West Summerland, B.C., Thursday, September 6, 1951

Cafeteria is Crowded At School Lunch Hour

For the first time, the new auditorium-cafeteria at the junior-senior high school was used yesterday by elementary and high school pupils who do not go home for lunch. Two sittings were necessary and the elementary school completely filled every available space at the tables. High school occupied the tables for the second sitting. Elementary pupils did not include the primary grades who stayed at MacDonald school for their lunch.

"It's plain to be seen that the lunchroom is none too big", was the comment of Principal A. K. Macleod after seeing the large gathering utilizing the new facilities. Decision on instituting a cafeteria arrangement in the new school has not been finalized, although the school board has been discussing possibilities.

Elementary School Up
Although high school enrolment dropped between 15 and 20 from what was anticipated, the elementary school gained about 35 new scholars, it was revealed after the first day's sessions.

High school enrolment was 300 the first two days, which showed a drop over expectations but is in line with the trend in other valley centres, it is stated.

"I hope that any students who intend to return to school don't stay out too long", was Mr. Macleod's reaction, indicating that the term is short enough without students missing classes in the early part of the school period.

There is still no commercial teacher available and the school board is advertising for a person who has sufficient commercial qualifications that commercial subjects could be taught. If a qualified person is available, then the education department will be asked to provide a temporary certificate to allow the applicant to teach in the school system.

MacDonald elementary school enrolment is 47, a near record for the six grades which now constitute this institution.

Primary is exactly as estimated, at the 70 mark, but new residents to the number of about 35, have been enrolled in other grades, indicating that although there have been some families move away others have come to take their place.

Following are the enrolment figures for MacDonald school:

Div. 1, Grade 6, 40, S. A. MacDonald; Div. 2, Grade 6, 39, E. F. Weeks; Div. 3, Grade 5, 38, T. P. Moore; Div. 4, Grade 5, 39, Mrs. J. E. Tingley; Div. 5, Grade 4, 46, Mrs. M. K. MacRae; Div. 6, Grade 4, 40, Mrs. A. W. Johnston; Div. 7, Grade 3, 36, Miss A. R. Dale; Div. 8, Grade 3, 39, Miss R. E. Backmeyer; Div. 9, Grade 2, 33, Mrs. M. M. Kean; Div. 10, Grade 2, 37, Mrs. H. P. Schaeffer; Div. 11, Grade 1, 35, Mrs. H. M. Allison; Div. 12, Grade 1, 35, Miss F. M. Banks.

Ted Dunsdon High Scorer with Century

Some of the best scores of the year were registered at the Summerland Rifle club range last Sunday, with Ted Dunsdon topping the works with a brilliant 100 out of a possible 105.

Phil Dunsdon was close behind with 99, Herb Simpson had 95, Doug Price 94 and his daughter Helen 93, Ed Gould and Len Shannon also had 93's while Art Dunsdon and George Dunsdon each registered 92. Steve Dunsdon was the last one in the upper brackets with 91.

Other scores were A. Moyls 88, Pop Dunsdon 86, Barbara Price 81 and Jack Dunsdon 78.

CAR HITS SOFT SHOULDER GOES INTO WOODS LAKE

KELOWNA—Ernest George Rostich, formerly of Summerland and now of Kamloops received cuts and bruises when his car went out of control and drove into Woods Lake Saturday night about midnight. The car struck a soft shoulder and headed for the lake waters, it is stated.

Local Kennels Bring Home Many Firsts

Two Summerland kennels brought home a bundle of ribbons and three cups from the two-day Pacific National Exhibition dog shows at Vancouver last Saturday and Monday.

In their respective classes, they swept the boards both days, receiving some admiring comments from spectators and judges.

Mrs. Helen Munn, who operates the Ashnola Kennels, entered her American cockers in the dog shows, while Mrs. Lee Witherspoon of Char-Lee Kennels entered her prize Dachshund, Sogo von Lee of Leone.

Four first prizes in the novice and bred by exhibitor classes were awarded Mrs. Witherspoon's Dachshund in the two days she was paraded.

Mrs. Munn took winners female with her Ashnola Pepper, and Ashnola Trader went up to best of variety in the particular American cocker spaniels under Judge Major Korshin of Chicago.

Ashnola Trumpeter and Trader went best sporting brace and were much admired for their style and flashy black and white coats.

Mrs. Munn handled them again in the second show and repeated the winnings for more ribbons and another cup.

Building At Lowest Point During August

Building fell off to the lowest ebb since the cessation of hostilities during the month of August. Roy F. Angus' building inspector's report for last month reveals this week.

In August only three permits were issued for a total of \$770. One commercial and institutional permit was valued at \$450 and two alterations and additions for \$320.

Last year, in August, the new arena was commenced with a building permit for \$25,000. This swelled the month's total to \$41,070 for 11 permits.

To date this year, 57 permits have been issued for a total value of \$130,640, including the \$25,000 Occidental addition now completed.

Last year, the eight-month total was \$481,055, but when the high school and arena was knocked off the total was \$146,055.

Start McIntosh Picking Next Week

Bartlett picking is just about cleaned up, while local houses have started on Flemish pears this week, local managers indicate.

Packing of three V peaches is falling off rapidly and some Elbertas are now reaching the packing house.

Wealthies are also about over and McIntosh picking will probably commence early next week.

August Was Hot and Dry Although 1.32 Inches of Rain Fell in Nine Days

Generally speaking, August was a hot, dry month, although the monthly report issued from the climatological station at the experimental station here indicates that some rain fell on nine days of the 31 in August.

However, on five of those days it wasn't enough to worry about and not until the 27th did a real down-pour occur. In total, 1.32 inches of rain fell in the month, 1.15 inches occurring on Aug. 27, 28 and 29.

High temperature was recorded on August 2, when the thermometer reached 95, the average maximum being 81.8. On August 28, it was cold and damp, without any sunshine, and the maximum never got above 56 with a minimum of 45, the coldest evening of the month.

Average minimum for August was 54.7. There was plenty of sunshine despite three days in which the sun didn't shine at all. Total was 277.7 hours, or an average of 8.9 hours over the 31 days.

Following is the complete report for the month:

August	Max.	Min.	Rain	Sun
1	92	58		13.4
2	95	57		13.5
3	95	59		13.4
4	90	57		11.0

Solon Low to Come Here Soon

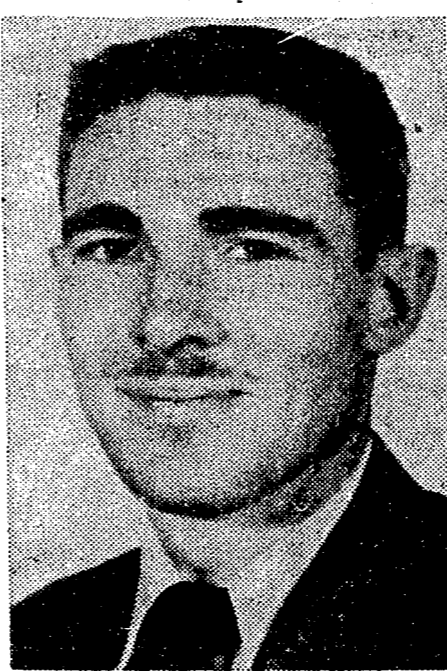

Mr. Solon Low, federal leader of the Social Credit party, will come to the Okanagan before the end of September to take part in a So-Cred campaign throughout the province, local party members indicated this morning.

Peer V. Paynter, of Vancouver, organizer of the Social Credit party is starting a tour of British Columbia with an opening meeting in Summerland on Tuesday, September 11.

He will continue to other valley points and Kamloops after addressing the Summerland gathering.

MCC DEFEATS OKANAGAN

VERNON—The Marylebone Cricket Club defeated the select Okanagan XI on the Lakeview Park grounds on Wednesday, Aug. 29, by one wicket and 136 runs. Scores were: MCC 194 for eight declared; Okanagan, 59 all out.

E. F. (Ted) Weeks

New president of Summerland Junior Chamber of Commerce who presided at the first meeting in September on Tuesday. He will be installed on October 2.

Jaycees Will Install New Officers October 2

Summerland Jaycees will install their new president, E. F. (Ted) Weeks on Tuesday, October 2, the first meeting of the fall session decided at the Nu-Way Annex on Tuesday night.

Their new president was chairman of Tuesday's meeting and announced the new committee setup for the 1951-52 season.

Jaycees also decided that meeting once a month was not enough and will confer every second Tuesday in the future. All such meetings will be dinner meetings, with a portion of each evening devoted to entertainment features following a business session.

A determined effort will be made to increase the membership in this young man's organization.

One of the main projects of the Jaycees recently was the installation of the welcome signs at the north and south entrances to the municipality. These signs, constructed to government specifications, indicate the meeting times of Rotary, Kiwanis, Board of Trade and Junior Chamber of Commerce groups.

Dave Wright, Mel Ducommun, Murray Elliott and Gerry Hallquist were members of the committee in charge of this project.

Take Over P.O. Beach
Decision was reached Tuesday evening to make Peach Orchard beach a Jaycee project. Some

work has been done on the beach by Jaycees in the past but in the coming year a determined effort to improve this lakefront spot will be made, the meeting decided.

Jaycees have been offered a diving stand to install there, Les Rumball informed the meeting.

Past committee chairmen gave the members a resume of activities during the last year with the view of acquainting all members with probable projects which will be undertaken.

Subject of crosswalks occupied the meeting and it was decided that the Jaycees' civic affairs committee would consult the board of trade traffic safety committee with a view to waging a campaign towards obtaining safety lanes in the business section.

Jaycees also decided to write the Okanagan Telephone Co. protesting poor long distance service from Summerland. Many instances of lengthy waits to obtain service were given by members.

New committee chairmen for this year are: Dinner meetings, Dave Wright; publicity, Jack Dunham; special events, Bob Bleasdale; membership, Frank Kuroda; personnel, Al McIntosh; group activities, C. B. (Tiny) Hankins; civic affairs, Don Clark; tourist, Dave Wright; national affairs, Gerry Hallquist; entertainment, Gerry Hallquist.

Thieves Crack Hastings Street Store Safe and Escape With \$450 Cash

A daring safecracking job perpetrated Monday evening, Labor Day, cost the hardware firm of Holmes & Wade Ltd. on Hastings street \$506.55 in cash and cheques.

RCMP are carrying out an intensive investigation of the robbery and are known to have been following several leads.

As far as can be ascertained, no attempt was made to lift any merchandise from the store. It is believed that a punch and a heavy hammer were used to knock off the dial on the safe which is located in Holmes & Wade Ltd. office. Then a punch was used to force the combination and release the catch.

Only two cheques, amounting to \$47, were in the cash drawer, the rest of the loot being in bills of many denominations. The firm had kept more cash than usual on hand in order to cash cheques for customers needing money for the long holiday weekend.

Entry to the building was through a side door. At first an attempt was made to jimmy the door but the lock refused to budge.

Then the pane of glass in the door was removed in order to reach the lock. In removing the pane it was broken in three pieces.

No explosives were needed to force open the small safe and remove the contents. Checked store at 8 p.m.

Councillor Norman Holmes returned from attending the baseball games in Kamloops last weekend and checked the store about 8 o'clock Monday evening. At that time everything was in order.

About 10.30 that evening, Dr. L. A. Day, when driving along Hastings street, saw what he thought to be a light moving in Holmes & Wade store but it did not excite his attention enough to cause him to investigate more thoroughly.

About the same time, Dave McInnis' dog nearby was creating a disturbance by barking in an unusual manner.

It is thought that the dog may have been upset by the marauders. A short time ago the Summerland Groceria was entered but only cigarettes were stolen on that occasion.

Co-op Makes Small Payment to Members

A small additional payment on the 1950 apple crop and an advance on apricots and coopers from the 1951 crop have been made to shipping members of the Summerland Co-operative Growers' Assn. this week. The amount is \$7,300.

Richard Lewis Has Returned From Jamboree

Richard Lewis, one of five King Scouts from this province who were privileged to attend the world's jamboree at Salzburg, Austria, returned, to his Trout Creek home last night.

The young son of Mr. and Mrs. George F. Lewis has been given an experience which most adults have never equalled and is the envy of all his fellow Scouts.

He was chosen for his proficiency in Scouting as one of two interior Boy Scouts to represent the province. The other was Michael Randolph, of Trail, a grandson of Mrs. H. A. Solly, of Summerland.

It was on July 27 that the Canadian Boy Scouts landed at Liverpool to start another stage on their great adventure. They saw Princess Elizabeth at Green Park, were shown through Windsor Castle and the crown jewels and later were tendered a civic reception by the Lord Mayor of London.

On July 30 the Scouts went to Westminster for church service, and that afternoon met Lady Baden-Powell at Hampton Court.

In letters home, Richard Lewis states that Lady Baden-Powell has a terrific sense of humor.

A swim and boating on the Thames completed the activities for that day and it was the following day that the Scouts left England for Austria.

Richard was very impressed with the bomb damage in war-torn Europe where he saw whole buildings in heaps on the ground.

The return trip to England was commenced on August 15, and the Scouts were given an opportunity to see some of the Festival of Britain before returning to Canada.

Emergency is Declared at Salmon Arm

SALMON ARM—A "State of Emergency" has been declared in Salmon Arm municipality and a by-law authorizing a special tax of 11 mills to provide funds required by the school board to keep the schools open from September 30 to December 31 is being prepared.

Assent of the property-owners must be obtained before the bylaw becomes effective.

The bylaw would raise \$80,500 which is needed to meet the municipality's portion of school expenditures for the three-month period. The provincial department of education and Salmon Arm city council have already agreed to pay their portions to keep schools in the unorganized section and the city open.

Municipal portion of school expenditures were sliced last spring following an arbitration board decision that the two municipalities could not afford to pay the full amount of the school board estimates. When the municipalities and school board came down to cases, however, it was discovered that the municipalities must raise the extra funds or the schools would have to close.

Because of the uncertain situation, Salmon Arm schools were short four teachers when the new term commenced this week.

Parent-Teachers Group Projected

An opportunity to participate in forming a Parent-Teachers' Association in connection with the junior-senior high school is soon to be given to parents and teachers here.

In many centres this organization is of great benefit to both parents and teachers in understanding one another's aims and objects, and is of general help to the school district at large.

It is hoped that such a group might fill a similar need here.

A meeting will probably be called around Sept. 20 when a member of the provincial executive will be present in an organizing capacity.

Like any other parents, King George and Queen Elizabeth love family gatherings. They are shown here in one of the first official photographs grouping them together on the grounds at Balmoral Castle, Scotland, where Princess Margaret celebrated her 21st birthday. Left to right are PRINCE CHARLES, QUEEN ELIZABETH, PRINCESS MARGARET, THE DUKE OF EDINBURGH, KING GEORGE and PRINCESS ELIZABETH. In her carriage, one-year-old PRINCESS ANNE seems quite disinterested while her brother Charles nonchalantly splashes his hand in the garden fountain. Princess Elizabeth and the Duke of Edinburgh are touring Canada next month and will stop in Kamloops for an hour on their westbound trip at 5 p.m. on Friday, October 12.

