The Summerland Review

Devoted to the Interests of Summerland, Peachland and Naramata

Volume 17, Number 18

SUMMERLAND, B. C., THURSDAY, DECEMBER 4, 1924.

\$2.50, Payable in Advance

Hospital Society To Launch Drive For Funds To Maintain Institution

Annual Contribution Toward Operating Costs Now Necessary.

GOVERNMENT GRANT IS INADEQUATE

Membership Card Issued on Payment of One Dollar.

That the hospital will be compelled reluctantly to close its doors, unless other help than patients' fees is received, is the conclusion arrived at by the board of directors of the Summerland hospital after going thoroughly into the affairs of the society.

For some time the matter has had the consideration of the board, who have been endeavoring to carry on, in spite of the fact that overhead expenses monthly are not met by the patients for treatment, the average number for the current year being slightly over fifty per cent of that required to meet expenditure.

As an example, and for the information of the general public whom the directors believe are very interested, a summary of the six months operations from April 1 to September 30, 1924, has been taken out with the result that while the earnings amounted to \$3,613.42, the expenditures for the same time totalled \$4,632.17, and this at a time when the utmost economy was practised in every department.

Prompt payment by patients has not been made, and although considering the financial conditions of the Valley a creditable proportion has come in, the situation is aggravated that much more, in addition to which, the hospital is compelled, in order to obtain payment of the government grant (in itself a mere pittance) to accept every applicant for admission without regard to whether such applicant is financially in a position to pay for treatment.

With the idea of enlisting the active sympathy and support of the citizens, whom the directors think would not welcome the suggestion to close the institution, it has been suggested that a campaign be inaugurated to be carried out during the second week in December (which it is also suggested should be made and known as hospital week every year) when a complete canvass of the municipality will be made to collect the sum of one dollar from every adult person. Of course, a larger contribution would be appreciated.

Organization is being completed for the carrying out of such a campaign, which will start on the 5th of December and Summerland is asked to rise to the occasion and either send in their subscription to the so-

WAS PIONEER OF NORTH OKANAGAN

Mrs. Wm. Middleton, one of the pioneers of the Okanagan, died at her home near Vernon last week. She was in her 74th year.

The late Mrs. Middleton was born in Aberdeen, Scotland in 1850 and was married in 1876. In 1892 Mr. and Mrs. Middleton and family came to the Okanagan and for two years resided on the Coldstream ranch, after which Mr. Middleton purchased land from the Coldstream and has engaged in farming ever since.

Mrs. Middleton is survived by her husband and four children, Morrice A. of Vernon, William S. of Vancouver and two daughters, Mrs. F. Godwin and Mrs. R. M. Richards, both of Vernon.

BANK GOING TO APPEAL COURT

Pink Note Case Not Finally Settled—Will Defend to Highest Court.

That the Dominion Bank will appeal the "pink note" case heard in supreme court in Vancouver last week to the appeal court is the opinion of K. M. Elliott, who returned from Vancouver Friday morning. Mr. Elliott was counsel for the "pink note" holders who won in the first round in the fight put up by the bank to have its claim against the O.U.G. given preference against the holders of the notes issued by the O.U.G. to growers and locals.

If by any chance the appeal court should reverse the decision of the supreme court of British Columbia, the trustee, M. G. Wilson, and the inspectors of the O.U.G. in liquidation will take the case to the supreme court in Canada, the last court of appeal in a case of this kind.

Costs in this case were assessed against the Dominion Bank for all three parties called, namely, the trustee of the estate of the O. U. G. Limited, the liquidator of the Summerland Fruit Union and Lord Woolavington. It was the opinion of the court that the bank should not have called this case.

Rocky Mountain whitefish are being taken from Okanagan Lake in unusual quantities this fall. This excellent fish, which lives in deep water, comes to rocky spots along the shore at this season of the year for spawning. Many good catches have been made at points along the shore north of Crosecent Beach.

Secretary, P. E. Knowles, West Summerland, or hand it to the canvasser who calls during that week.

A payment of one dollar or more entitles one to membership in the Hospital Society and membership cards will be given to all such contributors.

VERNON FRUIT UNION PAYS FOR EARLY FRUIT

Vernon Fruit Union has settled with members for early apples at the following prices:

Wealthy, fancy, large, .58%; fancy medium, .72%; fancy small, .53; fancy and C, .63; crates, .49; bulk, \$28.75 per ton. Main early, fancy, .63; fancy and C, .53; crates, .48. Wismer's Dessert, fancy, .58; fancy and C, .48; crates, .33.

Jeffrey, fancy, .58; crates, .33; bulk \$17 per ton.

Gravenstein, fancy large, .58; fancy, medium, .73; fancy small, .58; crates, .46.

The usual capital deductions are made from these prices.

IMPROVING ITS WATER SYSTEM

Trout Creek Water Community Finances Work From Revenue.

Trout Creek water community is putting in 2,200 lineal feet of new fluming on the southern section of the community irrigation system. This new section of fluming will run from a point a short distance east of the farm bridge to about half way across the Harold Smith property, going through the Morgan and John Embree lots and connecting up two new sections.

The new flume will have a greater capacity than the old and will be large enough to take care of all the land that can come under it.

This completes the construction work on that section of the community system.

The cost will run between \$800 and \$900 and is being paid for out of funds in the treasury of the water community.

Oliver Smith is in charge of construction and all the work is being done by residents.

MAY SUPPLY C. P. R. WITH SW. POTATOES

Dining Car Service Now Making Test of Peachland Sweet Tubers.

(By our resident correspondent.)

Mr. H. H. Thompson returned on Sunday last from a visit to Vancouver. He reports a very pleasant visit and trip. The outward journey was somewhat delayed owing to the train being held up for eleven hours because of the wreck, many of his fellow passengers having been in the wreck. The provincial potato show in Vancouver, at which the department of agriculture had a display of his sweet potatoes, was one of the reasons for Mr. Thompson's visit to the city. These tubers were turned over to the dining service of the C.P.R. for tests, which if satisfactory, will mean the regular supplying of this product by Mr. Thompson for use on the C. P. R. diners. While in the city, Mr. Thompson accidentally ran across a cousin he had not seen for seventeen years.

The long looked for saw mill deal has been completed and a partnership of three persons has purchased the mill as it stands. They are now moving up and expect to start operations at once. The mill will be operated under the former name, The Peachland Lumber Company, the following being the members of the partnership: J. A. Lindahl, S. R. Ling and N. E. Lindahl.

Charlie Shuttleworth, well known cougar hunter, passed through Peachland this week intending to camp at the Elliott cabin beyond Deep Creek and take up the trail of cougar which trail was reported to have been seen recently.

Mr. George Keyes motored to Kelowna last week and is remaining there for a time to put a building up for Mr. Geo. Barber, who with his family spent the summer in Peachland.

(Continued on back page)

SCHOOL BOARD EFFECTS SAVING IN SALARIES

Teaching Staff Reduced and Overflow Brought Back To Central.

By a re-arrangement in classes the Summerland school board hopes to save the cost of a salary of one teacher and the additional expense of maintaining a room for one of the central school classes in the old high school building. The board has had the change under advisement for some time and at a special meeting held last Friday night, attended by Principal MacDonald, he was asked to re-arrange the school at the end of the term so as to effect the change.

At present H. W. Daniel has a class in the old high school building and by reducing the staff by one teacher, these pupils can be brought back to the main building.

As Miss Merle Smith is the newest member of the teaching staff, it fell to her to receive notice that her services would not be required after the end of the present term.

It is understood that comments of Dr. Putnam of the educational survey commission and the fact that several children have left town during the term are the reasons for the board's decision.

OCCIDENTAL MAKES ANOTHER PAYMENT

Issues Statements to Growers With Price on Basis of Pound.

Occidental Fruit Company paid Summerland growers shipping through their warehouse here for plums, early apples and crabapples at the following prices:

Plums, No. 1, 3.6 cents per pound; No. 2, 2.7 cents. Gravenstein apples, wrapped, 2.75 cents and crates, 2.2 cents. Kings, wrapped, 2.5 cents; crates, 2.25 cents. Wealthies, E.F. 2.75 cents; fancy, 2.25 cents; C grade and crates, 2.1 cents. But a very limited quantity of extra fancy were packed. Elberta peaches, No. 1, 5.3 cents; No. 2, 4 cents; Crawford, No. 1, 5.3 cents; No. 2, 4 cents. Hyslop crabs, E.F., 2.5 cents; fancy, 2.33 cents.

ARM BROKEN BY STRIKE FROM HORSE

As the result of a kick from his horse, while bringing it in from the orchard, W. H. F. Welsh suffered a broken arm on Wednesday. The horse, which he was leading, became excited and in jumping about struck Mr. Welsh between the elbow and wrist on the right arm, breaking a bone. Though it was fortunately only a clean break, Mr. Welsh will be laid off for several weeks.

MUST LIVE UP TO CONTRACT

Private Bills Committee Recommends Passing Bill Validating Contracts.

Associated Growers of B.C., Ltd., are likely to be given the required legislation to strengthen any points in their contract form which might be open to attack. The much discussed bill was before the private bills committee of the legislature last Friday and, after full consideration, the committee decided to recommend to the legislature that the bill be passed by the house. It is likely to come before the legislature today for second reading.

ELECTIONS IN DECEMBER FOR TWO YEAR TERM

Holding municipal elections in December instead of January and electing councillors and aldermen for a two year term will be recommended to the House by the municipal committee of the legislature along with other proposed drastic changes in the Municipal Act.

CO-OPERATIVE HOLDS ABOUT 30 CARS APPLES

Apples have been moving out slowly from the Summerland Co-operative storage building during the last week or two. The market has been somewhat easy and the apples are being held awaiting firmer prices. There remain in the storage building about forty carloads of apples, made up mostly of Yellow Newtown, Winesap, Stayman, Spitz and Rome Beauty, with a smaller quantity of other varieties.

Kelowna Growers' Exchange has distributed to its members to date approximately \$300,000 on the 1924 crop. Financial conditions in the town and district are benefitting accordingly, says the Kelowna Courier.

U.S. RAILWAYS SUING O. U. G.

Claim for Payment for Short Charges for 1921 Icing.

Action has been taken against the trustee of the estate of the O.U.G. Limited in the supreme court by the Illinois Central Railway. The action, which is a test case affecting claims of other railways as well, is for the purpose of obtaining payment for alleged undercharges for icing services in 1921, amounting, in the total of all railway claims to about \$3,000 and is an appeal against Mr. Wilson's decision that the railways have no claim.

The trustee takes the ground that he has no means of collecting from the parties who should have paid these charges and that, after waiting a sufficient period, proceeds of the estate were distributed.

This case will be heard on Monday in Vancouver.

MORE DELAY IN IMPROVING STREET LIGHTS

Long Awaited Transformer Arrives—But Oil is Missing.

If there has ever been a case of bungling with respect to public utilities in Summerland, it has been that of the street lighting service. It is many, many months since the transformer for the street lighting circuits, and reported to be unsatisfactory from the first, burned out. Months actually elapsed before the council succeeded in getting the Canadian General Electric to agree to replace the transformer and then only after the council agreed to pay one hundred dollars for its replacement.

The new transformer arrived last Friday but lacking a very essential ingredient. These transformers, the mechanism of which is placed in a heavy cast iron case, are nearly filled with a special grade or quality of oil, called transformer oil. This is primarily for the purpose of preventing any overheating and also acts as an insulation against short-circuiting between parts. The new transformer arrived from Toronto minus the oil. T. P. Thornber, municipal electrician, immediately advised the Vancouver branch of the C.G.E. of what he terms the gross carelessness of the factory, as he states it was plainly stipulated in the agreement that the company would supply the necessary transformer oil. As the manufacturers are guaranteeing the new transformer, it is up to them to decide the kind and quality of oil to be used.

A Moyes went down to Vancouver last week where he attended the annual potato fair. He and Mr. King of Kelowna were delegated to interview Dr. Warnock, deputy minister of agriculture, on the subject of the government taking over and operating the seed cleaning plant now operated by the United Seed Growers, Limited, of which Mr. Moyes is secretary.

Appeal Court Decision Will Directly Affect All O.U.G. Grower Creditors

ROAD WORK LIGHT SINCE JUNE ELECTION

Expenditures on roads in South Okanagan dropped from \$16,000 in June, the month of the election, to \$1,400 in July. This information was brought out by questions asked the minister of public works by J. W. Jones, M.L.A. Dr. Sutherland's figures covering roadwork in South Okanagan for the months March to October inclusive, were: March, \$3,581.04; April, \$6,641.41; May, \$11,798.35; June, \$15,958.35; July, \$1,414.52; August, \$2,046.74; September, \$1,383.53; October, \$1,820.41.

Relatively larger expenditures were made on roads in North Okanagan but they dropped from \$22,625.35 in June to \$6,898.88 in July and \$2,672.28 in September.

GIVEN ADDRESS FROM CITIZENS

Words of Appreciation of Dr. F. W. Andrew and His Wife.

Accompanying the presentation made last week to Dr. and Mrs. F. W. Andrew on behalf of some four hundred and fifty citizens, was the following address, read by Mrs. H. A. Solly. Details of the presentation were given in the last number of The Review.

"To Dr. and Mrs. Andrew: Knowing that you are today celebrating the fifteenth anniversary of your wedding, your many friends and admirers in the district considered that the occasion would be a fitting one upon which to convey to you some mark of appreciation of your services as citizens, and you, doctor, as a medical practitioner.

Since coming to Summerland over sixteen years ago, you have both identified yourselves with every movement which promised the advancement and welfare of the new district.

Your presence on all public bodies lent additional strength in the carrying out of the task in hand; and at no time have either of you been known to hesitate to lend your assistance when the need and aims of your community were the issue. The work of you, Mrs. Andrew, on hospital auxiliaries, the Women's Institute and in such circles has indeed been praiseworthy and your abounding cheerfulness on all occasions has been an inspiration to your friends and associates alike.

As a physician, doctor, you have especially endeavored yourself to all classes. Your work, both in the ward and in the home has been continuously marked with an unusual degree of altnability, precision and commiseration; and on numerous occasions when your skill has been put to severe test, produced added proof of your reputation as a surgeon. Attention to your patients has ever been

Trustee Appealing Against Ruling of Spring Assizes at Vernon.

IS QUESTION OF CONTRA ACCOUNTS

Mr. Wilson Would Offset Accounts of Summerland Union and O.U.G.

Trustee and inspectors of the O. U. G. are appealing against the decision of Mr. Justice Morrison at the spring assizes, Vernon, when he ruled that the trustee of the O.U.G., Ltd., in bankruptcy could not offset the debt of the Summerland Fruit Union to the O.U.G. in the sum of \$20,000 for boxes, nails and paper, against the fruit returns payable by the O.U.G. to the Summerland Fruit Union.

The case comes before the appeal court in Vancouver tomorrow.

The Dominion Bank is claiming the fruit returns on the ground that the accounts of the Summerland Fruit Union had been assigned to the bank and that the debt of the Summerland Fruit Union could not be offset against the fruit returns.

Should the appeal court reverse the decision of Justice Morrison and uphold that of Mr. Wilson, trustee for the O. U. G., the holders of "pink notes" issued by the O.U.G. will be placed in a very much better position as the estate will be required to pay over only about \$12,000 instead of \$32,000.

NARAMATA WOMEN ELECT OFFICERS

Naramata Women's Institute held its regular monthly meeting in the Unity Club on Tuesday afternoon. The principal business was the receiving of reports for the year and the election of officers for the coming season. The accounts showed a cash balance of \$73 with all liabilities paid, and the report indicated much work done, including the management of the May Day pageant, exhibition of school work, entertainment for crippled children fund, etc. The officers for 1925 are as follows: president, Mrs. W. J. Robinson; vice-president, Mrs. A. T. Horswill; secretary, Mrs. H. P. Stallard; directors, Mrs. Morrison and Mrs. D. O. Hughes. An expression of appreciation to the retiring officers was warmly supported by the meeting.

your primary consideration; and the unflinching zeal you have displayed in all seasons, during storm and sunshine, in darkness and daylight, have constituted in you the many qualities of heart and hand that make you an honor to the great profession to which you belong.

In asking you to accept the accompanying gift, you will do so, not for its intrinsic value, but simply as an expression of the very high regard in which you are both held throughout the entire community."

Three Thousand Automobiles Visit Valley During Season

Approximately three thousand foreign cars visited Kelowna during the season 1924, according to a report submitted by W. Crawford to the Kelowna board of trade. Mr. Crawford is in charge of the Kelowna tourist park and acted as tourist guide.

This means that practically that number of cars passed through Summerland, many of them stopping at the local tourist park. As there is no caretaker here nor other means of registering the number of visitors, the number of cars that parked here is not known.

Mr. Crawford reports that the tourist business increased this year by more than 100 per cent as compared with 1923. Nearly every state in the American union and nearly

every province in Canada was represented.

"How valuable an asset to B.C. and communities is the tourist traffic," says Mr. Crawford in his report, "has been strikingly impressed on everyone who is acquainted with the extent of that class of traffic. In each car there was an average of three persons and I consider ten dollars a conservative estimate of the amount spent per motor in the city."

Tourist business throughout Canada has been remarkably productive this year and it is estimated that its total value for the Dominion will exceed \$100,000,000. This places the tourist traffic high among Canada's industries.

Brings Down Four Cougars Hunter Returns For Others

Chas. Shuttleworth, Okanagan Falls, makes cougar hunting a profession. He is certainly an expert and his services are in demand on the Washington side of the line as well as throughout southern B.C.

Starting in at Thirk on the K. V. R. west of here, he travelled through to Peachland and passed through here a few days ago on his way home with the skins of four cougars. Two of the animals measured over seven and a half feet in length and the other two about six feet. He has been paid a bounty of forty dollars each on the four animals. Shuttleworth is employed by the Game Conservation Board and is doing much to rid the hills of these destructive animals. While tracking these cougars, he came across the carcasses of seven deer and two por-

cupine which they had destroyed.

While following the trail of one cougar which he had come across about 10 miles west of Peachland, he came across the tracks of three more. He followed the whole pack for another day before finding any of the big cats, when he tread two of them, one of which he killed with one shot, the other requiring three to bring down. It was another whole day before he caught up with the remaining two, which he found feeding upon another carcass. They were tread with the aid of his dog and despatched with three shots.

There was about sixteen inches of snow on the ground which made his work more difficult.

Shuttleworth returned this week to the hills back of Peachland to hunt other cougars reported to be there.

The Summerland Review

Established August, 1908.
Published at Summerland, B.C., every Thursday by
THE REVIEW PUBLISHING COMPANY, LIMITED
Ralph E. White, Editor and Manager
An independent family newspaper covering Peachland, Summerland and
Naramata and adjacent districts.

Member of Canadian Weekly Newspapers Association.
Member of British Columbia Selected Weeklies.

Subscription Rates—In British Empire, in advance, \$2.50 per year; six months, \$1.40. To U.S.A. and other countries, \$3.00 per year.

Advertising Rate Cards and information respecting territory and samples of paper mailed upon request, or may be seen at the office of any advertising agency recognized by the Canadian Press Association.

Advertisers must have copy in by Tuesday noon in order to insure changes for standing advertisements. New display advertising copy can be accepted one day later.

Correspondence—Letters addressed to the Editor and intended for publication must be short and legibly written on one side of the paper only. The longer an article, the shorter its chance of insertion. All communications must bear the name of the writer, not necessarily for publication. The publication or rejection of articles is a matter entirely in the discretion of the Editor. No responsibility is assumed by the paper for the opinions expressed by correspondents.

Typographical Errors—In the event of a typographical error, advertising goods at less than the proper price, the newspaper will furnish letters to be posted in the store stating the correct price, but goods may not be sold at the price printed and the difference charged to the newspaper.

Thursday, December 4, 1924

OUR HOSPITAL.

There are certain institutions essential to the life and progress of every community — schools, churches, hospital, stores, newspaper are all fundamental units in the make-up of any town that would attract and hold citizens.

Under existing methods of financing, hospitals throughout the whole province are having a hard struggle to carry on. In comparison with most of the others Summerland's hospital has maintained an excellent record but until there is some permanent improvement in methods of financing our hospitals — either by enlarged government grants or otherwise — responsibility of making up the annual deficit falls upon the citizens.

A contribution of this kind is not money wasted. It is a form of health insurance. The institution is there ready to give each and every one proper care in time of sickness or accident. One never knows when he or one of his family or a friend may need its services and need it so badly that without it life could not be maintained.

Twenty-five cents a month from each citizen would be cheap insurance and yet ample to make up the hospital deficit.

TRANS-PACIFIC APPLE MARKETS.

— Australia —

Canadian apples have been barred out of the Australian market for several years. The reason given by the Australian authorities is the fear of the introduction of fire blight. An effort is now being made to have the embargo lifted, as it is claimed by experts here that the danger of fire blight being conveyed to Australian ranches is remote in the extreme. As a matter of fact there is very little of this disease to be found throughout British Columbia.

The seasons of the two countries being reversed, there should be a good market in Australia for two or three months in the year for British Columbia apples. We would, of course, have to be prepared to admit Australian apples on the same terms, but they would come on to our market in the late spring and early summer.

— New Zealand —

In view of the efforts being made to have the Australian market re-opened for Canadian apples, the recent published statement of a New Zealand visitor is interesting.

Thos. Clarkson, of New Zealand, made the statement to Premier King a few days ago that there was a wonderful market for Canadian fruit in his country. Although New Zealanders would prefer to buy Canadian apples, they had only United States apples offered them.

Apples have been shipped from here and other points in the Okanagan to New Zealand this fall and will alter the situation somewhat. Nevertheless, the total shipments from British Columbia to New Zealand probably would be a small item in the total imports. While seeking to get on to the Australian market it might be well to further develop the New Zealand market, which apparently wants more of our fruit.

— China —

China as a market for British Columbia apples has scarcely been touched. Within a few years our sales there will have greatly expanded if our exporters go after this business.

— Japan —

Like Australia, Japan has placed an embargo on Canadian apples. For the past three years we have been excluded from that market. Yet we are big buyers of Japanese oranges. A half million boxes of that fruit came into western Canada through Vancouver last year. Without doubt they adversely affected the home market for our apples. This should be pointed out to the Japanese authorities and whatever pressure can be applied should be used to have that market opened to our apples.

NEW MOTOR REGULATIONS.

Several amendments made to the government's proposed legislation with respect to the Motor Act which have been made since the bill was introduced in the House, will receive general approval and will do much to remove unfair features of the original bill.

Separate motor courts will not be established as was first proposed. Motor fines will be turned over to the municipalities, instead of going to the province. As the municipalities bear

the expense of maintaining police courts, this decision is no more than just.

Each motor driver will be required to take out a license. This will cost a dollar but will last a lifetime. As a check against infringement of regulations and a protection to traffic, colored license cards will be used. A white license will be issued to each licensee. It is proposed by the attorney-general that this shall be suspended on the first offence against motor laws and a blue card substituted. On the second offence the driver will be given a red card. When he has proven, by six months' good behavior; that he intends to obey the law, the driver's white card will be returned to him.

VALUABLE TO GROWERS.

"Diseases and pests of cultivated plants" is the title of a valuable booklet just off the government presses at Victoria and which is being circulated as "Bulletin No. 68," second edition.

The articles are prepared by J. W. Eastham, B.Sc., plant pathologist, and Max Ruhmann, assistant entomologist. The booklet also contains a valuable article on sprays and spraying by B. Hoy B.S.A., assistant district horticulturist, stationed at Kelowna.

Every grower of fruits and vegetables in this district should obtain and read a copy of this publication, which can be had by writing the department of agriculture at Victoria and asking for Bulletin No. 68, second edition.

"O.K. APPLE DAY."

Calgary Herald: The Associated Growers of British Columbia have again donated all the apples required for Apple Day. This will be "O.K. Apple Day," the proceeds to go to the Sunshine Society. The Rotary Club has made this an annual fixture. Mr. Hal. Morgan negotiated the arrangements, and the Rotarians will do the work, as in past years. This is one of the most popular methods of raising money for a good cause that is adopted by any organization in the course of the year. Last year the Rotarians contributed \$1,500 to Sunshine as the result of their day's work. Needless to say, The Herald greatly appreciates the generosity of the apple growers of British Columbia who each year make this handsome result possible by their gift of apples.

PEDDLING NEEDS A LICENSE.

Kamloops Sentinel: Children peddling Christmas cards from door to door are violating a civic by-law, which provides that all peddlers must take out and pay \$50 for a license. There are far more than usual of the young people operating this year, more girls than boys. Eastern houses offer good commissions to the youngsters and suggest the means are good to encourage thrift. That may be, but it is at the cost of breaking the law.

Parents may not know that they are probably liable as well as the children in such cases. The police have received many complaints; housekeepers are kept busy answering the door at nights and all Saturday. The police are anxious not to take action; besides it is sometimes difficult to prepare the way for a conviction. They state, however, that fair warning should be given parents of the fact that all boys and girls hawking wares come within the law's action.

The Sentinel is not entirely disinterested; like several others it pays a heavy overhead to do business and does not like to see trade going out of town, especially as its wares, as well as those of its advertisers, are as good, if not better, than those peddled. It is difficult enough these times to do business, without this competition, which is not legally conducted. And it is only right that the city by-laws, passed to protect legitimate traders, should be observed.

WHY THE SMOKE SCREEN?

Trail News: Coast dailies ever since the adoption of our "Moderation Act," have devoted much space to telling the world of the utter and downright failure of the prohibition act in the States. They have slurred statements issued from the department of justice at Washington showing the gradual decline in the number of arrests and prosecutions under the act, and further showing that the rising generation is benefitting by the prohibition law, and showing that the "wet" tendency is slowly—but nevertheless—surely dying out. These facts have been repeatedly pointed out as being untrue. Just why these dailies should be so interested in the welfare of the United States is probably due to the fact that there is not a single prohibition daily on the coast and for months these papers have openly thrown a smoke screen around every effort made by prohibitionists to curb the exportation of liquor to the States and to stop the activities of the bootleggers.

The soft pedal has been worked continually, and, as a consequence gunmen ply their trade, bootleggers are rampant, and the drug traffic has reached a point never before attained by any city in Canada. Crimes are committed daily, the greater number of them remaining unsolved. Bootleggers being no respecters of persons or law, have been reaping a harvest. Taking a load of liquor to the States and returning with a load of silk, cottons or tobacco makes a profitable business, especially if there is little or no effort made to curb the practice.

Cotton goods manufacturers but recently complained to the government "that it is becoming impossible to compete with smuggled goods." It's a poor rule that does not work both ways.

A SCHOOL PRINCIPAL'S OPINION.

A Manitoba school principal is not in agreement with the large number of persons there who think there is too much school work at home. He blames such youthful activities as the Boy Scouts, Wolf Cubs, Girl Guides, C.G.I.T., Mission Bands and other church organizations for taking up much of the child's time. He does not say too much of the time, but he reminds the people that there are just the same number of hours in the day in 1924 as there were ten, fifteen or twenty years ago. In his capacity as a principal of one of the important schools of the province he found that instead of there being complaints of too much over-work there were frequently complaints that the children did not have sufficient home work. This school principal points out that the subjects taught in Grade VII now are history, science, Latin, algebra, literature, grammar, French, music, geography, arithmetic, geometry, composition, spelling, penmanship, drawing and domestic science for girls, and manual training for the boys. Twenty-five years ago this program would lack science, Latin, algebra, music, geometry, domestic science and shops, and include very little drawing, and Principal Laidlaw reiterates that "the day is just the same length now." In his opinion, up to Grade VI home work should be confined to from half to three-quarters of an hour, but junior High School pupils should work from one to one and a half hours. Younger children's home work should consist largely of spelling and ten to fifteen words are enough for a child to learn. This teacher

THOSE CHRISTMAS CANDIES

It is real fun filling a box with various kinds you have made with your own hands, and you have the further satisfaction of knowing they are wholesome and will not hurt the little folks. My mother used to make her candies every year. There are numberless varieties of all flavors and colors, hard and soft, "chewy" and brittle, with nuts or fruits, dipped in chocolate or plain. Between now and Christmas I shall give you as many different recipes for them as I can in the column.

UNCOOKED CANDIES

If you have not had much, or any, experience in candy making, you might well begin with the uncooked varieties. They rarely fail to come out well, and children can make them without fear of burning themselves.

Confectioners' sugar, finer than powdered sugar, must be used where called for in the recipes or the candy will not harden properly. This sugar must be kept in a tight-lidded jar or pail, and be sifted before use to free it of lumps. If the lumps are very hard, a large sheet of clean paper may be spread on the table and a rolling-pin used to crush the lumps till fine; then sift the sugar.

CREAM FONDANT

Put 2 tablespoons of heavy cream and a teaspoon of light colored corn syrup in a bowl, add sifted cup of confectioners' sugar gradually, stirring until it is smooth. If it does not then make a stiff paste, add as much more as is needed. Add whatever flavoring or coloring is desired, and use the fondant to fill dates or fruits, to put between or wrap around nut meats, or to use as filling centres for chocolates or other dipped bonbons.

It may be warmed over a bowl of hot water enough to be able to dip into it sections of orange or other fruits, nut meats, cherries, grapes, or centres of other flavor or color. It will have to be kept over the hot water while the dipping is going on, stirred constantly, and frequently it may have to be put a moment over the fire, to keep it from hardening too much for the dipping.

EGG FONDANT

Put the white of an egg, half tablespoon of cold water and three-quarters teaspoon vanilla in a bowl and beat it until it is well blended. Sift two cups of confectioners' sugar and add it a spoonful at a time to the egg, stirring until well mixed each time. When it is very stiff, take it out on a board and knead it with your hands until it is perfectly smooth. Use it to stuff dates, for nut creams, or for centres for chocolates and bonbons.

The fondant can be colored by adding pink, green, yellow, lavender or orange color paste, and other flavors may be substituted for the vanilla.

ALMOND CREAMS

Blanche as many almonds as you wish to use. The easiest way is to cover the shelled nuts with boiling water, let stand two minutes, drain, cover with cold water, and drain again. Then the brown skins will easily slip off in the fingers. Dry the nuts with a towel or piece of cheesecloth. English walnuts or Pistachio nuts may be blanched in the same manner.

Put one of the blanched almonds each side of a small ball of fondant, made on either of the above recipes, or cover the almonds with the fondant, shaping it with the fingers into

is against children studying arithmetic at home. If a child is unable to grasp arithmetic in the school it is waste of time for the attempt to be made at home. Then, he goes on to history and points out how useful and interesting it can be at home and continues in a reasonable way to advocate that home work is beneficial to school children.

There will be very many who will agree with the sensible remarks of this principal. School would not appear to be the same if there was not at least sufficient work for the parents to be interested in what their children are doing and anxious to show that interest by assisting them.—St. John Telegraph.

The Bulldog Grip

The ability of the bulldog to hold on is his main asset in combat. Advertisers need some of his tenacity to keep their business at an even keel. Continuity in advertising is the business man's best grip. It has never failed in the fight for existence.

NEW ASYLUM COSTS TOTAL HUGE SUM

British Columbia's new acute mental hospital at Essondale cost approximately three-quarters of a million dollars for building and equipment. The total cost of the building was \$649,860.24. The fittings and furnishings will cost more than \$75,000.

This information was brought out in the House by W. A. McKenzie, member for Similkameen, who has taken a particular interest in and strongly condemned the expenditure made on this institution.

BIG PRODUCTION IN ZINC AND LEAD

British Columbia's zinc output in 1923 was 58 million pounds and in the first half of this year production was 29 1/2 million pounds; a total production of 60 million pounds is predicted. This shows steady progress, as in 1921 the output was 49 million pounds.

Lead production in British Columbia shows even more remarkable progress. The output has risen from 47 million pounds in 1921 to 96 million pounds last year. During the first half of this year Canada's production of lead was 79 million pounds out of which British Columbia produced 75 million pounds. It is believed British Columbia's production this year will be 150 million pounds.

The big smelter at Trail is largely responsible for the steady increase in the production of wealth in these lines.

a little egg, and roll it in granulated sugar.

CHERRY CREAMS

Make up your fondant, and roll it out 1/4 inch thick. Shape it with a round cookie cutter 1 1/2 inches diameter, and roll a cherry up in it, leaving a glimpse of the cherry showing. These may be wrapped in little squares of tissue, or laid in little paper cups. Vanilla, coffee and pistachio fondant look particularly well with the cherries.

CHERRY CREAMS II

Cut as many smooth, firm candied cherries as desired into 4 sections each and open up like the petals of a flower. Put a little ball of the fondant in the middle, and in the back, in a tiny slit, put the end of a strip of angelica 1 1/2 inches long for a stem. These are pretty to put in the top of the box of homemade candy to dress it up.

CHERRY CREAMS III

Cut your candied cherries almost in two, between the halves place a ball of fondant, and press it gently together, then roll in granulated sugar.

THE SEWING MACHINE

"No matter what glamour may be thrown around it, the sewing room is rarely inviting," says Mary H. Krout, a well-known authority on home management with a very attractive house of her own, planned with all the modern conveniences.

"The sewing machine is hopelessly utilitarian, although a praiseworthy effort has been made to improve its appearance, making it like the cabinet organ, or the square piano in its polished case which must still be supported by four stodgy legs.

"The sewing machine is as necessary as the kitchen range, or the stationary wash-tubs, and almost as difficult to deal with from a decorative point of view. It is now imperfectly disguised with doors, or as a table sunk in a box-like arrangement with a flat top over which a neat cover may be spread."

Many people find they can not spare a separate room for sewing, and have to keep the sewing machine in a corner of a bedroom, the end of a hall, or even at one side of the

dining-room. In such cases, a neat two or three-fold screen covered with something to harmonize with the curtains in the room, or the general color scheme, will put the machine out of sight yet ready for operation any minute.

"BREAKDOWN" OF JONATHAN CAUSING LOSS

No Disease Was Found in Jonathan Apples From Summerland.

"Break down" in Jonathans is likely to have a serious effect in the net returns to growers of this variety of apple, judging from the following bulletin handed The Review this morning by the secretary of the Summerland Co-operative, with the request that it be published. This bulletin is described as an abridged copy of a bulletin received by the local from the Associated Growers.

Since the opening of the season considerable trouble has been experienced with the early ripening of our fruits and indications of poor keeping qualities in all varieties. Recognizing the necessity of getting all fruit into consumption as quickly as possible, to avoid loss from shrinkage, the efforts of the sales department throughout the season have been directed towards securing as rapid distribution as possible.

Breakdown in Jonathans developed in the latter part of October, the larger sizes showing the defect on arrival of early shipments. Later it appeared in practically all sizes. As a result it was very difficult to make sales of this variety. Jobbers refusing to buy unless protected against loss from shrinkage. In effecting adjustments the sales department have consistently refused to give blanket protection but have dealt with each case on its merits.

Since the middle of November prairie markets have been completely stagnant. Jobbers are filled up with winter apples which are moving out of their hands very slowly. Under these conditions it was impossible to accomplish much in speeding up the movement of Jonathans although everything possible has been done in that direction.

There are now in the Valley approximately 9,000 boxes of Jonathans which will shrink to a much smaller figure when re-packed. These will be moved as fast as a market can be found for them. Breakdown is developing so rapidly in late shipments it is impossible to estimate the final effect on the Jonathan pools.

Up to the present time no report has been received of breakdown in Jonathan apples arriving on the British market. This is probably due to their being small sizes. There are now, however, sixty cars of Jonathans in storage and in transit to the United Kingdom and we have no guarantee it will not develop in the later shipments.

In considering claims on account of breakdown every care has been taken to have the loss verified and in most cases the allowance has been less than the proven amount of shrinkage. In some cases claims for shrinkage after delivery might have been successfully resisted but for the reputation of our fruit, and the maintaining of good will for sales of other varieties and future business it was considered good policy to adjust a part of the loss where it was known the claims were just. These adjustments have covered only part of the shrinkage and jobbers will lose heavily on Jonathans this season.

Breakdown is not entirely confined to the Jonathans. It has happened to some extent in the larger sizes of Delicious, Wagner, Rome, Spy, Winter Banana, Gano, King David, Ontario and Salome. Press reports state that it is prevalent in all early varieties of Washington apples.

Summerland Jonathans all moved out in good shape with no indications of disease, according to local reports:

Some of the loss where it was known the claims were just. These adjustments have covered only part of the shrinkage and jobbers will lose heavily on Jonathans this season.

Here is a good recipe for corn meal gems, "the kind mother used to make"—stir a cup of corn meal (the bolted kind is best) with 2 cups flour, and add 2 teaspoons of cream of tartar, 1 teaspoon baking soda, 1/2 teaspoon salt, and 1/4 cup sugar. Beat an egg and add to it 2 cups of milk, then stir this into the dry ingredients, and bake in gem tins 20 minutes.

SCONS

"Take as much flour as you think fit and mix some butter well with it. Then put some soda into the bowl and take the pin and give it a roll. But before you mix it forget not to add

Some buttermilk fresh—let it not be bad.

Burn.

WORLD EVENTS

In Review

By WILLIAM BANKS

The Prince and South Africa

Announcement is made that the Prince of Wales will sail for South Africa in March next visiting En route Gambia, Sierra Leone, the Gold Coast, Nigeria and St. Helena. This will probably be the finale of the Prince's tours of the Dominions. It seems to dispose of the renewed rumors of his intended marriage, although it is not improbable that an announcement of that prospective event might be made before he leaves on the tour. As an Ambassador of Empire the Prince has accomplished much.

Jockeying in the Balkans

The Balkans will always remain an object of speculative report and rumor so long as there is no real brotherhood of man. It is now asserted that Italy, Yugoslavia and Roumania have practically completed an alliance of a military nature. Alarmists see a double edged purpose in this alignment, Russia being Roumania's nightmare and Italy regarding France with jealous eyes. Both would thus be prepared to checkmate or attempt to checkmate the designs of the power they most fear. At this distance it would appear that Roumania has more reason than any to be on guard as Russia is still very sore over the loss of Bessarabia. Approaching winter puts an end to the possibility of a campaign for some months, however, and any delay is in the interest of peace.

A Queer Sailing Ship

Marine circles the world over are fascinated by the success of what has become known as the "Rotary Ship" although it is a schooner built in Germany and named Buckau. This ship sails without sails or propelling engines. Its distinguishing characteristics are two revolving towers of sheet iron one and a half inches thick, nine feet in diameter and about sixty feet in height. These towers driven by electric motors of small horse power create a circular current. This propels the ship, which is quite easily handled by one or two men. The trial trips of this vessel have been so successful as to warrant provisional contracts for several other vessels of the same kind. It is believed that their commercial success is beyond doubt chiefly owing to the very low cost of operation.

Britain, Egypt and Russia

It is almost impossible to separate Britain's actions in respect to Egypt from her treatment of Russia. The blun declaration of the Baldwin government that the Zinoviev letter to British communists urging a revolution, could not be dissociated from propaganda for which the Russian government was responsible, was a warning to all the world. Britain is tired of being made a target for agitators who plot in other lands against her. There is little doubt that the activities of Russia have been intensive in both India and Egypt. In the latter place, combined with the known separatist attitude of Premier Zaghoul, it resulted in a situation of which the murder of Sir Leo Stack, governor-general of the Sudan was a manifestation which would not be allowed to continue. The modern history of Egypt does not warrant the assumption that she could stand alone. In the arrangement for home rule Britain expressly provided for her defence against foreign aggression, and against any interference by foreign nations in the internal affairs of the country. Foreign agitators as well as natives have been encouraged and the murder of Sir Leo Stack was properly laid at the door of Zaghoul's government. His resignation and the appointment of a new premier helped in the speedy clearing of a situation which held many elements of danger.

Imperial Co-operation

The crisis in Egypt and the necessity for prompt action raises some delicate questions in view of recent pronouncements by Premier Baldwin and Viscount Grey in favor of closer co-operation between Britain and the Dominions in foreign affairs. Bri-

tain kept the overseas Dominions fully informed of all the steps taken in connection with the Egyptian situation, but would have acted, she did without regard to them. In other words the matter was one which called for immediate and most drastic measures. Had there been any agreed formula for discussion between the Dominions and Britain before such action could have been taken, the delay would undoubtedly have been disastrous. It would have been regarded by the Egyptians as a sign of weakness and could probably have been settled only by force of arms. Action was imperative. The incident gives lots of scope for discussion among those who are urging much closer imperial co-operation.

Faith in France

United States faith in the stability of France was well illustrated in the fact that the loan of one hundred million dollars floated for that country by a New York firm was over subscribed several times on the day of offering. Considerable amounts of this money will be used to refund other loans it is said, as well as to carry on necessary works in France. The latter country does not yet show any inclination to put forward proposals to meet her war debts to the United States or to Great Britain. It is to Britain that France is most indebted for the comparatively excellent position of today.

British-German Trade

Experts from Germany are meeting British trade experts in London in preliminary conferences looking to a trade and commercial agreement, following a breakdown of negotiations in Berlin. The new start is being made in the hope of finding a basis for a mutual understanding. It is probable that the German anxiety to get a trade agreement with Britain has been whetted by the bump that the recent British note gave to Russia which was striving to get a big loan from the bankers of the Old Land in return for more trade concessions.

The Preference Pledges

Colonel Amery, the new colonial secretary has publicly announced that the British government will carry out the preferences adopted at the Imperial Economic Conference in 1923 and which were allowed to drop by the MacDonald government. An effort will also be made to perfect a system of marketing which would be of considerable assistance to the produce of the overseas Dominions. Canada is interested in this proposal and it begins to look as if a distinct advance is to be made in Imperial trading. It is not likely, however, that Britain would tolerate any plan which would mean dearer food, and it is the contention of those who are moving for closer trade within the Empire that the result will be very much the other way to the mutual advantage of all.

Directors and Their Duties

The conviction of another director of the defunct Home Bank in the long drawn out trials at Toronto emphasizes the importance of persons assuming positions as directors of financial institutions, making themselves acquainted with the laws. The several convictions which have been recorded should awaken directors everywhere to the obligations they have undertaken.

Erecting Sugar Beet Factory in Alberta

Utah-Idaho Sugar Company, of Salt Lake City, will erect a new sugar factory in southern Alberta in the near future, and the one in the Yankton valley will be discontinued, according to an announcement made by company officials at Salt Lake City. The prospects for beet raising in Alberta are considered very good by this concern.

A new cannery has been established at Prince Rupert, at which clams will be packed all winter.

DRY LIME SULPHUR VERSUS LIQUID SPRAY

Chas. E. Oliver, of the Oliver Chemical Company, Limited, questions the correctness of the statements of M. G. Wilson on the subject of sprays and spreaders as published in The Review on November 20th.

Mr. Oliver says that Mr. Wilson's assertion that powdered lime sulphur is rapidly coming to the fore, replacing the liquid preparation, is inconsistent with statements made by the manager of the Hood River Spray Company. Mr. Oliver in his letter to The Review, states that the Hood River company sold more liquid lime sulphur last season than ever before and are now altering their plant to take care of the increased business in that commodity. They do not handle dry lime sulphur at all.

Our correspondent states further that the lime sulphur sold here contains more than 180 pounds of dry sulphur and lime per barrel. Taking into consideration the water of crystallization of powdered lime sulphur, the contents of each barrel would be the equivalent of 200 pounds of the powder form. The cost of liquid lime sulphur to the Summerland grower in 1924 was \$12.50 when the empty barrel was returned, which, says the writer, is equivalent to 6 1/4 cents a pound for dry lime sulphur whereas, he says, this article sold last year for 25 cents per pound.

He endorses Mr. Wilson's statement that spreader has been too high in price, but attributes this to the relatively small consumption and states that increased consumption will warrant a reduction in price.

This is Pat

he got t' be a two-b-four lawyer or doctor or pracher an' ivery toime he saw a first-class ditch-digger workin' in a hole, he'd want t' throw off his coat an' git down where he belonged. I'm thinkin' Shamus is th' best judge of his own inclinations an' limitations, an' I loike his grit, sez I.

"But, Pat," sez she, "do ye suppose Shamus can aim a livin' buildin' houses?"

"Faith, an' I'll say he can, mam!" sez I. "A lad who will buckle int' hard wurk is such a rarity these days that he's grabbed at wance an' fed on patty de foi grass an' granebacks. Wid his broad back an' exhaustless energy, Shamus is headin' t' break int' an aristocracy that's gittin' more exclusive ivery day. Th' first thing ye know, Mrs. Maloney, ye'll be ridin' about in silks an' satins an' drivin' yer own six-cylinder sedan, sez I.

"Ye might be right at that, Mr. O'Hooley," sez she, gittin' excited. "Shamus' father was a bricklayer an' there niver was a toime that he didn't have a roll of bills as big as a stove pipe. My! wouldn't I be proud t' ride in me own car!" sez she.

"Ye would an' ye will," sez I. "Whin that toime comes, mam, be koin'd t' th' lads wid th' bulgin' foreheads an' trimblin' limbs who, in th' days of their youth, wasted their opportunities t' learn a good trade, an' are slavin' their loives out in half-paid white-collar jobs. Give 'em a lift wance in a while, mam, fer I'm thinkin' if they don't take off their coats an' git down t' rale wurk before ut's too late, 'twill be little joy-ridin' they'll git in this world," sez I.

FINED FOR SHOOTING DOES AND FAWNS

Chas. Squakham, an Indian belonging to the Hedley reservation, was fined \$250 and costs last week by E. Waterman, J.P., of Princeton, for killing five does and four fawns, and having in his possession two bucks skinned and three buckskins. He pleaded guilty to the charge. The prosecution was in the hands of Game Warden R. M. Robertson, who stated he had evidence that two years ago this Indian killed a large number of deer and was warned against such wholesale slaughter at that time. The deer which formed the substance of the case in which Squakham was fined, were killed along Stirling Creek in the vicinity of Hedley. Three charges against the Indian were withdrawn by the prosecution. These were, obstructing the police, which is an indictable offence; carrying a loaded gun in a wagon, and severing the heads of deer he had killed before conveying them to the place of consumption.

Irritable telephone subscribers are subject to arrest in Paris.

FAVORITE HYMNS AND THEIR WRITERS

"COME, YE DISCONSOLATE"

It is not difficult to see how some men come to write hymns, because for the most part it is evident that they grow out of a deep spiritual experience. It is not so easy to see how that most gifted song-writer and poet, Thomas Moore, came to write such a tender hymn as "Come, Ye Disconsolate," for he often allowed a fiery temper to sway him. He was born in Dublin on May 28, 1779, and was a Roman Catholic in religion. He was educated at Trinity College, Dublin, and started to study law in London, but his poetical success decided him to make literature his life-work.

Moore was a man of small stature, but by no means lacking in courage. At one time when Jeffrey, the famous critic, commented severely upon his poems, Moore challenged him to a duel, but the police prevented it. Byron wrote in ridicule of this duel, and Moore instantly sent him a challenge, but no duel followed, and the two poets became fast friends.

Moore's poems became immensely popular, and he received prices for them far in excess of anything paid for literary work up to that time. For one long poem, "Lalla Rookh," he received \$15,000 before a copy had been sold. Among his most popular works were his "Irish Melodies," "National Airs," and his "Ballads and Songs," containing such universal favorites as, "The Harp That Once Through Tara's Halls," "Believe Me if All Those Endearing Young Charms," "The Last Rose of Summer," "Oft in the Stilly Night," "Those Evening Bells," and many others.

