Biggest Fight In Western Fruit Trade Now Being Fought On The Prairies

Nash Interests Determined to Continue Position of Supremacy in Western Canadian Fruit Business—Heads Up From Minneapolis Are In Conflict With Chiefs of Associated Growers of British Columbia.

Winnipeg, May 6.—The biggest fight which the trade of Western Canada has witnessed to control the wholesale fruit business of the prairies has been in progress in Winnipeg since last Friday, and is still on.

Conferences, discussions, arguments, even threats, have all been staged in a suite of rooms in the Royal Alexandra Hotel, where representatives of the Associated Growers of British Columbia and the jobbing trade of Winnipeg have been assembled. The jobbers include a number of officers of the powerful Nash interests from Minneapolis, which is represented by local managers of their four fruit houses in Winnipeg and a number from western cities and by H. B. Finch, general manager, Minneapolis.

The battle for supremacy has been continuous for five days, Sunday included. The B. C. Co-operative which claims to control 80 per cent. of the growers of the interior of British Columbia, decided some months ago to sell direct to the retail trade on the prairies through their own agents and managers, and to the jobbing houses of Winnipeg and Vancouver through an agent placed in each of these cities.

The fight, according to the jobbing trade and the retail merchants, who have been watching the prolonged conference with keenest interest, appears to centre around the desire of the fruit jobbing trade of Winnipeg to preserve their large organization, built up after many years of energy, while the aim of the growers is to secure for their organization the highest possible price for their produce. This, they claim, they have not been receiving in the past.

May refuse A. G. fruit.

The jobbers of Winnipeg state that they are going to do their best to see that their concerns do not go under and will refuse to handle the output of the Associated Growers on the terms laid down by the co-operative. They do not relish the co-operative entering into competition with their branches located in all the centres of importance in the West and in order to preserve their organization they declare they will deal with the independent growers, of which there are quite a number of substantial concerns in British Columbia. They declare they will secure their supplies from the independent and, if necessary, try and break into the membership of the Co-operative despite legislation which seeks to prevent this. They will go back to last year's arrangement, a fifty-fifty basis, it is stated, but nothing short of this.

Knotty alternative.

It is understood that the Associated Growers must secure the large fruit jobbing interests of Winnipeg to handle their output this season, otherwise they will have to go to a very large expense to secure the necessary quarters for offices and storage in Winnipeg, but if the jobbers handle the output in Winnipeg, they demand that they be given the opportunity to handle the fruit through their branches in the west on the same terms as in Winnipeg, which is not in accord with the plans of the Associated Growers.

The conference continues in progress today and the two interests are still far apart. The co-operative officers must take back to their board and members a reasonable agreement largely in the interests of the growers, or "go to the mat" this season with the jobbing interests of Winnipeg. This latter course will involve great expense, as the competition for trade would be the stiffest ever seen in the fruit-handling business of the prairies.

David McNair, general sales manager of the Associated Growers, and E. J. Chambers, president, are representatives of the fruit growers at the conference. Glenn Florence, Winnipeg agent of the Associated Growers, is also in attendance. Representatives from all the branches of the fruit jobbers in the west are present, as also the heads of the various fruit jobbing houses in Winnipeg.

GARNETT VALLEY DAM IS FULL

New System Carrying Large Volume of Water

With the exception of the completion of a lateral about fifteen feet long the work on the new Garnett Valley flume system has been completed and water has been running since the 25th of April. The work was started on the 17th of March and finished on April 24. A very great improvement in the service is made possible through the new channels. The new flumes, all of metal, are now taking the full run of the creek and are capable of carrying much more.

The Garnett Valley dam filled early this spring and has been overflowing for some time, and there will be possibly two or three weeks yet before the freshest season starts. This is a marked contrast to last year when the dam did not fill at any time.

Aeneas Creek which flows through Garnett Valley, is usually two or three weeks later than Trout Creek in its freshest period. The water in Trout Creek has been holding steady for the past month. The real flood season has not yet started.

GIVES ADDRESS ON FARM MECHANICS

Holmer Compliments Trout Creek Farmers' Institute

Before a representative gathering of members of the Trout Creek Farmers' Institute on Monday evening last, Mr. J. J. Embree gave a most interesting talk on "Farm Mechanics." Many simple devices were explained and illustrated by diagrams drawn on the blackboard. The correct way to set and brace a corner fence post was explained. A most interesting device for fastening and tightening up a wire fence gate was illustrated. Interlocking hurdles, which can be constructed in a few minutes, which lock one into the other and form a tight fence without the use of hay wire or nails, were explained and illustrated. A specially cut irrigation ditch plough, old worn out shovels converted into heavy hoes, vermin proof hen roosts; all those were explained. In fact Mr. Embree displayed an almost inexhaustible fund of inventiveness.

Included in the correspondence read by the secretary was a letter from Mr. R. H. Holmer expressing pleasure at the continued vitality of this Institute and giving some most interesting comments on "When to apply manure," a controversy which arose at a previous meeting and duly reported in The Review.

HOSPITAL REVENUE NOW ON INCREASE

There are more patients in the hospital than for many weeks; so many in fact that additional help is necessary and on Sunday Mrs. Fletcher was added to the nursing staff. A ward maid, Miss Mary Fisher, has also been engaged.

VOICES FROM MEMORY LANE

By A. B. CHAPIN

PROSECUTION WILL FOLLOW

Road Authorities Will Not Permit Water On Highway

Provincial road authorities will not be as lenient henceforth as they have been in the past to water users who permit irrigation water to flow from their lots onto the provincial roads. Formal warning to this effect is published in the advertising columns of this paper. J. C. Arkell, local road foreman, informs The Review that irrigation water has already been flowing onto the road at several points between Peachland and the southern boundary of his district and says that he has definite orders to stop this damage to the road, his instructions being to prosecute those who continue this practice. The surface of the lake-shore road is in good condition and every effort will be made to keep it so.

O. S. Maybee of Kelowna was fined \$10 and costs in the Ponticton police court last week for not having a municipal license for selling automobiles.

ASSOCIATED OPENS VANCOUVER OFFICE

R. Robertson, Well Known Co-operative Enthusiast In Charge

Mr. R. Robertson, Const representative of the Associated Growers of B. C. Limited, is now established in his new office at 110 Water Street, Vancouver. Since his engagement by the Associated he has been perfecting his plans and organization. Mr. Robertson has already been handling quantities of rhubarb from the Co-operative Union in the Hazle district. He will also handle strawberries and raspberries from the lower countries and then will follow the cherries from the Okanagan. Associated Growers have also leased a warehouse in Calgary.

APRIL DONATIONS TO THE HOSPITAL

Donations to the Summerland Hospital during the month of April are gratefully acknowledged by the matron, as follows:

Mrs. R. C. Lipsitt, a plant; Mr. R. Atkinson, 1 doz. eggs; Mrs. G. Johnson, 1 jar marmalade; Mrs. D. Keen, 5 doz. eggs, 1 jar marmalade, 1 jar jelly; Mrs. Charles Marshall, 1 qt. jar jam; Mr. A. R. Rose, neck apron; Women's Hospital Auxiliary, floor mop; Women's Institute, eggs for pro-

FEDERAL ACTION SEEMS ASSURED

Proceedings Against Western Fruit Combine Predicted

OTTAWA, May 6.—Federal action against the western fruit combine seems practically assured as the result of a conference here today between Louis Duncan, the investigating commissioner under the Combine Act, Hon. James Murdock and officials of the department.

Recently the attorney-generals of the four provinces waived their primary right of taking proceedings against the combine in order that the Dominion might have a free hand to do so.

While Mr. Murdock, after the conference, would not say what would be done, he added that he would take the question to the cabinet. It is fully believed that authority will be sought there to initiate action and that counsel will be engaged and instructed for that purpose.

COUNCIL TO BUY LAND FOR SHALE

Plan To Extend Giant's Head Siphon Is Approved

Summerland municipal council held a special meeting last Friday evening when the report of the water committee, recommending an extension of the irrigation service from the east end of the Happy Valley siphon, was received. For the present the extension would serve three small lots, about nine acres in all, the properties of L. Botturzi, L. Bartolomeo and R. Smith. The extension will pass some other properties now owned by the Development Company which will thus be rendered saleable and will no doubt take the service soon. The recommendation of the committee was adopted but it is understood that the matter will come up again for discussion at the next meeting of the council.

James Ritchie attended the meeting and discussed with the council the suggested purchase by the latter of a section of district lot 3307 on the east slope of Giant's Head. The council agreed to pay him \$400 for the section required which will be used as a source of shale for road purposes. The purchase price will be applied against water rates. The lining of the Bonnet flume on Paradise Flat was decided upon.

servings; Mrs. Armstrong, eggs; Mrs. W. H. Hayes, water cross.

CO-OP BECOMES MONEY LENDER

Marked Improvement In Financial Standing Has Been Made

Before the packing season opened last year the directors of the Summerland Co-operative arranged with the Bank of Montreal for a line of credit up to \$80,000, but according to the directors' report printed and distributed among the members only \$36,200 of this credit was used and that for a brief time early in the season for the entire loan had been repaid by the eighth of September, after which no further borrowing was necessary.

This situation is a marked contrast to that of the year before when financing was such a serious matter as to make operations very difficult. The change was due to the improved situation of the local with more prompt returns received through the Associated.

In 1923 the local paid the bank \$1,058 for interest. For the past season the bank's payments for interest on deposits exceeded the interest charged on loans by \$236.

RECORD ATTENDANCE IS LOOKED FOR

Special New Attractions Being Prepared for Valley Picnic

Indications point to a new record of attendance at the annual outing of Okanagan Valley farmers and fruit growers at the Dominion Experimental Station here on Saturday, June 13. Last year an attendance of 1200 was recorded. The second Saturday in June is the permanent date of this monster picnic which is now an annual affair.

Strong committees are already at work planning the details of the event. The official program will be short but very attractive. Considerable thought is being given to the matter of attractions for the children, both in the nature of sports and educational features.

BASEBALL CLUB SHARE'S IN CONCERT PROCEEDS

In Empire Hall Tuesday night, under the auspices of the Summerland Baseball Club the Musical Bekardts gave their entertainment which was greatly enjoyed by a fair sized audience. Bekardts is an excellent entertainer, a good singer, a clever comedian and a marvel in his handling of the Swiss bells, the xylophone and numerous other musical instru-

'Eat More Fruit' Slogan Canada-wide Campaign Now Being Organized

L. F. Burrows Now in Province Doing Preliminary Work of Organization—Plan To Greatly Stimulate Home Consumption of Canadian Fruit—Growers, Pools, Jobbers, Retailers and Public Expected to Co-operate.

"Eat More fruit" will be the slogan in the campaign that is being organized throughout Canada under the auspices of the Canadian Horticultural Council. Mr. L. F. Burrows, secretary of the council, who is taking charge of the campaign, had a conference late last week with the directorate of the Associated Growers Limited at Vernon, and from there went on to Vancouver to further organization plans. He has had a conference with Mr. H. P. Simpson, manager of the Berry Growers Co-operative Union, who has given the fullest possible support of the union in the effort to stimulate fruit consumption and thus assure better financial returns to the producers.

C.N.R. PURCHASE IS CONFIRMED

C. P. R. Has Bought Line Through Oroville Says Official

GRAND FORKS.—Consummation of negotiations whereby the Canadian Pacific Railway will take over that portion of the Great Northern line between Grand Forks and Princeton has been reached, according to the statement of B. Langtry, assistant superintendent of the Great Northern for this division.

The deal was reported as pending some weeks ago, when H. McLeod of Winnipeg, assistant chief engineer for the Canadian Pacific, made an inspection of the line. A considerable portion of the line runs across the international boundary line, linking Curley, Republic, Molson and Oroville, Wash., but the rail distance between Grand Forks and Princeton is fifty-seven miles shorter than the Canadian Pacific and Kettle Valley route.

The line is said to be particularly attractive to the Canadian Pacific with a view of handling concentrate shipments between Copper Mountain mine at Princeton and Trail Smelter; also for shipments from the Consolidated Company's plant at Trail to the Const for transshipment to Belgium and the Orient.

BRYSON WHITE HAS HEAVY FIRE LOSS

Home And Contents Destroyed By Fire On Monday

Bryson White, Dominion Fruit Inspector for the Okanagan, suffered serious loss on Monday when his home at Okanagan Centre was destroyed by fire together with his furniture and effects. Mr. White was attending a meeting of the Horticultural Club at Kelowna when he learned of his loss. It is said that he carried some insurance on the house but that there was no insurance on his furniture and personal effects.

OLD CARIBOO STAGE AGAIN IN SERVICE

One of the old relics of the pioneer days passed through the town on Thursday, Stage BX No. 15, which plied in the old days between Ashcroft and Barkerville. The ancient vehicle was brought down on a truck, and was on its way to Okanagan, Washington, where it will be used by the Okanagan-Cariboo Trail Association for publicity purposes. It is a typical six horse stage, and will be present at the Wenatchee Apple Blossom festival where it will prove of considerable interest in awakening recollections of the days when it and similar vehicles were in common use. A similar stage has been purchased for use on this side of the line and will likely be permanently kept at Kamloops. It will be available for all of the towns along the trail for pageant or exhibition purposes.

The wholesale dealers have agreed to assist the campaign by contributing on an equal basis. The manufacturers of packages, wraps, sprays, fertilizers and other materials used in the fruit and vegetable industries will also assist. It is impractical to approach each individual fruit and vegetable grower to secure his endorsement of the scheme and agreement to contribute on the above basis, but it is felt that, in view of the smallness of the amount asked, compared with the enormous benefits which will accrue practically no objections will be made.

Deferred action is deferred prosperity; particularly true in advertising your business

The Summerland Review

Established August, 1908.
Published at Summerland, B.C., every Thursday by
THE REVIEW PUBLISHING COMPANY, LIMITED
Ralph E. White, Editor and Manager

An independent family newspaper covering Peachland, Summerland and Naramata and adjacent districts.

Member of Canadian Weekly Newspapers Association.
Member of British Columbia Selected Weeklies.

Subscription Rates—In British Empire, in advance, \$2.50 per year; six months, \$1.40. To U.S.A. and other countries, \$3.00 per year.

Advertising Rate Cards and information respecting territory and samples of paper mailed upon request, or may be seen at the office of any advertising agency recognized by the Canadian Press Association.

Advertisers must have copy in by Tuesday noon in order to insure changes for standing advertisements. New display advertising copy can be accepted one day later.

All instructions for cancellation or alteration of advertising must be in writing.

Correspondence—Letters addressed to the Editor and intended for publication must be short and legibly written on one side of the paper only. The longer an article, the shorter its chance of insertion. All communications must bear the name of the writer, not necessarily for publication. The publication or rejection of articles is a matter entirely in the discretion of the Editor. No responsibility is assumed by the paper for the opinions expressed by correspondents.

Typographical Errors—In the event of a typographical error, advertising goods at less than the proper price, the newspaper will furnish letters to be posted in the store stating the correct price, but goods may not be sold at the price printed and the difference charged to the newspaper.

Thursday, May 7, 1925

CULTIVATING THE MARKET

No better or more promising course could have been taken for the purpose of enlarging the market for Canadian fruit and vegetables, particularly the products of British Columbia, than that now being prepared by the Canadian Horticultural Council. Not infrequently this paper has pointed out the possibilities of greatly increased sales in the Prairie and British Columbia markets.

Without question there is in the three prairie provinces a potential market greatly in excess of existing demands. It will become a permanent and valuable market for our fruits and early vegetables.

There will be no objection from fruit growers to the proposal that shippers withhold from them a third of a cent a package for the purpose of carrying on the "Eat More Fruit" campaign.

That recent conference of American Methodists in which they endorsed the unification of the Northern and Southern branches of their church was just following the good example set by Canadian Methodists, Presbyterians and Congregationalists.

THE ANSWER TO "WHAT NEXT?"

With college courses sent out by radio, photographs by telegraph and cable, talking movies by the "phonofilm," mail by airplane, food by capsules, the oft repeated query is "what next?"

The answer to this question is a general one to be sure, but it can be answered by asserting that almost anything and everything will be "next" that human ingenuity can conceive and that human skill can work out. As youths we read Jules Verne as fancy. Today we accept his romance as facts. In truth, his works already are obsolete. Books on science, medicine, art, law, engineering and business methods become partially useless before the editions have been distributed.

It is scarcely to be wondered that styles, customs and habits change with the passing age. Rather it is to be wondered that the common run of people retain their solid virtues and innate principles and standards of fellowship as they do.

What next? A nobler conception of life and morality and a finer standard of government and citizenship. If we are wrong in this prediction we are at least right in refraining from making an opposite one.

"The inheritance tax is more humane, anyway. They wait until the poor fellow can't suffer," says a contemporary. Just how do you know he isn't suffering? we ask.

PERSISTENCY

If consistency is a jewel, persistency is its twin brother. Outside of the fundamentals of honesty and ability, there is nothing that spells success like persistency. The man who hangs on, while others drop off, is the one who reaches his destination and goal.

How many times have we known this to happen, even in the smaller things of life! How often is the story of success written around the fellow who keeps hitting the pace, day after day and year after year. There is no field of endeavor in which persistency does not enter as a ringing-true virtue. Men have built great business enterprises by persistency in advertising. The foundation to many a fortune has been laid by persistency in thrift, economy and small savings. Men have persisted in the fields of politics, and have finally reached high positions of state. Youths have sacrificed at the altar of persistency in seeking education and have seen their ambition realized. Others have persisted and broken the fetters that bound them to wrongful habits and have been thus permitted to enter into newness of life and fresh fields of usefulness. Persistency, thou too art a jewel.

Speaking of "Better Homes Week," just when are we going to have a "Better Stay At Home" week?

They say jazz music can't live much longer. It's just a question whether we or the jazz can hold out the longer.

They claim there's an undiscovered continent between Alaska and the North Pole. Some of those American defeated candidates may yet have their chance.

Timely Hints For the Orchardist

Specially prepared for The Review by J. Tait, District Field Inspector.

Winter Injury

Have you examined all your trees in the orchard this spring for winter injury? If not try and find time now to do so. Trunk injury in Apples and pears is more or less prevalent, and treatment is essential; slit the bark on the North and West sides with a heavy knife. If the bark has raised from the trunk tack it back with small nails.

If re-seeding of alfalfa has not been already done, prepare ground well and seed by the end of this month.

Now that the young chicks are running all over, have some place that they can get shade. Nothing better than running in the corn or sunflower patch. See that the mash hopper and drinking fountain are placed in a convenient shady place.

From Our Exchanges

THE VACCINATION SCARE—

Where is the smallpox epidemic which has led to the drastic passing of an Order in Council compelling vaccination in every section of the province? In places where the vaccination order is being enforced it is meeting with small response from the public. Only a few hundreds are submitting to the needle. The rest of the people are escaping either through proof of previous vaccination or through filing an affidavit of conscientious objection. Either everybody should be vaccinated or none at all. Immunizing a few does not bring immunity to the country.

Apart from the controversy over the subject of the value of vaccination, it does seem strange that this compulsory vaccination should be forced upon us by the ban of the United States. It is also strange that the coast business interests, affected by the ban are so influential that every hamlet in B. C. has to be saddled with this vaccination order although there is no sign of a smallpox epidemic in the upper country.

It seems rather ridiculous to read of Dr. Young going to Seattle hat in hand to ask the American authorities to "please lift the ban."

There is as much smallpox south of the line as north of it. Why did our medical authorities not clap on a similar ban on all incoming Americans?—Revelstoke Review.

EGGS ARE ALL SOLD WELL IN ADVANCE

Growing Demand For Output of Local Organization

All eggs shipped by the local egg association are going out to fill standing orders. This is in marked contrast to the condition a year ago, when the association was experiencing some difficulty in finding buyers and each week was forced to consign a considerable portion of its output to Vancouver markets. In fact instructions are coming in by wire and mail to increase standing orders, so much so that Manager Sanderson is experiencing great difficulty in getting eggs enough to meet the demand.

Along with better demand there is a higher price, being a recent increase of five cents a dozen, with prospects of still better prices. The price for live poultry, says Mr. Sanderson, is about fifty per cent higher than this time last year.

LECTURES ON BIBLE AND BRITISH EMPIRE

Interesting Illustrated Address On Work of Bible Society

Summerland Baptist Church was full on Friday evening when Dr. Ogden gave his illustrated lecture on "The British Empire and The Bible Society."

Dr. Ogden started to take the audience around the British Empire and show what the Bible Society has done for so many parts of the world. He showed many beautiful pictures of Australia, New Zealand and the Fiji Islands, and told how the Fiji Islanders, who were once so fierce that no white man could land, showed their loyalty to the British Empire in the Great War. It was through the Bible Society that the Fiji Islanders became so civilized. Dr. Ogden, however, was unable to finish his lecture but promised to come back again at some future time to do so.

After the address Dr. Ogden requested that the Summerland churches elect their officers for the coming year. Dr. F. W. Andrew was re-elected president and Mr. R. H. English, secretary-treasurer. Dr. Ogden then asked that representatives from each church be chosen to form a committee to carry on the work of this society in Summerland. The following were chosen: Union Church, Mr. A. G. Munn and Mr. G. Harding; Methodist Church, Mr. T. G. Beavis and Mrs. Angove; Church of God, Rev. W. Wright; Baptist Church, Mr. W. C. Kelley and Mr. J. W. Rutherford; Episcopal Church, Mrs. Solly and Mr. G. W. Cope.

There will be a meeting of this board at an early date to make arrangements for means of collecting for the Bible Society.

boach.

Frank Robinson, son of Mr. and Mrs. W. J. Robinson, met with a painful accident on Tuesday while playing baseball in the school grounds during lunch hour, falling heavily and breaking two bones in his right arm. He was given first aid as far as possible and taken to Penticton for treatment by Dr. MacGregor.

The final business meeting of the Methodist Church for the year ending April 30th was held on Wednesday, the Rev. H. J. Armitage presiding. The annual reports were satisfactory, and it was stated by the treasurer that, with a small grant from the Ladies' Aid, all accounts would be liquidated.

NARAMATA NEWS

Current Events of Town and District

Mr. Partridge and son Bert are persistent fishermen this spring, and on Friday evening secured a beautiful trout weighing eleven and a quarter pounds.

The April meeting of the W. C. T. U. was held last week at the home of Mrs. Mitchell, with a good attendance. Much business was done, after which refreshments were served by the hostess.

At the Methodist service on Sunday afternoon the Rev. H. J. Armitage preached on the giving of aid and sympathy to the weaker brother. Mr. Scourrah of Summerland presided ably at the organ.

Mr. Stanley Allan arrived in town late on Sunday evening, after a long detour through Oregon in his automobile, the road between here and Vancouver being closed in places. Mrs. Allan is expected back from Vancouver in a short time.

At the regular meeting of the Women's Institute on Tuesday the May Day festivities were advanced and other business disposed of. Mrs. Cross gave a demonstration of needlework, and Miss Dora Cross played a pianoforte solo. The Institute is donating \$25 towards the building of a bathing house on the

PUBLIC URGED TO EAT MORE APPLES

Government Proposes Campaign To Assist the Growers of British Columbia

Winnipeg.—L. F. Burrows, secretary of the Canadian Horticultural Council, formerly with the horticultural branch of the department of agriculture, Ottawa, is in Winnipeg in connection with the advertising campaign which the government has been urged to put on by the growers of British Columbia, the slogan of which is "Eat more apples."

In the old country this year Washington growers are very aggressive and are spending large sums in furthering the interests of their products.

When a similar advertising campaign was carried out in Canada a few years ago the method adopted was to assess jobsites among others, \$5 a car for the purpose of assisting funds. This did not look like a large amount but the total was \$14,000 at the end of the season.

It is not known what programme has been prepared by the department but it will receive endorsement of the trade to some extent, it was stated today.

RE-ORGANIZE BOY SCOUTS ASSOCIATION

Officers Elected And By-laws Prepared For Approval

An enthusiastic meeting of the Summerland Boy Scouts Association was held in the Parish Hall on Wednesday of last week. A good number of members, the parents of Scouts and Cubs and others interested in the scout movement were present and discussed matters pertaining to the scout work. The desire was expressed to have as members of the association a larger number of interested persons and to see more sustained interest taken by its members in their organization. The following officers were elected: President, Dr. F. W. Andrew; Vice-president, Mr. G. C. Benmore and Secretary-Treasurer, Mr. S. A. Macdonald. The Rev. H. A. Solly and Messrs. F. Mossop, C. E. Bentley and G. Y. L. Crossley were elected to the executive of which the Scoutmaster is a member by virtue of his office.

The executive met on Monday of this week and drew up by-laws to be approved at a meeting of the association. Mr. Benmore and Mr. Mossop have consented to help the Scouts in preparing their spring entertainment which will take the form of a minstrel show. An attempt will be made to re-organize the cubs. The executive hope for a visit of the Provincial Commissioner in the near future.

PRAIRIE PROSPECTS LOOKING BRIGHT

Increased Buying Power of Prairie Farmers Will Benefit Okanagan

Seeding was started earlier on the Prairies than usual and the seed bed generally is in excellent condition, according to the first crop report of the season issued by the bank of Montreal. The season is three weeks earlier than usual in Ontario and also earlier than the average in eastern Quebec and the Maritime provinces. In British Columbia the season is about two weeks late. With an abundance of moisture in the soil and other conditions favorable the outlook on the Prairies is bright. This followed with a season of good grain prices should mean much to British Columbia, particularly in the Okanagan. A ready market for our fruit may be looked for on the Prairies, as a result of better crop conditions.

ODD FELLOWS AT PENTICTON SERVICE

Summerland Odd Fellows were well represented at the celebration at Penticton of the 100th anniversary of Odd Fellowship when the Penticton lodge marched to St. Saviour's, where a special sermon on "Love and Brotherhood" was delivered, by Rev. Canon Thompson. Following the church services the members assembled at the lodge rooms where A. S. Fawcett, N. G., thanked the Summerland brothers for their attendance.

Short addresses were also given by Bro. Glass, P. G. M., Bro. O. E. Fisher, D. G. M. and Bro. R. S. Jackson of Summerland, D. D. G. M.

A safety razor is an instrument to make us appreciate lying in a barber's chair.

Wedding

STEUART-BARKWILL

St. Stephen's Church was the scene of a beautiful wedding at 10 a.m. on Monday last, when Miss Eva Barkwill became the bride of Mr. Allan Stewart. The ceremony was performed by Rev. H. A. Solly. The bride was given away by her father, Mr. D. R. Barkwill. Mr. Roy Stewart, brother of the groom was best man and Mrs. J. C. Barkwill, lady of honor. Mr. G. W. Cope presided at the organ.

After the ceremony a reception was given at the home of Mr. J. C. Barkwill, brother of the bride, over twenty guests being present.

The bride was the recipient of many beautiful and useful presents.

After their honeymoon Mr. and Mrs. Stewart will reside in the Roberts cottage in Peach Orchard.

BRIDE-ELECT WAS SURPRISED BY SHOWER

Miss Eva Barkwill was the guest of honor at a surprise party given last Friday afternoon at the home of Mrs. Fudge, Peach Orchard, when more than twenty friends gave her a miscellaneous shower. The room was beautifully decorated with apple blossoms and a table was specially decorated for the purpose of carrying the many beautiful and useful gifts. After the presents were passed around for all to view, a pleasant social afternoon was enjoyed with music etc., including a solo from the bride-elect.

At a social evening held by the members of the Summerland Operatic Society, Miss Eva Barkwill, who played the character of Katisha in "The Mikado," and whose marriage was to take place in a few days, was presented with a half a dozen stainless knives and forks.

Why He Celebrated Alone

Ephriam had put on a clean collar and his best coat, and was walking majestically up and down the street. "Aren't you working today, Ephriam?" asked one of his acquaintances. "No, suh, I see celebratin' my golden weddin' suh." "You were married fifty years ago today?" "Yes, suh." "Well, why isn't your wife helping you to celebrate it?" "My present wife, suh," replied Ephriam with dignity, "ain't got nothin' to do with it. She de fo'th."

SOAMES ARE COMING IN "DEAR BRUTUS"

Announcement is made in today's paper of the coming to Summerland of Mr. and Mrs. A. L. Soames and their company of Kelowna players in "Dear Brutus." Mr. and Mrs. Soames are well known to a large portion of our readers and their coming to the Empire Hall will be looked forward to with keen anticipation. "Dear Brutus" is a comedy or fantasy in three acts. Special scenery has been painted by E. H. Emmons, of Kelowna, whose scenery for "The Mikado" was greatly admired. "Dear Brutus" will be given at Kelowna May 19, and at Vernon on the 21st and here on the 26th.

PICTURES HUNG IN COUNCIL CHAMBER

Pictures of the Duke of Devonshire, the Duchess of Devonshire, Baron Bing of Vimy and Lady Bing now adorn the north wall of the council chamber. The four autographed pictures, presented to the municipality after respective visits of the Duke and Duchess while he was governor-general, and more recently of Baron and Lady Byng, during his present term of office as governor-general, have been mounted and framed. Those of the Duke and Duchess of Connaught, who also paid Summerland a similar official visit, are missing.

TEACHER PRESENTED WITH BEAUTIFUL BOWL

Miss Mary Long, of Penticton, is now in charge of Miss Nicholson's room in the Central School having taken over the duties on Friday last, the first day of May. On Thursday afternoon the pupils of that room joined Miss Nicholson in a picnic on the College grounds. On Thursday morning the children surprised Miss Nicholson when they presented her with a hand painted china bowl finished with gold leaf.

SYNOPSIS OF LAND ACT AMENDMENTS

PRE-EMPTIONS

Vacant, unreserved, surveyed, Crown lands may be pre-empted by British subjects over 18 years of age, and by aliens on declaring intention to become British subjects, conditional upon residence, occupation, and improvement for agricultural purposes.

Full information concerning regulations regarding pre-emptions is given in Bulletin No. 1, Land Series, "How to Pre-empt Land," copies of which can be obtained free of charge by addressing the Department of Lands, Victoria, B.C., or to any Government Agent.

Records will be granted covering only land suitable for agricultural purposes, and which is not timberland, i.e., carrying over 5,000 board feet per acre west of the Coast Range and 8,000 feet per acre east of that Range.

Applications for pre-emptions are to be addressed to the Land Commissioner of the Land Recording Division, in which the land applied for is situated, and are made on printed forms, copies of which can be obtained from the Land Commissioner.

Pre-emptions must be occupied for five years and improvements made to value of \$10 per acre, including clearing and cultivating at least five acres, before a Crown Grant can be received.

For more detailed information see the Bulletin "How to Pre-empt Land."

PURCHASE

Applications are received for purchase of vacant and unreserved Crown lands, not being timberland, for agricultural purposes; minimum price of first-class (arable) land is \$5 per acre, and second-class (grazing) land \$2.50 per acre. Further information regarding purchase or lease of Crown lands is given in Bulletin No. 10, Land Series, "Purchase and Lease of Crown Lands."

HOMESITE LEASES

Unsurveyed areas, not exceeding 20 acres, may be leased as homesites, conditional upon a dwelling being erected in the first year, title being obtainable after residence and improvement conditions are fulfilled and land has been surveyed.

LEASES

For grazing and industrial purposes areas not exceeding 640 acres may be leased by one person or a company.

GRAZING

Under the Grazing Act the Province is divided into grazing districts and the range administered under a Grazing Commissioner. Annual grazing permits are issued based on numbers ranged, priority being given to established owners. Stock-owners may form associations for range management. Free, or partially free, permits are available for settlers, campers and travellers, up to ten head.

World's Greatest Bluffer Starts Serving Term In Prison At Leavenworth

Oil Fields the Final Waterloo For Man Who Claimed First Scaling of Mt. McKinley and Then Discovery of North Pole

Written Specially for The Review By Robert Fuller

Leavenworth, Kansas. — Dr. Frederick A. Cook has returned to the practice of medicine. It was against his will, but nevertheless for the next 12 or 14 years, should his health permit, medicine will be his profession. His services are free. He is ministering to the ills of his fellow convicts in the Federal prison here. He is No. 23,118.

So opens one of the late chapters in the career of the world's greatest bluffer. Should he live to serve out his term of 12 to 14 years, he will be 72 years old when he again steps into the sunshine of freedom. He was born in Sullivan County, N. Y., June 10, 1865.

"Doc" Cook, the man who has bluffed in a big way all through life, has never yet put one of them across. But he is still trying. Only last week in Fort Worth, Tex., he attempted a bold and grand bluff—of how he had refused to join a jail delivery. This was just before his transfer to the government prison here. Wardens Biddle and Zerbst of this institution will perhaps have many such bluffs and brainstorms of the famous doctor to deal with before he says goodbye.

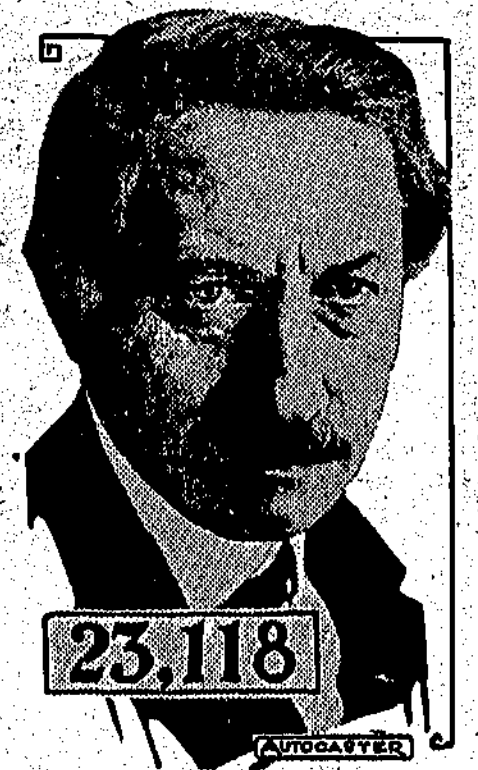

If the reader is of the younger generation, perhaps they are not familiar with the doings of Doc Cook. Here are some of his bluffs—one of which he cashed in on—but was caught.

Doc Cook claimed to have been the first man to scale Mt. McKinley. He was given a seat in the hall of fame beside such explorers as Agassiz and Henschel. Later his claims were disproved. This was in 1906.

Claimed He Had Reached North Pole

In 1909 he returned from the North, less than two weeks ahead of Admiral Perry, the real discoverer, claiming that he had reached the North Pole. He returned by way of Denmark— which country officially honored him. New York gave him the "freedom of the city" and hung garlands of roses about his neck. Perry's sudden return with authentic data and proofs of he himself having reached the pole was the bomb which exploded all of

Doc Cook

"In his prison cell he sits—may be thinking of his beloved North Pole—his greatest hoax on the world. It was "oil" this time and it landed Dr. Frederick A. Cook in the U. S. Prison at Leavenworth, Kansas.

Doc Cook's claims—and the praise and honor he so gloried in was quickly turned to ridicule and scorn.

The nation's scorn was so great that Doctor Cook left the country, going to Borneo. There is no record of his bluffs on the wild folks of the East Indies, but that there were some, there is no doubt.

No sooner had the "famous" explorer returned to the United States than he was busy again "stringing" suckers. His ideas were along new avenues, however, for, whereas he always had specialized on scientists, royalty and a trusting general public, he now turned his attention to widows, orphans and poor folks who wanted to get rich quick by the oil-well route—and he stung them to the tune of some \$4,000,000.

His Oil Ideas Brought \$4,000,000

It would seem that his idea of a going concern was to consolidate some 800 bankrupt oil companies with dry wells and make them into one solvent company with flowing wells. His "sold" the idea of the

big company so well to the inexperienced and ignorant, that he was rolling in millions when the government stepped in to investigate.

Conviction was obvious from the first. He was sentenced to serve 14 years.

To show the workings of Doc Cook's brain—he sued a Fort Worth newspaper for libel, claiming \$1,000,000 damages—after he had been convicted.

Doc Cook had rare gifts, had they been used in the right direction. He was endowed with a rare personality, a beaming smile and affability that won the confidence of strangers. He started life well enough—but he never could control the desire to bluff. Leaving the home place up state in New York he went to Brooklyn where he drove a milk wagon until he had earned enough money to start through medical college.

He was a member of Admiral Perry's party on one of the earlier explorations—but had been missing for some years when he came from the north with his announcement of having reached the pole. Even after all of his claims were disproved he maintained his stand and even went forth on the lecture platform to carry out his bluff. However, his pictures were old, his diaries falsified and in no way had he data which would stand inspection.

He made the gum-drop candy famous—by claiming that by feeding the Eskimos these colorful sweets, they braved the intense cold and lead him to the pole.

If in the prison library here there is a Who's Who, Doc Cook will likely gleam a bit of satisfaction, because there amongst the great is his name.

