New Arena Project Lags Norther VICTORIA For Lack of Volunteers; **Proceed With Ice Surface** Vol 6, No. 1

"We will never be able to have our official opening if we don't get more support. We need help badly and two or three men a night or during the day just cannot cope with a proposition as big as this 38."

That was the statement of Harvey Wilson in speaking to The Review last night about the progress of the Summerland Arena.

This big structure, started as a community enterprise, is slowing down fast because of lack of public support, Mr. Wilson declares. George Stoll, rink association president, who has sparkplugged the idea from the start and who has worked night and day to put across this project is just too disappointed to make any further appeals, Mr. Wilson states.

"We didn't get the support we expected, so it's doubtful if we can open the rink officially on the day we set-January 13," he continued.

"But we are going ahead to make ice and as soon as it is possible we will have the hockey section ready."

The curling section will also be attempting an ice surface if the present weather holds, Cecil Wade, curling club president states.

Only half the aluminum is in place, the ends of the arena are not boarded in and only a portion of the dressing-room space is completed, but if the present weather prevails ice will be made in preparation for curling and hockey, rink association officials promise.

There has been no attempt made to provide bleacher accommodation as the number of volunteer workers has not been sufficient to get on with this section.

But the concrete footings separating the hockey rink from the curling section have been laid and the sideboards for the hockey rink «can be erected with sufficient help.

Busy Year for Council Forecast by His Worship In New Year Message

Reeve C. E. Beatley was confined to his bed with a bad cold on Tuesday as the 1950 council held its last session and the same members submitted their declarations for 1951. However, His Worship had prepared a statement for the New Year, which was read by Acting Reeve F. E. Atkinson.

In this, statement, Reeve Bentley reviewed the major tasks which will face the 1951 council.

Foremost in these plans is the proposed municipal hall to be built on Granville street east of the Summerland Box Co. office on pro-Two local teams triumph in May perty purchased from W: As (Bud) Steuart

Sketch plans for this hall have been submitted by McCarter & Nairne, Vancouver architectural firm; and were perused on Tuesday June 1-Okanagan municipalities by the council. Suggestions and criticisms will be formulated at the want basic mill rate for their share next session of the council, which will be held on January 9.

Council meetings will be held as Tuesdays commencing at 2 o'clock. June 8-Building hits new high Deputations can appear at 4:30 p.m. Francis Steuart will be acting reeve in 1951 when Reeve Bentley A library representative is still to, be appointed, Councillor Eric At the first council meeting Tait declaring he does not wish to continue as Summerland representative on the board of directors of the Okanagan Union Library. He declared that he has not been able to devote time to purely library matters and felt that some person with more interest in promotion of library work itself should be chosen.

Conroy Confirmed As Superintendent Of Telephone Co.

The board of directors of the Okanagan Telephone Company has confirmed the appointment of Mr. M. J. Conroy as superintendent, effective January 1, 1951.

Mr. Conroy was appointed acting superintendent on March 1, last year, succeeding Mr. R. W. Ley, who became the company's first interior resident director at that time. Mr. Conroy's appointment came as the telephone company launched its initial 3-year, 3-million dollar expansion and moderni sation program.

Mr. Conroy has had 30 years of service in the telephone industry, joining the public utility in 1921 as a groundman. He became plant supervisor in 1940, and plant superintendent in 1945, followed by his appointment as acting superintendent early last year.

Occidental Addition to Cost \$40,000

Start has been made on an important addition to the fruit packing industry in Summerland.

Enlargement of the cold storage and common storage space at the Occidental Fruit Co. Ltd., plant in West Summerland has been announced by C. H. Elsey, manager, who states that this extension will mean an outlay of about \$40,000.

The new addition will be 75 feet by 180 feet and will include a small common storage space. However, the main portion of the new addition will be a cold storage room operated from the present cold storage plant.

Thus, an additional storage space of between 35,000 and 40,000 will be provided for Occidental Fruit Co. Ltd. growers, bringing total cold storage space to 105,000 boxes.

Ralph Blewett will be in charge of the construction which will be on a day labor basis, Occidental employees obtaining first preference as carpenters and builders.

RCMP Contract Is Signed by Local Council

1951 contract between the RCMP and the municipal council of Summerland has been signed designating that Summerland municipality will have a minimum of one member of the RCMP to police its confines.

Cost of policing will be \$1,400 per annum plus a payment for transportation which is expected to bring the total figure around \$1,800. The municipality must supply office accommodation and - equipment and a jail cell. Specifications of this cell have not been given the council yet but it is expected that this provision will have to be supplied in the near future It was stated some weeks ago that the RCMP plan to place a constable on duty in Summerland as well as maintaining an office for the district, including the area as far north as Peachland and west to Jura.

In all probability Councillor Norman Holmes will be nominated next Thursday as the third man on the municipal board of parks commissioners to fill the vacancy caused by the resignation of E. H. Bennett.

Mr. Bennett had been elected by acclamation for a two-year term when ho found that as he rents land from the municipality ho has entered into a contract which causes his disqualification.

At Tuesday's council meeting, Acting Reeve F. E. Atkinson suggested to Councillor Holmes that he should accept the nomination as ho was oounoll parks chairman last year and was mainly responsible for the formation of a board of parks commissioners.

Councillor Holmes replied that he would accept such nomination local roads this year says council if it was felt he could assist in getting the new board underway.

Nominations are being accepted

It was left until next council session when Reeve Bentley's suggestions will be obtained.

Francis Steuart continues as council representative on the Summerland General hospital directorate while Councillor F. E. Atkinson has accepted a further term on the Okanagan Valley Health Unit.

A safety committee of Reeve Bentley, Councillors F. E. Atkinson, F. M. Steuart and E. M. Tait has been appointed to meet at the call of the reeve.

Youth Centre Drive at \$1800

Donations to the Summerland Youth Centre drive have reached a total of just over \$1,800, E. R. Butler, treasurer, reports this morning. The original objective was \$3,500 to clear off all outstanding capital expenditure liabilities, but officials of the Youth Centre are extremely pleased that the \$1,800 total has been reached as they despaired at one stage of even reaching \$1,000.

"Real Fire Trap" Says Fire Chief

"A real fire trap" was the observation of Fire Chief Ed Gould in his report to council on the fire which broke out at the A. Huva residence just off the Prairie Valiey road shortly after noon on Sunday, December 31.

The fire broke out in the roof because of faulty chimney construction, it was reported. Further investigation of the chimney situation at this home will be made by Building Inspector R. F. Angus.

March of Dimes Total is \$147.47

E. E. Bates, chairman of the March of Dimes committee of the Summerland Board of Trade despatched a cheque for \$147.47 to the provincial committee headquarters last weekend to wind up the campaign in aid of the crippled children's hospital in Summerland.

The blue and red cans in a large number of district stores yielded \$34.30 when they were collected last Thursday and Friday.

The street campaign where an attempt to fill one block on Granville was a great success, netted the highest individual effort, being \$59,30.

MacDonald school pupils contributed \$30 while Faith Rebekah Lodge made a donation of \$10. Teon Town members assisted the board of trade committee in this endeavor.

Mrs. Doney Wilson Wins First **Prize in Outdoor Lighting Contest**

Mainly because of its originality, the special outdoor lighting display arranged by Mrs. Doncy Wilson captured first prize of \$15 worth of merchandise in the annual Summerland Board of Trade contest.

Mr. W. (Scotty) Ritchia announced winners yesterday after making a thorough inspection of all sections of the community,

Mrs. M. Fotterer was awarded second prize of \$10 worth of merchandise while honorable mention was given by Mr. Ritchie to Mrs. W. R. Grant, Mrs. R. J. Korsoy, Blair Underwood and Don Wright,

But there were many others who could be singled out for their offorts, Mr. Ritchie emphasized. More persons than ever before joined in the festive spirit and decorated the outside of their homes side.

"I was really surprised and quite pleased with the big increase in interest in outside home decorating this Christmas," doclared Mr. Ritchie. "It was a great display."

Added to the individual home efforts were the new colored lights purchased by the municipal council, trado board and retail merchants for the West Summerland business area and the colored lights placed by the retail merchants on the Alex Steven property overlooking the business section.

"Summerland never looked prettier than this Christmas" was an observation which could be heard on all sides this holiday.

"Originality will play a big part in any future outdoor lighting con-test," Mr. Ritchie has remarked, and it was mainly on the basis of originality that the award was made to Mrs. Doney Wilson this year.

Her decoration took the form of Santa Claus going down the chimney and attracted a great deal of attention from passersby. One little girl from a neighboring house was heard to comment; Why doesn't Santa Claus go down the chimney or go away?"

Looking to Future Progress

N Tuesday the municipal outlook for 1951 was detailed in a message from His Worship, Reeve C. E. Bentley.

Municipally, Summerland will have a busy year. The council is anxious to proceed with a new municipal hall. A new electrical substation is a necessity to take care of the increased load being handled in this municipality. Ellison hall renovation will be the subject of a money bylaw vote and there is every indication that the proposed Jones Flat sprinkler irrigation combined scheme can be readied for the vote of the taxpayers and the growers involved.

This is an ambitious program for a single year, yet every one of these suggested improvements is vi-

tal to future progress, with the possible exception of Ellison hall renovation which should be supported on the basis of retaining for the future an asset which has been valued in the past, but which has been allowed to become run down through lack of proper care and necessary annual upkeep financing.

1949 Winner of John W. Eedy

Trophy and Printer & Publisher

Award in CWNA Better

Newspapers Competition

It is to be hoped that Summerland ratepayers will agree that these improvements are essential to future progress and support them wholeheartedly when the issues are placed before them.

Only by a convincing vote can the elected representatives of the people be certain that they are following the wishes of those who placed them in office.

Long-Range View is Right One

JUNCIL faced a difficult situation last week when it considered the resignation of E. H. Bennett, newly-elected member of the new municipal parks board. Much as the council wished to retain Mr. Bennett's enthusiasm and knowledge in parks matters, yet it reluctantly agreed that the setup should continue.

This was a wise choice when one gives the problem a longrange view. We have contended on a number of occasions that the benefits accruing from an elected parks board far outweigh any advantages of parks board chosen by the council.

The continuity of purpose, the fact that the board is established as an elected body under the dictates of the municipal act will, we contend, be shown in years to come to be of definite benefit.

For a time last week the municipal council considered placing personalities before an established principle. It is true that the technicalities which bar Mr. Bennett from taking his seat on the elected civic body seem too trivial to be considered sensible, but they have been placed there as as safeguard for the public and the taxpayers.

It is true that they work a hardship in such cases as confronted the local council last week but in their wisdom the fashioners of the municipal act have decided that no person seeking public office may have any contract with the municipality. Mr. Bennett has a contract and thus he has been disqualified.

We believe that Mr. Bennett can do useful work for the parks board. It is regrettable that he has been barred from taking his rightful place because of the technicality. But the parks board can still function without his services as a regular member and we know him sufficiently well to know that the technicality will not prevent him from doing his utmost to promote parks, beaches and cemetery improvement.

As we have said before it is only a technicality which prevents him from obtaining the rightful acknowledgment as a regularly elected member, but in an ex-officio capacity he can be just as useful.

So that we will have continuity in parks board programs it is essential that the elective system be continued.

In the case of Mr. S. A. MacDonald, barred by another technicality which states that no person employed on a school staff may take an elective post in a municipality, the councillors will have an opportunity next fall at the UBCM convention to add their voices to the protests of the B.C. Teachers' Federation against this unfair legislation.

If ever there was discrimination shown against valuable members of the community who might assist in promoting civic welfare, this barring of teachers is one of the most offensive cases, especially now that school administration is divorced from the municipality and is placed directly in district school boards.

Authorized as Second-Class Mail. **Home Ventilation** Post Office Dept., Ottawa, Canada, **Is Important**

> Proper ventilation in the home will do much to prevent the occurrence of the common cold, which is the cause of almost fifty per cent of all absences from work asting a day or more. It costs the workers and industry millions of dollars a year to say nothing of the suffering and the cases that develop into more serious diseases or death.

One of the most important factors in the prevention of the common cold is the provision of proper ventilation in the home. Beside proper temperature as measured by the ordinary thermometer, there should be sufficient moisture or humidity. We are prone to keep our homes too dry in winter months, and because dry air, by removing moisture from our bodies by evaporation, causes a sensation of chilliness, we keep our homes too warm in order to feel comfortable.

If we provide sufficient moisture in the air we will be comfortable at a lower temperature, for the moist air will not cause a sensation of chilliness due to evaporation. Furthermore, the mucous membranes of our nose and throat will not be dried out and we will have done much to banish the common cold in our homes.

The temperature in our homes for comfort and health should be about 70 degrees with about 40% relative humidity. Many steam heated apartments contain less than half this amount of moisture. In many homes today you will find pans of water on the stove or specially designed jackets, to fit behind or on the top of the radiator, filled with water.

The use of these devices is proof of the fact that people are beginning to realize the desirability of adding moisture to the air of their living rooms. Unfortunately, however, the amount of moisture added to the air by these devices is entirely insufficient. In an average six-room house, about twelve gallons of water must be evaporated daily in order to produce the desired humidity. It is impossible to evaporate this amount by water by pans placed on or behind radiators.

There are now a number of devices on the market that will evaporate sufficient water to provide the necessary 40% relative humidity. They differ in application depending on the type of heating system to which they are applied. The important factor is that we can now with comparatively little expense provide the necessary moisture in the air of our homes in the winter months and do much to prevent the occurrences of the socalled common cold.

The Mail Bag SAYS HEADLINE 'MISLEADING"

Summerland, B.C. January 2, 1951 Editor, The Review:

I noted with regret your heading in The Review of December 28th, "Juveniles Shoot Up Pets". Any time that our younger population does anything out of the ordinary t seems to be headline news and is "played up" in a manner that is misleading. In the case of the shooting of these pets I may say that my dog was shot by a mature man of about 40 years of age and in regards to Mr. Lane's dog it is thought that a boy shot this animal. At the worst, only one boy is involved.

In the case of the hockey rink lights, three boys were involved. And in the case of the Ellison Hall

windows, four boys are known to have been engaged in this depredation. Possibly there were more in this last example but they have not been discovered as yet.

The point that I would like tomake is that for these three sets: of destruction. eight individual children are known to have been. involved. . The school population is around 756 so that it means about 1 per cent of those attending school have caused public trouble in the past several months. I do not know what the figures would be in other centres but I don't like the feeling that 99 per cent of the kids have a stigma attached to them because 1 per cent commits unorthodox acts. Also I would submit in the case of the shooting that the parents who supply the .22's and the BB guns are partially responsible.

Yours truly,

F. E. ATKINSON

THIRTY YEARS AGO January 7, 1921

turce.

At the board of trade meeting held last Friday night, special attention was given to the inadequacy of the present power plant. This resulted in the appointment of Secretary MacDonald and R. E. White as a committee to draw up a resolution urging the Kootenay Power Company to investigate Summerland as a possible market for electrical energy. Mr. White as acting reeve explained the local situation with respect to electric ent plant is much overloaded, and unless Kootenay power is available a larger plant is essential.

To gather a bouquet of outdoor flowers on New Year Sunday is an experience which cannot be looked upon as an ordinary matter, even in Summerland, but it was done on Sunday last by Mr. Angove, the nosegay being composed of verbena, alyssum, and ten weeks stock blossoms. These were from plants which had remained many years proprietor of Hotel more or less in bloom since last aummer.

Rev. Chas. Baker, highly effi-

the health of Mrs. Baker to move ed by the hotel under Mr. MacCalto sea level. His successor on the school staff. Mr. Wiseheart, is fully capable of carrying on the work, we are informed.

Miss Walter, daughter of Mr. and Mrs. C. A. Walter, has arrived here from the prairie where she has been teaching. She will remain here with her parents.

Mr. P. G. Dodwell received news by cable on New Year's Day of the death of his mother, Mrs. Frederick Dodwell in London, Eng. There survive the bereaved lighting pointing out that the pres- husband, a younger son, Guy, also resident in London, and Mrs. Stephen Thompson of Victoria, Australia, the latter having been a re-Eident of Summerland for some years prior to removal to Australia.

TWENTY-FIVE YEARS AGO **January 8, 1926**

Announcement is made today that Mr. C. B. MacCallum for Summerland, has purchased the sale. It is believed that this new Vendome Hotel at 1138 Nelson St. Vancouver. The hotel business in cient and respected instructor of Summerland, however, will not be candied fruit is said to be delicious the pulpit of a church in Belling- departure, as Mrs, E. Moore has no means confined to tourists dur-

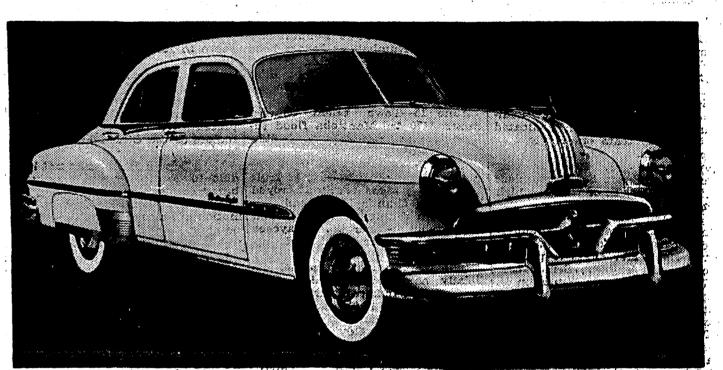

es it advisable in the interests of tain the enviable reputation attainlum's management. Since the disastrous fire of several weeks ago when the fine Hotel Summerland was burnt to the ground a deal was completed whereby the hotel was re-opened in the home of Mr. and Mrs. English.

> Miss Phyllis Hookham of Vancouver will teach spinning and weaving at the Summerland night school as soon as a large enough class is enrolled.

Last Friday a son was born to Mr. and Mrs. Basil Steuart.

Miss Thelma Lockwood and Miss Mary Snow left on Monday for Bellingham, Wash., Miss Lockwood to take a course in hairdressing and Miss Snow to commence training at the hospital there,

A novel experiment is to be tried out by the Summerland branch of the B.C. Art League whose headquarters are at the Log Cabin. Crystallized fruit will be manufactured by the members, placed in attractive containers and put on Summerland product will "go over" with the tourists in fine style. This manual training has been offered discontinued with Mr. MaeCallum's and probably the sale will be by ham, Wash., and has decided to taken over the business here and ing the summer season. Summeraccept the call, Mr. Baker believ- will no doubt continue to main- land residents will want some too.

THE 1951 PONTIAC marks its silver anniversary with many new style changes, and mechanical improvements. It also offers a choice of two fully automatic transmissions - Powerglide, introduced in Canada this year by GM, and available on the Fleetleader Deluxe: and the famed Hydra-Matic Drive, available on the Chieftain and Streamliner Series. Both automatic transmissions are available as an option at extra cost. Pontiac for 1951 is available in 24 models, beginning at the lowest price range. Pontiac also introduces its Catalina, a hard top convertible which combines smartness and wide visibility with safety and driving comfort. Shown above is the 1951 Pontiac Chieftain Deluxe four-door sedan.

CHEVROLET for 1951 presents a new profile, with extended rear fenders, newly designed grille; longer, lower, more sweeping lines; and many other features. Chevrolet also offers Powerglide auto-matic transmission, as an option at extra cost. Powerglide is fully automatic and eliminates the eluteh pedal and the mechanical shift. This is the first fully automatic transmission to be offered in the low-est price field. Also offered are new Jumbo-Drum brakes which require 25 percent less pedal pres-sure. Shown above is the 1951 Chevrolet Styleline Deluxe four-door sedan. There are 11 other models including the Chevrolet Bel Air, Canada's first "hard-top" convertible.

Signifying Nothing By RUSTICUS

For several months a kind rela- | each copy of the Sunday Observer | Time magazines and the general tive has been sending me copies of that excellent English paper, the Observer. And while it is hardly fair to compare Vancouver papers with a product of London-the New York Times or Horald-Tribune would be more in the anmo class--there is a tremendous contrast between the weekend issues of the Observer, and the Province or the Sun.

It jan't just the English paper's emaciated condition-ten pages in- | ture of some prominent personage stead of forty or fifty, Or perhaps on page 2 is always fascinating. that does have something to do From it I first learned, for inwith it, and the limited length has stance, that to the non-American

seems refined to almost all pure himself would have us believe, gold,

Its front page-which is news, like our own papers, instead of all advertisements like some of its distinguished rivals, gives much more of a world point of view, much less of determined one-sidedness and real figures instead of mere black hysterical excitement, thun our own

And the inside pages are a treat. 'The "Profile" in words and picforded the editors to gut out all world General MacArthur is by no that is trivial, or mere padding. For means the superman that the Life-

From these profiles such newsworthy figures as Chiang-Kal-Chek, Pablo Picasso the painter, Seretse Khama, the black man with the white wife, Hemingway the he-man novelist, emerge as well-rounded or white silhouettes. And other figures who are of world importance but almost ignored in our newspapors are treated here: Haya de la Torre, for instance, the great working class leader of Peru.

Admittedly the Observer lacks the page I usually turn to in local dailies as goon as the news has Continued on Page 6

EVERYBODY WELCOME

Veteran Loses Home By Fire at Oliver

Mr. Noel Boult, a former resident of Summerland, had the misfortune to lose by fire his new veteran's nome at Oliver which had recently been completed.

On the morning of Dec. 21, he had just come up from attending to the sawdust burning furnace about 7 a.m. when he heard an explosion. Upon going to the basement door he found the room in flames and with his wife and small son and daughter, was compelled to leave the burning house.

All were in their nightclothes and the house burned to the ground with a complete loss of their household furnishings including the family piano; their clothing, and their Christmas parcels.

The townspeople of Oliver were exceedingly kind to the family, and Mr. Boult's brother-in-law and sister, Mr. and Mrs. E. C. Bingham went down as soon as possible with clothing for the children, and other things.

The family has moved into a house owned by Mrs. Boult's parents, Mr. and Mrs. Tomlin, and plans to start rebuilding at once.

Canasta Party Has Ten Tables

There was a good attendance at the second Canasta party held in the Parish hall on Dec. 29 by the church committee of St. Stephen's. Ten tables were occupied and change of partner and a move made every half hour which kept everyone circulating and interested.

Mrs. Edna Chadburn who won first prize at the first party was high for the second time. The low score was held by Mr. H. B. Maier. The games started at eight and were continued until about 10:30 when delicious refreshments were served by members of the WA.

It is planned to have a series of such evenings during the winter months.

SILVIO GALLI, an 18-year-old Scotch-Italian is the answer to those who say modern youth is soft. This 'teen-ager is in Canada without a friend and without knowing where to look for a jobbut determined that he is going to make good in this country. Silvio arrived in Montreal recently. A believer in taking advantage of any breaks coming his way, he is the first immigrant to Canada to benefit from the Government's offer to pay part of the air passage of anyone willing to settle here. When the offer was made public, Silvio read about it as he helped his mother in the family restaurant at Ayr, Scotland — and then he was on a Trans-Canada Air Lines plane bound for the metropolis. "It saved me 66 pounds," he explained. This means that the Canadian government paid about \$190 of his regular \$350 air passage from Scotland. Silvio doesn't know anyone in Canada and has no idea of where to look for a job. But this good-looking youth with the attractive smile and close-cropped head of black curls says: "Don't worry about me, I'll do all right."

VLA Home Builders Course is Offered

The Veterans' Land Act proposes to hold a construction course in home building in Penticton if there is a sufficient number of interested veterans who are already established, or who have been approved for Veterans' Land Act assistance.

If a course is held in Penticton it will have no direct relation to the proposed development on the Penticton west bench, but veterans who are interested in this project are eligible for this course.

The course is conducted in cooperation with the B.C. department of education and a fee will be charged, possibly \$5.

The course deals with the construction of a house from the selection of a suitable plan to the finishing work. The object of the course is to help applicants already approved by VLA, and who wish to act as contractors, in the construction of their houses. Special attention will be given to the pitfalls which may be avoided by the amateur builder.

A course can only be held if sufficient veterans apply to make up a class. It is the intention that any course held will start in the latter part of January, or early in February and continue two nights a week for a period of eight weeks. Any interested veteran already established, or who holds a qualification certificate from the Veterans' Land Act is invited to apply to Mr. R. W. Brown, regional supervisor, Veterans' Land Act, Box 1499, Kelowna, B.C., prior to January 15.

TUNA FISHING IS TOPIC AT ROTARY

Keith McLean was guest speaker at last Friday's Rotary Club of Summerland meeting in the Nu-Way Annex. His talk on his tuna fishing experiences last summer off the Pacific Coast proved quite interesting and club members plied him with questions at its conclusion.

PAGE THREE

Singers and Players resume their weekly rehearsals next Tuesday evening, January 9, at the high school at 8 o'clock.

There should now be no delay in pushing ahead vigorously with the two projects on hand.

The Players are all set to begin intensive rehearsals of "Here Comes Mr. Jordon". The outlook for a successful production is good.

As for the Singers, those of you who were in "Iolanthe" last year will recall how close we came to abandoning it for much the same reasons as are causing difficulty this season. They will also remember that we stubbornly refused to give up and eventually carried through to a triumphant conclusion. How far history will repeat itself this year still unfortunately remains a matter of some conjecture but now that the holidays are over we have every reason to hope that lack of singers will not force a change in plans.

The sooner we are assured of the numbers we require the less trouble will pile up for us toward the end. Therefore scenery and costumes have been planned; orchestrations are on hand; and those who started the season with us are well grounded in the chorus work musically. All we need now is the final encouragement from a few more singers.

We should like to know by the attendance next Tuesday whether or not we may count on the support. Would it not be better for those of us who wish to continue this season to do something about it now rather than next week or next month.

SELLS HOME NEAR STATION

Mr. M. Coty has sold his home near the Kettle Valley Railway station to Mr. T. B. Young, and with Mrs. Coty and their children is moving to Grand Forks, B.C.

Within the Department of Health and Welfare are three closely-integrated branch-

es which exist for the sole purpose of administering your investment/in halth, welfare and hospital insurance. This year, your Provincial Government will invest for these three public services, just over \$22,300,000 or about \$20 per person. In one way or another, the activities of these three branches touch the daily life of everyone living in British Columbia. That's the way it should be.

Your money is administered to care for your requirements in the closely-related fields of health, welfare and hospital insurance.

HEALTH BRANCH

A person's health is his most priceless possession and it was with this thought in mind that the Health Branch was formed. Its many services are designed to safeguard the health of every citizen within the province. The present services are forever expanding, and are considered to be amongst the best on the continent. Over 95% of the population of this province takes advantages of the public nursing service, which brings

to all people the benefits of capable and trained personnel.

The complete health unit service covering the province is available to over 74% of the people. It includes pre-natal, infant and child health services, communicable disease control, nutrition and preventative mental health services, sanitation inspectlon and education, and many other alliad programs.

Tuberculosis is carefully battled on the two important fronts, diagnosis and treatment. A free, province-wide diagnosis program is in effect, and free treatment is afforded those who are unable to pay.

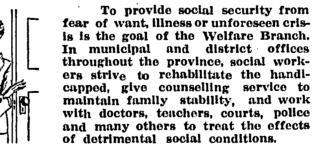

The elimination of venereal disease is furthered by a progressive program which includes free diagnosis, free treatment and the distribution of free drugs.

Central and branch laboratory services provide the weapons to fight communicable disease and work closely with a capable organization designed to combat and prevent epidemics.

Thus, your health is safeguarded, from hirth to old age by the Health Branch which vigorously furthers the maintenance of good health standards and battles discuse on all fronts.

DR. G. F. AMYOT, Deputy Minister

WELFARE BRANCH

To patients in the Provincial Mental Hospitals, mental hygiene clinics, tuberculosis hospitals, venereal disease clinics, and Boys' and Girls' Industrial Schools, social workers bring many services.

In addition, this branch also provides

. . Social Allowances to assure an income for those unable to work.

... Mothers' Allowances to assure an income for widowed mothers with children to care for.

. . . A substantial portion of the benefits received by our senior citizens—the old age pensioners.

. . . Protection of children from neglect and suffering, providing substitute family care for wards of the government, to guarantee satisfactory adoption practices, to assist children of unmarried parents, and the parents themselves.

. . . Medical Care for Social Assistance Recipients, including payment of Hospital Insurance premiums.

British Columbia leads all of Canada in its program of social welfare. This is a tribute to the enlightened people of this province who recognize the need for social welfare and pay for it through the Social Security and Municipal Aid Tax. (3% Sales Tax). It also reflects the economical, yet thorough administration of the Welfare Branch.

E. W. GRIFFITH, Deputy Minister

HOSPITAL INSURANCE SERVICE

When the Hospital Insurance Service was formed in 1948, its chief function was to free the general public from the dread of hospital bills. Although just emerging from its inception period, the plan has proved a beneficial boon to more than \$20,000 people who have since been hospitalized and have had their bills paid by the Hospital Insurance Service.

In picking up the bills, the Hospital Insurance Service is paying for

many facilities. While you are in the hospital, you have at your disposal the complete services of the hospital as required, which include public-ward accommodation; case-room and operatingroom facilities; anaesthetics; dressings; ward nursing care; available X-ray, laboratory and physiotherapy facilities; and hospital maternity care. These services are covered by the plan only while you are in the hospital.

The plan is financed by the fairest and most practical method possible. In addition to the premiums paid by all citizens, the provincial government and your municipality each make a contribution of 70c for each day you are in hospital. The provincial government has also alloted additional money from general revenue to cover the remainder of the plan's operating costs.

Since the plan's inception, countries and states throughout the world have been requesting particulars concerning its operation. They are interested because Hospital Insurance Service administers a good hospital insurance plan—one which is designed to serve the people of B.C. in the best possible manner.

L. F. DETWILLER, Commissioner

DEPARTMENT OF HEALTH AND WELFARE HON. DOUGLAS TURNBULL, Minister

PAGE FOUR MORE ABOUT-

BUSY YEAR

Continued from Page 1

The board of health also meets at the call of the chief magistrate. **Reeve's Message**

After extending New Year greetings to the council Reeve Bentley's prepared statement read to Tuesday's meeting stated he was "glad to welcome back to the council our last year's members."

"Internationally we start the year with dark clouds overhead, we may have certain restrictions placed on us, but with faith and stout hearts we will again see the sun shine on our lives. We have a wonderful country and every one of us must do his part to keep it so—and free.

"Municipally, we are starting 1951 in very good financial condition. We have several major problems for the new year.

"First, during the years we have greatly increased the use of electricity and so made obsolete the switching station which was designed many years ago for the load of that time. This, in turn, causes us to rebuild the station and as soon as the electric light committee has completed its plans we must start construction.

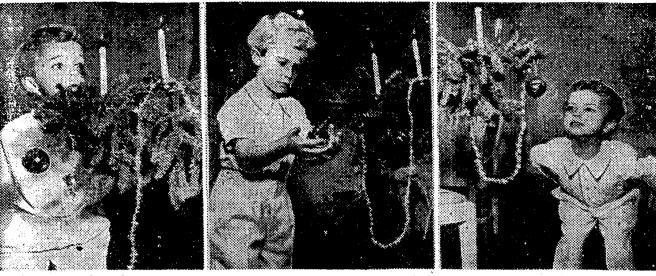

"Then, we have to decide on the final plans for the municipal hall. McCarter & Nairne have submitted a sketch and I would like all the council to express their opinions and any suggestions.

"Then we will have to submit a bylaw to the ratepayers for the renovation of Ellison nall. This is mandatory.

"As soon as the legislature has passed the Lecessary amendments to the municipal act, we will again have to approach the Jones Flat growers regarding the proposed pressure pipe sprinkler system," he concluded.

As usual, there was no ceremony in connection with the introduction of the new council. Declarations were handed to Municipal Clerk Gordon Smith and the old council took its usual places around the well-worn council table.

FIRE BRIGADE TO HOLD ANNUAL MEETING

Annual meeting of the Summer-land Fire Brigade will be held at the Nu-Way Annex next Tuesday evening. Firemen will gather for a supper meeting to hear the an-nual reports and elect officers for the ensuing year.

Besides members of the brigade Reeve C. E. Bentley and Councillor F. M. Steuart are expected to be present.

EMPLOY PRACTICAL NURSE

Miss Phyliis Witt, a practical nurse, has recently arrived from Saskatchewan, and is employed at Summerland General hospital.

SQUARE DANCING

Mr. and Mrs. H. V. Stent held their annual New Year's Eve party for a number of their friends when square dancing was greatly enjoyed.

Increased Population Changes Pattern of B.C. Agriculture

tion in British Columbia with con- their own provinces. There came sequent greater consumer demand for food is affecting the pattern of agriculture in the Pacific coast province, Hon. Harry Bowman, B.C.'s minister of agriculture told delegates from other Canadian provinces assembled at the federalprovincial agricultural conference held recently in Ottawa.

In spite of increased dairy production, Mr. Bowman said that fluid milk supplies in the Fraser-Valley-Vancouver area were almost insufficient to meet requirements. Stating that dairy farming and poultry raising were two important industries comprising B.C.'s agricultural economy, the B.C. minister indicated that to maintain or develop these further it was essential that the present federal feed-grain freight assistance policy be continued.

He emphasized that this policy should be permanent and so announced to enable producers to plan ahead with assurance and thus help to stabilize the livestock industry.

Heading a delegation consisting of Dr. Blythe A. Eagles, dean of agriculture at UBC, Wm. MacGillivray, director of development and extension and Geo. H. Stewart, research-assistant in the B.C. depart-ment of agriculture, Mr. Bowman expressed appreciation of kindly references by different speakers to the manner in which B.C. farmers had organized commodity marketing organizations.

On different occasions the B.C. government had given every help possible in establishing boards. But the farmers themselves, Mr. Bowman added, had a great responsibility to produce efficiently a high reach the consumer's table at a fair price.

groups by joint action could do ditions.

Tremendous increase of popula-1 much to help agriculture within a time, however, when it was necessary to seek federal assistance. Mr. Bowman stated. The federal government could best help farmers by maintaining full employment through encouraging industrial development, exploring. new outlets for farm products, developing foreign markets, controlling imports and exports and by establishing floor prices in certain commodities.

> Mr. Bowman pointed out that the federal government's 1950 floor price for butter had given stability to an important section of the Canadian dairy industry.

Prior to the opening of the federal-provincial agricultural conference at Ottawa, various committees of the Canadian Department of agriculture had met to prepare reports as a basis of conference discussions, and Mr. Browman complimented the men concerned on the care and the research that. had gone into the preparation of these reports.

However gloomy the world political situation might be, he said that there appeared to be no uncertainty that the Canadian farmers. would be able to sell their products at good prices in 1951.

B.C.'s industrial expansion and high wage rates being paid in log-. ging and construction activities were attracting many young men from farms, Wm. MacGillivray, director of development and extension, told conference delegates. He stated that farmers and farm organizations should give more consideration to maintaining an effiquality commodity that would cient and contented farm labor force, and that the best farm workers might be retained by provid-Provincial governments and farm ing better working and living con-

cember compared to last year. Fol-**Accidents Over** CHIMNEY FIRE CALL lowing is the complete summary: Max. Min. Rn. Sw. Holiday Bring **One to Court**

> Accidents marred the New Year's holiday weekend but none of them caused any injuries to drivers or passengers.

First one occurred on the Station road about 6:45 o'clock Saturday night, Dec. 39, when a light delivery driven by Fritz Borgstrom and a car piloted by Roland Lethbridge collided.

Borgstrom was turning off the Station road onto his driveway when the collision occured. As a result he appeared in police court on Tuesday and paid a fine of \$10 and \$3 costs for driving without due care and attention.