There was, however, a deep religious strain in Thomas Moore, and he wrote in all thirty-two hymns, which he published in 1816, with the title, "Sacred Songs." In this set were some which have become justly famous, such as: "Sound the Loud Timbrel o'er Egypt's Dark Sea," "Thou Art, O God, the Life and Light," "The Bird Let Loose in Eastern Skies," "This World is All a Fleeting Show," and this one, "Come, Ye Disconsolate," which probably is the most famous of them all.

Dr. Thomas Hastings almost completely changed the last stanza of the hymn. Moore wrote it:

"Go ask the infidel what boon he brings us,
What charm for aching hearts he can reveal.
Sweet as that heavenly promise hope sends us,
Earth has no sorrow that Heaven cannot heal."
Hastings altered this to read:

"Here see the bread of life, see waters flowing
Forth from the throne of God, pure from above!
Come to the feast of love, come ever knowing
Earth has no sorrow, but Heaven can remove."

Moore died on February 26, 1852. The last three years of his life were sad ones, for he lost his mental powers, and required his wife's constant care. He was a good son, and a loving husband to his admirable wife. His friends found him staunch and true.

SYNOPSIS OF LAND ACT AMENDMENTS

PRE-EMPTIONS
 Vacant, unreserved, surveyed, Crown lands may be pre-empted by British subjects over 18 years of age, and by aliens on declaring intention to become British subjects, conditional upon residence, occupation, and improvement for agricultural purposes.

Full information concerning regulations regarding pre-emptions is given in Bulletin No. 1, Land Series, "How to Pre-empt Land," copies of which can be obtained free of charge by addressing the Department of Lands, Victoria, B.C., or to any Government Agent.

Records will be granted covering only land suitable for agricultural purposes, and which is not timberland, i.e., carrying over 5,000 board feet per acre west of the Coast Range and 8,000 feet per acre east of that range.

Applications for pre-emptions are to be addressed to the Land Commissioner of the Land Recording Division, in which the land applied for is situated, and are made on printed forms, copies of which can be obtained from the Land Commissioner.

Pre-emptions must be occupied for five years and improvements made to value of \$10 per acre, including clearing and cultivating at least five acres, before a Crown Grant can be received.

For more detailed information see the Bulletin "How to Pre-empt Land."

PURCHASE
 Applications are received for purchase of vacant and unreserved Crown lands, not being timberland, for agricultural purposes; minimum price of first-class (arable) land is \$5 per acre; and second-class (grazing) land \$2.50 per acre. Further information regarding purchase or lease of Crown lands is given in Bulletin No. 10, Land Series, "Purchase and Lease of Crown Lands."

Mill, factory, or industrial sites on timber land, not exceeding 40 acres, may be purchased or leased, the conditions including payment of stumpage.

HOMESITE LEASES
 Unsurveyed areas, not exceeding 20 acres, may be leased as homesites, conditional upon a dwelling being erected in the first year, title being obtainable after residence and improvement conditions are fulfilled and land has been surveyed.

LEASES
 For grazing and industrial purposes areas not exceeding 640 acres may be leased by one person or a company.

GRAZING
 Under the Grazing Act the Province is divided into grazing districts and the range administered under a Grazing Commissioner. Annual grazing permits are issued based on numbers ranged, priority being given to established owners. Stock-owners may form associations for range management. Free, or partially free, permits are available for settlers, campers and travellers, up to ten head.

The Pedlar's Pack

The moral and artistic uplift of the present day is charmingly illustrated by the proposed change of title under which our friend the bar-ber will from now on be known as a chiroton-sor. The average man will probably continue to attend his favorite barber shop in ignorance of the fact that it is really a chiroton-sorial establishment, presided over by professors having a "high plane of understanding" and "a code of ethics," but such will be the real position according to the delightful address of the president of the barbers' association delivered at Chicago to a convention there assembled. This gentleman rose to such heights of eloquence that he may perhaps be excused if he became somewhat dizzy, and was guilty of mixing his idioms as it were. When he spoke of "mobilizing" the human countenance, for instance, he adopted a term which should properly be confined to military affairs, and it is quite surprising to realize that the duty of a barber is to put the human countenance "in a state of readiness for active service." However, that is possibly no more astonishing than to learn of the further obligation of the operator to make that countenance "truly the window of the human soul." The human soul which has to depend on such ministrations for its manifestation must be in a bad way. "Cos-meticians (another new title?), hair dressers, barbers and beauty shop people" may all have the same function in society, as our inspired chiro-ton-sor declares, but that function is certainly not the providing of win-dows for the human soul.

THE NEW MOBILIZATION. ber will from now on be known as a chiroton-sor. The average man will probably continue to attend his favorite barber shop in ignorance of the fact that it is really a chiroton-sorial establishment, presided over by professors having a "high plane of understanding" and "a code of ethics," but such will be the real position according to the delightful address of the president of the barbers' association delivered at Chicago to a convention there assembled. This gentleman rose to such heights of eloquence that he may perhaps be excused if he became somewhat dizzy, and was guilty of mixing his idioms as it were. When he spoke of "mobilizing" the human countenance, for instance, he adopted a term which should properly be confined to military affairs, and it is quite surprising to realize that the duty of a barber is to put the human countenance "in a state of readiness for active service." However, that is possibly no more astonishing than to learn of the further obligation of the operator to make that countenance "truly the window of the human soul." The human soul which has to depend on such ministrations for its manifestation must be in a bad way. "Cos-meticians (another new title?), hair dressers, barbers and beauty shop people" may all have the same function in society, as our inspired chiro-ton-sor declares, but that function is certainly not the providing of win-dows for the human soul.

When this apostle of the new order of hair cutters admits that his pronouncement "sounds like a high-flown statement" he flatters himself. It sounds like what it actually is — a rigmorole of the wildest and most outrageous bosh ever perpetrated by mortal man.

At one of the meetings called to meet the members of the commission which is making an educational survey of this province, a local resident complained of the poor quality of speech noticeable among both teachers and pupils of our schools at the present time. He de-

clared that bad grammar and bad rhetoric were more in evidence to-day than for a long time past, and that, even among our high school teachers, very poor English is spoken. The truth of the criticism is beyond dispute, and the trouble is that this tendency, beginning in our schools, is perpetuated in much of our literature. Sir John Willison, dealing with the handicaps which make things hard for Canadian writers, takes occasion to point out a very regrettable tendency towards what he calls American English and gives several examples to support his position. He does not hesitate to declare that "the United States is doing much to vulgarize the English language" and that we are moving in the same direction. He invites those who doubt it to study the headlines and the local and sporting columns in many Canadian newspapers; and, even allowing for certain unavoidable exigencies in those departments, there is plenty of ground for his contention. One reason probably lies in the snappiness of some of the American phrases, which cling to the mind of the reader in spite of his disapproval. But many of them are nothing but mere cases of deliberate misuse of certain words as in that "inexcusable" example, "Good Eats." Another crime now beginning to creep into American writing is the substitution of the word "too" at the beginning of a sentence instead of "also." There is such a crude harshness in this misplacing of the word that we can only conclude it is done out of sheer contrariness and a mistaken idea that it is "smart." There may also be in the background a feeling that such departures are steps towards the creation of what some people are pleased to call "good American," and that is a feature which rests with United States writers. But Canadians should have none of it.

According to a French professor who has lately been inveighing against high heels, there is going to be considerable trouble in future generations if, these alleged ornaments of ladies' footwear are not done away with, and free play given to the natural functions of the feet in their entirety. "Not being skilled in osteopathy myself, I am not able to agree or disagree with this con-

clusion; but the learned professor seems to have reason on his side. There is, however, a saving clause in the fact that high heels have been worn for a good many years past, and the constantly predicted disasters are not yet evident to the un-trained eye. Fifty years ago, or thereabouts, the height of feminine fashion was expressed in a decided tilt forward of the whole body, in which the work of high heels was aided and abetted by a mysterious contrivance known, I believe, as a "bustle." This unholy combination brought about a stooping effect which was considered very desirable, and was in vogue for several years. Edgar Allan Poe wrote a satire on this fashion, in which the shade of a long departed Egyptian king was told of it by an interviewer of that day, and was so angrily incredulous that he ordered his informant away to instant execution as a base traducer of the fair sex.

When we come to think of it, shoes have always been subject to astonishing vagaries of styles. We know that some centuries ago English gentry had a fashion of pointed toes which curled upwards until they almost reached the knees and were held in position there by ornamental buckles. That style, however, did not necessarily interfere with walking, and in that respect had a decided advantage over the modern high heel. We must, I presume, be polite enough to allow that our womenfolk know what suits them, but I have often thought that, if a lady realized how much natural grace a pair of three inch heels robs her of when tip-toeing along the sidewalks, she would probably have them reduced. And that realization might come from noticing the gait of a cowboy when not in the saddle. High heels are a necessity to him to give stirrup hold, but are a misery to their wearer when walking. "Quod bene notandum."

From heels to head is a considerable jump, but while on the subject of feminine apparel I would like to refer (with fear and trembling!) to a particular style of hat I have lately noticed. I mean that soft felt affair which resembles one of the bottom corners of a bag, and is worn, not only over the back of the neck, but also far enough down in front to partly obscure the vision of the wearer thereof. A damsel whose had is enveloped in one of these creations has to lift her eyes above normal level to see clearly who or what is before her, and if that does not mean considerable eyestrain, I am badly mistaken. Moreover, why hide a pretty face from the gaze of an appreciative public?

AUTOLYCUS.

"A Snapper Up of Unconsidered Trifles."

The Winter's Tale, Scene II, Act IV

Anna Lee Scott is a recognized authority on the preparation and serving of food for all occasions. She has prepared an interesting up-to-the-minute and practical course of twenty lessons; by mail, on "Cookery Arts and Kitchen Management," and to all users of Maple Leaf Flour the Maple Leaf Milling Company offers his course without one cent of money.

Coupons will be found in every bag of Maple Leaf Flour, in a 98 pound bag four coupons; in a 49 pound bag two coupons; and in a 24 pound bag one coupon.

Merely sign and mail four coupons as directed—send no money—and you will be enrolled as a member of the Maple Leaf Club, and receive the first four lessons of the course in an attractive loose leaf binder. The remaining lessons will be sent at the rate of four a month—twenty lessons in all—postage paid.

Every housewife will be delighted with Maple Leaf flour and she buys it with the positive guarantee that she never used a better flour. Ask your grocer today about this unusual free offer and watch the advertising columns of this paper for further details.

ZANE GREY'S "BORDER LEGION" AT EMPRESS

The Zane Grey-Paramount production, "The Border Legion," with Antonio Moreno and Helene Chadwick, will be the feature at the Empress Theatre for Friday and Saturday. It is a fast-moving tale of wild and woolly days when the West was young, a story of the old days when

"The Border Legion," one of the most feared of all bandit gangs, terrorized the Southern Idaho border, plundering and killing in its search for gold.

Of all the Zane Grey stories, "The Border Legion" is one of the best. "To the Last Man," "The Call of the Canyon," "The Heritage of the Desert" and the natural-color picture, "Wanderer of the Wasteland," all Zane Grey stories, have been on the screen at the Empress. All were high-class entertainment, but "The Border Legion" is going to prove even more popular.

The entire picture was taken in the mountainous wilderness of the North-west where, in the early days, the Border Legion was a real menace. To make the picture, Paramount players went one hundred miles into the mountains from a railroad that "The Border Legion" might be filmed on the actual locations described by the author.

 Come in and see it in operation

We produce as good printing as you will find anywhere

Our Printing Plant

represents a big investment in machinery, type and equipment.
 It is manned by a staff of local citizens who spend their earnings at home.
 Its existence here means the bringing into the community of many "outside" dollars for advertising and printing, — a source of community revenue perhaps overlooked.

But it is absolutely essential to its existence that such a plant be kept busy — that little printing order means much to us — that order that we should have had — but — well — you thought you'd make something else do.

The **REVIEW** SUMMERLAND

OUR PLACE IN THE COMMUNITY To give publicity to community events and affairs. To provide the community's needed printed material.

Local Happenings

Those who know are buying radios from Nesbitt & Forster. L18

Dr. McGregor of Penticton was in town on Wednesday on a professional visit.

Mjr. and Mrs. W. R. Tweedy returned on Sunday from a visit to Vancouver Island.

Reserve Wednesday evening, December 31st for the hospital dance and entertainment. L18,19

Mrs. J. R. Brown returned on Friday night from a visit of a week with her daughter, Kathleen, at Vernon.

Mrs. W. Ritchie spent several days last week at Penticton, the guest of her son, J. H. Ritchie, and Mrs. Ritchie.

Some of the most interesting and important news of the week is contained in the advertisements in this paper. Don't miss it.

K.V.R. passenger train westbound last Thursday was about ten hours late. The delay was due to the accident near Beaverdell the day before.

St. Stephen's W.A. will hold a sale of work and home cooking on Wednesday, December 10th at 2.30. L18

T. J. McAlpine returned on Tuesday night from Fraser Lake where he has been for some weeks on government construction work.

Lakeside Church Ladies' Aid held a successful sale of work and home cooking on Saturday afternoon, when over eighty-five dollars was added to the funds. Afternoon tea was served at a nominal fee.

Members of the Summerland Badminton Club to the number of about one dozen were guests on Sunday last of the Penticton Badminton Club. An enjoyable day was spent.

Mrs. M. G. Wilson returned last week end from Trail, after a short stay with her son, Guy Waterman, there. The latter, who recently met with an accident while working on a concentrator in the smelter city, was making splendid recovery.

Mrs. A. W. McLeod of North Vancouver, came in on Tuesday night and is the guest of the Misses Spencer. Mrs. McLeod has been visiting for a time with her son, John, now principal of the new Armstrong high school.

Col. H. J. Huddleston, acting Sirdar of Egypt since the assassination of General Stack, is an only brother of C. J. Huddleston of Summerland. Col. Huddleston has been with the Egyptian army for many years and has had his headquarters at Khartoum.

Government telephone and telegraph lines and Okanagan Telephone Company wires are being gradually transferred to the same poles throughout the Valley. Lines between here and Penticton were so arranged last season and from here north the same plan is being carried out.

At a meeting of the electric light committee plans were discussed with the applicants for the extension of the electric light service to the homes of A. G. Munn, R. J. Hutchinson and Geo. W. Johnson. Plans satisfactory to all parties were arranged and will be submitted to the council at its next meeting.

Basketry classes held here during the past two weeks under the Summerland school board, proved very successful and were well attended. Classes were held three times a week both at Summerland and West Summerland, under the instruction of Mrs. Armstrong of Koromoos and splendid progress was made.

SUMMERLAND WEATHER REPORT

Below is a report furnished by the Dominion Experimental Station here for the week ending Tuesday:

Table with columns: Date, Max., Min., Rain, Snow, Sun. Rows for Nov 26-37, Nov 27-30, Nov 28-31, Nov 20-41, Nov 30-38, Dec 1-38, Dec 2-36.

Do You Know? If you neglect the minor signs of stomach distress such as gas, indigestion, heartburn, bloating, belching, and after-dinner misery, you are condemning your body to years of chronic stomach trouble. Do-Do sold by druggists everywhere will quickly relieve all stomach misery.

RAISE MONEY FOR CRIPPLED CHILDREN FUND

Naramata Women's Institute Arranges Entertainment—Other News.

The entertainment given in the church on Friday evening for the benefit of the Crippled Children's Fund, attracted a large audience, whose contributions enriched the fund by nearly \$20.

George Anderson returned this week from Fraser Lake, in the northern interior, where he has been employed with T. J. McAlpine on construction work.

T. J. Garnett returned home on Saturday night from Saskatchewan, where he has been for several months, having gone down to the prairie for the harvest.

J. W. Rutherford returned last week end from a short vacation trip to the Coast and resumed his duties at the K.V.R. station on Wednesday. He brought with him a new DeForest radio set.

G. I. Gray returned on Sunday from Victoria, having gone down as local representative when the delegation of fruit men attended to support the Associated's private bill concerning contracts, which came before the house last week.

Deer continue to be surprisingly plentiful in the hills about Summerland. Not for years have they been found here in such numbers.

Falling from a scaffold while working on the construction of a new house on the E. Bennett property, Paradise Flat, Geo. Blethen yesterday sustained a broken rib and considerable shaking up, and will be confined to his house for some little time.

Voters' lists will be posted in the municipal office tomorrow and will be there until the holding of the court of revision on the tenth. If any citizen believes his name has been improperly omitted from the list, he should apply to the court to have it added.

Members of the C.S.E.T. throughout the province will vote on Saturday for members of the older boy's parliament, which assembles at Victoria after Christmas. South Okanagan is entitled to two representatives, with three candidates, H. Hobbs, Summerland, B. Pride, Penticton, and R. White, Summerland, in the field. The local polling booth will be stationed at St. Andrew's church.

BOY SCOUTS ELECT LEADERS

A very interesting meeting of the Summerland Scouts was held on Friday, November 28th, when seventeen boys assembled in the new club room above the drug store, which they have secured for the winter months to discuss the future work. Patrol leaders were nominated by ballot and three patrols picked. The leaders are Tom Harris, Denis Nield and Albert Doherty. We hope that in the future more boys will be added to roll and continue with a good troop. A SCOUT.

W.C.T.U. HOLDS MONTHLY MEETING

Women's Christian Temperance Union held its regular meeting on Friday at the home of Mrs. R. Johnston. After the opening services, which were conducted by the chairman, Mrs. T. J. McAlpine, Mrs. Steeves took charge of the devotional exercises and gave an excellent reading on, "I Just Pray."

An instrumental solo by Miss Margaret Munn and a vocal solo by Miss Marjorie King were much enjoyed and a vote of thanks was tendered them by those present. Dainty refreshments were served by Mrs. Johnston at the close of the business session.

BUYING POWER OF WEST GREATER BY \$175,000,000

The Canadian prairies are at last getting their business to a point where the balance is on the right side of the ledger, according to various bankers and financial men who have been on the Pacific Coast recently, says an eastern financial paper.

Last year there was a good crop, but it had been planted and harvested with high-priced labor, material and machinery; but this year, while the fields have produced only about two-thirds of the volume of wheat as that of 1923, the planting and harvesting were done in many instances for 20 cents a bushel less than last year.

A profit of 20 cents a bushel on 430,000,000 bushels of grain produced last year meant to the farming community of the prairies about \$86,000,000 of a buying power; but this year, with only 290,000,000 bushels at a profit of 90 cents a bushel, will give the farmers in the aggregate approximately \$261,000,000 or \$175,000,000 more than last year.

Beats Miles of Signs

The small town weekly paper is not only a community asset, but it is an absolute necessity to community progress. One good, live, well-supported home paper is worth, to the advertiser, hundreds of billboards and miles upon miles of lettered fences. —Team Work.

Lick Old Man Worry

The worry habit may get you a \$100 coffin, or a perfectly padded cell. But it never got anybody anything good in the history of the world. Remember, you've got to FIGHT worry. It CAN be licked, if you stick, trust God and keep your body functioning right.

There was once a fellow, named Fisher,

Who, while fishing, fell into a fissure; Though the fissure's been fished for by other poor fish, They're now fishing the fissure for Fisher.

A profit of 20 cents a bushel on 430,000,000 bushels of grain produced last year meant to the farming community of the prairies about \$86,000,000 of a buying power; but this year, with only 290,000,000 bushels at a profit of 90 cents a bushel, will give the farmers in the aggregate approximately \$261,000,000 or \$175,000,000 more than last year.

Beats Miles of Signs

The small town weekly paper is not only a community asset, but it is an absolute necessity to community progress. One good, live, well-supported home paper is worth, to the advertiser, hundreds of billboards and miles upon miles of lettered fences. —Team Work.

Lick Old Man Worry

The worry habit may get you a \$100 coffin, or a perfectly padded cell. But it never got anybody anything good in the history of the world. Remember, you've got to FIGHT worry. It CAN be licked, if you stick, trust God and keep your body functioning right.

RAISE MONEY FOR CRIPPLED CHILDREN FUND

Naramata Women's Institute Arranges Entertainment—Other News.

The entertainment given in the church on Friday evening for the benefit of the Crippled Children's Fund, attracted a large audience, whose contributions enriched the fund by nearly \$20.

George Anderson returned this week from Fraser Lake, in the northern interior, where he has been employed with T. J. McAlpine on construction work.

T. J. Garnett returned home on Saturday night from Saskatchewan, where he has been for several months, having gone down to the prairie for the harvest.

J. W. Rutherford returned last week end from a short vacation trip to the Coast and resumed his duties at the K.V.R. station on Wednesday. He brought with him a new DeForest radio set.

G. I. Gray returned on Sunday from Victoria, having gone down as local representative when the delegation of fruit men attended to support the Associated's private bill concerning contracts, which came before the house last week.

Deer continue to be surprisingly plentiful in the hills about Summerland. Not for years have they been found here in such numbers.

Falling from a scaffold while working on the construction of a new house on the E. Bennett property, Paradise Flat, Geo. Blethen yesterday sustained a broken rib and considerable shaking up, and will be confined to his house for some little time.

Voters' lists will be posted in the municipal office tomorrow and will be there until the holding of the court of revision on the tenth. If any citizen believes his name has been improperly omitted from the list, he should apply to the court to have it added.

W.C.T.U. HOLDS MONTHLY MEETING

Women's Christian Temperance Union held its regular meeting on Friday at the home of Mrs. R. Johnston. After the opening services, which were conducted by the chairman, Mrs. T. J. McAlpine, Mrs. Steeves took charge of the devotional exercises and gave an excellent reading on, "I Just Pray."

An instrumental solo by Miss Margaret Munn and a vocal solo by Miss Marjorie King were much enjoyed and a vote of thanks was tendered them by those present. Dainty refreshments were served by Mrs. Johnston at the close of the business session.

BUYING POWER OF WEST GREATER BY \$175,000,000

The Canadian prairies are at last getting their business to a point where the balance is on the right side of the ledger, according to various bankers and financial men who have been on the Pacific Coast recently, says an eastern financial paper.

Last year there was a good crop, but it had been planted and harvested with high-priced labor, material and machinery; but this year, while the fields have produced only about two-thirds of the volume of wheat as that of 1923, the planting and harvesting were done in many instances for 20 cents a bushel less than last year.

A profit of 20 cents a bushel on 430,000,000 bushels of grain produced last year meant to the farming community of the prairies about \$86,000,000 of a buying power; but this year, with only 290,000,000 bushels at a profit of 90 cents a bushel, will give the farmers in the aggregate approximately \$261,000,000 or \$175,000,000 more than last year.

CLASS LEADERS FOR A MONTH

Report of Central School For The Month of November.

Division I. S. A. MacDonald

Entrance Class.

Proficiency.—Ethel Nicholson, Mary Hack, Eileen Tomlin, Allan MacKenzie, Roselle James, Euido Koch, Gordon Nixon, Dorothy Chew, Ruth McLachlan, Mildred Wilson.

Division II. H. W. Daniel

Grade 8.—Edna Smith, Kathleen Bell, Mildred Laidlaw, John Cummings, Campbell McAlpine.

Grade 7.—Laura Smith, Gene Betuzzi, Jean Munn.

Perfect attendance.—Kathleen Bell, Violet Beck, Arthur Joy, Arnold Koch, Maurice Rippin, Edward Smith, Edna Smith, George Washington, Loretta Inglis, Gene Betuzzi, Jean Munn, Elizabeth Munn, Laura Smith, Robert Scourrah, Jessie Tullet, Dorothy Hunt, Alastair McGowan.

Division III. Miss M. Harwood

Grade 7.—Dorothy Bernard, Elizabeth Theed, Isabel Zimmerman, John Benmore.

Perfect attendance.—Kitty Beattie, Dorothy Bernard, Marino Biagioni, Mildred Borton, Margaret Caldwell, Jimmie Gould, Denis Nield, Catherine Ritchie, Veronica Solly, Mamie Steinbeck, Ruth Tait, Wesley Tavender, Elizabeth Theed, Lona Williams, Isabel Zimmerman, Lois Zimmerman, Bobbie Butler.

Division IV. Miss M. V. Smith

Grade 5.—Bobby Nelson, Margaret Dunsdon, Audrey Reynolds.

Grade 6.—George Mossop, Victor Wilson, James May, Charlie Bleasdale.

Perfect attendance.—Edith Atkins, Reggie Atkins, Dorothy Barnard, Diana Barnes, Pia Betuzzi, Arietta Biagioni, Charlie Bleasdale, Jack Blewett, Annie Denike, Margaret Dunsdon, Harvey Farrow, Jean Fisher, Margaret Hogg, Edward Joy, Naomi Kercher, James May, Donald McLachlan, Jack Morrow, George Mossop, Emily Mountford, Leonard Mountford, Bobby Nelson, Audrey Reynolds, Stanley Sharp, Richard Smith.

Division V. Miss J. Nicholson

Grade 5.—George Gould, Harry Walmsley, Katherine Ramsay, Dick Benmore.

Grade 4.—Dorothy Bowering, Harvey Mitchell, Walter Powell, Harry Barkwill.

Perfect attendance.—Mary Armitage, Jack Armstrong, Dorothy Bowering, James Clark, George Dunsdon, Lloyd Gould, Charles Hannah, Kitty Higgin, Doreen Howis, Dean Inglis, Harvey Mitchell, Bob McCutcheon, Walter Powell, Katherine Ramsay, Gordon Smith, Margaret Tavender, John Theed, Harry Walmsley, Kenneth Walter, Adorno Biagioni, Jessie Bushell.

Division VI. Miss R. E. Graham

Grade 4, part 1.—Edith Wilson, Betty Nelson, Frances James, Margaret Hookham.

Grade 4, part 2.—Irene May, Alice Dickinson, Margaret Steinbeck, George Haddrell.

Perfect attendance.—Mildred Arkell, Brian Atkinson, Gordon Beggs, Gordon Boothe, Alan Butler, Alice Dickinson, Florence Doherty, Aimee Eckersley, George Haddrell, Ruby Haddrell, Frances James, Helen Kercher, Irene May, Marion Monroe, Cameron McGowan, Ronald McKay, Cameron Nelson, Marianne Orr, Margaret Steinbeck, Billy Stewart, Arthur Smith, Donald Tait, Walter Taylor, Edith Verity.

Division VII. Miss A. Ruth Dale

Grade 3, part 2.—Alma Gould, Jara Armitage, Philip Hookham, Fred Bleasdale.

Grade 3, part 1.—Maurice Welsh and Philip Dunsdon, Arthur Simpson, Frank Walden, Margaret Steven. Perfect attendance.—Robin Agur, Fred Bleasdale, Kenneth Boothe, Horace Bryant, Sandy Caldwell, Philip Dunsdon, Terry Farrow, Eva Gale, Philip Hookham, Ernest Hunt, Earl Inglis, Eleanor Jackson, Colin McKenzie, Christine Reynolds, Arthur Simpson, Billy Stark, Frank Walden.

Division VIII. Miss K. M. Elliott

Grade 2, part 1.—Dulce Fosbery, Jean Sharman, Barbara Purves, Violet May.

Grade 2, part 2.—Gerald Bowering, Peggy Turner, Margaret Smith, Agnes Moore.

Perfect attendance.—Jessie Arkell, Bob Barkwill, Billy Borton, Gerald Bowering, Herbert Bryant, Tony Craig, Billy Downton, Dulce Fosbery, Harold Foster, Billy Gale, Anna Gould, Betty Gray, Barbara Haddrell, Vivian Harvey, Norma Inglis, Billy Jackson, Violet May, Lillian Mitchell, Agnes Moore, Mary Powell, Fred Smith, Leslie Smith, Mona Stewart, Gordon Sutherland, Inez Walter, Kathleen Wright, Mary Young.

Division IX. Miss F. M. Banks

Grade 1.—Billy Ramsay, David Armitage, Aubrey Beggs, Joseph James, Miriam Walmsley.

Perfect attendance.—Don Agur, Robert Beer, Aubrey Beggs, Edgar Brock, Isabel Clark, Moe Guidi, Haruko Inaba, Joseph James, Shima Kuroda, Robert McLachlan, Alberta Mitchell, Dale Rumball, Roy Smith, Miriam Walmsley, Tommy Young, Vera Smith, Dorothy Minnich.

OBITUARY

DAVID J. GRAHAM

Much regret was felt in the community last Friday when it became known that Mr. David J. Graham had passed away the day before at the home of his daughter, 2775 Eighth Avenue west, Vancouver, B.C.

Coming to Summerland almost two years ago from Winnipeg, he made quite a number of friends by the charm of his engaging personality. A man of scholarly attainment, with a rich vocabulary, possessing a fund of anecdotes both grave and gay, with a broad vision and a sympathetic outlook on mankind, retaining at all times the strongest ties to his native Scotland and the town of Aberdeen—the scene of his former labors—he will be greatly missed by all those who had the pleasure of coming in contact with him.

Suitable passing reference was made to his death at the last meeting of the local St. Andrew's society, the members of which had previously conveyed a floral wreath with an expression of condolence and sympathy to the bereaved family.

He is survived by his wife, one daughter, Mrs. A. F. Shuley of Vancouver, and a son, Rolf J.

A great number of "Kashmir" shawls are woven in Scotland, while thousands of "Swiss" watches are made in the U.S.A.

Do You Know?

THAT nine-tenths of the roughly four-faced people in the world are suffering from eye trouble? If so, you would do well to get a package of Jodelin. The world would be a brighter, happier place, if the steps all stomach ailment in two minutes. All Drug Stores.

PEACHLAND DOINGS

A Weekly Chronicle Furnished By Our Local Representative.

(Continued from page 1.)

MRS. THOS. POWELL

Mrs. Powell, wife of Magistrate Thomas Powell, was taken ill a few days ago and before many of her friends even knew of her illness she passed on at two o'clock on Wednesday morning. Arrangements are being made for the funeral from the family residence on Friday morning at ten o'clock.

Hunters round these parts are having better results of late, a few deer having been reported brought in.

Completing a two weeks' series of special meetings in the Peachland Baptist church, the Rev. J. W. Litch, D.D., left for Armstrong to conduct meetings.

Mrs. Allan McDonald returned to Peachland to complete her visit here with relatives after having spent a week with friends and relatives in Penticton.

Edward Cousins recently returned home from the prairie where he spent the fall around his former Manitoba home and in company with his brothers Francis and Daniel and Lorne Shaw, left for Beaverdel where they are working on another timber contract.

For perhaps the earliest in the history of Peachland a skating party on Monday enjoyed a skate on Hardy's Lake. Word came into town that day that there was a good sheet of ice, free of snow, and a crowd assembled that same evening and went up by truck and car. The ice was in exceptionally good condition for this country, being hard and smooth. Quite a number of Westbank young people had taken the same notion so there was quite an assembly of skaters to enjoy the first of the season. Those who took advantage of the opportunity were glad they had done so for there was a light fall of snow during the night and as it was pretty soft and wet it may spoil the ice.

A crew making headquarters at the Edgewater Inn are busily engaged on repair work on the telephone line through here and are combining the Government and Okanagan Telephone lines on the one set of poles.

A CHRISTMAS FIESTA

The Xmas. Fiesta to be given next week by Brother Bill in Penticton, is creating considerable interest. Nomination of candidates for "Queen Cheer" closed on Monday and this phase of the big event promises a very interesting time for the contestants and their supporters. A diamond ring will be presented to the Queen as a coronation gift.

This big event will open next Thursday night with the coronation ceremony and fancy dress carnival at "The Court of Queen Cheer."

The pretty baby contest will be one of the features of the big show. This attraction is in the nature of a photographic display and is open to all comers between the ages of one year and five years. Stocks the photographer will take the babies' pictures without charge to all entries. Vaudeville revue, band concerts

WILSON SUING COAST HOUSE

Bill for Onions Sold in 1921 By O.U.G. Subject of Dispute.

Robertson, Morris & Company, Limited of Vancouver is being sued by M. G. Wilson, trustee of the estate of the O.U.G. Limited in the sum of \$2,500 for three carloads of onions shipped that firm by the O.U.G. in 1921 and for which the Vancouver firm never settled on the ground that the O.U.G. had failed to deliver the full quantity of onions contracted for. This case will be heard in supreme court during Christmas week.

ST. ANDREW'S NIGHT GREATLY ENJOYED

Consistently and with the enthusiasm that inspires the Scottish folk the world over, the members of the local St. Andrew's and Caledonian Society and their friends gathered in the Parish Hall on Monday evening, December first, to commemorate the anniversary of their country's patron saint.

The hall was well filled and the first part of the evening was given over to cards. After an enjoyable and dainty tea, served by the lady members, the entire company entered with great gusto into the participation of old time dancing, tripping the light fantastic until the proverbial "wee sma'" hours of the morning. An added pleasure of the evening was the rendering by Mr. Ben Newton of two solos, both of which received well merited applause. The chairman, Mr. A. H. Steven, read a humorous contribution from the pen of Mr. Alex. McGowan, an enthusiastic member of the society, and who is spending some time at the Coast.

Announcement of the date of the reorganization meeting of the society was also intimated, particular stress being placed on the desirability of having a full attendance thereat, so as to decide whether the society should be continued. This meeting will be held in St. Andrew's church hall on Tuesday, December 9th at 8 p.m.

The assembly broke up with the singing of Auld Lang Syne, thus terminating another of the happy evenings for which the society has made a name for itself.—Cont.

Motorist: When making minor repairs get all wheels off the travelled road and stop where your car can be seen from both directions; otherwise you may stop longer than you anticipated.

by the Elks' band, prize dances and many novel innovations are provided and a dance every night after the other parts of the program have been run off.

REMOVAL OF BEAVERS HAS BEEN PROMISED

T. C. Farmers' Institute Holds Enjoyable and Profitable Meeting

Upwards of fifty members and their wives were present at the regular monthly meeting of the Trout Creek Farmers' Institute held at the School on Monday evening last.

The secretary gave a report for the delegation which met the Chairman of the Game Conservation Board at Penticton a short time ago, when a petition asking for the removal of the colony of beavers which dam up Trout Creek near its mouth, was presented. The delegation received a very sympathetic hearing and was assured by the chairman that the matter would receive his serious consideration and that the beavers would be taken care of.

The question of the selection of a councillor to represent the district was raised by one of the members and this gave rise to a lengthy discussion.

The business being disposed of the party devoted the remainder of the evening to games and music. The president, Mr. H. R. McLarty outlined a programme which he had been at considerable trouble to prepare. Old time games were entered into by all present with gusto. The three Embree brothers provided music. Community singing was very ably conducted by Mr. S. F. Sharp, and before the meeting broke up, tea, coffee and cakes were served, all going home with the satisfaction of having spent a most enjoyable evening.

During the evening the president made a very pleasing reference to the service rendered to the Institute in the past by Mr. Gilbert Thornber, and he wished him and Mrs. Thornber every success and happiness in the new field of labour which they are about to enter.

ONLY FIVE SIGNED LETTER

Summerland Growers Remained Loyal To Their Association

Only five Summerland people signed and forwarded to Premier Oliver the letter anonymously mailed to growers throughout the Interior with the object of opposing the Associated Growers' bill in the legislature.

Three varieties of fruits and two of plants were accepted for recording at the recent meeting of the Plant Registration Committee of the Canadian Horticultural Council. The fruits were the Sangster peach, the Golden Delicious apple, and the Newman strawberry. The George C. Crossland plum and the Lady Atholstan fern were the new varieties of plants.

WAR VETERANS PLAN TREAT

Christmas Tree and Entertainment For Children of Veterans

Children of Summerland veterans of the great war are to be given a Christmas tree and entertainment. At the regular meeting of the G.W.V.A. on Tuesday evening, this was decided upon. The event will be held during Christmas week in the G.W.V.A. hall. Comrade V. J. Barnard was elected chairman of the committee in charge and will be pleased to receive the names of all veterans' children in the district. The date of the entertainment will be announced later.

COUNCIL ASKING FOR INFORMATION

Wants to Know If Any Others Refused To Pay Towards Rates Fight

Action of the Penticton municipal council in refusing to contribute toward the expenses of the Railway Rates Adjustment Association occasioned considerable comment at the meeting of the Summerland council held on Monday. It was pointed out that a condition upon which Summerland made its payment was that others should pay their allotment and also that a statement of contributions should be furnished the municipality. The clerk was instructed to write the association for this statement.

GROWERS GET GOOD PRICES

Co-operative Returns For Pears Very Satisfactory—The Prices

Four thousand dollars has been distributed this week among growers of late pears, members of the Summerland Co-operative. Final statements accompanying the cheques show reasonably satisfactory prices f.o.b. Summerland.

D'Anjou, F \$2.80, C \$2.35, crates, \$1.38; Belle de Boscop, C \$2.18; Bosc, F \$2.17, C \$1.44, cts, \$1.18; Clairgeau, F \$2.27, C \$1.92, cts \$1.44; Keiffer, F \$2.10, C \$1.93, crates \$1.18; Louise Bonne de Jersey, F \$2.31, C \$2.12, crates \$1.36; Comice, F \$2.25, C 2.08, crates, \$1.28; Howell, F \$2.35, C \$2.18; King Carl, F \$2.18, C \$1.97; Winter Bartlett, F \$2.20, C \$1.93, crates \$1.18; Winter Nellis, F \$2.51, C \$2.12, crates \$1.27; Duchess, F \$2.25, C \$2.11, crates, \$1.39; Seckel, 4 bskt., .94 1/2; C \$1.20; Bergamat, C \$1.20, 4 bskt., .78 1/2.

The following deductions are made from the above prices; central handling charges, 8 cents, except on 4 basket packages, when the charge is 5 cents. Packing charges, including cost of package, paper, etc. 4 basket package, 38 cents; F and C grade packages, 55 cents, crates 45 cents. Members who delivered fruit to the upper packing houses are charged 2 cents a package for cartage to shipping house on all packages except the 4 basket crate, the charge in this case being 1 cent. One cent is withheld for central reserve and 5 cents a package for investment in packing houses, two 4-basket packages being treated as one package. The local makes a further reserve of 2 cents on boxes and one on the 4-basket crates.

HERE TO FIX RATES FOR EXP. FARM

Major McDonald and N. F. Norrington, representing the water branch, were visitors to Summerland this week, having come at the joint request of the Experimental station and the municipality to advise on rates to be charged the farm by the municipality for irrigation service.

Major McDonald had the unfortunate yesterday to collide with a telephone pole near the Anglers' club during the snowstorm, resulting in some damage to his car.

SHIP THREE CARS APPLES TO COAST

Summerland Co-operative shipped a carload of Wagners and a carload of mixed varieties of apples to Vancouver on Monday and on Wednesday a carload of Newtowns was started rolling to Victoria.

CANADA'S POPULATION STEADILY INCREASING

Canada's population has increased nearly half a million since the last census was taken in 1921. Prince Edward Island has lost 900 and the Yukon 600, the estimates giving every other province a gain. B. C. being credited with a population of 28,400 greater than in 1921.

Canada's total population for 1924 is estimated at 9,220,740. The population for 1921, according to the census, was 8,788,488, an estimated increase of 438,257.

A grocer says that some people who buy on time don't know when time leaves off and eternally begins.

REFUSES TO ASSUME SHARE COST OF FIGHT

Penticton Objects To Paying Allotment of Rates Adjustment Expense

Penticton municipality has refused to pay the sum asked from that municipality by the B. C. Railway Rates Adjustment Association, which was formed in Kelowna some time ago to present the case of the fruit industry of the Valley before the railway commission. The Adjustment Association allotted the estimated expenses of the campaign to municipalities, shippers, etc. throughout the district. Later, when the provincial government re-engaged G. G. McGeer, K. C., thus saving the association the expense of engaging Mr. McGeer, the assessment was reduced to twenty-five per cent of the original call.

We understand that the Summerland Co-operative and other local shippers made their contribution and the municipal council paid fifty dollars as their share.

Penticton municipal council has informed the rates adjustment association that it cannot see its way clear to pay the sum asked for and has pointed out that it was not consulted about the undertaking.

MUNICIPALITY PAYS HEAVY INTEREST BILL

Interest on municipal debentures made up the larger part of the budget account passed by the municipal council on Monday. The interest payment amounted to \$9,073. The requisition from the school board was for \$3,079.44 and the payroll was \$1,100.03. Other items brought the total up to \$14,232.98.

VETERANS WANT WAR TROPHY

Promise To Suitably Mount Guns If Removed To Own Grounds

Summerland G. W. V. A. wishes to obtain possession of the two guns, war trophies, now in possession of the Summerland hospital society. In a letter to the council, the veterans' association promises to suitably mount the trophies on the grounds of the association. Provided the hospital board is willing to consent to their removal from the hospital property, consent will be given by the council.

MAY EXTEND G. HD. FLUME EASTWARD

H. Sharman and Capt. A. M. Temple met the Council on Monday on the subject of improving irrigation service in their district. They were advised that the foreman has recommended an extension of the line running from Giant's Head to the J. "ait property to serve some of the property in the pipe for other properties.

TELEPHONES OFF ON HOLIDAYS

Consent has been given by the municipal council to the proposal of the Summerland Telephone company to give a curtailed service on Christmas and New Year's day. A letter from the Telephone Company was read at Monday's meeting, stating the operators had asked that the hours be cut down to 9 to 11 and 3 to 5 on each of these days. The company was willing to grant this provided the council approved.

It was pointed out that, in order to take care of any emergency calls, a buzzer service would be maintained except during the evenings, between 7 and 11.

Increase in World's Population

During the nineteenth century the population of the world grew from 440,000,000 to 1,000,000,000. It has increased at the rate of 20,000,000 a year during this century.

ASKS RELIEF FROM IRRIGATION RATES

Having Sold Most of Lot Would Have Rate on Remainder Cancelled

Kettle Valley Railway company, having sold to A. McGown a tract of land on the northeast side of the trestle approach to the Trout Creek bridge, has so notified the municipality. This piece of land is a part of the 10 acre lot on which the approach to the bridge is built. Another small piece lies to the southwest of the trestle. The railway company, pointing out that no water is used there, asks that it be relieved of any irrigation charge. As the system does not extend to that parcel of land the Council, discussing the matter on Monday, was agreeable to cancelling the rate but if this be done, it will be with the understanding that this service will not be revived at a later date.

CANNOT OFFSET THE ACCOUNTS

O.U.G. Must Pay To Bank Sum Due Union For Fruit Sold

Trustee and inspectors of the estate of the O.U.G. Limited, lost out in their appeal against the decision of Justice Morrison at the spring assizes, when he ruled that the trustee of the O.U.G. Limited, in bankruptcy, could not offset the charge of the Summerland Fruit Union to the O.U.G. in the sum of \$20,000 against the fruit returns payable to the Union by the O.U.G. The case was heard in Vancouver this week.

The decision in no way affects the Summerland Fruit Union, but will have a bearing on the value of the "pink notes" issued by the O.U.G. and held by members of the Union. The O.U.G. will now be required to pay to the Dominion Bank \$20,000 due the Summerland Fruit Union for fruit sold by the O.U.G. for the Union, the latter having assigned to the bank its accounts receivable.

Many Canadian Exhibits

A record number of entries from apple growers in Canada, 92, were received for the fourth annual im-

SEND EXHIBITS TO BIG SHOW

Local Poultry Association Represented at Provincial Fair

Summerland Poultry Produce Association has several exhibits at the annual poultry show being held by the British Columbia Poultry Association at Vernon on Wednesday, Thursday and Friday of this week.

Mrs. W. C. W. Fosbury, president of the local organization, is attending the show and looking after the local exhibits. A plate each of brown and white eggs are being shown; three cases were also entered and another case of eggs were sent up to make up other exhibits.

all of the ads in this newspaper. Learn what is new in merchandise and where it may be had at the best price. Buy now for Christmas Giving. There are many wonderful bargains listed by the different stores in this newspaper—you hold.

GIVE APPROVAL TO PROPOSED EXTENSION

Number of Morningside Houses To Be Served By Lighting System

Quite a portion of the Morningside district west of the Giant's Head road will be served with electric light when extensions recommended by the electric light committee and approved by the council on Monday have been completed.

Two extensions will be made from Atkinson's corner, one to serve H. S. Lewes and J. S. Campbell. Mr. Campbell will, at his own expense, and with the permission of Mr. Lewes, build the line from the Lewes residence to the road. The extension along the road will be financed jointly by the municipality and Mr. Campbell.

A second extension will follow the main road from Atkinson's corner to the Hutchinson corner to serve A. G. Munn, R. J. Hutchinson and Geo. W. Johnson. The cost of this extension beyond the \$180, \$60. per service which the municipality will pay, will be borne by the applicants. G. W. Johnson will, at his own expense, carry the line through the Hutchinson property to his own.

G. J. C. White, A. J. F. Anderson and C. H. Taylor will be served by another extension which will be made from the Ginat's Head road in the direction of these properties. Here again the municipality collects from the applicants the cost of extension beyond \$180, being the \$60. maximum per user fixed by the municipality.

At present the secondary line does not run out the Giant's Head road beyond A. Stewart's, but an extension will be made along the road to the Whitehead property, formerly the A. Davidson lot.

CO-OP HEADS IN SESSION

Meeting Today In Kelowna To Confer on Organization Matters

Messrs. Gray, Croil and White of the executive of the Summerland Co-operative are attending a conference in Kelowna today to consider a proposal that W. L. Macken be engaged to make a survey of the Associated and affiliated organizations. Each local was requested to suggest other subjects for the agenda, so that it is not known just what other subjects will come up for discussion.

MAKE AMENDMENTS TO WATER APPLICATION

Some weeks ago the municipal council advised the water branch at Victoria that it would withdraw its objection to the application of Messrs. Vorrier and Dotjen for storage rights on Canyon Creek, provided the quantity was reduced to 250 acre feet and that no water would be impounded later than June 15th in each year. The council has been advised that these conditions are acceptable to the applicants.

BADMINTON PLAYERS AT ORCHARD CITY

Ten members of the Summerland Badminton Club visited Kelowna on Wednesday, when matches were played with Kelowna badminton enthusiasts. Final scores have not yet been received, but it is believed that there is a considerable majority in favor of the Orchard City. While there, the local players were guests of the Kelowna Club, who proved themselves royal hosts, and the Summerland visitors report the best time ever enjoyed on such an outing. The Kelowna agricultural hall, where the games were played, has lately been remodelled and is now one of the finest halls in the province, having five splendid courts and excellent lighting arrangements.

Those who went up from here were Mrs. G. R. Hockham, Misses Jonn Cordy, Marley Hutchinson and Pam Marshall, and Messrs. P. G. Dodwell, F. A. Miller, R. M. Miller,

FOREMAN SUBMITS REPORTS ON SYSTEM

Gives Details of Work To Be Done On Flume—Costs Later

Detailed reports of repairs, improvements and new work that should be undertaken in connection with the irrigation system have been submitted by Foreman Tomlin to the municipal council. These have been referred to the public works committee for examination.

Mr. Tomlin is now busy preparing estimates of cost of all these sundry items and it is expected that the present council will refer the reports to the new council with recommendations that the work be carried out.

RAILWAY NOW PAYING TAXES

Ten Year Exemption Period Expired, Question of Assessment Raised

Summerland municipal assessment roll for 1925 has been completed, according to a report submitted to the council by the assessor, C. P. Nelson, and by motion was then adopted.