Disappointed to Find He Was an Ex-Premier

Sir Robert Borden Sadly Disillusioned in His Home Riding of Halifax

Having represented the city of Halifax in the Commons for many years, Sir Robert Borden for a time believed he was no stranger to the good people of the eastern gateway to the Dominion. He was sadly undeceived, however, shortly after he laid down the onerous duties of premier, according to the Toronto Star Weekly.

Included among the large number who pressed forward to meet him at an informal reception in Halifax was a middle-aged lady well known for her interest in child welfare.

After the manner of so many other one-idea enthusiasts, this lady imagined everybody else must necessarily be particularly interested in her particular field, and when she got the chance to talk to the guest of honor launched forth into her favorite topic.

Sir Robert was bored, but did his best to stimulate a polite interest, though listening with only half an ear.

Suddenly he became all attention, when he realized the lady was thanking him profusely for what he had done to make the lives of little babes healthier and happier. He was particularly puzzled when he heard himself referred to as "the greatest benefactor of future generations this country has ever known."

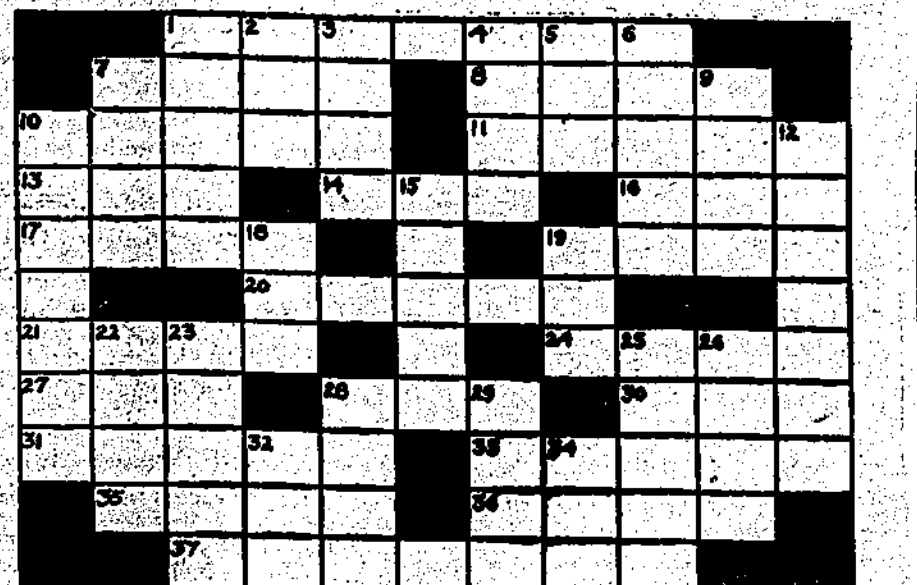

Sir Wilfred Laurier would have carried off such a situation with graceful ease. Hon. Arthur Meighon would have looked wise and maintained a discreet silence. Premier MacKenzie King would have tactfully changed the conversation.

But however great may have been

The Review's Crossword Puzzle

We tried to find a harder puzzle, but decided to give you another chance at an easy one. This one was arranged by Mrs. C. W. Hawley. Mrs. Hawley has a sense of humor, and she carried it right with her when she started on this puzzle. Don't let her humor throw you off the track though. You will find all her definitions correct and interesting, although at first glance you may think they are misleading. We'll give you thirty minutes for this one.

HORIZONTAL

- 1. Its misuse is inexcusable.
7. It takes more than one to make it.
8. In the eye and in the sky.
10. To spread one's self boastfully.
11. Canvas shelter (Plural).
13. To move slowly.
14. Adam did and we've had to work ever since.
16. What you can't stand up and do.
17. An Indian Tribal appellation.
19. Lima is its largest city.
20. This word could apply to: "Jack be nimble, Jack be quick."
21. To pull along by main force.
24. An agreement.
27. Eternity.
28. A tree with chewy bark.
30. The unfortunate absent member at the Ladies' Aid.
31. What the boss did to the office girl, while she was doing it to a bill of lading.
33. What you are as soon as you are out of bed.
35. What Abe Lincoln pulled the pig out of.
36. Cupid's best friend.
37. Half man, half beast.

VERTICAL

- 1. What dad does to the coal pile with speculative eye in cold weather.
2. What we should hate to ride into town on.
3. A small sunken court in front of a basement.
4. A very simple amount or particle.
5. A form of the verb "To Be."
6. What a small boy does when he introduces water to his face and hands.
7. A small piece of ground.
9. What gossip creates.

his ability in other lines, Sir Robert Borden never was a nimble-witted politician.

Try as he would, the ex-premier could not recall any child legislation of his that deserved such extravagant praise, and said something to this effect to his fulsome admirer.

"Legislation? Legislation?" said the lady, with a look of extreme surprise. "What has legislation to do with your business?"

"As member of Parliament and former premier, I am naturally supposed to have something to do with legislation," explained Sir Robert, his brows compressed in perplexity.

The lady gasped with dismay, then said: "Oh! Are you a member of parliament? I am so disappointed! I thought you were the man who condensed milk for babies!"

The Pedlar's Pack
By AUTOLYCUS

Of all forms of remedy ever devised for the evil of unemployment the dole system is easily the worst. As an emergency measure to tide over critical periods it may possibly have some shadow of excuse, but that is the most that can be said for it. Its continuation year after year is no less than an unbelievable negation of economic law and good plain common sense, and it can fairly be indicted as one of the main agents in the perpetuation of discontent and unrest. In this country the system never made much headway, and in those cities which felt constrained to adopt it, the abuses were soon noted. It was reserved for the Socialistic borough of Poplar, in the east end of London to bring the dole principle into its greatest activity, and by the slow but sure operation of poetic justice, Poplar is responsible for its hardest knock. It seems that under the direction of Mr. Geo. Lansbury, known to fame as an apostle of all sorts and conditions of Socialism, the "wages" paid to unskilled laborers under the Poplar municipality were found to be actually far higher than the scale of pay earned by skilled mechanics elsewhere, and were disallowed by the governmental authorities, the excess being charged back to the Poplar councillors personally. This was a horse of another color—it was one thing to pay extravagant "wages" to Socialistic voters out of public money, but quite another to have to personally foot the bill. Accordingly the decision of the auditors was appealed against, but in vain, the House of Lords having recently dismissed the appeal. The doughty councillors appear to have entertained some fleeting notions of posing as martyrs and going to jail in default of paying, but their courage failed and they are now meekly asking for a remission of the penalty on the score of unsettled conditions at the time of their extravagance. If the authorities are as firm as they ought to be, there will be no remission whatever, and the gay triflers with public money will receive their lesson.

I note that at a conference on the labor question in London the other day, Sir Alfred Mond made the suggestion that the money being used for doles might be better used in payment for certain needed work, and that his suggestion is receiving "a measure of support." Why only "a measure"? The proposition is so evidently sane and reasonable that one would think it called for a great deal more consideration than is indicated. There are no doubt practical difficulties in the way, but they can probably be overcome, and the result would certainly justify the effort.

Some people are never satisfied! Mr. W. D. Euler, M.P. for North Waterloo, not content with our present loss of more than a million dollars every week from the National Railways Railway as it is, wants to take in the C.P.R. as a sort of dessert to the surfeit already upsetting our digestion. Certainly he bases his desire on the alleged economy of management which would ensue, but it is to be observed that he gives no assurance on that point, contenting himself with the statement that a "high authority" puts the saving at one hundred million dollars annually. But against this estimate we have to consider the guess made by another high authority who lately put the probable saving at a little more than half that amount. When there is a difference of a trifling fifty millions or so between two "estimates" it is quite allowable to adopt the word I have just used, and regard the statements as mere guesses which cannot both be right, and might very conceivably both be falsified by actual experience. It seems to come to the theory of taking in a concern which is operating at a profit and thereby helping out one which so far has produced nothing but annual deficits. But that at once raises the dual question of whether profits would still remain under a merger and whether the shareholders of the C.P.R. would be willing to take that risk. Mr. Euler does not for a moment entertain the idea of handing over the National Railway to the privately owned corporation, claiming that such a proposition would destroy the government which made it. Whether the latter outcome would be a misfortune or a blessing would naturally depend on the sort of government in power, but Mr. Euler is no doubt right on the question of fact. It remains, therefore, to consider only the absorption of

"A Snapper Up of Unconsidered Trifles."
The Winter's Tale, Scene II, Act IV

The C.P.R. in the National system, and it is quite certain that the legions of shareholders in the former concerns would have a good deal to say in the matter. As a live issue such a merger may be laid on the shelf for some time to come, and a wiser line of thought would be the consideration of doing away with all duplications of unnecessary service, and the aiming at reduction of expenses in that direction. And a still more satisfactory solution of the present trouble will be found in the adoption of an efficient immigration campaign to increase our population, together with a policy framed to ensure its chances of industrial prosperity when here. We may then find that a railway merger will no longer be discussed, because there will be traffic enough to serve and possibly a little over. But, by the way, let us put the new people where our railways can take care of them, and not repeat the crime of the Peace River isolation. If more care had hitherto been taken to avoid that sort of injustice our railway might today be doing better than it is.

A noticeable feature of the recent discussion concerning the alleged stealing of British Columbia scenery by American film companies is the fact that those taking part in it were persistently at cross purposes on the matter. The lady who first broached the subject was quite clear in her attitude, but her opponents flew off at a tangent and made much capital out of the financial benefit accruing to the province from the visit of the filming aggregation—a point not in dispute. The complaint laid was that Canadian scenes were filmed to illustrate stories laid in other lands, and that we are not getting credit which is strictly due to us. The whole thing is perhaps rather trivial but it is certainly true that our American friends are rather given to this sort of appropriation. Some of us have not forgotten that certain postcards issued in the United States during the war calmly represented British and French machines as the native articles, and that later on a British owned liner was shown on the screen in a Vancouver theatre as an American vessel, the name having been actually changed in the film. The aggrieved correspondent may have had all that in mind, and was so far justified in her protest.

By Air To Pole

Donald B. McMillan is hurriedly making final preparations for polar explorations and a fight to the North Pole this summer in a U. S. Navy plane. The millions of square miles of waste lands between Alaska and the pole will be explored, motion pictures taken and a mapping machine operated.

"Times" Have Changed
Arthur Brisbane, commenting on current news, says:—
"A lady of Spokane demands a divorce because her husband, at breakfast, milked a goat directly into his cup of coffee. He keeps the goat in the house. The lady declares that such 'table manners' could not be endured by any person of refinement."
"Other times, other manners." Evo would have thought it very clever had Adam done exactly the same thing.

**Quick--
Someone Is Waiting for You!**

When the telephone rings, courtesy and efficiency demand that it be promptly answered. To anyone waiting on the telephone, seconds are long. No person likes to be kept waiting. Why keep others waiting? Any call may be important. Why neglect any of them?

THE SUMMERLAND TELEPHONE CO., LTD.

Pat O'Hooley Tells of TOMMY'S REFORM

By I. H. HOLDEN

Number 10 was an hour late and expected to arrive at 7 o'clock. The agent dozed sleepily over his books. In the waiting room of the station Donovan, the section boss, Tim Kelley and Pat O'Hooley were discussing the topics of the day. They had run the gamut from politics to star dust, when Tim Kelley, with no malice aforethought, brought up the subject of matrimony.

"No man should stay single when he has a chance to marry," asserted Tim stoutly. "It's contrary to nature."

Pat O'Hooley gave a grunt of disgust. "Ye'r loike all th' rist of th' idiots—marry an' multiply!" said he. "Fool's rushin' in where angels fear to tread. I'm not wan of thim—th' fools, I mane. Not on yer loife! Marriage is too much of a lottery. Some draw capital prizes, I'll admit; others git as good as they deserve—an' maybe better; but a whole lot of suckers git stung right. That reminds me of Tommy Ryan—an' I haven't thought of Tommy this long while. When he got married he took a crazy leap in th' dark an' picked a wife by correspondence. F'what he got was—well, if I'm goin' to tell it, I musn't git ahead of my story.

"'Twas in th' early days when Badger Mound was th' ind of th' railroad. Tommy run a harness shop on Main street. He was sober, industrious, an' gettin' along jist foine—too foine, I guess, fer wan mornin' a smartly dressed woman gits off th' train, inquires fer Mr. Tommy Ryan, an' inside of an hour, they're hitched up—fer better or worse.

"I was at the blow-out that avenin' an' helped welcome th' lady to Badger. She had bin a widdle, they said, but her husband had gone to th' Klondyke an' died. Purty, she was, an' smart as a steel trap; but there was somethin' about her that got on my nerves. Her eyes were shifty an' keen, an' they missed nothin' that was goin' on; her mouth had a habit of settlin' to a straight, hard line, an' her talk was entirely too good to be true. However, we had a foine toime singin', dancin', an' stein' an' when we got ready to go, we wished 'em all th' happiness we could think of.

"Wan mornin' a few weeks later I meets Tommy on th' strate. 'Well, Tommy, me bye, sez I, 'how's th' new loife?'
"Purty foine, sez he. 'I'm wonderin' why I staid single so long. Ye should see me house now, Pat. I'verythin' is so clean ye could ate off th' fure.' There's curtains an' pictures an' fancy wurrek everywhere. It's jist loike th' inside of a china closet. Why, th' Missus is that particular that she polishes th' inside of th' stove lids. 'She does! Arrah! U's sure foine to have a clane home.' An' off he goes to his shop.

"I had some wurrek at Crowbar about thim, an' I'm gone for three months. When I returns, I see there's somethin' wrong wid Tommy. He's not th' same stidy man he was. He's drinkin' loike a fish. He's standin' at th' ind of th' bar most of th' toime an' nary a swig does he pass up. Half th' toime he's so drunk he don't know his own name; an' he holds on to th' mahogany wid both hands an' drinks an' slapes by turns. 'Twas a most shameful sight to behold; an' all th' gossips in town are waggin' their tongues.

"Things dangled along loike this until late in th' fall when a number of th' lads doctored th' cure Tommy of his bad tricks. There was a stranger in town from th' East an' he had a voice loike a roarin' bull. They take th' gint int' their confidence an' fix up a dale to scare Tommy half out of his wits; 'twould be aisy enough, they figured. So that night, when Tommy is full to th' eyebrows an' slappin' awatly at his old stand by th' bar, th' lights are turned down low; an' a tall figure in wholesome creeps quietly up to his side. Th' barkaper an' all th' gang are hld.

"Bang! goes th' ghost's fist on th' bar, an' all th' glasses danced an' rattled. Tommy opens his eyes an' stares loike a lost soul.

"'I can't rest in my grave!' roars th' ghost.

"'I don't care a cuss if ye can't!

A young lawyer was appointed to defend a negro who was too poor to hire counsel for his own. After the jury was in the box the young lawyer challenged several jurymen who, as the client said, had a prejudice against him. "Are there any more jurymen who have a prejudice against you?" whispered the young lawyer. "No, boss, de jury am all right, but now I wants you to challenge de judge. I has been convicted under him several times already, and maybe he is beginning to hab a prejudice again me."—Presbyterian Witness.

"Thish match won't light."
"Washa madda with it?"
"I dunno—it lit all right a minute ago."

A Good Way to Get the New Novels
WITH COMPARATIVELY LITTLE OUTLAY

You would like to be able to read the new novels—early—before they come out in book form—just as the publishers do? Why, of course! Well, you can do just about that.

Nowadays eight of ten of the new novels run serially in the popular magazines before being published in book form. 'Cosmopolitan' carries six or seven a year by best-selling authors, 'Good Housekeeping' and others, three or four each.

Do you see? That means that for a subscription to 'Good Housekeeping' you get at least three novels, besides all the other stories, articles and helpful information.

We place subscriptions to 'Good Housekeeping,' 'Cosmopolitan,' 'most any magazine. We save you time, postage, worry. Isn't that worth asking us about?

Local Happenings

J. Tait, district field inspector, attended a meeting of the Horticultural Club at Kelowna on Monday.

Miss Dorothy Thompson left on Saturday last for Vancouver, where she will go under two operations at St. Paul's Hospital.

Mrs. Frank Mossop's mother and father, who have been visiting here, and Mr. Mossop's mother, left here a few days ago for Calgary.

Mrs. Harry Reynolds was a recent visitor to Grand Forks, to which town her husband has been transferred. She made the journey by motor.

Mrs. Nicholson, of North Vancouver, who has been visiting her sisters here, the Misses Spencer, plans to leave on Saturday to return to her home.

Mrs. R. R. Chew and her daughter, Miss May Harrison, of the Bank of Montreal, came back last Friday from Vancouver where they had been on a short visit.

James Vipond, of Nakusp, stopped off here for a few days recently to visit his sister, Mrs. A. M. Leslie, while on his way home from Vancouver.

Mrs. Harrison and her brother, Mr. Phillips, are again living on her orchard property occupied for several years by Mr. H. K. Lott. They arrived from Alberta late last week.

An outbreak of rabies has occurred at Pateros, Washington, near the southern end of this valley. The health officer for Okanagan County has directed that all dogs be either tied up or muzzled.

About twelve or fifteen masons, members of Summerland Lodge, are going up to Kelowna tomorrow, Friday, to attend a meeting that evening of St. George's Lodge, No. 40, a special invitation having been extended to the Summerland Lodge.

Rev. and Mrs. W. A. Alexander and Miss Sinclair went down to the Coast on Monday's train. Mr. Alexander is attending the synod in Vancouver while Miss Sinclair and Mrs. Alexander are attending the provincial W. M. S. They are not expected home until next week.

Mrs. J. Corner went up to the Landing on Saturday where she met her sister, Mrs. Greaves, and the latter's daughter, Mrs. Boschi and Mrs. Boschi's little son, Peter, who have just arrived from England to spend the summer here. We are sure they are greatly delighted with British Columbia scenery and with what they have already seen of Summerland.

The home of Mrs. S. W. J. Feltham was the scene of a very happy afternoon party last Friday, the occasion being the birthday of her mother, Mrs. Smith, of Bristol, England, who came here two years ago to make her home with her daughter, and who was celebrating her eighty-fourth birthday. The guest of honor was in great spirits and received the congratulations and best wishes of the many guests in a very happy manner. Everyone present remarked how bright she was. Mrs. Feltham's pretty home was gay with flowers and exceedingly dainty refreshments were served by the hostess, including a birthday cake from England. Pictures were taken of the venerable lady and party during the afternoon. Everyone had a very happy time.

Mrs. Pares returned last Saturday from Fernie where she had been visiting. She returned as far as Naramata on Friday and visited there with Mr. and Mrs. C. C. Alkins, and came home by ferry the next day. She was met at the wharf by a number of the members of the Girl Guides.

Mrs. S. R. Darke has moved down from Meadow Valley and is now living in Victoria Gardens with her son Robbie who is attending high school. Mr. Darke is now at Kimberley and they have leased their farm in Meadow Valley to S. J. Ketchell, who has been employed with J. J. Baker since last fall.

Mr. and Mrs. Gilbert Thornber plan to leave for a visit in Eastern Canada and the Old Country about the end of the month. Mrs. Thornber is going to remain with her people in Eastern Canada for a short time while Mr. Thornber goes over to visit his mother. Mrs. Thornber will cross to England at a later date.

Rev. J. W. Stevenson and family, guests for some days of Mr. A. E. Rose, have gone up to Enderby. According to the Enderby Commoner Mr. Stevenson will be in charge of the United Church there for a week or two until its first minister, Rev. J. L. King, now stationed at Chasco, B. C., is ready to take over his new duties.

Mrs. Wm. Ritchie returned last night from Woodrow, Saskatchewan. Her sister, whose serious illness was the occasion of her visit to the Prairie has much improved in health.

Mr. V. B. Robinson, agricultural instructor in the Summerland and Penticton schools, has purchased a ranch at Penticton owned by the late Captain L. E. Ewers and is now living on his new property known as the Huntley property.

Capt. and Mrs. R. V. Woods, Kona, Hawaiian Islands, are guests of Mr. and Mrs. H. H. Creese. Mrs. Woods is an aunt of Mrs. Creese. The visitors are on their way to the Old Country for a visit and will remain here for about two weeks.

Rev. H. J. Armitage and Mr. H. C. Mellor attended the district meeting of the Methodist Churches of the Okanagan at Kelowna yesterday. This meeting is preparatory to the provincial conference which will open at Victoria on Monday next.

Get your Sunday cooking at the sign of the blue and white flag. The C. G. I. T. of the Baptist church will hold a sale of cooking etc in the building next to St. Andrew's church, Saturday, May 9th, starting at 2.30. L40

C. R. McKay, Garnett Valley, being advised of the serious illness of his father, left by boat Monday morning to go to his father's home at Alexandria, Minn. His son, Clifford, accompanied him part way going to Bowif, Alberta.

Mrs. Pares returned last Saturday from Fernie where she had been visiting. She returned as far as Naramata on Friday and visited there with Mr. and Mrs. C. C. Alkins, and came home by ferry the next day. She was met at the wharf by a number of the members of the Girl Guides.

A son was born to Mr. and Mrs. H. S. Lewes, Friday, May 1.

John Steuart shipped a car load of horses to Vernon some days ago.

Dr. Wilson Herald of Kelowna, made a professional visit to Summerland last Friday.

Mrs. Harold Smith entered the hospital on Thursday last for treatment and rest. She is reported to be making steady progress.

William Mack, a former Summerland high school student, now with the Union Bank, Vancouver, has been appointed accountant-teller in the Mount Pleasant branch of that institution.

The Summerland Rangers held a dance in the G. W. V. A. Hall on Friday, May 1, at which a large crowd attended. During the evening a basket of home-made candy was raffled. Altogether the Rangers realized about sixty dollars.

Miss Phyllis Hookham, who has been visiting friends at Kettle Valley since her recent arrival here from England, returned to Summerland on Tuesday and on Wednesday went out to the Coast for a brief visit. She is to be instructress in weaving at the Log Cabin.

The University Players will present "You and I" in Empire Hall on Saturday, May 16, under the auspices of the Summerland High School.

Mrs. Hopkins, of Vancouver, and her little son, Douglas, arrived here on Tuesday morning to visit her friend, Mrs. S. F. Sharp.

"North of 36," a telling drama of the pioneer days of the south, was vividly pictured at the Rialto in the screen production of that name on Tuesday and Wednesday. The manager is to be congratulated upon his enterprise in presenting pictures of this class to his patrons.

S. F. Sharp has taken over the two Thornber ranches and the Harold Smith ranch, which he will operate in conjunction with his own. Mr. and Mrs. Smith moved into the Gilbert Thornber cottage on Monday.

Mr. and Mrs. G. L. Saiter arrived here last Friday from Vancouver. He returned to the Coast on Tuesday.

David Bigham, engineer on the steamer Sicamous, died on Wednesday of last week. He had gone to Vancouver two weeks before to undergo an operation. He subsequently contracted ether pneumonia which proved fatal. He is survived by his wife and three daughters, two of whom are nurses in training in St. Paul's hospital.

H. H. Creese, Summerland, Dr. McSween, New Westminster, and Messrs. Wright and Johnson, Vancouver, interviewed the attorney-general on Monday afternoon on the subject of proposed changes in the game laws and regulations of this province. Capt. Creese left here on Sunday and returned Wednesday morning. He states that the delegation achieved much valuable results in the interests of game in this province. He goes to Kelowna tomorrow

Neat fences of small white posts and iron chains have been placed on each side of the central walk in front of the public school and for a short distance along the front, north and south of the walk. It is the intention to place a border of flowers along the inside of this guard and beds of flowers are being built in each of the grass plots on either side of the walk. A hedge will be placed along the lawn edge of the crescent drive in front of the building.

OBITUARY.

MRS. WM. LIMMER
 Mrs. Wm. Limmer passed away on Sunday at Victoria. News was received here late last week of her serious illness and her daughter, Mrs. Muir Stuart, left for the capital city on Friday. Mr. Stuart was advised by wire of her death and left on Monday's train.

Mrs. Limmer with her husband and family resided in Summerland for a number of years. It is but a few months since Mr. Limmer died following a protracted illness.

Mrs. Limmer leaves three daughters, Mrs. C. C. Chittenden, who has been with her mother for some months, Mrs. Muir Stuart, and Miss Alice, who has been living with her mother.

MRS. T. N. RITCHIE
 News was received here by telegram Sunday of the death that morning at the Vancouver General Hospital of Margaret Gleason, wife of Mr. T. N. Ritchie, of Vancouver, a brother of William and James Ritchie. Mr. Ritchie has a large circle of friends here and at Peachland who will deeply sympathize with him in his bereavement. It is little more than a year since they were married, Mr. Ritchie having been a widower for many years.

Mrs. Jas. Ritchie went down by train on Monday to attend the funeral.

MORE MEASURING BOXES INSTALLED
 Ten new metal measuring boxes were built into the Garnett Valley irrigation system when it was rebuilt last month. Two others have been placed in other parts of the municipality and at least twelve more will be put in position here and there throughout the district when the council decides upon their location.

to report to the officials of the allied game associations of the Interior.

Mr. and Mrs. S. Angove and Mr. and Mrs. J. Tait, were visitors to Vernon on Sunday.

J. W. S. Logie returned Wednesday from Vancouver, having gone down on Friday last to attend the provincial annual convention of the Labor Party. Mr. Logie states that he received a surprising number of inquiries about the Summerland Art League, so many in fact that he found it necessary to avoid people in order that he could attend to his other business and get back on time.

L. SMITH WINS SCHOLARSHIP

Summerland Students Are Making Excellent Showing

The results of the past sessions work at the University of B. C. were issued from the registrar's office this week.

Louis Smith, a third year student in Arts at the University of British Columbia, has carried off the Arts '19 scholarship, the award being based on "literary and scholastic attainment and exhibition of moral force of character and instinct to lead and take an interest in fellow students and in University activities." The scholarship has a value of \$150. Louis is president of his class and is a general favorite. Despite the heavy obligations attendant to this office he came second in his class.

Moses Marshall passed from first to second year in the faculty of Arts and Science with a second class standing.

Alexander Zood, who spent some time at the Experimental Farm here and is well known in Summerland, was awarded the \$500 W. C. MacDonald scholarship for post-graduate studies in agriculture. He was a member of last year's University Payers Club.

Wm. Argue, who spent a summer here with A. C. Turner, has been awarded the degree of B. S. A.

John Cecil Nelson, B. A., better known locally as Lefty Nelson, has also graduated with the degree of Bachelor of Science of Agriculture.

Robert Leighton McLeod, who received his public school education here, has attained the degree of B.A.

The discovery that he has invested in a salt mine is apt to make a man peppery.

GLADIOLUS BULBS—Owing to the large demand my present prices only hold good till May 25th so order now. Geo. Greenhow, Oyama, B. C. 40P

LOCAL BIBLE SOCIETY APPOINTS COMMITTEE

The Rev. J. Williams Ogden of Vancouver, who succeeded the Rev. J. Knox Wright visited Peachland on Thursday evening last in the interests of the Canadian Auxiliary of the British and Foreign Bible Society. He came equipped with a large collection of beautiful lantern slides to illustrate his address on the British Empire and the Bible Society. The address was given to a large and appreciative audience in the Union Church and those who have heard the speaker on former occasions need not be told that he did his subject much credit. He lectured here on two former occasions. He was very enthusiastic over the work of the Society, and being one of considerable experience both through travel and study and personal contact he was able with his pictures, to bring home to his hearers with force the fact that the Bible Society had, from its inception, done great things not only for individuals and classes, but has been a National Blessing. At the close of the lecture a collection of \$10.27 was taken to be used in the work. There was a special donation of \$5.00 besides. Mr. Ogden re-organized a local committee or auxiliary with the following officers: President, Mr. R. J. Hogg; Secretary, the Rev. T. A. Sadler and Treasurer, Mr. McCall.

agent is a busy man these days. Miss Wilson and her father are back in Peachland after an absence of some weeks. Mr. and Mrs. Kinchen of Trepanier returned home on Thursday evening, having been called away by the sudden death of their youngest son after a very short illness with appendicitis with complications. Mr. and Mrs. Kinchen are among the more recent arrivals in this community, but already have many kind friends who sympathise with them in their grief.

Mrs. O. G. Miller and little Georgie Ekins spent a couple of days in Kelowna last week, returning home on Saturday evening. Miss Gamble was an out-of-town visitor on Friday, taking the north bound boat here in the morning. The regular weekly whist drive was held in the G. W. V. A. Hall on Thursday evening and on Friday evening there was a dance. Mr. Walter Shaw left this week to take another position on a bridge crew at work up the valley. Mrs. Wm. Buchanan, Jr., with her young son arrived here on Sunday morning last to spend a couple of

LOCAL BIBLE SOCIETY APPOINTS COMMITTEE

weeks vacation with friends and relatives here. Mr. and Mrs. E. Morgan of Cut Knife, Sask., were recent visitors here. They came in on Saturday evening and spent the week end with Mr. Ling and family, neighbors in Saskatchewan previous to Mr. Ling's moving to this country. Mr. and Mrs. Morgan were just returning to their farm home after having spent part of the winter in Victoria. The Rev. H. B. Luck, of Calgary, came in by boat Saturday evening and is the guest of Mr. and Mrs. H. Williams. He held special services in the Baptist Church on Sunday, Monday and Tuesday evenings. He unquestionably is a man of God and preaches the Whole Word without fear or favor.

The Rev. T. A. Sadler and Mrs. H. E. McCall left by auto on Monday morning last to take the K. V. R. westbound at Summerland. Mr. Sadler to attend a meeting of Presbyterians in Vancouver and Mrs. Sadler a delegate to a missionary convention of the Methodist Ladies Circle and also a delegate to the Sunday school convention being held at Vancouver.

Mr. Mah Wing Shu spent the week end in Penticton. Kelowna Saw Mill tug with a barge came in on Monday and loaded a team for some of their operations further up the lake. This is one of

the teams Mr. W. D. Miller has been using in his Deep Creek logging camp. A large audience attended the Ehardt Bell Ringers concert in the G. W. V. A. Hall on Monday evening and were well pleased with the program. Messrs. Dryden, Powell and Harrington motored to Kelowna on Monday returning the same day. The pupils of Trepanier School had a debate on Thursday of last week; Subject—"Resolved: that the sheep is more useful than the goat."

The debaters had not had much practice but enjoyed the change from the regular form of composition, as well as getting a good deal of useful knowledge about these animals and some practice in learning to speak in public without notes. The leader of the negative created some amusement by opening his speech with the remark "That as leader of the Goats etc." A great many points were scored for each side, the affirmative winning by three. There were visitors present besides the school children and the debate aroused interest outside the school.

Then meet him — MR. A. B. CHAPIN — nationally-known cartoonist, who has just joined the Review Staff. You will like Chapin's work. He draws cartoons which are pages from our every-day lives. They are full of humor, sentiment and "just plain folks" philosophy. You get a new CHAPIN cartoon every week when you are a subscriber to

SPEAKS ON CANADIAN EFFICIENCY TRAINING

Messrs. Ronald and Harold White of Summerland motored up on Friday evening last and Ronald, who is Minister of Intellectual Affairs in the B. C. Boys' Parliament, addressed a meeting called by the Trail Rangers and Tuxis Boys in the basement of the Union Church. The purpose of this meeting was to hear from the member of the boys' parliament an account of the proceedings of the sittings held the last three days of the old year in the parliament buildings in Victoria, B. C. The boys organization here had invited their parents, and all others interested, to the meeting. Those who were present were delighted to hear such an able address from a young man and were very pleased to learn something of the nature of the work. The speaker preceeded his remarks with reference to the parliamentary affairs, by giving an outline of the G. S. E. T. program and its application to the boy life of our country. After the address an opportunity was given to anyone present to say a few words when the Rev. T. A. Sadler, Mr. McBain, Mr. Thornber and Mr. Boswell rose to the occasion. Mr. Sadler and Mr. McBain moved a vote of thanks to the speaker for his splendid address which was heartily taken up by all present in the usual way.

Mr. Hembling of the Central addressed a meeting of Peachland fruit growers in the Municipal Hall last week giving them a lot of information as to the program for this year's operations with interesting details in connection with the business.

Miss Chiff who has been assisting in the home of Mr. and Mrs. Long, left last week to return to her home up the lake.

The engineer and sawyer for Mr. Ling's saw mill came in last week and have been getting the mill into shape, preparatory to cutting logs gotten out this spring.

After a few days on their ranch in Upper Trepanier Mr. and Mrs. Hanson left on Thursday to return via Stenmou and Revelstoke to their new home in Trail where Mr. Hanson has been employed for a little over a year, being one of the draftsmen in the smelter plant.

Mr. A. J. MacKenzie and Mr. and Mrs. H. Williams motored to Kelowna and back on Thursday.

Three more cars have been delivered here recently, one to the Lambly ranch, one to Lorne Shaw and one to Mr. Tallyour. The local Ford

DOES A BETTER FRUIT WRAPPER PAY FOR ITS ADDITIONAL COST?

"CARO" Fibre was made as it is, as to appearance and character, at the request of the HIGH CLASS FRUIT RETAILERS and then chemically treated and identified by VIOLET Lines.

Think of this—

Over 10,000 carloads of fruit in Caro Fibre Wrappers in 1924. This "CARO" Fibre Wrapped Fruit was bought at an advanced price and sold by the HIGH CLASS FRUIT RETAILERS—Not the push carts or peddlers.

And this—

These High Class Retailers recognize Orchardists using the "CARO" Fibre VIOLET Lined Wrapper as the BLUE BOOK of each district.

McINTOSH APPLES

"CARO" Wrappers are efficient and particularly adapted for apples—Close fit keeps fruit in every sized paper, and but a little more than plain paper.

SUMMERLAND, B. C., THURSDAY, MAY 14, 1925.

\$2.50, Payable in Advance

ARE STAGGERED BY AMOUNT OF ROAD ACCOUNT

Province Asks Municipality For Nearly Thousand Dollars

Nearly All Expended Outside Actual Municipal Boundary

Summerland has received from the provincial road engineer a bill for \$934, as twenty-five per cent of the cost of maintenance of the Okanagan Highway between Trout Creek bridge and the northern boundary of the municipality at Van Hise's, a length of more than seven miles. The account is for the provincial fiscal year ending March 31st last.

There was considerable protest at the council meeting on Friday against this bill, it being stated that the municipality had asked for quarterly statements so that the municipal office might be kept posted on the amount of money required for the lake shore and that it is very necessary that the annual expenditure be known well in advance so that it can be provided for in the tax rate.

Not Consulted On Expenditure

There was the further protest made that the municipality had not been consulted before such a large expenditure had been made. This sum of \$934 for the past year was greater than the total of the two previous years. Councillor Arkell said that the chief expenditure was on the road north of the Meior property.

Another objection which has been heard many times before is that the municipality should be required to pay any share of the cost of the road north of Crescent Beach. The road was built, it is said, without the municipality even being consulted on the subject and was located along the base of the cliff at the very fringe of or outside the actual municipal boundary, and the municipal authorities have a ways contended that that part of the road was purely provincial and that it was totally outside the municipal boundaries.

Hope to Have Bill Reduced

It is on that portion of the highway, no doubt, that most of the expenditure objected to was made. Councillor Arkell stated that from Peach Orchard south a relatively small sum had been expended.

After a considerable discussion of the subject the reeve and Councillors Ritchie and McPherson were appointed a special committee to interview the engineer with the view to having his assessment on the municipality materially reduced.

During the discussion Councillor Arkell made the statement that Engineer Gwyer had contradicted the (Continued on back page.)

FOUNTAINS TO BE DEMOLISHED

Council Decides To Take Down Both Stone Structures

Razing of the two unused drinking fountains, one next the band stand on Shaughnessy Avenue, and the other at the west end of Granville Road, was decided upon at the meeting of the council on Friday last. A largely signed petition from the Shaughnessy Avenue section asking that the fountain there be connected with the domestic water system brought about this decision.

