DEVOTED TO THE INTERESTS OF SUMMERLAND, PEACHLAND AND NARAMATA

When Merchants Say They Have Nothing to Advertise it's the Same as Saying They Have Nothing to Sell. For Merchants Who do not Advertise Because They Haven't Time, we Furnish Free Cuts and Copy.

Volume 16, Number 32

SUMMERLAND, B. C., THURSDAY, MARCH 6, 1924.

\$2.50, Payable in Advance

Adopts Plan For Better Protection of Property

Electrically Driven Pump to Augment Pressure of Gravity System.

At Small Cost Can Give Whole Lakefront a Fire Fighting Force.

What is believed to be an eminently practicable and efficient means of providing Shaughnessy Avenue and adjacent streets with adequate fire protection has been devised and, subject to the approval of experts, has been endorsed by the municipal council.

Since the closing down of the municipal light plant and the removal of the power pipe line, the area referred to above has been without adequate means to fight an outbreak of fire, with the result that for two years such properties as the Co-operative storage building, the telephone exchange, Empire Hall, Hotel Summerland, the printing and publishing plant, Summerland Garage and many smaller buildings and stocks, have been unduly exposed to risk of fire.

Last year the municipality engaged an engineer to lay out a plan for providing an ample supply of water under pressure. This included the building of a tank on the hill somewhere between the hospital and town, but the estimated cost was so great as to make the plan impracticable.

Another proposal was to instal an electrically operated pump at the edge of the lake, but this was condemned because of the liability of interruption in power service should a fire break out.

Recently the municipal electrician proposed a plan of providing ample pressure by the installing of an electric motor and pump below the spring in the gulch west of Empire Hall, from which spring the domestic water supply is now drawn and which will supply ample water for all possible needs. Placed here, a relatively small motor would be required to provide the desired pressure in the pipe system and there would be no chance of a fire cutting off the power.

The matter was considered at a citizens' meeting on Thursday when a resolution was drawn up. This was presented to the council at a special meeting held on Friday afternoon when the subject was discussed from many angles. The existing pipe line from the spring to Shaughnessy Avenue and from Empire Hall corner to the C.P.R. wharf is large enough and will carry the required pressure. From the hotel to the hydrant opposite A. M. Leslie's there is a three-inch wooden pipe, much of which has been down for more than twenty years and should, in any event, be replaced.

Under the proposed plan, this would be lifted and a six inch pipe substituted. From Leslie's corner on it is believed the existing pipe will suffice.

The total cost for motor pump, power line connection and all other material and labor is not expected to exceed \$2,000.

Vancouver engineers have been asked to pass on the proposition and to give estimates of cost and the subject will come before the council next Saturday.

CANNERIES FIX TOMATO PRICE

Seventeen Dollars per Ton Will be Paid Growers for Tomatoes.

Seventeen dollars per ton is the price fixed by the canners for tomatoes for the coming season. This announcement was made at a recent meeting of the British Columbia Tomato Growers' Association held at Kelowna.

Some dissatisfaction was expressed at the tardiness of the announcement by the canners and by a resolution they are asked to adhere to the terms of the contract by which the price is to be fixed on or before February 10th.

GETTING READY FOR PARK IMPROVEMENT

This afternoon the parks committee and representatives of the Women's Institute are meeting in the park at Peach Orchard to make preliminary arrangements for a civic bee for the purpose of putting the park in shape for the coming season. It is expected that the reeve will declare a civic holiday shortly for the purpose of giving everyone a chance to participate in the work. The tourist season has already opened, several cars from across the line having already been noted.

DESIRE TO IMPROVE PACKING CONDITIONS

The request has been made that the Federal Minister of Agriculture be asked to supply an expert to report on the ventilation of all packing and storage houses in the fruit area of British Columbia and make recommendations for the necessary improvements of same.

GENEROUS GIFT FOR HOSPITAL

In a recent letter to Dr. F. W. Andrew, John G. Foster, of Ottawa, one of our subscribers, states that, having noticed in The Review the heavy deficit the hospital has suffered in its last financial year, he is sending twenty-five dollars in their aid. This donation will be greatly appreciated by the hospital board at the present time. Mr. Foster was formerly American Consul general at Ottawa. Mrs. Carroll Aikins, of Naramata, is a daughter.

CHANGE PLANS INTER-SCHOOL TRACK MEET

Elimination Heats for South, Centre and North of Valley.

The following is a report of a meeting of the executive of the Okanagan Valley Schools Athletic Association held in Kelowna March 1st. A radical change in the annual inter-school track meet was decided upon for this year at the executive meeting of the association held on Saturday last in Kelowna.

Owing to the difficulties arising in handling all the entries at the one meet and the time consumed in running heats, a new departure is to be tried this year by which three preliminary elimination heats will be held in Vernon, Penticton and Kelowna on May 10. Then the southern, central and northern champions will come together on May 17 in Kelowna to decide the Valley championships.

The meeting was well attended, every town being represented by one or more delegates and enthusiasm for the big children's sport day was in evidence.

Aside from the change noted above few alterations were made in either the events or the method of holding them. Two more races were added for boys and girls under thirteen and the two divisions, A and B, were made strictly Public and High school affairs with no overlapping as last year.

Each school board will be asked for a small donation to assist in defraying necessary expenses and adults will be charged 25 cents admission to the grounds.

Officials will again be chosen from among the trustees and the business men of the communities.

The girls of the Kelowna entrance class under the direction of Miss Whitlow, domestic science teacher, served lunch for the visitors.

Delegates: Armstrong, Aldworth, McLeod, Condon, Bell, Vernon, Fulton, Wilson, Baker, Maxwell, Rutland, Bagshaw, Weather, Burton, Summerland, Daniel, Penticton, C. D. Smith, Robson, O'Connell.

WANT VOICE IN MAKING RULES

Representatives of the several locals who met recently in Kelowna agreed to recommend that a delegate from each local be entitled to attend the annual meeting of local managers and that at such meeting each local be allotted one vote to be cast by the delegate and, further, that the findings of such meeting regarding pooling, etc., be submitted to each local for approval or otherwise before being presented to the central board.

ICE HARVEST WAS FAILURE

Not Sufficient Freezing Weather—Some Ice Shipped To Here.

Ice is being brought in in carload lots from Otter Lake, some miles west of Princeton by two or three of our largest users. Summerland has enjoyed many mild and brief winters in its short history, but perhaps never before has there been a winter in which it was not possible to harvest ice of reasonable thickness at such an altitude as the reservoir. For a brief time around Christmas there was some cold weather but of too short duration to form ice of sufficient thickness. Artificial ice will likely be largely used during the coming season.

HOSPITAL DONATIONS FOR TWO MONTHS

The matron of the hospital wishes to acknowledge with thanks the following donations received during January and February.

January.—Miss Sinclair, 1 jar honey, 1 jar marmalade; Miss Morely, 2 1/2 doz. eggs; Ladies Hospital Auxiliary, 28 O.R. towels, 3 yds. flannel, 12 baby shirts and 40 diapers; Mrs. Croil, vegetables; Mrs. Blair, 1 sack potatoes, 16 jars fruit, 1 pie, and magazines.

February.—Mr. Thomas, 1 box apples; Mrs. Hayes, old linen; Mrs. Smith, 1 jar fruit; Ladies Hospital Auxiliary, half dozen cups and saucers; Mrs. Block, 1 cream pitcher; Mrs. Hayes, 2 pints jam; Mrs. Keyes, 2 dozen eggs; Mrs. Klingsell, 3 dozen eggs, 1 ginger bread; Mrs. Johnson, 2 doz. eggs; Miss Spencer, 18 quarts fruit, 2 dozen eggs; Mrs. Armitage, 3 pints jelly, 2 dozen eggs; Women's Institute, 1 cake, lettuce and salad dressing.

FEW APPLES NOW REMAIN IN STORAGE

Twenty Cars Will Move the Stock Hid Here by Co-operative.

Of the big stock of apples wintered in the Summerland storage building, but 20 carloads now remain. Ten thousand boxes are packed ready for loading and 6,000 boxes are yet to be packed.

Yesterday a carload of Newtowns was started rolling for Toronto and on Monday one carload of Newtowns was shipped to North Bay, Ontario, and another to Edmonton. A third carload on that day, made up of Rome Beauty, Gano and Black Twig was started off to Brandon. Last Friday two carloads were shipped to Vancouver; one containing Newtowns and the other Rome and Stayman. A carload of Newtowns, designated for Calgary and another car of mixed apples for Medicine Hat went out the same day. On Wednesday of last week three carloads of straight Newtowns were shipped to Vancouver and on the same day two cars of mixed varieties went out, one for Lethbridge and one for Edmonton.

ASSOCIATED SENDS OUT NEWS LETTER

Bulman and Mutrie Go to Ottawa—Stewart Back to Vernon.

Vernon.—Messrs. Thos. Bulman and J. T. Mutrie left last week for Ottawa to attend the meeting of the Canadian Horticultural Council. Many matters of importance to growers will be dealt with at that meeting including amendments to the Fruit Marks Act and the Root Vegetables Act.

Mr. G. A. Barrat of the Advisory Committee left on Sunday for Yaluma to join Colonel Scott who proceeded south from Creston.

Mr. B. Stewart returned from Creston on Sunday and has resumed his duties as Acting General Manager.

The movement of fruit has been well maintained during the past week, the daily output being: Feb. 25th, 14 cars apples; 20th, 4 cars; 27th, 7 cars, 1 mixed; 28th, 4 cars; 29th, 4 cars, 1 mixed; March 1st, 5 cars.

February Public School Report

Principal MacDonald of the Summerland Public School has furnished The Review with the school report of February as given here.

Division I. Entrance Class. S. A. MacDonald

Those making over 75 per cent.: Cyril Mossop, Lorna Sutherland, Mary Simpson, Edna Trayler, Jack Purves, Dorothy Nield, Jack Dundon, Marjorie King, Jim Purves, Ivy McKay, Mabel Lockwood.

Division II. H. W. Daniel

Grade 7.—Euldo Koch, Mary Haeck, Ellean Tomlin, Mildred Wilson, Ethel Donko, Rosalie James.

Perfect attendance.—John Caldwell, Dorothy Chew, Norah Clements, Orval Cowan, Ethel Donko, Albert Doherty, Mary Fisher, Willie Gartroll, Euldo Koch, Allan McKenzie, Edith Monro, Ethel Nicholson, Gordon Nixon, Frank Atherton, Connie Scoley, Alex Smith, Eric Tait, Ruth Tait, Ellean Tomlin, Fred Walton, Mildred Wilson, Joan Stoven, Arnold Cowan.

Division III. M. H. Harwood

Proficiency. Grade 8.—Edward Smith, Carolyn Clark, Herbert Simpson, Loretta Ingalls.

Grade 7.—Gene Betuzzi, Jean Munn, Laura Smith, Elizabeth Munn.

Perfect attendance.—Violet Beck, Gene Betuzzi, Mary Bleasdale, Margaret Caldwell, Carolyn Clark, Isabel Dickinson, Fred Dundon, Rogelio Eckersley, Dorothy Hunt, Dorothy Lott, Elizabeth Munn, Alastair McGowan, Denis Nield, Percy Rand, Maurice Rippon, Robert Scourrah, Edward Smith, Laura Smith, Jessie Tullett, Mary Betuzzi, Agnes Fisher, John Betuzzi, Loretta Ingalls, Arthur Joy.

Division V. J. Nicholson

Proficiency. Grade 5.—George Mossop, James May, Diana Barnes, Sadie Purves.

Grade 4.—Bobby Nelson, Naomi Kercher, Dick Bonmore, George Gould.

Perfect attendance.—Diana Barnes, Dick Bonmore, Pia Betuzzi, Charlie Bleasdale, Margaret Dundon, Joan Fisher, James May, George Mossop, Lonnie Mountford, Bobby Nelson, Sadie Purves, Stanley Sharp, Richard Smith, Norman Thompson, Harry Walmesley.

Division VI. R. E. Graham

Grade 4, 1st term.—Dorothy Bowring, Kitty Higgin, Harvey Mitchell, Adorno Biagioni.

Grade 4, 2nd term.—Ronald Taylor, Lloyd Gould, Kenneth Walter, Edward Ripplin.

Perfect attendance.—Harry Barkwell, Gordon Buggs, Adorno Biagioni, Gordon Bootho, Dorothy Bowring, Jessie Bushell, Gertrude Clark, James Clark, Alice Dickinson, Norman Dickinson, George Dundon, Jimmy Gartroll, Lloyd Gould, Dean Ingalls, Irone May, Percy McCallum, Bob McCutcheon, Harvey Mitchell, Walter Powell, Margaret Steinbock, Kenneth Walter, Audrey Green.

Division VII. A. Ruth Dale

Proficiency. Grade 3, part 2.—Verna Gale, Margaret Hookham, Mar-

TO LECTURE HERE ON PUBLIC HEALTH

Dr. A. S. Lamb, recently appointed travelling medical health officer for the province by the provincial government, will lecture here on Monday evening next under the auspices of the Women's Institute. This is Dr. Lamb's initial visit to this part of the province in the campaign for better health and it is his purpose to carry on the educational part of the campaign in co-operation with such organizations as the Women's Institute.

VASSEAU LAKE BIRD SANCTUARY

Area Set Aside by Dominion as Preserve for Migratory Birds.

Vasseaux Lake and Okanagan River north of the boundary of the Indian reserve, near Okanagan Falls, together with the land on both sides within one hundred yards of the shore, has been declared a game sanctuary of migratory birds by a Dominion order-in-council. Vasseaux Lake is the home of the only known flock of black swans and is a favorite feeding ground during the winter for ducks, geese, etc. The sloughs at the north end of the lake and the marsh land between it and the falls are favorite feeding grounds for migratory birds and the creation of a sanctuary there, it is believed, will improve the shooting for some distance around.

TO BEAUTIFY SCHOOL GROUNDS

Work on the school grounds is being commenced today, the stone walls being torn down and trees planted. Mr. B. Robinson, teacher of agricultural science and Mr. Mann, of the Experimental Station, are preparing a plan for the carrying out of the work and are supervising the arranging of the grounds.

There is little movement of vegetables at the moment. Potatoes from the Main Line district are practically cleaned up and prices have been on the whole satisfactory to the growers. The wholesale trade in Vancouver has expressed itself as being very pleased with the way in which the Kamloops potato crop has been handled, every car received, ex storage, being in beautiful condition.

MEMBERS TELL ELECTORS OF LEGISLATION

J. W. Jones and W. A. McKenzie are Heard at Naramata.

The Unity Club building was well filled on Tuesday evening, when addresses were given by Mr. J. W. Jones, the local member, and Mr. W. A. McKenzie, M.L.A. for Similkameen. The chair was taken by Mr. A. C. Horswill, president of the local Conservative Association.

The address of Mr. Jones dealt with the legislation of the last session, and included details of the persistent efforts which had resulted in the certain amount of relief which has been secured on land tax, and water rates.

The speaker also traced the history of the P.G.E. Railway from its inception to the present day, and laid stress on the immense discrepancy between the estimated cost and the actual expenditure up to date, with the railway still unfinished. He said that he could not comment on the enquiry now proceeding on that matter, but pointed out that the figures brought forward by the third party had been known to the opposition and had been dealt with by them in the House at every opportunity.

Will Divide Irrigation Rates In Two Payments

MAY ASSEMBLE SOFT FRUIT HERE

It is not improbable that assembling of carlots of cherries and other soft fruits may be resumed here instead of being done at Kelowna and Okanagan Landing. Central has been asked to investigate the advantages and better service which might be secured through assembling at this end of the lake.

Fred Anderson, now residing in Penticton, has been appointed by Ottawa as a special constable under the Migratory Birds Act with powers of a police constable.

WANT SUNDAY BOAT DURING FRUIT SEASON

Sunday boat and train service during the fruit shipping season is being urged upon Superintendent Macnabb and other C.P.R. officials. Such a service was maintained some years ago and proved very valuable, particularly to shippers of soft fruits.

STUDENTS HOLD A LEAP YEAR DANCE

Students of the high school held a most successful Leap Year dance on Friday night in the Parish Hall, a novel feature of which was that all numbers during the first half of the evening were ladies' choice and according to the boys, the girls were quite equal to the occasion. Much is to be said for the tasteful manner in which the students had carried out the scheme of decoration, while the music provided by Miss Jean Moffat, H. Daniel and J. Kean was much appreciated.

MEMBERS TELL ELECTORS OF LEGISLATION

J. W. Jones and W. A. McKenzie are Heard at Naramata.

The Unity Club building was well filled on Tuesday evening, when addresses were given by Mr. J. W. Jones, the local member, and Mr. W. A. McKenzie, M.L.A. for Similkameen. The chair was taken by Mr. A. C. Horswill, president of the local Conservative Association.

The address of Mr. Jones dealt with the legislation of the last session, and included details of the persistent efforts which had resulted in the certain amount of relief which has been secured on land tax, and water rates.

The speaker also traced the history of the P.G.E. Railway from its inception to the present day, and laid stress on the immense discrepancy between the estimated cost and the actual expenditure up to date, with the railway still unfinished. He said that he could not comment on the enquiry now proceeding on that matter, but pointed out that the figures brought forward by the third party had been known to the opposition and had been dealt with by them in the House at every opportunity.

No Increase in Amount to be Paid by the Fruit Grower.

Rates to Fall Due on May First and August First—Taxes November First.

With the desire to make payment of rates and taxes as easy as possible to the fruit grower and with the view at the same time of making collections reach as near the hundred per cent. mark as possible, the municipal council is likely to change the method and time of making collections.

In the past irrigation rates have been due and payable on the first of May. After that date a penalty has been added for non-payment and taxes have been payable the 10th of October. The general water rate, a tax on all properties touched by the domestic water pipe lines, has also been payable on May first. The possibility of making the due dates more convenient to the ratepayer and the imperative need of collecting the rates during the current year have been discussed by the council and were referred to a committee.

This committee has prepared its report and will, at the next regular meeting of the council on Saturday, recommend that the irrigation rate be divided into two payments, two-thirds payable on May 1st and one-third on August 1st and that the general water rate be included with the May first assessment for irrigation rates. It is further proposed that the penalty feature be dispensed with and that the gross rate be increased so as to permit of a discount that will mean the same net cost for irrigation to the growers. A ten per cent. discount will be given on the portion due on May 1st and a twenty per cent. discount on that part due on August 1st.

A further proposal is that the taxes fall due on November first. In this way there will be three months' interval between each date of payment, May 1st, August 1st, and November 1st.

As stated above the grower will not be asked to pay any more for his irrigation water but will have the privilege of paying in two instalments.

While the tax rate has not been struck, it is not expected that there will be any increase in taxes.

HAS HONOR OF OPENING SEASON

"Come on in, the water's fine," was the jovial invitation of the local C.P.R. agent on Tuesday, when he informally opened the bathing season in the Okanagan. Whether the invitation was as sincere as it was informal we are left to surmise, but, in spite of the early season, he seems none the worse for the swim, though we notice he took the precaution to try the first dip while fully clothed. It was while crossing a plank between carlap and barge that he took the initial plunge, but when warned beforehand of the risk he said he didn't care, and we hope he meant it. Maybe he'll walk the plank again!

BOX FACTORY READY SOON

Additional Machinery Being Installed—Lumber Now Arriving.

Another steam engine to provide additional power and more machinery, including a planer, arrived here from Myron Tuesday for the box factory near the K.V.R. station. G. O. Perry, the factory superintendent, was here from Vancouver this week and left again for the Coast, but will be back within the next few days. A dozen carloads or more of lumber have already arrived at the factory and have been stacked to be converted into shooks. It is expected that the mill will start operations about the 20th of this month.

The Summerland Review

Established August, 1908.

Published at Summerland, B.C., every Thursday by THE REVIEW PUBLISHING COMPANY, LIMITED

Ralph E. White, Editor and Manager

An independent family newspaper covering Peachland, Summerland and Naramata and adjacent districts.

Member of Canadian Weekly Newspapers Association. Member of British Columbia Selected Weeklies.

Subscription Rates—In British Empire, in advance, \$2.50 per year; six months, \$1.40. To U.S.A. and other countries, \$3.00 per year.

Advertising Rate Cards and information respecting territory and samples of paper mailed upon request, or may be seen at the office of any advertising agency recognized by the Canadian Press Association.

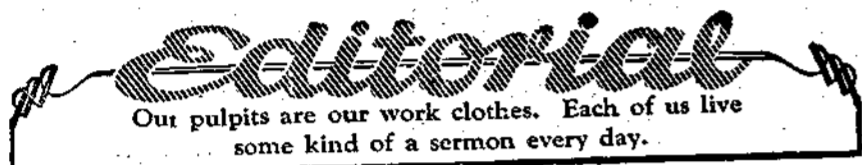

Advertisers must have copy in by Tuesday noon in order to insure changes for standing advertisements. New display advertising copy can be accepted one day later.

All instructions for cancellation or alteration of advertising must be in writing.

Correspondence—Letters addressed to the Editor and intended for publication must be short and legibly written on one side of the paper only. The longer an article, the shorter its chance of insertion. All communications must bear the name of the writer, not necessarily for publication. The publication or rejection of articles is a matter entirely in the discretion of the Editor. No responsibility is assumed by the paper for the opinions expressed by correspondents.

Typographical Errors—In the event of a typographical error, advertising goods at less than the proper price, the newspaper will furnish letters to be posted in the store stating the correct price, but goods may not be sold at the price printed and the difference charged to the newspaper.

Thursday, March 6, 1924

ONLY WAY TO REDUCE TAXES.

More consistence is needed about this tax reduction business. Folks who deplore tax burdens and demand their reduction rarely do anything else to effect it. For they demand all kinds of expenditure, vote this issue of bonds and ask more and more service from every branch of government—national, provincial and municipal—ignoring oftentimes the plain fact that everything secured in this way costs all it is worth and then some, and has to be provided by means of taxation. The only way to reduce tax rates is to spend less money.

THE DRUNKEN AUTO DRIVER.

"Public sentiment favors punishing drunken drivers severely. One drink of any kind of liquor may do as much harm as many drinks. When automobile drivers learn that when they are caught on the highway with even the smell of liquor on their breaths they run a good risk of getting put in jail, then very few persons will be willing to take a drink and drive a car afterwards. "Drunken automobile drivers must be banished from the roads. This is the people's verdict."

THE CHOICE OF FERTILIZERS.

A publication known as Pamphlet No. 41, Fertilizer Samples, has just been issued by the Seed Branch at Ottawa, giving the results of the analysis of 314 samples conducted under the provisions of the Fertilizers Act, 1922, by the official analysts, the samples having been supplied by the District Inspectors appointed under the Act. Of the samples examined, 97 were found to meet the requirements of the guarantee, 64 to meet the guarantee by compensation, 116 were deficient in excess of legal limits, 24 were offered without the guaranteed analysis on the package, label or invoice, and 13 were offered without being registered as legally required. The pamphlet makes it evident that a far too large percentage of the fertilizers proved to be below guarantee. The fact stands out also that most of the fertilizers shown to be below guarantee belong to certain brands that apparently are not mixed with the thoroughness required to insure a reasonably uniform analysis. It is pointed out that a brand that is not reasonably uniform in analysis, even though a number of samples taken from it show the average analysis to come up to the guarantee, must be considered in the eyes of the law as below guarantee. The pamphlet is available on request addressed to the Publications Branch of the Dominion Department of Agriculture.

POULTRY AS AN ASSET.

There should be just twenty-five or thirty thousand dollars worth of poultry and eggs produced here this year. If you are not preparing to keep at least 100 hens you are preparing to miss a fine opportunity to lay in cash enough to meet all the household expenses. Prepare to grow chickens of the egg-producing variety.

DID YOU EVER STOP TO THINK?

By E. R. WAITE, Secretary, Shawnee, Okla., Board of Commerce.

THAT NEWSPAPERS are in the PUBLIC SERVICE? NEWSPAPERS give CONSTRUCTIVE SERVICE at all times? NEWSPAPERS are BUILDERS of BUSINESS, as well as BUILDERS of CITIES? NEWSPAPERS make it possible for merchants to SELL their goods with the same SUCCESS to the same people all the while? NEWSPAPERS make it possible to create a DEMAND for new goods from new customers, as well as from old? NEWSPAPER ADVERTISING is a source of GREAT and PROFITABLE satisfaction to all who use it? NEWSPAPER ADS are busy things? They WORK all the while SPEEDING up SALES and PRESTIGE for the advertisers. GOOD GOODS well advertised sell quickly and satisfy customers. IT IS DECIDEDLY WORTH THE WHILE OF EVERY CITIZEN TO READ THE ADS.

PEACHLAND DOINGS

A Weekly Chronicle Furnished By Our Local Representative.

Your correspondent wishes to apologize to the readers of this column for the absence of news for the past week, and for a few of the items published now being late. Absence from town was the cause.

At a recent meeting of the Peachland Fruit Growers' Union election of the directors for 1924 resulted as follows: Wm. Douglas, president; R. Harrington, vice-president; with E. F. Smith, B. F. Gummow and H. E. Trimble. With the exception of Mr. Gummow this is a new board. They have held their first meeting to attend to important business.

After several months spent in Peachland with Mr. and Mrs. Bulyea, Mr. and Mrs. J. B. Robinson left recently for Summerland. They were accompanied by Mrs. Robinson's sister, Mrs. White, who had also been spending a few weeks at the Bulyea home.

The Rev. C. G. Heath, of Foremost, Alta., superintendent of Free Methodist Church work for parts of B. C., Alberta and Saskatchewan, spent a few days in Peachland holding special services. He was assisted by his wife.

After a pleasant visit in Peachland with her parents, Mr. and Mrs. Hawkes, Mrs. T. McLatchie with her little boy and her sister-in-law, Miss McLatchie, have returned to their home in Saskatchewan.

Miss Mary Vicary was a recent visitor here from Summerland.

C. G. Elliott has returned to Edmonton after visiting his mother here who had been seriously ill. She had recovered somewhat before he left and we are pleased to be able to be able to report further slight improvement.

Major R. G. Hardisty is visiting at the Coast.

Ira Brinson has returned to his work near Pentiction after a short time at home nursing a sore hand.

After spending much of the winter in the east, Mr. and Mrs. Renfrew returned last week to take up the spring activities on their fruit ranch.

A company visited Peachland last week and put on a vaudeville entertainment in the Veterans' Hall.

Mrs. F. Young returned on Tuesday having attended the Grand Lodge of the Lady Orange, held in Vancouver, as representative of the Peachland branch of the L.O.B.A.

The Misses Edna Cudmore, Mary Sadler and Agnes Gyles spent Wednesday in Kelowna.

Mrs. N. S. Davidson returned from Vancouver last week after several months spent in the city. She was accompanied by Mrs. A. Town, who will spend a short time with Mrs. Davidson and other friends and relatives.

Messrs. Brown and Davidson of Vancouver came in last week for the purpose of looking at the Peachland Lumber Company mill up Trepanier Creek, with the thought of a possible purchase. W. Waldriff took them out to show them over the property, but owing to the condition of the snow they were not able to make a thorough cruise of the timber.

H. E. McCall and his mother, Mrs. L. D. McCall, returned last week after a week's absence. Mr. McCall as a delegate from the Peachland Orange Lodge to the provincial Grand Lodge in Vancouver, and Mrs. McCall visiting relatives in Merritt.

Mr. and Mrs. Wm. Oakley and little Miss Dorothy spent a day in Kelowna last week.

Mrs. H. E. McCall recently entertained her Sunday School class of boys at her home.

Miss Osborne, who has been with Miss McDonald for some months, is spending a vacation out of town.

Her church brethren and sisters surprised Mrs. Murrin on Friday evening, the 20th of February, by developing a short business meeting in the basement of the church into a social in her honor to celebrate her birthday, which comes only once in four. A goodly number were present and a very pleasant evening was spent by all. A few suitable speeches were made, Mrs. Murrin replying with a few well chosen remarks and she created quite a guessing contest by telling how many birthdays she had and asking those present to guess her age. But few guessed correctly without a hint, owing to the change the century ending makes in this particular birth date. After some singing and a few games refreshments were served by the ladies.

SUMMERLAND LOSES IN BASKETBALL

Three local basketball teams visited Pentiction on Tuesday night to meet the girls' town team and the intermediate and senior men's teams there, but lost out in all three games, the scores being 14-7, 47-12, and 34-21 respectively. In the series game, Pentiction seniors lost to Summerland in the last match but as the result of Tuesday's game, the former now have a lead of nine points.

Though the play was fairly even in the girls' game, Pentiction had the better combination and again in the intermediate match, they put up a splendid game, Taylor Beatty making a total of 20 points during the game.

The senior game was fast, though much rough checking was in evidence, Summerland having four and Pentiction nine personal fouls. H. Daniel for Summerland played a good

The Rev. T. A. Sadler left by car on Monday morning for Summerland where he took the train to Vancouver to attend a meeting of the Synod.

Gilbert Thorner of Summerland accompanied by some friends, motored up on Sunday afternoon last and assisted at the Baptist church. He taught the bible class in the Sunday School and conducted a preaching service at the close of the school, which was enjoyed and appreciated by all present.

game, though hindered with a lame ankle the last part of the time. Earl Wilson also put up a splendid game.

The low rafters in the building used for a gym was a cause of much hindrance to the visiting team, unaccustomed to the low passes.

Following the games a dance was given in Steward's Hall, and was greatly enjoyed by the visiting teams. An orchestra from Omak provided the music.

STOCKYARD MANURE FOR FREIGHT CHARGES

For the benefit of any of our readers who may wish to bring in stockyard manure we are requested to state that this can be had, laid down at the C.P.R. station here at 18 1/2 cents per hundred pounds or at the K.V.R. station for 19 cents. This includes all charges. The minimum-weight of a carload is 50,000 pounds.

It is advisable that orders be placed at once so that advantage may be taken of thawing weather at Calgary for loading. Orders should be sent to the Alberta Stock Yards Company, Limited, Calgary.

Vancouver men have an anti-rouge club. Motto should be "Cheeks that touch rouge shall never touch ours."

And just as Frequent—Another evil almost as bad is the child labor of grown men.

CANADIAN NATIONAL PRESIDENT TALKS TO WESTERN EMPLOYEES

FOLLOWING up the first successful experiment in remote broadcast from Winnipeg made about ten days ago, Sir Henry W. Thornton, chairman and president of the Canadian National Railway, appears above talking, a few evenings ago, by long distance telephone from his room in the Fort Garry Hotel, Winnipeg, to the company's employees throughout Western Canada via Calgary radio station CFGN. It is Sir Henry's intention, as soon as the company has completed its string of radio stations from coast to coast, to use this medium as often as possible to establish a personal contact with those he terms his "fellow employees" of the Canadian National system.

LAND REGISTRY ACT (Section 160)

IN THE MATTER OF Part 1 acre of Lot 4, Block E, Map 268, Osoyoos Division Yale District.

PROOF having been filed in my Office of the loss of Certificate of title No. 13717a to the above-mentioned lands in the name of Bertha L. Garnett and bearing date the 17th December, 1908, I HEREBY GIVE NOTICE of my intention at the expiration of one calendar month from the first publication hereof to issue to the said Bertha L. Garnett a provisional certificate of title in lieu of such lost certificate. Any person having any information with reference to such lost certificate of title is requested to communicate with the undersigned.

DATED at the Land Registry Office, Kamloops, B. C., this 29th day of January, 1924.

E. S. STOKES, Registrar.

Date of first publication, March 6, 1924.

Top Grafting - Is It Worth While?

PEACHLAND WANTS R. ROBERTSON

Editor Review.

Sir,—A burring of quiet excitement is apparent as to who will be appointed General Manager of the Associated Growers. An intimation was made at the last meeting of the new Central board that representatives should obtain the names of men suitable for the position, and report so that an appointment can be early made.

In accordance with the intimation referred to, the representative of the Peachland-Westbank district brought the subject before the annual meeting of the Peachland local with the result that the members enthusiastically and unanimously agreed upon recommending Mr. R. Robertson, of Vancouver, as the best man to be appointed as General Manager of the Associated Growers.

When Mr. Robertson's name was mentioned to President Howe, that gentleman stated that among the Water Street men of Vancouver Mr. Robertson is first choice, but that, owing to ill health, he is not likely to take the position. The fact is the reverse. Mr. Robertson not only can take the position, but he has telegraphed his readiness to do so should he be approached. And not only that, but he says salary is no consideration with him. His one desire is to see co-operative fruit selling a success, which he is positive it can be.

Mr. Robertson is the man who, at the special request of the British Columbia government, organized the fruit industry of the Okanagan territory on a co-operative basis some years ago. He did it successfully in the face of very strenuous opposition by some who now presume to lead in the co-operative movement. Although a broker, Mr. Robertson is a co-operator,—he possesses the true co-operative spirit, "each for all, and all for each." He is a splendid organizer; he knows the "ins and outs" of the selling end of the fruit business. No man is better known nor more highly respected by "the trade" than is Mr. Robertson,—and he is reliable, which counts for much in these days of high pressure business tactics.

The Associated Growers have tried a man who by his actions opposed the co-operative movement from its inception. Let the Associated Growers now try a man who has been a true friend of co-operation from its commencement.

THOMAS POWELL, Peachland, B. C.

ENGLISHMAN REPLIES TO COUNTRYMAN

Atascadero, Calif.

Editor Review.

Dear Sir: Whilst here in California I have been interested to read letters in your paper referring to this part of the globe amongst other things. California has a beauty all its own but I have never seen scenery to equal that of British Columbia in a fair amount of travel. Given general prosperity and better roads it is the best country I ever lived in. I take exception to the following in your February 14 issue, by J. J. Atherton. "The hustle and go get 'em spirit is so foreign and infraction to a certain class of immigrants from the Motherland that their apathy and listlessness in matters requiring aggression has now become infectious to the average Canuck." I have lived in Canada all of my grown up life and do not wish to disparage Canadians, but when they excuse their own shortcomings under the plea of the influence of "a Motherland class" it does not do them credit. In British Columbia today poverty amongst the rural people and possibly in sections of the cities is a very real thing. Few people will deny that much of the poverty is due to mismanagement of our governments, manned largely by born Canadians.

Away down in the South Seas about as far away from the world's markets as it is possible to get and with about one hundredth part of the natural resources of B. C., two islands filled with the descendants of apathetic English, Scotch and Irish and others fresh from the homeland—the same sort that have immigrated to B. C. New Zealand has a larger population than B. C. and is

spoken of as a prosperous country where poverty is unknown. They say Canadians are not numerous there. Will Mr. Atherton tell me why those people with their handicap of distance and inferior natural resources are in a better position today than British Columbians? He may dispute this statement but it is generally accepted. Also why have not the poor native born down there been spoiled by the contamination with the immigrant? Are they made of better stuff?

In all good will, I say Mr. Atherton can look around him and find many apathetic native Canadians who never were otherwise. If there is anything wrong with Canada it is the fault of Canadians. He struck the right line of thought when he remarked that about one dozen people in Canada have most of the wealth of that country. Several million native born Canadians were asleep while these fellows "put it over" them. In New Zealand they profited by the experience of the Motherland and prevented that from happening.

Now when any number of born British Columbians or Canadians wake up to the fact that their boasted inheritance of tremendous natural resources is not theirs at all but has been alienated from them through a cunning financial system and is now the property of a dozen or so Canadians or of American capital. I will join them in a determined effort to "go get 'em" back by a system less cunning and more righteous than their own. "Go getters" of this type will not say "The matter is too 'complex.'" It can be solved and will be solved when men are determined to get together about it and not be scared off by a press which scandalizes every such effort, and is the mouthpiece of the dozen referred to above.

When we get our land back let us own our insurance companies, banks, industries, etc. It does not involve communism. Someone will say "confiscation." Of him I ask, "What is it when a system takes away a farmer's crop and hands him nothing or red ink?"

"The Vancouver World" February 16th boasted 47 per cent. of home owners as against Los Angeles 34.7 per cent., San Francisco 27.7 per cent., Boston 15.5 per cent., and New York 12.7 per cent. Comparatively it looks good. But the lesson is in the very small number of home owners even in Vancouver. Consider that a man with a \$4,000 home of which he has paid \$1,000 and is paying \$240 interest a year (a fair rental) on the balance, is called a home owner, and that possibly the larger part of the quoted percentages is in that position and many will never pay up. How many orchard owners have we in Summerland in this unfortunate position?

The discontinuance of immigration after the campaign of 1902-3-4 will find its reason more in the treatment of immigrants like that narrated by Autolyous of two Barnardo boys hired out to Ontario farmers, who were driven to suicide and also to disappointing results after years of thoughtful labor in other instances. Better results would have caused a stampede to Canada without further advertising. I spent a year and a half as a farmer's helper. Like the narrator of the story in the "World" given three quarter page, apparently to offset the influence of the Bulpit incident, I was pretty "green." However, my employer got ten hours plowing in a day from me, plus most of the chores for forty pigs, seven sheep, five horses, twenty head of cattle and permitted me to return all the help supplied by the neighboring farmers in threshing time. No fishing trips and seven days a week (mostly fourteen hours) work for ridiculous pay, which I had to threaten suit to obtain. I knew of many other cases much worse than mine.

