
ed from a short illness sufficiently
to be able to resume her duties in
the school.

The members of the Lady Orange
Benevolent Association were at home
to members of L.O.L. No. 408 in the
Municipal Hall on Monday evening
last. A very pleasant evening was
spent in games, music and general
sociability and the ladies served
dainty refreshments. Representa-
tives were also present from West-
bank.

Mr. and Mrs. P. N. Dorland spent
Monday in Kelowna.

Mr. E. M. Whyte paid a short offi-
cial visit in town on Monday in pass-

ing through by auto.
George Sutherland, of the Kelow-
na Furniture Company, with their
radio salesman on Saturday set up
a radio with loud speaker in the

General Store and entertained the
public during the evening. It was
unfortunate that it was not one of
the best nights, but they may come
again in the near future.

Spring Fever
IS JUST AROUND THE CORNER

Have a look at the old car and see if it
needs Paint, Polish or Top Dressing. We have
them.

Let us look over the Front Wheels, Steer-
ing Gear and Brakes. We have Repair Parts
for Chevrolet and Ford right in stock and
Brake Lining for every car in the district.

Swift Satisfactory Service

READ'S GARAGE

FRUIT GROWERS, ATTENTION!

Macdonalds Consolidated, Limited
Edmonton, Alta.

OGGIDENTAL FRUIT COMPANY, LIMITED

SUMMERLAND KELOWNA PENTICTON

It is our wish to bring before the fruit-
growers of the Okanagan something of our
marketing strength. We are taking this
method of bringing before you week by
week, views of the series of distributing
houses in Canada to which we are allied.

OUR
EXPORT
CONNECTIONS
ARE SOUND.

The Minimum Guarantee System
MEANS MONEY EVERY MONTH

GROWERS! Previously we suggested a safe, sane and workable plan; a
proven system of handling the fruit of the Valley, that of the MINIMUM
GUARANTEE. This good old plan is finding much favor with the grower
throughout the Valley since it has once more been brought to light after its
temporary eclipse by the present unsatisfactory methods which have gotten so
far away from this dollar and cents business-like basis.

We have had numerous growers tell us that we have resurrected some-
thing that is really worth while and that they think should meet with the ap-
proval and support of practically every fair-minded grower. We think so too.
What could be more satisfactory to the grower than a reasonable GUARAN-
TEE that would be paid to the grower on the fifteenth of each month for all
fruit delivered the previous month? Certainly not the present system wherein
the MAJORITY OF GROWERS have received practically nothing on their
crop and are uncertain as to when they will get anything more. We honestly
and firmly believe that had this MINIMUM GUARANTEE SYSTEM been
in effect this last season the growers would have received at least 20c per
box more for apples and very much more for their soft fruits.

Don't be misled by smooth-tongued orators from afar, who have no real
interest in your welfare. Last year's way of doing business suited the big job-
bers right down to the ground. No wonder they hover around and are so anx-
ious that it should be continued. But the ROD of the MODERN AARON
has failed just as miserably today to bring results to the people as did that of
the Aaron of Bible times.

Facts may be ascertained as to the failure of the TOBACCO GROW-
ERS' ASS'N., RAISIN ASS'N., POTATO ASS'N., PEANUT ASS'N., EGG
ASS'N., from the "Chicago Packer." That is one paper that is not under in-
direct control of the BIG FRUIT JOBBERS and their followers. Why should
our firm support THE MOVEMENT, (called Co-operative) framed for the
benefit of the Big Jobbers, and against the growers?

A FAIR MINIMUM GUARANTEED PRICE MEANS GROWERS' CONTROL

Five acres adjoining the Park. Three well planted. Fine lake view. Modern eight-roomed house, good barn and outhouses.

T. J. McAlpine was a business visitor to Princeton last week.

Keep Saturday May 17th, open for University Players in their play, "The World and His Wife."

Miss Gwen Harris left this morning to spend the Easter holidays with friends in Victoria.

Mrs. Macaulay, of the high school teaching staff, and her daughter, Peggy, left today to spend the holidays at New Westminster.

Mrs. Clay returned to Summerland on Monday from Vancouver, where she had been for some months with her younger son, Carleton, who is attending Normal.

C. H. Taylor, now a patient in the Shaughnessy military hospital, Vancouver, is improving, according to information received here.

Remember the Ladies' Aid entertainment Rialto Theatre, Monday, 21st at 8 o'clock.

Mrs. H. McGregor, Penticton, has been chosen by the Liberals of the Similkameen constituency as their candidate in the next provincial election.

Billy Mack has been transferred from the prairies to the Vancouver branch of the bank with which he is employed.

Bryson Whyte, Dominion fruit inspector, was in town on Monday gathering information on last season's fruit shipments.

All Oddfellows in the district are urgently requested to unite in annual church parade at Lakeside Methodist church, Sunday evening, April 20.

Ladies' Hospital Auxiliary met on Tuesday, April 15th, with seventeen members present, Mrs. Solly presiding.

Running too near to a bonfire on Monday the little granddaughter of Mr. and Mrs. J. M. Sutherland suffered a burn on the shin when her overalls caught fire.

News has been received by his family here of the death at Ida Grove, Iowa, on April 7th, of E. O. James, for many years a resident of Summerland.

Miss Grant, R.N., came in from Edmonton on Wednesday night and is the guest of Mrs. S. J. Conway.

Mrs. G. N. Gartrell and two younger boys are leaving soon for Hope, where they will remain for some months. Mrs. Gartrell is moving to the lower altitude hoping to be improved in health.

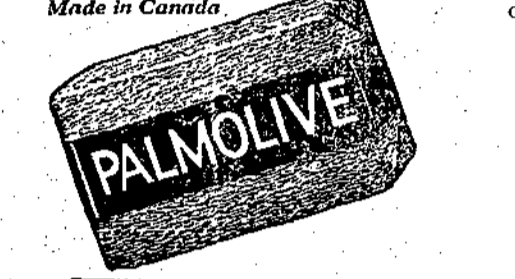

The hospital bazaar, originally planned for May 1st has been postponed to May 7th. The Ladies' Hospital Auxiliary is making every plan for a big event.

Mrs. Geo. Ross and daughter, Helen, came in from Castlegar on Sunday and are guests of Mrs. R. M. Ross.

Bartholomew & Atkinson Painters .. Decorators Estimates Given.

You need not hide skin defects - now

Millions know this simple way to avoid them - to keep skin lovely, youthful. Do not make the mistake of attempting to cover or hide skin defects. It can never succeed.

C. A. Ross, Dominion Bank inspector, is in town this week. He leaves tomorrow morning for Calgary.

H. S. Hase, inspector for the Bank of Montreal, made an official visit to the local branch last week.

Hugh McIntyre, who has been for some months teaching in Saskatchewan, returned home last week.

Miss Edith Bristow is expected in tomorrow night from Nakusp to spend the vacation at her home here.

H. Daniel, of the public school staff, leaves on Friday to spend the vacation at his home in Vancouver.

Alex Smith of the Kelowna teaching staff, is going to the Coast on Friday's train to attend the teachers' convention.

J. O. Steeves, principal of the high school, is leaving the first of next week to attend the teachers' convention in Vancouver.

Mr. and Mrs. P. G. Koop are expected home tomorrow from Victoria. Mr. Koop, who has been in England for the winter, arrived at the Coast a few days ago.

Attention is directed to the announcement by Beer's Shoe Store of the coming of a Dr. Scholl's foot expert. Free examination and advice will be given.

Mr. and Mrs. S. A. MacDonald are leaving tomorrow for Vancouver, where Mr. MacDonald will attend the annual teachers' convention held there during Easter holidays.

Mrs. W. A. Alexander, who has been confined to her home for the past two weeks, suffering from an attack of pleurisy, is much improved, and is now able to be up, though still weak.

Mr. Alex. Cook, who has been visiting for some time with his sister here, Mrs. W. McMillan, left Saturday to return to his home in Glasgow, Scotland.

While driving in a coupe just south of Penticton, Dr. Higginbotham and Miss Hilda Heaton were struck by a rifle by some person hiding in the bushes on the roadside Saturday night.

# RECEPTION BY HIGH SCHOOL

(Continued from Page 1) such a way. He was sure it would develop a warmer sympathy with the school and would tend to a better understanding between the parents and the school and would also tend to eliminate censoriousness in the home in the matter of petty misunderstandings.

A good portion of the evening was given over to the regular business and social meeting of the Students' Council, with the guests as onlookers. Miss Mary Hanna, president, conducted the meeting in a very efficient manner. First came the business portion, which included discussion of school matters, a report on athletics, by Miss Rene Harris and a report on the high school publication by the editor, Miss Helen White.

During the discussion of sports, trustee J. W. S. Logie was asked to speak on behalf of the board. He felt that something more should be done to provide additional athletic equipment.

The business part of the program was terminated by comments of the official critic, Ivor Solly, who declared that the meeting had been conducted "pretty good." The chairman had kept a straight face, but he did not like to see so many students arriving late.

The following program was then carried out: quartette, "The Old Okanagan," by third year girls, chorus by the school; piano solo, Muriel Steeves; recitation, Robert Darke; second year class song, by the class; vocal solo, "O, Dry Those Tears," Principal Steeves; recitation, George Wilson; quartette, "My Hawaii," third year girls; piano solo, Miss Jones; duet, "Let the Rest of the World Go By," Muriel Steeves and Shelley Knowles; recitation, Harry Hobbs, followed by a recitation by Orville Dunham; class song, by first year; piano solo, Tommy Harris; reading, Mac Laycox; piano duet, Margaret Munn and Florence Campbell. The program closed with the matric yell and the singing of "For We are Jolly Good Fellows."

Refreshments were served in the girls' lunch room, tables having been prepared there for all.

This is the first attempt at a function of this kind and many were heard to express their delight in being able to meet with the students in this manner.

# FOURTH of the series dealing with the establishment of the BANK OF MONTREAL at representative points in CANADA and elsewhere

**IN TORONTO**  
A YEAR after being founded, the Bank of Montreal spread its Branches westward, in July of 1818 establishing Agencies at Kingston and York.

York, which afterwards became the city of Toronto, had then just had its first stage-coach communication established with Kingston and Montreal. It was merely a settlement in a clearing amid unbroken forests from which the Indians came to trade with farmers and other members of the little community. Today Toronto ranks among the largest cities on the continent.

Of the Bank's 567 Branches, 26 are in Toronto and 207 in the Province of Ontario, including Toronto.

**BANK OF MONTREAL**  
Established over 100 years  
Total Assets in excess of \$650,000,000

# Lawn Mowers

We sell Lawn Mowers of quality and here are some of the makes we handle:

WOODYATT, PENNSYLVANIA  
DAISY, LIBERTY.

We also have in stock Planet Jr.'s new  
LAWN EDGER

To keep grounds looking neat and attractive, the grass bordering all walks must be frequently edged. This can be done very quickly and with little effort by using the Edger.

# BUTLER & WALDEN

# Why Waste Water? Put in Metal Flume and Forget It!!

When your irrigation period comes around you want to be in a position to give all the time you can spare to the proper distribution of water to your trees. Why waste this valuable time repairing and patching leaky flumes which are due for replacement?

Let us quote you on the best irrigation water carrier—METAL FLUMES.

Our engineering service is at your disposal to advise as to the best size and type to suit your individual requirements.

