West Summerland, B.C., Thursday, January 8, 1948

Two By-laws For Roads Are Nearly Ready

Approval of the department of municipal affairs to the proposed bylaws for road surfacing and road equipment purchase in 1948, to the amount of \$40,000, has been obtained by the municipal council, with a rider that the roads and streets to be surfaced should be included in the bylaw.

Although three readings had already been given these bylaws the council on Monday decided to amend the surfacing bylaw and re-submit it before preparing to present them to the ratepayers for approval.

One bylaw seeks permission to issue debentures at 2 1/2 percent interest for five years to raise \$12,000 to purchase a new grader, and truck, while the other bylaw calls for a similar type debenture to raise \$28,000 to hard surface roads in the municipality and do capital construction work on the Garnett Valley road.

The roads specifically mentioned by the council are as follows: Giant's Head road to Trout Creek Service Station corner; Hospital hill from the switching station to the arterial highway at the Co-op corner; from the forks of the Gulch road to the top of the horseshoe; Garnett Valley road from Quin-polee road to Theed's hill; the road from the B.C. Fruit Shippers' corner north to the arterial highway; the roads in the West Summerland business district with the exception of Kelley and Hastings streets, completed last year; the road leading from the arterial highway west to Garnett Valley road.

These roads include an estimated nine miles of surfacing, some of which must have an oil application and mulch and others just a mulch application.

DUMPING OF STUMPS

Councillor Harvey Wilson asked for council action on Monday to stop the dumping of stumps on the road allowance on the McDachian hill road. Foreman E. Kercher was instructed to ascertain if these stumps are actually on the roadway and to notify the police if Councillor Wilson's contention is proved correct.

Little Change In Council Setup For 1948

(First named in each case is chairman of the committee)

- Roads: H. L. Wilson, F. E. Atkinson.
- Finance: F. E. Atkinson, E. M. Tait.
- Electric Light: F. E. Atkinson, E. M. Tait.
- Parks, Beaches, Cemetery: E. M. Tait, F. E. Atkinson.
- Irrigation: C. E. Bentley, H. L. Wilson.
- Real Estate: C. E. Bentley, E. M. Tait.
- Foundry: Reeve F. A. Johnston.
- Hospital Board Representative: E. M. Tait.
- Union Library Representative: Magistrate H. Sharman.
- Health Unit Representative: F. E. Atkinson.

The board of health, which is supposed to have quarterly meetings, has been left to the call of the reeve.

Building Values Near \$300,000 Ahead of 1946

Building permits in 1947 exceeded those of 1946 by some \$20,000 the latest report of Building Inspector Roy F. Angus revealed to the council on Monday afternoon. Total of building permits issued last year was \$280,880 while the permits issued in 1946, plus an estimated figure for the first part of the year, amounted to \$260,555.

In December 18 permits were issued for a value of \$17,315 being made up of four new dwellings at \$7,500; three commercial or institutional at \$8,800; and 11 permits for alterations and additions, at \$1,215.

Without any really large building being included in this building total, it is believed that this has been one of the busiest building years in the history of the community. New homes have formed the bulk of the permits while many small commercial and institutional buildings have been erected, chief of which is the fish hatchery in lower town.

Miss Dorothy McLean, who has been visiting her mother and her brother, Aubrey McLean in Summerland, returned at the weekend to her home in Vancouver.

Baby Boy First Infant of 1948

First 1948 baby born in the Summerland district arrived on Saturday, January 3, and is a baby boy, the son of Mr. and Mrs. Andrew (Sandy) Fenwick, of Summerland.

Also, the last infant to arrive at the Summerland hospital in 1947, was a boy, the offspring of Mr. and Mrs. Ronald Metters, of Summerland.

WIDEN LANE SOUTH OF GRANVILLE

An arrangement has been concluded between the municipal council and John Dunn whereby the municipality will obtain a strip of Mr. Dunn's orchard land twelve feet wide so that the municipal lane paralleling Granville street on the south side can be extended to a width of forty feet.

This will mean that the lane can be widened throughout its length to conform with the width now prevailing in front of the Living Memorial park-playground.

In return for this strip of land, Mr. Dunn will become owner of Lot 27, DL 1645.

Liberals Have Not Set Nomination Day

At a meeting in Kelowna last night, the South Okanagan Liberal Assn executive, headed by Reeve Reid Johnston, of Summerland, discussed the calling of a convention to name a Liberal standard-bearer in the forthcoming by-election to name a successor for Hon. Grote Stirling, former M.P. for Yale.

"We will hold a nominating convention in ample time for the by-election," was the reply of Reeve Johnston when queried by The Review this morning. No further information was forthcoming.

Besides Reeve Johnston, Councillor H. L. Wilson and Colin McKenzie attended the executive session.

While skating at James Lake last Friday, Douglas Wakefield, 14, unfortunately broke his leg. He is a patient in the Summerland hospital.

Miss Glenys Grant, R.N., of Vancouver, has arrived in Summerland to join the staff of the Summerland hospital.

Record Number of Delegates To Attend Growers Convention

Chas. A. Hayden, secretary of the BCFGA reports from Vernon this week that a record number of delegates, 77 in all, will attend the 58th annual convention of the growers' association in Penticton on January 20, 21 and 22.

An imposing list of speakers is being arranged for this big three-day growers' affair with Hon. Frank Putnam, minister of agriculture and Hon. E. C. Carson, minister of public works being two of the Victoria-cabinet representatives to head the list.

W. A. Luce, of the United States department of agriculture at Yakima will be another speaker, while Wm. McGillivray, director of the dominion-provincial farm labor service for the province will also give an interesting report to the growers.

From Summerland, Dr. James Marshall, chief of the entomological laboratory, Dr. J. C. Wilcox for the experimental station and Dr. Maurice Welsh of the plant pathology laboratory are to be the main speakers giving the growers an insight into advances made in experimental and research work on their behalf.

Dave McNair, president of B. C. Tree Fruits Ltd., has written to growers locals throughout the interior stating that Dave McNair, the sales agency sales manager will not be present to give his annual report to the growers.

Mr. McNair is travelling to California to be present at a general meeting of the United States Wholesalers Assn., but will leave an address to be read at the growers' meeting in Penticton. "The importance of our connection in the United States is so great that I feel that it even overrides the advisability of his appearance at the BCFGA convention," explains Mr. Loyd.

"It is my firm opinion that he can do more for the industry by appearing at the general assembly in San Francisco on behalf of the fruit industry. It is with great regret that he himself is unable to appear but it is better that he should strengthen our selling ties with United States buyers than that any chance should be taken that they would feel we were in-

different, if he did not appear at their convention."

Official Delegates

Delegates to the Penticton 1948 convention are as follows: Kamloops—Hans Greaper, Gus Eppler, John Morganthaler, Sorrento and Blind Bay—J. Robinson.

Salmon Arm—W. R. Fulton, D. R. Sinclair, E. T. Wright. Armstrong—Fred Hitt. Vernon—J. K. Watson, George Turner, W. Goodenough, M. S. Freeman.

Coldstream—W. A. Middleton, E. Hamsley. Oyama—T. S. Towgood, A. W. Gray.

Ellison—L. Piddoke. Winfield, Okanagan Centre—Walter Brodie, E. C. Nuyens, John McCoubrey.

Glenmore—Ivor J. Newman, James Snowsall. Okanagan Mission and Kelowna—K. R. Young. Rutland—A. L. Baldock, C. D. Buckland, A. W. Gray, H. G. Walburn, A. Weighton.

South and East Kelowna—Francis Thorneloe, Jr., Nigel Pooley. Westbank—J. W. Hannam, J. N. Basham. Peachland—H. C. MacNell, Chesel R. Haker.

Summerland—J. Y. Towgood, E. M. Tait, Roy Smith, Colin McKenzie, J. W. Caldwell, W. T. Beasdale, C. E. Bentley.

Penticton—J. W. Johnson, R. S. Warr, Sr. and Jr., H. Corbishley, H. B. Stocks, S. R. Hawkins, C. C. Sworder.

Naramata—Wm. Steel, Phillip Workman. Kaloden—E. Bomford, D. Hester, Keremoo and Cawston—J. B. M. Clarke, H. C. McGuffin, C. G. Walker, S. Manery.

Oliver—G. A. Lundy, D. Corbishley, A. E. Garrish, H. Boone, C. W. Norton, N. Corcoran. Osoyoos—H. C. McAlpine, W. C. McConnachie, A. Brownjohn, L. Fedore.

Grand Forks—C. V. Maggitt. Robson and Conington—Duncan Carter. Boswell—Ken Wallace.

Sunshine Bay—G. D. G. Barwis. Willow Point—Hugh Middleton. Creston—G. P. Smith, R. D. Currie, T. Littlejohn, R. Dewar, A. Kemp, F. Powers.

Legion Club Licence Plebiscite Cancelled But Will Be Re-opened Early in February Say Officials

Cancellation of the writ authorizing the plebiscite on the Legion club licence in West Summerland has been announced from Victoria but unofficial sources state there is every likelihood that the vote will be taken here early in February, probably on February 3.

This cancellation was caused because of the failure of provincial authorities to include Summerland polling division in the plebiscite, along with West Summerland division, plus the short time allowed to register new voters on the voters' list, considering the Christmas and New Year's holidays which intervened.

Despite the short time allowed, by January 2, there were 665 names added to the voters' list for both West Summerland and Summerland. This is considered a fair proportion of the probable voters in the two divisions but does not include all those who might register, it is considered.

Now, however, there is still time for further persons to get on the voters' list and register their choice in the forthcoming plebiscite. The offices of Lorne Perry, West Summerland and White & Thornthwaite in Summerland have been designated as places where forms may be obtained by those wishing to register.

On Monday, Mr. R. Hurley, provincial registrar of voters, visited Summerland district and obtained a first-hand information on the voting problems here. Together with Mr. E. Ross Oatman, provincial government agent in Kelowna, a formal statement has been issued on the question of registration of voters and the likelihood of a plebiscite being held.

This statement was as follows: "A plebiscite was to have been held in the West Summerland Polling Division of the South Okanagan Electoral District on the granting of a Veterans' Club licence. A misunderstanding arose in this connection and authority for holding the plebiscite was cancelled.

"It has been requested that a vote still be taken on the above question, but for the Summerland Polling Division as well as West Summerland. These two polling divisions constitute the Summerland Municipality. It will be recommended to the appropriate authorities and if permission is granted the voting could take place early in February.

"Whether a plebiscite is held or not those persons who are eligible and whose names are not now on the voters' list should register now as only those whose names are on the list can vote. For the convenience of persons wishing to register they may do so by calling at the office of Lorne Perry, West Summerland. Forms may also be obtained in Summerland at White & Thornthwaite garage.

When it was first announced from Victoria on December 19 that a plebiscite would be held on January 13 and the voters' list would close on January 2, both those favoring the Legion petition for permission to obtain a veterans' club licence and those opposed to the measure lost no time in rounding up persons to register.

The West Summerland list had been cut down from 1015 in 1945 to 715, while the Summerland list had not been amended but had remained at 461. By January 2, 665 new registrations had been obtained. These had not been checked for duplications when this figure was announced. If they were all in good standing, the figure for the two polling divisions would stand at 1,841.

In Summerland on Monday, Mr. Hurley intimated that he would recommend to the provincial government council certain dates for the closing of the voters' lists and the holding of the plebiscite.

He stated that as soon as this necessary permission is obtained official proclamations would be given.

Unofficial sources set the date for closing of the voters' lists at January 23 and the plebiscite on February 3.

Prior to the cancellation of the January 13 vote, W. C. W. Fosbery had been named returning officer for this plebiscite. It is expected he will be reappointed for this post.

Both the Legion supporters and the "Drys" have been extremely busy in their campaigns to acquaint likely voters with the plebiscite and to see that all possible names are registered on the voters' lists.

Those in charge of registering voters in South Okanagan district have used the facilities of Lorne Perry's office to a large extent in the past three weeks.

New Appointment For Percy Richards

Percy C. Richards, who for eleven and a half years has acted as secretary to Dr. John Hart, first when he was minister of finance and later as premier for the last six years, has been elevated to the position of assistant to the deputy minister of railways, Mr. J. M. Stewart. He is at present on loan from that department and is acting as secretary to the premier until a successor is appointed.

Mr. Richards was formerly on the editorial staff of the Victoria Daily Times and Victoria Daily Colonist, being for some years a member of the legislative press gallery before going to California to join the United Press association, where he was assistant manager of the San Francisco bureau in charge of six western states. It was upon his return from California that he assumed his post as secretary to Mr. Hart.

Review Editor Takes Control Of Company

Announcement is made this week by J. R. Armstrong, editor of The Review, that he has completed arrangements to purchase the majority of common stock in the Summerland Review Printing & Publishing Co. Ltd.

Mr. G. R. B. Fudge who, in June 1946, joined forces with Mr. Armstrong to form this limited liability company to produce The Summerland Review and operate the job printing shop in West Summerland, is retiring from the company as from January 1, 1948.

Mr. Armstrong, by this business change, has acquired the controlling interest in the business and will continue as editor and publisher of The Review.

Associated with Mr. Armstrong in the company will be Mr. T. McKay, who takes charge of the mechanical department of The Review. Mr. E. W. Manning is also a member of The Review staff.

This change in the business setup of the company takes effect from the first of the year.

Mr. Fudge, who is well known to most Summerland residents, will continue to operate his fruit orchard on the sandhill and will continue to reside on the Crescent Beach road in Summerland.

Assessments Up 15 Percent At Year End

Assessment notices were received throughout the municipality at the year end and caused some concern, as it has been found that the general upward revision of land and improvements assessments has amounted to approximately fifteen percent.

No figures are available as to the probable increase in assessment values, the municipal office declares, but Municipal Assessor Roy F. Angus submitted a short report to the new municipal council on Monday.

Mr. Angus noted that 1947 had been a year of active property turn-over and 62 new reference plans had been filed during the season, besides many more property transfers.

Assessed values, even with the higher valuation, are still considerably below the declared values of properties, Mr. Angus pointed out. He instanced the tremendous increase in building costs and the high values at which properties are selling.

On the lakeshore, properties are now at a minimum and are in great demand, these factors being the motivating force behind the necessity for higher assessment valuation.

Although all properties have not been increased a general fifteen percent, the general increase in assessment values for land and improvements combined will be in the neighborhood of fifteen percent, he declared.

These new assessed values will be subject to the annual court of revision of the assessment roll, to be held later in the year.

It has been pointed out that the method of increasing assessed values in this municipality at this time corresponds to the trend indicated by the assessor in Vancouver.

This striking camera study of QUEEN MARY was taken on Christmas Eve as the Queen Mother drove to the station to entertain for King George's Sandringham estate, where the Royal family gathered to celebrate Christmas.

Two Councillors Unopposed As Reeve Johnston's 1948 Council Sworn In and Starts To Work

Two councillors, F. E. Atkinson and C. E. "Ned" Bentley, who resigned their posts in mid-term to contest the reeveship were returned to their offices by acclamation on Monday when nominations were closed by W. C. W. Fosbery, returning officer. No other candidates for the unexpired one-year terms were forthcoming and the councillors now take their places once more on the municipal council.

Reeve Reid Johnston, successful candidate in the recent election for reeve, signed his declaration papers and oath of office on Monday, as did other members of the council. The 1948 council then proceeded, without further ceremony, to consider new business for the year.

There was no official ceremony in connection with the new council taking its oath of office. Signatures were affixed and the council set about its work.

Francis Edward Atkinson was proposed on his nomination papers by Eric M. Tait and seconded by John Y. Towgood. C. E. Bentley's proposer was W. R. Powell, 1947 reeve, and Eric M. Tait.

Councillors Eric Tait and Harvey L. Wilson had already received nomination for council posts by acclamation and are the other two members of the 1948 council.

Welcomes Them Back

"I am awfully glad to see Mr. Atkinson and Mr. Bentley back on the council," declared Reeve Reid Johnston on Monday afternoon at the conclusion of the 1948 council's first session.

"I am sure that in 1948 we will all pull together and make Summerland a better place in which to live. We should have one object together—the progress of our own municipality.

"Any little feeling which crept into our relations in the past month has now been wiped out and I hope we can all work together," he concluded.

Reeve Johnston spoke of the difficulty he will experience in succeeding a man with many years' municipal experience—W. R. Powell. "I will have a hard task to fill his place," declared His Worship.

Little Committee Change There was little change in the setup of 1948 municipal committees, as announced by Reeve Johnston at the outset of the meeting.

The main committee heads remain the same and the only change is that Councillor Atkinson will assist Councillor Wilson on roads in place of Councillor Bentley, and the latter assumes command of the real estate committee in place of Councillor Atkinson.

The council decided to continue its policy of rotating the position of acting reeve, and Councillor H. L. Wilson was chosen for this post in the coming year.

There will be a change in meetings times, however, due to Reeve Johnston's position as station agent at the West Summerland CPR station.

Time of Meetings

Regular council meetings will be held on the second and fourth Tuesdays of each month, instead of Mondays. The commencement time of the meeting has been set for 8:30 o'clock, with a continuation at 7 o'clock after an hour's break for supper. It has been decided that no evening sessions will continue after 10 o'clock.

Deputations will be allowed to all their views to the council at 8 o'clock on regular council meeting dates.

It was suggested by Reeve Johnston that more references could be made to the municipal foremen on pressing questions by the ratepayers, thus eliminating considerable time in council sessions.

Reeve Johnston also considered that evening meetings would be preferable to afternoon meetings, as Summerland is the only place in the Okanagan which conducts afternoon council sessions. He considered that if evening meetings were chosen more men in business would be induced to take posts on the council.

However, he was willing to compromise with sessions commencing at 8:30 each afternoon.

EDITORIAL

A New Premier

British Columbia, at the turn of the year, welcomed a new leader in the legislature at Victoria. Byron "Boss" Johnson, recognized as one of the business leaders of the province, assumed the mantle of premier laid aside by Hon. John Hart.

Besides welcoming a man who has figured prominently and well in the political life of this far western province, British Columbia also welcomes a continuation of the coalition form of government.

It was with no little concern that British Columbians watched the developments at Victoria from the time that Mr. Hart announced his forthcoming retirement and the Liberals chose Boss Johnson as their leader, in an extremely close contest with the "machine" choice, Hon. Gordon S. Wismer, Attorney-General.

Many were fearful that the coalition would fall apart due to the controversy between Liberal and Conservative members of the legislature over the appointment of the new premier.

However, those differences were ironed out. The new government concedes the status of both old-line parties in its new name, that of the Johnson-Anscomb Coalition Government. That the differences between the two parties to the coalition must have strained the ties severely at times can be conceded. But it is to the credit of both parties that they were able to bury their grievances and come forth with a continuation of the coalition.

It has twice been demonstrated that the people of this province like the coalition type of government. It has given good government despite weaknesses in some departments, the most well-known being the implementation of the Cameron report on the system of education.

The province is now launched on a public works program which has given satisfaction throughout and will provide even greater satisfaction when more machinery and manpower is available. Many other departments have taken great strides forward since the cessation of hostilities.

Most persons feel confident that the new provincial leader, Boss Johnson, is capable of carrying on in the harness dropped by John Hart, whom most persons consider one of the ablest leaders ever to lead a government in this province.

No By-election

F. E. Atkinson and C. E. Bentley returned to the municipal council table this week by acclamation to complete their unexpired terms. In offering themselves once more as council members they have indicated that they have the best interests of the community at heart and can rise above the slight stigma of defeat.

These two councillors resigned their seats in order to contest the reeveship. They were defeated by a popular and well-known resident whose community work has been known here for twenty years.

To suffer defeat rankles somewhat in any person's breast, no matter how good a sportsman he may be.

It will be for the good of the community, however, that they have returned for another year. They will be able to give Summerland's new chief magistrate, Reid Johnston, welcome advice based on knowledge acquired over several years' council work.

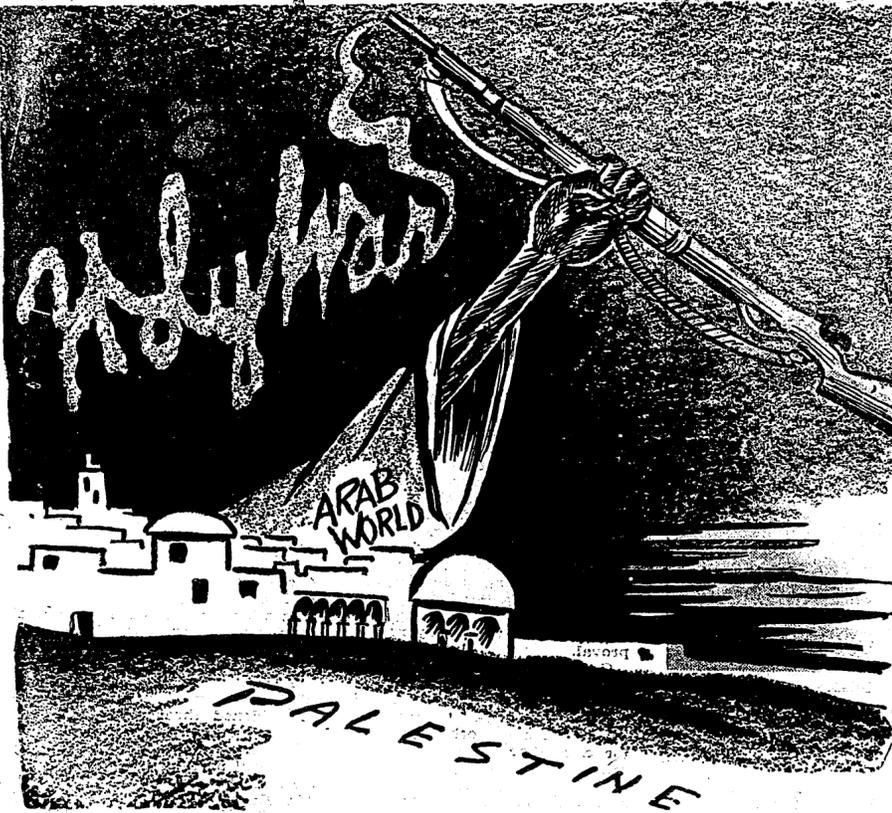

If Reeve Johnston had been faced with a council comprising only two of the previous year's group, he might have found the task of acquainting himself with past endeavors an arduous one. Now, he has the four 1947 councillors to assist him and we anticipate that he will be able to adjust himself to harness more rapidly than otherwise would have been the case.

We can look forward to a year of progressive administration with a council prepared to carry on work already laid out and to institute plans for new endeavors.

BETTER CITIZENS

In my work on the American delegation to the United Nations, I have realized that we have achieved an institution through which world peace may be secured but we have not yet found the world consensus necessary to make the institution work for the good of humanity. The United Nations is far in advance of our present capacity to use it and no more tinkering with its structure will compensate for our human failings. We must become better men and women and better citizens of the world if we would achieve lasting peace. —Mrs. FRANKLIN D. ROOSEVELT, in a letter to the American Association for the United Nations, Inc.

MORE TROUBLE

Penny Wise

By PENNY WISE

Well, here it is again... that time of the year when you make a lot of darn fool resolutions that you immediately turn round and snap right in two the very

first time someone comes forth with something that gurgles.

But why not fool everybody this time (including yourself). Why not make some resolutions that you will keep, and that will do a lot of good, as well as

of other people yourself.

You could, frinstance, resolve not to monopolize that party line, and not to click the phone up and down when someone is on it and you think you should phone and chat with Aunt Kate.

You could resolve NEVER to serve hamburger AS IS. There are dozens of ways of making it delicious.

And NEVER bother your good man with household cares and worries UNTIL he's had his dinner.

And always pretty yourself up in the afternoon regardless of how busy you are.

And DON'T scold the youngsters when they break dishes, even your best Limoges. After all, they don't do things like that on purpose.

ALWAYS wear a pretty nightie, even though it is a warm, cuddly one. And an attractive dressing gown.

DON'T be too busy to listen to your small fry's chatter. They'll only be small a short short time, remember.

Try to interest you, tea-time friends to something apart from gossip, and of course you won't pass on anything of the kind yourself, no matter how choice a morsel you may know.

Be sure not to squeeze the toothpaste tube from the TOP; DON'T leave the face cloth in a soggy wet lump; wipe off any stray hairs you may scatter around the wash basin; ALWAYS scrub the bath shiny-white after you're through.

Make it a rule not to use any linen table napkins during the whole year; the paper ones are okay—except for visiting firemen, maybe!

Be always ready to leave the dinner dishes in the sink and

The Inside Story

By AGROLOGIST

I began the New Year right by visiting the experimental station. I found Nat May and George Ryman in the greenhouse very busy operating a machine which looked to me like a cross between a dentist's drill and a model T Ford. In due course, I ascertained that this gadget is a pot making machine.

In its present form the machine was designed and built by Jack Embree. Like many other gadgets which Jack Embree has invented, the pot making machine is most practical and efficient. The operator places a double handful of the prepared compost in the mold cup. He then steps on a lever and down comes the rotating spindle which molds the pots in short order. The operator then releases the peddle and steps on another one, whereupon the pot pops out, ready to be set away to dry.

Nat was having so much fun operating the machine, that he seemed loathe to take time off to tell me about it. However, he finally stopped long enough to give me the following information.

The idea of making pots at the station germinated in the fertile brain of Alfred Hornby, at the time he was head gardener at the station. Unable to persuade the superintendent to buy some regular fired flower pots, Hornby was determined to make some himself. He experimented with various combinations of clay, peat, and cow manure, with the result that he finally achieved a mixture which was easy to mold and yet dried into a hard pot without being fired.

Hornby worked with very crude equipment, but he managed to make some excellent pots. Furthermore, he proved that these pots were highly satisfactory for geraniums to be used for bedding out purposes. In fact, ever since that time this type of pot has been used in propagating the geraniums for the formal beds, which are such an attractive feature of the ornamental grounds at the Station.

The chief advantage of the compost pots for geraniums is the fact that when planting out time arrives, the pot as well as the plant is set in the bed. The walls of the pot are sufficiently porous that some of the plant roots pass right through the pots into the soil. However, the root system of the plant is somewhat constricted which increases the amount of bloom for the size of the plant.

According to Nat, it is most important to have the compost mixture just right. He uses one part of fresh cow manure without straw, two and one half parts of horticultural peat, two parts clay, and two parts garden soil. These materials are sifted through a half inch screen and well mixed together in the dry condition. Sufficient water is then added to make a stiff dough. This mixture should be damp enough to stick together when pressed in the hand, but dry enough so that no moisture can be squeezed from it. When the mixture is too dry, it is hard to mold and does not stick together well. On the other hand, when it is too moist, the machine is liable to push the bottom out of the pot.

Nat informed me that the customary rate of production is about one pot per minute. However, when visitors are on hand production can be increased to one hundred pots per hour. Furthermore, when the superintendent makes his daily visit, pots are often produced at the rate of one hundred and fifty per hour.

dash off with the man-you-marrried to the local show—in time to catch the bargain ra'ces, at that.

ROAD AS "JUNK YARD"

That plasterers are using the road between Dr. Vanderburgh's corner and the W. Hack property as a "junk yard" was Councillor Harvey Wilson's contention to the council on Monday. Foreman E. Keroche, was asked to investigate and take any action necessary.

CONSIDERS SUBDIVISION

Mr. Louis Schindell is considering the subdivision of the former Elsey orchard opposite the municipal public works shed, the municipal council was informed on Monday. A rough sketch plan has been drawn up but no further steps have been taken, it was stated.

MAKES FRUIT BOXES

MERRITT—From cottonwood logs J. Ekersley intends to manufacture fruit boxes of various kinds at a new mill under construction at Canford alongside the railway track and close to Canford Sawmill.

Pioneer Days

THIRTY YEARS AGO

TWENTY YEARS AGO

January 6, 1928

Kelowna reports a conference on the probable high water level to be expected on Okanagan lake this year and the probable damaging effect on the lakeshore highway between Kelowna and Penticton. F. W. Groves, Kelowna engineer, stated the lake would probably rise two and a half feet.

Summerland council voted against a proposal submitted by the Union of B.C. Municipalities on the subject of providing pensions for teachers.

Application of the Rialto theatre for electric power to run its picture machine has received council consent.

Two medals, donated by the department of agriculture to students interested in the poultry club were won at the term-end by Sadi Purves and James Clark.

The death occurred on Friday, Dec. 23 of H. J. Sanderson, a resident here for seven years. Funeral arrangements were conducted under auspices of the IOOF.

On December 30, it was 8 degrees below at the experimental station and 15 below at the top of Prairie Valley.

On Tuesday, Dec. 27, St. Stephen's church was the scene of a pretty wedding when Ethel May Harrison, second daughter of Mrs. R. R. Chew became the bride of Alexander George Dewar, only son of Mrs. H. M. Lumsden.

An extension on the north part of the building is being projected for spring by Walters' Ltd. packing house.

The Co-op expects to provide a return of one dollar per box when the McIntosh pool is closed. This is the growers' idea of the "ideal return."

John Cummings and Edward Smith have returned from Victoria where they attended the Boys' Parliament.

Teen Town

By NEB

Well, kids, I have some bad news this week. The last few dances have been a flop. Let's make a new year's resolution to make all the dances a success by being there.

There will be a dance this week, so watch for the signs.

A complaint handed in by some mislead' people was that Teen Town was keeping some teen-agers out until 2:00 a.m. and even later. All Teen-Town activities end at 12 sharp. Whatever it is that keeps them out that late has nothing to do with T.T.

The last council meeting was held at the home of Mel Ducommun, one of the adult advisors.

To give the orchestra (and your ears) a rest we will be having records for part of each dance.

It won't be long until election time so get ready with lots of nominations for 8 aldermen and 1 mayor. This column is not so hot as far as unity is concerned but I haven't very much time.

Another complaint, this one is by some Teen Town girls. They say that more girls would be at dances if the boys would take them. Any girls having the so-called New Look can throw out all hope of their heart-throb taking them to Teen Town.

CO-OPERATIVE EFFORT

Although, at Confederation in 1867, when the original provinces united, responsibility for health stewardship as between federal and local authorities in Canada was defined only broadly, successive national and provincial administrations of vision have created wide and efficient health structures with a minimum of overlapping.

Treatment and health services generally have remained the prime responsibilities of the provinces, as was intended. To its constitutional role of guarding against importation of disease and its spread in Canada, the federal authority has added numerous services extending leadership and assistance to the local authorities in their specific problems.

Would Build Road Through States

Hon. E. C. Carson, minister of public works, has announced that arrangements have been made for British Columbia surveyors to map out a route for the public works department over the proposed Victory highway through the State of Washington in order to link Cascade and Paterson.

This is preliminary to further negotiations to secure the right from the United States to construct a provincial highway on American territory in order to overcome the construction difficulties presented in building over the Cascade range.

The corridor sought through the State of Washington would enable a road to be built for approximately \$1,500,000 with the highest altitude 2,800 feet against an estimated cost over the B.C. road of \$4,000,000 with the altitude reaching a maximum of 5,400 feet.

SELLS ROAD END

Final reading of the bylaw to sell the road-end between the Summerland Co-op cannery and the fish hatchery to the former company for the sum of \$250 was passed at Monday's council meeting. This takes in the property between the arterial highway and the lakefront.

7:00—Butcherteria vs Capitol Motors, Hill's & Clough's vs Groceteria; 8:30—Frozen Food vs Elliott's, Cake Box vs Family Shoe Store.

Wednesday, February 18—
7:00—Bowladrome vs Holmes & Wade, Overwaitea vs Smith & Henry.

Monday, February 23—
7:00—Butcherteria vs Bank of Montreal, Capitol Motors vs Westland Bar; 8:30—Frozen Food vs Mac's Cafe, Cake Box vs Nesbitt & Washington.

Tuesday, February 24—
7:00—Bowladrome vs Sanborn's Garage, Hill's & Clough's vs Smith & Henry; 8:30—Holmes & Wade vs Review, Family Shoe Store vs Quality Meats.

Wednesday, February 25—
7:00—Elliott's vs Pollock Motors, Groceteria vs Overwaitea.

Monday, March 1—
7:00—Frozen Food vs Westland Bar, Cake Box vs Mac's Cafe; 8:30—Elliott's vs Quality Meats, Groceteria vs Pollock Motors.

Wednesday, March 3—
7:00—Butcherteria vs Overwaitea, Capitol Motors vs Bank of Montreal.

Monday, March 8—
7:00—Bowladrome vs Mac's Cafe, Hill's & Clough's vs Nesbitt & Washington; 8:30—Holmes & Wade vs Sanborn's Garage, Family Shoe Store vs Smith & Henry.

Tuesday, March 9—
7:00—Elliott's vs Review, Groceteria vs Quality Meats; 8:30—Butcherteria vs Pollock Motors, Capitol Motors vs Overwaitea.

Wednesday, March 10—

NO FURTHER CONCESSION

On Monday, the Summerland council turned down an application by Mr. Eyre for further concessions in relation to the charge of \$191.21 made to him by the municipality for electrical extension. Mr. Eyre contended that, as G. H. Doherty had obtained an extension for a cost of only \$100 that he should be further reimbursed but the council stated that it could not be considered a joint application for extension.

Canadian Fashion

Thousand Dollars For Food Parcels

A cheque for \$1,000 has been forwarded to Canadian CARE, from the citizens of Summerland to take care of food parcels for the people of Great Britain.

With this move, the work of the Royal Wedding Fund has just about been concluded, A. Calvert, chairman of the drive, has indicated. An official letter has gone forward to Princess Elizabeth, informing her of the good deed of the citizens of this community.

There is still a small sum of just under seven dollars to be contributed by some organization and the Royal Wedding Fund can be wound up. All expenses in connection with the celebration of the Princess' wedding in Summerland with the exception of this amount have been covered by donations from civic organizations.

These organizations consist of the municipal council, board of trade, Canadian Legion, Masonic order, Women's Institute, IOOF, AOTS, Rotary club, Evening Branch of St. Stephen's W.A., United Church Women's Service club, and the Legion W.A.

PRIZES IN RURAL HOUSING CONTEST OFFERED TO W.I.

A rural housing contest for the rural women of British Columbia through the Women's Institutes is being launched early this year. This is sponsored by the rural housing advisory committee of this province, with prizes amounting to \$400 offered by the Central Mortgage and Housing Corporation of Ottawa. The first prize is \$125, the second \$75, the third \$50, and there are six honorable mentions of \$25 each.

Rural housing is a subject that has aroused the interest of the Women's Institutes for some time, and the opportunity of discussing their ideas in a group and then sending them in for competition is expected to prove popular. The prizes are given to Women's Institutes and not individuals so that the benefit of group discussion and ideas may be pooled.

Both for improvements, new building and conveniences, figures show that the urban centres have the advantage.

The aim of the contest is to bring out the sore points of inequality, and suggest some means of bridging the gap between city and country. Qualified judges will consider all competitors, and as a series of questions are asked, it will be an easy thing for all Institutes to take part.

The contest is divided into five different groups for discussion. A general series of questions on climate, location and site, and electricity if any, comes first. Then the farm house, the needs of the district for repairs, and the suitable house to build with ideas for the planning of grounds and house follows. Debatable questions in this category are one regarding a utility room and its location, a farm office in the house, and whether or not a separate dining room is considered necessary.

Further questions for discussion are regarding construction of the farm house, the type of windows and floor covering, while a series of questions regarding the kitchen give scope for many ideas regarding arrangement, location of sink, type of range preferred etc. A group deals with heating, with furnaces as against stoves, and the final question is one regarding water supply and the conveniences required.

The whole contest is planned to get the ideas of women about the kind of farm home they require, and is open to all Women's Institutes. The information gained from the contest will be used as a basis for farm home planning, and will be made available to government engineers and architects who are investigating this particular angle of farm life in Canada today.

APPLICATIONS APPROVED

Electric light applications from L. Dodman, L. A. Smith, and W. W. Borton were approved by the council on Monday. Domestic water applications from Mr. Borton and Mr. Dodman were also accepted.

EDUCATION at YOUR FINGER TIPS

All over British Columbia, schools tune in for the familiar words, "The British Columbia Department of Education, together with the CBC and its affiliated stations, brings you another school broadcast."

WHAT ARE SCHOOL BROADCASTS? School broadcasts aim at presenting material difficult to include in ordinary lessons. They are especially suited to music appreciation, social studies, English and similar subjects. Begun as an experiment more than ten years ago, the first programs were so successful that the Department of Education decided to broadcast permanently over the CBC. Half-hour programs at 2 p.m. each school day, from the end of September to the end of April, are broadcast throughout the province.

HOW ARE BROADCASTS USED? The programs are correlated broadly with subjects on the school curriculum. Here is the general broadcast plan for this fall:

MONDAY—Programs on "Life in the Community," emphasizing qualities of good citizenship.

TUESDAY—Music appreciation and rhythmic for lower grades.

WEDNESDAY—Science series on the conservation of Canada's natural resources.

THURSDAY—Music programs for intermediate grades, to cultivate a love for the best works of composers of all countries.

FRIDAY—Series of national broadcasts which attempt to develop a strong Canadian spirit in all schools by presenting topics of national interest.

WHAT IS OUR RESPONSIBILITY FOR THE FUTURE OF RADIO? Parents and teachers have as much responsibility towards young Canadians in helping them to choose radio programs wisely, as they have in helping them to choose good reading material. By encouraging the selection of the best programs, we can make sure that Canada will continue to ask for the best.

Stations over which B.C. School Radio Programs may be heard:

- | | |
|-------------------------------------|-----------------------------------|
| CBC Stations (Pacific Region) | CBC Repeater Transmitters |
| CBR (Vancouver, CJAT (Trill)) | CBRA (Revelstoke), CBRF (Fernie) |
| CBRX (Vancouver), CKLN (Nelson) | CBRG (Prince George) |
| CFJC (Kamloops), CKOV (Kelowna) | CBRK (Kimberley) |
| CFPR (Prince Rupert) | CBRL (Williams Lake) |
| CHWK (Chilliwack), CKOK (Penticton) | CBRM (Creston), CBRN (North Bend) |
| CKPG (Prince George) | CBRQ (Quesnel), CBRR (Cranbrook) |

FRUIT WORKERS UNION TO MEET AT PENTICTON

The Incola hotel in Penticton is to be the scene of a two-day convention on January 17 and 18 when the Federation of Fruit and Vegetable Workers' union (TLC) brings delegates from ten local unions from Osoyoos to Revelstoke, states W. H. Sands, Kelowna.

B. W. Dysart, regional supervisor of the department of labor, will be one of the chief speakers, along with R. N. Atkinson, Penticton, Canadian Legion representative and J. R. J. Stirling, president of the BCFGA.

W. J. Baker, Summerland, interior representative of the United Brotherhood of Carpenters and Joiners of America (AFL) will also be one of the main speakers at the convention.

A closed session will be held on Saturday evening, Jan. 17 to discuss the amendments to the 1948 industry-wide agreement submitted by the local unions.

