When Merchants Say They Have Nothing to Advertise it's the Same as Saying They Have Nothing to Sell. For Merchants Who do not Advertise Because They Haven't Time, we Furnish Free Cuts and Copy.

DEVOTED TO THE INTERESTS OF SUMMERLAND, PEACHLAND AND NARAMATA

Volume 17, Number 5

SUMMERLAND, B. C., THURSDAY, SEPTEMBER 4, 1924.

\$2.50, Payable in Advance

WATER WAS MAIN TOPIC AT MEETING

Continued Lack of Rainfall Aggravates Winter Shortage.

Summerland municipal council held its second semi-monthly meeting on Thursday, August 28th, instead of on the Monday previous, the fourth Monday in the month. The change was made because of the absence of the clerk, who was away on vacation. As Thursday is publishing day for The Review, it was impossible for any of the staff of this paper to be present and the following report is gleaned from the clerk's notes and other accredited sources.

Foreman Tomlin submitted a report on the water situation, pointing out that it was becoming critical and recommended that the lawn and garden service from the domestic lines be curtailed, the result being that instructions were issued that water could not be used in this way except during the restricted hours on Mondays and Fridays.

The general use of water for this purpose on Monday last resulted in a rapid lowering of the reservoir, which fell about three inches, and orders were immediately issued for the cessation of the use of water for other than strictly domestic purposes.

Instructions were given to switch Aeneas Creek water to Jones Flat on Monday morning, giving a one day service to each lot.

The Soldiers' Settlement Board have withdrawn restrictions at first prescribed, arrangements were made to proceed with extending the domestic water system to the S. G. Davies property, Paradise Flat.

Messrs. T. Croil, T. M. Croil, C. J. Huddleston, J. Shepherd, P. G. Koop, and W. C. W. Fosbery waited on the council seeking to learn what action had been decided upon on the subject of the taking of water out of Aeneas Creek by lot owners along the creek on Siwash Flat. This precipitated quite a discussion, during which the reeve and Coun. Ritchie were accused by the deputation with wrongfully diverting water. It would appear that it has been the practice for many years of lot owners along the creek to water their lower land from this source. It is said that arrangements had been made to send this water through to the tail end of the Thompson ditch and interference with its flow at this time was particularly resented.

The reeve promised that no water would be diverted from the creek in this manner until after the end of (Continued on back page)

JAPANESE FIRM DENIES CHARGE

Declare They Were Not Responsible for Break in Tomato Price.

Two weeks ago there was published in The Review a report from Calgary to the effect that a shipment of tomatoes from Summerland made by Japanese had broken the market for that commodity. This statement coming from the markets commissioner, appeared in other papers and also in the markets bulletin.

Stating that the K. Y. Agono company are the only Japanese shipping from Summerland, two representatives of that firm called on the editor of The Review and stated emphatically that they were in no way responsible for any break in the Calgary market. They presented letters and telegrams which showed that they had sold tomatoes at one dollar a package f.o.b. Summerland and both these men declared positively that all their tomatoes had been sold on this basis with the exception of two hundred boxes which had been sent to the same firm over and above the quantity actually ordered. They could not see how this small extra supply should have necessarily affected the market.

Both these men were very much annoyed that their firm should have been accused and said that they had been particularly careful to maintain prices.

BIG INCREASE IN EGG PRODUCTION

Nearly a quarter of a million eggs were marketed by the Summerland Poultry Produce Association in the six months ending August 31st, during which time H. J. Sanderson has been manager. The actual sales totalled two hundred and thirty thousand odd. In the same period 1,160 live birds have been disposed of for the members.

WOULD ADVERTISE TOURIST PARK

Walter Wright visited Oliver a few days ago, making the trip both ways on his bicycle. During the short time Mr. Wright has been absent from Summerland there has been a marked increase in the amount of tourist traffic up and down the Okanagan and he marvelled at the number of cars he met going and coming between here and Oliver.

Speaking of the tourist traffic and the possibilities for business it contains for Summerland, Mr. Wright made the excellent suggestion that a big sign board placed on the hill side of Okanagan Falls would be an excellent means of advertising Summerland's fine tourist park. Cars must necessarily move slowly at this point and there would be ample opportunity for passengers to read such an advertisement.

FINDS PEACHES AND CRABS SCARCE

Walters, Limited have to date shipped twenty carloads of fruit and vegetables in addition to their express shipments, which have been relatively heavy. Mr. Willis Walter, junior member of the firm states that it has been impossible to get fruit enough to fill orders, a situation which he describes as much to be preferred to having more fruit than one can find a market for. Especially has there been a shortage with this firm in peaches and crab-apples.

M'GEER TO BE COUNSEL IN RATES CASE

Railway Rates Adjustment Association Issues Report of Action.

Following is a report of progress being made by the organization for adjustment of freight rates:

The meetings which were held last month, under the auspices of the United Farmers, have resulted in the formation of the B. C. Railway Rates Adjustment Association, composed of delegates from Salmon Arm, Vernon, Kelowna, Summerland and Penticton, with the object of presenting the case for the Fruit Growers before the Board of Railway Commissioners at Ottawa on Sept. 17th., and also for the purpose of co-operating with the Government and the Boards of Trade throughout the Province, in activities which will not cease until discrimination against the West has been done away with.

The Executive Committee, composed of Messrs. T. Bulman, President, L. E. Taylor, Vice-President, and Groto Stirling, Secretary-Treasurer, has made arrangements with Mr. G. G. McGeer, K. C., to represent the Association as its counsel.

The facts and figures are being collected, on which this phase of the great Freight case of the Province will be based, and appeals for the necessary funds are going out to the various Municipalities, Fruit Unions, and Independent Shippers. The other Provincial forces, which are at work, welcome the action thus taken by the people of the Interior, realizing that too much assistance can hardly be forthcoming to attain the end in view.

In the present work of the Association, the Fruit Rates are the main object, and the interests of everybody in the area which is being covered, are, first and last, bound up in the profitable marketing of fruit. Stimulate this important industry, and all will benefit, but allow it to continue in the depression caused by the unprofitable conditions of the last two years and there is no business in the Interior, which can admit that

PEACHLAND HOLDS ANNUAL FLOWER SHOW

Complete List of Prize Winners—Other News of the Week.

Peachland Women's Institute held its annual flower show on Thursday last in the municipal hall. The doors were opened at 3 o'clock and Reeve G. Lang in a short address declared the flower show open. Mr. J. W. Jones, M.L.A., spoke briefly, commenting on the efforts of the ladies to keep up and make a success of this event, and as well made some suggestions and gave some constructive criticism. Owing to the show being earlier in the year than usual the entries were not so numerous as other years in the fruit and vegetable section, but there were more varieties of flowers. The fancy work display, though not large, was quite effective, and the home cooking stall was a credit to the ladies of Peachland.

The judges were as follows: fancy work and home cooking, Miss Annie M. Van Kleeck, of Vernon; flowers, fruit and vegetables, Mr. M. S. Middleton, district horticulturist, Vernon, assisted by Mr. Clark, horticulturist, Vancouver.

During the afternoon the Institute members served tea, proceeds of which were \$16.35 and the admission fees netted the Institute the tidy sum of \$23.55 making a total for the day of \$39.90.

The following is the prize list: Section 1: collection of begonias, 6 plants, Mrs. Cudmore; collection of 4 house plants, Mrs. Cudmore; collection dahlias, 3 varieties, Mrs. Ferguson; bouquet dahlias, 1, Mrs. McKay, 2, Mrs. Gummow; bouquet of asters, 1, Mrs. McKay, 2, Miss D. Long; bouquet of sweet peas, 1, Mrs. Linggo, 2, Mrs. Morgan; dish of finest pantries, 1, Mrs. Ferguson, 2, Mrs. McKay; best collection of roses, 3 vases. (Continued on back page)

HAVING TROUBLE WITH JONATHANS

That fruit growers should examine their Jonathans before picking and sending them to the packing house is the statement made in a communication to The Review by one of our fruit growers, who says that he has a Jonathan tree which, together with the apples on it, looks all right. His attention was directed to the fruit about two weeks ago on account of the color of one or two of the apples. On opening them he found they were pretty far gone. Further investigation showed that the other apples were in all stages of disintegration.

It is this grower's opinion that the trouble has developed through lack of water at the right time. If any others have fruit in similar condition it should not be taken to the packing houses as to do so will only result in loss and claims for damages later.

Any reader wishing to examine the particular tree referred to may learn the name of the owner by applying to The Review office.

BOX MILL RUNNING WITH TWO SHIFTS

Pacific Box Company's mill here is now running night and day. The mill has booked a large volume of business, which keeps it running to capacity with two shifts.

McIntosh Red, Cox's Orange, Gravenstein and King are the principal varieties of apples being entered by the local packing houses. The soft fruit season is almost ended, late bunches being about the only fruit in this class now being shipped.

It is in a prosperous condition. One of the causes of this unprofitable marketing is that the producer contributes more than his fair share to the transportation Companies, and has in consequence less to spend in the Stores. The interest which has been awakened in the general public shows that he not only realizes that fact, but also that he pays more for all his purchases than he should because the retailers price to him is higher than it would be if freight charges were lighter.

INVESTIGATES FRUIT DUMPING SITUATION

Agent of B. C. Government Gives New Interpretation of Act

A government agent from British Columbia has been in the city looking into the dumping situation as applied to fruit, and has reported to the government that due notice should be given to the brokers and jobbers of the city before the customs department puts into effect the clause which carries heavy penalties for any Canadian bringing in United States fruit and selling it at a lower figure than the Canadian product, based on legitimate figures of profit.

The local fruit men have had to suffer severely when they have had to look to the United States for consignments of fruit which they could not purchase in Canada, and in order to supply the prairie market, it is necessary, even when the Canadian fruit marketing season is on in Canada, to go elsewhere. The interpretation of the Dumping Act will be welcomed by the fruit jobber.—Mantoba Free Press.

WANTS MORE OF OUR GOLD MEDAL APPLES

Associated is Gathering Fruit Here for Imperial Fruit Show.

SUMMERLAND APPLES WON GOLD MEDALS

Second Challenge Trophy Being Offered For Inter-Country Competition.

Chas. Little, for some years with the O. U. G., has recently joined the Associated as inspector. His duties are to make frequent visits to the numerous packing houses operating under the Associated for the purpose of maintaining the standards of pack and, as he puts it, to prevent any tendency to sloppiness. He served in a similar capacity for a number of years with the O. U. G.

Mr. Little has also been delegated the work of selecting apples for display at the Imperial Fruit Show, which opens at Birmingham, England. (Continued on back page)

CHAUTAUQUA NEXT WEEK

Particularly Good Program is Provided—Season Tickets At Low Prices.

Chautauqua opens in Summerland on Friday of next week. It offers without doubt, a much better program than even the highly pleasing course of last year. There is greater variety and all of the six events are apparently of superior quality.

The very clever comedy, "The Mollusc," given on the first night is one that has an almost world-wide reputation. The Clark-Brown players have recently returned from a most successful season, touring Australia, New Zealand and Tasmania. The comedy made record runs through America and in London.

Excellent musical numbers, several very entertaining and highly instructive lectures and C. Vincent Hall's wonderful illustrated address covering the discovery of Tut-Ankh-Amon's tomb, of which the lecturer was a witness, are other events not to be missed.

The local committee, under whose guarantee this series is given, are permitted to sell season tickets at two dollars each, only a little over thirty-five cents for each program, the single price for which is seventy-five cents. Children, including high school students, are admitted for one dollar, or single number, forty cents. As it is through the sale of the season tickets that the committee is reimbursed, it is urged that all buy season tickets, the cost of which is little more than the price of two single admissions. The Chautauqua people take seventy-five per cent of the receipts from single tickets.

WOULD HASTEN CONSTRUCTION OF HIGHWAY

Good Roads League Deals with Many Road Matters.

Construction of the missing link in the trans-provincial highway was the subject of the most important resolution passed at the annual meeting of the Good Roads League held at Penticton on Tuesday. This resolution declared this the most important piece of public work now before the province and urged that the government complete the highway for the season of 1925, or if this were not possible, that it be ready for the early spring of 1926. The convention would also have the government give married men first consideration on this job.

J. J. Johnston of New Westminster was elected president succeeding R. G. Gale, Vancouver.

In another resolution the league asks from the government a statement of revenue from the gasoline tax and requests that a definite allocation from this money be made for highway construction.

That the forty per cent aid from the federal government to the provinces for highway purposes be renewed was the purport of another resolution in which unemployment was advanced as one of the reasons for this request.

The subject of diverting the Okanagan highway at Gartrell's corner, Peach Orchard, to run through Jones Flat and over the old high road, which was announced to come before the convention, was not mentioned.

There were requests for expenditure on roads received from many sources, but the convention was opposed to asking expenditure of money on specific roads, preferring rather that the merits of the various proposals should receive the consideration of the authorities.

ALBERT DOHERTY A PRIZE WINNER

Albert Doherty was one of the individual prize winners in the second annual provincial bird house competition. He made 92 points out of a possible 100. Two pupils of General Gordon school, Vancouver, made 98 and a Vernon lad 96. Another Vancouver boy tied with Doherty.

Sixty bird houses were entered by sixty pupils from ten schools, the General Gordon school again taking the Lieut.-Governor's silver cup with a score of 578 out of a possible 600. Vernon scored 518, Seymour, of Vancouver, 479, Haney, 460, Alexander, Vancouver, 452, Summerland, 442, Mt. Pleasant, Vancouver, 438, Simon Fraser, Vancouver, 437, Port Hammond, 381, Maple Ridge, 375.

This information has been given The Review by S. W. J. Feltham, in charge of the manual training department of the Summerland school.

DRIVER IS CHARGED WITH MANSLAUGHTER

Jas. M. Hopkins, of Armstrong, driver of the car in which W. H. D. Laidner of Vernon was killed, has been charged with manslaughter. According to some of the evidence it would appear that liquor may have been a contributory cause of the accident.

TELEPHONE SERVICE IS RE-ESTABLISHED

The telephone cable between Summerland and Naramata, which had been disconnected last week to permit of some repair work being done by government men to the Naramata wharf, was again linked up this week and communication re-established.

HARVESTERS GO FROM VALLEY

For the first time the C.P.R. is offering harvest excursion rates from the Okanagan to prairie points. About seventy of these tickets have been sold in southern Okanagan. Among the few who have gone from Summerland are Russell Roe, T. J. Garrett, Fred Gale and Harold Cockton.

LOSES SEVENTY TONS OF HAY BY FIRE

Findlay Munroe, Meadow Valley, lost a large stack of hay through fire a few days ago. There were about seventy tons in the stack from which there had been but a short time before, a quantity removed, baled and shipped. The fire occurred shortly after two o'clock in the afternoon and was plainly a case of spontaneous combustion, as the fire originated in the interior of the stack. There was no insurance. Mr. Munroe says he has been stacking hay in large quantities for many years and has always been able to avoid such a misfortune until this summer. On this particular spot he frequently had as much as 150 tons stacked. Two other and much smaller stacks close by escaped.

POTATO FIELD IS HIGHLY COMMENDED

R. V. Agur has a particularly fine patch of potatoes, according to one of our readers who visited the Agur ranch recently. Mr. Agur is growing these potatoes under government inspection for seed purposes, certified seed, of course, being used. The plot has passed its last examination by government inspection and was highly commended.

SPENT GIRLHOOD IN SUMMERLAND

Summerland friends of Mrs. F. L. Neiley of Vancouver were shocked to learn of her death early this week. The funeral was held from the home of her father, I. B. Fulton, on Tuesday afternoon, Rev. Dr. J. J. Ross of the First Baptist Church, Vancouver, officiating.

The deceased will be remembered by many as Miss Toi Fulton. The Fulton family lived in Peach Orchard for a number of years, the deceased being the eldest of the family. Ruth and Doris are the two younger members of the family.

WOULD HAVE FOURTH YEAR HIGH SCHOOL

Penticton Movement Would Include Summerland Students.

Penticton.—Representations are to be made to the Penticton school board as soon as possible by parents who have children ready to take their first year university course or fourth year of high school, for the establishment of such a class here.

The idea is, that, including the \$100 tuition fee, living and general expenses, it costs in the neighborhood of \$500 per student to send them from the interior to the University of British Columbia for eight months, and that at this time it would be very beneficial if some means could be devised whereby this money could be kept at home.

There are said to be about twenty Penticton and ten Summerland students ready to take this course. This would mean some \$15,000 spent at the coast by the people of Penticton and Summerland.

Many of the parents feel the expense of sending their sons and daughters to university will mean a severe drain on their financial resources and that not only would the expense be less if they could go through their first year course here, but also the students would be in their homes, under their parents supervision at a critical time in their lives.

The suggestion that has been made is that parents pay the same tuition fee here and any small additional fee necessary to cover the expenses. This, it is claimed, would be considerably less expensive than sending the students to the coast and at the same time the money would be kept at home. It is believed working arrangements could be made with the parents at Summerland for their children to come here daily by car or spend the week here, returning each Friday night for the week-end.

Chairman R. S. Willon of the school board has been approached. (Continued on Page 2)

FINANCING IS CONVENTION'S CHIEF WORRY

More Revenue and Reduction of School Costs Is Imperative.

Reeve A. Lockley, of Esquimalt, president of the Union of B.C. Municipalities, stressed the important matter of school finances in opening the two day convention of the Union yesterday morning. This had become a serious question for the municipalities and he suggested that the Union take steps to place its ideas on the subject before the commission now making the educational survey of this province.

Both the school and hospital question must be settled with the least possible delay, he said, and suggested that representatives of the Union, school trustees and hospital associations get together before the next session of the legislature and prepare a strong case for submission. These interested bodies must act as a unit in order to obtain results.

Reeve Lockley favored reverting to the practice of employing a government agent rather than placing its business with the legislature in the hands of a committee to deal with the province.

Reeve Kirkpatrick welcomed the delegates to Penticton and his address was replied to by Ald. Marchand, Victoria. This speaker advocated the forming of a department of municipalities by the government.

J. J. Banfield, Vancouver, asked for the co-operation of the Union with the hospitals for the general good. He told of trouble the Coast hospitals are having with finances, through the many "indigent" cases entering from other municipalities. These hospitals, he said, would be forced to act to protect themselves. The other municipalities might find that Vancouver hospitals were not at their disposal. He suggested that the word "indigent" should be removed from the Act and that the government be asked to provide that municipalities be requested to pay \$2.50 per day for patients treated.

Norman McLean, president of the Association of Property Owners, Vancouver, urged the need of broadening the system of taxation. He would change the poll tax to "a service tax" to include everybody. More of the gas and amusement taxes should go to municipalities and the cost of education lowered. High schools should be taken over by the province and tuition fees charged to cover their cost.

Yesterday afternoon was spent by the delegates in a motor drive to Oliver. The convention is again in session today.

FARM TO BUILD STORAGE DAM

Water Impounded Will Be Delivered Through Municipal System.

For some weeks Superintendent Hunter of the Dominion Experimental Station has been making a thorough study of the Trout Creek watershed with a view to finding a practical site on which to build a storage dam. On Friday evening last he met the reeve and council by special appointment and discussed with them the question of building a dam near the headwaters of Trout Creek, there being two lakes there on which dams might be built namely, Whitehead Lake and Crescent Lake.

It is said that about 600 acre feet of water can be stored on each of these and Mr. Hunter asked that the council give their approval to his application for permission to store 300 acre feet on Whitehead Lake. The reply was that there would be no objection providing the dam did not interfere with the run of the creek after July first. Mr. Hunter wishes also to have the municipality carry the water through its system and deliver it to the farm and suggested that the question of loss in transit, rates, etc. be left with Messrs. Norrington and McDonald, government. (Continued on back page)

The Summerland Review

Established August, 1908.

Published at Summerland, B.C., every Thursday by THE REVIEW PUBLISHING COMPANY, LIMITED

Ralph E. White, Editor and Manager

An independent family newspaper covering Peachland, Summerland and Naramata and adjacent districts.

Subscription Rates—In British Empire, in advance, \$2.50 per year; six months, \$1.40. To U.S.A. and other countries, \$3.00 per year.

Advertising Rate Cards and information respecting territory and samples of paper mailed upon request, or may be seen at the office of any advertising agency recognized by the Canadian Press Association.

Advertisers must have copy in by Tuesday noon in order to insure changes for standing advertisements. New display advertising copy can be accepted one day later.

All instructions for cancellation or alteration of advertising must be in writing.

Correspondence—Letters addressed to the Editor and intended for publication must be short and legibly written on one side of the paper only. The longer an article, the shorter its chance of insertion. All communications must bear the name of the writer, not necessarily for publication. The publication or rejection of articles is a matter entirely in the discretion of the Editor. No responsibility is assumed by the paper for the opinions expressed by correspondents.

Typographical Errors—In the event of a typographical error, advertising goods at less than the proper price, the newspaper will furnish letters to be posted in the store stating the correct price, but goods may not be sold at the price printed and the difference charged to the newspaper.

Thursday, September 4, 1924.

AMERICAN "OKANOGAN."

Okanogan Independent in a recent editorial drew attention to the difference in the way the word Okanogan is spelled north and south of the international boundary. The American custom of using the "o" has been adopted in the literature of the Okanogan-Cariboo Trail Association. The Independent's editorial says:

"Okanogan with an 'o,' a British Columbia paper wrote recently. The exploitation of the Okanogan-Cariboo trail has called particular attention to the different spelling—O-k-a-n-a-g-a-n—that prevails on the Canadian side. The literature of the trail association follows the American spelling.

The Washington legislature was responsible for the revised spelling, according to W. C. Brown of Okanogan. When the bill creating the county was being considered one of the legislators insisted that the 'Canadian way didn't spell the name the way it was pronounced and asserted that he wouldn't vote for the bill unless the spelling was 'corrected.' One of its sponsors told the legislature that he didn't care how the name was spelled, just so the county was created, and 'Okanogan' came into use."

Commenting on the same subject The Penticton Herald states:

"Whether O-k-a-n-o-g-a-n or O-k-a-n-a-g-a-n is the correct way of spelling the word is of secondary importance so far as the association's literature is concerned. The most important point is that the fact of the word being spelled in that case with an 'o' indicates at a glance the fairness of the basis upon which the association was formed and the spirit of good fellowship which existed and still exists between the members on both sides of the line.

When the name was being selected the idea was to get one as short as possible and yet one which would be comprehensive. The Cariboo Trail carried the historic suggestion and the Okanogan Valley was regarded as the main highway. The Canadian side having the benefit of the word Cariboo, it was unanimously agreed to divide the honors in the name by spelling Okanogan according to the American system, with an 'o.'

In all other matters connected with the formation and carrying on of the association the same 'give and take' spirit prevailed."

VITAL TO OUR PROSPERITY.

The ultimate prosperity of British Columbia is to a very great degree dependent on the goodwill of its citizens towards the industrial forces that are developing its natural resources.

It is a common fault of all countries richly endowed with natural wealth to minimize the hardships and overrate the rewards of the operators engaged in the conversion of the raw material into the finished product.

The sympathy of the public with the industrial groups that are building up national wealth is only effective when it is the outcome of an intelligent knowledge of the scope of those industries and a study of their economic issues.

In the case of the British Columbia lumber industry it is difficult to account for any lack of interest in its problems by the citizens of the province for the reason that in no country in the world, perhaps, has a basic industry so entwined itself with the destiny of the community.

We suspect that the lumber industry of British Columbia is so omnipresent that it is very much taken for granted, even by those who are dependent on it for a livelihood.

It is a commonplace to us that we are the owners of one of the very finest stands of softwood timbers in existence. We dimly recognize that our forest industries have been the main factor in transforming our settlements into cities and our waterfronts into wharves. We have an idea that but for shipments of wood products by land and sea our railroads would not pay and our harbors would attract but little shipping. Those of us who have been abroad recall now and then the fact that British Columbia lumber is its principal publicity medium in far-off countries.

In a word, we would not deny the statement that lumber put British Columbia on the map and lumber is keeping it there.

The Timber Industries Council of British Columbia, in a series of articles now running in our pages, are publishing some remarkable facts and figures concerning the great importance of the forest industries to the province. It is stated that our lumbermen contribute a third of the revenue of British Columbia; that they directly employ one-fourth of the workers in British Columbia and that they are responsible for a third of the industrial payroll of the province. Further, that the combined forest industries represent an annual purchasing power of not less than \$100,000,000, or something like \$200 per capita of the whole population.

With facts such as these staring us in the face some loyal

interest in the problems of this vast industrial force becomes a duty of our citizens. The goodwill and support of the people of British Columbia is after all the main security upon which our lumbermen have freely invested a sum exceeding two hundred million dollars. If that security depreciates into indifference the vast investment becomes imperilled and disaster faces both parties to the contract.

On the other hand complete co-operation and understanding between the public and the lumber industry can only result in the confident investment of further millions, more intensive development of our resources and the consequent prosperity accruing to the province.

Britain and the Continent Visited By Editors of Canadian Weeklies

Written for The Review by Hugh Savage, Editor of Cowichan Leader

We swung through the hills of Wales, past the great Wrekin and on to Shrewsbury, then on to Chester (Wednesday, July 16th). In this land there is no sequence of towns identical in all things but name. Each has strong individuality and long particular history. Chester is a delight to the eye, with its long stretches of timbered fronts and the quaint arcades, above the street level where one may walk and shop in the dry.

Newspaper friends of Shropshire and North Wales joined with those of Cheshire to greet us with Mr. William Astle, O.B.E., of Stockport, who is president of the Newspaper Society. After our five hours' railway run lunch was welcome. There we were honored by the presence of the Mayor and Sheriff.

Afterwards in three parties Roman ruins, city walls and cathedral were visited. At the latter Canon Thomas O.B.E., was an ideal guide. We had already seen many shrines but Chester with its chapter house and cloisters and apartments of the old monks left a lasting impression. After a reception by the mayor and tea at the town hall, a fifty minute run brought us to Liverpool.

Here it was a great and unexpected pleasure to meet Dr. A. G. Price, medical health officer of Victoria, B.C., who had been attending a convention in the city. The dinner, given at the Midland Adelphi Hotel by the Liverpool press, was a memorable occasion. The Lord Mayor had behind his chair a gorgeously uniformed person whose office was that of "taster." Certainly he had no need to complain that night.

The personal links between Canada and England are many and were frequently cropping up in conversations with new friends. It was very interesting, to the B.C. contingent, here, as in Cardiff, to learn from the lips of the Lord Mayor that his child was in B. C.

The Lord Mayor (Mr. Arnold Rush-ton), in a humorous speech, told us that his only son was a citizen of Vancouver and that he and the Lady Mayoress proposed to visit him next May.

Next morning we crossed the Mersey to Woodside and thence a special train took us to Port Sunlight. One might easily write many columns on this wonderful industrial centre, devoted entirely to soapmaking: on the vast works, every detail of which may be viewed from a specially constructed "visitors' way"; on the model village; on the thousands of artistic treasures housed in Lady Lever Art Gallery; on co-partnership; on—but one must stop.

A Liverpool friend tells us he remembers much of this great works being built. You think of the four soapworks, turning out 4,000 tons of soap a week; of 547 acres of works and village; of offices and branches and plantations and refineries all over the world, and you grasp at the thought that all this is the work of one man—Lord Leverhulme—who began in a small way in 1886 at Warrington.

His son, the Hon. W. Rufus Lever, welcomed us at luncheon, after which threatening skies shed rain at last and we returned to Liverpool. There it was impossible to do more than gaze at the outside of the great cathedral, at the dedication of which Their Majesties attended two days later. The treasures of the Walker Art Gallery lay open to our hurried gaze. Then came the train again and forty minutes brought us to Manchester.

The ladies left us next day and despite rain, enjoyed their visit by motor coach to Bramhall Hall, on the invitation of Captain T. N. G. Nevill; to Haddon Hall; and, by courtesy of the Duke of Devonshire, to Chatsworth House. They lunched at Buxton.

The men visited Manchester Royal Exchange and then went by tramcar to Stockport, where, split into parties, they saw Christy's hat works, Battersby's hat works, Sykes' blench works, Mirrless Blecherton & Day's Diesel engineering works and

the cotton mills of the Stockport Ring Spinning Co.

Our hosts, at luncheon at Stockport Town Hall (a very beautiful building where the Mayor had previously received us), were Mr. William Astle and Col. Sir Alan Sykes, Bt., D.L., both of The Stockport Advertiser.

There followed one of the most interesting items of our tour—a conference between Canadian and Home newspaper proprietors and editors, after which the Mayor and Mayoress gave tea and we returned to Manchester, where another busy day closed with a dinner at the Midland Hotel, on the invitation of the Manchester newspapers and the Lancashire, Cheshire, and Derbyshire Federation.

One of the speakers was Mr. J. R. Scott, of The Manchester Guardian son of the great editor of that great English journal, and apostle of free trade. He told stories at the expense of Manchester weather—of the man who, when asked how long last year's fine weather had been, said he "thought that it was on a Wednesday!"

The Ship Canal and its docks, elevators, and shipping claimed attention next day. We went down the canal to Barton Bridge. A unique sight was here. A small canal crosses the bigger waterway by a bridge. When ships wish to pass, the bridge is closed at each end and pivots open. It remains full of water; is, in fact, a boxed section of the small canal lifted out and swung on a central pivot.

We lunched with the directors of the Manchester Ship Canal Co., and afternoon found us on our two hours' journey to Harrogate. It was pleasant, after miles and miles of factories and chimneys, to view the pleasant surroundings of this Yorkshire Spa, which, contrary to the impression of many, is not on the sea but is in the centre of Yorkshire. It has delightful walks, on one of which we saw fireweed and bracken and coniferous trees, all smaller editions but nevertheless reminiscent of our own B.C.

There was sunshine on Sunday morning, July 20th, when we toured round Harrogate by "motor coach," which seems to be an English alternative for "charabanc." We went to Knaresborough and then to a mayoral reception at the Royal Baths. It showered in the afternoon but that did not deter us from motoring to Fountains Abbey, where Dr. Moody, C.B.E., proved a prince among guides, so that we saw in imagination the monks trooping down

SNOW MOUNTAIN HIKERS' FAVORITE

Quite a number of our citizens have made the trip up Snow Mountain recently. Last Thursday a party comprising R. J. Hutchinson, Miss Marley Hutchinson, a friend, Dr. Slater, from England, Mr. and Mrs. A. G. Munn, Blanchard and Margaret Munn and Florence Campbell made the ascent. Making camp at Brent's they continued their trip on horseback to the summit, returning that evening.

On Friday another party, Mr. and Mrs. M. Tait, Miss Nellie Holder and Nellie Clement also made the trip. Camping at Shingle Creek on Friday night they climbed to the summit on Saturday, and considered the view well worth the climb, though it was quite cold and there was a light fall of snow, which melted as soon as it fell. Descending that evening they stayed in camp on Saturday night, returning home on Sunday.

Ned Bentley also took a part up the mountain recently.

WANT FOURTH YEAR

(Continued from page 1.)

and, it is understood, has signified his approval of the proposition. Other members of the board of school trustees are also said to be favorably impressed toward it.

So far as is known at present the intention is to get the parents of prospective students together and draw up a proposition which will be submitted to the school board at a special meeting, which will be called as early as possible for that purpose, probably on Monday evening.

It is stated if this plan is carried into effect an additional teacher will have to be engaged and special equipment, which according to the provincial regulations must be installed in the local school by September, 1925, will have to be procured this year in order that the study of scientific subjects can be proceeded with. Thus this equipment would only be installed a year earlier than would otherwise be the case, and would not really mean any additional expense.

Petitions have been drawn up and are being signed.

stone steps to the first office and the grandeur of the great facade which is now but ruins. As an instance of the exceptional privileges we enjoyed everywhere in England it may be cited that on no account is the Abbey open on Sundays to visitors. It was twenty years since this rule has been waived. The place is private property and our good friend on this occasion was the owner, Mr. Clarence Vynor.

The Yorkshire Newspaper Society entertained us to tea at Ripon, whither we adjourned next amid rain. The Mayor presided and afterwards explained all the municipal treasures at the town hall and at the Wake-man's house. This is a wonderfully interesting city, the third oldest in England, with charter going back to Alfred the Great—but here are the motor coaches and we must be off to Harrogate, where the rest of Sunday evening went all too swiftly at the Royal Hall, where we were the guests of the corporation at a delightful concert, which included several Canadian items. Early next morning we were off to York—a thirty minutes run by train.

DELICATESSEN

In conjunction with our regular meat market we have installed a full line of **COOKED MEATS, etc.** Quality and prices of these will make them more economical than cooking at home.

Give us a trial order.

A better Chautauqua SEPTEMBER 12 -- 13 -- 14

Chautauqua comes to Summerland next week with the best three day program it has yet prepared.

Six high class events greatly varied in character.

MUSIC — COMEDY
LECTURES — FUN AND
INSTRUCTION

All Six for \$2.00.

Children, including High School, \$1.00.

"The Mollusc," Hubert Henry Davies' clever comedy on the first night.

Buy your Tickets Early—the cost is little.

Six admissions for less than cost of three singles

School Shoes At Small Cost

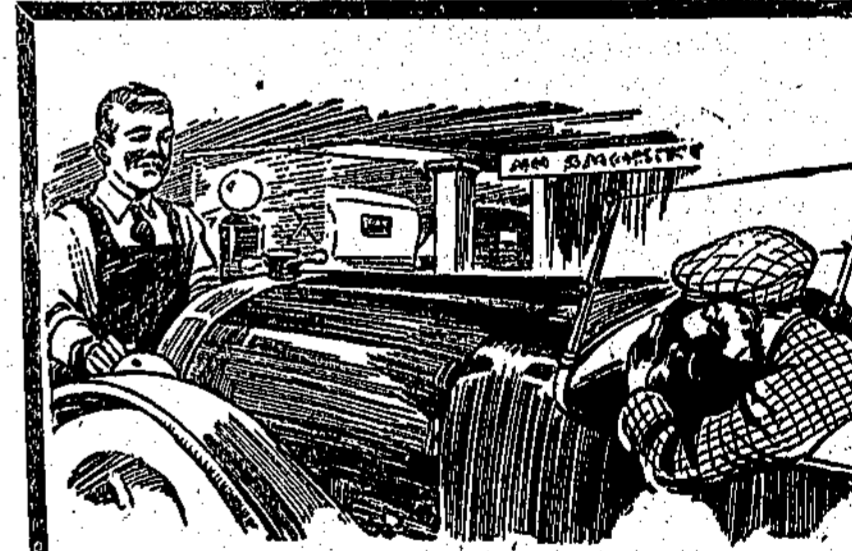

PARENTS! We can save you money in your purchases of footwear.

We are cleaning out our entire stock of Boots and Shoes regardless of any profit and now would be a good time to get the children fitted for the Fall and Winter.

We would be pleased to have you call and inspect our stock and be convinced that we can save you money.

BUTLER & WALDEN

Running Like A Clock!

You have heard it said—"The old boat is running like a clock"—and usually it is. However, unless oil has been changed regularly, bolts tightened, adjustments made, and average precaution taken to keep mechanism in first class condition—the car may be even then piling up damages to parts which eventually are going to be expensive.

The automobile owner who realizes the full value on his investment is the owner who brings his car regularly to our garage for inspection and such necessary repairs and adjustments as are necessary. He not only reduces his repair bills to a minimum but actually saves money during the life of his car.

Expert mechanics — guaranteed workmanship and lowest prices on parts and supplies.

