nish Free Cuts and Copy.

Volume 17, Number 1

SUMMERLAND, B. C., THURSDAY, AUGUST 7, 1924.

\$2.50, Payable in Advance

Baron Byng of Vimy, Canada's Governor-General, And Lady Byng Visitors To Summerland

Formally Welcomed by the Reeve—Baron Byng Con- verses with Ex-service Men — Visits Orchard Homes of Veterans—Call Made at Log Cabin and Fruit Packing House.

Summerland had the honor of entertaining last Thursday afternoon the King's representative in Canada, Lord Byng of Vimy, governor-general of Canada and Lady Byng and their party.

They arrived here by special boat from up-lake points, reaching the C. P. R. wharf shortly before three-thirty. There they immediately boarded cars which were awaiting the party and were conveyed to Peach Orchard, where a large number of citizens had gathered to greet Lord and Lady Byng.

A number of ex-service men had complied with the request that they line up in uniform, wearing their badges. The first act of Baron Byng was to greet the veterans, shaking hands with each one and talking briefly with quite a number.

On behalf of the municipal council and citizens of Summerland Reeve Campbell welcomed the governor-general and Lady Byng as follows: "On behalf of the Municipal Council of Summerland and in the name of the citizens of Summerland, we tender Your Excellency a loyal and hearty welcome, on this your first visit to our district.

"We assure Your Excellency, as the representative of His Gracious Majesty King George V, of our affectionate loyalty to His throne and person.

"We also extend a cordial welcome to Lady Byng.

"Summerland is one of the newer districts of Western Canada, and in common with other parts of the Okanagan Valley is engaged in the problem of developing a community life of Canadian citizenship that is requisite for the well being and progress of Canada as one of the Dominions of the British Empire. In the few years of Summerland's history it has been able to accomplish much, and we believe its future will contribute more and more to our national development.

"We sincerely trust that Your Excellency and Lady Byng may have pleasant memories of your visit here, and to other parts of the Province."

To this Baron Byng made a brief reply, thanking the people for their welcome and asked permission to shake hands with all the citizens there assembled. Lady Byng likewise greeted many of those present.

NEW PIPE BIG IMPROVEMENT

Larger Pipe Greatly Increases
Pressure at Fire
Hydrants.

Very marked is the improvement in the service effected by the new domestic water main along Shaughnessy Avenue. Under the direction of D. Dickson, the work of laying the pipe and making the numerous connections was completed yesterday.

A test made with a fire nozzle at the hydrant opposite the Revlow building showed an increased pressure that fully justified the expenditure and substantiated the claims of those who had been long advocating the larger pipe.

With the old three inch pipe, there was a pressure at this hydrant of but five or six pounds with one nozzle and the head was so small that there was little more than a dribble. Yesterday there was sufficient head to throw water over the top of The Revlow building and Foreman Dickson was confident that there would be little reduction in the pressure with a second nozzle on the same hydrant.

It would appear that no great amount of boasting would be necessary to give a good fire fighting pressure on the higher levels.

Summerland Girl Guides, who were in uniform, and in charge of their leaders, Mrs. Pares and Miss Rene Harris, presented Lady Byng with a bouquet after she, as chief Guide, had inspected the troop.

Immediately these formalities were over the vice regal party were turned over to the Soldiers' Settlement Board. At all points throughout the Valley this had been done at the request of the Soldiers' Settlement Board. After visiting the Log Cabin, where Lady Byng showed much interest in the pottery and other products of local handicraft, and made some purchases, the party then proceeded to the Co-operative packing house and, after an inspection of that building and the methods of handling fruit, they were directed by Ralph Brown, representative of the S. S. B., to the homes of a number of veterans operating fruit ranches here.

The first stop was at the home of S. W. J. Feltham and then to R. S. Jackson's. At both these homes tea was served to the visitors. D. C. Thompson's was the next place on the itinerary, but the time was getting late so the party went direct to R. H. Atkinson's and from there on to Pentiction.

To K. S. Hogg fell the honor of taking the governor-general over the district, while Mr. and Mrs. P. G. Koop and Rev. and Mrs. Solly took the other members of the party.

WELL KNOWN ORCHARD SOLD

Mrs. F. A. C. Wright has disposed of her Garnett Valley property to A. Goldring, the sale being made through the office of G. Y. L. Crossley. Mr. Goldring has been a resident here for six weeks of so, having come here from the prairies with his sister. The property comprises about fifteen acres, ten of which are below the ditch and has a good house, and modern improvements. Mr. Goldring is already applying himself to the business of fruit growing and without doubt will meet with success in his new venture.

LOOKS LIKE BANNER YEAR FOR MELONS

This should be a banner year for B. C. cantaloupes, says J. A. Grant, markets commissioner, in his bulletin issued last Saturday. "California Turlocks are now selling at the highest price in years. B. C. Cantaloupes are beginning to come in. We strongly advise cantaloupe growers to ship in flats. We wish to point out that after September there is little or no demand for cantaloupes."

The gayly colored flowers in the garden plot north of J. Tait's office are these days in full bloom and add much to the appearance of the street. Mr. Tait has given much time and attention to these plants which are chiefly of the late summer and early autumn flowering varieties and the array of bright blossoms is attracting much appreciative comment from passers by.

Good luck is the name we often give to the other fellow's success.

J. W. Jones, M.L.A. Probable House Leader of Next Session

J. W. Jones, recently elected member for this constituency in the provincial house, is likely to be the leader of the Opposition during the next session of the legislative assembly, which is expected to meet in the week of October 27th next.

According to Const reports, there will be a meeting of the Conservative members elect on Saturday of this week to organize for the coming autumn session. The chief business before the meeting will be the choice of a house leader for the term of the legislature. Though several ridings have been offered him, W. J. Bowser, Opposition leader, will not seek reelection. Mr. Jones and R. H. Pooley, M. L. A. of Esquimalt are

SLIDE BLOCKS PENTICTON ROAD

Summerland-Pentiction road, was blocked last night about eight o'clock when a large volume of earth broke away from the face of the cliff above and fell on the road about a mile and a half north of the long bridge.

Quite a number of cars coming this way had to turn back or make the long detour by way of Shingle Creek and likewise a number of southbound cars were stopped by the slide or headed back by returning cars.

It was expected that the road would be cleared again before noon today.

HOT WEATHER

Saturday, July 26th was the hottest day of a brief spell of hot weather experienced here. The thermometer reached 96. The same day was the hottest day of the year at Princeton, 96 also being recorded there, the highest previous temperature being 94 on July first.

American towns down the valley again experienced very hot weather, Okanagan reporting 110 on the 26th as compared with 111 and 114 late in June. On the day of the latter record Summerland had it 100.

NEARLY BURIED BY MUD SLIDE

Car and Child on One Side,
Driver on Other—Traffic
Delayed.

Traffic on the lakeshore road was interrupted for about twenty-four hours by a big landslide just north of Crescent Beach. A huge mass of mud and earth came down on the road shortly after noon on Friday last. As the mud continued to flow down the side of the cliff, the road foreman, J. C. Arkell, did not think it advisable to attempt to clear the road immediately and work was not started until Saturday morning.

One motor party had an exceedingly unpleasant experience and narrowly escaped being buried beneath the huge mass of earth. Mrs. Appleton of Pentiction was coming in from Peachland. There were some lumps of earth on the road and she and her young son, a lad of perhaps fourteen years, got out of their car to remove these in order that they might pass. Her daughter, a little girl, was left in the car.

They had scarcely started to remove these lumps when the big slide came. Both Mrs. Appleton and her son ran southward and barely escaped the avalanche of earth and mud. For a time Mrs. Appleton feared that her daughter was buried beneath the slide but in some way the boy climbed over the muck and reassured her. Mrs. Appleton, in attempting to get back to the car, sank in the mud nearly to her waist. About this time Foreman Arkell, who had been advised of the slide, arrived on the scene and with his help she was able to get out, minus shoes and stockings, and, with the further aid of some tools, she returned to her car. They motored back to Peachland and loaded their car on the steamer.

Quite a number of cars were detained by the slide although a few of the more venturesome went over the upper road. Most of them, including the Kolowna stage, remained here over night.

APPRECIATES SERVICE RENDERED COMMUNITY

In renewing his subscription to "The Review," Mr. R. Phillipon writes: "I take this opportunity to congratulate you upon the way you serve the community. Certainly your paper is the most interesting and most valuable of all the local papers I have come in contact with these last twenty years and I would certainly miss it if I had to be without it."

Mr. Phillipon is now in Vancouver having gone down to that city recently.

PEACHLAND IS SWEET POTATO CENTRE FOR B.C.

H. H. Thompson Has Developed
Variety of High Quality
— Early On Market

Peachland, thanks to H. H. Thompson, is again to the fore in the matter of supplying western Canadian markets with sweet potatoes. J. A. Grant, markets commissioner, states in his bulletin of last Saturday that Mr. Thompson has furnished fresh evidence that sweet potatoes of good quality can be grown in the Okanagan and congratulates Mr. Thompson on the improvement he has made in the selection of a market variety.

He suggests that Mr. Thompson discard all other varieties and introduce only the "Okaganan Queen" variety to his pioneer friends in this new industry. Of this variety, which Mr. Thompson has already been marketing this season, Mr. Grant says:

"The tubers sent are of the long pointed cream colored sort, almost similar to the variety imported from the Southern States. They are firm and fresh looking and present a better table appearance than sweet potatoes that are imported thousands of miles. We are informed that about six acres are planted to sweet potatoes in the Valley, from Oliver to Kelowna, and that the product will be handled by the Associated Growers of B. C.

When the prairie consumers get informed that the uncured sweet potatoes from B. C. are superior in flavor to the cured imported stuff, and contain all the natural juice, a heavy demand is sure to result.

It is estimated that with good cultivation the "Okaganan Queen" sweet potato will produce 40 tons per acre."

HEAR McGEER TONIGHT

Through arrangements made by Thos. Bulman, president of the United Farmers, with which the B.C.F.G.A. is co-operating, G. G. McGeer, K.C., will fully explain the transportation problems of this province to the people of Summerland at a public meeting in the College Gymnasium at 8 p.m.

ARRANGE FOR CONVEYANCE

School Board Awards Con-
tracts — Health Officer
Makes Report.

Contracts for conveyance on the six school routes were awarded last night by the school board.

Trout Creek route was awarded to W. A. Caldwell, Grant's Head route to Smith & Henry, town and Peach Orchard to A. E. Smith, Prairie Valley route to Bernard Taylor and Garnett Valley to Smith & Henry. Paradise Flat route was offered to H. Dunham on the condition that he would make a slight change at the farther end.

Last year the contractor for the town route picked up children at the old school building on hospital hill, then went to English's corner and from there to the school by way of Peach Orchard. A delegation with a largely signed petition waited on the board last night asking that this route be divided into two, suggesting that one of the rigs go by way of hospital hill and pointing out that children were being dropped a long way from home when left at the high flume as they had been last year.

No change was made in the route except that the children will be taken to Inglis' corner on the afternoon trip instead of to the high flume.

Dr. F. W. Andrew, medical health officer, presented his report. In this he made reference to the prevalence of gonorrhea and pointed out the danger of neglecting this disease. Treated in its earlier stages it will disappear but if neglected it may develop into a surgical case.

BODY BROUGHT HERE SUNDAY FOR BURIAL

The remains of the late Mrs. J. R. Vincent of Pentiction were placed in their last resting place in Peach Orchard cemetery on Sunday afternoon. Mrs. Vincent, formerly Miss Gertrude M. Loomer, was taken ill on Friday noon and died on Saturday.

The funeral service was conducted by Rev. D. M. Perley of Pentiction Methodist Church and was attended by a number of Summerland relatives and friends. She had been married just two months.

Geo. Loomer and Mrs. W. E. Rines of Summerland were brother and sister of the deceased. Another brother, A. G. Loomer and a sister, Miss Loomer, reside in Pentiction, as does also her mother, Mrs. Loomer. Until recently the deceased woman was an operator in the Pentiction office of the Okanagan Telephone Company. She was a former resident of Summerland.

275,000,000 Bushel Crop. — Sir Henry Thornton, chairman and president of the Canadian National Railways, during his present tour of the west, has predicted that the prairies will produce a 275,000,000 bushel crop this year.

NARROW ESCAPE FROM DROWNING

Summerland Woman Rushes to
Assistance of Companion—
Get Timely Help.

Mrs. Rowley, of the government telegraph office here, and her friend Miss McMillan, of the government telegraph office, Pentiction, had a narrow escape from drowning while bathing at Dog Lake.

The Pentiction Herald reports the incident thus:

Miss McMillan, of the government telegraph service, and Mrs. J. Rowley of Summerland, had narrow escapes from drowning, early Saturday evening while bathing at Skaha Lake. Miss McMillan told The Herald they were rescued by "Vic" Pryce after sinking three times.

It appears from her account of the affair that she was able to swim, but Mrs. Rowley could not. They went in the water and waded out some distance, but did not get out of their depth. She started to swim along the shore towards the wharf. After a while she felt herself becoming tired and attempted to put her feet on the bottom, but found she was out of her depth. She called out to Mrs. Rowley, who in turn, called for help to Mrs. Pryce, who had just arrived in his car, and then, although unable to swim, Mrs. Rowley somehow made her way out to where Miss McMillan was, with an idea of helping her.

Instead of being able to help, however, Mrs. Rowley commenced to drown, and Miss McMillan caught hold of her, both going down together for the first time. When they came up Miss McMillan still had hold of Mrs. Rowley and succeeded in holding her above the surface for a short time. They sank twice, Miss McMillan losing Mrs. Rowley, the last time, but by that time Mr. Pryce had reached the spot and succeeded in bringing Miss McMillan to shore without much difficulty. By the time he reached Mrs. Rowley she had drifted still further out and was struggling much of the time he was dragging her in. The two ladies had

Building of Bathing House Revives Question of Owner- Ship of Lake Foreshore

taken in a considerable amount of water, but Mr. Pryce found it unnecessary to resort to artificial respiration, of which he has a knowledge, and after a rest they were able to return to town.

Except for Mr. Pryce and some girls on the wharf, who were too far away to know what was happening, there was nobody in sight at the time the ladies got into difficulties.

A new rich strike of high grade silver-lead ore, eighteen inches in width has been uncovered by Andy Jensen, veteran prospector, according to a report from Tulameen.

The Kootenays, British Columbia, are the principal source of zinc in Canada. There are workable deposits at Notre Dame des Anges, and in the Gaspé peninsula, Quebec.

PUBLISHES MAP OF OK-CARIBOO TRAIL

One of the first accomplishments of the Okanagan-Cariboo Trail Association has been the publishing of an excellent map, thirty inches long showing the trail from Wenatchee to Barkerville with many tributary roads.

The folder gives a somewhat lengthy historical sketch of the Okanagan-Cariboo Trail, written by Judge Brown of Okanagan, and it also carries a tourist directory giving a description of all the towns along the Trail from Wenatchee to Kamloops, including those in the Similkameen and Nicola.

This map should persuade many tourists to turn northward into the Okanagan-Cariboo Trail.

WRIGHT-BALLANTINE

A wedding of interest to many Summerland people was solemnized on Thursday evening, July 31st, when Miss Agnes E. Ballantine who served for several years on the public school teaching staff, was married to Mr. John Wright of Summerland.

The ceremony was performed by Rev. W. A. Alexander of St. Andrews Union Church in the presence of a few intimate friends.

Mr. and Mrs. Wright will continue to reside in Summerland.

BRIDE-ELECT IS SHOWERED

Miss Gertrude Elsey was the guest of honor at a miscellaneous shower given on Thursday afternoon by Mrs. J. C. Wilson and Miss Barbara Braun at the home of the former. About twenty-five guests were present. Decorations were prettily carried out in pink and white and during the afternoon little Miss Audrey and Master Howard Wright presented the bride-elect with a goodly collection of gifts, which were wheeled in a carriage and proved to be both dainty and useful. Contests were indulged in, Miss Ruth Dale and Mrs. W. M. Wright being the winners. Instrumental music was provided by Miss Ruth Dale and a vocal solo by Miss Carol Graham, both of which were much appreciated. Refreshments were served, Miss Elsey cutting the dainty wedding cake, which contained quaint favors in various shapes.

Would Avoid By-Election In Appointing Federal Members

With the announcement that the writ for a by-election in Yale constituency to fill the vacancy caused by the death of J. A. McKelvie, M. P. is to be issued shortly, interest in the selection of a successor to Mr. McKelvie has been revived.

A Vermont report states that many of the electors look with a considerable degree of apprehension upon the prospects of a political battle between Conservatives and Liberals at the present time, largely because a difficult and delicate situation exists in reference to anti-dumping features of the protection on fruit, as well as because of other matters affecting the fruit industry.

The proposal that a by-election be

Development Company Re- sents Action of Council in Erecting Building without Permission from Them — Council Disputes Claim of Company to Ownership Of Shore Tract.

Who owns the land on which the new municipal bathing house and other nearby buildings between the road and water now stand?

This question was brought up by a letter from the Summerland Development Company to the municipal council in which protest was made of the action of the council in erecting a bathing house on the land in question without first obtaining permission from the Development Company. The letter was signed by J. L. Logie, local representative of the company.

Apparently the consensus of opinion of the members of the council was that the land was not the property of the company, the statement being made that it was not shown on the plans of the lands acquired and subdivided by the Development Company.

Other reasons advanced for this view were that the bit of land that originally existed there was lake foreshore, which, it was stated, had been added to by earth washed down when the Garnett Valley dam broke early in the history of the community; that the highway was the boundary of the company's property and until recently the company had not laid claim to the land which had been occupied by squatters for years; and that the property had never been included in the municipal assessment roll and never taxed. Another view expressed by municipal authorities is that as foreshore, the property would either belong to the highway to which it is adjacent or, if not, to those lots immediately opposite on the other side of the highway.

Under these circumstances, the municipal council felt that in building a public bathing house there it had equal liberty with others.

Quite the opposite view is taken by Mr. Logie, who states that during all the years he was assessor he never realized there was the extent of land there that exists and, after quitting the municipality and taking his present position with the Development Company, he investigated and had the land surveyed and subdivided into nine lots, the deepest of which is 117 feet. He had not had the subdivision recorded as the law requires that subdivision plans be approved by civic councils and he felt that the

(Continued on Page 6)

ALL CREEKS ARE RUNNING

Irrigation Service Being Main-
tained All Over the
Municipality.

Irrigation water continues to flow through all the ditches in the Summerland system, notwithstanding it had been predicted that the supply would be exhausted before the end of July. Though considerably curtailed in volume, there is yet a fair supply being drawn from Trout Creek, Aconas Creek and Prairie Creek and the full staff of ditchmen are still on the job and it is confidently expected that the supply will last at least until the middle of the month. Instead of a service of two days a week, growers are receiving a one day service.

While the cool weather lasted the creeks maintained an unexpectedly good flow, though with the last day or two of warmer weather it has fallen off somewhat, indicating clearly the very considerable loss by evaporation between the reservoirs and the intake. Cooler weather and showers would again improve the service.

The Union of B.C. Municipalities and Good Roads League convention will be held in Pentiction on September 2, 3 and 4.

The Summerland Review

Established August, 1908.
Published at Summerland, B.C., every Thursday by
THE REVIEW PUBLISHING COMPANY, LIMITED
Ralph E. White, Editor and Manager

An independent family newspaper covering Peachland, Summerland and Naramata and adjacent districts.

Member of Canadian Weekly Newspapers Association.
Member of British Columbia Selected Weeklies.

Subscription Rates—In British Empire, in advance, \$2.50 per year; six months, \$1.40. To U.S.A. and other countries, \$3.00 per year.

Advertising Rate Cards and information respecting territory and samples of paper mailed upon request, or may be seen at the office of any advertising agency recognized by the Canadian Press Association.

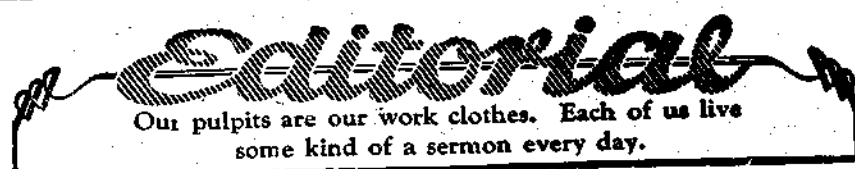

Advertisers must have copy in by Tuesday noon in order to insure changes for standing advertisements. New display advertising copy can be accepted one day later.

All instructions for cancellation or alteration of advertising must be in writing.

Correspondence—Letters addressed to the Editor and intended for publication must be short and legibly written on one side of the paper only. The longer an article, the shorter its chance of insertion. All communications must bear the name of the writer, not necessarily for publication. The publication or rejection of articles is a matter entirely in the discretion of the Editor. No responsibility is assumed by the paper for the opinions expressed by correspondents.

Typographical Errors—In the event of a typographical error, advertising goods at less than the proper price, the newspaper will furnish letters to be posted in the store stating the correct price, but goods may not be sold at the price printed and the difference charged to the newspaper.

Thursday, August 7, 1924.

SIXTEEN YEARS OLD.

With this number The Review begins its seventeenth year. In the year just ended fifty-three numbers were issued to complete the sixteenth volume, a requirement rather unusual.

The Review has been a part of the life of the community almost from the time of the planting of its first orchards and has seen many ups and downs in the welfare of the fruit industry. Within the covers of the sixteen volumes that have been published, is contained the history in detail of the life of Summerland and also of Naramata and Peachland since early in August, 1908.

1924 PEAR PRICES.

Prices being offered by canneries across the line would indicate that growers may expect a good price for pears this season. There is a marked shortage of this crop in California and other districts.

Okanogan Growers' Union, Okanogan, Wash., is selling practically all its tonnage to the canneries, which are paying a price of fifty dollars a ton net to the growers for No. 1's and half that price for No. 2's. This is the highest price pears have ever brought in that district.

AN ENCOURAGING OUTLOOK.

Taken as a whole recent news gives an encouraging view of the fruit marketing situation. There have been copious rains on the prairies, while at the same time the market price of wheat has advanced to such a figure that it will mean millions of additional money to the prairie wheat growers.

Then, too, later reports from the Eastern States as well as from Eastern Canada indicate that the fruit crops there which would come in competition with ours will not be as large as earlier reports indicated.

BONUS FRUIT GROWING.

There is much significance in the recent report from Australia that the government of that country has decided to bonus the fruit growers in the sum of five to thirty shillings a ton of fruit grown.

One of the reasons advanced for this decision is the action of the Imperial Government in rejecting the plan for Imperial preference. Competition from California and cheap labor countries are other reasons.

Interesting, too, is the statement that the fruit growers are asking that a compulsory pool be formed so that the industry might be stabilized.

TIME TO ACT.

Regina Leader.—A reorganization of the board of pension commissioners is recommended by the special committee of the House of Commons appointed to investigate pensions and soldiers' civil re-establishment matters. The committee bases its recommendations on "widespread dissatisfaction among returned men and others and representations made in regard to the attitude shown by the present board of pension commissioners for Canada." The committee is of the opinion that such reorganization would result in the intent of parliament being more effectively carried out through a more sympathetic interpretation of the pension law.

Again an impartial body has condemned the present pension commissioners for their unsympathetic interpretation of the pension law, which means an unsympathetic attitude toward many disabled men and the widows and orphans of others, who were clearly intended by parliament to receive pensions. The findings of the House of Commons committee are much the same as the findings of the royal commission which investigated the administration of the pension law two years ago. Will the Government ignore the specific recommendation of the House committee, as it did the recommendation of a housekeeping implied in the findings of the royal commission? As long as the personnel of the board of pension commissioners remains as at present, anything like a sympathetic interpretation of the law will be as easily obtained as blood from a stone. The Government now has all the excuse necessary to justify the dismissal of men who have shown themselves determined not to carry out the intentions of parliament in a matter of profound and peculiar interest to the country. Any further delay on the part of the Government can only be interpreted as connivance in the cold-blooded denial of the rights of men incapacitated in their country's service and of wives and children whose husbands and fathers gave their lives in the war. The pension board should be reorganized at once.

WHAT ELECTRIC LIGHT IS BEST FOR THE EYES—

There are three principal types of electric lamps—the old-fashioned bulb having a carbon filament, the lamp having a long metal filament in a vacuum, and the lamp having a shorter filament in nitrogen. This last is more costly but has a higher degree of lighting power for an equal amount of electricity. The light of the three types differs considerably to the eye. The carbon filament gives a more yellowish light, while the nitrogen light, which is the most brilliant, exhibits a sort of halo. When analyzed by the spectrograph the radiation of the three lamps is shown to differ greatly. The spectrum given by the nitrogen lamps is not only the most intense but the most extensive, and includes the ultra-violet rays, while the lamp with the carbon filament has a spectrum which includes a number of infra-red rays, the visible radiation consisting of yellow, orange and red. This carbon filament lamp contains too many of the infra-red rays to be comfortable to the eye. The nitrogen lamp, on the other hand, contains too much of the ultra-violet radiation and thus renders the crystalline lens fluorescent, whence comes the halo mentioned above. Preference should therefore be given to the vacuum lamp, since the light furnished by it is better balanced and more complete. With regard to the nitrogen lamp it may be said further that it is inadvisable that a source of light should be too rich in ultra-violet rays, since these tend to diminish the sensitiveness of the retina and cause congestion of the conjunctiva.—Ex.

TEN COMMANDMENTS OF THE MAIL ORDER HOUSE.

1. You shall sell your farm products for cash, where you can, but not to us, for we buy nothing from you.
2. You shall believe us and best because we do not know you personally.
3. You shall send your money to us in advance so we can buy the goods from the factory with your money, you may have to wait a few weeks, but that is our business method.
4. You shall get help from your nearest city or village to build good roads, so you may easily haul our goods from the depot, but do not ask help from us—we don't help to build good roads.
5. You may buy church bells and altar utensils from us, and send the money in advance—that's our rule.
6. You shall get all the help you can for the church from the business men in your neighboring villages or city although we have more profit from you than they, it is against our rules to give to your churches.
7. You shall convert your neighbors also to your faith in us for we have room for more money.
8. You shall look at the pretty pictures in our catalogue as often as you can, so as to strengthen your desire for things you do not need, but which you may order with other goods to save freight. Send us all the ready cash so that you may not have any left to buy necessities from your home dealers.
9. You shall believe us rather than your home business men, for we want your trade. We get to be millionaires on your support. Don't be bluffed.
10. You shall call on the business people of your own vicinity for help and credit if you meet with hard luck or sickness. It's your money we want; we don't know you unless your orders are accompanied by cash.—Trail News.

SHRUBBERY AROUND THE HOME.

One of the easiest ways of beautifying a home is to plant shrubbery around it. Once you get a bed of shrubs well started, they need little attention. A little spading, trimming and perhaps fertilizing, and these sturdy and independent little bushes take care of themselves and ask no favors from anyone. At their own appointed time, every shrub in a well selected arrangement will burst forth into a rich mass of bloom. If correctly chosen, the bank of shrubbery should have some bloomers at every period in the season. It transforms a bare and cold looking dwelling into a cheerful centre of radiance and beauty. Every home in this community should be adorned with pretty shrubs.

DRY WEATHER IS GENERAL

Weekly Bulletin of Horticulturist Branch on Fruit Conditions.

Vernon, August 1.—Weather conditions continue fine and warm, excellent conditions for haying and harvesting but rather trying on fruit and vegetable crops. Timothy is practically all stacked in excellent condition, the crop being much lighter than usual due to the very dry season. Second crop alfalfa is being rushed up wherever a crop is present. In many fields the grasshoppers and lack of moisture have caused a complete failure. Ranges and pastures are the driest they have been for many years. Added to this the ravages of the grasshoppers are affecting stock pasture in a serious way.

Vegetable crops are suffering in many parts due to lack of irrigation water. Unless rains come soon onions in many fields will be small. Late potatoes have been given their cultivation, filled up and show promise of a good crop.

Duchess apples are rolling in fast and most of them will be in by the end of this week. Wealthies are sizing up well and will follow close on the Duchess. Other fall and winter varieties are in fine shape but lack of moisture in many orchards is beginning to show its effects and a good rain is badly needed. Many orchardists are cultivating heavily with a view to conserving all the moisture possible.

Kelowna, July 30th.—During the past week we have experienced some hot weather. All crops are growing well in all but a few isolated instances. Although the weather has been very dry apples are sizing well and indications are that they will be of good quality. Yellow Transparent, Red Astrachan, Liveland Raspberry apples are about over and Duchesses are moving. Transcendent crabs are now being picked in quantities and Wealthies are expected to move in about two weeks.

Supplies of semi-ripe tomatoes and of cucumbers are increasing. The quality is excellent. Silver skins are moving freely. The onion crop is in excellent condition and there

STAND BY YOUR TOWN

If you think your town's the best Tell 'em so!
If you'd have her lead the rest Help her grow.
When there's anything to do Let the fellows count on you, You'll feel bully when it's through, Don't you know.

If you want to make a bit Get a name.
If the other fellow's it Who's to blame?
Spend your money in your town. Thusly keep the prices down; Give the mail concerns a frown— That's the game.

If you're used to giving knocks, Change your style;
Throw bouquets instead of rocks, For a while;
Let the other fellow roast, Shun him as you would a ghost, Meet his hammer with a boast And a smile,

When a stranger from afar, Comes along,
Tell him who and what we are— Make it strong.
Needn't flatter, never bluff, Tell the truth for that's enough;
Join the boosters—they're the stuff We belong.

Both in use of electric energy per capita and in the proportion of electrically lighted abodes Canada exceeds the United States.

The most extensive, interesting and readily accessible field for alpine climbing in the world today is found in the Canadian Rockies.

Canada's national parks are the greatest wild-life sanctuaries in the world. Wild animals roam at will with no fear of man.

The number of pure-bred horses in Canada increased 44 per cent from 1911 to 1921 according to the figures of the Dominion Bureau of Statistics. The 1921 census showed 3,610,500 horses in the Dominion of which 47,782 or slightly more than 13 in every 1,000 were pure-bred.

Sidelights on a Great Industry

A GREAT ASSET OF EMPIRE

BRITISH COLUMBIA IS SOLE SOURCE OF SUPPLY FOR BIG TIMBERS.

Province's Lumber Trade Within Empire Is Trebled in Eight Years.

The resources of the British Empire are the subject of world discussion at present.

No exhibit at the great Fair at Wembley is arousing more telling interest than British Columbia's forest industries' display. It has been described by the British press as the "Finest advertisement Canada has ever had."

Canada has rightly been called "The Softwood Storehouse of the Empire." British Columbia may as correctly be described as its first, last and only stand of big constructional timber.

The British Empire controls 1,555,000,000 acres of timberlands, or one-fifth of the world's growth, but of this about a billion acres are hardwood, which are less in demand than softwood in the proportion of two to five.

Canada contains approximately 90% of the softwood resources of the Empire. Approximately half of this huge stand is in British Columbia, but when it comes to the highest grades of clear and the largest dimension timber the great British Empire is completely dependent on the province of British Columbia.

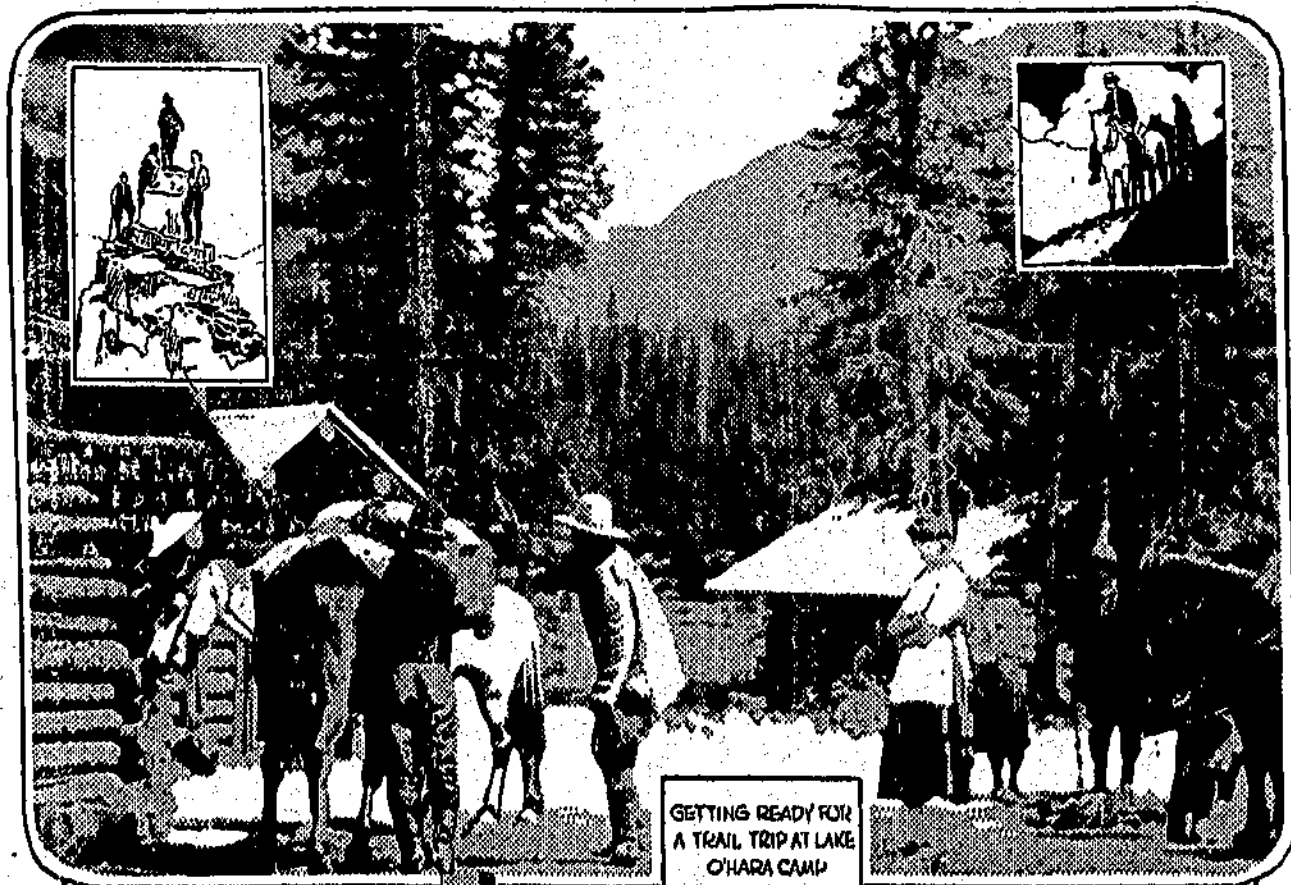

In 1923 British Columbia exported 124,000,000 feet to other portions of the Empire, as against 33,000,000 feet in 1916, an increase of over 375 per cent in eight years.

There is no portion of the British Empire with the exception of Canada that can supply its own softwood needs. Inter-trade with the sister Dominions will increase with the market extension work now being carried on by our manufacturers.

It must be remembered that trade begets trade. Every shipment abroad of British Columbia wood products furnishes an opportunity for expansion of our commerce in other directions.

This series of articles communicated by the Timber Industries Council of British Columbia.

Trail Riders Hold First Pow-wow

PLENTY OF GUIDES AND PACK HORSES ON HAND AT Yoho VALLEY CAMP

July of this year witnessed the first annual Pow-Wow of the Trail Riders of the Canadian Rockies in Yoho Valley, the wonder valley of Canada's mountain playground where, in addition to the regular accommodation at Yoho Bungalow Camp, a camp of tents is being put up with capacity for one hundred guests. Last year a group of outdoor lovers made an initial trail ride and found it so fascinating that they decided to form an organization to foster riding in these mountains. Anyone who has established a record for riding in the Canadian Rockies of fifty miles or more, is eligible to membership, irrespective of race, creed, sex, age or color. So far as the Trail Riders' Pow-Wow is concerned, all that is necessary is that intending members should ride in on horseback.

Dr. Charles Walcott, secretary of the Smithsonian Institution at Washington, D.C., is honorary president of the new Order, and John Murray Gibson, of Montreal, is the honorary secretary. Among the members of the organizing committee are such prominent individuals as H. B. Clow, president of Rand, McNally & Co., Chicago; Reginald Townsend, editor of "Country Life," Garden City, N.Y.; Captain A. H. McCarthy, U.S.N., of New Jersey and Wilmer, R.C., a celebrated mountain climber, and Col. W. W. Foster, of Vancouver, B.C., president of the Alpine Club of Canada. The underlying spirit of the order is a reverence for the majesty and beauty of nature. Its aims are to encourage travel on horseback in the Canadian Rockies; to foster the maintenance and improvement of old trails and the construction of new trails; to advocate and practice consideration for horses and to promote the breeding of saddle horses suitable for high altitudes; to foster good fellowship among those who visit and live in these glorious mountains; to encourage the love of outdoor life, the study and conservation of birds, wild animals and alpine flowers; to protect the forests against fire; to assist in every possible way to ensure complete preservation of the National Parks of Canada for the use and enjoyment of the public; to create an interest in Indian customs, costumes and traditions; to encourage the preservation of historical sites as related to the fur trade and early explorers and to co-operate with other organizations with similar aims.

Last year the Banff-Windermere Motor Road was made available to tourists and eight bungalow camps were built in as many beautiful locations among the Canadian Rockies. Some of them can be reached by automobile, others by trail riding. The new Order will prepare and circulate maps, descriptions and illustrations of existing trails and the country to which they give access, thus putting helpful information within reach of a public that has long been waiting for just such a delightful program as that made possible by the Trail Riders of the Canadian Rockies.

Editors of Canadian Weeklies Are Entertained by Royalty

Many Unforgettable Events Crowded into Brief Space of Time.

(Story of the progress of tour of Canadian Weekly journalists written for The Review by Hugh Savage, Cowichan Leader.)