Resolutions cover such subjects as old age pensions, poll tax, price control, consumer co-operatives, health insurance, vacations with pay, minimum wages, income tax, workmen's compensation, amendments to the constitution.

School Attendance Reaches 642 Mark

With the re-opening of school for the second term on Monday, twelve new pupils were found to be waiting for entrance to the elementary school, bringing the enrollment there to 512. The high school remains about the same at 130, thus bringing the total school enrollment to 642, which is about the figure for mid-fall, practically an all-time high for the local school system.

Christmas Gift From The King

The King's customary Christmas gift of coal for pensioners over 60 years of age and who have lived in the borough for more than five years, was delivered just before Christmas in Windsor, England. Each pensioner receives a box of one hundredweight of coal. MRS. ALICE CASTLE, 71, watches her gift from the King arrive.

Two Hoop Teams Meet Defeat On Penticton Court

Two Summerland hoop squads met defeat last Friday and Saturday at the Scout hall in Penticton but they did not bow before the Penticton opposition without a good struggle.

Playing as preliminaries to the Penticton Int. A vs Priest River, Idaho, series, the Summerland Int. B team lost to Penticton Friday by a 49-35 count and a combination B and junior team from Summerland lost to a similar Penticton squad 38-31 on Saturday.

Coach Bob Scriver has a scrappy Int. B squad at his command and when a few more rough edges are smoothed off they should provide serious opposition to any similar age group in the interior.

In the Saturday game, Dunham and Hack led a barrage on the Penticton hoop which kept the southern team at bay throughout the first three quarters. But then the Pentictonites started to click and Summerland was unable to cope with the onslaught, seeing a seven-point advantage dwindle away and become a seven-point deficit in the last ten minutes of play.

The teams lined up as follows: Summerland B: Dunham 15, Ruppel 7, Hack 5, Kita 3, Jomori 2, Turnbull, Elliott 2, Kato 2, Jacobs 4, Cristante—35.

Penticton B: Eshelman 2, Adams 4, Sismey 2, Collins 4, Atkins 6, Tidball 18, Patley, Hancock 7, Nicholson 6, Young—40.

Summerland: Dunham 10, Ruppel 5, Hack 8, Kita, Jomori, Turnbull, Elliott, Kato 2, Jacobs 6, Cristante—31.

Penticton: D. Eshelman 6, Young 6, Dow, Kenyon 10, Campbell 10, Malsonneuve, Tidball 6, Boulding, Evans, Swanson—38.

In the main features, Penticton's Int. A squad played two brilliant games to defeat the Priest River squad 74-46 and 55-23.

BOARD BANQUET ON FEBRUARY 12

Date of the annual board of trade banquet in Ellison hall was set for Thursday, February 12, when the board executive met on Monday evening. Details of the banquet arrangements and other plans for winding up the board's year will be discussed this evening when the board holds its regular January monthly dinner session in the IOOF hall.

have returned from Hollyburn, West Vancouver, where Mrs. Mallett was receiving treatment on her arm. She reports a slight improvement but must continue treatments for a three-year period.

Among West Summerland business men at the coast on business trips this week are Tom Washington and Harry Braddick.

Mr. and Mrs. Ed. Riley and family have returned to Celista after spending the Christmas and New Year's holidays with Mrs. Riley's parents, Mr. and Mrs. Tom Garnet. Bobby Riley is reported getting along very nicely after his eye operation performed in the local hospital.

The 12 Commandments Of Traffic Safety

When Riding Your Bicycle Follow These Safety Rules:

- No. 1—Make sure that you signal when you are making a turn or when you are stopping.
- No. 2—Do Not make a U turn in the middle of any block.
- No. 3—Always stay on the right hand side of the road when you are riding your bicycle. When you are walking on the road you must walk on the left hand side.
BUT
When you are pushing your bicycle you must stay on the Right hand side.
- No. 4—Never, when riding on any road, keep crossing back and forth from one side of the road to the other.
- No. 5—When riding your bicycle along any road, Never hang on to any moving car or other vehicle, in order to get an easy ride.
- No. 6—Be sure that you have a head light or flash light in the proper holder on your bicycle for night riding. All bicycle headlights must light the road for 200 feet ahead of your bicycle.
- No. 7—Anyone riding a bicycle between the hours of ½ hour after sunset and ½ hour before sunrise must have these lights turned on.
- No. 8—All bicycles must have a tail light or Red reflector on the rear mud guard for night riding. In case of the tail light this also must be turned on between the hours of ½ hour after sunset and ½ hour before sunrise. The bottom portion of all rear mud guards must be painted white.
- No. 9—DO NOT ride on the sidewalks.
- No. 10—DO NOT leave your bicycle leaning up against store windows or against sidewalks. Use the bicycle stands that the municipality have erected for the parking of your bicycle.
- No. 11—DO NOT at any time carry an extra boy or girl on your bicycle.
- No. 12—CHILDREN—Draw this message to the attention of your parents, so that they may read it and understand it, whether they drive a car or not.

YOUR DEPARTMENT STORE
In West Summerland

DID YOU KNOW?

In this space each week THE CAKE BOX intends to present some interesting data on bakeries. We hope you enjoy them.

"Here is bread, which strengthens man's heart and therefore called the staff of life," records the ancient Psalm. Throughout the ages bread has indeed been a "staff of life". It is the symbol of religious protectiveness, a necessity that man might eat. It takes a thousand different forms, it is made a thousand different ways, but bread is the bulwark of the home.

How fortunate we are today in the New World! The housewife shops at her local bakery and with a few cents supplies her family with crusty, well-baked loaves of bread. Plain white bread, health breads, brown breads and even European-type breads are hers for the choosing.

Unfortunately at times, the bread comes to us so easily we forget how lucky we are. It is only within the last century that a man has been able to buy all his breads and pastries from a local merchant.

Great-grandmother did all her own baking, and oftentimes had to grind her own flour. She grew her own yeast; and many an elderly woman pointed with pride to the fact that she had never had to start another growth after her first borrowing of yeast when she was a bride.

The local baker has now taken the heavy duty of baking from the housewife. In his sanitary and government-inspected establishment he supplies goods from white bread to intricate wedding cakes. The master baker is a proud man and well he should be; his product is the mainstay of the community.

Mrs. Art Dunsdon Succeeds Mrs. F. E. Atkinson as Head Of Auxiliary to Hospital

After thirteen years as president, Mrs. F. E. Atkinson has relinquished this post in the Summerland Hospital Auxiliary and has been succeeded by Mrs. Arthur Dunsdon. This active organization held its annual meeting and election of officers on Monday evening, January 6, in the Parish hall.

A tremendous volume of work on behalf of the Summerland hospital was revealed in the annual reports for 1947 read at this session, which drew a large proportion of the membership.

Besides present active members, nearly twenty of the original members of the auxiliary who had carried on hospital aid for thirty years, were guests of the auxiliary at this annual session and evinced great interest in the reports.

Big Expenditure

As evidence of the activity of the auxiliary, the treasurer's report revealed an expenditure in the past year of nearly \$1,400, all but \$100 of which was expended in providing furnishings and equipment for the hospital and the new nurses' home.

Although the auxiliary has made this big expenditure, the meeting was warned that a great number of purchases are necessary in 1948 in order to complete the furnishing of the nurses' home and provide other needed equipment in the hospital. Another active year is in prospect the new president informed the members.

One of the highlights of the 1947 season was the providing of canned fruit and tomato juice for the hospital.

With the assistance of the management and staff of Barkwill's Ltd., Summerland cannery, and the juice machine at the experimental station fruit products laboratory, 3,295 cans of fruit and tomato juice were packed last year.

The fruit was canned at Barkwill's Ltd., and the tomato juice was packed at the experimental station.

Through the cooperation of these two concerns and the assistance of most members of the auxiliary the hospital was provided with this large quantity of canned goods at a fraction of the regular cost.

Funds for the auxiliary were raised through members catering to banquets and other social functions and the holding of two successful dances.

The auxiliary also noted a large number of individual donations to the hospital which greatly assisted the auxiliary in outfitting this institution.

Miss M. Ellis, R.N., newly-appointed matron of the Summerland hospital, paid her first visit to the auxiliary on Monday, and was welcomed by the ladies present.

Another highlight of the evening was the presentation to the retiring president, Mrs. F. E. Atkinson, of a pen and pencil set, on behalf of the members. The presentation was made by Mrs. George Washington, who stressed the untiring efforts of the retiring prexy over her thirteen-year term.

Mrs. Atkinson is resigning because of her step-up to the position of president of the Rebekah Assembly of B.C., which post will necessitate her frequent absence from the community.

The retiring president thanked

the members for their grand cooperation throughout the past year without which the auxiliary would not have been able to much such a splendid showing.

Mrs. A. Stark, on behalf of the former auxiliary members who were in attendance as guests, thanked the members for their invitation.

Other officers, besides the new president, Mrs. A. Dunsdon, chosen at the annual meeting were:

First vice-president, Mrs. Earl Wilson; second vice-president, Mrs. J. C. Wilcox; recording secretary, Mrs. C. C. Strachan; treasurer, Miss Doreen Tait; corresponding secretary, Mrs. L. Rumball; Dorcas secretary, Mrs. H. Eden.

KAY HAMILTON'S CHOIR CHEERS HOSPITAL INMATES

Christmas carols cheered the patients at the Summerland hospital on Christmas morning, when Miss Kay Hamilton and her girls' choir arrived to voice the Christmas theme in song.

Miss M. Ellis, hospital matron, and members of the nursing staff, have expressed their appreciation of the choir's visit and have also voiced their thanks to the many persons who made donations to the hospital at Christmas.

Among those who provided gifts to the hospital were:

Mr. and Mrs. W. D. Laidlaw, chocolates; Hill's Dry Goods, personal gifts; Overwaita Ltd., chocolates; Summerland Groceries, Christmas cake; A. K. Elliott, cake plate; Mr. L. A. Smith, Mr. and Mrs. N. O. Solly, Mr. and Mrs. R. Bleasdale, Mr. and Mrs. James Minshull, Mrs. A. D. Glen, chocolates; Quality Meat Market, turkey; Mrs. A. F. Wright and Mrs. E. Farnham, donations; Mrs. F. E. Atkinson, cribbage board and cards.

Besides cheering the patients with their carols, Miss Hamilton and her choir also brought a number of gifts for the nurses' home, consisting of a combination bread and cake box, set of canisters, set of Pyrexware and a Christmas cake.

RENEW LIABILITY POLICIES

Two public liability insurance policies were renewed by the municipal council on Monday. That for roads, amounting to \$245.87 premium for three-year policy, was awarded to J. A. Read and a public liability policy for the light system, amounting to \$328.61 for three years, was awarded to W. M. Wright.

Socially Speaking

Talmadge McDonald and Michiko Iwayoshi have returned to Calgary to continue their studies at the Calgary School of Art.

Mr. and Mrs. S. Jackson of Vancouver spent the Christmas holidays at the home of Mr. and Mrs. T. A. Walden.

Mr. and Mrs. Roy Heuckendorff of Vancouver spent the Christmas holidays at the home of Councilor C. E. "Ned" Bentley and his sister, Mrs. H. Pares.

Miss Mary Vanderburgh left on Sunday evening for Vancouver, to continue her studies at the Vancouver School of Art.

Miss Jean McPherson returned to Calgary on Saturday after spending Christmas and New Year's with her parents, Mr. and Mrs. W. L. McPherson.

Mr. J. E. Duxbury returned to Summerland on Wednesday afternoon after spending two weeks' holiday at his former home in Elk-horn, Man.

Ronald Picano, formerly a resident of Garnett Valley, has moved to Penticton, where he has rented a house belonging to D. J. Robbins, of Summerland.

Misses Joyce Elsey and Beverly Cousins have returned to Vancouver, where they are attending Normal school, after spending the holidays at their respective homes.

Mr. Jack Bald of Vancouver who has been a guest over the New Year holidays at the home of Mr. and Mrs. E. E. Campbell, returned on Sunday to his home in Vancouver.

Mr. and Mrs. George King, of Vancouver, are paying an extended visit to the home of Mr. and Mrs. T. Whitfield. They are old-time residents of Summerland district, Mr. King having served as police constable here many years ago.

Mr. and Mrs. C. H. Denike were visitors to the coast over the Christmas holidays, returning to Summerland on Sunday, December 28.

Mr. and Mrs. H. S. Minto from Fort Qu'Appelle, Sask., left on Monday, Dec. 29 for coast points, where they will spend the remainder of the winter. They have been spending the past four weeks with Mrs. Minto's sister, Mrs. Ella Pohlmann.

Mr. Jack Lawler and Mr. Don Rand returned to Summerland on Sunday from the coast, where they spent the Christmas and New Year's holidays.

Capt. and Mrs. J. E. Jenkinson left on Friday, January 2, for Vancouver where they will visit for two weeks.

Miss Joyce Pohlmann spent the Christmas weekend at her home in Summerland, returning to Kelowna after the holidays.

Mr. Ron Keeley of Penticton spent the Christmas weekend at the home of Mr. T. H. Ramsay.

Mr. and Mrs. Tom McKay and daughter Marilyn returned on Saturday evening from Trail, where they spent Christmas and New Year's.

Among the many UBC students who have returned to Vancouver after the Christmas holidays here are the following: Shirley Harvey, Alfred Kita, Gerhard Huva, Richard Yamabe, Mary Peters, Don Johnston, Joan Bennett, Donna Haskins, Marian Campbell, Kenneth Steuart, Donnie Jackson, and Bill and Jack Amm.

Phone 11 West Summerland

Mr. and Mrs. Ray Gardiner of Toronto are spending the holiday season with Mr. and Mrs. C. M. Kyle.

Miss Edith Bristow spent the Christmas holidays at the home of her father, Mr. Harry Bristow, returning to her home in Merritt on Saturday.

Miss Christine Aitken returned to Vancouver after spending Christmas with her parents, Mr. and Mrs. J. Aitken, experimental station.

Among the many private house parties over the holiday season was that held by Mr. and Mrs. L. H. Hill on Boxing Day evening when a large number of friends were entertained. Dr. and Mrs. L. A. Day were hosts to a large group on Monday, December 29, while Mr. and Mrs. E. "Hilly" Smith were at home to friends on New Year's Eve, December 31.

Mr. and Mrs. P. Barr, of Yorkton, Sask., left on Tuesday for William's Lake, where they will visit Mrs. Barr's sister before returning to their home. Mr. and Mrs. Barr have spent Christmas and New Year's with Mr. Barr's parents, Mr. and Mrs. H. P. Barr, Prairie Valley road.

Mr. Jim Simpson is a business visitor in the Arrow Lakes district this week.

Mr. Fraser Dier, who spent the New Year's holiday at the home of Mr. and Mrs. Arthur Lamcraft, left on Wednesday to return to his home in Prince Albert.

Mr. W. C. W. Fosbery spent the Christmas holidays visiting at Kamloops.

VERNE CHARLES HOME HERE IS WEDDING SCENE

At the home of her uncle, Mr. Verne Charles, Summerland, the marriage took place on Sunday, December 28, of Margaret, daughter of Mr. Stuart Charles, of Castor, Alta., to Mr. Bert Jamieson, son of Robert Jamieson, of Halkirk, Alta. Rev. H. R. Whitmore officiated.

The bride wore a gown of white satin, the neckline being embroidered with seed pearls, with which she wore a full-length veil and carried a bouquet of pink and white chrysanthemums.

Her bridesmaid, Miss Gerda Folkner, wore a white full-length Jersey with sequin trim, and she carried a pastel bouquet.

Mr. Herb Charles, brother of the bride, was best man and Mr. Verne Charles gave his niece in marriage.

A reception followed at the Verne Charles' home. The bride and groom will reside in Copper Mountain following their honeymoon.

CANNOT USE ROAD AS USED CAR LOT

E. C. Pollock will be instructed to take action to put a stop to Capital Motors usage of the roadway in front of the B.C. Fruit Shippers Ltd. building as a "used car lot". Municipal council decided on this course when Councillor H. L. Wilson stated that the firm had twice been asked to keep their used cars off the roadway but still persisted in the practice.

Old-timers Say This Winter IS Record to Date

It was a green Christmas and not only that but it is still a green January.

Seldom in the history of the oldest old-timer in this district has there been such enjoyable weather throughout the entire Christmas and New Year season.

Not only did the snow of late fall and early winter disappear entirely but the weather has remained moderate throughout. The New Year was ushered in with sunshine and although the first of the week saw a mild blow, there has been little change in temperature.

An instance of the mildness of the weather this season was evidenced on Monday, December 29, when Mrs. George Woitte, who resides in Peach Orchard picked three roses from her garden.

These roses had fully developed buds which were almost ready to break into full flower.

Skating in Evenings Although there has been sufficient cool weather in the evenings to maintain a sheet of ice at Charlie Wharton's ice rink, there has been no skiing to date, much to the disappointment of the plank enthusiasts.

Only 200 yards away, at the outdoor wooden tennis courts, Mr. and Mrs. R. G. Russel came down one day over the holidays to enjoy their favorite sport but as the boards were slightly wet they did not play. However, other conditions were excellent.

Other reports have come in from different sections of the district telling of unusual and rapid growth of plant life. Bulbs are starting to show definite signs of activity and snowdrops are said to be weeks ahead of their time.

There is only a trace of snow on the top of Giant's Head while the surrounding low-lying hills are only sparsely covered. However, there is definite snow activity in some other parts of the province, with the Coquihalla Pass reporting frequent heavy falls in the past two weeks.

However, there has been little delay in train schedules due to poor weather conditions this winter and most of the Kettle Valley trains have been running almost to schedule despite heavy passenger, express and baggage traffic.

Buses have been keeping to their schedules in the Okanagan as a general rule as there has been no snow to mar their travel in the past few weeks.

Orchardists are beginning to worry about this mildness of the weather as they fear a sudden severe drop following an abnormal growth of the trees. However if the ground receives a good covering of snow prior to any drop in temperature, trees generally survive in good shape.

SCOUT NEWS

Last week saw a meeting on Friday night and a hike on Saturday afternoon from Faulder. Three cars took the boys to Faulder and from there we hiked around the country observing the various objects of nature under winter conditions.

A number of deer and deer tracks were seen, as well as coyote tracks.

A simple method of estimating the height of trees was studied, using a scout staff or any stick about five feet in length. Judging the distance of nearby and distant objects was also practiced with great differences in estimates.

It is unfortunate that only 14 boys turned out, for hikes of this nature provide practice in judging of distances as required for the First Class badge.

Moreover, boys working for their Second Class badge are reminded that three hikes must be attended before this badge can be awarded. There will be another hike this winter.

The troop is very sorry to learn that P/L Doug Wakefield has broken his leg and is in the hospital. We all wish him a speedy recovery.

Notices—Meeting Friday, January 9 in school gym. Lets have a 100 percent turnout, especially patrol leaders. Duty patrol: Beavers.

Compensate Small Dairymen Losses

MERRITT—The Nicola stockmen, at their meeting, Saturday, December 20 made history when they agreed—by a four to one vote to assess themselves to pay compensation to small dairymen supplying milk to the city, for any milk cows slaughtered when proved positive reactors to Bangs disease.

"The intention of the stockmen is by means of blood testing, cows and vaccination of calves to eventually make the district of the Nicola Stockbreeders' Association a free area so that buyers of breeding stock need have no hesitation in buying from the members of this association."

REVIEW CLASSIFIED ADS BRING RESULTS

BOY SCOUTS NEW COMMISSIONER IS T. W. S. PARSONS

Appointment of T. W. S. Parsons, O.B.E., O.St.J., as provincial commissioner, the Boy Scouts Association of British Columbia, was announced today by Prentice Bloedel, president of the provincial council at headquarters in Vancouver. The appointment is effective immediately and brings to Scouting in British Columbia a background of many years interest in and close contact with youth in the province.

Mr. Parsons, who recently retired as commissioner of British Columbia police after nearly 38 years service with the force, will serve in a volunteer capacity as do members of the provincial council and Scout leaders. His appointment, which places him at the head of the 10,000 Scouts, Cubs, and Rovers and leaders in British Columbia and Yukon, is officially made by Lord Alexander of Tunis, Governor General of Canada, in the latter's capacity as Chief Scout for Canada.

Prominent and active in St. John Ambulance association for many years, Mr. Parsons recently assumed office as administrator of Queen Alexandra Solarium for Crippled Children at Mill Bay.

The new commissioner's connection with Scouting predates the actual founding by the late Baden-Powell of this world-wide youth-building organization. Mr. Parsons was a member of the South African Constabulary, Baden-Powell's police, just after the end of the Boer war. Throughout the years he remained in contact with the founder until Baden-Powell's death, as well as with the World Chief Guide, Lady Baden-Powell of Gilwell.

Coincidental with Mr. Parsons' appointment was the completion of the provincial council and headquarters' administrative staff. The provincial commissioner will have as his immediate assistant, Mr. R. Ken Jordan, executive commissioner for B.C., at provincial headquarters in Vancouver.

John Hart Carries On as PGE Head

Concurrently with assuming the premiership of the province, premier Johnson invited Dr. John Hart to continue as president of the board of directors of the Pacific Great Eastern Railway and to carry on the negotiations conducted by him with federal authorities and executive officers of the Canadian Pacific Railway and the Canadian National Railway for joint action in the extension of the Pacific Great Eastern Railway into the Peace River district.

It will be remembered that Dr. Hart last conferred on this matter in May, 1947. Further data was required before negotiations could be resumed. The information has now been compiled giving more extensive data on the coal resources and more particularly information dealing with available markets. Extension of the Pacific Great Eastern Railway into the Peace River district, on a four-way partnership basis, will involve expenditure of approximately \$50,000,000.

IN THE BAG

It's in the bag! Yes, your very health may depend upon the bag or lunch box in which you carry your mid-day meal. If you take home-prepared food to work, health authorities suggest that you make sure you have a "parcel of health."

A good lunch, of course, should include milk, fruit or vegetable or both, meat, fish, poultry, eggs, cheese, peas or beans and buttered "Canada Approved" (or whole wheat) bread.

If you can't tote all these to the office or shop, health officers urge you to arrange to get them at your work-place.

Greetings for Barbara Ann

BARBARA ANN SCOTT is greeted by a Swiss representative at Zurich on her arrival recently in Switzerland to take part in the Olympics.

Ex-Reeve Powell Tells of Trip To Southern States

Ex-Reeve W. R. Powell was the guest speaker at a recent Rotary club meeting, describing his recent trip to many points in the United States, and giving members some interesting observations on the present-day trends in many parts of this continent.

His Worship was absent from Summerland about seven weeks and accompanied by Mrs. Powell travelled east to New York, south to New Orleans and then across the southern states to California, before heading back for Canada.

The attention which most cities are paying to the growth of trees within their city limits, and the accommodations provided by tourist camps were lauded by Reeve Powell.

He described at some length the operation of the beet-sugar industry in Idaho, which is under government subsidy. A companion industry in Idaho is potato growing, which has a large acreage under cultivation. Most of this potato crop is dehydrated.

His tour through Missouri gave Reeve Powell a view of a fertile state in which many industries thrive in cities not often in the news in the ordinary run of affairs.

The congestion of traffic, wonderful lighting and illumination generally on the thoroughfares and in industrial plants brought forth

many complimentary remarks concerning Ohio. The City of Washington, the nation's capital, is impressive for its massive legislative buildings.

In the southern states, the manufacturing development is surprising, he stated, and the Canadian visitors were extremely interested in the handling of the color problem today.

The old French area and the new American quarter of New Orleans provided striking contrasts and His Worship obtained an intimate knowledge of the city gained through an acquaintance who knew the district intimately.

The speaker was introduced by Councillor H. L. Wilson and a vote of thanks was tendered him by Dr. H. R. McLarty.

Industrial Bank Has Fine Showing

OTTAWA—The third annual report of the Industrial Development Bank was tabled in the House of Commons recently. It showed that the total dollar amount of the loans authorized during the fiscal year ending September 30, 1947, was greater than the combined total of the two previous fiscal years.

It also disclosed that during the year there had been a further increase in the number of loans authorized to industrial enterprises, chiefly in the medium and long-term field. At the same time a decrease was reported in the proportion of applications refused, indicating that the particular functions of the bank are now becoming more clearly understood and more widely known.

In the report Graham F. Towers, president, pointed out that in the type of lending in which the bank is engaged, losses could normally be expected over a period of years. Experience during the three years which have elapsed since the bank's inception, however, have been contrary to expectations mainly because the general level of business conditions has been particularly favorable during this period. While no specific appropriations were necessary as of September 30, 1947, it had been decided to take the sum of \$200,000 from the year's profits and set it aside as a reserve for losses.

During the year the bank in-

LOT VALUE SET

On Monday, the municipal council placed a value of \$1,500 on Lot 25, DL 3194, which is the last municipally-owned property containing bearing fruit trees. Mr. Down had sought a price on this lot.

Annual Bird Census Finds 42 Species

Annual Christmas bird census in the Summerland district was undertaken this season on December 21, with six interested parties conducting the survey from 8 o'clock to 3:30 in the afternoon. The day was cloudy and mild with a strong south wind, the party reports, while there was no snow in the valley bottom, with only a few inches in the hills covered. Twelve miles of territory were covered, along the lakefront from Ferticketon to Crescent Beach, and inland along four miles of benches and adjacent valleys. During the day, 42 species of birds were discovered, and 2,562 individual birds counted by the party which consisted of Councillor Eric M. Tait, Herbert J. Simpson, S. J. Darcus, W. C. W. Fosbery, Ronald Darcus and Ernie Warnock. Following are the birds counted, on that day:

- Holloel's Grebe 1, Horned Grebe 2, Blue Heron 2, Mallard 80, Gadwall 21, Baldpate 22, American Goldeneye 8, Buffle-head 1, Goshawk 1, Rough-legged Hawk 1, Bald Eagle 2, Golden-eye 1, Pigeon Hawk 1, Sparrow Hawk 2, California Quail 20, Pheasant 35, American Coot 1760, Killdeer 2, Herring Gull 5, Flicker 34, Downy Woodpecker 1, Black-headed Jay 5, American Magpie 62, American Raven 6, Clarke's Nutcracker 1, Long-tailed Chickadee 10, Mountain Chickadee 4, Red-breasted Nuthatch, Pigmy Nuthatch 40, Brown Creeper 2, Winter Wren 4, Western Bluebird 18, Townsend's Solitaire 1, Bohemian Waxwing 100, Shrike 3, Evening Grosbeak 50, Pine Grosbeak 1, Pine Liskin 6, Goldfinch 25, Shufeldt's Junco 170, Song Sparrow 20, House Sparrow 130.

AERIAL SURVEYS

It is announced by Hon. E. T. Kenney, minister of lands and forests, that one-third of the entire area of British Columbia, has now been photographed by aerial survey. The area covered during the past season is 41,150 square miles.

I'm Dreaming of a White House!

"FELLER," five-week-old Cocker spaniel sent to President Truman as a gift, moodily poses for this photo in the White House corridor.

Farm Machinery Can Be Protected From Corrosion

From general observation it is apparent that a high proportion of farm machinery troubles arise from inadequate protection during off-season periods. Machinery stored in weathertight sheds will not be sufficiently protected. Rust and corrosion has been too freely accepted as an unavoidable condition, states a release from the University of B.C. On the market at the present time there are many rust-removing solutions which are effective in removing rust from inaccessible corners and small mechanisms. Where any rust is apparent such a solution should be used according to the manufacturer's directions, followed by a coat of either red lead or standard metal aluminum paint.

Aluminum paint is available in two types, one for metal surfaces and another, for wood surfaces. Following the red lead or aluminum paint coat a good grade of implement paint should be used to withstand the weather. Where parts are small it usually pays to use an enamel rather than a paint for this final coat. Care should be taken to protect oil holes and Zerk fittings so that normal lubricating system is not plugged.

For wearing surfaces such as cultivator shovels, moldboard shares, landsides, etc., rust inhibitors are more satisfactory than coating with heavy grease. Experience has shown that within a few weeks a coating of grease will oxidize, allowing rust to set in. The rust inhibitors or rust prevention materials have been widely tested and are giving very satisfactory service. Any large wooden surfaces that are badly weathered should be treated with a coat of non-penetrating paint, followed by a coat of oil and do not provide funds for any weather paint. The non-penetrating paint is sold by all leading Columbia at this time.

Two Treats Afforded Youngsters Xmas Eve

Christmas Eve was a big day for kiddies of Summerland. Not only did all kiddies up to grade 5 in school receive a bag of candy and other good things to eat, direct from Santa Claus himself, but they could also go to a free picture show in the Rialto theatre to see eighty minutes of Walt Disney colored pictures during the afternoon. The Summerland Board of Trade annual Christmas treat for the kiddies took place at 7:30 o'clock Wednesday evening, December 24, at the Living Memorial park-playground.

A big bonfire and a lighted Christmas tree provided the desired illumination for the big event and Santa Claus was on hand to give out a bag of good things to every child. Tickets had been handed out to pre-school children and to pupils in the elementary school up to Grade 5. The previous week, members of the board of trade, with the assistance of some of their wives, packaged 793 bags of candy. Those who worked on this project consisted of Walter Charles, chairman of the committee, Joe McLachlan, Francis Steuart, George Washington, Fred Dunsdon, Jack Dunsdon,

Gordon Beggs, Mrs. J. McLachlan and Mrs. F. Steuart. Don't let the kiddies know but that rotund fellow with the jolly red face and flowing white beard who is known as Santa Claus, was in reality, the well-known local resident, W. T. Boothe. Santa lined up the youngsters in single file and they passed the big platform where the bags of candy are piled up. Each one shook hands with Santa and received his parcel. Expenses for this treat were defrayed from subscriptions gathered from local merchants and business men.

The Summerland Retail Merchants' Association also sponsored the free matinee on Christmas Eve afternoon at the Rialto. A continuous showing of Walt Disney colored films was arranged, commencing at 1:30 and going through to 4:30. Shoppers in West Summerland that afternoon could leave their children at the theatre and make their purchases at their leisure, thanks to the arrangements made by the retailers of this area. Loud speaker systems were set up on Granville and Hastings streets for Christmas carol recordings.

PAINT your garden furniture indoors now and be ready for the warm weather. Make it smart and bright with Bapcolite.

This durable enamel is especially made to stand extremes of temperature, dries quickly, retaining its gloss for all conditions.

Two Alarms Call Out Fire Brigade

West Summerland's volunteer fire brigade answered two calls in the past week, both of which might have had serious financial loss but which fortunately did no damage.

On Friday, January 2, at about 9:30, an alarm was turned in by a person who observed sparks cascading out of the Clough Bakery chimney. The brigade turned out promptly but discovered that there was no need for alarm.

At 8:30 o'clock this morning, a chimney fire was detected on Giant's Head at the Home for the Friendless. The brigade took extinguishers to this fire but it burned itself out with no damage to the building.

Members of the Summerland hospital staff gathered in the nurses' home on Monday evening for a miscellaneous shower in honor of Miss Betty Calder, R.N., a bride-elect of February. Miss Calder has resigned from the hospital staff and left on Wednesday evening for her Vancouver home.

Mr. Robert Lothian, of Vancouver, has joined the staff of Pollock Motors Ltd., as parts manager.

WANTED—EXPERIENCED OR-chard man, available at once or will rent 5-acre orchard. Apply Box 210 Review. 1-1-p.

WANTED — SECOND - HAND range sawdust burners. Apply Summerland: Sheet Metal & Plumbing Works. 1-1-c.

FAMOUS GLOBE TROTTERS APPEAR IN VALLEY SOON

The famous Harlem Globe Trotters are coming to Penticton later this month for two games and the Penticton Basketball Club has set aside 100 tickets for Summerland; cage followers should they desire them.

The local club was not advised of the Globe Trotters' probable tour until it was too late to make the necessary arrangements for them to appear here.

Tickets for these two games are available at The Review office but persons holding these tickets are warned by Penticton club president, Horace Reeves that seats will only be held for ticket holders until 7:45 o'clock each evening.

Summerland basketball fans have been disappointed this season that more games have not been produced for the benefit of both players and spectators. However, Manager Joe McLachlan states that he has piled up a considerable telephone bill over the past three weeks in an attempt to arrange games with neighboring clubs, without much success.

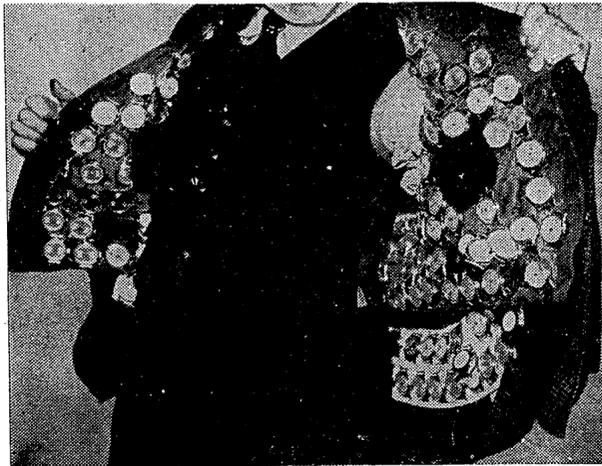

He is hopeful, however, that this situation will be remedied in the near future.

Robson Photography Wins Praise From Province Editor

Praise for the colored photography work of Mr. and Mrs. E. H. Robson, West Summerland, was meted out in Saturday's issue of the Vancouver Province, by "Torchy" Anderson, in his column "INSIDE OUT, A Memo from the Editor". Following is the excerpt from this column:

"Basil and Rae Robson of West Summerland have a family secret. They turn out the best colored photographs we have ever come across. We have used some of Basil's pictures in our Province Magazine, but, unfortunately, without the color that Mrs. Robson applies to Basil's fine photographs. They sent us two Summerland pictures a while ago and they are finally framed and on our office wall. They radiate the clean, hot sunshine of the Okanagan. As we look at "The Castled Cliffs of Summerland" and some ancient cottonwoods by the lake entitled "Old Friends" it's like turning on the sunlamp."

Watches From the Rhine

Two hundred and ninety watches carefully sewed to the lining of his vest, as demonstrated, above, Georges Geoffrey, 32-year-old French diplomat, was sentenced to pay \$24,000 for smuggling them into England. In default of payment he is now serving a year's imprisonment at Wormwood Scrubbs prison, London. In the meantime he has been dismissed from his post as French consul at Dusseldorf, Germany.

Canada's Health

TOLL OF TENSION

Health statisticians report that one-quarter of all deaths occurring after the age of 50 are due to what they call 'essential hypertension.' In laymen's language, that means simply 'high blood pressure without apparent cause.' Concerning this ailment, it has also been established that emotional factors play an important—and often determining—role.

Public health authorities therefore urge Canadians to cultivate sound physical health, which is the most important single element in emotional adjustment.

RECREATION'S RELEASE

Anything which brings stimulating, pleasurable relaxation is recreation. One man's work may be another's play—it's a matter of tastes and aptitudes.

Health authorities say that recreation may be closely related, and make particular contribution, to our daily labor, as long as it is pursued as a personal interest and not merely as a continuation of work. In other words, don't work at play. Relax, with pleasurable pastimes, for real benefit.

FEATURED FOODS

People who run boarding houses or restaurants usually stick to old "standbys" which they think most people want. The customer, of course, is always right. Canadian health officers suggest that patrons of eating places, therefore, order healthful foods and thus create a demand for them.

Only when there is a general call for really nutritious meals will such foods be featured on menus.

JUICE FOR JUVENILES

To resist infection during the cold, dark days of winter, children need the vitamins in cod liver oil and orange juice every day. No matter how healthy the children may appear now, they will not continue to do well unless they get these vitamins.

Cod liver oil is rich in vitamins A and D, and helps children resist colds and other ills. It helps to form bones and teeth. Orange juice, too, contributes to all-round health and vitality.

When the ski instructor or physical director advises an aspiring

player to drink more milk and pack away plenty of vegetables, along with his meats, he's not only helping to create championship calibre, he's doing a smart job as a health-educator, too.

Health officers point out that, during the war, combat troops were kept in tip-top condition for victory with healthful victuals. Proper diet is essential, they remind Canadians, for fitness at any time.

Shareholders of the Summerland Co-operative Growers Assn will meet on Friday, January 23 to decide on the proposed sale of the co-op cannery to the Regal Fruit Products company, a subsidiary of Safeway Stores Ltd. All legal ramifications regarding the sale are now said to be cleared up and if the growers decide they wish to rid themselves of the plant the sale can proceed from that date. No sale can be made unless a majority of the shareholders agree. The Co-op directors are unanimous in favor of the sale, it is said.

Mr. and Mrs. Rees Powell have returned to Vancouver, where Mr. Powell will continue his studies at UBC. They spent the Christmas holidays with Mr. Powell's parents, Mr. and Mrs. W. R. Powell.

West Summerland, B.C., Thursday, January 15, 1948

POLICE VS. COMMUNIST DEPUTIES IN ROME—When Rome police were trying to disperse a crowd gathered outside the Italian Chamber of Deputies, several Communist deputies emerged from the building and promptly became involved in the ensuing scuffles. Picture shows one of them, SIGNOR GIULIANA FAIETTA, about to be struck by a policeman's rubber truncheon, with several other well-armed police standing by to lend assistance. Faietta was knocked insensible later.

Legion Club License To Be Decided Feb. 3

After months of hedging, the much-debated plebiscite to decide if the Canadian Legion Summerland branch No. 22 will be given a club licence, has at last been settled for Tuesday, February 3. Both Summerland and West Summerland polling divisions will be included in this plebiscite, which must have a 55 percent majority in order to make it legal.

Voters' list for the two polling divisions of South Okanagan electoral district will close on Friday, January 23 and after that date the only opportunity to get on the voters' list will be through the court of revision, it is stated.

W. C. W. Fosbery has been appointed returning officer for this plebiscite. No information as to the locality of the polling booths has been given out.

Both the Canadian Legion, who obtained a petition signed by some 1,300 persons in favor of granting the local club a licence, and the "dry" element have been working hard in an effort to obtain as many names as possible on the voters' list.

In its revised form the voters' list now stands at about 1,700 names, which indicates that there is still a large number of persons who could be placed on the lists.

Campaign Committee
Legion members, prior to their annual meeting last evening in the Legion hall on Rossdale Avenue, appointed a campaign committee to get out the vote, obtain more names on the voters' list and boost for the adoption of the plebiscite. Many members expressed their wonderment that a plebiscite should be necessary for a veterans' club licence, but President A. Calvert pointed out that the liquor control board had changed its policy, and there are three such votes to take place shortly.

"In other words, those who stayed at home can say whether those who went overseas can have a club licence," angrily declared one irate member. Legion members expressed further wonderment at the liquor board's action when they had obtained 1,300 signatures in favor of the club licence, considered by them as a sufficient majority to indicate the wishes of the Summerland residents at that time.