# SUNDAY SUPPERS ARE APPRECIATED

The matron of the hospital wishes to acknowledge with thanks the following donations received during the month of March:

No name, 8 jars fruit; Mrs. Temple, baby clothes; Dr. Lipsett, creeper roots for garden; Mrs. Block, magazines; Mrs. Solly, bandages; Women's Institute and friends, 72 dozen fresh eggs, 15 dozen packed eggs, 4 Sunday night suppers.

Special appreciation of the Sunday night supper has been expressed on several occasions by both patients and staff.

# SPECIAL COSTUMES FOR "PINAFORE"

What is probably Gilbert and Sullivan's most popular operetta, "H.M.S. 'Pinafore'" will be produced, as announced in the advertising columns, at the end of this month by The Summerland Operatic Society in the Empire Hall, Summerland.

A great deal of work has been performed by local enthusiasts under the direction of Mr. G. C. Benmore, who will be remembered as the delightful Major-General, in "The Pirates of Penzance" last year. The chorus has been trained by Mr. G. W. Cope, whose reputation is well known to Summerland music lovers. Through the efforts of Mr. S. B. Silder, the operetta will be accompanied by an excellent orchestra of twelve pieces, with Mrs. Frank Mossop as pianist. The cast includes some forty voices.

The committee is sparing no expense in this production. Music has been obtained from the Witmark Music Company, New York, while the costumes are being provided by Madam Suttie, Parisian Costumers, Vancouver. Arrangements have been made to secure the best of scenery. The Review wishes to take this opportunity of congratulating the committee, before the production, for the initiative they have exhibited.

# NEW REGULATIONS RE PARCEL POST

All parcel post mail sent from Canada to the United States must now bear a customs declaration, and all books packet be accompanied by commercial invoices, in accordance with new regulations, effective April 1st, issued at the instance of U. S. customs officials. All printed matter going into the U. S. must also be imprinted "Printed in Canada."

# FIRE DAMAGE IN O.U.G. OFFICE

Damage to the extent of four to five hundred dollars was done by fire in the Vernon office of the O.U.G. Tuesday morning. It is believed that the fire, which originated in some old papers stacked on the floor, must have started the day before. M. G. Wilson, trustee, was on his way to Vernon when the news of the fire was phoned here.

T. G. Boavis left on the noon train to spend the holidays with his son, Laurie, in Vancouver. After a visit there he will return by way of Vernon, where he will be in the office of the O.U.G. for a few days. The books of this office are being transferred to Summerland and Miss Logan, who has been assisting Mr. Wilson there, will come down to the local office.

# Launching Campaign To Advertise Apples

Apple growers of the Northwest States have decided on a nation-wide advertising campaign this year which will cost \$300,000. The advertising fund is to be raised by a levy of one cent a box. This course was decided upon at a recent meeting in Yakima.

An attempt is being made to popularize British music in America. The simplest plan would be to prohibit it.—Punch.

## SAY FINANCIAL ARRANGEMENTS TO BE BETTER

Growers to be Paid Regularly  
As Money Received by  
Local.

BANKS WILL NOT GET  
ALL OF FIRST MONEYS

Investigation Shows This Will  
Remove Chief Obstacle  
of Co-operators.

That the financial arrangements being made by the Associated Growers for operating of central and locals will be even better than at first contemplated is now indicated, according to recent authentic statements.

One proposal was that loans be made by the banks on a commodity basis, probably three separate loans covering the early summer, fall and winter pools.

Another plan, which is considered more satisfactory to growers, is likely to be adopted. Under this plan growers would receive a proportion of all moneys paid to the locals. As described by one office in touch with the new plan it would be a fifty-fifty arrangement. Banks would loan, say up to about sixty cents per box on apples and proportionately on other fruits and would be repaid by a portion of each payment received for fruit.

General Harman recently made a thorough canvass of the objections held by those growers who have not lined up with the co-operative movement and found that the predominant obstacle was the financial arrangement and that in a large number of cases it was the women who objected to their husbands joining the co-operative association. They felt that they must have a steady cash income and could not wait until the end of the season.

A report of his findings was submitted at the joint meeting of directors of locals held last week at Kelowna and will be of assistance in the effort to improve general conditions.

## CLOSED SEASON FOR LAKE FISHING

Trout in Okanagan Lake have definitely been classified as Kamloops trout, not steelhead as many believe them to be, according to G. N. Gartrell, fisheries inspector. This will require somewhat different regulations as to closed and open seasons in order to conserve these fish, which, he says, are not as plentiful as formerly.

The kickanines he describes as land-locked sockeye salmon and the natural prey, when young, of the trout.

At a recent meeting of the Kelowna Fish and Game Protective Association which Mr. Gartrell attended, a resolution was passed asking that a closed season for fishing in Okanagan Lake and tributary waters be fixed for March 15th to May 15th.

## ROBERTSON STILL FOR CO-OPERATION

R. Robertson, the well-known broker of Vancouver and organizer of the O.U.G., was in Vernon last week. Referring to his visit to the Vernon News says:

Mr. Robertson expresses himself, both from the standpoint of a one-time seller of fruit, as also now as a buyer as well, as being strongly in favor of the co-operative plan of handling the fruit crop of the province. He makes a strong point of the stabilizing effect of this plan on the fruit market, and the satisfaction of feeling that the market will be kept fairly steady, which will stimulate more regular buying on a larger scale.

J. U. Gellatly, whose interest in nut culture in the Okanagan has already given him considerable prominence, was a visitor to Summerland and Naramata this week. While here he took a number of photographs of nut trees of different kinds as pictorial evidence of the suitability of climate and soil to the production of nuts.

## ASSOCIATED MAY OPEN WAREHOUSE

Growers Sales Agency will close its Vancouver office according to an authentic report from that city. This concern is the brokerage organization formed by the O.U.G. and later taken over by a group of jobbers not affiliated with the Nash houses.

It is understood that the Associated Growers are contemplating opening a warehouse in Vancouver in order to be in direct touch with the Coast trade.

## ALLEN HARRIS TAKES ANOTHER STEP UP

J. Allen Harris, a Summerland graduate of the U.B.C. who has been studying in the University of Illinois under a teaching fellowship in chemistry, has been appointed research assistant to Prof. Hopkins, head of the inorganic division of chemistry in that institution. Allen will supervise the research work in that department.

He graduated with honors in chemistry in 1922, taking a B.A. degree and in 1923 won his M.A. He is keenly interested in the work and is evidently meeting with success.

## APPOINT COMMITTEE ON SOFT FRUITS

According to information from Kelowna the directors of the several locals affiliated with the Associated Growers, while in session there, appointed a "strong" committee to investigate, report and suggest improvements in the methods of distributing and disposing of the soft fruit crop. Names of the committee were not given.

## SLIGHT INCREASE IN VOTERS' LIST

Final revision of the voters' list of South Okanagan electoral district was made last week. Some eight hundred names were struck off and eight hundred and thirty added. The total number of those entitled to vote is approximately 4,080.

## CHOIR CONCERT AT NARAMATA

Fine Easter Program Was Enjoyed by Large and Appreciative Audience.

The concert given on Wednesday evening by the choir of Naramata church was an unqualified success, and attracted a large and appreciative audience. There was a good contingent of visitors from Summerland, including the Rev. H. A. Solly and Rev. J. H. Armitage, the former acting as chairman of the evening. During the intermission between parts, Rev. Armitage made a short speech congratulating the choir on their program.

Mrs. Languedoc presided at the piano with Mr. Weaver conducting. The various numbers were warmly received by the audience, and recalls were numerous. The proceeds of the evening will be divided between the two churches, and the amount announced in our next issue.

The program was as follows: piano solo, "The Two Lyrics," Mrs. Walters; chorus, "A Merry Life," the choir; duet, "Maying," Miss Rayner, Mr. Weaver; song, "O Solo Mio," Mr. G. W. Weaver; reading, "The Ladies' Aid," Mrs. Cross; trio, "There is Music by the River," Miss Rayner, Mr. Weaver, Mr. G. W. Weaver; duet, "The Army and Navy," Mr. Weaver, Mr. G. W. Weaver. Intermission. Chorus, "The Pilgrims' Chorus," the choir; duet, "No, Sir!" Miss Rayner, Mr. Weaver; song, "Theology," Mr. G. W. Weaver; reading, "The Charge of the Light Brigade," Mrs. Cross; song, "My Ain Folk," Miss Lawrence; trio, "The Franklin's Doggo," Miss Rayner, Mr. Weaver, Mr. G. W. Weaver; chorus, "Santa Lucia," the choir. "God Save the King."

## BUYS RESIDENCE

W. J. White, of Downtown and White, has purchased the J. C. Freeman cottage which he now occupies. C. Kelley was agent for the vendor.

## SUMMERLAND WOMAN MEETS WITH SUCCESS

As Farmer and Mother Her Work Gets Recognition.

In an article in the Vancouver Province on Women's Institutes, the present convention in Vancouver and the success with which women are meeting in farm work, special reference is made to an unnamed Summerland woman. First the experience of two women on a ten-acre farm near Vernon is referred to and the statement is made that their farm is rapidly becoming famous for the proverbial success of its owners. Continuing, the writer says:

Another woman at Summerland on a farm owned jointly with her husband, did all the work on half an acre planted to peppers, marketing two and one-half tons at 12 cents a pound in addition to which she harvested, without assistance, an acre of radish seed. This woman is twenty-seven, looks eighteen, and her baby, well along in her second year, shows by perfect proportions, the scientific feeding and open air sleeping which her mother has insisted upon since her birth.

## TO MANUFACTURE PICKLES AND CATSUP

Oliver Chemical Company, Limited, Penticton, operating a pickle and catsup factory, is making preparation to turn out two carloads of dill pickles and twenty-five thousand bottles of catsup next fall. The company has purchased a car of vinegar from the O.U.G. to be used in the manufacture of the above products.

## MUST FREE STREETS OF ALL OBSTRUCTIONS

That the municipal authorities do not intend to permit the misuse of streets is apparent from fresh instructions issued at the regular meeting of the council on Saturday when the constable was given a further reminder that he must have the street sides kept clear of all obstacles. Wood, vehicles or other obstructions will not be allowed space on the streets.

The speed limit on the Pacific Highway between New Westminster and the boundary has been fixed at thirty miles an hour and notices to this effect have been displayed. The limit in the town of Cloverdale is reduced to fifteen miles and this will be rigidly enforced.

## SHIPPERS MEET IN CONFERENCE

Representatives of Independents and Associated Getting Together.

Morning, afternoon and evening sessions were held by representatives of nearly all the fruit shipping concerns, including the Associated, at a meeting in Kelowna on Tuesday.

Both C. A. Walter and Willis Walter of Walters, Limited, Summerland, attended. Messrs. Howe, Barrat, Chambers and McNair represented the Associated Growers; the Occidental was represented by Leo Hayes; Federated Orchards, Penticton, by Mr. Finch; Keremose Packing Company by Mr. Armstrong. Others represented or present were E. C. Skinner, Vernon; Messrs. Rowcliffe, B. McDonald, Duggan, H. Lee, Kelowna; Co-operative Farmers, Vernon; McDonald and Co., Armstrong; Chas. Lowe and Mr. Jennens and the manager of the Kelowna branch of the Bank of Montreal.

