

FLOWER SHOW FINE SUCCESS

Gladioli Lead Amongst Many Flower Varieties Shown

ART LEAGUE SHOWS SPLENDID POTTERY

J. W. Jones, M.L.A., Commends Experimental Farm.

The Annual Flower Show, under the joint auspices of the Horticultural Society and the Women's Institute, was a fine event. Some sections had a small number of entries but, quality was good. Coming as the show does, in the fruit season's rush, it is quite a task to get a good variety of exhibits. A great deal of credit is due to those who had charge, in making the day the success it was.

Mrs. Knowles, as convener for the two societies, and Miss Cartwright as secretary for the occasion, had a very busy time of it, both ladies taking care of their responsibilities very creditably indeed.

Among the flowers the gladioli were in the lead, excellent in kinds and colors indeed. Fancy work and cooking, with art work and other exhibits, gave a variety in competition that was commendable.

Pottery Display

The Art League display had some beautiful pieces of local pottery. The glazing and coloring brought out many flattering comments. In basketry the bulb tray and pine needle work received much attention. The local scenery photographed by Mr. C. P. Nelson came in for approval, especially one from Anarchist Mountain and another of Sand Dried Flowers, sent in by Mrs. Pares, was considered quite an achievement, retaining as they did the petals' true shape and natural colors, red, blue and white. The new department of weaving, added last year, had several pieces of beautiful work.

The horticultural section had many fine entries. Mr. S. Hamilton of Vernon, a professional dahlia grower, made a fine display of cut blooms (not entered) of named varieties, and although bringing them such a distance they made a great impression. One that he is perfecting but has not ready for the market, he proposes to call the Okanagan. He is still working to get the finer centre petals thoroughly fixed.

Mr. Powell, who gave the show, so many fine entries, was the only one to compete for the Jones cup. It was regretted that there were not more entries. The season had a good deal to do with this, no doubt. The local fanciers are learning new tricks as a result of the Horticultural Society's work, and next year will be able to hold back their blooms for the show.

In the fancy work there were some beautiful pieces entered. Among them was one outstanding piece of work by Mrs. E. W. Cope, a large knitted and crocheted bedspread, that received much attention.

Some Fine Butter

Dairy exhibits had some good entries. In the pint of cream the judge, commenting on the cleanliness of the entries, remarked that this was the point in dairy products. Mrs. Sharp's butter called forth some very high praise from the judge, nicely worked for dairy butter, the prime presenting an unusually fine appearance.

The second prize prints he marked well up on its fine flavor.

Mr. W. H. E. Welsh had an excellent display of honey. The three combs were nice, even sections, well filled and colored, in attractive frames. His cartons and labels received much praise.

The boys of the manual training at the schools aided Mr. Poltham in putting on a fine display of their work. It leaned markedly towards furniture construction and some fine specimens were shown. A dinner wagon and a tray stand, a dinner wagon and a tray stand, attracted much attention from those present. The boys' work as a whole showed considerable industry and planning.

Station Display

The Experimental Station had a splendid display. The names on the various flowers gave an opportunity made use of by many, to plan next year's plantings. Four tuberous begonias in bloom were from seed started in March, and were beautiful, in foliage and flower. A yellow plant for borders, Sanctaloi Procumbens, was a beauty, and is easy on water. For window boxes they showed several beautiful groupings. Their collection of preserved grasses and flowers for winter decoration was fine indeed. Their whole display was an education in itself.

Next to their exhibit, Mr. Palmer had a most beautiful collection, admirably displayed, of gladioli, not competing. The fine shades of colors and rich blooms were very much admired. The exhibit required a great deal of effort to arrange and the words of praise were well merited. Mr. Smith of Prairie Valley had a wonderful bowl of eleven spikes of pink gladioli, very much admired.

The basket display of flowers was very tastefully arranged and many dainty exhibits were entered in this competition.

The fruit display was light, and but few. Messrs. Walters Ltd. would have been very small. The quality was good and went to quite an extent in variety. The crates of tomatoes were much spoken of.

Cooking Section

The cookery section was well upheld. The keenest competition was in bread and pie. The preserving fruit was not as well supported as might be expected, but the entries were of good quality.

The crystallized fruit displayed was very tempting to more than the young stars, and there was quite a variety for this time of the year.

Pioneer Fruit Growers of Summerland Recall Early Days In Southern Okanagan Valley

Among the prominent "old-timers" shown in the photograph are J. M. Robinson, now of Naramata, founder of the town of Summerland, fifth from the left in the back row. Fifth from the right in the back row is R. H. English, newly-elected president of the Old-timers' Association. Granville Morgan, eleventh from the left in the back row. K. S. Hogg, sixth from left in the back row. Jack Logie, first on the left in the second row. The late J. R. Brown, second on the right in the second row. H. C. Mellor, fifth from the right in the second row, and Syd. Sharp, first on the right in the first row.

SUMMERLAND PICNIC OF TWENTY YEARS AGO.

CONTRACTORS LOSE TRAIL TO CANYON CREEK DAM

Wander About For Lengthy Period—Had to Sleep Out in the Open Without Blankets—Finally Arrive on Wrong Side of Lake—Next Time Will Take Local Man For Guide, it is Surmised.

The contractors on the Canyon Creek dam have, they feel, earned a large part of their money already. They started for the site with a local man to guide them, and the trail was lost. After much wandering about, they finally resorted to their own tactics and made use of their compasses, finally landing at the lake, but on the wrong side. They had to sleep out in the open without any blankets, and one of them said they felt as if they had wandered half way to Revelstoke. "Some other statements they made were not, about the weather."

GROWERS' SECRETARY FOR SUMMERLAND

W. M. DRYDEN

For the past fifteen years occupying the position of municipal clerk of Peachland, in addition to assuming other important duties in the municipality, Mr. Dryden has now been appointed secretary-treasurer of the fruit union at Summerland, affiliated with the Associated Growers.

Mr. and Mrs. Dryden are well known in the Okanagan, where they have taken a prominent part in the community life for many years. Mr. Dryden was born in Edinburgh and came to Canada twenty years ago, having resided for practically that entire length of time in Peachland, where he succeeded the late Hugh McDougall as municipal clerk, assessor and collector in 1911.

When the co-operative fruit union was formed in 1918 he became secretary-treasurer and for the past two years he has been the Peachland-Westbank director on the board of the Associated Growers and Canadian Fruit Distributors. In 1920 he was appointed to the position of secretary-treasurer and collector for the Peachland Irrigation District.

Mrs. Dryden is head of the Peachland school board, the Women's Institute and the ladies' branch of the local Orange lodge. Mr. and Mrs. Dryden, after a holiday trip to the coast, are now taking up residence at Summerland.

POPULAR YOUNG LADY SHOWERED

A shower for Miss Marion Beavis, under the direction of Mrs. Sharp and Mrs. Smith, was held Thursday, Aug. 29th, at the home of the former.

The decorations for the occasion were tastefully arranged, with a generous use of sweet peas and carnations.

A bride and groom (Ruby Sharp and Janet Craig) brought in the guests' gifts on a prettily decorated wagon. After recovering from the complete surprise the bride and groom graciously thanked the ladies present. A very dainty tea was served at the close of the occasion.

The M.S. "Pentown", announces J. A. Greenhill, will commence her full schedule to Portion starting Monday next.

Some people are wondering where they are going to spend their holidays and others are wondering where they will get the money to have any at all. —Fergus News-Record.

CONTRACT IS AWARDED FOR CANYON CREEK DAM STORAGE

Messrs. Harrison and Lamond must Complete Work by October 15th—May be Changes in Municipal Act to Allow Council to Take Care of Such Menaces as the Codling Moth in Future—Convention in Vernon Soon.

At the meeting of the council July 30th, Councillors Smith, Bristow, Arkel and Ritchie were present, with Councillor Ritchie acting reeve, in the chair. Much of the meeting was given over to the attention of a long list of merely routine matters. A communication was read from the district of Glenmore, near Kelowna, that stated they intended to bring to the meeting of the convention of B. C. Municipalities a resolution to have the Municipal Act changed so as to make it easier for municipalities to take care of such menaces as the Codling Moth, which they feel is now quite serious. They asked for support of their measure.

This, it was felt, required more consideration, for if the municipalities were to assume the obligation they could expect little help from the province and it was considered doubtful if the municipalities could or would act with any more efficiency than the provincial officers.

Young Lad Falls From Apple Tree

Willie Borton, when climbing in an apple tree, missed his hold among the branches and tumbled to the ground. On the way he bumped against branches and landed on a flume that ran beneath the tree.

As well as many cuts and bruises he sustained two broken ribs, but is getting along as well as can be expected.

ASSAULT CASE POLICE COURT

Dispute Arises Between Ditchman and Local Grower.

The routine matters in the magistrate's office on Monday gave place to the hearing of a case of assault, when R. Shannon came before the court charged with assault, July 28th, by H. Dunsdon, ditchman in Garnett Valley.

The wording of the charge gave a different turn to the affair than was expected by those who knew of it. They expected it would be a prosecution by the municipality in defence of its ditchman.

Mr. Kelley appeared for plaintiff. The defendant pleaded guilty, but in order to determine the extent of the fine the prosecution called Dr. Andrew as a witness. He stated he had been called to Mr. Dunsdon's on the 30th, went over the details of the case and concluded with a statement that there should be a week's rest given to Mr. Dunsdon.

Mr. Dunsdon, when called on for a statement to supplement what had previously been given under oath to the magistrate, stated he was sitting by the measuring box making notes as to the water levels of the last two boxes he had passed, and claimed words had passed between Shannon and himself and reference made to former differences of opinion that had occurred. Strong language was used while he, Dunsdon, had used no more force than was necessary to defend himself.

Mr. Shannon was then called. He said little, but took exception to a few of the statements just made by Mr. Dunsdon.

The magistrate, in summing up, said it was one of those cases which assume more than ordinary proportions with the public. It was an assault on an officer of the municipality who was performing the duties of his office.

MISS JONES SUBMITS HER RESIGNATION

Is Taking Position in Line of Work She Specialized In.

PUPILS MUST NOT TROUBLE DRIVERS

School Board Awards Contracts For Student Conveyances.

The regular meeting of the school board was held August 4. The items of business, while not many, were of considerable importance, and were enough of a problem to make some of the members feel it would be nicer not to be a school trustee.

Tenders for the Central school rig were opened.

Route No. 1, Trout Creek, was awarded to White & Thornthwaite at \$4.00. This is an increase over last year because of the increase in the number of pupils. Two other awards were at lower figures, however.

Route No. 2, Garnett Valley, again went to Smith & Henry at \$3.00. Three tenders competing on this route also.

Route No. 3, Summerland, town rig, two competing, and was awarded A. E. Smith at \$3.70.

Route No. 4, Prairie Valley, three close competition was awarded to Smith & Henry at \$2.50.

Route No. 5, Paradise Flat, two tenders, went to the same man as last year, Mr. Dunham, at \$3.30.

Route No. 6, Garnett Valley, three competing, went to A. E. Smith at \$2.30.

Enforce Discipline

This year any pupil who gives the drivers trouble will be forbidden the privilege of the conveyance till driver and the board are both given satisfactory evidence that the pupil intends to behave. The board is quite determined this year to enforce this rule and the actions of some of the disorderly ones were thoroughly discussed. The board feels that the drivers are worthy of full support in this matter.

The results of the high school exams were submitted and after going into the report the board passed upon it as quite satisfactory and above the average of the whole province.

Goutre is Decreased

The medical health officer for the Central School submitted a report that showed some interesting items. Two hundred and eighty-two pupils are on the roll; of these 270 were examined. Where malnutrition had appeared there was a marked improvement. The number of pupils having adenoids dropped from 65 to 45, and the prevalence of goutre having dropped from 115 to 34 called forth quite appreciative remarks on the use of the present method of treatment.

A committee was appointed to look after some necessary repairs and to have some calculating done before the opening of the schools; among others in the repair list was the damage done by a very industrious woodpecker that had put many holes in the main door frame of the Central school.

Submit Resignation

Miss Jones tendered her resignation and at such a late hour it was a severe jolt to the board. They feel high and dry, so to speak, as a result, and discussed at quite a length the problem thus presented. They finally had to send for the principal to help in the solution and arranged for a special meeting of the board to finally settle what could be done in the matter. The work of Miss Jones this term. They felt, had been very satisfactory, and the words of approval were quite generous, but the problem presented is a difficult one. Miss Jones is taking a position in the line in which she has specialized, which had been opened for the first time, in this province.

NO DISEASED CATTLE HERE

Inspector Remarks Upon Mr. Mountford's Fine Bull.

The breeders of Jerseys in Peach Valley asked the provincial government to send them an inspector to go over the Jerseys of the district and inspect them from the standpoint of health.

Dr. W. W. Alton of Vancouver was sent in and has completed the work, returning to the coast, having inspected over 30 head of pure bred Jerseys during his stay.

There was no trace of tuberculosis found among any of the cattle tested, which is very gratifying indeed. He was quite pleased and surprised to find such fine specimens of the breed here in Summerland, remarking that the bull Mr. Mountford has is an especially fine animal. He was quite evidently enjoying his stay with the farmers here, and would welcome an excuse for a return at a future date.

Mr. Arthur Joy is the possessor of a very fine Jersey cow. During the year she produced 846 pounds of milk with 84 pounds of butter fat—a very good showing. The average test was 5.2. The name of the cow is Valley Home Norlane, No. 24252.

MISS MARION BEAVIS IS TENDERED SHOWER

Miss Marion Beavis was the recipient of many beautiful and useful gifts at a miscellaneous shower given at the home of Mr. and Mrs. W. H. Shields, Monday evening.

Little Miss Marguerite Bohan, sweet dressed as a bride, entered the room wearing a decorated car, filled with presents.

The remainder of the evening was spent in games and music and the serving of refreshments brought the pleasant evening to a close.

WILLIAM HUNT BRUTALLY MURDERED WHEN AROUSED FROM SLEEP BY ROBBER

Shocking Tragedy Disclosed at Hobo Camp Near K.V.R. Roundhouse—Victim Thought to Have Been Shot When He Lifted His Head When Wakened—Pockets Rifled.

MURDERER, THOUGHT ANOTHER TRANSIENT, HAS VANISHED INTO THIN AIR

No Clues Were Left For Police to Trace, Although Murderer Dropped Coins in His Flight—Hunt Had Been Fire-Fighting Here For Two Seasons.

Although the Penticton police are exerting every effort and tracing every rumor, no clue has yet been brought to light which sheds any light upon the identity of the murderer of William Hunt, middle-aged hobo, who was found with a bullet through his head and life totally extinct, in the "hobo" camp near the Kettle Valley roundhouse.

Hunt, a man nearing sixty years of age, with gray hair, had apparently been shot in cold blood as he lifted his head when aroused from sleep by his assailant. When he was found the blanket in which he had been sleeping still covered the lower portion of his body.

The murder is one of the few to have ever happened in Penticton and the most cowardly to have ever occurred in the district. Nothing but brutality could have prompted the murder of the man, when the assailant, whose object, it is believed, was robbery, could easily have adopted the milder method of knocking his victim senseless with the butt of his gun.

Shot Through Head.

As it was, Hunt was shot through the head with a powerful gun, the bullet creating a gaping wound, cracking the skull in several places and bespattering the surrounding ground.

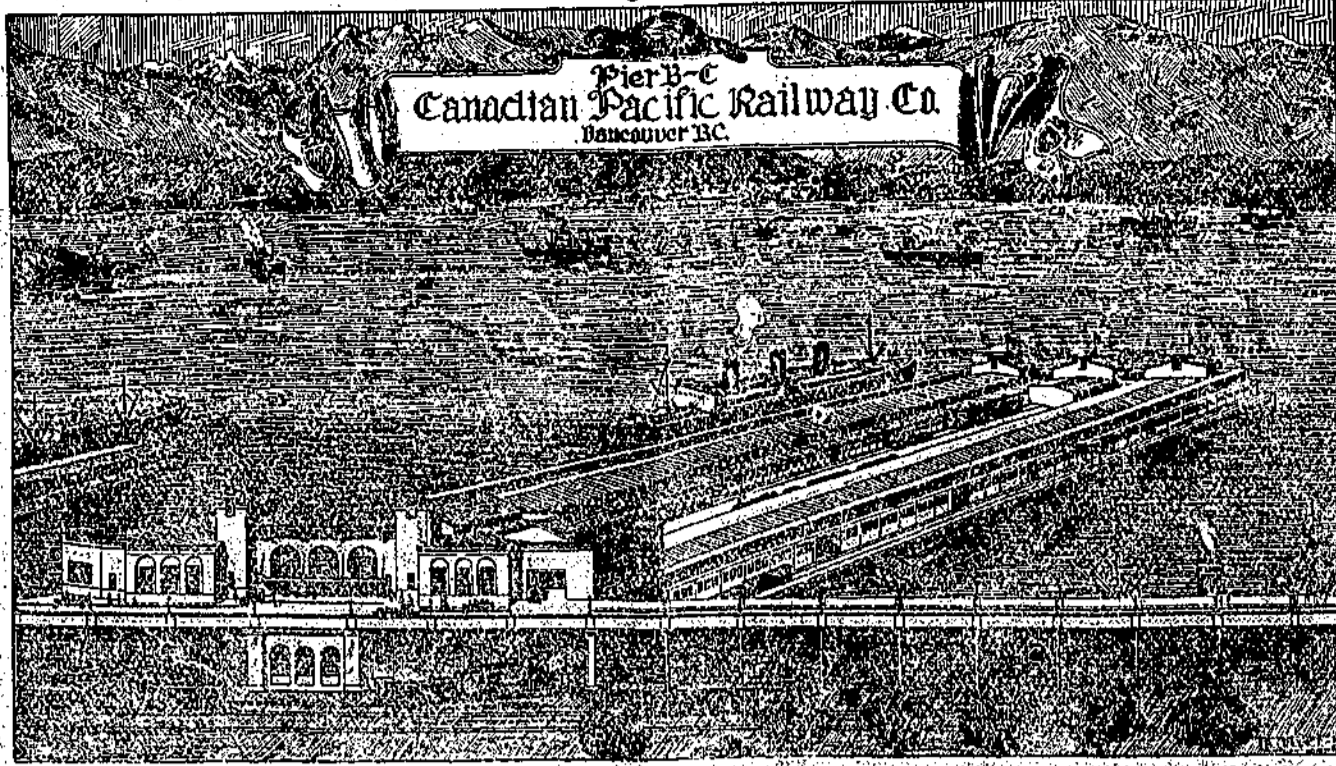

The murderer must have acted hastily. Hunt's pockets were, apparently hurriedly rifled and the remains of \$23 received from the local forestry department for fire-fighting in the district extracted, with the exception of an over-looked twenty-five cent piece. In his hurry the murderer dropped several coins as he fled over a knoll some yards away.

Left No Clue.

From there on he seems to have vanished into midair as far as any clues to his identity are concerned. It is said that a murderer always makes a mistake, but in this instance none of the proverbial clues which would delight the soul of a Sherlock Holmes are observable. The fact that the murderer is undoubtedly a transient, as was his victim, likewise (Continued on Page Three)

Vancouver, Aug. 5.—One man is dead, another is suffering from a probable fractured skull, and a third man received severe injuries to his head and shoulder as a result of an auto in which they were riding buckling and overturning on the Georgia St. viaduct shortly after 11 o'clock Wednesday night.

Fine New C.P.R. Pier for Vancouver

Growth of the port of Vancouver to proportions that put it on a level with the major harbors of the world is indicated by the opening in August and September of the new Canadian Pacific Railway pier. The pier sheds are 109 feet wide and lie on either side of a central depressed track area containing four tracks. A two-storey headhouse the full width of the pier is located at the shore end and this provides storage space and driveways into the sheds while the upper floor has passenger handling facilities, baggage room and office and store rooms for the company's steamship services.

Two railway tracks and one travelling gantry crane will run along the deck outside of the sheds on each side of the pier. Four depressed tracks will be located on the fill in the centre of the pier for the handling of freight to and from the sheds. Continuous sliding doors will be installed on both sides of the sheds so that freight may be taken directly through the sheds from ships' slings to cars. The columns supporting the roof on the inboard side of the shed have been set back 12 feet from the line of these doors to avoid the necessity of closely spotting cars.

Eight marine elevators will be installed on the pier—three on each side and two on the outboard end. These elevators will be of what is known on the Pacific Coast as the "Barlow" type, being so constructed that when the elevator is lowered an apron will project out into the sideport of a ship lying alongside, thus enabling freight to be moved directly from the ship to the dock by means of trucks. Most of the coastwise boats load and unload from their side ports, while the ocean-going steamers of the Canadian Pacific Railway Company, with the exception of the "Empress of Australia," use side ports for the loading and unloading of silk and of baggage.

The deck above these Barlow elevators will be constructed of a steel bridge, which will carry two railway tracks and one crane rail. Mechanisms will be provided so that these bridges may be hoisted vertically a distance of 15 feet thus clearing the elevator shafts for the operation of the elevator.

Two ten-ton baggage elevators connecting the main deck with the baggage room on the upper deck of the headhouse will be installed. On the viaduct there will also be installed one twenty-ton team elevator with a platform approximately 12 by 35 feet.

CAR WINNERS NOW HAPPY

Attempt of Stepfather to Secure Part of Prize Unavailing.

Miss Ruby Ford and James Ford are in possession of the Chrysler automobile which they won in the drawing at the Elks' Carnival on Thursday evening last. Miss Ford held the winning ticket, number 1059, but James had contributed 50 cents towards its purchase.

The Elks, of course, turned the car over to the winners, but an attempt was made by the step-father of the youngsters, who resides at Naramata, to obtain the car, or a portion of the money resulting from its sale. This attempt was, happily, unsuccessful, the young people, although under age, earning their own living. They are endeavoring to dispose of the car at a generous reduction in price, offering it for \$1500.

MOTORISTS TURNED BACK AS RAGING BUSH BLAZES SPREAD ON NELSON-SPOKANE HIGHWAY

Fires So Hot on Wednesday Afternoon That Great Northern Train Forced to Wait For Three Hours For Fires to Cool and Tracks Cleared.

Nelson, B.C., Aug. 5.—Motorists leaving Nelson for points south on Nelson-Spokane highway, were Wednesday turned back at Porto Rico by raging bush fires which are now spread along the road from Apex to within three miles of Salmo.

So hot was the fire late Wednesday afternoon that the incoming Great Northern passenger train was forced to wait for three hours at Salmo to allow the fire to cool down and give time to clear the tracks of fallen burning timbers.

Borden's ST. CHARLES EVAPORATED MILK

More milk means better health. Have it handy and use it in cooking.

Use it wherever the recipe calls for milk.

COLDSTREAM GUARDS' BAND IN PENTICTON ON THURSDAY NEXT

Arrangements Completed For Visit of Famous Musical Organization There — Performance at Recreation Grounds in Afternoon and Arena in Evening — Block of Nanaimo Avenue Closed to Cars.

Arrangements are being completed by the municipal authorities for the appearance of the famous Coldstream Guards Band, which comes to Penticton on Thursday next.

As advertised, the afternoon performance will take place at the Recreation Grounds, and in the evening in the Arena, next The Herald office.

Nanaimo Avenue, from Martin Street to Winnipeg Street, has been closed as a parking area for the evening, owing to the fact that should there be a fire the presence of cars would block outlets for the fire department. Autos will be admitted to the recreation grounds in the afternoon without charge.

Hazel Bendel claims that a suit or gown may often be transformed by some small accessory. For instance this homespun suit has a charming scarf of its own.

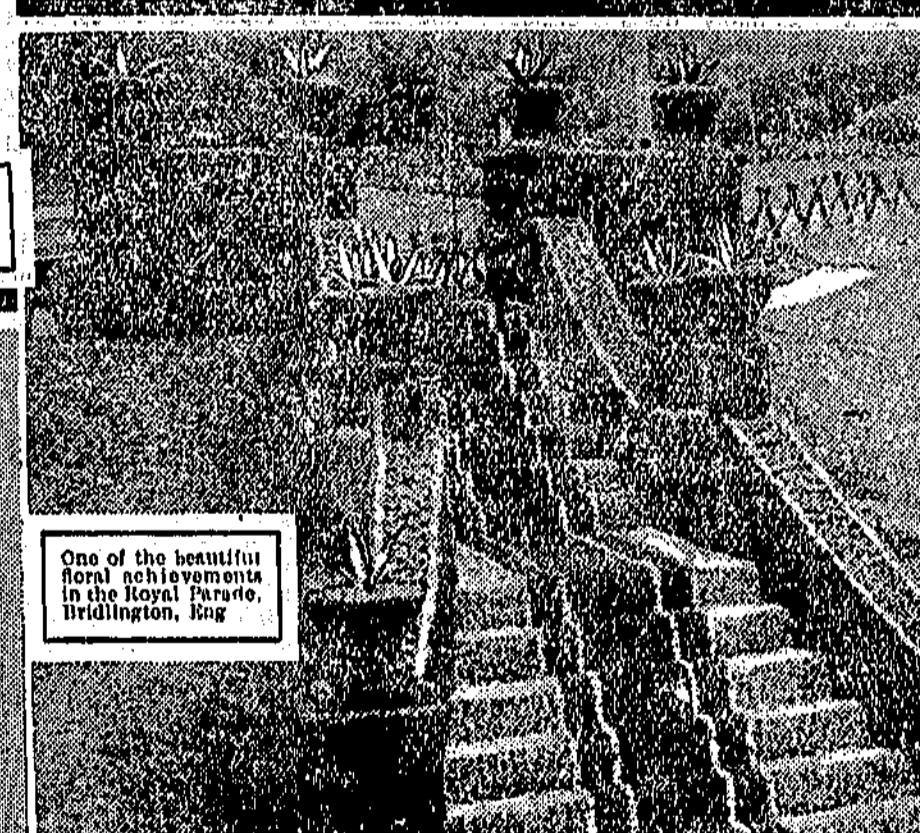

New styles for the Spring of 1926. The party frock.

Showing the famous "All Blacks" Rugby team shortly after the arrival of their Canadian Pacific train at Toronto.

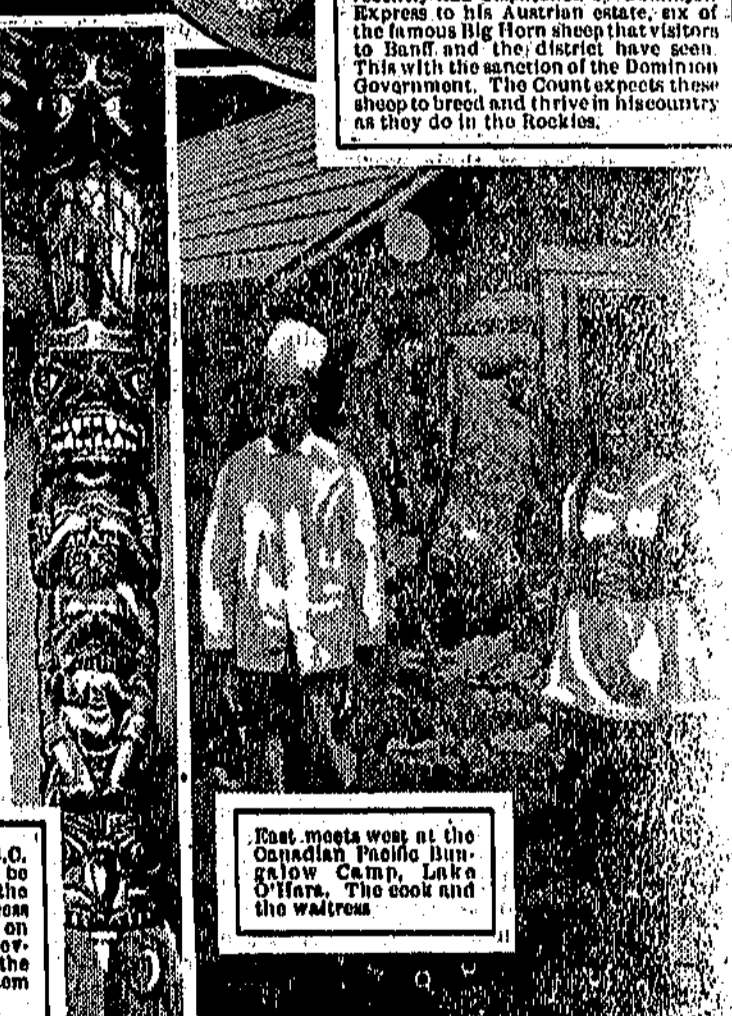

Count Hohenlo, an Austrian nobleman, who has travelled in the Rockies, recently had dispatched by Dominion Express to his Austrian estate, six of the famous Big Horn sheep that visitors to Banff and the district have seen. This with the sanction of the Dominion Government. The Count expects these sheep to breed and thrive in his country as they do in the Rockies.

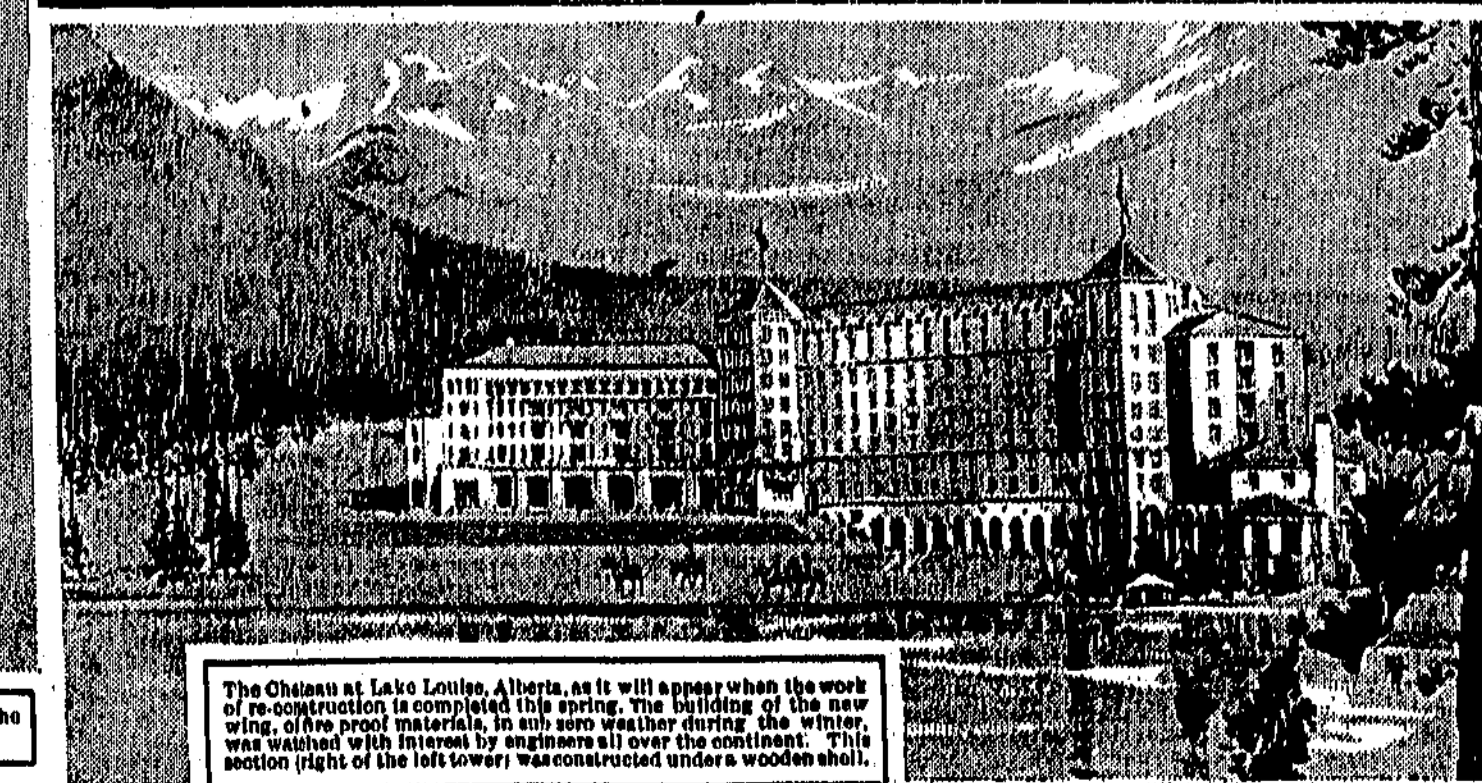

One of the beautiful floral achievements in the Royal Parade, Wellington, Eng.

The smoke-room of the Canadian Pacific B.O. Coastal Steamer "Princess Kathleen" said to be the most luxurious and up to date vessel on the Pacific. With a motor vessel the "Princess Marguerite" the "Kathleen" is to be placed on the Vancouver, Victoria and Seattle run, relieving two ships now operating for service on the trans-Pacific Alaska Route. The toilet polo features the general decorative scheme.

Fast meals was at the Canadian Pacific B.O. Coastal Steamer "Princess Kathleen". The cook and the waitress.

The Chateau at Lake Louise, Alberta, as it will appear when the work of re-construction is completed this spring. The building of the new wing, of five proof materials, in sub-zero weather, the winter was watched with interest by engineers all over the continent. This section (right of the left tower) was constructed under a wooden shell.

All Glasgow was interested in the arrival of the Canadian Pacific B.O. Coastal Steamer "Princess Kathleen" in the harbor of Banff, Alberta, in the interest of the Company's Colonization department.

THE SUMMERLAND REVIEW

Established August, 1908 (Published at Summerland, B. C.)

Member of Canada Weekly Newspapers' Association Member of British Columbia Selected Weeklies

SUBSCRIPTION RATES

\$2.50 per year by mail in Canada; \$3.00 by mail outside of the Dominion—All in advance.

HEAR THE BAND.

Residents of Summerland should take advantage of the opportunity afforded to hear the most famous military band in the world, which will play in both Penticton and Kelowna. The Coldstream Guards Band have an enviable reputation, and those in attendance at the concerts are assured of a musical treat which they will recall with pleasure for a long time to come.

TIME TO EAT

The doctor attending Mrs. Russell Scott on her starvation exhibition in Detroit has told her she better quit it and get something to eat. Mrs. Scott has been at it 20 days, starving in a glass cage to get money to fight for her husband, who is a convicted murderer.

A TIME FOR CARE.

A three-year-old lad is dead in Toronto from having stepped on a rusty nail. A week ago a lad of six in the same city died from the effects of a piece of recently-trimmed shrubbery running into his leg.

ABOUT BEACH BATHING.

The magazine of the American Medical Association cautions bathers to beware. Ocean water being from 80 to 40 degrees colder than the blood, causes a sudden shock to the whole system. Don't wade, but dive or duck. For the wader's underwater veins contract, causing cramps, and the blood rushes headward, dizzying the brain.

EDITORIAL NOTES

Regina bonded warehouse should have in it 80,085 gallons of liquor, but an inventory showed only 22,025 gallons. Either the law of evaporation or thirst has been in operation.

Jack Dempsey is going into the real estate business in New York. Imagine the business he'll do when he gets his customers backed into a corner.

In San Antonio, Texas, there was a ball game played and the score turned in was 129 to 119. On the way out they took up a collection to buy another hook and a new pencil for the scorekeeper.

World of Politics

(By an Ex-Writer of the Ottawa Press Gallery.)

There are many points of resemblance in the present Dominion campaign and the election of October last, and the most outstanding is the heat generated at an early date in both contests. Probably there has been more fiery invective and personal abuse in the present contest than in that of 1925 at the same stage.

DUNCAN READERS PUBLIC SERVICE

The thanks of all decent minded people are due to Inspector Duncan of Customs inquiry fame, for having come out with a statement clearing up the mystery relating to certain alleged details that were supposed to be "not fit for publication".

BOTH POLITICAL LEADERS COMING WEST

The itineraries of Premier Meighen and Mr. King, as far as arranged, indicate that the two leaders will spend the first half of the six weeks to be devoted to the campaign in the west, returning east for the final stages.

FARM NEWSPAPER SCORES PROGRESSIVES

The week following the grand political smash at Ottawa the writer made some comment on the tactics pursued by the Progressives which made them primarily responsible for the loss of the several bills of extreme importance to the prairie provinces, which were ready for vice-regal approval.

SECTIONALISM ACROSS THE BORDER

If some of the politicians and newspapermen have their way we will hear a lot during the election of the hostility of the east to the west, and vice versa. One Vancouver Liberal newspaper has been the loudest in its denunciation of the Conservative party.

WILLIAM HUNT BRUTALLY MURDERED

(Continued from Page 2)

provides the police with a minimum of local associations through which he might be traced. Who Was Hunt? Hunt, himself, was a hobo, although he had raised money through fighting fires in the Penticton area for the past two seasons.

On the other hand, M. G. Hunt, Collingwood street, Vancouver, yesterday telephoned the local police, on the possibility that the murdered man might be his brother, who has been missing for ten years.

Chief Davies states to The Herald that efforts are being continued, although the task is a difficult one. A thorough search of the scene of the crime resulted in no clue, no success having been met with as yet in finding the bullet, although the ground in the vicinity was torn up in the search for some distance.

Person Unknown The inquest held on Monday afternoon at Howson's undertaking parlors, was productive of nothing further towards the solution of the mystery surrounding the death.

After carefully reviewing the evidence of the various witnesses, the

jury reported "We find that the deceased man, William Hunt, met with death at the hands of some person or persons unknown." The jury was composed of W. G. Wilkins, foreman; H. Hughes, F. Foreman, J. McLennan, T. E. Nish and J. J. Berry.

The first witness called was John Cusick of Montreal. He stated that he had worked on the Gillis Creek fire recently with the deceased. Cusick identified the body as that of the man he had worked with at the fire, but did not know his name.