Members of the WCTU and some of the church bodies are actively engaged in endeavoring to bring about the defeat of the Legion licence plebiscite and are known to have organized strongly. Known "Drys" campaigned vigorously and well to see that their followers signed registration cards and their names were placed on the voters' list for this plebiscite. It is anticipated that an interesting contest will result from this vote.

CRITICIZES BELT ON ROCK CRUSHER

Criticism of conversion work on the municipal rock crusher was voiced at Tuesday's council meeting by Councillor C. E. Bentley. He declared that the belt being fashioned to convey sand from the crusher is not adequate for the job.

"I consider it a 'jerry job' and the sand is going to spill over from the conveyor belt," he declared.

Councillor Harvey Wilson, roads department chairman, explained that the roads department foreman, Les Gould, had made a request for one hundred feet of six or eight-inch belt.

There was a belt fifty feet long and twenty inches wide available and he suggested that it be cut in half to supply a belt one hundred feet long and ten inches wide.

"Give it a chance," urged Councillor Wilson. "It's only been working two or three days and it is working very satisfactorily," he concluded.

WEATHER REPORT

Snow: 2.1 inches.

Place Garbage Containers On Local Streets

On a six months' trial basis, the municipal council has agreed to allow the Interior Advertising Co. Ltd., to place six garbage cabinets on the streets of West Summerland. Cost of these garbage containers will be covered by advertising placards which will be inserted on the sides of the cabinets.

Some discussion ensued as to whether these cabinets, which measure 2x2x4 feet, should be placed on the street or on the sidewalk. It was decided that they should be on the sidewalk at the street corners.

Councillor Wilson opposed the sidewalk plan until it was made certain that they would be at the corners only, while Councillor Bentley opposed placing them on the street.

Athletics Group Gets Cut in Taxes

A fifty percent exemption from the normal taxation assessed each year will be allowed the Summerland Athletic Association, operating the badminton and tennis courts in West Summerland. Mr. R. G. Russel appeared before the council on Tuesday and noted that the taxes on this property had risen from \$13 in 1945 to \$57.75 in 1947. He considered that, as this is a public institution, some rebate should be allowed by the municipal council.

Under the Municipal Act, the council is authorized to exempt in whole or in part, taxes on property used by athletic groups where there is no gain to any individuals.

The council agreed that a remission of fifty percent of the taxes would be a fair agreement.

Dog Tax Receipts Well Up in 1947

Receipts from dog tax in 1947 was increased by \$147 over the previous year, the municipal council was informed on Tuesday, and the Summerland Fish and Game association received \$56, according to its agreement with the 1947 council.

The sportsmen's club agreed last year to make a list of unlicensed dogs in the neighborhood and turn it over to the municipality, the latter to rebate the club with a set fee per animal over a set amount.

No mention has yet been made of any similar deal for 1948, but the council expressed the thought that the sportsmen's campaign probably brought good results last year.

Million and Half Dollars Released in Summerland Area As Returns From Fruit Crop

Summerland district fruit crop realizes one and a half million dollars in receipts to growers and industrial employees, the agricultural committee headed by J. Y. Towgood reported to the Summerland Board of Trade on Thursday evening at the IOOF hall.

Based on receipts from the 1947 fruit crop, Mr. Towgood's committee revealed that fruit payments to growers from the four packing houses amounted to \$1,165,028.37 while the total payroll of Summerland's main industries, the packing houses, four canneries and the box factory, realized \$362,395.61 in wages and salaries.

These two figures mean a total of \$1,517,423.78 in new money put into circulation in this district.

To this figure can be added the small logging operations to the west of West Summerland and a few small industries operating within the municipal limits, such as the Summerland Furniture company and Blair's Potato Chip business.

Mr. Towgood pointed out that amounts paid to employees in the orchards are difficult to estimate and at any rate they must be paid by the growers out of the monies received from the packing houses from the fruit crop receipts.

"Your committee considers that to report such payments would merely be to report the turnover, within the community, of money already reported as received by the orchardist," declared the agricultural committee.

Associated with Mr. Towgood on this committee work were A. W. Watt, district agriculturist and C. J. Huddleston.

Interesting figures on tree fruit production from Summerland area were also provided and were as follows:

	Packed Boxes
Duchess	1,177
Wealthy	10,842
McIntosh	181,147
Jonathon	89,787
Rome Beauty	13,183
Delicious	10,168
Yellow Newtown	164,071
Stayman	22,087
Winesap	13,768
Other apples	62,020
TOTAL APPLES	611,020
Crabapples	17,591
Pears	111,468
Plums	21,850
Prunes	80,407
Cherries	37,149
Peaches	204,078
Apricots	99,593
Grapes	(Lbs) 25,448
Total Acreage, 1945	2,760.6 acres
Average number of acres per grower (1945)	7.2 acres

Co-op Payment Amounts to \$65,000

Cheques are being mailed today to shipping members of the Summerland Co-operative Growers' Assn amounting to \$65,000, representing closed pools on peaches, pears, pines, crabapples and grapes and advances on Stayman, Delicious, Wagener, Grimes Golden, Snow, Spies, Spitzenberg, Winter Banana, Rome Beauty and Cox Orange.

COUNCIL FAVORS PLAN FOR RADIO TROUBLE LOCATION

Municipal council members on Tuesday looked with favor on the board of trade proposal that they match the \$150 trade board grant towards radio interference and are considering going a step farther and bringing the radio interference work within the scope of the electrical department.

This proposal, made by Councillor Ned Bentley, was considered favorably but no decision will be made until a conference is held with Electrical Foreman T. P. Thornber.

Mr. Wallace T. Booth presented the request from the board of trade that the council match the \$150 proposed grant.

Mr. Stewart Sanborn, who has built the radio interference finding set, is a member of the municipal electrical department.

Penticton Council Will Not Submit School By-Law

PENTICTON—Penticton's council, nurtured on the Municipal Act, intends to stick pretty closely to that authority in its dealings with the District No. 15 school board, it became clear last week.

At the first 1948 council session, a letter from the board, enclosing a copy of a letter from the Summerland council, was read and briefly discussed.

Summerland's letter expressed the willingness of that body to proceed with the presentation of the long-delayed 1947 school by-law provided Summerland's claim to exemption of fruit trees as improvements is protected.

The local council was prompt in making its position clear. "As far as I'm concerned I don't want the by-law presented at all under present circumstances," said Councillor J. W. Johnson.

"Neither do I," said Councillor T. E. Leigh. "We've already gone over this ground pretty thoroughly."

"I feel we should wait for the publication of the findings of the school enquiry before we do anything," stated Reeve Robert Lyon.

Two By-laws for Hard Surfacing And Machinery Purchase Ready for Vote of Ratepayers February 7

Two bylaws, seeking permission to raise by debentures the total of \$40,000 to be expended on hard surfacing roads within the Summerland municipal boundaries and the purchase of a new road maintainer and another truck for the roads department, will be placed before the ratepayers for their consideration on Saturday, February 7, the municipal council decided on Tuesday evening, January 13.

One bylaw, No. 653, will seek to raise \$12,000 to purchase the grader and truck, while the second bylaw, No. 654, asks the ratepayers' permission to raise \$28,000 to hard surface some nine miles of municipal roads.

These roads were listed in last week's issue of The Review. Third and final reading of the bylaws was approved at Tuesday's council meeting after several minor alterations were analyzed to bring the bylaws into line from a legal standpoint, as suggested by B. C. Bracewell, deputy minister of municipal affairs.

A majority of three-fifths of those voting will be necessary to pass these bylaws. The council has pointed out on numerous occasions that the surfacing program cannot be carried out this year unless the bylaw for the new machinery purchase is approved, as well.

Two Voting Booths
W. C. W. Fosbery has been appointed returning officer for this vote.

Voting will take place from the Lakeside United church building in lower town and at the municipal hall in West Summerland from 8 a.m. to 8 p.m. on Saturday, February 7.

These bylaws were planned by the 1947 council to provide roads in the municipality which will last a number of years, with proper maintenance, and provide the motoring public with a system of main arteries in the municipality.

Council members have expressed the thought that if this work can be undertaken this year, maintenance costs in future years can be cut away down. Also, more work can be undertaken to keep the secondary roads in better condition, especially in the busy harvesting season.

Besides the hard surfacing program, the council plans on doing capital construction work to improve the Garnett Valley road, which is extremely narrow and has many dangerous curves.

CANNOT ACCEDE TO REQUEST FOR PROPERTY DETAILS

George Johnson, assessor of sizes of properties and assessments on various sections of the municipality which would amount, according to Assessor Roy F. Angus, to details on approximately 1,500 acres will not be acceded to, the municipal council decided on Tuesday.

Mr. Angus approached the municipal fathers on Tuesday and read correspondence from Mr. Johnson, who sought details of assessments on properties over a wide area of the community.

Mr. Johnson expressed the thought that the assessment on his property is too high and wished to make these comparisons.

Mr. Angus told the council it would take him several weeks to compile such figures as requested by Mr. Johnson.

"And who would pay you?" queried Municipal Clerk F. J. Nixon, as Mr. Angus is on a part-time basis in this regard.

The council decided that it would like to co-operate with Mr. Johnson but considered his request out of the question. The court of revision is open to Mr. Johnson if he is dissatisfied with his assessment, the council considered.

Municipal Clerk Nixon stated he would have no objection to Mr. Johnson looking over the assessment roll if there was more room in the municipal office.

DR. R. C. PALMER NOMINATED FOR VARSITY SENATE

The UBC Alumni Association of Summerland met at the home of Dr. and Mrs. R. C. Palmer on January 7th. A quarterly report was read from the central executive in Vancouver. Its chief feature was showing the progress in establishing the medical faculty.

A letter was read from Miss Shirley Harvey thanking the association for this year's scholarship. Dr. Andrew reported that the scholarship fund has nearly reached its objective, although a few more donations are needed to complete it.

Dr. Palmer was nominated by acclamation as a candidate for the UBC senate.

Following the meeting moving pictures were shown by Clark Wilkin.

WOULD SETTLE FOR \$25

Mrs. J. R. Graham's offer to settle for \$25 any damage which occurred to the home of her late father, I. P. Barnes, due to a mistake in the shutting off of the domestic water extension, was not accepted by the council on Tuesday. The council is writing Mrs. Graham, suggesting that if she cannot come here from her Salmon Arm home that she appoint a representative to investigate the alleged damage and come to a settlement on the findings.

February Will Be Busy Month For Board

Board of trade work will loom largely in the minds of members for three days next month, when the annual banquet of the Summerland board, the annual meeting of the local board and a general session of the Associated Boards of Trade of the Southern Interior are to be held on three successive evenings.

The annual banquet of the Summerland board, an event which looms largely in the year's effort, is to be held on February 12 in the Ellison hall.

On the following evening, February 13, deemed unlucky Friday the 13th by those who are superstitious, comes the annual business meeting and election of officers for 1948.

At Princeton on Saturday, February 14, the associated boards session is to be held in conjunction with the annual meeting of the Amber Ski club of Princeton. This exhibition is a thrilling event which attracts wide attention throughout British Columbia and across the line in the State of Washington.

To Select Slate
Aif McLachlan heads a three-man committee delegated to line up a slate of officers for the Summerland board for 1948. This committee report does not limit the number of nominations for various offices but is only created as a safeguard that a full slate will be available for the members when the election takes place.

Dr. R. C. Palmer, head of the program committee of the trade board, is obtaining a guest speaker for the annual banquet, while other details of the banquet have been entrusted to a committee consisting of J. R. Armstrong, Len H. Hill and Francis Stewart.

It is estimated that about 250 persons will wish to attend this annual banquet of the Summerland board. Civic heads and representatives of other trade boards in the immediate vicinity have been invited to attend this function.

Last night, the Summerland board was represented at the annual meeting and banquet of the Kelowna Board of Trade.

Still another board of trade function is scheduled for next month, when a provincial trade board gathering is tentatively set for Penticton on February 25. Organized by the lower mainland associated boards, this provincial gathering will bring representatives of associated trade boards throughout B.C. to Penticton. The date is only tentative.

The lower mainland body seeks to set up a provincial group which will have in mind the pressing for improvements to the transprovincial highway systems as its main objective, recent correspondence suggests.

Car Allowance Increase Denied

Application of K. M. Blagborne, assistant to Water Foreman E. Kercher, for an increase in his car allowance from \$30 to \$50 per month was turned down, by the council, "for the present time," at the Tuesday evening session.

The council was warned that other municipal employees would be seeking car allowances or increases if this application was favored.

It was the unanimous opinion of the council that it should not make any increases in wages or allowances at present, but members agreed with Councillor Eric Tait that a more careful watch over wage schedules should be kept than has been the case in the past.

Final decision on the electricians' wage proposals has not been given by the council.

EDITORIAL

That School By-law

Just before Christmas, School District No. 15 chairman, Dr. T. F. Parmley, declared that the Penticton council had never refused to submit the much-needed bylaw for school extension and renovation in Summerland, Penticton and Naramata. Summerland had contended that Penticton council had refused, in as much that three members of that body declared themselves against its presentation when Summerland and Penticton councils met with the school district board last summer.

Last week, there was no doubt of the Penticton council stand when it flatly refused to co-operate until the findings of the commission on school taxation are made known.

Summerland municipal fathers have gone on record as favoring the immediate submission of this bylaw, provided that their contentions on taxation problems between the municipalities and the rural areas of district 15 are not jeopardized.

Summerland council realizes the importance of immediate action towards providing more school accommodation. It has gone out of its way to further the bylaw proposal, in our opinion, and now the responsibility for further delay rests where we have contended for some time that it lay all along — at the door of the Penticton council.

Penticton is in as dire a position as Summerland in regard to the need for further classrooms. With rooms in church halls and basements and available classrooms crowded beyond their capacity, the young people of today are not being given their full opportunity to absorb the knowledge which will be so valuable to them in later years.

School teachers are being hard-pressed to impart their knowledge to their classes. The entire school system is being badly disrupted because of these crowded conditions. It is not fair to the rising generation.

Immediately following the tax commission sitting in Penticton last November, The Review suggested editorially that the time had come for Penticton, Summerland and the rural area to get together, bury their differences for the time being, and work together for the common cause of providing reasonable facilities for the pupils and the teaching staff.

That the Summerland council had the same idea could be evidenced from the steps taken in the latter part of November and early December. Legal advice was obtained by Summerland as to how far the council could go towards implementing the proposed bylaw without jeopardizing its tax inequality contentions.

When this step was accomplished, the Summerland council proceeded to acquaint the school district with its readiness to submit the bylaw.

And what has been the result? Penticton council, according to reliable press reports last week, has turned thumbs down on the bylaw proposal.

It is contended that the school district can force the Penticton council to waive its objections and prepare a bylaw for a vote of the ratepayers.

It is The Review's contention that the school board should proceed along this line, as we believe the good people of Penticton are just as anxious as those of Summerland to rid themselves of these terribly-crowded school conditions, the Penticton council stand notwithstanding.

More Pomp and Ceremony

Last week, the 1948 municipal council took office. There was no ceremony in connection with this important occasion. The members sat at their respective posts around the municipal council table, signed their respective declarations and then settled down into the normal routine.

It might have been one of a dozen similar sessions of the council. There was nothing to mark an occasion which has a significant and deep meaning.

We suggest that there should have been a short but dignified ceremony in connection with the swearing in of the new council. A ceremony would tend to impress on the minds of the office-holders and the public in

WOUNDED ARAB lies in a Jerusalem street after two bombs were thrown into the crowded Arab market place in front of the city's ancient Damascus gate. Six Arabs were killed as a result of the explosion and 41 others were injured.

The Inside Story

By THE AGROLOGIST

There was a notice pinned on the stenographers' door reading as follows:

"The girls are busy mimeographing the report on the BCFGA Research Project. Please do not give them any other work to do today."

Obviously, it was a good day to leave Eileen Richmond and Jean Eddie strictly alone. Accordingly, I walked through to the superintendent's office. He, also seemed to be very busy, but took time off to give me the following information regarding the BCFGA research project.

The idea of a BCFGA research fund originated in the mind of a progressive grower, who realized that the British Columbia fruit industry is now well enough organized to shoulder some of the cost of the research work required by this industry. He realized also, that best results would be secured by taking full advantage of the technical knowledge, facilities and equipment already available at the Summerland experimental station. These ideas were crystallized in a resolution which was passed by the Oliver local of the BCFGA. In due time, this resolution received the endorsement of the annual convention of the BCFGA.

By the terms of the resolution, the executive of the BCFGA was authorized to decide how much of the maximum \$5,000 annual grant would be actually spent and on what particular problem it would be used.

The Dominion government agreed to provide technical direction and to make available laboratory space and equipment at the Summerland experimental station.

For several years the research grant was used to secure information regarding the chemical composition and nutritive value of British Columbia tree fruits. During the past year, however, work has been begun on a new project. The primary purpose of this project is to ascertain practical methods of enhancing the quality of British Columbia apples, and improving the condition in which they reach the consumer. Four aspects of this general problem are being investigated:

- (1) The design and operation of air distribution duct systems in fruit cold storage houses.
- (2) The influence of delay in orchard and loose cold storage on the storage life of McIntosh apples.
- (3) The influence of fertilizer treatment on the grade, quality and storage life of McIntosh apples.
- (4) The influence of maturity at harvest time on the grade, quality and storage life of Delicious apples.

In comparison with the income of an individual fruit grower, \$5,000 is a large sum of money, but having regard to the total value of the British Columbia tree fruit crop, this sum is not too great an amount for the industry to spend each year on research designed to insure that British Columbia fruit of high quality reaches the consumer in the best possible condition.

Penny Wise

And now here you are — back in the good, old, comfortable groove once again, and isn't it a lovely place to be? No hustle, no bustle, no fuss; no parties either, though, no interesting gifts to open, not so many unexpected callers, and considerable more sleep. *Twas nice while it lasted though, but praise be it comes only once a year!*

Somehow once Christmas passes, it always seems that spring is almost here, and if you hunt around hard enough you should be able to spot a few pussywillows either already burst, or just about to. That is, unless you saw fit to make your home west of Chilliwack, in which case anything can (and usually does) happen.

If you've picked up any of those cellulose sponge mops yet (and if you haven't YOU'RE not doing justice to your housework) you'll find that yet another use for the long mop is wiping steam off the walls of the shower, or after someone has had a very hot

bath. They don't drip, you know, and have a great multitude of uses, not the least of which is cleaning windows.

Any time you've a hambone left over, don't forget to put it on to simmer and then make pea soup. You'll almost speak French without lessons if you eat enough of the lovely stuff. And that's a lovely language, too.

That old corduroy dressing gown of yours will make dandy cushion covers, particularly if it's a rich red color, or a gay green, or a merry yellow. And it'll stand no end of head-resting, which is what that man-of-yours likes, to be sure.

Should it be that everyone forgot the family cat at Christmas time, do make up for such neglect by buying your purring pet a catnip mouse. It'll get more fun out of the thing; and if you could manage to find one that squeaks (a rubber one, that is) your darling will love you forever... and a couple of days.

Try some glazed parsnips some-time, and you'll find you won't have half as much trouble getting the family to eat them. Boil them, as usual, then dunk in a sugar syrup and pop in the oven for a short time to brown, with a speck of brown sugar over them. They're mmmmmmm... good, that's what.

general the important posts which the members of the municipal council hold and the gravity of the task which faces them.

In future years we hope that more attention is paid to the commencement of the council duties for the new year. It would add dignity to the occasion, to say the least.

What is THE BEST THING I CAN DO with my WAR SAVINGS CERTIFICATES?

Make those WARTIME SAVINGS your PEACETIME BACKLOG...

this easy way

Now that your War Savings Certificates are beginning to pay off, why not keep this backlog of security intact. Use this money to create a "Fund for the Future" — a welcome asset in time of opportunity, a ready resource in time of need.

Here's a way to ensure that this money you've already saved doesn't slip through your fingers. Endorse and mail your maturing certificates, as described on the back, to Ottawa... then, when you receive your cheque, place it in a B of M Savings Account.

Better still — let the Bank of Montreal take care of all redemption details. Just bring all your War Savings Certificates to your nearest B of M branch. As each one comes due over the next few years, we arrange to get the cash for it and credit its full face value (which includes the interest) to your account.

Under this arrangement, there's no need for you to go to the fuss and bother of endorsing each individual certificate — the Bank will attend to this for you.

You'll find this service will save you time, trouble and worry. And while your Savings Account is growing — your War Savings Certificates will be in safekeeping. You'll be surprised at the low service charges, too.

A backlog of security today is your guarantee that you will get the things you want most tomorrow. Hold on to it — add to it — and do a real dollar-building job for the future.

We'd like to help you plan this. Just bring in your War Savings Certificates now... we'll do the rest.

If you haven't a savings account with us, we'll gladly open a special one for you.

Pioneer Days

TWENTY YEARS AGO

January 13, 1928

J. W. Jones, MLA officiated at the re-opening of Ellison hall as Summerland's new auditorium, with which was combined a program by the Operatic Society. He referred to the opening of the hall originally by Hon. Price Ellison. One of Gilbert & Sullivan's minor operas, Trial by Jury, was presented.

Grave concern was caused in the district when Dr. F. W. Andrew, called to Peachland on an emergency case, was unable to reach that point because of the condition of the road. Two patients were brought to Summerland hospital from Peachland by boat. The road to Peachland has been tied

up by snow conditions for two weeks. Dr. Andrew wired the minister of public works and the latter department communicated with Engineer W. K. Gwyer urging more attention be given this road.

Mr. R. V. Agur and Mr. Shepherd are delegates to the annual BCFGA convention.

Reeve R. H. Harrison has been re-elected by acclamation as reeve of Peachland.

On January 8, at All Saint's cathedral, Halifax, Mary Amelia only daughter of Mr. and Mrs. H. L. Gallagher, Summerland, was married to Raymond Heywood Noble, son of Mr. and Mrs. H. H. Noble, England.

G. W. Cope has purchased J. Barkwill's house in Peach Orchard.

Northern Spies will average the grower one dollar per box over all grades, the co-operative has announced.

NO ACTION ON MARGARINE SALE; DIVIDED VOTE

The Canadian Chamber of Commerce will take no action on the question of the sale of margarine in Canada, recent correspondence received by the Summerland Board of Trade declares.

A Canadian-wide vote by member boards and chambers of commerce was sought by the Canadian Chamber of Commerce recently with the result that 119 were in favor and 102 were against the lifting of the ban on margarine sale in the Dominion.

Fourteen member bodies refused to vote on the subject, the Summerland Board of Trade being one of those groups which did not express an opinion. The local board did not consider it had enough facts at its disposal to register a proper vote by the time a decision was required by the Canadian body.

It has been suggested by the Canadian chamber that those groups which did not vote before might still do so, now that more information is available.

On Thursday, when the Summerland board held its January meeting in the IOOF hall, the probable re-opening of this subject for discussion and vote was mooted.

It was suggested that the local speakers' club might study available data and present a debate before the board of trade at a future meeting. This idea is being investigated but George Washington declared that it has been the policy of the speakers club to confine debates to its own membership.

Let Conscience Guide You Says Judge Archibald

KELOWNA — "When major problems come before you, don't sit back and worry what the voters will think over the stand you will take, but use your own discretion and let your conscience be your guide—then go ahead."

This was the advice given by His Honor Judge J. Ross Archibald to members of the 1948 city council when he presided over the inaugural ceremony held in the council chambers.

Judge Archibald administered the oath of office to Mayor W. B. Hughes-Games and Aldermen W. T. L. Roadhouse and R. F. Parkinson.

PEACH FESTIVAL PLANS PROGRESS

PENTICTON — Meeting of Penticton for Penticton's first Peach Festival to be held August 18, 19 and 20, marked a meeting last week of the steering committee made up of representatives of the four service clubs.

With Rotarian Neil McKerracher presiding, the meeting did some preliminary work on a budget, voted a sum of money for publicity and advertising, authorized the purchase of a Chrysler Windsor sedan, the awarding of which will be one of the features of the festival, and made early arrangements for a Peach Festival Queen contest.

Brief On Home For Aged Will Be Prepared

J. E. O'Mahony, vice-president of the Summerland Board of Trade, has been requested to prepare a brief on the subject of a home or homes for the aged in the southern interior. Working with Mr. O'Mahony will be Rev. Canon F. V. Harrison and George Perry.

This subject has been uppermost in the minds of these men for the past year, ever since Rev. F. W. Haskins prepared an interim brief, pointing out the need of some type of home.

It is Mr. O'Mahony's contention that small homes should be established in each community and that they be financed partly through provincial government grants.

With such grants available, plus the inmates old-age pensions, elderly persons would be able to live in comparative peace and comfort for the remainder of their lives, and the homes would be more or less self-supporting.

He favors such a plan against the operation of a large home located in a central spot, as with the latter scheme elderly persons would be required to move away from surroundings which are familiar to them.

This brief is to be prepared in time for presentation at the associated boards session in Princeton on February 14. Other boards in the southern interior have been requested to prepare briefs on their contentions on this subject and out of the general discussion one consolidated brief will probably result.

Extra Candy Bags Given Salvation Army at Coast

Nearly two hundred bags of candy and nuts were left over from the annual Christmas tree treat of the Summerland Board of Trade, staged on Christmas Eve in the park-playground, Walter Charles, chairman of the committee, told the board on Thursday evening in the IOOF hall.

Some 793 bags of goodies were prepared but the number of children in prospect did not materialize. The extra bags were shipped to the Salvation Army in Vancouver, for distribution to needy families.

Last Thursday an official letter of thanks was received from Salvation Army Vancouver officials, who declared that the treats arrived just in time for their annual handout and were greatly appreciated by the children of the coast city.

In order to finance this annual treat, \$177.25 was collected from business firms and other interested parties in the district. There were further donations of some candy and paper bags. Expenses were slightly more than the amount collected.

President F. W. Schumann thanked Mr. Charles and his committee for their splendid effort, which resulted in some 600 Summerland children receiving a Christmas treat.

ONLY ONE FEASIBLE LOCATION FOR AIR STRIP BOARD TOLD

There is only one feasible spot in Summerland district for an airstrip for small planes, George Washington told the Summerland Board of Trade January meeting last Thursday in the IOOF hall.

Mr. Washington was recently appointed as head of a committee to investigate this project. He has asked that the board executive appoint other members to work with him on this project.

Not only is there only one favorable site, but it would be an extremely expensive undertaking and much beyond the scope of the board of trade, Mr. Washington suggested.

Further data will probably be collected on this project and a brief submitted later in the year, it has been suggested.

ICE ARENA IS NO. 1 PROJECT

KELOWNA—Building of Kelowna's memorial ice arena will be one of the No. 1 projects of the 1948 city council. This statement was made by Mayor W. B. Hughes-Games at the inaugural ceremony of the new council. In declaring that the ice arena is a "must" project, Mayor Hughes-Games recalled that at the outset of last year's council, mosquito control had been placed at the top of the list of "must" projects and that this campaign had been carried out successfully. He indicated that plans would get underway within the near future toward the building of the ice arena, and he placed Alderman Parkinson in charge of the all-important civic control, and parks committee.

OUT DOWN TREE
Foreman E. Kercher will be asked to decide to Mrs. M. E. Collins' request for the removal of a dead tree on a sidewalk near her property in Prairie Valley.

Mrs. M. E. Collas Takes Second Term As Head Of Women's Institute

Mrs. M. E. Collas was re-elected to a second term as president of the Summerland Women's Institute at the annual meeting held in the Parish hall on Friday, January 9, with forty members and visitors present.

An extremely active year was reported on for 1947 the Institute gaining a membership of 55, with an average attendance of 31 at the ten regular meetings held during the year.

During 1947, the Institute sponsored a fashion show in March, jointly with the hospital auxiliary; held a rummage sale in April; served refreshments and tea at the spring fair in May, plus a handicraft booth, and in June co-operated with the T.E. X-ray mobile clinic. In September, the Institute sponsored a tag day for the blind, and in December displayed pictures by young artists from the Vancouver Art Gallery.

Many Donations Made

Total earnings of the Institute were \$590.92, with expenditures of \$474.60, leaving a balance of \$116.32. Donations made by the Institute during the year amounted to \$354.59, made to the following groups: St. John's Ambulance Society, cancer fund, film council, W.I. memorial fund, children's hospital at Vancouver, Salvation Army, apples to the Solarium on Vancouver Island, parcels to an English W.I., and the Royal Wedding fund. Also, two overbed tables were given to the Summerland hospital.

Other officers elected at the annual meeting were:

Vice-president, Mrs. A. K. Macleod; secretary-treasurer, for another term, Mrs. E. L. Famchon; directors, Mrs. J. McLachlan, Mrs. C. H. Eisey and Mrs. H. R. McLarty.

Many Talks Heard

Many interesting and informative talks were given Institute members at their monthly meetings and were listed in the annual report as follows:

Mrs. A. K. Macleod, Canadian Citizenship; Mrs. A. J. Mann, Art Appreciation; the late J. G. West, Advertising; Col. Burnett, P. G. Dodwell and S. A. MacDonald, School Bylaw; Dr. Alison Ritchie from London, Eng. Life and Health of the English during the War; Mrs. J. H. East, Keremeos, W.I. provincial director, Work of Women's Institutes; Mrs. D. J. McMynn, Pentiction, Playgroups for Pre-school Children; Mrs. H. R. McLarty, United Nations.

At the regular monthly meeting, preceding the annual session, the Women's Institute was informed that there are now 203 Women's Institutes in B.C.

Mrs. S. A. MacDonald informed the meeting that she would be sending the membership money and receipt books back to the Canadian Consumers' Assn in Vancouver at the end of January and she would welcome more members before that time.

Mrs. H. R. McLarty once more took on the task of sending a parcel overseas to an English W.I., with the assistance of Mrs. J. Fraser.

Spring Fashion Show

Members approved the action of Mrs. Collas in stating that the W.I. would sponsor and supply models for the Wabasso fashion show to be held this spring.

Mrs. Macleod told the meeting that the next art exhibit will arrive some time in March and will consist of water color paintings.

Following the business session a technical film depicting the life of a French-Canadian farmer and chosen from the Summerland Film Council bank proved an interesting and educational presentation. C. E. Bentley operated the projector.

Mrs. Collas informed the ladies present that owing to the Women's World Day of Prayer falling on February 13 that the next regular meeting of the Institute will be postponed until Friday, February 20.

The Mail Box

HOSPITAL PURCHASES

Summerland, B.C.
January 13, 1948

Editor, The Review:

The Summerland Hospital Auxiliary wish to correct an erroneous impression that their purchases for the hospital are made out of town. Our Buying Committee is instructed to purchase articles needed by the hospital from our own merchants if at all possible. If we cannot get the merchandise locally then we must go elsewhere, as the articles and supplies we buy are more or less needed at once and cannot be left "on order" for two to three months.

During the war years it was difficult to procure linens and towels, but fortunately we had a connection with a Hospital Supply house that could provide these items. Otherwise, your hospital would have been minus a great many necessities during the period of short rations.

As we depend on the good citizens of Summerland to support our enterprises, we want you to know that our funds are carefully disbursed and every consideration given our local merchants.

Yours truly,
THE SUMMERLAND HOSPITAL AUXILIARY

PAYS DRUNK FINE

S. Ozeroff, of Summerland, was fined \$10 and costs by Magistrate H. Sharman in Summerland police court on Friday, Jan. 9, on a charge of being intoxicated.

DISCUSS NEW ASPHALT PLANT

Announcement that Standard of B.C. has commenced construction on a new asphalt plant at its Stanovan refinery, representing an investment of \$500,000, was hailed by Reeve George A. Morrison of B. baby, as a forward step in the development of British Columbia's great industrial capacity. Shown discussing details of the plant location is Ralph D. Baker, (left), president and managing director of Standard of B.C., and Reeve Morrison. Preference is being given B.C. firms in the purchase of equipment, fixtures and supplies, states Mr. Baker.

OBITUARY

DAVID KEAN

Last respects were paid on Saturday afternoon, January 10 to an old-time resident of Summerland, David Kean, who passed away at the Vancouver General hospital on Tuesday, January 6.

Born in Kirkmichael, Ayrshire, Scotland, 83 years ago, the late Mr. Kean came with his wife and family to Summerland and settled in the Garnett Valley area 41 years ago. His wife predeceased him about fifteen years ago.

For many years, following his arrival in 1906, the late Mr. Kean was employed by the municipality on the irrigation system, besides carrying on his fruit ranching enterprise.

A quiet man, he did not take an active part in community affairs, but he was respected and liked by all who knew him and his friends were many. He took an active interest in the St. Andrew's society in the early days of this district.

He leaves two sons, James in Summerland and William in Chula Vista, Cal., five grandchildren and one great grandson.

Funeral services were conducted from St. Andrew's United church, West Summerland, at 2 o'clock last Saturday afternoon with interment in Peach Orchard cemetery. Pallbearers were Messrs. Roger Tingler, J. McKenzie, Harry Tomlin, Alex Smith, E. Kercher and Dr. J. Marshall.

LIONAL W. H. COLLINS

After an illness of some two years' duration, Lional William Hawkins Collins, aged 67, passed away in the Summerland hospital on Saturday, January 10. Born in Wiltshire, England, the late Mr. Collins came to Canada in 1904 and lived in various parts of the prairie provinces before moving in 1935 to Summerland, with his family.

In his early prairie days, Mr. Collins was bank manager in Regina, and afterwards carried on an accountancy business at several prairie points. He was a veteran of World War I and was a member of the IOOF lodge in Est-on, Sask.

Besides his wife and one son, David Collins, who resides on the family fruit ranch in Garnett Valley, the late Mr. Collins leaves one brother, Allan, in Calgary and three brothers and a sister in England.

Rev. Canon F. V. Harrison officiated at the funeral service in St. Stephen's Anglican church on Monday, January 12, at 2 o'clock and at the interment in the Anglican cemetery. Pallbearers were Messrs. Dan Rutherford, R. Shannon, Reg Kersey, Ben Newton, Roy Wellwood and Dave Taylor.

TRANSFORMER DEMANDS

Municipal Foreman T. P. Thornber asked the council on Tuesday for permission to purchase a metre to decide the actual demand on transformers. He needed however, to the proposal of Councillor F. E. Atkinson that three such "demand ammeters" be borrowed from the West Kootenay Power & Light Co. Ltd. and that a survey of all transformers be undertaken at one time.

BAND SLIPPERY ROADS

Municipal road crew turned out on Sunday last to sand the slippery portion of the main municipal roads, following Saturday's short snowstorm. "They did a good job but I hope they realize it will have to be continued," remarked Reeve Reid Johnston.

NOT SO EASY TO SUBDIVIDE LOUIS SCHINDELL FINDS

Louis Schindell had definite plans regarding his proposed subdivision of the former Eisey lot opposite the municipal equipment ground, but on practically everything he suggested he received a blunt "No" from the municipal council on Tuesday.

He did not want a lane back of the subdivision but was promptly informed that there must be a lane 22 feet wide. He wondered if he could put in a lane eleven feet wide and the adjoining property could provide the other eleven feet. He got a negative answer to that one.

Then, he wanted to subdivide but still leave the trees intact so that he would reap the benefit of the fruit crop next fall. He was told he must clear out the trees and rough-grade the lanes and roadways before the plan could be approved by the council.

Mr. Schindell shook his head somewhat as he left the council meeting, but came right back after the supper intermission and presented revised plans showing the proper lanes and other data. The council told him he could go ahead on that basis.

PLANS RE-TREADING SHOP

John Surtees, who proposes to establish a re-treading shop at the corner of Kelley and Jubilee, with frontage mainly on Jubilee, reported to the council on Monday that he could not devise a building which would conform with the residential lot line on Kelley. As this is a business premises and would conform with the Bank of Montreal lot line at the other end of the block, the council agreed with the proposed building.

MEN'S AND BOYS' WEAR
Hastings Street

SCOUT NEWS

Friday's meeting showed a near-record turnout of 21 boys. Let's make it perfect this week!

The troop misses P/L Dave Wakefield of the Buffaloes who has just left hospital for home after breaking his leg. We are fortunate in welcoming Arthur Bradford of the 1st Pentiction troop who is living in Summerland and has been appointed acting P/L of the Buffaloes while Dave is away. Scouts Carey, Younghusband and Coggan completed tenderfoot tests.

In the patrol competition the standing are as follows: Eagles 435, Beavers 133, Buffaloes 128 and Hawks 342. If you want to win full points for your patrol, come with full uniform (except trousers which may be worn in winter in place of shorts). Each boy should also come prepared with a pencil and piece of paper.

Every Scout is also expected to attend the church of his choice each Sunday. Failure to do so means loss of points for the patrol. First Summerland Troop was honored in having its Troop Leader, David Wright selected to represent Summerland at the recently held "Boys' Parliament" in Vancouver. David reported to the troop on his experiences, and explained how the Boys' Parliament is run on the same rules of order and procedure as the provincial parliament. It is a training in responsibility and leadership for sound and useful citizenship.

Particular emphasis was laid on the provincial hobby show to be held in Vancouver for which entries must be received before the end of this month. For further details Scouts should contact Dave Wright at school.

Notice—Meeting Friday, Jan. 16, in school gym. Duty patrol, Hawks.

TEAMS GO TO OLIVER

First games in the South Okanagan high school basketball tournament are to be played on Saturday in Oliver, with Summerland senior A girls, senior B and junior boys participating.

SCHOOL HOCKEY TOURNEY

A high school hockey tournament for senior and junior school boys and possibly girls' teams is projected for Vernon towards the end of this month, Jock Smith, local high school sports coach, states this week.

DID YOU KNOW?

APPETIZING TIME - SAVERS

VERY OFTEN, mother is so busy during the day with her myriad household tasks that she has no time to prepare a large meal at suppertime.

On these special days, a visit to the bake-shop is in order for there she will find appetizing little meat pies which, when heated in the oven, will be sure to please the whole family. There, too, she will find light, white and brown breads, crusty little plain buns and a variety of small cakes, cookies, pies and cakes, decorated with multi-colored icings and ready to serve.

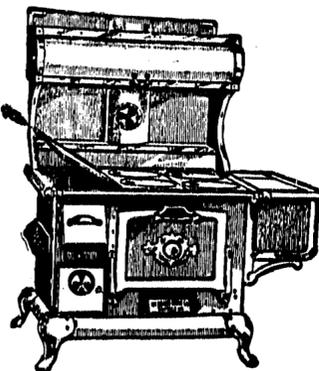

They are guaranteed to give eye appeal and are real hunger-satisfiers too! The weary business girl, wending her way home after a long and tiring day, is cheered by the sight of these dainty little cakes as she selects a few for her dinner.

And when the kiddles decide rather precipitously that they are going on a picnic, how much simpler it is to call on the baker rather than spend tedious hours in a hot kitchen.

Training School At Naramata Now Well Underway

NARAMATA — The United Church Youth Leadership Training School at Naramata, result of long-planning by a group of church leaders, was officially started on its way at a dedication service last week. Between 200 and 300 persons attended the event, journeying to Naramata from as far as Kelowna and Keremeos to do so.