Torquay, July 11th, 1924.

In the bay before and below me lies a great grey armada, lit up by the setting sun. It is the Atlantic fleet, numbering 80 vessels and including the Queen Elizabeth, Barham, Warspite, Valiant, Malaya (the gift ship of the Malay States), Resolution, Royal Oak, Royal Sovereign, and Revenge.

There is a B. C. touch in the first destroyer flotilla, to which belongs H.M.S. Vancouver. The harbor master of Torquay, Capt. J. B. Haynes, who for many years sailed in and out of Vancouver, sends remembrances and good wishes back to "the Coast."

We steamed all through and round this fleet at Weymouth, eight days ago. It was then too breezy to board the flagship for tea but many of our party have visited the Revenge.

But all this is "ahead of the game." Every minute of our trip has been so crowded that opportunity to write has been nil and the wonder is that any of us have come through after twenty days experience of Belgian, French and English hospitality. Just to illustrate the manner in which honors and privileges have literally been showered upon Canadian editors of weekly newspapers, it may be recorded that within two weeks we had been accorded receptions and had shaken hands with the King of the Belgians, the President of France, our own King and Queen, the Duke of Connaught, Princess Louise and Princess Patricia.

But, here again, I am anticipating. To pick up where I left off, our last whole day in Paris was perhaps the most memorable. We went to the Sorbonne (university) and after lunch called at the office of Le Petit Journal, where sixty typesetting machines were humming at work. I must record here that as we prepared to drink to this famous French

paper (in the wine of the country) a photograph was taken by flashlight. It was developed, printed, finished and shown to us in exactly 3 1/2 minutes!

From there a few of us went to a reception at the home of Madame Stern. France still has her great ladies. Our hostess, for all her 72 years, embodied all the charm and vivacity that is France. It is impossible to describe even in many lines the beauty of her home. It is a veritable treasure house of art—old masters, tapestries, carvings, galleries, books, stained glass, from which one's gaze travels outdoors to a fairy garden—fountains and trees, flowers and emerald grass—all in the very heart of Paris.

Not a stone's throw away is the Palais d'Elysee, to which Madame Stern accompanied us and where the President greeted us with appreciative words for Canada. Afterwards we walked round the glorious grounds of the palace. Paris is sheer delight. One does not have to go indoors. Come, as we did, and see the sunset behind the great Arc de Triomphe, beneath which flickers the undying flame in remembrance of 1 1/2 million who died for France in the great war. The street lights are reflected in the polished streets, fountain and statue and noble pile are there for everybody's delight.

On Sunday, June 29, our party left early, via Dieppe and Newhaven, for London. A dozen of us drove round in those speedy Paris taxicabs, saw new sights and stood in Notre Dame as the great organ pealed and priests chanted. Soon we were whisked away to the aerodrome and after nearly four hours continuous flying, we dropped into Croydon and were carried by car to our hotels.

London on Sunday seemed tame beside Paris. Before one realized it, there was the Thames, looking to our eyes like an overgrown creek. Our driver bares his head as we pass that simplest and greatest of British war memorials, the Cenotaph. Had your eyes been shut you would have recognized the indefinable smell of the Strand.

English voices, washbasins in great hotels, telephones which made you swear, campaladed squares, set about with leafy trees and bright with flowers—we had come to the heart of the Empire. We had come home.

HOW SHOULD I WEAN MY BABY?

This is a serious problem to many mothers. Weaning should always be done gradually, beginning about the seventh month, giving one or two bottle feedings during the day, increasing the number of bottle feedings gradually until weaning is accomplished. Borden's Eagle Brand Milk is so like mother's milk in taste and ease of digestion that it can be given alternately with breast milk without causing abrupt weaning.

In this paper from time to time you will find an advertisement of Borden's Eagle Brand Milk, a food that has raised more healthy babies than all the prepared infant foods combined. Cut out the advertisement and mail it to The Borden Company Limited, Vancouver, and they will send you, free of charge, instructions for feeding your baby, and a Baby Wolfaro and Baby Record Book. Or, just write the Company, mentioning this paper, and they will be sent.

Apple Storage Houses

By R. C. PALMER, Assistant Superintendent, Dominion Experimental Station, Summerland, B.C.

The best conditions for storing apples can only be provided by the construction of cold storage houses in which the temperature is modified by the use of ice or mechanical refrigeration, but experiments conducted at the Summerland Experimental Station have shown, that it is quite possible to greatly prolong the period of usability of apples without expensive cold storage facilities. Growers can improvise means of keeping at least a portion of their winter varieties until the main bulk of the crop is off the market.

Apples frequently keep surprisingly well in an earth pit or root cellar. This is because the conditions required for proper storage are provided—the temperature relatively low and not given to abrupt fluctuation; the humidity of the air relatively high; and the apples seldom so crowded as to prevent a free movement of air.

Almost every apple grower has a bank or hillside in which a cheap but efficient bank cellar may be built. The important points to bear in mind in constructing such a cellar are insulation and ventilation. The roof, door, and exposed walls, must be properly insulated so as to prevent danger of freezing in winter, and to as-

sist in keeping the temperature low in the autumn months. Concrete is not a good insulating material, so that it is not economical to build concrete walls thicker than is necessary to support the roof. Cork board is a most efficient insulating material, but it is comparatively expensive. A layer of closely packed wood shavings, about a foot thick, provides relatively cheap and efficient insulation. The shavings must be kept dry.

Effective ventilation can be secured by having, for every thousand cubic feet of storage space, a cold air inlet two feet long by one foot high on a level with the cellar floor, and a hot air outlet of about the same dimensions in the centre of the roof. In large cellars it has been found of advantage to have one long, comparatively narrow outlet in the roof and several inlets along the wall at the ground level. The boxes of apples should not be piled directly on the earth floor, but should be supported on trestles or a false slatted floor to allow a foot or so of free air space between the boxes and the floor proper. Spaces should be left between the piles of boxes, so as to permit of a free circulation of air.

Any grower who is interested in the storage of apples is cordially invited to visit the Summerland Experimental Station, where simple, relatively inexpensive storage cellars have been in operation for two years.

CORRESPONDENCE

Letters to the Editor.

Naramata, B.C.

Dear Sir,—I was at the Governor-General's inspection of the Boy Scouts at Penticton and was very impressed by the smart turnout of the boys, and noticed many had won badges for various qualifications. But what I want to point out is, that I was very disappointed with the general efficiency and smartness of the Scoutmaster who waited around the governor-general during inspection and certainly lacked discipline, and was the sloppiest man on parade. I am not wishing to hurt this gentleman's feelings, but merely to choke him off because if the O.C. is sloppy his officers and unit will be also. I am interested in the Boy Scout movement and particularly of those units close by, so cannot let this occasion pass without making a complaint so as to buck the S.M. up with a view that it must not happen again. I have not the slightest doubt that he is very efficient in other duties, but before a crowd, oh dear!

Thanking you for a small space in

FRUIT MATURITY PROGRAM ADOPTED IN CALIFORNIA

News dispatches from Auburn, California state that a movement has been started to determine the correct ripeness of fruit for shipment to the eastern markets.

The following program has been worked out: Determine the sugar contents of fruits in various stages of maturity beginning with the straw colored tip, the full straw, red tip, one fourth, one-half, three-fourths and full colored.

Determine the added increase in volume during these various stages of maturity.

Determine the effects of refrigeration during a period of ten or twelve days and the keeping qualities for one week thereafter of fruit in these various stages of maturity.

Determine the effects of the improper use of water just prior to picking upon the fruit in the various stages of maturity as to sugar content and keeping qualities both in and out of refrigeration.

Check these with observations made in the eastern markets.

Determine the loss in weight and by volume for a period of twelve days after picking of fruit in the various stages of maturity.

Determine the cause of fruit arriving in the eastern markets in a condition reported as being over-ripe, waxy and decayed by having our eastern representative inspect such car to determine if the entire car is in such condition or whether it be limited to one particular variety or perhaps to one grower of the particular variety. In case it is confined to one grower, this fact is to be wired at once so that we can make immediate inspection and investigation of the growers' cultural methods to determine the cause.

A thorough investigation to determine the effect of irrigation before picking has been planned.

Some fellows can put in half the morning filling a fountain pen or cleaning a pipe.

The time was passed in swimming and a series of novelty races, followed by supper in the Community House placed at the disposal of the party by Penticton merchants.

At the Union Service on Sunday afternoon, the Rev. H. J. Armistage preached on the subject of Sacrifice as the mainspring of character. The anthem was "O Lord, how manifold are Thy works" (Barnby) the organist being Miss Alice Myers. Anglican service was announced for next Sunday.

**SYNOPSIS OF
 LAND ACT AMENDMENTS**

PRE-EMPTIONS
 Vacant, unreserved, surveyed Crown lands may be pre-empted by British subjects over 18 years of age, and by aliens on declaring intention to become British subjects, conditional upon residence, occupation, and improvement for agricultural purposes.
 Full information concerning regulations regarding pre-emption is given in Bulletin No. 7, Land Series, "How to Pre-empt Land," copies of which can be obtained free of charge by addressing the Department of Lands, Victoria, B.C., or to any Government Agent.
 Records will be granted covering only land suitable for agricultural purposes, and which is not timberland, i.e., carrying over 5,000 board feet per acre west of the Coast Range and 3,000 feet per acre east of that range.
 Applications for pre-emption are to be addressed to the Land Commissioner of the Land Recording Division, in which the land applied for is situated, and are made on printed forms, copies of which can be obtained from the Land Commissioner.
 Pre-emption may be accepted for five years and improvements made to value of \$10 per acre, including clearing and cultivating at least five acres, before a Crown Grant can be received.
 For more detailed information see the Bulletin "How to Pre-empt Land."

PURCHASE
 Applications are received for purchase of vacant and unreserved Crown lands, not being timberland, for agricultural purposes; minimum price of first-class (arable) land is \$5 per acre, and second-class (grazing) land \$2.50 per acre. Further information regarding purchase or lease of Crown lands is given in Bulletin No. 10, Land Series, "Purchases and Leases of Crown Lands."
 Mill, factory, or industrial sites on timber land, not exceeding 40 acres, may be purchased or leased, the conditions including payment of stumpage.

HOMESITE LEASES
 Unsurveyed areas, not exceeding 20 acres, may be leased on homesite, conditional upon a dwelling being erected in the first year, title being obtainable after residence and improvement conditions are fulfilled and land has been surveyed.

LEASES
 For grazing and industrial purposes areas not exceeding 640 acres may be leased by one person or a company.

GRAZING
 Under the Grazing Act the Province is divided into grazing districts and the range administered under a Grazing Commissioner. Annual grazing permits are issued based on numbers ranged, priority being given to established owners. Stock-owners may form associations for range management. Free, or partially free, permits are available for settlers, campers and travellers, up to ten head.

The Pedlar's Pack
 By AUTOLYCUS

"A Snapper Up of Unconsidered Trifles."
 * * * * *
 The Winter's Tale, Scene II, Act IV

This query, largely used in certain circles as a breezy catch-phrase, might very well be made to apply to situations "WHERE DO WE GO FROM HERE?" platted by its original coiners.

Listening the other day to some conversation concerning financial and industrial conditions in the districts represented by the speakers, I was forced to the conclusion that none of them was able to supply a satisfactory answer to the questions, "Where shall we go to do better than we are doing?" Details were exchanged as to conditions known to exist elsewhere, and the ultimate decision seemed to be that it was best to stay in the present location. Wheat farming offered no advantages over apple growing, if it were permissible to judge from authentic reports from prairie centres in the Dominion, while, as for the United States, even if entry remained open, the list of three thousand bank failures in the north-west territories alone was plain evidence of disaster there. Australia, with a national debt absolutely overwhelming and still getting bigger, could be at once discarded, and South Africa was too hazy and little known a prospect to attract. Great Britain being obviously ruled out of the discussion, and European countries impossible, the wise course appeared to be to make the best of the position in which the whirligig of time and the Canadian Pacific Railway had placed us. Furthermore, as outside facts accumulated, it became increasingly evident that our lines were cast in comparatively pleasant places and that, given one or two little adjustments in the matter of reasonable railway rates and protection from market swamping from a country having a dozen times our population, we should still be able to keep our chins above water.

Mr. Henry Ford has been rash enough to prophesy certain coming conditions in transportation matters which may eventually AUTOS AND AIRPLANES. he predicts. Within a very few years, according to Mr. Ford, airplanes will be as common as autos are at the present time, and in general use for all purposes. He bases his prophecy on the assumption that very soon the airplane will have passed beyond the experimental stage and be turned out in much the same way as Ford cars are today. That part of the prediction may be realized, but many things will have to be done before traffic in the air can approximate that of our streets and highways. We have only to imagine the risk to the not inconsiderable residue of the population who will still keep their feet on the ground, to see that restrictions on flying must necessarily be numerous, and that freedom of the air will certainly be limited. It is one thing for airships to cover vast distances under recognized rules, and quite another for us to be menaced by the cloud of smaller planes which Henry Ford seems to see in his mind's eye. Our present day mortality from reckless auto driving is too high for moderate people—what it might be from careless flying seems to look something like a nightmare.

The Vancouver "Province" opines that the coming era of universal air traffic may possibly turn the commercial systems of the world upside down, and bring about absolute free trade between nations, simply because it will be impossible to enforce tariffs! Smuggling would, on this theory, be so easy that "it might not be worth while to try to stop it," which is certainly a wide open consideration. When that day actually comes we need not worry any more about anti-dumping clauses on fruit, or on anything else for that matter, since the excess products of our neighbors will be brought in at any price whether we like it or not. And here we may note that prohibitionists must take thought for the morrow. If the blue sky above is going to be a vast highway for smugglers how in the world is the Volstead Act to be enforced? When the Demon Rum can take unto himself wings and carry his fensid concoctions to arid areas without saying so much as "By your leave," what is to happen to the Eighteenth Amendment? It is a sad thought, and Mr. Ford should be requested to withdraw his prediction!

The same paper referred to in the preceding paragraph has an interesting editorial on the encroachment of the North Sea on a CHANGING the east coast of ENGLAND. To an Eastern Counties man familiar with every seaside place along the coast, the article particularly appeals. I can remember the ruin wrought among the coast defences at Lowestoft something over twenty years ago when a violent storm upheaved the concrete walls built to stem the ocean, and threw them around in huge masses which no machinery could have moved. At Dunwich, once a cathedral city of importance and now a mere remnant, one is told of churches engulfed long ago and now but historic memories. Much of the old Essex town of Walton on the Maze has also disappeared, and in my time still possessed a curious reminder of old encroachments in the shape of a portion of what was known as Burnt House Mill, most of which was washed away one stormy night, giving its occupants scant time to escape. The new watering place of Frinton on Sea, which adjoins Walton, was at that time considerably worried concerning the beautiful greensward which topped the cliffs washed by the sea, and had begun a series of groynes, which reached out at right angles and retained much of the sand which was continually being brought in by the tides. The destruction at Frinton was insidious, but none the less relentless, the sea slowly undermining the cliff piecemeal, and being aided and abetted by the action of the rains which penetrated cracks on the surface above, and drove in liquid wedges. On one occasion I saw an area about equal to a town lot, disappear by slow degrees, slipping downwards inches at a time, and keeping its green turf undisturbed for the several months which elapsed before the final breakup came. The sloping concrete walls usually built to stop encroaching of the tide are effectual only if their foundations can be laid below the action of the undertow, and therein lies the chief difficulty. It is hard to conceive how the ultimate change of coast line can be averted.

AUTOLYCUS.

LOCAL MEN NAMED IN WILL OF LATE REV. JOHN HOGG

Vancouver.—Rev. John Hogg, D.D., who died here January 10th last, left a net estate of \$46,098. A year before his death he gave away \$27,000, including gifts of \$1,000 each to St. Giles and St. Augustine churches, Winnipeg. Additional legacies to these churches of \$600 each are provided for in the will, which has been submitted to the Supreme Court here for probate.

Eighteen hundred and ninety-two dollars and one-fifth of the residue of the estate is bequeathed to each of his daughters, Martha Wallace Teulon and Catherine Elizabeth Smellie of Manitoba and May Emma H. Ledingham of Vancouver and his sons, Kenneth Stuart Hogg of Summerland and Robert John Hogg of Peachland.

A granddaughter, Mary P. Ledingham of Vancouver, is left \$2800 and eighteen other grandchildren \$50 each.

PEACHLAND DOINGS
 A Weekly Chronicle Furnished By Our Local Representative.

Mrs. George Lang and son and little Miss Dorothy Mitchell of Calgary are guests of Dorothy's mother, Mrs. W. C. Aitkins.

Mr. Frank Wrightson returned last week after a short business trip to the prairies.

The Orange lodge held a special degree meeting last week, having the presence and assistance of the provincial grand organizer, W. T. Jago, brethren from Summerland, Messrs. McBrethren from Summerland, Messrs. McIntyre, Cowan, Gould and Davidson.

Mrs. Shultz left last week for New York where she will remain for a time. We learned in conversation with Mrs. Shultz that she is favorably impressed with Peachland as a place of residence and she intends returning as soon as possible. She expected to stop off for a visit at Winnipeg.

Mrs. Latham returned from Summerland by stage on Wednesday having spent some time there during the illness of her sister Mrs. E. M. Clarence.

Mrs. C. Widen and her two children, late of Wetaskawin, Alberta, are spending a few weeks in the valley prior to settling in Vancouver where Mr. Widen has preceded them. They are making their headquarters with Mrs. Widen's parents, Mr. and Mrs. Eisey, Summerland. Mrs. Widen spent part of 1915 and 1916 in Peachland, employed by Messrs. Thompson and McCall in the General Store. She and her children came up last week and are guests of Mr. and Mrs. H. E. McCall.

After several months in Peachland with her parents Mrs. Chas. Ingles and family left on Thursday to join Mr. Ingles on the prairie. Her mother, Mrs. Thos. Powell, accompanied them up the lake, returning in the afternoon.

Union Sunday School held their annual picnic at Miller's Point on Thursday afternoon of last week. There was a good turnout, the day was fine and the crowd were well pleased with the choice of place. The social committee had carried out their duties well as was evidenced by the fine spread of dainties laid out before the appreciative assembly. After lunch the lake proved an attraction

to the many bathers present. Some of the male members of the party put up a swing for the children which was in much demand throughout the afternoon. The sports committee assembled the speedy members out to the open field where the prizes were contested for in the various ages and after the races class five challenged the rest of the crowd to a baseball game. This however was not finished, as the call came for a lunch before taking the return journey home.

Mrs. Jas. Darke and her youngest daughter, Ada, with Mrs. R. E. White and her daughter Marjorie motored up from Summerland on Friday last to visit Mrs. L. D. McCall. While here they were advised by phone that a slide would prevent their return by road unless they took the old bench road. They returned by boat in the evening, and the car was driven back over the bench road by Billy White of Summerland who had been employed that afternoon to drive up the car of another party who did not care to venture the drive themselves. The slide was removed as speedily as possible by putting a gang on from each end.

Mr. Weitzel, Sr. of Penticton, a former resident here, spent a portion of last week in the community and looking over the gold field. He was accompanied by a Penticton friend.

Mr. J. McKinnon spent Saturday in Kelowna.

Mrs. Baptist and Miss Polly Hoheness spent Saturday in Kelowna.

Mr. J. M. Robinson of Naramata and his brother the Rev. A. T. Robinson paid another visit to friends here during the week.

Mr. George Gartrell of Summerland spent a portion of last week in the vicinity, joining the gold seekers.

Two small gangs have been out fighting small fires started by the recent electric storms in the hills back of here. Earle Murdin had charge of one of the parties out in the Aeneas Creek country while Bill Kudelka had charge of the other one up in the Glenn Country. Both fires are under control.

Mrs. F. W. MacMannus, of Sacramento, California, was a recent visitor in town. She had been to New York and in making the return journey home through the Canadian Rockies, called in to Peachland to visit her aunt and cousin, Mrs. S. E. and Miss A. Elliott and other members of the family.

Mrs. Wm. Buchanan, Jr. and Miss Myrtle Keating were out of town visitors on Monday.

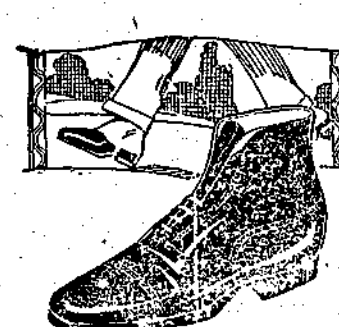

Ray Harrington and Hugh Dorland left town on Monday to spend a week camping in the hills. They were motored in to the present end of the Peachland-Princeton road by H. McCall, his two boys and Mr. R. Harrington accompanying the party out for the trip.

SERVICE PLUS

A garage exists to give you service. It's success is measured by the service it renders. Our success is due to our unswerving efforts to give Service Plus. Whether it is a gallon of gas or an engine to be overhauled you will find our mechanics and assistants always efficient, willing, courteous, and ever ready to give Service Plus.

READ'S GARAGE

FORTY BABIES IN FAMILY BOX

ONE hour a lot nowadays about babies travelling long distances unaccompanied. Here are forty babies travelling without nurse or mother and they are all in one box. What's more, they are only a day old. Human babies wouldn't survive, but the sturdy little baby chicks in this photograph are representative of thousands constantly shipped from hatcheries to farmers all over Canada via Dominion Express in special boxes which enable them to make the journey in safety and with little discomfort.

No woman can be homely who does this

A simple method which safeguards lovely complexion—the beauty every woman can possess.

No girl or woman can be called unattractive who has kept the beauty and radiance of youthful complexion.

And today millions of women know this simple method. You too may employ it to keep lovely and young the clear, fresh skin Nature gave you.

This is all you need
 Cleanse the skin regularly, and—

Made in Canada

PALMOLIVE

Volume and efficiency produce the quality for **10c**

thorities say, to keep your complexion lovely, radiant, youthful. But beware of harsh cleansing methods. They injure skin.

Wash thoroughly with Palmolive Soap—each night before retiring. Rub the creamy, foamy lather well into the tiny pores. Rinse — and repeat the washing. Then rinse again.

Then—if skin is dry—apply a little cold cream. That is all. Skin so cared for is not injured by cosmetics, by wind and sun, or by dirt.

The simple, correct way
 You cannot find a more effective beauty treatment. Because Palmolive Soap is blended of rare palm and olive oils—famous for mild but thorough cleansing qualities since the days of Cleopatra. And it is inexpensive. Let it do for your whole body what it does for the face.

See that you get Palmolive—which is never sold unwrapped. All dealers have it. In a short time improvement will be noticeable, encouraging.

THE PALMOLIVE COMPANY OF CANADA, LIMITED

Local Happenings

Mrs. Downton and children left last week for a visit at the Coast. Miss Mason, of Los Angeles, arrived here this morning to visit her sister, Mrs. R. M. Ross.

Mrs. J. Norris arrived this morning from Vancouver and is the guest of her sister-in-law, Mrs. R. C. Lipsett. Mrs. W. H. Butler and Miss Butler arrived on Monday night from Manitoba and are guests of Mr. and Mrs. E. R. Butler.

Miss Brown of Kelowna was the guest for several days of Marion Beavis here. She left on Tuesday morning for Peachland. Mrs. Bundie and two children came in from Erickson, Kootenay Lake, on Wednesday morning to visit her sister, Mrs. S. A. MacDonald.

Laurie Beavis went up to Kelowna on Tuesday's boat, where he will be employed as assistant telegraph operator in the C. P. R. offices. Dr. and Mrs. F. W. Andrew and son Billy left on Friday on a motor trip to Yellowstone Park. They will probably be away about two weeks.

Miss Ella Bowering and Warren Gayton, matriculation students at Brandon College, have both been successful in their recent examinations. Mr. and Mrs. C. B. Winter and son, John, left on Saturday on a motor trip to the Coast, including Vancouver and a tour of the Island.

Miss Gwen Harris, of the staff of the Dominion Bank, left on Saturday morning for Winnipeg, having been advised of her transfer to a branch of the Dominion Bank in that city. Miss Leslie, who has been the guest of her brother and Mrs. Leslie here for some weeks, is leaving on Sunday to return to Chelsey, Ont. by way of Vancouver and Edmonton.

Rev. W. A. and Mrs. Alexander are spending their vacation camping at the beach. The union services of St. Andrew's and Baptist churches are being continued by Rev. Z. L. Fash.

Mrs. W. T. Hunter entertained last Thursday evening at an informal dance at her home, about forty-five guests being present. Mr. Emmerton of Penticton provided the music.

Mr. and Mrs. J. Rowley left on Sunday to motor to the Coast, where Mrs. Rowley will spend her vacation. They were accompanied by Miss McMillan and another Penticton friend.

Miss Fletcher and Miss Tomlinson, of Sarnia, Ont., came in by boat on Friday night and are guests at the home of Mr. and Mrs. Geo. Graham. After a visit of about a week here they will continue to the Coast.

Mrs. Abraham of Innisfail, Alta., is visiting Mrs. Jas. Gartrell here. Mrs. Abraham, who was a former friend of Mrs. Gartrell in the east, has been visiting relatives at Kelowna, and came down the lake on Monday night's boat.

Rev. N. McNaughton, pastor for several years of the Summerland Baptist church, has gone to Chicago where he will take his final year in pursuit of the Ph.D. degree. Since leaving here Mr. McNaughton has been pastor of Olivet Baptist church, New Westminster.

Attention of the editor has been drawn to the fact that the total marks credited to Isabel Hogg, published in the high school examinations last week are incorrect. The total given by the Department of Education is 331, but by adding the marks of the individual papers the total is 431.

Summerland Girl Guides on Friday went into annual camp, Brent's Lake being the site chosen for this year. There are eleven girls in the party who are in charge of Mrs. Pares and Mrs. O'Mahoney. A number of friends visited the girls on Sunday and from all reports, they are thoroughly enjoying the outing. They will be in camp for a week.

Mr. and Mrs. H. W. Warner of Vancouver arrived here on Tuesday by motor from Oroville, and are guests at the home of Mr. and Mrs. Vandenberg. Mr. and Mrs. Warner were married at the Coast city about a week ago and have been spending their honeymoon at Seattle, Tacoma, and other American cities. Mr. Warner is a brother of Miss Belle Warner, who is known to many Summerland citizens, having been at one time on the staff of the local hospital.

G. L. Salter was in town this week on a brief visit.

Jas. Ritchie left on Wednesday on a business trip to the Coast.

John Denike left this morning for Eyrie, Sask., where he will teach school.

Misses Carol and Ruth Graham are leaving on Sunday for a visit to Vancouver.

Miss Winnie Riley has been spending a week here with her friend, Miss Violet Atkins.

Jack Logie and a number of friends are camping for a week at a lake north of Hedley Mines.

Mrs. F. Anderson of Penticton is spending some weeks with her daughter here, Mrs. Geo. Henry.

Hugh McIntyre went out last week to Wynyard, Sask., where he has taken a school for the summer months.

Capt. Weeks and Mr. McFarlane of Okanagan Landing, were guests on Sunday of Mr. and Mrs. O. Atkins.

Mrs. C. P. Evans is expected to return on Saturday night from Brandon, where she has been for some time.

Occidental Fruit Company are now located in their new packing house a short distance east of the high school.

St. Andrew's Taxis boys held a party at Crescent Beach last night. Rev. and Mrs. Alexander acted as chaperons.

E. A. Aubbson, who has been living here with P. O. Minnich, went down to Vancouver last week. He may remain at the Coast.

Messrs. Armstrong and Henmore, who have been for some time on the staff of the local box factory, left on Friday to return by motor to the Coast.

Mr. J. L. Logie, accompanied by his daughters, Mrs. Harmout and Miss Grace Logie, motored down from Okanagan Centre last Friday and returned on Monday.

Mr. and Mrs. J. Riley, Miss Winnie Riley and Master Jack Riley, and Misses Effie and Winnie Willins, all of Calgary, were guests last week end of Mr. and Mrs. O. Atkins.

Mr. Walker Wright came in on Saturday night from Lougheed, Alta., and will take charge of the services in the church of God, of which Mr. E. L. Busch has until recently been in charge.

Mrs. P. O. Minnich went over to Merritt a few days ago to visit her sister, Mrs. Wallace McLuhan. She plans on leaving shortly for California but may come back to Summerland for a few days before going south.

Mr. and Mrs. R. Waddrell and children left this morning to return to their home in Montreal. They have been guests here for about three weeks of her parents, Mr. and Mrs. Jas. Thompson and brother, D. C. Thompson.

Mrs. W. H. Hayes is visiting her daughter, Mrs. C. W. Lees in Seattle. She went down to Vancouver some days ago and after a few days there, Mr. Lees motored up from Seattle, where he is taking a special course at the university, and got Mrs. Hayes.

Mr. and Mrs. Wm. Bray arrived here Sunday evening from New Westminster where Mr. Bray is in the automobile business. They made the journey in two days, reaching Cholan from New Westminster on Sunday evening. They are visiting Mrs. Bray's parents, Mr. and Mrs. C. B. McCallum.

Dr. and Mrs. C. J. Coultas spent a short time here on Saturday, having arrived that morning by motor with friends from Vancouver, and continued to Kelowna that evening. They came down by stage from the Orchard City on Monday morning and returned that day by train to Vancouver.

SUMMERLAND WEATHER REPORT

Below is a report furnished by the Dominion Experimental Station here for the week ending Tuesday:

Table with columns: Date, Max., Min., Rain, Snow, Sun. Data for July 30-August 6, 1924.

A Ford truck loaded with ice overturned off the Penticton road last Friday.

Messrs. Geo. and Jack Wilcox came down from Salmon Arm yesterday by motor and spent the night here, guests at the T. J. Garnett home, returning north today.

Okanagan friends of the Wellband family will be interested to learn that Wilbur Wellband was married this week to a Seattle girl. They will reside in Vancouver.

Mrs. Broad is a patient at Summerland hospital. She entered that institution early this week. Her condition of health is such as to cause considerable uneasiness.

Mr. and Mrs. J. R. Brown have as their guest Miss Middlemiss, of Alberta, who arrived this morning from the Coast where she has been visiting for several weeks.

Miss Eva Shields returned last night from Edmonton, where she has been visiting relatives for a couple of weeks. She stayed over for a day in Calgary on the return trip.

Mrs. G. N. Gartrell came in from Hope, B. C. on Sunday morning to join Mr. Gartrell on a motor trip to Kamloops. They left on Monday morning and will probably be away for about two weeks.

During the absence of Miss Coristin, of the hospital nursing staff, who is away on vacation, Miss Ross, a Victoria girl for several years on the staff of the Kelowna hospital, is relieving on the local staff.

Miss Helen Sutherland is the guest of Miss Dorothy Solly, having come up about ten days ago from the Coast with the latter, who had spent some time a guest at the Sutherland home. Both girls are at present in camp with the Girl Guides at Brent's Lake.

A surprise party was held Wednesday evening at the home of Mrs. Cunliffe, Prairie Valley, in honor of Miss Edith, who leaves shortly for Normal School, and John Denike, who left this morning to resume teaching in Saskatchewan. A merry evening was spent with music, games and dancing. The guests left in the wee small hours after giving three cheers for Edith and John.—Cont.

NO TRUTH IN MURDER STORY

Rumors have been current at Peachland and elsewhere that the Indian who found the first gold nuggets which created the rush to the headwaters of Trepanier, had been shot. Inquiry made by The Review indicates that there is not truth in this rumor. Apparently it developed out of the fact that an Indian of the Westbank reserve had either committed suicide or died from drinking wood alcohol.

"The Man Who Saves You \$\$\$\$" SUMMERLAND WEST SUMMERLAND

DRY WEATHER IS GENERAL

(Continued from Page 2) should be some good yields of good quality onions.

The second cutting of alfalfa commenced. The grasshopper menace is not so great now as earlier in the season. The consistent use of poison bait by many growers has done much to reduce their numbers.

Summerland, July 30th.—Weather still continues hot and dry with rain in sight. Peachland north had a heavy thunder shower on the evening of the 26th.

Up to the present the orchards do not show the effects of water shortage, and the various fruits coming in to the packing houses are of good quality.

Apricots are over. Early peaches are moving in small lots. Peach plums are over. The picking of Burbank and Climax is now in progress. Clapps Favorite pears are now being picked.

Transparent apples are over. Duchess and Red Astrachan apples are moving fast. Tomatoes are not ripening as fast as could be wished. The cool weather in June seems to have destroyed much of the early blossom.

Mixed carload lots are moving out every day. Grand Forks, July 29th.—The orchards generally in the district are in a very poor condition. While some have a really good showing, others will not yield more than half a crop, and in many orchards owing to drought conditions and the effects of winter injury, the crop will be practically nil.

An excellent move has been instituted by the manager of the local Growers' Exchange in the handling of the potato crop. It is proposed to use the fruit grader in the central packing house on which to grade all potatoes grown for market. Potatoes handled over this machine can be sorted much more cheaply, and a more uniform grade secured, than by the old method of sorting by hand. By putting up an absolutely uniform and dependable grade, and having the crop disposed of in a business-like manner, it is hoped to capture and hold the nearby markets of Rossland, Trail and other consuming centres. These are the logical markets for the potato output of this valley but have been practically lost to our ranchers as a result of careless grading in the past, and in many cases no grading at all.

Creston, July 26th.—The weather continues hot and sultry, and as a result the raspberry yield has fallen off, only irrigated patches standing the drought conditions and these are expected to be finished within the next two weeks.

Some early corn and a few cucumbers are on sale locally, but the quantity sown this year for commercial use is small compared with last year. Tomatoes are sizing rapidly and in some early situations will soon be ready to pick. There is twice the acreage planted to tomatoes this year as compared with previous years.

If present weather conditions continue for the next three weeks it will be very trying on non-irrigated orchards and will considerably reduce the commercial crop in size and quality.

Blackberries have made their appearance this week, but the acreage grown locally is small and a heavy

crop is not expected. Loganberries will soon be over. Early apples are beginning to move and the grade of cooking apples in increasing quantities of late to meet local demands.

FRUIT CROP PROSPECTS COMPARED WITH 1923

From Summary Prepared by The Dominion Department of Agriculture.

British Columbia
Apples, 60 per cent of 1923 crop, or 2,220,000 boxes; peaches, 30 per cent, or 21,240 bushels; plums, 75 per cent; prunes, 55 per cent; pears, very light; cherries, 35 per cent, or 35,000 bushels; apricots, 100 per cent, or 32,350 bushels; strawberries, 75 per cent, or 2,925,000 quarts; raspberries, 75 per cent, or 900,950 quarts; loganberries, 100 per cent; currants, 80 per cent; onions, 80 per cent, or 3,600 tons.

Ontario
Apples, 90 per cent, or 1,173,960 barrels; peaches, 60 per cent, or 199,716 bushels; plums, 60 per cent, or 49,800 bushels; pears, 75 per cent, or 84,000 bushels; cherries, sour, 60 per cent; cherries, sweet, 30 per cent; strawberries, 100 per cent, or 3,607,000 quarts; raspberries, good crop; onions, 100 per cent, or 9,250 tons.

Quebec
Apples, 150 per cent, or 98,000 barrels.

New Brunswick
Apples, 100 per cent, or 69,300 barrels.

Nova Scotia
Apples, 90 per cent, or 1,638,957 barrels.

United States
Fruit crops are late, though present prospects look generally promising. Apples have suffered severe damage in the States of the North-West, where yields will be light. Blight and scab have done injury in some areas, but for much of the country the prospects are excellent.

In Montana late frosts in the Bitter Root Valley have destroyed 60 to 80 per cent of the expected big apple crop. There will be only about half a fruit crop in Idaho, but it is developing well. Tree fruits are making a fairly satisfactory growth in Washington. In Oregon tree fruits do not look badly but, as they have gone through the season so far without rain, they cannot be expected to make a heavy yield. Without rain soon the summer crop of apples, pears and prunes will be very heavy and the size of the fruit produced small. The outlook in California is for a lighter crop than last year.

England
English fruit crop prospects for this year, subject to the June drop, information as to which is not yet to

When Should Apples Be Picked?

By R. C. PALMER, Assistant Superintendent, Dominion Experimental Station, Summerland, B.C.

How soon shall I pick my McIntosh? How long will it be before the Jonathans are ready to harvest? What is the latest date I can leave my Newtowns on the trees? These are questions which present themselves to every grower as the harvest season approaches. Such questions merit careful study as a rash or ill-considered answer means loss of good dollars to the grower.

Apples which are picked too green fail to develop full flavor and tend to shrivel; while apples which are left too long on the trees tend to undergo rapid decay. Only those apples which are picked at the right stage of maturity can be expected to reach the consumer in prime condition. Such apples mean satisfied customers who eat more apples and so go a long way towards bringing prosperity to the grower.

In deciding when to pick his apples the grower should be guided primarily by the maturity of the fruit. Too early picking means loss of quality and loss of tonnage, while undue delay in harvesting may result in loss through decay.

In this connection it may be pertinent to make brief mention of some work which is being carried on at the Summerland Experimental Station. Experiments in dates of picking of ten of the most important va-

rieties of apples grown in the British Columbia dry belt were started in 1920, and have been continued and extended each year. The work has been planned to throw light on such questions as: How long does an apple continue to increase in size? When does an apple cease to take on more color? Is there any simple test whereby the grower can tell when an apple is ready to pick?

It has been found that apples continue to increase in size, and to take on more color until quite late in the season, for the variety. It should not be inferred, however, that it will always be found advisable to leave the apples on the trees so long as the fruit is growing and coloring. On the contrary it will usually be found more practical to pick the fruit as soon as it is sufficiently mature to ensure the development of full quality. The most satisfactory test of maturity which has been tried at this station is that of changes in the undercolor of the skin of the apple. Most apples keep well and develop good quality for the variety when picked during the time that the undercolor is changing from green to light yellow. After a little experience and instruction these changes in undercolor are easily recognized.

