Blood Is Life

This week is Red Cross Blood Donor Week not only in Summerland but throughout British Columbia. This province is leading the way to the rest of the Dominion in instituting a service which has top priority in the list of humanitarian donations the ordinary citizen can provide.

All that the ordinary citizen is called upon to do is register at the appointed spot and then meet the call of the travelling clinic when it visits later in the year.

It is planned that every hospital in Canada will have a steady supply of blood and plasma. To gain this objective you must do your part. By you, we mean Mr. and Mrs. Average Summerlander.

There is a fear among some persons regarding the giving of blood, but such a fear is groundless. There is no danger connected with the removal of blood from a human being, with the proper care and attention which is available under present conditions. Nor will donors have any after effects, leading medical men assure us.

The Red Cross has established that there is a definite need in Canadian hospitals for adequate facilities for modern blood transfusion therapy. Blood is a peculiar commodity which can only be obtained from human sources. It cannot be manufactured in a test tube, nor is there any adequate substitute.

To answer the Red Cross appeal is not a difficult undertaking. Far from it. This organization is merely asking you to register your name so that you can be contacted when the Red Cross travelling clinic arrives in this community.

By taking these few minutes of time, you will be saving Canadian lives, and preventing needless suffering.

Premier Hart's Deal

Any doubt which might have rested in any minds regarding the financial deal recently undertaken by Premier Hart, on behalf of the British Columbia Government, with the Dominion Government, and which is to be ratified at the next session of the Legislature, was probably dispelled this week with the outcry which has arisen from other provinces across the Dominion.

Led by New Brunswick, there has been a hue and cry that B.C. has been given a deal which is relatively superior to that offered by the Dominion to other provinces.

Although we are not in a position to weigh all the pros and cons of the matter, on the surface it would appear that the Dominion Government, in agreeing to such a proposal, realizes the growing importance of this province in the life of the Dominion.

Ottawa is leading observers to believe that British Columbia is one of the fastest-growing provinces in Canada and that it has a still better future ahead in the next five years. Premier Hart has stated that it is not as good an agreement as he would like, but it was the best compromise he could effect. How good a compromise it was can be weighed in the outcry from other provinces whose future is not as favorable and who have not been granted an equal deal.

It is with relief that the man on the street realizes there will be no dual taxation in B.C. He greets with applause the word that the gasoline tax is to be set aside for roads. He is happy that for this year alone B.C. will receive six million dollars more than during the wartime agreement.

But he is also anxious to learn what the B.C. Government intends to pass on to the municipalities. Last month, in Summerland we learned that our school costs are soaring and will continue to do so with rising teachers' salaries and the great necessity for increased accommodation to meet the increasing population.

It is many months since the Goldenberg commission on provincial-municipal relations concluded its hearings. From Victoria this week comes the news that the report is nearly completed.

We will be watching with keen interest to see how the commission's recommendations can assist the B.C. Government to pass along some of its increased revenues from the Dominion to assist the over-burdened municipalities.

The Feminine Front

by MURIEL HURRY

During the Christmas season when good food and treats were the order of the day, I ran across some delightful and different dishes, for which scarce commodities had been saved for months to go into the making.

My neighbor served some delicious cookies at tea one afternoon that were made from ingredients that are fairly easy to purchase, and they are also very easy on shortening, which is as precious as gold these days. A touch of cream cheese gives these cookies a different and flavorful tang that is sure to draw compliments to the hostess who serves them. In addition, they are very simple to make, and can be whipped up in a very few moments.

I heartily recommend the following recipe and hope that all of you will make good use of it.

Cream Cheese Cookies
Cream together—
4 tablespoons butter or shortening
4 tablespoons cream cheese
1/4 cup sugar
1/2 teaspoon salt
Add 7/8 cup flour, or enough to make a dough that can be kneaded. Chill, roll thin, cut with a 2-inch cutter and bake at 350 deg. F.

The Inside Story

By AGROLOGIST

"What's the truth about dwarf apple trees?" I asked Arthur Mann, who has charge of fruit tree rootstock investigations at the Experimental Station. His reply is summarized in the following paragraphs:

The dwarf apple tree will never entirely replace in our hearts our love of the old apple tree, often neglected, sometimes with a dead or broken limb here and there. The old tree was a delight to see when in full bloom, provided shade in summer, and shelter from the full force of cold winds in winter. Come summer, come winter, the old apple tree influenced the pattern of our daily lives.

But in recent years there has been widespread interest in the growing of dwarf apple trees. In fact, so extensive has this interest been that nurserymen specializing in the propagation of these small apple trees have not been able to supply enough trees to meet the ever-growing demand. These dwarf trees are propagated on a special rootstock known as Malling IX. This stock produces a dwarf tree about the height of a man, which comes into bearing early. The fruit tends to be large but of good quality and keeps well. Owing to a weakness of the root system, it is necessary to stake or tie each individual tree to prevent it from being broken off just below ground level by wind or weight of crop.

Dwarf trees are finding favor with householders desiring to grow a few apple trees in the garden. Some commercial growers are interested in Malling IX, as a stock on which to work "filler trees," but most growers consider trees worked on this stock are much too small to attain importance in commercial orchards.

Visitors to the Experimental Station show great interest in an established block of dwarf apple trees. These trees are spaced 8 feet apart in the row and are pruned by the

The other day I ran across an interesting article about Stefan Zweig, the biographer who wrote Balzac, the December Book of the Month club selection. The life story of the great novelist, Balzac, was published after the death of Zweig, and was edited by Richard Friedenthal.

Stefan Zweig was a Viennese, and lived in the manner of the then gay and light-hearted Vienna. He numbered among his friends the great artistic and intellectual lights of the continent, such as Freud, Toscanini and Romain Rolland. He travelled extensively, living in England while gathering material for Mary Queen of Scotland and the Isles, and in France while working on Marie Antoinette.

Then, with the coming of Hitler, the shadow of Nazism fell over him and left Zweig a man forlorn and bereft. He became a British citizen, but was still heartbroken. So, after marrying his secretary, a girl half his age, he was determined to start a new life with her as his companion, in a new and free country. They moved then to the

United States, where they made their home for about a year, then to Brazil, where they sought again for the land of peace.

In 1942, the Zweigs committed suicide, and were found dead in each other's arms, leaving at their side, two glasses which had contained poison, and a note of farewell which contained the following words:

"My energy is exhausted by long years of peregrination as one without a country, I believe it is time to end a life which was dedicated only to spiritual work, considering human liberty and my own as the greatest wealth in the world."

Thus died one of the greatest writers of our time, whose life story was as vivid and interesting as any of the characters in his famous biographies.

same methods practiced with large trees in commercial orchards. As is the case with trees worked on seedling roots, some varieties have their off years of bearing, but for their size, these dwarf trees yield bountiful crops of good quality fruit. Varieties which have been found to make compatible unions with Malling IX, roots include McIntosh, Delicious, Jonathan, Winesap, Newtown, Stayman, Rome Beauty, Golden Delicious, Jubilee, Spartan, Cox Orange and Yellow Transparent.

Blood Donors Are Asked To Register Now

British Columbia citizens, between ages of 18-65, are asked to register as blood donors when the B.C. division, Red Cross Society, inaugurates Blood Donor week, January 5-11. The Red Cross committee in Summerland is under the chairmanship of Mr. J. Y. Towgood, who will be responsible for organization of blood donors in this district.

Gone are the dying days, when a would-be donor had to choose between a full meal and giving a transfusion. Under the new system, which has been developed by Dr. W. S. Stanbury, national director of the Red Cross blood transfusion service, giving of blood is a simple half-hour job with no pre-diet and no discomfort. But the results cannot be computed in time, for that blood may save the life of some neighbor.

Residents of Summerland are being asked to register as donors during the week set aside for this purpose. The actual giving of blood will be organized later in the year when the mobile blood transfusion clinic visits this district. At that time a temporary clinic will be set up, the mobile unit providing equipment and staff.

This system, which is being inaugurated in B.C. by the Red Cross, will provide blood and plasma, free of any charge whatever, to all hospital patients where the local institution has agreed to provide transfusions free. Through this extension of one of the greatest of Red Cross wartime services Canadian citizens needing such treatment will share in one of the greatest of modern miracles... the gift of life from a fellow citizen.

To keep such a service operating, the B.C. division of the Red Cross is opening a completely-staffed provincial blood donor laboratory in Vancouver on January 21, 1947. This centre will handle all blood donated in this province, type and purify it, and service all co-operating B.C. hospitals with blood and plasma.

HIGH ADVENTURE HEARTY LAUGHS

There's thrilling adventure, dramatic action and chuckles in every panel of The Vancouver Daily Province comics. But come, let us take you first to China with Terry and the Pirates... Meet Terry Lee himself, now an airlines pilot... Pat Ryan... The Dragon Lady... Burma... yes and a host of other enchanting characters. But that's not all... There's Little Ophan Annie, Prince Valiant, Popeye, Little Lodie, Right Around Home... Mandrake the Magician and a host of other internationally famous people... the tops in Comics.

EXQUISITE... ENCHANTING
The secret to feminine allure... The knowledge that Mildred is ready to meet the world... confident, smartly styled, groomed with flawless perfection... This is the wish of every woman... Now it's excitingly possible... Marie Moore takes you into the realm of world fashion... unlocks the secrets to greater feminine charm. Read her column, "The World of Fashion," an exclusive feature of The Vancouver Daily Province.

QUICK SNACKS... OR FULL COURSE DINNERS
Your party is bound to be a success... and with so little fuss and trouble if you follow the course of Margaret Henderson in glorifying those mouth-watering morsels. There's new magic in kitchen craft... new sparkle to your menu... delicious, delightful, flavorome goodness that comes from skill with the skillet. YUMMY!

THE WORLD OF WOMEN is unfolded each day in all its charming variety through the writings of talented women reporters. It's a gripping story of love... tea... receptions... singing and dancing... of PEOPLE... attractively portrayed in word and picture. Jean Howards, Helen Evinger, Winifred Lee and Pat Wallace all keep the pages refreshingly up-to-the-minute in The Vancouver Daily Province.

ALWAYS A BETTER NEWSPAPER

SPEND NIGHT ON SNOW MOUNTAIN

Charles and Peter Dodwell, sons of Mr. and Mrs. P. G. Dodwell, travelled on skis to the top of Snow Mountain and spent the night of December 28 at the lookout cabin. They report three feet of snow on the mountain peak and the temperature there

registered two degrees below zero when the temperature in Prairie Valley that same evening was 13 degrees above.

A supply of wood was found at the cabin but to replenish what they used took several hours the following day. This wood supply must be kept up for the foresters who use the cabin in the summer.

They report that skiing to the mountain top was a gruelling task.

Principals of the WALKER-NISBET nuptials from left to right: Miss Kay Nisbet, Mr. Bill Evans, the bride and groom, Miss Betty Denison; in front, Vicki Cuthbert.

Choose Anniversary Of Parents' Wedding For Local Nuptials

The twenty-sixth anniversary of her parent's marriage was chosen by Joan, second daughter of Mr. and Mrs. A. W. Nisbet, Summerland, for her marriage to Mr. Alan Walker, second son of Mr. and Mrs. H. Walker, of Darlington, County Durham, England, when they exchanged vows on Friday, Dec. 27.

One of the major social events of the winter season, the lovely wedding was performed in St. Stephen's Church, which was decorated for the occasion with evergreens, snowberries and holly. The Rev. Canon F. V. Harrison officiated.

Entering the church on the arm of her father, who gave her, in marriage, the bride was exquisite in traditional white satin, with white sheer inset at the neckline, a full skirt falling slightly en train from a fitted waistline and with long sleeves coming to a point at the wrists. Her veil was a family heirloom of hand-made Brussels lace, and fell from a coronet of white flowers. Her lovely bouquet was of red roses with white 'mums and fern.

Preceding the bride down the aisle was the charming little flower girl, Vicki Cuthbert, who was a picture in pink, with pink flowers and veil in her hair, and carrying a bouquet of pink carnations.

As maid of honor, Miss Kay Nisbet, sister of the bride, chose a floor-length frock of turquoise blue with which she wore a white chapel veil, trimmed with rose feathers. She wore rose gloves and carried rose 'mums and carnations. Miss Betty Denison, of Vernon, cousin of the bride, served as bridesmaid, and was gowned in rose, with a white chapel veil, trimmed with blue feathers. Her gloves were also of blue, and she carried a bouquet of chrysanthemums.

Supporting the groom was Bill Evans, while ushers were George Fudge, Eric Denison and Harry Denison.

About 100 guests attended the reception, which was held at the home of the bride's parents, Mr. and Mrs. A. W. Nisbet, who assisted the young couple in receiving their guests.

The rooms were beautifully decorated for the occasion with evergreens and chrysanthemums. Mrs. Nisbet was gowned in a smart frock of dove grey, with black hat and accessories, while her corsage was of red roses.

Centering the bride's table was a three-tiered cake, flanked with tall candles and silver vases of chrysanthemums.

The toast to the bride was proposed by Mr. S. A. MacDonald, and was responded to by the groom. Mr. J. V. Charles proposed the toast to the attendants of the bride, which was responded to by Mr. Bill Evans.

Wires of congratulations were received from the family of the groom, in Darlington, England, and from Miss Joyce Hutchinson, Bermuda.

For a honeymoon trip to Vancouver and Tranquille, the bride chose a smart blue suit, over which she wore a topcoat of black seal, with a black stetson hat and black accessories.

The bride and groom will make their future home in Summerland.

Out-of-town guests for the wedding included Major and Mrs. H. R. Denison and family, Vernon; Mr. and Mrs. N. L. Denison and family, Lumby; Mr. and Mrs. H. Watson and Mr. and Mrs. F. Watson, Lavington; Mr. and Mrs. George Craig, Rutland; Mr. and Mrs. J. C. Craig, Oyama; Mr. and Mrs. W. Hobinton and Mr. and Mrs. Don Huntley, Penelton.

Miss Dorothy Britton, who was a vacation visitor with her family here, has returned to Vancouver to resume her duties on the staff of the Modern Kitchen at the Vancouver Daily Province.

TAKE UP DRAIN

An agreement was reached on Monday afternoon between the council and the Okanagan Health Unit respecting the sewerage drain in lower town which has been causing considerable trouble. The council agreed with Dr. G. L. Hutton, medical director and Mr. Black, sanitary inspector, to supply two men to dig up the drain for inspection purposes. Mr. Black agreed to make the inspection and determine which homes in the vicinity are contributing to the overflow condition and obtain their cooperation in remedying the drainage condition.

Socially Speaking

Social Editor : Muriel Hurry

Mr. and Mrs. E. Cafferky, of Vancouver, were visitors for the holiday at the home of Mrs. Cafferky's parents, Mr. and Mrs. George Henry.

Mr. and Mrs. David Millward, of Vancouver, were visitors for the Christmas week at the home of Mr. and Mrs. H. B. Mair.

A daughter was born to Mr. and Mrs. Costin Krasuin (nee Toots Healy), on Sunday, Jan. 5, at Kayville, Sask.

Mr. and Mrs. Steve Blazeiko and infant son, returned on Monday, Dec. 30, from Regina, where they were visiting Mr. Blazeiko's family for three weeks.

Mr. and Mrs. F. T. Fraser, of Tisdale, Sask., who were en route to Victoria, were visitors at the holiday season at the home of Mr. Fraser's brother-in-law and sister, Mr. and Mrs. W. L. McPherson.

Mrs. F. Daniels is at Vancouver this week to visit her daughter, Miss Gladys Daniels.

Mr. Walter Carter was a recent visitor to Vancouver and Victoria.

Mr. C. E. Bentley and his sister, Mrs. H. Pares, have returned from Vancouver, where they spent the holiday vacation.

A daughter was born at the Summerland hospital on Sunday, Dec. 29, to Mr. and Mrs. A. Fosse.

At the Summerland hospital, on Tuesday, Dec. 31, a son was born to Mr. and Mrs. Howard Shannon.

On Thursday, Jan. 2, a son was born to Mr. and Mrs. Walter Sigalek, at the Summerland hospital.

A daughter was born to Mr. and Mrs. Roy Soderburg at the at the Summerland hospital on Sunday, Jan. 5.

Mr. Charles Dodwell left on Jan. 1 for Vancouver, where he has become a member of the Vancouver branch of the firm of Dodwell and Co., well-known general and shipping agents. He will be joined there by Mrs. Dodwell, when housing conditions permit.

A son was born at the Penticton hospital on Friday, Dec. 27, to Mr. and Mrs. G. A. Hack, Penticton.

Miss Nancy Hack was a visitor to Summerland for the holidays, returning on Jan. 3 to the Vancouver General hospital, where she is in training.

Albert Doherty, of Vancouver, spent Christmas week with his parents, Mr. and Mrs. George H. Doherty.

Mr. Peter Dodwell, who is in third year agriculture at U.B.C., spent the holidays with his parents, Mr and Mrs. P. G. Dodwell.

Mr. and Mrs. A. Blanchet, North Vancouver, spent the holiday season with their son-in-law and daughter, Mr. and Mrs. J. J. Green.

Jimmy Maxwell is spending three weeks' holiday in Vancouver.

Mr. and Mrs. A. K. Macleod returned on Sunday from a holiday spent at the coast.

Among Summerland visitors to Vancouver for the New Year's holiday were C. B. "Tim" Hill, Don Clarke and J. A. Armstrong.

Harry Lamacraft left on Monday-evening train for Vancouver, to rejoin his ship on the coastal service.

Alan Embree and Herb Charles motored from their homes at Castor, Alta., via Trail recently, and Mr. Embree is a guest at the home of his uncle and aunt, Mr. and Mrs. Mark Embree, Trout Creek, while Mr. Charles continued on to Copper Mountain where he will visit relatives.

Marino Biagioni left on Jan. 5 for Vancouver, where he is undergoing treatment at the Shaughnessy Military Hospital.

School News

(By TING)

Congratulations to the President and Secretary of '47 — Bruce Haskins and Shirley Harvey.

At the Xmas Banquet held on December 20th the winners of the Mr. and Miss S.H.S. contest were announced — Wally Day and Jean Bryden.

The Legion Hall was a picture with red and green streamers, huge balloons and last but not least, MISTLETOE. The latter was not exactly appreciated by the teachers! After a delicious meal, toasts were given and repled to, after which several gifts were presented to Mr. Evans, who has gone to the coast, where he will be assistant Registrar on the Department of Education Staff.

On behalf of the school president, Carroll Brawner extended to Mr. Evans the best wishes in the coming year and presented him with a pen and pencil set and a picture of the school. From the girl's basketball team—socks and a white scarf with SHS embroidered in blue on it (school colours); he also received a sweater and a brush set in a leather case.

The next big event in the evening was - teachers versus mistletoe (enough said). Shortly after this dancing started, only to be interrupted by the noisy entrance of SANTA. Shouts could be heard from all corners of the hall as Santa cheerfully tripped (?) up to the platform. After a hearty laugh he called us to gather round him, he put his hand in a big bag and gave us all some candy. Santa stayed for a dance or two and then went on his way (he didn't want to keep his reindeer waiting any longer). Before he left, however, he had his picture taken by our roving photographer, Mr. Wilkin.

Miss Rose Berlinger and Miss Clara Berg of the staff of the local hospital are holidaying in Vancouver, Victoria and Nanaimo. En route home they will visit at the Nickel Plate Mine, Hedley.

Mr. and Mrs. J. Lamb and two sons, who have been visiting for some time at the home of Mr. Lamb's brother-in-law and sister, Mr. and Mrs. Ray Huff, left on Monday, Jan. 6, for Vancouver, where they will make their future home.

HOLD SHOWER FOR DECEMBER BRIDE

Miss Isabel Miller, whose marriage took place in Penticton on Dec. 27, was guest of honor at a surprise miscellaneous shower held at the home of Mrs. Mark Embree, Trout Creek, on Wednesday, Dec. 18.

The many useful gifts were presented to the bride-elect beneath a decorated Christmas tree, which stood upon a table. The festive Christmas touch was carried out in decorations throughout the room.

Following an evening spent in playing contests, a delightful

lunch was served by the hostess, who was assisted throughout the evening by Mrs. Norris Laidlaw and Miss Edith Verity.

Those present were the Mesdames L. Shannon, E. Verity, N. Laidlaw, W. Milne, G. Lewis, W. Davis, A. Hanson, T. Miller, T. Willis, C. Morgan, A. Milne, D. Miller, and the Misses Doreen Tait, Harriet Joy, Edith Verity, Zella and Elsie Johnson. Gifts were also received from the Mesdames D. Orr, W. McCutcheon, W. King, E. Tait, T. Laidlaw and D. McDougald.

Mr. Russell Kerr, of the Review staff, spent the Christmas vacation with his family in New Westminster.

NOBEL PEACE PRIZE winner, Emily Green Balch, of Wellesley, Massachusetts, receives congratulatory telegrams in the hospital, where she is being treated for bronchitis. An internationally-known economist and member of the Wellesley College faculty for 22 years, Miss Balch is 79 years old. Dr. John R. Mott of New York was joint winner of the prize.

Melvin Bland, a merchant seaman, is spending a vacation at his home here.

Mr. and Mrs. John Newton and family have returned from Princeton, where they spent the holiday season.

Bank of Montreal Is Honored For Advertising Plan

First Canadian bank to gain the distinction, the Bank of Montreal has won the Socrates High Award of the year for its advertising during the past twelve months.

The award is made by "Bank Ad-views," a New York monthly publication of financial advertising covering banks and trust companies throughout North America, which number more than 15,000. During the year, several of the Bank's ads won monthly awards as "The Best Ad of Month," while others received "honorable mention," resulting in the highest annual score among the banks on both sides of the border.

"Bank Ad-views" bases its awards on reviews of the daily papers of every metropolitan centre as well as several hundred smaller cities. In addition, the publication keeps in touch with leading bank and advertising men throughout the United States and Canada. A board of twelve advertising executives makes the final decision on winners.

In paying tribute to the Bank of Montreal, and to its manager of public relations, Munro Brown, "Bank Ad-views" commented that, "The Bank of Montreal has achieved a lasting scheme of forceful advertising... The Bank of Montreal has pointed the way. Its accomplishment deserves, at the very least, the careful study and consideration of similar institutions."

In winning the award, the Bank of Montreal rated highly in the three point-winning categories: ideas which sell bank service; layout and illustrative technique; and general effect on the bank's relations with the public.

"Art and layout have been important contributors to that effective balance of dignity and alertness which typify Bank of Montreal advertising," the award announcement comments. "At the same time, body copy has been adult. Bank of Montreal copy could never be called 'cute.' Nor, on the other hand, is it ever 'stuffy.'"

"While retaining the air of maturity which is rightly an important characteristic of bank advertising, the Bank of Montreal has alert and vigorous comments to make regarding present-day conditions in vital phases of Canadian agricultural, industrial and business life."

Much of the bank's current advertising has dealt with the dangers of inflation, and ways to combat it.

Let us drive out those ugly dents from your car so that you can drive out like new.

Early Pioneer Is Laid At Rest

One of Summerland district's pioneer citizen's, Mrs. Mary Jane Bristow, wife of Harry Bristow, passed away on New Year's Day, Wednesday, Jan. 1. The late Mrs. Bristow had been in ill health for years and had been confined to her bed for the past three to four years.

Born at Bathurst, New Brunswick, the deceased woman came west to the Winnipeg district in 1880, but was informed shortly after the turn of the century that she must leave on account of her health.

The family moved to Peachland in 1903 and then to Summerland the following year, residing here ever since.

The late Mrs. Bristow, as long as she was able, was an ardent worker for the United church and took an active part in all church activities.