His light delivery suffered about \$200 damage while the Lethbridge car, which did not carry any liability insurance and was there-

fore impounded, received damage of about \$150.

But this wasn't all. While RC-MP Constable I. G. Thorsteinson was investigating the accident a truck was backed up and the deck caught the police car door, doing \$33 damage.

At 1 o'clock New Year's morning a jeep from Westbridge attempted to park on Granville opposite the Nu-Way hotel. The driver, Bill Nicholson, was unaccustomed to its operation and did not know the brakes had to be pumped in order to bring the vehicle to a stop.

As a result the jeep carried along and struck the door of the Family Shoe Store. The door was badly damaged and five small panes of glass shattered but the big plate glass windows on either side escaped breaking.

Sometime over the weekend another vehicle which has not been, identified crashed into the St. Andrew's church hall at the rear from the alley paralleling Hastings street. This damage was discovered on Sunday morning just before church scrvice.

Juveniles who are alleged to have broken lights at the park-playground link are being charged on Friday morning in juvenile court here.

COMPROMISE IS REACHED ON NEW ROAD FILL

Reeve Bentley, Councillor Tait and Road Foreman Gould interviewed C. H. Elsey, manager of the Occidental Fruit Co. Ltd., it was reported to Tuesday's council session, on the subject of the fill made on the road running east and west past the packinghouse. It was agreed that six inches of the fill be removed and the balance of the road graded out. This is a compromise measure but does not wholly satisfy Mr. Elsey's complaint that trucks now have difficulty loading there, Councillor Tait reported,

They plan to be ning, the final prayer service of away for several months and will visit friends in England and Switzerland before returning to Can- Preston, in charge. ada.

NEW ARRIVALS

A baby boy was born to Mr. and Mrs. D. M. Hart on Dec. 29 at Fairbanks, Alaska. The baby has been named Donald Dean, and his mother was formerly Miss Eleanor Stein, daughter of Mr. and Mrs. Wm, Stein

On New Year's Day in Vancouver a baby girl was born to Mr. and Mrs. C. S. Holden. Mrs. Holden is the former Miss Emily Mott, daughter of Mr. and Mrs. John Mott, and her birthday is on Christmas Day.

SOCIAL EDITOR

Mrs. A. W. Vanderburgh

No Baby Born Yet This Year at Hospital January 4, 1951, and no new baby has arrived so far this year at the Summerland General hospital. Last year on Jan. 3, the first

baby to come to Summerland hospital was that of Mr. and Mrs. J. Echina who had come from Italy about a year previously to make their home here.

Mr. and Mrs. C. S. Holden, Vancouver, the latter formerly Miss Emily Mott, a Summerland girl, whose parents, Mr. and Mrs. J. Mott live on Hospital Hill, were delighted to have their first baby, a small daughter, born on New Year's Day about 9:30 p.m. in hospital in Vancouver. The mother's birthday is on Christmas Day, so both have special days on ,which to celebrate their birthdavs.

VISITING HERE-

Miss Sylvia Moore of Trail, is a guest at the home of Mr. and Mrs. W. H. McLean.

Miss Nancy Hack, RN, of Vancouver was a holiday visitor at the home of her mother, Mrs. E. Hack.

Mrs. D. Kemp Sr. of Blairmore, Alta., is visiting at the home of her son-in-law and daughter, Mr.

and Mrs. T. McKay Mr. Kennet Yoemans of Victoria was a weekend visitor at the home of Mr. and Mrs. B. A. Tingley.

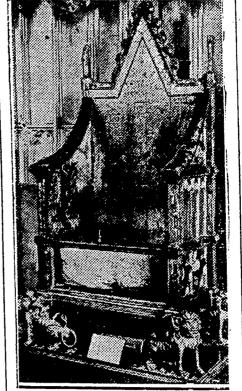

Mrs. W. L. Boult of Penticton was a holiday visitor at the home of her son-in-law and daughter, Mr.

and Mrs. E. C. Bingham. Mr. and Mrs. Charles Dodwell

and their small son, Peter, spent the New Year weekend at the home of Mr. and Mrs. P. G. Dodwell, Prairie Valley.

Mr. and Mrs. Dan Wright and Mr. Gordon Wright were weekend visitors from Vancouver at the home of Mr. and Mrs. D. M. Wright.

Guests at the home of Dr. and Mrs. H. R. McLarty over the New Year weekend were Miss Rose Marie McCall and Mr. Cedric Hackett,

A NATION-WIDE search got under way recently for the historic Stone of Scone, which was ripped out of the Coronation Chair in the Poet's Corner of Westminster Abbey and hauled away before dawn on Christmas Day. Police threw roadblocks across all main roads leading to Scotland, and police north of the border were on the lookout for a mysterious couple who had been parked in front of the Abbey shortly before the theft was discovered at 6 a.m. The famous Stone of Scone which has dis-appeared from Westminster Acbey, is shown under the corona-tion chair of the Kings of Eng-land.

YOUNG PEOPLE ENTERTAIN

Among those entertaining during the holiday season were Miss Marian Richards at a buffet supper on Friday evening, Dec. 29, at the home of her parents, Mr. and Mrs. H. R. J. Richards, and Miss Barbara Munn on Saturday evening at the home of her parents, Dr. and Mrs. W. H. B. Munn.

HUGH McLARTY HOST

Mr. Hugh McLarty entertained a number of his friends on New Year's Eve at the home of his parents, Dr. and Mrs. H. R. McLarty.

Mr. Gordon Bardiner of Vancouver was a New Year weekend guest at the home of Mr. and Mrs. J. L. Brown.

Coxsons Honored By Congregation on Silver Anniversary

About forty members of the Free Methodist church gathered at the home of their pastor, Rev. C. E. Coxson on Wednesday, December 27, to celebrate the Coxsons' 25th wedding anniversary.

It was a surprise party, the congregation going in a body from the church where they had gathered for a prayer meeting.

All the Coxson family was home for the holidays, three sons coming from Seattle Pacific College and the fourth from Winfield.

Also present were Mr. A. L. Taylor of Kamloops, who met Revand Mrs. Coxson on their honeymoon, Rev. H. Coxson of Kamloops, and Rev. and Mrs. W. S. Angell, of Kelowna. Rev. Mr. Angell was the pastor of the Free Methodist. church here before going to Kelowna and Mrs. Angell is a sister of Mr. Coxson.

The family presented their mother and father with a set of silverware, while the congregation presented them with silver candlesticks and a sugar and cream set. Mr. C. W. James made the latter presentation.

A social evening and refreshments were enjoyed.

COY CUP TEAMS ALLOWED IMPORTS

If Summerland can enter a hockey team in the Coy Cup playoffs this winter, certain rule changes announced by Frank Becker of Vernon, B.C.'s member on the western intermediate committee of the Canadian Amateur Hockey Association will be of interest here. Residence deadline has now been changed to January 5, 1951, whereas the deadline had previously been November 1 for artificial ice centres and December 15 for places with natural ice.

Eritish Columbia intermediate clubs are allowed four imports, while other intermediate clubs can only sign two imports. Senior hockey players released by January 1, 1951, are eligible to play intermediate hockey for the balance of the season, provided no more than four such players are signed by an intermediate club.

General Dwight D. Eisenhower

The 12 Atlantic Pact nations announced in a communique issued at the end of their two-day meeting in Brussels, Belgium, recently that Gen. Dwight D. Eisenhower, liberator of Europe in 1945, had that Gen. Dwight D. Eisenhower, liberator of Europe in 1945, had been named supreme commander of a Western European army of 750,000 men—of which 150,000 would be Germans. Eisenhower, the communique said, will come to Europe "shortly after the first of the year" to set up his headquarters and create an interna-tional staff to run the "effective, integrated European force under centralized control and command." The Atlantic powers also agreed to set up a defence production board with powers to "ex-pand and accelerate" armament production. The Atlantic Council of Foreign and Defence Ministers announced their agreement on a Western European army, to include Germans, if possible, at a hurriedly-called press conference after they adjourned.

Legion Party Not So Well Attended

There was a smaller-than-usual attendance at the New Year's Eve supper and after midnight dance held by the Canadian Legion in the Youth Centre, due, no doubt, to the great number of small house parties given that evening.

Those who were present enjoyed the music of Bonthoux' orchestra, and the lovely buffet supper of sandwiches, home-made cakes and coffee, prepared by the Women's Auxiliary and served by members of the Legion.

Favors and "Happy New Year" greetings marked the hour of twelve o'clock.

KIWANIS INSTALLATION ON MONDAY NIGHT

J Y. Towgood presided over his last Kiwanis Club of Summerland

ANNUAL CANOE TRIP ON LAKE

Maintaining a family tradition to go canceing on Okanagan Lake on New Year's Day, Mr. A. J. Mann, who lives at Summerland on the lakeshore, was accompanied this year by Miss Stella Creese and Mr. Peter Pearson, in the absence of Mrs. Mann, who is visiting her mother, Mrs. Grayson at Moose Jaw, Sask.

Since there was quite a roll on the lake there was a slight hesitancy in starting the unusual annual navigation, but once started the party found the bouyancy of the water delightful, and the tinkling of the water on the oars during the cruise suggested a season other than that of early January. The voyage lasted about an hour from 10 a.m. until 11 a.m. and was about half way to Trout Creek and return.

COST OF STREET LIGHTS

The new colored street lights for West Summerland business section cost \$379.07, including \$53 for the municipal electrical crew's labor, Tuesday's council session was informed. The board of trade and retail merchants each will put up \$50 while the balance of the payment will be met by the municipal council.

That Awful Thing

(Lethbridge Herald)

Those of us who occasionally turn on our radios or wander into restaurants where juke boxes are tolerated cannot have missed the cementmixer-like strains of a new song called "The Thing." As bellowed by a man named Phil Harris, this "The Thing" surely takes rank with all the great musical monstrosities of the past, songs like "The Music Goes Round," "The Hut Sut Song" and "Mairsy Doats."

We are told that the man who wrote "The Thing" is the same man who wrote "Good Night", Irene." Surely not. No man could possibly invent two such songs in a lifetime. Not even if he had a grudge against mankind.

parade at One highlight of 1950 was in the Peach Festival the crowning of Olive Mason as Ponticton and the Miss PNE 1950 Miss Summerland, and how entry contest at Vancouver.

POPE PIUS XII kneels as he lays the first brick, symbolically closing the Holy Door of St. Peter's Basilica at Vatican City, in a solemn ceremony ending the 1950 Holy Year of the Roman Catholic Church. The Pontiff was the first to enter St. Peter's through the Holy Door last Christmas Eve, and the last to leave through the same door in the world's largest church this Christmas Eve. The ceremony marked the and of the church's 25th Holy Year.

for slalom and downhill, both young men being included in the final 15 skiers competing for places on the teams.

MacRae Skis

Rossland Meet

Ron MacRae, young Summer-

land student at UBC is represent-

ing his varsity this weekend at

Rossland where he is competing

as a member of the UBC "B" ski

team in an intercollegiate meet.

University of Washington is fav-

ored to capture this meet for the

fourth straight year but UBC ex-

MacRae and Daryl Weitzel jour-

neyed to Banff last weekend where

trials for the A and B team were

held. Weitzel was just a visitor

pects to make it a close battle.

Excellent instruction was provided at Banff by Frans Grable a 1948 Olympic star on the Austrian team and Gar Robinson of UBC.

The Rossland meet is being held on Friday, Saturday and Sunday, January 5, 6 and 7. As a member of the UBC "B" team, MacRae will be competing in three inter-varsity meets. Daryl Weitzel reports that Ron nearly made the A team but was not up to his usual skling calibre at Banff.

Summerland to Ser¹ VICTORIA Biggest Single Group To BCFGA 62nd Conclave

Fifty-four resolutions will be considered by the BCFGA 62nd annual convention which opens next week at Vernon on Tuesday, January 16. Delegates representing every portion of the tree fruit area of the interior of B.C. will be present. They will represent 3,963 growers, an increase of 200 over a year ago. Convention concludes on Thursday, Jan. 18 after three days of intensive study and discussion.

Summerland, with more growers than any other local in the interior, will have the largest single representation at the convention, headed by C. J. McKenzie, president of the Summerland local BCFGA. Other Summerland delegates include Secretary M. W. Toevs,

Reeve C. E. (Ned) Bentley, George Stoll, W. T. Bleasdale, E. M. Tait, J. Y. Towgood, H. Walton and H. Mohr.

Ed Gould is **Returned** as **Fire** Chief

Ed Gould was returned as chief of the Summerland Volunteer Fire Brigade when the annual meeting and banquet was held in the Nu-Way Annex on Tuesday evening, Jan. 9. All 13 members of the brigade were present, along with Reeve C. E. Bentley an dCouncillor F. M. Steuart, the council fire committee.

Joe McLachlan was also returned as deputy chief while B. A. Sladen holds down the position as secretary-treasurer for a second term.

Eighteen fire calls were answered in 1950 and 24 practices held. There was also good attendance at the fire marshal's school early last year and at the fire college in Vernon last June.

A budget calling for an expendi-ture of \$2,250 for 1951 is to be presented to the council.

It is hoped that two new members will be added to brigade strength this year to bring the brigade to full strength of 15 men.

Reeve Bentley commended the brigade on the splendid work done the year's operations. in the past year and the service rendered the community.

Among the new equipment purchased in 1950 were shovels, flashlights, two helmets, a new spotlight for the truck. The former old electric light truck was remodelled to serve as an auxiliary fire truck.

Fails to Allow Half of Highway

about 5:45 o'clock Saturday afternoon, then saw Dr. D. V. Fisher coming down the hill and tried to cut back into his own line of traf-

One of the principal speakers at the convention will be Dr. R. C. Palmer, experimental station superintendent, whose subject will be 'Thoughts on Planting our Orchards".

Dr. L. P. Batjer, Wenatchee, of the U.S. department of agriculture, will return to the BCFGA convention and this year has chosen "Factors Affecting Results of Thinning Sprays on Apples" as his topic. This subject is of wide interest as chemical spray thinning is being tried more and more here.

The angle of the retailer will be portrayed to the producer by M. S. Duffus, supervisor of the Super Valu Stores, Vancouver. His topic is "Your Salesman-The Retailer."

Dr. James Marshall, chief of the entomological laboratory in Summerland, was billed as a convention speaker but his plans were cancelled when he was detailed to address the Ontario Fruit and Vegetable Assn. convention at the Coliseum in Toronto next week.

Dr. Marshall will tell the Ontario producers about advances in mechanization of spraying in B.C. and Washington, with special emphasis on this province's research. He will leave on Jan. 16 and fly from Calgary to Toronto.

B.C. Tree Fruits Ltd. will report to the convention Tuesday afternoon with President Arthur K. Loyd and Sales Manager J. B. Lander giving an accounting of

Wednesday morning will be devoted chiefly to reports by President A. G. DesBrisay and General Manager R. P. Walrod of B.C. Fruit Processors Ltd. Later that morning the BCFG Mutual Hail Insurance Company officials, Vice-president E. A. Titchmarsh and Manager George H. Northan, will give their summary.

Mother and Son Winners

Highlight of the Vernon Board of Trade banquet Wednesday eve-Hans Stoll started to pass and two premier apple awards at the other car on Peach Orchard hill 1950 Armstrong Fair to a mother ning will be the presentations of and son from Oliver.

PROVINCIA

"Red" Graham of Oroville, Lt.-Governor of Division 5, Kiwanis International, officiated at the installation of officers of the Kiwanis Club of Summerland Monday evening in the IOOF hall. Father A. M. Meulenbergh, club secretary, snapped this picture as Mr. Graham was congratulating the new officers. On the right is the new president, La-cey Fisher. Mr. Graham is just shaking hands with the new first vicepresident J. E. Jenkinson and Norman Holmes, second vice-president is looking on from the extreme left.

"Freedom is Not Free" Quotes Kiwanis Governor as Lacey Fisher Installed as Prexy

"An active year, one of satisfactory growth and achievement," was the manner in which J. Y. Towgood expressed the Kiwanis year just passed as he handed over the gavel of office in the Kiwanis Club of Summerland to Lacey Fisher at a highly successful installation banquet at the IOOF hall Monday evening, January 8.

Installing officer was "Red" Graham, Lt.-Governor of Division 5, a past president of the Oroville, Wash., club.

"Freedom is not free", quoted Mr. Graham in citing the new international theme of Ki wanis in his short address before installing Mr. Fisher and his new executive and directorale.

After elaborating on international objectives for the year, he de clared his satisfaction at heading a division international in scope. Such a combination of Canadian and American clubs provides "a better feeling between neighbous", he considered. "We want to keep it an international division."

In accepting his new office, Mr. In the apple display last Sep tember Mrs. Louise Potter was aw-arded the "Better Fruit" special sil-lived up well to the responsibilities of citiz erations of Kiwanis committees provides members with freedom and responsibility linked together as on the two sides of a coin.

Although building interest fell off to practically nil in December, the year just closed saw a new record set for Summerland municipality. Exactly one hundred permits were issued in the twelve months

for a total value of \$510,405, the first time that the half million dollars mark has ever been reached.

The year 1949 had half as many permits again, at 159, but the total value was only \$323,065.

December for alterations and additions, being valued at \$1,225. For the same month in 1949 five permits were issued for \$15,650.

There has been a steady increase in building activity in the past five years, or since permits have been necessary before starting construction here.

Following are 'the amounts for each year: 1946, partly estimated, \$260,555; 1947, 342 permits, \$280,-860; 1948, 146 permits, \$296,785; 1949, 159 permits, \$323,065; 1950, 100 permits, \$510,405.

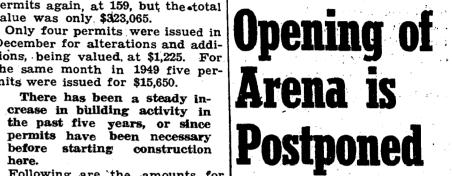

In the past year the new school project, at a building value of \$310,-000 was the biggest single item, by far. The new arena permit was for \$25,000. Other permits, in the main, were for new residences and alterations, with some additions to established business premises.

In 1949 the biggest item was the new co-op packinghouse and storage renovation.

Roy F. Angus, building inspector, reveals that if the arena and new school permits were taken off the 1950 total it would be \$175,405, whereas if the co-op was taken from the 1949 total the balance would have been \$249,065.

Prospect for Active Year Although it is unlikely that 1951 building will reach the half million mark, with no construction of the proportions of the school in sight, yet it will probably be an active year.

The Occidental Fruit Co. Ltd., is starting the new year in a progressive manner with its \$40,000 cold storage addition. Two local stores are planning extensive additions to their premises although details are not forthcoming yet. Several residential plans are in the offing, including three or fourmajor units at. Trout Creek Point being completed. Final work on on lakeshore property. For the fifth consecutive : year value of construction in Kelowna exceeded the million dollar mark at December 30, 1950. Permits totalled \$1,481,449.50 last year. Penticton building figures exceed 1949 and ran to approximately one and a half million dollars in ·1950.

Mild weather for the past week 'has forced the postponement of the official opening of Summerland's new hockey-curling rink for another two weeks. Scheduled to open January 13, the official opening is now set for Saturday, January 27. In the meantime, more enthusiasm for the venture has been shown and gangs of volunteers up to 30 in number have been rushing the project nearer completion.

With the present mild January weather and the temperature not dropping more than one or two degrees below the freezing point each night, there has been little opportunity to make ice.

However, flooding operations are underway and if the temperature drops even a few more degrees below the present rate ice will be available for curling and hockey, it is felt.

Last Thursday night, after The Review published a story stating that the arena was lagging for lack of volunteer help, sixteen persons turned out with hammers to help. This number increased at the weekend and yesterday, on the merchants' holiday, a total of thirty eager helpers could be heard hammering away on the big build-

ing. The south end of the building is nearly completed and the dressing rooms, kitchen and other cubicles at that end are well on the way to the hockey sideboards is being done. The rink management is anxious that those who made pledges of financial support through the purchase of debentures come through with the money at this time as there are some bills which must be paid at once. In order to complete the entire deal another \$4,000 is necessary, it is stated. Nearly \$1,000 in unpaid pledges shows up on the books and it is believed that a further canvass of those who thought they might buy debentures at a later date could wipe out all liabilities. Any persons who wish to assist this venture by purchasing debentures may contact G. A. Laidlaw, rink association treasurer, President George Stoll or Secretary C. H. Elsey.

The road was too slippery, however, and he couldn't get back with the result that his car and Dr. Fisher's met in a collision which resulted in \$200 damage to the Fisher car and about \$35 to the Stoll auto.

More than that, Hans Stoll paid a fine of \$5 and costs in police court before Magistrate H. Sharman on Tuesday for failing to allow half the highway.

ver tray presented by Buckerfield's Ltd. and her son, 10-year-old Gale Potter won the J. R. J. Stirling Memorial trophy, presented by the BCFGA in memory of its late president.

Hon. H. R. Bowman, provincial minister of agriculture, is away in Ottawa on a mission next week and will not be able to attend. This is the first time the minister of agriculture has been absent from BCFGA deliberations for many years.

Premier Byron Johnson, Hon. Herbert Anscomb, Hon. Gordon Wismer and Hon. E. T. Kenney, all of whom were invited, have also signified their regret at being unable to attend.

However, there are many others from the business and governmental world who will mingle with producers, research men and others Continued on Page 8

He felt that it is up to the individual to keep the world a free place. It must either be made better or be allowed to slip and he felt certain the Kiwanis members would not allow the latter to happen.

"To my fellow members I would ask you to take our jobs seriously but not ourselves, to do serious things in a lighthearted way." **Built New Bandshell**

In his retiring address, Mr. Towgood referred to a lengthy list of Kiwanis achievements in the past year. He cited the junior baseball tournament as one which gave service to sportsmanship and the community.

Chief on the list of objectives Chief on the list of objectives was the Kiwanis bandshell in the Living Memorial park playground, which has been completed to the point where it can be utilized but has not been finished.

A showing of the 1949 world series was arranged by the club, a highly successful street carnival was staged, the canvass for tho cancer society was "a good job" with over \$1,000 being raised, twoold time squaro dances were staged, and transportation provided for youngstors in need of special medical attention at Kelowna.

Besides, the club sponsored Teen Town and arranged for chaperones at the Saturday dances, hold weekly bowling play, and entered in a ball tournament at Kelowna in aid of Winnipeg Flood Relief, as well as contributing towards that cause from local funds, he pointed out.

He felt the Klwanis club here, being only two years old, is still going through "college". At the outset of the banquet, nead table guests included Reeve Continued on Page 4

Eleven Rotarians Attend All Sessions

Eleven members of the Rotary Club of Summerland had 100 percent attendance in the six months ended December 80, Roy F. Angus, scoretary, told the club at its Friday evening meeting in the Nu-Way Annex,

Six others had 95 percent attendance, which meant they had missed only one meeting while another five had missed only two.

Those with perfect attendance were: Roy Angus, C. J. Huddleston, C. J. Bleasdale, Harry Brown, Vern Charles, Alan Cross, J. W. Mitchell, George Perry, Ivor Solly, Francis Stouart, and Harvey Wilson,

At noon today Councillor NOR-MAN HOLMES was declared a member of the new municipal board of parks commissioners by acclamation, filling the vacancy created when E. H. Bennett was forced to resign because he has a "contract" with the municipality, in that he rents acreage for gladioli growing. Mr. Holmes was elected for a twoyear term. Other members are Bill Snow, 2 years and Harry Brown, one year.

Again Heads **First Aiders**

Gordon Beggs will continue as chairman of the St. John Ambulance branch in Summerland for 1951, the annual meeting last Fri-day evening in the medical clinic building agreed.

One of the most important decisions was the placing of the first aid post at the home of Mrs. W. Pattle on Highway No. 5. Mrs. Pattle has her industrial first aid cortificate and will have charge of all St. John first aid equipment.

Lists of first alders available in the event of an emergency are being prepared and will be given to the police office, local doctors and the hospital, garages and other points where they might be needed.

Persons having panel trucks which might be used as temporary ambulances are to be contacted and asked to loan their vehicles in case of emergency, the meeting docided.

A first aid kit is to be prepared and presented to the local ski club, together with a stretcher, it was also learned.

Other officers who will guide the destinies of the St. John Ambulance group in Summerland are: Vice-chairman, Mrs. J. E. O'Mahony; secretary-treasurer, Miss Louise Atkinson; executivo, C. Denike, Mrs. D. Charlton, Mrs. W. Patilo, C. Monu, John St. Donis, G. Lewis, B. Simpson and W. Charles.

Honorary chairman is Magistrate H. Sharman,

New building amounted to \$1,-098,708.72 in Vernon during the past year, bringing the two-year total to nearly \$2,250.000.

Council Hears Milk Bylaw Needs Altering

That the local milk bylaw needs alteration to make it conform with provincial regulations was information contained in the monthly report of the South Okanagan Health Unit heard at Tuesday's council meeting. Copy of the new Kelow-na bylaw will be made available

shortly Dr. H. Zeman, medical director, stated. One milk sample taken last

month showed that further examination would be necessary, the report continued, but all other inspections of water, milk, restaurants and other public business premises found conditions satisfactory.

One cannery and one packinghouse had been warned against concluded.

Kelowna-Westbank Welcome Report **Bridge Commission Being Mooted**

KELOWNA-Report that the (minister forecasts them at over one provincial government is consider- million dollars next year. ing the establishment of a bridge commission to eliminate costly subsidized ferry systems by building to Relowna to study the possibility toll bridges has received strong ondorsation from board of trade officials, packinghouse managers and business men in Kelown, and able. Westbank.

The Kolowna-Westbank bridge is one of five major projects proposed by Works Minister E. C. Carson and definite action may be taken at the forthcoming sessions of the legislature.

The commission would have ovarall authority to borrow money for construction of toll bridges and Mr. Carson believes the plan would relievo the annual road maintenance grants of large sums now used to subsidize ferries.

Forry subsidies are exceeding \$850,000 in the current year and unless economies are affected the ans under the VLA scheme.

Beer Petition Is Completed

A petition containing slightly more than 800 names has gone to the provincial government office at Kelowna requesting that a plebiscite to allow sale of beer by the glass in Summerland be taken this year.

The petition was circulated at the request of Allen Holmes, who dumping waste material and fruit states he is prepared to construct into Okanagan Lake, the report a modern hotel if the plebiscite passes.

> Earlier this year the provincial government sent Col. W. G. Swan of building the bridge. While the findings have not been released, it is understood the report was favor-

One government official last year estimated the bridge would cost around \$7 millions.

Many observers believe a bridgo is a necessary defence measure, as troops and supplies could be funnelled through the inland route to Alaska in the event of another war. Since opening of the Hope-Princeton highway, traffic has also increased 300 percent and even the three ferries have been unable to handle the heavy holiday traffic. Westbank is rapidly becoming a major fruit and vegetable producing centre and 1200 acres of land will soon be turned over to veter-

Dr. C. G. Woodbridge, who was elected by acclamation as president of Summerland Branch No. 22, Canadian Legion, at last night's an-nual meeting will be officially installed at the February meeting by Zone Commander Alan Calvert. Other officers who will be officially seated next month will consist of A. M. Temple, first vice-prosident; E. E. Bates, second vicepresident; E. E. Battes, second view, president; Reeve C. E. Bentley, W. McCutcheon, Edward (Hilly) Smith, Tom Fisher and Hugh Mo-Heads of the main Legion committees were appointed by acclamation last night, as follows: Sgt.at-arms, C. B. Hankins; padre, Ca-ron F. V. Harrison; sick, Harry Howis; canteen, D. L. Sanborn; social. W. Milne; membership, J. May; house and grounds, Ben Newton; rellef, D. L. Sanborn; children's program and education, Pe-Dr. F. W. Andrew was again

taken by R. S. Oxley,

Despite the more than 200 niembership, attendance at meetings was disappointingly low at times, he observed.

Scout Troop Progresses

The fire which occurred early last year was a mixed blessing as it enabled a complete renovation of the building. The Boy Scout troop was fostered as one of the main objectives of the Legion in the past year, while the branch also Continued on Page 8

Pioneer Days

FORTY YEARS AGO

The steamer Okanagan did not arrive in Summerland at all on Wednesday evening. She left Peachland about six o'clock but when near Squally Point was struck broadside on by a heavy wave which dislocated part of the machinery. She was beached at a nearby cove until repairs could be made.

About seventy bachelors and friends partook of the banquet provided for those young men who reside in our midst and are yet without home ties. This year the supper was given by United Young People's Bible class of the Baptist church and was held in the College dining hall. Principal Sawyer acted as chairman and the Summerland Band rendered selections between speeches. All are glad to see that this gathering has apparently become a permanent institution.

THIRTY YEARS AGO January 21, 1921

Officers elected to the hospital auxiliary for the year are: President, Mrs. H. A. Solly; 1st vice-president, Mrs. F. W. Andrew; 2nd vice-president, Mrs. R. C. Lipsett; secretary, Mrs. A. W. E. Fawkes; treasurer, Mrs. W. C. Kelley; corresponding secretary, Mrs. T. P. Thornber; house committee, Mrs. R. M. Ross and Mrs. R. C. Lipsett; purchasing committee, Mrs. W. C. Kelley, Mrs. Scott Darkis, Mrs. T. G. Beavis and Mrs. W. J. Robinson.

Miss Ida Shields has gone down to Columbia College, New Westminster, to continue her studies in music.

Magistrate Hutton is leaving this weekend on a month's vacation which he will spend in Victoria. He has arranged with Stipendiary Magistrate Guernsey of Penticton to hold court here during his absence. Miss Bertha Bristow and Miss Eva Shields are attending business college in Vancouver. Mr. J. L. Crego has offered a five

dollar box of chocolates for the best essay by a high school pupil on Unemployment, Its Cause and Cure. Essay should consist of at least 1000 words, and must be in the hands of J. W. S. Logie, secretary of the labor party not later than Feb. 1. The winner is expected to read the essay at the next social evening of the labor party early in February.

Freedom of the **Press**

"Freedom of our press is a powof our other hard-won freedoms".

This is the keynote of the editorial which won for the Tillsonburg (Ont.) News first prize in, the annual editorial competition conducted by The Canadian Weekly Editor, trade journal of the Canadian weekly newspaper fraternit**y**.

Subject for the 1950 competition was Freedom of the Press and some forty entries were submitted by weekly newspaper editors in ev-

The winning editorial is reprint-That men may be free, Canada's

ers in recent years a disposition to erful safeguard against losing any curtail freedom of the press. Totalitarian forces built their power on a controlled and fettered press. Their peoples were in ignorance of what was happening outside their borders because of rigid censorship. The Fascist and Nazi dictatorships were founded upon the cornerstone of rigid control of all sources of information, especially of newspapers. Without such control, the regimes could never have held power; with it they could do as they pleased, to the eventual ruin of their own people as well as much of the rest of the world.

With the memories of wars for freedom still vivid, we take freeblessings. Fundamentally, freedom of the press is not a special privilege reserved for newspaper publishers. It is, rather, a phrase of a much larger freedom—the freedom of all tical and ideological interpretation; men to speak their minds openly and without fear. It is an allimportant part of this larger freedom because, under modern conditions, the press is the principal agency by which man receives the information he needs to judge the actions of his rulers and make up his mind on public issues.

Some Thoughts on Grower Relations

EDITORIAL

EXT week, delegates representing nearly 4,-000 growers will gather in Vernon for annual conclave. The three-day sessions will represent the deliberations of one of the strongest and most unique producer setups on the North American continent.

This is a point which should be remembered by all tree fruit producers . . . that the partly voluntary and partly government-controlled co-operative which has been set up to govern the fruit growing area of the interior of B.C. is one of the finest organizations enjoyed by any producer group on the continent.

Not thaty we think it is perfect. No organization with so many ramifications could be anywhere near perfect in its management and operation, but it is as nearly perfect as a democratic organization can be in this country.

In the past year we have heard many rumblings of discontent. That always follows a year when prices have tumbled and growers receive less than they anticipated. They are entitled to grumble when they receive less than cost of production for some varieties while producers of other less perishable commodities are enjoying a steadily-rising market. It would not be natural if they didn't sound rather vexed.

But it is one thing to grumble and another thing to be so discontented as to discontinue a deal which has been built up over the years because of a condition over which the sales agency had no control.

No sane thinking grower would consider reverting to the days when packer fought packer and undercut each other with the growers' consigned product. It is only those who did not experience the bitterness of those days who would consider such a reversion for a moment.

Like every other industry, the fruit growing industry is going through a transition period. It is affected by the threat of war. It is also affected by modern trends towards more simplified packaging and handling.

Today, the B.C. fruit industry has reached a point where it must consider seriously going into the processing of apples in a broader way with the concentrated, frozen juice product as an ultimate goal.

And it must consider whether it would be more advisable to take most lower grades off the market and use them for processing, leaving only the best quality apples for the fresh fruit market.

If such a practice is adopted, then some means must be devised whereby the product can be made to return a higher ratio than growers receive now from their processing company.

The trend of successful operators throughout the land is to give the consumer a product which can be handled with the least trouble. California growers found that the concentrated frozen orange juice saved shipping space, could be landed on the consumer's table in a handier form, and would therefore be more readily accepted.

That same policy, to a minor degree, has been followed this year with the introduction of the junior, half-size apple pack. Persons living in small apartments cannot handle the bulky forty-pound box but have found the 20-pound size more convenient.

Many words have been recounted over the wide spread between the retailer's charge to the consumer and the return which the grower receives for that package. Probably the sales agency would do the industry more good and allay more discontent amongst the growers if typical examples of charges by each group handling the product could be provided next week's growers' parliament.

Most growers have not taken the trouble to find out for themselves what the various steps cost between the time the apple is taken from the orchard and the time it reaches the consumer. The sales agency would be doing itself and the industry a good turn if it would reveal some facts.

We believe that better public relations would exist between the people of this valley and those charged with operation of the fruit industry if more attempts were made to tell the complete story of the difficulties of selling.

The provincial government believes it wise to acquaint the general public with the operation of its various departments. The fruit industry might be wise to follow this lead and, week by week, give the public, and especially the growers, a better insight into its operations and the difficulties it encounters.

Other Places Are Wondering

J. regarding qualifications of those who would seek public office In view of the recent disqualification of E. H. Bennett as a parks board commissioner, the following editorial from The Rossland Miner should prove of interest here and should be considered carefully by those who are in a position

OT only Summerland has reason to wonder about the legal aspects of the municipal act bodies in a continuing campaign for modification. The same qualification clause barred Bruce McAuey from running in the Golden City last year, and others before him.

to move along similar lines: "First 1951 event of any importance in the life of our capital city will be a by-election to be held there next week-a by-election which holds some special interest for Rossland.

"The extra civic contest comes as a result of the disqualification of a young Victoria business man after he had been elected to office as alderman in the December vote. He has been disqualified because some unnamed citizen challenged his property qualifications.

"The issue is one which was first raised by the Rossland Junior Chamber three years ago, and which has been put before a number of provincial

For although there are many city

drab country mouse than ever.

"The disqualified Victoria alderman, Roy Whittle, is backed by labor organizations and his ousting has caused plenty of discussion. Many veteran civic people have become conscious of the injustice of the qualification clause, and a number of disinterested organizations have come up with resolutions for modification.

"It is doubtful whether this one case, in itself, will be enough to bring about a change in the ruling which practically bars mortgagees from civic office, but it has spotlighted the matter and suggests a new course of action for those who have long sought a change

"We rather wonder if the Department of Municipal Affairs would be paralyzed with shock if the property qualifications of every alderman and mayor in the province were questioned. Such a move would almost certainly precipitate a dozen or more by-elections and cause a stir that might even jolt the complacent Union of B.C. Municipalities.