Kamloops City Council is drawing up a suggested hour-long program for a reception in honor of the royal couple and will forward it to Ottawa for approval.

This will be the chief point where Their Royal Highnesses may be seen by Interior residents. A brief stop will probably be made in Revelstoke but no announcement has been made as to the probable time of arrival there.

In 1939, when King George and Queen Elizabeth toured this country they made a brief 31-minute stopover in Kamloops and an estimated 12,000 people gathered at the CPR station on a May evening to cheer Their Majesties.

There has been no visit to the Okanagan by any member of the Royal family since the Prince of Wales, now Duke of Windsor, visited in 1919.

Maybe They Should Try A Dove

Editorial

How Well Do You Know B.C.?

LIKE Rusticus in an adjoining column, we were privileged to drive over a considerable portion of the interior's highways recently. In fact, we took nearly four days off from our regular routine of issuing a weekly newspaper and turned east to cover some of the most beautiful scenery in British Columbia last weekend.

"See British Columbia First" should be a watchword for every motorist in this province. And there are so many interesting and exciting places within easy reach of a car owner every weekend.

In two to three days it is possible to drive leisurely between 400 and 500 miles, with frequent stops at every point of interest which attracts your attention.

In our case, we made the circle trip from the Okanagan to Rossland and Trail, turned northward up the beautiful Slocan Lake, across to the Arrow Lakes at Nakusp and Needles, then over the Monashee to Lumby and Vernon and down the Okanagan to home.

Once you leave the Okanagan there is a different aspect to the hills and valleys, with more annual rainfall noticeable in the denser vegetation and the green-clad hills.

For scenic beauty of a different sort we recommend Slocan Lake as being one of the loveliest drives in the province. And that, of course, makes

it one of the loveliest drives anywhere in the world.

Glistening waterfalls, tumbling down green, timbered slopes stretching right to the water's edge, in the distance snow-capped peaks and a glacier, topped by the bright blue sky edged and perforated with fleecy, white clouds—that is the Slocan Lake area.

Nakusp beachfront, with its boathouses and tiny wharves, lumber mills and the CPR sternwheel, or SS Minto, tied up for the weekend presents a picture which might have been dropped there from a Maritime coastal village.

The industrial might of the Trail-Rossland section, the much-improved gravel roads (some washboard sections, of course), the stretches of modern blacktopped highway along the southern trans-provincial route, the quaint river-crossing, free ferries, cattle ranches, mines, old hostleries dating back to gold-rush days, and the many historical relics of early days in this turbulent province—they are all to be seen in the space of two to three days.

Ask your friends how many have been into this section of the province and you will be surprised to find that few have taken advantage of the splendid short tours available.

It will pay you to know more about your Province from a first-hand knowledge gained through personal visits.

Signifying Nothing By RUSTICUS

Some time ago I planned that this column would be an exciting, blow-by-blow account of our summer vacation trip—the scenery we saw, the adventures we had, the interesting people we met. After envying loud-shirted leisurely tourists on the streets of West Summerland all summer, I looked forward eagerly to becoming a leisurely tourist somewhere in the hinterlands of the province myself.

But the week we chose for our trip was last week—and you know what happened. It rained. The skies gave us the works, everything from a drizzle to a downpour. Sometimes the rain stopped when we did, but whenever we ventured out on the road, or into the streets of a town, the clouds concentrated all their artillery on us.

So my report is not of the joys of camping outdoors in the mountains, of vast vistas of snow-capped peaks, of fishing for chamber-of-commerce-sized trout in unadvertised streams, but of the interiors of dingy tourist cabins, of beautiful views obscured by fog and clouds, of the endless click-click of windshield wipers as we drove stubbornly on through rain, rain, rain.

We saw some lovely places to go for a holiday in fine weather. The greenness of the Arrow Lakes and Kootenay Lakes country is a de-

light after the burned brownness of the grass in this part of the country. I'd love to spend a week at Nakusp, take a trip up and down the lake there in the Minto, sit for a whole day on the beach of Slocan Lake at New Denver and gaze at the glacier across from the town—might even get up energy enough to climb to it.

Kaslo must be beautiful in clear weather, surrounded as it is by mountains, and a trip up Kootenay lake to the Lardo country by paddlewheel steamer would be grand too. Then there is the remarkable cave at Ainsworth that was recently written-up in the Province, not to mention their hot spring. Nelson would be a pleasant place to spend a week, too.

Of course, I can report on the roads. We travelled mostly on gravel back roads, with occasional stretches of mud, but they were surprisingly good; only a few stretches of bone-rattling washboard. Of course, there were only a few stretches that were level.

The sharpest curves were too often unmarked by signs, the 'Winding Road' warning often seemed to come after, not before, a succession of curves. We came to several places where new stretches of gravel road were being built, few where the existing roads showed signs of regular grading. Maybe in that country they don't give a darn for

tourists, so don't worry about their roads; and if that is their attitude, I've a lot of sympathy for them.

But I'd hate to have the responsibility for roads in British Columbia. It must be terrifically costly to build them, let alone maintain them; and it is amazing how much of the highway through this thinly-populated province is paved. The road from Greenwood to Osoyoos, over the Anarchist pass, is as smooth as the Hope-Princeton, a joy to anyone who remembers what it used to be like; or anyone who has just driven from Trail over eighty miles that are not paved. Even in the rain it was a pleasure to glide over it; still more of a pleasure to come off it to our own Okanagan Valley highway and be able to shut the windshield wipers off.

Disappointing though the weather was, we were glad to find roads as good as they are, passes that we had been warned against not nearly as steep as we were told. One should not be afraid to drive anywhere in the southern interior, and the scenery is second to none—when you can see it.

We've put this year's trip down as a reconnaissance. Next year, if all goes well, we'll start a series of leisurely visits to interesting spots that this year discovered; but not at the end of a long dry spell. Not when there is any danger of rain.

THIRTY YEARS AGO September 2, 1921

Summerland will have Kootenay power flowing through the lines of its electric light system by the latter part of November. The pole line route between Pentiction and Summerland is being staked out this week, and Mr. Lorne Campbell, manager of the power company states that the construction gang will be put to work immediately.

Approval of the department at Ottawa has been obtained for the West Summerland Post Office to be moved into more commodious quarters, Postmaster Bowering reports. As soon as premises are ready for occupation, Mr. Bowering will move into the new cement block building being erected by W. C. Kelley to the east of the Bank of Montreal.

Joe Gayton leaves this week to take up teaching at Slocan. Mr. McLarty, dominion plant pathologist is expected to arrive on Saturday accompanied by his bride. Until the new house is ready on the grounds of the experimental station they will live in the Thornthwaite cottage at Trout Creek point.

George Gartrell came in from Merritt from one of his fisheries inspection visits. Mr. Gartrell has an extensive territory which keeps him very busy. W. W. McGill of Prince Rupert who was a guest at the Elsey home for a week has returned to the coast.

P. C. Tees, who has been holidaying here, has returned to the coast. The J. R. Brown property of 33 acres at Trout Creek has been bought by Mr. Daniels, CPR division engineer at Regina who has been visiting in the valley. Mr. Daniels' family is coming here soon to reside.

MOVE TO MONTREAL The Review learned last week that Mr. and Mrs. C. Smythe, former residents, have moved from their Ottawa home to Lachine, near Montreal, Quebec.

fire gun, all set in a small fast motor boat.

TWENTY-FIVE YEARS AGO Sept. 3, 1926

A splendid reception was accorded Grote Stirling, Conservative candidate for Yale, at a meeting in the British Empire Legion hall Tuesday evening. The audience was addressed by two other able speakers, T. G. Norris and E. C. Weddell, of Kelowna. Mr. A. B. Elliott, president of the local Conservative association was chairman.

Rev. T. Reid, new minister of the United church, Summerland, was inducted on Friday. Rev. Mr. Williams of Vernon presided, and with him to assist in the evening's arrangements were Rev. Mr. McMinn, of Kelowna, Rev. Mr. Sadler of Peachland and Rev. Fergusson Millar of Pentiction.

The death of Mr. R. Purves occurred this week. Mr. Purves came here with his family twelve years ago from the prairies. He enjoyed a large circle of friends. The funeral at the Anglican church was largely attended.

Miss Russell, who has travelled a great deal in Europe and who is staying with Mrs. Fosbery presented an unusual entertainment with the assistance of Summerland talent. The first part of the program consisted of living statuary, and the conclusion was a presentation of wax works. The proceeds of the evening went to swell the organ fund of the Anglican church.

Summerland residents are urged to conserve the water supply as the situation at the reservoir has become very serious indeed.

Fourth annual session of the summer school closed Sunday night. On Friday Angus McInnis, alderman of Vancouver, spoke on Creating a New Psychology. Rev. A. E. Whitehouse, Pentiction, spoke on Tuesday on The Church and Social Reform, and George Weaver spoke on New Ideals in Education. A New York paper has offered \$500 for a photograph and \$1,000 for the capture of the Okanagan sea-serpent. This week a man of experience and special training was sent here to hunt Ogoopogo, and went up the lake with a moving picture camera and a rapid

PORTRAITS

Mrs. Herbert Ames Solly Mrs. Solly has lived in Summerland for forty-five years, and is one of those through whose efforts a great many worthwhile things have been done. Vivacious, entertaining and possessed of splendid organizational ability many times she gave "a strong pull, a long pull" to accomplish "a pull all together".

Dorothy Anne Onslow Thompson was born in Glyn Abbey near Carmarthen in South Wales, one of twelve children. She was educated at St. Stephen's College, Windsor, and as a young woman spent some time in France and Germany where she chaperoned two of the daughters of the Duke of Leeds.

In October 1907 at St. Barnabas' church, Hove, Brighton, she was married to the Rev. Herbert Ames Solly, and left almost immediately

for Summerland where Mr. Solly was the rector of a young parish. They travelled on the Mauretania on her maiden voyage.

Coming down the lake by steamer they were met at the Summerland wharf by two churchwardens, Mr. Gerald Parker and Mr. Will Fosbery, and other members of the church. A dance was given in honor of their arrival, which was highly displeasing to some of their stricter friends.

For the first nine months that they were in Summerland Mr. and Mrs. Solly lived in a house owned by George Gartrell which was just behind the first Summerland hotel which later burned.

Meanwhile the Rectory was being built and at the end of August, Continued on Page 6

A SPORTSMAN, YES— and a lover of the great outdoors. There would be no fish, no game, no outdoor sports, without the protection offered by the forests. The sportsman's best friend is the forest.

Youthful sophistication is achieved in a new fall design by Junior Accent. Fashion's latest fabric favorite ripplerib, a fine repp with a lustrous surface, is combined with velvet trim in a slender dress for all day wear and late afternoon, too.

Has Birthday Party for Friends

Harold Biollo celebrated his thirteenth birthday by inviting a number of friends to a party at the home of his parents, Mr. and Mrs. Joe Biollo, Station Road, on Tuesday, August 28.
 Games were played while the gathering enjoyed a miniature PNE show in the backyard. Refreshments were served the boys by Mrs. Biollo as a fitting climax to the party.
 Among Harold's friends who were in attendance were Robert and Bruce Brown, Jack Gould, Tommy Jomori, Ronald Wilson, John Adams, Ken Bissett and Harold's younger brother, Freddie.

F. E. Atkinson Looks Into Future To Tell Penticton its Possibilities

PENTICTON—A bright future for Penticton was predicted by F. E. Atkinson, head of the fruit and vegetable laboratory at the Summerland experimental station, when addressing Penticton Kiwanians at their regular noon luncheon last week.
 "Emphasizing that he was only expressing 'one man's opinions' the speaker referred to Penticton as 'a brilliant diamond' with many sparkling facets.
 Penticton's prosperity hinges largely upon its climate particularly in relation with its attraction to visitors and retired people. The speaker theorized that many people would come here in the future and visualized the slopes and uplands, rising from the flat area between the lakes, dotted with homes.
Attractive Climatic Features
 In support of this theory, Mr. Atkinson cited as examples Berkeley, California and other American cities whose attractive climates had drawn numbers of retired people to their environs.
 Painting his word picture with more sombre colors, the speaker contended this city would be a natural evacuation area in the event of war.
 "Vancouver and Trail are likely to be targets for enemy aircraft and, with the rapid strides made in the helicopter branch of aviation, it would not be difficult for a man to commute to either of the target areas and leave his family here where he could feel they were safe."
Tourists Important
 The tourist's part in the future expansion of Penticton was deeply probed by the speaker. He stated that the important thing in catering to tourists is to find something for them to do.
 "A civic committee could be set up—although I can't say where the money would come from—to study entertainment facilities in other areas like Toronto and Hamilton which have lakeshore resorts.
 "A lake is a wonderful asset but, in itself, it provides little for the visitor to do.
 "There are things like moonlight cruises, shipboard dances and heated swimming pools that would provide entertainment for the tourists," Mr. Atkinson suggested.
 Roads into the mountains and hills where there are many wonderful viewpoints would also be great assets to the city, the speaker claimed.
 Picnic-ground signs along the roadsides are also requisites of a successful tourist centre. "How many signs between here and Hope and between Penticton and the border are there which tell the motorist that there are suitable picnic spots a certain distance ahead?" asked Mr. Atkinson. "There are none that I know of."
 Circular tours for people who prefer to drive home a different way from the one they followed on the way here; skyline trails for horseback-riding enthusiasts and more games facilities were all part of Mr. Atkinson's predictions.
More Processing Fruit
 From a fruit-grower's point of view, the speaker suggested that more fruit grown solely for processing and less apples for packing would give the fresh-fruit prices more stability.
 "Here in the best soft fruit centre in the Okanagan—and probably in Canada—more processed fruit would also mean that more labor could be employed here than there is now engaged in packing.
 "Industries are," Mr. Atkinson admitted, "vital to this area." Rather than spoil a "beautiful setting" with "dirty industries", it would be to the city's advantage to encourage the development of new small industries, he added.
 "Because you would be faced with a shortage of skilled labor for these industries, it would mean that training would have to be given in schools or the immigration population must be increased," he explained.
 Mr. Atkinson declared that Penticton always was and always will be a distribution centre and he advised that the development should be carefully watched and that areas adjacent to trackage should be used.
 "The things that are needed," he concluded, "to make the city's future secure are training, ability and enthusiasm."