The fountain referred to was at one time supplied with water from the power main which was abandoned early in 1922, since which time the fountain has not been used. It was reported at the council meeting that the structure itself was in a dilapidated condition and worthless as a fountain. The object of the petition apparently was to provide a source of supply of water for the trees along the east side of the avenue. The public works committee was instructed to make the necessary arrangements to provide for

BADLY HURT WHILE SHIFTING BELT

C. A. Mitchell In Hospital With Injuries To Face And Breast

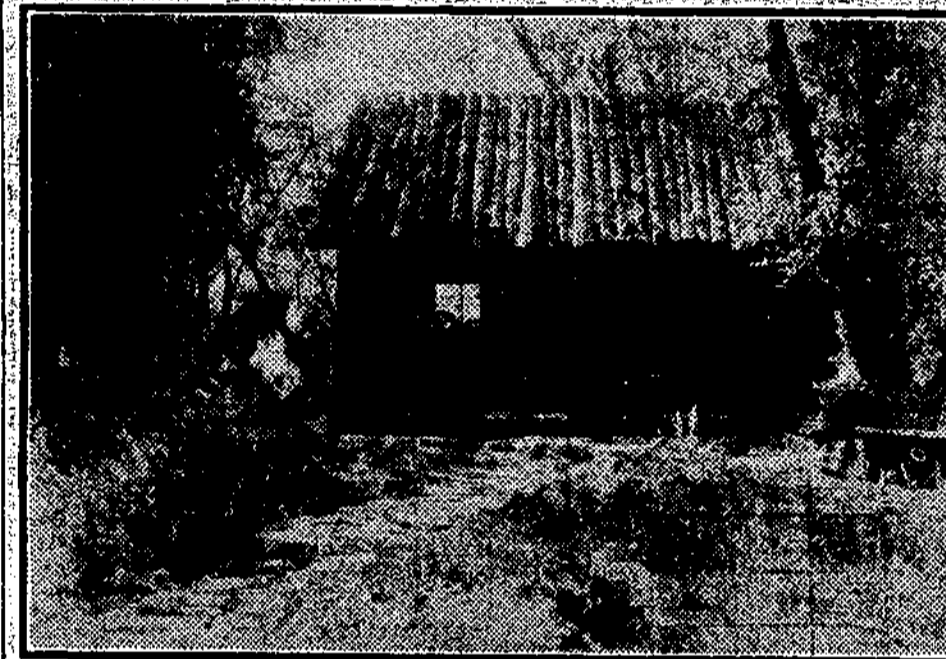

C. A. Mitchell was severely injured while at work in the box factory Tuesday forenoon. He was shifting a belt while the machinery was in motion and had reached up to the shaft above him with a board to move the belt when the board was forced downward by the moving belt. The board struck him above the eye causing a nasty wound there and tore through his clothes making an ugly gash of about five inches in his breast. It is feared that some of the ribs may be fractured. The injured man was at once taken to the hospital.

MUNICIPAL GRANT TO WAR VETERANS

Summerland G. W. V. A. local will again be given a grant by the municipality to the extent of the municipal water rates and taxes on the Association's property.

W. Atkinson applied for the grant on behalf of the veterans and stated that they expected to make the last payment on the property this year after which no further appeal for the grant will be made. The council unanimously voted the grant.

NARAMATA LAD LOSES A HAND BY EXPLOSION

Picked Up Percussion Cap While Out For Stroll In Hills

Was Examining It When It Exploded—Scouts Give Aid

(By our Naramata Correspondent)

Avery King, son of Mr. and Mrs. R. H. King was seriously injured on Saturday while handling an old percussion cap picked up in a deserted shack above the K. V. R. track. Young King was one of a party of lads who were enjoying a ramble on the hills, and, seeing the apparently exploded cap, took it up and was tapping it with a finger when it exploded and blew his left hand off, also lacerating his other hand and his legs. Fortunately one of the party was able to give boy scout first aid, or he would probably have bled to death. The injured boy was rushed to Penticton and treated by Dr. McGregor. He is said to be doing as well as (Continued on back page)

a standpipe or other means of supply at a suitable point.

Not infrequently complaints are heard of the location of the Granville Road fountain and its removal for the safety of the motor traffic and to provide more turning space at that corner has been discussed several times by the council.

The condition of repair of the Shaughnessy Avenue fountain and the position of the Granville Road fountain were the reasons for the action of the council in unanimously adopting the motions of Councillors Arkell and Ritchie that both be demolished.

Have Abandoned Purpose of Selling Direct to the Retailer

WILL ERECT SIGN AT TROUT CREEK

Do not Want Tourists To Be Misled As To Camp

For the purpose of informing motorists of the location of the municipal auto park a sign will be placed on the highway a short distance north of the Trout Creek bridge and close to the sign directing attention to the Wood's auto park camp at the mouth of the creek.

This course was decided upon by the municipal council on the suggestion of the reeve and following a brief discussion of the subject on Friday last. The opinion was expressed that tourists might take the Trout Creek camp site to be the much talked of Summerland camp and this sign is intended to remove the possibilities of any bewilderment in this regard.

The question of sanitary regulations with respect to the new camp site was also raised and this matter will be further looked into.

Jobbers Will Buy From Associated's Own Representatives

JOBBERS GUARANTEE GOOD DISTRIBUTION

Working Out Co-operation Plan For Jobbers And Shippers

Direct dealing with the retailer, the course decided upon recently by the Associated Growers, is likely to be abandoned, as an outcome of the recent conference held by the heads of the Associated and jobber organizations at Winnipeg. The jobbers, the Associated and the independent shippers are all concerned in the proposed new deal which does away with the Mutual Brokerage and by which jobbers will buy from shippers. Details of the proposed new plan have not been announced, though the general nature of the scheme has been given out. Independent shippers met at Kelowna on Monday and discussed the proposition and the directors of the Associated in session at Vernon received the report of the president and sales manager and after the meeting wired the following statement to The Review and other papers:

Vernon.—At a meeting held here Tuesday, the directors of the Associated Growers accepted the proposition from the wholesale dealers of the prairie provinces whereby 90 per cent of the jobbing trade guaranteed full support in distribution of B. C. crop through the Associated's own representatives.

Former decisions of the Associated to deal direct with the retail trade, was made necessary by the uncertainty of receiving the necessary support from the jobbing interests.

With this difficulty removed and full support of the whole trade assured it is evident that a better distribution and better net returns can be obtained for growers.

It is understood that a further conference of shippers and jobbers will be held at Vancouver late this week. According to reports the Associated, the independent shippers and the jobbers will each appoint a member of a board of three who will regulate such matters as proportionate exports, the control of distribution, apportioning the share of the available business and other matters that will come up from time to time.

GOVERNMENTS TO CO-OPERATE IN PROSECUTION

The governments of the provinces of British Columbia, Alberta and Saskatchewan have signified their readiness to co-operate with the Dominion administration in prosecuting members of the fruit combine in Western Canada. The federal prosecution against the alleged fruit combine, will be launched immediately. Hon. James Muir, minister of labor, announced this week that prosecutions will be started just as soon as the necessary legal details have been completed.

COMBINATION GRADES ARE ABOLISHED

Combination grades of apples, crabapples and pears have been abolished by recent action of the House of Commons. The House has also established a "standard" grade for onions of a uniform size and provided for the abolition of the grade known as "sample quality" and the substitution of the term "ungraded."

Mr. J. W. Jones, M. L. A., was a visitor to Summerland last week and made a brief call at the council chamber while the municipal council was in session.

RESIGNS POSITION ON SCHOOL STAFF

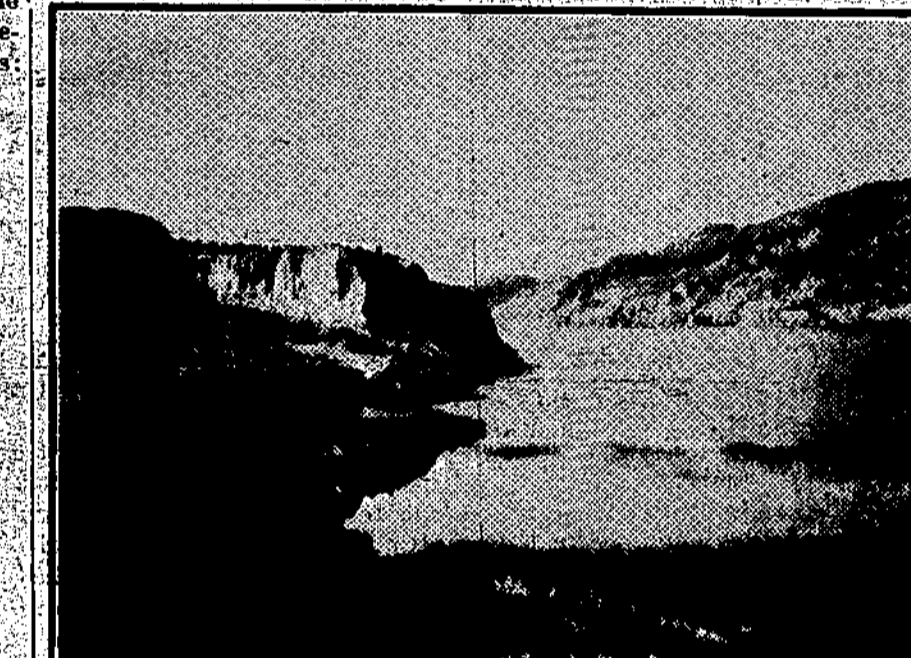

Board Regretfully Accepts Resignation of Miss J. E. Nicholson

Miss Jennie Nicholson, who was given leave of absence recently by the School Board, has resigned her position on the teaching staff. At the last regular meeting of the trustees her resignation was received with much regret. Miss Nicholson has been highly prized as an efficient and diligent teacher of the younger pupils.

A resolution requiring that the drivers of school conveyances allow no one to ride on the running boards was unanimously carried and immediately put in the hands of the contractors.

There are some who still persist in trespassing with motor cars and horses on the Central School grounds and the board decided to have painted notice boards placed at the edge of the grounds advising the public that there is no thoroughfare through the school grounds.

COUNCIL TO ERECT SILENT POLICEMEN

Four Such Guiding Posts To Be Put in Place At Once

For the greater safety of motor traffic and the protection of horses and cars against those drivers who are disposed to cut corners, the council on Friday decided to place silent policemen at several of the more dangerous street intersections. White painted stones protruding some distance above the ground will mark the points around which all vehicles will be required to turn or to pass. Street intersections at which these will be placed are at Melvin's corner, Stuart packing house, municipal office and McCutcheon's corner. Similar stones may be placed at English's corner, Shaughnessy Avenue and at one or two other intersections.

EXPLOSION KILLS YOUNG OLALLA MAN

Ross Havens Meets Death While Fishing With Dynamite Caps

Ross Havens, 25, son of Mr. and Mrs. M. L. Havens, who live near Horn Lake, was instantly killed, and W. Lohviro and George Ship-ton, nearby residents, received minor injuries when a box of detonating caps, being used in dynamiting fish in Horn Lake exploded on Sunday afternoon. A. Havens, a brother of the deceased, escaped injury, and drove with the body and his two injured companions into Penticton, where the latter were removed to the hospital.

Havens was accustomed to the handling of explosives, and with his brother and friends had dynamited bays in Horn Lake for several years. Dr. R. B. White decided an inquest was unnecessary.

M. G. Wilson & Co. Ltd. have had a new gasoline tank and pump placed in front of their warehouse on the east side of Shaughnessy Avenue.

FOR COMPLAINANT TO TAKE ACTION

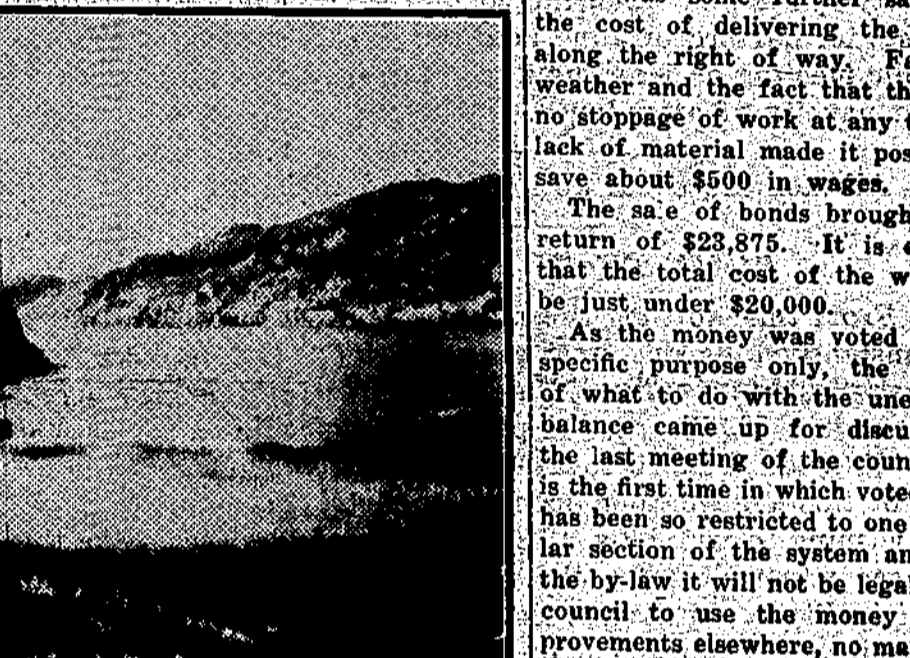

Pound Case Referred Back To Council By Police Commission

That the complaint laid before the municipal council by J. A. Kirk with respect to the alleged payment due him by the municipal pound-keeper is not a matter for the police commission to deal with, was the report made by that body to the municipal council on Friday. When the subject was before the council some time ago, the pound-keeper contended that it was a matter for the police commission to deal with and on his suggestion the subject was referred to the commissioners. Mr. Kirk had protested against the inclusion of worthless foreign paper money in the remittances made to him by the pound-keeper as part of the payment of his claim against a certain bunch of impounded cattle and claimed five dollars which the foreign money was supposed to cover.

Upon receipt of the report from the commissioners the council agreed that it was for Mr. Kirk to take action against the pound-keeper.

Councillor Ritchie drew the attention of the reeve to the fact that a pounds committee had not been appointed for the current year. Acknowledging the oversight the reeve named Councillors Arkell and Ritchie members of this committee.

BIG SAVING EFFECTED IN GARNETT VAL.

Council Has Four Thousand Dollars Left After Job Completed

May Use Money To Buy Back Debentures Marketed

Rebuilding and improving the Garnett Valley section of the municipal irrigation system was done at a cost of approximately \$4,000 less than the sum provided by by-law. Twenty-five thousand dollars was the sum voted for this purpose. The engineer's estimate was \$26,966. The by-law was placed at the lower figure as it was known that some saving could be effected through reduced prices.

The engineer's specifications provided for metal of one particular kind. The price of this was lowered when the municipality was ready to buy and a further saving was effected through using some metal of another brand. The engineer's estimate for the amount of lumber required was considerably in excess of the actual amount of wood used and beside there was some further saving in the cost of delivering the lumber along the right of way. Favorable weather and the fact that there was no stoppage of work at any time for lack of material made it possible to save about \$500 in wages.

The sale of bonds brought a net return of \$23,875. It is expected that the total cost of the work will be just under \$20,000.

As the money was voted for this specific purpose only, the question of what to do with the unexpended balance came up for discussion at the last meeting of the council. This is the first time in which voted money has been so restricted to one particular section of the system and under the by-law it will not be legal for the council to use the money for improvements elsewhere, no matter how urgent those improvements may be and it is not improbable that the council will purchase some of the bonds with the \$4,000 remaining unexpended.

BRONZE MEDALS FOR LOCAL EGG MARKET

British Columbia Poultry Association has donated two bronze medals suitably engraved to be competed for at the egg contest to be held either in connection with the Women's Institute Flower Show or the Summerland Fall Fair.

PENITENTION HOSPITAL HAS PROMISED A DONATION OF \$2500 FROM THE PROVINCIAL GOVERNMENT TOWARDS A NEW WING.

THIRTY-FOUR MILLS IS RATE

Treasurer Reports Good Collection of Civic Rates

Final reading and approval was given the 1925 tax rate by-law by the municipal council on Friday last. The total tax rate has thus been fixed at 34 mills, a reduction of five mills from the 1924 tax rate. As the assessed value of land has not been increased this will be quite a material reduction in the tax.

THE TREASURER REPORTS GOOD COLLECTION OF CIVIC RATES

The treasurer reported that up to the first of May two and a half per cent loss of rates in arrears had been collected as compared with the same period last year, while four per cent more of current rates had been received. These rates cover irrigation and general, domestic water and electric light. The total collections of irrigation and general water rates were \$500 less, while the total collections of current rates were \$1,500 more making a net collection of \$1,000 more than at the same time in 1924, notwithstanding the fact that the total rates, arrears and current, available for collection were \$700 less than in the early part of last year.

The following are the committees delegated to arrange their particular sections of the preparations for the field day:

Finance; A. B. Elliott, chairman, J. A. Walden, J. C. Melvin and C. B. Winter. (Continued on back page)

OUR SPORTS DAY

It is hoped that the meagre attendance at the sports meeting last week does not truly represent the attitude of the citizens of Summerland towards the holding of an annual sports day. We interpret it more as an indication of that old feeling of "letting George do it."

Our sports day is one on which all shades of differences are sunk and citizens join together in a community-family picnic.

This should have the support of all who cherish community sports and when the committees in charge of arrangements for our 3rd of June field day make their reports to the public meeting on May the 21st, they should not be hampered by a paucity of attendance.

All men are equal until they land their first job.

SOME REGULATION NEEDED.

From time to time the neighborhood receives plasterings of unsightly bills and posters, usually by persons who have not the slightest interest in the welfare or beauty of the community. If bills must be posted there should be regulations providing for their removal by the parties responsible, or in lieu of this a governing license issued by the municipality to any wishing to post bills. This license would either make the licensee responsible for the removal of all bills or else the municipality could assume that, charging for the labor.

There is a movement on foot which is spreading fast, to prohibit all roadside advertising. Many a beautiful thoroughfare has been marred by unsightly signs at every corner and every nook. In progressive towns billboards are on a commercial basis and their neat appearance is one of the drawing cards of the companies who are engaged in the business. Prevention is better than cure; and the spirit of clean-up day should be maintained 365 days in the year—and this is one of the instances where the prevention is most easily applied.

That Manitoba school pupil who said that the plural of Miss is Mrs. didn't miss it far at that.

CRITICISM

There is hardly a man or woman in public life in our Okanagan towns who does not receive criticism. Sometimes this criticism is constructive, sometimes it is destructive. Our public officials from time to time and from year to year get it on every hand. Every president or chairman of a club or society, every officer and leader in church work, every man or woman engaged in administering the affairs of our schools, the local press,—all of them—some time or other, get criticised.

Sometimes the criticism takes on the aspect of abuse or even of slander. More often it is merely cutting or sarcastic.

Why is this? The answer follows that it is because these officers and administrators are human, and because they live in a human world and a human community.

He who leads must expect the hardships of leadership. He who rules must expect occasional passive or open rebellion. He who initiates must expect reaction and opposition from those whose life's philosophy leads them into channels of thought.

The situation in the Okanagan is perhaps no worse than that in any other community. Constructive criticism is needful to growth; but the greater need is that people be not unkind, but charitable, in dealing it out.

The cure for thinking you're indispensable is to leave town for a few days.

EVERY MAN TO HIS OWN INTEREST

A man who lives at the Coast, after a recent visit to the Prairies, reports that crop conditions are exceptionally good. He winds up by stating that there is every reason to believe that "winter tourist travel from the prairies to British Columbia will resume its former proportions."

Here is a natural result and reaction. If this man had lived in Ontario, his interest might have led him to assert the probability of large purchases of textile goods or shoes on the part of the midwest farmer and his family when the crop-money comes in.

If he were a steel magnate, he would have pictured a

Timely Hints For the Orchardist

Specially prepared for The Review by J. Tait, District Field Inspector.

The apples are well set now and blossom petals are falling—gone on some early varieties.

Arsenate of lead spray should be applied without delay. Use two pounds Arsenate of lead to 40 gallons of water. Also use one and a half pounds of Casin spreader to 120 gallon tank. If aphids are present Black Leaf 40 can be added at the rate of one pint to 120 gallons.

Main crop potatoes should be planted between now and the first of June. Use certified seed if possible.

Dp for Scab and Rhizoctonia: use four ounces of Corrosive Sublimate to 30 gallons water and soak from one and a half to two hours.

Poultry keepers cannot afford to neglect to treat their flocks for lice.

A little sodium fluoride dusted into the feathers below the vent and under each wing will soon clean them of this irritating pest.

bran new set of farming implements being hauled home by the proud farmer. An so on, every man to his own interest. However, first assuming that the crop prediction will be borne out by facts, we can imagine the prairie farmer first paying off the accumulated interest and then as much of the principal as he can bite off in a year, and still keep the radio in good batteries and daughter in college another term.

But if it keeps up, next year look out for the pleasure trips, the new implements, and lifted mortgage and contentment.

From Our Exchanges

SINS OF THE PARENT UPON THE CHILDREN.

Away back in 1757 when the monopoly of opium cultivation in India passed into the hands of the great British East India Company, and fifteen years later when that company, backed by British guns of war forced peaceful China to open her ports to British merchant ships carrying cargoes of opium from India, little did Great Britain know or realize the awful mistake made.

Today, 150 years later, what do we see?

By the Nanking treaty (1842) Great Britain opened the way into China for the East India Company's opium trade. It was not long until the Chinese took up the cultivation of the opium poppy. In later years nearly every province in the Chinese empire became a producer of opium. It was not long until the Chinese had beaten the East India Company at its own game. Today China supplies 90 per cent of the opium of the world.

Chickens come home to roost. The sins of the parent are visited upon the children.

In every white city in the world the yellow peril exists. The narcotic evil never is at rest. Statistics show there has been an increase in the number of habitues and a large percentage of them are boys and girls under twenty.

The cause of the evil lies deeper than we care to admit. Nor have we been able to hit upon a method to effectually reduce the traffic in opium notwithstanding the fact that our governments annually spend millions of dollars in fruitless efforts to stamp it out.

For seventy years China fought the effort of the British East India Company to force her to open her ports to the opium trade. Will it take seven times seventy years to overcome the evil in our white races?—Commoner, Enderby.

**SYNOPSIS OF LAND
 ACT AMENDMENTS**

PRE-EMPTIONS
 Vacant, unreserved, surveyed, Crown lands may be pre-empted by British subjects over 18 years of age, and by aliens on declaring intention to become British subjects, conditional upon residence, occupation, and improvement for agricultural purposes.

Full information concerning regulations regarding pre-emption is given in Bulletin No. 1, Land Series, "How to Pre-empt Land," copies of which can be obtained free of charge by addressing the Department of Lands, Victoria, B.C., or to any Government Agent.

Records will be granted covering only land suitable for agricultural purposes, and which is not timberland, i.e., carrying over 5,000 board feet per acre west of the Coast Range and 8,000 feet per acre east of that Range.

Applications for pre-emption are to be addressed to the Land Commissioner of the Land Recording Division, in which the land applied for is situated, and are made on printed forms, copies of which can be obtained from the Land Commissioner.

Pre-emption must be occupied for five years and improvements made to value of \$10 per acre, including clearing and cultivating at least five acres, before a Crown Grant can be received.

For more detailed information see the Bulletin "How to Pre-empt Land."

PURCHASE
 Applications are received for purchase of vacant and unreserved Crown lands not being timberland, for agricultural purposes; minimum price of first-class (arable) land is \$5 per acre, and second-class (grazing) land \$2.50 per acre. Further information regarding purchase or lease of Crown lands is given in Bulletin No. 10, Land Series, "Purchase and Lease of Crown Lands."

Mill, factory, or industrial sites on timber land, not exceeding 40 acres, may be purchased or leased, the conditions including payment of stamp-ago.

HOMESITE LEASES
 Unsurveyed areas, not exceeding 20 acres, may be leased as homesites, conditional upon a dwelling being erected in the first year, title being obtainable after residence and improvement conditions are fulfilled and land has been surveyed.

LEASES
 For grazing and industrial purposes areas not exceeding 640 acres may be leased by one person or a company.

GRAZING
 Under the Grazing Act the Province is divided into grazing districts and the range administered under a Grazing Commissioner. Annual grazing permits are issued based on numbers ranged, priority being given to established owners. Stock-owners may form associations for range management. Fees, or partially free permits are available for settlers, campers and travellers, up to ten head.

**The Pedlar's
 Pack**
 By AUTOLYCUS

There is still hope for the benighted city of Toronto and that section of our fair country generally referred to as "the East."

TO THE Rev. W. J. Atkins, a RESCUE! Methodist minister who for some years has been striving to raise the city of Winnipeg to a sense of better things, is listening to an imperative call from within and will bear the light of the gospel to the dark places of the eastern city. He is doing this because, to use his own words, "I hear that part of the country has generally gone to the devil since I left there"—a reason which, expressed in that way, seems to be the last word in unconscious egotism. The reverend gentleman's idea of what constitutes "going to the devil" is based on the two lamentable facts that "they are going to bring in 4.4 beer, and most of the prominent men are in prison or out on bail," and his decision is that something must be done. It may be remarked in passing that while the deplorable backsliding on the beer question must be admitted, we can hardly endorse the claim as to the percentage of prominent men in prison. Eastern Canada is a large sized piece of territory and contains a population running into several millions, and it is to be hoped that the half-dozen or so of its prominent men who have strayed from the right path do not make a majority as rashly indicated by the Winnipeg pastor. "Most of the prominent men" is a loose expression which may pass muster with some people, but which raises to ridiculous importance the element of perhaps one-hundredth of one per cent of population gone astray. However, that consideration would naturally mean nothing to a preacher who thinks that a consumer of 4.4 beer has "gone to the devil."

If Mr. Atkins is right, his Satanic Majesty will have first call on more people than has generally been supposed.

It is to be noted that the reverend gentleman is not much better pleased with the city he is leaving than with the one he is going to. The preaching in many Winnipeg churches fails to satisfy him, there being more of the "sensational and inferior kind than in any other city" of his knowledge. This seems to indicate a partial failure on his own part to bring about that uplift so much to be desired; let us hope he will do better in Toronto, and that the results of his coming pastorate will be seen in a prompt improvement of the sinful conditions now prevailing there.

The current number of the "American Bee Journal" contains a most interesting description of conditions in the Grande Prairie district of the Peace River BEAVER region, the feature chiefly LODGE, dealt with being the past experiences and future prospects in beekeeping. The editor remarks "that there should be honey produced at the same latitude as the southern end of Hudson Bay, seems impossible," but this observation only goes to show how vague are the general impressions of the northern parts of Canada. A few weeks ago I gave a few details of conditions at Fort Churchill, which is further north than Beaver Lodge, and it is no surprise to me to learn that bees thrive in the latter district to such a degree that Mr. Gooderham, Dominion apiculturist, thinks it has Ottawa "beaten by a mile." A temperature of 52 degrees below zero, which is the lowest recorded since 1015, is nothing in the life of the honey bee, provided she is properly cared for, and the summer climate is easily judged by the list of crops which are produced. Mr. Albright, who is in charge of the Beaver Lodge substation, states that all produce common to the northern temperate zone can be successfully grown, the one exception being corn. His list of the wild flowers which successively carpet the prairie speaks eloquently to the beekeeper and fully accounts for the results in beekeeping. The colony sent to the substation in 1922 for experimental purposes seems to have been subjected to almost every mistreatment possible from inexperience, but survived it all, and increased the following season threefold, besides yielding a fair crop of surplus honey. This is certainly a good record, even if we attribute some of it to beginner's luck.

One very noticeable point in the story is the long continued open weather in the autumn, a 1923 diary telling of bees flying frolics as late as October 25th, while all through September they were working on the blossoms of second growth alfalfa and sweet clover. On September 22nd Mr. Gooderham wrote from Ottawa: "I do not think your winter-

ing problem is going to be as serious as it is here with us, as there is a danger of our bees starving to death at this time of year unless carefully watched, while your bees are brood-rearing and still gathering."

And this is the district which has been left without railway facilities for fifteen to twenty years! Some day we shall realize that Canada is not a mere strip of country running from East to West, but has a great empire in its northland alone.

According to latest reports the case between Canadian law on the one side and Doukhobor obstinacy on the other, is now in progress of satisfactory settlement. The fines having been paid and the children being sent to school. "All's well that ends well," and if the situation develops as it shows signs of doing, all parties to the dispute will eventually become good friends together. It must be admitted that the course of the law did not get much help from some sections of the press or from certain correspondents, thereto—the encouragement was in several instances given to the rebels, and those people who enlarged on the difficulties of the situation and wrote about the impossibility of its control cannot be congratulated on their contributions to the question.

 Unconsidered Tribes."**

The Winter's Tale,
 Scene II, Act IV

PLAY BY J. M. BARRIE
 WILL BE GIVEN HERE
 Charming Comedy By Famous Scottish Dramatist Coming Soon

A play by J. M. Barrie, that Scottish wizard of words, will be always worth seeing. The very sound of the name of Barrie has a whimsical magic in it that brings back to so many of us pleasant memories of happy times spent with his tenderly delightful "Little Minister," his fantastically beautiful "Peter Pan," and many other equally fascinating creations of his pen.

The play "Dear Brutus," that is being produced locally under the direction of Mr. A. L. Soames, has added not a little to the author's fame as a writer of plays. Described as a comedy in three acts, it might also be with equal truth described as a phantasy in three phases. The idea was evidently taken from a speech by Cassius, in Shakespeare's "Julius Caesar."

"The fault, dear Brutus, is not in our stars, but in ourselves, that we are underlings," and the play shows in Barrie's gentle sarcastic and whimsical manner, that if people were allowed a second chance in life, how little or how much they would profit by it.

Little bits of human nature, of irony, of fairy fantasy, and of pathos are skillfully woven by the master's pen into a web of enchantment that will catch the fancy of an audience as surely as the web of the spider will make captive the wandering fly. That is to say, those who go to see "Dear Brutus," which will be produced at the Empire Hall on Tuesday, May 26th, will be assured of another happy evening with Barrie.

**CROWS AND THE
 GRASSHOPPER PLAGUE**

There seems to be a movement on foot to protect the crow in the interior of this province as by some he is regarded as providing a check on the grasshopper plague, which of late years has begun to assume very serious proportions, says Allan Brooks of Okanagan Landing, in a letter to the Vancouver Province.

Mr. Brooks says further: Crows undoubtedly destroy large quantities of grasshoppers, but only late in the season, after the worst of the destruction of crops and range has been accomplished, and after the grasshoppers have laid their eggs for the ensuing year.

These eggs hatch out in nymphs, the larvae form of all grasshoppers, the following spring, which are consumed in large quantities by many species of small birds and grouse.

The three most typical birds of the dry grasslands of the interior are the meadowlark, vesper sparrow and prairie chicken; twenty to thirty years ago these were much more plentiful and generally distributed than at present and their decrease, especially that of the first two named, is distinctly traceable to the crow, which has increased enormously in that period.

It is a common sight now to see crows in pairs and small companies regularly quartering the ground, far from the nearest timber, in quiet of the nests of all ground-laying birds. At least 80 per cent. are destroyed, and the decrease of such species as the meadowlark, vesper sparrow and other sparrows of the open country is very noticeable. The survivors have learned the protection afforded by the proximity of human habitations and congregate during the nesting season near these, giving the appearance of their old-time abundance. But the more remote ranges are sadly destitute of small bird life, and the grasshopper plague develops unchecked.

It is not to be noted that the commencement of this serious menace is coincident with the increase of the crow, which reached the maximum of its abundance about the year 1910.

While it is most probable that the only alleviation of the grasshopper pest will be the result of a parasitic disease affecting the insects themselves, or of a wet period during their hatching season, still it should be distinctly understood that the protection of the crow will only work for the decrease of the small birds and grouse, which help to keep the grasshopper in check, and which are in no way harmful to crops and orchards as is that sable villain the crow.

To sum up, Grasshoppers form little part of the diet of the crow at the critical time when the vast hordes of the insects are emerging. At that period he is regularly engaged in destroying the eggs and young of many species of birds whose main diet consists of both the adult insects and their minute nymphs.

Each brood of these birds which he destroys would have accomplished more in the way of an actual check to the plague than the whole season's efforts of a dozen crows,

**THE WOMEN'S
 INSTITUTES**

Home Industries was the subject of an address given by Mr. J. W. S. Logie at the Summerland Women's Institute on Friday afternoon last.

Mr. Logie compared very favorably the work done here, through the Arts and Crafts League, with what he had seen on his recent visit to Vancouver, Summerland, he thought, would always find a ready market for work done in this line.

Mrs. Knowles was appointed delegate to the Federated and Provincial Women's Institute Conference to be held in Victoria June 22nd to 26th.

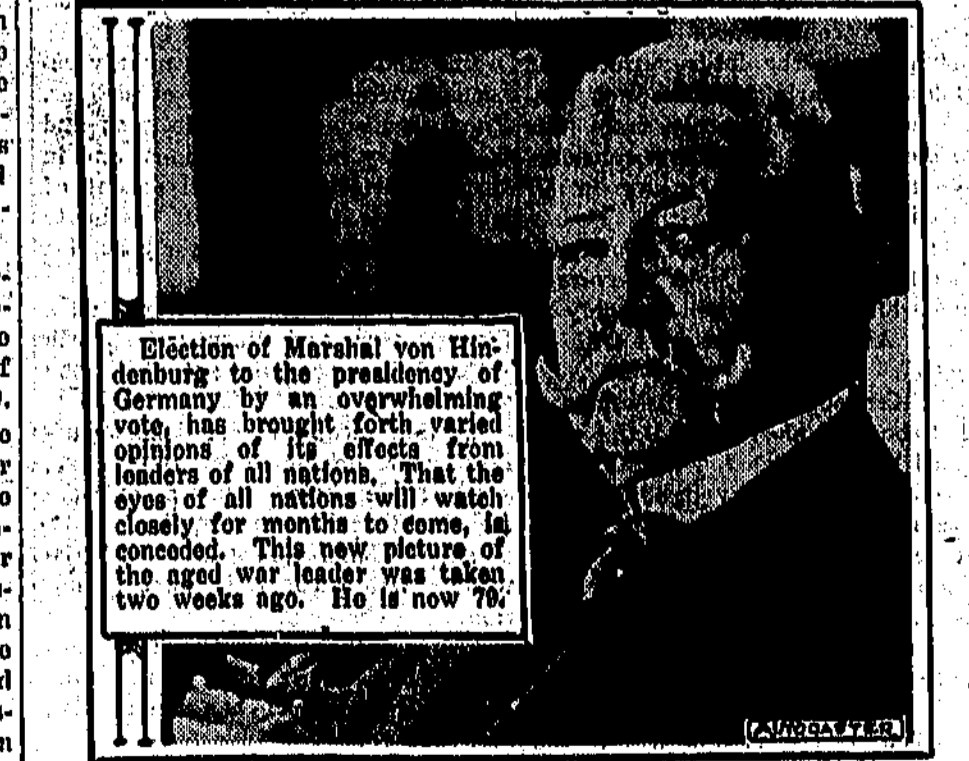

Mrs. M. Tait gave directions for crystallizing of fruits which should prove very helpful to many members during the season. A humorous reading by Mrs. Wm. Jenkinson was much enjoyed.

It was decided at this meeting that the Institute take charge of the ice cream and soft drinks booth at the picnic to be held at the Summerland Experimental Station June 13th.

CALGARY.—Oil drilling in a field which stretches from Fort Norman on the rim of the Arctic Circle, to the Alberta-Montana border, is to be undertaken this year by the Imperial Oil Company in its exploitation of the Alberta and North West Territories field. A drilling party will start for Fort Norman, in the north,

as soon as navigation opens this spring.

 "Is my wife forward?" asked the middle-aged man of the conductor who entered the car.
 "She wasn't to me, Sir," politely replied the conductor.

PEACHLAND NEWS
 By Our Resident Correspondent

The Central School building is taking on a renewed appearance. Mr. Bradley is making considerable headway on his contract of painting the roof and sides.

The memorial site under the skillful hand of Mr. F. Upton is taking form according to the committee's plans. Earth hauled in to fill inside the curb, which was put in last year, has been well mixed with barnyard manure, thoroughly raked, seeded and rolled and even in its present state begins to look like a finished job. The committee had three pipe connections made at intervals along the street main and will have short standpipes attached to these as a convenient water supply for sprinkling the grass. The square around the monument has not been completed as yet.

Messrs Richard Boswell, jr. and Harry Charlton left last week by boat and K. V. R. for Alberta where they expect to take employment for a time.

Mr. Hargrave left last week end for Kelowna where he spent several days.

The regular monthly meeting of the Peachland Women's Institute held Friday last was well attended. A demonstration of shortbread was given by Mrs. Taylor and was much appreciated. The roll call was answered by "our favorite hobby," and it seemed that the members have a variety, one of the chief being "housekeeping." Mrs. Gummow gave a reading which was followed by a solo by Mrs. McKay. A very dainty tea was served. Final arrangements were made for the annual clean up day at the cemetery on Thursday, May 21st, cars to leave town at 9.30 sharp, and it is hoped that citizens will respond as they have done on former occasions in large numbers for this estimable work. The cemetery has most certainly taken on a very marked improvement in appearance and although the work is done just once a year the effect is seen throughout the year.

Miss Crozier of Jasper, Alberta, was a recent guest of Mr. and Mrs. Gidmore.

Friends here were sorry to learn recently of the misfortune which befell Mr. and Mrs. B. M. Whyte at their ranch home near Oyama. Their house took fire and burned with such rapidity that they were able to save very little. Fortunately their little son who was having his mid-day sleep was rescued. Mrs. Whyte was alone but for the child, and did the best she could in addition to calling for help, but everything was so dry that before help could get there the fire had made too much headway to allow for much rescue work.