Besides her husband, she leaves three daughters, Edith in Merritt, Bertha, secretary of the Summerland Co-operative Growers' association, and Mrs. J. A. Strothers, Vernon; one brother, Mr. R. A. Smith, Merritt; one sister, Mrs. Ella Smith, Vancouver, and four grandsons.

Funeral services were conducted by Rev. H. R. Whitmore, from St. Andrew's United church, West Summerland, with the United church choir in attendance, and Mr. T. P. Thornber at the organ. Flowers were carried from the church by members of the Summerland Co-op. staff.

Interment was in the Peach Orchard cemetery with the pallbearers consisting of Alex. Smith, George Henry, C. E. McCutcheon, James Darke, C. A. Steuart and Dr. James Marshall.

Mr. and Mrs. Jack Bennison and family returned on Monday, Dec. 30, from Vancouver, where they had spent the Christmas vacation.

A MOTHER may die unless You give blood

Of all Canadian women who die in childbirth, every fourth mother dies of hemorrhage. Three-quarters of these mothers can be saved... with but a small gift from you.

A great new civilian Blood Transfusion Service has been opened by the Canadian Red Cross. This Service will supply hospital patients across Canada with whole blood and plasma... FREE... not even a Hospital Service charge, to be used for life-saving transfusions.

Volunteer donors are urgently needed to build up the blood bank. After you register you will be asked to donate blood only two or three times a year. And each time you donate, you help save someone's life and restore that person to friends and loved ones.

Contact your local Red Cross Branch or Clinic and tell them—"Yes, please enroll me as a blood donor. I want to give blood to save someone's life!"

DONORS URGENTLY NEEDED

Give blood that others may live

The Magic Touch!

... THAT MAKES A MEAL A MASTERPIECE

Here is the secret to menus that are good to look at, good to taste, good to eat. And it's so easy when you have Margaret Henderson helping you in your own kitchen. Her "Modern Kitchen" column in the Vancouver Daily Province is a sure guide to a treasure of flavonome meals that are excitingly different.

THIS WEEK'S RECIPE

Sugar Cookies
1 1/2 cups flour, 1 tsp. baking powder, 1/2 tsp. salt, 1/4 tsp. nutmeg, 1/2 cup shortening, 1 cup sugar, 1 egg, 1 tsp. vanilla extract. Sift flour, measure, sift again with baking powder, salt and nutmeg. Cream shortening and sugar until light and fluffy. Add well beaten egg and then flour mixing well. Add flavoring. Drop from teaspoon on a well oiled cookie sheet, and bake at 375 degrees for 10 minutes.

Divide Cage Games With Orchard City

Summerland and Kelowna cage teams divided a Saturday night fixture at Summerland when the local girls triumphed over the Orchard City by a close 17-15 count with the Kelowna intermediate B's taking the long end of a 30-23 count from the Summerland Chiefs.

It was a big first quarter which cost the Chiefs a victory on Saturday, as they held the visitors even in two other quarters and outscored them in the final ten minutes, but not by a sufficient amount to overcome a 14-2 lead in the first canto.

Gee lead the vicisors with some uncanny shooting, accounting for 20 of the 30 points amassed by his team. At the half-way mark, Kelowna led, 18-6. Both teams scored ten points in the third stanza and Summerland nicked the hoop for seven points to Kelowna's two in the fourth and final quarter.

Nesbitt led the Summerland sharpshooters with eight points, closely followed by Rae Moore and Jim Hack.

Doreen Howard was mainly responsible for Summerland girls' first victory of the year over the Kelowna gals. She accounted for fourteen big points while Miwa Tada potted one field basket, and Bevrley Fleming downed a free throw.

Duffy and Whylie were the main scorers for the visitors. Summerland gained a 6-3 advantage in the first quarter and that meant the difference between victory and defeat. At half-time Summerland was ahead 10-8, and the teams scored an even number each in the last two cantos.

Summerland's girls' team consisted of high school players apart from Miwa Tada and Doreen Howard. Kelowna's squad was a high school group.

Kelowna girls: Whylie 4, Murdoch 2, West, Ryder, Smith 1, Scantland, Duffy 5, L. Day, Leckie 3—15.

Summerland: Doreen Howard 14, Miwa Tada 2, Joan Howard, Mary Ward, Maureen Keyes, Bevrley Fleming 1, Shirley Harvey—17.

Kelowna Taxis: Horner, Gee 20, Matheson 4, Mutsy, Hardie, Naka 6, Gunnarson—30.

Summerland Chiefs: Moore 6, Nesbitt 8, Stein 2, Jacobs, Dunham 2, Adams, Hack 5—23.

Referees: Moore and Smith, Summerland; Waddell and Horner, Kelowna.

BRUCE HASKINS AT BOYS' PARLIAMENT

Bruce Haskins, son of Rev. and Mrs. F. W. Haskins, Summerland, and a member of the local high school, attended the Boys' Parliament, held at the Parliament buildings, Victoria, during the holidays.

Young Haskins was sent to the coast to attend this important series of meetings by the A.O.T.S club, which paid all expenses for the trip.

This was the 16th session of the boys' parliament and the lieutenant-governor chosen for this year is Dr. Norman A. MacKenzie, president of the University of B.C. Sessions were from Dec. 27 to 30. Premier was Archie Macaulay, a student of Bain's.

Sixty representatives of youth organizations from all over the province gathered in the Capital City for this big event. Finance and youth promotion were among the topics under discussion.

UNIVERSITY ENDOWMENT LANDS

THE University Endowment Lands are administered by the Department of Lands and Forests. In this area are about 2,700 acres which, in the words of the famous city planners, Harland Bartholomew and Associates of St. Louis, is "undoubtedly the finest area for a large residential development remaining in the Vancouver metropolitan area. Probably no other city on the North American continent has within or near it an area containing such extraordinary natural advantages for the development of a truly fine residential area."

The area is adjacent to the University of British Columbia, and the money derived from the sale of lands here is for the benefit of the University.

Already a beautiful group of homes has been built on these lands, which are fully developed with all necessary services. Other homes are constantly being built, and at present approximately ninety lots are left for sale. Plans, however, are in contemplation for opening up of additional blocks.

Teen Town

By MIKE

Well, it's back to school for most of us, and that means back to Teen Town, too.

At this time of the year election time has rolled around again for Mayor and Aldermen. The following are those nominations that have been handed in to date:

Mayor: Ray Moore and Alf Kita.

Aldermen (Girls): Louise Washington, Shirley Harvey, Doris Cristante, Mary Ward and Joan Howard. (Boys): Jack Dunham, Don Nesbitt, Wally Day and Carroll Brawner.

Each person votes once for Mayor and votes for 3 girl aldermen and 3 boy aldermen. Elections will be at the dance on January 24. Be sure to see this column for campaign speeches.

I'm sure 1947 will be our biggest year yet, if everyone gets out and supports our Teen Town.

Everyone be sure and come to the dance on January 24, because it's the big election night. Vote for a mayor who knows his stuff and aldermen who will make '47 the best yet.

TO WHOM IT MAY CONCERN

At the Municipal Council meeting of Dec. 10th, as reported by The Summerland Review of Dec. 19th, a discrediting statement was made by me concerning Mr. W. D. Laidlaw. For any such statement I may have made in the heat of argument and without due reflection I would like to make amends by this apology to him.—H. L. WILSON.

C.P.R. APPLIES

(Continued from Page One) and "Vernon," explained Mr. Forrest last night.

If the application is approved, freight would be transported in a CPR truck and delivered to the merchants' place of business free of charge daily.

Such was the original plan, but the CPR men had been endeavoring to make an arrangement this week so that the individual delivery from the depot here to the business places could be handled by Smith and Henry, West Summerland hauling firm.

Mr. Forrest intimated that a contract is also pending between the CP Express Co. and Smith and Henry so that a free delivery service on express shipments could be provided. This contract is being held up pending the result of the commission's findings next week.

The CPR representative was quite frank in stating that the opening of the Hope-Princeton highway is the main cause of this proposed increase in service, as the railways will then have to compete with long-haul trucks out of Vancouver.

Mr. Green, in speaking against the application, declared that the CPR should effect a compromise with existing truck lines, as there are sufficient established trucking businesses to take care of this hauling work without placing still another truck on the highway.

"We are afraid that the CPR is out to dominate the highways and we fear that the small man is going to be pushed off the road by this big corporation," declared Mr. Green.

He also expressed the doubt that the CPR would keep to its contract with a local hauling firm for any length of time and instanced breaking of contracts in the East Kootenay as examples.

"The original intent of the CPR was to deliver and pickup in their own truck and I am afraid that intent is still alive," he declared, stating that the CPR had made no move to give a contract to Smith and Henry until it was known he was in the district, representing the trucking interests.

"The trucking industry is appealing to all citizens to support the small man providing he gives service," concluded Mr. Green.

EDITORIAL**Growers' Convention**

Next week, the eyes of agricultural Canada will be focussed on Kelowna, where the 58th annual convention of the British Columbia Fruit Growers' Assn. is being held.

Besides reams of reports from annual committees and executives of the growers, there are some sixty-five resolutions, to be dealt with, ranging in scope from standard complimentary motions to those dealing with industry protection.

Keynote of the entire convention will represent the efforts being made to impress on growers the importance of producing quality fruit. It is readily recognized that there will come a time when the pursestrings of the purchaser in Canada will be tightened somewhat. The growers will have to face increasing competition from many sources and if they are not producing the better quality fruit they will lose a portion of their markets.

It is recognized that the Okanagan has been producing some fruit of poor quality. The percentage of such poor quality fruit on the market is too high. So the industry must take drastic action.

To implement this desire on the part of most growers, to produce a better quality product, will be a keynote of the convention and most speakers will be stressing this point.

A perusal of the resolutions list indicates that most districts have been giving serious consideration to the problem and have produced their thoughts on the best method of approach.

Summerland has considered that the setting up of a department of production within the BCFGFA will go a long way towards solution of the problem in that this department would improve, co-ordinate and standardize picking, storage and packing of fruits in the area.

Coupled with this idea is that more importance would be attached to the role of the field man. He would come under such a department and would not be dependent upon the packing house alone for his guidance.

Other resolutions deal with stricter supervision of fruit handling, a fertilizer educational campaign and spreads between grades, all with the aim of increasing the quality of fruit.

One resolution which we believe will not work to the benefit of the industry has been submitted by Oliver growers and asks that the two cents per box levy for advertising be reduced in the case of soft fruits to 1½ cents per box.

This is an important resolution to the area from Peachland south especially, and comes at an inopportune time, we believe. In the next few years, with more competition likely from American soft fruits, the need for an educational campaign to get rid of a highly-perishable Canadian product will become more and more apparent.

Soft fruits cannot be kept for any length of time, in comparison to apples, and a well-planned advertising campaign with "plenty of punch," is essential to move the ever-increasing production of soft fruits.

We believe it would not be in the best interests of the soft fruit grower to commence cutting down on advertising appropriations at the present time.

Pedestrian Hazard

With slippery road conditions and windshields covered with frost, the need for pedestrians to walk on the left-hand side of the road becomes more and more apparent. This is a definite hazard on roads where no sidewalks exist and should be impressed on everyone. Parents should warn their children to follow this rule of the road and thus avoid needless accidents.

HER MAJESTY THE QUEEN is pictured here with PRINCE PHILIP of Greece, as they attended the wedding of Lady Patricia Mountbatten and Lord Brabourne, which took place recently at Romsey, England. Princesses Elizabeth and Margaret Rose were bridesmaids, and Prince Philip, wearing the uniform of an officer in the British Navy, was an usher at his cousin's wedding, hailed as the most glittering social event since pre-war days. According to persistent rumors, Prince Philip will become engaged to Princess Elizabeth, heir to the British throne.

The Dunsdon Christmas

"Harrowdene," the Garnett Valley ranch home of Harry Dunsdon, has witnessed many and varied happy events which live in the memory.

This winter, Pop thought up another scheme which would give healthful pleasure to the rising generation of "small" Dunsdons. So Pop set to work organizing a bucket brigade of one, and after much strenuous efforts, quite a nice skating rink resulted.

On Boxing Day, there was a gathering of the clans to try it out. Young Bill, with a superior experience of a few skates on the town rink, was the first one to show the smaller ones how to go about it. Many were the tumbles, but ambition soon had them up and trying again. One small cousin, over to see the fun, promptly returned home to give a somewhat belated call to Santa for some ice skates.

Not for long, however, was the ice given over to the youngsters. Out came their Dads and Mags to join the fun, and Granddad and Grandma were out, too, helping the smaller ones to keep their feet.

When Pop appeared and threw a puck in the rink, the fun waxed fast and furious. Mops, brooms, golf clubs and walking sticks were brought into requisition in a free-for-all. Even the youngsters joined in chasing the puck around until tired out.

Rosy cheeks and sparkling eyes were more than a recompense for the labor which Pop had put into the making of that rink.—(Contributed.)

Canadian Citizenship**A Summary of the Act and the Program**

The Canadian Citizenship Act became effective January 1st, 1947. During the week following, the Department of the Secretary of State organized a "Canadian Citizenship Week" to inaugurate the new citizenship ceremonies provided for in the Act. Plans feature ceremonies across Canada, from Halifax to Vancouver, including Charlottetown, Fredericton, Quebec, Montreal, Toronto, Hamilton, Windsor, Winnipeg, Saskatoon, Regina, Edmonton and Victoria. To launch Canadian Citizenship Week, there was a ceremony at Parliament Hill on Friday, January 3rd, where the Prime Minister presented certificates to representative new Canadians.

The Secretary of State, Paul Martin, recommends that such Citizenship ceremonies might be held in February, June and October of each year after the Act goes into force. He hopes that, on these dates in cities all across Canada ceremonies will be arranged by civic and community bodies. An outline of a simple and dignified ceremony has been prepared for such occasions. It must also be remembered that every year some 200,000 young Canadians come of voting age and it would be fitting that some recognition be made of this important event in their lives.

Under a clause of the Canadian Citizenship Act, the Minister is given responsibility for seeing that adequate preparation is provided for persons applying for Citizenship Certificates. Toward this end the Federal Government is working with the adult educational bodies in the province. The Canadian Citizenship Branch is preparing a manual for new citizens which will answer a long-felt need. The Canadian Citizenship Council and the Canada Education Association are stressing citizenship in their adult education program. The CBC, the National Film Board and the Canadian Association of Broadcasters have promised their co-operation in film and radio programs.

The outstanding features of the Canadian Citizenship Act are:

1. The Act provides for the establishment and recognition of Canadian Citizenship. Formerly the only definition of Canadian citizenship was to be found in the Immigration Act. In future, all Canadian passports will carry the word, "Canadian Citizen," a right which was not formerly general.
2. Native born Canadian, or British subjects domiciled in Canada, brides of Canadian servicemen, and all those who now possess naturalization certificates, are declared to be Canadian citizens immediately.
3. British subjects will be supplied with Canadian citizenship papers upon request after establishing legal residence in Canada.
4. A Canadian woman will have the right to retain Canadian nationality even though she marries a man of any other nationality. Women who marry Canadian citizens will qualify for Canadian citizenship one year after establishing residence.
5. The Act provides for encouragement of education in citizenship for those applying for naturalization and gives the Secretary of State responsibility for taking steps to provide such facilities as are necessary.

It seems fitting to close this brief summary with the concluding words spoken in the House by Mon. Paul Martin on the first reading of the bill:

"For the national unity of Canada and for the

**Information...
On Food**

CANADA'S FOOD EXPORTS
1935-1939 AND 1945

The war operated in a number of ways to affect Canada's production of foodstuffs and to influence the volume, value and direction of her food export trade. There was an approximate 40 per cent over-all increase in food production achieved despite a very considerable reduction in available manpower. To make the most effective use of shipping space, export demand was for foods of high nutritive value—wheat and protein foods such as meat, fish, dairy products and eggs. Accordingly, these commodities were emphasized in production plans and increased supplies were reflected not only in larger exports but also, except in the case of fish, in greater domestic disappearance.

Advances in food technology, such as improved methods of dehydration and the development of a bacon cure which enhanced its keeping qualities, enabled Canada to help overcome shipping problems and to meet the needs of her wartime overseas markets.

In the spring of 1946, the prime minister was able to state, "In proportion to our population, Canada has exported, to meet the needs of the world over the past few years, more food than any other nation." In terms of value alone, the per capita export of foodstuffs increased from \$23.4 in 1939 to \$86.9 in 1945.

The spread of hostilities reduced the number of countries with which Canada formerly traded, but more extensive markets were opened up for many of her products. The United Kingdom became increasingly dependent on Canada for foodstuffs, as her normal sources of supply either fell into enemy hands or were cut off by lack of shipping facilities. Canada succeeded in meeting the majority of the United Kingdom's requests, and in many cases shipped considerably more than was contracted for. The food agreements (bacon, beef, evaporated milk, cheese and eggs) made between the two countries during the war were later extended, and now include contracts covering wheat and flour, poultry and fruits. These agreements are assurance that the people of Great Britain will continue to receive a substantial portion of their import food requirements from Canada for several years.

Canada has also assumed an important role in the supply program of UNRRA since its formation in the fall of 1944. From October, 1944, to July 31, 1946, the total value of Canadian food commitments, including shipments, for UNRRA amounted to \$121,789,558.

Loans made to a number of war-devastated countries by the Canadian government under the Export Credits Insurance Act, passed in May, 1944, have made it possible for these countries to resume trade with Canada. Food commodities rank high on their lists of urgently required imports.

**Government To
Build In Spring**

The government has in hand a large amount of necessary public building that—provided materials are available and not wanted for housing—will be launched next spring, it is announced by the Honorable E. C. Manning, Minister of Public Works.

Government architects are now working full time on plans for many buildings, among them a nurses' home at the Provincial Mental Hospital; a new liquor store for Port Alberni; new government office buildings for Penticton, Burns, Lake and Alberni, as well as the Boys' Industrial School in the Nanaimo area, plans for which have now been changed from a cottage system to one large building with dormitories. The cottage system turned out to be far too expensive when tenders were called some weeks ago.

Extension of Prairie Farm Rehabilitation Act

An immediate start on the \$100,000 reclamation undertaking on 30,000 acres of land in the Pemberton Valley, will be made by the Federal Government, thus extending advantages of the Prairie Farm Rehabilitation Act, it was announced by Premier John Hart, the Honorable E. C. Carson, Minister of Public Works, and the Honorable Frank Putnam, Minister of Agriculture, following a conference with Mr. George Spence, director of the Prairie Farm Rehabilitation Administration.

It is hoped that by this action some of the best agricultural land in Canada will be saved from erosion and flooding. Mr. Spence informed the Premier that work

future and greatness of this country, it is felt to be of the utmost importance that all of us, new Canadians and old, have a consciousness of a common purpose and common interests as Canadians; that all of us be able to say with pride and say with meaning: 'I am a Canadian citizen.'

**The
Feminine Front**

by MURIEL HURRY

That one is "never too old to learn," is an old adage which I am beginning to suspect is slightly over-rated. Still a wee mite on the sunny side of thirty, this horrible suspicion of the truth of a fine old moral first began to creep into my subconscious mind when I began to bowl a short time ago. However, after due study of the situation, I was forced to admit that perhaps almost anybody could learn to bowl reasonably well with a few years of practice, and plenty of brawn.

But one recent evening I was inveigled, and I am sure that it was with ulterior motives, into a skating party. I, who had never been on skates in my life.

What follows next really ought to be skipped. However, you can't skip on ice, as I soon found out. But you can slide, in several directions at once.

When I finally stopped trembling, enough to venture on to the ice, it was with my better half on one side of me and a very kind and, thank heaven, sturdy lass on the other. So supported by them, and I mean supported, I swooped merrily (it must have been merry, judging by the laughter I heard), across the ice, my feet sliding in all directions.

I couldn't seem to control my feet at all, and I didn't dare try to control my balance. It didn't seem possible that there could be such a thing as balance on those narrow blades, with only slippery, very slippery, ice beneath. It is a good thing that I weigh only 105, or it would have been impossible for my two faithful supporters to carry me for so long. But they were very loyal, and never once let me fall, although I knew they were dying to do so.

The second try on the ice was with only my husband at my side. And I know that the spectators thought we were honeymooners, as I spent nearly an hour with my arms wrapped around his neck, which is not an ideal position for skating, but is at least a comforting one. The ice looked so hard.

The rest of the evening I spent talking to genial Charlie Wharton, the proprietor of the rink. Mr. Wharton informed me that the most avid skaters were young folks, and that after marriage most couples gradually ceased coming to the rink as often. However, I noticed that there was quite a smattering of older people there the night we went.

There has already been more than 2,000 to the rink this year, stated Mr. Wharton, with an average of nearly 200 a day. And it is a healthy, invigorating sport. In spite of my thrills and chills, I recommend it. For although my dear husband threatened to leave me stranded in the middle of the rink if I didn't promise to give him his breakfast in bed the following morning, I really intend to try it again.

The Red Cross Blood Donor Service, which is being inaugurated in B.C., is a very worthy enterprise and should be supported by all.

In cases of loss of blood through injury, or hemorrhage, in shock, childbirth, anaemia, etc., a transfusion is often the only means of saving a life. It can be done easily, and probably will happen that at some time a member of your family will need a transfusion. Your support is necessary to ensure a supply of blood when such an emergency arises.

Any doctor will tell you that he has known of many cases when a ready supply of plasma could have saved a life that mental hospital; a new liquor slipped away. Make sure that this condition cannot arise again in the future. Support this drive now and keep supporting in the future, as we must make sure that there is no let-down in the steady supply of the life-saving fluid.

would start soon. The Provincial Government is hopeful that the Federal Government will carry out its entire plan, which is estimated to cost \$475,000.

RADIO INTERFERENCE

Electrical Foreman T. P. Thornber requested council co-operation on Monday in urging the dominion government that steps be taken to prevent manufacturers from issuing appliances which cause radio interference. He pointed to certain types of bed-heater appliances as being amongst the worst offenders. Mr. Thornber asked that this question be passed along to other municipalities so that a collective request could be made. He also suggested that the government radio inspector should be informed that work calls in this district.

Xmas Dinner on the Run

A Philadelphia restaurant owner is carrying out an idea with the whole-hearted approval of the Philadelphia grammar school boys. Each day the cafe proprietor releases 10 turkeys with the stipulation "catcher's keepers". In the resulting free-for-all the swiftest, and smartest, runners win. Here, a tired turkey warily watches from the roof of a parked car as a youngster with dinner in his eye gets ready for the final grab.

Trout Creek Bridge Will Be Rebuilt In Spring Says Bennett

There is every indication that the widening and replacing of the Trout Creek bridge over the Okanagan highway No. 5, which has been termed the "bottleneck of the Okanagan," will be undertaken by the B.C. government public works department this spring, the Summerland Board of Trade was informed last Thursday evening at its January meeting.

Bennett Letter

In a communication from W. A. C. Bennett, M.L.A. for South Okanagan, Hon. E. C. Carson, minister of public works, was quoted as stating that "this necessary piece of work" will be undertaken late this winter or in the early spring.

Mr. Bennett pointed out that after his election in 1941 he was instrumental in having this bridge replacement placed in the estimates for Similkameen riding, as the bridge is actually a few feet south of South Okan-

agan riding.

However, materials could not be obtained then for the reconstruction work. It is stated that materials are now available and work will proceed shortly.

Asks For Survey

Mr. Bennett also sought support for his endeavors to have Okanagan highway re-surveyed from Peachland south to Penticton. Such a survey would probably take in the re-location of the Peach Orchard hill from the south to the north side of the ravine to avoid ice conditions in the winter.