"What do you say, Jaycees?"

Mr. Jack Logie were elected by acclamation to the school board. The latter two were on last year's board, but Mrs. Steven is a new member. She will take the place freedom from fear and want; They that Canadians can count a free of Miss Sinclair. less we are willing to offer some constructive plan to provide the need of good hotel accommodation in our community.

Right now we can see quite a lot of community effort being made to promote good citizenship, such as our youth centre, our arena, and our service clubs.

We do not need a "Palace" hotel but we do need sufficiently good hotel accommodation for transients together with possibly a few good cabins in connection.

My sole reason for writing this letter is to try and see some definite action being taken while

Sincerely, TOM GARNETT. | freedoms.

An unfettered press is therefore one of the essential bulwarks of democracy.

Sometimes this disposition to curtail the freedom of the press arises in individual communities, where councillors, commission members and other citizens think that what they say and do should not be reported, or criticized editorially. Every weekly newspaper has a few contributors who submit personal or news items with the qualifying comment: "Please do not change in any way."

To the weekly newspaper publisher, freedom of the press means that he is free to report the news as he sees and hears it. It means that he is free to editorially criticize or laud the actions of municipal, provincial or national governing bodies and other organizations. It means that he is free from the bonds of a newspaper chain and its restrictive qualities. It means that he has a certain duty to the public in providing the news and that the newspaper is the medium. by which the people can offer their opinions openly and without freedom of reprisal.

The only true free press is one which can record the news faithfully and comment on it frankly, without fear of direct or indirect punishment. Neither the press or the public is safe with anything less.

The obligation of the press is to be truly free. It must be thorough, accurate and unbiased in its reporting, sincore and thoughtful in its editorials and persistant to all outside pressure. It must be both cautious and bold-cautious until it knows all the facts, bold when it is sure of its ground. It must, above all, be inspired by devotion to the public welfare as its staff understands it.

Continued freedom of our press is a powerful safeguard against losing any of our other hard-worn

When I go to the city I try to any real knowledge of music, prate (and divorce, they smoke too much, make people think I've lived there of the latest best-seller without drink too much, sleep too little, sufall my life, but something always shows me up. merland Troop, and attending ses-

sions carried on exactly as in re-

gular parliamentary procedure in-

William Lewis of the Hawk pat-

teresting and educational.

The first Scout meeting after the noliday produced a turn-out of 33 boys, a good New Year's start.

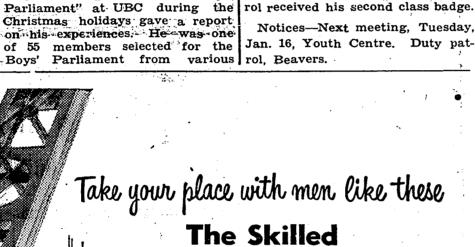

The provincial annual Scout registration has to be completed by Jan. 31 and a number of boys were asked to complete their second class badge before this time.

At the time of troop registration, fifty cents per boy has to be forwarded to provincial headquarters. This year each Scout is asked to earn half of this amount, 25 cents, and the balance will come from troop funds. The annual registration fee constitutes part of the operating income of B.C. Provincial headquarters, and is paid by every troop in the province. Parents are asked to see that their boy earns and pays his fee within the next two weeks.

The evening's instruction featured patroi instruction on stopping bleeding by use of a tourniquet. Evcry Scout applied a tourniquet, and in turn had a tourniquet placed on his arm.

Mr. Doumount gave a final re view on the engineers badge, and next week there will be a test for those wishing to earn the badge. There was also instruction in second-class signalling.

Troop Leader Donald Blacklock, who attended the "Older Boys' Parliament" at UBC during the

The Summerland Review, Thursday, January 11, 1951

Singers and Players resumed heir rehearsals at the high school last Tuesday evening with a total attendance of 65, the best yet this eason.

It was heartwarming and encouraging indeed to have so many of our old friends, both Singers and Players, back with us once more and it was a pleasure to welcome so many new Singers and Players from both Summerland and Peniicton.

The chorus work of the Singers showed the value of previous practices and the evident enjoyment and interest of all participating. No wonder our musical director practically purred with satisfaction fornow at last would he be rewarded by this enthusiastic support for all the many hours of preparatory work which he has put in on the opera since long before the first rehearsal last October.

Mr. Lacey Fisher was able to tighten his cast for "Here Comes Mr. Jordan" into a more cohesive unit and is now able to proceed with confidence.

Plans also are taking shape in Mrs. Towgood's group with the help of Mrs. Mason and Mrs. Woolliams but we regret that Mrs. Towgood herself, owing to a damaged ankle, will be prevented for some weeks from taking an active part in these activities.

All other departments were also

The costume committee will now be able to proceed and in this connection we should mention that the costumers have asked us to place a definite order with them as soon as possible so that we shall be sure of having the costumes reserved for us on the dates required. This particularly affects the dragoons whose uniforms, including helmets and swords would be too difficult to produce here.

ment will now proceed to "manufacture" lyres, lutes, psalteries and other archaic instruments for the rapturous maidens, besides beginning painting of the actual screens and flats.

High School COMMENTS

PAGE THREE

That was just because there were so many parties during the holiday season, but of course you all know that our dances are always successful. Who am I trying to fool, eh?

There is going to be a dance this Saturday night so I hope to see everyone there as we haven't had a real dance for such a long time. It starts at 8:30 as usual and the admission is 25c.

There is going to be an election dance on Jan. 27. Music will be by Ken's Men (I think). There will be a list of eligible voters put up on the bulletin board at the high school this week. If your name isn't on it and you have a Teen Town membership card, just write your name and the number of the card on the list. The revision of votes will be closed on Jan. 15. Nominations will open on Jan. 16 and

close on Jan. 22. If anyone wants a nomination paper, they may be obtained from

Doreen Killback. By the way, kids, Teen Town crests are now on sale for only 35c so get one now from any T.T. council member. They are grey with maroon letters.

Don't forget that dance this Saturday night. Be seeing you all there.

EVERYBODY WELCOME

The workshops of the Royal Canadian Electrical and Mechanical Engineers are expanding rapidly — in step with the growth of the Canadian Army Active Force. The men of the R.C.E.M.E. are doing their part to make Canada strong.

Soldier-Tradesmen

of the R.C.E.M.E.

There is an urgent need for skilled tradesmen to man the workshops of this vitally important corps of "soldier-tradesmen". Skilled craftsmen are required to fill the posts of automotive mechanics, fitters, toolmakers, radar and radio technicians, instrument makers, welders, watchmakers, machinists and other key jobs.

> If you qualify as a skilled tradesman, there's a place for you in the R.C.E.M.E. You can serve now --- when Canada needs you — as an expert "soldier-tradesman".

has gone, another lies ahead of us. Everyone is anxiously awaiting the time when the new school is opened.

As there hasn't been a school column since before the holidays, a report of the high school banquet and dance has not yet been given. The annual Christmas event was a huge success this year, as it usually

After the banquet, before the dancing commenced, a visit from "Jolly Old Saint Nick" was enthusiastically accepted. Each person was given a small gift from the beautiful tree which stood in the corner of the IOOF hall. The hall was decorated gayly for the occasion. The social committee and helpers deserve credit for the wonderful job they did, also credit goes to those who worked so diligently in the kitchen,

to Mrs. Keyes (nee Miss Semak). The best of luck to you from all at SHS.

4

To enlist in the R.C.E.M.E. you must: . Be a Canadian citizen or British subject. 2. Be between 17 and 40 years of age. 3. Be single. 4. Meet Army test requirements, 5. Volunteer for service anywhere. REPORT RIGHT AWAY TO: No. 11 Personnel Depet, 4050 West Fourth Ave., VANCOUVER, B.C. . Help make A2088-80 Canada strong

FREEDOM Continued from page 1

C. E. Bentley and Mrs. H. Pares, School Board Chairman C. J. Bleasdale and Mrs. Bleasdale, Rotarian President Francis Steuart and Mrs. Steuart, Jaycee Les Rumball and Mrs. Rumball, and Mr. and Mrs. J. R. Armstrong,

Mr. Cliff Brown, president of the newly-formed Vernon Kiwanis club and Vernon Kiwanian Len McLeod were also present, although their arrival was delayed by the slippery roads. Mrs. Brown and Miss Doreen Johnston accompanied them.

Toasts to the ladies was given by J. E. O'Mahony with suitable reply by Mrs. Eve Fisher. C. V. Nesbitt gave the toast to Kiwanis and this was replied to by Father A. M. Meulenbergh in the absence of past Lt.-Governor C. Greeley of Okanogan, Wash., through sickness. Group singing was led by Char-

lie Nesbitt while solos interspersed Misses Shirley Schumann and an early hour.

INJURES ANKLE IN FALL ON KELOWNA STREET

Mrs. J. Y. Towgood slipped and fell on an icy street in Kelowna last Friday afternoon. Her ankle turned under her, and became quite painful and swollen. Through Xray later, at Summerland General hospital it was found that a bone was cracked. A cast was put on, and Mrs. Towgood is able to get around to a certain extent and is progressing favorably from the unfortunate accident.

Shirley Gardiner. These two young ladies were also encored in a pleasing duet.

New officers of the Kiwanis club are: President, Lacey Fisher; first vice-president, J. E. Jenkinson; second vice-president, Norman Holmes; secretary, Father A. M. Meulenbergh; treasurer, C. V. Nesbitt; past president, J. Y. Towgood; directors, Edward (Hilly) Smith, Jack Dunsdon, George Henry, Frank McDonald, C. H. Elsey, J. E. O'Mahony and W. A. Laidlaw. Following the banquet an en-joyable social evening was held, the program and were rendered by dancing to Ken's Men lasting until

Mrs. Frank Tilbe Wins Contest

The Summerland Review, Thursday, January 11, 1951

Prizes

Another contest prize has come to Summerland!, This week Mrs. Frank Tilbe, Peach Orchard, received word that she has won a Thor Automagic Gladiron as fourth prize in a British Columbia contest staged by the Maple Leaf Milling Co.

Mrs. Tilbe read about this contest and submitted a recipe using, of course, the Monarch cake and pastry flour as a base. She has been requested to go to Vancouver for the official presentation on January 17 but declined. Her prize will be for-warded to Summerland next

week. Mrs. Tilbe now joins the evergrowing list of Summerland women who have won major prizes in provincial and national contests, chief of whom is Mrs. Irvine Adams who won \$2,500 as first prize winner for Canada in a Lux contest.

VISITING ABROAD

Mr. David Wright was a passenber to Vancouver on Monday evening's train.

Miss Elizabeth Morgan left on Tuesday to enter Haro St. Children's hospital, Vancouver, to train as a children's nurse.

Miss Ruth Nesbitt and Miss Marion Richards who are attending Sprott-Shaw business school at Vancouver left for the coast by bus on Monday after spending a vacation at their respective homes here.

Mr. and Mrs. F. B. Bedford are leaving tomorrow night for Compton; Cal., where they will visit their daughter, Mrs. A. N. Griffin. They expect to be away three o four weeks.

es of snow fell.

Ann Semak Flies East to Become Bride of American Army Soldier

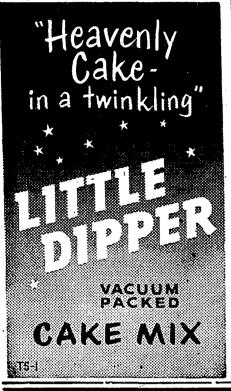

Watch for it...

NEXT WEEK WE WILL GIVE YOU

DETAILS OF OUR ANNUAL

Miss Ann Semak, daughter of Mr., on Friday, Dec. 22. and Mrs. T. Semak of Claremont, Alta., who is a member of Summerland high school teaching staff frock with orchid corsage and at the start of the Xmas holidays, flew from Penticton to Aberdeen, Maryland, for her marriage to Mr. Gil Keyes, formerly of Anacortes, Wash., now in the American army. The wedding took place quietly

and the second second

For the occasion the bride wore a charming blue taffeta afternoon white hat. Over this a muskrat coat was donned for travelling. To New York Mr. and Mrs. Key-es went for the Christmas weekend, visiting various places of interest and sightseeing, on their honeymoon. Back to Maryland where the groom had to take lectures, and then to Washington, D.C., for the New Year weekend was includ-

ed in the holiday. The groom is expecting to go overseas shortly, and Mrs. Keyes flew back to resume her teaching duties here.

Mrs. A. Turigan is Lutheran LA Head

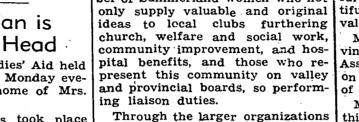

Christ Lutheran Ladies' Aid held its annual meeting on Monday evening, Jan. 8 at the home of Mrs. Fred Schmidt.

Election of officers took place and Mrs. A. Turigan was elected president for this year, with Mrs. E. Harbicht, vice-president.

The secretary is Mrs. Fred Schmidt who ably filled the president's chair last year. Mrs. J. Heichert will be treasurer.

A committee to visit the sick consists of Mrs. I. Nelson and Mrs. A. Lekei.

Mrs. W. Huva heads the refreshment committee again this vear.

an over-all picture of the work of various societies is obtained as well as continuity, sometimes lost sight of in smaller groups. Other women "free-lance" to other fields to the fields including education and rebenefit of their home-town.

Interesting, too, are the projects undertaken and successfully com- Mrs. J. C. Wilcox and Mrs. James pleted during the year. Mrs. J. C. Wilcox, president of the Hospital able two-year term as president Auxiliary attended the B.C. Hospitals' Association meetings at the coast, of which the auxiliaries are Mrs. James Shepherd, a member of now a division. Giving her report, Mrs. Wilcox found that Summerland auxiliary was the only one in the province which did canning for the hospital which they serviced. Many spoke to her regarding this after the meeting hoping to start such endeavors when they returned to their centre.

Purchase and installation of an oxygen tent at Summerland hospital was in itself a large undertaking, which was concluded successfully.

One of the services at the local hospital which gives much satisfaction and pleasure to members of the auxiliary as well as patients, has been the installation of the hospital basket. Twice a week members go to the hospital and take the basket from room to room and from bed to bed.

In it are small comforts such as combs, tooth brushes, hair nets, candy bars, gum, cigarettes, stamps and writing paper. These are sold to patients without profit and are a great help not only to patients who are from out-of-town and these who have few visitors, but to nearly every one hospitalized. It is a willing-to-be-of-help gesture and has been appreciated greatly.

As Well as on Home Front At the beginning of a new year, | work in Summerland, and for the past two years has had a delightit is interesting to note the number of Summerland women who not ful calendar printed showing beautiful views hereabouts and giving valuable publicity to this district. Mrs. F. E. Atkinson, a past provincial president of the Rebekah Assembly and Mrs. A. K. Elliott are on the provincial board of control of Theta Rho girls' club.

SOCIAL EDITOR . Mrs. A. W. Vanderburgh

Mrs. J. E. O'Mahony represents this southern Okanagan area on the provincial board of the Cancer Society and brings home first-hand information of the strides being made by this organization in many search.

From St. Andrew's Service Club Marshall last year finished an and secretary, respectively, of the Kamloops-Okanagan presbyterial. St. Andrew's church has been on the board of this presbyterial for many years; Mrs. Wm. Caldwell, of the Lakeside United church has been chairman of the community friendship committee of the presbyterial for several years, too.

president for the Okanagan as well as vice-president for the Koote-nay diocese. Mrs. N. O. Solly is recording secretary for the diocese, and a camp committee member of the Okanagan Anglican camp at Wilson's Landing.

Weekly during a large part of the year members of the Eastern Star met to make dressings for the Cancer Society.

Making these dressings is a provincial project and they are distributed free to anyone in B.C. needing them who is suffering from cancer.

Labor Lack Is Worry in Washington

"Washington State apple growers are very concerned about farm labor and speakers predicted an unprecedented shortage this year," declared A. W. Watt, on Friday at the Nu-Way Annex in describing the annual Washington State Horticultural convention in Yakima in December to the Rotary Club of erland.

highly-rated conference was ed in 1904 and is devoted prito talks and panels with resolutions in relation to the A convention, he described. ty items were on the pros of experts to debate the s of certain motives.

e Washington speakers were ed to suggest the government a pool of farm labor and in assistance from Hawaii Japan. If the government not act, then the growers d take the necessary action this line, Mr. Watt heard.

in theme of the four-day conce was the processing of fruit speakers described the steps taken to bring frozen conated apple juice to the fore. ent survey showed that 17 to rcent of American housewives been using concentrated orjuice whereas only two milbushels of apples were made apple juice in the U.S.

centrated apple juice could roduced at a lower cost than ame form of orange juice, it uggested.

Watt heard of the Appela-Co-op which is planning to ts growers, at the door when ls \$3 millions of its own stock members. Nearly all prohandled by this concern is essed and a wide variety of ssed products was listed by Watt.

is concern pays 3¼ cents per d for better grade apples and cents for B grade, he learned. eakers at the convention felt processing sales would not nto the fresh fruit sales," he asized, also pointing out that

but no insect has been found yet carrying Little Cherry.

Chemical thinning is still being studied as it is not certain yet just how much this type of spraying will do. The weather seems to affect chemical thinning more than anything else, and Mr. Watt declared that this method not only kills the pollen but shocks the tree. In wet seasons, the tree seems to get more shock than in a dry spell

Attempts are being made to find a color spray from experiments with hormones. A weak concentration of 2-4-5-T, a relation of the better known 2-4-D, has been used effectively to color early apples, but hastens their maturity.

A warning was issued that 2-4-D should not be applied too near for discussion, including six grapes as 200 acres of this fruit were damaged in a recent experiment, the chemical being applied by airplane.

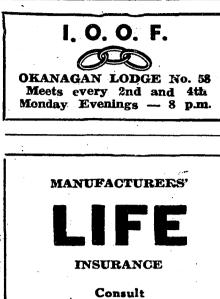

Mr. Watt also heard that in New York and New England McIntosh production is still going up and hasn't reached the peak. The Appelachian district reports Mac trees being taken out but production is still mounting.

Home processing of apples is decreasing, it was related, as the average house wife is not bothering making apple pies and other apple desserts as formerly. This means, Washington speakers stated, that more attention must be paid to processing apples.

One question was asked about the half million acre tract which will be put under production in the Columbia Valley basin, the reply being that there will hardly be any of the land set aside for tree fruits.

It has also been concluded that DDT in small amounts such as are obtained from eating fruit is not injurious to human beings. This decision was reached following an all-inclusive investigation staged in

The How, When, Where of **Personal Loans**

Here are Some Interesting Facts from the B of M People sometimes lose sight of the fact that making personal loans is one of the banks' more im-

portant functions. But, as Ivor Solly, manager of the Bank of Montreal branch at West Summerland, points out, your B of M manager is always ready to talk over finitely increased if it is listed [any situation in which a personal loan may be helpful to you.

Suppose you are faced with an emergency, or the sudden opportunity to make a good buy, and are short of ready cash. If you are in a position to repay a loan by regular instalments out of your income, the B of M can advance you the money. On \$100, for example, repaid in twelve monthly instalments, the interest charge comes to just 27 cents a month. You can be sure of fair, businesslike treatment at the B of M; just as you can be sure that anything you discuss will be held complately confidential. Mr. Solly deals with all comers according to the bank's guiding principle, "When you ask for a loan at the B of M, you do not ask a favor."

CANADA'S ONLY BOWL GAME played on New Year's day, The Garbage Bowl game took place on the Montreal West Athletic Grounds in Montreal with the pyjama clad Southside Bombers emerging as victors over the underwear attired Northside Combines (not combinations). It was rough going with plenty of chills for the battlers and much wear and tear on the uniforms as shown

in the above photos. The gridiron was covered knee-deep in heavy snow. The game only saw one touchdown as compared with the high-scores of the U.S. bowl games. The Southside ploughed through the snow in the second quarter for the T.D. after scoring a rouge in the first stanza to win over the Wolly Wollies 6-0. It was the second annual Garbage Bowl Game.

Lois Reid Named **Top Shuttle Star** Lois Reid, who spent part of her

summer holidays visiting Dr. and Mrs. C. C. Strachan last year and who made a host of friends during her short stay here, has been named 1950 national badminton champion. The Vancouver girl was first among lady badminton players while Allan Williams of Calgary and. Daryl Thompson of Vancouver were given equal status at the top of the male contenders.

Ski Championships Billed for Several Interior Points

Ski enthusiasts in this district are looking forward to several outstanding ski events which will be held in Rossland, Princeton and Revelstoke all within easy travelling distance, this winter.

First of these will be the western Canada championship downhill and slalcm races at Rossland on February 3 and 4.

At Princeton February 15 to 18

Fifty Go to **Meadow Valley**

There were fifty skiers at the Meadow Valley ski hill last Sunday, travelling in the ski club bus and private cars. Road condition is good, but it is advisable to carry chains, skiers report.

Instruction by Herb Woods and Francis Gould was given between 12 noon and one o'clock, which was quite helpful. It is hoped that next Sunday more instructors will be on hand so that more individual attention can be given to pupils. It was found impossible to send any boys to Princeton for the jumping instruction last Sunday but this coming weekend there will be jumping instruction given on the Meadow Valley hill.

Donations for the first aid kit are being solicited and may be handed to the house committee. The bus leaves the Nu-Way at 10 o'clock next Sunday morning.

assisted the Legion scholarship fund.

It is gratifying to the Legion that a local boy, Ron MacRae was one of scholarship winners, Mr. McLachland remarked.

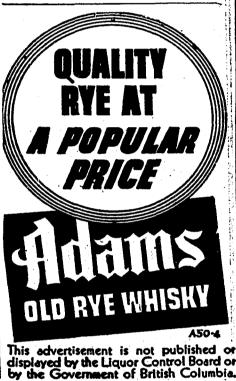

Various other worthwhile ventures were assisted, the list of donations totalling \$314.98, he recalled.

The Legion has not forgotten its building aims, he observed, and when certain obstacles are removed then plans will proceed. The branch has about \$5,000 in its building fund the audited statement revealed.

Better support for the poppy campaign was accorded in 1950 than ever before, he continued, also expressing the branch's appreciation of the Summerland Band support in leading the Remembrance Day parade.

The Legion branch "started the ball rolling" in regards Ellison hall. "We think that it should either be renovated or removed as if it is left in its present state it will be an eyesore in a beautiful park," he observed.

Reports of committees showed that 12 new members were added to the Legion list, while a number of former members returned. Besides several small card parties, the Legion assisted the Ladies' Auxiliary in staging the Valentine party for veterans' children, staged highly successful amateur night and smoker and sponsored a New Year's Eve dance which was not grant still on hand, the 1951 amount so well attended.

PROPERTY

The Company owns outright six crown granted mineral claims in the Slocan Area of British Columbia, approximately 3 miles by road from Sandon, B.C. The property is equipped with buildings and machinery, the Vendors having spent some \$50,000.00 on development and equipment. Previous operators have extracted an appreciable ton-nage of ore which at present prices would average \$140.00 per ton.

FINANCING

Completion of present financing will net the Company Treasury \$67,500.00. This amount is estimated to be sufficient to bring the property into production until sufficient ore is proven to justify the construction of a mill on the property. In the meantime ore can be milled at one of several custom mills in the area.

Three Million Boxes Of Apples Left Unscholar Librarian VICTORIA **At Year-End Says Lander**

With four and a quarter million boxes already sold, B.C. Tree Fruits Ltd. has about 3,604,998 boxes of apples to dispose of from the 1950 crop, J. B. Lander, sales agency sales manager, revealed to the BC-FGA convention in his lengthy annual report delivered Tuesday after-noon. Of this amount about 600,000 were earmarked for the United Kingdom.

Asked about the 900,000 boxes of McIntosh left unsold at the year end Mr. Lander expressed every confidence that they would be cleaned up without too much effort as 305,000 boxes are earmarked for the United Kingdom to be shipped this month.

With shipments made this year to last weekend about 475,000 boxes of Macs remained to be sold.

Other holdings at the yearend were: Delicious, 395,875; Red Delicious, 438,720; Staymans, 91,604; Romes, 184,550; Winesaps, 837,147; Newtons 693,328. Wagners, Spitz and other sundries make up the balance.

New Contract Major Move This Year

It was in 1939 that the BCFGA convention held in Vernon dealt with many of the major plans for formation of a central sales agency, B.C. Tree Fruits Ltd.

Today, the annual growers' parliament is meeting in Vernon again and President Ivor J. Newman, who has proved once again his ability to control such a large gathering in an efficient manner, referred briefly to this fact in his initial address to the convention move cherries in volume, it is ne-Tuesday morning.

His opening remarks were preceded by an invocation by Rev. G. W. Payne, and a welcome from Mayor T. R. B. Adams, of Vernon.

Mr. Newman pointed out that growers should do nothing to upset the present marketing setup, although he realized that "by no stretch of the imagination could we say that we were satisfied with the returns of last year."

He advised growers not to grumble about a few thousand dollars spent in advertising and asked the producers to show confidence in their leaders or get rid of them.

Mr. Newman detailed a large number of agricultural conferences he attended last year and some of the major subjects discussed with governmental authorities. Spirit of Partnership

He lauded the spirit of partnership which has been built up between the industry and labor through the work of the labor ne-

Up to January 10, Tree Fruits had disposed of 8,326 cars of fruit and vegetables compared to 9,915 at the same date in 1950, the difference being mainly the reduction in soft fruits.

Mr. Lander made a complete analysis of the crop movement by varieties. In part his report follows:

Cherries

duced considerably, due to winter | Hon. J. G. Gardiner, federal mindamage. Our carlot express ship- ister of agriculture, Ottawa, and ments amounted to only 124 cars, as compared to 41 cars in 1949. Our sales to Eastern Canada in 1950 were 20 cars ,as compared to 109 cars sold in Eastern Canada in 1949.

We were able to obtain rather high prices for cherries last year due to the light crop. It should be emphasized, however, that it would with the provincial cabinet that not be possible to obtain these high values on a normal cherry crop, for the reason that, in order to cessary to market at a price which will enable the housewife to preserve them. In 1950 a large proportion of the cherries were bought by consumers in small quantities for eating in the fresh state, and there was not the usual amount of preserving done by the housewife.

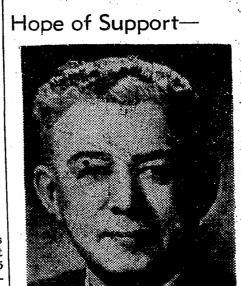

SO₂ Cherries

Cheries shipped for processing this season amounted to 155 tons, compared to 640 tons in 1949.

Over the past few seasons it has become apparent that more and more we would be facing Italian competition in this field. Their offerings are on the basis of grad-ed pitted and sized stack ed, pitted and sized stock, whereas ours have been on unsized, unpitted basis. In order to meet this situation it

was decided to experiment with a pitting and sizing operation this season, and arrangements were made with B.C. Fruit Processors to do this work

The experiment has proved ul. and stocks are well

Ap1 51 No. 3

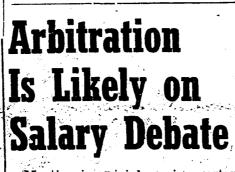

H. R. BOWMAN

Production of cherries was re- has returned from a talk with Rt. declared that no decision can be made in regard to the B.C. fruit growers' application for assistance to those growers who lost trees in the 1949-50 severe winter until the federal government has considered the situation.

Mr. Bowman returned from Ottawa on Tuesday and conferred day.

Yesterday it was stated from re liable sources that Mr. Bowman had declared that it was up to the federal cabinet to make a decision and that the provincial government would implement the Ottawa suggestions for aid, if any.

An allowance for loss of trees and their removal, repayment for re-planting costs, and a low interest-rate loan to growers in distress because of loss of fruit trees were the main suggestions of the BCFGA emergency committee which submitted a brief to Victoria on the grave crisis being faced by some interior tree fruit growers.

Meeting in special session yester-

Streamlining of Crop as Advocated by **Sales Agency Leaders, Loyd and Lander Passes by Single Vote at Convention**

THE HER HALL BEARY HALL HALL BEARY HALL BEAR

Eighty-one delegates took two diverse opinions on the most important issue of the BCFGA's 62nd annual convention Tuesday afterncon when they split 41-40 to adopt a resolution which called for the "tailoring" of the fruit crop in any year in which the sales agency deems that it will be difficult to dispose of all the produce.

West Summerland, B.C., Thursday, January 18, 1951

The motion passed but only by the one-vote margin, despite the fact that both President A. K. Loyd and Sales Manager J. B. Lander of the sales agency, had based their annual reports on this need in the industry.

It came as a complete surprise to most persons attending the convention that so many delegates would hold an opposite view to the accepted leaders of the sales agency, B.C. Tree Fruits Ltd.

Summerland delegates voted en bloc in favor of the suggestion from South and East Kelowna to eliminate undesirable sizes. In fact, from Peachland south to the border only Penticton delegates were against the move to "streamline" the crop.

Great Interest

nesday morning.

manner.

The entire picture was introduced by President A. K. Loyd of Tree Fruits when he reported that "we are faced with a situation which, marketing conditions, unless change, presents serious difficulty". He declared that "our apple crop during the last decade has increased from an average of about five million to an average of nearly eight million and prior to last season's disastrous frosts it had at least a potential of ten million boxes.

"During that same decade our markets have been steadily curtailed by conditions over which we have had no control

"Fruit juices and byproducts do not present the same sort of solution to a dessert apple industry, such as ours, that they do in other sections. Consequently, unless we can devise some remedy, as little harmful as possible to our economy, we are confronted with a situation where from year to year an unknown quantity of fruit may be presented for marketing at harvest time with, under present conditions, a strictly limited outlet for consumption.

"It should be stressed also that higher freight rates are every bit as effective as currency restric1 tions and adverse subsidies as an Frank Harris of the Vernon News, agent for curtailing markets.

Mr. DesBrisay declared that his Need Insurance Scheme

board of directors have repeatedly Some sort of insurance scheme expressed the thought that the profis overdue, or sooner or later we cessing outlet should be made avwill be confronted with an imposailable primarily to the sales agensible situation, in which it is not humanly possible to distribut goods, upon which a considerable investment has been made in our artificially-limited markets at price levels which will even recover the investment." Mr. Loyd continued. He referred to the often-heard

CONVENTION SIDELIGHTS

(By J. R. Armstrong)

VERNON-Keen interest is the keynote of this 62nd BCFGA convention which is drawing to a close this afternoon after considering fifty-odd resolutions besides numerous reports and important addresses . . . Summerland has the biggest single delegation and every one of the voting delegates has been on hand for all sessions . . . Only three women could be observed on the floor of the convention the opening morning . . . Two were from Westbank, Mrs. F. W. Clarke and Mrs. Pritchard, while the third was the wife of Kamloops Delegate Peter Wing . . . they were given an ovasion.

One of the most respected oldtimers in the fruit industry is R. H. McDonald, of Vernon . . . He isn't well known to the newcomers but "R. H." was a prominent figure in fruit circles a few years back . . . He is a past president of the BCFGA and the Canadian Horticultural Council . . . When singled out by President Ivor Newman he was given a big hand.

Photographers had a field day on Tuesday and flash bulbs were exploding on every side . . . Probably the most "patient" look of any person photographed was that on President Newman's face when he was asked to "sit" for a "shot",

The press table is as crowded as usual this convention . . . Sid Godber of the Penticton Herald, R. P. MacLean and Beaver-Jones of the Kelowna Courier, Bob Ley and A. J. Dalrymple of the Daily Province and Bill Rose of the Vancouver Sun, besides your editor from Summerland ... Torchy Anderson beloved editor of the Province was supposed to be present but had to cancel arrangements at the last

rotisting committee.

"With the mutual understanding of each other's problems, that feeling of responsibility for the welfare of each other and the determination of both groups to talk things over around the conference table several times a year, a good foundation has been established for building of peace and harmony in the years to come," he

considered. After dealing with the survey and better fruit committees, the subject of increasing costs was dealt with by Mr. Newman. The BCFGA delegates its authority to B.C. Tree Fruits Ltd., which body has filed the industry's complaints regarding the proposed freight rate increase which is now before the board of transport commissioners.

"You can be sure that a vigorous effort will be made to protect our interests," he assured the convention.

Mr. Newman spoke of a conference which was to have been held January 8 between Hon. Harry Bowman, provincial minister of agriculture and Rt. Hon. J. G. Gardiner, federal agriculture minister, on the subject of last winter's tree kill.

"It is hoped that some word as to the outcome will be received before the end of this convention," he added.

New Grower Contract

"The most important task, prior to the harvest and selling of the 1951 crop is to see that the new three-party contract is signed by all growers," he emphasized.

sold at prices that compare very favorably with Italian quotations. Apricots

From a high figure of 603,339 our crop dropped to 26,723 lugs some apricots sold to the canners. Apricot importations from the United States reached probably an all-time high. A survey indicated that a total of approximately 350,-300 crates were imported from the United. States, principally from

California. Between the quantity being rather excessive, and the fact that the consumer was not ready for apricots so early in the season, some of the importations were sold at comparatively low prices when they reached an advanced state of maturity.

Despite our very short crop, we had to move the greater part of our tonnage to the coast markets as the prairie markets were unreceptive due to the presence of more apricots than the consumer was prepared to purchase at that time. Peaches

The greatly reduced crop of beaches this year, the total amounting only to 141,521 crates shipbed fresh, found a receptive market, but it was most fortunate we and the Vancouver outlet available to us during the period of the railway strike. Some of the prairie narkets were deprived of their share of the quota.

Plums

Big B. C. Baptist Convention May be

Our total sales on the fresh marset amounted to 51,519 lugs, aproximately one-third of the am-Continued on Page 4

day alternoon, Summerland school teachers decided to present a threepoint program to the board of school trustees of School District No. 77 (Summerland).

The proposals requested that a lugs of apricots marketed in 1949, continuation of the present contract, four percent rise for every shipped fresh in 1950. There were five points in the cost of living, be | Washington, Mr DesBrisay pointput into effect for 1951 . . .

Or. that the negotiation or arbitration proceedings of the Penticton teachers and Penticton school board be adopted by the Summerland teachers and school board . Or, that the Summerland teachers will accept the Summerland school board offer of arbitration.

Decided on Policy

The Summerland school board, at a meeting held last week, decided to comply with the decision of the Okanagan branch of the B.C. School Trustees' Assn. and offer the teachers a three percent raise for every five points' increase in the cost of living.

The last arbitration award gave the teachers four percent increases for every five points up to 165. The cost-of-living index is now over the 170 mark.

Vernon teachers were reported in the Vernon News last week as having proposed a three percent compromise with their school board and this arrangement has been accepted.

Shortly after this decision, the school boards in the Okanagan which had not already reached a decision with their teachers, decided to stand pat on the three percent policy.

Actually, on the average it means a basis of \$140 per year rise per teacher, at three percent. At four percent, the rise would be \$170 per teach-

ed decision was reached, offering toos,

mitted themselves to a basis of arbitration in the valley, then it is expected that the local dispute on teachers' wages will be committed to arbitration.

However, if decisions are made a Summerland arbitration is con-

Mr. and Mrs. W. J. Beattle returned on Sunday from an enjoynoints in California.

cy and that requirem above diversions of commercial fruit would then be drawn from cull accumulations. "In this case the total proceeds would accrue to the general pool and the unused culls be discarded."

There is similar thinking in ed out and quoted an editorial from the Wenatchee World in respect to his contention.

The 1949-50 season saw 24,000 tons of apples processed and the net payment to the grower was \$6.04 per ton. Sales amounted to \$1,428,206, Mr. DesBrisay reported.

This year, the bank loan will be paid off and the growers will own outright, without any mortgage, the plants and equipment of B.C. Fruit Processors Ltd.