I regret that I cannot take a humorous view of English youths serving Ontario farmers, filled with a sort of anglophobia. I would urge the discontinuance of sending them to that part of Canada.

Mr. Atherton, join hands with an apathetic naturalized Canadian in a community effort which will embrace all British Columbians to make it a place worth while advertising.

A. J. BERR.

Easy, Son, Easy

A youth who became much interested in boxing while in service, took his father to a boxing show the other night, the son willingly paying the admission.

"Now," said the son when they were well seated, "you're going to see more action for \$2 than you ever saw in all your life."

"I don't know, son," said the father. "82 was all I paid for my marriage license."

By R. C. Palmer, Experimental Station, Summerland, B.C.

The question of top-grafting is occupying the attention of a large number of growers this spring. There is a growing opinion that a determined effort should be made to eliminate the scattering of odd varieties which exist in so many of our orchards. There is even a feeling in the minds of some progressive growers that it might pay them to graft over large numbers of trees of such varieties as Jonathan which have not brought in profitable returns in the last few years. The actual process of grafting is relatively simple, but before ever a grower makes up his wax he should give close study to the economics of the problem. Otherwise he may find in several years that his action has not increased his bank account to the extent he had expected.

To be commercially profitable top-grafting must produce a tree which is larger, more vigorous, and more fruitful than a young tree planted at the time the grafting was done. It is possible to graft peaches, apricots, plums, and cherries with a fair measure of success, but experience has proved that in the long run it is usually more profitable to plant a new tree.

The success of grafting depends primarily on the establishment of a satisfactory union between the stock or tree which is being worked over and the cion or branch of the new variety to which it is desired to convert the upper branches of the tree. These two must be congenial. There is some difference of opinion as to just how much influence the cion has on the stock, but it is common knowledge that the stock exerts a very definite influence on the growth and vigor of the cion. In fact the stock exerts a controlling influence over the vigor of the resulting tree. Through this effect on vigor the stock also determines to a large degree the hardiness and productivity of a top-grafted tree.

It is apparent therefore that only strong, vigorous, hardy trees should be top-worked. Top-grafting should never be practised on winter injured, or devitalized trees. Many growers seem to have the idea that by top-grafting it is possible to convert a weak-growing tree into a heavy producer of high class fruit. Nothing could be farther from the truth. This is particularly the case with such varieties as the Jonathan which is in many locations a tender, small-growing tree of weak constitution. Any grower who has a number of devitalized Jonathans would be well advised to prune them with a logging chain, especially if they are planted as fillers. Where Jonathans are planted as standards and are making vigorous growth it will probably pay to leave them in.

In the case of strong growing trees of non-commercial varieties top-grafting may be a profitable investment, especially if these trees are scattered through a mature orchard. Young trees planted in an old orchard seldom have a fair chance. The best varieties to use for cions will depend somewhat on the district and on the varieties already growing in the orchard. Delicious and Rome Beauty appear, at the present time, to be

the varieties likely to give the best results.

In general, strong growing varieties such as the Delicious should be grafted on strong growing stocks. A smaller growing variety such as the Rome Beauty may be grafted on a slightly less robust stock, but under no circumstances should any variety be grafted on a stock which is not in the best of condition.

SPRAY APPARATUS FOR LEAF ROLLER

First Essential is Power Outfit to Maintain a Pressure of at Least 250 Pounds.

Mr. W. S. Regan, in bulletin No. 154, on "The Fruit-Tree Leaf Roller in the Bitter Root Valley," makes the following remarks about spray apparatus in spraying for leaf roller:—

"One of the first essentials for satisfactory work against the leaf roller is a power outfit which can be depended upon to maintain a pressure of at least 250 pounds. We have found 275 to 300 pounds most satisfactory as an all-around working pressure, and this can be attained without difficulty with any of the better grades of power outfits on the market. Working with high pressure insures greater efficiency and economy of both spray material and time. Low-powered outfits, on the other hand, do less effective work, require longer to make applications, and are quite certain to be more wasteful of spray material."

Some growers prefer to use the spray pole and nozzles giving a mist spray, especially from the stand-point of economy of material. Our experience with both types of apparatus, however, greatly favor the spray gun, which is decidedly easier to manipulate, fully as economical of material as spray pole and nozzles of equal capacity, more efficient from the stand-point of results for the application of oil sprays and, on the whole, permits more rapidity of application. The spray gun, however, can not be used effectively on low-power outfits. Furthermore, spray guns, like spray nozzles, vary greatly, so that the selection of the best type of gun for the work involved is of considerable importance. For the oil spray, which has to be applied to individual branches and twigs as well as to the trunk, and in the early spring when there is considerable wind, a spray gun which can be regulated from a mist to a narrow, driving stream with a long range, is especially advantageous. The Bean and Master Pilot guns are of this type and have been most satisfactory for the application of miscible oils. The Hardy, Warlo, and Friend guns proved satisfactory for this purpose, but these were in no way superior to the Master Pilot gun, which gave a broad mist as well as a long-range narrow stream.

As previously stated, it is our experience that application of the oil with the spray gun and driving stream under high pressure results in greater penetration and efficiency in killing the leaf roller eggs than where the spray applied as a fine mist, as would be the case when spray pole and nozzles are used. While this is true, however, there

appears to be no reason, so far as effective results are concerned, why the pole and nozzles should not be used for foliage applications of arsenate of lead, and so forth. In such spraying to kill the leaf roller caterpillars, the strength of the arsenical, timeliness of application and thoroughness are the most important considerations. The method of application is of less concern, whether it be by spray gun or pole and nozzles. Our preference strongly favors the spray gun for foliage applications also.

Far too little attention is paid to the disc of the gun or nozzle. Under strong pressure discs wear out rapidly, so that if they are not replaced from time to time the holes soon become so enlarged that reduced efficiency and waste of spray material result. For applications of oils a disc with a hole of 1-16 of an inch in diameter should be used. On the other hand, for foliage applications of arsenate of lead, and so forth, a disc with a 1-16 inch hole is about the smallest size that can be used effectively and larger sizes will often be found to give better results. Much better satisfaction will attend the work where guns of similar type and capacity are used for each line of hose. In this way the pressure is equalized and more uniformity of application results."

I BELIEVE—

I believe in myself, and in my power to do big things and win success. I believe in my friends, my neighbors, and my business associates.

I believe in the organization of which I am a member, and in the principles for which it stands.

I believe in the innate honesty of man, and in the virtue of woman.

I believe in my town, province and country and in the universality of the duty of good clean citizenship.

I believe in the stabilizing and developing of power of hard work, in the creative power of wholesome play, and in the glorifying power of love.

I believe in the beauty of service and sacrifice, and in the principle that the highest success crowns the efforts of him who serves best.

I believe that my greatest privilege is to be true to myself, my fellowmen, my country and my God

I BELIEVE!

FIVE THOUSAND FACTS ABOUT CANADA

The public will welcome the new issue of "5000 Facts About Canada" for 1924—that remarkable cyclopedia of the Dominion compiled by Frank Yeigh, of Toronto, the well-known Canadian writer and lecturer. Over fifty chapters deal tersely with every phase of our national prosperity and progress, and is not only a mine of valuable information, but a stirring story of our development. This issue includes much new matter, and contains many other improvements. We are not surprised that this booklet has a continent, empire and world-wide circulation, nor that it is widely used by governments, railways, and financial and industrial houses. Copies may be had at 30 cents each from the Canadian Facts Publishing Company, 588 Huron St., Toronto, or from leading news dealers.

SYNOPSIS OF LAND ACT AMENDMENTS

PRE-EMPTIONS

Vacant, unreserved, surveyed Crown lands may be pre-empted by British subjects over 18 years of age, and by aliens on declaring intention to become British subjects, conditional upon residence, occupation, and improvement for agricultural purposes.

Full information concerning regulations regarding pre-emption is given in Bulletin No. 1, Land Series, "How to Pre-empt Land," copies of which can be obtained free of charge by addressing the Department of Lands, Victoria, B.C., or to any Government Agent.

Records will be granted covering only land suitable for agricultural purposes, and which is not timberland, i.e., carrying over 5,000 board feet per acre west of the Coast Range and 8,000 feet per acre east of that Range.

Applications for pre-emption are to be addressed to the Land Commissioner of the Land Recording Division, in which the land applied for is situated, and are made on printed forms, copies of which can be obtained from the Land Commissioner.

Pre-emption must be completed for five years and improvements made to value of \$10 per acre, including clearing and cultivating at least five acres, before a Crown Grant can be received.

For more detailed information see the Bulletin "How to Pre-empt Land."

PURCHASE

Applications are received for purchase of vacant and unreserved Crown lands, not being timberland, for agricultural purposes, at minimum price of first-class (arable) land is \$5 per acre, and second-class (grazing) land \$2.50 per acre. Further information regarding purchase or lease of Crown lands is given in Bulletin No. 10, Land Series, "Purchase and Lease of Crown Lands."

Mill, factory, or industrial sites on timber land, not exceeding 40 acres, may be purchased or leased, the conditions including payment of stumpage.

HOMESTEAD LEASES

Unsurveyed areas, not exceeding 20 acres, may be leased as homestead, conditional upon a dwelling being erected in the first year, title being obtainable after residence and improvement conditions are fulfilled and land has been surveyed.

LEASES

For grazing and industrial purposes areas not exceeding 640 acres may be leased by one person or a company.

GRAZING

Under the Grazing Act the Province is divided into grazing districts and the range administered under a Grazing Commissioner. Annual grazing permits are issued based on numbers ranged, priority being given to established owners. Stock-owners may form associations for range management. Free, or partially free permits are available for settlers, campers and travellers, up to ten head.

THE PEDLAR'S PACK

By AUTOLYCUS

Whenever a problem arises which our duly appointed legislators are unwilling to handle direct, they fly naturally to the expedient of shoudering their responsibility on to INDUSTRY. A "Commission" composed of gentlemen retained on a liberal scale of remuneration, with corresponding allowances for expenses, and instructions to "probe" into details already known, and submit a "report." This method is held to absolve the government from blame in the making of a decision, and is highly satisfactory to the administration and presumably to the members of the Commission also. It is an admirable system, and reminds one of Mr. Spenlow's habit of referring undesirable queries to his non-resident partner, the inexorable Jorkins. But the custom is spreading so fast that presently there will be as many Commissioners as there are problems to solve, and the dear public will suffer further depletion of the pocketbook. It will be very interesting to learn the cost of the pulpwood commission, and to reflect on the legislature's inability to decide for itself as to the wisdom of handling of our natural resources on our own ground instead of exporting them in their raw state. Then we may amuse ourselves by reflecting on the commission which was appointed to "probe" and check undue expenditure in civil service, and which in a year or two established itself as an extra branch of the service, and trebled its own annual salary list! Looking abroad we see, five years after the armistice, a commission to find out what reparations Germany can pay, and note that it has "discovered" what most people knew long ago. It needed no commission to tell us that Germany has been building up a vast industrial structure with paper money which she sold to outside speculators for hard cash; that she has practically no internal debt, and that her people are paying less in taxes than either Britain, France or America. But a commission is the proper thing in all such matters and cannot be dispensed with. "Great is the power of habit."

The "Province" story of a "Life and Death Battle" between lumberjacks and timber wolves near North Bay, happened to appear within a day or two of Stewart E. White's concluding article on "Dangerous Game" in the S.E.P. and the story and the article afford a delicious study in contradictions. The North Bay yarn carries within itself such palpable absurdities that it is somewhat surprising how it managed to get through — especially as a front page story. The pitched battle between seven men and seven wolves, each of which observed the strictest rules of duelling by selecting his own man, is very funny, but the chivalry of the "gaunt, half-famished leader" in giving "Big Dan" time to unstrap his snowshoes and smite his assailant a stunning blow, cannot be too greatly admired. It is a little difficult to understand why the sturdy lumberjacks forgot that they carried hammers and "keen-edged knives," and waged war with snowshoes and branches of trees which their assailants allowed them to tear down, after the fashion of John Ridd, but maybe they felt that the forbearance of their sportsmanlike foes called for some consideration. The entire conflict seems to have been carried on under Queensberry rules, and ought to go down in history as a remarkable exhibition. It is not often one comes across such an episode—even on paper!

One feels a sort of regret when leaving so spirited a story and turning to Mr. White's disillusioning remarks on the ways of the timber wolves of this continent. This big game authority casts scorn and derision on the generally accepted notion of the much maligned animal's savagery, and makes the uncompromising statement that he has never been able to secure a single authenticated instance of wolves attacking a human being! That they will follow a traveller, he allows, but attributes this habit to a sort of Menwerlike hope of something turning up. The man who is "trood" by wolves is the victim of careless fear according to this experienced hunter, and probably he is right. All the same, it is too bad to have such lurid narratives as the North Bay thriller so coldly discounted: I suppose next we shall have to give up our Little Red Riding Hood classic!

The washing of dirty linen is assuming such proportions that those

"A Snapper Up of Unconsidered Trifles."

The Winter's Tale, Scene II, Act IV

engaged in it will soon have to work overtime. Across the line we see oil scandals, liberty bond scandals, railway land WASH. scandals, all following on each other's heels with bewildering rapidity, and all calling for separate wash days. Within our own borders we are confronted with the scandal of Federal extravagance, the threat of a scandal concerning tax collections, a hint of another in the matter of civil service administration under the late Ontario government, the Home Bank outrage, and in this fair province that hardy perennial known to men as the P.G.E. nightmare. Each and all of these matters involve various departments of the political system by which we are governed, and in every case it is public money which is involved. It looks as though this stupendous family wash will call for something more than ordinary soap to get good results. Lux, Rinsol, Fels Naphtha, and every other cleanser known to man will be needed, and even then we may still exclaim, with Lady Macbeth, "Out, damned spot! out, I say! What! will these hands ne'er be clean?"

The psychological problem raised by this avalanche of scandals may possibly be very interesting to students of mental processes. To plain John Smith, who pays the piper, it looks as though his affairs are being handled by bodies of men which are cursed with an abnormal percentage of thieves. He has become more or less hardened to the fact that there is always a certain amount of extravagance in administration: if he now has to conclude that much of this is due to a widespread mishandling of the money he has to pay for that administration, he is likely to feel that some drastic improvement is in order. Incompetence may be tolerated up to certain limits, but sheer robbery is quite another matter.

Looking at the situation from a detached point of view we are struck with the melancholy fact that the new world shows no improvement on the old in these matters. Novelists and short story writers have for many years found a happy hunting ground for material in the commonly accepted peculations of mushroom rulers of certain South American States, and never tire of telling us thrilling stories of comic opera revolutions, and their accompanying appropriations of treasury funds, but it may very pertinently be asked how much the greater countries have progressed from such conditions. The great republic to the south began life with a clean slate and a forcibly expressed determination to create a new world, where all men would be free and equal, where unjust taxation would be done away with, and truth and equity would shine forth as the sun at noonday. Today, after a century and a half of development, we see the best elements of American opinion frankly disgusted and ashamed, and expressing themselves to that effect in the reputable sections of their press. It has even been found necessary to invent a new title for the chicanery and fraud which is woven into the public economy of the country, and the arboreal term "graft" has been prostituted to mean political corruption. That Canada has to a great extent followed along similar lines might perhaps have been expected, but is certainly not a matter for satisfaction.

There are 147 peaks over 10,000 feet high in the Canadian Rockies, nearly all of them possessing glaciers.

Value of Miscible Oil and Oil Emulsion Sprays

By H. H. EVANS, Asst. District Horticulturist, Vernon.

Owing to the serious nature of the spread of fruit tree Leaf Roller (Cacoecia Argyrospila) throughout the Okanagan, and the persistence of Oyster Shell Scale (Lepidosaphes Ulmi-Linn) in the northern portions of the Valley, coupled with the fact that our regular contact and poison sprays were not giving the maximum results in control of these pests, resulted in the Horticultural Branch of the Department of Agriculture instituting a series of experiments with oil sprays in an endeavor to find if possible more efficient means of control.

At the request of a number of growers for some published information on the results so far obtained in our experiments, and on the advice of the Provincial horticulturists, we submit a brief and preliminary report of progress made.

It is desirable at present that growers do not attempt to draw definite deductions from this report as the experiments are not yet concluded and have been conducted only two seasons on Oyster Shell Scale and one year on Leaf Roller.

The object of presenting this report to the growers at such a time, is with the hope it may be of some small assistance in acting as a guide to the grower when planning his spraying needs for early spring, and with the realization that strong measure will need to be applied by many orchardists in combatting one or both of the pests mentioned.

Oyster Shell Scale Control.

The first use of oil sprays for pest control in the Okanagan was instituted by the Dominion Entomological Branch in 1921, a small experiment being conducted with a fuel oil emulsion for the control of the above pest. In the spring of 1922 the Horticultural Branch of the Department of Agriculture extended this work considerably; two blocks of 25 to 30 year old trees being selected and submitted to the following treatments.

Plot 1—"Dormoil" Miscible Oil was applied April 21st at a 10 per cent dilution, being ten gallons of oil to 90 gallons of water; where perfect cover had been obtained with the oil, results were 100 per cent. control.

Plot 2—Fuel Oil, Whale Oil Soap formula being, 10 gallons fuel oil, and 10 pounds whale oil soap to 90 gallons of water. Results obtained were 87 per cent. control.

1923 Dormoil Applications for Oyster Shell Scale.

The experiment was conducted to ascertain the minimum degree of dilution possible to use to obtain maximum efficiency of control with a minimum of cost. Age of trees, 25 to 30 years. Approximate amount of spray used per tree, 8 gallons.

Plot 1—Applied in April. Dormoil dilution 1 to 11½ gallons or 8 gallons of oil to 92 gallons of water. Control 98 per cent.

Dormoil dilution 1 to 15 gallons or 6 gallons of oil to 90 gallons of water. Control 75 per cent.

Cost of Dilute Sprays per Gallon.

Dormoil 1 to 9 dilution 7 cents gal.
Dormoil 1 to 11½ dilution 5.6c per gal.
Dormoil 1 to 15 dilution 4.5c per gal.

Fuel oil, whale oil soap, 1 gallon oil, 10 pounds soap, 90 gallons water 3 cents per gallon.

On account of the high volatility of fuel oil only one test was made, as all authorities conducting work with oil sprays maintain that oils with high volatility are undesirable as this feature tends to lessen the period of the oil's killing activities, with a possible tendency to injure the tree by a more rapid and deeper penetration of the oil into the tissue.

No injury has become apparent on these experimental plots from the use of oil so far, but the trees do show a much more vigorous growth both in leaf and wood development as compared with the check or unsprayed trees.

On the unsprayed check trees there was a heavy infestation of young scale; on examination of 50 old scales after the hatching period, it was observed only a slight natural mortality had occurred.

The Fruit Tree Leaf Roller Experiments.

In the spring of 1923 working in conjunction with E. P. Venables of the Dominion Entomological Branch at Vernon, some observations and checks were made on the results of Dormoil applications as against arsenate of lead for the control of this serious orchard pest. All the work entailed in making counts, checking and tabulating results was under the supervision of Mr. Venables and has been detailed by him in a separate report to his chief. In a brief manner the most salient points

of results as shown in Mr. Venables' reports are here presented.

Dormoil Miscible Oil: Plot 1—Rainbow Ranch, Okanagan Centre.

Dormoil 1-11½ dilution applied in April. Results: entirely unhatched egg masses, 76 per cent; partly hatched egg masses, 14 per cent; fully hatched egg masses, 10 per cent.

In this experiment 100 egg masses were checked. Check trees in this plot showed the following results, 90 egg masses checked:

Results: entirely unhatched egg masses, 2.23 per cent; partly hatched, 14.44 per cent; fully hatched, 83.33 per cent.

Plot 2—Orchard of B. Palfrey, Vernon, B.C.

Dormoil 1-11½ dilution applied in April, 85 egg masses checked.

Results: entirely unhatched egg masses, 56.5 per cent; partly hatched, 13 per cent; fully hatched, 30.5 per cent.

Check trees in this plot showed the following results, 100 egg masses being checked.

Results: entirely unhatched egg masses, 2 per cent; partly hatched, 24 per cent; fully hatched 74 per cent.

Observations of subsequent foliage injury in plots 1 and 2 revealed a much greater degree of injury on plot 1 in spite of the fact that the percentage of actual control by count with the same dilution of oil was obtained. The only argument which can be advanced to account for this variation is that, from causes not ascertained the larval mortality was heavier in plot 2 than in plot 1.

Comparative counts of fruit at picking time on plot 2 and check trees gave the following results:

Sprayed trees 2,120 apples counted, 8.4 per cent. injury; unsprayed trees 1,094 apples counted, 38.3 per cent. injury.

Laboratory tests with dormoil 1-11½ dilution on Leaf Roller egg masses, gave a 95 per cent. egg kill as against the 76 per cent. and 56.5 per cent. respectively under field conditions, indicating a wide variation of results under laboratory and field conditions.

Arsenate of Lead Applications for Fruit Tree Leaf Roller Control.

This experiment was conducted at the Rainbow Ranch, Okanagan Centre, with varying strengths of arsenate of lead; namely, 4 lbs.-160 gallons; 8 lbs.-160 gallons; and 12 lbs.-160 gallons; for comparative results of poison spray applications as against oil sprays. One application of these strengths was made and was put on in the early pink stage of the apple.

Plot 1—Arsenate of lead dilution 4 lbs. to 160 gallons. Injury to fruit at picking time 24.2 per cent. by count.

Plot 2—Arsenate of lead dilution 12 lbs. to 160 gallons. Injury to fruit at picking time 21 per cent. by count.

Plot 3—Arsenate of lead dilution 8 lbs. to 160 gallons. Injury to fruit at picking time 19.9 per cent. by count.

It was observed at late midsummer that plot 1 had suffered serious defoliation and secondary growth was occurring on a large percentage of fruit spurs. On plots 2 and 3 neither defoliation nor secondary growth was nearly as serious. It is anticipated that the bad effect noted on plot 1 will mean a serious depletion of strong fruiting spurs and subsequent decline of the 1924 crop. This feature will be checked up during the coming spring and if such proves correct, will substantiate our views of the serious cumulative effects of fruit tree Leaf Roller injury.

Owing to the extremely high cost to the orchardist laid down in the Okanagan of Dormoil in 1923 and no prospect of much reduction in this material for the coming season, the Department of Agriculture realizes the present necessity of endeavoring to find, if possible, a material giving the possible maximum efficiency with the absolute minimum cost. For the season 1924 it is assured that more extensive experiments will be conducted in the control of this pest with different brands of miscible oils and with various home made formulae using as a base some of the most adaptable lubricating oils.

The sincere thanks of the officials interested in the carrying on of this work are extended to Mr. J. Goldie of the Rainbow ranch, Okanagan Centre, and Mr. B. Palfrey of Vernon, for their hearty co-operation and interested assistance so freely given to the carrying out of these experiments on a commercial scale. Such co-operation and assistance freely given by our orchardists to all phases of experimental work, is a means whereby results of economic importance on a commercial scale are pos-

Local Happenings

W. C. Kelley left today at noon for Princeton on legal business.

Mr. and Mrs. Fred Anderson were up from Penticton on Tuesday visiting relatives.

Andy Ritchie came down the lake on Friday night's boat and is visiting friends here.

C. P. R. repair crew with pile driver have been busy for some days fixing up the approach to the carship here.

Walters, Limited, have been packing apples this week and will soon have the last of their stored apples shipped.

Coun. O. G. Smith has bought the Lawler orchard south of the Coulter White property. The sale was made by G. Y. L. Crossley.

Mr. and Mrs. Harry Mellie have moved in from Myren, and are taking up residence in the Gayton cottage opposite St. Andrew's church.

Geo. C. Benmore left on Monday's train for Vancouver to meet his brother from Liverpool, who is in the Coast metropolis on a business trip.

M. G. Wilson returned on Saturday from Creston and Nelson. On his way back he spent a day at Carmi, where he contracted for a supply of logs for the Chute Lake Box mill.

A. Davidson, a former Summerland resident, accompanied by a friend, S. Brown, came in from the Coast last week. It is reported that Mr. Davidson is likely to again take up residence here.

Miss Kathleen Brown, came down on Monday night from Vernon, where she has been teaching, the schools in that city having been closed for a couple of weeks because of an epidemic of measles.

Basil Stuart spent last week end here on his way back to Vernon from Creston, where he had been interviewing representatives of the Creston Fruit Union. He went up to Vernon with M. G. Wilson on Sunday afternoon.

G. I. Gray returned last Thursday from Vancouver where he had been on a brief business visit. He was accompanied by his son, Sidney, who had been down at the Coast for some time. Sidney expects to remain here for the summer months.

J. Dunsdon is confined to his home suffering from concussion of the brain, the result of a recent accident in the woods. Mr. Dunsdon fell off a log and struck his head behind the car against another log. It will be necessary that he remain quiet for several weeks.

Miss Grace Logie is visiting her sister, Mrs. Marmont, near New Orleans. Mr. Marmont is with the Grant-Smith Company and is engineer in charge of a big reclamation project. Since going south Mrs. Marmont has suffered an attack of partial paralysis and her sister, who was teaching at Fernie, went down to be with her.

Mr. and Mrs. Ira Clark and family are returning to Penticton. Since coming here they have been on the Campbell ranch in Garnett Valley, which Mr. Clark obtained in an exchange deal with Mr. Campbell for Penticton property. For some time Mrs. Clark has been in bad health and thinking that the lower elevation might benefit her, they are going back to their former home in Penticton.

Summerland Farmers' Institute is holding a general meeting on Thursday next in St. Andrew's Hall when two interesting addresses will be heard. H. H. Evans, district horticulturist, will give a talk on "Insect Pests and Spraying," while Jns. Shephard, director of the B.C.F.G.A., will give a report of the recent convention to which he was a delegate. Announcement of this meeting is made in another column.

SUMMERLAND WEATHER REPORT. Below is a report furnished by the Dominion Experimental Station here for the week ending Tuesday:

Mrs. J. Lawler went down to the Coast on Monday's train.

C. Lampert, a recent visitor to Trout Creek Point, left on Tuesday to return to Foam Lake, Sask.

P. G. Dodwell returned on Tuesday from Vancouver, where he went to play in badminton tournaments.

Mrs. G. K. Devitt and children left on Wednesday to join Mr. Devitt at Barnston Island, near Coquitlam.

C. F. Williamson, inspector of weights and measures, has been here this week on one of his regular inspection tours.

Miss Marjorie Moffat, who has been visiting her parents here for a short time, returned last week-end to Kelowna.

Ernie Steers will be leaving on the 15th for the Yukon, to resume his position at the Guggenheim mining interests at Dawson city.

A merry party of friends made a surprise call on Mr. and Mrs. W. White at the English home on Monday evening and passed a jolly time in music and dancing.

Miss Merle Smith came in on Friday from Sidewash, Sask., where she has been teaching since last fall, and has taken up her new duties on the staff of the public school here.

Mrs. Pardee has bought through W. C. Kelley a lot near the Baptist church west of the home of the Misses Campbell and purposes moving her house, in sections, from Mineola.

A. M. Leslie received word of the death last night of his father, Rev. Alexander Leslie, of Chesley, Ont., where he was living retired after forty years' service in the Presbyterian church.

J. W. Jones, M.L.A., came down from Kelowna on Monday. He spent Tuesday in Naramata and Wednesday and Thursday here. Tomorrow he will speak in the Similkameen electoral district with W. A. McKenzie, M.L.A.

W. C. Kelley attended County Court on Tuesday where he acted for the Minister of Customs in an action against F. T. Abbott of the Penticton Steam Laundry, who was fined fifty dollars and costs for failing to make his income tax return.

While proceeding to Peachland on the lakeshore road today in his Gray-Dort, Dr. R. C. Lipsett, in swerving around one of the corners, hit a soft portion of the road, which precipitated the right rear end over the embankment, completely smashing the wheel.

Through an unfortunate accident while playing at the school grounds on Wednesday, Reggie Eckorsley, young son of Mr. and Mrs. R. A. Eckorsley sustained a broken collar bone. He was taken to the hospital where medical aid was given, and is getting along nicely.

Mrs. A. H. Barker and her sister, Miss Pollock, left here on Wednesday to visit their brother at Union Bay, V.I. Later Mrs. Barker will return to her home at Terrace, B.C., and Miss Pollock will visit another brother at Duncan before coming back to Summerland.

While riding his bicycle about the school grounds today Allan McKenzie, a student in H. Danlo's room, in some way fell off and struck his elbow, sustaining a broken bone in his arm near the elbow. He was taken to the hospital where the wound was dressed and the lad taken to his home.

While playing with his little brother, Edgar, this morning near the creek that runs past A. B. Elliott's store, little Lyall Brock, three-year old son of Guy Brock, fell in and was swirled around for some time by the rushing waters. Little Edgar went to his brother's assistance and, in spite of the rushing water, landed him safely.

Fred Gartrell, who was severely kicked on the foot by a vicious colt, called Satan, is now able to hobble around. The accident occurred while shoeing the vicious creature, which on a previous occasion had to be thrown before it could be shod. The animal roared up on his hind legs in an endeavor to attack Mr. Gartrell, who threw himself to one side thus averting more serious injury. Alfred Carruthers, accompanied by Harold Cockton, returned from Victoria last week where they have been all winter.

Capt. H. H. Creese and Mrs. Creese went down to the Coast last week.

John McLean returned this week to his ranch here, after spending the winter in Penticton.

Mr. and Mrs. G. N. Gartrell left on Saturday for Vancouver, expecting to be away about a week. Mr. Gartrell has gone to the Coast on business in connection with his work as fisheries inspector.

Mr. and Mrs. A. C. Turner, who have been at the Coast for some time visiting Mrs. Turner's sister, are expected to return this week.

FAVOR CHEAPER CHERRY PACKAGE

The fourteen-pound lug, commonly referred to as the "suit-case," was recommended at the recent meeting at Kelowna of shipping house representatives instead of the four-basket crate, wherever possible as a means toward reducing the high packing cost of cherries.

For soft sour cherries the twenty-four pint cherry crate will be used as this fruit will not stand up in larger bulk.

BRINGS JONATHAN GROWN IN 1922

There has been lying on the editor's desk for several days a Jonathan apple, grown in the season of 1922 on the J. M. Myers' orchard at Naramata. Mr. Myers, who brought the apple in last week, states that it was kept in the ordinary way in his cellar all through last season until a few months ago when, still in its paper wrapper of the common kind, it was placed on a shelf. The apple, slightly shrunken and with a few small brown spots on the skin, is still in a good state of preservation.

PUBLIC LIBRARY MEETING FRIDAY

The committee recently appointed at a meeting of interested citizens to make investigations concerning the possibility of opening a public library here, is calling a meeting of the library association and all others interested on Friday of next week, when they will submit their report and lay their plans before the meeting.

It has been decided to ask for contributions of books, which may be left at either of the drug stores, and to have them kept, for the time being, in the rooms above the West Summerland drug store, which may also be used as a reading room. A librarian will be engaged to take charge during the afternoons two days each week.

DAVIS-SUTHERLAND

A wedding of unusual interest was solemnized on Thursday last, February 28th, at St. Stephen's church at 10.30 a.m., when Janet Anne, youngest daughter of Mr. and Mrs. Hector Sutherland, was united in marriage to Capt. Gilbert George Davis, formerly 40th Pathans, Indian Army, youngest son of the late Mr. J. H. Davis and Mrs. Davis of Dunster, Somerset, England. The Rev. H. A. Solly officiated. The bride, who was escorted to the altar by her brother-in-law, Mr. Harry Reynolds, was given away by her father. The ceremony was preceded by the singing of the well known hymn, "The Voice that Breathed O'er Eden." The bride was very becomingly attired in a chic French grey tulle travelling suit, with white fox fur and hat to match, and was attended by her two small nieces Audrey and Christine Reynolds, who were daintily dressed in embroidered organdy frocks with which they wore little tulle Dutch caps. They carried a basket of daffodils and pussy willows.

The groom's brother, Mr. S. R. Davis, was in attendance as best man. During the signing of the register, the hymn, "O Perfect Love," was very sweetly sung by Master Cyril Mossop, after which the happy couple left the church to the strains of Mendelssohn's Wedding March.

Mrs. Lorne Sutherland very ably presided at the organ and the ushers for the occasion were Messrs. Nisbet and Jack Crake.

Following the ceremony a reception was held in the Parish Hall when over a hundred guests assembled to offer their congratulations to the bride and groom. Amidst much enthusiasm the bride cut the wedding cake after which her health was proposed by Rev. H. A. Solly, who spoke in feeling terms of her popularity in the district. This was responded to in an able manner by the bridegroom. Shortly after, the bridal pair left to catch the noon train for the Coast. They were followed to the station by a great num-

FRANCES WILLARD MEMORIAL DAY

If numbers and enthusiasm are any criterion then the observance of Francis Willard day recently held under the auspices of the Summerland W.C.T.U. was certainly an unqualified success.

The business part which was so ably presided over by Mrs. T. C. McAlpine, that indefatigable temperance worker, commenced at 2.30 in the Baptist church. A committee was appointed to arrange for the visit of the W.C.T.U. missionary who is expected in Summerland on the 15th of March and will spend three days in the district.

A communication was read from the secretary of the B. C. Prohibition Association which stated that in view of the beer plebiscite which will be taken in July next, the association desires and urges the active co-operation of the W.C.T.U., agreeing (provided meetings are arranged for) to supply public speakers. They are hopeful of enthusiastic support. Mrs. McAlpine was appointed official delegate to the W. C. T. U. district convention to be held in Peachland in May.

At the open session commencing at 3.30 a program which had been carefully prepared appropriate for the occasion was rendered.

A very interesting Bible reading was given by Miss Sinclair, special emphasis being placed on the evil effects of liquor on the life, causing it to be unhealthy, unwealthy, unmanly, unneighborly and unchristian.

It had been requested that representatives of the C.G.I.T. of the Union and Baptist churches and the Girls' Circle of the Methodist church take part in the program. Accordingly Miss Florence Campbell and Miss Margaret Munn of the Union C. G. I. T. rendered an instrumental duet. Miss Muriel Steeves and Miss Margaret Ritchie of the Baptist C.G.I.T. gave a vocal duet, and Miss Margaret Hogg of the Methodist Girls' Circle gave a reading. The representatives of the different organizations were certainly a credit to them and delighted the audience.

Mrs. Boothe's recitation, "Tommy's Prayer," was given with pathos and charm. Mrs. Mellor gave a helpful and inspiring address on the life and life work of that remarkable woman, Miss Willard, the spirit of whom seemed for the time being to pervade the gathering. The sweet solo by Mrs. Armitage was a fitting ending to an inspiring session. Singing and prayer closed the meeting.—Con.

ber of their friends who gave them a most rousing send-off.

Upon their return Mr. and Mrs. Davis will take up their residence at Penticton.

The happy pair were the recipients of a number of handsome and useful presents.

Oscar Practices What He Speaks

by Terry Gilkison AUTOCASTER

MEMBERS TELL ELECTORS OF LEGISLATION

(Continued from Page 1) building operations, handled that department of governmental activities and presented some details of extravagance which were received with astonishment by the audience. The expenditure of nearly half a million dollars on an elaborate courthouse for Prince Rupert was first given, but was left entirely in the shade by the recital of some specifications for interior fittings of the \$715,000 building at Essendale for a home for incurables. Mahogany doors, inlaid with ebony, and polished to a piano finish were details which brought exclamations of amazement from many who heard them, and the further revelation of a \$60,000 commission to the contractor for the Science Building at Point Grey, over and above the cost of construction, made clear the reason for continual increase in provincial expenditure. The speaker also maintained that a great deal of unnecessary expense was caused by duplication of engineering and survey work, some districts having been surveyed twice over.

A vote of thanks to the speakers was accorded, and the meeting closed with the National Anthem.

The greatest deceiver—one who deceives himself.—Dr. Frank Crane.

JONES SPEAKS TO NARAMATA W. INSTITUTE

Naramata Organization Hears Address of the Local Member.

It was men's day at the Naramata Women's Institute meeting on Tuesday afternoon, Mr. J. W. Jones, M.L.A., attending by invitation, and a delegation of the Board of Trade being also present. Mrs. Williams presided, with Mrs. Salting as secretary. The minutes of the previous meeting having been read and approved, and reports of committees received, the question of a May Day festival was discussed, along lines of a letter from the Board of Trade. Mr. Manchester stated that the board wished to offer their co-operation in any way the Institute could use it, with the idea of making the annual event a community matter. It was finally decided that the festival would be held at a date to be fixed, that the assistance of the Board of Trade be welcomed and that the co-operation of the other local organizations be asked.