Any grower who is interested in this question will be welcomed at the Summerland Experimental Station during the harvest season, when it will be possible to give a practical demonstration of the proper time to pick apples.

DESTROYING PREDATORY FISH

The destruction of nearly 28,000 coarse fish, principally squawfish, by the staff of the Cultus Lake Hatchery, B.C., is announced by the Department of Marine and Fisheries. This work was undertaken as a result of the investigations that were made when the sockeye yearlings were migrating from Cultus lake to the sea. It was noticed that the squawfish were feeding on the young salmon

and, are as follows; Apples, early varieties, rather short; late varieties, especially Bramley Seedlings and Newton Wonders, good. The crop in general, while not a bumper one, will be very much larger than last year. Pears and cherries, excellent. Plums, patchy and in general not very satisfactory, though an improvement on last year.

Continental Countries
Full information has not yet been received from the continent, but the outlook is promising, and it is evident that the shortage that produced such satisfactory prices in Hamburg last year, and nearly a fourfold demand from Scandinavia, will not be repeated. The Tyrol, which offers strong competition with transatlantic fruit on the Continent until after the New Year, will have double last year's crop, 80 per cent of which will be exported. Reports from Belgium and Holland show that indications at present cannot be very definite, in view of the lateness of the season, as the blossoming has been considerably delayed. However, this very fact, minimizing the dangers of frost, is in favour of a good crop, and the general expectations in both countries are for much larger quantities of apples than in the past.

With respect to the washed in land, Mr. Logie quotes an Ontario decision to the effect that land washed up by water becomes part of the land immediately behind or beside it. He further claims that the company purchased land to the foreshore, which included this piece, even though not shown on the subdivision plans.

It is understood that the matter will again come up before the municipal council.

and an examination of the stomachs of a number of those caught gave an average of three yearling salmon to each squawfish.

Bathing House Revives Question

(Continued from Page 1)

municipal councils had been unfriendly and would not give approval to the subdivision plan. He claims that the registrar recognizes the right of the company to the land in question and recently he has given notice to those living on the property that they must pay rent. Further, he says he could have sold the whole tract long ago, but, recognizing the need of at least a portion of this property as an adjunct to the park, he had refused to do so.

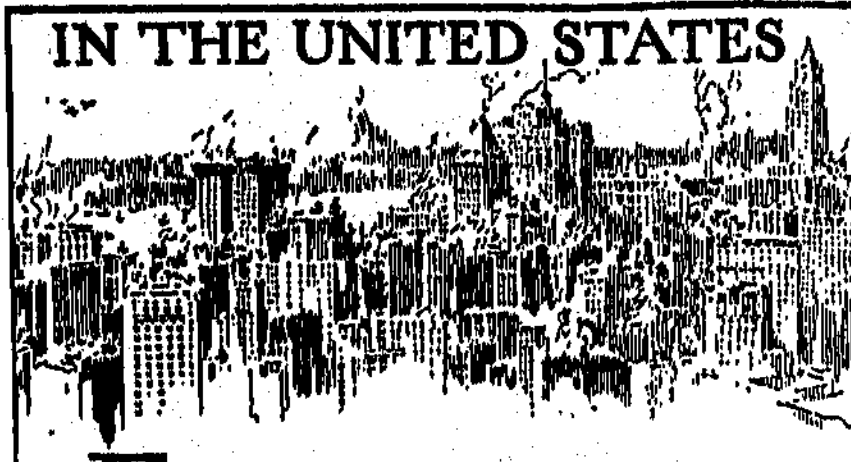

With respect to the washed in land, Mr. Logie quotes an Ontario decision to the effect that land washed up by water becomes part of the land immediately behind or beside it. He further claims that the company purchased land to the foreshore, which included this piece, even though not shown on the subdivision plans.

NINTH of the series dealing with the establishment of the BANK OF MONTREAL at representative points in CANADA and elsewhere

FOR many years the Bank of Montreal has played an active and constructive part in the banking and business relations between Canada and the United States.

In 1855 the Bank established its own office in New York and today its Agency at 64-68 Wall Street holds a leading position among foreign financial institutions represented in that city.

In 1861 the Bank's Chicago Office was opened to care for extensive Western business. Today, at 27 South La Salle Street, Chicago, the Bank is participating actively in banking affairs. In San Francisco and at Spokane the Bank also has its own office.

Talks on Honey

From the Naramata Apiaries

The food value of honey is well known. When honey is taken into the human system it is assimilated without burdening the digestive apparatus. Its properties as an energy builder of first order were properly recognized during the war by military authorities and its place as a superior sweet for table use, owing to its delicate flavor and attractive color cannot be disputed.

Some of the leading food experts of the world are advocating the use of honey and maple sugars and syrups for children's sweets to the exclusion of all other sugars, and especially assailing the various glucose preparations masquerading under the name of syrups. Dr. Alfred W. McCann, author of "The Science of Eating," and other dietetic books, a leading authority on this subject, declares that children are being robbed of their birthright, their appetites demoralized, their bodies stunted and their teeth ruined through the constant use of glucose syrups and glucose preparations in cookery. The Dental Digest for April, 1921, a leading dentist's journal, gave several pages to the subject of teeth damage due to the use of glucose, and advocated the larger use of honey for the teeth, and especially for children's teeth.

The uses of honey are so many and so varied that even a beekeeper is astonished at the size of the list. A glance through the Government Bulletins on the uses of honey in the home and elsewhere discloses recipes for the following, which does not at all exhaust the list.

Formulas for four kinds of cough syrup; one each for colds, tooth paste, freckles, salve, softener for the hands, honey soap, chapped hands, cold cream, polish for kid shoes, water-proofing for leather. More than 100 recipes are given for honey candy and honey cookery.

For a tickling cough nothing gives quicker relief than a mixture of honey and lemon juice, taken as often as the cold is troublesome.

Honey is beneficial in a number of diseases, also, but as I am a beekeeper and not a doctor, I am not going to try to prescribe for the sick when I don't know how.

Honey isn't a luxury. It is cheaper than good jams and preserves, not more expensive than good syrups,

and is far more healthful than any kind of syrup except pure maple syrup, and ought to be found in every home, the same as milk, eggs and butter and other staple foods. Good honey, too, is well worth the slight difference in price over an inferior article which is sometimes bought

because the cost is less. Some time when you are making layer cake, try a filling made of one part granulated honey and two parts of finely chopped nuts. (The proportions may be changed to suit). Spread between the layers as you would other filling.

ALLEGED FIND OF PLATINUM AT PEACHLAND

Confidence Expressed in New Gold Field—Fire on Trepanier.

(By The Review's Resident Correspondent.)
The gold hunt still continues. In addition to local men and others from various points in the Valley, there are several American parties in the mountains back of here, among these parties being some specialists along this line. Some of them report that there is certainly the real stuff and they are trying to locate the most paying properties. One prospector, while searching for the yellow metal, uncovered a pocket of platinum out of which he realized the neat sum of one thousand dollars. He expects to further search and develop this property.

After several months spent down south, Arthur White returned home last week. He says it was pretty hot but he had little difficulty in enduring it.

Lloyd Williams left last week by stage and K.V.R. for Vancouver to visit an aunt for several weeks of the summer vacation.

The Hohensee girls enjoyed a short visit from their uncle last week.

Miss Dorothy Brown of Kelowna is visiting her cousin, Mrs. Baptist. Mr. and Mrs. Scurrah and their two children, of Victoria, B.C., came in on Tuesday last week and spent a few days with Mr. and Mrs. B. F. Gummow and son John. Mrs. Gummow and Mrs. Scurrah are sisters.

After a short time in Kelowna hospital, Miss Gamble, Trepanier Townsite, returned home on Thursday evening's boat.

Mrs. Robt. Howell spent Friday in Kelowna.

Burkett Robinson of Westbank, accompanied by his wife and members of the family, recently came down to put up his hay crop on the property recently taken up here. They anticipate settling on their property here this fall.

(Continued on Page 2)

BAD FIRE RAGING NEAR PEACHLAND

Notwithstanding the exceptionally dry season, the Okanagan has been remarkably free from fires and smoke. But during the last few days several fires have broken out, the worst perhaps being on Trepanier Creek near Peachland. Fire has been raging fiercely there all week and about fifty men are now at work in an effort to get it under control.

Two fires were noticed well back on the mountains east of Naramata.

AN EXPLANATION TO PEACHLAND READERS

Complaints were received from Peachland readers on Friday last of the non-arrival of The Review. Later we learned that the bundle of copies reached the post office there Saturday morning. We regret very much the annoyance and inconvenience caused our Peachland readers, but can assure them the fault is in no way ours. The bundle was mailed at the Summerland post office in good time Thursday afternoon.

FRUIT MEN ARE IN SESSION AT VERNON

The Horticultural Club of the Okanagan is meeting today at Vernon. A number of important matters relating to fruit growing will be discussed. J. Tait, local inspector, is in attendance.

REVENUE WOULD NOT WARRANT PIPE EXTENSION

Thos. Cowan, C. A. Walter and H. C. Mellor have revived their request to the council for an extension of the domestic water service to the bench north of Peach Orchard. The cost of making the extension is prohibitive unless a larger number of users can be obtained.

A precooling plant is to be erected at Creston, a subsidy having been granted by the federal Government.

DO ALL PACKING IN MAIN BUILDING

All fruit handled by the Co-operative is now being packed in the storage building. The upper building is being used as a receiving station. The change was made with the object of cutting down expenses and it is said that the new plan is working well.

Pears, plums, peaches and apples are now being packed and shipped. Bartlett's, Flemish Beauty, and Clapp's Favorite are the varieties of pears now being received, while among the peaches there is the Yellow St. John and Champion. Lombard, Burbank, Yellow Egg and Sugar Prunes are the principal plums being handled at present and the apples are made up chiefly of Wealthy, Gravenstein and King.

"THE OLD OKANAGAN" HEARD FROM AIR

Fred Manchester's popular song, "The Old Okanagan," has been heard over the radio on several occasions. Last night Capt. Roe heard it very distinctly sung by Mrs. Richardson of Calgary and he says it was very beautifully rendered by that capable singer. She is to sing it for the same broadcasting station on Friday evening, August 22nd.

EFFECT SAVING ON SCHOOL ROUTES

Conveyance Contracts Over Six Hundred Dollars Lower.

Six hundred and fifty dollars is the aggregate saving effected by the new contracts on the six Summerland school routes.

Last year the total contract price was \$25.65 a day. This year the total is \$22.40, a difference of \$3.25 per day. With two hundred school days in the year, this means \$650. Half of this amount is a direct reduction of the demands on the local taxpayer, as one half the cost is borne by the province.

Although there is a slight improvement in the service, the town route is costing five dollars per day as against \$5.50 last year. The Giant's Head route contract is one dollar a day less, reduced from \$5 to \$4. The Paradise Plate route, where there is also a somewhat improved service, is cut from \$4.40 to \$4. Prairie Valley route is now \$5 per day as against \$5.50 and Garnett Valley costs \$3.50, whereas it was \$4 last year. The Trout Creek route price of \$4 has been reduced to \$3.40.

As is usual at this time of year when there are no accounts from the school board to be paid, the report submitted to the municipal council on Monday by the finance committee was light, the total of all accounts passed for payment being \$4,765.70.

HOT WEATHER CHECKS CREEK

Surplus Over Domestic Water Needs Greatly Reduced Since Sunday.

Very little water has been running this week in the north or south main ditches which are fed from Trout Creek. The headgates of both north and south mains were closed down on Saturday night for the purpose of increasing the amount of water in the reservoir, but on Monday morning it had come up only about three inches and as the flow from the creek is very light, not much water could be spared for irrigation purposes.

There is a fair volume of water running through the Prairie Creek mains and a limited supply from Ansons Creek is being distributed among the Garnett Valley ranches. Not for many years, if ever before in the history of the community, has the irrigation supply fallen off so early in the season, but as is being pointed out, the fruit season is perhaps two weeks ahead of time so that in that respect the situation is as though the water had lasted until the 25th of August.

There may be some consolation in the fact that Summerland has been in a much better position with respect to irrigation during this unproprietarily dry year than have most other fruit growing districts.

Existing Freight And Express Rates Are Killing Okanagan Fruit Industry Says G. G. McGeer, In Able Address

Organizing Entire Province to Demand Re-adjustment of Rates to Conform With Eastern Tariffs—Crow's Nest Rates Robbing B.C. of Its Fruit Markets—Speaker Gives Figures Showing Costs of Railway Construction and Operation All in Favor of British Columbia—Committee Appointed to Co-operate with Other Centres In Fight for New and Lower Scales—Thos Bulman Commended for Work He Has Done for Okanagan Fruit Growers.

Express charges on Okanagan fruit to prairie points is as much as 250 per cent higher than for similar service in the east and freight rates run as high as 100 per cent over the rate charged for transportation from Ontario fruit centres, according to G. G. McGeer, K. C., who addressed a large audience in the College gymnasium last Thursday night.

Mr. McGeer was accompanied by Thos. Bulman of the United Farmers, who has been working hard in the interests of the growers, having put in much time at Ottawa in his fight against the dumping of American fruit on Canadian markets and later in an endeavor to get a re-adjustment of express and freight charges.

Mr. McGeer, accompanied by Mrs. McGeer, motored down from Kelowna on Thursday afternoon, having already addressed large public meetings at a number of northern centres, beginning at Salmon Arm.

W. C. Kelley, chairman of the Summerland Board of Trade, was in the chair and introduced the speakers, first of whom was Mr. Bulman, who, said Mr. Kelley, is an ardent worker for anything that is for the welfare of the Okanagan Valley.

It was while at Ottawa on his anti-dumping campaign that the attention of Mr. Bulman was directed to the marked difference in the express rates paid by Niagara fruit growers as compared with those charged on Okanagan fruit. A remedy is essential to the existence of

the B. C. fruit industry, said Mr. Bulman, and with the growers behind us we will get busy to effect a remedy. With the tremendous transportation charges that are taken from us there is nothing left from ordinary prices and if the price is made high so as to yield a return to the grower the buyers will not take our fruit.

Mr. Bulman condemned the present policy with respect to immigration, stating that the first need was to make farm conditions right.

Mr. McGeer, in opening his address, explained why the fruit industry had not featured more largely in the fight up to the present for more equitable transportation rates. In 1921 he had sought the co-operation of the fruit growers organization for a reduction of the mountain freight rates. He was much surprised to receive in reply a letter from the traffic department stating that the freight rates were satisfactory and he had to let it go at that.

Comparison of Express Rates
Recently the National Express Company, which serves the Niagara peninsula, had asked for an increase in l.c.l. rates. There followed a complete survey of the Niagara peninsula fruit business. Mr. McGeer found from the evidence that Niagara growers were paying 95 cents express rates on fruit to Montreal, which compared in distance with that between Okanagan and Calgary, where the rate is 2.40, while from here to Vancouver it is \$1.00. True, there was a blanket rate on all fruit moved by express from Okanagan to prairie points, the same rate being charged to Winnipeg as to Calgary. Okanagan to Winnipeg is 1,100 miles, rate \$2.40; Niagara to Halifax, 1,180 miles, rate \$1.50.

Okanagan growers were not in the happy position of the man in the Niagara peninsula in the matter of fruit marketing. Ours are wide and scattered markets; his are mostly short hauls and he has near markets for his off grade products. Mr. McGeer would say that the eastern producer is in a happy position, but their big organization is fighting the rates and proving to the board of railway commissioners that they could not possibly stand the excessive rates now being charged.

Tonnage And Earnings
Checked further, it was found that the express company had moved 630,000 packages of fruit from B. C. and 1,800,000 from Niagara peninsula. The weight of the latter was 27 million pounds, while that from B. C. was 14 million pounds. In other words, B. C. gave them one-third the packages and one-half the weight of the Niagara fruit. On the Niagara fruit \$253,000. was collected by the express company and on the B. C. fruit \$384,000.

This situation he had pointed out to Mr. Bulman who was then in Ottawa, feeling it his duty to do so as a B. C. citizen. At the same time he told Mr. Bulman of the 1921 attitude of the fruit growers' organization.

Apply For Re-adjustment

Application was then made for a re-adjustment of the rates. The board of railway commissioners were much impressed, said the speaker, at the disparity between Niagara peninsula and British Columbia fruit rates.

Although the railway commission had heard British Columbia's application for reduced rates on the sixth of March, no decision had yet been given. Under the present law, if the applicant is not satisfied with the ruling of the commission, he has the right of appeal, but the action of the railway commission in withholding decision puts British Columbia in a position where they cannot appeal.

Says Rates Are Preventing Business

A country which is served by railways with prohibitive rates is little better off than if it had no railways at all, continued the speaker. The west had enjoyed a boom in 1911 and there was reason for it. The Panama Canal was expected to revolutionize the west. The building of the C. N. R. through the Yellowhead Pass with the better grades was another factor. It opened the prairies to the world and wiped out the mountain grades. Then there was the building of the government elevator and all was in order for the business that was to come and all had expected a wiping out of the mountain rates, but it was not until 1920 that the B. C. and Alberta governments obtained a reduction on wheat from 31 to 22 1/2 cents. The speaker then told of the rapid expansion which had followed this reduction. Unprecedented traffic had developed. In the same way, said Mr. McGeer, your rates are preventing the movement of your fruit to the prairies. We must have rates that will permit us to use the railways.

Cites Wheat As Example

Reverting again to wheat rates, the speaker said it was far better to be a Jap than a western Canadian. The lower rates obtained applied only on an export. For wheat bought for our chickens and ourselves we must pay 42 cents while on wheat moved to Vancouver for export to Japan the rate is 22 1/2 cents. It was the duty of the government, the speaker said, to protect British Columbia as it would Eastern Canada, against excessive rates. When they won't,

SWEET POTATOES 16 TONS PER ACRE

In the story published last week by The Review on the subject of sweet potatoes from Peachland, it was stated that the Okanagan Queen variety will produce forty tons per acre. This statement has since been corrected to read sixteen tons to the acre, about 400 bushels.

time has come for a showdown.

The speaker then gave some other figures showing great disparity between the freight rates in the east and those in the west. Winnipeg, he said, is about midway between Niagara and the Okanagan and Winnipeg is a big distributing centre and very important to the Okanagan, yet the freight on B. C. apples to Winnipeg is \$1.13, from Ontario to Winnipeg, 55 cents, a difference of 35 cents a box.

Surprised Commissioner Permits Rates Charged

The examination of Mr. Bulman at Ottawa revealed the high state of organization in the British Columbia fruit industry and Mr. McGeer expressed himself as surprised that with all the apparent intelligence of the British Columbia fruit growers, they had not made money. It was a startling situation that the railway commission would sit by and permit the railways to make such charges.

We have wonderful climate, good land and other resources, everything that would make for a prosperous country. These have not been exaggerated. Your real problem, said the speaker, is a problem of markets. What is the use of growing fruit if you have to dump most of it?

In reducing the grain rates something was done that tells a wonderful story. It has created traffic and opened new markets of vast extent, made grain growing in Alberta successful and on a parity with Manitoba. It is now possible for Alberta to be the largest grain growing province in the Dominion. It is just as essential to your success and future that you have fair transportation charges.

Lower grain rates had created a great shipping industry. Vancouver will soon be the leading grain port of the world and this will mean soon a great consuming centre as a market for your products, but we've got to bring down the transportation charges to a fair and just basis.

The Crow's Nest Agreement

Mr. McGeer then dealt briefly with the Crow's Nest agreement, which was brought into being in 1897. A charter had been granted for the building of a railway from Lethbridge to Nelson, and carried with it a grant of coal and other lands, a property of vast wealth. The charter eventually went to the C. P. R., who demanded an additional bonus of three million dollars in cash to finish the railway. They got it and at the same time Hon. Mr. Sifton secured for the prairie farmers a fixed maximum rate on grain movements to Fort William. He also obtained fixed maximum rates on fruit and a number of other commodities, about fifteen in all.

Vancouver business men found that the east could ship right into Nelson, B. C. in competition with them and the board of trade asked for and obtained a court interpretation of the C. N. R. agreement. The

(Continued on Page 4)

MAY ORDER NEW PUMPING ENGINE

Pumping water to Paradise Flat during the winter is a branch of municipal service that is maintained at a loss, according to statements made at the regular council meeting on Monday; the cost of pumping being in excess of the total revenue.

This was brought out during the discussion of the necessity of providing a new gasoline engine or making extensive repairs to the old one. It was decided to get prices on a new motor before making any repairs. The question will be decided at the next meeting of the council.

ARE WRECKING OLD STUDIO BUILDING

Permission was given M. G. Wilson by the public works committee a few days ago to remove the old studio on Shaughnessy Avenue; Mr. Wilson having undertaken to remove all the material and leave the lot clear.

Its removal will reduce the fire hazard to all the buildings in that vicinity and make it possible to effect a reduction in insurance rates.

The action of the public works committee, in whose hands the matter had been left, was approved by council on Monday.

SPENT VACATION IN MOUNTAINS

Citizens Greatly Enjoy Outing—Stood on Mountain Top.

One does not have to go far from Summerland to enjoy some of the thrills of real mountain climbing and to experience the delight of standing on a mountain peak and surveying a broad expanse of a "sea of mountains" extending for many hundreds of miles in all directions.

J. W. S. Logie and J. O. Steeves, principal of the high school, returned on Monday from a delightful outing of a week's duration, during which time they made the headwaters of Keremeos Creek their camping ground. The time was spent in mountain climbing, hiking to various points of interest and even prospecting. The weather was ideal, unless too cold at times, as Mr. Logie said they wore winter underclothing and dressed up to go to bed. Some nights there was a heavy frost on the ground.

The camp site has an elevation of 6,500 feet and in their ascension of Apex Mountain they reached an elevation of 8,000 feet and it was from this position that they had such a broad view of numerous mountain ranges and some of the famous peaks of British Columbia and Washington. Atmospheric conditions were ideal.

Two young lads, Bert Simpson and John Atkins, accompanied Messrs. Logie and Steeves.

MAKE TRIP TO CAMP CREEK

Beaver Dams Opened—Heavy Shower on Canyon Creek Helps.

On Thursday last the rovee and councillors and municipal clerk all motored to the upper waters of Camp Creek, a tributary of Trout Creek. The trip, which was made by way of the new Peachland-Princeton road, was made chiefly for the purpose of ascertaining if there existed a practical site for a storage dam and reservoir. Such a site had been reported to exist there. Unfortunately no satisfactory storage area could be found. A dam could be built only at relatively prohibitive costs, the amount of water it would hold would not be great because of the slope of the land that would be behind it. The chairman of the water committee described the proposition not feasible.

While there a half a dozen or more beaver dams were let out and this materially aided in maintaining the flow in the creek for perhaps two days.

A heavy shower a few days before had materially aided in maintaining the flow in Trout Creek for two or three days.

ALL VALLEY TO FIGHT FREIGHT RATES ON FRUIT

Central B.C. Freight Rates Adjustment Association Is Formed.

With Major E. E. Hutton, Summerland, chairman, there was organized yesterday at Kelowna the Central British Columbia Freight Rates Adjustment Association, made up of representatives from fruit growing centres from Armstrong to Penticton. Grote Stirling of Kelowna is secretary.

The representatives from Summerland were Reeve Campbell, Mr. Hutton and G. Y. L. Crossley.

A strong executive committee was elected from the Kelowna delegation these being Thos. Bulman, chairman, L. E. Taylor, vice-chairman and Grote Stirling, secretary.

It is understood that the executive committee will take up with G. G. McGeer, K.C., the matter of his acting for the Association in their endeavor to obtain readjustment in rates.

The railway commission is to sit on September 17th for the hearing of the request for lower rates on fruit shipped from British Columbia.

The by-law under which the municipality and C. E. Pineo exchanged parts of land was given its final reading and passed by the municipal council on Monday last.

TRANSFORMER DISPUTE REMAINS UNSETTLED

No answer has been received from the council yet on Monday to a letter from the municipality to the Canadian General Electric, Toronto, on the subject of the replacement of the transformer for the street lighting circuit which was burned out some months ago.

Chairman Bristow of the electric light committee, reported that the Vancouver office of the company had written, offering to repair the old transformer and have the matter of price adjusted afterwards. The committee had replied offering to pay \$100. for the repair of the transformer providing a good job was made of it and the company would guarantee the transformer.

No reply had been received to this letter.

LITTLE DEMAND FOR SPACE ON BILLBOARD

But three payments of two dollars each had been received by the municipal council on Monday for space on a billboard which the council proposed to erect in the tourist park on the suggestion of some of the business men.

Notices had been sent out to all the business houses offering the space at a nominal price and the response was so small that the council decided to drop the idea of erecting the board.

SEEKS COMMISSION AS NOTARY PUBLIC

Formal approval was given by the municipal council on Monday to a petition to the effect that P. E. Knowles be given a commission as notary public. The petition stated that his appointment would be a great convenience to business men in the vicinity of Mr. Knowles' office and that there was practically but one notary public now resident in the community. During the discussion it was stated that there is not now a notary public in the town of Summerland.

ELECTION FINALS FURTHER DELAYED

According to the British Columbia Gazette the time allowed for the returning of the writs issued on the 10th of May last for the provincial elections and the liquor control plebiscite, has been extended to the second day of September for the following districts: Provincial Elections Act, Atlin, Burnaby, Columbia, Dowdney, Fernie, Kaslo-Slocan, Mackenzie, North Okanagan, Omineca, Skeena, Vancouver; in addition the islands are given an extension for return of election writ only.

Editors Have Rare Experience In Visit To The Old Country

(Story of progress of tour of Canadian Weekly journalists written for The Review by Hugh Savage, Cowichan Leader.)

Harrogate, July 20th, 1924.

Four years ago the Empire Press Union visited Canada, travelling as far west as Duncan, V. I., their turning point, after the second Imperial Press Conference at Ottawa.

In the Empire Press Union are represented all the great journals of the Empire. The London members took advantage of an opportunity to return to Canada's hospitality in 1920 by literally smothering her visiting weekly journalists with hospitality and warm welcome. In the provinces the Newspaper Society is now engaged in completing the good work.

In London, Mr. H. E. Turner, Sir Frank and Lady Newnes, were our constant shepherds and companions. In the country, Mr. William Astle, Stockport; Mr. Valentine Knapp, Kingston-on-Thames; Sir James Owen, Exeter, and Mr. F. L. Armstrong, have succeeded them.

We spent from Monday, June 30th, to Tuesday, July 8th, inclusive, in the great metropolis. Of our experiences there alone one could write a book. Most of us survived, but the writer has not yet seen the British Empire Exhibition, neither was he present when on the last night Lord Beaverbrook entertained at Queen's Hall, in order that we might meet Mr. Lloyd George and other distinguished leaders in British life.

We started off with a visit to the Houses of Parliament, where Sir Harry Brittain, M.P., and a party of members conducted us all through the historic building and explained to us hundreds of interesting details. Then followed a luncheon in the Picture Gallery, Princes' Restaurant, Piccadilly, where some of us met old friends and all met members of the council of the Empire Press Union. Lord Riddell, our host, gave us words sparkling with humour and warm greeting.

Thence we passed to Kensington Palace, where the Society of Women Journalists had, through Miss M. F. Billington and Mrs. Massey Lyon, arranged a reception for us. Here each of our party was presented by Lord Burnham to T.R.H. the Duke of Connaught, the Princess Louise (Marchioness of Lorne), and Princess Patricia, all of whom are closely connected with Canada. Their action was a touching tribute to the great Dominion and every visiting editor appreciates it deeply.

One would think that this was enough for one day. On the contrary evening found some of us at the great reception and ball, given in connection with the British Empire Exhibition, at the Guildhall, by the Lord Mayor, who cheerily hoped that each Canadian was "having a good time." With some 5,000 guests, two bands, two concerts, and other attractions under one roof the plan, supplied with a sixteen-page programme, was very useful. The brilliancy of the scene one must leave to the imagination, as people from all over the Empire, in uniforms and court dress, wearing orders and decorations, thronged the historic floors.

Dominion Day came next. We lunched with the Empire Press Union at the Criterion, and went on to a reception by the High Commissioner for Canada (Hon. Peter Larkin) at the Ritz. The annual Dominion Day dinner took place at the Cecil, and there our party listened to speeches by I.L.R.I. the Prince of Wales, the Colonial Secretary (Right Hon. J. H. Thomas), Winston Churchill, T. P. O'Connor, Messrs. Newton Rowell, Dunning (Premier of Saskatchewan), and Larkin.

Wednesday, July 2nd, and Tuesday, July 8th were set apart for the British Empire Exhibition, of which I hope to write later, particularly of the great pagant. On Thursday, July 3rd, by invitation of the Lords Commissioners of the Admiralty, we left by special train from Paddington for Weymouth, where we stowed through some two hundred vessels of all classes. We were to take ten on

board the Queen Elizabeth, the flagship of the Atlantic fleet, commanded by Sir John de Roebuck, but the sea was running too high to permit the transfer of so many landlubbers.

There were several officers on our boat who described the ships to us. Among them was a son of Senator Geauvreau, who is well known in eastern Canada. One of the most interesting incidents was when a submarine went down and re-appeared for our edification.

On land we were welcomed and entertained by the mayor, and other hosts were the master and officers and members of All Souls Lodge, No. 170, a Masonic lodge founded 175 years ago. Its walls enclose many treasures including a copy of the rare "breeches" Bible and a Masonic chair dating from 1571.

On Friday, July 4th the men and ladies were divided, but all saw something of the immensity of London's docks and warehouses, by invitation of the Port of London Authority. The men went by special steamer from Westminster pier, down river, to King George V. dock, lunched there and proceeded to the Royal Albert dock, where they inspected the cold store and transit shed. Re-embarking they went to the tobacco warehouse, Royal Victoria dock, and then came back by steamer to their starting point.

The ladies went by motor to the Cutler Street warehouse and spent the afternoon among cigars, tea, feathers, curios, and carpets there, and ivory, spice, wool, wine, rubber, and skins at London dock. They took tea at St. Katharine dock. The attractions of Henley Regatta proved too much for one scribe, who spent the afternoon as a guest of Mrs. Maffott and Mr. and Mrs. Cecil Harmsworth. A memorable race was that in which Shrewsbury school beat a college crew stroked by the stroke of the winning Cambridge eight, which won the classic varsity race this year.

In the evening we all went to a happy reception by the United Empire Circle of the Lyceum Club in Piccadilly. This is a ladies' club with branches in many overseas lands. Among others, we met there Sir George McLaren Brown, head of the C. P. R. organization in this country.

Saturday, July 5th, will always be a memorable day for us. The directors lunched with Sir Campbell Stuart of the Times, and his charming mother, at his home, Bryanstone square. It was Sir Campbell's birthday, and he had arranged a great garden party at Windsor for all of us. However, this plan had to be cancelled as by command of Their Majesties, we had to appear at the garden party at Buckingham Palace that afternoon.

I cannot attempt to describe that here, but suffice it to say that both the King and Queen shook hands with every British Columbian, and chatted for a few moments. The day ended for a few of us at the home of Sir Frank and Lady Newnes, where we had the great pleasure of meeting another Canadian who has become famous in England, Sir Hamar Greenwood.

Black-Duff

A quiet wedding was solemnized on Monday at the home of Mr. and Mrs. A. Fenwick, when Miss Helen Duff was united in marriage to Mr. Paul C. Black of Grand Forks, B. C. Rev. W. A. Alexander officiating. Miss Duff is a sister of Mrs. Fenwick. The groom is employed as district agriculturist at Grand Forks, where they will make their home.

A BEAUTY SPOT

Chief of Police Thomas at Kelowna has about five acres in his garden which has undoubtedly the most magnificent outdoor display of flowers and vineyard in the province. It is a beauty spot that tourists enjoy visiting and which Chief Thomas delights in showing to the public, and reflects great credit upon its creator in its arrangement and beauty. Rev. all classes. We were to take ten on

OBITUARY

MRS. BROAD

The death of Mrs. C. G. Broad, one of Summerland's most highly respected citizens, occurred at the Summerland hospital early Saturday morning. The immediate cause of her death was bronchial pneumonia, though she had been suffering ill-health for some months. A few days previous to her death she was taken down to Crescent Beach, in the hope that the change might benefit her, but she became worse while there and on Tuesday night was taken to the hospital in an unconscious condition. She passed away very peacefully, suffering no pain and without regaining consciousness. The funeral was held at ten o'clock on Wednesday morning from St. Andrew's church, the service being conducted by the Rev. W. A. Alexander.

Mrs. Broad was held in the highest esteem by a very large circle of friends here and in Calgary, and wherever she went her beautiful character attracted to her hosts of loving friends.

The deceased came out from England in 1909 with her family and for nine years was resident in Calgary, though spending many summers here. In 1918 she came here to live permanently and since that time has been actively engaged in church work of various kinds, and was president of the Methodist section of St. Andrew's Missionary society. She had also a large young people's Sunday School class, in which capacity she was very popular and influential. Always a strong and earnest Christian worker, her influence and example have proved a help and inspiration to those with whom she came in contact.

During the late war she suffered the loss of three of her sons, who were killed in action, and only last year suffered a further bereavement in the death of her husband, Prof. W. T. Broad. It was since this latter shock, which affected her very greatly, that she began noticeably to fail in health and after a year with her son in New York she came home to her last rest.

She is survived by two sons, of New York and of Summerland, and her sister, Mrs. Shepherd, also of Summerland.

GEORGE HAMPSHIRE

Last Saturday afternoon Mrs. George Hampshire, West Summerland, on returning to her home was greatly shocked to find her husband prostrated with a paralytic stroke. He had been as well as usual in the morning and had gone about his work before she left home. He was taken to the hospital, where he passed away Sunday night at nine o'clock.

About three years ago he met with a bad accident and has been in poor health ever since, having had several slight strokes. However, he bravely and uncomplainingly kept at his work until the end which came so suddenly. Mr. Hampshire was an honest, kindly, industrious citizen, respected by everybody who knew him. He was the trusted janitor of the Bank of Montreal and of the Dominion Bank, and of the Bank of Commerce, while it was here. He was also the painstaking janitor of the Baptist church and a valued member of that church.

The funeral was held at three p.m. on Monday at the Baptist church and was conducted by the pastor, Rev. Z. L. Fash. The choir was in attendance and Mrs. James Ritchie sang a solo. The casket was literally banked with beautiful flowers. Interment was at Peach Orchard cemetery.

The widow and one daughter remain here and sincerely mourn their great loss.

MARY PICKFORD IN ENTIRELY NEW ROLE

With the presentation of "Rosita," the new sensational photoplay which comes to the Empress Theatre, Pentleton next Friday and Saturday, you see Mary Pickford, The World's Sweetheart, in an entirely new role. Miss Pickford has temporarily grown up and appears as a Spanish street singer in a colorful romance of Spain of the Empire period, in which she combines pathos with laughter, romance with thrills and intrigue with contrivance. Gorgeous gowns and a wonderful new coiffure combined with a beautiful new film photography, have produced one of the most remarkable pictures yet filmed. This new Mary Pickford personality is amazing audiences wherever it has been shown.

The Pedlar's Pack

By AUTOLYCUS

We who live in Canada and are in more or less close touch with the United States are apt to estimate the general percentage of automobiles in other countries from conditions familiar to us. It may therefore be a surprise when we learn of the immense disparity which actually exists. According to an American magazine which is usually reliable in its statistics, five sixths of all the automobiles in the world are in the United States, fifteen million being the number given. This works out at approximately one auto to every seven persons, an average which may certainly be looked upon as liberal. Against this the totals of Great Britain and Canada, which account for something over half a million each, seem exceedingly moderate, but even so are ahead of the French contingent, which is given at four hundred and sixty thousand. Of the rest of the world only Australia, Argentina and Germany have more than one hundred thousand each, and the rest, I suppose, have mere residues. If we look further into the relation between cars and population we see that Canada with its more than half a million autos to nine million people, comes next to the United States and leads Great Britain and France by more than four to one. We also observe that Germany appears to care very little for autos at present, her proportion to population being apparently smallest of all. And there may be more significance in that fact than is at first apparent. One is led into wondering how far a preponderance of automobiles is reliable as to the real prosperity of a nation. Let us consider a few facts.

Last week I made passing reference to the smashing of over three thousand banks in the North Western States to the south of us. What brought about all those failures? Generally speaking, the chief factor was an accumulation of farm loans, which could not be collected. But when were those loans made, and for what purpose was the money used? They were made when the price of wheat was high, and much of the money was used to buy automobiles. These are two facts which may be placed side by side and fitted together according to discretion. And here is another, which seems to have some bearing. Just as you can today buy many a farm in those States for the amount of its indebtedness, or even a great deal less, so you can buy any number of autos from repair shops and elsewhere for the mere cost of their repairs. In these cases automobiles and individual prosperity appear to have taken different paths at the parting of the ways, and it may be that such instances can be multiplied. The American quota of one car to seven persons seems to have outgrown its strength, and will need a little period of recuperation.

One of those things hard to understand is the necessity for paying premiums in order to obtain employment at average rates of pay. In almost every issue of the city daily papers can be seen advertisements offering work, but containing an intimation that a certain sum must be invested in the concern making the offer. Of course the investment is according to the text, "fully secured" but even so there seems to be an element about such offers which cannot be classed as good business. The proposition is not by any course of reasoning to be placed on a level with those cases where old employees of a big concern are offered stock in the business if they desire to take it—in this latter case there is already a satisfactory acquaintance on both sides, and it is simply a question of putting into the firm some of the money already earned in it. In the invitation now referred to the "investor" is at a very great disadvantage, in that he is taking long chances on something of which he can know but little. And it is astonishing to find that in many cases money has been handed over to some advertiser on a scanty basis of information which ought not to warrant the payment of a single dollar. There are instances recently brought to light in this province where comparatively large amounts have been sent to concerns advertising on these lines from as far east as Toronto, and some of the results are naturally now furnishing material for police investigation. From Winnipeg come offers of work for unskilled labourers, contingent on "investment", and Vancouver itself is said to be smirched with the same brush.