The press was not admitted to these conferences and it was mutually agreed that no information would be given out but it is understood that considerable progress toward effecting a joint arrangement to eliminate competition was made and there was a feeling of confidence that satisfactory working arrangements would be accomplished before the shipping season opened.

## EXTENDING HIS AREA UNDER GLASS

Another glass house is being added to his equipment by A. McLachlan. This one will be 26x80 feet. Mr. McLachlan is contemplating providing steam heat for all his glass houses.

Near Fresno, California, is a big fig orchard twelve thousand acres in extent, the largest orchard of its kind in the world.

## SHOULD BURN PRUNINGS NOW

This year all prunings must be burnt by the first of May, according to a recently published statement. This leaves but a few days for any who have not already burned prunings to get this work done.

## NEW VOTERS' LIST SHOWS INCREASE

Many Names Removed But More Added—Another Revision Soon.

Mr. D. H. Rattenbury, Registrar, has issued the following figures regarding the voters' list for the South Okanagan constituency:

Last year the total number of names on the voters' list was 4,194. Of that number 876 were struck off at the last court of revision and 964 were added, so that there are now 4,282 persons in this riding entitled to vote at the coming election.

The registration, according to locality, is: Bear Creek, 27; Benvoulin, 101; East Kelowna, 172; Ellison, 120; Glenmore, 109; Joe Rich, 25; Kelowna, 1,671; Mineola, 37; Naramata, 200; Okanagan Centre, 51; Peachland, 256; Reid's Landing, 11; Rutland, 255; South Kelowna, 130; Summerland, 286; West Summerland, 529; Westbank, 133; Winfield, 169.

There will be another Court of Revision on May 9th, when, by appearing personally before the Registrar, those who have been omitted from the list can have their names added. The list is now posted in the post offices for the information of all and sundry.

South Okanagan constituency is now amongst the leading electoral districts of the Interior in voting strength.

## HOLDING LAST CAR TO BUYER'S ORDER

Walters, Limited, state that they are still holding the last car of apples which was reported to be shipped last week. The empty car was put on the spur and the fruit was ready for loading when a wire was received requesting that shipment be delayed a few days. The sale was made a month or two ago.

## C. P. R. BUILDING ANOTHER CAR CARGE

Visitors to Okanagan Landing report considerable activity there. Besides the work on the S.S. Seacom, which is now out of the water for an overhauling and painting in preparation for summer business on the lake, a large barge is under construction for C.P.R. lake service.

J. S. Galbraith and Sons, Vernon, were heavy losers by fire a few days ago, when their large implement warehouse and stock in trade were completely destroyed by fire.

## WOULD FIGHT FOR THE HOME MARKETS

That the Associated should enter into competition with independent shippers with the object of ousting them from the home markets and forcing them to put their fruit in storage or export it was the purport of a resolution before the joint meeting of local directors held at Kelowna last week. It was suggested that this action be taken should the Associated fail to obtain 90 per cent control, but the resolution failed to receive sufficient support.

## UNIVERSITY PLAYERS COMING NEXT MONTH

Under the auspices of the Summerland Boy Scouts the University Players will present their production, "The World and His Wife," at Empire Hall on May 17th.

The University Players made a good impression in their first appearance here last spring and no doubt the news of their coming will be received with delight by many of our citizens.

## AUTO CLUB PLANS TOWING SERVICE

The establishment of a towing service throughout the entire province has been decided upon by the Automobile Club of British Columbia. Garages will be selected at all points and the charges will be allowed these stations on the zone system.

A list of selected leading hotels will be shortly compiled by the Club, and will be sent to all club members as places where the fare is to be recommended and the tariff reasonable.

Russell Munn, second son of Mr. and Mrs. A. G. Munn, is now foreman of a packing house in an orange district in southern California. For some time after leaving here he was in charge of a picking crew and has recently been promoted to the more responsible position.

## THEATRICALS BY AMATEURS

St. Andrew's Ladies' Aid Stage An Amusing Entertainment in Rialto.

St. Andrew's Ladies' Aid realized over eighty dollars as the result of their concert held in the Rialto Theatre Monday evening. The program was made up chiefly of two humorous sketches, the first of which, "The Obstinate Family," revealed the ruffled side of family life, and was well presented by the actors. Mr. C. J. Amm and Mrs. T. B. Young as the young husband and wife, Mrs. Stovon and J. O. Smith as "the old folks" and Mrs. J. D. Wood and T. B. Young as the two servants took their parts well and were true to the name, "The Obstinate Family."

In the second sketch, which was probably the more comical of the two, T. A. Walden as "Uncle Joseph," and Keith Elliott as "Mr. Smith the inventor," were splendid and provoked much merriment from the audience. Mrs. A. Rutherford as Uncle Joseph's wife was a most capable managing type of woman, while Mrs. Keith Elliott as the girl, Kitty, and her sweetheart as acted by C. J. Amm, filled their places splendidly. Mrs. Schwass, though with a somewhat minor part of the servant, did her part splendidly and in a manner that appealed to all.

A pleasing addition to the program were solos by Misses Kathleen Nield and Alma Lott and by Ben Newton. All were much enjoyed and heartily cheered by an appreciative audience.

## LOCAL MEN SPEAK TO FRUIT GROWERS

J. R. McLarty, plant pathologist at the Summerland Experimental Station and R. C. Palmer, assistant to the superintendent, addressed a meeting of fruit growers at Glenmore on Monday. Mr. Palmer spoke on "Apple Storage," while Mr. McLarty's subject was "Diseases of the Orchard," in which he dealt particularly with fire blight.

## DELEGATES TO POLITICAL CONVENTION

Summerland Men to Meet with Others to Choose a Candidate.

A. T. HOWE CHOSEN FOR N. OKANAGAN

Mrs. McGregor, Penticton, Is Seeking Election—Some Other Candidates.

Summerland Liberals met Tuesday night and selected seventeen delegates to attend a convention to be held in Kelowna tomorrow for the purpose of selecting a candidate to oppose J. W. Jones, M.L.A., in this constituency. The delegates selected were, W. Ritchie, president; A. H. Steven, secretary; Jas. Ritchie, J. A. Darke, A. Stark, J. R. Brown, T. J. McAlpine, Geo. Craig, Geo. Anderson, Peter Roe, W. A. Caldwell, T. J. Garnett, E. R. Butler, W. J. Beatlie, J. R. Campbell, A. Rutherford and R. Mitchell.

W. C. Kelley is president of the Liberal Association in South Okanagan constituency.

It is understood that the Provincial Party will not run a candidate but a third candidate may be put in the field by the Labor Party of which J. W. S. Logie here is leader.

Word was received by The Review last Thursday, too late for publication, of the choice of A. T. Howe, president of the Associated Growers of B.C., as candidate in North Okanagan electoral district of the Liberal-Conservative Association. He was the unanimous choice of the convention and is considered a strong candidate. Mr. Howe is well known through his activities as president of the Associated Growers and has been a resident of the Vernon district for twelve years and has a large orchard there.

Presumably Dr. K. C. MacDonald, the present member, will again be in the field as Liberal candidate. Price Ellison, Okanagan representative for many years, has announced that he will contest North Okanagan as an independent candidate. In the Similkameen Mrs. McGregor wife of Dr. McGregor of Penticton, will be the Liberal standard-bearer against W. A. McKenzie, M.L.A., Liberal-Conservative. It is almost certain that the Provincial Party will also have a candidate in that riding.

## MORE FUNDS FOR HIGH ATHLETICS

High school athletic club held a very successful dance in the Parish Hall on Tuesday evening when a large crowd of young folk attended, many friends from Kelowna and Penticton among the number.

Saskatoon blossoms had a prominent place in the scheme of decoration, which had been tastefully carried out by the students.

The music was provided by Misses Ida Shields and Thelma Lockwood at the piano and J. Kean playing the traps.

The dance was arranged for the purpose of cleaning up an indebtedness of the athletic club and to provide needed funds. The net proceeds of the dance were about twenty-seven dollars.

## AUTO THIEF IS NOW A PRISONER

Miko Hoarno is now a prisoner in Okla with sentence of eighteen months for stealing a Ford car belonging to H. Vonus, Penticton chief of police. He was arrested at Ellensburg, west of Wenatchee and brought back to Penticton.

He confessed to breaking into a general store in Moss, Washington, and stealing cash and a quantity of jewelry. This property has been returned to the owner through the sheriff of Okanagan County.

Hoarno's age is stated to be eighteen years.

He was also found guilty of stealing a bicycle at Vernon, which was valued at \$37.50, and selling it for fifteen dollars.

The greatest need—common sense.

## Easter in Summerland Churches

Stripped of all symbolism, the innate beauty of the Easter season is deeply graven on all Christian hearts. It is the chief festival of the Christian church throughout the world. It is the day and season set apart to honor the first Man who conquered Death. After the darkness and despair, when Christ was crucified, what a pall of hopelessness for his followers! There was their promised Messiah apparently lifeless, as mortal as any of their kindred. What a blankness to confront! Then at the dawn of the first Easter morning, when the season of Oblivion had passed, Christ rose, clothed in the immortality which he had promised, and yet promises, to his people.

It was, therefore, fit and proper that the sanctity of the day of Easter be duly observed in all the five churches of Summerland. At both morning and evening services at the churches fitting liturgy prevailed and crowds attended them all. Bathed in a sea of summer glory there was a newness in the verdure of the ground, a freshness in the raiment of the trees, a fragrant breath of that which spelled "Resurrection" in the bursting buds and white blossoms. It is the ineffable something in mankind which demands life eternal, a tangible something beyond the tomb, the God, the Ego, the Spirit within one's self planted there by the great Omnipotent God of mankind—and it is in answer to this great call of Nature that men who seldom cast a shadow across the portals of a place of divine worship would their feet thither on Easter Day.

**St. Stephen's Church**  
In St. Stephen's church special Easter services were held. The celebration of the Holy Communion was observed at 8 a.m., followed by the children's Easter services at 9.45. At 10 a.m. the regular church service and choral celebration took place and again in the evening service was conducted by Rev. H. A. Solly, whose sermon was on the story of the Resurrection.

The church was beautifully decorated with calla lilies, saskatoon, tulips and narcissi in profusion, symbolic of the spirit of Easter. A large crowd attended these special services.

**Baptist Church**  
Summerland Baptist church observed Easter Sunday by special services. In the morning the pastor, Rev. Z. L. Fash, preached on "Easter Joy," and the choir rendered special Easter anthems. There was a large attendance at the morning service and the church was very beautifully decorated with Easter lilies and wild flowers. At the evening service there were also special Easter anthems by the choir and a solo by Mr. J. O. Steeves, "Rest, Rest for the Weary."

The pastor preached a sermon on steadfastness in view of the resurrection and at the close of the preaching service twelve halleluvers were baptized. A large congregation attended this service.

**St. Andrew's United**  
At the morning service in St. Andrew's church the pastor spoke on Revelations 1: 18, "I am He that lived and was dead and am alive for ever more," pointing out the on-

during, loving life in Jesus Christ and God's nearness at all times. Easter opens the door to a larger hope and a fuller experience. In the evening "A Journey to Emmaus" was the subject. Jesus revealed himself as companion, teacher and friend. This is ever characteristic of our risen Lord. "All unclean the Master walketh by his tolling servants' side." "Then our eyes are opened to know him and we become the richer by his company. Easter music was enjoyed at both services in this church, in the morning special anthems and a solo, "The Life Everlasting," from the cantata, "The Daughter of Jairus," was sung by Ben Newton, and in the evening J. O. Smith and Ben Newton sang a beautiful duet from Stainer's "Crucifixion" and the choir rendered special anthems, including Stainer's "They Have Taken Away My Lord," and "Te Deum."