Safeguards to Prevent Botulism In Canned Foods Are Outlined

At this time of year housewives are busily engaged in canning fruit and vegetables. Most canners know the dangers of botulism but some may not be aware that there is a danger of poisoning if the food-stuffs are not prepared properly.
 The department of health at Victoria explains that botulism is caused by a toxin produced by a botulism organism found in the earth.
 If this organism is present in the food when it is canned, it may survive ordinary boiling temperatures and produce its toxin during storage in an air-tight jar or can.
 Foods that are particularly susceptible to this type of spoilage are all vegetables (except tomatoes), meat, fish and poultry. Even if only a small amount of food containing botulinus toxin is eaten, it can cause death in a matter of hours, as has been shown in cases which occurred on Vancouver Island, Vancouver and in the Interior, the health department states.
 To ensure that canned vegetables and meat are safe from botulism or other types of spoilage, these precautions should be followed carefully:
 Preserve only thoroughly cleaned food with clean hands and in clean containers.
 Use a pressure-cooker for canning vegetables, meat, fish and poultry. Have your pressure-canner in good working order and have the gauge tested frequently.
 If you do not have a pressure-cooker, the vegetables or meat must be placed in a boiling water bath for at least three hours. When the food is opened, boil it for ten minutes before tasting or serving.
 A pamphlet, "Home Canning of Fruit and Vegetables," giving detailed information on preparing foods for future use, may be obtained free of charge by writing to the consumer section, Dominion Department of Agriculture, Ottawa.

Many Guests at Miscellaneous Shower

A miscellaneous shower was held on August 22 at the home of Mrs. Gordon Pohlmann, Summerland, in honor of Miss Joyce Healy, bride of last week. Miss Louise Gale was a co-hostess.
 The lovely gifts were placed on a table in the centre of the room, and the guest of honor was seated in a chair, gay for the occasion, with pink and white streamers and white bells overhead.
 Dainty refreshments were served by the hostesses and friends.
 Invited were the bride-elect's mother, Mrs. Healy, Mrs. G. Braden, Mrs. J. VanCameron, Mrs. Carrier, Mrs. Hefflik, Mrs. Norstrum, Mrs. F. Gale, Mrs. E. Martin, Mrs. R. Kennedy, Mrs. F. Dickinson, Mrs. A. Tyacke, Mrs. C. Stump, Mrs. B. Bullivant, Mrs. R. Healy, Miss Donnell Norstrum, Miss Mary Wolfner, Miss LeEtta Littau, Miss Marina Martin, and Miss Gerda Felkor.
 The penultimate day of the month is the next to the last day.

RED AND WHITE LUNCH

Visitors at the home of Mrs. L. Johnston this week are Mr. and Mrs. Russell Hurst and their son, Donald, of Selkirk, Ont. Mrs. Hurst is Mrs. Johnston's niece. The Ontario visitors drove out to Vancouver on Wednesday and are returning to spend the weekend here.

Korean Casualty on Visit to District

Lieut. A. Wagstaffe, Mrs. Wagstaffe, and their small daughter, of Vancouver, visited friends in town last weekend.

On their first day in the valley they could not get tourist accommodation and slept all night in the car.

Lieut. Wagstaffe was one of the Princess 'Pats' early Korean casualties and has been in Shaughnessy Military hospital for several months, in fact only allowed out a week ago.

During World War II he was a prisoner of war. At that time Mrs. Wagstaffe lived in Summerland and took one of the Red Cross Home Nursing courses given here.

Among those whom they called upon were Mr. and Mrs. Wm. White, Mr. and Mrs. C. Stewart, and Mr. and Mrs. V. Charles.

Teaching Chinese Boys at Victoria

Mrs. Lyle Sharpe has returned to Victoria to resume her teaching duties on the staff of the Greater Victoria School area.

Last year when many Chinese boys arrived in Victoria from China a classroom was opened at North Ward School for them. A teacher with experience and the necessary understanding was needed, and Mrs. Sharpe was chosen for this difficult position.

This is the only class of its type in the Victoria schools, and is an experiment in their educational setup.

VISITING HERE

Mr. and Mrs. Roy Heuchendorff have returned to their home in Burnaby after vacationing here at the home of their uncle and aunt, Reeve C. E. Bentley and Mrs. Parces.

Mr. and Mrs. H. S. Jones and their daughter Carole of Victoria, were recent visitors of Mr. and Mrs. C. Adams. While here they stayed at Sharpe's Auto camp, Peach Orchard.

A Royal Marine and other officers stand by on the quarter deck of the British cruiser Superb as VICE ADMIRAL SIR RICHARD SYMONDS-TAYLOR hands over the famous Shannon Bell to his old Canadian shipmate, REAR ADMIRAL E. K. MAINGUY. The bell bears the scars of the shortest engagement in naval history when the Shannon captured a heavier armed American ship and brought the prize back to Halifax 138 years ago.

Son of Late James Butterfield Engaged

Of interest in Summerland where the parents of the groom resided and where he attended school in his early years is the announcement at the coast on Tuesday by Mr. and Mrs. Audrey Tibbitts Clark of the engagement of their only daughter, Doris Eileen, to Mihail Paul Aidan Butterfield, youngest son of Mrs. Virginia Butterfield, and the late James Butterfield, well-known newspaper columnist.

The wedding is to be solemnized Sept. 24, in Ryerson United church at 7:30 p.m., Rev. M. W. Stevenson officiating.

Lt. James Butterfield, RCN, will be his brother's best man. The reception after the ceremony will be held at HMCS Discovery.

Lecturer for Youth For Christ Rally is Married in Penticton

The Youth for Christ organization, of which Mr. John Graham is director locally, have been holding a rally here which is to close tomorrow night.

The gatherings started on Tuesday, August 28, and finish Sept. 7 in Ellison hall. The speaker is Mr. Louis Nelson who came from the United States for the occasion.

Mr. Nelson's fiancée, Miss Norma Jane Weir, a concert singer, came to the Okanagan as well and her singing has been part of the programs.

On Tuesday evening, Sept. 4 the couple were married quietly in the Bethel Tabernacle in Penticton at 10 o'clock following the evening's service here. The wedding was attended by about twenty of the Summerland Youth for Christ group.

The meetings were well attended the first week, though the attendance has fallen somewhat this week.

Cardboard Truck Laden with Gifts

On Wednesday evening, August 29, a smart cardboard truck laden with gifts was brought into the sitting-room of the nurses' residence at Summerland General hospital filled with lovely gifts for a bride-to-be of next month, Miss Bernice Elliott.

Mrs. Gavin Paterson and Miss Millie Hudson were "drivers" of the truck and presented it and its contents to Miss Elliott in honor of her approaching marriage to Mr. Bert Pollock of Pollock Motors Ltd.

Guests included nurses and ex-nurses, the former group giving a blanket as their present, and the others bringing miscellaneous pretty, useful things.

Refreshments were served and the evening thoroughly enjoyed.

Demand for Valley Fruit Excellent

Good demand in practically all western Canadian markets for Okanagan tree fruits is reported this morning from B.C. Tree Fruits Ltd.

Movement is ahead of last year, indicating the heavier tonnage of soft fruit available as compared to 1950, but of course it does not come anywhere near the bumper crop year of 1949.

Figures released at last weekend show 1872 cars having left the Okanagan this year as compared with 1323 at the same date in 1950 and 3896 in 1949.

Demand continues good in western Canada for Okanagan peaches and with a few exceptions deliveries have been satisfactory, the sales agency stated.

However, the prairie markets as far west as Calgary are receiving Ontario peaches, in reportedly good condition, from Ontario. These are being shipped west in trucks.

On Monday, 1533 crates of tree-ripened prunes and peaches were loaded on a 15-ton semi-trailer at Osoyoos and left that evening for Winnipeg, the first shipment of this nature ever to leave the Okanagan.

The load was expected to reach Winnipeg last night, about half the time lapse of shipments by rail.

This test-truck shipment is an experiment to determine if soft fruit can be placed on western markets more quickly and more cheaply than by rail transportation.

Up to last night 70 percent of the estimated peach crop had been moved from the valley, the sales agency states.

Slightly better than normal demand for Bartlett pears is being experienced in western Canada but eastern Canada has shown little interest due to ample local supplies on hand.

Heavy deliveries of prunes were made on Tuesday and Wednesday and have been shipped to markets. It's too early to evaluate the market reception but if they are received in good order Tree Fruits expects a continuing good market for this product.

Transcendent crabapples are practically finished and most districts are picking Hyslop crabs in volume.

Markets are steady and demand is good for Okanagan apples, with most markets eagerly anticipating the first McIntosh Reds.

No opening date will be announced until next week on Macs,

VISITING HERE

Mr. and Mrs. W. R. Sellings of Burnaby were weekend guests of Mr. E. T. Matchett, Summerland.

Mr. Jack Ingram of Moncton, N.B., is spending his holidays at the home of Mr. and Mrs. W. White.

Mrs. Florence Bedford of Vancouver is visiting at the home of her brother and sister-in-law, Mr. and Mrs. A. E. Smith.

Miss Nancy Hack, RN, of Vancouver visited over the Labor Day weekend at the home of her mother, Mrs. E. Hack.

Mr. Wally Day of Vancouver visited last weekend at the home of his parents, Dr. and Mrs. L. A. Day, Trout Creek.

Miss Peggy Stuart, RN, of Chilliwack visited at the home of her mother, Mrs. A. Stuart, over last weekend.

Mr. and Mrs. Angus Ryder of Mt. Lehman visited at the home of Mr. and Mrs. C. V. Nesbitt on Sunday.

Mr. and Mrs. Hubert Heyworth of Seattle visited at the home of the former's parents, Mr. and Mrs. Heyworth on Sunday.

Mr. and Mrs. James Lind, the latter the former Miss Ruby Sharpe, are visitors for two weeks at the home of Mr. and Mrs. Walter Bleasdale.

Weekend guests of Mrs. Ann Clifford were her brother-in-law and sister, Mr. and Mrs. T. Pedersen and their two daughters of Tacoma, Wash.

Miss Nellie Fisher has returned to Vancouver after spending a ten-day holiday at the Crescent Beach home of her brother-in-law and sister, Mr. and Mrs. Alex Smith.

Mrs. G. L. McWilliams and her sister Miss May Bateman have returned to the coast after visiting at the home of Mrs. Dale and Miss Ruth Dale.

Mr. and Mrs. D. A. Archibald of Clearwater, B.C., were recent visitors at the home of Mr. Archibald's brother-in-law and sister, Mr. and Mrs. G. S. Johanson.

Mr. and Mrs. Dave Kelly with Sharon and Linda, all of Whitehorse, Yukon Territory, were weekend guests at the home of Mr. and Mrs. Leslie Rumball.

Guests at Sharpe's Auto camp are Mr. and Mrs. P. Romano of Vancouver, here for two weeks visiting the latter's sister, Mrs. H. G. Draper.

Mr. and Mrs. G. L. Beaven and their son Lee of New Westminster stayed at Sharpe's Auto camp recently while visiting the former's brother, Mr. Frank Beaven.

Mr. and Mrs. W. Bird and their children of Vancouver visited recently at the home of Mr. and Mrs. Tom McDonald and Mr. and Mrs. C. V. Nesbitt.

Here on leave from Gimli, Man. are WO2 W. Borton, Mrs. Borton and their baby, visiting at the home of the former's parents, Mr. and Mrs. W. W. Borton.

Recent visitors at the home of Mr. J. W. Harris, Giant's Head Road, were his sons, Dr. Howell Harris of UBC, and Rev. T. E. Harris, Langley Prairie.

Weekend visitors at the home of Mr. and Mrs. H. J. Mott were their son-in-law and daughter, Mr. and Mrs. Shelley Knowles, and their daughter and grandson, Mrs. W. Hutton and Kenneth, all of Kamloops.

Rev. and Mrs. John Scott of Trail were among Labor Day visitors in town and Mr. Scott took the service in the Baptist church on Sunday morning. Mr. Scott was pastor of the Baptist church here a number of years ago.

Miss Inez Ware, who will teach at Beaverdell this year, and Miss Beverly Francis of the Oliver teaching staff were recent visitors of Miss Doris Cristante at the home of her parents, Mr. and Mrs. J. Cristante.

but it is expected that considerable picking will commence the first of next week.

What has happened to the bulk of the Wealthy crop is still puzzling the sales agency. Wealthies were estimated at 122,000 boxes but to date only 40,000 Wealthies have been shipped and the sales agency has been shipping them out as fast as they are received by the packinghouses.

More Than Hundred Guests Attend Lovely Ohsberg-Huva Nuptials

Under an archway of white streamers which formed a canopy for the bridal party and amid baskets of beautiful pastel-shaded gladioli, Wilma, daughter of Mr. and Mrs. William Huva, Summerland, was married to Rev. H. Oliver Ohsberg, of Edmonton, Alta., son of Mr. and Mrs. George C. Ohsberg, of McKeesport, Pennsylvania, on August 31 at five o'clock in the afternoon in Summerland Baptist church.

The ceremony was performed by Rev. D. O. Knipfel in the presence of about one hundred and twenty-five guests. The bride, who just came to her tall bridegroom's shoulder was given in marriage by her father and wore a lovely wedding-gown of white satin with lace redingote. The sleeves were long with lily points, and from the small rolled collar small satin buttons fastened the bodice to the waistline. A peplum at the front gradually was fashioned into a long train at the back. Over this a short embroidered veil was worn, held in place with a beaded coronet. Her flowers were red and white carnations and fern.

Four attendants, Miss Irma Arndt, maid of honor; Miss Ida Neher of Calgary, and the bride's sisters, Miss Esther and Miss Nella Huva, as bridesmaids were the attendants.

Their gowns of rosy pink, ice blue, apple green and canary yellow reflected the colors of the flowers arrayed about them, and were made alike of taffeta. Each had a fitted bodice with rounded neckline which had a bias fold to give an off-the-shoulder effect. This fold was caught and gathered softly at the shoulders and at the front and back. The skirts were flared and each had a gathered peplum.

The pretty headresses were crownless hats of matching material pleated on the brims and with a big bow at the back. Their short mitts were of the taffeta with a gathered ruffle at the top, and they each carried gladioli, Miss Arndt's of wine color, Miss Neher's pink, and the bride's sisters in yellow and mauve respectively.

The groom's brother, Rev. George Ohsberg of Cambridge, Nebraska, was the best man, and ushers were Gary and Johnny Huva, brothers of the bride, Mr. Raymond Jaster, Herbert Arndt and Roger Smith.

Music for the wedding was played by Miss Ruth Dale at the piano and Miss Michiko Imayoshi at the organ. Soloist was Mrs. Raymond Jaster.

A reception was held in the church hall after the ceremony where summer flowers, red dahlias, carnations, roses and asters were used in decoration.

For her daughter's wedding Mrs. Huva had chosen a printed jersey frock, the background white, and

she wore a black hat and white accessories. Her corsage was of wine gladioli. The groom's mother, Mrs. Ohsberg wore an eggshell suit, with navy accessories and flame gladioli as a corsage.