A man looking for work is necessarily anxious to seize an opening, but he would be better off if he husbanded what reserve funds he has, rather than hand them over to an unknown concern, which can only pay his wages out of money he himself advances.

AUTOLYCUS.

CORRESPONDENCE

Letters to the Editor.

Westbank, B.C.

Editor Review.

Dear Sir,—I would like to ask a question through the correspondence column of your valuable paper.

What is the matter with our great co-operative organization which has cost the fruit growers of the province well over a quarter of a million dollars, when many of the growers are willing to pay the association 25 cents per box for the privilege of shipping their fruit elsewhere.

And why is the Association forced to resort to wholesale prosecution to compel growers to ship to it? Would it not be wiser for the executive to direct their energies to-

NARAMATA NEWS

Current Events of Town and District

Mr. T. Scaife and family have returned from Kelowna, where they have lived the past few months, and have rented the Manchester cottage formerly occupied by Mr. and Mrs. Sismey.

Mrs. Simmons and family left on Monday for Vancouver, where they will reside.

Mrs. Horswill is the latest victim of canine illtemper, being bitten in three places by an Airedale which had hitherto had a good name. Evidently the temper of this breed is not to be trusted.

The Anglican service on Sunday afternoon was taken by the Rev. H. A. Solly, who preached on the subject of Transfiguration. The anthem was "In Jewry is God Known" (Whitfield), Mrs. Languedoc presiding at the organ. Following the service, baptism was administered to three children. There was a full congregation.

Scouts from all parts of B. C. will gather together at Victoria next month at the Gillwell Training Course for Scouters, which will be held at the Capital for the first time.

A ruling that members of the Associated Berry Growers of B. C. have the right to sell their products independently was given recently by the Supreme Court at Vancouver, when an injunction secured by the Association against one of their members was dissolved.

The man who cannot forgive any mortal thing is a green hand in life.—Robert Louis Stevenson.

Canada produces 88 per cent of the world's asbestos supply all from the mines of southern Quebec.

wards getting better returns for the growers, and thus remove the necessity of going to law?

I have always been a believer in co-operation, but if this is co-operation that we have now, I renounce my faith.

Yours truly,
AN OBSERVER.

Sidelights on a Great Industry

UNIQUE ORDER for BIG TIMBERS

B. C. FORESTS ASKED TO DELIVER 125 PIECES SCALING A MILLION FEET

Costly Industrial Machinery Will Enable Filling of Outstanding Specification.

Recently an official representing the Dominion Government came to British Columbia with an order in his pocket for 125 pieces of squared timber of unique strength and record dimension, to fill an extraordinary engineering specification.

To give some idea of the size of these timbers the total board measurement of the 125 pieces approaches one million feet. They must also be without defect.

A search of their limits for trees to produce these high sticks will be made by prominent B. C. logging firms, and there is no doubt but that the "goods" will be found and delivered.

The incident illustrates the wonderful quality of British Columbia's timber stand. Only the Douglas fir area of the Pacific Coast could fill an order for timbers of such strength, size and soundness.

Costly Equipment

At the same time, only the costly modern equipment installed by the loggers will enable the logs for this order to be yarded and transported from the woods and only the up-to-the-minute machinery of the manufacturer will permit their sawing and squaring to the required dimension.

Millions upon millions of dollars have been sunk in the equipment necessary to handle the harvesting of B. C.'s timber crop, and millions more in the machinery for its conversion into finished lumber. But for this industrial investment, not only the official from Ottawa, but the buyers of the world, would ask in vain for the delivery of the big timbers from British Columbia's forests.

This series of articles communitated by the Timber Industries Council of British Columbia.

SERVICE PLUS

A garage exists to give you service. It's success is measured by the service it renders. Our success is due to our unwavering efforts to give Service Plus. Whether it is a gallon of gas or an engine to be overhauled you will find our mechanics and assistants always efficient, willing, courteous, and ever ready to give Service Plus.

NORTHWEST FRUIT EXPERTS COMING TO OKANAGAN Horticulturists, entomologists and plant pathologists of British Columbia and the three northwestern States are to meet at Penticton soon in their annual convention.

Local Happenings

Mrs. J. Tait left on Tuesday to visit relatives in Victoria.

Kelowna is hold its annual regatta Wednesday and Thursday of this week.

Joe McLachlan went up to Salmon Arm on Monday morning to visit a friend, David Aikins, there.

Miss Phyllis Freeman left on Tuesday morning for Saskatchewan, where she will resume teaching.

Mrs. J. Lawler went down to the Coast last week, where she will visit for a time.

Mr. C. Tice, of the Department of Agriculture, Victoria, made a brief call at the Summerland Experimental Station yesterday.

Mrs. R. F. Theed and daughter, Elizabeth, went down to Vancouver this week to attend the exhibition there.

Miss Lucy Hargreaves has accepted a position as teacher of the school at Bridesville, B.C., for the coming term.

Mrs. R. Clouston, who left here some time ago, is now residing in Hollywood, Cal., according to word received here.

Mr. and Mrs. A. J. McKenzie of Peachland were guests of Mr. and Mrs. J. A. Darke on Sunday, coming down by motor.

Mr. and Mrs. C. B. Winter and John Winter returned last night from a motor trip to Vancouver and Island points, including a visit to Belingham.

Mrs. J. M. Robinson left the hospital on Monday and returned to her home in Naramata, greatly improved in health following her recent operation.

Noel Wright returned last week after an absence of about two months during which time he has been with a surveying party employed in the Cariboo district.

J. H. Roberts, for several years with the Bank of Montreal here, has been transferred to Mexico. He will be leaving Vancouver for the south in the next two or three weeks.

Mr. and Mrs. Jacques, Sr. and Mr. Harry Jacques, who have been the guests for some time of Mr. and Mrs. M. Scourrah, left on Monday to return to Michel, B. C., in the Crow's Nest pass coal area.

Quite a number of the staff of the co-operative packing house at West Summerland went over to Chute Creek on Sunday, crossing in one of the ferry boats of the Lake Boat Company, and enjoyed a splendid outing.

Mrs. W. A. Alexander went up to Vernon last week to meet her sister, Miss Grace Sherman, of St. Thomas, Ont. who will make her home here with Rev. and Mrs. Alexander. While in Vernon Mrs. Alexander was the guest of Mrs. Basil Stewart.

Mrs. Edward Peterson and her nephew, George Hannington, left here early last week to return to Eureka, Cal. They are making the journey in Mrs. Peterson's car. George will return immediately, as he is due at his school in Saskatchewan August 18th.

Mrs. W. Avery of Winnipeg and daughter, Dorothy, came in last week from Vancouver, where they had spent a week, and are guests here of Mrs. Avery's sister, Mrs. H. H. Elsay, having come to attend the marriage of Miss Gertrude Elsay, which takes place next week.

Rev. and Mrs. Guy and two children of Vernon accompanied by Mr. Rosa, of the staff of the Bank of Commerce, Moose Jaw, motored down from Vernon last Thursday and spent several days with Rev. and Mrs. W. A. Alexander, returning Tuesday morning.

A. S. Peck, who has been at Kinmath Falls, southern Oregon, just east of the Cascades, has moved to Grant's Pass, Ore., on the coast side, a town on the Pacific highway. In asking that the address of his copy of The Review be changed, Mr. Peck requests that he be remembered to all Summerland friends.

CARD OF THANKS The family of the late Mrs. W. T. Broad wish to take this opportunity of expressing their sincere and heartfelt gratitude to the many friends who have shown such unlimited kindness to them in so many ways during the past few days and also to thank them for the beautiful flowers received.

Mrs. Eric Agur is visiting at the Coast, having gone down last week.

Misses Carol and Ruth Graham went down to the Coast on Sunday's train for a short holiday.

Miss Polly Faulkner, who has been visiting for some time with Mrs. Denny and Mrs. Hunter at the Experimental Farm left last week for Vernon.

Mrs. Cahoon and Miss Stillwell, who have been guests for some weeks of the latter's sister, Mrs. H. R. McLarty, are leaving the first of the week for Banff and Chicago.

Mr. and Mrs. Manuel, former New Brunswick neighbors of Mr. and Mrs. C. H. Gayton, are guests for a few days at the latter's home. They will return home by way of Vancouver, Banff and United States points.

Reeve J. R. Campbell and Coun. R. Johnston are the official delegates from the municipality of Summerland to the convention of the Union of B. C. Municipalities which will be held in Penticton on Wednesday and Thursday, the 3rd and 4th of September.

Mr. and Mrs. H. Envo Loop and three children, accompanied by a friend, Miss Alma Schwartz, motored up from Washington and were guests for a few days of Mrs. Loop's sister, Mrs. W. R. Powell, returning south on Wednesday. Mr. Loop is principal of the Shelton, Wash., high school.

Dr. W. L. Robinson left some days ago for Vancouver and other Coast points, after about two weeks vacation here. He went south as far as Los Angeles, where he visited his sisters and from there is returning to Toronto. Mrs. Robinson remained here for a longer vacation and after spending about ten days in Vancouver, will then go to Los Angeles to remain with the Misses Robinson while they are on vacation.

SUMMERLAND WEATHER REPORT

Below is a report furnished by the Dominion Experimental Station here for the week ending Tuesday:

A. J. Beer left on Sunday for Vancouver on a short visit.

Mrs. F. A. C. Wright was a passenger to the Coast on Sunday's train.

W. C. Kelley is on a vacation visit to the Coast. He left by train last Friday.

Alan Cross came down from Salmon Arm this week and is visiting friends here.

Mrs. Geo. Armstrong is visiting friends in Vancouver, having gone down to the Coast a few days ago.

Miss A. Long of Maymont, Sask., is the guest of her mother, Mrs. Long and sister, Mrs. P. E. Knowles here.

Miss Kathleen Elliott returned on Wednesday from Vancouver, where she has been visiting for about a month.

Mr. and Mrs. F. J. Nixon and son Gordon left on the noon train Wednesday to spend a vacation at the Coast.

Mr. and Mrs. A. B. Elliott were Coastbound passengers on Sunday's train, where they will visit for a short time.

Dr. L. H. Newman, Dominion cerealist, with headquarters at Orlawa, was a visitor to the Dominion Experimental Farm here on Tuesday.

J. W. Harris has accepted the position of principal of the North Bend superior school, and will take up his new duties with the opening of the fall term.

Monday, August 25th, is the date for the next regular meeting of the Summerland municipal council, but this meeting has been deferred to Thursday, the 28th.

A. J. Mann, of the local Experimental Station is down at the Coast in charge of the exhibit sent to the Vancouver Exhibition by the Summerland Experimental Station.

A party comprising Mr. and Mrs. W. Johnston, Mrs. E. C. Graham and children, Glen and Jeanne, and Howard Finley, left early Sunday morning on a motor trip to Seattle and Vancouver.

Mr. S. J. Broad and Mrs. Broad reached here on Tuesday night from New York to attend the funeral of his mother, which took place yesterday morning. They will probably remain here for a short time before returning east.

J. Rowley returned Monday morning from Vancouver. With Mrs. Rowley and some friends they left here more than a week before and motored to Portland, Ore., and then north by way of Seattle. The other members of the party will return later.

Mr. and Mrs. O. Vaughan left today for a holiday visit to the Coast.

Mr. and Mrs. Wm. Jenkinson went down to the Coast on Friday's train for a visit.

Miss Rene Harris and Allen Harris were visitors to Kelowna on Wednesday, where they attended the regatta.

Mrs. E. F. Sanborn left yesterday morning for Bowden, Alta., where she will visit three sons living in that district.

The s.s. Seacomus ran behind schedule this morning in order to accommodate people wishing to attend the Kelowna regatta.

Miss Jean Babbit arrived here on Tuesday from Golden, where she has been relieving in the hospital for the past two months.

Mrs. W. C. Kelley entertained the members of the primary class of the Baptist Sunday School and their mothers on Tuesday afternoon.

The Okanagan Lake Boat Company's "Skookum" carried many passengers up the lake this morning to Kelowna to attend the regatta.

B. Robinson, instructor in agriculture here, returned a few days ago from Corvallis, Oregon, where he had gone to take a further degree.

C. J. Amm has leased the Kelley property recently vacated by H. Finley and will open there the first of September with a stock of groceries, provisions, etc.

Donovan Simpson, who was a first year student in Summerland high school while living here with his aunt, Mrs. W. C. Kelley, has just matriculated from high school in Manitoba.

John Fixter, chief superintendent of Dominion demonstration stations, was a visitor to the Dominion Experimental Station here on Saturday. He and Supt. Hunter left on Sunday by motor for the Kelowna district.

V. M. Lockwood and a number of friends made up a boating party on Monday evening, engaging one of the boats of the Okanagan Lake Boat Co. when they enjoyed a jolly outing and tried their skill at the art of surf riding.

Dr. J. R. Graham went down to the Coast on Sunday, where he attended a dental convention of members of this profession throughout the province. After a couple of days spent in Seattle, he returned this morning.

Mr. and Mrs. Wm. Bray returned yesterday to their home in New Westminster, after a vacation spent with her parents, Mr. and Mrs. C. B. McCallum, here. They made the return trip by train, having sold their car while here.

SYNOPSIS OF LAND ACT AMENDMENTS

PRE-EMPTIONS
Vacant, unreserved, surveyed Crown lands may be pre-empted by British subjects over 18 years of age, and by aliens on declaring intention to become British subjects, conditional upon residence, occupation, and improvement for agricultural purposes.

Full information concerning regulations regarding pre-emption is given in Bulletin No. 1, Land Series, "How to Pre-empt Land," copies of which can be obtained free of charge by addressing the Department of Lands, Victoria, B.C., or to any Government Agent.

Records will be granted covering only land suitable for agricultural purposes, and which is not timberland, i.e., carrying over 5,000 board feet per acre west of the Coast Range and 3,000 feet per acre east of that Range.

Applications for pre-emption are to be addressed to the Land Commissioner of the Land Recording Division, in which the land applied for is situated, and are made on printed forms, copies of which can be obtained from the Land Commissioner.

Pre-emption must be occupied for five years and improvements made to value of \$10 per acre, including clearing and cultivating at least five acres, before a Crown Grant can be received.

For more detailed information see the Bulletin "How to Pre-empt Land."

PURCHASE

Applications are received for purchase of vacant and unreserved Crown lands, not being timberland, for agricultural purposes; minimum price of first-class (arable) land is \$5 per acre, and second-class (grazing) and \$2.50 per acre. Further information regarding purchase or lease of Crown lands is given in Bulletin No. 10, Land Series, "Purchase and Lease of Crown Lands."

Mill, factory, or industrial sites on timber land, not exceeding 40 acres, may be purchased or leased, the conditions including payment of stumpage.

HOMESITE LEASES

Unsurveyed areas, not exceeding 30 acres, may be leased as homesites, conditional upon a dwelling being erected in the first year, title being obtainable after residence and improvement conditions are fulfilled and land has been surveyed.

LEASES

For grazing and industrial purposes areas not exceeding 500 acres may be leased by one person or a company.

GRAZING

Under the Grazing Act the Province is divided into grazing districts and the range administered under a Grazing Commissioner. Annual grazing permits are issued based on numbers ranged, priority being given to established owners. Stock-owners may form associations for range management. Free, or partially free, permits are available for settlers, campers and travellers, up to a

Says Existing Rates Are Killing Okanagan Industry

(Continued from Page 1)

judge ruled that Vancouver must have the same rate to Nelson as obtained from the east, meaning that it was illegal under the railway act to give the eastern fruit man better rates than the western man and the board of railway commission ruled that the west was entitled to the same proportionate reduction.

Prairies Have Great Advantage

During the war the Crow's Nest agreement had been suspended, this condition continuing until July 6, 1922. Prairie farmers were fighting for a return to the old agreement and were successful in obtaining the special rate on grain. Having been granted this, British Columbia demanded a reduction on grain and received a 20 per cent and later another 10 per cent reduction. On July 6th this year the full agreement went into effect, which means that the rates on Ontario fruit west have been very materially reduced.

Despite the findings of the railway commission and of the court interpretation, the express companies were putting the Crow's Nest rates into effect between certain points but only on railway lines that existed in 1897 when the agreement was first made.

Mr. McGeer gave it as his opinion that the time had come when the C. P. R. has got to go to work and serve the Dominion of Canada. The time has come when the country must be served and not be considered a special preserve. The railway companies claim that the Crow's Nest agreement rates are out of date, the cost of operating has increased, but the C. P. R. has not offered to give back the three million dollars nor the coal fields, but they are trying to shift the load on to western farmers, the Okanagan fruit grower and the prairie grain grower. He declared it would not hurt for the C. P. R. to drop the dividend from ten per cent to eight per cent. It has accumulated \$168,000,000. In surplus revenue account after taking care of all essential reserves.

West Yields Largest Profit

In the period from 1914 to 1920 the net railway revenue west of Fort William had been \$174,000,000; in the east \$74,000,000. A check had also been made on train miles and it was found that the train mile revenue in the west was \$1.19, in the east 47 cents.

When the investigation started the railways had made much of the higher construction costs through the mountains. There is nothing synonymous, said the speaker, between law and justice as regards the railway act. It had been found that the Dominion government had constructed the railway from Kamloops to Vancouver and gave it to the C. P. R., but the railway was claiming higher rates because of construction. McKenzie and Mann had built a perfect road from the prairies to the Coast and it would have been one of the greatest money makers if used as McKenzie and Mann had intended. In the argument over the comparative cost of construction it was brought out that the cost from Hope to Kamloops was \$133,000, per mile while that from Ottawa to Montreal was \$178,000. The average cost from Winnipeg to Montreal, \$59,000, from Winnipeg to Vancouver \$55,000.

Construction And Operation

Defeated on this point the claim was made that it was the cost of operation rather than the cost of construction that made the higher prices in the west necessary. The cost of operation in the two divisions of British Columbia and Alberta were then compared with the divisions on the Atlantic and it developed that winter conditions in the east more than offset the grades through the mountains and the west had been able to show that the theory of mountain grades was bunkum and nonsense. The result was that the railway commission went so far as to knock off 50 per cent of the mountain scale.

Must Take United Stand

The fruit growers and the people of British Columbia, continued Mr. McGeer, when they go to the railway commission will meet the most perfect organization possible to defend the present rates. It is utterly impossible to cope with the situation as individuals. Mr. Bulman has suggested co-operation. Under the present scheme western Canada cannot grow. Not until the rates east and west are adjusted to a reasonable level can we prosper. The condition is so obviously wrong it must be righted. We must make it known that the deal we are getting from the east is not good enough for the west and our much boasted democracy.

Meeting Takes Decided Stand

The following resolution, moved by

Major Hutton and seconded by C. H. Tate was unanimously adopted by the meeting:

Whereas farming in Western Canada and particularly fruit growing in British Columbia has become unprofitable largely on account of excessive transportation charges, and whereas the Canadian Pacific Railway has been given large grants in money and land to secure the development of the resources of Western Canada, and whereas the British Columbia Government entered Confederation on the express understanding there should be equal treatment in the matter of transportation with other provinces, and whereas such excess charges range in express rates as high as 250% and in freight rates as high as 100%.

Therefore be it resolved, we, the farmers, fruit growers, and citizens of the Summerland district strongly protest against the unfavorable freight and express rates now in effect, and as farming and fruit growing is one of the basic industries, on which depends the prosperity of Canada, we claim preferential consideration in freight and express rates for fruit and agricultural products, and that our freight and express rates to local markets should be, at least, equal to those granted any other farming and fruit growing district in Canada, and we approve of the forming, and will support, a Province wide committee, acting on behalf of all the citizens of British Columbia, to continue the efforts for adjustment of British Columbia freight and express rates until it is an accomplished fact.

Bulman Doing Great Work

Another resolution proposed by G. J. C. White thanked Mr. Bulman for his efforts. Mr. Bulman, said the proposer, had stood in the front in the fight for the fruit grower more so than any man in the valley. He was astonished at the situation revealed and that we are now only waking up to the real situation.

In reply to a question from the audience Mr. McGeer said that the time was coming when the C. N. R. would be in a position to enter into competition with the C. P. R. and to another inquiry he replied that he thought the government had expected that the Crow's Nest pass agreement would have been reinstated as it had been formerly interpreted and that the action of the C. P. R. in limiting its application apparently was with the object of creating sectional jealousy so that there would be a general demand for the removal of the agreement.

Added Overhead For Shippers

At a subsequent meeting which was attended by a large number of interested citizens, it was stated that possibly 150 to 200 thousand dollars would be the additional cost to the Associated Growers in meeting Ontario competition and getting distribution because of the Crow's Nest scale.

He explained that a committee was being organized to represent the whole citizenship of B. C. and suggested that Summerland name representatives on that committee in accordance with the resolution already passed. The following were appointed by the meeting: W. C. Kelley, J. Shepherd, Mjr. Hutton, G. Y. L. Crossley, secretary, Reeve Campbell and F. J. Nixon. It was explained that the purpose is to organize the whole west for a demand for a thorough readjustment of rates.

PEACHLAND DOINGS

A Weekly Chronicle Furnished By Our Local Representative.

(Continued from Page 1)

Miss Muriel Shaw of Craven, Sask., is visiting her uncle and aunt, Mr. and Mrs. Jas. Hawkes, and cousin Marlon. She expects to remain here for the balance of the summer.

Mr. and Mrs. Paton and son Maitland, who have been visiting Mrs. Paton's brother, the Rev. T. A. Sadlor, and his family, left on Thursday evening's boat to continue their trip to the Coast before returning to their home in Quebec. Mrs. Sadlor and daughter Evelyn joined them the following day, by motoring down to Penticton to catch the westbound K.V.R. and expect to spend a few weeks in Victoria where Mrs. Sadlor will visit her mother, two sisters and a brother. This is the first visit to those parts for the Patons and they spoke in glowing terms of the way they enjoyed their short stay in the community.

Mr. Wm. Bradbury left Thursday evening to make a short visit down the lake.

Mrs. Widen and her two children, guests for a week of Mr. and Mrs. H. McCall, returned to Summerland Thursday evening.

Arnold Ferguson has traded in his Ford for a new and fully equipped Ford.

Mrs. Eadie and two children of Enderby are guests at the Winger home.

Jack Hyde, Jr., returned on Saturday morning's boat after several weeks working at Beaverdell.

After an absence of some months Mr. W. L. Williams paid home a visit last week end. He too had been employed at Beaverdell.

J. L. Elliott and son, Franklin, accompanied by C. G. Elliott, motored over to Princeton and vicinity and traded off their car for five head of milk cows and a saddle horse. They brought the stock home over the direct route, the proposed Peachland-Princeton highway, and were met from this end by members of the family who drove out to the end of the new road.

Messrs. S. H. Murdin and son, Show and Miller, enjoyed a few days of last week camping and fishing at Brenda Lake.

Little Miss Lillian Palmer and her brother Russel returned to Peachland after having spent a few weeks with their mother in Vancouver, following their trip out on the occasion of the visit of the warships.

Mr. and Mrs. McCall and two of the children motored out to the Glenn on Friday to bring in Ray Harrington and Hugh Dorland, whom Mr. McCall had taken out early in the week. They camped out over night, returning on Saturday.

Mrs. Ashley recently enjoyed a visit from her sister and nephew from Winnipeg, who visited her a couple of years ago. She is now entertaining as guests Mrs. McNevin and daughter who recently came in from the prairie for a short visit in the Valley.

Mr. and Mrs. Wm. White and Mr. E. Cudmore left on Sunday last for Vancouver where they will take in the special business men's program and attend the exhibition. They will spend about a week in the city.

Miss Leah Morsh left last week for Naramata to visit friends.

Mrs. Walters, a guest of Mrs. Morsh, returned to her home in Naramata on Monday evening. Her son, Malcolm, who accompanied her here, remained behind, having joined one of the fire fighting crews.

Two new fires broke out in this district this week, one up Trepanier Creek, just back of the old mill, the other back of E. F. Smith's place. The latter was comparatively small and was soon gotten under control, but the one up Trepanier is proving quite hard to get in check. At the present time there is a crew of 25 men working two shifts, a night and day. Mr. Emmitt Brinson is in charge of the crew.

Members of St. Margaret's church held a very successful tea on the beach opposite Bally Allan, Mrs. A. J. Miller's home, on Friday last. Quite a crowd enjoyed the tea, bathing, boating and ice cream and the proceeds, which were very satisfactory, go towards the church funds.

Join the Millions of Men who today enjoy better shaves

Less time is used in the Dominion, now, for shaving. And the millions of men who save that time, are also saved sore, irritated faces.

Now we offer you the means to join these millions. To find out what they found out about shaving creams. No expense to you. We pay for the test.

And you will discover why we worked for 18 months, making 130 experiments, perfecting Palmolive Shaving Cream. You'll at once appreciate the 5 distinct ways in which it gives better shaves:

By multiplying itself 250 times in richest lather.

By softening any beard in one minute—without "rubbing."

By the lather that lasts 10 minutes, if necessary.

By the way extra strong-washed bubbles hold each hair erect, for easier, cleaner cutting.

By that cool, soothed after-feel—the result of carefully blended palm and olive oils.

Millions of men could tell you. But it's more satisfactory to find out for yourself. If the test should fail—we are the only losers.

Mail your coupon today—and get 10 shaves free.

NEAR FATALITY SATURDAY ON SHORE ROAD

Car Turns Over — Occupants Crawl from Under It Uninjured.

What might have proved a much more serious accident occurred on Saturday night when J. J. Embree's Ford car overturned off the Pentiction road, about three miles south of town. Mr. and Mrs. Embree, with their little child, had gone to Pentiction earlier in the evening to take a friend down, and it was on the return trip that the accident occurred. They had met twelve cars on their way home, only one of which had put on its dimmers, and the driver of the last, though not dimming his lights, had slowed up in passing, while Mr. Embree, whose lights were not very bright, as they were working only on the magneto, pulled off to the side of the road and stopped to let him by. The bright glare of the lights on the other car made it difficult for him to see clearly and in turning out, he had evidently crowded too closely to the edge of the bank, though it was not until after the other car had passed and Mr. Embree started to move forward that his car overturned, the bank evidently giving way beneath its weight. The car then completely turned over the embankment, coming to a stop directly upside down, with the passengers imprisoned within. The occupants of the other car were by that time apparently too far past to notice the accident and Mr. and Mrs. Embree were obliged to tear the curtains apart and climb out as best they might. Beyond being considerably bruised and scratched about the face and arms none of them received serious injury, though just how they escaped seems a miracle. Shortly after the accident W. Nelson came along in his car, returning from Pentiction, and brought the members of the unfortunate party home. The car suffered a broken windshield, and the top was entirely smashed, while five spokes of the front wheel were broken, but the body of the car remained intact and the engine was not put out of commission, and after being righted, the car was brought home under its own power on Sunday afternoon.

FOUR BASKET CRATE FAVORED

Lug Considered Inferior — A Beautiful Cherry Display Possible.

The following has been issued by the Associated Growers: On various occasions the question has been raised as to the comparative merits of the four basket crate and the lug as a package for cherries. During the past cherry season we have made a careful study of this in the markets to determine which is the most desirable package from the grower's point of view. Our representative Mr. J. B. Dickoy, who had this matter in charge, has made the following report which will be of great interest to all growers of cherries and which we quote in full:— "The four basket crate is certainly the most popular package with grocers from the standpoint of increased volume of sales, and the one with which it is handled. When well filled the customer is attracted and in a great many cases a sale of a basket is made where only a pound or two would be purchased were the lug displayed. It is a case of increased consumption of possibly 50% as against the lug with the same class of trade. Let me point out that this is of course much more in evidence when the selling price is within the reach of the ordinary consumer. We might as well admit that during the past season the cherry was a luxury to most classes and was not consumed in like quantities with the previous two or three seasons. I am referring to Bing and Lamberts as they are the varieties most affected by the lug. We might also include the Windsor and Deacon as (Continued on back page)

RETURN FROM YELLOWSTONE PARK

Dr. and Mrs. Andrew and son, Billy, returned on Monday evening from a motor trip as far south as Yellowstone National Park, Wyoming, traveling in all a distance of about 2300 miles. Taking the northern route, they travelled south through Spokane, Wash. and Wallace and Butte, Idaho, returning over what is known as the Oregon trail passing through Boise City, Ore. They report excellent roads, except in Montana and with the exception of one puncture and a little engine trouble, the entire journey was made without mishap. Dr. Andrew states that it is the best trip they have yet taken and that the visit to the famous national park, where every care is taken to preserve the wild life in its natural state, is an education in itself. The park, which is situated on an immense plateau at an altitude of from 7,000 to 8,000 feet, is never without its crowd of tourists, though very few Canadians were noticed among them.

FRUIT SALES ON PRAIRIES SLOW

Prairie Crop Prospects Improve — Some Wholesale Prices in Calgary.

Markets: Commissioner Grant in his "Markets Bulletin," reports fruit business very dull at all centres. Recent rains on the prairies have bettered the prospects for the grain harvest, and on that account it is expected fruit sales will live up within a couple of weeks. There is practically no sale for crabapples at any price; tomatoes are also very poor. Japanese tomatoes from Summerland have demoralized the market for that product in Calgary. His report reads in part: Calgary, Heavy rainfall is reported over the three prairie provinces. Grain is maturing slowly. There is a vigorous growth and crop conditions have improved greatly. Business in the fruit line is very drab, particularly in crab apples, celery and blackberries. A little well-placed advertising as to fruits in season might stimulate a demand. A carlot of tomatoes from a Japanese shipper in Summerland retailing at \$1.20 per crate has demoralized the tomato market here. F.O.B. sales are reported as low as 75 cents per crate. B. C. pears and Wealthy apples are now coming in. Italian Prunes from Oregon are being quoted at a very low price. We warn Canadian buyers that the dumping law is still in force and in our opinion the low price quoted would be subject to further adjustment on duty at a later date. Regina: Business dull and supplies plentiful. Demand from both city and country very slow, the lateness of the crops and the cool, wet weather combined with a probability of frost during the past week are no (Continued on back page)

VICE-PRESIDENT IS APPOINTED

Select Col. Scott — To Specialize on the Markets of England.

The Advisory Committee of the Associated Growers of B. C. have appointed Colonel B. Scott of Salmon Arm, Vice President of the Associated Growers and also of the B. C. Fruit Growers' Association, to represent the Associated Growers in the English market during the coming season. Colonel Scott will watch closely the sale and distribution of apples shipped to that market and make a thorough study of conditions with a view to determining the best methods of obtaining maximum distribution and prices in the British and Continental markets.

SLIDE OF MUD ON SHORE ROAD

Old Scene North of Crescent Beach Was Again in Bad Shape.

Last Thursday a quantity of mud came down on to the shore road a short distance north of Crescent Beach, the scene of former blockades. A great many people had motored over the lake that particular day, both from here and from points farther down the Valley, to attend the Kelowna regatta. On returning home they had to reckon with this slimy stretch of road, and although we know of none getting actually stuck, it took a long time to get through. This meant that traffic became congested and at times cars lined up to the number of a dozen. As the mud got churned up it became more difficult to negotiate. The following morning the regular Kelowna stage and others who were making connections with the K. V. R. westbound, were delayed. Among others were the returning members of the Vancouver Rowing Club team who had competed at the regatta. The train was a few minutes behind schedule and the stage succeeded in making the desired connections. Altogether the road has been impassable at three different times within the week, the stoppage of traffic lasting an hour or so each time. Mud is continually coming down and buries the road about as fast as it is cleared. Prospects are that more earth will come down. Foreman Arkell has had to help many motorists through the mud with his truck.

Watch the railway crossing gates, by all means. Sometimes it is not a very far cry from the crossing gates to the pearly ditto.

MEET IN VERNON ON TRAFFIC MATTERS

R. Pollock, of the Summerland Co-operative Growers Association, went up to Vernon last Friday where he met Superintendent T. C. Macnabb of the C. P. R., J. Charters of the traffic department, J. H. Jones of the transportation branch of the Dominion Department of Agriculture and L. S. Stevens, traffic manager of the Associated Growers of B.C., Ltd. Traffic matters were the subject of discussion.

TRANSFORMER TO BE REPAIRED

The municipal offer of one hundred dollars to repair the transformer for the street lighting circuit has been accepted by the Canadian General Electric and, acting under their instructions, the transformer was shipped on Saturday morning to their works in Toronto. The company has promised to make repairs as speedily as possible, but it will not last six weeks or two months before the service is resumed. In the meantime temporary lighting service will be given West Summerland similar to that given the lower town.

BRIDE-ELECT IS SHOWERED

Miss Jean Babbitt was hostess to about twenty friends last Thursday afternoon at the home of her aunt, Mrs. T. J. McAlpine, in honor of Miss Gertrude Elsey, whose marriage took place this week. The guests had all gathered before Miss Elsey arrived and gave her a genuine surprise when she entered. A number of games and contests were enjoyed after which a large kitchen wash boiler was brought in and placed in front of the guests in honor. This when opened proved to contain a number of parcels, each containing useful kitchen utensils, gifts from the guests. Dainty refreshments were then served and all united in extending their very best wishes to the bride elect. Pluck is often the other name for luck.

Weddings

MCGILL-ELSEY

Parkdale Baptist church, West Summerland, was the scene of a very pretty wedding on Thursday, August 19th, when Gertrude Elizabeth, youngest daughter of Mr. and Mrs. H. H. Elsey, became the bride of Mr. William Weir McGill, of Vancouver, the ceremony being performed by the Rev. Z. L. Fash. Promptly at ten o'clock, the appointed hour, to the strains of Lohengrin played by Miss Ruth Dale, the bride entered the church on the arm of her father, looking very charming in her wedding gown of ivory knfs pleated georgette trimmed with Limerick lace. With this she wore a long flowing veil caught with natural orange blossoms and carried a shower bouquet of Ophelia roses and lily of the valley. The bride was attended by her cousin, Miss Dorothy Avery of Winnipeg, prettily attired in a gown of orchid satin striped tulle, and Miss Jean Babbitt of Vancouver, becomingly gowned in pale pink georgette, both wearing large white hats and carrying shower bouquets of mauve and pink sweet peas. The groom was attended by Mr. H. N. McCorkindale of Vancouver. The church was artistically decorated for the occasion. A reception was afterwards held at the residence of the bride's parents, where a dainty wedding breakfast was served on the veranda. Immediately after the bride and groom left for Vancouver en route for Alaska, the bride travelling in a smart three piece suit of french suede cloth, heavily embroidered in silver, with hat in bright tones, her costume being completed by a smart squirrel throw, a gift of the groom. Among the out of town guests were Mrs. J. McGill of Toronto, mother of the groom; Mrs. W. E. Avery, of Winnipeg, aunt of the bride; Mrs. F. H. Hayward of Vancouver, the bride's sister; Mr. and Mrs. G. A. McWilliams of Vernon and Mr. and Mrs. Cowper of Pentiction.

DANIEL-DORMAN

A wedding of much interest to many Summerland friends was solemnized at the Grandview Baptist church, Vancouver, on Monday evening, when Carrie Elva, daughter of Mr. and Mrs. Charles E. Dorman, was united in marriage to Mr. Howard W. Daniel, son of Rev. and Mrs. Walter Daniel of that city. The service was read by Rev. Walter Daniel, father of the groom, assisted by Rev. David Long. The bridal party entered the church to the strains of the Wedding March played by Miss Viola Brynell, the ceremony being performed under an arch of white roses and gypsophylla. The bride who was given in marriage by her father, wore frost white crepe de chine trimmed with lace, her tulle veil being arranged in coronet effect and caught at the sides with clusters of orange blossoms. She carried a shower bouquet of Ophelia roses.

PROPOSE NEW UPPER ROAD

Among the resolutions to be discussed at the Good Roads convention which meets in Pentiction on September 2nd is one which will urge the government to connect Summerland and Peachland by a new upper road, abandoning the present lakeshore drive. In the announcement of the agenda no mention is given of the source of this resolution.

MAN'S BODY FOUND NEAR OSPREY LAKE

News reached here on Sunday to the effect that the body of a man, in a very decomposed condition, had been found near a beaver dam on Beaver creek, near Osprey lake. Later information was to the effect that the body was believed to be that of a Greek who went from Princeton early this spring to Osprey lake on a fishing trip. The case was in the hands of the provincial police constable stationed at Princeton, who, it is stated, took a party of Greeks to Beaver creek to see if any of them could identify the dead man. It was said identification would be difficult unless articles in the pockets of the clothing could be recognised.—Pentiction Herald.

KELOWNA LIQUOR STORE ROBBED

The government liquor store at Kelowna was broken into between midnight and 4 a.m. a week ago Sunday morning and the sum of approximately \$836 in cash stolen. Information

RAIN BRINGS SOME RELIEF

Adds None to Irrigation Supply — Pentiction Imposes Heavy Restrictions.

Within the last week there have been several good showers, but even with the heavier fall in the mountains the creeks did not rise and the irrigation situation remains the same: a limited supply coming from Prairie Creek and Aeneas Creek. The flow from Trout Creek is being utilized for domestic purposes and is sufficient only therefore. The precipitation greatly benefited field crops and to a lesser degree the trees. Rain fell nearly all day Monday and amounted to .3 of an inch. Following the rain the atmosphere was entirely cleared of smoke and apparently the several bad forest fires have been quenched. The following extract from the Pentiction Herald would indicate that they are less fortunate than Summerland in the matter of water supply: Following a steady decrease in the amount of water picked up by the domestic water intake on Pentiction creek and indications of a still further fall in this available supply, owing to the dryness of the Pentiction Creek watershed, the domestic water department on Monday decided to impose total restrictions on the use of water for lawn or gardening sprinkling, in fact for any other than strictly domestic purpose. The original restrictions were put in force by circularizing consumers, but the results obtained were insufficient to relieve the situation, and on Monday it was found absolutely necessary to put on total restrictions. (Continued on back page)

W.C.T.U. WILL HOLD UNION PICNIC HERE

The W.C.T.U. of Peachland, Naramata, Pentiction and Summerland plan a union picnic here next week. They are bringing their baskets and will meet in the Park. There will be but a small program, the time being more taken up by discussions of subjects of interest to the organization, and of topics brought up at their convention. Mrs. M. M. Allen, district president, Naramata, will lead the discussions.