On Saturday afternoon at 3 o'clock, he had been walking along the embankment at the Okanagan river, south of the roundhouse, and on looking down into a gully saw some blankets. Believing that the blankets had been left by some camper, he approached closer and saw that the blankets were pulled up to about the knees, over what he believed to be a sleeping man.

On looking again, however, he saw that the white hair at the back of the head was matted with blood. He at once called Donald Livingstone and another man, who were also camping in the "jungles," who viewed the body and then decided to call the police.

Cusick stated that the body was at the bottom of a gully, lying nearly flat on the back, but with the shoulders and head turned away from the river side.

He testified that quite a few men were camped around the spot, he himself, with Livingstone, being about 150 yards away. On Saturday he had risen early, and after a trip to the Brunswick store on Hastings street, had done some washing. At the time of the discovery he was on his way over to the yards to see if a train was being made up.

Skull Was Cracked The next witness, Dr. McGregor, testified as to an autopsy he had performed on Monday morning before the inquest.

Over the right eyebrow of Hunt there was a perforating wound such as is made by a swiftly-travelling missile. The skull was cracked under the wound. The right eye was badly destroyed, and on following in he found a hole large enough to admit the third finger of his hand at the back of the orbit.

Death, he stated, was practically instantaneous, and had taken place within three days from the time the autopsy was performed. There were no signs of burns to show that the shot had been fired from close. The nature of the wound was sufficient to cause death. The bullet or missile was evidently of high power. The deceased appeared to be healthy and well nourished and was close to 60 years of age.

Donald Livingstone, the next witness, stated that he had also worked with the deceased on the fire and was known as "the

when Hunt came in. Had camped with Cusick since and was sitting on the pling along the river when told by Cusick of the discovery of the body. He corroborated the testimony of Cusick as to the position of the body. He had walked to town after viewing the body and notified the police.

Chief of Police Arthur Davies was the last witness. He stated that about 4 p.m. on Saturday Livingstone had come to the office and notified him that a body had been found. After being shown the position of the body he had examined and found the wound at the back of the head described by Dr. McGregor, and a slight clot of blood over the eyebrow.

He examined the vegetation surrounding the body and discovered fine spatters of blood for a distance of about a yard around the head and all low down, proving that Hunt had been shot while lying down.

Silver Found. At the top of the gully about ten feet from the body was an American silver dollar, part way down was a 5c piece and nearer were five coppers. The left hand trouser pocket was turned inside out, but had twenty-five cents stuck in it. There were no traces of any weapon and he had believed the crime done with a club or some such weapon. There were no evidences of a struggle or that the body had been moved. It was impossible to distinguish any particular footprint on the gravel and the ground on the path was considerably trampled up.

The gully was described as a bowl-shaped depression about six feet deep and ten feet across. Mr. Gilley, the employment agent and the forestry official had known the deceased as William Hunt. He had been paid \$23 in forestry money on Thursday or Friday. There was no correspondence found or anything by which to trace the murdered man. He had been of a silent type and conversed little with the other campers. The chief stated that no one had heard a shot, probably because of the noise in the railway yards.

The jury brought in their verdict after about five minutes of deliberations.

CORRESPONDENCE

THE AUSTRALIAN EMBARGO

Editor Summerland Review:

Dear Sir:—Your article in Australian embargo against Canadian fruit makes very forgettable reading, especially so because we must depend more and more every year on our export trade. If Australia takes this stand against our fruit because of fire blight, there is nothing to stop other countries to which we export from doing the same.

The government will take no action towards eradicating this disease, neither do certain growers who have fire blight attempt to control it. In the meantime this blight is getting far worse every year. If those particular growers would only treat the harvest as a whole, to themselves, and to their neighbors who are trying to control it, they would get down to business and cut it out.

Every grower knows that in years gone by whole orchards containing thousands of trees, have been killed outright, but in spite of this, the grower whose trees are rotten with blight ignores it, and the grower who keeps on getting small infestations from the other fellow keeps on cutting it out. The result is that tonnage is reduced and the cost of production increased, which means loss to all concerned.

If we had had our normal rainfall this season I feel certain that the blight situation would have been even worse than it is at present, and the next rain we get will show the grower who is passing up the fire-blight that this disease is a real one and not to be trifled with.

Every spring the government sticks a plaster on one's gate post, "inspected," the next spring they do the same, and so on. Between times the fire blight is trying to turn your ranch into a treeless factory. This is a wonderful measure of control. Fancy a fruit inspector or a factory inspector, meat inspector, school inspector, etc., with no authority, doing the same thing.

What our blight inspectors want is "authority and a brand new axe." The next year the blight situation would be well in hand, and the grower who now refuses to cut blight would get busy. Thanking you, Mr. Editor, I remain Yours truly

R. R. 1, Penticton, Aug. 3, 1926. Speaking about putting in your winter coat, have you ordered your Christmas cards yet?—Brandon Sun. They are recovering the holes of good swimmers who wouldn't believe the current was too swift.—Sault Daily Star. "I am no Bolshevik," declares Musallini. The Pedlar's Pack

By AUTOLYCUS "A Snapper Up of Unconsidered Trifles"

There is, in human nature, a general loathing of the criminal who achieves his purpose by the agency of poison. Probably Lucretia Borgia is, of all notorious women, the most hated by most of us.

THE MODERN POISONER

us, and the more commonplace murderers who followed her methods of killing, are rightly put in the reptile class by public sentiment. There is a cold-bloodedness involved which is repugnant to ordinary people, and it violates all our notions of decent fair-play. The victim is taken unawares, and has no chance of self-defence, and, after all is said and done, the traitor of fair-play is strong within the vast majority. The outrageous poisonings which have lately shocked this country may not have been actually deliberate in the usual sense of that word, but there seems to be proof that the stuff sold had been shown to be poisonous, and that fact is enough to establish a callous brutality which is deplorable.

ON TROUSERS

A correspondent asks me why Autolycus has had nothing to say on the subject of those world garments known as Oxford bags. Well, there are some subjects which are hard to deal with in parliamentary language, and I fear that Oxford trousers come under that heading. One of the most excruciating I have seen put forward for those monstrousities was made by that genial English essayist, Mr. Lynd, who thinks they may have originated in the mistake of a tailor whose shears followed the wrong chalk mark, and who was unwilling to waste a breadth of perfectly good cloth. This puts me in mind of Mark Twain's engraving of a map of Paris, in which the River Seine took a course quite different to ordinary geographical lines owing to a slip of his engraving tool. Mark explained that he was quite aware of this divergence, but said that he would have altered the course of the Atlantic Ocean rather than do his map over again. Failing Mr. Lynd's conjecture, we may surmise that the fashion was inaugurated by a gentle-

My friend George frequently allows the serenity of his life to be disturbed by little things which have been described by the wise men of this world as "crumpled roseleaves," and are disregarded by the average person.

CRUMPLED ROSELEAVES

is one of those individuals who are cursed with a straight eye and take notice of slight deviations which pass unnoticed by most of us. I believe I have seen some time back to his insistence on perfectly parallel rows in his vegetable garden, and this is well matched by his meticulous particularity in his home details. A bookcase which does not stand exactly upright must be adjusted to the sixteenth of an inch, though the heavens fall; and a floor which fails to agree with a spirit level brings from him some remarks which might conceivably offend the individual who laid it. Occasionally he gets caught, to the unholy delight of such of his friends who are aware of his amiable weakness.

Thus, on a trip in the Rocky Mountains, he was much disturbed to find that many houses appeared grandly out of plumb, and could not understand the demagogical gloom of his companions in his discovery. I don't know just what he said when he realized that it was the mountains and not the houses which were to blame for the optical illusion, but I think it is quite possible that he nursed a secret grudge against them for deceiving him.

One of his pet antipathies is the magazine which has its pages held together with wire stitches instead of being sewn in the good old way. There is reason in him on this point, because a wire stitched book is a positive invitation to read, and could not understand the demagogical gloom of his companions in his discovery. I don't know just what he said when he realized that it was the mountains and not the houses which were to blame for the optical illusion, but I think it is quite possible that he nursed a secret grudge against them for deceiving him.

HUGE CROWD ATTENDED ELKS' BIG CARNIVAL

Young Fords Won Chrysler Coach Prize.

ALL THRILLED AS TICKET DRAWN

Plenty of Entertainment and Lots of Variety.

Pentiction, August 28.

One of the largest crowds assembled at one time in Pentiction enjoyed during the afternoon and evening the mammoth Elk Carnival conducted on the Hotel Inola grounds on Thursday under the auspices of Pentiction Lodge No. 51, B.P.O.E. It is estimated that during the evening there were three thousand people on the grounds. The Carnival proved even more successful than had been anticipated by the most optimistic of Elks, and the committees in charge are grateful to the people of Pentiction and the entire surrounding district for the support accorded them.

The big event of the day was, of course, the drawing for the 1926 model Chrysler Coach. For weeks past Pentiction residents and those from surrounding towns had been taking one or more chances on the prize, and with ever-growing excitement the final drawing was awaited. The Elks made it a point to see that the drawing was conducted in an absolutely fair manner and the procedure taken prior to the drawing was a model upon which all similar contests might well be based.

Expectant Hush. An expectant hush fell upon the large crowd when it was announced that the drawing was about to take place. If there was an assemblage of three thousand present, it is safe to say that at least two thousand, nine hundred and ninety-nine held high hopes of driving home in a Chrysler that night. Reeve Macdonald, Inspector of the Royal Canadian Mounted Police, and Secretary Tilly of the local Elks' Lodge checked each stub over carefully. The tickets were then placed in a churn, which was revolved until the numbers were thoroughly mixed to the entire satisfaction of the audience. It is well to mention, too, that some dozen citizens were asked to come on the platform and inspect the actual drawing.

Zero hour at last arrived, and little Mary McMann, carefully blindfolded, drew a single ticket from the churn, which represented nearly two thousand dollars in actual cash. The brief interval which elapsed prior to the announcement of the lucky number was one of the "thrills of a life-time" for each member of the huge audience. Amidst thunderous applause it was announced that Miss Ruby Ford, with ticket No 1059, had won the big prize of the day.

Miss Ford was so delighted with her good fortune, that for the moment she was unable to say a word. She and her brother had gone halves on a ticket. With only "half a chance" she had hardly expected to win out when acquaintances she had known had taken a half dozen or even more tickets. She stood on the running board of the car and received the cheers of the crowd—too happy for words. Later in the evening, her brother took her for a short run in their newly acquired motor car.

Free Dancing. Throughout the entire afternoon and evening there was plenty of entertainment to be had. The Elks' committee and the Ladies of the Royal Purple had planned for weeks to make the day one of the outstanding events of the year, from an entertainment point of view, and no one will question that they succeeded. A pleasing feature of the afternoon was the free dancing for children. The youngsters enjoyed themselves dancing to music provided by Mrs. Manuel. It is seldom that the kiddies have an opportunity to dance in public, and they made the most of the occasion.

The "side show" attractions provided much fun for the entertainment seekers. Mrs. Gunn as the Egyptian Princess, ably told fortunes to the superstitious, curious and skeptical alike. Predictions regarding the future life of enquirers, however, are not guaranteed. The favorite old army game of "Housie Housie" proved most popular, and Messrs. Venus, DeFendorf and Bill Gray were kept busy attending to the large number of patrons. The ham board was ably supervised by Mr. A. Sillett.

Cocoanut Shies. Of course there was a cocoanut shy—what midway would be complete without one? This particular shy was conducted by Mr. Lambert, and it was deservedly popular. Johnny Bowden and Harry Bawinsheimer ran the ring booth; while Messrs. Faulkner and Pattullo conducted the ring game. The refreshment booth was in charge of Messrs. Swift and Adams.

A novelty booth conducted by the Ladies of the Royal Purple was entirely successful, the sum of \$122.25 being taken in, probably less than half of which will go to expenses, as a considerable portion of the goods was donated. The ladies also served tea and cake during the afternoon.

The dance in the evening was in charge of Harry Cooper, and was entirely successful. The Carnival was a credit to the local lodge and Pentiction citizens will look forward to a similar event in the not too far distant future.

After a pleasant visit in the community among her many friends, Mrs. Dr. Ross E. Gray left last week-end to return to her home in Nelson.

The Misses Flossie and Dorothy Clements recently returned home after a very pleasant holiday spent at Vancouver, and also over on the Island. After a short sojourn at her home here, Miss Flossie left again to return to her position in Vernon.

A meeting of fruit growers was called recently to discuss the matter of an appointment of a central director to represent Peachland and Westbank at Vernon, owing to the resignation of Mr. Dryden, our representative for the past months. No definite action was taken, however, as to the appointment, but it was decided to refer the matter to Westbank.

After a pleasant visit in the community among her many friends, Mrs. Dr. Ross E. Gray left last week-end to return to her home in Nelson.

Mr. George McBain, who has been a resident of Peachland for a couple of years now, having come from the coast for his health, has recently decided to definitely enter the real estate field here, and has, consequently, as the saying goes, "put out his shingle." His sign also reads "Notary Public." Mr. McBain has had some twenty-five years experience in this work and will be able to assist folks with any of their real estate problems.

Among the many visitors in Peachland and vicinity this season are Mr. and Mrs. C. G. Elliott and family, old residents of Peachland, now of Edmonton, Alta. They motored from Alberta, arriving here last week, and intend spending three weeks in the community.

Mr. Joe Morsh, with his mother and sister and Miss Coldham, left last week-end on a holiday motor trip which will take them to the north-west States where they expect to spend a couple of three weeks enjoyable time. Perhaps we may be able to get Joe to furnish us with some of the details of their sight seeing.

Mr. and Mrs. Dryden, with Mr. and Mrs. Moffatt, returned home from their motor trip to the coast, on Sunday last, and report having enjoyed a splendid trip, all through Mr. and Mrs. Moffatt left on Monday morning to return to their home in Vernon. Mr. Dryden is busily engaged between Summerland and Peachland these days getting initiated into his new office in the Summerland local and getting things in shape for turning the Peachland local over to his successors.

After spending a couple of weeks

PEACHLAND NEWS

By Our Resident Correspondent

The Baptist Church Sunday school picnic was held last week at Deep Creek, where a hearty crowd enjoyed the afternoon. In addition to the local members the following visitors were present: Mr. and Mrs. Thornber, Mrs. Barber with her two sons and daughter Myrtle, and Mrs. Dr. Ross E. Gray of Nelson. After the afternoon programme and supper Mrs. Gray treated the crowd to ice cream, which was very much appreciated by all.

The home of Mr. and Mrs. E. Brinson was the scene on Tuesday last of a sort of impromptu family reunion, although some of the members of the family were not present. Mr. Epr. Brinson of Pentiction and Mr. George Brinson from the States, with their families, and accompanied by Grandmother Brinson, late of Pentiction, formerly a Peachland resident, motored in and spent a happy day with Mr. Emmett Brinson and family at their Upper Trepanier bench home.

Miss Ellen Hardy of Kelowna was among the visitors in town over the week-end, a guest of Mrs. R. H. Huston.

Mr. W. Renfrew has recently traded in his Ford and is now enjoying the pleasure of driving a nice new Star car.

Miss Mary Miller came in from the coast on Sunday last and is spending a short time with her parents and sister at their ranch here.

Mr. Stuart Burton and Mr. Earl Burton, both of Vancouver, were visitors in town on Monday evening last while on a motor tour through this district. The former was one of the recent principals in the Westbank school, and is now completing his University course. The latter taught last year at Keremeos, and was one of the applicants for the Peachland high school for next term. While in town these gentlemen were guests at the home of Mr. and Mrs. H. McCall.

Mr. A. McKay is enjoying a visit from his younger sister, who came in on Monday's boat this week.

The Rev. W. A. Lewis of Calgary, Alta., addressed a public gathering in the Baptist church on Monday evening of this week in the interests of the work of "The Lord's Day Alliance." Quite a number were present and heard a very able address and learned much of the aims and work of the Alliance. Mr. Lewis was accompanied by his wife on this occasion, and they were pleased to visit while here with a number of old acquaintances, among whom were the Elliott and McCall families. Mrs. Lewis had been a school teacher in Manitoba, and had taught the little country school where Mrs. A. J. Mackenzie and Mr. H. E. McCall attended school. They were under her instruction for four years and were very pleased indeed to meet her again.

Although it was understood that a selection would be made at a recent meeting of the applicants for the position of secretary of the local fruit union, we understand that it has not yet been made.

It is reported that quite a number of applications are coming in for the advertised position of municipal clerk and secretary-treasurer of the local irrigation board.

Dr. Jessie Allen, a Baptist medical missionary from the Telegu mission fields in India, spent a short time in Peachland this week a guest of Mrs. Bulyea. She and Mrs. Bulyea have been very close friends for years. While in town Dr. Allen addressed a public gathering in the Baptist church on Wednesday evening. Both churches were represented and quite a goodly number were present. All were very much interested with the pleasant way in which the speaker gave a very touching picture of some phases of the work coming under her notice during her many years of labor in that country. She touched in a brief manner on some of the conditions existing among the lower castes, but her main address dealt more with some of the work she was privileged to do in one of the prince's palaces north of her regular field of labor. She was gowned in a beautiful Rance costume which had been presented to her by the Rance of the palace, which she told the gathering about. While her work is largely medical she assured her gathering that no opportunity was lost to deliver the message of salvation where-

ment size, of a simple design capable of taking a reasonable amount of wear and tear without deterioration and capable of being affixed to the radiator of motor cars. 2. The emblem must be capable of being manufactured at a reasonable cost. 3. The design must indicate the materials to be used, and consideration must be given to the cost thereof. 4. The design is to be emblematical of some historical feature of the Fraser Canyon or the Cariboo Highway. 5. Some indication of the connection of the Automobile Club is desirable, but not essential. 6. Where colors are used, not more than three colors are to be included in any one design. 7. All designs must be forwarded to, and in the hands of the Manager of the Club, at the head office, 739 Grandville street, Vancouver, B. C., on or before the 15th day of August, 1926. 8. Three judges will be appointed by the directors of the Automobile Club of British Columbia, before the 15th of August, 1926. 9. The judges so appointed will have the sole control over the method of determining and awarding the prize and their decision will be final and binding upon all contestants and upon the club. 10. The contestants submitting designs will be bound by the above conditions. 11. All designs submitted will become the property of the club. 12. The prize will be awarded and paid at the first meeting of the directors after the announcement of the decision of the judges. 13. The club reserves the right to use any design submitted for any of the purposes of the club and to deal with it in any way it sees fit.

ever it was possible to do so. She is being presented with a beautiful gold recognition by the king for services there.

The local packing houses finished the cherry crop shipping last week and have just about completed the pinks and early peaches and are now on freestone peaches. Peas are moving freely and the apples are crowding ahead fast the last few days. The union shipped a carload of Traceland Crabs this week and are now moving the balance of that crop.

Quite a crew of young men, with Fire Warden J. L. Elliott in charge, answered a call for assistance from Westbank on Sunday morning last and went up to assist with controlling a fire which had been raging in that vicinity and which was endangering the sawmill north of the community. Having completed their work, the Peachland crew returned home early in the week.

The home of Mr. and Mrs. E. Brinson was the scene on Tuesday last of a sort of impromptu family reunion, although some of the members of the family were not present. Mr. Epr. Brinson of Pentiction and Mr. George Brinson from the States, with their families, and accompanied by Grandmother Brinson, late of Pentiction, formerly a Peachland resident, motored in and spent a happy day with Mr. Emmett Brinson and family at their Upper Trepanier bench home.

with the dust of dark museums, perhaps? Later the act of destruction may be regretted.

SECURE MORE WATER To the Editor of The Review: Dear Sir—In last week's Review Mr. Huddleston's letter on the water problem struck the right note. We have got to do something to relieve the situation. What with bitter pit, drought, spilt, culls and other troubles on account of lack of water, besides making some of the growers steal their neighbors' supply, making trouble, it is up to the council to do something to relieve the situation. Canyon Creek dam is all right, but I understand that we could get a further supply of water from Osprey lake. The growers could turn out and do most of the work needed to be done, if they had a competent man to supervise them. We have got to have a full supply for everybody, so that there will be no chance for unfair distribution.

FRUIT GROWER.

SYNOPSIS OF LAND ACT AMENDMENTS PRE-EMPTIONS Vacant, unreserved, surveyed Crown lands may be pre-empted by British subjects over 18 years of age, and by aliens on declaring intention to become British subjects, conditional upon residence, occupation and improvement for agricultural purposes. Full information concerning regulations regarding pre-emptions is given in Bulletin No. 1, Land Series, "How to Pre-empt Land," copies of which can be obtained free of charge by addressing the Department of Lands, Victoria, B.C., or to any Government Agent. Recipients will be granted covering only land suitable for agricultural purposes and which is not timber land, i.e., carrying over 5000 board feet per acre west of the Coast Range, and 8000 feet per acre east of that Range. Applications for pre-emptions are to be addressed to the Land Commissioner of the Land Recording Division in which the land applied for is situated and are made on printed forms, copies of which can be obtained from the Land Commissioner. Pre-emptions must be occupied for five years and improvements made to value of \$10 per acre, including clearing and cultivating at least five acres before a Crown Grant can be received. For more detailed information see the Bulletin "How to Pre-empt Land."

PURCHASE Applications are received for purchase of vacant and unreserved Crown lands, not being timberland, for agricultural purposes; minimum price of first-class (arable) land is \$5 per acre, and second-class (grazing) land, \$2.50 per acre. Further information regarding purchase or lease of Crown lands is given in Bulletin No. 10, Land Series, "Purchase and Lease of Crown Lands."

HOMESITE LEASES Unsurveyed areas, not exceeding 20 acres, may be leased as homesites, conditional upon a dwelling being erected in the first year, title being obtainable after residence and improvement conditions are fulfilled and land has been surveyed.

LEASES For grazing and industrial purposes, areas not exceeding 640 acres may be leased by one person or a company. UNDER THE GRAZING Act the Province is divided into grazing districts and the range administrator under a Grazing Commissioner, Annual grazing permits are issued, based on number ranged, priority being given to established owners. Stock-owners may form associations for range management. Free, or partially free permits are available for settlers, campers and travellers, up to ten head.

Rotor Ship Baden-Baden, Like Seagoing Windmill, at New York After Forty-Days' Atlantic Voyage

Anton Plotner's Baden-Baden, which impressed some observers as looking like two revolving cheese boxes on top of a small raft, attracted much attention when it appeared in New York harbor after completing the first trans-Atlantic trip ever made by a rotor ship. The rotors make use of wind power but the craft is also equipped with

water-screw. The Baden-Baden left Kiel on March 31 and the Canary Islands. Off the northwest coast of Africa, on April 14, the vessel arrived in New York May 9, after encountering a blow of Hatteras and the Virginia Capes that stilled her on her beams' ends and rolled her rails under water.

PRIZE CONTEST The Automobile Club of British Columbia offers a prize of \$50.00 for the most appropriate design for an emblem to be used on automobiles traversing the Fraser Canyon and the Cariboo Highway. The following points will be taken into consideration in awarding the prize: 1. The emblem must be of a conven-

NEW SCHOOL DISTRICT AND BUILDING IS OLIVER PLAN

Another School Four and a Half Miles From Town—Kelowna and Penticton Residents Purchasing Lots in Project—Summer Homes on Osoyoos Lake.

FINE CANTALOUPE ARE NOW ON THE MOVE IN EARNEST

Canadian Pacific and Canadian National Railways to be Supplied—Oliver Exhibit at Vancouver Exhibition—Perley Simpson Has Ten Acre Plot of Watermelons.

Oliver, Aug. 5.—The expansion of the Oliver Project to the south has caused settlers there to hold a school meeting with the object of forming a new school district and building about four and a half miles south of the town. A movement is now under way to build larger and better premises in the town itself. The influx of new settlers and the rapid increase in the school population well warrants serious consideration of this matter, as a well-equipped school is a boon to any rapidly growing district.

Val. Haynes now has his haying well under way on the east side of the Okanagan river, where he leased from the provincial government 3200 acres of range and meadow land. Although the Osoyoos meadows, which were recently opened up for sale did not find any buyers, it is fully expected that they will sell rapidly in the late fall and spring.

Another sale is reported by Mr. E. W. Mutch, selling agent. J. Stuart Leckie, of Kelowna, having bought a lot on the Osoyoos bench south of Emrick's and has also applied for two lots on the foreshore.

Robt. Lowley, Don Corbishley and others well known in Penticton and other valley points have spent considerable time looking over lands on this project. The unlimited amount of water available this year seems to be acting as a magnet for ranchers from up the valley and across the line, where the shortage is felt more this season than ever before. Mr. Lowley, it is reported, will definitely settle here this fall.

Summer Home Lots.

The opening up of small lots along the foreshore of Osoyoos Lake, measuring approximately 50 ft. by 150 ft., offers to many people at all valley points a beautiful site for a small summer cottage. The bathing is excellent, the fishing good in May and June, and the sites are in close proximity to the Osoyoos Meadows, where wonderful pheasant shooting may be had in the fall. Considerable of these lots have been applied for both by Americans and others, whilst applications for some are being constantly received.

Cants Are Moving.

Cantaloupes are now on the move in earnest. Monday saw the first bulk shipment. They are all in beautiful shape, being well netted and of excellent shape and size, and best of all, of wonderful taste. Although the cool weather of the past two weeks prevented earlier shipments, indications point to a fast making up of lost time. Pickers are busy in most of the fields, and judging by present appearances next week will see a considerable demand for outside assistance, as the acreage is just about doubled this year. The cannery will be opening on Saturday, the 7th, and as the tomatoes are coming along fast, considerable activity will be seen in this field.

To date approximately one car of cantaloupes have been moved in L.C. and express shipments. Thursday of this week will see the first straight carload of cantaloupes roll out of Oliver for the season. Excellent prices are said to be the rule and growers are assured of a good return for their early produce.

It is now learned that not only will the Oliver Co-op. be supplying exclusively to the C. P. R. system, but will also be filling large orders for the Canadian National Railway systems.

Forty straight cars is the object this year, which is about 15 cars more than last season's output along this line.

Early Crawford Peaches.

Early Crawford peaches have now been received at the packing house and quite a few crates are moving out. Peaches are still on the move in considerable quantities, and the size and quality are excellent. Wealthies, Gravensteins, Duchess, etc., have now finished here for the season.

E. W. Mutch, selling agent for the Project, is now in Vancouver to supervise the Oliver exhibit, which will feature the famous O. O. Cantaloupe. Displays will also be made of peaches, tomatoes, pears, apples, corn, potatoes, watermelons and possibly sweet potatoes. This is the first time that the Oliver district has been represented at any agricultural fair, and results from the exhibit are expected to be gratifying to one and all.

Big Watermelon Patch.

One of the outstanding points of interest both locally and to outsiders is the beautiful ten-acre patch of watermelons which Perley Simpson has this year on the same lot where he grew his remarkable patch of cantaloupes last summer. This field is what might be called a good sight for sore eyes. The variety grown is what is known as the 'Winter Cream' or 'Ice Cream' melon. Shipments from same are expected to start this week, and this acreage is well worth a visit from anyone anxious to see what can really be done in this district. There are eight to ten melons on each plant, and the field is a glimpse seen to be a veritable mass of light yellow balls twice the size of large cantaloupes. On closer inspection one finds hundreds hidden under the vines. The owner of this beautiful field anticipates shipping 3,000 crates off same. It may happen and seems possible that an Oliver Watermelon will become as well-known as the Oliver-Osoyoos cantaloupe.

Watermelons are shipped out six to eight in a crate, and the price paid is per pound. Great interest is being shown in the patch and results are being eagerly waited.

Mr. Simpson is to be congratulated as he was the first to prove that can-

taloupes were a commercial possibility on a large acreage in this district. He is now experimenting in the watermelon field and indications are that same will be another huge success for him and the Oliver district.

BEAVERDELL BRIEFS

Col. C. S. Baker left on Monday for Nelson, where he hopes to establish an assay office.

Mr. and Mrs. E. C. Lutner returned on Sunday from a week's motor trip to Spokane and other points.

Miss Elsa Olson of Greenwood has returned to her home after a ten day visit with Mrs. Ted Clarke.

Miss Esther Norman has arrived from Nelson, and is the guest of her sister, Mrs. C. H. Clegg, Sally mine.

Master Tommy Holmes of Trail, a former resident here, is spending his holidays as the guest of Trapper Smith.

Mr. and Mrs. Barrett Clayton motored up from Seattle last week and are spending some time visiting the former's father, Mr. Walter Clayton.

Alex. McPhee is working on the Bounty Claim, recently given up by the Federal Company, and is shipping some very fine ore this week.

The many friends of Mr. and Mrs. Pat Crane were glad to see them back in the camp over the week-end after an absence of almost a year.

Miss Ethel Sheffield is the guest of Mrs. J. Drum, Bell mine, for a few days, while en route to her home in Toronto after several weeks visit at the coast.

Mr. and Mrs. Harrow and three children arrived last week from Scotland. Mrs. Harrow is a daughter of David Smith, a well-known old-timer in the district.

A. W. Lutner and family, of Vernon, were the guests of Mrs. A. Lutner at the Beaverdell hotel for ten days, and have left for a visit to Kettle Falls, Wash., before returning to their home.

The Chrysler Syndicate, now working the old Revenge property, have put several men on this week, and with the new plant working smoothly, hope to be shipping ore shortly. The showing is very encouraging.

Mr. and Mrs. Crossley left on Monday for their home in Nelson. Mr. Crossley has been here for the past two weeks overseeing the work of installing the new engine and compressor at the Revenge mine.

Mr. and Mrs. Reid Johnston left on Tuesday morning for Coalmont, to which station Mr. Johnston has been transferred. Reid was very popular around here and his many friends are sorry to see him leave.

R. L. Clothier is on a business trip to the coast and expects to be gone about ten days. During his absence J. D. Morrison is in charge of the Beaver, which is looking better all the time, some fine new ore having recently been uncovered.

Tommy Crowe and Carl Carlson had a collision on the "hill" on Sunday, just above the Sally cook-house, which crippled both Ford's badly, but did not hurt the occupants. Brush growing high on either side of the road prevented them from seeing each other.

Interest in sports, which has suffered a drop lately, is now reviving with the approach of cooler weather. The tournament of the Penticton Tennis Club for the club championships starts today at the courts and it is anticipated that some good play will be witnessed throughout the tournament. The courts are being put in good shape and should be fast and hard for the championships.

Rugby is also being revived and hopes are held out that two games can be arranged with Oroville during September. The game took quite a hold here two years ago, when two games were played with Oroville, in both of which the locals were defeated. With the added experience of that campaign, it is believed that a strong squad can be lined up for this season. All interested in rugby are asked to turn out at the Recreation Grounds on Thursday afternoons at three o'clock. Further practice days will be arranged. It is hoped to have a large squad out. American rugby will be played owing to the difficulty of securing games with Canadian towns. Should an opportunity arise, such as two years ago was offered the locals, of playing for the B. C. championship, it will undoubtedly be accepted.

Cycle Road Race

Cycling is also due for a big boost. Mr. George Taylor, popular cycle dealer and bicycle enthusiast, has recruited a splendid silver trophy cup from the Canadian Cycle & Motor Co. for a bicycle road race.

The cup will be handled under the direction of Mr. Taylor and a committee to be appointed. Details of the race are now being arranged, and a definite date has not been set for the event. It is hoped to stage it on Labor Day. The course suggested is with the start at the High School, from there out Main street to the forks, out the right hand road to Skaha Lake and back on Main street, finishing at the post office.

It is hoped to make the road race a big annual event, after the style of the Stanley Park race at Vancouver, and

ESTIMATES ARE MUCH OVER-RUN

Helps to Disorganize Market, States Grant

OKANAGAN APPLES REACHING MARKET

Royal Apricots Declared Too Small For Market Demands.

Commissioner Grant, in the weekly bulletin from Calgary, says:

Intense heat accompanied by a smoke haze, has prevailed for all this week. Wheat and oats are well headed out, and in many places a little rain would be of great benefit.

Business has been slow compared with the volume of produce arriving. Heavy importations of plums from the States, together with draggy movements, have injured the sale of B.C. plums, which run heavy to No. 2s. The demand for preserving cherries and raspberries is gone.

Field grown tomatoes are scarce and many are arriving green, not a trace of color on them. This is not what the trade needs at start of a shipping season.

Cucumbers arriving in iced cars are being jobbed, many are whitish in color, small and irregular in shape. Growers must give more attention to getting "Spines" when buying seed, these overgrown Gherkins are not wanted.

Duchess apples are rolling in heavy supply. The C.F.D. brokers are circulating the trade to "clean up" on imported cantaloupes, as Oliver and Penticton cantaloupes are beginning to arrive, and will be rolling in car lots in about one week.

Apricots are passing. The supply of peaches is very light.

The tendency of produce from the interior is to greatly over-run the estimated supply. Cherries and apricots more than doubled their estimated volume. The trade complains of these unsatisfactory estimates, as they buy the balance of their estimated requirements from the south in advance and are thereby caught with heavy stocks on hand and take heavy losses.

Early celery should be shipped L.C. L. express, otherwise it doesn't hold up in hot weather.

Calgary Wholesale Prices

Ont. Blueberries, 11 qts.	\$3.25-3.50
B.C. Strawberries, 24-pt.	\$2.00-4.00
Raspberries, 24-pt.	\$2.75-3.50
Blackberries, 24-pt.	\$2.00-2.50
Loganberries, 24-pt.	3.00
Red Currants, 24-pt.	\$2.75-3.00
Black Currants, 24-pt.	\$3.25-3.50
Cherries, late sour, 24-pt.	\$1.50-2.25
Cherries, sweet	\$3.50-4.00
Apricots, No. 1	\$1.90-2.00
Apricots, No. 2	\$1.25-1.50
Plums, peach	\$1.25-1.35
Plums, Bradshaw	\$1.25-1.35
Peaches, Alexander and Trump	1.50
Apples, Yellow Transparent, etc.	1.75
Box fancy, Red Astrakhan, etc.	2.25
Duchess & Red Astrakhan, etc.	3.75

Cal. Peaches, freestone	2.00
Wash. Apples, Transparent	2.00
Cal. Apples, Gravenstein	4.00
Wash. Pears, Bartlett, etc.	\$3.00-3.25
Imp. Cantaloupes, Stands	\$5.00-6.00
Plats	\$2.25-2.75
Car arrivals	\$2.00-2.25
B.C. 2 deciduous fruit, 12 mixed fruit and vegetables, 2 mixed vegetables, 3 potatoes, imported; 4 deciduous fruit, 2 grapes, 1 pear, 1 cantaloupe.	Edmonton

Business on this market is fairly active. The weather has been very hot and dry during the week. Rain is badly needed in some parts of the district. One car of B. C. cucumbers put up in peach boxes and shipped in an open stock car arrived this week in good condition and retaining their natural color. Ice refrigeration has a tendency to discolor cucumbers.

B. C. field tomatoes put up in 4-bkt. crates are arriving L.C.L. One shipment from Kelowna which arrived today was a full pack, medium ripe tomatoes equal to some of the hothouse varieties, in addition to that the packages had an attractive label, which helps in marketing product. It would be to the advantage of the trade generally.

the Beacon Hill grind at Victoria. Entries will be invited from all the Okanagan points and it is hoped to line up strong opposition to the local riders who will enter. Other prizes are being arranged for in addition to the cup and it is hoped to have all interested local wheelers in the race. The cup is now on display in Mr. Taylor's win drow.

REEVE OF McCULLOCH' IN ROLE OF PARENT FOR MOTHERLESS FAWN

Con Barclay, railwayman and trapper, of McCulloch Station on the C. P. R. Valley line, has protected a helpless bird and animal life of the highland country where his cabin is located. Recently he found a young fawn whose mother had been killed by a cougar, so the "Reeve of McCulloch," as Con Barclay is called by his hunting companions, of the McCulloch line, attempted the task of bringing up the youngster on canned milk.

usually if packers used more attractive packages.

Regina Business is good. This is Regina's Fair Week and as the weather is continuing fine, large crowds are in attendance and large quantities of fruit are being used daily.

Seattle Telegram Cantaloupes are being offered here in far too heavy volume from California and eastern Washington. They are coming in mixed cars by express shipments, the first straight car arriving from Pasco last Thursday.

Eastern Washington apples moving slowly, more coming. Winter Bananas coming in two weeks. California Alberta peaches plentiful, \$1.25 Eastern Washington next week. Potato market poor, supplies out. Yakima stopped digging, expect better situation, prices \$1.75 to \$2.00, quality excellent. Pear deal slow, few selling, cannery not buying, growers putting into cold storage.

Winnipeg The weather for the past week has been warm, with business good and the supply equal to the demand.

British Columbia cherries are about cleaned up and Ontario autumn cherries are beginning to arrive, the first straight car is expected tomorrow. Local vegetables of all kinds are now beginning to supply this market.

Saskatoon Weather here has been hot for the past week and damage has been reported to crops in some districts; also L.C.L. shipments have suffered by not arriving in first-class condition.

Raspberries are still arriving but the trade is not so keen after them now. Cherry arrivals are also slackening up, which is a relief.

Car of California Alberta peaches has just arrived; also few cars from Washington containing peaches, plums and Bartlett pears.

We have had several cars from B. C. containing various assortments.

Moose, Jaw The weather during the week has been exceptionally hot. Business good. The market well supplied with all kinds of fruit and vegetables. Raspberries and blackberries from B. C. have been arriving in very poor condition, especially L.C.L. shipments.