Those officiating at the ceremony included Rev. Robert J. McLaren, principal of the school; Rev. R. P. Stobie, of Penticon; Rev. Dr. M. W. Lees, of Kelowna; Rev. Dr. Gerald P. Switzer, of Vancouver, first lecturer, at the school and W. Nicoll, representing the Naramata United church.

Dr. Lees spoke of the need that had become apparent in the 1920's for lay workers in the Sunday schools, and the hope that some method would be found to provide them.

"Then came that human dynamo

we know as 'Bob' McLaren," he said adding that the vision had then given way to reality.

Rev. R. P. Stobie said "Visions are all very well, but they all too often get nowhere." He then showed how various factors had been worked in to make the school a functioning unit.

"We must ever press forward, however. Our goal is yet in the future." As part of this goal, he said, there is the idea of obtaining land for a permanent building. Then the school would have its attached farm lands, and might include summer camp sessions and summer schools in addition to the regular winter terms.

Dr. Switzer, who officially opened the school, stated that it is now possible for man to end war, starvation, and unemployment, for the first time in human history.

He touched upon the efforts of the late President Woodrow Wilson in creating the League of Nations, contrasting the isolationist attitude of many of the people of the U.S. at that time with the world-consciousness of today.

He then linked this thought with the work that can be accomplished by the school, showing how this could be made to become a part of the doctrine of peace, and the brotherhood of man, how each of the young people trained in the school becomes an emissary for this work.

The AOTS club in Summerland sponsored a concert here late last year in aid of this leadership training school.

MRS. A. K. ELLIOTT ELECTED PREXY OF LEGION W.A.

Mrs. A. K. Elliott was chosen president of the Summerland Legion Women's Auxiliary at the annual election of officers held in the Legion hall on Tuesday afternoon Jan. 13, succeeding Mrs. Arthur Lamcraft. Mrs. Elliott is also chairman of the South Okanagan-Similkameen W.A. zone council.

A good attendance of some 35 members was present for this annual meeting, which commenced with a report from Mrs. Phil Davis on the recent auxiliary zone council session.

A donation of \$10 towards the children's food fund organized by Dominion Command Canadian Legion to aid British children was authorized.

Other officers for the ensuing year are:

First vice-president, Mrs. Percy Thompson; second vice-president, Mrs. W. McCutcheon; secretary, Mrs. P. Davis; treasurer, Mrs. H. R. McLarty; standard-bearer, Mrs. Ted Logie; sergeant-at-arms, Mrs. W. Milne; social committee chairman, Mrs. J. A. Read; executive, Mrs. J. L. Brown; Mrs. Lydia Johnston, Mrs. Al McCarger; past president, Mrs. A. Lamcraft.

B. C. Legislature Opens March 2

The third session of the twenty-first parliament of British Columbia will be officially opened at three p.m. on Tuesday, March 2, it was announced by Premier Byron I. Johnson, following a meeting of the cabinet held on Friday last.

This means that the house will convene after the two by-elections have been held in Cariboo and Saanich ridings so that two new members will have to be introduced to Mr. Speaker, who on this occasion will be Hon. R. H. Carson, after his appointment to that post has been confirmed by the legislature.

REVIEW CLASSIFIED ADS BRING RESULTS

Socially Speaking

Mrs. G. G. Peters is at Kamloops this week on a buying trip.

Mrs. Ben Mayne is a patient in the Summerland hospital this week.

Mr. and Mrs. W. D. Laidlaw left last week for a visit to coast points.

Mr. Alex Steven has returned from Vancouver, where he spent three weeks' holiday.

Mrs. Harold Smith has returned to her home after three weeks in the Summerland hospital.

At the Summerland hospital on Friday, Jan. 9, a daughter was born to Rev. and Mrs. W. S. Angell, West Summerland.

Miss Inez Manette has returned to Summerland from Chicago, where she spent three weeks' holiday.

Annual meeting of St. Andrew's and Lakeside United churches was held in Lakeside United last evening.

Mr. and Mrs. C. A. Gayton and Beverley were guests on Sunday evening at the home of Mr. and Mrs. D. Morgan, Penticon.

Mr. Clayton Darke has returned to his studies at UBC after spending the holidays with his parents, Mr. and Mrs. J. Darke.

Mrs. W. Maxwell with her children of Westbank, spent the weekend in Summerland visiting her mother, Mrs. J. Ritchie and her sister, Mrs. H. W. Brown.

Mr. Harvey Wright, who accompanied his daughter, Miss Verna Wright to Vancouver, where she has entered St. Paul's hospital, returned this week to his home on Pender street.

Mrs. W. T. Boothe is presenting a paper on the opening of the United church leadership training school which opened last week in Naramata to members of the United Church Federation this afternoon in St. Andrew's church hall.

LOSES FOUR BIRDS

Between Christmas and New Year's the Verrier's Meat Market lost four large turkeys. The birds were hanging near a window which had been slid back a short distance to allow plenty of ventilation over the weekend. The screen was pried loose and the birds stolen from their resting place.

WANTS TO RENT LAND

Application was made by Mr. Bradford to the municipal council on Tuesday for rental for pasture purposes of property between Lot 1 and the railroad track in Prairie Valley. This property will be investigated by a council committee.

Mr. and Mrs. H. A. Miller, with their son, of Princeton spent the New Year holiday with their parents, Mr. and Mrs. F. A. Miller, Crescent Beach.

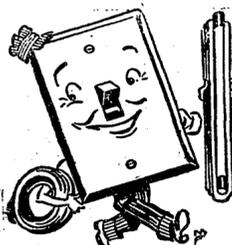

In last week's issue, it was stated that Mr. and Mrs. R. S. Jackson of Vancouver were guests at Christmas of Mr. and Mrs. T. A. Walden. This was incorrect as they were guests of Mr. and Mrs. T. B. Young.

Plans for a big tea and home cooking sale on Valentine's Day, February 14, were laid by a well-attended meeting of the Lakeside Jr. W.A. held at the home of Mrs. J. Raincock on Thursday, January 8. Several new members were in attendance and plans for spring activities were discussed at length. The next meeting is to be held at the home of Mrs. H. Lemke.

Miss Elizabeth Braund, of the placement bureau of the registered nurses' association, Vancouver, visited the Summerland hospital on Tuesday afternoon and was guest for dinner at the home of Mr. and Mrs. Eric Tait. Miss Braund and Mrs. Tait were classmates in nurses' training.

Girls of the Grade XII class of the Summerland high school held a tea on Tuesday afternoon, January 13, with Miss Jean Bryden acting as hostess and Mrs. A. W. Vanderburgh pouring tea for thirty. The students modelled dresses which they had made in home economics class, under the instruction of Miss I. Wilson. Those modelling were Gwen Lamcraft, Marjorie Yamabe, Doris Cristante, Jean Bryden, Laura Mott, and Estelle MacDonald. Maureen May was commentator.

Sparks

Says . . .

MARCONI TRIUMPHS:

The pre-Marconi men, who believed that they had found clues for electrical communications without wires generally did so by accident. While experimenting in the field of electricity they observed that the effects were not necessarily bound to wire.

Mystified, they groped around wireless through induction, conduction (current leakage) and electrostatic coupling. These influences led them away from the real clue.

Preece and Lodge were entranced by magnetic induction; Morse by conduction and Dolbear by electrostatic effects. They all failed to realize that radiation was the real clue to wireless.

Marconi grasped this significant idea and made electromagnetic radiation a practical method of wireless communication. Those who followed Marconi improved upon what he had achieved.

Summerland Is Represented At Training Centre

Nearly a hundred young British Columbians from rural centres as far apart as the Peace River Block, the Fraser Valley, Vancouver Island and the Kootenays are assembling at the youth training centre in Acadia camp near the University of B.C. campus for eight weeks of intensive vocational and practical training based on their own interests and needs.

To date, 31 young women and 62 men between the ages of 16 and 30 have notified university authorities of the day they will arrive to enroll in the youth training school. Word is expected from 10 or 12 others.

Jack M. McDougald, West Summerland is one the students enrolled.

First job confronting students in this unique school will be the business of getting settled in the self-contained living quarters provided in the camp. Next, they will talk over their interests and needs for training with staff counsellors headed by the principal, Kelvin Large.

When all student needs have been assessed, final curriculum for the school will be posted and a concentrated routine will commence.

Men will receive general agricultural instruction with emphasis on problems presented by conditions in their general home areas. With this work, they will combine practical experience in the handling and upkeep of farm machinery and equipment.

Other projects will include instruction in carpentry, and in handicrafts for those who desire it.

Main emphasis in work for women students will be placed on home economics and handicrafts such as sewing, glove-making, leatherwork, etc. Women who are particularly interested will receive training in agricultural subjects.

Included in the curriculum will be field trips to inspect activities of the university faculty of agriculture, and to view industrial plants, commercial meat packers and farms.

Evenings at the school will be largely devoted to informal recreational activities under guidance of instructors. In previous years, debating, journalism, painting, drama, and various social functions shared the evening spotlight with discussion groups on citizenship and other related subjects. It is planned to organize similar activities this year.

TREE FRUITS RINK WINS
Surviving eight-and-a-half hours of steady play, B.C. Tree Fruits rink won the top prize in the special bonspiel held at Vernon on January 1 and 2. Top prize of the 'spiel was a jumbo sweater for each member of the winning team: Carl Stevenson, skip, Bob Grant, Les Roadhouse and Orby Boake.

MAY INCREASE RATES
KELOWNA—Warning that the incoming city council may have to consider the possibility of increasing electric light rates in the city to take care of the rising costs in labor and materials, was given by Alderman S. T. Miller on the eve of his departure from the council.

Huge Quantities Of Bulk Food Go To Hungry Europe

TORONTO—Nearly two and a half million pounds of bulk food bound for the hungry peoples of Great Britain and Europe, were shipped overseas by January 1st, of this year by the Canadian Red Cross Society.

These shipments represent more than half of the \$1,000,000 food grant allocated from the society's remaining war funds in October to ease this winter's food crisis abroad.

Balance of the bulk foods has been purchased and is moving steadily toward the Atlantic seaboard.

The more than 80,000 cases of the way or already received overseas, represent a value of \$591,355 and contain bulk foods that have been specifically requested by the Canadian Red Cross commissioner in London in co-operation with the British Ministry of Food.

Meat and meat preparations, corn syrup, fruit juices, dried milk powder, grain foods such as macaroni, rolled oats and corn and bran flakes, as well as large shipments of vitamin preparations, were the main foods requested.

Shipments are consigned for distribution to the Canadian Red Cross representative in Britain and in Europe, to the Red Cross societies of the respective countries concerned. All goods are labelled "Gift from the People of Canada through the Canadian Red Cross Society."

Radios for Winners Of Slogan Contest

Ten Northern Electric "Baby Champ" mantel radios will be given as prizes in a slogan contest being sponsored by the Pacific National Exhibition according to word received today from PNE officials.

Purpose of the contest is to stimulate interest in the 1948 PNE. Prizes will be awarded for the ten best slogans submitted for this year's fair.

No restriction has been placed upon the number of words in the slogan, nor upon the number of submissions by any one person. Entry forms are not required. The contest closes February 29th.

This year's fair will run 11 open days—August 25th to September 6th. PNE officials confidently expect last year's record attendance of 586,917 will be topped by a wide margin.

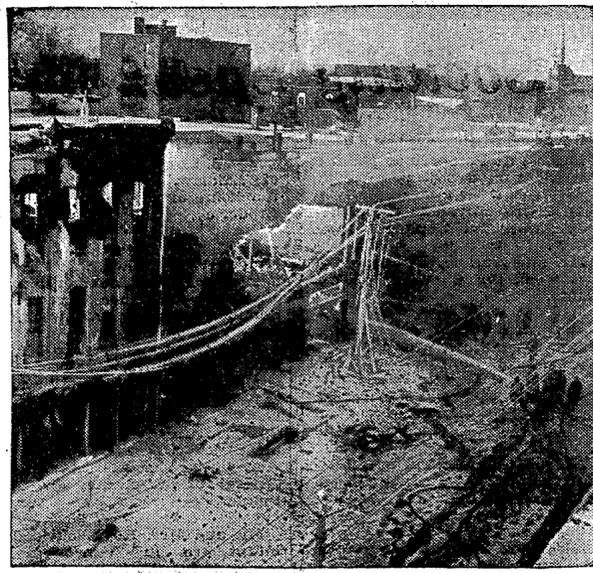

Ski Queen To Be Chosen at Kelowna

KELOWNA—Ski Queen to reign over the approaching Okanagan Ski Zone championships will be chosen from five Kelowna beauties, according to officials of the host club, the Kelowna Ski club.

Five candidates and their sponsors are: Sharon West, Lido club; Pam Leckie, Canadian Legion; Betty Ryder, Rotary; Helen de Gutter, Gyro club; Dora Kelly, Elks.

VERNON TURNS SOD ON HOSPITAL SITE

VERNON—One step nearer to a long cherished hospital dream, some 50 interested citizens gathered at the site of the new hospital on Sunday, Jan. 4, for a "Turning of the Sod" ceremony that was brimming with significance. Symbolizing three years of planning and hard work combined with heartaches and set backs, it was the momentous "go-ahead" signal which will turn the dream into a \$500,000 reality.

Fire ate at the core of Cornwall's business district on Christmas eve, rendering more than two dozen families homeless and causing over \$1,000,000 damage as it razed 12 stores and 24 apartments. Photo above shows the blaze at its height, having already gutted the buildings at the left.

The Mail Box

LOWER INCOME TAX
West Summerland, B.C.
January 11, 1948
Editor, The Review:

Herewith is a letter which I have despatched to Hon. Herbert Anscomb, at Victoria, B.C., which I believe will be of interest to your readers:

"Dear Mr. Anscomb:
I have received your letters with reference to the financial and labor situation in this province and country, which I have noted with interest.

Have also listened to and read about the different opinions on same by our federal leaders with reference to these same difficulties. And also in regards to advances in cost of living and the shortage in different lines—even with the high prices prevailing to same.

And in my humble opinion there is not one of you that has touched on what I consider 80% of our troubles.

"INCOME TAX"

In the first place we will take the single man who has offered his all for his country. He is allowed \$750 per year to live. I would like some person to explain to me how a young man can save enough to buy a home, get married and settle down when taxed in this manner.

I would suggest allowing the single man at least \$2000 per year free from any tax. This would allow the ambitious fellow to save and invest on his own.

A married man should be allowed at least \$2,500 per year to live on, free from any tax. This would allow the thrifty ones an opportunity to, we will say, put aside \$1,000 per year for he and his wife's evening of life.

No man with any back bone likes the idea of old age pension. With the above allowances

granted I am sure our production, especially on farms, would increase one half more than at the present time.

Then the old law of supply and demand would come into action and prices would be regulated by same and get back to normal, where things in general must be before we have prosperity and good fellowship between capitol and labor."

Yours respectfully,
W. L. MCPHERSON.

Seven Boxers For Golden Gloves

KELOWNA—Big test for seven Kelowna and district boxers is still over a month away—that's the Vancouver Sun Golden Gloves, February 13 and 14.

The contestants will be Vince Ciancone, Kelowna, heavyweight; Augie Ciacone, Kelowna and George Fenton, Westbank, middleweights; Andy Arnot, Oyama, welterweight; Kaname Araki, Westbank, featherweight; Peter Tarasewich, Glenmore, bantamweight; Stanley Taneda, Westbank, flyweight.

NAVY GIVES 600 PINTS OF BLOOD

British Columbia's naval personnel has started the New Year right by supplying 600 pints of blood to the Red Cross blood transfusion service. During the past week planes from Victoria to Vancouver carried several loads of the precious fluid to the transfusion depot for checking and distributing. This supply was obtained from 600 navy men at HMCS Naden where four clinics were held January 7-8.

The B.C. Red Cross blood bank supplies are now back to normal following the holiday season when a special effort was made to secure sufficient Vancouver donors to keep up with the demands made over the Christmas weeks. More than 1,000 Vancouver citizens responded to the Red Cross appeal and attended the 14 clinics held between December 20 and January 6. This blood kept B.C. hospitals supplied with blood during this period.

Accomplishments Of U. N. Related

Giving the credit side of the United Nations organization in a review of its accomplishments since inception, as compared with the gloomy picture depicted in day by day reports emanating from official circles, Grev J. Rowland, publisher and editor of the Penticton Herald proved an interesting and educational speaker to the Rotary club of Summerland at its weekly supper meeting in the Nu-Way annex on Friday evening.

SEEK OPINION ON TAX RELATIONS

An interesting referendum is being suggested for the near future by interested boards of trade and chambers of commerce throughout Canada on the subject of dominion-provincial tax relations. The Canadian Chamber of Commerce has notified the local board that this referendum will be forthcoming later in the year and has warned the board to be prepared to voice an opinion on this contentious subject.

REVIEW CLASSIFIED ADS BRING RESULTS

Ontario Growers to Provide Real Competition in Apples

(From Ottawa Farm Journal)

Ontario not only can but will recover the rich market for apples that she lost to British Columbia a generation ago, J. H. Ferguson, Progressive Conservative M.P. for Simcoe North, told The Journal today following discussions with apple-growers and packers of his constituency.

"The apple industry in Ontario is really making a come-back," Mr. Ferguson insisted. "In my riding, near the Georgian Bay, growers are extending specialized modern methods in their orchards and are planting substantially increased acreages in new trees. "Apples really pay off when given proper attention and when they are properly marketed," he added. "One of the growers in the Collingwood area paid income tax on \$71,000 last year and all from his apple crop. Somewhat comparable profits are being made by other growers in an area 18 miles long, and several miles wide, between a ridge of hills and the flat land on the shore of the bay."

Crop Sold in Advance

The leading apple-packing firm in Collingwood, the North Simcoe member said, has adopted grading, packing and marketing methods similar to those in the apple belt of British Columbia and in the State of Washington. Result has been that it has sold all its holdings of top grade apples in advance. Moreover, these sales have been made at premium prices.

"This year the world crown for apples was awarded to a Georgian Bay grower," Mr. Ferguson said. "There are no finer Northern Spies grown than those we raise, and we have equal success with the McIntosh, the Tallman Sweet and some of the newly-evolved varieties. We are now increasing production with an apple that has a smaller acid content than any other known, and are preparing to market it not only in Ontario but all across Canada."

The North Simcoe member admitted that there are only one-third of the apple trees in Ontario today that there were at the beginning of the century. The present trend, he said, was increasing the number of trees and bringing in much additional land for orchard use.

"There is every reason to believe there will be an expansion in other apple-growing districts of Ontario similar to that in the Georgian Bay region. I look for an increase right in the St. Lawrence Valley 50 miles from Ottawa and, on the farm lands a few miles back from the shore of Lake Ontario.

"Demand for Ontario apples is immense and once we get going we can produce apples every bit as good or better than those that are coming in from British Columbia.

Our best apples are of a slightly harder type than those grown in B.C., have as much juice or more, and a finer and closer texture."

Apple growing in Ontario today is very different from 70 years ago, Mr. Ferguson emphasized. The day when a farmer could allot a few acres for apple trees on a hit-and-miss basis is gone forever.

More Bugs Today

"There are all sorts of bugs and tree diseases that weren't here in our grandfathers' time," he said "You have to spray your apple crop seven times a year. Now I've a few trees myself, and I happened to be away last year and didn't have them sprayed. The result was that I lost 25 barrels of what otherwise would have been fine Spies. Every last one of the apples had a worm in it."

New orchards planted out in 1947 will not come into bearing for six years, Mr. Ferguson explained. During that non-profit period, trees must be given attention, cultivation, spraying and grafting. Once they do begin to bear commercially the harvest is extremely profitable.

The North Simcoe member admitted it would not be easy to oust the British Columbia apples from Ontario, where they have obtained a firm hold with dealers and the public. He conceded also that Ontario had lost the apple market in the prairie provinces through careless and improper marketing methods.

"I'm convinced that we'll win out, and within the next 10 years, for the simple reason that we've got the finer apple."

First Fatality of Year in Penticton

PENTICTON—Penticton's first traffic fatality of 1948 took the life of Alfred Boston McKenna, 32-year-old decorator, who died in the Penticton hospital following a Tuesday, Jan. 6, highway crash on Fairview road, immediately south of Huth avenue.

The car in which McKenna and three others, Jack McKee, Miss Yvonne DeBlas, and Mrs. Minda Reynolds, were riding at the time, left the highway, and travelled about 29 feet off the road, crashing into a two-foot thick poplar tree.

So heavy was the impact that the front end of the light car was crumpled in, upon the front seat, the steering wheel being bent almost to the roof of the car. When viewed after the wreck the speedometer of the car was jammed at 60 miles per hour.

HIG CASH SURPLUS

Take Planks From Wharf to Fashion Youngsters' Slide

Permission of the Summerland Board of Trade has been given the Summerland Memorial Parks committee to utilize some of the planking on the old government wharf in lower town to build a sleigh run on the park playground.

Mr. E. H. Bennett, park-playground committee chairman has intimated to the board that if this planking could be made available it could be used for guard rails and cribbing on the slide.

This slide would operate from the top of the hill opposite Frank Doumont's home to the north-east corner of the park playground.

Chamber Never Gave Permission

That the Canadian Chamber of Commerce has never authorized any body or any person to carry on anti-Communist campaigns on its behalf was the advice received recently by the Summerland Board of Trade. The Canadian chamber has intimated that certain interests have taken advantage of the chamber's recently-issued pamphlet on Communist activities in Canada to proceed with campaigns allegedly supported by the Canadian chamber. The latter group states that no such authorization has ever been given.

WANT EXHIBIT SPACE

VERNON—Five large B.C. firms who exhibited in last year's first Vernon-Okanagan Industrial Exposition already have requested space for 1948, Captain H. P. Coombes, secretary, reported at the association's executive meeting on Tuesday.

NEW SUBSTATION

PENTICTON — Announcement was made last week by West Kootenay Power and Light Company Ltd., that work will commence early this year on erection of a new \$100,000 substation to serve the needs of this district.

Answering Your Questions ABOUT IMPORT CONTROL

MOST of the countries which are Canada's regular customers have not recovered sufficiently from the war to pay, in the normal way, for all the goods they need, despite extensive help from this and other countries. Not are they able to send us enough of their goods to balance accounts—or to pay us in the kind of money which we, in Canada, can use to buy goods in other countries.

At the same time, Canada has been buying more goods than ever before from the United States and other countries demanding U.S. dollars. This is because these goods were not obtainable elsewhere and because of demand pent-up during the war.

Buying from the United States or U.S. dollar areas must, therefore, be temporarily reduced until our trading again becomes normal.

To meet this emergency, purchase of goods and services or expenditures for travel, which must be paid for with U.S. dollars, are now subject to control.

IF YOU ARE AN IMPORTER OF CONSUMER GOODS and wish to find out what goods are (1) prohibited, (2) subject to quota, or (3) unaffected by controls, see or write your nearest Collector of Customs and Excise.

IF YOU WISH TO IMPORT GOODS SUBJECT TO QUOTA and wish to establish your quota authorization to import, or need special information, consult your nearest Collector of Customs and Excise. Quota application forms (E.C. 1) and instructions for completing them, are available at all Customs Offices. These applications must be filed with the Collector of Customs and Excise.

IF YOU WISH INFORMATION ON THE AMOUNT OF YOUR QUOTA. After your application has been filed with your Collector of Customs and Excise, all correspondence about the establishment of quotas or cases of exceptional hardship through import prohibitions should be directed to Emergency Import Control Division, Department of Finance, 490 Sussex Street, Ottawa. Quotas are issued on a quarterly basis and any unused portion may be carried over into the following quarter.

IF YOU ARE AN IMPORTER OF PRODUCTION PARTS, STRUCTURAL STEEL, stone, machinery or other capital goods or automobiles, and wish to know the import restrictions in these classifications, write or see Emergency Import Control Division (Capital Goods), Department of Reconstruction and Supply, 385 Wellington Street, Ottawa.

IF YOU INTEND TO TRAVEL OUTSIDE CANADA and wish to know about foreign exchange available for this purpose, consult any bank or the Foreign Exchange Control Board at Ottawa, Montreal, Toronto, Windsor, Vancouver. If you wish information about personal purchases of goods made during travel outside Canada, consult the nearest Collector of Customs and Excise before departure.

IF YOU ARE A MANUFACTURER, WHOLESALE OR RETAILER and wish information about excise taxes, or about the list of goods to which they apply, consult the nearest Collector of Customs and Excise.

IF YOU NEED OTHER SOURCES OF IMPORTS consult the Foreign Trade Service, Department of Trade and Commerce (Import Division), Ottawa, regarding your supply problems arising from import quota restrictions. Through the Trade Commissioner Service, the Import Division is endeavouring to arrange increased supplies from the United Kingdom and other "non-scheduled" countries.

IF YOU ARE A HOUSEWIFE and wish information on available alternate foods which have comparable nutritional values to those now prohibited or subject to quota, informational material which has been prepared by the Nutrition Division of the Department of National Health and Welfare may be secured from your Provincial Health Department or local health unit.

The administration of these emergency import controls is the responsibility of various departments of the Government. The above information is given to aid Canadian citizens in complying with the new import control regulations with a minimum of inconvenience in their business and personal affairs.

Douglas Cooney
Minister of Finance.

Trade Board Will Make \$150 Grant For Radio Work If Council Will Match

If the municipal council will put up dollar for dollar the Summerland Board of Trade is prepared to put up \$150 towards the cost of carrying on radio interference work in this district, the board decided after much discussion at the January session in the IOOF hall last Thursday evening.

Stewart Sanborn has completed a radio interference finder and with the assistance of a board of trade committee has already discovered a number of disturbances in various areas of this district.

Wallace T. Boothe, chairman of the board radio committee, declared on Thursday that his committee believes that valuable work can be carried on by Mr. Sanborn, but he should be recompensed for his time and car travel.

As a result of the committee findings, the board on Thursday night voted a grant of \$50 to Mr. Sanborn for work already undertaken and also agreed to setting aside a sum of \$150 to carry on further interference finding, provided the municipal council will match this amount.

Municipal Electrical Foreman T. P. Thornber has also interested himself in Mr. Sanborn's project and has assisted on numerous occasions, declared Mr. Boothe.

Speaking as a member of the committee only, Councillor C. E. Bentley suggested that the council be approached to consider matching the board's grant for this project.

No Legal Power
President F. W. Schumann asked the committee what power it would have to force persons to remedy interference troubles once they are located. He was told by Councillor Bentley that there is no such legal power, as far as is known, and the latter suggested that another radio inspector should be employed by Ottawa to cover the Okanagan alone.

As a result of this discussion, it was decided to request the Associated Boards of Trade of the Southern Interior to urge on Ottawa the appointment of a radio inspector for the Okanagan.

An inspector does travel the interior but he has such a large territory that it is only possible for him to visit about once a year, the meeting was told.

George Washington, a past president of the radio club which operated prior to the intervention of hostilities, warned that the committee would run into difficulties with some home owners who are loathe to co-operate in installing appliances to rid equipment of defects.

He instanced the troubles of the now-defunct radio club in past years, when some owners refused to co-operate and there was no power to force them.

Delegate Authority
It was suggested that the municipality might be able to designate the necessary power to the radio committee of the board or that the Dominion government

radio inspector might be able to enforce the findings of the radio committee.

It was pointed out by George Graham that the municipality is losing revenue from light and power because of faulty equipment creating disturbances.

To date the radio committee has had one hundred percent co-operation from all persons found to have faulty appliances, he declared, instancing one person whose heating pad was causing radio interference for a radius of a mile in the West Summerland area.

Before deciding on the sums of \$50 and \$150 the board meeting had a series of amendments and counter-proposals which had President Schumann "on the griddle" endeavoring to keep the meeting in order.

JASMINE IN JANUARY

Two clippings of jasmine were brought in to The Review office last Friday by Mrs. Magnus Tait, Trout Creek Point. The buds were on the point of flowering and have since burst forth in their full yellow bloom.

COLLISION BRINGS FINE OF \$50

As the result of a collision on the lakeshore road three miles north of Penticton on Monday evening, James Thompson, of Summerland, paid a fine of \$50 and costs in Penticton police court on Tuesday morning before Magistrate G. A. McClelland on a charge of dangerous driving and had his driver's licence suspended for a six months' period.

Thompson was driving the Summerland Taxi U-drive north on a trip back from Penticton when the car collided on a corner with an F. H. Bassett, Penticton, truck proceeding south.

Damage to the U-drive is estimated at about \$200, while the truck also sustained considerable damage.

None of the vehicle occupants was injured apart from minor bruises and cuts.

LIBERAL WHIP APPOINTED

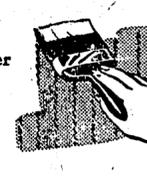

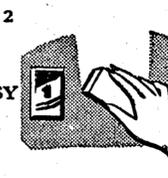

Premier Byron Johnson has announced the appointment of J. L. Webster, Liberal Coalition member for Rossland-Trail riding, as Liberal whip for the forthcoming session of the legislature. Mr. Webster succeeds the late Louis LeBourdais, member for Cariboo riding.

Local Growers Lead In Support of Industry Heads

Summerland growers attending the annual convention of the BCFGA at Penticton this week backed up the efforts of the sales agency and came out in decisive fashion against proposals from Oliver which tended to criticize the efforts of the officials of the fruit industry. In every instance, the Summerland views received the support of the majority of the grover delegates.

The convention proceedings opened on Tuesday morning with voluminous reports from various standing committees and is concluding its sessions this afternoon. For the most part, discussions have been harmonious and the growers seem to be banded together in as solid a group as ever.

Expected discord from the southern part of the Valley did not materialize to any great extent. Three resolutions from Oliver, which had met with preliminary disapproval in grower discussions here were either modified or turned down. Only one was accepted.

Main interest of the convention centered on Tuesday afternoon when A. K. Loyd, B.C. Tree Fruits Ltd., president, gave his annual report and the delegates also heard a report from Dave McNair, their sales manager, who is attending a convention in California.

Numerous speakers have addressed the convention on varying aspects of the fruit industry and related subjects. Last night, the Cedar room of the Gyro hall, where the convention is being staged, was packed to capacity for the annual banquet.

Railway officials, representatives of the dominion and provincial departments of agriculture, officials of firms who make sales to growers and packing houses, and many others swelled the attendance at the three-day session to near-record figures.

J. R. J. "Jock" Stirling, president of the BCFGA handled the convention sessions with a rigid command and reminded many of the growers who had service with the armed forces of the proverbial "sergeant-major". His task has been an arduous one, but he has kept the convention running along on schedule with no undue delays.

This is the second year he has controlled the destinies of a fruit growers' convention and he has proved a popular president.

Peach Pool
As soon as Mr. Loyd's report was concluded on Tuesday afternoon, William McConnachie, of Osoyoos, took the floor and asked questions about the Rochester peaches and their relation to the pool. Mr. Loyd replied that peaches generally are pooled and if there is a slump in the marketing of this fruit then whatever variety is being offered at the time must be offered as the remedy and the result shared by all the growers.

Mr. McConnachie also enquired about undesirable varieties in relation to undesirable grades, and sizes and was told by Mr. Loyd that there would be less of a loss by eliminating some of the undesirable grades and sizes than by eliminating undesirable varieties under the present setup.

He stresses that in the near future undesirable varieties must be eliminated and in the past two decades "we have reduced our undesirable varieties to a very small proportion of our crop."

On the subject of these undesirable varieties, C. A. S. Atwood of Grand Forks received an ovation when he expressed the thought that Okanagan growers should be more tolerant and understanding of the Kootenay grower troubles, as the latter have many more serious troubles than his Okanagan brethren, and has to look forward to a program of eliminating undesirable varieties gradually over a period.

Jobber Appreciation
In connection with Mr. Dave McNair's remarks concerning the fine co-operation of the prairie jobber in the prune deal, Mr. W. R. Powell, Summerland, sought grower appreciation of this effort and asked for a standing vote to record the grower sentiment.

The grower-delegates responded to a man on this request and there was no doubt about the appreciation of the producers to the assistance of the jobber.

It was pointed out by Mr. Powell that jobber co-operation is the main solution to the fruit growers' problems.

Mr. A. W. Gray, Oyoama, asked if Mr. Loyd is satisfied with distribution on the prairies and Mr. A. C. Lander, assistant sales manager, replied that "western Canada as a whole is very well serviced."

First of the resolutions on B.C. Tree Fruits operation was introduced by A. L. Baldock, of Rutland, who asked that further tests be made to ascertain if apples could not be held loose in cold storage before they are packed.

Economy Threatened
He believed that there is a danger in packing all the McIntosh before placing in cold storage, in that there is not sufficient experienced help for this procedure. Mr. Baldock also expressed the belief that this system is endangering the economic setup of the valley in making a shorter packing season.

Mr. Loyd agreed that there is a conflict between the best possible procedure for fruit and best possible thing for the packing house. In his opinion, the objective to be reached is to give the consumer the best possible product.

Mr. Lander explained that experiments have been conducted by the experimental station in Summerland, but opinions vary on the results. He outlined some of the tests which have been made and stated that a full report on the findings will be available in the next few weeks.

"Of one thing we are convinced and that is that it is not possible to pack McIntosh ex cold storage," Mr. Lander emphasized.

Mr. Baldock's resolution asking for continued trials on this subject was then passed.

Penticton growers, led by C. C. Sworder and backed by Councillor S. R. Hawkins, asked that a system be set up whereby persons

Continued on page 4

HOCKEY TOMORROW NIGHT
First hockey game of the season will be seen tomorrow night at the rink when Penticton juniors appear here. Next week Rutland will appear here, states Jock Smith, of the school staff. No schedule for the proposed Pro-Reo league has been arranged yet.

Conditions Will Change Soon, Says Putnam

"Farmers are feeling a little panicky right now, they believe a cloud is coming up and things will not be so good in the next few years; they are probably right," declared Hon. Frank Putnam in an outspoken talk to the BCFGA convention in Penticton on Wednesday morning.

"Conditions are bound to change as you must realize we have just been through a war and we cannot expect to survive such a conflict without being hurt. We must also plan for the future."

Mr. Putnam complimented the growers on their excellent sales organization, and the latter's presentation of its report, giving growers facts which they should know.

He stated that he had felt in the past that the market was under-estimated, that higher prices would be necessary in the coming year to offset rising production costs. However, he feared that when the time for readjustment of prices arises the fruit grower will be hit, but the fruit grower generally is never as badly off as some other producers when times are tough. He did not believe that the fruit growers were as badly hit in the '30s as other producers.

"I wouldn't be too pessimistic about the future prospects," continued Mr. Putnam, stating that if the Marshall plan is implemented, it will be of great assistance to Canadian farmers.

He urged the growers to increase the production of quality fruit, and he considered that it has been a wonderful achievement that the fruit industry has been able to keep pace with its increased production so far. The BCFGA and Tree Fruits setups are models of farmer co-operation, he declared.

"By concentrating on increasing our quality we are going to get by all right," he considered.

"Can we stand prosperity?" he queried at another juncture, pointing out that producers are now hiring men to do work which they undertook themselves a few years ago. He believed that the farmer must revert to his former status and do most of the hard work himself.

Mr. Putnam urged the growers to have every confidence in the men they elect to office. "You should be very careful before you condemn them," he warned. "They may make mistakes, but who doesn't? The man who doesn't make mistakes never does anything, anyway."

"We are on the eve of a new kind of world. We have gone through a revolution and if we do not lose faith in our fellow men, we will emerge to a better world," he concluded.

FRASER VALLEY MAN VISITOR HERE

An interesting visitor to the experimental station last week was Mr. C. H. Penner, manager of the co-operative association of Yarrow, B.C. This co-operative deals in small fruits, with special emphasis on raspberries. Mr. Penner forecasts that the lower Fraser Valley crop of raspberries this year will be about 15,000 tons, of which the Yarrow Co-op controls approximately 6,000 tons, the Pacific Co-operative Union of Mission another 6,000 tons, and the remainder is handled by smaller outfits.

Mr. Penner spent two days at the fruit products laboratory here gathering information on jam factories and canneries. He also visited Barkwill's Limited, and was greatly interested in their factory and its operation.

The Summerland Review

Vol. 2, No. 3 West Summerland, B.C., Thursday, January 22, 1948

Loyd Remarks On Relation To U.S. Price Levels

A. K. Loyd, general manager of Tree Fruits, and one of the most popular officials in the industry, held the centre of attention on Tuesday afternoon at the BCFGA convention in Penticton when B.C. Tree Fruits operations, its future plans and grower recommendations were discussed fully.

In part, Mr. Loyd's address to the growers on Tuesday follows:

"It is a commonly held belief that buying power is strong and that the general situation has not altered much from the later war years. While to some extent this is true—and the prairie wheat farmer has been guaranteed a price for his production—nevertheless, as time goes on, it is apparent to those with their fingers on the pulse of the market that there is some hesitancy on the part of the consuming public, and there are a number of ways in which this affects our economy.

"We have to face the extremely unfortunate loss of the United Kingdom market. We have relied for so long on this outlet absorbing not only a substantial portion of our crop, but also certain varieties and sizes which are not acceptable to our domestic markets, that its sudden removal posed very serious problems which are still reflecting to some extent on our marketing program.

"Closely connected with the whole business of marketing our crops is the tariff situation, and in this regard the position was—and still is—a delicate one. The whole tendency and efforts of the governments of various nations have been directed towards a lowering of trade barriers. This industry of ours has been fostered on the basis of adequate protection during those periods of the marketing season when we were able to supply our own markets with reliable fruit in volume.

"The Canadian market cannot ignore the condition of the United States market, and we watch with some apprehension the commencement of the early vegetable deals in the United States. We saw with misgiving that in a great number of cases—if not almost universally—the tendency on the other side of the line seemed to be to start commodities at a high price, with the result that consumer hesitancy immediately became apparent, and once the structure weakened, the descent became very rapid to unremunerative levels for the producer. This occurred again and again, not only in vegetables, but in soft fruits.

"A depressed level in their prices renders it necessary for us to meet the competition which is offered, on the basis of their market values, plus freight and duty. In most cases our respective freight costs cancel each other.

"It is our duty to obtain for our producers the best price that we can on the market, consistent with maintaining consumer interest, continuity of distribution, and meeting competition.

"There is abroad today a fairly well organized effort on the part of consumer leagues and organizations to turn away collectively from items which, in their opinion, are too high priced.

"All through the soft fruit season we are dealing, for the most part, with highly perishable commodities, and we can lose for the growers, amounts which could far outweigh price adjustments, if we adopt a program which halts the flow of fruit to the market.

"It is essential that we strike a balance where the wholesaler, the retailer and the consumer are buying.

First Prize for Canada Goes to Mrs. I. Adams

First prize for all Canada, a Cold-wall Frigidaire, was presented on Thursday afternoon, January 15, to Mrs. Irvine Adams, Summerland, by Mr. Vern B. Cummings, Kelowna, on behalf of the Robin Hood Flour Mills Ltd. Mrs. Adams was winner of the first prize in a Robin Hood Oats contest, by presenting a 25-word paragraph on "I Like Robin Hood Oats because . . ."