The three-tiered wedding cake was on the bride's table, with vases of carnations and roses and white tapers in silver holders on either side. Surmounting the cake was a small crocheted basket containing little flowers.

Congratulatory wires were read by the best man, Rev. G. Ohsberg. Piano solos were given by Miss Ella Mohr and Miss Michiko Imayoshi; vocal solo by Miss Darlene Neher of Calgary and a vocal duet by Mr. and Mrs. Raymond Jaster; and Mr. Knipfel played a trumpet solo.

The old custom of selling the bride's shoe was observed at the reception. The money realized from this is used to help with honeymoon expenses.

The bride and groom are travelling to McKeesport, Penn., his former home, on their honeymoon, and will visit New York city, Niagara Falls and other points in eastern United States and Canada before returning to Edmonton where Rev. Mr. Ohsberg is a teacher in the Bible school.

For going-away the bride changed to a light blue frock topped with a skipper blue coat, light blue gloves and hat trimmed with navy, and navy accessories. In her corsage were red and white carnations.

Out-of-town guests included the groom's parents Mr. and Mrs. George C. Ohsberg who came from Pennsylvania for the occasion; the groom's brother and sister-in-law and niece, Rev. and Mrs. George Ohsberg and Karen of Cambridge, Neb.; and Misses Ida and Darlene Neher of Calgary.

New Matron Takes Charge of Hospital

Miss Verda Snow, RN, of Vancouver took over her duties as matron of Summerland General hospital on Sept. 1, succeeding Mrs. James Heavysides who has been acting matron since Miss May Bennet's resignation was received.

Miss Snow, who has had post graduate courses in operating room technique and maternity work has come from Vancouver and has held executive positions at Ocean Falls and Prince George.

Two new graduate nurses have been added to the staff recently, coming here from Prince Edward Island. They are Miss Joy McLeod and Miss Margaret Campbell. Miss Campbell is a niece of Mr. and Mrs. S. A. MacDonald.

Many Friends Honor Bride-Elect at Shower

Mrs. Norma Henry and Miss Yuriko Jomori arranged a shower, at the home of the former's parents, Mr. and Mrs. W. Hack, on Thursday evening, August 30, in honor of Miss Rhodena Moore, daughter of Mr. and Mrs. R. O. Moore whose marriage took place on Saturday, Sept. 1.

Old friends and neighbors were invited and lovely miscellaneous gifts were received by the bride-to-be.

A novel way of presenting them was that of putting the gifts in three boxes, each containing an alarm clock which had been set to go off at a fixed time. When the clock rung in one Miss Moore was asked to open the parcels in that container; when a second bell rang, she opened the next box, and the same for the third one.

Dainty refreshments were served.

Will Sail on Same Ship as Princess

Mrs. E. R. Hookham who has been visiting in England is sailing for home on the Duchess of France, the ship on which the Duke and Duchess of Edinburgh have taken passage for their trip to Canada.

When Mrs. Hookham booked her return trip home before she left last spring she, of course, had no idea that the distinguished passengers would be on board.

Many people in England and in the United States have been trying to get accommodation on the boat for one or other of the voyages while Princess Elizabeth and Prince Philip are aboard.

Socially Speaking

SOCIAL EDITOR

Mrs. A. W. Vanderburgh

Mrs. McLarty To be Honored By Institute

First fall meeting of the Women's Institute is to be a luncheon one, in the parish hall a week from today, Thursday, Sept. 13, at one o'clock.

This is to be a real occasion in Institute history when the Tweedsmuir Cup will be presented to Mrs. H. R. McLarty for her essay on "Democracy Begins With You" which won first place in dominion competition.

The meeting will also honor Mrs. C. Orr whose hand-booked rug won first award in the provincial institute contest and also first place in the Pacific National Exhibition in Vancouver which ended Sept. 3.

Mrs. E. Gummow, provincial superintendent, will be present and Mrs. J. H. East, provincial president.

Mrs. Gummow and Mrs. East are going to Grand Forks following the buffet meal, and the regular business meeting will take place after their departure.

Bride Chooses Parent's Home For Wedding

At the home of the bride's parents, Mr. and Mrs. Frank Gordon Healy, Peach Orchard, a pretty wedding took place on Friday evening, August 31, at half-past seven when their daughter, Margaret Joyce, was united in marriage with James Allan, eldest son of Mr. and Mrs. Leslie J. Gould.

At the ceremony performed by Rev. H. R. Whitmore, minister of Summerland United church, there were about thirty guests.

For the happy occasion the house was tastefully decorated with pastel shaded streamers and white wedding bells and bouquets of colorful gladioli.

The young bride was given in marriage by her father, and was wearing a lovely wedding-gown of white satin. The torso top with its net yoke, outlined with a ruffle of the satin was in off-the-shoulder mode, with the ruffle held in place with satin rosettes decorated with pearls. The sleeves were long, and the skirt was daintily ruffled and in the back had a small bustle. Her long white flowing veil was held by a coronet of seed pearls, and silver beads, and she carried a pink shirred net heart trimmed with lily-of-the-valley, pink and white roses, and long white streamers.

The bride's only attendant was her cousin, Miss Louise Gale, who as bridesmaid was in a charming, pink frock, the top of pink lace, the sleeves short, and the skirt full, fashioned of two layers of net over taffeta. A headdress of pink net, trimmed with ribbon and seed pearls complemented her costume, and her bouquet in a horse-shoe shape was covered with shirred pale blue net, to which pink and white carnations, lily-of-the-valley and pale pink, pale blue, and white ribbons were attached.

A reception immediately followed the ceremony and the decorated wedding-cake was on a small cabinet covered with a beautiful hand-crocheted cloth.

Mr. F. Tilba proposed the toast to the bride to which the groom responded, and a telephone call of congratulations was received from the bride's uncle and aunt, Mr. and Mrs. C. G. Healy, in Calgary.

For travelling to the coast by car the bride donned a mauve pique dress, with scalloped neckline, cap

FALL FASHIONS—Perfect top for suits is the cashmere coat, shown above, with the small collar.

HOME AGAIN

Dr. and Mrs. D. V. Fisher returned last Thursday from a honeymoon trip to Banff, and are at their home in Trout Creek.

Mr. and Mrs. Tom McKay and Marilyn returned on Monday from a motor holiday to Spokane and surrounding points.

Mr. and Mrs. Fred Carston, Floyd and Dorothy, returned on Monday from Cranbrook where they visited their sons, Bill and Lorne.

Mr. and Mrs. Leo Heyworth have returned to their home in Jones Flat after being away about three weeks. During this time they were in Vancouver, and also visited Seattle and Wenatchee.

Billie Bleasdale, son of Mr. and Mrs. Walter Bleasdale, has returned from the Fraser Valley where he spent two months at the home of Mr. and Mrs. George Ashby.

NEW ARRIVALS

A third son was born to Mr. and Mrs. R. Lenzi at Summerland General hospital on Sunday, Sept. 2.

A baby son was born to Mr. and Mrs. J. Bowen at Summerland General hospital on Thursday, August 30.

On Aug. 23, a daughter, Marian Lynn, was born at Pentiction hospital to Mr. and Mrs. Lloyd Gartrell, Trout Creek, a sister for Trudie and Freddie.

Mr. and Mrs. Frank Carpenter of Midway are the parents of a baby son who arrived at Summerland General hospital on Saturday, Sept. 1. Mrs. Carpenter is a daughter of Mr. and Mrs. E. O. White.

sleeves and small peplum in front. With this she wore white accessories and a corsage of yellow and white roses.

Out-of-town guests included the bride's brother ABSM Don Healy Port Arthur, Ont., and Mr. Gale Brian Lawson of Cloverdale. The young couple will make their home in Summerland.

Summer Flowers Lovely Setting For Ceremony

The stairway of the home of Mr. and Mrs. R. O. Moore was banked with midsummer flowers in colorful tones on Saturday afternoon, Sept. 1, at four o'clock for the wedding of their daughter Eva Rhodena and Benjamin Alvin Ira, son of Mr. and Mrs. Edwin T. Nesbitt, West Summerland.

The ceremony was performed by Rev. C. P. Stewart of New Westminster, formerly of the Free Methodist church, West Summerland, and the bride was given in marriage by her father.

Gunmetal grey in an afternoon frock was the attractive choice of the bride for her wedding. It had a tucked fitted bodice and a peplum and in contrast a mauve hat added color. White carnations surrounding an orchid were carried in the bridal bouquet.

Miss Marjorie Mott was bridesmaid, charmingly frocked in green taffeta topped by a green hat and carrying yellow roses.

Miss Laura Mott played the wedding music and Mr. and Mrs. Wesley Prior sang, "I Love You Truly" while the register was being signed.

Mrs. Moore, at the reception held at home after the ceremony, was wearing an attractive navy sheer with yellow roses en corsage, while the groom's mother was in navy flowered crepe with white hat and white gladioli corsage.

There were thirty present at the wedding and reception.

A lace tablecloth covered the tea table which was centred with a two-tier wedding cake in a pretty arrangement with tapers, carnations and stocks.

Serviteurs were the bride's sister, Miss Beryl Moore and Miss Margaret Jomori.

Mr. J. S. Mott gave the toast to the bride to which the groom responded.

The honeymoon was spent motoring in the Okanagan, the bride donning a black shortie coat over her wedding dress and a mauve orchid as a corsage.

Out-of-town guests were the bride's grandmother, Mrs. Ida Matthews, of Edmonton, the bride's brother and sister-in-law, Mr. and Mrs. Ray Moore, the groom's brother-in-law and sister, Mr. and Mrs. Roy Preston, and Mrs. W. Gartrell, all of Pentiction; Mr. and Mrs. C. Prior, Rev. and Mrs. C. P. Stewart, of New Westminster; Mrs. C. S. Holden, Miss Doreen Russell, and Miss Margaret Graham, Vancouver.

The groom was a member of the teaching staff of the elementary school, West Summerland, a few years ago, and at present is an auditor for the City of Vancouver.

Mr. and Mrs. Nesbitt will make their home in Vancouver.

Driving over from Trail for the holiday weekend were Miss Janet Biker, Mr. Irvine Matheson and Mr. Bob Weitzel, who stayed at the home of Mr. and Mrs. Channon Snow, and who were accompanied by Miss Sylvia Moore and Mr. Keith McLean who stayed at the home of Mr. and Mrs. H. McLean in Pentiction.

Summerland Girl Exchanges Vows at Presbyterian Manse

The marriage of Miss Betty McLure, daughter of Mr. and Mrs. W. McLure, West Summerland, and Mr. James Capostinsky, Clearwater, B.C., took place quietly on Saturday, Sept. 1, in Pentiction.

The ceremony was performed by Rev. G. P. Tasker at the Presbyterian manse.

The bride, given in marriage by her father, wore a pink ensemble. Her lovely floor-length gown of pink corded silk had a fitted bodice, with square neckline and short sleeves, and the skirt was bouffant. She wore a pink net fingertip veil, and white gloves and carried a bouquet of shaggy white asters and scabiosa in autumn colors.

Attending as her sister's bridesmaid was Miss Barbara McLure. Her frock of blue net contrasted prettily with that of the bride and featured a long torso and full skirt. She wore white gloves and a watch, the gift of the best man, Mr. Edward Nicholas.

A wedding dinner was held at the Commodore Cafe, Pentiction.

Mr. and Mrs. McLure, and Billie, the bride's parents and brother, attended.

Mr. and Mrs. Capostinsky are making their home in Summerland.

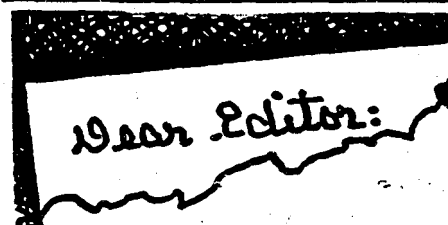

Newlyweds Honored By Bride's Parents

On Labor Day in the evening, a party was held at the home of Mr. and Mrs. W. McLure to honor their daughter, Betty, whose marriage to Mr. J. Capostinsky took place in Pentiction on Saturday, Sept. 1.

Twenty-one friends gathered bringing lovely gifts for a kitchen shower.

A treasure hunt, fox and hounds, and other games were entertainment and dainty refreshments were served.

Mr. and Mrs. Reg Atkins of Fruitvale, B.C., were in town last week and called on many old friends.

VISITING ABROAD

Mr. R. A. Johnston was a visitor to Vancouver during the past weekend.

Miss Doris Cristante has left to resume her teaching duties on the staff of the Prince George school.

Mrs. Norma Henry will leave soon for the coast to attend Normal school.

Mr. and Mrs. Cecil Wade and family spent Labor Day weekend at Vancouver, returning home on Wednesday.

Mr. E. T. Matchett of Summerland left on Monday for California on a business trip and expects to be gone for three weeks.

Mr. and Mrs. H. Penketh and Mr. and Mrs. C. Smith were among those who motored to Vancouver over the long weekend.

Mr. and Mrs. Dewey Sanborn, Miss Jill Sanborn and Mrs. Georgina Maisonville motored to Vancouver for the Labor Day vacation.

Miss Valerie Tingley is leaving for the coast on Thursday evening's train and will attend Normal school there.

Mrs. N. Blacklock, Miss Dorothy Blacklock and Mr. Donnie Blacklock visited at the home of Mr. and Mrs. Phil Smith at Enderby during the Labor Day holiday.

Mr. and Mrs. George Graham and their family motored to Grand Forks over the weekend where they were guests of Mr. and Mrs. C. E. Clay.

Miss Joan Bennett has joined the staff of Pentiction School District 15, as a teacher of home economics this year. Last year Miss Bennett taught at Ocean Falls.

Mr. and Mrs. W. C. Wilkin and their two little daughters motored to New Denver last weekend to visit Mrs. Wilkin's brother and sister-in-law.

Mr. and Mrs. J. R. Armstrong were on a motor trip over the holiday weekend, enjoying the lovely scenery in the Sloan and Arrow Lakes country.

Miss Nancy Hack and Miss Peggy Stewart who visited at their homes over the Labor Day weekend have gone to Crow's Nest where they will visit Mr. and Mrs. Jim Hack, and plan to spend the rest of their holidays with a trip to Calgary and Edmonton.

MORE ABOUT— PORTRAITS

Continued From Page 2

1908, they moved there. At that time there was no other house in sight on what was known as Siwash Flat, now West Summerland. It was not long after that the original consolidated school was built and the Summerland Supply Co. store, currently that of Laidlaw and Co.

Visitors usually arrived on horseback or in a buggy. Shopping was done at the Lower Town and mail came there, too. At first the couple had no conveyance, so their visits down town were few and far between.

For the first three years after their arrival church services were held in the little St. Peter's church situated in the Anglican graveyard. There was one grave there then, that of Arthur James Preston. A short time later, Mrs. Doherty, the mother of Mr. George Doherty, died and her grave was the second one in the churchyard.