Cherries Owing to the intense heat and early season experienced in B.C., Okanagan cherries of the Bing and Lambert variety have been overlapped a full week by shipments from Kootenay points. This has overstocked the market and considerably reduced prices. Usually their ripening season is two weeks or more apart. Today's shipments of Lambert cherries from Kaslo are the finest cherries seen on the market this year. Shipments of cherries from Needles show that the Arrow Lakes are producing cherries of a high class.

Vancouver During the past week the weather was moderately warm but a trifle dull, the sky being more or less overcast with clouds.

Okaganan apples in various early varieties are now on this market, the prices running up to \$2.50. A few early apples are also in from Washington and small shipments of Gravensteins continue to arrive from California. There is also a fair supply of the early varieties and cookers from nearby points.

A few local pears are in at prices as listed elsewhere.

Apricots are rather draggy, especially those of the Royal variety, which are not very popular for canning. Importations of this fruit are very light, the Okanagan supplying this market in much greater volume than for several years past.

Plums are now in from several sources and in a large number of varieties. A carload came in during the week from the Okanagan. Washington shipped Climax and Peach plums and local plums are increasing in volume. California plums still arrive in mixed cars.

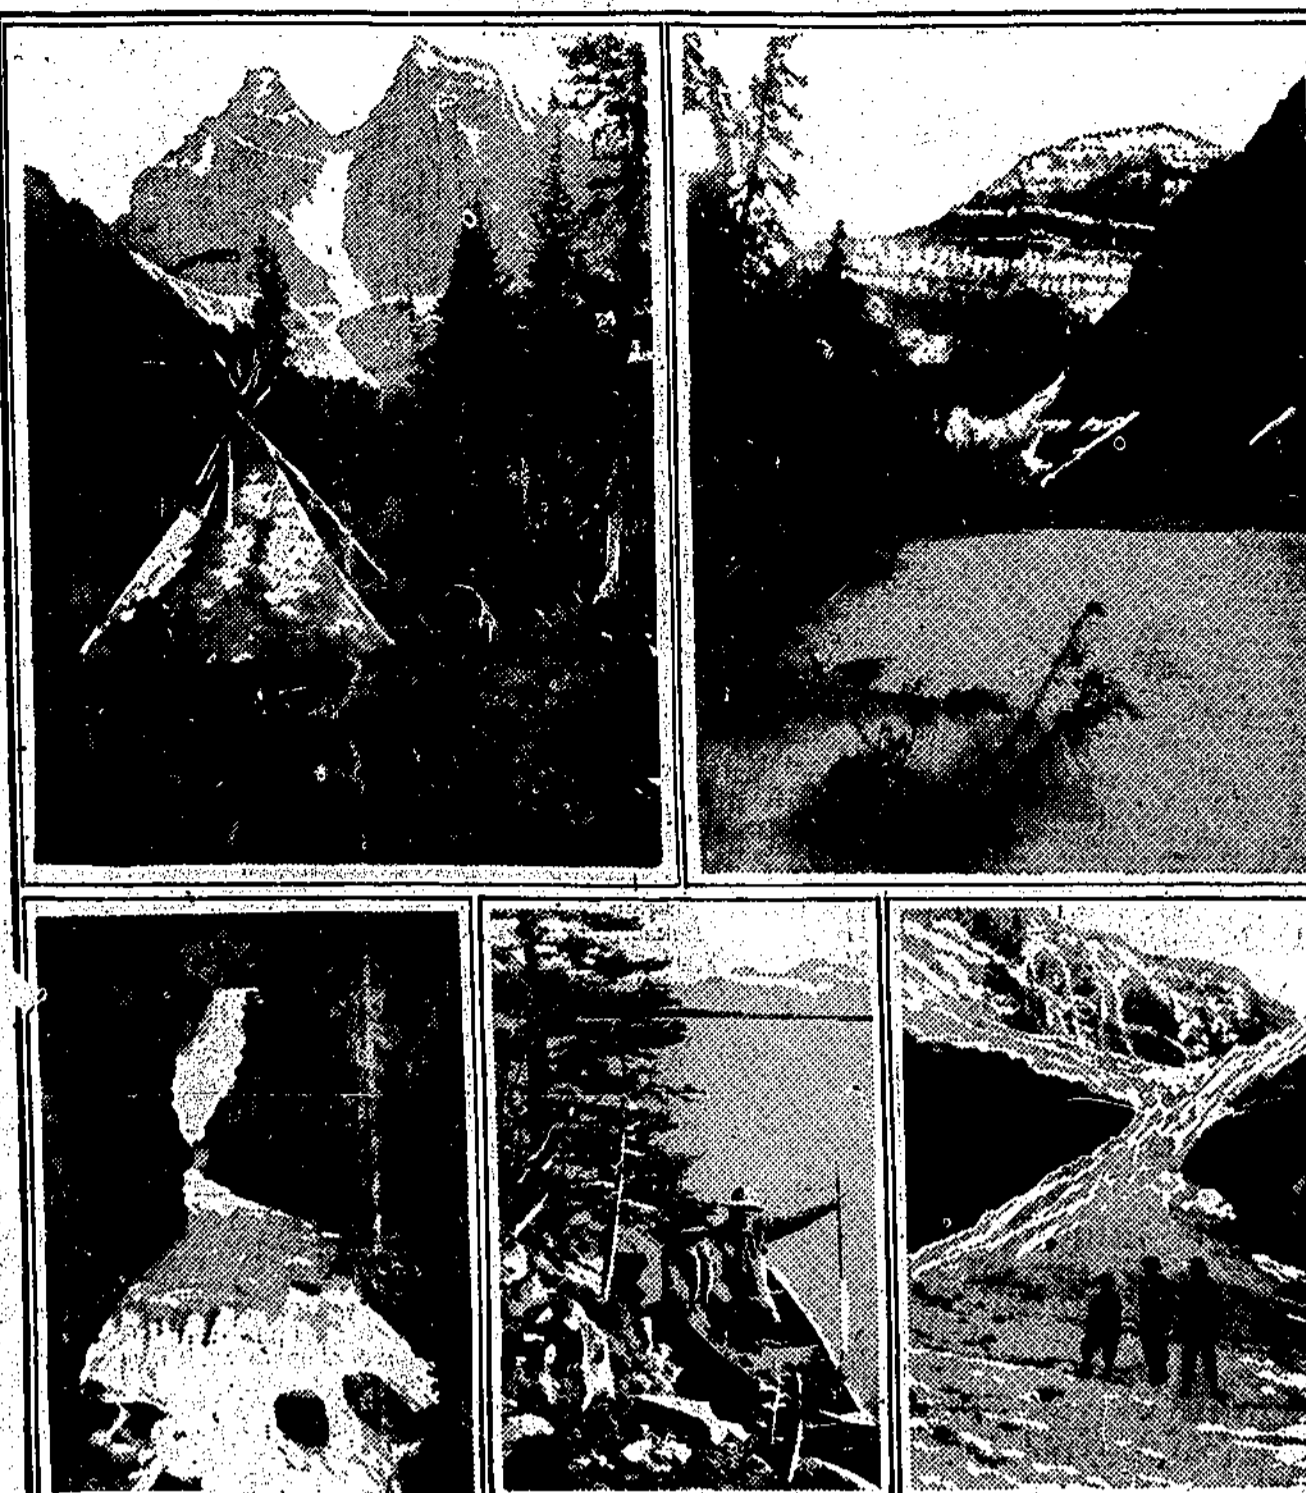

Field tomatoes from B. C. sources are still very scarce; the market being yet supplied from Wapato. Another carlot came in from this source during the week in addition to which there was a fairly heavy L.C.L. movement out of Seattle.

The first shipment of Washington Burrol Gem Cantaloupes came in today. This is the first arrival from any point north of California this year. The Oliver cantaloupes are expected in the next few days.

New potatoes are now bought from the grower delivered at from \$22 to \$23. This level will probably prevail until the storage crop starts to come, when the market usually goes on a standstill basis.

Apples, Cal. Gravensteins	\$3.25-3.50
Washington Earlies	2.50
Cookers, \$1.00 to	2.00
Pears, Bartlett, Cal.	\$3.25
Bartlett's, Yakima,	2.50
Bartlett's, Wash, bulk, 32s	1.75
Local, half box	1.00
Peaches, Alberta, Cal.	\$1.50-1.75
Apricots, Okanagan	\$1.00-1.25
Plums, Cal., crto.	\$2.00-3.00

BEAUTY SPOTS IN NATURE'S WONDERLAND

For the lover of natural beauty, no place on the North American Continent holds more charm than does Jasper National Park, the 4,400 square mile playground set aside in the Canadian Rockies for the benefit of Canadians and their guests. Here lake and river blend with towering snow-clad peaks and provide a scenic setting which is unexcelled. In this great natural park, wild life has been protected and as a result the animals have become friendly with mankind and are not only increasing in numbers but are also becoming very tame. Elk, deer, bears, mountain sheep and mountain goats may very frequently be seen by visitors as they drive or ride along the highways or bridge paths which radiate from Jasper Park Lodge, the bungalow camp hotel of the Canadian National Railway.

The photographs above show a few of the beauty spots of Jasper National Park. The left upper photograph shows Mt. Erebus, one of the towering peaks of the region, while that to the right is Mount Edith Cavell, Canada's everlasting memorial to the heroic British war nurse. Below from left to right, are shown: Moose Canyon; fishing on Pyramid Lake, and a group of tourists at the Cavell Glacier.

Plums, local, Bradshaw 1.50
Plums, local, peach plums, lb 1.00
Plums, local, cherry plums, etc. 1.50
Cantaloupes, 15s and 36s 3.75-4.00
Flats 2.00-2.25
Tomatoes, Was. field, 20s 2.00
Okaganan, field, 27s 2.50
H.H., No. 1 3.25-3.50
Bulk 2.50

Apricots "Royal" Apricots as grown in B.C. are too small for the market demands. We heard favorable comments upon the Tilson and Blenheim varieties, but the No. 2, mostly "Royals," were dragging on all markets. "Royal" apricot growers should govern themselves accordingly.

Plums are now in from several sources and in a large number of varieties. A carload came in during the week from the Okanagan. Washington shipped Climax and Peach plums and local plums are increasing in volume. California plums still arrive in mixed cars.

Field tomatoes from B. C. sources are still very scarce; the market being yet supplied from Wapato. Another carlot came in from this source during the week in addition to which there was a fairly heavy L.C.L. movement out of Seattle.

The first shipment of Washington Burrol Gem Cantaloupes came in today. This is the first arrival from any point north of California this year. The Oliver cantaloupes are expected in the next few days.

New potatoes are now bought from the grower delivered at from \$22 to \$23. This level will probably prevail until the storage crop starts to come, when the market usually goes on a standstill basis.

Apples, Cal. Gravensteins	\$3.25-3.50
Washington Earlies	2.50
Cookers, \$1.00 to	2.00
Pears, Bartlett, Cal.	\$3.25
Bartlett's, Yakima,	2.50
Bartlett's, Wash, bulk, 32s	1.75

Apricots, Okanagan	\$1.00-1.25
Plums, Cal., crto.	\$2.00-3.00

CONDENSED MILK ABSOLUTELY PURE

The value of condensed milk as a guardian of health was curiously demonstrated by an item in the London Daily Mail recently, one sentence in the article reading:

"The complete replacement of fresh milk by condensed milk has notably reduced tuberculosis."

The story had to do with the activities of the London Zoological Society, and was reporting on the health of the animals. Many animals, especially those with cloven hooves, were liable to epidemics of tuberculosis. The antelopes seemed to die of nothing else. Yet they lived under very good conditions and were given daily draughts of fresh milk. Then the fresh milk was cut off and the tinned variety substituted. A marked improvement followed and tuberculosis had been stamped out in the antelope paddocks. The Borden Company Limited, who put up Eagle Brand Condensed Milk, have long advocated it as an infant food on the ground of its being absolutely pure as well as uniform. This incident would seem to bear out the statement that, save for mother's milk, there is no milk so safe for the infant as Eagle Brand.

CONDENSED MILK ABSOLUTELY PURE

Mr. G. B. McWilliams was awarded the contract for the conveyance of pupils to and from school, and is purchasing a new "bus" for the work.

Mrs. Len Smith has purchased the lakeshore cottage known as the Mulford house, and will use it as a summer house. Mr. and Mrs. Smith and the children have been occupying it this season for the past few weeks.

Miss Margaret Mitchell is spending the vacation at the home of her parents and is returning to Vancouver next week.

Mr. Don Salting is home for the vacation, and will be staying until September.

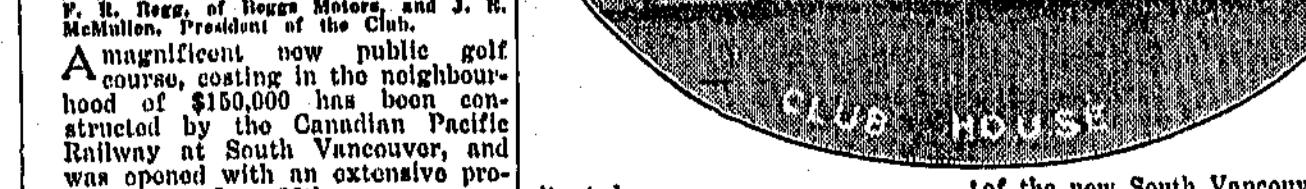

The Board of Trade held its monthly meeting on Monday evening. President George Weaver occupied the chair. A resolution was passed in support of the Penticton memorial to be sent to Hon. Dr. Sutherland re the Naramata-Kelowna road, and the secretary, Captain Bowen, was instructed to communicate with the Provincial Automobile Association concerning more road signs for the highway between Naramata and Penticton. Other business included a further discussion of an auxiliary system of water supply to the town, and an experiment will be made to test along certain lines.

FIRE DESTROYS QUEBEC VILLAGE

Eighty Houses Out of Total of Ninety-two Are Burned

Quebec, Aug. 5.—The village of St. Come de Kennebec, 12 miles from here was practically destroyed by fire Wednesday afternoon. Eighty houses, out of a total of 92, were destroyed.

C.P.R. Opens Public Golf Course

C. P. R. officials and others at opening. From left to right: J. J. Forster, General Agent of the Canadian Pacific Steamships; W. B. Langran, General Freight Traffic Manager; C. Murphy, General Manager, Western Lines; Col. Montclair, of the Canadian Mount Police; Captain E. D. Bingham, General Superintendent, C. P. Steamships; F. W. Peters, former General Superintendent, Western Lines; J. M. Plumb, of the Canadian Bank of Commerce; F. H. Hogg, of Rogers Motors; and J. H. Mackintosh, President of the Club.

A magnificent new public golf course, costing in the neighborhood of \$150,000 has been constructed by the Canadian Pacific Railway at South Vancouver, and was opened with an extensive programme on June 26th.

Besides being an outstanding golf course from the sporting standpoint, it rivals all others in the extreme beauty of its outlook, which is over the Delta of the Fraser River and the Gulf of Georgia. It is called by a lovely musical word, "Langran," for that is the name which early Spanish explorers gave the beautiful peninsula of Point Grey, on which the new course is situated.

"Langran" Golf Course extends over 100 acres of gently undulating land, and the aggregate length of 18 holes is 6,030 yards with a par of 74. There is a fine club house on the grounds, which cost \$12,600 and is splendidly equipped throughout with comfortable dining room, dressing rooms, shower baths and lockers. "Langran" is said to be very similar to the famous "Wootward Ho" course near Biddford, Devon, England, and is only four miles from the heart of Vancouver City.

Where Ardent Anglers Seek Quebec's Fishing

ON A LAURENTIAN LAKE IN QUEBEC

An army of anglers is preparing for the annual fishing expedition in the province of Quebec, where innumerable rivers, streams and brooks, as well as lakes of every size and shape, are the habitat of many game fish. Once a Quebec fisherman, always a Quebec fisherman. The opening day for the pursuit of this sport is May 1st, and a week earlier the sportsmen started their northward trek to be the first one to land a trophy.

Brook trout are particularly desired and the fisherman who hooks a large one of this fighting species, is indeed a proud person. There are numerous waters that yield brook trout generously, especially along the 160 miles of the Mont Laurier branch of the Canadian Pacific Railway, that runs northwest of Montreal into the Laurentian Mountains.

Trout can be taken from the pools of streams on either side of the railway all the way from St. Jerome to Mont Laurier, at the end of steel, and if one is an adventurous sportsman, he will delve into the wild woods and waters beyond, for the natives are enthusiastic as to Lake Dumouchel, 3 miles to the north, famous for its red trout; Lake Thibault, 3 miles east, that affords good pike fishing; Lac des Ecorces, which is 4 miles south, with one hotel and two fishing clubs, whose guests enjoy good sport catching pike, dore and "whitefish", as locally termed; Lac des Isles, seven miles south of Mont Laurier, is a charming summer resort. This lake is 30 miles in circumference and contains 27 islands, many of them bearing cottages. It is noted for its beautiful scenery and the large trout that inhabit it.

There are 27 stations between St. Jerome and Mont Laurier, and a stop-off at nearly any one of them leads to excellent fishing grounds. Some of the most popular points are St. Faustin with its surrounding waters; St. Jovite, with the popular Grey Rocks Inn overlooking Lac Ouimet, where red trout are found, and numerous adjacent waters yield various species of the finny tribes. It is at least a two-mile ride from Lac Mer-

ONTARIO APPLE CROP VERY LIGHT

Good Crops Are Expected in Ontario and Quebec.

Although a considerable quantity of Ontario's apple crop last year was destroyed by early frost, the harvest was a bumper one and this year's crop will thus be lighter. The apple blossom showing was very patchy, especially with varieties that were exceptionally heavy last year. A total yield of 80 per cent of 1925 is predicted. It is pointed out that the lighter set should tend to increase size and quality. Spy and McIntosh are light to very light over the whole province. Early varieties, such as Duchess, Wealthy, Fameuse and Russels, are full to heavy. Kings promise a fair crop.

In Quebec it is estimated that the commercial crop will be double that of a year ago. Alexander, Wolfe River and St. Lawrence are light, while Duchess, Wealthy, Fameuse, McIntosh and Russel are particularly heavy.

Advices from Nova Scotia say that although the bloom on apple orchards was not as heavy as last year, the fruit has set well. Weather conditions are favorable and it is expected that foreign prospects point to a good crop of apples.

Although the past season was probably the most disastrous that the Annapolis Valley has ever experienced, the growers are not discouraged and are looking after their orchards, carrying out extensive spraying and dusting operations in order to improve the quality of their fruit.

WOULD SEARCH FOR BED ROCK

Brooks Suggests New Dam Below the McIntyre Residence

Councillor Brooks suggested to the council last night that money be spent in searching for bed rock in the channel below Mr. McIntyre's residence with a view to erecting a dam and diverting water into the domestic pipe line, and relieving other water for irrigation.

There was quite a volume of water coming down, going to waste. He estimated the cost of a dam at between \$15,000 and \$20,000.

MARRON VALLEY

Mr. Vincent Green was a visitor to the city last week. He was accompanied by Charlie Allen.

Messrs. Homuth and Bursin were callers at the Duncan ranch Tuesday on their way to the hills in search of horses.

The Walker family was splendidly entertained last week at the home of Mr. and Mrs. J. W. Thompson, Green Mountain.

Mr. Spencer arrived in the valley during the week-end, and is a guest at the Homuth ranch. Mr. Spencer has travelled extensively in North America and Europe and is very entertaining.

Mr. Walker and Piero Krueger helped Mr. Homuth with the haying on Wednesday.

The young people of the Taylor family spent Saturday afternoon in Penticton.

Miss Evelyn Darragh spent Monday evening with Miss Spencer at the Homuth ranch.

Messrs. Arthur Duncan and John Thompson were visitors at the Walker home last Sunday.

Mr. Noad, on Saturday, came down to the valley from his home. He reports that the elevation of his ranch, given last week was in error; that it should be 3300 feet instead of 3000. He and his friend, Mr. Thymne, are farming there, and have a very nice garden.

Mr. Bursin's affairs are now in full bloom, and is indeed a beautiful sight.

Mr. and Mrs. Walker spent Tuesday in Penticton.

A phenomena which attracted attention on Tuesday evening was a white bar, across the heavens. It appeared about 9:45 and continued to wave in a sort of double curve, sometimes dim, sometimes bright, sometimes broad, and then again narrow for about an hour. It then began rapidly to crumble and break, and finally floated to the western horizon. Could this be the Aurora Borealis?

FATAL ACCIDENT ON VERNON ROAD

Vernon, July 27.—Nell Silvernall, aged 35, is dead, and his brother, R. A. Silvernall, is in the Vernon Jubilee hospital with a fractured skull, the result of an automobile accident which occurred eight miles north of Vernon.

With a large truck, having a trailer attached, they were hauling lumber from a mill at Falkland, where they live, to Armstrong, and why they started for Vernon remains a mystery. As there were no spectators of the accident, what happened is only a conjecture. It would appear as though the trailer got down over the side of the grade and pulled the truck after it, although the road is level and of good width. Persons passing saw the truck on its side near the fence, and on investigation found the body of R. A. Silvernall lying close by and the body of his brother under the truck. The spokes of the right front wheel were smashed and the steering wheel broken into little pieces, and the windshield also broken to bits. The body of the dead man was not released until a large number of men lifted the truck under which it lay. The father of the two men is now in Vernon making efforts to discover what happened, but as the injured man has not yet fully recovered consciousness, little can be learned.

COMING TO PENTICTON

His Majesty's

ONE DAY ONLY Thursday, August 12th

COLDSTREAM GUARDS BAND

THE PREMIER BAND OF THE BRITISH EMPIRE

A COMMUNITY EFFORT Under the Auspices of THE MUNICIPALITY OF PENTICTON

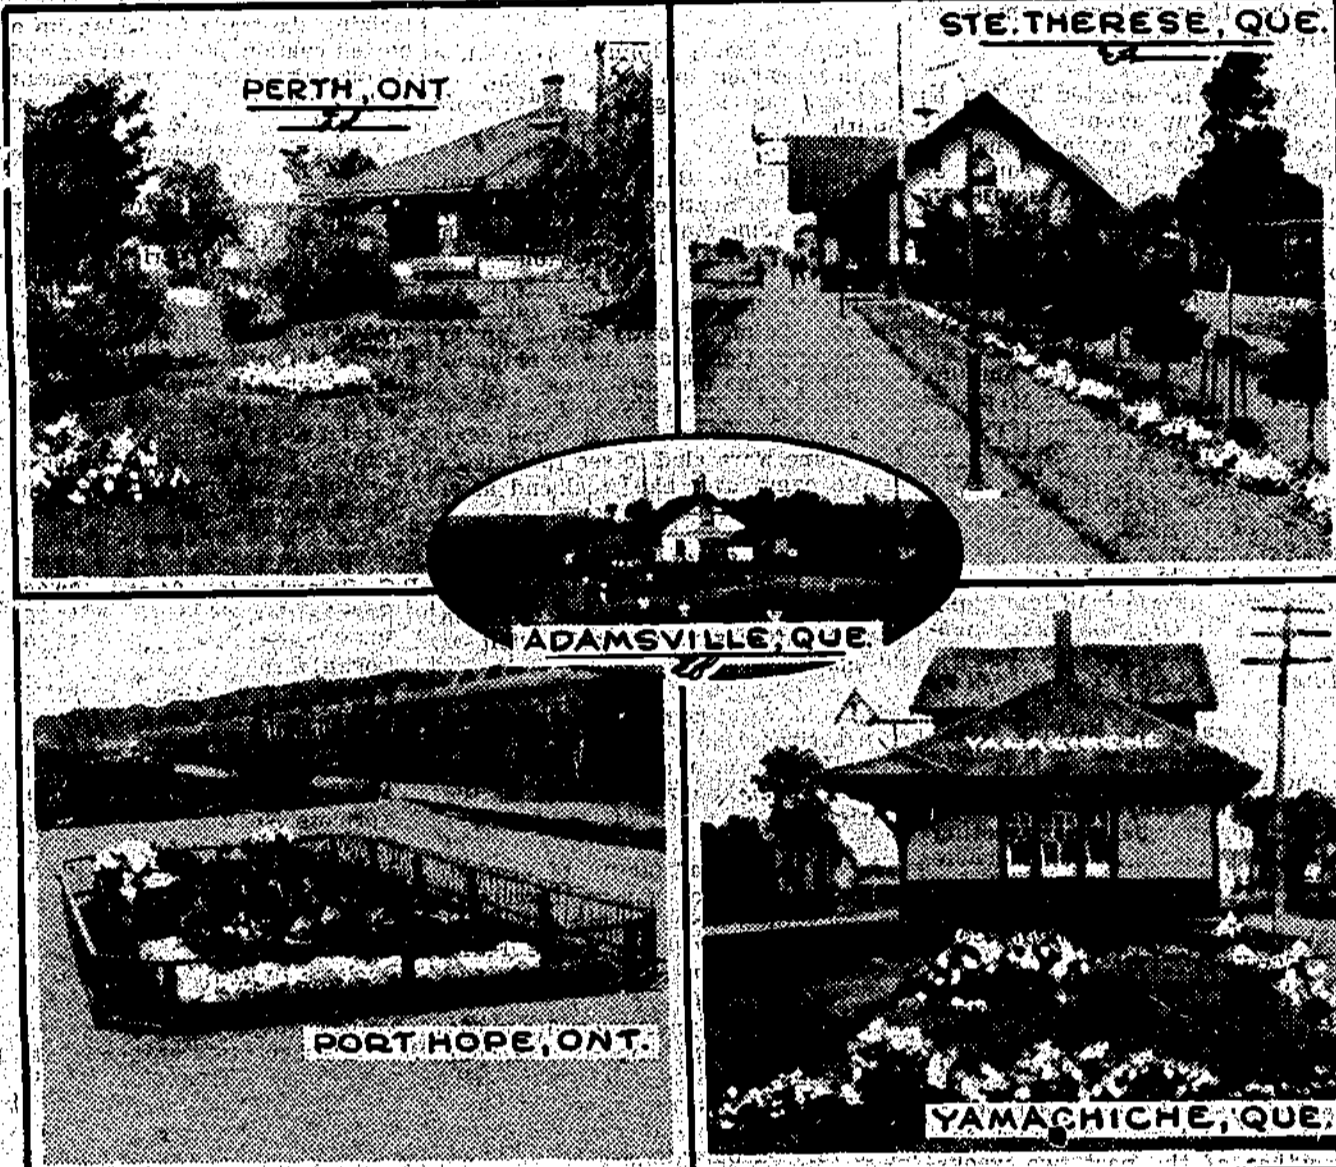

THE MUSICAL TREAT OF TWENTY YEARS

AFTERNOON CONCERT AT 3:30—Recreation Grounds EVENING CONCERT at 8:00 ARENA, NANAIMO AVE.

ADMISSION—\$1.00, inclusive of tax for each concert.

CHILDREN SHOULD ATTEND—A Special Programme has been arranged for the afternoon concert. It is part of their musical education. Children, under 15 years accompanied by adults will be admitted free to afternoon concert. If not accompanied by adults the admission fee will be 25c.

BEAUTIFYING A RAILROAD SYSTEM

Strangers, travelling upon the railways in Canada find pleasure in passing through a country that is new and fresh and possessing a wild, primitive grandeur practically untrampled. But in no small degree this pleasure is heightened and contributed to by a wonderful transformation wrought artificially by the lavish use of trees and flowers which have been planted and cultivated under the supervision of horticulturalists employed for the purpose by the railway company.

The most striking example of what can be effected by this means is to be seen along the Canadian Pacific tracks through the Prairie Provinces, according to an article on the subject in the April "Landscape Architecture" by E. L. Chicanot.

"Along the more than three thousand miles of main line," writes Mr. Chicanot, "there were naturally a good many men, station agents, section foremen and others who were garden lovers and who, with their limited means at their command and to the best of their ability, cultivated little pieces of ground about the scenes of their activities. The planting of a little garden at a station, especially in certain bleak, treeless areas, was a conspicuous feature and added some little beauty to the surroundings. This gave to a higher official of the company, about thirty-five years ago, the idea of expanding the work of beautifying the grounds by assisting and encouraging agents and others in work of this kind. This took concrete form in the distribution, to station agents throughout the system of free packets of flower seeds. Inevitably, of course, some men did not bother about them but sufficient did to produce a very marked effect and make noticeably attractive those stations where the seed had been properly used and cared for.

"The impression was so striking that the Operating Department of the company proceeded to have small gardens laid out and planted at some of the principal stations and division points along the system. The result of this again was so impressive that a special study was made of the whole question, and subsequently it was decided to engage in the work thoroughly and systematically and to add an expert horticulturalist to the staff."

"The work since that time (1908) has grown tremendously, each year seeing a number of new gardens laid out about the company's stations until today the Canadian Pacific Railway has the largest number of gardens of any railway company in the world.

"Now along the steel system from coast to coast lies a series of fair gardens and spots of green sward and often the cool and refreshing shrubbery about the station constitutes the one cheerful feature of entry into a town otherwise drab and unattractive."

TRAGIC END OF KELOWNA LAD

Popular Youth Shoots Self While Temporarily Deranged.

Kelowna, July 29.—The community was startled and deeply grieved to learn on Monday morning that one of its most promising younger members, Howard Turner Lenthley, twenty-year-old son of Mr. J. Lenthley, had been found dead in his father's garden, on Glenn Avenue, under circumstances which pointed either to a shooting accident or suicide. As there seemed to be no motive for the latter, it was supposed that an accident had occurred but the result of an inquest, held at the city police court the same afternoon by coroner E. Weddell, was arrival at a verdict of self-destruction.

Howard was a quiet, studious young man, fond of his home and good reading, and not given to running around like others of his generation. He was a member of the local troop of Scouts for several years, and was generally liked by his comrades in that organization and by all others who knew him. The whole-hearted sympathy of the entire community is extended to his sorely stricken father, brother and sister in their terribly tragic and unexpected bereavement.

THE SEA SERPENT DISPORTS ITSELF

Close to Shore—Seen Through Glasses Appeared About 15 Feet in Length Pouchland, July 28.—It seems as though the famous sea serpent was making itself prominent of late, for it has been seen several times recently. On Saturday night Mr. Allan Wilson had a good look at the creature with

the aid of a pair of field glasses. The monster was seen quite close to shore and was described as about fifteen feet long, as large as a small log, and the head shaped like a sheep. After playing for a short time it started across the lake for the island. It went at a great speed, causing a spray to fly in front of it, and making a swell eighteen inches high. It is beginning to seem as if the much-made-tun-of-sea serpent is a reality after all.

Where King Carnival Holds Sway

Upper—The Taylor party at Kent House; a snow-ball fight. Upper left—Skiers at Battleground Park, Quebec. Lower right—Ski-joring with motorcycle.

Special holiday festivities at Christmas, including a superb fireworks display at the Chateau Frontenac opened the two months winter sports season programme of the Frontenac Club at Quebec City. Those continued all Christmas week and were followed on December 30 by the international intercollegiate ski competition in which two entries from Yale and entries from McGill, Loyola and University of Montreal at Montreal, Ottawa College at that city, and Laval University of Quebec, competed in a five-mile cross country ski race and in ski jumping. The former was won by McGill and the latter by Loyola while Loyola also won the Frontenac Winter Sports Club trophy for the best aggregate of points in the competition.

The opening of the New Year was featured by hockey games in one of which Princeton University played a Quebec team, Sons of Ireland, and were defeated. There were also bob-sled races and skiing.

Continuance of fine weather and favorable snow conditions have brought the winter sports well into their stride and after the first American invasion by the Dr. Tozier party of about 270 people from Boston, there came a further descent of many tourists from various states in the Union to partake of the keen, invigorating air and exhilarating sport offered in such abundance. Both the first and all succeeding parties put up at the Chateau Frontenac. Individual groups from across the line are also swelling the list of guests and it may be mentioned that two Shea Tours are scheduled to arrive at Quebec next month.

The combination of the best words in luxury at the Chateau Frontenac with every variety of winter sports right at the door of that continent-known hostel accounts for the large influx of visitors. Skiing can be indulged in with no delay or discomfort as sleds may be put on in the hotel and then one steps right out on to crisp even snow runs and jumps. Skiing is catered to by a rink that is located right on the famous Dufferin Terrace onto

which the hotel opens. A half-mile toboggan run, brilliantly illuminated at night, sends the devotees of this form of sport whizzing at a 60-mile an hour clip straight up to the main entrance of the hotel. There are only a few of the winter pleasures so lavishly furnished.

For those who prefer to take their outings more seriously and with a greater expenditure of energy, excursions on snow-shoes or skis have been arranged which will carry the enthusiast to places famous in history, such as Ste. Anne de Beaupre, the Montmorency Falls, and across the ice bridge over the St. Lawrence to the Island of Orleans.

High lights in the winter sports programme take in international hockey matches, of which Princeton-Sons of Ireland is a fair example. The same Quebec team will also meet a team from Dartmouth University. The big noises are, however, two, February 6 and 7, see the holding of the International Snowshoe Union during which world and Canadian Championship snowshoe races will be run. It is expected that nearly 3,000 uniformed snowshoers will be present from all over Canada and the United States. All sorts of old-world French-Canadian customs and unique features will distinguish this event.

Following the Mardi Gras festival and carnival on February 15 the international Dog Derby will be held February 18-19-20. It will cover 125 miles in all and will be over a distance of 45 miles a day. Many teams from Eastern and Western Canada, from the New England States, and even as far as Chicago are scheduled to take part.

The Curling Bonspiel week and one championship Bob Sled races will bring the season to a conclusion February 27. One of the most popular features of recent years is the team of husky-dogs under the guidance of Arthur Beauvais the well-known Indian guide, and led by the redoubtable "Mountie", which takes passengers for long mushes across country and which are sometimes used to pull ski-ers.

RAINS ARE URGENT NEED IN DISTRICT

Or Much Fruit May Shrive Up on Trees

MEASURING BOXES DEEMED NECESSARY

Lack of Water May Mean Abandoning of Cover Crops

(By S. W. Dafee, in The Province) Penticon, July 31. — Early apples, peaches, plum and Bartlett pears have moved to the packing houses during the present week, the bulk of the peaches being transferred to the canneries which this season will absorb a large part of the crop. Early in the week the very end of the apricot crop was picked and, judging from marketing reports, this crop was disposed of under conditions less difficult than those that marked the selling of the unexpectedly large tonnage of cherries.

Fruit of all kinds continues to size up satisfactorily, excepting in orchards where the water shortage has been pronounced. To a considerable degree this year's tonnage from the Okanagan Valley will be dependent upon weather conditions from now on. During the week bench orchards in the Penticon district have been receiving three-day irrigations from the reservoirs. It is just possible that there may be another one or two days' water available, but there is no certainty as to that. This means that rain will be necessary in the early part of August or a good deal of fruit will shrivel up on the trees before it reaches maturity.

Faulty Distribution System

Judging from reports from the Summerland district, there is a more pronounced shortage of water there than in the Penticon area, and both soft fruits and apples already are being somewhat seriously affected on many orchards. In the Penticon district the most pronounced shortage of irrigation service has been in what is known as the Four-Mile Creek, which is the farthest away from the main distribution system on the Penticon benches. Orchardists in this area have been experiencing serious difficulties in getting irrigation supplies for weeks past, due to a large measure to a faulty distributing system. Lacking as it does a proper system of measuring devices, the Penticon system fails to deliver full supplies of water to the outlying ranches for the simple reason that orchardists, occupying the intervening stretches of land who think they require more water than the ditch riders allow them, lift their gates an inch or two, with the inevitable result that the farthest end of the system is robbed of its supply. The municipal authorities are alive to the situation and realize that a fair distribution of water to the individual orchardist cannot be maintained until some rigid system of measuring is installed.

The exceptionally dry seasons prevailing since 1922, have so emphasized this weakness in the system that next season will almost certainly see the installation of measuring boxes at every orchard intake, thereby ensuring equality of distribution.

During the present season measuring boxes have been installed at Naramata, to the delight of everyone but the orchardists who in past seasons have insisted on being given more than their proper allowance. It is believed that a similar installation of measuring devices in the Penticon district will result in more equitable distribution.

As for the storage supplies, they have become so inadequate to meet the present requirements of the district as to be of little practical value and it is realized that a high price has been paid for the few hundred feet of water that is sparingly distributed over a large acreage. The provision of additional supplies is becoming a financial problem of no small magnitude, more particularly as there is a disinclination on the part of the people to endorse by-laws involving heavy expenditures for reservoirs which at the best will supply a few additional hundreds of acre feet. Pumping from Lake Okanagan to the bench orchards is advocated by some, although lifting water the 400 feet necessary would be a very costly undertaking.

May Abandon Cover Crops

Orchardists say that if the water problem is not solved soon it will be necessary to abandon cover cropping to some extent and revert to the old system of open cultivation. Cover crops require additional water. It is suggested that on land that is now in good shape for production cover cropping on alternate years, with the application of some manure or nitrates, would maintain soil fertility. Undoubtedly a ton-acre orchardist, keeping half his acreage under cover crop and the other half in open cultivation, although lifting water the year or two, could economize to a considerable extent on water. In California, districts where water supplies are short, it is said, open cultivation and the application of nitrates is the general system followed.

The Oliver and Kaledon districts are in a better position as regards water than other irrigation districts. At Oliver supplies are ample, while at Kaledon growers expect to continue irrigating throughout August.