HEALTHY TONE TO APPLE DEAL

Pears Scarce — B. C. Cots Are Superior To Any Imported Stuff. This year B. C. No. 1 pears are superior to any imported stuff that has reached this market and peach plums are also of good pack and quality. California cantaloupes in poor condition are retailing at 3 for 25 cents, good stuff commands a fair price. California Elberta peaches are retailing at \$1.25 per box. The apple deal is developing with a healthy tone. Pears are scarce for raw consumption due to the heavy demand from canners in the Northwestern States. As to how entry was effected is not available here, but it is understood the money was in a crate, which was blown open by the creek or crooks, who were experts at the job.

HEAVY TRUCK NEARLY ROLLS OVER

While returning from Pentiction on Friday with English's Republic truck, R. Smith narrowly escaped having the truck turn completely over off the road. The mishap occurred at a point about three miles south of the town, not far from the spot where J. Embree met with his accident on Saturday. Mr. Smith, who fortunately had an empty truck, had pulled to the outside of the road to let a couple of cars by, and in doing so, the earth beneath gave way, letting his truck slide over the edge. Had it not been that it struck a tree just a little below the level of the road, there would have been nothing to prevent its completely overturning. Further accident was averted however, and no appreciable damage was done.

Everybody has to work. It is easier to get the job done and done right if one whistles instead of whines.

AGRICULTURISTS WILL VISIT HERE

Dominion Superintendent of Experimental Farms Among Noted Men Coming.

The seventh annual meeting of the Western Association of horticulturists, entomologists and plant pathologists, will be in session in Pentiction next week commencing on Tuesday morning, the 26th inst. The Pacific division of the American Phytopathological Society will this year meet with the Western organization. These meetings will bring to the Okanagan Valley the leading scientists, field men and research workers in horticulture and agriculture of the Western States. A full program is arranged to cover the entire four days, during which the convention will be in session. The meetings are being held in the Senator Shattford school and the Incola Hotel will be the general registration headquarters. The meetings will not be open to the public except by invitation. The officers of the Western Association are, president, Dr. C. W. Hungerford, Division of Pathology, University of Idaho, Moscow, Idaho; vice-president, E. J. Newcomer, officer in charge U. S. Entomological Field Station, Yakima, Wash.; Secretary-treasurer, W. T. Hunter, Supt. Summerland Experimental Station, Summerland, B. C. Dr. T. M. Zeller, Division of Pathology, Oregon Agricultural College, Corvallis, Ore. and Dr. C. W. Hungerford, Idaho, are the president and secretary respectively of the Pacific Division of the American Phytopathological Association. The meetings will be attended by all the Dominion and provincial officials in the province including E. S. Archibald, Director of Dominion Experimental Station here when Mr. Archibald will give an outline of the Dominion Experimental Farm System. Also a trip over the Okanagan Valley as far north as Vernon is on schedule for Friday the 20th.

SEASON THIS YEAR IS TWO WEEKS AHEAD

Weekly News Letter Issued by The District Horticulturist.

The weekly news letter covering crop conditions has been issued by the district horticulturist, Vernon. Kelowna, August 15th: The weather during the past week has been hot and dry. Apples generally are in good condition, but on places short of water and poor soils are showing the effects of dry weather. All fruit is maturing early for the season. Wealthy apples and Bartlett pears are being picked. McIntosh are expected to start in about a week's time. Cannery tomatoes are being picked in large quantities. Summerland, August 13th: Temperature registered high and sultry for the past week, with some threatening clouds which failed to deliver the much desired rain. Considering the lessening of the supply of irrigation water, the orchards are still looking in fair condition. The fruit is showing good growth. Peaches are moving out very slowly, there will not be any big rush of this fruit this season. Clapps Favorite pears are over, and Bartletts are being picked. It is expected that the picking of Flemish Beauty will be on next week. Duchess apples are over. Wealthy and Gravenstein and some other odd varieties are being packed out. Kings and Cox's Orange will be ready next week. Tomatoes are now moving in volume. Express shipments are light for this time of year. Two mixed cars are moving out from Summerland daily. A car of pears went out on the 12th. Pentiction, August 15th: Bartlett pears are practically cleaned up. This week should see Cox's Orange moving through the houses. Kings are going through crated. McIntosh will commence to roll in about a week or ten days time. Yellow St. John peaches are about cleaned up as well as Early Crawford. Peaches this year are running smaller than last year. Prunes are commencing to show considerable color and will be picked much earlier than usual. (Continued on back page)

ADVISE EARLIER APPLE PICKING

Season Early And Picking Should Be Advanced To Prevent Breakdown

The following news letter has been received from the Okanagan Horticultural Club: At a general meeting of the Okanagan Horticultural Club comprising officials of the Dominion and Provincial Departments of Agriculture held at Vernon on August 14th, the question of premature ripening of fruits was discussed. Reports brought in by representatives from various points in the Valley were to the effect that most varieties of fruit show signs of maturing from ten days to two weeks earlier than normal. This condition will probably necessitate picking considerably earlier than usual. This is especially true of the Jonathan apple which is very likely to break down when picked overmature. For this reason it was resolved as advisable that this club convey this information to the growers and shippers of fruit in order that they may make provision for harvesting their crop accordingly. In the last issue of the Review the price for the conveyance of school children on the Prairie Valley route was given as \$5 per day as against \$5.50 the previous year. The price for Prairie Valley should read \$2.50 per day, as it is the shortest route. The \$5 per day is for the Town trip.

Thursday, August 21, 1924.

ALL THE SAME TO HIM.

There is one thing of which we may be sure. Our local member will entertain no spirit of envy for his successful rival in the recent selection of a party leader.

Mr. Jones is one of those fortunate men who can wage a most spirited battle and yet entertain no feeling of ill-will against his opponent. Those who have opposed him in political contests have been heard to express no little annoyance because of the happy faculty Mr. Jones has of entertaining a friendly spirit toward all.

The selection of Mr. Pooley rather than of Mr. Jones, probably due largely to the Coast outnumbering our part of the province, has occasioned considerable regret in the upper country.

UNMUFFLED MOTORS.

Practically everywhere properly muffled exhausts are insisted upon on motor vehicles, the motorcycle being the only exception. Recently the chief of police of Vancouver has proclaimed war on the motor cycle pest, in ordering a cessation of the cyclists' cutout racket. The Vancouver exchange says this seems too good to be true.

Frequently The Review is asked if there is no measure of relief from the annoyance of the unmuffled motor. It would seem to be about time to take action against this nuisance.

PEACHLAND DOINGS

A Weekly Chronicle Furnished By Our Local Representative.

The fires in the vicinity of Peachland are well under control. The various patrols and parties had it pretty well checked and surrounded before the rain came on Monday, and that has lent a helping hand toward completion of the task. The big fire up between Millers Lake and the mill site was in country and timber in which it was extremely difficult to fight fire, there being a bad tangle of dead-fall and other dry material and the fire spread over quite an area before it could be headed off. Besides many men picked up through the community a gang of some twenty men came up from Penticton by truck on Wednesday to assist on the fire fighting squad and quite a number were brought in from Kelowna and other points.

The Misses Alice and Helen Wright left last week for Kelowna where they have taken employment for a few weeks.

Mr. H. E. McCall and family motored to Summerland on Tuesday evening where Mrs. McCall and son Willie stayed over to visit friends during the week. They returned home early this week.

Miss Jean Babbit left early last week, to return to Summerland after having spent a few days in Peachland visiting her aunt, Mrs. Bulyea.

Miss Middlemiss, of the teaching staff of the Moose Jaw schools, arrived last week to spend a portion of her vacation here with an old friend, Mrs. Bulyea. Miss Middlemiss is known to some of the former Peachlanders, she having visited here some seventeen years previous.

Mr. Frank Wrightson is enjoying a visit from his niece, Miss Kinchen, a school teacher from the prairie provinces, who came in last week.

A number of Peachland citizens went across to Kelowna on Wednesday and Thursday, some by auto and some by boat, to attend the

annual Kelowna regatta being held there on these two days.

Members of the Scarlet Chapter of the Orange Association in Peachland held an exaltation meeting on Thursday evening of last week, but owing to some of the candidates being engaged in fighting fire only one candidate was exalted, and the meeting was adjourned till the others were free.

Mr. R. Howson of Penticton paid a short business call on Mr. H. E. McCall on Friday evening in passing through on a return motor trip from Revelstoke.

Mrs. Eadie and two children left on Saturday morning to return to their home in Enderby after having enjoyed a few days visit in Peachland, guests at the Winger home.

Mr. and Mrs. Wm. White returned home on Friday, via K. V. R. and stage from Summerland after having enjoyed a pleasant two week's visit in Vancouver. Mrs. White stated that although she enjoyed her visit to the city, Peachland looked good to her, and Mr. White says that business in the city did not appear to him very brisk.

Miss Doris Crooks spent the week end in town with her folks, returning again to Kelowna on Monday morning where she has been employed for a few months now.

Mrs. Folett was engaged in the General store last week during the absence of the owner, Mr. E. Cudmore, who was away taking in the business men's week in Vancouver. He returned home on Monday morning and reports that he had a splendid time. He says the wholesalers and Board of Trade of the city left no stone unturned to give the visitors the best time possible from the moment they registered till the time of their departure.

The case The Associated Growers vs Mr. John McKinnon of Peachland, came up for hearing at the Court on Tuesday of this week, but the judge ruled the case out on the ground that Mr. McKinnon was under prior contract with Geo. Rowell & Co. Ltd.

Mrs. McIntyre with her little daughter, from Moose Jaw, came in on Monday evening to visit with Mrs. P. N. Dorland. This is not the occasion of Mrs. McIntyre's first visit to the valley, she having visited her friend Mrs. Dorland on a former occasion.

The Rev. T. A. Sadler, daughter Mary and son James, left by motor on Tuesday morning last to pay a visit to Penticton.

The Rev. H. A. Solly motored up from Summerland on Sunday afternoon last to conduct the regular service in St. Margarets Church and also to conduct the regular service at Westbank in the evening.

Mr. Gilbert Thornber of Summerland motored up to conduct the regular service in the Baptist church on Sunday afternoon. He was accompanied by his wife and a visitor in the person of Mr. F. H. Terry. He was accompanied on the return trip by Miss Margaret Harrington who is spending a week visiting Mrs. Estabrook.

Mrs. Sanasac and daughter, Ellen, took the Friday evening boat and spent the weekend visiting Mrs. Sanasac's brother and sister-in-law, Mr. and Mrs. E. Law in Penticton.

The members of the local branch of the Women's Institute have about completed their arrangements for their annual Flower Show which they are preparing to hold on Thursday of next week.

A good delegation of members of the Peachland W. C. T. U. expect to attend the Union W. C. T. U. picnic to be held in Summerland next week.

SHOWER GIVEN FOR BRIDE-ELECT

On Saturday Mrs. Ernest Mountford of Paradise, West Summerland, held a bridal shower in honor of Miss Helen Duff of Grand Forks who was visiting Mrs. A. Fenwick (her sister) at West Summerland last year.

After a dainty supper the gifts were presented.

The guests were the Misses F. Bletham and Brice and Mesdames Cope, Davis, Fenwick, Greyham, Grey, May, Mountford, Turner and Thompson.

The presents in addition to those given by above from her numerous friends in this and the old country were numerous and valuable. The wedding announcement appeared in our last week's issue.

After a short honeymoon trip to Vancouver they will make their home in Grand Forks where Mr. Paul Black holds the position of District Agricultural Inspector.—Cont.

The above represent the marks on the departmental examinations in all the subjects of examination except French. It is regretted that so much delay was necessary in publishing these. The delay was the result of a desire to publish the French marks with the others, but those were not available for the following reasons: The list of marks—including the French—was mislaid by Miss Jones who could not locate them. The French teacher refused to deliver the French answer papers to any but the school Board. When appealed to, the secretary said that these papers had not been left with the Board, but that he would write about them. The reply stated that I had been given the marks, and nothing was said about the answer-papers or their whereabouts. Consequently, we cannot classify the students of the second year class until we can secure those papers, or the marks on them, or until they can be given a new examination.

Those who made an average of 50% per cent on the whole examination, and above 40% on each and every subject written on, passed unconditionally. Those who made the 50% average standing but who failed to make 40% on one or two subjects are promoted by writing successfully supplementary examinations on those subjects. All others may be advanced on probation by writing successfully examinations on the subjects in which failure was made.

As soon as the French results are at hand they will be published. We are pleased to report no failures in first-year class, and four only in second-year class. The results on the matriculation examinations have already appeared.

With the present improved classification of the High School, there are, we believe, very bright prospects that the coming year's work will establish a record for success.

To this end we would urge the hearty co-operation of all parents and friends.

J. O. Steeves,
Principal.

CORRESPONDENCE

Letters to the Editor.

Naramata, B. C.

Editor, Review,

Dear Sir, I wish to take this opportunity to correct a statement which appeared in "The Review" of Aug. 14th in regard to the Gilwell Training Course. This course is being given at the present time from Aug. 9th to Aug. 20th.

This is the third time such a course has been given in British Columbia, as well as in the other provinces of the Dominion, the first being held

at Camp Byng, Roberts Creek in Sept. 1922. This is the first time that any number of men have attended from the interior. Each of the two previous camps had only two men in attendance from this part of the province.

Thanking you for this space, I am,
Yours truly,
A. STEWART ALLEN.

WARNING

I would request all parties in the habit of raiding my cantaloupe field to discontinue this practice or I will resort to the court for redress.

Sidelights on a Great Industry

HUGE REVENUE FROM TIMBER

RAW MATERIAL OF FOREST INDUSTRIES HEAVILY BURDENED WITH TAXATION

Comparison With Other Groups Shows Disproportionate Nature of Levies

Revenue received directly from timber during the financial year ending March 31st, 1923, benefited the British Columbia treasury to the extent of \$3,247,000. That is to say, in one year the raw material of the forest industries alone contributed this enormous sum to the running expenses of the Province.

During the same period \$2,526,000 income tax was paid by the citizens of British Columbia, of whom a considerable number are timberholders. It will be noticed that the income tax is only 77 per cent. of the timber levy.

The question arises, what did the timberholder get for the three and a quarter million he paid to the treasury?

The Department of Mines, according to the Government financial report for 1923, received \$150,000 and paid out \$235,000. The Department of Public Works received \$111,000 and paid out \$2,744,000; the Department of Railways received \$52,000 and paid out \$129,000; the Department of Agriculture received \$31,000 and paid out \$437,000. The Department of Lands received \$4,009,000, of which \$3,247,000 was revenue from timber. Of this great sum less than \$700,000 was paid back in forest protection and maintenance of the forestry office.

The case of the British Columbia timberholders constitutes a unique example of over-taxation.

Two facts must be borne in mind. Timber is only harvested once in a lifetime and that there is no surer way to kill a big competitive industry than to overburden its raw material with taxation.

The Pedlar's Pack

By AUTOLYCUS

"A Snapper Up of Unconsidered Trifles."

The Winter's Tale, Scene II, Act IV

There is a new method of finding out a man's character now. Instead of measuring his head, or the length of his nose, we have only ANOTHER to get him to put out SCIENCE! his tongue; and the trick is done! If it is short and broad, he is given to speaking the thing that is not so, and his word must be accepted with caution. On the other hand if it is short and narrow, you will still do well to be on your guard, since he is probably sly and bad tempered. But if he can show you a tongue which is long and narrow, then you have discovered the possessor of a frank and open disposition and you may cherish him in your heart of hearts. The simplicity of this test will be a great relief to those persons who like to have their friends and acquaintances accurately labelled, but there are two difficulties to be overcome in the initial stages of enquiry. The first is the task of persuading the individual on trial to show you the evidence. If you happen to belong to the medical profession your course is easy—you merely say, "Show me your tongue," and you are obeyed. But the mere layman may find it as difficult to gain the desired end as did the mice who wished to hang a bell round the cat's neck to serve as a warning to them. Your friend may be there for the taking, but if he won't display the proof, how are you to know that he is "it"? The preachers of the new science will have to issue some instructions on this point.

The second difficulty is of a more abstract nature, and lies in the apparent contradiction of our preconceived notions. The ideal tongue, according to the new dogma, is that of the serpent, but we find a certain objection to any such proposition as a close friendship in that quarter. We will admit that the rattlesnake is "frank and open" in the matter of springing his rattle, but that virtue does not go far enough. Mr. William Watson had no illusions when he wrote of "the woman with a serpent's tongue," and it seems somewhat disturbing to have to accept the long and narrow tongue as the trade mark of truth and candor. However, when this new science of glossomancy has taken its place among other professions of its kind, we shall no doubt have the difficulty smoothed out.

There is an element of doubt as to the truth of the story that a church announcement of a sermon on "Hell" was followed by THOSE CAPTIONS the notice of a tenor solo, "Tell Mother I'll Be There," but I believe it is true that the notice of a discourse on "Beer" in one of the Vancouver churches lately gave the title of the succeeding solo as "O, Taste and See!" which might be considered an unlucky juxtaposition of words. I noticed something of the same sort in the "Sun" of Vancouver a few weeks ago, the caption being "One dead in Winnipeg from prostration—farmers satisfied." We need not suppose that Manitoba farmers find satisfaction in the premature death of a city dweller, but the inference is there. One is almost reminded of the deliberate play on words in the telegram sent by the victim of a too meddling mother-in-law. The message, "Your wife's mother at death's door — wire instructions" brought the prompt and subtle reply, "For Heaven's sake pull her through!"

The city of Vancouver seems to seek salvation by means of special weeks, in much the same way as some religious organizations look to "revivale" as channels of grace. The idea appears to be that various duties which are incumbent on all decent people as a matter of course are liable to be neglected unless galvanized into action by the proclaiming of special periods each being devoted to its own particular lesson. If there is no very obvious matter in view at the moment, some abstract quality is brought into the limelight, and a suffering public put through a six or seven day drill. Thus, not very long ago, the city actually staged what was called "courtesy week" which implied, if it meant anything at all, that there had been a regrettable falling off in that desirable attribute amongst the citizens of Vancouver. It also suggested that the smile which won't come off is a satisfactory substitute for the real courtesy which comes from the heart, and in that particular, it was woefully mistaken. Then came clean-up weeks, physical and moral, which carried in themselves their own con-

demnation, and lately we have seen the face of a safety-first week, solemnly proclaimed in the city press by his worship the mayor, and emphasized by such exhibits as processions of automobiles in various conditions of disintegration from accidents. These awful examples, accompanied by a car carrying a figure of "death" were apparently expected to act as educational warnings, and it was unfortunate that on the day of this "completely successful" parade, an actual increase in the number of accidents had to be reported.

The mayor, in his official proclamation, very ingeniously states that "there are varied improvements required to be effected before our status can be considered perfect." This is so indisputably correct, and his worship seems so anxious to "add to Vancouver's fame" that friendly suggestions from outside may not be out of order. One which occurs to me is that matters might be considerably improved if the rulers of the city moved up out of the kindergarten class in civic affairs, and in place of sponsoring special weeks for reform of various failings see to it that the laws which are permanently on the statutes shall be properly enforced. When the average reader of the daily papers notes the evident past neglect of this essential condi-

tion he is entitled to wonder how near the mark was the recent remark of a Vancouver alderman that some people seemed to think that members of the council were a "bunch of mutts"—which is the worthy alderman's expression, and not mine.

The "Daily Province" recently drew attention to the criticisms of two American essayists concerning their countrymen's neglect and ENGLISH misuse of the English language. One of these writers is Miss Agnes Repplier, who lays the blame on a certain "moral limppiness and slackness" which nullifies the effect of education—the other is Mr. Edward W. Bok, who goes further back and charges that the teachers are themselves untrained and consequently deficient. Mr. Bok claims that "the American is the lip-laziest person in the world" a claim which goes very well with Miss Repplier's charge of limppiness and slackness. This same lip-lazy slackness is doubtless responsible for the common use of "Yeah" for "Yes" and other kindred linguistic crimes. It is only necessary to carry this slackness back to the school teacher to see that Miss Repplier and Mr. Bok are practically in agreement.

There is, however, another factor which is worth noting. Readers of American magazines may notice a growing tendency to refer to the "American" language, the reason being apparently a sentiment which might possibly be described as anti-English. Even Mr. Geo. Lorimer was recently guilty of this absurdity in one of his editorials. Miss Repplier gives full tribute to the English language as such, but there are many

Talks on Honey

From the Naramata Apiaries.

Honey is relished by others than human beings, and to an extent that often works considerable havoc in the apiary.

Skunks have sometimes become such a pest in beeyards as almost to depopulate the working force and, of course, reduce the amount of honey that would be stored the balance of the season. Mr. Skunk dearly loves honey and at night time visits hive after hive, taps on the front of each, and as the bees creep out to discover the nature of the intrusion, he swipes them off with his paws and into his mouth bees, honey, stings and all.

The partiality of bears for honey is well known. Apiaries in mountain valleys are sometimes subject to bear raids, upsetting the hives and doing much damage.

Horses, too, occasionally develop a honey appetite and upset the hives in pasture apiaries, in their efforts to obtain the coveted sweet. Occasionally a colt will be found with his nose swelled up and full of stings, the result of meddling with a beehive.

Toads are fond of bees and honey, and in low-lying apiaries do much damage. They visit the hives at dusk and snap up the unfortunate honey-maker who is late in getting home. If the supply of belated workers is not sufficiently plentiful, their toadship of her countrymen who certainly do not, preferring to call it "Good American."

AUTOLYCUS.

reaches one long, clammy foreleg into the entrance and coaxes them out. The stings do not seem to bother him. Bee-martins, the well-known King-bird, also hang around the apiaries, and snatch the bees in their flight. Ants and wasps sometimes invade the hive in quantity and pester the inmates in their search for sweets.

In South Africa the natives esteem the larvae of the honeybees rather than the honey, and the white beekeepers sometimes find their hives overturned and their apiaries almost ruined by savages in their quest for bee brood.

SUMMER SCHOOL OPENS NEXT WEEK

The summer school of social science, under the direction of Mrs. Rose Henderson, Canadian delegate to the women's international peace conference at the Hague, will open Sunday at the Log Cabin, and will terminate the following Sunday. Other speakers will be C. B. Boardman, George F. Stirling, Katherine Alkins and George W. Weaver.

The hits made yesterday don't win today's game.

The ladder of life is full of splinters, all pointing upwards.

He doesn't care what he says—nobody does anybody else.

There should be a closed season for the killing of time.

There is no room for cranks in 1924. All we want is a few more self-starters.

Poultry Mites and Lice

One of the greatest hot-weather problems of the poultry farm is the control of external parasites. Of all such pests that trouble poultry in Canada the Red Mite is by far the most troublesome. These are not red in colour as the name would lead one to suppose, but grey, and it is only when they become gorged with blood that they appear red. They are not usually found on the fowl during the day but in the cracks and crevices of the poultry house, where they breed rapidly. The young repeatedly cast their skins during development, and these casts appear on the roosts and at the side of the cracks as a white powder. This is often the first indication of the presence of the mites. At night when the birds are roosting, the pests will swarm over them piercing their skins with needle like jaws and sucking the blood. This results in a stoppage of egg-laying or in greatly reduced production.

Do not wait until you know mites are present. At the Dominion Experimental Farms the roosts and adjacent parts are painted or soaked every week or so throughout the warm weather with a solution of one of the coal tar disinfectants or a special paint made by diluting, either one of the coal tar disinfectants or crude carbolic, one part to four or five parts of coal oil or fuel oil.

When the mites are known to be present a thorough house cleaning is in order. Remove all droppings and old nesting material, scrape and sweep out every particle of dirt and burn it. Sweep down the walls and with the aid of a spray pump saturate every crack in the house and the fixtures with a good strong disinfectant solution.

The control of lice is much easier, for while there are a number of different species, the same methods of control are satisfactory for all. The natural method of control is the dust bath; more effective if a little flowers of sulphur be added. However, there are always some birds in the flock that will not use the bath, so it is safest if lice are noticed, to treat each bird individually. At the Central Experimental Farm blue ointment is used, a little being rubbed beneath the wings and below the vent, to kill the lice and any that may hatch.

For setting hens, depend on the dust and sulphur rubbed into the plumage, as the ointment will not only kill the lice but the germs in the eggs as well.

George Robertson, Assistant Dominion Poultry Husbandman.

SPECIALIZE ON WINTER APPLES

"A visit to the Hood River and other apple growing districts of the northwest convinces me that the territory from Wenatchee north to the British Columbia line and the Okanagan valley of British Columbia, constitutes the premier apple area of the world," said T. H. Atkinson to the Daily World.

"As is well known, the Hood River valley was the first section in the Pacific northwest where apples were grown successfully in commercial quantities. A portion of the district is still growing apples and there they have a good crop this year, but generally speaking, the apple orchard area is decreasing annually. Ranchers who formerly had sixty to eighty acres in apples now have five to ten, the rest of their places being devoted to pears, berries, cherries, vegetables or other crops. Many trees are dying out and the others are being taken out.

"Apple growing is no longer the principal industry of the valley, which is an excellent thing for the community, as better results are being obtained, especially with pears and cherries. The same thing is taking place in many other districts where apples are being supplanted by other crops. This year will tend to hasten this change in areas where the frost almost totally destroyed the apple crop.

"Since it has been definitely demonstrated that we have here the dominant apple producing section, we should specialize on the growing of the varieties best adapted to our conditions, and to bringing them up to the highest standard of both quality and quantity. We have made

B.C. FRUIT IS ADMIRER

London, Eng.—So high is the opinion held of B. C. apples by Gerald Da Costa, one of the biggest firms in famous Covent Garden market, that it is willing to pay freight on a sample box of apples in order to get them displayed at the firm's branches in Hull and in Liverpool.

The following letters received by F. R. E. DeHart testify very definitely to the opinion held by the trade in London of B. C. fruit.

"In my opinion the Newtons, Wine-saps, Spitzenbergs and some of the cases of Delicious are undoubtedly the finest fruit I have ever yet seen from your country."

"I feel sure that if British Columbia apples could be delivered in England regularly in a like condition, your growers would have no cause to complain of the prices realized."

The whole purpose of advertising is to show you ways in which you can live better, more comfortably and more happily. Read the advertisements to find out how you may own many things you have always felt were beyond your means.

Tomorrow: The day when idle men work and fools reform.

The quack is content if he gets a person's money. The salesman wants to get the customer's money but he wants to give that customer satisfaction and service for it.

great progress in this work, but we should not be satisfied until every ten acre orchard can show a profit every year. This can be done and we will never realize our fullest possibilities until we have a 100 per cent record in this respect."—Wenatchee Daily World.

WESTERN CANADA'S RIVER OF WHEAT

A NEVER-ENDING stream of gold, flowing from the farms of the Prairie Provinces to the consumers of bread stuffs in all parts of the civilized world, is represented by the movement of the farmers' grain to the world markets. Beginning in August each year and in some years flowing constantly forward until August of the following year, this everlasting river of wheat is Western Canada's contribution to the feeding of the civilized world. In the movement of this crop from the country elevators and loading platforms of the Prairie Provinces, the Canadian National Railways year by year are playing a more important part.

Long before the western farmer has finished his seeding in the spring, preparations have been begun by the railways to move his crop. Cars must be ordered, for each year more equipment is needed for the movement of the grain; other cars, which have been in service, must be brought into the repair yards and overhauled or rebuilt according to their needs. For the movement of grain is a strenuous work and grain cars show the effects of a season's haulage. And, since cars could not move forward without motive power, new locomotives of immense hauling power are necessary and must be ordered, while those which have already seen service in this strenuous work must also be

being prepared for the rush of the harvest work. Constant vigilance in this, as in every other great movement, is the price of safety and nothing is left undone to ensure that the movement forward shall be rapid, even, and unhampered. An important department, whose work is little seen outside of railway circles, is the Car Service Department, whose eye is watching night and day to see that grain cars are properly distributed and that once loaded, they move forward rapidly to the lake or ocean port from which further shipment is to take place.

During the grain rush each fall the Car Service officials meet a difficult situation, for instead of an even balance of haul back and forth through the west, there is an over-

of the company through the western region, compile a report on the loadings and movements of grain cars at the close of each day. These reports are telegraphed to Winnipeg where, with advices from the lake, head and Vancouver, they are assimilated. Hence, with one single report simply compiled, the entire Canadian National lines in the Western region almost continually, and that every movement of these cars must be checked in order that there shall be no confusion or delay in their handling, the enormity of the work of handling the grain movement may easily be realized. And to handle over 175,000 cars of grain

brought in to the huge repair shops and overhauled and made ready.

Nor is this all. In preparation for the movement of heavy trains loaded with wheat and in order that there shall be no delay en route from the farmer's hands to the lake-head or to Vancouver, roadbed and other facilities must be in the best possible condition. Therefore during the summer months every foot of the track over which the grain must move is subject to careful inspection and improvement; ballasting is done wherever it may be required and all parts of the system are keyed up to the highest pitch in order that no hitch may occur in the movement of the crop.

Weeks before the crop itself begins to move, there is another movement under way which has an important bearing on the steady flow of grain to the markets of the world, and this is the gradual concentration of locomotives and grain cars at strategic points on the western lines, so that they will be available for rapid distribution wherever they are needed.

whelmingly large exodus from the grain fields with a proportionately small freight movement back toward the prairies. Here the Car Service Department faces the task of moving these empties back from the lake or ocean ports, to line elevators at the lowest possible cost and it is only by wise and careful scrutiny of the situation that it is possible for this work to be successfully carried out.

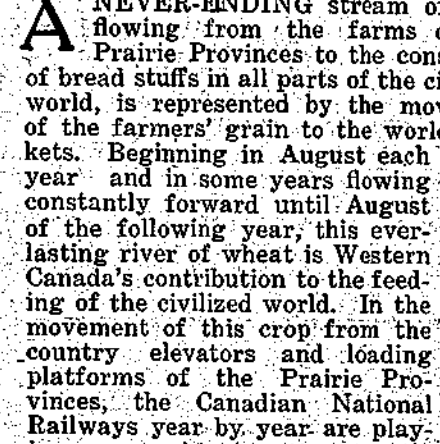

An elaborate system of tabulating the grain situation daily is operated by officials of this department. Each day through the press there appear reports on the grain movement, both on lines through the west and at the head of the lakes where ships are fast loading from terminal elevators as cars discharge their cargoes.

To make this possible agents

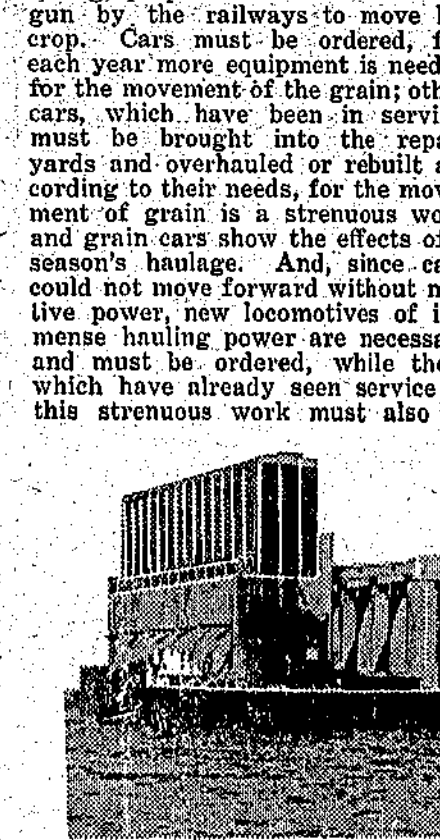

the same period each successive season for five years.

When it is realized that upwards of 50,000 grain cars are on the

to the two outlets, the Great Lakes and the Pacific ports, means that train loads of grain must be kept constantly on the move, both eastbound and westbound. The growing importance of the Pacific outlet is shown by the fact that Canadian National car deliveries to Vancouver during the grain year just closed, have been almost five times as great as during the season of 1923-24, and as more facilities are provided for the handling of the westbound shipments, it is expected that the next few years will see enormous gains still being made year by year in this movement.

Why Advertise?

Bruce Barton relates a story about a friend who approached the proprietor of a retail store to sell him an advertising contract. "Why should I advertise?" asked the dealer. "I've been here for twenty years. There isn't a man, woman or child here who doesn't know who I am and what I sell."

The advertising man promptly asked, "What is that building over there?"

The proprietor answered, "That's the oldest church in this town."

"How long has it been there?" the advertising man asked.

"Oh, I don't know, seventy-five years probably."

"And yet," explained the advertising man, "they ring the church bell every Sunday morning."

Diary of the Girl Guides' Annual Camp

Brent's Lake, August 1-7

Friday:
At about eleven-thirty we arrived at our camping ground after a strenuous ride on Bernard Taylor's truck, to whom we owe a debt of gratitude for his splendid example of the "Scouting Spirit" by smiling under all the difficulties we encountered on our seventeen mile ride.

Mrs. Wright followed, and brought the "over-weights" who would have made it too heavy with all the luggage and food.

After a hasty lunch we started to put up our tents, ably assisted by the pouring rain which continued all night and most of the next day. In front of each tent we built cheery camp fires, besides which we endeavored to dry our bedding, but I am afraid didn't succeed.

At five-thirty the sun favored us by coming out for just the time needed for us to get tea which consisted of ham, bread and butter and pie. As we were all very tired after our many labours we turned in about eight, and were soon fast asleep in spite of the multitudes of mice which ran all over us during the night.

Saturday:
First whistle at seven A.M. which awakened the Bluebird Patrol which had been duly informed the night before that it would be their day for cooking so up they got, taking pains I assure you, not to waken the rest! However mysteriously enough the rest did waken; and by the time the second whistle blew everybody was up and bathing parade formed. Breakfast at eight and tent inspection at nine-thirty, after which we hoisted our flag pole, and put up the flag with the usual ceremony.

Most of the morning was spent in fixing the grounds and after lunch at twelve-thirty we rested for an hour and then went exploring and bathing. We had only one really thrilling incident in the afternoon when on the way to our bathing place one of our most respected patrol leaders came, quite accidentally, on a

nest of young garter snakes! We very nearly had to render first aid, but not quite.

Flag-lowering at five-thirty, tea at six, then games and stories until about eight when we all decided that we had come very successfully to the end of our first day.

Sunday:
As we felt this was going to be a specially strenuous day, we were allowed to sleep until eight and breakfast at nine, Bantam Patrol on cook duty.

After the usual morning round of tent inspection and flag raising we spent all our spare time in putting everything in proper order as we expected quite a few visitors in the afternoon.

As one of the Bantams was indulging in a birthday, we decided to get a birthday tree (you know, like a Christmas tree) but when we had the tree planted we discovered with dismay that there was nothing to put on it! Never mind, she agreed to wait until the visitors came, and when they did come, well you can guess the rest: Funnily enough the visitors seemed to expect such a happening and to make the matter short, the Guides profited by a delightful birthday party.

There is nothing like making visitors work and after hard persuasion two very good-natured ones agreed to raise one of the tents which would not go up properly. I guess that tent thought itself pretty smart. We didn't.

Most of our guests departed early, I suppose to teach the guides good manners. But some actually stayed until eight-thirty.

Monday:
Blue Monday! But not so with us, although I must say we all felt pretty peeved as we had a visit from the Brent's six horses at about four o'clock this morning, needless to say they were very quiet and tried not to disturb us.

Breakfast at eight. Camp Commandant informed us that she would

put the honor of raising the flag to the neatest patrol and the duty of cooks to that patrol which behaved worst. I might add that we liked the Bluebird's cooking very much, as we had more of that than any other!

After lunch Mrs. O'Mahoney said she would take us for a hike, so about seven decided to go, the others being tired after cooking. We struck south until we came to another lake, and discovered a spring of lovely water. Then we went straight up the mountain side, climbing for about forty-five minutes. We got a lovely view from the top, well worth the climb. Coming down we followed the road, and were back at camp just in time for tea.

We were all pretty tired so went to bed early, but that does not say to sleep early.

Tuesday:
By this time we are all into our camp routine, although the mice will persist in interfering. We found to our disgust that the oatmeal had arrived with the other stores, brought up by Captain Creese and learnt that we were to have porridge for breakfast, but when we found we could have fruit with it, and if you took lots of juice it took the taste away, it was not half bad. There were a few weaklings who said porridge made them "absolutely sick" so we thought of ourselves and said they need not eat it.

Captain Creese came and presented us with three lovely fish, and promised to take us for a hike in the afternoon. So promptly after lunch we started, first going to the summit of the hill then skirting south until we came to a lake. We stopped and examined all the signs around it. Then started for home as we wanted to bathe. One of our Bahtams distinguished herself by getting a leech stuck on her while swimming. After a severe medical operation our noble Captain Pares got it off and I think she will recover.

We spent the evening by making

a huge fire, and Mrs. O'Mahoney read to us about how to obtain the many different badges.

Wednesday:
As this was the day Captain Creese offered to take us for an all day hike we were up early, there was no tent inspection or special cooks.

Leaving camp at nine-thirty we followed the creek for about a mile uphill and then left it and started to climb steadily. It was a lovely day and not too hot. We all had armed ourselves with tomatoes as we left water about eleven. At twelve we called a halt for lunch, bread, butter and cheese, being the easiest things to carry. After a good rest we started on, reaching the summit of Table Mountain at about three. Here all those who were tired stayed, while the rest (nine of us) went on to the next one, a frightful climb but the most wonderful view from the top.