Local Happenings

Miss Lucy Hargreaves went over to Bridesville on Sunday where she has accepted a school.

Mrs. A. Moyes returned on Friday morning from a visit of several weeks at the coast.

A son was born on Friday, August 29th to Mr. and Mrs. J. R. Conway at Vernon, B. C.

Jas. Ritchie returned Thursday night from a lumber cruising and prospecting trip.

Mac Laycox left on Sunday's train for Victoria, where he will attend provincial Normal school.

Miss Marion Atherton of Vancouver spent a few days here recently with her friend Miss Erma Fash, at the home of the latter's parents.

Ewart Bowring is planning to go to Brandon College. He has quit his position with the Bank of Montreal at Trail and returned to his home here.

Miss A. H. Pully, of the nursing staff of the Revelstoke hospital, who has been for some time a guest at Hotel Summerland left on Saturday morning's boat for Enderby.

Mr. W. C. Kelley was a visitor to Princeton last week on legal business connected with the sale of The A. E. Howse Co. Ltd. departmental store to W. A. Wagenhauser. Mr. Kelley represented the vendors in the transaction.

A number of friends joined with Mrs. V. J. Nicholson on Wednesday of last week in the celebration of her birthday. The afternoon was spent in picnicking at Naramata. The event is covered in a paragraph in our Naramata column.

Rev. H. J. Armitage and Mr. and Mrs. H. C. Mellor were visitors to Kelowna on Thursday, going up as official delegates from the Lakeside Methodist church to the district meeting being held in the Orchard City on that day.

Sidelights on a Great Industry

Then Comes the Royalty Rate

HEAVY EXPENSES OF ACQUIRING AND HOLDING STANDING TIMBER.

Trees Purchased in the "Eighties" Only Just Being Cut for the Market.

It may interest those who imagine that timber is bought today and cut tomorrow, to know that some of the areas that are being logged today have been in the possession of the holders since the "eighties."

For 40 years these stands have been paying increased taxation exposed to the risk of destruction by fire, storm and decay.

Before the axe touches the timber of British Columbia, thousands of dollars are spent in sizing up its "logging chances." Initial reconnaissances have to be made of the area and then one or more cruises to ascertain the quantity and quality of the timber. Then the services of experienced engineers are called in and the ground gone over in detail to find out the possibilities of getting the timber out by railroad.

Grade problems presenting seemingly overwhelming difficulties and entailing heavy expenditure have to be overcome or the investment must be abandoned. Finally a suitable booming ground must be located where the logs are to be dumped for rafting to the market.

When all this preliminary investigation is concluded the timber is purchased and the long period anticipatory to logging commences. During this wait the owner has to hold his own against the elements and the over busy tax collector.

Finally, perhaps, after a period of long years the timber is cut and the public asserts its further demands in addition to the carrying charges by claiming thousands of dollars cash or royalty fees.

Last year the Government collected one and a half millions of dollars in royalties alone before the material that paid that amount was placed on the market.

This series of articles communitated by the Timber Industries Council of British Columbia.

George Morrison came in from Vancouver on Friday morning's train.

M. G. Wilson has a supply of Hardie Picking Bags, just arrived. 3-5L

Miss Jessie Moffat left on Saturday morning to return to her school at Grand Forks.

S. Bartholomew and W. Atkinson went over to Trail on Monday, where they expect to be for several weeks on painting contract work.

J. W. Harris left on Sunday for North Bend where he has taken the position of principal of the superior school.

T. J. Garnett left on Saturday morning for Carseland, Alta., where he will help his brother with the harvest.

Mr. and Mrs. H. W. Daniel came in from the Coast on Saturday morning. They have taken up residence in the J. H. Ritchie cottage.

Miss Erma Fash, who has been visiting with her parents here, Rev. Z. L. Fash and Mrs. Fash, left on Saturday via K. V. R. for Red Deer, Alta., to begin her third year on the high school staff of that city.

A. E. Richards of the Dominion Experimental Station here, came in on Thursday night's boat, after an inspection tour of B. C. illustration stations under his supervision.

Mr. and Mrs. W. Angove and little daughter, Edith, came in from Kimberley, B. C. on Tuesday's train and are visiting his parents, Mr. and Mrs. S. Angove. Will expects to be here for about two weeks, while Mrs. Angove and daughter will probably remain for a month's visit.

P. E. Knowles motored up to Vernon last Saturday, returning that night. He was accompanied by Miss A. Long who after a visit of several weeks with her sister, Mrs. Knowles and mother Mrs. Long, has returned to her home in Humboldt, Sask.

George Robinson, former resident of Peachland and Mrs. Robinson were visitors for a short time this week at the home of his aunt, Mrs. R. C. Lipssett on his way through by motor, having come up from Oregon on business. They continued south yesterday.

George Wilson left on Tuesday morning's boat for Winnipeg, where his father and brother now are. Before he left Miss Sinclair and Geo. Sinclair entertained the members of the matriculation class of the high school, his fellow classmates last term, when games and music were enjoyed.

Howell Harris, who has been traveling through the Interior doing potato inspection work was at his home here last week and attended the horticulturists' convention held at Penticton and here. His territory extends from Ashcroft, down through the Okanagan and east to the Kootenays.

Through an error in addition in the report of the average standing of the second year high school students published in last week's issue, the name of John Winter was ranked 14th with an average of 55 per cent. This should have been ranked 8th, with an average of 67 per cent, his total marks being 599 in the nine subjects taken.

According to information received by friends here, Dr. E. W. Sawyer is slowly recovering from a very serious illness. He has been in hospital for some weeks and it will yet be some time before he is able to return to his home. He had a very bad attack of asthma followed by a nervous breakdown. Dr. Sawyer was for several years head of the Okanagan College here.

A. S. Peck is now superintending construction work on a section of the Dallas-California highway in Southern Oregon. In asking that the address of his copy of The Review be changed, Mr. Peck states that he expects the contract will be finished about the end of November and he is hoping to return to Summerland about Christmas for a visit.

V. M. Lockwood, W. Vorrler and Joe Stewart visited Canyon Lake early this week. It took nearly all day Sunday to reach the lake as they had to tramp for some miles beyond Bathfield, which was as far as they could go by car. Mr. Lockwood states that the ground froze there Monday night, that the lake water was cold and the fish in excellent condition. However, they refused to bite after an hour or so in the morning of Monday.

WOMEN HOLD JOINT PICNIC

From Four South Lake Towns Members Gather in Peach Orchard.

A most enjoyable convention picnic of the combined W. C. T. U. organizations of Peachland, Naramata, Penticton and Summerland, was held in Peach Orchard Park last Thursday afternoon.

A large number of visitors from the adjoining towns were present, the grounds and weather were all that could be desired. Mrs. Jas. Ritchie, president of Summerland organization gave the visitors a hearty welcome on behalf of Summerland. A choice program of music, songs and speeches was rendered among which was a splendid address by Mrs. Allen of Naramata, district president.

A bountiful spread at the park tables was enjoyed by all, and after supper, some discussion took place as to the activities of the Unions, at the close of which the following resolution was unanimously carried: "That this convention express its conviction of the necessity of a graded course in scientific temperance instruction being placed on the curricula of our public schools, and that our Normal students be instructed in the same subject at the Normal schools, and that the B. C. Department of Education be urged to give effect to the above."

The picnic was closed by all joining hands and singing a farewell song. Everybody was delighted with the get-together idea of the picnic and the welcome of Summerland, and voted the picnic a great success.

All schools re-opened on Tuesday with a good attendance, and a successful year's work is anticipated.

Mr. Bulyea, of Peachland was a visitor at the Lipssett home on Wednesday.

Miss Helene Moore, who has been the guest of Miss Margaret Hogg, returned to her home in Vancouver on Saturday.

K. M. Elliott returned last Saturday by way of Vancouver from a visit with other legal men to the Old Country.

Mrs. J. Norris, who has been the guest for some little time of her sister-in-law, Mrs. R. C. Lipssett, leaves tomorrow morning to return to her home in Vancouver.

Russell Roe went out on Saturday morning to Regina, having gone down for the harvest season. He will be employed with A. Davidson, of this place, on his property near that city.

Wedding

MORRISON-SHIELDS.

A quiet wedding was solemnized on Saturday, August 30th at eleven o'clock, at the home of Mr. and Mrs. W. R. Shields, when their daughter Eva Isabel became the bride of Mr. George E. Morrison, of Vancouver, the ceremony being performed by the Rev. H. J. Armitage in the presence of the immediate relatives.

The bride, who was given in marriage by her father, wore a smart suit of navy blue tricotine, with sand hat trimmed with autumn colors, and wore a mink stole. She was attended by her sister, Miss Ida Shields, in a dainty frock of shot silk taffeta. Miss Mildred Shields played the Wedding March. The groom was attended by Mr. Howard Finley as best man.

Mr. and Mrs. Morrison left immediately after the ceremony for Vancouver, where they will reside.

Miss Edith Cunliffe left this week for Victoria, where she will enter provincial Normal school.

Miss Isabel Davidson left on Monday morning for Claresholm, Alta., where she will teach school. Mrs. Davidson accompanied her daughter as far as Okanagan Landing.

Mr. and Mrs. J. H. Ritchie and little daughter went down to Penticton on Saturday, where Mr. Ritchie is employed as government fruit inspector. They have leased their cottage here to H. W. Daniel.

Miss Winnie Yule, who has been spending three weeks' vacation at her home here, left on Saturday to return to her duties at the Revelstoke hospital. She was accompanied by a friend, Mrs. Goodship, who has been visiting with her here.

Dr. and Mrs. E. C. H. Windeler and little daughter, Ruth, and Lionel Munn are camping in F. A. Miller's cabin at Bathfield for a few days. It is Dr. Windeler's intention to give up practice here and prepare for specialty work.

ODDFELLOWS HOLD ANNUAL PICNIC

Oddfellows of the Summerland and Penticton lodges, with their families, held their annual joint picnic at Okanagan Falls on Labor Day, at which about 150 attended. Local parties left here at nine-thirty Monday morning, and, joined by Penticton and Oliver brethren, spent the full day at the Falls. Perfect weather prevailed and a pleasant day was spent. Races, for all, young and old, were carried off, while a relay race between Penticton and Summerland was won by the Penticton team. At the impromptu baseball game, however, Summerland retrieved its reputation, coming off victorious with a score of 25 to 8. Picnic lunches were served, the picknickers returning home in the cool of the evening.

SYNOPSIS OF LAND ACT AMENDMENTS

PRE-EMPTIONS Vacant, unreserved, surveyed Crown lands may be pre-empted by British subjects over 18 years of age, and by aliens on declaring intention to become British subjects, conditional upon residence, occupation, and improvement for agricultural purposes.

Full information concerning regulations regarding pre-emption is given in Bulletin No. 1, Land Series, "How to Pre-empt Land," copies of which can be obtained free of charge by addressing the Department of Lands, Victoria, B.C., or to any Government Agent.

Records will be granted covering only land suitable for agricultural purposes, and which is not timberland, i.e., carrying over 5,000 board feet per acre west of the Coast Range and 8,000 feet per acre east of that range.

Applications for pre-emption are to be addressed to the Land Commissioner of the Land Recording Division, in which the land applied for is situated, and are made on printed forms, copies of which can be obtained from the Land Commissioner.

Pre-emption must be completed for five years and improvements made to value of \$10 per acre, including clearing and cultivating at least five acres, before a Crown Grant can be received.

For more detailed information see the Bulletin "How to Pre-empt Land."

PURCHASE Applications are received for purchase of vacant and unreserved Crown lands, not being timberland, for agricultural purposes. Minimum price of first-class (arable) land is \$5 per acre, and second-class (grazing) land \$2.50 per acre. Further information regarding purchase or lease of Crown lands is given in Bulletin No. 10, Land Series, "Purchase and Lease of Crown Lands."

Mill, factory, or industrial sites on timber land, not exceeding 40 acres, may be purchased or leased, the conditions including payment of stumpage.

HOMESTEAD LEASES Unsurveyed areas, not exceeding 20 acres, may be leased on homestead conditions on a dwelling being erected in the first year, title being obtainable after residence and improvement conditions are fulfilled and land has been surveyed.

LEASES For grazing and industrial purposes areas not exceeding 640 acres may be leased by one person or a company.

GRAZING Under the Grazing Act the Province is divided into grazing districts and the range administrator under a Grazing Commissioner. Annual grazing permits are issued based on numbers ranged, priority being given to established owners. Stock-owners may form associations for range management. Free, or partially free, permits are available for settlers, campers and travellers, up to ten head.

NARAMATA NEWS

Current Events of Town and District

Mr. and Mrs. Routh have taken up their residence at Penticton, as have also Mrs. Dean Walters and the family.

Miss Minnie Rushbury, who was recently in Vancouver hospital, is now in Naramata once more, arriving with her sisters last week.

The telephone between Naramata and Summerland has been out of commission for several days, the cable having been broken near the wharf.

Mr. and Mrs. F. C. Manchester left for Battle Creek, Michigan, on Monday morning, and will make the trip by automobile. Mr. Rushbury has rented the Manchester house until their return.

At the Union Service on Sunday afternoon, Rev. H. J. Armitage preached on the text, "Come unto me, all ye that labor and are heavy laden." The anthem was "In Jewry is God Known" (Clarke-Whitfield) accompanied by Miss Alice Myers.

A social gathering in honor of Mr. Stewart Allen was held in the Lyons home on Saturday evening, when a number of friends assembled around the tea table and imbibed the beverage which cheers but does not inebriate. Later on music and games were the order of the evening. Mr. Allen expects to leave early next week to resume his studies at the university.

Anglican service was held on Sunday evening by Rev. H. A. Solly, who took for the subject of his sermon the misapprehension of certain sayings of Christ, and its subsequent effects on the church. The choir rendered Stainer's "I am Alpha and Omega." Mrs. Languedoc presiding at the organ. After the service an informal vestry meeting was held, at which Mr. Geo. Weaver was elected as vestry member.

A party of Summerland ladies selected the Naramata Unity Club as a pleasant spot for a picnic held in honor of Mrs. Nicholson's birthday on Wednesday. The visitors came over on the morning ferry, and included in their number Mrs. James Kean, the Misses Muriel and Violet Banks; Miss Annie Corby, Miss Jennie Nicholson, Miss Kay Elliott, Miss Miriam Walmsley and Master Walmsley and MacKenzie.

Farm To Build

(Continued from Page 1)

This being agreeable to the council, Mr. Hunter left Tuesday morning accompanied by Engineer Barton for Whitehead Lake to make the necessary survey preparatory to having the plans made for the dam. He wishes to have the work done this fall.

SUMMERLAND WEATHER REPORT

Below is a report furnished by the Dominion Experimental Station here for the week ending Tuesday:

Want More Gold Medal Apples

(Continued from Page 1)

land, on the 24th of October. Fruit for this fair must be in England by the 20th of next month.

In an interview with The Review Mr. Little said, it was Summerland Newtowns and R. I. Greenings that won the gold medals in these lines for the Associated last year and he spent a day or two here this week selecting other exhibits of these varieties.

The friendly rivalry between England and Canada in the British Empire section of the Imperial Fruit Show, that has been such a prominent feature of all previous stagings of this event, should be greatly accentuated this year by the fact that there are now two challenge cups offered for inter-country competition over a term of years, trophies now being provided which will be regarded as the premier honors of the exhibition, and which (perhaps crossing and recrossing the Atlantic of held one year in Nova Scotia and others in British Columbia, Ontario, Quebec or New Brunswick) will eventually, as the result of three winnings become the proud possession of the British Empire for dessert and cooking apples.

The \$50 silver challenge cup presented by Mr. George Swift, J. P., C. C., for the cooking class, was open to competition last year, when it was won by Mr. B. Norris Bowford, Selford Priors, Warwickshire, England. England has already won the first round in the contest for supremacy within the Empire in the production of culinary apples, and special efforts should, therefore, be made by Canada to give the trophy a sea voyage next November. Great interest has been aroused in England by the victory for the Motherland, and as England, rather specializes in cooking varieties, there will, no doubt, be a notable contest for the award at the Birmingham show.

This year, a second challenge trophy has been added to the attractions of the exhibition, the Agents-General for Ontario, Nova Scotia, British Columbia and Quebec offering a \$50 silver cup for the best entry in the dessert class of the British Empire Section, to be won three times by the same exhibitor before it becomes the property of the Dessert Apple Champion of the Empire. As Canada produces the best dessert apples in the world, and has a great advantage over England in the climatic conditions that produce attractive red color, highly rewarded on the judges' score card, this trophy should certainly be marked down for an early visit to the Dominion.

Water Was Main Topic

(Continued from Page 1)

the irrigation season and it was decided to prosecute any further violations and the clerk was instructed to publish a notice in The Review to this effect.

The public works committee was instructed to put a price on the three and four-inch pipe recently lifted from Shaughnessy Avenue.

Carrots 1, Mrs. Sanasac, 2, Mrs. Heighway; corn, 1, Mrs. Sanasac, 2, Mr. Thompson Elliott; cucumbers, 1, Mrs. Heighway, 2, Mrs. Sanasac; vegetable marrow, Mrs. Sadler; potatoes, Green Mountain, Mrs. C. Evans; squash, Mrs. Evans; pumpkin, Mrs. Evans.

Mrs. J. L. Elliott returned last week after short visits in Kelowna and Naramata.

Mrs. Jones and her daughter Edith left on Monday last on a walking trip, for a holiday, following this an interesting way of taking their holiday. They have no particular place where they feel they must terminate their tramp, but they told some of their friends that they might land up in Vancouver.

George Robinson, an old timer well acquainted with many residents, paid town a flying visit this week, accompanied by his wife. George says he likes their location down south, and is well satisfied with his position, but outside of that, he would like to be back on this side. All friends of the family will be glad to learn that his father is improving in health since going down there. While here Mr. and Mrs. Robinson were guests of his aunt and uncle, Mr. and Mrs. Bulvon.

The local schools opened to a good start on Tuesday morning last with the fall teaching staff and a goodly attendance of pupils. Miss Alice Elliott continues with her school in Trepanier, Miss Murlin in the primary department in the Central with a new principal and new high school

teacher. The principal is Mr. R. Boswell, an English trained teacher and one of wide teaching experience. He taught under the London, Liverpool and Manchester school boards and has taught sixteen years in Canada, most of these in Alberta, the balance in B.C. He will bring his wife and family here in about a month, having taken the house on the old Cossar, or Seigfried place. The high school position is being occupied this term by Miss D. Buck, formerly a Kelowna girl, latterly from the Coast. She is a graduate of the University of B.C.

Mrs. Hohensee, a former resident spent a short time visiting her two girls who are here for the packing season.

C. G. Elliott, his son Arthur and his three nephews Franklin, Gerald and Douglas spent a week in the vicinity of J. L. Elliott's preemption getting out a supply of wood in the log and hauling it to a skid this side of Deep Creek Hill.

Thomas McLaughlin took a day off his stage run last week, while he left his auto in Kelowna to have the top renewed.

Mrs. Cudmore left last week via K. V. R. for Vancouver to visit friends and relatives. Her daughter Edna accompanied her as far as West Summerland.

Master Lloyd Williams returned last week from Vancouver where he has been visiting his aunt and uncle and his brother Robert.

The Rev. and Mrs. F. A. Coad and family and Mrs. H. McCall motored to Westbank on Wednesday to visit a number of homes there.

W. H. Colclough, of Vancouver, provincial manager for the London Life Insurance Co. made a short call last week on local agent H. E. McCall.

Mr. and Mrs. Dick Bull and two children Mary and George of Vancouver, were recent guests of relatives, Mr. and Mrs. J. McLaughlin and Mr. and Mrs. E. Taylor and family.

The Rev. F. A. Coad, who with his wife and family were spending a week in the community, left on Thursday morning to attend District Meeting being held in Kelowna.

Joe Morsh spent Thursday in Kelowna.

Francis and Edward Cousins and Lorne Shaw left on Thursday morning for Manitoba to try their hand at harvesting and threshing. This will be quite a change for the boys who have become efficient in the tall timbers of British Columbia, but they decided they would like a change and a trip to scenes of earlier days.

Miss Joy Willis returned on Thursday morning to her home in Kelowna after a week's visit with Miss Myrtle Barber.

Mr. C. G. Elliott and his two sons Arthur and Donald left on Thursday to return to their home in Edmonton after an enjoyable vacation in Peachland.

Miss A. Elliott has been successful in securing the services of a housekeeper and companion for her mother in the person of Mrs. Moden who came in last week. This will make it possible for Miss Elliott to continue with her school in the Trepanier Townsite.

Dr. and Mrs. Waterman of Princeton attended the Women's Institute flower show and fruit exhibit to demonstrate a cold water cooler which Dr. Waterman is having patented, and hopes to place on the market.

Mrs. R. J. Hogg enjoyed a visit last week from her brother Mr. Mowat and his daughter.

The Rev. and Mrs. F. A. Coad and children left on Friday morning to return to Keremeos after a pleasant visit in Peachland among friends of former days of residence here. While here they were guests of Mr. and Mrs. H. E. McCall.

A number of ladies motored to Summerland on Friday afternoon last to attend the union picnic of the Naramata, Penticton, Summerland and Peachland W. C. T. U. Unions held in the Summerland Park. There were two auto loads, one driven by Hugh Dorland and the other by H. McCall. The ladies report having enjoyed a splendid and profitable time.

Miss Leah Morsh came home Friday morning after a couple of weeks spent with friends in Naramata.

Mrs. B. M. Whyte and son Stuart spent a day in town last week, visiting Mrs. Whyte's parents, Mr. and Mrs. A. W. Miller.

Mr. Joe Morsh left on Friday evening's boat to teach in a school near Cranbrook.

Robt. Stewart left on Saturday for Manitoba, where he lived formerly, and where he still has business interests.

Miss Alice Cousins left on Saturday morning to return to her school at Chase Creek.

J. L. Briggs left on Saturday morning for Vernon, where, we understand, he has accepted a position.

After a short visit at the home of Mrs. and Miss Needham, Miss Whitman left on Saturday morning for Prince George where she has taken a school for the new term.

Miss Dancer of Summerland came up on Saturday morning to visit with friends in the community.

Miss Ivy Law left on Saturday evening for Keremeos to attend High School.

Miss Ida Wilson returned to Kelowna on Monday after a few days visit in the Barber home.

Allan Wilson left on Monday morning on a business trip to the prairie.

Franklin Elliott, who recently completed his normal training, was successful in securing a school at Jura, near Princeton on the K. V. R. and left on Monday to take up his new duties. His many friends here where he was born and gained his earlier education are wishing him every success.

TENTH of the series dealing with the establishment of the BANK OF MONTREAL at representative points in CANADA and elsewhere

ON Threadneedle Street, in the old City section of London, the financial heart of the British Empire, the Bank of Montreal has been representing the interests of Canada since 1870. Its first London office was located at 27 Lombard Street. Later the Bank established an office at 47 Threadneedle Street E.C., afterwards extending its services to the Pall Mall section of London by creating an important branch at Waterloo Place in the heart of the theatre and shopping districts.

SUMMERLAND, B. C., THURSDAY, SEPTEMBER 11, 1924.

\$2.50, Payable in Advance

Court Action Withdrawn By Municipal Solicitor

Excused On Grounds of Past Leniency And Lack of Warning

H. K. Lott, C. J. Amm and Joe Christate appeared in police court on Saturday to answer charges laid against them under the Water Act. H. Tomlin, municipal foreman, was the informant against the two first named, who were charged with unlawfully and wilfully interrupting the Corporation of the District of Summerland in the lawful exercise of its powers and authorities under the Water Act of 1914. Christate was charged with unlawfully interfering with the water works of Summerland, information having been laid by W. C. Kelley.

Before the court asked the accused to plead to the charges, W. C. Kelley, counsel for the municipality, requested permission to submit a statement, which was as follows:

"Your Worship: Three parties are charged before you for infractions of the Water Act in the Municipality, two of them for hindering or interrupting the Municipality in the exercise of its powers under the Act as to carrying water to fruit lands, and one for interfering with the water system.

It is not generally understood by the public that such acts as above subject the person guilty to a fine up to \$250 and costs, and in default of payment to imprisonment up to one year.

In the past the provisions of the Act relating to above have not been strictly enforced, with the result persons have got the idea they can interfere with the irrigation system with impunity, and some have done so. Recently the council definitely decided that a new policy would be adopted and that any such infractions would result in the guilty parties being prosecuted. It was decided also that public notice would be given of this new policy so that growers would govern themselves accordingly. The meeting at which this policy was decided upon was held on a Thursday and hence was not published until this week. Those charged today did not know of this new policy and while I have no doubt they are all guilty I think as counsel it would be unfair to place the stigma of a police court conviction on

WILL DIG FOR WINTER WATER

Believe Can Thus Dispense With Pumping For Paradise Flat

Since the publication of the editorial in The Review two weeks ago on the possibility of finding water by boring wells, there has been considerable activity along this line.

Paradise Flat is acutely in need of some relief as the irrigation service is the only source of supply there for domestic water during the summer and water has to be pumped for the winter needs. E. T. Mountford has submitted a very plausible proposition to the council for providing Paradise Flat with a constant service by gravitation. There is a continuous flow of water from beneath the bench just above Trout Creek, which has caused in the past few years, very serious damage to property through continuous slides into the creek.

Mr. Mountford reports that a spring broke out on the mountain side above the flat and ran for some time and it is his conviction that this is the same stream of water which is doing the damage in the canyon. He suggests that this stream be tapped at the higher level and diverted to the pipe system.

Coun. Johnston, chairman of the water committee, was authorized on Monday to go to some expense in digging for this water.

Another proposed venture which is being made privately is to bore or dig for water near the A. Fenwick property between K. V. R. station and Paradise Flat.

Council Ready To Pay Share

Summerland municipal council by motion on Monday put itself on record as willing to contribute its share to the proposed fund for financing the British Columbia Railway Rates Association.

The municipality has been asked to contribute \$200, and the Co-operative \$300, and other local shipping houses in proportion. The total sum of \$5,000, from all districts had been asked.

It was felt by the council that the change in the situation, whereby G. G. McGeer, K. C., has again been employed by the province would mean that a much smaller sum would suffice, but Summerland will pay its proportion of the sum needed, providing the other contributors do likewise.

NEVER SAW SUCH FRUIT

Fresh Cherries From B. C. On Exhibit At Wembley

About a year ago, Mrs. T. W. Boothe, while packing at Walter's Limited, came across some exceptionally fine large crabapples of the Hyslop variety and selecting a few, sent them to her father, Jas. Salter, in Talmerton, Ontario. Shortly afterwards there appeared in The Talmerton Spectator, an article, referring to the marvellous size and wonderful coloring of this fruit, which surpassed any ever before seen in that part of the country, with the comment that, if the keeping qualities were at all in comparison with the size and appearance of the apple B. C. must excel in the production of fruit.

As proof of this statement, Mr. Salter, in a recent letter to Mrs. Boothe, tells of having kept the fruit until the day of writing, when they had cut and eaten them. Though fully a year old, the crabapples were found to be in perfect condition, fresh and of splendid flavor and texture.

Evidence of the carrying qualities of British Columbia cherries is contained in the fact that a shipment of thirty pounds of cherries from Kaslo arrived in London in perfect condition. In a letter dated August 10th, to the editor of The Review, F. R. E. deHart, in charge of the Canadian fruit exhibit in Wembley Park, says:

"It will no doubt surprise you to know that yesterday I received a shipment of 30 lb. of cherries from Kaslo, B. C., which came through in perfect condition and are now being admired by the many visitors who attend the Canadian Pavilion."

Remarkably Free From Disease

Not for years has there been a case of typhoid fever here which was of local origin, according to Dr. F. W. Andrew, medical health officer. During the days of railway construction, when there were some camps along Trout Creek from which our domestic water is drawn, there were a few cases.

Interviewed by a representative of The Review yesterday on the possibility of danger through the unprecedentedly low level of the water in the reservoir, Dr. Andrew stated that it would be advisable for people to first boil drinking water. However, he did not think there was much likelihood of the water becoming contaminated, though precaution was advisable.

Nicola Pine Mills Ltd. are getting out a large order of apple boxes for Ontario just now. The boxes are a very classy lot, and are printed on both sides and ends. They are for the crop in the Georgian Bay District, Merril Hernal.

B. C. WILL DEMAND LOWER RAIL RATES

Instead of fighting for the abolition of the Crow's Nest Pass agreement British Columbia will ask that the rates be extended so as to allow British Columbia shippers to enter competitive districts on an equal footing to the east.

The situation will therefore be that the prairies will be arguing for the retention of the rates, the railways will seek their abolition and British Columbia will request an extension of the rates from this province eastward.

It is expected that as a consequence of the reclamation of Sumas Lake lands the production of milk in the Fraser Valley will be considerably increased and that a further result will be a much greater production of both butter and cheese in that part of B. C.

NORTH OKANAGAN WANTS SUGAR MILL

There was recently held at Armstrong a meeting of representative citizens of the Enderby, Armstrong and Vernon Districts to discuss the proposition of taking up the growing of sugar beets with a view to having a sugar factory established here. It is the intention to secure seed for test planting throughout the district next season in order to ascertain the adaptability of the land to that purpose.

FEDERAL MINISTER VISITING OKANAGAN

Hon. J. H. King, M. D., federal Minister of Public Works and Premier John Oliver passed through town yesterday on their way to Penticton. It is understood they are conferring with party leaders there today on the subject of the Yale by-election.

IRRIGATION SEASON ENDS

Little Watering Will Be Done After end of This Week

Irrigation service on practically all the mains will be discontinued the end of this week. It is the usual custom to terminate the irrigation season on the middle of September.

When the question came up for consideration at the regular meeting of the Council on Monday, it was stated that the foreman, believing that he could give Jones Flat lots another irrigation all round, recommended that he be given permission to do so. Further, he suggested giving the lots on Slinash Flat on Aoneas Creek a watering from the creek. He could attend to these himself with little or no extra help.

There is still a fair supply of water in Prairie Creek, but the council decided to save that much expense by terminating the service. The Vanderburgh and Gray ditches are the only others not mentioned above that have been giving service during the last two or three weeks.

Conservation of Domestic Water Supply Necessary --Present Supply Can Be Augmented at Some Cost

Water has dropped to such a low level in the Prairie Valley reservoir the situation is somewhat alarming. Foreman Tomlin reported to the council on Monday that the end of the domestic water pipe leading from the reservoir was not more than half below the surface of the water and that the level of the water was continually falling.

During a discussion of the situation Coun. Johnston suggested that the numerous springs below the reservoir be diverted to a common centre and that a pump be installed to pump the water direct into the main. Some of this water, he said, might go back into the reservoir but would not be lost.

There are two mains running east through Prairie Valley; one an 8-inch pipe, the first to be laid, runs down through the meadows. The newer

ASK COUNCIL TO PROVIDE CHEMICALS

Ratepayers Suggest Additional Fire Fighting Equipment

Purchase of one or two chemical fire engines was briefly discussed at the municipal council meeting on Monday afternoon after the reading of a letter signed by C. B. McCallum, in which it was stated that at a recent meeting of ratepayers of the town of Summerland a resolution was passed favoring the purchase of a chemical. It was understood that a representative of a manufacturing firm was present at this meeting and offered to spread the time of payment over a period of years. He recommended a single cylinder equipment for each centre, with the idea that one could augment the other.

It was pointed out by the reeve that the council could not incur a debt of this kind, it being illegal for one council to incur a liability to be met by future councils. Either cash payment would have to be made or a by-law submitted to the ratepayers.

Apparently from the discussion there are some good chemical engines and others not so good, but the single cylinder was not favored, it being considered wise to have a second cylinder to fall back on should the first cylinder not extinguish the fire.

The two cylinder machines would cost \$900. The reeve said he would like to see one chemical in each of the towns, as with such an outfit, fires beyond the radius of the fire plugs could be reached. The purchase of these two machines would be too great an investment to be taken out of the current revenue of a single year.

The council agreed that more information should be had.

CHERRIES BRING GOOD PRICES

Returns obtained by local growers for cherries sold through the Penticton Co-operative Growers are considered very satisfactory.

The prices announced by the Co-operative are net to the grower, but from these deductions have been made on the cheques issued to the growers for the deferred payments for capital, for which the growers will receive paid-up capital shares. Deductions have also been made in the cheques to the extent of 5c per box margin over packing charges retained by the bank under the arrangements for financing the marketing of the crop. This money retained by the bank as additional security on the loan will be paid to the growers at the end of the fruit season.

Bings and Lamberts brought ton and a half cents per pound after all packing and Central selling charges were accounted for; Deacons ten cents per pound; Black Republican and Black Tartarian seven and a half cents per pound, and Royal Annos six cents per pound.—Penticton Herald.

LOSING WATER BY LEAKS AT INTAKE

An undue amount of water coming down Trout Creek is escaping past the dam at the intake of the municipal system, according to statements made at the meeting of the council on Monday. There is a lack of information on file in the office as to the construction of this dam and it was not known whether it had been built down to bed rock or but a short distance below the surface of the sand and gravel. It was decided to learn the condition even if digging were necessary and if possible, to remedy the position, so as to be able to divert that much more water into the municipal system.

An effort was made a few days ago to send more of the water through the main irrigation canal and the spillway to the reservoir. Raising the water at the dam to make this necessary seemed to increase the leak and the gate at the head of the canal was again opened.

ADDS SILO TI HIS FARM EQUIPMENT

F. R. Gartrell has just completed the erection of a silo, 12 feet in diameter and 26 feet high. He says it took a carpenter and two helpers three days to build it.

It will hold fifty tons of ensilage and he was only two and a half days filling it with corn grown on four and a half acres.

Asked how long this will last him, Mr. Gartrell replied that there will be ample feed in this silo for twelve cows for six months. He looks upon the silo as a necessary and profitable investment for the dairy farmer.

Reports from the customs house at Osoyoos indicate an increase of 250 per cent in the number of tourists entering through that port from the United States this year as compared with 1923.

START WORK ON DAM FOR FARM

Crescent Lake Chosen—To Build Dam This Fall

W. T. Hunter, superintendent of the Experimental Station, has returned from headwaters of Trout Creek. Accompanied by Engineer Barton, he went up there a few days ago to select a site for a storage dam and have the plans prepared.

Whitehead Lake was the one first favored, but after looking over the situation they decided to build on Crescent Lake, as they feared that the watershed was not sufficient to fill Whitehead and the cost of building there would be greater than on Crescent Lake.

Work on the construction of the dam will be proceeded with at once. A cabin is being built and the site of the proposed dam cleared. Construction will be started as soon as possible.

The dehydrating plant established by the Dominion Government at Penticton is now in full swing and is turning out a very high grade product.

Get Greater Receipts By Dividing Payment

Cut-outs Cause Sick to Suffer

There are several motor vehicles in the community, trucks and cars, driving without mufflers or that frequently use cut-outs when climbing hills. Reference has been made in these columns to this practice, which is very distressing to certain patients in the hospital. Complaint was again made of the practice at Monday's meeting of the council with a request that some action be taken to stop the nuisance.

Unmuffled motors climbing the hill past the hospital make such a terrific noise that patients are often disturbed in their sleep, perhaps resulting in the loss of a whole night's rest. The posting of notices requesting motorists to discontinue this practice was favored.