Promising B.C. Students Earn Success in Recent Music Examinations

TALENTED Vancouver students who passed recent examinations of the Toronto Conservatory of Music: 1. Claire Williams, elementary theory, honors; 2. Enid Williams, intermediate piano; 3. Margaret Ayres, introductory piano, honors; 4. Eleanor Holder, elementary piano, first-class honors; 5. Winifred Edith Traish, elementary theory, first-class honors; 6. Helen McIntosh, primary piano, honors; 7. Grace Jessie Barry, junior violin, honors; 8. Fernie Swanson, primary piano, honors; 9. Mrs. Beatrice At. Ede, intermediate grade piano, first-class honors; 10. Phyllis M. Ward, intermediate grade piano, first-class honors; 11. Mary Oliver, junior grade piano, honors; 12. Edna Sellar, primary grade piano, Associated Board of R. A. M. and R. C. M.; 13. Doreen Gravestock, primary grade piano, Associated Board; 14. Jeannette Johnstone, violin, advanced, distinction, Associated Board; 15. Robert Bloom, preparatory Trinity College, with honors; Penticon, B.C., students in the above group are: 16. Sidney Corcock (right), Raymond Corcock (left), primary grade piano, first-class marks; London College; 17. Gordon Heron, elementary grade piano, first-class marks.

BIG WELCOME AT CALGARY

Coldstream Guards' Bandmaster Made Indian Chief

Indicating the high regard and esteem toward Lieut. R. G. Evans, bandmaster with the Coldstream Guards Band which comes to Penticon on August 12th for two concerts, the following story, taken from the Calgary Herald of July 12th, tells of the impressive ceremony on the occasion of his being made a chief of the Blackfoot tribe of Indians who were at the Calgary Stampede in full force this summer. This honor has already been given to H.R.H. the Prince of Wales, Sir John Martin-Harvey, Sir Douglas Haig, His Worship Mayor George H. Webster, and L. W. Brockington.

Chief Running Rabbit

It was an impressive scene when the lieutenant, escorted by Chief Calf Child, marched onto the platform, followed by representative Indians, men, women and children, of the Blackfoot, Sarcee and Stoney tribes. Lieutenant Evans, clad in his scarlet coat and busby, knelt before the chief, who, in impressive tones, interpreted by Mrs. Little Light, recited the ritual, and named the lieutenant "Chief Running Rabbit." The new chief was then saluted by the other chiefs and members of the tribe, and there was a solemn march around the platform twice, when the ceremony was concluded, the new chief and Chief Calf Child walking hand in hand. The really magnificent costumes of the Indians, buckskins, beads and feathers; almost relics of a bygone age, contrasted strangely with the smart uniform of His Majesty's Coldstream Guards. It seemed to be a symbol of the overshadowing protective force and power of the empire, that it meant, if need be, that the Indians who represented generations of the aboriginal tribes of a vast continent, would be fought for and protected by the same regiment which the band represented with such honor. It was the mingling of two races, east and west, both living under the same flag; one race glad to strike the right hand of fellowship into that of the darker brother, and claim brotherhood and kinship; the other, living under the same flag, and under the protection of a benevolent and beneficent race.

FOREST FIRES ARE DYING OUT IN DISTRICT

Menace Now Believed Over For This Year.

CHUTE LAKE BLAZE STILL UNCONTROLLED

Crews of Firefighters Reduced to 75 or 80

The forest fire menace has died down considerably during the past week, and of the six fires burning in the district only one is not under control.

COBHAM IN AUSTRALIA

Port Darwin, Australia, August 5.—Cobham, British flyer, landed safely in Australia, after his 10,000 mile flight from England.

Quebec to Have New Sport Facilities

With the first fall of snow covering the ground Quebec is putting the finishing touches to a programme of winter activities that will extend throughout the season and cover every phase of outdoor sport. A ski jump that will rival those of Montreal and Ottawa, and attract amateur skiers of international fame is planned for this city, and engineers are already at work on the Dundas Terrace property of the Quebec Seminary. The jump will be opened in due course under the auspices of the Frontenac Winter Sports Club, a new sportive organization under the patronage of the Chateau Frontenac and direction of E. Des Balleys, internationally known winter sportsman, who has drawn up a programme of international competitions, including figure skating, curling, ski-jumping and jumping. Figure skating, curling, and hockey will be held during the coming season. Mr. Des Balleys is supported by local civic, sporting, military and other authorities, while a number of offices in the Frontenac Winter Sports Club have been left open for representatives of clubs in the United States.

Featuring in the programme already outlined are ski, hockey and skating tournaments at which Canadian and American Universities will compete. In this connection it is announced that the Princeton University hockey team will meet the Sons of Ireland in Quebec, February 10th, and on the following day will meet the McGill team at the new Forum in Montreal. The American team comes from the University of which the late Woodrow Wilson was president when elected to the Presidency of the United States. Ski-joring will receive much attention and owners of fast horses are being encouraged to train them for that sport. Races will be held on a track of well beaten snow. The Chateau dog team will play its usual part in aiding sport and merriment, and will be housed in a little Eskimo igloo, adding to their picturesque appearance.

ALLEN GROVE

Miss Edith Solbert spent the past week in Penticon, the guest of Mr. and Mrs. Fumerton.

Mr. George Preston has recently purchased a touring car.

At the annual school meeting held on Saturday, George Preston was elected trustee for a three year term, and W. J. Thompson re-elected for a two year term, and F. C. Howell was appointed auditor.

R. L. Allen was a delegate to the Liberal convention in Penticon on Thursday last.

Mr. and Mrs. W. J. Thompson attended the wedding of Mr. C. Kingzett and Miss Gray in Penticon on Friday.

Mrs. R. L. Allen and son William recently called on the Traffroy family of Trout Creek and Mr. and Mrs. E. Campbell of Garnet Valley.

Mr. and Mrs. Walker of Marron Valley.

Taking the ANT out of PANtry

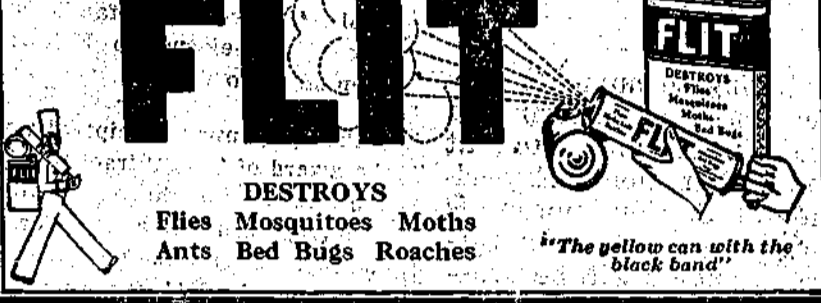

ANTS ruin food. Spray Flit and kill them. Flit spray destroys ants, bed bugs and roaches. It searches out the cracks and crevices where they hide and breed, and destroys insects and their eggs.

Kills All Household Insects

Flit spray also clears your home in a few minutes of disease-bearing flies and mosquitoes. It is clean, safe and easy to use. Spray Flit on your garments. Flit kills moths and their larvae which eat holes. Extensive tests showed that Flit spray did not stain the most delicate fabrics.

Flit is the result of exhaustive research by expert entomologists and chemists. It is harmless to mankind. Flit has replaced the old methods because it kills all the insects—and does it quickly. Get a Flit can and sprayer today.

TO OKANAGAN LAKE

I've hiked around thy shore, O Lake,
Sometimes I rode a bike;
On a Ford off I've sped
Along thy scenic pike.
Thy beauties I rave about—
O glorious sunset glow—
Sweet perfume and blossom bloom
Where luscious apples grow.

I've sat upon the "Sicamous"
From the Landing to Peachland,
Then on to Penticon
Where her bowsprit rules the strand.
But it seems I'm denied
What others saw, O Lake.
You never gave me a glimpse
Of your wondrous, wily snake.

Your serpent, O Lake,
As the college glider beat
The way it does the charleston
On his slimy, finny feet
The Pentowna isn't i nit
They all say for speed
The way to do the nose dive
When racing after feed.

Well, I should know, O Lake,
This scaly monster shy
Could not from depths be lured
By just a word or sign
So there's no regret, O Lake,
Next time I may not fail.
Yet I'll swear takes stronger stuff
Than Kelowna's ginger ale.

Penticon, July 27, 1926. —Devilinsky.

Facts of the Brewing Industry in British Columbia

THE Brewing Industry of British Columbia employs hundreds of men with an annual payroll of about three-quarters of a million dollars, using per annum nearly ten million pounds of malt, made from barley grown in Canada, and over one hundred and fifty thousand pounds of hops produced in British Columbia.

It requires over one hundred thousand dollars for fuel, mined in British Columbia, to produce the beer consumed in this province. Many hundreds of thousands of dollars are paid by the brewers annually for materials such as bottles, coppers, crownstoppers, labels and bottle wrappers—all of which are manufactured in Canada.

THE taxes paid by the Breweries to the Government amount to over eight hundred and seventy thousand dollars per annum, exclusive of income taxes.

THE citizens of this province must recognize the importance of such an industry and help to build it up; payrolls and industries are building cities and are the foundation of prosperity.

THE Amalgamated Breweries of B. C. are manufacturing good beers, fully matured and aged, a product recommended by physicians on account of its nourishing and health-giving qualities; these beers contain only a very low percentage of alcohol and therefore are the proper stimulant needed when exhausted or overworked, as recognized by medical authorities.

THE Vancouver Brewery Limited, Rainier Brewery Co. of Canada Limited, Westminster Brewery Limited, Silver Spring Brewery Limited and the Victoria Phoenix Brewing Co. Limited, members of the Amalgamated Breweries of B. C., are under supervision of the Liquor Control Board, and their beers are analyzed from time to time by expert firms of the continent upon invitation of the Liquor Control Board, which gives ample assurance to the public that they receive only pure and wholesome beers when bought either in the Government Vendor Store or in licensed beer parlors.

This advertisement is not published or displayed by the Liquor Control Board or by the Government of British Columbia.

C. P. R. TRAIN AT KELOWNA

New Era Marked By First to Reach City.
Kelowna, Aug. 5.—Marking a new era for Kelowna was the arrival here at 8 o'clock this morning of the first Canadian Pacific freight train.
Realizing the importance of this run, the company intends using oil-burning locomotives exclusively for this service, which is operated on the C.N.R. rails from Vernon.

Statisticians say that the average woman has a vocabulary of 800 words. You can figure out for yourself how often she has to repeat herself in the space of half an hour.—Herald Cities Star.
A witty man recently said of the great poverty in this country: "If we are all finally compelled to go in the poor house, I thank God we will all be able to go in our own automobiles."
—E. W. Howe's Monthly.
Gossip among men and women is a natural as the cracking in a poultry yard. Who knows that the cracking of hens is not gossip about one another? Who knows that the crowing of roosters is not boasting of their strutting? —E. W. Howe's Monthly.
No matter what happens to the climate the crop of black flies and mosquitoes always does well. —Toronto Star.

LOCAL HAPPENINGS

Among those on the platform of the K.V.R., bound for Vancouver at the start of the excursion on Tuesday, were Mrs. A. McLaughlin and Ruth, Mrs. Alex Smith and Margaret and Miss Fisher. The temptation of a couple of weeks was strong enough to take Mr. and Mrs. Harding along. Mrs. Hayes and Mrs. Kerr went down too. Mrs. Alex Steven, Joan and Margaret availed themselves of the lull in fruit picking. Mrs. Ibbitson went along and may stay longer. Mrs. Rowley thought this a good time to desert the post office at Summerland and joined the crowd.

Municipal Clerk Nixon had to break in on his vacation and came up on the coast to attend to the Canyon Creek bylaws and then returned to the city, where, with his family, he will go on with their tourist trip down into Washington.

Mr. John Tait, district agricultural representative, has been attacked by the touring fever. He is combining business with pleasure and is going through the state of Washington and other points south. He may go as far up the coast as Vancouver. Mrs. Tait and Irene accompanied him.

Mr. Lockwood and family are touring this week-end to Kelowna, and then on up to Vernon.

Promptly upon receipt of notice of the award of the contract for the Canyon Creek dam, the contractors sent their representatives here for a day, and then on up to the site, where work was promptly laid out.

Mr. Willis Walters is reported much improved this week. His brother-in-law, Mr. Childs, is here for a short time.

Mr. Chas. Cooper, while out fighting fire, had to come in to the hospital for attention to a cut knee.

At the tourist camp on Monday night a party stopped to enjoy the big trees. They had driven their Nash car from North Carolina to Chicago, where they picked up two more friends and motored on across the continent, favoring Summerland with a visit.

Mr. J. A. Reid is looking after Mr. Muir Stewart's office at West Summerland.

Mrs. Robertson and young son from Calgary are visiting Mr. Geo. Robinson at the south side of the Giant's Head.

Miss Spencer and Mrs. Wm. Ritchie returned home on Monday from Vancouver.

Among the visitors this week that we are pleased to welcome is Mr. Ed. Arkell, who, with his wife and son, have come across from Ontario. They will spend a couple of weeks before returning to their home.

Mr. Bert Harvey has returned from a motor trip to Victoria and across the island.

Miss (nurse) Robinson and Mrs. Mountford left on a motor trip to the coast intending to stay about ten days.

Mr. J. W. Rutherford, Kettle Valley agent, is taking up residence where Mr. Steeves has been living.

Mr. W. C. Kelley was over to Princeton the end of last week, acting as prosecutor for the crown in a case tried there.

Mr. Joe Liddell, fire warden, has four gangs working on the east side of Canyon Creek. When Mr. H. Tomlin and Wm. Ritchie were up with the engineer to Osprey Lake, they passed one of the gangs cutting a strip to head it off. On Monday the fire was reported still out of control.

Mrs. J. L. Neato, accompanied by her two-year-old son, is spending a few days in Summerland, while holidaying in the valley.

Rev. L. A. Miller, who is visiting his parents, P. S. Miller, Tront Creek, will hold special services in the Lakeland Baptist church, beginning August 8th, at 7:30 p.m., and will continue during the week, including Sunday, Aug. 15th. Some of the topics will be "A Fearful Thing," "Does Sin Pay?" "The Meanest Man in Summerland," and many other subjects of interest.

The Kelowna Regatta will take place on Wednesday and Thursday, August 11th and 12th. On Wednesday His Majesty's Coldstream Guards Band will be in attendance, and will also give a concert in the evening at 8 p.m., for which reserved seats may be booked at P. B. Willis & Co., Kelowna. 31-1c

Cyril Mossop passed his junior grade Toronto Conservatory of Music examinations held recently in Penticton, with honors. He also passed his primary theory examinations.

A meeting of the local committee of the Okanagan Valley Musical Festival was held on July 28th, at the home of Mr. P. Mossop, Mr. G. W. Cope presiding. The meeting was called to discuss recommendations to be made to the central committee at Kelowna, on next year's programme.

Mr. and Mrs. A. J. Elliott left on Wednesday for Vancouver.

Two more Summerland people left this week to attend the Vancouver exhibition, Mr. Hunter leaving on Tuesday and Mr. Richards going out on Wednesday.

The C.P.R. is extending the stock track, a gang of men working there this week.

Mr. Orr left on Saturday on a business trip to Ontario.

Miss Helen Ross arrived on Sunday from Nelson to visit Mrs. R. M. Ross.

Mr. and Mrs. Denny left by car on Saturday for Nelson, via Spokane, on a holiday trip.

Mrs. Waddell and her son Robert arrived last Friday from Montreal, and are guests at the home of her sister, Mrs. D. C. Thompson.

Mr. J. N. Cran, accompanied by his daughter, left on Tuesday for Vancouver. He is expected back tomorrow.

Miss K. Elliott, who has been with the Summerland school for a number of years, has received an appointment on the staff of the Courtenay school on Vancouver Island, to have charge of the primary department. This is a graded school, the plan for which was taken from the Summerland Central. The people of Summerland as a whole wish Miss Elliott as much success as she had here, and quite as many friends in her new school. Miss Merle Smith takes Miss Elliott's place on the local staff.

A motor accident at the top of hospital hill on Thursday, caused by the narrow passing space, made a nasty smash of cars belonging to Dr. Graham and Mr. McCutcheon. The front wheels of the two cars locked and smashed up the lights and fenders. No person was injured, fortunately.

J. Forsythe Smith, formerly of the staff of the Vernon News, and well known to many here, was in Peachland on Saturday evening last to address a public meeting of growers or others interested in the exporting of fruit. Mr. Smith has for some time now been looking after the interests of fruit growers in the old land, and, being in close touch with all overseas fruit marketing problems, he was able to give those present a profitable and interesting address and gave many suggestions for the better handling of our product for those markets. A hearty vote of thanks was tendered Mr. Smith at the close of his address.

LIFTING WATER OVER 329 FEET

Big Pumps Working Successfully at Okanagan
Okanagan, Wash., Aug. 3.—The big pumps installed at various points along the river are proving highly satisfactory and in their operation have overcome any fears held that trouble would develop in raising the water of the Okanagan river to high elevations.
The 150 h.p. plant of the B-O Apple Company, installed by C. E. Blackwell & Co.; the 60 h.p. plant of the South Side Pump Company, installed by Rich-McHugh, Inc., and the large plant at Shellbrook Point are in operation and are giving efficient service. Stretching of cable that anchored the big pipe line of the B-O plant developed under the high pressure necessary in lifting the water 329 feet, but this was remedied with a delay of only 24 hours and the plant has been in operation for ten days.
All equipment is on the ground for the two 200 h.p. units of the Twenty-nine Pump Company, and it is expected the plant will begin operating on Monday. Time is being allowed to permit green concrete to harden. The big pipe leading from the river to Progressive Flat has been tested for leaks and found tight.

PHIL WADE HAS RETIRED

Pioneer Employee of C. P. and K. V. Railways.

One of the pioneer railwaymen of the district has retired from active service in the person of Mr. Phil Wade, roadmaster of the K.V.R., at Brookmore.
Mr. Wade entered the service of the Canadian Pacific Railway forty years ago, and followed the road through its early construction days to the Pacific coast. With the construction of the Kettle Valley Railway he entered its service and has been a valued employee ever since. Friends of Mr. Wade will hope that he will enjoy many years of well earned rest at the coast, where he will reside in future.

Mr. Wade has been succeeded in his duties by Mr. D. H. Carruthers of Port William.

OLIVER HAS GOOD EXHIBIT

E. W. Mutch and Son Have Displays at Coast

Vancouver, Aug. 5.—E. W. Mutch has a fine exhibit of fruit, etc., from Oliver at the Vancouver exhibition. His son Wallace has also a small display from Penticton.

COAST MAN DROWNED AT PENTICTON

Alex. Bertrand, of Vancouver, Sank When Rowboat Capsized.

PULLED OUT BY RALPH THOMAS

But Efforts of Doctors and Others Failed to Revive Him.

Penticton, Aug. 4.—The second death by drowning to take place in Okanagan Lake at Penticton this year, occurred on Monday afternoon when Alex. ("Shorty") Bertrand, a fire-fighter at the Gillis Creek fire, drowned when a rowboat in which he was riding capsized.

Bertrand, in company with Jack LaPlante, a cousin, who had also been at work on the fires until recently, hired a boat for a row. When only about 100 yards from shore and about 250 yards west of the Aquatic Club, the boat turned over, throwing both men into about seven feet of water. LaPlante clung to the upturned craft, while Bertrand commenced swimming ashore. He had not gone far, however, when he was seen to disappear.

The cries for help were heard from the Aquatic Club and boats immediately pushed off to aid. LaPlante was pulled into one of the boats, while Ralph Thomas dove in after Bertrand. He was taken ashore and artificial respiration was given by Drs. White and McGregor and Chief Fraser, Constable McConnell and Constable Allercott. After thirty minutes work he was pronounced dead, his heart failing to respond.

The deceased had resided at Vancouver for some years previous to coming here, having been employed by the firm of Coleman & Evans. He was 35 years of age and a native of France, although a naturalized Canadian citizen, having resided in Vancouver. It is thought that a brother resides in San Francisco.

ATTEMPTED BURGLARY

Constable Allercott Fired Three Shots Sunday Night.

Penticton, August 29.—Residents along Main street were aroused last Sunday night after midnight by the sounds of gunplay, which turned out to be Constable Allercott of the local police, taking a pot-shot at the disappearing forms of three marauders who had broken into the Penticton Bakery somewhat earlier.

While patrolling the streets, Constable Allercott saw three men rush from the bakery as he approached, and on investigation discovered that the store had been entered through a window from which the screen had been ripped, and that both doors were open. He notified Mr. Travis, who found that some bread and cookies had been removed, later found under the sidewalk near the store.

The men had meanwhile disappeared, but about one o'clock the constable saw them going south on Main street. Instead of halting to his heels they rapidly "marathoned" up the street. The constable fired two shots but failed to halt them, and they disappeared into some brush and made their escape. It is thought that the burglary was committed by "hoboes," but they have so far not been found.

The Oroville baseball squad turned in two victories recently over champions of other leagues, and are now classed as one of the strongest teams in northern Washington and southern B. C. They defeated the Copper Mountain team, with Cecil Kimberley of Vancouver in the box for the Smil-kameen boys, in a close game recently at Princeton, and last Sunday they took a fall out of the Moose Hardware team of Wenatchee, winners of the Twilight League there, by a score of 2-1. Callahan twirled the first game at Princeton, but played first at Oroville.

M. M. Colquhoun has been appointed revising officer for the coming federal elections, by the judge.

Crowds Hail Returning Evangelist After Month of Mystery

The return of Aimee Semple McPherson, the feminine evangelist, from a month's mysterious "abduction," was the occasion of general celebration in Los Angeles. Above are seen the great crowds which welcomed her as she arrived in Los Angeles and, in the insert, the evangelist herself with one of the many floral tributes which were given her.

TWENTY-FIVE ARE DROWNED

Steamer "Bitar" Goes to the Bottom Near Araras Bay

Rio de Janeiro, Brazil, Aug. 5.—Twenty-five persons were drowned Wednesday night when the coast-wise steamer Bitar, carrying freight and passengers between north Brazilian ports, sank after colliding with a pontoon near the Bay Araras.

NOMINATED LIBERAL CANDIDATE FOR YALE

FREMONT B. COSSITT
Vernon, July 31.—Fremont B. Cossitt, Liberal candidate for Yale, is one of the best known men in the Okanagan Valley, and has served Vernon in many capacities. British Columbia profited by his services at the British Empire Exhibition at Wembley, where for six months he acted as Dominion Fruit Representative, and as J. Forsythe Smith said, "Got to know everybody worth knowing." For ten years Mr. Cossitt was a member of the directorate of the Vernon Fruit Union, of which he was president for two years. He was vice-president of the Okanagan United Growers for two years; president and secretary of the country club for ten years; and for three years acted as president of the Vernon City club and the Vernon Storage Co. He is a former president of the Board of

No Untoward Incident on Margaret Says Government Counsel

Quebec, Aug. 5.—After having examined all documents, and after Mr. Duncan, Mr. O'Connor and myself have taken note of all relevant evidence, and the crew of the "Margaret" having been examined, I wish to declare publicly and categorically that no incident occurred aboard the Margaret which could be a reproach against the persons named, whether Mr. Lapointe, Mr. Bureau or any of their companions." So said R. L. Calder, K.C., government counsel at the opening of the enquiry into the cruise of the "Margaret," instituted at the request of Premier Meighen.

Trade and is also a director of the Vernon Box Factory and the Inland Ice and Cold Storage Company.
F. B. Cossitt has been a life-long Liberal and on other occasions has been offered the nomination.

One woman we know goes to the circus solely to get new dress ideas. She has just sold her opera glasses and bought a microscope.—Kingston Standard.

It is commencing to be a toss-up as to which is the greatest tumbler in the French circus—the franc or the cabinet.—Brantford Expositor.

WATER NOTICE

USE AND STORAGE
TAKE NOTICE that the Dominion Department of Agriculture, whose address is Ottawa, will apply for licence for the storage and use of 200 acre feet of water out of Crescent Creek, also known as Paul Creek, which flows easterly and drains into Trout Creek, about two miles below No. 1 Summerland reservoir on Trout Creek.
The storage dam will be located at Crescent (or Paul) Lake. The capacity of the reservoir to be created is about 200 acre feet, and it will flood about 150 acres of land. The water will be diverted from the stream at either the headgates of Summerland municipal system, or about 100 yards above the Kettle Valley Railway bridge over Trout Creek at the Dominion Experimental Station, and will be used for irrigation purposes upon the land described as Dominion Experimental Station, Part of Penticton Indian Reserves No. 1.
The licence applied for is to supplement a right to take and use water as per Licence No. 6492.
The notice was posted on the ground on the 26th day of July, 1926.
A copy of this notice and an application pursuant thereto and to the "Water Act, 1914," will be filed in the office of the Water Recorder at Vernon, B. C.

Objections to the application may be filed with the said Water Recorder or with the Comptroller of Water Rights, Parliament Buildings, Victoria, B. C., within thirty days after the first appearance of this notice in a local newspaper.
DEPARTMENT OF AGRICULTURE
Ottawa, Applicant.
(By W. T. Hunter, Agent)
The date of the first publication of this notice is 30th July, 1926. 30-4-c

Quebec, Aug. 5.—After having examined all documents, and after Mr. Duncan, Mr. O'Connor and myself have taken note of all relevant evidence, and the crew of the "Margaret" having been examined, I wish to declare publicly and categorically that no incident occurred aboard the Margaret which could be a reproach against the persons named, whether Mr. Lapointe, Mr. Bureau or any of their companions." So said R. L. Calder, K.C., government counsel at the opening of the enquiry into the cruise of the "Margaret," instituted at the request of Premier Meighen.

WATER NOTICE

Diversion and Use
Take notice that L. M. Agur, whose address is Summerland, B. C., will apply for a licence to take and use 1,000 gallons of water per day from unnamed spring located on said applicant's property, being Blk. 5, D. L. 2891, Map 124, Summerland. The water will be diverted from the said spring at a point close to East boundary of above property and about 400 feet south of Kettle Valley Railway right-of-way, and will be used for domestic and irrigation purposes upon following described lands: Blks. 4 & 5, D. L. 2891, and Blks. 9 & 10, D. L. 475, Map 161. This notice was posted on the ground on the 30th day of July, 1926. A copy of this notice and an application pursuant thereto and to the "Water Act," will be filed at the office of the Water Recorder at Vernon. Objections to the application may be filed with the said Water Recorder or with the Comptroller of Water Rights, Parliament Buildings, Victoria, B. C., within 30 days after the first appearance of this notice in a local newspaper.
The date of the first publication of this notice is August 6, 1926.

Be Loyal To Your Own Community

EXCELLENT FINANCES OF SUMMERLAND ARE SHOWN BY SALE OF DEBENTURES

Were Sold at \$100.77 and Are Now Being Advertised at \$102.47—Some Hints Thrown Out at Last Council Meeting of Another Decrease in Assessment Next Year—No Parking at Packing Houses.

At the regular meeting of the municipal council held August 10, Councilors Arkell, Bristow and Smith were present, with Acting Reeve Ritchie in the chair.

The report was received that the water was done for this year so far as irrigation is concerned. There will be a small supply that will be distributed as fairly as can be. This will last only for a short time.

The supply for the Experimental Station was to be cut off on Wednesday, as they will have then received fully up to their allowance. The ditch men will be taken off now; as the foreman may find he will need some help, the necessary men will be retained.

The hill to Bathfield, over which the cement for the Canyon creek dam will be hauled, is to be put in proper shape immediately as the cement is to be on hand in a few days.

The road in Garnet Valley is a hard one to keep in shape, and complaints of its condition were received. Arrangements were made to have this attended to.

Total for July accounts passed was \$4,000, including \$1838 for wages. The convention of the Union of B.C. Municipalities is being held at Vernon August 23, 24 and 25, and Messrs. Ritchie and Smith were appointed as delegates from Summerland.

An inspector for the construction of the Canyon Creek dam and a foreman on the construction of the pipe were appointed after the tenders were opened. These positions were given to J. E. Jenkinson of Garnet Valley, at \$175 per month if details are found agreeable.

Tenders were received for hauling of cement from Faulder to the top of Millers' hill on Canyon creek, and were awarded to Fyffe and Brind at \$5.50 per ton.

Miss Stoner put in an application for a tax sale property at Trout creek at a lower price than offered by the council, but it was decided not to change the price as it was considered reasonable.

The council commented on the Canyon Creek debenture bonds, which were sold at 100.77, and are advertised at 102.47. Summerland by this gets quite a boost as to its financial standing.

Acknowledgment of an order placed for a carload of cement for the Canyon Creek dam was read and date of shipment was noted.

A discussion of the Agur application for water record, advertised in the papers, came up for consideration. As this was believed to be a feeder to Prairie Creek, it was decided to object to his being granted a record.

The question was raised as to whether the C.P.R. have the new siding to the Walters packing house entirely on their land.

Parking signs are to be put up near the lower town packing houses and their instructions are to be enforced. It is considered too narrow to allow cars to be left standing near the packing plants. The place reserved will be from the foot of the telephone hill to the north of Walters' packing house.

The report of the party sent out to the headwaters looking for extra water was received. Mr. Sanderson of Peachland went to the Trout Creek headwaters and left two men to open the beaver dams and regulate the gates, while he went on overland, but could find no more water.

At Camp Creek Mr. Tomlin and Mr. King opened beaver dams and the supply let down ran the south main for one day.

The question of assessment came up. A change in the method was proposed, but the council, after debating the matter, felt they should leave well enough alone.

The question of trade licenses came up, more in connection with raising that charged to jitneys, but that was left over.

Lower Assessment
There was some hinting that the assessment would again be lowered next year.

The council adjourned at 5:30 and sat as a board of health, receiving Dr. Andrews' report. Among other items it showed births for the year ending June 30th as 26, deaths 15. Three new cases of tuberculosis were registered. Two complaints as to care of slaughter houses had been made, but no complaint of dairies. The council felt that it would be a good move if consumers insisted on tuberculin tests for dairy cows.

It was recommended by the doctor that the dust on the main roads should receive some consideration. The use of oil on the principal roads might be profitably considered.

Mr. Hobbs was successful in securing a harvesters' ticket, on a special excursion granted to seventeen men from this district, on Wednesday. He left for Moose Jaw to help with the harvest, expecting to stay till December or perhaps for the winter. The regular harvesters' excursion rates do not start for about ten days yet.

Early in the week Mrs. Jna. Ritchie motored with Kelowna friends down through Wenatchee.

Summerland may feel better, if it is true that many loves company. In knowing that Pentiction and Kelowna irrigation has been shut off for some time, in Kelowna they have had quite a pumping expense this year, to make up for loss caused by a break in their big dam.

Apples From Here Best In England

Mr. M. G. Wilson has received a letter from Covent Gardens, an extract from which is of interest to Summerland people. It reads in part: "We have just seen some of your apples here and I want to let you know that they are the finest apples that have ever been imported into England from anywhere." Mr. Roger Tingley will be pleased to know that these apples came from his orchard.

OLD CAPTAIN PASSES AWAY

Late G. L. Estabrooks Saw Many Interior Towns Grow Up

Pentiction, Aug. 12. Pentiction mourns today the passing of one of its oldest and most esteemed residents in the person of Capt. G. L. Estabrooks, who died at an early hour after a week's illness. He was in his eightieth year.

A man of fine character and possessed of a genial and attractive personality, Capt. Estabrooks was one of the best known men in the interior, and was personally well-known to the vast majority of the citizens of the Okanagan.

For sixteen years he was captain of C.P.R. steamers on Okanagan Lake and his stalwart form paced the decks of the "Aberdeen," "Okanagan" and "Sicamous" made his a marked figure, his cheery greetings, endeavoring him to hundreds of passengers and settlers. For thirteen years he has been living retired in Pentiction, where he saw the settlers whom he brought down the lakes develop many of the fruit districts of the Okanagan Valley.

The deceased was born in New Brunswick in 1847, coming to British Columbia thirty-two years ago. For several years he captained the steamer "William Hunter" on the "Sicoma" lakes, subsequently entering the service of the C.P.R. on the Kootenay and Arrow lakes. Later he was transferred as master of the first C.P.R. steamer on Okanagan lake, the "Aberdeen."

He was prominent in Masonic circles having been Master of Miriam Lodge, Vernon, in the early days, and on the formation of Orion Lodge, in Pentiction, he became its first Master. In addition he was past district deputy grand master, and in 1924 was made a life member of Orion Lodge. He was also a member of the Royal Arch Masons.

Capt. Estabrooks is survived by his widow and two sons, Otto and R. H. Estabrooks, and two daughters, Mrs. C. H. Jack of Halesy, Ont., and Mrs. Arthur Brindall of Vernon, B.C. The funeral will take place on Saturday from the Baptist church, the services at the graveside being under Masonic auspices.

DeHart Crate Used in Local Packing House, Has Unusual Features

Mr. M. G. Wilson intends using again this year the DeHart apple crate for shipping some of his Extra Fancy apples. This he used last season as well as the Co-operative in other parts of the valley. The results were very satisfactory. It is an ordinary apple box but there are slits like an egg crate, and a good stiff corrugated paper top. It is used for 96s and 112s only. The cost is only 20c over ordinary and the extra price received more than pays. Last year it was used on apples and pears.

This crate was tried out in other places last year, and for its special purposes is very satisfactory. It prevents the bruising caused by squeezing down the top on a box with an over-full bilge. No export training is needed by the packed, while wrapping is unnecessary with this crate. The attractiveness from a buyer's point of view is that greater care seemingly is taken with the fruit than when wrapping is done, as it is now. What prevents its general use is that it cannot be adapted to the many sizes packed out by the shippers.

Mr. K. S. Hogg is the fortunate winner of a very fine motor boat raffled off at the Kelowna Regatta. Mr. Hogg purchased a one-dollar ticket. The boat is estimated to have cost at least \$2,000. Mr. Hogg is now in Kelowna and expects to bring his new acquisition to Summerland in a short time. The boat will be the fastest on Lake Okanagan.

Weather is looked for in the packing houses very soon now.

OKANAGAN LAKE MONSTER WAS BALEFUL CREATURE WITH SUPERNATURAL POWERS

Indian Legend Was Recorded in Verse by Mrs. S. L. Allison, Princeton's Oldest Pioneer, Over Half Century Ago.

There has been a good deal of sceptical comment with regard to the monster serpent which is reported to have been seen at various times in the waters of Okanagan lake, but here is the experience of one of the oldest and most highly esteemed members of our own community, one whose veracity is unquestionable.

It is now more than half a century since Mrs. S. L. Allison and her husband chose a spot on the west side of Okanagan lake, where Westbank now stands, to start a cattle ranch, which grew to be one of the largest in the district. They called it Sunnyside and for many years lived a practically isolated life there, their only white "neighbors" being the Vernons at the head of the lake, the Ellises at Pentiction, and the residents of the Mission across the lake where Kelowna now stands.

One day Mr. Allison and one of his sons rowed across the lake, intending to return in the evening. Meanwhile, however, a sudden and terrific storm arose (those who have lived beside Okanagan lake know how unexpectedly such storms arise on its waters) and he was, of course, prevented from returning home that night.

By morning the storm had abated and Mrs. Allison went to the top of the cliff to watch for the return of her husband and son. The lake was still turbulent—a strong north wind was blowing, causing the waves to roll to the south with all the force of an ocean tide.

As she watched, Mrs. Allison observed a giant serpent, resembling a huge log, making its way northward with considerable rapidity, against the wind and waves. It swam with an undulating, up and down motion. Later it was reported that a man named Smitham, who was employed at the Mission, had seen the monster the same day.

This experience recalled to Mrs. Allison's mind a legend which had been imparted to her by the Indians, who averred that a certain small island situated about twenty miles from Pentiction was the home of a certain malevolent monster, which had a supernatural power over the earth and air, and frequently made use of winds and storms to destroy any foolhardy individuals who ventured into his domains.

When crossing the lake during stormy weather the Indians were wont to carry a pig, a pig or a chicken which they would throw overboard to appease the monster. Nothing would induce them to approach the island, and they deemed it impossible to land there had they wished. We may excuse the aborigines' belief on the ground that it is really very difficult to make a landing at the island in stormy weather. Charles and Forbes Vernor, after whom the city of Vernon, was named, were once blown completely away from the place while attempting to land. Monitor Island, as it has been called, was later bought by Lord Aberdeen.

The following is a poem written by Mrs. Allison, the theme being a tale told her by the Indians. It is taken from the rough copy as it was written at Sunnyside fifty years ago:

Okanagan Lake
The lake is like a mirror,
And the bright stars in the sky
Are reflected in its waters.
When wavering shadows lie
No shimmer on the water,
Not a stir in the warm air,
And not an insect murmur
Nor a sign of life is there.

HOT AFTER IT

And above the tempest's roar,
With the dawning of the morning
The wild wind was lulled to rest
And a little boat was floating
On the lake's still heaving breast.

Two floating on the heaving lake,
Two troubled skies between,
But of the crew that manned her
Not a living soul was seen.
Far westward on the island,
The grim island all men dread,
Their bones lie bare and bleaching
Among rocks all stained with red.
—Princeton Star.

AIR DISPUTE IN COURTROOM

Magistrate White Declares Cattle and Fruit Don't Mix Well

On Monday last Jas. Fyffe appeared before Magistrate White, charged with allowing his cattle to stray onto C. Barr's property. He was defended by counsel. Mr. Barr when called on, stated the cattle had been breaking in all summer and were a general nuisance, and on this particular day three of them were there early in the morning. He had a two-strand wire fence about his place, but he did not expect that to keep the cattle out. He drove them out this day and went across to Mr. Fenwick and asked him to keep them for a day.

Mr. Fenwick as a witness was called and stated Barr had asked him to hold the cattle for a day until he could find out what should be done about the matter, and that he found evidence in the orchard that these cattle had been eating the apples and breaking the trees.

Had Boy Helper
Mr. Fyffe, when called, said he had a boy to look after his cattle, as he had a bunch on range and some milk cows. The boy would drive the range stock back at night and bring in the cows. This day he was to bring in the cows of the range cattle as he could with the cows, as he had a buyer for them. Three had got away from the boy, and he (Fyffe) went out that night and again next morning to get them but could not find them.