This re-location has been sought for some time by the Summerland trade board, but Mr. Bennett pointed out that doing spotty relocation work does not always tie in with a survey over a wider area and he considered no move should be made until the entire route from Peachland south to Penticton can be taken under advisement.

President Reid Johnston declared he would discuss this subject with Mr. Bennett and determine what the member for South Okanagan wishes the Summerland board to do in this matter. Regarding the proposed road to the top of Giants' Head, Mr. Bennett expressed the hope that he could persuade Hon. E. C. Carson to inspect this project in the coming spring.

Mrs. Myrtle Powell, Kelowna, was a visitor for the holiday season at the home of J. Lawler, where she was a guest of her parents, Mr. and Mrs. F. Page.

This is a model of the proposed Dover Cliffs Memorial to Britain's wartime Prime Minister, Winston Churchill. Charles H. Davis, of Cape Cod, Mass., designed the model and proposed it to 14 mayors along the English channel. He is planning to launch a campaign to raise the \$1,000,000 to \$2,000,000 required for the work.

TRY TO MUFFLE SIREN

An attempt will be made to provide suitable housing for the West Summerland fire siren so that the continuous roar will be muffled. In the cold weather it must grind away or it would freeze and be useless in an emergency, it was stated. Electrical Foreman T. P. Thornber was asked by the council on Monday to make whatever arrangements he could with the fire department.

TRAP SHOOT WINNERS

At the Boxing Day trap shoot Bill Laidlaw won the first prize in the handicap shoot, with Alf Johnston second. In open competition, Frank Pollock was first and Tom Nelson second. In two sweepstake shoots, Dr. L. A. Day was winner both times.

NOT UP TO STANDARD

Dr. G. L. Hutton, medical director of the Okanagan Health Unit, accompanied by Mr. Black, sanitary inspector, Penticton, attended the Monday afternoon council meeting to report that one of Summerland's eating houses did not come up to required standards. This place of business had been notified that it must live up to the health standards or be closed for business, Dr. Hutton declared. Reeve Powell stated that he would also make enquiries into the situation in regards to trades license requirements.

Mr. Jack Lawler has returned from Powell River, where he spent the holiday vacation at the home of his daughter.

Mr. and Mrs. J. Ganzeveld, of Grand Prairie, who were en route to Vancouver, were recent visitors at the home of Mr. Ganzeveld's brother-in-law and sister, Mr. and Mrs. Walter Ward.

Mr. and Mrs. V. Charles were visitors for the New Year vacation at the home of their son-in-law and daughter, Mr. and Mrs. Ed. Foy, Copper Mountain.

Calgary Nuptials Of Interest Here A quiet wedding was solemnized in the vestry of the First Baptist Church, Calgary, on Saturday, Jan. 11, at 3 p.m., when Viola Leena, daughter of Mr. and Mrs. Julius Wolf, of West Summerland, was united in marriage with Roy Maurice Darke, son of Mr. and Mrs. James A. Darke, West Summerland. Rev. J. Gordon Jones officiated at the ceremony, at which the bride was attended by her sister, Margaret Wolf, of Calgary. Mr. and Mrs. R. M. Darke will make their future home in Rocky Mountain House, Alta.

Teen Town To Vote On 1947 Candidates At Coming Elections

A mayor, three girl aldermen and three boy aldermen are to be selected by Summerland Teen Town at the annual election dance on Friday, January 24. Each candidate has a campaign re-organized, Summerland high school boys lost a 7-5 decision both Penton scores and he Living Memorial hockey rink was second stanza. In the third, Vic Kato and Ray Moore. On the first forward line were Bruce Haskins, Barney Furuya and Jack Dunham, while the second line consisted of Bob Ward, Carl Brainer and Harold Stein. Spares were Danny Hack and Gordon McNutt.

FOR ALDERMAN Jack Dunham: Who has taken an active part in Teen Town? Who has been our star reporter? Why! None other than Jack. When you vote for a Teen Town alderman you should vote very carefully, as those you vote for will determine whether your Teen Town will be a success or otherwise. So who will make a better alderman than Carroll? He has always shown definite possibilities and made an excellent President of the High School.

FOR ALDERMAN Donald Nesbitt: For alderman you want someone dependable, someone who will always do his best, will co-operate with the other councillors. Don't aid is and does all these things. You'll see his red hair at all the meetings taking an active part in all. Jack Dunham: Who has taken an active part in Teen Town? Who has been our star reporter? Why! None other than Jack.

United W.M.S. Reviews Work

The Women's Missionary Society of Lakeside United Church reviewed the work of 1946, at the annual meeting at the home of Mrs. J. C. Robson, on Jan. 8.

Large cartons of supplies, new and used clothing and Christmas gifts for the children, had been sent to the Out-Post United Church Hospitals. Clothing was also contributed to U.N.R.R.A.

Many visits were made to the sick, and to strangers in the district, and flowers taken to the "shut-ins." A successful St. Patrick's Day Tea had provided funds for this work. In addition, the members raised \$175.00 for their Home and Foreign Missionary Work by voluntary giving.

At each meeting the work of their Missionaries, hospitals, orphanages and Church schools was studied.

On Wed. Miss Saunders, the President, gave a most interesting talk on village life in India, drawn in part from her personal experiences in the many years she had spent there.

WANT SPRINKLER SYSTEMS

More applications for installation of sprinkling systems have been received by the municipal council. F. Wigenhauser and R. J. Bagma are the latest applicants. These requests automatically go to Water Foreman E. Kercher for report.

New Rebekah Officers Are Installed Here

On Wed. evening, Jan. 8th, at the I.O.O.F. hall, installation ceremonies for the new officers of Faith Rebekah Lodge for the spring term were held.

Several members from Penticton were present including Sister Pearl Betts, District Deputy, and Sister Stella Matson, Past President of Rebekah Assembly.

With Sister Nellie Washington as deputy marshal assisting Sister Betts, D.D., the new officers were installed as follows: Sister Margaret Dunsdon, Noble Grand; Sister Loretta Hack, Vice-Grand; Sister Ruth Caldwell, Recording Secretary; Sister Nellie Kean, Treasurer; Sister Margaret Sherwood, Financial Secretary; Sister Audrey Taylor, Outside Guardian; Sister Hettie Gloyd, Inside Guardian; Sister Mary Clark, Warden; Sister Florence Ritchie, Conductor; Sister Mona Thompson, Chaplain; Sister V. Elliott, Right Supporter of Noble Grand; Sister Louise Atkinson, Left Supporter of Noble Grand; Sister Lois Read, Right Supporter of Vice-Grand; Sister Rhona Nilson, Left Supporter of Vice-Grand; Sister Miriam Hannah, Color Bearer; Sister Flo Holmes, Pianist; Sister Nettie Shannon, Past Noble Grand.

During the evening Sister Dunsdon, N.G., named her various committees, and Sister Audrey Taylor was presented with her Past Noble Grand's jewel by Sister May Mitchell, Past Noble Grand.

After a very busy evening refreshments were served by the retiring social committee.

Lakeside Junior W.A. Headed By Mrs. P. Wilson

Mrs. Percy Wilson was elected president of the Lakeside Junior W.A. at the annual meeting, held on Jan. 9, at the home of Mrs. F. R. Stark.

Mrs. B. Raincock was elected first vice-president, and Mrs. P. Keibel second vice-president. Mrs. Wells was elected secretary, and Mrs. M. Van Gameron, treasurer. The new buying committee consists of Mrs. C. Morgan and Mrs. W. Dunsdon.

Plans for the coming year were discussed and a successful past year was reported. Among worthy work done by the Junior W.A. during the year was in aiding the re-shingling of the roof of the Lakeside United church.

Means for raising funds during the year included serving hot dogs and coffee at one of the local packing houses, which service they performed once a week for a period of three months. Two successful sales were held and the club also catered at the AOTS suppers once every three months.

Retiring president for the past year, was Mrs. Fred Schumann.

Socially Speaking

Social Editor : Muriel Hurry

Mr. Lloyd Shannon returned to Summerland on Wednesday from Vancouver, where he attended the hearing of the Public Utilities Commission.

Mr. Ted Scott, of Peachland, has joined the mechanical staff of Pollock Motors and is residing at the home of Mr. and Mrs. A. Lamcraft.

Mr. L. Hill and Mr. Les Rumball were visitors to Vancouver this week to attend the hearing of the Public Utilities Commission.

After a residence here for 21 years, Mr. and Mrs. Harry West-erlaken have left this week for Salmon Arm, where they have purchased a property.

Due to the lack of electricity, the congregation of the Lakeside United church held a service by candlelight on Sunday evening.

The first regular sewing meeting of the year for the Summerland branch of the Red Cross was held on Monday afternoon at the Parish hall. There is a full schedule of work ahead for the local branch.

Mrs. H. Scriver is again a patient in the local hospital.

Constable H. Cartmell has returned from Vancouver, where he has been receiving medical treatment, and will resume his duties here during the coming week. Constable S. McKim, who has been replacing Constable Cartmell, will leave shortly for Fernie, where he will be stationed.

Mr. and Mrs. E. O. Atkinson, of Penticton, were visitors for the Christmas vacation at the home of Councillor and Mrs. F. E. Atkinson.

Hospital Auxiliary Again Chooses Mrs. Ina Atkinson

President of the Summerland Hospital auxiliary since about 1936, Mrs. Ina C. Atkinson was again re-elected by acclamation as head of the local auxiliary at its annual meeting on the evening of Jan. 6, which held at the home of Mrs. W. H. B. Munn.

Before this time, when the Junior and Senior auxiliaries united, Mrs. Atkinson served as the president of the Junior Hospital auxiliary from 1932, with the exception of one year.

Other officers elected at the annual meeting, with Mrs. Gayton as chairman, were: Vice-president, Mrs. A. Dunsdon; second vice-president, Mrs. E. Wilson; recording secretary, Mrs. R. N. Laidlaw; treasurer, Mrs. A. Gayton.

Committees and conveners appointed by the president were: Buying committee, Mrs. B. Underwood, Miss Edith Verity and Mrs. T. Lott; cutting committee, Miss Doreen Tait; nickel fund, Mrs. H. Short; corresponding secretary, Mrs. C. Morgan; Dorcas, Miss Kay Strachan; Masons, Mrs. E. Wilson; house committee, Mrs. H. Eden.

Reports of committees and treasurer were read, with the financial report showing a bank balance of \$647.11 for 1946.

The membership showed an increase from 38 to 41 during the year, and average attendance at the meetings was 21. New business for 1947 was discussed and it was agreed that the fire facilities at the hospital, with a view to the immediate removal of bedridden patients, be investigated and, if possible, improved upon.

Gets Husband's Award

MRS. MARGUERITE BIELER, wife of the late Major G. D. A. Bieler, M.B.E., D.S.O., who will be presented with the Croix de Guerre avec Palme awarded posthumously to Major Bieler for heroic action in the campaign which was responsible for the liberation of France. The investiture will be held at the French Embassy in Ottawa. Mrs. Bieler will be the guest of the French Ambassador, Count Jean de Hautecloque, and the Countess de Hautecloque, while in the Capital. She will be accompanied by her two children, Jean-Louis and Jacqueline.

WATER SYSTEM HAS 21,000 FEET FLUME

In the municipal system there are 21,000 feet of cement irrigation flume ranging from 24 inches to 60 inches. Water Foreman E. Kercher informed the council on Monday. Besides this construction there are 15,000 feet of metal pedestals for this fluming.

Since the installation of this quantity of cement fluming there has been no maintenance required, except where the grade is excessive, he continued. On steep grades he recommended that metal fluming be placed as experience had shown that cement was difficult to keep in position.

A full report is to be submitted by Mr. Kercher to the council on the irrigation and domestic water systems this week.

from their Christmas vacation, which was spent in Vancouver with their families.

Miss Bertha Reddlich, of the Fruit Laboratory, Experimental Station, has returned from Vancouver, where she spent the Christmas vacation with her family.

Mr. and Mrs. Lawrence Mitchell, of Chilliwack, were visitors for the Christmas holiday at the home of their son and daughter-in-law, Mr. and Mrs. Harvey Mitchell.

Mr. B. Shirk, of Vernon, is visiting at the home of Mr. and Mrs. E. Kercher while renewing old acquaintances. Mr. Shirk is a former resident of Summerland, coming here 38 years ago. He reports that the town is completely changed since the days when he was the original owner of the present Kercher place.

Mr. and Mrs. Harry Brown were Oliver visitors on Monday, when they were guests at the home of Mrs. Brown's sister, Mrs. W. Maxwell. They were accompanied as far as Kaleden by Mrs. James Ritchie, who visited there at the home of her sister, Mrs. W. King.

Mr. and Mrs. T. Sayers and infant son, formerly of Millerock, Ont., will arrive in Summerland on Saturday, and will make their future home here. Mrs. Sayers is the former Ruby Baldwin, and Mr. Sayers will become a member of the staff of the Quality Meat Market.

Mr. Wm. Schmunk was a motor visitor to Vancouver for several days last week.

Mr. Ed. Swailes and Mr. Charles Gittman, of the Fruit Products Laboratory, Experimental Station, have returned

Mr and Mrs. Percy Rand, of Nanoose Bay, were visitors for Christmas and New Year vacation at the home of Mr. Rand's parents, Mr. and Mrs. S. Rand.

Miss Peggy Daniels, who has been employed in Trail, is visiting at her home here.

The Mail Box

West Summerland, B.C., Jan. 9, 1947.

Editor, The Review: Since my appointment as building inspector, I have consistently advocated against construction of chimneys with cement brick which have no flue linings, although I am given to understand that this is permitted in other places in the province.

My attention has been called to two instances in which fires have started from unlined cement brick chimneys in Summerland; fortunately in each instance they were extinguished with little damage having been done.

I shall ask the council to amend the building law to prohibit such chimney construction, but in the meantime, would ask builders and contractors to cooperate with me in doing away with this hazard.

ROY F. ANGUS, Building Inspector.

Mrs. C. Advocaat has returned from Hedley, where she spent the New Year vacation at the home of her son-in-law and daughter, Mr. and Mrs. E. J. Quaadvlieg.

Record Pack Of Can Goods During 1946

In a recent address on the outlook for 1947 to the Ontario Canned Foods Association convention at Niagara Falls, F. J. Perry, Chief Canning Inspector, Fruit and Vegetable Division, Dominion Department of Agriculture, said that the figures of the estimated total pack of canned fruits and vegetables clearly indicated that the 1946 pack of some of the commodities was a record, and that if there were another bumper pack in 1947 it would bring about a return to normal supply.

In another year, said Mr. Perry, canners would be looking for exports. At the present time, exports were on a quota basis and would so remain for some time until there was assurance of a reasonably fair supply for the domestic market.

Over and above the present quota for export, it was hoped that 75,000 cases of choice quality tomatoes and 500,000 cases of fancy and choice quality tomato juice would be obtained for Great Britain.

Probably the supply for juice would be met but there was likely to be a considerable falling down on the canned tomatoes, due to the poor quality of the pack, because much of it was graded standard.

Great Britain would also like to obtain a further supply of 50,000 cases of peaches and 50,000 cases of plums. There was no set-aside for these particular lots. If their requests could not be met, every effort should be made to ship at least a fair quantity of peaches because, undoubtedly in years to come, canners would be looking for export to relieve the domestic market of an over-supply.

Large quantities of citrus fruit were now being imported. The United States production in 1946 was double that of any pre-war year, and, although the Prices Board was endeavoring to hold down imported prices to domestic prices, large imports in the future might be expected unless Canadian prices could be held within reason and better quality products made.

Large quantities of citrus fruit were now being imported. The United States production in 1946 was double that of any pre-war year, and, although the Prices Board was endeavoring to hold down imported prices to domestic prices, large imports in the future might be expected unless Canadian prices could be held within reason and better quality products made.

Submit Names Of Trustees

Kelowna city council has submitted the names of A. R. Polard and Mrs. Kathleen Paterson to the Kelowna School District No 23, as two of the three Kelowna school trustees for the ensuing term. A third name, that of G. W. Haug, was ruled ineligible because of property qualifications.

No nominations were received prior to the election date for Kelowna's three trustees, thereby forcing the city council to take this action.

There are nine members on the Kelowna board, the same situation having arisen in Peachland. The name of J. H. Wilson has been submitted by the Peachland municipal council and Mr. Wilson's name has been approved by the board.

Kelowna's veteran school trustee, Dave Chapman, was forced to retire this year due to health reasons, after 20 years' service.

Hundred Young People Play Hockey Here Extension Of P.G.E. To Tap Coal And Oil

Four junior hockey teams have been organized, taking in young players up to 14 years of age, under the direction of the A.O.T.S., Les Gould informed The Review this week.

Team captains are Ken Brawner, Daryl Weitzel, Keith Haskins and Ronnie Ritchie for the four teams from one to four, respectively.

Tuesday, Wednesday and Friday afternoons are now set aside for junior practices, while on Saturday afternoons the four teams are playing league games.

Last Saturday, Teams 1 and 4 played off as well as 2 and 3. Next Saturday, Team 1 meets Team 3, and 2 plays 4. Saturday, Jan. 25, sees 1 play 2 and 3 vs. 4; Saturday, Feb. 1, 1 vs. 4, 2 vs. 3; Saturday, Feb. 8, 1 vs. 3, 2 vs. 4; Saturday, Feb. 15, 1 vs. 2, 3 vs. 4.

There are some 60 juniors participating in the practices and games on the new hockey rink established by the Summerland Memorial Parks Committee.

Also, some 40 intermediates up to the age of 19, are practicing hockey on the rink, and playing time is also set aside for senior players.

Since the rink was opened on Friday, Jan. 3, it has been the source of much entertainment and healthful exercise for the younger people of Summerland, the committee reports.

Of the four parties sent into the field to make surveys in connection with the extension of the Pacific Great Eastern Rly. into the Peace River district, three have completed their work and have been withdrawn, while the fourth, after a Christmas recess, is now returning to the field to complete the survey between Dawson Creek and East Pine, states Premier John Hart following a conference with Mr. James Stewart, deputy minister of railways.

To date, surveys have been completed from Pine Pass Summit to East Pine and from East Pine to the vicinity of Hudson Hope. West of the Summit to Pine Pass, the survey has been completed in the Misinchinka Valley and from the Misinchinka to Reynolds Creek, eliminating a piece of one per cent grade.

While it is too early yet to be in receipt of all the information gathered during these surveys, it is now definitely known that a 5/10 line against southbound traffic could be obtained on the Pine Pass route to Dawson Creek with the exception of ten miles from the Summit east, where a 1% grade is necessary. As this occurs adjacent to a terminal point, it is not regarded seriously.

The Centurion Creek route, which was discovered during the course of the surveys, follows a wide valley and will afford access to the undeveloped country west of Pine River and on to rockings of the Peace River at Rocky Mountain Canyon, or south to Fort St. John.

On the whole, the surveys have shown the Pine Pass route to be a very fine one, offering economic grades and the most logical connection, perhaps the only connection, with the Northern Alberta Railroad at Dawson Creek.

The Premier also pointed out that the line would pass in close proximity to the very important coal and oil resources that have been uncovered in the Hassler Creek area.

Mrs. C. Alexander, who has been a patient in the local hospital, has returned to her home.

Bird Census Is Taken Here

On Dec. 22, the annual Christmas bird census was undertaken by four interested Summerland men, Eric Tait, Herbert M. Simpson, W. C. W. Fosbery and S. J. Darcus. In covering twelve miles of this area, along the lake front from Penticton to Crescent Beach, four miles of fruit benches and adjacent valleys back to the pineclad hills, these observers counted 2,684 birds. These birds were in the following categories:

Horned Grebe, 10; Pied-billed Grebe, 2; Blue Heron, 1; Mallard, 16; Gadwall, 5; Baldpate, 9; Green-winged Teal, 1; Redhead, 22; Canvasback, 4; American Golden-eye, 7; Buffle-head, 10; Hooded Merganser, 3; American Merganser, 3; Sharp-shinned Hawk, 2; Bald Eagle, 1; Pigeon Hawk, 1; California Quail, 40; Pheasant, about 90; American Coot, about 1,000; Killdeer, 1; Herring Gull, 5; Belted Kingfisher, 2; Flicker, 28; Pleated Woodpecker, 1; Hairy Woodpecker, 1; Downy Woodpecker, 2; Bald-headed Jay, 1; American Magpie, about 48; American Raven, 1; Long-tailed Chickadee, 6; Slender-billed Nuthatch, 10; Pigmy Nuthatch, 16; Dipper, 1; Winter Wren, 3; Robin, 1; Western Bluebird, 11; Bohemian Waxwing, 125; Shrike, 1; Western Meadowlark, 8; Evening Grosbeak, 8; Redpoll, about 60; Goldfinch, about 120; Shufeldt's Junco, about 800; Song Sparrow, about 47; English Sparrow, about 150. This list includes 45 species.

Mr. and Mrs. H. Tomlin were visitors at Christmas at the home of their son-in-law and daughter, Mr. and Mrs. N. V. Simpson, Oliver.

Mr. and Mrs. Rogers and Mr. and Mrs. Howard Moore, all of Kelowna, were visitors for several days recently at the home of Mr. and Mrs. Wm. Ward.

Vancouver Firm SCOUT NEWS Sets Up Offices Across Canada

VANCOUVER—Reversing the traditional trend of national firms for expansion from east to west, Stewart-Lovick Limited today announced extension of its services eastward. J. E. H. Lovick, managing director of the Vancouver advertising company reported the opening of three new branches at Montreal, Winnipeg and Regina.

This brings the total of Stewart-Lovick offices to seven.

New Partner

In the advertising agency field, the firm has been unique in that it was started here by two young men in their mid-twenties and grew eastward. V. L. "Pinky" Stewart opened the Vancouver office in 1936 and was joined a few months later by J. E. H. "Jimmy" Lovick. It gained national recognition the same year and five years later stretched to Calgary and in 1942 to Edmonton.

"Pinky" Stewart made advertising history when in 1944 he invaded the Toronto field and set up a branch there, retaining Vancouver as the head office of the growing chain.

Growth in the last 18 months has compelled an 80 per cent increase in the head office staff and it is now the largest agency office west of Toronto. The firm is retained by a larger group of western business men and industries than any comparable organization.

Set Up Branch

The company specializes in industrial, food and travel accounts. "The reason behind our immediate expansion program," stated Mr. Lovick, "is the necessity of taking care of the advertising needs of western manufacturers, who are expanding their activities in central and eastern Canada. We also want to make available facilities for those national firms that require complete and proper interpretation throughout the country."

Coincident with the expansion program is the inclusion of Ewart G. Macpherson of Winnipeg as a partner of the firm. Early in January the business is to be conducted under the name of Stewart-Lovick and Macpherson Limited.

Mr. Lovick will continue to be in charge of the Vancouver office, as well as being managing director of the expanded company.

Mr. Don Rand, who recently underwent an appendicitis operation at the local hospital, has returned home.

Friday's meeting, the first after the holidays, suffered competition from the snow, Teen Town and High School skating party. In fact, the Scoutmasters themselves nearly missed the meeting on account of sliding all over Peach Orchard hill in their cars.

Four badges were presented, Tenderfoot to Jack Smith; swimmers (earned last summer) to Graham Munn and Gerry Adams, and safetyman's to our badge collector, Hugh McLarty. Hugh was then asked to explain to the troop what all his 18 proficiency badges stood for.

Activities consisted of basketball and a discussion and demonstration of first aid. Treatment for scalds and burns, nosebleed and artificial respiration for those rescued from the water, were dealt with.