CHAUTAUQUA OPENS FRIDAY

Program of Mirth And Uplift Is Best Yet

Chautauqua opens in Summerland on Friday, Sept. 12th at 3:15 p.m. and 8 p.m. A program of high intellectual merit is being presented. Variety is the keynote of the chautauqua platform, hence we find ourselves lured into the land of laughter on the first evening. The Clark-Brown company are presenting "The Mollusc" reputed for its humor and its moralistic value, and is for young and old. Attend the play and forget your cares. The instructive lecture in the afternoon, by Dr. Rivers, aims to uplift the ideals of our community.

Saturday brings musical entertainment of unusual instructive value. The Herrick Duo impersonators bring us face to face with some of the greatest artists of the world. Dr. Bradford's lecture will enable the boys and girls to make their dreams of success come true.

Monday brings these three educational days to an end, with a double program, afternoon and evening. "The Australians," a trio of wonderful artists, present the best music to our community in a program of splendid variety. We are taken around the world with James Evans, who is best able to give us his advice because of his extensive travelling experiences. In the evening we find ourselves in Egypt with King Tut. No one should fail to hear this highly instructive and inspirational lecture by one who knows, Vincent Hall.

This travelling university is brought to our children by a committee of thirty citizens. Help to make chautauqua a success by buying a season ticket.

New Deal With Farm Probable

There seems every probability that the irrigation rates charged to the Dominion Experimental Station by the municipality of Summerland will be adjusted to the satisfaction of both parties.

Not only has the question of the charge to be made by the municipality for carrying water from the proposed farm reservoir on Crescent Lake been referred to N. F. Norrington, district water engineer and Mjr. J. C. MacDonald, superintendent of construction, both with the provincial water rights branch, but it has been mutually agreed by both parties to seek adjustment of a new scale of charges for regular irrigation service.

Dr. F. W. Andrew and C. J. Huddleston were among the local members of the Royal Arts chapter of the Masonic Order to attend a gathering at Penticton last Tuesday night of members of this degree from widely scattered points, including Kamloops and Revelstoke in the north and Okanagan, Washington, in the south.

Making Two Payments Of Irrigation Rate Brings More Money

Dividing the irrigation rates into two payments has been good business judging from the results obtained by the municipality this year.

In 1923 the levy was \$26,086 and on the second of May, when the penalty was added, 51.4 per cent of the current rates had been paid. By the end of 1923, 58.5 per cent of that year's irrigation rates had been collected.

This year the total gross assessment was \$29,344, divided into two payments, on for 19,713, due on the first of May and \$9,631, due on the first of August. On the first of May 60 per cent of the amount due had been received and up to the end of August an additional 7.5 per cent had been collected. Sixty per cent of the second installment had also been received or a total net of 65 per cent of the current year's rates, as against 58.5 per cent last year, with four months receipts yet to be added.

The council has decided to arrange for the continuance of this method.

LOCAL STUDENTS IN PROVINCIAL CONTEST

Representing the Summerland high school, Dorothy Garnett, Helen White and Orville Dunham will participate tomorrow in the stock judging contest at the provincial fair, New Westminster. All three left here by train on Monday. The contest is between agricultural classes of the high schools of the province. The above named three members of the local school having led their class, were given this opportunity. Free transportation is provided by the exhibition association.

KELOWNA PRE-COOLING PRACTICALLY ASSURED

Mayor Sutherland, Kelowna, has received practical assurance that the pre-cooling project for Kelowna is assured. Another plant is to be established at Salmon Arm, for berries principally, while that for Kelowna will take care of cherries and other soft fruits and a third at Creston will be for both berries and cherries.

NARAMATA GETS FIRST MONEY

Growers Paid Fair Prices For Their Early Fruits

Naramata Co-operative Growers' Exchange have closed pools on several classes of soft fruit. For the information of growers the gross pool prices have been furnished The Review for publication. 1923 gross prices are also given for comparison.

Variety	Gross Pool	Gross Pool Price 1924	Gross Pool 1923

Subscription Rates—In British Empire, in advance, \$2.50 per year; six months, \$1.40. To U.S.A. and other countries, \$3.00 per year.

Advertising Rate Cards and information respecting territory and samples of paper mailed upon request, or may be seen at the office of any advertising agency recognized by the Canadian Press Association.

Advertisers must have copy in by Tuesday noon in order to insure changes for standing advertisements. New display advertising copy can be accepted one day later.

All instructions for cancellation or alteration of advertising must be in writing.

Correspondence—Letters addressed to the Editor and intended for publication must be short and legibly written on one side of the paper only. The longer an article, the shorter its chance of insertion. All communications must bear the name of the writer, not necessarily for publication. The publication or rejection of articles is a matter entirely in the discretion of the Editor. No responsibility is assumed by the paper for the opinions expressed by correspondents.

Typographical Errors—In the event of a typographical error, advertising goods at less than the proper price, the newspaper will furnish letters to be posted in the store stating the correct price, but goods may not be sold at the price printed and the difference charged to the newspaper.

Thursday, September 11, 1924

PROVES VALUE OF COVER CROP

Seasons such as this prove the value of cover cropping. One has but to look around the district to note the marked difference between those orchards where cover cropping has been faithfully practised and those of more or less clean cultivation. The former are in much better condition to conserve and use to the best advantage the limited supply of irrigation water.

Speaking of this subject, Field Inspector Tait instanced an orchard on Jones Flat where hairy vetch has been religiously disced in for the past number of years. From this orchard, he states, there is a great crop of fruit being harvested, while the orchards all around, with otherwise similar soil are in bad condition.

THE POLITICAL SITUATION

The Okanagan is to have another political campaign. At least indications all point that way. The northern end of the Valley is to have two contests.

Dr. K. C. McDonald, North Okanagan member at Victoria, has been appointed to a position in the cabinet and it is necessary that his appointment be confirmed by re-election. In the recent provincial election there were four candidates

for North Okanagan—two Conservatives and a Provincial Party man, in addition to Dr. McDonald. It is claimed by the Conservatives that A. T. Howe, party candidate, would have been elected had not Price Ellison, independent Conservative, been in the field and party leaders believe that in a straight fight they can defeat Dr. McDonald. This remains to be seen. However, the party representatives are in session today at Vernon for the purpose of selecting a candidate to oppose Dr. McDonald.

THE FEDERAL SEAT

It is said that the Liberals offered to allow a Conservative to be elected by acclamation to fill the Ottawa vacancy by the death of the late J. A. McKelvie, member for Yale, provided Dr. McDonald was not opposed in North Okanagan. Apparently no such deal could be consummated and, as announced in another column in this paper, a Liberal convention will be held in Penticton on the 19th to select a candidate for the Ottawa seat. It is expected that the Conservatives will decide on a man at an early date.

DEFERRING PENALTY DATE

By permission of the provincial government the city of Vernon is extending the date for payment of 1924 taxes from September 10th to the 10th of December. In other words, taxpayers of Vernon will have until the tenth of December to pay their current year's taxes and still escape the penalty imposed for non-payment.

This is a good move, both for the municipality and for the taxpayers. But a small proportion, if any, of the returns for the current year's crop is in the hands of the grower on the date usually fixed for tax payment, with the result that many fruit growers must either borrow the money or pay the penalty. In the latter case, he is likely to let his taxes remain unpaid for many months and it is in this way that the city of Vernon will gain through the extension granted, as there are many more who will pay their taxes than if the earlier date had been maintained.

This year Summerland municipality found it wise to retard the date of payment, October 31st being fixed. Penticton taxpayers have three days longer. At Penticton the penalty is added on the fourth of November.

It is up to the municipal council to fix the date, but once having done so they cannot change it.

HOW TO MAKE YOUR ADVERTISEMENTS PAY

Few merchants really have the proper appreciation of what advertising means to them.

If a man spoke to his wife only once a month or every two months she wouldn't recognize his voice, says an exchange. Yet some business men advertise once a month or every two months and then wonder why they don't get more business. Advertise every week. Remember "the

used key is always bright." The store that tells the public what it is doing every day is the store that gets there in the end.—Ex.

MERCHANDISING B.C. FRUIT.

Vancouver Sun.—Orders for more than a million boxes of Canadian fruits have resulted from the Canadian fruit exhibit at Wembley.

Since the Wembley Exhibition began, a million people have seen that fruit, admired its appearance, and were impressed with its superiority. And from the impressions gained by those million people have come those orders for a million boxes.

This is one kind of merchandising, the most expensive and least efficient way.

Trained advertising writers could describe that fruit in print and create an even stronger desire for it than by actually laying it before the public.

And the audience of those advertising writers, in Britain, would not be 1 but 42 million people.

The sales success of the Canadian fruit exhibit at Wembley proves that the only thing that stands between British Columbia fruit and the British market, or the domestic market, for that matter, is lack of proper merchandising methods to actualize the potential demand.

Someone Told Him The Truth

The rush of farm boys to a nearby city for seemingly high wages in a factory there, saw a large crowd at the depot almost every week in a Western town this fall. One morning, after six big fellows had climbed aboard, the conductor turned to a big youth leaning against a baggage truck and asked him if he was going too.

"Nope, I'm in class B."
"What you mean, class B?"
"Waal, I BE here when they go— and I BE here when they come back."

Verily, Verily, Bobby

Father was singing the baby to sleep. Bobby, 4, was sitting on mother's lap. Finally he whispered "Muzzer, if I was baby, I'd pretend I was asleep."

Crecent (or Paull) Lake. The capacity of the reservoir to be created is about 300 acre feet, and it will flood about 150 acres of land. The water will be diverted from the stream at either the headgates of Summerland municipal system, or about 100 yds. above the Kettle Valley Railway Bridge over Trout Creek at the Dominion Experimental Station, and will be used for irrigation purpose upon the land described as Dominion Experimental Station, Part of Penticton Indian Reserve No. 1.

The licence applied for is to supplement a right to take and use water as per Licence No. 6492.

This notice was posted on the ground on the 21st day of August, 1924.

A copy of this notice and an application pursuant thereto and to the "Water Act, 1914," will be filed in the office of the Water Recorder at Vernon, B. C.

Objections to the application may be filed with the said Water Recorder or with the Comptroller of Water Rights, Parliament Buildings, Victoria, B. C., within thirty days after the first appearance of this notice in a local newspaper.

The date of the first publication of this notice is 11th September, 1924.

Spotlights on a Great Industry

A BUSINESS BAROMETER

CONDITIONS IN THE FOREST INDUSTRIES REGULATE THE PROSPERITY OF THE PROVINCE

Lumbermen Furnish Main Clientele of Business Firms and Professional Practitioners

A well known B. C. retail merchant remarked recently: "The lumber trade is my business barometer. I regulate my business, by advertising and the activities of my sales department by the strength or weakness of the lumber market."

Another prominent Vancouver retail merchant says: "I cannot say, of course, how many of my customers are actually loggers or lumbermen, or their wives, or sons or daughters, but I do know that if I lost the business I do with the people who depend on the lumber industry for their income, I would have to shut up shop and move out of British Columbia."

Forest Industries Motive Power

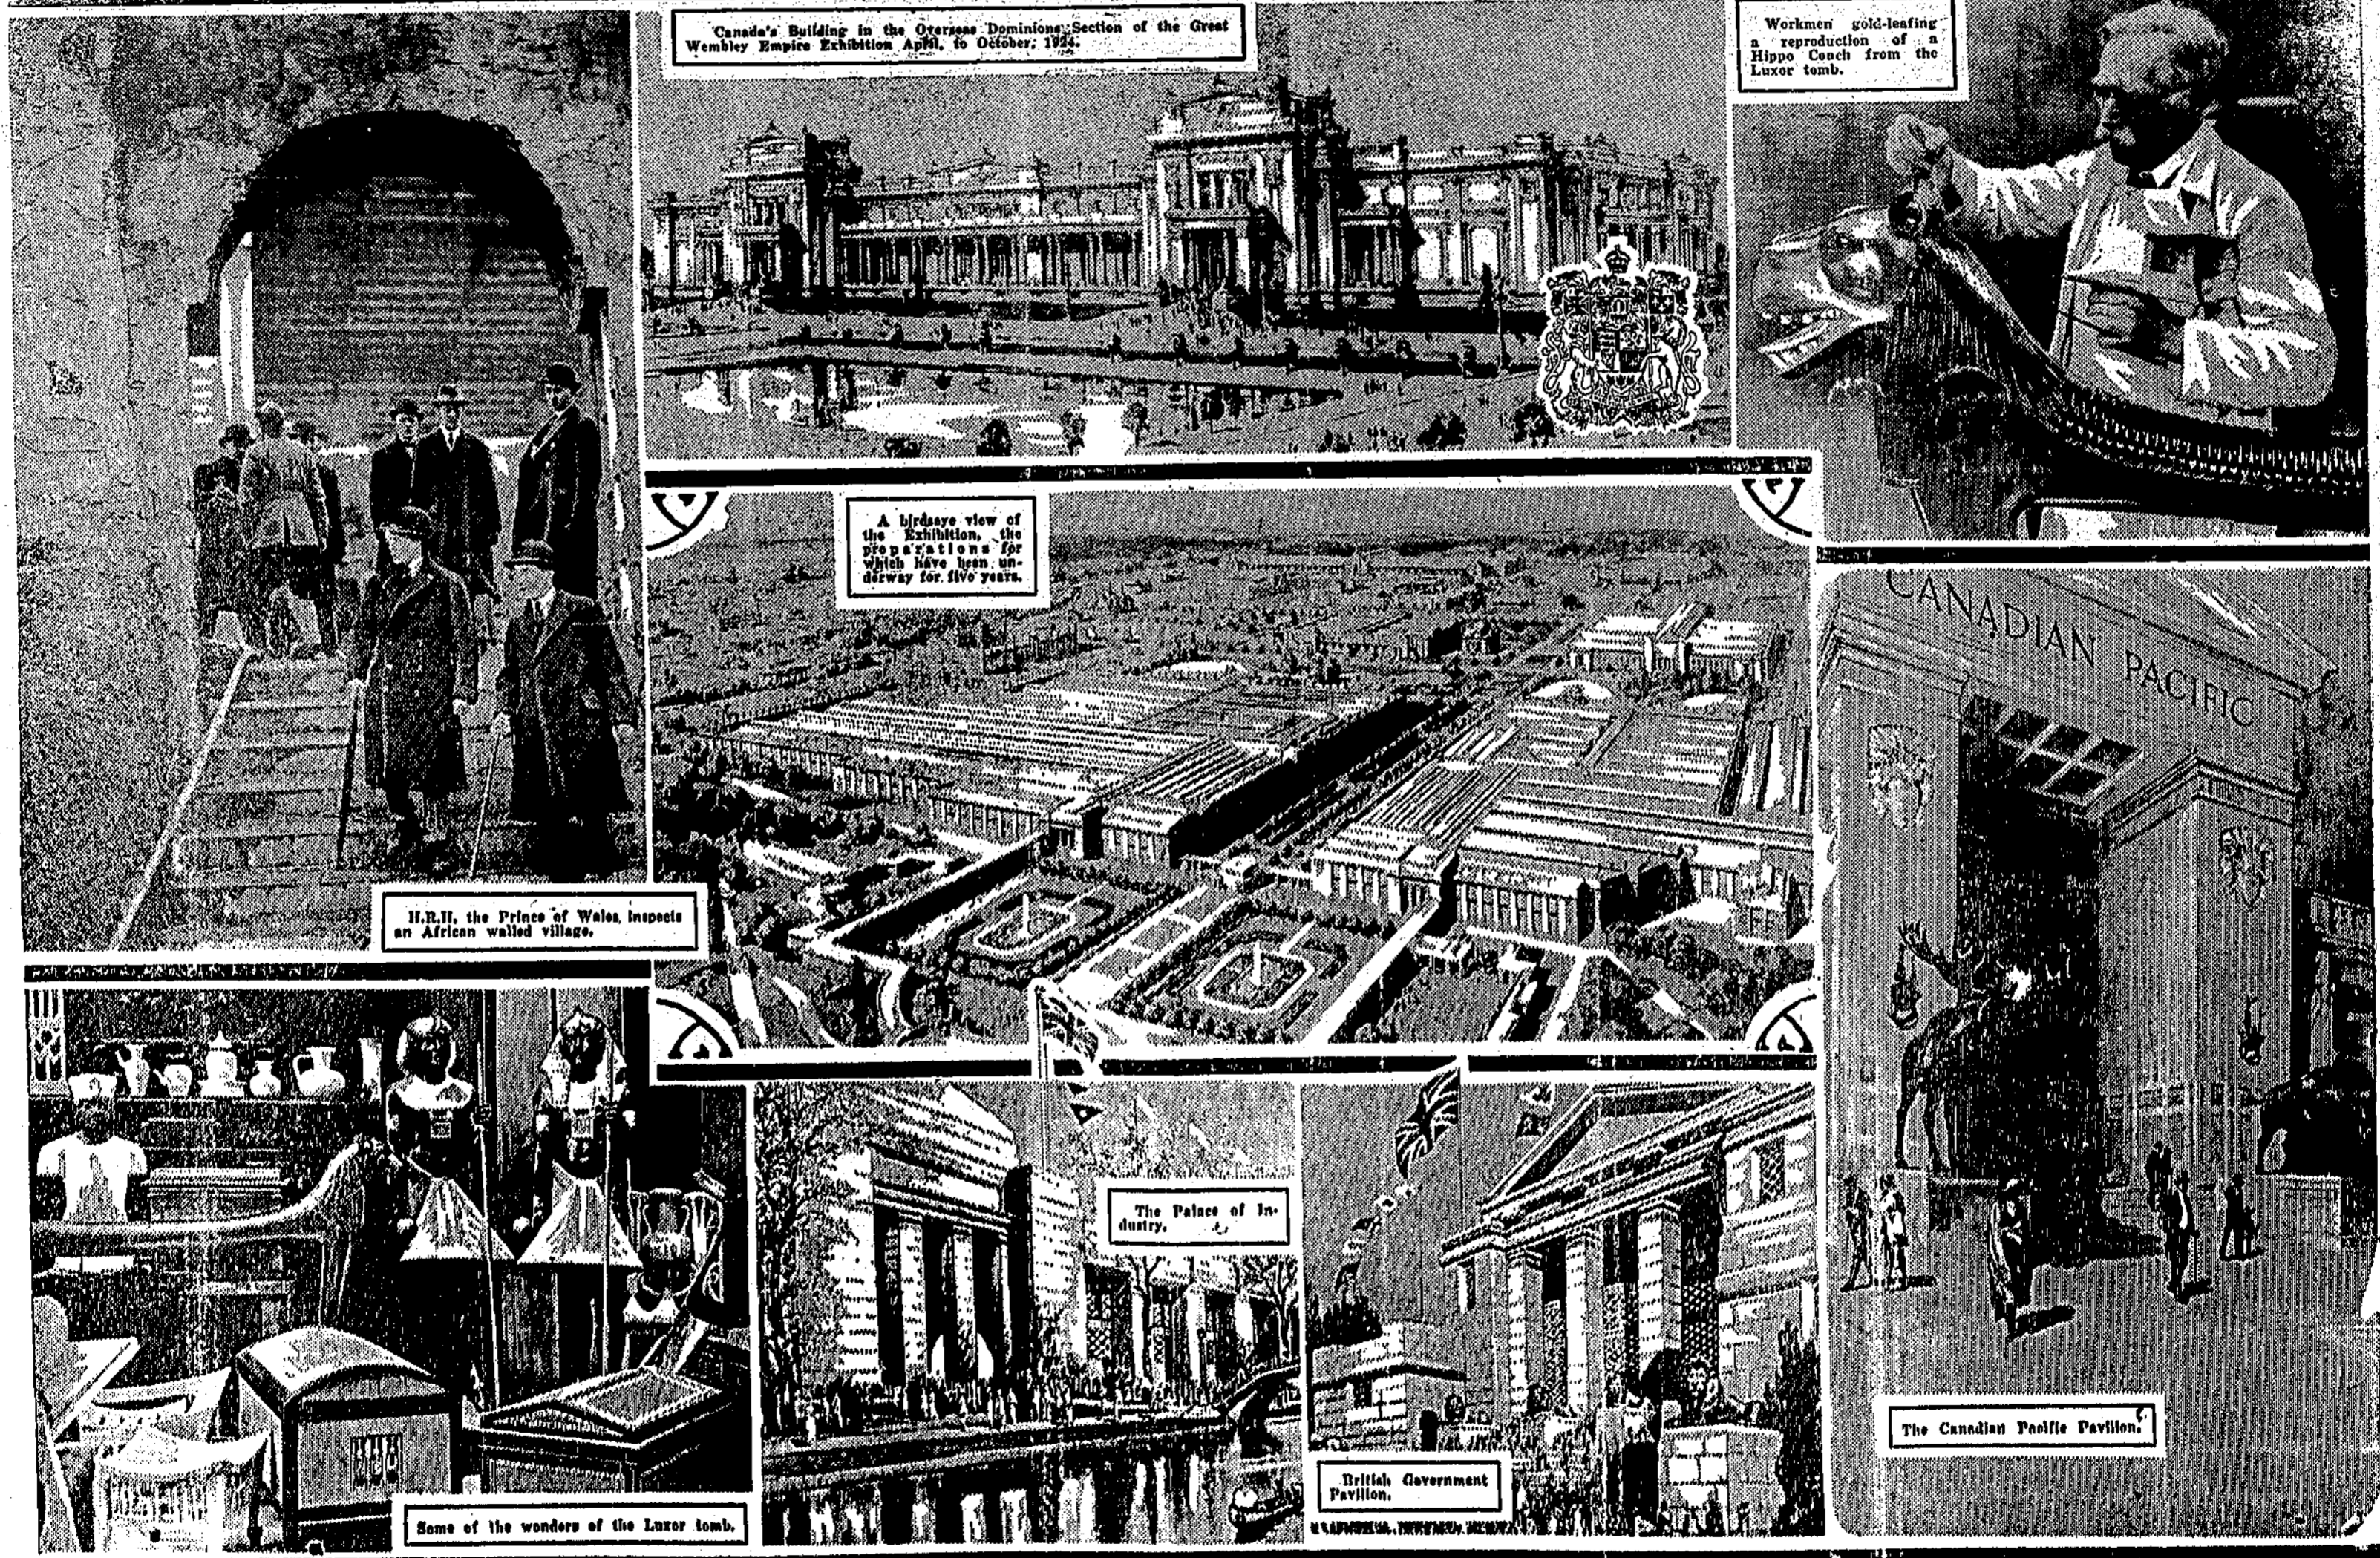

These two cases go to prove the truth of the statement that the Forest Industries are the motive power of this Province's progress.

One-fourth of the working population of British Columbia are on the payroll of the lumber industry and they, with their families and dependents, must necessarily constitute the main support of the storekeeper in our cities, towns and settlements.

How many of these, but for the business the lumbermen brings them, would also be compelled to "shut up shop and move out of British Columbia."

This series of articles communicated by the Timber Industries Council of British Columbia.

Britain and the Continent Visited
By Editors of Canadian Weeklies

Written for The Review by Hugh Savage, Editor of Cowichan Leader

London, August 21, 1924.
The Lord Mayor of York began work early on Monday, July 21st, and, with receptions and luncheons to two separate parties of visitors, was a very busy man all day. It was just after nine when we assembled in the state room of the Mansion House, where he and the Sheriff cut short their speeches so that we might have time to see as much as possible. Here, as at every city we visited in England and Scotland, the heads of the various municipal or civic bodies got out their most precious treasures for our inspection. These were of the greatest interest. We saw old charters, swords of state, corporation plate (gold and silver), quaint whistling pots (when drained of their contents you reverse them and whistle for more liquid), pictures and jewels, and "other articles too numerous to mention."

Ripon possesses unique treasures, such as the great horn given to the city by Alfred the Great, and the baldric with the names of the long line of Wakenen, an office which, in modern times has become the mayoralty. There is still a Wakenen, who keeps watch over the sleeping town and winds his horn at 9 p.m. He blew on it, for our edification, a blast which lasted nearly a full minute. Everywhere, also, there was in attendance some officer or antiquarian who vividly described these carefully guarded possessions, and so brought one in touch with the age-long history of these towns, all of which are interlinked with English and Scottish history since the dawn of our civilization.

In the Guild Hall at York, a few days previously, H.R.H. the Duke of York had unveiled a tablet, with accompanying flags, presented to York from her "godchild," New York. On the day of our visit the city entertained there a large party of Americans who had been attending the advertising convention in London. York's beginnings go back to A.D. 70, when the Roman legions founded it. We saw many Roman antiquities after viewing the ruins of St. Mary's Abbey. Most of these were coffins of stone, but one rare and unique exhibit was the auburn hair of a Roman lady, buried some eighteen hundred years ago.

There are only two-walled cities in England. We had walked on the walls of Chester, and now threaded along those of York to the great Minster, the largest cathedral in England. It stands on the site of old Roman temples. You may gain an idea of its glorious west front and of its stained glass when you learn that the east window is exactly the dimensions of a full-sized tennis lawn!

From thoughts of old invasions—of Roman, Saxon, Dane, and Norman in turn—we come to echoes of modern war. It is after luncheon, and Sir Moredith Whitaker, for our hosts, the Yorkshire Newspaper Society, is telling us how Canada's gift of \$60,000 to Scarborough (his home) for those who suffered from the bombardment, is still remembered with gratitude. York, he said, was one of the early homes of the printing press. He showed very clearly how the municipalities of England were the birthplaces of the democracy of the modern world.

Amid cheers we left York for the north and, through Durham and Newcastle and Berwick, we sped across the border and on to Edinburgh, a four hours' run. It was a chilly welcome Scotland gave us—rain and cold which were reminiscent of Polar regions. However, next day, the dourness had abated so that we could get a part of the glorious view from Edinburgh Castle and, by afternoon the sun shone brilliantly.

Our morning went all too swiftly exploring the castle with its armour and crown jewels, the old parliament buildings, and the church of St. Giles nearby. Between these last a small square plot, right in the street, exposed to the independence of traffic, marks the resting place of John Knox. We drove down the "royal mile," past his house, to Holyrood Palace, where we inspected the apartments of Mary, Queen of Scots, and heard again the bloody tale of assassination within their walls.

Sir John Findlay, of The Scotsman, presided at the luncheon tendered to us and to the American advertising delegates, jointly, at the Music Hall. Afterwards we were free to wander about this beautiful city. The fame of Princes street is world-wide. Its architecture is reminiscent of Paris. On one side are shops. On the other slope glorious gardens, and in

them, fronting the street, are monuments to Scotland's famous men. There sits Sir Walter Scott, under a great canopy of towering architecture.

A feature of the gardens is the floral clock. The dial is all of growing flowers; so are the hands. It goes, and by it one might learn that it was time to join the throng listening to the Coldstream Guards band. It was a large throng, for this was holiday week and everybody appeared to have stopped working. Some of our party discovered this fact when attempting to have some washing done. The laundries had closed down for a week!

But, here is stirling of pipes and a mile of children, many barefoot. Along the pavements clinking boxes are thrust at you to help to give the poor children of Edinburgh a holiday away from her great stone houses—once the palaces of Scottish nobility, now the haunt of dwellers in tenements and rooms.

The Lord Provost (Sir William Sleigh) started life as a newsboy. He and the corporation, in all the glory of red robes, with sword bearer et alia, received us in the evening at the City Chambers. There was a fine musical program and, upstairs, in the City Museum, we saw the famous Covenant and original letters and writings of Burns.

Next morning sixty-five minutes sufficed to bring us to Glasgow. En route we caught a glimpse of the famous Forth bridge. Amid showers we toured about the city, visiting the cathedral and committing sacrilege by spending fifteen minutes in glimpsing the art treasures of the city galleries.

Then came a memorable luncheon, tendered by the Glasgow press, at St. Enoch hotel. There we were thoroughly at home amid newspaper-folk. Mr. James Gourlay presided, and among well-known people present were Mr. A. M. Sutherland, Mr. H. D. Robertson, Mr. J. R. Richmond, Sir Robert Bruce, Mr. Neil Munro, Mr. James Davidson, Mr. D. R. Anderson, Mr. Colin R. Milne, Bailie George Kerr, Sir John Lindsay, and Sir John Samuel.

The chairman told us of General Wolfe's impressions of Glasgow. Of the men he wrote that they "are civil, designing, and treacherous, with their immediate interests always in view," while of the ladies he wrote—"the women here are coarse, cold, and cunning, for ever inquiring after men's circumstances." He hoped our opinions would be less severe than those of a young officer, aged 22, written 170 years ago.

There was no need for that hope, for while our glimpses of Glasgow would not lead us to accuse the city of being beautiful—on a wet day—the people we met will cause most of us some of the happiest recollections of a wonderful voyage of discovery.

Our day was not finished by any means. After lunch found us speeding to Ayr. It was in a regular downpour that we crammed ourselves into the humble cottage where Burns saw light. Rain gave place to sunshine as we gazed at "Alloway's auld haunted kirk" and the Burns' monument, or stood upon the "big o' Doon."

It was hard to believe that one was actually amid the "banks and braes." There is a pleasant garden by the swift stream, and in the tea rooms there Provost McDonald, "on behalf of the town council and citizens of the royal and ancient burgh of Ayr" extended a welcome in memorable words.

We drove back along the esplanade and saw the old bridge of Ayr. Our train window later revealed glorious scenes of the Firth of Clyde and Arran's Isle. The Corporation of Glasgow gave a reception in the evening, at which the American advertising delegates were our fellow guests. There were over 1,200 persons present. It was a great sight when the eightsome roof was danced in the great banquetting hall at the city chambers. For those who did not dance a splendid program of Scots songs was provided in the council hall.

We had had a view of the Lowlands. Next day we journeyed to the Highlands. The train took us to Aberfoyle, and thence we motored to the foot of Loch Katrine. A steamer took us up the lake and, after landing, coaches, drawn by four horses, dragged us over the pass to Loch Lomond.

I understand now why whiskey and plaid and other warmth-producing commodities are common in Scotland, and why the sheep and cattle appear to be wearing six overcoats at once. It was July 24th, but so cold that

one shivered in the cars and got below as we steamed the length of Loch Lomond to Balloch.

The scenery reminds one of B. C., but the hills are much less timbered. Memories of our own heights dwarf these Scottish mountains but—size is not everything. We went amid the heather—and stole some of it, but not enough for all those to whom this is storied ground.

From Balloch we came by rail back to warmer skies in Glasgow. Our last evening was "free." We could do as we liked. Consequently three of us spent a most delightful evening with Mr. J. J. Bell, whose fame, as the author of "Wee Macgregor," goes without saying in Canada, and with Mr. De Banzie, a Glasgow newspaperman and his charming wife.

Next day the writer returned to England while the party sailed for Canada on the C.P.R. steamer Montclair. They landed at Belfast next (Saturday) morning and found the city prettily decorated in honor of H.R.H. the Duke of York, who was to unveil a memorial there. A banquet at the city hall followed and, after visits to The Telegraph office and a reception by the Lord Mayor and his wife, they rejoined the vessel and headed for home in earnest.

PEACHLAND DOINGS
A Weekly Chronicle Furnished By Our Local Representative.

Mr. and Mrs. Kinchin returned last week from the prairies where they were settling up their affairs and getting their effects ready for shipment here to their new home recently bought from Mr. Sutherland.

Mrs. Morsh returned home on Thursday last after a short visit in Naramata. She brought with her Mr. J. Bedard, (her stepfather) of Dewey, Montana. He recently suffered a break down in health and will spend about a year in the Okanagan to recuperate.

Mrs. Robt. Howell and baby daughter left on Thursday morning to return to their home in the Eastern States, after having spent several weeks here with her mother, Mrs. House.

Mr. and Mrs. Mowat spent Friday of last week out of town.

The Baptist Sunday School changed the order of their Sunday School picnic this year and had a Social instead, held in the basement of the Church on Friday evening. They had a large attendance of the members of the Sunday School and Church and enjoyed a splendid evening. Mr. and Mrs. Gilbert Thornber, with Mrs. Sharp, and Masters Stanley Sharp and Walter Bleasdale motored up from Summerland for the occasion and Mr. Thornber lent much enjoyment to the young folks with some of the new games he introduced. The ladies served refreshments and the school supplied ice cream. Although a few had at first thought a picnic would have been better, all decided the social had been just as much fun for the young folks.

Out of town visitors on Saturday were Mrs. Morgan and Miss Wilson, Mrs. Baptist and Miss Helma Hehensee.

The Rev. and Mrs. A. T. Robinson, who have been spending a few weeks in the valley, were guests of Mr. and Mrs. Bulyea over the week end, returning to Summerland on Monday evening's boat. They expect to leave the Valley shortly to return to their field of labors in the States.

Miss Flossie Cloment came home from Vernon last week to enjoy a portion of her holiday. She will spend part of her vacation at the Coast.

Mr. and Mrs. E. Law and Mr. Chas. Tupper of Penticton motored to Peachland on Saturday last to visit friends and relatives and also attend a corn roast to which they had been invited.

Miss Jean Dryden came home on Saturday evening's boat, to spend the week-end with her parents. They all motored to Vernon on Sunday.

Mr. and Mrs. Sannac entertained a party of friends on Saturday evening last at their pretty home on their ranch on the upper Tropicana bench. The nature of the evening's entertainment was a Corn Roast and a Melon Silec. They had the place tastefully arranged for the occasion, a nice bonfire, dozens of cobs of corn ready for roasting, dozens more already boiled for those who preferred theirs done that way, and melons aplenty. It would be hard to describe how those present enjoyed those good things, and in fact we fear that some of them would not like the matter of quantity discussed in detail, so suffice it to say that everything was enjoyed to the full

and a very pleasant and sociable evening spent by all. As the crowd was breaking up they sang "For They are Jolly Good Fellows" followed by "Auld Lang Syne."

Mr. J. McKinnon's case for breach of contract in which the Associated were asking for an injunction to compel Mr. McKinnon to ship his crop through them according to contract, came up again on Saturday last and according to information from Mr. McKinnon the court refused to grant the injunction.

Mrs. Vivian left on Sunday to spend a couple of days visit in Penticton with her brother and his wife Mr. and Mrs. E. Law. She motored down with them on their return from a short visit in Peachland.

Mr. Walter Morsh returned home for a time, having spent some time employed at Beaverdell.

Mr. F. B. Heath, of Vancouver, British Columbia Manager for the Canada National Fire Insurance Company, The Imperial Canadian Trust Co., and the Great West Permanent Loan Company, all with their head offices at Winnipeg, Man., spent a day in town this week interviewing shareholders of the Loan Co. and also the local agent of the Fire Insurance Co., Mr. H. E. McCall.

Mrs. H. H. Elsey of Summerland and her daughter Mrs. Frank Hayward of Vancouver motored up from Summerland on Tuesday of this week for a short visit with friends and relatives.

Only Matter of Time

A young woman who was reared in an eastern Kansas town read in a poultry journal that poultry-raising was remunerative, so she decided to try it. She purchased a hen and set her on thirteen eggs. She wrote to a poultry journal that poultry-raising was to her liking and wondered how long the hen should remain on the eggs. The paper wrote back: "Three weeks for chickens and four for ducks." Later she wrote to the poultry journal as follows: "Many thanks for your advice about the setting hen. She remained on the nest three weeks and at the end of that time there were no chickens hatched. As I did not care for ducks I took her off the nest and sold the eggs."

**SYNOPSIS OF
 LAND ACT AMENDMENTS**

PRE-EMPTIONS
 Vacant, unreserved, surveyed Crown lands may be pre-empted by British subjects over 18 years of age, and by aliens on declaring intention to become British subjects, conditional upon residence, occupation, and improvement for agricultural purposes.