We could see the mountains in U. S. A. and Snow mountain seemed very close.

We certainly made good time going down, and joining the others started for home, getting there about five-thirty, very tired and hungry but otherwise very happy.

We spent the evening singing and acting charades, then tumbled into bed early.

Thursday:
As we were all very tired after yesterday we were allowed to sleep until eight and had breakfast at nine. There was an unusually large number this morning that reported at the sick tent, although the Commandant said she needed a magnifying glass to see most of the wounds, but relieved their feelings with iodine which made them feel very important. After that we had quite a lengthy flag drill as some want to pass their Morse this afternoon. There was nothing very strenuous to do in the morning and after a vegetarian lunch consisting of potatoes, carrots, cabbage and beans, we retired to our tents to rest.

Most of the afternoon was spent in bathing as it was very hot. Two of our troop are experienced executors, as far as leeches are concerned. I think they ought to get Executioner's Badges, if there is such a thing.

The evening was spent by enter-

taining visitors with charades, one of the Bluebirds giving a stirring talk on "The Brotherhood of Girl Guides and the Sisterhood of Boy Scouts" which won her everlasting fame. After singing Auld Lang Syne we departed for bed, as our last night in camp.

Friday:
First whistle early as we have tons to do. A hasty breakfast and then we started to break camp by taking down our tents and burning rubbish and making up our bed rolls. As it was a lovely morning we wanted to get last "snaps" which caused quite a bit of comment. One bright angel lost one of her stockings, and of course everything had to be turned upside down in every tent. At last it was found and the camp breathed more freely.

At eleven Bernard Taylor came and helped us to carry the heavier things and load them on the truck. One poor child couldn't get all her dishes into her suitcase so made it correct by tying knife, fork, spoon and cup by yards of rope to her belt and putting her dish towel, bandanna fashion, around her neck! Thus she went home.

We started about twelve-thirty and got home at two, or at least to the Parish Hall. We gave everybody fair warning that we were coming, aided by one horn, four whistles, two enamel pots and a pail.

Everything was put off at the Parish Hall, and after all declaring we had had a wonderful time everybody left for respective homes.

A BUSINESS-WINNING SECRET

A great writer has said that the physical closely parallels the psychological. The six-year-old child learning by rote to recite the alphabet says the same elemental words over and over again, until finally one bright day she proudly recites the entire lesson perfectly.

Note that nature follows the same process when the constant drip, drip of water upon stone will eventually wear away the surface.

In both instances there is a scientific and business-winning principle of tremendous value.

INNOVATION AT IMPERIAL FRUIT SHOW

Prizes To Be Offered In Three Canadian Provincial Sections

The Imperial Fruit Show is to be held this year at Bingley Hall, Birmingham, England, from October 24th to November 1st. As in the past, there will be a British Empire Section, with two classes, Dessert and Cooking, open for competition between Great Britain and Canada, for which five prizes are offered in each class, viz.: First, gold medal and £20 cash; second, silver medal and £10 cash; third, bronze medal and £5 cash; fourth, £3 cash; fifth, £2 cash. There will also be, as before, an Overseas Section of sixteen named variety classes open to the whole of Canada, with gold, silver and bronze medals as first, second and third prizes in each class.

An innovation consists of the formation of three Provincial Sections, No. 1 for British Columbia, No. 2 for Ontario, Quebec and New Brunswick, and No. 3 for Nova Scotia, each comprising seven classes for varieties especially typical of their respective localities, in each of which first, second and third prizes of £5, £3 and £2 will be offered. The British Columbia Section will be open to British Columbia competitors alone and the seven classes are the following varieties: Wealthy, McIntosh, Jonathan, Cox Orange, Spitzenberg, Newton Pippin and Wagner. The Ontario, Quebec and New Brunswick classes will be for Wealthy, Fameuse,

It is the principle upon which Uneda Biscuit has secured its enormous distribution—the principle of Wrigley, of Wanamaker, of a half-hundred others.

It is the principle of repetition—repetition.

Rightly understood and rightly used, it is a great secret of advertising success.—King's Courier.

McIntosh, King, Golden Russet, Spy and Greening, and the Nova Scotia Section for Wealthy, Cox Orange, King, Golden Russet, Spy, Blenheim Orange and Stark.

Separate exhibits will not be required for the Overseas and Provincial Sections, but all entries of these named varieties will be judged against each other within the province or provinces named. No additional entry fee will be required. A splendid opportunity is offered therefore to each province of capturing a fair share of gold, silver and bronze medals and also of securing twenty-one cash prizes restricted to the province or provinces in the new competition. The only restriction is that at least five entries are made in each of the classes in the Provincial Sections.

A feature of special interest, akin in a smaller way to that aroused by the Lipton efforts in international yachting, is also provided in connection with the British Empire Section by England's challenge to Canada to carry across the Atlantic the £50 silver challenge cup for the best exhibit in the Cooking Class of the British Empire Section now held by an English exhibitor, which will become the property of the competitor winning it twice in succession, or three times in all. There is also every probability that a similar challenge cup to stimulate inter-country competition will be offered this year in the Dessert Class of the same Section.

It is expected that a special effort will be made by the fruit growers of Canada to be well represented at the next Imperial Fruit Show, as the advertising value is very great of the prominence that may be gained at an exhibition which emphasizes particularly the commercial point of view, and which has an even greater appeal to the trade than to the general public.

The Guarantee Fund has now reached a total of £4,917. Included in this amount are subscriptions of £100 each from the Associated Growers of British Columbia and from the Ontario Fruit Growers' Association.

Full information concerning the Show may be obtained upon application to the Fruit Commissioner, Department of Agriculture, Ottawa.

THE CANADIAN PACIFIC PAVILION AT WEMBLEY

A section of the interior of the Pavilion, showing the fine model of the Canadian Pacific liner "Empress of Canada" in the foreground.

Front view of the exterior of the Canadian Pacific Pavilion at the British Empire Exhibition.

One of the large oil paintings by P. A. Staines, on the walls of the Pavilion with mixed farming as a subject.

In the Official Guide to the British Empire Exhibition one reads:—"The decoration is characteristic of this colossal transport company. A deep frieze illustrates the C.P.R. route from the United Kingdom to Japan in a fascinating series of pictures in which are introduced moving models of liners brilliantly lighted up, and transcontinental trains linking Atlantic and Pacific shores. The huge, electrically-lit map of Canada is one of the chief features of this exhibit, and is the last word in scientific map making, and a day's diversion in itself. The C.P.R. takes us out of the British Empire into Japan, and the Land of Flowers is the subject of a delightful display in an adjoining section. A model farm in the West will draw the attention of prospective settlers. Big game will attract the sportsman. The cinema has a continuous performance between the hours of one and five o'clock, showing very interesting pictures. Lectures are given at intervals."

This wall painting by P. A. Staines was inspired by the Okanagan fruit district.

The interior of the cinema (showing the large painted drop curtains). Thousands have viewed films which daily show what life in Canada really means to prospective settlers.

A party of school children greatly interested in the model of a typical Canadian home-land.

The huge Automatic Map of Canada, illuminated with five thousand electric lights, which is one of the remarkable features of the Exhibition.

W. C. Kelley returned on Monday from a holiday spent at the Coast.
Mr. and Mrs. H. Read left on Saturday on a motor trip south.
Mr. and Mrs. R. E. White are spending a vacation at the Coast.
Mrs. J. Lawler returned home on Friday from a short visit at the Coast.
Miss May Riley and Miss Mary O'Neil of Calgary came in Saturday night to visit Mrs. O. Atkins.
Mr. and Mrs. A. B. Elliott returned on Saturday from the Coast, where they had gone on a short vacation.
Miss Hazel Steuart was the guest last weekend of Miss Sue Whiteford at Okanagan Centre, going up on Friday.
Miss Laura McLachlan and Miss Eva Johnston were guests of friends in Kelowna for several days last week.
Mrs. R. S. Monro left on Friday for Salt Lake City, via Vancouver and Seattle, to visit her mother and relatives.
Rev. and Mrs. Guy came down Tuesday and are guests of Rev. and Mrs. W. A. Alexander at their camp at Peach Orchard.
Mrs. F. H. Hayward and young son came in from Vancouver on Sunday to attend the marriage of her sister, Miss Gertrude Elsey.
Mr. and Mrs. S. M. Young came in from Vancouver last week and are spending a short vacation here, guests of Mr. and Mrs. T. B. Young.
O. Atkins, accompanied by Misses Violet and Edith, and Messrs. T. G. Beavis and P. S. Roe, left Monday morning to motor to the Coast.
Miss Helene Moore, of Vancouver, came in on Monday's train to spend a part of the holidays with her friend, Miss Margaret Hogg.
Mr. and Mrs. E. R. Butler and children left this morning on a motor trip to Roseland where they will visit Mrs. Butler's parents, Mr. and Mrs. J. C. Robson.
Colin Chisholm, who had his matriculation examination papers read, has received word from Victoria that he has passed with supplements in French and chemistry.
Miss Mary Vicary returned on Friday from Victoria, where she has been attending summer school, taking a course in dressmaking and designing.
Summerland high school is preparing to send a stock judging team to the provincial fair at New Westminster early in September. Mr. B. Robinson, instructor in agriculture, is coaching them along.
The St. Andrew's young people's society's corn boil which was scheduled for Monday night at Shwash Bay, was held in the hall on account of the weather. Spirits were not dampened and all enjoyed themselves.
Mr. A. B. Morkill, former manager of the Bank of Commerce here, and his mother, Mrs. Morkill, came in from Vancouver this morning on a holiday visit. While here Mrs. Morkill is the guest of Mrs. F. A. C. Wright while Mr. Morkill is a guest of Mr. Hutton. Mr. Morkill is now with the Anyox branch of the Bank of Commerce.
Leo McLaughlin, accompanied by Harold White, left Monday morning in his motor launch for a trip up the lake. They expect to be gone about two weeks, most of which time will be spent cruising on the northern part of Okanagan Lake.
St. Andrew's C.G.I.T., with some friends, had a picnic supper in the park last Friday evening. Later they went down to Rev. and Mrs. Alexander's "Kilcare Kamp" on the beach, where swimming, a corn boil and songs rounded out an enjoyable evening.
In accordance with instructions received by wire early this week, Rupert Wright plans to leave on Saturday for Montreal, from where he will sail for England on August 28th, to report for service on "H.M.S. Thunder" on September 15th. Rupert spent several years at the naval training school at Esquimalt, B.C.
Mr. and Mrs. Wm. Jenkinson returned on Tuesday morning from a short holiday at Vancouver. They were accompanied by Miss Silcox, of Ontario, who has been visiting at the Coast and who will spend some time with them here. They report 0.0 fine weather at the Coast, with only 0.4 one day of rain during their stay.

M. G. Wilson has a supply of Hardie Picking Bags, just arrived.
Miss Margaret Harrington of Peachland is the guest of Mrs. Estabrook.
Mrs. R. F. Theed and daughter, Elizabeth, returned on Monday morning from Vancouver, where they had been on a brief visit.
S. Kennedy of Trout Creek left on Sunday to join his wife in Tacoma, Wash., where she has been for several weeks. Mr. Kennedy, who has not been well for some time, has gone down for treatment.
For the last two years St. Andrew's young people have made shipments of fruit to tubercular patients in the Vancouver General Hospital. This year, instead of making one large consignment, a few crates are being sent each week.
Mrs. F. A. C. Wright returned from Vancouver on Sunday morning.
M. F. Meredith, formerly of the staff of the Bank of Montreal here, and now with a Vancouver branch of that institution, came in on Monday's train from the Coast and is a guest at the home of Mrs. F. A. C. Wright.
Miss Rind and Miss Pope, of Bath, England, came in from the Coast on Monday and are guests of Mrs. Faulder. After a short stay there, they will come on to Summerland, where they will visit for a time with Mr. and Mrs. T. Croil. Miss Rind and Miss Pope have just returned from a trip to Alaska.
Mr. and Mrs. J. W. Miller arrived from Vancouver on Wednesday morning. Mr. Miller having bought out the transfer business of Bernard Taylor.
Joe Phillips of the Experimental Station left on Saturday morning for Calgary, where, according to rumor, he has gone at the invitation of friend Cupid.
Mrs. Bundie, who with her two children has been the guest here of her sister, Mrs. S. A. MacDonald, left for her home in Erickson, B.C., Wednesday morning.
Mrs. W. H. Butler and Miss Butler, who have been visiting Mrs. Butler's son, E. R. Butler and Mrs. Butler, here, left this morning for Winnipeg.
Mr. and Mrs. Nelson Hardy of the Experimental Station, accompanied by Mrs. Hardy's sister, Miss Williamson and a friend, Mr. McLeod, of Vancouver, were visitors to Kelowna on Friday.
M. G. Wilson returned on Tuesday's train from Vancouver; he and Mrs. Wilson having motored down to the Coast city last week. Mrs. Wilson returned by motor last night accompanied by her sisters, Mrs. C. J. Loewen, Vancouver, and Mrs. Streetman of Agassiz, and a niece, Miss Louie Warren, also of Agassiz.
"We are in a pickle," said a man in a crowd.
"A regular jam," murmured another.
"Heaven preserve us," exclaimed an old lady.

SYNOPSIS OF

LAND ACT AMENDMENTS

PRE-EMPTIONS

Vacant, unreserved, surveyed Crown lands may be pre-empted by British subjects over 18 years of age and by aliens on declaring intention to become British subjects, conditional upon residence, occupation, and improvement for agricultural purposes.

Full information concerning regulations regarding pre-emption is given in Bulletin No. 3, Land Series, "How to Pre-empt Land," copies of which can be obtained free of charge by addressing the Department of Lands, Victoria, B.C., or to any Government Agent.

Roads will be granted covering only land suitable for agricultural purposes, and which is not timberland, i.e., carrying over 5,000 board feet per acre west of the Coast Range and 3,000 feet per acre east of that range.

Applications for pre-emption are to be addressed to the Land Commissioner of the Land Recording Division, in which the land applied for is situated, and are made on printed forms, copies of which can be obtained from the Land Commissioner.

Pre-emption must be occupied for five years and improvements made to value of \$10 per acre, including clearing and cultivating at least five acres, before a Crown Grant can be received.

For more detailed information see the Bulletin "How to Pre-empt Land."

PURCHASE

Applications are received for purchase of vacant and unreserved Crown lands, not being timberland, for agricultural purposes; minimum price of first-class (arable) land is \$5 per acre and second class (grazing) land \$2.50 per acre. Further information regarding purchase or lease of Crown lands is given in Bulletin No. 10, Land Series, "Purchase and Lease of Crown Lands."

Mill, factory, or industrial sites on timber land, not exceeding 40 acres, may be purchased or leased, the conditions including payment of stumpage.

HOMESITE LEASING

Unsurveyed areas, not exceeding 30 acres, may be leased as homesite, conditional upon a dwelling being erected in the first year; title being obtainable after residence and improvement conditions are fulfilled and land has been surveyed.

LEASES

For grazing and industrial purposes areas not exceeding 640 acres may be leased by one person or a company.

GRAZING

Under the Grazing Act the Province is divided into grazing districts and the range administered under a Grazing Commissioner. Annual grazing permits are issued based on numbers ranged, priority being given to established owners. Stock-owners may form associations for range management. Free or partially free permits are available for settlers, campers and travellers, up to ten head.

FRUIT SALES ON PRAIRIE SLOW

(Continued from Page 1)

doubt factors controlling, to a certain extent, the market.

Field grown tomatoes are down in price to a low level, and crabapples are very difficult to move even at the low prices prevailing. B. C. onions are very small and somewhat dirty and in this condition are difficult to move following a much superior imported article.

Winnipeg: There is a fall in the car receipts this week. Business is only fair and not so brisk as last week. There were 14 cars of vegetables and 29 cars fruit received since last report.

From B. C.—1 car raspberries, 5 cars apples, 5 cars mixed fruit, 1 car crabapples, 1 car vegetables.

From Ontario—2 cars cherries, 3 cars tomatoes.

Imported—10 cars potatoes, 5 cars pears, 1 car grapes, 2 cars mixed fruit, 1 car onions, 1 car cantaloupes, 2 cars peaches, 1 car plums.

Saskatoon: The market is overloaded on all B. C. shipments with the exception of spuds. Ripe 4 bskt. crate tomatoes have been sold as low as \$1.35. Crate apples \$2.00 and wrapped apples \$2.50. This is under cost, delivered. On account of the poor crop conditions in the northern part of this province these markets are overloaded and goods are sacrificed to this extent.

Edmonton: The cherries seem to be over as we have seen none for the past week. This week there were quite a few cars of mixed B. C. fruits and vegetables on this market. Some of the ripe tomatoes, cucumbers, peaches and plums were in over-ripe condition. None of this stuff is selling fast as trade all claim it is too early for it to go into consumption in large quantities. A large number of people are away and there is no preserving or picking being done yet. First Wash. cantaloupes arrived this week and were in excellent shape. There are a lot of crabapples here but sales are slow.

Vancouver: The weather has continued warm and dry during the past week.

The movement in peaches took on much heavier during the week, as will be noted by the list of imports. Bulk of supplies are Elbertas and come from California.

The long spell of dry weather has not been at all advantageous to green vegetables, and as a result a slight stiffening in the price of some of these lines will be noted.

The tomato market has weakened considerably during the week under increasing supplies of field stock from the upper country.

The new potato market has shown considerable strength during the week, price to grower advancing about \$3.00 per ton. Wholesale prices show a corresponding increase.

In Calgary some of the wholesale prices on Okanagan fruit are: Peach plums, \$2; Tragedy, \$2; Elbertas and Crawford, \$1.75; Bartlett, \$3.75; field tomatoes, \$1 to \$1.15. Apart from peaches very little American stuff is going into that market, which is quoted as follows: Elbertas, \$1; fancy peaches, \$1.40; C grade \$1.25.

FOUR BASKET CRATE FAVORED

(Continued from Page 1)

both are blacks of the dessert variety. Frankly, I would say our present volume of Royal Annas will never be successfully handled in lugs owing to their tenderness.

To be a popular seller the four basket crate must retail at 1.00 per basket. This means \$2.40 per crate F.O.B. Okanagan. At .75 cents per basket to the consumer they go into consumption very freely, in fact it is then almost a crate purchase. This price would mean \$1.50 F.O.B. During the past season some dealers retailed baskets at 1.25 but the majority asked \$1.50 while fruit stands sold in small lots at 35 cents per pound. Some of them tried to hog it at 40 cents and 45 cents but the great majority sold at 35 cents. At this figure they were not making any killing taking into consideration shrinkage and handling. The lug is essentially the fruit stand package and will, I believe, become more popular in time. It is only a matter of playing the lug a little stronger each season. Its chief drawback is the necessity of immediate sale as the fruit will not stand up nearly as long as in the four basket crate, and as we have learned through disastrous experience they will not store in cold storage. Another feature which has caused much trouble and loss is the bottom board being not quite wide enough. This cuts the fruit and decay begins rapidly. This could be easily remedied.

The finest lug reaching the market

SEASON THIS YEAR TWO WEEKS AHEAD

(Continued from Page 1)

Kootenay and Boundary District:

Plums and Prunes have dropped quite heavily in most all sections during the past two weeks. The brown spot at the core is showing up in the fruit on some of the varieties of apples. This condition has been noticed in Wealthies, Jonathan and McIntosh. Only by cutting the apple will it be possible to find the trees affected with this condition. Growers should not allow the fruit from such trees to get into the packing houses. Other than this the apple crop on the whole is coming on in good shape, with average size and fair color for this time of the year. The season is about two weeks ahead of last year. Pears are making good growth but have not yet been thinned sufficiently to get the size required to bring the top price. This crop however, is very clean and has stood the dry weather well.

Cremona, August 9th: The entire Valley has had the benefit of several showers of rain, the total amounting to about two inches of rain. This will enlarge the late fall and winter apples and prove of great value to all fall crops.

Tomatoes will be a heavy crop this year, and the recent rains will ensure their rapid development. Early shipments are on the increase and will be heavier each week until the beginning of next month.

Duchess apples are on the move and some of the offerings were only fair in size.

Plums are coming in rapidly mainly the Peach Plum, but the total shipments will be small.

In view of the fact that most of the officials in charge of the various districts will be absent from their respective stations on other work connected with their duties, the issuing of the weekly news letter will be suspended until the latter end of September or early October.

RAIN BRINGS SOME RELIEF

(Continued from Page 1)

Accordingly notices to this effect were mailed to consumers.

In reaching this decision the department was influenced to a considerable extent by the necessity of maintaining a sufficient supply in reserve to handle the situation in the case of an outbreak of fire, it being felt that the municipality was not warranted in allowing people to use the water on gardens and lawns and running the risk of a serious conflagration.

Unless the present dry spell is broken in the near future, it is stated, it may even be necessary to adopt some further system of conservation, the conditions in the hills being absolutely abnormal.

A special meeting of the domestic water committee was held on Tuesday evening, at which it was decided to institute a twenty-four hour patrol of the town to see that the restrictions prohibiting domestic water consumers from using the water supply for the sprinkling of lawns, gardens, etc., were properly observed.

The first patrol started within an hour of the meeting for although some of the consumers might not have received their notices giving warning of the total restrictions by that time, sufficient time had elapsed for them to have received those first sent out prohibiting the use of water through unmetered services except for one hour each morning and two hours in the evening, which, in a number of cases it is understood were being absolutely ignored.

Talk is current in Penticton of installing a pump to boost the supply of domestic water in that municipality.

this season was partitioned in the centre and the fruit beautifully faced. The box material was strong enough and with a full pack there was no damage to the fruit although the bottoms and sides of the lugs did not meet closely. If we could put out a similar package there is no doubt in my mind but that it would go over big. During the coming months we should have some of our local staffs and some kindly interested person from Central go thoroughly into the question of the lug package as it will undoubtedly mean more money to the producer and will find its place with a certain trade.

However we must not overlook the trade who are getting big distribution and paying us real money for the four basket crate.

In selling the lug it will be necessary to figure closely the difference in weight and saving in cost of packing as against the four basket crate, and make a spread of some few cents arbitrary in favor of the latter. In other words we must offer some inducement to purchase the cheaper

package.

NARAMATA NEWS

Current Events of Town and District

Miss Margaret Allen left last week for Vancouver where she has been appointed on the teaching staff of a local school.

Mrs. Rushbury returned home on Thursday from Vancouver where she has been during the illness of her daughter, Minnie.

Mr. Raynor left last week to resume school work in Alberta.

Miss Ella Raitt of Toronto is visiting her aunt, Mrs. Raitt, on her way to the coast.

Mrs. Coleman and daughter returned to Calgary last week.

Mr. J. M. Robinson is making an automobile trip around the electoral district, accompanied by Mr. Horswill.

Rev. H. J. Armitage officiated at the Union Service on Sunday afternoon, the subject of his sermon being the miracle of the loaves and fishes. The anthem was "But the Lord is mindful of His own" (Mendelssohn), Miss Alice Myers at the organ.

The Women's Auxiliary held a successful social and sale of home cooking on Thursday evening, the scene of operations being the Unity Club. There was a very large attendance of guests, who much appreciated the programme of musical numbers provided. These included a piano duet by Mrs. Languedoc and Mrs. Walters, a reading by Miss Gordon, a song by Miss Dora Cross, piano solo by Mrs. Walters, a song by Mr. Stewart Allen, a dance by Miss Violet Lawrence, vocal solo by Miss Turner, and two charming songs by Mrs. Crawford. A dainty supper was served by the members of the Auxiliary, and the proceedings closed with the National Anthem. The funds of the W. A. are augmented by the sum of \$25 as a result of the gathering.

The Unity Club was the scene of a sociable gathering on Wednesday evening, the Women's Institute and the Board of Trade collaborating in a reception to Mr. and Mrs. F. Manchester previous to their departure on a winter visit to Michigan and other points in the United States. Community singing followed by solos by Miss Alice Myers and Mr. Geo. Weaver, occupied the early part of the evening, after which presentations from the Institute and Unity Club were made to Mrs. Manchester in appreciation of her work as librarian. The gifts comprised a pretty bracelet and necklace, donated by the two organizations, and presented by Mrs. Cook and Mrs. Salting. Mr. Weaver spoke for the Board of Trade as to the work of Mr. Manchester as Secretary, the latter replying for himself and Mrs. Manchester. Refreshments were served by the ladies and the proceedings closed with the singing of "Auld Lang Syne."

Launder dainty things twice as often, this way

It's not necessary to keep your prettiest things folded and laid away. Wash them—often. Launder them just as often as necessary. But do it this way!

Use Palmolive PRINCESS SOAP FLAKES—and see fragile crepes, silks, laces, come from laundering absolutely unharmed. Colors brightened and freshened, if anything.

The great foam of suds contains nothing to hurt the delicate fabric, the most delicate coloring. It dissolves the dirt, however, most thoroughly—and washes it away.

These snowy, crinkly flakes contain nothing but pure soap. So they go farther, cleanse more efficiently. That makes it economical to use them in the washing machine, for all laundering, and for every general household purpose.

If only to try, get some today of your dealer. He has them—in handy one-pound packages.

Volume 17, Number 4

SUMMERLAND, B. C., THURSDAY, AUGUST 28, 1924.

\$2.50, Payable in Advance

SELLING UNDER GOVERNMENT CERTIFICATE

New Plan Expected To Remove Chance of Rebate Claims

GOVERNMENT INSPECTION IS BASIS OF SALES

Additional Inspectors Appointed—Fee of Five Dollars Charged Shippers

Shipments of fruit and vegetables made by the Summerland Co-operative are now nearly all going out under the guarantee to the buyer as to grade and condition afforded by the new inspection service established by the Dominion fruit branch as an experiment.

The object of the new service is to give the buyer an impartial certificate covering general conditions, grades, etc. and to establish confidence in the mind of the buyer to the effect that he will get what he orders. Further, this service is intended to eliminate claims by the buyer on the shipper for any or several alleged deficiencies.

A request was made by the Associated several months ago for the establishment of such a service and the federal minister of agriculture has now authorized the establishing of an inspection service in the Okanagan Valley, including Salmon Arm as an experiment, and it is anticipated that this service will be made a permanent one.

A fee of five dollars is charged and it is expected that a great bulk of the fruit and vegetables will move under inspection, accompanied by the government certificate and that in most cases this certificate will be the basis of sale. All shippers, of course, may avail themselves of this service.

Additional inspectors have been appointed and these are all under R. G. L. Clarke, dominion fruit inspector for British Columbia. Eric R. Agur of Summerland and Arthur E. Henderson, now at Peachland, have been temporarily appointed inspectors for Summerland. This service will be in addition to the regular inspection under the Fruit Act now being done here by R. F. Theed, Jas. H. Ritchie of this place has been given a seasonal appointment for the Penticton district and F. E. Loveday and W. T. Fleet temporary positions in the same field.

Other inspectors appointed under the new order are: Kelowna, Wm. Reid, seasonal; J. E. Seaton, A. W. Gray, Walter Charman and Fred Dean, temporary; Vernon, Wm. J. Hayward, seasonal; J. B. Castner, Edward Borryman, L. A. C. Kent, temporary; Salmon Arm, Walter B. Fraser, temporary.

HARRY TIDY IS RETURNING TO COAST

Harry Tidy, well known to many in Summerland, a resident of Keremeos and later of Princeton, has gone to New Westminster, where he will resume work in the business conducted by his father under the name of Tidy, the Florist. Mr. Tidy became well known throughout the southern interior through his con-

LAY NEW FLOOR IN OPERATING ROOM

The new floor in the operating room of the Summerland hospital has been laid. Old floors had given a great deal of trouble by the surface of the cement cracking off. This time the whole floor was taken up and a completely new one put down, the surfacing being put on while still wet. This was covered with sawdust and kept wet for several days. In this way it is believed that the surface material will get well set into the foundation and will not crack off.

While this work is being carried out the large public ward in the northwest corner of the hospital is being utilized as an operating room.

BRIDE ELECT IS SHOWERED

Mrs. S. Angove, Mrs. T. G. Beavis and Miss K. Brown were hostesses to about thirty friends at the home of Mr. and Mrs. J. R. Brown on Friday afternoon at a miscellaneous shower in honor of Miss Eva Shields, whose marriage takes place next Saturday.

Invited ostensibly to a swimming party, Miss Shields was much surprised on returning from the beach with those who had arrived early, to find that a large number had meanwhile gathered at the Brown home. As the bride elect entered the room, the strains of the Wedding March were played by Miss Hazel Steuart, while promptly afterwards, a charming little bride appeared in the person of Miss Janet Craig, gowned in white with long flowing veil and carrying a bride's bouquet. She was followed by Master Howard Morgan, pushing a little wagon piled high with gifts, which were placed before the guest of honor. These gifts proved both useful and varied and included exquisite fancy-work, dainty chinaware and handy household and kitchen articles.

An informal social time followed, when a delicious tea was served to the guests.

In answer to a telegram from the municipal clerk to the Minister of Public Works, the latter stated that he would be in Penticton shortly and it is the intention of the council to then press for financial assistance.

The staff of the Occidental Fruit Co. and friends held a supper and corn boil at Siwash Bay Saturday evening, later continuing to Penticton.

PENTICTON ASKING PROVINCIAL LOAN

Penticton municipal council will apply to the provincial government for a loan for the purpose of providing additional water storage in the hills. Increased storage capacity on Penticton Creek and a diversion of creeks to assure the filling each year of Ellis Creek, No. 2 reservoir are contemplated.

The body of the unknown man found near Osprey Lake has been identified as that of Biaggio (Billy) Corrado, who disappeared from Princeton last April.

nection with the tomato growing industry at Keremeos.

WAS BODY OF A PRINCETON CITIZEN

Those having passed into high school at the recent examinations, little if any increase is expected in the total attendance.

Two changes are made in the high school staff, the new teachers engaged being Miss Elaine Griffiths and Mr. D. M. McIntyre, J. O. Steeves continuing as principal.

Here again, it is expected there will be but a slight increase in attendance over last year. Fourteen students completed their matriculation last term, while twenty-seven students received promotion from the entrance classes to the preliminary high school grade. The allocation of subjects to the different teachers has not yet been definitely settled, pending the arrival of Miss Griffiths.

Seeking To Extend Canadian Markets

CANADIAN SENATORS EN ROUTE TO SOUTH AFRICA. To review conditions generally, and also with a view to increasing Canadian Trade relations with South Africa, these five Canadian Senators are now on their way to Cape Town. Photographed aboard the Canadian Pacific S.S. Montroyal they are, from left to right, Hon. Robert Watson, Hon. W. B. Willoughby, Mr. J. F. Taffard, Mr. W. G. McQuarrie, and Mr. E. R. E. Chevrier.

MEETS INSTANT DEATH WHEN CAR UPSETS

W. H. D. Ladner, Well Known Vernon Lawyer, Is Victim

TIRE BLOW-OUT IS ALLEGED CAUSE

Car Left Road And Plunged Down Steep Hill Side

W. H. D. Ladner, the well known Vernon lawyer, was instantly killed Tuesday night in a motor accident. He was being driven from Armstrong to Vernon by an Armstrong man, Jas. Hopkins, who is reported to have been seriously injured when the automobile overturned on a steep hill about a mile out of Vernon. A tire blowout is said to have been the direct cause of the accident. The sudden collapse of the tire caused the car to swerve, when it plunged off the road and rolled over twice before coming to a standstill.

Mr. Ladner has been practising law in Vernon since 1915, coming to that city from Vancouver. He was the son of Rev. Chas. Ladner of Kamloops, now an aged man, who lost his other son, John, by sudden death in a train wreck some years ago.

Mr. Ladner is survived by a wife and three small children.

GIVES INTERESTING LECTURE HERE

Rev. J. Knox Wright gave a most interesting illustrated lecture Wednesday evening in St. Andrew's church on The Balkans. His talk covered Athens, Constantinople, thence north through the republics of Jugoslavia, Hungary, Austria and Czechoslovakia. Various slides showed the ruins of the ancient glory of Greece. Among others were pictures of many beautiful pieces of architecture, cathedrals, mosques, palaces, etc., and landscapes and panoramas. Numerous types of the many peoples were also included.

It is said that within every 200 miles of every capital in continental Europe save Rome, 40 different languages and dialects are spoken. Dr. Wright then asked for aid for the Bible Society who have now printed the Bible in over 600 languages and dialects and are distributing copies among this heterogeneous population.

Miss Vivian Jones left by K. V. R. Wednesday noon to spend a week or so in Vancouver. Her father, J. W. Jones, M. L. A. brought her down by auto on Tuesday afternoon. Mrs. Jones and some lady friends accompanied them. Almost immediately after her return from the Coast Miss Jones will leave for Toronto to take a further course in physical culture with the object of obtaining her degree.

Don't wait for opportunity to batter down the door and walk right in.

McGEER MAY BE LOCAL CANDIDATE

Victoria, Aug. 27.—The report is current here, and appears to be based upon good authority, that Mr. G. G. McGeer, K. C., will be a Liberal candidate in the Yale by-election, when a member will be chosen to succeed the late Mr. J. A. MacKellie, Conservative member for the federal constituency.

FINAL FIGURES FOR HIGH SCHOOL EXAMINATIONS

The following are the names of those second year students of the High School who passed with or without conditions, the French marks and the percentage standing. The names are arranged in order of merit.

French Average	
Bessie Tomlin	72 79
Willie Thorner	57 78
Myrtle Dunham	82 71
Dorothy Garnett	49 71
Betty Caldwell	94 69
Nellie Thompson	49 68
Robert Darke	58 68
Eva Johnston	50 65
Leslie Gould	47 65
Emily Wallock	51 62
Jessie Rutherford	47 62
Arthur Dunsdon	42 61
Jean Moffat	40 59
John Winter	47 55

J. O. Steeves, Principal.

NARAMATA GETS CHERRY PRICES

Gross Returns Indicate Much Better Returns to Growers

Naramata Co-operative has furnished The Review with the following gross prices on currants and cherries, pools for which have just been closed. From those will be deducted the local and central charges and also the capital reserves, amounting approximately to 58 or 60 cents per package.

Red Currants, 1.83; Black Currants, 2.32; Cherris, Governor Wood, .07; Lambert, 2.24; Royal Tartarian, 1.48; Bings, 2.75; Royal Anne, 1.76; Early Richmond, 1.08; Daneon, 2.16; Black Republican, 1.50; Cannary, Sours, 4-cents; Yellow Spanish, 5-cents.

These prices are very much better than those realized last year.

SUMMERLAND POTTERY GOES TO JASPER PARK

Fame of Summerland pottery is spreading. This week there is being shipped from here to Jasper Park for sale to tourists in that world famous national playground, a shipment of locally made pottery ordered a few days ago. Possibilities of this industry are becoming more and more apparent.

WEATHER SLOWS FRUIT MARKET

Cold, wet weather with resultant uncertainty as to the harvest is greatly retarding the demand for fruit, according to the last bulletin of the markets commissioner, which states that there has been a firming up in prices on peaches, plums and prunes as well as on tomatoes, which were scarce.

The bulletin points out the need of careful selection of tomatoes. A shipment from Vernon, poor in color, dirty and irregular in shape, were not wanted. Kelowna was sending good stuff but shipments from Summerland were of fair quality only. A tightening up on inspection is due, says the commissioner.

Cantaloupes are selling well. British Columbia is fully able to meet the demand for pears, with the result that Washington pears are losing money to the jobbers. Some fine peaches are arriving in Calgary from lower Okanagan lake points.

GET PORCUPINE IN BACK YARD

Mark Scourrah on Sunday evening caught a large porcupine near the back door of his home on Shaughnessy Avenue. It had evidently been around for some time. Many nights he has had to go see what was disturbing his ducks and geese and on other occasions his dog could not be kept quiet. Once Mrs. Scourrah saw an animal run across the yard, but not until Sunday night did they ascertain it to be a porcupine. It was in the brush about ten feet up, and looked like a bear cub.

The porcupine was shaken down and placed in the root cellar that night for safe keeping.

Mr. Scourrah tried to get someone to take it to the hills, but failing this, he released it again, it being certain it would not hang around after being molested.

Porcupines have been sighted of late in many parts of the front benches, especially at and above Crescent Beach.

EXPECT TO EXPORT MANY APPLES

Seattle exporters are looking for a big apple export trade this fall. The Seattle Produce News says: With Canada, the United States' principal competitor in the apple trade, handicapped by the shorter crop this year, there is every prospect that the export trade from the Pacific coast states will be materially heavier this year. Five hundred and forty thousand boxes of apples were exported from Seattle last year, according to the Produce News, which says further that reports on the Canadian crop for this year are that it will be about one-sixth less than a year ago, and with the British crop about a third short, exporters are looking for a heavier movement with the Pacific Coast states getting their share.

Donald Ross returned on Saturday from Albert Canyon, where he has been acting as relieving operator at the C. P. R. station. He left again on Wednesday to relieve the operator at Lancholl, a small station on the main line between Revelstoke and Field.

The fresh fruit shipped to a distance and held until very ripe.

WILL OBJECT TO SUGGESTED CHANGE

The published statement that the Good Roads League would be asked to endorse a proposal to abandon the Inshore road between Summerland and Peachland, is meeting with some objection here.

It is learned this morning that a meeting of citizens has been called to be held at A. Stark's office Friday night with the idea of formulating a resolution to go before the Good Roads convention, asking for the straightening out of some of the sharper turns on the Inshore road and to protest against abandoning the section referred to.

GROWERS ARE PETITIONING GOVERNMENT

Want Better Method of Financing Each Season's Crop

LOANS TO LOCALS ON COMMODITY BASIS

Premier Oliver Promises To Make This Possible By Guarantee

Vigorous efforts are being made by the Associated to obtain assistance for the growers in the form of a government guarantee or otherwise, which will enable the locals, through the Associated, to secure loans on a commodity basis.