Mr. Kelley, counsel for Fyffe, said that this time it was not neglected because Fyffe had gone out to locate the cattle, and did not succeed. He cited a case on the prairies where a man had brought his cattle had come up to the water and a storm had blown in as soon as this was noticed the farmer set out after them, only giving up at dark. The horses got on the track and some were killed. The owner sued to recover the loss and the court held the man had done everything reasonable to prevent the accident, as they had not been allowed to stray at will, and the railway had to pay.

Air Got Warm
The air got a little warm with the heat of some giving of evidence, till the court was called sharply to order. The magistrate summing the case up, said in part: "When neighbors are nursing a grudge it is a bad business and often leads to crime. It is better to do a little more than you feel like to prevent these troubles, Fyffe feels Barr should fence out the cattle but he recommended to Mr. Barr and Mr. Fyffe that they work together to get the cattle fenced out. This is not a cattle country, it is a fruit country. If the case was to be decided on all the evidence given, it would be a different matter, but it must be decided over the three head straying on this apple day."

The court was adjourned to question the boy when he returned that evening. When the boy appeared and gave his view of things, the magistrate decided the case, and fined Fyffe a nominal amount and costs.

Mrs. E. W. Stokrohn, who has been visiting Mrs. C. A. Walter for the past ten days, returned on Saturday to her home in Tacoma, Wash.

LOCAL HISTORY IS MADE IN MARRIAGE OF FIRST NATIVE BORN SUMMERLAND DAUGHTER

Miss Marion Beavis United in Bonds of Wedlock to Wm. John Mack, of Vancouver — Church Decorated for Occasion — Couple Will Take Up Residence on Tenth Avenue, Vancouver.

Summerland United Church was the scene of a pretty wedding on Friday morning, Aug. 6th, at 9:45 when Miss Marion Beavis, only daughter of Mr. and Mrs. T. G. Beavis, became the bride of Mr. William John Mack, eldest son of Mr. and Mrs. W. Mack of Vancouver.

The church was decorated for the occasion by Mr. and Mrs. S. F. Sharp, assisted by girl friends of the bride. A profusion of flowers, artistically arranged, and a large arch of gypsophila, fern and gladioli made a pretty setting for the ceremony, which was performed by Rev. A. E. Whitehouse of Pentiction. During the signing of the register Mr. T. G. Beavis sang "All Joy Be Thine."

To the strains of the wedding march, played by Mr. Percy Thornber, the bride entered the church on the arm of her father. She wore a gown of ivory satin with ribbon and seed-pearl trimming and overdresses of Georgette. Her veil of embroidered silk Brussels net was held in place with a dainty wreath of orange blossoms and she carried a bouquet of

Ophelia roses, carnations and fern. She wore a string of pearls, the gift of the groom. Miss Phyllis Teague of Kelowna, as maid of honor, was attired in a shell pink gown of brocade taffeta, while Miss Helen Bain as bridesmaid, wore a dress of coral georgette over pink crepe de chine. Both wore large white hats and carried bouquets of pink carnations and ferns.

Dr. Allen Harris of Summerland attended the groom.

Following the ceremony a reception was held at the home of the bride's parents, Beach Avenue. The wedding breakfast was served at fresco on the lawn overlooking Okanagan lake.

The customary toasts to the bride were proposed by Mr. Gilbert Thornber of Kelowna, who referred to her as Summerland's first native daughter to be married.

Later Mr. and Mrs. Mack left for Vancouver, the bride travelling in a dress of ashes of roses, romaine crepe, with white serge coat and white hat of felt. They will take up their residence on Tenth Avenue, Vancouver.

FLOWER SHOW AWARDS

The list of prizes won at the Flower Show largely explains itself, but few comments will be made upon them.

Class I.
Six asters, assorted—1, H. W. Harvey; 2, L. McLaughlin.
Carnations—Mrs. Coulter.
Dahlias, assorted—1, Mrs. Rosa Ran; 2, H. W. Harvey.
Sweet Peas, vase—1, L. McLaughlin; 2, Mrs. Powell.
Bowl sweet peas—1, Mrs. Powell; 2, Mrs. Coulter White.

The sweet peas made a fine display, with the prize winners earning their laurels. In the entry for bowl of sweet peas, the exhibitors had a different idea from the judges. They read it a collection was wanted, and thus variety standing better chance of success; but this idea was scored afterwards by the judge. Next year in the prize list the societies can help exhibitors and judges in this and other sections by elimination of this difference of opinion.

Collection Snapdragon—Mrs. Powell.
Collection Zinnias—Mrs. Powell.
Vase Zinnias—1, H. W. Harvey; 2, S. E. Hamilton, Vernon, B.C.
Collection Stocks—Mrs. Powell.
Best Rose in Show—Mrs. Collas, Mrs. Bennett.

Here is an opportunity for the societies to get around a difficulty for next year. If an entry fee, even though small, were used, any exhibitor having said, half a dozen really nice roses, might show all, whereas this year they felt debated from entering all, and yet the one selected might not appeal to the judge. The problem is worthy of discussion and a scheme evolved for getting over this difficulty.

Collection Dried Everlastings—Mrs. Hookham.
Bowl of Panicles—2, S. E. Hamilton.
Basket of Flowers—1, Mrs. Collas; 2, Mrs. Fosbery.
Here again there was a difference in view-point of exhibitors and judges. This, too, should receive a judge's ruling to make it easier for exhibitors as to their use of ribbons, etc. It helps the show when both judges and exhibitor know what is wanted.

Arranged Centrepiece for Table—1, Mrs. Collas; 2, Mrs. Fisher.
Collection Annals—1, Mrs. Hookham; 2, Mrs. Collas.
Collection Biennials and Perennials—1, Mrs. Collas; 2, Mrs. Fosbery.
Collection House Plants—1, Mrs. J. S. Monro.
Gladioli, vase, 3 blooms—1, J. R. Smith; 2, T. Herman.
Gladioli, vase, Primulinus Hybrids—1, J. S. Monro; 2, Iann McIntyre.
Six named varieties Primulinus Hybrids—2, S. E. Hamilton.
Gladioli, 3 blooms each of 4 named varieties, for Jones Challenge Cup—1, S. E. Hamilton, Vernon; 2, Mrs. Powell.

We may be sorry the result of the contest for the Jones cup sent it out of Summerland, but Mr. Hamilton surely had a fine entry. Now for the pleasure of winning it back! There will be more than Mr. Powell after it, certain sure.

Class II.
Hand Trimmed Night Dress—1, Mrs. McCutcheon; 2, Mrs. G. Inglis.
Hand Trimmed Undies—1, Mrs. Inglis.
Luncheon Set—1, Miss Sylvia Washington.
Tonecloth and Serviettes (white)—1, Miss Sylvia Washington.
Tonecloth and Serviettes (colored)—1, Mrs. Harold Smith; 2, Freda Secord.
Dining Room Set—1, Mrs. Washington.

Buffet Set—1, Miss Sylvia Washington; 2, Mrs. McCutcheon.
Bedspread—1, Mrs. G. W. Copo; 2, Mrs. R. S. Munro.
Pillow Slips (embroidered)—1, Mrs. G. Inglis.
Patr Pillow Slips (crochet)—1, Mrs. Harold Smith; 2, Mrs. McCutcheon.
Patr Hand Trimmed Towels—1, Mrs. Walton; 2, Mrs. G. Inglis.
Crochet Sweater—1, Mrs. Vanderburg.

Knitted Sweater—1, Mrs. G. Inglis; 2, Gene DeLuza.
Hand Made Rug—1, Mrs. J. Drake; 2, Joan McIntyre.
Bedroom Set—1, Mrs. Harold Smith.
Collection Fancy Work—1, Mrs. McCutcheon.

Class III.
In this class evidently the ladies are (should about getting into the spirit of the game and something could be done to help out on an increased entry list.

SUMMERLAND BAND COMING ALONG WELL

The Summerland band had a very fine practice on Monday. In all their ten instruments turned out, and this right in the busy season. Mr. Copo, the leader, as well as the boys themselves, are very appreciative of the help given to the younger members by older ones. This assistance is helping the band get along faster with their instruments and music, and keeps up the interest in the practice.

THE SUMMERLAND REVIEW

U. S. TOURISTS CAN BUY

It has taken American tourists in Canada a long time to find out that they can take home goods to the value of \$100. Yet here is the ruling from the United States tariff regulations dealing with the point:

Article 355—"Residents of the United States returning from abroad may bring in free of duty:

"Articles up to but not exceeding \$100 in value acquired abroad for personal use, or as souvenirs or curios, if not intended for sale or purchased on commissions for other persons. Such articles purchased abroad by returning residents may be admitted free, notwithstanding they do not accompany the passenger."

The only stipulation is that tourists shall have been three days or more in this country, that being for the purpose of preventing the running over at border points to take advantage of the ruling.

Tourists are becoming aware of the superiority of Canadian woolen goods and blankets particularly, and there are an increasing number of U.S. cars going home with purchases in these lines of better quality and fairer price than can be offered in the United States.

CROPS AND BRIDES.

An Edmonton report says that good crops mean many marriages.

It goes on to explain that there are homesteaders there, some from Eastern Canada, United States, Britain and European lands. They have gone west to "make good."

When they get established they either send or go for the girl "back home."

Thus do the crop reports take on a touch of romance not usually reflected in bushels, acres or estimated yields, for after all it's by the starting of these new homes that the nation is built.

THEY DIDN'T VOTE.

Ratepayers in Windsor were asked to vote on extending their market space. That's not merely a Windsor question, but one that has to do with getting more people from the district to the city and providing facilities for them after they get there.

The property to be bought was priced at \$21,000.

There were some 20,000 people who had a right to vote, but when they added up the totals it was found 198 had voted for the bylaw and 232 against—in all 430.

The indifference of people to their own business is one of the most astounding things in what is termed municipal government.

STILL AT IT.

The Okanagan "Sea-Serpent" continues to provide editorial writers in other centres with material for their columns. The latest comment is from the Victoria Times, as follows:

"After patiently suffering ridicule for several years the people of the Okanagan Valley are beginning to look forward to the day when that curious monster which has been disporting itself in the waters of Okanagan Lake at intervals for a long time past will be tangible enough to balance a little salt on its tail. Our good friends in that delightful part of British Columbia have taken their own particular sea serpent quite seriously ever since they have read the various testimony of several highly respectable citizens who were never known to suffer from any of the ailments which are supposedly responsible for the production of hallucinations. They feel, and rightly so, that a time has come to get down to "brass tacks" and convince the sceptics in other parts of this province that Okanagan Lake is not merely a lake in the generally accepted sense of the term, but also the special preserve of some great living creature which unbelievers have held captive within the two covers of a fairy tale book or within the pages of scientific records. There is, in fact, an air of 'I-told-you-so' from one end of the valley to the other. Orchardists are getting up earlier in the morning so that they may have a little time off during the day to take a share of the watch which is now being kept on the placid waters of the lake. They are confident of the result. Each one, moreover, is determined to do his share to counteract the slander which for so long has hung like a pall over the citizens of the valley. No longer is it to be said that this strange lake monster is a creature of the imagination."

World of Politics

(By an Ex-Writer of the Ottawa Press Gallery.)

Throughout the past week the feature of the telegraphic news dealing with the Dominion election that may have a most important bearing on the voting on September 14 has been the growing list of "fusion" candidates nominated in Manitoba, Saskatchewan and Ontario. The development of the tendency to co-operate by Liberals, Progressives, and in some instances, Labor, it must be admitted has changed the outlook materially. When the King government was unhorsed and Mr. Meighen, subsequent to his defeat by the House, succeeded in securing the right to dissolve Parliament and succeeded in organizing a ministry, the writer was one of those who took it for granted that the new government would be practically certain to secure a working majority in the next Parliament. Since that time the drift of events has materially altered the outlook and, were I asked to diagnose the election outlook in a word as it appears to be at the present moment, the word I would use to cover the situation would be—"Doubtful." Certainly there is nothing in the surface indications to justify overly optimistic claims on the part of either Premier Meighen or ex-Premier King, and more or less disinterested observers of the fight will not be surprised should polling day once more find Parliament without a party sufficiently numerous to command a majority over all in the House of Commons. That there may be developments of some kind between now and election day that will turn the tide of public opinion more definitely in one direction or another may be possible, but present indications are that both sides are about equally confident of being masters of the political roost when the election is over, and, when their respective claims are compared, they just about balance one another.

HOW ABOUT ONTARIO AND QUEBEC

It is interesting in this connection to have the viewpoint of two newspapers published in the Dominion capital relative to the outlook in the provinces of Ontario and Quebec. The Ottawa Citizen, Independent, but with strong Liberal leanings in the present fight, does not believe that in Ontario the last election was a narrow one. It says that the Liberal and two Progressive, represents the views of the "people of Ontario. The Citizen proceeds: "The tail-end of a period of depression, and furious protectionist campaign produced a stampede, which is not likely to be repeated. Times are better, trade has expanded, the finances of the country and of the National Railways have shown marked improvement. The Robb budget, with its large reductions in taxation and relief for the taxpayer, met with general approval. Ontario can solve the present problem by electing a fair number of Liberals, corresponding to the true condition of public opinion at the present time. In foregoing we have the expression of the hope, if not the conviction, of a newspaper supporting the Liberals that Ontario on this occasion will elect an increased number of supporters of Mackenzie King. I shall now turn to the Ottawa Journal (Conservative) and its reasons for thinking that the Conservatives will make gains in Quebec province. The Journal, after pointing out that in October last the Conservatives increased their vote in Quebec by 100,000 as compared with the general election of 1921, says: "This gain, achieved in the face of party disunion in the province and in the complete absence of a Conservative press, was really a remarkable performance, and if Mr. Patenaude can effect a like gain at the forthcoming election, that is, if he can detach from the Liberal and other attacks the Conservative party another 100,000 votes, the Liberals will be placed in a substantial minority. Not in such a gain is conceivable. On the contrary, considering the changed conditions, including the added advantage of a United Conservative party and a vigorous Conservative press, a change of another 100,000 votes would hardly be more remarkable than the achievement of 1925." It is improbable that the Journal's hope of placing the Liberal party in an actual minority in the province of Quebec is likely to be realized, but it is conceivable that the Conservatives may make some gains in Quebec. It is also conceivable that the Liberals and Progressives may make gains in Ontario and it is not at all improbable that any gains made by Liberals in Ontario will be fully offset by Conservatives in Quebec, which would leave the situation, insofar as it affects the rest of Canada, unchanged.

WILL THE MARITIMES STICK TO MEIGHEN

Less appears to be known about the outlook in the Maritime provinces than elsewhere in Canada, but, with Conservative provincial governments in power in Nova Scotia, New Brunswick and Prince Edward Island, and with the Liberals holding only six of the twenty-nine seats in the House of Commons, it would be unreasonable to suppose that Mr. Meighen will not once again have a majority from down by the Atlantic. Liberals claim they will make gains and there is certainly room for that, but they may not amount to much in view of all the promises made by the Premier in his recent tour. However, Mr. King has still to visit the Maritimes, and when it comes to making promises on the eve of an election there is little to choose between Mr. Meighen and Mr. King. They are both past masters in that political art. Much may depend upon what the people think of the respective ability to deliver the goods. At any rate, insofar as we are aware of the situation at this distance, it would appear to be safe to assume that the Conservatives will continue to have a substantial majority from the Maritime Provinces.

DO PRAIRIE PROVINCES HOLD THE KEY?

With the possible exceptions of Quebec for the Conservatives and Ontario for the Liberals, surface indications are that the Conservative outlook in the prairie provinces is as bleak and discouraging as that which any political party has to face in any section of the country. In Manitoba the fusion of Liberal and Progressive interests has been brought about in all rural constituencies in which nominations have occurred up to the present moment and in several of the constituencies Conservatives won in October last on minority votes. That does not necessarily mean that they have no chance under present conditions of holding some of these seats in two-man contests, but it would be reasonable to assume that some will be carried by the opposition forces. In October last the Conservatives did not carry a seat in Saskatchewan, and on this occasion their opponents have eliminated a number of three-cornered contests which will not make the sledding any easier. Coming to Alberta, however, the Conservative outlook improves because Progressives of that province won't have much, if anything, to do with the Liberals. As a consequence there will be three-cornered contests aplenty and Conservatives under such circumstances might do even better than in October last. In British Columbia, with what the fact that some nominations must still be made at the time of writing and the number of new candidates in the field, of untied strength, it is difficult to express an opinion at the present time. With General D. McRae in the field in New Westminster and Donald Donaghy moved over to Centre Vancouver to meet Hon. Harry Stevens, Conservative chances in the north seat should be improved, but the minister will have to put up a harder fight against Donaghy than against any other candidate that could have been chosen. I do not know whether the Liberals have any real hopes of beating Stevens, but in nominating Donaghy they made a move that is likely to keep the minister fairly close to his own constituency during the campaign. I have run over the whole field in a more or less casual way and my indications are even approximately correct, it would appear that there is no certainty as to whom will be riding in the political fight on the night of September 14, while there is again the possibility that neither Premier King nor Mr. Meighen will be on top, and that is not an altogether pleasant outlook for many people.

AVOIDING ONE ANOTHER'S ISSUES

The persistency with which Liberal speakers and the Liberal press persist that there is nothing in the customs issue is equalled only by the persistency with which Conservative speakers and the Conservative press persist in ignoring the constitutional issue. As a matter of fact, both are real issues and both are important in their way, although the tendency to exaggeration may be present in respect to both. The heat that the public is concerned with both the constitutional and customs issues lies in the fact that they continue to interest the people who go to the big political meetings being addressed by the party leaders. When political leaders discover that an issue that they may choose to discuss at length is coldly received by their audiences they are usually quite capable of sensing the "hill" and govern themselves accordingly. As Mr. Meighen and Mr. King continue to discuss the customs and constitutional issues at length, and receive the respectful and close attention of their audience, it is not surprising that the people are interested and want to hear what they have to say. The post-punching by party speakers and the party press of the chief issues of the other side is what is to be expected during a political campaign, but the people want to hear these issues discussed sanely and intelligently by those who believe they are issues, and to hear their arguments criticized with equal intelligence by the other side. To say of the constitutional issue, or the customs issue, that there "ain't no such animal," is to show about the same degree of intelligence as an ostrich or, perhaps, to demonstrate only a disinclination to enter upon a controversy because of a lack of material for sound argument.

BEAVERDELL BRIEFS

Mrs. R. L. Clothier, of Victoria, is spending a few days visiting in camp.

B. E. Taylor, superintendent of the Revenge mine, is on a business trip to Nelson.

Mrs. Ted Clarke, and Miss Elsie Olson, of Greenwood, leave on Saturday for a motor trip to Spokane, Portland and other points.

Ed. Nordman of the Sally mine motored to Nelson on Friday, to be gone about a week. He was accompanied

by his daughter Esther.

All of the mine owners are happy these days—everybody has ore! Bell, Sally, Bounty, Tiger, Revenge, Wellington and some of the smaller claims are showing up in great style.

Rev. Andrew Walker of Greenwood held service in the school house on Sunday and was well pleased with the crowd which turned out to hear him. Rev. Mr. Walker will be here every second Sunday and hopes to see everyone in the community out next time.

People of the Beaverdell district had had it pointed out to them very plainly this week just what a boost it would be to them to have the road

completed through to Pentiction. Six different cars came up this road last week, all of them tourists, only to find when they got here that they had to turn around and go back to Rock Creek before they could get to Pentiction. Three carloads were all the way from Chicago and it meant that they had come some seventy-five miles out of their way. If we could only get three or four miles of this road built every provincial election it means that in twenty-five years or so we may plan on a through trip to Pentiction.

Many a man wears old clothes because he does not owe for new ones.—The Grim Reaper no longer wields a scythe. He carries a corkscrew.—Border Cities Star.

paid, but the people want to hear these issues discussed sanely and intelligently by those who believe they are issues, and to hear their arguments criticized with equal intelligence by the other side. To say of the constitutional issue, or the customs issue, that there "ain't no such animal," is to show about the same degree of intelligence as an ostrich or, perhaps, to demonstrate only a disinclination to enter upon a controversy because of a lack of material for sound argument.

"HOT SHOTS" THAT HURT THE SHOOTERS

Undoubtedly more comedy has been applied in this election so far by speakers whose partisanship is so virulent that they are quite unable to express their opinions excepting in terms of gross exaggeration. Major General A. D. McRae, nominated as Conservative candidate for North Vancouver the other day, on the other hand, is a man who wants a clean campaign and the cutting out of "trivial personalities." Good for the General! Many Conservatives will probably regret that the worst case of improper language so far noted by the writer must be laid at the door of no less a person than Prof. Stephen Leacock, Professor of Economics at McGill University, and an alleged humorist of international repute. Closing Mr. Meighen's meeting at Orillia, Ont., Prof. Leacock was guilty of this bit of political insanity, whatever the skunks are going and I think the Liberals are nearly all used up." Anyone who imagines that such an omission of ideas, even from the brain of a learned professor, will win votes, should read the following remarks by one of Canada's leading newspapers, which stands for decency in public life and political campaigning: "The political speaker who indulges in extreme language and shows excessive partisanship is wasting his time in exactly the same way as a man who gets excited while engaged in a rifle competition. No votes are turned by such talk or they are turned the wrong way. The only arguments that go home are those that appeal to the intelligence and are expressed in a reasonable way. And there is a very large audience of Canadians who are ready to listen carefully to the discussion of issues when it is carried on in this way. Politicians should remember that these are the people whose votes can be turned. They are sick of political clap-trap and partisan rallery, but they are anxious to hear anything that will help them to use their franchise in an enlightened and sensible manner. The political fire-eaters may feel a personal satisfaction over their performance, but their progress is that of a person who pushes himself backward."

The Pedlar's Pack

By AUTOLYOUS "A Snapper Up of Unconsidered Trifles"

Two correspondents of the Daily Province, writing on the government returns from the sale of liquor, arrive at the same point by roads which are in other respects quite independent of each other. A Daptist minister, writing from Kamloops, protests against the various municipalities of the province slandering in the profits made by the government stores, claiming that it indicates something wrong with the public conscience. The other correspondent protests against the high price of liquor charged by the government, and claims that therein lies the blame for the continued existence of the bootlegger. Those two writers obviously have differing views on the matter, but their contentions lead straight to the same conclusion. Let us consider the question in both aspects.

What was the ostensible motive behind the whole scheme of government control? If I am not mistaken it was to control the sale of liquor that the evils attendant on the old saloon system should be done away with, and to put an automatic check on excess. There was never at any time any thought in the public mind that the government was to enter the liquor business to make a profit—this idea was added in the working out of the details, and it is absolutely wrong and indefensible. If we dole out from the latter of the Kamloops minister the irrelevant references to "bloated eyes," "souil-destroying and manhood-wrecking traffic," and so on, we come to his main contention, which is indisputably right. Our governments were never elected to go into the business of liquor selling, either wholesale or retail. If it is found that it is necessary for them to sell in order to be able to control (which is not admitted), then it is only reasonable that they should sell at prices which cover the cost of selling and no more. If the public is entitled to purchase liquor at all (as it certainly should be) then it is entitled to buy at reasonable prices. As I do not buy liquor myself from any source whatever, I do not know personally what the actual prices are, but I have heard from many sources that they are extortionate. If, as our second correspondent states, \$8 is charged for a quart bottle of whiskey, then extortion is

a mid term to use. And if the government claims that their prices are caused by federal taxation, we need only point to an annual profit of more than three million dollars in order to upset that contention. Whether bootlegging would be eliminated altogether by reasonable prices at the legitimate sources of supply is an open question, but there is very little doubt that it would be considerably cut down. There would be no inducement for any person to deal with an illegitimate dealer when he could do as well with an authorized vendor, and he would, by the way, avoid the danger of being poisoned. The bootlegger is an anachronism in a province which allows the sale of liquor legitimately, and a revision of prices would probably reduce his business to a point where it would be unprofitable. It is a practical point of view and calls for consideration. But it is secondary to the real issue, which is the retail business by the government at an extortionate profit is an inconsistency which should not be allowed.

The recent notification that billboards on our highways are to be abolished conveys welcome news. There is a certain element of cool appropriation of public domain in the placing of these boards which has in the past been a source of annoyance to many. In this province the offence is to be stopped, and the highways across the border, and it is to be noted that they themselves are getting restive under the infliction. Why a traveller who is able to appreciate lovely scenery should be offended by an array of more or less ugly signboards marring the prospect is a mystery hard to solve;—there is a place for legitimate advertising, but it is not to be found on the public highways. The same advertisement which is of interest to us in the columns of our newspapers and magazines becomes an affront when it stares at us from the open country spaces over which we stride ourselves. It is even doubtful whether this irritating form of publicity is profitable to the advertiser, although that is a question we need not consider. Our concern is to see that our forests and plans are not turned into mere advertisement stations for the exploitation of shaving creams, non-creasing collars, and the multitude of other commodities which have to be brought under the notice of an impressionable public. A year or so back the city of Vancouver very rightly objected to a proposal that the garbage cans in its streets should be used for advertising purposes;—the present decision that our rural districts are to be kept free from over-zealous exploitation of the kind indicates that our provincial authorities have the right idea.

With some advertisers the element of good taste seems to be entirely lacking. What are we to think of the incident reported the other day of an aeroplane which circled over the heads of an audience assembled to listen to a hand internationally famous, and smothered with the droning of its motor, the music which thousands of people had come to hear? The excuse that those responsible for that offense did not know that their advertising plane would disturb the patrons of the concert is altogether inadequate;—aside from the disturbance by actual noise, there is the element of incongruity, and a final note such a function of the fallacy to realize that shows a commercial egotism which is really at the root of all advertising done at the wrong times and in the wrong places. The Vancouver directors are to be congratulated on their ingenious way of teaching the offenders better manners.

Mr. Hagen, American golf champion, is reported to have said that English golfers are lazy and cannot hold their own internationally unless they devote more time to study and practice at the game.

MODERN SPORT Don't know that he used the word "game," but he has done so since he and his countrymen have long since turned "games" into business, which is a thing the Englishman declines to do. A writer in the "New Statesman," commenting on his remarks, has some very wise things to say about it, the essence of his observations being that when sport degenerates into a profession it loses its proper place, and becomes something not worth while. One sentence this writer uses is really an epitome of the whole matter. He says: "Va (the English) invented cricket and tennis and golf as recreations, not as short cuts to newspaper fame or financial prosperity." There we have the whole matter in a nutshell, and we see its actual working out in the American baseball world, where players are bought and sold at fabulous prices from one team or another, receive princely salaries, and are the very last word in "efficiency." If this suits the American public, no one is entitled to say them nay, but it is certain that the system kills any idea of sport as a recreation. An American baseball match is not a game in any sense of the word when played by the national professional teams;—it is merely a contest between two hostilities, not a short cut to newspaper fame or financial prosperity. The element of sport or recreation is absolutely missing, and it will be a bad day for England or Canada if those lands allow their games to fall to the same low level.

AUTOLYOUS.

PEACHLAND

The Union Church Sunday school picnic was held on Thursday of last week, at which there was a large attendance. The site was Deep Creek. Several of the members of their cars, transported all hands to the scene by making several trips. A very enjoyable afternoon was spent bathing, cruising the creek up to the falls and the usual children's races which always attract the attention of the little folk. Last but not least the ladies served lunch in real picnic style and found a ready and hearty response, this time not alone from the little folk.

Tennis enthusiasts will be interested in the activities of the Peachland Grass Tennis Club. They are holding an open tournament a week from Friday and Saturday, and as there are entries from out-of-town clubs, they expect to play some of the preliminary events on the new hard court recently finished on Mr. H. H. Thompson's Trepanier property, in order to crowd everything into the two days. They are arranging for prizes for the various events.

The rattlesnake which was secured by Mr. J. F. K. English, Peaton Marsh and Gerald Elliott some months ago was recently presented by Mr. English to the museum of the University of Alberta. Professor William Rowan of the department of zoology of that institution, declares it is a magnificent specimen and belongs to a species which is not found in the prairie provinces. This is the first rattlesnake which has been presented to the University museum. The reptile is nearly five feet long and is 2 1/2 inches in its greatest diameter. It possesses eight rings, which is not an indication of its age, but of the number of times its skin has been shed, a new ring being formed on each occasion.

A bush fire back on Venner Creek, in a northerly direction from Mr. Gus Hensen's property, claimed the attention of the forestry department and quite a gang of men recently, as there seemed to be lots of material to feed it, and before it was gotten under complete control it spread over quite an acreage. The gang was made up of Kelowna and Peachland men.

It has been reported here that Mr. H. Miller has received the appointment of fruit inspector with headquarters at Kelowna. His packing job to the ditch Mr. Long had the gang of men on was turned over to Mr. Hugh Ferguson.

Mr. Rutherford, the auditor, spent a couple of days in town last week working with Mr. Dryden in the municipal office.

Mr. and Mrs. Cudmore and daughter moved back to their residence above the store last week-end after having spent the summer months thus far in Mr. Stephenson's cottage. Mr. and Mrs. Cudmore left on Sunday to spend a week at Vancouver. They travelled K.V.R. via West Summerland.

Mr. Douglas recently traded in his Ford for a later model which with its added advantages, being lower and wider, makes a much more comfortable and serviceable car than the other.

Mr. and Mrs. Dorland and son Hugh left on Tuesday of this week to enjoy a motor trip and holiday to Vancouver as Mr. Dorland is having his holiday from the mail service on the S.S. Sicomous now. They will probably be away about three weeks.

Miss G. McAllister of Vancouver is spending a vacation in Peachland, a guest at the Beattie home. Miss McAllister is an employee of the Dominion Express company in the city.

Quite a number of citizens spent a day out of town this week to take in the regatta at Kelowna and incidentally hear the Coldstream Guards Band. In addition to the usual methods of travel out of town by S.S. Sicomous and truck and car, a number of folks took advantage of the new service furnished by the Pentown which is again making her regular calls here.

The Rev. and Mrs. Sadler and family are enjoying their summer vacation by taking auto and camping trips. First they spent a few days in the Glen, camped at Mr. McKay's pre-emption, and next went to Pentiction for a trip.

Mrs. Wingate and family were among the recent arrivals in town and are enjoying a visit with Mrs. N. S. Davidson at the Trepanier townsite, where Rodney Wingate has been spending a few weeks of his vacation. Mrs. Wingate has many friends here from her sojourn as a citizen here a few years ago.

PENTOWNA ON REGULAR RUN

Pitch of Tone of Whistle Has Been Changed—Much Freight

The Pentowna on Monday started her regular runs, and swung into Summerland wharf on time, with many folks on hand to witness the event. The whistle has had its pitch of tone changed, the matters and decorations have finished their work and altogether she presented a very business-like appearance. Capt. Row brought her to her landing in very efficient manner, while his friends on the wharf called out their congratulations.

Mr. Davis, station master, provided passengers with tickets for the trip. Freight was landed and some of the staff stayed off, to return on the up trip.

The boat got away at a good speed for her call at Narmatna. She has a wonderful "pick-up" and her motors get down to business in a hurry.

One pennant she carries has a maple leaf, with C.N.S. in the center, and the other one with her own name. The deck equipment carries the motor ship pennant C.N.S.M.S.

With this trip Summerland has now added the regular C.N.R. service to her transportation facilities, and now we will see if "competition is the life of trade."

QUICK---SOMEONE IS WAITING FOR YOU!
When the telephone rings, courtesy and efficiency demand that it be promptly answered. To anyone waiting on the telephone, seconds are long. No person likes to be kept waiting. Why keep others waiting? Any call may be important. Why neglect any of them?
THE SUMMERLAND TELEPHONE CO., LTD.

LOCAL HAPPENINGS

Last year Mr. M. G. Wilson's ranch across the lake was hailed out. Immediately after the storm all damaged fruit was picked off, and the fruit spurs given a chance to build up. The result is that this year the trees have set the biggest and finest crop of fruit they have ever carried. With dry trees in many orchards this summer, it would no doubt prove equally beneficial to relieve them of shrivelled fruit.

The crop estimates have just come in from government estimators, and show an increase in the Okanagan. They have figured it down pretty close they believe and place the increase at 600,000 boxes over last year. With this they are making allowance for some dry orchards in the south end of the valley. This puts a damper on the rumors as to the bad conditions prevailing in orchards at the north end of the valley.

Rev. Mr. McKinnon of Vernon has accepted a call to the Baptist church and will commence his duties Sept. 1st, taking up residence in the house formerly occupied by Rev. Alexander near the gym.

Mrs. H. Hart and daughter of New Westminster are visiting Mr. Beattie for a month or six weeks, and will probably eventually settle here.

Mr. Gordon Ritchie motored down to Wenatchee this week to have a look at his orchards there. He expects to be home Saturday.

Hurrah for us! A Summerland tourist, clearing customs at Oroville, has come back with a real compliment for our autoists. The official, when in answer to a query, was told the tourists came from here, replied: "The nicest people who clear customs here come from Summerland," and he meant it.

Miss D. White, who was visiting at Mr. Beavis', left for Kelowna Tuesday.

Miss H. Bain, bridesmaid at Miss Beavis' wedding, has gone to Vancouver to visit friends there before returning to her home in Ladysmith.

SYNOPSIS OF LAND ACT AMENDMENTS

PRE-EMPTIONS
Vacant, unreserved, surveyed Crown lands may be pre-empted by British subjects over 18 years of age, and by aliens on declaring intention to become British subjects, conditional upon residence, occupation and improvement for agricultural purposes.

All information concerning regulations regarding pre-emptions is given in Bulletin No. 1, Land Series, "How to Pre-empt Land," copies of which can be obtained free of charge by addressing the Department of Lands, Victoria, B.C., or to any Government Agent.
Records will be granted covering only land suitable for agricultural purposes and which is not timber land, i.e., carrying over 5000 board feet per acre west of the Coast Range, and 8000 feet per acre east of that range.
Applications for pre-emptions are to be addressed to the Land Commissioner of the Land Recording Division in which the land applied for is situated, and are made on printed forms, copies of which can be obtained from the Land Commissioner.
Pre-emptions must be occupied for five years and improvements made to value of \$10 per acre, including clearing and cultivating at least five acres before a Crown Grant can be received.
For more detailed information see the Bulletin "How to Pre-empt Land."

PURCHASE
Applications are received for purchase of vacant and unreserved Crown lands, not being timberland, for agricultural purposes; minimum price of first-class (arable) land is \$5 per acre, and second-class (grazing) land, \$2.50 per acre. Further information regarding purchase or lease of Crown lands is given in Bulletin No. 10, Land Series, "Purchase and Lease of Crown Lands."

HOMESITE LEASES
Unsurveyed areas, not exceeding 20 acres, may be leased as homesites, conditional upon a dwelling being erected in the first year, title being obtainable after residence and improvement conditions are fulfilled and land has been surveyed.

LEASES
For grazing and industrial purposes, areas not exceeding 640 acres may be leased by one person or a company.

GRAZING
Under the Grazing Act the Province is divided into grazing districts and the range administered under a Grazing Commissioner. Annual grazing permits are issued, based on numbers ranged, priority being given to established owners. Stock-owners may form associations for range management. Free, or partially free permits are available for settlers, campers and travellers, up to ten head.

Mrs. Thos. F. Evans of Hillsboro, Ill., is visiting her sister, Mrs. G. W. Cope of Paradise Valley.

Mr. Jack Wark, the son of Dr. A. E. Wark of Vancouver, is spending the summer vacation with Mrs. Hermon. This makes his seventh visit here.

Mrs. H. M. Doherty and daughter of Vancouver are visiting Mrs. James Mitchell.

A bin-full of Women's White Canvas Pumps, Oxfords, and Balmorals at 75c per pair. Another bin of Children's White Canvas Pumps at 50c per pair. Slaughter prices. Beor's Shoe Store.

So far as the kids of the nation are concerned, there is only one rival for the circus—and that is piracy. Leon Errol, famous stage and screen comedian, with Dorothy Gish, is coming to the Rialto Theatre on Friday and Saturday next with a band of pirates whose fame compares with anything in the circus with the exception of the elephants. The picture is "Clothes Make the Pirate." In the pirate crew are Tully Marshall, James Rennie, George Marion. Their victims are three famous screen beauties, Miss Gish, Nita Naldi and Edna Murphy. "Clothes Make the Pirate" was adapted from the novel by Holman Day.

The contractors have now a gang at work putting up a camp and stables at the Canyon Creek dam.

Smith & Henry have added another truck to their equipment—an Oldsmobile this time.

Miss D. Nield went down this week to the coast to visit her sister.

Mrs. Basil Stewart was in town on Thursday.

Mr. and Mrs. Chittenden motored in from Ladysmith and stayed in town for a few days with Mr. and Mrs. Muir Stewart.

Mr. Stewart, one of the three young men who stopped off here on their way around the world, has gone on to the prairies this week, to take in a harvesting experience.

Mr. C. Cooper, who had been hurt at the fire fighting is again out of the hospital and about town.

Rattlesnakes have been seen quite frequently these hot days in the Paradise Flat section. Mr. Mountford's son killed one with twelve rattles on it and Mr. G. W. Cope had one in town that he and Mr. Fenwick got, with nine rattles to its credit.

Mrs. Arthur of Vancouver left for that city on Thursday. She went to Pentiction on the Pentowna and will go on to the coast Friday noon. She is a Prince Edward Islander and a sister of the author of "Ann of Green Gables."

Quite a number from here availed themselves of the opportunity Thursday to hear the Coldstream Guards band in Pentiction, quite a few taking their first trip on the Pentowna. The jitneys did a rushing business and the lake shore road was a busy thoroughfare for a while.