The beautiful stone St. Stephen's church was started on Sept. 1, 1909, and the foundation was laid by Archdeacon Beer. The church was ready for use the following March.

A few years later it was decided to hold a "bee" to clean up the cemetery. Unfortunately a sudden wind rose, driving the flames from the burning weeds under the little church, and it was completely destroyed. It was a good thing that all the furnishings had been moved already to the new church.

Shortly after his arrival Mr. Solly started the St. Peter's Guild, and the ladies, with Mrs. Solly as president, worked for the church. This was changed before many years to a branch of the Women's Auxiliary. Mrs. Clouston was the first president of the W.A. Mrs. Solly about this time had been on a visit to England with their four small children. When she returned with them, Nicolas aged four, Ivor, three, Dorothy May, two, and Veronica, only eight months, she found time to act as president of the auxiliary.

She was in that office until 1929 when she was elected president of the Kootenay Diocese. This office she still holds, and each year goes to the dominion diocesan meetings. She has been at Toronto, Hamilton, Ottawa, London, and Winnipeg to these important conferences, and this year expects to attend in Vancouver.

Her outstanding work has been recognized for in 1921 the local branch of the W.A. made her a diocesan life member, and the whole diocese made her a dominion life member in 1945.

For twelve years she was a valued member of Summerland School Board. She was president of Summerland Hospital auxiliary for some time, and a member of Summerland Hospital Board. From the time that the local hospital was even thought of she interested herself in its furtherance, and in 1943 was made an honorary member of the board with the privilege of attending and participating in the board meetings at any time.

It was in 1940 that Mrs. Solly

Tilbe Home Scene Of Miscellaneous Shower

On Friday, August 24, Mrs. Frank Tilbe and Mrs. John Schramm were joint hostesses at a lovely party and miscellaneous shower for Miss Joyce Healy who was married last Friday. The happy event was held at Mrs. Tilbe's home in Peach Orchard.

Balloons filled with confetti showered the bride as she was seated in a chair decorated for the occasion.

Guests enjoyed playing games and partaking of the delicious refreshments.

Those invited included Mrs. Frank Healy, Mrs. J. Blewett, Mrs. J. E. Britton, Mrs. R. Derosier, Mrs. G. Sheldrake, Mrs. H. Draper, Mrs. C. Adams, Mrs. H. Greenlees, Mrs. W. M. Fleming, Mrs. M. Pollock, Mrs. I. Williams, Mrs. J. Thomas, Mrs. L. Gould, Mrs. V. Charles, Mrs. Mrs. I. Williams, Mrs. H. Lemke, Mrs. H. Eden, Mrs. W. Greer, Mrs. R. Healy, Mrs. J. Wilson, Mrs. L. Charles, Mrs. W. Charles, Mrs. Advocate, Mrs. Gordon Blewett, Miss Mary Scott, Miss Phyllis Adams, and Miss Beverly Fleming.

was chosen the Good Citizen for the year and the board of trade presented her with the Reid Johnstone Good Citizenship cup.

Always fond of music she was a member of the Summerland Singers' and Players' Club for years, and played the parts of Dame Caruthers, Little Buttercup, and the Duchess of Plaza Tora, in their productions.

During the first World War, while leading a very busy life continually, she was the efficient secretary of the Red Cross Society.

On Mr. Solly's retirement they went to live at Trout Creek, where the house called Woodsbeach, surrounded by its pretty garden is near where the stream enters Okanagan Lake.

Here Mrs. Solly still lives, engaged in her diocesan work, and enjoying many visits from her children, grandchildren and friends.

Some Poor Equipment in Dairy Farms Here

At two different times this summer, six samples of water were taken in the municipality by Sanitarian F. R. Alcock, two of these samples being positive, council was informed last week.

Some difficulty in operating the chlorination plant had been experienced but the problem has been solved and the system is now working satisfactorily.

Of the raw milk establishments, two in this locality have shown constantly varying bacteriological counts, Mr. Alcock reported, indicating in his opinion poor equipment or sufficient care taken.

Many small farms lack sufficient money to buy modern equipment for the proper handling of milk supplies, he added.

All tourist camp sanitary arrangements had been checked closely and found to be in a very satisfactory condition, he reported. The old privvies at Powell Beach

EXPLORE THOUSANDS OF ACRES IN SEARCH OF OIL

In British Columbia there are 11,640,857 acres of land under all types of permit for oil and natural gas exploration, E. T. Kenney, minister of lands and forests, states.

Bulk of the exploration work is being carried on in the Peace River area where some 11,062,536 acres are under various types of permit.

Geologists believe that it is probable that the Peace River is part of a gigantic oil area sweeping up from Texas and through Alberta

HUGE INCREASE IN TIMBER

Timber scaled in British Columbia during the first six months of this year was 2,042,790,484 board feet, an increase of 374,267,902 board feet, announced Hon. E. T. Kenney, minister of lands and forests.

should be filled in, he thought but the new privvies are adequate from a sanitary standpoint.

No Help to Offset U.S. Box Subsidy

KELOWNA—The British Columbia fruit industry will again be seriously handicapped in its efforts to market its fruit this year as it will again face the insurmountable U.S. subsidy in off-shore markets. The subsidy of 50 per cent of the sales price up to \$1.25 per bushel on all apples exported from that country has again been granted the U.S. apple industry. The off-shore subsidy during the past three years has made it impossible for B.C. apples to compete in export markets and as a result the Canadian industry has been crowded out of many foreign markets which had previously absorbed a considerable volume of the B.C. production.

For the first time, the U.S. department of agriculture has announced the granting of the subsidy before the harvesting season. This action has been greeted with cheers by U.S. shippers. The specialists in the apple export field in the United States anticipate they will sell a greater volume overseas this year.

Meanwhile the Canadian industry is faced with the prospect of once again having to "go it alone" without any assistance from governmental sources.

Okanagan fruit officials recently discussed the matter with the trade and commerce department in Ottawa and were given a flat "no subsidy" as an answer.

Ottawa for some time now has adopted the general attitude of discouraging subsidies on agricultural products. And, in view of this general policy, federal departments are naturally reluctant to commence any new subsidization.

Moreover there is a general feeling in Ottawa that in view of the increasing food prices, it would be difficult to justify to the Canadian

Many Local Men on BCFGA Valley-Wide Committee Setup

Committee setup of the BCFGA was revised in some instances during the summer months, a complete list of committees for 1951-52 has now been released. A number of Summerland growers and shippers are included in the committees, and include the following:

C. J. Bleasdale is a member of the tariff committee under L. R. Stephens, chairman.

W. B. Powell belongs to the pear growers' committee under the chairmanship of Tom Wilkinson.

C. H. Elsey is a shippers' representative on the better fruit committee which is chaired by A. K. Loyd. H. J. Barkwill is one of the BCFGA representatives, while from the experimental station are Dr. R. C. Palmer, Dr. D. V. Fisher and Dr. J. C. Wilcox. Eric Tait is a member of the grades committee, under the chairmanship of A. K. Loyd.

J. M. Kosty of Vernon is chairman of the Armstrong Fair and on his committee are W. F. Ward and E. C. Bingham of Summerland.

Mr. Loyd is also convenor of the pooling committee, which is divided into soft fruit and apple divisions.

COUNCIL PAYS FOR SIX CHICKENS KILLED

Two large Labrador-type dogs, one black and the other fawn-colored, were responsible for the killing of six chickens about 3 a.m. August 24, E. E. Bates reported to council last week. Mr. Bates placed a value of \$2.50 per chicken on these birds and council agreed this would be an acceptable price. RCMP reported that they had investigated the complaint.

housewife any action which would involve shipping Canadian foodstuffs out of the country with government financial assistance.

An export subsidy might be misinterpreted as a move to reduce available domestic supplies with a view to keeping domestic prices at a higher level than necessary.

More Equitable Structure for Financing Education is Sought

"It is apparent that the government of British Columbia either knows of no alternative or has given no thought to finding an alternative for paying the cost of education by means of a property tax. We must therefore unite together and make a common demand to the cabinet that a committee made up of laymen, taxation experts, and educators be immediately set up to survey the injustices of the present land tax, investigate systems of education employed in other countries and devise for B.C. a new and more equitable finance structure for education."

These were the sentiments expressed by the 100 representatives of city councils, municipal councils and farm organizations from all parts of B.C. who attended the meeting sponsored by the B.C. Federation of Agriculture held on Saturday afternoon, August 25 at the B.C. Vegetable Marketing Board auditorium, Vancouver.

"We do not want another Cameron or Goldenberg commission but a committee that will include a representative of agriculture and the municipal councils that will clean the matter up in months instead of years," stated delegates.

On Chairman Alex Mercer's suggestion the meeting was opened by a presentation of the "Farmer's Case." It was first impressed on the meeting that the farmers expected to pay their share of the cost of education but that it should only be their fair share.

They dealt with the increasing school taxes on farm lands, both cost of education which had upped municipal and rural to 300 percent over the past 10 years. Added to this were the inequalities between the dollar taxes paid by farmers and those paid by other industries in all parts of the province. . . these arguments being adequately supported by figures of actual taxes paid.

The variation of assessment between municipality and unorgan-

ized territory and between one municipality and another making it impossible to arrive at a common tax between neighboring farmers farming the same type of land and sending their children to the same school.

"The only fair method of paying for the cost of education must be based on ability to pay" said Chas. E. S. Walls, secretary-manager of the B.C. Federation of Agriculture in quoting to the meeting that wages and salaries in Canada in 1950 were up six percent while the net farm income was down 12 percent and that while since 1948 the value of all other basic industries in B.C. was up 10 percent the net value of agricultural products in B.C. was down 10 percent.

Representatives of some 20 municipal councils then outlined their problems showing that as fast as the government found a temporary solution to one education cost problem it created an injustice elsewhere and that what was now needed was an entirely new educational structure.

The majority of these briefs it had presented to the government last year outlining the injustices prevalent in each district of the province and expressed their regret that the Union of B.C. municipalities had not got actively behind the Federation of Agriculture in its presentation.

Reeve Thompson of the district of Salmon Arm gave a comprehensive survey of the situation in School District No. 20 where they have been advised that the schools will be closed to their children until January 1952 because his council had struck its mill rate based on a figure set by the Board of Arbitrators and although a greater sum was required by the trustees their district council was in the position that no more moneys could be raised by taxation this year. The meeting therefore passed unanimously the following resolution that the fullest pressure be brought to bear on the government demanding that they live up to their responsibility in this matter and have the schools made available to the children of the district of Salmon Arm.

We Urge You — Now That The School Term Is About To Start — To Drive Carefully Wherever Children May Be expected . . . If There Is Any Doubt About Your Brakes We Suggest That You Allow Our Reliable Mechanics To Check Them At Once.

High School Graduates!

become
Commissioned Officers
in the
Canadian Army Active Force
Armour • Artillery • Infantry

Young men recently graduated from High School with a minimum educational standard of Junior Matriculation, may become officers in the Canadian Army Active Force.

If accepted you begin training at Camp Borden as an officer cadet to qualify as a Second Lieutenant in the Active Force. You will receive Second Lieutenant's pay while in training. This training will consist of three courses totalling a period of twenty-eight weeks. When you are granted a commission you will then serve for periods of 3, 4 or 5 years as you choose under the Short Service Commission Plan. At the end of this service you may apply for a permanent commission.

This is a chance to serve Canada at a time when defence stands as a most important national concern. The training and experience in leadership will be invaluable assets to any young man throughout his whole life.

TO QUALIFY YOU MUST BE:

- Single
- Physically Fit
- Between 18 and 25 years of age
- A Junior Matriculation Graduate

APPLY TODAY in person or by writing to:

No. 11 Personnel Depot, 4050 West 4th Avenue, Vancouver, B.C.
Army Recruiting Centre,
RCSA (CST & AA), Work Point Barracks, Esquimalt, B.C.

Trained United Strength is needed to prevent Aggression!

Highway Work Will Benefit from Sale of BC Bonds in New York

The province has successfully arranged with a group of New York dealers to sell an issue of \$35,000,000 of British Columbia bonds, it has been announced jointly by Premier Byron I. Johnson and Hon. Herbert Anscomb, minister of finance.

Of the \$35,000,000, \$6,000,000 are 3% sinking fund debentures maturing in 1955, \$1,500,000 are 3% debentures maturing in 1956, with a similar amount maturing in 1957. The remaining \$26,000,000 are 26-year 3 1/2% sinking fund debentures redeemable at any time after 1961.

These bonds are payable in New York and in terms of Canadian dollars the effective rate of interest averages 2.28% on the 3% securities and 3.45% on the 3 1/2% long term bonds.

Under present market conditions, the price secured was considered most satisfactory and a reflection of the high credit standing of the province in world money markets. The domestic market could not have absorbed such a large sum on anything like as favorable a basis, nor is it likely a term of 25 years, a period more in line with the life of capital projects, could have been obtained. The demand for short-term paper in Canada is negligible and the market was not receptive to an offering of this size for the 3% securities.

Of the net proceeds of the issue, \$26,320,000 will go for the retirement of treasury bills owing The Canadian Bank of Commerce, while the balance will be used for highway development.

C. N. E. Bank Display Teaches New Family-Financing Plan — Bank of Montreal men and women answer personal financing and banking questions of visitors to their booth in the Canadian National Exhibition, in Toronto. The first bank display ever set up at the C.N.E., the B of M booth last year attracted more than a quarter-of-a-million visitors and supplied information on Personal Planning to 27,000 of them. More than 5,000 people sat down with the bank's personnel to discuss their financial affairs and banking problems. Since the introduction of Personal Planning at that time, over 100,000 persons have individually sought information on this new money-management system. The experience of many of them indicates its unique effectiveness in meeting the high cost of living.

Families Could Save Money, Have Healthier Children, if More Care Taken in Daily Diet

Everyone is concerned about the high cost of food, but results of a study, conducted during the past 2 years, of foods eaten by 4,000 children in British Columbia, indicate that many families are not getting the most food value for their money, states the health branch of the provincial department of health and welfare.

If parents selected foods more wisely they could provide their families with more healthful food at less cost than their present meals. If a smaller proportion of family income were spent on soft drinks, candy, rich cakes and pastries, jam and expensive forms of common foods such as ready-cooked cereals, vegetables and meat, and a greater proportion spent on milk, uncooked cereals, meat alternates (cheese, fish, eggs, beans and peanut butter) it would be possible to supply the family with the foods they need—particularly milk, vitamin D and foods rich in Vitamin C.

Such a change should, at the same time, decrease the amount of money spent on food. Among the children reporting, it was found that:

Only 4 out of every 10 drink one pint or more of milk each day.

Only 1 out of every 10 received a daily source of Vitamin D such as fish liver oil or a concentrate.

Only 4 out of 10 eat foods rich in Vitamin C such as tomatoes or juice, vitaminized apple juice, raw cabbage or citrus fruits, each day.