The assessor pointed out certain clauses in the Act with respect to assessment of railways, asking that they be referred to the court of revision for consideration. The Kettle Valley Railway had been granted exemption from taxation for ten years. The ten-year period expired the end of June last. The treasurer reported that a tax bill had been sent to the company for the half year July 1 to December 31, 1924 and that the tax had been paid. The bill amounted to \$588.

According to the Act, as interpreted by a number of municipalities, the land is assessed and the track is assessed at so much per single track mile as land. Land and track have not been shown separately on the assessment roll and the assessor apparently desires a ruling of the court of revision on this matter. The railway within municipal limits is assessed at something over \$5,000. to the mile for 5.43 miles.

The Act provides that telephone lines be assessed as land on the basis of \$75. per mile. The railway company's telephone line has not been so assessed and this will be referred to the court of revision for adjustment.

WAS HEIR-PRESUMPTIVE TO LORD TWEEDMOUTH

The recent death of the Hon. Coultis Marjoribanks at Vernon, makes the stepson of Sir Douglas Hogg, Britain's new attorney-general, the heir to the Barony of Tweedmouth, according to a London despatch. Hon. Coultis Marjoribanks, whose widow is now visiting her daughter, Mrs. R. V. Agur, here, was the uncle and heir-presumptive to the present Lord Tweedmouth, and leaving no male issue the next in line is the 24 year old son of Lady Hogg, who before her marriage to Sir Douglas was the widow of the Hon. A. J. Marjoribanks.

TRANSFORMER OIL COMING FROM EAST

Further Needless Delay In Resumption of Full Light Service

Summerland is not likely to have its full street lighting service revived until after Christmas, probably not until after the end of the year. The special oil which should have been put in the new transformer before it was shipped from the factory at Ontario, was shipped by freight on December first from Davenport, Ontario.

The Canadian stockies afford magnificent sport for the big game hunter. Grizzlies, bighorn sheep, and mountain goat abound.

Crows never enter a cornfield without posting a sentinel outside.

H. C. Howie, C. Noel Higgin and E. R. Faulder.

The annual Valley tournament takes place in a couple of months, when a large number of entries are looked for.

ASSOCIATED TO GET BILL THRU LEGISLATURE

Confident Bill Will Become Law—Has Second Reading

AMENDID TO SUIT ATTORNEY-GENERAL

Minister Forecasts Measure To Make Buying From Members Illegal

Associated Growers' bill now before the legislature was given second reading on Monday and it is confidently expected that the measure will be passed by the House this week. A compromise amendment agreed upon between representatives of the organization and the attorney-general was made to the bill before it was presented for second reading. The bill when passed, will provide that all contracts between the Associated, the locals and individual growers must be lived up to.

In this connection, the forecast made by the minister of agriculture of further legislation, is interesting. In many states of the Union and elsewhere, it is illegal for a buyer to offer to purchase from a member of a co-operative such as the Associated. The minister predicts similar legislation in this province.

ST. STEPHEN'S W. A. TAKES IN GOOD SUM

St. Stephen's W. A. held their Christmas sale of work, home cooking, candy and afternoon tea yesterday afternoon, from which very satisfactory proceeds were received. A children's stall, no article on which was priced over ten cents, proved very popular. Despite the bad weather a good crowd attended, but, as it is felt that quite a number who would otherwise have attended were unable to get out, the members of the W. A. are planning to give them an opportunity to purchase articles yet on hand, and will hold another sale next Wednesday, for particulars of which see our advertising columns. Total receipts of yesterday's sale amounted to \$155.

WILSON WINS RAILWAY CASE

Court Upholds His Decision That O.U.G. Estate Could Not Pay

In the appeal of the Illinois Central railway to the supreme court against the decision of M. G. Wilson, trustee of the O.U.G. Ltd. in bankruptcy, heard this week in Vancouver, the decision of Mr. Wilson, trustee, was upheld.

Several American railways had entered claims for undercharges made by them for icing service in 1921. Mr. Wilson refused to allow the claims against the estate. Hence the action taken by the Illinois Central.

Doubtless this decision will settle the question for all the railways concerned.

Australia's highest mountain summit is 7,353 feet.

BOX FACTORY AGAIN WORKING

Likely To Operate Throughout The Winter—Local Men Employed

Pacific Box Company's factory here is again in operation after being closed down for a few weeks. The plant resumed work the first of the week and will likely run continuously through the winter. It is probable that part of the mill may run a double shift. Mr. Grant, the mill foreman, has returned from Vancouver and is again in his old position. Three other men came from the Coast with him. The other members of the crew are all local men.

**SYNOPSIS OF LAND
 ACT AMENDMENTS**

PRE-EMPTIONS
 Vacant, unreserved, surveyed, Crown lands may be pre-empted by British subjects over 18 years of age, and by aliens on declaring intention to become British subjects, conditional upon residence, occupation, and improvement for agricultural purposes.

Full information concerning regulations regarding pre-emption is given in Bulletin No. 1, Land Series, "How to Pre-empt Land," copies of which can be obtained free of charge by addressing the Department of Lands, Victoria, B.C., or to any Government Agent.

Records will be granted covering only land suitable for agricultural purposes, and which is not timberland, i.e., carrying over 5,000 board feet per acre west of the Coast Range and 8,000 feet per acre east of that range.

Applications for pre-emption are to be addressed to the Land Commissioner of the Land Recording Division, in which the land applied for is situated, and are made on printed forms, copies of which can be obtained from the Land Commissioner.

Pre-emption must be occupied for five years and improvements made to value of \$10 per acre, including clearing and cultivating at least five acres, before a Crown Grant can be received.

For more detailed information see the Bulletin "How to Pre-empt Land."

PURCHASE
 Applications are received for purchase of vacant and unreserved Crown lands, not being timberland, for agricultural purposes; minimum price of first-class (arable) land is \$5 per acre, and second-class (grazing) land \$2.50 per acre. Further information regarding purchase or lease of Crown lands is given in Bulletin No. 10, Land Series, "Purchase and Lease of Crown Lands."

Mill, factory, or industrial sites on timber land, not exceeding 40 acres, may be purchased or leased, the conditions including payment of stamp duty.

HOMESITE LEASES
 Unsurveyed areas, not exceeding 20 acres, may be leased as homesites, conditional upon a dwelling being erected in the first year, title being obtainable after residence and improvement conditions are fulfilled and land has been surveyed.

LEASES
 For grazing and industrial purposes areas not exceeding 640 acres may be leased by one person or a company.

GRAZING
 Under the Grazing Act the Province is divided into grazing districts and the range administered under a Grazing Commissioner. Annual grazing permits are issued based on numbers ranged, priority being given to established owners. Stock-owners may form associations for range management. Free, or partially free permits are available for settlers, campers and travellers, up to ten head.

PEACHLAND NEWS

By Our Resident Correspondent

Many Citizens Pay Last Respects To The Late Mrs. Thomas Powell

The funeral of Mrs. Thos. Powell was held on Friday morning last at 10 o'clock. The service was conducted at the family residence by the Rev. Thos. A. Sadler. There was a very large turn out of friends who wished to show their respect to one who was held in high esteem by all. The deceased, with her husband and other members of the family came to Peachland from Regina and until comparatively recently has enjoyed fairly good health, being always of cheerful disposition and her sudden death came as a shock to her many friends from the fact that she had apparently been so well when they had last seen her. His many friends are deeply touched with sympathy for Mr. Powell in his bereavement and are glad to learn his daughter, Mrs. Inglis, is on her way to Peachland to stay for several months. Mrs. F. C. Whyte, a friend of the family, hastened in from Vancouver to do what she could for the household until Mrs. Inglis arrives.

After spending a short time in the hospital in Penticton Miss Ruth Brinson returned last week feeling somewhat improved in health.

Vernon Winger, Sam White and Martin Hendrickson motored up from Penticton last week, the latter two spending a couple of days back of Peachland hunting for a set of horns, which it is reported they were successful in getting, while Vernon took a truckload of household effects down to Penticton for the family. Vernon came back for the boys on Monday last.

One of the men working near here on the telephone line gang was reported to have had a leg broken, but it is stated now although the leg was quite badly hurt it was not broken. He was taken to a hospital for treatment.

CARBON MONOXIDE IN SMALL GARAGES

Danger of Exhaust From Engine In Small, Closed Space

Daily newspapers recently carried a news item of the death from carbon monoxide poisoning, of a prominent Baltimore man, who was found dead in his garage with the engine of his automobile still running. With the onset of cold weather such accidents will probably increase in frequency, says the surgeon-general of the United States Public Health Service, who warns automobile owners of the danger involved in running a gasoline engine in a small closed space for any considerable period of time.

In tests of the exhaust of a small 23 horsepower automobile engine, it has been found that it discharges approximately 25 cubic feet of gas per minute, samples of which gave an average of 6 per cent carbon monoxide, or 1.5 cubic feet of deadly carbon monoxide gas per minute. Of course larger engines will give off more. Now a ratio of 15 parts carbon monoxide to 10,000 parts of air is considered a dangerous concentration to be exposed to for a considerable time; and the small 23 horsepower engine in "warming up" and giving off only one cubic foot of carbon monoxide per minute would contaminate the air of a small, closed garage, 10 by 10 by 20 feet, to the danger point in about three minutes.

The Tactful Mendicant
 "You seem able-bodied and healthy," she remarked coldly; "you ought to be strong enough to work for your meals."
 "True enough lady," he replied. "And you seem beautiful enough to be in the movies, but evidently you prefer the simple life."
 "The dinner he got was delightful."

Interpreted
 He—Do you believe in signs and omens?
 She—Yes.
 He—Last night I dreamed you loved me. What does that mean?
 She—That you were dreaming.

 Adam had one thing to be thankful for. He never had to weed his pig's onion bed when the other boys were going fishing.

NOT AFFORD TO INSURE?
 Cannot afford a fire without insurance.
 Insure with
G. J. COULTER WHITE

Mr. Wm. Buchanan Jr. left recently for Robson where he has accepted a position as manager of a co-operative establishment. He is bettering himself in the change in that he will have the year round job there whereas the position in Peachland lasts only through the fruit season since the feed business has been discontinued. He will not have so much fruit to handle at Robson, but will have other produce. Mrs. Buchanan expects to follow a little later.

Mr. Alf. Ruffle was a visitor to Kelowna on Friday on special business.

Mrs. Trimble hurriedly left on Friday morning's boat, having received a wire to say that her father was ill and not expected to live.

Mr. Keyes returned from Kelowna on Friday last after a short time spent there at carpentry.

A few of the Peachland young people spent Friday evening in Westbank, enjoying a dance which the Westbank folks had advertised.

Miss Alice Wright returned home on Saturday morning from Penticton where she has been visiting friends and relatives.

Mr. and Mrs. R. E. White of Summerland were in town on Saturday last, Mr. White making some special business calls in connection with his paper the Summerland Review.

Mr. and Mrs. Cudmore and daughter Edna, motored to Kelowna on Monday to spend the day visiting and attending to a few matters of business. They were accompanied by Mr. Geo. McBean.

Mr. R. French of Vernon accompanied by a companion spent a part of two days last week at one of the cabins back of here and brought out two nice deer on Sunday.

Game Warden Sullivan was a recent visitor here on his way to and from official duties.

FAVORITE HYMNS AND THEIR WRITERS

"FIGHT THE GOOD FIGHT"

Not long ago a prominent preacher and lecturer, who during the past twenty-five years has given addresses or preached at most of the great universities on this continent, spoke of the decided popularity among students of hymns which have a martial ring. He placed "Fight the good fight" and "Onward, Christian Soldiers," in the forefront.

The writer of this hymn was Rev. John Samuel Bowley Monsell. He was born in Londonderry, Ireland, on March 2, 1811, and educated at Trinity College, Dublin. After his ordination in 1834 he held several clerical positions in Ireland, but soon removed to England, where he spent the remainder of his life. For several years he was the Vicar of Egham, and afterwards Rector of St. Nicholas, Guildford, in Surrey. Throughout his life Dr. Monsell was an earnest minister greatly beloved by his people. He found time for writing a good deal of prose and poetry. Altogether he published eleven volumes of hymns, but there is a great deal of repetition, so that the actual number of hymns he wrote is about three hundred. Of this number about eighty are still in use. Among them are: "Sing to the Lord a Joyful Song"; "Light of the World, We Hail Thee"; "O'er the Distant Mountains Breaking"; "Sinful, Sighing to be Blest"; "Holy Offerings, Rich and Rare," and "Fight the Good Fight," which is the best known of them all.

This hymn was written in 1863. Although it is so often sung at Church parades and such like occasions, it is distinctly personal and essentially spiritual. It is based on that well-known passage in 11. Timothy 4:7-8, where Paul wrote: "I have fought a good fight, I have finished my course, I have kept the faith; henceforth there is laid up for me a crown of righteousness, which the Lord, the righteous Judge, shall give me at that day; and not to me only, but unto all them also that love His appearing." A study of the four stanzas of the hymn will make clear how Dr. Monsell followed Paul's thought throughout the hymn.

Dr. Monsell met his death with tragic suddenness on April 9, 1875. His church at Guildford was undergoing extensive repairs, and he was taking great interest in the work. One day as he stood in the aisle, watching operations, a mass of stone-work fell from the roof, and struck him on the head. He was carried in an unconscious state into the Rectory, where he passed away in a few hours. What happened in the case of Augustus Toplady, author of "Rock of Ages" was repeated in the experience of Dr. Monsell. Each wrote a great deal of prose, which is forgotten, but each man wrote at least one hymn, which seems destined to become immortal.

C.P.R. IS BUYING "SUNBRITE" APPLES

Big Ranch at Centre Holding Fruit To Fill Railway Orders

J. L. Logie, manager of the big ranch at Okanagan Centre, spent a day or two at his home here last week. He states that he has disposed of all the apples except those which he is holding for C. P. R. His company is supplying the railway with large part of the western territory, table and news-dealer apples for a 'Sunbrite' brand apples are gaining an enviable reputation on the market, says Mr. Logie, because of their uniformly high grade.

Appointed Director Canadian Pacific

The recent election of Mr. Ross Huntington McMaster to be a director of the Canadian Pacific, filling the vacancy created on the board by the death of the late Lord Shaughnessy, is a recognition of the Company's part of his long-proved ability. Mr. McMaster is already vice-president and director of the Steel Company of Canada and director of the Northern Electric Company, as well as the Canadian Explosives Company. Born in Montreal in 1830, he has lived practically all his life in that city. He was educated at the Montreal High School and Collegiate Institute. His business career began with the Sherwin Williams Co. of which he became assistant to the vice-president and general manager in 1897 a post he held until 1903. In the latter year he was made assistant to the vice president and general manager of the Montreal Rolling Mills Company. On the formation of the Steel Company of Canada he was appointed manager at Montreal.

Making and Marketing Vinegar as a By-product

To stimulate interest in the possibilities of making profitable returns from a by-product now largely going to waste, and to help in standardizing methods and practices in making a uniform vinegar of superior quality, which would naturally find a ready market and build up a national reputation for Washington apple cider vinegar, the bacteriology division of the experiment station at the State College of Washington has prepared to furnish pure cultures and detailed instructions for vinegar making.

S. C. Vandecaveye, a clever young Belgian who is now acting bacteriologist for the station, has some interesting things to say about the work. He says:

"Many industrial concerns have found that the largest profits in their business accrue from the complete utilization of the waste products. The fact that in the fruit growing sections many carloads of apples are going to waste every year would most certainly be condemned by any commercial firm as being far removed from the principles of scientific management. In a state like Washington, where so many cull apples are on hand that they are often a burden, apple producers could well afford to pay more attention to making this waste product pay net returns.

"There is always a ready market for good old-fashioned apple cider vinegar, and there is absolutely no reason why Washington vinegar should not have as good a reputation as Washington apples. Considerable pains had to be taken to give the Washington apple its reputation, but one of the main factors in securing it was the uniformity of the product through careful selection and grading; and so it is with the vinegar. Its reputation depends entirely upon its uniformity and its high quality.

"The old way of making vinegar from apple cider by letting nature work its own way without control, results frequently in an inferior and undesirable product for which there is no market. Apple juice goes through two processes of fermentation before it becomes vinegar. When the juice leaves the cider press it is sweet, but upon standing a few weeks it becomes hard, possessing intoxicating properties. In other words, alcoholic fermentation takes place. This fermentation is caused by microscopic organisms called yeasts. They change the sugars into alcohol. If this hard cider is allowed to stand longer, however, it becomes vinegar. A second fermentation caused by little acetic bacteria takes place. The alcohol is changed into acetic acid which gives the characteristic taste of vinegar. The strength of the vinegar depends entirely upon the amount of sugar present in the apple cider, and upon the kind of organisms which happen to be introduced.

"Nature has a way of supplying the soil and various fruits with numerous kinds of organisms of all descriptions. Among these are yeasts and acetic bacteria which can always be found on the apple skins, and which under proper conditions produce the necessary fermentations to transform sweet cider into vinegar. But with these beneficial organisms are also various kinds of bacteria which destroy the sugars before the yeasts can ferment them. This is especially true in districts where the air is dry and rain scarce. The detrimental bacteria are often more resistant than the yeasts and acetic bacteria, hence they are predominant. That is one reason why the old way of making vinegar often results in a weak and inferior quality product.

"Fermentation products can be controlled, however, by the use of cultures. Bread is a fermentation product and nobody would ever think of making it without yeast which is the pure culture. Butter is another product going through a fermentation process. The creameryman who wants to make a uniform product would certainly never attempt it without using a prepared starter, which is nothing else than a pure culture. It is evident that a uniform vinegar of good quality can only be obtained by the use of pure cultures containing the beneficial organisms which should be introduced in overwhelming numbers to check the destructive action of the undesirable bacteria. Some people use bread yeasts, but they will not do, because they cannot convert all the sugars of the cider into alcohol. The so-called 'wino-yeasts' are the only ones known to be suitable for this purpose. The same holds true for the acid fermentation. A well-selected, pure culture of acetic acid bacteria must be used to assure the uniformity and high quality of the resulting vinegar. Nature's way can be

assisted, not only by introducing pure cultures, but also by controlling the temperature. The time of the fermentation processes can be reduced to nearly half if the temperature is kept at 70 to 80 degrees F. instead of at 50 to 60 degrees as is often the case when cider is kept in cool cellars.

"The two cultures, containing sufficient material to make a barrel of vinegar, can be obtained for a nominal price from the bacteriology division of the experiment station at the college. The charge is made just to cover postage and cost of preparation."

FOODS 'FOR VIGOR

No other food supplies the body with the drive, the vigor, which fat gives. Possibly that is one reason why the small boy always is so fond of doughnuts! They are especially good in cold weather, as fats are heating. Here is Marion Harris Neil's recipe for

RICH DOUGHNUTS

Sift before measuring 4 1/2 to 5 cups of flour. Cream 5 tablespoons of Crisco (or other shortening) and add gradually a cup of sugar, a cup of milk, and 3 well-beaten eggs. Sift together the flour, a teaspoon of nutmeg, 4 teaspoons of baking powder and 1 1/2 teaspoons of salt. Add, a little at a time, the egg mixture. Roll it out as soft as it can be handled. Cut, with the cutter and fry in hot shortening (lard, Crisco, etc.). The shortening should be hot enough to make a crumb of bread a good golden brown in sixty seconds. This recipe is enough for 60 doughnuts.

NUT DOUGHNUTS

To make 75 nut doughnuts, change the recipe by adding 1/4 cup sugar, 1 less tablespoon of shortening, 1/2 cup more milk, 1 less egg, 1 cup chopped English walnut meats, 1 teaspoon vanilla, same of lemon extract, 1 less teaspoon salt, and have the flour just enough to make a very soft dough. Sift with sugar after frying.

MOTHER'S DOUGHNUTS

Doughnuts "like mother used to make" have 1 egg beaten with 1-3 cups sugar, with a cup of milk and butter the size of a walnut added. Stir a teaspoon of soda and 2 of cream of tartar into flour enough to make a soft dough, with a pinch of salt, 1/4 teaspoon of nutmeg or cinnamon, then mix with the wet mixture, cut into rings and fry in deep fat. Lay them on brown paper to drain when you take them from the fat.

"ITALIAN WAY," 1705

Back in 1705 this is the way "fried cakes," then known as "fritters" (the word "doughnuts" does not appear in the literature of that day, so far as I can discover) were made in Italy: "Take a pound of Holland cheese of parmesan, grate it into a pound of fine flour, with as much fine biscuit-bread muskifed and beaten to powder; the yolks of five eggs, some rose-water, saffron, sugar, cloves, mace, cream; make of these well tempered a stiff paste, and rolling it into balls as big as wall-nuts, fry them with clarified butter."

MY GRANDMOTHER'S FRIED CAKES

This is the way my grandmother

LIQUOR STORES ARE NOW DOING HUGE BUSINESS

Two-Thirds of Money Taken Immediately Sent Out of Province

Government liquor stores in British Columbia have made a total revenue of \$6,673,150.53 between April first this year and November first, according to an answer tabled in the legislature by the attorney-general to a question asked by J. W. Jones, member for this constituency.

In this period the Pentiction store took in \$60,884.30; Kelowna, \$68,172.65; Vernon, \$89,876.15; Salmon Arm, \$25,861.95; Princeton, \$40,102.50; Grand Forks, \$41,706.45. Vancouver sales in this period totaled more than two and a quarter million dollars.

In this connection it is interesting to note that but a small portion of this high expenditure remains in the province, one-third of the total price remaining here. Out of every five dollars spent in the government liquor stores, \$3.32 goes to outside manufacturers and federal government for duty.

BALLAD OF FIVE LITTLE MERCHANTS

Five little dealers
Each kept a store;
One sold on "tick"—
Then there were four.

Four little dealers
Feeling sad but free;
One wouldn't advertise—
Then there were three.

Three little dealers,
One felt quite blue;
Failed to dress his windows—
That left two.

Two little dealers,
All rivals gone!
One forgot his overhead—
That left one.

One little dealer,
Decided he'd get
Lessons from experience—
So he's growing yet.

—Winnipeg Free Press.

Justice Mann of the state of Washington sentenced a speed artist to copy in long hand the state traffic codes, which run into 15,000 words. The culprit can speed all he likes to, so the punishment fits the crime.

made "fried cakes"—3 tablespoons of thick cream, fill the bowl with cold buttermilk, 1 cup sugar, 1 1/2 teaspoons soda, 2 eggs, cinnamon or nutmeg to spice it.

DOUGHNUTS IN 1859

Under the title of "Ladies Domestic Economy and Housekeepers Guide" printed in 1859 I find this direction for making doughnuts:

Take 1 pound of flour, 1/2 pound of butter, 3/4 pound brown sugar rolled fine, 1 nutmeg grated, 1 teaspoon ground cinnamon, 1 tablespoon brewer's yeast; make it into a dough with warm milk; sprinkle flour over it, and cover it with a cloth; set it in a warm place to rise, 1 hour or more. When light, roll it out to 1/4 inch thickness; cut it in squares or diamonds. Have a small iron kettle half filled with lard; let it be boiling hot. Drop in a bit of the dough to try it; if it is a fine color, drop in two or three of the cakes at once; keep the kettle in motion all the time the cakes are in, else the lard will burn; when the cakes are a fine color, take them out with a skimmer, and lay them on a sieve to drain.

Pat O'Hooley Sees A Glimmer of Light

Pat O'Hooley and Donovan the section boss, had finished their noon lunch and were reclining near the hand-car, smoking their pipes. "What's on your mind, Pat?" asked Donovan. "You seem as thoughtful as a Ouija board."

"Maybe I am," said Pat. "I'm considerin' fwhat th' Pota said. Ut runs somethin' loike this: 'Great minds t' insanity are close allied; an' but a thin partition doth th' brain separate,' sez he; an' I'm thinkin' there's somethin' in ut."

"Off the main line again, eh?" queried Donovan, with a grin. "Who left the switch open?"

"Well, I was down t' th' Insane Asylum last week, visitin' me cousin, Moike, who is wan of th' kapers," said Pat, digging thoughtfully in the earth with a stick. "He showed me all over th' institution; an' if ut wasn't for th' poor people an' th' deplorable condition most of 'em are in, ut would be a foine place t' spend an hour or so, fer iverythin' is as purty an' as restful as ye plazé. Whin we'd gone all over th' grounds,

fer yellow-backs an' comb all down th' loine.

"Point eight: Any man drawin' rough-house cartoons t' pizen th' childers' minds is t' be drawn an' quartered on th' public square.

"Point noine: Cut out the rotten movies; hang iverywan who carries a gun; an' force th' noosepapers t' print nothin' but th' doin's of dacin't people. Whin this is done, there will be a change in th' mentality of th' masses. They'll see that there's a whole lot of foine folk all about 'em—even on their own strate; an' there will be no necessity t' emulate th' toughs t' become famous; byes will grow up normal an' strong an' spind their leisure playin' in th' sand poiles instead of runnin' about yid automatics an' high-powered cars, stickin' people up. If me plan is followed t' th' letter, in foive years th' masses will be sane agin an' there'll be no nade fer me t' stay here in this House of Refuge. Fwhat do ye think of me plan, Mr. O'Hooley?" sez he, beamin' all over wid pride.

"Well, sorr,' sez I, 'if I wasn't crazy—an' I'm moighty sorry I am—I'd sure loike t' stay here an' talk this over wid ye, as yer conversation is most refreshin'.' sez I.

"Whin Moike takes me t' th' gate, I jerks me thumb backwards an' sez: 'Fwhat's th' nature of Mr. Dell's hallucinations?' sez I.

"'Him?' sez Moike. 'Oh, he belaves he's Solomon!'

"'Well,' sez I; 'he may not be as wise as Solomon, but he's got wan or two purty good notions at that!'

(Copyright 1924 by I. H. Holden.)

Canada's Educational System

"One of the things for which Canada is most to be congratulated is that she has established a system of education that compares favorably with any in the world. Canada is a nation of literates, she has a remarkably small proportion of illiterates," stated the Right Hon. H. A. L. Fisher, former minister of education in the British Government, when disembarking at Montreal.

This is Pat

Moike lades me up t' an old gittle-man sittin' under th' trees an' sez: "Mr. Dell, this is me cousin, Pat O'Hooley," sez he. "I can't trust him alone out of me sight. Would ye moind lookin' after him fer a short while? He's perfectly harmless!" An' Moike gives me a knowin' wink as he goes off on another job.

"Will ye have a chair, Mr. O'Hooley?" sez Mr. Dell, politely. "Ye don't reside here, I take ut?"

"Not yet," says I, maneinly; "but there's no tellin'."

"How long have ye lived out in th' world?" sez he.

"Purty much all me loife," sez I.

"Poor man!" sez he, wid a sigh. "Ye have me sympathy." Ut must be awful t' spend yer days wid all thim maniacs! Are ye a kaper or a nutti?" sez he.

"I'm jist wan of th' bugs," sez I, gittin' wise t' his drift.

"Ahl, a degenerate, I suppose," sez he, eyein' me closely. "Yours is a remarkable case, fer most looneys believe they're sane. But ye have all th' appearances of a nutt, an' I spotted ye at wance. Are ye iver violent?" sez he.

"Only whip somowan stales me whiskey," sez I.

"I see; I see," sez Mr. Dell, thoughtfully. "Well, me poor man, ut's too bad! But don't give up hope. I have evolved a plan that will restore th' sanity of th' people an' save th' world from roome," sez he.

"How can ye do ut?" sez I.

"By th' application an' assimilation of me Noine Points—I have jist a few less than President Wilson had. Would ye loike t' hear 'om?" sez he.

"'Indado I would,' sez I pretindin' t' humour him.

"Listen!" sez he, takin' a peck around. "Don't be surprized; th' world is totterin' t' a fall an' ut will take drastic measuror. Me first point is:

"'Dissolve all political parties at wance; arrest th' spollamin an' grafters an' put 'em t' breakin' stone—If we kupo on makin' stivvers we'll nade widor roads.

"'Point two: Hire three business min t' run th' government; if they don't make good, kick 'em out.

"'Point three: As money is th' root of all evil, do away wid ut—an honest man will pay widout money.

"'Point four: Reform th' court proceduro; cut out th' rotten spots, throw th' rist away an' begin agin.

"'Point five: Shoot all th' yellow noosepaper min; ut will be a big job, but th' army nades rifle practice.

"'Point six: Make ut a midemennor t' write in a noosepaper a story of a riot, crime, divorce, scandal, or family rukus of any kind, on pinality of instant death. Th' people have had their minds pizenod wid this stuff too long, now.

"'Point seven: Make another hunt

ONE TELEPHONE FOR EVERY NINE IN CANADA

Canada has one telephone for every nine persons. The number of telephones in the Dominion in 1923, according to figures just published, was 1,009,203, or 11.03 per 100 population. In 1922, telephones aggregated 944,029, or an average of 10.53 per 100 population. Of the provinces, British Columbia stands highest with 15.57 telephones per 100 population. Prince Edward Island is lowest with 6.08.

The cub reporter wrote a long, flowing article on milk and the editor condensed it.

Sure Proof

Waiter—Why, sir, do you think that is an incubator chick?
Guest—No chicken that ever had a mother could ever get as tough as that.

Motorist: Be sure that your lights are not defective or glaring; it's no joke driving into a blinding glare, as you yourself know.

Unwelcome Publicity

No longer will moving picture directors be permitted to film members of the Royal Mounted Police, in the act of "getting your men" as he does in blue trousers and red jackets, if the Chief Constables' Association of Canada has anything to do about it, for in an address before the association such unwelcome publicity was frowned upon by Col. Starness, commissioner.

Pretty Close

The foreman looked up and down. "Are you a mechanic?" he asked. "No, sorr," was the answer. "O'im a McCarthy."—Montreal Daily Star.

Typewriter Supplies AND Office Stationery

- Typewriter Supplies in great variety as to quality, color and weight.
- Mimeograph & Bonds Like all our other papers, we buy these in mill sizes, and do our own cutting and boxing.
- Manuscript Covers Cut to any size. Stock to suit your requirements.
- Blotting Paper We carry a good stock in mill sizes and can fill your order for a big desk sheet down to the smallest signature blotter.
- Adding Machine Rolls We stock only the best and the price is no more than is generally charged for inferior rolls.
- Ledger Binders Also Transfer and any other binders supplied to your specifications on short notice.
- Ledger Sheets And any other ruled forms you may require.
- Envelopes All standard sizes stocked; regular sizes in several grades.

BUTTER WRAPPERS Stock forms, or bearing your name and address.

Civic Loyalty

Loyalty is a creed, a duty and a sentiment. Particularly is this true of civic loyalty. It is a creed because the loyal person says: I believe in my home town, what it is, what it stands for, and what it does. Loyalty is a duty because it implies allegiance. Every resident of a community, by the very fact of his citizenship, is bound to obey the laws of the municipality. Loyalty is a sentiment because it implies affection, love and enthusiasm. These three are not expressed merely in shouting or boasting. Loyalty to Summerland must be lived.

The Summerland Review

Established August, 1908.
 Published at Summerland, B.C., every Thursday by
 THE REVIEW PUBLISHING COMPANY, LIMITED
 Ralph E. White, Editor and Manager
 An independent family newspaper covering Peachland, Summerland and
 Naramata and adjacent districts.

Member of Canadian Weekly Newspapers Association.
 Member of British Columbia Selected Weeklies.

Subscription Rates—In British Empire, in advance, \$2.50 per year; six
 months, \$1.40. To U.S.A. and other countries, \$3.00 per year.

Advertising Rate Cards and information respecting territory and samples
 of paper mailed upon request, or may be seen at the office of any advertising
 agency recognized by the Canadian Press Association.

Advertisers must have copy in by Tuesday noon in order to insure
 changes for standing advertisements. New display advertising copy can
 be accepted one day later.

Correspondence—Letters addressed to the Editor and intended for publication
 must be short and legibly written on one side of the paper only.
 The longer an article, the shorter its chance of insertion. All communica-
 tions must bear the name of the writer, not necessarily for publication. The
 publication or rejection of articles is a matter entirely in the discretion of
 the Editor. No responsibility is assumed by the paper for the opinions
 expressed by correspondents.

Typographical Errors—In the event of a typographical error, advertising
 goods at less than the proper price, the newspaper will furnish letters to
 be posted in the store stating the correct price, but goods may not be sold at
 the price printed and the difference charged to the newspaper.

Thursday, December 11, 1924

CHRISTMAS BUYING

Just on the eve of buying for Christmas it may be well to say that Summerland merchants will be better prepared than ever to take care of the trade. They are receiving new goods every day, and will soon be "full up to the top." Some of them, maybe, have received all their surplus holiday stock, but we believe that all the goods which they will handle, especially goods to cater to the Christmas trade, have not all arrived.

Each year, through the columns of The Review, principally, local business men tell the public a portion of the bargains which they have to offer them, which will preclude their buying out of town.

It is well known that the mail order houses have been filling local homes with their holiday offerings, but the wise local person has learned that it is wisdom to buy at home, where you can get what you want, when you want it, and a guarantee that it is right, your money back, or the article exchanged.

UTILIZING CULL APPLES.

Many tons of cull apples are taken to the packing houses every year, sorted out from among the best and hauled away. All this means expense. One often wonders if the grower or the shipping house could not utilize these apples in a way that would produce some revenue.

The subject of the manufacture of by-products has often come up and been discussed. This week we are publishing a brief article on the making of apple vinegar. This article was written by an expert connected with the Washington State College and prepared for the Washington fruit grower, but it is equally applicable to the Okanagan.

We would like to see someone make a start here in the production of apple vinegar and are sure that any interested person would be given every assistance by the Washington State College scientist.

LOYALTY TO THE JOB.

Loyalty is the obligation to give the best that is in us. When we are loyal to our business connections we must be true to every principle for which it stands, with a fidelity which nothing can swerve or deflect, and our loyalty must flow out to every individual who has a part in its activities as well as to all who may be influenced.

THE TOWN'S REPRESENTATIVE.

Lots of men and some business men do not appreciate their local paper as a thing of value except to the owner of the paper, and that is where their vision needs doctoring. The newspaper travels, and is the only representative of the community that is always working at the job.

Before long the only grounds considered essential for starting a divorce suit will be that the parties are married.

CREATING APPETITE FOR FRUIT.

Nelson Daily News: An example of what may be accomplished in increasing sale of fruit by means of advertising is given in the report of the first year of the "Eat More Fruit" campaign by the Fruit Trades Federation in Great Britain.

British Columbia apple producers have been doing some advertising, through the Associated Growers, though the campaign has been restricted and, curiously enough, has not touched the big fruit-growing centres, though fruit consumption could be increased in Kootenay and Okanagan tremendously if the necessary advertising were carried out.

In the report of the British advertising campaign it is stated that this is the largest co-operative fruit advertising campaign ever launched in Great Britain, and during the past season the peculiar virtues of oranges, apples, lemons, pears and grapes have been brought home to more than 12,500,000 people daily and nearly a 100,000,000 weekly by press advertising.

The success of the campaign is testified by letters from brokers, shippers, wholesalers and retailers throughout the country, and by the fact that it has just been renewed on an even more extensive scale.

NEWSPAPER INCOME.

Trail News: A newspaper's income is principally from the sale of publicity (advertising). This is the only way an editor has of making a living. It costs somebody something for every line that goes into a newspaper. When an editor publishes something that helps a cause or a people, he is donating just so much of good, hard money. Had you ever thought of it in the way pointed out?

The Second Column

BY PATRIOT

WHY WAIT ON GEORGE?

This is a pretty good town, as towns go. We will admit it, and are proud of it.

But there is one fly in the community ointment that prevents us from advancing as rapidly as we should.

Everybody is willing to have things done, but wants to "let George do it," and when George reaches a certain point he balks. He gets tired of carrying the whole load.

What we need is a greater spirit of co-operation, a willingness on the part of each one to do his or her share in the advancement of our community interests.

In every community there are always a few who are willing to work for the public good. They are the Georges.

There are also a lot of others who are willing to let them do it. They are not Georges.

Once in a while we read of some town like Summerland that keeps booming and shoving right along, regardless of conditions or handicaps.

Such a town is full of Georges, and because the Georges are so numerous none of them is overworked and there is no occasion for balking.

Why can't we all be Georges in Summerland? There is room for improvement, and we have plenty of people with the brains of George.

THE WAY OF THE WORLD.

The editor goes on week after week boosting the town and community and advocating the doctrine of trading at home. The business man pats the editor on the back and says that's the right idea; tell it to 'em. He then calmly tells the newspaper man he does not require any space in the paper and a day or two later sends an order to an out of town print shop for a supply of stationery. Funny world, isn't it?

ADVERTISING.

Advertising creates good-will, not in unrelated units, but in the mass. It fosters, and even commands, fair dealing.

It establishes the confidence of the dealer and the consumer alike, not by hundreds, but by millions.

And, advertising like any other form of creative energy, work best and produces most, when under experienced direction and intelligent restraint.—N. W. Ayer & Son in the Literary Digest.

ARE YOU HUMPING OR DUMPING?

The psychologists are talking now, hence we would like to have the class give strict attention because it is a very deep subject.

The psychologists tell us that man has a dual mind—the conscious and the sub-conscious. You have heard that before? Very well, then, we will pass it.

Without pasting any labels on ourselves or even hanging on to the other fellow's coat tails, you and I know that we are constantly making mental records and packing them away somewhere for future reference.

Every optimistic, hopeful, pleasant and courageous record you make, will be of wonderful and powerful assistance to you when the grey days come, every time in fact when you are inclined to have the "dumps."

Every pessimistic, doleful, unpleasant and fearful record you make, your conscious mind will drag forth from its cubby hole to damn you every time an opportunity presents itself. "Poppy cock," perhaps you say and you may also add that you do not take any stock in the two mind, conscious and sub-conscious business anyway.

All right brother, so be it, but if that is your position, you are bucking up against an array of facts that some day will stun you.

During the past strenuous year or two you have observed some men who stood the gaff unusually well and some who did not. One man was bumped just as hard as the other; one man smiled and went on, the other bowed his head and sagged. Wherein lay the difference? Temperament you say; possibly, indeed probably, heredity. All right, we will grant you 25 per cent as the result of these causes, but the previous mental records made, must and do account for the balance, the 75 per cent.

We either make or mar our own lives by our thoughts and that is just as sure as that green apples cause rashes.

Peru passed a law compelling every male to work at road building one to two weeks a year, depending on age, or to pay enough extra tax to hire somebody else to do the work. The law is working splendidly, the Peruvian government reports. A network of good roads is being developed. . . . Many a man in our civilization who "stood for" the military draft during the war, would violently oppose being drafted for work in peacetime on behalf of the community. Why?

About the only way to keep daughter from crossing her knees is to make her wear cotton stockings.

The bloom of youth in that schoolgirl complexion never ran back over the ears and up above the eyebrows.

British Columbian Glad To Get Home

Ironic Farewell Paid Los Angeles and California by Canadian

(G. W. in Vancouver Province)
 In a glorious southern twilight our great ship glides out of the harbour and turns silently, seaward bound.

Eastward, the lights and laughter of a city fade away as a deepening mist, rose-grey in the golden sunset of the Pacific, falls like a silken curtain from the heavens. Far in the west the ocean murmurs and we face the breeze with heads high, filling our lungs with the tang of the sea. We are leaving California.

Goodbye, Los Angeles, I'm going home.

Goodbye, wondrous city of the south, where homes are like the temples of the gods—fit symbols of the deity of wealth. Goodbye, happy hearts with waiting tears, making merry in a world's great playground. Goodbye, soft lights, o'er thoughtless dancers in a shrinelike room where hearts go mad. Goodbye, kind friends with misty eyes waving a silent "bon voyage" from the pier.

Goodbye, California. I'm going home.

I am going away from heat and desert dust that they call "climate"—from blatant bores called boosters—from dens of graft called summer resorts, and debauchery called pleasure.

I am sick of hearing stale romance called history—whining coon songs called music—of seeing strange, ill-ved creations called art, and feeling murder in my heart at the sight of a teen age girl drinking boozie with a rogue.

Goodbye, California. I'm going home.

I want to go to a church again where people assemble for worship and not to attend a performance. I want to go where Sunday is a holy day and not prostituted by amusement pirates. I want to live again where life is sane and kind and true, where "nature's heart beats strong among the hills"—where God's own doorstep is not all cluttered up with signboards, tourist camp litter, flivvers and khaki breeches.

I am leaving a land of breathless haste, where residents do nothing in the time they save. A land of crowded Sunday theatres and empty churches—a land of pitiful youth, godless parents and old-looking children. A land of free divorce, unpunishable crime and Hollywood.

I am going to a land of quiet homes, respected laws and sacred vows—where children have manners and mothers—soft voices. Where fruit has flavor, flowers have fragrance and women virtue. Where orderly people transact business in an orderly manner—not wasting half their time in useless haste and the rest undoing costly errors.

Goodbye, California. I'm going home.

Goodbye to a land of new language in growth—of split infinitives, slang and crossbred words. A land where politicians have aims instead of principles, where exaggeration is called humor and people gape in bewilderment at irony.

O, California, land of reversed ethics—where envy is more to be desired than friendship—where hospitality is a form of robbery—where every human instinct has a dollar mark before it—I bid you farewell!

GOOD MANNERS

"Success without culture is like old-fashioned strawberry shortcake without whipped cream." It has no flavor," says Lillian Eichler, author of one of the best authorities on etiquette.

"There are certain little courteous observances, certain social formalities that bespeak the true lady, the true gentleman. Some of us call it good form. Some call it culture, some etiquette. But we all admit that it makes the world a better place to live in.

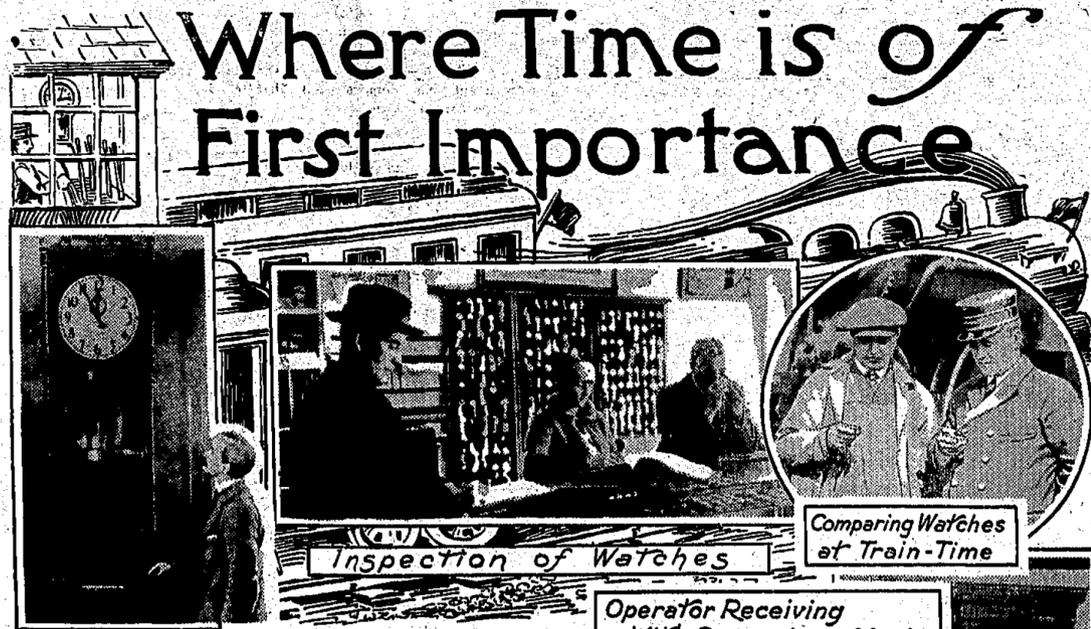

"In Italy young men and women are considered 'ben educato,' not when they can read and write, but when they know the established forms of convention—when they can show by a correct dignity and ease of manner that they are perfect in their knowledge of the rules of good society. And, after all, don't you yourself judge people by what they do and say, and wear? Don't you read in their manner and appearance the secret of their inner worth? Isn't character and disposition revealed in the outer personality?"

Peculiar Evidence

Dad (sternly)—Where were you last night?

Son—Oh, just riding around with some of the boys.

Dad—Well, toll 'em not to leave their hairpins in the car.—The Shaft.

Chief Operator Sending With Master Clock

Operator Receiving With Comparison Clock

EVERY one who has occasion to travel and every one who thinks at all—which is, we submit, another way of saying every one in this broad Dominion of ours—has marvelled, at one time or another, over the exactitude with which the vast number of trains on our Canadian lines are handled safely and punctually. Express, local, special, freight, construction and other trains are forever plying to and fro along these lines, leaving the same stations and utilizing the same switches within a few minutes of one another, yet delays and accidents are extremely rare. This efficiency, which is primarily dependent on exact punctuality, cannot be achieved unless all clocks and watches used by those responsible for handling trains agree and are all strictly on time.

How is this accuracy maintained? Obviously there must be an elaborate organization to deal with it, for a railroad company cannot afford to take chances in such an all-important matter. The Canadian Pacific Railway, for instance, recognizes this and has perfected an extensive department employing scores of men who devote all their energies to checking and adjusting the Company's official clocks and watches. Some details of its work are interesting.

The official title of this aggregation of experts is the Time Service, Vision, Color Sense and Hearing Department. In this department there is a Chief Inspector for Eastern lines and one for Western lines, each with a separate office. From these offices the work of setting, regulating and repairing all clocks

and watches is directed and controlled.

For setting the Company clocks, the department employs a method which is illustrative of the wonderful possibilities of modern science. In certain stations, round-houses and yard offices there are clocks known as comparison clocks, so called because they have been officially designated as clocks at which conductors, engineers and others may safely set their watches. In the head telegraph office of the Canadian Pacific, in Montreal, there is an electrical master clock, connected with a similar clock kept in the observatory of McGill University, Montreal. The latter clock's accuracy is maintained by astronomical calculation and it, in turn, controls the master clock in the Canadian Pacific head telegraph office. From this office, lines radiate to every Canadian Pacific telegraph station in the Dominion.

At a certain hour daily, the McGill master clock indicates the correct time by means of a telegraph instrument maintained specially for the purpose in the head telegraph office. The signals commence strictly on the stroke of 11.54 a.m. From that instant to ten seconds short of 11.55, one beat is sounded upon every second. A pause of ten seconds follows until, on the stroke of 11.55, two beats are sounded. This performance is once repeated, ending on the stroke of 11.56. To the Chief Operator is delegated the great responsibility of transmitting these signals to the hundreds of telegraph operators at the comparison stations throughout the system. It is his duty to fit at a key connected with the instruments of all these operators and repeat the signals as they are received.

In the meantime, the operators have been standing by, awaiting the signal. Every telegraph instrument on the immense transcontinental Canadian Pacific system, as the time draws near, is absolutely silent. At this dramatic moment, the Chief Operator literally holds the system in the hollow of his hand. The beats begin. The operators at the comparison stations watch their clocks as the signals flash westward to Vancouver and eastward to Halifax. They note the number of seconds error, slow or fast (if any), registered by the clock; the signals cease and normal work is resumed.

If the clock is more than ten seconds out, the operator at each station adjusts it to correct time. If it is less than ten seconds out, he announces the fact by placing beside the clock a card which indicates the amount of error. To prove to officials that he is not neglecting the job, he must then make an entry of the rating of the clock on a special card, which covers a period of one month. At the end of the month, the card which also contains notes as to when the clock has been wound, set or regulated, is sent in to the Time Service office concerned, thus enabling the Chief Inspector to maintain a close check upon all clocks.