Mr. Wm. White was a visitor to Kelowna Monday, going over by boat and returning by car.

Neil Evans motored to Kelowna on Monday, spending part of the day there.

as soon as navigation opens this spring.

Robert Williams has accepted employment on the east side of the lake, north of Kelowna and left on Monday to take up the work.

Mr. Pierce, recent purchaser of the former Town property from the late Mr. John Stewart, is enjoying a visit from his daughter and sister-in-law who came in last week.

Mr. and Mrs. Dryden left on Monday to motor to Vernon where Mr. Dryden was called to attend a special meeting of the directors of the Association.

The members of the Orange and Lady Orange Lodges of Peachland met in the Municipal Hall on Monday evening last and enjoyed a very social time together. The evening was spent playing games, enjoying informal musical numbers interspersed with an occasional reading or recitation, after which dainty refreshments, served by the ladies, were enjoyed by all.

Southern Okanagan Fruit Centres Looking For Heavy Crop of Apples

Many Fruit Growing Districts Were Severely Hit By Sudden Freeze in December—Horticulturist Issues Report On Conditions Throughout The Province.

Covering the situation in the different fruit districts throughout the entire province, M. S. Middleton, district horticulturist, has issued to the press his first report on orchard and field conditions and crop prospects. It is very apparent from his report that Summerland and other southern Okanagan districts are very fortunate in their escape from the greater injury caused many districts by the sudden severe freeze of last December.

For some reason unexplained, states J. Tait, district field inspector, his report failed to reach the Vernon office in time for publication in the general bulletin.

Judging from statements of growers Summerland may expect a medium to good sized crop of cherries with very few cots and a very light crop of peaches. Plums will be below average, but apples, the main crop, are promising tonnage above the average.

The horticulturist's report follows:

VANCOUVER ISLAND, Etc., May 9.
The first four months of the year have been generally mild with considerable rain. The season is well advanced, being about a week earlier than last year. No serious frost damage is in evidence as yet.

Sweet Cherries, Plums, Prunes and most varieties of Pears are past the blooming period and there appears to be a good set of fruit at the present time.

Olivet and Morello cherries are now in a very heavy full bloom and give prospects of an excellent crop. They were practically a failure in 1924.

Duchess apples are past full bloom. Gravenstein, Alexander Wealthy, King, Jonathan and most other varieties of apples are practically in full bloom at the present time. Some later varieties such as the Northern Spy are still in the pink stage.

Gooseberries and Red Currants are a good size, while Black Currants are just passing the blooming period.

There is considerable bloom showing on strawberry plantations, but the height has not yet been reached. Raspberries, Loganberries and Blackberries are making good growth but there is no bloom in evidence yet.

Some strawberry plantations are beginning to show the effect of the heavy freeze of last December. On the other hand some patches are looking in very good condition. The picking acreage will be considerably less than 1924 and the total production will probably be lower also. Very favorable climatic conditions might result in a tonnage equal to 1924. With a 10 cent per lb. price for jam as compared with 7 cents for the past two years, there will not be as many cars shipped to the prairies as in 1924.

Loganberries on the whole are now looking in good condition. Winter killing will not amount to more than perhaps 15%. With prospects of 8 cents per lb. from the Growers' Wine Co. Ltd. and a corresponding price for canning berries, Loganberry growers are feeling more optimistic.

Moisture conditions are excellent, although the 5th inst. was the hottest day so far this spring, the temperature rising to 75 degrees F. Today is much cooler with prospects of rain.

Spring seeding is well over and grain crops are looking well. Some winter wheat was killed out. The hay crop should also be good this year.

LOWER MAINLAND, May 5
The past winter on the Lower Mainland generally speaking was mild, but during a period of a few days there was a sudden cold snap about the middle of December, accompanied by a strong wind. The amount of damage throughout the district varies, some sections more exposed suffering considerably, whereas others more favorably situated showed very little damage.

This spring has been cool and while the growth is not so far advanced as is often the case at this time, yet with the warmer weather which has apparently set in, the development will be rapid.

Rhubarb and Gooseberries had a heavy bloom and the apparent set is good.

Strawberry plantings are inclined to be patchy, and the blossom at present, indicates a reduced production to last year.

Raspberry plantings are making splendid growth and on the whole the crop indications are quite favorable. The blossom on tree fruits is heavy throughout giving every indication of a good yield.

OKANAGAN, May 8
After a thorough inspection and study of the general conditions in the Okanagan Horticultural District, it has been found that the last two winters have proven very trying on orchard trees, particularly in the

Northern end of the Valley. This unfavorable condition was not due to excessively low temperature but to the sudden fall and rise in same. The effects are very marked in the appearance and thrift of the trees this spring. The Armstrong, Vernon, Oyama and Winfield sections have suffered most from Winter Injury and it has been the means of impressing the advisability of establishing our orchards on hardy, frost-resistant stocks and confining our selection to those varieties which have withstood the test.

The sudden drop in temperature during last December destroyed many of the fruit buds of Peaches and Apricots in the Penticton, Summerland and Southern valley points, as a result the Peach crop particularly, will be very light. In Vernon, Armstrong and Salmon Arm, the Raspberry buds were badly injured particularly the Cuthbert variety.

Taking the Valley as a whole the apple prospects are good and should average up favorably with last year's crop. Prunes and Pears will be lighter, Apricots will also be much lighter, while Peaches will be very scarce. Raspberries and Strawberries will be light but Currants and Gooseberries show a full crop.

The acreage in vegetables will be considerably greater than last year. At Oliver the Cantaloupe plantings will exceed last year. At Keremeos the Tomato acreage will be large. At Kelowna and Vernon, where Onions, Tomatoes and early Potatoes are the main vegetable crops, the increase will be quite marked, while at points on the Main Line, Potatoes, Tomatoes, Beans and Onions also show a large increase over last year.

Soil moisture condition is outstanding, due to the heavy snowfall last winter and the favorable conditions which gave rise to an unusually light run off. Irrigation storage supply is also considered ample for this season.

The majority of growers feel rather more hopeful this year on receiving prices more in keeping with the production costs.

Salmon Arm, May 8
The crop of all tree fruits in Salmon Arm, Sorrento, Kamloops and Main Line points, shows every indication of being light this season. This is accounted for largely by the fact that considerable bud injury took place in the later varieties of apples, the early varieties not having suffered so severely from this form of injury. There is a considerable amount of root injury in all varieties.

At Salmon Arm and Sorrento, Wealthies indicate a light to average crop, while McIntosh will probably be light. All winter varieties will be light.

At Kamloops, Crabapples have a good show of blossom and the crop should be fairly good. Wealthy and McIntosh have a very light show of blossom.

Practically all Pear fruit buds were injured throughout the Main Line points. Plums, Cherries and other stone fruits will be very light.

The Small Fruit crop will be very light. Loganberries were very heavily killed, and it is doubtful if the crop will average 10%. Raspberries are showing considerable bud

Co-op Head Sues

Aaron Sapir, originator of the Farmers' Co-operative Marketing plan, has filed suit for \$1,000,000 against Henry Ford's Dearborn Independent denying that he is in a conspiracy of bankers who seek to control the food markets of the world.

injury and the crop will be very light. Strawberries came through the winter in better shape than the latter named small fruit crop, but will be a light crop.

There is a large increase in the Potato, Tomato and Onion acreage in the Main Line districts. Fall Wheat is winter killed in some sections, also Clover and Alfalfa where planted late last fall.

Vernon, May 7
In the early part of December, 1924, there occurred a sudden and severe drop in temperature conditions, which were extremely trying to all plant life. Following a very mild spell of weather, the temperature dropped between 70 and 80 degrees in less than 12 hours; the ground at the same time being practically bare of snow. The balance of the winter was ideal, no extremes of temperature, with heavy falls of snow.

The freeze of December has been the cause of considerable Winter Injury in the Vernon and Armstrong sections. From Oyama, south this condition is not so severe. All tree fruits in the Vernon and Armstrong sections, excepting the early hardy varieties, and one or two exceptions in the later varieties, have suffered in a greater or less degree. Yellow Transparent, Duchess and Wealthy show promise of a good crop. McIntosh are not heavy throughout the District, some orchards showing good promise, and others very patchy. Crabapples will be only light to medium. Winter varieties with the possible exception of Rome Beauty and Snow are extremely off in crop indications.

All stone fruits, excepting Sour Cherries are a total failure.

In the Oyama, Okanagan Centre and Winfield sections, indications are for a fair to good apple crop with the exception of a few of the winter varieties which are spotty. In the stone fruits the same general remarks apply as for the Vernon district. Pears are practically all off in all sections.

Bud and spur injury is mainly responsible for the off crop conditions. There is also considerable root and wood injury in some sections, and in certain varieties, the full extent of which it is impossible to estimate with any degree of certainty at this date.

Small fruits wintered fairly well. Strawberries and Raspberries both suffered to a certain extent in the various sections.

In field crops winter wheat suffered some damage from the freeze, some fields being almost entirely wiped out and re-seeding had to be done. Alfalfa and Clover on the whole came through in good condition.

The weather over the past two weeks has been very changeable, growth in general has been slow. Moisture conditions are good.

Spring sown grains and fodder crops are looking very good where

seeding was done early. Onion fields are looking excellent and there appears to have been good germination. There is a considerable increase in the acreage of this vegetable this year in the Vernon district. There will also be an increase in the Potato acreage, more noticeable in early varieties.

Tent Caterpillars are again proving a serious pest, the whole country in the Vernon district being infested. Grasshoppers are hatching freely and present indications are for a widespread infestation, the severity of which cannot be determined at present. Both of these pests should be combated in their early stages.

Kelowna, May 8
All crops are well advanced for the season. There is a large acreage of ground crops, being a substantial increase over last year. Acreage figures for various crops are not available yet.

Onions and early crops are well advanced, and Tomatoes are being rapidly set out.

It is early to predict what the fruit crop will be. The cold winter injured some of the buds and also damaged some of the trees. The crop of Pears, Plums, Apricots, Peaches and Cherries suffered considerably. The apple crop was hit on some locations. Delicious and Jonathan being the hardest hit. A more accurate survey of conditions can be given in a couple of weeks time.

Apple bloom is beginning to drop now and there is every indication for a fair crop.

Penticton and Keremeos, May 6
Due to severe winter weather the Peach and Apricot crop in the Penticton district will not amount to very much.

Plums and Prunes are showing a fair crop and although Cherries have bloomed very heavily, there has been a great deal of cool, dull weather during the blooming period, which may influence the set to some extent.

There is every prospect of a heavy crop of apples in the district. The trees have apparently come through the winter in good condition and at present everything points to a bumper crop of this fruit.

There has been some rather heavy losses in some parts of the district on certain varieties of Apples, Apricots and Peaches, due to winter injury. This injury is confined almost entirely to young trees.

The growers have got their spring work well in hand, and are at present busily engaged in irrigating.

KOOTENAY AND BOUNDARY

West Kootenay, May 4

The season is well advanced in all sections, about a week ahead of last year. April opened up with quite warm weather which brought growth on fairly quickly. The growing conditions were checked to some extent by cooler weather between the 10th and 15th. This was followed by bright days and cool nights with considerable frost on April 27th and 28th causing considerable damage to the Cherry crop which was in full bloom at the time.

Growers throughout the district started the first scab spray (Pink) around the first of May, and this spray should be completed by the 10th in all sections. The Gravensteins on the West Arm and Lower Arrow Lakes, also Boswell, are in full bloom at this date. Most varieties of Pears are also in full bloom as well as Plums and some of the Sour Cherries. The Sweet Cherries and most of the Sour Cherries except in the north end of the district are past the blooming period.

The Sweet Cherry crop from reports of growers, and after a general inspection of orchards on the West Arm shows that there has been considerable damage done by frost. The amount varies a great deal in different orchards and locations. The damage is placed at 25 to 30 per cent. Some orchards show more

than this while others show very little. Even with this amount of injury, and with favorable weather, the Cherry crop should be an average one for the Kootenay.

Pears are off crop all over the district. Not more than the output of last year on the showing of blossom. Plums will be an average crop, although such varieties as Maynards and Burbank, the fruit buds were winter killed. Peaches are showing a heavy bloom at Renata and Deer Park. It is not known if the frost did any damage to that section or not. However, the acreage to this kind of fruit is very limited.

Apples are showing up for a good crop and taking the district as a whole, present indications are that the crop will be larger than that of last year. The Arrow Lakes should show an increase over last year on present indications. Willow Point section points to an increase over last year. The Harrop section may show a small increase. Boswell has a good showing as well as the Bonington section.

It is rather difficult to estimate the damage to Strawberry plants. The conditions and the amount of damage vary from almost Nil to 60 per cent. The older plantings seemed to suffer the most. While many of the first year bearing plants have come through the winter with very little if any damage, would place the damage at this time around 30

A Good Way to Get the New Novels
WITH COMPARATIVELY LITTLE OUTLAY
You would like to be able to read the new novels—early—before they come out in book form—just as the publishers do? Why, of course! Well, you can do just about that.
Nowadays eight of ten of the new novels run serially in the popular magazines before being published in book form. 'Cosmopolitan' carries six or seven a year by best-selling authors, 'Good Housekeeping' and others, three or four each.
Do you see? That means that for a subscription to 'Good Housekeeping' you get at least three novels, besides all the other stories, articles and helpful information.
We place subscriptions to 'Good Housekeeping', 'Cosmopolitan', 'most any magazine. We save you time, postage, worry. Isn't that worth asking us about?

Local Happenings

Mr. and Mrs. Muir Stuart returned on Saturday morning from Victoria.

Mrs. Fish and Mrs. T. B. Williams of Penticton, were guests last week end of Mrs. T. A. Walden.

M. S. Middleton, district horticulturist, with headquarters at Vernon, was a visitor to Summerland today.

Mrs. R. M. Ross returned on Monday from Castlegar where she has been visiting at the home of her son, Mrs. Geo. M. Ross.

Mr. and Mrs. C. W. Lees and children spent several hours on Sunday with Mrs. Lees' parents, Mr. and Mrs. W. H. Hayes.

Finley has dresses of gingham, broadcloth and voile. Come and see them. L41

Mrs. Nield of Nakusp, spent the week end in Summerland, visiting Mr. and Mrs. W. S. Nield. Mrs. Nield went on to the Coast where she is attending the Methodist Conference.

Mrs. J. Shepherd is attending the district meeting of the Methodist Women's Missionary Society in Vancouver this week. She will visit in the Coast city for a few days before returning home.

Guard against the dangerous fly with screen doors and windows made by Harvey & Elsey. L41

C. J. McDougald and J. McDougald, complaining of irregularities of supply of irrigation water, have asked the council to install a measuring box for which they were willing to pay. The council decided to install a box.

William Rennie, Vancouver, travelling freight agent for the Canadian National Railways, spent a day or two in town this week seeking information desired by the C. N. R. Mr. Rennie made two or three calls at the Review office asking for information and making use of the Review files.

Stocks, the photographer, Penticton, develops films in one day. He no longer does the work for the Summerland Drug Company. L41-42
Mr. J. B. Campbell, Saskatoon, brother of the Misses Campbell, came in Saturday night on the boat and went east on Tuesday's train. He is supervisor of travellers and wholesale houses of the Willard Chocolate Company from Fort William to Vancouver. Mr. Campbell and his sisters spent Monday in Penticton.

SUMMERLAND WEATHER REPORT

Below is a report furnished by the Dominion Experimental Station here for the week ending Tuesday:

Table with columns: Date, Max., Min., Rain, Snow, Sun.
May 6-76 47 ... 11.8
May 7-71 54 ... 2.8
May 8-67 45 ... 10.5
May 9-71 40 ... 13.7
May 10-75 45 ... 11.9
May 11-63 50 ... 0.0
May 12-73 51 ... 10.2

Old Shoes
Like Old Friends!
—they wear well. Don't throw away those old shoes when the soles wear through. Take them to C. Rovers.

Jack Lawler arrived home from the east Friday night. He will probably remain here for a month.

Automobile Club of British Columbia has advised Okanagan members that the work of erecting road signs in this valley will be undertaken at once.

Penticton schools were closed last week following an outbreak of scarlet fever. Fifteen cases were reported early in the week. It is said that the prompt action taken by the health authorities has prevented any further spread of the disease beyond the homes first effected. According to current reports smallpox is blamed for the outbreak.

Mr. and Mrs. L. W. Rumball have moved into the Barr cottage on Shaughnessy Avenue immediately south of A. M. Leslie's.

Kelowna-Penticton boat service: Leaves Summerland for Penticton 11 a.m. and for Kelowna 2 p.m. daily, Sunday included. 34tf

Mr. Brennan, who has been a patient in the Summerland Hospital for some time, has been transferred to Vancouver by the S. C. R.

Finley is selling Anderson's gingham, 3 yards for \$1.15. L41

Mrs. Yule and her daughter, Mrs. Harry Milley, went up to Revelstoke last Saturday to attend the graduation exercises of the nurses at the Revelstoke hospital. Miss Winnie Yule will be one of the graduates.

Durable screen doors and windows, screen wire and fittings are awaiting you at Harvey and Elsey's. L41

Golf is increasing in popularity with a number of citizens. A practice course of five holes has been laid out at Crescent Beach and is in frequent use.

Harvey and Elsey are manufacturing durable and serviceable screen doors and windows. They stock wire screening and fixtures. Ask for prices. L41

T. G. Beavis left by train Wednesday noon on a ten days vacation. While away he will attend some of the sessions of the Methodist Conference.

Miss Ella Bowering and Ewart Bowering are expected home Saturday night from Brandon. They have both been attending Brandon College and will spend their vacation at their home here.

Come to dance Friday, 22nd, G. W. V. A. Hall for Boy Scouts Camp fund. L41-42

Finley has a special in silk hose in black, white, brown and beige at 85 per pair. L41

A dance in Veteran's Hall under the auspices of the baseball club and Rangers will terminate the program on community sports day, June 3rd. L41

Councillor Arkell reported to the council on Friday that there is no government road to Three Lake Valley. The matter of improving the road had been referred to him at an earlier meeting. Access to the valley is now had across private property.

Last Saturday the C. G. I. T. of the Baptist Church held a very successful sale of home cooking in Mr. Kelley's building, next the Union Church, which he kindly let to the girls for their sale. Over \$30 was realized which is a very helpful addition to the girls camp fund.

Keep the doctor away. Eat cracked wheat. For sale at the Groceteria. L41

Bernard Taylor, whose name was omitted from the published list of University passers was advised early this week by telegram that he had succeeded in passing into second year Arts. Edith Quillifo, a former Summerland girl, now living in New Westminster, also passed the first year University examinations.

Come to dance Friday, 22nd, G. W. V. A. Hall for Boy Scouts Camp fund. L41-42

Vancouver Province last week published a resume of the annual publication of the training school of the Vancouver General Hospital, describing it as a distinctly ambitious and interesting volume. Among the list of graduates are the names of Miss Betty Barnes of Summerland, Miss Grace Boggs and Miss Ruth Yonville of Penticton.

Mrs. Powell entertained twenty-five of Mary's little school friends on Saturday in honor of her little daughter's eighth birthday. It was difficult to say which proved the most popular, the games on the lawn or the play ground. Every little girl thoroughly enjoyed the party. A large table was laid on the porch and a birthday cake and ice cream made a happy ending for a perfect day. Mr. Powell drove the happy children to their homes about seven o'clock.

VALLEY LEAGUE IS ORGANIZED

Baseball Schedule Provides For Three League Games Here

Summerland will play the Oliver baseball team at Oliver next Thursday. This is the first game in the new league schedule in which these teams play. On this occasion the Summerland team will wear for the first time their new uniforms just purchased at a cost of \$150.

Representatives of baseball clubs of Summerland, Penticton, Oliver and Oroville met at Penticton last week and organized the Okanagan International Baseball League. The regular league games opened at Oroville, on Sunday when Penticton was defeated by the Oroville team 9 to 11.

Three games will be played in each of the four home towns. Though games are scheduled for practically every Sunday until the end of June, the Summerland club does not take part in any Sunday games.

The schedule so far arranged for is as follows: May 10, Penticton at Oroville; May 14, Summerland at Oliver; May 17, Oroville at Oliver; May 21, Summerland at Penticton; May 27, Penticton at Summerland; May 31, Oliver at Oroville; June 3, Oliver at Summerland; June 7, Oroville at Penticton; June 14, Penticton at Oliver; June 28, Oliver at Penticton; July 4, Summerland at Oroville and July 9, Oroville at Summerland.

IMPROVEMENT IN ADMINISTRATION OF GAME LAWS

Administration of the game laws to the better satisfaction of the game associations was promised the delegation which waited on Attorney-General Manson recently, states H. H. Creese, representing the Allied Fish and Game Protective Associations of the interior. The attorney-general promised to appoint a game commissioner who would be directly responsible to his department. At present the game laws are administered by the provincial police. The delegation also received a promise that the present Game Conservation Board would be re-organized.

Mr. Creese says that they found the attorney-general very much in sympathy with organized protective associations and the work they are doing and promised that the government would go the limit necessary to effect proper administration of the provincial game laws.

Mr. Creese was at Kelowna last Friday and reported the results of the visit to Victoria to the officers of the Allied Associations.

MISS VIVIAN JONES COMPLETES COURSE

Engages in Speciality Work in Eastern Canada

Miss Vivian Jones a member of the Summerland High School staff last year, will graduate next month from the Margaret Eaton School of Physical Culture. She has covered two years work in one in physical culture and dramatic art and has led her class much of the time with marks of eighty-five to ninety-five per cent.

Miss Jones has been offered the position of head of the T. Eaton Company summer camp and will probably accept the position. She has been giving crippled children special physical training, work in which she is greatly interested.

Her father, J. W. Jones, M. L. A., who is going down to the Coast in the next few days, will go from there to Toronto to be present at the graduation exercises.

This Day and Age
Proud Dad:—"I never fall to kiss my children goodnight. Do you?"
Plain Guy:—"Believe me, I ain't going to lose all that sleep waitin' up for them."

His Hour
"I'm boss in my home—"
"Yea?"
"—when the wife and both children are away."

LOG CABIN OPEN FOR THE SEASON

More than one hundred persons registered at the Log Cabin last Thursday, when the Cabin was opened for the season. There was no formal program or speeches. Pottery, baskets, totem poles, etc., all home products, were on display and tea was served, the Art League realizing \$16 through serving tea. Three thirty inch totem poles, the work of H. Amundsen, were the objects of much comment. The grounds about the Cabin are looking well and the new totem pole on the corner was quite an object of interest.

WANTS ELECTRIC LIGHT CONNECTION

D. C. Thompson has applied for an extension of the electric light service to his home. He pointed out that an extension of 525 feet from Mitchell's corner would reach his lot line and that this would cost about seventy dollars. He was ready to pay the cost in excess of the sixty dollars maximum fixed by the council. He now has his poles up and the house wired.

The application was referred to the electric light committee with the power to act.

VALLEY MEET ON SATURDAY

Annual Inter-school Event Will Be held At Penticton

Okanagan Schools Athletic Association will hold its fourth annual track meet at Penticton on Saturday next. This is the first year that the meet has been held elsewhere than in Kelowna, which city was responsible for the development of the inter-school sports meet. The program will commence at 10.30.

The meet is in two sections: Section A, for the public schools consisting of 19 events and Section B, for the High Schools, of 20 events. In each section the grand prize is a silver cup, while the boy and girl in each section making the highest aggregate score will also be rewarded with a cup. The winner of the first place in each event will receive a handsome silver medal, while the winners of second and third places will receive ribbons.

WASHING TABLE LINENS

Real linen is expensive, and for this reason if for no other the greatest care should be taken in its laundering. After soaking it should be well shaken out and put, a few pieces at a time, into warm soapuds. Soap should then be applied to all soiled places and the cloths washed clean, with care not to rub too much, as that injures the fabric. Change the suds as often as it becomes dirty. Put the clean things into the boiler in tepid suds, bring to a boil, and boil a few minutes without stopping. The clothes will not look so white if the boiling stops before you are ready to take them out. With a clean, smooth wooden stick lift them out into a tub of clear, tepid water, wash the soap out, and wring them. Rinse in clear tepid water, fold smoothly, and wring. Shake out and hang by spreading a hem over the line three or four inches deep and fastening at each end three or four inches in from the edge to avoid too much strain on the corners. The reason the corners of napkins and tablecloths wear out first usually is that not enough care has been used in hanging them on the line, and too much weight and strain came on them, whipping in a wind. The other hem should be brought up and fastened to hang full so as to blow out like a sail, thus drying faster.

PENTICTON TO INVESTIGATE CREESE PERMIT

Game Association Protests Against Commercializing of Game Fish

Has Full Control of Water of Chute Lake and Brent Lake

H. H. Creese's exclusive licenses on Chute and Brent Lakes is strongly objected to by the Penticton Fish and Game Conservation Association, and was discussed at some length at the annual meeting of that organization held last week. William Collins, the president, introduced the subject. Penticton Herald, reporting the meeting, says of this subject: Mr. Collins brought up the matter of the lease Mr. Creese had secured from the government under the Water Act, in securing a license to obtain control of Chute and Brent lakes for commercial purposes. Mr. Halliday had stated that the Dominion had no control of the lakes beyond the railway belt and that it was a provincial matter.

Mr. Collins stated he knew Mr. Creese was endeavoring to get control of these lakes but he did not know matters had gone so far. Protests had been sent to the department by the local board of trade and game association, and Mr. W. A. McKenzie had taken the matter up, but it was found that the licenses had been granted before the protests were made. He had also talked with Premier John Oliver and another minister on the train, and they had promised to investigate the matter.

Mr. Creese's license gave him full control of these waters, and in a conversation with him at Summerland, Mr. Creese had stated that he proposed charging anglers 20c a pound for what fish they caught. He intended to sell the spawn up for cooking purposes.

Mr. Collins felt that Mr. Creese had been granted his license by the department of lands under the Water Act under a misapprehension. Mr. Creese had stated that Brent lake was barren, but Mr. Brent himself had stocked it last year. "We want protection from the commercializing of game fish in lakes stocked by the government for the general benefit," said Mr. Collins.

He felt that Mr. Creese was pursuing a losing proposition and would not make any money, but that the association should take action on principle.

Upon motion of Dr. McGregor, the department of lands will be asked for a copy of the application and license granted Mr. Creese.

ARE STAGGERED BY ROAD ACCOUNT

(Continued from Page 1)
statement made at the last meeting of the Board of Trade, and reported in this paper, that a considerable sum was available for improving the Summerland-Peachland section of the Okanagan Highway.

WANTS NEW BRIDGE IN GARNETT VALLEY

F. Munroe Protests Against Flooding of Bridge Across Creek

Findlay Munroe, of Meadow Valley, reports that the bridge across Aeneas Creek near the upper end of the Garnett Valley reservoir, is now four feet under water. He further states that the bridge, an old one, is in a dangerous condition, there being holes in the planks.

He is strongly protesting against the flooding of the bridge by the water in the reservoir and stated that Miss Stoner, who owns the property near-by, says that she will have to abandon her property unless better road accommodation is provided. In support of his contention that this bridge should be kept in good condition he says that it is a part of the government road between Peachland, Meadow Valley, Fauquier and Keremeos.

On the west side of the bridge is a sandy hill which is always in bad condition and Mr. Munroe is endeavoring to interest the government in changing the route of the road so as to cut out the hill and to replace the old bridge, now under water, with another at the site of the Garnett Valley dam. He claims that the municipality promised to raise the old bridge so that it would not be flooded when the reservoir is full and suggests that the municipality and the province should jointly build the new bridge and section of the road.

BRITONS ARE EATING MORE BROWN BREAD

English Are Becoming a Nation of Wholemeal Bread Eaters

The English are becoming a nation of wholemeal bread eaters. Since the pronouncement, a little more than a year ago, by the eminent surgeon, Sir William Arbuthnot Lane, that white bread is probably one of the causes of cancer, the bakers of England have noticed a great decrease in the sale of white bread and an increase in the consumption of wholemeal products.

This change in the national appetite has become so widespread that the Bakers' Association has issued posters and pamphlets showing the benefits of the wholemeal diet, and urging its wider use.

Specific figures of one of the largest bakeries in London show the sale of wholemeal loaves during last December to be almost three times that of the previous December.

Last year some of the English millers installed machines to bleach the wholemeal flour, but even this is no longer necessary, for there is no social stigma attached to brown bread these days.

ED PURDY'S PHILOS

"I've been married 70 years now—and if you don't think that is hard to do—try it."

PREPARING FOR ANNUAL SPORTS

(Continued from page 1)
Advertising and catering: W. Atkinson, Jr., chairman; B. E. Knowles, V. M. Lockwood.

Sports and program: A. E. Morgan, chairman, Keith Elliott, W. Johnston, Fred Barnard, I. W. Booth, G. W. Cope, Ronald White, S. A. MacDonald, J. O. Steeves, Muir Stewart, C. J. Amm, Howie Daniel and Lionel Munn.

Grounds, J. O. Campbell, chairman, Ben Newton, Fred Barnard, J. J. Blowett, C. E. McCutcheon, James Ritchie, V. J. Bernard, R. Johnston, W. L. MacPherson, O. G. Smith, J. O. Arkoll and Bernard Taylor.

Concessions to outside parties will be granted provided they do not interfere with the franchisees. Those of a benefit nature will receive special consideration.

During the meeting a lengthy discussion arose over the ownership of the land at Crockett Beach. This matter is coming to a head very soon and citizens will be called upon to support a plan to keep it open to the public.

S. OKANAGAN IS LOOKING FOR A HEAVY CROP

(Continued from Page 4)

per cent. Raspberry canes are also showing some winter injury, particularly the Cuthbert. However, new growth is coming on and the damage may not be so severe as it is thought at this time.

Vegetables are making fair growth but nights have been too cold for good growth conditions. Moisture conditions are good and with warm weather all crops should advance rapidly as seeding was much earlier this year than usual.

Rhubarb and Asparagus have been on the local markets for some weeks in small quantities.

Grand Forks, May 5

Blossom indications in those or-

NARAMATA LAD LOSES HIS HAND

(Continued from page one.)

could be hoped, but is in a bad condition from shock.

Mr. J. W. Jones, M. L. A., was in town on Thursday on a visiting trip.

Miss Alice Myers returned home on Thursday from Vancouver, and will spend her vacation here.

Mr. A. C. Lyons spent a few days last week at the home of Mr. and Mrs. Russell Wells, Penticton, returning Friday evening.

Mr. Wm. Rennie, travelling freight agent of the Canadian National Railway was in town on Tuesday morning, and discussed railway and shipping matter with the president of the Board of Trade and several members. He left for Vancouver by the ten o'clock ferry.

The Anglican service was taken on Sunday afternoon by Rev. H. A. Solly who preached on the parable of Dives and Lazarus. The anthem was "They that wait upon the Lord" (Elvey). Mrs. Languedoc presiding at the organ. Announcement was made of an evening service on the last Sunday in the month.

A World-wide System Of Financial Service

By telephone you can talk with your neighbour or with an individual thousands of miles away. By telegraph you can span the continent; by cable your message can girdle the earth.

In like manner you can use the service of the Bank of Montreal in little or large measure as the occasion demands.

You can transact business of a purely local nature or enter into financial dealings with people in any part of the world.

Like the telephone, telegraph or cable, our system of financial service is as extensive as are the needs of our customers.

BANK OF MONTREAL

Established over 100 years

Total Assets in excess of \$700,000,000

chards which escaped the serious Winter injury which occurred a year ago, promise an apple crop fully equal to that of last year. There has been however, some recent frost injury, the extent of which it is impossible at present to determine. Some growers estimate the damage as high as ten per cent.

The bloom on McIntosh trees is unusually heavy, but there are strong indications that this variety which was at first thought to have escaped any injury, was hit this past winter. Further investigation will be necessary before a definite report can be given as to the amount of damage done.

In the many orchards which suffered from Winter Injury a year ago, there are many "hangovers," trees which were badly weakened, but retained enough vitality to blossom out this spring. These are now drying up and it will probably be only a question of time before they die this year.

Prunes have blossomed well, though somewhat "spotted," but it is too early to hazard a guess as to the probable crop.

Cherries of which there are very few in this district have suffered some frost injury recently, and will be a light crop. Plums, of which also there are but few, will be very light. Pears will also be light.

Strawberries are badly winter killed throughout the district, only the runners surviving in most of the plantations. No effort is made to mulch strawberries here.

Alfalfa and Fall wheat have been badly killed. A number of alfalfa fields have been plowed up and are being planted to potatoes. Most of the Fall wheat fields have also been re-seeded to Spring grain.

Soil conditions up to quite recently have been first class, and the land has been in fine condition for working. The ground is beginning to dry up now however, and a good rain would be most welcome.

Creston, May 4

All winter varieties of apples have received a serious set back, and there will be no fruit as blossom buds were seriously affected by the sudden severe storm of December last.

Walthams and McIntosh promise a light crop. All varieties of Pears were so seriously affected that there will be no crop of fruit this season. Sweet Cherries also, are seriously

affected and the crop will be very small.

Crabapples, Sour Cherries and what few Duchess and Yellow Transparent apples there are, promise well, the former two fruits are in bloom now.

Strawberries were somewhat affected on the stiffer clay soils. Magoons suffered more than any other variety. At Wynndel the winter killing was not so severe but some of the young plants were affected and the yield per acre may be reduced as much as 20 per cent in some cases.

Raspberries, especially the Cuthbert variety were seriously affected by winter injury. Many growers cut the canes down and only those growers who are located on the edge of the flats have any hopes of picking about half a crop off their patches. Kings, Columbia and Millers came through with a slight amount of damage, but the acreage is small and on the whole the Raspberry crop will be very light.

Tomatoes will be planted heavily

this season and this crop will comprise the largest acreage of the various truck crops grown in this area. A few growers intend to plant out Asparagus and an increase in the shipments of this vegetable may be looked for in the course of the next two years.

At Camp Lister, Clover and Alfalfa look very good as there was a good blanket of snow on the ground. Orchards were badly affected by the severe storm of last December.

The Best Sink Value Ever Offered

Entirely new type of Sink at a remarkably low price. The base is rust-resisting Armo-Iron, coated with purest white enamel, same as refrigerator, electric ranges, etc. Sold complete with all fittings and instructions.

SMP Enameled Sinks

Price Complete \$13.00

SMP Enameled Drain Board—Price \$6.50

Wonderful value. White enameled Armo-Iron base. Very strong, handsome, handy. These new SMP Sinks and Drain Boards sold by all plumbers and hardware stores, or write direct to:

HOME SCHOOLS MEET WINNERS

Cups Held For Three Years By Kelowna Go To Penticton

Leslie Gould won two firsts for Summerland High School in the inter-school track meet held at Penticton last Saturday, winning first in senior boys open high jump and senior boys open broad jump. He took second position in boys open 100 yards, and the 220 yards boys open. Shelley Knowles came in second in the half mile for boys under 17. The boys relay team won 1 point for Summerland. Third places were won by Shelley Knowles in the 220 yards for boys under 17 and Harold White in broad jump for boys under 17.

Ruth Tait won a first for the Public School and was in a fair way for winning another first when she strained a muscle. She won the 75 yard race for girls under 16. Edna Smith took second place in the high jump for girls under 16 and Maurice Rippin, second in the 220 yards dash for boys. Third prizes were won by Maurice Rippin in the 100 yard boys open, Jimmie Clark in the broad jump for boys under 14 and Maurice Rippin for the broad jump open. In the girls under 16 relay Summerland team won third place. Penticton won the cups in both high school and public school competitions. The three previous meets were held at Kelowna and in each case the home team won. The advantage to a school in competing on home grounds is evident by the result of the four meets.

Kelowna, Vernon and Summerland took second, third and fourth positions respectively in both high school and public school events.

This year's track meet was equally as successful as the former events. Much enthusiasm was shown by the grand stand. An excellent feature of the meet this year was the method of identifying the competitors. Each wore in large figures on his or her back the number assigned to the contestant on the score card so that onlookers were always posted on the name and home of each participant.

There were three cups up for competition, the Kelowna cup, Vernon Amateur Athletic Club cup and the Ramsay cup, each of these to be won by teams. Silver medals were awarded to all winners of first places and ribbons to winners of second and third places.

KELOWNA RANCHER COMMITTS SUICIDE

The body of Alan H. S. Wright, fruit rancher of the K. L. O. Ranch, near Kelowna, was found with a bullet through his head in the barn of a nearby neighbor at noon Saturday.

An elderly employee discovered the body and immediately informed the police, who say that all indications point to suicide. A .38 revolver was found lying by his side in the barn. Medical men who were called in to examine the man said that death had taken place about an hour previously.

Wright, who is an Englishman, was between 35 and 40 years of age, and leaves a wife and two young children.