NOTICES: Next meeting, Friday, Jan. 17, in the school gym. Bring a recruit and earn 10 points for your patrol. Duty patrol, Eagles.

Miss Freda Heunichen, matron of the Summerland hospital, returned on Dec. 30 from William's Lake, where she was a guest at the home of her brother and sister-in-law, Mr. and Mrs. H. Heunichen.

Sicily History Is Subject At Board Session

Dr. Maurice F. Welsh, director of research into "little cherry" virus at the experimental station here, talked to the Summerland Board of Trade for a short time on Thursday evening on the subject of Sicily, which island he visited while a member of the Canadian Corps of Signals.

It was in November, 1943, that Dr. Welsh was dropped off in Sicily while waiting for equipment and supplies, to continue into Italy, and for nearly two months he and his companions frequented the eastern coast, which was one of the most renowned tourist spots in Europe prior to 1939.

Sicily is a sultry, temperamental, slow-moving, rambling country he declared, with squalid towns, offset by a colorful countryside, with relics of past glory and overall the over-shadowing influence of Mount Etna under a blazing sun.

He compared this eastern coast with the inland country over which the 1st Canadian Division fought, stating that inland it is dry, sparsely settled and the natives were hostile to the invaders.

Briefly, Dr. Welsh sketched the past history of Sicily, which has been one of successive invasions and new conquerors reigning for short periods. Sicily, he reminded his audience, is the Land of the Lotus Eaters, and when he arrived there citrus fruit was at its height, a great treat after the scarcity of England.

Of the political aspect, he declared that in 1943 there were three parties, Fascist, Democratic and Communist, each one wishing to separate Sicily from Italian control. But, as one instance of political faith, he found that the leader of the Democratic party was originally from northern Italy and was anxiously awaiting the day when he could return there and leave Sicily forever.

The speaker was introduced by Dr. H. R. McLarty and was thanked by N. O. Solly.

Trade Board Backs Railway

On a split vote of 32-18, the Summerland Board of Trade on Thursday evening, Jan. 9, approved the resolution of the Summerland Retail Merchants' association, in approving the application of the Canadian Pacific Railway to the Public Utilities Commission, with certain reservations.

This CPR application requests permission to operate a freight run from Penticton to Summerland and West Summerland, and vice versa, for the main purpose of delivering package freight which could be landed in Penticton daily on the passenger train run.

The resolution endorsing the application added the rider that the pickup and delivery service in Summerland should be handled by a local cartage firm, otherwise the approval would not be forthcoming.

Announcement...

Commencing Jan. 15, 1947, the Dental Office of **Dr. L. A. DAY** will be closed on WEDNESDAYS and open the rest of the week from 9 A.M. TO 12 NOON, AND 1.30 TO 5 P.M.

Furthermore, in order to take care of emergencies more efficiently (toothaches and denture adjustments) no appointments will be made in the afternoon until 2 p.m.

Those patients with emergencies are advised to contact the office in the morning and make arrangements for attention between 1.30 and 2 p.m.

This procedure has become necessary due to emergencies taking the time of those patients who have been waiting weeks for their appointments and it is considered above plan will be more satisfactory to all concerned.

In this regard, those patients who already have appointments at 1.30 p.m., will please keep them unless notified of change.

APPOINTED TO COMMITTEE PACKERS' UNION

Dr. J. B. Munro, deputy minister of agriculture, has been appointed to the committee of the Canadian Federation of Agriculture as British Columbia's representative.

INSPECTION OF ROADS

Hon. E. C. Carson, minister of public works, will make an inspection of highway and bridge conditions between Victoria and Jordan River this week, he has announced.

(Continued from Page One) Agriculture re: compulsory marketing legislation covering the products of this Valley. That this convention go on record supporting a national labor code.

That all of our unions within our Federation give full co-operation to T.L.C. and A.F. of L. affiliates. That a resolution be forwarded to the Trades and Labor Congress of Canada recommending the setting up of a T.L.C. Federation of Labor in British Columbia.

That this convention go on record as giving full co-operation to the B.C.F.G.A.

Appointment Committees

The convention was opened by W. J. Baker, Summerland, president of the Penticton Local, United Brotherhood of Carpenters and Joiners of America (A.F. of L.), who is also the Okanagan Valley representative of U.B.C.J.A. and executive member of B.C. Provincial Council of Carpenters.

With the opening of the afternoon session, I. J. Newman, representing the B.C.F.G.A. executive, presented the sentiments of his organization. "In representing 3,500 growers who are also workers in one job or another, may I say that I hope the deliberations of this convention enable all of us to go forward to a prosperous 1947 and a better understanding of our mutual problems," Mr. Newman declared.

"A large majority are apt to regard the present tug of war between labor and industry with indifference. We of the B.C.F.G.A. did too, until we were jerked out of our complacent mood by the lumber strike, making us drop the idea that we are merely bystanders."

He stated, "the pathway to success lies not in restricted production but in high production by labor and management."

No Obstacles. "In the Okanagan Federated Shippers there are 17 houses in which the union is the certified bargaining agent and 35 in which the Fruit and Vegetable Union's agreement is adhered to regarding wages," L. R. Stephens, secretary of the Okanagan Federated Shippers Association, declared.

"We are pleased to learn of your affiliation with the T.L.C. I think I can assure you that the Federated Shippers shall place no obstacle in your advancement."

"We may not always see eye to eye but it would be a sorry world if we did. Progress is based on the difference of opinion."

THE SUMMERLAND REVIEW

opinion." Mr. Stephens pointed out that "the honeymoon is over and that the boom years of the war are behind. It is time to get together, and work as a single team."

The question of labor-management was outlined to the assembly by representative W. H. Sands. He pointed out that only through teamwork—apart from any union business—can labor and management forge ahead to a complete understanding. Only when representatives from labor and management learn to know each other's problems and work for one another, can harmony be reached.

The dispute between the various unions in the Valley was brought to the front. It was claimed generally that the C.I.O. was too radical, domineering and antagonistic for this industry, he said. "Killing the goose that laid the golden egg is going to get us nothing. We must have full co-operation between employee and employer if this industry is to carry on. Peaceful negotiations, not ultimatums are to bring about our aims."

CHLORINATION IS COUNCIL SUBJECT. Two types of chlorinating equipment, valued at \$1,369 and \$3,207.50 are available to the municipality, the council was informed Monday in a communication from Shanahans Ltd. The latter figure, however, would save a considerable sum in daily operating cost, this firm stated. The council agreed that the subject should be left until an agent from the coast firm would have an opportunity to visit here and discuss the problem.

On a unanimous vote, Dr. T. F. Parmley was chosen last week as chairman of Penticton School District No. 15, when the newly-elected trustees met for the first time in 1947.

Only two new members were chosen by the ratopayers this year, Mrs. A. W. Vanderburgh of Summerland and Harley Palmer, Kelowna, representing the rural districts, being those trustees and they received a resume of their duties and responsibilities.

Trustee P. G. Dodwell was named chairman of the Summerland building committee, with H. A. LeRoy, Penticton, assisting, while Mr. LeRoy has charge of the Penticton and rural building committee, assisted by Mr. Palmer, and W. W. Riddell, Penticton.

Mr. Riddell was again placed in charge of the finance committee with Mr. Dodwell and Mr. Palmer assisting.

Mr. Dodwell also heads the appointment committee, with Mr. Riddell, and the salary-grievance committee consists of Mr. Riddell, chairman, Mr. Dodwell and Mr. Palmer.

ENGAGEMENTS

Mr. and Mrs. Fred Schmidt, of Summerland, wish to announce the engagement of their eldest daughter, Yvonne (Ione) to Lawrence N. Charles, youngest son of Mr. and Mrs. Verne Charles, Summerland. 2-1-c

SINGERS AND PLAYERS — Choral group, starting up again next Tuesday evening, Jan. 21, in high school, at 8 p.m.

The Mail Bag Editor, The Review: We, a group of Teen-Agers, are writing this letter in the interests of the future Summerland Citizens. We have been the object of severe criticism concerning Juvenile Delinquency. Is this our fault? We have tried to organize a club but have had little success to date. This we feel is due to the lack of co-operation from the adults of Summerland. Our Teen-Town was formed some time ago but owing to unfortunate circumstances this has not been a success. It is not fair to expect one advisor to take all the responsibility as is the case. The Penticton Teen-Towners have received the fullest support of their citizens. Have the people of Summerland lost their fine community spirit? We know otherwise, so why not back our Teen-Town? A Group of Hopeful Teeners.

WEATHER HALTS HOOP CONTESTS

Due to the extreme cold weather, the basketball games between Kelowna and Summerland, planned for Tuesday evening in the local school gym, were postponed one week.

If the weather moderates, Kelowna seniors and intermediate B's will play here next Tuesday, the local hoop club expects.

On Monday evening, two of the four juvenile teams which are learning the game in Penticton, visited the local school gym to compete against the juvenile squads sponsored locally by the AOTS.

These youngsters put on a spirited display, with Penticton taking the first game by a 10-4 count, and Summerland walking off with the next contest, 23-9. The other two Penticton teams will travel to Summerland for similar exhibition contests on Monday, Jan. 27, it is announced.

PASS ACCOUNTS

Accounts totalling \$17,209.66 were passed for payment at the first council meeting on Monday afternoon.

CORPORATION OF SUMMERLAND

Pound Notice

PUBLIC NOTICE is hereby given that the following animals have been impounded in the Municipal Pound at Prairie Valley, B.C., and same will be sold on Saturday, Jan. 18, 1947, at 1 o'clock p.m., at said Pound if the fees, fines, charges, costs and damages are not sooner paid.

Description of Animals

- 1 brown mare, white face, brand G.
1 dark bay mare, white face.
1 bay gelding, white face and white hind legs.
1 light sorrel, white face.
1 black gelding, white spot on forehead.
1 white gelding, disfigured right front foot.

Dr. T. F. PARMLEY HEADS TRUSTEES On a unanimous vote, Dr. T. F. Parmley was chosen last week as chairman of Penticton School District No. 15, when the newly-elected trustees met for the first time in 1947. Only two new members were chosen by the ratopayers this year, Mrs. A. W. Vanderburgh of Summerland and Harley Palmer, Kelowna, representing the rural districts, being those trustees and they received a resume of their duties and responsibilities. Trustee P. G. Dodwell was named chairman of the Summerland building committee, with H. A. LeRoy, Penticton, assisting, while Mr. LeRoy has charge of the Penticton and rural building committee, assisted by Mr. Palmer, and W. W. Riddell, Penticton. Mr. Riddell was again placed in charge of the finance committee with Mr. Dodwell and Mr. Palmer assisting. Mr. Dodwell also heads the appointment committee, with Mr. Riddell, and the salary-grievance committee consists of Mr. Riddell, chairman, Mr. Dodwell and Mr. Palmer. Mrs. R. B. White, veteran Penticton trustee, heads the library, health and cafeteria committee, assisted by Mrs. Vanderburgh. These two lady members will also be asked to assist other committees from time to time. Last week approval was given for the signing of the new salary agreement between the school board and the members of the teaching staff.

Processing Industry Has Taken Equivalent Of One Million Boxes

An equivalent of one million packed boxes of apples will have been processed by the grower-owned company, B.C. Fruit Processors Ltd., when the first year of operation is concluded, W. M. Vance, Kelowna, general manager of the company, revealed to the 58th annual B.C.F.G.A. convention in Kelowna on Wednesday morning. Already total sales have amounted to \$815,768, and a healthy demand for all products has resulted. This production amounts to some 12 per cent of the total apple production in the interior, and consists of 15,826 tons of processing apples and 1,004 tons of other grades. Growers expressed some amazement at the vastness of this enterprise which they instituted a year ago when they agreed to take over existing plants in the Okanagan.

Various Products
Giving production figures to date, Mr. Vance announced that 320,198 cartons of apple juice had been processed along with 65,000 gallons of vinegar, 9,000 gallons of apple juice concentrate, 823,025 pounds of dehydrated apples and 140,000 pounds of dried apple chips. There are still some 3,000 tons of apples to process which will produce dehydrated apples, apple juice and concentrate.

Some idea of expenditures was revealed when Mr. Vance declared nearly a quarter million dollars had gone into the purchase of cans and \$134,343 had been expended in wages. Other major items brought the total costs for the principal portion of the operation to nearly \$500,000.

Mr. Vance also stated that if his plants had been in better shape at the right time, there would have been no need to dump 2,200 tons of apples this year. In the coming season, all such processing apples will be taken care of, he believed.

One large carload of dehydrated apples was shipped to England and the rest sold to western Canada points.

Apple Juice Popular
"Apple juice has enjoyed a good reception, over 250,000 cartons having moved to western Canada markets. Orders on hand are sufficient to take care of more than our present stock. Recently, competition from imported juices at lower prices than our apple juice, have had a slowing-down effect on sales, but we do not expect any ill effects from such competition this season."

"Much thought and considerable experimental work have been devoted to the development of products which are not presently being processed here. We do not deem it advisable that we enter into competition with established canneries. It is part of our job to develop new products which will enable us to make profitable use of a substantial tonnage, particularly of stone fruit which is unsuitable for the fresh fruit trade."

President's Report
Mr. Vance was preceded by A. G. DesBrisay, Penticton, president of Processors Ltd., who reviewed the steps which led up

Broiler Plant Industry Assured For District

Establishment in West Summerland of a broiler plant, which will be enlarged with a chicken hatchery and egg-grading station, was assured on Friday when G. W. Jaggard, of Calgary, reached an agreement with members of the municipal council.

Last week, Mr. Jaggard's application to establish his broiler factory in the T. B. Young building behind the Bank of Montreal, was turned down by the council, who considered it might prove a nuisance in the hot weather.

Mr. Jaggard is now making arrangements to purchase four to five acres of municipal property on the Kelowna road, north of Jack Wood's orchard. He will proceed with the erection of a building there and expects that it will be in readiness by the end of March.

Temporary Quarters
In the meantime, the council has granted him permission to occupy the T. B. Young barn until March 31, in order that he can commence operations.

Mr. Jaggard told The Review he expected 1,000 birds to arrive yesterday to start operations. Machinery, which is being constructed in Penticton, commenced arriving last week-end.

This former Calgary man has one contract to supply 4,000 broilers monthly to Kelowna firms and expects that further contracts now pending, will soon increase this number to 7,000 birds a month.

If present plans mature, Mr. Jaggard expects to import 4,000 laying pullets to his farm next winter and has been given assurance by B.C. department of agriculture officials that he will be granted a licence to operate an egg-grading station.

His plan is to encourage local persons to start raising one hundred to two hundred pullets each as a commercial egg business. At the present time, he points out, eggs go to the coast to be graded and are then placed in cold storage. Eventually, they come back as cold storage eggs to the local stores.

Fresh Eggs
Mr. Jaggard also points out that the establishment of a pullet farm and egg-grading station here will mean that fresh eggs can be provided Okanagan stores throughout the year at a lower cost than storage eggs are now

The VICTORIA B.C. Summerland Review

Vol. 2, No. 3.

West Summerland, B.C., Thursday, January 24, 1947

TWO OKANAGAN TOWNS TO GAIN BANKING SERVICE

As a further enlargement to service provided throughout the Okanagan, the Bank of Montreal is announcing this week that sub-agencies are being opened in Peachland and Westbank. These offices will be open two days each week, on Tuesdays and Fridays.

Growth of these communities in the past few months, has brought about the need for an improvement in banking service and the Bank of Montreal is taking the lead in providing Westbank and Peachland with such a service, officials point out.

These will be two-men sub-agencies, with all banking facilities and will be serviced twice weekly from the Kelowna office.

Heavy Year Just Past Is Hayden Report

"This has been the heaviest year in the history of the B.C.F.G.A. in respect of the number, variety and importance of the issues involved," Charlie Hayden, growers' secretary, declared in submitting a voluminous report on 1946 operations to the annual convention in Kelowna on Tuesday.

"The indications are that there will be no slackening in this pressure, which is a good thing for the organization, as it keeps members and those whom they elect to administer their affairs, on their toes," he continued.

In the past year, eight formal executive meetings were held and President J. R. J. Stirling, Kelowna, has visited every section except Creston.

By keeping close contact with the B.C. Federation of Agriculture and its Canadian parent, the growers were able to obtain a number of ton trucks and 3-ton trucks from War Assets Corp. "It is possible that more trucks will be allotted B.C. primary producers in 1947," he prophesied.

Draft Marketing Act
Dealing with marketing legislation, Mr. Hayden declared that a submission, prepared by the Canadian Federation of Agriculture, will be submitted shortly to the Dominion Cabinet at Ottawa, on the single subject of a Dominion Natural Products Marketing Act.

Draft of this act was prepared by a committee of the B.C. Federation of Agriculture, with G. A. Barrat, B.C. Fruit Board chairman, as head of this committee. Others who have kept the matter of Dominion legislation alive this year are President J. R. J. Stirling, Past President A. G. DesBrisay, A. K. Loyd and P. E. French, president of the B.C. federation.

Mr. Hayden reported that he had been in communication with Prof. A. E. Sarrall, head of the agricultural engineering department of Michigan State College, East Lansing, regarding frost prevention equipment, which will be tested this spring.

Possibility that test flights for spraying and dusting will be made from airplanes this spring was reported by the secretary.

Erosion at Summerland has caused the B.C.F.G.A. to commence gathering information against the time when a soil conservation act may become necessary.

Over 3,500 Members
"Your association now has more than 3,500 members," Mr. Hayden summed up. "Some of these are new growers and every effort has been made to assist them in respect of cultural practices and also to inform them regarding marketing methods on which their economic welfare depends."

"In this work, B.C. Tree Fruits Ltd. has taken and will continue to take a leading and influential part."

Summerland Chiefs Lose To Kelowna

Playing a preliminary to the Harlem Globe Trotters' exhibition at Kelowna last Saturday night, Summerland Chiefs lost a 25-13 decision to Kelowna Vandals, intermediate "B" division.

Outscored in each quarter, the Vandals held a 12-7 lead at the half-way mark and took a decided edge in the third canto, thus enabling them to coast home in the final ten minutes.

Summerland Chiefs: Moore 7, Neabitt, Guidi, Stein, Dunham 2, Jacobs 2, Miller 2—13.

Kelowna Vandals: Gray 10, Hampton, Thompson, Burke 4, Clower, Haworth 2, M. Nair, McCarthy 3, Wade 4, Giordano 2—25.

Production Department Mooted by Summerland Delegates Is Feature of Convention Debate

Production Manager to Organize and Administer Department Under Tree Fruits Ltd. Agreed Upon by Convention. — Original Summerland Motion to Place Production Department Under B.C.F.G.A. Voted Down First Day. — Revised Setup Meets With Overwhelming Approval.

Powered by the Summerland bloc of delegates, who let no opportunity slip by to plug for their contention, the 58th annual convention of the British Columbia Fruit Growers' Association meeting in Kelowna, on Wednesday morning, voted without a negative hand, to instruct the industry, through B.C. Tree Fruits Ltd. to set up a department of production, with a production manager, which would work towards producing better quality fruit and prevent a breakdown between the orchard and the consumer. Without a doubt, this was the most important piece of legislation which came before the convention up to noon on Wednesday and it is unlikely it will be overshadowed for the rest of the two-day session.

In its original form, the Summerland growers asked that such a production department be set up under the BCFGA but obtained little support and thus lost the resolution. However, the germ of the idea was imbedded in the minds of the delegates at large and as the convention progressed it was plain that more and more growers were seeing the possibilities contained therein.

In its final form, this resolution, which was moved by C. C. Sworder and D. Corbhisley, Penticton, suggested that the burden of the production end is becoming a heavy load for the sales staff, so that the convention "should recommend to the Board of Governors and management of B.C. Tree Fruits Ltd., the advisability of the appointment of a production manager to organize and administer a department of this nature."

Powell Sponsorship
Chief proponent of this plan proved to be Reeve W. R. Powell of Summerland, a governor of Tree Fruits.

"As a governor, it has been a regret to me that a major weakness of the whole fruit scheme is that the central sales agency cannot determine what type of product it wishes to sell," explained Mr. Powell.

He stressed the necessity of establishing some form of production department within the framework of Tree Fruits setup. He termed this department the "missing link" of the central sales setup.

Mr. Powell did not consider this to be an insuperable task for any one person and pointed to the vastness of the undertaking which was organized by A. K. Loyd, Dave McNair and the rest of the staff of Tree Fruits.

Fundamental Weakness
"It has always appeared to me a fundamental weakness of our system that we haven't anybody (Continued on Page 8)

Skeet Club Is Organized By Trap Shooters

Formation of the West Summerland Skeet club was undertaken on Sunday evening at the Nelson brothers' home, 18 interested members of the trap-shooting group being present.

Dr. Lloyd A. Day was chosen president of this new club, with W. Nelson as vice-president, and G. A. Lalaw, secretary-treasurer. An executive consisting of Sandy Munna, Tom Nelson, C. H. Elsey and Dewey Sanborn, was also selected.

This club plans to move the trap-shooting equipment to another location this year, the site to be selected later. A proper skeet shooting trap will also be purchased. Shoots will be commenced in the early spring, probably in March.

Twenty-five charter members of the newly-formed Skeet club will form a permanent basis for the organization. Those members, who have been participating in shoots this past year, have agreed to donate \$15 each towards organization expenses.

New members will also be asked to join the club at a nominal yearly fee.

Bill Nelson, one of the pioneers in trap-shooting in this community was given an honorary life membership in the new club.

GRANTS PERMISSION

Permission of the municipal council was granted on Monday to the Penticton Funeral chapel to exhume a body in the local cemetery.

Marketing Bill Likely To Come Before Ottawa

"I am optimistic that you will be taken care of," declared Hon. Frank Putman, Minister of Agriculture, in talking to the 58th annual BCFGA convention in Kelowna on Wednesday morning about the important topic of enabling marketing legislation.

Mr. Putman had discussed this subject with Hon. J. G. Gardiner, dominion agriculture minister, and he had been assured that if at all possible such enabling legislation will be introduced into the next session of parliament.

Mr. Gardiner is hopeful that this legislation will be ready for this session and if it is not, then the Emergency Powers Act will be maintained until it is."

This statement came as a lightening feature of the convention to growers who wished to make certain that the marketing legislation which enables the central sales agency to continue functioning will be maintained.

Mr. Putman also discussed briefly the Prairie Farm Rehabilitation Act which is now being extended to B.C. He declared that when financial arrangements between the Dominion and the provinces are concluded, probably about March 31, then further developments to the agreement will be made.

He expressed his gratification that the growers were banding every effort to obtain better quality but considered that part of the difficulty has been caused by such large crops which have developed in the past few years.

He stressed that growers should thin out their trees and also prune out the larger branches, to work for eighty per cent fancy and twenty per cent cee grade.

Further use of sprinkling systems in orchards was advocated by the minister who was a pioneer of sprinklers in his area in the Kootenay. Half as much water issued by this type of irrigating and is a cheaper method, he maintained.

Touching briefly on farm labor, he urged growers to provide better accommodation for their help. All other industries have to provide better accommodation for their workers and the fruit growing industry must fall in line.

J. W. Burns To Be Speaker For Credit Union

On Friday evening, Jan. 31, the Summerland and District Credit Union will hold its third annual meeting and social in the I.O.O.F. hall, featuring J. W. Burns, managing director of the B.C. Credit Union League, Vancouver, as guest speaker, and a showing of films by Dr. R. C. Palmer, experimental station superintendent.

At the close of the business session, refreshments will be served, followed by a social evening.

Interested persons other than members, are being welcomed to this meeting, the directors indicate.

Members will vote upon important policies of the local Credit Union and elect officers for 1947. A steady growth in membership and savings, plus the construction of the new Credit Union building, have been marked in 1946.