Full information concerning regulations regarding pre-emption is given in Bulletin No. 1, Land Series, "How to Pre-empt Land," copies of which can be obtained free of charge by addressing the Department of Lands, Victoria, B.C., or to any Government Agent.

Records will be granted covering only land suitable for agricultural purposes, and which is not timberland, i.e., carrying over 5,000 board feet per acre west of the Coast Range and 3,000 feet per acre east of that Range.

Applications for pre-emption are to be addressed to the Land Commissioner of the Land Recording Division, in which the land applied for is situated, and are made on printed forms, copies of which can be obtained from the Land Commissioner.

Pre-emption must be occupied for five years and improvements made to value of \$10 per acre, including clearing and cultivating at least five acres, before a Crown Grant can be received.

For more detailed information see the Bulletin "How to Pre-empt Land."

PURCHASE
 Applications are received for purchase of vacant and unreserved Crown lands, not being timberland, for agricultural purposes, at a minimum price of first-class (arable) land in \$5 per acre, and second-class (grazing) land \$2.50 per acre. Further information regarding purchase or lease of Crown lands is given in Bulletin No. 10, Land Series, "Purchase and Lease of Crown Lands."

LEASES
 Mill, factory, or industrial sites on timber land, not exceeding 40 acres, may be purchased or leased, the conditions including payment of stumpage.

HOMEBOY LEASES
 Unsurveyed areas, not exceeding 20 acres, may be leased to homeboys, conditional upon a dwelling being erected in the first year, title being obtainable after residence and improvement conditions are fulfilled and land has been surveyed.

LEASES
 For grazing and industrial purposes areas not exceeding 640 acres may be leased by one person or a company.

GRAZING
 Under the Grazing Act the Province is divided into grazing districts and the range administered under a Grazing Commissioner. Annual grazing permits are issued based on numbers ranged, priority being given to established owners. Stock-owners may form associations for range management. Fees, or partially free, permits are available for settlers, campers and travellers, up to ten head.

**The Pedlar's
 Pack**
 By AUTOLYOUS

In conversation with a veteran officer of the Boer war I happened to mention James Grant's once famous novel, "The Romance of SEEKING WAR." "That's all past," PEACE said he, "there is no romance left in modern warfare—it is just dreary butchery. In the last war most of the men never saw an enemy—they stood in dirty, wet trenches, being wounded or killed by shells out of guns hidden miles away, and the only chance of actual fighting they got was when they were sent over the top to rush a trench a little way ahead." If we except the work of the air forces, this seems to be a fair description of conditions, and it is possible that the elimination of the martial pomp and glory formerly inseparable from war will eventually be a leading factor in its discouragement. The pages of Grant and Lever are full of the romance of war, and their readers are entranced by vivid pictures of dashing charges, heroic forlorn hopes, unshakable British squares, and all the blaze of scarlet and gold which fires the imagination of youth. Today the record is one of digging ditches for the shelter of men clad in sober khaki, and of a monotonous round of exchanging one ditch for another when the artillery has made that practicable. It is a sorry contrast, and one which is already doing its work.

Another factor which must of necessity enter into the matter is the enormous increase in the number of death dealing agencies. Unless a nation goes absolutely mad, it will soon have to bridle its longing for war by consideration of the danger of being literally and completely wiped out of existence by a victorious opponent. If it is so blindly possessed with the desire to fight as to disregard this risk, it will show itself as lacking in the sense shown in a colony of bees at swarming time. On these occasions it sometimes happens that two queen bees hatch simultaneously, and it being a law of the hive that only one queen can rule, a duel to the death is inevitable between the rivals. But it seems to be realized that the possible death of both would be an irreparable disaster to the colony, and accordingly it has been noted by observers that if, during the combat, the antagonists find themselves so locked together that the fatal sting may be simultaneously inflicted by both, they will separate, and renew hostilities from a different position. The welfare of the community is paramount, and the instinct to preserve it remains supreme even in the struggle for individual existence. It is an interesting object-lesson, and one which will probably have to be learned by the nations of the world in disputes of the future.

We read of gatherings of well meaning people to stage demonstrations in favor of no more war, there being apparently a notion that perpetual peace can be ensured by the passing of some resolutions to that effect by a few hundred persons assembled in a pleasant park for a Saturday afternoon's outing. It is a beautiful exhibition of childlike faith. The church has for centuries past prayed "Give peace in our time, O Lord," but so far the world seems to be quite indifferent as to putting the petition into practical effect. The peoples of the earth need not fight unless they choose, but man is a fighting animal, and when he loses the will to fight, he will also have lost certain other attributes more or less necessary to his very existence under present conditions. He will be a very different being to the man of today and will need a different world to live in. Meantime the best prospect of reasonable peace in the earth appears to lie in a League of Nations which has the will and the power to enforce order.

In England and Wales in 1923 there occurred two hundred deaths from homicide, more commonly called murder—in the same number of states in the United States, an American judge gives a conservative estimate of ten thousand! The same authority also states that the life insurance companies are becoming alarmed at the percentage of violent deaths, since it has reached a pitch which has an appreciable effect on their business. We can only understand this when we note that last year more than seven per cent of every hundred thousand of their industrial policy holders died from violence, instead of from natural causes. The American judge rather curiously claims that the fault does not lie with the lax enforcement of the criminal law, but rather with the

apathetic attitude of the people towards strict enforcement, coupled with their own unwillingness to obey the law of the land, and to train their children in obedience to it. He may be quite right in the latter conclusion, but it seems arguing wide of the mark to absolve the courts in the face of what is reported from them—almost daily. It is not very long since an American chief of police resigned because he was unable to secure prompt convictions in the cases he brought before the court, and it is notorious that the parole system in vogue across the line is responsible for the release of many criminals who are not fit to be at large. Of course all this is primarily the business of the United States, but we are interested by reason of the fact that certain of our cities are being exploited by some of the gentlemen who follow the profession of robbery with violence, as witness some recent cases in Vancouver. And if we may judge from recent turn of events in that city, we have reason to suspect that a little of the apathy or laxity from across the line has been spreading in our direction.

It is interesting to try to decide how far our neighbors have advanced from the spirit of lawless license which Charles Dickens noticed in the America of the forties and which he satirized in "Martin Chuzzlewit." Mr. Hannibal Chollop "was usually described by his friends as 'a splendid sample of our native raw material, sir,' and was much esteemed for his devotion to rational Liberty; for the better propagation whereof he usually carried a brace of revolving pistols in his coat pocket." After a lapse of eighty years we note that in no other country in the world is the revolver in such common use as in the United States, a circumstance which seems to show that the spirit of "rational Liberty" of Mr. Chollop is not yet altogether smothered under the tide of advancing civilization.

Presumably the very definite pronouncement of Professor Eddington as to the "absolute absurdity" of the attempt being made to communicate with Mars by radio will presently bring a pause in the proceedings, since the reasons he gives are apparently scientific to the last degree. If sound waves cannot pierce the bounds of the atmosphere surrounding the earth, it must certainly be idle to expect to bridge the thirty-four millions of miles of dead space, which lies between the two planets. And if Mars has been burned up for many thousands of years, we may as well reconcile ourselves to being permanently deprived of the pleasure of social intercourse with its departed inhabitants. There may be compensations in the loss if some of our fiction writers are anywhere near the mark in their romancing. One story lately appearing tells of some frightful destruction wrought on the American continent by Mars in the dim and distant future, and all things considered, we may be safer if the mysterious planet has really had its day.

**"A Snapper Up of
 Unconsidered Trifles."**
 * * * * *
 The Winter's Tale,
 Scene II, Act IV

recipient with the casual remark that I can have all his right, title and interest in it for the modest sum of twenty-five cents. As that would seriously deplete my financial resources I hesitate to accept the offer, but am open to dispose of my option for a small advance on that amount. What puzzles me most is the curious inconsistency of this gentleman in Spain being "imprisoned for bankruptcy" while he has the princely reserve of \$360,000 hidden in a portmanteau in America. Evidently he was an exceedingly prudent bankrupt, in that he laid aside a good deal before the crash came, and we must further conclude that his creditors were not as astute as they might have been. Possibly they will rise to the occasion if they chance to learn of the existence of these two cheques to bearer.

It is a delightful episode and carries us back to the days when Spanish treasure was a bait sure to catch some unsuspecting nibbler. That it is still going the rounds in this year of grace 1924 would seem almost incredible unless the evidence was actually in hand. Let us hope that the catch on this occasion is nil.

The current number of "The oldest Agricultural Journal in the world" has a cartoon depicting a procession of growers of various fruits of the earth bearing down on a consumer with the adjuration to eat more of the particular product in which they are individually interested. The legend underneath the picture contains the obviously accurate statement, "If we eat more of one thing we'll eat less of another," and conveys a truth which seems to have been entirely overlooked by many organizations of late years. It may be perfectly true that if every individual ate more bread there would be a larger demand for wheat, that if he ate more apples, more would be sold, and so on to the end of the list, but it remains a fact that, given the means to purchase, the average person already consumes as much as he needs of all commodities which are obtainable at reasonable prices. For that matter the doctors will tell us that most people eat too much, and probably they are right. The point is that prosperity of the producer is not to be secured along that line, the problem lying much deeper. The writer of the article which this cartoon illustrates, solves the difficulty with a programme of "Three G's" Good farming, by Good men, on Good land, and one of his contentions is that all land now being farmed is not good farm land, and should be used for other purposes. It is an idea worth following up in its proper place.

I have often wondered what actual connection there is between the production of grain and its transformation into fancy breakfast foods, when considered as a factor which affects the grower. We see wheat, for example, costing the manufacturer approximately two cents per pound, and turned out by him as a breakfast cereal selling for at least ten times that figure. The proportion netted by the producer in such a case is plainly very much less than where the grain is made into bread, and the actual effect is to increase the price of wheat to the consumer without any benefit to the grower. And it must inevitably make a difference in the demand for bread. However, there is not the least doubt but that if we like prepared breakfast foods we shall continue to eat them, and fortunately, perhaps, there has been a wholesome falling off in the production of what we may reasonably term freakish foods. Some of us can remember such extravagant preparations as Dr. Barry's "Revelante Arabe" advertised a good many years ago at three shillings and sixpence per pound, and composed chiefly of Egyptian lentils costing a mere fraction of that amount. Doubtless lentils were, and are, excellent food, but not at that price! Dr. Nichol's Food was modest in comparison, at on fifth of the cost, but even so it was just oatmeal, specially prepared. It seems too bad the producer can't get a little of the accrued value of these special preparations.

Somewhere in Spain there languishes in prison an individual who seems to be animated by an overwhelming desire to enrich one or more Canadians by the sum of \$120,000, the only proviso being that they shall come to the rescue of the petitioner by proceeding to Barcelona, paying the expenses of his trial and enabling him to recover a certain portmanteau which he has hidden in America, and in which are secreted two cheques payable to bearer, the total amount of same being \$300,000. Thus it will be seen that the percentage offered by this gentleman in distress is no less than one-third of his worldly possessions, and this is obviously exceedingly liberal. Seeing that the hardhearted minions of the law who hold this person in custody will not permit him to receive letters (although they seem perfectly willing that he shall write them) the first approach by intending rescuers must be made by cable, and this, again, must be sent to a third party, who apparently resides in Palma de Mallorca, and enjoys the full confidence of the generous testator. It is necessary to imagine, also, that this Palma de Mallorca resident possesses the confidence of the groler of the Barcelona prison, since he is able to correspond with the incarcerated one.

The beautifully lithographed letter in which this offer is made has been handed to me by its original

recipient with the casual remark that I can have all his right, title and interest in it for the modest sum of twenty-five cents. As that would seriously deplete my financial resources I hesitate to accept the offer, but am open to dispose of my option for a small advance on that amount. What puzzles me most is the curious inconsistency of this gentleman in Spain being "imprisoned for bankruptcy" while he has the princely reserve of \$360,000 hidden in a portmanteau in America. Evidently he was an exceedingly prudent bankrupt, in that he laid aside a good deal before the crash came, and we must further conclude that his creditors were not as astute as they might have been. Possibly they will rise to the occasion if they chance to learn of the existence of these two cheques to bearer.

It is an idea worth following up in its proper place.

NARAMATA NEWS
 Current Events of
 Town and District

Mr. Donald McKay returned from the Coast on Monday after a couple of months absence.

Mr. A. W. McLeod of Vancouver has been staying at the Syndica Hotel for a few days.

Miss Allan, the new school principal, arrived in town last week, and took up her duties on the opening of the school term.

Miss Wilkie has returned from New Westminster, and has resumed her position in the school.

Mr. Cyril Rayner left on Sunday morning for Vancouver, where he will proceed with his college work.

The Occidental Company has opened a packing house under the management of Mr. W. Impett, Jr., of Penticton.

Several buyers from Independent houses have been canvassing the district for business among those growers not members of the Associated.

On Friday evening the Scouts held a picnic on the lakeshore, when the retiring Scoutmaster, Mr. Stewart Allen, was presented with an address of farewell, and a \$5 gold piece, Messrs Horswill and Cross being the speakers on the occasion. Mr. Allen responded in appreciation of the memento, and expressed his hope that the Scouts would continue to progress. By the light of a merry bonfire, the scouts contributed a round of songs and choruses, after which the ladies handed round coffee and refreshments, the proceedings ending with the singing of "Auld Lang Syne."

The service on Sunday was taken by Mr. Bartlett in the absence of Rev. H. J. Armitage who was attending a gathering at the Coast. The subject of the discourse given was the need for retaining faith in times of adversity. The anthem was "Ye shall dwell in the land" (Stainer) Miss Alice Myers at the organ. After the service Mr. Weaver alluded to the approaching departure of Mr. Stewart Allen for Montreal, and conveyed the best wishes of the choir for his success in his chosen vocation. Anglican service was announced for Sunday next.

Work on the wharf is well advanced, and much criticism is heard of the plans which provided for increased height without the greatly needed extension in length. Board of Trade correspondence with the Dominion Government and the C. P. R. shows that it has always required an increased length, and Capt. P. S. Roe states that his suggestion, given by request before the wharf was built, called for fifty feet more than eventually provided. He claims that the present increase in height without a corresponding extension outward will result in considerable inconvenience to the passengers and freight service on the ferry, and complains that his recent request to see the new plans was not complied with.

"Wanderer," Paramount
 Novelty Picture Coming

"Wanderer of the Wasteland," Zane Grey's greatest story and the most popular of all his books is the first full-length Paramount picture to be produced completely in color. This is an announcement of significance to very movie patron because it means that photography at last has been perfected for practical purposes.

"Wanderer of the Wasteland" is an outdoor picture but with an entirely new background, never before shown on the screen. Scenic comparisons are out of order as the entire production was photographed on the actual locations described in the book, the gorgeous Painted Desert of Arizona and Death Valley, California. Readers of Zane Grey's stories know that it is a thrilling, adventurous story of the wastelands of the American desert, check-full of drama action and romantic love.

Jack Holt, in an ideal role, heads the list of featured players, which includes Kathryn Williams, Nona Deary and Billy Dove.

With such a story, cast and added novelty of a picture entirely in color, it is safe to predict that few will miss seeing "Wanderer of the Wasteland" coming to the Empress Theatre next Friday and Saturday, Sept. 12 and 13. Prices 50 and 25.

There is a Limit
 Jowler: "Bracelets are all the style this year. If you like them all—take them. You can't wear too many this season."
 Fair Shopper: "Well, I don't want my arms to look like curtain poles."

TIME TO STICK
 (An editorial in "Better Fruit," August 24, 1924)

We wonder if it is necessary at this time to point out to owners of fruit ranches that this is not a good time to sell out. It often happens that ranchers pass through a period of depression and low prices only to get out of the game when the tide turns in their favour. Often it is the prospect of being able to get away from the burden of debt that influences them to sell too early. It is against this mistake, regardless of what causes it, that we would sound warning.

There may be those who are justified in selling this fall or winter but for the most of those owning fruit ranches and farms this will not be the case. The swings through periods of low prices and good prices, through depression and prosperity, are of considerable duration. Now that the swing in the agricultural world has started upward it is quite certain to continue for some time. Do not lose sight of this fact.

This is a good time to buy a ranch. As a general proposition this is the wrong time to sell. It is a safe bet that the owner who sticks on the job faithfully for another year will be much better off than the one who sells now in hope of doing better in some other place of industry.

Graphite Is Best For Tubes
 Graphite is much better than soapstone for coating inner tubes for tires. A coating of graphite prevents "blooming" eliminates friction between tube and casing, and practically doubles the life of the tube. Graphite cannot be destroyed or worn out and, unlike soapstone, it does not change under the heat and wear of a tire in service.

The Bride's Alibi
 Hubby: "Your sponge cake is fine, dear, but—"
 Mrs. Newlywed (crying): "It was the druggist's fault. He didn't give me the right kind of sponges."

The Irishman's Dog
 "Hullo, Pat, I hear that your dog is dead?"
 "It is."
 "Was it a lap dog?"
 "Yes it would lap up anything."
 "What did it die of?"
 "It died of a Tuesday."
 "I mean how did it die?"
 "It died on its back."
 "No, no, I mean how did it meet its death?"
 "It didn't meet its death; its death overtook it."
 "I want to know what was the complaint?"
 "No complaint; everyone for miles around seemed satisfied."
 "I wish to know how did it occur?"
 "The dog was no cur; he was a thorough-bred animal."
 "Tell me, what disease did the dog die of?"
 "He went to fight a circular saw."
 "What was the result?"
 "The dog only lasted one round."

TRAP SHOOTERS IN ASSOCIATION
 New Organization Formed to Cover Southern Interior

Kelowna Courier in its last issue gives an account of an interesting trap shoot meet held at Glenmore Gun Club on Labor Day, which is described as one of the largest, if not the very largest of its kind ever pulled off in this province. No less than 135 guns contested the various events, there being present well known shots from Vancouver, Summerland, Penticton, Vernon, Revelstoke, Lumby, Armstrong, Midway and Enderby, in addition to those from Kelowna and district. Shooting was carried on almost continuously from 9 a.m. until 7 p.m.

This successful meet resulted in the organization of the Interior Trap Shooters' Association, to take in main C. P. R. line points, Kamloops to Revelstoke, the Okanagan, Similkameen, Nicola and the Kootenays. Geo. Dobe, Vernon, was elected president, W. H. Sturdee, Revelstoke, vice-president, Wm. Harvey, Kelowna, secretary.

THE IRISHMAN'S DOG

"Hullo, Pat, I hear that your dog is dead?"
 "It is."
 "Was it a lap dog?"
 "Yes it would lap up anything."
 "What did it die of?"
 "It died of a Tuesday."

Local Happenings

Don't forget Thursday Sept. 25th G. W. V. A. Concert and Dance. 6-7

Mr. and Mrs. G. H. V. Bulyea, Peachland, are visiting Dr. and Mrs. Lipsett.

Leigh Salter left on Monday for Vancouver to continue his school studies.

Basil Wright left on Monday's train for Victoria, where he will again attend school.

During his absence Mr. G. W. Cope will conduct the services in St. Stephen's church.

Mr. and Mrs. Geo. Johnson left on Sunday for the Coast, where they will spend their vacation.

Mr. A. G. Nivin of Toronto came in last night and is a guest at the home of Mr. and Mrs. H. S. Lewes.

Miss Mifanwy Wright went up to Vernon on Tuesday morning to resume her studies at St. Michael's girls' school.

Mr. and Mrs. L. G. Harding went down to the Coast last week where they are attending the provincial fair at New Westminster.

Noel Wright expects to leave on Friday for Illinois, where he will enter the Illinois University for a course in electrical engineering.

Mrs. J. H. Baldwin and little son Alan returned to the Coast last Saturday, after spending the past three weeks with her parents, Mr. and Mrs. Wm. Harvey.

Miss Annie Robson came in from Vancouver the first of September to spend several weeks with Mr. and Mrs. Walter R. Powell, Prairie Valley.

Neil Craig returned last weekend from New Westminster, where he had gone to be present at the marriage of his sister, and to spend the remainder of his holidays at his home there.

Miss Gertrude Arkell has gone down to Penticton, where she will be employed with B. Robinson, agriculture instructor.

Blanchard Munn left yesterday for Vancouver, where he will visit for a couple of weeks. From there he will go east to continue his studies at McGill University, Montreal.

Mrs. Rose Henderson spoke at the regular meeting of the St. Andrew's Y. P. S. on Monday, her subject being "The Duty of Young Canadians." The address was much appreciated by those in attendance.

Immediately after participating in the stock judging contest at the provincial fair, New Westminster, Miss Helen White will leave for Everett, Washington, where she will visit relatives and probably take a fourth year in high school.

J. Tait left today by motor to judge at the fall fairs at Falkland, Enderby and Salmon Arm. He was accompanied by Mrs. Tait. The Falkland fair is held tomorrow, that at Enderby on Saturday and the Salmon Arm fair on Tuesday, Wednesday and Thursday.

Beta-Pi Fraternity of Rover Scouts hold an informal dance in the G. W. V. A. hall on Tuesday night, when over eighty guests were present. The hall was decorated with streamers and evergreens, music being provided by Misses Ida Shields and Thelma Lockwood, and Messrs. J. Kenn, A. Harris and H. Daniel.

Kenneth Walden left on Tuesday morning for Grand Prairie, in the Peace River district of Northern Alberta, having received information by wire that his application for a position on the school staff there had been accepted.

Mrs. A. R. Gayton and little child are guests at the home of her parents, Mr. and Mrs. Wm. Ritchie. Mr. Gayton is attending the provincial fair at New Westminster, in his official capacity as assistant superintendent of the Oliver experimental station.

Mr. and Mrs. E. R. Butler and family returned on Friday from Rossland, where they had been visiting Mrs. Butler's parents, Mr. and Mrs. J. C. Robson. While away Mr. Butler made several tours, visiting among other centres, Trail, Nelson and Spokane. He saw considerable evidence of drought and after looking into general conditions, Mr. Butler comes back feeling that Summerland is as well off as any with the exception perhaps of such centres as Trail and Kimberley, where there are heavy weekly payrolls.

Mrs. J. Tait and little daughter, Irene, returned last week from a visit with relatives in Victoria.

Allen Harris is leaving tomorrow for Urbana, Illinois, to resume his work at the university there.

Rev. J. S. Pirie of Kelowna passed through Summerland on Monday on a vacation visit to the Coast.

Mrs. Pineo Young left by the noon train on Monday for a month's visit to the Coast.

George Dewar has gone to Princeton where he will be employed for a time.

Miss Agnes Kinney left on Friday for the Coast, after a visit of about two months with Mrs. K. S. Hogg.

Seasons opening Concert and dance G. W. V. A. Hall, Sept. 25th. 6-7

Miss Alma Fetterley and Miss Beulah McIntyre of Chilliwack, are spending a few days in Summerland, guests of Mrs. Bender.

Miss Muriel Davidson, having been appointed a teacher of the school at Hilda, Alta., left on Wednesday morning for the prairie province.

The new cannery at Oliver shipped its first carload of canned tomatoes on Tuesday. The cannery employs about twenty citizens.

Arrangements are being made whereby Mr. and Mrs. Carroll Aikins will give one performance of three of their one act plays in The Little Theatre, Vancouver.

David Thompson, who has spent the summer months in the employ of the local Experimental station, left on Sunday to resume his studies at U. B. C.

Robt. Aitken, secretary-treasurer of the Salmon Arm Farmer's Exchange was the guest recently for a few days of Mr. and Mrs. Wm. McMillan.

Colin Chisholm and Alvin Wilson left on Monday to motor to Vancouver, where Colin will write his supplemental examination for Matriculation.

The marriage took place at the home of the Rev. F. A. Baker, pastor of Mt. Pleasant Baptist Church, Vancouver, on Sept. 8 of Mr. Noel Hutchinson of Calgary (late of Summerland) to Miss Christine E. MacLean of Vancouver.

A wind storm which struck the Spokane Valley last weekend caused damage to the apple crop there to the extent of twenty-five per cent of the crop. Official estimates prior to the wind placed the crop at only 751 cars.

Rev. H. J. Armitage returned on Tuesday from Wenatchee, where he had gone to meet some friends, who were in that city attending the Columbia River conference of the Methodist church, covering the eastern half of the state of Washington, including Spokane.

Miss Murray and Miss Edith Murray came in from Vancouver on Monday to spend their holidays here, guests of Mrs. McLaughlin. This week they, with Mrs. McLaughlin and Miss Maud McLaughlin are camping in Miss Ruth Dale's cottage at Crescent Beach.

Mrs. Kollough, of Winnipeg, accompanied by Miss Van Allen, of Morrisburg, Ont., arrived on Saturday night's boat and are guests of the former's sister, Mrs. S. J. Conway. After a stay here they plan to go south to Portland.

G. G. McGeor, K. C., has again been retained by the provincial government as counsel in the presentation of British Columbia's case to the board of railway commissioners at the hearings in Montreal, which begin next Wednesday. Mr. McGeor will also carry a brief for the organized fruit growers of the Interior. Premier Oliver will also attend the hearings.

Rev. H. A. Solly left on Sunday for New York and Ontario points. Accompanied by Mrs. Solly and Nicolas, they motored to Slemmons on Sunday afternoon in time to catch the eastbound train to Lake Louise, from which point he took the fast train east. Mrs. Solly and Nicolas remained at Slemmons over night and returned home Monday morning. Going directly to New York, Mr. Solly will spend a few days there and later return to London, Ont., as a delegate to the general Synod which meets there on the 24th instant. Mr. Solly expects to be away about five weeks.

Mud on the shore road at the site of the old slide north of Crescent Beach caused motorists considerable inconvenience during the last week. Some cars were stuck on Monday and only got through with difficulty.

J. W. S. Logie gave an address before the Penticton Women's Institute Tuesday night on the subject of Arts and Crafts. He took with him two boxes of Summerland pottery which he used in demonstrating.

Mrs. J. Dunsdon enjoyed a brief visit last week by her father, Alderman John Harvey of Victoria. Mr. Harvey was a delegate from the capital city to the annual convention of the Union of B. C. Municipalities at Penticton and went up to Garnett Valley after the convention.

Applications are being invited through an advertisement in these columns for applications for the position of municipal assessor. Council has decided to adopt the 1924 roll revised for assessment purposes, so that the work for the assessor will be comparatively light. A fee of \$125. has been fixed by the council.

Mrs. Rose Henderson, who has been staying in Summerland for several weeks, went up to Vernon yesterday morning to speak that evening. She is returning tonight and will give an address before the Women's Institute of Peachland on Friday afternoon. She will leave this weekend for the Coast.

A. E. Richards of the Experimental Station left on Wednesday morning for a final tour of the B. C. Illustration stations under his supervision, before he returns to resume his studies at Wisconsin University, Madison, Wis. Mr. Richards will this year take up post graduate work at the university.

Mrs. D. Taylor of Garnett Valley, has had visiting recently her mother, Mrs. E. Forsyth and her sister, Mrs. Beattie, both of Vancouver. Mrs. Taylor's brother, David Forsyth, of Merritt and his wife, brought the visitors over by motor from the Nicola city. After leaving here they plan to visit other Okanagan centres and Kamloops before returning to the Coast.

GIVES LECTURE ON RUSSIA

Mrs. Rose Henderson gave a lecture last Thursday evening in the Rialto Theatre on "The Significance of the Russian Revolution." She described conditions before the revolution telling of the lack of education and how the country was in control of the feudal aristocracy. The speaker said there was a great advancement being made in education and the country progressing economically.

The speaker spent about three months in Russia last winter and while there attended the Moscow exhibition, which she described as a marvellous affair of great educational value to the agriculturists. Representatives from every county in the country were conveyed to the exhibition at the expense of the government and were given as much information as possible to spread among their neighbors. The children's pavilion, another source of surprise to Mrs. Henderson, and of much value educationally, was also described by the lecturer.

SUMMERLAND WEATHER REPORT

Below is a report furnished by the Dominion Experimental Station here for the week ending Tuesday:

Table with columns: Date, Max., Min., Rain, Snow, Sun. Rows for Sept. 3-8.

Loss and Gain

Do men lose nothing but money. Is not modesty to be lost? Is not docency to be lost? Or may he who loses these suffer no damage? You, indeed, perhaps no longer think anything of this sort of damage. But there was once a time when you accounted this to be the only damage and hurt; when you were anxiously afraid lest anyone should shake your regard from these discourses and actions. See! it is not shaken by another, but by yourself. Fight against yourself. Recover yourself to docency, to modesty, to freedom. —Epictetus.

MURINE FOR YOUR EYES. Wholesome Cleansing Refreshing

ITALIAN FINED IN ASSULT CASE

Carlo Cavini, an Italian, in police court this morning was fined ten dollars and costs upon conviction of a charge of assault laid against him by Robert Shannon. A dispute arose on Monday night concerning some fluming which Shannon had purchased from the municipality, and which he charged Cavini with taking. This Cavini admitted but when, asked to pay for it the Italian refused to pay the amount asked by Shannon, who, unwilling to accept the amount offered, declared he would collect. The charge laid by Shannon and brought to court was that Cavini had struck him over the head and Magistrate White, after hearing evidence, pronounced him guilty of the charge. It is understood that Cavini will be brought up on the charge of stealing unless possibly in the meantime he pays Shannon's claim.

KOOTENAY COMPANY ENLARGING PLANT

West Kootenay Power company's plant, which supplies the Okanagan as far north as Kelowna with electrical energy, is being enlarged by 120 h.p. Ultimately it will have 500h.p. Much of this energy will be utilized by the Trail smelter and the mines of southern British Columbia. It is said that no other hydro-electric plant of the world will be able to supply electrical energy at as low cost as can the West Kootenay Power Company.

A Methodist negro exhorter shouted, "Come on up 'n' jine de army of de Lord." "Pse, done jined," replied one of the congregation. "Whar'd you jine?" asked the exhorter. "In de Baptis' church." "Why, ehle," said the exhorter.

COURT ACTION WITHDRAWN BY SOLICITOR

(Continued from Page 1) them, in view of the laxness of enforcement of the law in the past and their lack of knowledge that prosecution would follow. I therefore ask permission to withdraw the charges but as counsel for the informant wish to say that in future growers who take the law into their own hands in the matter of water will be prosecuted, as the practice must be stopped, if equality and justice are to prevail in the use and distribution of water.

Magistrate White said that all knew that there had been more or less interference with the system and also of the stress of circumstances this year. He had to take these into account but the circumstances did not justify anyone taking the law into his own hands. He quoted from the Act, showing that a person in any way interfering with the irrigation system or diverting any of the water therein was liable to a fine up to \$250 and costs or imprisonment up to one year. Condemning the lack of enforcement of the law in the past, the court said that such action as was now before him should have been started at the beginning of the season. He granted the request of the counsel for the municipality to withdraw the charges.

C. J. Amm was granted permission to speak and stated that he resented the inference of guilt in Mr. Kelley's statement. He was not guilty and asked that the statement of guilt made by Mr. Kelley be deleted.

Mr. Kelley replied to the effect that the charges were not being withdrawn because of any weakness or fear that conviction could not be secured and he was quite ready to proceed to establish guilt. He fully realized the responsibility of his action as counsel but his purpose was that the men charged might not have the stigma of violating the law, as they did not know the officers of the law were on their tracks and similar offences had not been punished before. The expression of guilt in his statement was his personal conviction, and as far as he was concerned as counsel for the municipality, any further tampering with the water system would result in prosecution.

Mr. Amm explained that on a Sunday morning he found the ground around a number of his trees flooded with water and the water being there, he thought best to use it, as too, to leave it standing might result in water core. Investigation showed that the water was being diverted by a dam in the creek, but he had nothing whatever to do with placing it there. He got a shovel and led the water along his lot. He had been promised that water would be given him from the creek but after waiting some time was told that he could not have it. He did not consider himself guilty of the charge.

A SIMPLE LUNCHEON

One runs out of ideas for a simple, nourishing, tasty luncheon, especially for a fish day or for warm weather. Hereunder is a suggestion with recipes which have been carefully prepared.

Cream of Green Pea Soup
1 1/2 cupsful Borden's St. Charles Milk
2 1/2 cupsful cold water; 1 teaspoonful sugar; 1/2 teaspoonful scraped onion; 2 tablespoonfuls butter or butter substitute; 1 1/2 tablespoonfuls flour; 1 teaspoonful salt; 1/2 teaspoonful pepper; 2 cupsful canned or cooked fresh peas.

Add the peas, sugar and onion to the cold water and simmer for twenty minutes. Then rub through a sieve; add the evaporated milk, reheat and thicken with the flour blended with the butter and the seasonings.

Steamed Salmon with White Sauce
1 whole salmon, about 2 pounds;
2 hard cooked eggs; Parsley.

Once the recipe for white sauce. Wipe off the salmon with a damp cloth; lay it on a well oiled plate, dust lightly with salt and pepper, and steam for thirty minutes. Then carefully remove the skin, transfer the fish to the centre of a medium sized platter, surround with the white sauce and garnish with the egg cut in sixths, and the parsley.

Custard Pie
1/2 cupful Borden's St. Charles Milk; 1 1/2 cupsful water; 3 eggs; 4 1/2 tablespoonfuls sugar; 1/2 teaspoonful salt; Few drops nutmeg extract; Grated nutmeg; Pastry.

Lino a deep pie plate with the pastry. Beat together the eggs, sugar and nutmeg extract, then pour in the evaporated milk and water. Mix well, pour into the lined plate, grate over a little nutmeg. Bake in a quick oven at first to set the rim,

EARLIER APPLES OF DESSERT QUALITY

When early apples as good in quality as the McIntosh, Fameuse and Northern Spy and as attractive in appearance can be obtained on the general markets in Canada there should be a great increase in their consumption. The people are keen for apples when the seasons opens in late July or early August, but the sour varieties then offered for sale, such as Yellow Transparent, Red Astrachan, Crimson Beauty and Duchess, do not agreeably satisfy the palate nor tend to increase the demand for apples as a table fruit. There is no good reason why we should not have early apples of as good quality as the later Spy and McIntosh. The old Early Harvest apple was better in quality than any of the mentioned early kinds; but it is not very hardy, scabs badly, and is little planted. But new varieties are being bred for the early market, and it is believed that in a few years such fine sorts as the Melba, a seedling of the McIntosh, originated in the Horticultural Division, Experimental Farm, Ottawa, of fine color and high dessert quality, ripening before Duchess, and the Early McIntosh, originated at the New York Experimental Station, Geneva, N. Y., and others will become very popular and in great demand. Trees of Melba will be available from nurserymen in the spring of 1925, and a considerable number of trees have been planted already in different parts of Canada.

Talks on Honey

From the Naramata Apiaries
"Are you sure there's no glucose in this honey?"

I am frequently asked this question. I'll answer: There is not, either in my honey or in any other honey sold in this country, and probably not in the United States.

Honey adulteration will put the offender right up against the Federal Government, and even if it did not, it doesn't pay. There is much poor honey sold, but very little that is adulterated.

"But," I am answered, "I understand that some beekeepers feed their bees glucose and the bees make honey out of it." Wrong. Beekeepers could feed glucose and get a honey substitute, but it would injure the bees, for bees eat much of what they gather. In early springtime beekeepers frequently have to feed their colonies to prevent starvation. For this purpose only the best grade of beet or cane sugar is used. And the bees have eaten that all long before real honey comes. Substitutes such as glucose, sorghum, and the syrup from sugar factories have been tried as winter bee food during war times, but the results were always unsatisfactory or disastrous.