B. C. TO BE VENUE FRUIT COMBINE CASE

British Columbia will be the scene of action in the federal government's prosecution of the alleged fruit combine in Western Canada, which will be based on the findings of Lewis Duncan, royal commissioner.

FIGHTING PLAGUE OF GRASSHOPPERS

Nicola Valley Preparing To Fight Pest in Wholesale Manner

Ranchers of the Nicola Valley and the government are co-operating in a determined effort to lessen the grasshopper plague which has existed there for several years. Many tons of bran and poison are being supplied by the government and the ranchers will provide the other necessary ingredients of the mixture, sawdust. The government is also providing power mixers.

FAMILY ATTACKED BY UNUSUAL MALADY

Two Cases Infantile Paralysis in Gale Family—First in District

Two cases of infantile paralysis have developed in the family of C. J. Gale. Verna, a girl of about twelve, has been in the hospital about two weeks. Billy, a lad of about eight years, has the disease in a milder form and is being cared for at home. Dr. F. W. Andrew, medical health officer, informs The Review these are the only cases that have ever developed in Summerland.

Some people, he says, will be disposed to blame it to vaccination but he does not think it possible for vaccines to carry this germ. Flies, especially the stable variety, are thought to be the chief carriers of the germ of infantile paralysis.

Isolation regulations, as prescribed by the health laws, are being observed and Dr. Andrew does not expect there will be any further cases.

SAYS NO TRUTH IN G.N.R. TALE

C. P. R. Vice President's Office Says Report With- out Foundation

Stories originating from Grand Forks, Oreville and other points along the section of the Great Northern Railway from Spokane to Princeton, and apparently well authenticated, to the effect that the C. P. R. was taking over that line, have been denied by C. P. R. authorities. The story gained great credence at Penticton where many details with relation to the alleged change were discussed.

A wire to the office of D. C. Coleman, vice president of the C. P. R. and president of the K. V. R. brought the statement from Mr. Coleman's secretary that Mr. Coleman was absent from the office on account of illness but there was no foundation to the report that we have purchased or contemplated purchasing the Great Northern, Grand Forks-Princeton line.

UNIVERSITY PLAYERS DELIGHT AUDIENCE

Performance At Empire Hall Was "Best Yet"

The University Players were seen here in "You and I" on Tuesday evening. Though the attendance was much below that on the occasion of previous visits of the University Players it was a very delighted audience which witnessed the performance, perhaps the most creditable of any yet given here by the students' club. The play itself is such as to sustain interest from beginning to end and required from each participant no little amount of skill. In every case each part was well taken and the stage presence and acting was all that could be desired.

The play "You and I" won the Harvard prize for the best comedy of the 1923 season and has been produced in all the large eastern cities. Its production by the University students is the first time it has been played west of Toronto. Meagre audience to mean that their city Players will not interpret the meagre audience to mean that their clever work is not appreciated and that they will not be again heartily welcomed to Summerland.

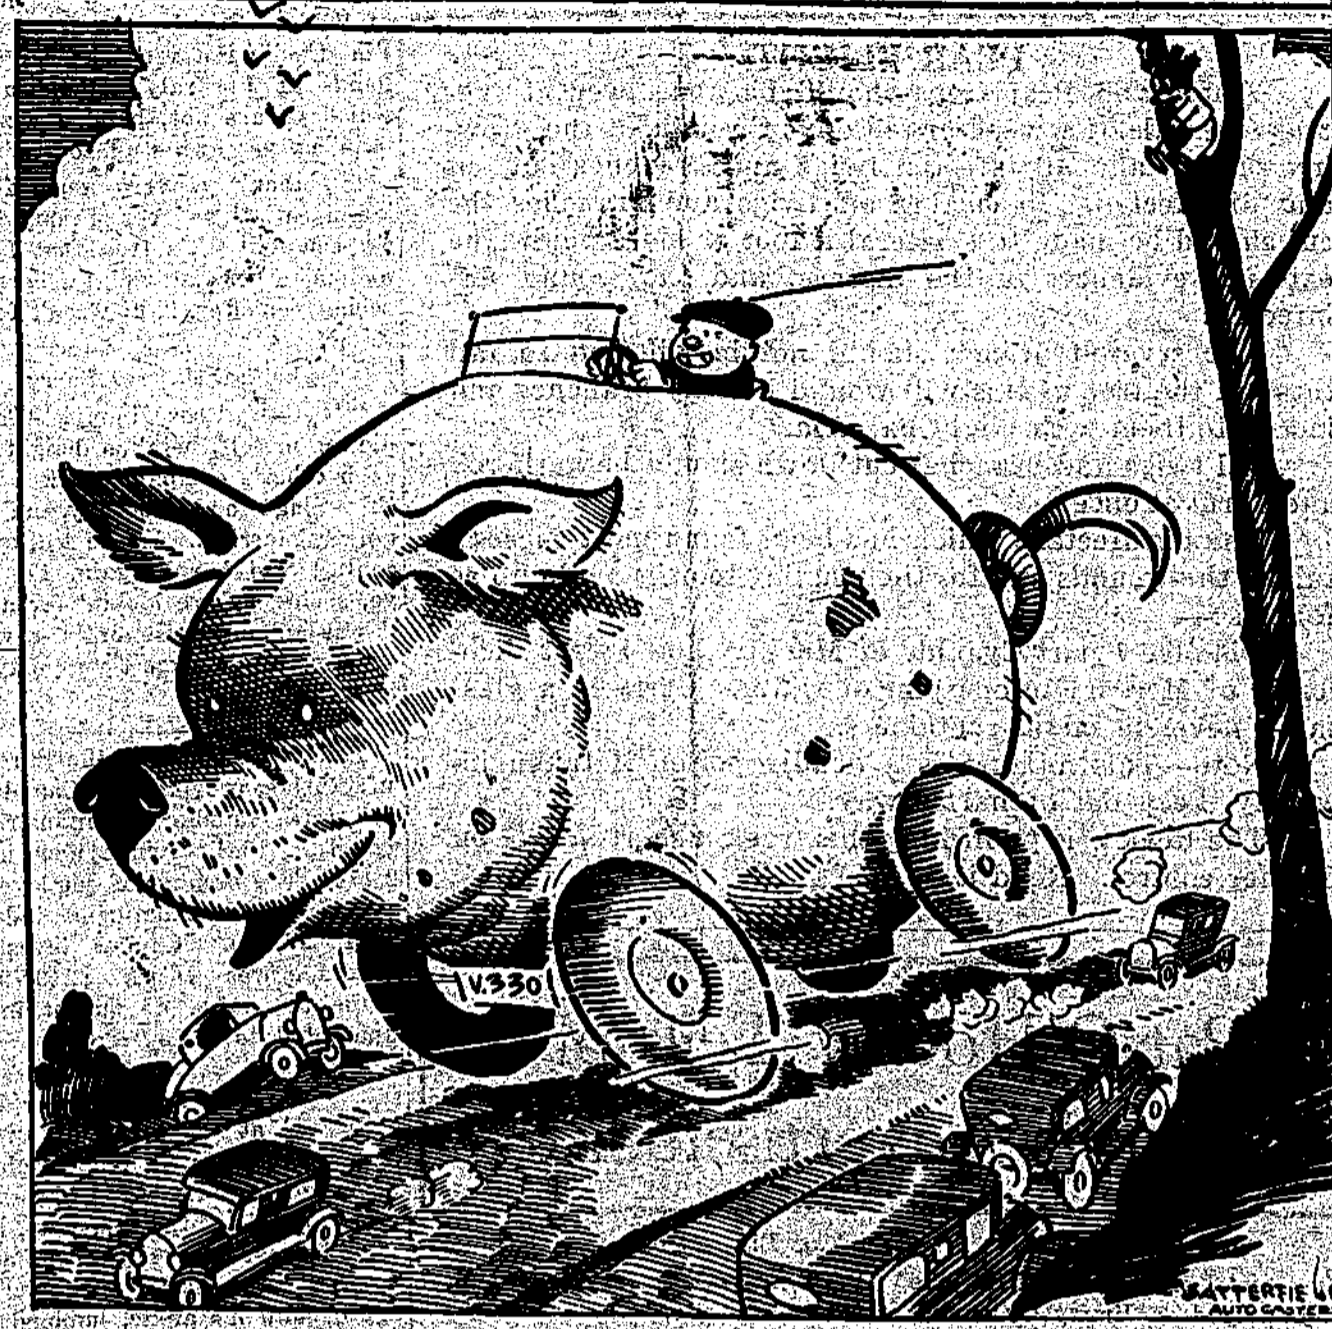

OCCIDENTAL ADDING TO FLOOR SPACE

Occidental Fruit Company is adding to its packing house. An addition of 25 x 100 feet is now being built on the east side of the new building erected last year. As the first building was 50 x 100 the addition will add fifty per cent to the floor capacity.

According to a statement issued by the Bureau of Statistics, Canada's production of commercial fruits for the past year showed a decrease of \$8,002,012 in value as compared with 1923. The total value of fruits grown in 1923 was \$83,100,343 and in 1924 \$24,206,431.

There's many a good sport who never got to wear sport clothes.

HE'S OUT AGAIN

COUNSEL IN FRUIT CASE COMING WEST

Will Initiate Proceedings at Once in Alleged Fruit Combine

Ottawa, May 19.—J. C. McRae, prosecuting counsel in the case of the fruit combine, is going west at once to initiate the prosecutions. As a preliminary however, conferences will be held with the attorney-generals of the four western provinces, whose co-operation has been sought. The labour and justice departments are leaving the matter pretty well to the counsel retained, but charges will be laid, wherever the offenses complained of were committed, and the report covers Manitoba, Saskatchewan, Alberta and British Columbia.

NEW REGULATIONS FOR BARBER SHOPS

Hon. W. Sloan, Provincial Secretary, is getting out a new set of regulations governing barber shops in B. C. One of the new rules would require the sterilization of all razors, scissors, combs and other instruments before being used and another is that no person suffering from any skin or infectious disease shall either be employed in or be served in any barber shop.

TO DEHYDRATE CULL APPLES

Effort Will Be Made To Get Special Rate On Fruit to Drying Centre

Mr. Thomas Bulman, president of the United Farmers of B. C. is working on a scheme for dehydrating cull apples at some point in the Okanagan. It has been proved that large quantities of inferior fruit could be treated in this way in a manner that would bring some profit to the growers who meantime have regarded such cull apples as practically of no value.

Before such a scheme could be made profitable, Mr. Bulman claims that a special freight rate for the apples in small consignments to the dehydrating centre would be necessary.

In an effort to get the railway companies to give some such special rates, Mr. Bulman has asked the co-operation of the transportation committee of the Canadian Manufacturers and has been in conference with Mr. W. F. McClintock, chairman of the committee. Mr. McClintock will take the matter up in the hope of getting some consideration along the lines suggested.

MRS. WILSON BUYS SUTHERLAND PROPERTY

Mrs. M. G. Wilson has purchased the J. M. Sutherland property in Peach Orchard. Mr. and Mrs. Wilson are at present living in the G. N. Gartrell house close by. They will at once take possession of their new property consisting of five acres of orchard and other land in addition to the house. Before moving in, probably about July 1, some improvements and alterations will be made to the house.

SUMMERLAND WINS FIRST BALL GAME

Defeats Oliver In Latter Town, Score Eleven To Five

Summerland defeated Oliver last Thursday in the first league game in which the local team has played. The score was 11-5, the game being played at Oliver. The Summerland team is playing at Penticton this afternoon in another league game, and will play at Oliver on the 25th in a competition for prizes. This latter is not on the league schedule.

The line-up of the team which visited Oliver last Thursday was: pitcher, J. H. Ritchie; catcher, Alf Johnston; first base, Leslie Gould; second base, Lionel Munn; third base, H. Daniel; short stop, W. Nicholson; right field, John Winter; centre field, Clarence (Buck) Brittain; left field, K. Elliott; spares, O. Dunham and W. Snow.

A baseball team has been organized by the employees of the Dominion Experimental Farm and it is expected that the Summerland team and the Farm team will meet in a friendly game soon.

RESUME DRILLING NEAR ARMSTRONG

Work Starts In Boring For Oil in North Okanagan

Steps are being taken this week to resume the boring for oil on the property about a mile east of Armstrong where the Okanagan Coal, Oil and Gas Company carried on the operations which were suspended a year or two ago for want of funds. Mr. C. T. Elino, a contractor from Red Deer, has now taken over the work, and it is expected that about 10,000 will be put into the preliminary work of exploration. A crew of drillers are on their way from Shelby, Montana. Many indications of the presence of oil have been detected in the neighborhood, and the promoters are very hopeful of striking it in paying quantities.

There are over one million insects in the British museum. It is said few former doughboys visit the place.

GOVERNMENT TAKES OVER SEED GROWERS

Department Will Continue Good Work Started By Organization

British Columbia Department of Agriculture will take over the United Seed Growers and carry on the work done by that organization. Since organized several years ago the seed growers have been subsidized by the Dominion Government and in that time the seed production has been put on an excellent basis and a wide reputation established for British Columbia seeds. The organization is not yet sufficiently large and strong to carry on without financial aid and the government has decided to do this work.

INTERVIEWED ENGINEER ON ROAD MATTERS

Reeve Johnston, Councilors Ritchie and MacPherson and F. J. Nixon, municipal treasurer, had a conference at Penticton on Monday with Mr. W. K. Gwyer, district engineer in charge of roads, on the subject of the bill issued from his office to the municipalities for its portion of maintenance costs on the Okanagan Highway within the municipal limits. Mr. Gwyer promised to give a detailed statement. There was a general discussion on road matters.

WINS LARGE CASH PRIZE

Dr. McIntosh, Known Here Takes First Honors In All-America Contest

Many Summerland People would be interested to learn of the honor won by Prof. D. C. McIntosh, D.D., brother of the late D. H. McIntosh of Okanagan College and later principal of the Summerland high school. Professor McIntosh has been awarded the Brown prize of \$6,000, which is given once in five years by the Lake Forest University of Chicago, for the best theological work.

Professor McIntosh is a Canadian and a graduate of McMaster University, Toronto. He is now a member of the faculty of the Yale divinity school.

According to the first weekly report issued by the Canadian Pacific Railway, the crop acreage this year will be slightly less than last. It is estimated that Manitoba will sow about 2,648,000 acres this year, Saskatchewan 3,555,188 and Alberta 2,721,889 making a total area of 13,010,872 as compared with 14,158,906 in 1923.

MISS NICHOLSON IS "SHOWED"

Home of Mrs. J. A. Darke Sees of Pretty Social Event

Miss Jennie Nicholson was the recipient of many beautiful presents on Thursday afternoon last, when she was given a miscellaneous shower at the home of Mrs. J. A. Darke, by Mrs. Darke and Mrs. Arnold Gayton.

The bride-elect was very much surprised upon entering the home to find a room full of guests waiting to surprise her with many beautiful presents, which were piled in on a wagon by little Ida White and Clayton Darke. The wagon was decorated in pink and white. Miss Nicholson was greatly surprised and delighted with the numerous presents, and thanked every one for the beautiful articles they had given her.

Quite a number of guests were present and a delightful social afternoon was spent. Dainty refreshments were served by the hostesses.

ARMITAGE GOES TO ROSSLAND

Rev. Henry Wilson Will Be New Pastor of Local Methodists

Rev. H. J. Armitage, pastor of the Summerland Methodist Church will be transferred to Rossland, according to the schedule of the stationing committee of the British Columbia Methodist conference in session at Victoria.

In the first draft prepared by the stationing committee Rev. G. R. B. Kinney of Ocean Falls was slated for Summerland but the final draft assigns Rev. Henry Wilson to the pastorate of the Summerland church.

Rev. R. W. Lee, a former pastor here and now of Kamloops goes to Fairfield Church, Victoria. Rev. W. P. Bunt of Kaslo, one time at Naramata, is transferred to Mission City. Other changes of local interest are Rev. D. M. Perley, Penticton; to Sixth Avenue, New Westminster and Rev. A. E. Whitehead to Penticton; Rev. Wm. Vance, Kitlanoo to Kamloops.

LEAVE THIS WEEK ON EXTENDED VISIT

Mr. and Mrs. G. Thornber Are Given Farewell By Church

Mr. and Mrs. Gilbert Thornber are leaving Friday for Montreal, from there Mr. Thornber will sail for England to visit his mother and relatives. Mrs. Thornber will remain for a time with relatives in the Eastern Townships, Quebec, and later will join her husband in England. They will be away for several months.

Mr. Thornber, who has been conducting the evening services in the Baptist Church for the past three months, spoke to a large audience when he gave his farewell sermon Sunday evening.

Following the regular Young People's meeting on Monday evening, a farewell social was held for Mr. and Mrs. Thornber.

BRIDE ELECT GIVEN SHOWER BY FRIENDS

The home of Mrs. S. G. Rand was the scene of a very pretty miscellaneous shower Friday afternoon given by Mrs. Featherstonhaugh in honor of Miss Nora Thompson, whose marriage was to take place the following Wednesday. Mrs. Keith Elliott and Mrs. Taylor assisted Mrs. Featherstonhaugh.

Little Maxine Elliott very delightfully pulled the presents in for the bride-elect on a little cart, when the guest of honor, who was greatly surprised, opened the parcels and passed them around for all to view.

There were about forty guests present and a most enjoyable time was spent by all.

The country is being besieged by moving-picture stars. Mary Pickford, Viola Dana, Tom Mix, Harold Lloyd and others have passed through within the last few weeks, and explored the Rocky Mountains and other Canadian attractions. The latest in foot Gibson, who is bringing a large company of movie people to film the Calgary Stampede as an incident in a "super" drama.

ENQUIRE ABOUT TOURIST PARK

Board of Trade Meeting Not Well Attended On Tuesday

Acknowledgement of the receipt of the resolution of the Summerland Board of Trade on the subject of C. N. R. service has been received by P. E. Knowles, secretary of the local board. The letter was read at the regular meeting on Tuesday in the police court, Mr. M. G. Wilson, president, in the chair. There was a very slim attendance at this meeting and very little business was transacted.

The Associated Boards of Trade of British Columbia asked for renewed membership. The fee is fifty cents per member. This question was laid over until the next meeting.

A lengthy questionnaire on local tourist park was read and discussed but as the park is municipal property it was decided to ask the municipal office to answer the questions.

In answer to an inquiry the secretary replied that there was no report from the memorial committee. It was understood that this committee was to report after the end of April.

The board endorsed the provincial "save the label" campaign for encouraging consumption of home products. It is expected that an active campaign would be launched here immediately.

ST. ANDREW'S Y. P. S. HEAR FINE LECTURE

Mr. W. C. Kelley gave a very interesting and instructive lecture last Monday evening to the Young People's Society of the Union Church. His subject was "Literature." He spoke of the different kinds of poetry and their development through many centuries.

One of the members was appointed to visit Mr. C. A. Mitchell, who is now in the hospital and who has been an active worker in the Society, and take him the best wishes and sympathy of the members.

The announcement was made at the meeting that there would be no Young People's meeting the following week as it was the 25th of May and many of the members would be unable to attend.

DELIGHTED WITH CONDITIONS HERE

W. J. Beattie, D. C. Thompson, E. Thomas and P. Scurren made a motor trip south as far as Brewster last week end. All four are now congratulating themselves that they live in this part of the Okanagan Valley. In natural scenery, beauty of surroundings, with our native trees and shrubbery and wild flowers and even in the condition of our orchards, this part of the Okanagan is much to be preferred to that farther south is the emphatic statement of all.

PUTTING LARGE ACREAGE UNDER TOMATOES

Approximately 1,000 acres are being planted in tomatoes in the Kelowna district this season, Earlina only being grown. The new cannery of the Okanagan Packers, Ltd., will handle approximately 250 acres; the Occidental cannery, 280 acres; the Dominion cannery, about 325 acres, and the Brodour cannery about 80 acres. The Rowell's cannery will also handle a large acreage and numerous individual growers who are not members of the B. C. Tomato Growers' Association will grow tomatoes for shipment as semi-ripes.

WOOD TICKS KILL NICOLA CHILDREN

Two Tragedies Within Few Days Reported From Merritt

Killing of two children by wood ticks is reported by the Merritt Herald. In the first case a little girl died through the entrance of a wood tick into her flesh at the nape of the neck. A few days later a lad of four died from the same cause. In this case the tick had entered the child's body underneath the right arm. Both children were living in the Nicola Valley.

"Money Is Not Spent In Advertising; It Is Invested" — H. J. Buckley

The Summerland Review

Established August, 1908.

Published at Summerland, B.C., every Thursday by THE REVIEW PUBLISHING COMPANY, LIMITED
Ralph E. White, Editor and Manager

An independent family newspaper covering Peachland, Summerland and Naramata and adjacent districts.

Member of Canadian Weekly Newspapers Association.
Member of British Columbia Selected Weeklies.

Subscription Rates—In British Empire, in advance, \$2.50 per year; six months, \$1.40. To U.S.A. and other countries, \$3.00 per year.

Advertising Rate Cards and information respecting territory and samples of paper mailed upon request, or may be seen at the office of any advertising agency recognized by the Canadian Press Association.

Advertisers must have copy in by Tuesday noon in order to insure changes for standing advertisements. New display advertising copy can be accepted one day later.

All instructions for cancellation or alteration of advertising must be in writing.

Correspondence—Letters addressed to the Editor and intended for publication must be short and legibly written on one side of the paper only. The longer an article, the shorter its chance of insertion. All communications must bear the name of the writer, not necessarily for publication. The publication or rejection of articles is a matter entirely in the discretion of the Editor. No responsibility is assumed by the paper for the opinions expressed by correspondents.

Typographical Errors—In the event of a typographical error, advertising goods at less than the proper price, the newspaper will furnish letters to be posted in the store stating the correct price, but goods may not be sold at the price printed and the difference charged to the newspaper.

Thursday, May 21, 1925

WINDMILLS IN MERRY ENGLAND

And now the windmill is coming back. England takes the lead in preparing to harness the windmill for creating current and electric power to light houses and villages, run farms and do many "odd jobs" that will make the English countryside all the merrier.

Past generations have seen the "coming back" of many useful inventions and arts. For many years the old gramophone was relegated to the background, until finally it emerged from the old cylindrical record of "Uncle Josh" to re-create the finest of operatic singers and the world's best music. The bicycle went out of style, but now it has been improved, strengthened and modernized, and bicycling still retains its popularity despite the craze for flivvers and soft-cushioned limousines. The old game of "horse-shoes," once thought to be tame and undignified, now occupies the time and attention of many a wealthy winter-resort habitue.

In our mania for speed and power we are apt to forget the simpler methods, not utilize the smaller economies. It is well that England recognized the utility of the humble windmill and will harness it up to turn out cheaper living, less tiresome work and brighter evenings for her people. Other countries may well follow.

Some liquor they make these days is fierce, but it never attacks those who let it alone.—Ex.

RELIGION STILL ALIVE

Finding no means of transportation at hand, seven boys recently walked seven miles to take a Bible study examination at a Y. M. C. A. These boys were of high school and grammar school age. Although a little tired, they did themselves credit in the handling of the questions at the examination.

This is not remarkable except that it shows these youths have a zeal and devotion to things reverential. It is common for groups or gangs of boys to use "shanks horses" for a hike to the woods, to the "ole swimmin' hole" or a basket ball game. But to walk seven miles to participate in a test of their knowledge of the Bible is at least worth creditable mention.

"In the spring a young man's fancy lightly turns to thoughts of love," the old quotation reads. The girl is wise, however, who remembers that the lightly turned thoughts of love do not always provide enough to eat and wear or a decent place in which to live.—Ex.

OFFER IT FOR SALE

The idea that any concern can afford not to advertise is essentially wrong, says a contemporary, and has been disproved by experience. There is not a business in this country, except that of the governor of a prison, that could not be doubled in volume by skillful advertising. Even cemeteries have been known to advertise and prosper by it. The trend of the modern age in commercial affairs might be summed up in the dictum: "If your business is not worth advertising, advertise it for sale."

THE PATH OF SUCCESS.

A church prints on the back of its program of services these words:

- "I will not worry.
- "I will not be afraid.
- "I will not give way to anger.
- "I will not yield to envy, jealousy or hatred.
- "I will be kind to every man, woman and child with whom I come in contact.
- "I will be cheerful and hopeful.
- "I will trust in God and bravely face the future."

Read them again, they are worth while. Cut them out and paste or pin them where you will see them often. About all there is in life worth striving for is suggested in these few lines.

Houses, lands, bonds, automobiles are fine possessions. But far more precious still to anyone, in any station, are the measures of the mind and soul—composure, courage, cheerfulness, tolerance, kindness, hope—all these and faith in something higher than that which the eyes see and the hands hold.

Timely Hints For the Orchardist

Specially prepared for The Review by J. Taft, District Field Inspector.

PEAR BLIGHT

Apple and Pear trees should be gone over at regular intervals of a week or ten days throughout the growing season, and all infected twigs and branches cut out and disinfected. In cutting off twigs and branches the cut should be made to a lateral a foot or more below the external evidences of the disease, and the wound disinfected.

The severed branch should not be allowed to fall through the tree as this will wound healthy branches and inoculate them with blight bacteria.

All twigs and branches cut down should be gathered and burnt at once.

The disinfectant which has been found most successful for the wounds and for the pruning tools is made up as follows:—

Dissolve 1 part Cyanide of Mercury and 1 part Bichloride of Mercury in one pint of water. Carry in a glass jar—never in metal containers.

Note—This mixture is a deadly poison if taken inwardly, keep out of harms way.

The Review is publishing this week a short article on Gopher control. Read it.

Pat O'Hooley Tells of Larry's Advertisement

By I. H. HOLDEN

"Sure, an' I often think of th' joke th' lads played on Jimmy O'Connell, back in th' homesteadin' days," said Pat O'Hooley to a number of admirers gathered round him in the section house. "Jimmy was a foine boy; but he was more afraid of a woman than he was of a ragin' tiger. If there had been as many petticoats thin as there are now, Jimmy would have run his legs off tryin' t' kape out of sight of thim. Knowin' this, an' that Jimmy was th' bist housekaper in th' district, barrin' none, Larry Malone an' some of th' lads got together wan' avenin' an' put up a job on him.

"So th' nixt mornin' that goes t' th' city has an ad, fer th' paper, askin' fer a young housekaper to wurrek in th' country, wid good wages, decent home, an' everythin' purty an' nice. "Enquire fer Jimmy O'Connell, Badger Mound," ut sez; an' th' bunch of skammers, in high glee, spread th' news all over th' district, knowin' that Jimmy, not takin' th' paper, would niver be th' wiser until ut was too late.

"So wan' mornin', whin Jimmy comes t' town fer some groceries, th' station agent calls him, over, an' pointin' t' th' waitin' room, sez: "There's some parties t' see ye in there, sez he, 'an' if I'm not greatly mistaken, me bye, there's breakers ahead fer ye; 'tis a sly duck ye are!"

"So Jimmy, rememberin' that he has a binder note due an' unpaid, stumbles int' th' waitin' room wid fear an' tremblin'. But there was no fierce collector waitin' t' spring at him; on th' contrary, there's a cute little cuss wid curly brown hair, contentedly munchin' a cookie; an' all alone by himself. "Well, well!" sez Jimmy, stoopin' down an' gatherin' th' little lad up in his arms, fer Jimmy loved children; an' nither a wan but would make friends wid him on sight. "Will ye give me a bite of yer cookie?" sez he, huggin' th' little fellee ut toight.

"Yeth, thir," said th' laddie, promptly offerin' his fist; an' that was about all that was left. "What a great big man ye are!" sez Jimmy, makin' a bluff of takin' a mouthful of cookie. "Where's yer papa?" "I dist dot a mama," sez th' laddie. "Oh, I see," sez Jimmy. "Well, ye're a foine boy anyhow. Fwhat can ye do besides atoin' cookies?" "I ride horse!" sez th' little chap proudly. "An' I want a great big dog. Mama sez Billy have a big dog some day."

"Sure ye will!" sez Jimmy. "By gorrie, I know ye will, fer here's me own pup roight at me heels, an' ye're goin' t' have a roide on his back." So, nixtin' th' action t' th' word, Jimmy perches Billy on old Towser's back, an' around th' room they go in high glee until everythin' was forgotten in th' fun of ut. So intint was they in thair frolic that nither heard th' dure open an' somewan come in. Whin Jimmy did look up, he sees a swate-faced lady standin' before him, smilin' friendly loike, an' 'twas aisy t' see by th' look of love in her eyes that she was Billy's mother.

"Oh, mama!" shrills Billy, 'ain't I dot a nice horse!"

Thin Jimmy was most ready t' sink through th' fure wid shame whin he sees th' nice lady lookin' straight at him.

"Excuse me, ma'm," sez he, touchin' his cap, an' settin' Billy down as if he was an egg. "I beg your pardon, fer I was—"

"'Tis no offence at all, I'm sure," sez she, graciously. "I'm really plazed t' see ye, an' Billy enjoyin' yerseives, fer if I'm not mistaken, ye are th' very gentleman I came out from th' city t' see—leastwise, th' agint sez yer name is Jimmy O'Connell, an' 'tis him I'm lookin' fer."

"That's me name, ma'm," sez Jimmy, blushing furiously; 'but I'm at a loss t' know fwhat ye want wid me."

"Well," sez she, "I would loike th' job of kapein' house fer ye. I'm a widdle, wid only wan choild, an' I'm sure I could plaze ye accordin' t' th' advertisemint."

"Fwhat advertisemint do ye be after manein'?" sez Jimmy, scratchin' his head an' in a great puzzle.

"Did ye not put this notice in th' paper?" asked th' widdle, handin' over a cuttin' from th' daily. So Jimmy read ut with his heart thumpin', not knowin' fwhat ut all mint; an' he was figurin' on makin' a dash fer safety whin he sees thre of th' lads peekin' in at th' windle, an' he guesses jist fwhat they bin tryin' t' do t' him. Now Jimmy was bashful, but he was a born foighter; an' he raises t' th' emergency in great style.

"Oh!" sez he, "do ye know I purty near forgot all about that? Shure! an' I'm greatly in made of a housekaper; an' I'm roight glad that ye came. 'Twill be no toime until I'll be here wid me wagon, an' if ye care t' go home wid me, 'tis a job ye may have. Would ye loike t' go out in th' country, Billy, behind a foine team of horses?" sez Jimmy.

"May I dwive?" sez Billy.

"Ye bot!" sez Jimmy, gettin' bolder, fer he could see that th' widdle was plazed. "Won't we have a foine toime, me liddle?" Jimmy an' th' widdle is sittin' in th' wagon, wid Billy betwene 'em, an' drivin' as big as ye please fer home. An' whin Larry Malone an' his bunch of sports sees this, they're at a loss fwhat t' make of th' procedin's, an' they drink half a dozen bottles of hooch discussin' th' circumstances of Jimmy havin' th' nerve t' spake t' a woman.

"There's a decait in ut some-where!" sez Larry. "Jimmy is runnin' a bluff, an' th' widdle wan he dumps her befo're he gits home! 'Tis contrary t' all reason!"

"Well, two weeks go by, an' nowan sees thair Jimmy or th' widdle; so th' lads make up a party an' goes out t' th' homestead, investigatin'. They are met at th' gate by Jimmy, as friendly as ye please, an' they're all invited t' dinner. 'Twas th' foinest spread they had had for many a day. Th' widdle waits on th' table in her nate print dress an' embroidered

apron; an' there was not wan of thim but wishes he has such a purty housekaper t' brighten his home. Whin th' male is over, Larry takes Jimmy t' wan soide an' sez:

"Will ye iver fergive us, Jimmy? Jist fer th' devil of ut, we put up a job on ye an' advertised fer a housekaper, knowin' as we did that ye was sa bashful an' unaisy in th' prsence of ladies. So, t' make it all roight, I'm standin' ready t' take her off yer hands as I'm raly nadein' a cook, which ye are not, bein' a wizard in fixin' up yer own stuff to ate."

"I thank ye very much fer yer kind intintions," sez Jimmy, wid a sly smile. "Ut's true that I'm not nadein' a servant, an' I'd be glad t' accept yer offer, if ut wasn't fer wan thing."

"Fwhat's that?" sez Larry.

"Jist this," sez Jimmy. "Th' widdle an' meself, bein' so delighted wid each other's company, took a trip t' th' village on Choosday, an' were quietly married. As she still appears content wid her bargain, I'd advise ye, seeing ye are lookin' fer a cook, t' put an' advertisemint fer wan in th' papers—ye seem t' be purty good at writin' 'em."

British Columbia is the third manufacturing province of Canada, and the total number of industries located in the province now number 2,470. The number of employees engaged in manufacturing industries total 28,700. Capital invested in manufactures totals \$210,798,000, while the value of output in 1924 amounted to \$163,212,000.

First Aid Inefficiency

It was at the scene of an automobile accident; An elderly old lady in one of the first cars to be stopped by the debris of the smash-up, leaned from her car as a very much battered man, with a hastily arranged bandage around his ankle, hobbled by.

"Oh my," she said, "Did you hurt your ankle?"

"No lady," replied the man, "I lost both eyes. This bandage slipped down."

British Columbia will continue this year to advertise its resources of mines, fisheries, lands at Wembley, according to an announcement made by Premier Oliver. This year's exhibit will cost \$18,000 or \$19,000 it is estimated.

The supply of farm hands for Western farms is not equal to the demand and the shortage is becoming more

pronounced as the season progresses, in spite of the large number of immigrants coming from Europe for this purpose.

A Cynic Speaks

Griggins: "Poor ol' Bill. He's got weak eyes."

Truthful Tom: "Well, what can you expect? They are located in a weak place."

History as it Happens!

One hundred years from now the history of Summerland and community will be written in less than one hundredth of the words now necessary to tell you of the happenings and developments each week. But who wants to wait a hundred years to learn what is going on?

When you are a subscriber to The Summerland Review you have placed before you every week all the news of the day. Included with this news are the advertisements of your home-town merchants offering you new and seasonable merchandise. Reading the ads only each week is an education in itself.

SYNOPSIS OF LAND ACT AMENDMENTS

Vacant, unreserved, surveyed Crown lands may be pre-empted by British subjects over 18 years of age...

Full information concerning regulations regarding pre-emptions is given in Bulletin No. 1, Land Series...

Records will be granted covering only land suitable for agricultural purposes...

Applications for pre-emptions are to be addressed to the Land Commissioner of the Land Recording Division...

Pre-emptions must be decapitated for five years and improvements made to value of \$10 per acre...

For more detailed information see the Bulletin "How to Pre-empt Land"

PURCHASE

Applications are received for purchase of vacant and unreserved Crown lands, not being timberland...

Mill, factory, or industrial sites on timber land, not exceeding 40 acres...

HOMESITE LEASES. Unsurveyed areas, not exceeding 20 acres, may be leased as homesites...

GRAZING. Under the Grazing Act the Province is divided into grazing districts...

For South, North and East—Daily, 5 p.m.
For Summerland Office—Daily, except Monday, 11 a.m.; and daily, 5 p.m.

Splendid Growing Weather Bringing Crops Along in Satisfactory Manner

Extent of Winter Injury In North And Elsewhere Becoming More Clearly Defined—Tent Caterpillars Serious Plague In Vernon District—Grasshoppers Worse There. Than For Many Years—Vegetable Acreage More Extensive In Many Sections.

Several changes in prospective crop conditions in several districts and further and more accurate information on winter injury are given in the second news letter issued from the office of the district horticulturist.

The bulletin reads:

OKANAGAN DISTRICT

Vernon, May 15th.
Growing conditions over the past week have been ideal. Orchard trees are now making good growth, and where they have not suffered from severe winter injury look very promising.

The extent of the winter injury in the Vernon district is now becoming more clearly defined and there is undoubtedly considerable injury throughout the district, many of the younger trees having suffered severely from root injury, while the older orchards show the injurious effects more in the portions of the tree above the ground. The blossom period is proving very short. The setting of the fruit seems to be going on normally but as regards their ability to hold on, little can be said at this time.

All ground crops are growing well and look in excellent shape, soil moisture conditions for such crops being excellent.

Tent caterpillars throughout the whole district are this year a plague, and are causing much concern to all growers to combat them.

From present indications it would appear that this district will have one of the most severe plagues of grasshoppers it has experienced for many years, and every orchardist and rancher throughout the entire district should work to the best of their ability to co-operate with the officials of the Department of Agriculture in combating this pest in a concerted effort to save the vegetable crops, which on account of increased acreage will be of considerable value this season.

Irrigation is now being practised by those who at this time are able to get the water. This should put soil moisture conditions in excellent shape.

Kelowna, May 13th.

The apple blossom is nearly all off. The weather has been all that could be desired and the prospects at present would indicate a slight increase over apples of last year. Some of the districts have only medium crops, and some individual orchards are practically off entirely. On the other hand, other districts and orchards have larger crops that will offset those less fortunate.