The board of directors expects to recommend a 3 1/2 per cent dividend on savings and a ten per cent rebate on loan interest. It is stated. During 1946, loans have been made totalling \$17,844.

Membership grew from 97 to 142 in the 12 months.

Mr. Fred Keane will leave tomorrow, Friday, for New York, where he will sail about Feb. 5, for England. Mr. Keane will also visit Ireland before his return to Canada.

Producers Intend To Improve Pack

B.C. fruit growers, meeting for their 58th annual convention at the Scout hall in Kelowna this week have been dealing with a multitude of resolutions, hearing officers of their immense industry give detailed reports of their stewardship and listening with interest to governmental officials and others who are related to fruit production and distribution.

Throughout the convention, which is in its third day today, has had one paramount keynote—the intention of the grower to produce better quality fruit and to find ways and means of bringing about this condition.

On Tuesday, reports and addresses of welcome from President J. R. J. Stirling and Mayor W. B. Hughes-Games occupied most of the morning but the main debates were started without delay first thing Tuesday afternoon.

Head Officers Heard
That afternoon, delegates and visitors heard their Tree Fruits general manager and sales manager report on marketing difficulties and the need for keener interest in production, and then branched into torrid discussions into methods of circumventing the low grade production which has been so apparent in the past year especially.

Once the main subject, that introduced by Summerland, for a department of production, was out of the way, there was little discussion on any subject.

Not once has there been any evidence of the drag-out fights which used to be so typical of growers' gatherings. The heated debates seem to have gone by the board.

Nearly every mover and second-order had their presentations prepared beforehand and thus had their subjects so well in hand that there was little room for argument.

Little Debate
Resolutions mainly went through with not more than four speakers and sometimes only the proposers bothered to discuss the subject.

President Stirling proved an able chairman, keeping all speakers to the subject and maintaining a timed program throughout. It is unlikely that the convention will continue into the fourth day, Friday.

Officials of the Summerland Experimental Station and the Dominion Entomological Dept., Summerland, were prominent speakers and added much valuable advice to the discussions.

Government officials present included Hon. Frank Putman, minister of agriculture; Hon. L. H. Eyres, minister of trade and industry; Hon. E. C. Carson, minister of public works; W. A. C. Bennett, M.L.A. for South Okanagan and Hon. Grote Stirling, M.P. for Yalo.

Last night, the guest speaker at the annual banquet was Dr. Norman MacKenzie, president of the University of B.C.

This morning, Hon. Mr. Carson was the principal speaker, and this afternoon, Dr. L. P. Batjer, U.S. Dept. of Agriculture, speaks on Nutrition Studies.

Crowded Conditions
Accommodation is crowded to the limit in this city, with most of the delegates being housed in the armories. All hotels are

(Continued on Page 8)

EDITORIAL

Okanagan Bottleneck

Motorists, not only of Summerland area but those travelling the Okanagan highway, will be gratified with the announcement emanating from W. A. C. Bennett, M.L.A. for South Okanagan, that the minister of public works has announced that the Trout Creek bridge will be enlarged and replaced with a structure more in fitting with the traffic needs of today.

It is anticipated that this work will commence as soon as the wintry weather has been dissipated, and that will be none too soon.

This bridge has long been looked on as the bottleneck of the Okanagan highway and a definite menace to north- and south-bound traffic. Not only is it too narrow to take two cars abreast with any amount of safety, but it is also located at the exit to the Summerland Experimental Station.

Summerland Board of Trade has been endeavoring for many months to have this bridge replaced, and it must be gratifying to that organization's membership to hear that their many pleas have now been answered.

Coupled with this improvement comes word from Mr. Bennett that he is advocating the resurveying of the Okanagan highway from Peachland south to Penticton. Mr. Bennett takes the stand, and rightly so, that he will not advocate any major change in any small portion of the highway until the entire stretch is resurveyed with the idea that the best possible route will be obtained for a permanent highway program.

This is far-sighted thinking which should have been advocated years ago in planning the province's highway system. Those of us who have lived in the province for any number of years have seen millions of dollars wasted in temporary roadwork to please the whims of isolated sections.

Now, the government has decided it will not proceed on any new works project until the main routes of travel have been placed in the best possible shape. And in order to achieve that objective, a long-term view must be taken. It is not enough to pander to certain communities where it is known that government support will be forthcoming if certain work is undertaken.

The government has at last adopted the attitude that it will work for the greatest good of the greatest number in its highway program and that is a position which should have been taken years ago.

Now that that plan has been achieved and the government seems to intend to stick by its decision, permanent roads of a lasting nature which can be travelled over in comfort, are likely to result.

Summerland A Centre

It was with interest that we listened to Mr. G. W. Jaggard, who is establishing a new industry in Summerland this week, give his reasons why he chose Summerland as his new site of business.

Mr. Jaggard pointed to the direct rail connection with the coast via the Kettle Valley Railway, which is only enjoyed by Summerland and Penticton in the Okanagan. Such a rail route eliminates changing trains and other inconvenience, he pointed out, and provides a speedy service with the main cities of the province.

Then, again, Summerland is situated in about the centre of the Okanagan. It is 65 miles to Vernon and 50 miles to the border. Therefore, an industry which hopes to establish contacts throughout the Okanagan is ideally situated in this community.

Also, this community is situated on the Okanagan highway and is serviced by numerous trucking lines, giving added speed to the hauling of freight and express.

These are essential points which many residents here are prone to overlook but which are evident to newcomers to the district. Many more secondary industries should be attracted to this area in order to provide more year-round employment and take up the slack after the busy packing and picking season has been completed.

Summerland has the location and the facilities to provide service for the entire Okanagan. We will be lax in our duty as citizens if we are not constantly on the lookout to improve the position of the municipality.

The Inside Story

By AGROLOGIST

This is the age of fruit juices. We have all learned that fruits contain minerals and vitamins which are good for our health. Juices provide a pleasant form in which to consume these health promoting constituents. Canadians drink vast quantities of fruit juices every year with the result that these products provide an important marketing outlet for fruit. Accordingly, it is not surprising that the Summerland Fruit Products Laboratory is devoting special attention to fruit juice investigations.

Excellent progress has been made with the result that substantial quantities of the Okanagan apple crop now go to market in the form of juice. However, investigators like F. E. Atkinson and C. C. Strachan are never satisfied. They are now endeavoring to work out cheaper and quicker methods of producing apple juice. The B.C.F.G.A. is keenly interested in this project and has shown this interest by purchasing an expeller-extractor juice machine for use in the experiments. Other items in the experimental juice line include a stainless steel hammer mill, a deaerator, a vacuum pump and a sterilizer. Quite an imposing array!

This equipment shows special promise as a means of "speeding up" the pressing of juice from soft varieties of apples such as McIntosh and Jonathan. This is most fortunate as the peak rush in apple juice factories comes in the McIntosh-Jonathan season.

The new equipment was also used to make experimental batches of various types of juice from apricots and peaches. These products retain the flavor of the ripe fruit to a remarkable degree. It is anticipated that they will prove very suitable for making frozen desserts as well as refreshing drinks.

The Feminine Front

by MURIEL HURRY

Holding a particular interest for discerning women, although it is definitely a book for men, is "Herbie," by Bing Coughlin, a former noted cartoonist for the "Maple Leaf," the Canadian army newspaper overseas. The many humorous cartoons in the book will, if studied from the feminine viewpoint, give an insight which is usually difficult to obtain into the life from which our men have just returned.

The text of the book is by J.D.M., which is the editorial initial tag used by James Douglas MacFarlane, who stated the Maple Leaf in Naples in the spring of 1944.

I have always thought that the articles which advised the women-folk of returning veterans of the great changes and experiences that the soldier underwent while overseas, and that they should be treated as neurotics, and the responsibilities gently eased on to their poor, weak shoulders, were so much bosh. With a very few exceptions, our men are as normal mentally as in 1939. But I have heard many men express the opinion that women need a bit of educating on the subject. It is the women who remained behind, in the same familiar environment, who need to realize that veterans who, prior to the war, were mere country youths, with a provincial outlook on life and the world in general, are now experienced men, who have seen a great deal of the world and of strange customs. Their whole life has a deeper meaning, and in this book, beneath the humor and the pathos, a wise woman will find the key that will open the door to greater understanding of her veteran.

"Herbie" was written and drawn from front-line experience and would make a treasured souvenir for an ex-serviceman, as it is a Canadian book about the Canadian army life overseas.

Although it is only January, the dreariest month of the year, the women's magazines are already featuring the new spring styles.

Skirts are definitely longer this year, following the new Parisian fashion trends, and there is a wide variety of styles to choose from. The low, rounded neckline, which displays the collar bone is a style leader, and draped skirts are also popular.

Blacks and greys are smart, although the best dressed women still choose colors to suit their individual complexions and personalities.

Nail studding is still the rage, and plastic trim is appearing

piece frock is fading out, as is the jumper trend. Clothes are again becoming more formal, and casual styles, except in sport clothes, will soon become passé.

Hats are madder than ever, if possible. Almost any style of hat is acceptable, as long as it is extreme. The feather trim, in any shape or description, will be seen in profusion during the coming season.

Suits are, as usual, fashioned to complement the form of the wearer. There is nothing like a well cut suit to conceal figure faults, and a good suit can be worn anywhere, at any time. Trench coats are still very popular, and most suits are collarless. Straight cut suit skirts are losing in popularity to the more comfortable kick-pleated styles.

Mr. Ed Smith and Mr. Les Rumball returned to Summerland last week from Vancouver, where they attended a meeting of the Public Utilities Commission.

Uniform Maturity For Peach Picking

"All peach growers should pay the closest attention, in picking cannery peaches, to securing uniform maturity; cannery peaches may be picked at maturities ranging from firm to ripe but the full range of maturity should never be found in the same box," declared J. Y. Towgood, Summerland, in submitting the annual report for the cannery peach grades to the B.C.F.G.A. annual convention in Kelowna, on Tuesday.

Under a co-operative agreement between the government inspection branch and B.C. Tree Fruits Ltd. the committee agreed to certain regulations for 1946, as follows:

"Orchard run quality" means fruit coming within the standards for No. 1 and 2 grades. Minimum size, Golden Jubilee, 2 3/16 inches; other varieties, commercial, 2 5/16 inches; small, 2 1/8 inches.

Maturity: firm, firm ripe and ripe.

DOMESTIC WATER

An application from the Summerland Hospital Society for a separate domestic water connection for the new nurses' home building, was granted by the council recently.

Mr. and Mrs. Len Hill returned on Friday from a visit to Vancouver.

The Fruit Growers of the Okanagan

(SUMMERLAND COMPANY)

Production of the play, "The Importance of Being Earnest," at the Ellison hall last Thursday, with a cast from the Everyman Theatre, was of particular interest to this district in that this Oscar Wilde production was portrayed to a Summerland audience nearly 36 years ago by "The Fruitgrowers of the Okanagan" (Summerland Company).

On June 22, 1911, this company of Okanagan orchardists-turned-artists, under the direction of William Sauter, produced this play at the Empire hall on Coronation Day in aid of the Summerland hospital.

Mr. Sauter took the part of John Worthing, Oliver, Villiers was Algernon Moncrieff, R. H. Helmer played Rev. Canon Chasuble, H. Jervoise Collas was Merriman, R. M. Knox acted as Lane, Mrs. C. Fetherstonhaugh was Lady Bracknell, Miss Evelyn Higgin was Hon. Gwendoline Fairfax, Miss Mary Sutherland was Cecily Cardew, and Mrs. E. B. May acted as Miss Prism.

The play was produced by William Sauter, O. Villiers was assistant stage manager, scenery was painted by G. M. Atkinson and built by George Raincock, and the orchestra was under the direction of Powell Jones.

But the important part of this whole subject is the address which Mr. Sauter gave on the back page of his program, explaining his ideas regarding the fruit growers of the Okanagan.

His idea was that the fruit growers would tend their ranches in the summer and be actors in the winter. We quote: "Not such a bad combination when you come to think it out; in fact, after due consideration, a very excellent idea and one that should arouse a good deal of interest in amateur theatrical circles for, of course, it must be from amateur dramatic clubs that the company will be recruited.

"We all know that during the late autumn and through the winter, the fruit grower has more leisure than he knows what to do with. Why should not these months be employed pleasantly and profitably? And how could they be more pleasantly employed than by making a three-months' tour through the eastern provinces with a small company of players in a first-class play?

"It is with the object of forming such a company that Mr. William Sauter is staging a number of performances in the Okanagan Valley, in which competition all who are interested in dramatic art are invited to take part.

"One company is already rehearsing in Summerland. Other companies will be formed in Vernon, Kelowna, Penticton and Naramata. The most suitable members, who are desirous of going on tour, will then be chosen for the trip eastward.

"Exhibits of fruit trees from the Okanagan will be taken on tour and shown at the theatres and the most important stores, and a lecture with moving pictures, illustrative of the methods of fruit growing in the valley will be given on certain afternoons at different theatres. Not a bad method of letting people know something about our valley!

"To us, who have settled down to this life of fruit growing there may not appear anything very exciting about it, but to our distant neighbors of the cities, motion pictures of the Okanagan, with its beautiful scenery, its fruit trees and systems of cultivation and irrigation would certainly prove of interest and would doubtless attract the attention of many to this prosperous valley.

P.S.—Evidently the fruit growers became more interested in producing fruit than plays, as no local historian can give us any details of such a company, moving eastward.

Tourist Cabins For Trout Creek Point

Mr. J. H. N. Dutton, formerly of Drumheller, Alta., has announced the purchase of the Hansen property on Trout Creek Point, directly south of Powell Beach.

This flat land will be utilized as a summer resort, and he plans to erect small cabins for rental purposes as soon as building materials can be obtained.

The trees which are on the property will be left, but a considerable amount of underbrushing will be undertaken to improve the property, states Mr. Dutton.

Seriousness Of "Little Cherry" Virus Is Stressed

"Today, with the help of my colleagues, I propose to discuss with you a serious virus disease of cherry whose presence has not yet been established in the Okanagan but which has already caused irreparable injury to the sweet cherry industry in the Kootenays," stated Dr. H. R. McLarty this morning to the 58th annual convention of the B.C.F.G.A., at Kelowna. As you probably all know, the subject of our discussion is "Little Cherry."

In order that we may have the pertinent facts in mind, I shall review some of the outstanding characteristics of a virus disease in a fruit tree.

Some Characteristics of a Virus Disease

1. A virus disease, such as Little Cherry, is brought about by the infection of the tree with a specific virus.

2. There are many hundreds of different viruses, on stone fruits alone, already some 38 have been reported and the number is increasing rapidly as investigations continue.

3. Each specific virus produces in the infected tree a set of symptoms that is characteristic for that virus.

4. The host range, i.e., the number of different kinds of plants that a specific virus will attack, varies widely with different viruses.

5. The nature of a virus has not yet been fully established. None of the viruses affecting tree fruits have ever been isolated; that is, the virus as such has never been taken out of an infected tree, and even with the most powerful of microscopes, the presence of a virus in a tree fruit cannot be detected. However, some viruses affecting other kinds of plants, such as tobacco and potato, can be seen with the new ultra microscope and moreover, some of them have been isolated from the affected plants. It may be assumed, therefore, that a tree fruit virus is made up of extremely minute particles that inhabit the living cells of the affected plants.

6. The origin of viruses is unknown. Theoretically, it is supposed that a first particle for each virus arose as an "accident" in the metabolic processes of the host plant.

7. In a susceptible plant each virus particle has the ability to induce the formation of other

similar particles and this development continues until the whole living parts of the plant are infested with them.

8. So far as is known, tree fruit viruses can "live," that is, retain their properties, only so long as they are in contact with the living tissues of susceptible plants. As soon as an infected tree dies, the virus in it also disintegrates. Thus these viruses do not live in the soil, or in the air or in irrigation water, etc.

9. There is one possible exception to the above mentioned characteristics. The virus remains alive or active in the body of the vector during the time this vector is travelling from an infected, to a non-infected plant.

10. The natural vectors of the tree fruit viruses, so far as is known, are insects. For each virus there is normally a specific insect that is capable of transmitting it. Not all the species of insects that feed on a plant are capable of transmitting the virus with which it is affected. None of the insect vectors are known for the virus affecting tree fruits in British Columbia.

11. A final and important characteristic to remember is that once a tree is infected with a virus, there is no known way of ever destroying the virus in that tree except to destroy the tree itself. In other words, there is no cure for a virus in an affected plant.

Gives Evidence

Mr. T. B. Lott then gave evidence that Little Cherry is a virus disease, declaring that W. J. Foster was first able to carry out the standard test for a virus disease in 1940.

He collected buds from trees affected with Little Cherry and budded them into three healthy Lambert trees. The following year he found definite evidence that the living tissue in which the invisible virus was known to be present had spread the disease.

Repeating Mr. Foster's experiment on a larger scale in the Kootenay Bay orchard, where there was no suspicion of Little Cherry. By the second year, of 24 trees budded, sixteen showed definite Little Cherry, three were suspicious, one had normal fruit and four had no crop.

The next year, twenty untreated trees had become diseased and only four untreated trees continued to produce normal fruit. The next speaker, Dr. Maurice F. Welsh, stressed the terrifying speeds which distinguish Little Cherry from other virus diseases known. Its first appearance was in 1933, in Willow Point, near Nelson, in a single orchard.

"Last year, it was in all the principal cherry-growing districts of the Kootenays south to Creston and Erickson, north to Kaslo and New Denver, and westward along the Arrow lakes. There is a strong indication that it has spread across the border south of Rossland.

"This spread has held in contempt such natural barriers as mountains and lakes and has included jumps across distances as much as 30 to 40 miles long, in which no cherries are grown."

At this point, Dr. Welsh produced slides to indicate descriptions and symptoms of Little Cherry virus.

He pointed out that not all small cherries are suffering from this virus as some trees producing such fruit have been uncovered in the Oliver-Osoyoos district and these are not caused by the virus.

Not In Soil

"We know of no cause where a virus disease has been cured by soil treatment or soil applications . . . and similarly a virus is not the sort of thing one can get at directly with sprays.

"We can visualize only three possible means of control . . . to get at the agent which transmits the disease; to eliminate all trees know already to be diseased, and to find resistant varieties of cherries.

"Our researches are bent in this direction but all such work must be slow. It is highly probable the disease will reach the Okanagan before we have found a solution. That is why we are making so much fuss about the Little Cherry over here."

At this point, Dr. James Marshall, Summerland, government entomologist, described the search his branch of research is making for insect vectors, and the probable role of insects in the spread of Little Cherry.

Recommended Measures

In conclusion, Dr. McLarty gave the recommended measures for control in the Okanagan.

Firstly, he considered the presence or absence of Little Cherry in the valley should be determined definitely and this can be done only by a tree-to-tree survey over the whole area in 1947.

"Any suspected trees should be re-checked immediately by qualified officials and trees whose suspicious symptoms are verified in the second inspection, should be marked for removal immediately."

He advocated continuing this survey and removal scheme as long as results appear to warrant it and urged the industry to establish authority for removal of the marked trees.

In the Kootenay, he recommended that planting of cherry trees be discontinued until effective

Boon to Bachelors

A miniature loom so tiny that it will fit into a man's vest pocket has been designed by Edgar Chesstok of Manchester, Eng., as an aid to all (particularly bachelors) who have to perform the tiresome but necessary job of darning socks. The gadget will soon be on the market, the British Board of Trade having sanctioned the release of materials needed for its manufacture. Here is a close-up showing how the tiny sock-darner works to produce an effect of close darning. A different shade of wool has been used for the repair to illustrate the process.

tive measures for dealing with the disease can be worked out. He despaired of arresting the spread in that area now as it had gained so much momentum.

Corporal George Barr left Summerland on Friday, for Winnipeg, to rejoin his regiment, the Lord Strathcona's Horse, after a month's furlough.

Drainage and Dyking in the FRASER VALLEY

DRAINAGE and dyking operations and maintenance in the Fraser Valley are both under the supervision and control of the Department of Lands and Forests.

Over 140,000 acres of the most valuable, productive farm lands of the Province are well protected by a system of dykes. These are supervised and maintained through a Commissioner who, together with his staff, works under this Department. All told, there are ninety miles of dykes maintained, and twenty pumping plants—with a capacity of 900,000 gallons per minute—are operated in conjunction.

IMPROVEMENTS TO LIGHTEN THE FARMER'S BURDEN

Only a farmer can appreciate the degree of skill, ingenuity and labor involved in keeping a farm running and producing successfully. Only a farmer can understand the long hours, the thought and the constant care necessary to make a farm operate at a profit.

But, today, modern science is doing much to lighten the farmer's burden and to increase his profits. Functional machinery, time-saving appliances, new methods of stock-breeding and raising, electrical aids to lighten the housewife's duties—all these things are now available to the farmer, to help him make his farm a "go-ahead" concern.

Farmers who wish to take advantage of such improvements will find a ready ally in the Bank of Montreal. The Bank's farm improvement loan plan makes it possible to own all the equipment required to make a farm pay profits.

A visit to the local branch of the Bank B. of M., and a talk with the manager, Mr. Woodford, may prove this low-interest repayment plan meets your particular needs. You will find his sympathetic understanding of your financial problems can help make your burden lighter.

Quick Delivery of Mac Crop to Packing House May Solve Problems...

"Research—the word is on everyone's lips these days, in fact we have all become somewhat 'research conscious,'" declared Dr. R. C. Palmer, experimental station superintendent, Summerland, in addressing the 58th BCFGA convention on Wednesday afternoon on the subject "Research for the fruit industry."

"The B.C. fruit industry is confronted with many problems which are sufficiently difficult to require research for their solution. Growers themselves can do a great deal to solve these problems. In fact, one of the reasons why so many able men are attracted to the fruit industry is the very fact that the growing and marketing of fruit gives ample scope for individual initiative, enterprise and intelligence."

Research Men "Dr. J. C. Wilcox has taken several years of post graduate work in soils and plant nutrition in order to fit himself for the investigation of problems concerning orchard soil management and irrigation. Dr. D. V. Fisher has taken advanced work in plant physiology and chemistry which qualifies him to deal with complex problems concerning the harvesting and storage of fruit. Dr. C. C. Strachan has specialized in research methods developed by food technologists, which explains why he has been able to make such a good job of directing the BCFGA research project concerning the nutritive value of tree fruits grown in this province."

"These men and several others of equal ability, training and experience are at the service of the B.C. fruit industry. One of the more important problems which confront the B.C. fruit industry at the present time is: How to grow heavy yields of high quality McIntosh apples at comparatively low cost without depleting the soil, and how to deliver these apples to consumers in good condition over a long marketing season."

New Terminal Growth "Fortunately, through the efforts of B.C. Tree Fruits Ltd., packing house managers, the extension service of the provincial department of agriculture and the staff of the Summerland Experimental Station, a great deal of information is already available concerning this problem. For example, the Okanagan plant nutrition committee has prepared sound recommendations dealing with fertilizers and methods of orchard soil management. These recommendations are available to every grower. Briefly, they indicate that orchard soil management practices should be designed to promote about 10 inches of new terminal growth on apple trees each year."

"We know that in order to obtain a high percentage of extra fancy grade McIntosh it is essential that the fruit be well exposed to sunlight. With this in view, it is recommended that, in crowded orchards, immediate steps be taken to improve light conditions by a program of pruning and tree removal."

"We know that the stage of maturity at which McIntosh apples are harvested has an important influence on the quality grade and storage life of the fruit. Furthermore, we know that McIntosh can be expected to develop good quality and keep well when they are harvested as soon as the seeds turn brown, and the flesh is white rather than greenish in color."