**Lakeside Methodist**  
Morning service in the Lakeside Methodist church was well attended and Rev. H. J. Armitage delivered a special Easter message. An Easter anthem was rendered by the choir, and a solo given by Mr. Jas. Clark. A christening service was held at the close of the preaching service. Special collection was taken for the local Women's Missionary Society.

**Oddfellows' Service**  
In the evening the brethren of the local lodge of The Independent Order of Oddfellows gathered in all their regalia to the Lakeside Methodist Church, and those were supplemented by visiting members of the order from Penticton and Peachland. The church was crowded to the doors.

# EDITORIAL AND FEATURE PAGE

## The Summerland Review

Established August, 1908.  
 Published at Summerland, B.C., every Thursday by  
 THE REVIEW PUBLISHING COMPANY, LIMITED  
 Ralph E. White, Editor and Manager

An independent family newspaper covering Peachland, Summerland and Naramata and adjacent districts.

Member of Canadian Weekly Newspapers Association.  
 Member of British Columbia Selected Weeklies.

Subscription Rates—In British Empire, in advance, \$2.50 per year; six months, \$1.40. To U.S.A. and other countries, \$3.00 per year.

Advertising Rate Cards and information respecting territory and samples of paper mailed upon request, or may be seen at the office of any advertising agency recognized by the Canadian Press Association.

Advertisers must have copy in by Tuesday noon in order to insure changes for standing advertisements. New display advertising copy can be accepted one day later.

All instructions for cancellation or alteration of advertising must be in writing.

Correspondence—Letters addressed to the Editor and intended for publication must be short and legibly written on one side of the paper only. The longer an article, the shorter its chance of insertion. All communications must bear the name of the writer, not necessarily for publication. The publication or rejection of articles is a matter entirely in the discretion of the Editor. No responsibility is assumed by the paper for the opinions expressed by correspondents.

Typographical Errors—In the event of a typographical error, advertising goods at less than the proper price, the newspaper will furnish letters to be posted in the store stating the correct price, but goods may not be sold at the price printed and the difference charged to the newspaper.

Thursday, April 24, 1924

Here is rather an unusual editorial comment which appeared in a recent issue of a weekly newspaper:

"This newspaper has never printed scandal for the sake of printing scandal. This newspaper abhors scandal. But this newspaper is first, last and always what an honest-to-God newspaper should be—a mirror of the life of the public it serves. The people who do shameless things fear the light of publicity. They don't want folks to know. The fear of exposure is a great deterrent of immorality. It is not a wholly efficient deterrent, it is true; no more than capital punishment is a deterrent for capital crimes; but it helps. Who's next?"

According to the new issue of McKim's Directory of Canadian Publications, there are 1,499 newspapers and regularly published periodicals in Canada, against 1,553 a year ago. Daily newspapers have decreased from 121 to 114; semi-weeklies from 34 to 30; and weeklies from 1,022 to 975. On the other hand, a small increase has taken place during the year in the number of monthly and semi-monthly publications.

"There is no institution in any town which does more or as much to build up the community as a well edited newspaper and most papers are as well edited as the town they serve warrants by their patronage." — From an address on community building.

## Canadian Women's Movement Has Invaded Old England

One of our readers, a member of the Summerland Women's Institute, has sent us an article from "Overseas," on the subject of Women's Institutes, with the request that it be published.

In these days, when there is so much to depress and sadden us on every hand, one welcomes with redoubled enthusiasm anything which makes for happiness and contentment. And the Women's Institute movement undoubtedly makes for both these things.

Readers of "Overseas" will hardly need to be told what a women's institute is. The first one was founded in Canada, among the wives of the farmers, and during the war the idea was brought over to England, and women's institutes were started in the Old Country under the auspices of the Agricultural Department. They grow and prospered to such an extent that the movement was very soon able to stand on its own feet, and today there are hundreds, yes, thousands of institutes scattered up and down the countryside, with an ever-increasing membership. It is not easy in a short account to say what women's institute do. They do such a number of things, and vary according to the locality in which they are situated, but in one of their official leaflets I see the authorities boldly declare that "a women's institute is interested in all questions affecting the home, the country or the nation. The field, therefore, is as wide as life. The women's institute is a rural institution, and does not exist in the towns. It has done immeasurable service in bringing villages into co-operation with one another, and with other villages and country towns.

It stimulates latent talent; it gives an intelligent country-woman a chance that hitherto she has never had of using and developing her abilities, for the whole organization is democratic through and through, and the best woman for the job, be she

chickens or ploughman's wife, comes to the top.

Not long ago I was asked to judge at the Surrey Federation of Women's Institutes Exhibition, held at that attractive, neat and cosy little town of Guildford.

AND WHAT I SAW THERE.—I had to judge three classes: raffia work, leather work, and soft and hard toys. Besides these three, there were twelve other classes, not to mention a section given up to food production, where I saw displayed home-made cakes, bread and sweets, jam, cheese and butter and other things. It took me every minute of three hours to get through my work. The soft toys made by a village industry were far better than a number of toys of the same kind that are bought in the smaller shops. And do not imagine that these women were satisfied with fluffy and misshapen animals. Not at all. There were some wonderful camels made of brown cloth, very well modelled, with a little black boy perched on the top of each. Two geese and Polar bears and squirrels were excellent too.

There were a number of entries in the leather class, and the work was good, but lacked originality. There were suede moccasins, embroidered with beads, bags of every kind, gloves and purses. Perhaps the best work at the Exhibition was the cross-stitch needle-work, the revival of an ancient peasant craft. In design, feeling and colouring, this work was like admirable.

One stall was given up to the exhibition of things made from "waste." One woman had turned a rough wooden box into a kitchen cupboard, and had filled the shelves with neatly labelled old tin boxes and bottles, containing every kind of grocery. Another had soldered handles and spout on to the container of an old-stove lamp, making of it a very useful kettle. Another had cleverly turned old paper into a charming little papier-mache tea set,

## Council of Education Plans Programme

Sir Robert A. Falconer, K.C.M.G., President, University of Toronto.

Mr. Vincent Massey, Member, Board of Governors, University of Toronto.

Sir Arthur Currie, G.C.M.G., Principal, McGill University.

Mr. E. W. Beatty, President, Canadian Pacific Railway, Chancellor, McGill.

The recent announcement that the third triennial conference on education and citizenship to be held under the auspices of the National Council of Education will take place in Montreal in 1926 recalls the invaluable work this organization is performing.

Under the honorary presidency of His Excellency the Governor-General and the presidency of Mr. Vincent Massey, president of the Massey-Harris Company, Toronto, the Council includes many of Canada's leading citizens, among them Sir Robert A. Falconer, K.C.M.G., president of the University of Toronto; Sir Arthur Currie, G.C.M.G., principal of McGill University, and Mr. E. W. Beatty, president of the Canadian Pacific Railway. It has as its principles: (1), That education should concern itself with the development of character and should provide a full preparation for life; (2), That education is a spiritual process; (3), That education is imparted by personality—its success or failure rests with the teacher; (4), That education is everybody's business; and (5), That Canada's education must be Canadian in its ideals.

The principal activities of the Council are two-fold. The National Lectureship Scheme is a plan under which distinguished men and women—both Canadians and visitors from Great Britain and other countries—are engaged to speak on education (broadly interpreted) throughout Canada. The Bureau provides an organization for the exchange of information between the Provincial departments of education, for the reception and diffusion of ideas from outside the Dominion and for dispensing data concerning education in Canada to the outside world. Until the Council established this bureau, Canadian educational authorities were

dependent upon the American Bureau of Education at Washington for all educational information.

The Council was formed as a result of a conference held in Winnipeg in 1919 and attended by over 1,200 persons from all over Canada. The second conference was held in Toronto in April of 1923 and was attended by about 1,500 persons, representing the nine provinces. This conference, through many brilliant speakers on the program, among them Sir Michael Sadler, Sir Henry Newbolt, Lord Robert Cecil and Sir Robert and Lady Baden-Powell, sought to set forth the Council's conception of the role of education as a citizen builder.

The plans for this third conference now pending were laid at a meeting held in Montreal, presided over by Sir Arthur Currie, in the absence of the chairman, and attended by several of the leading officers of the Council in the persons of Mr. Vincent Massey, president; Mr. S. B. Gundy, chairman of the finance committee, and Major F. J. Ney, executive secretary.

At present, the Council is engaged in preparing a program for the second triennial period. It has secured as educational secretary Professor J. A. Dale, of the Social Service Department of the University of Toronto, whose duties will include the editorship of a series of volumes on educational problems. The success of the National Lectureship Scheme inaugurated last year, which established important contact with the leading minds of Great Britain, will be followed up, beginning in September, by contributions from Dr. Finley, editor of the New York Times, and once a commissioner of education for the state of New York, from the Stratford-Avon Shakespeare Fellowship Players, under the direction of Mr. Bridges Adams, and from a number of other distinguished speakers.

## But Few Varieties Desired By Market

In response to a request by Col. Scott, of the Salmon Arm local, D. McNair of the sales department of the Associated Growers of B. C., Limited, has given his views on the subject of varieties of apples. In his published statement Mr. McNair says:

I have prepared complete lists of all varieties handled by the Associated Growers from 1923 crop and enclose these herewith. They have been grouped as follows:

"A"—This group of varieties, in my opinion, should eventually constitute the entire assortment to be shipped from B. C., and growers should immediately begin condensing so as to reduce the commercial crop to these kinds as quickly as possible. This list, of course, is subject to the addition of any new varieties which may yet prove popular as good sellers and keepers.

"B"—There are many problems in the fruit business peculiar only to B.C., and to meet some of these situations—such as catering to the export market and to our Canadian

which she had afterwards enamelled in blue and white. Nor was this all. A choir of women from various surrounding villages gave concerts during the afternoon, and others were going in for Shakespeare, essay and poem competitions.

Does not all this open a vision to you of what country life is rapidly becoming in England—alive with hope, with aspiration, and with happiness? Instead of dullness and monotony, there is now brightness and activity. As the sponsor of the Exhibition, the Chairman of the Surrey County Council, said, the first duty of every one is to be happy, for if we are happy ourselves, we cannot help making others happy too. I strongly advise any of you who are within reach of a women's institute to co-operate with it in some way, for you will certainly benefit yourself if you do.

In these days of tragic destruction, of the shifting of old landmarks, of the break-up of civilization as we used to know it, there are six movements that are so constructive that we ought all to belong to one or other of them. And they are the Boy Scouts, the Girl Guides, the Women's Institutes, the Over-Seas League, the English-Speaking Union, and the League of Nations. They cover all the ages of man and can be joined by most of us, no matter where we live, or who we are.

prairies—I think those varieties which are grouped under "B" should be tolerated. In this list you will find the "Duchess," and this is one variety which the province should endeavor to reduce immediately by destroying the trees which are in late maturing districts.