Should a clock need adjustment by experts, it is at once replaced by a new clock from headquarters. Station clocks, other than comparison clocks, upon which the public depend for catching trains, are similarly checked, as are also the clocks in offices which dispatch telegrams and orders requiring timing. In the larger offices, such as the Company's headquarters at Windsor, St. Station, Montreal, the clocks are electrically set and wound by one master clock.

Comparing Watches at Train-Time

Operator Receiving With Comparison Clock

Watches carried by employees responsible for the punctuality and safety of trains are also checked regularly and, in addition, are periodically cleaned. Strict regulations govern who shall carry watches and also the makes and grades permitted—no less than 12 makes and 75 grades are approved. Forty-six watch inspectors, to whom approximately 7,000 men report with their watches at fortnightly intervals, are employed by the Company on its Eastern lines alone, all responsible to the Chief Inspector, who keeps a complete record of each watch. All of which leads one to wish that one's lady friends would appreciate the importance of punctuality to the same extent and were also compelled to report regularly to the railway watch inspectors, even though their failure to arrive at the rendezvous on the dot is not usually a matter of life and death, as it is with the railway Companies!

B. C. Farmers Could Make Money From Nut Growing

By J. W. WINSON
In The Vancouver Province.

King Solomon was gifted with wisdom exceeding that of many other men, and in recording his wise deeds he mentioned that "he planted gardens of nuts."

It is the calamity of the ages that wise men have few followers.

This country is studded with gardens of apples, gardens of berries, gardens of flowers and vegetables, but very, very few gardens of nuts.

The learned men have found that Solomon's nuts were walnuts, the Persian variety now known as English walnuts. Solomon, being wise, did not moan at the many years of waiting before he could eat of the nuts from his garden.

Perhaps wisdom engenders patience, or at least a philosophy of life which is content to do a good thing for the coming generation!

The walnuts he grew, thrive mightily in England; they grow as well, or even better on this Pacific coast. From California to British Columbia are grown the finest nuts in the world—for it is admitted that no imported nuts equal the home-grown kernels.

So far in its history, this province is satisfied with foreign nuts, Solomon having so few followers in his nut wisdom.

Afraid of Late Maturing

Perhaps the chief reason for this lack of popularity among growers is the idea that walnuts are too long a time maturing.

This is not hindering wiser men in Washington state from planting out more acres every year.

With modern grafting principles and well-chosen varieties, a nut orchard can be brought into bearing as soon as an apple orchard.

It is stated also, that the proceeds from an acre of nuts do not compare at all favorably with the returns from an acre of apples or pears. This is undoubtedly true; so are the retorts that less care, less labor and outlay are expended on the nuts, which have not to be sprayed frequently nor pruned annually, and which can withstand years of neglect if there is food in the soil for them.

Unkind critics have said that fruit growing is popular in British Columbia because it allows ample time for leisure. No objection can be made against nut-growing on this count, because summer care is less, and harvesting is less hurried. Nuts do not rot on the trees, get over-ripe or spoiled by the first frost. They need not be shipped the day they are picked. They can wait comfortably without cold storage until the market is ready for them.

French Variety Most Favored

The modern walnut is a French aristocrat known as the "Franquette," having a soft shell and a plump kernel.

On the market it has a pale-brown clean-looking shell—that has been bleached. Bleaching does the kernel no good, some think it does harm by drying it out, making it "old." Local nuts will obtain greater renown by keeping their original color—and flavor.

The Japanese walnut is a smaller variety that is not popular because of its harder shell. It is certain that a smaller kernel, more difficult to extract will not be so well liked as the other. But the Jap has an advantage in quicker growth and earlier maturity.

A tree will produce nuts seven years from planting as a nut. But for "pickling," the Japanese is quite as good as the English-Persian-Franquette. Pickled walnuts are a delicacy always in demand. For this purpose the nuts are gathered while green, before the shell hardens and the whole nut, husk, shell and kernel is used.

Walnuts are the handsomest of shade-trees for lawns, drives, avenues and boulevards. Solomon probably saw the wisdom of putting shade and beauty to profit.

Chestnuts Meet With Little Favor

Chestnuts have not met with much favor in this country. There are comparatively few Italians here to demand them.

Hitherto the planting has been unsatisfactory because seedling trees have been disappointing in production. Few chestnut trees will bear without grafting and not all nurserymen graft them. Again, chestnuts insist on group formation for pollination.

All nut trees are trick in the fertilization of their blossoms, and single trees are seldom satisfactory.

Filberts, by their very name, create a longing to crunch their kernels. There are signs that these are coming into favor with fruit growers. The

time-objective can not be laid against them. Some will have nuts the first year out of the nursery.

As they are cultivated hazels, the novice fears less to plant them, but this difficulty with the hazel has led to mistakes in the few, the very few groves that have been planted in this country.

Wild Hazel Has Many Stems

The wild hazel is a shrub—a cluster of many stems. The cultivated nut has been allowed to grow the same way. Modern methods improve on this by cutting out all sucker shoots as they appear and training the filbert as a symmetrical orchard tree.

In the filberts are many varieties, from cobs to the long horns. "Filbert" is happy corruption of "full beard," relating to the husks which grow out beyond the shell and join above it. In the "cobs" the shell is rounder and the beard shorter.

No one variety does well alone, this is the main reason for failures.

The catkins appear early, the blossoms late. There is always untoward weather in the early spring months when the pollen is blowing. The hazels insist on cross-fertilization, and sometimes even in mixed rows, there will be some misses. Some growers ensure their crops by grafting a branch of a different variety on each tree.

Squirrels Are Troublesome Thieves

There is yet one difficult problem to face in this country with the filbert class, which apparently did not bother Solomon. At least he makes no mention of the jays.

Squirrels will thrive where the plantation is near bush land. They will come repeatedly, but they can be trapped or shot, and will not bother much in settled districts.

But the jay has wings and a crafty mind. He will come from afar with a jaunty air, squawk in delight when he finds the nuts, and jeers at any objections made.

What if he is not "protected" and may be shot without "permit"? More are coming continually through the September weeks of ripening. They are going southward a little in comfortable stages, or are emerging from the woods as the berries ripen, and they do love nuts, even as they delight in little potatoes, and one of their arts is splitting open the shell before it is quite hard, to fatten on the milky kernel. They have not yet learned that walnuts are good also.

In laying out a fruit orchard or berry patch, the location is a great consideration.

The land must be level, near a good road for transportation, accessible for help in picking and for quick shipping.

These requirements are less necessary in nut growing. Hilly land and poor land will grow nuts, though they respond to cultivation and fertilization. There is no straining and ladder-work in picking, unless for pickling. Nuts are best gathered by clearing the ground under the trees, then waiting until they fall themselves. Probably Solomon knew of this too, when he planted his "garden of nuts."

MILK IMPORTANT TO SOUND TEETH

Milk is an important factor in building and maintaining sound teeth, and sound teeth have a direct bearing on health. The liberal use of milk in the diet of children, and of adults as well, is urged by a nutrition specialist.

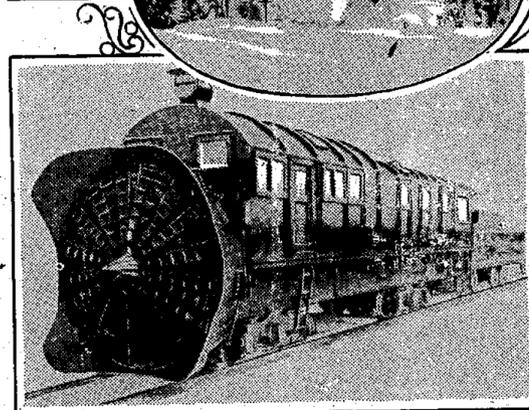

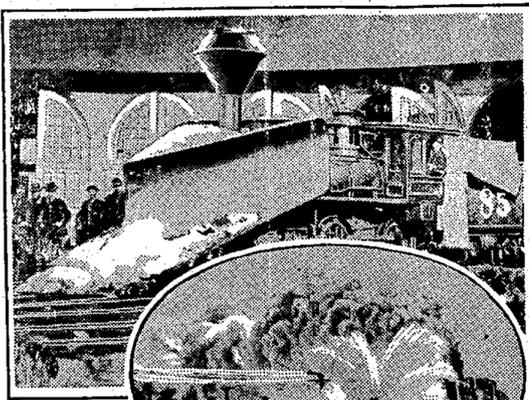

"The mineral salts and vitamins found in milk and certain leafy vegetables are indispensable to sound teeth in children," says Dr. Percy C. Howe, at the head of the research work in the Forsythe Dental Infirmary in Boston, Mass. More than 10,000 children are examined and treated annually there.

Experiments have shown that children who consume liberal amounts of milk have sound teeth and are far more healthy than children not drinking milk.

Research work shows that without milk and leafy vegetables the jaw bones, which are the framework supporting the teeth, do not develop properly. The teeth that follow are imperfect in character, irregular in shape, soft and porous. They begin to decay early in life.

Once sound teeth are developed the use of milk will help to maintain them. Dr. E. V. McCollum of Johns Hopkins University, one of the leading dietary scientists of the world, says that the vital food elements found in milk are necessary for both expectant and nursing mothers, to build the proper foundation for sound teeth in children.

Fighting the Storm

Above—One of the first engine plows. Centre—A push plow in action. Below—One of the Canadian Pacific rotary plows, of latest design.

IN certain portions of Canada and the United States, the successful and regular movement of trains during the winter months often depends upon the use of special equipment, the purpose of which is to remove snow and ice from the tracks, and from the direct right of way. As a matter of fact, no railroad in Canada or in the northern parts of the United States could hope to operate without a complement of snow-fighting equipment.

In a study of snow-fighting equipment it is interesting to note that its development is very largely due to Canadians and to Canadian railways, although snow conditions in Canada are no more severe than those met with on roads passing over the Rocky or Cascade Mountains in the United States, or through the border States. The principal types of snow-fighting equipment may be generally classified as engine and pilot plows, which are attached to the engine-front or pilot, push plows, self-contained units mounted on trucks and pushed by a locomotive, wing plows, spreader plows, machine plows which includes the rotary machine, flangers, ice cutters and snow sweepers.

As far as can be ascertained, the first snow plow ever built was of the push plow type. As this plow derailed frequently, an endeavor was made to take advantage of the weight of the locomotive, and thus the engine plow was evolved.

The present rotary plow used on roads, which have to fight deep drifts, snow slides or other conditions beyond the capacity of push plows, is the most effective instrument that has been developed for that purpose. These plows can work their way through deep cuts and slides where it would be impossible for any other type of plow to lift the snow and, in addition, can throw the snow clear of the track. Seen in action, these plows present a rather picturesque appearance when viewed from the front. The rotary plow, as now used, is a development of a revolving snow shovel, patented in 1869 by Mr. J. W. Elliott, a dentist, of Toronto, Ont. This elementary device was modified by Orange Jull, of Orangeville, Ontario, and the Jull rotary was taken up by the Leslie Brothers, also of Orangeville, who constructed a full-sized model which was tried out in the Parkdale yards of the Canadian Pacific in 1884. The success of this trial led the Leslie Brothers to have made for them a complete plow which was tried out by the Union Pacific Railroad during the winter of 1886-87. This plow was the forerunner of the modern rotary.

For many years the Canadian Pacific Railway has constructed its plows of steel. It was the first railway to build and use an all-steel plow, and the service given by this type has been mainly responsible for the all-year communication between eastern and western Canada, the heavy snow fall experienced at times, particularly in Ontario and through the Rockies, being now an impediment to traffic.

RAILWAY COMPANY OFFERS REWARD

In addition to the large cash reward which is offered by the provincial government for information leading to the conviction of a person or persons responsible for the explosion on the Coast-Kootenay line on October 20th, when Peter Verogin, head of the Doukhobor colony, and a number of others were killed, the Canadian Pacific Railway is offering a reward of one thousand dollars.

He (ardently)—"Have you never met a man whose touch seemed to thrill every fibre of your being?" She—"Oh, yes, once—a dentist."

Criticism

He who sitteth upon a Throne
Or in a Presidential Chair,
Hearing the complaints of the Multitude,
Hath nothing on him
Who sitteth behind the Wheel
Of the family car
With his wife in the Back seat.

—Jason, Brooklyn Life.

Motorist: Use discretion. The fact that you had the right-of-way won't bring anybody back to life, least of all, yourself.

Advertising vs. Bad Management

The best advertising possible will not help a badly managed business, says the editor of Radio Merchandising. There is no substitute for intelligence and far-sighted executive effort in retail business. Advertising can not be used in place of hard work and well directed effort; but, when added to them, makes a combination irresistible. Some business houses lack many things that are material to success, and advertising only turns the limelight on such shortcomings and hastens the end. Advertising should be used to turn attention to the modern, progressive, well-directed firm with an X-ray beam that illuminates its smooth inside workings and displays its qualities to advantage.

NARAMATA NEWS

Current Events of Town and District

The annual sale of work of the Women's Auxiliary was held in the Unity Club on Thursday afternoon, and was well attended, the receipts reaching a total of \$85. The Rev. H. A. Solly and Mrs. Solly came over, the latter opening the proceedings with a short speech. The display of needlework was presided over by Mrs. George Cook, Mrs. Rushbury and Mrs. Mason, the home cookery stall by Mrs. Weaver and Mrs. J. M. Robinson, and the candy department by Miss Nessie Rushbury and Miss Dorothy Robinson. Miss Gordon was on hand with the prize packet goose and did a land office business. Tea was served by Mrs. Cross, Mrs. Steele and Mrs. Horswill, while the president, Mrs. Languedoc superintended affairs in general.

Miss Nessie Rushbury returned on Wednesday from her trip to Vancouver.

Mrs. Howard Reaids is on a visit to her brother in Seattle.

Mr. Donald McKay returned on Saturday from the Coast after a few weeks trip. He made the journey out by auto, having to go around through Oregon on account of the passes in B. C. being closed. He visited Water St. and found prices for apples good, but learned that Jonathans were falling down very badly.

Mrs. Aikins of Stanstead, Quebec, is visiting her son and daughter, Mr. and Mrs. Carroll Aikins.

Mr. and Mrs. Len Smith have a son, the new arrival coming early on Sunday morning. Mrs. T. Williams is in attendance on Mrs. Smith.

The Rev. H. J. Armitage officiated at the Union Service on Sunday afternoon, preaching on the conversion of the Keeper of the prison. Announcement was made of Anglican Service for next Sunday. Mr. Percy Thornber of Summerland presided at the organ.

A surprise party visited the home of Mr. and Mrs. Myers on Monday evening, to congratulate the latter on her birthday. About thirty visitors were present, and a merry time was spent.

MOVIES

RIALTO THEATRE SECURES "IN THE SHADOWS OF WHITECHAPEL"

Hepworth Films of London have produced "In The Shadows of Whitechapel," conceded to be the biggest of England's big melodramas. London and the provinces have taken it to their hearts and practically overnight this sensational motion picture production has attained a smashing success. The English press, without a dissenting voice, have endorsed and actually labelled this the biggest of England's big melodramas. The musical settings are a joy to hear, old familiar music hall melodies made famous by the headliners of the varieties of the Old Country are heard again for the first time in many years. A vivid picture of the slums with the joys and sorrows, love and laughter, their quaint mannerisms and quarter "lingo" which is presented in a true story of life in London. "In the Shadows of Whitechapel" will be shown at the Rialto theatre Friday and Saturday.

AT THE EMPRESS

"Lone Wolf" the popular adventure story by L. J. Vance, will be shown at the Empress Theatre on Monday and Tuesday, 15th and 16th. With such stars as Jack Holt and Dorothy Dalton in the leading roles, action centres largely in Paris and Washington, and sensational daring and romance combines everything the most exacting movie audience could desire. Cleverly played by the most competent cast of stars ever assembled.

"Captain Blood" Rafael Sabatini's most popular novel, will be put on the screen at the Empress on Wednesday and Thursday, 17 and 18.

Not Ready to Retire

"A man should not retire until he is more than 100, or so incapable mentally or physically of doing his job," says Dr. E. J. Skado-King, almost 100, who has refused to resign as medical officer of health of Ilfracombe, Devon. "I am hale and hearty and do my work every day," he told civic authorities. "Age is largely a mental state, and my mental state is fine."

Keep right on performing good acts regardless of the ingratitude with which they may be received.

For Merchants Only!

The merchants who do the biggest Christmas business this year will be the merchants who through newspaper space tell shoppers about the new, exclusive and reasonably priced merchandise in their stores.

Newspaper readers agree that the well illustrated ad is the most interesting ad and it is the ad which first attracts their attention. We are equipped to furnish special Christmas illustrations for every line of business.

Just a word over the phone at your elbow will bring us with proof of cuts, layouts and copy suggestions. For newspaper display, catalogue, bills, cards or posters. Order your Christmas Printing now.

The Pedlar's Pack

By AUTOLYCUS

"A Snapper Up of Unconsidered Trifles."

The Winter's Tale, Scene II, Act IV

The vast gulf stretched between the ideal and the real has evidently been shown to Emma Goldman, formerly known as "Red Emma" during the five years she spent in Russia after her deportation from the United States. The result of her sojourn in the land where she expected to find the millennium in good working order and human bliss pervading the very atmosphere, is that freedom is there a "preposterous superstition" and that "the suppressed masses in Russia are silenced under the heavy hand of Bolshevism" as never under the rule of the Czars. Unlike the lady lecturer who felt quite competent to speak glowingly in favor of Bolshevism and all its works after a three months personally conducted tour of the Soviet paradise, Emma speaks from the experiences of five years, during which she went all over Russia and observed the conditions under which its people exist. Incidentally she visited the prison camps of Siberia, and saw "thousands upon thousands of men and women and even children tortured and slowly dying because they dared to uphold an opinion." Our lady of the ninety day holiday trip seems to have missed such little trifles as these, but "Red Emma" as an ardent Bolshevik, doubtless had more freedom of observation. She is now domiciled in England, where she has gone to "tell the truth about Russia," and proposes to use her pen and power to emancipate the men and women of that country from Bolshevism. It is a laudable ambition, and may be best served by showing the Red elements in Britain how egregiously they have been misled as to the actual results of the Soviet Saturnalia. Miss Goldman can add point to her itinerary by drawing attention to the recent admissions of Rykoff and the growing sentiment against Trotsky whose modified ideas are thought likely "to disintegrate the proletarian dictatorship." Meantime she will be well advised not to try to evolve some new dream of "liberty" from her inner consciousness, as faintly indicated by her somewhat ambiguous complaint that "the party now in power in Russia has emasculated revolutionary Russia." The lady has shed her one-time robe of red and is now not even clad in the pale pink of socialism, but the color of her next garb may still be a matter of conjecture.

A recent editorial in a Vancouver daily contained a reference to what it chose to call "the proverbial tinker's curse" and in THE MALIGNED doing so betrayed TINKER, an amusing misconception of a very familiar phrase. The writer was evidently reluctant to use the shorter word, but a fuller knowledge of the real origin of the expression would have removed his misplaced sense of delicacy. In the old days the travelling tinker carried, as part of his equipment, a little flour with which he used to make enough dough to form a circular barricade or dam to prevent his solder from running over the portable table he used when at work. At the end of his job he would sweep this dough off as being worthless—hence the real meaning of the reference to petty matters as "not being worth a tinker's dam." When the word "curse" is substituted, an element of profanity is injected which was not present before, and the actual sense of the phrase is lost. There is also an inference of a contemptuous estimate of the tinker which seems rather hard on that extremely useful operator. The travelling tinker of by-gone days was probably a person of observation, arising out of the opportunities afforded by his experiences in various localities and among his many customers. If I am not mistaken, it was a travelling tinker who wrote "The Pilgrim's Progress."

If there is a moral to this elucidation, it is the conclusion that it is better to call a spade a spade than refer to it as an implement employed in the pursuit of horticulture.

Mr. Fred Jacob, writing in "The Presbyterian Witness," gives expression to some reflections which apparently arose with CANADIAN the recurrence of that BOOK WEEK. Annual period called Canadian book week. Seeing that the object of that institution is the bringing of Canadian writings into special notice, some remarks concerning their development must necessarily be interesting, and Mr. Jacob's observations are decidedly worth noting. Reading between the lines of his article, a certain feel-

ing of disappointment on his part is easily seen, but this is tempered with a hope that better things are on the way in Canadian literature. At present he seems to see an "arid waste" in the fiction of Canada, and objects to the general excuse of our smallness as a nation as the chief cause. He thinks we are too fond of making that excuse, and points out that "smaller peoples than ours have produced immortal literature." Here he is out of accord with Sir John Willison, who has recently been writing on the same subject, and who regards our limited market as one of the worst handicaps. I am inclined to take Mr. Jacob's view as being nearer the truth, for the simple reason that the "market" for any really great book is the wide, wide world, and a Canadian writer who produces such a work, will certainly not lack readers. There is a great deal in the remark that Canada is essentially a land of opportunity, and that the chief aim in view has been the making the most of those opportunities. That aim is, of course, per-

fectly reasonable, but it serves as a considerable handicap to our artistic growth.

Some of the criticisms made by Mr. Jacob are quite uncompromising in their candour. Referring to the Canadian novels of recent years he finds that they have mostly been written to fit "certain popular requirements," that "their English is flat and colorless" and that their narratives are inaccurate and unauthentic. In other words, they are largely amateurish. He claims that the most interesting books, and those most sincerely descriptive, are those dealing with French-Canadian life, the best being written by a Frenchman who was not born in Canada! Even the Northwest Territories, brimful and running over with romance, have not as yet inspired one single book which will live. Personally I cannot recall any story of that country more attractive than Ballantyne's "Snowflakes and Sunbeams" published in England fifty years ago!

When our critic writes of the "village life" novels, superficial and in reality great book is the wide, wide world, and a Canadian writer who produces such a work, will certainly not lack readers. There is a great deal in the remark that Canada is essentially a land of opportunity, and that the chief aim in view has been the making the most of those opportunities. That aim is, of course, per-

Fire Blight

By M. S. MIDDLETON, B. S. A. District Horticulturist

Growers in the Okanagan Valley are fairly familiar with the appearance and destruction caused by Fire Blight in the orchard. It is often called Pear Blight, but will attack Pears, Quinces and Apples alike. Some varieties of these fruits are more susceptible than others, but there are none of the leading varieties that are immune.

It is a long time since we have had a serious outbreak in the Valley, but a little of it still persists despite the efforts of the growers and the officials of the Department of Agriculture to stamp it out. The Fire Blight campaign put on each year by the Department of Agriculture is on again this year. A thorough inspection will be given to all orchards and after a careful inspection of the trees, if they are found to be free from this disease, a blue certificate will be posted in a conspicuous place on the property.

The disease is strictly a Dry Belt trouble. The cause is due to a minute organism (Bacillus amylovorus) which multiplies rapidly in the soft tissues of the host during the fast growing season thereby killing them. The disease is carried over the winter season in the marginal areas of cankers on the large limbs or branches, often referred to as "Hold-over" cankers. If left, in the Spring these hold-over cankers become active, produce a yellowish gummy exudate which swarms with bacteria, and the inoculation of this into healthy parts by insects, rain, careless handling, etc., results in numerous new infections.

Control

Eliminate most susceptible varieties wherever possible. Avoid cultural methods which will produce excessive growth. Keep down insect pests. Remove all suckers or water sprout growths which may afford a short cut to the vital part of the tree.

In cutting out blighted branches it is well to allow a considerable margin (usually about a foot) below the visible symptoms of infection and the place where the cut is made; otherwise all the bacteria may not be removed and the disease may develop again below the cut. In removing cankers from the main branches a margin of two inches above,

and the removal of all discoloration in the cambium below the canker, and one inch at the sides, is recommended as safe. It is always preferable to remove the whole canker where it will not seriously affect the symmetry or balance of the tree. Cut surfaces and tools should be disinfected with a solution of One part of Bichloride of Mercury (corrosive sublimate) and One part Cyanide of Mercury to 500 parts of water. These chemicals are corrosive to all metals and should be carried in a bottle, and used with a swab. They are obtainable from all druggists in tablet form. Use great care with these chemicals as they are deadly poisons.

The work will be carried on in conjunction with the quinquennial Orchard Survey being taken by the Horticultural Branch in 1925.

The co-operation and support of every grower is asked for in the Fire Blight "clean-up," and in the Survey information. The latter is data of great value to the Department of Agriculture and will not be used for Assessment or taxation purposes (as is sometimes suspected), but will be treated as strictly confidential.

Teacher—Suppose your father gave your mother twenty dollars and then took five dollars back again. What would that make?

Tommy—All kinds of trouble.

FREE

A Wonderfully Interesting and Practical Course of 20 Lessons by Mail on

COOKERY ARTS and KITCHEN MANAGEMENT

To Every User of

MAPLE LEAF FLOUR

FOR BREAD, CAKE & PASTRY

In addition to the excellent baking results which Maple Leaf Flour always guarantees, you can now secure in every bag a coupon to apply on the valuable Free Course on Cookery Arts and Kitchen Management which contains all the essentials of a college course in Domestic Science.

This course is so thorough and practical that it requires little or no explanation outside of the lessons which are mailed to you each month. But it is so original it will set you thinking and you will undoubtedly decide to ask Anna Lee Scott to help you with actual problems which arise in connection with household management, or in preparation of special dishes for special social affairs.

You Can Ask Anna Lee Scott any time during the five months you are taking the course for advice about any special recipes you may want—about any cooking problem—about the conduct of any social affair—in fact any inquiry pertaining to the preparation and serving of food for any occasion will be answered personally by Anna Lee Scott without charge.

Think what a wonderful service this will be. It is absolutely free to every woman who sends in the four coupons entitling her to membership in the Maple Leaf Club.

HOW TO JOIN THE MAPLE LEAF CLUB and Enroll for this Valuable Course.

Coupons will be found enclosed in every bag of MAPLE LEAF FLOUR. (24 lb. bag—1 coupon; 49 lb. bag—2 coupons; 98 lb. bag—4 coupons.)

Send only four coupons addressed to the Maple Leaf Club, Maple Leaf Milling Co., Limited, Winnipeg, Manitoba, and you will be enrolled without one cent of expense as a member of the Maple Leaf Club and receive the first four lessons in the course. Other lessons will be sent in four monthly instalments—4 lessons each month. (20 lessons altogether.)

You pay no money for this course. All lessons are sent postpaid. You study lessons when and how you choose. No blanks to fill in. No examinations or correspondence required. You may write in for advice, however, and Anna Lee Scott will gladly answer inquiries regarding any household problem.

MAPLE LEAF MILLING CO., LIMITED
WINNIPEG, MANITOBA

Anna Lee Scott

Now you can secure the personal advisory service of this famous Domestic Science Authority Free.

Anna Lee Scott, a noted authority on Cookery Arts and Kitchen Management, and Director of the Maple Leaf Club, has written a wonderfully interesting course which is offered free to members of the Club.

Once you have seen this course, you will be amazed that it costs you nothing. Never before have so many new household ideas and unusual suggestions for preparing and serving food been gathered together as in this course, comprising 20 lessons, which is offered free to members of the Maple Leaf Club.

GROWERS HEAR ADDRESSES ON LEAF ROLLERS

Two Pests of This Name—Some Methods of Control

Kelowna.—Control of leaf roller by means of oil sprays was dealt with in a very thorough manner at a recent meeting held here under the auspices of the East Kelowna branch of the B.C.F.G.A., addresses on the subject being delivered by Mr. Evans, of the provincial department of agriculture, and Mr. Venables of the Dominion department of Agriculture.

Mr. Evans said the disadvantage of oil sprays was their unreliability, for a slight difference in the quality of the same brand of oil might completely alter the effects of the spray, and at present the oil refiners could not guarantee complete uniformity.

The department was working on home-made sprays, he stated, and last spring at Vernon they found that a spray of paraffin oil with kaysso, an emulsifier gave excellent results against scale and leaf roller. There was no fruit bud injury and the spray was very cheap, but he could not at present advise its general adoption.

Time of Application—The time of application was most important. Although some growers had used oil in the pink stage, he considered it unsafe. The best time was just before the buds began to swell, in a normal year, March 1 to 15. Frost after the application of oil did not do much damage unless the temperature went down towards zero. He thought more harm was done by hot days alternating with cold nights closely following the application of the oil. The oil softened the bark and made it more liable to dry out.

Mr. Venables described the difference between the fruit tree leaf roller which remains on the tree in the egg state for nine months and can only be combatted with oil sprays and the oblique-banded leaf roller, which is on the tree in the egg state for only three weeks and requires for its control arsenate of lead applied in the clusterbud or calyx stage. He then gave an interesting account of several varieties of parasites which attack the leaf roller in the caterpillar stage.

Platinum is the only precious metal that is known to be heavier than gold.

NEW PUMPING PLANT DOES FAST WORK

The new engine and pump for the Paradise Flat winter domestic water service has arrived and been installed. Conn. Johnston states that but one and a half hours pumping will be required to fill the tank. Members of the council expressed the opinion at the last meeting of the board, that Paradise Flat residents should provide themselves with tanks to be filled at each time of pumping, so that the pump would not have to be started so frequently.

DEATH BY FOOD POISONING

A little boy has just died on a farm near Coulee, and three others of the family are critically ill, after eating preserved fruit and tomato pickles. One of the daughters put aside the jar of fruit just after it was opened, saying it was "spoiled," but her mother tasted it and declared it all right, so the family ate it. Every little while there is some such tragedy reported in the papers. It is hard to say too emphatically, if there is any question whatever that a dish of food is not right DO NOT EAT IT. Better to burn up a few cents worth of food than to risk a precious life.

"Everyone must eat, so everyone is a possible victim of food poisoning," said Dr. Victor Burke, of the State College of Washington, head of the bacteriology department recently.

"Recent outbreaks at Walla Walla, Wash., Cambridge, Ida., and Albany, Ore., have attracted attention. Nearly all such outbreaks are due to carelessness or ignorance, and are preventable. The causes are numerous. Briefly, they may be classified thus: 1, naturally poisonous foods, such as mushrooms and toadstools; 2, poisonous chemicals, such as strychnine and arsenic; 3, food infections due to specific bacteria in food which set up infection in the intestines; 4, however, destroys the organisms in bacterial poisons or toxins, substances produced in the food as the result of the growth of bacillus botulinus. The result of eating such food is a poisoning known as botulism.

Bacteriologists and medical men are discarding the old term 'ptomaine poisoning.' Its use denotes a lack of exact information or knowledge. This type of food poisoning comes from eating contaminated fresh foods either raw or poorly cooked, or contaminated after cooking. Botulism is closely associated with the eating of preserved foods, nearly all of which may harbor the organism and toxin of bacillus botulinus, regardless of the method of preservation. Outbreaks of botulism have resulted from eating many kinds of preserved vegetables, fruits and meats, in either glass or tin containers, in liquid, paste, or smoked form.

"The word 'botulism' means 'sausage poisoning.' Sausage, ham, cheddar cheese and cottage cheese have been found to contain the toxin. Dried fruits and vegetables have caused no cases yet.

"These facts should not cause anyone to give up eating preserved foods, or putting them up for future use. But they suggest the need of improved methods of preserving, and of making very careful examination of all preserved foods before eating them."

JUMBLES

Here is a Jumbles recipe taken from the Ladies' Companion of 1859, one of mother's treasures:

Rub to a cream a pound of sugar and half a pound of butter; add eight well beaten eggs; essence of lemon or rose-water to the taste, and flour to make the jumbles stiff enough for rolling out. Roll out in powdered sugar about half an inch wide and four inches long, and form them into rings by joining the ends. Lay them on flat buttered tins, and bake in a quick oven.

(Those were the days before eggs were .5 or .6 apiece, and butter was not .60 or more a pound. I think grandmother made her own butter and kept hens.)

RICH JUMBLES

A richer recipe from the same source says:

Rub to a cream a pound of butter and a pound of sugar; mix with it a pound and a half of flour, four eggs and a very little brandy. Roll the cakes in powdered sugar, and bake.

Written in a long, old-fashioned script in faded ink and signed "Sara"

I find the following recipe for Scotch Scones (spelled "Seons" in the copy) in the back of a Household Companion for 1705:

Not for Her to Say.

The value of travel often depends upon who travels.

Mrs. Williams, who had recently returned from abroad, was attending an afternoon tea which was given in her honor.

"And did you actually go to Rome?" asked the hostess.

"I really don't know, my dear,"

replied Mrs. Williams. "You see, my husband always bought the tickets."

Pay-Day

'Twas the night before pay-day And all through my jeans I was searching in vain For the price of some beans.

But nothing was doing, The milled edge had quit— Not a copper was showing, Not even a 'jit.'

Forward! Turn forward! Oh time in your flight, Make it tomorrow just for tonight! —Motor World.

HARVEY & ELSEY

Head of U.B.C. Faculty of Agriculture Advises Economy In The Orchard

Dean Clement Addresses Summerland Growers on Farm Management.

"SPECIALIZE ON YOUR MAIN CROP"

Favors Centralized Control in Co-operative Marketing Of Crops.

Under the auspices of the Farmers' Institute a very interesting address was heard on Thursday night, when Dean Clement of the University of B.C. spoke on Farm Management. Though there was not so good an attendance as had been hoped for, due no doubt to the condition of the weather and the fact that no announcement other than late phone messages, had been given of his coming, a fair crowd was present.

Stressing the necessity for decreased overhead expense, the speaker strongly emphasized concentration of effort on the main crop, though in many instances sidelines such as keeping of dairy cows, pigs or poultry were an advantage. Speaking particularly in relation to orchard work as carried on by apple growers in the Okanagan, Dean Clement favored intensive cultivation rather than large acreage, thus reducing overhead and eliminating waste. Though he believed that natural by-products of agricultural lines such as fruit growing should be taken more into consideration, at the same time, the speaker reminded his audience that this should not mean the difference between profits and loss as in some large concerns such as Swift's, where this was actually the case.

Wide Variation in Overhead
Dean Clement told of government experiment work being carried on at the present time quoting overhead expenses ranging all the way from 23 cents to over two dollars on a box of apples, according to the proportionate cultivation and development of sidelines in relation to acreage.

Taking it for granted that no two men would carry on orchard work in exactly the same way, the speaker urged development along scientific lines with the greatest economy possible. Disagreeing with those who favored mixed farming as being the most successful, Dean Clement maintained that with all abilities directed along the line of the main crop, and remembering that a few cents saved here and there in expense items amounted to a considerable total saving, agriculture should be made just as successful as any other line of business.

Organized Co-operative
Though not speaking definitely on the subject, Dean Clement indirectly expressed approval of the co-operative idea of marketing, especially favoring centralized control, one reason being that the condition of the various locals could then be readily checked up and kept in good working shape. He believed in the appoint-

WANT IMPORTED HONEY MARKED

Honey Producers of Okanagan and Kamloops Seeking Amendment.

Okanagan honey producers, members of the Okanagan Division of the British Columbia Honey Producers' Association, which met recently in Kelowna, has endorsed a resolution recently adopted by the Kamloops branch of the provincial association, requesting an amendment to the act covering the sale of honey, to the effect that all imported honey be labeled with the name of the place of origin, as well as the net weight of contents of container.

LAND AND TO SPARE

Of the 800 million acres in Canada fit for farming, one-third is in farm holdings, only one-sixth is cultivated, and 250 million acres await the plow.

ing of an efficiency expert to keep the locals working uniformly and if any discrepancies in costs appeared to keep in close touch with all expenses and reasons therefor.

Advocating of standard marketing grades was also approved as a means of success. In this connection, the speaker expressed the opinion that lower freight rate and resultant widening of home markets would prove more beneficial to the fruit grower than the British preference and urged that everything be done toward reduction of these rates.

BANK WILL NOT APPEAL ON 'PINK NOTES'

Decision of Trustee of O. U. G. Estate Will Not Be Changed.

Dominion Bank will not pursue further its claim for preference over the holders of "pink notes" issued by the O.U.G. Limited, now in bankruptcy.

M. G. Wilson, the trustee of the O.U.G. estate, had ranked the note holders and the bank on the same footing in respect to their claims against the estate. With this the bank was not satisfied and took its case to court. As reported in these columns a few weeks ago, the court upheld the decision of Mr. Wilson. At that time the bank gave notice of appeal, but it has since decided not to proceed further with the case.

WALTERS LIMITED MAKE PAYMENT

Walters, Limited issued statements a few days ago covering returns for several varieties of apples. Cheques in settlement accompanied the statements.

Following are the net prices paid the growers: Wealthy, of \$1.18, f 20, comb .77, C .73, crates .63; King, crates .70; Jeffries, crates .70; Snows, of \$1.35, f \$1.15, crates .80; Wismer, crates .70; McIntosh, of \$1.30, f \$1.10, comb \$1, crates .75.

ASSOCIATION'S EGGS WINNERS

Puts Up Excellent Display Takes Three Prizes In All.

Three prizes were captured by the Summerland Poultry Produce Association at the annual provincial poultry show held last week at Vernon. First prize was taken by a plate exhibit of one dozen brown eggs and second prize on a plate of white eggs. For a display of eggs, second prize money was awarded to the local organization, only because it was without a competitor. This display is pronounced as one of the notable features of the annual show.

In an advance report of the event, the Vernon News last week in referring to this says: "A display of eggs by the Summerland Poultry Produce Association is well worth attention; the careful grading as to size and color should cause these eggs to sell at a premium on a discriminating market." Mrs. W. C. W. Fosbery, president of the Summerland association, set up this display. Four cases of eggs in considerable variety were used.

Four and a half cents a box for oranges and seven cents a box for lemons have been appropriated for advertising in the 1925 budget of the California Fruit Growers' Exchange.

Australia is helping out its fruit growers by a loan of £200,000, or one million dollars.

McLARTY LEAVES ON AN EXTENDED TOUR

To Give Paper at Ottawa Gathering—Visit Washington and Colleges.

Mr. H. R. McLarty, officer-in-charge of the field laboratory of plant pathology, with headquarters at the Dominion Experimental Station here, left on Saturday morning for Ottawa where he will attend a divisional conference of Dominion plant pathologists, and will also present a paper on a bacterial disease at the meetings of the Canadian branch of the American Phytopathological Society. From there, he expects to proceed to Washington, D.C., to attend the meetings of the American Phytopathological Society of which he is a member, and also to visit the laboratories of some half dozen of the larger American universities.

Quite a number of citizens took advantage of the offer extended recently to learn to sharpen a saw. This was another of the lessons in the course given under the extension work of the local school board and the department of education.

FELLOW SCOT REMEMBERED

J. G. Robertson Surprised with Purse When Boarding Train.

On the occasion of his departure for California on Friday last, Mr. J. G. Robertson was waited upon at the K.V.R. station by a deputation from the St. Andrew's and Caledonian Society and presented with a handsome pocket book containing fifty dollars as a parting gift from that society. The following letter was enclosed: Mr. John G. Robertson,

Dear John.—It is our extreme pleasure to advise you that at the re-organization meeting of the St. Andrew's and Caledonian Society you were unanimously re-elected honorary president for the ensuing year. On that occasion the members present were made aware of the fact that you were about to take a jaunt to California to see your lassie and thought it would be nice to convey to you in some form or other their good wishes for a safe and pleasant journey.

In the name of the 'immortal Robbie' we ask you to accept this little

NOW A CRIME TO TEMPT A CO-OPERATOR

Associated Growers' Bill Has Been Passed by the Legislature.

Bootlegging of fruit by members of the Associated has been made positively illegal by the passing on Monday of the Associated Growers' bill introduced in the legislature by A. O. Cochrane, member for North Okanagan.

By the passing of this measure certain alleged weaknesses in the contract entered into when the new co-operative organization was formed, have been made watertight.

Amendments to the Co-operative Associations act made this week by the house will further strengthen the position of the Associated and similar organizations. One clause penalizes anyone for soliciting business from a member of a co-operative organization.

Strong opposition was expressed by certain business men not members of a co-operative organization, to provisions contained in these amendments to the Act. While they did not protest particularly against the principles in the Act, which provide that existing contracts must be lived up to, these people contended that the clause favors the co-operative too much and tends to put the independent dealer out of business.

Since the Dominion Government through the Forestry Branch of the Department of the Interior, inaugurated its free tree distribution scheme on the prairies, some 40,000 plantations have been established. Many of these are valued by the owners at \$1,000 apiece. Even at a conservative estimate of \$300 apiece these plantations represent a total of 12 million dollars, many times the entire expenditure of this branch on the work from the time it started.

gift and to assure you that "Tho' to foreign lands you hie, Pursuing pleasures slid'ry ba, W' melting he'rts and brimfu' eyes, We'll mind you still so far awa', God speed you and bring you back again in safety.

Yours sincerely,
A. SMITH, president,
J. O. SMITH, secretary.

Can You As A Resident of Summerland Answer The Question--Where Do You Live?

Where do you live? When federal politics are concerned a resident of Summerland is in the Yale electoral district. For provincial representation he is in South Okanagan. Summerland is also included in the Osoyoos division of the Yale district which the registry of land titles is concerned, although Osoyoos is many miles away and is itself in an entirely separate district. For legal purposes we are considered to be in the county of Yale; for mining purposes we are in the Vernon district. The whole thing seems to be absurdly and unnecessarily complicated.

Reminded by reports of a possible federal general election at an early date, Kelowna Courier last week referred to this complication of territorial divisions thus, under the head of "Orebird Run":

Okanagan County
Eastern newspapers are again discussing the possibility of a federal general election at an early date, although normally the life of parliament has still a considerable period to run, and it may be a propitious time to take up a matter that should have had attention long before now. We refer to the need of bringing the nomenclature of the Yale Electoral District into better agreement with modern conditions.

The interior portion of British Columbia is handicapped by the use of absurdly obsolete and indorscriptive names for its geographical, judicial and political divisions. For instance, the Land District in which a large portion of the Okanagan is situated, including Vernon and Kelowna, is termed the "Osoyoos Division of Yale District," although Osoyoos itself is

on the international border and is not even in the district, called after it; being in the "Similkameen Division of Yale District" and some eighty miles south of the southern boundary of the so-called Osoyoos District.

In legal matters, while the Kootenay and the Cariboo districts each have their County Court under their own territorial name, the Okanagan is still within the County of Yale for judicial purposes.

Again, the federal Electoral District of Yale comprises the provin-

cial ridings of North Okanagan, South Okanagan, Similkameen and Grand Forks-Greenwood, and does not include the provincial riding of Yale. The devoted hamlet of that name, once a thriving placer mining camp and later the headquarters for construction of the Canadian Pacific Railway, is separated by many miles of intervening mountains from the great district that has to bear its name and with which it has absolutely no connection, either physical, geographical or climatic.

Any desired change in nomenclature will concern both the provincial and federal governments, but it would probably hasten action on the part of the former if the administration at Ottawa could be induced to christianize the Yale constituency in view of the redistribution required in any event by the 1921 census and with a general election in the offing. "Member for Yale" conveys little or nothing to eastern ears but "Member for Okanagan" would link the representative at once with the fruit industry of British Columbia, which the Okanagan Valley has done so much to render world-famous. Pondering such time as increase of population will permit them to have their own federal representatives, our friends and neighbors of the Similkameen and Boundary will undoubtedly be glad to exchange the present obsolete title of Yale for a modern one which typifies progress and development.

"Okanagan Electoral District" would inevitably be followed by the "County of Okanagan" and "Okanagan Land District" and it only need an active campaign to bring about the desired change.

INSTITUTE MAKES CASH DONATIONS

Hospital and Children's Fund Are Remembered by Women.

Summerland Women's Institute held their final meeting for the year on Friday afternoon in the Parish Hall. A very satisfactory report was given by the treasurer, showing a substantial balance which was disbursed in the following manner:

To the Summerland hospital, \$25; to the Crippled Children Fund \$5; to the Save the Children Fund (Armenian) \$5; leaving a cash balance to start the new year.

The Vernon News is planning to publish an extra supplement early in the year, relating to Women's Institute work and views, arts and crafts and other special work, and members of the local institute have arranged to contribute various articles to this supplement.

Following the business session a social time was enjoyed, when a very interesting guessing competition took place, the winner being Mrs. G. Morgan, who was given an attractive bouquet of flowers.

MORE PRIZES ARE AWARDED

For Work of School Pupils On Recent Live Stock Census.

Results of the live stock and poultry survey recently taken by the pupils of the several divisions of the central school, under the direction of S. A. MacDonald, principal, and B. Robinson, agricultural instructor, have just been received from J. W. Gibson, director of elementary education, to whom the pupils' work was forwarded.

Figures obtained during this district survey, which was carried on in connection with the nature study prescribed for these classes, were compiled by the students, each of whom then arranged and classified the data in a book, material for which was furnished them. Though given some suggestions regarding the arrangement, each pupil was allowed to use his or her own initiative and some splendid books were handed in. The best of these were chosen by the principal and sent for final decision to Mr. Gibson, who awarded the prizes as follows:

May Be Compelled To Cut Out Agriculture--Federal Aid Withdrawn

In the livestock survey, carried out by divisions 1, 2 and 3, the winners were: division 1, Mildred Wilson; division 2, George Washington; division 3, Isabel Zimmerman. Each of the three will be given a registered pure bred Berkshire pig, from the local experimental station.

In the poultry survey, which was undertaken by division 4, the winners were: 1st, George Mossop; 2nd, Bobby Nelson, each of whom will receive a year-old pure bred White Wyandotte hen, together with her laying record as tabulated at the experimental farm.

DRAWING LESS WATER FROM RESERVOIR

Feeding Smaller Main from Spring--Lessens Demand on Winter Line.

Residents of hospital hill and householders residing on the front bench south of the gulch road are now being supplied with domestic water from the spring below the reservoir which was linked up with one of the Prairie Valley mains a few weeks ago. The unusual difficulty in maintaining the reservoir at a proper level last summer and the fact that a number of springs at the upper end of Prairie Valley maintain a constant flow suggested the change.

At relatively small expenditure an intake and connecting pipe was put in to make use of one of these springs.

By utilizing this water there will be only one of the mains drawing directly from the reservoir, making it considerably easier to maintain a proper supply in the reservoir during cold weather and summer droughts. There will be the additional advantage that less water will now be running down the creek through the Prairie Valley meadows.

Summerland municipal voter's list was approved by the court of revision which sat on Wednesday of last week. There were no applications for additions to the list nor any requests for the removal of names.

MARKET FOR DRIED PRUNES

British Columbia Fruit Growers Prepare to Export Heavily in 1925.

Vancouver.—Last season's success of the Fraser Valley prune crop and the keen foreign demand, has had the effect of creating a new industry in which prunes are dried before being shipped, similar to the California treatment.

The export was light, but everything shipped brought a good price. During the past season the French and Bosnian crops were almost a total failure and the world shortage of dried prunes is approximately 150,000,000 pounds.

The entire Pacific Coast, from British Columbia to Mexico, produced only 30,000,000 pounds this year against 45,000,000 pounds last year, plus a carryover of 20,000,000 pounds.

Europe uses annually 150,000 tons of dried prunes, but produces a little less than 20,000 tons.

This coming season is expected to see a marked improvement in the volume of dried fruits shipped from this province to the United Kingdom markets.