"We know, also, that in spite of all the information which research has made available, growers cannot be expected to take special measures to grow a high percentage of extra fancy and fancy grade McIntosh when they can make more money by growing a very high yield per acre running heavy to cee grade."

Adjust Differential "Thus, the solution of the cee grade McIntosh problem appears to lie in adjustment of the differential in returns for cee grade and fancy fruit rather than in additional research concerning production and harvesting methods. In fact, what appears to be needed is research into means of persuading growers to make use of the information which is already available."

"With regard to the problem of delivering McIntosh apples to consumers in good condition over a long marketing season there is also a great deal of information already available. Best results are secured when the fruit is moved rapidly from the orchard to packing houses, run over the graders and packed immediately, then put directly into cold storage at 31°F."

ence between what is ideal and what is feasible and practical under large scale commercial conditions.

"McIntosh apples bruise readily when they are permitted to ripen at high temperatures in the orchard or on warehouse floors for several weeks before they are packed. Similarly, they are likely to suffer very severe bruising if they are stored loose in cold storage for months before packing."

Pack Immediately "Thus the practical procedure in handling McIntosh is to haul the fruit to the packing houses as soon as it is picked, grade and pack it without delay, and either ship it direct to market or place it immediately in cold storage."

"If it is necessary to purchase more graders or to operate the graders which we now have on double shifts to achieve these results, this procedure should be followed. If it necessitates additional labor crews, these should be found. If this means construction of additional accommodation, this accommodation should be provided."

"Those who maintain that these procedures are not feasible or practical should bear in mind that it is not practical to offer cee grade McIntosh to British buyers who want extra fancy and fancy fruit. It is not practical to offer American buyers extra fancy and fancy McIntosh in November when they want this fruit in early October. It is not practical to deliver seriously bruised McIntosh in an over-ripe condition on any market at any time."

No Waiting "It is not practical to have long lines of trucks waiting for hours to unload apples at packing houses as was the case this year in Kelowna. This practice is wasteful of time, labor and trucking facilities. It does not require research to solve this problem. It requires common sense and action."

"The solution lies in improvement of packing house facilities so that they can take delivery of the crop as it is harvested. It lies in organized hauling which will ensure delivery of the fruit at the packing house doors in an orderly and intelligent manner."

"In dealing with these problems which are created by the rapidly increasing tonnage of McIntosh running heavy to cee grade, we must bear in mind that this variety has been heavily planted in eastern Canada and in the eastern States during recent years. These young orchards are now coming into bearing. From the age of the trees and the methods of orchard soil management which are adopted in eastern apple districts it is to be expected that the crop will run heavy to extra fancy and fancy grade fruit."

"Eastern growers are learning modern methods of packing and cold storage from the west. Accordingly, we can expect greatly increased competition from eastern growers with respect to the McIntosh variety. We can also expect keen competition from bananas and citrus fruits."

Long Range Policy "Thus, if we are to hold the markets which we now have and develop new ones for our McIntosh apples, it is imperative that we adopt a long range policy designed to supply the kind of fruit buyers want when they want it. While some very large and very small McIntosh and some cee grade can be sold to advantage, the bulk of the demand is for high grade medium-sized McIntosh. The keenest demand is early in the season before Jonathan and Delicious are available. McIntosh shipped later in the season must be delivered in good condition, which means cold storage promptly after harvest."

"There are certain aspects of this problem concerning which our present information is incomplete. For example, we have urgent need of additional information regarding the influence of orchard nutrition on the dates when the McIntosh variety reaches harvesting condition and on the ability of the fruit to withstand commercial handling and storage treatment."

"Our knowledge of the most efficient duct design and the best methods of operating air distribution ducts in cold storage houses is also very inadequate. Research should be undertaken to improve our knowledge concerning these factors, which have a very important bearing on the McIntosh problem."

Solved Other Problems "This McIntosh problem is just one of the many problems of the B.C. fruit industry which can be solved by a combination of initiative, enterprise, research and common sense. Actually B.C. fruit growers have already solved many more difficult problems. In fact, this industry is often held up as a shining example of how agricultural pro-

Merchants Give Kelowna Decided Trouncing 40-17

Playing a hustling, bustling type of basketball, Summerland Merchants marked up a decisive 40-17 victory over the Kelowna Reds at the school gym on Tuesday night. There was never any doubt from the moment that Jackie Walsh twisted the twine for the opening basket, as to the superior team.

Walsh had a big night and swished the pill through the basket for 18 points, while Bob Scriver also had his eye right on the netting for a valuable eight points.

Charles McPherson, new Summerland high school teacher, appeared in a Summerland strip for the first time and looks like a valuable asset to the Merchants' crew once he rounds into shape.

In the prelim., Summerland Chiefs played to a torrid 34-all tie with Kelowna Vandals in an intermediate "B" fixture after five minutes of overtime.

On general floor plays the Chiefs should have taken the contest easily, but poor shooting and some sloppy passing in the third stanza turned the tables.

At the halfway mark, the Chiefs enjoyed an 11-8 margin but soon lost it and twice in the third quarter were eight points behind. With ten minutes to play, they were behind, 23-18, but Jacobs' last-minute counter knotted the count at 30-all.

Both teams scored two field baskets in the overtime play to wind up the game at 34-all.

Ray Moore was high scorer with 11, but his count could easily have been thirty-odd. Gray, with 14, and Burke with 10, were top Kelowna scorers and general floormen.

Summerland Chiefs—Moore 11, Stein, Guidi 2, Cutter 8, Dunham 6, Miller, Nesbitt 4, Jacobs 3—34.

Kelowna Vandals—Wade 4, McNair, Giordano 2, Thompson 4, Gray 14, Howarth, McCarthy, Clower, Burke 10—34.

Summerland Merchants—N. Thompson 4, Clarke 6, Biagioni 2, Scriver 8, J. Thompson 2, Walsh 18, McPherson—40.

Hilton 4, Green 2, Brown 3, Kelowna—Waddell 4, Carr-Chapman 4—17.

Referees: C. J. Bleasdale, Ray Moore, Phil Weddell.

TRY FOR THREE PUCK GAMES HERE

Arrangements are being made for three hockey games next week between the local high school team and Kelowna, Pen-ticton and Oliver high schools. These teams involve players up to 19 years of age.

Junior games are proceeding each Saturday, as long as the ice lasts. Practices on Tuesday afternoon were discontinued due to the thaw which set in.

The Mail Bag

Rest Haven Sanatorium, Sidney, B.C., Dec. 24, 1946.

Editor, The Review: I wish to extend my deepest gratitude to all my neighbors, friends and acquaintances of Summerland, for sending me "Get Well" birthday and Xmas cards during my illness and convalescence here at Rest Haven sanatorium.

Sincerely, MRS. W. M. McCLURE.

ducers should conduct their affairs. "The remarkable progress which has been made by the B.C. fruit industry is due largely to the fact that it has enjoyed effective co-operation between growers, packing house managers, cold storage operators, sales representatives and research men. Let us go forward together with full confidence that we shall build a bigger and better fruit industry."

"The Home of Dependable Merchandise"

Socially Speaking

Social Editor : Muriel Hurry

Mr. and Mrs. T. B. Young left on Friday for Vancouver, where they are visiting for a week at the home of Mr. and Mrs. R. S. Jackson.

Mrs. A. Hargreaves, of Penticton, is visiting this week at the home of Mr and Mrs. J. Darke.

Mrs. F. W. Haskins has been hostess this week at several quilting bees.

Mr. Harvey Walton was a visitor to Princeton on Tuesday, where he attended the L.O.L county meeting

Mrs. O. Dunbar and Miss Beverley Walsh left on Monday for Calgary, where they will visit friends for some time.

Mr. and Mrs. A. F. Towgood, of Oyama, are visiting at the home of their son and daughter-in-law, Mr. and Mrs. J. Y. Towgood.

Mr. Donald Tompson, of Vernon, is a guest at the home of his brother-in-law and sister, Mr. and Mrs. A. Baillie.

Len Mountford left recently for Vancouver, where he is receiving treatment in the Shaughnessy Military hospital.

Mr. and Mrs. Tom Hooker, Mr. Frank Pollock, Mr. Bert Pollock and Mr. Elof Borgstrom were recent business visitors to Seattle.

A son was born to Mr. and Mrs. R. L. Lamb on Friday, Jan. 10, at the Summerland hospital.

A daughter was born at the Summerland hospital on Tuesday, Jan. 14, to Mr. and Mrs. Russel White.

Don Rand and Ed Newton left at the week-end for Vancouver.

Miss J. Malicki, R.N., of the staff of St. Joseph's hospital, Victoria, has returned to the coast following a week's visit at the home of Miss Pauline Pearson.

At the Summerland hospital on Friday, Jan. 17, a son was born to Mr. and Mrs. Lloyd Johnston.

Mrs. George Lewis is a patient in the Summerland hospital, where she is recovering from a serious illness.

Lt. George Marrs, new cadet officer for the Canadian Army, who will be in charge of cadet corps in the Okanagan and Kootenays, visited Summerland on Monday. He was accompanied by Lt. Roy Pellant, who is retiring from the army, having been cadet officer for this section. Lt. Marrs will be located in Vernon.

Mr. J. E. O'Mahony left on Monday evening for Victoria, where he is attending an executive meeting of the B.C. Hospitals Assn., of which he is the new treasurer.

Mr. Norman Holmes has returned from Vancouver, where he was a business visitor last week.

Mrs. F. Beeman arrived in Summerland on Sunday morning from New Westminster, to spend a three weeks' holiday at the home of her mother, Mrs. Fudge.

Mrs. Alma Peterson left on Sunday morning for Vancouver, on a business trip.

CORRECTION IN FIGURES

In the January 9 edition of The Review, the donation of Charlie and John Betuzzi to the Summerland Living Memorial fund was incorrectly given. The figure should have read \$40 as the donation of these two brothers.

Mrs. C. L. Hopkins Passes Away Here

Mrs. Cora Lena Hopkins, a resident of Summerland for the past 22 years, passed away at the Summerland hospital on Saturday, Jan. 18.

Many friends paid their last respects at the services which were held on Tuesday afternoon, Jan. 21, from the Baptist church, with Rev. F. W. Haskins officiating. Interment was in the Peach Orchard cemetery.

The late Mrs. Hopkins, who was born in New Jersey, is survived by her husband, Mr. F. Hopkins, a sister, Mrs. M. Pardee, both of Summerland, and a niece, Mrs. A. Ruggles, of Vancouver.

Pallbearers were Messrs. E. J. Minshall, Alex Smith, E. R. Butler, Jim Green, Gordon Beggs and Jack Woods.

The Mail Box

The Mail Bag, in December, received a letter from Mrs. Fosbery, in answer to a letter submitted by Mrs. Plunkett to this column, on December 7. The editor of The Review considered that Mrs. Fosbery had not added any new feature to the discussion which had ensued on world peace. It was believed that previous arguments had been rehashed. So, Mrs. Fosbery's letter was relegated to that copious receptacle, the editor's wastepaper basket.

This week, Mrs. Fosbery saw fit to have her same letter to Mrs. Plunkett inserted in the advertising columns of the Bulletin. She paid the usual rates for such an advertisement, we are informed.

It should be pointed out, in fairness to The Review, that at no time has Mrs. Fosbery asked to use the advertising columns of this weekly newspaper, whereas the correspondence columns have been open to her on numerous other occasions free of charge.

The advertising columns of The Review are always available to any persons who have a message which they think would be of interest to the citizens of Summerland and the many readers in distant parts who are now subscribing to this newspaper. The Mail Bag is also open for letters which the editor considers of sufficient interest to the readers.—Editor.

The Misses Jean and Joan Vandriessche, both of the nursing staff of the Tranquille sanatorium, Victoria, where she has been a patient for the past several months.

Decontrol Program Details Given By Douglas Abbott

Further steps in the decontrol program were announced on Jan. 11, by Finance Minister Douglas Abbott.

Price controls, effective Monday, Jan. 13, were removed on a long list of items but the minister was definite in stating that controls would remain on all items which had a bearing on the cost of living index.

Rent controls and the eviction regulations will be maintained, and price control remains on most food items, clothing, fuel, household equipment and supplies, household textiles, motor vehicles and bicycles, construction products, agriculture machinery, implements, equipment and supplies containing raw and

processed materials, pulp, paper and paper products, containers and packaging materials.

Controls also remain on certain services such as household laundering, restaurant meals and transportation of goods.

A full list of the items still remaining under price control is published this week as an advertisement in The Review, and citizens are advised to clip these announcements as they appear so that they will know which articles are still subject to control.

Among the regulations removed is that dealing with consumer credit. Barbering, hair-dressing and motion picture admissions are also now free of control.

Fresh fruits and vegetables, with the exception of apples, are now control-free. Also freed are radios, pianos, carpets and linoleum, and thousands of other items.

Dealing with rent and eviction controls, Mr. Abbott says: "No changes are contemplated in the special protection now being contained in the regulations for the tenant of housing accommodation."

In announcing decontrol of this long list of items, Mr. Abbott said:

"At the beginning of 1946," he said, "it was hoped that the year would see a long step toward the removal of emergency controls. Material progress was made in removing and reducing certain subsidies and in suspending less important items from the provisions of price control. Unfortunately, however, external conditions, particularly in the

United States, increased the pressures on Canadian prices and delayed decontrol. Early in July the Government found it necessary to take a number of steps to protect Canadians against the effects of soaring prices in foreign markets. Industrial disputes in the United States and later in Canada, delayed somewhat the expansion in production which would have reduced inflationary pressures.

"It is now a good deal more than a year since the end of hostilities and marked progress has been made in establishing a high level of peacetime activities. Production though hampered by shortages of materials and by the effects of industrial disputes, is now increasing rapidly. While there are still many shortages—some of them severe—competition is increasing and producers are less inclined to assume that the market will readily absorb price

advances. Many countries have been experiencing soaring prices since the end of the war, but price boom may be running its course. There are now signs that this course.

"The outlook for a better balance between supply and demand is, therefore, beginning to brighten. The menace of soaring prices is beginning to recede in some directions.

"Nevertheless, it is only too evident that the time is not yet ripe to remove all price controls. Prices of many basic foods, clothing, certain basic materials, and rentals would increase very substantially if all controls were removed.

"Consequently the list of goods and services which still remain subject to price control, contains most of the basic foods, practically all articles of clothing, boots and shoes, most textile home furnishings, coal and wood

fuels, the major household appliances and heating and plumbing equipment, automobiles, tires and gasoline, rentals, household laundry services, restaurant prices, freight services, storage rates, a variety of basic materials such as steel, copper, rubber, lumber and pulp, and certain other goods which are important in production costs such as farm machinery. The list of items remaining under control affords continued protection to the consumer in the places where the risk and the effects of rising prices are greatest."

GIVE SAME GRANT

A similar grant to that made in 1946, namely \$25, was ordered paid by the Summerland council on Monday to the Canadian National Institute for the Blind.

IMPORTANT GOVERNMENT NOTICE

Respecting Price Control

The Wartime Prices and Trade Regulations (Order in Council P.C. 8528 of November 1, 1941) established basic period maximum prices for goods and designated services. These regulations were passed under the authority of the War Measures Act and continued in force under the National Emergency Transitional Powers Act, 1945.

From time to time these basic maximum prices have been varied or the fixed maximum has been suspended in the case of particular goods and services by Orders issued by the Wartime Prices and Trade Board under the authority of the above Regulations. A few days ago a substantial number of suspensions from price control was announced.

I believe it is desirable therefore that a summary should now be published of those goods and services on which a legal maximum price remains in force under the provisions of the Wartime Prices and Trade Regulations so that all citizens may be given an opportunity to inform themselves of the law.

The complete price control regulations are contained in Wartime Prices and Trade Board Order No. 684 which is available to the public at any office of the Wartime Prices and Trade Board, and to which reference should be made for exact details.

Douglas Abbott
Minister of Finance.

Summary of

GOODS AND SERVICES REMAINING SUBJECT TO MAXIMUM PRICES

Under Wartime Prices and Trade Board Order No. 684

FOODS

- All flours, flour mixes and meals.
- Yeast.
- Bread, bread rolls, biscuits and bakery products.
- Processed cereals, cooked or uncooked, including breakfast cereals, macaroni, vermicelli, spaghetti, noodles and other alimentary paste products.
- Rice.
- Pot and pearl barley.
- Shelled corn, but not including popping corn.
- Dried peas, soya beans, dried beans except lima beans and red kidney beans.
- Baking powder.
- Starch.
- Sugar, sugar cane syrups, corn syrups, grape sugar, glucose.
- Edible molasses.
- Honey.
- Maple products—1946 production.
- Candy, confectionery and caramel.
- Tea, coffee, coffee concentrates.
- Cacao beans, cocoa butter.
- Cocoa and chocolate and beverage preparations containing cocoa or powdered milk.
- Soft drinks and soft drink concentrates, except mineral, sparkling or spring waters in their natural form.
- Malt, malt extract, malt syrup.
- Vinegar.
- Black pepper and white pepper, and substitutes containing black or white pepper.
- Butter.
- Caseln.
- Cheddar cheese, processed cheese and cream cheese.
- Concentrated milk products of all kinds.
- Ice cream.
- Prepared salad dressings; salad and cooking oils.
- Salt.
- Fresh apples—1946 crop.
- Raisins, currants, prunes, dried dates, dehydrated apples.
- Tomatoes, tomato sauce, tomato paste, tomato pulp, tomato puree, tomato catsup, chili sauce, when in hermetically sealed cans or glass.
- Canned pork and beans, canned spaghetti and canned soups.
- Canned corn, canned peas, canned beans excluding the lima and red kidney varieties.
- Canned apricots, canned peaches, canned pears, canned cherries, canned plums.
- Fruits and vegetables in the two preceding items when frozen and sold in consumer size packages.
- Jams, jellies, marmalades.
- Meat and meat products, not including game, pet foods, and certain varieties of cooked and canned meats and sandwich spreads.

- Sausage casings, animal and artificial.
- Live and dressed poultry; poultry products except certain varieties of canned poultry and canned poultry sandwich spreads.
- Eggs in the shell; eggs frozen or powdered.
- Canned salmon, canned sea trout, canned pilchards.
- Edible animal and vegetable fats including lards and shortenings.

CLOTHING

- Men's, youths' and boys' suits, pants, coats and other clothing except fur coats.
- Fabric caps.
- Men's, youths' and boys' furnishings, as follows: shirts, collars, blouses, underwear, pajamas, night shirts and dressing gowns.
- Women's, misses', girls', children's and infants' garments of all kinds (except fur coats) and of any material (except pure silk).
- Brasieres and foundation garments.
- Women's, misses', girls' and children's accessories as follows: dickies, bibs, halters, neckwear, collars, cuffs and aprons.
- Children's and infants' headwear of all kinds, except misses' millinery or hats made from fur felt.
- Knitted wear of all kinds for either sex, including undergarments, outer garments, hosiery, stockings, socks and headwear, but not including pure silk garments, silk stockings or women's and misses' millinery.
- Handkerchiefs.
- Work clothing, including aprons, for either sex.
- Uniforms for either sex.
- Sportswear for either sex, but not including bathing suits and bathing caps.
- Rubber clothing, rubberized clothing, waterproof, show-erproof and oiled clothing, except specialized industrial clothing.
- Gloves, gauntlets, mitts and mittens of all kinds for either sex, except those designed as specialized sports equipment or for specialized industrial uses.
- Diapers and diaper supports.
- Footwear of all kinds and of any material.

HOUSEHOLD AND OTHER TEXTILES

- Auto and travelling rugs; awnings, bath mats, bedspreads, blankets of all kinds, canvas fronts, card table covers, comforters, curtains, cushion forms, dish cloths, dish towels, drapes, elder-downs, face cloths, hammocks, luncheon sets, mattresses of all kinds, napkins, pillows, pillow cases, pillow forms, quilts, sails, sheets

- (including rubber and plastic coated sheeting), shower curtains, silence cloths, sleeping bags, swings, table cloths, tents, throw-overs, towels wash cloths, window blinds, window shades.
- Slip covers for furniture; covers for baby carriages, bassinets, cribs, cushions, mattresses, ironing boards and toilet seats.
- Pads for baby baskets, baby carriages, card tables, chairs, ironing boards, mattresses and playpens.
- Bags for household use, garment bags, haversacks, dunnage bags.
- Tarpaulins and other protective coverings of canvas.
- Scrap fabrics, including used scrap fabrics except wiping rags.
- Floor rugs and mats chiefly of cotton.
- Table and shelf oilcloth.

DOMESTIC FUELS

- Coal, coke and briquettes.
- Wood fuels, sawdust and charcoal.

HOUSEHOLD EQUIPMENT AND SUPPLIES

- Cooking stoves and ranges, but not including rangettes.
- Electrical and gas refrigerators.
- Washing machines.
- Furnaces, fire-place heaters and other heating equipment except portable electric heaters.
- Jacket heaters and other water heating equipment.
- Plumbing and sanitary equipment as follows:
 - All pipe and fittings of a type and size suitable for installation in domestic heating or water systems.
 - All equipment known commercially as "plumbers' brass".
 - Other plumbing and sanitary equipment as follows: bathtubs, closet bowls, commodes, closet seats and hinges, chemical closets, closet tanks, household water softeners, household water storage tanks, lavatories, laundry tubs, septic tanks, sinks, shower baths, soil pipe and fittings, wash basins.
- Domestic sewing machines.
- Soap and soap compounds.

MOTOR VEHICLES AND ACCESSORIES, BICYCLES

- Motor vehicles, including parts and accessories, as follows: passenger motor vehicles designed to carry less than ten persons; motor cycles; trucks and trailers used with trucks.
- Automotive truck bodies.
- Pneumatic tires and tubes.
- Storage batteries, except for specialized industrial uses.

- Bicycles, parts and accessories.

CONSTRUCTION PRODUCTS

- Lumber of all kinds.
- Millwork such as doors, sashes, windows, stairs and gates.
- Plywood and veneers.
- Pre-cut lumber products designed for use in residential or farm buildings, but not including fully pre-fabricated buildings.
- Gypsum board and gypsum lath.
- Wallboards and building boards.
- Insulation products, but not including pipe and boiler coverings.
- Builders' lime and plaster.
- Cast iron soil pipe.
- Nails, staples, rivets, bolts and nuts.
- Builders' hardware and locks.
- Building wires and wiring devices for residential buildings.

AGRICULTURAL MACHINERY, IMPLEMENTS, EQUIPMENT AND SUPPLIES

- Practically all items of farm machinery, including planting, seeding and fertilizing equipment, plows, tillage implements and cultivators, haying machinery, harvesting machinery, tractors, wagons, dairy machines and equipment, sprayers and dusters.
- Articles of barn and barn-yard equipment.
- Incubators, brooders, poultry feeding and watering equipment.
- Stationery gas engines.
- Beekeepers' supplies.
- Harness and harness hardware.
- Barbed wire and other fencing wire and fences.
- Horseshoes and horseshoe caulkers and nails.
- Binder twine.
- Wheelbarrows.
- Feeds and feed products of all kinds except horse meat, pet foods, straw, clam shell and poultry grit.
- Agricultural limestone, hydrated lime and chemical fertilizers of all kinds.
- Gopher poisons.
- Seed beans and seed peas.
- Grains as follows:—wheat; barley; oats; flaxseed; buckwheat; rapeseed; sunflower seed; grain screenings.

RAW AND PROCESSED MATERIALS

- Basic iron and steel products and alloys, including pig iron, cast iron, scrap, ingots, bars, plate, rods, and wire.
- Primary, secondary and fabricated mill forms of the following non-ferrous metals and their alloys: aluminum, antimony, copper, lead, nickel, tin and zinc.