Mr. Jones prefaced his address on the life of Abraham Lincoln by a few remarks on the advisability of extending the scope of physical culture in the schools, giving some details on what is being accomplished in that branch of school work. He then gave a very interesting outline of the career of the American president who proclaimed the abolition of slavery and who preserved the union between north and south. His address was followed with much interest, and received a hearty vote of appreciation.

A piano selection by Miss Marion Clayton of Nelson was a pleasant interlude during the proceedings. The meeting closed with the National Anthem.

NARAMATA NEWS

Current Events of Town and District

The Irrigation Board has leased from Mr. Dan McKay the building formerly occupied by Mr. Julius A. Block, and will occupy it as office and board room. Mr. Block has rented the house until lately in the occupation of Mr. and Mrs. Hughes.

At the Sunday afternoon service Rev. H. J. Armitage preached on missionary work and made an appeal for generous donations to this cause. The choir gave Nevius' "This is My Commandment," with solo by Mr. Weaver. Miss SeEVERS presided at the organ.

Monday evening was the occasion of a surprise party to Mr. and Mrs. Salting, when about a dozen friends foregathered, and spent an enjoyable evening.

Under the title of "Our Lady of the Snows," the English magazine "Canada" is publishing a series of articles on Canadian life, by George Weaver.

This is a season of "surprise parties" and "bees" in Naramata. A pruning bee was held on the Lyons ranch on Wednesday, and a similar event is planned for the ranch of Mrs. Wells on Saturday, the reason in both cases being the ill health of the owners. These occasions speak well for the neighborly feeling of the district.

STUDENTS AGAINST DRINK—EXPULSION

Expulsion from college was recommended by the Associated Students of the State College of Washington as a punishment for any student found intoxicated, in possession of liquor, or in any way involved in liquor traffic. The recommendation was embodied in a communication to the administration, to voice the sentiment of the general student body, roused particularly by the arrest of two students on a "bootlegging" charge.

The greatest mistake—giving up.—Dr. Frank Crane.

ROUNDUP TO END WILD HORSES IN THE CARIBOO

Every Cowboy Available Will Take Part in Spectacular Last Great Drive.

The last great roundup of the wild horses of the Cariboo will be staged this spring. Every cowboy in the district will take part. The animals will be sold at \$5 a head. Those not sold will be shot. There are literally thousands of these wild horses over-running the rich grazing lands, and the event of rounding them up will be spectacular and exciting in the extreme.

Government officials and farmers have combined in planning the monster drive for the early spring, and it is hoped that the measure will be effective in removing a nuisance which is becoming every year more and more pronounced.

Men have been chosen to locate the whereabouts of the bands which roam the district, enticing domestic animals away and causing considerable damage to the ranches, and an effort will be made to secure an approximate estimate of their numbers so that when the roundup takes place a sufficient force shall be on hand to effectively deal with the situation. The horses will be driven into large corrals, which are to be erected in suitable places.

This will be by no means the first roundup of wild horses in the interior country. Wild horses in fact have been more or less a nuisance to farmers for many years. The Okanagan was formerly overrun with them and the ranchers waged deadly war against them until their numbers here are now comparatively trifling. There have been numerous roundups in the Cariboo, but when left unmolested for a few years the bands rapidly increase and become a very pressing menace to prosperity of farmers and ranchers. As the districts become thickly settled their depredations become more noticeable and in the Cariboo their extermination is becoming a matter of actual necessity.

HALF MILLION BOXES TO UNITED KINGDOM

British Columbia had shipped about a half million boxes of apples to the United Kingdom up to January 19th. Eastern Canada had sent something over a million barrels. Total imports from Atlantic ports to that date were 2,210,311 barrels and 2,005,358 boxes, more than a million barrels and about a quarter of a million boxes in excess of the same period last season.

Boosters Pump Scheme Is Highly Practicable Say Engineering Firms

More Powerful Plant Than
Originally Proposed will
Be Necessary.

COST MAY RUN TO
FOUR THOUSAND

Fifty Horse Power Motor
Specified—Peculiarly Fa-
vorable Conditions.

That it will require \$4,000 to make the necessary alterations in the pipe line and install pump and motor of sufficient capacity to provide adequate fire-fighting equipment is the opinion of the council after hearing reports on the proposed plan. Letters from three engineering firms were read at last Saturday's council meeting and, after a very brief discussion, the matter was laid on the table.

All agreed that the proposition was eminently practicable. One Vancouver firm declared that better conditions could not be found for the installation of a centrifugal pump in a booster pump scheme. There would be pressure on the suction side, rendering the pump self-priming. The correspondence discussed the volume of water to be handled, the size of the nozzles and the pressure. Apparently a 50 horse power motor with pump and equipment costing approximately \$1700 would be required.

The other letters were along the same strain. One firm, apparently prescribing a more powerful equipment, placed the cost of equipment at \$4,000. The figures of the third firm differed a little from those of the first, which provided for the highest grade of pump and motor, at the same time pointing out that more common equipment would mean a lessened first cost.

Coun. Johnston did not see how the municipality could stand the cost. He was convinced that this was the best scheme yet proposed, but apparently favored a chemical as it would cost less, but supposed the down town people would hardly accept it.

Reeve Campbell thought possibly that the proposed plant might be provided at lower cost by calling for

tenders. He believed that a chemical outfit should also be provided to meet calls to fires in outlying districts. The Reeve favored the booster pump scheme, provided it could be financed.

Coun. Bristow wondered if connection with the pipe line at the high flume would not cost less, but figures were given showing that the pump would be the cheaper as well as the more efficient.

At the suggestion of Coun. Johnston the booster pump plan was laid on the table until the clerk could obtain prices and other particulars on small-chemical outfits.

MORE MONEY COMES FROM ASSOCIATED

Co-operative Gets Cheque for
\$30,000—Being Paid
Out.

Thirty thousand dollars was received on Saturday by the Summerland Co-operative in a cheque from the Associated Growers.

No important pools have been closed since the last distribution made by the Co-operative but the staff is busy this week preparing to make payment to growers on account and these cheques, it was expected, would be issued today or tomorrow.

Reports from Vernon indicate that many of the later pools will not be closed until about the end of March and possibly it may be well into April before the last is finally closed and cheques issued for locals.

COMPLAINS OF OPERATING COST

That it cost the municipality eighty-two dollars per month last year to run the motor truck was the statement made at the council meeting on Saturday by Coun. Smith. Two hundred dollars depreciation was included in this estimate. No report as to mileage or tonnage handled was available.

LECTURES HERE ON TUBERCULOSIS

Though there was not a large crowd in attendance at the lecture on tuberculosis given by Dr. A. S. Lamb on Monday night, those who were present listened to a very instructive and helpful talk on various phases of this disease. Dr. Lamb, recently appointed travelling medical health officer for B. C. spoke here under the auspices of the Women's Institute in a campaign for better health.

The speaker gave many points on the prevention of tuberculosis, stating that it was not, as many supposed, hereditary, but was infectious, and too great care could not be taken. With those patients who had taken treatment in hospitals or sanitariums there was the least danger, for there they learn how to exercise caution and prevent its development, and it is in this cause that the present educational campaign is being forwarded.

OCCIDENTAL HEAD VISITS NEW ZEALAND

Loopold Hayos, general manager of the Occidental Fruit Company, with headquarters in Kelowna, is now on his way home from New Zealand and is expected here on the 20th.

The Occidental has been exporting to New Zealand for some years, but wishing to make more extensive connections, Mr. Hayos visited the sister Dominion. It is understood that he is returning well satisfied with the result of his visit.

The worst bankrupt—the soul that has lost enthusiasm.—Dr. Crane.

MANY WANTED MOTORIST JOB

Council Re-appoint Former Em-
ployees—Will Effect
Economies.

Many applications were before the municipal council on Saturday for the position of truck driver and there were also several seeking the position of teamster. Careful analysis of the list of applicants resulted in the re-appointment of the 1923 employees. Jack Morrow was given the position of motorist, etc., at \$90, which is ten dollars below his tendered price last year and Cecil Wells is again in charge of the team at \$85.

Wages required by those tendering for the position of truck driver ranged all the way from \$75 to \$100 per month some of them requiring 12 months' engagement. In view of the uncertainty of the situation, with respect to employment, the council decided that both men would be hired on the understanding of dismissal on two weeks' notice.

Reference was made to some public criticism with respect to use of the truck for other than municipal purposes, most of which was said to be without foundation, but it was unanimously agreed that the truck will be kept in the municipal shed over night and on Sundays.

It appeared to be the general opinion, too, that the truck driver should be sufficiently interested to make all minor adjustments, tightening of nuts, bolts, etc., which would save considerably in repair bills.

Tractor and grader were to be put to work the first of this week on road repairs.

FRUIT FIRM MAY OPERATE HERE

Members of the Rowcliffe firm, Kelowna, packers and shippers of fruit, have been investigating the possibility of establishing in Summerland. During a recent visit here they also looked into the question of leasing or building a packing house and obtaining a site for the latter.

BY-LAWS PROVIDE FOR WATER RATES

By-laws giving effect to the proposed changes in irrigation and general water rates as forecasted by The Review last week were given the first three readings at the regular meeting of the council on Saturday.

Irrigation rates will be divided into two payments and the gross increased so as to permit of a ten per cent. discount on the first payment and twenty per cent. on the second.

The general water rate was also increased one ninth in the gross so as to permit of a ten per cent. discount.

That most cities need: Fewer pessimists and a greater number of citizens with faith in its future.

Saturday Hospital Day Here

Chicken Dinner and Picture
Show to Provide Needed
Funds.

Saturday is to be Hospital Day in Summerland. Members of the Ladies' Hospital Auxiliary are preparing a real feast to be served in the Parish Hall, commencing at 5.30 Saturday afternoon. As announced in another column the prices charged will be very moderate and the proceeds are for hospital purposes.

The decision to give this chicken supper was the outcome of a donation of thirty chickens from Mrs. W. C. W. Fosbery, Brimmore Farm. With this generous donation for a start, the ladies have been receiving, through solicitation, many other good things and a bounteous supply for all is assured.

Following the community dinner, there will be the motion picture performance, "Homeward Bound," a picture of the better class which everyone will want to see. To round out the day, V. M. Lockwood, proprietor of the Rialto Theatre, has generously offered to give half the proceeds of admission for the benefit of the hospital.

OCCIDENTAL TO MARKET CROP GREAT RANCH

Big Kelowna Orchard Reported
to be Going over to
Mutual.

Great Ranch will market its 1924 crop of approximately 50 carloads through the Occidental Fruit Company. G. C. Benmore, Summerland manager for the Occidental, visited the ranch on Monday and completed arrangements with the new owners, of which J. T. Long is chief.

Last year the crop was shipped through the Associated Growers, the ranch being a member of the Peachland Fruit Growers' Union. Prior to that the Great ranch crop was sold by the O.U.G.

A few months ago the big ranch was purchased from the Westminster Trust by J. T. Long and associates. Mr. Long has been manager of the Great ranch for a number of years.

Current reports state that the K.L. O. ranch at Kelowna has been taken over by B. McDonald, recently sales manager of the Associated, Walter Hamilton and O. Jennons, other employees of the Associated, and it is rumored that the Mutual is also interested in the deal and will market the crop. The price paid for this 250-acre orchard is reported to have been \$65,000.

MUST COLLECT WATER RATES

Municipal Treasurer Reports
Large Amount in
Arrears.

Irrigation and general water rates in arrears now total \$20,000, according to figures presented by the treasurer of the Municipality of Summerland at the regular meeting of the council on Saturday. Upon the collection of these arrears will depend the amount of work that can be done on the irrigation system, and considerable needs to be done to assure an adequate supply of water to many sections.

Irrigation rates for 1923 totalling \$11,000 remain unpaid, and \$5,000 from the year 1922. Rates due prior to that year amount to \$1,300; and general water rates, 1923 and prior, still unpaid total \$3,000.

While it is legally possible for the municipality to borrow against the anticipated receipt of taxes, it is not permitted to borrow against rates nor is it legal to spend money raised on taxes on the up-keep of the irrigation system. Only by the collection of rates in arrears is it possible to maintain the system and hold the rates down to the present relatively low level. At the same time the municipal council feels that it would not be fair to raise the rates to the man who pays in order to make up the money for his neighbor who does not pay.

The matter was discussed at considerable length by the council, and instructions were given to cut off the irrigation service, where reasonable payment was not forthcoming.

CRATED APPLES SENT TO VANCOUVER

This week the Co-operative loaded a car with Yellow Newtown apples put up in crates which were shipped to Vancouver.

SUMMERLAND NUTS FOR EMPIRE EXHIBIT

Kelowna—An attractive display of Okanagan grown nuts in the window of T. Lawson Ltd. drew the interested attention of many passers-by. They constituted an exhibit to be made at the British Empire Exhibition and were collected and prepared by J. U. Gellatly, whose appreciation is extended to the many growers in Penticton, Summerland, Peachland and Kelowna, for their co-operation and contributions of nuts which made the exhibit possible. The largest collection by one contributor was that of D. Gellatly, of the Rosefield Nut Nursery at Gellatly. The nuts shown at Lawson's included three varieties of English and three of Japanese walnuts, two of sweet chestnuts, and one each of almonds, hazel nuts, filberts, black walnuts and butternuts, and were put up in glass jars with the exception of the Japanese nuts, which were artistically and suitably mounted upon a Japanese

Many Will Co-operate In Preparing Park For Civic and Tourist Use

art tray. Some of the nuts were shown with part of the shell removed and it was a revelation to all to note the extra large size of the English walnuts, their thinness of shell and their meatiness. It had not been realized that walnuts of such splendid quality could be grown in South Okanagan. Gellatly brothers deserve much credit for their pioneer efforts in the culture of what promises to be a valuable addition to the crop resources of the Okanagan.

The exhibit was forwarded on Monday to England per express by Mr. F. R. E. DeHart.

LIQUOR POLICE MADE A VISIT HERE, CLAIM

Reeve Takes View that Neither
Visit nor Charge were
Justified.

Officers of the Liquor Control Board were engaged in the municipality of Summerland some time last season, according to a letter received by the council from the supervisor of law enforcement, in answer to a request for an explanation of the deduction made from the municipality's portion of the distribution of liquor profits, already reported.

No other explanation was offered and this statement was not looked upon by Reeve and council as satisfactory nor do they feel that the department is justified in making the deduction. As pointed out by the Reeve, there was no report of infractions and no complaints made to the police commission of failure to enforce the law. Further, there were no prosecutions following the alleged visit of the officers and the Reeve feels that there was no good reason to make the charge. The legality of the action was also questioned by the municipal treasurer. The feeling was expressed that the Reeve, as chairman of the police commission, should first have been warned that the law was not being enforced, if such were the case.

The subject will no doubt be taken up at the next meeting of the Union of B. C. Municipalities.

OCCIDENTAL MAKES FINAL PAYMENT

Cheques for final payment to fruit growers have been sent out by the Summerland office of the Occidental Fruit Company. Several varieties of apples were included in this settlement, Jonathans being one of them for which 50 cents was paid for Extra Fancy, 42 cents for Fancy and 30 cents for crates. For Wagner 64 cents, 50 cents and 34 cents was paid.

HOME BANK HAS SHAREHOLDER HERE

Councillor R. Johnston is one of those men fortunate enough to be able to invest in bank shares, but so unfortunate as to be the owner of a share in the Home Bank, all shareholders of which have been called to pay up under the double liability feature of bank charters. His name is one of a long list of British Columbia shareholders who have been called upon to pay double liability.

DUMP DUTY NOW OFF U. S. APPLES

The dump duty on American apples has been off since the first of March. Since then several carloads of Washington have arrived in Vancouver. The dump duty ran to 15 per cent on fancy and extra fancy. This was roughly from 25 cents to 30 cents dump duty per box.

Washington Washington are being quoted by the wholesale trade at from \$2.40 to \$2.50 a box.

Reeve Campbell Calls on All
Citizens to Give Day to
Park Improvement.

BIG BEE PLANNED FOR NEXT THURSDAY

Plenty of Good Things to Eat
For All who Come
to Work.

Blowing out of stumps and other preliminary work is being done in the Peach Orchard park preparatory to the big clean-up day on Thursday next.

Reeve Campbell is appealing to every citizen who can possibly give time to be on hand Thursday morning next with the necessary tools, particularly mattocks and hoes, for a united effort to put the park in condition for the big influx of tourists which is predicted for the season soon opening. Those who cannot give a whole day are urged to give half.

All up and down the valley from the Columbia River to the extreme north, cities and towns are preparing to bid for as much of this cash business as they can corral and there is further a general movement for the towns on both sides of the line to co-operate to divert traffic from the Columbia highway northward up the Okanagan River. A meeting of representatives of boards of trade and similar organizations on both sides of the line was held at Oroville recently to lay plans for this purpose.

Many centres are spending large sums of money in order to make their camps comfortable and attractive. Few if any have such a site as nature has provided for Summerland and which can be made particularly tempting to the tourist with comparatively small effort and expense.

The Women's Institute is making all necessary preparations to serve lunch to the workers in the park next Thursday.

Today many citizens are busy along the Okanagan Highway passing through town cleaning it up and making it more attractive. Here again the Institute is co-operating by serving meals to all workers.

MANAGER TO BE CHOSEN SOON

Fourteen Applicants for Position
as Head of Associated
Growers.

Vernon, March 11.—President A. T. Howe and Mr. F. A. Lewis of the Advisory Committee attended the adjourned annual general meeting of the Armstrong Co-operative Growers on Saturday last.

Colonel Scott and Mr. Barrat were guests at the weekly luncheon of the Wenatchee Valley Traffic Association on Friday last. Colonel Scott expressed the deep appreciation they felt for the courtesy extended to them everywhere and stated that the one thing that impressed them most forcibly was the discipline in the co-operative associations there.

Twenty-five cars were moved during the week ending the 8th instant. From forty-five to fifty cars only now remain in the Valley.

Applications for the position of General Manager now total fourteen, the final selection from which will be made at the full board meeting on the 20th instant.

There will be no change in the irrigation rates charged in Penticton this year. The order of the board of investigation under the Water Act has been received, setting the rates for 1924 the same as last year. There are \$12 per acre for bench lands and in some cases \$0.50 per acre on the flat. The full rate authorized by the Water Board is being charged.

START WORK ON SCHOOL LOTS

Grounds Laid out for Trees,
Shrubs, Lawns and
Walks.

Work has commenced on the improvement of the high school and public school grounds. Last Thursday a number of citizens and many of the pupils assembled at the request of the grounds committee, Trustees Loggie and Cope, when much good work was accomplished.

The dilapidated and unsightly stone wall that has for several years disfigured the grounds on the north side of the road was further demolished and the stones are being removed. Much of those will be used to widen Peach Orchard gulch road.

The laying out of the grounds for trees, shrubs, and lawns was done by B. Robinson, agricultural instructor and A. J. Mann, of the Experimental Station. Trees are being provided by the Department of Education. These will be planted along the north, east and south edges of the public school grounds and on the east side of the high school grounds.

In front of the public school there will be an oval driveway with lawn, hedges and flower beds and a similar plan will be carried out in front of the high school. A row of shrubbery is to be placed at the back of the public school, which will divide the playground of the youngest children from the main campus.

The best part of anyone's religion—gentleness and cheerfulness.—Dr. Frank Crane.

The Summerland Review

Established August, 1908.

Published at Summerland, B.C., every Thursday by THE REVIEW PUBLISHING COMPANY, LIMITED
Ralph E. White, Editor and Manager

An independent family newspaper covering Peachland, Summerland and Naramata and adjacent districts.

Member of Canadian Weekly Newspapers Association.
Member of British Columbia Selected Weeklies.

Subscription Rates—In British Empire, in advance, \$2.50 per year; six months, \$1.40. To U.S.A. and other countries, \$3.00 per year.

Advertising Rate Cards and information respecting territory and samples of paper mailed upon request, or may be seen at the office of any advertising agency recognized by the Canadian Press Association.

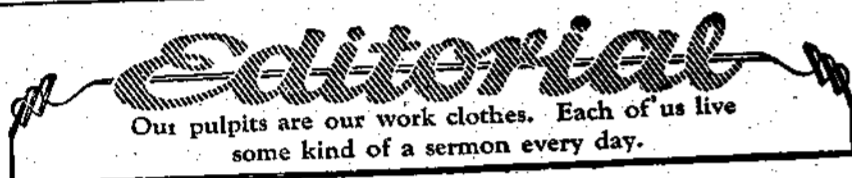

Advertisers must have copy in by Tuesday noon in order to insure changes for standing advertisements. New display advertising copy can be accepted one day later.

All instructions for cancellation or alteration of advertising must be in writing.

Correspondence—Letters addressed to the Editor and intended for publication must be short and legibly written on one side of the paper only. The longer an article, the shorter its chance of insertion. All communications must bear the name of the writer, not necessarily for publication. The publication or rejection of articles is a matter entirely in the discretion of the Editor. No responsibility is assumed by the paper for the opinions expressed by correspondents.

Typographical Errors—In the event of a typographical error, advertising goods at less than the proper price, the newspaper will furnish letters to be posted in the store stating the correct price, but goods may not be sold at the price printed and the difference charged to the newspaper.

Thursday, March 13, 1924

MEANS MUCH TO OKANAGAN.

Developments of the utmost importance to the Okanagan are being reported from Ottawa from day to day.

Thos. F. Bulman was one of the principal witnesses in the hearing of the case of the express companies who are applying for permission to increase their rates. Some very surprising figures were brought out when he compared the rates paid by fruit growers of the Niagara district with those paid on Okanagan fruit carried like distances.

Evidence so far submitted would indicate that the express companies do not maintain an accurate cost system and apparently are not able to justify either the discrepancy between the rates charged in the east and here, nor their request for permission to increase these rates.

A strong fight is being put up by British Columbia and other western interests and it may be that the ultimate outcome will result in a more equitable scale of rates for British Columbia as compared with Ontario and the east.

BRITISH APPLE PRICES.

Very encouraging are the comparative figures given in the last telegraphic report on apple prices in the United Kingdom. During the season of 1922 and 1923, Jonathans, for instance, sold at 8 to 14 shillings in November and 8s. to 10s. 6d. in January. In the past season the November price was 7s. to 11s. 6d., while the January price showed an improvement, being 12s. to 15s. 9d. Generally speaking, other varieties showed similar improvement.

Unfortunately it was during the low price period of November last that the principal supplies of British Columbia apples were put on the British market.

LET'S STOP IT!

"The automobile is an instrument of death if carelessly driven. Run by a drunken driver it is a potential juggernaut. Everything possible should be done to prevent persons under the influence of liquor from running cars, and those who disregard the laws in this respect should be jailed and their licenses taken away forthwith. The risk to the public is too great to permit driving by persons who because of liquor are not in full possession of their faculties."

If Coue were a citizen of Summerland he would be saying, "Every day in every way things are looking better and better."

DID YOU EVER STOP TO THINK?

By E. R. WAITE, Secretary, Shawnee, Okla., Board of Commerce.

- THAT modern business concerns profit by advertising?
- THAT those business concerns who wish to progress on the road to success eventually advertise? NOW is the time to start.
- THAT the future does not worry the business concerns that are persistent advertisers?
- THAT advertising helps to meet competition and keeps competition away?
- THAT advertising is a great service given the public? It helps them make up their mind as to what they want.
- THAT there is always business for the business concern that advertises, because they have what the people want and let them know about?
- THAT advertising is a guarantee that the merchandise advertised is as represented?
- THAT if some business men would get away from their business once in a while, and then from the outside look it over as other people do, they would make a lot of changes?
- THE BETTER WAY TO GET BETTER BUSINESS IS BY BETTER SERVICE, BETTER QUALITY AND BETTER ADVERTISING.

A Utah-Idaho sugar manufacturing company is negotiating with farmers in the lower Fraser Valley for sugar beet acreage, offering \$6 per ton for beets. The soil of the lower Fraser river agricultural areas is said to be ideal for the production of sugar beets.

Incubation

By D. G. Denny, Poultryman, Experimental Station, Summerland, B.C.

Incubation is probably the most important phase of the poultry-keeper's work inasmuch as it is only by incubation that flocks may be renewed. There are so many factors which influence the hatch, and the eventual vitality and viability of the chicks, that it is difficult to enumerate them all in a short article.

The first essentials to a successful hatch are good breeding stock and hatchable eggs. Not only should the parent stock of the present generation be good, but the strain should have been worked up from the best foundation. When choosing the male for the spring mating, pick out the bird showing the most vitality, having the finest shape, and the one known to have come from a high egg producer. The same applies to the females which will be mated to him.

Feeds have an important bearing on results, particularly green feed. This should be fed daily during the winter to the birds intended for breeders in the spring.

Housing conditions should be right; unsanitary, draughty or badly ventilated houses lowering the vitality, and therefore the prepotency of the birds. All these conditions are controllable and consequently tend toward a maximum of success in hatching. In order to hatch well, eggs should be of good shape and size. Uniformity of appearance should count well. The female progeny to a major extent will lay eggs conforming to those of the dam. Eggs intended for incubation should not remain in a temperature less than 35 degrees or higher than 68 degrees Fahr. and may be kept resting on their small ends, air space uppermost, for as long as 14 days, after which fertility deteriorates more rapidly.

It has been found on the Summerland Experimental Station that a few hens in a pen are responsible for the majority of infertile eggs. If these hens can be identified early in the season they should be removed, and incubator space will be conserved for hatchable material. Individual hens usually lay eggs which are uniform in appearance, so that this fact can be made use of for culling the infertiles should there be no traps in the pen.

Last season at the Experimental Station no cooling of eggs during incubation was required to obtain good results, other than the time taken to turn the eggs twice a day, every twelve hours as nearly as possible. The incubator cellar should be well ventilated (five cubic feet per hour being the optimum) and well supplied with moisture, the ideal location being a dirt floor, providing it is sweet and the incubator can be set steady and level. For the rest, follow the instructions as laid down in the book supplied with incubator.

If the natural form of incubation is to be used, the hen should be set away from the rest of the flock, dusted with powder to kill all lice, and left undisturbed as much as possible. Give her all the grain she will eat, and she will give you as good a hatching percentage as any incubator.

SEASON IS EARLY BUT ALL IS WELL

Heavy frost on Monday night is reported to have frozen apricot blossoms at Oliver and peach blossoms at Osoyoos. No damage is reported here. Only three degrees of frost were recorded here and the blossoms are not so far advanced as in the districts mentioned above.

Citizens who are in the habit of noting the seasons from year to year state that garden flowers and other vegetation are about a month earlier than usual, but cool nights are preventing any rapid development of fruit tree buds and no great risk with regard to them is felt.

The Grater.—After grating either lemons or cheese, a very stiff-bristled brush will thoroughly cleanse the grater.

Rubbers.—Rubbers may be kept soft and looking like new if before they are put away they are rubbed with vaseline.

Silver Stains.—Did you know that the water in which potatoes have been boiled is excellent for removing stains from silver?

Rolling Meat.—Next time instead of rolling meat in flour before frying try toasted corn flakes. It gives the meat a delicious nutty flavor.

Patches.—In my opinion it would be a difficult task to beat this as a time saver. Most of us have a bag in which we keep patches, and the same most of us spend a good ten minutes each time we want to match some material. Why not do this? Put a large safety pin on the outside of the bag and each time a new material is put in cut a small sample off and put on the safety pin. A glance would then show what the bag contains.

ERNIE STEERS IS GIVEN BANQUET

Ernie Steers was the guest of honor at an informal surprise party given in Empire Hall last Friday evening by Mrs. Guy Brock. A goodly number of friends had gathered early and, as Mr. Steers was brought in, circled about him singing, "For He's a Jolly Good Fellow."

To music provided by Miss Ida Shields and J. Kean, dancing was enjoyed until the early hours. Just before midnight the guests sat down to a delicious banquet supper, the table decorations being most attractively carried out in green and white.

K. S. Hogg, in proposing the toast to the guest of honor, referred to the popularity of Mr. Steers, who is leaving again shortly to resume his work in the Yukon, noting at the same time the good use he had made of his time during his present stay here.

This was suitably replied to by Mr. Steers, who expressed his appreciation of the kindness accorded him by his friends.

A Scottish minister asked the bridegroom if he were willing to take the woman for his wedded wife.

"Aye, I'm willin," was the reply, "but I'd rather have her sister."

SHILOH STOPS THAT COUGH

WOULD REDUCE COST OF ASSOCIATED

Peachland, B. C.
Editor Summerland Review,

Almost a year has elapsed since the Associated Growers of B. C. was formed. When this child of Aaron Sapiro was ushered in last spring there was great rejoicing through the Valley. It was heralded in the papers in large headlines. Displays were put in the store windows showing the per cent. of acreage in each place, etc., and every one apparently thought that the salvation of the fruit industry was at hand. Today this poor child is weak and sickly through want of proper nourishment. The food that should have gone to strengthen it and make it robust and strong was absorbed by the doctors and nurses in attendance at Vernon and today their promising child is on the verge of collapse. It cannot possibly stand another year of such incompetence and worse. It is time that growers one and all made themselves heard and felt. We must insist on a thorough change. Such extravagance and mis-management will put us on the rocks. We were organized as a co-operative association. About all the co-operation there has been from the officials has been to co-operate among themselves and fill their pockets with good fat salaries. As far as the growers are concerned we have had practically nothing. A good many have not had enough to pay their taxes and water rates. It is time now to spray and prune, etc., and many will find it utterly impossible to do so from want of funds. When we compare what we as growers received for soft fruits, crabs, etc., with what was paid by the independent houses we cannot but realize that there was some scandalous mis-management. We do not know yet what we will get for apples. If rumors from head office are right it will be very little. We have had no authentic information the past year. We were led to believe through the press that everything was going well. I have no doubt the press thought the information was correct. The new board has been elected to act during the coming year and we believe the majority of them will do their utmost in forwarding any business that will benefit the growers, but the growers themselves must back them to the limit in anything of benefit to the association, and insist that during this year strict economy and business methods are used, and that more of the receipts are used to reimburse the grower and less to line the pockets of the staff. We are over-staffed and over-paid. I would ask the President for the information of the growers, to give us through the press the total number of the staff and salaries of each and if I am wrong I will most humbly apologize.

Yours for the good of the association,
REYNOLDS HARRINGTON.

B. C. APPLES GOING TO U. K. AND SCANDINAVIA

The following communication is copied from the Vancouver Daily Sun of March 4th and is reported here by request:

Editor The Vancouver Sun: Sir— I observed in your leading editorial in your issue of the 28th ult., entitled "B. C. Fruit Must Be Merchandised."

I thought it would interest you to know that there has been a considerable quantity of British Columbia apples exported to the United Kingdom and Scandinavia, as the following figures will show.

According to our records we handled 623 cars containing 407,400 boxes of apples to the Atlantic seaboard for export to the United Kingdom and 75 cars containing 50,815 boxes for export to Scandinavian ports.

We handled via Vancouver for export to the United Kingdom and Continent, via Panama canal, 83 cars containing 62,210 boxes, making a grand total of 781 cars containing 586,431 boxes.

These figures, you will observe come very close to the figures you mentioned as having been exported from the United States, but as you made no mention of what was exported from British Columbia I thought you might like to make reference to it.

I recall a somewhat similar short editorial you published some time ago mentioning that "that day a British bottom was loading apples in Seattle for export to the United Kingdom, while British Columbia Wynndol, B. C.

apples were rotting in the Okanagan valley." I remember on that occasion the ship referred to had loaded 47 carloads of B. C. apples in this port. I forgot the name of the ship but it was one of the Royal Mail Steam packets. F. W. PETERS, General superintendent C. P. R.

MAKE CO-CALLED BROKERS ILLEGAL

Editor Review,

Sir: This is an appeal through your paper to bring before the public the fundamental cause for the deplorable economic condition prevailing in our industry. And to pray for assistance from other commercial units, public bodies, boards of trade, and our provincial and Dominion governments to help us out of the entanglement with the two commercial combinations operating in our four western provinces, and known as the broker-wholesale combination, controlling the distribution of our fruit and vegetable products.

The true commercial condition that we are subjected to is this: That before we can use these fruit and vegetable wholesalers as our distributors, we must engage their brokers as our brokers, so that they legally can sell our products to themselves. And if we refuse to concede to their conditions they will get these requirements some where else, when a quantity of our products will have to go to waste.

A much similar condition prevails with the wheat and cereal farmers on the prairies, as their products must pass through the Winnipeg Grain Exchange, a legalized gambling institution, for want of something more economic at present.

Farmers Discriminated Against

You men of commercial brain, as well as you lawmakers for our provinces and our Dominion, must realize the deplorable state of affairs that such a condition creates, for in no other industry would the laws permit such a condition to prevail, and if they did, no other industry subjected to it could ever hope of surviving beyond its stage of infancy.

Had nature not endowed the agricultural class with such a tenacity of life, it would, as an industrial unit in the nation's organic life, have been extinguished long ago.

We now appeal in the name of the British Columbia fruit industry to all fair-minded citizens to assist us in bringing to the attention of the governments in each of the western provinces and at Ottawa the immorality of permitting interlocking combination in restriction of legitimate merchandising of the farmer's products, such as prevail with the mutual brokers, operating for the so-called Nash houses and the Growers' Sales Agency, operating for the so-called independent houses.

As long as these two combinations are legally permitted to operate there is no hope for the British Columbia fruit industry ever getting out of the path of bankruptcy, organized or un-organized. And the much hoped for co-operative movement of last spring only serves to hand the growers over to this combination in an organized form.

No Need to Buy Out

Mr. Howe of the Associated Growers says that it will take two and a half million dollars of the growers' money to get out of this broker-wholesale combination. Whereas we maintain that an order-in-council with the stroke of the pen, or the passing of an Act by our Federal government, would accomplish the same by making it unlawful for any wholesale house to own, control, or have any interest in any brokerage concern handling commodities of the same class as the respective wholesalers.

As farmers and fruit growers, we wish no quarrel with any legitimate wholesale house. On the contrary, we wish to foster a closer and more friendly relation along economic lines.

The wholesalers would not be human if they did not use to their own advantage the iniquity of the law permitting such an interlocking combination to operate amongst us.

When we consider that the farming class constitute the Old Dad of the nation, providing the victuals for its inner sustenance, it becomes inconceivable that its family should subject him to bankruptcy, knowing, as they must, that it finally is bound to reflect upon themselves, causing suffering, if not social collapse.

On behalf of the British Columbia fruit and vegetable industry,
O. J. WIGEN.

KOOTENAY CO. DEVELOPING MORE POWER
Annual General Meeting of Big Hydro-Electric Held At Rossland
Rossland—The adjourned annual general meeting of the West Kootenay Power and Light Co., Ltd., operating the big hydro-electric plant at Bonnington, which supplies power to many sections of the interior, and which concern has done so much to advance the development of the natural resources of this portion of the province, was held at the general offices of the company in Rossland on Monday.

SENIOR SCOUTS WIN AT KELOWNA

Three basketball teams of the Summerland Boy Scouts journeyed to Kelowna last Friday afternoon to meet the corresponding Kelowna players. The senior game was a close and fine game, Summerland finally topping the score at 27-36. Earle Wilson played a fine game, scoring in all 15 points. B. Taylor and H. Wilson each obtained 8 points and O. Dunham 5.

Kelowna won the intermediate and junior games with scores of 34-7 and 20-13 respectively. The bad licking of the intermediates was due to the lack of combination among the players.

The visitors were entertained to a supper and dance following the games in the Scout Hall.

After a most enjoyable week end spent with their Kelowna brethren the Scouts returned Saturday afternoon.

(To late for last issue)

The tenderfeet are all making progress, three more having passed last Friday night. They are Gordon Nixon, George Denike, and Donald Orr.

On Friday we intend to wind up our basketball season at Kelowna. Three teams are going up and intend

All the old officers were re-elected as follows:
President—Charles R. Hosmer of Montreal.
Vice-President and General Manager—Lorne A. Campbell, Rossland.
Managing Director—James J. Warren of Montreal.

A report by the general manager on the immense betterments of the company being made at Bonnington, hows that the work is progressing very satisfactorily considering the magnitude of the undertaking which, when completed will be one of the most up-to-date hydro-electric plants of its kind in the entire Dominion, affording ample power for all the demands which may be made upon it for some years.