Loan or no loan from Great Britain, Russia will never again be Canada's rival as an exporter of wheat. That is the very positive statement made by L. W. Lyde, professor of geography in London University, in a contribution to the London Times.

Local School Board Likely to Carry on to Next June.

MAY MAKE SOME NEW ARRANGEMENT

Favor Working with Pentiction In Effort to Continue Course.

As the result of the cancelling by federal authorities of the \$20,000 grant made in the past to the provincial authorities for educational purposes, the officials at Victoria in turn have found it necessary to cut down grants to school boards throughout the province. This information was given the Summerland school board at a meeting held yesterday afternoon, when J. W. Gibson, of Victoria, director of elementary education, attended and explained to the board what the government was prepared to do.

This, it was feared, might make it necessary to discontinue the teaching of agriculture in the local schools, for which a special instructor has been employed, and after some discussion, it was decided to see what the Pentiction school board were prepared to do. Pentiction and local schools have been working jointly in this course of instruction, and the local board has decided that it is prepared to continue the course if the Pentiction trustees are prepared to pay their share of the added expense. The extra cost to the local board will be about \$200. Mr. Gibson went down to Pentiction last night, having arranged to meet members of the school board there, when it was hoped a definite decision would be reached.

It is quite probable that the local board will arrange for a continuance of this subject until the end of the present year in June at any rate, since to change the subjects in the middle of the year would mean that students in high school would be obliged to take two sciences, required by the department in place of the agriculture, and with only half a year left, this would be most unfair to the pupils.

So far no report of the meeting held at Pentiction has been received.

NEW C. G. M. M. SERVICE

A new Canadian Government Merchant Marine service will give direct connection with the ports on the continent of Europe by way of Los Angeles and London. The new schedule from Vancouver will be inaugurated by the "Canadian Importer," leaving two days after Christmas with a large cargo of lumber, canned salmon, grain and general commodities. On December 15 the S.S. "Canadian Pioneer" will sail from Antwerp for Vancouver, thus inaugurating the service from that end.

DOUBTFUL IF MEETING HELD

Conference of Locals Called For Thursday Last Was Postponed.

Representatives of the several locals affiliated with the Associated Growers did not meet at Kelowna last Thursday as stated in the last number of The Review. They had been called to meet to consider engaging W. L. Macken, to undertake some special work. Just as the Summerland delegates were preparing to leave they received a telephone message, stating that E. J. Chambers, president of the Associated, had wired from Victoria asking that the meeting be postponed until he returned.

It is probable that this meeting will not be called at all. The subject, which was to be discussed had been referred to the advisory committee of the Associated with power to act and it is understood that that committee has advised against the employing of Mr. Macken.

PEACHLAND NEWS

By Our Resident Correspondent

AUTOMOBILE TURNS COMPLETELY OVER

Mr. Wm. Renfrew had the misfortune to have a spill with his Ford when going home from town one evening last week. One of the radius rods broke and let the car out of control while going round one of the out curves on the lake shore road and before he could get the car stopped, although only driving slowly, the front wheels dropped over the bank and the car overturned. Mr. Renfrew was accompanied by Mr. Ruffe and son Alf and although the car landed bottom side up none of the party were badly hurt and the car will be easily put to rights again.

WOMEN'S INSTITUTE ELECTS OFFICERS

Peachland Women's Institute met in the Municipal Hall on Friday last week. The meeting opened as usual with the singing of the Institute Ode. Reports from the president, secretary-treasurer and committees were received. Election of officers resulted in the return to office of the president, Mrs. Dryden, the vice president, Mrs. Smalls and the secretary-treasurer, Mrs. Follett. The new directors are Mrs. Lingo, Mrs. Taylor and Mrs. Keating. Business letters were read after which a social hour was enjoyed and a dainty tea served. The Christmas tree fund box was augmented by \$2.80, making a total of \$12.85. It was arranged to have the community Christmas tree on Tuesday of next week. Messrs. John De Rousie and Donald McLeod, residents for the summer on their property over near Squally Point, left last week for the Coast.

Mr. S. H. Murdin left last week for Nelson where he expects to remain on business till Christmas.

Mr. and Mrs. G. A. McBain spent Wednesday of last week up the lake.

Mr. Reekie of Kelowna, accompanied by the provincial inspector of the Monarch Life Insurance Company, spent a few days here last week.

Miss Wilson was a visitor to Kelowna last midweek.

Mr. R. A. F. Moore of Penticton came up for another hunting trip this week, spending a few days camped at one of the cabins on the benches.

Mr. and Mrs. Gilbert Thornber of Summerland moved up to Peachland on Thursday last for at least the winter months. Mr. Thornber will conduct the Sunday afternoon service in the Baptist church here and will spend a portion of the week in Summerland, conducting the Sunday evening services in the Baptist church there. Mr. and Mrs. Thornber will reside with Miss Smith.

Mr. Follett left last week after a short visit with his sister-in-law, Mrs. A. I. Follett, at her father's home.

The local branch of the L.T.L. held a social afternoon on Tuesday of last week in connection with their regular meeting, to which the mothers had previously been invited. A program of Christmas and temperance recitations and music was given and an address on L.T.L. work given by the district superintendent, Mrs. H. E. McCall. Refreshments were served at the close of the program.

Suffering with a severe cold, Mrs. L. Vivian left by boat on Friday for Summerland to enter the hospital for a few days.

Mrs. Ingis and children came in from the prairie on Friday evening to remain with Mrs. Ingis' father, Mr. Thos. Powell, for a few months. Little Miss Bernice Wells of Westbank arrived on Friday evening's boat to spend the week end with friends.

During the last few days of the hunting season quite a number of deer were shot and brought out from the various haunts in the vicinity of Peachland.

Mrs. Trimble has erected a nice new barn on the old J. B. Robinson lot.

Mrs. Neil Evans spent a day in Kelowna last week.

After a pleasant visit of a few days in Kelowna, Mrs. Renfrew returned home Saturday evening.

Mr. Dowman of Vancouver, provincial inspector for the Canada National Fire Insurance Company of Winnipeg, spent the week end in town on an official visit to the local agent.

Game Warden Sullivan passed through town this week after having spent a few days among the various hunting grounds around here.

Mr. John McClurg of Kelowna came down on Monday evening's

boat to show a series of lantern views in the Union church on Central India, but the sudden cold snap having cut off the electric lights for the night it was impossible to carry out the program and Mr. McClurg re-

turned home Tuesday morning.

Old-time cattle men were good, but they couldn't look at a calf and tell how much chicken salad it would make.

Pat O'Hooley Tells on

THE CRUCIFIXION OF MAC

"There's as much character shown back an' forth widout answerin' in min's hand-writin' as there is in Thin. He sez: their voices — an' that's a-plinty!" "I believe ye are not wan of th' word, kape yer eyes open an' see. tells me this, an' I believe ut. Th' Ut's an open page. Th' nate affect min of this town—or part of thim, at th' copper-plate style; th' business least—have crucified me on a cross man adopts abbreviations an' short of ridicule! As ye will bear witness, cuts; th' bold go in fer big letters I came here an' established th' bist weekly journal between Kelley an' Crowbar." (He did — fer 'twas th' only wan.) "I spint me brain power widout stint; I lived on lunches an' half-starved; I slept on a bed any dacent dog would have passed up wid disgust; an' I haven't had enough money t' know th' feel of ut. I've bin busy all th' toime, an' th' bunch of loafers have made me office their headquarters; they have smoked me tobacco, used me matches, spit on th' flure; an' I didn't complain. But of all th' unmitigated gall; of all th' croole pieces of effrontery f'what they did t' me is th' worst!" "Fer hivin's sake, Mac, spill ut!" sez I. "I didn't have anythin' t' do wid ut—I swear ut!"

"I know ye didn't, Pat," sez he, "an' I'll tell ye. As ye're probably aware, we have a drug store in this town where they kape whiskey. Ut's run by a man whose conscience isn't any more alive than a flea's—an' that's not t' spake of. We have no doctor widin eighty moiles. Problem: How was th' gang t' git their perscriptions fer liquor? They was determined t' have ut; an' by th' most diabolical conceivance they accomplished their hideous purpose!"

"Pat, ye have noticed thim loafin' in me office. They came here in th' guise of friends; they bothered me t' disperation, they fawned upon me fer no ither object than t' betray! Whin me back was turned, they stole me copy from th' hook, cut ut carefully t' a certain size, an' wid divilish sang-froid, prisented ut at th' drug store as perscriptions fer liquor! 'Twas only this mornin' I learned that 497 of these forgeries — they're nothin' else—are on th' druggist's file; an' ut's th' las' straw! They shall humiliate me no further! In tin minutes I shall shake th' dust of this accursed town from me shoes! An' he kept his word."

"An hour later, I sees old Bill Courtney comin' down th' strate; an' I stops him. "Bill, sez I, 'ye look guilty!' "Well, Pat, sez he, grinnin', 'I am; but I couldn't help ut. Let th' great nate mitigate th' offence. There's forty-two min in Badger, an' there isn't a single wan of thim built loike a camel! Mac's writin' looked loike nothin' else, so why shouldn't ut be a perscription? I trimmed down a siction of editorial, put on a bold front, an' ut wurked

in on by ut's eyebrows. Business was on th' blink. Iverybody was blue an' discouraged; but wan foine mornin' th' glad news was shouted up an' down th' strate, an' th' residents swelled wid pride. A rale noose-paper had moved in durin' th' noight, an' was sittin' in a shack on Railroad Avenue. Mr. Macdonald, th' editor, manager, typo, prisman, an' divil, had an old Washington pris, two sacks of type, a mallet, a stick, a rule, sixty cints in cash, an' unbounded confidence. He called his sheet 'Th' World Cat'—an', by gorrie, I'm sayin' ut was all that! "Whin Mac goes out wid his pincell an' book, iverybody fer moiles around subscribed—(ut wasn't costin' anythin' at th' toime)—an' purty soon we're havin' th' most illigit bokays trowed at us. Here's wan: "Mr. Pat O'Hooley, our gonial an' efficient section boss, whose friends in th' district number int' th' thousands (we had about 275 raldints widin forty moiles) left this mornin' fer Kelley, where he will be an honored guest at th' Mountain House. "Now, isn't that a good wan? Ut is. But as I was jist unloadin' some toles at Kelley; as I slapped 'Big Pete', th' proprietor of th' Mountain House, fer gittin' Irish wid an Orlish gintleman, I have no doubts whither I was overly hoioried at that toime! "Well, 'Th' World Cat' had f'what ye moight call a checkered career. Sometoimes there was paper t' print on; an' sometoimes there was none. Mac had a few dollars comin' from th' stores, an' he lived mostly on chance an' crackers. He slopt wid his head on th' Washington pris an' his heels on a packin' case. I believe he used exchanges for blankets. Ut couldn't last; an' wan mornin' I hear th' divil's own fracons in th' office, an' gook in t' see wha't's happenin' "Iverythin' but th' pris was dismantled, dumped int' grain sacks, an' trown int' th' middle of th' flure. Mac, well-eyed an' dishevelled, was trampin' round in a circle loike a chained coyote—an' stormin'! Whin comes in he turns on me wid a snarl, his tathe showin'. "F'wha't's wrong, Mac?" sez I. "F'wha't's wrong?" sez he. "Oh, ye gode! hear that! In this abominable town I have suffered indignities beyond parallel, an' they come in an' swately enquire, 'Wha't's wrong?' " "Calm yerself, sez I. 'Ye're blin' yer singor nails until th' bloods runnin'. Ut's no good! If I can be of any service, call on Pat,' sez I. "Fer a full minute he tramped

SYNOPSIS OF LAND ACT AMENDMENTS

PRE-EMPTIONS Vacant, unreserved, surveyed, Crown lands may be pre-empted by British subjects over 18 years of age, and by aliens on declaring intention to become British subjects, conditional upon residence, occupation, and improvement for agricultural purposes.

Full information concerning regulations regarding pre-emptions is given in Bulletin No. 1, Land Series, "How to Pre-empt Land," copies of which can be obtained free of charge by addressing the Department of Lands, Victoria, B.C., or to any Government Agent.

Records will be granted covering only land suitable for agricultural purposes, and which is not timberland, i.e., carrying over 5,000 board feet per acre west of the Coast Range and 8,000 feet per acre east of that Range.

Applications for pre-emptions are to be addressed to the Land Commissioner of the Land Recording Division, in which the land applied for is situated, and are made on printed forms, copies of which can be obtained from the Land Commissioner. Pre-emptions must be occupied for five years and improvements made to value of \$10 per acre, including clearing and cultivating at least five acres, before a Crown Grant can be received.

For more detailed information see the Bulletin "How to Pre-empt Land."

PURCHASE Applications are received for purchase of vacant and unreserved Crown lands, not being timberland, for agricultural purposes; minimum price of first-class (arable) land is \$5 per acre, and second-class (grazing) land \$2.50 per acre. Further information regarding purchase or lease of Crown lands is given in Bulletin No. 10, Land Series, "Purchase and Lease of Crown Lands."

Mill, factory, or industrial sites on timber land, not exceeding 40 acres, may be purchased or leased, the conditions including payment of stump-ago.

HOMESITE LEASES Unsurveyed areas, not exceeding 20 acres, may be leased as homesites, conditional upon a dwelling being erected in the first year, title being obtainable after residence and improvement conditions are fulfilled and land has been surveyed.

LEASES For grazing and industrial purposes areas not exceeding 640 acres may be leased by one person or a company

GRAZING Under the Grazing Act the Province is divided into grazing districts and the range administered under a Grazing Commissioner. Annual grazing permits are issued based on numbers ranged, priority being given to established owners. Stock-owners may form associations for range management. Free, or partially free permits are available for hunters, campers and travellers, up to ten head.

Treat the Family A Solid Year of Interesting News A gift that will be appreciated by every member of the family for fifty-two times in the year is a subscription to The Review. The paper is for you, about you and your friends, and is chock-full of interesting and truthful fact which is uncolored by prejudice. NEW ISSUE BY C.P.R. IS MADE AVAILABLE IN CANADIAN MARKET

Company Decides to Invite Dominion Investors to Take Its Securities.

SECURED BY LAND SALES

Beatty Explains Desire to Extend Canadian Holdings of Railway's Securities.

Montreal.—An official announcement was issued following a meeting of the board of directors of the Canadian Pacific Railway of the issuance by the company of \$30,000,000 4 1/2 per cent note certificates, secured by deferred payments on lands.

Not in Need of Cash

Following is the statement as sent out from the office of President E. W. Beatty: "The company is not short of funds by any means, its bank account being of very comfortable proportions, but it has for many years been the company's policy to maintain a strong position in its cash resources, and, considering the magnitude of the enterprise, this is manifestly prudent. Works of improvement in contemplation to provide for its traffic and for the betterment of existing facilities will require a considerable sum in the near future, and to meet these expenditures and to provide ample working capital for other purposes the directors of the company have decided to make an issue of note certificates in much the same way as was adopted in 1914, save that the issue will be of a public character instead of being restricted to participation by its own shareholders.

"In the belief that more extensive holding of the company's securities in Canada is desirable from all standpoints, the company has sold the issue to a strong Canadian financial group consisting of the Bank of Montreal, the National City Company, the Royal Bank of Canada, the Canadian Bank of Commerce, the Dominion Securities Corporation, Wood, Gundy & Company, and A. E. Ames & Company.

Decided to Pass Up U.S. Market.

"Already a very wide distribution is assured at a price to the public which will make it an attractive investment. It was quite open to the company to secure the requisite funds in the United States on terms equally favorable; but in view of the interest in the company's securities by Canadian investors, as evidenced by the increase in the holdings of its common stocks and bonds, the directors were glad to be able to make the issue a Canadian one."

These 4 1/2 per cent secured notes are one of the highest grade and most thoroughly protected securities ever offered in the Canadian market. They are a direct credit obligation of the Canadian Pacific Railway Company, and in addition are specifically secured by Trust Agreement, under which the railway covenants to pay to the Trustee land payments coming due to the railway company totalling approximately \$66,000,000.

This offering is the largest single piece of corporate financing ever undertaken in Canada. Prior to the present year, all Canadian Pacific Railway financing has been done abroad, principally in Great Britain or in United States, in which markets the company's securities rank as market leaders. For example, in 1902 the company's 4 per cent debenture stock sold in London at 118 1/2, to yield only 8.37 per cent at a time when direct Dominion of Canada long term bonds were selling at approximately the same basis.

Following upon the success of the Dominion Government in refunding its maturing war loan issues in the domestic market, the Canadian Pacific Railway Company issued \$12,000,000 collateral trust bonds in the spring of the present year. Although new to the average Canadian investor, these bonds quickly reached a price comparable to the price of Dominion of Canada Victory Loan Bonds. It is not surprising, therefore, that the company has arranged to offer this larger issue in Canada. The offering is timely, inasmuch as the Dominion Government issued only \$50,000,000 of long term bonds to replace \$107,000,000 of maturing Victory Bonds, and it is evident that there is available large sums of money whose owners desire the highest grade of security. The present offering of Canadian Pacific Railway securities will meet these requirements.

It is expected that the issue will be quickly absorbed by all classes of investors.

A Toast Here's to your car And my car— May they never meet. —Motor World.

New Brunswick Deer Was Equipped with Reverse Gear

Eight legs were not enough to enable a New Brunswick deer to escape two Bathurst, N.B., hunters, according to eastern papers. The deer, regarded as the greatest freak the New Brunswick woods ever produced, was killed on the Miramichi road near Bathurst. It was equipped with eight legs, by means of which it could propel itself both forwards and backwards, and with its head facing towards its tail, when in what appeared to be the natural position, but so that the face could be turned completely around.

The two hunters say that when they

first saw the animal they could scarcely believe their eyes. According to their story, the deer moved first in one direction and then, without turning about, proceeded backwards with approximately as much ease as it had shown in the forward movements. It was an entirely new 'gear shift' so far as the hunters were concerned. When browsing, the deer was able to turn its head all the way round like an office swivel chair.

The carcass was shipped to a taxidermist to be mounted and will be preserved as New Brunswick's most unusual big game freak.

"Okanagan" Means Home of Clever Men, Says Jack Logie

An Interesting Lecture on Aborigines Given Here and Repeated at Kelowna.

It was the editor's misfortune that we were not able to attend the lecture given here recently on a Wednesday evening by J. W. S. Logie on "The Indians of Canada." Those who were present were given much information of real interest and historical value.

On Tuesday of last week Mr. Logie repeated this lecture at Kelowna where he again used the slides loaned him by the department of the interior, Ottawa. The Kelowna Courier gave the following account of the lecture:

In commencing his address Mr. Logie remarked that he would not give a formal lecture, time not permitting his going fully into the very many matters of interest connected with the history and customs of the Indian tribes of Canada, but rather an informal talk. What information he had himself acquired had been gleaned as a sort of by-product of other work in which he had been engaged and, getting interested in Indian folk lore, he had been much struck by the fact that comparatively few people had any real knowledge of the early history of the Indian tribes of this part of the continent.

Gleaned from Wide Area. Even many of the earlier white settlers had not taken pains to acquire knowledge on that subject at a period when such information might have been more easily obtained than now. He himself had had to go to many portions of North America, including the State of New York, to secure the information he needed. The knowledge he possessed regarding the Indians of Canada he was glad to pass on to others and when asked to come to Kelowna to repeat an address he had given at Summerland he had come willingly.

Mr. Logie then spoke briefly on the Indians of Canada as a whole, naming the various tribes into which they were divided before the coming of the white races to this continent, and going shortly into the history of some of them to show that former large tribes are, in some instances, quite extinct, while others are represented

by a few survivors who are not living in the same parts of North America which they inhabited when members of a strong race. Generally speaking, he explained, it had been necessary to classify the various Indian tribes according to the various language groups or according to natural food groupings. According to the latter classification, there were the "salmon" Indians of the interior, the "bison" Indians, "maize" groups of the east, etc.

Horses Were Unknown.

Mr. Logie, at this period of his address, showed a number of lantern slides descriptive of the various implements used by the aborigines of this continent for killing game, in the preparation of food, for transportation and for cultivation of the soil, when practised. He explained how each implement or utensil was made and used, going into considerable detail to show how many things could be done with crude implements made of stone, wood or bone. In speaking of the Indians' method of transportation, he explained that dogs had been used entirely for land transport until the Spaniards introduced the horse in the 15th century. The latter animal, he claimed, was a great mystery to all aboriginal tribes and its appellation in the various languages and dialects showed that the Indians for many years considered it to be a kind of superior dog or wolf.

Indians of the Okanagan.

The lecturer next showed views of the different arts practised by Indian tribes, explaining that basketry was fashioned quite differently in various portions of the continent and that on the Pacific slope the "coil system" alone was used. Baskets, he stated, were used by the Indians for far more purposes than in present times and those made by Okanagan Indians were water tight and constructed of tules or cedar roots. None of the Indians in this part of North America had been sufficiently advanced to make pottery, and were obliged, when they wished to heat water, to fill up baskets or birch bark vessels and warm the water by throwing in hot stones. Pictures of weaving were shown in order to explain

the different practices used, how the various patterns were made and the different garments fashioned, a cape made of the sage brush bark, inter alia, making it evident that Indians were able to clothe themselves from plants considered of no value whatever nowadays. Ornaments worn, mostly made from shells, were also shown and the pictures were each explained by the lecturer, who seemed to have a very detailed knowledge of his subject.

"Tulameen" Means "Red Paint"

Various methods of starting fire were next demonstrated on the screen; also views of utensils used for the making and sharpening of weapons of all kinds. The armour worn was described and then Mr. Logie showed views of the Indian paintings found in this part of the country, stating that their interpretation was found to be a very difficult matter, the existing Indians not being fully posted as to their meaning. It was evident, however, that they had been placed at certain points, mostly under over-

hanging rocks, in order to commemorate important events and that the artists had been the medicine men of the tribes depicted. The paint of the interior, Mr. Logie explained used was composed of ochres of va-

rious shades and red clay, both of which were mixed with grease. The red clay was obtained on the banks of the Tulameen river and the name "Tulameen" was simply Siwash for red paint.

Okanagan—Place of Clever Men

With special reference to the Okanagan Indians, who, Mr. Logie stated, are an off-shoot of the Flathead tribe, it was pointed out that the former owners of this region were considered to be a clever tribe by the adjoining bands and that it had been found out that the word "Okanagan" or rather its Indian equivalent, which was difficult for a white man to pronounce, simply meant the Indian with a big head or clever man. The name "Kelowna" meant "grizzly bear" and should be pronounced as spelt and not as "Kelona." Penticton meant "deer trap," Inkameep, "the end of the lake"; Osoyoos, "a narrow point between two lakes," and Keremeos "the junction of two creeks on a flat."

Before concluding his lecture, the latter portion of which was illustrated by slides supplied by the Natural Resources branch of the department of the interior, Mr. Logie explained the rise and fall of the Chinook jar-

gon used at one time by all Pacific coast tribes, also the work done by Rev. Father Lejeune, of Kamloops, in educating the Interior tribes and teaching them to read and to write phonetically. He was accorded a very hearty vote of thanks at the end of his address, a similar compliment being paid to Mr. A. G. Smith, who handled the lantern slides. The lecture was much enjoyed by those who heard it, it being evident that the lecturer was well versed in Indian lore, much of which he could not touch upon owing to the limited time placed at his disposal.

Mr. Logie spoke at the Gyro Club lunch at noon on "Arts and Industry," telling his audience something about the Summerland Art League and of the pottery work being done here. He had with him quite a few samples of pottery which he exhibited to his hearers.

At three-thirty he gave a lecture to about four hundred or more Kelowna school children on The Indians of Canada and in the evening gave the address referred to above.

"Porpoise" laces are made from the hide of a horse.

Motorist: Slow down when approaching a cross road; it is nearly as dangerous as a railroad crossing.

New Issue

\$30,000,000

Canadian Pacific Railway Company

Twenty Year 4 1/2% Sinking Fund Secured Note Certificates

Date of Issue December 15, 1924. Date of Maturity December 15, 1944.

Principal and semi-annual interest (June 15 and December 15) payable direct to holders by cheque negotiable at par at any Branch in Canada of the Bank of Montreal. Fully registered Note Certificates will be issued in denominations of \$100, \$500, \$1,000, \$10,000 and \$100,000. Redeemable in whole or in part on any interest date on six weeks prior notice at 102 and interest up to and including December 15, 1929, and at a declining premium of 1/2 of 1% during each five year period thereafter.

Legal investment for Canadian Insurance Companies.

TRUSTEE AND REGISTRAR: THE ROYAL TRUST COMPANY.
Transfers may be effected at the Registrar's offices or agencies in Montreal, Ottawa, Toronto, Winnipeg, Regina, Calgary and Vancouver.

Mr. E. W. Beatty, K.C., President of the Canadian Pacific Railway Company, has summarized his letter of December 8, 1924, as follows:—

These Note Certificates will be direct obligations of the Railway Company and have priority over \$93,335,254 Preference Stock and \$260,000,000 Common Stock, representing an equity at present market prices of approximately \$460,000,000. The Preference Stock has received 4% dividends without interruption since its issuance in 1895. The Common Stock has paid dividends continuously since 1882, with the exception of the year 1895, the rate since 1912 having been 10% per annum.

In addition they will be secured by the assignment to the Trustee, by way of security, of all unpaid purchase money or deferred payments owing or accruing due to the Railway Company in respect of lands in the Provinces of Manitoba, Saskatchewan, Alberta and British Columbia, sold or contracted to be sold by it prior to December 1, 1924. The amount due or accruing due to the Railway Company on December 1, 1924, in respect of said sales was \$66,000,000. The Railway Company will covenant to pay to the Trustee all monies, both principal and interest, less expenses and taxes paid to protect the security, received by the Railway Company in respect of the said contracts. The Railway Company covenants that it will not charge the lands in respect of which such deferred payments are or shall be due, so as to prejudice in any manner the security hereby created.

All monies received by the Trustee will be utilized for the payment of interest on these Note Certificates and thereafter as a Sinking Fund for the purchase and cancellation of these Note Certificates at the best prices obtainable up to the call price prevailing at the time of such purchase. If Note Certificates cannot be so purchased the Trustee shall redeem the Note Certificates by lot at the prevailing call price. The Railway Company will covenant that in the fourth and each succeeding year the annual amount available for the purchase of Note Certificates will be at least \$300,000.

The Note Certificates will be issued under, secured by and subject to a Trust Agreement between the Railway Company and The Royal Trust Company as Trustee.

The net earnings for the last five years, after paying all fixed charges, including interest on Consolidated Debenture Stock and all other obligations, have been as follows:—

Year ending December 31, 1919	1920	1921	1922	1923
\$31,320,868	32,844,083	33,169,867	33,545,140	34,899,409

Yearly interest on these Note Certificates amounts to \$1,350,000. The average yearly net earnings for the last five years as above set forth amount to \$33,155,873, or over 24 times annual interest requirements on these Note Certificates.

These Sinking Fund Secured Note Certificates are offered if, and when issued and received by us, and subject to the approval of all legal details by Messrs. Meredith, Holden, Howard & Holden. Trustee Certificates in interim form or Note Certificates in definitive form will be available for delivery on, or about December 30, 1924.

The Summerland Review

Established August, 1908.
Published at Summerland, B.C., every Thursday by
THE REVIEW PUBLISHING COMPANY, LIMITED
Ralph E. White, Editor and Manager

An independent family newspaper covering Peachland, Summerland and Naramata and adjacent districts.

Member of Canadian Weekly Newspapers Association.
Member of British Columbia Selected Weeklies.

Subscription Rates—In British Empire, in advance, \$2.50 per year; six months, \$1.40. To U.S.A. and other countries, \$3.00 per year.

Advertising Rate Cards and information respecting territory and samples of paper mailed upon request, or may be seen at the office of any advertising agency recognized by the Canadian Press Association.

Advertisers must have copy in by Tuesday noon in order to insure changes for standing advertisements. New display advertising copy can be accepted one day later.

Correspondence—Letters addressed to the Editor and intended for publication must be short and legibly written on one side of the paper only. The longer an article, the shorter its chance of insertion. All communications must bear the name of the writer, not necessarily for publication. The publication or rejection of articles is a matter entirely in the discretion of the Editor. No responsibility is assumed by the paper for the opinions expressed by correspondents.

Typographical Errors—In the event of a typographical error, advertising goods at less than the proper price, the newspaper will furnish letters to be posted in the store stating the correct price, but goods may not be sold at the price printed and the difference charged to the newspaper.

Thursday, December 18, 1924

NOTICE TO ADVERTISERS AND CONTRIBUTORS

The Review will publish early next week (Christmas week), Tuesday if at all possible. Will our advertisers please have their copy ready early—an opportunity for a special announcement for Wednesday.

Correspondents will please have their copy in Saturday or Monday morning, sending any news that is gathered later by Monday evening.

The Publishers.

LAUGH.

The diaphragm beats a tattoo on the stomach when you laugh. Every time you let go a good hearty laugh this diaphragm pops up and down on your liver, and helps to drive away the very thing that gives you the blues—biliousness.

Laughter is the best brand of pills on earth. Laughter strikes in when it comes from without, and instantly comes to the surface when it starts from within.

Laughter penetrates. You may laugh because you are happy, and you may be happy because you laugh. It is the one thing where the cause is the effect and the effect is the cause. Any man can be a millionaire of good cheer.

ZERO WEATHER STRIKES DOWN FROM NORTH

Balmy Southern Breeze Forced Back By Sudden Drive of King Frost

Following an extended spell of exceptionally fine weather with warm breezes from the south, the weather man surprised everyone by a sudden drop in temperature early Monday morning. After the heavy snow-fall of last week, the weather suddenly became warmer and in an incredibly short time the snow had disappeared under a steady chinook.

Remaining almost springlike on Sunday, with a maximum temperature of 52, the thermometer suddenly dropped during the night, about 40 degrees in 24 hours, and on Monday morning registered 12. With a strong wind from the north continuing through Monday and Tuesday, the records at the experimental station showed 8 below zero Tuesday morning, while the coldest was reached yesterday morning, registering 9 below, and at no time during the day rising above the zero mark. Since then, with a change in the wind, the temperature has steadily risen until this afternoon it has reached about 6 above.

Wednesday's record of 9 below is the lowest temperature ever recorded at the local experimental station during the month of December, the next lowest being in December 1923 when the thermometer registered 7 below. The coldest ever recorded at this station was on two occasions in January and February 1916, when 11 below was reached.

S.S. Siamous which was several hours behind schedule on her south-bound trip on Monday, tied up at the Summerland wharf for the night. By the time the steamer had reached here, the paddles were so badly blocked with ice that it was thought unwise to continue to Pentiction, where it would get the full sweep of nor-wind all night. Passengers for southern points continued their journey from here by stage, and about 4 a.m. Tuesday morning the Siamous completed her trip to Pentiction and returned on schedule time on the trip up the lake.

CHRISTMAS DAY PHONE SERVICE

9 to 11 and 3 to 5 only.

The emergency service on Christmas and New Year's days will be for the Doctor only. No other calls will be put through.

A Mistake

Boss—Sir, what does this mean? Someone just called up and said you were sick and could not come to work today.

Mechanic—Ha! ha! The joke's on him. He wasn't supposed to call up till tomorrow.

from here by stage, and about 4 a.m. Tuesday morning the Siamous completed her trip to Pentiction and returned on schedule time on the trip up the lake.

MOLASSES CANDY

Put 2 cups of molasses, 2 teaspoons of vinegar and butter the size of a walnut in a saucepan and boil until it strings when dropped from a spoon, or till brittle when dropped in cold water. Stir in briskly 1/4 teaspoon soda and pour it into a buttered tin. When nearly cold (or cool enough to handle without burning your hands), pull until nearly white, and cut with scissors into short sticks or squares, on to a buttered platter. It may be wrapped in oiled tissue and added to the other Christmas candies if you are packing boxes of them. Unless wrapped it would stick to the other candies. Part of it may be flavored

with peppermint, part with vanilla, or other flavoring. when the pulling begins, if desired, though I think it is just as good without flavor added.

Local Happenings

W. R. Powell went down to Vancouver on the noon train Monday, on a business visit.

The public school concert advertised for tonight has been postponed to January 8th. L20

Mrs. J. L. Whiteford went out to the Coast on Monday, where she will visit her daughter, Mrs. Bishop.

Schools close tomorrow for the Christmas vacation of two weeks, opening again the first Monday in the New Year.

A. Moyes returned on Sunday from the Coast, where he had gone as a delegate of the United Seed Growers to interview Dr. Warnock.

Mr. Salter, of Swan River, Man., came in on Friday night's boat and is spending some time here at the home of his son, G. L. Salter.

Real sale prices on Christmas slippers. A \$1.50 gift for every dollar. Beer's. L20b

Mrs. A. Stark recently spent a day in Penticton giving instruction in pine needle work to members of the basketry class held there under the auspices of the Penticton school board.

Last chance for Christmas gifts at the Drug Stores. 20L

Mrs. A. W. Andrews and family came down from Kelowna on Monday to join Mr. Andrews, of the local C.P.R. office staff. They are living in the Estabrook cottage in Peach Orchard.

Miss Mona Winter was operated on on Sunday afternoon for acute appendicitis and is doing well in the local hospital. Miss Winter had been playing badminton on Saturday afternoon as usual and it was shortly afterward that she became suddenly ill.

H. Miller of the staff of the Bank of Montreal went up to Enderby on Friday morning, where he will relieve a member of the Enderby staff for three weeks. After that time he expects to be permanently transferred to another branch. C. H. Freeman, of Trail, B.C., came over last week having been appointed to Mr. Miller's former position with the Bank of Montreal here.

Earlier shoppers get the best selection in all kinds of beautiful and useful gifts at the Drug Stores. 20L

A wedding of interest to many Summerland people was solemnized at New Westminster on Tuesday, December 9th, when Miss Eileen Dwyer of Victoria became the bride of Mr. Harold Hugh McCallum, son of Mr. and Mrs. C. B. McCallum of this place. The marriage took place at the home of Mrs. William Bray, sister of the groom. The young couple, who have many friends here, will reside at New Westminster.

Mr. and Mrs. E. Chapman left on the noon train today for Vancouver. Buy your chrysanthemums and leaf lettuce for Christmas from A. McCachlan. Phone 971. L20

J. A. Darke returned on Sunday from Trail, where he had been busy for several weeks on contract work.

Mrs. H. W. Daniel left on Sunday's train for Vancouver, where she plans to spend Christmas. Mr. Daniel will join her there at the closing of the school term.

D. G. Denny, in charge of the poultry division of the Dominion Experimental Station here, attended the annual poultry show at Vernon last week, returning home on Saturday night.

Deer season which closed on Monday, December 15th, has been one of the best for several years, according to local hunters, and a goodly number of the elusive game animals have been brought in.

See Beer's window display of slippers. The best yet and more inside. L20a

Mr. and Mrs. G. Thornber moved up to Peachland last week, where they expect to spend the winter months. Mr. Thornber will carry on his work as pastor of the Baptist church there, but will spend a part of his time here, speaking at the evening services in the local Baptist church. Mr. and Mrs. H. Thornthwaite are now occupying the Thornber home at Trout Creek.

For an absent friend nothing better than a book or subscription to favorite magazine. See Drug Stores. 20L

Tobacco pouches; playing cards, leather cases; ebony hair brushes, leather cases; ties; collars; suspenders; silk and woolen hosiery; gloves; ladies' hand bags; purses; vanity boxes, etc. Beer's. L20c

SUMMERLAND WEATHER REPORT

Gave Him Away
 Wife—How many fish was it you caught on Saturday, Dave?
 Husband—Six, Nora—all beauties.
 Wife—I thought so. That fish market has made a mistake again. They charged us for eight. — The Hoosier Motorist.

CHILDREN OF VETERANS ARE ASSURED TREAT

Will Have Two Christmases in the One Week.

Saturday, December 27th, from 2.30 to 5, is the date chosen by members of the Great War Veterans' Association for the Christmas tree and entertainment to be given children of all Summerland veterans. The committee, in charge of Comrade V. J. Bernard, is making arrangements to give the kiddies a real treat. The entertainment will be held in the G.W.V.A. hall.

NARAMATA WOMEN TAKE IN GOOD SUM

Rev. H. A. Solly Gives Discourse on Origin of the Bible.

Members of the Ladies' Aid held their annual sale of work in the church basement on Thursday afternoon, and added a sum of approximately \$95 to their funds as a result. Among the visitors from out of town were: Mrs. Boothe of Penticton, Mr. Grote Stirling, M.P., and Mr. Graham, formerly of Naramata and now residing in Penticton. Mrs. Myers and Mrs. Lyons were in charge of the drapery and fancy work stall, members of the girls class were responsible for the candy booth, and Mrs. Patterson and Miss Wright presided over the afternoon tea and other refreshments. Mrs. F. Young, as president, conveyed the sale and superintended arrangements.

A number of Naramata ladies gathered for afternoon tea at the home of Mr. and Mrs. Carroll Aikins on Thursday to meet Mrs. Aikins of Quebec, who is staying for a few weeks. Owing to the bad state of the roads, several Penticton friends were unable to attend.

Mr. John Smith has been ill for the past few days and was under treatment by Dr. Andrew.

At the Anglican service on Sunday afternoon, the Rev. H. A. Solly preached an exceedingly interesting sermon on the birth and gradual growth of the scriptural writings embodied in the Bible as we now have it, and the paramount position of the church in their preservation from the earliest times. The choir led the singing of favorite Advent hymns and rendered Atwood's anthem, "Enter not into judgment with thy servant, O Lord." Mrs. Languedoc presiding at the organ.

Mr. Weaver reports his bees flying freely on Saturday and Sunday, but says their joyriding came to a sudden stop on Monday.

Owing to the prevailing wind the S.S. Sicamous did not call here on Monday, morning or evening.

White rice paper contains no rice.

MAY ENGAGE IN MAKING VINEGAR

Willis Walter, of Walters, Ltd., informs The Review that his firm is much interested in the article and editorial published in The Review last week on the subject of the manufacture of vinegar as a by-product. This is a matter which they have been considering for some time and the information contained in the article referred to is most opportune. As soon as opportunity will permit Mr. Walter states that his firm is on taking up the manufacture of vinegar.

DECLARES HE HEARD AUSTRALIAN RADIO

Band music from Australia was heard on Tuesday night over the new 6-tube Atwater-Kent radio recently installed by H. Read in the Premier Hotel, declares W. Johnston, the hotel proprietor. He reports that though the name of the station was not clear, the word Australia, as announced by the broadcaster was quite distinct. For a time the music was very clear, and later, after wavering for a while, it gradually faded out.

SHIPPERS WILL USE PRESSURE TEST SYSTEM

Mechanical Test Will Indicate When Apples Ready for Picking.

When is an apple ready to pick? This is a most important question and from now on can be easily and positively answered, judging from reports from apple growing districts in Washington State.

At a recent meeting of fruit growers held at Omak, when several important subjects were discussed by experts, this was explained by S. P. Scott, district horticultural inspector. Pressure tests are made of the apples to ascertain their degree or stage of maturity.

Okanagan Independent gives the following account of Mr. Scott's explanation:

Find Fruit Is Picked Too Late

The value of pressure tests being made by Mr. Diehl of the federal service was outlined by Mr. Scott. There is a certain amount of fiber in an apple, Mr. Scott explained, and as the transformation from starch to sugar takes place that fiber breaks down. It has been found that many growers picked Winesaps when the fiber broke under 18 pounds pressure instead of 24 pounds. Fruit picked late has been proven to lack keeping quality.

Predicts Use by Shippers.

Mr. Scott predicted that shipping organizations would adopt the pressure test system and instruct growers to pick when the fruit was hard, regardless of color, and said the maturity problem was one that was hereafter going to be met in the apple business. Skin punctures are now largely attributed to a delay in picking the apples. The weight of an apple, increasing in velocity as it drops from a grader, is sufficient to cause a puncture upon striking an apple that is ripe, or possibly one that is firm. Fruit picked in time to be classed as hard under the pressure test will be much less likely to puncture.

If the dear public is amused it cares not for the barking of the critic.

What Is "Long Pruning?"

By E. HOY, Assistant District Horticulturist.

What is "Long Pruning?" This question is being asked daily by orchardists throughout the district. During the last two or three years much has been written on the subject and many growers are somewhat confused by the meaning of "long pruning," although some of them are using this system all the time. Others think they are using it but in reality are just more or less neglecting their pruning.

During the first few years of growth of most of the orchards in the Okanagan, the trees were severely headed back; every twig and branch left on the tree was cut back to more or less extent. This system was carried on for four or five years in most places and some have not discontinued this practice yet, although the trees are twelve to fourteen years old. Experimental evidence and actual field practice have proved this system undesirable from several standpoints. Some of the undesirable features of this practice are:

- Early Method Was Wrong**
1. Fruit production is delayed.
 2. It is more expensive. Cutting back encourages more branches and more pruning each year.
 3. Continuous cutting back produces a smaller, more compact tree with fruit further from the ground owing to the light being shut out.
 4. A tree is produced which is more difficult to thin, pick, spray and prune.

Where "long pruning" is practised from the beginning, the same care in getting the scaffold branches without crotches is taken as with our present system. Branches coming from the trunk at as near right angles as possible should be chosen. These should be well spaced up and down and around the stem. No two branches should come from the same

height on the trunk, but should be not less than six inches apart—eight or ten inches is better than six. Four or five scaffold branches are chosen and one allowed to take the lead. The selection of the scaffold branches cannot usually be done in one year, but as soon as they are all selected the pruning is mostly corrective, briefly, that is: undesirable branches are removed and only enough heading in is done to keep the tree well balanced. By the time the tree is three to five years old, depending on its growth, all cutting back is discontinued and only thinning of undesirable branches is practised. When trees are getting too high or out of bounds or becoming unbalanced by one part out-growing another, and it becomes necessary to cut back, these parts are headed back to good strong laterals and never to stubs.

More Sunlight—More Color
When growing the tree, the aim in pruning should be to prune in such a way that when the load of fruit comes it will exert a pull in the desired direction and the spread of the tree, so necessary for the letting in of plenty of sunlight to color the fruit and to keep the fruiting wood vigorous and healthy, will be sure to come.

The chief aim in our bearing orchards at the present time should be to keep our trees well thinned out, especially the tops, so as sunlight can penetrate right through the trees. Trees with a good spread, with plenty of spacing between branches will bear more fruit and better fruit than dense, compact trees. The style of pruning that will give the open tree is the so-called "long pruning."

A very essential point to remember in pruning is that no system of pruning will build up weak, devitalized trees. The only permanent way to build up weak trees is through the soil—moisture and plant food are the two requirements.

WILL SHORTEN JOURNEY FROM HERE TO COAST

Proposed New Road Across Cascade Range East of Mt. Baker.

Another and more northern route across the Coast range is being mooted by many citizens of Washington State on both sides of the mountains. This road is likely to be constructed at an early date and would be a very much shorter route to Vancouver from here than the present one by way of Blewett and Snoqualmie passes, and probably shorter than the Fraser Canyon route.

The new road would probably turn east from Bellingham, running close to Mr. Baker, follow the Cascade River, cross the Cascade range and touch the northern end of Lake Chelan. Thence it would run down the Methow Valley and would connect with the present highway at Pateros. Later on, no doubt, a good road will run through from Okanogan or some point farther north to connect with this road at Winthrop or head of Lake Chelan.

FAVORITE HYMNS AND THEIR WRITERS

"LEAD, KINDLY LIGHT"

John Henry Newman, the author of "Lead, Kindly Light," was the son of a London banker, who was born on February 21, 1801. He was a very impressionable boy, and admitted that he used to devoutly cross himself whenever he went into dark places. At the age of fifteen he became filled with a sense of the nearness of God, which remained with him all his life. At that time he made up his mind that it was God's will that he should never marry.

Newman graduated from Trinity College, Oxford, in 1820, and remained there to study and teach. In 1824 he became a clergyman of the Anglican Church, and at once began to preach in a very wonderful and powerful way.

At this time he certainly had no thought of becoming a Roman Catholic; he had in fact been strongly opposed to it, but he was deeply grieved at the progress made by the liberal party in the Anglican Church. He came under the spell of the High Church party, led by devout and able men, such as Pusey, Keble and others. As time went on his great ability was recognized, and he became its master and leader.

For fifteen years (1828-43), he was vicar of St. Mary's, Oxford, where his fine character and elo-

GOOD BUTTER TRADE WITH JAPAN

Figures just issued by the Japanese consul at Vancouver show that Canada is rapidly developing a good butter trade with Japan. In 1922 Canada shipped only 7,681 pounds of butter to that country, while this year, up to a week or two ago, Japanese buyers had bought 3,220,910 pounds, most of which was supplied by western Canadian creameries.

MAJORITY CANADIANS RURAL DWELLERS

In Manitoba 57.1 per cent, Saskatchewan 71.1 per cent, and Alberta 62.1 per cent of the population are actual residents on farms. Quite a number of people living in the urban centres also operate farms. For the whole of Canada, official figures show that 50.4 per cent of the population are rural dwellers.

B. C. TIMBER SEED TO OLD COUNTRY

A ton and a half of Sitka spruce seed was shipped from New Westminster, B.C., recently to Scotland for the British forestry commission. Reports from the Old Country indicate that Sitka spruce seed has been found suitable for much of the land in the Scottish highlands, and, where the commission has undertaken the task of replenishing the supply of timber, results have been very satisfactory.

B. C. CATTLE FOR JAPAN

According to information received by the Canadian National Railways officials, the first shipment of live cattle from the Bulkley Valley to the Orient will be carried by the C. G. M. M. steamer "Canadian Scottish." The shipment will include about sixty head and will sail from Prince Rupert early in January.

CHRISTMAS ORANGES

Already one special train of 22 special refrigerator cars has left Vancouver carrying Japanese oranges to the prairies for Christmas trade. The fruit was distributed to Edmonton, Saskatoon, Winnipeg and other points along the Canadian National main line.

Oh Boy! A Radio!

NOW — I will know what is going on — Music, Fights, Basketball, Lectures, Jazz, Baseball, Football, Stories, — and — an' Everything. Oh, gee! JUST what I wanted most!

That feeling will be voiced in thousands of homes Christmas morning.

Can you hope to better please your boy?

WE ADVISE AN EARLY SELECTION

READ'S GARAGE

quent preaching attracted much attention and exerted great influence. The great statesman, W. E. Gladstone, although he did not agree with many of Newman's views, paid a high tribute to his character and ability.

Church life at that time in England was very low, and Newman started the "Tracts for the Times." Of the ninety which were published he wrote twenty-eight. They created great excitement, which Bloomfield, Bishop of London, termed "Newmanmania."

Some of the tracts which Newman wrote created such a storm against him that, after a painful period of hesitation, and having formally recanted all that he had ever said against Rome, he applied to be, and was formally received into that Church. This was a great grief to his friends, and created much bitterness and strife, but when he died in 1890 his genius and sincerity were everywhere acknowledged.

RECORD SHIPMENT OF CANADIAN EGGS

What is believed to be the largest shipment of eggs ever to leave Montreal on a single vessel, was recently carried on the Melita, which sailed for Belfast and Glasgow with a cargo of Canadian produce, including 3,132,000 eggs, or 8,702 cases.