Presentation was made to Mrs. Adams in the Summerland Groceries on Thursday afternoon.

Mr. Lawrence Rumball, manager of the Groceries, was also presented with a Cold-wall Frigidaire, being the merchant from whom Mrs. Adams purchased her Robin Hood Oats. She was required to send a box-top along with her successful entry.

Mr. Crulokshanks, news editor of OKOV, was present for the ceremony and made a recording of the proceedings, which has since been broadcast over that radio station.

Besides the Frigidaire, Mrs. Adams was the recipient of an autographed picture of Claire Wallace, whose morning commentaries over Canadian radio networks are widely known.

Among the interested spectators of the ceremony was W. Ruckie, Vancouver, Mac & Mac representative. The Frigidaires were supplied by Mac & Mac through the local dealer, A. K. Elliott.

Mr. Cummings is the interior representative of Robin Hood Flour Mills and makes his headquarters in Kelowna.

Apple Crop for 1947 Just Under 7,000,000

Details of the 1947 crop were issued to the BCFGA convention on Tuesday afternoon in the report of D. McNair, Tree Fruits Sales Manager. The crop will reach 14,537 cars compared with 17,000 in 1945-46 and 5,740 cars in 1939.

By commodity tree fruits totals for 1947 were as follows:
Cherries 323,615 cases
Apricots 397,014 cases
Peaches 1,934,847 cases
Plums 168,245 cases
Prunes 876,684 cases
Transcendents 49,795 boxes
Hyslops 49,452 boxes
Bartletts 327,374 boxes
Flemish 131,555 boxes
Other Pears 135,779 boxes
Cantaloupes 25,144 crates
Grapes 185,217 baskets
Apples 6,775,760 boxes

Les Rumball New President Of Retailers

No change in the weekly store closing hours will be made, at least for the next few months, the annual meeting of the Summerland Retail Merchants Assn. in the I.O.-O.F. hall last Thursday evening decided.

Wednesday all-day closing will remain in effect and the usual statutory holidays will see the retail stores closed, in the usual manner.

Only change in this setup will come in Christmas week, when stores will remain open all-day Wednesday and will also be open on Christmas Eve until 9 o'clock. Christmas falls on a Saturday this year.

Question of remaining closed on Monday, December 27, for Boxing Day, as December 26 is a Sunday will be decided later in the year.

At present, store hours on Mondays, Tuesdays, Thursday and Fridays are from 8:30 a.m. to 5:30 p.m., with Saturday closing at 9 p.m. After April 1, the 8 a.m. to 6 p.m. hours will take effect, with Saturday closing at 9 p.m.

Les Rumball, association secretary for the past two years, stepped up to the presidency on Thursday, succeeding Mel Ducommun. Ken Boothe was chosen vice-president, with Ken Heales as treasurer and Mrs. Hazel Schwass as secretary. The executive consists of Len Hill, Roy Wellwood and Cecil Wade.

Other standing committees will be selected by the executive and announced at the February monthly meeting. A membership drive committee will be formed by Treasurer Ken Heales.

Last year, 53 members were accepted into the association, and a satisfactory bank balance was carried over into 1948.

Members heard reports indicating a great success, with two houses being packed to capacity. The merchants also erected a Christmas tree at the intersection of Granville and Hastings, and plan to follow this lead this year with more decorated lights than were available for the past Christmas season.

SMALL FIRE ON SATURDAY

A fire was reported from the home of Mr. and Mrs. Jim Wilson, in Peach Orchard, the former Rob Sutherland property, on Saturday morning last. The blaze commenced in the attic floor and was extinguished before the fire brigade could be summoned to the home. Mr. Wilson had only returned from hospital the day before. Little damage was done the building.

Losing Markets

"Exchange difficulties are also making themselves felt in other export markets. Scandinavia made no provision for the import of Canadian apples this year. It is already indicated that credits will be unobtainable for shipments to the Mediterranean next year. Month by month it is becoming more difficult to obtain dollars from South America.

"It is hoped that when world conditions right themselves, there will be a revival of export business. If we are to be in a position to take advantage of such business, then we should be constantly vigilant to the importance of eradicating diseases which will prevent the issuance of 'freedom from disease' certificates.

"During the past season a very commendable attempt was made by the Better Fruit Committee to improve the quality of our apple output. As a result there was great emphasis placed on the proper harvesting, quicker delivery, and more prompt packing of McIntosh than has heretofore prevailed. A great deal of credit is due everyone concerned.

"It must be pointed out that the agreement finally reached by this industry committee was a compromise and still far from ideal. This committee now recognizes that with McIntosh must be linked Jonathan and Delloious, as the concentration upon McIntosh this past season caused certain abuses to fall upon Jonathans and Delicious.

McNair Predicts Trouble in Selling 1948 Fruit Crop With Loss of Export Markets On Top of Record Production

B. C. fruit growers, at their 59th annual convention in Penticton on Tuesday afternoon were warned in no-uncertain terms by their sales manager, Dave McNair, that they must be prepared for a nine million box apple crop in 1948 and that, with diminishing export markets, certain sizes and grades would have to be eliminated.

This drastic situation will probably result from the continued loss of the British market, plus diminishing markets in other foreign countries. Sales of apples in 1948-49 will probably be restricted to the North American continent to a large extent, stated Mr. McNair's report.

Mr. McNair was not present at the convention but his report was read to the convention and followed the address of A. K. Loyd, president and general manager of B.C. Tree Fruits Ltd., the central sales agency.

"With little hope of the return of the U.K. market this coming year and with other export markets continuing to shrink, it means we will be pretty well hemmed into the North American continent for the disposal of our output," declared the McNair report.

"If we have not been able to handle the modest crop of 1947 of 6,800,000 boxes in a condition that was entirely acceptable to the market and if nothing occurs to change the present marketing outlook, it would appear the part of wisdom to pare down the probable quantity by elimination of the smaller sizes usually exported and some excessively large sizes, and by reducing the quantity of Cee grade.

"At first glance this may meet with objection from the average producer, but on further study I think all will realize that it is unwise to provide facilities for lower grades which will not justify the outlay incurred and that it would also be unwise to pack more apples than can be sold profitably, and that it is much better to face up to the problem now than after the damage has been done.

"This recommendation is made in the light of existing conditions. Many things could happen to cause a change and the most important possibility is the Marshall plan which could have such an important bearing on the economy of the North American continent and could conceivably react favorably to the fruit and vegetable industry.

"The outlook for cherries, apricots, peaches, plums, prunes, and pears will depend a great deal on the continuance of existing restrictions. If the Dominion government continues its decree that for the conservation of U.S. dollars Canadian consumers must get along largely on the production within Canada, then a ready market will probably be experienced for these various crops. On the other hand, a removal of these restrictions would leave us in direct competition with U.S. production at reduced rates of tariff.

"This season witnessed an acute shortage of refrigerator cars for a period of four weeks. This was very disruptive to our apple movement in late November and early December. It is difficult to assess in dollars and cents the loss that will accrue. In several other respects railway facilities are inadequate to handle existing production, and both railways have been made acquainted with the additional facilities that are required.

Prices Scaled Down
"There has been a scaling down in prices of almost all perishables in the United States and the impact of this has had an important bearing on prices and demand in Canada. Many United States crops are in surplus supply and at the moment surpluses in apples and citrus fruits present a very great problem in that country.

"There has been a very noticeable easing off in demand for perishables in Canada. With the cost of all foods going upward, the dollar is not stretching far enough to permit of the purchasing of fruits and vegetables to the extent of the average consumer's full needs.

"Since British Columbia has been exporting apples, this is the first season we have been without U.K. business. All other export outlets, while very valuable and much appreciated, are insignificant in relation to the importance of the United Kingdom.

Legion Gives Alan Calvert Second Term
Reporting on a year of progress and looking forward to another season of continued activity, President A. Calvert addressed members of Summerland Branch No. 22, Canadian Legion, at their annual meeting on Wednesday, Jan. 14.

President Calvert was given a second term of office when the results of the annual election were determined.

In the past year, the Legion attained a membership of 159, and held numerous social activities, chief of which were the summer and Christmas smokers, the annual fair street carnival and the New Year's Eve dance at the Ellison hall, which drew a capacity crowd.

Mr. Calvert also spoke on the proposed removal of the Cenotaph from its present location by the high school to the Living Memorial park-playground this year.

He anticipated that the unveiling of the names of those who fell in the 1939-45 conflict would be unveiled at the Remembrance Day service of 1948.

Comrade Tom Charly gave details of the Christmas smoker and New Year's dance, both functions providing Legion coffers with creditable sums.

It is proposed that the Legion branch be incorporated under the societies act, following a lead of the Osoyoos and Penticton branches in the past year.

Officers Elected
In the election of officers, the following were named for 1948:

Honorary president, Dr. E. W. Andrew; president, Alan Calvert; first vice-president, D. L. Sanborn; second vice-president, Ross McLaughlan; third vice-president, Miss Janet Strachan; secretary-treasurer, Lorne G. Perry; executive A. M. Temple, Phil Davis, Nat May, C. E. Bentley, C. Smythe.

Chaplain, Rev. Canon F. V. Harrison; sergeant-at-arms, George Ryman; corresponding secretary, Mrs. Betty Fisher; sick committee, A. M. Temple; relief committee, D. L. Sanborn; buglers, J. Betts, T. Charly; Ellison hall, D. L. Sanborn; membership, R. Huva; house and grounds, Ben Newton; film council rep., C. E. Bentley; auditor, W. R. Grant & Co.

The social committee chairman's office was left vacant and the executive was instructed to select a chairman for each social function of the year.

EDITORIAL

A Prosperous Community

There are various types of purchasers in any community.

There is the householder who studies the messages contained in the advertisements of the home town newspaper, makes up a shopping list and makes all purchases from the home town stores. That same householder will make a diligent search of all the stores to find the various items needed in the home.

Then there is the householder who buys a percentage of his needs in the community but doesn't bother to make enquiries if the wanted article isn't readily observed. That person spends extra money driving to neighboring communities to deprive the home community of profits from the purchases.

And then there is the person who has no regard for either the home community or the valley in which he resides, and makes trips to coast cities or orders through mail order houses.

There was a time when Summerland business section was not large enough to supply the everyday needs of the community. To make certain types of purchases, residents had to resort to out-of-town buying.

That situation does not apply today. There are few items which cannot be supplied by the local stores. Their shelves are well stocked, they arrange attractive displays, they employ your neighbors to give you the best possible service.

Of course, there are always some items which even local merchants cannot stock and have to be ordered elsewhere. But in the great majority of cases, the local merchant can either supply the wanted article or can get it within a few days by special order.

Loyalty to your home town merchant is part and parcel of your loyalty to your community. If you wish Summerland to grow and prosper you must see that its business district is well patronized.

It's an old, old story oft repeated, but as long as The Review is in existence we intend to keep repeating the necessity of supporting the home town merchant if the community is to continue to grow and prosper.

And he is a poor citizen who wishes to retard the growth of the community of his choice.

Community Effort

In the past two weeks we have read reports from two women's organizations in Summerland which have clearly indicated a great deal of good work for community good.

We refer to the reports of the Women's Institute and the Summerland Hospital Auxiliary. There are other women's organizations which, to a smaller degree, carry on equally fine work, but these two groups are to the fore to a greater extent in such endeavors than any other organizations.

It is a wonderful asset for any community to have groups of workers who are so interested in the furtherment of the town in which they reside.

In fact, it is our belief that every person who is in good health owes the place of his residence a certain moral obligation. This obligation is to carry out in every year a certain amount of work on behalf of his or her fellow citizens.

Such work interrupts a certain amount of home life and there is a certain amount of drudgery to the effort. But, after all, if you have any pride in your community—and you would be a poor citizen without it—the time and energy devoted to extra-curricular activities pays off in the long run.

The satisfaction you obtain from a personal or collective undertaking well accomplished is full payment for the extra effort.

Members of the Women's Institute and Hospital Auxiliary must surely feel a great measure of satisfaction in looking back over the past year, as theirs was certainly a task well fulfilled. The community owes them a debt of gratitude for the extra time and effort involved in their good work.

ONLY ONE DOLLAR . . .

(Peterborough Examiner)

- A loaf of bread costs 18 cents.
- A quart of milk costs 17 cents.
- A pound of butter costs 70 cents.

Ladies and gentlemen, for the sum of one dollar, one small dollar, one good dollar, one Canadian dollar, you may buy a loaf of bread, a pound of butter and a quart of milk. Stock up now, ladies and gentlemen, while these bargain prices last.

The Inside Story

By AGROLOGIST

"Do you like it clear or cloudy?"
"Neither—I like it opalescent."

This is the conversation which I overheard as I opened the door of the fruit products lab. I soon discovered that the staff was not discussing the weather but forms of apple juice. To many people apple juice is, apple juice. Not so with the research men who recognize at least 101 kinds of apple juice, resulting from the varieties of apple used in making the product and the methods of procedure followed in its manufacture.

From a chat which I had with Ted Atkinson I ascertained that the story of apple juice is a most interesting one. Many people have had a hand in developing the juice which is now so popular. To begin with, someone had to devise a type of can which would be resistant to corrosion by apple juice. This was the contribution of the can makers. Then someone had to invent a simple, effective and inexpensive sterilizer which would destroy the yeasts and the spoilage organisms, without impairing the flavor of the juice. This was one of Ted's own contributions. Then again it was desirable that someone find a practical method of increasing the Vitamin C content so that apple juice would have health value similar to citrus juices. It was Charlie Strachan who devised a practical technique for fortifying apple juice with Vitamin C.

Funds and facilities were required before apple juice could be made in commercial volume. These were provided by growers and processors with the necessary vision, enterprise and courage. In fact the commercial production of apple juice is a "combined operation" in which many technical investigators and practical processors have worked out the details of manufacture, which make all the difference between success and failure.

In spite of the widespread popularity of apple juice as now manufactured, the research men are not yet fully satisfied with the product. The very processes which make clear apple juice so popular take from it some of the natural flavor and bouquet of the fresh fruit. In an endeavor to remedy this situation, the staff of the Summerland lab is now co-operating with R. P. Walrod, production manager of B.C. Fruit Processors Limited in an attempt to produce an opalescent apple juice. In making this type of juice the fruit is sprayed with a solution of Vitamin C at the time it is being put through the press. This helps to keep the juice from being oxidized, with the result that the final product is opalescent rather than clear amber in color. This opalescence is due to the presence in the juice of extremely fine particles of apple flesh. It is hoped to devise methods which will make these apple particles small enough so that they will not settle out of the juice, yet large enough to retain the natural flavor and aroma of the fresh fruit.

The new process is still in the experimental stage but the investigators are hopeful that large scale production of this type of juice will prove to be practical. So here's to the men who are endeavoring to devise practical methods of giving the public an apple juice with all the desirable characteristics of the fresh fruit. Here's to the success of "opal" apple juice!

green shoots.

Have you spotted any pussy-willows anywhere yet?

Penny Wise

Of course, you can't buy it in Canada YET, but it is on its way—the electric toaster with warming space on top. You've always wondered why

they didn't make them that way, and now they have. Personally, I haven't got around to the automatic type yet, even so I still put the bread in the toaster and burn it, and take it to the sink and scrape it. Or, throw the whole thing in the stove, and start all over again.

* * *

The other day I had the high head-end of my bed saved right off to mattress height. Then I put the pretty, curving foot-end at the head, the cut-off one at the bottom, and Morpheus and I now sleep in a strictly modern Hollywood job. What a difference it makes to my bedroom, too—looks like something in a magazine, that's what.

* * *

Say, don't feel badly if you haven't one of those new ultra-ultra kitchens. They're cold, some of them—though they may be up to 70 degrees every hour of the day. They miss the hominess that your old-fashioned kitchen gives you, and because there are no comfortable chairs around this new wonder-room, you also miss the small-talk with your family while you're getting meals ready, and then doing away with their remains.

* * *

There's a real buyers' strike on against the price of bacon. And I'm right behind it, pushing hard as I can. Much as I love a couple of slices of the streaky with my eggs (and maybe some fried apple or banana as well) I couldn't enjoy a mouthful of it at 80 cents OR a dollar a pound! Those of you who have a pig or two in your own pokes are the lucky ones these days.

* * *

There are lots of men who won't eat steak without smothering it in sauce, and so I'm sure it's for them that this particular yum-yum steak sauce was dreamed up. It's a matter of combining a cup of melted butter with three tablespoons of catsup, a tablespoon and a half of lemon juice. Does things to the steak, they say. Me? I like to taste my meat . . . so it's salt and pepper for me.

* * *

Say, unless your garden is inches deep under snow, watch out for ambitious bulbs that are beating spring to the draw, and popping their noses up already. I cover my early-comers with leaves, because there's almost sure to be a frosty-spoil before spring finally gets here, and that's no good for tender

David Wright Reports on 17th Boys' Parliament

"I was surprised and impressed by the sincerity and the amount of work accomplished by those who attended this session," declared David Wright, on his return from the coast, where he represented Summerland at the 17th sitting of the Older Boys' Parliament.

Forty-eight members from all parts of B.C., including one Indian and one Chinese lad comprised the house. All sessions were conducted strictly according to parliamentary procedure, David stresses.

Premier Woollam, who at 18 holds religious services along the north coast as well as giving first aid treatment, appealed strongly for help in the Indian missions of northern B.C. He cited one area with a population of 3,000 which has 600 active TB cases and only one 65-bed hospital.

Teachers, nurses and doctors are badly needed in these remote sections of the province, he stressed.

In the proceedings, seven acts were passed, two of which appealed strongly to David Wright. One of these was on youth training and

the other was a Hobbies act. As a result of the latter legislation, a hobby fair is being held shortly in Vancouver and Summerland has arranged to send entries.

Keen interest was shown by Vancouver members when told about Summerland's hobby show and many questions were asked David Wright, who was named on the committee directing the forthcoming fair at the coast.

Lieut.-Governor Banks was guest of honor at one of the banquets held in connection with the parliamentary sittings.

"I was called upon for a five-minute talk on Summerland and was surprised to find the time go so quickly. Five minutes was not long enough to tell of the good things about our town," declared David Wright.

The boys were billeted in private homes and spoke highly of the kindness and welcome of the people of Vancouver.

Mr. and Mrs. G. Gartrell returned on Saturday, January 17 from Vancouver where they spent Christmas and New Year's holidays with their son and daughter-in-law.

ONE LAW FOR ALL... is the Basis of Good Law

Why the Secret Supervised Strike Ballot MUST MAKE NO EXCEPTIONS

Important new democratic rights given to employees by the British Columbia Legislature last year can be lost if there is not a vigilant defense of the compulsory supervised secret ballot in strike votes. Opponents of the 1947 Labor Law reforms would undermine the Labor Laws by giving the Minister of Labor or the proposed Labor Relations Board the right to say whether secret supervised strike votes shall or shall not be taken in any particular dispute. They claim that some good unions are "insulted" by the new labor laws.

The basis of British law is that all are equal under the law. Laws are made to prevent abuse of established rights. If a government must decide which unions are trustworthy to conduct secret strike votes and which are not trustworthy, the Government would be involved in constant controversy, and the way of least resistance would be to rule against secret strike ballots for employees. A long-overdue reform safeguarding the democratic rights of labor and the public would then be lost.

Note: "Bill 39" is not perfect legislation. No one claims it is. Where necessary it can be improved by orderly and democratic action in the legislature. The public approves its basic provisions.

WHY SHOULD ANYONE OPPOSE THE SECRET BALLOT?

COMMITTEE FOR INDUSTRIAL PROGRESS

(Representing industrial and commercial organizations in B.C. having a stake in industrial peace and progress along with the 215,000 men and women on their payrolls.)

FORTY YEARS AS FIRE CHIEF has entered on his 40th year as **SALMON ARM**—Sam Needham, chief of the Revelstoke Fire Brigade. He was re-elected at one of the city's pioneer residents, annual meeting of the brigade.

Valley Bowling League Starts Sunday Games

Okanagan Valley five-pin bowling league commenced play last Sunday with Vernon, Kelowna, Summerland and Penticton teams participating, in both men's and women's divisions. There are two teams entered in each division from these communities and the first half of the schedule continues until February 29, according to the league schedule issued late last week.

Only persons who took out membership in this league are entitled to play in these Sunday contests and no other play is allowed in the bowling alleys concerned, league officials state.

In Summerland, Joe Lamey is secretary for the teams participating.

Men's teams from Summerland comprise the following:
No. 1—Joe Lamey, Jim Heavysides, R. Dave Waddell, Ken Heales, Don Clark, Charles Betuzzi and F. Inaba.

No. 2—Reub Huva, O. Quissette, J. Walsh, Don Rand, Ed Lloyd, Mait Kersey and Ernie Adams.

Women's teams are as follows:

No. 1—June Lamey, Thelma White, Betty Haddrell, Dorothy Pattie, Mima Tada and Doreen Howard.

The league schedule as from next Sunday is as follows:

January 25—Kelowna No. 2 vs Penticton No. 2 at Kelowna; Penticton No. 1 vs Kelowna No. 1, at Penticton; Summerland No. 1 vs Vernon No. 1, at Summerland; Vernon No. 2 vs Summerland No. 2 at Vernon.

Feb. 1—Kelowna No. 1 vs Vernon No. 1 at Kelowna; Penticton No. 2 vs Summerland No. 2, at Penticton; Summerland No. 1 vs Penticton No. 1, at Summerland; Vernon No. 2 vs Kelowna No. 2, at Vernon.

Feb. 8—Kelowna No. 2 vs Vernon No. 2, at Kelowna; Penticton No. 1 vs Summerland No. 1 at Penticton; Summerland No. 2 vs Penticton No. 2, at Summerland; Vernon No. 1 vs Kelowna No. 1, at Vernon.

Feb. 15—Kelowna No. 1 vs Summerland No. 1, at Kelowna; Penticton No. 2 vs Vernon No. 2, at Penticton; Summerland No. 2 vs Kelowna No. 2, at Summerland; Vernon No. 1 vs Penticton No. 1, at Vernon.

Feb. 22—Kelowna No. 2 vs Summerland No. 2, at Kelowna; Penticton No. 1 vs Vernon No. 1, at Penticton; Summerland No. 1 vs Kelowna No. 1, at Summerland; Vernon No. 2 vs Penticton No. 2, at Vernon.

Feb. 29—Kelowna No. 1 vs Kelowna No. 2; Penticton No. 2 vs Penticton No. 1; Summerland No. 2 vs Summerland No. 1; Vernon No. 1 vs Vernon No. 2.

NEW VERNON OFFICERS

VERNON—Heading the board of trade for the new term is last year's vice-president, Norman Bartlett, who was elected unanimously and who succeeds the 1947 president, E. R. Dicks. Vice-president is H. J. Fosbrooke, also seated unanimously, and seven members of the executive elected from a slate of 15 submitted by the nominating committee are: Dolph Browne, Paul Brooker, Alderman David Howrie, Charles McDowell, Gordon Mutrie, and M. H. C. Beaven.

REVIEW CLASSIFIED ADS BRING RESULTS

SPEARS SHOT IN LEG AFTER SEVEN WEEKS FREEDOM

PENTICTON—Shots from a rifle in the hands of Constable T. R. Tobiason brought an abrupt end on Sunday, Jan. 4 to seven weeks of freedom for Russell Spears, who escaped from the Penticton lock-up on November 14, and who once before eluded a posse of B.C. Police.

Spears' capture came through the alertness of Jack Alec, Penticton Indian, who reported to police on Sunday that he had seen a man carrying a rifle on the Indian Reserve who he thought might be Spears.

Constables Tobiason and Kenny Attree were despatched to the scene and, on investigation, found a small, home-made shelter upon which they focussed their attention. This was in the dusk of late Sunday afternoon.

At 4:45 p.m., Constable Tobiason, who was on one side of the shelter, turned and saw a man, carrying a .22 rifle, standing, watching him about eight feet away.

The constable, not immediately recognizing Spears, challenged the man, who gave his name as Johnson and stated he was on his way home, "just over there."

Upon the man's evident intention of leaving the scene, Constable Tobiason ordered him to "drop that gun."

The only response was a movement away from the shelter.

Twice more the police officer gave this warning, and when there was no response, quickly slipped the safety catch off his rifle and, by this time certain it was Spears fired, hitting the wily molester in the left leg.

The slug passed clean through the leg, lodging in his right leg.

Spears rolled on the ground whining, "you've got me."

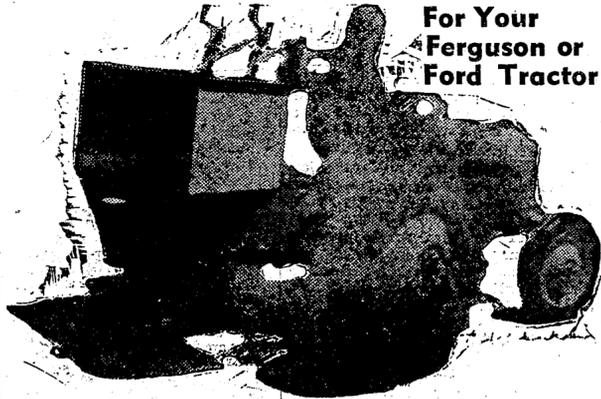

Constable Attree had joined his fellow officer as soon as he heard the command to drop the gun.

At one point, it appeared that Spears was making an effort to roll over towards his own gun, which had dropped beside him when he fell, but the two police officers soon had him where he could do no more damage.

THE SHAW SPREADER

(Patent applied for)

For Your Ferguson or Ford Tractor

Controlled DISTRIBUTION

ENGINE SPEED	} Controls	WIDTH OF SPREAD
HOPPER HEIGHT		DENSITY OF COVERAGE
TRACTOR SPEED	} Controls	
DOOR OPENING		

Enables you to spread commercial fertilizer, lime, grain and all like materials at any width from 8 to 30 feet INDEPENDENT OF THE SPEED OF THE TRACTOR

ECONOMICAL—Puts right amount where you want it.

EFFICIENT—Holds from 4 to 6 sacks of fertilizer.

ALL WELDED CONSTRUCTION—Completely engineered machine designed for your Ferguson or Ford Tractor.

Pioneer Days

TWENTY YEARS AGO
January 20, 1928

Advisability of making the senior high into a junior high school because so many pupils drop out before entering their third year was discussed at the first meeting of the school board this year.

The Produce Marketing Act and the Committee of Direction received almost unanimous support from 500 members in attendance at the annual BCFGA in Kelowna this week Thomas Abriel presided at the annual session.

Mrs. H. A. Solly was re-elected president of the Summerland Hospital Auxiliary and other officers also were asked to stand for a further term.

Mrs. E. R. Butler was chosen president of the Summerland Women's Institute.

Judge Swanson, in giving his judgment against the Summerland Development Co. and in favor of the Municipality of Summerland in the matter of the J. A. Kirk lot which was sold for arrears of taxes and rates, provided an exhaustive review of the whole position of the municipality in regard to irrigation matters and rates. W. C. Kelley handled the case for the municipality.

Robert Johnston is commencing his fourth term as reeve, while Major Tweedy and J. C. Arkell were elected for two-year terms as councillors. Councillors J. R. Campbell and O. G. Smith have one year to go before their terms expire.

H. C. Mellor and Capt. Webb, representing the Agricultural association, obtained a grant of \$500 from the new council at its first meeting, to be devoted towards the cost of renovating Ellison hall.

Rev. H. A. Solly escaped injury on Thursday when his car slipped off the road and went over the bank in front of the Baptist church. The car was not badly damaged.

Those who attended the BCFGA convention in Kelowna included J. Shepherd, J. Tait, J. Theed, C. A. Walter, J. R. Campbell, A. Dryden, W. A. Caldwell, J. C. Amm, George Drewett, T. Croil, T. C. Croil, M. G. Wilson, Muir Stewart, H. C. Mellor, Ben Saunders, H. Richards, G. C. Benmore, G. Marshall, R. Palmer and H. R. McLarty.

The annual meeting of the Baptist congregation was informed that \$3,000 had been raised for the parsonage and only \$500 debt remained against the building fund. A particularly pleasant part of the program was the acknowledgment of the work done in the many years of his residence here by Rev. G. J. C. White, who was elected Pastor Emeritus. Rev. J. T. Smithson was chairman of the business meeting which marked the 22nd such gathering of the congregation.

GREENWOOD IS PREXY

KELOWNA—T. (Terry) Greenwood, manager Kelowna Sawmill Co. Ltd., last week was elected by acclamation as the 1948 president of the Kelowna Board of Trade. F. N. Gisborne, Canadian Bank of Commerce manager, was acclaimed vice-president and T. R. Hill was returned as secretary.

OPERAT BOAT LIVERY

KELOWNA—J. E. Chambers, of Vancouver, notified city council he intends to operate a boat livery on Okanagan Lake from the wharf adjoining the Willow Lodge. Provision will be made for a marine taxi and fishing and pleasure excursions are planned.

Jan. 20 28 22 0.0

tion which might not be available at the time, would be worth the effort and expense entailed.

"I can only say that, from my experience on that occasion, we were treated with the greatest courtesy by our government representatives, and we believe that our availability was of some use to our delegation, and that it was of material value to the Canadian producers."

(Mr. Loyd was one of those members at the Geneva conference.) "There was formed last year a committee, designed to work towards the production of better standards for the various commodities, improved methods, and the delivery of a more attractive product to the consumer."

"A great deal of work was done by this committee, and undoubtedly their efforts produced a very considerable improvement in the general performance, and—what is to my mind even more important—their findings brought home to all concerned in the industry the absolute importance of handling our fruit more expeditiously from the tree to cold storage."

Growers Should Protect Each Other On Hail

"This plan still appears sound and sensible," declared Eric M. Tait, Summerland, chairman of the hail insurance committee in report to the BCFGA convention in Penticton this week.

He referred to the report of the previous hail committee which believed that the fruit industry should carry its own hail insurance through B.C. Tree Fruits Ltd., this "being the cheapest and most satisfactory form of hail insurance, with widely dispersed risks and low cost of administration."

"It was proposed that the plan be financed by a levy on a per package basis," Mr. Tait's report continued. "However, it is well known that hail recurs more frequently in certain well-defined areas and the only equitable method of financing would be to zone the tree fruits area; the hazardous hail districts would pay a higher rate than those in which the loss is lighter."

"Commercial companies already have the tree fruits area zoned and rated."

"Because the over-all benefits that would be derived from industry-operated hail insurance are not yet widely appreciated and because many growers are comparatively immune from hail loss, it is unlikely that a plebiscite would secure a sufficiently large majority to sanction such a plan, at any rate for some considerable time in the future."

"Further, it is believed by your committee that any upward revision of the present per package deduction, when the three-party contracts are up for revision, would meet with disfavor in these times of rising production costs and would not be desirable."

"In the meantime, the following recommendation, based on the records and experience of many growers over a number of years, is made:

- (1) That established growers carry their own hail insurance—i.e. set up a special hail reserve fund of their own.
(2) That new growers insure with the commercial companies."

Associated with Mr. Tait on this committee were Roy Smith, Summerland and H. C. MacNeill, Peachland.

LOCAL GROWERS

Continued from page 1

could walk into a retail store and order a box of fruit, in season, sent to a stated destination. Mr. Loyd pointed out that this might mean a further department in Tree Fruits but the growers were unanimous in their request for such a system. Mrs. Tillie Rolston, M.L.A., a visitor to the convention, considered this a step in the right direction as it would advertise British Columbia especially.

Want Higher Prices
In the first of their contentious resolutions, Oliver delegates C. W. Norton and George Lundy admitted that A. K. Loyd's annual report had taken the "wind out of their sails" in connection with their request for higher selling prices in view of the big advances in the cost of production.

The resolution as submitted declared that the selling price "must" be adjusted upwards, and this brought the comment from A. K. Loyd that the growers must be realistic about such statements.

"We are getting the last cent it is possible to get," said Mr. Loyd, who explained that if a price is set and one tries to stay with it

regardless of the consequences, the fruit will spoil.

As a consequence, this resolution was brought back in an amended form and sought the assistance of the Dominion government in obtaining the highest possible price for the Okanagan fruit in relation to the advanced cost of production.

As the resolution originally stood, Summerland growers had been instructed by a unanimous vote to go against the suggestion and J. Y. Towgood emphatically informed the convention of their intentions.

Production Manager

Severe criticism of the board of governors for failure to implement the appointment of a production manager was voiced in another Oliver resolution. The Oliver delegates wanted to withdraw this resolution but in order to have a debate on the subject it was allowed to go before the convention.

The delegates had no hesitation in defeating this resolution, especially after Councillor Eric Tait, Summerland, reviewed the past history of the plea for a production manager and expressed the thought that Tree Fruits had made an exhaustive survey of the problem and had come to the conclusion that the better fruit committee could assist more materially.

"Although we were the ones that made a bit of a nuisance of ourselves at last year's convention over this subject, we would rather have the better fruit committee supported than push for a production manager if Tree Fruits has found that this plan is not entirely feasible," declared Mr. Tait.

Mr. Loyd announced that Mr. E. J. Chambers, president of the Associated Growers has been approached to take over the post of production manager and Tree Fruits is now awaiting his answer which they expect to be in the affirmative.

Mr. Chambers has been called suddenly to Ottawa to give advice on the price control problem as it affects fruit and vegetables.

Cars Colide on Penticton Road

Cars driven by Charles Stuart and Jack Morrow collided on the Summerland-Penticton highway on Wednesday evening, January 17, about 8:30 o'clock, with considerable damage being done to both vehicles. Mrs. Morrow received superficial cuts about the head and face. It is understood in B.C. Police circles here that Mr. Stuart is appearing in Penticton police court today to answer charges of driving to the common danger.

Quarter Million For Phone System

VERNON—The Okanagan Telephone Company plans to spend approximately \$270,444 on buildings and equipment this year at various points in its system, as part of the million dollar expansion program announced some months ago. The program will be continued on the same scale for 1949. Formal approval of this year's capital expenditures budget is expected at a directors' meeting in Vancouver today. Three new exchange buildings to house automatic dial telephone equipment will be built as soon as weather conditions permit. They are at Armstrong, Westbank and Peachland, the first places on the company's system to be so converted. Provided deliveries of materials are made as promised, these dial exchanges should be in operation by the end of next September.

RAISE WARD RATES

PENTICTON — Spiralling costs of operation will result in a deficit for the year of some \$12,000, the Penticton Hospital Board has been told. An increase of one dollar per day in all wards will take effect. This will raise public ward rates to \$4.50; semi-private ward rates to \$5.50, and private ward rates to \$6.50.

SEVEN DAYS IN JAIL

VERNON—The minimum sentence of seven days in jail was handed down by Magistrate William Morley to Russell Heggie in city police court last week on the charge of having control of a car while intoxicated. Mr. Heggie pleaded not guilty to the charge and was represented by J. R. Kidston, with Constable J. A. Knox prosecuting.

TENDERS OPENED

Tenders for the construction of \$1,500,000 worth of buildings in two projects were opened this week, states Hon. E. C. Carson, minister of public works. These are for the biological science and pharmacy building at UBC and a nurses' residence at Essondale mental hospital.

SIX MONTHS TO LIVE, VALLEY MAN NOW REACHES 91

VERNON—A 91-year-old "youngster," James H. Miller, of Okanagan Landing, lays claim to being the oldest man in Vernon and district. If there is some man older than he is, Mr. Miller wants to be informed about it. A man who can still read and write without glasses, he credits his long life to drinking nothing stronger than ginger ale, his favorite refresher, picker upper and thirst quencher. Couldn't Eat Mr. Miller moved with his wife to Okanagan Landing 25 years ago, after a Calgary doctor gave him six months to live. "I couldn't eat a mouthful," he recalls, "and I couldn't row for more than 10 minutes at a time. Three months later I could row 20 miles without a break and I couldn't get enough to eat." Then he was 65, a retired CPR machinist. Now, at 91, he is still going strong and the picture of health.

RETAINS MEMBERSHIP

Dr. John Hart, who retired from the premiership of the Coalition government last December 29, indicated this week that he will retain his seat in the provincial legislature. Dr. Hart, who will spend the next month in California, stated he would probably attend some sittings of the house as a private member.

MAIL DELIVERY IN MARCH

VERNON—The Post Office department at Ottawa has set "sometime in March" as the tentative date for inauguration of letter carrier service in Vernon, said G. H. Clarke, district director of postal service, Vancouver, in telephone conversation with The Vernon News last week.

COMMERCIAL GOLF

REVELSTOKE — Revelstoke's scenic golf course will attract scores of commercial travellers from all parts of British Columbia when the annual Commercial Men's Golf Tournament is held here, May 22nd, 23rd and 24th.

SUMMERLAND ROAD MACHINERY & EQUIPMENT BY-LAW, 1947

The Corporation of The District of Summerland, By-law No. 653

A BY-LAW of The Corporation of the District of Summerland in the Province of British Columbia (hereinafter called the "Corporation") to enable the Corporation to raise by way of loan the sum of Twelve Thousand Dollars (\$12,000.00) for the purpose of purchasing road machinery and equipment consisting of a Road Maintainer and a Dump Truck.

WHEREAS it is deemed expedient to purchase such road machinery and equipment for the said Corporation,

AND WHEREAS the estimated cost of such road machinery and equipment is Twelve Thousand Dollars (\$12,000.00),

AND WHEREAS it is necessary for the purpose aforesaid to raise by way of loan on the credit of the Corporation the sum of Twelve Thousand Dollars (\$12,000.00), which sum is the amount of the debt which this By-law is intended to create,

AND WHEREAS the amount of the assessed value of the taxable land and improvements within the Municipality according to the last revised assessment roll, being the assessment roll for the year 1947, is Two Million Seven Hundred Four Thousand Three Hundred Ninety-four Dollars and Fifty cents (\$2,704,394.50),

AND WHEREAS the total amount of the existing debenture debt of the said Corporation is Two Hundred Ninety-eight Thousand One Hundred Eighty-five Dollars and Thirty-four Cents (\$298,185.34),

NOW THEREFORE the Municipal Council of the Corporation of the District of Summerland in said Province in open meeting assembled enacts as follows:

(1) That the Municipal Council of the said Corporation be and is hereby authorized to purchase road machinery and equipment consisting of a Road Maintainer and a Dump Truck and to expend upon such purchase of road machinery and equipment the sum of Twelve Thousand Dollars (\$12,000.00).

(2) It shall be lawful for the Corporation to raise by way of loan from any person or persons, body or bodies corporate, who may be willing to advance the same on the credit of the said Corporation, by way of the Debentures hereinafter mentioned, a sum of money not exceeding in the whole the sum of Twelve Thousand Dollars (\$12,000.00), and to cause all such sums so raised and received to be paid into the hands of the Treasurer of said The Corporation of the District of Summerland for the purpose and with the objects hereinbefore recited.