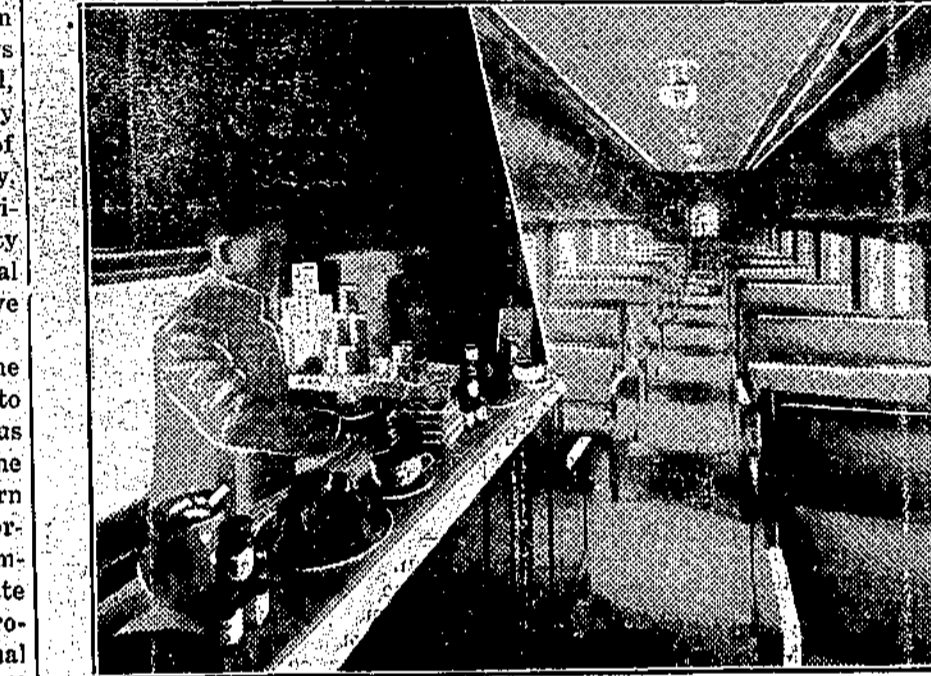

Mr. James J. Warren was in attendance on the meeting.

to spend the night there, returning Saturday morning.

Acquisitive Neighbors—Some neighbors will take anything except a hint.

A SCOUT

LUNCH COUNTER CARS ON NATIONAL

LUNCH counter cars which will care for the needs of passengers in the colonist, first class and tourist cars of the main line trains, if they desire to patronize them, are to be operated by the Canadian National Railways for the convenience of the travelling public, and particularly of immigrants arriving in Canada. As an experiment, lunch counter cars have been placed in service between Winnipeg and Toronto. While these trains carry dining cars and while the Canadian National Railways also have lunch counters and restaurants at all divisional points, it is considered that the lunch counter car will be a great benefit to women travelling with children and to others who may be physically unfit or unable to leave the train at stations because of severe weather, or for other reasons.

The suggestion of the lunch counter cars was made by Mr. Walter Pratt, General Manager of Dining, Sleeping and Parlor Cars and of Hotels, who has been anxious to provide this facility to further improve travelling conditions and add to the comforts of passengers on the Canadian National Railways.

"NUMBER, PLEASE?"
I know a little girl whose name is "Central"
She's in the local telephone exchange,
All day long she's working at the switchboard
With tact and courtesy without a change.
When mashers try to call her "little sister"
Or try to spring that time-worn ancient wheeze,
"Hello, there! That you Central? Give me Heaven,"
She calmly asks the question—"Number, please?"
One day while idly waiting for a number,
I heard a petulant old man exclaim—
Ah, well, on second thought, I will not tell you;
But you would gasp if I should write his name.
She quite ignored his ignorance and coarseness,
But instantly she brought him to his knees;
For all she answered back was—"Number, please?"
And as I pen this short appreciation,
I think that "Central" more than earns her pay;
She's always at our beck and call to aid us,
In business through the long and tiresome day.
And when we think of those who do us service,
I'm sure that everybody else agrees,
By far the best of all our public servants.

Is the little girl who answers—"Number, please?"—Exchange.

SYNOPSIS OF LAND ACT AMENDMENTS

PRE-EMPTIONS
Vacant, unreserved, surveyed Crown lands may be pre-empted by British subjects over 18 years of age, and by aliens on declaring intention to become British subjects, conditional upon residence, occupation, and improvement for agricultural purposes.
Full information concerning regulations regarding pre-emption is given in Bulletin No. 1, Land Series, "How to Pre-empt Land," copies of which can be obtained free of charge by addressing the Department of Lands, Victoria, B.C., or to any Government Agent.
Records will be granted covering only land suitable for agricultural purposes, and which is not timberland, i.e., carrying over 5,000 board feet per acre west of the Coast Range and 3,000 feet per acre east of that Range.
Applications for pre-emption are to be addressed to the Land Commissioner of the Land Recording Division, in which the land applied for is situated, and are made on printed forms, copies of which can be obtained from the Land Commissioner.
Pre-emption may be occupied for five years and improvements made to value of \$10 per acre, including clearing and cultivating at least five acres, before a Crown Grant can be received.
For more detailed information see the Bulletin "How to Pre-empt Land."
PURCHASE
Applications are received for purchase of vacant and unreserved Crown lands, not being timberland for agricultural purposes; minimum price of first-class (arable) land is \$5 per acre, and second-class (grazing) land \$2.50 per acre. Further information regarding purchase and price of Crown lands is given in Bulletin No. 10, Land Series, "Purchase and Lease of Crown Lands."
Mill, factory, or industrial sites on timber land, not exceeding 40 acres, may be purchased or leased, on conditions including payment of stumpage.
HOMESITE LEASES
Unsurveyed areas, not exceeding 20 acres, may be leased on homestead conditions upon a dwelling being erected in the first year, title being obtainable after residence and improvement conditions are fulfilled and land has been surveyed.
LEASES
For grazing and industrial purposes areas not exceeding 640 acres may be leased by one person or a company.
GRAZING
Under the Grazing Act the Province is divided into grazing districts and the range administered under a Grazing Commissioner. Annual grazing permits are issued based on numbers ranged, priority being given to established owners. Stock-owners may form associations for range management. Free, or partially free, permits are available for settlers, campers and travellers, up to ten

"A Snapper Up of Unconsidered Trifles."

The Winter's Tale, Scene II, Act IV

On those occasions when Herbert and Pip, in "Great Expectations" decided to look into their pecuniary affairs, they adopted the plan of "leaving a margin" to cover any odd amounts in the totals of their debts, and also to provide a sort of reserve. Thus, "supposing Herbert's debts to be one hundred and sixty-four pounds four and two pence" they would be put down at two hundred pounds, and so on with other amounts. This scheme was, at the time, held to be a piece of high financial wisdom, but later on, Pip, who originated it, had his doubts, seeing that the sense of freedom and solvency it imparted invariably led them into new debts to the full extent of the margin, and sometimes beyond it.
I was reminded of this episode a short time ago, when listening to a member of the provincial legislature explain the method followed in the House when the government needs fresh appropriations. I don't know how many members of the cabinet may have read "Great Expectations" but it is quite evident that they have the plan of "leaving a margin" worked out to a fine degree of efficiency. For example, just before the last prorogation of the House the sum of two million dollars was asked for and received, but no details of proposed expenditures given. In other words the members of the legislature who vote the money, do not know just how it will be spent, and only receive particulars when the vouchers are laid before them the following session. It may very possibly be that this is the only practicable way of doing these things, and we will admit the necessity of keeping a little ready cash on hand. But it is in order for the public to hope that, in estimating the amount required, too much is not allowed for the provision of a margin!

It is said that medical men are alarmed at the risk they run in giving certificates of insanity, if the recent decision in a REASONABLE London court is upheld. £25,000 damages is a penalty which will probably restrain the professional pronouncements of a great many doctors in future, and it seems as though some safeguard will have to be devised. Knowing, as they do, that a person may be slightly unbalanced when examined, and yet be of perfectly sound mind at a later period, how many medical men will be willing to risk financial and professional disaster by giving certificates in future? The judge in the recent case appears to beg the question to a certain extent when he expresses surprise that "although a man may be perfectly sane" he is not allowed to know why he is shut up. To the attendants in an asylum for the insane, no inmate is perfectly sane, since he has been put in their charge as insane, and they are obviously incapable of contradicting the medical certificates, which constitute their authority. There may possibly in the case reported, have been some negligence of continued medical observation, but this does not appear in the newspaper report.
The contingency of such distressing miscarriages as these has been recognized and pointed out by many writers, notably by Charles Reade, who was as keen on possible mismanagement of insane asylums, as he was where prisons were concerned. In his novels, as also in Henry Cockton's story of "Valentine Vox" the incarceration of the victims was deliberate, and the moral sought to be shown was that, under existing conditions, wrongful detention was quite possible, and that additional safeguards were needed. There is absolutely no suggestion of wrong motives in the present case, but it seems as though sixty years after Reade's warnings, it is still possible for a sane person to be deprived of liberty for many years. There is, in such cases, the same element of injustice which exists in the punishment of an innocent man for a crime which is afterwards traced to another source, and which helps to swell the list of "life's little ironies."
In a year old number of an American magazine I find an account of some experiments carried out by Dr. Leonard G. Rountree of the Mayo Clinic for the AND AIR purpose of noting the effects of excessive water drinking on human beings, cats, rabbits and guinea pigs. One man treated with a surplus of water developed headache, nausea, and a staggering

gait, being for a time quite unable to walk. Much the same results were obtained among the animals so treated, and the inference seemed to be that even "the crystal stream" extolled in certain verses, may be partaken of too freely.
In his comments on these experiments the editor expressed a wonder whether we should presently find we could get affected in the same way on air. This wonder, when you come to think of it, has long been put out of court by experience. Every mountain climber, and certainly all air-men know the exhilarating effect of the atmosphere in high altitudes and science tells us of the contrary results when we reach heights where oxygen becomes scarce. One of O. Henry's tales tell of the inspiration wrought in a second rate music-hall singer by a sojourn in a mountainous region, and relates how it died out as she returned to ordinary levels. The story-telling genius of O. Henry would of course seize on the possibilities of the situation and develop them to the utmost limit, nevertheless the scientific foundation is there. Atmospheric intoxication is really so common an experience that we take no note of it as such. We breathe the bracing air as a matter of course, and ascribe our exhilaration to our own state of health. Max O. Rell, by the way, tells us that the air of this continent is too strong for our good and that Canada is destined to be the white man's grave. Max O. Rell forgets to allow for the adaptability of man to any conditions in which he is placed, but that the restless energy of dwellers on this continent may be largely attributed to the quality of the air can be admitted without question.

The current number of the "American Bee Journal" contains a very funny example of the straits in which a reader may find himself PUZZLED self if he fails to comprehend SLANG, the use of slang in journalism. A foreign correspondent to the Journal, commenting on a previous article by another contributor, quoted the words, "I got stung once in Oregon," and, innocently assuming that the expression carried its natural meaning, gave the writer some good advice on how he could prevent his bees from stinging him in future! The editorial footnote is as follows: "The editor fears that our correspondent, in the above excellent article, has misunderstood the meaning of the words, 'I got stung once,' simply because he, as a foreigner, does not understand the slang words used in this American country. By 'stung' our contributor meant 'tricked, outwitted, gulled,' as he is well acquainted with the handling of bees."
In this little comedy of errors I think the honors rest with the foreigner who assumed that words were used in their proper connection. When George Ade writes his immitable "Fables in Slang" he is naturally justified in using slang expressions—when a correspondent writes on general matters he should use words in their accepted meaning, and if he uses slang at all, should distinguish it as such.

For West Summerland—Daily, except Monday, 7:30 a.m. and 11 a.m.; Daily, except Sunday, 6 p.m.
For Rural Route—8:00 a.m. daily, except Sunday.
AT WEST SUMMERLAND OFFICE
For Coast Points—Daily, except Monday, 11:30 a.m.
For South, North and East—Daily, 5 p.m.
For Summerland Office—Daily, except Monday, 11 a.m.; and daily, 5 p.m.

Definite Policy of Immigration for Canadian National Railways

WHEN, a little more than a year ago, Sir Henry W. Thornton, K. B. E., was chosen to head the Canadian National Railways, one of his first acts was to put into motion machinery for aiding in the colonization and development of Canada, particularly along the lines of the National System. He realized that one of the crying needs of Canada was for more population, and he has since been quoted, on several occasions as saying that if Canada had a population of twenty-five million people, Canada would have no railway problem.

The organization of a department to look after colonization and development was entrusted by Sir Henry to Mr. W. D. Robb, Vice-President, and Mr. Robb at once proceeded to build up the necessary organization to look after this most important national work. Investigations, conferences and careful planning gradually brought into being an effective department, the effort of the year culminating in the engagement of Dr. W. J. Black, Deputy Minister of Immigration and Colonization in the Federal Government, as Manager of the Colonization and Development Department of the Canadian National Railways, with headquarters in London, England. That was early in the Fall of 1923. Dr. Black proceeded at once to Great Britain, where he spent some weeks carrying out a series of investigations. When completed, he returned to Canada and set up a conference of all officers of the department was called and a definite plan of colonization and development was drawn up and announced. This was the first definite announcement on immigration to be announced in Canada.

Dr. Black's Career
In engaging Dr. Black, the Canadian National Railways secured an officer who is probably better acquainted with the immigration needs of Canada, and the best methods of remedying those needs, than any other man in the country. All his life he has been connected with the agricultural industry and has run the gamut of all its intricate phases. He was born and brought up on a farm in Dufferin County, Ontario, and in 1902 graduated from the Ontario Agricultural College with a Toronto University degree. At his graduation he was appointed editor of the "Farmers' Advocate," Winnipeg, Manitoba, and he held this post for two years. In 1905 he joined the Government of Manitoba as Deputy Minister of Agriculture, a post which he left the following year to become President of the Manitoba Agricultural College. He remained in this important position until 1916, when he became Commissioner of Agriculture for Canada. At the conclusion of the Great War in 1918, Dr. Black was appointed Chairman of the Soldiers' Settlement Board of Canada, a position he held until his appointment, in 1921, as Deputy Minister of Immigration and Colonization for Canada.

Dr. Black is a man who is thoroughly respected, both for his opinions and his achievements, throughout Canada. He carries a lasting and genuine enthusiasm for his work, and as a quiet but eloquent and convincing speaker he is well fitted to broadcast the message of his important mission.
The Policy.
There are seven points to the programme which has received the approval of Sir Henry W. Thornton, and the principles of policy will be placed into effect immediately. Dr. Black sailed for England again on January 5th, and on his arrival in London his department commenced to function actively. The thorough character of the policy can be judged from a recapitulation of the seven principles, which are as follows:
1—To influence the immigration and satisfactory settlement in Canada of the largest possible number of people of productive capacity that the country can absorb and assimilate.
2—To contribute to the dissemination of information concerning the vast and extensive natural resources of the Dominion and the widespread opportunities for industrial development, so that capital may be attracted from other countries and invested where enterprises will be legitimately rewarded.
3—To promote the land settlement of new Canadians under conditions that will ensure the maximum possibility of success in their farming operations, and enable them to enjoy such social and religious institutions as are necessary to individual happiness and contentment.
4—To encourage improvement in agriculture, that more diversified methods may be employed in farming, and that crop, livestock, and dairy production may be increased in accordance with market demands and prospects.
5—To assist by organized effort in the immigration of young people of desirable type and character, especially from Great Britain, and in their placement in respectable rural homes where they may become qualified to participate in constructive activities and acquire citizenship of distinct value to Canada.
6—To aid in the development of new opportunities for services and to facilitate every effective means of selecting immigrants physically fit and anxious for work.
7—To co-operate with the Federal and Provincial Governments and business organizations throughout the Dominion in promoting all measures calculated to contribute toward an increase in immigration of adaptable people, and in their settlement under the most favorable conditions possible.

NARAMATA NEWS
Current Events of Town and District
A successful card party was held in the Unity Club on Friday evening, in aid of the band fund. The guests numbered between thirty-five and forty. The first practice of the band will be held this week.
Frank Hughes returned on Tuesday morning from a two weeks' trip to the Coast.
Twenty-seven neighbors gathered in the Wells orchard on Saturday for a pruning bee. Lunch was served in the church basement, and the workers were conveyed to and from the ranch by Gerald Williams.
The members of the Women's Auxiliary met on Friday afternoon at the home of Mrs. Rushbury, Mrs. Geo. Weaver presiding. Tea was served by the hostess, assisted by Mrs. A. C. Horswill.
The monthly Anglican service was held on Sunday afternoon, the Rev. H. A. Solly officiating. The subject of the sermon was the benefits received through spiritual preparation through the season of Lent. The choir gave Thomas Smith's anthem, "O, Worship the Lord," Miss Severs presiding at the organ.
F. C. Manchester is preparing some of his town lots for an asparagus plantation, having grown several hundred plants last season.
Miss Vera Salting was married in Penticton on Monday to Mr. Petersen. The honeymoon will be spent in Dakota.

GOOD PRINTING

for the efficient business man

THE efficient man would as much think of sending poor unattractive printed matter as he would an unkempt, careless, or ill-bred salesman. Your printing often introduces you to your business prospects. If it fails to make an acquaintanceship, it's an unsatisfactory job. Particularly does it apply to the stationery you use—as well as other printed matter. We are equipped to handle any printing job you may want and we take pride in turning out only the best work. Try us.

Local Happenings

Mr. and Mrs. P. O. Minnich are now living in the Wright home in Garnett Valley, having moved in this week.

Mr. and Mrs. A. C. Turner came back on Monday morning's train from Vancouver, where they had been on a short visit.

Mr. and Mrs. Basil Stuart were home over the weekend, having motored down from Vernon on Saturday and back on Sunday.

Miss Gertie Howson, agent at Kere-meos of the government telephone and telegraph service, was a recent visitor to her home here.

J. W. Jones, M.L.A., accompanied W. A. McKenzie, M.L.A., to Oliver on Friday, where they addressed a public meeting that evening.

At a meeting of the directors of the hospital society held on Monday evening, P. E. Knowles was elected to the position of secretary-treasurer.

Major E. E. Hutton returned on Monday from a visit to the Old Country. Miss Molesworth, his niece, who has been visiting friends in Kelowna, returned with him.

G. C. Benmore returned on Saturday from Vancouver. He went down to the Coast to meet his brother, a representative of a large importing company at Liverpool.

H. H. Elsey returned Wednesday morning from Vancouver, where he and Mrs. Elsey have been visiting their daughter. Mrs. Elsey will remain at the Coast for a time longer.

Mr. and Mrs. M. Barr have taken up residence in Alberni Cottage, their new home on Shaughnessy Avenue, recently occupied by Mr. and Mrs. Wilberforce.

Mr. and Mrs. H. M. Lumsden and George Dewar returned early this week from southern California, where they had spent the winter. They made the journey both ways by motor.

A. C. Muile, owner of a property on Paradise Flat, where he resided until moving to the Coast, came in last Saturday to attend to business in connection with the property and left again on Monday.

The annual meeting of the Art League will be held Wednesday, 19th, 8 p.m. above Drug Store, West Summerland. Election of officers and discussion of plans for the coming season.

Members of the Library Association and all others interested are requested to meet tomorrow, Friday at 8 p.m. over the Drug Store, West Summerland, to receive the report of the committee on the question of starting the library.

Mrs. G. N. Gartrell, Mrs. H. H. Croese and Mrs. Lloyd-Jones returned Wednesday morning from Vancouver, where they had been visiting for ten days or more. Messrs. Cartrell and Croese, who went down with them, returned on Friday last.

A. J. Beer returned on Tuesday coming in via K.V.R. from the Coast, where he had stopped off for a day on his return from southern California. Mrs. Beer and children are visiting friends in Seattle for a time before returning home.

Mr. and Mrs. Walter Wright and family are expected back in Summerland within the next few months. Since leaving here they have been residing at Renfrew, Ontario, Mr. Wright's home city, but are homesick for the sunny Okanagan. It is probable they will make Summerland their home permanently.

Roger F. Daniels, about sixty years of age and practically stone deaf, was instantly killed on the Kettle Valley tracks at Princeton a few days ago. Daniels had been putting up wood in a yard near the track and while crossing the railway was struck by an engine and engine which was returning to the Princeton yards.

SUMMERLAND WEATHER REPORT

Below is a report furnished by the Dominion Experimental Station here for the week ending Tuesday:

Date	Max.	Min.	Rain	Snow	S.S.
March 5-54	35	9.2
March 6-18	33	0.0
March 7-53	35	4.7
March 8-40	33	4.1
March 9-48	35	.01	0.0
March 10-50	35	7.3
March 11-40	29	8.5

F. M. Broddy has leased the Lauer cottage in Peach Orchard.

E. R. Simpson is now in Los Angeles, where he has a position.

The Baptist W. A. wish to reserve the afternoon of April 15th for the sale of potted plants. 33L

Mrs. A. C. Patterson and young son, Gordon, were guests for a day last week of Mrs. J. A. Darke.

Miss Nellie Fisher wishes to advise her friends and patrons that she is again at her place of business. 33L

O. F. Zimmerman left here recently for San Francisco. From there he went to Sacramento, where he is now employed.

The Scouts and Cubs are holding a supper followed by a short program in the Parish Hall on Friday evening of this week.

Mr. and Mrs. J. D. Wood are expected back this week end from San Francisco where Mr. Wood has been employed as carpenter for the winter.

S. Turner is selling his place on Paradise Flat to the former owner, H. Dunham, and is moving into the cottage on the G. I. Gray property.

The senior Bible class of St. Andrew's church held a very successful social in the hall last Friday evening, with about forty persons present.

Miss Jean Ritchie was on Saturday appointed by the council as stenographer and assistant to the municipal clerk at a salary of sixty-five dollars.

Roger Tingley has requested the council to remove about twenty small pine trees on the roadside near his fence on Paradise Flat. He claims the trees are injuring his orchard.

Miss Dorothy Garnett was given a surprise party Monday evening, when her class-mates, members of the second year high school, gathered at her home to celebrate her birthday.

Mrs. Munn, Mrs. Schwass and Miss Sinclair left Tuesday morning for Armstrong as delegates from Summerland to a three-day session of the Kamloops Presbyterial being held in that town.

Some much needed repairs to the big steel flume on the main canal between Trout Creek and the reservoir have been made this spring under the direction of the municipal foreman.

Jack Harris, formerly of the staff of the Bank of Montreal here, and more recently of Enderby, has lately been transferred to the Armstrong branch according to word received here.

C. R. McKay, Garnett Valley, has asked for an irrigation connection across a piece of land included in the Jenkinson pre-emption. His application was referred to the water committee.

G. H. Inglis has applied to the municipality for a pipe connection to his property at a point near where the Lees' packing house stood. The application was referred to Foreman Tomlin for report.

Foreman Tomlin made a verbal report on Saturday to the municipal council of the condition of the sidewalks on Shaughnessy Avenue and adjacent streets. Instructions were given to have them put in condition.

The Dollyanna group of St. Andrew's C.G.I.T. entertained a number of their friends recently in St. Andrew's Hall. The girls served supper and various games were played and all had a jolly time.

Mr. and Mrs. C. H. Gayton returned on Wednesday after an absence of several months, spent with relatives in California. Mr. and Mrs. Gayton visited for a time at the Coast on their return journey.

A. G. Hallam of Kelowna was the guest last Friday of V. M. Lockwood, Mr. Lockwood and Mr. Hallam travelled together to Summerland in their motor cars and camped in the Peach Orchard park. Mr. Hallam went on to Kelowna where he has since resided and Mr. Lockwood has since been resident here.

Capt. P. S. Roe has his loud speaker set up on a ledge outside his house and radio programs are being heard through it at great distances. The other night people on the wharf at Naramata heard it very distinctly, and residents on the bench as far north as the Gordy ranch also heard the music distinctly.

Wedding Bells

GOWANS—STUART

A most popular local event was solemnized at ten o'clock on Wednesday morning, the 12th instant, at the home of Mr. and Mrs. Alex Stuart, when their second daughter, Annie Holmes Henderson, became the bride of Mr. John Gowans, Rev. W. A. Alexander being the officiating clergyman.

The bride was charmingly gowned in white silk canton crepe with heavily embroidered panels hanging from the shoulders, her white veil being artistically arranged with a wreath of orange blossoms. She also carried a bouquet of white carnations and maidenhair fern and was attended by her sister, Miss Hazel, attired in a very becoming frock of electric blue crepe-de-chene embroidered in silver, Mr. Vivien supporting the bridegroom. Other attendants were Miss Mona Stuart, whose dainty little dress was of cream net over pink silk and Master Tom Young, wearing a black velvet suit with ruffles of lace.

After the ceremony an exceedingly dainty luncheon was served and the usual toasts proposed.

The wedding presents on view were numerous and valuable and included a dining-room suite, also chesterfield and easy chairs.

The young couple left for Coast cities by the noon train amid a perfect deluge of confetti and good wishes and the large number of friends accompanying them to the station was in itself an eloquent proof of the popularity in which they have both been regarded in the district.

The bride travelled in a smartly tailored navy suit with a very becoming hat of golden fawn satin and waist to match.

Through the courtesy of Mr. J. W. Jones, M. L. A. the Review has received a copy of a map recently issued by the B. C. government, showing the electoral districts of the province.

Mrs. H. C. Mellor was surprised one day last week by a party of friends on the occasion of her birthday. A very pleasant evening was enjoyed. Mrs. Mellor celebrated the anniversary by entertaining her Sunday School Class, on which occasion she was the recipient of a cut glass water pitcher and tumblers and tray.

While launching a big truck on the ways at Naramata preparatory to pulling one of the ferry boats up for repairs, Capt. P. S. Roe on Saturday suffered severe injury to his foot, which will require his laying by for some days. He was immediately rushed to the hospital and an X-ray taken, which revealed that no bones were broken.

Mrs. W. A. Alexander and Mrs. T. B. Young entertained a number of friends last Thursday afternoon at the manse in honor of Miss Annie Stuart. Several interesting and amusing contests and games were enjoyed, one of these, in which the contestants were required to make as many words as possible in a given time from the word "matrimony" being won by Miss Hazel Stuart. Delicious refreshments were served by the hostesses after which, to the strains of Mendelssohn's Wedding March, played by Miss Bertha Johnston, little Miss Mona Stuart, daintily gowned as a tiny bride and escorted by Master Thomas Young, as the groom, entered the room with a tiny wagon, on which were many useful and dainty gifts for the bride-elect, which they presented to the guest of honor.

CHORAL SOCIETY TO HOLD CONCERT SOON

During the winter months the Summerland Choral Society has been very busy with preparation for the annual concert which will be given at St. Andrew's Hall on Thursday, March 27th, at 8 o'clock. Enthusiasm has been fully maintained under the able conductorship of Mr. G. W. Cope, and music lovers can look forward to a very pleasant evening, the works to be taken including selections from such well known composers as Sir Edward Elgar, Edward German, Piniuti, etc. In addition to chorus work and part songs by the society there will be solos by some of those who are already known to a Summerland audience and we believe the conductor has also one or two surprises in store in the way of new talent.

The cheapest, stupidest, and easiest thing to do—finding fault.—Dr. Frank Crane.

Oscar Tells What He Knows "In-Installments"

by Terry Gilkison

Summerland Apples Retail Two Pounds For Quarter

(Continued from Page 1) Ontario fellows beaten to a stand still. Looks are half the battle and the B. C. stuff does make a fine showing in color and pack. We know the quality is there too and we can recommend them and do. He had two boxes there of Jonathan packed in Summerland and one Delicious packed at Vernon. Varieties are never asked for, simply good apples. He has been so often disappointed with Ontario fruit, such heavy loss through careless pack and inferior grading, that he does two-thirds of his trade with B. C. stuff.

Do Not Know the Varieties
"The next store I went into handles barrel apples only till January, and after that there were too many 'bad ones' so he just kept a few 'box apples.' Didn't know varieties himself and said they were never asked for any variety. Folks just wanted eating apples, so he got a few boxes to oblige his customers. Never sold any full boxes; just by the pound.

"Mr. McClelland is a hustler and has a store 'in the centre of things.' He had three boxes of B. C. apples, Jonathan and Winesap from Summerland. He is delighted with the quality and grading, the small loss and the fine display value of the fruit. It is seldom that they sell a box at a time but receive many calls to deliver 'box apples' for dessert and table purposes. From November they have been selling them at two pounds for twenty-five cents. They have some barrel apples, only to supply trade for cooking purposes. The small loss, the nice color and grading is what wins. They wish they could get them cheaper and put the price down so as to sell more. They are B. C. apple boosters because of quality and small shrinkage.

All Chose B. C. Apples
"Across the street from him is a grocer who does a 'solid business.' His father had the stand before him. He supplies country trade and a large town trade. He had Ontario apples and B. C. apples on display side by side, and the Ontario apples sold the B. C. fruit. The careless pack, poor grading, lack of color, jumble of sizes, alongside of the neatly packed, even colored 'box apples' made everyone point to the B. C. apples and say 'I'll take a few pounds of those.' He had some Jonathan packed at Kelowna. When they got a phone call they quote 'box apples' (meaning B. C. apples) and barrel apples or 'just apples.'
"The same comment I got all down

the street, even out to the 'corner groceries' in the residential sections. All sold Jonathan and Macs. The Delicious and Winesap have been offered this month but no other varieties.
"They are shipped in by heated cars from Toronto, Smith Falls or Ottawa, costing \$3.25 plus .45 freight to the grocery. Barrel apples, Ontario, cost them \$6.00 and .60 freight. "B. C. has a firm hold on Ontario markets and it is pack and color, not variety that has won it.
"Delighted to see in the last Review someone (Mr. Barnes, I think) patting the directors of the co-operative on the back instead of kicking them around the corner.
"The Review is a very welcome visitor at our house each Wednesday and often our dinner gets cold because the locals can't wait. Some new names there now of course, but reading about old friends makes us feel quite at home, and dinner then tastes a lot better."

VETERANS HAVE AN AMBITIOUS 1924 PROGRAM
Officers and Committees Elected at Annual Meeting On Tuesday.

At the annual general meeting of the Summerland branch of the Great War Veterans' Association of Canada, held Tuesday evening of this week, the following officers and committees were elected for the year: president, Comrade W. Atkinson; 1st vice-president, Comrade E. C. H. Windeler; 2nd vice-president, Comrade V. J. Bernard; secretary-treasurer, R. S. Jackson; corresponding secretary, G. Y. L. Crossley; executive committee, S. Bartholomew, N. Bentley, B. Newton; social committee, F. Mossop, A. Howland, N. Bentley, J. R. Graham, W. Snow; tennis committee, A. Howland, G. Y. L. Crossley, S. A. Siddall; relief committee, V. J. Bernard, T. Hermon, E. C. H. Windeler; house and grounds committee, C. A. Marshall, G. Y. L. Crossley, B. Newton, V. J. Bernard, J. Corner and S. A. Siddall.

An ambitious program for the year was mapped out. Included in this was the erection in the English church cemetery of a gravestone for Sapper Foreman.

In memory of the Summerland boys who fell in the Great War it is proposed to plant maple and mountain ash trees on the ground in front of the clubrooms.

One tennis court has been completed and was in use last season and it is planned to have a second one this year. A bowling green is being laid. It is also proposed to erect a flagpole.

Additions to the clubrooms will comprise a twenty-five foot extension in the front of the building with a kitchen in the rear, and a verandah will also be added.

A special committee of Comrades Bentley, Jackson and Windeler was appointed to arrange for a public meeting to be called in anticipation of the annual Summerland sports day on June third.

Farm statistics show that only one thousand acres of land was seeded to corn in Alberta in 1910, while last year over 50,000 acres were under crop to that cereal. This is a good indication of how rapidly corn culture is increasing in Western Canada in connection with mixed farming operations.

OFFERS TABLES AND SEATS FOR PARK

Read's Garage has offered to contribute a few tables and seats for the tourist park. These, it was promised, would be well constructed and nicely finished and stained. The one condition, which the reeve and council were ready to grant, was that the name of the donor should be put on the articles.

The offer came to the municipal council and was passed on by that body to the parks commissioner with the endorsement of the council.

PEACHLAND DOINGS

A Weekly Chronicle Furnished By Our Local Representative.

Miss Jean Dryden came home Saturday evening to spend Sunday with her parents. She returned to Vernon on Monday morning.

G. H. Greata, H. Williams and Walter Shaw were visitors to Kelowna on Monday.

W. Moffat, of Vernon, was a weekend guest of Mr. and Mrs. Wm. Dryden.

Jas. S. Moore was in town this week, motoring up from Penticton.

After a few days here with his family J. Hyde left Monday evening to return to his work down the lake.

Jack Moore returned to Penticton Monday evening after a short visit here with relatives.

J. W. Harris, principal of the Peachland Public school, with residence in Summerland, has leased the Sutherland cottage and small orchard in connection and has moved in. He will bring his family up for portions of the summer months.

FOUR HUNDRED MILLION FOR PRAIRIE FARMERS

The Winnipeg Free Press computes the income of the farmers of the three western Canadian provinces for the past year at \$387,000,000. The calculation takes in the amount of the 1923 crop inspected up to December 31st, the value of stock sold through the stockyards, the returns from dairy produce, eggs sold out of the provinces, and wool handled through growers' associations. It does not take account of the large amount of poultry exported, of commodities consumed on the farm, or of wool sold to dealers. Estimating these items, the opinion is expressed that the gross returns in cash and kind from the farms during the year amounted to \$400,000,000. And there is, of course, still a large amount of the year's grain crop to be marketed.

Reply to Collection letter

Dear sir:
I rec'd your letter about what I owes you. Now be pashtnt. I ain't forgot you—and as folks pays mo I'll pays you but if this was judgment day and you was no more prepared to meet your God than I am your account then you shore would go to hell. Good buy.

His Hearing Restored
The invisible ear drum invented by A. O. Leonard, which is a miniature megaphone, fitting inside the ear entirely out of sight, is restoring the hearing of hundreds of people in New York city. Mr. Leonard invented this drum to relieve himself of deafness and head noises, and it does it so successfully that no one could tell he is a deaf man. It is effective when deafness is caused by catarrh or wholly destroyed natural drums. A request for information to A. O. Leonard, Suite 436 70 Fifth Ave., New York City, will be given a prompt reply.

Volume 16, Number 34

SUMMERLAND, B. C., THURSDAY, MARCH 20, 1924.

\$2.50, Payable in Advance

TELEPHONE CO. PAYS ANNUAL 6 P.C. DIVIDEND

Affairs In Satisfactory Condition—Good Cash Balance Shown.

Shareholders of the Summerland Telephone Company, Limited, in an annual meeting held on Thursday afternoon, approved of the recommendation of the directors that a dividend of 6 per cent. be paid. The meeting was better attended than any similar meeting for several years.

The president, H. C. Mellor, briefly addressed the shareholders with a review of the operations of the company during the past year and an outline of its present status and closed with the motion that the financial statement and reports as presented be adopted. This resolution was seconded by the vice-president, Dr. F. W. Andrew, and was carried unanimously.

The retiring directors were Messrs. Mellor and Andrew and they were re-elected to office. The other members of the board are Messrs. W. Ritchie, C. J. Huddleston, J. J. Mitchell and A. B. Elliott.

The statement showed a somewhat smaller gross revenue for 1923 than for the previous year but the expenses had been less and during 1922 less money from the revenue account had been used for extensions or other capital expenditure. The year closed with the sum of \$2,142.06 on hand which will be applied to pay dividends and reduce liabilities.

Life insurance risks placed in Canada last year exceeded one million dollars a day.

MAKE MONEY FOR HOSPITAL

Gets Over Hundred Dollars from Supper and Show.

Seventy-two dollars net proceeds were realized by the Ladies' Hospital Auxiliary from the chicken pie supper given last Saturday evening in the Parish Hall. An excellent meal was served by members of the auxiliary, adults being charged fifty cents and children twenty-five cents. From the sale of tickets for the picture the same evening, the auxiliary received \$41.15.

At the regular monthly meeting of the auxiliary held at the rectory Tuesday afternoon a hearty vote of thanks was accorded Mrs. Fosbery for her contribution of chickens and Mr. Lockwood, for the beneficent performance at the theatre.

Fifteen members were present at this meeting which was presided over by Mrs. Solly. The matron of the hospital made a requisition for a truck for moving the beds from the wards to the verandah. This will be purchased by the auxiliary.

Preparations are now being made by the auxiliary for the holding of a bazaar early in May. Nine stalls have been arranged for: arts and crafts, in charge of Misses Cordy and Vleary; old curiosity shop, Mrs. Fosbery and Miss Cartwright; children's ware, Mrs. Stark and Mrs. Thornber; ladies' ware, and aprons, Mrs. G. H. Inglis and Mrs. W. Inglis; fancy goods, Mrs. Wright; pantry, Mrs. H. Smith and Mrs. Waldon; dairy, Mrs. M. Tait and Mrs. Otley; candy, Mrs. O'Mahoney and Girl Guides; novelties, the Rangers; afternoon tea, the C.G.I.T.; supper Mrs. Andrew.

FEATURES OKANAGAN BEAUTY SPOT

A picture of the overhanging rock at Vassoux Lake, about two columns wide and six inches deep, appears on the last page of the recent issue of *Heart's International*, published under the auspices of *Heart's International Travel Bureau*, together with a brief description of the wonderful scenery of the Okanagan Valley.

EGG ASSOCIATION BUSINESS GROWING

Summerland Poultry Produce Association continues to do a steadily increasing business. During the first two weeks of March over 1800 dozen eggs were marketed, according to the manager, H. J. Sanderson, which, he states, is nearly double the usual output.

Questioned as to the price, Mr. Sanderson stated that the average for that period would be between 17 and 18 cents.

The eggs are now being marketed in weekly pools and there is a general upward tendency in price.