Kelowna regatta Wednesday had a strong enough pull to take some of our folks up the lake to enjoy that annual event.

The many friends of Dr. Allen Harris will be pleased to know that he has successfully gone through the operation on his throat and every one hopes the removal of the affected tonsils will give him all the extra energy he looks for.

MAIL SCHEDULE

For the convenience of our readers we give below the time of closing of all mails at the local postoffices, for despatch by boat and train; and also interchange between the two offices:
At SUMMERLAND OFFICE
For all points North, East and West 8 p.m.; Sunday, 9 p.m.
For Naramata, Pentiction, South, Similkameen, Boundary and Kootenay—Daily, except Sunday, 6 p.m.
For Vancouver and Victoria—Daily except Monday, 11 a.m.
For West Summerland—Daily, except Monday, 7:30 a.m. and 11 a.m.; daily, except Sunday, 6 p.m.
For Rural Route—8:00 a.m. daily, except Sunday.

At WEST SUMMERLAND OFFICE
For Coast Points—Daily, except Monday, 11:30 a.m.
For South, North and East—Daily 5 p.m.
For Summerland Office—Daily, except Monday, 11 a.m.; and daily, 5 p.m.

Word is passing among shippers that the semi-ripe tomatoes are being picked too green, and that jobbers are being to hold them too long, which interferes with the ready movement of this crop.

WATER NOTICE

USE AND STORAGE
TAKE NOTICE that the Dominion Department of Agriculture, whose address is Ottawa, will apply for licence for the storage and use of 200 acre feet of water out of Crescent Creek, also known as Paul Creek, which flows easterly and drains into Trout Creek, about two miles below No. 1 Summerland reservoir on Trout Creek.
The storage-dam will be located at Crescent (or Paul) Lake. The capacity of the reservoir to be created is about 200 acre feet, and it will flood about 150 acres of land. The water will be diverted from the stream at either the headgates of Summerland municipal system, or about 100 yards above the Kettle Valley Railway bridge over Trout Creek at the Dominion Experimental Station, and will be used for irrigation purposes upon the land described as Dominion Experimental Station, Part of Pentiction Indian Reserve No. 1.
The licence applied for is to supplement a right to take and use water as per Licence No. 6492.
The notice was posted on the ground on the 28th day of July, 1926.

A copy of this notice and an application pursuant thereto and to the "Water Act, 1914," will be filed in the office of the Water Recorder at Vernon, B.C.
Objections to the application may be filed with the said Water Recorder or with the Comptroller of Water Rights, Parliament Buildings, Victoria, B. C., within thirty days after the first appearance of this notice in a local newspaper.
DEPARTMENT OF AGRICULTURE, Ottawa, Applicant.
(By W. T. Hunter, Agent)
The date of the first publication of this notice is 30th July, 1926. 30-t-c

WATER NOTICE

Diversion and Use
Take notice that L. M. Agur, whose address is Summerland, B. C., will apply for a license to take and use 1,000 gallons of water per day from unnamed spring located on said applicant's property, being Blks. 5, D. L. 2891, "Map 134," Summerland. The water will be diverted from the said spring at a point close to East boundary of above property and about 400 feet south of Kettle Valley Railway right-of-way, and will be used for domestic and irrigation purposes upon following described lands: Blks. 4 & 5, D. L. 2891, and Blks. 9 & 10, D. L. 475, Map 161. This notice was posted on the ground on the 30th day of July, 1926. A copy of this notice and an application pursuant thereto and to the "Water Act" will be filed at the office of the Water Recorder at Vernon. Objections to the application may be filed with the said Water Recorder or with the Comptroller of Water Rights, Parliament Buildings, Victoria, B.C., within 30 days after the first appearance of this notice in a local newspaper.
The date of the first publication of this notice is August 6, 1926.

PURE BEER
PURE BEER IN BRITISH COLUMBIA
WHEN you purchase beer in British Columbia, either in sealed bottles at the Government Stores, or by the glass or in open bottles on licensed premises, you receive pure beer.
In the Licensed Premises, or Beer Parlors, you not only get pure beer, but you are served it under regulated and orderly conditions. Beer Parlors are conducted under the direct supervision of the British Columbia Liquor Control Board and according to the rules and regulations of the board.
GOVERNMENT inspectors appointed for that duty see that Beer Parlors are operated in a strictly sanitary manner. The premises must be kept well ventilated and airy; the beer-drawing apparatus must be kept immaculately clean. Store-rooms and ice boxes must be sanitary in every respect, and glasses must be thoroughly washed and dried each time they are used. All beer must be kept and served at the correct temperature.
All these regulations are for the protection of the public, furthermore, all beers furnished by the Amalgamated Brewers are periodically subjected to careful analysis by well-known and reputable firms to assure that the people are being supplied with nothing but the best and purest of beers.
THE advantages of such rigid regulations for the protection of the public can not be over-estimated. The consumer receives pure beer, a healthful beverage of low alcoholic content, recognized as such by the most eminent medical authorities, and the people of British Columbia are to be congratulated on the sane and protective rules governing its consumption.
PURE BEER

DR. ALLEN HARRIS TELLS IN DETAIL OF MOMENTOUS DISCOVERY OF ILLINIUM

First Lecture on Subject Delivered in Canada, Given at Log Cabin—Illustrated by Lantern Slides—Great Difficulties Had to be Overcome Prior to Separation of New Element.

The Log Cabin was full to capacity on Monday night to hear from Dr. Harris his story of the discovery of Element 61. He had an opportunity to go further into details than was possible at the Old Timers picnic, and with the use of lantern slides, gave a clearer picture of the work.

Dr. Harris covered in a sketching fashion a few of the details of the chemist's trend of reasoning, some of the hard work of the outstanding men who had laid down theories and then proven them either right or wrong.

Then he started on the details of how he had so nicely, as he stated it, put his head into a noose in consenting to investigate the field of rare earths.

These rare earths have so many properties in common that it is hard to separate them—impossible to separate them chemically. He explained by a simple illustration how some substances might be isolated.

He threw a picture on the screen of a row of pots, used to dissolve these substances, and he described it as a "vessel" covered with water, and after the sugar dissolved, pour off the solution, which would leave the sand behind.

Encouraged by this, but keeping his excitement under control, only alluding to those nearest that they were indicating of a reward for their efforts.

With substances already discovered and proven to exist, these substances through the X-ray give lines that appeared in definite locations on a photographic plate.

He showed upon the screen the results of the long bombardment of the forces at work upon parts of their improvised equipment.

He showed upon the screen the results of the long bombardment of the forces at work upon parts of their improvised equipment.

He showed upon the screen the results of the long bombardment of the forces at work upon parts of their improvised equipment.

ADVANCED REGISTRY BULL WILL IMPROVE OKANAGAN HERDS

REMARKABLE progress in Jersey herds has been made of late years in the Okanagan. In a large measure due to the establishment of Jersey clubs.

Fourth year classes will begin at the same time as the other grades. Information as to courses or books may be obtained from the principal.

Summerland was this week visited by a large motor van, constituting one of the seven travelling Anglican Sunday School Missions in Canada.

As a consequence of the tour throughout the Kootenay diocese some seven hundred young people, residing at a distance from town, will receive lessons regularly by mail from Toronto.

Eventually the van will be permanently located in the Okanagan Valley. The van left Summerland for Penticton on Thursday afternoon.

Miss Hessel and Miss Savio are to be commended for the very valuable work they are undertaking.

This was the first time a van had visited the Okanagan.

The political part has been very inactive, as far as surface indications are concerned in Summerland to date.

Grote Striling, sitting member and Conservative candidate, has been campaigning in the Grand Forks area, being assisted in his meetings by Senator J. D. Taylor of New Westminster.

Of his opponents, the latest sensational news is that Col. C. B. Edgett, who announced his entry as an independent candidate following the Liberal convention from which he bolted.

There is no word, as yet, of prominent speakers to visit this section of the valley.

Word received from Vernon indicates that H. H. Stevens, M.P., will address a meeting at Penticton on the 28th instant.

An optimist is someone who goes out to spend a long afternoon on the links with one golf ball.

The Associated Boards of Trade, in convention at North Vancouver, passed a resolution last week, urging the Minister of Public Works to construct the Naramata-Kelowna highway.

This was due to the bringing to the attention of the gathering the importance of the road by Mr. R. Lyon, delegate of the Penticton Board of Trade.

PLAN CANOE TRIP THROUGH CANYON

Two young men, Messrs. Parry and Hennes of Seattle, Wn., paddled down the lake from Okanagan Landing on Monday and shipped their canoe from Penticton to Hope, where they intend to negotiate the difficult Fraser Canyon on their return to the coast.

OFFICIAL WORD NOW RECEIVED

Miss Beattie's Cow Likely to Lead Province in Production.

Mr. Wm. Beattie's daughter Kittle has just received the official records of the cow, Valley Home Georgia, and they proved to be even better than the calculations made at the time of the former announcement.

The production necessary for an animal to enter for a total of 550 pounds of milk, and Georgia produced a total of 7710 pounds of milk.

The total production of butter fat demanded for entry is 275 pounds, but she produced the splendid total of 475 pounds, with an average per cent for the year placed officially by the department at 8.16.

Mr. and Mrs. Beattie are hoping to have her start on a second record in December and anticipate adding another cow to their herd shortly.

WOULD CORRAL 'SEA-SERPENT'

Kamloops Sentinel Suggest We Make It Tourist Attraction.

The "sea-serpent" has been seen by a great many people about the old wharf this week, three of them being seen together out from Peach Orchard road.

Several of the Co-operative employees saw it on Monday. Mrs. Solly, Mr. Gowen and others saw it the first of the week.

Mr. Jack Logie says he is going to hunt the lake as soon as the summer school is over, and is determined to get some snaps of it.

The Kamloops Sentinel has a headliner about it, suggesting we make it a big tourist attraction, and follows with "Why shoot it? This is the question being asked with respect to the mysterious creature of Okanagan Lake.

To kill it would permit the satisfaction of curiosity as to what the mysterious inhabitant of the lake really is, but says a reader of the Kamloops Sentinel, why not impound it?

It suggests that with a specially constructed seine net the animal could be corralled and would become a big attraction, one that would do more than anything else imaginable to draw tourists to the valley.

HOME BURNED TO GROUND

Oil Stove Is Cause of Disastrous Blaze in Town of Summerland.

Postmaster Hayes of Summerland was up early on Monday morning, and before going out, lit his oil stove to take advantage of an early breakfast.

PECULIAR FOWL ARE OWNED BY POULTRY ENTHUSIAST

Half Chicken, Half Turkey, Go by Name of "Turken," Owned by Mrs. Dr. Lipsett of Summerland, Said to Be Fastest Growing Fowl in Existence—Eggs Were Brought Over From Russia.

Mrs. Dr. Lipsett of Summerland has nine turkens. They are strange looking birds. A while ago all sorts of yarns were in the papers about a half turkey, half chicken being in existence, but the real thing and the explanation is here.

They are said to be the fastest growing thing in the kingdom of fowls and attain a large size in a short time. At five months the bird will weigh seven pounds, and eventually will weigh twice as much as an ordinary fowl, yet lay fully as many eggs.

There they were a cross of a turkey and pheasant, bred for sport for many years. When the world war turned everything upside down, one of the czar's game-keepers escaped from Russia with three of these birds, known in Russia as Halo Sacrado, and eventually landed in San Francisco.

They have turkey legs, naked necks, with one bunch of feathers half way from the head to the breast, any color of plumage from black to buff, and a rather odd shaped single comb. They also have an abundant supply of white turkey-flavored breast meat.

PEACHLAND INTERESTING TRIP IS MADE

Jack Logie and Party of Young People Visit Clear Water.

Mr. Jack Logie has returned from a trip up to Clearwater Lake, with a group of young people. They adopt Indian names to lend that adventurous touch which appeals to all youngsters so strongly.

They climbed Apex mountain, and Independence mountain, 8000 feet and visited the Nickle Plate mine. They went in over the trail from the main road on horseback, guided by Mr. Wm. LeLievre.

They stopped at McNulty's camp, a miner up about 7000 feet, had a look at his mine and had a group snapshot taken.

The new sweet potatoes have started to move for the season. Mr. Highway and Mr. Thompson both shipped last week.

Miss Nora Drought is enjoying a visit home with her parents and other members of the family.

Mr. and Mrs. J. F. K. English left on Saturday evening for their route for the coast, having sent their furniture and effects ahead.

Mr. Robert Stewart left this week to pay his annual visit to the prairie to look after his interests there.

Nurse Mary Miller left this week to return to the coast after a pleasant visit spent at her home here.

Mr. and Mrs. Bulyea went to Summerland this week to attend the funeral of Mrs. White, Mr. Bulyea's sister, who passed away at the home of her daughter, Mrs. Mellor, at Summerland.

Another of Peachland's old-timers passed away on Friday last in the person of Miss Sue A. Dooch.

Local officials of the forestry department believe that the fire menace is over for this year.

While the rains on Wednesday did not extinguish the fires they served to check them, and the fifty men now at work are fast bringing them well in hand.

HOLIDAYS ARE NEARLY OVER

Schools will reopen this year on September 7th. The High School examinations for matriculation supplements for this district will be held in Kelowna during the week commencing August 30th.

JACK LOGIE ON EVOLUTION

Says Theory Does Not Conflict With Christian Doctrines.

On Wednesday evening Mr. Jack Logie lectured at the Log Cabin and prefaced his remarks with a short history of the Summer School and Log Cabin idea.

He then showed the stages of development in the animal kingdom that are believed by evolutionists to prove the theory of the advancement of life.

He then showed the stages of development in the animal kingdom that are believed by evolutionists to prove the theory of the advancement of life.

SUNDAY SCHOOL VAN COMES HERE

Anglican Church "Sunday School by Mail" inaugurated.

Summerland was this week visited by a large motor van, constituting one of the seven travelling Anglican Sunday School Missions in Canada.

As a consequence of the tour throughout the Kootenay diocese some seven hundred young people, residing at a distance from town, will receive lessons regularly by mail from Toronto.

Eventually the van will be permanently located in the Okanagan Valley. The van left Summerland for Penticton on Thursday afternoon.

Miss Hessel and Miss Savio are to be commended for the very valuable work they are undertaking.

This was the first time a van had visited the Okanagan.

EDGETT DROPS OUT OF RACE

Straight Fight Now Between Stirling and Cossitt.

The political part has been very inactive, as far as surface indications are concerned in Summerland to date.

Grote Striling, sitting member and Conservative candidate, has been campaigning in the Grand Forks area, being assisted in his meetings by Senator J. D. Taylor of New Westminster.

Of his opponents, the latest sensational news is that Col. C. B. Edgett, who announced his entry as an independent candidate following the Liberal convention from which he bolted.

There is no word, as yet, of prominent speakers to visit this section of the valley.

Word received from Vernon indicates that H. H. Stevens, M.P., will address a meeting at Penticton on the 28th instant.

NARAMATA WAS ENDORSED

The Associated Boards of Trade, in convention at North Vancouver, passed a resolution last week, urging the Minister of Public Works to construct the Naramata-Kelowna highway.

This was due to the bringing to the attention of the gathering the importance of the road by Mr. R. Lyon, delegate of the Penticton Board of Trade.

NARAMATA

Mr. Lahby of Vancouver is spending a week or two with Mr. and Mrs. Lon Smith in their Lakosho residence.

The welcome rain fell on Tuesday night and early Wednesday morning, there being a steady downpour for several hours.

The United Church service was held on Sunday afternoon, Rev. Mr. Whitehouse of Penticton, officiating.

CANADA WILL HELP STATES

To Become Partner in Enforcement of Prohibition Law.

New York, Aug. 19.—Canada is to become virtually the partner of the United States in the enforcement of the American prohibition law, under an arrangement which the Canadian administration is taking steps to put into effect.

COAL PEACE HOPE DIES

Parleys For Settlement Collapsed Quickly.

(Special to The Review) London, Aug. 19.—Negotiations between the British coal owners and coal miners, which had been looked forward to with hope from the long coal tie-up, collapsed shortly after they opened this afternoon.

(Special to The Review) Victoria, Aug. 19.—Among the B. C. fall fair dates just announced are Peachland, Sept. 2 and Kelowna, Sept. 22 and 23.

(Special to The Review) Ever notice how polite the foreign man is when he has something to sell.

CORRESPONDENCE

WAS NO INTERFERENCE To the Editor of The Review: The enclosed article has been shown me, and I beg to state that the stepfather did not attempt to interfere with the car in any way, and I cannot ascertain where the rumor started from.

Mr. Millership not being at the drawing, or in Penticton since, neither has he sent word in so I cannot understand where they got their information from; unless it was from James Hardy home where Ruby and James Ford are living.

Mr. Millership a big dog for having in 1923 paid their fare from England and clothing and fed them until they could obtain employment for themselves, of the four Ford children, Mr. Millership worked on the K.V.R. since the earliest days of construction on a material yard foreman, laying steel, etc., since 1916 as section foreman, and has many hundred acquaintances among the town employees in Penticton and the town of Kelowna who know him to be always on the square and would like to see this thing straightened out.

Kindly publish this. Thanking you, ADRIANE MILLERSHIP Box 1, Naramata, B.C., Aug. 19, 1926.

REVOLUTION IN NICARAGUA (Special to The Review) Washington, D.C., Aug. 19.—Revolution has broken out at several points in Nicaragua.

H. H. STEVENS IN PENTICTON

Word received from Vernon indicates that H. H. Stevens, M.P., will address a meeting at Penticton on the 28th instant.

An optimist is someone who goes out to spend a long afternoon on the links with one golf ball.

The Associated Boards of Trade, in convention at North Vancouver, passed a resolution last week, urging the Minister of Public Works to construct the Naramata-Kelowna highway.

This was due to the bringing to the attention of the gathering the importance of the road by Mr. R. Lyon, delegate of the Penticton Board of Trade.

Mr. Lyon states that no delegate was present at the convention from Kelowna, but that he received considerable support from coast delegates.

19 KILLED IN TRAIN WRECK

German Disaster Was Deliberately Planned.

Lohrte, Germany, Aug. 19.—Nineteen persons were killed and five seriously injured early this morning when the Berlin-Danube express, speeding at 50 miles an hour, was derailed near here.

GUARDS BAND THRILLS HUGE PENTICTON CROWDS WITH WONDERFUL MUSIC

Penticton Presented Gala Appearance on Thursday Last When World-Famous Organization Played at Two Performances to Over 4000 People - Visitors Crowded Into Town.

The visit of the famous Coldstream Guards band on Thursday last was an event long to be remembered in Penticton, both from the standpoint of an exceptional musical treat by what is probably the leading military band in the world, and from that of the large attendance, which made the town assume a gala appearance both afternoon and evening.

Hundreds of well-filled cars, many from Summerland, poured into Penticton all day, attendance being particularly large from the Princeton district and from Washington state. In all it is estimated that over 4000 men, women and children heard the band at the two performances.

The bandsmen arrived on the "Okanagan" from Kelowna shortly after eleven o'clock, and although the boat was earlier than expected, a large crowd welcomed the bandsmen as they walked down the gangplank.

Huge Crowd at Grounds
Well over 3000 people, it is estimated.

VENDOME HOTEL

1138 Nelson St., Vancouver,
C. B. McCallum, manager, formerly of Hotel Summerland, Summerland. All residents of this district specially welcome. Rooms with or without bath. Large airy suites. 1-t-6

BLACKHEADS

Get two ounces of peroxide powder from your druggist. Sprinkle on a hot, wet cloth and rub the face briskly. Every blackhead will be dissolved. The one safe, sure and simple way to remove blackheads.

QUICK--SOMEONE IS WAITING FOR YOU!

When the telephone rings, courtesy and efficiency demand that it be promptly answered. To anyone waiting on the telephone, seconds are long. No person likes to be kept waiting. Why keep others waiting? Any call may be important. Why neglect any of them?

THE SUMMERLAND TELEPHONE CO., LTD.

who have heard other famous bands. There is a harmony and precision about the playing of the Coldstream which makes it outstanding. The band plays as one man, and no comparison is so apt as to that of a powerful pipe organ, so naturally are the modulations developed in the compositions. In the marches, too, particularly in the Coldstream Guards March, did the band demonstrate its ability to interpret the martial spirit.

Considered particularly enjoyable were the cornet and piccolo solos, one visitor who motored two hundred miles to hear the band declaring that these selections alone were well worth the trip.

Are Gratified

Reeve Macdonald and the municipal council are naturally gratified at the wonderful reception which greeted the band. It was early recognized that Penticton was a pretty small town for such an organization to visit, and was thought to be an opportunity should be allowed to slip for citizens of the town and district to be given this treat.

The Reeve and council, therefore, went individually on the guarantee to ensure the band's appearance here and obligated themselves to considerable work in making the preliminary arrangements.

Admission Price Low

The endeavor was only made to cover expenses, and for this reason the admission price was limited to \$1 with no reserved seats, and children were admitted free in the afternoon. This meant that the people of Penticton and visitors saw and heard the band cheaper than at any other point. At Kelowna the admission was \$2 for a good seat, with amusement tax extra.

The huge attendance at the band performances naturally means that a goodly profit was made by the Reeve and council, which they plan to divert to worthy local objects, not as yet decided upon. The town is also benefited by a new bandstand, towards which the Turf Club donated \$50. The stand is on skids and can be moved elsewhere.

That the band enjoyed their welcome to Penticton was undoubtedly. Many spoke appreciatively of the whole-hearted welcome of Penticton citizens, and there was every indication that their brief stay here was a pleasant one.

Two Missed Train

Two of the bandsmen, unfortunately missed the train for Grand Forks on Friday morning. Reeve Macdonald, however, motored them to that city and they arrived there in plenty of time to play at the evening concert.

Many Americans Present

The performances of the band were not only greatly enjoyed by Penticton and district citizens, but many Americans were much pleased at the opportunity to hear this famous British musical organization. Reeve Macdonald made the trip south of the border prior to the advent of the band here and this is believed to have had a lot to do with the large attendance here.

Among the American visitors was E. L. Stohr, vice-president of the Wenatchee Daily World, who expressed considerable enthusiasm in his remarks regarding the band to The Herald. E. L. Stohr, of the Okanagan Independent was equally congratulatory.

Boy Scouts did good work in helping in the seating and car parking at the Arena and on the grounds.

PRE-EMPTIONS

Vacant, unreserved, surveyed Crown lands may be pre-empted by British subjects over 18 years of age, and by aliens on declaring intention to become British subjects, conditional upon residence, occupation and improvement for agricultural purposes.

Full information concerning regulations regarding pre-emptions is given in Bulletin No. 1, Land Series, "How to Pre-empt Land," copies of which can be obtained free of charge by addressing the Department of Lands, Victoria, B.C., or to any Government Agent.

Records will be granted covering only land suitable for agricultural purposes and which is not timber land, i.e., carrying over 5000 board feet per acre west of the Coast Range, and 8000 feet per acre east of that range.

Applications for pre-emptions are to be addressed to the Land Commissioner of the Land Recording Division in which the land applied for is situated, and are made on printed forms, copies of which can be obtained from the Land Commissioner.

Pre-emptions must be occupied for five years and improvements made to value of \$10 per acre, including clearing and cultivating at least five acres before a Crown Grant can be received.

For more detailed information see the Bulletin "How to Pre-empt Land."

PURCHASE

Applications are received for purchase of vacant and unreserved Crown lands, not being timberland, for agricultural purposes; minimum price of first-class (arable) land is \$5 per acre, and second-class (grazing) land, \$2.50 per acre. Further information regarding purchase or lease of Crown lands is given in Bulletin No. 10, Land Series, "Purchase and Lease of Crown Lands."

HOMESITE LEASES

Unsurveyed areas, not exceeding 20 acres, may be leased as homesites, conditional upon a dwelling being erected in the first year, title being obtained after residence and improvement conditions are fulfilled and land has been surveyed.

LEASES

For grazing and industrial purposes, areas not exceeding 640 acres may be leased by one person or a company.

GRAZING

Under the Grazing Act the Province is divided into grazing districts and the range administered under a Grazing Commissioner. Annual grazing permits are issued, based on numbers ranged, priority being given to established owners. Stock-owners may form associations for range management. Free, or partially free permits are available for settlers, campers and travellers, up to ten head.

GRAZING

size. Their flavor resembles a mixture of the Duchess and Gravenstein; they are superior for dessert purposes and are equally early. They have, however, the same fault as most early apples inasmuch as they turn spongy very soon after ripening.

From a market standpoint we have too many Duchess now, but as they are largely fillers, it might be worth while to consider replacing defunct Duchess trees with this early dessert apple, which appears to us, from a market standpoint, to be a superior early variety. Taste might be made as to its productiveness and freedom from disease, as well as the growing habits of the trees.

Trade Complaints

We have advices from Edmonton, Saskatchewan, Regina and Moose Jaw to the effect that an "independent shipper" in B. C., through his agents, is cutting prices on cucumber in the market. We are passing this information along for what it is worth, as it comes from men actually in competition with these agents.

It is asserted that cucumbers were being sold in Moose Jaw last Monday at 50 cents a box, No. 1 tomatoes at \$1.50. This price for cucumbers is the same as the f.o.b. shipping price from B. C. at that date.

Another instance of price cutting which is equivalent to lowering tomato prices, is today's (Friday's) quotations from Kamloops, at 80¢ per crate. This quotation is also made by an independent. We want B. C. growers to know what regular jobbers think is the chief cause of low prices.

Seattle Telegram

Eastern Washington Elberta peaches are plentiful, bottom price reached selling at 65 cents; f.o.b. shipping point price 50 cent. The apple crop is promising, supplies liberal. Early varieties cleaning up, later brands will come on the market in two weeks. Cantaloupe inspection fine, only ripe coming. Standards \$1.75 to \$2.50. Prices to hold high this season. Tomatoes plentiful from Eastern Washington in two weeks more, low prices coming, now selling at 75 to 80 cents, home grown \$1.00 to \$1.35. Blackberries over-ripe, carteries paying cents per lb., selling on street for \$1.00 to \$1.50 per box.

Saskatoon

Weather has been moderately cool with some rain occasionally which has benefited some of the crops. Business is fairly good although not so much being handled through jobbers warehouses now that mixed cars are being distributed at the country points. Mostly everything is now coming from B. C. with the exception of Elberta peaches and a few Italian prunes from Washington.

This market is well supplied with everything, but small No. 2 plums are hard to sell; also crabs are not moving fast enough.

Edmonton

The weather was cooler during the week. A good rain fell all over the district Tuesday. There is a wonderful crop of vegetables.

The market is well supplied with B. C. fruit, some very fine cantaloupes arriving from Oliver. Some of the field tomatoes are arriving too green; otherwise the B. C. tomatoes arriving here have been good satisfaction.

Medicine Hat

Harvesting operations are in full swing in this district now, but the crops on the eastern part of our territory are very poor. Business, however, is fair.

Moose Jaw

The weather is cool, local rain first of week, helped crops. Business brisk. Market well supplied with B. C. and Washington fruit and vegetables. Demand for apples is very slow. Monday dealer supplying B. C. cucumbers in good shape at forty to fifty cents per box and No. 1 tomatoes at dollar fifty.

F. O. B. Shipping Point Prices:

British Columbia	
Apples, Wealthy, wrapped	\$1.40
In crates	1.10
Pears, Bartlett, fancy	1.75
C grade	1.50
Other varieties, fancy	1.50
Other varieties C grade	1.25
Other varieties, in crates	1.00
Cantaloupes, standards	3.00
Plums	1.75
Plums, Damson	1.35
Assorted layered	1.15
Apricots	1.10-1.25
Prunes, Italian	.55
Potatoes, O.K. valley, ton	30.00
Main line, ton	28.00
Vancouver, ton	22.00
Other prices same as last week.	

Regina

Business is good. Large supplies of all fruits and vegetables are being sold to country points.

Considerable volume of reasonable priced fruit and vegetables are arriving in good condition from B. C., also mixed fruits from Washington.

American fruit is largely going to outside points and becoming a very important factor in fixing prices, evidences indicate.

L.C.L. supplies are gradually drying up. Ontario blueberries are coming in much less volume than last year. The first car of Ontario sour cherries arrived today. During the week the first shipment of B. C. cantaloupes arrived. The quality and condition is good.

Winnipeg

Business on this market for this week is on the quiet side, large supplies of fruit are offered but for the most part are in poor condition. B. C. cranberries, Transcendants are arriving very small and without color and slow sale is the consequence.

Sour cherries from Ontario are coming in in very poor condition and are being jobbed. No tomatoes are on the market from B. C. and the imported tomatoes are arriving in bad condition, a car of Ontario tomatoes being only fair.

B. C. Duchess and imported Wealthies and other varieties take care of all the demand there is for apples at the present time. The first car of Oliver cantaloupes is expected tomorrow, and if it arrives, in good condition will meet a good reception.

Vancouver Market Report

The weather during the last week has continued dry and moderately warm, which has also been favorable to the movement and consumption of fresh fruit and vegetables arriving on the market in considerable quantity.

The supply of B. C. apples, plums, peaches and pears have not reduced the importation of similar products on the Vancouver market to any great extent so far this season. B. C. apricots, however, exceeded those imported.

Some very fine local strawberries were in evidence on the market, but raspberries, currants and gooseberries have practically disappeared.

Greater care should be taken by certain producers in handling and packing the various products which sometimes arrive on the market in a most unattractive condition. The transportation companies are not always at fault regarding rough handling, etc., and there are obligations for all parties to assume if the best results are to be obtained.

The B. C. Southern Okanagan cantaloupes are not arriving as fast as the trade could handle them just at present, but larger quantities are expected shortly.

Vancouver Wholesale Prices

Apples, Imp. Gravenstein	\$2.50-\$2.75
B. C. Gravensteins	\$2.00-2.50
Wealthy	\$1.50-2.00

B. C. Cantaloupes, 80s & 45s	\$3.00-4.75
Tomatoes, Wash. field	2.00
Okanagan field, 27s & 30s	\$1.40-2.50
In bulk	2.50

DAUGHTER CHAINED IN CELLAR; FATHER RESTED IN BED

Vernon, Aug. 12.—Wm. Shullder, a Ukrainian, was sentenced to serve thirty days in jail by Magistrate Haggie, on Tuesday morning for an offence committed against his 17 year old daughter. When Constable Cann arrived at the Shullder home on Monday night, the man of the house was in bed, but his daughter was found in her stockinged feet tied up with ropes and chains in the cellar. This was the punishment her father inflicted on his daughter for some trivial disobedience. The young girl, quiet and of good character, would have remained all night with her arms stretched above her head, hands chained together, had it not been for the intervention by the police officer.

Questioned by the Magistrate, Shullder said that was the way his parents punished him and if it was not too bad for him it should not be too bad for his daughter. The punishment was inflicted on him in Russia.

This is by no means the first time that the officers of the law have had occasion to interview this man, but it was his first appearance in court.

ALLEN GROVE

Mr. and Mrs. Albert Preston are the proud parents of a son, born on Saturday last in the General Hospital at Penticton.

Miss Dorothy Stevens was the guest last week of Miss Violet Beck of Summerland.

Every family in the neighborhood was represented in Penticton Thursday and heard the famous Coldstream Guards band.

Flapper: 'd like a pair of garters please. Mate Clerk: Yes, miss. Something like the ones you have on? It's difficult for a woman to make a dollar so faster than the nearest bargain counter.

WATER NOTICE

USE AND STORAGE

TAKE NOTICE that the Dominion Department of Agriculture, whose address is Ottawa, will apply for licence for the storage and use of 200 acres feet of water out of Crescent Creek, also known as Paul Creek, which flows easterly and drains into Trout Creek, about two miles below No. 1 Summerland reservoir on Trout Creek.

The storage-dam will be located at Crescent (or Paul) Lake. The capacity of the reservoir to be created is about 200 acre feet, and it will flood about 150 acres of land. The water will be diverted from the stream at either the headgates of Summerland municipal system, or about 100 yards above the Kettle Valley Railway bridge over Trout Creek at the Dominion Experimental Station, and will be used for irrigation purposes upon the land described as Dominion Experimental Station, Part of Penticton Indian Reserve No. 1.

The licence applied for is to supplement a right to take and use water as per Licence No. 6492.

The notice was posted on the ground on the 26th day of July, 1926.

A copy of this notice and an application pursuant thereto and to the "Water Act, 1914," will be filed in the office of the Water Recorder at Vernon, B. C.

Objections to the application may be filed with the said Water Recorder or with the Comptroller of Water Rights, Parliament Buildings, Victoria, B. C., within thirty days after the first appearance of this notice in a local newspaper.

DEPARTMENT OF AGRICULTURE, Ottawa, Applicant, (By W. T. Hunter, Agent)

The date of the first publication of this notice is 30th July, 1926. 30-t-c

WATER NOTICE

Diversion and Use

Take notice that L. M. Agur, whose address is Summerland, B. C., will apply for a license to take and use 1,000 gallons of water per day from unnamed spring located on said applicant's property, being Blk. 5, D. L. 2891, Map 134, Summerland. The water will be diverted from the said spring at a point close to East boundary of above property and about 400 feet south of Kettle Valley Railway right-of-way, and will be used for domestic and irrigation purposes upon following described lands: Blks. 4 & 5, D. L. 2891, and Blks. 9 & 10, D. L. 475, Map 161. This notice was posted on the ground on the 30th day of July, 1926. A copy of this notice and an application pursuant thereto and to the "Water Act" will be filed at the office of the Water Recorder at Vernon, B. C., within 30 days after the first appearance of this notice in a local newspaper.

The date of the first publication of this notice is August 6, 1926.

L. M. AGUR, Applicant
By R. V. Agur, Agent. 31-t-c

PURE BEER

THE TRUTH ABOUT PURE BEER

IN the past several years the public has been told many things about beer, yet it is not surprising that many people should not know what beer really is, for the merits of pure beer have been almost entirely neglected by controversialists.

Pure beer is a scientifically made malt solution, derived from malted barley and flavored with hops. In this malted condition the grain is much more nourishing than in its natural state and the beer has many beneficial activities when taken as a beverage.

In the first place pure beer is in itself a complete food, rich in proteins, maltose and dextrin, mineral salts and organic nutritive compounds. It is superior to either cider or wine in its nourishing qualities. Consumed at the rate of one bottle per meal, it would replace 300 grammes of bread in food value, because of its content of extractives, carbohydrates and proteins.

Pure beer assists valuably in the assimilation of other foods, for, by reason of its hop-bitter principles, its weak alcoholic strength and its dissolved carbonic acid gas, it exerts a beneficially stimulating action on the stomach.

Beer is a beverage rich in vitamins, so necessary to the well being of the human organism and as a defense against disease. It is essential for the liver to be completely sterilized by prolonged boiling in the presence of the hop bitters, which are strongly antiseptic.

The health-giving qualities of the pure beer sold in the people of British Columbia are secured and maintained in the model plants of the Vancouver Brewery Limited, Interior Brewing Co. of Canada Limited, Westminster Brewery Limited, Silver Spring Brewery Limited, and the Victoria Phoenix Brewing Co. Limited, members of the Amalgamated Breweries of British Columbia, which are models of scientific care and cleanliness. They are open for inspection at all times, and visitors are gladly welcomed.

NEW MONSTER OF THE DEEP

There is an element of surprise in the announcement that the White Star Line proposes to build a passenger ship of 60,000 tons, slightly larger than the Leviathan. It has been generally believed that no more vessels of that size were in prospect, at least for the present. Their cost is great, they are expensive to maintain, and they appeal to what is after all a limited class of travellers. The liners launched since the war have been of smaller tonnage and less speed. But the White Star Line obviously believes there will be profit in adding the Oceanic, as the new ship probably will be named, to its New York-Southampton service.

Since the sale of the line, which is a part of the International Mercantile Marine, to British interests has been definitely abandoned, there is now no likelihood that this corporation will make a bid for the ships of the United States Lines. The shipping board has made it a matter of policy not to sell its ships to companies that own or operate any foreign tonnage; and the White Star ships are all under British registry, though the company is controlled by American capital.

BUILD AND LET BUILD

As far back as history begins, there have been persons who have stood in the way of progress, some for reasons mercenary, others because of a real lack of vision or natural narrow tendencies.

It is a matter of record that the builders of the ancient cities and public monuments, some of which still exist, were met by hundreds of obstacles placed in their way by visionless men who did not have the future interests of their communities and the world at heart.

This same condition may be applied to our own community today. We see opposition to things which would expedite business or cause an economic improvement or would in humanity's sake, afford protection against sickness or the killing of hundreds of motorists or pedestrians. Here there should be no room for the obstructionist.

The truly great men of all time are the builders and the ones who produce or help to produce. The parasite who does nothing for himself or his fellow man is a cheat, and the one who interferes with progress is little better. "Build and let build" should be our motto, and the future will comfortably arrange itself. There are many things to be considered in the building up of a community. Ten men can do more than one and when these ten men are arranged in a team formation, their work cannot only count much more than ten times, but, in fact, twenty times as much.

DISTRIBUTION OF WEALTH

Our friends the Communists say, and no doubt believe, that if all wealth were evenly distributed so much that nobody would have too much, everybody would have enough. But they say and believe this only because they want to, not because they have any sound reason for saying and believing it. It is a fallacy. Sir Joseph Stamp, the eminent British economist, in an address to the Association for the Advancement of Science, one day last week, showed that there is much misconception on this subject of wealth distribution. He calculated that if all the incomes in Britain in excess of \$1200 a year were pooled and, after deducting the present tax, distributed among the whole people, there would not be more than \$1.25 additional for each family.