"C"—As you know, B. C. is lamentably short of long keeping varieties and for this reason I would recommend retaining varieties under this group. They cannot be regarded as high class, or varieties over which the trade is in general clamor, but nevertheless are almost all good for storing, and now that we have them producing, in the absence of better storage kinds, these might just as well be kept.

"D"—This group comprises what we look upon as genuine "off" varieties, and the quicker they are grafted or in some way eliminated, the sooner the congestion of marketing will be relieved.

Depreciation in values of the better varieties will also be overcome with large results when these undesirable varieties are not thrust on the market.

One of the greatest problems confronting the apple markets of B. C. is that a large percentage of our tonnage consists of early maturing varieties which must be sold in autumn and early winter.

Opinions differ on the subject of apple varieties and you will understand the foregoing reflects the viewpoint of a salesman, and does not attempt to adopt such recommendations as law.

For instance, some of the varieties listed in the "discards" thrive exceptionally well in certain districts, and their general quality is superior to that of the same variety produced in other districts.

When such is the case, it is advisable that the growing of same be continued, but this is only applicable to a very few.

You will understand that the initials A, B, C, D, are not for the purpose of denoting comparative values, but are used only for the purpose of qualifying.

Your truly,  
 Associated Growers of B.C., Ltd.  
 D. McNAIR,  
 Sales Department.

Following are the lists:—

"A"—  
 Wealthy, McIntosh, Delicious, Jonathan, Newtowns, Winesaps, Rome Beauty, Stayman, Winter Banana, Spitzenberg, Wagner.

"B"—  
 Transparent, Duchess, Gravenstein, Cox Orange, Snow, Spy, Baxter, N. W. Greening, Ontario, Talman Sweet, Vanderpool, Scarlet Pippin, St. Lawrence, Baldwin.

"C"—Good Keepers  
 Arkansas Black, Ben Davis, Black Twig, Black Ben, Delaware Red, Gano, Golden Bens, Stark, York Imperial, Salome.

"D"—Off Varieties  
 Early Colton, Early Harvest, Live-land Raspberry, Red Astrachan, Red June, Sweet Bough, Tetofsky, Jeffries, Wisnors Dessart, Grimes Golden, King David, Aiken Red, Alexander, Allington, Apple of Commerce, Babbit, Betingholmer, Belle de Boscop, Bolloleur, Ben Hur, Benton County, Bismark, Blenheim Orange, Blush Pippin, Bottle Greening, B.C. Apple, Canada Baldwin, Canada Red, Canada Reinette, Cayuga, Collini, Champlain, Chelan, Christmastime, Colvert, Coopers Market, Cranberry Pippin, Cunningham, English Baldwin, Fallwater, Fall Pippin, Goniton, Gilliflower, Gloria Mundi, Golden Ortoloy, Golden Russett, Golden Sweet, Greasy Pippin, Greening, Hans, Holland Pippin, Hoover, Hydes King, Jersey Sweet, Kalhn of Spitz, Keswick Codling, King of Tompkins, Lawrence, Late Transparent, Limbor Twig, Lemon Pippin, Longhold, Maldon's Blush, Mann, McMahon, Missouri, Mother, Mammoth Pippin, Nonsuch, N. Y. Wine, Orenco, Ortleay,

## Praises Work of The Weeklies

The Toronto Daily Star, which has the largest Canadian circulation of any daily newspaper in Canada, recently took occasion to print an editorial nearly a column long in praise of the work done by small-town newspaper men in interesting local merchants in advertising. The pith of the article is in the following paragraphs:

"Some of the small-town weeklies that now carry display advertising which vies with that in the metropolitan dailies, used to find, some years ago, that local merchants scarcely believed in advertising at all.

"The notion that a merchant advertised out of the goodness of his heart in order to help the newspaper and ought, therefore, to have something to say about the policy of the paper, used to prevail widely.

"One hears little of it now, except from persons who know nothing of the facts. An advertiser advertises because it increases his business, and if he stops his business decreases."

This hits the mark, says the Trail News. Five full page advertisements on consecutive pages without an intervening lone column of news matter were not published in a recent issue of The Province through the goodness of heart of firms concerned, but because of their desire to bring the prices before the buying public.

What applies in a large city, where there are several large department stores and competition is keen, certainly applies in like measure to the small rural town, where the merchant who does not advertise thereby at once plays into the hands of his competitors who do.

But little of a stock can be shown in store windows, while well-written and properly displayed advertising seeks out prospective purchasers in their homes and brings them to the store, no matter whether it may be on a side street.

The man who advertises what people want to buy, either because of the uniqueness, quality, or price, or because of a combination of all these features, is the man who will get the trade, while his competitors who regard advertising as an expense and not as an investment, are groaning over the dullness of business.—Ex.

Williams Early, Winterstein, Wolfe River, Xmas, Willow Twig, Rhode Island, Bailey Sweet, Beauty of Bath, Lord Duby, Louver.

**SYNOPSIS OF LAND ACT AMENDMENTS**  
**PRE-EMPTIONS.**  
Vacant, unreserved, surveyed Crown lands may be pre-empted by British subjects over 18 years of age, and by aliens on declaring intention to become British subjects, conditional upon residence, occupation, and improvement for agricultural purposes.  
Full information concerning regulations regarding pre-emption is given in Bulletin No. 1, Land Series, "How to Pre-empt Land," copies of which can be obtained free of charge by addressing the Department of Lands, Victoria, B.C., or to any Government Agent.  
Records will be granted covering only land suitable for agricultural purposes, which is not timberland, i.e., carrying over 5,000 board feet per acre west of the Coast Range and 8,000 feet per acre east of that Range.  
Applications for pre-emption are to be addressed to the Land Commissioner of the Land Recording Division, in which the land applied for is situated, and are made on printed forms, copies of which can be obtained from the Land Commissioner.  
Pre-emption must be occupied for five years and improvements made to value of \$10 per acre, including clearing and cultivating at least five acres, before a Crown Grant can be received.  
For more detailed information see the Bulletin "How to Pre-empt Land."  
**PURCHASE**  
Applications are received for purchase of vacant and unreserved Crown lands, not being timberland, for agricultural purposes; minimum price of first-class (arable) land is \$5 per acre, and second-class (grazing) land \$2.50 per acre. Further information regarding purchase or lease of Crown lands is given in Bulletin No. 10, Land Series, "Purchase and Lease of Crown Lands."  
Mill, factory, or industrial sites on timber land, not exceeding 40 acres, may be purchased or leased, the conditions including payment of stumpage.  
**HOMESITE LEASES**  
Unsurveyed areas, not exceeding 20 acres, may be leased as homesites, conditional upon a dwelling being erected in the first year, title being obtainable after residence and improvement conditions are fulfilled and land has been surveyed.  
**LEASES**  
For grazing and industrial purposes areas not exceeding 640 acres may be leased by one person or a company.  
**GRAZING**  
Under the Grazing Act the Province is divided into grazing districts and the range administered under a Grazing Commissioner. Annual grazing permits are issued based on numbers ranged, priority being given to established owners. Stock-owners may form associations for range management. Free, or partially free permits are available for settlers, campers and travellers, up to ten head.

**NARAMATA NEWS**  
Current Events of Town and District  
The members of the Women's Auxiliary held the regular meeting on Thursday at the home of Mrs. Cook, Mrs. Languedoc presiding. There was a good attendance, and considerable work accomplished. Tea was served by the hostess, assisted by Mrs. Steele of West Summerland.  
At the Easter Day service of the Union church, Rev. H. J. Armitage preached on the enquiry of Job, "If a man die, shall he live again?" and dwelt on the ever recurring growth of springtime as one of the answers. The choir gave Barnby's anthem, "Awake up, my glory," and led the special Easter hymns. The church was very tastefully decorated by Mrs. Simmons, some choice flowers being lent by various members. There was a large congregation.

The Farmers' Institute held their monthly meeting on Monday evening, the church building being used for the occasion to allow of the screening of stereopticon views shown by Dr. Fraser of the U.B.C. to illustrate a lecture on "Organic Evolution." The chairman, Mr. H. P. Salting, speaking on the minutes of the previous meeting, explained that the members of the membership committee were attending a gathering of the Co-operative directors, and he was therefore unable to announce the result of their campaign but he urged the need of fresh membership to the Institute to make it effective. Miss Enid Raynor contributed the favorite Indian song, "By the Waters of Minnetonka," after which the lecturer gave a short outline of the principles of organic evolution, as so far understood, the subject being elucidated by photographic views of various stages of development of animal life. A vote of thanks followed the address, and the meeting closed with the National Anthem. Mrs. Dean Walters presided at the piano.

Mr. and Mrs. Russell Wells and family were visitors to the Lyons family on Monday.  
Mr. J. M. Robinson, with Mrs. Robinson and daughter, returned on Friday from a long stay at the Coast.  
Mrs. T. Williams is spending a few days in Penticton visiting her daughter, Miss Maida Williams.

Messrs. Mitchell Bros. have rented the office formerly occupied by the Bank of Montreal, and are conducting a transfer business.  
Mrs. Armitage of Summerland was in Naramata on Tuesday to attend the W.C.T.U. meeting held on that day.  
At a meeting of directors of the local co-operative on Monday evening, Mr. F. W. Rolt was re-elected president, with Mr. W. S. Young as vice-president, and Mr. A. T. Horswill secretary.  
Mr. and Mrs. Carroll Aikins returned on Saturday morning, after spending some months at Seattle and Vancouver.  
"I know what pleasure is, for I have done good work."

**A Destructive Insect**  
An inconspicuous insect called the fruit-tree leaf-roller did considerable damage to the orchards in the Okanagan Valley last year, and is held responsible for the bulk of the cull apples that appear in the crop. The caterpillar is described as being approximately only three-quarters of an inch in length when fully grown, uniformly pale green in color, except the head and first segment which shades from pale brown to dark brown. The moth is a dull rusty red with silvery markings on the fore wings, and has a wing spread of an inch or less. The eggs pass the winter on the limbs and twigs of the orchard trees. They commence to hatch with the swelling of the buds in the spring, feeding upon the foliage or young fruit during the months of May and June. Maturity of the caterpillar is reached late in June.  
Circular No. 10 of the Department of Agriculture at Ottawa describes the insect and its habits. The fruit attacked continues to develop but assumes a deformed shape. Wild as well as cultivated plants are attacked. The use of miscible oil as a spray is recommended by Mr. E. P. Venables of the entomological laboratory at Vernon, B.C. The minimum effective strength is one part of miscible oil to twelve parts of water. This spray is used only for dormant applications, that is, before the buds have commenced to open. Poison sprays are also recommended after vegetation has commenced. Eight pounds of powdered arsenate of lead to one hundred gallons of water should be applied as a spray at the time the bud clusters are separating, and again as soon as the blossom petals have fallen.