Progress has been made to the extent of securing the interest of the prime minister, who has promised to introduce legislation at the coming session of the legislature, giving the lieutenant-governor and council power to deal with the matter.

In order to strengthen the petition of the Associated a petition is being circulated and signed by the growers of all districts. The Associated aims to secure action as early in the session as possible in order that some benefit may be derived from the arrangement this season and it is therefore necessary that it be prepared at as early a date as possible with all material for pressing the application.

The petition in circulation here, which is exactly similar to those in other districts, except for the name of the local, is as follows: "We, the undersigned growers of fruits and vegetables in the province of British Columbia, and members of the Summerland Co-operative Association affiliated with the Associated Growers of British Columbia, Limited, for co-operative marketing of our produce, being convinced that the survival of the agricultural producer is dependent on successful co-operation, which in the depressed state of our industry is seriously hampered by the difficulty of financing the movement of our crops, do earnestly petition the Provincial Government to assist us to secure the necessary finance, on the lines set forth in the brief submitted by the Associated Growers of British Columbia, Limited."

A copy of this petition is at the packing house, where growers are asked to sign it as they bring in their fruit. It is desired that it receive 100 per cent support.

Socialists Holding Second Summer School Here This Week

Since Sunday the second session of the Summer School of Social Science has been in session at the Log Cabin in Peach Orchard. The first of the courses of lectures was held last summer, having been organized by our local druggist, J. W. B. Logan. Sessions will end on Sunday next. Mrs. Rosa Henderson of Montreal is the director and is giving most of the lectures.

She spoke on Sunday last on 'New Human Values' and on Monday on 'The Co-operative Commonwealth, or Industrial Serfdom—Which.' Tuesday night C. B. Boardman, representative in Western Canada of the Federated Press, a news service organized by Labor papers through-

out the continent, spoke on "Building a Labor News Service." Mr. Boardman is disposed to condemn the metropolitan press of the present day, stating that it is too sensitive to the will of the advertisers, without whom it could not exist.

On Wednesday night Mrs. Henderson spoke on "A Social Interpretation of Maeterlinck's 'Bluebird'." This lecture took the place of that announced to be given by Geo. F. Stirling on "Problems of the Farmer." Each afternoon there is a talk given to children.

Through the Federated Press Summerland will receive wide publicity in the Labor press of the continent in the reports of the school now in session.

Public Schools Re-open For Fall Term On Tuesday Next

Schools re-open for the fall term on Tuesday, September 2nd, the earliest for several years, due to the fact that this year Labor Day comes on the first day of the month.

The opening of the new session will find few changes in the Central school, the staff remaining the same as at the closing of the last term. There will probably be some slight adjustments in the arrangement of the classes and grades, but those have not yet been fully completed. Under S. A. MacDonald, principal, the staff comprises, H. W. Daniel, Misses M. Harwood, R. Graham, M. Smith, R. Dale, J. Nicholson, K. Elliott and M. Banks.

A number of new students are expected in the primary grades, but with

those having passed into high school at the recent examinations, little if any increase is expected in the total attendance.

Two changes are made in the high school staff, the new teachers engaged being Miss Elaine Griffiths and Mr. D. M. McIntyre, J. O. Steeves continuing as principal.

Here again, it is expected there will be but a slight increase in attendance over last year. Fourteen students completed their matriculation last term, while twenty-seven students received promotion from the entrance classes to the preliminary high school grade. The allocation of subjects to the different teachers has not yet been definitely settled, pending the arrival of Miss Griffiths.

The Summerland Review

Established August, 1908.

Ralph E. White, Editor and Manager

An independent family newspaper covering Peachland, Summerland and Naramata and adjacent districts.

Subscription Rates—In British Empire, in advance, \$2.50 per year; six months, \$1.40. To U.S.A. and other countries, \$3.00 per year.

Advertising Rate Cards and information respecting territory and samples of paper mailed upon request, or may be seen at the office of any advertising agency recognized by the Canadian Press Association.

Advertisers must have copy in by Tuesday noon in order to insure changes for standing advertisements. New display advertising copy can be accepted one day later.

All instructions for cancellation or alteration of advertising must be in writing.

Correspondence—Letters addressed to the Editor and intended for publication must be short and legibly written on one side of the paper only. The longer an article, the shorter its chance of insertion. All communications must bear the name of the writer, not necessarily for publication. The publication or rejection of articles is a matter entirely in the discretion of the Editor. No responsibility is assumed by the paper for the opinions expressed by correspondents.

Typographical Errors—In the event of a typographical error, advertising goods at less than the proper price, the newspaper will furnish letters to be posted in the store stating the correct price, but goods may not be sold at the price printed and the difference charged to the newspaper.

Thursday, August 28, 1924.

CANADA'S DOLLAR

Americans visiting Canada can now appreciate the feeling of a Canadian visiting in the United States, whose dollar was seemingly not wanted, as it was for several years accepted only at a discount. For the past week or two the American dollar in Western Canada at least has been below par.

There was general satisfaction throughout the country when the announcement was made from New York that the Canadian dollar had reached a parity in that financial centre. In addition to the satisfaction that that news conveyed, the evidence of substantial development and steady recovery from the depression occasioned by our heavy war expenditure, which the return to par value of our dollar reveals, speaks well for the immediate future.

BETTER TIMES AHEAD

Roger W. Babson, than whom there is no greater authority on the subject of general business conditions and whose prognostications are respected by the sanest heads of the continent, is predicting improved business conditions. Hard facts and figures, not guesses, are the basis upon which Babson builds his predictions and his latest optimistic statement already is having a pronounced effect on the frame of mind of business men in the United States and Canada.

MAY BE HE'S A YEAR LATE

Another much quoted prophet, but in whose forecasts we have never been able to place the same confidence as is given him by many, is Foster, the weather man. He is forecasting an unprecedentedly dry season for 1925, from spring until fall. Not very cheering news, but there is no occasion for alarm.

However, we are having an experience this year that is far from pleasant and while we have no control over the precipitation, either in rain or snow, more than a minimum of which is necessary to assure us an ample supply for the summer, it may be found advisable to add somewhat to our existing reservoirs. While it would be folly to invest enough money to provide against such a season, which may not occur again in a generation, the further raising of Garnett Valley dam and some other additions to our storage system may, on investigation, be found good business.

WHY NOT NOW

"Necessity is the mother of invention" and causes men to look to sources before unthought of and it may be that we have within reach supplies of water as yet untouched.

The writer visited the orchard district of Omak several years ago during a season of drought and was astonished to find on the clay benches, many pumps drawing from wells driven in orchards situated much as are most of our own. We would certainly be more disposed to predict the finding of water on a good part of the area of Summerland than we would have predicted subterranean streams beneath the orchards of Omak. Their water rights are not inseparable from the land and many orchardists found it profitable to sell their water rights for the season, bore wells and pump.

Similar sources of supply here would augment the supply from the usual sources and thus permit an extension of the season.

INTERNATIONAL FRIENDSHIPS.

Absence of war. Thought of hostilities or even a serious argument for over a century tells the story of two adjoining countries—Canada and the United States—which must be supporting a majority of their citizens who are both sensible and peace loving.

During the past sixteen years of our residence in this country, several of which were lived practically on what is termed the International Line, the always growing fraternity of these citizens has been noted. But strange to say, it is only within the past two or three years that this very laudable spirit has grown with any rapidity.

How this greater bond of friendship came to secure its added zest is hard to say but observation leads us to say the Masonic and Elk lodges have played a leading role in this laudable advancement in International Friendships.

The celebration of the official opening of the Okanogan-Cariboo Trail seems to have crystallized this glowing spark of friendship into a true bond of lasting good fellowship that bids fair to become a thing of joy and benefit to all with the complete banishment of that imaginary line for all time, in so far as this particular valley is concerned. More than this, we believe this good spirit will spread along the line and add to the glories of our peaceful past with neighbors that are well worth our greatest friendships and respects.—Omak (Washington) Chronicle.

The Second Column

BY PATRIOT

A CALL FOR LEADERSHIP

"The Reader's confidence is the most important item to the newspaper publisher." Newspapers are growing better and fewer." Consolidation has been effective. Time has come to stop, look and listen. Publishers are responsible to their readers for every picture and sentence that appears in their paper. A reader's confidence is worth more than numbers. The dissemination of news is today of vital importance.

The newspaper was never more independent than at the present time. It should be a vigorous defender of good citizenship.

"The world needs leadership today. It is listening for a voice to lead. Let the newspapers be the voice which will give a better leadership to the world, and the power to better enforce the laws."

WHAT MAKES TOWNS PROSPEROUS

We should all be interested in the prosperity of Summerland. What good citizen is not? The more we work for the growth and development of the community, the more prosperous we shall all be. A good deal of the prosperity of any town depends on the local support received by the institutions we already have—our churches, schools, farms, factories, stores, public amusement places, parks, etc. How many people appreciate their propriety interest in these institutions? We could not use these properties more than we do to our advantage if we owned them all in fee simple.

We are only casting bread upon the waters when we boost for our municipality. We do not need to concern ourselves about who holds title to certain properties. All instrumentalities which minister to the comfort, service and education of our citizens are assets of the community and its people.

Encouragement of citizens to go ahead and spend their money to furnish service, necessities and comforts for other citizens means progress and growth. Such activities need to be encouraged in order that they might succeed. When any individual enterprise succeeds it means that the town is forging ahead. Let us put our desire for the further growth and development of Summerland in concrete form by resolving to do these things.

APPLIES HERE ALL RIGHT

There are showier towns than our little town, there are towns that are bigger than this. And the people who live in the quieter towns don't know what excitement they miss. There are things you see in the wealthier towns that you don't see in a town that's small; and yet up and down, there is no other town like our little town after all.

In the glittering streets of the glittering town, with its palace and pavement and thrall, in the midst of the throng you will frequently long for your own little town after all. If you live and you work in your own little town, in spite of the fact that it's small, you'll find in the end that our own little town is the best little town after all.—Exchange.

I AM THE COUNTRY NEWSPAPER.

By BRISTOW ADAMS.

I am the Country Newspaper.

I am the friend of the family, the bringer of tidings from other friends. I speak to the home in the evening light of summer's vineclad porch or the glow of winter's lamp.

I help to make this evening hour; I record the great and the small, the varied acts of the days and weeks that go to make up life.

I am for and of the home; I follow those who leave humble beginnings whether they go to greatness or to the gutter, I take to them the thrill of old days, with wholesome messages.

I speak the language of the common man; my words are fitted to his understanding. My congregation is larger than that of any church in my town; my readers are more than those in the school. Young and old alike find in my stimulation, instruction, entertainment, solace, comfort. I am the chronicler of birth, and love and death—the great facts of man's existence.

I bring together buyer and seller, to the benefit of both, I am part of the market-place of the world. Into the home I carry word of the goods which feed and clothe and shelter, and which minister to comfort, ease, health and happiness.

I am the word of the week, the history of the year, the record of my community in the archives of community and nation.

I am the exponent of the lives of my readers.

I am the Country Newspaper.

Be interested in yourself alone and alone you will be.

WE MUST HAVE IT

We must have fair treatment for B. C. before we can expect to prosper as we should. The only way to get it is to fight for it by all the constitutional methods there are, and keep on fighting until we get what the powers that be now know that we are entitled to.

A big effort is to be made to organize the whole of B. C. in a campaign to tell the railway commission and the government that we are going to have fair treatment.

There is no foundation in equity for a principal which says that solely because we live in B. C. we should pay from twice to three times as much for the same service as do people in other parts of the Dominion. In plain words we are paying three times as much to ship a crate of fruit the same number of miles as are the Niagara growers, and it has been proven that it does not cost the railroads any more to perform the service.

Nor is it just that grain should be shipped East cheaper than it is shipped West. The only reason for this practice is that big interests want it to go that way. Just so long as we are simple enough to suffer under these handicaps we shall continue to do so. Long winded arguments by eminent counsel and lists of whereases from public bodies will in the end break down the resistance of the powers interested in keeping us poor. If the ordinary everyday people of B. C. will unite to tell the railway commission and the government in plain words of one syllable that they insist on fair treatment, they will get it. Why not have everyone in B. C. send a post-card demanding an immediate adjustment?

The immediate cause of excitement is the reinstatement of the Crows Nest agreement. This is a reduction of freight rates of benefit to Alberta and Saskatchewan, but not to B. C., and we are told that it will cost the railroads some twelve million dollars. That means that they will be unable to afford any reduction on fruit rates, or on grain going west. In other words, B. C. will get it in the neck.—Salmon Arm Observer.

A STATISTICIAN'S POINT OF VIEW

Roger W. Babson has a world-wide reputation as an authority on statistics. More than that, his business advice and his periodical reports guide the operations of many of the largest business corporations in the States. In one of his recent reports he says, "The prosperity of our country depends upon the motives and purposes of the people. These motives and purposes are directed in the right course only through religion. With the forces of evil backed by men and money, systematically organized to destroy, we must back with men and money all campaigns for Christian education. As the great life insurance companies are spending huge sums of money on doctors, scientific investigations, and district nurses to improve the health of the nation, so we business men should spend huge sums to develop those fundamental religions, qualities of integrity, industry, faith and service, which make for true prosperity. This is not the time to reduce investments in schools, colleges or in the Y. M. C. A. This is the time of all times to increase such subscriptions."

WHOLE WHEAT BREAD

Vancouver Morning Sun.—The Bulgarian peasant who eats rye bread and the Highland crofter who lives largely on oatmeal and oatmeal cake are better nourished than the well-to-do townsman for whom miller and baker combine to make the whitest possible bread.

And that is one reason why peasant and crofter escape cancer, while people who live in luxury show an ever-increasing liability to the disease. Wheat and other cereals are ideal foods when left in their natural condition; they become debilitating and dangerous when all the husks and body-building material have been extracted.

For these husks contain certain substances which promote the natural processes of digestion and enable the body to throw off the poisons that accumulate in the intestines as a consequence of the artificiality of much of the food eaten by civilized mankind. Equally, possibly more important, are the vitamins of which the flour is robbed by the miller.

Ellis Barker, the well-known English writer, in a recent book, has shown that while it may not be possible to cure cancer, it is possible to prevent a great deal of it.

Mr. Barker is not a doctor, but his book is likely to do greater service in the prevention of the disease than dozens of medical works. He demonstrates first of all that cancer is a disease of civilization and the more civilization progresses, that is the farther away people get from foods in their natural state, the greater the spread of the disease.

Then he goes on to show how we remorselessly kill off the vitamins the life-givers, by overrefining and overcooking, and how, if we are to extirpate cancer, we must abandon the white loaf for the whole-wheat loaf and our over-boiled vegetables for green stuff in salads and other forms.

"Eat whole-wheat bread," he says. "That is the way to ward off cancer and other diseases." And Sir Arbuthnot Lane, the great British surgeon, who probably knows more about the human digestive tract than any man living, agrees with him absolutely.

Sidelights on a Great Industry

TOPS ALL PREVIOUS ESTIMATES

PAYROLL OF FOREST INDUSTRIES IN 1923 NOW SHOWN TO BE \$60,000,000

Surprising vastness of amount demonstrates All-Importance of Lumbering

Recent official investigations show that the industrial payroll of the Forest Industries of British Columbia for 1923 was far greater than the original estimate.

It has now been ascertained that the sum actually paid out in wages last year to the workers in the woods in lumber manufacturing and re-manufacturing plants and in pulp and paper mills exceeded the truly incredible sum of \$56,300,000.

It must be remembered that this figure does not include wage payments to office and administrative staffs and distribution of the finished article, nor does it take into account the transportation forces exclusively engaged in handling the product on land and water.

\$60,000,000 Disbursed

When all these are included it is safe to assert that in 1923 the amount of money disbursed in wages by the Forest Industries of B. C. approximated to \$60,000,000.

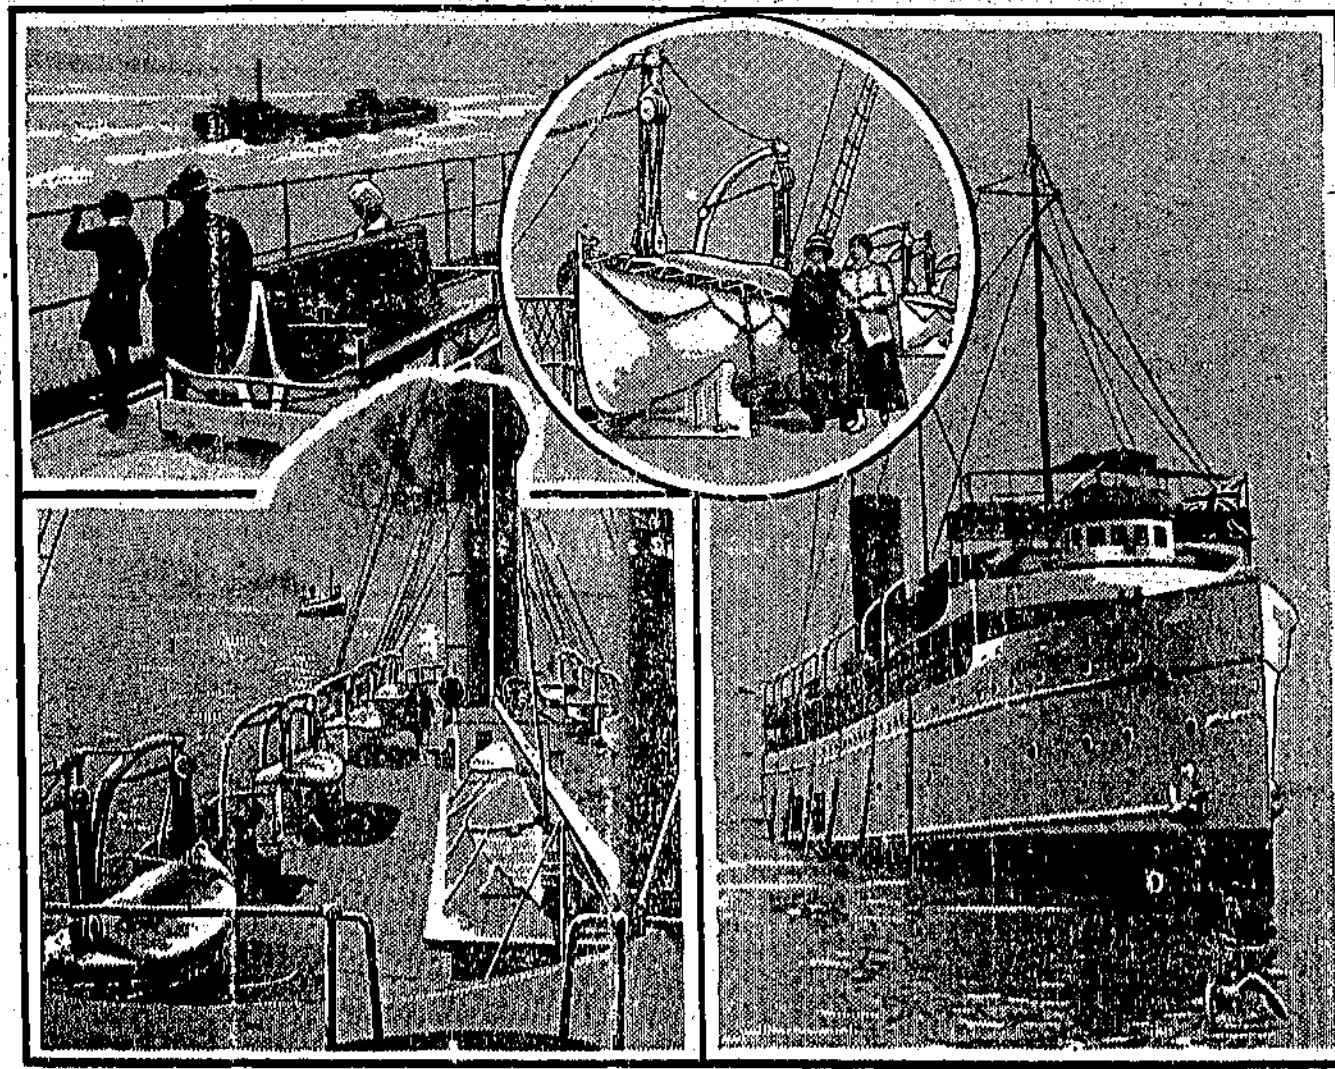

Every day fresh evidence comes to hand demonstrating the extent to which British Columbia is dependent on the unhampered working of its great basic industry.

Some idea of the magnitude of the lumberman's payroll may be gathered from the fact that in 1923 it was more than three times as great as the total revenue of the province.

This series of articles communicated by the Timber Industries Council of British Columbia.

The good job does not always fall to the man who is fit for it, but to the man who has fought for it.

Afloat on the Big Water of Hiawatha

Above are scenes of one of the finest Lake steamships—the Anselmola. The decks are as spacious as the cabins, and as clean as comfortable.

No traveller has seen Canada until he has crossed the Great Lakes. Missing them he misses not only the opportunity of tracing a great, historic, important and beautiful waterway. He also misses an experience which cannot be enjoyed in any other part of the world—that of going to sea in the centre of a continent. Above all, he misses nearly two days of delightfully cool voyaging, which, if he be travelling between the eastern provinces and the prairie region, provides a welcome break in the long and dusty journey.

The Great Lakes of Canada form the most remarkable groups of lakes in the world—a group remarkable for its extent, its importance, its historic interest and its beauty. With the St. Lawrence river, they provide Canada, in summer, with a stupendous inland waterway by which it is possible to reach the heart of the Dominion from the Atlantic ocean, a waterway which, since the beginning, has been inestimably important to the country's development. This vast expanse is haunted by the ghosts of many of the most famous makers of North America. As for their beauty—the loveliness of these pine-fringed inland seas is something which one feels rightly belongs in dreams.

The Canadian Pacific Railway, through its Great Lakes Steamship Service, enables those anxious to enjoy all this to gratify their desire. Three fine steamships, the "Anselmola," "Hiawatha" and "Manitoba," are maintained by the company in this service. Built on, and brought out from, the Clyde, they are miniature ocean liners.

Choice may be made of three sailings a week, two from Port McNicoll and one from Owen Sound, both on the Georgian Bay, a north-westerly offshoot of Lake Huron. A train run of a few hours from Toronto by Canadian Pacific brings one to Port McNicoll, within a few miles of the spot where Champlain and the Jolais made their ill-fated treaty with the Hurons against the Iroquois three centuries ago.

The illusion of being at sea comes rapidly. Flocks of great gulls wheel overhead, fearlessly settling on rail and davit. The deck throbs beneath. Cool breezes drive out all unpleasant memories of heat, dust and smoke. Only two features of a life on the ocean wave are lacking—the tang of salt, for which the scent of pine is a worthy substitute and the unpleasant rolling, instead of which we have almost complete steadiness.

Throughout an afternoon one views an ever-changing panorama. Large islands bearing tiny houses, fit by. Small islands, canoes on their shallow beaches, give glimpses of white tents seen through trees, and the smoke of campfires. Night comes softly, gradually enveloping this picturesque medley of water, land and sky. The moon rises, casting a restless trail of silver across the lake, a trail left by the canoes of Radisson, Marquette, Etienne Brulé, Father Horgans, Hennepin, MacKenzie, Henry, a long procession of daring men, whose paddles still make music in the pages of Canada's thrilling history. Acquaintance begins in the dining-room and is carried on in the verandah café, the lounge, the smoking rooms and on the decks, with card parties, music, dancing and yarning on every conceivable subject.

In the morning one finds that Lake Huron has been left behind. The ship is now in the St. Mary's River, whose green banks, with their succession of summer cottages and bungalows, are gliding by. And so on. Past the Soo, through the "Big Water of Hiawatha," out of sight of land to the Twin Cliffs—a never-to-be forgotten trip.

Britain and the Continent Visited By Editors of Canadian Weeklies

Written for The Review by Hugh Savage, Editor of Cowichan Leader

Stratford-on-Avon.
 July 28th, 1924
 Our sightseeing is over at last. Nearly all the Canadian Press party is rolling across the Atlantic in the C. P. R. steamer Montclair, which left Glasgow last Friday. However, the end of this mere narrative of events is not yet, and some general impressions of life and conditions here, have to be added.

Those who arranged our itinerary did not consider that we should wish to go to church for, as in the army, Sunday usually meant an augmented programme.

Sunday, July 6th, saw us boarding a launch at Richmond Bridge, whence we chuffed up the Thames, through miles of beautiful lawns, riverside residences, and small pleasure craft of all kinds, to Hampton Court.

There we literally "did" the palace and gardens in less than one hour. One would like to linger and tell of the great vine, the marvellous clock, the fountain, the yew trees, but—here is the ubiquitous charabanc and we are late for luncheon in a huge marquee at the country house of Colonel Grant Morden, M. P., and his wife.

After the meal we listened to speeches in which Lord Birkenhead forecast that recent decisions concerning preferential treatment of Dominion produce should and would be changed; T. P. O'Connor broke a lance with him, and, among others, Sir Hamar Greenwood added to our information and pleasure. Very many distinguished men and women were at this function, including Mr. Godfrey Isaacs, who organized the Marconi wireless system.

From this delightful spot we were transported for tea to Hall Barn, Beaconsfield, where a most homelike reception awaited us at the hands of Lord and Lady Burnham. Here is the oldest lawn in England amid grounds, the delights of which would fill many columns. No servants "poured tea" or "cut the ices." Our distinguished hosts, their daughter, and other titled friends waited on the needs of their fellow newspaperfolk from overseas. Then we drove back to London.

The pace grew hotter next day, though the weatherman tried a few tears in the morning, which found us at Kenley Aerodrome. Here we witnessed a flying demonstration, by the Royal Air Force, specially arranged by the Air Ministry. After stunts of all sorts, one pilot demonstrated what not to do in flying. He skidded roofs, "flat turned" without rudder or banking, and did other daredevil things. Then four machines went up and presently four of another type rose and attacked them. Next came bombing a dummy submarine, and finally most of our party, including nearly all the ladies, went aloft in all types of British fighters and the larger commercial machines.

Time pressed or more would have flown. We swept by charabanc down narrow lanes, gazed over a wide vista of Kent and stopped at Dover Castle for lunch in another great marquee, and there spent the afternoon, the guests of Major the Hon. J. J. Astor, M. P., and Lady Violet Astor.

You will have gathered that we had by this time seen many wonderful sights and met many delightful people. We have passed from one entertainment to another, but here, at Dover, was certainly one of our most memorable experiences.

The castle is just the embodiment of all you have read of or dreamed that a castle should be. It is not large. You come on it suddenly and rub your eyes to see if they can possibly be going wrong. Here is a square of tower and turret and great gate, surrounded by a real moat with drawbridge and portcullis intact.

Within are Holbeins and armour, tapestries and treasures of all kinds, and monuments of Henry VIII, who here wooed Anne Boleyn. Around stretch lawns and terraces and gardens, before whose beauty one stands tongue-tied. The pen may convey some hint of their enchanting loveliness, but who shall adequately describe the combined effect of this typically English home and the charming pair who lavish upon it all the love and care that its first owners could possibly wish for?

Major Astor is one of the most modest and delightful of men. He it

was who bought The Times and, in effect, preserved it for the world it serves. Lady Astor, who treated us to a pleasing little reply on her initiation into the Canadian Weekly Newspapers association (in which she is to represent The Times Weekly Edition) is a daughter of the late Earle of Minto, one of our own Governors-General. Her mother's work in connection with hospitals and nursing in Canada will never be forgotten. She recalled with delight her stay at Rideau Hall.

I do not think that one of us wished to leave this fairy place, which is both palace and home, and those who live there, who are at once to be numbered among the greatest in England and among the simplest and kindest hearts.

But—the last car waits and, leaving Westminster, where Wolfe lies buried, to our right, we get back to town. A brief rest and another real newspaper welcome awaits us the same evening, again at the hands of Lord and Lady Burnham, but this time in the offices of The Daily Telegraph in Fleet Street. The business office had been transformed for the occasion, and from the music and delights to be found there one might sally into the works, where the great presses were turning out the provincial edition. And so, as the great diarist says, "home to bed."

Tuesday, July 8th, was our last day in London. It was set apart for visiting the British Empire Exhibition. At 8 p.m. Lord Beaverbrook entertained our party at the Queen's Hall, the floor of which had been specially laid for dancing. This was the grand finale of big events in which we had been participants. I did not go, but from the menu card you may see our host, disguised as a cook, peering round a screen at a long row of diners, bewiskered and otherwise. Upon each plate gyrates, in oratorical attitude, Mr. Lloyd George. The legend runs: "Overseas Editors Wondering Whether Their Digestions Are Equal To Welsh Rarebit."

I gather that the former premier gave a wonderful exhibition of his genius for evading a straight pronouncement, which was, perhaps, half-expected, concerning Imperial preference.

The table plan reveals names which are household words in British politics, journalism and other spheres. Here are a few—Lord Ashfield, Wilfred Ashley, M.P., W. B. Ballantyne, Sir A. Shirley Benn, Lord and Lady Birkenhead, Sir A. Griffith Boscawen, Sir George McLaren Brown, Sir William Bull, Winston Churchill, H. Coleridge-Taylor, Sir Martin Conway, Sir Joseph Cook, General Cuthbertson, Sir Dadiba Dalal, Sir Davison Dalziel, Lord and Lady Devonport, Lord Derby, Sir Robert Donald, Lady Donogall, Sir N. Gratian Doyle, Sir George and Lady Fenwick, Hon. Evelyn FitzGerald, Baroness de Forest, Sir Hamar Greenwood, Lady Griffith Boscawen, Mrs. Hall Calne, Lady Handfort, Sir Samuel Honor, Sir Robert Horne, General Garnet Hughes, Lady Hulton, Percy Hurd, the Governor-General of the Irish Free State, Col. S. B. Joel, Sir Rodrick Jones, Sir W. and Lady Joynson-Hicks, Admiral Kingsmill, Sir Hadley Le Bas, Sir George Lewis, Col. A. Macdonnell, Ian MacPherson, Lord Marshall, the Duke and Duchess of Marlborough, C. F. G. Masterson, C. A. McCurdy, Lord and Lady Minto, Col. and Mrs. Grant Morden, Gordon Solfridge, J. St. Loe Strachey, Lord Waverley, the Duchess of Westminster, Lord and Lady Winterton, Major E. French—and so it goes.

It was a brilliant and memorable gathering. If it did not make big political history, the stage at least was well set. Next day we started to tour England, Wales and Scotland.

One hundred minutes were sufficient on the Great Western Railway to transport us nearly that number of miles from London to the centre of England. It was on Wednesday, July 9th, that we explored Shakespeare's country from Leamington.

Warwick Castle is a great, grim fortress by the sparkling Avon, full of interesting pictures and armour—not forgetting the great "punch bowl"—while on the lawns peacocks strut and call stridently. From the home of the kingmaker we passed to St.

Mary's church where the Beauchamps lie under carved tombs, and banners and noble memorials bear witness that Warwickshire has "played the man" in modern struggles.

All this, including a welcome by the Mayor of Warwick, took place in the morning, and before we sat down to lunch, with the Mayor of Stratford-on-Avon in the town hall, we had "charabanced" through Charlecote, with its deer park, lovely hall, and "tumble-down" stile.

The afternoon went in "doing," in approved American tourist style, the sights of Shakespeare's town—the church where he lies, the house where he was born, the cottage at Shottery where he wooed Anne Hathaway and the Memorial Theatre where his plays are presented at spring and summer festivals each year.

As our programme runs, we "paused" at Kenilworth Castle, that great ruined fortress where history, romance and literature conspire to make men dream—that is, those who have time to sit amid its sheep-nibbled mounds and meditate. At night we dined with the Mayor of Leamington, and met many fellow scribes of the Staffordshire and Warwickshire Newspaper Society.

Next morning we inspected the famous pump room and baths, and revelled in the beauty of the gardens nearby. Then we were humming south for five and a half hours, with only one stop before we were standing outside Torquay station listening to a merry welcome from Mr. Alfred T. Gregory, president of the South-Western Federation of Newspaper Owners.

Torquay is new, as towns go here. It is linked by houses to Paignton, and may soon take in Brixham, famous of old for its trawlers and as the landing place of William of Orange. Its motto is "Health and Happiness." The Medical Baths service, placed at our disposal, did much to bring some of us back to normalcy.

At these baths the mayor received us and dancing followed. The captain of the U.S.S. West Virginia held out a hand here for many Canadians.

Next morning we boarded a fleet of the ubiquitous charabancs and motored through high-banked Devon lanes to Dartmouth. A lovely trip by steamer up the Dart came next. The Royal Naval College looked down on a happy throng. At Teignes we disembarked and motored back to Torquay.

After a splendid lunch as guests of the Corporation at the Town Hall, where the Mayor of Plymouth attended to convey a welcome, we got horribly late for the tenders sent to take us aboard H.M.S. Revenge, but most of the party ultimately visited her. One of the guides there was Lieut. Mountbatten, who married, not long ago, Miss Edwina Ashley; one of the richest heiresses in England. He is a son of Prince Louis of Battenberg, to whom is due much of the credit for having the Royal Navy ready for war when the need came in 1914.

Luckily our evening was "free" and so one might wander to vantage points and look at Tor Bay, crammed with the ships of the Atlantic fleet which had come in that morning.

We travelled to Bath next day. First came a delightful motor drive from Torquay to Exeter. We skirted Dartmoor and there gathered heather. In royal state a hearty welcome awaited us in the ancient Guildhall from the Mayor of Exeter.

At the luncheon members of our party who hailed from Exeter, Ontario, returned thanks. Then we went to the great cathedral where you may see a memorial to R. D. Blackmore, who wrote "Lorna Doone." Out again into the sunshine, through the old city walls, we came to the War Memorial on Northernhay, unique in that it commemorates the prisoners of war as well as the active branches of the service. It was all explained by Sir James Owen, whose paper, The Express, containing a full account of our visit, was put into our hands before we entrained a few moments later.

Bath is a beautiful old city set in and along the sides of the Avon valley. Its architecture is reminiscent of Paris. The buildings are nearly all of solid stone. On Sunday, July 13th, we drove through the streets and parks and then wound away up the hills to Norton St. Philip, with its ancient George Inn, where Monmouth stayed in 1685. It is over 600 years old.

On the invitation of the Hot Mineral Baths Committee we lunched at the Grand Pump Room hotel and afterwards toured all through the bath-

ing establishment and visited the Roman baths. Above them, on the Roman promenade, we took tea with the Mayor and Mayoress of Bath.

Now from the beauties of the leafy Midlands, of "glorious" Devon and of Somerset, we plunged into the industrialism of South Wales. Leaving Bath, a run of little over an hour via the famous Severn tunnel, landed us in Cardiff. Here, as well as coal and docks, are some magnificent municipal buildings, art galleries and museums. At the first we were welcomed by the Lord Mayor, who, at the dinner given at night by local newspapers, proved to be the wittiest and brightest after dinner speaker we had yet encountered.

After lunch we went to the docks and to the great Downliss works where we saw the various processes of making steel. We were the guests of the G. W. R. and of Guest, Keen and Nettlefolds. After tea in a warehouse we mounted the flat roof of a high warehouse and thence saw the Canadian Mariner entering port with Canadian cattle on board. Coming back we inspected the various coaling appliances and went over Cardiff Castle, one home of the Marquis of Bute.

Sir William Davies, whose daughter and son-in-law live near Vancouver, presided at the dinner. He visited Canada with the Empire Press Union in 1920 and was taken ill in Vancouver. Among the musical fare at this function were some delightful solos by John Williams, bass, a National Eisteddfod prize winner. In English pronunciation "Good Health" in Welsh is "Yak-e-dah."

From Cardiff next day we went to Swansea, where an equally warm welcome awaited us. One unfortunate British Columbian, lingering with the mayor, learned what press photographers can do with masculine beauty and modesty (?). The rest of the morning went in a trip by tugs round the extensive docks. Mr. George Bulkeley, whom we met aboard, was a naval architect in Vancouver before the war. He is now traffic superintendent of the G. W. R. docks at Swansea.

Montreal and Quebec are linked to Swansea by weekly sailings of the C. G. M. and to Vancouver by monthly sailings of the same line, via Panama. The Anglo-Persian Oil refineries are located here.

The party was split up in the afternoon to visit the anthracite collieries in the Amman valley, the Mond nickel works at Clydach, the Mannesman tube works and Modern tin and steel mills. Some went also to the Gower peninsula.

At night apart from the excellent dinner, where Mr. Henry Mond, M.P., presided, the speeches and cordiality of our hosts (the Amalgamated Anthracite Collieries and the Mond Nickel Co.), the event will ever be memorable for the wonderful singing to which we were treated by the Ammanford choir, conducted by Gwilym Jones. These fifty men and women, mostly colliery employees, proved that industrialism cannot quench the fire of Welsh music. They sang in

MOVIES

Harold Lloyd's much talked of screen comedy, "Girl Shy," is to be seen at the Empress on Friday and Saturday of this week.

"Girl Shy" has all the dramatic and heart interest of "Grandma's Boy," the thrills of "Safety Last," and more laughs than any comedy ever made.

Welsh and in English, old Welsh national songs and the two best known songs of purely Canadian origin.