Meat, potatoes and bread were eaten daily in adequate amounts by most children.

Almost every child ate liberal quantities of cake, cookies, bread and jam or desserts.

Many children bought candy or soft drinks each day.

Milk: Medical authorities agree that milk is the only rich source of calcium—necessary for good bone development. Since it provides other substances required for growth and health, it is a comparatively economical food, the most economical source of milk at the present time is powdered skim milk, which is useful for baking and is readily mixed to a fluid form.

Vitamin D: All growing children need Vitamin D each day in conjunction with milk to ensure normal growth and bone development. An adequate amount of Vitamin D may be obtained for 10 a day in the form of fish liver oil or a Vitamin D concentrate.

Foods Rich in Vitamin C: Children need Vitamin C, along with calcium and Vitamin D, to build strong bones and teeth and for good general health. Since Vitamin C is easily lost in cooking, it is advisable to eat each day some raw foods that are good sources. The most economical sources in this province are raw cabbage, vitaminized apple juice and canned tomatoes. Other food sources are citrus fruits and fresh berries.

The fact that many children eat excessive amounts of sweet foods was noted from their food records. The indiscriminate use of sweet

foods such as candy, soft drinks, cake and jam is of concern for several reasons.

Scientific studies indicate that eating too much sweet food makes conditions favorable for tooth decay; sweet foods dull the appetite and children may not eat enough of the more valuable foods if they are allowed these foods between meals; sweet foods contain mostly calories and are not cheap when food value is considered.

The food studies give a general province-wide picture, since school children in 14 districts of the province; including schools in the Kootenays, Fraser Valley, Northern B.C., Vancouver and Vancouver Island kept a record of all the foods they ate for a three-day period.

The food studies, planned locally by public health nurses and teachers as a classroom project in health, (the majority in Grade 5 to 8) were carried out to ascertain food habits that were common to the school children in each area. There was a striking similarity in the kinds of food eaten by children in every area studied. Department of health nutrition consultants who analyzed the records found that the low consumption of milk, Vitamin D, and foods rich in Vitamin C was common to every district.

For best results, efforts to improve food habits must be concentrated on four specific objectives, for every child each day:

1. At least one pint of milk;
2. A source of Vitamin D, such as fish liver oil or a concentrated preparation;
3. A serving of foods rich in Vitamin C, such as vitaminized apple juice or raw cabbage or tomatoes or citrus fruit;
4. Decreased consumption of sweet foods.

In all areas where studies have been made, public health nurses and teachers are co-operating to improve food habits by giving special emphasis to these four objectives. Rat-feeding experiments have been carried out in several schools to illustrate the effect of good and poor diets on appearance, disposition and growth. These experiments have been found very effective in developing children's interest in their own food habits.

Disturbed to Find No Zoning In Municipality

G. E. Baynes, new owner of the Dutton property at Trout Creek, is disturbed to find there are no controls on zoning in Summerland municipality.

He informed municipal council by letter last week that he has heard rumors of an auto court being established on the lakeshore at Trout Creek and he considered that residential property owners should have some protection.

Asked about the zoning bylaw, which has been waiting action for nearly two years in the municipal office, Municipal Clerk Gordon Smith replied that his extra time is completely taken up right now with preparation for financing the proposed municipal hall.

When those details are completed then he will have time to tackle the zoning bylaw, he inferred.

Mr. Baynes also spoke of the large slough on his property which council termed a continuation of the Powell Beach slough. Mr. Baynes offered co-operation if the council planned any large-scale filling deal to clear up this trouble.

Reeve Bentley's suggestion that a recommendation be passed on to the parks board that some filling of the Powell Beach slough be undertaken each year was approved by council.

However, no large scale fill is planned for the immediate future, the parks board having spent some money on this work already this year.

TOURIST TRAVEL IS STILL ON INCREASE

Recreational travel in British Columbia continued its upward trend during July with an advance of five percent over the same month last year, reports Hon. Leslie H. Eyres, minister of trade and industry.

Establishing a new record for

any July the number of foreign vehicles entering the province through customs ports on traveller's vehicle permits climbed to 45,170 as against 42,809 in 1950.

An increase of 14 percent was reported on the seven-month total for this year with 134,250 foreign vehicles entering the province on traveller's vehicle permits.

You want a truck that has plenty of heft for the pay load—but the right kind of power is the clincher.

That's why so many truckers turn to GMC for swift performers that can pack home the pay load.

For in these broad-shouldered carriers—chassis and engine are yoked together to form a perfect team for hauling, a team that's built for keeps!

The result is a great line of trucks—from nimble 1/2-tonners up to brawny Diesels with two-cycle efficiency, with horsepower unsurpassed in their class, that

has made them the talk of the country's truck men.

That's why—whether your cargo is compact or bulky, liquid or solid, grain or cement—if you load it on a GMC, you deliver it faster at less cost per mile!

As your GMC dealer, we can give you the long-time benefits of the right combination of axle, engine, transmission and frame for the loads you have to work—skillfully engineered by the world's largest exclusive manufacturer of commercial vehicles.

Red Sox Blast Three Beavers To Take Decisive 17-6 Win; Play Kelowna Chiefs Sunday

Summerland Red Sox blasted three Penticton Beavers pitchers for thirteen hits to mark up a decisive 17-6 victory over the south-erners at King's park on Sunday to advance to the finals of the South Okanagan junior league.

As a result, the Red Sox travel to Kelowna where they will meet the Chiefs in the first game of a best of three series next Sunday.

Red Sox dropped the first game to Beavers 11-2, won the second, 13-5 and made certain of a final spot by last Sunday's decisive victory.

Jordan was in trouble from the start and lasted until the seventh; Getz took over but couldn't put out the fire so he stepped out in favor of Tomlin, who retired the Red Sox after six runs had come across.

Sox Took Early Lead

Red Sox took the bit in their teeth from the first frame when Pohlmann, Cristante and Eyre romped across to give the Summerland boys a 3-0 edge. Desilet made it 4-0 in the second when he doubled, scoring on Pohlmann's single.

Another four runs came across for the Red Sox in the third, Eyre cleaning house with a smart double.

Beavers got to Ken Brawner for the first scores in the last of the third, Garnett's double and two miscues being responsible.

Hooker and Brawner came across in the fourth while in the same frame Jordan singled and came home on a series of bad plays, leaving Red Sox out in front 10-3. Aikin added one in the sixth which Fraser duplicated.

Then came the seventh and it took three Penticton hurlers

to stem the rising Red Sox tide, Hooker's triple being responsible for three tallies and putting the finishing touches on the Beavers.

Beavers tried to come back in the ninth and did score two runs but it was a matter of too little and too late by that time.

KELOWNA WINS SOFTBALL

CROWN FOR PROVINCE

Kelowna Aces won the B.C. girls' senior B softball crown by defeating Richard & Farish of Vancouver 10-6 and 6-2 in the best of three finals at the Orchard City last weekend. In a third game, Kelowna again won 5-4.

Merchants Extend CYO In Tourney

Two extra innings were needed on Sunday before Summerland Merchants had to bow to Kamloops CYO in the first round of the big ball tourney at the mainline city last weekend. First prize was \$600 and total prize money \$1,800.

The CYO team won 6-4, blasting in two runs in the ninth frame of what was billed as a 7-inning affair. Two home runs by Tony Brummet, well-known Rutland catcher who has been playing for Vernon Canadians all year, loomed large in the overall picture.

Ten Strikeouts for Jacobs Hits were evenly divided, each squad getting 10, while Jacobs showed to better advantage than he has done all season, whiffing ten at the plate by the strikeout method. But he issued five passes to first which kept fielders on edge.

Hlady was winning CYO pitcher, with eight strikeouts and only one base on balls.

Les Brown singled to open the second inning and was scored by Kamminishi, the latter coming home on Sandy Jomori's miscue, to give CYO a 2-0 lead.

Merchants came right back when George Taylor singled to left field, went to second on Hlady's error on Metcalfe's grounder, was sent to third on Jomori's sacrifice and home on Brawner's hit. Daryl Weitzel's single scored Metcalfe to knot the count at 2-all.

Again Kamloops went ahead in the fourth when Hornsby walked and was singled home by Hlady. But Merchants came back in the same frame to tie it up again. Brawner singled to centre, scoring on Kuroda's clout to left field. CYO went ahead again in the fifth when Brummet banged out his first circuit clout.

Merchants and their supporters, who included many Kamloops spectators, nearly tore the stands down in the fifth when Brawner was called out at first while two Merchants were crossing the home plate on an infield play.

It was this close decision, which the majority of fans believed went the wrong way, which proved the turning point in the contest as it was the third out of the inning and neither runs could count.

Tied Score in Seventh

In the seventh, with their backs to the wall, Merchants staged another uprising when Taylor and Metcalfe got on board. Wall Day went in as a pinch-hitter, socking

the horsehide to left field to score Taylor, and knotting the ball game at 4-all.

Going into the ninth, Brummet socked out his second homer to win the game. Hornsby hit a double and was scored when Clovechuck's grounder was muffed by Brawner. Hlady retired the Merchants in order to win the game.

Daryl Weitzel, Brawner and Taylor were the chief batters, while Brummet, Brown and Clovechuck proved strongest with the hickory for the winners.

SHATFORD CUP ON BLOCK THIS WEEKEND

For three years Fred Dunsdon has held the Shatford cup, emblematic of the grand aggregate winner at the final shoot each season of the Summerland Rifle Club.

Next Sunday, the Shatford cup will be on the block as the Garnet Valley range sees the final shoot of the season. All members are going to "do their darndest" to take the trophy away from the three-year winner.

Last Sunday Ted Dunsdon shot a brilliant 100 to beat all comers.

Gordon Finch is Pollock Trophy Trap Winner

Gordon Finch, Kelowna, member of the Summerland and Kelowna trap clubs, won the Frank Pollock high 100 trophy at the Interior Championships trap shoot at Vernon on Labor Day.

He shot off with Paul Revard of Vernon and edged him out but the northern man captured the doubles and the grand aggregate Desimone cup.

Lumby, with a high score of 116, won the ancient team trophy just edging out the Kelowna squad. Summerland's team was off with a total of 104. The Summerland club shooters were A. R. (Sandy) Munn, Dr. L. A. Day, Frank Pollock, Phil LeBrun and Bill Laidlaw. Tom Nelson also participated in the big day.

The Interior Championships were conducted by the Lumby Trap club on the Vernon club grounds.

Fred Campbell, another well known Kelowna marksman, won the miss and out competition.

McIndoe and Mulholland were winners of the Buddy shoot.

Fishing NOTES

(By Bert Berry)

Okanagan Lake—Much better this week. Lots of fish, though not too big, mostly from 1 to 2 pounds. The biggest I heard of was caught by Mr. Rothwell and weighed five pounds.

Silver Lake—Good fishing yet, but road worse than before.

Headwaters Fishing Camp—Fishing good and exceptionally good at Crescent Lake where some really big ones have come out.

Glen Lake—Still going well despite heavy fishing.

Fish Lake Camp—Lakes above Fish Lake are consistently good. Fish Lake itself should be coming back for the rest of the month, and will then be closed on September 30.

Teepee Lakes—One party from town in over the weekend found not too many fish but had good fishing, biggest weighing 2 1/2 pounds dressed.

Hunting News

The general hunting outlook is better this year as far as blues and willows are concerned. Pheasants won't be any worse than last year. There are a few local ducks but these should be filled in by northerners later in the year.

Deer will be anybody's guess. They should not be any worse than last year.

See page 10 for more details on open seasons prevailing on ducks, geese, moose, deer and grouse.

Special Notice to Employers AND Those Enlisting in Armed Forces

By The Veterans Benefit Act, 1951, passed at the last session of Parliament, the Government of Canada has extended and made applicable the provisions of the Reinstatement in Civil Employment Act, 1946, to all persons enlisting in the Regular Forces of Canada after July 5, 1950, (nineteen fifty) and who serve therein for a term not exceeding three years.

This provision extends also to members of the Special Force who re-engage for service with the Regular Forces, the three-year coverage period beginning with the date of re-engagement.

This provision extends also to members of the Reserve Forces who after July 5, 1950, are called out for service with the Regular Forces and serve with the Regular Forces for a period not exceeding three years.

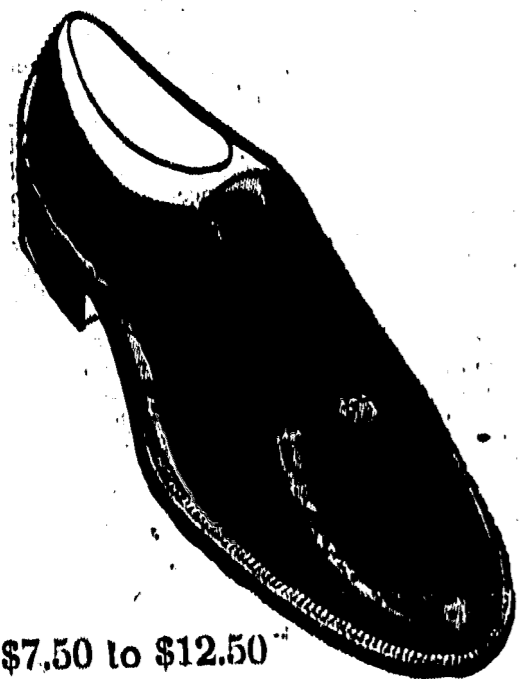

By an Order in Council passed in 1950 under the Canada Forces Act the provisions of the Reinstatement in Civil Employment Act, 1946, were extended to members of the Special Force and members of the Reserve Forces who serve on the strength of the Special Force. The reinstatement provisions of this Order in Council have now been incorporated in the provisions of the Veterans Benefit Act, 1951.

Under the Reinstatement in Civil Employment Act a discharged person may claim reinstatement either verbally or in writing, usually within three months of discharge in Canada or four months if discharged overseas. There is provision for extension of this time when through a condition of health the employee cannot return to his employment this soon, but the employer must be notified in three or four months, as the case may be, and a Reinstatement Officer should be consulted.

REINSTATEMENT OFFICERS ARE LOCATED IN LOCAL OFFICES OF THE NATIONAL EMPLOYMENT SERVICE

Open Season Announced for Fall Shooting

Open season for ducks, geese and coots has been announced by the minister of resources and development, Ottawa, as from October 1 to November 29 in the Salmon Arm, North and South Okanagan and Similkameen district, besides Grand Forks-Greenwood, Nelson-Creston, Kaslo-Slocan, Rossland-Trail, Revelstoke and Yale electoral districts.

Hours of shooting are from one-half hour before sunrise to one-half hour after sunset, Pacific Standard Time.

No person shall build before the day immediately preceding the first day of the open season a blind that can be used in hunting migratory

birds. Eight ducks and five geese may be bagged daily, with the season limit 100 ducks and 25 geese. No person can have more than 16 ducks or 10 geese in their possession at any time.