It was revealed that apple juice production has not reached last season's record output so far, as 38,330 cartons have been processed into apple juice against 47,-685 cartons in 1949-50,

Mr. DesBrisay referred to the disastrous fire which wiped out the dehydration plant two days before it was scheduled to start operating. In considering resolutions on the processing company, a combined

processing returns into the fresh apple pool was passed on to, a BC-FGA committee to investigate its feasibility.

company would be of more value to the industry if it dealt with commercial varieties of apples instead of culls.

Powell in Discussion

W. R. Powell, Tree Fruits governor and Processors' director, expressed his gratification that such work of the processing company.

He considered that it has been a "stupid proposition" to saddle the processing company with the responsibility of all cull disposal. He considered that in the processing business a pride in industry must be created and that it would be foclish to undertake the processing of culls when there is an overabundance of fruit in commercial sizes to draw from.

Max dePfyffer, Kelowna shipper, replied that the packinghouses, under the proposed setup, would have to handle cull apples and get no return for them.

H. C. McAlpine, Osoyoos, replied that in no other product in the fruit industry do cull fruits have

any particular preference, The resolution from Summerland-Ponticton carried.

suggestion that cee grade should be abandoned entirely but he gave three reasons why this could not be done, pointing out as well that "the complete absence of this grade might necessitate a lowering of the price on the two higher grades in order to maintain volume movement."

"If we have to accept the fact of much diminished markets for some years—while at the same time having no clear indication Penticton for the past several as to when and how they might expand or contract-we must be able to make arrangements to adjust our tonnage at the beginning of the harvest season to meet the situation as it appears from year to yoar," he emphasized.

Throughout his report he stressed the vital necessity of obtaining accurate estimates of orop production well in advance of the marketing season so that the sales agency could be guided in its preparations to sell a certain tonnage,

He felt that if the crop is very large and there is no apparent bet-Summerland-Penticton move to put | terment in the outlets available, then certain sizes would have to be eliminated, and the extent to which this is done would govern the size of crops it is thought desirable It was suggested the processing to handle in the interests of the industry as a whole,

Mr. Loyd stressed that there are cortain count sizes which have much greater market acceptibility than others. Therefore the less un- boarding the evening train for desirable sizes would not be pack- | Calgary . . . By now he is in Tor-Continued on page 12

minute. . .

Everybody marvels at the efficient job which Charlie Hayden, secretary of the BCFGA for these many moons, always seems to do at these conventions ... Of course, he has efficient secretarial help to give him a boost . . .

Besides the Vernon growers, the Vernon Board of Trade has been to the fore in assisting in conveniton arrangements, topping all other efforts with the splendid banquet in the new Allison hotel last night . .

And the many visitors who have descended on this city are being accommodated in a less crowded manner than has been the rule in years . . . The new Allison has made a great deal of difference to Vernon's hostelry accommodation. . .

Among the Summerland delegates the big question is: "How did George Stoll tear himself away from the new arena long enough to be a delegate?", . .

Reeve Ned Bentley has been prominent in discussing resolutions while Councillor Eric Tait, C. J. McKonzie, Walter Toevs, Walter Bleasdale, Henry Mohr, Jack Towgood, Harvey Walton, are the other delegates who bear credentials in support of Summerland's near 400 growers . .

Around the hall can be seen other Summerlanders such as Alex Watt, Harry Brown, Dr. Dick Palmer, Dr. Harold McLarty, Dr. Charlie Strachan, Stove Canning, Ivor Solly, Lou Lewis, among othors.

Dr. Jim Marshall was present for part of Tuesday's session before Continued on Page 4

EDITORIAL A Representative Voice Needed

AST Thursday evening twenty persons could be observed deliberating in the IOOF hall regarding board of trade affairs. The second most important group in this community, at its monthly session, had one-fifth its membership present.

This is a sorry state of affairs. Not only has the attendance at monthly board meetings fallen away off but the actual membership in the important board of trade has dropped down the last two years until it is only barely representative of the district.

The number of businessmen, especially retailers, who have failed in their civic responsibility by not bothering to belong to their most important group is an alarming situation.

No community can be said to be alert and alive to its possibilities if it hasn't an able and representative board of trade.

Granted, the municipal council can speak for the municipality on many affairs of civic importance, but it is to the board of trade, as a cross-section of the community's business enterprise, that governments and other interested bodies look to for guidance.

A new year in trade board affairs is looming on the horizon. The famous board banquet date has been set. Next month will come election of officers.

If Summerland is to have a strong voice in any major decision affecting the municipality from a local, provincial or national standpoint, then businessmen must lend their support.

Summerland boasted for years that it had one of the biggest and most active boards of trade in the interior. Today that boast cannot be re-iterated. Bt it cold become a reality with just a little effort on the part of business generally.

Should Name Co-ordinator

ELOWNA has set the pace and it is up to other Okanagan municipalities to follow suit. Kelowna has named a co-ordinator of civil defence and is preparing its campaign to coincide with any move on the part of the provincial government.

For some time now Okanagan municipalities, with Summerland to the fore, have been crying for provincial action to co-ordinate local forces so that a province-wide setup can materialize.

The provincial government has done its part in setting the ball rolling by appointing a provincial co-ordinator. Now, each municipality should follow suit and lay out a plan for local defence and emergency measures in time of attack by a foreign power.

We do not think that there is any particular rush to get all details outlined, but a start should be made now to set down the broad basis of a civil defence program in each municipality.

Probably the Okanagan's chief role in case of attack would be to care for those evacuated from | tion early this year.

the densely-populated coast centres. But there is a possibility that the Okanagan could become a main artery for military supplies on a north-south axis. In that case, Okanagan highways, cities and towns would be subject to enemy air attack.

Kelowna Co-ordinator J. H. Horn, who has already laid down some basic observations on a civil defence program for that city, points out that the ferry operating between westside and Kelowna would be subject to air attack.

But, that would be an elusive object for attack compared to the Summerland-Peachland highway which, if blocked off, would hamper the northsouth traffic flow quite effectively.

This is a sobering thought when brought that close to home. It may never come to pass, but it would be far better now to believe that it is an eventuality and make preparations well in advance than to be in turmoil later.

The municipal council, board of trade and Red Cross group would do well to consider some ac-

AST week the Cranbrook Courier wrote an edi- | continue to fill most admirably the needs for the torial entitled "Happy Scenes at Centre". The promotion of winter, as well as summer recreation. Figure-skating classes are under way there now which will in times to come provide entertainment for the older members of the community. This kind of activity should be fostered and supported by every responsible member of the community.

munity? I ask you?

There is no doubt in my mind that the extra revenue for the proposed hotel would come from the legal sale of liquor, but also quite a part of the revenue would go to swell the revenue of the brewers who, I pelieve, are largely behind this move in Summerland.

From a purely business standpoint I believe it is bad business from a moral standpoint it is unthinkable.

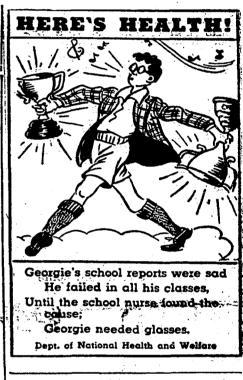

Since my letter of a week ago was printed, only two people have spoken to me of it, and those two not in any definite voice or manner.

Now what are we going to do about it? I ask you and You and YOU.

> Sincerely, TOM GARNETT

High School COMMENTS

The senior council held an assembly for the entire senior student body last Friday. President, Don Allison, proved competent in maintaing order which helped make the assembly a success. Amy Yamabe took her stand as _ etary. President Allison told the assembly that a new constitution is to be drawn up with various amendments, agreeable to the students.

As a result of much discussion. a cheer leaders' club is being arranged. All girls are welcome to join. The best cheer leaders will be chosen from the club members to form an official cheer squad, which will attend all games.

There was a great deal of discussion about the SHS song. The tune was borrowed from Notre Dame, although the school supplied her own words. Many agreed that SHS should have something original in a school song, not borrowed material. It was finally passed that a period of two months be given in which any student may try his hand at writing a new set of words to a different tune. There was discussion of a prize being given to the one whose song is chosen. If this plan fails, then the old song will be kept, but the wording might undergo alteration.

Mr. Macleod addressed the assembly on the matter of the Cadet corps, which is being arranged again this year. Cadet meetings are being held in the evenings. A very interesting program is being arranged, so any boy wishing to join should contact Mr. Macleod immediately for further informavion.

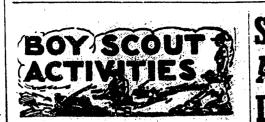

Mr. Greer gave the assembly a little "pep-talk" about ' school -sportsmanship. It is hoped that the students will show better cooperation in the future.

Robin Fisher was appointed di rector of the ski committee. He reported that it is hoped a valley ski tournament will be held here in February.

The hour long meeting closed with the singing of God Save The King.

On Tuesday, Mrs. Keyes was presented with a small wedding gift by a number of her grade 12 students. It was a lovely framed local scenic view.

That's about all from SHS for this week.

This week's attendance dropped a bit to 26 but it is hoped will return to normal next Tuesday. In the patrol competition scores now stand at Eagles 193, Hawks 190, Buffaloes 163 and Beavers 147. Each badge adds 10 points to the patrol and a King Scout and first class Scout badge 20 points.

Mr. T. S. Manning examined for the fireman's badge and passed Scouts Doumont, Blewett, Coggan and J. Pohlmann. Recruit Cuthbert completed his tenderfoot. Mr. Doumont completed his instruction on engineer's badge and will give an examination next week.

Patrol instruction covered bone fractures and application of splints. ASM Munn gave second class signal instruction.

Notices-Next meeting Tuesday, January 22, Youth Centre. Scouts are reminded of their 25 cent registration fee. Duty patrol-Hawks. First Summerland Cub Pack-The pack meets every Monday evening from 6:30 to 8:00 p.m. at the Youth Centre. There is still room for a few more boys, ages 8 to 10. Fcr further particulars phone Mr. J. Eowmen, Cubmaster, at 5856. See that your boy joins the Cubs.

2nd Company

At the first Guide meeting of the new year a discussion took lace on ways to raise money for our company funds. We will be meeting with the 1st company on Friday night, and will have an opportunity there to discuss it further.

A review in whistle and hand signals was held, after which two stalking games were played. .Instruction in knots and signalling was given, and Eileen Wilcox pass-

ed her second class semaphore. A Christmas card was received by Company Leader Frances At- next meeting, Friday, Jan. 19 at kinson from her Guide pen-pal in the Youth Centre, 7 p.m. Sweden. It has a picture of two Swedish Guides raising the flag birds 31, Canaries 30, Swallows 25, joy today.

Scouts-Cubs Are Progressing Legion is Told

Activities Page

Under the guidance of the Canadian Legion, the 1st Summerland Boy Scout troop and the newly-formed Wolf Cub pack are progressing favorably, the annual meeting of the Canadian Legion held on Wednesday, Jan. 10, was informed by Scoutmaster D. V Fisher.

There are 34 members of the Scout troop, with a waiting list, he declared, four patrols operating within the troop. Assistant Scoutmasters are H. A. McCargar and David Munn.

During the past year the main summer camp was held besides several weekend camps. A successful variety concert was staged while the Scout troop augmented its funds to the tune of \$104 by its apple tag day.

More Summerland Scouts than any other South Okanagan troop were successful in passing the bronze arrowhead course at Penticton while three other Scouts passed their silver arrowhead course at Kelowna.

The Cub pack was started in October under the leadership of John Bowen and had seven Cubs. Today there are 13 and before summer the full complement of 24 Cubs is expected to be enrolled. Dr. Fisher reported.

and it is interesting to see how difference their uniforms are from our own. They were knee length trousers, and jackets and hats of a deep blue shade, with red sox, and a yellow blouse.

On Wednesday afternoon Mrs. F. E. Atkinson is testing Guides for their laundress badges and arrangements for passing the needlewoman's are being made for next week.

Any girls wishing to become Guides will be welcomed at the Patrol marks: Robins 32, Blue-

Personal Planning for Homemakers' Booklet Is Available Now

To help people meet the prob-lems of today's high cost of living, a bright little book, published by the Bank of Montreal, has just made its appearance. It tells a story of budget-planning-how to make the most of income while cutting down financial worries. The booklet, "Personal Planning for Successful Homemakers"-available at all B of M branches for the asking-has been tested before being put into general circulation.

Tried out on a limited basis at the B of M booth in last year's Canadian National Exhibition at Toronto, the personal planning idea drew enquiries from a host of visitors. Correspondence since received at the bank's head office indicates that it is helping a good many people to solve their financial problems.

What's new about Personal Planning, as compared with every day budgeting?

The difference, B of M officials say, lies in scope and emphasis. Personal Planning goes much farther than budgeting. Where the latter is often restricted in scope to suggestions for better family bookkeeping, Personal Planning, as its name implies, puts the person before the plan. It takes account of human nature first and recordkeeping second. This broad approach not only takes the boredom out of budgeting, but makes for success on a realistic basis.

In line with its human approach, Personal Planning does not urge "standard" budgets upon people. On the contrary, the B of M, which has been dealing with the financial problems of Canadians of every occupation for over 130 years, believes that few individuals benefit from trying to fit their special needs into a set of statistical averages. Frustration and loss of interest in budgeting are likely to result, the bankers say.

In contrast, Personal Planning takes the attitude that the budvice versa. Thus, it takes into account not only rent, food, insurance and the like, but the planner's aims and also his need to en-

reasoned that the nine-trick contract was more likely to succeed. South in each case was held to 9 tricks: A Spade, Diamond or Club lead presents South with Three No-Trumps. At one table, however, West made the "safe" lead of **910** and played well in refusing to take South's **•**K at trick 2. Declarer cashed two more Hearts and led Diamonds again; this gave West three tricks. but he now had to lead a black suit. The con-tract fails if South is in a hurry to cash all the Hearts.

On Tuesday evening Singers had their first "stand-up" practice for Patience. It all looked of course like a square dance gone very wrong with the usual right turning instead of left turning, and processions ending in mob scenes. But now there is an added excitement and confidence which is beginning to show up in the quality of the chorus. From just numbers the songs are putting on the personality of parts within the framework of a whole-are beginning to shadow forth the opera in its entirety

instead of in its separate numbers. It is from this apparent confusion that with application in a few weeks we shall have attained the precision and beauty of a final production. The sooner we can all have those words memorized and so dispose of those books which get is made for the individual, not hamper proceedings the sooner shall we be able to begin to polish our Patience. Will Singers please take this to heart during the week before the next practice.

> Mrs. G. Brown, who has undertaken the costuming, added to the general air of progress and achievement by having the men measured for their dragoon uniforms. OWL CARD PARTY WELL ATTENDED

Seven tables were filled at the CWL card party held in the church hall on Tuesday evening, Jan. 9. Whist, bridge and cribbage were played, and prizes given in each

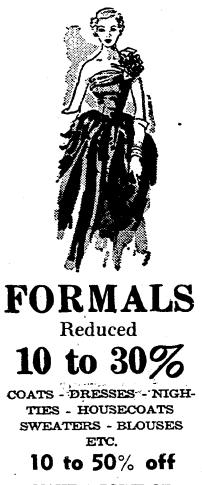

group. Mr. Schnurr was first in whist, with Mr. V. Polesello holding the low score. In the bridge games first prize was won by Mrs. W. Schwab, and consolation by Mr. C. Menu. Mrs. P. Johnston held high tally at cribbage, and Mrs. A. Bontheaux won the other prize.

Mrs. Ken Smith and Mrs. Charlie Betuzzi were hostesses for the evening, and served tasty refreshments.

The parties are to be continued throughout the winter months.

The LINNEA'S January Clearance Sale

Continues this week as strong as ever -----**Bargains Galore**

Continued from page 1 onto addressing the Ontario Fruit

& Vegetable Association convention . . . He really wanted to stay in Vernon, though .

Walter Toevs had his overcoat taken by mistake . . It passed through three hands before being returned to its rightful owner . . . He is still missing his gloves, however . .

Best crack of the convention was directed at Summerland . . . For years past Summerland delegates have always tended to pour oil on the troubled waters; to take the attitude that the king can do no wrong... On the other hand, Oliver growers have generally been to the fore in criticizing actions of the fruit industry officials and often have been quite abrupt in their demands for explanation . . .

But all this was changed on Tuesday when Oliver delegates presented three resolutions of commendation, one of the general plan of central selling and pooling system, another in appreciation of the services of A. K. Loyd and his staff and another to William Darroch who produced a handy booklet on

pooling ... W. H. McIvor presented the Oliver endorsation of central selling sons, reveals that the consumer with an able brief on the history of the fruit industry . . . But he prefaced his remarks with the acknowledgment that this was a strange departure from the usual Oliver approach to BCFGA conventions . .

"It is not the practice of Oliver to bring complimentary resolutions to these conventions," he declared as the convention laughed. "That one was for Summerland," he quipped, intimating that for years this had been Summerland prerogative and now Oliver was turning the other cheek . .

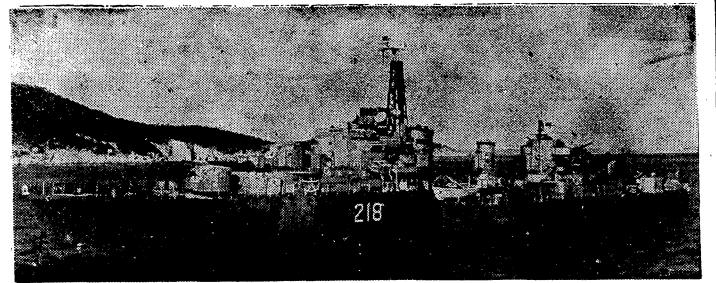

When he concluded, Reeve Bentley came forward to the mike and laughingly remarked: "On this oc-casion Summerland is backing Oliver."

But George Mabee, one of the stormiest petrels of the fruit industry, and also a prominent Oliver grower, had the last crack, when he complimented Summerland on at last agreeing with Oliver . . .

CPR is well represented at this convention, among those present being: F. J. Morris and Chester Coombs, Winnipeg, supervisor and inspector respectively of perishable traffic; J. R. Almey, Winnipeg, general agricultural agent; from Vancouver—Harry McDonald, district express rep.; G. W. Morris, express traffic rep.; J. F. Magorm public relations officer; also Bert Chapman, of Kelowna, district freight agent and E. Broom, of Vernon travelling freight agent.

Today, W. Manson of Vancouregion of the CPR is arriving.

The Summerland Review, Thursday, January 18, 1951

BATTLE-WORN-Canadian destroyers serving with UN forces are beginning to show the outward effects of long periods of duty in Korean waters. Sparkling with fresh paint when they left Esquimalt in July, they have taken on the look of battered sea-dogs. This is HMCS Cayuga, which headed the withdrawal and bombardment operation at Chinnampo early in December.

MORE ABOUT THREE MILLION

Continued from Page 1 ount sold in 1949. Plums are not gaining in popularity. Each season the demand seems to be slackening, and inquiry, as to the reanow seems to prefer prunes. Another reason is that we are too far north to produce a plum that will satisfy the dessert trade.

Prunes The total crop was equivalent to 495,660 packages of which 407,-562 packages were shipped to the fresh market. This compares to a total crop in 1949 of a little over one million lugs.

The quality of our prunes in 1950 was on the average considerably better than in 1949, and this assisted greatly in the marketing of the crop. We are quite convinced that it is good business to ship only No. 1 quality during the main part of the season.

A well-developed, well colored prune produces an excellent home canned product, and one which will encourage the housewife to repeat her purchases the following year, but the same cannot be said of undeveloped, immature fruit. Therefore, in his own interests the prune grower should adopt whatever horticultural practices are necessary to produce a product which will result in consumer satisfaction. Grow ers are to be commended on their efforts in this regard last year.

Bartletts

Total sales to the fresh fruit market this year were 167,922 boxes, compared to 239,566, or 70 percent of 1949's production. Whereas we liveries to the processors this year had distribution all over Canada in were 43,254 boxes, and we have ver, vice-president for the Pacific 1949, the bulk of our Bartlett ton- still to be delivered 89,529 boxes. nage moved into the western Ca- Apples CNR's chief representatives are nadian markets this season. The iety without encountering a great deal of sales resistance. In the southern districts, Bartletts ran to the smaller sizes, and permission was granted to pack down to 210's. We also sold small size Bartletts and Flemish to the canners below the minimum size of 210s.

fresh state. However, in the case of Hyslops, markets were not receptive toward the tail-end of the crop. After the fresh market was filled, we tried continually to induce the canneries to purchase further quantities, and were successful to the extent of 500 tons. This did not quite clean the crop, and we had to seek outside markets, eventually disposing of the remainder to the United States. **Cannery** Sales

Sales to canners were as follows: **Cannery** Cannery

1949 1950 201 tons 285 tons 160 tons 954 tons 571 tons 6114 tons 72 tons 67 tons 726 tons 821 tons 1273 tons 2279 tons 669 tons 772 tons 226 tons 14 tons 494 tons 135 tons 4000 tons 3600 tons Jam: Cherries, 1950, 28 tons; 1949 130 tons; apricots, 1950 18 tons

The soft fruit sales to the canneries were materially reduced due B.C.

tion to the increase in cannery apple sales. Since the addition of sugar to their apple sauce product, canners are utilizing more apples in this pack. The figures quoted above do not include dell'veries to. the B.C. Fruit Processors. Our de-

Bridge Commission Plan is Supported by Trade Board

Support of the Summerland Board | the coming year. of Trade to the idea emanating from Hon. E. C. Carson, minister of public works, that a bridge commission should be set up in this province, was voted at last Thursday's trade board session in the IOOF hall.

The works minister has suggested that a bridge commission could lay plans for the eventual scrapping of all ferries in the province and their replacement with modern type bridges, thus cutting down considerably on annual maintenance costs. The ferry systems operated by

the B.C. Government are expected

High School Debating Contest to Start Here January 26

January 26 has been set as the date for the first tilt in the Leonard Wade debating competition.

The valley has been zoned, with Penticton, Oliver and Summerland in the southern zone, Kelowna and Rutland a central zone and in the north, Vernon, Salmon Arm, Armstrong and Lumby.

The negatives teams will travel,. and Summerland will go to Penticton; Penticton to Oliver, and the Oliver team will come here to match the Summerland affirmative debaters.

The subject of the first round is "Resolved that the SS and MA sales' tax is a desirable method of raising funds for government expenses.

The winning teams in the south and north will be the school having the most points when negative and affirmative gains are added togeth-

Central drew a bye into the final. for the whole valley, so the semifinalists will be the winning team. in the south and the winner of the north.

Subject of the semi-finals is "Resolved that there are more opportunities in Canada than in the United States for high school graduates".

The subject to be debated in the finals has not been announced to date.

It is probable that the Summerland team will be composed of Miss Margaret Myers and John Palmer, affirmative supporters, and Don Allison and Donnie Blacklock the travelling team.

It is proposed to invite the public to attend the debates and further announcement will be made regarding time and place. It is hoped that interested support will be given to the students in this important public speaking proland for over a month. Mr. and | ject by many parents and other ad-

Flemish Pears

The crop did not reach 50 per- | United Kingdom contract we had cent of the 19499 production. Tocent of the 1949 production. Tosmall quantity presented a major marketing problem. The Flemish market never did gain any momentum. The early shipments collided with our last shipments of Bartletts, which were still in the wholesalers' hands, and to aggravate the situation further, American Bartletts were imported.

To summarize in a few words, this is what happened-the trade bought a few too many Bartletts at too high a price, the consumer demand declined, and the whole pear deal went sour. To relieve our Flemish stocks, we sold 17,-000 boxes. of fancy Flemish to the cannery.

It might be asked: "Why were these Flemish packed?" Neither the trade nor ourselves ever anticinated the demand for pears would fall off so sharply following the completion of the Bartlett marketing. The prairie demand for pears has not revived to this date. D'Anjou Pears

The crop in this variety was' light. Shipments amounted to ap-Realizing the necessity of in-creasing our McIntosh sales to proximately 53,000 boxes, against castern Canada, we journeyed to 82,000 a year ago. To obtain distribution in eastern Canada we had to meet competition from American importations, where the United States market was almost the 246,588 hoxes of apples into the identical pattern of ours; high prices prevailed on Bartletts, and our later varieties met with resistance from buyers and consumers. With practically no export during the normal pear marketing season, the United States D'Anjou prices were at a very low level. The United States later exported a considerable amount of Pears which, we It is reported that there are still understand, moved out under some substantial holdings of McIntosh arrangement with ECA. Women's Institute Looks Forward to **Busy Year as Committees Appointed**

The newly-elected president of WI response to fill a hamper for the Women's Institute, Mrs. Gordon | the Mt. View Home was generous Ritchie, extended greetings to the large number attending the first regular meeting of the year, Friday afternoon, Jan. 12, in the parish hall.

Mrs. Ritchie expressed a hope that the programs for 1951 would and it is tastefully decorated. be beneficial and entertaining.

Standing committees for this year were read by the new secretary-treasurer, Mrs. A. Fenwick. Each committee is to be responsible for the program for one month; each to be in its special field. They are as follows: Teas, Mrs. Alex Smith; arts and crafts, Mrs. H. C. Whitaker, Mrs. A. K. Macleod, Mrs. Roy Angus, Mrs. C. Orr, March; health and social welfare, Mrs. Famchon, Mrs. S. A. MacDonald, Mrs. M. Pollock, November; home economics, Mrs. V. Charles, Mrs. George Woitte, Sep-tember; entertainment, Mrs. J. Y. Towgood, Miss M. Cartwright; agriculture, Mrs. M. E. Collas, Mrs. E. H. Bennett, June; citizenship, Mrs. H. R. McLarty, Miss Cartwright, Mrs. Cruikshank, Mrs. A. W. Vanderburgh, May.

Central committees: Cemetery, Mrs. E. M. Hookham; film council. Mrs. E. C. Bingham; central welfare, Mrs. E. L. Famchon.

Mrs. V Charles reported that fifteen pairs of pillow cases were to be made for the Mountain View Home as a result of enquiries to see if the WI could be of help to the Home These will be made up by the members.

Mrs. Famchon's report of the work of the welfare committee was heard with interest. Fourteen hampers were given out at Christmas, and at the year-end help had been given with fuel and groceries in some cases. Clothing, toys and food were included in the hampers. It was explained that when need arises it is nearly always sudden, and for this reason it is necessary that a good supply should be kept on hand in all age groups. The PHN had been given \$15 from welfare funds to buy medicine and cod liver oil where needed. The lar attendance.

>

and well filled.

Mrs. Strachan read a report of the provincial directors' meeting Trip to England held in Vancouver in November. The BCWPs have furnished a room at the women's residence at UBC

It was decided to support the Save The Children's Fund since it is linked with the United Nations. The small number of radio farm forums in this province was regretted. The number is fewer than in any other one. This was thought to be because of the poor reception of Vancouver broadcasting stations. It was thought that the department of transport might be induced to establish booster stations throughout the province.

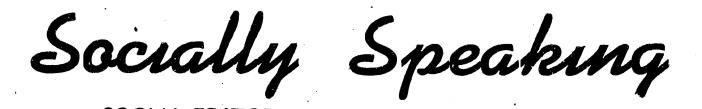

Some of those attending the provincial meeting thought that there was a lack of Canadian and British history taught in the schools, and this contention is to be pursued further to find more information on the subject.

Two WI projects were commended, that of the cook book published by Robson WI and the calendar arranged by Summerland WI. Mrs. Whitaker had a request from Miss Sophia Atkinson now living in Revelstoke that the WI sponsor an art exhibit of her pictures possibly in April, and it was decided to do this.

The next meeting was put on a week because the regular meeting day is that of the World's Day of Prayer. The February meeting is the annual Valentine party and moving it a week ahead makes it nearer St. Valentine's Day as well.

FOUR LADIES HAVE PERFECT ATTENDANCE

At the annual meeting of Christ Lutheran Ladies' Aid, Monday evening, Jan. 8, Mrs. W. Kopp, Mrs. Thomas, Mrs. Fred Schmidt, and Mrs. A. Lekei, were four ladies who had not missed a meeting during 1950. Each was presented with a

SOCIAL EDITOR .

Described to W.I. By Mrs. H. S. Kenyon

Mrs. H. S. Kenvon of Penticton. wife of Contractor H. S. Kenyon, who is building the new juniorsenior high school here, was guest speaker at the regular meeting of the WI, Friday afternoon, Jan. 12, in the parish hall.

Mrs. Kenyon gave a chatty, in-formal talk about a trip she and her husband had to England last summer. During their stay they rented a small car and travelled 1500 miles, through the south of England, Wales, into the lake district, northern England, down to

Oxford, and other places. It gave pleasure to many of those present to hear the names of lovely, familiar places.

They made Eastbourne, the home of Mrs. Kenyon's mother, their headquarters, and had several trips to London. Part of the time their eldest son was with them. Mr. Kenyon and his son made a trip to Norway and Sweden and the party were in Paris.

Mrs. Kenyon told of her casual impressions on the trip and stressed the fact that the British were making the best of their misfortunes. She thought in some cases where old buildings were bombed that the ones now being built were a great improvement.

The speaker said that women in the old country were not so busy as in Canada; that there were not so many women's organizations, and that women had more time, which she thought was a good thing.

NEW ARRIVALS

The first baby to make an appearance at Summerland General hospital this year was the son of pretty cup and saucer for regu- Mr. and Mrs. Mike Barron who arrived on Wednesday, Jan. 17.

Mrs. A. W. Vanderburgh

Hospital Auxiliary Earns \$1122.30

Mrs. J. C. Wilcox was re-elected president of the hospital auxiliary for a second term at the annual meeting held, Tuesday evening, Jan. 9, in the parish hall.

A splendid financial report showed current earnings for the year were \$1,122,30; disbursements, hospital furnishings \$540.95; painting wards \$153.2; canning fruit and juice, \$81.70, rent, stamps, advertising etc. \$45.00.

Other officers for 1951 are as follows: 1st vice-president, Mrs. H. Fiske; 2nd vice-president, Mrs. C. Woodbridge; secretary, Mrs. N. Laidlaw; treasurer, Mrs. T. B. Lott; corresponding secretary, Mrs. J. Raincock; buying committee, which combines the work of the Dorcas secretary, house committee and buying committee, Mrs. M. Embree, ford; press secretary, Mrs. F. E. Atkinson.

Prior to the election of officers, all the officers and work committees gave a complete report of the year's activities.

This group although relatively small in number has given a tremendous amount of effort and time to the local hospital and welfare of the community. New members are always needed, and there is always a place for anyone who would like to serve the community in this way.

Catering is not an easy matter but during the past year the auxiliary raised nearly three hundred dollars in this way; not included in this figure is the monthly catering for the local Masonic lodge which netted \$96. Mrs. A. Dunsdon had charge of this matter and will take charge again, in her capable manner, for the coming year.

VISITING ABROAD

Mr. R. A. Johnston will go to Nelson, B.C., next Sunday for several days to attend meetings of the Order of Railroad Telegraphers.

Miss Barbara Munn has returned to St. Paul's School of Nursing, Vancouver, after spending a month's holiday at the home of her parents, Dr. and Mrs. W. H. B. Munn.

Mr. and Mrs. Alan Holmes and their visitors from Cranbrook, Mr. and Mrs. Louis Holmes, have been on a short trip to Vancouver, leaving Wednesday of last week and returning Sunday morning.

Dr. James Marshall head of the Dominion Entomological laboratory here, left at the beginning of the week for Toronto where he will address the Ontario Fruit and Ve-, getable Association meeting in the Coliseum in that city this week.

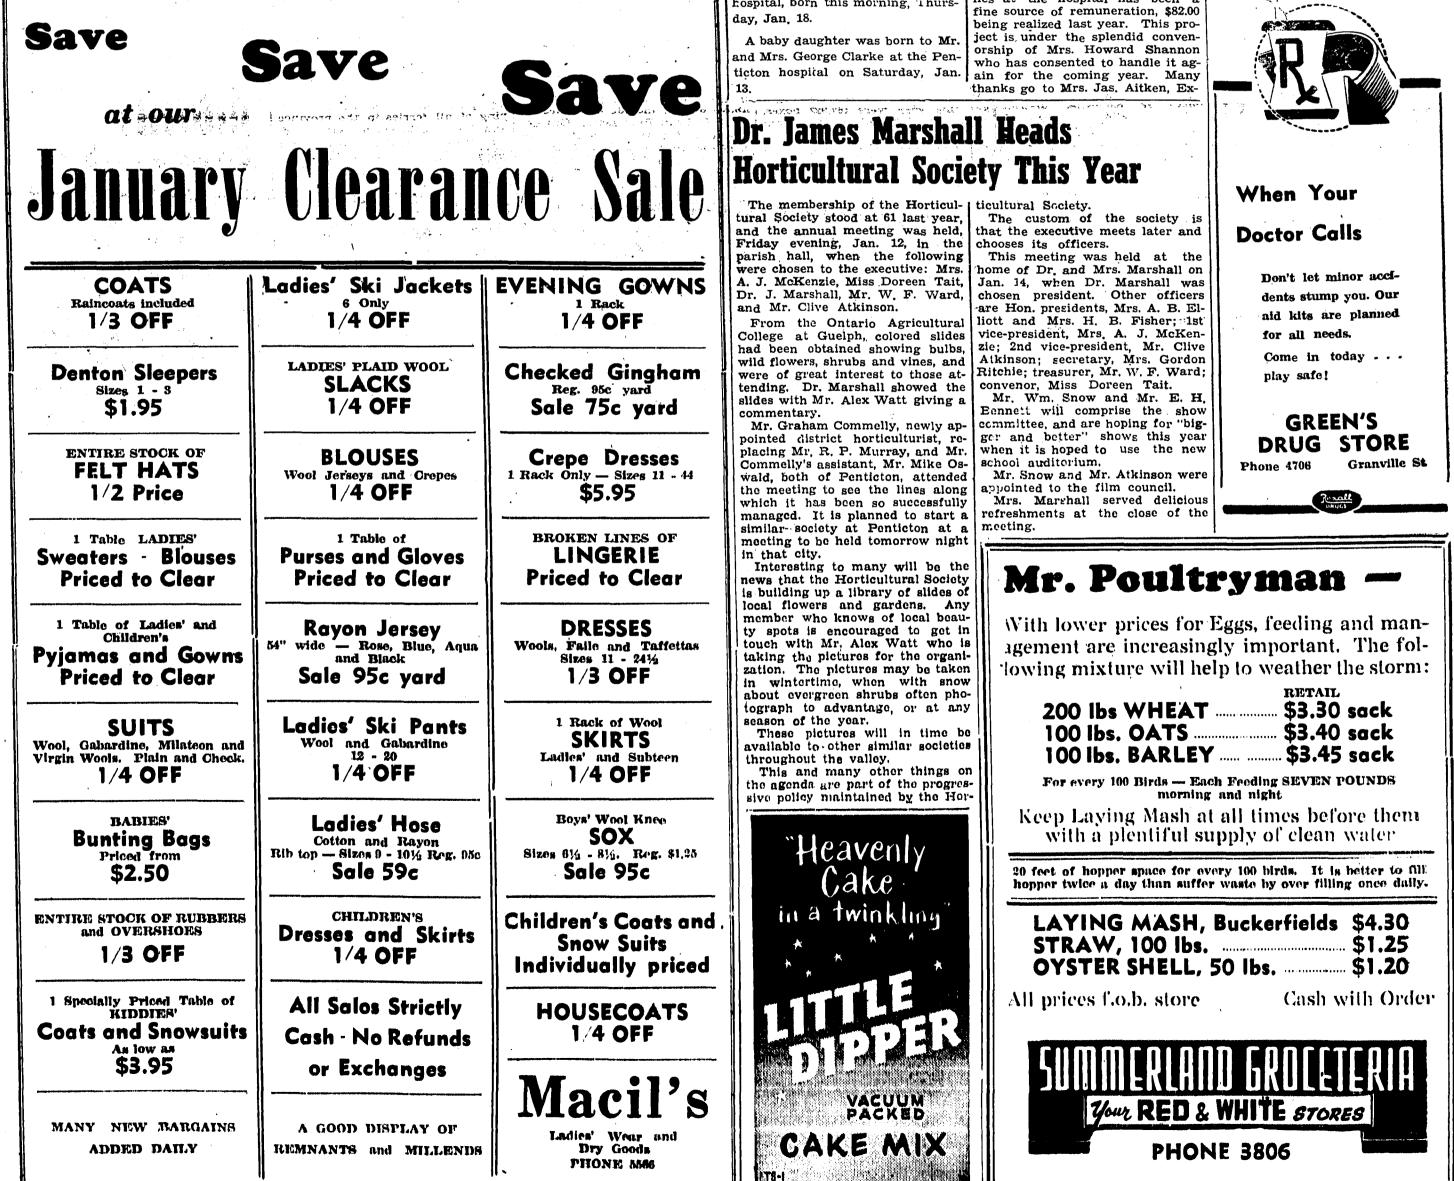

perimental Station, for the many lovely contributions for this case, and to the nurses who handle the "selling".