Orchards as a rule are freer from insect pests than last year. Where trees were sprayed with Oil and Lime Sulphur, the results in Leaf Roller and Blister Mite control were excellent.

Grasshoppers are in evidence, but to date, no outbreak as serious as last year have been reported in this section.

Codling Moth spraying is well advanced.

According to blossoming dates on apples, this season is just about the same as last regarding earliness.

Summerland, May 13th.

Weather conditions have now warmed up. It was very cool during the cherry blossom period. Owing to weakened spurs and poor pollination there is every indication that a heavy drop will take place. There are no reports of any late frost injury this season.

There is a heavy bloom on all varieties of apples, promising a good crop this year.

As the season advances the damage sustained by the trees by the late winter froeze is becoming more apparent. Ponchos and apricots have been the hardest hit, and next to those the winter varieties of apples.

Early vegetable acreage will be considerably increased in the district

this year, but acreage figures are not yet available. Hot house cucumbers are now being shipped.

Keremeos, May 13th.

The Tomato acreage at Keremeos shows considerable increase over last year. The estimated acreage for 1925 will approximate 350 acres. The plantings consist of Chalk's Jewel and John Baer. Planting is being pushed as rapidly as possible under very favourable weather conditions.

Oliver, May 13th.

The acreage of cannerly tomatoes will run to about 125 acres, chiefly the John Baer, and a small acreage of Earliana, to be shipped as semi-rips. The Oliver district is going in quite strongly for Cantaloupes again this year, and it is expected that about 140 acres of the Hoodoo variety will be planted.

Penticton, May 13th.

In the Penticton district, the orchards appear to be in first class condition with no Winter Injury to speak of on the bearing trees. There is however, considerable showing up on trees up to four and five years of age.

Alfalfa and vetch cover crops are looking well and it is thought that with the benefits of these crops in protecting trees during the winter period, that a considerable increase in permanent cover crops may be looked for during the coming season.

KOOTENAY AND BOUNDARY

Kootenay and Arrow Lakes, May 12th

The weather has been warm since the first of May, but turned cooler on the 12th with light warm rain which will do a lot of good to all growing field and garden crops as well as the small fruits.

Apples are just in full bloom in most sections of the district. However, at Nelson, Boswell, Lower Arrow Lakes and Willow Point full bloom is just past on the early blossom varieties. Most varieties will be ready for the second Scab spray (Calyx) around the 20th to 25th.

From the amount of bloom showing, the apple crop should show an increase over that of last year. As stated in our last report, Pears are an off crop in all sections of this district.

The Sweet Cherry crop is showing up somewhat better at this time and the frost damage at blossom time does not seem so severe as at first reported. Most of the damage was on the low branches while from ten feet from the ground up to the top, the fruit in most cases was not damaged by the frost. A heavy bloom is reported on the Cherries in the Kaslo district with little or no damage from frost.

The Strawberry plants are looking very good in the Harrop-Proctor sections. The growth is very good for this time of year and very little winter injury. A few blossoms are just showing up.

Raspberries in these sections are very badly damaged by winter injury. The Cuthberts showing more damage than the Herberts. The crop will be light, and is estimated at about 50 per cent of last years production.

Creston, May 11th.

Pear trees are slowly recovering from the effects of the sudden froeze last winter. At present the trees are throwing out young shoots along the main limbs and branches and the camb shows a thin growth of whitish new cells.

Northern Spies during the past week are leafing out slowly, but have not improved as yet much below on the trunk.

There is a slight scattering of bloom on some of the winter varieties, especially the Jonathan, Vanderpool Rod, Newton Pippins and odd blossoms can be found on individual trees of every variety throughout the district. The petals are beginning to fall off the early varieties, and the weather is ideal for a good set.

Growers are planting out Cabbages and in a few instances, in favour-

able situations, Tomatoes. Rhubarb and Asparagus are moving freely, although the latter is not grown extensively in this district.

Clover and Alfalfa have come along rapidly the last week and give promise of a good crop.

Grand Forks, May 11th.

Mention was made last of the probable amount of winter injury in the orchards of this district, and more particularly to McIntosh trees.

Developments now show that this variety, in which no apparent injury above ground was visible, in many instances seriously injured at the roots. These trees blossomed freely in an apparently normal condition, but at the height of bloom began to wither and die. Investigation revealed that the roots were either partially or wholly killed.

The damage is particularly noticeable on trees on open porous soils of a gravelly nature. Such soils being extremely deficient in, or entirely lacking humus, were easily penetrated by the frost, which extended as far as three feet or more below the surface.

A notable example of the protective value of the cover crop is seen in those orchards in which there was vetch or other cover crop. The injury to trees under such conditions being quite negligible.

Cut Worms are active on Strawberries and other hoed crops, and prompt action with arsenical poisons in the form of mash, or spraying with Paris Green or Arsenate of Lead will have to be adopted to check their ravages.

"DEAR BRUTUS" HERE ON TUESDAY NEXT

Reappearance of Mr. and Mrs. A. L. Soames Will Be Welcomed By Local Playgoers

It is some time since the people of Summerland have had the privilege of seeing Mr. and Mrs. A. L. Soames on the stage, and their reappearance on Tuesday next at the Empire Hall supported by a strong amateur cast, in one of Sir James Barrie's best plays, is being eagerly anticipated by those who have had the good fortune to have seen some of their work in the past.

For the benefit of those who have not been so fortunate it may be explained that both Mr. and Mrs. Soames are artists of a very high order of talent, having appeared from time to time at a large number of the best theatres in London and throughout the Empire. During their professional careers, they were associated with many of the great actors and actresses who have made a name for themselves on the English stage, and many a London "frat-nighter" would be familiar with their stage names, should he hear them.

Those who have already seen a play produced under Mr. Soames' direction will know that the utmost care will be taken to make every detail in the art of production as perfect as possible. Special scenery is being painted by Mr. E. H. Emmons for the occasion, and sedulous attention will be given to the lighting effects. The ladies' dresses, designed by Phyllis Darton, of Kelowna, will be another unique feature.

The play that has been chosen, like most of Sir James Barrie's, is not an easy one and has required a great deal of hard work and perseverance on the part of the cast, but they have stuck to it loyally and there is no doubt but that the result will be well worth all their trouble.

Barrie has evidently taken his title, "Dear Brutus," from a quotation out of Shakespeare's "Julius Caesar," but he might equally as well have called it "A Second Chance," since the fantastic idea running through the play is that if certain "quite modern" people were allowed, by the grace of Loh (a reincarnation of Puck), a second chance, what difference would it make to them. As the play proceeds, that shy humourist, the author, deals many a shrewd hit that cannot fail to strike home to some of the audience; but through it all the real Barrie, that we all love, keeps bobbing up, with his love of

OLD STAGE COACH WINS ATTENTION

Cariboo Coach Effective In Giving Publicity To Tourist Route

Third prize was won at the annual apple blossom festival at Wenatchee, by the old Cariboo stage coach which passed through here recently and is being used by the Okanagan-Cariboo Trail Association to advertise this part of British Columbia to motor tourists. Two of these coaches were purchased by the Association; one to be used in Washington state and the other in British Columbia. The vehicle sent across the line was taken as far as Okanogan by truck. After a few minor repairs were made to it, it was then hauled by a four horse team to Wenatchee where it attracted much attention. The coach carried advertising of the Okanagan-Cariboo Trail Association and the Okanogan rodeo.

While it was parading the streets five boy scouts, under the direction of D. J. Wood, manager-secretary of the Trail Association, distributed nearly a thousand road maps and sixteen hundred pamphlets especially prepared for the occasion.

The Trail Association will endeavor to turn as many tourists as possible from the Sunset highway up the Okanogan during the present season.

Plans are already being made for next year when the Fraser Canyon road will be open affording an opportunity to direct motorists from the Coast centres into the interior of this province. Before another season opens the Association hopes that Vancouver and towns along the route to the interior will co-operate with the Association in exploiting this wonderful scenic tourist route. Mr. Wood has been spending some time at the Coast recently laying the proposition before the people there.

ANOTHER OKANAGAN IN THE FAR NORTH?

One of the objects of the aerial prospecting expedition headed by Archibald Little, Detroit mining engineer, which set out from Prince Rupert early this week in a flying boat, will be to find and explore the tropical valley rich in minerals and verdant growth which is reputed to lie somewhere between the headwaters of the Dease and Peace Rivers.

The story of this valley was first brought to the outside world a few years ago by Frank Perry, of Vancouver, a prospector who went in north of Prince George. He came out with an account of a valley which was looked upon with a good deal of scepticism. Perry is now at Telegraph Creek awaiting the arrival of the airplane. He will endeavor to guide the machine and the party of mining operators to his valley.

THE FOOL AND HIS BOTTLE

Every now and then one sees in driving the highways, empty beer bottles standing in the roadway or thrown carelessly onto the road, a menace to tires and a danger to driving. At Cloverdale the other day a fine of \$25 was imposed on a man for having thrown a bottle on the highway.

More fines of this nature might do a little toward checking this practice of smart young simps who seem to take a bushel of fun out of leaving their empties in the highway.—Enderby Commoner.

children, his pathos, and his quaint humour. It is one of those plays that, having once seen, one wants to see again for fear some little delicious detail, some quaint saying has escaped one, and it leaves one with the feeling that there must really be a Puck in the world after all; perhaps, who knows, his real up-to-date name is—Sir James Barrie!

Cynic:—"Women make me tired, their eyes and hair."
Look at the hat styles they are now wearing. Hat pulled clear down over their eyes and hair."
Optimist:—"Be wise, kid! Be wise. Their lips aren't hid."

DOES A BETTER FRUIT WRAPPER PAY FOR ITS ADDITIONAL COST?

"CARO" Fibre was made as it is, as to appearance and character, at the request of the HIGH CLASS FRUIT RETAILERS and then chemically treated and identified by VIOLET Lines.

Think of this—
Over 10,000 carloads of fruit in Caro Fibre Wrappers in 1924. This "CARO" Fibre Wrapped Fruit was bought at an advanced price and sold by the HIGH CLASS FRUIT RETAILERS—Not the push carts or peddlers.

And this—
These High Class Retailers recognize Orchardists using the "CARO" Fibre VIOLET Lined Wrapper as the BLUE BOOK of each district.

A Good Way to Get the New Novels WITH COMPARATIVELY LITTLE OUTLAY

You would like to be able to read the new novels—early—before they come out in book form—just as the publishers do? Why, of course! Well, you can do just about that.

Nowadays eight of ten of the new novels run serially in the popular magazines before being published in book form. 'Cosmopolitan' carries six or seven a year by best-selling authors, 'Good Housekeeping' and others, three or four each.

Do you see? That means that for a subscription to 'Good Housekeeping' you get at least three novels, besides all the other stories, articles and helpful information.

We place subscriptions to 'Good Housekeeping,' 'Cosmopolitan,' 'most any magazine. We save you time, postage, worry. Isn't that worth asking us about?

Local Happenings

H. C. Mellor, lay representative of the local Methodist Church at the conference returned home Wednesday morning.

A special offering will be taken in the Union Church next Sunday morning for the benefit of the miners in Nova Scotia.

Come to dance Friday, 22nd, G. W. V. A. Hall for Boy Scouts Camp fund. L41-42

Mr. Joe Gayton arrived home Monday night from Brandon where he has been attending the Brandon College. Warren Gayton will remain on the prairies for the summer, where he is employed.

Mrs. W. C. Kelley went out on Monday morning to Brandon. She has gone as a delegate to the board meeting of the Baptist Church and convocation of Brandon College. She will be away about two weeks.

Mrs. Dow of Creston is visiting her daughter, Mrs. S. A. MacDonald. She stopped off here on her way home from the Coast where she has been attending the Presbyterian synod and afterward visiting her son at Nanaimo.

The engagement of Miss Jennie Nicholson, daughter of Mr. and Mrs. V. J. Nicholson of Summerland to Mr. Bedford Tingley, also of Summerland, is announced. The wedding will take place on Tuesday, May 26.

Come to dance Friday, 22nd, G. W. V. A. Hall for Boy Scouts Camp fund. L41-42

Mrs. Fraser plans to leave next Tuesday for the Coast, where she will meet her son from Toronto. From there she will go back to the Prairies with her son to visit her daughters and other relatives. She plans to be away about two months.

Chautauqua opens at Penticton on Monday next with an excellent six-day programme. Season tickets are available at the usual reduced rates and should be used if one can attend more than two of the events. A perusal of the programme published in this paper will convince one that Chautauqua is well worth attending.

SUMMERLAND WEATHER REPORT

Below is a report furnished by the Dominion Experimental Station here for the week ending Tuesday:

Table with columns: Date, Max, Min, Rain, Snow, Sun. Rows for May 13-19.

Mrs. J. C. Melvin went down to Vancouver by the noon train Wednesday.

Harold Holt of Vancouver is spending a few days here with his aunt, Mrs. P. G. Koop.

Mrs. James Thompson came in from Myren on Sunday to visit her son D. C. Thompson for a few days.

Mr. J. A. Darke came over from Trail last Saturday to spend the week end at his home here and returned on Monday.

Kelowna-Penticton boat service: Leaves Summerland for Penticton 11 a.m. and for Kelowna 2 p.m. daily, Sunday included. 341f

Mrs. O. Atkins is visiting Mrs. Riley at Calgary. She left by boat Friday morning and will be away about two weeks.

Mr. and Mrs. T. Carvick and Miss Wheeler returned Wednesday from the lower Similkameen where they had been camping out for a week.

Just over three hundred citizens of Summerland have been vaccinated since the recent order was issued. Two hundred and forty-one of these were school children and teachers.

Mrs. Lockwood, mother of V. M. Lockwood, arrived here Tuesday morning to spend the summer months with her son. Mrs. Lockwood's home is in Bellingham, Washington.

W. H. Robertson, provincial horticulturist and M. S. Middleton, district horticulturist, were visitors to Summerland yesterday. They were on their way north on a tour of inspection of the Valley.

Rev. H. J. Armitage is expected home tomorrow morning from Victoria where he has been attending the annual Methodist conference. It is evident from the report of the stationing committee that Mr. Armitage has yielded to the pressing invitation of the Roseland church to become its pastor. An invitation was extended to him by the same church a year ago and this year Ross and has strongly pressed its request.

Invitations are out for a double wedding which will take place at the St. Stephen's Church on Monday, June 1. The principals are Helena Hoy Waterman, daughter of Mrs. M. G. Wilson, who will become the bride of Mr. Arthur Smith of Kelowna, youngest son of Mr. and Mrs. James Smith of Penticton; and Ruth Gair Waterman who will wed Mr. John Campbell Craig of Summerland, son of Mr. and Mrs. David Craig of Arnprior, Ontario. Both Mr. Smith and Mr. Craig served overseas during the war. Miss Ruth Waterman is a graduate of the Vancouver General Hospital.

Mrs. W. H. Hayes has been visiting her daughter, Mrs. C. W. Lees, at Kelowna for several days.

Miss Sinclair returned home from Vancouver last Saturday. Mrs. McIntosh of New Westminster came with her to spend a short time here.

Collapsing suddenly on the street in North Vancouver on Monday, Geo. F. Nicholson passed away a few minutes later. Mrs. Nicholson is a sister of the Misses Spencer here and was a recent visitor to Summerland. Mr. Nicholson was the father of the first wife of K. W. Kinnard of the Associated Growers.

EXCELLENCE OF PLAY SHOULD FILL HOUSE

"Dear Brutus" Was Signal Success In First Performance.

"Eclipsed any previous amateur production on the local stage." This is one of several highly laudatory phrases used by the Kelowna Courier in its report of the production of the comedy: "Dear Brutus" Tuesday evening in Kelowna; and again "A delightful play, cleverly and sympathetically rendered."

"The unusual theme of the comedy, with its quaint mixture of mysticism and modernism, requires acting of a high order, and Mr. Soames essayed a task of no little difficulty when he undertook its production with the aid of an amateur cast. His skill in stage coaching and management, acquired through year of personal experience in the profession, has wrought a finely attuned and perfected piece of mechanism out of the material he selected" says The Courier.

"The play is a charming one. It abounds in the characteristic Barrie touches of quaint humor, which serve to prevent the underlying note of pathos which runs throughout becoming too poignant."

Apparently Mr. E. H. Emmons has achieved another success in his scenic painting. His woodland scenery in the second act is described as a dream of beauty, and praise is also given the beautiful gowns worn by the ladies.

Referring to the prospective performances here and at Vernon, the Courier says: "If lovers of plays of quality in these towns can learn in time as to the merits of the production, there should be no doubt as to the size of the audiences."

"Dear Brutus" comes to Empire Hall Tuesday evening next.

TWO-VIEWS ON A LIVE SUBJECT

Mr. Dead One says: Well, it's no use trying to do much business these days. People are bound to take their cars and drive out of town to do their buying.

Mr. Live Wire says: We can get trade from long distances nowadays because most people drive cars. All we have to do is advertise our businesses and our town.

Wedding

STUART-THOMPSON

A very pretty wedding was solemnized at 11.30 Wednesday morning in the St. Stephen's Church when Nora Olivia, second daughter of Mr. and Mrs. J. B. Thompson, became the bride of Mr. Frank Whitehead Stuart, younger son of Mrs. F. G. Anderson of Penticton. Miss Francis Nicholson was bridesmaid and Mr. William Nicholson was best man. The ceremony was performed by the Rev. H. A. Solly. The bride looked charming in her gown of duchess satin and carried a lovely bouquet of carnations. The church was beautifully decorated with white flowers.

After the ceremony a wedding lunch was given at the home of the bride's mother, when only the bridesmaid, best man and the immediate relatives of the bride and groom were present.

The bride was the recipient of many beautiful wedding presents.

Mr. and Mrs. Stuart left by motor for a honeymoon of about a week or ten days. After their return they will live for some time with the bride's mother.

CODLIN MOTH IN KAMLOOPS ORCHARDS

Kamloops is asking the provincial department of agriculture to declare that district a codlin moth area under the act. Already the spraying of apple and pear trees is under way by officials of the horticultural branch. All blossoms will be plucked or trees dehorned. The step has been taken to a large extent to protect the valuable and extensive orchards in North Kamloops, which the pest has not yet affected.

As it happens, this would have proved practically a "no fruit year." There promised to be no pears and only the early varieties of apples.

TAKE MOVING PICTURES AROUND HOPE DISTRICT

Moving pictures for Rex Beach's story of the Yukon, "The Winds of Chance" were filmed at Hope by the First National Film Company, where a number of well-known stars are in action. The company were run from Chilliwack on a C.N.R. special, Chilliwack also supplying some 200 extras.

MOTH BALLS FOR GOPHERS

According to information received from Oklahama, W. W. Dawkins, a farmer and large producer of sweet potatoes, has found another use for the much despised moth ball and has been saved from ruin. Gophers were tunneling under the sweet potato beds of Dawkins and he had almost given up all hopes of raising crops. A friend told him to roll moth balls down into the holes where the gophers were making their homes and that he would soon be rid of them.

Dawkins thought his friend was "kidding" him, but as he had tried everything else suggested, he saw no harm in giving the moth balls a whirl. He tried the experiment and reports that it worked fine. The gophers now give his farm a wide berth and he expects to raise a bumper crop of sweet tubers next year. —Better Fruit.

THE REVIEW Summerland, B. C.

The first of all film-fam merchant's jokes, is to wink at the crowd, and call it "folks." Of course we remember an earlier day, when "folks" was the proper word to say—when human kinship was everywhere, and most of our dealings was on the square—Away back yander where memory dims, when "folks" and friendship was synonyms; When hearts was as staunch as the towerin' oaks, O, them was the days when folks was folks.

But, here of late, it occurs to me, that "folks" ain't the term that it used to be—I can't figure out but one result—it's vulgar and coarse when it ain't insult! The shell-game fair and 8-card sport—and the tin-horn gambler are all of a sort,—You can look in their eye, and detect the hex, as they mount their goods-box an' call ye—"folks." The snide promoter is fair to see, but he can't put nothin' across on me—He may yapper an' spout till the day he croaks—but the stuff's all off, when he calls me "folks."

NARAMATA NEWS

Current Events of Town and District

The regular meeting of the Women's Auxiliary was held on Friday at the home of Mrs. J. M. Robinson. Mrs. Languedoc presiding. Mrs. H. A. Solly attended the meeting and spoke on various phases of church work. Mrs. Languedoc and Mrs. Raitt were appointed as delegates to the Diocesan convention to be held at Armstrong in June. Mrs. Williams read a paper on the passing of the late Miss Wray of Lindsay, Ont. Miss Gordon served refreshments.

A Wild West dance was held in the Hall on Friday evening, music being provided by the Naramata orchestra. There were a number of visitors from Poplar Grove during the evening.

Mother's Day was observed in the church on Sunday afternoon by the Sunday School teachers and scholars. Mr. Bartlett presiding, and giving an address on Duty to Parents. There was a large attendance, and a very interesting service was much appreciated. The lady teachers, who were the conveners of the gathering, had evidently taken considerable pains with the programme, which was as follows: Call to worship. Responsive reading. Hymn. Prayer in concert. Children's song, "Pannies." Recitation, "Somebody's Mother" Frank Robinson. Solo, "Dora Cross." Recitation, Miss C. Hancock. Quartette, "The old freside," Alice Myers, Vera Partridge, Frank Hughes, Leslie Smith. Recitation, "A little bird tells," Margaret Cargill. Address, Pageant, Mrs. A. C. Patterson, Mrs. J. M. Myers, Jean Robinson, Edna Baker, James Gawne, Gordon Patterson. Hymn and Benediction. Miss Alice Myers presided at the organ.

Mr. Raitt left for Arizona after a short stay with Mrs. Raitt and daughter.

Mrs. Aldridge has been spending a few days with Mr. and Mrs. Geo. Cooke previous to her leaving for England early in June.

Mr. Donald McKay went up to Sicamous on Tuesday to meet his mother and sister who are returning from the old country.

Much inconvenience is felt owing to the neglect to repair the cable between this place and Summerland, and it is considered that if this is contemplated, it should be done without delay.

Mr. Partridge has purchased an Evinrude motor for his boat, and looks forward to plenty of sport throughout the season. Several trout have lately been taken by him with the able assistance of son Bert.

Oldtimer Speaks

Oldbird: "My wife has a big mind—a large mind."

Friend: "Yes?"

Oldbird: "Yes—yes indeed. She's given me a piece of it every day for the last fifty years—and seems to still have plenty left."

Easy Deduction

Wise Man: "Tell me what your poets do and I'll tell you what their wives do."

Student: "The poet I know takes in all the beauties of nature."

Wise Man: "His wife—washing."

PRIZE WINNER GIVEN MEDAL

Peachland School Gives Special Program

Mr. R. Boswell, principal of the Central School put on a special program in the school on Monday afternoon last. Among other things the program featured the National Peace and Good-Will movement and the presentation of a special prize won by one of the Peachland pupils for a competition written last October on Fire Prevention.

Rev. T. A. Sadler gave a very interesting and instructive address reminding the pupils and others present of historical facts of interest and showing very clearly wherein the spirit of peace and good will and the policy of international justice would do a great deal towards eliminating many of our present day troubles and differences between nations. In his closing remarks he said he hoped all the pupils would try to cultivate a spirit of good will and international justice and that many of them would become great men in their day.

Mrs. Huston gave the audience a word picture of the great Halifax disaster and how our neighbors to the south nobly responded with doctors, nurses, money and other necessities. She was in Halifax at the time and said that it had created a very warm spot in her heart for the Americans. The city of Boston was the first to land a train in Halifax with needed help.

Miss Smith, a member of the school board spoke a few words with reference to the bundles which were being collected through the school children for the Armenian relief.

Mrs. Dryden, chairwoman of the school board, presided and read a letter from the reeve, Mr. R. Harrington, expressing his regret that special municipal duties made it impossible for him to be present and that he wished to extend his hearty congratulations to Miss Ruth Brinson for winning the prize in the competition.

Mr. McCall, the fire chief, made the presentation. He briefly referred to the pleasant afternoon spent in the school on fire prevention day last October when a special program was put on following which Principal Boswell got several of the pupils busy writing essays on fire prevention. Two of these had been sent in to compete in the competition and Miss Ruth Brinson had been successful in carrying off the first prize for the Province of B. C. A certificate signed by the officials who had conducted the competition accompanied the medal which bore the particulars, and the date and the name of the prize winner.

It was regretted that Miss Brinson had unavoidably been prevented from being present to receive her prize, and the presentation was made to her near neighbor, Mrs. Huston who was asked to suitably pass it on.

A motion of congratulation was passed and heartily supported by a unanimous hand clapping, and it was decided that the letter from the reeve should be handed to Miss Brinson with the certificate and medal.

Mr. Boswell, on behalf of the school, thanked the visitors for their presence and interest and the speakers for their assistance and this was endorsed by a hearty hand clap by the pupils.

Interperiod between the numbers by the visitors were several items by pupils of the school, which were well done and appreciated by the visitors.

The visitors were asked to sign the register and were as follows: Mr. Sadler, Mr. McCall, Mrs. Boswell, Eric Boswell, Mrs. Huston, Maude Fridge, Mr. and Mrs. Young, Ena Boswell, Ella MacKenzie, Mrs. Dryden, Miss Smith. The pupils and teachers, Miss Buck and Miss Clem-

PROPOSE ADDITIONAL IRRIGATION STORAGE

The Councillors, members of the Water Board and several of the ratepayers of the district went by truck part of the way, and hiked the balance to the newly proposed additional water supply known as "Wilson's Lake" on Monday last to make a general survey of the proposition and learn if it would be a feasible proposition to hold an extra supply there to supplement the present supply held by the South and North Fork Dams. The general consensus of opinion of the party is that it would be a good move and a meeting of the ratepayers will likely be called to discuss the whole matter fully.

Miss Pierce and aunt and Miss Marion Hawkes were visitors on Tuesday to Kelowna.

A number of the members of the Baptist Church met on Tuesday evening last at the home of Miss Smith, where Mr. and Mrs. G. Thornber have been residing during their stay in Peachland. The purpose of this gathering was a little farewell social for the latter owing to their soon leaving for a few months vacation and visit with relatives.

Some boys of town and community have been bathing in the lake several times already this season and of course say—"Come on in the water's fine" but in spite of this invitation, bathing is not particularly fashionable as yet. However, we were told that one of our citizens, a man of 81 years, started his summer bathing in the lake a week ago last Tuesday.

Mr. Bell of Penticton visited his local Ford representative. When we see their heads together in town we begin to watch for a new Ford driver on the roads. It happened again, Mr. Bradley is another customer for the gas men of the town and no longer has to feel sorry for horse-flesh drawing up the weary hill.

Coun. J. H. Wilson has new and added responsibilities, though not in municipal affairs, his wife having presented him with a baby girl, born early last week in Kelowna.

Mr. Maben, a former resident of the Trepahier townsite, now a travelling representative of the Martin Senour Paint Co. spent a day or two in town last week in the interests of his company. He reports his wife and family well. He was heard to comment very favorably on the valley and said that he thoroughly enjoyed his trip over this part of his territory.

Plumber Thos. McLaughlin completed the installation of the water works for the mammoth site and winter is now being played on the newly seeded lot.

Mr. and Mrs. E. E. Eddy left on Wednesday of last week to visit Mrs. Eddy's sister in Idaho, near Spokane. The new Union manager, Mr. H. S. Serivor with his wife and three children arrived on Wednesday evening of last week and have taken up residence in the Kudolka property. Mr. Serivor has commenced operations in his new position.

Mr. W. A. Dowman of Vancouver, provincial superintendent of agriculture for the Canada National Fire Insurance Company was in town making an official call last week on their local agent, H. E. McCall.

Mrs. W. Lambly and baby went to Penticton Friday evening for a short visit with friends and relatives.

Mrs. McIntosh and baby, Lillian Palmor, Mrs. McKay and daughter Sheila and Mrs. Morgan returned home Saturday evening after a visit in Kelowna.

Sunday afternoon service in the Baptist Church marked the last preaching service by Mr. G. Thornber for several months as he and Mrs. Serivor, of the other two rooms also joined in the afternoons proceedings.

Thornber purpose leaving shortly on an extended visit.

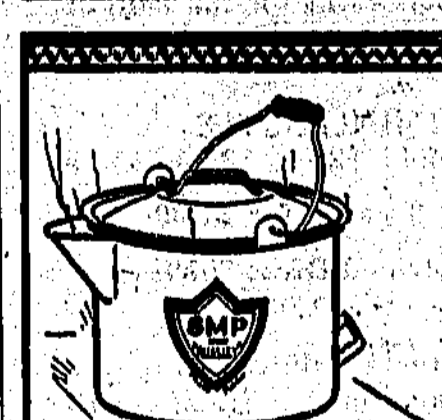

Mr. and Mrs. Fenton, Mrs. Johnson and Harry the Jap motored down from Westbank on Sunday last to attend church service in town.

Miss Wilson and her father and Mr. Evans, Sr. spent Monday last in Kelowna.

THE VALE OF OSOYOOS

The following verses may not carry any appeal to those who have only known Osoyoos since the government entered upon its soldier land settlement project in the South Okanagan, but to those familiar with the place in the earlier days, the lines will carry a very strong appeal!

In the Vale of Osoyoos when midnight is nigh,
And the moon in her fullness rides radiant anigh,
The stars pearly twinkle, the lake's silver gleam,The low-lying meadows, the broad winding stream,
The high rolling ranges surmounted by trees,
That scatter their fragrance with every breeze;Oh! where is the scene can with this one compare,
In natural beauties so rich and so rare;The lowing of cattle is heard on the hills,
The murmur of water from mountain-fed rills,
The scene with its peace and its grandeur so fills,
The heart with contentment and joy.

The Right Way to Boil Potatoes

Put the potatoes in an SMP Enamelled Potato Pot. Cover with water. Add salt to taste. Boil until soft. When finished, drain off all the boiling water through the strainer spout. No danger of steam scalding the hands because the handle securely locks the cover on. If your family uses potatoes, you require one of these.

Enamelled
POTATO POTS

His Business Judgment

A man who had imbibed freely—but not wisely, staggered into a woman's exchange and stood swaying while the matron in charge came forward to serve him.

"Is 'ish Woman's 'Exchange?'" he asked, squinting one eye and looking her over.

"Yes," she replied, "is there something I can do or you?"

"And 'ish you th' woman?" he asked.

"Yes, yes," she said. "Zen I guess I'll keep Mary," he said, turning to stagger from the place.

ED PURDY'S PHLOS

Some people are afraid o' automobiles; some people are afraid o' airplanes; and some people are afraid o' the dentist.

It's That Time O'Year

Perkins: "Say, what's the matter with Bill Timpkins these days?"

Johnson: "Didn't you hear? He was stung by a rattler."

Perkins: "Migosh—a rattlesnake?"

Johnson: "No. Used car."

CHAUTAQUA Penticton

May 25 to May 30

- FIRST DAY**
AFTERNOON—No program the first afternoon.
EVENING—McDONALD KIDDIES—An antidote to worry. Spend a happy evening with these talented children and you will forget there is such a thing as care in the world!
- SECOND DAY**
AFTERNOON—A ONE-ACT PLAY, "The Silent System," a home episode; also Russian songs in colorful native costumes.
EVENING—Dr. Homer B. Hulbert—A tremendously fascinating and gripping lecture on "Where East Meets West."
- THIRD DAY**
AFTERNOON—Howard Russell Revue—An afternoon with a trio of Chautauqua musical artists and comedian.
EVENING—Howard Russell Revue—Prelude—After hearing these delightful Sir Harry Lauder and coster characterizations you will have something to chuckle over when skies are gray.
MRS. D. FIRIE BEYEA—"The Four Cornerstones of Citizenship"—A forceful lecture by a lecturer with a "six-cylinder brain and a wonderful exhaust."
- FOURTH DAY**
AFTERNOON—The Tziganos—Bright, sparkling and unique character songs, monologues and Grand Opera Arias.
Judge Fred G. Bale—Drive as far as you like to hear him in his lecture "The Fiddler and the Fire." You will not be disappointed.
EVENING—The Tziganos—Prelude—Thrilling care-free gypsy scenes and melodies, accompanied by plaintive or merry violin obligatos.
Judge Fred G. Bale—A fearless and forceful lecture from a speaker of wide experience—"The Fourth Line of Defense."
- FIFTH DAY**
AFTERNOON—The Boyd Concert Company—Concert Artists and Entertainers in Songs, Instrumental Music and Humorous Sketches.
Dr. J. H. Rivers—"The Second Chance or Lessons from Life"—A lecture by a Canadian who knows his subject from the ground up. Every man, and especially every father, should hear this.
EVENING—Play Co.—"Daddy Long-Legs"—a charming comedy dramatizing Joan Webster's well-known novel of that name.
- SIXTH DAY**
AFTERNOON—The Rainbow Novelty Company—a versatile musical company.
Dr. George W. Kerby in his message, "Canada's Contribution to World Life," will give you something to ponder over for a long time.
EVENING—The Rainbow Novelty Company with Eileen Hoff, dramatic soprano—A full evening's enjoyment of modern and classical music.

Volume 17, Number 43.

SUMMERLAND, B. C., THURSDAY, MAY 28, 1925.

\$2.50, Payable in Advance

Fruit Growers Drawing Heavily on Water Supply Available Thru System

Main Channels Were Never So Greatly Taxed As Now.

MAY ENLARGE MAIN CANAL

Suggestion Made to Use the \$4,000 on Hand on This Work.

Never has there been as much water passing through the Trout Creek main canal as now, according to the statement of Foreman Tomlin in his discussion with the council on Friday of irrigation matters. Not quite as much is going down the south main, which means that there is that much more passing through the reservoir to the north main and the pipe system.

Farm Taking Less Water.

For a time, the Experimental Farm was drawing very heavily on the domestic pipe but for a few days previous this tax on the pipe system had been greatly lessened through the fact that the Farm pipe system is now connected with their own reservoir which is supplied through the municipal flume system augmented by the Farm pumping system when necessary.

It is only with the greatest care that the level of the water in the reservoir is kept up. Much more water could be delivered from the creek to the reservoir were it not for the fact that some parts of the main canal have not yet been enlarged to the capacity of the concrete ditch and the steel flume above it.

May Improve Main Canal

Reeve Johnston reported that it had been suggested that the council use the \$4,000 left over from the Garnett Valley work to repair the wooden flume above the section of steel next the reservoir. It is here that the channel is most congested. It is also reported that this flume had settled somewhat, further limiting its capacity.

Reeve Johnston instructed the foreman to prepare an estimate of the cost of replacing this section with steel on a straighter line and better grade.

Drawing on Reserve

For some days the ditchmen have been drawing on the reserve supply in the Garnett Valley dam and this had gone down so that on Friday last it was reported that the bridge at the upper end, at one time two feet or more under water, had been bared.

The coolness of the few days previous had checked the froghet in Trout Creek so that the level had fallen slightly.

PLAYING FIFTH LEAGUE GAME

Summerland and Penticton Striving For Second Victory.

Penticton is playing Summerland here this afternoon in the fifth league game of the Okanagan International Baseball League. Summerland played at Penticton last Thursday, taking the losing end of a score of 5-12.

The local baseball team competed for prizes at Oliver on Monday where three games were played. Summerland played Oroville and the result being a tie, 0-0, an extra inning was played and in this another score was made by Oroville.

A large number of people from here attended the game and strongly supported the local team.

Penticton played Oliver, the latter winning 0-6. The two winning teams, Oliver and Oroville, then played, Oroville taking the game in a

BUYS REMAINDER OF HILL PROPERTY

C. A. Mitchell has purchased the unsold group of lots in the Hillpark Gardens property near his home and amounting to about five acres. The deal was completed May 12, and speaking for the new owner Mr. Morley, Mrs. Mitchell's father, asked the council to allow the discount on current irrigation rates. For two reasons the request could not be granted: arrears had not been paid and the last day of discount, May 1, had passed.

MAY BUILD AROUND SLIDE

Municipality Given Details Of Expenditures on Highway.

Fifteen hundred and twenty dollars was expended in the removal of slides on the Okanagan Highway within Summerland municipal limits in the provincial year ending March 31st last, according to a statement given the municipality by the district road foreman S. T. Elliott and which was laid before the council on Friday. Twenty-five per cent, \$380, is the portion of this charged against the municipality. The balance of the government's bill of \$934 is for general maintenance.

Better Check On Expenditure

The reeve reported that Engineer Gwyer had promised that monthly statements of expenditures would be rendered to the council. The first of these bills, for April, had been received and amounts to \$378, of which the municipality pays twenty-five per cent.

Building the road out around the site of the troublesome slide north of Crescent Beach had been discussed by the reeve and councillors with Engineer Gwyer and it is not improbable that this will be undertaken soon.