It is against the law to hunt migratory birds with a rifle or with a shotgun containing more than three cartridges at one time, with a shotgun loaded with a single bullet or with a tracer shot shell.

The season on deer opens September 15 and will continue to November 30, it is understood. Limit is one buck.

Caribou and moose season in the Cariboo country is from September 15 to October 31, while north of Prince George the season has already opened, it is understood.

Blues and Willow grouse are quite plentiful, and are thought to be at the top of their cycle. Season is September 15 to October 15, with bag limit daily of eight of both kinds or six of one kind.

It is not known when any decision will be made on pheasants, as the game department is hoping to receive more information from its scientific research before making any definite statements.

Rains Cause Power Stoppage But Bombs Broke Some Poles

Although reports in coast dailies indicated that power stoppage which inconvenienced southern Okanagan last week was caused by bombs placed against electrical poles, it has now been revealed that the heavy rain of Monday, August

27, was really the cause of the break.

When power supply was not available and it could not be determined how long a time lapse would occur, a switchover to B.C. Power Commission lines served from Watshan was made.

If the tieup between the two companies' services had not been possible, an eleven-hour blackout would have resulted.

Five transmission poles of the West Kootenay system near Grand Forks had been bombed early Sunday morning, August 26, but this was not the cause of the power failure, according to authentic reports from Grand Forks.

The bombs were of the "usual type" used by Sons of Freedom in their blastings. The poles were on Hardy Mt. just west of Grand Forks city.

The poles were broken off a few feet above the ground and hung by the strength of the wires. At one place the wires were within a foot or so of touching the ground and had they done so the entire area would have been blacked out.

The explosions were heard clearly in Grand Forks. A sixth bomb failed to go off, the fuse petering out before reaching the bomb.

On Monday, Aug. 27, four more bombs were found attached to transmission poles on Fourth of July creek.

About the power failure on Tuesday, the Grand Forks Gazette states:

Grand Forks and points west of here on the West Kootenay Light and Power lines had a power blackout on Tuesday morning as the result of the heavy rain Monday night.

About midnight the first power failure occurred when an insulator which was cracked gave out and the power was interrupted. The insulator was on one of the transmission lines just east of the city and when it blew the whole valley was lighted with an intense flare. Service was resumed for a while and later in the night another blackout occurred which lasted until noon Tuesday. The power was off for nearly eight hours.

The second break was caused it is believed, also by damage to insulators in the Sheep Creek area on poles which may have been damaged by the recent forest fires.

It was several hours before linemen working from both the Rossland end and the Grand Forks end came to the break in the line. Continuous heavy rain made repair work on the high voltage lines difficult, but crewmen worked until service was restored just after midday.

Government to Hold Special Session on Old Age Pensions.

A special session of the legislature has been called by the government for November 6 to deal solely with matters appertaining to old age pensions, it was announced by Premier Byron I. Johnson. On January 1, 1952, all persons 70 years of age and over will be entitled to \$40 per month pension without a means test and irrespective of need.

Likewise, effective January 1, Federal legislation will enable the various provinces to introduce old age pensions for persons between the ages of 65 and 69 years inclusive, if they so desire. It is to deal more particularly with this latter phase of this scheme that the legislature will be convened.

Reeve Wants Action on Outages

The great inconvenience which is caused the South Okanagan due to power shutdowns and the need for extra precautions being taken to ensure continuance of power supply, was pointed out to Attorney-General Gordon S. Wismer in a wire despatched to Victoria on Thursday last by Reeve C. E. Bentley.

Mr. Wismer has replied that an investigation is being conducted and the A/G's department is working closely with the RCMP in attempting to prevent any further occurrences.

Last week's power failure was not caused by the dynamiting of power line poles, it is now understood, but that was just in the nature of a "lucky break" and not the fault of the saboteurs who dynamited some poles the weekend of August 25.

In his wire to Attorney-General Wismer, Reeve Bentley declared: "Great inconvenience has been caused by the dynamiting of the power lines of the West Kootenay Power & Light Co. in the Grand Forks area by saboteurs during the last few days. Any recurrence of this will cause complete shutdown of the power in the South Okanagan and Similkameen districts and great loss to the fruit canneries, packinghouses and sawmills."

"Suggest you make immediate investigation and take strong action."

In his reply the A/G declared: "I am very much concerned over the dynamiting of the power lines and an investigation has been under way ever since the occurrence."

"I am in close touch with the RCMP in connection with the matter and am taking all measures possible under provincial jurisdiction."

Municipalities Send Resolution to UBCM From Oliver Meeting

Suggestion from Kamloops that the municipalities should agree to return their portion of the SS & MA tax in favor of a set mill rate for educational costs did not find favor with the Okanagan Valley Municipal Assn. meeting in Oliver last Thursday.

It was stated last week that Reeve C. E. Bentley and Councillor Norman Holmes, two local delegates to the meeting, had expressed disapproval of the plan.

As a consequence the resolution was withdrawn in favor of the B.C. Federation of Agriculture request that a committee be set up to seek a revised form of meeting educational expenditures.

This resolution will be sent to the UBCM for further discussion at the annual convention in Harrison Hot Springs before any decision is reached.

Lord Mayor of London Officially Opens New Douglas Building

The new government administrative building in Victoria was officially opened on Friday, August 31, by the Right Honorable the Lord Mayor of London, Sir Dency Lowson.

Premier Byron Johnson introduced the Lord Mayor who, after a few appropriate remarks, unlocked the door to the new building which has been named the Douglas Building to commemorate the name of Sir James Douglas who in 1943 established Fort Victoria and became governor of the colony of Vancouver Island and later of the United Colonies of British Columbia.

The ceremony was replete with pomp and circumstance. The Lord Mayor, his two sheriffs, swordbearer and two footmen arrived for the function in ceremonial apparel and jewels of office, all of which are of great antiquity.

New Pastor for Free Methodists

Rev. C. E. Coxson, pastor of the Free Methodist church in West Summerland, will preach his farewell service at the local church this Sunday.

As soon as clearances can be arranged, Rev. Mr. Coxson and his family will be leaving the district for Sargent, Nebraska.

His place in Summerland will be taken by Rev. G. Schnell, who comes here from Alix, Alberta, not only to be pastor of the local church but to be supervisor of the interior district from the mainline to the border and west to Hope. Rev. Mr. Schnell will be accompanied by his wife and three daughters.

BRUINS INTERIOR CHAMPS

Kelowna Bruins defeated Kamloops Klippers 9-5 in the sixth and final game of the Interior box lacrosse championships, taking four games to two.

RECIPE HINTS

Tasty meat patties, a hearty stew, and a Sunday pot roast, all from one cut of meat, give three different and delicious meals.

Sausage Burgers
Cut one pound of large sausages into half-inch slices, brown slowly on both sides in hot fat. Now cut thin slices of Bermuda onion and tomatoes, or use sliced onions browned slightly in hot fat. Split buns, toast and butter. Serve hot sausage slices between bun halves and top with onion slices and tomatoes. Or, if you prefer, use pickle relish in place of the onions. Serves 6.

Three-Way-Roast
Use a piece of pot roast thicker than usual, and cut a boneless piece from the round end of the roast, to use for stew meat. From the centre, cut a chunky pot roast with the round bone included. For the third meal to get from the piece, grind the boneless piece left and use for patties. These three beef dinners (stew, pot roast and meat patties) can be served on three consecutive nights, or you can alternate with fish or other types of meat, if you prefer.

"Savings play a vital part in the battle against inflation"

... says Emerson Creed, Financial Editor, The London Free Press

"Can inflation be checked? "Every one of us is concerned with the answer to this vital question. Today's all-time high costs of goods and services affect the living standards of people in all walks of life; and those living on fixed incomes are especially hard hit.

"In addition to weakening our economy, inflation threatens our defence programme.

"Therefore every method of controlling rising prices must be applied with vigour.

"Government measures such as increased taxes, credit restrictions and reduced non-defence spending are necessary, if unpopular. Of course, business and industry must co-operate—especially by increasing productivity. The average man might feel that any control he alone can exert is insignificant. But the individual can and should help by doing his utmost to save money.

"Every dollar he saves—through bank deposits, savings bonds or life insurance—plays a part in helping to stem the tide of inflation. And at the same time, it brings the saver important personal benefits.

"These benefits need no reviewing. But it may be pointed out that nothing has changed their importance even though there are many demands and temptations to use income for other purposes. Nor has anything supplanted saving as the one method most people have of obtaining many of the things they want and need most.

"All in all, there are more reasons for personal savings today than ever before."

Remember—in your savings plan, life insurance needs a special need. In no other way can you combine savings with financial protection for your loved ones.

Absenteeism in High School Deplored by Inspector, School Board

Absenteeism in the Summerland high school is causing major concern to educators, members of School District No. 77 (Summerland) board of school trustees heard from Inspector A. S. Matheson on Monday evening.

Legion is Annoyed At Delay

Summerland Canadian Legion is not "happy" about delay on a "high level" regarding formation of Canadian Ranger units in B.C.

This was made clear at the monthly meeting of Summerland Branch No. 22 held last night in the Legion hall.

Correspondence was read from Lt.-Col. T. A. H. Taylor, who was called out of retirement to organize Canadian Rangers units throughout the province, declaring that there would be some delay in going ahead with organization plans.

No explanation for the delay was forthcoming from Col. Taylor and the Legion executive feels that army brass should be acquainted with Legion views that such delays are not in the interests of the movement.

In July, a public meeting called by the Legion named D. L. Sanborn as company commander after being unanimous in the opinion that a Ranger company should be formed in Summerland area.

Legionnaires last night decided to introduce this topic at Sunday's Legion zone sessions which are being held in Summerland. Local Legion officials will ask the zone to press for more action on the Ranger company formation.

One other important subject for the zone council meeting Sunday is the special brief prepared by Dominion Command President Watts of Vancouver dealing with the need for an increase in pensions for veterans and their dependents.

The zone session will, in all probability, decide on a course of action best suited for the promotion of President Watts views and the urging of action on the part of the next session of parliament.

Crosswalks are Discussed by Local Council

"What is your opinion of crosswalks?" queried Councillor F. M. Stewart at Tuesday afternoon's council session with particular reference to a recent "Letter to the Editor" advocating their painting at two principal corners on Granville street.

"I think they're worthwhile but it is difficult to get people to use them," was Reeve C. E. Bentley's reply.

This brought on a further discussion of signs in general.

It was stated that the municipal road crew would be shortly employed in sign painting.

Municipal Clerk Gordon Smith remarked that the present traffic signs need repainting on the sidewalks.

The "No Parking" signs to bar vehicles from parking on the near side of the roads fronting school property are to be erected shortly.

Walks across the highway from the schools at the corner of Jubilee and Rosedale are to be marked, while zig-zag lines on the roads are also to be laid down.

It was pointed out that Mel Cousins was authorized, according to a council minute of March 13, to paint four school signs and maintain them for a year.

Reeve C. E. Bentley wanted more 30 miles per hour warning signs on Giant's Head road but rest of council did not agree.

subject to the approval of the legislature, when the scheme comes into effect on January 1, 1952.

The special session of the British Columbia legislature called for November 8 has been put forward to October 22 also states Premier Byron I. Johnson.

The change in date has been made to meet the convenience of the members of the legislature who will be in Victoria for the visit of Their Royal Highnesses Princess Elizabeth and Prince Philip.

Mr. Matheson intimated that he was quite aware of the economic needs of the Okanagan and that in many instances students are needed in the orchards to harvest the crop.

Absenteeism in the early fall arose during the war years when manpower was scarce and has been taken advantage of ever since, it was suggested.

"We lost 40 to 50 days of schooling last year and we can't carry it," he insisted. "One hundred and ninety days are all too few for the job we have to do."

Although the situation doesn't occur here, in other valley points pupils are going to packinghouses from 4:30 or 5 o'clock each evening and working through until 11 o'clock. They are not fit for school duties the next day, the board was told.

It was pointed out that absent students here are mainly working in the orchards and very few are employed in the packing or canning plants.

"We will have to take more strenuous action than this before long", was Mr. Matheson's contention, if appeals of the school board do not obtain action in having students return to their studies at once.

In Summerland there are forty students who have signified their intention of returning to the local high school but have not turned up for classes yet, the meeting was told.

"It is certainly disrupting our schools", was Chairman C. J. Bleasdale's opinion and other board members concurred that the situation is a serious one.

"The part I deplore is that pupils who attend regularly are suffering as well as the absent student," J. Y. Towgood opined, pointing out that the situation is bad for morale for both teacher and pupil alike.

The school board agreed to send a personal letter to parents of all students who have enrolled but who are still absent from high school, seeking their co-operation in having students return as soon as possible.

A resolution deploring the present absenteeism on the part of high school students, was adopted by the board urging "all parents to make every endeavor in the interests of their own children and for the efficiency of the classes to which they belong to have their children join their classes immediately and maintain regular attendance at all times."

TWO LOCAL MEMBERS HONORED

"A A Day" for W. I. as B.C. President Makes Awards

Yesterday was AA-Day for the Summerland Women's Institute. In this instance, AA-Day stood for Achievement Attainment Day for two members of the local Institute were signally honored with presentations made by Mrs. J. H. East, Kereamas, president of the provincial Women's Institute. The pleasing presentations were made at the first fall session of the W. I., held in the parish hall following a delightful luncheon.

Mrs. H. R. McLarty and Mrs. C. Orr were the two members signally honored by the provincial president.

Mrs. McLarty won the Dominion Women's Institute biennial prize, the Tweedsmuir Challenge Cup for her essay on "Democracy Begins With You". Mrs. Orr won first prize among British Columbia W.I.'s in the Tweedsmuir competition for her delightful hooked rug. This rug also won first prize in its class at the PNE last month.

The cup was given to Mrs. East when she attended a meeting of the federated board of the Canadian Institute in Quebec this summer to bring back to the province which she represented.

Judges Were Unanimous
Mrs. East told the meeting that the cup award is well merited and that there was no dissenting voice in regard to the decision of the judges. The title of the essay is in essence "Love Thy Neighbor" and she felt that it was an ideal to be practiced by every Institute member, and if done might ease

some of the ills of the world.

Continuing, she stated: "I talked to one of the judges, and he said that if the essay had contained nothing more than its last paragraph it would have been outstanding".

Then she read this part of the essay which is as follows: "Like a great river bearing the secret of single drops from mountain solitudes, democracy's tide

The Summerland Review

Vol. 6, No. 37

West Summerland, B.C., Thursday, September 13, 1951

Reporters and photographers surrounded U.S. Secretary of State Dean Acheson and John Foster Dulles, ambassador at large and principal architect of the treaty, as they arrived at San Francisco recently to

commence treaty negotiations. The Japanese treaty was signed on Saturday morning after the conference refused bluntly to consider revision recommendations by Russia and her satellites.