**The Savoy Opera**  
With "H.M.S. Pinafore" in sight of port, it may be interesting to recall something of the history of this famous series of comic operas which have become "classics" in every English-speaking country.  
"Pinafore," the third of these, was first produced at the Opera Comique Theatre, London, on May 28th, 1878. It may be noted in passing that, although it is usual to speak of these works as "Savoy Operas," it was not until the sixth production, "Iolanthe," that Gilbert and Sullivan found a home for their partnership at the famous theatre in the Strand, which now seems so closely associated with their memory.  
Many writers have tried to analyze these operas in order to find the secret of their undying popularity. The fact that they were and are "different" does not altogether account for it. Gilbert's methods were hailed, we know, as marking a new departure in things theatrical. They showed a definite effort to break away from the jingling inanities of the old burlesque and met with instant welcome. Gilbert himself indignantly repudiated the term "Gilbertian humor," but the public insisted, and still insists, that he made a certain type of humor peculiarly his own. Quaint, topsy-turvy situations, which he used so much in his "Bab Ballads," crop up again and again in his later work, and traces of these popular old poems are to be found in almost every one of his theatrical productions. Any dramatic author could and, alas, can and does place a red-nosed comedian on the stage and trust to his buffooneries to supply the place of wit. It was left to Gilbert to exploit the new method of introducing highly dignified characters, placing them in absurd situations, and making them utter the most incongruous sentiments with supreme unconsciousness. Add to this his impish delight in poking fun at dignitaries and venerable, if slightly moth-eaten, institutions, as, for instance, the Judge in "Trial by Jury," the House of Lords in "Iolanthe," and the immortal First Lord of the Admiralty in "Pinafore," and we have some of the ingredients of a mixture which appeals particularly to British tastes. Moreover, since the personalities and institutions are mostly with us, still, it is a mixture which keeps its freshness.  
Another innovation introduced by Gilbert is to be found in his employment of the chorus. In his hands the chorus became a real part of the action of the piece, subsidiary characters, as it were, instead of the usual crowd of uninterested individuals who stalked on at intervals, sang their allotted music, and stalked off again. Perhaps this may account to some extent for the popularity of these operas with amateur performers, since even the humblest member of the cast can feel that he or she is taking an active part in the plot's development.  
Sullivan's reputation as a musician stands so high that the popularity of his work amongst music lovers needs no explanation: "But the remarkable thing about the music of the Savoy Operas is that it gives equal pleasure to the 'high-brow' musician and to the man who only knows that he likes a good tune. It is doubtful if Sullivan's more serious work, good as it is, will stand the test of time as well as the operas, for it is more conventional and seems to lack the lightness and charm which are so characteristic of the latter."  
Although both author and composer did excellent dramatic work individually, and with other collaborators, before and after their partnership, it is noteworthy that practically none of it is remembered today. It would seem that the secret of their combined success was due, as in so many other fields of effort, to perfect teamwork.  
The first opera of the series, "Trial by Jury," appeared in 1875, and was somewhat in the nature of an experiment. It was in one act, with but five principal characters, and most unpre-

**PALMOLIVE SHAVING CREAM**

**FREE—10 Much Finer Shaves!**  
**Cleaner Shaves—Quicker**  
with no skin irritation!  
If you were paid for putting into words the perfect shave, you would probably define it as... "the cleanest, quickest, easiest on skin."  
Because that's what 1000 men told us a really good shave should be.  
Now we ask you to judge how well we've put those three requisites into a shaving cream. At our expense. We've put it up to millions of men. And, having tried it, they refuse to use any other cream or soap.  
There are 5 distinct superiorities, shaving advantages, in Palmolive Shaving Cream. It cost us 18 months' work, 130 laboratory experiments, to perfect them. Now judge our work.  
You'll find cream multiplying itself 250 times in luxurious lather.  
You'll find that lather softens the most unruly beard in one minute—without any irritating "rubbing in."  
You'll find the lather remains rich and creamy for 10 minutes on your face, if necessary.  
You'll find cutting easier, cleaner, because bubbles of extra strength hold each hair erect. This is important. Finally, you'll marvel at the cool, soothed "after feel"—a result of the carefully blended palm and olive oils.  
We ask your judgment on these points as a favor. Failing, the loss would be all ours. Send along the coupon for your ten free shaves.

tentious scenery and dresses, but it contained all the marks of genius which distinguished its successors. Subsequent productions gradually increased in importance, until, in 1893, "Utopia Limited," the last of the series, with its fifteen principals, gorgeous costumes and scenery, and elaborate orchestration, attained almost to the dignity of Grand Opera.  
Gilbert took the greatest personal interest in the detailed accuracy of the dresses and scenery designed for his works. A well known officer at the war office gave expert advice on the old-fashioned military uniforms worn in "Ruddigore," and equal care was taken with the naval uniforms in "Pinafore." The "time" of the later piece was "present day," i.e., 1878, when feminine fashions were notoriously hideous. On that account a certain historical license has always been granted in costuming the ladies of the cast. Our mothers (your grandmothers and great-grandmothers, ladies) contrived, no doubt, to look charming wearing chignons on their heads and "bustles" on—well, wearing "bustles," but these do not lend themselves to theatrical display.  
Before "Pinafore's" first appearance Gilbert went to Portsmouth, was rowed round the harbor, and inspected various ships before finally selecting the quarter-deck of the old "Victory" for his scene. With the

permission of the admiralty, whose officials had not then seen "Sir Joseph Porter, K.C.B.," he made the most minute and accurate sketches of that part of the famous warship. From these a tiny model was constructed, on which the author worked out his grouping, and this small item alone cost some £60. At a subsequent revival an actual ship's deck-flooring was laid down on the Savoy stage, under the supervision of shipwrights from Portsmouth dockyard.  
It is believed that the Summerland producers are not attempting such precision of detail, but it can be safely said that no effort is being spared to make the production realistic and to bring the tang of the sea across the footlights.  
"H.M.S. Pinafore" has visited practically every part of the civilized world and Germany, and wherever clean wit and brilliant music are appreciated has been received with enthusiasm. It is certain that an equally warm welcome awaits her on the occasion of this voyage to the Southern Okanagan.  
A wholesale grocery house will be established at Shanghai, China, through which Canadian produce and manufactures will be handled exclusively. This is the first commercial enterprise of the kind that has been undertaken on behalf of Canadian interests in the Far East.  
**VARIETY PREFERENCE**  
A recent survey of the more important apple markets of the markets have a decided preference for certain varieties. For instance the McIntosh is given preference in the markets of Quebec City, Sherbrooke, Portage la Prairie, Winnipeg, Regina, Moose Jaw, Saskatoon, Prince Albert, North Battleford, Edmonton, Calgary, Lethbridge, Vancouver and Victoria; the Gravenstein at Sydney, N.S., Halifax, N.S., Moncton, St. John, Campbellton, and Sackville, N.B., and the Spy at Charlottetown, P.E.I., and all the Ontario markets and Brandon, Man.  
A complete report of the survey which shows the five preferred varieties on the more important markets of Canada may be had upon application to the Fruit Branch, Ottawa.  
**POLLING DIVISIONS**  
An official list of the polling divisions established in the electoral districts throughout the province is published in the British Columbia Gazette.  
The divisions in South Okanagan are: Bear Creek, Benvoulin, East Kelowna, Ellison, Glenmore, Joe Rich, Kelowna, Mineola, Naramata, Okanagan Centre, Peachland, Reid's Landing, Rutland, South Kelowna, Summerland, Westbank, West Summerland and Winfield.

**\$5 REWARD**  
will be paid the reader of The Review who finds the most errors, typographical or otherwise, in the display advertisements in this paper from April 10th until May 31st.  
Letters containing corrections must be in this office within seven days after the issue of the paper in which the errors appear.  
You will, while studying these advertisements, find much in them that will be to your profit.  
Remember, too: without advertisements The Review could not be published at a subscription price that the many would pay. As you appreciate the weekly arrival of The Review to your home give those business houses who are users of Review space your best encouragement—your patronage.  
This competition is not open to anyone directly or indirectly connected with The Review, nor to any printer or ex-printer or members of his family.

 By AUTOLYCUS

After a somewhat protracted period of slackness the record making season seems to have opened once more, two new achievements being re-ported within a week. In the one case a gentleman accomplished the swallowing of a greater mileage of spaghetti in a given time than any other individual had been known to do, and thereby gained immortal fame in the temple of gluttony;—in the other, a gallant band of thirty students of the Seattle Pacific College, "operating in relays of two hours each, finished reading a copy of the Bible aloud in the institution's chapel early Sunday morning, after reading continuously without sleeping or eating since 9 a.m. on Thursday."

I have read this inspiring paragraph several times in order to discover why these collegiate record-breakers operating on two hour shifts, found it necessary to do without sleeping or eating, since apparently only one of the thirty was on duty at a time, and there does not appear, on the surface, any reason whatever for the waiting twenty-nine to lose either sleep or the nourishment which the fatiguing task must have called for. There must be an error in the calculation somewhere.

A certain Mr. Watson, of the science department of the college, seems to take great pride in the fact that "the Old Testament was finished in forty-eight hours and three minutes of continuous reading for this section of the Holy Book," and evidently feels that a notable scientific experiment has shed a halo over the college which nurses in its bosom the glorious thirty. Many people, however, will hesitate to decide which is the more offensive of the two records—the spaghetti gorge or the scripture gabble. The one was a frankly vulgar exhibition by an individual who probably knew no better—the other was a travesty carried out in an alleged educational institution from which something better might naturally be looked for, and the unctuous reference to the "Holy Book" so misused, is a sheer outrage.

A study of different styles noticeable in any series of public speeches given on any one subject at one time is often very interesting. On the recent tour SPEECHES through the district of an aggregation of business men bent on a campaign of aid to the B. C. fruit growers, the types were unusually varied, embracing the fluent, the halting, the self-assured, the nervous, the statistical, the anecdotal, and so on. There was also one speaker who could hardly be classed with any of these, but who was in the happy position of being able to tell of successful co-operation elsewhere in the province, and who gave his message with a sincerity and straightforwardness, which appealed strongly to his hearers. For plain talk and delivery of home truths forcibly enunciated, the decision would probably have to be given to the speaker who bluntly told his audience that they had their future in their own hands, but did not seem able to get together wholeheartedly enough to work out their own salvation. That hundred and fifty different varieties of apples said to be embarrassing the market was a great point with this pungent speaker, and his remarks will probably result in considerable elimination of such unprofitable passengers. The speaker with a few statistics from the coast gave a striking instance of the possibility of giving a great deal of useful information in a very short space of time, offering a rather pleasing contrast to him who discoursed eloquently of a hundred per cent organization, but seemed to think that such a consummation could be helped chiefly by the narration of more or less humorous stories and the cracking of jokes. To some auditors it seemed somewhat incongruous that a gathering of people who had met to discover whether or not they were going to be able to stay in business, should care to be entertained in just that fashion, but perhaps there is no harm in appreciating the lighter side of matters. Taking that view for granted, the medal for the best story of all would be awarded to a member of the audience at Penticton. This impromptu speaker said the position of the fruit growers reminded him of the legendary race between an Irishman and the devil, both of whom got out of breath, and sat down to rest on the opposite ends of a fallen tree. Quoth the devil, "Well, we've had a good run, haven't we, Pat?" to which Pat responded, "We have, and

"A Snapper Up of Unconsidered Trifles."  
 \* \* \* \* \*  
 The Winter's Tale,  
 Scene II, Act IV

as soon as I get my second wind, we'll have another!"