The government engineer will be notified that the municipality is only providing \$500 for maintenance of the Okanagan Highway within municipal limits.

LAWN SPRINKLING BY-LAW DISCUSSED

Water Committee to Advise Public Before Enforcement.

Proposal to enforce the sprinkler by-law, so called, which automatically would go into effect on the 1st of June, was made by Foreman Tomlin at the council meeting on Friday, who said he would like to see all sprinklers stopped by that date except for the short time in the evening provided by the by-law. Although delivering more water than in former years there is some difficulty in maintaining an ample supply and he thought that trees should have preference over gardens and lawns.

Councillor Smith, chairman of the water committee, could not see the necessity of restricting sprinklers at the present time and in the discussion the foreman admitted that sprinklers were not responsible for bringing down the pressure in the pipe to any extent but that the lack of pressure was due to the stealing of water through house taps and standpipes.

It was agreed that the matter should be left with the water committee and the foreman and that householders should be given due notice with respect to sprinkling before the regulations prescribed by the by-law would be strictly enforced.

score of 6-4. Cash prizes were put here, Summerland winning \$20, Penticton \$20, Oliver \$45 and Oroville \$70.

In the four league games already played Summerland has taken one, Penticton one, and Oroville two.

REPAIR FOUNTAIN ON SHAUGHNESSY

Memorial Fountain on Granville Has Been Demolished.

Removal of the Scott memorial fountain at the west end of Granville Road was promptly done following the decision of the council, but at the meeting on Friday last, the motion which also provided for the removal of the Scott fountain on Shaughnessy Avenue, was rescinded. This fountain is in need of repairs but Councillors McPherson and Smith objected to the municipality expending any money on it. It was stated that Mr. A. Stark had promised to repair the trough and after a lengthy discussion as to the best means of providing water for irrigating shade trees along the east side of the avenue, it was decided to make only what repairs were absolutely necessary and to connect the fountain with the pipe now leading to the old power house and let the citizens water the trees as best they could.

Water has not been running through the fountain since the old power line was taken out in 1922.

GARAGE HAS SHOW AND SALES ROOM

H. Road Provides More Floor Space For His Increasing Business.

Recent additions made to Road's Garage provide a show and sales room and a large floor space for car storage. With this additional space that part of the business can be kept quite apart from the repair department, oils and gas. The show room is the store formerly occupied by S. G. Rand and the storage space has been provided by a large addition to the back of the former Rand building.

Mr. Road purposes carrying a complete line of auto parts and accessories.

O.U.G. ASSIGNEE GIVEN JUDGMENT

M. G. Wilson, trustee of the property of Okanagan United Growers Limited, and authorized assignor has been given judgment against Robertson, Morris & Company, Limited, Vancouver, J. W. Morris & Company, Seattle, and J. W. Morris. The action arose over a sale of onions through Robertson, Morris & Company, Limited. The amount of the judgment is \$2,422.

Canada's exports during the calendar year 1924 reached \$1,058,057,808 as compared with \$1,014,044,274 in the previous year.

SAYS OWNERS IGNORANT OF OPPORTUNITY

Many Lots Grouped For Water Rates Levy.

Council Debates Question of Irrigation Service.

Should the owner of two adjacent lots be charged irrigation and general rates on each individual lot or should the two lots be treated in acreage as one? There was much argument over this question at the council meeting last Friday when an application for block rates on two lots was laid before the council, there being much opposition to the proposal from the newer members of the board.

Only at the last meeting a similar request had been granted without discussion. The clerk pointed out that this had been the practice for a number of years and it was also shown that the two lots referred to had until recently been treated as one and had only been separated when one had changed ownership. The other had since come to the same owner. A new view of the question began to develop and the request was eventually unanimously granted.

Of Privilege Councillor Smith was of the opinion that there were many who did not know that they could so group their lots and thought the owners of such properties should be officially so notified.

During this discussion the question of second connections to individual lots came up. For several years it has been the policy of the municipality to give a second irrigation connection where requested, making an annual charge for this service. It is cheaper for an owner of two five-acre lots to pay irrigation and general rates on ten acres and pay for a second connection.

It was stated that the whole question would be definitely settled were a policy of one connection only to one lot strictly adhered to.

Canadian production of copper, which was about 88,000 tons in 1918, increased to 60,000 tons in 1919. Since then the wartime capacity has not been called fully into play, although in 1923 and 1924 production exceeded pre-war figures, being 48,000 tons in 1923 and 53,000 tons last year.

MAKING PLANS FOR PEACE MONUMENT

Washington Committee Actively At Work on Project.

Okanagan, Wash.—The Wenatchee Post of the American Legion, which has taken the initiative in a proposal to erect a peace monument at the international boundary line north of Oroville, has secured an estimate that a suitable arch can be erected for \$17,500. Such an arch, erected on the present highway between Oroville and Osoyoos, could be seen at least two miles in each direction. Permission to erect the arch would have to be obtained from the state highway department and also from the British Columbia government.

A proposal has been made to use Washington granite on one side and Canadian granite on the other. The arch would be 25 feet high and ten carloads of granite would be required. It has been estimated if plans are completed so that the granite can be ordered in July, the arch can be completed by Armistice Day.

A committee of the Wenatchee Post is actively working on the project.

CONCRETE BLOCKS TO GUIDE TRAFFIC

Low Rounded Blocks To Be Placed At Street Intersections.

Concrete blocks about fifteen inches square with rounded tops, to protrude but a few inches above the ground will be used as traffic guides at the junctions or intersections of the several streets chosen for this experiment. Further information on the subject had been obtained and was discussed by the council on Friday when instructions were given to have the blocks prepared. The public works committee will decide upon their location and attend to the placing.

The traffic by-law will be amended to conform to the changed conditions. Those silent policemen will be placed at Melvin's corner, Stuart's corner, the municipal hall corner and McCutcheon's corner.

MAKING GOOD IN ORANGE PACKING

Russell Munn, Summerland Boy, Is Head of Packing House.

We hear that a shipment of oranges arrived here by the S.S. Silvia this week which are said to be the finest oranges ever imported into Newfoundland. We have seen a sample and the skin is of a beautiful texture and more like a kid glove than the

Council Changes Policy Governing Extensions to Electric Light System

PLACING ANOTHER MEASURING BOX

Acting on the recommendation of Councillor Smith, chairman of the water committee, the council decided to place a measuring box on the hill above to measure the irrigation water to the McDougald lots, and also the Bentley and Shiller lots.

J. McDougald had applied for a box at the corner of his property but it was considered more advisable to place the box higher up and to make it serve the other properties as well.

WOULD EXTEND LIGHT SERVICE

Councillors Differ on Present Policy on Extensions.

During the debate by the council on Friday on a proposed extension to the electric light service the whole question of when to make or not to make extensions was again argued. Councillor Arkell pressed for general extensions, while Councillor Ritchie pointed out that several of the extensions which had been made were unprofitable, tending to increase the rate.

Councillor Arkell replied that he quite understood that the rate must go higher if the extensions are made, whereupon he was told by Councillor Ritchie and other senior members that a proposal in 1923 to increase the rates had met with strong objection from users who said they would not take the service if the rate went any higher. Councillor Arkell argued that other utilities did not pay and claimed that in past years deficits in the electric light department had been born by the taxpayer.

To this the treasurer replied that from 1910 to 1920 the electric light department had paid its own way. The prevailing opinion apparently was that great care would need to be exercised in making any further extensions else the overhead costs, transformer and line losses would make an increase in the electric light rate necessary. If this resulted it was feared that greater deficit would result through lessened consumption.

PEACHLAND BILLED FOR SHARE HIGHWAY

Three Hundred Dollars is Amount Asked for Past Year.

Peachland municipality is very similarly situated with respect to the lakeshore road as is Summerland. For a long distance north of Deep Creek, the southern boundary of the municipality, the road was built by the province under conditions identical with the building of the road from Crescent Beach to Van Hise's, the Summerland northern boundary. The Peachland road on the bench above served the southern section of the municipality.

For the first two years under the new act Peachland paid \$483 as twenty-five per cent of the maintenance cost of the highway through that municipality, the council having asked that it be not required to pay more than \$250 per year. For the last fiscal year the bill was \$205.

Chick pulp skin of the ordinary imports, but the juice of these oranges is like the nectar of the gods.

They came direct from the Mutual Orange Distributors of California. It is said that Mr. Russell Munn, a native of Harbor Grace, is in charge of the packing house and during February carried off first and second prizes at the National Orange Exhibition held at San Bernardino in California. — Newfoundland Trade Review.

Mr. Munn referred to above is a Summerland man, son of Mr. and Mrs. A. G. Munn.

Electrician's Salary Charged Wholly to Maintenance And Operating.

CITIZEN QUESTIONS COST ESTIMATE

Says Can Complete Job At A Material Saving.

That the municipal electrician is, as an employee of the municipality, a servant of the public, was the claim made by a member of the council at the last meeting in support of a contention that no charge should be made for his time on extension work. There was a long, and rather animated argument at times on the subject of electric light extensions, following the hearing of an amended proposition by D. C. Thompson for an extension of the service to his home. The discussion ended in a change in the policy of the municipality with respect to such extensions.

No Charge for Electrician

It has been the rule of the council to expend not more than \$60 on an extension to any individual user. The salary of the electrician has been apportioned to operating and maintenance, and capital account, the proportion varying in accordance with the amount of new work done. Under the new policy his whole salary will be charged to maintenance and operating and his time and services on extension work will be given gratis.

The electrician's estimate for making the extension to the Thompson lot line was \$90 including the cost of the meter, \$10. Mr. Thompson strongly objected to this estimate, pronouncing it excessive, but it developed that he had not taken the cost of the meter into his calculations. Believing he could do the work cheaper his offer was virtually to complete the job for \$70 including the meter, the municipality to pay him \$60, the fixed maximum, and to refund the other \$10 when a further extension is made to the line, provided such an extension does not exceed \$60. The work would be done in accordance with municipal specifications and to the satisfaction of the council.

Immediately, there were several objections to paying another for this work when already the municipality had a man for the purpose.

The outcome of a lengthy discussion was the decision to refer the matter to the electrician and if the extension could be made for \$70, he would do the work, otherwise Mr. Thompson was promised the contract on the understanding that he would furnish a detailed statement of costs when the job was finished.

PETITION FOR SURPLUS MONEY

South Front Benchers Ask That Money Be Used There.

Residents of district lot 075 laid before the council on Friday a petition requesting that the \$4,000 remaining on hand after completion of the work in Garnett Valley be expended on the irrigation system in their neighborhood. The petition was signed by Messrs. Temple, Hayes, Clark, Sherman, Tivendor, Walter, and J. Tait.

The petitioners claimed that they were suffering from totally inadequate supply. In this the councillors did not concur and the opinion was expressed that if the money were to be expended on the system it should be in some such place as the Trout Creek main from which the whole community would profit. The petition was filed.

"Money Is Not Spent In Advertising; It Is Invested" — H. J. Buckley

The Summerland Review

Established August, 1908.
Published at Summerland, B.C., every Thursday by
THE REVIEW PUBLISHING COMPANY, LIMITED
Ralph E. White, Editor and Manager

An independent family newspaper covering Peachland, Summerland and Naramata and adjacent districts.

Member of Canadian Weekly Newspapers Association.
Member of British Columbia Selected Weeklies.

Subscription Rates—In British Empire, in advance, \$2.50 per year; six months, \$1.40. To U.S.A. and other countries, \$3.00 per year.

Advertising Rate Cards and information respecting territory and samples of paper mailed upon request, or may be seen at the office of any advertising agency recognized by the Canadian Press Association.

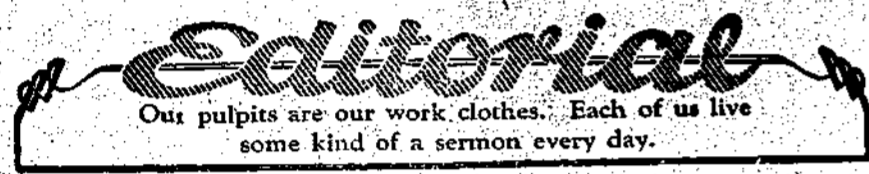

Advertisers must have copy in by Tuesday noon in order to insure changes for standing advertisements. New display advertising copy can be accepted one day later.

All instructions for cancellation or alteration of advertising must be in writing.

Correspondence—Letters addressed to the Editor and intended for publication must be short and legibly written on one side of the paper only. The publication or rejection of articles is a matter entirely in the discretion of the Editor. No responsibility is assumed by the paper for the opinions expressed by correspondents.

Typographical Errors—In the event of a typographical error, advertising goods at less than the proper price, the newspaper will furnish letters to be posted in the store stating the correct price, but goods may not be sold at the price printed and the difference charged to the newspaper.

Thursday, May 28, 1925

THE ONE WHO PAYS.

There seems to be a great deal of misunderstanding on the subject of electric light service and it would appear that not even all the members of the municipal council are thoroughly conversant with the subject.

A citizen stated the other day that he did not think it fair to penalize a rural man for those in the centres, referring to the fact that the municipality had put a limit of expenditure on any one extension. In claiming that the municipal electrician was a public servant a councillor apparently assumed that his salary was paid by taxpayers.

The fact is those who pay the electric light and power bills are the ones who pay that salary. Not only are they paying for current and depreciation of the system but they are contributing to the municipality each year, through the sinking fund, the cost of the system. Eventually all taxpayers will be shareholders in a system paid for by users of electric current.

The greatest need of the electric light department is increased consumption. A lowering of the rates would have a tendency to encourage this; higher rates to discourage. The problem for the council is to establish a rate that will encourage consumption and at the same time to increase the consumption by making extensions wherever self-supporting. They would soon defeat their object by making indiscriminate investments in extending the service where the revenue could not cover all costs.

It is unfortunate that any taxpayer should feel that he is contributing one cent toward giving a more favorably situated citizen electric light or power. This he is not doing.

BEATING WARSHIPS INTO FLIVVERS.

Henry Ford says he wants to buy several hundred ships from the U.S. government, melt them up and make flivvers out of them. A laudable ambition so far as it goes. The crafts of war are to be turned into the arts of peace. Beating swords into plowshares contributes directly to production, while melting ships into automobiles savors more of consumption. However, it may be said that the automobile makes its contribution to world progress indirectly because, as Henry says, people "get to travel and mingle with other people; in that way they become educated."

MOTORS

It is truly a world on wheels we live in. Last year new motor vehicles cost the world three and a third billion dollars. During the year there were assimilated 3,300,000 passenger cars and trucks and 200,000 motor cycles. Average price per car was \$1,000, per motor cycle, \$300.

Twenty-five years ago the automobile was an experiment. Today there is one to every six persons—or nearly so—on this continent.

Many a man who accuses a woman of having a heart of stone has a tobacco-heart himself.

STRAIGHTFORWARD JOURNALISM.

The days of fake journalism never were here so far as reputable newspapers are concerned. A newspaper could no more afford to fake a story deliberately than a reputable merchant could afford to misrepresent his goods. Misrepresentation of facts, either for the sake of creating a sensation or for the sake of forwarding the political game of a newspaper, is even more serious than gross misrepresentation on the part of a merchant. For such misrepresentation on the part of the merchant can at best fool only a few as compared with the thousands who would be fooled by a newspaper. Once in a while we hear the expression, "Oh, that's all newspaper talk." Newspaper men are particularly impatient

Timely Hints For the Orchardist

Specially prepared for The Review by J. Tait, District Field Inspector.

Thinning.

John R. Peters of Wenatchee, an authority on thinning of apples and pears, advises thinning early. Here are his sixteen points on thinning:

1. Conserves soil fertility over a longer period of tree's life.
2. Keeps the tree normal in shape and structure.
3. Does not reduce the yield.
4. Increases the size of fruit.
5. Reduces the percentage of blemishes.
6. Increases color of fruit.
7. Aids in control of codling moth.
8. Reduces loss from wind-falls and picking drops.
9. Reduces cost of picking, sorting and packing.
10. Reduces cost of wrapping paper.
11. Encourages annual bearing.
12. Advances date of harvest by at least a week.
13. Insures maximum returns for crop.
14. Secures and holds best labor available.
15. Gets the grower the best customer and holds him.
16. Produces an apple you cannot keep. The other fellow will not let you.

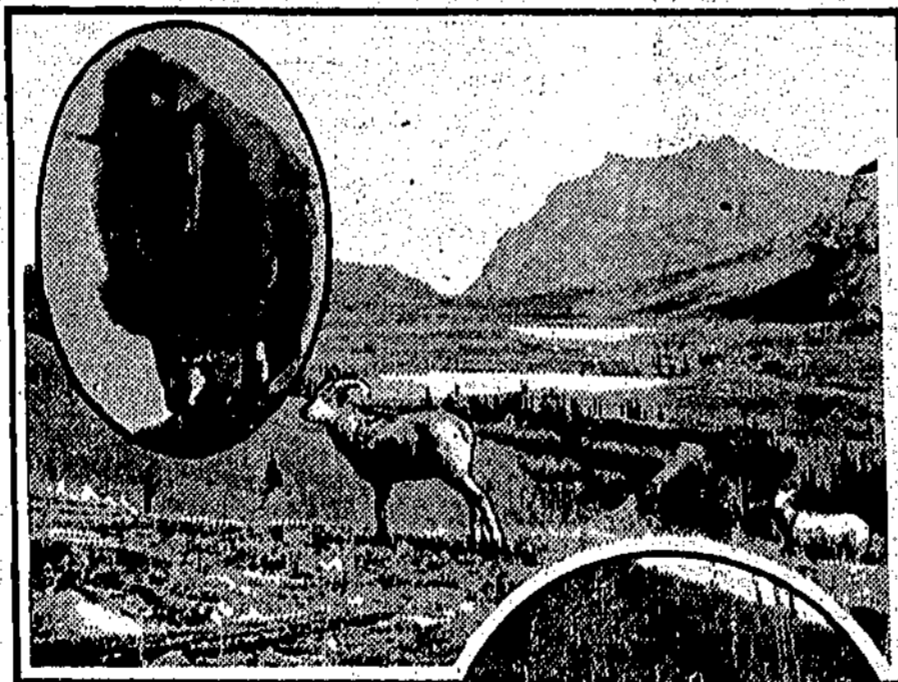

Keep the cherry orchard soil in moist condition by good irrigation now. Hold off water at least two weeks before picking, so as to have a firm cherry when picked, and avoid any break down during transportation. Try this out and watch for results this season.

with this remark, for they know that no reputable reporter and no reputable newspaper ever knowingly misrepresents facts or "fakes a story." And 99 per cent of Canadian daily and weekly newspapers are reputable publications. We know of one case in East Kootenay district where an editor was offered \$5,000 in cold cash to "keep his mouth shut," but even this amount did not stop the publication of the story. The days of "fake journalism" never did exist in Canada and let us hope they never will. Cranbrook Courier.

COMMUNITY INTEREST.

Revelstoke Review.—Figure as you will, you can't get away from the idea of community interest. We who constitute the local community are intensely dependent on one another. When we buy merchandise from out of town concerns we take that much business away from local business firms. If enough business is withdrawn from them, they'll eventually have to quit. Then Revelstoke would shrivel up. Clerks and laborers and tradesmen would have to move away. That would directly affect the value of our homes and farms. Then, who would pay the taxes and support our public institutions, build and maintain our streets and roads and pay the interest on public indebtedness already incurred? Our self-interest, the safety of our property investments demand that we trade at home and support our local business men. If anyone thinks he can refute this statement, we would like him to give us a logical argument in favor of trading with the mail order house.

Canadian Big Game For Austrian Alps

Here are seen some fine specimens of mountain sheep, photographed near Banff, Alberta, in the mountains just giving an idea of the fine game or camera trophies these big game animals provide.

A Banff railway station recently a small official gathering bade goodbye to six worthy members of Nature's Own Alpine Club. They had never before been passengers although from their lofty home in the Canadian Pacific Rockies they had watched and heard the trains that day by day shuttle smoothly to and fro on the world's greatest highway. In deed so close to the railway track did they oft times venture that the people in passing trains had the unique pleasure of seeing those hardy mountaineers ascending and descending the cliffs and crags of their native haunts.

For they were the famous "Big Horns," the wild sheep of Canada's great mountain region. Lodged in upholstered crates, accommodated in a roomy Dominion Express car, they were consigned to a large estate high up in the Alps of Austria where they will have liberty to roam in a congenial environment and where, it is hoped, they may in course of time multiply and become as abundant as the flocks that feed on the Alpine meadows near Lake Louise and that wander upon the sunny slopes of Yoho Valley.

Count Hohenlo, an Austrian nobleman, who had travelled in the Rockies and who had seen the wild sheep of that region, believed that given opportunity they would easily

become acclimatized and would thrive well in the highlands of his native country. Anxious to put his theory to the test he entered into negotiations with the Canadian Government and succeeded in securing two rams and four ewes for export to Austria. In the Canadian Pacific Rockies where "Big Horn" sheep are increasing enormously in numbers there is yet a great plenty of other large game animals. The territory westward of and convenient to Lake Windermere Camp is noted for Grizzly Bear. A comparatively short trail journey northward from Lake Louise brings one into a region where white goats clamor on the cliffs and crags. In the open valleys south of Banff there are many elk and moose a-browsing. Too, out there the Spray Lakes sparkle in the sunshine, the finest trouting water in Nor' West Canada. And whether you hunt with rifle or with camera the sportsman will find trophies worth the winning in this vast and unspoiled land of sportsman's lure.

Correspondence

THE RAZED FOUNTAIN

Editor The Review.

Sir.—It was with astonishment and very great regret that many of us learned of the destruction, last week, by order of the council, of the drinking trough which was erected by public subscription some years ago to commemorate the heroic sacrifice of Captain Scott and his companions.

Though permission to erect the memorial on that site was obtained from the council at that time, no doubt the present council were acting within their legal rights in demolishing the structure, a proper title to the site naturally never having been obtained or thought necessary by those who got up the memorial. But what must one think of any authority who in order to effect some little road improvement would take it on themselves to destroy a public memorial such as this without first consulting the wishes of the citizens?

Their action at best shows a deplorable lack of common courtesy, an unforgivable absence of sympathy for the feelings of those whom they are supposed to represent. The fact that the fountain was erected to perpetuate the memory of gallant countrymen of ours whose pluck, endurance and self-sacrifice elicited the admiration of the world, was apparently beneath the consideration of Summerland council!

Personally, I always feel indebted to those who undertake the somewhat thankless office of managing the affairs of the community they live in, but arbitrary, ill-considered actions like this deprive such management of all title to one's gratitude and respect. I should imagine it will be duly remembered against them by the electors when the opportunity comes.

Meanwhile, the incident seems to me to throw grave doubts as to the wisdom of erecting the proposed war memorial on any land under the authority of the municipality. With

"Judge's Joke"

THE MAN WHO BRAGS ABOUT HIS FAMILY TREE USUALLY IS ONE OF THE INSIGNIFICANT TWIGS

The Way Sandy Proposed

Sandy and his lass had been sitting together about half an hour in silence.

"Maggie," he said at length, "Wasna I here on the Sawbeth night?"

"Aye Sandy, I daur say you were."

"An' wasna I here on the Monday night?"

"Aye, so ye were."

"An' I was here on Tuesday night, an' Wednesday night an' Thursday night, an' Friday night?"

"An' this is Saturday night an' I'm here again?"

The possibility of the council at some future time consisting of men as devoid of imagination and proper feeling, as our present council, there is no telling what might befall the memorial. Would it not be wiser to purchase the necessary plot of land and vest it in trustees?

Yours faithfully,
C. NAPIER HIGGIN.

P.S.—Since writing the foregoing I have read the letter of Mr. F. A. Miller in your issue just to hand.

It shows that the council were fully aware of the fact that the fountain was a memorial erected by public subscription and much valued by many of the community. Such being the case I can see no possible excuse that can be made by them, of any validity.

"Well, what for no? I'm sure ye're very welcome."
Sandy (desperately): "Maggie, woman, dae ye no begin to smell a rat?"

Remove the Cause?
"Is your boss a crank?"
"No indeed. Everybody in our firm is a self-starter."

ED PURDY'S PHILOS
"One thing certain is that few clothes lines are breaking these days from the weight of women's clothes pinned therein."

Poem by Uncle John

With so many things to smile about, it's downright sin to frown; here comes the keenest joy of all—it's clean-up week in town.
Get out yer pail and scrubbin' brush and tighten up yer cinch—Our battle with the other trash is comin' to a cinch.
It might be well to plug yer nose in scientific terms—It takes discretion when you tackle woolly-whiskered germs! There's mebbe several pop-corn bags and old-tomatter cans, repositin' front of yer abode—Which civic virtue bans. Might even stir a polecat or a reekin' funny-side, which shows how any smelly thing can damage civic pride.
Don't take no bombs or hand grenades to slam the garbage dump—put on yer army gas-mask and deport it in a lump. If you enjoy a payin' job, relinquish it today, and fine the city's clean-up squad—you'll find it better pay! Stab any feller in his tracks that registers a frown—pull off yer coat an' swat by jacks—it's clean-up week in town!

SYNOPSIS OF LAND ACT AMENDMENTS

PRE-EMPTIONS

Vacant, unreserved, surveyed, Crown lands may be pre-empted by British subjects over 18 years of age, and by aliens on declaring intention to become British subjects, conditional upon residence, occupation, and improvement for agricultural purposes.

Full information concerning regulations regarding pre-emption is given in Bulletin No. 1, Land Series, "How to Pre-empt Land," copies of which can be obtained free of charge by addressing the Department of Lands, Victoria, B.C., or to any Government Agent.

Records will be granted covering only land suitable for agricultural purposes, and which is not timberland, i.e., carrying over 5,000 board feet per acre west of the Coast Range and 8,000 feet per acre east of that Range.

Applications for pre-emption are to be addressed to the Land Commissioner of the Land Recording Division, in which the land applied for is situated, and are made on printed forms, copies of which can be obtained from the Land Commissioner.

Pre-emption must be occupied for five years and improvements made to value of \$10 per acre, including clearing and cultivating at least five acres, before a Crown Grant can be received.

For more detailed information see the Bulletin "How to Pre-empt Land."

PURCHASE

Applications are received for purchase of vacant and unreserved Crown lands, not being timberland, for agricultural purposes; minimum price of first-class (arable) land is \$5 per acre, and second-class (grazing) land \$2.50 per acre. Further information regarding purchase or lease of Crown lands is given in Bulletin No. 10, Land Series, "Purchase and Lease of Crown Lands."

Mill, factory, or industrial sites on timber land, not exceeding 40 acres, may be purchased or leased, the conditions including payment of stampage.

HOMESTEAD LEASES

Unsurveyed areas, not exceeding 20 acres, may be leased as homesteads, conditional upon a dwelling being erected in the first year, title being obtainable after residence and improvement conditions are fulfilled and land has been surveyed.

LEASES

For grazing and industrial purposes areas not exceeding 640 acres may be leased by one person or a company.

GRAZING

Under the Grazing Act the Province is divided into grazing districts and the range administered under a Grazing Commissioner. Annual grazing permits are issued based on numbers ranged, priority being given to established owners. Stock-owners may form associations for range management. Free, or partially free permits are available for settlers, campers and travellers, up to ten head.

The Pedlar's Pack

By AUTOLYCUS

Of all the vain controversies which have afflicted mankind during the last fifty years or so, the Shakespeare-Bacon dispute

is probably the IDLE DISPUTATION worst. Without one single shred of direct evidence to support their theory the Baconian faddists seriously suggest that the English speaking world abandon the unbroken tradition of three hundred years and relinquish a name which is music to their ears!

"Whether does my full heart turn to the great Enchanter, or to the island upon which he has laid his spell? I know not. I cannot think of them apart. In the love and reverence awakened by that voice of voices, Shakespeare and England are but one."

That tribute, so beautifully expressed by Rycroft, fairly represents the unspoken feeling of most of us, but we are bidden to dismiss from our minds the name of Shakespeare, and to transfer our affections to another. And what are the grounds for this demand, so impossible to fulfill? Chiefly a claim of the assumed difficulty of reconciling the man and his work (an argument which is stultified by more than one known example to the contrary) coupled with some very ingenious cryptographic theorizing as per Ignatius Donnelly. Emerson is quoted as "being convinced that Shakespeare the man was not in harmony with the works" but it is not shown why the conviction of Emerson should be accepted as evidence. And if we are to argue along that line it may be permissible to point out that Bacon, convicted of political corruption, would hardly be more in harmony than Shakespeare the actor, against whom nothing is recorded.

In the course of some recent discussion on this subject a correspondent of the "Province" reveals an inability to appreciate the logic of facts which seems to be just what might be expected from people who take up these idle fancies. He takes the writer of "The Common Round" to task because, while "literary London is trembling with anxiety" he does not see that the great name of Bacon would add lustre to the works "that bear the name" of Shakespeare. Why should he? What name could add to the beauty which is already there?—are we to paint the lily and gild refined gold? This sort of argument is absolutely, without point, but what follows in this correspondent's letter is still worse. Referring to the fact that several great writers (presumably of Elizabethan days) were ardent admirers of Shakespeare he points out that they wrote in a period "prior to any controversy" concerning Bacon, and draws the very naive conclusion that therefore the value of those references is nil! In other words the love and admiration of men more or less contemporary with the great poet means nothing, and the "baseless fabric" of twentieth century conjecture is all in all!

In Mexico, "stone walls do not a prison make, nor iron bars a cage," the penitentiary of today being more like a home of luxury, to be enjoyed rent free by HAPPY persons who indulge in CONVICT such little peccadilloes as robbery and murder.

Such, at any rate is the impression one gets from a despatch from Mexico City published a few days ago. According to this report criminals in that happy land enjoy all the indulgences of the rich and free, and actually more than the poor but honest, the range of enjoyments allowed them including oven bullfights, which are probably out of the reach of the impecunious citizen. They also attend "theatres, movies, dances, concerts and circuses," and all free of charge. Nor does it seem to matter whether their sentences are heavy or light—there are over one hundred awaiting the death penalty, but still living comfortably and likely to do so indefinitely, seeing that there has been no execution for many years. This amiable consideration for the gentle criminal would doubtless receive the moral support of those estimable ladies who are always asking for something of the kind in this country, but it is said that the Mexican authorities are becoming alarmed at the resultant increase in crime, and are surveying with concern the past year's list of thirty thousand criminal cases handled in Mexico City alone. Jail has no terrors under prevailing conditions—to many it would appear as a sort of rest cure, and, given a perverted sense of right and wrong, the human derelict would be logical in seeking it. The situation affords an illuminative object lesson of the

"A Snapper Up of Unconsidered Trifles."

The Winter's Tale.

Scene II, Act IV

steady growth of contempt for law and has a moral easy to read.

Modern research is for ever upsetting the theories of our childhood's days, and many beliefs which were household words

LIBELLING of the last generation THE OSTRICH pair. In the days of our youth there was a deadly fascination in the knowledge then held concerning the fatal facility with which an earwig would squirm into one's ear, and explore the innermost recesses of the brain: today we are informed that the earwig has no ambition towards any such exploration. In the happy days of yore we knew that mermaids were beautiful beings, who never bobbed their hair, but attracted mankind with golden tresses of great length and brilliant sheen—today we know that the only mermaid is the Manatee, which is by no means beautiful and has no locks, golden or otherwise. Further we have learned that crabs do not walk backwards and that the Newfoundland dog does not rescue drowning persons from watery graves, but is more likely to keep them under water in its ineffectual efforts, if any. Now we are deprived of that old story of the ostrich hiding its head in the sand and believing itself effectually hidden. This habit has furnished material for many a moral reference, but is now declared to be a mere fable and a wicked libel on the sagacity of a bird which is probably as intelligent as most feathered bipeds. Maybe we shall presently be assured that the terrible kick of the ostrich is also a delusion but I know of one man who will not agree to that. An English sergeant serving in South Africa during the Boer war was rash enough to pull at a plume without the necessary caution, and promptly received a kick which broke his leg. His lament while being carried to the hospital was rather funny: "Boys," he begged, "for heaven's sake don't give it away that I've been kicked by a bird!"

Vegetables Will Keep You Fit If Given Chance

Vegetables are certainly good for you, but generally people do not know which kinds are especially useful for certain complaints.

Tomatoes, for instance, are good for the liver. People who suffer from rheumatism should eat celery, while garlic—that strong smelling onion—should be taken for asthma.

Lettuces supply iron to the system, and onions are good for sleeplessness. They are also useful as a sedative for the nerves.

Spinach is rich in iron and a capital food for anaemia, and cabbage is a good all-round cleansing food. As a blood purifier, there is nothing finer than watercress.

Beetroot will promote digestion, and carrots are invaluable for nervous irritability. Carrots are also good for the complexion.

The truth of the "apple a day" maxim has been proved time and again. An apple eaten every day will keep you healthy. Apples purify the system and improve the nerves, as well as supplying necessary foods to the brain.

Yes, Lester, a man may feel as young at 60 as he did at 20, but he doesn't know as much.

Let Us Do It For You

When you want to subscribe for a new magazine—or to renew for an old one—there's no need for you to write a letter, buy a postal order and pay postage.

Bring the same amount to The Review office and we'll be glad to do it for you. Sometimes, too, we can save you money.

Yes, we have lists of all the magazines with their prices.

And we absolutely guarantee regular delivery.

THE REVIEW Summerland, B. C.

CANADIAN NATIONAL PROMOTES RESOURCES

SINCE its organization, the colonization and development department of the Canadian National Railway has given attention to the development of the natural resources of the territory traversed by Canadian National lines; and in order to give greater effect to the activities of this branch of the department, it has been decided to place a representative in charge in the western region, whose chief duty will be to gather information and promote further the development of these resources, more especially in the provinces of British Columbia and Alberta. In this way, the facts obtained can be brought to the attention of those interested, with capital.

The office for this district will be at Edmonton, in charge of R. C. W. Lett, now General Agent, Colonization and Development Department, Canadian National Railway, who is well fitted for the work, having had considerable experience in connection with mining and lumbering, and during the past few years has made a very close study of the natural resources of British Columbia and Alberta.

Yeast As Chicken Tonic

In addition to being a food for humans, the feeding of yeast to all animals and fowl is becoming popular.

Yeast was first brought before the eyes of the scientific world as a food when investigators discovered that it was the richest natural source of Vitamin B. Since this discovery numerous experiments have been made which gave fine results from the use of yeast in the diet of humans, animals and fowl.

Recent tests that have been made public by Professor Harry Lewis, former professor of poultry husbandry, New Jersey Agricultural Experimental Station, show a great advantage through the use of yeast in increasing the fertility and hatchability

HOW TO REVIVE DROWNING PERSON

Something Everyone Who Goes Swimming Should Know.

Everyone who swims should know how to revive a drowning person. If you don't already know, learn how right now.

As soon as the body is removed from the water begin artificial respiration. Remember that your purpose is to get air into the lungs, so you must be sure that the mouth is free from mud and weeds and that no false teeth are obstructing breathing. Lay him face downward upon the ground, with a folded coat or other garment under his chest and turn his head a little to one side so that the air will not be blocked in entering the nose and mouth. Next, stand astride of the patient, over his hips and facing his head. Place your hands on each side of his back below the shoulder blades, with fingers spread out and pointed toward the head and away from the spine. Swing your body forward, allowing your weight to rest on his back; then swing back, taking all your weight off the patient. Do this about 15 times per minute. Repeat this alternation of pressure and relief until natural respiration has been resumed.

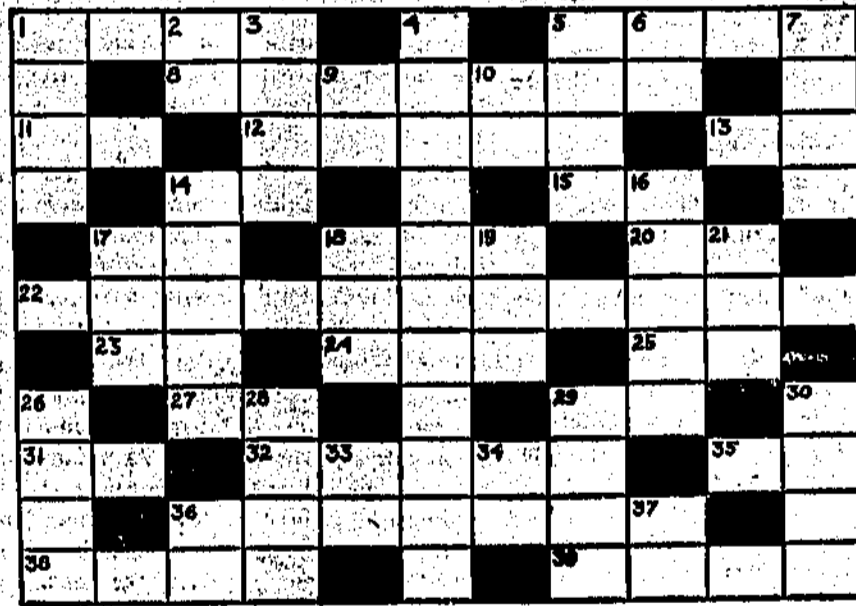

When this occurs, turn the patient on his back, rubbing briskly always toward the heart. Give stimulants and get him to bed as soon as possible. Cover him with hot blankets and surround him with hot water bottles, using care not to burn him.

of hens' eggs. A pure dry yeast product made by the Feischmann company was used for this experiment.