A few years ago, at the Colorado Agricultural College, Dr. Gillette experimented with sugar feeding to produce honey. The results showed that he had to feed nearly three pounds of pure sugar to produce one pound of honey product. The latter was water clear, and tasted like just what it was — sugar syrup. Anybody could distinguish that it was not honey.

CANNOT BAN ADS.

One of the most important discussions of public interest engaging the attention of the Canadian Daily News paper Publishers at their recent convention at Vancouver was that of Provincial Legislation affecting advertising.

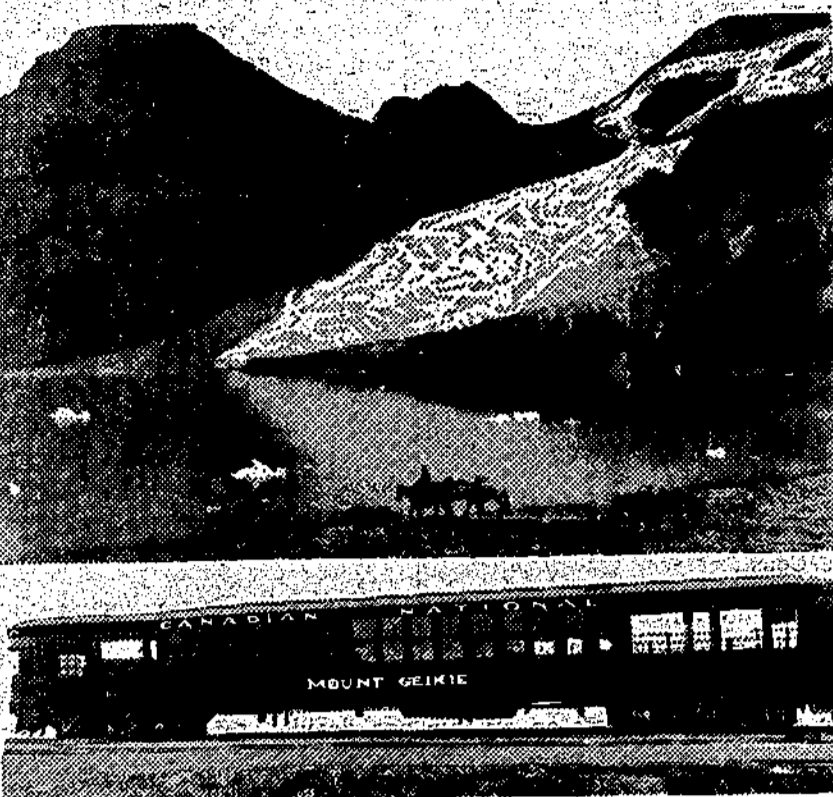

In British Columbia there is restrictive legislation against dentist and liquor people advertising. In Alberta the legislature was heading in that direction when the publishers took action and discovered that such legislation was ultra vires any provincial legislature.

Leading counsel from various parts of Canada were consulted and all were unanimous that the provinces have no power to legislate affecting the freedom of the press.

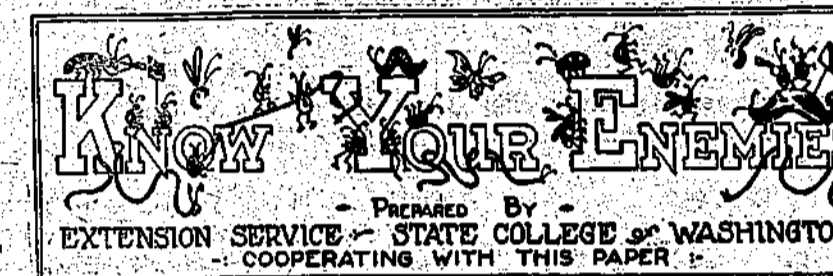

As a result notice is being served on the various attorney generals that they must keep their hands off what may and what may not be published in the press. In discussing the matter the publishers pointed out that if this tendency were allowed to continue various kinds of cranks would be nagging, occasionally with success, to prohibit people from giving publicity to their views, instead of leaving public opinion to come to its own conclusion according to the arguments of all sides as discussed freely and without handicap in the press and various other advertising mediums.—Grand Forks Gazette.

decrease the heat afterwards, as egg and milk combination need to be cooked at low temperature.

Aphids
Plant life or aphids are common upon many of our garden plants each season. These little lice are small, green, yellowish green or sometimes blackish in color, and are found usually on the underside of leaves.

These aphids are remarkable in several ways. For instance, eggs laid in the autumn hatch in the spring about the time when vegetation re-awakens. From these winter eggs is produced a generation of females, usually wingless which reproduce with the intervention of males, some of them giving birth to living young. The adult aphids of this generation are termed stem-mothers. The young insects of the stem-mothers may be winged or wingless and will produce more aphids making a succession of generations until the approach of autumn.

Aphids are common on the garden peas, beans, kale, cabbage, roses, and many other plants. Their numbers fluctuate from season to season, varying with how hard we fight these

enemies of our garden produce. However there is a little fellow in the garden ever on the watch which helps us rid the premises of the aphids, and that is the lady bug.

Ladybugs do not eat vegetation, but do eat aphids.

These enemies—the aphids—feed upon sap which is sucked up through a beak pushed down into the tissues of the plant. You can tell when aphids are present by a curled leaf and distorted condition of the leaves in most cases. When there are many of them on the plant, they drain the life from it.

To control these enemies, spray with Black Leaf 40, the nicotine spray, one-half pint to 50 gallons of water, (or one-teaspoonful to one gallon; or two-tablespoonfuls to 12 1/2 gallons). Care should be taken to spray on the under side of leaves. Black Leaf 40 is made much more effective by adding about two pounds of soap to 50 gallons of diluted spray, or about one pound of lime. Use one ounce of soap to one gallon for small quantities.

Fully describe the article, the locality in which you think you lost it, and the approximate time. State if you will give a reward, and give your phone number and address.

Then watch the Want Ads to see if anyone has advertised the finding of the article. Usually, when something of value is found, the finder advertises it; so in those two ways your chances to recover your loss are good.

Chautauqua Program Was Greatly Enjoyed

Brought Much in Instruction
Music and Other
Entertainment.

UNITED SERVICE
SUNDAY NIGHT

Local Committee Has Small
Deficit to Meet—The
1925 Contract.

Four splendid lectures, an excellent play, lots of music and other entertainment made up the three day program of the Chautauqua which closed here on Monday night.

Spreading over the weekend advantage was taken of the presence of Dr. Geo. H. Bradford, Chancellor of the University of Oklahoma, who generously consented to give a public address on Sunday night, which was greatly appreciated by a good-sized audience. He used the life and service of Livingstone as his theme.

Members of the various choirs (conducted by T. G. Beavis) led the music with Mrs. D. L. Sutherland at the piano. A vocal solo was beautifully rendered by Mr. Ben Newton, and was much appreciated.

On the first afternoon J. H. Rivers, M.D., for twelve years warden of the provincial jail at Lethbridge, Alta., gave an excellent address on the subject of "Where Does Life Lead?" First comparing the treatment meted out to prisoners everywhere until within the past few years and telling of how the change was brought about through the activities of that great Englishman, John Howard, Dr. Rivers spoke of the introduction of more humane methods of treatment into Canadian prisons, which began with the establishment of a prison farm in Ontario. Now all the provinces give attention to the physical and moral health of the prisoners.

The speaker's address was largely based on his personal experience as warden of the Lethbridge institution, when he succeeded in persuading the province to establish a farm and where prisoners, as much as is advisable, are placed on their honor. Many very interesting incidents were cited, showing the advantages to be gained in trying to develop the better qualities in the nature of even the alleged desperate criminal. Apparently, no small number of those who entered the Alberta jail during Dr. Rivers' wardenship were led to see the folly of their ways and are now respected and honored citizens.

Friday evening the Clarke-Brown players presented "The Mollusc," Hubert Henry Davies' sparkling comedy with an English plot, greatly to the delight of a large audience. The playing of every member of the cast was excellent. Many would have paid at least half the price of the season ticket for this number alone.

The clever work of Robert S. Herrick, assisted by Miss Lee, was much enjoyed both in the afternoon and evening programs of Saturday. Perhaps Mr. Herrick's cleverest work was in his original impersonations of some of the world's most famous vocalists.

The impersonations given by Roseth Knapp Bred during the afternoon performance were also particularly good.

"This Way Up" was the subject of a very able and inspiring address given by Chancellor Bradford on Saturday evening. Dr. Bradford dealt in a very scholarly way with social, economic and international problems of the present day, particularly the post-war developments and clearly laid upon the individual the duty and responsibility of bringing about the much desired better relations between individuals and nations.

The bright, clean entertainment given by "The Australians" as prelude to both afternoon and evening lectures on Monday were an enjoyable feature as any of the program. Haines is a clever violinist and the baritone voice of Alan Murray was greatly enjoyed. Miss Dolly Stewart proved to be an excellent entertainer. The Australian national anthem, written and composed by (Continued on Page 6)

MUCH LAND READY AWAITING BUYERS

Thirty-four hundred acres of land yet unsold and unoccupied and upon which water could be turned at once are now available for settlement in the Oliver district, according to a published statement made by Premier Oliver, who, with Hon. T. D. Pattullo, Minister of Lands, visited the southern Okanagan land project last week. The premier considered this matter a serious one and said that something must be done to place settlers upon this land.

OLD-TIMERS TO HOLD SOCIAL

Plan Organization of Earlier
Settlers to Record
History.

At a meeting held in the Stark Supply store last Thursday evening preliminary arrangements were made for the organizing of an old timers' club. A social evening will be held in the Empire Hall early in November, when a supper, musical program and speeches will be given and organization consummated.

To be eligible for membership one must have been a resident of Summerland for fifteen years, an exception being in the case of an old timer's wife, who had been resident here for a shorter time.

At the meeting last Thursday the following committees were named: reception committee, Messrs. Stark, Brown and Steven; supper committee, Messrs. English and Anderson; entertainment committee, T. P. Thornber and J. W. S. Logie. Each of these committees has power to add to its members.

A purpose of the organization is to preserve the early historical data of the community.

Two registers have been opened, one in charge of A. Stark and the other of J. W. S. Logie.

The three Chinamen who have been operating the English lot of ten acres at Trout Creek Point, are selling their onion crop to the Co-operative with the exception of a few tons which they had previously sold to Walters, Limited. They have about five acres planted to onions and will probably have fifteen tons to go to the co-operative. They have also grown a good many potatoes and cabbages.

SHORT CIRCUIT CAUSED BLAZE

That it is advisable for automobile drivers to occasionally examine the electrical wiring of their cars was demonstrated yesterday morning. Mrs. M. G. Wilson was returning to Peach Orchard after having brought Mr. Wilson in to his office and was in front of the storage building when a blaze burst out beneath the floor board of her automobile. Mulr Stewart was close by and with the aid of a fire extinguisher saved the car from any great damage.

The wearing off of the covering of a wire near the battery is said to have been the cause of the blaze.

PLAN TO RE-OPEN NIGHT SCHOOL

Night school will be resumed shortly, according to present plans of the school board. The matter came up for discussion at the last meeting of the trustees. It is proposed that a commercial course be given and also that instruction be given in pottery, basketry, woodwork and metal working.

SHIPPING PEACHES IN BUSHEL BASKETS

Peaches in bushel baskets were a recent novelty on wholesale row in Vancouver. They were a first shipment of Utah peaches and arrived in good condition. Each basket contained approximately fifty pounds of fruit.

DIGGING FOR WATER ON PARADISE FLAT

Digging was started today for the purpose of trying to locate a subterranean stream of sufficient volume to supply the domestic water needs of Paradise Flat.

At the last meeting of the municipal council the probability of tapping such a stream at a satisfactory elevation above the flat was discussed and referred to the water committee with the request that it make an investigation. Coun. Johnston, chairman of the water committee, accompanied by Walter Wright, who has had some success in locating water by the use of the willow, went over the ground a few days ago and Mr. Wright states that there was marked evidence of water near the Mountford residence and that this was followed up the side of the mountain. There it seems to be running in several veins. By digging, Coun. Johnston hopes to strike a fair sized stream.

If the municipality is so fortunate as to find water in sufficient volume it will do away with the necessity of pumping water every winter which has been a considerable annual expense.

WANT MORE NOTICE FROM TEACHERS

B. C. School Trustees' Association, in annual convention last week at Kamloops, decided by resolution to ask that section two of the Public School Act be amended, so that all teachers desiring to resign shall resign on or before June 30th or November 30th.

VERNON AIDED BY PROVINCE

Vernon irrigation district is receiving financial assistance from the province in the improvement of its water system. It is reported that Dr. McDonald, M.L.A., member for Vernon, obtained for this purpose a cheque from the province for \$25,000.

Last week, while the premier and Minister of Lands were in Penticton, a deputation from the council of that municipality interviewed them, requesting that government assistance by way of a loan be granted that municipality for the purpose of increasing the irrigation water storage facilities. While no definite answer was given by the ministers, they promised to give the request consideration and notify the authorities of their decision at an early date.

Dudley Dawson, manager of the Vancouver branch of the Dominion Bank and supervisor of branches of that institution throughout the province, has been transferred to the management of the Toronto branch and will leave Vancouver towards the end of October.

COURT GRANTS INJUNCTION TO TOMATO ASSOC.

Occidental Fruit Company Ltd.
Is Defendant In Supreme
Court

Following lengthy argument in Supreme Court Chambers last week, Mr. Justice Morrison granted an injunction applied for by the B. C. Tomato Growers Association against the Occidental Fruit Company Ltd., whereby the latter are enjoined not to purchase tomatoes from other than members of the association, as per an agreement alleged to have been entered into by the parties.

This agreement is based upon the amount of acreage planted in tomatoes by the members of the association, their allegation being that the defendant company, instead of asking them to devote additional land to the growing of produce for their canneries, purchased tomatoes from other sources.

The court demurred for some time, on the grounds that an injunction until the hearing of the action in November might have the effect of paralyzing an industry, but on being assured that such was not the case, made the necessary order.

NARAMATA TO GET ITS WHARF

Much Needed Improvement to
Government Dock
Promised.

Captain Doncaster of Nelson, Federal engineer for the district was in town on Tuesday and discussed wharf matters with the president and several members of the board of trade, Capt. Roe and Mr. M. G. Wilson of Summerland also being present. At the close, Captain Doncaster said that certain misapprehensions had been cleared away in the discussion, and he was satisfied that the extension asked for by the board of trade was necessary. He would immediately send in his recommendation that seventy feet be added to the length of the wharf, and a graded landing stage provided for the ferry service. He also arranged for some improvements to the existing wharf building which will be made at once.

A meeting of the Liberal-Conservative Association was held on Tuesday evening for the purpose of ap- (Continued on Page 6)

WAS RESIDENT HERE FOR TIME

News was received here on Tuesday of the death of Joseph Darke on Sunday at New Westminster. For about two years Mr. Darke was a resident of Prairie Valley and left here about four years ago for New Westminster, where he had previously resided after coming west from Medicine Hat many years ago. He was a native of Sarnia, Ontario, and was seventy years of age, the eldest of a large family. He is survived by two sons and two daughters. Two brothers and a sister reside here, S. R. Darke, J. A. Darke and Mrs. Geo. Graham. Dr. Harry Darke of Mt. Vernon, Wash., is another brother. Another sister, Mrs. McCullough, resides in Winnipeg, and another, Mrs. Luno in Toronto.

FRUIT FIRMS UNDER QUERY

Sixteen Western Produce Companies Being Probed Under
Combines Act

The names of sixteen prominent produce companies in Western Canada, including the United Grain Growers Limited, have been added to the list of companies being investigated under the Combines Investigation Act, according to an announcement in last week's issue of the Canada Gazette.

Lewis Duncan, barrister, of Toronto, has been appointed to carry on the investigations.

The inquiry has been extended to include the following firms: Plunkett and Savage, Plunkett, Savage and Sutherland, Limited; P. Burns and Company; T. J. Styles and Company; Vernon Fruit Company; McDonald Consolidated, Victoria; Scott Fruit Company, Brandon; Western Grocers Limited; Grant, Mowat and Trever; Laid Brothers; Northern Fruit and Produce Company; Scott Fruit Company; United Grain Growers Limited; Vipond Fruit Company; Gross and Rowell and the Rowell Fruit Company.

That apples are being retailed in Winnipeg at a price four times that paid the growers is a statement which comes from that city. Barreled apples which are bringing eight dollars a barrel, have been found to contain notes from the grower, stating that he received two dollars and asking that the purchaser write and tell him what he paid.

In the meantime apples from the United States pay duty and more freight and yet sell for 20 per cent less on the prairie. These facts interest the public in the province of the Federal investigation now being had on the prairie, to determine why the situation favors U.S. products and who gets the difference between what the grower is paid and what the consumer is taxed.

Manitoba retailers assert the market there for domestic fruits is dropping because of the conditions.

WINS PRIZE AT PROVINCIAL FAIR

Considering the fact that the Summerland high school team which entered for the junior stock judging at the provincial fair were at a great disadvantage, through the fact that they were not able to get a thorough training in beef cattle (as few such animals are to be found here) they made a very good showing in the competition. Each team had to judge farm horses, dairy cattle and beef cattle.

Teams from all over the province entered for this contest, first prize being taken by Grand Prairie, with a score of 716; second prize, New Westminster; 611; 3rd, Kelowna, 561; 4th, Surrey, 560; 5th, Cranbrook, 558; 6th, Salmon Arm, 554; 7th, Kamloops, 553; 8th, Summerland, 545; 9th, Rutland, 544; 10th, Langley, 519.

It is understood that the Summerland team was the only one which included girls, there being two out of the three, who were: Dorothy Garnett, Helen White and Orville Dunham.

One of the Summerland team, Helen White, also took an individual prize in the junior stock judging, taking fifth position. Her only experience with animals has been what she had in the agricultural class this being chiefly occasional visits with the class under the direction of the instructor, B. S. Robinson, to the experimental station.

That the competition in this contest was very close was shown by the fact that the winner of the third prize made 223 points, fourth, 222, and the fifth 220.

PENTICTON AGAIN TAKES DIST. PRIZE

But two districts entered district fruit exhibitions at the provincial fair held last week at New Westminster, these being Penticton and Burquitlam. The former captured the prize with a score of 840 compared with 600 for Burquitlam. Penticton has now won the gold medal seven years in succession.

Points were given for apples, pears, plums and prunes, grapes, peaches, crab apples and other plate fruits. The Penticton exhibit led in each variety. It attracted a good deal of attention through a fine exhibit of walnuts, almonds and other nuts grown in the Southern Okanagan.

A large painting showing the lake-shore and the municipal camp site of the Okanagan town added to the attractiveness of the up-country booth.

Approximately 5,200 men have gone from this province to help harvest the prairie grain crop. Of that number about 3,800 were sent from Vancouver.

The most impoverished business can be stimulated by advertising.

HIKERS MAKE GOOD TIME ON WALK TO COAST

Peachland Mother And Daughter
Given Many Lifts
On Way

Vancouver, Sept. 13.—Hastings Auto Camp is harboring two tourists who are not motorists. They are Mrs. George Jones, aged 50, and her daughter, Edith, aged 17, who have just arrived on foot from Peachland. "Just for sport," said Edith, when asked the purpose of their long hike. They were not out to set records nor test their endurance. They just thought it would be fun to take a walking trip and headed for Vancouver.

They came through the State of Washington, crossing the border at Oroville and following the motor highway through Wenatchee, the Snoqualmie Pass, Everett, Bellingham and Blaine to this city. They accepted a lift from passing cars whenever it was offered, but walked an average of 15 miles each day.

They left home on Sept. 1 and were on the road for 10 days, but made no bones of the fact that they had ridden most of the way.

They expect to leave for home on

Local Shipping Houses Make Cherry Returns

HOPKINS ACQUITTED OF MANSLAUGHTER

J. L. Hopkins, driver of the car, the accident to which resulted in the death of W. H. D. Ladner of Vernon, has been acquitted of the charge of manslaughter. The magistrate, in giving his decision, said that the evidence which the prosecution had advanced was to his mind insufficient to justify putting the accused on his trial. The charge was dismissed without calling upon the evidence for defense.

WILL CHOOSE CANDIDATES

Party Representatives Meet
This Week to Prepare for
By-election.

Definite announcement of the date on which the Federal by-election in Yale county will be held will probably be made tonight or tomorrow. It is believed that Thursday, November 6th, will be the probable date fixed. With the announcement of the election and the selection of candidates, which will be made tonight and tomorrow, the campaign will be properly launched.

Conservative delegates from all over the county will meet at Penticton to decide upon a Liberal-Conservative candidate. The names most frequently heard in this connection are those of J. M. Robinson, Naramata, Grote Stirling, Kelowna and A. T. Howe, Vernon, though others may be advanced at the meeting tonight.

Tomorrow, the Liberal delegates assemble in the same town to decide on their candidate. Mayor Sutherland of Kelowna, G. G. McGeer, K.C., F. B. Cossett, Vernon and Mr. McPherson, Grand Forks, are mentioned as possible choices.

Delegates from Summerland attending the Conservative meeting tonight are Dr. F. W. Andrew, Ned Bentley, K. M. Elliott, W. C. W. Fosbery, Bert Harvey, W. Harvey, R. C. Lipsett, H. C. Mellor, A. E. Rose, J. M. Sutherland, and J. W. Wheeler.

Liberal delegates from here to the convention tomorrow are Wm. Beattie, W. A. Caldwell, W. C. Kelley, T. J. McAlpine, J. J. Mitchell, Sr., W. Ritchie, P. S. Roe, A. H. Steven, D. C. Thompson and M. G. Wilson.

BADLY HURT IN SIMPLE ACCIDENT

As the result of a fall while getting off a truck in front of the Co-operative warehouse yesterday morning, Miss Mable Hack is in the hospital suffering slight concussion of the brain. Though making good progress she will probably remain in the hospital for two or three days yet. Miss Hack, who is one of the packing staff of the co-operative, had with a number of others, just arrived at the warehouse and in getting off the truck, must have twisted her ankle or stumbled in some way, falling and striking her head. She was immediately taken to the hospital where medical aid was given.

Sunday or Monday and to proceed by an all-Canadian route. Rather than walk the ties through the Fraser Canyon, however, they said they would probably take the train for the short distance where there is no road.

Coming down they camped one night in the open and other nights stayed at friendly farmhouses or hotels.

At Hastings Park they expected to be able to rent a tent, but when they found they could not do so they slept under the stars. Next night one of the motorists lent them a tent.

An ancient car chugged painfully up to the gate of the racetrack. The gate keeper demanding the usual fee for automobiles called, "A dollar for the car!"

The owner looked up with a pathetic smile of relief and said, "Sold."

Walters, Limited, and Occidental Send Out Cheques.

CO-OPERATIVE HAS CLOSED LOCAL POOL

Statements and Cheques to
Cover Expected Out
Tomorrow.

Statements covered by cheques in settlement for cherries, currants and gooseberries are now being prepared for mailing at the office of the Summerland Co-operative. Through the courtesy of Secretary Pollock we are able to publish this week a list of the prices, together with the pool charges. The prices given below are those realized by the Co-operative f.o.b. Summerland. From these the packing and handling charges and capital deductions will be taken.

Bings, 25 lb. lugs, \$2.71½; 4-basket crate, \$2.36½; Lamberts, 4-basket crate, \$2.36½; 16-lb. lugs, \$1.90½; Windsors, 4 basket crate, \$2.56½; Black Republican, \$1.89½; Black Tartarian, \$1.51; Royal Annes, \$1.54½; Governor Woods, Yellow Spanish, Whiteheart, etc., \$1.09½; Olivet and Morello, \$1.80½; Sours, \$1.18½.

The deductions total 57½ cents, made up as follows: local packing and handling charges, 45 cents; local reserve for capital, 2 cents; central capital reserve, 2½ cents; other central deductions, 8 cents. A further charge of one cent per package is made to growers who delivered their fruit to the upper warehouse. This is being made for cartage to the storage building.

For cherries sent to the cannery net prices to the growers, including the reserve, are: Royal Annes, 5½ cents; sours, 3½ cents; Governor Woods, Whitehearts, etc., 8 cents.

Growers will be paid for currants and gooseberries as follows: Black Currants, deep pint, \$1.65 a crate; Red Currants, \$1.31; Gooseberries, 83 cents.

It is expected that cheques will be mailed to growers tomorrow.

Occidental Fruit Company has this week settled with growers for cherries. The net prices per pound for the several varieties as furnished The Review by G. C. Benmore, manager, are given below.

Bings and Lamberts, 12 cents; Black Tartarians, 10½ cents; Big-goroux, 9 cents; Windsor, 8 1-8 cents; Royal Annes and Yellow Spanish, 7 1-5 cents.

Cheques, accompanied by statements were mailed on Tuesday to growers shipping through Walters, Limited. Below are given the net prices to growers as furnished The Review by Mr. Willis Walter.

Bings and Lamberts, \$2.64; Big-goroux, \$2.50; Black Tartarians and Republicans, \$1.76; Royal Annes, \$1.52; early soft varieties, 74 cents

Paper was first made in Canada at St. Andrews, P.Q., in 1803. In 1865 the first large mill was built, with a daily output of 1½ tons. Today a modern mill produces from 250 to 300 tons of newsprint in 24 hours.

FOURTH YEAR HIGH AT PENTICTON

Fourth year high school course will be provided at the Penticton high school this year. Guarantees by the parents of eighteen Penticton students were handed the school board last week. A fee of one hundred dollars each those eighteen will contribute enough so that there will be no additional expense to the ratepayers for the fourth year. The fourth year or Senior Matriculation admits students to the second year of university in Arts and Sciences.

An invitation was extended to Summerland students to take this fourth year course on the same basis, but none of the local students availed themselves of the offer. As far as we have learned, the opinion prevailed that the cost would be about as great as for a student attending the first year university.

The Summerland Review

Established August, 1908.

Published at Summerland, B.C., every Thursday by THE REVIEW PUBLISHING COMPANY, LIMITED
Ralph E. White, Editor and Manager

An independent family newspaper covering Peachland, Summerland and Naramata and adjacent districts.

Member of Canadian Weekly Newspapers Association.
Member of British Columbia Selected Weeklies.

Subscription Rates—In British Empire, in advance, \$2.50 per year; six months, \$1.40. To U.S.A. and other countries, \$3.00 per year.
Advertising Rate Cards and information respecting territory and samples of paper mailed upon request, or may be seen at the office of any advertising agency recognized by the Canadian Press Association.

Advertisers must have copy in by Tuesday noon in order to insure changes for standing advertisements. New display advertising copy can be accepted one day later.

All instructions for cancellation or alteration of advertising must be in writing.

Correspondence—Letters addressed to the Editor and intended for publication must be short and legibly written on one side of the paper only. The longer an article, the shorter its chance of insertion. All communications must bear the name of the writer, not necessarily for publication. The publication or rejection of articles is a matter entirely in the discretion of the Editor. No responsibility is assumed by the paper for the opinions expressed by correspondents.

Typographical Errors—In the event of a typographical error, advertising goods at less than the proper price, the newspaper will furnish letters to be posted in the store stating the correct price, but goods may not be sold at the price printed and the difference charged to the newspaper.

Thursday, September 18, 1924

MOTOR LICENCE—ROADS—GASOLINE

Premier Oliver has the right idea on the subject of revenue for motorists for highway purposes. He is quoted as saying that he believed it was almost a mistake that the government had not set a higher tax on gasoline and lowered still further the motor licence.

Unless we are mistaken, the suggestion that gasoline be taxed originated with motorists who approached the government seeking the abolition of the cumbersome and unpopular licence fee, proposing that a nominal flat charge be imposed and the difference made up by a tax on gasoline.

The premier now figures out that the tourist contributes, through the purchase of gasoline, on an average one-fifth of a cent a mile toward the upkeep of our highways. The damage he does to our roads could not be repaired for that, according to the prime minister.

We have always believed that a flat licence fee of five or not more than ten dollars should be charged and if to make this possible it is necessary to add another cent to the price of gasoline, to do so would be fairer to the average motorist and would result in a larger contribution from the tourist to the provincial fund.

OUR NATURAL RESOURCES

A very interesting map of Southern British Columbia covering from latitude 51 to the international boundary and including the Dominion Railway Belt has just been issued by the Natural Resources Intelligence Service of the Department of the Interior at Ottawa. In the Railway Belt area the disposition of land is shown; also the Timber Berths and Grazing Leases granted, while Forest Reserves, National Parks and Indian Reserves are indicated clearly.

A further striking feature of the map is the showing, by means of red colouring, of data regarding the natural resources of each locality, thus affording a bird's-eye view of the principal industries of each district.

A copy may be obtained free of charge on application to the Director, Natural Resources Intelligence Service, Department of the Interior, Ottawa.

"HIGH PACK" RESULTS IN BRUISING APPLES

There is certainly room as well as reason for the expansion of Canada's trade in apples with Great Britain, states "The Fruit Grower," an English publication, which says further, editorially:

Statistics just out show that for the season 1922-23 imports of Canadian apples amounted to 1,424,008 barrels and 332,126 boxes, and from the United States 290,427 barrels and 2,561,534 boxes. For the 1923-24 (March 31) season, there were from Canada 1,314,105 barrels and 564,332 boxes; from the United States 1,687,487 barrels and 4,321,373 boxes. Reduced to terms of barrels on the basis of three boxes to the barrel, the 1922-23 season's imports were about equal from the two countries at 1,443,000 (Canada) and 1,447,271 (United States). But in the last season, that is, to March 31, 1924, while Canada increased her supply to 1,502,399 barrels, that from the United States was more than doubled at 3,127,945 barrels. There is some satisfaction to be derived from the increasing volume of the Canadian traffic in box apples to be noted, and it is in this direction that the trade must be developed, having regard to the fact that British Columbia alone could supply one-half of the dessert apples imported into Great Britain. But to do this one of the things that must seriously be looked into is the method of box packing. It is asked "why Canada cannot meet the competition from the United States." The secret, we suggest, might be discovered in the packing. Canadian growers and shippers will have to satisfy themselves whether they are getting the best results from what is known as the "high pack." Some boxes of British Columbia apples packed at Kelowna, were opened for our inspection during a visit to the Canadian fruit section at Wembley last week and impressed us with the fact that the "high pack" is capable of giving a wide range of results, and leaves very much to be desired from the viewpoint of presentability of fruit. Let the quality and grade be ever so high, bruising as the result of the high pack, and bulge is too much in evidence, and so long as this is allowed to go on, so long will the Canadian fruit industry have to be content with second place to the United States in the British markets. Some boxes opened out for us gave 95 per cent perfect fruit; others, chiefly those of high pack, and in particular a box of Winter Banana variety, had scarcely ten percent unbruised. That British Columbia can pack properly and surmount the transportation difficulties, is made evident to the public through the exhibits at Wembley, even if they were not aware of it before. The good impression made on them by the fine exhibition fruit on view must be consolidated if the industry is to reap the full advantage of the enterprise.—Ex.

Prairie Writer Advocates Buying of B. C. Fruit

J. Alex Aiken, a prominent newspaper writer of Winnipeg, made a tour of observation through the Okanagan Valley recently. Citizens of the Okanagan will be interested in the following from an article written by Mr. Aiken after his return to the prairies:

It is an interesting fact that 25 years ago, before the big development of Western Canada had started, this Okanagan Valley was regarded as specially favored for cattle raising. Even now by way of recalling that day and lordly vocation one may see a rider well attired in the garb of the cow-puncher well mounted on the streets of Vernon. However, one never hears in this valley what is so often said on the prairies that it was a mistake to survey the land for settlers. The fertility and adaptability of the location for fruit growing has been well proven. There are years like this one when the amount of moisture is below the average, but in such a season the irrigation arrangements perform great things for all favored with the water supply. This year the reservoirs are getting low but a share of the crop of small fruit is past the danger period and there is still time for the apple crop to grow to average size. The growers are wary of a crop of small apples which means more cost for picking and packing and a smaller return.

Men who have been over the field and, who are possessed of reliable information, estimate the 1924 apple crop at 75 per cent of last year's. A 100 per cent crop of McIntosh Reds is promised, but the other varieties do not indicate so large a yield.

The Okanagan Valley producers regard the prairies as their best market, nearest home, and is the one to which they pay most careful attention. Application to business and experience has taught them how to pack and ship fruit so it will reach the consumer in prime condition. It is the fixed purpose and plan of the producers this year to reach the con-

sumer and get attention for the B.C. fruit when it is to be put on the market by the medium of the daily and weekly newspapers. Most of this advertising will be done by the Associated Growers of B.C., Limited, and consequently their brand on the box or crate will be a guarantee behind the advertisement, which is always worth something to the consumer.

The fruit growers are becoming educated up to the idea of co-operative marketing, for they have learned by experience that only by co-operation among growers and through the agency of an organization covering the prairies is it possible to serve the territory and supply the demand as it arises. Mixed cars of fruit are regularly shipped out to points all over the prairie provinces, an advantage which the U.S. shippers will not concede.

Most of the growers in the Okanagan Valley are of British stock, both English and Scotch, and anyone who has tried to line them up to any scheme or system soon learns it is no light task. There must be fair dealing as well as executive capacity, else the native independence and love of freedom will assert itself.

The competition to which British Columbia growers are exposed by U.S. growers is decidedly keen and can only be met and handled if Canadian consumers, especially those on the prairies, give the preference to B.C. fruit.

Seeing that these B.C. people buy a lot of Canadian flour and cereals, meat and dairy products of other Canadian industries, it is a fair exchange to buy excellent fruit in return. They are our own countrymen, helping to carry the national burdens and the co-operative hand in the way of fair exchange is highly commendable.

Eliminate the Non-producer

Probably the greatest hindrance to the profitable keeping of poultry on the ordinary farm is the retention of a lot of fowl that are poor layers, due either to their being too old or of a type to produce meat rather than eggs.

The production of eggs is the end of the poultry business in which the most profit can be made, so that a heavy egg producing type is the type that is best suited to ordinary farm conditions.

Generally speaking, the pullet year is the most profitable period in a hen's life. It is advisable, therefore, either to mark the chicks when hatched, using a different mark for each year, or to band the pullets when they are put into winter quarters, so that at culling time the age of the different birds may be seen at a glance and only those that are required for breeding purposes retained after the first year's production.

For the careful breeder the use of the trap-nest is the logical means to cull the flock but the ordinary farm-

er does not use trap-nests so that reliance must be placed on physical characteristics. The high producer will be found to be of an active disposition, early off the roost in the morning and late to go to roost at night and always busy. Her head will be clear cut, face smooth and free from wrinkles, with bright prominent eyes, skin soft, pliable and of fine texture and a general appearance of health and vigor.

Cull all birds that show a lack of vigor, a sluggish lazy disposition, a coarse rough head with overhanging eyebrows, an inclination to break down behind, or that show heavy deposits of internal fat, as evidenced by a thick skin and an abdomen that is hard and firm to the touch. In contrast to this the heavy layer will have skin that is fine in texture and the abdomen will be soft and pliable. This last feature is one on which great weight should be placed, but in culling reliance should be placed on a combination of features rather than on any one feature.

A HALF PAGE OF RECENTLY ARRIVED NEW COMERS TO CANADA

To fill Canada's need for domestic workers, these English lasses crossed the Atlantic on the "Metagama."

With the exception of the chaplain, the members of this little group came to Canada recently to enter domestic service. Don't rush! They're all engaged.