This reminds one of a story told about Nathan Mayer Rothschild, founder of the English branch of the Rothschild family. A visitor with communistic ideas called upon the great financier and undertook to lecture him on the enormity of his offence in possessing vast wealth while the mass of mankind was in poverty. Rothschild took up a pen and made a rapid calculation; then he replied: "I find if my wealth were equally divided, each man would get a farthing. Here is a half-penny, which is more than double your share. Good day."

EDITORIAL NOTES

Between wandering elephants and mystical sea-serpents, the interior is considerably in the limelight these days as far as animal life is concerned.

The Pedlar's Pack

By AUTOLYCUS

"A Snapper Up of Unconsidered Trifles"

I notice that Dr. Addington Bruce has been offering some very good advice to all and sundry in the matter of color schemes in home and school, the groundwork of his remarks being the effect of certain colors on the minds of many people. The connection between colors and moods is a subject which is never thought of by the great majority, but it is unquestionably real. There was method in the madness of the faded Mrs. Skewton, who insisted on pink as the prevailing tone in her boudoir, and so contrived to disguise the yellowness of her complexion, and we can easily understand that her mind was soothed by the rosy hue of her surroundings. But hers was a false application of natural principles, the idea being to hide what it was only possible to gloss over. And she unconsciously ran counter to the actual fact that a pink atmosphere cannot be long endured by normal people. Dr. Bruce gives red and yellow as colors which are apt to produce restlessness, dead grey or dark blue as lethargy breeders, and green as the color for restfulness. He does not, however, point out (as he very well might have done) that nature has plainly shown the way where green is concerned. Green fields and green trees, green vegetation everywhere, and never a hint of weariness to the human eye as a result. It would be impossible to conceive of a more direct and conclusive lesson. What is the crowning glory of a garden but the ever-welcome green lawn, on which the eyes rest in unconscious relief? There is a finality of satisfaction to the mind from most shades of green which is absent from any other color, and the reason is found in nature itself.

Perhaps I had better excuse myself from this lapse into philosophy—it arises out of the contemplation of certain lists of alleged colors appearing in a recent advertisement of ladies' hose, although there is but little relation between these new tints and those just referred to. "Atmosphere" is one of them, and, seeing that atmosphere is actually colorless, there seems to be some difficulty in the placing of such a color. "Bluette" is perhaps imaginable with less trouble, but "dawn" and "sunset" are certainly hard to fix, since those periods occasionally show an array of various hues which are not possibly be comprised in one word. "Nude" might at first sight appear quite explicit, but the vagrant fancy may be permitted to wonder what color would be handed out to an Oriental lady who aspired to possess hose so described. "Sunburn," "zinc" and "brun" are found in this bewildering list, and I suppose we shall later on be expected to add a few breakfast foods to our known colors. "Puffed Rice," "Grape Nuts" and "Shredded Wheat" might with more or less propriety be added to these new ranges of colors, and as "peach" and "apricot" are already in the list, why not have "cantaloupe," "tomato" and such other products as may occur to the ingenious advertiser? If the color list is to go crazy at all, by all means let it reach to worth-while extremes of lunacy!

A recent photograph on the encroachments of the sea on the East Coast of England puts it that the "Tight Little Island" is growing tighter, a journalistic turn of words which can be enjoyed, but which cannot be endorsed. The east coast is having a hard struggle to hold its own against the sea is certainly true; moreover it has been true for many centuries. The ancient city of Dunwich, once the centre of church authority in England, has all but disappeared, and its stately minsters now stand many fathoms deep beneath the waves. Lowestoft has been battered by furious onslaughts for many years, and on more than one occasion its concrete defences have been torn apart in unbelievable fashion. At Frinton have been slices of cliff almost equal to a town lot detached themselves from the mainland as a result of sea erosion, and it is now stated that the railway line between that place and Walton has to be moved further inland to be safe. This is not surprising to those who know the district; both Walton and Frinton have long been busy protecting their seafarers, but the mile or so intervening between the two places is open to attack, and has crumbled away at a great rate. Conditions like these lend a certain plausibility to the idea that England is gradually getting smaller; but there is another side to the matter. Against the gains of the sea on certain parts of the coast there are corresponding gains elsewhere which offset them. There are, as a matter of fact, villages on the south and west coasts which used to be regarded as remote and such cases as once do away with any idea of general submerison. The tight little island is good for many a day yet.

Not very long ago I ventured to make a few observations on the tendency of some modern composers to bring their music to an end on the dominant of the chord instead of on the tonic or keynote, and complained that in so doing they left their melody unfinished and unsatisfying. At that time I had not read the late Hubert Parry's exhaustive work on the gradual development of European music, and was simply expressing my own instinctive feeling in the matter. Since then I have had an opportunity of going through Parry's book, and find that I might quite safely have expressed myself more strongly than I did. Parry, the English composer, whose scheme of musical art, which has taken a thousand years to develop, "rests upon a systematization of the scale which recognizes certain notes as being final." He amplifies this in the following words: "The tonic (keynote) is the most essential note in the scale, and the one on which every one instinctively expects a melody or piece of music in that key to conclude; for if it stops elsewhere every one feels that the work is incomplete." Well, I am glad to find that my own musical instinct was correct, and that what I objected to was in effect a reversal to the modic system of more primitive times. Before the coming of the harmonic system as we know it, it mattered very little which note a melody ended on, since, judged by modern ears it had no final ending at all—it had no "point of repose," and was for the most part a reiteration of a few given notes in varying order of progression. Thus, strictly speaking, the modern habit of ending a song on any but the keynote is a musical retrogression, and constitutes a mannerism which is mostly prompted by the effort to get "something different" even if it is bad. And this conclusion holds good in spite of the fact that, on rare occasions we find really great composers depart from the basic rule. In such cases (which are few and far between) there is generally a reason which is strong enough to justify the departure.

George Bernard Shaw, having, in common with a good many other people, attained the age of three score years and ten, was naturally the recipient of numerous congratulations. Amongst those who thus took notice of his birthday were the professors of a certain German university, and in his acknowledgement to them Mr. Shaw goes out of his way to remark that no similar institution in England had honored him in that fashion, the English being, in such matters, barbarians! Just why the professors of English universities should have felt it incumbent on them to honour a writer who loses no opportunity to deride and ridicule their country is not particularly clear, but it is quite understandable that a German institution would do so as a reason on his side. Mr. Shaw never wrote once said anything so derogatory of Germany, and that he is internationally known as the country he lives in and although nobody now takes him seriously, it is quite possible his quips and jokes stay in some memories.

In a list of leading humorists recently compiled, the name of George Bernard Shaw was not included, the reason given being that he was not a humorist but an onymist. This was wrong—he is not an onymist to those who are able to appraise him accurately. In person he is doubtless a delightful companion—in his literary capacity he is enormously over-rated by people who are blinded by his irresponsible buffooneries. We are told by his admirers that he writes as he does in order to present views which he does not offer openly, and that he is internationally known in advance of his day. The reply to that is that there is not today any world problem which cannot be discussed openly, and which is not, as a matter of fact, so discussed by more than one writer. If, G. Wells, for example, has a world outlook far wider than that of Shaw, and is held in enough to treat it seriously. Mr. Shaw is by no means an onymist, but it is certain he delights to pose as one.

Secrecy Covers Moves of Hall-Mills Investigators as State Prepares to Clear Up 4-Year Murder Mystery

Amid activity of the most secret and intense sort, the revived Hall-Mills murder mystery is undergoing investigation. The major figures in the case, according to its latest known developments, are grouped here. Governor Moore of New Jersey feels that nothing short of the most exhaustive investigation can clear the state of the stigma of the unsolved mystery; his appointment of State Senator Alexander Simpson as special prosecutor is but one step in his fight to clear up the case. Mrs. Hall, released on bail after her recent arrest, is confident that her attorneys, with whom she is seen here, can exonerate her of any alleged participation in the double murder of her husband and Mrs. Eleanor Mills, four years ago. Mrs. Jane Gibson, "the pig woman," is considered the state's most valuable witness. "Willie" Stevens, eccentric brother of Mrs. Hall, is the object of much determined quizzing. Robert H. McCarter is chief of Mrs. Hall's attorneys.

NEW PROVINCIAL GAME LAWS

Northern and Eastern Districts. Northern District includes Atlin Electoral District and all the province east of the summit of the Cascade Mountains north of the Canadian National Railway, formerly known as the Grand Trunk Pacific Railway. Eastern District includes all of the province east of the summit of the Cascade Mountains south of the Canadian National Railway, formerly known as the Grand Trunk Pacific Railway. Open season to kill game as follows: Big Game. Moose—Bulls only over one year old, in the Electoral Districts of Atlin, Fort George, Skeena and Omineca, north of the main line of the Canadian National Railway, from September 1 to December 15, both dates inclusive. Bulls only, over one year old, in the Electoral District of Cariboo and those portions of the Omineca, Skeena and Fort George Electoral Districts, south of the main line of the Canadian National Railway, from September 1 to December 15, both dates inclusive. Moose and Cariboo in the Atlin and Omineca Electoral Districts from Oct. 1, 1926, to Dec. 15, 1926, both dates inclusive; bear in the Northern District from September 1, 1926, to June 30th, 1927, both dates inclusive; and in the Eastern District from September 15, 1926, to June 30, 1927, both dates inclusive. Fur-Bearing Animals. All Fur-Bearing Animals (except Beaver and Muskrats)—Throughout the districts, from November 15 to April 30, 1927. Beaver and Muskrats—Throughout the districts, from March 15, 1927 to April 30, 1927. Game Birds. GROUSE and PTARMIGAN (except Prairie-chicken or sharp-tailed grouse)—In the Northern District and in those portions of the Omineca, Fort George, Skeena, and Cariboo Electoral Districts situated and lying in the Eastern District, from September 15 to Nov. 15, both dates inclusive. BLUE GROUSE (only)—In the Electoral District of Grand Forks-Greenwood and that portion of the Similkameen Electoral District situated and lying to the east of Allison Creek, the South Similkameen River, and the Panayton River, from October 1 to October 15. GROUSE (Blue or Willow) and PTARMIGAN—in the remainder of the Eastern District (except the Electoral District of South Okanagan) from September 15 to October 15. PRAIRIE CHICKEN or Sharp-Tailed Grouse—in the Electoral District of Fort George situated and lying to the north and east of the Rocky Mountains, from September 1 to October 15, both dates inclusive. In the Eastern District, in the Electoral Districts of North Okanagan, Yale and Kamloops and in the Electoral District of Salmon Arm, situated and lying west of a line running due north and south through the village of Chase, and in those portions of the Cariboo and Lillooet Electoral Districts situated and lying to the south of the 53rd parallel of latitude, and west of the Fraser River and that portion of the Electoral District of Lillooet situated and lying to the west of the Fraser River, from September 1 to November 15, both dates inclusive. MOUNTAIN SHEEP—Over one year old, throughout the districts (except south of the main line of the Canadian National Railway), from September 1 to Dec. 15, both dates inclusive. Over one year old, in that portion of the Eastern District south of the main line of the Canadian National Railway, from September 15 to Dec. 15, both dates inclusive. DEER (except White or Kormodot)—Throughout the Northern District from September 1 to June 30, 1927. Throughout the Eastern District from September 15 to June 30, 1927. DEER—Bucks only, throughout the districts (except White-tailed Deer in North and South Okanagan and Similkameen Electoral Districts, and in the Grand Forks-Greenwood Electoral District west of the summit of the Midway Mountains) from September 15 to

December 15, both dates inclusive. Bag Limits. Moose, 1; caribou, 2 (except south and east of the main line of the Canadian National Railway, formerly known as the Canadian Northern Railway, and north of the main line of the Canadian Pacific Railway, in which territory only 1 caribou to be taken); wapiti (elk), 1; mountain-sheep, 2 of any one species or 3 altogether north of the main line of the Canadian National Railway, formerly known as the Grand Trunk Pacific Railway, and 1 sheep within the boundaries of Fernie, Cranbrook, Columbia, Lillooet and Cariboo Electoral Districts; goat, 2; bear, 3 of any one species other than grizzly; north of the Canadian National Railway (G.T.P. Railway), 2 grizzly bear; south of the Canadian National Railway (G.T.P. Railway), 1 grizzly bear; deer, 2. No Game May Be Sold Except Moose and caribou in the Atlin and Omineca Electoral Districts from Oct. 1, 1926, to Dec. 15, 1926, both dates inclusive; bear in the Northern District from September 1, 1926, to June 30th, 1927, both dates inclusive; and in the Eastern District from September 15, 1926, to June 30, 1927, both dates inclusive. Migratory Birds Convention Act. Ducks, Geese, Brant, Coots, Wilson Snipe, Greater and Lesser Yellowlegs, throughout the Northern and Eastern Districts, from September 15 to Dec. 31, both dates inclusive. Bag Limits. Ducks, 20 in one day, 150 for season; geese, 10 in the aggregate of all kinds in one day, 50 in the aggregate for season; brant, 10 in one day, 50 for season; Wilson snipe, 25 in one day, 150 for season; coots, 2 in one day, 15 for season; greater and lesser yellowlegs, 15 in the aggregate of all kinds in one day, 150 in the aggregate for the season. Provided that portion of Lillooet Electoral District lying to the east of a line drawn north and south (astronomical) of Alta Lake Railway Station on the Pacific Great Eastern Railway, shall, for all purposes in respect to open seasons on migratory game birds within the purview of the "Migratory Birds Convention Act," be construed and considered as lying within the Eastern District. It is Unlawful To kill the following Migratory Game Birds at any time: Black-breasted and golden plover, elder ducks, wood ducks, swans, curlews, cranes, hand-billed pigeons, doves, willets, godwits, killdeer and upland plover, avocets, dowitchers, knots, oyster-catchers, phalaropes, stilts, turnstones and all shore-birds not provided with an open season in the above schedule. To kill the following Migratory Non-Game Birds at any time: Auks, aukslets, bitterns, fulmars, gannets, grebes, gullinots, gulls, herringons, jaegers, loons, murres, petrels, puffins, shearwaters and terns; and the following Migratory Insectivorous Birds: Bobolinks, catbirds, chickadees, cuckoos, flickers, flycatchers, grosbeaks, hum-birds, kinglets, martins, meadow-larks, night-hawks or bull-bats, owls, orioles, robins, shrikes, swallows, swifts, tanagers, titmice, thrushes, vireos, warblers, waxwings, whip-poor-wills, woodpeckers, wrens, and all other perching birds which feed wholly or chiefly upon insects. To take the nests or eggs of any migratory game, non-game, or insectivorous bird at any time. To buy, trade, sell or offer for sale any migratory game, non-game or insectivorous bird or their nests or eggs. To use any automatic, swivel or machine gun or battery or any gun larger than a 10-gauge, or a pump-gun without a permanent plug. To allow any dog to run deer at any time or to run at large hunting dogs between April 15th and August 15th, both dates inclusive. To hunt upland game birds between sunset and sunrise and any other game or migratory game birds between one hour after sunset and one hour before sunrise. To carry loaded firearms in or discharge same from an automobile or any other vehicle either on or off a highway. To carry firearms in an automobile, launch, sailboat, or power-boat during the close season on game without be-

PUMPS ARE DOING WELL

Anyone motoring to Vernon this summer, when passing Oyama, might have been wondering about the little pumping equipments along the lake. Well, here is the way of them, and our ranchers are intensely interested in the water question, the figures obtained may be of unusual interest just at the present time. These little pumps have been installed by the lot owners themselves as they could not rely on the gravity supply. The cost has not been very high, most of them about \$150. The pumps are 2 1/2 in. two stage centrifugal type and guaranteed to deliver a full head up to 150 feet. One is being called on to force the water 150 feet, and another even to 160 feet, and even at that they delivered the full capacity. It is rated at 185 gallons, and keeps right up to its rate. The engines they are attached to are Diesel oil, and are 15 to 20 h.p., though 18 h.p. is preferred—that size costs \$125 t.o.b. Vancouver. The pump installations, with a competent man to supervise is charged at \$300 to \$350. The pipe was shipped in at 55c per foot at destination. Pumping as they did for 100 days, they delivered 2 1/2 acre feet for their season, which is there considered a good irrigation supply. Naturally, the cost of running these little engines is an item of interest, but that is a smaller item than would be expected. The fuel used about half a pint of crude oil per horse power per hour, and the lubricating oil required was only 1 1/2 gallons per day. An interesting departure by one man was a relay plan, pumping in two steps, into a tank from the first one, and up to the orchard by the second, or raising in all 270 feet to supply a 75-acre orchard. The figures he had kept on this are very accurate and show an estimate of working costs of \$8.00 an acre. This does not include interest on his investment. But look at what he had: water when he wanted it, as much as he needed, as promptly and as late in the season as required, and his ranch is about the same height above the lake as the Summerland Hospital. Happy Valley or Mr. Munn's. Some other figures relative to the heights about here that will be interesting have been secured. The old dam by the Anglican church that formerly supplied the power for the electric plant, is 450 feet above the lake. The creek between J.A. Ritchie's and Dale's is 600 feet. Mr. G. J. C. White's orchard was put at 400 feet the time the K.V.R. survey was put through. We are indebted to Mr. H. Harris for most of the figures and believe that the people along the water front at the tail-end of the distribution system will find them interesting. CHEAP POWER FOR OKANAGAN (Okanagan Commoner) Development of hydro-electric power at Shuswap Falls on a large scale would give the Okanagan the one thing needed to make increased growth possible from one end of the valley to the other. Cheap hydro-electric power would solve the biggest problem of our fruit-growers—that of irrigation, particularly in the vicinity of our lakes and rivers, where pumping plants could be made to do the work at little cost, and there would be no possibility of shortage of water. Every town in the valley is interested in the development of this project. All are suffering. We cannot develop the towns and we cannot develop fully the unincorporated territory until we have the power. We cannot get hydro-electric power at a price low enough to make practical use of it.

LOCAL HAPPENINGS

Mr. and Mrs. Newport returned from Winnipeg, motoring from Sicamous on Saturday. Mr. Newport went on to Victoria Sunday morning, but Mrs. Newport is spending a couple of weeks with her mother, Mrs. Begg.

Mrs. C. H. Gayton spent last week-end with Mrs. A. Gayton in Oliver.

Mrs. Walden's sister, Mrs. Gregory and her three boys have gone back to Winnipeg. Mr. Walden motored as far as Kelowna where they took the C. N. R.

It is a pleasure to know that the contractors at the Canyon Creek dam are patronizing our local stores. On Wednesday they were in and took back with them hardware, as well as groceries and other articles required. They report work as progressing satisfactorily.

Dr. Allen Harris left on Thursday, motoring with his mother to Vancouver. His work requires that he be there ahead of the opening of the university, in order to have his department ready.

Mrs. Porter and daughter, of Vancouver, are holidaying in the valley and have spent a few days with Mrs. Grey. They were highly delighted with the place as a vacation spot.

The car of cement for the Canyon Creek dam has been unloaded and the first stage of the contract Brind and Fyffe have, has been completed.

Mr. Lee McLaughlin and Miss K. Elliott are going to the coast Saturday. Miss Elliott will visit for a while in Vancouver before going on to her school in Courtney.

Mrs. W. H. F. Welsh took the services for the United Church Sunday last, but no service was held in the Summerland church this Sunday.

Mr. and Mrs. Skillicorn, who lived here some years ago, are shaking hands with former acquaintances and friends. They, with their daughter, are staying with Mr. and Mrs. Jas. Wilson. He has been with the C.P.R. since going to the coast and all are enjoying the visit thoroughly. They intend taking some motor trips with the Wilsons to various places of mutual interest.

Mr. J. L. Logie was in town in his new Nash car and seems ready to discuss the sea serpent as ever. He says that as a result of the publicity he has had, letters from all over the continent—New York, Boston, etc. Some poking fun, of course, and others asking for more information and saying that since "J. L." said it, it's true and that is all there is to it. One letter he received, came from a man he had known as a pupil in the school where Mr. Logie taught on the prairies and had not heard of since. He had written from back east, to renew by mail the acquaintance of boyhood.

Mr. "Billy" Grieve is in town, having motored from the coast to spend a week among old friends, and then on over the Cariboo trail.

Miss May Ritchie is visiting Mrs. Jas. Ritchie coming up from the coast this week.

Mr. and Mrs. Kindree, daughters

and son, are visiting Mrs. H. R. Vanderburg from DeLisle, Sask.

Mrs. Bowering was called to Moose Jaw by the sudden death of her sister, Saturday last.

Mr. Bryden T. Washington, motored to Revelstoke on Thursday of this week, taking with him Mrs. Washington and Willie Laidlaw.

A party camped in the tourist park this week are from Tonasket, having come up to attend the summer school in the Log Cabin.

The local box factory is feeling the pressure of demands for boxes, and has put the employees on over-time, doing about four hours extra each day.

Members of the Baptist Young People's Society were entertained on Tuesday evening by Miss H. Harding at the Misses' Spencers.

Mr. Brent has the contract to do the packing for the contractors constructing the Canyon Creek dam.

The employees at the Agenco packing house held a corn roast at Skaha Lake on Tuesday evening. They had a most enjoyable outing. Mrs. Tullett and Mrs. Fisher chaperoned the party. While on the way they had a most entertaining time digging a car out of the sand for two very enamoured young folk. In fact, so very enamoured were they that they even forgot to thank the party for the kindness shown—but never mind that, the two were quite happy.

Mr. Fred and Glenn Graham motored up from Seattle arriving Saturday last, to spend a few days with Mr. and Mrs. George Graham. They started on their return trip Thursday.

On Tuesday week someone broke into McCutcheon's barber shop, tempted, no doubt, as much by the confections as the cash. Entrance was effected by use of a key fitting the rear door. Tobacco, chocolate bars and a small amount of cash were stolen. As yet no one has been arrested for the offence, though police are investigating the affair.

Mr. and Mrs. Rumball, Sr. are among those visiting the coast.

Mr. Willis Walters' condition remains practically unchanged this week.

Owing to inspection being called for by the independent shippers at their plants, as well as the Co-operative, the Dominion department of agriculture has put on two additional inspectors. Mr. H. C. Howis, who has been connected with warehouse work for some time, and Mr. D. Thompson, were the two to receive appointment.

Dr. Lattimer of Brandon has been in town spending some time with his wife and grandchildren, who are here. The doctor is an eye, ear and throat specialist and intends locating in the valley. He is returning to Brandon shortly, and in a couple of months will come back locating at this end of the Okanagan. As there is no other specialist in this work, he should find a good location at this end of the district.

Mr. Neeve occupied the pulpit in the United Church Sunday of last week.

Some signs do not fail in dry times and it will be interesting to know that August is very often a little generous in rain, supply. According to a diary kept by Mr. J. C. White, every year for several years back rain has been recorded during the latter part of August, some of these being quite heavy falls. Calling up the Experimental Station, their records showed in August, 1924, 72 inches; and in 1925, 15 inches, and they had an average for the preceding nine years of 78 inches, and the record up-to-date this year—that is, the 15th—is only 03.

Miss Harwood has returned from her vacation on the prairies, her mother going on to Ontario to spend the winter with friends there.

Mrs. Bowering left on Monday for Moose Jaw to be present at the funeral of her sister.

Mrs. N. Cusick and children returned to Nakup on Tuesday. She has been visiting her sister, Mrs. Leslie.

Mr. T. Washington went out on Thursday to Revelstoke, making the trip by car.

Mr. and Mrs. J. Tait and little daughter returned on Monday from the coast, where they have been attending the exhibition.

Dr. Lattimer left on Saturday to return to his home in Brandon, after spending several weeks in here.

Mr. and Mrs. J. J. Embree and children are leaving on Saturday for Watts, Alta., where Mr. Embree will take part in the threshing.

Misses Adele and Olive Grant returned home on Monday after spending a short vacation at Vancouver.

Friends of Willie Ritchie will be pleased to learn that he is progressing as well as can be expected, after his operation for appendicitis in the local hospital this week.

Mr. and Mrs. T. H. Grant of Ioco, and Miss Cora Grant of Vancouver motored up to spend a week with their brother, Mr. S. W. Grant. They returned home on Sunday.

Miss K. Elliott leaves tomorrow for Courtney, where she will teach upon the commencement of the school term.

YOUNGSTERS ARE WARNED

Have Been Interfering With Services of the Church of God.

Some youngsters are making themselves quite a nuisance to the congregation of the Church of God, holding services in the Baptist church building in Summerland, and have gone to such an extent with their unbecomingly actions that they have been reported. The constable was sent to warn them, for if they were arrested for it the penalty in Canada for such an offence is very severe, and finally so.

The youngsters evidently forgot the reverence that should always be accorded to any congregation, no matter what their beliefs may be. One of the first steps marking their advancement toward manhood in decently behaved children is the attainment of an attitude of respect for the opinions and beliefs of others.

In this country it is hard to tell whether it is a shot or just the backfire of an automobile. Over in Italy they never know whether it is Vesuvius or Mussolini.—Montreal Star.

Do flies like your cooking?

REMEMBER, flies are more than troublesome. They come from filth to food. Get rid of them with Flit.

Flit spray clears your home in a few minutes of disease-bearing flies and mosquitoes. It is clean, safe and easy to use.

Kills All Household Insects

Flit spray also destroys bed bugs, roaches and ants. It reaches out the cracks and crevices where they hide and breed, and destroys insects and their eggs. Spray Flit on your garments. Flit kills moths and their larvae which eat holes. Extensive tests showed that Flit spray did not stain the most delicate fabrics.

Flit is the result of exhaustive research by expert entomologists and chemists. It is harmless to mankind. Flit has replaced the old methods because it kills all the insects—and does it quickly. Get a Flit can and sprayer today.

STRONG APPEALS MADE FOR SUPPORT BY F. B. COSSITT

Hon. T. D. Pattullo and F. B. Cossitt, Liberal Candidate, Deliver Rousing Addresses Here—Pattullo Tells of "Insult Offered to Parliament by Meighen"—Attacks Conservative Leader on Score of Clean Administration—Speakers Were Well Received.

Two rousing addresses, one by the Hon. T. D. Pattullo, Minister of Lands in the provincial government, and the other by Mr. F. B. Cossitt, Liberal candidate for Yale, were delivered in the Rialto theatre last evening before an appreciative audience. Mr. W. C. Kelley, president of the local Liberal Association, presided and introduced the speakers.

Mr. Pattullo's address was marked by its eloquence and obvious sincerity, while Mr. Cossitt made an earnest appeal for support from the voters of Summerland. "I promise you," declared the latter, "that if I am sent to Ottawa, I will look out for the best interests of the fruit grower. I, myself am a fruit-grower, with fifteen years' experience, and I believe I will be able to accomplish much for you.

"I believe the Mackenzie King government to have been the best government Canada has seen for many years," said Mr. Cossitt. "The Robb budget, I believe, was the best budget ever brought down by a government. Take up any newspaper—even a Conservative paper—and you will find it declared that the Robb budget was a popular budget."

The disastrous results to the economic life of the country, predicted by the Conservatives if the tariff was lowered, did not seem to be coming into being, said Mr. Cossitt. On the contrary, the McLaughlin company was adding two additions to its factory and Henry Ford was declaring that he was making more money since the reduction in tariff than before.

Mr. Pattullo described the insult which had been offered to Parliament by the appointment of "shadow" ministers and by the abrupt dissolution—the work of an "autocrat"—when the members found the door of parliament closed in their face.

Mr. Cossitt deplored the "mud-slinging" which had been prevalent during a number of recent meetings. He spoke highly of his opponent Grover Stirling, declaring that they were the best of friends.

The speaker described in detail the wonderful Wembley Exhibition, at which he was present as fruit commissioner. He vividly described the wonderful Canada building and the beautiful display of British Columbia fruit, particularly apples.

The speaker described in detail the wonderful Wembley Exhibition, at which he was present as fruit commissioner. He vividly described the wonderful Canada building and the beautiful display of British Columbia fruit, particularly apples.

British Statesmen Tour Canada

Twenty-one members of the United Kingdom's delegation to the Empire Parliamentary Association conferences in Australia in the fall who arrived at Quebec on the S.S. "Empress of Scotland." The delegation is headed by the Rt. Hon. Arthur Henderson, former Secretary of State for Home Affairs and vice-chairman of the delegation. The Marquis of Salisbury who is chairman, arrived in Canada earlier and will meet the delegation in Vancouver when they will sail on the S.S. "Acorn" for the Commonwealth. Travelling over the Canadian Pacific lines, the Parliamentarians will tour leisurely across Canada visiting most of the principal cities making a study of conditions in this Dominion. A motor trip from Banff to some of the beauty spots in the Canadian Pacific Rockies is anticipated before the party embark for the Antipodes.

The conferences in Australia will be of an informal nature, taking place in all the states of the Commonwealth. They will be met in Australia by representatives of the parliaments of the Union of South Africa, Southern Rhodesia, Malaya, New Zealand and the Legislature of British India. The delegation is going to assist in the celebrations in connection with the opening of the new Australian capital, but at the same time an intensive study of conditions in that Dominion will be made. They will obtain first hand knowledge on economic problems and trade development and a study of the Dominion's affairs, as a whole will be made. Conferences of a similar nature will be held every two years following an agreement reached at the 1924 South African meeting.

The members of the party from left to right are: Top row—E. M. O. Clough, secretary of the South African branch; Sir Frank Nelson; Sir Howard D'Arcy; Rt. Hon. Ian MacPherson, K.C.; Rt. Hon. Arthur Henderson, Chief Labor Whip; Rt. Hon. Sir Evelyn Cecil, G.B.E.; Dr. J. H. Williams; Major Bryan Cooper, Chairman of the Irish Free State branch; Senator Sir Edward Coey Biggar, Irish Free State; Top row—F. A. Broad, A. V. Alexander, Luke Thompson, J. B. Cooper, Sir Sydney Henn, K.B.E., Senator Michael P. O'Hanlon, Irish Free State; W. Mackinder; Brig.-Gen. C. R. Ingham Brooke, C.M.G., D.S.O.; J. Q. Lamb; Col. the Hon. Angus MacDonnell, C.B., C.M.G.; Dr. T. Drummond Shiels, M.G.; Osmond Emonds, T.D., Irish Free State.

NEW NAME FOR SEA SERPENT

Kelowna, Aug. 24.—The official name of the now famous Okanagan sea serpent has been discovered. It was revealed to the Vancouver board of trade delegation now touring the wonderful valley, at a luncheon tendered by the Vernon Rotarians, before the coast men were turned over to the thoughtful care of the Kelowna citizens.

REEVE IS HOME FROM ONTARIO

Reeve Johnston and Mrs. Johnston have returned from their trip to Mr. Johnston's former home in Ontario. So many of the old landmarks are gone that often the spots were unrecognizable. One place there was nothing he could locate but the "old swimming hole" that used to be near the school, and that is nothing but a bog now.

CHINESE FROM CUBA GUARDED

Mr. Blanchard Munn came in on Wednesday morning's train, arriving unexpectedly from Montreal on a visit to his parents. He and college friends travelled across by C.N.A. in charge of Chinamen, who "had made their pile" in Cuba and were being taken home in bond from Montreal to Vancouver and then by boat to China.

WILL COMPLETE WORK ON CARIBOO HIGHWAY

Road to be Closed on November 1st It is Announced

Victoria, Aug. 21.—When the Cariboo road is closed to all traffic on November 1 work will be started on the final section of the transprovincial highway scheme—the link between Lytton and Spences Bridge. Plans of the public works department call for the completion of this important section of the road sometime next year, thus eliminating the present long detour from Lytton by the Marble Canyon and thence into the interior.

Contract for this section, stretching over about twenty-two miles, has been let but work was not started this year. Instead, engineers concentrated on the more vital section from Hope to Lytton. Work on the concluding section of the road, cutting down the distance to the Interior greatly, will get under way during the winter.

REMAINS OF HOUSE FREE

Council Mainly Deals With Routine Matters at Meeting

The council meeting of Aug. 21 was mostly routine matters, although it took from 2 till nearly 5 p.m. The Reeve was back in the chair again and all councillors were present.

NEW EQUIPMENT PACKING HOUSE

Three Improvements Made in Handling Fruit at Summerland

Last year the pressure for space and facilities for economically handling the apple crop was often felt in the Summerland Co-operative packing house. This year three big steps have been taken to make the equipment much more efficient.

NARAMATA

The garden party organized by the Unity Club for Tuesday evening received an additional feature of attraction by the presence of a large contingent of the Vancouver Board of Trade who stayed off here at the invitation of the local board, Mr. J. M. Robinson.

SUMMERLAND LOST HIGHLY REGARDED CITIZEN MONDAY

Late William Walter Was One of Summerland's Most Outstanding Young Business Men—Fruit Packing Houses Closed Down for Funeral—Deepest Sympathy Extended to Bereaved Ones—Deceased Came Here in 1919.

Summerland mourns the death this week of Willis E. Walter. He had been ill only a few weeks, and his condition had not been regarded as serious until the visit last month of a specialist, who reported unfavorably as to Mr. Walter's recovery. Part of this month Mr. Walter made marked gain in strength, but was unable to hold this gain. All that the best of care and medical help could do proved unavailing and the end came Monday morning.

Mr. Walter was one of our outstanding younger business men. He came to Summerland in 1919 with his parents from Alberta, where his father and himself had been in general business. They engaged in fruit growing and also in packing and shipping fruit and vegetables, and the business has steadily grown and is well established.

The funeral services were held on Wednesday at Lakeside United Church, of which deceased was a member. Rev. G. J. C. White and Rev. Thos. Reid conducted the services. The church was crowded to the doors. Tribute was paid to the character of Mr. Walter by Mr. White, who gave the address. Mr. Thos. G. Beavis sang an appropriate solo.

Willis Walter was a man who had no enemies and because of his integrity and genial nature was a general favorite. All the fruit packing houses at Summerland and West Summerland closed down Wednesday to enable the employees to attend the funeral, and all the business men of both towns were present to show the regard in which they held Mr. Walter. A number were also present from Kelowna and Penticton. The floral tributes were numerous and beautiful. Many sorrowing friends witnessed interment in the Summerland cemetery.

Mr. Walter was survived by his wife and five young children and by his father and mother and three sisters. The deepest sympathy of the communities is extended to the Walter families in their sad bereavement. The loss of Mr. Walter is a community loss, and one Summerland can ill afford.

PEACHLAND

The Peachland Grass Tennis Club held a tournament on the town court on Friday and Saturday last and among the "out of town" guests were the following: Mrs. Wingham of Vancouver; Mr. Lumsden, Mr. and Mrs. Garbett of Summerland, Mr. and Mrs. Locke; Mr. and Mrs. Bush of Westbank. Those together with Mr. and Mrs. Tallyour, Mr. Thompson and Miss Wilson, played in the mixed doubles. Mr. and Mrs. Tallyour, against Mr. and Mrs. Thompson, and Miss Wilson in the final. The ladies' double was won by Mrs. Tallyour and Miss Wilson playing against Mrs. Miller and Mrs. Wingham. The men's doubles were won by Mr. Bush and G. Garing playing against Messrs. Lumsden, Locke, Thompson and Tallyour. All present enjoyed the time spent both days and hope two weeks from the date of these games to have another tournament, this time at Westbank.

WILL AWARD GOOD PRIZES

Horticultural Society Eager to Encourage Flower Growing

The Horticultural Society's meeting at "the farm" was greatly interfered with by the shower on Thursday afternoon. It was to be regretted that more members did not come as Mrs. Palmer had made considerable preparation, and a good meeting was held. The cabin was very tastefully decorated for the occasion and the judging of the school children's flowers took place.

The children entering the contest this spring were given awards, started by Mr. McLaughlin, and given to 12 children by the Horticultural Society. The different contestants brought their exhibits on Thursday to be judged, Ruth McLaughlin winning Mrs. Hookham's prize of a dozen Darwin tulip bulbs. The second prize was won by Philip Hookham, this being plants given by the Society.

NEW TEACHER IS APPOINTED

Miss Josephine Paradis Will Take Place of Miss Jones

At the meeting of the Summerland school board held for the purpose of selecting a teacher to take the place of Miss Jones, quite a change in the arrangements for the next term was made.

It was felt that if some new arrangement could be made for agriculture it would materially assist the board in its work. Consulting with Penticton board, the latter very obligingly gave Summerland a free hand to act as they felt was best when the applications were to be considered.

The result is that a science specialist has been chosen, a U.B.C. graduate, highly recommended by the inspector, Miss Josephine Paradis. She has taken honors in French and has taught in Vancouver high schools.

This new arrangement is quite a relief to the board, for while they were very well pleased with Mr. Robinson's work, they felt that three full time teachers would work much more satisfactorily for the arrangement of the curriculum and general arrangements with the staff. Mrs. Palmer was also re-engaged. Now Principal Milne is to arrange the subjects with each teacher and it is felt that the load will be easier to carry all the way through for the members of the staff.

Another bush fire has broken out west of the Piggie country, where the fire was about this time last fall and Ranger Elliott has taken a crew out to commence operations to get it in check.

After a pleasant visit of a few weeks in Peachland with her mother, Mrs. Will Alkins, Miss Dorothy Mitchell left on Thursday morning to return to Calgary.

Mr. C. G. Elliott and family left here on Tuesday morning to return to their home in Edmonton. They motored in a month ago and spent a holiday here visiting relatives and friends.

Mr. and Mrs. E. Law spent a few days here with Mrs. Vivian on their return from a holiday trip spent in Ontario.

The members of the Lady Orange Benevolent Association spread Mrs. Dryden on Saturday evening last, presenting her with a token of esteem, at the same time expressing appreciation of the help she has been to the organization. During the present year she has held the position of Worthy Mistress.