A very successful fashion show and draw was held in the Youth Centre in May netting \$200.86. On Dec. 9 another tea and draw was held with proceeds of \$139.559; for this draw the auxiliary was very fortunate to have Mrs. R. I. Cornish dress a doll, complete with a Mrs. J. Marshall, Mrs. A. Craw- wonderful wardrobe. This was a very generous donation by Mrs. Cornish and was very much appreciated by the auxiliary.

For the past few years the auxiliary has been selling Marpole Infirmary hospital calendars, although there is only a profit of ten cents per calendar, one hundred and fifty were sold, netting \$15.00. Miss Doreen Tait handles this item of business and calendars may be obtained from her.

The Hospital basket service is quite well known by the patients and altho absolutely non-profitable, the members giving the service and the patients receiving it, enjoy a mutual pleasure, which proves it is quite worthwhile. It is a small service but one which the auxiliary hopes to continue as long as there are patients who need the "basket". Special treats were arranged at Easter and Christmas Day for the patients also.

This research came under the following headings:

Safe

interval

5 days

7 days

10 days

15 days

21 days

30 days

Permissible soil drying between irrigations; duty of water under sprinkler irrigation; effects of irrigation interval on water requirements; effects of fertilizers on ap-

E. D. Edge, working under the di-rection of Dr. J. C. Wilcox and Dr. ples; and rates of cooling of packples; and rates of cooling of pack-Taking the results of two years

together, it was found that it does not appear advisable to allow soil to dry down to the wilting point between irrigations. Further investigation is needed before any definite statement can be made as to just how far the soil can be allowed to dry without causing harmful effect.

Recommendations for sprinkler irrigation in the southern part of the valley were listed as follows:

quired every twenty-eight days was

3.0 inches. When the amounts

applied were added up over a nine-

ty-six day period, the totals were

just twice as high for the seven-

day period as for the twenty-eight

Calculations made on the data

obtained indicate that during the

season the trees and cover-crop

used approximately 0.5 inch of wa-

ter out of the soil per week. This

means that at each seven-day ir-

rigation, 0.5 inch was used by the

plants and the other 1.0 inch was

Inches Rate of Inches Suitable Rate of flow length of application per application month peracre irrigation per hour 12 6.2 gpm 8 hours 0.25 inch 10 5.2 gpm 8 hours 0.31 inch $2\frac{1}{2}$ 4.7 gpm 12 hours 0.25 inch 4.2 gpm 12 hours 0.33 inch 3.7 gpm 12 hours 0.42 inch 3.7 gpm 24 hours 0.21 inch 3.1 gpm 24 hours 0.25 inch

By "safe interval" is meant the inches. The average amount renumber of days following an ade- quired every fourteen days was 2.0 quate irrigation that the soil can | inches, and the average amount rebe left without approaching too close to the wilting point.

or

Investigations conducted in other parts of the world have indicated that trees use practically the same amount of water from the scil no matter what kind of soil it is. It is known from both experience and experiment, however, that much more irrigation water is usually needed on sandy soils than on clay soils. It appears obvious that there is much more wastage of irrigation water on sandy soils.

It has seemed probable that one of the main reasons for the increased wastage of water in irrigating sandy soils is the greater frequency of irrigation required. In order to sedure accurate information regarding this possibility, an 'experiment was conducted in an apple orchard on the experimental station in 1950.

When the soil was irrigated evter required per irrigation was 1.5 val must be frequent.

A taste panel has tested apples | or. from four special plots which, had nitrogen only, nitrogen plus phosphate and nitrogen, phosphate and potash

The concensus of opinion among the test panel was that all of the fruit was of high quality and there was relatively little difference among the four plots. They showed distinct preference for the more highly colored apples in comparison with the cee grade apples. There was also some preference shown for medium to small apples in comparison with large apples. Even within the small size

lost by evaporation in the air, by evaporation from the cover-crop. by percolation into the deep subsoil and by subsequent evaporation from the surface of the soil. About 1.0 inch of water was lost in similar manner at each four-

teen-day irrigation and at each twenty-eight-day irrigation. This appears to explain in large measure the extra irrigation requireery seven days, the amount of wa- ments where the irrigation inter-

Use Nasty Tasting **Spray Against Deer**

According to a C-I-L bulletin, orchardists in California and New England, where deer abound in numbers in certain sections, are spraying their trees with a foultasting, sticky spray to keep the animals away. The spray is applied on the tender tree shoots which, by nibbling, deer can ruin an orchard overnight. The spray tastes so badly that the deer leave the orchard after an exploratory bite.

Need for Steel **Industry** is **Given Review**

Answering the often-heard criticisms and complaints against the B.C. government with relation to the establishment and development of an iron and steel industry in the province, the Hon. R. C. MacDonald, Dewdney MLA. and minister of mines and municipal affairs, spoke Monday evening, January 8, on "The Story of B.C. Iron and Steel".

Emphasizing that an embryo steel industry is already firmly established here, the Hon. Mr. Mac-Donald traced the history of this industrial development from 1875 to the present day.

Since that date, many independent surveys and government investigations have been conducted to determine the extent of British Columbia's geologic deposits and industrial potential.

Though, as the minister pointed out, periods of depression and war have delayed progress, much has been accomplished and more fruitful steps are foreseen in the near future-to make B.C. an important steel producing center.

The Hon. Mr. MacDonald foresees a per annum market for steel in B.C. of about 200,000 tons, of which, his figures indicate, 115,000 tons could be produced here in the province.

The minister pointed out that, in view of the critical international situation, Canada may find U.S. steel a strictly-rationed commodity, and should therefore be at work to increase her own output of this vital material.

Says the Hon. Mr. MacDonald: ... "I am looking to the future ... If by expanding this basic indus-try in British Columbia we can help to guarantee an adequacy for our needs in the west, and at the same time add immensely to our payrolls and our own economic stability, we are doing a deed for Core flush was present in slight- which another generation will be grateful."

potash have had little, if any, effect on the storage quality of Mc-Intosh apples. , Application of nitrogen, however, has had considerable effect on storage quality, chiefly through its effect on the size and color of the fruit. The larger the fruit and the poorer the color, the poorer has been the stor-

Effects of Conditions on Keeping Qualities

age experiment was conducted in desirable was the flavor of the five orchards in each of six districts from Penticton to Salmon Arm. A total of 140 samples were included in the experiment.

The purpose of the experiment was to ascertain the extent of differences, if any, in keeping quality of McIntosh apples from different localities as judged by flavor, development of core flush and firmness.

Wide fluctuations were found in the quality of fruit from different orchards and individual trees within orchards.

Fruit from several orchards in Vernon and Kamloops areas proved to be fair to good in quality. With individual exceptions, fruit from the Vernon, Kelowna and Kamloops orchards was practically free of core flush. Apples from Salmon Arm developed slight core flush, but this may have been due to somewhat immature picking,

On the other hand, most of the samples from Summerland and Penticton showed moderate core flush and were only fair to poor in quality. In general, the greater the | once the fruit is cooled down.

A comprehensive McIntosh stor- development of core flush, the less apples.

From the standpoint of hardness as measured by the Ballauf Pressure Tester there was little difference between any of the lots, with firmness ranging between 10 and 11 pounds.

This experiment is being repeated with fruit of the 1950 crop, but as the apples are still in storage results are not yet available.

Rates of cooling of packed apples provide another experiment and in reporting on cold storage operation, growers learned that four of seven plants did not appear to be making the best use of their refrigeration by failing to discharge cold enough air into the storages during the cool down period.

Temperature reduction studies in pallotized storages indicate that during the pull-down period fruit on the top pallet may cool slight-ly less rapidly than similar fruit on the bottom pallet of the same stack. This difference disappears

Werkers' Union **Preparing** for Annual Session

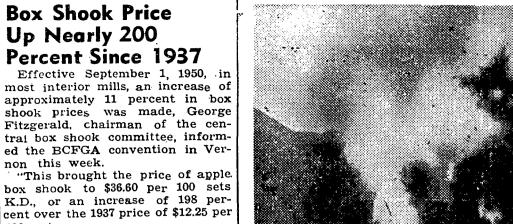

As soon as the BCFGA conven tion is concluded today Vernon starts preparing for another conference, this one being the Federation of Fruit and Vegetable Workers' unions (TLC), which is scheduled for January 26 and 27.

Official opening will be 2 o'clock Friday afternoon, Jan. 26. Speakers who have been asked to address the convention are:

James Thomson, deputy minister of labor and chairman of the board of industrial relations; A. K. Loyd, B.C. Tree Fruits Ltd. president and general manager; J. G. Campbell, Salmon Arm, executive member of the BCFGA; William Mc-Kinstry, regional superintendent, (Pacific) Unemployment insurance commission; George Wilkinson, member, B.C. labor relations board; Ald. R.K. Gervin, secretary, Vancouver-New Westminister Trades and Labor Council and chairman of the B.C. executive of the Trades and Labor Congress of Canada.

L. F. Detwiller, commissioner of the B.C. Hospital Insurance Service will be a guest speaker, along with C. Pritchard, commissioner of the Workmen's Compensation Board; F. L. Fitzpatrick, president of the Okanagan Federated Shippers' Assn.; and C. W. Morrow, KC, MLA The latter is guest speaker for the banquet Saturday night at Allison hotel.

Resolutions cover a wide range PRINCESS PATS ARRIVE of subjects and include: Condit- AT VERNON CAMP ions of employment, cost of living and price control, health and safety, housing, immigration, income tax, labor code, pensions, public works and public liabilities, workmen's compensation, unemployment insurance and amendments to the constitution and future policy of the federation.

100 sets. "The general quality was an improvement over that of war and post-war years insofar as seasoning is concerned, but it is still considerably below the pre-war standard."

non this week.

The report referred to the excessive and unprecedented run of apples in the area south of Kelowna which was overcome by purchase of used boxes from northern houses.

"Mills in the emergency area also responded to the limit of their facilities," he reported.

"Some experiments are now in progress in the use of wax fibreboard for sides and bottoms but this type of composite container has a number of disadvantages."

In Washington State apple boxes cost 42c and 44c and no substitute for them has been found.

"Your committee feels that there is no ground for fears of increases in shook prices for the 1951 season unless the international situation further deteriorates or the mills face some other unforseen increases in costs," the report concludes.

VERNON - First contingent, comprising 200 all ranks, of the Princess Patricias Canadian Light Infantry have arrived in Vernon to occupy the Vernon military camp as an advance party. Major Saul is officer commanding the Vernon detachment. Advanced infantry training on the company level will

be on the course of instruction.

Improve Bad Corner at Top of Derrick Hill by Adding Rock Wall

A preliminary survey of road-|make the steep grade. work in the municipality was conducted by council at last week's session when Councillor Francis Steuart, new roads department head, called for some guidance. Principal decision was in relation to the narrow corner at the top of Derrick hill, above the

Frank Pollock residence. A rock wall will be built 150 feet long so that five to six feet can be added to the present fifteenfeet width of the road. Although it will be subject to further research, a rock wall was favored by council rather than one of concrete.

Although the expenditure will run to several hundred dollars. council deemed this improvement to be of sufficient importance to proceed without waiting for any further commitments to be tabulated.

Guidance on Sanding

Councillor Steuart also asked for guidance on sanding, and he was informed that the road department had been following a policy of sanding the bad hills first, then the corners and approaches to stop signs and, if necessary, the main business road, Granville street.

It was agreed that it would be advisable to place piles of sand near the top of the Sandhill for use by any vehicles which could not

Should Inspect at Shipping Point

One report had been received by Councillor Steuart of a youngster being hurt while sleigh-riding on a hilly road towards the upper part of Prairie Valley. This road had always been used by youngsters for sleigh-riding and as it is used by vehicles so little council was loathe to sand it and spoil the children's fun.

Reeve Bentley remarked that he had heard Penticton council was considering a road program on a local improvement basis. This he did not consider fair to the property owners involved.

He suggested to Councillor Steuart that the roads department should plan soon any hard surfacing which could be included in the limited budget for 1951. There cannot be a great deal done out of annual revenue in any one year, he pointed out, but a start can be made.

Decision will also have to be reached on whether one of the road department trucks will have a new set of tires or if it would be wiser to trade it in on a new truck.

Maintenance costs on Giant's Head road are to be estimated for the year and submitted to the provincial government, as this is now a provincial secondary highway and the government pays a portion of the cost of annual upkeep.

Hope-Princeton is **Carrying Fruit in Considerable Volume**

"Fruit and vegetable traffic to coast cities via the Hope- Princeton highway has reached considerable volume, as has the tonnage of grower and packinghouse supplies from Vancouver distributors," the transportation committee observed at the growers' convention in Vernon Tuesday morning.

H. B. Ewer and L. R. Stephens comprise this committee, which reminded growers that the 20 per cent freight rate increase last June 20 brought the price per 100 pounds on apples to Winnipeg to \$1.79 compared with \$1.13 in 1947.

In contrast, the rate from Ke-lowna to Minneapolis, competitive with Yakima and Wenatchee, is \$1.52 per hundredweight.

Railways are reluctant to make

Loyle Campbell is **LOL Worthy Master**

Loyle Campbell was selected as worthy master of Loyal Orange Lodge No. 2036 at the recent annual meeting, succeeding J. Burnell who now holds the post of immediate past master.

L. Fulks, worthy county master, Peachland, conducted the election and officers were installed by IPM J. Burnell.

Other officers installed were: Deputy master, Frank McDonald: recording secretary, J. H. Walton; marshall, J. Slater: treasurer, D. Taylor; 1st lecturer, H. Milley; 2nd lecturer, S. Dodman; chaiplain, J. Lekei; 1st committee, E. E. Gould.

any downward adjustments in rates while the general freight rate investigation and the Royal commission enquiry are pending, it was observed.

He started as a junior in a local branch bank . . . just as his manager did before him. Now he's on his way up, too.

He's learning banking skill right on the job, helped by more experienced men on the bank's staff. He is taking special banking courses...

Like most bankers, during his career, he will learn to know many parts of Canada, various communities. He will develop the human understanding and the business judgment you expect of your banker.

Starting from the branch that serves you he may rise to the very top. The general manager of his bank started just the way he did.

Charged with the investigation of a resolution on inspection of cannery fruits and the determining of the cull percentage, the grading cannery peaches committee under the chairmanship of J. Y. Towgood, Summerland reported to the BCFGA convention in Vernon this week.

This committee, which has H. C. MacNeill of Peachland and E. A. Titchmarsh, Penticton, among its members, met at Kelowna with Tree Fruits and government inspection branch officials and discussed this entire problem.

The committee is recommending to Tree Fruits that all possible inspection and grading b_e done at shopping point, and Tree Fruits states that such is the case except at the very start and the very finish of the season when the fruit is taken direct from the orchards to the canneries and graded there. Also, the committee recommends that all packinghouses appoint some responsible staff member to supervise the handling and care of cannery fruit and to inform growers of any correctable cause for cullage occurring in their fruit.

'Fight Polio' Quota Set

The second annual appeal of the "Fight Polio" campaign to raise funds for the care, treatment and rehabilitation of B.C. polio patients is now in progress.

British Columbia's quota is \$60, 000.

The campaign, launched nationally by the Canadian Foundation for Poliomyelitis, is being sponsored by the Kinsmen and other service clubs throughout the province. Committees have been set up in 55 centres. Where no committee is set up locally, citizens are being invited to send donations to "Fight Polio" headquarters, 207 Rogers Building, Vancouver.

"All money will be used to further the "Fight Polio" campaign of the Canadian Foundation for Poliomyelitis", said Kinsman Jack Tyrer, provincial campaign chairman. "Last year, \$300,000 was donated by Canadians in all the pro-This year more will be vinces. needed

"Last year in British Columbia, City of Merritt.

the foundation spent \$21,850 for equipment for the Vancouver Gen-eral hospital, St. Paul's hospital and the Western Centre for Renabilitation. Polio patients from all parts of the province were sent to these institutions. Some are now cured: others are still undergoing treatment.

"Patients needing assistance were helped at a cost of \$12,970. From \$20 to as high as \$2,200 per patient was spent. An additional \$5,000 was spent on occupational therapy.

"The need for this work is great. One has only to look at the growing list of polio patients who need treatment and rehabilitation as happy, useful citizens.

"Contacts were made through B.C. Kinsmen Clubs and patients on arriving in Vancouver were

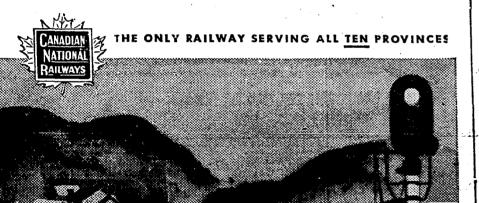

met by Vancouver Kinsmen. "Your help is urgently needed. Won't you send your contribution today? No one of us knows how soon we or our loved ones may need similar assistance."

The new jet planes are equipped with radar and devices to give them additional power for combat or faster climb-ing speed. They are operating from McGuire Air Force base at Fort Dix, N.J., and other bases of the Eastern Air Defence Force. The planes have a service ceiling of more than 45,000 feet and a top speed in excess of 600 miles per hour.

C. J. Bleasdale Continues As Chairman of School Board No. 77 for 1951 Term

At a meeting of the school board held Thursday evening, Jan. 11, C. J. Bleasdale was re-elected chairnian, and heads of committees for 1951 were named by the chairman. Mr. Bleasdale welcomed the new member of the board, Mr. J. Y. Towgoo'd, who replaces Dr. James Marshall.

Mrs. A. W. Vanderburgh was asked to continue as head of the health, library, and appointments committees.

Transportation committee is headed by Dr. W. H. B. Munn, and a newly-formed committee is that of "grounds", entailing landscap-ing and planting around the new junior-senior high school. Dr. Munn was appointed to head this new group, with power to call in help, if necessary

Mr. Towgood was appointed to the committees dealing with salaries and building, also with power to add others if considered necessary.

Rural affairs committee head is Mr. Aubrey King.

Chairman Bleasdale agreed to continue as head of the finance committee, and is ex officio on all others.

Mr. Towgood was named official delegate to the provincial trustees' association, Okanagan branch. To Occupy Classrooms

Mr. Bleasdale stated that it is fully expected that classrooms in the new school will be ready for offered to teach telegraphy to any group of boys wanting such instruction

The secretary was asked to write Mr, Johnston thanking him for his offer and to say that it was hoped to start this sort of education, possibly in night school classes, as soon as the new school was occupied and in good running order.

An extra janitor is needed for the schools. No papers will be required for the appointment, and it

will be a probationary one. Mrs. A. W. Vanderburgh reported that two library clubs have been started this year to encourage reading, following a successful experiment carried out for two years in Mrs. Tingley's class. This year the club will continue in Mrs. Tingley's Grade 5, and also in the Grade 5 taught by Mr. T. Moore. The clubs run for the first three months of the year, and at the end of that time the pupils who have read the most books during the allotted time are given prizes. In this way considerable interest in reading is aroused with the hope that it may continue.

Survey of **Businesses** to **Be Conducted**

An industrial survey of the Summerland business area is to be conducted in the next week by the Summerland Board of Trade in conjunction with the regional development division of the department of trade and industry.

This was the announcement of President J. E. O'Mahony at last Thursday's trade board session when it was revealed that Summerland would be included in a survey being conducted in the main business centres.

The survey aims to ascertain the purchases made by local firms other than through wholesale outlets.

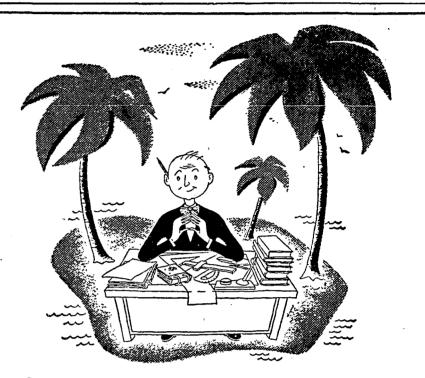

When concluded, it is expected that the regional development division will have an opportunity to ascertain what products are imported into the valley in any quan- leys.

tity. If it is feasible, plans can: then be made to try and interest some firm to manufacture these products right here.

Several members of the trade board volunteered to distribute the necessary forms among the business houses of the community. Representatives of the department of trade and industry will come here this week from Victoria to present. the complete picture on this venture.

A similar survey has just been completed in North and Central Okanagan, under the direction of J. R. Meredith and R. G. Lipsey of the department's Victoria office. The survey takes the form of a. brief and simple questionnaire which all businesses and merchants will be asked to answer. Theanswers will be sent directly to-Victoria by the firm itself so that. it will be entirely confidential.

Following the survey here, another will be made in Penticton and the south end of the Valley. Similar surveys will be carried on in. the Kettle and Similkameen val-

U puzzle you can't solve alone

• If you are looking ahead, you probably don't see all the answers to your problem of future financial security.

No wonder. Because to find thera you must have life insurance — planned to meet your special needs with the help of a life underwriter.

He is used to solving prob-lems like yours. He will show you, for instance, how to be sure there will be money enough to keep your family together in the home in case you die prematurely.

your earning power declines. If so, your life insurance man will help you work out a plan to meet that --- or any other financial need of the future. And all of these plans will be fitted into a master plan which is within your means.

Only your life underwriter's special training and experience makes this service possible. And he is glad to take plenty of time to delve into your problems no matter how complex they may be.

More than a million Canadian families have benefited by the advice and experience of modern life underwriter. Rely on him!

cool, soft shades, while those with north and east views were decorated in warmer, more glowing colors.

Lighting is considered particularly good in the building, and the board is being commended for the general excellence of workmanship and practicality of the school.

One hundred and ninety six lockers have been installed. These are double lockers and there are three keys to each, and a master key. It was thought that some rental, possibly 35c will be charged per key, this to be returned to the pupil when the key is turned in at the end of a term or year.

It was decided to obtain a small safe to be kept in the principal's office for the safekeeping of collected funds and other valuables.

A small iton fireman stoker will be bought to attach to the stove to be used for hot water heating. This will eliminate any handstoking in the boller room, and allowing the same type of coal to be used as-is used in the furnaces.

The sound system has been approved by the department of education for grant purposes, and it is possible that there may be co-ordi-nation of the bell and sound system in the school.

Will Pay Tuition Costs A letter was received from Hon. James Gardiner, minister of agriculture, stating that his deputy minister, Dr. Taggart, had been instructed to write the board following its repeated enquiries regarding school fees of children of non taxable government employees attending the school here,

This letter had not been received to date, but other information given the board indicated that according to an order in council passed last summer where such pupils are attending the school, arrangements are made to pay a sum equal to the cost per pupil to the school board. It was Inspector Matheson's opinion that this payment was retroactive in some degree,

A request was received from the Canadior Club of Kelowna in a letter signed by S. E. Tataryn, asking permission to solicit subscriptions to their magazine in the school. It was decided that more information regarding this club would be necessary before such permission was considered. Mr. Cooli Dodds, Kelowaa, sec-

retary of the school janitors' union, requested a meeting to consider raising janitors' galaries in the amount of \$15 per month. A representative will attend from Summerland school board.

In view of the 40 hour week soon to be in force on the rallway, and a greater need of telegraphers Mr. Reld Johnston motor vehicle without a license. The accident involved a collision at the intersection of Government street and Nelson avenue, shortly before Christmas.

Faith in Fruit Industry Because of Teamwork of Grower, Packinghouse And Scientist Expressed by Palmer

Reasons why he considers it economically sound to replant most of the trees killed by the low temperatures of 1949-50 winter, together with a declared faith in the future of the industry, were given in his own means perfect and growers who are inimical style to the 62nd annual BCFGA convention in Vernon on Wed- forced to use them in order to avnesday afternoon, Jan. 17.

The December issue of Country Life carried Dr. Palmer's recommendations for tree fruit variety plantings, so that in his talk he gave consideration to fruit growing as a way of life.

He instanced one grower in the Oyama area who, although getting on in years, had yanked out old trees and replanted with cherries, apricots and peaches. They were just coming into full bearing when the winter kill destroyed them.

But the grower re-ordered soft fruit saying: "All my life I have wanted to grow peaches and apricots and I don't intend to let one bad winter discourage me."

"I realize that for many people the growing of fruit is something more than a way of making a living," declared Dr. Palmer. "It is a way of life. I realize that man does not live by bread alone, but I also realize that most growers have wives and children who demand not only bread but clothes, shelter, a car, radio, electric refrigerator and a host of other modern conveniences. For this reason it is essential that there should be sound economic grounds for replanting of commercial orchards."

Dr. Palmer then compared the clumsy, awkward hand-spraying methods of his youth with the modern concentrate sprayer of today.

Takes Out Drudgery

"The application of scientific research to the problems of disease and insect control have taken a great deal of the drudgery out of commercial fruit production . . but also necessitates the modern grower to be something of a spray chemist and mechanical engineer.

*Nevertheless, given intelligent -operation, our modern spraying equipment helps to make fruit growing a business which is not only profitable but also pleasurable.

Dr. Palmer then drew a picture of the discouraged grower of 1930 rirying to battle "drought spot" and getting to the stage where he is willing to fire all chemists. But three years later, when boron performed his miracle the grower was quick to appreciate the value of scientific research and wanted to know about control of water core in Delicious, bitter pit in Newtowns and breakdown in Jonathans. "It will take many years of tedious work to reveal the full story regarding the mineral content of our soils and nutriment requirements of our trees," he continued. "In the meantime, growers will be tempted to try out various commercial minor element mixes in an effort to control all manner of fruit tree ailments from apple mildew 10 winter injury. "Nevertheless, I realize that our growing knowledge of soil management and plant nutrition provides another good economic reason for replanting our orchards." Sprünkler irrigation was the next picture depicted by the speaker, who pointed out that it costs money to install but it certainly cuts down the labor of irrigating, ensures more uniform distribution of water and reduces losses from soil verosion. "Blossom thinning spray prowides the grower with another tool which can be used to reduce the "costs of production . . . (but) a great deal of knowledge and skill is required to use this tool effectively."

have had no training in logic or reason," Dr. Palmer explained.

"They seldom behave in the way you expect them to. That is why it takes so many experiments and so many years to find out what rootstocks, what framework stocks and what varieties we should grow in our orchards.

it impossible to grow comparatively tender varieties such as Delicious in areas where low winter temperatures prevent the production of these varieties on their own frameworks," he observed.

we now have available are by no oid winter injury operate under decided disadvantages in comparison with growers living in more favored areas where it is possible to grow Delicious on their own frameworks," he continued.

Results are Varied He gave examples of results of an eight-year-old block of Spartan apples and how results varied in shipments to various markets. These observations made him realize how long it takes to determine "Hardy framework stocks make the commercial possibilities of a new variety of fruit and how exact- added. ing are the requirements of the

modern fruit industry. "Just as each of our popular commercial varieties of fruit has certain weaknesses so also will weak- industry; the invention of efficient "The hardy frameworks which nesses be found in the new varie-

ties which are now under trial. "I realize that the only way to methods and equipment; experifind out whether or not such promising introductions as the Spartan apple, the Van cherry and the Reliable apricot will meet the requirments of modern fruit production and marketing is to have them tested in commercial orchards under a wide range of soil and climatic conditions."

Dr. Palmer referred to the courage, initiative, research and good management which has brought about the transformation from cull and low grade fruit of 1935 being a liability into a valuable asset in 1950, "providing one more good reason for replanting our orchards."

He lauded the organization of the fruit industry which brings together the scientists, the packinghouse manager and the sales agency to provide a solution to the problems, such as in the Better Fruit committee.

"Such committees provide opportunity for the stimulating clash of ideas and exchanges of information which lead eventually to formulation of sound policies," he

Proud of Agrologists

Boys Exceed Girls in 1950 Births Recorded

There were fewer vital sta-tistics during 1950 than the year before, Registrar Lorne Perry revealed to The Review this week.

Births dropped down to 62 from the 1949 level of 74, marriages were less than half at 15 against 36 in 1949 while deaths decreased to 28 from the high point of 36 the year before.

Boys far exceeded the girls in last year's birth rate, there being 38 males against 24 girls. The two previous years the numbers of boys and girls was the same.

Following are the figures for recent years:

	1950	1949	1948	194
Births	62	74	66	91
Marriages	15	36	21	31
Deaths	28	36	31	29

varieties; technical information for fruit processors.

"All these and many additional services helped this industry to develop along sound scientific lines

. . helped to make it a successful industry well worth maintaining."

But as Dr. Palmer thought over the amazing growth of the industry in 50 years, he realized that favorable climatic conditions have played their part in this success and that the character of the people engaged in the industry has been such that they have kept in step with advances.

"The B.C. Fruit Growers' Assn. and the many committees through which it operates provide shining examples of democracy at work, he insisted.

"The remarkable progress which characterizes this industry is due very largely to the fact that progressive growers with courage and initiative, astute business men with wide experience, and alert scientists with special training have learned to work together for the common good.

"It is this fact which gives me faith in this industry, and confidence that it will continue to prosper. No one of us can solve your problems but united I am confident that we can and will solve them." he concluded.

Independence of Thought

Turning then to the fact that a grower is his own boss, Dr. Palmer told of meeting two growers in the same district, one highly satisfied with the pruning recommendations of the experimental station and the other saying he has developed a system of his own which is much 'hetter.

"I realize that in this era when people, even in free countries like Canada, are becoming more regimented every day, fruit growing is one of the few industries wherein the small operator can still be very Eargely his own boss. He can fol-Now the recommendations of govcomment experts or reject them as 'ne mees fit."

Dr. Palmer told of a Summer-'innid pear grower who, after the "hard winter of 1985, was highly satlisticd with the Old Home framework of his Barilett trees. After 1949-50 they had suffered severely from 'the winter.

"The trouble with horticultural materials is that they

NAME CO-ORDINATOR FOR CIMIL DEFENCE PLAN

KELOWNA-In the hellof that in the event of the west coast being attacked Kelowna would become one of the main evacuation centres, a civil defence committee is being set up. The entire council has been named a defence committee and a local co-ordinator, to work under the previncial co-ordinator of civil defence, will be apmointed.

WHAT IS PErsonal Planning?

Personal Planning is more than mere budgeting . . . that, by itself, is dull. Personal Planning is a positive financial program for successful individual and family living - a program for progressive and provident people - people who have ideas for their future and want to make them real.

That's why Personal Planning is so different. It is a plan that faces the fact that all of us must live on what we have — not on what we wish for. It also faces the fact that a budgetplan should never choke the fun out of life. It shows you how to put yourself on your own payroll, as well as the butcher, the baker and candlestickmaker. It shows you how to build for tomorrow, while you enjoy today. Yes, and it shows you how to get the most out of life with what you earn. In Personal Planning, the important thing is: IT'S NOT HOW MUCH YOUR INCOME IS... IT'S HOW

YOU USE IT.

WORKING

WHAT PEOPLE ARE SAYING ABOUT **Personal Planning**

Personal Planning was introduced on a test basis to visitors at the Canadian National Exhibition last autumn. Thousands of people responded to our invitation and asked for copies of "Personal Planning for Successful Home-makers,"

"Up-to-date and practical for present living conditions," is what one visitor wrote us after reading the booklet.

"I needed this advice very badly," wrote another, "and you have already helped to straighten out a quarter of our personal problems."

"Excellent pamphlet," said a third. "My budget-plan will be organized within a month,"

These comments, and many more like them, are in the Bank's files at the Head Office in Montreal.

Night Skiing Starts In Meadow Valley

Night skiing, using the electrical plant for floodlighting, was featur- ing progress about a week or ten ed at the Meadow Valley ski hill last night for the first time this season. Quite a crowd of ski enthusiasts was present.

Last weekend, about 25 skiers went to Meadow Valley on Saturday and double that number on Sunday. The road was in good condition as was the condition of the snow.

The local club is anxious to obtain skis from any person who does not intend to use them this winter. Such skis could be rented by the club on numerous occasions.

Opening games of the Kingpin Scaffold Collapses At Arena

A regrettable accident which could easily have had more serious consequences occured at the new arena building about five o'clock Monday eveniny.

A sudden gust of wind of near whirlwind propensities caught the scaffolding on the north end of the big structure and toppled it.

Ralph Blewett, well-known local contractor, was on top of the scaffolding and rode it to the ground. He was half buried by the debris but fortunately the full weight of the timbers did not land on him.

He was able to rise and walk to his car and was back at work Wednesday morning, apparently none the worse for his mishap.

At least eight other men were working on the scaffolding just previous to it toppling and fortunately had quit work and come down.

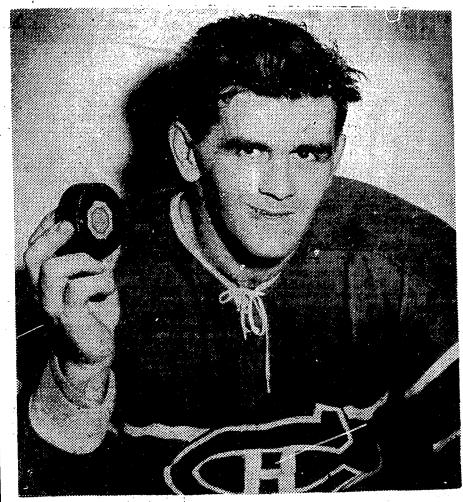

Spokesmen for the Summerland Rink Association state that this acdays. With the number of volunteer laborers who have been contributing many hours of work on the job, another week would have seen all the main building construction finished.

It would have been possible to night, January 27. Now, the north end will probably not be completed in time for the opening, it is feared.

Mr. Blewett was in the process f tieing the scaffolding to make it secure for other workmen when the sudden gust caught the temporary structure.

FRUIT DISPLAY CALLED BEST TO DATE

"The BCFGA fruit division at the B.C. Interior Exhibition, from an overall point of view, excelled the 'Best to Date' of last year, 1949," declared W. T. Cameron in reporting for his fruit division committee to the BCFGA convention this week. Dr. R. C. Palmer and W. F. Ward of Summerland are members of Mr. Cameron's committee

"ROCKET" RICHARD is shown above in the Montreal Canadien's dressing room just after he scored his 270th goal in his NHL career to tie the mark set by the famous Howie Morenz and Aurel Joliat. Since this photo was taken Richard has added another notch and is now second only to Nels Stewart as all-time goal getter in the league. Nels has netted the rubber 323 times in 15 years to set the record the Rocket may some day overtake. Richard still has a long way to go in hockey and should set an even higher record as he has only played for 8 years and is only 29 years old.