- Tractor distillates and gasoline.
- Crude rubber, synthetic rubber and lattices, reclaimed rubber.
- Basic industrial or agricultural chemicals.
- Dyestuffs, pigments and oxides.
- Plastic sheeting and other plastic shapes for further processing.
- Crushed or burnt limestone.
- All fats and oils, including Vitamin A oils, of animal, vegetable or marine origin but not including cod liver oil when bottled for sale at retail.
- Natural occurring animal and vegetable waxes, but not including polishes.
- Glue stock, glues and adhesives.
- Starches.
- All kinds of knitted or woven fabrics, except pure silk fabrics.
- Bobbinet, dress and curtain nets and netting.
- Yarns and threads, except pure silk, for the knitting and weaving of fabrics.
- Fibres (natural and synthetic) except pure silk fibres used in the manufacture of yarns and threads, and waste products from processing.
- Sewing, embroidery and crochet yarns, threads and floss, except pure silk.
- Rubberized, plastic and other coated fabrics.
- Elastic yarns, fabrics, and webbing.
- Cotton, wool or hair felts.
- Down and feathers but not including decorative feathers.
- Hides and skins from animals, reptiles or fish, of a type ordinarily processed for use as a leather.
- Leathers and synthetic leathers of all kinds.
- Sheepskin shearings, tanned, but not further processed than combed or sheared and coloured on the flesh side.

PULP, PAPER AND PAPER PRODUCTS

- Pulpwood.
- Waste paper.
- Wood pulp, except:
 - dissolving grades,
 - "alpha" grades of bleached sulphate,
 - "Duracel",
 - groundwood and unbleached sulphite grades sold for the manufacture of newsprint or hanging paper.
- Newsprint paper except when sold by manufacturers thereof.
- Certain paper products of book, writing, light weight and specialty paper mills, such as bond and stationery paper, duplicating paper, Bristol, uncoated blotting paper, cover paper and most papers for converting purposes.

- Papers used for converting or printing purposes made wholly or partly of bleached or unbleached Kraft pulp and Kraft waste.
- Paper board used in the manufacture of solid fibre or corrugated shipping cases.
- Boxboard grades of paper-board, except for wrapping newsprint paper or making newsprint cores.

CONTAINERS AND PACKAGING MATERIALS

- Containers, packaging and wrapping devices of a type used for the sale or shipment of products, when made in whole or in part from wood, metal, a textile fabric or solid or corrugated fibre board, and partitions and interior parts used in conjunction therewith.
- Multiwall sacks.
- Corrugated or solid fibre board sheets or rolls used for wrapping or packaging.
- Cotton cordage.

SERVICES

- Transportation of goods and services associated therewith.
- Warehousing; dry storage of general merchandise and household goods other than wearing apparel; cold storage, including rental of lockers and ancillary services such as processing charges in cold storage plants.
- Household laundering services.
- Supplying of meals or refreshments for consumption on the seller's premises, the supplying of beverages (except alcoholic beverages) by purveyors of meals or refreshments; the supplying of meals with sleeping accommodation for a combined charge, but not including the supplying of meals, refreshments or sleeping accommodation by an employer to his employees, directly or through a servant or agent.
- The service of printing, the packing or packaging or any other manufacturing process in respect of any goods subject to maximum prices, when performed on a custom or commission basis.

USED GOODS

- Scrap goods, except scrap rubber and wiping rags.
- Household mechanical refrigerators, stoves, ranges and other cooling or heating appliances, electric washing machines, domestic sewing machines.
- Bicycles.
- Motor vehicles as follows:—passenger motor vehicles designed to carry less than ten persons; trucks of all kinds; trailers used with trucks.

Any material shown above processed for incorporation into, or any fabricated component part of any of the above goods is subject to maximum prices. Also any set which contains an article referred to above is subject to maximum prices even though the remainder of the set consists of articles not referred to.

The foregoing is only a convenient summary of Board Order No. 684. It does not give the full legal text. For full details of the law reference should be made to the Order.

Royal Job-Hunter

PRINCESS VICTORIA CECILIE IRENE MARGARET OF HESSEN would very much like to get a job as housekeeper to some American family. This 32-year-old member of what is left of German royalty is waiting to be denazified before she offers her services. Princess Margaret was a former Nazi party member. After Germany's collapse she took a job cleaning railway carriages and hauling timbers for the repair of tracks. Today she lives in a shabby attic room in the American sector of Berlin and looks as well as feels anything but a member of royalty, while waiting to appear before a denazification court.

Everyman Theatre Play
Pleases Local Audience

Although the title, "The Importance of Being Earnest," has a solemn sound, there was little solemnity in the presentation of Oscar Wilde's three act play at Ellison hall last Thursday evening by the Everyman Theatre company.

The touring group presented a fast-moving mid-Victorian farce which was enjoyed by a fair-sized gathering of Summerland persons. Due to other attractions and the inclement weather, the attendance was not as large as might otherwise have been expected.

The presentation here was sponsored by the Singers' and Players' Club, which organization is bringing back this same company later in the season for a showing of "The Last Caveman," a new Canadian comedy by Elsie Park Gowan.

Drew Thompson, as John Worthing, a young Englishman, proved the hit of the play, although there was little to choose between the actors. The play had an English setting near the turn of the century, commencing in Algernon Moncrieff's London flat and moving to the Manor House, in the country at Woolton.

Worthing and Moncrieff proved to be two young "men-about-town," whose attempts to escape from relatives for periodic "flings," and their excuses to get themselves away eventually got them into trouble when they fell in love.

They both pretended their names were "Earnest" and when their respective fiancées informed them that their names were a great part of their charm, then they had to something quickly.

Dowager Lady Bracknell, prim Miss Prism, Rev. Canon Casuble and two menservants completed a delightful cast.

The cast consisted of the following: Algernon Moncrieff, David Major; Lane, his manservant, Edward McNamara; John Worthing, Drew Thompson; Lady Bracknell, Esther Nelson; Hon. Gwendolyn Fairfax, Hilda Nual; Cecily Cardew, Shirley Kerr; Miss Prism, Lois McLean; Rev. Canon Chasuble, Ronald Rosvold; Merriman, A. Murray Westgate.

Make Provision For 1947 Box Shook Needs

"Packing houses have already indicated to their regular shook supplier that they will accept shook at the mill's convenience against 1947 requirements and firm orders were placed not later than December 31, based on the 1946 crop, subject only to reduction at the mill's convenience," declared L. R. Stephens, for the box shook committee, in the annual report to the B.C.F.G.A., at Kelowna, on Tuesday.

"It is probable that under such a plan some sections will have a substantial reserve of shook to carry over into 1948, while others may actually require some additional shook.

"At the request of this committee, the Aluminum Co. of Canada and the Celanese Corp. are exploring the possibilities of making containers for fruits from their respective products.

"There will also be, no doubt, considerable experimentation on the use of fibre to replace wood, but your committee is of the opinion that it will be some time before any product will be found to replace the wooden box."

Loss Was Great
In dealing with the I.W.A. strike last spring, Mr. Stephens' report estimated that the average loss of time per mill was 30 days, meaning a total loss of 50,000 units per day, or 1,500,000 for the thirty working days.

To cope with the industry needs, 188 carloads of shook were purchased from outside mills and brought into the Okanagan. The equivalent of 20 carloads of fibre body cartons were purchased, consisting of 150,000 peach box bodies and 375,000 apple box bodies.

Because of breakdowns in production, some of these shipments were delayed, thus causing a carryover into this season.

Despite all the additional purchases, an emergency developed in the Kelowna-Okanagan Centre-Winfield area early in October, necessitating a bulk movement, and the Keremeos area also suffered.

Individual packing houses in the Summerland-Westbank area were forced to gather up used boxes from several other sections to see them through.

The report also detailed the work of the B.C.F.G.A. committee in obtaining an increase in box shook returns to the mills and the action taken to endeavor to settle the strike.

Mrs. S. A. MacDonald
Is Federation Head

St. Andrew's Federation held its first meeting of the year in the United church hall on Thursday, Jan. 16, being opened with an impressive installation service, conducted by Rev. H. R. Whitmore, in which all officers of the coming year were installed.

These officers consisted of the following:

President, Mrs. S. A. MacDonald; first vice-president, Mrs. W. Boothe; second vice-president, Mrs. W. F. Ward; secretary, Mrs. A. McLachlan; treasurer, Mrs. J. Shepherd; Christian friendship committee, Mrs. C. Schwass, Mrs. Basil Steuart, Mrs. W. Jenkinson; missionary monthly and envelope steward, Mrs. J. McKenzie; press secretary, Mrs. E. Pohlman; mission band, Mrs. W. F. Ward; auditor, Mrs. Alex Smith; pianist, Mrs. Bert Stent; hospital visiting, Mrs. A. K. Elliott; temperance and supply, Mrs. E. Gould; corresponding secretary, Mrs. Hemingway.

Reports of last year's work were read and it was found to be a very successful year in every way, but President Mrs. MacDonald and officers are looking forward to a bigger and better year in 1947.

Any new members are welcome, Mrs. MacDonald stressed as well as visitors to come and help the Women's Federation make a success of sending the Word of God throughout the world.

The meeting closed with refreshments served by hostesses Mrs. W. Boothe and Mrs. Ward.

High Standard At Interior Exhibition
That the B.C.F.G.A. fruit division at the 1946 B.C. Interior Provincial Exhibition at Armstrong, maintained the high standard of excellence reached in other years, was the report tabled by W. T. Cameron, chairman of the fruit division committee, at the B.C.F.G.A. convention in Kelowna, on Tuesday.

One of the highlights of the display was Class 75, for a plato of McIntosh and commemorating the 150th anniversary of this apple. This special prize was won by P. E. French, Vernon, and he obtained the \$80 silver trophy presented by Buckerfield's Ltd.

The two best boxes were sent to the Royal Family.

From the southern section of the area, Mrs. J. C. Clarke, Empire Orchard, Keremeos, won 13 firsts, five seconds and two thirds.

PASS POUND ACCOUNT

A Pound account for \$15 in connection with two horses which had to be destroyed, was passed for payment in favor of J. Heichert, Prairie Valley poundkeeper, by the council on Monday.

ENTER THREE CAGE TEAMS IN PLAYOFFS

Three Summerland basketball teams are being entered in the interior association, which will commence next month, the Summerland Basketball club decided at an executive meeting on Monday evening.

Heading these squads will be the Summerland Merchants, senior "B" contenders for the crown worn by Princeton since last season. The Summerland Chiefs are to forage for the intermediate "B" boys' crown, while the Summerland Legion team is in quest of junior boys' honors.

Attempts were made to form an intermediate "A" girls' team, but lack of enthusiasm and the unavailability of some players forced a disbandment of that aggregation.

Although the Merchants have been in a slump for over a month, the team is back at practice again and hopes to be in good shape when the playoff dates roll around, which should be in about three weeks' time.

All registrations must be filed with the B.C. Basketball Assn. by January 31, and the local cards were forwarded to Interior President Andrew Bennie in Penticton, on Tuesday.

The teams will consist of the following players:

Merchants: George Clark, captain; Hugh "Bob" Seriver, Donald Tait, Jack Walsh, Norman Thompson, Rocco Biagioni, Jim Thompson, Donald R. Rand, James O. Maxwell and C. J. McPherson.

Chiefs: Gerald N. Adams, Ray Moore, Donald Nesbitt, James B. Hack, Lee Miller, Lionel Guidi, Jack Dunham, Gilbert Jacobs and Harold W. Stein.

Legion: Dennis S. Hack, Wallace A. Day, David Turnbull, Fred Kato, Edward Kita, Ernie Jomori, Murray E. Elliott, Harry Ruppel, Edwin Fleming and Donald Cristante.

Did You Say Remodelling?

Well, that was the general idea of the owners of this cafe in Portland, Oregon, and workmen started on the plans for a bigger and better eating place in these times of "hard to find" restaurant seats. But one of the workers, apparently hit a gas line with his hammer with the result that after the explosion which followed four "remodellers" and two waitresses went to hospital.

recent years do not possess the keeping qualities of a few years ago. They seem to be riper at time of harvesting. They seem tender and susceptible to bruising, and stem puncture is much more prevalent. Strong fruit, capable of being held so that marketing can be spread over a long period, is one of the essentials for successful disposal of our apple crop.

"Another requisite is that a larger percentage of the crop must be made available in packed form earlier in the season. Out of the 1,950,000 boxes of apples on hand at the turn of the year, over 900,000 were still loose in boxes. If we are to find an outlet for our future apple crops, then we must be in the position of being able to avail ourselves of markets, both export and domestic, when the business is offering.

"We think some progress has been made this year in improving the general quality of the product delivered to factories. Last spring we had a lot of meetings with cannery representatives, and also had two members of the cannery association address all packing house managers' meetings, held in May. One of our contact men has been assigned the supervision of the product going to the canneries, (Continued on Page 7)

THE DEPARTMENT OF TRADE AND INDUSTRY

THIS Provincial Government department exists for the furtherance of international and inter-provincial trade in the products, natural and fabricated, of British Columbia; for the assistance, through its machinery for study and research, of existing and new enterprises; and for the development and expansion of travel and settlement within the Province. It performs these functions through its three Bureaus—namely:

THE OFFICE OF THE TRADE COMMISSIONER

This office keeps in constant touch with world markets, directly and in co-operation with Canadian Government Trade Commissioners abroad and with all organizations of similar interests. It is tireless in its efforts to assist British Columbia's growers and manufacturers in the marketing of their products, and has been conspicuously successful in renewing contracts disrupted by the war, and in finding new channels for trade.

THE BUREAU OF ECONOMICS AND STATISTICS

This Bureau is well equipped for the conduct of economic surveys of all kinds, and is at the disposal of business and industry in British Columbia, to help in the solution of the problems which constantly arise in connection with marketing at home and abroad, besides assisting all other Departments of the Government where questions of economics or statistics are involved.

THE BRITISH COLUMBIA GOVERNMENT TRAVEL BUREAU

This Bureau exists primarily for the development and expansion of British Columbia's Tourist Industry through the media of widespread newspaper and magazine publicity, the production of attractive and informative literature, the making and circulating of motion pictures in sound and color, and by direct and personal contact. It has made itself a conspicuously successful agency for settlement and deals with all enquiries from prospective settlers anxious to invest and make their homes in British Columbia.

Over 17,000 Cars Will Roll From This Valley Before 1946 Crop Is Marketed

"The crop volume for 1946 established a new record for fruits and vegetables from the Interior," declared Dave McNair, Tree Fruits' sales manager, to the 58th B.C.F.G.A. convention in Kelowna last week. "Expressed in carloads, it will exceed 17,000 cars, and the gross income will exceed \$25 millions. This compares with 14,700 cars and \$21,348,000 for the previous record year of 1944. The tonnage of fruit is made up by the following:

Cherries, 270,000 packages; Apricots, 403,000; Peaches, 1,685,000; Plums, 154,000; Prunes, 893,000; Grapes, 169,000; Crabapples, 223,000; Apples, 8,950,000.

"The cherry crop was of moderate volume, but size did not quite equal that of 1945. British Columbia cherries enjoy a wide distribution because of their superiority in size, so everything should be done to produce fruit of good size. If this is done, there is an assured market for our prospective crops.

Improve Maturity
"Again, in apricots, there is plenty of room for our production, but more attention should be given to improving state of maturity. A new container with a more attractive appearance must be adopted, as supplies of imported cots were in much increased quantities and were put up in a manner that excelled ours.

"Peaches did not reveal the anticipated increase, and out-turned about the same quantity as in 1945. A combination wooden-carton package had to be employed for a portion of the pack, and this contributed to more complaints from bruising, but generally speaking, the output was fairly satisfactory.

"Plums and prunes were about the same volume as in 1945. There was a marked improvement in the maturity and size of prunes. 2,500 tons of prunes in SO2 form moved from the Fraser Valley to the United Kingdom and made a helpful contribution to the maintenance of fresh market prices.

Bartlett's Over-ripe
"In pears, there was an increase of about 150,000 boxes, taking place mainly in Bartlett's. We slipped considerably in the harvesting and packing of Bartlett's, resulting in many more complaints from over-ripeness than last year. More care must be exercised in the prompt handling of our pear crop, and a policy must be followed of setting aside cold storage rooms for the exclusive care of pears. They will not survive the fluctuating temperatures that occur when other commodities are being moved in and out of rooms where pears are stored.

"Crabapples showed an increase of 100,000 boxes over 1945, and proved to be the most difficult commodity of this season's entire marketing. Undoubtedly the continuance of sugar rationing affected sales. At the same time, it should be pointed out that crabapples are not gaining in popularity, either in Canada or in the American markets, and curtailment in production is recommended. The entire crop could not be sold pre-war, and during the war, extensive canning has been the only means of clearing this commodity.

"Canning of crabapples is not

likely to continue in the volume of the past few years. Another factor affecting the sale of the B.C. product is the production in considerable quantities that is taking place in Manitoba, and planting of trees is extending to other sections of the prairies.

"The production of grapes showed considerable decline, due mainly to hail, leaving a ready demand for the small quantities available.

Huge Apple Crop

"In apples, a crop of 8,900,000 boxes considerably surpassed all early season expectations. A crop of this volume is out of proportion to the existing packing-house facilities, both with respect to warehouse space and grader capacity. Consequently, there was serious delay in getting a portion of the crop taken care of in ideal fashion, and the tonnage that was delayed produced a great deal of dissatisfaction on our markets from over-ripe and badly bruised arrivals.

"Untold damage is being done to our markets with apples that remained in orchards ten days to three weeks after harvesting. We attempted to handle 8,900,000 boxes with the same grader operation that was required to handle a crop of 4,600,000 boxes in 1936. The attention of all packing houses has been drawn to this unsatisfactory state of affairs, and the matter is receiving their consideration with a view to making improvements.

"In last year's report, increases in cee grade were stressed. While packing of this crop is not completed, the out-turn will reveal little or no decrease in cee grade. When our apple crop ranged around four to five million and cee grade was approximately 30 per cent, the resulting million and a half cee grade did not present a marketing problem. Now that our crops in heavy years are exceeding eight and a half million boxes, and with cee grade on the increase, the prospect of three million or more cee grade constitutes an insurmountable marketing problem, and if the percentage cannot be reduced, then it will mean that a portion of the cee grade tonnage will have to be marketed through processing channels.

Stronger Fruit
"Attention must also be drawn to the fact that our apples in

Hospital Addition Proceeding With Plastering Soon

Work on the new hospital wing and nurses' home is proceeding well and plastering should be commenced shortly, the January meeting of the Summerland Hospital Society was informed on Tuesday night by J. E. Jenkinson, chairman of the building committee and member T. M. Croil, clerk of works.

In the original specifications, linoleum was called for on the ground room floors, but this is not feasible as these floors are of cement construction.

Consequently, tiling is being substituted at a cost of 75 cents more per yard, the board was told. As the limit of resources for construction is in sight, not all of the floors can be laid with tile at present, it was reported.

Enlargement of the electric hoist operating in the hospital has been ordered but will have to wait some time for materials.

On Monday, Mr. Jenkinson and Mr. Croil met the municipal council regarding the supplying of domestic water to the nurses' home. It was agreed the most feasible source would be the lateral running past the hospital to S. A. MacDonald's property.

In order to obtain this service this lateral will have to be enlarged and the council and hospital board have agreed to share the cost on a 50-50 basis.

In December, 50 patients were admitted to the Summerland hospital, which now has 19 beds in use.

For some time the bylaws of the hospital society have not been kept up to date but on Tuesday a new set of regulations, conforming to the hospitals act and other provincial legislation were presented to the board by a committee of Dr. J. C. Wilcox and Councillor Eric Tait.

The board approved in principle to these bylaws and they will be passed at the next full session of board members.

Board Secretary J. E. O'Mahony pointed out that the staff is too large for the finances of the hospital and should be pared down, if possible.

Chairman S. A. MacDonald instructed Mrs. F. E. Atkinson, house committee chairman, to discuss the staff personnel with Matron Miss Freda Huenichen with a view to some reductions.

Miss Riley was forced to leave the hospital staff because of the illness of her father, and she is being replaced for two weeks by Miss Berg. Two new graduates, Miss Calder and Miss Dixon, have been added to the staff and have been proving efficient nurses, it was stated.

HATCHERY TO BE STARTED IN SPRING

That the B.C. Game Commission intends to proceed in the near future with the construction of the new Okanagan fish hatchery on the lakefront in Summerland was evidenced by a request from Commissioner F. R. Butler, read at Monday's council meeting, for an invoice covering the cost of 34 feet frontage.

This portion of the lakefront the council last year agreed to sell to the commission for \$350. The bill for this property will be forwarded to the commission and a bylaw for its sale will be passed when payment is made.

Speaking on the alternate proposal made in November, that the fish hatchery be placed in Peach Orchard park, which was turned down by the game commission, Councillor Eric Tait told the council on Monday that he had inspected the water supply in the park and in his opinion it would be difficult to concentrate the various small supplies into one channel.

"There is no such thing as a really good spring in Peach Orchard, but a series of small ones," Councillor Tait declared.

HOW BIG IS A FARM?

Sounds like a silly question, doesn't it? Farms are all sorts of sizes. But a farm is only as big as its production.

Take a look around you. Ask yourself whether any of these things could make money for you by increased production — in other words, make your farm a bigger farm . . . new, improved implements or equipment; new livestock to build up your herd; new buildings, repairs or extensions; a new light system; light, heat or water systems; electrical aids such as a cream separator, refrigeration pumps, motors, milking machines, etc.

But all of these things cost money, you might well say. So they do, but that is where the Bank of Montreal comes in. It is the Bank's business to lend money where money will make money.

Money wisely borrowed at the right time has made many of Canada's small farmers big farmers.

Mr. Woodford, manager of the Bank of Montreal, knows a lot about farmers' problems. He is eager to help you get your full share of the rewards that lie in increased agricultural production. He makes loans in as simple a manner as the general store-keeper sells his wares.—Advt.

SUPERANNUATION PLAN SOUGHT

Benefits of a superannuation plan were sought by four members of the municipal electric light department in a formal application to the local council on Monday afternoon. Those making application were T. P. Thornber, Gordon Blewett, Stewart Sanborn and Archie Rutherford.

Municipal Clerk Nixon explained that this application had arisen from discussion on a group insurance plan but no thought had been given to a retirement plan.

"We cannot offer superannuation because of the age of the employees," declared Reeve Powell. "It would be too costly. But we could offer group insurance."

It was explained that there must be ten permanent employees in such a group insurance scheme.

MRS. A. K. ELLIOTT AGAIN HEADS RED CROSS BOARD

All officers of the Summerland branch of the Canadian Red Cross were unanimously re-elected at their annual meeting, which was held on Tuesday afternoon, January 28, in the Parish hall, West Summerland.

Continuing in the offices which they have capably filled for the past year are: Dr. F. W. Andrew, honorary president; Dr. A. W. Vanderburgh, honorary vice-president; Mrs. A. K. Elliott, president; J. Y. Towgood, first vice-president; Miss Marion Cartwright, second vice-president; Rev. F. W. Haskins, third vice-president; Mrs. A. W. Vanderburgh, secretary; Mrs. R. C. Palmer, treasurer; Mrs. Bedford Tingley, chairman of the Jr. Red Cross; Mrs. R. Russel, chairman of the Canadian Red Cross Corps; Mrs. Bertha Gillis, chairman of the nursing advisory; Mr. W. L. McPherson, chairman of transportation. Mr. J. Y. Towgood, chairman of blood donor service. Also re-elected to the executive was Mrs. F. R. Stark.