(3) It shall be lawful for the said Corporation to cause Debentures to be made and issued in denominations of not less than \$100.00 each, bearing interest at the rate of Two and three-quarters per cent (2.75%) per annum, not exceeding in the whole the sum of Twelve Thousand Dollars (\$12,000.00) in all, such debentures shall be sealed with the Seal of the said Corporation, signed by the Reeve and countersigned by the Treasurer of the said Corporation.

(4) The said Debentures shall bear date the First day of March, 1948, and shall be payable as follows:

Two Thousand Dollars (\$2,000.00) on the 1st day of March, 1949,
Two Thousand Dollars (\$2,000.00) on the 1st day of March, 1950,
Two Thousand Dollars (\$2,000.00) on the 1st day of March, 1951,
Three Thousand Dollars (\$3,000.00) on the 1st day of March, 1952,
Three Thousand Dollars (\$3,000.00) on the 1st day of March, 1953,
in lawful money of Canada, at the Agency Branch of the Bank of Montreal at West Summerland, British Columbia.

(5) The said Debentures shall have coupons attached for the payment of the interest at the rate of Two and three-quarters per cent (2.75%) per annum, and such interest shall be payable semi-annually on the First days of the months of March and September in each and every year in lawful money of Canada at the Agency Branch of the Bank of Montreal at West Summerland, British Columbia, and the signatures to such coupons may be either written, stamped, printed or lithographed.

(6) During the currency of the said debentures there shall be raised and levied annually by rate sufficient therefor, over and above all other rates, on all the rateable land, or rateable land and improvements, within the said Corporation, for the payment of the principal and interest of the said debt in the respective years the amounts as follows:

Year	Principal	Interest	Total
1948	\$2,000.00	\$ 30.00	\$ 2,330.00
1949	2,000.00	275.00	2,275.00
1950	2,000.00	220.00	2,220.00
1951	3,000.00	165.00	3,165.00
1952	3,000.00	82.50	3,082.50
	\$12,000.00	\$1,072.50	\$13,072.50

(7) This By-law may be cited for all purposes as the "Summerland Road Machinery and Equipment By-law, 1947".

(8) This By-law shall before the final passing thereof receive the assent of the electors of the said "The Corporation of the District of Summerland", in the manner provided for by the "Municipal Act."

READ a First and Second time by the Municipal Council the Seventeenth day of December, 1947.

RECEIVED the approval of the Inspector of Municipalities, on the twenty-third day of December, 1947.

READ a Third time by the Municipal Council on the Thirteenth day of January, 1948.

RECEIVED the assent of the Electors of said The Corporation of the District of Summerland the RECONSIDERED and Finally Passed and Adopted by the said Municipal Council, signed by the Reeve and Clerk and sealed with the Corporate Seal the

SUMMERLAND ROADS ASPHALTING BY-LAW, 1947

The Corporation of The District of Summerland, By-law No. 654

A BY-LAW of The Corporation of the District of Summerland in the Province of British Columbia (hereinafter called the "Corporation") to enable the Corporation to raise by way of loan the sum of Twenty-eight Thousand Dollars (\$28,000.00) for the purpose of asphaltting approximately nine miles of principal roads and streets as follows:

- Giants' Head Road to Trout Creek Service Station.
- Hospital Hill Road from Switching Station to Arterial Highway, Summerland, via Hospital.
- Gulch Road between Blocks 40 and 41, D.L. 455.
- Garnet Valley Road commencing with and including Quinpoole Road and extending to Lot 1, Map 2509 (foot of Theed's Hill). From the intersection of Jubilee and Victoria Roads, West Summerland (B.C. Shippers corner) North to Arterial Highway.
- Jones Flat Road from Arterial Highway at South-west corner of Block 9, D.L. 472, West to Garnet Valley Road.
- Streets in West Summerland townsite—
Granville Road
Jubilee Road
Pender Street.

WHEREAS it is deemed expedient to improve approximately nine miles of principal roads and streets within the district of the said Corporation by asphaltting same,

AND WHEREAS the estimated cost of such improvement is Twenty-eight Thousand Dollars (\$28,000.00),

AND WHEREAS it is necessary for the purpose aforesaid to raise by way of loan on the credit of the Corporation the sum of Twenty-eight Thousand Dollars (\$28,000.00), which sum is the amount of the debt which this By-law is intended to create;

AND WHEREAS the amount of the assessed value of the taxable land and improvements within the Municipality according to the last revised assessment roll, being the assessment roll for the year 1947, is Two Million Seven Hundred Four Thousand Three Hundred Ninety-four Dollars and Fifty Cents (\$2,704,394.50);

AND WHEREAS the total amount of the existing debenture debt of the said Corporation is Two Hundred Ninety-eight Thousand One Hundred Eighty-five Dollars and Thirty-four Cents (\$298,185.34),

NOW THEREFORE the Municipal Council of the Corporation of the District of Summerland in said Province in open meeting assembled enacts as follows:

(1) That the Municipal Council of the said Corporation be and is hereby authorized to asphalt approximately nine miles of principal roads and streets as aforesaid within the corporate limits of the said Corporation and to expend upon such asphaltting roads the sum of Twenty-eight Thousand Dollars (\$28,000.00).

(2) It shall be lawful for the Corporation to raise by way of loan from any person or persons, body or bodies corporate, who may be willing to advance the same on the credit of the said Corporation, by way of the Debentures hereinafter mentioned, a sum of money not exceeding in the whole the sum of Twenty-eight Thousand Dollars (\$28,000.00), and to cause all such sums so raised and received to be paid into the hands of the Treasurer of said The Corporation of the District of Summerland for the purpose and with the objects hereinbefore recited.

(3) It shall be lawful for the said Corporation to cause Debentures to be made and issued in denominations of not less than \$100.00 each, bearing interest at the rate of Two and three-quarters per cent (2.75%) per annum, not exceeding in the whole the sum of Twenty-eight Thousand Dollars (\$28,000.00) in all, such debentures shall be sealed with the Seal of the said Corporation, signed by the Reeve and countersigned by the Treasurer of the said Corporation.

(4) The said Debentures shall bear date the First day of March, 1948, and shall be payable as follows:

Five Thousand Dollars (\$5,000.00) on the 1st day of March, 1949
Five Thousand Dollars (\$5,000.00) on the 1st day of March, 1950
Six Thousand Dollars (\$6,000.00) on the 1st day of March, 1951
Six Thousand Dollars (\$6,000.00) on the 1st day of March, 1952
Six Thousand Dollars (\$6,000.00) on the 1st day of March, 1953
in lawful money of Canada, at the Agency Branch of the Bank of Montreal at West Summerland, British Columbia.

(5) The said Debentures shall have coupons attached for the payment of the interest at the rate of Two and three-quarters per cent (2.75%) per annum, and such interest shall be payable semi-annually on the First days of the months of March and September in each and every year in lawful money of Canada at the Agency Branch of the Bank of Montreal at West Summerland, British Columbia, and the signatures to such coupons may be either written, stamped, printed or lithographed.

(6) During the currency of the said debentures there shall be raised and levied annually by rate sufficient therefor, over and above all other rates, on all the rateable land, or rateable land and improvements, within the said Corporation, for the payment of the principal and interest of the said debt in the respective years the amounts as follows:

Year	Principal	Interest	Total
1948	\$ 5,000.00	\$ 770.00	\$ 5,770.00
1949	5,000.00	682.50	5,682.50
1950	6,000.00	495.00	6,495.00
1951	6,000.00	330.00	6,330.00
1952	6,000.00	165.00	6,165.00
	\$28,000.00	\$2,392.50	\$30,392.50

(7) This By-law may be cited for all purposes as the "Summerland Roads Asphaltting By-law, 1947".

(8) This By-law shall before the final passing thereof receive the assent of the electors of the said "The Corporation of the District of Summerland", in the manner provided for by the "Municipal Act."

READ a First and Second time by the Municipal Council the Seventeenth day of December, 1947.

Soil Erosion Affecting Tree Life

Dr. J. C. Wilcox Gives Growers Comprehensive Talk On Nutrition Of Trees In Southern Interior

From a strictly productive standpoint, one of the most informative addresses delivered at the BCFGA convention this week was that of Dr. J. C. Wilcox, who represented the Summerland experimental station in providing a lecture on "Tree Fruit Nutrition in the Southern Interior of B.C."

This committee is made up of all those technical workers who are actively engaged in plant nutrition research in the Okanagan and nearby valleys. Represented on the committee are the staffs of the Laboratory of Plant Nutrition at Summerland, the Laboratory of Plant Pathology at Summerland, and the provincial agricultural representatives located in and near the Okanagan Valley.

Experimental Work
This group of men has conducted about 40 different fertilizer experiments on tree fruits, with nitrogen, phosphate and potash. Of these, at least 6 have been run for a period of 10 years or longer.

The methods of procedure used have included fertilizer applications to the soil, nutrient injections into the trunks of the trees, and spraying with nutrient solutions.

In addition to the fertilizer experiments, soil samples have been collected in large numbers in the Okanagan and have been analysed for their phosphorus, potassium, calcium and lime contents and for their pH.

Apple twigs and leaves have been collected and analysed for nitrogen, phosphorus, potassium and calcium. And a large number of samples of irrigation water and drainage water have been analysed for pH, phosphorus, potassium and calcium.

"These investigations have helped materially to give us a general picture of the nutrient status of the Okanagan soils," declared Dr. Wilcox.

"As a result of the experimental work that has been done, the plant nutrition committee has, from time to time made recommendations with regard to fertilizer applications in orchards. As time progresses, our recommendations change somewhat. This is due to two things: first, with further investigation, we gain further information and second, the soil itself actually changes in the course of time.

Soil is Changing

"This change in the soil is something that both we as technical men and you as growers have to keep in mind. The virgin or uncropped soil in the southern interior of the province is, for the most part, relatively rich in most of the nutrient elements. In only two of the nutrient elements have we found it really poor—nitrogen and boron. As the soil is utilized for growing crops, however, a number of changes are brought about in the nutrient contents. Among the many factors that have been bringing about these changes are the following:

(1) Soil erosion. This has been, and still is, more serious in our orchard lands than many growers realize. It is especially serious in our hillside orchards. When the surface soil is eroded away, we lose most of the humus and nitrogen, and high percentages of the phosphate and potash in the soil. The results have been so serious in many orchards, after only 20 to 40 years of cultivation and irrigation, that the productive capacity of the soil has already been markedly reduced. Far more nutrients are lost from our soil by erosion than by any other one factor.

(2) Cropping. This removes nutrients from the soil, and over a long period of time will obviously reduce several of them to the point where they will need to be supplied in fertilizer form.

(3) Fertilizing. It is impossible to add fertilizers in exactly the same proportion as the nutrients are being removed from the soil. The net result is that some nutrients tend to become deficient and others build up to the point where they are present in excess amount and cause damage.

(4) The mineral soil particles are constantly being acted on by soil water and acids and thus broken down into smaller particles. The nutrients they contain are gradually dissolved out and become available to plants. This process is too slow to allow good crop production by itself, but undoubtedly it does help to keep up the supply of available nutrients.

(5) Irrigation water. Our irrigation water contains potash, lime, and other nutrient compounds, which serve to enrich the soil. In some cases, the materials added in this manner are appreciable, example, Okanagan Lake water contains around 7 pounds of potash and 200 pounds of lime per acre foot of water. Thus if you are applying three feet of this water to your orchard annually, you apply with it about 21 pounds of potash and 600 pounds of lime per acre. There is of course considerable variation from district to district in the nutrient contents of the irrigation water.

(6) Leaching and seepage. When

too much irrigation water is applied, it carries some of the nutrients with it deep into the subsoil and leaches them away. This excess water may reappear lower down the slope or in the valley bottom as seepage water. Some of this evaporates, allowing an excess of minerals to build up at that point.

Present Recommendations
"In discussing our present recommendations on soil treatment, it is not my intention to present the details.

"Control of soil erosion is comparatively easy in those orchards where there is a supply of water sufficient to grow good cover crops. Our recommendations for irrigated orchards are as follows: (1) Irrigate by the sprinkler method. (2) Grow a grass sod or Ladino clover cover crop. (3) Reduce cultivation to a minimum. Don't do any cultivating during the irrigation season and if possible, eliminate it altogether. If these recommendations are followed, you will find there will be very little if any soil erosion from your orchard.

"Where permanent cover crops cannot be grown, erosion is not so easy to control. Our suggestions are as follows: (1) Cultivate on the contour. (2) Where possible, grow an over-wintering crop such as fall rye. (3) Apply plenty of manure, straw, sawdust or shavings. When straw, sawdust or shavings are used, extra nitrogen needs to be applied. I would suggest ammonium nitrate at the rate of 100 pounds per ton of material, in addition to the regular fertilizer applications. These materials not only help to reduce erosion, but they also add organic matter and mineral nutrients to the soil.

Acidity and Alkalinity

"Before giving our recommendations on soil acidity and alkalinity, I think perhaps I should explain what it is all about. And I am afraid I cannot do this without introducing two or three technical terms. The first of these is "pH". We measure acidity and alkalinity in terms of pH. A pH of 7.0 is neutral, below this is acid, and above it alkaline. Most of our crop plants seem to grow quite well between a pH of 6 on the acid side and a pH of 8 on the alkaline side. This is certainly true with most of our tree fruits.

"In the semi-arid sections of the southern interior of the province, the pH of the virgin soils is mostly on the alkaline side. Lime is usually present in the subsoil, and this produces a definitely alkaline pH—as high as 8.4 in some cases. Such soils appear to be ideal for tree fruits, judging by yield records on them.

"In the more humid sections of the southern interior, the original pH of the soil is somewhat lower. This is especially true with the surface soil, which tends to be somewhat on the acid side. In most soil types, however, lime is still found in the subsoil, so the soils are really not so very much different in pH from those found in the semi-arid districts.

"With irrigation, cropping and fertilizing, there has been a general tendency for the soil to become more acid. The chief cause of this change has been the use of sulphate of ammonia and other acidifying fertilizers. For the most part, this acidifying effect has been found in the surface soil only, and it is quite common now to find surface soils that are acid and subsoils that are still alkaline. Such a condition is quite suitable for tree fruits. With some sandy soils, the subsoil is also becoming acid.

"Black alkali and white alkali are sometimes found in the semi-arid districts. Black alkali is caused by a high concentration of sodium carbonate, which in turn causes the pH to become highly

alkaline. White alkali is a misnomer. It is really just a high concentration of soluble mineral salts, and is more properly called a "saline" condition. Either or both of these may be found where seepage water has brought them to the surface and has caused them to become too highly concentrated.

Recommendations
"Our recommendations are as follows:

"(1) Have your soil tested. Take samples to your local district agriculturalist or send them to the experimental station. In orchards, the samples should be taken at depths of 0-1 foot, 1-2 feet, and 2-3 feet. No treatments should be given without adequate preliminary tests. And whatever you do, don't come to conclusions on the basis of surface samples only.

"(2) If the pH of both the surface soil and the subsoil is below 6, it may be advisable to apply lime.

"(3) If the pH goes above 8.4 some acidifying material such as gypsum should be applied. Drainage may also be necessary.

"(4) Where white alkali is present, make sure there is good drainage, then try to leach the excess salts out with irrigation water. Further recommendations will be given in the bulletin on soil management that is now being prepared.

Nitrogen

"This is by far the most important element that we have to worry about in the southern interior of the province. It is the element that we use to increase the vigor of the trees. I don't mean by this that it is the only factor that affects the vigor. Actually, a serious deficiency of any element will reduce tree vigor.

"The question is, just what should the vigor of the tree be? In deciding on this, we are faced with a problem. With a low degree of vigor, the fruit is small and well colored and keeps well, but there is not enough of it to be profitable. With a high degree of vigor, the fruit is larger and the crop is heavier, but color and keeping quality are reduced. A happy medium gives the best all round results. With the apple, pear, cherry, plum and prune, an annual terminal growth of 10 to 12 inches has been found the most suitable, while with the peach and apricot best results are obtained with about 18 inches. These figures refer to mature bearing trees. With young trees, the terminals should be longer.

"Our recommendations, then, are as follows: (1) Make sure that irrigating, pruning, etc., are adequately taken care of. (2) Measure the terminals on the trees. The best ones to measure are the leaders that grow outward at an angle around the outside periphery of the tree. Where the trees show a tendency toward biennial bearing, measure the growths for the past two years and average them. (3) If the growth is less than the

figures noted above, increase the nitrogenous fertilizer. If it is greater, reduce the application somewhat. (4) The best straight nitrogenous fertilizer on the market today is ammonium nitrate. Remember that you only need two-thirds as much of it as you do of sulphate of ammonia.

Phosphorous and Potassium

"Next to nitrogen, these two elements are the ones that are most frequently found lacking in agricultural soils. Phosphorus helps to induce good maturity and color in the fruit, and potassium is necessary for the proper health and functioning of all the growing tissues. Fertilizers containing phosphorus and potassium are said to contain phosphate and potash respectively.

"A large number of orchard tests with phosphate and potash fertilizers have been run in the southern interior. In no case has any beneficial effect on the trees or the fruit been obtained. The answer is that we already have sufficient available phosphorus and potassium in our soils here, so that adding more does not do any good. That at least is the answer if we are to judge by our fertilizer trials alone.

"And what is the story from our soil and leaf analyses? Practically the same. However, we have encountered occasional soils that are lower in available phosphorus and potassium than are the check plots in our fertilizer trials. This is especially true with phosphorus, in some of our shallow, sandy soils.

"Our recommendations, then, are as follows: (1) Apply nitrogen in the amount required to induce the proper degree of vigor. (2) Apply phosphate to sandy soils. This can best be done with 16-20 fertilizer. In most cases it is sufficient to use 16-20 every second year, applying a straight nitrogenous fertilizer in the alternate years. (3) Apply potash to very

light shallow soils or gravel piles.

Other Elements
"It is my intention to mention the other elements only in passing. "Our soils and our irrigation water are rich in calcium, and we have as yet no evidence that any good is accomplished by applying lime, gypsum or other calcium containing compounds for their fertilizing value. The only place they are needed is where the pH is too low or too high.

"We have suspected that some of our soils might be low in magnesium, but so far no beneficial effects have been obtained from adding this element.

"Iron is present in sufficient quantity in our soil, but sometimes it is tied up by lime or alkali in insoluble form. As a result, the leaves turn yellow or "chlorotic" and may eventually turn brown and fall. Dr. McLarty and his staff are busy working on this problem.

"Of the minor elements, boron is the only one that has been found to be generally lacking in the southern interior of the province. It was fortunate that the growers when Dr. McLarty and his associates discovered this fact some 13 years ago.

"Our present recommendations are, briefly, to apply boric acid every third year, at the rate of 30 pounds per acre. Where stone fruits are growing in sandy soil, they should receive 15 pounds per acre annually.

"Zinc deficiency has been encountered in the State of Washington, and we strongly suspect that it exists in some parts of the southern Okanagan. This possibility is now being investigated by Messrs. McLarty, Murray and Smith.

Complete Fertilizers

"It has been pointed out to us on more than one occasion that we are 'missing the boat' by not recommending complete fertilizers for all soil.

"This argument is quite a reasonable one. And yet we have not been recommending complete fertilizers for all soils. Why not? In the first place, it would cost the grower a lot of money to apply every year all of the elements used by plants or otherwise lost. In the second place, it is easy to develop an excess of an element if we apply more of it when there is already plenty of it in the soil. We have had good examples at the Kelowna substation of damage from excess phosphate and also from excess boron. And finally, nutritional difficulties may be caused by unbalanced ratios among the elements rather than by mere deficiencies or excesses.

More Investigation
"This has brought me to the sad admission that we do not yet know the full story with regard to plant nutrition. It is true that we have found out a great deal about it. However, I am the first to admit that there is a great deal more still to be found out. The fact is that we have not yet investigated all of the soil types nor have we made adequate tests with all of the essential elements. We have not yet studied the effects of unbalances among the nutrient elements. We have not determined the character and degree of change that is occurring in each of our soil types, under each cultural condition.

"We have been working hard at the problems encountered, but they have been arising faster than we could solve them. To make matters worse, it is more than likely that they will arise in increasing number and severity as the years pass. This, at least, has been the experience in other parts of the world.

"Already there are many orchards that are suffering with different types of debility of unknown origin. When I say of 'unknown origin', I mean that we do not

YOUR NEW DRIVING RESPONSIBILITIES

Public Safety and Financial Responsibility Amendments to the Motor Vehicle Act become effective March 1st, 1948. The purpose of the new legislation is to protect responsible motorists and pedestrians against irresponsible drivers—to bring to all who walk and drive the roads a greater measure of safety. You are asked to study carefully the following summary of the provisions of the law. This summary is in general terms and is not exhaustive. Complete co-operation by everyone is essential to make the Act work.

1. There will be suspension of both the driver's license and the vehicle registration where there has been a failure to pay within 30 days a final judgment found by any court in Canada or the U.S.A. against the driver of a vehicle involved in an accident resulting in bodily injury, death or property damage exceeding \$25.
The Superintendent of Motor Vehicles shall suspend the driver's license and the vehicle registration.
Suspension of the right to drive in such cases is a penalty awarded under the provisions of the law, and will only be relieved upon submission of proof of financial responsibility and upon satisfaction of any penalty imposed by the Courts.
2. The automobile will be impounded and the right to drive suspended where the driver fails to produce to the authorities immediately following any accident resulting in injury, death or property damage exceeding \$25:
(a) a card which will be supplied by the Motor Vehicle Department proving financial responsibility, or
(b) a card to be supplied by Insurance Companies proving that the driver carries public liability and property damage insurance.
3. If the driver's license is suspended for either of the above reasons, the license will remain suspended and the vehicle impounded until:
(a) security is given for the damages estimated to have been caused, or
(b) the damages are paid, and in addition,
(c) proof is supplied to the authorities of the offender's responsibility for future accidents.
If, after the lapse of a year, no claim for damages has been established nor any lawsuit is in progress, the suspension will be lifted.
4. Where death, bodily injury or property damage exceeding \$25 results from an accident in which the driver is convicted of any of the following infractions of the Motor Vehicle Act:
(a) driving to the common danger,
(b) exceeding any prescribed speed limit,
(c) driving without a license,
(d) criminal negligence,
(e) failing to remain at or immediately return to the scene of the accident, or failing to report the accident to the proper authorities,
the Superintendent of Motor Vehicles shall suspend the driver's license and the vehicle registration.
Suspension of the right to drive in such cases is a penalty awarded under the provisions of the law, and will only be relieved upon submission of proof of financial responsibility and upon satisfaction of any penalty imposed by the Courts.
5. Additional power is vested in the Superintendent of Motor Vehicles to suspend, at his discretion, the driver's license and the vehicle registration of any driver who fails to comply with any requirement of the Motor Vehicle Act or for any other reasonable cause.
Driving privileges in such cases will be restored where proof is given of financial responsibility for damages resulting from possible future accidents.
An appeal may be made to the County Court for reinstatement of driving privileges.
6. The manner in which a person may be required to prove his financial responsibility—his ability to pay for the injury he does others—is set out in detail in the legislation. The financial coverage afforded by most public liability and property damage insurance policies is normally sufficient. For those who do not carry insurance of this nature, security sufficient to satisfy a maximum judgment for damages arising out of a possible motor vehicle accident is required.
7. The legislation provides for reciprocal arrangements with other provinces and states. This safeguard forces visiting motorists to accept the same measure of responsibility as local drivers.
8. Where damage exceeding \$100 for personal injury or death arising out of a motor vehicle accident are awarded by any court in B.C. and the defendant is shown to be financially irresponsible and unable to pay the judgment damages, payment may be secured by the plaintiff from a public fund known as the Unsatisfied Judgment Fund.

SECOND IN A SERIES OF STATEMENTS PUBLISHED UNDER THE AUTHORITY OF THE HON. GORDON S. WISMER, K.C., ATTORNEY-GENERAL OF BRITISH COLUMBIA.

Training School At Naramata Aided By Federation

Contributions of fruit and other needed articles to the new Naramata Training school, and of knitted goods for the needy Chinese children, have been among the major activities during the past year, of the Women's Federation of St. Andrew's church.

A meeting in the church hall on Thursday, January 15, heard reports of these and many other activities. An impressive feature of the meeting was the installation service for the recently-elected officers.

Each officer received from Rev. H. Whitmore thanks for past services and words of encouragement for her work during the coming year.

The president, Mrs. S. A. MacDonald, also was presented by the vice-president, Mrs. T. W. Boothe, with a Women's Missionary society

life membership pin. The treasurer, Mrs. J. Shepherd, reported a financial increase for the year, and the Missionary allocation reached. Plans were made for assisting with billets and refreshments for the coming Presbyterian meetings, to be held in West Summerland in February. Mrs. Boothe gave an interesting account of the opening of the Naramata Training school, which she attended, and conveyed the gratitude of the school for assistance given them by the Federation. A portion of the study book "Great is the Company," was ably read by Mrs. Kyle and tea was served by Mrs. E. Stent and Mrs. Boothe.

APPEAL TO CHC FOR SUPPORT

An appeal for increases in the number of research workers and funds to carry out their work, was made by the BCFGA executive in a lengthy brief to the Canadian Horticultural Council on Nov. 17. "The fruit and vegetable industries of B.C. are confronted with many problems requiring research for their solution," the brief emphasized. "The problems in need of investigation range all the way from methods of maintaining soil fertility to methods of ensuring maximum palatability and retention of nutritive value in the final product."

Socially Speaking

Mr. T. E. Young went down to the coast on Sunday night.

Mr. Warren Givins of Happy Valley is in Princeton on business this week.

St. Stephen's W. A. is holding a donation tea in the Parish hall this Thursday afternoon.

Mr. and Mrs. F. B. Bedford left on Saturday night for the coast, where they will visit for the week.

A son was born to Mr. and Mrs. Lorne Dodman of West Summerland on Sunday, January 18, at the Summerland hospital.

Mrs. J. Moffat left on Tuesday to spend a month at the home of her son-in-law and daughter, Mr. and Mrs. R. A. Grant of Kelowna.

In a letter to the Summerland Review received on Monday, Mr. Charles F. Smith, former proprietor of Mac's Cafe relates that he has bought a small general store at Melanson, Nova Scotia and has moved his family there.

A quiet wedding was performed on Sunday, January 18, at the United church manse in West Summerland by Rev. H. R. Whitmore, when Dollie Louise Dawson, formerly of Oids, Alta., was united in marriage to Mr. William Dodman, of Summerland. The attendants were Mr. and Mrs. Hunt, Summerland, Mrs. Hunt being a sister of the groom.

Mrs. A. J. McLean, of Upper Halfway, B.C., beyond Fort St. John visited for two weeks recently her parents, Mr. and Mrs. A. Rutherford and her sister, Mrs. Louis Burnell. The first part of her trip from Upper Halfway to Fort St. John was undertaken by means of a Jeep driving along the ice on the river. From Fort St. John to Vancouver and from the coast city to the Okanagan, the trip was covered by CFA plane and she returned to the northland by the same route.

MRS. M. HANNAH IS NOBLE GRAND

On Monday, January 12th, Mrs. Mona Thompson, district deputy president of the Rebekah Assembly of B.C., in company with a number of members of the Pentiction and Summerland Lodges, went to Oliver to install the incoming officers of Golden Heart Rebekah Lodge No. 60 in that city.

On Tuesday, January 13th, Mrs. Thompson with a group of officers from Faith Lodge No. 32 of Summerland went to Pentiction to assist in a joint installation of the officers of Redland Rebekah Lodge No. 12 and Okanagan Lodge No. 51, IOOF. Those attending this ceremony from Summerland were: Mrs. Ina Atkinson, vice-president of the Rebekah Assembly of B.C., Mrs. Audrey Taylor, Mrs. May Mitchell, Mrs. Belva Nesbitt, Mrs. Millie Walden, Mrs. Loretta Hack.

Wednesday evening of January 14th saw the installation of officers in the Summerland branch of the Rebekahs, Faith Lodge No. 32. Mrs. Mona Thompson officiated and the following officers were installed for the current term:

Mrs. Miriam Hannah, noble grand; Mrs. Ruth Caldwell, vice-grand; Mrs. Florence Ritchie, recording secretary; Mrs. Mabel Brown, financial secretary; Mrs. Betty Haddrell, treasurer; Mrs. Agatha Letts, warden; Mrs. Ethel Bleasdale, conductor; Mrs. Mary Clarke, inside guardian; Mrs. Margaret Dunsdon, outside guardian; Mrs. May Mitchell, right supporter to the N.G.; Mrs. Beulah Raincock, left supporter to the N.G.; Mrs. Dorian Blagbourne, right supporter to the V.G.; Mrs. Margaret Kersey, left supporter to the V.G.; Mrs. Eva Haddrell, chaplain; Mrs. Mary Orr, musician, and Mrs. Dorothy Pattie, color bearer.

Coming from Pentiction to honor the incoming officers were Mrs. Stella Mason, past-president of the Rebekah Assembly, and Mrs. Louise Nagle, deputy-marshal, Redlands Lodge No. 12, in company with a number of members of that Lodge.

On Friday, January 16, the Rebekahs and the Oddfellows of Summerland held a memorial banquet honoring Thomas Wilder, founder of the IOOF in America. A group of members from the two Lodges in Pentiction attended as guests of the Summerland members. D. G. M. Was Manning of Pentiction proposed the toast to the founder, to which Mrs. Ina Atkinson, vice-president of the B.C. Assembly, responded.

Throughout the BCFGA convention in Pentiction this week, tribute was paid by many speakers to the late J. G. West, advertising manager of B.C. Tree Fruits Ltd., the central sales agency. The industry lost a valued servant, speakers stated.

"Old at 40, 50, 60?" — Man, You're Crazy

Forget your age! Thousands are happy at 70. Try "Eaton's" skin cream. Contains tonic for weak, sunken feeling due to body's lack of iron. When many men and women feel "old" on very few days, "Eaton's" skin cream is the only one for sale at all drug stores everywhere.

Mr. and Mrs. Len Hill left on Sunday night for a week in Vancouver.

Mr. and Mrs. Tom Joy of Trout Creek are spending this week in Vancouver.

Miss Esther Riley of the hospital staff has gone to Vancouver for a few days holidays.

Rev. F. W. Haskins left for the Coast on Sunday night for a business trip of two or three days.

Miss W. Imbrey, a stewardess with TCA at Vancouver, is spending a few days holiday with Miss Audrey Tavender at her home here.

Mr. and Mrs. Ed Gould of Summerland were visitors on Wednesday, Jan. 14 to Oliver, where they attended the funeral of the late Allan Macdonald.

Mr. Roy Wellwood returned on Tuesday morning from Vancouver. Mrs. Wellwood and their child will remain at the coast for a few weeks.

Mr. Art Laing, president of the B.C. Liberal Assn and manager of Buckerfield's Ltd., was a visitor to Summerland on Monday afternoon en route to Pentiction where he has attended the BCFGA convention this week.

The quarterly meeting of the Okanagan Health Unit was held in Kelowna on Wednesday, January 21st. Attending from Summerland were Mrs. A. W. Vanderburgh and Mr. P. G. Dodwell, representing the school board, and Mr. F. E. Atkinson, representing the council. Dr. A. M. Beattie, director of the Okanagan Health Unit will be in Summerland Tuesday, January 27th for the purpose of administering vaccination against smallpox. He will be at the school from 2:30 till 3:30 of that day, and all those needing "booster" shots, or those who have not been previously vaccinated, are expected to take advantage of this service.

MRS. J. WILCOX ELECTED PRESIDENT

The St. Andrew's Service club met on January 19th. Following the annual reports which showed many accomplishments, the officers for 1948 were elected, as follows: Mrs. J. Wilcox, president; Mrs. J. Marshall, 1st vice-president; Mrs. L. Rumball, 2nd vice-president; Mrs. George Washington, secretary; Mrs. C. Baker, treasurer; Mrs. J. Dunsdon, visiting committee; Miss Bertha Bristow, flower committee; Mrs. Ross McLachlan, press correspondent; Mrs. L. Fudge, pianist.

With the new officers in the chairs the new business was brought before the meeting. As guest speaker Mrs. W. Boothe gave an interesting and informative report on the opening of the Naramata Youth Leadership Training school. It was suggested that members who wished to donate articles for these students should leave them at the Family Shoe Store.

At the close of the meeting refreshments were served.

Looking Into the Matter . . .

You'll find that the tried and true recipe for thrift is to shop the EATON way.

It's a Canadian dish—known from coast to coast, and one that the whole family shares.

Since 1860 the organization has grown with Canada, and through its Mail Order is available from coast to coast. EATON'S aim always has been to offer quality unsurpassed at the price in fashions, furniture, equipment for farm or home; and every sale is made with that familiar reassuring guarantee—

"Goods Satisfactory or Money Refunded, Including Shipping Charges."

DID YOU KNOW?

VANILLA
Vanilla is obtained from the fruit of the vanilla plant, the only member of the orchid family that yields a food product of importance.

The plant is a native of tropical America and Asia and was introduced into Europe by the Spaniards who found its fruit in use among the Aztecs at the time of the conquest of Mexico.

The vanilla is a climbing plant with lance-shaped ribbed leaves some eighteen inches long and three inches broad. The flowers are white, with stripes of red and yellow, and these are succeeded by long, slender pods, green at first, but becoming yellow as they ripen.

Before they are fully ripe, however, they are gathered and dried in the shade. The dried pods are steeped in oil or smeared with it and wrapped in oil cotton to prevent their opening. The vanilla of commerce is prepared from this dried and oiled pod. Thus we have an orchid, that is of great use to man, in addition to its extraordinary beauty.

Your baker depends on vanilla as you do in your home—depend on it, his products are good.

Better Fruit Committee Stresses Need For More Corn Storage Space

An extremely complete list of recommendations, combined with an exhaustive report of the steps taken last year to improve the quality of the tree fruit packout, was included in the report of the better fruits committee submitted by A. K. Loyd, chairman, to the BCFG convention this week. Necessity for more cold storage to handle the prospective big 1948 crop was stressed.

Included in the committee from Summerland were Dr. R. C. Palmer, E. Britton, Dr. D. V. Fisher, Dr. J. C. Wilcox and C. Eisey.

The committee agreed that a deterioration in quality of certain B.C. fruits might be caused by any or all of the following:

Cultural:
(a) Improper use of fertilizers, particularly excess of nitrogen.
(b) Insufficient sunlight because of insufficient spacing and pruning.

(c) Delayed harvesting and use of hormone-type sprays.
(d) Delay in hauling to packinghouses.

Packinghouses:
(e) Delays in unloading from growers trucks.
(f) Long holds on packing floors.
(g) Insufficient cold storage space and compressor capacity.

(h) Improper adjustment of wiper-rolls and cloths.
(i) Lack of supervision of packs and rough handling.
(j) Improper insulation of cold storages.

(k) Carelessness with respect to cold storage openings.
Transportation and Distributing Trades:
(l) Overheating in railway cars, warehouses and retail stores.
(m) Rough handling.

It was also agreed that the very small differential between the various grades and particularly between "A" and "B" had not provided sufficient incentive for growers to produce the better quality fruit. This situation was no doubt largely responsible for the rapid increase in percentage of "C" grade apples, at a time when, because of greatly increased purchasing power, our customers were looking almost exclusively for best quality fruit.

It was, also, only natural that growers, with a greater return for their products had made more generous applications of fertilizers, and this increase in the vigor of the trees had tended to delay the maturing of the fruit and because of the greater yield and heavier foliage, had resulted in a considerable increase of the percentage of uncolored fruit.

Shortage of labor, both on farms and in packinghouses resulted, in many instances to lack of supervision, carelessness, and rough handling.

Action Taken
Action taken by the committee was as follows:

(a) An educational program on cultural methods was instituted in the form of addresses given by members of the experimental station staff, horticulturists, field men and officials of the marketing organization.

(b) Fieldmen were asked to make sure that McIntosh, Jonathans and Delicious were hauled to the packinghouse within three days of picking.

(c) Packinghouses were urged to make use of any packing facilities or cold storage facilities available, and as a result of this considerable tonnage of McIntosh was moved from northern areas to southern packinghouses for packing and storage.

(d) Many packinghouses gave supervision to grader operation and to packing. A series of posters, prepared by B.C. Tree Fruits Ltd., showing the right and the wrong way of packing fruit, was displayed in packing rooms and assisted materially.

(e) A study was made by Dr. D. V. Fisher, of every cold storage plant in the Okanagan, including Kamloops, Salmon Arm and Keremeos. Weaknesses were pointed out and recommendations made for the correction. Where additional space appeared necessary strong recommendations were made for an early commencement of construction.

(f) Additional space for approximately 1,000,000 boxes was completed in time for the 1947 crop. Construction on some of this additional space had been commenced but no finished in 1946. Additional insulation and refrigeration was added by a number of storages and about ten new graders were received and set up to handle the 1947 crop.

(g) A recommendation was made to B.C. Tree Fruits Ltd. and inspection staff that the minimum pressure standard for commercial maturity McIntosh be raised. The standard is now 10 lbs.

Pooling Committee
(b) Two recommendations were made to the pooling committee as follows:

1. That a differential of 50c per box be established between Bartlett pears packed within 7 days of receipt and those not packed within 7 days. This was eventually set at 25 cents.

2. That a differential of 10c per box be established between McIntosh handled and packed within a specified time schedule and those not handled and packed within this time limit. The time schedule set was:

Delivery to packinghouse with-

in 3 days of picking.

Shipped or cold stored within three days of arrival, at packinghouse.

Packed within 30 days of the date of commencement of picking as set by the District Horticulturist in each area.

The committee has asked B.C. Tree Fruits Ltd. to discuss with the manager of each packinghouse individually, their performance or non-performance for 1947 based on the findings of inspectors at shipping point, and reports from destinations.

Dr. Fisher, with the co-operation of two packinghouses, has undertaken some tests with respect to packing and cold-storing of McIntosh. One examination has already been made and it is planned that another be made about the middle of January and possibly another in February.

Construction Program
The committee is of the unanimous opinion that both growers and packinghouses co-operated in a magnificent manner and that a great deal was accomplished in 1947 season.

There are, however, a number of growers who have refused to co-operate, and some packinghouses who have not yet made certain improvements or extensions to their packing of cold storage facilities which, in the opinion of the committee, are essential.

Meetings will be held with individual packinghouse managers and in district groups with a view to developing a definite program of construction immediately, sufficient to take care of the 1948 crop.

The educational program with respect to cultural practices must be continued and extended to other varieties.

The committee desires to impress on both growers and packinghouses that the committee's work is not confined to those varieties which received the bulk of attention during 1947, viz: McIntosh, Jonathans and Delicious. As soon as time will permit the committee will give consideration to recommendations for the improvement of quality on other varieties.