It would have been possible to cpen the new arena and have it completely encased for opening Rutland Downed 28-19 by **Bluebird Senior Boy Cagers**

Although it was a short score, Summerland Bluebirds continued their victory streak in the central Okanagan high school basketball series when the senior boys conquered Rutland at the local gym last Friday night, 28-19.

In the senior girls' contest, Rutland was winner by a narrow 12-10 margin, while Rutland juniors won 19-10 from the local junior quintette.

Graham Munn led the senior boys to Victory with an even dozen markers, while Ken Brawner, although not playing his best game, added another eight points.

Summerland led 9-5 at the end of the first quarter, and 13-9 at the breather. Rutland came back to hold the locals even in the third stanza, but Bluebirds ran out 6-0 in the final ten minutes.

Chief feature of the girls' contest was that no fouls were called on either side. Jaquie Trafford led the locals with & markers,

Proposes Map Of District For Visitors

That a visitor to Summerland has great difficulty in finding his way around the district was expressed at last Thursday's trade board session by E. E. Bates, a member of the school teaching staff, who is proposing that large-sized maps showing every home and business should be available in prominent places throughout this area.

Mr. Bates plans to investigate the possibility of a geography class in school making a project of a map of Summerland. He was told oy the meeting that any assistance which the trade board can give to such a project will be gladly provided.

Besides placing homes and businesses on the maps, Mr. Bates considered some system of numbering sch place.

These maps could be placed at strategic points and would serve a very useful purpose, he thought.

This discussion brought other angles to the fore, including that of placing street markers with names. Ivor Solly considered this might become a board of trade project. Reeve C. E. Bentley declared that the council had not taken any

action towards placing of street signs because of the cost. He considered it more important to put a good surface on the street than to place a sign designating its name.

Besides, he had found that signs have a fatal fascination for Summerland motorists and few have escaped being knocked down by careless drivers.

Mr. Bates promised further reports on his proposed map proiect.

Advices Against Planting Any More Flemish Beauty Pears

Because of the serious winter njury to pear trees in many districts the BCFGA pear committee, headed by Tom Wilkinson, Kelowna, discontinued its maturity tests this past year, the annual convention at Vernon learned this week. On the other hand, the committee recommended to the pooling committee that for 1950 pears be pooled in two groups, one being Anjous and later and the second

being all other pear varieties. The committee also recommended that a differential in each group be determined by the pooling cominittee based on the sales history of the various varieties concerned through the 1950 season.

A warning that Flemish Beauty pears have been difficult to dis-

Still No Change in **Issuance of Motor** Vehicle Licences

C. V. Nesbitt introduced a subject which has been to the fore most meetings when the Summerland Board of Trade met at the IOOF hall last Thursday evening -that of motor vehicle licence issuance.

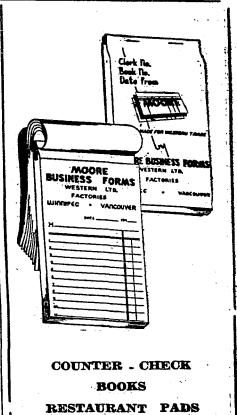

He wished to know if any further arrangements had been made row that the changeover to the RCMP has been affected. Reeve C. E. Bentley replied that nothing new was forthcoming then, but he understood RCMP Constable I. G. Thorsteinson would probably have to issue licences as before.

Despite combined efforts of municipal council and board of trade, the provincial government has made no move towards appointing any other person here to issue licences or has any arrangement been made whereby a provincial government official will come here to undertake this work.

Reeve Bentley suggested that motor vehicle licences could be issued by independent persons, other than government employees, as other types of government licences were issued by tradesmen.

He thought the trade board should approach the government on this argument and the meeting agreed to peruse the subject further.

Progress in surgery of the heart has been almost as rapid as surgery of any part of the human body. In fact, while abdominal surgery of an extensive nature was ushered in 100 years ago with the discovery of anesthesia, heart surgery is still in its infancy.

Sockeye No Detriment To Present Fish Life

KELOWNA - Contrary to the opinion held by some Okanagan sportsmen, introduction of sockeye salmon in Okanagan river and lake will "in no way be detrimental to present fish stocks," assert-ed James J. Cunningham, game commissioner, to the annual fish and game club meeting last week. Mr. Cunningham denied that valley sportsmen had anything to do with delaying the start of the Okanagan flood control project. Blame for the delay was placed at the doors of the game commissions across the border.

Fish ladders, insisted upon by American game bodies, will be installed at the dams called for in the control project, he declared.

Kelowna Deteated

Summerland played host to visiting Kelowna badminton players on Friday night last, January 12 and triumphed the matches to six in an interesting series of tussles.

Three of four men's doubles and the same number ladies' doubles went to the Summerland club, while the mixed doubles matches were drawn at three each. Dave Waddell did not compete for the Summerland club in these matches.

Mr. and Mrs. Cardinall were winners of the Summerland club's own round-robin tournament which was a feature of play on Tuesday evening, January 9.

There has been an encouraging increase in membership and interest since the Christmas holidays and the club is expecting to have one of the best seasons in years.

Results of the matches against Kelowna follow:

Mon's doubles: Fudge and Collins beat Robinson and Dodd and beat Stevens and Smith; Morgan and Beeman lost to Robinson and Dodd and won from Stevens and Smith.

Ladies' doubles: Miss Jackson and Mrs. Cuthbert lost to Stubbs and Whillis and beat Armstrong and Watrin; Mrs. Smith and Miss Carney beat Stubbs and Whillis and defeated Armstrong and Watrin.

Mixed doubles: Beeman and Mrs. Smith, beat Smith and Armstrong and lost to Stevens and Whillis; Morgan and Miss Carney beat Smith and Armstrong, and lost to Stevens and Whillis; Collins and Miss Jackson lost to Dodd and Watrin, and lost to Robinson and Stubbs; Fudge and Mrs. Cuthbert defeated Dodd and Watrin and beat Robinson and Stubbs.

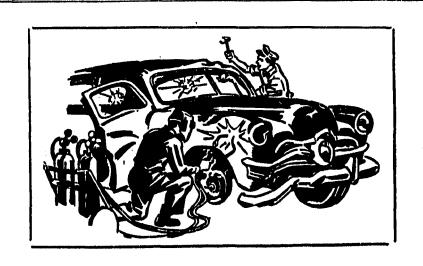

pose of this year in spite of the short crop was issued by the committee to any growers who are considering planting this variety. "We strongly advise against planting any more trees of this variety at the present time."

B.C. Federation Secretary Speaks

C. E. S. Walls, secretary of the B.C. Federation of Agriculture, addressed the BCFGA convention shortly on Wednesday afternoon, prior to his departure for the prairies where he will attend the Western Agricultural conference.

He re-iterated the statement that the constant increase in freight rates is cutting down on the domestic markets' consumption of agricultural products.

Also, he stressed the stand which agriculture has taken in regard to school costs and declared that the B.C. Federation is continuing its campaign to get education costs taken off the land.

He declared that twenty meetings of agricultural groups will be held throughout B.C. shortly to determine long and short-term policies in regard to agriculture, as suggested by Hon. H. R. Bowman, minister of agriculture.

Aged Resident, Mrs. Alice Doran, Passes

Mrs. Alice Doran, widow of the late L. J. Doran passed away in Summerland General hospital on Friday, Jan. 12, at the age of eighty-five.

The late Mrs. Doran was born in Ontario and had lived in B.C. for 48 years, at Lumby and Rossland and the last eight years in Summerland.

Surviving are one daughter, Mrs. G. E. Logie, West Summerland; three sons, M. J. Doran, E. A. Doran and L. S. Doran, all living in the United States, and eight grandchildren.

Requiem mass was celebrated at the Church of The Holy Child by Rev. Father A. M. Meulenbergh on | marshal and Mrs. Ira Betts as pi-Monday morning, Jan. 15.

Interment was in the Anglican cemetery.

TWO NEW NURSES AT LOCAL HOSPITAL

Miss Dorothy Garman of Climax, Sask., and Miss Lorraine Sherven, Leroy, Sask., who have been on the nursing staff of the hospital at Olds, Alta., have recently joined the staff of Summerland General hospital.

Cost of Apples To Britain Given

Mrs. F. W. Clarke, Westbank delegate to the BCFGA convention in Vernon this week, asked some pertinent questions regarding the shipment of apples to the Old Country market and the cost of putting B.C. apples on this important market.

This is of prime interest to local growers as Mrs. H. S. Lewes quoted reports from Scotland recently whereby the British housewife is called upon to pay exorbitant prices for Okanagan apples.

A compilation of costs to transport a box of apples to Great Britain was announced at \$6.02 per box, or, on the basis of present day exchange rates, 40 shillings.

Following is the breakdown: FOB \$2, freight to Vancouver 30c, terminal charges 2c, ocean freight \$1.37, insurance 3c, dock charges 15c, commission 25c, wholesale margin 40c, retail margin 60c, average transportation in GB 90c, total \$6.02.

FAITH REBEKAH LODGE **OFFICERS INSTALLED**

At the first regular meeting of Faith Rebekah Lodge No. 32 of the new year, January 10, the ceremony of the installation of the officers for the coming term was exercised.

Fifty members turned out to witness the installing of the following officers by Mrs. Murdie Watson, district deputy president, of Penticton. Mrs. S. Nagel acting as anist, both of Penticton, the remainder of the installing team was members of Faith.

Noble grand, Mrs. G. McIntyre; vice grand, Mrs. J. Raincock; recording secretary, Mrs. Walter Bleasdale; financial secretary, 'Mrs. J. Dunsdon; treasurer, Mrs. W. Gillard; chaplain, Mrs. M. Henker; warden, Mrs. H. Fiske; conductor, Mrs. H. Eden; inside guardian, Miss May Howard; outside guardian, Mrs. J. Brown; right supporter noble grand, Mrs. J. Caldwell; left supporter noble grand, Mrs. F. Downs; right supporter vice grand, Miss Lois Read; left supporter vice grand, Mrs. M. Yearwood; flagbearer, Mrs. W. Toevs; pianist, Mrs. H. Allison; junior past grand, Mrs. A. Holmes.

Good wishes and congratulations were extended by the visitors to the new officers and at the close of the meeting delicious refreshments were served by the retiring social committee under the capable convenorship of Mrs. R. Cornish.

Mr. and Mrs. Walter B. Powell and their children are leaving to-3-1-p a vacation.

MORE ABOUT-

STREAMLINING

Continued from Page 1 ed at all.

"This would enable the industry to have a flexible arrangement which would be applicable to all growers, thus distributing the burden equitably, and any year in which certain sizes had to be discarded they would not rank in the commercial pool."

Processors in Line

He warned that close consultation would have to be maintained with the processing company." suggesting that a position has been reached when its first responsibility should be to process such surplus fruit as it has been decided by the industry to discard for that particular season. Culls would have to be treated as culls and discarded altogether in the event there was sufficient tonnage to supply. the needs of the processing plants." Mr. Loyd realized that there

would be objections to the scheme but said "surely the time has come when we have to be realistic about conditions which face us. By a reasonable program of this kind we could cushion the impact of restricted markets as effectively as in any other way."

Manager J. B. Lander also referred to his proposal in his voluminous report which gave growers a splendid insight into the movement of the crop in the pastseason and also indicated the prospects for the immediate future.

He called it an "alarming situation" in respect to the necessity now of attempting to market a large volume of apples below extra fancy and fancy grades.

"These lower grade apples simply cannot support present rates and leave anything whatever for the grower beyond growing and packing costs," he declared. "It is doubtful if we can continue to recover from the consumer even these costs if the present volume of cee grade fruit must be forced onto the fresh fruit market.

"It requires but little study to reach the inescapable conclusion that without special freight rate treatment, as much as one-third of our presentCanadian fruit traffic will have to be diverted to processing uses, to the serious detriment of railway revenues and the economy of the fruit grower.

"Our traffic manager is presenting this view to the board of transport commissioners in the current five percent increase hearing and we will continue to emphasize to railway officials the inevitable results of the increasing burden of transportation costs on the industry," Mr Lander declared.

Resolutions Started

Following a question and answer period Tuesday afternoon the convention swung into consideration ealing with the sale

deal would present a problem in the packinghouse while an announcement at the start of the season that certain sizes would be eliminated would present a clearer picture to the grower.

He declared that "we don't like it", referring to the necessity of eliminating sizes and grades, but "we are in a straight jacket" as regards contracting market possibilities.

Mr. Garrish also asked a question on pooling, referring to a directive at the last convention that the pooling returns should "more closely reflect the market value of apples." He wanted to know if the pooling committee considered the values present in this year's crop procedure to be following the directive of the growers.

Mr. Loyd, who convenes the pooling committee, replied in the affirmative, pointing out that certain varieties are sent to certain markets which are considered capable of absorbing them.

George Stoll of Summerland referred to rumors that as soon as the 1949.apple marketing season was concluded (May 15, 1950) Wenatchee apples were imported on the Vancouver market.

Sales Manager Lander replied that it was quite possible such a situation did occur, while later in discussion it was pointed out that by an agreement made at Geneva, there is a six-week period from the middle of May each year when U.S. apples can come into Canada "free". Therefore it is the sales agency's policy to try and dispose of the apple crop prior to that time.

"Would you give up the cull pool in the processing deal?" queried N. J. Waddington of Rutland, to which Mr. Loyd replied that the "processing plant should take the position in the industry to handle the grades and sizes the industry deems advisable."

Turn Down Loose Apples

Winfield and Okanagan Centre combined to present a resolution asking that any apples which, at harvest time, have not a large percentage of extras and fancies be shipped with culls out loose in apple boxes to markets where tree fruits are not grown commercially. Convention did not deem this feasible and tossed it out with only two votes in favor.

Winfield and Okanagan Centre wanted "certain districts which cannot get fruit at competitive prices" to be declared "open" and permits granted to trucking firms to purchase fruit for resale. This was also deemed against the best interests of the central selling deal and was defeated with only three in favor.

Necessity of soft fruit which has been pre-cooled being transported under refrigeration was recognized by the convention in an Oliver resolution. Creston considered that present

practice of maintaining a stand-

Mr. Loyd replied that a percentage Original Shower for Margaret Martin

On Thursday evening, Jan. 11, Mrs. H. A. McCargar, Mrs. Al Campbell and Mrs. Ron Keeley of Penticton, were co-hostesses at a miscellaneous shower for Miss Margaret Martin, at the home of the former. Miss Martin is the daughter of Mr. and Mrs. E. Martin, Peach Orchard, whose marriage to Mr. Gordon Pohlmann takes place next Saturday afternoon, Jan. 20 The living-room was decorated with red streamers and an ingenious idea was the dumptruck full of confetti suspended from the ceiling from which the bride was showered" during the evening.

Several contests were enjoyed and when the bride-elect was the winner of the third one, little Cheryl Ann McCargar drew in a replica of a school bus, reminiscent of the fact that the groom-to-be drives a school bus each day. In it were many lovely gifts.

Winning prizes in contests were Mrs. W. Milne, Mrs. J. Graham, Mrs. T. Fisher, Mrs. Hugh McCutcheon, Mrs. Keeley and Mrs. Wm. Dodds.

Others invited included Mrs. E. Martin, Miss Marina Martin, Mrs. Ella Pohlmann, Mrs. Harold Short. Mrs. John Graham, Mrs. George Forster, Mrs. A. W. Vanderburgh, Mrs. E. R. Butler, Mrs. J. C. Robson, Mrs Angove, Mrs. Eva Steuart, Mrs Sowerbutt and Miss Mary Steuart.

Mrs. Frank Young Legion WA President Installation of officers of the Women's Auxiliary to the Canadian

Legion took place at the annual meeting on Jan. 11, 1951, in the parish hall.

Mrs. Frank Young, the new president was presented with a gavel. The presentation was made by the retiring president, Mrs. W. C. Mc-Cut**ch**eon.

Other officers for 1951 are: Vice-

agency.

Harvey Wilson and Eric Tait, Summerland delegates, were successful in their request that the BOFGA prepare a booklet for distribution to each registered grower giving a complete history of the fruit industry so that newcomers would have a better idea of the trial and error days preceding.the central selling deal, Reeve Bentley spoke warmly in favor of this move.

Glenmore growers voted against the suggestion on the question of cost alone but the rest of the delegates supported Summerland to a man.

Osoyoos led a successful plea for another approach to the government to obtain an offshore market subsidy to match the U.S. \$1.25 per box subsidy. Sales Manager Lander outlined attempts already made and declared that the industry would continue to press for either a subsidy or an elimination of certain export markets from the U.S. subsidy list.

Then came the "undesirable sizes elimination" resolution, which was proposed by Nigel Peolcy and R. A. Widmeyer of South and East Kelowna local. Mr. Pooley declared the resolution is only giving official sanction to what is already happening.

J. Snowsell of Glenmore was in opposition on the grounds that 'too much of our crop is being thrown out for one reason or another." This statement brought a limited applause and a prompt reply from A. R. Garrish of Oliver who favored a "tailoring" of the crop, with varieties and grades being given consideration.

With only a limited debate the number against was a complete surprise and required several counts before Chairman Ivor Newman could be satisfied that 41 had voted in favor and 40 against.

President Newman reported that there are 83 delegates present. one was absent at the time, and one delegate did not vote on this contentious issue,

Biggest Apple Problems

During the question period, Olivor's Mr. Garrish asked what particular varieties constituto "our biggest problem" and also if a limitation of the crop could be done on a percentage basis of any particular variety, rather than by siz-

Mr. Loyd replied that McIntosh, being 40 percent of the grop with a limited storage life presented the main marketing problem, while Wealthies would be the next most serious marketing headache, while all coo grado constitutos a throat to markets.

In answer to the second query, plans for further activities.

ard weight for apples should be considered and adjusted downwards as to maintain that weight considerable damage to the fruit is caused. The convention agreed that Creston's contentions warranted in-

vestigation by the industry. Oyama contended that the label cn apples boxes is at right angles to the proper manner of stacking and handling packs and that necessary steps should be taken to have boxes made and labelled to read upright when placed on the side. Fifteen delegates agreed but that was not enough to pass the resolution.

In the evening, after an hour's pause for supper, delegates considered other sales agency resolutions until 8:30 when an adjournment was allowed so that delegates could attend the Kelowna-Vernon hockey match.

Pool Deduction Sought

One of the most important resolutions was introduced by Rutland who advocated that the convention recommend that "power be obtained under which B.C. Tree Fruits Ltd. can treat advertising expenditures, as pool deductions with the proper proportion of cost charged to each commodity".

At present, advertising funds are raised by levy of the B.C. Fruit Board but when Sales Mananger J. B. Lander doclared that a more flexible situation would accrue with the passage of this recommendation the convention agreed hearti-

"If our advertising dollars were doubled we could possibly get three to four times the results," was Mr. Lander's contention, as he stressed the ever-increasing importance of advertising in selling the crop.

G. A. Barrat, B.C. Fruit Board chairman, was in agroomont as long as no attempt is made to open the marketing act at this time. A pool deduction would be possible through amondment to the threeyear contract.

JUVENILE ORANGE

ASSOCIATION HOLDS PARTY Sixteen girls of the Juvenile Or-

ange Association, (JOA) held a skating party on Jan. 11 after school at the local rink. Following skating the girls were invited to a hot dog and bean supper at the home of Mrs. Walter Gould, where Mrs. J. Broderick was

co-hostess with Mrs. Gould, After suppor games were onjoyed and a quiz contest proved quite

puzzling to some of the girls. Lator the girls thanked their hostesses for the delicious suppor and pleasant evening, and left with Any of the above items at city prices delivered to your door plus unsurpassed Service if Required

Growers' President Rowincial VICTORIA VICTORIA **Vacates Chair but Does Not Convince Delegates**

Ivor J. Newman, president of the B.C. Fruit Growers' Assn., an organization consisting of nearly 4,000 growers from the interior tree fruit producing area, vacated the chair Thursday morning at Vernon -curing the 62nd convention in a vain endeavor to steer the delegates along his line of thinking.

But the delegates could not agree with their president and despite his protestations they upheld an amended resolution from Vernon and authorized the BCFGA executive to determine from Ottawa just exactly where the apple growing industry fits into the picture of the agricultural prices support act.

Thoughts of the refusal of Ottawa to consider the industry's plea for help under this act in relation to the poor returns from the 1949 crop were behind this move.

President Newman called it "flogging a dead horse", but delegates still considered that they wanted to know where they stand in relation to the dominion agriculture department and this act in particular.

No Licences To be Issued **Here This Year**

RCMP Constable I. G. Thorsteinson has been instructed to return all motor vehicle licence plates to the provincial government agent in. Penticton.

This announcement, which came at the first of the week, means that approximately 1,000 car, truck, trailer and other vehicle licences. which come into Summerland district must either be purchased at the Penticton government agent's -office or forwarded by mail from Victoria.

For some years local civic heads have feared that such a move would be taken as the single police constable here has found the work extremely arduous and detrimental to the carrying out of his own duties.

The Summerland Board of Trade has spearheaded a determinand effort to have the provincial government appoint a local party to issue licences or have the provincial government office in Penticton send up competent clerks to take care of the main issuing rush here each year at the end of February and early in March.

Lorne Perry was given such authority one year but the government later claimed that it could not stand the extra expense involved.

In years past the government agent in Penticton and some staff members used to come to Summerland for several days each year and issue the necessary licences.

Last week, before the present ultimatum was issued the police officer here, the Summerland Board

Apart from the close vote on "tailoring" the crop, as reported in last week's issue, the growers' convention had only one other really contentious point to discuss, and their president provided the main contentions in the debate.

"If that act doesn't apply to us then it should be taken off the statute books," declared Billy Johnson, Penticton grower.

The Vernon resolution pointed out that this prices support act was placed on the statute books to provide adequate and stable returns for produce so that the producer could receive an income proportionate to other classes of industry

Not only did the 1949 crop year produce a disastrous result as regards returns to nearly 4,000 growers and their families but effected 120,00 people directly or indirectly dependent on the industry, it continued. Vernon wanted to continue the application for price support to the extent of 37 cents per box de-

ficit under provisions of the act and to demand of the federal government "immediate and favorable consideration of the 5-monthold application."

But A. R. Garrish of Oliver suggested that instead of the final requests that the convention suggest an explanation from the federal government as to what constitutes a need in the fruit industry to come under this act. BCFGA "Too Late"

Apart from suggesting that the convention would be "flogging a dead horse," President Newman also insinuated that some disagreeald under this act

He asked L. G. Butler, East Kelowna Tree Fruits governor to elucidate and Mr. Butler replied that the BCFGA seemed to be handling the situation.

Mr. Newman, appearing slightly erturbed over ed that Tree Figuits had handled the request to Ottawa last January and that the BCFGA had been brought in "too late". Mr. Newman also agreed with C. J. McKenzie, Summerland that the B.C. Federation of Agriculture resolution, already adopted by the convention and even then on its way to Calgary for further endorsation covered the subject under discussion.

Vol. 6, No. 4 West Summerland, B.C., Thursday, January 25, 1951

Arena Opening Feb. 3 With Figure Skating, **Races, Novelty Game**

Summerland's fine new arena, rapidly nearing completion of the major portion of its construction, will be officially opened on Saturday, February 3, provided there is sufficient freezing weather by that time so that a sheet of ice can be provided.

This was the decision of Summerland Rink Association directors last Sunday afternoon when they realized that there would not be sufficient time to make a proper sheet of ice even though the temperature did drop in the week.

Although the heaviest snowfall of the winter cascaded down Wednesday morning, the weather is still not cold enough to provide a proper ice sheet. • •

Tentative plans for the official opening were proceeded with at last week-end's meeting and various committees appointed to work with President George Stoll, Vicepresident Cece Wade, Secretary Clare Elsey and Treasurer G. A. Laidlaw.

J. R. Armstrong was appointed head of the program committee, Gerry Hallquist in charge of the refreshments committee and J. W. Mitchell, door admissions. Joe Sheeley has charge of advertising and Harvey Wilson ticket sales.

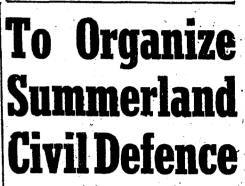

Invitations have been extended to O. L. Jones, MP for Yale and W. A. C. Bennett, MLA for South Okanagan, but neither of these governmental representatives will be in the valley at that time, it is feared.

Reeve C. E. Bentley has been invited to officially open the new arena while the president of the Summerland Ministerial Assn. has been asked to dedicate the structure.

The Summerland Band will be in attendance and recording equipment from CKOV in Kelowna and CKOK in Penticton will be on hand. In all likelihood, Jack Thompson, "Grandpappy Jackson" of CKOV will be master of cere-

monies for the evening. Official opening will take place at nine o'clock Saturday night, Feb. 3 but will be preceded by an hour's program which will start with kiddies' skating races for the first half hour, followed by a revue by the Kelowna Figure Skating Club.

Arrangements have not been completed for their appearance, but it is hoped that some thirty experts from the Orchard City will

Reeve C. E. Bentley has been given authority to proceed with the organization of a civil defence committee in Summerland.

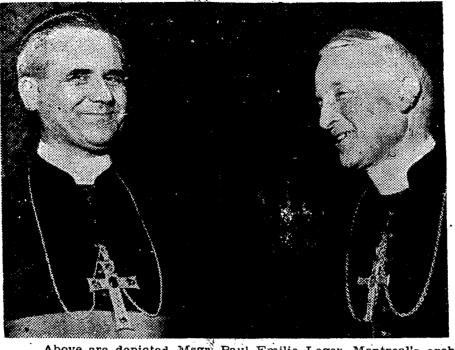

On Tuesday afternoon he read a list to council of most local civic organizations who will be asked to send representatives to a joint organizational meeting.

At the same time, His Worship stressed that the committee could take no active organizing steps until such time as direction is obtained from other central bodies.

The Okanagan Municipal Assn. is suggesting that it be named the co-ordinating body for the interior and Reeve Bentley was in accord with this suggestion.

A provincial co-ordinator has been named by the provincial government and through him the various areas can be tied together and a provincial-wide civil defence scheme inaugurated, he felt. This administrator will be coming to the Okanagan shortly, Reeve Bentley believed following his correspondence with Victoria on⁷ the subject.

Refugees from the coast would probably have to be handled as the first part of any raid on the Pacific Coast, Reeve Bentley suggest-

Teachers to get \$80,208 in so insinuated that some disagree ment had arisen between Tree Fruits governors and the BCFGA executive regarding the handling **Board Statement Reveals**

That the Summerland school board offer to the teachers will amount to an increase of \$11,393 over last year's salary payments, bringing the total expenditure for the year to \$80,208 for salaries is one of the main statements contained in a report issued this week by School Board No. 77 (Summerland) over the signature of C. J. Bleasdale, chairman. The difference between the board's offer and the teachers' requests averages \$30.40 per teacher, and is based on a four percnt increase for every five points rise in cost of living. School board has offered three percent, after the present salary agreement has been paid. It was understood this morning that there is still some chance of an agreement being reached between the two parties before arbitration is sought. Teachers have offered to accept the arbitration or settlement reached between Ponticton teachers and trustees of District No. 15, but the local school board has asked for an independent arbitration if no settlement can be reached locally.

bitration.

Red Cross Director Confers on Campaian

of Trade wrote to the provincial government agent in Penticton seeking either the appointment of a local issuing officer or maintaining that the government should send competent clerks' here to issue the licences.

On Tuesday, municipal council decided to try once more to get government action on behalf of the hundreds of local motorists who will now be inconvenienced.

One amusing part of the licence deal is that the new plates were sent to Constable Thorsteinson by Victoria but addressed to Summerland, instead of West Summerland. There is no free delivery of express from lower town to the police office, the constable has no police funds available to pay for the express charge, so the plates have been reposing for two weeks in the CPR freight sheds, it is stated.

CONGRATULATES COUNCIL

Summerland Board of Trade's letter to the municipal council expressing its congratulations for the fic signs was read to Tuesday's council session,

"This is a further endorsation of a motion already passed," was Mr. McKenzie's thought.

By this time President Newman was out of the chair and the chairmanship taken over by J. G. Campbell, Salmon Arm, and he insisted the motion was out of order.

C. R. Haker, Peachland, replied that the Oliver amendment to the Vernon resolution asks for a concise statement on the apple industry alone and goes farther than the B.C. Federation motion.

Mr. Garrish returned to the mike to state that under the B.C. Fedexcellent job of crecting new traf- eration motion "we could get another dish of eyewash". Continued on Page 10

Ten Percent Raise in Fire Chief's Salary is Allowed by Council

Fire Chief Ed Gould will receive, and a committee meeting is to be a ten percent increase in basic salary and will be given \$10 per month car allowance, municipal council agreed on Tuesday afternoon when the elderly fire brigade official waited on the council.

Mr. Gould declared he should have \$125 per month but a compromise which worked out to \$108 was reached, although Mr. Gould appeared reluctant to acquiesco.

This brought the fire department's estimates to \$3,030 for 1951, against an expenditure last year of \$2,654. Bosides the ohlef's salary and allowance of \$1,220 practices and fires total \$800, telephones \$306, hydrant rontal \$85, insurance \$162, equipment \$384 and sundry items \$110.

New hose, rope and sundry other items are included in the equipment figure.

Last year, 18 fire calls were answered by an average of 8 1/5 men and 24 practices were held, attendcd by 10¼ men each. A good attendance at the fire marshal's school and the fire college at Vernon was reported,

In considering Mr. Gould's appli-

neld shortly on the subject. It was stated that the 10 percent

rise in Mr. Gould's case would not necessarily establish a procedent. Want More Details

Municipal council scolded Mr. Gould slightly for not submitting more detailed reports of his work as fire chief and assistant fire marshal. The council has no way of determining whether Mr. Gould should be given an increase unless more details concerning his day to untrue according to the latest govday duties are available.

Chief Gould countered that he is required to be on call 24 hours a day as the duties of fire chief call for his attendance at every fire and practice.

At one stage in the discussion Reeve Bentley reminded Mr. Gould that the council had not bargained on a full-time fire chief when the appointment was made, It was suggested that perhaps Chief Gould was being just a little too conscientious in carrying out his prescribod dutios.

Mr. Gould declared that it was almost impossible for him to take another job when these duties were confronting him. He had been able cution, it was stated that a general to make a certain amount from revision of municipal wage scales his home workshop but that type is being considered by the council l of work is not so prevalent today.

Following is the complete board statement:

In view of the situation that has arisen in the salary negotiations between the teachers and the school board, the members of the board wish to make sure that every teacher in its employ is in possession of the revelant facts of the case as they appear to the board.

Market Sold

wood, well-known young Summer-

land businessman that he has dis-

posed of his Quality Meat Market

ers will take command of the busi-

1. The amount of the 1951 budget is definitely limited by the action of the government in setting the over-all figure which the trustees may not exceed. This action is taken pursuant to subsection (2a) of section 120 of the schools act and by the government policy that the school mill rate for the rural area may not exceed 8 mills exclusive of debt and capital costs.

Because of the method by which school budgets are shared by the component parts of the school district as provided in section 56 of the schools act, the limitation on the amount that can be collected from the rural area, plus the gov-'ernment's contribution as special aid, limits the whole school budget.

As a matter of fact, these limitations that have been placed on the 1951 budget permit an amount slightly below the amount of the 1950 budget. When it is realized that this district is just entoring into an expanded educational program, the difficult position of the board can be readily seen. The contention that the board can expand its revenue by means of the tax rate and the proceeds of the SS & MA tax proceeds is entirely ernment ruling,

2. On account of the enlargedteaching staff and the increase in teachers' salaries on the basis of the board's offer, the teachers' salary payroll this year would be \$80,-208 against \$68,815 last year-an increase of \$11,893 or over 16%. 3. To take care of the rise in the cost of living, the board has made an offer which brings teachers' salaries to a level averaging \$700 higher per teacher employed than salaries paid in April, 1948, when this district was formed. The board knows of no other group of workers in receipt of so great a cost of living allowance. That it is unevenly distributed is not the fault of the board. The board made an effort for a more equitable dis-Continued on Page 4

an idea what can be accomplished ed. when an arena is available in a community.

be on hand to give local spectators

After the opening, at which President Stoll and Curling Club President Cecil Wade will speak, more skating races will be staged, followed by a broomball game between Rotary and Kiwanis club teams.

As the windup, the big drawing for fifty prizes donated by Summerland merchants will be given away to lucky ticket holders.

Assessment Court TEACHERS MEET Sits February 8

Court of revision on the assessment roll will start on Thursday morning, February 8, at 10 o'clock, council was informed on Tuesday. It is not anticipated that many protests will be filed as only minor adjustments were made to the assessment roll this year and no general increase in any district or particular type of business was made.

The Red Cross and St. John Ambulance Assn. would be pressed into service, hospital supplies would have to be prepared, billetting arrangements made in advance, communications prepared and a protective group organized. His Worship thought that some body such as the Pacific Coast Mi-

litia Rangers might be organized, along with a small auxiliary police force. "You're on the right track", was the terse comment of Councillor

Norman Holmes, and other council members readily agreed that Reeve Bentley should proceed with initial organization moves.

NEED CERTIFICATE

Workmen's Compensation Board has advised municipal council that all commercial blasters must obtain a WCB certificate before being employed on any type of blasting work.

Council Agrees to Najor Purchases From Road Department Estimates

Estimates, totalling \$4,150 for truck would be switched over to work on maintaining Giant's Head the new truck, road, including application of a scalcoat were agreed upon by mun-icipal council Tuesday afternoon along with other road department

municipality approximately \$5,000. All the work on Giant's Head may not be possible of attainment this year but the provincial governmen't will be asked to pay its forty percent share of this upkeep as Glant's Head is now a secondary highway.

Scalcoating was estimated at \$1,-080, cleaning ditches \$180, 7 asphalt approaches at intersections \$1,890, sanding \$180 and patching \$180, making a total of \$3,510. Al-so included in the program is an estimated \$1,000 for blasting rock on the roadside near The Milne library buildings had been work- Cannery and near the substation, to widen this municipal highway,

"Best protection you can get is scalcoating," was Councilior F. E. Atkinson's contention aftor Councillor Francis Stouart had submitted estimates for this Glant's Hoad road work.

A quotation of \$3,272.40, including options, for a 1951 Maple Loaf Two boys were charged recent- 2%-ton truck was submitted by Pollock Motors Ltd, to replace municipal truck No. 5, purchased in 1948. A trade-in allowance of \$1,-450 would mean that the municipality would have an outlay of \$1,-822.40 not.

The body and hoist on No. 5 cost \$10,500.

As this truck is badly in need

of new tires, which at present day prices would cost \$800 for a set of six, the actual cost will be \$1,000 councillors argued. At \$500 per year, the truck's depreciation is standard, it was considered.

New Holst Equipment

Next major expenditure considered by council on Tuesday was for a hoist, ongine, cable, bucket and sundry attachments, which would amount to \$3,000. If this equipment is available the old dragline could be left in the shalepit and the new hoist installed in the gravel pit, thus giving two operations for any occasion needed,

Councillor Francis Steuart had considered that the old dragline would be replaced by the new holst and no new motor would be needed, but it was pointed out the salvage value on this old equipment would not be much and with the addition of a motor, at approximately \$600, two separate operations could be provided.

Council tentatively agreed to purchase this equipment from the Finning Tractor and Equipment Co. Ltd., with Councillor F. M. Steuart and Roove C. E. Bentley empowered to clinch the deal if they find it feasible.