The interests of the city of Vancouver will not be advanced by such articles as that published by "The Hook" on the episode TOO MUCH OF THE Harbor Board CLAMOR. vs. Canadian Grain Commissioners. The editorial suggestion of that paper that the Vancouver Board must "continue to fight for the prairie farmer" reads very curiously when contrasted with the cool and sensible remarks made by a certain prairie farmer known as J. H. Woods, of Calgary, after he had visited Vancouver and seen the "Great Destiny" of that port, as per press headlines. Mr. Wood said, "We must be tolerant with Vancouver, for there are many problems to face, the worst of all being those of misunderstanding. Vancouver is in the throes of a new birth and is apt to make mistakes. When prosperity appears, people are apt to get bumptious, selfish, or unduly aggressive." If we compare this plain speaking with the ravings of "The Hook" concerning the "high-handed tyranny" of eastern interests as vested in the Canadian Grain Board, and also bear in mind the general "bumptiousness" which has been in evidence in Vancouver's policy for some time past, we find it a very easy matter to decide as to the merits of the case. The future of Vancouver as a great Pacific port is so obvious that it needs no hysterical boosting to hasten it, while on the other hand persistent clamor against the "selfishness" of all the rest of the Dominion has the natural result of creating a feeling of resentment in quarters where it would not be entertained under normal conditions. Incidentally also, Vancouver loses a great deal of dignity by giving free rein to impulses which call for "tolerance" from its friends and neighbors.

Every week or so some "guide, philosopher and friend" comes along and kindly but firmly points out that we have been on the wrong path, or several wrong paths, in this, that or the other matter, and must, for the benefit of our souls and bodies, straightway, forthwith and without delay amend our little ways. And curiously enough, the warnings hurled at us by these people are nearly always in direct opposition to the teachings of those we have been religiously following. Consider, the toothbrush for example:—around that indispensable toilet accessory has been written and preached hygienic maxims in the greatest profusion and of every variety of hue. We have been told just how to hold it, in what direction to move it, what shape it should be, why, or why not, until some of us began to hope we had become adepts in its use. Now appears an appalling denunciation of the toothbrush and all its works, from the pen of a medical gentleman holding many diplomas, and we are told that this deadly weapon has been for many generations driving disease into our gums instead of expelling it, and that people on this continent, although they have lots of good dentists, have no good tooth. To clinch the matter he says, "Moses never used a toothbrush!" and leaves us to reflect on the significance of that statement. Now, I suppose, we shall have to delve back into ancient history and try to find out the truth of the matter—hence the heading of this paragraph.

AUTOLYCUS.

**PEACHLAND DOINGS**  
 A Weekly Chronicle Furnished By Our Local Representative.

The municipality has received a shipment of poles to replace some poles in the power line.

Miss Elva Williamson last week entered the Kelowna Hospital to train in the nursing profession. She will be greatly missed by her many friends who wish her success in her new occupation.

The regular meeting of the W.C. T.U. was held last week at the home of Mrs. J. L. Elliott with a goodly number present. Considerable business was transacted in view of the coming convention here. The devotional exercise was conducted by Miss M. Smith. A billeting committee was appointed, as follows: Mrs. Dorland, Mrs. McCall and Miss Needham, Mrs. Dorland being secretary of the committee. The president and recording secretary, Mrs. McCall and Mrs. J. L. Elliott, were appointed a program committee.

Several directors of the Fruit Union spent a portion of last week in Kelowna attending a joint meeting of directors of locals.

J. Kudelka returned Thursday evening after a few weeks on the prairie. He reports things opening up to a good start there this spring.

Mrs. Lambly returned on Thursday morning from Penticton, accompanied by her mother, Mrs. DeBeck, who is staying with Mr. and Mrs. Lambly.

H. Williams spent Thursday in Kelowna attending a meeting of the Provincial Party which was addressed by General McRae and other members of the party.

A very delightful reception was held at the home of Mrs. Bulyea last Thursday afternoon in honor of Peachland's most recent bride, Mrs. G. Lang, wife of our reeve. Mrs. Bulyea received the guests at the door, conducting them to where the bride was seated in the drawing room. After doing honors to the bride they were taken to the dining room where the table was artistically arranged and spread with dainties. Mrs. Dryden and Mrs. Hawkes poured the tea while Mrs. Dorland and Mrs. McCall waited on the guests.

Peachland school boys' baseball and the girls' basketball teams went to Westbank on Thursday afternoon last to play return games with the Westbank teams and had quite a busy but pleasant afternoon. They left after a short afternoon-session of school, the closing for the Easter holiday. After a hard fought battle at basketball our girls were forced to admit by the result of the score that the Westbank girls had the best of them. They found some difficulty in getting used to the new field, which is much larger than their own, with the baskets higher and they were unsuccessful in connecting with the basket throughout the game, while the opponents filled its centre quite frequently and totalled half a score. Puzzle—what was the score? In the baseball game which followed our boys were somewhat more successful, although they did not pick it off at all easy. The Westbank boys were in good form and made the lads get in and play ball. Those who witnessed the game said both teams played good baseball.

The whist drive and dance held Thursday evening last in the Veterans' Hall was reported to be the last of a series of weekly events having been held for a considerable portion of the late winter and spring.

Miss Ilvya Murdin and her brother, Earl, left on Friday for the Coast to spend the Easter holiday with friends, Miss Murdin also intending to attend teachers' meetings while there.

Miss Craig, formerly of the staff of the Peachland Central school, spent a couple of days in Peachland visiting friends during Easter week.

Hugh Dorland spent the week end with Mrs. R. J. McDougall and family in Penticton, and on his return home on Tuesday morning was accompanied by Miss Mildred McDougall to join her brother, Royal, who had preceded her, to visit with Mrs. Dorland and Hugh for a portion of the Easter holiday.

Miss Francis and Master James Clements went north Saturday morning to spend a few days in Vernon with their sister.

Miss Jean Dryden came home from Vernon on Saturday for a couple of weeks' holiday and she and her mother left by auto Sunday evening to enjoy a motor trip to Spokane.

The evangelistic meetings as announced for the Union Church commenced on Sunday evening. Mr. Nichol, the leader of song, arrived on Saturday evening but Dr. Unsworth was delayed in Vancouver by sickness. The Rev. Mr. Sadler conducted the Sunday and Monday evening meetings, while waiting for a supply to take Dr. Unsworth's place till he is able to come and take charge, which is expected by next Sunday. Mr. Nichol has formed a choir to assist in the song service for the mission, which will continue for a couple of weeks.

The annual Scout meeting called for Saturday evening was so poorly attended that it was postponed till the following Saturday evening when it is hoped that a representative attendance will be in evidence and show their interest in the organization.

Special Easter services were conducted in the three churches on Sunday, Rev. Sadler in the Union, Rev. H. A. Solly of Summerland in the Anglican, and Mr. G. Thornber in the Baptist.

(Continued on Page 6)

**SCOTLAND'S APPLE PREFERENCE**

(The Fruit Grower, March 6, 1924. Page 404)

The demand for colonial apples is always steady in Scotland, where medium and large-sized fruit finds a ready sale. For a long time Scottish buyers displayed little enthusiasm for apples in boxes, but now the box is preferred to the barrel. The best sellers, in their order of popularity, are McIntosh Red, Jonathan, Newtown Pippin, Winesap and Delicious. For many years Jonathan was an easy first, but during the last season or two it has been displaced by the McIntosh Red.

A gentleman riding with an old Irishman came in sight of an old gallows, and to display his wit said: "Pat do you see that?" "To be sure I do," replied Pat. "And where would you be today if the gallows had it's due?" "I'd be riding alone," replied Pat.—Nuggets.

**BRANDRAM'S GENUINE B-B WHITE LEAD**

ANY product that successfully survives the critical tests of ten generations must possess unusual merit. Brandram's Genuine B.B. White Lead has just such a record. Since 1729 it has stood alone as the World's Standard White Lead.

It breaks up easily and works readily into a beautiful snowy white paste which thins to just the right consistency for economical brush work. Paints mixed with Brandram's Genuine B.B. White Lead spread further with less effort and greater smoothness than any others. They form a tough, elastic coating that offers wonderful resistance to the wear and tear of time and the elements.

Use Brandram's Genuine B.B. White Lead when painting and give your property the protection it deserves.

Local Happenings

Miss Jean Caldwell is spending
Easter holidays at her home here.

Miss Connie Gillard of Kelowna is
a guest this week of Miss Winnie
Atherton.

Jack Harris, now with the Bank
of Montreal at Vernon, spent Easter
at his home here.

Mrs. Geo. Ross left on Monday's
train for Vancouver, after a short
visit with relatives here.

Miss Alva Garnett came down from
Westbank last week end to spend the
vacation at her home here.

Miss Thelma Hobbs, now in charge
of the school at Kaleden, is at her
home here for the Easter week.

Miss Hazel Steuart went up to
Okanagan Centre the end of the
week to visit Miss Sue Whiteford
for a few days.

Mrs. Bevre who has been for some
time with Mr. and Mrs. A. Fraser
here, left on Monday morning for
Edmonton, Alta.

Tickets for both Monday and Tues-
day night for "H.M.S. 'Pinafore'"
are selling rapidly and citizens are
advised to secure their seats at once.

R. Siderfin left on Monday morn-
ing's boat for Regina. He was ac-
companied as far as Sicamous by
Mrs. Siderfin, who returned Tuesday
night.

Miss Smellie, who has been for
some time visiting relatives here and
in Peachland left via K.V.R. on Wed-
nesday to return to her home in
Moose Jaw.

Mrs. M. C. Fletcher, a former resi-
dent of Summerland, came in from
Victoria on Saturday accompanied by
a friend, Miss Gibson. Mrs. Flet-
cher will reside on her property here.

Keep Saturday May 17th, open for
University Players in their play, "The
World and His Wife." L38tf
For sale: crushed oats, baled hay
and machinery — all kinds. T. B.
Young. 38Ltf

Miss Dean, who has been visiting
at the home of Mr. C. Napier Higgin,
went up to Vernon by motor on Mon-
day on her way to Toronto. Miss
Dean plans to sail for England on the
Montroyal early in May.

Mr. and Mrs. K. S. Hogg motored
up to Okanagan Centre on Sunday
returning Monday night. They
brought back with them their daugh-
ter, Margaret, who had gone up to
the Centre on Friday's boat to visit
her grand parents.

Though the marriage occurred
nearly a month ago we believe that
it will still be news to many of his
Summerland friends and acquaint-
ances to learn that T. N. Ritchie, for
some years resident here, was mar-
ried in Vancouver on March 26th.

Mrs. Hector Sutherland and Mrs.
Morrison Sutherland gave an after-
noon tea on Tuesday at the home
of the former in honor of Mr. and
Mrs. J. M. Sutherland. Many old-
time friends took advantage of this
opportunity to say farewell to Mr.
and Mrs. Sutherland, who are pi-
oneer citizens, and a very pleasant
social afternoon was enjoyed. Mr.
Sutherland leaves for the Coast to-
day and Mrs. Sutherland will board
the boat on Monday evening on route
for Ontario, where she will remain
for the summer at least. During the
last few days Mr. and Mrs. Suther-
land have been guests of Mr. and
Mrs. Hector Sutherland.