Air Cadets Are Thrilled By Ride

VERNON—Twenty-three members of the Royal Canadian Air Cadet Squadron No. 223, organized in the Vernon high school, had one of the big thrills of their young lives on Sunday afternoon, Jan. 11, when they enjoyed airplane flights over the district. The event, was financed by their sale of programs at the recent Vernon Rotary Ice Carnival. In groups of eight they climbed into the L. and M. Air Service Anson at the local airport and got a 15 minute air view of the countryside, of which Silver Star was the favorite and most photographed spot.

Industrial Boon In Kelowna Area

First stake for surveying purposes, leading to the million dollar CNR development in the industrial section of Kelowna, was driven into the ground Thursday morning at an impromptu ceremony attended by civic officials and two officials of the railway company. Development of the property will get underway immediately, and the city will be in a position to sell the land within the next two weeks after the ground has been staked out by the CNR survey party for trackage purposes.

Start on the development of the industrial section will mark another milestone in the growth of the city. After Alderman J. H. Horn revealed the CNR plans to expand its facilities here, it is understood numerous enquiries have been made with a view of acquiring land in the north end of the city.

At last city council meeting, Mayor W. E. Hughes-Games congratulated Mr. Horn on the progress made at the CNR conference held in Winnipeg.

Mr. Horn gave a detailed account of his mission, and thought it was possible for the CNR to complete the various spur tracks within the next few months. Potentially there are 150 acres available for industrial purposes, and it is understood that several Vancouver firms have shown keen interest in the expansion.

Sicamous Bridge Plans Approved

SALMON ARM—The provincial government has obtained approval of the proposed new bridge to be built at Sicamous on the Trans-Canada highway.

A. E. Ritchie, Coalition MLA for Salmon Arm riding, has been advised by Harry C. Anderson, chief engineer of the public works department, Victoria, that both the federal government and the CPR have approved the plans for the proposed structure and its location across the Sicamous Narrows.

PIPE CAUSES DRAINAGE

VERNON—Approximately \$100 damage to a bunk, bedding and clothing, was done when a fire broke out on Saturday night, Jan. 10, in a rooming house on Ellison street, owned by Lew Chock. The fire, biggest of three reported that day, apparently was started by ashes from a pipe. There was no other damage to the building.

CLARK IS HOT
George Clark was plenty hot on Monday night when he played with Penticton seniors against Oroville at Penticton in an international league contest. Penticton won the contest 51-49 and Clark contributed 20 points of the Penticton total. In the last four games, Clark has contributed 60 points for the southern team. Jack Walsh turned in a handy eight points for the winners on Monday.

Oliver Veteran Has Passed Away

OLIVER—One of Oliver's first settlers, Edgar Allan Macdonald, passed away during the early hours of Monday morning, January 12, after a long illness. He was 64

years of age. His death removes one of the most active members of the fruit-growing industry in Oliver district, and a man whose friends were numbered by the hundreds throughout the Okanagan Valley and elsewhere in the province.

TWO OVERTIME PERIODS BEFORE HOOP GAME ENDS

Two overtime periods were needed at Kelowna last Saturday night to decide a tightly-contested battle between Summerland Chiefs and Kelowna Legion Pioneers, two intermediate B hoop squads. Kelowna got the nod 28-26 in the dying moments of the second overtime canto.

Summerland Chiefs trailed through three quarters of the game but came to life in the final quarter to knot the count at 19-all. There was no score in the first overtime, with Denny Hack having a chance to win fame with a penalty shot and Marshall also missing two free throws.

Play opened up in the second overtime period, as the Chiefs tired

noticeably. Day, Ruppel and Dunham scored field baskets and Ruppel added a free throw, but three baskets by Marshall and another by Weddell, plus a free throw by Howarth proved the deciding factors.

Part of the Chiefs' team had already played a strenuous game at Oliver when three Summerland school cage squads scored victories over the Oliverites in the first round of the playoffs for the southern valley schools championships.

The Summerland school senior A girls team eked out a narrow 16-15 victory with Bev Fleming, Olive Mason, Evelyn Heichert and Joan Howard being the mainstays of the winners.

In the junior boys' contest, Don Cristante was the main reason for another narrow margin of victory for Summerland, 19-16.

The senior B boys game showed

HOCKEY PRACTICE SCHEDULE ISSUED

With the coming of freezing weather, the ice surface on the hockey rink in the Living Memorial park-playground has now been fashioned and hockey practices have been held for the past week. The new lighting system has been installed and is a great improvement over last year's fixtures, hockey enthusiasts state.

A schedule of practices has been worked out and is as follows:

Afternoons, 3 to 5 o'clock—Monday, high school; Tuesday, public school; Wednesday, public school; Thursday, seniors; Friday, high school; Saturday, public school.

Evenings, 7 to 9 o'clock—Monday high school; Tuesday, seniors; Wednesday, seniors; Thursday, seniors; Friday, high school; Saturday, hockey game.

Saturday morning will be devoted to public school practices and Sunday afternoons, from 2:30, will be for hockey games or practices.

John Graham is caretaker of the rink and the park-playground, working under the supervision of the Memorial Parks Committee subgroup, with Ernie Bennett as chairman.

a wider margin, Summerland taking the long end of a 25-15 decision. Jack Dunham, Keith McLean and Gil Jacobs were the best for the winners.

Soil Erosion

(Continued from Page 6)
yet know what the fundamental causes are, nor do we know how to cure the debilities. At a recent meeting of the plant nutrition committee, it was estimated that at least 2000 acres of orchard in the Okanagan Valley are now suffering from sicknesses of unknown cause. It is suspected that in most cases the cause is nutritional.

"I wish I could guarantee that we will attack these problems immediately and solve them all soon. Unfortunately, I cannot do so. The fact is that we are understaffed in our plant nutrition work. We are doing our best to obtain more help, and hope that by this time next year we will be able to report some progress in this regard.

Large Yields
"You will have gathered from this address that those of us working on plant nutritional problems have no cause for complacency. That is true. And neither have you growers any cause for complacency. On the whole, your yields and quality are good. In many cases, however, they can be improved.

"Collectively, you are not so keen on high yields. Individually, you need them! You are going to need them even more as competition on the market becomes keener. When I speak of high yields, of course, I refer only to high yields of high quality fruit.

"In conclusion, then, it is my belief that both growers and technical workers need to strive for both high yields and high quality. And I can assure you that those of us working in plant nutrition will continue to do our best toward this end."

ROBERT BIRCH SPEAKS ON BIBLE

Giving excerpts from the Bible with authenticated illustrations of findings of archaeologists and historians to substantiate prophecies and statements contained therein, Robert Birch proved an interesting speaker to the weekly supper meeting of the Rotary Club of Summerland at the Nu-Way annex last Friday evening.

Mr. Birch told of findings of archaeologists digging near the mouth of Tigris, which bore out the testimony of the Bible concerning the flood. He told of the prophecy of Ezekiel concerning the ancient city of Tyre and also related prophecies from the 38th Chapter, of Ezekiel and inferred that the possibility of a war between Russia and the Germanic people could be taken from these readings.

The speaker referred to Daniel's Colossus, with its head of gold, chest of silver, stomach of brass, legs of iron and the feet of clay and iron.

He likened these portions to the various empires with present world conditions depicting the feet of iron and clay; a world government that is divided, partly strong and partly broken, with no permanence.

President Stirling Goes To Ontario

After the BCFGA annual convention is concluded, President J. R. J. Stirling, who is also president of the E.C. Federation of Agriculture, leaves for Brookville, Ont., for the annual session of the Canadian Federation of Agriculture. A. H. Mercor, vice-president and directors Leslie Gilmore and Percy E. Froeh, of the B.C. Federation will accompany Mr. Stirling east.

Lake. An enquiry was held by Dr. N. J. Ball, coroner of Oliver. No explanation of how he came by his death was forthcoming.

LEGALS

NOTICE IS HEREBY GIVEN that the list of Voters of the Summerland and West Summerland Polling Division for the forthcoming plebiscite under the "Liquor Control Plebiscites Act" will close at 5:00 p.m., on the 23rd day of January, 1948, after which no name can be added to the list.

If you are eligible and your name is not on the voters' list, register now.

Registration forms are available at the office of Lorne Perry, Granville Street, West Summerland, B.C. and at White & Thornthwaite, Summerland, B.C.

E. ROSS OATMAN, Registrar of Voters, South Okanagan Electoral District, 231 Bernard Ave., Kelowna, B.C.

GIRL DISAPPEARS FROM HOME HERE

Kathleen Newton, aged 12, a ward of the social assistance branch, has been missing from her West Summerland home since Monday afternoon, when she did not report back to school. B. C. Police Constable T. Thorsteinson reported this morning.

The girl is five feet one inch tall and weighs approximately 105 pounds, has brown hair, brown eyes and was dressed in a navy blue dress with red dots covered by a green tweed overcoat, with a brown check. She wore brown loafers with ankle sox and had a red scarf over her hair.

HOOP GAMES TONIGHT

Tonight, two Oliver teams appear at the school gym for exhibition hoop games. The local inter-

mediate A squad is taking on a big responsibility when they tackle the Oliver seniors, while the B's will play their equals from Oliver in the preliminary contest.

SKIERS GETTING GOOD PRACTICE

Activity at the ski hill among members of the Summerland Ski Club has been pronounced for the past two weeks and beginners and more advanced pupils alike are receiving instruction from those who recently qualified as instructors at the Vernon ski school.

Fundamentals are being taught the beginners, such as walking, turning and "snow-plow" while the more advanced pupils are learning intricate turns and are improving their style.

Snow conditions are good on the local hill, ski enthusiasts report, and the new engine on the ski tow has greatly improved the operation. Great improvements to the hill in the removal of brush and trees have been made.

PASSES SUDDENLY

Gordon McDougald, a veteran of World War I and well-known rural route mail delivery man, died last night in the Penticton hospital. At present, funeral arrangements had not been concluded but it is expected that the funeral will be held on Sunday afternoon.

The Summerland Review

Vol. 2, No. 4 West Summerland, B.C., Thursday, January 29, 1948

Co-op Cannery Sale to Safeway Subsidiary Is Approved By Growers

Summerland Co-operative Growers Assn cannery will be sold to MacDonald's Consolidated, or the latter's nominee, a subsidiary of Safeway Stores Ltd., for \$130,647.75. Such was the decision of 88 per cent of the shipping shareholders of the Summerland Co-op at a large-ly attended meeting in the IOOF hall on Friday afternoon, January 23. Sale of the cannery will include the cannery building, property and equipment, the Jenkinson building acquired last year for the accommodation of cannery employees, the cannery cabins and one of the two houses adjoining the cabins.

It is stated that the new cannery owners, once the deal is completed, will scrap most of the present cannery equipment and install machinery and equipment of the most modern design. Such equipment now on order for this cannery is expected to cost the new cannery owners at least \$100,000.

In the course of the next few years, the cannery is expected to triple its production and will probably employ many more workers than at the present time.

Last year's cannery packout was 71,000 cases, based on 20-ounce tins, local officials state. Safeway Stores Ltd. intends to incorporate a new Canadian company to manage its Canadian canneries and has negotiations underway to acquire new plants in British Columbia and Alberta so that a steady source of canned goods will be available for its retail outlets at all times, reliable sources state.

In the voting last Friday, there were but 12 votes against the proposal, with one spoiled ballot, with 97 growers voting in favor of the sale. This decision was arrived at only after a great deal of discussion and many arguments advanced on both sides.

Packing Expansion

"We are primarily growers and packers of tree fruits, primary producers, and if we are going to make money from the industry it is from that end that we are best fitted to make it," declared Councillor Eric M. Tait, co-operative president in his opening remarks to the grower-members on Friday.

"We find that with considerable capital tied up in the cannery part of our enterprise we are at a serious handicap if we wish to expand our packing and cold storage facilities and expand we must do in the very near future if we are to handle properly our expanding tonnage.

"We have learned that we cannot truly call ourselves a co-operative cannery, canning our own growers' fruit because all our fruit is bought from Tree Fruits Ltd., and cannot be deemed our own, regardless of where it comes from.

"We could only set up a co-operative cannery and can our own fruit by breaking away from our three-party contract and renouncing our central selling agency. This would be ridiculous even to consider.

"Our strength is in our industry co-operation which we have today and our survival in this fruit industry depends on this co-operation. Tree Fruits Ltd. is in the strongest position to bargain for us in respect to prices for our fruit. We as growers doubling in the cannery business find ourselves at cross-purposes when we bargain for prices with Tree Fruits at the beginning of the season."

Keen Competition

Mr. Tait made a third point when he said:

"In entering the cannery business, we entered a highly-competitive field where everything which goes to producing the finished product takes the spending of considerable money. Whether we make a profit or suffer a loss is so dependent on market conditions and good management.

"We (the directors of the co-op) do not feel that you growers are equipped or prepared to risk your organization to the highly-competitive business field."

In dealing with the results to be obtained from the sale, President Tait remarked that the co-op growers had gained the advantages which most of the growers had in their minds when they originally agreed to go into the canning business.

"We have brought a new industry, with possibility of great expansion, to our community. And we have placed it in the hands of a company which has the retail outlet for all that they put into cans; and is in a position of being able really to do a job of merchandising your fruit once they put it in cans.

"You have obtained all this at no expense to yourselves, but with the gain of much valuable experience which should be of value to your organization in years to come."

The co-op cannery went into production in 1945 and made a small profit for the growers, after income tax reductions had been made, until this season. With the removal of ceilings on canned goods, the profit made from the cannery in the past season's operations is said to have increased by a considerable amount.

However, with a view to years ahead when the cannery trade would be highly competitive, the co-op growers decided to make the sale.

WANT BICYCLE RACK ON HASTINGS

Application for a bicycle rack on Hastings street, made by the Summerland Board of Trade, received favorable attention from the Summerland council on Tuesday, Reeve Reid Johnston stated he would interview Mr. W. D. Laidlaw to ascertain if such a rack could be established on his property, south of the L. A. Smith paint store and near the lane entrance.

Zoning Will Be Studied For District

Zoning in West Summerland may become an actuality in 1948, it was revealed at Tuesday's council session when Alf McLachlan, chairman of the board of trade zoning committee met the municipal fathers.

Mr. McLachlan explained that Summerland would benefit from a zoning bylaw which could operate, in conjunction with the building bylaw instituted in 1946.

He declared that the regional planning division of the B.C. government will send in an expert in zoning, make a survey of the needs of the community and draw up a tentative bylaw, if the council makes a formal request.

Mr. McLachlan read correspondence to this effect from G. Y. L. Cropper, Kelowna, district representative of the regional planning division.

It was decided by the council to make the formal application for governmental assistance in this matter. Mr. McLachlan warned that there are a great number of similar applications before the regional group and it may be some time before an official can come to Summerland.

Municipal Hall Under Review

Prospect that the building of the new municipal hall may take more rapid steps forward in the near future was suggested at Tuesday's council meeting when Councillor Eric Tait asked that a municipal hall committee be set up to continue with plans laid last year. Reeve Reid Johnston replied that he intended to take up this subject in committee at the first opportunity.

School Tax Rebate For Farmers Here

In line with its policy adopted last year to provide a form of relief from school taxation to owners of farm land in the unorganized sections of the province, the provincial government has now included farm lands within municipalities in this scheme.

As a result, owners of five acres or more of farm lands in Summerland will receive benefits of \$1,845.39 from 1947 tax payments made. This will mean that owners of farm lands will be granted anywhere from fifty cents to six dollars each, depending on the amount of school taxes they paid in 1947.

Summerland municipal council received this news on Tuesday in a communication from B. C. Braeowell, deputy minister of municipal affairs. The amount involved is based on five mills assessments.

The council was instructed that this grant to farm owners must be passed on in some form acceptable to the municipal affairs department.

It was agreed that the individual credits would be applied on the 1947 taxes paid, in the form of credits in 1948 taxes, except in the cases where property has since been sold, when the rebate will be paid by cheque to the former owner of the land.

OLD FOUNTAIN TO BE REMOVED

The old fountain in front of the new fish hatchery will be removed, and will have the blessing of a number of prominent citizens in lower town, provided the fish hatchery or the local sportsmen's club will install a modern drinking fountain and standpipe in its place, Reeve Reid Johnston told the council on Monday. He reported having interviewed a number of prominent citizens along the lakefront and they were agreeable to such a proposal, he stated.

Girl Is Found In Penticton Hotel

Due to publicity given in The Review columns last week interested persons were able to provide information to provincial police concerning the whereabouts of Kathleen Newton, aged 12, who disappeared from her home in West Summerland on Monday, Jan. 19. The girl was found on Friday, Jan. 23, at a hotel in Penticton where she had registered and booked a room. She is a social assistance ward and a new home is to be found for her.

Cocktails (Molotov?) for Two

A toast "to the future of the world" finds U.S. Secretary of State GENERAL GEORGE MARSHALL, left, and Soviet Foreign Minister VIACHESLAV MOLOTOV, raising their glasses after a luncheon given recently at the American Ambassador's residence in London. This friendly scene is a stark contrast to the recent stormy session of the Big Four Ministers when Molotov "demanded" settlement of the Soviet's \$10,000,000 reparations claim against Germany.

Council-Jim Dunsdon Dispute Nearer Solution

Municipal council members and Jim and Steve Dunsdon moved a step closer towards a conciliation of their differences concerning the cost of water for the Dunsdon property in Garnet Valley and the right of the municipality to cross the Dunsdon land to maintain the municipal flume.

This discussion, which has reached the threatening point on more than one occasion, has been continuing for some six months.

On Tuesday, Jim Dunsdon and his son, Steve, appeared before the council again.

"My lawyers say I can stop you from hauling through my property," declared Mr. Dunsdon Sr., introducing the controversial subject. He produced an old copy of The Summerland Review, in which Municipal Clerk F. J. Nixon was quoted as saying that the council has an agreement with the old Garnet Valley Land Co., giving the municipality the right-of-way over the Dunsdon property and the right to maintain the flume from time to time.

Mr. Dunsdon asked the council to produce this agreement, as his crown grant, which is in a safe deposit box, does not show any such condition.

Deplores Attitude

The elderly man further stated that he had had an agreement with the Garnet Valley company allowing him a share of water. This was cancelled by the government without any notification to him, he contended, and he called this a "dog in the manger" attitude. The municipality wanted full control of the water and he believed that some "dirty work" had been done years ago.

"The municipal flume washed out time after time and I never made any claim for damages," declared Mr. Dunsdon in declaring that he had tried to co-operate with the municipality over the years.

He then got down to the basic of the argument which was to the effect that he wished the municipality to supply him with water according to the amount used, not at a figure of \$13.50 per acre.

VLA Agreement

"My boy has to have water or the land before he can make an agreement with the V.L.A.," further declared Mr. Dunsdon, stating that Steve Dunsdon wishes to purchase this property and farm it under a deal with the V.L.A. The latter group would not consider financing the purchase unless water supply could be assured. It was stated that the Garnet Valley Land Co. agreed to supply me with water at \$2.50 per acre," he declared at another point, also stating that the municipal flume, running for a mile across his property, denies him access to a large portion of his land except at one point.

"If we cannot come to a settlement then I will have to stop you hauling through there," he reiterated.

"What is the number of irrigated acres needed for the V.L.A.?" queried Councillor Eric Tait.

"The V.L.A. wouldn't give any set number," replied Steve Dunsdon, who explained that above the flume there is about fifty acres and below about 8 to 10 acres.

Tribute To Late Jack West By Growers

The sudden death of Jack West, our advertising manager, was a severe loss to all of us," declared A. K. Loyd, Tree Fruits general manager, in his opening remarks before the BCFGA convention last week.

"His death is a severe loss not only to Tree Fruits but to the industry as a whole, for Jack was a remarkable person. It cannot be easily realized how he threw his heart and soul into advertising matters on your behalf.

"His was a remarkable personality, for he had a good humor, with lots of brains and ideas.

"The industry and the country as a whole is very much the poorer with his passing," concluded Mr. Loyd.

Hospital To Benefit By \$800 Grant

Announcement this week from Victoria that financial aid to B.C. hospitals will be granted by the B.C. government means an additional revenue of \$800 to the Summerland hospital for the period July 1 to December 31, 1947, Secretary J. E. O'Mahony reported to The Review yesterday.

This grant is based on thirty cents per patient day over that period, and is expected to assist materially the Summerland hospital in endeavoring to finance under the stress of rapidly-rising costs.

The B.C. government granted \$250,000 to cover these patient day increases and another \$300,000 as direct relief to hospitals which are in dire financial straits. Summerland will receive a portion of this added grant, based on its end of the year financial status, Mr. O'Mahony explains.

Mr. O'Mahony is second vice-president of the B.C. Hospitals Assn and was present at the coast last week when the hospitals group met representatives of the government. Several hospitals are in such dire financial straits that immediate grants must be forthcoming or they will close their doors, it was stated.

Plebiscite on Tuesday to Decide Veterans' Club Licence for Legion Arouses Keen Interest in District

Great interest is being evidenced throughout Summerland district in the forthcoming plebiscite for a veterans' club licence for Canadian Legion Branch No. 22, West Summerland. Voting will take place next Tuesday, Feb. 3 at the IOOF hall in West Summerland and in the basement of the Lakeside United church, lower town.

The local Canadian Legion branch has petitioned the Liquor Control Board for permission to operate a veterans' club licence in the West Summerland Legion hall, but according to the board rulings this question must be decided by a plebiscite to pass.

Legion members have been campaigning steadily for this plebiscite, while the "drys" have also been working diligently against the proposal. A meeting of the WCTU was held on Tuesday evening.

The voters' list for the Summerland and West Summerland polling divisions have been amended greatly in the past month and now stand at a registration of 1780 voters, an increase of 304 over the previous voters' list. A great number of changes have also been made.

Summerland Polling division now lists 403 registered voters while there are 1377 voters eligible to vote in West Summerland.

W. C. W. Fosbery is returning officer and controls the voting in both divisions.

When it was thought that only West Summerland polling division would be allowed to vote on this plebiscite a large number of vot-

ers transferred to West Summerland list from Summerland. When the correction was made these new registrations in West Summerland were not altered, in most instances, so that those who changed will have to come to West Summerland to vote.

The revised West Summerland list was brought down to 715 from 1015 before re-registration, commenced, so that there have been 662 names added to this list. Before revision, the Summerland list was 461, so that it has dropped from the number of voters who could have voted two years ago.

Mr. E. Ross Oatman, registrar of voters; Kelowna, informed The Review by telephone last night that his staff is working day and night to compile the new voters' lists and have them in readiness for this week-end.

Some confusion occurred last week when, in The Review advertising columns, a wrong date for the plebiscite voting was inserted. From the number of comments made to The Review staff regarding this error, we are certain that The Review advertising columns are very well perused and our readers are taking a keen interest in both the news and advertising columns.—Ed.

Street Lighting Program Now Up for Review

A complete outline of street lighting plans is now available, as compiled by Electrical Foreman T. P. Thornber in conjunction with himself, Councillor F. E. Atkinson, stated on Tuesday following a query from Reeve Reid A. Johnston.

This street lighting plan, which covers expenditures over a number of years, will be brought before the next council session and discussed by the council, it was stated.

Need for improvements to the street lighting system was stressed by Reeve Johnston, who declared: "Our main street is a disgrace as far as lighting is concerned."

His Worship also pointed to the Station road as another example of a territory which is badly in need of street lights from a pedestrian standpoint.

Also discussed briefly was the request made last year by the electrical department for a two-way radio communication between the switching station or telephone company and the electrical truck when it is out on jobs. Reeve Johnston stated that he had been informed there is a type of "howler set" available and Councillor Atkinson replied that he would investigate.

Previously, any sets recommended by electrical supply houses have been too expensive and complicated for the municipal use.

ELECTRIC BY-LAW TO BE REVISED

Revision of the electric light by-law can be expected this spring, with a possible revision of the basic costs of extensions to light service throughout the municipality, it was suggested at Tuesday's council session.

Due to the number of extensions installed last year, the electric light department showed a depletion of its reserve funds down to approximately \$9,000. This reserve had been built up to \$20,000 a short time ago.

The present level of \$110 allowance to applicants for extension of light service may be altered to a percentage basis of the cost for all applications, it was intimated.

Several other minor alterations and additions to the bylaw are mooted but no definite decision will be made until later in the year.

SEEK COSTS ON BLASTING POINTS IN GARNET VALLEY

Decision to ask the Interior Contracting Co. Ltd., of Penticton for a quotation on the drilling and blasting of six corners on the Garnet Valley road was made at the council session on Tuesday evening.

R. A. Barton, civil engineer at Penticton, will survey the work and give an estimate on the quantities of rock to be blasted and the amount of fills necessary for the improvement of this narrow road. It was pointed out that the road has been a source of trouble for many years and that the municipality has a right-of-way through the territory.

Hero of First World War Passes Away

Clarence Gordon McDougald, M.M., popular and highly-esteemed Summerland rural mail carrier for many years, passed away in the Penticton hospital suddenly on Wednesday, January 21, after a short illness.

A resident of this district for 27 years, the late Mr. McDougald was a veteran of World War I, serving with distinction and winning the Military Medal. For some time he was secretary of the Summerland branch of the Canadian Legion and worked diligently on behalf of his fellow veteran comrades.

He was a member of one of the Okanagan pioneer families for it was in 1895 that he, with his family moved from Brandon, Man., to Peachland. His mother, Mrs. Margaret E. McDougald, was a sister of the late J. M. Robinson, the founder of the fruit growing communities of Peachland, Summerland and Naramata.

Born in Woodlands municipality, Manitoba on September 16, 1892, Gordon McDougald lost his father, Archie McDougald, when he was two years of age. His mother then sold the farm and the family moved to Brandon where they resided prior to coming to the Okanagan.

Surviving are his wife, Mrs. Theresa Josephine McDougald, two sisters, Mrs. A. B. Marr, Vancouver and Miss Candace McDougald of Peachland; and two brothers, John M. McDougald of Summerland and Archie McDougald, postmaster at Peachland.

Rev. F. W. Haskins conducted the funeral service from the Summerland Baptist church on Sunday, January 25. A large number of Legion members paraded to the service and participated in Legion rites at the Beach Orchard cemetery interment, with Legion President A. Calvert officiating.

Among the pall-bearers were three members of the late Comrade McDougald's machine gun section which operated in France in 1914-18, H. Flisk, H. Whitaker and F. McLaren, the latter being a resident of Peachland. Other pall-bearers, all from Summerland were Ed Miller, T. F. Hickey and Dave Taylor.

Stirring stories of the late Gordon McDougald's bravery under shellfire and under extreme odds were told following his years of service overseas in World War I. When he was awarded the Military Medal, he was the lone surviving member of his machine gun post, and Mr. Flisk and one other soldier were the few survivors of the fighting post. Many came to the attention of the public in connection with the war and Mr. Whitaker also served with the military.

Kelowna Men Injured In Cycle Crash

Dick Roberts, aged 23, of 722 Bernard avenue, Kelowna, was removed on Monday from the Summerland hospital to his Kelowna home suffering from a fractured leg and bruises, the result of an accident on Okanagan highway, just south of the Antlers between Peachland and Summerland.

Mr. Roberts was riding a motorcycle with sidecar south to Summerland Sunday afternoon, and Bobby Merdin, also of Kelowna, was with him. The latter escaped with head cuts.

The motorcycle hit some loose rock on the side of the road, went out of control and struck a car travelling in the opposite direction. Taken to the Summerland hospital, Roberts was found to have his left leg broken, while Merdin required two stitches to close a wound in his head.

This accident occurred near the spot where Roy Pirelli, also of Kelowna, met his death in a motorcycle accident last September.

H. Lemke Again Leads CCF Club

The annual meeting of the Summerland CCF club was held on Jan. 21, at the home of Mr. and Mrs. T. J. Garnett, with Chairman H. Lemke presiding.

The election of officers gave the following results:

Chairman, H. Lemke; vice-chairman, H. Howard; secretary, F. Plunkett; treasurer, Mrs. L. Lemke; organizers, T. J. Garnett and F. R. Ganzeveld; executive, N. Dickensen.

Delegates to the South Okanagan district executive are T. J. Garnett, H. Lemke, F. R. Ganzeveld and F. Plunkett.

Premier Hopes To Improve Relations In School Taxation

In his first speech since his appointment as premier, Hon. Byron Johnston, at a nominating convention in the Saanich riding, announced that he had given consideration to the question of school

taxation and had already held a conference with the chairman of the special commission appointed to investigate the incidence of cost on land and improvements under the Cameron report proposals. The premier, during the course of his speech, announced that he was hopeful of receiving recommendations from the commission that would make it possible for the government to extend further relief at the forthcoming session of the legislature.

SUMMERLAND BRANCH NO. 22
CANADIAN LEGION, B.E.S.L.

Requests The Voters of

Summerland and West Summerland Polling Divisions

To Mark 'YES' Their Ballots

For the Plebiscite on the Granting of a Club Licence
For the Canadian Legion Premises in Summerland

VOTING DAY IS

Tues., Feb. 3

8 a.m. to 8 p.m. at the

I.O.O.F. HALL— WEST SUMMERLAND
BASEMENT LAKESIDE CHURCH — SUMMERLAND

ON JUNE 13, 1946 THE LATE SID THOMAS, THEN PRESIDENT OF THE LOCAL CANADIAN LEGION BRANCH HAD THIS TO SAY CONCERNING THE LEGION PETITION FOR A CLUB LICENCE IN AN OPEN LETTER TO THE SUMMERLAND REVIEW:

Editor, The Review:

When war's in the air, and when danger is nigh,
God and our Soldiers is all the cry;
But when war is over and wrongs have been righted,
God is forgotten and the soldier slighted.

I am reminded of this old barrack-room doggerel by the recent action of some members of our community, who forwarded a petition to the Liquor Control Board opposing a request for a Club Licence, made by the Summerland Branch of the Canadian Legion of the British Empire Service League.

Such action, following the fullsome and laudatory praise bestowed on our boys during the war being in a complete contradiction of their former attitude. Then, nothing was too good as a reward for their courage. "Were they not offering their lives that the stay-at-homes might dwell in peace and security? Members of a crusade, fighting for freedom and democracy, gallantly submitting to untold hardships that we might survive, facing a monstrous aggressor—heroes all, they were, and in pride and admiration for their sufferings, their privations and their valour, gratitude in no unstinted measure would be theirs upon returning."

Thus ran the promises, and what happened? A denial given to our first simple request, a betrayal of all the fine promises. The freedom for which they fought and for which many died, is upon their return, denied them. All those fervent protestations all the promises seen in the end to be but lip-service, so we fight again.

We did not want a licence to operate a beer parlor, as some think, all we require is a club licence for the use of our members exclusively; a club which we intend to operate will be conducive to moderation, a club where our members can sit in comfort, where they can talk over their experiences, their battles, their mutual friends contacted whilst on leave, and so consolidate that comradeship that only those who have served can understand.

I have tried to make our position in this matter clear, and in conclusion, I wish to state that it is our intention to circulate a petition to place before the Liquor Control Board, and I earnestly ask those people—friends of our returned men, to sign, giving their consent to our operating a club such as I have described.

SID THOMAS,

President, Branch No. 22, Canadian Legion, B.E.S.L.

SID OUR BELOVED LEADER, ASKED YOU TO SIGN OUR PETITION; THEN — WE ASK YOU TO VOTE "YES" NOW

Get Your Copy of the NEW FARM ACCOUNT BOOK

THE INCOME TAX OFFICE, Vancouver

If your Copy does not reach you in the mail during the next week.

You'll like this NEW Farm Account Book. It's so simple and direct. You don't have to be a bookkeeper to use it. A few minutes each week are enough to set down your farm transactions—the money you receive or the money you spend. At the end of the year, it will give you a clear picture of how you made or lost money.

Saves Money for You

Answers questions you want to know about Income Tax, too. Everyone with a taxable income must file an Income Tax Return on or before the 30th day of April in each year, showing his total income for the preceding year. The Farm Account Book enables you to take advantage of all the deductions and exemptions. Provides a record from which you can average your income over a three-year period. If you are liable to taxation under the Income Tax Act and have a year of loss, you will be

able to charge the loss against the profits of the previous year or the next three years as shown by the records you keep in your Farm Account Book. You won't need to pay an expert to prepare your Income Tax Return if you have this book. Each account is numbered to correspond with the items on the Income Tax Return. You will also find the Account Book useful in keeping your records, even though you are not liable under the Income Tax Act.

Get Your Free Book Now

Don't delay. The Income Tax Office, Vancouver, has an Account Book for you, if you do not receive one in the mail. It's important that you have it to start the new year. It's the benefit of all allowances that the law permits. Profit from the knowledge gained from keeping proper records. It's free—and you will find it most useful.

Fred Schumann Given Promotion

Fred W. Schumann, well-known Summerland representative of the Manufacturers' Life Insurance Co. and president of the Summerland Board of Trade has been appointed supervisor for his company for the Okanagan, an announcement from Vancouver this week states.

The company also announces the appointment of Mr. Alan Elsey, of Summerland, as Manufacturers' Life agent in Penticton and Mr. C. B. "Tim" Hill, as the company's agent in Vernon.

These two men are commencing their new duties in their territories within the next few days.

Council - Dunsdon
Continued from page 1

No Tree Planting
"We told the VLA that we were willing to allow you water below the flume," was Municipal Clerk F. J. Nixon's statement at this point.

Steve Dunsdon then explained that he had no intention of planting fruit trees, but will grow grain on the land, thus obviating the need for a normal supply of water to the property.

Water Foreman E. Kercher then explained to the council that the municipality could supply a limited quantity of water for pumping purposes above the ditch and could supply the necessary quantity for the acreage below.

Mr. Kercher reasoned that the municipality could supply the

PRO-REC ICE LOOP GAMES TO START SUNDAY

First of the Pro-Rec hockey league games between Rutland, Kelowna and Summerland will be held in Kelowna next Sunday afternoon, Jock Smith, local hockey mogul has announced.

Last Monday, Rutland Pro-Rec and Summerland played their first exhibition game, with the result that a wild and wooly scoring contest ensued, the score ending in an 11-all tie, Jock Smith having scored seven of the locals' goals.

On Saturday evening, two "15 and-under" teams from Summerland and Penticton cavorted on the local ice with a 15-13 win for Summerland being recorded. Blair MacRae scored 5 counters and Norman Holmes Jr., Fred Kato and Ron MacRae counting three each Keith Haskins counted the other tally.

This Saturday, Vernon is to see the biggest hockey tournament on record in the valley when seven high school sextets stage a major tournament. A large group from each centre participating will be in attendance to cheer on their respective teams. Summerland high school, practically en masse, is moving to Vernon for this affray.

COULDN'T FINISH ANNUAL MEETING

Members of the Fish and Game Association were so intent on Saturday night with discussion on resolutions which tend towards conservation of fish and game that they could not conclude their annual meeting. As a result the election of officers will be held next Monday evening.

Most of the Summerland resolutions found favor with the South Okanagan zone meeting of sportsmen's organizations, which was held in Penticton on Sunday. These recommendations will be forwarded to the interior convention of sportsmen, to be held in May.

Sports clubs from Kelowna south to Osoyoos and west to Keremeos were represented at the Sunday session. A full report on the resolutions passed will be given in next week's issue of The Review.

Dunsdons with a certain quantity of water and they could use it or any portion of their property they desired, and could be charged for the water used only, on the basis of \$13.50 per acre.

It was worked out by council members at a later time in the discussion that, using the basis of \$13.50 per acre for orchard land, the Dunsdons could be charged \$3.40 per acre foot of water used.

When the council reconvened after the dinner intermission on Tuesday it was decided that Reeve Reid Johnston should acquaint himself with the old agreement and correspondence in this case before any further action is taken.

However, the council members inferred that they would be willing to come to an agreement with the Dunsdons on the basis of \$3.40 per acre foot of water.

At one point, Jim Dunsdon declared he had been advised by Victoria to ask for storage water on Eneas creek and to build a storage dam for his purposes. If he could not come to a settlement with the municipality he would proceed with such an application, he declared.

"My mind is made up; I figure I haven't had a square deal," he reflected.

Mr. Dunsdon also pointed out that his son had saved the municipality serious loss last summer when a washout on the system commenced and Steve Dunsdon notified the ditchman of the occurrence.

Cold Shoulder For Trailer On Main Street

Last week, C. Bauer took out a trade's licence to operate a popcorn stand in the Credit Union building, he having rented the upstairs portion for living quarters and his small factory. To provide a retail outlet, Mr. Bauer blocked off the stairway to the upstairs rooms and installed a counter at the doorway.

Building Inspector Roy F. Angus informed Mr. Bauer on Friday that he was contravening fire regulations in blocking the stairway. This eliminated his retail outlet and as he could find no other place to set up a sales desk, he was out of business.

On Tuesday, Mr. Bauer appeared before the council and stated that he had been offered use of the Mel Monro lot on Granville street between the Linnea Style Shop and the John Hecker premises, for operation of a trailer.

This trailer would face the business street and could also be moved off the lot "to follow the crowd" to the beaches and sports attractions in the district. He wished to know if the council had any objection to this move and if he could be supplied with electricity.

Mr. Bauer was informed that no electricity could be supplied and he then suggested that he might install gas for refrigeration and cooking purposes.

Mr. Bauer also stated that he had been offered a five-foot space between the Nu-Way and the Overwaitea Ltd. building but the council stated at once that this would not do, as that space had been left for fire protection purposes.

In consequent discussion, Councillor C. E. Bentley declared himself against a trailer being allowed on the main streets, as it would give the town a "shacktown" appearance. He believed it would be a step backwards.

Councillor Harvey Wilson, on the other hand, liked the idea of a trailer being located in the district which could provide refreshments at the beaches and at sports games.

Reeve Johnston declared that a trailer on the main street did not appeal to him, but he liked the plan of facilities at spots where crowds gather. Councillor Atkinson declared that he would be in favor of the plan if Mr. Bauer could find himself a permanent place of business. Councillor Tait also frowned on the trailer being located on a main street business block in competition with those who had installed permanent places of business.

As a consequence of this discussion, it was first of all agreed that the council refund Mr. Bauer his trades licence money in connection with his first attempt to start a business in the Credit Union building.

Then, on the motion of Councillors Tait and Bentley, the council agreed to write Mr. Bauer to the effect that the council is not in favor of using Granville or Hastings street properties for a trailer store.

Councillor Wilson asked to have his negative vote recorded on this motion. It was pointed out that a unanimous vote of the council is necessary to turn down an application for trades licence.

DIVIDE BASKET CONTESTS WITH OLIVER TEAMS

Oliver and Summerland divided cage contests at the local school gym last Thursday evening, when the Oliver seniors, who recently trimmed Penticton, defeated a bolstered intermediate A squad from Summerland 30-21, while the local Chiefs, intermediate B team, conquered the visiting Cantaloupers 27-15.

First half of the B game showed little scoring, with Summerland having an edge, 8 to 4. Play opened up somewhat in the final two quarters but the local lads had a definite edge throughout the play and the decision was never in doubt.

Jacobs and Wally Day were the main offensive artists for the winners, while McCrae was tops for the visitors.