FORTY THOUSAND ALLOTTED FOR S. OKANAGAN ROADS

Road votes for the various districts of the province for work during the 1925-26 fiscal year, amount to \$1,870,950, according to a list submitted to the legislature by Hon. W. H. Sutherland, minister of public works. South Okanagan receives \$40,000, Similkameen \$40,000, North Okana-

gan \$45,000, Kamloops \$50,000 and Salmon Arm \$28,000.

A prairie visitor tells this one on a local citizen who was on the prairie. A citizen of the plains was contending that they too had their canyons and told of one 200 feet deep. "That's nothing," said the Summerlander, "we have one in E. C. that takes four days to see the bottom of."

"A Snapper Up of Unconsidered Trifles."
* * * * *
The Winter's Tale, Scene II, Act IV

Not very long before his death, the late Dr. Scott, writing in his very interesting series of notes, "The Week End," had something "CLUB" to say about the astonishing productions of certain perpetrators of "free verse," and remarked that if he had to take them seriously he would be tempted to doubt his own sanity. I think some such feeling must have come over many of those who read the report of Premier John Oliver's recent observations concerning the chances of getting justice in our law courts. When we find the head of the provincial legislature declaring that he would sooner depend on a big stick wielded by himself than look to British Columbia courts for redress against malicious attacks we may well rub our eyes, and wonder if we have read aright. In its general bearing on respect for law the incident reminds me of an episode occurring some years ago in a country district court, when the presiding magistrate informed the prisoner he was no good to society, and had better go and hang himself. It was pointed out to this justice of the peace that he had incited the accused to commit a felony, and there seems to be some such encouragement to law breakers in the declaration of a responsible minister that he would rather depend on his own right arm than rely on legal procedure.

Parallels drawn from the animal and insect worlds for human guidance are always open to the objection that the same laws are a LESSON not logically applicable FROM to such widely differing THE BEES planes of existence. If, for example, you take the liberty of reminding a late riser of Solomon's advice concerning the early habits of the ant, he can very reasonably remind you that he does not happen to be an ant, and you may be at a loss for a convincing reply. Nevertheless, there are certain lessons to be learned from natural history if we care to take notice, one of the most prolific sources probably being the internal economy of the hive of the honey bee. The bee hive is the nearest approach to a perfect co-operative community in the whole realm of nature, and reveals to the observer a degree of unity and harmonious labor which mankind has certainly never approached up to the present. Unlike many of the ant tribes, it has no standing army although its individuals are well equipped for defence against intruders—loyalty to its queen amounts to adoration, and domestic squabbles are unknown. All these desirable features are worth more than a passing thought and might, I suppose, will be emulated by us, even though we are not honey bees. One other quality possessed by these friends of man is the ability to prolong life under certain conditions. The normal span of existence enjoyed by a worker bee during the summer is about six weeks, varying somewhat according to the strenuousness of her labors. But from autumn to spring she slows down and so conserves her vitality that she lives throughout the winter and is able to take part in the feeding and nursing of the newcomers of the following season. If she slept through the winter we should take this survival as a matter of course, but she does not. She and her sisters are never dormant, but cluster together for warmth, and consume more or less honey according to varying temperatures. Thus we see here a fourfold extension of life, called for by the need of preserving the colony, and attained by a calculated method which is probably largely instinctive, but none the less remarkable. It is one more illustration of that neglected proverb, "It's not the miles we travel, but the pace, that kills."

A few weeks ago two men, arguing on the question of the verbal inspiration of the Bible, came to blows, and one of them was killed. Had those AND THE BIBLE men known more of the actual conditions attending the development and compilation of the Old and New Testaments, they might have avoided their fatal quarrel. But it is probably true that not one person in a hundred is in close touch with the real history of that growth, as revealed by constant research and discoveries. In a remarkable sermon I heard very lately, the preacher astonished most members of his congregation by reminding them that the books which comprise the Old Testament as we have it, are the result of a gradual compilation extending over two thousand years, and that they are large-

ly taken from other and older books, which are lost, but which are known to have existed. He showed also that they were transmitted down the centuries by oral traditions and what we call folk songs, and that the church zealously guarded them and gradually evolved the connective narrative, preserving it throughout the ages. The same kind of selection occurred also in the compiling of the gospels and epistles, the New Testament, as one book, not being adopted for more than three hundred years after the crucifixion. It being already a matter of common knowledge that many writings were rejected, and that the accepted manuscripts are but a part of the writings which existed, there seems to be little room for the theory of verbal or literal inspiration. The history of the sacred writings also emphasizes a point which many of us are apt to overlook, and that is that the church existed before the Bible, and actually gave it to the world. I am quite sure that the recital of the facts as known came as a start-

ling and disturbing surprise to most of those who heard it, but a little reflection should serve to show that the grandeur of the Bible is in no way lessened but rather increased. When we reflect on the continuity of religious conviction which century after century, preserved and handed down the essence of spiritual feeling, and unerringly held to the main truths, expressing them in language which is unrivalled for beauty, we need not bicker about literal inspiration.

AUTOLYCUS.

The Irishman Knew

An Irishman and his wife visited a theatre. The wife noticed the word "Asbestos" on the stage curtain. "Sure, Pat, and what does that word 'Asbestos' on the curtain mean?" she asked.

"Be quiet, Maggie, and don't show your ignorance," replied Pat. "That's Latin for 'Welcome!'"

A Horse Laugh

"When I told Jibson that joke," remarked Dobkins to his friend, "he laughed like a horse."

"I had no idea that horses like jokes," laughed the friend.

"Nevertheless, it is true," said Dobkins. "They all enjoy a bit of chaff now and again."

WRAPPING CHRISTMAS PARCELS

A simple gift attractively wrapped often makes a happier impression than a more elaborate present carelessly done up. It is not necessary to spend a great deal of money dressing up the packages, but gay colored paper, a bright ribbon or colored cord, perhaps a picture of holly wreath cut from some of the attractive advertising common in the magazines and papers before the holidays, will transform a mere bundle to a very pleasantly mysterious packet.

One girl I know gets red tissue to wrap her gifts, ties them with the gift cord which comes in 10-yard spools for a cent a yard, and slips under the cord a sprig of evergreen; another girl saves all the pasteboard boxes throughout the year, of every size and shape—spool boxes, pill boxes, shoe boxes—and for Christmas covers them with clean paper—plain white if she does not have colored handy—and decorates them with pictures cut from magazine advertisements. I saw her yesterday

cutting out the green holly wreath on an advertising circular that came in the mail. It will trim the top of a box to hold some gift.

Instead of using cord or ribbon to tie the parcels, two sisters I know buy a roll each of the red and green crepe tissue, cut 2-inch strips of the green and 1-inch wide of the red, flute the edges, and put them around the parcels, the red over the green, giving much the same effect as the fancy two-color elastic with fluted edges. It is pasted where it comes to gether, and finished with a gummed seal "sticker" or a picture cut-out.

I remember one Christmas tree at a home where I visited, where the gifts were all wrapped in bright colored paper, tied at the ends and the paper fluffed out like a ruffle or tassel at each end.

POP CORN BALLS FOR THE CHRISTMAS TREE

Pop corn balls make good decorations for the Christmas tree, either plain white, or colored with the same coloring used in cake frostings or molasses and a piece of butter half the size of an egg, until it strings, then stir in a pinch of soda. Put this over a quart dish full of popped corn. When it is cool enough to handle, squeeze it into balls the size of an orange.

If colored balls are desired, the corn is colored before the molasses

is poured over it. Colored balls are better, I think, if made with a white syrup candy or sugar candy.

BUTTERSCOTCH

If it is a "white Christmas," an easy way to amuse the youngsters is to let them have a butterscotch cooling in the snow. Boll together half a cup each of molasses, sugar and butter until it strings, and drop spoonfuls into a dishpan full of snow, where it will cool and harden quickly into delicious blobs! Or, if there is no snow, pour it into a buttered tin—a large one so it will spread out quite thin—and when cool enough, mark in squares, for breaking when cold.

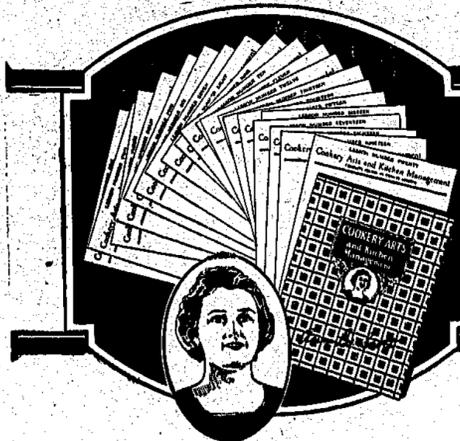

CHOCOLATE TAFFY

Did you ever make chocolate taffy? This is the way: Stir 1 1/2 cups sugar, a small teaspoon of flour, and 2 squares of grated chocolate into 1 1/2 cups molasses and 1/2 cup of milk. When it is hot, add a lump of butter the size of a walnut, and boil it until it strings. Pour it into buttered tins, and when nearly cold, mark it in squares for breaking up when hard.

And many a man seems to have a clear head because there is absolutely

Ten days per annum is the average amount of sickness in human life.

Here is the greatest Free Offer Ever made to Housewives!

Anna Lee Scott

Recognized authority on household problems pertaining to the selection, preparation and serving of food for all occasions.

Director of the Maple Leaf Club and author of a remarkable course on Cookery Arts and Kitchen Management offered to you—FREE.

HOW TO ENROLL

as a Member of the Maple Leaf Club and obtain this Free Course

Send only four Maple Leaf Flour Coupons (1 coupon in 24 lb. bag of Maple Leaf Flour—2 coupons in 40 lb. bag—4 coupons in 98 lb. bag) to the Maple Leaf Club, Maple Leaf Milling Co., Limited, Winnipeg, Manitoba. This enrolls you as a member of the Maple Leaf Club and the first four lessons of this remarkable course will be mailed to you at once, the remaining lessons—four each month—without charge.

See your dealer about this unusual free offer, to-day.

You can join the Maple Leaf Club—secure a wonderful 20 lesson course in Cookery Arts and Kitchen Management and enjoy the personal advisory service of Anna Lee Scott for five months—

FREE

Even without the coupons enclosed in every bag, Maple Leaf Flour would be more than worth every cent it costs you. No other Flour gives superior baking results either for bread, cake or pastry.

Maple Leaf Flour is made from the finest selected Canadian hard wheat, carefully milled and tested at every stage of its manufacture. A written guarantee of uniformly high quality goes with every bag—it must be satisfactory or you get your money back.

For the purpose of more quickly introducing Maple Leaf Flour to the housewives of Western Canada, we are making an unheard of special offer for the return of coupons enclosed in every bag. These coupons

entitle you to a wonderful Free Course, the equivalent of a college course in Domestic Science, that would be low-priced at \$200.00.

A course by mail, written by one of the leading cookery and household experts in Canada—Anna Lee Scott—Director of the Maple Leaf Club.

It is impossible to buy this course, yet you can secure it free. All lessons are sent post-paid. There are no examinations to answer. The only correspondence invited is for any help you may desire on subjects relating to household problems or the cooking or serving of special dishes for special occasions—such inquiries will be promptly answered personally by Anna Lee Scott—without charge.

SUMMERLAND REVIEW PRESSES

SANTA CLAUS IS COMING ALRIGHT

He has sent us word to that effect. He says that he has lots of toys for good little girls and boys, but he had an awful time getting down to civilization and his reindeer were quite tired out. However, he has borrowed a big engine from the Canadian Pacific people, one of those so powerful that it pulls a heavy train between Montreal and Winnipeg in less than forty hours and he's alright now. "Don't you worry," he says, "I'll be there alright if nobody stays awake trying to catch me."

JONES WOULD RAISE MONEY IN PROVINCE

Objects to Borrowing in States or East—Money Here in The Banks.

J. W. Jones, member for South Okanagan, would have the government float a domestic loan to raise the \$3,500,000 necessary for highway extension. The government's new loan bill, which was up before the legislature for consideration, provides for the borrowing of that sum for road purposes.

"There is plenty of money lying in the banks, to the credit of provincial investors," Mr. Jones declared, "and I object most strongly to the continued floating of British Columbia loans in Eastern Canada and the United States if they could be placed here."

Term Too Long

Mr. Jones warned the government to be careful about issuing new loans, claiming that next year the administration would have to borrow \$12,000,000 to refund maturing obligations. He said that last year the government had borrowed \$10,000,000 and the new loan would bring the total up to \$13,500,000.

"Since taking office this government has borrowed \$63,000,000," he continued. "I object strongly also to the government's plan for a long-term loan, on the ground that within a few years it will be possible to borrow money much more advantageously than at present. The proposed fifty-year term is far too long."

George Walkom, provincial, Richmond-Point Grey, objected to long-term loans to pay for public utilities of a relatively short life. He claimed that the liabilities would still be outstanding after the utilities were worn out.

Comes from Outside

Referring to Mr. Jones' suggestion that a domestic loan be floated, Attorney-General Manson asked how this principle would apply to mining investments. He declared that a great deal of the money put into the industry came from outside.

"I admit that," said Mr. Jones, "but in this case at least let us look up the money at home."

The South Okanagan member advocated the collection of a toll of \$1 from persons travelling over the proposed Fraser Canyon highway.

An Authority

Sonny—Father, are all words in the dictionary?

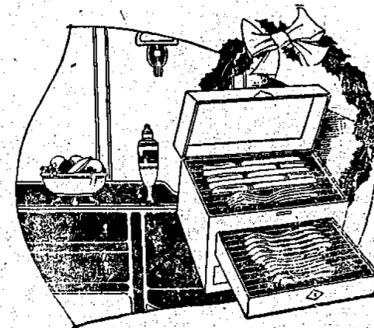

Father—No, indeed. New words are coined every day.

Sonny—Well, where will I find the very latest ones?

Father—Ask your mother; she has the last word every time.

Full Street Lighting Service Is Resumed

New Transformer Put in Place On Monday—Expert Here.

PARTIAL SERVICE ONLY FOR SOME TIME

Cost Hundred Dollars to Have Unsatisfactory Instrument Replaced.

Summerland had a full street lighting service Monday night for the first time in many months. The new transformer was installed on Monday by T. P. Thornber, municipal electrician, and a representative of the manufacturers, who are guaranteeing the instrument and naturally would want to have it placed and connected up to their satisfaction.

This transformer replaces the original machine which had not given satisfaction from the first. It had always overheated and finally burned out. Many months were consumed in correspondence between the municipality and the company and not until the municipality offered to pay one hundred dollars toward the new transformer did the manufacturers promise to replace the burned out transformer.

Finally the new instrument arrived about the first of December, but minus several gallons of oil, essential to its operation. This had to be ordered from the east and arrived more promptly than anticipated.

General satisfaction is expressed in the revival of the street lighting service. For some months only a partial service in the two town areas had been maintained.

WAS BIGGEST APPLE DEAL IN NORTHWEST

Hood River Apple Growers' Association has sold to New York export apple merchants the entire remaining export tonnage of all grades and varieties of apples, totalling 300,000 boxes. The sale, which will involve payment of an approximate half million dollars, was the largest in the history of the apple industry of the northwestern states.

SMALL TOWN BARBER NOT UNDER NEW ACT

Barbers of small towns will not come under the barbers' incorporation bill which was made law last week in the provincial house. A final amendment provides that the bill will not apply to unorganized districts or in towns with a population of less than 7,000.

The Takakkaw falls in the remarkable Yoho valley, Canadian Rockies,

Dollar or More Given By Everyone Canvassed by Committee.

Six hundred dollars will be the sum of the cash donations made to the hospital as a result of the recent campaign. Already \$550 have been received and other promises will bring it up to or nearly to the larger sum.

Practically everybody approached contributed a dollar or more to the institution. It is reported that there were only three refusals. If, in their rounds, members of the canvassing committee overlooked anyone, the society will be grateful if he or she will call at the office with their contribution and add their name to the list.

The list is a lengthy one and many have requested that their names be not published. Accordingly, this list will not be put in print but any interested persons are at liberty to inspect the list at any time at the office of the secretary.

The Review is requested to express the gratitude of the members of the hospital board for the ready response to their appeal which the canvassing committee met everywhere.

NO RURAL MAIL NEW YEAR'S DAY

There will be no delivery of mail on the rural route on New Year's Day. This is the one day of the year on which rural route couriers throughout Canada are given a holiday.

PEACE ARCH IN OKANAGAN NOW MOOTED

Americans Move to Build Arch On Okanogan-Cariboo Trail.

Oroville.—A movement to erect a peace arch at the Canadian boundary three miles north of Oroville was started by Wenatchee Post No. 10, American Legion, at its meeting held Friday night, says the Oroville Gazette.

The proposal was brought to the attention of Wenatchee Post by Bob Crompton, a member of the post's executive committee, and the post went on record as favoring such a movement. Commander Leon Babcock of the ninth district was present at the meeting and stated that he was for it and would bring it to the attention of all of the posts in the ninth district.

No more appropriate place for a monument to the friendly relationship that has existed for over a century between the two countries could be selected than at the boundary north of Oroville. With the tourist travel over the Okanogan-Cariboo Trail growing annually the proposed peace arch if erected would be seen by an increasing number of people from both countries each year.

THOUGHT BLAZE WAS BURNING RESIDENCE

A bright blaze, noticed on the first bench above Naramata on Friday night by a number of Summerland citizens, was the cause of numerous inquiries, it being first thought that a house was ablaze. It has since been learned that the fire had been kindled by men doing repair work along the pipe line above the Kennedy ranch. The pipe had frozen and burst, causing considerable damage to properties below, before the flow was diverted and repairs completed.

NO CHANGE IN DATE OF ELECTIONS

Proposal to Fix Municipal Elections For December Laid Over.

Not for another year at least will there be a change made in the Municipal Act to fix the date of elections for December instead of January. The amendment authorizing the holding of elections in December instead of January, which was before the legislature, led to so much controversy that it was dropped for a year.

N.B. APPLES GAIN A REPUTATION

Fredericton, New Brunswick.—"New Brunswick apples seem to have attained the best reputation for an honest pack in Montreal," according to the provincial horticulturist who has returned from the metropolis. The Montreal market has been taking increasingly large quantities of New Brunswick apples and this fall sixty carloads have been shipped through. Prices have been about 25 per cent higher than last year.

Dangers of Gasoline Vapor

To prevent vapor of gasoline from spreading, care must be taken to avoid overflow. Any gasoline spilled over the tank or around the car forms a heavy vapor that may be ignited as soon as the engine is started.

The Editor and staff of The Review desire to extend to every reader and its patrons and contributors sincerest wishes for A Very Merry Christmas

SEED GROWERS PLAN CHANGE

Expect Government to Take Over and Operate Clearing Plant.

Announcement of a change in the handling of seed produced in this province whereby the provincial department of agriculture will take over and operate the plant of the United Seed Growers, Limited, is expected shortly.

As announced by The Review two or three weeks ago, Messrs. Moyes, Summerland, and King, Kelowna, were appointed a special committee to interview the department of agriculture on this subject. It is hoped that under the department and with the necessary means which it could provide for the purpose, a greater stimulus would be given seed production in this province. It is understood that the conference between the committee and the department will result in the desired change.

Here in the southern part of the Okanogan, seed production has become quite an important factor in agriculture. In the Fraser Valley, growers are also giving attention to the production of vegetable and other seed and on Vancouver Island sweet pea and other flower seeds are now being produced in commercial quantities.

It is stated that British Columbia climatic conditions are most favorable to the production of seed of high vitality and with the gathering, cleaning and grading of the seed by the department, it is hoped that the business will rapidly expand.

But a small proportion of "Havana" cigars contain Cuban tobacco.

LOCAL STORES WILL CLOSE DAY AFTER CHRISTMAS

Summerland stores will be closed on Friday, December 26th. This is becoming a general practice here and elsewhere. All stores will be open Wednesday night, Christmas Eve.

TRAINS ARE RUNNING LATE

Some Days Yet Before Coquahalla Pass Is Again Open For Traffic.

Eastbound trains over the K. V. R. are still running by way of Fraser Canyon and Spence's Bridge. It will probably be another fortnight before the shorter route through the Coquahalla Pass is again open. Trains due here at 7 o'clock through the pass do not arrive until nearly noon over the longer route.

Westbound trains have also been arriving here late, sometimes several hours, due, it is explained, to the holding of the train at Nelson until the arrival of the Kootenay lake boat, which is experiencing considerable difficulty in maintaining service between Kootenay Landing and Nelson.

CRESTON APPLE CROP TOTALLED 325 CARS

Creston, B.C.—Apple growers packed and shipped 325 cars or 225,000 boxes of apples this season. Twenty carloads were sent to Great Britain and one to New York.

DRIVERS MUST OBTAIN LICENSE

Amendment to Motor Act Goes Into Effect on January First.

Every driver of a motor vehicle will be required to take out a license by the first of January. This is a provision of a recent amendment to the Motor Vehicles Act. The license will cost one dollar.

License cards will be issued by the provincial police along with the regular car license plates. On the back of these license cards will be printed a summary of the regulations with respect to motor traffic.

NOVA SCOTIA APPLE EXPORTS INCREASE

Annapolis, Nova Scotia.—Apple exports from the Annapolis Valley from the beginning of the season to the end of November, 1924, via the port of Halifax, total 582,697 barrels, as compared with 538,342 barrels during the same period a year ago.

BRITISH CAPITAL LOOKING TO CANADA

Montreal, Quebec.—Keen interest is being taken at present by British manufacturers and capitalists in the Canadian market. At the present time representatives of William Joel, export and import merchants; British Dyestuffs Corporation, Limited; Callco Printers Association; and Cope Brothers, tobacco manufacturers, are visiting this country, looking into trade conditions with a view to possibly establishing a branch factory in Canada.

Shuttleworth After Man-Killing Cougar

CHRISTMAS DAY PHONE SERVICE

9 to 11 and 3 to 5 only. The emergency service on Christmas and New Year's days will be for the Doctor only. No other calls will be put through.

SUMMERLAND BOY CHOSEN FOR CABINET

Second Session of Boys' Parliament At Victoria Next Monday.

Premier Walter S. Owen of the second British Columbia Older Boys' Parliament has announced his cabinet for the forthcoming session, which will be held in Victoria December 29, 30 and 31.

Premier—Walter S. Owen, Vancouver West.

Attorney-General—William J. Bell, Vancouver East.

Provincial Secretary—George Miller, Vancouver North.

Minister of Finance—Bert Bailey, Victoria.

Minister of intellectual affairs—Ronald E. White, Summerland.

Minister of physical affairs—Elmer Speer, Vernon.

Minister of devotional affairs—Howard Lang, Vancouver West.

Minister of service affairs—Clyde Rogers, Ladner.

Minister of municipalities to be appointed.

At an informal meeting of members of the cabinet with the Premier it was decided to recommend to the House the appointment of Arthur Howarth, New Westminster, as Speaker.

The members of the parliamentary committee in Victoria have announced the following appointments: Honorary Speaker, Mr. E. J. Farr; clerk of the House, Mr. Chas. Keen; law clerk, Mr. W. T. Straith; sergeant-at-arms, W. McEwan.

A committee, consisting of Mr. Beckwith, Mr. Straith and Mr. Farr, is at work preparing bills, resolutions and suggested amendments to the legislation of last year ready for the opening at 3 p.m. Monday, December 29. Mr. F. A. Pauline, late speaker in the Legislature, and a good friend of the boys, has been asked to assume the duties of "Lieutenant-Governor" at the formal opening of the House.

PRESIDENT OF BOX COMPANY KILLED

Victim of Accident on Soo Line—Son Left for Coast Sunday.

R. W. Sharpe, president of the Pacific Box Company, Limited, Vancouver, and who spent some time at the local factory here, was killed in the recent train wreck on the Soo Line last week, according to word received by his son, R. B. Sharpe, here on Sunday morning. No further particulars had been received at that time. R. B. Sharpe left here by the noon train on Sunday.

VALLEY OPTOMETRIST MOVES TO VICTORIA

H. S. Timberlake, optometrist, who has been visiting Summerland periodically for the last three or four years, has removed from Vernon to Victoria, where he expects to engage in his profession on a larger scale.

No Skill Required

Client: Heavens, man, you are taking four-fifths of my damages. Lawyer: Well, I furnished the skill, the eloquence and the necessary legal learning of the case.

Client: Yes, but I furnished the case itself. Lawyer: Bosh! Anybody could fall down a coal hole.

Mountain Lion Kills and Partly Devours Lad Across Line.

BOLD BEAST CLOSE TO HABITATION

Evidently Encouraged to Attack By Fleeing of Boy.

Killed and horribly mutilated by a cougar, the body of a fourteen year old lad was found close to his home near Okanogan, Washington. Charles Shuttleworth, of Okanogan Falls, the noted cougar hunter, was hurriedly summoned to track down and destroy the animal. Following is an abbreviated report of the story as given by the Okanogan Independent:

James Fehlbauer, a 14 year old boy, was killed and horribly mutilated by a cougar about ten miles west of Okanogan Wednesday. His remains were discovered in a canyon about three miles from the Chelan-Okanogan highway. He had been disemboweled, and one side of his face and neck and both hands were eaten, as well as a large portion off one hip. His skull was crushed.

Sheriff Wilson and Deputy McCauley were called Wednesday evening to assist in a search for the boy, who had left the home of R. L. Nash about 10 o'clock in the morning to get a team from a neighbor. On the arrival of the officers the gruesome discovery of the body had been made and upon pronouncement of the tracks of his assailant as those of a cougar, McCauley prepared to leave for British Columbia to secure the services of Chas. Shuttleworth, expert cougar trapper. Leaving Okanogan after midnight, McCauley covered two hundred miles in zero weather, and returned here at 10 Thursday morning. He fortunately found Shuttleworth at his ranch near Okanogan Falls, but the hunter was obliged to go to Penticton to cancel plans for a trip with the game warden of that district. On the return trip the men picked up Chas. Haley, county game warden, at Tonasket, who has also had experience hunting cougars.

Shuttleworth brought his dog, Pat, pronounced one of the best he ever had. The animal was presented by Senator E. B. Palmer of Seattle to Clay Fruit, chairman of the Okanogan County Game Commission, two years ago, and has been trained and used extensively since by Shuttleworth. Only a few days ago Shuttleworth killed four cougars near Summerland, B.C., the trail of one leading to three others, which were treed by his dogs.

The boy-killer cougar is in territory so close to well settled country that the men started out immediately, carrying only knapsacks, rifles and snowshoes. The latter will not be needed unless the animal loads (Continued on back page)

ZERO WEATHER IS NOW OVER

Gradual Rise in Temperature Though Wind From North.

Though we have not experienced zero weather since last Saturday, according to official records, the wind continues from the north and remains cold. Each night the temperature drops to within about three degrees of the zero mark, going up to only 11 during the day.

However, this is better than the 0 below registered on Wednesday of last week, since which date there has been a gradual improvement with 3 below last Saturday.

The continual frosty weather has caused the overflow of Prairie Crook at several points along the gulch road and also at Dale's corner. Ice on the heavy grade in the gulch has made motor traffic there somewhat dangerous. Foreman Tomlin has been sent to scatter sand over the ice and today reports that the creek is staying within bounds at all points.

The Summerland Review

Established August, 1908.

Published at Summerland, B.C., every Thursday by
THE REVIEW PUBLISHING COMPANY, LIMITED
Ralph E. White, Editor and Manager

An independent family newspaper covering Peachland, Summerland and Naramata and adjacent districts.

Member of Canadian Weekly Newspapers Association.
Member of British Columbia Selected Weeklies.

Subscription Rates—In British Empire, in advance, \$2.50 per year; six months, \$1.40. To U.S.A. and other countries, \$3.00 per year.

Advertising Rate Cards and information respecting territory and samples of paper mailed upon request, or may be seen at the office of any advertising agency recognized by the Canadian Press Association.

Advertisers must have copy in by Tuesday noon in order to insure changes for standing advertisements. New display advertising copy can be accepted one day later.

Correspondence—Letters addressed to the Editor and intended for publication must be short and legibly written on one side of the paper only. The longer an article, the shorter its chance of insertion. All communications must bear the name of the writer, not necessarily for publication. The publication or rejection of articles is a matter entirely in the discretion of the Editor. No responsibility is assumed by the paper for the opinions expressed by correspondents.

Typographical Errors—In the event of a typographical error, advertising goods at less than the proper price, the newspaper will furnish letters to be posted in the store stating the correct price, but goods may not be sold at the price printed and the difference charged to the newspaper.

Wednesday, December 24, 1924

VISIONS OF YULETIDE.

Have you ever had a vision of what this world would be had there never been a Christmas time, and no reason for one? We do not like to think of it, for it surely would be a black time in the world's history were we to go back to the day when the Christ child had not been born.

A good many things we have to pass quite unappreciated until through some wrench of fortune they are snatched away from us. Lovely things, beautiful things, things we could scarcely do without, far too often lie in our hands without bringing to us a single thrill of joy or of thanksgiving. We have them; we enjoy them, but we are not grateful for them. Only when we wake up some morning and find that our treasure has been taken away from us do we cry, "Oh, bring it back! I must have it; I cannot live without it!"

Now, we have our Christmas treasure. It has been ours all our lives, so long that we have become accustomed to it. We accept it and all that comes with it, as a matter of course; and it means so little to us! We give; we get, and we do not stop to think why.

What if a new vision of the Christmas time were to come to us in this year of our Lord 1924? What if we were to take down a Book which has lain on the shelf so long that the dust is deep on its covers and read once more the story of that first Yuletide, the brightest and the best day that ever came to this old world, and lingered over it until our souls beat warm once more, and our hearts filled again with the love which was on that day manifest toward all the world. What a new day that would be in the lives of us all!

And it may be so. A stone has too long lain at the doorway of our hearts. Let us roll it away now, and let its glory flood our lives and make us once more little children with all a child's innocence, goodness and longing for the happiness of everyone he knows!

BRITAIN AND OUR APPLES.

Preference by way of duty on apples from countries outside the Empire is not likely to be provided Empire fruit by the British authorities. The discussions in the Old Country with respect to tax on imports, with preference on any Empire products, including apples and canned salmon, have been watched with much interest and some concern by people of British Columbia. For a time it looked as though Okanagan fruit growers would have this advantage in the Old Country markets over growers in the United States.

The pronouncement of Premier Baldwin has set aside this hope but it is predicted that the Imperial Economic Committee, which will get down to work immediately after Christmas and on which the dominions and crown colonies each have two representatives and Great Britain four, will recommend the expenditure of one million pounds yearly in the development of Empire trade. The committee is expected to advocate the expenditure of a considerable sum in advertising.

If the London Daily Mail is right, Canada will be able to secure a grant to assist her in packing apples for export to Britain and to bring Canadian apples before the British purchasers on an equal footing with American fruit.

Cheap alarm clocks are the best. Sometimes they don't go off.

TAX MAIL ORDER HOUSES.

(Canadian Drygoodsman.)

It has frequently been suggested that mail order houses should be compelled to pay a tax into the treasuries of the districts in which their business originates. This subject comes to the fore again owing to the consideration being given by parliament to legislation designed to curb transient traders and also because of the parliamentary enquiry into conditions surrounding farm life in Canada. It is understood that when members of parliament were informed of the vast amount of business done by the mail order business and the harm this does to the smaller cities and towns, several of them expressed themselves as being in favor of a tax that would be paid to the localities affected.

The result of mail order competition is worthy of the earnest consideration of the parliamentary committee on agricultural conditions in Canada. It is admitted that one of the biggest drawbacks to farm life is that the farmer cannot induce his children to stay on the farm. Life in the farming districts cannot compete in interest with city life. What is the reason for this? Because they have not got live, up-to-date stores and the attractions that go with a prosperous community.

They lack these attractions because they cannot afford them—because fifty per cent or more of the money spent by the residents of the districts goes to the mail order houses and the community gets no benefit from it. Prosperous retail stores are the first essential of a bright progressive community and these cannot exist because of mail order competition.

Conditions would be improved somewhat if the mail order houses were taxed for the benefit of the communities in which their business originates. The tax money could be applied towards making these communities better places to live in and the tax would place the local stores in a better position to compete with the mail order houses.

The First Christmas Tree

Once upon a time a poor charcoal burner lived in a wood with his wife and children. Sometimes there was not enough food in the tiny home. At these times his babies went hungry to bed.

The winters in the country where these people lived were very cold. So cold that for days the Father could not go into the forest and get wood to burn into charcoal.

The winter that I am going to tell you about was one like this. It was late in December. For four days the kiddies had had nothing but gruel once a day. Every night they had snuggled in their bed of fir tips to keep warm.

On the fifth day the Father went into the forest to get wood. While he was there the Mother gathered fir tips for new beds. She returned with a great arm load. While playing, one of the children stuck a branch in a crack in a wall of the hut. While their Mother was getting grain for gruel his little brother copied him.

The Father came home at night and saw the fir tips all about. It made him remember the day. It was Christmas. He told his babies the story of the tiny Jesus who was born in Bethlehem. They were wide-eyed when they crawled into bed that night; not hungry this time for the Father had brought home a rabbit.

A year later the Mother trimmed the house with fir tips. She placed one larger branch by the children's bed. When they saw what she was doing, the children remembered the Christmas past, that evening they begged their Father for the story of the Christ Child. Many neighbors told the same story on that night, and many homes were decorated with fir tips.

One year the Father brought home a little fir tree and placed it in the home. It was to take the place of the branch which had always been put near the children's bed.

Soon all the folks in the forest were bringing home trees for Christmas. The custom spread to towns, then over the world.

One Christmas morning the children woke to find several pieces of paper tied to the tree. Their Father took it off, and when they opened it there was some dried fruit in each piece of paper. How happy they were! Other Fathers came to know of it and on the following Christmas there was dried fruit on every tree in the forest people's homes.

This was many, many years ago, but the custom is carried on even to this day.

The Pedlar's Pack

By AUTOLYCUS

"A Snapper Up of Unconsidered Trifles."

The Winter's Tale, Scene II, Act IV

It was a foregone conclusion that the technical flaw in the Associated Growers' contract would be amended at Victoria, the whole tendency of the law being

GOING TOO FAR? that agreements shall not be evaded by technicalities which do not affect the objects sought therein by both parties. But it is doubtful whether the clause providing for prosecution of any person who "solicits, persuades, aids or abets" a grower to break his contract will not react unfavorably on the Association because of the resentment certain to be aroused in many quarters. To make a contract legally sound is one thing—to surround that contract with barbed wire entanglements in which to catch people who are not parties to it seems to taste of coercion, and is very possibly ultra vires. This latter possibility can, of course, only be tested by expensive litigation, but it is rather significant that the opposing element was largely made up of members of the legal profession, who may have had that point in mind. Apart from that, it seems a pity to alienate public sentiment by a policy which many will certainly condemn as too drastic. It is true that there is an old proverb which says that the receiver is as bad as the thief, but it will hardly apply here, since a grower who, under some stress of circumstances, has disposed of part of his produce to enable him to keep going, cannot be classed as a common thief, and that reflection also changes the standing of the receiver. The responsibility of living up to the contract lies with the grower, and not with a third party, who has no contract to observe. Let it be granted that the dealer who seeks to persuade a grower to break his agreement is a very low grade business man, and is really more to be blamed than he whose necessity he takes advantage of;—the fact still remains that he is, in so doing, breaching no law, and his real penalty should be the contempt of all legitimate traders.

accomplished by keeping strict watch on boxes which are the property of the co-operatives. A dealer found in possession of, or known to be handling boxes issued to members of the Associated, could be immediately charged with unlawful possession and no special act would be necessary to authorize his prosecution. It is along that line that results could most easily be obtained while bootlegging continues, but I am of opinion that, with the worst time over and a growing realization of the absolute necessity of co-operation, the practice will soon be a thing of the past.

On the principle that it is better to see a church militant than a church apologetic, most people will be interested in a mild turning of the

A FAIR COMPARISON. tables against those critics who are fond

of dwelling on the small attendances at church services. The "Christian Century" is said to have recently sent out one of its staff to investigate this matter of attendance, with instructions to compare church figures with statistics of averages among secular organizations. The results were rather surprising. Speaking generally, the investigator found conditions in the various lodges and kindred associations "ten times worse than in the church" and handed in documentary evidence to prove it. One lodge, with a membership of 700, mustered a scant 35 for the evening, another, having a roll call of 500, could only report an average attendance of 30, and The American Legion, despite its multitudinous title and a membership of 1100, had to be as content as possible with an average of 60 to a meeting. On the other hand, the church of which the investigator was a member, out of a membership of 1200 managed to attract a morning congregation of 445 and an evening attendance of 200, and the averages at its weekly prayer meetings were much higher than those of any lodge or club visited. This looks like a clear illustration of the church triumphant, and confusion to the critics.

In any case the actual difficulty lies in the proof of illegal sales, and in that connection I fancy more can be

most minds concerning provincial legislation of the past session will probably be that it is a VICTORIA hard to decide who's MEDLEY who, what's what and where do we stand on several of the matters dealt with. It is not often that we are regaled with such a medley of confused issues, cross opinions and erratic voting as we have seen lately. It may be admitted that there has at any rate been plenty of humor—a sort— injected into the proceedings but that is hardly what we look for, and is dear at the price. It is also all to the good that something has been done to moderate the abuse of alleged racing on British Columbia tracks by horses imported in bulk from the southern States and Mexico. But it is decidedly bad that the immensely important matter of timber royalties should have been rushed through and settled for the next ten years without a proper share of consideration. The decision on beer could hardly have gone any other way unless the mandates of local majorities had been disregarded, and Premier Oliver followed the strictly constitutional course by voting as he did.

When we examine the speed limit episode, and try to form an intelligent idea of its practical working we feel something akin to the despair which prostrates a reader tackling one of Meredith's novels for the first time. Is there a speed limit or isn't there? — if there isn't, who is to judge what is driving to the common danger? So long as an autoist, by the grace of Providence or sheer fool's luck escapes hitting anybody, how is he to be penalized unless he is shown to be exceeding a specified rate? I suppose the police will have to work on the principle of the nurse who tested the temperature of the baby's bath by noting the reaction of its skin on immersion — if it turned red the water was too hot, — if blue it was too cold! We may be duly thankful that the limit was at any rate not stretched to thirty-five miles, and that seems to be the one good feature of the debate.

A curious feature of the proceedings was the apparent acceptance by the legislature of a calm statement that there was no speed limit fixed in Great Britain, where automobile traffic ran on the common danger principle. As a matter of fact the limit there is much lower than here, being ten miles for cities and twenty miles outside. Moreover the penalties are pretty strictly enforced,

The dominating impression left in

which is probably one reason why the toll of disaster in the old land is a great deal lighter than on this side of the Atlantic.

Local Happenings

Alex G. Smith of the Kelowna
public school staff is spending the
holidays with his parents here.

Before going elsewhere consult
Mrs. Milne about an evening dress.
L21

Leigh Salter came in from Van-
couver on Saturday's train for a
holiday visit here.

Bernard Taylor came in Thursday
from the Coast where he has been
attending university.

Lionel Fudge came over from Kim-
berley on Monday to spend Christ-
mas at his home here.

Miss Jessie Moffat came over from
Grand Forks on Saturday where she
has been teaching.

Miss Thelma Hobbs came up from
Kaledon on Saturday for the Christ-
mas vacation.

W. Hack, who has been working
at Kimberley for some weeks, arrived
home on Monday for Christmas.

Miss Edith Bristow arrived home
on Saturday from Nakusp to spend
the Christmas vacation at home.

Miss Alva Garnett came down from
Westbank on Saturday and is spend-
ing the holidays at her home here.

Louis Smith, a university student,
came in on Sunday's train from the
Coast to spend Christmas at home.

H. W. Daniel of the public school
staff left on Friday to spend the
Christmas vacation at his home in
Vancouver.

J. W. Harris now on the teaching
staff at North Bend, came in on Sun-
day's train to spend Christmas with
his family here.

Miss Lucy Hargreaves arrived home
on Friday from Osoyoos, where she
has been teaching, and is spending
the vacation here.

Miss Sue Whiteford and brother,
Lloyd, left on Saturday's train for
Vancouver where they will be guests
of their sister, Mrs. Bishop.

Mac Laycox came in last week
from Victoria, where he has been at-
tending provincial normal school.

Donald Ross went out on Monday
morning to Albert Canyon, where he
will be stationed for a time as C.P.R.
operator.

Miss Jessie Monro, who is engaged
in civil service work at Victoria, came
in on Sunday to spend the holidays
at her home here.

Special balloon dance, New Year's
Eve, veterans' hall. Cards, dancing.
L21

Mrs. A. W. McLeod, of Vancouver,
who has been the guest for some
time of the Misses Spencer, left on
Saturday's train for the Coast.

Miss Elaine Griffiths of the high
school staff went down to Vancou-
ver on Saturday to spend the holiday
at her home there.

Miss Dorothy Tomlin, who has been
attending normal school at Vancou-
ver, came in on Saturday's train to
spend the holidays here.

M. A. Marshall returned last week
from Vancouver, where he has been
attending U.B.C., to spend the vaca-
tion at his home here.

Word has been received here that
Harry Hobbs, now in Vancouver, and
who was a candidate for the older
boys' parliament, has been elected

Mr. and Mrs. C. A. Walters left on
Sunday via K.V.R. for Bellingham
and Tacoma, where they will spend
Christmas and visit for a time.

Molven Monro arrived on Mon-
day from Seattle to spend Christmas
with his parents, Mr. and Mrs. R. S.
Monro. He expects to return the
end of the week.

SUMMERLAND WEATHER
REPORT

Below is a report furnished by the
Dominion Experimental Station here
for the week ending Tuesday:

Table with columns: Date, Max., Min., Rain, Snow, Sun.
Rows for Dec 17-23.

Miss K. Brown came down from
Vernon on Saturday night for the
Christmas vacation.

Miss Marion Beavis came down
from Kelowna on Friday night for
the vacation.

Come to the G.W.V.A. hall New
Year's Eve. Cards, 8 o'clock; dan-
cing 10.30. Admission 35 cents. L21

Miss Doris Jackson came over from
Nelson on Saturday's train. She has
been studying at Nelson for some
months.

NARAMATA NEWS
Current Events of
Town and District

A number of friends foregathered
at the home of Mr. Donald McKay
on Tuesday evening, the occasion be-
ing the birthday of the host. A
merry time was passed by the as-
sembled guests, although bad weather
reduced their numbers. The birth-
day cake was sent from the old
country by Mrs. McKay.

A son was born to Mr. and Mrs.
W. Bailey on Wednesday in Pentic-
ton hospital.

The Badminton Club is holding
tri-weekly meetings in the Bowes
building, the season now being in full
swing.

The closing of the school for the
Christmas holiday was the occasion
of an entertainment, by the pupils
on Friday afternoon, when there was
a good attendance of parents and
friends. The program included the
singing of Christmas carols, recita-
tions and the staging of two short
plays, one of which dealt very amu-
singly with the confusion caused by a
general mix-up of gifts brought by
Santa Claus, and a consequent series
of misfits in the distribution. The
entertainment showed evidences of
careful training by the school staff,
Miss Allan and Miss Wilkie, and was
much enjoyed by the many visitors.

There was a bad break in the wa-
ter pipe above the Timmedy ranch
on Friday evening, and relays of
workers spent that night and the
next day in repair work. It will be
necessary to install an auxiliary ser-
vice to supply domestic water to re-
sidents and this will probably take
a few days to complete. One result
of the break was the flooding of the
Weaver and Amaron gardens from
the ravines leading down to the low-
er road, this flow not being diverted
until midnight on Saturday.

Miss Alice Myers arrived from the
coast on Friday morning, and will
spend a two week vacation at home.

Owing to the high wind on Sun-
day afternoon the Rev. H. J. Armit-
age was unable to come across the
lake and the Christmas service was
taken by Mr. Bartlett, whose address
dealt with the Gospel of St. John in
its various aspects. Special Christ-

The Women's Auxiliary held an in-
formal sale of surplus articles on
Saturday at the home of Mrs. Rush-
bury and realized over \$20. Tea
was served by the hostess.

mas hymns were joined in by a large
congregation and Berthold Tour's
anthem, "Sing, O heavens," was ren-
dered by the choir, the solo being
taken by Mrs. Cross, with Mrs. Lan-
guedoc at the organ.

Miss Allan and Miss Wilkie left
for their homes on Saturday morn-
ing and will be away for two weeks.

State College of Washington

BABY'S BOTTLE
Many who have the care of little
babies believe the long, round nurs-
ing bottle the best, because it is
smooth inside without any corners or
angles and is easily cleaned. On the
outside the graduated ounces are
marked, which is a great convenience
in modifying the milk to the child's
age and development requirements.

As soon as the baby has emptied
his bottle it should be taken away
(not left for him to suck on the em-
pty bottle) and cleaned with a bottle
brush and clear hot water. Then it
should be filled with fresh water and
set aside. In the morning before
the baby's food is prepared all the
bottles should be boiled in a solution
of baking soda and water (2 table-
spoons of soda to a quart) and the
bottles then rinsed thoroughly in
CLEAN, BOILED water.

The nipples should be boiled in
water one minute. When not in use
they should be wrapped in dry ster-
ilized cheesecloth and put in a cov-
ered jar. Among the best nipples
now in use are three sorts of "anti-
colic" nipples, and two "transparent
seamless" nipples. Almost any good
drug store should supply them.

Cooking History
During the past few years cook-
ing methods have undergone marked
changes. The food of the nation is
becoming more and more wholesome
as a result of different discoveries,
new sources of supply, and the in-
telligent weighing of values. Dom-
estic science is better understood
and more appreciated.

People of the present century are
fairer to their stomachs, realizing
that health depends largely on this
"faithful and long-suffering servant."
Digestion and disposition are words
that sound much alike, and a good
disposition is often wrecked by a
bad digestion.

America has been termed, in the
past, a country of dyspeptics, but it
is being changed to a land of healthy
eaters, and consequently of happier
individuals. There are many agents
responsible for this national diges-
tive improvement, and they should
be gratefully recognized.

When Brake Bands Squeak
When dirt becomes firmly trenched
in the brake lining, causing chronic
squeaking, use a treatment of a little
rosin mixed with castor oil applied
to the bands.

Christmas time again is here
Accept once more

Associated Gives Reasons Why Apples Are Not Being Held For Higher Prices

Summerland Co-operative received from the Associated a bulletin on the subject of selling now or holding apples in storage for a later and higher market. This bulletin has been handed to The Review with the request that it be published.

In view of the known shortage in the supply of winter apples throughout the American continent it is almost certain that the late winter and spring market will be exceptionally strong and better prices prevail than have been seen for several years. It is more than probable that, seeing market quotations during the late winter months of very high prices paid for choice varieties our growers will naturally ask why the Associated did not foresee this condition and hold a larger proportion of the crop in storage to get the advantage of these unusual prices.

In order that our growers may have a full understanding of the situation we take this method of explaining the reasons for deciding to market as much of our crop as possible early in the season.

The management of the Associated has been fully cognizant of the situation in all markets and have recognized the practical certainty of better prices in the late winter and spring. In deciding, however, on a policy of storage or immediate sale many things must be taken into consideration.

When the supply of fruit exceeds the demand, and a profitable market cannot be found for the entire crop during the fall and early winter, storage is a necessity.

When the demand is sufficient to take the entire supply at fair prices, storage becomes more or less a gamble.