In answer to one query it was pointed out that a loader would

Meets Today expenditures which will cost the As the suggested changes in the Okanagan Union Library setup have been declared ultra vires, because all municipalities and school boards did not vote in favor, an-

other meeting of the board of directors is being held today at Kelowna. Reeve C. E. Bentley, Councillor Eric Tait and Mrs. A, W. Vanderburgh will be going north to represent the Summerland district at what may prove to be a most

Road to Follow Has Been Defined

AST week's BCFGA convention at Vernon produced some surprising moments. It brought forth commendation of the industry's leaders and at the same time showed an independence of thought on other lines which was surprising to many.

The sales agency heads made it quite clear that the road ahead for the fruit industry is not clear sailing, by any means. There is no hope of obtaining further export markets and it is always doubtful if the United Kingdom will take any quantity of B.C. apples each year.

Quebec and Ontario production figures have been increasing and it is steadily becoming more difficult to enter the eastern Canada markets until the season is well advanced.

That leaves just the four western provinces and the United States and with an increasing production in this valley this western area cannot be expected to cope with a heavy crop year.

And on top of all that, increased handling and transportation charges are making it more difficult to put the perishable product before the consumer at a price he will be willing to pay.

Therefore, it is quite understandable that the sales officials want to be able to "tailor" the crop to the sizes and grades which they feel will sell readily on the fresh fruit markets and return a reasonable amount to the producer.

But this proposal would seem to have been advanced a year too soon. Many producers are not ready to adopt this line of thinking. The growers split almost evenly on the subject and it was thought | but it has many road blocks in the way.

by some that the opposing delegates did not wish to give the sales agency that much authority.

And yet, in the next breath, these same delegates gave their sales officials on overwhelming vote of confidence and appreciation.

It was also interesting to note that the area which has a preponderance of better grades and sizes of apples, namely Peachland south to the border, voted solidly for the "tailoring" resolution, with one exception. And that one exception, strange to note, was Penticton, which is supposed to produce more good fruit than any other district.

One of the most encouraging notes was that grower-delegates appreciate the value of advertising. They voted for a change in the method of raising the advertising fund so that a greater amount can be produced if the sales agency feels it is warranted in order to move a big crop.

Also, keen interest was evidenced in the operation of the processing plants owned and operated by the growers themselves. That they may have to be devoted entirely to utilizing low-grade and undesirable-sized fruit instead of cull apples was recognized.

It would appear from the general tenor of the convention that growers realize more than ever the need for producing top quality fruit. They also are beginning to see that there can be no return to them for poor quality fruit which is shipped to the fresh fruit market to compete with their own better grade products.

The future road to follow is clearly outlined

H. C. McGuffie is an Irishman who has a good deal of the Blarney Stone in his makeup, but not so much that he cannot resound at some strength when his ire is aroused over any apparent maladjustments in his favorite topic ... the fruit industry.

Thus it was that Mr. McGuffie, a Keremeos delegate who is well known to all delegates, rose at the 62nd BCFGA convention Thursday morning last and denounced the high transportation charges which the industry is forced to pay.

He followed Sales Manager Lander and President A. K. Loyd in emphasizing this point, but he did it just as effectively.

In fact, Salmon Arm withdrew its resolution on freight rate charges in favor of the McGuffie-sponsored one from Keremeos.

Mr. McGuffie waxed so eloquent as he reviewed the charges being made against the railway companies that he declared them to be a "rank injustice to the apple grower of B.C."

After reviewing the various freight rates and showing that they are quite a bit higher in Canada than corresponding runs in the U.S., the convention rose as a man to give a standing vote to the Keremeo's resolution, which pointed out that many commodities are carried by the railways at rates far below cost, thus creating an unfair and inequitable situation.

The Keremeos move resolved that the convention tell the BCFGA to "prepare a brief, based on facts, again protesting against the continuance of the present system under which surplus earnings from fruit are used by the railways to subsidize other industries, and present such to the government with a demand that this situation be corrected without delay, even if necessary through subsidizing the railways to cover their losses on low-grade products."

Some of the figures presented to the convention were:

Kelowna to Winnipeg, 1210 miles

\$1.79 per 100 lbs. \$716 per car 800 boxes

Kelowa to Minneapolis, 1550 miles, \$1.52 per 100 lbs. \$608 per car 800 boxes

Wenatchee to Devil's Lake, N.D., 1219 miles, \$1.52 per 100 lbs. \$608 per car 800 boxes

Kelowna to Regina, 862 miles, \$1.51 per 100 lbs. \$604 per car 800 boxes

Wenatchee to Glasgow, Mont., 857 miles, \$1.09 per 100 lbs. \$436 per car 800 boxes

Kelowna to Toronto, 2449 miles, \$1.92 per 100 lbs. \$768 per car 800 boxes

Kelowna to New York, 2930 miles,

\$1.92 per 100 lbs. \$768 per car 800 boxes Kelowna to New Orleans, 2890 miles,

\$1.57 per 100 lbs. \$628 per car 800 boxes

Bentley Wants "Bulge Pack" Eliminated

A program for the harvesting and handling of tree fruits in all interior regions has been laid down by the better fruits' committee of the BCFGA, headed by A. K. Loyd. This is one of the most important committees which deals, week by week, with the problems of the fruit grower and the handling of his product.

In discussing the report at the outset of the growers' convention in Vernon last week, Reeve C. E. Bentley, Summerland, led an attack on the "bulge" on apple boxes.

He deplored the practice of allowing a crown on the apple pack and claimed that it causes a great deal of bruising to the apples in transit.

Better Fruits Program

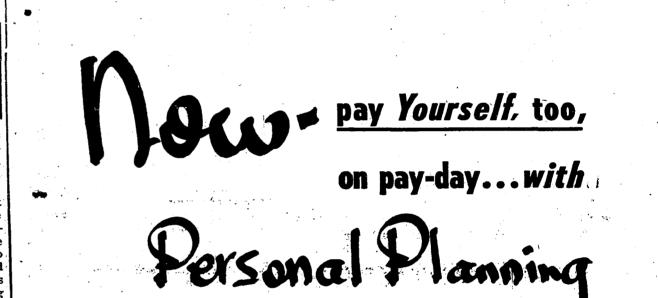

The amended better fruits committee program, as it exists right now, is as follows:

1. That McIntosh, Delicious, Grimes Golden and Bananas be moved from orchards to packing houses within 24 hours (if possible). or 72 hours at maximum.

2. That McIntosh and Delicious be packed and shipped or coldstored, packed or loose, within 72 hours of receipt at the packing house.

3. That packing houses concentrate on the packing of McIntosh for the first 16 days after the startpick date for McIntosh, as set by the District Horticulturist in the respective areas and providing, of course, that the fruit is available from deliveries being made from the orchards.

4. It was agreed that packing houses with D'Anjou pears would have to arrange for the packing of these pears during the 16 day period provided for McIntosh. Continued on Page 10

A fresh young university graduate-'fresh' in the sense of 'recent', that is-tried hard to be very cynical and disillusioned with me the other day. We had been chatting of a prominent provincial figure who had been receiving a lot of publicity for charitable good works, and the f.y.u.g. remarked loftily,

'Of course, there's nothing very noble or unselfish in his actions, really. There never is. All we human being always act in our own selfish interests all the time.'

"How do you make that out?" I asked, agreeably agog.

"Well, look at this man we've just been talking

them. The biggest givers to charity are by no means the most generous; the Scriptural story of the widow's mite is still applicable. Plenty of parents spoil their children because it is much easier to give in to them than to try to train them properly.

Most of us go to church for what we can get out of it rather than what we put into it; I like the story of the church-goer who complained to the bishop or dean or some such superior being that the way the new pastor was running the church, he no. longer got anything out of it; and the bishop snapped back, "It's what you put into your church that marks you as a Christian, my man, not what you're getting

about. He is rich and retired, with plenty of spare time and money. He can give far more of both than the ordinary person can afford, without any sacrifices at all. And it makes him feel good to be called generous and a public benefactor and all that stuff.

"Lesser folk are just the same, in smaller ways. The unselfish parents who deprive themselves for their children are as proud and pleased with their families as they would be with themselves and have the fun of being called unselfish as well. The wives and husbands, who are held up to us as models of forbearance and patience and generosity actually get more kick out of thinking of themselves as noble martyrs than they would out of having their own way.

"Your church-going Christians just love appearing in public as good moral examples. And your noble community workers, who are supposed to be so self-sacrificing, either love the sense of power they get from running community affairs, or are secretly glad to get away from the cares of home, even when they are doing the most groaning about all the evenings out they suffer."

He looked hopefully at me, evidently expecting me to be appalled by this revelation, so I tried to look suitably impressed and asked him about his grandmother's Siamese twin cats, by way of a tactful change of subject.

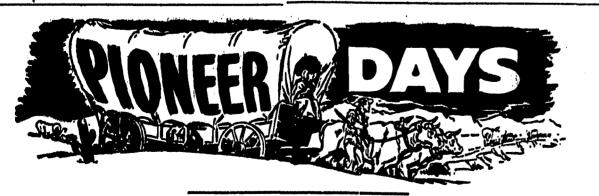

For his remarks are neither new, nor wholly true. Partly true, yes; and it might be good for many of us to consider just how much truth is in

out of it."

And I never hear some fellow citizen groaning about the enormous amount of community organization work he has to go to, and how little time at home he gets-often with a reproving sidewise glance at me-but what I wonder if he doesn't really enjoy, as the f.y.u.g. said, the feeling of importance of running some club or society, of imposing his will on other people, or just the relief of getting away from his noisy kids and nagging wife—or her noisy kids and uninterested husband, as the case may be. I still wonder if a dozen happy homes aren't as big a contribution to a community as a dozen people away from home going through the forms of some organization.

Nevertheless-or, as I should say in view of the date, "for a' that and a' that"-I still believe there is unseilfishness and nobility in the world. There are people who really give till it hurts, of both time and money, to church and charitable drives. There are still parents who deliberately choose the harder way for themselves because they think it is better for their children. And there still are, in Summerland and every other community, people who give their time to community work when they would much rather be elsewhere, just because they feel there are jobs worth doing and everybody ought to share in them.

I'd like to ask that f.y.u.g. about those same things twenty years from now, too; I've a suspicion that by then he will agree with me,

FORTY YEARS AGO January, 1011

After making her usual trip to Pentioton on Thursday evening the Okanagan returned to Summerland where she tied up for the night. Had she remained at Pentieton she would have risked being frozen up tight by morning.

Mr. R. H. Agur of Summerland was elected president of the Fruit Growers Association of British Columbia at its annual meeting in Victoria this week.

About sixty were in attendance at the ratepayers' meeting in the school at West Summerland. Mr. C. H. Cordy was appointed to the chair and Mr. W. C. W. Fosbery, secretary. The object of the meeting was to consider the advisability of forming a ratepayers' association in the municipality and a constitution of the proposed association was read clause by clause. It was kinson, painter and decorator on approved and the association formed. The following officers were

vice-president, C. Fetherstonhaugh; [service performed by Rev. W. A secretary-treasurer, J. Kirk; committee, R. H. English, T. J. Garnett, Capt. Webb, T, Dale and A, Richardson.

WORKING WITH CANADI			
HORNING WITH GANADI	ANS IN EVERY WALK	OF LIFE SINCE	: 1017

Most people leave themselves out in the cold on. pay-day. They pay the grocer and the baker...the milkman and the landlord. Everybody and his uncle dig into their pay envelopes but themselves.

Result — they're usually in a financial strait-jacket ... and they worry. They worry about bills on hand. They worry about bills to come. They worry about unexpected bills. Money is always on their mind -souring their pleasure in living. And cobwebs gather on their plans for tomorrow.

What's the answer? There's only one ...

... Personal Planning ... WHY?

Personal Planning is much more than just drawing up a budget. Budgets are often frustrating dog-collars. They usually tie you down and make life a very monotonous affair.

No, Personal Planning shows you how to live within your income and enjoy it. It's a complete financial program, cut from the pattern of your particular needs and problems.

Personal Planning won't help you make millions. But-given an honest chance-it will cure your 'day-after-pay-day blues.'

You'll learn how to make your budget work for you, instead of you working for it. And you'll also find that Personal Planning helps you realize your plans for tomorrow much sooner than you have dared to hope.

The Summerland Review, Thursday, January 25, 1951

PAGE THREE

Singers & Players Club

Here is the picture we were trying to realize at our Singer rehearsal last Tuesday.

The officers of the 35th Dragoon guards are assembled at the steps of castle Bunthorne to welcome their lady loves from whom they have been separated for over a year. They are brisk and smart in their trim uniforms. When however, the ladies arrive on the scene, instead of rushing to the Dragoons in welcome, they are trailing around despondently after Mr. Bunthorne, a poet who has succeeded in convincing them that to be artistic and aesthetic they must sit as his feet and listen to his very bad poetry.

So that we may tell this story in operatic form Sullivan has written music for us and Gilbert has given us the words. Both must be memorized to such a degree as to become a natural and spontaneous expression of the performer, and it will help considerably towards achieving this picture if the singers will now please make every effort to learn the words of at least this part of the opera before next rehearsal so that the books may be dispensed with. Then, when we have this scene perfected, we can go on to the others.

Thanks to Macil's Ladies' Wear who loaned us the models and to Mrs. Mason who dressed them so skillfully and attractively, the maidens have some idea now of the costumes they will wear. They will have noticed no doubt that the flowing lines of the first act costume are designed to enhance their languid and hopeless postures so that they may recline, sit and kneel about the stage in the appropriate attitudes of despair. So that we may practise these attitudes as soon as possible, will the ladies the Players is that their progress dress in such a way for the next is satisfactory.

Activities Page

We had a good turnout at our election dance last Saturday night. Too bad we couldn't have Ken's Men every Saturday night.

I suppose you all know already our new mayor is Leighton Nesbitt. Doreen Steuart made an outgoing speech and Leighton Nesbitt did his first duty which was to call a meeting Monday night.

Officers were decided at the meeting as follows:

Deputy mayor, Daryl Weitzel; ity clerk, Winnie Smith; treasurer, Doreen Killback, re-elected; city engineer, Barry Wilson; music more to be appointed. They meet committee, Joe Thompson; social committee, Arlene Raincock; reporter, Yvonne Polesello.

There will be dancing instructions after school for those who would like to go to teen town but cannot dance. For further information see Jack Smith. There will be a dance this Saturday, admission 25c. So com_{e} on kids, turn out.

rehearsal as to make it not disagreeable for them to sit on the floor and so forth.

They will also have noticed the trim business-like lines Mrs. Mason has designed for the costume change. Won't the little straw sailors with their bright headed hat pins be something. It will be an interesting job for us to bring out this metamorphosis of behavior and attitude. If you will compare the words and music of the ladies' chorus at the end of the opera with the rest you will see how the composers have helped us to do this. Again this week our word from

Every Scout troop must be sponsored by some organization which appoints a committee to administer. its responsibility. In Summerland, the 1st Summerland troop and Cub pack are sponsored by the local branch of the Canadian Legion.

The Local Group Committee consists of B. A. Sladen, president; S. W. J. Feltham, secretary-treasurer and W. R. Boyd, H. R. McLarty, E. F. Smith, George F. Lewis and one whenever required by the Scoutmaster and Cubmaster.

At this Wednesday's meeting the annual father and son banquet for Cubs and Scouts was set for March 6 and ways and means of financing the trip for a Scout from the local troop to attend the coming world jamboree in Austria this and the sounds of various instru-August were discussed.

Scout troop and Cub packs don't just happen, but are the result of careful planning and continuous activity and support behind the scenes. This troop and pack recognize and acknowledge the excellent interest and support of their sponsors.

Scout Notices: Next Tuesday instruction will commence on ambulance man's badge. Scouts are reminded meetings start promptly at 7 p.m.

1st Summerland Cub Pack: This week's meeting opened with the Grand Howl, followed by inspection. Two new recruits were received, bringing the pack strength to 15, just 9 boys short of a full pack. Boys between ages of 8 and 10 years will be welcomed until full strength is reached. The meeting consisted of games and instruction on 1st star work.

There will be a hike this Satur-day morning, Jan. 27. The pack will meet at the B.C. Fruit Shippers packinghouse at 7:30 o'clock sharp equipped for one meal. For further information phone 2626 between 4 and 7 p.m.

Next meeting, Monday, Jan. 29 at Youth Centre, 6:30 p.m.

GUIDE NEWS

About forty Guides of the first and second companies held a skating party on Friday evening, Jan. 19 at the rink.

Guides and their leaders enjoyed the outing and welcome refreshments of hot cocoa, sandwiches, cake and cookies were served to them by Mrs. F. E. Atkinson, Mrs. James Marshall and Mrs. D. L.

Teacher Tells Rotarians of Aims In Teaching Music to Students

or succession of tones, the result of vibrations which are carried through the air and are known as sound waves," explained Mr. G. G. Brown, a member of the Summerland teaching staff, to the Rotary Club of Summerland Friday evening at the Nu-Way Annex.

He not only explained the origin of music, but also told of its evolution and the methods used in teaching music in the schools.

'Sound waves set up sensations in us that are either agreeable or disagreeable and we experience emotion reactions in response to these sensations," he continued. Good and Bad Sounds

"All sound waves which have an irregular pattern produce disagreeable sounds which we call noises; all sound waves having a regular pattern produce agreeable sounds which we call music.

"In order for a person to enjoy music he must be able to differentiate between good and bad sounds ments. Each instrument has a different pitch and a quality of sound. The more vibrations per second the higher the pitch and the fewer the lower the pitch.

"When we speak of instruments being out of tune we are really saying that it has lost its normal pitch, its frequency of vibrations.

"The quality of sound, on the other hand, is known as tone color, and differences are caused by variations in overtones." Mr. Brown described the overone as one which sounds at the same time as the fundamental tone and can be caused by the ma-terial out of which the instrument is made and its shape or size.

Music actually began with the primitive cry, Mr. Brown explained and traced the evolution of song and instruments, the best known being the Pipes of Pan and Apollo's lyre.

"In presenting music to students one must bear in mind the fact that music has a three-fold appeal," Mr. Brown continued, declaring that music produces a physical sensation, effects emotions or feelings, and appeals to the intellect.

Mistaken for Emotion

"The physical appeal is paramount as rhythm arouses a desire for action and stimulates our muscular system. The danger here is that the action of music on the nerve centre is often mistaken for emotion.

"The second factor is on a higher. plain as emotion or feeling , is more subjective. Emotions which music arouses creates mood or a feeling, and association is important here. We tend to associate certain events either personal or otherwise with the music.

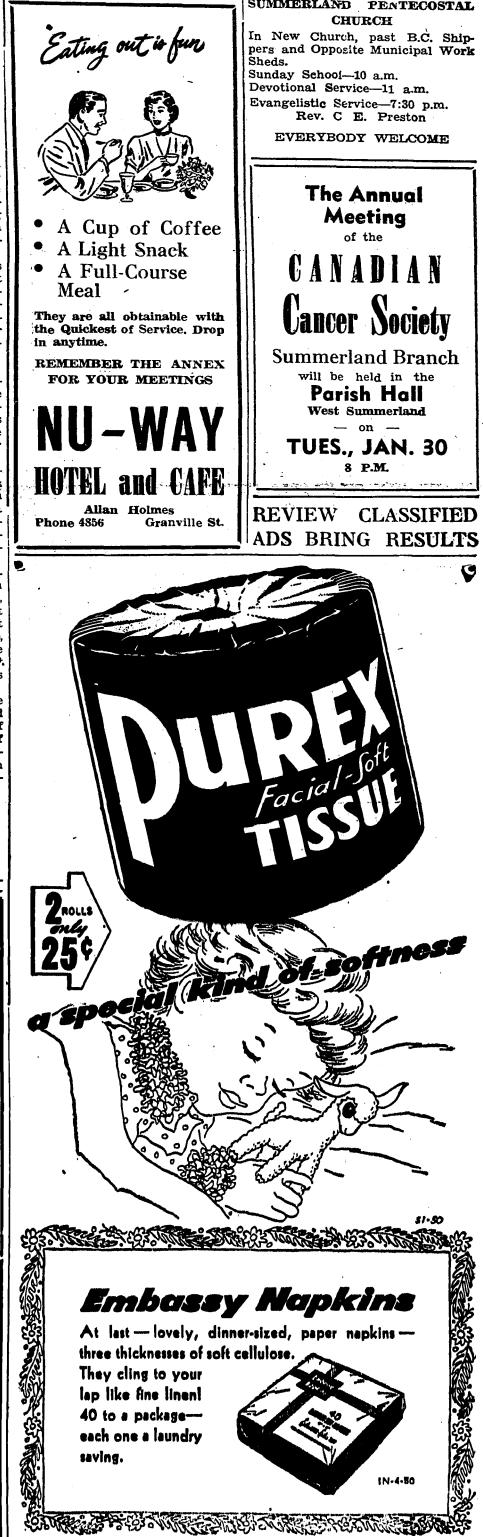

"The composer attempts to awak-

"Music is an organized sequence | preciate the beauty of music by encouraging concentration, discrimination, critical judgment and emotional responsiveness is "a most noble goal but I'm afraid we're falling far short of achieving it," he declared.

"In order to achieve the department's objectives it is essential to arouse an enthusiasm for music . . and this requires time, interest and a super abundance of patience and optimism," he contended.

"It is comparatively casy to make music functional in the school . . . to make music functional in the home I encourage home music study. The radio provides very keen competition and in many instances sets a poor example. It is much easier for some people to listen to The Tennessee Waltz than to a Beethoven symphony.

"To make music functional outside the school students are encouraged to become members of a choir, orchestra or band. Music plays a vital role in the school and if properly presented can have a profound influence on the future life of our young people," he concluded.

MORE ABOUT-

FEACHERS

Continued from page 1

tribution by offering an equal increase for all teachers amounting to three-fourths of what was requested but this offer was rejected.

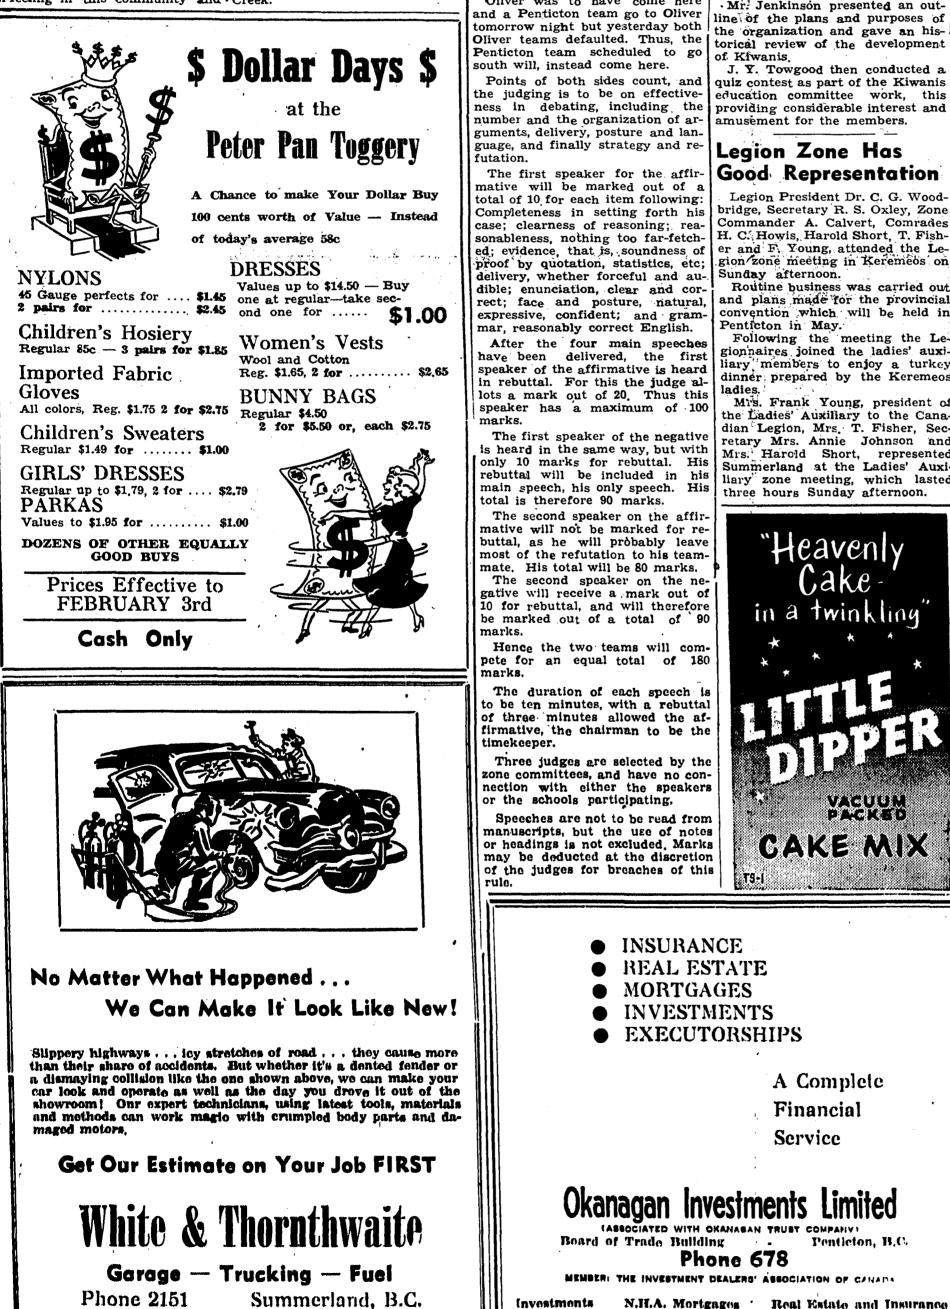

The average salary for 1951 covering present members of the teaching staff, if our offer was accepted, would be \$2,970. Surely that old story of the "poor, underpaid teacher" is now out of date. 4. The taxpayers of the school

district are in difficult circumstances and the disaster that has overtaken the economy of the area cannot be overcome for many years. The trustees think that the teachers, as part of the community, should consider this in making salary demands. The workers in the warehousing and packing plants recognized this in the past season and not only did not seek an increase in wages but accepted a cut of 6%. Many of these workers are our taxpayers.

5. The teachers in the nearby school district of Vernon recognized the difficult economic situation of the Okanagan area and accepted the offer that the teachers of this district have rejected.

6. Your salary committee letter of January 17, 1951, means that you still demand the original 4% increase for each 5 point rise in the index—or arbitration. It should be noted that arbitration throws into the discard the whole have been presented. salary schedule and all the provisions favorable to the teachers contained therein. The loss entailed in discarding the principle of an agreement by schedule far outweighs the possible gain of a few dollars in 1951.

The difference between your demand and the board offer amounts to a yearly average of \$30.24 per teacher. For this amount are you son-in-law and daughter, Mr. and willing to foment bitterness and ill-feeling in this community and Creek.

give the impression to the general public that a little money is that important?

7. The ratepayers of Summerland over a three-year period are spending \$300,000 to provide better accommodation and working conditions for teacher and pupil alike. Surely this fact should be appreciated and taken into consideration.

8. If the teachers are to obtain a larger share of the board's fixed budget, the board will have to starve or eliminate all unfixed items in the budget. The following items would result from this policy:

(a) Requiring the principals to devote more time to teaching. (b) Refusing requests for addi-

tional stenographic assistance. (c) Dispensing with counsellors.

(d) Increasing the pupil load per teacher.

(e) Drastically cutting teaching upplies and library provision. (f) Elimination of aid to ath-

etics. (g) Curtailing building mainten-

ance costs. (h) A policy of strict refusal to

entertain any request that comes from principals or teachers for additional expenditures during the year.

In conclusion I would like to impress upon you that the preservation of the happy relations that presently exist in this district depends upon a realistic attitude on the part of the rank and file of the teaching staff and I ask you to carefully consider all the facts that

Mrs. T. S. Manning Hostess to Circles

The first meeting of the amalgamated group of the Senior Circle and the Evening Circle of the Baptist church, of which Mrs. D. O. Knipfel is president, was held on Monday evening, Jan. 15 at the home of Mrs. T. S. Manning.

Mrs .Gordon Ritchie spoke to the gathering on weaving and the courses offered by the extension department of UBC.

Mrs. W. C. Wilkin led the devotional part of the meeting, and Miss Ruth Dale spoke on current events as related to Baptist Missions.

Mrs. Manning and Miss Barbara Braun served delicious refreshments following the meeting.

Federation Holds January Session

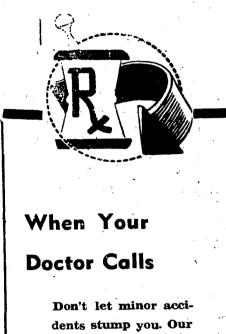

In a most inspiring ceremony, Rev. H. R. Whitmore installed the officers of St. Andrew's Women's Federation to open the January meeting.

Kind regards were received from members who were not able to attend, Mrs. T. W. Boothe, Mrs. H. K. Lott, and Mrs. James Shepherd.

After the various reports were given, new business was carried out. Included in this was the annual Easter tea and sale.

The meeting closed with a hymn and the Mizpah benediction by Mr. Whitmore.

A social tea was enjoyed with Mrs. Roy Angus and Mrs. F. E. Atkinson as hostesses.

aid kits are planned for all needs.

SOCIAL EDITOR . . Mrs. A. W. Vanderburgh

Church of the Holy Child is Scene Of Pohlmann-Martin Nuptials

A pretty winter wedding was sol- | wreath of blue leaves, and her emnized at 3 p.m. on Saturday afternoon, Jan. 20, by Rev. Fr. A. M. Meulenbergh at the rectory of the Church of The Holy Child. The principals were Margaret Louise, daughter of Mr. and Mrs. E. N. Martin, Peach Orchard, and Gordon W. H. Pohlmann, son of Mrs. Ella Pohlmann, Summerland, and Mr. Carl Pohlmann of Kelowna.

For her marriage the bride wore a lovely gown of white brocaded lace over satin, styled with a net yoke and bertha collar. The skirt was a full one, and the sleeves of the gown were long. A flowing net veil fell softly from a halo headdress. In the shower bouquet were three mauve orchids in a circle of red roses, with streamers of ribbon to which roses were attached. She was given in marriage by her father.

Miss Marina Martin attended her sister as maid of honor, and wore a charming blue taffeta gown, with bertha collar and full net overskirt. On her head was a pretty

Hold Shower for Margaret Martin

Mrs. George Woitte and Mrs. Vernon Charles were jointly responsible for arranging a lovely miscellaneous shower for Miss Margaret Martin, at her home on Tuesday evening, Jan. 16, when many friends and neighbors were invit-

Pink and white streamers from the chandelier to the table made a party atmosphere.

Contests made up part of the evening's entertainment, and the bride-elect was given her gifts in an apple box from which she had to remove a layer of apples ar-

ranged on the top. Delicious refreshments were centred around a prettily-decorated bride's cake which was cut by the honoree.

Others present were Mrs. Martin. Miss Marina Martin, Mrs. J. Van Gameron, Mrs. Geo. Sheldrake, Mrs. W. Charles, Mrs. D. Yearwood, Mrs. J. V. Charles, Mrs. A. E Hut ton. Mrs Jack Wilson, Mrs. Ivar Nilson, Mrs. W. Advocaat, Mrs. H. Pohlmann, Mrs. E. Pohlmann, Mrs. M. McKechnie, Mrs. Glen Woitte. Mrs. Alan Campbell, Mrs. Aubrey

flowers were a white orchid encircled by pink carnations. Miss Joyce Healey as bridesmaid

was in pink embroidered organdy, the bodice having a net yoke, a bertha collar, and fastening with small buttons to the waist in the back. Pink leaves formed her headdress, and she carried a mauve orchid, surrounded by white carnations.

Little Cheryl Ann McCargar, niece of the groom, was flower girl, in a long white satin frock, with lace yoke, and full overskirt of double nile green net. A tiny old-fashioned hat of satin and net completed her costume, while she carried tiny yellow roses with net and ribbon streamers.

Following the service a buffet supper was served at the bride's home to the thirty guests.

Mrs. Martin received with the bridal party wearing a lovely becoming gown of black lace over wine satin, with black accessories. and corsage of white orchids.

Mother of the groom, Mrs. Pohlman, wore a flowered printed jersey frock having a grey background, with wine accessories and mauve orchids en corsage.

A lace cloth covered the supper table which was tastefully decorated with a three-tiered weddingcake and tall blue and pale pink

Rev. Fr. Meulenbergh proposed the toast to the bride, to which the groom responded. Mr. Ron Keeley of Penticton, brother-in-law of the groom, toasted the bride's attendants, and to this the groom responded.

For the honeymoon trip to the States by car the bride changed to a black and white dressmaker suit with black accessories. The couple will make their home in Summerjand.

Out-of-town guests included Mr. and Mrs. Ron Keeley and their son Kenneth of Penticton, and Mrs. Conley and her daughter Carol of Vernon, B.C.

VISITING ABROAD

Mrs. James Ritchie is a visitor in Vancouver for a few weeks.

Mr. and Mrs. Dave McInnis and Mrs. D. L. Sanborn motored to Vancouver on Sunday expecting to return about the middle of the week.

Miss Elsie Saunders is leaving this weekend for Vancouver en route to California where she will visit her sister, Miss Vi Saunders, returning to British Columbia in the spring before going to live in England.

Miss May Bateman who has been convalescing from an accident at the home of Mrs. Dale and Miss Ruth Dale and with other friends in the valley, has returned to Vancouver, and is progressing satisfactorily, expecting to return to work soon.

Mr. and Mrs. W. R. Powell left on Monday to motor to California. On the way there they will stop over in Shelton, Wash., to visit at the home of Mrs. Powell's sister, Mrs. H. E. Loop for a short time. In the southern state they will join their son and daughter-in-law, Mr. and Mrs. Walter B. Powell who left last week for California.

Mr. and Mrs. Christopher Smythe and their daughter Felicity are leaving on Sunday morning to motor to Ottawa by way of the United States. The family is planning to make its home in the capital city after residing in Summerland for several years.

VISITING HERE-

Miss Peggy Pringle who is teach ing in Vernon , this year was a weekend guest at the home of Mrs. Dale and Miss Ruth Dale.

Mr. and Mrs. A. S. Towgood of Oyama are visitors at the home of their son and daughter-in-law, Mr. and Mrs. J. Y. Towgood.

Mr. O. B. Knipfel of Edmonton, Alta., is visiting for several weeks at the home of his son and daughter-in-law, Rev. and Mrs. D. O. Knipfel.

Mr. Kenneth Corns of Vancouver visited last weekend at the home of his grandfather, Mr. A. H. Corns. Accompanying him was his brother-in-law, Mr. Bert Miller, also of Vancouver.

Renovated Japanese Hall Scene of Many Successful Parties

The Japanese citizens of Summerland held two entertainments during the Christmas and New Year season in the Japanese hall in Victoria Gardens.

The first, in December, had a twofold purpose. One reason was to celebrate completion of renovations to the hall. Through voluntary labor the building has been done over, and is one of which the community may be proud. •

The second reason was a Christmas service conducted by Rev. Mr. Yoshioka of Kelowna, followed by an impromptu concert. A public address system was installed, and singing, stories, jokes, etc., were given by those present.

Later Santa visited the hall to distribute gifts to the children.

On New Year's Day a similar concert was enthusiastically received, and further talent revealed. On both occasions everyone sat down to a delicious supper, and on New Year's Day the younger set enjoyed dancing in the evening, while the older group played cards or visited together.