Boostered by George Clark and Jackie Walsh, who are playing with Penticton seniors this season, the local intermediate A team put up a good fight but could not quite overcome the southern seniors.

First quarter was dead even with six points apiece, but Oliver went out in front to lead 15-8 by the half-way mark. Again in the third quarter Oliver outscored the locals, with Summerland making a determined drive in the final can to but were unable to close the big gap.

Clark and Walsh scored more than half the Summerland points, while McLeod and Gibb were the mainstays of the visitors.

Hilly Smith handled both games, being assisted by Moore and Hack in the B contest and by McCrae of Oliver in the senior game.

Teams were as follows: Oliver Int. B—McCrae 8, Eisenhart 2, Shippett, Penner, McConnachie 3, Toyar 2, Porteous, Zilmer, Meagher, Egerton—15.

Summerland Chiefs—Day 8, Jacobs 10, Hack 6, Turnbull, Kita 1, Kato, Ruppel, McLean, 2, Elliott, Jomori—27.

Oliver seniors—McLeod 10, McIvor, Breen, Becker 5, Gibb 8, Elliott, Rossiter 4, Torngmore, Coy Fawley 3—30.

Summerland: Vanderburgh, Walsh 5, Clark 7, Moore 3, Dunsdale, Nesbitt, Guidi, Rand, Hack 4, Scriver 2—21.

LIGHT FOR POUND

Electric light will be extended by the municipality to its pound in Prairie Valley, it was decided on Tuesday at the evening council session. This extension will mean that L. H. Eyre will receive a rebate of approximately \$74 on the extension of the electric line to his property completed last month.

A grant of \$25 for 1948 was made to the Canadian Institute for the Blind by the Summerland council on Tuesday.

JOCK SMITH COACHING

Jock Smith, local high school teacher and a member of the Vancouver Canucks hockey squad, took over a coaching job for the Kelowna seniors at Vernon on Tuesday. The Kelowna squad was defeated 11-5 by Kamloops. An interested spectator at the Vernon affair was Paul Thompson, national hockey league star of other years.

Sprinkler irrigation application of Roger Tingley, Garnett Valley was approved by the council on Tuesday.

DAILY PGE RUNS

During the course of his address given in the Cariboo riding, Premier Byron Johnson announced that the PGE will inaugurate, sometime in May, a daily passenger

service. This has been made possible by the acquisition of new equipment including four new locomotives. At the present time, the passenger service is on the basis of three passenger trips a week.

Dr. Maurice Welsh Warns Growers of Menace to Soft Fruit From Virus Diseases

"We are most anxious to alert you to the fresh menace which virus diseases are presenting to stone fruit growing in all the Pacific Coast states and B.C., to acquaint you with the complexity of the problem, with the way plant pathologists and entomologists are mobilizing to meet the menace, and with how you may assist in measures to guard our plantings," declared Dr. Maurice F. Welsh, Summerland, representative of the Dominion Laboratory of Plant Pathology, located at Summerland, in an address to the BCFGA convention in Penticton last week.

Dr. Welsh's address was one of the highlights of the convention and was felt to be a strong warning to growers that they must cooperate with the "insect hunters" if the growth of virus diseases is to be stopped.

Two Main Diseases

"All of you are aware now of the menace of Little Cherry, and growers in the South Okanagan are well acquainted with Western X-disease of peaches. These belong to the group of virus diseases we fear most at the moment.

"A virus is an invisible entity which can remain alive only in the sap of a living tree, and can be transmitted only by grafting and budding, or in some instances by very specific insect carriers, acting as the mosquito does in spreading malaria.

"Once a virus disease invades a tree we know no way of get-

ting it out—that is important to remember. There may be symptom fluctuations from year to year, but the virus remains as long as the tree lives. Lastly, the seriousness of a virus disease depends on the rate of spread of the virus.

"Thus the importance of Little Cherry is not so much in the nature of its symptoms—we have several other virus diseases in the Okanagan and Kootenays right now which do as much damage to the fruits, and more damage to the trees, but the rate of spread of these others is negligible and, therefore, they appear to offer no threat to the industry.

Arrested Ripening

"Little Cherry is not the only virus disease of its type on the Pacific coast. We are threatened by a group of virus diseases which include among their symptoms an arrested fruit ripening. These have appeared since about 1930; their exact number still is uncertain, and their relationships still largely undetermined."

"California had the first group of cherry diseases and then came the Little Cherry in the Kootenays of B.C. Next, in Southern Oregon appeared a disease named Albino Cherry and six years ago another disease turned up in Oregon and has been dubbed the Wasco County Little Cherry. Pink Fruit became serious in our cherries in Washington state and now other small cherry symptoms are appearing in all the Washington cherry growing areas.

"This growth of diseases to points just south of the Okanagan

might appear serious, but it is not as bad as it sounds, declared Dr. Welsh.

Spread Is Slow

"In 1940, Mr. Lott, of the Summerland plant pathology staff, began to encounter a small cherry condition of the Oliver-Osoyoos districts which has been given the name of Small Bitter Cherry—the symptoms varied from Little Cherry.

"Little or no spread has been occurring. Cases are known where the disease has remained in a single branch without spreading through the rest of the tree. It is possible that Small Bitter Cherry is not a virus disease but a bud-sport. Even if it is a virus disease its rate of spread is so slow under Okanagan conditions that it has no economic significance."

Dr. Welsh described various forms of virus diseases as they are now being indicated and the puzzle which they cause. He then swung into a discussion on Western X, a virus disease which had appeared in Oliver-Osoyoos and is prevalent throughout California, Utah, Colorado to the Canadian Okanagan as far as Okanagan Falls.

The speaker dealt with the variations of results when virus diseases in cherries are ranged with virus diseases in peaches in the many fruit-growing areas of the Pacific Coast region. The enormity of the problem and the complications which result were given in detail, and he expressed the hope that growers would be patient with us in our efforts to unravel the problem."

Slides Are Shown

Slides illustrating some of the similarities and variations of the virus diseases were shown the growers by Dr. Welsh. However, these are not the only virus diseases as by 1924 there were 41 such diseases of stone fruits reported west of the Rockies and this total has been boosted considerably since then.

"In the interior of B.C. alone we have found at least 13 in stone fruits—peach, cherry, apricot and prune—as well as one in pear and one in apple. Fortunately, the bulk of these other viruses have a negligible rate of spread and therefore are of no importance.

"Only Western X in peach, Little Cherry and Lambert Mottle in

Bert Stent Talks On Hiking Trips

Giving his listeners a few brief highlights of hiking parties undertaken by he and his wife, H. V. "Bert" Stent was guest speaker at the Rotary Club of Summerland weekly supper meeting last Friday at the Nu-Way Annex. He told some highlights of side trips which they had taken in eastern Canada and then dealt at great length with a hike to Forbidden Plateau on Vancouver Island, which he described as one of the most beautiful spots he had ever visited.

SCOUT NEWS

The Summerland troop of Boy Scouts is compiling a history of Scouting in this district back to the time of the first Scoutmaster, Mr. John Tait. Any former Scouts, or parents or relatives of Scouts, who have any snapshots of the troop in earlier days could make a welcome contribution to this project by giving same to Scoutmasters Blawett, Barkwill or Fisher. Such snapshots will go into the Troop scrapbook.

At Friday's meeting the following boys completed their Tenderfoot tests: Scriver, Stevens and Eyre. Parents of Scouts are particularly asked to see that their boys get uniforms as soon as possible. A catalogue of uniform supplies may be obtained from Secretary Don Blacklock.

The scarf must be lemon and brown; shirt khaki, and shorts blue.

A church parade will be held on February 1, the beginning of Scout Week and we would like to see everybody properly uniformed. Parents are also reminded to try to get their boys to meetings sharp at 7:00 p.m. as lateness disorganizes the program. Patrol standings are now: Buffaloes 258, Beavers 203, Hawks 470, and Eagles 571.

Notice—Meeting Friday Jan. 30 7 p.m., school gym. Duty patrol, Eagles. All boys who have staves at home must bring them to next meeting. Duty patrol will bring the staves from Legion hall.

cherry and Stoney Pit in Bosc pears, so far have shown a rate of spread which merits worry," he declared.

Dr. Welsh then outlined the steps being taken in various states below the line and in B.C. to combat the spread of virus disease and gave a complete analysis of the intricacies of the research being made.

Tree Miseries

He remarked that no certification has been implemented in tree nurseries so far as virus diseases are concerned. Plant breeders at the experimental station are making every effort to ensure that all material they distribute is virus-free.

"To help them protect their material, the plant pathology laboratory in 1946 terminated all virus experiments being carried on and destroyed all its test material. The work will be recommenced when the new testing station on the Penticton road (halfway between Summerland and Penticton) is ready for use. We hope that will be this year.

"As virus troubles become more numerous, and particularly until the new nursery certification scheme have been fully implemented, an increasing number of restrictions can be expected on movements of nursery stock.

"There is no doubt that virus diseases are a very grave new factor in our stone fruit growing and that now and then in the future we may temporarily lose a valuable portion of our industry from the depredations of a virus disease.

Growers Can Help
"On the other hand, there is certainly no need for panic. Even with the limited knowledge of viruses scientists have had to date, it has been possible to learn to live with most virus diseases which have threatened other fruit areas and other crops.

"There are several ways in which you as growers can help us. First there is the matter of procuring the healthiest possible nursery stock. Secondly, we shall appreciate it greatly if you will report new suspicious disease conditions you encounter in your orchards, particularly when spread is evident.

"Finally, if you find yourselves involved in tree eradication programs, please remember that your willing co-operation may be a very important factor in helping to save an industry," he concluded.

REAL ESTATE INSURANCE

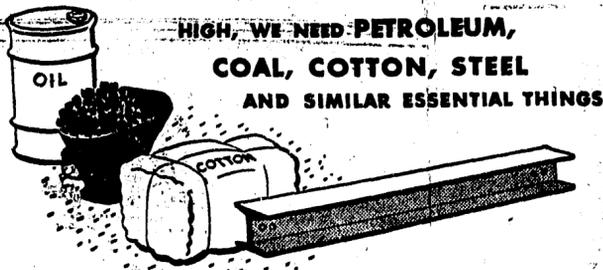

THIS IS AN EMERGENCY ...let's treat it as such!

CANADA is heavily "in the red" in present trading with the U.S. dollar area. In our total trade with the world we are in a good position but not in that part which is done with U.S. dollar countries. Other countries with whom we do business cannot pay us in full, either in cash or in goods, for the things they buy from us.

This situation is made more serious than ever before because so many countries, our regular customers, have not recovered from the war. It may be some time yet before they get on their feet sufficiently to help put things right. Meantime, we must find ways and means of balancing our own books and reducing our U.S. dollar deficit.

There are two things we can do at the moment... cut down unnecessary purchases from the U.S. dollar area and increase our production of goods that can be sold to those countries to balance accounts. It's an emergency and should be treated as such.

TO KEEP OUR INDUSTRIES HUMMING...OUR LIVING STANDARD

WE CAN PAY FOR THESE THINGS IF WE CURTAIL OUR SPENDING ON IMPORTED NON-ESSENTIALS OR TRIMMINGS... AT LEAST FOR AWHILE

YOU AS A CANADIAN CAN HELP

1. Do not order goods by mail from other countries... do not buy goods to bring home when you travel outside Canada. See also item 2.
2. If you feel some purchase is absolutely essential, see your Collector of Customs and Excise beforehand, to learn whether the item is prohibited.
3. Look for alternatives or substitutes for the items which are temporarily prohibited.
4. If certain goods seem to be in short supply, do not overlook the possibility that it is seasonal, or merely a local condition, or perhaps brought about by entirely unnecessary buying.
5. Be sure to obtain the Tariff Item Number from your Collector of Customs and Excise before pursuing any inquiry. Quote this number in all correspondence.
6. IF WE TACKLE THIS PROBLEM IN THE SAME SPIRIT OF CO-OPERATION DEMONSTRATED DURING THE WAR YEARS IT CAN BE SOLVED, WITH LONG-TERM BENEFIT TO EVERY CANADIAN.

Enlarging of Fire District Over Whole Municipality Suggested

Possibility that the entire municipality may become one fire district under the direct control of the municipal council was mooted at last week's council meeting and again on Wednesday, January 14 when the annual meeting of the West Summerland Fire Protection Society was held in the IOOF hall.

No definite commitments have been made but civic leaders interested in better fire protection have intimated that such a formula may be worked out this year, providing the West Summerland fire district would be willing to go into voluntary liquidation.

Mr. Ed Gould, fire chief, visited the council session last week and urged the latter body to consider seriously the purchasing of a truck for fire protection purposes to provide the brigade with facilities to get their equipment to fires more speedily and also to provide a conveyance for further equipment which could be added to the present facilities.

It is useless to purchase more needed equipment for fire protection without a proper conveyance, he declared.

Summerland council has declared that it cannot announce any policy in respect to fire equipment purchase until the estimates for 1948 are prepared. These estimates should be ready near the end of March, it is stated.

Last year, the council allocated an expenditure for a fire truck but was forced to spend this money in other channels.

Only thirteen persons, some residents outside the district, were all that attended the annual meeting of the fire protection district, presided over by President J. R. Campbell.

This small gathering heard that expenditures amounted to \$1,372.75 last year, against revenues of \$1,088.50, as some hose ordered in 1946 was not delivered until last year. A balance of \$132.10 remains in the district's coffers.

Receipts from the 1947 tax levy amounted to \$978.50, and the municipality paid the district \$110 for fire calls outside the district.

New equipment purchased last year was valued at \$735.65, brigade members received a remuneration of \$279, administration costs were

\$260.10 and rental of hydrants cost \$80. Brigade members received \$65 for practices, \$104 for fires inside the district and \$110 for fires outside the district.

President Campbell explained to the meeting that there is a new deal with the council now, that the brigade is to be paid directly by the council for outside fires and this money will not go through the district's books.

Brigade members are covered by an insurance policy for fires anywhere in the district but they cannot have their cars insured unless they are the property of the fire protection society.

Not District Problem
Speaking on proposals which have been made to take in the whole municipality, Mr. Campbell declared that this question is up to the people in the outside area or the council to decide, not the West Summerland society.

"Fire Chief Ed Gould is anxious to get more equipment. This committee is not pushing it, but if the council cannot finance more equipment, we will try to add to the present facilities, for the West Summerland district only," declared Mr. Campbell.

Councillor Bentley sought the feeling of the meeting on the question of the whole municipality being covered by one fire protection proposal and Mr. Campbell replied that he believed the West Summerland district would be quite prepared to fall in line.

But Mr. Campbell stressed that the council should prepare its policy soon and let the district know what to expect in the coming year. Because of lack of knowledge of council's probable commitments for this year it was impossible to set a budget, but the meeting gave the committee authority to expend up to two mills during 1947.

Two retiring directors, V. M. Lockwood and W. J. Beattie were re-elected by acclamation for two year terms.

Suggestion that another fire hydrant be placed on the Station road to take in twenty-five to thirty new houses was made to the meeting and Mr. Campbell declared that there are two other districts likely to ask for admission to the district if the council does not decide to take in the entire municipality.

Local Entries Well Up in Bowl Loop

Summerland's entries in the Okanagan bowling league have begun the season with some fine scores against Vernon. On Sunday, January 18, Summerland No. 2 teams entertained Vernon No. 2 here and swept the boards with four points each. At Vernon last Sunday, Summerland's No. 2 won three points and lost one, in both cases.

Summerland's No. 1 teams went to Vernon on Sunday, January 18 with the men's team dividing honors two each and the Summerland No. 1 women's team winning three points to Vernon's one. Here last Sunday, the men's teams again split the honors, with the Vernon women taking three points to Summerland's one.

Chautauqua To Be Here Thursday

Outstanding speakers from the provincial and dominion departments of agriculture are scheduled to address the annual growers' Chautauqua in the Legion hall next Thursday, February 5, both afternoon and evening. This gathering is growing in popularity and is expected to draw a large attendance from among the primary producers of this section.

Also in February will be a series of pruning demonstrations which will be held at various growers' orchards.

Gordon Beggs New President Of St. John

Gordon J. Beggs, an active member for many years, was elected as chairman of the St. John Ambulance Assn, Summerland centre, replacing Alan Calvert who has held this post for the past three years, when the annual meeting of the association was held on Wednesday, January 21, in the Parish hall.

Honorary chairman is Magistrate Hugh Sharman and vice-chairman is Mrs. J. E. O'Mahony. Miss Louise Atkinson was re-elected secretary-treasurer and the executive consists of Mrs. J. Muirhead, A. Calvert, J. Brown and H. Simpson.

In his annual report, Chairman Calvert declared that in the early part of last year first aid classes were held, with Dr. W. H. E. Munn, Mrs. O'Mahony and A. Yeats as instructors. Dr. A. W. Vanderburgh examined all candidates of this course, five qualifying for certificates, one for voucher, one for medalion and three for labels. Six also qualified for the industrial first aid certificates.

"This was a very gratifying result and speaks volumes for the efficiency of the instructors," he stated.

These awards were presented at a special meeting, by Dr. Munn and Dr. Vanderburgh. At this meeting Dr. F. W. Andrew was presented with a life membership certificate by Chairman Calvert, who states that "this was a well merited honor for Dr. Andrew who has taken a long and lively interest in the work."

In May, a class for junior first aid was conducted at the elementary school with H. V. Stent as instructor. This class was examined by Dr. Andrew and twenty-two boys qualified. An exhibit with first aiders in attendance formed part of the board of trade Spring Fair.

Last February and March a national campaign for funds was launched, the local committee being headed by Mrs. O'Mahony, with H. E. Woodford as treasurer. Contributions amounted to \$370.77, which was considered a creditable showing for this community.

Looking to the future, Mr. Calvert hoped that a home nursing class as well as first aid classes will be possible.

The retiring chairman spoke highly of the valuable assistance given the association by Mr. Beggs, and expressed his thanks to other who had given a great deal of assistance to the association projects.

WILL NOT SELL LOTS

Application of L. J. Wignall to purchase lots south of the Lakeside Inn or exchange them for others he holds was refused by the council on Tuesday when Reeve Johnston stated that this property is under a type of option. However, council granted Mr. Wignall permission to place a septic tank on the municipal lot immediately north of his place of business.

Mrs. W. C. Wilkin Re-elected Head Of Baptist Group

The annual meeting of the Evening Auxiliary of the Baptist church was held on Monday evening, January 19, at the home of Mrs. Robt. Birch. Reports for the year were given by the secretary treasurer, and flower fund convener. Receipts for the year were over \$200, which showed a considerable increase over the previous year.

The amount of the missionary budget was met and money gifts were made to several out-going missionaries and young people's workers, as well as gifts supplied to the church through the auxiliary and its members.

During the year, ten meetings were held including a supper meeting at which the auxiliary entertained the Pentiction group, and a luncheon at which the Mission Circle and members of the Pentiction Mission Circle were guests. Several interesting speakers were heard at the various meetings, including Mrs. Harold McLarty and Rev. F. W. Haskins.

In the election of officers, Mrs. W. C. Wilkin was re-elected president. Other officers are: vice-president, Mrs. Roy Henderson; secretary, Mrs. Harry Brown; treasurer, Mrs. E. Richmond; current events reporter, Mrs. Lorn Perry; flower and visiting committee, Mrs. W. Sherwood and Mrs. Clare Elsey; pianists, Miss Ruth Dale and Mrs. T. Racicot.

The devotional for the evening was taken by Mrs. Birch. At the conclusion of the meeting refreshments were served by the hostesses, Mrs. Birch and Mrs. Nick Buddingh.

Mrs. F. W. Haskins Heads Mission Circle Of Baptist Church

On Tuesday afternoon, January 20, the annual meeting of the Mission Circle of the Summerland Baptist church was held in the church parlor.

Excellent reports were given of the year's work by the secretary and treasurer, and the following officers were re-elected: President, Mrs. F. W. Haskins; vice-president, Mrs. Geo. Perry; treasurer, Mrs. J. H. Bowering; pianists, Mrs. D. L. Milne and Mrs. J. Ritchie. Mrs. Coulter White was elected as secretary.

Mrs. W. C. Wilkin gave the devotional topic on "Patience." Mrs. M. Haskins gave a number of interesting current event items. At the conclusion of the meeting, members were asked to view the large number of White Cross articles on display including bed spreads, sheets, tray cloths, knitted caps and scarves, etc. These are to be sent to Vancouver and taken by Miss Anne C. Munro to India when she returns there shortly, after a furlough spent in Canada.

Kelowna Nuptials Of Interest Here

The marriage was solemnized at the First United church, Kelowna, on Saturday evening, January 24, at 7:30 p.m., of Ruth Barbara Smith, of Summerland, and Mr. C. B. "Tim" Hill, former Summerland business man, and second son of Mr. and Mrs. C. A. Hill, Kelowna. Mr. and Mrs. Robert Parfitt, of Kelowna, were the young couple's attendants. Rev. Dr. W. M. Lee officiated.

Following the wedding, a reception was held at the home of Mr. and Mrs. Parfitt, with some twenty friends attending. Mr. and Mrs. Hill will make their home in Vernon, where Mr. Hill has recently been appointed agent of the Manufacturers' Life Insurance Co.

JUNIOR SCHOOL HOOP TEAMS LOSE

Two Summerland junior basketball squads lost at Pentiction on Monday afternoon the junior boys taking the short end of a 24-11 count and the girls, all beginners losing out 10 to 7. Don Cristante and Ron MacRae starred for the Summerland boys and Ruth Fleming and Joyce Smith were tops for the girls.

Socially Speaking

A weekend visitor to Pentiction was Angus Whitmore, who visited his cousins Peter and John Gordon.

Mrs. J. E. Charles paid a visit to Vancouver early this month to visit her father, Mr. C. A. Walter, who is a patient at Vancouver General hospital. Mrs. Charles found Mr. Walter's condition unchanged.

Mrs. Alan McCarger and her brother Mr. Gordon Pohlmann spent the past weekend in Vernon, visiting friends.

Friends of Mrs. Ben Mayne are glad to know she has returned home from her recent sojourn in the hospital.

A daughter was born to Mr. and Mrs. J. W. Bennison on Thursday, January 22 at the Summerland hospital.

Judge W. C. Kelley is at present a patient in the Summerland hospital.

Dr. and Mrs. James Marshall's daughter, Margaret was hostess to five small friends at a supper party in honor of her ninth birthday. Her guests were Margaret Lott, Eileen Wilcox, Nona Lewis and Anne and Cecily Givins.

Mr. and Mrs. Len Hill have returned from their buying trip to Vancouver.

Mr. J. E. Woolliams of the Plant Pathology laboratory returned on Monday, January 26 from a week's visit to Vancouver. While there he attended the annual meeting of the B.C. Agronomist's Association, taking part in conferences dealing with the control of pests and diseases of field crops and vegetables.

Singers and Players club reports an enthusiastic attendance at rehearsals for the Gilbert & Sullivan opera, "Pinafore". The club is making great plans for this production, which they hope to have ready for presentation early in the spring.

Miss Beverley Gayton, daughter of Mr. and Mrs. C. A. Gayton, has joined the staff of the Bank of Montreal in West Summerland.

Several Summerland hostesses are entertaining on Friday evening prior to the O.E.S. dance to be held in Ellison hall on that date. Mrs. Les Rumball has asked Mr. and Mrs. Art Dunsdon, Mr. and Mrs. Jack Dunsdon, Mr. and Mrs. Mel Ducommun, Mr. and Mrs. Jack Dickson, Mr. and Mrs. George Dunsdon, Mr. and Mrs. Allan Butler and Mr. Phil Dunsdon and Mrs. George Forster to meet at her home while Mrs. George Washington has invited to foregather at her home Mr. and Mrs. Charles Bleasdale, Mr. and Mrs. Harvey Wilson, Mr. and Mrs. Joe McLachlan, Mr. and Mrs. Leslie Gould, Mr. and Mrs. Francis Stewart, Mr. and Mrs. Fred Dunsdon, Mr. and Mrs. Earl Wilson, and Mr. and Mrs. Tom Washington. Mrs. F. E. Atkinson is making up a party including Mr. and Mrs. J. Muirhead, Mr. and Mrs. Warren Givins, Mr. and Mrs. N. O. Solly, Mrs. Madge LeRoy and Mr. J. R. Armstrong.

Miss Frances Atkinson was a junior hostess at the home of her parents, on January 22, when she entertained a number of friends in honor of her 11th birthday. Those invited were Ann Solly, Jean Johnson, Shirley Clarke, Jean Iyayoshi, Lovette Trofimenkoff, Kathleen Yamaba, Patsy Dunham, Donn Eden, Leona Littau, Valentin Trofimenkoff and Lauriel Young husband.

WANTS PUMPS REMOVED
D. L. Sanborn is being requested to appear before the next council session, where he will be asked what steps he intends to take towards moving his gasoline pumps off the street allowance, as agreed upon two years ago, according to council files.

DISCUSS NEEDED PATHWAY
Summerland council, on Tuesday afternoon, discussed briefly the proposal to install a pathway from the Harry Brown corner down through the Living Memorial park-playground, to take pedestrians off the narrow and dangerous hill. Councillor Bentley suggested a pathway paralleling the road but built farther down the slope. No action was taken.

Snarks

Says

"THE BIRTH OF RADIO"

Radio is the culmination of more than one hundred years of experimental findings among creative men throughout the world. From such small beginnings as the discovery of electrical sparks and mysterious electrical effects, radio has become one of the most valuable mediums of the scientific world, though it has taken many years.

The driving forces of radio — electromagnetic waves, electrons, wave lengths and sound itself, have been elusive, unseen and enigmatic to the scientific mind for centuries.

In 1867 Maxwell calculated the existence of an all-pervading medium, ether, through which light, heat and electric waves travelled. Hertz produced electric waves and demonstrated that they could leap across a room, thereby proving Maxwell's mathematics. Next, Branly invented the coherer to detect these invisible elements. Marconi linked all three together to give to the world its first wireless.

CORPORATION OF SUMMERLAND - FINANCIAL STATEMENT, 1947

AUDITORS' REPORT

Kelowna, B.C.
January 19th, 1948

To the Reeve and Councillors,
The Corporation of the District of Summerland,
West Summerland, B.C.

We have made a continuous audit of the books and records of the Corporation for the twelve months ended December 31st, 1947.

We present herewith, prepared and certified to by us, and signed by the Treasurer, the following statements:

- "A" Balance Sheet.
- "A1" Schedule of Fixed Assets.
- "B" Statement of Receipts and Disbursements.
- "C" Statement of General Revenue and Expenditure.
- "D" Operating Statement—Public Utilities.
- "E" Schedule of Bonded Indebtedness.

ASSETS

Cash on hand and in bank: All cash receipts were checked periodically during the year and the cash was verified by actual count at the time of the final audit for the year under review.

All bank balances were reconciled with the records periodically during the year and also at the time of the final audit for the year under review. Bank balances as at December 31st, 1947, were further verified by letter obtained by us from the Bank.

Tax Arrears—\$3,199.51; Rates—\$2,063.00: These accounts are as disclosed by the Treasurer's records. The collector's records were in agreement with the Treasurer's records in respect to all Taxes and Rates. We checked the postings of all receipts of Taxes and Rates to the Collector's Rolls for the year under review.

The postings of Electric Light Rates receipts to the Electric Light Rates Ledger were not checked by us. Outstanding balances are in agreement with the recapitulation of this Ledger.

Sundry Debtors—\$1,940.75: The individual balances under this heading agree in total with the Control Accounts in the General Ledger. Agreements of Sale—\$1,711.50: The individual balances under this heading agree in total with the Control Account. Interest accruals have not been taken to account in respect to these agreements.

General Investments and Dog Tax Fund: All securities shown as investments of General Funds and Dog Tax Fund on hand were examined by us and found to be in order at the time of the final audit for the year under review.

Electric Light Department Surplus: The securities representing the investment of these funds were on hand and were examined by us. The transfer of funds representing the amount disbursed in respect to Capital Expenditures on the System during the year, less the Electric Light Operating Profit for the year, has been made from the Special Fund Bank Account.

Sinking Funds: All securities shown as investments of Sinking Funds on hand were examined by us and found to be in order.

It is noted that with all investments recorded at par the Sinking Fund is in excess of requirements to the extent of \$55,025.16.

Unexpended By-law funds under By-law No. 224 amounting to \$5,798.62 are on deposit in the Sinking Fund Bank Account. The Sinking Fund on hand, amounting to \$5,261.33 in respect to indebtedness under By-law No. 335, which debt by arrangement has been cancelled, is also on deposit in the Sinking Fund Bank Account.

Debentures Retired and Coupons: The Debenture debt was reduced during the year by maturities and other settlements totalling \$7,874.93. All debentures retired and coupons paid during the year were examined by us.

Summerland Scholarship Fund: The Special Bank Account was checked by us and the bank balance was verified by letter from the bank. Dominion of Canada Bonds par value \$3,000.00 held by the Municipality were examined by us and we have accepted a certificate from the bank as to the Dominion of Canada Bonds par value \$4,700.00 held by them in safekeeping. These investments are shown as assets of the fund at cost or \$7,752.94.

Schools: It is noted that there has been paid to School District No. 15 the sum of \$40,545.54, whereas the Municipal Levy for school purposes only amounted to \$37,814.53. This overpayment is due to the fact that amended requisitions, we were informed, were not received by the Municipality until after the tax rate By-law had been passed. The payment of \$2,731.01 in excess of the amount levied for school purposes has resulted in general funds being used for school purposes to this extent.

No provision has been made in these statements for any balance which may or may not be found owing by the Municipality to School District No. 15 on account of levies as we were informed the matter is still in doubt and is in effect "sub-judice".

Inventory of Light Poles: The inventory of Light Poles shown the previous year has been adjusted by debit of \$150.85 to the operations of the current year. We reiterate our remarks of last year to the effect that proper inventory records must be available before correct segregation of costs can be reflected in the Treasurer's records.

Tax Sale Lands: In accordance with recent amendments to the Municipal Act, proceeds of sales of Tax Sale Lands were set aside in a Special Bank Account and the necessary By-law authorizing this procedure was passed by the Council. An enabling By-law for the expenditure of \$3,400.00 out of this special fund for asphaltting roads was passed by the Council. The balance of this fund is shown as on deposit in a special bank account amounting to \$1,217.92.

GENERAL

We have been assured by the Municipal Treasurer that all liabilities with the exception of certain minor ones, have been duly provided for in the accompanying statements.

Statement "B" is submitted in the same form as in prior years. We were informed by the Treasurer that all detailed information required by the Department of Municipal Affairs will be submitted when the usual annual returns are compiled and filed with that Department.

CERTIFICATE

In accordance with Section 384 of the Municipal Act, we wish to report that:

- "A" We have obtained all the information and explanations required.
- "B" In our opinion, subject to the foregoing remarks, the Balance Sheet referred to in our report is properly drawn and truly and correctly exhibits the state of the affairs of the Corporation as at December 31st, 1947, as disclosed by the books and records and information received.
- "C" We found all books, documents and accounts examined by us to be in order.
- "D" In our opinion the forms and records used are well suited to the requirements of the Corporation.

Respectfully submitted,

RUTHERFORD, BAZETT & CO.
Chartered Accountants, Municipal Auditors.

To All Customers Buying on a Credit Basis

Your credit is one of your most valuable assets. It is to your advantage not to abuse it in prosperity so that when you need it, it will be available. This applies to your merchant in the same way it does to you.

The extension of credit to you is an accommodation. When it runs longer than 30 days it becomes a loan.

Because of the general tightening of credit, and the wholesale houses placing groceries on a 15-day credit and packing house products on a 7-day credit, the merchants of Summerland and West Summerland have been forced to place all their accounts on a strictly 30-day basis.

That is to say: all accounts must be paid on or before the 20th of the month following the month which the statement covers. This goes into effect at once.

If there is any balance owing more than 30 days each customer **MUST MAKE ARRANGEMENTS** with his merchant for payment on the basis agreed upon and bearing interest.

If the account is not paid on the above basis, and therefore becomes delinquent, credit will automatically be discontinued.

You will find that these terms, strictly adhered to, will enable your merchant to give you better service.

Ganzeveld Heads S. Okanagan CCF

The South Okanagan CCF district executive held its annual meeting on Jan. 23rd at the home of Mr. and Mrs. D. Gellatly, Westbank, with Mr. Jack Snowsell presiding. Delegates were present from Kelowna, East-Kelowna, Westbank-Bear Creek, Peachland, Summerland and Naramata.

In the election of officers for 1948, two Summerland delegates were chosen, these being the chairman, F. R. Ganzeveld, and secretary-treasurer, F. Plunkett.

Jack Snowsell and Mrs. Ruth Purdy, retiring officers, now hold official positions, as chairman and secretary-treasurer, respectively, on the Yale election campaign committee.

NOT ROUGH GRADED

N. O. Solly's subdivision at Trout Creek has not been rough graded to an extent that it is ready for surfacing. Councillor Wilson informed the council on Tuesday, following advice from Les Gould, road foreman. The council instructed Building Inspector Roy Angus to confer with Mr. Solly and Mr. Gould on this subject, as Mr. Angus had already passed the subdivision plan.

The Mail Box

LEGION PLEBISCITE
Summerland, B. C.
Jan. 27, 1948

Editor, The Review:
The members of the Summerland Legion fought in two wars to ensure that all citizens of Canada should enjoy freedom from oppression and the privilege of self-determination, politically and socially.

They are now making their first collective request upon the citizens and voters of Summerland. They request only that which should have been their unchallenged right.

They went overseas to make secure Canada's freedom. Can you or I do less than go to the poll to make secure to the members of the Summerland Legion the right to the practice of self-determination.

J. Y. TOWGOOD

SETTLE FOR \$15

That the floor of the late I. P. Barnes house was heaved by water damage when a municipal workman made an error in connection with the water supply was the statement of Water Foreman E. Kercher to the council on Tuesday. He and Mrs. R. G. Russel had viewed the house and had agreed that \$15 damages would suffice to remedy the damage. The council agreed to settle for that amount provided Mrs. Graham, Salmon Arm, daughter of the deceased man, is agreeable.

Mr. and Mrs. John Menu, in company with Mr. and Mrs. Alphonse Menu, spent last weekend in Vernon, visiting with some of their friends.

O. L. JONES IS LIBRARY HEAD

The annual meeting of the board of the Okanagan Union Library district was held at the home of its chairman, Mr. O. L. Jones, Kelowna, on Thursday, Jan. 22. Those present were—G. W. Game, Armstrong; Mrs. Charlotte Jones, Armstrong rural; J. D. Tucker, Enderby; G. C. Hume, Glenmore; O. L. Jones, Kelowna; Mrs. F. J. Foot, Kelowna rural; F. L. Goodman, Osoyoos; Mrs. A. D. McKay, Peachland; F. D. Downey, Salmon Arm; H. Page Brown, Spallumcheen; Magistrate Hugh Sharman, Summerland; J. V. Pullen, Salmon Arm rural.

It was regretted by those present that representatives from Keremeos, Penticton municipality, Penticton rural district and Salmon Arm city, were not able to be at the meeting.

In his report, the chairman spoke of the satisfaction of serving a larger district and welcomed the latest newcomers, Armstrong and Enderby. He spoke warmly of the co-operation he had received from Mayor Game of Enderby.

The treasurer, Mr. Hume, presented the financial statement which showed receipts of \$30,126.03 and expenditure of \$30,135.21, which with last year's bank balance of \$16.57 leaves a balance of \$7.39.

The secretary-librarian, in her report, reviewed the work done during the past year, enlarging on the need for larger premises in various branches to take care of the growth of the work. She was able to report that a new van had been purchased and a larger staff employed at headquarters.

The main business of the meeting was discussion of the 1948 budget. It was estimated that funds to be handled would amount to \$34,500.00. It was decided that librarians should be granted pensions.

Those elected to office for the present year were:

President, O. L. Jones, Kelowna; vice-president, Mrs. F. J. Foot, East Kelowna; treasurer, G. C. Hume, Glenmore; councillors, Mayor G. W. Game, Armstrong; Mr. Hugh Sharman, Summerland; Councillor J. W. Johnson, Penticton; F. L. Goodman, Osoyoos.

It was decided that the next meeting will be held at Armstrong on the third Wednesday in July.

PRICE ON SAND

Sand from the rock crusher is to be made available by the municipality at fifty cents per load, provided it is taken away while the machine is in operation, council decided on Tuesday. A price on crushed rock, when available, will be set at a later date.

PROFITS are JOBS... in the making

PROFITS in heavy industry are good news for everyone because the record shows that more than half the profits earned by industry are ploughed back into new plant... more efficient equipment to replace the worn-out tools, to make more jobs and more things that people need for a high standard of living. No profits, no new jobs. No profits, many lost jobs... no new opportunities. No profits, no security in employment.

PROFITS encourage people with savings to use their money to build,

PROFITS enrich a community by pumping vitality and enterprise into its economic life. No profits... or profits so low they don't warrant a risk... make unemployment and depression.

Over a period of many years to 1947 the average net profit on U.S. and Canadian Companies has been less than 6% and the average profit distributed to shareholders only about 3%.

What Higher Interest Rates Mean.

VICTORY LOAN prices have turned downward, may yet go lower.

THIS MEANS lower prices and higher returns on all investment media—bonds, preference shares, and common stocks.

THE REASON for this phenomenon is a move to curb credit, and therefore inflation. It is a healthy trend.

DID YOU KNOW?

SPICE - CINNAMON:
Cinnamon is the bark of a tree belonging to the laurel family, and has been in use as a spice for thousands of years. This is probably the plant referred to as "cassia" in the thirtieth chapter of Exodus, although in other places in the Bible cassia is the orris root.

The sweet cinnamon of Exodus is thought to be another species of cinnamon.

There are several species of cinnamon trees, but most of this spice that reaches us comes from the island of Ceylon. Commercial cinnamon is obtained from the bark, the branches are cut down and the outer skin is scraped away.

The bark is then cut along its entire length with a sharp knife and gradually loosened until it can be removed. The strips of bark thus obtained are diced in the sun, curling up in tube-like lengths which are inserted into one another telescope-fashion, and tied into bundles for market.

LIBRARY COSTS AT PEAK POINT

Okanagan Union Library operation costs for 1948 will be increased from \$1,250 to \$1,500, for Summerland municipality, the local council was informed on Tuesday. Under the municipal act, the maximum amount which can be charged is \$2 per lot owner, and this figure will be reached with an allocation of \$1,500 for Summerland. The library group will be so informed by the council and warned that costs cannot be increased in another year unless there is a decided increase in the number of lot owners here.

FOR SALE—NEW EMPIRE Portable \$65.00; Royal \$79.50; Remington No. 12, \$90.00; New Underwood Rebuilt, \$100.00; Underwood 14 inch carriage, \$100.00; Remington Noiseless, cost \$200.00, half price; Underwood 18 inch carriage \$125.00.