At the last meeting of the executive arrangements were made for installing a telephone in the egg receiving station.

BURNING COALS FALL TO FLOOR BLAZE RESULTS

Morrow Cottage, Shaughnessy Avenue, Damaged on Saturday.

Shaughnessy Avenue was the scene of another fire on Saturday afternoon when the Morrow cottage narrowly escaped destruction. Mrs. Morrow was out in the yard burning leaves and other material she had raked up and when her attention was directed to smoke coming from under the house, she was sure that the smoke had originated from her fire in the yard, but later was persuaded by some boys, who had directed her attention to it, that the house was a blaze.

The alarm was given and quickly responded to, although some difficulty was experienced in drawing the hose reel over the recently gravelled surface of the street and finally an automobile had to be requisitioned to tow it to the hydrant. The furniture was quickly moved out of the house. It was with difficulty that the source of the fire was discovered through the dense smoke. Hot coals had fallen out of the stove and burnt their way through the kitchen floor and lumber nailed under the joists. Smoke oozing through the roof led to the opinion that the fire was around the chimney. The pressure in the fire hose was not sufficient to reach the roof and a bucket brigade was formed. Later, when the fire was found to be in the floor and under the house, the hose proved effective.

A trap door in the floor between living room and kitchen was the occasion of several casualties. The room was dark and with the atmosphere filled with the smoke it was not possible for anyone going in from outside to see the opening and at least four people fell into the hole. T. B. Young was the worst sufferer. He broke a rib under his left arm when he fell. Mrs. W. Cartor also suffered considerably. The other two escaped with skinned shins and a strained ankle.

REMOVAL OF DUTY LESSENS DEMAND

Vernon, March 17.—President A. T. Howe and Managing Director B. Steuart left for Inko points on Saturday morning.

Mr. G. A. Barrat returned from the States on Thursday last. He expressed himself as very satisfied with the information gathered across the line. Colonel Scott is expected back in Vernon this week.

The output of cars for the week ending March 15th totalled 15.

The falling off in the movement is attributed to the removal of the Dump Duty by the government, this making cheap American apples obtainable at prices comparable with Associated offerings.

B. C. SNAKES ARE AID TO FARMERS

Victoria.—Do not kill snakes in British Columbia, is the advice of the Natural History Society of B.C. The snakes of this province are not only harmless (except the few rattlesnakes in the dry belt) but are of great value in destroying rodents and other small pests of farm and field, says the committee.

Associated Growers May Not Function Again This Season

Useless to Carry on Unless They Can Control the Market is View Taken by Central and Locals Alike—Many Acres Dropping Out—Meeting to be Held to Consider Situation—Summerland Likely to Propose Brokerage Office under Control of Locals.

It is very improbable that the Associated Growers of B. C. will function again this year. A decision to this effect has practically been reached, subject to reconsideration only if the situation very materially improves.

President A. T. Howe and Acting Manager Basil Steuart have been visiting the various locals making a survey of the situation and have since recommended to the directors of the several locals that the big co-operative organization be disbanded and that each local decide for itself what course of action it will pursue.

This decision is the result of the diversion of possibly 800 carloads of fruit for 1924 through the sale of orchards that were signed up to the Associated.

Messrs Howe and Steuart had a conference with the directors of the Summerland Co-operative last Saturday evening and it is stated that the local directors are of the opinion that unless the Associated can control at least 90 per cent. of the tonnage of the province it will be useless to carry on.

G. I. Gray, president of the Summerland local, says that he and his associates consider it most unfair for part of the growers to carry the whole burden of stabilizing the market. While it is true that those who sold their fruit through other channels may have in some cases received better prices, the price they did receive was due to the existence of the Associated.

The biggest loss to the Associated is at Kelowna where over four hundred cars of apples have been affected through transfer of properties and the Kelowna

Exchange is determined not to carry on under these circumstances.

It is said that whereas the Associated last year controlled from 80 to 85 per cent. they would not, under the present situation, control much over 60 per cent. of the output of the province.

It is understood that directors of the Penticton local are not in favor of the Associated continuing to function unless it had 100 per cent. support of the growers. Naramata growers take much the same view.

The directors of the Summerland Co-operative will meet tonight to decide on a policy. It is not improbable that they will advocate substituting a brokerage office for the relatively expensive establishment now carried on by the Associated. Through a broker's office which would be established and controlled by the various locals, a consignment market could be avoided and prices stabilized and more or less controlled. There would, for Summerland, be the added advantage of giving it the local pool which the Summerland Co-operative has so much desired. Sales only would be made by the brokerage office. Collections and adjustments, handling of the pools, which in every case would be local, and all such work would be done by the local office. This is not dissimilar to the Northwest Fruit Exchange, of the northwestern states, which markets a large volume of the apples of that territory.

Following is an open letter to all growers received last night from Vernon with the request that it be published in this issue:

GOVERNMENT AID FOR SYSTEM SOUGHT

Superintendent W. T. Hunter of the Experimental Station and the municipal council had an informal conference recently on the subject of the municipal irrigation service to the farm. As is generally known, the original contract was made at a figure which has since been proven to be below cost and for several years it has been the endeavor of the municipality to have the Dominion government make an additional grant toward that section of the municipal irrigation system, which supplies the farm, or in the alternative, that they pay an increased annual rate. Further data will be gathered and another conference held shortly.

Seventy-nine per cent. of Canada's National Debt is held in Canada.

ASSOCIATED GROWERS OF BRITISH COLUMBIA, LTD.

Vernon, B. C., 19th March, 1924.

OPEN LETTER TO ALL GROWERS:

During the last few days quite a number of reports of property changing hands have drifted into the office of the Associated Growers. Your advisory committee immediately took steps to gather all the information they possibly could by getting in contact with several of the leading locals and by sending out an enquiry as to the probable amount of tonnage that might possibly be lost through these transfers.

After carefully considering the information your committee believes that they are safe in saying that fully 600 cars of fruit will be involved. There is every reason to believe that the majority of this fruit will remain outside the Associated and will pass into the hands of the independents. This is so serious that they feel it is their duty to inform the growers, that, if the information is correct, it will be impossible for the Associated to control the market under the same conditions as existed last year—instead of having 20 per cent. of the fruit loose, this year, with this additional tonnage breaking away it would probably amount to about 40 per cent.

The probability is that this large percentage of fruit would be marketed on the prairies, and would come in direct competition with the fruit of the growers that would remain with the Associated, making it practically impossible for your sales force to make sales f.o.b. shipping point. In all probability the same chaotic conditions that existed in '22 would, under these circumstances, be repeated this year, with a large part of your fruit forced into the export markets. Your committee feel that the conditions are so serious that they call for immediate action on the part of all the locals and all those who are deeply interested in the welfare of the Associated Growers. It is unthinkable that the organization can be allowed to pass out of existence after the service that has been rendered to the growers during the past year—at the same time it can hardly be expected that the balance of the growers, who will be left with the organization, will if our information is correct, carry on until they are forced out by the action of those

MOST TELEPHONES IN BRITISH COLUMBIA

There are more telephones in use in Canada per 100 of population than in any other country of the world, excepting the United States, and British Columbia's average is higher than any other province in the Dominion. The average number of users per 100 population in Canada is 10.59, and British Columbia is 15.19. Provincially, the number of telephone users is as follows:—British Columbia, 15.19 telephones per 100; Alberta, 10.89; Saskatchewan, 12.24; Manitoba, 10.87; Ontario, 13.59; Quebec, 6.58; New Brunswick, 6.96; Nova Scotia, 6.87; Prince Edward Island, 5.80. This high rating in telephone usage is accepted as indication of the high standard of living in Canada as compared with other parts of the world.

MOSQUITO MAN GIVES ADVICE

Government Expert Heard at Trout Creek Farmers' Institute.

Trout Creek Point people are preparing to rid themselves of the mosquito nuisance, which insect has long been troublesome in that section.

Monday night the Farmers' Institute listened to a very interesting and instructive address on the subject of mosquitoes by Eric Hearn, Dominion entomologist, who has been connected with the control of this insect pest at Banff and has been studying the subject in the Fraser Valley. Mr. Hearn expects to be stationed in the Okanagan for perhaps three years, with headquarters

breaking away. In addition to the above, very unsatisfactory conditions exist at Kamloops and Armstrong and there is a strong possibility that some loss may occur at those points which would add to the above tonnage. ASSOCIATED GROWERS OF B. C. LIMITED. A. T. HOWE, PRESIDENT.

TO OPEN LIBRARY WITHIN FEW DAYS

Summerland library association has been successfully launched with J. W. S. Logie as president, P. E. Knowles, secretary-treasurer and S. A. MacDonald, Mrs. Pares and Mrs. T. P. Thornber additional members of the executive of five. Already about 200 volumes have been donated and shelving has been ordered. It is planned to open the library next week. The appointment of a librarian has been left with the executive. For the present the library will be open for two hours on each Wednesday afternoon and two hours on Saturday night. The membership fee has been fixed at two dollars, which will entitle the member to free use of books.

SUPT. HUNTER ON CONTROL OF INSECT PESTS

Makes First Address Since Appointment to His New Position.

W. T. Hunter, the new superintendent at the Dominion Experimental Station, made his first public appearance as superintendent, when he briefly addressed the Trout Creek Farmers' Institute at the regular meeting on Monday. There was a good attendance and after some routine business and proposing and answering of questions, which was well conducted by the chairman, H. R. McLarty, the latter introduced Mr. Hunter, and in doing so explained that the superintendent was not addressing public meetings this season.

Mr. Hunter, in opening his address, said he could not refuse his own neighbors when requested to speak to them on the subject of insect pests, but he felt he had nothing over their own local man, J. Tait, who could fully advise them on this subject.

He was very glad to be able to state that the codling moth danger had been removed and that the orchards adjacent to the Farm would not this year be under quarantine. This statement was confirmed by Inspector Tait. Mr. Hunter expressed great satisfaction that this danger had been averted as it meant avoiding a heavy expenditure for spraying.

In replying to a suggestion that the Farm was competing with the private producer, Mr. Hunter stated that it was not the policy of experimental farms to compete in the open market. Their work was chiefly experimental and everything produced was to serve an experimental purpose.

With respect to eggs, the Farm had been approached by the egg association with the request that it turn all its eggs in to the association in order to help the latter increase tonnage. The Farm will never market anything. (Continued on Page 6)

SAYS FAKE AGENCY GETS THOUSANDS

Vancouver.—Hundreds of people in B. C. are receiving letters from a London agency that claims to be agents for a huge estate seeking heirs. The Hook comes out with the statement that the agency is a fake. It is stated that thousands of dollars have been sent to the agency from various parts of the province since last November, and scores of families have been living in wild hopes of inheriting a fortune.

COUN. SMITH BOUGHT NEARER HOME

With respect to the recent sale of the Lawlor property to O. G. Smith, we have since learned that we were misinformed as to the property concerned in the transaction. The lot bought by Conn. Smith was one of three acres adjoining the J. G. Robertson property on the Giant's Head road and not the ten-acre orchard below G. J. Conlter White's, formerly owned by Mr. Lawlor, but which was purchased by Wm. H. F. Welsh over two years ago and who has since built a house on it.

FIGHT FIRES FANNED INTO LIFE BY GALE

Timely Arrival of Uneasy Sleeper Saved Town from Disaster.

But for the timely arrival of M. Scurrah on the scene, Summerland would likely have suffered another conflagration as the result of the gale which sprang up early Friday morning last.

During the general clean-up along Shaughnessy and Beach Avenues and other streets, numerous fires were lighted for the burning of leaves and other rubbish. Before six o'clock the fire hose was turned on all these fires and apparently they were extinguished.

Feeling uneasy when the wind was doing its worst, Mr. Scurrah partly dressed and went out about 2.30 on Friday morning and was greatly alarmed to find a fire burning briskly on the north side of the Summerland garage and only a few feet away from which sparks were blowing through under the building. He called for help but no one heard his call and as the fire hose was close by he set to work to connect the hose to the hydrant and turn on the water. Fixing the hose in a position so that it would play on the fire, he went back to his home for more clothing and to turn in a call for help over the phone when he discovered that the storm had put his line out of commission.

Near the Leslie cottage and further down at A. Stark's and other places along the street the gale had fanned remaining sparks into dangerous fires and several citizens were kept busy for some time and not until about five o'clock was all danger removed.

LEAF ROLLER CAUSES WORRY

H. H. Evans Gives Excellent Address Before Farmers' Institute.

Leaf roller, a species of insect pest that is becoming a serious menace to the fruit grower, was the subject of an interesting address given by H. H. Evans, district horticulturist, Vernon, before the Farmers' Institute last Thursday evening. So bad is this insect becoming that Mr. Evans described it as almost worse than the codling moth. The method of control was dealt with at some length by the speaker who was well received by the large number present and, following the address, was asked many questions by an intensely interested audience. Even after the meeting was formally dismissed Mr. Evans had many questions put to him by groups who gathered around him.

J. Shephard, Summerland's representative on the board of the directors of the B.C.F.G.A., gave a summary of the proceedings of the annual convention which has already been fairly well covered by the report furnished The Review by Mr. Shephard.

Trout Creek Farmers' Institute and the Women's Institute are planning for improvements to the Peach Orchard cemetery and wrote the Farmers' Institute seeking their co-operation. The president and the secretary were appointed a committee to work with representatives of the other two organizations.

The president, J. Tait, occupied the chair. The Institute now has about sixty members.

NEWSPAPERS MOST EFFECTIVE MEDIUM

Wm. Wrigley says: "I believe in newspaper advertising. I spend about a million dollars a year for newspaper space to tell the world about the goods I have to sell. "Nearly everybody reads the papers and they are the most effective medium to reach the buying public quickly and often."

The Summerland Review

Established August, 1908.
Published at Summerland, B.C., every Thursday by
THE REVIEW PUBLISHING COMPANY, LIMITED
Ralph E. White, Editor and Manager

An independent family newspaper covering Peachland, Summerland and Naramata and adjacent districts.
Member of Canadian Weekly Newspapers Association.
Member of British Columbia Selected Weeklies.

Subscription Rates—In British Empire, in advance, \$2.50 per year; six months, \$1.40. To U.S.A. and other countries, \$3.00 per year.

Advertising Rate Cards and information respecting territory and samples of paper mailed upon request, or may be seen at the office of any advertising agency recognized by the Canadian Press Association.

Advertisers must have copy in by Tuesday noon in order to insure changes for standing advertisements. New display advertising copy can be accepted one day later.

All instructions for cancellation or alteration of advertising must be in writing.

Correspondence—Letters addressed to the Editor and intended for publication must be short and legibly written on one side of the paper only. The longer an article, the shorter its chance of insertion. All communications must bear the name of the writer, not necessarily for publication. The publication or rejection of articles is a matter entirely in the discretion of the Editor. No responsibility is assumed by the paper for the opinions expressed by correspondents.

Typographical Errors—In the event of a typographical error, advertising goods at less than the proper price, the newspaper will furnish letters to be posted in the store stating the correct price, but goods may not be sold at the price printed and the difference charged to the newspaper.

A POWERFUL PICTURE

Is Gloria Swanson's New Vehicle "Prodigal Daughters"

A party is in progress. Present are unshackled females with butterfly souls, debutantes in daring costumes, carmined chorus girls with greedy eyes, foolish flappers fluttering through flames and attended by aged cavaliers and sleek parlor pythons, dancing male toads and two carat snuggle puppies—and gayest among them all is Swiftie Forbes (Gloria Swanson), the most vivid character in "Prodigal Daughters," a Sam Wood production, which will be on view at the Rialto theatre next Friday and Saturday. "Prodigal Daughters" is a swift-moving story of what happens when young women are permitted to carry latchkeys, keep their own hours, drink, smoke, jazz and defy every convention revered by the old fashioned type of women. For "Swiftie" Forbes, in "Prodigal Daughters," it means the "end of the world" in a manner that will thrill the audience.

CANADIANS TURNING TOWARDS HOME

Mr. and Mrs. N. Roantree and little daughter, Marion, arrived here this week from southern California, where they had spent the winter. Mr. Roantree is going on to Regina, their home city, where he has business interests. Mrs. Roantree will remain until the Easter holidays with her parents, Mr. and Mrs. R. Johnston, with whom two of their children have been staying.

Mr. Roantree stated to a representative of the Review that the building boom in Los Angeles is falling off, though there is still much activity in that line.

He found hundreds of Canadians who would gladly return to Canada if they could find the money with which to buy the railway ticket. Thousands of people, he states, are now there who never should have moved into that part of the country and many are destitute. Even those who are employed find living expenses so high that they have little or nothing left. Many Canadians who can are coming back.

VISITORS LOSE AT CHECKERS

Summerland Takes Big Lead Over Penticton in Tournament.

An interesting checker tournament was played last Thursday evening between six Penticton players and a like number of Summerland checker enthusiasts, the result being 24-8 in favor of Summerland. The tournament was arranged by S. G. Rand and was held at his home, Mrs. Rand serving refreshments.

The result of the tournament was:

Penticton	Win	Lose	Draw
Cattee	3	3	0
Boothe	2	4	1
Gilley	1	4	1
Moore	1	4	1
Williams	1	5	0
Clayton	0	5	1
Totals	8	24	4

Summerland	Win	Lose	Draw
Young	6	0	0
McCutcheon	4	1	1
Jackson	4	2	0
Ramsay	4	2	0
Walden	3	1	2
Butler	3	2	1
Totals	24	8	4

Kereemos.—We understand that a teacher has been secured to continue the high school work and the classes are to be re-opened at once. The pupils will have to get in and dig to make up for lost time.—Princeton Star.

Worse Off than Ever

A man seeking advice from a young solicitor on how to avoid his creditors was instructed to place all his property in his wife's name.

Later the solicitor presented his bill for services rendered and received the following reply: "Dear sir: I took your advice and placed all of my possessions in my wife's name, and now I have no money to pay for your services."

PEACHLAND DOINGS

A Weekly Chronicle Furnished By Our Local Representative.

Mr. and Mrs. A. W. Miller moved in to their town residence last week after having spent the winter with their son and daughter-in-law at their ranch.

Mr. and Mrs. J. Vass motored down from Kelowna last week and spent a couple of days with friends and relatives.

Following is a report of the C.G.I. T. meeting held recently: Session opened with "O Worship the King" and prayer. Number present, eight members and one visitor. Correspondence reports and the minutes of the last meeting were read and adopted. The girls then discussed the idea of having a lawn party and bazaar. Moved by Annie Taylor, seconded by Ivy Law that we ask Mrs. Vivian, our leader, to bring home from California with her materials for the bazaar as she suggested in her letter Mrs. H.E. McCall gave an interesting talk on "Success in Life." A vote of thanks to Mrs. McCall was moved by Mary Sadler and seconded by Isabelle Taylor. The meeting closed with "O God our Help" and the benediction. (Signed) Maud Fridge.

The L.T.L. held their regular monthly meeting last week in the Municipal Hall with twenty present. Three new members were added to the roll.

Mrs. Davidson and Miss Elva Williamson spent Wednesday in Kelowna.

Mr. and Mrs. Lyle Seaton, Mrs. Seaton, Sr., and daughter returned Wednesday morning to their homes at Vernon. Mr. Seaton and Miss Seaton expected to resume teaching as the measles ban was being lifted.

Mr. and Mrs. Hunter left on Wednesday to return to their home in Alberta after having spent the winter here. They enjoyed their second winter in B. C. and Mr. Hunter was heard to say that he had not felt really cold all winter.

D. McMillan, of Kelowna, a former Peachland citizen of the early mining days, was in town last week. He was assisting Mr. Nelson, a miner and prospector looking over some of the croppings in the hills back of town.

After spending the winter in California with their daughter and her husband and family Mr. and Mrs. G. Keyes returned Wednesday morning to resume operations on their fruit farm here. They enjoyed their visit in many ways, but were glad to get back home.

Mr. and Mrs. Hackett moved back to their lot last week after having spent the winter in the small cottage adjoining the Kudelka home.

Class leadership for the month of February in the Peachland public school was as follows: grade 8, Annie Taylor, Lizzie Topham, Gordon Morrison; grade 7, Arthur McCull, Margaret Harrington, Teddy Clements, Joe Hyde; grade 5, Margaret Alpaugh, Russel Palmer, Lyndon Ashley.

The regular monthly meeting of the Peachland Women's Institute was held on Friday, March 14th in the Municipal Hall with a good attendance. Mrs. Young gave an amusing recitation, after which a solo by Mrs. Elliott was enjoyed. Miss Sproule of Vancouver gave an interesting

LOCAL BOY SUCCEEDS IN MUSIC THEORY

At the mid-winter examinations in the theory of music, held by the Toronto Conservatory of Music, Eric

MARRIAGE

LANG—OSBORNE

On 17th inst. at Holy Trinity Cathedral, New Westminster, B. C., by Rev. Canon d'Easum, Miss Mary Osborne, of Westwilton, Yorks., England, to Grant Lang, of Peachland, B. C.

talk concerning her work with the W.C.T.U. At this meeting Mrs. A. Town, of Vancouver, was welcomed as a visitor. Mrs. Town was one of the first to join when the Institute was organized in Peachland. A letter of regret from the members was read to Mrs. Edgcombe who is shortly leaving Peachland. Mrs. Edgcombe said she was sorry to leave and would often think of the ladies at their meetings and thanked the members for their kind thoughts. The roll call was answered with a written recipe from each member. Mrs. Dryden, Mrs. Young and Mrs. Lingo giving rather amusing ones. Tea was enjoyed by all and the meeting closed with the National Anthem.

A little excitement arose on Saturday last when the tent and lumber home of W. L. Williams took fire. It happened while he was at the barn attending to his horse. Neighbors noticed the fire soon after it started, in fact Mr. Williams was only out for a few minutes. The volunteer fire brigade was soon out with the reel and the fire put out in short order. The only loss was the tent roof and except for water and smoke and the accompanying mess there was little damage done. Mr. Williams moved into the house alongside the Dr. Nash property.

Mrs. R. O. McCall and son, Carlton, spent Saturday here with relatives.

F. R. Gartrell, of Summerland, paid Peachland a visit on Saturday, partly business and partly pleasure.

Visitors to Kelowna on Monday were Mrs. Ferguson and Mrs. Town, Mr. and Mrs. Neil Evans, Bert Keating accompanied them, going over as usual to his work in the bank.

Johnson, of Summerland, was a successful candidate, winning first class honors in elementary rudiments. Students from Penticton were also successful in counterpoint and musical history, two obtaining the very high marking of ninety-five per cent. The successful entrants were all coached by Geo. W. Weaver, of Penticton, whose pupils during the last ten months have obtained four honors and six first class honors, in addition to a number of passes.

BOY SCOUTS

Last Friday at supper time the Scouts and Cubs combined and held a "bean feed" in the Parish Hall. About fifty boys, sat down to tables. Beans, brown bread and pies comprised the menu.

The boys are very grateful to Mrs. Walden, Mrs. Benmore and Mrs. Solly for their assistance and to Mr. W. Johnston for the cooking of the beans.

Games were played following the supper.

LAND REGISTRY ACT

(Section 160)

IN THE MATTER OF Part 1 acre of Lot 4, Block E, Map 268, Osoyoos Division Yale District.

PROOF having been filed in my Office of the loss of Certificate of title No. 13717a to the above-mentioned lands in the name of Bertha L. Garnett and bearing date the 17th December, 1908, I HEREBY GIVE NOTICE of my intention at the expiration of one calendar month from the first publication hereof to issue to the said Bertha L. Garnett a provisional certificate of title in lieu of such lost certificate. Any person having any information with reference to such lost certificate of title is requested to communicate with the undersigned.

DATED at the Land Registry Office, Kamloops, B. C., this 29th day of January, 1924.

E. S. STOKES, Registrar.

Date of first publication, March 6, 1924.

A PUBLIC MEETING

will be held in the

EMPIRE HALL

on the evening of

Saturday, March 22nd, at 8 o'clock

to discuss the present serious condition arising from the reduced tonnage controlled by the Associated Growers of B. C., Limited.

Mr. A. T. HOWE, President of the Associated Growers, will address the meeting.

As the interests of all growers are threatened, a special invitation is extended to growers shipping through independent houses.

THIS IS NOT A MEETING OF MEMBERS OF THE LOCAL CO-OPERATIVE ASSOCIATION

The future of the industry is at stake and any grower or anyone interested will be welcome to make suggestions or take part in the discussion.

CORPORATION OF SUMMERLAND MUNICIPAL SCHOOL BOARD

Tenders are invited for alterations to the small West-ery School Building situate at West Summerland, B.C.

Plan and specifications may be inspected on application to the undersigned at the Municipal Office, West Summerland, B. C.

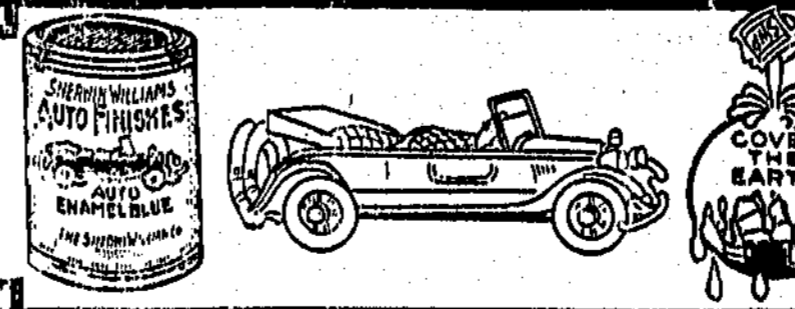

Last day for receiving tenders 7th April, 1924.

The lowest or any tender not necessarily accepted.

C. P. NELSON,
Secretary, Municipal School Board.

The Pedlar's Pack

By AUTOLYCUS

Some time ago I made a few casual remarks concerning our expenditure for education, and took the stand that the duty of the State ended when it provided a good, sound public school course, leaving the higher grades to be paid for by the individual who wished to take them. I note, with considerable interest, that "Saturday Night" has taken up the matter of school expenditure, and quotes Mr. C. J. Yorath, whom I knew when he was city commissioner of Saskatoon, and who now holds that position in Edmonton. Mr. Yorath is quoted as stating that the cost of education in Canada has increased by eight hundred and fifty per cent. since 1901, while the number of pupils has grown by eighty per cent. only. He declares that, as far as the western provinces go, at any rate, the cost has become impossible, and the ratepayers can no longer pay the bill. He further points out that our municipalities have no jurisdiction in the matter but are required by law to pay over to the school boards what money they demand, and that, where only a possible seventy or eighty per cent. of the tax levy is actually collectable, they are naturally hard put to it to get along. It is easy to see that with approximately one-third of the levy earmarked for school purposes, and possibly as much more uncollectable, there is not much left for other services equally important.

Analyzing the figures given by Mr. Yorath, it is fairly evident that our school costs have been going one way while real estate assessable values have been going another. And, as real estate values are the basis of taxation, there is no difficulty in forecasting the eventual result of school expenditures constantly mounting and assessments continually dropping. The Edmonton commissioner does not mince matters in the least, but prophesies actual collapse unless the system is amended. "Saturday Night" is, as usual, even more outspoken, and flays modern conditions without mercy. It holds that "rank extravagance, faddism, and ostentatious foolery has fastened itself upon the present system, which has adopted every fad and frill the world is heir to." And it doubts very much whether the finished product of today is any better than it was in past days of economy and simplicity.

The remedies suggested include larger grants from the State, more tax control by councils, and a unified system of education. The first seems to be just a shifting of expense from one source to another which does not relieve the country at large—the second will be useful if it enables municipalities to curb possible school board extravagance, but the real gist of the matter lies in the modification of the educational system to reasonable proportions. We are giving too much high school and collegiate education at public expense, and need considerable adjustment along those lines.

A recent "Province" editorial under the caption of "The Useful Potato," compared two statements concerning that humble but **CONFUSING** exceedingly popular **FIGURES**, one of which foretold the danger of a potato shortage in this province, and the other a warning that British Columbia is producing too many potatoes and must curtail its acreage, or seek new markets! It seems that the average production here is 3,500,000 bushels, and the annual consumption is only 1,500,000 bushels which leaves more than half our crop on our hands. Part of this is swallowed up by various shrinkages, and by the setting aside of enough tubers for seed, but even so we have a surplus of nearly a million bushels. Which of these two authorities is right? The "Province" writer makes his usual compromise, and decides that the truth lies between the two positions—which leaves us nowhere. It might be fair to ask just why we should NOT seek markets elsewhere for our surplus of potatoes, just as we do for any other produce we may have to spare, except that such a question would be entirely superfluous. The query which arises in my own mind concerns the value, or the lack of value, we may attach to such announcements concerning over-production. On what are the figures based, and how far are they supported by market conditions? The Vancouver market report for March 11th gives the prices of potatoes at

"A Snapper Up of Unconsidered Trifles."

The Winter's Tale, Scene II, Act IV

\$2.00 to \$2.75 per sack, which does not indicate such a terrible glut as we might expect from that two million bushels of over-production. Mr. Cecil Tice, B.S.A., who is responsible for the estimates given above, seems to have struck an unfortunate season for the publishing of his statistics. Much of the same mystery overhangs the tales of production costs which we frequently have handed to us by experts in various other industries. We will pass over the findings of the United States tariff commission which has lately announced a difference of anywhere from forty cents to a dollar a bushel in the cost of wheat production as between this country and the southern republic, only noting with satisfaction that the lower cost belongs to Canada. But in recent numbers of certain bee journals there have been some statistics advanced as to the cost of honey production which have brought some most amusing counter statistics from apiarists who have been in the bee business for about thirty years, and who are quite unable to reconcile the expert's figures with their own actual experience. One beekeeper in Ontario writes to say that after reading certain expert testimony on this matter he finds himself in a dilemma, since, according to the authoritative estimate given, he has been selling honey away below the actual cost of production for over twenty years and yet has "raised a large family, spent quite a bit of money (in foolish speculation)," bought automobiles, and what not, and is still thriving! Another apiarist (in Colorado) commenting along the same lines, wonders why he was not in the poorhouse long ago. This man began in 1891 with two colonies and now has nearly eight hundred, together with buildings, equipment, accessories, cars and supplies appertaining thereto, and has moreover earned a good living from his bees nearly all the time. He says, "The bees have paid for it all, and I don't owe anybody."

In the face of all this, what becomes of the expert's statistics, and how are we to appraise their calculations? Evidently, although figures may not lie, they must have an awful tendency to get mixed up!

The Rev. D. Bland a little while back said that the churches were not holding their own in communities, and added that he **THE QUIET** thought they needed **SUNDAY**. New ideas or new methods. It seems very strange to read such a pronouncement when we look around and note the various eccentricities lately indulged in by certain preachers. Jazz orchestras, dancing girls, vaudeville revues of girls you ought, or ought not, to marry, and other freaks of a kindred nature have been in glaring evidence for a long time, but it is not clear that the results have been very satisfactory. In the humble opinion of this present scribe, the reverend gentleman would have done better had he pointed backwards, and pleaded for some reversion to the older conditions rather than a constant striving after novelty. Heaven knows we are getting novelties enough without seeking for them in our churches, and the records of our insane asylums afford an exceedingly disconcerting commentary on the possible connection between the strain of modern conditions and the enormous increase in insanity. I see that Ramsay MacDonald, socialist and labor leader, has been daring enough to come out plain spokenly in favor of the old Scottish Sabbath, and to dwell on its moral value as a foundation of character. As we are not all Scots, we may not be able to follow him too closely, but that he is right in a broad sense is indisputable. The quiet Sunday is an unspeakable boon, and should be fostered in our churches above all places.

Keen Competition

A young matron in whom the shopping instinct was strong asked a German butcher the price of a Hamburger steak.

"Twenty-five cents a pound," he replied.

"But," she remonstrated, "the rice at the corner store is only twelve cents."

"Voll," asked Otto, "vy don't you buy it down there?"

"They haven't any," she explained.

"Oh, I see," replied the butcher.

"Van I don't have it, I sell it for ten cents."

WHISKERS FOR FRASER VALLEY

American Sect of Doukhobors Fashion Arranging to Colonize.

Vancouver.—Nearly enough whiskers to stuff a household suite will shortly feature the Fraser Valley with the coming of a new sect, unless present plans fall through. The Community Brotherhood, something after the fashion of the Doukhobors, is arranging to colonize seventeen families on a quarter section of land, or 160 acres. Elder Amos, who was here from eastern New York three years ago, is now in town settling details. Messrs. Fraser and Carey, who are handling the proposition, are reticent on details, but state that it is likely that a greater number of the colonists will eventually settle here. There is some hitch in the immigration laws, but the agent of the community states that this is being overcome. The Community Brotherhood is said to be prosperous and exclusive, no efforts being made to secure converts. The sect believes in eugenics or selective progeny. Their families are limited. The maidens of the sect are said to be beautiful and naive. The men wear beards and long hair. All practice the most primitive clothing styles, nudity being said to prevail within the limitations of the colony.

WOOL OUTLOOK IS MORE ENCOURAGING

After years of persistent effort Canadian wool-growers are at last finding a better market for their product. This has been the result of the efforts to improve the grade made by both the growers and by the Live Stock Branch of the Dominion Department of Agriculture. A large shipment of raw wool was despatched to Bradford, England, in November last, which proved so satisfactory that an order was received for a further shipment of the same grade and quality. In 1923 exports of raw wool of which went to emfwmfwyp most amounted to 8,614,609 lbs., most of which went to the United States. Early last year the market was somewhat dull but towards the close a better demand arose. It would now appear that the outlook is much more promising, and unless untoward developments occur, sheep-raisers may expect better prices.

The low prices of 1920 and 1921 led to a sharp decline in the number of sheep raised, there being 965,510 less in 1923 than in 1920, and an increase in the volume of wool exports cannot therefore be expected during the current or succeeding year. It will be recalled, however, that in 1917 the price of wool rose and that as a result the number of sheep on Canadian farms and the volume of exports both showed a marked increase. At that time Canadian wool had to find a market without the advantage of grading, and hence did not bring a price proportionate to its real value. This difficulty has now been removed, and it is therefore not unreasonable to hope for a satisfactory expansion of this trade in two or three years' time.

Last year the production was 15,539,416 lbs., of which 8,614,609 lbs. were exported, as compared with 3,000,000 lbs. exported in the year prior to the war.

Speed in the sending of cabledgrams has been increased from 20 to 50 words a minute by the use of mechanical relay instruments.

NARAMATA NEWS

Current Events of Town and District

Mr. Loveday returned on Saturday from a business trip to Vancouver.

A meeting for discussion of the matter of a local game association was held on Friday evening at the home of Mr. Graham, Captain Langueodoc presiding. Preliminaries were arranged and a further meeting called for.

Miss Enid Rayner returned on Saturday morning from a trip to the Coast and some points south of the line.

Mr. Kennedy is erecting a house on his ranch, and has made considerable progress with the work.

At the Union church service on Sunday, the Rev. H. J. Armitage preached brotherly love, emphasizing that as the sign of real conversion. Mrs. George Weaver accompanied the singing.

The storm which swept through the Valley on Thursday night did considerable damage to the electric poles and scattered a few miscellaneous articles around in a promiscuous kind of fashion. Mr. Simey spent a night of alarms and excursions, being aroused by the report of a falling pine in his garden, and the consequent downfall of the electric pole adjacent. The tree snapped off about forty feet from the top and fell in the gateway, bringing with it the wires and the pole to which they were attached. This was followed by the descent of a metal extension to the chimney, which fell in a subdued and bashful manner on the roof, and put the finishing touch to a night of terror.

Mr. Manchester's song, "The Old Okanagan," has arrived from the publishers, and will shortly be on sale locally. Mrs. Gillespie of Battle Creek received an initial consignment of two hundred copies, and showed one to the well known Kresge store in that city. It was tried out by the pianist in that establishment, and the entire consignment promptly taken with a request for more. This looks well for its reception nearer home.

The regular meeting of the Ladies Aid was held in the church basement on Wednesday, Mrs. F. Young presiding. Tea was served by Miss Dorothy Partridge.

Cheques are being sent out this week by the co-operative covering Bartlett and Flemish Beauty pears and Wealthy apples. McIntosh Reds will be covered by the end of the week.

TO REMOVE SCORCH STAINS

Here are two ways to remove scorch stains. One is to lay the garment in strong sunshine for several hours. If the stain is but slight, it will fade out when placed on a folded white cloth and rubbed gently with a damp cloth. If obstinate, dampen it, soap it well, and then bleach in dew and sunshine. Another way is to saturate the stain with hydrogen peroxide solution, put a white cloth over it and iron with a warm iron till the spot disappears, then rinse immediately in clear water so the fabric will not be injured by the peroxide.

The most beautiful woman—the one you love.—Dr. Frank Crane.

APPLE MARKET IN SINGAPORE

The Canadian Trade Commissioner in Singapore, Strait Settlements, reports increased shipments of apples from Canada, says G. E. McIntosh, Dominion Fruit Commissioner, in a recent bulletin. Some 300 boxes recently arrived from British Columbia having been carried without cold storage. This but emphasizes the fact that cold storage is not necessary in shipping to this market if the right varieties properly packed are shipped. Only certain varieties, however, will stand such a voyage.