George Robb, of Auchtermuchty, with his wife and six children, have now located at Brantford, Sask.

You may count thirteen youngsters here. The fourteenth juvenile immigrant, however, is seated behind the matron whose excellent work has made the nursery at the Canadian Pacific, Windsor Station, Montreal, a great boon to travelling mothers.

This mother wanted her sons and daughters to grow up in a land of opportunity: She migrated to Canada therefore, from the Western Isles.

Youthful Hebridean pipers play "Piper Macdonald's Lament" as their ship passes the rugged rock they are leaving for Canada.

Miss Tremblin, King's nurse, probably found this crowd of immigrant children at St. John more entertaining than Royalty. These are Hebrideans, too.

Britain and the Continent Visited By Editors of Canadian Weeklies

Written for The Review by Hugh Savage, Editor of Cowichan Leader

It is not so many years ago since the world was thrilled by the exploit of Bleriot, the Frenchman who was first among aviators to fly across the English Channel.

Hitherto, I have simply set down where we went and briefly noted what we did and whom we met.

Europe is now covered with a network of regular air lines. When we were in Paris some genius thought of this and the thrill of flying over France, across the channel, and so to London, appealed to about fourteen of our party—ladies as well as adventurous males.

We watched the descent of a big plane which had brought over the cowboys from the Rodeo in London, and then clambered aboard.

She has a long central cabin. In the nose of it sit four passengers, in wicker chairs, ranged two and two with "aisle" between.

On either side is an engine and propeller. Beyond them spread the great wings. There is a hum of motors which gradually increases to a roar and off you go across the grass.

I am no good on heights and had never flown before, but the first sensation was nothing but pleasant.

Between mouthfuls and afterwards you think that you must not miss a minute looking through your pane of glass.

You cannot distinguish where you are, although the printed guide in your lap tells you your route crosses the Oise, the forest of Chantilly, near Clermont, over Beauvais, and on to Abbeville; then, near Etaples, to Boulogne.

The patchwork of field and wood and town gets tiring. You realize that it will be 4 p.m. before you descend, and fall to writing to pass away the time.

Now your eyes are glued to the window. You are just over the channel. Cap Gris Nez is astern. You say "Adieu" to France and her capital whose loveliness draws and holds people of all races.

It is 2.15 p.m. Twenty-five minutes later you notice old England, velloid, as often, in mist. Presently you see her white cliffs. Straining your gaze backwards you may still see France like a white line in the seeming clouds whose sea and sky blend.

To the right, is that Folkstone? No. It is Dover, with pier and almost mooring breakwaters which make you think of a St. George's Day when the vindictive, battered and glorious, came in from Zoolbrugge. Rise in

your seat, and there, to the left, is the single, crooked breakwater of Folkstone.

For a change and to escape the roar you now take to cottonwool in your ears. You gaze on the vista of coast to the west and the green of English fields. Umpety bump goes the plane. Your stomach has the sensation of going down as, sometimes, at sea. You think this must be an air pocket. On terra firma you discover that it was.

Below is a beautiful world. You sail over quiet farms. Their hop houses indicate Kent. According to regulations you must pass over Lympne, whence troops embarked for France and Belgium during the war. It is a Royal Air Force station. Now you frequently meet other planes passing in an opposite direction.

There is sunshine and you realize that there is still plenty of country not built on and that there are considerable woods below. You watch the wind waves in the green corn, the cloud shadows swiftly passing over the fields, hop gardens and chalk pits.

The farms, manor houses and villas now give place to closely packed rows of houses to the right, and at 3.50 p.m. it comes to you that that big building is the Crystal Palace. You begin to drop lower. In ten minutes you are saying farewell to your great silvery steed. A brief wait at the customs and a car whisks you to your hotel.

After Paris the London suburbs look dowdy. Suddenly you emerge on the Thames which—for all your respect for its history—looks like a dirty ditch. On, over Westminster Bridge, the Abbey may remind you that six hours before you stood in Notre Dame.

Two British Columbians flew over on this trip, the other being Mr. H. G. Parson, editor of The Star, Golden, a former M. L. A.

Ten days later at Kenley, Colonel Edwards, deputy director of civil aviation, chatted with us concerning the possibilities of commercial flying. No better account of what we saw there can here be given than that by the aviation correspondent of The Daily Telegraph, headed "Canadian Editors' Show." It is appended:—

About 170 members of the Canadian Weekly Newspapers association visited Kenley aerodrome yesterday morning, by arrangement between the Air Ministry and the Empire Press Union, and saw a display of flying, illustrative of the latest aerial tactics.

It was a Royal Air Force pageant on a small scale, but in some respects giving an even more intimate view of the junior service at work. Kenley is the headquarters of No. 6 Group, whose particular concern is the defence of London. The R. A. F. pageant is held at an aerodrome which is not yet a regular service centre: at Kenley one sees the real thing.

The officer commanding the group is Air-Commodore C. R. Samson, and he received the guests. The aerodrome is the home of No. 24 Squadron, and the band of the squadron played during the visit. About thirty-five aeroplanes took part, those including three "Siskin"—Siddoley 5, the now single-seater fighter, a type that was not represented at the R. A. F. pageant.

After the visitors had made a tour of the aerodrome buildings an exhibition of aerobatics was given by Flying-Officer Sheppard. There was a sizzle and at times rough wind, but in spite of it he went through the evolutions which are part of the training for aerial fighting.

These included looping, by which the air-fighter tries to reverse the positions of pursuer and pursued; spinning, sometimes resorted to in order to simulate loss of control through injury to pilot or his machine; rolling and upside-down flying, illustrating recovery of normal flying attitude from any conceivable situation.

The fighting air unit of three machines was demonstrated by three "Bristol" fighters of No. 24 Squadron. Big formations are made up of units of three, which are the most suitable as affording mutual protection against attacking aircraft, at the same time permitting convenient concentration for attack.

This formation was attacked by

three "Siskins," and a typical "dog-fight" ensued, the fast and nimble fighting scouts ever seeking to get to close quarters with the tail of their formidable opponents, the tail being the "blind spot."

A dummy submarine made up from scrap material lay in the centre of the field, and this was bombed by five "Snipe" single-seater fighters of No. 25 Squadron (Hawkinge), which also showed low-altitude attack as delivered against troops and shipping, the machines attacking from different directions in order to embarrass the defence.

"Crazy flying" which, despite its name and the amusement it affords, is valuable for demonstrating unconventional manoeuvres, and for increasing the pilots' mastery and confidence, an item omitted from this year's pageant, was shown by Flying-Officer Leslie Hamilton on an "Avro."

Two commercial types were present, the Handley-Page WSF three-engined type, fitted with one Rolls-Royce and two Siddeley "Puma" engines, and a DH51, an inexpensive two-seater fitted with a R. A. F. engine, and with a very good performance and low landing speed.

Nearly 100 of the visitors were able to go up in the machines before they were compelled to leave Kenley for another engagement. They were taken up in the Handley-Page, in Vicker's "Vimy" bombers, and in "Bristol" fighters. Nearly half of the air passengers were ladies.

PEACHLAND DOINGS

A Weekly Chronicle Furnished By Our Local Representative.

Members of the local L. T. L. with their leaders, Mrs. Sadler and Mrs. H. McCall, enjoyed a picnic on the Beach last week and judging from the noise and laughter they enjoyed the outing immensely.

Mr. R. J. Hogg has rented his town property to Mr. Palmer who moved in last week end.

Mr. R. J. Hogg has rented his town property to Mr. Palmer who moved in last week end.

Wedding bells again brought excitement to our little town last week. Mr. H. Williams left one day with the Rev. T. A. Sadler and they were seen to travel north by auto and many were the conjectures as to when and where it was going to take place and when the happy couple would return.

Mr. and Mrs. Bulyen left last week for a short visit with relatives in Summerland. Mr. Bulyen returned the following day to attend to home duties, Mrs. Bulyen remaining over until Tuesday.

Mrs. McKinnon and baby spent Thursday in Kelowna, returning by boat in the evening.

Mr. and Mrs. P. N. Dorland and son Hugh, left on Thursday of last week, on an auto trip to Vancouver, to be away about two weeks.

Mrs. Vicary and daughter were in town on Friday last, having come up from Summerland to attend the meeting of the Women's Institute in the afternoon. They returned by boat in the evening.

At the regular monthly meeting of the Women's Institute held in the Municipal Hall on Friday last, Mrs. Rosa Henderson of Montreal addressed the members on "Women's Citizenship." Her address was very highly spoken of, several being hard to say it was a rare treat. Mrs. Hen-

person had been judge of the juvenile court in Montreal. She was a delegate to the peace conference and her wide range of knowledge enabled her to make her address touching, interesting and instructive. Part of the business of the afternoon was the discussion of a request from the memorial committee that the Institute take over the improving and care of the memorial site. The president placed the matter before the members and after the various details were talked over a motion that the Institute take over this important work was carried unanimously. Mrs. Follett and Mrs. Elliott favored the attendance with vocal solos. The prizes won at the recent flower show and fruit exhibit were distributed. Dainty refreshments were served, and Miss Coldham officiated at the piano during this time.

Miss Murdin and Master Teddy Clements spent Saturday in Kelowna.

Mr. Powell came in from the Coast on Saturday to join his wife and family and spend a two weeks vacation with them at the home of Miss M. Smith where they have been spending the summer.

Mr. Cousins and Mr. J. Wright spent Friday in Kelowna. On his return on the evening boat Mr. Wright was accompanied by his eldest daughter, Miss Alice, who had been working in Kelowna for a few weeks.

Mrs. Baptist and Miss Helma Hohensee returned Monday evening after having spent a few days in Kelowna.

Mr. Wes. Waldriff was a passenger north on Tuesday morning for a short visit.

From a notice posted outside a church in England: "On Saturday night, at 8 p.m., the annual potato-pie supper will be held, and on Sunday morning the subject of the sermon will be 'A Night of Horror.'"

**SYNOPSIS OF
 LAND ACT AMENDMENTS**

PRE-EMPTIONS
 Vacant, unreserved, surveyed Crown lands may be pre-empted by British subjects over 18 years of age, and by aliens on declaring intention to become British subjects, conditional upon residence, occupation, and improvement for agricultural purposes.
 Full information concerning regulations regarding pre-emption is given in Bulletin No. 1, Land Series, "How to Pre-empt Land," copies of which can be obtained free of charge by addressing the Department of Lands, Victoria, B.C., or to any Government Agent.
 Records will be granted covering only land suitable for agricultural purposes, and which is not timberland, i.e., carrying over 5,000 board feet per acre west of the Coast Range and 8,000 feet per acre east of that Range.
 Applications for pre-emption are to be addressed to the Land Commissioner of the Land Recording Division, in which the land applied for is situated, and are made on printed forms, copies of which can be obtained from the Land Commissioner.
 Pre-emption must be occupied for five years and improvements made to value of \$10 per acre, including clearing and cultivating at least five acres, before a Crown Grant can be received.
 For more detailed information see the Bulletin "How to Pre-empt Land."

PURCHASE
 Applications are received for purchase of vacant and unreserved Crown lands, not being timberland, for agricultural purposes; minimum price of first-class (arable) land is \$5 per acre, and second-class (grazing) land \$2.50 per acre. Further information regarding purchase or lease of Crown lands is given in Bulletin No. 10, Land Series, "Purchase and Lease of Crown Lands."
 Mill, factory, or industrial sites on timber land, not exceeding 40 acres, may be purchased or leased, the conditions including payment of stumpage.
HOMESTEAD LEASES
 Unsurveyed areas, not exceeding 20 acres, may be leased as homestead, conditional upon a dwelling being erected in the first year, title being obtainable after residence and improvement conditions are fulfilled and land has been surveyed.
LEASES
 For grazing and industrial purposes areas not exceeding 640 acres may be leased by one person or a company.
GRAZING
 Under the Grazing Act the Province is divided into grazing districts and the range administered under a Grazing Commissioner. Annual grazing permits are issued based on numbers ranged, priority being given in established owners. Stock-owners may form associations for range management. Free, or partially free, permits are available for settlers, campers and travellers, up to ten head.

 The Winter's Tale, Scene II, Act IV

The writer of "The Common Round" in the Vancouver Province lately made a few remarks concerning Mrs. Rose Henderson's HOLY RUSSIA panegyrics on Russia, the tenour of his observations being the lamentable lack of ordinary good sense betrayed by the holding up for emulation a nation whose people are centuries behind us in civilization. He also comments in his usual quiet way, on the breadth of comprehension of conditions which might be expected from a lecturer who had spent a whole quarter of a year gathering information in a vast country of more than one hundred millions of people, and concludes that the lady certainly must have put in a busy time. Mr. Butterfield generally touches the spot in his comments on current events, and he most assuredly has not failed in this instance. Let any person estimate just how much real knowledge of any great country he or she could assimilate in the space of three months, and the absurdity of the claim to special authority to speak on the subject will at once become apparent.

The most satisfactory feature of the Summerland lectures was the exceedingly meagre attendance they drew. The plain fact is that we are absolutely sick and tired of listening to and reading the stupid laudation of everything Russian. We are as weary of that as of the daily records of the doings of American degenerates, sob-sister advocates of brutal crime, weak kneed judges and the rest of it. Canada does not need any enlightenment from Soviet Russia—she can pity the unfortunate ignorant peasantry which is being exploited by a little group of insane Communists, but she has nothing to learn from the picture except the wisdom of avoiding any approach to its reproduction here. The lady who suggested that the lecturer should give some details as to the unfavorable side of Russian conditions, made a very sensible and pertinent request, which might well have been supplemented by a query as to the source of emolument for these Russian lectures. We need not suppose the lecturer travels through Canada preaching the Soviet gospel at her own expense and it would have been quite in order to ask who is footing the bill.

The "Morning Post" (London) recently had an article on a characteristic which it says is common to most great men in these UNSTRINGING days. It claims **THE BOW** that they all read detective stories in their spare moments, and not only that, but they openly admit it! The writer goes on to say that in the old days such an admission would have been impossible; and that, although doubtless many great men did indulge in this relaxation, they did it by stealth, and blushed to find it fame. Moreover, their intimates guarded the secret like a family skeleton. Well, there are detective stories of many grades, and no one will deny that some of them are delightful in their own particular way. The basis of the whole thing is of course the absolute necessity for those men to unstring the bow, as it were, and detective stories afford a light and easy way to do it. Not all men are constituted like the famous English Chief Justice who was wont to refresh his tired brain with a problem out of Euclid. They are more prone to fly to a superficial repast, as did Thomas Carlyle, when he was prostrated by the loss of his M.S.S. of The French Revolution. To recover from that shock he spent a whole year reading what he afterwards described as arrant rubbish, including in that sweeping remark the sea stories of Captain Marryat, which was certainly rather hard on that delightful writer. The "Post" calls this tendency to devour detective stories a fashionable craze, but it might be more accurately described as a sensible slackening of the bowstring.

It was alleged of Cardinal Wolsey that his egotism was so great that he put himself above the King, and the charge was supported by EGO-TISM ad by the phrase he used **RUN MAD** "Ego et Rex meus." The Cardinal was notoriously arrogant and haughty, but in this particular incident his traducers as we know were wrong, since the Latin phrase would have been grammatically incorrect had it been reversed, and its real translation would be "My King and I notwithstanding the apparent personal arrogance in the original. I am reminded of this by

some details given in "The Outlook" of certain provisions in the last will and testament of the late Marie Corelli, who lived some years in Stratford-on-Avon and bequeathed her house to posterity for the purpose of entertaining "selected or distinguished persons" who may be visiting Stratford from time to time. The conditions attached to the bequest are curious as showing the peculiar form of egotism under which the deceased novelist laboured. One provision is that "all persons connected with the stage" shall be denied hospitality in her house, a stipulation which seems astonishing in the town which has the supreme distinction of being the birthplace of the world's greatest dramatist. Then we learn that nobody connected with Stratford shall have any part in carrying out the provisions of the will, a clause which indicates that the lady did not get on very well with her neighbours. For that matter, we know that Miss Corelli did not think a great deal of Royalty itself, and I suppose we need not wonder at her disdain for common folk.

Well, the Corelli books have interested many people in their day, and the personal peculiarities of the writer may be left out of the question. But, for sheer, undiluted egotism, we can find no parallel to these provisions—except perhaps in some of the utterances of Gabriel d'Annunzio!
 AUTOLYCUS.

**WATER NOTICE
 USE AND STORAGE**

TAKE NOTICE that R. E. Verrier and H. G. Detjen whose addresses are West Summerland, B. C. will apply for a licence to take and use 500 acre feet and to store 500 acre feet of water out of an Unnamed Meadow and creek which flows easterly and drains into Trout Creek, about 13 1/2 miles above its mouth. The storage dam will be located at the natural outlet of the meadow. The capacity of the reservoir to be created is about 600 acre feet, and it will flood about 50 acres of land. The water will be diverted from Trout Creek at our present headgates, and will be used for irrigation purpose upon the land described as lot 2887 and part of lot 2888 O. D. Y. D.

This notice was posted on the ground on the 29th day of July, 1924. A copy of this notice and an application pursuant thereto and to the "Water Act, 1914," will be filed in the office of the Water Recorder at Vernon, B. C. Objections to the application may be filed with the said Water Recorder or with the Comptroller of Water Rights, Parliament Buildings, Victoria, B. C., within thirty days after the first appearance of this notice in a local newspaper.

R. E. VERRIER, H. S. DETJEN,
 Applicants.

The date of the first publication of this notice is 18th September, 1924.

**WATER NOTICE
 STORAGE**

TAKE NOTICE that Dominion Department of Agriculture, whose address is Ottawa, will apply for licence for the storage of 300 acre feet of water out of Crescent Creek also known as Paull Creek, which flows easterly and drains into Trout Creek, about two miles below No. 1 Summerland reservoir on Trout Creek. The storage dam will be located at Crescent (or Paull) Lake. The capacity of the reservoir to be created is about 300 acre feet, and it will flood about 150 acres of land. The water will be diverted from the main stream at either the headgates of Summerland municipal system, or about 100 yds. above the Kettle Valley Railway Bridge over Trout Creek at the Dominion Experimental Station, and will be used for irrigation purpose upon the land described as Dominion Experimental Station, Part of Penticton Indian Reserve No. 1.

The licence applied for is to supplement a right to take and use water as per Licence No. 6402.

This notice was posted on the ground on the 21st day of August, 1924.

A copy of this notice and an application pursuant thereto and to the "Water Act, 1914," will be filed in the office of the Water Recorder at Vernon, B. C.

Objections to the application may

Rose Mildew
 Back in the days of our childhood there was a little ditty which ran: "Roses red and violets blue", etc., but roses cannot be red unless they receive some care. Our Northwest country is particularly fortunate in having the climatic conditions to raise wonderful roses. Many places have roses in bloom for six months out of the year.
 Roses, like many other beautiful things, are subject to a destructive

enemy, known as the Rose Mildew. The illustration in this article shows

**OROVILLE SOON
 TO HAVE SMELTER**

Oroville, the first town in the Okanogan Valley on the American side of the border, is to have a smelter. The plant will be located on the Similkameen river about seven miles west of town. Minnesota capital is behind the Washington Smelter Corporation, which has acquired five acres of land for the smelter site and over forty acres as a townsite. Unit electric furnaces of different capacities and types suited to the various kinds of ore in the district will be installed. It is expected that the establishment of this plant will give a great impetus to mining for miles around.

'Eliza,' said a friend of the family to the old colored washerwoman, 'have you seen Miss Edith's fiance?'
Eliza pondered for a moment, then bent over the laundry tubs once more. 'No, ma'am,' she said, 'it ain't been in the wash yet.'

Local Happenings

Edgar Hobbs left by K.V.R. today for Vancouver to enter University.
Seasons opening Concert and dance G. W. V. A. Hall, Sept. 25th. 6-7

Mrs. F. Hartig is a guest at the home of Mr. and Mrs. Robt. Mitchell.

Mrs. W. H. Hayes returned yesterday morning from Vancouver, where she has been for several weeks.

Mrs. Treleven came in on Saturday night from Hamilton, Ont., and is the guest of her niece, Mrs. T. B. Young.

Miss A. Roy who has been for some weeks employed with Mrs. Hanington at The Better 'Ole, left on Monday for the Coast.

Mr. and Mrs. Geo. W. Johnson came in on Tuesday's train from the Coast, where they had spent a short holiday.

Miss Dorothy Tomlin is now a student at Vancouver Normal School, having gone down at the opening of the fall term.

W. J. Mack came in from Vancouver on Sunday's train to spend his vacation here. He is now on the staff of the Union Bank in Vancouver.

Mrs. F. A. C. Wright, accompanied by Mrs. H. A. Solly, left by motor on Tuesday morning to make the triangle tour by way of Kamloops and the Similkameen.

J. A. Darke, accompanied by his brother, S. R. Darke, left last Wednesday on a motor trip through the southeastern part of the province and a part of Washington state.

Mr. Read, of Calgary, who had been spending a week with his wife and little child here a guest of Mr. C. Schwass, left on Thursday last to return to his home. Mrs. Read will remain here for another month or so.

Miss Dorothy Garnett and Orville Dunham returned on Sunday morning from New Westminster, where they had gone as members of a team representing Summerland high school in the junior stock judging contest at the provincial fair.

Edith Cunliffe left yesterday to enter the University of British Columbia. It was stated in The Review two weeks ago that she was entering the Normal school at Victoria. She made application for admission to the Normal in Vancouver, it being the intention of Mr. and Mrs. Cunliffe to move down to the Coast metropolis shortly. As they were not already residents of that city, admission was refused, the order being that all up-country students must enter the Victoria Normal. Accordingly, she will study at the University instead.

SUMMERLAND WEATHER REPORT

Below is a report furnished by the Dominion Experimental Station here for the week ending Tuesday:

Table with columns: Date, Max., Min., Rain, Snow, Sun. Rows for Sept. 10-18.

Miss I. Logan left here last week for a vacation trip to the Cariboo.

Bernard Taylor went down to Vancouver on Sunday to enter University.

Mr. and Mrs. L. G. Harding returned on Tuesday morning from a vacation at the coast.

C. E. Craig left yesterday morning for Calgary, where he will be employed.

Mrs. G. N. Gartrell went over to Hope, B.C., last week where, with her son, Walter, she expects to spend the winter months.

Everybody come to G. W. V. A. Concert and Dance 8 p.m. Thursday, September 25. Admission 50 cents. 7L

Mrs. R. K. Robertson, who came here some months ago from Calgary, Alta., left on Monday morning for Saskatoon, Sask.

Miss Jean Ritchie of the municipal office staff, is spending her vacation at the Coast. She left by noon train on Friday last.

T. C. Orr returned to his home here on Friday. He has been working at his trade in Ontario for some time.

Mrs. E. F. Sanborn returned Saturday from a visit with her son at Innisfail, Alta. She stopped off on the way home at Calgary and at Armstrong.

Mrs. H. C. Handley is enjoying a visit from her mother, Mrs. Metcalfe, who arrived on Tuesday night from Winnipeg. After a short stay here, Mrs. Metcalfe will go on to Vancouver, where she will make her home.

Mrs. G. L. Salter, accompanied by her husband, who arrived here Sunday morning from the Coast, went up the lake on Wednesday en route to Winnipeg. Mr. Salter went on to Vancouver from Sicamous, while Mrs. Salter continued the journey east. She will spend some weeks with Mrs. Isaac Pitblado in that city.

Mr. and Mrs. F. E. Gartrell have as their guest Mrs. L. O. Patterson, one of the early pioneers of Summerland. Mr. Patterson planted the orchard now owned by R. J. Hutchinson and built the house on the property. They were here but a short time when they sold to O. F. Zimmerman. Mrs. Patterson arrived from the Coast Tuesday morning.

Was Well Qualified

The fence in front of the home was badly damaged, and it seemed to sensitive Mrs. Jones that all the neighbors were remarking about it as they passed by.

When are you going to get that fence in the front mended? she asked her husband one day.

Oh, next week! was the reply. I'm just waiting for George to come home from college.

But whatever will the boy know about mending a fence? she asked in astonishment.

Well, replied the husband, he ought to know a lot. He wrote and told me the other day that he had been taking a lot of fencing lessons this term.

It's the easiest thing in the world to apologize when you are in the right.

B. C. HONEY CROP IS INCREASING FAST

Honey should be one of the cheapest, as it certainly is, one of the best of foods. In five years British Columbia practically doubled its honey crop. In 1917 the total production of the province was 370,000 pounds with a value of \$74,000. The following year 450,000 pounds were raised, with a value of \$126,000. In 1922 all the beekeepers in the province reporting to the government accounted for an output of 711,356 pounds of honey worth \$177,839, which was a very gratifying increase for the period. Owing to conditions being distinctly unfavorable in 1923 the season was an unfortunate one for British Columbia beekeepers and a decline in production was recorded, with 432,518 pounds worth \$95,154.

Conditions for the pursuit of apiculture in British Columbia are naturally excellent, and it is gratifying to view the increasing interest being manifested in the industry. Honey production on the Pacific coast is annually increasing as more devotees are enlisted to follow it as either a side line or exclusively. The profit to be realized from the industry is being more strongly realized in the fruit districts, where beekeepers' association exist for the promotion of apiculture and the aid of the beekeeper. The Beekeepers' Association of British Columbia now has thousands of members who are augmenting the production of the province and contributing to making Western Canada independent of honey importation.—Ex.

MERCHANDISE THE FRUIT

Okanagan fruit has been placed on sale in Covent Garden market. It was beautifully packed and doubtless much admired.

Other Okanagan fruit is exhibited at Wembley, less, perhaps, with a view to encouraging a demand for it in Great Britain than as part of a comprehensive exemplification of the varied products of the Dominion.

This sort of thing is well enough in its way, but the impression it makes is bound to be transitory. Two or three attractive looking boxes of apples at Covent Garden and an exhibit at Wembley will not go very far to secure the British market.

If the growers really want to capture the market they must set about it with printers' ink. They must reach the public by profuse but judicious advertising. They must spend a dollar on newspaper space where they now spend ten cents.

The market is there. It can be won. But the fruit growers must spend money if they would make money out of it.—Vancouver Sun.

SAWS MADE FROM PAPER

Among the multitude of uses to which paper is put, is that of making circular saws. These saws are used in making veneer and fine furniture and are manufactured in an English factory. Thin plates of wood cut by these saws are so finely finished that cabinet makers do not have to plane them at all before they are used. Such saws were originally shown at an English exposition and were driven by an electric motor. They are manufactured from a special type of compressed drawing paper. Compacted paper of such hardness has been made in England that it has even been utilized in place of building stone. Experiments in the manufacture of car wheels from compressed paper have been made in the United States for a number of years, but the product has never competed seriously with the ordinary steel wheels. It is only in the production of certain articles such as the veneer saws that any advantage is found.—Ex.

A STUDY IN OPPOSITES

The teacher was giving a drill in the meaning of words and their opposites.

'Now, tell me,' she began, 'what is the opposite of misery?'

'Happiness!' said the class in unison.

'And Sadness?' she asked.

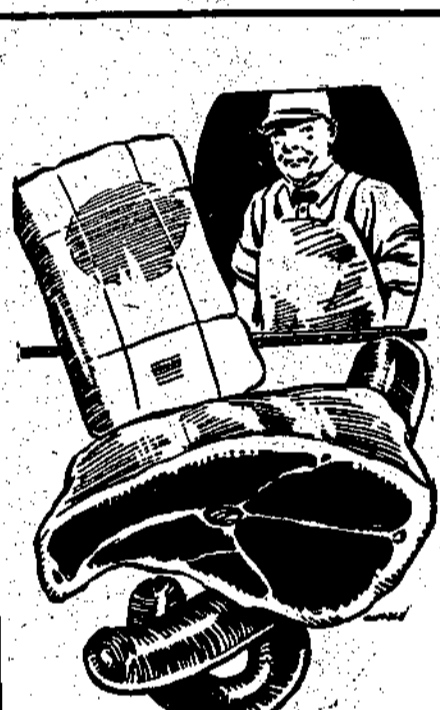

'Gladness!'

'And the opposite of woe?'

'Giddap!' shouted the enthusiastic class.

Teacher of Hygiene: 'Why must we always be careful to keep our homes clean and neat?'

Little Girl: 'Because company may walk in at any moment.'

REGULATIONS FOR HUNTERS

Game Law as Applied to This Section of the Province.

Publishing of game regulations by the government was much later than usual this season. So far as they apply to this district they are as below. The eastern district is defined as that part of the province south of the C.N.R. Prince Rupert line and east of the Cascade Mountains.

Mountain goat—In the Eastern district south of the main line of the C.P.R., Sept. 15th to Dec. 15th, both inclusive.

Bear—Sept. 15th, 1924, to June 30th, 1925; both date inclusive.

Deer—Mule and Coast, bucks only, Sept. 15th to Dec. 15th, both dates inclusive.

There is a close season on all fur-bearing animals in the Eastern district.

Bag Limits

In respect of big game throughout the province, no person shall anywhere kill or take or have in their possession during the open season more than two deer, all of which must be of the male sex. Bag limit for bear, three of any species except Grizzly, and south of the main line of the Canadian National Railway, one Grizzly.

Game Birds

Ducks (except Wood and Elder ducks), Wilson Snipe, Coots, Black Breasted and Golden Plover, Greater and Lesser Yellowlegs, Sept. 15th to Dec. 30th.

Geese and Brant—Sept. 15th to Dec. 30th, both dates inclusive.

Grouse and Ptarmigan—Sept. 15th to Oct. 15th, both dates inclusive.

Prairie-chicken—Oct. 21st to Oct. 31st, both dates inclusive.

Quail—In the Similkameen and South Okanagan districts, Oct. 18th to Nov. 15th, both dates inclusive.

Pheasants (except Golden and Silver pheasants) cock birds only, in Similkameen and South Okanagan, except a certain portion of the Similkameen district, Oct. 18th to Nov. 15th, both dates inclusive.

In the North Okanagan district, except that portion lying to the east of the Coldstream Municipality, Nov. 1st to Nov. 9th, both dates inclusive.

Bag Limits

Pheasants, cock birds only, in South Okanagan and Similkameen districts, and in Salmon Arm district, four in one day, total bag limit 15. In the North Okanagan district, daily bag limit, cock birds only, two in one day; total bag limit eight.

Quail in Similkameen and South Okanagan, daily bag limit ten, total bag limit 100.

Prairie-chicken, where the season is open, daily bag limit three; total bag limit 12.

Ducks—Daily bag limit 20; total bag limit 150.

Geese—Daily bag limit ten; total bag limit 50.

Brant—Daily bag limit ten; total bag limit 50.

Black-breasted and Golden Plover and Lesser Yellowlegs—Daily bag

pointing delegates to the convention to be held in Penticton on Thursday. Mr. Horswill presided, and, after the preliminary business of passing the minutes of the previous meeting, called for nominations. On motion of Mr. Weaver and Mr. Kenyon, Messrs. Horswill, Noyes and the candidate, Mr. J. M. Robinson, were appointed. The meeting terminated with a few remarks by Mr. Robinson.

Mrs. Geo. Weaver returned on Friday from an extended trip to Toronto and other eastern points.

Mrs. Allen left on Friday morning for a short visit to Vancouver.

Mr. Stewart Allen left for Montreal on Friday morning to take up a course of study at McGill University.

The Anglican service on Sunday was taken by Mr. G. W. Cope of Summerland in the absence of Rev. H. A. Solly. His address was on the continuity of this life after death and the consequent need for character building here. The anthem was "They that wait upon the Lord" (Elvey), Mrs. Languedoc at the organ.

LOCAL THEATRE GETS THE BEST

To any movie fan who follows the advertisements of the Rialto Theatre the fact that the very best pictures produced are being booked by the local picture house is apparent. In addition to the high grade pictures already arranged for, Mr. Lockwood states that he purposes giving as an extra a serial, "and we are not reducing our shows in any way to make room for this." The big chapter play will be just an addition to the program.

"Girl Shy," Harold Lloyd's big comedy; "The Spanish Dancer," with Pola Negri, will be shown early next month. Other big films coming soon are "The Shooting of Dan McGrew," "Shadows of Whitechapel," "Scaramouche," "White Sisters," "The Covered Wagon," "Ashes of Vengeance," and "The Pilgrim."

limit 15 in the aggregate of all kinds; total bag limit 150 in the aggregate.

Wilson Snipe—Daily bag limit 25; total bag limit 150.

Coots—Daily bag limit 25; total bag limit 150.

Every person shall, upon request of any constable or game warden furnish satisfactory proof to him of the dates on which any big game or game birds were killed or taken.

The head of every deer must be left on the carcass when being brought in to place where animal is to be consumed, under penalty of confiscation or fine and imprisonment.

The open season declared by these regulations shall not apply to the hunting, taking or having in possession of Quail, Pheasants, Prairie-chicken or Partridges when snow is on the ground.

Chautauqua Is Enjoyed

(Continued from Page 1)

her, was sung by the Australians in the afternoon and in the evening Mr. Murray sang another of Miss Stewart's compositions.

On Monday afternoon James Evans in his lecture, "You and I and the World," gave a very optimistic survey of recent world developments in which he upheld nationalism as a characteristic of the individual essential to the best world citizenship. Nationalism asserted itself above all in the great war. It cannot be swept away by words of the advocates of internationalism.

Immediately following the war the world entertained great hopes that it would safely solve the problems of war. Recently there has been expressed the fear that a spirit of pessimism may take the place of this feeling of hope; but the speaker declared there was little occasion for pessimism when one realizes the progress which is being made. The accomplishments of the League of Nations were dealt with and, giving his reasons, the speaker said that the United States would soon become a signatory power in the League of Nations.

Among recent accomplishments cited was the taking of foreign affairs out of secret channels, making the people the controlling factor in a question of war. Forty-eight nations have founded an international court of justice. At the Washington conference, the nation which held the sea supremacy gave it up in the best interests of humanity, while the United States, which through its great wealth, held the potential supremacy, did likewise.

Throughout his studied treatment of world problems, the speaker revealed a feeling of optimism, his main thought being the necessity of a spirit of true national patriotism. With true democracy we must have a government at Ottawa that will carry out the wish of our ten million citizens and, as in the case of a jury of citizens, their judgment would be safer than that of the mind of an expert.

The greatness of a nation will be in its ability to contribute the most to the world at large in accordance with the mission which Providence has assigned to it. A sense of the greatness of the heritage which is ours as citizens of Canada, is our greatest need. Canada has one great mission, to stabilize conditions in the Anglo-Saxon world.

In picture and word, C. Vincent Hall, B.D., on Monday night revealed to a large audience the discovery and opening of Tutankhamen's tomb and in a most interesting manner revealed the ancient life of the early Egyptians. His brief descrip-

tion of present day life in that ancient country was scarcely less interesting. It was the writer's privilege to hear Mr. Hall lecture on this subject shortly after his return from Egypt and while told in different words, its repetition here on Monday was equally as interesting.

Not enough season tickets were sold to make up the guarantee given by the local committee. This committee of thirty citizens will have approximately one hundred dollars to make up. The total price collected for the advance sale of season tickets goes to the local committee while they receive but twenty-five per cent of the door takings.

The success of the Chautauqua was due in no small measure to the excellent co-operation given the committee by Miss Vaux, the superintendent, and whose directing of the program and courteous manner was appreciated by all.

It seems altogether probable that Chautauqua will come to Summerland again next year as at the time of going to press the contract has been signed by nearly thirty citizens, the minimum number required by the signators.