Before deciding on a speculative policy one should consider carefully every factor working for or against a successful outcome. In approaching the question of storage there are several such factors to be considered.

1. The keeping quality of the fruit.
2. The cost of storage and probable increase in prices.
3. The reserve supply in existence and probable demand at high prices.

The first of these is all important. If there is any reasonable doubt of the fruit keeping without undue shrinkage, storage under any conditions would be folly, so long as it can be marketed for immediate consumption at reasonable prices. Unfortunately all fruits and almost all varieties of apples of the 1924 crop have shown decided indications of poor keeping quality. Probably due to the exceedingly dry season all varieties matured early, and ripened very rapidly after picking. This has extended even to such late varieties as Yellow Newtown and Delicious, while in the earlier varieties from Duchess to Jonathan frequent cases of early break-down, bitter pit and brown core were a warning against any unnecessary delay in getting them into consumption. We have no hesitation in saying that had market conditions obliged us to store any quantity of this season's crop the loss from shrinkage would have been abnormally large and had a disastrous effect on our pool prices, and that this opinion is shared by local managers was evidenced by the repeated urgent requests to move their fruit as quickly as possible.

Cost of Storage
Under most favorable conditions the increase in prices paid in the late season is very far from being a net gain to the grower. Storing apples has always proven an expensive proposition. This cost is made up of:

1. Storage charges.
2. Shrinkage.
3. Cost of repacking.
4. Increased overhead.

In marketing the 1923 crop the storage of a large quantity was made necessary by the large crop and the inability of the markets to absorb it in the early winter. For that season our cash outlay for storage charges was \$62,075.56; repacking cost \$12,253.52. The loss from shrinkage was 21,118 boxes which at average price prevailing this year would be a direct loss of approximately \$37,000; making a total bill of \$111,329.08. To this must be added the additional overhead involved by extending the selling, packing and accounting over a much longer period. A similar percentage of shrinkage this year would require an advance in average price of not less than 50 cents per box to pay expenses and a considerably greater advance to make the risk worth taking. With the evidence in hand that the keeping quality of the 1924 crop is below normal it would require the certainty of a very large advance to justify any speculation.

It must be borne in mind that when exceptionally high prices are quoted for any commodity it is invariably due to a supply far below demand. The class of consumer to whom price is of no consideration is exceedingly small. As prices advance demand automatically decreases and becomes restricted to smaller areas. This is particularly true of a commodity like fruit which is not a necessity to the average consumer. High prices also invariably bring out larger supplies than any one suspected were in existence, and a very small increase in the visible supply is sufficient to bring prices down to a point where a larger proportion of the public can buy.

In Canada the consuming class who are able and willing to pay fancy prices for fruit is exceedingly small, as witness the extreme difficulty we have found in distributing any quantity of extra fancy grade at present prices. There is a limit beyond which the Canadian consumer will not go and in this market a very moderate advance has the effect of immediately restricting purchase. In United States markets where there is a larger, wealthier class, we are handicapped by 20 cents duty and a discount of 25 to 50 cents per box in comparison with the varieties and known grade and pack of established Washington brands. It is well to recognize as a fact that to dispose of a large quantity of B.C. apples at excessively high prices is a practical impossibility.

If, therefore, with a storage of 100 cars, which is all we have of the safe keeping varieties, prices in the late winter should mount to unusual figures, before criticising Central for not taking the shrinkage risk on a much larger quantity, remember that double the storage would in all probability have materially reduced those prices and the net average returns might easily be less than those obtained from immediate sale.

Two sweethearts from Aberdeen were on a trip to the Scottish capital and as usual, Princes Street was the centre of attraction. After walking about, the young man noticed one of the picture houses, which displayed in bold letters, "The Woman Pays."

"Jean," he said, "I think we'll gang in here!"

It would take no fewer than thirteen hundred carths to equal the giant bulk of the planet Jupiter.

PEACHLAND NEWS

By Our Resident Correspondent

The extreme temperature has been causing considerable trouble and expense in many quarters of the town by freezing up water pipes and making it hard to keep the power house operating to supply light. Those in charge have been working hard to give the best service possible.

Owing to the severity of the weather last week end and the difficulty of keeping the school house comfortable the primary and public school rooms in the Central school held their closing exercises on Thursday afternoon instead of Friday as intended. The high school pupils under Miss Buck did not get their examinations finished till Friday when they closed for the Christmas holidays. Miss Buck left the same evening to spend her vacation at the Coast. The school concert which was to have been held on Friday the 19th was postponed on account of the weather and lack of lights till after school re-opens. Miss Elliott at the Trepanier school held her school closing on Friday afternoon. It was attended by the Trepanier citizens, some of the grown ups assisting with the program, after which all enjoyed refreshments together.

Christmas services were held in the three churches in town on Sunday last. In the Union church the Rev. T. A. Sadler delivered the sermon and was assisted by the choir with special music. At the Anglican church the Rev. H. A. Solly of Summerland conducted the service which was attended by the Peachland Masonic Lodge A.F. & A.M., who paraded to church. In the Baptist church Mr. Gilbert Thornber delivered the Christmas message.

Interest is beginning to warm up for the forthcoming municipal elections. It appears there is to be a contest for the reeve's chair and it is likely ward two will need another councillor to represent them for the coming term.

Mrs. John Vass and her sister Ivy Law returned from Kerebees on Saturday morning and will probably remain here for the rest of the winter.

Mr. J. Winger left on Saturday evening to join his family in Penticton and will probably remain with them till after the New Year.

Mr. and Mrs. Thornber returned from Summerland Tuesday morning after having spent the week end in Summerland.

Miss Lexie Keating recently returned to her home here after an absence of several months at the Coast.

Mr. W. T. Jago, provincial organizer for the Orange lodge spent Tuesday evening in Peachland with local members of the order. He was accompanied by Mr. Walker, secretary of the Kelowna lodge. They left in the northbound boat on Wednesday.

Wm. Kudelka returned on Thursday of last week following a short visit in Rumsey, Alberta, with his parents and other members of the family. He experienced some "snappy" weather, as low as fifty-six. He reports the family all well and says his father has made good progress getting his land in shape for next year's crop.

Mr. Earl Murdin and Miss Doris Crooks were visitors to Kelowna on Thursday.

The Telephone Company crew is still at work as these items go for publication, and are trying to get the work completed here before quitting for the holiday season.

Friends here of Mrs. Vivian will be pleased to learn that she is making improvement in health, although still in the hospital at Summerland.

Mr. and Mrs. Charlton and daughter Kitty, Mrs. Davidson and Mr. K. C. Tallyour of the Trepanier townsite, spent Friday in Kelowna.

Mr. Trimble left last week to join his wife in Idaho where she went hurriedly in answer to a telegram telling of her father's serious illness. Since she got there her mother has been taken ill as well.

Mr. Franklin Elliott, who has been teaching near Jura on the K.V.R. came home Saturday for the Christmas holiday season.

Mrs. Kirkby and daughter Annie Margaret came in from the Coast last week end to spend the Christmas season with Mrs. Kirkby's parents, Mr. and Mrs. John McLaughlan and other members of the family.

Shuttleworth After Man-Killing Cougar

(Continued from page 1.)

them into higher country several miles distant. Confidence is expressed that the hunters will overtake the animal in three days or less. On the failure of the boy to return in the evening, Mr. Nash went in search of him. Following a trail toward his original destination, they discovered his cap and gloves and blood about a mile from home. A few yards further they found the lad's pocket knife, evidence of an attempt to put up a struggle with his wild antagonist, and about 150 feet below, in a canyon, they found his remains in the brush.

Tracks left little doubt that the killing had been done by a cougar, though few have been known to lurk in such well settled territory and it is their habit to escape rather than attack a human being.

There were tracks to indicate that the boy had seen the cougar and commenced to run, being overtaken by the animal, which in its characteristic manner crushed the victim's skull and feasted on his vital parts.

Evidence that the cougar had returned to the scene of his slaying was discovered soon after the hunters took the trail. The dog circled the spot and then took up the mountain side. Along his trail the hunters picked up the lad's torn and blood soaked coat, which had been left at the spot where his body was found when the remains were moved the night before. Boyd Hilderbrand of Malott, an experienced predatory animal hunter, who knows practically every foot of the country being traversed, accompanied Shuttleworth and Haley.

Commenting editorially on the horrible incident the Independent says in part: "Cougar kills boy! Impossible, thought hunters and many familiar with the habits of such a beast. A dog won't bite unless you show fear, people say. But apparently, when 13-year-old James Fehlhaber, surprised by a brute that kills cattle with ease, obeyed the impulse to run, the cougar violated precedent and gave chase."

As a result a ghastly sight met those who sought the body—a body torn and disfigured, with bones snapped off like matches.

Gold coins, some of them of ancient vintage, and jewelled ornaments, the whole worth probably \$2,000, were unearthed from a cache on the banks of the Red river by boys playing on the river bank near Winnipeg. Their ownership is unknown.

Do You Know?

THAT if you neglect the minor signs of stomach distress such as gas pains, sour burning, stomach bloating, belching and after-eating misery, you are condemning your body to years of chronic stomach trouble. J. P. sold by druggists everywhere will quickly relieve all stomach misery.

Christmas Tree Events Are Greatly Enjoyed By Sunday School Pupils

Children In Local Sunday Schools Gather For Big Annual Event

YOUNG TALENT ON THE PROGRAMS

Santa Claus Visits Each Assembly To Delight Of Little Ones

Children of the Lakeside Methodist Sunday school held their annual concert and Christmas tree on Tuesday evening of last week when a splendid children's program was enjoyed. Recitations by the little tots, choruses and several dialogues made up an interesting entertainment, which was well carried out. The final item, the arrival of Santa Claus, caused much excitement among the children, to each of whom he gave bags of candies and nuts. In the absence of the superintendent, Mr. Mellor, who was unable to attend, S. F. Sharp acted as chairman, Mrs. T. G. Beavis was pianist for the choruses.

On Monday evening the Baptist Sunday School held the annual Christmas concert in the church. Mr. J. C. Wilson, superintendent, acted as chairman and opened the program with the singing of a hymn followed by prayer by Mr. G. Thornber.

Each class in the school had been made responsible for their item on the program and a splendid entertainment resulted, harmonizing well and showing throughout the spirit of Christmas.

A goodly number of songs and recitations by the younger ones, with choruses and action songs were enjoyed. A piano duet by Misses Stella Wilson and Muriel Steeves and a pianoforte solo by Edith Monroe pleased the audience. A reading by Frank Simpson, exercises by the C. G. I. T. group and a solo by Mr. J. O. Steeves were also well received. During the evening an address was given by Mr. G. Thornber, telling the Christmas story.

One of the last items on the program was exceptionally well done, being a pantomime by the girls of Mrs. Ritchie's class, dressed in white. To the words of a solo, Rock of Ages, beautifully sung by Miss Carol Graham, actions were carried out by the class and were very effective.

At the close of the program, candy was distributed among those present by Santa Claus, who greatly delighted the children.

Members of the St. Stephen's Sunday school held their annual Christmas tree and entertainment on Tuesday afternoon, about fifty children gathering at the Parish Hall. Quite a number of parents also attended. During the early part of the afternoon, the young folk enjoyed games and contests, and after refreshments had been served, the children gave an interesting concert, which they had arranged themselves.

Certificates were awarded to a number of the children for good attendance throughout the year, with (Continued on back page)

GETS CHEQUE FROM VICTORIA

Municipality Receives Over Three Thousand Dollars From Province

Municipal treasurer, F. J. Nixon received on Tuesday a remittance from the province totalling \$3,386.51, being the allotment made to the municipality from the provincial liquor profits and the government tax on race track betting. One thousand, nine hundred and sixty-two dollars eight-four cents came from the former and one thousand, four hundred and twenty-three dollars sixty-seven cents from the latter.

MANY BABY FISHES IN LOCAL HATCHERY

Thirty Thousand Little Kokanees Soon Ready For Larger World

Thirty thousand Kokanees just beginning to swim in the fish hatchery in the old power house opposite Hotel Summerland, will soon be ready for releasing in the lake. The eggs were put in by G. N. Gartrell, fisheries inspector, on the 24th of September and began to hatch two or three weeks ago. In another two weeks most of them will be put in the lake, but Mr. Gartrell proposes holding a few of them in order to study their development.

COUN. JOHNSTON OUT FOR REEVE

Few Candidates Yet Named For Honors In Civic Elections

Though the date fixed for nomination of candidates for civic honors is less than two weeks away, there is yet but little apparent interest being shown. Coun. R. Johnston has been strongly urged by a number of friends to accept nomination for the reeveship and has given his consent. As far as can be learned all the members of the council will be in the field for re-election.

Trout Creek may bring out a candidate for councillor and rumors of one or two other possible candidates are heard.

The chairman of the school board, W. Ritchie and Mrs. Solly, one of the members of the board, will have completed their two year term but are probable candidates for re-election. Monday, January 12th, is the date fixed by statute for nominations.

H. SCHWARTZ HAS QUIT TAILORING

Leaves Here With Intention of Engaging In Retail Business

H. Schwartz, who, during the four years of his residence here has enjoyed quite a patronage as tailor, has closed his shop here with the intention of abandoning his trade. He left here on Wednesday for Kelowna intending to spend New Year's Day with friends there and to leave the next day for Vancouver.

For a number of years Mr. Schwartz carried on tailoring in a large way in New York city, employing as many as sixty hands. Later he came to Canada and conducted a tailor shop in Winnipeg, where he spent fifteen years. There, too, he had quite a payroll and left many staunch friends.

He has absolutely nothing against Summerland, he says, and if his present plans miscarry, he may return. He feels that the work is too trying for a man of his years and contemplates going into the ready-made clothing business in a retail way, possibly in Vancouver.

He may visit some of his children in the States before re-engaging in business.

An insecticide said to be a substitute for nicotine, has been developed from the tub root. This was one of the source of poison used by the "wild men of Borneo" for coating their spear heads. It is hoped by expert chemists to procure enough of this poison to relieve the general shortage in bug-destroying drugs.

NO RURAL MAIL NEW YEAR'S DAY

There will be no delivery of mail on the rural route on New Year's Day. This is the one day of the year on which rural route couriers through-out Canada are given a holiday.

CANNERIES EXEMPT FROM REGULATIONS

Canners of Fruits and Vegetables Will Not Come Under Eight-Hour Law

Canners of fruits and vegetables will not come under the Eight-hour Day Act which goes into force on the first of January. Such is the decision of the adjustment board appointed by the government to deal with this matter.

In the opinion of the board, fruit and vegetable canners, dehydrating plants and all plants for the preserving of fresh fruits and vegetables, are branches of the agricultural and horticultural industry and are therefore exempt from the operations of the Eight-hour Act.

All branches of the agricultural industry are unaffected by the act. Persons engaged in the fishing industry and its attendant branches are also exempt.

JAPANESE UNITE IN SEASON'S FESTIVITIES

Christmas Celebrated In Recently Constructed Hall—Had Big Tree

Local Japanese citizens, to the number of about forty, celebrated Christmas Day by a social gathering in the new clubroom in Victoria Gardens, recently completed by the local Japanese association. A big Christmas tree was a feature of the afternoon's entertainment, while ping-pong contests were also enjoyed. It is planned to celebrate the New Year by a similar gathering on Sunday.

It is the intention of the association members to make further improvements to their Associations headquarters next spring, when the grounds will be beautified and tennis courts laid out.

CIVIC MEETING JANUARY TENTH

Council Holds Last Regular Meeting of Year—Water Extension Approved

At a recent meeting of the municipal council, accounts for December totalling \$9,091.05, were examined and passed for payment. This sum was made up chiefly by debenture interest, school board requisitions and municipal wages.

The interest payments totalled \$4,602.75 the school accounts \$2,472.67 and wages \$871.93. The council also gave approval to an extension of the domestic water system to serve the C. F. Killick property near C. A. Mitchell's.

The council decided to hold the customary annual meeting of the ratepayers, Saturday, January 10th being the date fixed for that purpose. Upon the suggestion of the Summerland Telephone Company, central will be furnished with a list of names of men in the different sections who should first be notified in case of fire.

MANY APPLES EXPORTED BY THE ASSOCIATED

Associated Growers of B.C., Ltd., have exported 503 cars of apples this season. Of this number 267 went to the United Kingdom, 20 to New Zealand, 27 to Scandinavian countries, 44 to Germany, 20 to South Africa and 3 to China.

SALMON PACK WAS HEAVIEST ON RECORD

British Columbia has had a record pack of cannol salmon this year, practically all of which has been disposed of. The total pack amounts to 1,650,000 cases, forty-eight pounds to the case, of the aggregate value of approximately \$10,000,000. The previous highest pack on record was in 1918, when the total was 1,610,157 cases.

FLOCK OF WILD SWANS WINTERING ON LAKE

For about three weeks a flock of beautiful wild swans to the number of fifteen or more have been staying near the west shore of the lake at a point between here and Penticton, not far from the bridge which crosses the Okanagan River.

COQUAHALLA AGAIN OPEN

K. V. Railway Trains Running Through Short Cut Since Tuesday

K. V. R. westbound train leaving here Tuesday noon went through the Coquahalla Pass, the first passenger train through the pass for several weeks. The train from Vancouver arriving here Wednesday morning was the first eastbound express to come through the pass since the heavy rains on the Coast side of the mountain brought down great mud slides on to the road bed in the pass, which and the flowing water, were frozen by the later cold spell.

A great amount of labor and expense was necessary to clear the track, even some of the tunnels being flooded with water which was frozen. At one point a trestle had to be built where the floods had washed the roadbed from beneath the track.

CHRISTMAS IN OUR CHURCHES

Special Music and Timely Addresses Feature Christmas Services

The spirit of Christmas has been recognized in all local churches during the past week, special Christmas music and suitable addresses being features of the services.

In St. Stephen's church special services were held on Christmas Day, Holy communion being observed at 8 a.m. and mating and holy communion at 10:30. On Sunday also Rev. H. A. Solly gave a special talk to the children at the morning service, when Christmas carols and seasonal hymns formed part of the program.

Christmas services at the Lakeside Methodist Church were held on the Sunday previous, with Christmas addresses at morning and evening services, which were well attended. Here, too, the morning service was planned especially for the young folk. Last Sunday a thought for the New Year was given in the sermons delivered by the pastor, Rev. H. J. Armitage and again appropriate music was rendered.

At St. Andrew's church the Christmas story was the subject of the address in the morning by the Rev. W. A. Alexander, and Christmas anthems were rendered by the choir. At the evening service the theme was The First Christmas as related by Lew Wallace in Ben Hur. Anthems by the choir, including the Hallelujah Chorus, and a solo beautifully sung by Ben Newton formed the musical part of the evening's service.

At the Baptist church, the regular morning service was combined with the Sunday school for the Christmas program, Rev. G. J. Coulter, White acting as leader. In the evening Mr. Gilbert Thornber had charge of the service, his subject being "Hitherto-Henceforth." Special music was enjoyed at both these services.

HEAVY LOSSES IN VERNON FIRE

Neil, Cryderman & Kennedy Building Destroyed in Early Morning Conflagration

By a disastrous outbreak of fire at 2:30 on the morning of December 21st, the large building of Neil, Cryderman & Kennedy, in Vernon, was completely destroyed with heavy loss to several occupying firms. Of frame construction, the flames had obtained such a hold on the building before the outbreak was discovered that nothing could be done to save it, in spite of the heroic efforts of the Vernon Fire Brigade, who managed, however, to save adjoining premises which were threatened by showers of blazing shingles. Fortunately, there was practically no wind, otherwise the business quarter of the town would have been seriously endangered. As it was, the Methodist Church across the street from the blazing block, was badly scorched and its

WAR VETERANS GIVE CHRISTMAS TREAT

Children of Ex-Service Men Entertained in G. W. V. A. Hall

Children of Summerland veterans of the great War were royally entertained by members of the local G. W. V. A. on Saturday afternoon in the veterans' hall. Notwithstanding the heavy snowfall about seventy children sat down to a heavily laden table. After a merry time with games the children had a visit from Santa, who, much to their delight distributed gifts from the gigantic Christmas tree, bringing a happy afternoon to a close.

The veterans are to be congratulated on their very successful party, which, as well as providing a happy thought for the children, afforded a much appreciated opportunity for the parents to meet. Many have expressed the hope that it may become an annual event.

CHRISTMAS MAIL UNUSUALLY HEAVY

Volume of Matter Handled, Both Inward and Outward, Was Large

Summerland people were well remembered by outside friends judging from the volume of Christmas mail handled by the local post offices. Postmaster Hayes reports a particularly heavy business, both inward and outward and Postmaster Bowring tells the same story of a considerable increase over last year's business. Outgoing mail was heavy at both offices, indicating an improved condition over that of a year ago.

A section of the road west of Empire Hall has been rendered dangerous by ice and the road has been temporarily closed.

MAY HEAR SON THROUGH RADIO

Local Parents Now Enabled To Enjoy His Talent In Own Home

Radio sets as Christmas gifts no doubt found their way into many homes this Christmas season and will be highly prized by their owners, but it is doubtful if there are any to whom such a gift brought greater pleasure than that experienced by Mr. and Mrs. J. O. Smith. Their son, W. Smith, a recent visitor here from Jasper Park to spend Christmas at home, was the donor of a handsome radio receiving set to his parents, who are now enabled to sit in their own home and listen to music played by another son, living in San Francisco, and whose clever pianoforte concerts have frequently been heard by Summerland friends over the radio.

This son, John Chandler, was a visitor to Summerland about a year ago, when many had the privilege of hearing him at a recital given in St. Andrew's church. Mr. Smith is a talented pianist and has been for some years a teacher as well as student of music in San Francisco.

A popular science paragraph reminds us that the round the world fliers found Iceland mostly green, and Greenland mostly ice.

windows broken.

Neil, Cryderman & Kennedy occupied part of the building themselves as a flour and feed store and show room for automobiles and accessories. The remainder was tenanted by the Harris Candy Works, E. O. Skinner & Co., fruit shippers, and Shillam's Garage, which contained a complete workshop equipment and a number of cars. All the firms lost heavily, the total being estimated at somewhere about \$100,000 with very little insurance. About eighteen cars, trucks and tractors were destroyed, together with a carload of agricultural implements and a large quantity of grain and hay. The stable of Neil, Cryderman & Kennedy was also destroyed, the horses being saved with great difficulty. Fortunately, no one was hurt.

The cause of the conflagration has not been definitely ascertained, but it is reported that the outbreak seemed to have started in the premises occupied by the Candy Kitchen, which held a large stock of confectionery, estimated at a value of \$2,000, prepared for the Christmas trade.

Heads of Associated Must Decide Promptly On Questions of Policy

MONEY BY-LAW NOW READY FOR ELECTORS

Measures for Improvement To Irrigation System Passed by Council

The municipal council at a special meeting on Tuesday of this week, gave final approval to by-laws No. 204 and 205.

The first by-law is to authorize some material improvements in the Garnett Valley irrigation system and the second by-law is for the purpose of providing the necessary money. Both these by-laws, which are published in this issue of The Review, will be submitted to the ratepayers for approval.

VOTING HOURS LENGTHENED

Municipal Polls Will Be Open From 8 a.m. to 8 p.m.

From eight o'clock in the morning until eight o'clock in the evening seems an unnecessarily long period to keep open the balloting booth on the date of the annual elections. This change in the hours was made at the last meeting of the legislature. Up to the present the hours have been from 9 a.m. to 7 p.m., quite long enough for municipalities such as ours. The change was made to accommodate men who could not get away from their work during the usual hours of employment, but some of our local authorities are of the opinion that the change need not have been made applicable to every municipality.

And think of the suspense for the candidate and his active supporters. An unnecessary delay of an hour before they will know the state.

BRODDY PROMOTED TO VICTORIA OFFICE

F. M. Broddy, manager of the Dominion Bank branch here, has been promoted to the position of manager of the Victoria branch. Mr. Broddy left here the day after Christmas for the capital city. His successor is A. E. Morgan, of Vancouver, who arrived here from the Coast city on the 19th.

POST OFFICE TAKING WEEKLY HALF HOLIDAY

West Summerland post office will be closed on Thursday afternoon of next week and every week thereafter until further notice. The office will be kept open until 12:30 and opened again at five. The civic half-holiday will thus be observed for the first time by Postmaster Bowring who is acting under instructions from the inspector.

OKANAGAN GIRL WAS BEST ESSAYIST

Miss Mary Watts, daughter of E. D. Watts, Vernon, was the winner of a fifty dollar cash prize, the first prize offered pupils fourteen years of age or over for the best essay on the subject "The Value of Buying British Columbia Products." The prizes were offered by the manager of the Buy B.C. Products campaign, there being two groups of prizes, one for older children and one for the younger, open to school children throughout the province. There were five prizes in each group, ten in all. The others all went to Coast pupils.

NEW YEAR'S DAY PHONE SERVICE

9 to 11 and 3 to 5 only

The emergency service on New Year's day, will be for the Doctor only. No other calls will be put through.

Meeting of Directors of Locals Called For Early Date At Kelowna

PROPOSES MACKEN MAKE SURVEY

Will Consider Plans For More Centralized Control

Directors of the various Locals affiliated with the Associated Growers will meet at Kelowna immediately following the Convention of the B.C. F. G. A. at Penticton, which ends on Jan. 23, for the purpose of discussing several questions of organization for the coming year and getting the views of the Locals before taking action, according to an official statement from the Associated.

Experience of the past two seasons has shown the advisability of changes in system and methods and it had been suggested to the Board of Directors that the services of Mr. W. Macken be obtained to make a general survey of the whole organization and recommend such changes as in his judgment would lead to greater efficiency, but Mr. Macken's engagements will not permit him to undertake this work before February at the earliest and many questions of policy must be decided before that time.

With reference to the proposed engagement of Mr. Macken, it is unfortunate that an unauthorized item has appeared in some newspapers giving the impression that he was being considered for the position of General Manager of the Associated, thereby placing him in a false position. Mr. Macken has never considered occupying that position, and in fact stated very definitely that he could not accept any permanent engagement by the Associated. He has kindly consented to give such assistance as his business engagements would permit, provided endorsement of all Locals of the proposed work should first be secured.

One of the most important questions to come before the meeting of Local Directors is that of some more centralized form of control of packing operations with a view to securing greater economy, by eliminating duplication of work, more efficiency in operating, and uniformity of product.

THANK YOU

"I do not think we should let the outsiders do all the boosting to our paper." Thus writes a kindly subscriber in sending in renewal subscription. "I can say we as a family are quite proud of our local paper and think it is improving all the time." Such words of encouragement are appreciated.—Editor.

Steps are being taken to establish the largest sheep farm in the Dominion in the Pemberton range, near Kamloops.

PACK APPLES FOR SHIPMENT

Co-op Getting Ready Five Carloads—Have About Twenty Five More

Summerland Co-operative started work on Monday morning on grading and packing five carloads of apples, orders for which have been booked. These apples will be shipped as soon as the railway company lifts the embargo placed on fruit when the last cold weather started. Two grading machines are being used and it will not be long before the apples are ready for shipment.

When these five cars move out there will be about twenty-five carloads left. The apples in the big storage building are reported to be keeping well and entirely escaped the recent severe frost.

The Summerland Review

Established August, 1908.
Published at Summerland, B.C., every Thursday by
THE REVIEW PUBLISHING COMPANY, LIMITED
Ralph E. White, Editor and Manager
An independent family newspaper covering Peachland, Summerland and
Naramata and adjacent districts.

Member of Canadian Weekly Newspapers Association.
Member of British Columbia Selected Weeklies.

Subscription Rates—In British Empire, in advance, \$2.50 per year; six months, \$1.40. To U.S.A. and other countries, \$3.00 per year.
Advertising Rate Cards and information respecting territory and samples of paper mailed upon request, or may be seen at the office of any advertising agency recognized by the Canadian Press Association.
Advertisers must have copy in by Tuesday noon in order to insure changes for standing advertisements. New display advertising copy can be accepted one day later.
Correspondence—Letters addressed to the Editor and intended for publication must be short and legibly written on one side of the paper only. The longer an article, the shorter its chance of insertion. All communications must bear the name of the writer, not necessarily for publication. The publication or rejection of articles is a matter entirely in the discretion of the Editor. No responsibility is assumed by the paper for the opinions expressed by correspondents.
Typographical Errors—In the event of a typographical error, advertising goods at less than the proper price, the newspaper will furnish letters to be posted in the store stating the correct price, but goods may not be sold at a price printed and the difference charged to the newspaper.

Wednesday, December 31, 1924

BRITISH MARKETS FOR B.C. APPLES.

It is doubtful if British Columbia apple growers will benefit any by the proposed grant to assist Canadian exporters in packing apples in a more attractive manner. Judging from reports that have reached this country from England on the subject of the further development of inter-Empire trade, this grant is likely to benefit Nova Scotia and Ontario growers and to some extent at least might possibly adversely affect the British market for British Columbia apples.

To assure that the first supplies to the British market for meats comes from within the Empire, a system of licensing imports is proposed. This could be equally applicable to imports of apples and other fruits and we may reasonably expect that a plan of that kind will be adopted for apples as well. Under such a scheme the Old Country would draw on Canada and other nations within the Empire for its supply of apples, going elsewhere only after this supply was exhausted.

NEWSPAPER STRENUOUSNESS.

An editor of a contemporary published the following editorial to his readers in a recent number of his newspaper:
As a rule the newspaper man doesn't want any one to write a brief for him or seek to enlighten the public on the character of his work. He is generally satisfied to pursue his vocation, happy because he is busy and of service in this busy world.

But, the other day at a meeting of newspaper publishers those present began talking of a young man in his early thirties who had broken down from an acute attack of illness and was compelled to take a long rest. He was present at this gathering and stated he was recovering nicely, but had learned his lesson.

Our friend, before leaving to recuperate, saw several merchants and other citizens. They expressed some surprise at hearing his condition was due to overwork and this opinion seemed to arouse him to say what he had felt for several years. He declared that he had labored so hard in trying to keep up his business, educate the merchants into the value of advertising and had taken part in so many civic activities, that his health gave way.

At this same meeting an elderly editor told of just coming back from a long trip occasioned by overwork, and at his side was a man in the early fifties who has been a semi invalid for a long time. This publisher also had given his best efforts in building up a fine paper and boosting his city by personal efforts.

The publisher in the small town of 10,000 people is always the worst off. Everybody knows him. All the kicks seem to be leveled at his head whether of circulation, advertising, or what not. He has to do a hundred different things because he can't afford to have men for separate branches of the business, and works far more than his fellow publisher in the larger places.

It's a pretty safe bet to make that the average publisher works more hours and dies with a far less estate than his fellow townsmen who have no more ability?

There is no particular moral to this editorial except possibly that after all the newspaper man — no matter what capacity he works in—would do differently if given the chance to live his life over. He knows that in point of public good he is the greatest factor in the community — he gets more kicks than he deserves, but learns to take them philosophically; he knows he's not perfect and welcomes constructive criticism—he loves his work and appreciates like all human beings a modicum of appreciation—he learns human nature like the minister or judge and probably is just a little bit more tolerant of human frailty than the average.

Yes, he may seek a rest cure for a while, coming back with the knowledge that he must ease up on the overtasked machine, but he is not soured nor discouraged; he has learned a lesson—that he can go just so far in rendering service, and after that he owes the greatest debt to his own physical and mental welfare.

STATIC TURNED TO USE.

It seem that almost everything has its uses. Static, that burglar of all radio fans, has now been put to work, and is proving of real value to naval aviators, who are using it in the warmer climates to detect browsing thunder-storms, and follow their movements. They tune in on the static to its maximum intensity and by changing their loop secure the direction it is going, together with its speed. Not only for aviators but for seafarers is this use of static and the radio of exceptional value.

From Our Exchanges

THAT LITTLE WORD "OBEY."

Vancouver Sun: English women, according to a cable despatch, are waging a determined battle to have the word "obey" taken out of the marriage ceremony.

They say that wives no longer are required, in practice, to obey their husbands.

If the ladies really desire to bring the marriage service into strict conformity with marriage practice, the word "obey" should be deleted from the pledge taken by the wife and inserted in the pledge taken by the husband.

For what honest man will deny that no matter how many vows of obedience are taken by the wife, it is the husband who has been doing the obeying ever since Eve made Adam eat the fateful apple, core and all, some 6000 years ago.

NEWS SUPPRESSION.

Commenting on the peculiar embarrassment a newspaper feels when suppression of news is asked by personal friends, the editor of the Ottawa Journal tells his readers that news is a commodity and that it is as absurd to ask an editor not to print an item as it is to ask a butcher not to dispose of certain beefsteaks to customers, or importuning a music store proprietor not to handle certain songs.

News suppression is usually futile, benefiting no one and doing positive harm in many instances. In Ottawa it has been discovered, for instance, that when the local newspapers yield to the pleas of personal friends to "keep it out, like a good fellow," the special correspondents of out-of-town papers usually get the news and it gradually floats back by word of mouth and the Ottawa newspapers are suspected of being either incompetent or cowardly.

Suppression of many news items also reacts against those who have sought it as a means of escaping supposed disgrace or humiliation. It only piles up their troubles.

This angle always reminds us of the Boston merchant who told an editor that he would withdraw all advertising if news of his daughter's elopement was published.

The editor replied: "You can't scare me into doing an injustice to your daughter and her husband. I shall not be party to a family conspiracy which proposes to make the happy and impulsive marriage day of a boy and girl something abnormal and mysterious, and, therefore, a topic for back stairs gossip and indecency. Your daughter has a right to be known as a bride; her husband has a right to his social status as her husband. If you had sense, instead of stupid and half-baked pride in the shallow conventions of life, you would be here asking us to tell the whole town the glad tidings that your daughter had chosen her life partner, and was sufficiently independent and characterful to take him whether you and wife approved or not."

Poor old daddy weakened, and before the interview ended he not only gave permission to run a first page story but corrected the proof, and asked for additional galley proofs to "send to the other papers." He did not "pull" his advertising, but increased it and for years was that editor's personal friend.

The best way to avoid embarrassment when the "good fellows" come around to suppress legitimate news is to tell them exactly what the logical consequences are, to them, and to your newspaper.

KNOWLEDGE AND HEALTH.

Dr. Serge Veronoff claims that gland transplantation will cure hardening of the arteries. If this be true, it is another feather in the cap of medical science.

Greater triumphs are in store for medical science when it will teach men that arterial hyper-tension and other afflictions may be prevented by obeying the laws of health which nature has decreed.

Man's ignorance of these laws is the cause of most of his physical ailments. Practical knowledge of the laws of cause and effect relating to the human body would render gland experiments unnecessary.—Vancouver Sun.

NOVEL PUNISHMENT.

A youth arrested for throwing stones was sentenced by an American judge some time ago to throw so many tons of stones, while a policeman looked on. We forget the exact number of tons; but it was a goodly number.

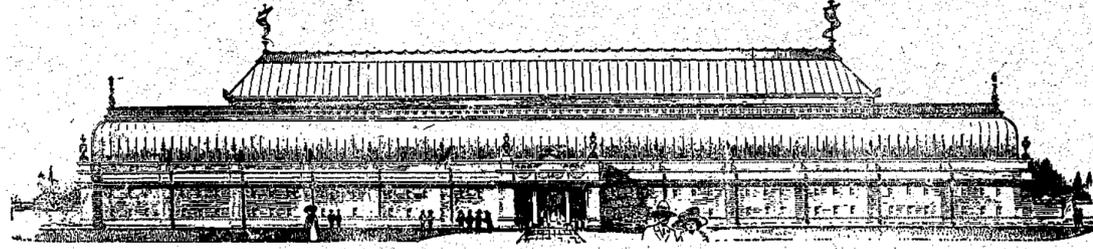

A judge in Los Angeles goes this sentence one better. A motorist brought before him for speeding was convicted and sentenced to copy out the traffic accident stories in every newspaper in the city for six months. They have several papers in Los Angeles and a high traffic accident rate. When this speed fiend has completed his sentence he will probably be able to keep his foot off the gas.—Regina Leader.

MOVIE BORES.

When I go to the movies, says Papyrus in The Revelstoke Review, I want to be amused and to forget my troubles in a mild excitement over the love affairs of beautiful blondes and American heroes. The thrilling melodrama fails to excite me, but I enjoy even the thriller because of its artificial crises and obvious theatrical effects which are so amusingly ingenious. In fact, I am an easily satisfied patron of the "silent drama"—when it is silent. There are, however, a class of movie fans who spoil nearly every show I go to, till I find that a movie show does not soothe me but leaves me witless with suppressed indignation. I refer to the simple souls who read aloud every sub-title as it appears on the screen.

Some of these people are to be pitied because they can only understand the screen's message through their ears. They are audiles who translate the written words into sounds, instead of recognizing the words from their symbols, as is done by the ordinary visual reader. There are those who deserve less sympathy who seek to add to the enjoyment of their eyes the added titillation of sound, so that their eyes and ears drink in the last drop of humor from the screened message. These are a greedy tribe who want full value for their money at no matter what inconvenience to others. There is a third class whom we would like to wither with a frozen glare from our steely eyes. This last type read the titles aloud with an air of informing those around them that they have a strongly developed

Crystal Garden For Pacific Coast Playground

This drawing of the exterior of the new Crystal Garden, Victoria, B.C., gives a good idea as to the part plans will play in its construction. In design it is not unlike the Crystal Gardens with which Londoners are familiar.

British Columbians are almost abnormally proud of their capital city—Victoria. They will admit that its streets are not blocked with traffic, and that its shops are perhaps not of the most modern type, but give them an opportunity to talk of Parliament House Buildings, the Provincial Museum, the Library, the Saanich Mountain Observatory, the Empress Hotel, Stadcona Park, the golf links, the motor roads, the private houses, the wonderful gardens, and above all, Beacon Hill Park, and they will not let it go by.

And they are justifiably proud of their city. It is indeed beautiful, and in a beautiful setting. Rudyard Kipling once wrote of it "To realize Victoria you must take all that the eye admires most in Bournemouth, Torquay and the Isle of Wight, the Happy Valley at Hong Kong, the Doon at Sorrento and Camps Bay; add reminiscences of the Thousand Isles, and arrange the whole around the Bay of Naples with some Himalayas in the background."

"Follow the sunshine to Victoria," might be a fitting slogan to use in attracting visitors to the capital city of British Columbia. Year by year it is becoming more popular as a winter resort, particularly among people from the Prairie Provinces who find in it an escape from the cold and snow of the winter at home. The average annual rainfall only approximates twenty-seven inches, while the temperature during the winter months allows for open air sports, drives and all that goes with outdoor life, and permits the seasonal flowers to bloom in wild profusion.

Five or six golf courses, open in year round, are features of the tourist attractions of Victoria and when one comes to this city overlooking the Straits of Juan de Fuca, he finds that like the bag of Santa Claus, it holds something for everyone.

One could not write of Victoria without writing about its parks and gardens, public and private. Nowhere in the world are they scattered in such profusion or do they strike such a gorgeous, yet harmonious note as they do in this city. Perhaps the most popular of the public parks is Beacon Hill Park, which contains 300 acres laid out as recreation grounds and pleasure gardens, within 15 minutes walk of the Empress Hotel.

The Butchart-Saunders Gardens, a veritable fairy land of flowers, shrubs, lawns, lake and waterfall, artificially constructed in an old quarry, are a never failing source of delight, and he who is possessed of a scientific mind, or is merely just interested will find much to admire from the astronomical observatory on Saanich Mountain. Here he will find the second largest telescope in the world.

For the motorist, more than a thousand miles of splendid highway are open, and these he can enjoy for days at a time, making short trips from Victoria to neighboring bays, towns and villages, or tours which may be extended to a week or more. Good fishing is available off

On the Oak Bay Golf Course with the ocean for a background.

shore, or in the numerous lakes and streams. There is no doubt that Victoria is the playground of Western Canada, and Vancouver Island is preferred by many to California, because, unlike those of the latter country, its beauties and attractions have not been artificially produced by irrigation.

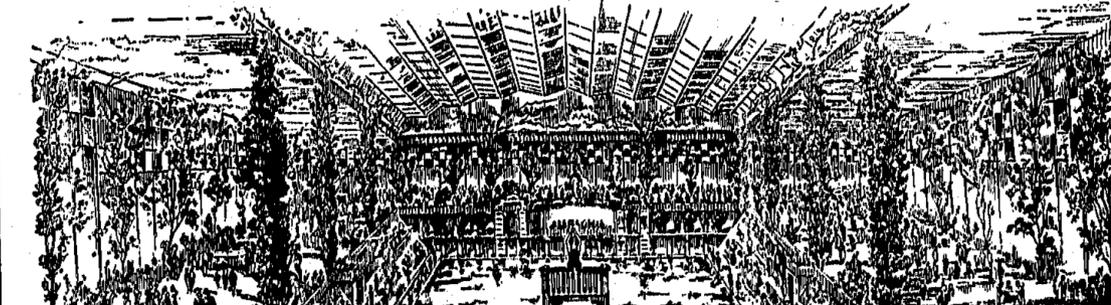

Vancouver Island's heritage of natural scenic beauty, climate and attractions to the sportsman are inestimable, but, as if these did not suffice, in order that residents and visitors to Victoria should fully and pleasantly occupy their time for recreation, a huge Crystal Garden, designed by Messrs. Rattenburg and James is now being built by the Canadian Pacific Railway Company. A winter garden sunlit by day and glittering by night, with music and an atmosphere, it is planned, which will not be easily forgotten.

Built on a two-acre property facing the Empress Gardens, the Crystal Garden will be of generous proportions, with lower portion in brick and concrete and superstructure of steel and specially designed glass. The interior will eventually be a huge conservatory, provision having been made throughout for growing vines, palms and plants, and in the centre will feature the largest salt water swimming pool on the continent.

To give a Roman Bath effect, from the peacock alley promenade and dancing floor above, there will be concrete steps down to the landing of the pool which will be 150 feet long, 40 feet wide and 8 feet deep at the diving end. Salt water will be pumped from Beacon Hill Beach, a distance of nearly a mile, maintained at a temperature of 70 degrees and kept in constant circulation. It will, of course, be sterilized, and bathers, before entering the pool will pass under showers of varying temperatures. Among other attractions planned are a gymnasium and hot salt water baths.

All efforts are now being concentrated on the work of construction of the Crystal Garden to the end that it will be completed by May 24th next, in time for a gala week which is being arranged by Victoria citizens, and in connection with which a pageant is being planned. A forty piece orchestra has already been engaged to play in the Garden during "Victoria Week."

Anticipating that this season will see the beginning of a large tourist movement toward Vancouver Island, the Canadian Pacific is planning to considerably augment its service between Vancouver, Victoria and Seattle, and for this run two new steamships, the largest ever to be placed in service on the Pacific Coast, are now being completed. The first, the "Princess Kathleen," will make her initial run early in the new year when she will considerably facilitate the movement of that large number of vacationists and tourists who choose to visit British Columbia, and particularly Vancouver Island at that time. The "Princess Marguerite" will go into regular service two months later.

An artist's impression of what the interior will be like. As will be seen, the swimming pool has double glass frontiers and is so designed that although taking up a large portion of the centre space it does not crowd the other quarters.

New Year's Day

What are you really celebrating when you keep New Year's Day a holiday? The custom dates back to the very dawn of civilization, for nearly all peoples of the earth have celebrated the coming of the new year. The time, however, has varied widely, sometimes being at the autumn equinox, about September 21, and sometimes as late as Midsummer's Day, June 22.

A trip around the world, if we could arrive in each country on New Year's Day, would reveal an astonishing difference in customs. In China you would think all the national holidays were rolled into one, for the shops are closed for several days, and there are merry feasts, much fireworks, and a general exchange of gifts and good wishes. A practice that might well be transplanted from China is the custom of paying every debt before the old year closes, every house must be swept, cleaned and decorated, and every person be furnished with holiday clothes and a supply of preserved fruits, candies, and ornamental packages of tea to give his acquaintances.

In Japan the New Year festival is even gayer. No matter how poor one is, shining new clothes must be provided, and three days are taken off from work to visit friends or entertain them at his home. Every gatepost is adorned with dark green pines and feathery light green bamboos, while over the doors hang bright red lobsters and crabs, and scarlet fruits something like our tangerines, which symbolize long life and happiness.

Elsewhere in the Orient, too, the New Year's coming is celebrated with festivals much like our Christmas. In some parts of Europe, especially in France and Scotland, the New Year is more important a holiday than Christmas. A French peasant child puts its sabot (wooden shoe) on the hearth for a gift at Christmas, but the grown folk exchange their gifts at New Year's, when there are family parties with much merry-making and general exchange of visits.

Nowhere else is the Scotch heartiness of celebration of New Year's surpassed. There is an old tradition that, if one is "first foot" in a house after the new year comes in, one will be lucky the whole year through. This brings throngs of revelers out into the streets at midnight, all looking for a chance to put foot over somebody's door sill after the clock strikes twelve before anyone else has done so. Each has his box of cakes and his spiced ale, for to ensure his host a bounteous year he must not enter empty handed.

There are special local customs in some cities. Petrograd, Russia, used to usher in the year with a cannonade of a hundred shots at midnight. Some of the Scandinavian cities also welcome New Year's Day with firearms, while the Yuletide celebration continues for twelve days after Christmas (Twelfth Night), as in Italy.

In America observances are varied because of the great variety of peoples making up the new world, all bringing over some of their old home ways. Each city and rural district has its "watch-night" services in the churches, its dancing and theatre parties, often its gay street revellers. New Year's Day is a time for general entertaining and visiting. But the good old custom of keeping open house on that day has practically disappeared, and few keep up the New Year's calls from house to house. A revival of the spiced punch bowl and attendant cakes might bring them back.

In the middle ages March 25 was the usual date for the beginning of the new year in Christian countries, and it was kept in England till 1751. In countries which still use the Julian calendar the New Year's Day comes on Jan. 13 of our Gregorian calendar. The Jewish New Year, which opens with Tishri (our September) is called "the feast of the trumpets", and lasts 48 hours.

BABY'S PILLOW

The baby's pillow should be filled with hair, never with feathers or down because they are heating. It should never be more than an inch thick. (Older people are often prone to use too thick pillows, too.)

sense of humor, when they are really advertising the fact that they have a very poor sense of decorum.

Papyrus generally looks on the follies of his neighbors with a charitable eye and laughs afterwards at the petty exasperations of life, but there are some things which have no funny side and are sheer vexation of spirit. In this class of irritants can surely be placed the reading aloud of sub-titles at the movies. Papyrus hopes that this article may reach the eyes of some offenders at our local theatre and that they will cease from troubling and rest in peace.

SYNOPSIS OF LAND
ACT AMENDMENTS

PRE-EMPTIONS
Vacant, unreserved, surveyed,
Crown lands may be pre-empted by
British subjects over 18 years of age,

Full information concerning regula-
tions regarding pre-emptions is
given in Bulletin No. 11, Land Series,
"How to Pre-empt Land," copies of
which can be obtained free of charge
by addressing the Department of
Lands, Victoria, B.C., or to any Govern-
ment Agent.

Records will be granted covering
only land suitable for agricultural
purposes, and which is not timber-
land, i.e., carrying over 5,000 board
feet per acre west of the Coast Range
and 8,000 feet per acre east of that
Range.