Septenarians Are Guests of Honor

Mrs. Basil Steuart arranged an interesting and enjoyable luncheon party at her home on Jones Flat on Wednesday, Jan. 17.

All of her guests were over seventy years of age and all thoroughly enjoyed the delicious luncheon and jolly time together.

Those present were Mrs. G. J. Coulter White, Mrs. Dale, Mrs. J. C. Robson, Mrs. E. F. McClement, Mrs. Angove and Mrs. E. Graham. Mrs. W. W. Hemingway regretted that she was unable to be present.

PLAN FOR PAROCHIAL DINNER AT ST. STEPHEN'S

The January meeting of St. Steohen's Evening Branch WA heard 1950 annual reports indicating a busy and successful year had been completed.

Arrangements were made 'for convening the annual parochial dinner, which is to be on Wednesday, Jan. 31, at 6 p.m. A menu of turkey and pie was decided upon, and Mrs. Earle Wilson will be general convenor.

ity is the secretary-treasurer. Meetings are held each week in the homes of the different members. Sixteen were present at the last meeting.

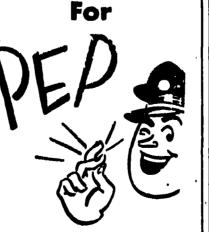

During 1950, \$31.40 was collected. and reports showed an active year in mission work reaching to many parts of the world.

Two food parcels were sent to a minister in the Russian zone of Germany; two parcels of good used clothing went to an orphanage in India; bandages were forwarded to Miss Irene Engst, one of the missionaries of the church who is working in Africa; clothing and Sunday school papers were sent to a missionary in Alaska; papers, toys, and mottoes were made for a missionary in Trinidad, and papers sent to Jamaica.

Nearer home, two parcels of used clothing were collected for a Vancouver mission.

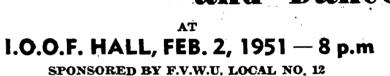

Six quilts were made during the past year. These were sent to the European orphanage in Edmonton along with clothing and shoes. From Edmonton the things are forwarded to orphanages in Ircland and Germany.

Scarlet Fever Symptoms and

Preventive Measures

"A number of scarlet fever cases have been reported throughout the South Okanagan health unit Last Year Was Heavy during the past few months," reports Dr. H. Zeman, medical direc-'tor.

Although the severity of the cases reported to date has not been too great, they are becoming more so. Scarlet fever is extremely communicable and individuals having it should be under a physician's care and should be isolated as soon as possible. Isolation helps to prevent the spread of the disease and may even keep the epidemic down to a mild form, she states.

"Every case should be seen by the family physician, because with the use of the newer drugs, the disease can be controlled much faster and the period of isolation may the BCFGA. be considerably reduced.

"The severe complications which follow scarlet fever rarely occur when it is properly treated by your by the 1950 convention and reviewfamily physician. Therefore we urge parents to consult their physicians at once if a communicable disease is suspected.

"This is imperative not only because the length of the illness is reduced, and complications which may permanently damage the heart, kidneys, ears, etc., are avoided, but by reporting at once may assist us in controlling its spread.

"All communicable diseases are reportable to the medical health officer in order that isolation precautions may be taken to prevent spread. Reporting to the local health unit, phone 2456 from 9 to 9:30 a.m., is the responsibility of anyone knowing of the existence of a communicable disease.

"Some of the early symptoms of scarlet fever to be watched for are sore throat nausea and vomiting, loss of appetite and rising temperature. Later a fine pin-point rash will appear. The disease is most communicable in this stage. There is no truth in the old idea that the scaling which occurs when the patient is improving is communicable. Spread from the patient occurs by coughing, sneezing and talking which dislodges the germs from a diseased and infected throat.

"Your co-operation in helping us to keep the incidence of this disease down to a minimum will be greatly appreciated."

One for Secretary

The heaviest year in respect of activities and work handled yet by the head office in his tenure of the position of secretary, was reported for 1950 by Secretary C. A. Hayden to the 62nd annual BEFGA convention Tuesday morning, Jan. 16. Membership increased to 3,963 from 3,789 in the year while the executive held 16 meetings.

Mr. Hayden spoke highly of the co-operation extended by Hon. E. C. Carson and members of his public works department when representations were made to them by

In this voluminous report, Mr. Hayden referred to the executive action on numerous requests made ed the work of the executive in the winter damage emergency.

He referred to the suggestion hat furniture be made from winter-killed fruit trees, and stated that G. Y. L. Crossley, regional development division, had investigated. The final conclusion was that any grower who wished to make nis own furniture could do so but the manufacturers were not interested.

Research is **Main Interest Of Producers**

It will cost \$40,000 to operate the B.C. Fruit Growers' Assn. in 1951, it was estimated at Vernon last week when the budget was presented. Of this amount, research expenditures will be \$8,215, apart from \$1,784 which is a balance of the Summerland experimental station grant left over from the past two years.

Not only did growers decide that \$5,000 should be expended again at the experimental station but set aside another \$5,000 for research into an alternative container rather than using apple boxes.

Summerland growers withdrew their resolution calling for \$5,000 to be set aside for the experimental station this year in favor of one from South and East Kelowna which considered that approximately \$2,500 would be sufficient because of the carryover from other years, the actual amount to be raised this year is \$3,500.

Also withdrawn was the Kere- the federal departments of agricul- perimental basis.

meos-Cawston resolution on the ESSAY COMPETITION OPEN cheaper container in favor of a TO HIGH SCHOOL STUDENTS

more comprehensive one proposed by Osoyoos seeking \$5,000 for such a purpose. Doug Fraser pointed out that the cost of the container in some cases equals the cost of the fruit it contains and present stocks of lumber suitable for shook will be exhausted in a few years.

Leave to Executive

The Osoyoos resolution specified the \$5,000 should go to the National Research Council but when Mr. G. A. Barrat pointed out that the B.C. Research Council would be willing to undertake such a research, the Osoyoos man agreed to a proposal by Walter Toevs that the disposal of the money be left to the BCFGA executive.

Dr. R. C. Palmer spoke briefly on the experimental station research grant pointing out that the federal government is now carrying pals are cc-operating, and it is on most of the investigations which the BCFGA started.

If growers want a continuation of the research on sprinkler irrigation and nursery stock then a dents can learn about the nature further grant would have to be of cancer and the need for early passed this convention, Dr. Palmer noted.

Another resolution under the heading of Research was introduced by the BCFGA executive and re- ture and transport to commence quested that provincial agriculture department, in conjunction with tree fruit area this year on an ex-

hail control measures in the B.C.

After six years of extensive ex- this practice in his own orchard." periments in the northwest, it has become possible to predict with some degree of accuracy the resthe use of chemical thinning sprays under a particular set of conditions, Dr. L. P. Batjer, principal than other forms. physiologist of the U.S. agriculture department, Wenatchee, in addressing the BCFGA 62nd convention in Vernon last week.

Dr. Batjer is well known to B.C. grower audiences, having visited here on many occasions but his report on chemical thinning this year was of prime importance.

More Certain Now

GREATER DRIVER COMFORT

• New No-Draft Ventipanes . . . A Cab that's "Driver Conditioned", cool in summer, warm

"It should not be assumed that chemical thinning is sufficiently standardized to the extent that results can be predicted with certainty," he declared. "However, by utilizing the present knowledge available, orchardists can determine more accurately than ever before the advisability of employing

Dinitro chemicals and napthaleneacetic acid have proved generally the most satisfactory chemiponse which may be expected from cals used, Dr. Batjer stated. Of the dinitro products, Elgetol and Krenite are used more extensively

PAGE SEVEN

With apples, dinitro sprays should be applied as near the full bloom stage as possible, although successful applications 1 to 3 days after sfull bloom have been effective.

For peaches and other stone fruits, these sprays should be applied a day or two ahead of full bloom, or when 75 to 90 percent of the blossoms are open.

Exact timing is more important with stone fruits than with apples.

Effective concentration of Elgetol is related to weather conditions, tree vigor, variety and other factors. Concentration is generally 1 pint to 1 quart per 100 gallons.

Napthaleneacetic acid (the same hormone chemical used to prevent fruit drop) is an effective thinning agent for certain varieties of apples under certain conditions. the report continued.

Hormone Sprays for Jonathans

Hormone thinning sprays were not recommended by Dr. Batjer for Winesaps and Delicious but have proved effective with Jonathan under many conditions. They may be applied anywhere from the petal fall stage until two or three weeks after the calyx period. The danger from foliage injury is largely avoided by delaying application until 2 to 3 weeks after calyx.

The later the spray is applied the stronger should be the concentration, ranging from 10 ppm to 20 ppm.

Dinitro sprays reduce fruit set by preventing pollen germination, the spray tending to prevent freshly opened blossom from setting fruit, and spares the older blossoms that have been pollinated and fertilized.

Dr. Batjer also explained that tree shock or temporary alteration of growth processes causes reduction in the fruit set and that this indirect method of thinning is more prevalent during cool, humid blooms periods or when trees are lacking in vigor due to imperfect soil drainage, winter injury, inadequate nutrition and other types of trouble which interfere with normal tree functioning.

"Weather conditions existing during the bloom period is nerhans the most impori single factor in determining the success of thinning sprays,' Dr. Batjer stated. "They determine the adequacy of pollinizers and number of hees needed to insure a heavy fruit set.

"Winesap and Delicious with normal weather should set heavily at least 3 to 6 tree spaces away from pollinating variety provided there are sufficient bees or other pollinating insects.

"Under cool, rainy conditions pollination may become a limiting factor when these varieties are located more than one tree space distant from a pollinizer. It is suggested, therefore for greatest safety in year of adverse weather that Winesap and Delicious be sprayed only if adjacent to pollenizers or at the most two tree spaces distant.

"Overthinning is less likely to occur when thinning sprays are applied to trees in a normal to above average state of vigor. Trees are more susceptible to the action of these sprays when suffering from imperfectly drained soll, various growth due to a deficiency of sunlight, or any condition that may affect normal functioning of growth and fruit setting processes. Fruit set on trees suffering from any of the above conditions is froquently lower than on normal trees.

"Overthinning is probably a result of a much greater indirect or 'shock' effect of the toxicant than usually occurs on normally vigorous trees. If heavy fruit set can be depended upon it is likely that lower than conventional concentrations might prove safe and effective.

"There are a great number of possible combinations of weather, vigor and polienation. The inner relationship of these factors have an extremely important hearing on the results of chemical thinning aprays," Dr. Batjer stated and concluded with examples of the various combinations.

Maybe folks should look at security this way"

It seems to me that keeping yourself when you get up in years is something like keeping up a car.

You can't run a car on just gas. It's got to have plenty of oil and grease too. And I figure the same idea works with me and the money I'll need someday.

Suppose I get paid some kind of old-age benefit, the same as everybody else. I'll be mighty glad to get that money. But I'm going to want *more* money coming in. And that's just what I'm saving for *now* with my *life* insurance

Even then I won't be living the life of Reilly. But at least I'll have most of the comforts I want. And right now it's mighty good to know that if anything happens to me, my life insurance will take care of my family.

Anyhow, don't you think a man should help provide for his own security? I do. And millions of other Canadians are doing it now—with their own life insurance.

The LIFE INSURANCE COMPANIES in Canada and their Representatives

WORKING FOR NATIONAL PROGRESS . . . BUILDING PERSONAL SECURITY

Prepackaging of Apples Given Extensive Tests By Sales Agency in '50

Prepackaging of apples at destination formed experimental work by the sales agency in three different sections of the country during the past marketing season, J. B. Lander informed BCFGA convention delegates at Vernon last week in his most comprehensive report of the fruit marketing setup. First portion of Mr. Lander's report was given last week.

tricts.'

of the department of agriculture

off-shore subsidy. Two of the

most outstanding unfavorable fac-

tors in the U.S. deal are the pre-

ponderance of small sizes, especial-

ly in Winesaps, and the preva-

lence of watercore in some dis-

Mr. Lander then referred to the

"At that time we exported 50 per-

cent of our production. Now,

with our production increased ov-

er 50 percent, only half the mar-

kets are available to us. The fact

of the matter is that our markets

during the past two years have

quisites.

of circumstances, to reach out for

"We have outlined some of the

foreseeable difficulties, but we are

fully aware that you cannot quick-

Some 28,000 packages of apples were involved in the three prepackaging experiments at Winnipeg, Vancouver and Montreal-Quebec City. The next step indicated was a test having the packaging done at shipping point, Mr. Lander pointed out.

Fifty thousand boxes were prepackaged in Kelowna, packed into master containers and shipped to all western Canada centres. Final conclusions have not been drawn from these tests, but no reports of bad arrivals were received.

"Providing the numerous operation, cost, distribution and introductory problems can be satisfactorily met, we believe that prepackaging promises the following:

1. Elimination of a tremendous amount of the bruising now present in retail stores.

2. A definite means towards faster repeat sales, through the delivery to the consumer of a unitized package of apples in better condition.

3. A definite extension in the shelf-life of apples, which would reduce retail losses, and hence provide a greater incentive toward putting more effort on apple sales. 4. Through the attractiveness of the package and the fruit, an increase in impulse sales.

"All these points of course, lead increased consumption, and thus increased sales.

Problem Still Prevalent

L-1050D

"The problems still to be worked out, and on which we are working, are not easy, and, in some cases, they might even prove rather cost ly.

"The retail price of prepackaged apples, if we are to receive maximum sales, must be very little, if any, above bulk per pound prices.

"Further tests must be of considerably greater length than those. so far conducted, probably from 4 to 6 months and run simultaneously in several markets.

"Any further experiments, and the actual introduction of prepackaged apples on a commercial basis, must be supported by adequate introductory, educational and promotional advertising.

"It would seem' quite evident that we will have to be prepared to Iy adjust your acreages to conwork right through to the consum- form to changing conditions and er, on further tests, and the ac- uncertain markets. Actually you tual introduction of prepackaging

gentlemen are required to think in terms of decades when you are Final Report on **Retail Contact**

"At last year's convention there was a resolution passed respecting retail contact men, and we have acquired the services of one man, who covered the northern Saskatchewan territory in December. We are particularly pleased with the results of his work in that area. To furnish you with a detailed report, would take up considerable time, but we would like to mention the following outstanding features of this survey:

1. While displays were only mediocre, especially in the rural areas; with a few exceptions, the fruit was found to be in good condition.

2. Very few stores had refrigerated storage, but most had cool basements.

3. Percentage of total sales by the box was 64 percent in the country stores, and 60 percent in ful thanks. Each year the auxilthe city stores.

4. Most stores found that the half-box was popular with their customers.

5. Not one store reported any difficulty in obtaining supplies. 6. Practically all retailers read

our retail bulletins and find them interesting and very useful. 7. The most popular varieties

were McIntosh and Delicious.

Oxygen Tent Drive Given

The committee appointed for the purpose of raising funds for an oxygen tent for the local hospital, Mrs. F. E. Atkinson, Mrs. A. Dunsdon and Mrs. T. B. Lott have submitted a final report on this project, with the following message to those who have participated in its installation by supporting it financially with donations:

"It is a comforting thought to know that we now have an oxygen tent in our hospital, ready for the use of this community at any time. To all those who helped to put it there, by small donations or large, let us extend to you on behalf of the hospital auxiliary, our grateiary tries to have a major venture and in 1950 we fully realized the need of an oxygen tent and made plans accordingly. Naturally we had to go to our good citizens for help and now we ask that you share in the pleasure and joy of knowing that your help will help others to live."

Donations from organizations amounted to \$426.48 while individuals contributed \$104.88, and the tag day realized \$309.26, for a total of \$840.62.

Cost of the Oxygen tent to the Hospital Auxiliary was \$553,50 leaving a balance of \$287.12.

Total cost of oxygen tent was \$830.26 of which the government paid one third. The balance of this fund will be spent for permanent equipment such as overbed tables, redecorating, painting, etc.

ence to Jonathan picking which was put ahead to meet export commitments, with the result little breakdown has been reported, the UK reporting their arrival in satisfactory condition.

Mr. Lander referred to the U.S. off shore subsidy of \$1.25 5per box which had greatly curtailed shipments of Canadian apples to foreign countries. One optimistic note has been the expanded trade; with Venezuela, Trinidad, Barbados, British Guiana and Jamaica.

"These two contracts were of immeasurable assistance in marketing this year's crop," Mr. Lander declared in reference to the 1,-100,000 boxes and 234,000 boxes contracts with the United Kingdom.

Movement to that date to the U.S. had been 1525 cars, compared with 1200 a year ago. Further prospects for desirable sizes are good but not for 150's and smaller.

Although transportation service had been generally of a satisfactory standard the railway strike last year had a paralyzing effect on, the industry and caused severe losses to fruit and vegetable grow-

TO SAY NO TO HIM

Let's suppose you are an ordinary, average citizen — a plumber, a storekeeper, a farmer or what-have-you.

> Let's suppose, also, you have a 12-year-old son you think is paetty bright. You feel that, with education and application, he could go a long way --- could rise right to the top in business, in industry, or in one of the professions.

Well, did you ever stop to think that, here in Canada, our way of life --- our economic and political system, if you want to call it that --- is wholly geared to giving your boy exactly that chance? It Isl And there are examples all around you.

> Yaur boy may have to work hard and fight hard to get the education he requires. That won't hurt him --- in fact it will help him. Nearly every successful man or woman has worked hard and fought hard to become successful.

But under our free opportunity system there is no one to say "NO" to him - no one to say "Here is your spot in life, and here you will stay for life." The field is wide open. There is opportunity for every young man who hos brains and ability and the desire to make a contribution to the country's development and the general welfare.

> It is a pretty good system under which to bring up your children.

BRITISH COLUMBIA FEDERATION OF TRADE AND INDUSTRY

on a commercial basis, if satisfactory results are to be obtained.

"A good number of retailers are doing some prepackaging now, but mostly in transparent bags, which do not afford tender varieties; such as McIntosh, adequate protection. This individual method of prepackaging is expensive, and of necessity must raise the price of such apples to the consumer.

There is some indication that the junior box might forestall, to some extent, the necessity for prepackaged apples in rural arcas, and curtail the need for prepackaged apples to urban markets only.

"Unfortunately, the cost of paper has risen in the last six months. making it very difficult, if not impossible, to package apples within the definite cost limits which our work, to date, indicates must be met.

"Pre packing is being done on a limited commercial scale in some areas of the United States, but no very satisfictory system has as yet been developed.

U.S. Apple Holdings

"The U.S. has had two large crops in a row. You will recall that the 1948 crop was away below average-just a mere 88 million.

"Total U.S. holdings at January 1 were 45,261,272 bushels, of which 23,108,392 are western boxes. Last year the United States holdings were 35,234,042-Western boxes 17,744,486. In western boxes alone there is an increase of nearly six million over the 1949 holdings at the same period, and in the total United States crop the increase is 10 million.

"Prices are dictated by those prevailing in the northwest Unitud States. We know that the State of Washington is over 5,000 carloads behind schedule, and in order to make up for lost time they will have to accelerate their movement greatly. To assist in this they have embarked on a gigantic advortising program at a cost of \$500.000.

"In addition, the U.S. department of agriculture has instituted a school lunch program, which will utilize 1500 cars of the smaller size es from the Wenatchee and Yakima areas. The price is \$1.65 per box, the variaties, Winesaps, Romes, Delicious and Yellow Newtowns.

"Whatever happens in the United States market is of vital interest to us. Here are some of the favorable factors in the United States picture: Employment is at an all-time high; wages are boing raised throughout the country; buyors' psychology is good; and there is a possibility of some exports under the ECA, and the assistance

Grouse are at Peak of High Cycle Sportsmen_are Told

Southern zone council of sports- | son dates as last year. men's clubs is recommending to Pheasants Remain Unchanged this year's Interior Fish and Game Assn. annual meeting that the ter left as last year with a daily daily bag limit on blue grouse be limit of two, a season limit of ten raised to eight along with four of and starting date for the two any other species. A season limit | weeks' season to coincide with the of 25 instead of 24 is also being sought.

W. Snow, president of the Summerland Fish and Game Assn., who led the Summerland delegation to the southern zone council session on Sunday in Penticton, states that the grouse are now said to be at the peak of their high cycle and scientists explain that they will decline even if shooting is restricted.

Game Commissioner J. G. Cunningham and Big Game Scientist Dr. James Hatter were present at Sunday's session and guided the sportsmen in reaching their decisions.

Kelowna, Summerland, Penticton and Oliver-Osoyoos fish and game clubs were represented at the Sunday meeting. Besides President Snow, Summerland delegates were Channon Snow and Joe Mc-Lachlan.

Last Friday, Summerland club had two dozen members at a meeting to discuss their recommendations.

The Summerland club recommended a daily limit of eight on grouse but the southern council went for twelve and the same sea-

coast pheasant opening. Sunday's session agreed with Summerland's contention. Another attempt was made by local sportsmen to have the deer season cut by two weeks to end on November 15. Some local club members felt that two bucks should be allowed with the shorter season but the majority favored continuing with one buck. However, the southern zone could

Pheasants were considered bet-

not agree and voted in favor of a recommendation that the season be the same as last year, ending on November 30.

Game Commissioner Cunningham gave a concession, however, that if snow conditions towards the end of the season warranted such action, a shorter season could be declared by order-in-council.

Summerland's move to have the fool hen season closed was not agreed upon.

Southern sportsmen agreed that the daily bag limit on quail should be increased' from four to 12 but the season limit should remain the same at 24. Thus, a hunter could get his limit of quail in two days. Summerland club, at its meeting on Friday, asked that grey trout be introduced into Okanagan lake. This trout could be excellent sport for trollers, it was stated, and they do not require streams for spawn-

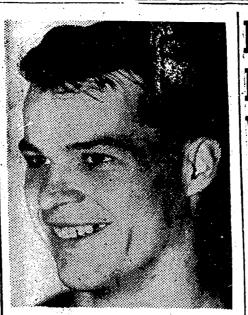

ing. This recommendation, along with another that Kamloops trout be introduced into Fish Lake will be passed on to the game commission.

South Okanagan CCF **Elects Officers**

At the annual meeting of the South Okanagan CCF district exccutive held recently in Summerland, Mrs. Ruth Purdy of Kelowna was elected chairman for the coming year with Mr. J. Bibby of Naramata as vice-chairman and Mr. A. S. Hughes-Games of Kelowna as secretary-treasurer.

Mr. T. D. Dyson of East Kelowna is chairman of the agriculture committee and an organization committee was elected consisting of Jack Snowsell and Harry Schmidt of Kelowna, and Bruce Woodsworth of Westbank. John Bibby will act as provincial council member.

Following the election of officers, a lively discussion followed on in-

GORDIE HOWE, plctured above, of the Detroit Red Wings, and Maurice Richard, of the Montreal Canadiens, rated the greatest wingers in hockey today, are stag-ing a battle for the NHL scoring leadership.

Three Wins for **Bluebirds** Over **Osoyoos Cagers**

Three Osoyoos cage teams were defeated at the local gym last Friday evening by the Bluebirds of Summerland high. Senior boys game was a decided victory 49-26 while the Bluebird girls walked away with a 42-7 decision. Osoyoos junior boys were no match for the Bluebirds and lost 25-9.

A big third quarter was the deciding point in the senior boys' match, while Graham Munn went wild with an even 20 markers, closely foillowed by Ken' Brawner with another fifteen. Anderson and Spencer were top scorers for the visitors.

Irene Menu and Helen Kean were top scorers for the victorious Bluebird girls, while Ruth Klix helped herself to an even eight points, against the luckless Osoyoos lassies.

Raham went into two figures to ead the junior boys. His 11 points were nearly half the Bluebird total. Lewis and Towgood were the other main point-getters.

Individual scores follow:

Osoyoos Jrs.: Yusep, Prentice 4. Englesby 1, F. Englesby, Long, Hunt, Smith 2, Bauer 2, Slingsby, E. Yusep—9. Bluebird Jrs. Raham 11, Coggan,

Arndt 1, Carston 2, Blacklock, Lewis 5, Towgood 6-25. Osoyoos Girls: Lemke 1, Hebig,

Night Skiing **Brings Many Visitors Here**

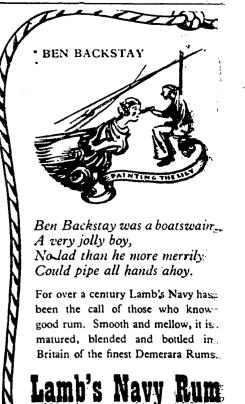

Skiers from Kelowna and Penticton, numbering about 26, joined members of the Summerland ski club at its opening of night skiing on Wednesday, Jan. 17, at the Meadow Valley ski hill.

Again on Sunday there was a large turnout of both local and outside skiers as well as several cars of spectators.

It was decided on Sunday that night skiing would be continued on each Wednesday night as long as conditions are favorable.

On Feb. 3 and 4, Summerland ski club will be represented at the Western Canada downhill and slalom championships at Rossland by Francis Gould and Daryl Weitzel. This is one of the premier events in B.C.'s skiing schedule and the two young Summerland lads will be up against some hot opposition.

Last weekend, instruction was given all classes from beginners to experienced skiers. Bob Barkwill, Ronnie Ritchie and Daryl Weitzel were instructors while Harry Hansen conducted classes in jumping.

MORE ABOUT **Parks Board** to Choose Chairman

Municipal council is allowing the newly-appointed board of parks commissioners until February 28 to submit estimates for the current year. According to the municipal act these estimates should be submitted by Jan. 31, but as the election of one parks board member was delayed, the postponement is being allowed.

Reeve C. E. Bentley also declared that meeting of the council and the parks board would be arranged shortly.

The parks board is holding a special session at the first of the week to elect its chairman and organize for the coming year.

Elderly Man on Visit Here Dies **In Local Hospital**

In his 80th year, Henry Thomas Cluett, father of Mrs. Ed Hannah and Mrs. C. B. Hankins of Summerland, passed away in Summerland General hospital on Monday, January 22, after a short illness.

The late Mr. Cluett arrived here from his home in Foxwarren, Man., on January 10 and four days later he was taken ill. This was the first occasion he had left the community in which he settled in Manitoba on his arrival from England 54 years ago.

After Christmas he stopped off at Davidson, Sask., to visit cousins before continuing on to West Summerland. Two other daughters, Misses Margery and Nelliedean Cluett, came from Vancouver to see their elderly father and were saddened to find him ill.

Besides his wife, Jessie, at Foxwarren, Man., he leaves six daughters, Mrs. E. Hannah and Mrs. C. B. Hankins in West Summerland, Margery and Nelliedean in Vancouver, Mrs. Murray Hilcox, and Miss Ann Cluett, Foxwarren; three sons, Keith in Calgary and Henry and George, Foxwarren; also five grandchildren.

Remains were forwarded by Summerland Funeral Home to Foxwarren where funeral services will be held from the Foxwarren Anglican church.

ment of British Columbia.

Continued From Page 2

5. That packing houses concentrate on packing of Jonathans and Delicious for 15 days following the expiration of the 16 day packing period mentioned for McIntosh, and further, that Jonathans be given priority handling during those 19 days,

6. That all packing houses schedule their packing with a view to packing within 57 days the following varieties: McIntosh, Jonathans. Delicious, Golden Delicious, Grimes Golden, Bananas, Snows and other Early Sundries.

7. It was agreed that Grimes, Bananas, Golden Delicious, Snows and other Early Sundries should be packed as requested by B.C. Tree Fruits Ltd.

8. Reference to "days" means "packing days".

9. That Golden Delicious should be allowed to stand in common storage for 10 days to 2 weeks after picking before being packed and cold-stored.

10. That packing house fieldmen pay particular attention to see that Jonathans are not left on the trees past the proper harvesting date, and that it is advisable that this variety be left in the orchard for three or four days after picking before being hauled to the packing house. Jonathan color charts are available from the experimental station, Summerland, in any quantity desired, for the guidance of fieldmen and growers, with respect to the proper harvesting date.

11. That packing house fieldmen should see that growers keep entirely separate the fruit from injured trees, which fruit invariably shows a "sickly" or unnatural color. Naturally this fruit should not be packed with fruit from healthy trees.

McIntosh picking dates, as recommended by Ben Hoy, former Okanagan supervising horticulturist, are September 18 for the district Penticton to Winfield and September 21 from Vernon to Salmon Arm. Lavington was placed at Sept. 26. "During the 1950 season this pro-

gram was fairly well observed and contributed to a good quality pack with very little fruit reaching an advanced stage of maturity before reaching cold storage," the report observes.

Dealing with soft fruit the committee believes more attention should be paid to eliminating some of the old pollenizing varieties of cherries and replacing with the new Van cherry.

It was also thought that the objective of 10 harvesting days for Rochesters in any one orchard was possibly too restricted, and should be extended to at least two weeks. The minimum size for plums should be raised in 1951 from 13/8 inch as at present, and better maturity demanded.

Wishing Him Well

Europe. General Eisenhower arrived in Paris recently to begin a fact-finding tour of the Atlantic Pact countries.

MORE ABOUT GROWERS

Continued from Page 1

At this juncture the amendment was carried by a substantial ma-. jority.

Discussion on Contract

Another resolution which brought out much discussion came Wednesday afternoon and was under the general heading of Contract. Winfield and Okanagan Centre proposed a clause in the contract that the sales agency should have consent of the growers and the BCFGA directors before selling any fruit below cost of production, but withdrew this move in favor of two other resolutions covering the three-party contract, which is to be reviewed and resubmitted this vear.

However, the other two resolutions were defeated by delegates but only after some strenuous argument.

The Okanagan Mission and Kelowna resolution, proposed by M. L. Kuipers but amended in two places, finally declared that the Okanagan Federated Shippers Assn. should have an opportunity to review the contract, and that all clauses should be mutually agreed upon by the sales agency and shippers; and further, that when the committee has completed its draft it will be presented to the shippers dations, and if these are beneficial | son after the snow disappears.

Cars Badly Wrecked In Skid into Ditch **On Slippery Highway**

Two cars were bady wrecked at 5:15 o'clock last night on Okanagan Highway No. 5, 100 yards south of the Trout Creek Service Station due to the heavy snowfall and slippery road condition.

Rev. H. R. Whitmore was driving south and James Brown north at that time when the Brown car went into a skid and started over into the path of the oncoming Whitmore car. When he saw an accident was pending, Brown tried to swing farther left and reach the ditch in time to avoid the approaching vehicle.

However Mr. Whitmore turned right and the two cars met in the ditch on the west side of the highway. Front ends of both cars were badly damaged but occupants escaped with only minor bruises. Angus Whitmore, riding with his

father, received bumps on his knee and chin but otherwise was unin-'jured.

MORE ABOUT-PIONEER DAYS

Continued Fiom Page 2 erous kills of deer. Another large cougar has been reported from Garnet Valley, near Summerland and it is the intention of Mr. Shuttleworth to take up his trail Thursday. This cougar is said to be killing deer right along.

The figure of a soldier, standing guard over Summerland, carved in is the suggestion offered by a correspondent as a suitable and very effective war memorial for Summerland. It would make an impressive natural monument, and would last indefinitely, recalling the sacrifices of the Great War to future generations, says the correspondent.

Radio owners will attempt to stamp out interference, and will make tests to that end following the meeting held in Penticton Thursday night to deal with the question and attended by Summerland's municipal electrician, Percy Thornber.

The icy condition of the Gulch and Peach Orchard hills is being accented by the practice of Summerland boys and girls utilizing them for sleighing. Both hills are now in a very dangerous state for motorists. If the children would be content with one hill probably nothing would be said. When sleighing is done on both hills something should be done about it. No sleighs should be allowed on the Gulch Road.

A new power boat will be in operation by June of this year, plying between Kelowna and the lower end of the lake. The boat will be operated under contract with the CNR for carrying freight and passengers and will make connections with the CNR train service at Kelowna. Capt. Roe will be the ship's master and Mr. Guy Brock, the engineer.

NO NEW LAW FOR RIFLES IN AREA

Reeve C. E. Bentley suggested to council that Summerland council might follow the lead of some other municipalities and bar the use of .22 rifles and air guns in most areas of the municipality.

However, when it was pointed out that it is already against the law for children to use these weapons without being accompanied by their parents and no attempt is the native granite of College Hill, made to enforce the regulation, the subject was dropped.

The contentious bulge packs was reported on, as follows:

The rough handling and abuse of the electric lidding presses on these packs was the cause of considerable concern, and action in the future was advocated. One viewpoint expressed was that much of the damage was caused, not by excessive weight, necessarily, but by poor sizing and often weight in excess of that asked for by sales office requirements. Considerable work has been done on this and statistics assembled, and the investigation will be continued during 1951.

Creston was successful in having a resolution passed at the conven-tion asking that "the present scale of weights be reconsidered and adjusted downwards to the end that the crop will be properly packing and acceptable."

to the fruit industry as a whole they should be considered.

"The shippers have as much interest in this contract as the growers." stated Mr. Kuipers but shouts of "No, No," were heard throughout the hall.

President Newman suggested that much of this resolution had already been done and that the contract committee would be meeting the following day, with representative shippers present.

H. C. McGuffie, Keremeos, declared this resolution would be taking authority out of the hands of growers and placing it with the shippers, "and we've had enough of that".

H. C. McAlpine was even more emphatic that it would not be wise to weaken any part of the contract committee's work which might tend towards loss of control on the part of the growers.

This brought an angry reply from Max dePfyffer, well-known Kelowna packinghouse manager who demanded: "Who are the ship-pers nowadays?" He answered this query by pointing out that most shippers are members of a co-operative and are themselves growers.

"When you have a three-party contract, you should have the co-operation of the three parties. If you want to break up this whole deal then just ignore the co-operative shippers," he concluded. Asks for Modification

Eric Tait, Summerland, believed that Mr. MoAlpine's viewpoint should be modified. As far as old history of the valley is concorned, Mr. Tait agreed but he felt that "we are all in this deal tonow gether".

"Granted there are independent, shippers but they realize this is their lifeblood as well as the lifeblood of the growers," Mr. Tait continued, He wanted the resolution withdrawn because of its poor wording.

"Don't let us start a scrap between the shippers' federation and the growers which will do nothing but harm for the industry," he pleaded.

At this juncture, Albert Millar of Oliver, chairman of the contract committee told the convention of his committee setup which includes, V. E. Ellison, Tom Wilkinson, A. G. DesBriany, W. R. Powell, J. G. Campbell, John Hall, with A, K. Loyd as consultant.

He assured the convention that the shippers' federation president is invited to meetings. He pointed out that the contract has not been contested in nine years.

Honry Mohr, Summerland, suggested that passing of this resolution would be a vote of non con-

Councillor F. M. Steuart and Road Foreman Les Gould have investigated an alternate route which would cut into a portion of the McClure pear orchard but no estimates of cost have been tabulated.

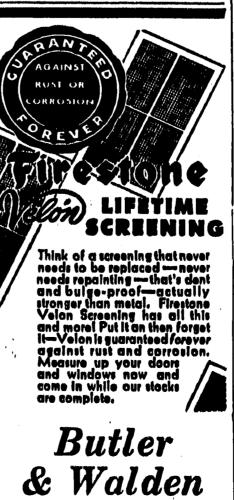

It was thought by Councillor F. E. Atkinson that if the grade proved feasible the work could be spread over several years.

Councillor Steuart reported that T. B. Young would be agreeable to paying for two traffic warning signs for the Parkdale area. These signs were chopped down on Hallowe'en, purportedly with use of an axe stolen from Mr. Young's own home.

fidence in the committee.

At this stage the amended resolution was defeated, and another move to have the entire new contract submitted to growers for discussion and revision at their packinghouse meetings also lost out.

Further report on resolution decision and discussion at the 62nd BCFGA convention will be given in next week's issue, as lack of space limits this news report this week.