Random Remarks

"Well," said the collector, "I think I'll get on the detective force—I am always finding people out."

Have You Lost Anything of Value?

THE best, easiest and most efficient way to go about finding it is to insert an advertisement under the head of "Lost and Found" of the Review Want Ads.

Fully describe the article, the locality in which you think you lost it, and the approximate time. State if you will give a reward, and give your phone number and address.

Then watch the Want Ads to see if anyone has advertised the finding of the article. Usually, when something of value is found, the finder advertises it; so in those two ways your chances to recover your loss are good.

YOU MUST SEE IT TO APPRECIATE IT

Minister Defeated In North Okanagan

Recently Appointed Provincial Secretary Meets with Defeat.

COCHRANE MAJORITY ONE HUNDRED EIGHTY

Seriously Affects Position of Oliver Government—Election Likely.

A. O. Cochrane, opposition candidate, defeated the newly appointed provincial secretary, Dr. K. C. McDonald, in the North Okanagan by-election held yesterday. Cochrane has a majority of 180 with two small polls yet to report.

Dr. McDonald received a majority of ten votes in the city of Vernon, 923 to 813; but according to information received over the telephone this morning, practically all the larger centres gave Cochrane a majority. Some of these are: Lavinton, 13; Okanagan Landing, 13; Cominonage, 15; Armstrong, 27; Coldstream, 53; Enderby, 54; Oyama, 66. The total votes polled for Cochrane were 1,969 and for McDonald, 1,780.

This by-election has been watched with the keenest interest throughout the whole province. The government was, in the June election, returned to power with an unsatisfactorily small majority. The result of the by-election is that one seat is lost by the government to the opposition, reducing the government's majority by two. In addition there is the fact that a cabinet minister has met defeat and this is interpreted as aimed at the premier as much as being a personal defeat for Dr. McDonald.

Many are of the opinion that the government, after a brief session of the legislature, will again appeal to the electorate in an endeavor to obtain a more satisfactory majority.

CREDITORS WILL GET BUT LITTLE

Unsecured creditors of W. W. Borton, assigned, will receive 6 1/2 cents on the dollar, as first and final payment, according to a statement issued by M. G. Wilson, authorized trustee of the estate. Preferred and secured creditors are paid in full, \$222.80. A net balance of \$389.05 remains to be distributed among unsecured creditors with total claims of \$5,976.18. The largest individual unsecured creditor is the Canada Ingot Iron Company, whose claim was \$2,149.50.

Coast daily papers have been carrying large advertisements for the Okanagan apples. These advertisements, which are just now featuring the McIntosh, are being inserted by the Associated Growers of British Columbia.

Three carloads of Wealthy apples from the Salmon Arm district were started rolling a few days ago over the Canadian Pacific for trans-shipment at an Atlantic port for South Africa.

LOOKS LIKE A BIG SELLER

Pottery Student Produces Totem Poles in Perfect Miniature.

Miniature totem poles designed in clay and made by a student in the local pottery school have been receiving much favorable comment during the last few days when they have been exhibited by J. W. S. Logie.

These poles are the workmanship of Mrs. T. Croll, who designed the mold in which they were formed. They are wonderfully true in reproducing the features of the Indian totem poles and when finished with suitable colors will need only to be advertised to meet a wide demand. As souvenirs offered at the big tourist resorts throughout the province, they would be picked up by the thousand.

Augmenting Supply of Domestic Water

Turning Springs Into Head of Water Main in Prairie Valley.

To augment the present supply of water for the domestic system and as a precaution against possible failure of the reservoir to fill, the municipal council has decided to expend about five hundred dollars in gathering the water of one or two springs below the reservoir and building a small weir at the head of a pipe, which will be connected with the present eight-inch main running down through Prairie Valley. A valve and some additional pipe will be required. The money necessary will be taken from the fund provided by the last domestic water by-law.

Application will be made to the water branch for permission to divert the water at this point.

CITIZENS DREAD SHOOTING SEASON

Council Receives Requests to Prohibit Use of Guns—Fear Accident.

Complaints of the use of rifles and shotguns within the municipal limits came up for discussion at the council meeting on Monday. A number of instances of narrow escapes from serious, if not fatal injury, had been received and many fear that an accident may result at any time through the careless use of firearms. That more caution is necessary was admitted, but some of the councillors at least considered it absolutely essential that there must be some means of killing off pheasants, which have become a great nuisance to many. The discussion ended with the suggestion of Coun. Ritchie that every lot owner who objects to shooting on his premises have proper notices posted prohibiting such practice.

T. P. Thornber, municipal electrician, has been given permission to make an extension of the electric light service to the residence of G. J. C. White. A few weeks ago Mr. White made application for the service, promising to pay anything over the sixty dollars maximum cost of an individual connection fixed by the council. An estimate was submitted at the council meeting on Monday, showing that the cost of a secondary line would be \$120. Connection was authorized under the usual terms.

MANY APPLY FOR JOB AS ASSESSOR

Appointment Goes to C. P. Nelson—No Change in Valuations.

C. P. Nelson has been appointed to the position of municipal assessor. It is understood that the assessment roll of last year will be adopted so that it will not be necessary for the assessor to again value land or improvements.

There were eight applicants for the position as the result of the advertisement published in The Review, in which a fee of \$125 was offered for the work of re-writing the roll, sending out the notices and doing the other necessary work, including attending the court of appeal should it be necessary.

OREGON GROWERS GET LOWER EXPRESS RATES

Growers in Oregon will benefit by a reduction in interstate express rates, which were ordered reduced by 10.7 to 15 per cent. The former reduction applies to articles of food in carload lots, fruits, vegetables, butter and eggs.

The order, which will become effective January first, follows a number of hearings by the Interstate Commerce Commission. It was indicated that similar action might be expected in other western states.

Wenatchee Valley Traffic Association is pressing for reduced railway rates on fruit.

HEAVY WINDS DO DAMAGE TO APPLES

Storm Was General—Heavy Rains In Many Places But None Here.

High winds, which started early Sunday morning, have caused the loss of quite a few apples, but not nearly as much as if it had occurred earlier, for many growers had completed harvesting. The wind blew fairly steadily, and strong, until twelve-thirty on Tuesday morning. According to experimental farm records the greatest velocity was reached between twelve and one, Sunday noon. Forty-six miles was recorded in that hour. Momentarily a sixty-mile velocity was recorded. Generally the wind was from forty-five down to twenty-two miles per hour.

Reports from many quarters show that the storm was unusually severe and spread over a large area. Great damage was done in some of the states by wind and rain. Along the Coast the precipitation was very heavy. Unfortunately practically no rain fell here.

VERY HEAVY RAINS FALL AT COAST

Half as much rain as Summerland might expect in a year fell at the Coast in about forty-eight hours last weekend. The rain commenced on Saturday and already Tuesday morning 4 1/2 inches had fallen.

The downpour is responsible for late arrival of K.V.R. trains, which have been routed by way of Spencer's Bridge since Wednesday morning. A big slide came down at No. 4 tunnel in the Coquahalla Pass, between Coquahalla and Romeo stations. It is expected that the track will be clear by tomorrow afternoon.

HEADED LOCAL INSTITUTION

Death of Dr. E. W. Sawyer in East is Learned with Regret.

A telegram from Rev. S. Everton on Thursday of last week to W. C. Kelley brought the sad news that Dr. Sawyer had passed away at Woodstock, Ontario. He had been ill for some months.

Dr. Sawyer was born February 13, 1860, at Wolfville, N.S. His father, the Rev. A. W. Sawyer, D.D., LL.D., at that time was teaching in Acadia College, and had married in Nova Scotia, but shortly afterwards returned to New England to the work of the ministry. After some years he returned to Nova Scotia and became president of Acadia University where he obtained wide renown as a great teacher. It was here that the late Dr. Everett W. Sawyer was educated, graduating in the class of 1880, G. J. Coulter White of Summerland being a classmate. Afterwards he studied at Harvard and later returned to Wolfville and became a teacher in Horton Academy and later principal of that school and an associate professor in the University. He married a daughter of Rev. Dr. Crawley, at one time president of Acadia College.

His surviving children are Helen, Mrs. W. M. Armstrong, of Korrindale, Vancouver; Bernal, a merchant in Halifax, and Edmund, now residing in Jamaica, B.W.I.

In 1907 Dr. Sawyer removed to Summerland and became principal of Okanagan College. Many who studied under him here greatly profited by his instruction and will cherish his memory.

Besides his work in the college he took an interest in other things, had a fruit lot and loved to work among the trees, was a constant worker in church and Sunday school, was chairman of the school board for two years.

Mrs. Sawyer died here and shortly afterwards Dr. Sawyer made a trip east and later accepted a position as teacher and housemaster in Woodstock College. Here he met Miss Parker who was the bursar of the college and after another visit to Summerland to close up his business here he was married to her.

In recognition of his scholarship and his ability as a teacher his alma mater Acadia University conferred upon him in 1908 the honorary doctorate of D.C.L.

MUST REBUILD WEST FLUME IN GARNETT VAL.

How to Finance Replacement of Two Thousand Feet is Worrying Council.

More than two thousand feet of fluming on the west side of Garnett Valley must be replaced before the 1925 irrigation season opens. The condition of this section of the system has been discussed a number of times by the municipal council and on Monday the matter was again referred to by the reeve and by Coun. Johnston, chairman of the water committee. The latter stated that 1,640 feet at the upper end of the valley and another 600 feet near the Taylor property must be rebuilt before water is again turned in.

The treasurer pointed out that there were no funds available for this work as no provision had been made in the estimates prior to fixing the rates last spring.

Coun. Johnston stated that he had no idea then that the flume was in such condition.

Reeve Campbell said that a number of lot owners had applied for late irrigation and he thought it would be a good plan to give all the land served by this flume a late watering, so that if it were not possible to finance the work this fall the lots would be in better shape to permit of the repairs being done next spring than they would otherwise be. It was agreed to let the lot owners irrigate their property through the flume under the supervision of Foreman Tomlin.

The reeve and members of the council will go over this section of fluming with the foreman and have not yet abandoned the hope of being able to make the repairs this fall. As much of this flume is in the bush and repairs could not be made until late spring, it is very desirable that the work be done before winter sets in.

PAY GROWERS FOR APRICOTS

One dollar and twenty-five cents for No. 1s and 85 cents for No. 2s are the prices being paid this year by Walters, Ltd. Statements and cheques were mailed yesterday to growers shipping through this firm. Last year this firm paid \$1.10 and 70 cents for 1s and 2s respectively. Walters, Limited, is the first this season of the local houses to issue cheques for 'cots.

PAYMENT FOR EARLY APPLES

Occidental Fruit Company, Limited, have settled this week with its Summerland growers for Yellow Transparent and Astrachan apples. For the grades shipped wrapped, 3 1/2 cents per pound was paid growers and 2 7/8 cents for the apples shipped in crates.

Figured on the basis of only forty pounds to the box, the above means a net return of \$1.33 per box, but we understand these will run a little more than 40 pounds to the box, meaning that much higher price.

Municipality Gets Share Licence Fees

Province Distributes Proportion of Motor Licence Money Among Municipalities.

Summerland municipality has received a cheque from the province for \$1,424.78, being the municipality's share of the motor licence fees collected by the province. Over \$300,000 has been distributed among the various municipalities of the province. Peachland received \$388.58, the municipal district of Penticton, \$3,102.40, the city of Kelowna, \$1,054.51, Vernon city, \$2,888.00. More than half the total, or \$158,000, went to the municipalities of greater Vancouver, including New Westminster.

MUNICIPALITY WILL ENTER OBJECTION

Council Fears Trouble, if Private Storage on Trout Creek Waters.

H. Detjen and E. Verrier propose making application for the right to store water on an unnamed creek, a tributary of Trout Creek, which enters that creek on its southern side. Formal notice of the intention to make application for this right is published in another column.

This advertisement was the subject of quite a discussion at the last meeting of the municipal council when it was finally decided to enter formal objection. It is felt that the building of another dam to hold so much water, 500 acre feet, might interfere with the natural flow of the creek and would certainly complicate the division of water. In this connection it was pointed out that all the water diverted by these people should be measured. The clerk was instructed to enter formal objection.

CHARGE OF THEFT IS NOT PRESSED

Carlo Cavani was before the police magistrate a few days ago, charged with stealing some old fluming, the property of Robert Shannon. This case was a sequel to the assault case in which Cavani was found guilty of assaulting R. Shannon, the owner of the lumber.

There was much of an indefinite nature about the information, beyond the admission of the accused that he had taken the material. Under these circumstances and considering that the Italian had offered to pay for the material he had taken, the magistrate consented to a withdrawal of the charge.

SCHOOLS GET NEW PROJECTOR

Will Permit of Wide Use of Pictures in Class Rooms.

There arrived this week for the local schools a machine that will be invaluable in teaching a number of subjects. This machine is known as the Balopticon and will replace the magic lantern, which has been used in the teaching of agriculture.

The new machine can be either used for stereopticon work or as a reflecting device. It is this latter feature that greatly widens its scope of usefulness. A picture from a magazine or any suitable illustration on a flat surface, can be projected on to a screen. Doubtless the Balopticon will be in great demand.

Beavers are causing so much trouble on the municipal water system in Garnett Valley that application has been made for permission to trap them. This permission has been withheld by the game authorities until the provincial police of the Valley have been consulted.

Swiss farmers who recently settled in the Forridge district of the Fraser river valley, British Columbia, have secured the hearty co-operation of local farmers in a plan to establish a factory for the manufacture of British Columbia Swiss cheese. The Swiss are expert cheese makers, and are agreeably surprised at the sweetness and all-round high quality of local milk for cheese manufacture of the highest grade.

The superior value of bulbs grown on Vancouver Island has been shown recently by tests carried on throughout Canada, yet at the present time practically all of the bulbs grown in the Dominion are imported from Europe. Recently disease has developed in the imported bulbs, and as this will make it necessary to stop almost entirely their importation, it is expected that this should give this new Coast industry every advantage.

The Canadian fruit display at the British Empire Exhibition, London, has brought orders for more than a million boxes of assorted kinds for this season.

Donald Ross came in on Monday night from Letchell, B.C., where he has been acting as telegraph operator for several weeks.

Federal By-Election Campaign Launched

Contributions To Freight Rate Fund

Municipality and Co-operative Help In Costs of Fight at Ottawa.

Fifty dollars has been contributed by the municipality and seventy-five dollars by the Co-operative toward the expense of carrying on the freight rates case of the B.C. Railway Rates Adjustment Association. The original sums asked from each of these were \$200 and \$300 respectively. This figure was arrived at before G. G. McGeer, K.C., had been re-engaged by the provincial government, but now the association hopes that but twenty-five per cent of the original estimated sum will be necessary to carry on the work.

Cost of witnesses and other expenses must be met. Thos. Bulman, the principal witness is already in Ottawa.

VICTIMS OF MIX-UP ON SHOOTING DATES

Several Penticton Men Caught Shooting Out of Season—The Dates.

Several well known citizens of Penticton were summoned to provincial police court last week on the charge of hunting and being in possession of game birds during the closed season. It would appear that these men had not wilfully broken the law but were misinformed by an article appearing in a Vancouver daily, they having the impression that there was now a full open season for game birds in the southern Okanagan Valley, whereas the order-in-council provided for shooting on Mondays and Thursdays until the end of September in the Okanagan Valley from a line running east and west approximately two miles south of Vaseau Lake to the international line. The bag limit is six birds, including not more than two hens.

In view of this order it is interesting to note that south of the line, in the Orville district, there is an open season on Chinese pheasants from October 1 to 5, which permits shooting of both sexes. There will be a similar open season from November 1 to November 10. The bag limit will be two a day and not more than two in possession at any one time. Here the open season for pheasants and quail is October 20 to November 15 inclusive. Cuck birds only may be shot. Prairie chicken season is shorter, October 21 to 31, inclusive.

There will be a similar open season from November 1 to November 10. The bag limit will be two a day and not more than two in possession at any one time.

Here the open season for pheasants and quail is October 20 to November 15 inclusive. Cuck birds only may be shot. Prairie chicken season is shorter, October 21 to 31, inclusive.

MUFFLERS ARE LITTLE CHECK ON POWER

Council Moves to Abolish Unnecessary Noise of Motor Vehicles.

That the municipality has power to make local laws with respect to regulating the use of mufflers, cut-outs, etc., on motor vehicles was the information received by the municipal clerk from the department of the attorney-general. For a time on Monday the council debated the question of whether or not to pass another by-law bearing directly on this matter.

An interesting fact was brought out in the discussion when it was stated that the Washington State authorities, after exhaustive tests, had found that only between three and four per cent average additional power was given motors while climbing hills by opening the cut-outs.

The council finally decided that personal interview with owners of the few vehicles without mufflers or using cut-outs would suffice for the present at least and the by-law will not be put into force.

The British Columbia department of agriculture announces that of 352 certificates issued in respect to cows completing records during the year 1923, 107 were obtained by the Chilliwack Cow Testing association. This number was divided between some sixteen members of the association, and seven cows from three of the herds were sold on their records for \$835.

Kelowna Men Chosen By Both Parties for Candidates.

D. W. SUTHERLAND AND GROTE STIRLING

One to Fill Seat Rendered Vacant by Death of J. A. McKelvie, M.P.

The battle is on and the fight is between two Kelowna men, Mayor D. W. Sutherland and Grote Stirling, a well-known business man of the Orchard City.

At the Conservative convention held in Penticton last Thursday night for the purpose of selecting a party candidate for the federal by-election in Yale county, the names of Grote Stirling, Kelowna, J. M. Robinson, Naramata and Price Ellison, Vernon, were submitted. Stirling won on the first ballot and his choice was made unanimous.

Mr. Stirling is a brother of the senior member of the former fruit concern, Stirling & Pitcairn, Ltd., and was born in England in 1875. He is a civil engineer with experience mainly on railway construction in England. He has been engaged in fruit growing and engineering in the Kelowna district since 1912 and is president of the Associated Boards of Trade of the Okanagan.

Dr. S. F. Tolmie, Victoria member at Ottawa, attended the convention and gave an address on Dominion affairs.

On Friday night the Liberals of Yale met in Penticton to select their candidate.

The following names were placed in nomination: Mayor F. B. Cossitt, Vernon; Mayor D. W. Sutherland, Kelowna; G. G. McGreer, K.C.; Dr. W. J. Knox, Kelowna; Col. C. E. Edgett, Vernon.

Messrs. Knox and Edgett withdrew their names for personal reasons. Mr. Cossitt expressed a wish to withdraw in favor of Mr. Sutherland, and Mr. M. G. Wilson, proposer of Mr. McGreer, asked permission to withdraw the name of his nominee in order to make Mr. Sutherland's nomination an acclamation one.

D. W. Sutherland was born in Nova Scotia in 1866. He moved to Kelowna from the Coast in 1893, first teaching school and then going into the real estate business. He is president of the Okanagan Loan and Investment Company and also operates a mercantile business. He has been connected with municipal work in Kelowna for nineteen years and has been mayor of that city since J. W. Jones quit as mayor to enter the provincial house. Three years ago Mr. Sutherland contested Yale Federal constituency but was defeated by the late J. A. McKelvie, M.P., whose death caused the present vacancy.

Mayor Sutherland and Mr. Stirling are thoroughly conversant with the needs of the district and there is satisfaction in knowing that whichever is elected we will be well represented at Ottawa.

FIX DATE OF BY-ELECTION

W. C. Kelloy is Returning Officer—Nominations Here October 23.

As foretold by The Review in its last issue the by-election in the electoral district of Yale will be held on the 6th day of November. W. C. Kelloy of this place has been appointed returning officer.

Nominations will take place at the Summerland municipal hall on Thursday, October 23rd.

Mr. Kelloy is now busy arranging the polling divisions and appointing the deputy returning officers.

Writs were served on a number of fruit growers in the Kelowna district as the result of action taken by the Kelowna Growers' Exchange against members for alleged bootlegging of their crops to independents.

LET'S PREPARE FOR BUSINESS.

Vancouver has its famed Capilano Canyon and Victoria its Saanich Mountain. Summerland has both of these within its boundaries and some day they will be big tourist attractions. Just how soon that day will be is for the people of Summerland to decide.

The great gorge, known as Trout Creek canyon, extending for two or three miles from near the Shingle Creek road down to the entrance to the Dominion Experimental Station, spanned now only by the great railway trestle, can, at relatively small expenditure, be made one of the scenic attractions of the Interior. Though very different, we are told by visitors that Capilano Canyon "has nothing on" Trout Creek canyon.

Some day there will be a scenic road skirting and ascending Giant's Head, the view from which could scarcely be excelled. True, Saanich Mountain has its observatory as an added attraction, but there are many who journey the eight miles from Victoria for no other purpose than to ascend the mountain and gain an outlook from its summit, the view from which in no way compares with that from Giant's Head.

Scenic attractions such as the canyon and the top of the mountain in the middle of our municipality would be worth many times more to us than any change in the location of the Okanagan highway possibly could be.

From the south come reports that the tourists who have visited British Columbia were delighted with what they saw here and that they are spreading the fame of our climate and scenery and urging their friends to "visit British Columbia." Predictions are that next year's tourist business will greatly exceed that of the season about closed. If we are to reap the full benefit of the harvest which may be ours for the taking we must exert ourselves. It is not too soon now to begin to prepare for next season for if the matter is allowed to stay in abeyance until next spring it will be too late. We can at least begin to play up Trout Creek Canyon by inducing tourists to visit Paradise Flat and other heights overlooking the canyon, but even for this some preparatory work is necessary.

SURELY SPECIALIZING.

Kamloops is going after the sufferer from tuberculosis who will be self supporting. The health bureau of the Kamloops board of trade has just issued a mailing card six by nine inches with a colored bird's eye view of the town, the confluence of the rivers and the mountain behind. Below this is a map showing the situation of Kamloops in relation to many of the cities of the continent.

This card is intended for mailing to physicians and describes briefly location, altitude and climate. It gives a brief description of the Kamloops hospital and some of the general advantages of the city and uses the fact that the provincial government sanatorium for tuberculosis is situated nearby. As this sanatorium is available for citizens of the province only, sufferers from tuberculosis are warned that they must be prepared to pay the charges of the Kamloops hospitals, there being two private institutions in the city.

GROWING PROSPERITY.

Financial Post publishes a mass of figures which show that the buying power of Canada for this year will be \$100,000,000 greater than for 1923. Canada's net annual revenue has been increasing by approximately that amount each year since 1921, when there was a big slump from the total of 1920, the year of highest prices. The net revenue in 1921 was just over three billion dollars. This year it will be three billion, four hundred million. These figures are compiled from the net production of agriculture, forestry, fishing, manufacturing, etc.

Some people that drive cars with the greatest horsepower themselves use the least horse sense.

MEN IN THE CAB BETTER WITHOUT.

We believe that prohibition has ushered in a new day for the workers of America; that it is enabling them and their families to enjoy comforts that they never could afford when a part of the pay envelope went for booze; that labor must choose between putting the money over the saloon bar or putting it into labor co-operative banks; and that the "wholesome" wines and beer recommended by the A.F. of L. convention constitute the precise reason why millions of workers in Europe have never been able to secure as high a standard of living as have American workers—their brains are so pickled in alcohol that they can not think straight. No man ever yet improved his lot by taking poison into his system.—Locomotive Engineers Journal.

The Second Column

BY PATRIOT

THE HOME PRINTER

There are so many "weeks" being started that it looks as if the fifty two weeks allotted to us will hardly prove sufficient for the world's needs. Before the entire list is spoken for, we would advocate a Be-Fair-With-Your-Printer Week. We are sure it is badly needed in almost every community. In consideration of such a week, we would advocate the following principles:

Your printer—make him your partner, not your victim. Don't get prices from one printer and then submit same to another, hoping for a cut in prices, unless you would like to have the printers do the same with you when they are in the market for some article of merchandise which you carry in stock.

Give your home printer a chance before you buy your printing out of town.

In general, treat him with the same respect that characterizes your other business dealings and keep in mind the golden rule of business, to do unto others as you would be done by. Having properly observed this week, the spirit of it may stay with you during the remaining fifty-one. Such, we believe, is the big idea in all these special weeks.

Observations On The Break-down Of Jonathan Apples

By R. C. PALMER,
Assistant Superintendent,
Dominion Experimental Station,
Summerland, B.C.

Following the very serious losses suffered through "breakdown" of the Jonathan apple in 1922 an investigation of this problem was undertaken by the Dominion Horticulturist. An experiment was carried out in which the Dominion Fruit Branch, and the Summerland Experimental Station worked in co-operation with the horticultural division of the Central Experimental Farm.

A detailed account of the experiment will be found in the 1923 report of the Dominion Horticulturist. The following general observations, recorded at the Summerland Experimental Station, are advanced at this time in the hope that they may prove of value to growers in handling their 1924 crop.

In brief, the results suggest that a large number of factors may be involved in bringing about the condition known as "Jonathan breakdown." Over-maturity of fruit at picking time is undoubtedly conducive to breakdown, but it is apparently by no means the only factor involved. The same is true of over-size fruit. The development of breakdown can apparently be delayed but not prevented by providing good storage conditions. While the trouble has not been found to be exclusively associated with any particular age or condition of vigor in the trees it appears quite possible that these factors do exert

some influence on the fruit tending to promote, or prevent the occurrence of breakdown. The same may be said of soil, cultural methods, pruning, thinning, irrigation and local district conditions. In fact, it appears probable that a number of these factors are involved and that it is their combined influence associated with seasonal conditions that makes for serious losses from breakdown one year and comparative freedom from the trouble in another.

From the grower's point of view the most important information brought out by this experiment is that breakdown can be practically prevented by picking the fruit before it reaches a certain stage of maturity. It is difficult to find a method of determining this condition of maturity, which is infallible and at the same time sufficiently simple for the grower to use in the orchard. It is hoped, however, that changes in undercolor may be found to be a reliable guide to the correct time to pick the Jonathans as well as other varieties of apples. The results secured with the 1923 crop suggest that Jonathans should be picked before the undercolor is clear yellow. In 1923 most Jonathans in the Okanagan Valley reached this condition about October 15. From present indications they appear likely to mature at least two week earlier this year and growers should plan to harvest accordingly.

Henry Ford is building a hospital in Detroit. Gonna get 'em coming and going.—Kitsilano Times.

"Advertising nourishes the consuming power. . . . It creates wants. It brings together in vital union enterprise confidence, stability, and goodwill, which might otherwise have never met"

RIGHT HON. WINSTON CHURCHILL 11

A colony of Scottish fishermen is being established on Barkely Sound, Vancouver Island, B. C. A model village has been built for them, the houses containing four and five rooms and all modern conveniences. Premier Ramsay MacDonald and other members of the British Cabinet are deeply interested in the project.

"I have a new baby brother."
"Is he going to stay?"
"I think so. He has all his things off."

"I want a careful chauffeur—one who doesn't take any risks."
"I'm your man, sir—I even ask for my salary in advance!"

A Canadian dry milk manufacturer who has a display of his goods at the Exhibition, has sold the entire output of his factory for the next five years to a British firm.

In order to market successfully the enormous peach crop of Georgia this year, an effort was made to prevent the shipping of peaches from that state of less than 1 1/2 inches in diameter.

Shoot Out The Facts

"They're the best shooting shells I ever shot!" that's what every sportsman said last year of Peter's Shot Gun Shells, when he brought home the game he went after.

They are scientifically loaded to a uniform standard of velocity, pattern and penetration, with moderate recoil.

A CHRONIC SCANDAL

The Paralysis of Political Management—Strong Action Demanded.

To the Editor,
Sir,—It is amusing, though pitiful, when an antiquated circus rider persists in carrying on the stunts of his youth. He endangers his own old bones; but the onlookers take no harm.
It is not amusing but paralyzing when an antiquated and obsolete system persists in riding the Canadian public, as the old man of the sea rode Sinbad in the "Arabian Nights." When the war threw a lurid light on our national deficiencies, the Federal Government ordered investigation. The lack of rural population, the inadequate profits of agriculture, and other grave shortcomings were inquired into by a commission. Yet that commission was never allowed to publish its verdict. Why?
In the most damning document ever presented to a Canadian Government by one of its own members, the chairman of the commission, Sir James Loughheed, informed the cabinet that the verdict would be one of "guilty" against the whole system of departmental administration. In this long-suppressed report, which I have just brought to light, the system of business Departments run by political chieftains was declared to be entirely responsible for our national stagnation.
It was absolutely necessary, the Government was informed on this high authority, that such great national business concerns as immigration and colonization; agriculture, trade, and the development of natural resources, should be relieved of the incubus of management by party politicians and entrusted to small boards of commissioners. These men should be appointed for no other reason than special capacity for the job, and be judged by their results. No business organization, the Government was reminded, would for a moment tolerate the stagnating methods then (as they still are) surviving at Ottawa.
We pity the United States Government, and with reason, when we hear of the scandals just exposed at Washington. But this chronic scandal in the management of our own affairs touches us more closely, and it hurts. It demands prompt action. We must throw off the incubus.
This is no party question. Men of all parties, in growing numbers, are having their eyes opened to the monstrous inefficiency of the present system. Even Ministers and ex-Ministers are uneasy about it, for the system puts them in a false position. Naturally, the men best qualified to win a party fight are as a rule not qualified to run a complicated business, which requires absolute impartiality, careful regard to facts, and strict subordination to reason, as well as long training and special experience.
"In the very nature of things," the commission's chairman frankly declared, "a Minister is charged with keeping his department largely in touch with the political fortunes of his party."
This of course is a scandal of the worst kind. As a political chief the Minister has to please his partisans; as manager of a department owned and paid for by the whole country, his plain honest duty is to disregard all party considerations. The cloverest equestrian cannot ride two horses running opposite ways.
And a second scandal, largely caused by the first, is exposed by the same document. Among the officials under the Minister's command, no matter how capable they may be, initiative is not encouraged, constructive ability is not given full play, and aggressive methods are at variance with the traditions of the Departments.
We want no dictatorship in Canada. Parliament must remain supreme in the last resort, whatever powers we delegate to those chosen to manage our business departments on account of their special capacity. But one thing is sure as death,—this country can no longer afford, and must not consent, for the sake of an antiquated system and those who profit by it, to crawl from year to year at the pace of a snail or tortoise or a contortionist.

H. A. KENNEDY,
Lacombe, Alberta.

Editorial note.—Mr. Kennedy is the author of "The Story of Canada," "New Canada and the New Canadians," etc., and former editor of "The Times," (London, Eng.), "Weekly Edilton," and writer for the "Economic and Development Commission," 1918.

ANSWERS AUTOLYCUS

Editor Summerland Review, Summerland, B. C.,
Dear Sir:

The Summer School held last month under our auspices seems to have met with disapproval in some journalistic circles to judge by the article written by Autolycus in your last issue. Perhaps we might be permitted a few words in reply.
In the first place the lecture by Mrs. Henderson which has caused all the comment, was not given at the Summer School but later in the Rialto Theatre. It was delivered in response to numerous requests from people who had been unable to hear the previous lectures and was as well attended as any public meeting would be at this time of year.
Autolycus seems to think that the best features about the School was the meagre attendance but we had a satisfactory increase over last year and have already had inquiries for next year from many points in B. C. and Washington so that a steady growth is assured.
The Labor movement is international and we have no apologies to offer for studying conditions in Russia or anywhere else. There are Labor and Socialist Governments in Australia, New Zealand, Sweden, Denmark, Russia, France and England and we endeavor to keep in touch with all of them in order to profit by their advancement and to learn from their mistakes. We are obliged to take every opportunity of hearing speakers who have been to Russia as we know from hundreds of instances that it is impossible to get anything from the capitalistic press which is not biased against the United Socialist Soviet Republics. Just recently we read in the Daily Province of terrible famine conditions in Russia and a few days later learn from other sources that the Soviet Government is allotting hundreds of millions in gold to move the grain crop. Both reports can scarcely be correct and yet the Province features the famine story on the front page and says nothing whatever about the other. We are not guilty of "stupid, laudation of everything Russian" but at least want to know both sides of the situation.
Our Summer School is an open forum for the discussion of the vexed problems of the day and we welcome all ideas which may be of value in the development of Canadian art, music, literature, drama and economics. We hope we are sufficiently broad minded to learn from any individual or any country and welcome constructive criticism at all times. We have no time to waste, however, on that Early Victorian type of mentality which is so smugly self-complacent in its narrow insularity that it cannot grasp the significance of modern movements and never will.
Mrs. Henderson's expenses are paid by the Labor Party and the insinuation of Autolycus is only another exhibition of that childish hysteria over "Bolshevik gold" which has become a standing joke in our movement.
Thanking you for space, we are,
Yours sincerely,
Federated Labor Party
For Jack Logie, Sec.

NEWSPAPER IS THE BEST

"AD"; BILLBOARDS TO GO

NEW YORK.—Florenz Ziegfeld, Jr., world famous creator of the "Follies," has ordered destroyed 64 billboards facing highways and railroads near New York advertising his shows. "Because," says Ziegfeld—
"The public doesn't want unsightly billboards."
"Newspaper advertising is far superior to any other form of attracting the attention of the public."
"Newspaper advertising can accomplish its purpose without defacing the landscape."
"The signboard is frequently not read."
"In contrast, the newspaper is authoritative."
Hardware Dealer — Anything for you today Mose?
Mose—Yes, sah; do doctor told me as how I mus' take some iron for my blood, and I spects I might as well buy it from you.
Johnnie, the stork has brought you a little sister.
Aw, g'wan. Stork nothing. It was the milkman brought it. Doesn't it say on the wagon, "Families Supplied Daily."
Epitaph: "It didn't have time to stop at the crossing; he has plenty of leisure now."

PEACHLAND DOINGS

A Weekly Chronicle Furnished By Our Local Representative.

The Rev. Wm. J. Scott, of Vancouver, former pastor of the Peachland Baptist Church, was a guest of Mr. and Mrs. H. E. McCall last week. He left on Friday morning by stage to Summerland for his home in the city after about three months absence during which time he filled the pulpit in the Baptist Church in Kamloops.
Miss Flossie Clements returned last week after a pleasant visit at the Coast and after a few days at home returned to her position in Vernon.
Mr. and Mrs. George Lycett of Vancouver were guests of Mrs. Vivian last week and enjoyed their short stay in the community very much. Mr. Lycett is employed in the C. P. R. supply stores in Vancouver.
Mr. and Mrs. Butt of Calgary are visitors at the Ruffie home.
Miss Annie Kudelka, of the nursing staff of the Kelowna hospital, was home for a brief visit last week to see her brother William Kudelka.
Dr. Buchanan and Mr. I. Cousins were chosen last week by the local Conservative Association to represent them at the convention held in Penticton on Thursday. Messrs. Bulyea, Lang, Douglas and MacKenzie were the representatives to the Liberal convention held the following day, also in Penticton.
Mr. Martin Hendrickson of Penticton, a former resident here, was a visitor in town last week.
The regular monthly meeting of the W. C. T. U. was held at the home of Mrs. Sadler on Friday Sept. 19th. Devotional exercises were conducted by Mrs. Bulyea. Superintendents of departments for the ensuing year were appointed as follows: Evangelistic, Mrs. Bulyea; Loyal Temperance Legion, Mrs. Sadler; Little White Ribboners, Mrs. H. McCall; Anti-narcotic, Mrs. J. L. Elliott. The appointing of a superintendent for the scientific temperance instruction department, was left over for the next meeting. Plans were discussed for a proposed lecture by Mr. W. C. Kelley of Summerland about the middle of October, subject "Jean Val Jean."