Applications for pre-emptions are
to be addressed to the Land Commis-
sioner of the Land Recording Divi-
sion, in which the land applied for
is situated, and are made on printed
forms, copies of which can be ob-
tained from the Land Commissioner.

Pre-emptions must be occupied for
five years and improvements made
to value of \$10 per acre, including
clearing and cultivating at least five
acres, before a Crown Grant can be
received.

For more detailed information see
the Bulletin "How to Pre-empt
Land."

PURCHASE
Applications are received for pur-
chase of vacant and unreserved
Crown lands, not being timberland,
for agricultural purposes; minimum
price of first-class (arable) land is \$5
per acre, and second-class (grazing)
land \$2.50 per acre. Further infor-
mation regarding purchase or lease
of Crown lands is given in Bulletin
No. 10, Land Series, "Purchase and
Lease of Crown Lands."

Mill, factory, or industrial sites on
timber land, not exceeding 40 acres,
may be purchased or leased, the con-
ditions including payment of stump-
age.

HOMESITE LEASES
Unsurveyed areas, not exceeding 20
acres, may be leased as homesites,
conditional upon a dwelling being
erected in the first year, title being
obtainable after residence and im-
provement conditions are fulfilled and
land has been surveyed.

LEASES
For grazing and industrial purposes
areas not exceeding 640 acres may be
leased by one person or a company
GRAZING
Under the Grazing Act the Provin-
ce is divided into grazing districts and
the range administered under a
Grazing Commission. Annual graz-
ing permits are issued based on num-
bers ranged, priority being given to
established owners. Stock-owners
may form associations for range man-
agement. Froe, or partially froe
permits are available for settlers,
campers and travellers, up to ten
head.

Correspondence

SUMMERLAND BEST
PLACE TO LIVE IN

Los Angeles, Cal.

Editor Review.
Dear Sir,—We are receiving The
Review regularly here and cannot
tell you how much we appreciate it.
It is like meeting an old friend from
home, and we take this opportunity
of thanking you and wishing you and
all our Summerland friends abun-
dant happiness and prosperity for
the coming New Year.

Mrs. Snider and I are enjoying to
the full this wonderful southland, for
while southern California may be
somewhat over-advertised, yet it is
a delight to find the flowers and
summer sunshine in midwinter and
the orange, lemon and grapefruit
trees loaded with their golden and
yellow fruit. Still one is disappoint-
ed in seeing the bathing piers dis-
mantled and we miss the birds and
butterflies. I have never seen any
small wild birds here at this season
outside the lakes in the parks.

Los Angeles has many large and
beautiful churches and theatres and
all are well patronized. We attended
the First Methodist Church which
cost over a million dollars, and one
would need a guide not to get lost
among the numerous meeting rooms
and halls. We found ourselves on
the third floor but through the kind-
ness of an official were directed to
the main auditorium and joined the
large congregation of about one
thousand. The service was simple
and inspiring, and the music from
the grand pipe organ and by the
large selected choir was in itself a
"sermon in symphony." All the large
theatres have regular orchestras of
from 50 to 100 instruments and the
music is right up to date. The Metro-
politan has the largest orchestra but
I like some of the others even bet-
ter. They are all excellent and I shall
hope to bring back some ideas which
may be useful to our Summerland
orchestra in the part they are to take
in the "Mikado."

It costs more to live in Los Ange-
les than it does in Summerland.
Milk is 14 cents for a small quart and
even oranges are 60 cents per dozen
medium size. Rents are lower than
1922 and while business seems to be
about as usual, yet the banks and
departmental stores report that the
volume is considerably less.
The real estate and building trade
is not dead by any means, but much
of the kick has gone out of these
lines that we saw two years ago.
"Rooms to Let" can be seen hung out
wherever we go and the boosters are
constantly explaining why Los Ange-
les can never have a slump. These
are the signs, and there may be a
reason why many Canadians who had
come here to stay are drifting back
home again.
Southern California is all right to
visit but oh you Summerland is
where we want to live.

S. B. SNIDER.

NOVA SCOTIA

BOXED APPLES

The Berwick, N.S., Register, pub-
lished in the heart of the orchard dis-
trict of the Annapolis Valley, gives
a few instances of returns from ap-
ples this season. Capt. Robbins has
thirty Gravenstein trees, covering a
little over half an acre from which
he picked 112 barrels. Of these there
were 101 barrels marketed through
the Berwick Fruit Company, bringing
in net returns \$340.19 or \$3.26 a
barrel, tree run. Mr. A. Palmer, in
the same locality, picked 315 barrels
from 83 trees and these apples netted
the grower \$906.08 or \$3.16 per bar-
rel, tree run. Both of these orchards
bore about the same quantity last
year with correspondingly good re-
sults. These orchards have been cul-
tivated in the ordinary way and the
apples sold in barrels and are there-
fore representative of most orchards
in the Valley.

The remarkable feature of apple
growing in this district is the claim
by Mr. J. N. Chute, of Berwick, that
desert varieties can be grown to bot-
tom advantage with the soil culture
system. This has the advantage of
giving a better colored fruit, less li-
able to spot, with firmer texture and
of better keeping quality. Mr. Chute
has been watching the results of this
system as practiced by the members
of the Rockland Fruit Company and
claims that as good apples for boxing
can be produced in this way as are
produced by any country.

"We formerly thought our country
was only suited to the growing of
coarse, cooking varieties," says Mr.
Chute, "but these soil culture or-
chards are opening our eyes, and we
now see possibilities for our country.
With our cheap land, labor and wood
material for containers, and with
transportation cheap, we can put our
apples on the English markets at a
good profit, while our competitors
in the West are growing at a loss,"

NARAMATA NEWS

Current Events of
Town and District

The local branch of the B.C.F.G.A.
held a meeting in the Unity Club on
Monday afternoon for the purpose
of electing a director for the coming
year and a delegate to the convention
to be held in January. The proceed-
ings also included addresses by
Messrs Tait and Palmer. Mr. W. H.
Irwin was elected to the chair, and
Mr. Donald McKay acted as Secre-
tary.

Previous to nominations being cal-
led for, Mr. F. W. Rolt spoke on the
matter of expenditure for travelling
and attendance at convention as
shown in the annual report of the
Association, and thought it might
well be cut down. This led to some
discussion, but no motion was made,
and the chairman called for nomina-
tions. This resulted in Mr. G. S.
Partridge being reappointed director,
and Mr. Irwin as delegate, both ap-
pointments being by acclamation.

The chairman then called upon Mr.
Palmer of the Summerland Exper-
imental Station to address the meet-
ing on the subject of breakdown in
the Association, and thought it might
well be cut down. This led to some
discussion, but no motion was made,
and the chairman called for nomina-
tions. This resulted in Mr. G. S.
Partridge being reappointed director,
and Mr. Irwin as delegate, both ap-
pointments being by acclamation.

A short talk on spraying was then
given by Mr. John Tait, who touched
lightly on the new system of oil spray-
ing, remarking that the great diffi-
culty so far has been to produce an
oil which would mix thoroughly with
the lime and sulphur preparations.
Mr. Oliver, who spoke later, stated
that he believed that obstacle was
now being overcome, and that he
hoped to produce the necessary blend
before long.

Some discussion arose concerning
the attempt to unite the Farmers'
Institute with the B.C.F.G.A. and it
was decided that this had proved a
failure. A further meeting of the
Association was arranged for next
month, and the meeting closed with
a vote of thanks to the speakers.

Sociability was the prevailing
note here on Christmas Day, practi-
cally all residents being grouped to-
gether in friendly gatherings at var-
ious homes, where they enjoyed all
good things appropriate to the sea-
son, and spent the hours in quip and
jest, and merry games. Several re-
unions are also planned for New
Year's Day, among them being a
general gathering at the Unity Club,
to which all residents are invited.

Water for domestic purposes is
being delivered in town by teams, it
having been found that the repairs to
the system will take longer than
was expected.

Mr. Donald McKay left on Saturday
for a short trip to the Coast.

The members of the Unity Club
met on Friday at the home of Mrs.
G. Cook, when arrangements were
made for the New Year's gathering
at the Club house on Thursday.

The service on Sunday afternoon
was taken by the Rev. H. J. Arm-
strong, who preached on the following
of the Star in the East. Christmas
hymns were led by the choir. Miss
Alice Myers presided at the organ.

WORK ON C.N.R. IS
PROGRESSING BRISKLY

Despite the somewhat severe weath-
er that we have been experiencing
—at times—during the past ten days,
the work of renovation on the grade
of the C.N.R. branch line between
Armstrong and Kamloops is being
pressed briskly forward, says the
Armstrong Advertiser. The latest
construction camp to be established
is that in the vicinity of Mr. Millard's
place at Grandview, which was opened
up at the beginning of last week.
Here about thirty men and twenty
teams are busily employed in road-
ing and reshaping the old track that
has fallen into a good deal of disap-
repair during the "interregnum."
Several local men, from Armstrong,
Grandview and the neighborhood,

Mr. F. G. J. Comeau of the Dom-
inion Atlantic Railway, is authority
for the statement that several British
apple buyers are acquiring large or-
chards in Nova Scotia and large tracts
of land which they intend to put
under fruit.

have found employment here, and
some of our local caterers are reap-
ing the benefit of the camp's custom.
It is rumored that another may be
opened still nearer to town within
the next few days. The whole of
the route, indeed from Ducks through
to this vicinity is beginning to look
like a proper trackway again; and,
although there are yet some bridges
to be put in, we understand that it
is probable that temporary trestle
work will be installed at these points

for the moment, and within a very
short time, sufficient to enable the
work trains to cover the whole dis-
tance.

Water Pump Packing

By using the felt of an old hat,
washers may be made for packing
the stuffing boxes of the water pump.
These are made more effective if the
felt has been boiled in a mixture
of tallow and graphite.

THE CORPORATION OF THE DISTRICT OF
SUMMERLAND

BY-LAW No. 204.

A BY-LAW OF THE CORPORATION OF THE DISTRICT OF SUM-
MERLAND IN THE PROVINCE OF BRITISH COLUMBIA, TO AUTHOR-
ISE THE MUNICIPAL COUNCIL OF THE SAID CORPORATION OF
THE DISTRICT OF SUMMERLAND TO IMPROVE, ALTER, RE-CON-
STRUCT AND RENEW CERTAIN IRRIGATION WORKS OF THE SAID
CORPORATION OF THE DISTRICT OF SUMMERLAND.

WHEREAS it is desirable to improve, alter, re-construct and renew
certain works of the said irrigation system, of the said corporation, such
works being more particularly described as that part of the said irrigation
system serving the lands in District lots One Thousand, one hundred and
seventy-seven (1177) and four hundred and seventy-nine (479) respecti-
vely, in the Garnett Valley District of the Municipality of Summerland.

THEREFORE the Municipal Council of the Corporation of the District of
Summerland, in the Province of British Columbia, in open meeting
assembled enacts as follows:—

(1) That the Municipal Council of the said Corporation be and is
hereby authorized to improve, alter, re-construct and renew, that portion
of the Municipal irrigation system serving the lands in District lots: One
Thousand, one Hundred and Seventy-Seven (1177) and Four Hundred
and Seventy-Nine (479) respectively, in the Garnett Valley District of the
Municipality of Summerland, and expend upon such improvement, alter-
ation, reconstruction and renewal the sum of twenty-five thousand dollars
(\$25,000.00).

(2) THIS BY-LAW shall, before the final passing thereof, receive
the assent of the Electors of said Corporation of the District of Summer-
land in manner provided for in the Municipal Act.

(3) THIS BY-LAW may be cited for all purposes as the Irrigation
System Improvement and Alteration Approval By-law 1925.

(4) THIS BY-LAW shall come into force and take effect on the 1st
day of March, 1925.

DONE AND PASSED By the said Municipal Council the Thirtieth
day of December A.D. 1924.

RECEIVED THE ASSENT of the Electors of the said Corporation of
the District of Summerland the day of 1925.

RECONSIDERED AND FINALLY PASSED AND ADOPTED by the
said Municipal Council, signed by the Reeve and Clerk, and sealed with the
Municipal Seal the day of A.D. 1925.

.....Reeve
.....Clerk

TAKE NOTICE that the above is a true copy of the proposed By-law
upon which the vote of the Municipality will be taken at
HOTEL SUMMERLAND, SUMMERLAND, B. C.

AND
MUNICIPAL OFFICE, WEST SUMMERLAND, B. C.

ON
SATURDAY, 17th JANUARY, 1925.
between 9 o'clock A.M. and 7 o'clock P.M.

F. J. NIXON,
Municipal Clerk.

PUBLIC NOTICE is hereby given that the vote of the Electors of the
Municipality of Summerland will be taken on the above mentioned By-law
at the time and places above mentioned, and that F. J. NIXON has been
appointed RETURNING OFFICER to take the votes of such electors.

CORPORATION OF THE DISTRICT OF SUMMERLAND.
J. R. CAMPBELL, Reeve.
F. J. NIXON, Clerk

THE CORPORATION OF THE DISTRICT OF
SUMMERLAND

BY-LAW No. 205.

A BY-LAW TO ENABLE THE CORPORATION OF THE DISTRICT OF
SUMMERLAND, IN THE PROVINCE OF BRITISH COLUMBIA, TO
RAISE BY WAY OF LOAN THE SUM OF TWENTY-FIVE THOUSAND
DOLLARS, (\$25,000.00) FOR THE PURPOSE OF IMPROVING, ALTER-
ING, RE-CONSTRUCTING AND RENEWING CERTAIN WORKS OF
THE IRRIGATION SYSTEM OF THE SAID CORPORATION.

WHEREAS it is deemed expedient to improve, alter, reconstruct and
renew certain works of the said irrigation system, of the said Corpora-
tion, and being that part of the said irrigation system serving the land in
District Lots Elogen Hundred and Seventy-Seven (1177) and Four Hun-
dred and Seventy-nine (479) respectively in the Garnett Valley district
within the Corporate limits of said Corporation.

AND WHEREAS it is necessary for the purposes aforesaid to raise
by way of loan upon the credit of the said Corporation the sum of
Twenty-five thousand Dollars (\$25,000) payable:

- One Thousand One Hundred Dollars (\$1,100.00), on the First Day of
March, 1926.
One Thousand Two Hundred Dollars (\$1,200.00), on the First Day of
March, 1927.
One Thousand Three Hundred Dollars (\$1,300.00), on the First Day of
March, 1928.
One Thousand Three Hundred Dollars (\$1,300.00), on the First Day of
March, 1929.
One Thousand Four Hundred Dollars (\$1,400.00), on the First Day of
March, 1930.
One Thousand Five Hundred Dollars (\$1,500.00), on the First Day of
March, 1931.
One Thousand Five Hundred Dollars (\$1,500.00), on the First Day of
March, 1932.
One Thousand Six Hundred Dollars (\$1,600.00), on the First Day of
March, 1933.
One Thousand Seven Hundred Dollars (\$1,700.00), on the First Day of
March, 1934.
One Thousand Eight Hundred Dollars (\$1,800.00), on the First Day of
March 1935.
One Thousand Nine Hundred Dollars (\$1,900.00), on the First Day of
March 1936.
Two Thousand Dollars (\$2,000.00), on the First Day of March 1937.
Two Thousand One Hundred Dollars (\$2,100.00), on the First Day of
March 1938.
Two Thousand Two Hundred Dollars (\$2,200.00), on the First Day of
March 1939.
Two Thousand Four Hundred Dollars (\$2,400.00), on the First Day of
March 1940.

bearing interest in the meantime, payable semi-annually on the First
days of March and September in each year at the rate of Five and one-
half (5½) per cent per annum, the principal of such loan when raised to
be applied for the purposes aforesaid.

AND WHEREAS the said sum of Twenty Five Thousand Dollars
(\$25,000.00), is the amount of the said debt which this By-law is intend-
ed to create.

AND WHEREAS for the payment of the said Principal it is necessary
to raise by rate the various sums set forth in column two (2) of the
schedule hereto annexed marked "A" in the respective years set forth
in column one (1) of said schedule "A" and for the payment of said inter-
est it is necessary to raise by rate the various sums set forth in column
three (3) of said schedule "A" in the said respective years.

AND WHEREAS the amount of the whole rateable land and im-
provements of the said The Corporation of the District of Summerland
according to the last revised assessment roll is Three Million, Four Hundred
and Twenty Eight Thousand, Five Hundred and Ninety One Dollars and
Fifty Cents (\$3,428,591.50).

AND WHEREAS the total amount of the existing Debenture Debt
of said The Corporation of the District of Summerland is Five Hundred
and Forty Two Thousand, One Hundred Dollars (\$542,100.00).

NOW THEREFORE the Municipal Council of said The Corporation
of the District of Summerland is said Province in open meeting assembled
enacts as follows:—

(1) IT SHALL BE LAWFUL for the Reeve of said The Corpora-
tion of the District of Summerland to raise by way of loan from any per-
son, or persons, body, or bodies corporate, who may be willing to advance
the same on the credit of the said Corporation, by way of the Debentures
hereinafter mentioned, a sum of money not exceeding in the whole the
sum of Twenty Five Thousand Dollars (\$25,000.00) and to cause all such
sums so raised and received to be paid into the hands of the Treasurer
of said The Corporation of the District of Summerland for the purposes
and with the objects hereinbefore recited.

(2) IT SHALL BE LAWFUL For the Reeve to cause any num-
ber of debentures to be made for a sum not exceeding One Thousand
Dollars (\$1,000), each, bearing interest at the rate of Five and One
half per cent (5½) per annum, not exceeding in the whole the sum of
Twenty Five Thousand Dollars (\$25,000) in all, such debentures shall
be sealed with the seal of the said Corporation, signed by the said Reeve,
and countersigned by the Treasurer of the said Corporation.

(3) THE SAID DEBENTURES shall bear date the First day of
March, 1925, and shall be made payable:—
One Thousand One Hundred Dollars (\$1,100.00), in one year.
One Thousand Two Hundred Dollars (\$1,200.00), in two years.
One Thousand Three Hundred Dollars (\$1,300.00), in three years.
One Thousand Three Hundred Dollars (\$1,300.00), in four years.
One Thousand Four Hundred Dollars (\$1,400.00), in five years.
One Thousand Five Hundred Dollars (\$1,500.00), in six years.
One Thousand Five Hundred Dollars (\$1,500.00), in seven years.
One Thousand Six Hundred Dollars (\$1,600.00), in eight years.
One Thousand Seven Hundred Dollars (\$1,700.00), in nine years.
One Thousand Eight Hundred Dollars (\$1,800.00), in ten years.
One Thousand Nine Hundred Dollars (\$1,900.00), in eleven years.
Two Thousand Dollars (\$2,000), in twelve years.
Two Thousand One Hundred Dollars (\$2,100.00) in thirteen years.
Two Thousand Two Hundred Dollars (\$2,200.00) in fourteen years.
Two Thousand Four Hundred Dollars (\$2,400.00), in fifteen years.
from the first day of March 1925, at the Agency Branch of the Bank of
Montreal, at Summerland, British Columbia.

(4) THE SAID DEBENTURES shall have coupons attached for
the payment of the interest at the rate of Five and One half (5½) per cent
per annum on the amount of the said Debentures, and such interest shall
be payable semi-annually on the First days of the Months of March and
September in each and every year and the signature to such coupons may
be either written, stamped, printed or lithographed.

(5) AN AMOUNT shall be raised and levied annually by a rate
sufficient therefor, on all the rateable land, or land and improvements
within the said Corporation in addition to all other rates thereon to pay the
said interest on the debt hereby credited during the currency of the
said Debentures and to provide for the payment of the said debt when due.

(6) THE VARIOUS SUMS set forth in column two (2) of said
schedule "A" shall be raised and levied in the respective years set forth in
column one (1) of said schedule "A", by a rate sufficient therefor, on all
the rateable land, or land and improvements within the said Corporation
in addition to all other rates, for the payment of the debt hereby created
when due.

(7) THE VARIOUS SUMS set forth in column three (3) of said
schedule "A" shall be raised and levied in the respective years set forth
in column one (1) of said schedule "A", by a rate sufficient therefor, on
all the rateable, or land and improvements, within the said Corpora-
tion in addition to all other rates for the payment of the interest on the
said Debentures.

(8) THIS BY-LAW shall before the final passing thereof receive
the assent of the Electors of said The Corporation of the District of
Summerland in the manner provided for by the Municipal Act.

(9) THIS BY-LAW shall come into force and take effect on the
First day of March 1925.

(10) THIS BY-LAW may be cited for all purposes as the Irriga-
tion Loan By-law 1925.

DONE AND PASSED by the Municipal Council the Thirtieth day
of December, A.D. 1924.

RECEIVED THE ASSENT of the Electors of said The Corporation
of the District of Summerland the day of A.D. 1925.

RECONSIDERED AND FINALLY PASSED AND ADOPTED by the
said Municipal Council, signed by the said Reeve and Clerk, and sealed
with the Municipal Seal the day of A.D. 1925

Facts About Bee Diseases

By A. H. W. BIRCH, Dominion Apiarist.

There are comparatively few bee diseases and these few may be divided into two classes, namely, those that attack the adult bees and those that attack the brood.

FAVORITE HYMNS AND THEIR WRITERS

By Rev. Archer Wallace

"O LITTLE TOWN OF BETHLEHEM."

Phillips Brooks, the writer of "O Little Town of Bethlehem," was a preacher rather than a poet, but all his life he was very much interested in music.

"JESUS, THE VERY THOUGHT OF THEE."

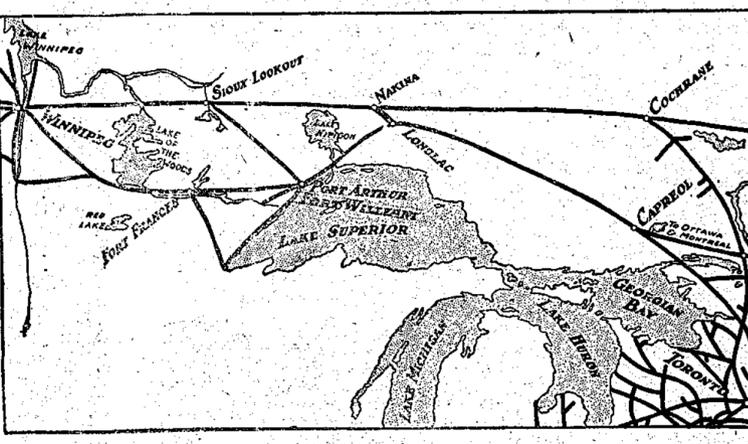

The author of this fine hymn, who became known throughout the Christian world as Bernard of Clairvaux, was the son of a French knight, and was born in 1091.

"GROWN IN CANADA"

H. V. Taylor, Controller of Horticulture in the British Ministry of Agriculture, who has been visiting this country in the course of a study of the fruit industry, urges fruit growers to adopt a smaller package for apples exported to Great Britain.

Not What She Wanted. She (sighing).—"I know, Alfred, I have my faults."

Bringing East and West Several Hours Closer Together

A FURTHER cut in running time between Winnipeg and Toronto has been announced by Canadian National officials at Winnipeg in connection with train schedule changes which became effective recently.

MICKEY'S XMAS GIFT FROM HEAVEN

By I. H. Holden

"Well, accordin' t' th' calendar, it's soon goin' t' be Christmas," said Pat O'Hooley, selecting a chair back of the section-house stove.

"'Tis a sad loife! But wan day there came int' th' quarter a strange lad wid a merry face; an' he looked Mickey, who was entoiely lovable wance th' shyness was gone.

"'Twas a sad loife! But wan day there came int' th' quarter a strange lad wid a merry face; an' he looked Mickey, who was entoiely lovable wance th' shyness was gone.

"'Twas a sad loife! But wan day there came int' th' quarter a strange lad wid a merry face; an' he looked Mickey, who was entoiely lovable wance th' shyness was gone.

"Where did ye foind this, Mickey?" sez th' widdie, in a husky voice. "Was ut not at th' corner of a little park, near some trees? Was there a static standin' there? An' did ye notice a broken car by th' curb?"

"'Yes, sez Mickey, 'ut was at th' corner by some trees - I remember that; an' I saw a broken car, but I didn't notice anythin' else but th' angel! Don't ye think me prisint come-from Hivin, mamma?"

Yes, Yes, Of Course. He (attempting to start car) - This darned self-starter won't work! There is a short circuit somewhere.

IN CASE OF FIRE The Summerland Telephone Co. USE THE PHONE

\$1200 PER ACRE FROM APPLES

What is expected to prove the year's best record in the orchard districts of British Columbia for quality and profitable apple production, is reported from the R. J. Long ranch, just east of Creston, where two carloads of delicious apples were shipped to England. There were 1,000 boxes in the cars, all graded extra fancy, and were the select product of 200 trees of the big orchard. The price is said to have been \$3 per box f.o.b., which works out at \$1,200 per acre. Delicious from the Long ranch was one of the features of the B. C. fruit display at the British Empire exposition at Wembley this year, and it is probably due to the fine impression the Creston apples made there that the big order and top price was obtained.

GRAIN CUT GREEN GRADES No. 3 NORTHERN

In years of exceptional weather conditions curious things happen to the grain crops, some of which are hard to account for. John Borjan, a farmer living near Vegreville, Alta., had an experience this year which is more than puzzling. On August 19 he began cutting his wheat when it was green as grass. His neighbors doubted his sanity, writes a correspondent of the Colonization and Development Department, Canadian National Railways, expecting he would get nothing but chaff in the threshing. The grain, however, filled out splendidly in the stook and gave a yield of 42 bushels per acre of good No. 3 Northern grade. Mr. Borjan thinks there is much yet to be learned about the farming game.

Advertising is a method of multiple telling of facts that is the most economical.

Local Happenings

Miss Ruth Dale went out on Friday's train for a short visit at the Coast.

Jack Harris came over from Princeton on Christmas to spend the day at his home here.

Mr. and Mrs. A. H. Steven went down to the Coast last week to spend Christmas with friends there.

Mr. and Mrs. J. Travis and family, of Penticton, spent Christmas day with Mr. and Mrs. G. W. Cope.

Mrs. Nita Murphy of North Vancouver has been the guest for the past week of Mrs. A. B. Elliott.

Lionel Fudge left on Monday morning to return to Kimberly, having spent Christmas at his home here.

A son was born to Mr. and Mrs. H. W. Waters, on Sunday, December 21st, at the Summerland hospital.

Miss Helen White returned last week from Everett, Wash., where she has been with relatives and attending school.

Miss F. Blethen, who has been teaching in Washington State, came up last week to spend Christmas vacation at home.

Dr. and Mrs. R. C. Lipsett spent Christmas at Peachland with Mrs. Lipsett's brother, Mr. G. H. V. Bulvea, and his wife.

Charlie Denike spent Christmas with his parents in Prairie Valley returning to Okanagan Mission Thursday morning.

Miss Davessa Cowan arrived home on Thursday night from Melaval, Sask., where she has been teaching for the past term.

Miss Mabel Shields came down last week from Vernon, where she has been attending commercial school, and is spending vacation at home.

Eris Winter came in from Cloverdale B. C., last week to spend Christmas and a three weeks' vacation with his parents, Mr. and Mrs. C. B. Winter.

Miss Merle Smith has accepted a position on the teaching staff of the Merritt public school, and plans to leave on Friday to take up her duties there.

Shoe repair work guaranteed. If you want them in a hurry send them to us. Sole leather has advanced. Beer's prices, due to modern equipment, are going down.

M. G. Wilson was a visitor to Vernon last weekend on business in connection with the estate of the O. U. G. Limited. He went up on Friday morning and returned Saturday evening.

Mr. and Mrs. H. W. Stevens came in from Golden last week to spend Christmas with relatives here, returning on Monday morning. They were guests of her mother, Mrs. Conway.

Miss Mifanway Wright entertained about thirty small friends at a party in Parish Hall on Monday afternoon, the occasion of her birthday, when a splendid time was enjoyed by the little guests.

Quite a number of young people gathered at the G. W. V. A. hall on Christmas eve and enjoyed an informal dance, taking advantage of the holiday season when a number of local young people are home on vacation.

C. H. Taylor arrived at his home here the day before Christmas from Shaughnessy hospital to spend the holiday season with his family. They all plan to move to the Coast some time next month and Mr. Taylor may not return to the hospital until then.

Dr. and Mrs. E. C. H. Windolor are now comfortably settled in Windsor, Ontario, according to a letter received from Mrs. Windolor by Mrs. J. C. Arkoll. The doctor has his office in the same building, a semi-detached house, nicely situated in that rapidly growing border city of Ontario.

SUMMERLAND WEATHER REPORT

Table with columns: Date, Max., Min., Rain, Snow, Sun. Rows for Dec. 24-31.

A son was born to Mr. and Mrs. Milton Phillips on Friday, December 26.

Alan Cross came down from Salmon Arm and is a visitor in town this week.

Miss Amy Walker came in from Vancouver on Saturday and is visiting Miss K. Elliott.

Dr. Bryce, eye specialist, will be at Hotel Summerland to see patients on Thursday, January 8th.

Howell Harris is spending some time at his home here, having come in last week from Victoria.

Bill Haek, who came in last week from Kimberley to spend Christmas here, returned on Monday's train.

W. R. Shields came down from Kelowna to spend Christmas at home. He expects to return on Thursday.

Miss Evelyn Adams and brother, Stanley, of Penticton, have been guests this week of their aunt, Mrs. S. H. Adams.

Members of the local Tuxis square have arranged for a debate with members of the Penticton Tuxis group to be held on Friday night in St. Andrew's church.

Bill Smith came in on Christmas Day from Jasper Park and spent the weekend with his parents, Mr. and Mrs. J. O. Smith, returning on Monday morning.

Mr. Cecil R. Cope arrived here on Christmas Day via Vancouver from his ranch on Francois Lake in the north, on a lengthy visit to his parents, Mr. and Mrs. G. W. Cope.

Have your car re-covered, curtains fixed or harness repaired during the winter at Beer's.

Miss Chilvers, vice principal of St. Michael's school for girls at Vernon, spent the Christmas holidays here with Mr. and Mrs. Otdley. This is her third Christmas season in Summerland.

Dr. Franklin W. Sweet, president of Brandon College dropped dead early Tuesday evening. Dr. Sweet was a visitor to Summerland last June when he made a number of friends here.

Geo. Carr, a former resident of Prairie Valley and for some time an employee of The Review, arrived in town Tuesday on a brief visit. Since leaving here nearly two years ago he has been work in a number of cities and towns in California.

Miss Marion Hatfield came in on Tuesday from Camrose, Alta., where she has been teaching and is visiting her aunt, Mrs. A. B. Elliott, and grandmother, Mrs. McLaughlin, here. From here she will go to the Coast where she expects to remain with her father until the opening of the spring term in April.

ENGLAND'S BEST APPLE GROWING COUNTY

The best apple county in England is what Northamptonshire aims at becoming. Four years ago it was discovered that the soil was especially adapted to fruit growing, and last year at Manchester apples grown in the county beat all comers. The industry has developed to such an extent that the annual county show held recently had over 600 exhibitors, chiefly farmers, who are beginning to treat their long-neglected orchards scientifically, and are thereby substantially adding to their home.

HOMEMAKERS' CORNER FOOD POISONING

On Dec. 11 we discussed recent deaths caused by food poisoning, and the different kinds of food poison. Dr. Victor Burke, head of the bacteriology department of the State College of Washington, told us some "whys and wherefores" in that connection. He has some very interesting things to say on this important subject to us today.

"The organism causing botulism (a poisoning, you remember, caused by the formation of a toxin from the growth of the bacillus botulinus) may be present on any unpreserved fruit or vegetable, or meat. There is nothing to indicate its presence. It is more likely to be found on foods overripe or on the verge of spoiling. Such foods should be discarded not preserved to serve them as is often done. Only fresh, whole fruits and vegetables should be preserved, and these only after washing.

"Flies and other insects may convey the organism, and should be kept off foods to be preserved. If these precautions are observed, there is less chance of the botulism organism getting into the preserving jars. If they do get in, ordinary methods of heating can not be depended on to kill them. And if they are not killed they will grow and the food be poisoned.

"When serving preserved food the cook should examine it carefully for spoilage, indicated by the presence of gas, an unusual softening of the food particles, or rancid odor not characteristic of that particular kind of food. In glass jars the gas bubbles can be seen rising to the top or caught in the contents. A softening of the particles is indicated by the loss of shape and a settling of fine particles to the bottom. In tin cans the gas causes the ends of the cans to bulge outward. Puncturing such cans, you can hear the gas escape.

"Presence of spoilage does not indicate that the food is poisonous, for there are many kinds of spoilage. Most organisms producing spoilage do not produce a poison. But ALL spoiled food MAY be poisonous and should be discarded. Unless thoroughly cooked it should not be thrown to the chickens. Cooking destroys the toxin but not the bacillus botulinus organisms. Eating these organisms does not cause disease, but eating the toxin results in death.

"Preserved foods may be in the first stages of decomposition and contain enough toxin to cause death, without showing any sign that the eye or nose can detect. Therefore all preserved foods should be thoroughly cooked before eaten unless the canning process is known to be safe. NO home canning process is above suspicion. The improved methods in use now in large commercial canneries are believed safe but future botulism outbreaks may indicate that no method is absolutely safe.

"DO NOT TASTE preserved food to see if it is good to eat. The habit of doing so has resulted in a number of deaths from botulism. The toxin is so powerful that a drop on the end of the tongue may cause death.

"If a jar of home canned food is suspected, boil it thoroughly half an hour before tasting it. Or better, discard it. If there are any signs of decomposition the food should not be eaten. If a can of commercial product is under suspicion, return it to the store and ask for another. The National Canners' Association would rather give away \$50,000 than have an outbreak of botulism from

MASONS HOLD BIG FESTIVAL

Three Lodges Unite In Ceremony of Installing Officers

Members of the several Masonic Lodges of Summerland, Peachland and Penticton united yesterday in their annual joint installation of officers and banquet, the gathering being held at Penticton.

Members' wives and a number of other invited friends were guests of the Lodge. At four o'clock the three lodges met together for their business session, when officers were duly installed. During this time and until seven o'clock, the banquet hour, those guests not members of the lodge enjoyed afternoon tea, music and bridge at Hotel Incola where, later an elaborate banquet was served. The program during the afternoon included solos by Miss Carol Graham, Summerland, and Mrs. Birch, Penticton.

At seven o'clock all gathered in the dining room which was seated to capacity twice to accommodate the crowd. Music, dancing and cards continued the merrymaking until a late hour.

a commercially canned product. The few outbreaks of botulism following the eating of commercially canned products have resulted in the loss of millions of dollars to producers and canners.

"The Walla Walla outbreak showed how NOT to deal with spoiled food. Mrs. E. prepared a jar of home canned, cold-packed asparagus for supper. She had temporarily lost her sense of smell and did not detect the peculiar odor of botulism decomposition. When the food was warmed up the odor in the room was so noticeable Mrs. E's son and daughter smelled it. In spite of this, the asparagus was put on the table. Mrs. E. ate part of a stalk to see if it was good. The son ate a whole stalk. The daughter refused to touch it. As it appeared to be spoiled, the rest of the asparagus was thrown to the chickens. Next morning a number of the chickens were sick or dead. A few days later Mrs. E. became ill, and died with typical symptoms of botulism. The son developed no symptoms, though he had eaten more than his mother. This may be explained by the supposition that the

Crossed Atlantic Unafraid

Little Samuel Molyneux arrives A very pathetic figure, as he stepped off the Canadian Pacific train, between the conductor and an official of the department of immigration, into the noise of chattering trains, the confusion of hurrying express trucks, and the bustle that attends the arrival and departure of friends, Samuel Molyneux, 303 Oakwood Avenue, Toronto, as the label on his little bag proclaimed him, paused for a moment, and then, overcome by a sense of loneliness produced by the loss of his friends of ship-board and train, burst into tears. A second later he was seized by his mother, from whom he had been separated for one and a half of his four years, and sobbed himself to contentment in her arms.

Samuel came to Canada on the Montclare, making the complete trip from the old land to Toronto by himself. Samuel was a favorite on ship-board, according to reports. He became particularly attached to the ship's nurse but was the pet of all the passengers and crew.

F. D. COOPER REAL ESTATE BROKER Peach Orchard Summerland Established 1907 Phone 613

stalk he ate had been heated enough to kill the toxin, while what Mrs. E. ate, in another part of the dish, was exposed to less heat. It takes some time for heat to penetrate to the interior of a mass of food. Food containing gas may seem to boil for several minutes before the true boiling point is reached. "Instantaneous exposure of botulinus toxin to a boiling temperature will destroy it and render the food safe to eat. Sufficient time must be given for the heat to reach the interior of the food mass and of each particle.

"One of the dead chickens from Mrs. E's flock and a jar of the asparagus were sent to the college laboratory for examination. Botulinus bacillus was found in the chicken, and the asparagus juice contained a very strong botulinus toxin.

"There will continue to be outbreaks of botulism poisoning so long as people eat spoiled food."

COFFEE CREAMS

To make coffee creams, put 2 tablespoons of ground coffee and 4 tablespoons of water in a saucepan and bring it to the boiling point. Boil 2 minutes, then strain through double cheesecloth. Add enough confectioners' sugar to stiffen it, and knead it until it is smooth. Use it as centers for chocolate creams or bonbons, or for walnut, pecan or cherry creams; or roll it out a quarter of an inch thick, cut it with a small round cutter, and roll in granulated sugar.

MILD WEATHER HAS RETURNED

Recent Cold Spell Cuts Down Domestic Water Supply

Following the zero weather of the week of the fifteenth, the thermometer has been rising steadily until thawing weather was experienced during Tuesday for the first time since the sudden cold snap hit the Valley on the fifteenth.

Snow fell on Saturday and Sunday, making travelling exceedingly difficult for motorists, but in sufficient quantity to make good sleighing.

Coming at a time when the ground was bare of snow to quite an elevation, the cold snap has had an unprecedented effect on the domestic water supply. Several days of zero weather at the higher elevation had the effect of badly freezing up Trout Creek, freezing it at the bottom and causing the water to overflow so that but a small quantity has been reaching the weir at the municipal intake. It is hoped that the fall of snow which came later, together with the moderate weather, will soon improve the situation as the water in the reservoir is now quite low.

PEACHLAND NEWS

By Our Resident Correspondent

On Tuesday evening of last week the Women's Institute held a community Christmas tree for members of the Institute, and their families. Despite the lighting and weather difficulties this, the first of its kind under these auspices, was quite a success. There was a good attendance. The members had spent considerable time in preparation for the event and had the tree and hall suitably decorated. An interesting program was enjoyed as follows:—Recitation, Mrs. C. Somerville; Recitation, Jimmy Sadler; Instrumental, Miss Edna Cud-

more; Song, Alice and Willie McCally; Recitation, little Miss Peggy Heighway; Duet, Mrs. Follett and Miss Ida Ruffie; Recitation, Miss Jean Hyde; Solo, Miss Willa Elliott; Recitation, Miss Annie Taylor; Instrumental duet, Miss Willa and Gerald Elliott; Recitation, Jimmy Young. The program was barely over when Santa's bells were heard and soon he was on the platform to the extreme delight of those present, especially the younger folk. For some time Santa was busily engaged, assisted by some of the ladies in transferring the load on the tree to the different addresses in the audience. There was much merriment during this time in which happy Santa played his part well. Many of the older boys present had surprises of various kinds handed them which added not a little fun to the evening's entertainment. During an intermission in the program, dainty refreshments were served and a novel plan was used on this occasion, the ladies serving the refreshments in bags, one to each and these contained even to a small mince pie.

Among the Christmas visitors coming in last week were Miss Jean Dryden and Mr. W. Moffat of Vernon who came in on Wednesday evening's boat and Miss Flossie Clements who came as far as the Ferry by stage on Thursday and was met there by her father who motored up from here. Mr. and Mrs. Jas. S. Moore and daughter Annie came up from Penticton to spend Christmas day with their relatives and Dr. and Mrs. R. C. Lipsett came up from Sumerland to spend the day with Mr. and Mrs. Bulyea. The latter returned home on the boat in the evening.

A sheet of ice formed by a leak in one of the water mains in town early in the week provided pleasure for a number of the younger folk who used up a goodly portion of the daylight each day skating to their hearts content, and even when night had fallen they gathered material and built bonfires for light and heat. The recent heavy fall of snow has put a damper on the sport.

The telephone gang at work on the line here closed down operations for Christmas and the men went elsewhere for the holiday. Some of the men have returned and are endeavoring to complete the work in hand here. The big snowfall makes it heavy going for them, but they are making the best of it.

Mr. and Mrs. A. D. Ferguson are enjoying a visit from their daughter-in-law, Mrs. Hugh Ferguson and her little girl, who came in last week to spend the Festive Season. Hugh was unable to get away from his business in Vancouver.

After a pleasant visit on the prairie among her children who are settled there Mrs. Allan Wilson returned home here last week. She was accompanied by two of her sons who came to spend Christmas here with their parents and other members of the family.

Mr. and Mrs. B. F. Gummow and son John went down to Penticton last week to join relatives there for the Christmas festivities. Mr. Gummow returned after Christmas, Mrs. Gummow and son remaining till after New Year. Mr. Gumow will join the party again for New Year's day.

The Cousins brothers, Francis, Edward and Daniel, and Lorne Shaw, came down from Beaverdale where they have been employed at a timber contract and are spending the holiday season in their respective homes here.

Mr. Joe Sanasac and Jack Vass came home on Wednesday last to join the other members of the family for Christmas and left again Monday evening to return to their timber contract near Naramata on the K.V.R. They expect to continue there for several weeks.

Christmas Tree Events Enjoyed

(Continued from page 1.)

a special prize to Miss Dorothy Nield who had not missed Sunday School once during the year.

After the program, Santa Claus was welcomed by the kiddies and distributed the parcels on the tree, a gift for each child.

St. Andrew's annual Sunday school concert was held on Tuesday night in the church, when a splendid program was put on by the little folks. From the address of welcome as given by one of the tiniest tots in the primary class to the farewell speech by a small boy in the same class, the program was full of interest and variety. Choruses, recitations, sketches, and costume songs made up a full program, the singing of "When You and I Were Young, Maggie," by six primary members in old style costume being exceptionally taking. A solo by Miss Marjorie King, with chorus by the school and a pianoforte duet by Misses Marjorie King and Lorna Sutherland were also enjoyed.

Rev. W. A. Alexander acted as chairman and expressed much appreciation of the work done in training the children and also of the donations of candies for the Christmas tree. These were distributed at the close of the concert by Santa himself, who arrived just in time to give the children their treat.

Mr. and Mrs. A. D. Ferguson are enjoying a visit from their daughter-in-law, Mrs. Hugh Ferguson and her little girl, who came in last week to spend the Festive Season. Hugh was unable to get away from his business in Vancouver.

After a pleasant visit on the prairie among her children who are settled there Mrs. Allan Wilson returned home here last week. She was accompanied by two of her sons who came to spend Christmas here with their parents and other members of the family.

SUMMERLAND BOYS NOW IN PARLIAMENT

Representatives From All Over Province Making Laws For Organization

Boys from all over British Columbia are in session this week at Victoria in the second Older Boys' Parliament held in British Columbia.

Ronald White, Summerland, is a member of the cabinet and Harry Hobbs, Summerland, and Bertram Pride, Penticton, are other members from the Okanagan. Parliament opened Monday morning and progresses Wednesday evening.

These parliaments, which have become established institutions in boys' work in the different provinces of Canada, are conducted under the direction of the Religious Education Council of the several provinces. It is this organization which launched the C.G.I.T. (Canadian Girls in Training) and the C.S.E.T. (Canadian Standard Efficiency Training) for boys.

The boys' organization in this province, as in the others, is very democratic, the whole work being left in the hands of the boys, who at their yearly sessions of parliament debate suggestions and adopt plans for the improvement and advancement of the work.

So far only provincial parliaments have been held, but a national parliament, which would in all probability be held at Ottawa, is being considered for the near future.

James Butterfield, a regular contributor to the editorial page of the Vancouver Province, recently commented on the boys' parliament thus:

I do not know who is responsible for drawing up the cabinet for the forthcoming session of the boys' parliament at Victoria, but a glance at its composition reveals a new wisdom. In addition to the office of attorney-general, provincial secretary and minister of finance one finds these entirely novel offices listed:

- Minister of intellectual affairs.
- Minister of physical affairs.
- Minister of devotional affairs.
- Minister of service affairs.
- Minister of municipalities.

This is a terrible indictment of the present form taken by our responsible government for, with the exception of the departments of devotion and service, all the other matters fall within the sphere of existing ministries.

It is, therefore, good that in helping the political material of the next generation to train itself for taking up the torch where our present stalwarts will some day let it fall, these matters should have been made the objectives of special ministries.

It is too late to teach the hardened politician of today any new ideals, but this movement for directing the abilities of the thoughtful youth of the period may produce splendid results.

POUND NOTICE.

Impounded on December 26th, one bay horse, two hind feet white. Brand-ed 8L on left shoulder. If not claimed by January 10th at 2 p.m. will be sold at public auction.
D. C. THOMPSON,
Poundkeeper. 22

CORPORATION OF THE DISTRICT OF SUMMERLAND

PUBLIC NOTICE is hereby given to the Electors of the Municipality of Summerland that I require the presence of the said Electors at
THE MUNICIPAL OFFICE, WEST SUMMERLAND
On the 12th Day of January, 1925, at 12 o'clock noon
For the purpose of electing persons to represent them as Reeve and Councillors, School Trustees and Commissioner of Police.

The mode of nomination of Candidates shall be as follows:
The Candidates shall be nominated in writing; the writing shall be subscribed by two electors of the Municipality as proposer and seconder, and shall be delivered to the Returning Officer at any time between the date of the Notice and 2 p.m. of the day of nomination; the said writing may be in the form numbered 5 in the Schedule of the "Municipal Elections Act," and shall state the names, residence and occupation or description of each person proposed, in such manner as sufficiently to identify such candidate; and in the event of a Poll being necessary, such Poll shall be opened on the
17th DAY OF JANUARY, 1925
At Hotel Summerland, Summerland, and at
The Municipal Office, West Summerland
of which every person is hereby required to take notice and govern himself accordingly.

Siwash
A traveller in the Northwest eyed his seatmate for a while and then asked where he was from.
"Saskatchewan."
"What's that, podner?"
"Saskatchewan."
The interlocutor pondered over this for a while and then suggested:
"You spik English?"

WEATHER
HOUSE
PROPHET

Guaranteed Made in Canada.
An Excellent Gift for All Occasions
When the weather is fine, the two children will be out, and when rainy weather is approaching, the witch will come out 8 to 24 hours ahead of rain or snow. The hygrometer will tell advance weather reports better and more reliably than general weather reports. It also has Thermometer, Elk's Head, Bird's Nest, etc. Mail orders 10c extra for packing and postage.

A. B. ELLIOTT'S STORES

"The Best of Cars"

Winter months are hard months on cars and even the best of them will develop balky, little ailments.

One guarantee against being caught on the road at such times is to have your car gone over thoroughly, by expert mechanics, at change of seasons.

Our mechanics are experienced workmen. Bring in your car and let us tune it up for winter driving. You can have it again in a few hours—and you will be agreeably surprised at the new pop it will have.

Plenty of grease and oil, changed regularly, will prolong the life of your car. Let us attend you today.

We Carry a Full Line of
Oils, Greases and Accessories