Shipments of potatoes from British Columbia have also been received but this trade is only in its beginning. In addition to apples and potatoes, a trial shipment was made of carrots, beet roots and parsnips. The beet root arrived in excellent condition, the carrots in very fair condition, but the parsnips did not stand the voyage.

In making shipments of vegetables and fruit to Singapore there is an enormous shrinkage in weight owing to the loss of the water content.

City Chap: "Which is correct, to speak of a sitting hen or a setting hen?"

"Farmer: 'Don't know and don't care. What I'd like to know is, when a hen cackles has she been laying or is she lying?'"

In the rural districts of Australia many of the horses wear cowhide shoes.

SYNOPSIS OF LAND ACT AMENDMENTS

PRE-EMPTIONS

Vacant, unreserved, surveyed Crown lands may be pre-empted by British subjects over 18 years of age, and by aliens on declaring intention to become British subjects, conditional upon residence, occupation, and improvement for agricultural purposes.

Full information concerning regulations regarding pre-emption is given in Bulletin No. 1, Land Series, "How to Pre-empt Land," copies of which can be obtained free of charge by addressing the Department of Lands, Victoria, B.C., or to any Government Agent.

Records will be granted covering only land suitable for agricultural purposes, and which is not timberland, i.e., carrying over 5,000 board feet per acre west of the Coast Range and 8,000 feet per acre east of that Range.

Applications for pre-emption are to be addressed to the Land Commissioner of the Land Recording Division, in which the land applied for is situated, and are made on printed forms copies of which can be obtained from the Land Commissioner.

Pre-emption must be occupied for five years and improvements made to value of \$10 per acre, including clearing and cultivating at least five acres, before a Crown Grant can be received.

For more detailed information see the Bulletin "How to Pre-empt Land."

PURCHASE

Applications are received for purchase of vacant and unreserved Crown lands, not being timberland, for agricultural purposes, at minimum price of first-class (arable) land \$2 per acre, and second-class (grazing) land \$2.50 per acre. Further information regarding purchase or lease of Crown lands is given in Bulletin No. 16, Land Series, "Purchase and Lease of Crown Lands."

Mill, factory, or industrial sites on timber land, not exceeding 40 acres, may be purchased or leased, on conditions including payment of stumpage.

HOMESITE LEASES

Unsurveyed areas, not exceeding 20 acres, may be leased as homesites, conditional upon a dwelling being erected in the first year, title being obtainable after residence and improvement conditions are fulfilled and land has been surveyed.

LEASED

For grazing and industrial purposes areas not exceeding 640 acres may be leased by one person or a company.

GRAZING

Under the Grazing Act the Province is divided into grazing districts and the range administered under a Grazing Commissioner. Annual grazing permits are issued based on numbers ranged, priority being given to established owners. Stock-owners may form associations for range management. Free or partially free permits are available for settlers, campers and travelers, up to ten head.

Letters From Our Readers

Expressions of Views on Current Topics

NO EXTRAVAGANCE WITH ASSOCIATED

Vernon, March 17, 1924
Editor Summerland Review.

Sir: In your paper of the 13th instant a letter appears over the signature of Reynolds Harrington, which states that unless the cost of running the Associated Growers of B.C., Ltd., is reduced, disaster will follow.

Might I ask if your correspondent could not take just a little broader view of the condition of the growers today than he does? Is such condition entirely chargeable to the extravagance and mismanagement he talks of? Poor old mismanagement and extravagance appear to be the goats for all the evils that can befall mankind but however much one may wish to make them so in this there are many other factors, which to be just, must be considered.

What of market conditions? What of independent competition? What of the misdeeds of some of the growers? What of the fellows who sat upon the fence waiting to see which way the buck would jump?

Market conditions have admittedly been as bad as have ever been experienced and yet a great many cars more were marketed in the prairies than ever before. Was that brought about by mismanagement? Independent competition upset the f.o.b. offerings of the Associated and had a tendency to slow up markets generally—and yet some growers preferred to so place their crops after signing up. Was that to be attributed to mismanagement of the officials? To the contrary such actions tended to increase the cost of operations which is immediately blamed on extravagance.

Some growers from lack of foresight or knowledge, did not pay sufficient attention to the quality or condition of their shipments which caused rebates galore and a consequent lessening of returns all round. Is that chargeable to extravagance? There is no one more ready to admit mistakes—inevitable in a first year of any undertaking of this size—than the members of last year's executive and officials generally, but they do feel that a statement to the effect "the only co-operation they practised was to fill their pockets with good, fat salaries" is playing just a little low and is totally undeserved.

Good honest criticism is always to be welcomed but statements like the one quoted do not do anybody much good. How very easy it would have been if the millenium could have been reached the first year.

And yet—I wonder if we should have then been satisfied? A statement covering the staff and salaries was handed to each director during the last season and I am sure the local director would be very pleased to satisfy Mr. Harrington on any point there anent.

Yours truly,
Associated Growers of B.C., Ltd.,
R. B. HOMERSHAM,
Asst. Secy. to the Committee.

CITIZENSHIP

An alien does not change into a citizen over night. The changing of his dress may be done in an hour. The changing of his speech is a longer process. And the changing of his ideas is still longer.

Really, to become a citizen of our country, a man must first turn his mind from the old land to the new; he must desire to be a Canadian. In the second place, he must learn how Canadian institutions have grown and how they are carried on; he must understand what are a citizen's responsibilities in this land.

EDUCATION

Education is the formation of such habits of thought and action as will enable us to live sanely and happily, to know how to make knowledge when we need it, and to be of real service to the community of which we are a part.

SERVICE PLUS PRINTER'S INK

Dr. B. J. Palmor, father of chiropractic, said the other day:
"The poet who said 'build a better mouse trap and the world will make a path to your door' was wrong. You've not only got to build a better mouse trap, but use printer's ink to tell the world about it. Then, and then only, will the world know about your mouse trap. This applies to all things."

AN ANSWER TO A. J. BEER'S LETTER

Editor Summerland Review.

Dear Sir,—As it is not my ambition to add to my list of imperfections that of "the gentle art of making enemies," I must explain to Mr. Beer that I, too, am an Englishman, and proud of it. In my communication in answer to that of Mrs. M. K. Walters, the subject was "advertising." Goodly soul, Mrs. Walters has written me personally for putting her right on one phase of her reasoning and states she "stands corrected in all humility," but Mr. Beer goes off on a tangent not under discussion. I specifically alluded to "a certain type of immigrant from Motherland" who were too apathetic to jump on the band wagon and give the glad shout for their adopted country, and if there are any Englishmen whom the cap fits, let them take turns wearing it.

With regard to Mr. Beer's other remarks of a communistic nature I have nothing to say, preferring to work in the day and dream at nights. I still admit to "complexities" beyond my analyzing, but by smiling and carrying on hope to let the world know something about the beauties of the Okanagan in my own way. Last any of my countrymen who read Mr. Beer's letter and not mine should have any misgivings as to my implied slams, let them please refer back to the issue of the Review in which it appeared, and then I know I shall be exonerated.

Let them then examine their conscience and ask of themselves: Am I a member of the Board of Trade, the Good Roads Association, or any organization where combined effort might achieve something? Am I a banner bearer in the march of community progress, a supporter morally and financially of every known system to advertise the charms of the Okanagan; or am I just a dreamer and leave the rest to George? If their consciences are satisfied, then they are not "IT."

Yours truly,
J. J. ATHERTON.

THE WOMEN'S INSTITUTES

A very full and interesting meeting of the Summerland Women's Institute was held on Friday, the 14th inst., in the Parish Hall.

Miss Cartwright was appointed official delegate to attend the provincial conference of Women's Institutes to be held in Vancouver April 23rd, 24th and 25th.

An appeal from Mrs. Violet Sillitoe, representative for the mainland of B.C. for the "Save the Children Fund" was put before the meeting. This is an all-British society for the saving of child life wherever threatened. A donation of money is being sent from this Institute to help the cause.

A splendid report was given by the convenor of the "local neighborhood needs" committee. She told of the work done last Thursday by voluntary help on Shaughnessy and Beach Avenues. Over two dozen men worked most of the day, supervised by the reeve and members of the council. The main street got a thorough cleaning up which is very noticeable. The "gateway" to Summerland is to be made as attractive as possible. Trees will be planted on the lake side of Shaughnessy Avenue.

Mrs. Lipsett gave her first of a series of short talks on parliamentary rules.

Demonstrations for the day were: The art of making delicious pastry by Mrs. G. Gartrell. The intricate making of real Scotch shortbread was most ably demonstrated by Mrs. Jas. Thompson, and lemon filling by Mrs. Stark.

Everyone present felt that a very profitable afternoon had been spent and very hearty votes of thanks were accorded the demonstrators.

A Remedy for Wakefulness And "Ticky" Throat

Mrs. V. S. M. writes: "As a trained nurse I was always most interested in liquid foods and made a special study of them, but of all the things I have ever tried for wakefulness, coughing, hoarseness, etc. (the annoying little ailments of 'well' people), Grandmother's recipe is the best—shall I call it Borden's First Aid?"

"A tablespoonful of cornstarch, a

This Beauty Every Woman Can Have

Radiant, Youthful Complexion

Nature gave you a skin of beauty, charm. And that is beauty you can keep.

Millions of women do—by following this simple, correct rule. By following it you, too, can keep the loveliness of a schoolgirl complexion.

Just do this regularly.
Cleanse the skin regularly, authorities say, to keep your complexion lovely, radiant, youthful. But beware of harsh cleansing methods—they injure skin.

Wash thoroughly with Palmolive Soap—each night before retiring. Rub the creamy, foamy lather well into the tiny pores. Rinse—and repeat the washing. Then rinse again.

Then—if skin is dry—apply a little cold cream. That is all. Skin so cared for is not injured by cosmetics, by wind and sun, or by dirt.

The simple, correct way.
You cannot find a more effective beauty treatment. Because Palmolive Soap is blended of rare palm and olive oils—famous for mild, but thorough cleansing qualities since the days of Cleopatra. And it is inexpensive.

Get Palmolive Soap of any dealer—but note the name and the wrapper. For Palmolive is never sold unwrapped! Then try this method. The improvement will amaze and delight you.

And because Palmolive is so economical, let it do for your whole body what it does for your face.

THE PALMOLIVE COMPANY OF CANADA, LIMITED
Winnipeg Toronto Montreal
Palm and olive oils—nothing else—give Nature's green color to Palmolive soap.

Volume and efficiency produce 25c quality for 10c

half cup of Eagle Brand Condensed Milk, and enough water to thin—do not have it very stiff—and cook until the raw taste is gone. Flavor with various things. Children will like peppermint. My husband likes lemon and the whipped white of egg on top and the yolk beaten in at the last minute.

"Serve it as hot as it can be taken, when you are trying to alleviate a tickly throat or conquer insomnia, or soothe a sore feeling in the chest. If you wish, you can use St. Charles Milk and sugar instead of the condensed. Either way it is very nourishing."

"I wish I had a dollar for every dose I have made. We should be owning a farm now instead of planning a homestead."

Coastal Indians of Mysterious Origin

Left—A Siwash Squaw and "Papeose." This photograph was taken on the Canadian Pacific dock, Vancouver, where Indians have been granted permission to camp at certain seasons. Right—The striking feature of Siwash art is found in their grotesquely carved and painted totem poles. Inset—A typical infant Siwash.

THE Indians of coastal British Columbia are unlike any other Indians of North America. The name "Siwash," by which they are commonly distinguished from the plains Indians, is a corruption of the French word "sauvage," which the early explorers naturally applied to them. It is not a native name. They do not look at all like the plains Indians but like Orientals and, though their history is so obscure that it is impossible to trace their origin, this seems to prove beyond doubt that they are sprung from some such stock, most probably the Japanese. It is a fact that if a Siwash and a Japanese are dressed alike, one can hardly tell them apart.

How these people crossed the Pacific is a mystery. Perhaps they are the survivors of some hapless armada blown across the ocean in some bygone age. Perhaps they deliberately sailed across, like Columbus of the East. Perhaps they crossed by the ice of the Bering Straits. Anyhow, there they are.

There are many other points of resemblance between the Siwash and the Oriental. Like the primitive Japanese, the Siwash live by hunting and fishing and are much on the water. In fact, their canoes are to them what the horse was to the Sioux. Like the primitive Japanese, again, and unlike the plains Indians, they do not live in tents but in houses, which, moreover, are of very singular architecture to those of the Flowery Kingdom, though built of wood. And, like the Japanese, they are a very poetic people, with a prolific and beautiful folk-lore.

But the most remarkable distinction enjoyed by the Siwash is their art, which does not resemble that of any other race—certainly not that of any other American Indian. Of this, conventional realism sounds the keynote. Their buildings are richly and fantastically carved. Their ceremonial dresses are equally elaborate. They delight in bold effects

and bright colors, especially in red, blue and green, used in conjunction with black and white.

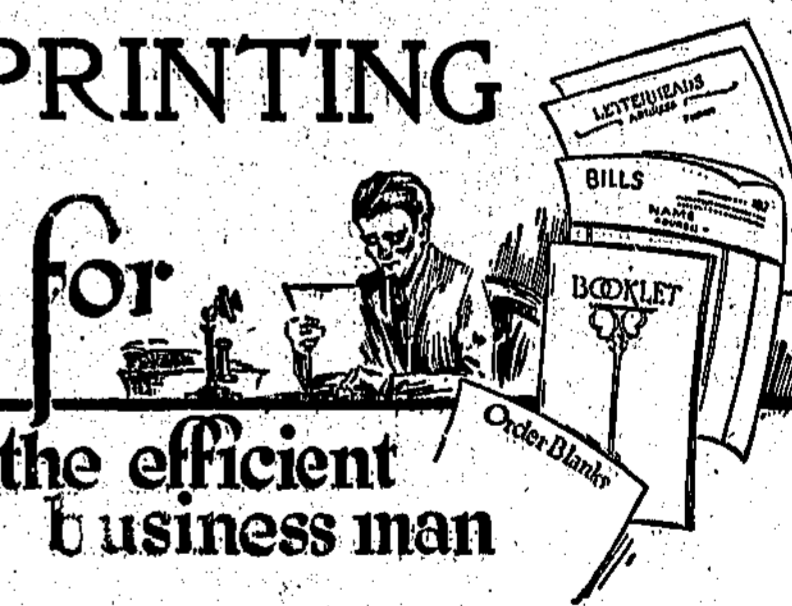

The striking feature of Siwash art is found in their grotesquely carved and painted totem poles, which are placed before the houses. These poles, made to represent a column of diabolical birds and bonets standing one above the other, form what is literally a family tree, the various totems telling the story of the ancestry of the people living in the house behind them. The Siwash also manufacture weird images resembling the idols of African tribes, which are intended to exercise various supernatural powers, such as the driving away of evil spirits.

The Siwash of past times were, in some instances, a warlike lot, fond of fighting and bloodshed. Occasionally, in tradition speaks truth, they put their decorative ability to sinister use. There is a story, well vouched for, of a festive meeting between two tribes which had called a truce in their otherwise perpetual feud. One tribe invited the other to a friendly banquet in the community dining-hall. The architect, after the fashion of natives, who glory in complementing simple things, had so designed the hall that the only entrance was through the back of an enormous wooden bird forming the facade. No one outside could see or hear what was going on within the walls. Every one who entered had to do so alone and head first. In turn, the guests scrambled into the back and vanished, until all had entered. None of them ever came out. Their treacherous hosts within, armed with clubs, gave each man his quietus as soon as his head appeared.

An extremely clever way of getting rid of objectionable folk with the least possible inconvenience, though not one which appeals to Christian morality. Feeling the coastal Indians are quiet and law-abiding citizens of Canada. But fine specimens of their picturesque art may still be seen at several villages not far from Vancouver and Victoria.

GOOD PRINTING

for the efficient business man

THE efficient man would as much think of sending poor unattractive printed matter as he would an unkempt, careless, or ill-bred salesman.

Your printing often introduces you to your business prospects. If it fails to make an acquaintance, it's an unsatisfactory job. Particularly does it apply to the stationery you use—as well as other printed matter.

We are equipped to handle any printing job you may want and we take pride in turning out only the best work.

Try us.

Local Happenings

Mrs. R. M. Ross is expected to return tomorrow from Los Angeles, Cal., where she has spent the winter.

A daughter was born on Thursday, March 6th, to Mr. and Mrs. H. W. Tavender at the Summerland Hospital.

Labor Party, Monday, March 24th, 8 p.m. Jack Logie will speak on The Problems of the Farmer. All invited. 34Lp

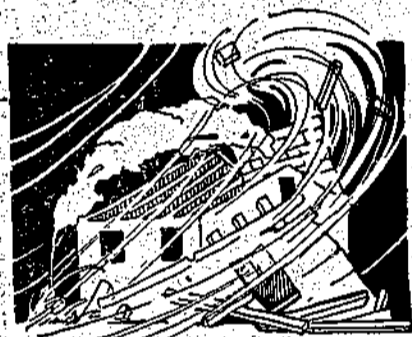

Mr. Grant Lang, reeve of Peachland, and Miss Mary E. Osborne of New Westminster, B.C., were married on March 17th in that city at the Anglican cathedral.

Lecture by J. W. S. Logie on "Early Days in the Okanagan," Indian lore, Friday, 8 p.m. at public school. Admission 25 cents. Proceeds for library. 34L

All growers outside of the Association are asked to meet at the Rialto theatre Wednesday, March 26th, to consult together as to the best way of selling their fruit at a fixed price. 34L

Miss Marion Beavis is now at home here with her parents. She came down from Kelowna, where she has been teaching, on Monday night. Her classroom and three others in the public school there were closed on Monday because of measles.

R. Baird, Victoria, inspector of municipalities, made a brief call at the Summerland municipal office on Tuesday on his way to the Coast. He had been in the eastern part of the province on business and stopped off at Penticton. From there he motored up to Summerland and boarded the westbound train here.

A. B. Elliott has added a new line of boys' suits that will be a satisfaction to parents.

P. G. Koop is expected home early in April. He has been in England since Christmas.

Attention is drawn to the advertisement of the meeting of fruit growers to be held Saturday night in Empire Hall. 34L

Tenders are being invited by the Summerland school board for altering the smallest school building to convert it into a residence.

It is reported here that R. Robertson, the prominent Vancouver broker who organized the O.U.G., is seriously ill at his home in the coast city.

Miss Kathleen Brown, who has been at her home here for a short time, returned on Friday to Vernon, expecting to resume teaching there.

A sale of home cooking, candy, also aprons, will be held in the Methodist Church Parlors Saturday, March 29, at 2.30. Afternoon tea will be served. 34L

Bargain! Beautiful \$200 Brunswick gramophone, over 70 records, majority Red Seal. Owner leaving town and must sell. On view at Butler and Walden's. 34L

Little Freddie Schwass, young son of Mr. and Mrs. Chas. Schwass, last week suffered a broken arm when he fell off his tricycle, which he had been riding near his home.

Mrs. J. Treffry went up to Sicamous this morning to meet her daughter, who with her two children, is coming in from Moose Jaw. They are expected in on Friday night.

With the reduced tonnage controlled by the Associated Growers for the coming season growers are facing a probable return to conditions of 1922. The situation is a most serious one and demands prompt and decisive action. 34

For the avowed purpose of stimulating payment of license fees, the council has given the collector instructions to post the names of all who take out a trade license and the names of all dog owners who have obtained licenses for their dogs.

Summerland high school basketball teams visited Kelowna on Friday night, where games were played with Kelowna teams. Though the latter finally won out in all games, our local girls' team gave them a hard run for the honors in their game. In fact, the score stood at a tie within a few minutes of the final whistle, when by virtue of a successful foul throw the Kelowna team gained the victory.

Mr. David Estabrook came in from the Coast on Thursday last and spent the day with a former Vancouver chum, H. Daniel here, continuing north to Vernon on Friday morning. On Thursday evening, Mr. Daniel entertained a number of friends in his honor at the home of Mr. and Mrs. J. O. Smith, when a jolly time was spent in music and dancing.

W. Simpson was elected president and J. W. S. Logie secretary-treasurer at a recent general meeting of the labor party. Other members of the executive are Messrs. Schwartz, Koch and Borton. There are now about twenty-five active members. At a meeting held on Monday of this week A. J. Beer gave an account of his experience in the community of Atascadero, Cal., where he spent the winter.

A farewell party in honor of Lloyd Miller was given last Friday evening at the home of his parents, Mr. and Mrs. F. S. Miller, Trout Creek. Rev. E. L. Busch gave a short address after which Mr. Miller was presented with a handsome club-bag by his friends. A very enjoyable evening was spent and refreshments served. Mr. Miller left on Tuesday morning for Edmonton, where he will continue his studies.

SUMMERLAND WEATHER REPORT

Below is a report furnished by the Dominion Experimental Station here for the week ending Tuesday:

Date	Max.	Min.	Rain	Snow	S.S.
March 12-54	35	4.2
March 13-54	37	1.0
March 14-40	30	.04	6.2
March 15-50	30	0.0
March 16-48	30	1.0
March 17-51	28	5.7
March 18-50	33	0.8

C. W. Little of Vernon has been in town for several days overhauling spraying machines.

Summerland Experimental Station on Monday shipped a carload of beef cattle to Swift Canadian Company at Vancouver.

Mrs. R. S. Monro came in from Vancouver Tuesday morning after a short visit with her daughter, Jessie, and relatives.

Ernie Steers left on Sunday for Vancouver, after a stay of several months here. He expects to leave for Dawson about the 20th of this month.

Mr. and Mrs. J. Gowans are expected in tomorrow after a honeymoon spent in Coast cities. They will take up residence in the former Dominion Bank rooms in town.

Jack Conway, who has been with the Nash concern at Lethbridge for some months, is back in Summerland. He expects to locate in the Okanagan, probably at Vernon.

Margaret Smith, little daughter of Mr. and Mrs. Alex Smith, has been quite ill at her home with rheumatic fever. Her condition, however, is reported to be much improved.

Capt. P. S. Roe states that he heard the announcement over the radio Monday night that the government proposes to proceed with the completion of the Okanagan branch of the C.N.R.

W. T. Hunter, superintendent of the Experimental Station, went down to the Coast yesterday to attend a conference of B. C. agronomists there. Mr. A. J. Mann, assistant superintendent, who will also attend this conference, left by today's noon train.

Miss Sproule, of Vancouver, travelling representative of the W.C.T.U., was a visitor to Summerland this week. On Sunday she spoke at the morning service in St. Andrew's church and at the Baptist church in the evening. She also addressed a women's meeting on Tuesday afternoon in connection with the work of this organization.

Mr. and Mrs. J. D. Woods returned home on Tuesday from San Francisco, where Mr. Woods has been employed as a carpenter during the winter months. They enjoyed the change but apparently he is glad to be back in Summerland. On the same steamer with them, says Mr. Woods, were many Canadians coming back to their own country.

GOOD START MADE ON IMPROVEMENTS

An excellent start was made toward improving the Okanagan highway passing through Summerland in the splendid work that was done last week centring around Thursday. On that day, with the reeve and members of the council taking the lead, practically every citizen who could was at work on streets and adjacent lots and lanes. Many loads of refuse were hauled away, in which work R. H. English assisted the municipal team by the use of his own and many tons of rubbish went up in smoke.

The Women's Institute served lunch to all workers.
Considerable work of the same nature is yet to be done, sidewalks put in repair, street sides improved and trees planted.

Conductor: Mr. G. W. COPE.
Hon. Sec.: Mr. J. C. BARKWILL.

ST. PATRICK'S TEA GREAT SUCCESS

The home of Mr. and Mrs. A. B. Elliott was the scene of a most successful St. Patrick's tea yesterday afternoon, which was attended by over fifty guests. Little Miss Irene Tait opened the door to the guests, who were received by Mrs. Elliott as hostess. All the rooms were beautifully decorated in memory of the old Erin, with shamrock and St. Patrick's flags much in evidence, while green streamers added a festive touch to the appearance of the rooms. The five small tea tables were in harmony with the large centre table, and the beautiful potted plants, which were much admired, were well in accord with the general artistic effect.

A short musical program was enjoyed, consisting of two solos by Mrs. J. Clark and two choruses from five small girls, Misses Margaret Stark, Hilda and Isabel Zimmerman and Mary and Jara Armitage. Mrs. Block acted as accompanist.

During the serving of refreshments Mrs. J. Tait, Mrs. Block and Miss Maud McLaughlin poured tea.
The collection taken in aid of St. Andrew's Ladies Aid totalled \$14.30.

Though still confined to the hospital as the result of his recent accident, W. Haddrell is making steady progress toward recovery.

Penticton municipal council has fixed the tax rate at 46 mills, a reduction of 2 mills as compared with last year.

Two unusually bright parhelia, or sun dogs, were noticed by many here on Tuesday forenoon. These brilliant sun reflections are said to indicate conditions which precede stormy weather.

CARD OF THANKS

Mr. Ira Clark, in behalf of wife and family, wishes to thank their many friends and neighbors for their kindness during Mrs. Clark's illness and their stay in Summerland.

HOME SWEET HOME

Oscar Puts the Lid on—Tight
 by Terry Gilkison

WIND DOES MUCH DAMAGE

(Continued from Page 1)
 on the road and house beyond and the trunk of the tree was perhaps three or four feet above the bed in which Mr. Barkwill had been sleeping. Stubs of limbs, however, projected farther but Mr. Barkwill suffered only a scalp wound and the had a few scratches only.
 Two Japanese, sleeping in a shack on the Salter estate, had a narrow escape from death. A tree nearby came crashing down through the roof of their shack and missed the bed upon which they had been sleeping by only about a foot.
 The storm was a brief one and the wind came in gusts, momentarily reaching a velocity of 80 miles an hour, according to the Experimental Farm records, which reports that the worst of the storm lasted for about ten minutes, for five minutes of which the wind reached approximately 80 miles.

All over the district big pines were felled, several houses narrowly escaping being wrecked.

In the Peach Orchard Park one magnificent pine, 150 or more feet in height, was snapped off more than half way up, the diameter at this point being more than twenty inches and it was a perfectly sound healthy tree. It stood not many yards from the fir which fell across the Barkwill cottage. Farther down in the park, opposite Walter's packing house, two other firs were up-rooted. The Garnett Valley road was for a time blocked by the top of a fir tree, which, in falling, broke some telephone lines. The pine tree damaged in the fire which destroyed the Fruit Union building was broken off and the top hurled on the telephone and telegraph wires below, interrupting the service, which was not restored for some hours. Up-rooted trees also fell on the sand hill road above the Gartrell property. A huge pine standing on G. J. Coulter White's lot fell beside his chicken house. A fir fell across the gulch road between the Turner and Pennant properties and broke the street lighting circuit. Traffic was diverted until it was removed.

Municipal flumes and trestles also suffered and telephone and electric light poles and wires were damaged. A storm sash was torn off the hospital and other windows broken.
 Mr. and Mrs. J. Clements had recently added a laundry and bathroom to their house. This was picked up and carried some distance and completely wrecked. The main house was also badly strained and three big pine trees close by up-rooted, one of which might have fallen on the house.
 The projecting eave on the north end of G. J. Coulter White's house and part of the roof was torn off.
 A ten by twelve woodshed on the Harry Biddell property was picked up and carried over the top of the flume and deposited some distance away.
 Across the road, C. H. Tait lost a shed which was completely wrecked and the chimney in his green house was broken down and this smashed about thirty panes of glass.
 F. G. Barnard lost the roof of his packing shed, which was carried over the top of his barn.
 The roof on the sleeping porch of the Agur house on the lakeshore, occupied by Mr. and Mrs. Geo. Craig, was carried away. Capt. Croose had left his car outside his house and the wind tore the top off it. A number of chimneys were torn down by the fury of the gale.

Several times while the storm was at its worst the electric lights flickered and threatened to go off but it was not until the storm had passed off to the south-east that the service failed, evidently due to some break in the main line, but the interruption was brief.
 Ponticton was exposed to the full force of the gale, which swept down

SUPT. HUNTER ON CONTROL OF INSECT PESTS

(Continued from Page 1)

that will have the effect of bringing down the price.

The Summerland Experimental Farm expects soon to be breeding Clydesdale horses. Size and quality in horses are what counts and recently, in looking about for some horses for the Farm, Mr. Hunter found there were very few desirable ones. He believed heavy horses will soon bring a big price and mentioned one breeder near Grand Prairie, who had a drove of over 400 young Clydesdale horses. The fact that farms are going back to the horses and forsaking tractors and trucks was instanced and Mr. Hunter also stated that Casorso Brothers, Kelowna, are again using horses for city delivery. The Summerland Farm had purchased a team of Clydesdale mares, one registered. This breed was chosen because a better quality could be obtained from other stations than in Percherons.

Mr. Hunter stated further that the Experimental Farm expects soon to have an accredited herd of pure bred cattle.
 Of insect pests Mr. Hunter said the greatest problem here at present is the leaf roller. In company with Inspector Tait, he had searched for the particular insect causing the trouble here. We have a few of the type which winter over in the egg form but mostly they are of the other and more early controlled variety. The leaf roller does its damage just as the buds are opening and kills the year's crop at that time, so that the damage is done early even if the worm is killed afterward. Arsenates have been found to be not very effective and oils are advised. This pest is much worse in the northern end of the Valley and the oil spray has been found very costly. Cheaper oils are now being offered. Last year the price was twenty-eight dollars a barrel. Now another good oil is selling at 17 to 18 dollars and still another at 31 to 32 cents a gallon. He hoped when we have to spray generally here it may be still cheaper. The speaker favored spreaders as being economical for all forms of spraying.

from a north-westerly direction. A house near Hotel Ponticton, residence of Mr. and Mrs. G. E. Craig, was almost completely wrecked, the roof being torn off and chimney upset. In the falling of the latter a brick crashed through the ceiling and fell close beside a sleeping baby. The house walls were badly wrecked and twisted. A large pine tree fell on a small house owned by Miss Broadbent, housekeeper at Ponticton hospital, crushing a bull-on kitchen. No one was in the house at the time. Trees, telephone and electric light poles and lines suffered heavily and a number of small buildings were wrecked or damaged and the municipal irrigation flumes broken down. A small house opposite the Methodist church was damaged by a tree, which struck the corner of the house in falling. Part of the roof of the planer mill was torn away and a quantity of lumber blown about the mill yard.
 Nowhere is there greater evidence of the force of the gale than at the head of Dog Lake, where many beautiful pine and fir trees which made the beach a beauty spot were leveled to the ground.
 All the way down the Valley similar damage is reported. From Oroville, Okanagan and other valley towns on the Washington side come similar reports of the storm. Evergreens were the trees which suffered principally. Cottonwoods and poplars, so susceptible to wind when in leaf, seemingly escaped almost completely.

MOSQUITO MAN GIVES ADVICE

(Continued from Page 1)

at Kelowna and will make a thorough study of the several species of mosquito to be found in this valley.

Mr. Hearle told his audience that there are in Canada some sixty-five known species of mosquito. In different sections different species are dominant and as no two species have exactly the same habits it is necessary first to obtain a knowledge of the life history of the particular species before any effective control can be established. Some mosquitoes migrate many miles; other species remain in the vicinity of the breeding pools. Some have preference for different types of breeding places and while some species have a voracious blood lust, others are practically innocuous.

Since coming to Summerland, Mr. Hearle has been looking for the different species of the pest found at Trout Creek Point.

Speaking generally, there are two main groups, those that winter in the egg stage and those that winter as adults. The former constitute the bulk of Canadian mosquitoes and winter either in the mud or at the bottom of pools or swamps. These eggs are known to remain alive for a number of years. Mr. Hearle had hatched eggs three years old. Reports from New Jersey tell of eggs ten years old or more hatching.

Some hatch early when their breeding places are filled with water and the speaker said that some species will not hatch till they have first been frozen. In warm weather a week may be sufficient but cold weather may prolong the process to a month or six weeks. It is during the larval and pupal stages that mosquitoes are most successfully dealt with.

The adult life of a mosquito is from a month to about six weeks.

The egg wintering species usually lay their eggs in one batch, which varies from 40 to 200. These eggs drop to the bottom of the breeding pools. One brood a year is the rule in this group.

In the fall the adult females of the species which winter as adults take shelter in cellars, outhouses, caves and other protected places and hibernate for the winter months. They emerge in the warm days of early spring and lay their eggs in the nearest suitable water. These mosquitoes are sometimes seen on mild winter days. Two species of this group lay their eggs in a floating egg raft, which has the appearance of a speck of soot, while another lays its eggs singly, but these also float. All three usually lay their eggs in a number of batches, the aggregate in some species being known to exceed 1,000. Successive broods follow each other throughout the season and the immature stages are usually rapid in development.
 The speaker compared briefly the habits of eastern, prairie and B. C. species. The rain-barrel variety in the east is a serious pest; in B. C.

it has no lust for blood. Here all serious mosquito pests are caused by flooding and at Trout Creek Point three agencies were involved: overflowing of the creek, caused by beaver dams and silt; seepage in the low areas from the lake, and flooding by irrigation.
 Oil was the most effective agent of destruction but first all drainage possible should be effected and oil spread on remaining pools, the watering can or the knapsack spray pump being used. Where there was much vegetation, dry sawdust, first soaked in kerosene or special mosquito oil should be broadcasted.

That the usual mosquito netting is of too open mesh was the statement of Mr. Hearle. Twelve mesh per inch, the usual netting, would permit the passing of many mosquitoes. At least sixteen mesh is required and where small species constitute the pest, twenty mesh is preferable. Personally he did not favor using a repellent, but where necessary, the best dope was oil of citronella, 2 oz., spirits of camphor, 2 oz., oil of cedar, 1 oz. Creosote oil sprayed in stables, etc., has been found effective in keeping mosquitoes out. When sprayed on walls and ceilings this gave an effective repellent, active for over ten weeks.

Some very interesting statements were given out on the work done in the Fraser Valley, where it was found that it was practicable to undertake control measures, particularly since the Sumas Lake and Port Mann reclamation projects have been undertaken. Actual tests showed that one square foot of swamp soil hatched 3,000 mosquito larvae. There were actual cases of cattle being killed by the mosquitoes and years ago many calves were lost in this way.
 There were 22 known species of mosquito in the Fraser Valley and 20 at Banff. Out of 900 species, in only one does the male bite. That one exception was recently found in Australia. Mosquitoes feed on small bacteria which develop in decaying vegetable matter.

Following the address of Mr. Hearle a resolution was put through by the Institute requesting the game authorities to rid Trout Creek estuary of its beaver, which is the first move toward ridding the point of the mosquito pest.
 H. R. McLarty, plant pathologist at the Farm and president of the Institute, introduced the speaker.

INNOCENT VICTIMS OF VILE DISEASE

Vancouver.—Nearly fifty innocent persons were contaminated by a nameless disease spread by a foreign fruit dealer who was diseased and who spat upon his apples before polishing them. This amazing fact was brought out by E. H. S. Winn, K.C., chairman of the Compensation Board in a public address here. It was also stated that fully 60 per cent. of the disease, now prevalent to an astounding degree, is acquired innocently in public conveniences and cafes, and not culpably.

DISCARDING ROAD ADVERTISING SIGNS

In connection with the movement to discourage the defacing of the countryside scenery of Britain by big advertising signs, two large gasoline companies have resolved to refrain from plastering rural districts with huge advertisements on hoardings.

This is regarded as highly commendable on aesthetic grounds, but perhaps the decision has been prompted partly from the point of view of judicious business as the big firms in various lines of industry and commerce these days in large numbers are showing a preference for news-

paper, magazine and trade paper advertising as being the most effective medium of publicity.

OTTAWA, the political centre of Canada, and prophetically designated by the late Earl Grey as the possible centre of the British Empire of the future, never dreamed of the brilliant destiny in store for it when the Bank of Montreal established a Branch there 81 years ago.
 Canada at that time was in many respects a terra incognita, consisting of half a dozen provinces with differing laws, tariffs and currencies. And Ottawa was only a lively little lumber camp called Bytown.

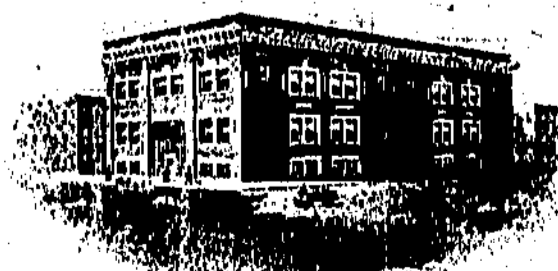

Today Ottawa is not only the name of a beautiful city, but is also a synonym for the voice of a nation—like Downing Street and the Quai d'Orsay.

The name of the Bank of Montreal, too, has enlarged in significance in the intervening years. It is now recognized as the title of a nationwide institution ranking among the leading banks of the world.