MOTORISTS ARE BUILDING ROADS

Gas and Motor Taxes Make Up Fund For Building State Highways.

Through its two cents a gallon tax on gasoline and revenue from automobile licenses, which are lower than ours, Washington state is raising a fund of eight million dollars annually which is definitely earmarked for highway purposes and cannot be mixed with the general revenue.
State aid is given to primary highways, as in British Columbia. A program of construction for eight or ten year periods in advance is adopted and strictly adhered to, deviation being made only for circumstances of extreme urgency. The result is the building up of a unified highway system in accordance with a carefully considered policy, which is not subject to variation for political expediency. The neighboring state is certainly building an excellent system that will contribute much to its future prosperity.
Kootenay fruit growers affiliated with the Associated Growers of B.C. have received up to date three dollars per crate on account for Bings and Lamberts. Many of these are two-party contract members, who have no local and are packing individually and sending their packed fruit to the Associated warehouse at Nelson, where it is assembled and shipped in carloads. A further and final payment on these cherries will be made soon.
Kootenay growers do practically all their own cherry packing so that from the returns their cost of package and packing, etc., must be deducted to ascertain the net price. The two-party agreement was entered into only where the grower was not within easy distance of a local.
Brother—Say, sis, I want to introduce old Smithers.
Sister—Is he a good dancer?
Brother—I dunno about that, but his dad owns a chocolate factory.
The tragedy of the quitter is that he usually stops just as his second wind is rushing to the rescue.

SYNOPSIS OF LAND ACT AMENDMENTS

PRE-EMPTIONS Vacant, unreserved, surveyed Crown lands may be pre-empted by British subjects over 18 years of age, and by aliens on declaring intention to become British subjects, conditional upon residence, occupation, and improvement for agricultural purposes.

Full information concerning regulations regarding pre-emption is given in Bulletin No. 1, Land Series, "How to Pre-empt Land," copies of which can be obtained free of charge by addressing the Department of Lands, Victoria, B.C., or to any Government Agent.

Records will be granted covering only land suitable for agricultural purposes, and which is not timberland, i.e., carrying over 5,000 board feet per acre west of the Coast Range and 8,000 feet per acre east of that Range.

Applications for pre-emption are to be addressed to the Land Commissioner of the Land Recording Division, in which the land applied for is situated, and are made on printed forms, copies of which can be obtained from the Land Commissioner.

Pre-emption must be completed for five years and improvements made to value of \$10 per acre, including clearing and cultivating at least five acres, before a Crown Grant can be received.

For more detailed information see the Bulletin "How to Pre-empt Land."

PURCHASE

Applications are received for purchase of vacant and unreserved Crown lands, not being timberland, for agricultural purposes; minimum price of first-class (arable) land is \$5 per acre, and second-class (grazing) land \$2.50 per acre. Further information regarding purchase or lease of Crown lands is given in Bulletin No. 10, Land Series, "Purchase and Lease of Crown Lands."

Mill, factory, or industrial sites on timber land, not exceeding 40 acres, may be purchased or leased, the conditions including payment of stumpage.

HOMESITE LEASES

Unsurveyed areas, not exceeding 20 acres, may be leased as homesites, conditional upon a dwelling being erected in the first year, title being obtainable after residence and improvement conditions are fulfilled and land has been surveyed.

LEASES

For grazing and industrial purposes areas not exceeding 640 acres may be leased by one person or a company.

GRAZING

Under the Grazing Act the Province is divided into grazing districts and the range administered under a Grazing Commissioner. Annual grazing permits are issued based on number of head, priority being given to established owners. Stock-owners may form associations for range management. Fees, or partially free, permits are available for settlers, campers and travellers, up to ten head.

The Pedlar's Pack

By AUTOLYCUS

And now it is China to which we must look as a shining example for the uplift of our low standard of Christianity!

THE UNCHRISTIAN WE HAVE FOR A SMOKER!

long time been directed to hitch our wagon to the Russian star in the hope to one day attain to a higher level, but Russia now has a rival. The Rev. Dr. J. Goforth, who has passed many years of his life as a Presbyterian missionary in the celestial land, lately delivered a terrible rebuke to his brethren at home, declaring that General Feng and his Christian soldiers, now busily engaged in civil war, "live upon a much higher standard of Christianity than do the Christians of Canada." The ground for this declaration was the appalling fact that, at the Owen Sound Presbyterian General Assembly held this summer, the reverend gentleman actually "smelled whiskey," a thing he had never done in months of association with the Christian army of China. Also, and moreover, at that Assembly, he had seen a room set apart as a smoking room, and had to conclude that "the elders and preachers could not get along without their little smoke between sessions." This was naturally a sad contrast to conditions in China, where he had "never seen one of the Christian army smoking," and assuming that smoking is sinful and unchristian, the worthy Doctor has a distinct grievance. But what is his authority for assuming anything of the kind? We may admit that a "smell of whiskey" is somewhat out of place in an assembly of Presbyterian elders, and, in passing, may also feel a genuine admiration for the Doctor's keenness of scent, tempered with a little wonder at his apparent familiarity with the particular odour complained of. But that "unchristian" smoking-room is much harder to swallow than the whisky might be.

When we realize that the Rev. gentleman is actually serious in his pronouncement, we seem to be in touch with one, at least, of the influences which keep many people away from church. What man of ordinary breadth of vision would be disposed to listen to the preaching of an individual capable of looking at religion from such a preposterous point of view? And the trouble is that this particular Presbyterian is only one of many in various denominations. I heard a preacher only a few weeks ago refer to a character introduced in his sermon as a "good Christian who neither drank or smoked," and am quite sure that nine tenths of the men present were either amused or affronted, most of them being, to my personal knowledge, habitual smokers, and doubtless happier in their daily lives because of that solace. If such preachers would broaden their minds in these matters, and realize that smoking, for example, is no more "unchristian" than eating ice cream or candies, they would find themselves in closer touch with the people in their territories, and able to accomplish more good in direct proportion.

The city of Vancouver is, somewhat tardily, discovering that it is indulging in a surfeit of a debased imitation of a sport which

THE SPORT WAS ONCE KNOWN BY OF KINGS.

the title at the head of this paragraph. Horsing, under the conditions which it should properly enjoy, is as genuine and legitimate a form of sport as any other competitive pastime. But horsing, as known in this province, is a mere parody on the name. The element which should be the foundation of the whole thing appears to be practically negligible. Originally, the man who backed his horse to run faster than that of another, was also a breeder of horses, and took pride in the production of high quality—today we seem to be dependent on a string of horses from another country to make up a contest, and our own enthusiasm is chiefly confined to the pari-mutual end of it. This is said to cost the province something like six million dollars in a season, and the permanent benefit to British Columbia is not discoverable. This situation would be bad enough if the "sport" were indulged in within reasonable limits but when it extends into weeks and months at a stretch, and threatens to still further extend its operations, it becomes an absolute scandal. Public opinion being now thoroughly aroused, we may look for some decided check on the proceedings, and Tin Junt's loss will be our gain.

I noticed in one of the dailies a

"A Snapper Up of Unconsidered Trifles."

The Winter's Tale. Scene II, Act IV

short time ago a suggestion that the stumbling block of religious instruction in schools might

A CURIOUS PROPOSAL

being got over by substituting "The Pilgrim's Progress" as a textbook in place of The Bible. The idea seemed to be that those persons who objected to their children being grounded in their religious belief by means of Scripture reading, would probably consent to a foundation being laid by a course of readings from Bunyan's allegory, but I must admit I have so far been unable to see the logic of the proposal. The writer laid great stress on the beauty of language to be found in the book of the travelling tinker and Baptist preacher of Bedfordshire, and no one can dispute that point. But the Allegory was drawn from the Bible, which stands supreme in the grandeur of its poetry and prose, and why the fountain head should be set aside for one of its subsidiary streams is not very clear. The substitution might be approved by members of the Baptist denomination, but there the approval would probably end.

Fifty years ago, The Pilgrim's Progress could be found in most homes—today it is an extremely rare occurrence to come across a copy. Scholars read it for its literary qualities, much as they read Addison and Steele;—children probably seldom read it at all, their knowledge of it being restricted to such passages as may be found in their School Readers. Its uncompromising puritanism is largely a thing of the past, and has possibly taken with it some of that amazing egotism which regarded personal "salvation" as the one and only aim. The absolute selfishness of Christian in his desertion of wife and children in the abject flight from an imaginary wrath to come, has always struck me as the last word in miserable cowardice, and a very poor contrast to the human solicitude shown by Dives, who thought of his brothers even when suffering the torments of hell. If The Pilgrim's Progress ever becomes a text book in our schools as suggested, it will be a good thing to hold up the character of Christian as a "horrible example" of the sin of selfishness.

AUTOLYCUS

DISEASES OF APPLES

The percentage of disease, particularly rots and scald, found in apples in storage and on the market, depends, according to United States Department of Agriculture, upon their whole past history; that is, upon the conditions under which they were grown and prepared for market, the amount of disease they showed when they were shipped or when they went into storage, and, finally, upon the condition under which they were held in transit or in storage. The percentage of disease depends to a considerable extent also upon the length of time the apples have been kept in storage, those stored longest being the most seriously affected. Inspection of the commercial apple crop over a four-year period showed that the box crop suffered from a steady increase in percentage of disease from October till June; the barrel crop only from December to June.

An analysis of the records of the inspection service for 5,222 cars inspected during the four-year period, 1917 to 1921, is published in Department Bulletin 1253, "Diseases of Apples on the Market." Considering the inspections for the four-year period as a whole blue-mold rot occurred more commonly than any other disease. In the box crop, scald was second and other rots third; in the barrel crop, other rots exclusive of black rot, came second and black rot came third. Summer and fall varieties showed less disease, on the average, than winter or long-storage varieties.

In the barrel crop, the percentage of disease was less in cars from New York, Michigan, Virginia and West Virginia than in those from all other eastern states considered as a whole. The percentage of disease in the box crop was slightly heavier in cars from Idaho than in those from all other western states considered as a whole.

"So you propose to take my daughter from me without warning." Nervous young man—"Not at all. If there is anything concerning her you want to warn me about, I'm willing to listen."

A Startling Point Ardent Swain: "I'd go through anything for you." Flannor: "All right. Let's start on your bank account."

EFFECTIVE CONTROL PEACH TREE BORER

The United States Department of Agriculture has been investigating the use of paradichlorobenzene in southern Indiana for the control of the peach tree borer. The extent to which this chemical treatment has been adopted by the growers was gratifying. It was impossible to find a commercial orchard of any size which had not been so treated. There was almost total absence of borers from the treated orchards, most of which have now had three annual treatments. In the best orchards less than 1 per cent of the trees examined showed any sign of recent borer infestation, while untreated trees in this section are absolutely infested.

Flynn and O'Leary were employed as extra men in the repair shop of a large hardware concern. The "boys" were all old friends; and they jostled and sang and whistled without a let-up.

Said Flynn—This is the noisiest place I ever worked, Pat.

Said O'Leary—I believe ye, Mike. Th' only time it's quite here is when someone starts the gas engine and drowns the noise.

WATER NOTICE

USE AND STORAGE

TAKE NOTICE that R. E. Verrier and H. G. Detjen whose addresses are West Summerland, B. C. will apply for a licence to take and use 500 acre feet and to store 500 acre feet of water out of an Unnamed Meadow and creek which flows easterly and drains into Trout Creek, about 1 3/4 miles above its mouth. The storage dam will be located at the natural outlet of the meadow. The capacity of the reservoir to be created is about 600 acre feet, and it will flood about 50 acres of land. The water will be diverted from Trout Creek at our present headgates, and will be used for irrigation purpose upon the land described as lot 2887 and part of lot 2888 O. D. Y. D.

This notice was posted on the ground on the 29th day of July, 1924. A copy of this notice and an application pursuant thereto and to the "Water Act, 1914," will be filed in the office of the Water Recorder at Vernon, B.C. Objections to the application may be filed with the said Water Recorder or with the Comptroller of Water Rights, Parliament Buildings, Victoria, B. C., within thirty days after the first appearance of this notice in a local newspaper.

R. E. VERRIER, H. S. DETJEN, Applicants.

The date of the first publication of this notice is 18th September, 1924.

7-11

WATER NOTICE

STORAGE

TAKE NOTICE that Dominion Department of Agriculture, whose address is Ottawa, will apply for licence for the storage of 800 acre feet of water out of Crescent Creek also known as Paul Creek, which flows easterly and drains into Trout Creek, about two miles below No. 1 Summerland reservoir on Trout Creek.

The storage dam will be located at Crescent (or Paul) Lake. The capacity of the reservoir to be created is about 300 acre feet, and it will flood about 150 acres of land. The water will be diverted from the main stream at either the headgates of Summerland municipal system, or about 100 yds. above the Kettle Valley Railway Bridge over Trout Creek at the Dominion Experimental Station, and will be used for irrigation purpose upon the land described as Dominion Experimental Station, Part of Penticton Indian Reserve No. 1.

The licence applied for is to supplement a right to take and use water as per Licence No. 6492.

This notice was posted on the ground on the 21st day of August, 1924.

A copy of this notice and an application pursuant thereto and to the "Water Act, 1914," will be filed in the office of the Water Recorder at Vernon, B. C.

Objections to the application may be filed with the said Water Recorder or with the Comptroller of Water Rights, Parliament Buildings, Victoria, B. C., within thirty days after the first appearance of this notice in a local newspaper.

Department of Agriculture, Ottawa, Applicant.

By W. T. HUNTER, Agent, per R. C. P.

The date of the first publication of this notice is 11th September, 1924.

6-10

He Omitted To Tell Us What His Wife Said

But Thomas K. Kelly, of Minneapolis, a very successful business man, in addressing a retail merchants association covering many small southern towns, a few days ago, told a story that is exceedingly interesting. In part it was as follows:

A few weeks before my fortieth birthday, which was several years ago, my wife, handing me a good-sized bunch of letters one morning, the letters being addressed and stamped, suggested that I drop them in the mail box on my way to the office. I wore my raincoat that morning, as it happened to be raining, so I slipped the letters in the pocket of the coat, and, upon arriving at the office, I placed the coat in my locker, and forgot all about the letters. I did not wear that same coat again for several weeks, and that's where my trouble started.

Those letters happened to be invitations to my fortieth birthday party. The evening of the party came, the stage was all set. The dinner was supposed to be at 6:00 p.m., but nobody showed up. We waited until seven, but my friends failed to arrive, then lo and behold, my wife said to me, "Do you recall a morning some few weeks ago when I gave you those letters to mail? They were the invitations to your party." Immediately the thought struck me, "By golly, those letters are in the pocket of my raincoat at the office."

That incident reminds me of an old friend of mine who was in to see me the other day. He told me about a motor trip he had taken, driving from Minneapolis up North for a few hundred miles. It happened to be on a Saturday. He visited several towns on his trip, calling in at many stores, and he remarked to me, "Do you know there were about two stores in each of the towns I went through that were busy—the other stores didn't appear to be doing much of anything." That caused him to investigate, just as a matter of curiosity, so I asked him the names of the towns he visited. I then wrote to the newspapers in each of the towns and requested that they send me their papers of Thursday or Friday, before the Saturday when my friend called at these stores. That solved the problem. I found that in four out of five papers the other retail merchants in the towns where my friend had visited had failed to advertise in the newspapers, inviting the public to their store that Saturday, and the public not receiving an invitation, did not come, but the busy stores had invited them with a neat, effective ad, attractive in style and chuck full of common sense, and, naturally, that is where they went.

So the stores that failed to receive their friends were like my birthday party—the crowd didn't come.

I venture to say that in all the failures of retail merchants the last three years not twenty per cent of these same merchants advertised religiously in newspapers, whereas, if they had, their investment in newspaper advertising would have brought sufficient trade to prevent a great amount of their losses.

We are not handicapped today in unfolding our business the same as our forefathers were who were compelled to depend chiefly upon personal exploitation of the individual, for the circulation in those days was very small.

First of all the newspaper has circulation. A single newspaper will often cover from 60 to 80 per cent of the homes in its territory. (The Review covers more than 90 per cent). Advertising space in that paper will give a much greater return per dollar spent than will any other form of advertising on which postage is spent.

Second, people are accustomed to reading the paper. It is not difficult to get their attention as in the case of the circular letter, the booklet and other forms of direct by mail advertising.

Third, and best of all, it is timely. The advertiser is able to appeal to his audience by frequent advertisements.

The retail merchant, the minute he starts figuring on selling merchandise, has got to start figuring on the advertising that is going to do it.

Advertising certainly has many sides. It can scream, talk, or whisper, it can attract the eye or befuddle it. It can be an interesting story, or uninteresting piffle. There are just as many kinds of advertising as there are things to advertise. There is the sincere kind that breathes honesty and truthfulness, and which carries the reader right through to the end, and then again—there is the kind of advertising that says, "Beware, I am just trying to attract attention; I don't mean what I say, and I don't intend to make good on the extravagant claims I am talking about."

Newspapers, however, are not in the habit of publishing misleading advertising, and for that reason the public has unlimited confidence in newspaper advertising.

The retail merchant who will figure on spending two per cent of his gross receipts for newspaper advertising and one-half of one per cent for direct mail advertising, such as letters, post cards, etc., and prepares this advertising the same as if he were talking to his customers when they come in his store, will have no need to complain about quiet trade.

You may say, "How can I educate myself to write advertising?" I know many successful merchants who have gained their advertising education through reading and studying good trade publications which publish splendid articles in every issue. No one can prepare advertising for the goods you own and offer for sale as good as yourself. The merchant who is open-minded and visualizes his opportunity, getting his sub-conscious mind in working order, is not going to experience dull trade.

I am a great believer in taking my newspaper as a partner in my business. Every newspaper has hundreds of ideas that are workable and profitable that they are only too glad to pass on to retail merchants—a newspaper is a clearing house of ideas especially pertaining to retail business and I wonder some time if we try to get as close to our newspaper as we ought to, as they would like to be with us. If you are interested in your newspaper they will be interested in you.

The manufacturer, wholesaler or jobber who backs up his salesman with newspaper advertising finds practically 75 per cent of the salesman's work is already done when he goes to call upon a prospective customer, through the advertising that has already preceded him, the prospective customer already having a very good idea of the merchandise through the advertising.

The crying need today is more advertising!

Local Happenings

Louis Smith left on Sunday's train for Vancouver, to resume his studies at U.B.C.

A son, William Stevenson, was born to Mr. and Mrs. C. J. Amm on Wednesday, the 24th.

Moses Marshall went down to the Coast on Sunday, where he will study at the University.

C. W. Lees and Alex. Smith motored down from Kelowna Saturday. They returned the same evening.

Mr. and Mrs. C. Napier Higgin are due home tonight from the Old Country, where they have been since early in May.

Mr. and Mrs. J. L. Whiteford and family came down from Okanagan Centre this week to attend the marriage of Miss Grace Logie.

Chas. M. Broad left Summerland for Calgary last Saturday, where he will take up his old position with the United Grain Growers, Limited.

Mr. and Mrs. J. Pollock of Union Bay, V.I., with their baby, are visiting his brother and sisters here. They will leave on Saturday to return to the Island.

Miss Mona Winter was a visitor last week to Vernon, where she attended as one of the bridesmaids at the marriage of Miss Janet Vallance of that city to Mr. Albert Mitchell of Calgary.

Mrs. Treloven, who has been for a short time the guest of her niece, Mrs. T. B. Young, left this morning for Lethbridge, Alta., where she will visit for a time before continuing to her home in Hamilton, Ont.

Penticton guests at the wedding reception at the home of Mrs. Hogg yesterday were Mr. and Mrs. Wade, Mr. and Mrs. Gwyer, Mrs. J. F. Miller, Mr. and Mrs. Cummings, Mr. and Mrs. Malcolm Campbell, Misses Hilda Watson and Beth Stott and Mr. Thompson.

K. M. Elliott was an invited guest at an interesting wedding in Vernon last week when Miss Janet Vallance of that city became the bride of Albert Mitchell, Calgary. H. A. Blowey, a young lawyer of Vancouver and chum of Mr. Elliott, was best man. Mr. Blowey accompanied Mr. Elliott back from Vernon on Friday and returned from here to the Coast Saturday noon.

Mrs. R. C. Robinson of Seattle reached here on Saturday and is a guest of her sister, Mrs. Hogg. Mrs. Robinson was joined at Wenatchee by her brother-in-law, G. S. Harcourt, of New Orleans. K. S. Hogg motored down from Summerland to Oroville on Saturday to meet them there; returning that day. Mr. Harcourt is a guest at the J. L. Logie home.

SUMMERLAND WEATHER REPORT

Below is a report furnished by the Dominion Experimental Station here for the week ending Tuesday:

Table with columns: Date, Max. Min., Rain, Snow, Sun. Rows for Sept. 17-23.

Joe Gayton is leaving on Saturday morning to return to Brandon College.

Rex Barnes left this morning for Toronto, where he will attend University.

Miss Ella Bowering is leaving on Saturday morning to return to Brandon College.

Alan Steuart went out yesterday morning to Kimberley where he expects to be employed.

R. Purves left on Monday's train for Kimberley, B.C., where he hopes to obtain employment.

Men's calfskin Goodyear balmorals, regular \$6 to \$7. Sale \$3.95. See our windows. Beer's Shoe Store. 8L

Women's calfskin Goodyear balmorals, with medium heels. Regular \$5 to \$7. Your choice \$2.95. Beer's Shoe Store. 8L

Mrs. Snider, who visited for some time here recently with her sister, Mrs. T. Dale, is now with her son, Hilton, in Calgary.

Miss Betty Stevenson, of Ottawa, came in from the Coast on Monday morning to spend several weeks with her sister, Mrs. C. J. Amm.

A number of friends from Okanagan Centre came down on Wednesday to attend the reception in honor of Mr. and Mrs. H. Whitaker.

Mr. J. S. R. Brydges of the Kamloops branch of the Bank of Montreal, came down on Saturday to relieve Mr. Miller, of the local branch, who is at present on vacation.

Mr. J. Callin arrived from the Coast on Wednesday morning to be present at the Whitaker-Logie wedding. While here Mr. Callin is the guest of Mr. and Mrs. K. S. Hogg.

Mr. Jack Whitaker of Vancouver came in on Wednesday's train to attend the marriage that day of his brother, Hector. The latter arrived from Vancouver on Tuesday's train.

Mrs. J. A. Morrison came in on Tuesday from Vancouver and is the guest of Mrs. T. P. Thornber. Mrs. Morrison is on her way to Manitoba and after a stay here will continue east.

Mrs. T. Dale and Miss Ruth Dale are entertaining the lady members of the teaching staff of the public and high schools with a few other friends at an informal tea this afternoon.

Kenneth Thomas arrived home last week from Pittsburgh, where he has been taking a course in industrial engineering, and is spending a vacation with his parents, Mr. and Mrs. E. Thomas.

Mr. E. W. Bateman was a visitor at the home of Mr. and Mrs. T. Dale this week for a short time, stopping off on his way from Kelowna to Penticton, where he took the coastbound train to return to his home in Vancouver.

Members of the Ladies' Hospital Auxiliary have again taken up their regular monthly meetings, after the summer months. At the meeting held on Tuesday, September 23rd, at which Mrs. Solly presided, it was decided to hold a Cafeteria Supper, and sale of work some time in October, the date to be fixed later.

T. Charity went out on Tuesday's train to Kimberley, B.C.

R. F. Theed spent a few days recently at Gellatly, selecting apples for the Imperial Fruit Show.

Some particularly seasonable bargains are being offered by J. C. Melvin in a special two-day sale advertised in this paper.

Miss O. Wheeler, matron of the hospital, returned this morning from a month's vacation spent at the coast and prairie points.

Recent high winds caused the wrecking of a new henhouse recently erected by G. S. Drewett on his property south of Giant's Head.

Miss Bryce of the hospital nursing staff is leaving tomorrow morning for Arcola, Sask., where she will spend a three weeks' vacation.

John Denike, who has been teaching in Saskatchewan for some weeks, has recently taken a new school, this time at Forester, north of Tisdale, Sask.

Gordon Hayman, of Naramata, went out on Monday to the construction camp at Gorge, in the Fraser river canyon, in charge of H. Whitaker.

Miss Frances Rutherford has gone down to Vancouver, where she will attend school. She left yesterday with her uncle, Dr. Thompson, who has been a guest at the Rutherford home and was returning by motor to the Coast.

Willie Ritchie, son of Mr. and Mrs. Jas. Ritchie, who has been laid up for the past three weeks as the result of a kick from a horse, is still unable to be about. As the result of the blow fluid gathered about the knee, which so far has failed to respond to treatment.

Miss J. Sinclair left on Saturday morning's boat, planning to visit each of the auxiliaries of the W.M.S. in the Kamloops presbyterial, of which body she is president. She spent Sunday in Enderby and her work will extend as far west as Kamloops and to Revelstoke in the east. She expects to be away two weeks.

Mrs. Wright, Mrs. R. H. Agur and Mrs. H. A. Solly returned on Monday from a motor trip over the triangle tour, stopping off for several days at Nicola, where they visited with Mrs. R. H. Helmer and Mrs. E. J. White, both former Summerland residents. They returned by way of Vernon, stopping off there for two days.

Two thousand dollars was paid by a representative of the Japanese government for a yearling Holstein heifer, bred on the Dominion Experimental farm at Agassiz, B.C.

Seventy-four tons of mangels were produced on 1-1-30 acres at Lake Hill, B. C.

Fruit packing houses in Wenatchee district have adopted a schedule of 4 to 4 1/2 cents for packing. The Okanagan Growers Union have cut last year's scale by a half cent, but will still be above Wenatchee.

The gathering of cascara bark in the lower Fraser Valley, is evidently a remunerative enterprise, judging by the number of persons engaged in it. The bark is dried and exported.

FILLING OUT MATTRESS
A filling of dark hair is said to be preferable to one of white for a hair mattress, since the white must be bleached and this relieves it of its springiness.

Wedding

WHITAKER-LOGIE

A very pretty wedding was held at the home of Mr. and Mrs. J. L. Logie on Wednesday, September 24, at two-thirty, when their youngest daughter, Grace, was united in marriage to Mr. Hector Whitaker, Vancouver, in the presence of immediate relatives only.

The bride was attended by her niece, Miss Isabel Hogg, while the groom was supported by his brother, Mr. Jack Whitaker, of Vancouver. The bride was attired in ivory canton crepe, trimmed with real lace and bands of satin, with a veil of hand embroidered Indian lace. She carried a bouquet of Ophelia roses and pink carnations. The bridesmaid's costume was of gold taffeta shot with silver. Her bouquet was of pink roses.

The bride was given in marriage by her father, the wedding march being played by her sister, Mrs. R. C. Robinson, of Seattle. The double ring ceremony was used, Rev. W. A. Alexander officiating.

Following the ceremony a reception was held at the home of the bride's sister, Mrs. K. S. Hogg, about fifty friends of the young couple assembling to extend their good wishes and congratulations. Mrs. W. A. Alexander and Mrs. F. W. Andrew poured tea.

Mr. and Mrs. Whitaker were the recipients of many beautiful and useful gifts from a host of friends.

The bride's going away costume was of green silk crepe trimmed with chenille, coat of the same shade trimmed with bandings of stone marten fur, while a small toque of green with smart beige colored feather mount completed the costume.

After a few days stay in Vancouver, Mr. and Mrs. Whitaker will make their home for the time being at Gorge, where Mr. Whitaker will be in charge of the locating and construction of the Fraser canyon section of the transcontinental scenic highway.

WATER IN RESERVOIR STILL VERY LOW

Water in the reservoir had gone down to an alarmingly low level last Saturday, but there was some recovery over the weekend. Last Saturday's level was about four inches lower than the lowest previous measurement.

That the body of a dead animal had been found in the reservoir has become current report. It seems scarcely worthy of recognition by a contradiction, there being absolutely no foundation for the report.

BIG RAILWAY MILEAGE

Canada has one mile of railway to every 220 people, a larger mileage in proportion to population than any other country, with a total mileage of nearly 40,000. The government owns or controls a mileage of 22,663—the Canadian National Railways—making it the largest public-owned system in the world.

OAK AND HICKORY HARBOR PESTS

Peaches growing in the immediate vicinity of oak and hickory trees have again been seriously injured by plant bugs. The bugs breed on oaks and hickories, and when mature fly to neighboring peach trees where they puncture and feed on the fruit. Gum exudes from the punctures and in some cases the whole peach is more or less covered with little masses of gum. Later on scars form over the injured areas. Cutting down all hick-

ory and oak trees growing near the peaches is the only method of preventing plant bug injury.—Dominion Entomological Branch.

"Yes," said Mrs. O'Hallagan, "it was two o'clock the following morning when you came home the other night, and it was half-past two the next morning when you came home last night. But I'm telling you, if it's two o'clock in the morning when you come home to-night, or any other night the next morning, you'll have to get up and let yourself in!"

Bride-Elect Was Guest of Honor

Mrs. W. A. Alexander and Mrs. A. E. Nelson entertained about twenty friends on Friday afternoon in honor of Miss Grace Logie, whose marriage took place yesterday.

When all had assembled, each guest was asked to draw from a cleverly arranged wishing well, a heart on which was written a wish, the reading of which caused much merriment. Attached to each was another blank heart and on this each guest was asked to write a wish for the guest of honor, the words used to commence with the initials of the writer's name. Mrs. J. L. Logie acted as judge, awarding the prize for the best wish to Mrs. J. Gowans. Each married lady present was then asked to tell an amusing incident in her early married life and though several claimed that they could not remember anything amusing happening since they were married, a number of ladies responded, the winner being Mrs. C. H. Elsey.

Following the serving of a delicious tea and the cutting of the bride's cake, little Miss Audrey Stewart entered the room attired as a bride and carrying a huge basket filled with gifts which she presented to the bride-elect.

STARTED WITH FOUR PAGE NEWSPAPER

Impressive evidence of what has been the really rapid growth of this province was contained in a recent illustrated article in the Vancouver Province. A picture of the front page of Vancouver's first newspaper was given and the story run with it contained a review of its first issue.

It was in January, 1886, when the present Vancouver was a little settlement of one thousand people that the Vancouver Weekly Herald made its first appearance. It was a four page, seven column publication. The advertising rate was two dollars an inch and, according to the Province, the merchants of the community were lavish in their patronage of the paper.

WATER NOTICE

USE AND STORAGE

TAKE NOTICE that Peachland Irrigation District, whose address is Peachland, B.C., will apply for a licence to take and use 200 acre feet and to store 200 acre feet of water out of Wilson Lake, also known as Mile Creek, which flows southeast and drains into Peachland Creek. The storage dam will be located at the outlet of Wilson Lake. The capacity of the reservoir to be created is about 200 acre feet, and it will flood about 20 acres of land. The water will be diverted from the stream at a point about 2 1/2 miles west of Silver Lake and will be used for irrigation purpose upon the lands described as District Lots 2538, 912, 1184, 1183, 1185, 1800, 490, 221, and 2534. This notice was posted on the ground on the 22nd day of September, 1924. A copy of this notice and an application pursuant thereto and to the "Water Act, 1914," will be filed in the office of the Water Recorder at Vernon, B.C. Objections to the application may be filed with the said Water Recorder or with the Comptroller of Water Rights, Parliament Buildings, Victoria, B.C., within thirty days after the first appearance of this notice in a local newspaper.

PEACHLAND IRRIGATION DISTRICT, Applicant.

By Grant Lang, Agent.

The date of the first publication of this notice is 25th September, 1924. 8-12

MORE SCOTTISH BRIDES FOR CANADA

The number of Scottish brides who have sailed from Glasgow to Canada this year, has been rather striking. Many of these young ladies are going to prospective husbands who have only been a short time in Canada. Here is a striking group, on board the Canadian Pacific Liner "Marloch." Mr. Roderick MacLeod, the Gaelic singer, is in the centre of the group. The brides, from left to right, are: Miss Andrew, (Motherwell); Miss Graham, (Edinburgh); Miss Dunn and Miss Mair (Coatbridge).

FAVORS HOLY YEAR FOR ALL CANADA

Famous Canadian Padre Would Have Protestants Follow Example of Roman Catholics

The year 1925 has been proclaimed a holy year in the Roman Catholic churches throughout the world. Canon F. G. Scott, known throughout Canada for his services as padre with the Canadian troops in France, endorses the proposal and in the following letter, published in the Montreal Daily Star, appeals to other Christian churches to fall in line.

The Editor, Montreal Daily Star: Sir—"His Holiness the Pope has proclaimed the year 1925 a Holy Year. That is to say the Roman Catholic Church will use it as a time of deep and earnest striving to bring its members closer to God by deeper consecration of individual lives, more frequent attendance at services, and the exaltation of Christ as the Savior of a sinful world.

The significance of this to Canada is that about forty per cent of our population will make a real effort to

resist the tendencies of modern life to what is wrong and debasing and to turn—whole heartedly to God.

Now, how about the other Christian bodies in Canada? Are we to stand by and do nothing and look coldly and perhaps unsympathetically on the religious efforts of so vast a number of our fellow-citizens? I hope not. It would be indeed a painful spectacle to God and men.

I venture to propose that all the Christian bodies of Canada should, in their own way and according to their own methods, as they conceive them best and most efficacious, unite in the Spirit of revival and make 1925 a Holy Year.

What would this mean? It would mean, estimating the Anglicans at sixteen per cent of the population, and the Presbyterians, Methodists, Congregationalists and Baptists at about thirty-four per cent, that about ninety per cent of the total population of Canada would engage in a gigantic and enthusiastic endeavor to purify our life, individual and domestic, and that the Cross of Christ would be set up in a mighty Crusade against sin, and indifference. Is not that something worth striving for? It is possible that there may be some who would fight shy of such a movement because its instigator had been the Pope. But I hardly think there would

be many, and I certainly think they are not worthy of much consideration.

Everyone who has eyes in his head can see the appalling drift of men, women and children from the basal principles, not only of Christianity, but of common morality. Can we afford to lose such an opportunity of revival as the present occasion offers?

The hideous cataclysm of the war dislocated our whole economic machinery, and has brought misery and unemployment. These wrongs however will be righted in time. The war did worse things for us than that. It has dulled our finer susceptibilities. It has given us coarseness, apathy and a craving for the pleasures of the moment, in place of idealism, the sense of duty and the conviction that righteousness alone exalteth the nation.

Of course this is a general statement and must be qualified by the remembrance of the noble lives that are now being devoted to social service and the betterment of the world. But as a general statement it is true. Very humbly therefore I lay before the religious bodies of Canada the suggestion that next year, 1925, be observed throughout the length and breadth of the land as a Holy Year."

F. G. SCOTT.

St. Matthew's Rectory, Quebec. August, 1924.

The Newspaper Has the Greatest Advertising Influence

The Women's Advertising Club of Los Angeles, working through the Women's Clubs of that city, conducted a questionnaire on advertising media and their influence, which should be very interesting to the retail advertiser. The computation was made that 90 per cent of the buying is done by women and that millions of dollars are squandered every year in an effort to gain their attention. All walks of life were covered and the results figured on the basis of one thousand returns.

"Which of the advertising media influence you most?" was the question. The answer was announced as follows:

	Per cent.
Newspapers	86.0
Circular Letters	1.0
Announcement Cards	4.0
Booklets and Pamphlets	1.7
Magazine Advertisements	22.7
Program Advertisements	3.0