A more complete report on the annual meeting will be given in next week's issue of The Review.

WHITE CANE WEEK STARTS SATURDAY

White Cane Week, sponsored by the Canadian Council of the Blind and the Canadian National Institute for the Blind, to acquaint Canadians with their blind neighbors and to ask for their co-operation in helping the man with the White Cane, is to be held from Feb. 1 to 8.

Whether he is waiting to cross a busy intersection or whether he is carrying on his business, treat him with courtesy and offer your assistance if he needs it, the Institute urges. He is far from helpless but a little consideration from sighted people, a guiding hand at a moment of difficulty, will help to clear his road of some of his unseen ob-

stacles. The White Cane has become a symbol of blindness and the Institute asks that it be treated with respect, with courtesy, but not with pity. The man who carries a White Cane appreciates your assistance, but he doesn't ask for tears. Kindness helps him to help himself. This week, and all weeks, lend him your eyes in as many ways as possible to broaden his horizon . . . to help him walk alone.

WEST SUMMERLAND

FOR CLEAN, DEPENDABLE HEAT

100% distilled, Standard Heating Oils give maximum heat at minimum costs, with a grade for every type of burner.

For pot-type burners, circulating heaters, stoves and hot-water heaters there's Standard Stove Oil. It's a light oil that starts quickly and burns steadily and cleanly. Every drop is utilized in developing heat, (and that's important in these days when oil waste should be avoided.)

Home furnaces, equipped with automatic pressure burners, should have the heavier Standard Oil for maximum efficiency.

When it comes to heating with oil, you can depend on top quality Standard Heating Oils.

**Mother Of Five
Dies In Hospital**

Mrs. Maria Otto, wife of Carl Otto, passed away at the Summerland hospital on Tuesday, Jan. 28, after a brief illness. Born in Calgary, deceased was 41 years old. She came to live in Summerland four years ago. She was predeceased by her first husband, the late Dan Welsh, about two years ago and was married to Mr. Otto in Summerland in 1945.

Besides her husband, she leaves by her previous marriage, three daughters, Irene, Edith and Laura, and two sons, Danny and Hughie, all in Summerland; her mother, Mrs. Catherine Goetze, Calgary, and four sisters and three brothers, one residing in Rosedale, B.C., and the remainder at prairie points.

Funeral service is to be held from the Free Methodist church, West Summerland, on Saturday, Feb. 1, at 2 o'clock, with Rev. W. S. Angell officiating. Interment will be in Peach Orchard cemetery.

Pall-bearers will be John Graham, Pitt Adams, John Adams, Frank Adams, Adam Arndt, and Henry Mohr.

Socially Speaking

Social Editor : Muriel Hurry

Mr. and Mrs. T. B. Young have returned from a Vancouver visit.

Dr. and Mrs. L. A. Day were Kelowna visitors yesterday, Wednesday.

Mr. Albert Doherty of Vancouver has arrived in Summerland, where he has been called due to the death of his mother, Mrs. Geo. Doherty.

Mrs. Fred Schumann and her sister, Miss Eileen Inglis, left on Wednesday for Saltcoats, Sask., where they will visit at the home of their relatives, Mr. and Mrs. A. Vickers, for three weeks.

Ivana Steuart was hostess on Monday afternoon to 16 of her little friends on the occasion of her fifth birthday.

Miss Dorothy Daws of the teaching staff of the Peachland school, was a weekend guest with her family here.

Lloyd McMillan left last Wednesday for New Westminster, where he will make his future home. He will be joined there shortly by Mrs. McMillan and Robin.

Mr. J. McDonald of Princeton was a weekend guest at the home of Mr. and Mrs. H. Walton.

Mr. and Mrs. S. K. Hunt and Richard were guests for a month at the home of Mrs. Hunt's parents, Mr. and Mrs. E. L. Fanchon.

Mr. J. W. Harris, who has been visiting at the coast for some time has returned to his home in Summerland.

Mr. D. Goodwin of Vancouver, who was a weekend guest at the home of his cousin, Mrs. I. C. Schwass, returned to the coast on Tuesday.

Mr. Bob Bleasdale, accompanied by Walter McCarthy, of Penticton, left on Wednesday for a trip to Kamloops and Vancouver.

**Mrs. M. E. Collas
Heads Institute**

The annual meeting of the Women's Institute was held on Jan. 10, in the Parish hall.

Mrs. M. E. Collas was elected as president, Mrs. J. McLachlan, vice-president; secretary-treasurer, Mrs. E. Fanchon; directors, Mrs. G. Perry, Mrs. A. K. Macleod and Mrs. E. R. Butler.

Following the business meeting, a quiz program, featuring local facts and figures, prepared for the occasion by Mrs. M. Hookham and Mrs. Blewett, was enjoyed by all.

Plans are being made for a special meeting in February, in which month the Women's Institutes of Canada will celebrate the 50th anniversary.

At the December meeting of the W.I., it was reported by the secretary that a donation of \$50 had been made toward the local memorial fund, and a donation of \$25 to the W.I. Memorial fund. This fund is to be used to pay the tuition fee for the Home Economics course of some outstanding pupil in the province, a girl who will be chosen by a committee appointed for that purpose.

PUCK CONTEST TONIGHT

Tonight the local high school hockey lads are entertaining Penticton's school team in a second puck contest. Penticton won, 7-5 in overtime, in a hotly-contested game, the last time these two teams met.

Mr. John Sheskey, proprietor of the Butcherteria, left last week for Vancouver to obtain medical treatment following his recent illness.

Mrs. A. K. Elliott, Mrs. F. E. Atkinson, Mrs. Tom Washington and Mrs. Tom McDonald, as representatives of the Faith Rebekah Lodge, were visitors to Oliver on Monday evening, where they attended the installation of officers in the Golden Heart Lodge.

Miss Bernice Elliott left for Vancouver on Monday evening, to enter training in St. Paul's Hospital.

**Resident Here 41
Years Passes Away**

After an illness extending over a lengthy period, a pioneer resident of this district, Mrs. Bertha May Doherty, aged 71, wife of George H. Doherty, passed away on Tuesday, Jan. 28.

Born in Gananocque, Ont., the late Mrs. Doherty was married in Brockville, Ont., and came west to Summerland district with her husband 41 years ago.

Here they became pioneers in the fruit producing industry and have been well known to all the early residents as well as a great number of newcomers.

Besides her husband, the late Mrs. Doherty leaves three sons, Ernest E. and James R., in Summerland and Albert R., in Vancouver; two daughters, Mrs. Albert Cramer, Penticton, and Mrs. A. F. Gibeault, Verdun, P.Q.

Funeral service will be held from St. Stephen's church, West Summerland, on Friday, Jan. 31, at 2 o'clock with Rev. Canon F. V. Harrison officiating. Interment will be in the Anglican cemetery.

**Fourth Term As Head
Of Church Group**

Mrs. Ivor P. Barnes was again chosen as president of the afternoon branch of the St. Stephen's W.A. at their annual meeting held in the Parish hall on Jan. 16.

This will be the fourth term that Mrs. Barnes has served as president, and Mrs. W. Armstrong was re-elected to serve a tenth term as secretary. Miss M. Cartwright was re-elected treasurer and Mrs. F. V. Harrison first vice-president, to refill offices that they have competently served for many years. In place of Miss Dugdale, who moved recently to Keremeos, Mrs. E. Hack was chosen as second vice-president.

Others chosen to fill important posts were Mrs. Chas. Clark, in charge of Dorcas and Living Message; Mrs. N. Solly, Little Helpers; Mrs. T. Washington, assisted by Mrs. Dunsdon, Juniors; Mrs. Gallagher, United Thank Offering, and Mrs. E. Hack, Extra Cent-a-day.

Among the activities reported for 1946 were the redecoration of the Parish hall, help with church expenses, pledge money for missionary schools and hospitals in Canada and abroad, Sunday school activities, clothing and apples sent to schools and missionary parishes, and gifts at Christmas in Summerland.

Canon F. V. Harrison was present during the meeting and spoke in appreciation of the members' efforts during the year, after which he closed the meeting with prayer.

CONSTANT FLOW APPROVED

On the recommendation of Water Foreman E. Kercher, sprinkler-type irrigation was approved by Summerland council for W. A. Steuart's Banks property on Jones Flat. There would be no municipal expense to provide constant flow to this property but Mr. Kercher wished to view the result before any further applications were approved for this particular section.

"I'll Get By" Can No Longer Be Theme Song of Growers Says Loyd At Convention

"The past season has presented the usual crop of problems to be solved, and now that we are approaching the finishing line, it might be as well to consider some of the more outstanding points which will affect us in the future," reported A. K. Loyd, president and general manager of B.C. Tree Fruits Ltd., to the annual growers' convention on Tuesday.

"We are beginning to feel an increasingly strong competitive position in every market. This refers not only to the increasing activity of those dealing with our own products, but also an increasing plentifulness of competitive lines, particularly citrus fruits, bananas, and other items, many of which were comparatively off the market during the war years.

NINE MILLION BOXES

"This year's crop, in nearly all commodities, was as high as, or higher, than we have previously experienced and, of course, in apples outstandingly. We were not very far away from the nine million box mark.

"We find the following situation in regard to tonnage for the future:

"Taking cherries, aside from all old plantings, there is a matter of 6,500 young trees starting their career in 1946. Bings and Lamberts, fortunately, are vastly predominant.

"In apricots, there are 11,500 young trees; prunes, 9,500; 11,800; pears, 15,700; apples, plums, practically none; crabapples, practically none; peaches, 25,700.

"In most cases we are greatly relieved to find that the most promising varieties have been selected for planting, and there is not much evidence of 'planting for planting's' sake.

Increased Tonnage

"To sum up these re-plantings, we find that there are 55,000 soft fruits and pears starting their producing life, and 25,700 apple trees. In addition, there are a surprising number of young trees not yet in full bearing, between one and five years old. So you see, we have a picture of a stiffer marketing, situation to face, with definitely increased crops for disposal.

"If we are to continue to grow, then we must have some product which will bring repeat orders. There is not a housewife in the country who will buy something just because we happen to grow it.

"This leads in natural sequence to the fact that we have received some considerable complaint in regard to the condition and quality of our fruit during at least a portion of the season.

"If we insist on growing more than that quantity, we must be prepared to receive lower returns for it. There is no question of the elimination of the grade—merely an effort to reduce it to manageable proportions. With crops the size of those we are now growing, a small percentage represents a large tonnage.

"It is of the utmost importance that packing houses and growers should work together and study the problem presented in each individual case. There is too great a lack of accuracy in adjusting handling facilities to the crop, and compressor capacity to the facilities. This again has an important bearing on the time during which the crop can be packed with best results. It becomes clearer every season that slow, leisurely packing reduces sales opportunity, and decreases cold storage capacity.

"Doubtless our production has increased faster than we could keep pace with it, particularly with all the obstacles arising from war conditions, but—as has been said often before—the consumer is not interested in excuses, and is only concerned with value for the money invested.

"If we adopt that as the theme song, 'I'll Get By,' we are headed for trouble. The bigger the production, the less will such a policy work. The time when we could 'get by' has gone by. Both growers, shippers and sales agency must continually be on the lookout for improved methods. Both for pickers and packers, universally good accommodation will have to be provided, because such help is unobtainable unless you have it, and the public is not interested in a statement that they are not getting their money's worth because pickers and packers are short. We must face these problems and not sidestep them.

"Only the other day I was visiting a grower who complained of the shortage of pickers, and one glance at his accommodation necessitated no further explanation. Of course, this reason does not apply in all cases.

"Let us continue to keep our house in order. It is neither impossible nor unduly difficult, and as time goes on it will pay great dividends for, bellow me, with the potential production now within the B.C. fruit area, we have got to be efficient or be dragged down by the very weight of our own tonnage.

"Furthermore, in view of the increasing efforts of our competitors, we must pay the fullest possible attention to the attractiveness of our packages.

"While I am on the job—and though it may seem a little bit off the subject—I might as well make myself thoroughly unpopular by suggesting that we review the habit into which we are drifting, by putting on fiestas during the packing season. The days thus lost cannot be retrieved. We sympathize fully with the praiseworthy objectives connected with these shows, and the desire to ensure fine weather for them, but I submit that from the point of view of the fruit-grower, they are likely to prove an expensive luxury.

"Looking at the packing house side of the picture, we think it is time that somebody drew attention to the short-sightedness of judging a shipper's operation entirely on a dollar and cents basis. Granting there is quite a tendency for growers, without thinking, to base their judgment of this or that packing house entirely on the question as to whether they paid a cent or two higher or lower than their competitors.

"It is more than possible—in fact, quite probable—that in many cases a cent saved (and highly applauded by the grower) has actually caused the shipment to the market of fruit which will eventually re-act to that same grower's disadvantage. We simply cannot afford, as reasonable, long-sighted fruit growers, to save money at the expense of quality and condition. We must deliver the goods, or the customer will find someone else to do it for us.

Clean Bill of Health

"A word on export. In any further program, an outlet to export markets must take high priority. We cannot do without them. This year, 43 per cent of our crop was marketed outside of the Dominion, and for many of those markets a clean bill of health is demanded. In order that government officials may give such certificate, we must devote our time to ridding ourselves of, or reducing to a minimum, certain pests whose presence will forbid export shipments. In this regard I mention specifically, San Jose Scale, against which a drive has been going on for two years.

"In the current report of Mr. Olds in regard to this, it is apparent that some districts—notably Keremeos—have been doing a careful, praiseworthy job, and have greatly improved their position. There are other areas, too, where a really conscientious attempt has been made to bring this insect under control, but there are still portions of some districts where it is being neglected, and from which it is impossible to export to certain overseas markets. Any such district adds to the difficulties of the marketing agency, and also imposes a handicap on the industry as a whole. We would urge that continued and intensive efforts be made to set our house in order in this respect, and where comparatively mild infestations are apparent, that they be cleaned up before they become a menace. This is really important, and will become even more so.

New Building

"Since your organization was formed in 1939, it has had to expand on three separate occasions, and at its convention last year we were authorized to put up suitable accommodation so that the marketing affairs of the growers could be given every possible opportunity of successful accomplishment. This has now been done, and—for the first time in its history—the B.C. fruit industry has a building devised entirely to fit its requirements, and to act as a workshop for the conduct of its operations.

"One other matter—in regard to revenue. At the commencement of 1948 another contract will be necessary. The existing contracts have been devised for three years, in order that should the growers so wish, changes can be made either in the personnel

Presidential possibilities in the G.O.P. field, SENATORS ARTHUR VANDENBURG of Michigan, left, and ROBERT TAFT of Ohio, right, hold a whispering session. They are leaders of the Republican majority in the U.S. Senate's 80th session which opened in Washington, D.C., this week.

SCOUT NEWS

First Summerland Troop continues to be fortunate in being able to meet in the school gym on Friday nights. At last Friday's meeting, basketball and a keenly-contested relay race served to let off steam. A number of tests were passed on the second class badge: First Aid by Ross Tingley, and Axmanship by Mel Monro and Graham Munn. The previous Friday, Mel Mitchell and Victor Smith also passed their First Aid test. We were glad to welcome to the troop as a recruit, Gerald Washington, who has been posted to the Hawk patrol. Patrol scores now stand at: Hawks, 361; Buffaloes, 351; Hawks, 383, and Eagles, 343.

The proposed skating party has been postponed from Jan. 31 to Feb. 7, on account of mild weather. Second Kelowna Troop wants us to visit them one of these days and challenges us to competitions in first aid, signaling, knot-tying, etc. We suggest that you lads do a little practicing on your own so we can put on a good show.

NOTICES—Next meeting, Friday, Jan. 31, at school gym. Duty Patrol, Hawks.

or the arrangements for the marketing agency, but since its inception, the amount of 'per box' deduction has remained constant. We think this is a good record. We do not know of any other institution, the cost of whose service has not gone up during the last eight years.

"We would not have to make any suggestion in this regard even now, if it was not for the fact that, with increased costs, we are in some danger of over-running our income in short years. If we could set aside a reserve in big years, for the short years, we would have nothing to worry about, but since this is not the case, and we return everything beyond expenses to the growers at each year's end, our revenue must be sufficient to cover our expenses, even in the 'off' years.

"I bring this up at this time because it is possible that the 'per box' deduction may have to be increased slightly at the time of signing the new contract.

"Whatever changes in detail may be considered advisable by the growers as the years go by, no other item is of greater importance than that we should stay together in a united operation. It is unthinkable that we should revert to a position where all of us are fighting separate battles against the well-organized competitors who are already knocking at our marketing gates."

Goldenberg Has Submitted Report

The survey of provincial-municipal relations undertaken by Dr. H. Carl Goldenberg, sole commissioner appointed for this purpose, has now come to a close, it is announced by Premier John Hart.

Dr. Goldenberg, during the past week, presented his complete report to the premier, who is now occupied with studying his findings and recommendations. As soon as more copies are available, they will be placed in the hands of the cabinet ministers and members of the legislature so that ample opportunity may be had for studying the proposals contained therein.

Premier Hart reiterated his assurance that immediate consideration would be given to the findings by the government.

Mrs. C. Underwood Heads Service Club

Mrs. Chris Underwood was elected president of the Women's Service club of the St. Andrew's United church for the coming year, at their annual meeting, which was held in the United church hall, on Monday evening, Jan. 20.

Mrs. J. C. Wilcox was elected vice-president, and Mrs. Lona Washington was chosen as second vice-president. Secretary for the coming year will be Mrs. Ross McLachlan, and treasurer, Mrs. Marion Baker.

The annual reports of the treasury and other committees, were read at the meeting, and a discussion of ways and means to raise funds for the coming year took place. The present membership of the Service club is at a high of 68.

The February meeting will mark the fourth anniversary of the club, it was pointed out.

Regulation Pursuant To Section 33 Of The Highway Act

Regulating Loads and Speed on the Provincial Roads in South Okanagan Electoral District

The undersigned, being a person authorized by the Minister of Public Works, in writing, to exercise the powers vested in the said Minister under Part II of the "Highway Act," and being of the opinion that the roads in the Electoral District of South Okanagan are liable to damage through extraordinary traffic thereon, hereby makes the following Regulations pursuant to Section 33 of the said Act.

The following load and speed limitations are imposed on all Provincial roads in the Electoral District of South Okanagan as from twelve o'clock midnight, Friday, January 24th, 1947, and until further notice:—

Trucks With Pneumatic Tires:

Payload—(i.e., load carried) not to exceed 50% of the tare (i.e., unloaded) weight of the truck and not to exceed 50% of the authorized carrying capacity.

Speed—Limited to 25 miles per hour.

Passenger Vehicles:

Not to exceed a speed of 30 miles per hour.

Vehicles Equipped With Solid Tires Are Prohibited Entirely

Dated at Kelowna, B.C., this 24th day of January, 1947.

CHECK MILK SUPPLY

Councillor F. E. Atkinson stated on Monday to the council that the Okanagan Health Unit is planning an investigation into the condition of milk being delivered in Summerland from the northern part of the valley.

Orange Lodge Plans To Expand In '47

A very successful meeting of the Loyal Orange Lodge, No. 2036, was held on Monday evening, Jan. 27, at the home of Brother Aart Advocaat, with Brother J. MacDonald, Grand Lodge officer, of Princeton, attending.

After some discussion as to the advisability of moving the Summerland charter to Penticton, it was decided to enlarge the present membership in Summerland and open a new lodge in Penticton.

One candidate was accepted and Brother L. W. Rumball was re-instated at the meeting. Officers elected for 1947 follow:

Brother H. Walton, Worshipful Master; Brother A. Advocaat, Deputy Master; Brother D. Taylor, recording secretary; Brother Harry Milley, financial secretary; Brother L. W. Rumball, treasurer; Brother E. Gould, first lecturer; Brother J. Burnell, second lecturer; Brother Wm. May, chaplain; Brother George Broderick, marshal.

GARBAGE DISPOSAL NEED IS STRESSED

Need of a garbage disposal in Summerland was indicated by Sanitary Inspector Black when he and Dr. G. L. Hutton medical director of the Okanagan Health Unit, met the municipal council on a recent Monday.

Mr. Black advocated a bylaw which would take in the main business section of West Summerland and a few of the homes being adjacent. Difficulty of obtaining a truck service for disposal to the garbage dump was emphasized in the discussion.

At one stage, Mr. Black started to say that "if you will stand behind me," but got no farther as Reeve Powell immediately declared: "We are standing behind you, in fact, we're pushing you." This was in reference to efforts to have proper sanitation conditions in the municipality.

Seven Skiers To Enter Tournament This Week-End

Seven Summerland skiers will be entered in the Okanagan ski zone championships at Kelowna this Saturday and Sunday, participating in the downhill, slalom and cross-country events. There will be no entries in the jumping events as there has been no opportunity here to practice jumps.

Bill Munro, Walter Powell, Don Agur and Ian McQuaig will be the senior men competing from this district, while in junior events Summerland will be represented by Bob Weitzel, Darrell Weitzel and Wally Day.

Summerland Crystal Ski Runners have also announced the dates for the local ski tournament to be held on Saturday and Sunday, February 22 and 23.

Between these two dates will come the Revelstoke ski tournament on Feb. 7, 8 and 9. There will be no Summerland entries for this event but six interested skiers will be witnessing this great outdoor spectacle. They will be Mr. and Mrs. Bob Mc Lachlan, Don Agur, Bill Snow, Bob Barkwill and Miss Freda Huenichen.

Mr. Agur and Mr. Snow will be Summerland representatives at the Western Canada ski zone annual meeting at Revelstoke.

NOTICE

Marjorie May Stewart, Deceased.

NOTICE IS HEREBY GIVEN that all persons having claims against the Estate of Marjorie May Stewart, of West Summerland, B.C., who died on the 6th day of December, 1946, are required on or before the 10th day of March, 1947, to deliver or send by prepaid letter full particulars of their claim, duly verified, to THE ROYAL TRUST COMPANY, the Executor of the Will of the said deceased, at its office at 626 West Pender Street, Vancouver, B.C.

AND TAKE NOTICE that after the last-mentioned date the said Executor will proceed to distribute the assets of the said deceased among the persons entitled thereto, having regard only to the claims of which it shall then have had notice.

DATED the 28th day of January, 1947.

THE ROYAL TRUST COMPANY, EXECUTOR,

By Boyle & Aikins, Shatford Block, Main Street, Penticton, B.C., its Solicitors.

STURDY STOCK IS FIRST ESSENTIAL

At the 58th convention of the B.C.F.G.A., in Kelowna, on Tuesday, Albert Millar, Oliver, chairman of the growers' rehabilitation committee, urged veterans anxious to take up land to consider only really good land having an adequate water supply and located in a position usually free from late spring and early fall frosts.

"They should seek competent advice as to what variety of trees should be planted, always bearing in mind suitability of the soil, market requirements and limitations.

"When acquiring stock for planting, they should avoid purchasing from those nurseries which do not give a certificate of truthfulness of name and freedom from pests and diseases.

"When the V.L.A. makes arrangements to settle a veteran on the land as a potential fruit grower, it would be advisable in fairness to both the veteran and the 'scheme' to make certain that only such nursery stock shall become available upon which a certificate has been issued by a competent authority guaranteeing that the trees are:

- 1. Grown on the most suitable stock of requisite hardiness.
2. True to name.
3. Gions obtained from trees producing satisfactory crops of fruit of desirable type.
4. Disease free.

This committee would like to see the V.L.A. recognize stock as being a primary factor in establishing potential orchardists and just as important as soil condition, location, water supply, etc.