Mr. Joe Marsh, accompanied by his mother and Mrs. H. E. McCall, motored to Naramata on Tuesday last. While there they attended a social evening held on the lawn at the residence of Mr. J. M. Robinson, under the auspices of the Unity Club.

heard and friends. Appointed is the musical programme: "O Canada"; solo, Mr. Stanley Allen; sketch, Mr. Pearen; violin solo, Mrs. Smith; Penticton; solo, Mrs. Margaret Allan; dances; solo, Mr. G. W. Weaver, Penticton; "God Save the King."

VANCOUVER BOARD OF TRADE ENTHUSED WITH THE LOWER OKANAGAN MOTORED TO SUMMERLAND AND OLIVER

Visitors Charmed With the Beauties of Pentiction District

BIG BANQUET AT INCOLA HOTEL

Mayor Taylor Promises to Revive Apple Show at the Coast

Pentiction, B.C.: The visit of the Vancouver Board of Trade, touring the interior, to Pentiction on Wednesday was undoubtedly an outstanding event for Pentiction, and one of great importance to the district, as well as intensely interesting to the visitors.

Motored through the Pentiction orchard districts to the Experimental Farm at Summerland and south to Oliver, the visitors gained an excellent impression of the importance of Pentiction and the district as a centre of the fruit industry. Its natural beauties were also admired and the town's possibilities as a tourist and holiday centre generally recognized.

Prominent Men The Vancouver delegation was headed by F. E. Burke, president of the Board of Trade, and Mayor Taylor, while the other visitors

included men prominent in the business and public life of the province, all of whom expressed delight with their visit to the Okanagan.

Apple Show That the visit of the coast men has already borne fruit was indicated last night by the announcement of Mayor Taylor of Vancouver that on his return to the coast he would revive the International Apple Show, which was a great success in that city some years ago, when fruit production in the Okanagan was small compared to now.

Saw Great Deal Throughout their visit to Pentiction the visitors were the guests of the Pentiction Board of Trade, and the arrangements made for their entertainment were varied and complete. Although they were only here twenty-

four hours, the coast men heard and saw enough of this section of the Okanagan to become rapidly acquainted with its problems and a common interest was expressed in their solution.

The development that has taken place was a surprise to many who had never visited here and knew only vaguely of British Columbia's famous fruit district. To others market strides taken in the past few years, while the optimism of the visitors found a response among the people of Pentiction which had not been noted for some years.

On Wednesday morning the visitors were motored over the Pentiction benches and saw the packing houses in operation, and were later driven along the shore water supply to the Okanagan Lake to the Experimental Station at West Summerland, where they were entertained to luncheon.

At Experimental Farm The visit to the Experimental Farm was a complete surprise to the visitors. The beautiful flower beds and lawns were greatly admired, while the work of the institution in directing the fruit and general agricultural development of the district was noted.

Following a bounteous repast, composed quite largely of products grown on the farm, Superintendent W. J. Hunter of the station, welcomed the guests, and in a brief resume of the work of the station stressed the problems of the fruit industry, the main one of which was lack of water supply.

Mr. Hunter emphasized the fact that with a greater water supply the production could greatly increase his production. In reply, F. E. Burke, president of the Vancouver Board of Trade, highly praised the station and emphasized the fact that the visitors are greatly interested in the growers' problems. "Your problems are our problems," he said.

Other speakers were E. Bentley, representative of the Summerland Board of Trade, and the Rev. H. A. Slay of Summerland, who delivered a very entertaining address.

Motor to Oliver In the afternoon the party was motored to the southern town of Oliver, and here great interest was manifested in the viewing of a new district coming into being. The Oliver Board of Trade, of which Mr. A. J. McPherson is president, in co-operation with the growers, had prepared a generous spread of cantaloupes, direct from the ranches, and the visitors were highly appreciative of the luscious quality of this tempting fruit. Statistics re-

"We Leave The Okanagan Valley With Regret"

In his farewell message to the Okanagan, delivered at the Board of Trade banquet last night, President F. E. Burke, of the Vancouver Board of Trade, said: "Taking leave of this fertile and beautiful Okanagan Valley, I feel I am expressing the feelings of every member of the Vancouver Board of Trade when I say that this visit to one of the most important districts of British Columbia proves that Vancouver has a deep interest

in your growth and prosperity. The visit fully dissipates any suggestion that Vancouver is out to 'hog it all.' "We leave the Okanagan with regret, carrying with us the belief that we have formed friendships of inestimable service to Vancouver and the Okanagan. We have heard first-hand of your problems and are now fully cognizant of the importance they bear to the general welfare of British Columbia."

NICHOL THOMPSON Past President Vancouver Board of Trade and member of board council, E.C. representative of Cammell Laird Company.

arranged, had been placed by the Pentiction Co-operative Growers for the inspection of the visitors. Pentiction, as well, was included in the menu.

The banquet was presided over by Dr. J. E. Adick, president of the Pentiction Board of Trade, who delivered an excellent address in which he reviewed phases of the activities of the district, and formally welcomed the guests.

"I think we have demonstrated in detail," he said, "that we grow fruit which has no superior, and have perfected arrangements for the handling, packing and shipping to a high degree." Dr. Adick emphasized the fact that Vancouver is the natural crop, and Pentiction was interested in the co-operation of Vancouver. Ninety-five per cent of the soft fruit crop of the valley was produced in this area.

He also emphasized the possibilities for the development and beautification of Pentiction as a holiday and vacation resort for residents of Vancouver. "When the fog gets too thick in Vancouver, we hope you will come for a stay in the sunny Okanagan," he said.

President F. E. Burke Describing himself as a frequent visitor to Pentiction, Mr. Burke paid tribute to the view of the district which they had been given and the impression it had made on every member of the Vancouver Board of Trade.

The visit of the Vancouver men he described as a mission. It was important that they come to know and see the interior of the province and to promulgate the idea that it all centres around Pentiction, to advance it

must be done through closer intercourse in commercial life. "We have common troubles," he said, "and we want you to feel that we are behind you in every effort you are making to distribute your products. We are interested in the solution of all your difficulties, such as the water problem."

Mayor Taylor Commencing his address with the apt Biblical quotation, "By their fruits ye shall know them," Mayor Taylor of Vancouver, a visitor to the Okanagan for the first time, soon revealed himself an ardent admirer of the valley.

"When I go back," he said, "I am going to preach the gospel of an International apple show this fall in the city of Vancouver, and the prizes will be large enough to make it attractive for you to send your exhibits."

His worship recalled that a very successful apple show had been held when he was previously mayor in 1910, when the Okanagan had attained nowhere near the development it had reached now, and he prophesied that the growers would have no difficulty now in carrying off the prizes in competition with foreign fruit. "We will demonstrate that the best apples in the world are grown in the Okanagan Valley," he said. The former shows had resulted in many apple sales.

Mr. Taylor's address was marked by his emphasis upon the need of unity among all sections of British Columbia. W. G. Stikney, assistant secretary of the Vancouver Harbor Commission, who described the harbor facilities of the port of Vancouver as a provincial and national asset, as such the property of the people of the interior as those of the coast. Burrard Inlet was not quite as long as Okanagan Lake, but, at the present time a large percentage of the shipping and tonnage entering Canada did so via the Pacific coast.

With particular reference to the apple industry, Mr. Stikney stated that in 1925, 91,000 boxes of apples had been shipped through the port, in 1924, 136,000, in 1925, 220,000, and in 1926 it was hoped it would be 400,000, for they had facilities to handle that many and ship them. Apples had been exported through the port to ten different countries. He cordially invited Pentiction residents to visit the harbor and "see what you have."

D. M. McDonald, D. M. McDonald of the Kelly-Douglas Co., not only approved of the idea of an apple show, but urged an apple week for Vancouver. "We have enjoyed our trip immensely, even though we didn't see the sea-serpent," said Mr. McDonald.

W. F. Payne, secretary of the Vancouver Board of Trade, described Pentiction as not the least portion of the Okanagan "Garden of Eden."

Robert Lyon The vice-president of the Pentiction Board of Trade gave an original solution of the sea-serpent mystery when he declared that people saw it on the lake after motoring along the serpent-like road from Westbank to Summerland. Mr. Lyon intimated that the co-operation of the Vancouver men would be appreciated in the solution of Okanagan road problems.

Mr. Lyon then gave a detailed review of the growth of the fruit industry in Pentiction and the favorable position in which the local growers were

W. H. MALKIN Head of Malkin's wholesale grocery firm, and member of Board of Trade Council.

now placed in comparison with the most desperate situation of a few years ago. Mention was made of the increasing demand for Pentiction soft fruit by the Vancouver market.

With reference to a remark made by Mr. Lyon regarding the Pentiction method of grading fruit, sometimes criticized as being too expensive, President Burke of Vancouver recalled a letter he had received among some other business correspondence from South Africa, in which the writer demanded Pentiction Co-operative apples in preference to any other grown in the valley. "I think it pays Pentiction to go to the expense of grading and packing well," said Mr. Burke.

During his address President Dr. Adick regretted the absence of Roove G. A. B. Macdonald, who was attending the Union of H. C. Municipalities convention at Vernon. Appreciative mention was also made of the co-operation of the local co-operative in arranging the fruit display in the hotel.

The Vancouver party lived on sleeping cars at the wharf overnight and left early Thursday morning for Grand Forks and Trail.

Many of the members arrived on the boat on Tuesday evening; some, however, stopping off at Nanaimo where they were entertained to a garden party.

SALMON PACK VERY LARGE This Year to be the Greatest in History of the Industry (Special to The Herald) Vancouver, Aug. 26.—Figures released by the fisheries department show the salmon pack on the B.C. coast this season is larger than ever before at this time of year. Cannermen state there is every indication that the pack when the season closes will be the largest in the history of the industry in British Columbia, and if the price remains at present the value of the pack will reach a record figure.

BOY SCOUT NOTES At the last regular scout meeting held in the Gym, 25 members were present. Two Scouts, Brian Atkinson and Phillip Hookham passed their ten-dollar, the remainder of the evening being taken up in games. Arrangements were made for a corn roast to be held at Crescent Beach the following week.

WATER NOTICE USE-AND STORAGE TAKE NOTICE that the Dominion Department of Agriculture, whose address is Ottawa, will apply for licence for the storage and use of 200 acre feet of water out of Crescent Creek, also known as Paul Creek, which flows easterly and drains into Trout Creek, about two miles below No. 1 Summerland reservoir on Trout Creek.

The storage dam will be located at Crescent (or Paul) Lake. The capacity of the reservoir to be created is about 200 acre feet, and it will flood about 150 acres of land. The water will be diverted from the stream at either the headgates of Summerland municipal system, or about 100 yards above the Kettle Valley Railway bridge over Trout Creek at the Dominion Experimental Station, and will be used for irrigation purposes upon the land described as Dominion Experimental Station, Part of Pentiction Indian Reserve No. 1.

The licence applied for is to supplement a right to take and use water as per Licence No. 6492. The notice was posted on the ground on the 26th day of July, 1926. A copy of this notice and an application pursuant thereto and to the "Water Act, 1914," will be filed in the office of the Water Recorder at Vernon, B.C.

Objections to the application may be filed with the said Water Recorder or with the Comptroller of Water Rights, Parliament Buildings, Victoria, B. C., within thirty days after the first appearance of this notice in a local newspaper.

DEPARTMENT OF AGRICULTURE Ottawa, Applicant. (By W. T. Hunter, Agent) The date of the first publication of this notice is 30th July, 1926. 30-4-c

WATER NOTICE Diversion and Use Take notice that L. M. Agur, whose address is Summerland, B. C., will apply for a licence to take and use 1,000 gallons of water per day from unnamed spring located on said applicant's property, being Blk. 5, D. L. 2891, Map 134, Summerland. The water will be diverted from the said spring at a point close to East boundary of above property and about 400 feet south of Kettle Valley Railway right-of-way, and will be used for domestic and irrigation purposes upon following described lands: Blks. 4 & 5, D. L. 2891, and Blks. 9 & 10, D. L. 475, May 1st. This notice was posted on the ground on the 30th day of July, 1926. A copy of this notice and an application pursuant thereto and to the "Water Act" will be filed at the office of the Water Recorder at Vernon. Objections to the application may be filed with the said Water Recorder or with the Comptroller of Water Rights, Parliament Buildings, Victoria, B.C., within 30 days after the first appearance of this notice in a local newspaper.

The date of the first publication of this notice is August 6, 1926. L. M. AGUR, Applicant By R. V. Agur, Agent 31-4c

BLACKHEADS

Get two ounces of peroxine powder from your druggist. Sprinkle on a hot, wet cloth and rub the face briskly. Every blackhead will be dissolved. The one safe, sure and simple way to remove blackheads.

PRE-EMPTIONS Vacant, unreserved, surveyed Crown lands may be pre-empted by British subjects over 18 years of age, and by aliens on declaring intention to become British subjects, conditional upon residence, occupation and improvement for agricultural purposes.

Full information concerning regulations regarding pre-emption is given in Bulletin No. 1, Land Series, "How to Pre-empt Land," copies of which can be obtained free of charge by addressing the Department of Lands, Victoria, B.C., or to any Government Agent.

Records will be granted covering only land suitable for agricultural purposes and which is not timber land, i.e., carrying over 5000 board feet per acre west of the Coast Range, and 8000 feet per acre east of that Range.

Applications for pre-emption are to be addressed to the Land Commissioner of the Land Recording Division in which the land applied for is situated, and are made on printed forms, copies of which can be obtained from the Land Commissioner.

Pre-emption must be occupied five years and improvements made to value of \$10 per acre, including clearing and cultivating at least five acres before a Crown Grant can be received.

For more detailed information see the Bulletin "How to Pre-empt Land."

PURCHASE Applications are received for purchase of vacant and unreserved Crown lands, not being timberland, for agricultural purposes; minimum price of first-class (arable) land is \$5 per acre, and second-class (grazing) land, \$2.50 per acre. Further information regarding purchase or lease of Crown lands is given in Bulletin No. 10, Land Series, "Purchase and Lease of Crown Lands."

HOMESITE LEASES Unsurveyed areas, not exceeding 20 acres, may be leased as homesites, conditional upon a dwelling being erected in the first year, title being obtainable after residence and improvement conditions are fulfilled and land has been surveyed.

LEASES For grazing and industrial purposes, areas not exceeding 640 acres may be leased by one person or a company.

GRAZING Under the Grazing Act the Province is divided into grazing districts and the range administered under a Grazing Commissioner. Annual grazing permits are issued, based on numbers ranged, priority being given to established owners. Stock-owners may form associations for range management. Free, or partially free permits are available for soldiers, campers and travellers, up to ten head.

BOOST FOR SUMMERLAND

Last summer The Review suggested that it was about time some steps were taken to improve Summerland's bathing beach. Another summer has almost passed, and the bathing beach remains a rather unattractive, rocky spot.

By all means let us boost for Summerland. Whenever you write a letter be sure to stress the advantages of this community. But boosting, in itself, is insufficient.

We have much greater natural beauty than Chelan as an attractive setting for a summer resort. Why is it that Chelan within the past few years has achieved such renown that visitors come from hundreds of miles, until the business of caring for tourists has become the main industry—and a profitable one at that?

The answer is that the people of Chelan have spent a very considerable sum of money in making their community attractive to the pleasure seeker. A large pavilion, has been built over the lake, and in other ways efforts have been made to make their town the principal resort of that section of Washington state.

EDITORIAL NOTES

Reeve Johnston has returned from Ontario and finds the orchards there in an uncared-for condition. When will the farmers of Ontario realize that good profits can be realized from scientific growing and marketing of fruit?

A very commendable effort is being made by the local Horticultural Society to encourage flower growing in Summerland. Nothing impresses the visitor more than to see an abundance of flowers in a community.

DESTROY POISON AND CONTAINERS

Warnings are being sent out by the Provincial Department of Agriculture that by September 6th, all unused grasshopper poison bait, and all containers used in the distribution of the poison ration, must be destroyed or disposed of in a manner that will not be a danger to animal life.

The warning is a timely one and if not promptly and thoroughly obeyed, punishment should be inflicted without delay as a warning to others who are careless and whose carelessness may not have come under official notice.

Failure to destroy poison bait resulted in the loss of a large number of domestic animals in this district last spring, a tragedy which will be repeated unless the poison is destroyed. Arsenic is the poison used, and its destruction is not as easy as many believe. It is not sufficient to wash bags which contained poison bran and then use them to deliver vegetables.

STOCK RUNNING LOOSE

Stock running loose upon a highway are a menace. The death of Russell Morris on State Road No. 10 Saturday night was caused by a horse emerging from the darkness upon the highway in front of the approaching car.

It is a misdemeanor to permit livestock to run loose on highways within herd districts, and the owners of stock so found may be punished. But there is no satisfaction in taking such action. Safety lies in building a spirit which will keep stock off the highways by the voluntary action of owners.

VALUABLE WOODS GO FIRST

Douglas fir represents 40 per cent of the cut and we are cutting 1.5 per cent of the estimated stand each year. Cedar comprises 25 per cent of the cut and approximately 1 per cent of the visible supply, while hemlock is only 0.2 per cent of the cut, which is 0.5 per cent of the visible supply.

World of Politics

(By an Ex-Writer of the Ottawa Press Gallery.)

The big guns of the political campaign have come to British Columbia, had their say and departed. Mr. Meighen in his Vancouver speech touched upon the trade pact with Australia and announced that he proposed to have it changed so that it would be of more benefit to the Canadian farmers, whereupon Mr. King expressed the opinion that if there were any serious effort to get more favorable terms for Canada than we now have, the government of the Commonwealth would cancel the agreement and that would be the end of it.

CONSERVATIVE OUTLOOK IN QUEBEC PROVINCE

In view of the claims of Conservatives that the party is likely to carry fifteen seats in Quebec province on September 14, it is interesting to note the constituencies which were carried in October last by Liberals by less than a thousand majority. Of these there were only six, as follows: Bagot, Liberal majority, 774; Bagot by-election, 479; Bonaventure, 527; Montmagny, 881; Wright, 712; Yamaska, 684, and Ste. Anne, 823.

PREMIER MEIGHEN AND PORTAGE LA PRAIRIE

On his way east ex-Premier King ran past a speaking engagement at Brandon and doubled back a distance of sixty or eighty miles in order to meet a demand for his appearance in Portage la Prairie constituency, where Premier Meighen is the Conservative candidate.

OPENING GUNS IN VANCOUVER CENTRE

It is generally recognized that throughout Canada there will be no more interesting contest than that taking place in Vancouver between Hon. H. H. Stevens and Mr. Dugald Donaghy. The Liberal candidate fired the opening guns of the campaign on Thursday night of last week.

LETTERS TO THE EDITOR

Editor Summerland Review:

Dear Sir:—I see from the "Market Grower and Salesman," which is published in London, England, that the arsenic scare is still seriously affecting the price of imported apples. The editor, in an editorial, calls attention to the serious losses sustained by colonial growers in shipping their apples to London, and an extract is given from a contemporary as follows: "Australian apple growers have experienced a disastrous season."

It seems pretty evident from the foregoing that the British public is not discriminating, but has simply ceased, in many cases, to purchase imported apples, no matter where they originated.

There is no doubt we are producing more apples in the valley now than the prairie market can be reasonably expected to take, and we are forced to export a very considerable portion of our crop.

PROTECTION ON PRODUCTS OF THE FARM

It will come as a shock to fruit and vegetable growers of the Okanagan Valley to learn that the Canadian tariff on most products of the farm, fruits included, is considerably higher than that of the United States, and not lower—as most of us have been thinking.

The Pedlar's Pack

By AUTOLYCUS

"A Snapper Up of Unconcocted Trifles"

This expression comes as near describing the errors I have in mind as any I can think of at the moment, and it has the merit of calling for some little attention in the matter of interpretation. I believe "TERMINOLOGICAL INEXACTITUDE" was coined by a British prime minister to describe some lapse from actual fact on the part of an opposition speaker, and it certainly comes as trippingly off the tongue as could be desired by any orator.

It is curious to find how many common sayings have been altered from their original meanings. A writer in the "Atlantic Monthly," the American magazine with the English flavor, under the heading of "Misunderstood," mentions many such cases, among them being that well worn axiom concerning the "spilling the ship for a halfpenny of tar." It appears that the word ship is really a corruption of sheep, and that the original reference was to the parsimony of those who would rather "lose ten sheep than be at the charge of a halfpenny worth of tar."

of our crop. As the British market is our best export market it is too bad that our prices should be affected by this scare, which was caused by the Washington and Oregon growers of apple shipping fruit which had been sprayed within a few weeks of being picked.

Yours faithfully M. C. WILSON, Summerland, Aug. 14, 1926.

WHY NOT UTILIZE VACANT LAND

Editor Summerland Review: Dear Sir:—At this time of the year considerable areas of light soils that have this season grown such crops as tobacco, corn, onions, tomatoes, potatoes and cantaloupes are now clear of crop.

A good many little ones are getting themselves into a fine pickle now. Don't borrow trouble because the interest rates are too high.

A somewhat different mis-use of words is often seen in the head-lines of city dailies, a recent case in point being a caption which appeared the other day drawing attention to a reported agreement now being made between this country and the United States.

I hardly know whether it is permissible to class printers' errors in this category or not. Last week I made to write "photograph" instead of "paragraph," "topic" instead of "tonic," and "from" instead of "for."

The migration of birds from one land to another has always been an enchanting study, and mankind has long been puzzled to account for the possession of that instinct which guides those annual flights.

MIGRATION

probable we shall never be able to analyze and tabulate the workings of that mysterious power. It will be just as well if we cannot;—we have reduced so many marvels to the level of the prosaic that we can well spare a few processes of nature to stay in the realm of imagination and mystery.

The tribe named has dwelt for unknown centuries in a land lying west of the Persian Gulf, between them and the sea being a long range of high mountains, down which many streams flow to make up the Karun River on its way to the Euphrates.

The migration itself is complete, "horses, cows, donkeys, sheep, goats, infants, and—apparently last in order of importance—women, all make the crossing." And birds which are taken along. In some instances the animals carry each other, one being loaded with another, and a little goat being fastened on top of them.

There is one feature in this story which differentiates it from the annual flights of our birds, butterflies and bees. These flights are doubtless continuing until the day of the Baktaryi will probably come with the coming of new industries. Oil has come on the scene, the Anglo-Persian Oil Company being now located in that country, and providing returns by way of leases and royalties which may change conditions.

maintain soil fertility, and of adding humus to the soil during the time that the soil is bare of crop between harvest time the current year and planting time the following season.

The time to seed such cover crops is just as soon as the regular crop is harvested and off the land. The earlier cover crop is seeded the greater the opportunity to obtain strong stand to plough under in the spring, which is very important when it is considered that the land has to be well prepared in good time for the regular crop—prepared with the idea of conservation of soil moisture.

On light soils where conservation of moisture is necessary it is very essential that winter rye for cover crops be ploughed under early in the spring when the crop is still green and succulent, otherwise the rye will not readily work into the soil and consequently will cause the land to dry out.

A. J. MANN, Asst. Supt. Dom. Exp. Farm, Summerland, B. C.

SATISFACTORY FUND RAISED ON TAG DAY

The sum of \$124.32 was realized by the Women's Hospital Aid as a result of the tag day conducted on July 1st. The ladies are very grateful to the general public in responding so well. Arrangements were made at the last meeting of the Aid for fixing up the back porch of the hospital for the comfort of convalescing patients; the ice box moved, porch repaired, curtains taken down and a couch and chairs provided.

A good many little ones are getting themselves into a fine pickle now. Don't borrow trouble because the interest rates are too high.

Americanism. "Cute" is now a dictionary word, and has departed so far from its proper meaning of "sharp" or "cunning" that it is used by certain types of people to express anything they choose.

A somewhat different mis-use of words is often seen in the head-lines of city dailies, a recent case in point being a caption which appeared the other day drawing attention to a reported agreement now being made between this country and the United States.

I hardly know whether it is permissible to class printers' errors in this category or not. Last week I made to write "photograph" instead of "paragraph," "topic" instead of "tonic," and "from" instead of "for."

MYSTERY OF OLD LONDON

"Professor" and Wife Are Found Dead in Locked Room

London, Aug. 25.—Mystery attaches to the life and death of the queer "professor" who, with his wife, was found dead recently in a locked house at Westbourne.

The dead couple were known as Mr. and Mrs. Miles Quesney. The woman was 36 and the man about 40 years of age. They had been missed by the neighbors for about ten days.

The woman had, apparently, been dead many days. The man, however, would appear to have died more recently.

The couple were very exclusive. People opposite say that the man used to sit at the window upstairs and make faces and grin horribly at them.

The woman had, apparently, been dead many days. The man, however, would appear to have died more recently.

The couple were very exclusive. People opposite say that the man used to sit at the window upstairs and make faces and grin horribly at them.

The woman had, apparently, been dead many days. The man, however, would appear to have died more recently.

DID NOT KNOW IT WAS PRINCE

No Ceremony on Tap When Grannie Visited War Memorial

London, Aug. 25.—Mrs. Weeks, a widow, 82 years of age, living at Stockbridge, journeyed the other day to Enham to see her grandchildren, and entertained the Prince unawares.

Mrs. Weeks is the mother of Corporal Sydney James Weeks, who, while serving in the Duke of Cornwall's Light Infantry in France, was terribly wounded, endured enemy imprisonment for four years, and has now found healing and sanctuary in the Enham Village Centre, that finest of "war memorials" because, while perpetuating the memory of the dead, it endows with hope and happiness their still living but broken comrades, and helps them to regain the strength they lost for England.

So, then, Mrs. Weeks came to Enham to see her four little grandchildren.

In her black mantle and little poke bonnet, Mrs. Weeks was bending over her youngest grandchild, a baby girl, when she was introduced to the room "a nice-looking young man" who, Mrs. Weeks described him afterwards as "the nice-looking young man" who was wearing a lounge suit of flannel and was carrying a bowler hat.

Then the "nice-looking young man" went over the cottage, upstairs and downstairs, and liked it all, and shook hands once more with everybody, including Grannie, and Grannie was turning away when she heard someone say, "Yes, Your Royal Highness!"

So she turned around again to see to whom the title was addressed, and to behold it was the "nice-looking young man" whom she had seized by the wrist and led across the room and presented to Baby Sylvia Doris.

"Well," said Grannie Weeks, "I spent all my old age pension to get here and I'll have to borrow a little to go on with. But I don't mind because I've seen the dear children—and the Prince of Wales." You will notice that the children come first.

Enham is a national institution, for it has received disabled men from all parts of the country.

ALLEN GROVE

Miss Violet Book of Summerland is a guest at the Allen home this week.

Mr. and Mrs. R. Hanson of Pentteton and Mr. and Mrs. Nicholson of Wilbur, Wash., were called at Fruitland Farm on Saturday.

W. J. Thompson has been appointed deputy returning officer for the local poll.

F. C. Howell is putting up his third crop of alfalfa this week.

Efforts are being made to have the school open again on Sept. 7.

The new shah of Persia is getting on fairly well. He used to work as a groom, so he knows how to establish stable government.

The language a golf player uses comes in very handy for changing tires. And a number of dourists are coming back home.

Mr. and Mrs. C. A. Walter and Mrs. W. E. Walter and family wish to thank their many friends for their kindness and floral tributes during their recent sad bereavement. 34-1-c

LOCAL HAPPENINGS

Mrs. Courter and Miss Nina Courter left for their home in Vancouver last Monday after spending a few weeks visiting at the home of Mr. and Mrs. Gray. They greatly enjoyed their visit and hope to return next summer.

Mr. and Mrs. D. G. Denny and Miss Denny arrived on Sunday from Nelson coming over by car.

Miss Jean Bennett, who has been visiting Mr. and Mrs. C. P. Evans for some time, left on Wednesday for Brandon.

Miss Zanda Garnett left on Saturday for Calgary. She will go from there to Carlsbad to teach during the coming season.

Rev. L. Miller, accompanied by his niece, left on Monday for Ponoga.

Mr. Roy Cameron came in on Monday from Vancouver and is visiting at the home of Mr. and Mrs. K. Hogg.

Mr. Hayes was a visitor to Kelowna on Saturday returning to Summerland on Monday.

Mrs. Bender and Miss Vera Bender came in from Vancouver on Saturday and will probably remain here for the summer.

The choir of the United Church at West Summerland, instead of having a regular practice Friday evening, went to Crescent Beach for a corn roast. What with moonlight, a fine evening and that pleasant spot, they had a most enjoyable time.

The "Co-op." on Wednesday shipped out its first straight car of apples, half Wealthies and half Gravensteins. They also sent out a straight car of peaches, while on Tuesday they shipped their 9th straight car of pears, and it looks now as if some revision of the estimates of the harvest of apples was in order.

The rainfall on Thursday, although not as heavy at the Experimental station as at Summerland, was registered at .09.

In Summerland we often feel the desire for shade trees about the house—

that is, the great big fellows that are so cooling in summer. Because our pines and firs have been such 'hogs' for water and nourishment we have been forced to deny ourselves this luxury at other places enjoy. Now A. E. Wilson, in MacLean's Magazine, gives us a way out. Part of the article reads: "If poplars can get their hungry childhood over before you try to develop a lawn or flowers, they will not be a menace—but they are deadly if contemporary with the nurturing of a young garden."

Mrs. Collis and Mrs. Hookham motored to Vernon to attend the flower show last week.

Mrs. Wheeler and Miss Wheeler returned from the coast last week and are leaving shortly to join Mr. Wheeler in their new home in Vernon.

To be short of water is something folks have been used to, but those who have been getting ice from the Penticton Cold Storage plant had a new experience to add to the situation. The ice could not be made because there was no water in Penticton, or at least not enough to spare for the plant. They, too, have started to investigate the advisability of a pumping equipment in order to ensure a sufficient supply of water for their ice cream business and to supply their regular ice customers.

Youngsters often do strange things to amuse themselves, thinking little of the consequences of their acts. One of the newest happened last week when a lad up on the Arnet place started to drop stones down on the cars as they passed below him on the gulch road. One of these stones landed on a truck-load of fruit that T. Ramsey was taking to the packing house. Fortunately for Mr. Ramsey, it did not land on the cab top. If it had not been given for the hill between him and the lad, Ramsey's boot might have been used for another purpose than shoving on the brake.

Mrs. Campbell Robinson spent a few days in town visiting Mr. and Mrs. Hogg and renewing former acquaintances. She and her daughter motored up from their home in Seattle and will go to Okanagan Center to spend some time with her parents, Mr. and Mrs. J. L. Logie.

Rev. Mr. Reid motored in from east of Edmonton. The trip was very strenuous from Edmonton to Banff, as it had been raining heavily on the prairies. The roads were quite slippery from Cranbrook to Kootenay Landing. Two friends accompanied Mr. Reid. Both of them are delighted with Summerland and Mr. Montgomery will in all probability settle here. Mr. Bennett, the other friend, wants to get a place for his father. Mr. Reid's furniture came in by C.N.R., and they are busy now getting settled in their new home, the house formerly occupied by Rev. Alexander.

Mr. and Mrs. Ed. Butler have as their guests Mr. and Mrs. Deeh, who motored in from Vernon; also Mr. Butler's aunt, Mrs. Aldridge, wife of Rev. A. R. Aldridge of Edmonton.

Mrs. O. E. Mann and daughter, former Summerland residents, are visiting L. W. Rumball.

Mr. H. Tomlin has been hunting for men to go on the Canyon Creek dam, but has not located them. Everywhere in B. C. laborers seem to be scarce. It is a good sign and we can stand that sort of prosperity.

Among those who came to Summerland to attend the funeral of the late W. Walters were Mr. R. Jennings of the B. C. Orchard, Mr. W. E. Adams

of Kelowna and Mr. Makovskii of the Sales Service, from Kelowna.

Mr. W. Walters was the first member to be taken from the local 1500 club.

The first of the Macintosh Reds have been delivered to the packing houses. This is a little early and crowds the Wealthies, making them take a little lower price. Those having Wealthies should get them in, not waiting to let them color, for once the Macs get on the market there will be no call for Wealthies. There are not many Macs coming in and the shippers are not at all anxious to get them yet.

Mrs. Beggs had a visit this week from Mr. and Mrs. Clement Jarbo, touring by auto from California to Edmonton. They had an enjoyable trip, made more so by the compact and complete equipment which they carried. They enjoyed their stay here so much that they may return to spend the winter with Mrs. Beggs.

Miss Thelma Hobbs has returned from her trip to Portland and other coast points. On her way back she stopped to enjoy a fortnight in Vancouver with her brother Edgar.

Mr. and Mrs. Jas. Thompson of Victoria Gardens had a surprise visit this week from Mr. and Mrs. John Holmes of Myron.

Born—at the Summerland Hospital on Thursday, August 26, to Mr. and Mrs. H. C. Howis, a son.

Born, at Trout Creek, on Thursday, Aug. 26, to Mr. and Mrs. Troyer, a son.

FORMER DAYS IN THIS COMMUNITY

AUGUST, 1911.

The Hotel Summerland is now the property of Mr. W. J. Robinson, he having taken it over on August 1st. Mr. Manchester continues as manager until September 1st, upon which date Mrs. David Bentley takes charge.

Dr. Andrew and Mrs. Stark are building summer houses, side by side, on Beach avenue. These buildings are being erected on piles and are some distance from the lakeshore.

W. C. Kelley is erecting a warehouse on his lot opposite the new Presbyterian church. This warehouse will be leased to Thos. E. Young and will be used by him in his flour and feed business.

Thos. Beavis and family are camping on Trout Creek Point. Mr. Beavis recently purchased a motor canoe, which he will no doubt find very convenient at this time.

The largest single order for fruit trees which for some time has been given by any Summerland individual, has been given by Reeve Ritchie. The order, it is stated, being 50,000 trees.

There are some two hundred tobacco plants growing on John Talbot's property at Trout Creek, and they are doing remarkably well.

Great interest is being taken in the general election upon the issue of reciprocity with the United States. There is every indication that both Summerland and West Summerland will support Sir Robert Borden.

J. W. S. Logie and his cousin, Will Farrier, started this week on a canoe

Mrs. Frank Mossop (Sen. T.C.L., Eng.)

Teacher of Music

Students accepted for tuition in Piano, Violin, Singing, Theory and Singing. Pupils prepared for examinations. Phone 652. Summerland, B.C.

regard to relief from the burden of re-verted lands and the release from the existing moratorium. It was explained that the government proposition was contingent on the waiving by the district of the moratorium in force, and that acceptance of same would entail an additional tax levy. After considerable discussion a resolution was carried to the effect that the moratorium be waived and the government be so advised. The subject of auxiliary regional water supply by an auxiliary plant was brought up by Mr. Weaver, speaking for the board of trade, and it was finally decided to write for some information concerning the automatic system in use at Oyama. Various other matters were dealt with by the chairman, Mr. Armour, and Mr. Cross, secretary, and the meeting adjourned at 9:45.

Announcement

We have arranged to have Mr. Tuer, representing "The Consolidated Garment Co., Ltd." (formerly "The Vogue") of Vancouver, come here on WEDNESDAY, SEPTEMBER 1st, with a complete range of Ladies' and Misses' Fall and Winter Coats.

This will be a splendid opportunity to select your New Season's Garments, as fashion critics all agree that Consolidated Garments are the most reliable and up-to-date in Western Canada. You are welcome to call and see the new styles whether you intend purchasing or not.

WEDNESDAY, SEPTEMBER 1st. LAIDLAW & CO.

Why Home-brewed Beer Can Be Bad For Your Health

BREWING beer at home, a habit that has become widespread in the United States since prohibition deprived the people of the right to purchase pure and healthful beer legally and openly, presents difficulties and dangers of which those who engage in it are rarely aware.

HOME-BREWED beer can be actually dangerous to those who drink it, for the home brewer works by rule of thumb, perforce, and usually has no acquaintance with or control over the complex physical and chemical reactions that take place in the brewing of beer. Pure beer can only be made in a modern brewery by scientifically trained brewmasters who have at their disposal the most modern equipment, and who are bound by the most exacting standards.

THE same materials which, in a modern brewery, are made into pure, healthful beer, can become, in the hands of a home brewer, a raw, incompletely fermented, indigestible and harmful mixture unfit for consumption. But where an established brewery uses only the highest grade of material—malt and hops—tested for purity, the home brewer is forced to purchase in stores impure syrup concoctions of inferior malt and low-grade hop extracts frequently blended with synthetic essences. The product of such mixtures is always harmful to the stomach and digestive system and dangerous to drink for any length of time.

THE home brewer is hampered not only by lack of knowledge of the science of brewing, but home equipment does not include the elaborate plant necessary for prolonged sterilization and filtering to assure a pure, healthful beer free from bacterial infection. In beer that is the product of a perfectly equipped brewery all fermentation is complete; in home-brewed beer fermentation continues, and continues after it is consumed. It is really an explosive mixture, whether in your stomach or in the bottle, as shown by the way in which bottles explode and tops are blown off.

HOME-BREWED beers are usually higher in alcoholic content than they should be. In the beer supplied by the Amalgamated Breweries to the people of British Columbia through licensed premises or through Government stores the alcoholic strength is only 4 1/2 per cent, the most favourable strength for the stimulation of the stomach toward sitting digestion. Home-brewed beers also usually contain greater or less percentages of deadly "fusel oil," from which properly brewed stout and aged beers are free.

ANY physician can tell of the dangers of home-brewed beer, from which, happily, the people of British Columbia are free, for they have the privilege of obtaining pure, good beer made by the Amalgamated Breweries of British Columbia in plants that are equipped with every facility for the brewing of pure beer, perfectly flavored, well matured and healthful.

Visitors are cordially welcomed at the plants of the members of the Amalgamated Breweries of British Columbia: Vancouver Breweries Limited; Rainier Brewing Co. of Canada Limited; Westminster Brewery Limited; Silver Spring Brewery Limited; and the Victoria Phoenix Brewing Co. Limited.