Alex Smith is at the Coast attend-
ing the teachers' convention.
Leslie Gould is confined to his
home with an injured ankle.
R. E. White was a business visitor
to the Coast over the week end.
Mrs. Geo. Graham returned last
night from a trip to Manitoba points.
Shelley Knowles and Harold White
left on Monday to bike to Omak,
Washington.
A. McGown returned on Sunday
from Oakland, California, where he
has spent the winter.
Miss Annie Smith, of Vancouver,
is spending the Easter holidays with
relatives here and at Naramata.
Miss Marion Beavis, of the Kelowna
public school staff, is spending the
Easter vacation at her home here.
C. W. Lees passed through here
last Friday on his way from Kelowna
to the teachers' convention in Van-
couver.
By invitation, the operating staff
of the Summerland Telephone Com-
pany is arranging a dance in Empire
Hall this evening.
Miss Marie McKechnie, who motor-
ed up from Vancouver last week and
is visiting relatives at Naramata,
spent Tuesday here with her aunt,
Mrs. Geo. Gray.
Mrs. Douglas Henderson arrived
here last night from Salmon Arm
where she and her husband are now
living. She is here to arrange for
shipping some household effects to
their present home.
Gordon Booth, eldest son of Mr.
and Mrs. I. W. Booth, was operated
on at the hospital on Monday for
enlarged tonsils and adenoids.
Though still confined to his home he
is making good progress.
Principal J. O. Steeves of the Sum-
merland high school was honored this
week by his appointment as repre-
sentative of the Okanagan on the
executive of the Teachers' Federa-
tion now in session in Vancouver.
Members of the Summerland Co-
operative will receive final statements
and cheques by mail on Monday morn-
ing. The office staff is now busy
making up the statements. About
fifty thousand dollars will be dis-
tributed.
Mr. and Mrs. F. R. Gartrell and
Mr. and Mrs. Jas. Gartrell motored
to Kelowna yesterday, where Mr.
and Mrs. Gartrell, Sr., will remain
for a few days with relatives. Mr.
and Mrs. F. R. Gartrell returned
that night.
Miss V. Jones of the high school
staff came down from Kelowna on
Tuesday night to attend the dance
given here by the local high school
athletic club. Miss Jones is spending
her vacation at her home in the Or-
chard City.
Court of revision on irrigation rates
was held yesterday afternoon. Busi-
ness was very slight. Other than
appeals from Messrs. Rippin and
Dale on meadow land not now served
by the system, there were no appeals.
A few minor adjustments were made
elsewhere.

Miss Carrie Harvey left last Sat-
urday for the Coast.
Mrs. W. R. Kitson of Calgary is
the guest of her sister, Mrs. J. J.
Atherton.
Miss Gwen Harris returned on
Tuesday from a short vacation spent
at Victoria.
Mrs. G. A. Lundie and family left
for Vancouver on the noon train on
Wednesday.
A. C. Turner left by motor on
Sunday for Vancouver, where he ex-
pects to reside.
Rev. Z. L. Fash is leaving by to-
morrow's train for a short holiday
trip to the Coast.
Miss Isabel Logan came down from
Vernon last week end and is now with
M. G. Wilson in his local office.
Miss Rene Harris went up to Ke-
lowna on Wednesday to visit a
friend, Miss Maud Kincaid there.
Mr. and Mrs. Geo. Wolstencroft
of Pentiction were guests for a few
days of Mr. and Mrs. T. P. Thornber.
Mr. and Mrs. J. L. Whiteford and
Lloyd came down from Okanagan
Centre last week, returning Monday
morning.
Mr. and Mrs. V. M. Lockwood and
family visited former prairie friends,
Mr. and Mrs. Vinson, on Sunday at
Pentiction.
Miss Dorothy Tomlin is expected
home tomorrow morning from Van-
couver where she has been attending
University.
Eric Winter came in from Clover-
dale, B.C., on Friday last, returning
on Monday to his position in the
bank there.
Miss Marion Cartwright went down
to the Coast on Monday as delegate
to the Women's Institute convention
in session there this week.
Mr. and Mrs. Landie and son of
Kelowna were guests on Sunday of
Mr. and Mrs. A. B. Elliott, on their
way to Chilliwack where they will
reside.
J. O. Steeves, principal of the
high school, left on Monday to at-
tend the teachers' convention which
is in session in Vancouver on the
22nd, 23rd, 24th of this month.
There will be a meeting of the
Liberal-Conservative Association in
the Parish Hall Tuesday, April 29th,
8 p.m. to elect officers and appoint
delegates to nominating convention. 39L

Miss Jessie Monroe came in from
Vancouver on Friday for a short
visit at her home here, returning on
Monday. Miss Monroe has a position
with the civil service department
there.
Louis Smith, a Summerland stu-
dent at the U.B.C., was made presi-
dent of his year at recent class elec-
tions. Another candidate for the
position was a son of Mr. Justice
Murphy.
According to information received
here, W. Mack, Sr., is seriously ill
in Vancouver. He left here a few
months ago and has been taking
painting contracts in the Coast city
where he was joined recently by his
family.
Further news received of the death
of E. O. James, whose demise on the
7th of April was reported in these
columns last week, indicate that he
had been feeling much better and
was looking forward to returning
home. It is a year and a half since
he left here to take special treatment
and during that time his condition
varied, but until he suffered a re-
lapse on the first of April he had
been about and feeling greatly im-
proved.
The Mission Circle of the Baptist
church had a most enjoyable time at
their meeting on Tuesday afternoon
in the church parlor. Mrs. Lipsett
led a very interesting round-table
talk on Bolivia, after which the birth-
day bugs were opened. Those con-
tained the sum of \$24.05. Miss Mc-
Leod, formerly of Summerland and
now in hospital in Brooklyn, N.Y.,
sent a jubilee offering of \$25, and
the total receipts for the day were
brought up to \$51. Tea was served
to a large gathering.

"Tell it well
and
the Ad will Sell"
You are no doubt familiar with the
old story of the miser who became obsessed
with the idea that his horse's feed was
costing him too much, and who system-
atically cut down its rations little by
little until he had the animal's feed down
to one oat per day.
Then the horse died!
It's just the same with advertising.
Don't think that by saving a few words
in writing your advertisement you are
saving money. You are not! So much
depends on the attractive way you state
your proposition, and, of course, in the
medium you choose for advertising it.
Write a good, descriptive advertise-
ment and then select the very best medium
for getting results.

## Easter In Summerland Churches

A special song service had been arranged, and the building had been tastefully embellished with flowers, while facing the congregation the three-linked emblem of "Friendship, Love and Truth," blazed forth with electrical effect its silent message. Mrs. G. Craig rendered "Queen of Angels" in an inspiring manner, and I. W. Booth in faultless style contributed "Rest, Rest for the Weary." The pastor, Rev. H. J. Armitage, delivered an eloquent and masterly oration. He touched the congregation two messages; one of the spirit of Oddfellowship, and the other that of Eastertide.

Taking for his text Job XIV: 14: "If a man die, shall he live again," his earnest voice rang out the words of comfort and of hope, "I know that by Redeemer liveth, and though after my flesh, worms destroy this body, yet without my flesh shall I see God." Christ had vindicated His claim: to found a kingdom which shall endure through the centuries; exerting a wider influence from age to age; to leave a name which shall sway the destinies of men and nations yet unborn. Nothing dies, was the tenor of his message, and was it possible to conceive that the good God who implanted in us the great desire to live should deny us what he had promised. Was it possible that the careers of thousands of young men who had answered the call of their country in the last awful conflict, our future statesmen, judges, painters, were ended when stricken on the field of battle. "I am convinced otherwise," the reverend gentleman said. We repeat, it was a masterly address, and it created a profound impression upon all who were privileged to hear it.

**Church of God**  
Easter services, morning and evening, in the Church of God were presided over by the leader, Mr. Busch. Special music, recitations and a dialogue were features of the morning service. In the evening there was further Easter music in addition to the regular services.

Uncle Sam might be more interested in cancelling war debts if his European debtors were more interested in cancelling war. — Tacoma Ledger.

### MEASLES

In a case of measles, the first thing the mother notices is that the child appears to have taken a cold. He will sneeze, have a catarrh in the head and cough. His eyes are red-doned, appetite poor, and he usually has a fever. Three or four days into a rose-colored rash appears on his face and neck, later spreading to his chest, arms and legs.

At the first symptom the child should be put to bed in a darkened room, or with his back to the light, on account of the inflammation of his eyes. Plenty of fresh air should be allowed to enter the room, and the temperature kept at about 70. All other children should be kept from the room or house if possible, as nine out of ten will take this disease if exposed. If children remain well 14 days after exposure they will probably escape. As a rule the disease appears between 7 and 14 days after exposure.

Do not bathe the child while sick with measles, or permit him out of bed, no matter how well he feels, until the rash is all gone. This may not be for 5 to 7 days. Care in this point avoids complications. It is a careless mother or nurse who will expose a sick child to "hard" air, regardless of bronchitis. She may later find him with a fatal pneumonia.

## NARAMATA NEWS

Current Events of Town and District

(Continued from Page 3)

A. J. MacKenzie returned on Sunday from Vancouver where he was called owing to the sudden death of his brother Allen.

Mr. and Mrs. John McLaughlin, who had spent several weeks at Vancouver and other points, returned on Sunday, accompanied by their daughter, Mrs. D. Kirkby, and her daughter, Annie Margaret, who will remain in Peachland for a time. Master Willie Gartrell of Summerland spent several days this week visiting the McCall children, having come up on Sunday.

On his return trip to Summerland on Monday morning the Rev. H. A. Solly was accompanied by Mrs. Clarence, who has been ill for some few weeks. She decided to give up work and enter the Summerland hospital for treatment and has left Mrs. Young in charge of the Edgewater Inn during the day. Mr. A. E. Henderson takes charge over night.

Mr. and Mrs. Laing and family were visitors here on Monday.

Mr. and Mrs. Palmer arrived this week from Vancouver to spend some time with their son and daughter at the home of Mr. and Mrs. A. J. Miller where they have been boarding while attending school.

W. McQueen, of Glenrosa, was in town on Tuesday.

E. Brinson and son Ira motored up from Pentiction this week to visit other members of the family at their ranch, and later returned to their work at Pentiction.

W. Waldriff, H. Miller and George Topham spent Tuesday in Kelowna. Mel. Ashley had the misfortune on Tuesday evening to trip on the sidewalk and fall heavily, receiving serious injuries to his arm. Friends rushed him to the doctor. On examination it was decided by the doctor that he should have an X-ray examination, so they took him to Summerland hospital where he is receiving treatment. It was very evident that there was a bad dislocation of the elbow joint and possibly a fracture of one of the small bones. Results of the X-ray examination had not been reported at the time of writing.

Mr. Baldock and son of Pentiction came up on Wednesday morning's boat to get their auto which was undergoing repairs in the Crystal Garage here following the accident.

Little Miss Lois Walters, of Naramata, came up Wednesday morning to spend a few days with her friend Miss Leah Morah.

Mr. and Mrs. F. R. Gartrell and family paid Mr. and Mrs. H. E. McCall a short visit on Wednesday in passing through by auto.

Hon. W. J. Bowser inaugurated the election campaign at the north end of the Valley with an address before an Armstrong audience.

### Mark Twain Again

A subscriber to a Missouri paper once edited by Mark Twain wrote him stating he had found a spider in his paper and wanted to know if it meant good or bad luck. Mark replied:

"Old Subscriber: Finding a spider in your paper was neither good luck nor bad luck for you. The spider was merely looking over our paper to see which merchant is not advertising so that he can go to that store, spin his web across the door, and live a life of undisturbed peace afterward."

The whole purpose of advertising is to show you ways in which you can live better, more comfortably, and more happily. Read the advertisements, it will pay you.