Some poultrymen have reported good results from feeding yeast to chickens. It is explained by poultry experts that the base of the cause of such big losses and poor development in chicks is improper digestion of their food. Improper digestion is not necessarily the fault of the chick, but is encouraged by overfeeding, chilling, overheating and poor ventilation. This is the big problem of the commercial poultryman today.

Aside from the value of yeast as the richest source of Vitamin B, the essential growth promoting vitamin, it has been found that through feeding yeast a chick is able to take care of the food it consumes, gets more out of it and keeps it moving through the digestive tract. If a chick does not take care of its food this way, there is going to be a certain amount of toxic substance and waste matter held over which makes an excellent breeding nest for intestinal worms and for disease.

PEACHLAND NEWS

By Our Resident Correspondent

WILD STRAWBERRIES ON MAY SEVENTEENTH

In a note received last week too late for publication, a Peachland subscriber tells of picking ripe wild strawberries on Sunday, May 17, and says there were lots of them and asks if this is not very early. Can any of our readers answer this question?

Miss Buck, teacher of the High School, returned Monday evening after a weekend visit out of town.

Robert Williams came home for the week end to visit the family and friends, returning north again Monday morning.

Mrs. Wm. Buchanan, jr., and young son left last week to return to their home at Robson after a pleasant visit here with her family and friends.

Mr. and Mrs. Bulyea returned home Wednesday after a few days' visit with relatives in Summerland. Dr. E. C. Lipsett brought them home by auto.

Mr. W. Bartlett of Naramata was a visitor to Peachland on Monday looking after some of his business interests here. He was a guest of Mr. Seth Davidson.

The Cousins brothers, Francis, Edward and Dan, and Lorne Shaw left early last week to return to their scene of labor at Beavertown after a few weeks spent at their respective homes here.

Mr. and Mrs. J. S. Moore and daughter, Mary, were in town on Monday, having motored from Penticton to visit relatives at Powers Creek and Peachland. They returned home in the evening.

Mr. L. J. Wood, of Penticton, manager-secretary of the Okanagan-Cariboo Trail Association was a visitor in town on Tuesday of this week, motoring through in the interests of the association.

Mr. A. J. MacKenzie returned home last week after an auto trip to the Williams Lake Country where he was looking over some property. He has not found anything as yet on which he would be satisfied to close a deal.

Mr. R. E. White of the Summerland Review with Mrs. White and members of the family and Mary Armstrong, motored to Peachland on Monday last where Mr. White made a few business calls in connection with his paper.

Mrs. H. E. McCall returned home on Saturday after three weeks at Vancouver, during which time she attended Sunday School and missionary conventions held in the city. She was met at West Summerland

CEMETERY IS GIVEN ANNUAL RENOVATION

The annual clean-up day at the cemetery, under the auspices of the Peachland branch of the Women's Institute was as usual a grand success. The citizens turned out in force armed with all the necessary tools and the old saying "many hands make light work" was proven again on that occasion. The party did not start to assemble till about ten o'clock and by noon even the work was well on toward completion, the whole place having taken on a cleaned up appearance. A number of the ladies who had not been detailed off to arrange for and prepare the noonday meal also lent their able assistance with hoe and rake, and in flower and bush planting. The other ladies were none the less busy preparing for the noon-day meal and when the call was given a hearty and hungry crew threw down their tools and soon were seated in various groups and positions on Mr. Hardy's lawn and grounds, where the ladies served a splendid meal during the eating of which all present thoroughly enjoyed the social converse. Dinner over, a little rest and chat, the crowd returned to the cemetery where the final clean-up was made and the grounds left in splendid shape. The only thing to mar the day's proceedings was a very stiff gale which blew practically all the time. However, although somewhat annoying and a little inconvenient it did not prevent the work being properly and thoroughly completed. Work completed the crowd was again summoned to Mr. Hardy's where the ladies treated again.

Before breaking up for the home going, the members of the Institute held an auction sale of the good things which were left over. Mrs. Keating acted as auctioneer, Mrs. Dryden as clerk of the sale and Mrs. Small officiated at wrapping up and distributing the parcels. Bidding was fast and furious, creating much merriment and the dainties brought good prices which added quite a neat little sum to the funds of the Institute.

by Mr. McCall and the family, by auto.

Mr. and Mrs. G. Thornber left on Friday morning on an extended visit. Mr. Thornber through to England to visit his mother and other members of the family. Mrs. Thornber is stopping in Quebec to visit members of her family and may join Mr. Thornber later in England. They will likely be absent about three or four months. During their absence Mr. Thornber's place in the pulpit of the Peachland Baptist church will be filled every alternate Sunday by Rev. A. J. Bowditch of Penticton.

made up of a nut cutlet not more than four inches long by three-quarters of an inch thick. Brown bread and water may also be served.

No Cakes or Puddings
On no account dream of touching puddings or cakes. Those who eat jam; roly-poly cannot possibly live to more than a hundred, and twenty. Every slice of plum cake means the loss of ten years, so that if you are rash enough to eat a whole cake you will probably end up about ninety-six, which is a most unsatisfactory age. Avoid cream buns, eclairs, jam tarts, etc., as though they were poison.

Not less than nine cold plunges should be taken at regular intervals throughout the day, and it is essential to be in bed at seven. Eating sweets or fees between meals (or at any other time) is fatal; parties should be avoided like the plague, and

I think we'll leave it at that. And now you know (according to Chris!) just what to do—if you think it worth while!

THE OLD-FASHIONED PIPE
Even the most hardened of the anti-smoking brigade should be pleased with the news that the blarney pipe in British Columbia is making headway against the insidious cigarette and is cutting down the sales of the too-popular coffin nail. If men must turn their mouths into chimneys and their lungs into incinerators the old-fashioned pipe is less harmful than the soggy cigarette. In fact the cleanest form of smoking was the one introduced in the days of Raleigh, the church-warden clay pipe with a foot-long stem, that was only used once and then destroyed.

Birth control might not be so bad if they would limit it to speakers, saxophonists and spring poets.

Own-Your-Own-Home Week was a happy thought. That's about as long as we installment payors can hold on to one.

GRAND FORKS CAN BOAST COMPOSER

Miss M. Pennoyer Writes Waltz Song Hit When Our Hearts Entwined

Grand Forks, B.C.—The author and composer of one of the prettiest waltzes of the dance season lives in Grand Forks. Probably at the time she sat down to write the ballad she did not realize how famous she was to become.

Today she finds herself very much talked about, the recipient of a tidy sum in royalties and many verbal bouquets.

MOTOR LICENSE FEE PATROLS HIGHWAY

Down across the line motor vehicle drivers are licensed. The license fee, which covers two years, is put into a special fund which pays the expense of highway patrol, and the cost of the license collection. It is estimated that in the State of Washington more than 400,000 drivers will take out licenses on the 1st of July for the next two years.

An effort is being made to have the surplus from the drivers license fund used for improving the state's tourist parks.

HOW TO CHANGE THE MIND OF BROODY HEN

If the broody hen is allowed to sit two or three days before an attempt is made to "break up" broodiness, she is usually very hard to break. Starting as soon as broodiness is noticed, before it becomes settled, is the effective way, states James Eastcott of Toronto, an experienced poultryman. "Go into the coop in the evening without making any disturbance, and you will see the ones that are broody on the nests," he says. "Take them off, put them in coops without anything to make them a nest out of, and feed them mash, green feed and water for a few days. Don't starve them, as that throws them off laying. If you've got them early enough, it takes only a day or two to break up; all but the most persistent."

Sweet Cherries Often Harvested Too Early

By HENRY HARTMAN
Associate Professor of Pomology, Oregon Agricultural College, Corvallis

That premature harvesting is detrimental to both the dessert and canning quality of sweet cherries is indicated by an experiment conducted by the Oregon Agricultural Experimental Station in 1924.

Representative lots of Royal Ann and Lambert were gathered at intervals of two to four days. Altogether ten pickings of Royal Ann were made, the first on June 17 and final on July 12. Nine pickings of Lambert were made between June 24 and July 22. The fruit in each case was subjected to various tests with the aim of ascertaining the influence of time of picking not only on the dessert value but also on keeping and canning qualities.

Summary of Results—Since this work has been in progress but a single season, additional tests must be made to fully verify the results. The following tentative summary, however, seems justified at this time.

(1) Time of picking apparently has material bearing on the sugar content of sweet cherries. The juice of Royal Ann, for example, from the time of the first picking to that of the last, showed an increase in sugars from 12.1 per cent to 22.4 per cent, while that of Lambert showed an increase from 11.3 to 22.2 per cent. Not only was the increase rapid at the beginning of the period, but it continued at a rather uniform rate even to the time when the fruit was past its prime.

(2) Time of picking also has bearing upon the acid content of sweet cherries. A gradual reduction of the acid took place during the ripening period, Royal Ann showing a reduction from .64 to .55 per cent, and Lambert from .41 to .24 per cent.

(3) A rather marked increase in the size of the fruit occurred during the ripening period. Royal Ann during this time showed an increase in the average weight of the specimens of 30.2 per cent, while Lambert showed an increase of 36.2 per cent.

(4) All the fruit of the early pickings was sour and more or less bitter in taste when compared with that of the later pickings. That picked real late in the season was very sweet in taste but was slightly infested. By far the best quality for Royal Ann was attained with the fruit picked between June 30 and July 6, while the best Lambert quality developed with the fruit picked between July 14 and 19. The juice of both Royal Ann and Lambert became richer and more syrupy in nature as the season progressed.

(5) Observations of the fruit placed in storage gave no indication that sweet cherries over-ripened after picking. The reverse of this, in fact, appeared to be true. With the early picked fruit especially, acidity and bitterness seemed to become more pronounced with continued storage.

(6) Time of picking does not seem to affect materially the shipping quality of sweet cherries. Those picked when fully matured apparently held up as well as did those picked while comparatively immature. The cherries of the later picking did not shrivel so badly, and displayed less discoloration did to oxidase activity.

(7) A test of maturity based upon the specific gravity of the juice seems feasible at this time. A test of this character would not be difficult to apply under field conditions. The specific gravity of the juice can easily be determined by applying a Balling hydrometer to a small quantity of the raw juice. The work of several seasons, however, will be necessary before definite recommendations can be made concerning this test.

(8) Humidity and aeration have considerable influence upon loss of weight in sweet cherries after harvest. Low humidity and free circulation of air in storage are often responsible for excessive loss of weight.

(9) Fungous diseases such as brown rot, blue mold, and gray mold are common causes of decay in sweet cherries. The humidity of the air does not seem to be a limiting factor in the development of mold. In cases where skin injuries were present mold developed whether the relative humidity was high or low. The juices and moisture exuding from the fruit itself was sufficient for the germination of the spores and for the growth of the mycelium.

(10) Wide variations were noted in the syrup concentration of "cut-out" of cherries picked and canned at various times. Those of the later pickings invariably gave a higher syrup concentration than did the ones picked and canned early in the season. Royal Ann picked on June 17 and canned in 40 per cent gave a cut-out of 22.5 per cent, while the fruit of the same variety picked on July 8 and canned as above, gave a cut-out of 31.5 per cent. Obviously, the cherries of the later pickings require considerably less sugar in processing than those picked early.

(11) Cherries that were fully matured consistently gave a product that was firmer in texture than did the fruit that was more or less immature. As indicated by the pressure tester, the firmness of Royal Ann of the first picking canned in 40 per cent syrup was 83.1 grams while that of the last picking was 94.4 grams. This is a difference in firmness of 49.5 per cent in favor of the late picked fruit.

(12) Time of picking seems to have considerable influence upon the amount of shrinkage occurring during processing. Lambert picked and canned on July 4 showed a shrinkage of 17.1 per cent. Fruit of this variety picked and canned on July 11 showed a shrinkage of 14.0 per cent.

Quick—Someone Is Waiting for You!

When the telephone rings, courtesy and efficiency demand that it be promptly answered. To anyone waiting on the telephone, seconds are long. No person likes to be kept waiting. Why keep others waiting? Any call may be important. Why neglect any of them?

THE SUMMERLAND TELEPHONE CO., LTD.

while that picked and canned on July 20 showed a shrinkage of 9.8 per cent.

(13) A considerable difference in the quality and appearance of the canned product was evident between the lots picked and canned at various times. The early picked cherry, in general, yielded a product that was small in size, more or less flat in taste, soft in texture, and that displayed more or less shriveling. Those canned when fully matured gave a livelier appearance; were larger in size; firmer in texture; more aromatic and had a more pronounced cherry flavor. Those canned when past their

prime were of exceptionally good quality and texture, but, in the case of Royal Ann, showed a certain amount of discoloration or "leathering" that might be objectionable to the trade.

(14) There seems to be a definite correlation between the degree of maturity in Lambert cherries and the color of the syrup in the canned product. The color of the syrup in this variety varied from a light red with relatively immature fruit to a deep purple with the fruit that was thoroughly ripe. The syrup of Royal Ann was slightly richer in color in the case of the late picked fruit.

DOES A BETTER FRUIT WRAPPER PAY FOR ITS ADDITIONAL COST?

"CARO" Fibre was made as it is, as to appearance and character, at the request of the HIGH CLASS FRUIT RETAILERS and then chemically treated and identified by VIOLET Lines.

Think of this—
Over 10,000 carloads of fruit in Caro Fibre Wrappers in 1924. This "CARO" Fibre Wrapped Fruit was bought at an advanced price and sold by the HIGH CLASS FRUIT RETAILERS—Not the push-carts or peddlers.

And this—
These High Class Retailers recognize Orchardists using the "CARO" Fibre VIOLET Lined Wrapper as the BLUE BOOK of each district.

Local Happenings

The municipality will run a ditch along the south side of Granville Road to irrigate the poplar trees there.

Mrs. Ross arrived here Tuesday morning from Victoria, to spend a short time with Mrs. R. Johnston. She came in with Miss Bertha Johnston.

Miss Dorothy Thompson returned home Sunday morning from Vancouver where she has recently undergone two operations. She is greatly improved in health.

Mr. A. M. Leslie, C.P.R. agent here, and Mrs. Leslie left on Saturday for the Coast. Mr. Leslie is taking his annual vacation and during his absence Mr. Charles Foster is acting agent.

Sidewalks in the different parts of the municipality are due for some repair work and now that the rush of work in putting the irrigation system in shape is over they will soon receive the needed attention.

Through a misunderstanding over the phone the home of Mrs. Rand was given as the scene of the shower given by Mrs. Featherstonhaugh for Miss Nora Thompson, whereas it should have been the home of Mrs. W. E. Rines. The misunderstanding is regretted.

Lawn sprinklers and other water pipes on the farm are now being supplied from the farm tank. Up to a few days ago these had been fed from the water main running around Giant's Head. Taking off this load has materially improved the pressure in the Giant's Head main.

The high wind of last Thursday evening blew weeds, cones, etc., into the flumes and caused some trouble by the choking of screens. The big siphon across Garnett Valley became choked in this way and it was necessary to cut down the flow into the north main by about a half.

D. Kirstine is building a residence on his property in the upper part of Peach Orchard and has applied to the municipality for domestic water service. This lot is some distance from any domestic water main and the application was referred to the water committee for investigation.

Billy Gale, eight year old son of Mr. and Mrs. C. J. Gale, is making good recovery from his recent illness from infantile paralysis and it is hoped that he will carry no permanent effects of the disease. Unfortunately his sister has not yet regained the use of her legs and her arm.

Mr. Harvey Atkinson, now a resident of Victoria, was a visitor to Summerland this week. Mr. Atkinson owns an orchard property at the upper end of Peach Orchard. He came in by K.V.R. and made the return trip by way of Vernon and Kamloops, leaving here Wednesday morning.

Rev. H. J. Armitage returned last Friday from Victoria where he attended the annual Methodist conference. He will occupy the pulpit of the local church next Sunday for the last time in his pastorate here, after which he will move to Rossland to take up the pastorate of the Union church in that city.

H. Thornthwaite and W. White have applied to the municipality for permission to use a vacant lot just south of Victoria Cafe on Shaughnessy Avenue as a wood yard. The petition was read at the council meeting last Friday evening and after a brief discussion was referred to the public works committee.

Published lists of names of graduates of the Vancouver General Hospital contain the names of several young ladies, residents or former residents of this district, among them being Miss Betty Barnes, daughter of Mr. and Mrs. L. P. Barnes, Prairie Valley, Miss Kathleen Robinson, daughter of Mr. and Mrs. J. M. Robinson, Naramata, and Miss Marjorie Hatfield, daughter of B. L. Hatfield, formerly of Summerland, now of North Vancouver.

SUMMERLAND WEATHER REPORT

Below is a report furnished by the Dominion Experimental Station here for the week ending Tuesday:

Date	Max.	Min.	Rain	Snow	Sun
May 20—72	50	2.6
May 21—70	63	12.1
May 22—70	43	12.7
May 23—72	46	13.9
May 24—68	45	14.0
May 25—72	44	9.8
May 26—76	40	11.2

All interested in golf are requested to meet at the Parish Hall Thursday, June 4 at 8 p.m. L43

Mrs. R. H. English suffered a partial stroke last Friday from which she is now slowly recovering.

Summerland Odd Fellows attended a meeting of several lodges of the Valley at Kelowna last week.

A. G. Smith of the Kelowna school staff, spent the week end holiday here with his parents, Mr. and Mrs. J. O. Smith.

Miss Marion Beavis spent the week end holiday here with her parents. She is a member of the Kelowna school staff.

Summerland Masons were honored by a visit from District Deputy Grand Master Reeves of Enderby last Thursday evening.

Kelowna-Penticton boat service: Leaves Summerland for Penticton 11 a.m. and for Kelowna 2 p.m. daily, Sunday included. 34tf

Carleton Clay, who is in charge of the school at Blakeburn near Coalmont, enjoyed a week end vacation here with his mother.

J. Fyffe has applied for irrigation service for four acres on his pre-emption in district lot 2892. His application has been referred to the water committee.

Mr. F. W. Broddy spent Tuesday in Summerland, returning to Victoria on Wednesday morning. Mr. Broddy was formerly manager of the Dominion Bank here.

Rev. O. E. Mann arrived here last Friday to visit his daughter, Mrs. L. W. Rumball. Mr. Mann is now in charge of a mission station on the Queen Charlotte Islands.

Miss Bertha Johnston came home on Tuesday morning to spend her vacation. She has been training in the St. Joseph's Hospital, Victoria. She will be here about two weeks.

Mrs. W. R. Shields returned home this morning from the Coast, where she has been attending the Methodist conference and visiting her daughter, Mrs. Geo. Morrison, of Vancouver.

F. W. Hann, fire insurance inspector, and his wife were guests last Friday and again on Tuesday of Mr. and Mrs. G. J. Coulter White. Mr. White is local agent for Mr. Hann's firm.

Mr. and Mrs. Basil Steuart motored down from Vernon last Saturday and returned again on Monday afternoon. Mrs. Steuart brought her mother and a friend of her mother with her.

Mrs. Fraser left on Tuesday's train to visit relatives in Vancouver after which she will go to Winnipeg and other prairie points. Although 84 years of age she made the journey to the Coast alone.

Mrs. Raymond Corner of Kelowna and her sister, Miss Mae Bateman, of Vancouver, spent last week end here with their aunt, Mrs. Thos. Dale. Miss Bateman brought her little nephew, Colin Fox with her.

Several hundred feet of irrigation pipe is to be taken up and replaced with new in the section of the irrigation system east of C. E. McCutcheon's residence. This supplies the Inglis, Fisher and other near-by properties.

Mr. and Mrs. Carviak are away again camping. So delighted were they with their recent experience in camping they have decided to spend several weeks under canvas and have gone up to Clearwater Lake above the Hedley mines.

Dr. R. E. McKechnie, the well-known Vancouver surgeon, and Dr. Andrew performed two operations at the hospital here last Saturday. One case was that of Mrs. Harold Smith of Trout Creek and the other of Mrs. Grant Lang of Peachland. Both patients are doing well.

Jack Harris motored over from Princeton to spend the holiday at his home here. He brought with him three friends, Mr. Stockings, Mr. Proctor and Miss Iluston, the latter coming to visit Miss Norma French, whose home is in Princeton, and who is visiting her aunt, Mrs. G. N. Gartrell.

Many people attended the circus yesterday afternoon at Penticton. House breaking is reported to have been quite general in Penticton while citizens attended the circus. Apparently a gang of criminals are following up the circus for this purpose as the same experience is reported from Chilliwack.

The Holiday
 The King's birthday falls on a very inconvenient day for publishers of weekly papers. The editor and staff of The Review will appreciate any assistance advertisers and contributors will give in furnishing us with changes of advertising and other copy on Saturday or Monday.

CALIFORNIAN BUYS APPLE ORCHARD HERE

The ten-acre orchard property on Paradise Flat owned for a number of years by A. C. Mull, now of New Westminster, has been purchased by Thomas Bennett, of Oakland, California. The sale was made by P. E. Knowles. Mr. and Mrs. Bennett arrived here on Tuesday from Victoria and are now in possession of their new property.

Wedding

TINGLEY-NICHOLSON
 A very pretty wedding was solemnized at the home of Mr. and Mrs. V. J. Nicholson, on Monday, May 25, when their eldest daughter, Jennie Elizabeth was married to Mr. Bedford A. Tingley. Just at ten o'clock the bride and groom took their place beneath a large bell with only the immediate relatives in attendance. Rev. W. A. Alexander performed the ceremony. After the ceremony a delightful wedding breakfast was served. Afterwards the newly married couple left by motor for Portland and other points south.

The bride received many valuable and useful gifts, cut glass, silverware, linen and furniture. Upon their return Mr. and Mrs. Tingley will take up their residence here.

OBITUARY.

Elizabeth Alice Heaton
 Death came suddenly to Mrs. E. A. Heaton who has lived at Hotel Premier for more than a year. She was taken ill with heart trouble and went to her sister's home at Penticton, where she died. The funeral, which was a very large one, was held Wednesday morning at Penticton. The pallbearers, chosen by Mrs. Heaton before her death, were all from here: Roy Phinney, Ole Rignen, Clarence Brittainy, all of the Premier Hotel, W. Ramsay, Tom Washington and George Henry. The funeral service was conducted by Rev. Canon Thompson, Penticton. Quite a number of friends from here attended the service. She leaves one son, H. Heaton and one daughter, Mrs. J. R. Higginbotham, both of Vancouver.

Wendell Cline
 The sad news has been received here of the death of Wendell Galoway Cline, only son of Mr. and Mrs. A. E. Cline. Wendell, who was in his fifteenth year, moved from Summerland to Vancouver with his parents last year. He leaves to mourn his loss two sisters, Needa and Phyllis Cline, besides his parents. The funeral takes place this afternoon. Pneumonia was the cause of his death.

Thomas B. Lafferty
 The body of Thomas Brown Lafferty was interred in the Peach Orchard cemetery yesterday, the funeral service being conducted by Rev. H. J. Armitage. Mr. Lafferty was the Vancouver manager of the National Pole Company and died on Sunday following an attack of pneumonia. The remains were placed beside those of his wife who died in August 1922 at Paradise Ranch where she had been visiting, hoping to regain her health. At that time Mr. Lafferty was so impressed with the beauty of the location and surroundings of the local cemetery that he arranged for a burial plot here.

EFFECT OF WALL PAPER ON LIGHTING OF ROOMS

Few householders realize the effect that the color of a wall or of the wallpaper has on the lighting of a room, says Prof. L. J. Smith of the agricultural engineering department of the State College of Washington. One often enters a room in the evening and finds the room dark and gloomy, yet the lights in the room seem amply large for good illumination. Any wall color absorbs a certain amount of light; even a white wall does not reflect all the light back into the room, though it does so to a larger extent than any other color that can be used. The following table gives the percent of light absorbed by different colors and kinds of wood:
 White absorbs 30% of the light; chrome yellow 38%; orange 50%; clean pine wood 55%; yellow paper 60%; clean yellow paint 60%; light pink paper 64%; dirty pine wood

'DEAR BRUTUS' TRULY DELIGHTFUL COMEDY
 J. M. Barrie's Play Cleverly Rendered By Kelowna Company.

Barrie's quaint and mystic comedy, "Dear Brutus" played in Empire Hall Tuesday night was enjoyed to the fullest by a very appreciative audience. The play requires acting of a high order and Mr. and Mrs. Soames and their company did it full justice. Every member of the company was well fitted to his or her part and all showed marked artistic skill.

The wonderful scenery together with the lighting effect added much to the excellency of the work of the players. The view of the mystic wood was marvellous and truly a dream of beauty.

FAVORITE HYMNS AND THEIR WRITERS

"ABIDE WITH ME"
 Madame Clara Butt, one of the greatest of living vocalists, has said that almost invariably when she allows an audience to select an encore, they choose "Abide with Me." This may be partly due to the fact that it is so well-known that Madame Butt herself so dearly loves this great hymn, but it is also no doubt due in a considerable measure to the beauty of the hymn itself.

The writer of the hymn was Henry Francis Lyte, who was born near Kelso, Scotland, in 1793. He was left an orphan, and, as a child, suffered through poverty. In addition he was handicapped by a very delicate constitution, and lived all his life under the shadow of consumption.

Lyte entered the ministry of the Church of England, and in 1823 was appointed to Lower Brixham, a seaside Parish in Devonshire, where he toiled for twenty-four years, greatly beloved by the people. He was intensely interested in children and gathered a Sunday School of several hundred pupils around him. He also trained a splendid company of teachers for the school. He wrote many hymns, practically all for his congregation, and without much idea that so many of them would become widely known.

The circumstances under which the beautiful hymn, "Abide with Me" was written, are of peculiar interest. During the summer of 1847 the author became quite ill. He made arrangements to leave his parish, and seek a warmer climate for the winter months. Before departing he had a great longing to preach once again to his people. His friends protested that he was not strong enough, but he insisted on making the attempt. As he stood in his familiar pulpit for the last time he said: "Oh, brethren, I stand here among you today, as alive from the dead, if I may hope to impress it upon you, and induce you to prepare for that solemn hour which must come to all, by a timely acquaintance with the death of Christ." At the close of the service he administered the Holy Communion to his people. That evening he wrote what was destined to become his last and greatest hymn, and indeed one of the greatest hymns of all time: "Abide with Me." It is based on the scene recorded in Luke 24, and especially on the twenty-ninth verse: "Abide with us; for it is toward evening, and the day is far spent." The hymn has been generally sung as an evening hymn, but as Rev. Amos R. Wells points out, the evening poet thought of was the evening of life, which he realized was upon him.

Mr. Lyte lived for about two months after the hymn was written. In addition to his best known hymn he wrote a number of others, all being marked by singular beauty and depth of feeling. Among these are: "Praise, my soul, the King of Heaven," "Pleasant are Thy courts Above," and "God of mercy, God of grace."

Beaten with loaf sugar and lemon, the white of an egg relieves heaviness. Take a teaspoonful once every hour.

80%; dirty yellow paint 80%; emerald green paper 82%; dark brown paper 87%; vermilion paper 88%; blue-green paper 88%; cobalt-green paper 88%; deep chocolate paper 96%.
 Sometimes rough plastered walls are painted with dark colors of regular oil paint. These walls, of course, would absorb most of the light. Different absorption can, however, be prevented to quite an extent by varnishing over the dull painted surface. The shiny varnish acts as a reflector and helps throw back some of the light.

Put The Woodbox on Castors
 Putting the woodbox on castors is a simple change in kitchen arrangement, but it makes it easier to keep the kitchen clean and to manage the fire in the range. The woodbox can be easily rolled close to the range when the fire needs replenishing, then pushed out of the way when cooking is over.

When it can be rolled about rubbish and dirt will not gather behind and under it as it will with a stationary box which is too heavy to move. A rack may be added to the back on which to hang papers. They are then ready to start the fire, clean the stove, or put down when a messy job is in progress, such as picking a chicken, cleaning fish or polishing silver.

Card of Thanks
 Mr. and Mrs. R. Whitehead, Mrs. J. R. Higginbotham, and Mr. H. Heaton wish to thank all friends for the many kindnesses shown during their sad bereavement. 43

CHAMBERS AT GRAND FORKS

Speaks Before Co-operative Growers on Marketing Agreement.

Grand Forks.—At the annual meeting of the Grand Forks Co-operative Growers' Exchange, E. J. Chambers, president of the Associated Growers, gave a fine account of the association's work last year and outlined the policy of sales for this season.

His report of last season prices obtained by the growers was very encouraging as compared with the previous season. When compared in percentage returned to the grower over the whole deal it shows an increased return of 100% per box. This should show what strides have been made in firming the markets.

Mr. Chambers promised a good deal more information this season to the grower than has been given in the past. He says the O.K. Bulletin will be a fixture this season and will keep the producer in close touch with the working of the Central office.

The new marketing agreement entered into by the Associated was clearly explained. Mr. Chambers pointing out the difficulties confronting the association in a direct to the retailer scheme as at first proposed.

Under the present arrangement 95% of the prairie wholesalers have agreed to handle fruit only through the new Associated brokerage firm known as the Canadian Fruit Distributors. This does not mean that they will not handle any fruit from independent shippers. The marketing arrangement is open to all to sell through the Canadian Fruit Distributors. Most of the Okanagan independents have already entered the agreement. This will mean, according to Mr. Chambers, a much firmer market.

A committee has been established in the Okanagan to ration the domestic sales of fruit to all shippers equitably. This for the reason that in past years the Associated Growers have been taking more than their share of the poorer export markets. Under this arrangement the independent shippers agree to export the same proportion of their crop as does the Associated.

BENEFITS OF EGG GRADING

Egg grading in Canada has proved of great assistance for the export trade which now takes eggs in large quantities — 2,711,400 dozens in 1924—with the assurance that they are as represented. The value of grading to the home market and to the industry is equally great, leading to a gradually increasing consumption. In 1901 the Dominion's consumption per capita was about 15 dozens. In 1921 it had risen to 21 dozens, and last year to 26 dozens per head. The Canadian people are now approaching a consumption of an egg a day and when this is reached about 270 million dozens will be required to meet it.

The production of aluminium from bauxite ore was carried on in Canada during 1923 at Shawinigan Falls, Quebec. Ten other plants, all in Ontario, fabricated aluminium products. The value of the total output from these plants was \$7,017,830.

Experiment Station Has New Pressure Water System

Complete fire fighting apparatus, with practically unlimited supply of water, together with an independent domestic water and sprinkler system are recent additions to the equipment of the Dominion Experimental Station here. Up to a few weeks ago all pipe lines on the Farm were fed from the municipal domestic water main circling Giant's Head.

On the hillside west of the railway track there has been built a 25,000 gallon tank re-enforced against frost. This tank is fifty feet above the weir on the east side of the track and from which it is supplied. An automatic electrically operated pump keeps the supply in the upper tank at a constant level. When it is filled to a fixed point the power is automatically shut off and when the supply has lowered to a certain point the pump is automatically put into operation, that is, if there is a supply of water in the weir below. If wa-

ter is lacking there, the pump will not start. An eight inch main runs from the tank on the hillside to the office building. Fire hydrants are placed at convenient points to provide fire protection to all buildings. The fact that water can be thrown twenty feet above the boarding house with an inch nozzle shows that there is ample pressure for fire fighting purposes. From the eight inch main laterals run for domestic purposes and to provide water for the lawns and gardens. The big electric pump in Trout Creek canyon has been running almost constantly since the 15th of April, and augments the irrigation service from the Summerland municipal system.

Power costs one and a half cents k.w.h. and Superintendent Hunter says it costs six dollars per acre foot to lift the water from the canyon to the weir.

Community Revenue From Dairying Steadily Growing

Dairying is a branch of agriculture which is growing steadily, almost rapidly in the Summerland district.

A home cash market and the introduction of purebred stock is greatly encouraging the production of milk and cream. Quite recently arrangements were made for regular deliveries to the Penticton Purity Products plant of cream collected here. By them The Review is informed that the volume of cream being sent to the creamery is rapidly growing.

About \$700 will be paid to farmers in this vicinity for cream supplied the Products Company this month and before the summer season is over the creamery expects to be paying to Summerland farmers between \$1,500 and \$2,000 per month. This means a steady cash income for those farmers who have taken up dairying. The average price paid by the creamery throughout 1924 was thirty-six and a half cents per pound butter fat and as far as we can learn farmers are well satisfied with their returns and their business relations with the creamery. The factory's butter output last year averaged 3,000 pounds per month which is all consumed in the immediate vicinity. Three thousand pounds, however, is but a small percentage of the total consumption and there is room for a very large expansion before the creamery need go outside for a market.

WICKED TO DISTURB THE DEAD

It is wicked to dig up graves and disturb the dead.

It is almost as wicked to go into the place of a business firm that does not advertise in the home town paper — for that also is equivalent to disturbance of the dead.

Why wish to disturb the dead? There are plenty of live people in this old world without trying to resurrect those who have gone to rest, both spiritually and physically.

A non-advertising man is a dead one.

Some folks may tell you that this statement is prompted by selfishness on the part of publishers of newspapers.

That is not true.

You point out a firm of any kind — little or big — that goes on a non-advertising policy — and we will show you one that is dead in the shell every time. Its policies being wrong in this respect is pretty conclusive evidence that in time it will go down in failure. Not alone because of failure to advertise, but because of false standards and unsuccessful policies.

When a business firm is right in one great fundamental, it is generally correct in all of its policies — and that is what wins success. When it is wrong in one, it is usually found to be equally as far off in all others. We have yet to see this rule fail. There have been some apparent successes by disregard of this rule, but the rare exceptions only prove the rule. Sometimes unusual conditions prevail which sweep them along to success in spite of their policies. If you fall into a swift current you are sure to be carried down stream whether you can swim or not. But it takes a swimmer to go up stream in either still water or swift current. —Fornia Free Press.

NARAMATA NEWS

The regular meeting of the Unity Club was held on Friday afternoon, Mrs. J. M. Robinson presiding. Considerable business was transacted, and readings given by Mrs. Amaron and Mrs. Horswill.

Mrs. Colwell of Winnipeg was the guest of Mrs. A. C. Lyons for a few days, leaving on the Sicamous on Tuesday morning. Mrs. Colwell was interested in the district over twelve years ago, and held property in Summerland. She has been spending the winter in San Diego, and states she felt the cold more there than in the prairie city.

Rev. H. J. Armitage officiated at the afternoon service on Sunday, having recently returned from the Methodist convention at the Coast. Miss Alice Myers presided at the organ.

Mr. W. H. Irwin has been on the sick list for a few days, but is feeling better.

Mr. W. R. Bartlett was a visitor to Peachland on Monday.

Mr. Eastman and family left for Melfort, Sask., on Friday by automobile, intending to make the journey by road.

Mr. and Mrs. Partridge and daughters left on Saturday morning for an auto trip to prairie points and expect to be away a week or two.

Mr. and Mrs. E. J. Smith went up to Kelowna for the weekend, and returned on Monday evening.

Several parties from Naramata, drove down to Oliver on Monday to join in the Victoria Day doings in that neighborhood.

A large number of guests accepted the invitation of Mrs. Lyons to spend Monday afternoon in a lawn social at her residence.

THE BOY WAS RIGHT

Herman: "See that little speck out there on the horizon. That's a Scotch ship."

Healy: "Heavens man—you don't mean to tell me you know what flag she sails under from this distance. Why do you say it is a Scotch ship?"

Herman: "Well—there are no gulls following it."

Exports of agricultural and vegetable products from Canada during 1924 were valued at \$445,516,290, an increase of \$29,305,300 over 1923. Wood and paper exports ranked second last year with a total of \$225,389,780.

The production of zinc in Canada has steadily increased since pre-war time. The 1913 output was 2,800 tons. This was increased to 17,500 tons in 1918 and it is estimated that the 1924 production reached 49,000 tons.

Telling the World

—your message through advertising in newspapers is the accepted method today,—because it is so much more positive and effective.

There are certain forms that should be followed, however, because, "Just any kind of an ad" is not always read.

PICTURES, illustrations; the layout of an ad; the type selection; and the general arrangement of all add to the eye appeal and make the reader read.

If this were not so—why are you reading this message?

We have in our office a complete advertising service for our customers. Illustrations, layouts, and copy suggestions for every line of business. No matter what you have to sell—we can supply the advertising material to tell the message in the most effective manner.

Phone us—or Call.