Marketing Situation Is Explained To Growers By Associated's Chief

President Howe Forecasts Crisis that Will Result if Marketing is Not Controlled—Good Work Accomplished in Past Season Through Loyalty of the Trade—Says Associated Could Not Save Growers from Consignment Market with Less Proportion of Tonnage than Last Year.

That is was with difficulty that the Associated Growers of B. C., organized a year ago, was able to prevent conditions which would have resulted in a consignment market during the past season and that it would be foolish to undertake to stabilize the market with a less percentage of the crop under its control, were statements made by A. T. Howe, president of the Associated before a large meeting of fruit growers held in Empire Hall last Saturday night.

The probable loss of considerable tonnage through assignments, sales and other transactions had precipitated a crisis and the meeting was called by the executive of the Summerland Co-operative and Mr. Howe invited to attend in order that the situation might be laid fully before the growers.

As the meeting was a general one it was thought advisable not to have a member of the Co-operative board in the chair and W. C. Kelley accepted the chairmanship.

In opening his remarks, Mr. Howe expressed regret that another member of the Associated executive had not come with him as was expected. About a year ago he had been appointed president of the Associated Growers, though he was then in Toronto. He had no part in the organization work but had been appointed as a director of the Vernon local and by them was elected a director of the Associated and later made chairman of the latter. He neither sought nor expected this honor but felt that it was up to each and every grower to do the best he could toward making the association a success.

Most Disastrous Year The year 1922, said Mr. Howe, will go down in history as the most disastrous in the life of the fruit growing industry of B. C. That disaster had not been brought about in a moment but was due to certain conditions which had been operating quite a long time. In 1914 very poor prices were realized; the outbreak of war changed conditions and markets improved. Had it not been for the war the disaster of 1922 would have come earlier. He believed that if the matter was looked at fairly and squarely competition and overproduction would be found to be the causes. "Probably the best years ever experienced and the best prices were in 1918, '19, '20, '21. People had lots of money and trade was good and we could sell almost everything. Depression followed, the conditions of 1922 resulting.

(Continued on Page 3)

WIND DAMAGE NOT HEAVY

Municipality Gets Off Easy with Repairs to Flumes.

Repairs to the municipal irrigation flumes to make good the damage done by the recent gale is not going to make the heavy bill that might have been expected.

Foreman Tomlin submitted a report to the council last Saturday, showing that \$92.40 would make good all the damage with one exception, and by making this expenditure those sections repaired will be in better condition than before.

The one exception referred to is the high flume at the top of the switchback hill in Peach Orchard, where about 350 feet of the old flume, which was to be replaced by pipe, went down under the wind. In replacing this, an additional 150 feet that would have been pulled down, probably next year, will be removed and all replaced with wood on pipe at a total cost of \$266. Four hundred and fifty feet of wood stave pipe has been ordered for this job to be shipped with pipe coming for the Hillborn Lake job.

HOLDING SITE FOR A CIVIC CENTRE

An inquiry from A. J. Beer as to whether the council would entertain an offer for a quarter acre of the two acre block opposite his residence, owned by the municipality, brought forth the unanimous opinion of the members of the council that it would be inadvisable to sell any part of this land.

When the matter was brought up on Saturday, Reeve Campbell pointed out the idea prevalent at one time of making this the site for a civic centre.

MAJOR HUTTON PAYS RED INK CLAIM

Major Hutton, whose "red ink" account with the Summerland Fruit Union, in liquidation, was to have been made a test case, has given the Dominion Bank a cheque in full settlement of the Union's claim. The book accounts of the Union were assigned to the bank.

ART LEAGUE MEMBERS BUSY

Reports Show Splendid Progress—Handiwork—Officers are Elected

Summerland branch of the B. C. Art League held its annual meeting on Wednesday, the 19th, above the Drug Store, when all reports were received for the year.

These reports showed a most encouraging increase in sales, while the total number of visitors to the Log Cabin last season had increased to five hundred. Receipts from sales of handicraft and various souvenirs amounted to about \$200.

Officers for the ensuing year were elected as follows: president, J. W. S. Logie; 1st vice-president, Mrs. G. L. Salter; 2nd vice-president, Carroll Aikins; secretary-treasurer, Mrs. J. M. Sutherland; committee, Mrs. Pares, Miss Vicary, Miss Cartwright, Miss Doris Cordy, Mrs. Rounds, Naramata, and Messrs. W. Simpson and C. P. Nelson. Mrs. and Miss Vicary will again have charge of the Log Cabin for the coming season.

W. Simpson is in charge of the grounds and arrangements are being made for many improvements, a novel feature of which is the laying out and planting of a botanical garden of B. C. wild plants, which should be most attractive. It is also planned to have a walk laid out along the creek, beautified with flower beds and to build bridges over the creek at several places.

Under the direction of the Art League, craft work is still being carried on, the classes in basketry meeting each Monday afternoon at West Summerland, while the students of the pottery class meet each Tuesday at the Log Cabin. Splendid progress is being made along these lines. The League has sent an exhibit of local pottery, basket-work, and many other interesting and novel specimens of varied nature to an Art exhibition which is being held this week at Vernon.

W. R. VERRIER BUYS LAKESIDE MARKET

W. R. Verrier has purchased the Lakeside Meat Market and will take over the business on Tuesday morning next, April first. The new proprietor had his training in the meat business in the Old Country and he states that he has made arrangements for a supply of good quality local meats.

ONLY THREE CARS REMAIN

Seventeen cars of apples were sold by the Associated during last week and at the end of the week there remained on hand twenty-three cars in storage in the Valley and four cars outside the Valley.

Only three carloads of apples remained in storage in Summerland, according to M. Stuart, local manager.

BOOSTER PUMP IS DISCUSSED - NO DECISION

Reeve Would Lay Pipe Now and Decide on Pump Later.

Opposition to Investment Was Brought out During Debate.

Another estimate for installing a booster pump on the domestic water system below the spring back of Hotel Summerland was reported at the municipal council meeting on Saturday.

A 30-horse power motor was stated to be sufficient and the whole thing, installed, would cost \$1,845, not including the foundation and housing.

These figures were submitted by T. P. Thornber, the municipal electrician as quotations of a Penticon firm. An agent of a Vancouver house had been here and promised to give prices.

In an earlier discussion of the subject, Reeve Campbell suggested laying the 6-inch pipe along Shaughnessy Avenue at once and in this he was supported by Coun. Britson, who stated that they should do that much at least.

Coun. Johnston did not see how the project could be financed, while Coun. Smith thought it would be better to put in the larger pipe than pump and motor on the present pipe. Coun. Johnston was positive that in any event the pump could not be installed this year.

Referring to the fact that some of the council seemed to think that the municipality could not afford both pipe and pump this year, Coun. Britson favored putting in the pipe.

Reeve Campbell, dealing with the question of financing suggested that \$1,000 might be provided out of domestic water debentures now in the treasury.

Clerk Nixon suggested that some information as to pressure first be obtained as it might be found that there would be little or no advantage in replacing the three-inch pipe unless the pump was also put in.

The matter was referred to a committee with the request that this information be obtained. The committee was also instructed to arrange to clean up and cover the intake to prevent leaves and other vegetable matter entering the pipes.

DIVERSIFIED FARMING - AIM

Fred Gartrell Plans to Extend Dairy and Apiary—Rents Orchard.

F. R. Gartrell, who owns an extensive tract of bottom land at Trout Creek Point, is preparing to go quite extensively into dairying and also to add to his apiary. For many years he has been carrying on diversified farming, including the growing of fruit, vegetables and hay, honey production and to some extent dairying. This season he will receive the larger proportion of his personal attention. Mr. Gartrell aims to build up a herd of about twenty milking cows. The Japanese, who have been with him for some years, will operate the orchard. It is Mr. Gartrell's intention to ship cream and to keep a number of pigs to use the skim milk.

WILD PARSNIPS KILL CHILDREN

Two children, a boy and a girl, six and four years old, respectively, died at Omak, Wash., a few days ago from the effects of eating wild parsnips at a ranch on Johnston Creek.

The children were playing at keeping house along the creek in sight of their mothers when they ate this poisonous plant. The little girl was affected first and went to the house, clutching her throat and stating that it hurt her. By the time a doctor was located and had arrived the child was dead and the doctor's efforts to save the boy were futile and he died in about half an hour.

KELOWNA NOT CANNING TOMATOES

The long drawn out controversy between canners and tomato growers with respect to the price to be paid for tomatoes has finally been settled by arbitration.

The growers will receive seventeen and nineteen dollars per ton, the former price for graded Earlina and similar varieties and nineteen dollars for John Baer and like varieties.

While consenting to abide by the award of the arbitrators, Dominion Canners (B.C.) Limited, are apparently not satisfied and have stated that the company's plant at Kelowna, where most of the tomato canning had been done, will not handle any of the tomato crop of the district this year. Their Keremeos cannery will pack tomatoes. It is explained that the fields around Kelowna do not produce the desired variety of high grade tomatoes.

It is understood that this decision does not very materially affect Summerland growers, who have not planned to produce cannery tomatoes.

TO ORGANIZE A CALF CLUB

Organizer Offers to Come if Enough Young People Ready.

Say, boys and girls, would you like to join a local calf club that would put you in a position to secure a pure bred Jersey heifer of superior quality with R.O.P. pedigree?

A cow that produces a large quantity of rich milk will soon pay for itself and it is stated on good authority that the heifers furnished calf clubs will pay for their cost in one year in the extra production of butter fat as compared with the ordinary cow.

E. H. Barton, of Chilliwack, who has been in charge of calf club work in this province for a number of years, has intimated his willingness to come to Summerland to organize a calf club among our young people and to make the selection of the calves for the club. It is apparent to all that one crop farming is too much of a gamble and if profitable side lines can be introduced they should be encouraged. Wherever these calf clubs have been formed, great enthusiasm has been developed and many fine animals that have been of profit to their owners have been introduced and the standard of the dairy animals in the community greatly improved.

Mr. Barton will be able to visit Summerland late in April or early in May. If you are interested, send your name to The Review or to Geo. H. Doherty, who is particularly interested in this subject.

WASHINGTON GROWERS ONLY NOW BEING PAID

Omak Fruit Growers, a co-operative concern at Omak, Wash., are just sending out cheques in final payment on last season's apple crop.

KELOWNA BUSINESS MEN IN SESSION

W. C. Kelley attended County Court at Kelowna on Tuesday. There he represented the Crown in a case against a Kelowna man who was fined fifty dollars and costs for failing to make his income tax report as requested. Mr. Kelley reported the business men in Kelowna in session on Tuesday discussing the co-operative fruit marketing question.

McINTOSHES IN PERFECT SHAPE

Samples of McIntosh in perfect condition were brought to The Review this week by Inspector Tait. They were grown by E. Thomas, and had been kept in common storage under his house all winter and had not even been wrapped. They are conclusive proof of the wonderful keeping qualities of our apples.

Great Transformation In Summerland's Park By Community Effort

Reeve is Making Another Call upon Citizens to Complete the Work Next Thursday — Generous Response to First Call is Appreciated, as is also the Work of Members of the Women's Institute—Fully Two Hundred Citizens Take Part in Improvement of Summerland Tourist Park.

What will go down in history as the greatest community effort ever staged here was successfully put over last Thursday, when, following the declaration of a public holiday by Reeve Campbell, every effort was concentrated on improving Summerland's tourist park. At an early hour in the morning the first delegation of workers, headed by the reeve, was on hand, and in another hour the total had jumped to about seventy-five workers.

Promptly at noon most of these workers were conveyed to the Parish Hall, where a splendid dinner had been prepared by the Women's Institute. Then back again, where the morning contingent was increased to over 150. Some

three acres were cleared of underbrush, which was stacked and burned and this, added to what had been previously cleared, now gives an open greensward appearance amid the giant pines and firs. At 4 p.m. the women served tea, sandwiches and cakes from the home of Mrs. J. J. Blewett, and shortly afterwards the working forces were greatly augmented when the high school and public schools were released. By 5 o'clock there were 200 or more willing workers, and when a halt was called for the day a marvellous transformation had been accomplished. But the job had not been finished and many citizens approached the reeve suggesting that another day be given to the park.

More Work Yet When the subject was introduced by the reeve at the regular meeting of the council on Saturday, Thursday of next week was decided upon, when an effort will be made to finish this part of the work.

Outdoor cooking places of stone and cement will be put in and other facilities provided for campers. Prominent signs will be placed at Gartrell's corner and at the park entrance.

Natural Park Always appreciative of the natural charm of our civic park, our people are delighted with its adaptability to the use of tourists. Reeve Campbell in another column is again appealing to the citizens to assemble at the park on Thursday of next week, when the members of the Women's Institute will again serve afternoon tea.

TREES FOR TOURIST ROAD

Council to Assist Women's Institute in Buying Shade Trees.

Twenty-five dollars was voted by the municipal council on Saturday toward the purchasing of some ornamental trees for the lakeside of Shaughnessy Avenue. The balance of the cost of these trees is being raised by the Women's Institute. Some time ago the Institute intimated that they would be coming to the council for about one hundred dollars for this purpose and the reeve seemed somewhat relieved when the smaller sum only was requested.

For a time there appeared some doubt as to whether even this amount would be granted and but for the urging of the matter by the reeve and Coun. Ritchie, the grant would not have been made.

Mrs. Angova and Mrs. J. Tait spoke for the Institute and also asked that more be done on the lanes and streets to finish the work undertaken two weeks ago. Failing to get promise of the money, the ladies withdrew.

After discussing the matter for some time, during which Coun. Ritchie approved of the idea of having the trees planted and in which he was supported by the reeve, who said that it would be money well spent and that anything that the council could do to help maintain the assessments would be of direct benefit to the municipality, the others withdrew their objections. Coun. Ritchie declared that the citizens were doing good work and he would like the council to help. Finally, Coun. Johnston moved that the grant be made. This motion was supported by Coun. Ritchie and was carried unanimously.

The request of the Institute that earth piled on the roadside south of the handstand be removed was favored but some of the council thought that those who were responsible for putting the earth there should be required to move it off the street. The subject was apparently a matter of dispute between the contractor who did the work and his employer.

There are 147 peaks over 10,000 feet high in the Canadian Rockies, nearly all of them possessing glaciers.

NEW PIPE FOR HILBORN LAKE

Six Inch Pipe On Better Grade To Be Laid At Same Depth

One thousand feet of 6-inch pipe has been ordered by the municipality to be used to replace the smaller pipe now draining the Hillborn Lake area.

The council on Saturday instructed the clerk to have the proper specifications prepared and to advertise for tenders for digging and backfilling. The actual work of laying the pipe will be done by municipal men.

The new pipe will be laid at the same depth as the existing pipe but at a better grade. It was stated that some of the property owners would like to have the pipe laid at greater depth but the opinion seemed to be that if this were done it should be at the expense of those interested.

The Summerland Review

Established August, 1908.
Published at Summerland, B.C., every Thursday by
THE REVIEW PUBLISHING COMPANY, LIMITED
Ralph E. White, Editor and Manager

An independent family newspaper covering Peachland, Summerland and Naramata and adjacent districts.

Member of Canadian Weekly Newspapers Association.
Member of British Columbia Selected Weeklies.

Subscription Rates—In British Empire, in advance, \$2.50 per year; six months, \$1.40. To U.S.A. and other countries, \$3.00 per year.

Advertising Rate Cards and information respecting territory and samples of paper mailed upon request, or may be seen at the office of any advertising agency recognized by the Canadian Press Association.

Advertisers must have copy in by Tuesday noon in order to insure changes for standing advertisements. New display advertising copy can be accepted one day later.

All instructions for cancellation or alteration of advertising must be in writing.

Correspondence—Letters addressed to the Editor and intended for publication must be short and legibly written on one side of the paper only. The longer an article, the shorter its chance of insertion. All communications must bear the name of the writer, not necessarily for publication. The publication or rejection of articles is a matter entirely in the discretion of the Editor. No responsibility is assumed by the paper for the opinions expressed by correspondents.

Typographical Errors—In the event of a typographical error, advertising goods at less than the proper price, the newspaper will furnish letters to be posted in the store stating the correct price, but goods may not be sold at the price printed and the difference charged to the newspaper.

Thursday, March 27, 1924

SOFT FRUIT PRICES.

Those of our readers who are growing soft fruits, and practically all are, would be well advised to give them particularly good attention this season. All indications are that the price will be much better than for some years at least. There is every likelihood of a decided shortage in peaches, cots and cherries.

Recent reports from California state that 80 per cent. of the 1924 peach crop has been destroyed by a heavy frost which fell throughout the California peach belt last Thursday night. F. C. Nielson, district horticultural inspector in the Wenatchee district, has made the announcement that much of the soft fruit of the lower districts is completely killed and that much damage had already been done in California to cots and peaches by severe drought in the last six months. He is advising all fruit growers in his territory to take special care of their soft fruit trees by pruning, spraying and careful irrigation. He also predicts a good market for pears on the ground that the pear crop in California will be extremely light.

Considerable winter injury is also reported to have been done to these fruits in the northern end of our own Valley. It will be remembered that though we had very little winter, we had one sudden cold dip when in some places, both south and north of us the temperature went considerably below zero causing injury to fruit buds.

REMEDY LIES WITH GROWERS.

In these days when so much is heard of growers breaking contracts, of independents extending their holdings or starting up in business, and rumors of this and of that, all tending to cause a feeling of uneasiness among a certain class of growers, no apology should be necessary for the reprinting of an article from the Wenatchee Daily World of March 10th, which is as follows:

"Unless conditions materially change and a way is found out of the slough of despond in which the industry finds itself, an investment of tens of millions is threatened with destruction, which will precipitate an era of depression in the northwest as bad as that prevailing in the wheat fields. Whatever the cause of the existing situation, and it seems to have been caused largely by the war between co-operative organizations and independents in a desire to put each other out of business, the result has been disastrous to both and to the grower and it is evident that to restore stability, all marketing concerns must unite in a co-operative organization to maintain prices that will ensure a profit to the producer.

"The remedy lies with the grower himself. He should not permit his own tonnage to be used to destroy the industry, but insist that his marketing organization co-operate in re-establishing market stability, and he must refuse to renew contracts that make him the goat of the unscrupulous speculator."

WANTS AMERICAN FRUIT.

While we in the Okanagan are straining every effort to keep American fruit from the market which rightly belongs to British Columbia, by the endorsement of embargoes instituted by the Dominion to that end, there are those who, while professing eternal friendship to our faces, are using every artifice to defeat our aims, for selfish reasons of their own.

Sam Savage, of the firm of Plunkett & Savage, Calgary, is reported by the Calgary Herald to have recently delivered a speech before the Rotary Club of that city in which he urged his hearers to go the limit in opposing the proposed luxury tax on all fruits coming from the U.S. He predicts, to quote the Herald, "that if the tariff wall was down, greater business would be done by the fruit dealers in Canada," to which we add, we believe him,—more for the dealers and less for the Okanagan, and that is what we are concerned in. We reprint the report in full.

Declaring that since there was at present a duty of thirty cents a box on apples coming from the United States, and in view of the fact that the fruit growing industry had been protected by a tariff for the past thirty-five years, Sam S. Savage, speaking before the Rotary Club luncheon on Tuesday afternoon, declared that strenuous and immediate steps should be taken by the people and the press to put a stop to an endeavor, which is now being made at Ottawa, to have a luxury tax placed upon all fruit coming from the United States.

Mr. Savage drew attention to the fact that at present hundreds of cars of apples are being shipped from Canada to the United States and he declared that as Canada places a tariff on American fruit, so will the United States place a tariff on Canadian fruit. He predicted that if the tariff wall was down greater business would be done by the fruit dealers in Canada.

Okanagan Branch Line Championed by Member

Succeeds in Having It Presented to House in Separate Bill—Two and a Quarter Million Dollars Required to Finish the Line.

J. A. MacKelvie, M.P. for Yale, made a vigorous speech in the Federal parliament a few days ago, urging the completion of the Kamloops-Kelowna line. Our report of his speech along with other copy was crowded out of our last number by late urgent matter. Mr. MacKelvie said in part:

Coming now to the question raised by the Minister of Railways, I wish to refer to the matter that really urged me in getting to my feet. For several years I have been working as hard as possible in this parliament to bring about the completion of a branch line running through my constituency from Kamloops to Kelowna on the Canadian National line. It has been graded for several years and the country has ex-

pended \$5,250,000 upon it. The arguments for the completion of this branch line are perhaps as strong, as forcible and as unanswerable as those that can be advanced for any similar branch line in the Dominion. I have submitted them to the House at previous sessions, and I consider it my duty on this occasion again to call the attention of the government and of parliament to the matter. In the first place, we have already, as I say, expended on that branch line over \$5,000,000. It is lying idle and so long as it does so we shall lose the interest on that money, which at 6 per cent. would represent over \$300,000 a year. Naturally the line is deteriorating every year, and it is only a question of time when the grade will be of no further service and will have to be reconstructed if the line is completed. This branch line will serve a wonderfully productive country and will open up a new district. Passing from Kamloops through Grand Prairie and the Falkland districts, it will open up a country untouched by any transportation system. In Falkland there is, I think, the largest pure deposit of gypsum on the continent, owned by a Winnipeg firm who are only too anxious to exploit it as soon as there are the necessary transportation facilities. A sixteen-mile spur from my town of Vernon to Lumby passes through a rich and thickly settled agricultural and horticultural district. It goes through the famous Coldstream ranch, and when it reaches Lumby it enters a district of wonderful fertility, a mixed farming district that produces grain and hay, and from which are exported considerable wood products such as telephone and telegraph poles, railway ties and so forth. This would bring a steady stream of revenue to the main line. From Vernon to Kelowna you have a district containing 60 per cent. of the fruit growing population of the Okanagan, and it is estimated that these men in this 35 miles are losing \$200,000 a year at the present time in transportation charges, trucking their fruit to points upon the Canadian Pacific Railway, which would be touched by this new line. This would give them cheaper transportation facilities, and as I have already pointed out we are paying \$300,000 in interest charges while our farmers are losing much money today trucking their products, and it would surely be a matter of economy to complete this branch line. Out of that valley this year went over ten thousand cars of fruit and vegetables and other products, and there was of course considerable incoming freight. It is estimated that the local revenue to the railway is upwards of three million dollars a year, and a very large share of that revenue would go to the National lines were this branch completed. I think I am giving a very conservative figure indeed when I say that the first year after its completion the National lines would receive at least one million dollars of traffic.

the bill was by no means confined to the Conservative element in the upper house. Indeed, the honorable Minister of Railways (Mr. Graham), I apprehend, is perfectly cognizant of the opposition in the senate; it came from every quarter.

Greatly to my disappointment I have recently been informed—I do not know how good my authority is—that it is the intention of the government to again introduce a bill along somewhat similar lines to the ill-fated measure of last session. This, to me, would indicate that they are absolutely courting defeat, and it gives rise to the impression, which I have heard expressed in more than one section of the Dominion, that the government are not sincere in their intentions and for some reason or other, which I cannot fathom, would like to have the bill killed again. I know Sir Henry Thornton recognizes the importance of this branch line in that it would be one of the best feeders to the National system, but I do not know, and I have never been able to find anybody who could inform me, why it is that this year there is a chance of the government again introducing the bill in the same shape as they brought it down last session, which means that the Senate will mete out to it the same treatment.

Asks Separate Bill
I would implore the Minister of Railways to deal with these branch lines in separate bills this session, and so let each stand on its own merits. For the reasons which I have advanced tonight, and which I could enlarge upon if necessary, I have no doubt that the Senate can be persuaded that the Kamloops-Kelowna branch line is absolutely justified; and I am equally confident that the Senate will look with favor on similar branch lines on the prairies which have been graded for years and which would serve a country urgently in need of transportation for its grain, which at present has to be hauled long distances to the nearest railway.

Mr. Graham—Does my honorable friend intimate that the Senate has not any power to amend a bill of this kind?
Mr. MacKelvie—No, I do not exactly intimate that, Mr. Speaker; but I doubt the wisdom of cumbering such a bill with all sorts of what the Senate seem to conceive to be impossible conditions, when each line might well be the subject of a separate estimate, thus standing upon its own merits. I can conceive no possible objection to this course. The honorable Minister has intimated that it would be difficult to keep the money owing to cover the construction work on these lines after it is once started, but that has never been an insuperable difficulty in connection with any other public undertaking, and I do not see why it could not be overcome in this connection.

Mr. Graham—The labor situation is never the same.
Reason for Defeat
Mr. MacKelvie—I again say that my friends surrounding me and those in the Progressive party who are interested in these branch lines present a united front in renewing their request to the Minister to bring down this branch line legislation in such shape that there will be no danger of its meeting the same fate again in the upper house.

Mr. Graham—Does my honorable friend think that is the real reason the Senate threw out the bill last session?
Mr. MacKelvie—That is the reason given. I acknowledge that possibly there were some other influences at work which I cannot control; but there was the situation as it appeared before the public. The Senate gave their reasons for throwing out the bill and in a general way the public regarded those reasons as pretty good.
Mr. Graham—That is not my information.

Steuart Unanimous Choice of Directors

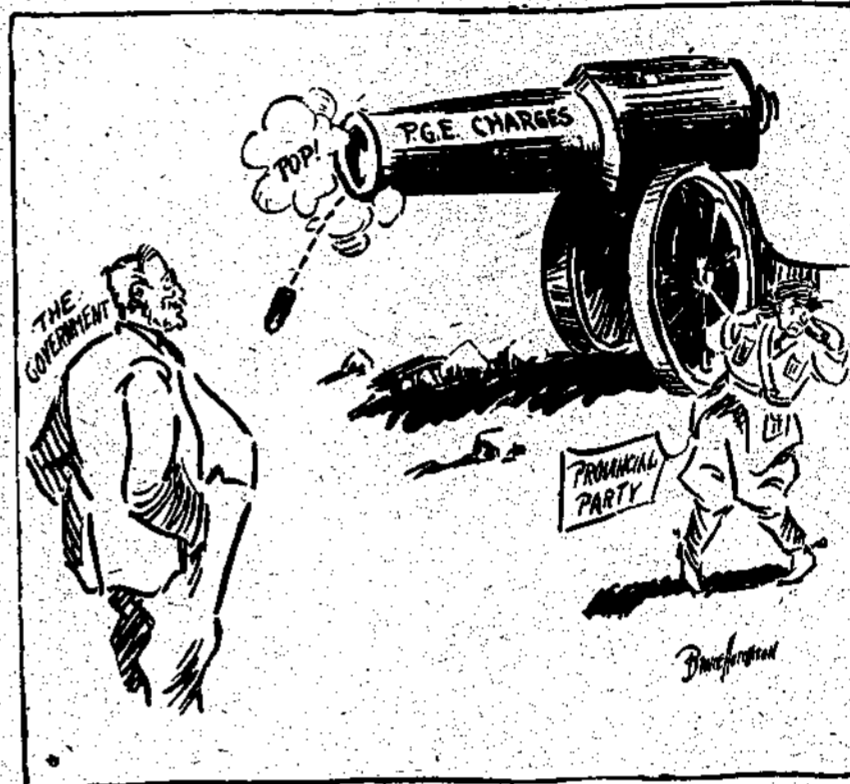

Basil Steuart of Summerland has accepted the position of general manager of the Associated Growers. The directors were unanimous in offering the position to him, according to a telephone message received by The Review at noon today. Throughout last season and up to the present Mr. Steuart has been managing director and has ably filled that position.

The Review extends to Mr. Steuart its congratulations for the confidence thus placed in him and the recognition manifested in the unanimous choice by the board of the value of his services during the past season.

It is presumed that Mr. Steuart's appointment will mean a vacancy on the board of directors and that the Summerland Co-operative will be called upon to elect another representative.

The directors went into session yesterday afternoon and have many weighty problems to deal with, that pressing for immediate attention after the appointment of the general manager being the securing of sufficient tonnage to make efficient operating possible. There are also to be dealt with the winding of last season's operations and the arranging for financing the 1924 crop.

"MUCH ADO ABOUT NOTHING"

Here is one cartoonist's view of the costly investigation into "Third Party" charges now being held at Victoria.

PEACHLAND HIGH SCHOOL FEES

Editor Review.

Dear Sir,—Am after a little information re the high school tax. Just what is the Summerland tax rate for a scholar per month? Are all scholars charged the same rate?

There has been some dissatisfaction here as the rate reaches from 25 cents to \$2.20 and several no tax whatever. Of course we are told the rate is struck from the amount of one's municipal tax.

Last year some of us felt \$2.00 very high and paid under protest which seems to have made matters worse.

Am thanking you in advance for your trouble.

Yours respectfully,
H. K. JONES.

Ed. Note: The rate of high school fees here is one dollar a month to each pupil in the first and second years, and three dollars to matriculation students, all scholars in the same classes being charged an equal rate.

Mr. MacKelvie—I am not upholding the Senate; indeed the honorable Minister will understand that it was a very severe blow to me when the measure was defeated in the upper house. At the same time, if he will read the Senate debates of yesterday he will observe that honorable Senator Turriff intimated in very plain language that the bill as presented to the Senate was obnoxious. I do not suppose I can say anything further to convince the Minister if he is not already convinced, but I do hope that those of us who are interested in these branch lines will not have to go home to our constituents at the end of this session with the same sorry tale as we had to tell them last year. If unhappily we have to, nothing will convince those constituents that the government did not deliberately court defeat of the bill in the Senate, knowing exactly what reception it would receive there.

Since the above was put in print the Minister of Railways has announced his intention to bring down twenty-six separate bills for the branch lines program of the Canadian National Railways. The estimated cost of completing the Okanagan branch from Ducks, twelve and a half miles out of Kamloops, to Armstrong, Vernon and Kelowna, with the branch up to Lumby, is \$2,236,000.

In Montana are some of the finest glaciers in the world, even rivalling those of the Alps.

Marketing Situation Is Explained To Growers By Associated's Chief

President Howe Forecasts Crisis that Will Result if Marketing is Not Controlled—Good Work Accomplished in Past Season Through Loyalty of the Trade—Says Associated Could Not Save Growers from Consignment Market with Less Proportion of Tonnage than Last Year.

(Continued from Page 1)
 "When the Associated Growers was formed those conditions still existed and the heads of the organization had to face such conditions and found it difficult to get good prices."

Chose Wisely
 "There has been much criticism of the Associated. Some excuses for mistakes lay in the fact that it was necessary to float a large concern in a short time; mistakes are humanly unavoidable."

Mr. Howe briefly reviewed the organizing of the sales department, in which he declared that the executive had been wise in picking the best men in the Okanagan Valley, men who had made good here, were experienced in the business and knew the trade with whom they had to deal.

Made Big Loan
 It had been an uphill road all the way through the past season. The financial condition of the growers was bad and it had been necessary to borrow nearly two million dollars, on very poor security. Probably never before in the history of any agricultural or horticultural organization had such a loan been obtained on so little security. Public opinion, sympathy, etc., had aroused the banks and these had made organization possible. Mr. Howe declared "if we cannot grow fruit here we are done. The banks and business men have great interests in the Valley and all felt that they had to get behind the organization movement."

Very Grateful
 As a fruit grower, he very much appreciated the help. (Applause). "They came to our rescue," continued the speaker. "We bought independent buildings and equipment and commenced operations. The great question was how to operate and prevent conditions which had always existed, the consigning of fruit."

"The new association was determined that if it was strong enough it would break away from this practice and sell, f.o.b. shipping point and to do so was a great struggle. The Associated sold approximately 80 per cent. of the output. The other 20 per cent. was against us. It went on the same market and we had to meet its competition."

Brokers Loyal
 "At the commencement we entered into an agreement with the trade, at the same time asking for their loyalty to the growers' organization. This loyalty was promised and those men," said Mr. Howe, "kept their word and made good. Never has American fruit been kept out of our markets as it was last year. The disorganized condition of past years had made it exceedingly difficult for the jobbers to know how to operate. They realized that if we could stabilize the market they would benefit. Though 20 per cent. of the tonnage competed with us and much of it was sold to retailers as cheap or cheaper than we sold to the jobber, we were able to carry on, though at times we were compelled to lower our prices. With complete control we could have paid the grower from ten to twenty-five cents a box more. It was a tremendous struggle to avoid breaking into a consignment market."

Over Producing
 "The prairies are our market. We had been told when we started into the fruit business in this Valley that the prairies would always take all we could produce, but the population of the prairies had not kept pace with the rate of production here. The Associated Growers sold from 3,000 to 4,000 cars on the prairies last year and that market means much to us. It is unreasonable to expect our fruit to go through a dozen channels and meet in competition instead of through one channel in which case we would never have a consignment market."

Good Distribution
 "We have had the best distribution over; one thousand cars more had been sold on the prairies last year than the year before but still we had a large surplus; we are over-producing and the Associated was forced to enter the export market where it had to meet world conditions. "Some have said that the indepen-

dents have paid better prices. If they had had the larger volume to handle and had been forced to export they could not have paid any better prices. The British market was early glutted with U.S.A. fruit and the prices were broken and we were forced to take the prices offered. These conditions the independents would have had to face if the Associated had not moved a large part of the fruit out to the export markets."

Late Prices Better
 The speaker then went on to describe how the independents with the smaller tonnage have some advantages. "Fortunately, the Americans, after breaking the British market, had dropped out and we then got better prices. If the balance of our crop had been of the size and varieties required it could all have been sold in the United Kingdom at good prices."

"It seemed as though the powers had been against us. Early last season the weather had done much damage to stone fruits, resulting in heavy loss. The past winter had been a good one but not favorable for keeping apples. About 600 cars of apples had been stored in the Valley, some of which had to be re-packed because of loss through mild weather. Storage was necessary in order to avoid breaking the market but the independents moved theirs out. Is it any wonder they got a little better price? But they only got that price because the Associated Growers were in existence."

Good Sense Needed
 "As fruit growers, business men and financial institutions we are up against a hard proposition. Brains, patience and perseverance, which we are capable of putting forth, are needed to save the industry."

"Consumers are paying about pre-war prices but it costs the growers now about 30 cents more for boxes, paper, nails, etc. If all conditions had been the same our overhead would be 30 cents less. How are we going to make fruit growing pay? We cannot wait for something to turn up. If we go at it from the bottom up we will attain success. This must start with the orchards. Production per acre must increase. No business can succeed unless it is given the best attention. Produce to the best of your ability and cut your overhead to the lowest possible. "On the other side of the line, much of the fruit is packed in the orchards and with a proper system of inspection here there is no reason why much of this overhead cannot be cut out."

Serious Crisis
 "The crisis is a serious one," declared Mr. Howe, who went on to show how much property had changed hands and was not now under the five-year contract. "The question is what is the best thing to do under these conditions. Some advise keeping quiet but the independents are not keeping quiet and your executive decided to send out the letter which you have already read in the local press."

Mr. Howe explained that the executive did not intend that the Associated should repeat the history of the O.U.G., which started with about 60 per cent. which dwindled down to about 45. He did not favor remaining quiet under the circumstances, but preferred a quick decision.

Sink or Swim Together
 "If these orchards are going out we, too, will pass out and all will go down together." (Hoarse applause). "We cannot get results without the growers behind us and it is not fair that some should strive for the cream and leave the others to take the skim milk. It has been estimated that about 600 cars in addition to the 20 per cent. had broken loose, creating an exceedingly critical and dangerous situation and only public opinion and sentiment will save us. "We have proven," said Mr. Howe, "that we can make it go if the growers are behind us. Just as soon as commercial conditions improve we can make money, but, if we drift back to 1912 conditions, the situation is absolutely hopeless."

Good Prices
 All but 24 cars of the 1923 crop had been sold and these would be mostly sold during the next week. The government had removed the dumping clause, under heavy pressure, in order to admit Winesaps and this had slowed up sales. The speaker told of the final disposal of McIntoshes stored at Niagara Falls which had been sold at good prices. The last car had gone out at a price which had netted \$1.50 to \$1.60 f.o.b. here. These had been sold in competition with American apples.

Pools had been kept open because of apples unsold, which had delayed payments to growers. In closing, Mr. Howe declared that it was up to the growers to decide on what percentage of the tonnage they will demand. Banks, boards of trade and producers must get together and look this thing squarely in the face and put the business on a proper basis. If this is done it will be the salvation of the Valley.

Answers Questions
 John McLean wanted to know what the Associated would do if they did not get the tonnage, to which Mr. Howe replied, "It is not what we will do; but what the growers are going to do."

Asked why the purchasers of the K.L.O. at Kelowna, former employees of the Associated, desired to go out, Mr. Howe explained that the buyers of this property must make it profitable. "They cannot do it under 1922 conditions; nor can they unless we are foolish enough to allow them to take the cream while we protect their prices. The move taken by the Associated has upset the plans of all shippers who are waiting to see just what will happen and the matter is now in the hands of the growers. Their hope lies in the continuing of the Associated Growers." He saw nothing wrong in the purchasing of the K.L.O. by Associated employees and they have the right to decide where they will place their crop.