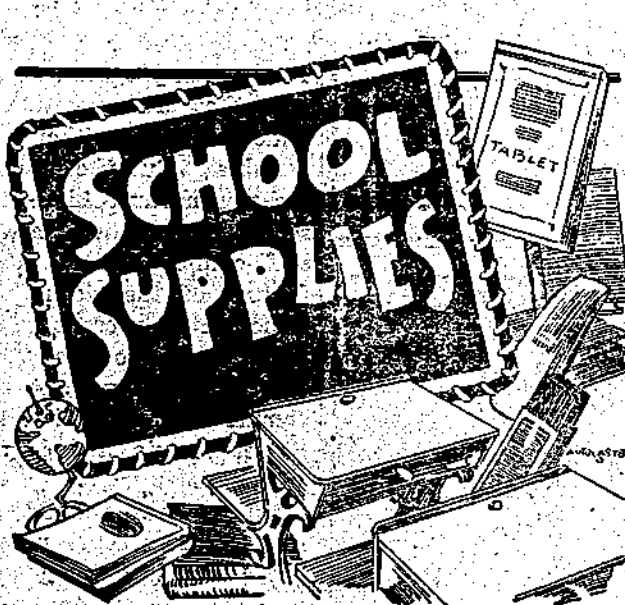

It was an early call next morning and in some rain we headed by train for Chester. Thus far the only show-ers had been at Bath. On the continent and in London the sun had smiled brightly on our pilgrimage of haste, of feasting, of sight-seeing and let us add, of self-education.

made.

The chase is the oldest form of screen comedy. It cannot be done on the stage and, since the beginning of motion pictures, we have had the chase. But all the chases ever produced put together could not provide the speed, the laughs and the thrills of "Girl Shy." It turns the trick of making you howl with glee—but there isn't a trick in it. Every stunt, every thrill, every inch of that chase is real, and in several instances the thrills were accidents and not written in the script. It will be remembered that it was in the making of this chase that Lloyd was injured when the nozzle of a fire hose hit him. It is amazing that he was injured only once!

The chase will chase everyone back to your theatre to see it again and again!

Make your hair beautiful with this shampoo

You know women whose hair is always beautiful — no matter how plainly arranged. Think for a moment and you will agree that this beauty lies altogether in softness, the healthy gleam of natural color. That is something every girl and woman can have. By simple care in shampooing. This way recommended by authorities. Now you can test it at our expense. Use an olive oil shampoo. It never leaves hair dull, brittle, dead-looking. Because it cleans mildly, yet thoroughly, each hair, down to the tiny scalp pores. Leaves scalp and hair healthily clean.

All the lovely natural lights and glints of color are brought out. Your hair is silken soft, pliant, with that lovely sheen. Use olive oil in its dainty, modern form for the hair — as blended in Palmolive Shampoo. Not the least bit oily. And it has the additional advantage of economy. Get free 15c trial bottle. Simply send coupon. And see how delightfully the first shampoo improves your hair.

SYNOPSIS OF LAND ACT AMENDMENTS

PRE-EMPTIONS
 Vacant, unreserved, surveyed Crown lands may be pre-empted by British subjects over 18 years of age, and by aliens on declaring intention to become British subjects, conditional upon residence, occupation, and improvement for agricultural purposes.

Full information concerning regulations regarding pre-emption is given in Bulletin No. 1, Land Series, "How to Pre-empt Land," copies of which can be obtained free of charge by addressing the Department of Lands, Victoria, B.C., or to any Government Agent.

Records will be granted covering only land suitable for agricultural purposes, and which is not timberland, i.e., carrying over 5,000 board feet per acre west of the Coast Range and 3,000 feet per acre east of that Range.

Applications for pre-emption are to be addressed to the Land Commissioner of the Land Recording Division, in which the land applied for is situated, and are made on printed forms, copies of which can be obtained from the Land Commissioner.

Pre-emption must be occupied for five years and improvements made to value of \$10 per acre, including clearing and cultivating at least five acres, before a Crown Grant can be received.

For more detailed information see the Bulletin "How to Pre-empt Land."

PURCHASE
 Applications are received for purchase of vacant and unreserved Crown lands, not being timberland, for agricultural purposes; minimum price of first-class (arable) land is \$5 per acre, and second-class (grazing) land \$2.50 per acre. Further information regarding purchase or lease of Crown lands is given in Bulletin No. 10, Land Series, "Purchase and Lease of Crown Lands."

Mill, factory, or industrial sites on timber land, not exceeding 40 acres, may be purchased or leased, the conditions including payment of stumpage.

HOMESITE LEASES
 Unsurveyed areas, not exceeding 20 acres, may be leased as homesites, conditional upon a dwelling being erected in the first year, title being obtainable after residence and improvement conditions are fulfilled and land has been surveyed.

LEASES
 For grazing and industrial purposes areas not exceeding 400 acres may be leased by one person or a company.

The Pedlar's Pack
 By AUTOLYCUS

Bruce Barton, in one of his common-sense editorials says, "History is a recital of millenniums that failed to materialize." He

MILLENNIUMS has in mind the long TO ORDER list of disappointments which have followed in the train of the many reforms, revolutions, social upheavals and what not that this old world has seen, and his message is one of patience. It is a good message, and one which might with great advantage be pondered by those ardent persons who can see no hope for mankind except in an absolute overturn of all existing conditions, and who appear to imagine that the overthrow can be accomplished in short order by the adoption of the particular remedy they themselves have in mind. And an additional matter for their consideration might be the question as to whether mankind can be taken in hand by any school of theorists, and trained in any certain direction as though it were a class of junior students. Mankind is made up of many diverse races, and most of these are working out their several destinies in their own way, the general trend being, on the whole, towards improvement. The idea that it is in dire need of "redemption" is in itself open to question if we accept that term in its usual sense. Evolution would be a much better expression to use, and if we accepted that as descriptive of natural human progress, we should see at once that "redemption" as generally understood, is neither necessary nor possible. But the visionary cannot see this because his eyes are focused on some millennium which he himself cannot define, the only clear feature of the vision being the destruction of present conditions as a preliminary to its consummation. This is the dominant issue in that communism which has its centre in Soviet Russia and is thence being spread throughout the world. Thus, to quote from the Communist Manifesto, partly reproduced by F. Britten Austin in a recent article, "Communists everywhere support every revolutionary movement against the existing social and political order of things. They openly declare that their ends can only be attained by the forcible overthrow of existing social conditions." These sentences are actual clauses in the official manifesto, and form part of the declaration of policy to be observed by all members of the communistic brotherhood. Mr. Austin very naturally remarks that "to the ordinary sane mind it appears pernicious nonsense," and deliberately antagonistic "to every instinct by which man has raised himself from the level of the brute beast." It is all that and more. But it is being persistently preached, and is the preliminary to one more of those millenniums which do not materialize. Fortunately for the world, there is always the mass of common-sense sanity of mankind to act as a counterbalance to wild eyed madness, and that may always be relied on to prevail in the end. In Russia this took the form of stolid refusal of the farmers to sow wheat for proletarian rulers to confiscate without pay—in Italy it developed Fascism, which knocked the communistic theory on the head without apology—in Great Britain, which is the chosen spot for the fight to a finish, the inherent good sense of the British people has long ago appraised Communism at its real value and will refuse to be stampeded. Meantime it is noting with some very excusable amusement that the communists themselves cannot agree, and are already fighting each other for supremacy. A reasonable deduction from this is that a brotherhood which is so evenly divided against itself offers very little guarantee of world stability in the promised millennium.

SWITZERLAND

Often have I seen the Austrian Tyrol,
 The afterglow fall on thy whitened dome;
 Forests covered with a purple haze,
 Bewitching,
 In Switzerland my own.

Often have I seen abysmal canyons,
 Heard avalanche descend, giants
 crash and groan;
 And heard the echo till it seemed a
 whisper,
 In Switzerland my own.

Often have I walked thy mountain
 pathways,
 Listening to the dreary woodwinds
 moan;
 Ofttimes have I longed for a companion,
 In Switzerland my own.

Ofttimes have I seen the silvery cas-
 cades,
 And watched the seething waters
 foam,
 Restless and spent like a soul in
 chaos,
 In Switzerland my own.

O, Thou art entrancing, when the
 fall comes,
 When foliage changes to hues of
 every tone,
 For a brief spell we see an earthly
 paradise,
 In Switzerland my own.

Ofttimes have I seen humanity strick-
 en,
 For a time they came-for aye-were
 then called home,
 To regain health, to alpine music
 listen,
 In Switzerland my own.

Should time or tide bear me o'er
 the water,
 To Britain's shores, Mother, friends
 and home,
 I'll not return till I've seen the land
 that haunts me,
 Switzerland my own
 P. T.

HERALDS OF THE MORN

My friend George was lately re-
 galing me with some accounts of
 his early morning callers at his cot-
 tage by
HERALDS OF THE MORN the lake.
 He said
 the series of calls began about four
 o'clock a. m. the visitor at that hour
 being an individual of the woodpeck-
 er tribe, who seemed to be obsessed
 with the idea that a shingle roof
 was a likely area for the small game
 he was seeking. "The first time the
 beggar hammered on the roof," said
 George, "I jumped up and yelled,
 "Hallow! who's there? is it a fire,
 or what? Then I turned out and
 went to the door, and just happened
 to catch sight of the knocker as he
 flew off the roof. By this time I've
 got pretty used to him and I notice
 he has gradually come later in the
 morning as the season has gone on.
 I'm still wondering whether he is

"A Snapper Up of Unconsidered Trifles."
 * * * * *
 The Winter's Tale,
 Scene II, Act IV

the scoundrel who broke up the mar-
 tins nest under the eaves one morning
 —I shouldn't be surprised, but I can't
 prove it against him." The next call-
 ers in order of time were apparently
 a brood or two of quail, which came
 in procession across the lawn regu-
 larly at about 6 a. m., the elders of
 the families audibly and querulously
 disputing as to the merits and beauties
 of their respective flocks. George
 admitted however, that he never ob-
 jected very much to these visitors,
 because he was always so fascinated by
 the "prunes and prism" style of
 their gait. And he had a kindly
 feeling for the robins, on account of
 their nerve, which he was good
 enough to remark, reminded him of
 me! Not only that, but he commen-
 ded them also as being silent workers,
 in distinguished contrast with some
 people he could name. (This with
 exaggerated indifference.) But the
 darling of his heart is a companion-
 able tree frog, which dwells in the
 leafy seclusion of the vine covering
 the porch of the house, and which
 at intervals indulges in vocal selec-
 tions of particular quality. George
 thinks that if this gentleman's voice
 could be transformed into active en-
 ergy it would be of great value as
 a rock crusher, and he has tried
 several times to get a glimpse of the
 performer, but without success. His
 specimen appears to be of a singu-
 larly retiring disposition when com-
 pared with the sociability displayed
 by other individuals of the same tribe
 according to the accounts of some
 of the neighbours. One lady assured
 him that it was nothing surprising
 for her to find one peacefully sitting
 on her pillow, while another tells
 of a group of three which displayed
 a great partiality for her washing
 machine when not in use, and con-
 stantly returned to that cool haven
 after being ejected, and gently es-
 corted to the gate. On the whole
 George thinks he prefers the coyness
 of his own specimen, and is content
 to listen to his warbling without a
 closer acquaintance.

Blow your own horn, but change
 the tune once in a while.

Common sense is the best business
 doctor the world has ever known.

PEACHLAND DOINGS
 A Weekly Chronicle Furnished
 By Our Local Representative.

Mr. Charles Kay of Vancouver has
 been visiting his father Mr. James
 Kay and sister Mrs. Wm. Dryden.
 He and Mrs. Dryden paid a visit to
 Miss Jean Dryden at Vernon.

The Scarley chapter of the local
 Orange Lodge at the adjourned meet-
 ing on Tuesday evening exalted five
 candidates to membership in the
 chapter.

Rev. T. A. Sadler and daughter,
 Mary, and son James returned on
 Wednesday after a short visit by
 motor to Penticton. They brought
 with them Masters John and David
 Cunningham, and Misses Grace and
 Louise Johnston former playmates
 of the family during their residence
 in Penticton. They visited here for
 a few days, returning home by boat.

Mr. Weitzel and son Earl, former
 Peachland residents, now of Pentic-
 ton, were in town last week, coming
 by motor. Mr. Kennedy another for-
 mer resident went back with them
 after having spent a short time here
 on one of the fire fighting crews.

A few of the musicians of the
 community got together in the G. W.
 V. A. Hall on Wednesday evening
 and had a little orchestral practise,
 getting ready for a dance which was
 held on Friday evening when a good-
 ly number of the young folks en-
 joyed the evening to the full.

The last of the fire fighting crew
 were laid off duty about the middle
 of the week.

Some of our citizens are figuring
 on spending the harvesting and
 threshing season on the prairies this
 fall, among them, Fred Topham Jr.
 who left Thursday morning. Mr.
 and Mrs. Suddaby left the same
 morning to spend a few months on the
 prairie.

Mr. J. McKinnon was in Kelowna
 a couple of days of last week in the
 interests of his case The Associated
 vs himself.

Mrs. Wm. Ashley accompanied by
 her sister, who is visiting with her,
 spent Thursday in Kelowna.

Mrs. B. F. Gilmour and young son,
 were passengers south Thursday eve-
 ning to spend the week with her pa-
 rents in Penticton.

Some improvement was effected
 during the week on the approach
 to the branch road leading from the
 main Glen Robinson road up past
 the H. H. Thompson property. Mr.
 Wm. Ashley did the work and made
 a much better turn and approach.

Miss M. Smith with Mrs. Powell
 and family spent a day last week in
 Kelowna.

Miss Francis and Master Teddy
 Clements were visitors to Kelowna
 on Friday of last week.

After several weeks spent at var-
 ious prairie points, Mrs. Mardin and
 daughter returned home Friday eve-
 ning.

T. F. McWilliams, barrister, of
 Kelowna, paid a hurried call to town
 on business on Friday afternoon.

Miss Whitman, a former resident
 and frequent visitor in town is again
 among us for a short time. She
 leaves shortly to teach at Prince
 George.

Mrs. Sadler and daughter Evelyn
 returned home on Saturday after a
 pleasant visit with Mrs. Sadler's
 mother and other members of the
 family who reside in Victoria. Mr.
 Sadler and the children met them
 with the car at West Summerland.
 They went on through to the ferry
 and picnicked there while Mr. Sadler
 made a business visit to Kelowna.

Mrs. J. L. Elliott left on Saturday
 to spend a few days with friends
 and relatives in Kelowna.

Miss Jessie Henderson stopped here
 to visit her brother Arthur and his
 wife and other friends of former
 days who lived here. She was on
 her return East after having atten-
 ded her youngest sister's wedding and
 visiting at the Coast.

Miss Ivy Wills of Kelowna is spend-
 ing a few days here with her friend
 Miss Myrtle Barber.

Mr. and Mrs. Howson of Penticton
 accompanied by Mr. and Mrs. Jan.
 Gardener of Vancouver who were en-
 joying a week's visit in Penticton
 with them, motored up on Sunday
 to spend a portion of the day with
 Mr. and Mrs. H. E. McCall and fam-
 ily. Mr. Gardener is treasurer in
 the London Life Insurance office in
 Vancouver.

Mr. and Mrs. Sam Hawthorne, of
 Okanagan Falls with their daughter
 and her husband from Oliver paid

Bee Robbing and How to Prevent It

(Experimental Farms Note).
 By A. H. W. BIRCH, Apiarist

Bees, like some people, if given the
 opportunity will steal from one an-
 other rather than work. This, how-
 ever, happens usually only in times
 of scarcity.

A robber bee is characterized by
 its nervous actions. It will fly cau-
 tiously up to the entrance of a hive,
 and when it sees a bee coming to-
 wards it, it will quickly dodge back;
 or it will search the walls of a hive
 in the hope of finding some unguard-
 ed crack through which it can crawl.
 An old offender has a shiny appear-
 ance, the result of crawling through
 cracks or being roughly handled by
 the guards. On leaving the robbed
 hive, it has a plump look and unlike
 the inmates which come out leisurely,
 it is in a hurry and takes wing with
 difficulty owing to its load.

It is the beekeeper's duty, there-
 fore, to prevent his bees acquiring
 such dishonest habits by seeing that
 no sweets are left exposed at any
 time; that all cracks and openings

NARAMATA NEWS

Mrs. Crawford of Vancouver, who
 has been staying at Mrs. Raynor's
 left on Saturday.

Mrs. Languedoc spent the weekend
 with friends in Penticton.

Mr. J. M. Robinson and Mr. Hors-
 will returned on Saturday from their
 trip to Nelson.

Mr. John McLean visited Mr. and
 Mrs. W. J. Robinson over the week-
 end.

The materials for the repair of the
 wharf were delivered on Monday and
 the work will be taken in hand im-
 mediately.

At the Union Service on Sunday
 afternoon the Rev. H. J. Armitage
 preached on the need of active be-
 lief among church workers. The an-
 them was "Seek ye the Lord"
 (Roberts) with solo by Mr. Weaver.
 Miss Alice Meyers being organist.
 Announcement was made of an An-
 glican service to be held next Sun-
 day evening being the fifth Sunday
 in the month.

Talks on Honey

From the Naramata Apiaries

A bee's sting is less than 1-32 of
 an inch long. But when plunged into
 a tender spot in the human anatomy
 it feels like a man-sized dagger.

Ordinarily bees aren't nearly so
 liable to sting as many people sup-
 pose. Stray bees, away from their
 hives, in the fields or in the house
 are almost always harmless, if let alone.
 If fought or crushed they will prob-
 ably sting in self-defense. When bees
 are swarming and on wing, or even
 if clustered on a tree, they seldom
 sting unless interfered with. In most
 of the cases where horses or persons
 have been seriously stung by swarm-
 ing bees it has happened that the
 horses fought and switched their tails
 as they passed through the swarm,
 crushing and infuriating the bees un-
 til the whole horde turned upon them.
 Under such circumstances a swarm
 of bees may become highly danger-
 ous.

A bees sting is sharp, barbed like
 a fish-hook, and filled with a poison
 which is forced into the wound made
 when it is plunged into the flesh. The
 sooner the sting is removed, the
 quicker the hurt will stop. If a bee
 stings you and leaves its sting in the
 wound, don't try to pull it out as you
 would a thorn. That only forces
 more poison in. Rub it off with the
 edge of your thumb nail, and the
 hurt will usually stop almost immed-
 iately. Beekeepers are sometimes
 stung many times a day, but rub the
 sting away so quickly that they
 scarcely bother them.

Serious results seldom follow one
 or two bee stings. In the few cases
 on record where such results have
 followed, there has been either a
 disordered general condition, or an
 overwrought nervous system, with
 exaggerated fear of the consequen-

a short visit with acquaintances in
 town on Sunday last. Mr. and Mrs.
 Hawthorne lived in Peachland for a
 time some years ago.

The Rev. and Mrs. P. A. Coad and
 family of Korameos are spending a
 portion of the week renewing old
 acquaintances of the year they spent
 in Peachland while Mr. Coad was
 stationed here in the Union Church.

"BEST STORY IN THE WORLD."
 He (the late William Paton Ker)
 told the story of the four Scotsmen,
 which he declared to be the best
 story in the world and the most
 searching test of humor. Two Scots-
 men were talking about a third. Said
 the first to the second, "He has no
 sense of humor at all. He wouldn't
 see a joke if you were to fire it at
 him out of a pistol." But," objected
 the second, "you can't fire a joke out
 of a pistol." The first Scotsman
 went away depressed, and meeting
 a fourth Scotsman, told him the sec-
 ond Scotsman's remark. The fourth
 Scotsman thought for a moment, and
 then said, with a short laugh, "Ay,
 he had ye there."—Angela Thirkell
 in "The Cornhill Magazine."

These are the days the flies are
 following the men home to have the
 screen doors opened for them.

 Mrs. J. S. Fitkin of Vancouver left on Tuesday after a stay of several weeks with Mrs. Clements at the Syndica Hotel.
 Neil Craig, of the Dominion Bank staff, left on Friday for his home at New Westminster, where he will spend his vacation.
 Mrs. Read and little child of Calgary, arrived on Saturday night and are guests of her brother, Mr. Chas. Schwass and Mrs. Schwass.
 Mr. and Mrs. J. Whittaker and two sons, of Vancouver, came in last Thursday and are guests at the home of Mr. and Mrs. W. Atkinson, Jr.
 Miss C. Matheson came in from Vancouver on Thursday last week and is the guest of her sister, Mrs. R. C. Palmer, at the Experimental Station.
 Mrs. V. M. Lockwood and Miss Mabel went up to Kelowna last Thursday to visit friends. Mr. Lockwood and Miss Thelma motored up Sunday, all returning Monday.
 Will the person who removed intentionally or by mistake, a haystack cover 16x24 from St. Andrew's hall on or about July 12th, please return same and nothing will be said. 4

In response to many requests Mrs. Rose Henderson will address a public meeting in the Rialto Theatre on Thursday, Sept. 4th, at 8 p.m. Subject, "The Significance of the Russian Revolution." All cordially invited. Collection to defray expenses. 4L
 Summerland and Penticton Odd-fellows are holding their joint annual picnic on Monday next, Labor Day, at Okanagan Falls. Cars are being provided for members and friends who have not their own means of transportation and will leave West Summerland at eight-thirty.
 Mr. and Mrs. Geo. Ross and little daughter, Helen, are visiting Mr. Ross' mother, Mrs. R. M. Ross. They arrived here Friday by motor from Victoria, where they had spent a week in the capital city's auto camp. After a short stay here, they will return to their home at Castlegar.
 Mr. W. J. Curtz accompanied by his son, came down from Kelowna on Tuesday's boat and has commenced work on the erection of a new silo for F. R. Gartrell. Mr. Curtz is an old timer in the valley having built the Jas. Gartrell house at Trout Creek, one of the first residences in the community.
 Miss Mary MacDonald and Miss Ruby Taylor of Govan, Sask., came in on Monday and after a short visit here, left on Wednesday to return east. While here Miss MacDonald was the guest of her cousin, S. A. MacDonald and Mrs. MacDonald, while Miss Taylor was the guest of Miss J. Nicholson.
 J. M. Robinson has been covering considerable territory recently accompanied by A. T. Horswill. Early last week they visited Princeton and other Karamoos centres in a canvass for support in Mr. Robinson's effort to secure nomination for the approaching by-election for Yale. Later they motored east as far as Nelson, returning for the weekend.
 Misses Sue and Jessie Whiteford and Miss Jean Marr were guests for several days of Miss Hazel Steuart and Mrs. G. Henry having come down from Okanagan Centre on Friday night. Miss Jessie Whiteford and Miss Marr, who are both nurses in training at Vancouver General Hospital, have been spending their vacation with the former's parents at Okanagan Centre.

SUMMERLAND WEATHER REPORT

Below is a report furnished by the Dominion Experimental Station here for the week ending Tuesday:

Date	Max.	Min.	Rain	Snow	Sun
Aug. 20—89	50	06	4.2
Aug. 21—78	50	6.9
Aug. 22—77	58	11.8
Aug. 23—88	50	11.2
Aug. 24—78	63	0.4
Aug. 25—77	61	0.4
Aug. 26—90	56	12.6

Miss Murray, who was the guest for a week of Mr. and Mrs. Ben Mayne, left on Tuesday to return to the Coast.

Carleton Clay has been appointed principal of the school at Blackburn the mining town near Coalmont. He taught there the latter part of last term and having been promised an assistant, he has decided to accept the board's offer of re-engagement.

Announcement was recently made in Coast papers of the marriage on Tuesday, August 26th, of Freda Eloise, third daughter of Mr. and Mrs. G. W. Slade of South Vancouver to Victor G. Wilbee, third son of Mr. and Mrs. A. F. Wilbee also of Vancouver. Miss Slade spent several summers in Summerland and has many friends here.

PHILLIPS-WELLS

The marriage took place last week in Calgary of Miss Kathleen Wells, recently of England, and Mr. J. Phillips of the Summerland Experimental Station. Mr. and Mrs. Phillips arrived in Summerland on Friday night's boat, and were guests that evening at a wedding reception given by Mr. and Mrs. Percy Foster. They will make their home at the Experimental Station.

A CORRECTION

We have been asked to make a slight correction of an item appearing last week in our Naramata columns reporting a farewell tendered Mr. and Mrs. Manchester previous

Silence That Is Not Golden

The merchant who fails to "speak up" lets a lot of golden sales slip past his store. This lost business goes either to his competitor down street or, by the mail order route, to the big city stores.

People are often surprised to find that the goods they bought "unsight unseen" from a catalogue can be seen and examined in the local store!

Tell your buying public what you have. ADVERTISING in "The Review" will invite the whole community to your store. And—

Most Folks Shop Where They Are Invited to Shop

Issued by Canadian Weekly Newspaper Assoc.

RECIPES

Orange Float
 One quart water, juice of two lemons, 1 cup sugar, 4 tablespoons corn-starch, oranges. Boil the water, lemon juice and sugar. While boiling add the corn starch and boil for 15 minutes. When cool pour over five sliced oranges. Spread meringue over the top.

Tomato Piquante Salad
 Arrange a bed of white lettuce leaves on a round salad dish. Arrange four tomatoes thickly sliced on the lettuce. Cover each tomato with one teaspoonful of grated yellow cheese and put one teaspoon of stiff mayonnaise in the middle of each, topped with an olive. Strips of sliced cucumber, thoroughly chilled, are used as a garnish.

During the day the man who wins through is too busy to worry and at night he is too tired.

Three medium sized apples weigh about a pound.

to their departure for the south. This gathering was arranged jointly by the three organizations, the Unity Club, Women's Institute and the Board of Trade, the presentation given Mrs. Manchester by the Institute being a sum of money. Mrs. Manchester has served for four years as secretary of the Unity Club and has held the position of librarian for the Institute for the same period.

With school less than a week away, these next few days will be busy ones for mothers. Won't you come in and give us the opportunity to assist you?

SHORT FRUIT CROP IN N.-WEST STATES

A short crop of nearly all kinds of fruit in the state is the prediction of Charles L. Robinson, supervisor of horticulture in the state department, according to a Coast report.

The State apple crop he now puts at 24,300 cars, against 37,500 for last year; 26,500 for 1922 and 32,400 for 1921. The pear crop is put at 2500 cars, compared with nearly 3800 for last year. Peaches will total about 900 cars, against 1600 last year. Prunes and plums are estimated at 250 cars, compared with 813 last season.

The report predicts a heavy potato yield for Idaho. The tubers will be more uniform this year, they will be larger and they are set 12 to 14 to the hill, where last year the set was 4 to 6 to the hill.

A special apple grade for this season to admit frost-marked apples for packing is recommended by a committee appointed by the Wenatchee Valley Traffic association. The recommendation would allow the shipping of frost-marked apples as such, provided the mark did not exceed one and a half inches in diameter.—Spokesman-Review.

WAGENHAUSER BUYS PRINCETON STORE

W. A. Wagenhauser, owner and operator for several years of the Penticton Departmental Stores, has purchased the business of A. E. Howse & Company, Limited, Princeton. Mr. Howse is one of the oldest and best known merchants of the Interior, coming to this province from Ontario in 1877. He hiked over the Hope trail packing his blankets, and settled at Nicola. Until 1882 he was Indian agent, covering in this capacity the lower Okanagan.

In that year, he opened a little store at Nicola and later extended his operations to Merritt and Princeton, the latter store being opened in 1898. Mr. Howse remained in charge of his Nicola and Merritt stores until a few years ago, when he moved to Princeton, and assumed management there. He has been prominent in many lines of endeavor, including sawmills, flour mills and mining.

CHEAPER PACKAGES NEEDED

Princeton Star.—People in Princeton are at a loss to understand why fruit and vegetables are so high-priced here while the growers in the lower valley receive such small returns for their produce. For instance the contract price for tomatoes with the cannery is \$19 per ton, slightly less than one cent per pound, while in Princeton they sell at 3 lb. for 25c.

The reason is largely due to unnecessary expense in packing and containers for the fruit. It is like dining in a swell hotel where the meal costs two bits and the service six bits. Eliminate the fussing and let us have produce at moderate prices and a vastly greater quantity will be consumed. During the week we saw corn unloaded at the station here that had been packed in expensive fruit boxes. The package probably cost the rancher more than it did to produce the ears of corn.

THE SCOUT MOVEMENT

SIR R. Baden Powell and his Four-fold Object. The boy scouts and girl guides organizations were discussed in their many respects at the World's Sunday School Convention at Glasgow yesterday, says the London Observer of June 22.

Speaking at the St. Andrew's Hall, Lieut.-General Robert Baden Powell says inquiries had resulted in the conclusion that eighty per cent of our men are not religious. Even the remainder did not carry out the christianity which they professed. Selfishness, instead of selflessness, was at the root of our troubles today—selfishness of class against class, party against party, between employer and employed, and between the rich and the poor. There was continual fighting for self-interest, and that was what they were out to combat. (Cheers.)

At the same time there was kindness in the hearts of the people, and the right way of bringing it out was what we were still looking for.

The fourfold object of the scout movement was the stimulation of character, handicraft, and physical health. All three went together, and the fourth was to harness those three points of efficiency to the service of others of the community. Religion could be caught, not taught. They did not try to make the children to be good, but to do good. One of our scoutmasters, a clergyman, has called it applied christianity.

Fire is never out until it is dead. Smother out every spark with water or mineral soil before leaving it.

KNOW YOUR ENEMIES
 PREPARED BY
 EXTENSION SERVICE - STATE COLLEGE OF WASHINGTON
 COOPERATING WITH THIS PAPER

Ruin and extinction stares us in the face if bugville controls our future. Should all the insects, fungi, bugs, worms and the like combine forces and start siege on the fruits, vegetables, grains and foods of the human race, what a time we would have to exist. We often think of how to keep the lice off the cabbage and the worms out of the radishes, but have we ever thought of them as enemies to the human race?

Food we must have in order to remain on the land of the living; and food these insects and others must have to exist, so it comes to a real battle for the survival of the best. These are our enemies. When the garden, the orchard or the flock is started, then the fight

begins against our enemies. Spring time sounds the battle call for the home gardeners and farmers. It also sounds the call for our enemies to awake and begin to multiply and gather their food.

Did you ever stop to think what would happen if the diseases and bugs would join forces and attack the potato crop? As it is, without a definite uniting they get away with 1,600,000 bushels of potatoes out of the 8,700,000 raised in the state of Washington annually. If these enemies had sense enough to unite we would go without potatoes on our tables next winter.

It is the purpose of this series to tell of some of our most common enemies and give the remedies by

TAKING CARE OF THE HONEY CROP.

Honey is a perishable article no matter whether it is left in the comb or extracted. With care it can be kept in good condition for long periods, especially in the extracted form. Nectar, as stored by the bees, contains a high percentage of water, which must be evaporated before the honey can be extracted. When the cells are filled and the right amount of evaporation has taken place, the honey is sealed over and is then considered to be "ripe". It is not advisable to extract honey until at

least three-fourths of the cells are capped, especially in regions where the honey is inclined to be rather thin. Comb honey should be left on the hives until all the cells containing honey are sealed but should not be left on any longer than this or the sections are likely to become travel stained.

The honey should be extracted as soon as possible after the supers are removed from the hives and if done while still warm, more honey will be taken from the combs. After the honey is extracted it must be strained to remove all foreign matter. Straining may be done through fine cheesecloth or by letting the honey stand in tanks for two or three days, when all foreign matter will have risen to the surface. If the honey is well ripened, it should be placed in the final containers at once, before it starts to granulate, but if it is too thin it should be left in the

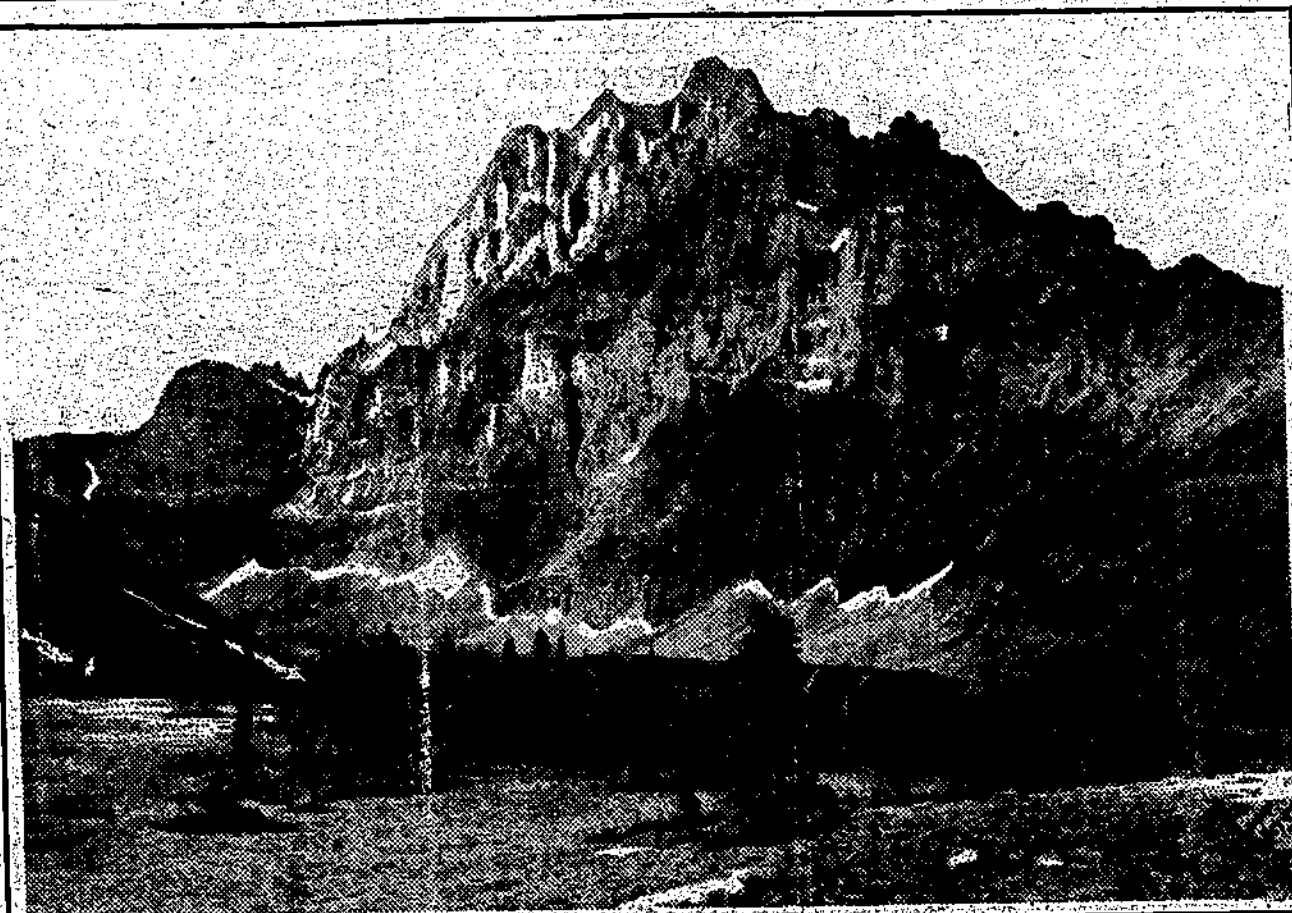

tanks a short time for further ripening. Honey should be stored in a dry place, as it readily absorbs moisture from a damp atmosphere. Honey ripening in tanks should stand in a warm, dry room. Ripened honey in containers ready for market will keep better in a cold, dry place. Section honey should be stored in a well-ventilated room where the temperature is high and constant or moisture will condense on the cappings and be absorbed.

MOUNT GEIKIE CONQUERED BY CANADIANS

Two Canadians goes the honor of being the first to set foot on the top of Mount Geikie, 10,854 feet in altitude and the highest peak in the Ranges of Jasper National Park, along the main line of the Canadian National Railways. The party, composed of J. R. Wates, of Edmonton, Malcolm D. Geddes, of Calgary, and Val E. Fynn, of St. Louis, made their first ascent of Barbican Peak on July 12, and finding the passage too difficult there decided to return and attempt the southeast side, which route had been unsuccessfully attempted in 1922 by Mr. Wates and Dr. Bulger, of Edmonton. In that year Wates and Bulger got within 300 feet of the summit when they were compelled to turn back.

Two days later Wates, Geddes and Fynn left camp at 2.30 in the morning and climbed a steep snow gully and up rock chimneys and cracks, one of which led the climbers into the heart of the mountain, finally emerging like a tunnel on the north face with a drop of over 800 feet to the Tonquin Valley below. After reaching the altitude where they had been in 1922 the party traversed a narrow ledge encircling the south side of the mountain and reached the top at four o'clock in the afternoon. In doing so they faced a difficult and dangerous rock climb, having to overcome rotten rock and falling stones at many points.

The party descended by moonlight, reaching their camp at 4.30 on the morning of July 15, exhausted but happy over their success.

Other parties are attempting to climb Mount Geikie this summer, but the honor of first reaching the summit must go to Wates, who has just successfully completed his third attempt. Another party, headed by Dr. Thorrington, noted American climber, was attempting the ascent with guide Conrad Kain, when they saw the Wates party at the top and turned back.

SPECIALISTS AT EX. FARM TODAY

Members of the Northwestern Association of Horticulturists, Entomologists and Plant Pathologists, who have been in convention in Penticton since Tuesday morning are holding the afternoon and evening sessions today at the Summerland Experimental Station.

Lunching at the Farm, the afternoon program, which commenced at 1:30 o'clock, included an outline of the Dominion Experimental Farm System, by E. S. Archibald, Director of Dominion Experimental Farms, Ottawa, followed by a visit to the different departments of the station, while in the evening unfinished business will receive the attention of the directors and a social gathering enjoyed.

Attending these meetings are the leading scientists, field men and research workers in horticulture and agriculture of B. C. and the western States, who will tomorrow enjoy an excursion through the fruit growing districts of the valley, conducted by the officials of the Dominion and Provincial departments of agriculture.

Chorfulness may sometimes be difficult, but it always pays dividends.

To Parents

The fall school term opens on the 2nd of September and we would like to be the means of saving you a few dollars.

We are cleaning out our entire stock of Boots and Shoes regardless of any profit and now would be a good time to get the children fitted out before they start to school.

We would be pleased to have you call and inspect our stock and be convinced that we can save you money.