To other questions Mr. Howe stated that it may be that the Associated would have to take stock every year as to its prospective tonnage. They had been banking on a contract, but any contract was not of much value unless the growers were behind it, nor did he put much value on the Associated if it cannot give service.

It should be distinctly understood, he urged, that the Associated would not operate in any year in which it did not have at least 80 per cent. It would never be able to avoid a consignment market.

Mr. Howe gave assurance that the action of the Associated in no way affected the price, the growers would receive for their last season's crop and he believed when the season ended the prices paid would compare favorably with those paid by the independents.

Deplorable Criticism
 To criticism from John McLean with respect to salaries, Mr. Howe stated that the Associated had been charged with paying large salaries but when reductions were proposed these employees walked out. "If you have a business that is not paying, it is not easy to go to a man who can command a large salary and ask him to come to you at a low salary. The executive had picked on men who had been earning more money. Today, however, the staff is very small." Such criticism as he had heard tonight from Mr. McLean had resulted in the loss to the Associated of some of its best employees.

Vote; Criticism comes only from a very few. "Such criticism," Mr. Howe declared, "is most deplorable."

John McLean: If you have two sales agencies why employ salesmen?

Staff Necessary
 Mr. Howe: We sell practically all our output through the two brokerage houses. Negotiations are on all the time from early morning to late at night in the Vernon office during the active season. It pays, too, to have our own men on the prairies. The Americans had put on a big campaign in an effort to force sales. Claims are continually being made. Some people on the prairies are not honest. Dozens and scores of claims of all kinds were made and it was better to have our own men on the ground.

To another enquirer Mr. Howe stated that the government would experiment this year in the selling of part of the crop under government inspection.

To an inquiry from M. G. Wilson as to what efforts had been made to prevent independents re-entering business, Mr. Howe stated that if a man loses his moral sense you can not hold him. He will have some way of avoiding his contract.

G. J. Coulter White explained that the provisional committee had fully dealt with this matter and found that there was no positive legal way of so binding a man.

Mr. Howe was sure the advisory committee this week will leave no stone unturned to accomplish the necessary end. Definite information will immediately be obtained and the advisory committee, he believed, will at once get in touch with every local with the boards of trade, banks and others concerned and he would expect that a conference would be called and a plebiscite taken on the minimum tonnage on which the Associated would operate.

Creston Comes In
 Mr. Howe gave out the cheering news that at Creston 75 per cent of the growers had agreed to request the Associated to again handle their crop.

Unfortunately, everything possible had not been done last year to induce the independents to hold to a price and Mr. Howe complimented the action of Walters, Limited, of Summerland, the only house which had played the game in this respect.

In reply to a question as to probable selling arrangements for next year, Mr. Howe stated that "as fruit growers we are a very difficult class to please and very unfair in our criticisms, both of the Associated and the people to whom we sell and this is not a healthy influence. We should strive to gain confidence and learn to be just and to appreciate the services of others."

Stores Will Close
 J. W. S. Logie, speaking for the retail stores of West Summerland, stated that the business men felt that they should have something to say but it would be premature to say much tonight. These business men were ready to help.

Farmers everywhere are in a serious situation; in United States one-fifth of the farmers have gone bankrupt in the past three years; conditions are almost as bad on the prairies and we are feeling the effect here. It was all a question of supply and demand.

Referring to the advertised meeting of independent growers, with the object of fixing prices, he declared that they can not get control of prices unless they could control supply. Mr. Logie, in no uncertain language, made it plain that if the Associated did not operate this year the business men for whom he spoke would close their doors and walk out.

In tendering a vote of thanks of the meeting to Mr. Howe, the chairman stated that the latter had shown his astuteness in coming to Summerland first. Mr. Howe could rest assured that he carries the gratitude of

well-thinking people for the work he has done. Mr. Howe expressed appreciation of these kind words and referred to the meeting in Summerland a year ago, his first meeting. He had always held Summerland in high regard because of the manner in which that meeting had overcome a most difficult situation.

Bald-headed criminals are very rare, say those who have made a study of the subject.

AUCTION SALE

Acting under Instructions from J. H. WALTON, I will offer at Public Auction the Livestock, Implements, Household Furniture, and Effects at his Father's home, Jones Flat (north of Mr. Jackson's) on

Saturday, March 29th
 Commencing at 1.30 Sharp
 the following:

- | | |
|---|--|
| 1 Orchard Horse, about 1850 lbs. | 1 Fruit Picking Bag. |
| 1 Mare, 1250 lbs., broken single or double. | 1 Wheel Barrow. |
| 1 Colt, 1 year-old filley. | Pruning Saw. |
| 1 Cross Jersey Heifer (2 yr.) fresh in July. | Small and Large Shears. |
| 1 Side hill Plough. 1 Orchard Plough | 1 Large Jack Plane. |
| 1 Scuffer Cultivator. | 1 Saw, Square, and Level. |
| 1 Set Heavy Doubletrows. | 1 Crosscut Saw. |
| 2 Section Drag Harrows. | 1 One-man Saw. |
| 1 Heavy Team Democrat in first class shape with shafts and polo. | Box Sundries. |
| 1 Large Box Stove. | 1 Hand Spray Pump. |
| 1 Beautiful (Newcombe) Mason and Rish Plane. | 1 Bean Spray Pump, 2 line hose. |
| 1 Edison Disc Cabinet, 23 records. | 1 Set Bob Sleighs, 2 in. runners. |
| 1 Ladies' Dressing Table, 3 bevelled Mirrors (in cream enamel), with sent to match. | 1 Democrat, Pole, Whiffle trees and Yoke (complete). |
| 1 Rocker Cream enamel. | 1 Set Heavy Team Harness. |
| 2 Hardwood Leather Seated Rockers | 3 Horse Collars. |
| 2 Arm Rockers. | 1 Wrecking Steel Bar. |
| 1 Morris Chair. | 1 Cross Bar. |
| 1 Fancy Flower Stand. | 2 Axes. |
| 1 Hardwood Dining Table. | 1 Metal Saw. |
| 2 Kitchen Chairs. | About 3 cords wood. |
| 1 Edison Cylinder Gramophone, with reproducer. | 1 Dinner Set Dishes. |
| 1 Gramophone Music Stand. | 1 Range Stove, Hot Water Front (Chief). |
| 1 White Enamel Double Bed. | 1 Kitchen Table. |
| 1 Three-quarter Spring and Mattress | 1 Refrigerator in first class shape. |
| 1 Spring Cot and Mattress. | 1 Sectional Steam Cooker. |
| 1 Aladdin Lamp with Globe (complete). | 1 Lantern and Oil Stove. |
| 2 Ordinary Lamps. | 3 Hand-painted Oil Paintings, in gilt frames. |

SYNOPSIS OF LAND ACT AMENDMENTS

PRE-EMPTIONS

Vacant, unreserved, surveyed Crown lands may be pre-empted by British subjects over 18 years of age, and by aliens declaring intention to become British subjects, conditional upon residence, occupation, and improvement for agricultural purposes.

Full information concerning regulations regarding pre-emption is given in Bulletin No. 1, Land Act, How to Pre-empt Land, copies of which can be obtained free of charge by addressing the Department of Lands, Victoria, B.C., or to any Government Agent.

Records will be granted covering only land suitable for agricultural purposes, and which is not timberland, i.e., carrying over 5,000 board feet per acre west of the Coast Range and 2,000 feet per acre east of that range.

Applications for pre-emptions are to be addressed to the Land Commissioner of the Land Recording Division, in which the land applied for is situated, and are made on printed forms, copies of which can be obtained from the Land Commissioner.

Pre-emption must be occupied for five years and improvements made to value of \$10 per acre, including clearing and cultivating at least five acres, before a Crown Grant can be received.

For more detailed information see the Bulletin "How to Pre-empt Land."

PURCHASE
Applications are received for purchase of vacant and unreserved Crown lands, not being timberland, for agricultural purposes: minimum price of first-class (arable) land is \$5 per acre, and second-class (grazing) land \$2.50 per acre. Further information regarding purchase or lease of Crown lands is given in Bulletin No. 10, Land Act, "Purchase and Lease of Crown Lands."

Mill, factory, or industrial sites on timber land, not exceeding 40 acres, may be purchased or leased, on conditions including payment of stumpage.

HOMESITE LEASES
Unimproved areas, not exceeding 20 acres, may be leased as homesites, conditional upon a dwelling being erected in the first year, title being obtainable after residence and improvements conditions are fulfilled and land has been surveyed.

LEASES
For grazing and industrial purposes areas not exceeding 40 acres may be leased by one person or a company.

GRAZING
Under the Grazing Act the Province is divided into grazing districts and the range administered under a Grazing Commissioner. Annual grazing permits are issued based on numbers ranged, priority being given to established owners. Stock-owners may form associations for range management. Free, or partially free permits are available for settlers, campers and travellers, up to ten head.

FORCE CO-OPERATION BY LEGISLATION

Editorial Review.
Sir,—The crisis in the co-operative has arisen sooner than was expected and apparently as far as the directorate are concerned we are likely to fall back to the former cut-throat competition. Mr. Howe's idea of future regulation is apparently the B. C. Traffic and Credit Association, which proved unworkable. Supposing the shippers were bound by a hard and fast written agreement then some other shipper would immediately start up and by underquoting secure a large amount of business. The weaker members of the combination, in order to sell their fruit, would have to meet this competition and the whole arrangement would go to pieces.

The executive have fallen between two stools. They tried to run the co-operative as a purely business concern but they departed from a main business principle when they served the near-by markets for their competitors. Following the policy of last year what inducement to join have they given the grower-shipper? He has every right to fight to the last ditch to keep his business, but the co-operative has an equal right to use every means in its power to eliminate him and must do so. The purely commercial policy would be to so smash the market of its competitors that the profit from it would fall below the profits of the export market. The co-operative would then show better average returns than he independents, but this would mean poor prices all round and especially for soft fruits. However, the co-operators have political and social power in reserve and in the critical financial position of the industry it is absolutely necessary to use these powers. The berry growers and the egg producers are experiencing the same difficulties as the fruit growers. The government is vitally interested in putting farming on a good basis in order to encourage settlement and especially with its expenditures on the P.G.E., Sumas, and Oliver. Therefore if it were strongly represented to the government that legislation was necessary to compel farmers to unite and that such action was favored by a majority of the growers, there would be a good chance of success. This is a free country but our liberty is circumscribed wherever it is harmful to the community, and in the opinion of a large majority of the Okanagan, free peddling of fruit is doing infinitely more harm than free peddling of booze would do. The union would not necessarily be co-operative and a resolution to be put at our general meeting might be in these terms: That owing to the large surplus of fruit produced in B. C. which requires export to prevent flooding of the near-by markets, the onus of which export falls almost entirely on those combining in co-operative associations, the government should conduct an enquiry into the best method of so controlling the industry that the burden of finding foreign markets falls equitably on every grower.

Yours truly,
R. G. RUSSEL.

SAYS EMPLOYEES SHOULD CO-OPERATE

To the Editor,
Sumnerland Review.
Dear Sir,—The Associated Growers, we are told, are in danger of going down to defeat owing to a threatened decrease in tonnage. The president, in telling the old, old story indelibly printed on the hearts of old O.U.G. members to the large audience in Empire Hall on Saturday evening last, omitted to mention what to a really interested and enquiring onlooker seems to be responsible for the present situation, a situation that any shrewd observer must have known would arise sooner or later, but which even the shrewdest scarcely expected before the completion of the first year's business. The present crisis is largely the result of a fatal blunder made, if newspaper reports are correct, on the advice of a prominent organizer of farm marketing. He is reported to have advised offering special inducements to independent shippers to join the organization. "If you can't get them in any other way, offer them jobs; but get them in any way" or words to that effect.

Thus an unfortunate precedent was established, and it is not surprising to hear that one of the largest acreages among the threatened withdrawals is said to be controlled by a man who, like the independents bought in at the time of reconstruction, thinks that he has but to fix his price and the growers must pay. We have now an organization, because of that initial blunder, the galling irritation of the five-year contract, and the complete overlooking of one of the first principles of co-operation (bringing the producer closer to the consumer), fundamentally weaker than one it supplanted. The directors of the Associated Growers state emphatically that their chief handicap is the competition of independents. The Okanagan United Growers said the same. Assuming the truth of that statement the situation is this. The highest paid and most important positions in the new organization are held by the very men whose competition was responsible for the wrecking of the old, bought in at their own price. Virtue is its own reward! The occupants of these positions are probably better fitted to them than any one else who could be found, but as they have not yet shown that they are, in spirit, co-operators, it is unreasonable to expect the growers to have confidence in them. I believe the organization can be saved only by converting it into a true co-operative, placing every employee from the least to the greatest, on a scale of pay based on the present ability of the growers, rising or falling, according to future returns.

At a Christmas dinner a well-known professor was called upon to speak. In introducing him the host said to the guests: "You have been giving your attention so far to a turkey stuffed with sage. You are now about to give your attention to a sage stuffed with turkey."

NARAMATA NEWS

Current Events of Town and District

The Boy Scouts had a field day at the ranch of Mr. and Mrs. Cargill, and erected a driving shed for the Cargill buggy, ending the proceedings by a spell of splitting a substantial pile of cordwood. Assistant Scoutmaster Leslie Smith superintended operations.

Mr. Rogers is back from a trip to Spokane, and reports that conditions are very dull in that district.

Committees handling the arrangements for the forthcoming May Festival met on Friday evening by invitation of the Women's Institute, Mrs. Williams presiding. The date of the festival will be decided at the next meeting.

A series of prayer meetings are being held in various homes in Naramata each evening, led by Mrs. Fumerton of Pentiction. They have been well attended.

The members of the Womens Auxiliary met on Friday afternoon at the home of Mrs. Geo. Weaver, Mrs. Languedoc presiding. Much work was disposed of. Refreshments were served by the hostess, assisted by Mrs. Horswill.

Some correspondents take no chances. A packet from the Canadian Bureau of Music lately came to hand addressed to Mr. George Naramata Weaver, Summerland, B.C. Mr. Weaver thinks that, in order to cope with such addresses, he should dwell in a houseboat moored in the lake between the two places.

An informal meeting of the board of trade council was held on Monday to arrange for a delegation to the meeting of boards at Pentiction on Tuesday.

At the Union service on Sunday the Rev. H. J. Armitage preached on the text, "What time I am afraid, I will think on Thee" and spoke of the wisdom of fear in certain contingencies. The choir rendered the anthem "They that wait upon the Lord" (Sir George Elvey), Mrs. Languedoc presiding at the organ.

By a printer's error, the name of Mrs. George Weaver was given as accompanist at the service on Sunday, March 16th, instead of that of Mrs. George.

BRIDGE GRAFTING OF GIRDLED TREES

Damage by Mice May be Offset by This Means—Demonstration.

There has been much damage by mice in the orchards this past winter, many valuable trees being girdled around the base (above and below the ground).

Girdling by mice occurs more or less every winter; but the damage done this winter has been very severe in many orchards and much bridge grafting has to be done. Completely girdled trees will die if left alone, yet may be saved by this simple treatment—bridge grafting—the inserting of sections both at top and bottom of injured part, and waxing thoroughly. Scions should have been cut some weeks ago, and kept in moist sand away from frost—the same as is done for top working.

A field demonstration of the above will be conducted by Mr. B. Hoy, district horticulturist, Kelowna, assisted by J. Tait, in the orchard of A. H. Steven (opposite T. Washington) west of local packing houses, West Summerland, on Saturday afternoon at 1.30 and at the H. M. Lumason orchard at 3.30. Those interested are welcome to attend.

The above information was supplied by Inspector Tait, who informs us that mice, which have caused very little damage in the past, have been very bad in some orchards, particularly where there is no family cat.

Yours truly,
LILY FOSBERY.

Vice Versa.
At a Christmas dinner a well-known professor was called upon to speak. In introducing him the host said to the guests: "You have been giving your attention so far to a turkey stuffed with sage. You are now about to give your attention to a sage stuffed with turkey."

This simple method for youthful loveliness

Millions have learned this easy, natural way to keep that schoolgirl complexion

The beauty and charm that is priceless to every woman and girl may be had by this simple method.

Millions have found the secret of having and keeping complexions radiant and lovely as a schoolgirl's. A method that you, too, may employ.

Regularly do this
Cleanse the skin regularly, authorities say, to keep your complexion lovely, radiant, youthful. But beware of harsh cleansing methods. They injure skin.

Wash thoroughly with Palmolive Soap—each night before retiring. Rub the creamy, foamy lather well into the tiny pores. Rinse—and repeat the washing. Then rinse again.

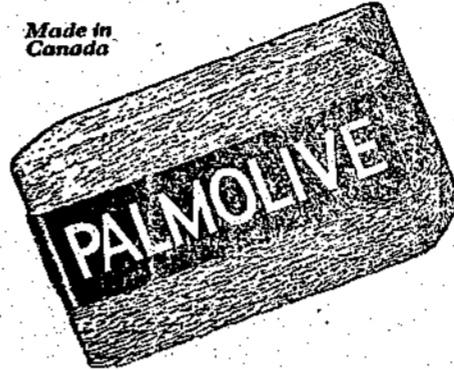

Then—if skin is dry—apply a little cold cream. That is all. Skin so cared for is not injured by cosmetics, by wind and sun, or by dirt.

The simple, correct way
You cannot find a more effective

plexion lovely, radiant, youthful. But beware of harsh cleansing methods. They injure skin.

Just make sure you get Palmolive—which is never sold unwrapped. All dealers have it. Get some and follow this simple method for a week. Results will surprise and encourage you.

Remember that arms, shoulders, throat need this treatment, too. Let Palmolive do for your whole body what it does for the face.

Volume and efficiency produce 25c quality for

Palm and olive oils—nothing else—give Nature's green color to Palmolive soap.

KELOWNA MAN IN MANY MISHAPS

This is what happened to one Kelowna man, on one day, down in Oregon. While driving at Grant's Pass his car skidded and he had just time to jump to safety before his car rolled down the mountainside and was demolished. Later in the day a passing car picked him up and conveyed him to a railway station. He booked for the south on a train that collided with another one and was badly wrecked. Nothing daunted, he procured a lift in another car travelling south, only to be held up and have all his money taken away. He arrived in Los Angeles ultimately without a cent in his pocket.

The story is told by Mr. and Mrs. George F. James and Douglas James, of Kelowna, who have returned after a four months' motor tour in Southern California.

They met their unfortunate fellowtownsman in Los Angeles shortly after his thrilling experiences, but they do not divulge his name.—Ex.

BOTH PASSES TO COAST ARE CLOSED

Motorists who may be contemplating a drive to the Coast are advised that the Blewett Pass is not likely to be open until May first and owing to recent rain and snow, Snoqualmie Pass is almost solid ice. Tractors are at work there trying to open the road, which will probably be closed until the middle of April.

The Doukhobors at Grand Forks are building a cannery at which tomatoes, beans and other vegetables will be canned this season.

Water Is Money!

You Wish to Save Money—To Do It You Must Save Water—That is Where the

Advantages of METAL FLUME

COME IN—THINK THIS OVER
It is easily and quickly erected and is a permanent improvement. It will resist rust, will not pit, scale, corrode, or fall from electrolytic action.
It gives maximum strength consistent with light weight and moderate cost.
It delivers not 50 to 70 or 80 per cent. of the water, but ALL OF IT.
The smooth interior permits of the highest velocity, which enables you to irrigate your trees in minimum time, making a saving in labor which soon pays for the expense of installation.
There is no erosion damage and a smaller size can be used than with any other conduit.

LAND REGISTRY ACT

(Section 160)

IN THE MATTER OF Part 1 acre of
Lot 4, Block E, Map 208, Osoyoos
Division Yale District.

PROOF having been filed in my Office of the loss of Certificate of title No. 13717a to the above-mentioned lands in the name of Dortha L. Garnett and bearing date the 17th December, 1908, I HEREBY GIVE NOTICE of my intention at the expiration of one calendar month from the first publication hereof to issue to the said Dortha L. Garnett a provisional certificate of title in lieu of such lost certificate. Any person having any information with reference to such lost certificate of title is requested to communicate with the undersigned.

DATED at the Land Registry Office, Kamloops, B. C., this 20th day of January, 1924.

E. S. STOKES,
Registrar.

Date of first publication,
March 6, 1924.

Local Happenings

Mrs. R. M. Ross returned on Friday from Los Angeles, where she spent the winter.

B. P. McKay returned on Tuesday from the prairies, where he has been for some months.

W. L. McPherson has recently purchased the property known as the Parker or Lees orchard.

It is reported that Rowcliffes are withdrawing the minimum guarantees offered growers recently.

A further clean-up along the lake front is being made today and West Summerland is also receiving a clean-up.

Mrs. Bindle, who has been with her daughter, Mrs. W. T. Hunter, for several months, went down to the Coast on Sunday.

W. Johnston has ordered machinery and equipment for an ammonia ice plant, which he will install in his hotel and bakery.

Mrs. Clouston and grandchild will leave here in May to join her daughter, Mrs. Dunrobin in California.

Thelma Lockwood is expected home next week. She has been studying music at a conservatory in Bellingham, Wash.

Miss Norah Clements and Jack Bernard entertained a number of schoolmates at a party last Friday in the G.W.V.A. hall.

Dr. Bryce, eye specialist, of Kelowna, will be at Summerland Hotel Saturday, April 5, where he may be consulted. 35-36L

Local telephone service will be cut off on Sunday during the hours of 9 to 12 a.m. and 1 to 5 p.m. to permit of necessary repairs.

A party of friends gathered at the home of Mr. and Mrs. Fred Gartrell on Friday evening and enjoyed a jolly social evening with music and dancing.

Arnold Gayton has rented the Lees' property recently purchased by W. L. McPherson, where he and Mrs. Gayton will reside. Mr. and Mrs. Gayton expect to move in next week.

J. Harvey Walton plans to leave soon to join Mrs. Walton on the prairie. He is this week advertising a sale of his household effects, to be held on Saturday, March 29th.

Mrs. A. E. Cline, and daughter, Needa, and son, Wendell, are leaving this week end to join Mr. Cline at Vancouver. Another daughter, Phyllis, will remain here for the present.

Miss Cork, formerly a mission worker in the Congo mission fields, but more recently doing deputation work in Canada, was a recent guest of Mr. and Mrs. G. Thornber. She went up to Peachland on Saturday morning's boat.

Miss J. Sinclair, who was recently appointed president of the Kamloops presbytery, went down to Vancouver on Tuesday as delegate to the provincial W.M.S. convention being held there on March 26, 27 and 28. Miss Sinclair will conduct the devotional exercises at one of the sessions.

SUMMERLAND WEATHER REPORT

Below is a report furnished by the Dominion Experimental Station here for the week ending Tuesday:

Date	Max.	Min.	Rain	Snow	S.S.
March 10-18	201	10.8	
March 20-40	38	2.2		
March 21-40	27	10.4		
March 22-15	23	7.4		
March 23-45	26	6.1		
March 24-51	24	0.5		
March 25-56	27	10.3		

It is currently reported that the box factory will not start operations until May first.

Mr. and Mrs. Edwin church of Youngstown, Alta., were guests for a brief time this week of Mr. and Mrs. Willis Walter.

Instructions have been given by the municipal council to have the date of construction placed on all new flumes.

Final readings were given the by-laws fixing the irrigation and general water rates for 1924 at the council meeting on Saturday.

Additional connections with the domestic water main are to be given the school properties for the purpose of irrigating trees, lawns, and flower beds.

Announcement is made in another column by M. G. Wilson and Company to the effect that they are carrying a complete stock of spray materials.

Garbage cans have been recommended by the reeve as necessary purchases for the use of the tourist park. He would also like to see a few trees planted.

Mr. and Mrs. Carroll Aikins of Naramata are now in Vancouver, where they will remain for a few weeks, according to a Vancouver paper. Mr. and Mrs. Aikins have spent the winter in Seattle.

C. H. Taylor went down to Vancouver on Tuesday to enter military hospital for further examination. Local veterans and others feel that Mr. Taylor has not been duly pensioned and hope that justice will be done him henceforth.

Cutting off of water and light service of citizens whose accounts are in arrears is being done by the municipal authorities, apparently with effective results, according to a report submitted by the water committee at the last meeting of the council.

Mrs. E. W. A. Cooper and little daughter, Irene, were guests last week end of Mrs. C. H. Elsey. Mr. Cooper, a former resident of Summerland, now K.V.R. train despatcher at Penticton, came up with them on Friday and returned Saturday morning.

BRIQUETTES BEST FOR SMUDGE POTS

Briquettes as sold for home fuel consumption have been found to be the best of the various fuels tested in recent experiments in the Yakima Valley with orchard smudge pots, according to the Omak, Washington, Chronicle.

FARMERS LEAD AS OWNERS OF AUTOS

Thirty-seven per cent. of all automobiles in Canada are owned by farmers. Ownership of the rest is made up as follows: business men and brokers, 16 per cent.; salesmen and travellers, 16 per cent.; professional men, 8 per cent.; laborers, 4 per cent.; contractors and liverymen, 8 per cent. each and miscellaneous and no occupation stated, 13 per cent.

MAY HOLD SUMMER CONVENTION HERE

Superintendent Hunter of the Experimental Farm returned on Sunday and Assistant Superintendent Mann on Monday from Vancouver, where they attended the fourth annual convention of the B. C. branch of the Canadian Society of Technical Agriculturists.

Supt. Hunter extended an invitation to the society to hold a summer convention here in August. The executive is to consider the invitation.

BOYS AND DADS HOLD BANQUET

Baptist Tuxis Boys Entertain Their Dads—Toasts and Songs.

Tuxis Boys of the Baptist church held their first father and son banquet on Friday evening last. Ewart Bowering, as pretor, presided at the head of the table around which sat more than thirty fathers and sons. The ladies of the church provided a bounteous feast of good things to eat. Prior to the serving of the banquet sing-songs were indulged in for a time.

The toast list was as follows: "The King," proposed by the chairman, responded to by the National Anthem; "Canada," proposed by Willie Ritchie, responded to by W. C. Kelley and the singing of "O, Canada;" "The Church," proposed by Frank Simpson, responded to by J. C. Wilson for the Sunday school and Rev. Z. L. Fash for the church; "Our Fathers," proposed by Harry Hobbs, responded to by R. E. White and the singing of "Old Folks at Home;" "A Boy," proposed by Geo. Graham responded to by Harold White; "Tuxis Boys of St. Andrew's Church," proposed by Percy Rand, responded to by Ronald White, mentor of St. Andrew's Tuxis square; "Our Mothers," proposed by George Graham, Jr., responded to by Mrs. McAlpine and the singing of "Mother Macchree."

HIS SALARY IS DOLLAR PER MONTH

David Leckie, well-known hardware merchant at Kelowna and at one time head of the Western Cannery, since taken over by the Dominion Cannery, has accepted the position of managing director of the Kelowna Growers' Exchange, at a salary of one dollar per month.

Commenting on the appointment, a Kelowna writer says:

Mr. Leckie brings to the position a comprehensive grasp of the big job on hand, and a record of large success in his own business, which is so well organized that he can give his attention to the solution of fruit problems.

INTERESTING EXHIBITION

Special Car at Penticton Interests Many Summerland Visitors.

The special car fitted up for exhibition purposes by the Canadian Forestry Association arrived at Penticton yesterday. Quite a number of Summerland residents made a special trip by road to view the interesting exhibit, which has for its object the preservation of our timber resources. Throughout the day hundreds of people witnessed the novel attraction. It is an exhibit worthy of the great effort to interest the public, particularly campers, in exercising the greatest caution to prevent forest fires. It is presenting to scores of thousands of Canadians the common sense reasons for forest protection, not only as a safeguard to the existence of wood-using industries, but as an insurance policy on farms, fisheries, mines, factories, and all other constructive activities of the Canadian people.

In the afternoon a special effort was made to interest the children, and a moving picture demonstration was given at the public school. Later in the afternoon a free performance at the Empress Theatre attracted a large crowd. Many novel methods were introduced to demonstrate the lesson, and on the car itself there were several interesting models with electrical effects to demonstrate the devastating effects of carelessness.

Of particular interest to Summerland visitors was the display of Indian relics and the wonderful array of garments, hosiery and finery which had been manufactured from pulpwood. Every article exhibited in this class was as durable and as pleasing as the purest silk. In the evening Mr. G. Gerald Blyth, who is in charge of the exhibit, piloted the Summerland contingent through the car, a courtesy which was greatly appreciated. Special attention was given to the visit-

by the crew, Mr. John Lyle, the membership organizer, operating the electrical effects especially for them. Jack Logie and party were particularly attracted to the Indian exhibit, and it must be recorded that particular efforts were made to entertain him in this regard, as it was known to the demonstrator that Mr. Logie is keenly interested in such matters. The car leaves today for Grand Forks, after which it proceeds to Nelson and Cranbrook. In conversation with Mr. J. J. Atherton, the crew promised that Summerland would be included in the itinerary next year.

Reeve.

26th March, 1924.

ST. PATRICK'S PROGRAM AT PEACHLAND

Reeve Lang Returns with Bride—Irrigation Water Now Flowing.

The Women's Circle of the Union church put on their annual 17th of March program in the Veterans' hall, and were rewarded by a full hall and an appreciative audience. Quite a number of Westbank friends attended. Miss Betty Buchanan furnished suitable music while the crowd was gathering. The program was: three part song by senior boys and girls trained by Principal J. W. Harris. This was much enjoyed, being a treat in itself, and also showing what can be done by training. Duet, "Maying," by Mrs. Elliott and Mrs. Wright. Recitation and song "My Little Colean" by a number of girls trained by Mrs. Sadler and much appreciated by all. Solo by Mrs. Jones. Instrumental duet, Mrs. Martin and Miss Gamble. Irish reading, "The Irish Philosopher," by Mrs. Keating. Song, "Get a Little Table," Mr. J. Harris. Ladies' quartette, Mrs. McCall, Mrs. Wright, Mrs. McKay and Mrs. Elliott entitled "The Home Beyond." Pantomime, Thomas Moore's "The Last Rose of Summer." This was presented by five girls, Mary Sadler, Lizzie Topham, Leah Morsh, Edna Cudmore and Isabelle Taylor trained and assisted by Mrs. Sadler. During the first part of the pantomime Miss Betty Buchanan officiated at the piano with Paxton Morsh at the violin. In the last part Mrs. Sadler recited as the girls acted out the motions. We might be excused making special mention of this number which called forth many favorable com-

ments. The girls went through the motions perfectly which showed great thoroughness in the drilling. Reading, "Tim Murphy's Remarks," by Mrs. A. J. Miller. Solo by Mr. Martin. During a short intermission the chairman, the Rev. T. A. Sadler, announced that the library committee of the Women's Institute expected to hold their postponed valentine 15 cent tea in the municipal hall on Saturday, March 22nd, proceeds to be used in the purchase of new books for the library. Following the intermission was enacted a scene which might be called "The Witches' Night" suggested by the witch scene in "Macbeth" and composed by our high school teacher, Mr. A. Macmillan, who was assisted in the arrangement by Mrs. Morsh. The witches, three in number, held forth in their "spooky" cave lighted only by the fire in the cauldron. They were visited by and gave timely advice to the following: John Bull, Uncle Sam, Miss Canada, the Returned Soldier, the young lady in love, and the fruit grower; this latter being a humorous local hit. Tableaus were shown some of the clients of the witches, depicting the reality of their predictions. All the attending accompaniments of such a scene were in evidence, such as thunder and lightning, the appearance of shadowy ghosts, a heavy barrage during the visit of the returned soldier, and the flames from the enchanted cauldron. The proceeds totalled about fifty-five dollars.

Mrs. Ferguson entertained many of her friends at afternoon tea, in honor of her sister, Mrs. Town, who is in from Vancouver spending a few weeks. The guests were treated to a delightful program of vocal and instrumental solos (including violin), readings and recitations. The reception room was tastefully decorated. Dainty refreshments were served. Preceding the breaking up of the party a circle was formed by all

while they sang "Auld Lang Syne." All expressed themselves as having had a most enjoyable afternoon.

J. Kudelka left Tuesday morning for the prairie expecting to be away several weeks.

Mr. and Mrs. Dryden motored to Vernon and spent a small portion of the week there.

Mr. Bulyea made a short visit south, returning home on Wednesday

A quiet wedding took place on Monday, March 17th, in Holy Trinity Cathedral at New Westminster, when Miss Mary Osborne, nursing member of the British Red Cross Society, was married to Mr. Grant Lang, reeve of Peachland. Rev. Canon d'Easum officiated. The bride was formerly of West Witton, Yorks, Eng. The groom is well known in the Okanagan Valley, having spent many years in Peachland. He was formerly secretary treasurer of the B. C. School Trustees Association, and is at present reeve of Peachland and is a well known member of the Masonic fraternity. The many Peachland friends of the happy couple were delighted at the receipt of the news of the event and to welcome them home last week end.

Irrigation water has been on in Peachland for some time, the earliest for years. Cleaning the ditches and making necessary repairs was rushed and the water turned in to be available to growers for spraying.

Major Hardisty and son Richard left on Monday morning's boat, and expect to be gone for some time, going first as far as Calgary.

H. H. Thompson has had quite a demand of late for special seed which he has produced on his farm here, including potato seed. Among those coming to him have been a number of Orientals who are desirous of getting the best and keeping up to date.

Two more Peachlanders, Mr. Cudmore and Mr. Kerr, are added to the list of car owners. Mr. Bell, salesman for Mr. Butler of Penticton, assisted by his wife drove two Fords up from Penticton one day last week, closed the deals, left the cars and returned by boat the same evening.

Peachland branch of the W.C.T.U. met at the home of Mrs. Sadler on Friday afternoon. There was a good attendance. Arrangements are being made for the W.C.T.U. convention to

SHILOH STOPS THAT COUGH

Your grand-parents used it. Safe, sure and efficient. Small dose means economy, and brings quick relief. Does not upset the stomach. Try Shiloh—80c, 60c and \$1.20

Spring is Here—You Need A Tonic

To purify the blood, tone up your stomach and make you feel bright and healthy take

Celery King

It acts gently and without discomfort. Brew a cup for every member of the family—take three times a week for three weeks. Everyone needs a spring tonic—80c and 60c.

WANT TROUT CREEK ROADS DITCHED

Residents of Trout Creek Point have petitioned the municipal council to do certain ditching on roadsides there and Duncan Woods attended the meeting of the council on Saturday in support of the petition.

The road running east past the Treffry property and another at right angles south from that are the roads which Mr. Woods insisted on the Council improving. Ditching these roads would prevent seepage water flooding private land. It was agreed that the members of the council would meet Mr. Woods on this site on Monday of this week.

During the discussion Mr. Woods made the statement that either the dam at the foot of the lake must come out or the C. P. R. must buy his property. He claims that the putting in of the control dam at the foot of the lake was done to benefit the C. P. R. and has resulted in the flooding of part of his property at Trout Creek Point. He had started action along this line some time ago but had withdrawn it, but apparently he intends to take action again.

be held in Peachland in the near future.

The brethren of Glenrosa and Westbank are continuing their special evangelistic meetings in the municipal hall under the leadership of Mr. Clifton of Penticton. The attendance keeps up well and the gospel message is being proclaimed earnestly and fearlessly.

Miss Cork, who has spent over twenty-five years in the mission fields of the Congo arrived here Saturday morning from Summerland where she had been a guest of Mr. and Mrs. Gilbert Thornber for a short time. She addressed an open meeting in the Baptist church on Sunday afternoon at 3 o'clock in the interests of the Congo Balolo Mission. She went to this field from England but has been doing deputation work in Canada for the past few months. She gave a very interesting account of the work which had been accomplished during the years since the mission had been started and made a plea for the co-operation of the Canadian churches and expressed the hope that volunteers for the work might come from Canada.

Mrs. Haug of Kelowna returned Saturday evening to her home. While here she visited many acquaintances being the guest of Mr. and Mrs. B. F. Gummow.

Mrs. Baptist, Mr. A. Wilson and S. Hardisty were visitors to Kelowna on Saturday.

Mrs. A. J. Miller entertained a number of friends on Monday afternoon in honor of Mr. and Mrs. Edgcombe, who are leaving for the Coast shortly. The Rev. H. A. and Mrs. Solly motored up from Summerland for the occasion and Mr. Solly made a short address suitable to the occasion. Mrs. Edgcombe was presented with flowers.

To My Customers

On Monday next, March 31st, I will transfer the business which I have been conducting under the style of

Lakeside Meat Market

to Mr. W. R. Verrier. I would bespeak for him the same generous share of your patronage which I have enjoyed.

Accounts contracted up to the end of this month are payable to

C. M. Bender

ANNOUNCEMENT

Beginning April first the undersigned will operate the business which has been carried on under the style of

Lakeside Meat Market

An ample stock of fresh and cured meats, fresh and cured fish, butter, lard, vegetables, etc., will be carried at the same stand.

Having had several years' experience in the Old Country as a meat cutter I am confident I can give the public good service and our prices will be as low as possible.

W. R. Verrier

BRIDGE GRAFTING DEMONSTRATION