Reeve Congratulates The Review on Trophy Win

On behalf of the municipal council, Reeve C. E. Bentley extended congratulations to The Summerland Review editor at Tuesday's council session, on the acquisition by this newspaper recently of the Hugh Savage Shield, emblematic of the best all-round weekly paper in the under 1000 circulation class in Canada.

"I think you're doing a fine job," His Worship declared in commending the paper for its work in the community.

The Review has received a large number of congratulatory notes from subscribers, fellow weekly publications and many others who have the welfare of Summerland's hometown newspaper at heart.

The shield has been on display for the past ten days in The Review main office window facing Granville street, and for a time was flanked by two beautiful vases of E. H. Bennett's champion gladioli.

WANTS TO REMOVE LOWER TOWN FIRE STATION

D. C. Orr has applied to council for permission to remove the old fire station and contents in lower town for salvage. Reeve C. E. Bentley and Councillor F. M. Stewart, municipal fire committee, have been authorized to deal in this matter but nothing will be done until Fire Chief Ed Gould has reported on the equipment there.

Butler Returns to Sales Agency Governors' Board

L. G. Butler, pioneer member of B.C. Tree Fruits Ltd., has returned to the board of governors at the specific request of the BCFGA executive, it was announced this week by the growers' president, A. R. Garrish of Oliver.

Mr. Butler resigned in July when he believed his views on the conduct of the fruit industry were at variance with those expressed by a number of growers in the central Okanagan area where he resides.

It was following grower meetings held to discuss criticisms of the grower setup levelled by Ivor J. Newman, ex-BCFGA president, that Mr. Butler proffered his resignation.

The central district council of the BCFGA recommended a replacement for Mr. Newman, who had resigned midway through the first meeting of the board of governors that he attended after his nomination last May 31.

Mr. George Day, Rutland grower, brother of Dr. L. A. Day of Summerland, was named to fill Mr. Newman's position on the board.

The central district council, however, declined to name a successor to Mr. Butler and filling the vacancy was left to the board of governors.

Mr. Garrish, who besides being BCFGA president is temporary chairman of the sales agency's board of governors, declared on Tuesday that at the request of the BCFGA executive, Mr. Butler has withdrawn his resignation and has resumed his seat on the board.

"The executive, representing the industry as a whole, and acting in the interests of all the growers, feels that a man of Mr. Butler's experience and ability cannot be spared from the board of governors, with the difficulties and problems that are facing the industry," Mr. Garrish stated.

Graham Kincaid
Commander of the South Okanagan-Similkameen zone of the Canadian Legion, who will preside at the quarterly zone sessions which are to be held in the Legion hall in Summerland Sunday afternoon. A session of the Ladies' Auxiliary zone will be held at the same time.

New Drummer Proves Acquisition to Summerland Band

On the lawn near the Cenotaph at Peachland the Summerland Band staged a concert Sunday afternoon before a fair number of persons. There was a good turnout of band members and the concert was enjoyed by all.

Newest acquisition to the band is Drummer Wilf Corns, son of A. H. Corns, who has come from Vancouver and is now employed at the Sunoka Fruit Products Ltd.

It is expected that "Scotty" Dawson may be returning to Summerland and will be welcomed back by band personnel.

Tentative plans have been made for a variety concert to be staged by the Summerland Band early in November.

KIWANIS CLUB MAKES PLANS

Canned Food for Europe's Kids To be Collected at Matinee

Youngsters in Summerland will have an opportunity to see a Saturday afternoon show and at the same time assist youngsters in far off Europe according to announcement by the Kiwanis Club of Summerland this week.

National Kid's Day is Saturday, September 22, throughout North America and the Club here is joining Kiwanis International and the National Kid's Day Foundation, Inc., in promoting this big day in Summerland.

With the co-operation of Matthew Harrison, proprietor of the Rialto theatre, a special matinee has been arranged for Saturday afternoon, September 22, at the Rialto.

Admission price will be a can of fruit, vegetables, soup or dehydrated food. No glass container can be handled.

These canned goods will be collected by the Kiwanis Club of Summerland and sent to the Vancouver office of CARE for distribution to the needy youngsters of Great

W. F. Ward Wins Major Fruit Prize

W. F. Ward, Summerland fruit grower, and his son Bill captured the two major awards in the tree fruit division of the 1951 Interior Provincial Exhibition at Armstrong yesterday.

The "Armstrong Fair" winds up this evening after a two-day show which is said to have exceeded all other previous attempts.

The Buckerfield's Ltd. silver tray, awarded annually for the best collection of three plates of tree fruit submitted by an individual grower, was captured by Mr. Ward.

His 12-year-old son, Billy, is reported to have captured the J. R. J. Stirling memorial trophy, for tree fruits exhibit by sons or daughters of growers.

These are the two major awards of the tree fruits division and it is the first occasion they have come to Summerland.

A large number of other first prizes were captured by Mr. Ward and two other Summerland exhibitors, E. C. Bingham and G. S. Dixon.

A complete list of Summerland victories in this fruit division will be carried in next week's edition of The Review.

Straith to Open School On Sept. 24

Hon. W. T. Straith, minister of education, will come to Summerland on Monday, September 24, to open the new junior-senior high school, officially.

Word of the minister's acceptance reached Summerland last Friday and local trustees immediately began preparations for the official opening ceremonies.

A luncheon in the home economics room where the trustees can meet the minister and other department representatives has been arranged for noon that day.

At 2 o'clock the official opening ceremonies will commence, invited guests having inspected the building prior to that time.

Inspector A. S. Matheson, Kelowna, Inspector A. Turnbull of Peniticon and Inspector J. N. Burnett, Vancouver, have been invited to participate in opening ceremonies. Others will include W. A. C. Bennett, MLA for South Okanagan, Reeve C. E. Bentley, Principal A. K. Macleod and MacDonald School Principal S. A. MacDonald, a student from the high school and Mrs. J. C. Robson, wife of the first principal of a Summerland high school.

Trustee J. Y. Towgood will not be able to participate in the function as he must be in Vancouver at that time.

It is quite likely that Hon. Mr. Straith may have to fly back to the coast that same afternoon.

Col. F. T. Fairley, deputy minister, has expressed his regret that he will be unable to come here for this function.

POPPY DAY IS SET
Municipal council has agreed to set aside Saturday, November 10 as Poppy Day and will purchase a wreath on behalf of the municipality from the Canadian Legion,

Britain and Europe.
If adults wish to contribute cans of such foodstuffs they will be welcomed at the Rialto that day.

Frank McDonald is chairman of this Kiwanis committee, along with Ed (Hilly) Smith.

This idea is an original one of the local Kiwanis club as it was thought more good would come about from this distribution of foodstuffs than in any other manner.

The idea of National Kid's Day is primarily to assist underprivileged children in each community, but as there are few if any who come under this category in this area, it was thought by Kiwanians that the needy children of war-raged Europe would benefit.

For three weeks, the children of Kiwanis club members will be entertained at the regular weekly dinner sessions of the local club at the Nu-Way Annex. First of the kids came to dinner last Monday and the balance of member's kids will be entertained the next two Monday evenings.

Codling Moth Dangerous to All

Throughout the Okanagan come reports of codling moth being apparent in orchards to a greater degree than for several years.

In fact, it would appear that codling moth is more severe than at any time since the growers commenced using DDT as the main insecticide to battle this greatest of all orchard pests.

Whether the codling moth is becoming slightly immune to the spray or whether the grower, lulled into a false sense of security, has become careless in his orchard operations is not for us to say.

Suffice it to say, however, that all growers must take this situation seriously. Those who knew the grave danger and extremely high cost of combating codling moth five, ten and fifteen years ago shudder to think of such black days descending again on the Okanagan.

Modern scientific methods decreased the incidence of codling moth in this district to a point where it has not been serious in five years. But the danger is still there and every grower must be conscientious in applying his DDT sprays to be certain that the coddler is kept under control.

The danger is greater in the Summerland area than many districts in the Okanagan as there are so many small holdings here which may not be receiving sufficient attention. Just because the owner has only a few trees on his property means nothing to the codling moth.

He'll increase in numbers just as well on a quarter of an acre of fruit trees as on ten acres. It means nothing to him.

Send Them Back to School

Seriousness of the absenteeism situation at our local high school was told in convincing form to the school board this week by Inspector Matheson.

This educator stressed in no uncertain terms the difficulties which face teachers and pupils alike by the non attendance for the first month or two each fall of a high percentage of high school students.

Granted these students may be needed to harvest the rich apple crop in the fall of each year, but the very future of these young people may be endangered because of their absence.

We cannot help but realize the difficulties which are placed in the path of teachers who are asked to instruct half a class and then, a month to two months later, endeavor to repeat these lessons in abbreviated form to the latecomers.

Those pupils who have attended regularly must mark time while their tardy fellows try to assimilate what has gone before in too short a space of time.

Probably what will have to happen if this situation continues, is that the schools will close their doors to students who are not ready to take their places in the classrooms when the new term starts.

Parents would be well advised to consider the school board plea seriously and decide at once to send their youngsters back to school; and see that they continue to attend classes regularly.

What is a Sportsman?

This Saturday hunters will be going into the orchards and the hills in search of the elusive grouse and deer. Others will be going farther afield in search of bigger game.

Wherever the nimrod goes, he or she should be certain that the ordinary common-sense safety rules are applied at all times.

These common-sense rules do not only apply to the handling of firearms with more than the usual caution, but they also apply to use of matches and fires. We have just finished an extremely hazardous, dry summer and the timbered hills still present a forest fire hazard.

The British Columbia Game Regulations pamphlet, issued by the B.C. Game Commission at Victoria, seeks the co-operation of the hunter in preventing forest fires and also adds a note to the hunters about sportsmen. This article, entitled "What is a Sportsman?" was written by Hal M. Harrison for the Pennsylvania Game News and, we believe, should be of keen interest to all readers, hunters or otherwise. We quote the article, as follows:

If you are one of the thousands of persons who do nothing more for conservation than to buy a hunting and fishing licence annually, you are not a sportsman; a hunter or fisherman perhaps, but not a sportsman.

If your interest in hunting and fishing is solely in killing more game and catching more fish, you are not a sportsman. Furthermore, if all hunters and anglers were like you, your sport would be doomed.

The Game Commission alone cannot supply

enough game for hunters whose only interest is killing. The commission cannot stock enough fish to supply the demands of licence-holders who are interested only in getting their limit every time they're going fishing.

Wild life is a heritage to be cherished and conserved. If it is to be harvested, it is to be harvested wisely. And when it reaches the danger point, it is not to be harvested at all. When hunters and fishermen come to realize that this vast wilderness of ours and the wild life within it belongs to all of the people of the province; when they come to realize that hunting and fishing is not a game in which they try to beat the other fellow; when they learn that killing the things we cherish just for the sake of killing is wild-life bankruptcy; and when they decide that it is their job, not just the other fellow's, to help conserve and bring back our precious wild life; then and only then will all of our nimrods and anglers be called sportsmen.

Just as sure as the game violator is a thief, so is the person who answers "Bunk" to the above statement a menace to the future of sport afield. He's the guy who's taking it away from us without giving a thing. He's the one we sportsmen will have to work on before he puts an end to public hunting. He's a tough guy, and the only way we can reach him is to play it his way... tough!

If you are a real sportsman, the big thing after all is getting out-of-doors. You hunt and fish and you enjoy it, but it's because you are in the open... in the woods, the fields, the mountains, along the streams, in the marshes. That's what really counts.

Let's continue to enjoy the out-of-doors... in many ways. And let's guard jealously the wild life and the wilderness that WE own... you and I... WE own it.

"Should Auld Acquaintance Be Forgot"

PORTRAITS

William John Beattie May

To have been the person to put the handles on the mattocks when the land was to be cleared for the experimental station is to have a holding in one of the things that has given the whole valley a big lift!

Thirty-seven years ago in 1914 Billy May assisted R. H. Helmer, the "Farm's" first superintendent in getting ready to grub out the sage brush, clear the land, and start to plough.

Soon there were eight or ten teams working and about forty men with them. Herbie Dunham had his team; Will Fosbery had his; Harry Thornthwaite drove an R. H. English pair, and Fred Gartrell handled the family steeds. Those were lovely fall days full of sunshine and promise, and up to the thirsty crews every day went Jim Gartrell himself, with cider.

Mr. May says that he has worked at everything on the station EXCEPT being the superintendent. He has even fed the pigs.

He is an Ulster man. When the job at the station was offered him he was ready for it, because in Ireland he had served his gardening apprenticeship from the age of fifteen for five years at Glenmore House, a large estate. After that he had been a journeyman, the second gardener in charge of greenhouses at Lisburn, in the very very heart of the linen country.

Here, under glass, he grew fruits of all sorts, grapes, peaches, apricots, and apples, and worked on his home farm after that.

When he thought of marrying, he thought of emigrating, too. After he and Violet Evelyn Brankin were wed in August 1912, in the lovely Anglican parish church at Derril-

agh, where they had both sung in the choir for years, they sailed on the Empress of Ireland for Canada.

When they reached Kelowna it was Regatta Time, even then, and they thought the place was decor-

ated just for them! Their honeymoon journey ended in a democrat trip from Penticton to some friends above Joe Brent's place in Shingle Creek. They were not expected since telegraph service didn't reach so far as out-of-the-way ranches. Mrs. May slept in a tent the night they arrived, and Mr. May in Dominic Paul's barn.

It was hardly the reception they had in mind. The welcome was there though, and Billy May found different things to do.

They lived in Upper Trout Creek awhile getting their mail once a week at the Shingle Creek post office, then more conveniently at

The Mail Bag

SUMMERLAND ATHLETIC CLUB R.R. Summerland, B.C. September 10, 1951.

Editor, The Review

May I draw the attention of the debenture holders of the Summerland Athletic club to the urgency of creating a responsible controlling body. The people controlling the S.A.C., quite illegally I may say, are mostly young and inexperienced, with no knowledge of law, and have landed themselves in a mess.

In order to avoid matters getting in the courts, action by debenture holders is indicated. Up to the end of the tennis season of 1950 the club was fairly prosperous, and except for the shock it has received last winter and this summer, it can continue.

At the meeting of the debenture holders called for next Monday, Sept. 27, I will have the constitution, and the books and a plan of action to suggest.

R. G. RUSSEL.

the Prairie Valley office, called Balcorno, where Molly Lister, now Mrs. A. J. Beer, was postmistress.

His Irish chuckle and the lilt of his Irish tongue lightened the day for those with whom he worked. He even "accepted a government job," as The Review of those days put it, which just meant that he labored on the roads with a pick and shovel. He worked at the first sawmill at Osprey Lake. Mrs. May, Irish too, stuck it out in a tent for six months, with a small baby, and eighteen inches of snow on the ground.

Two years after their arrival he was started in the work he knew. Continued on Page 6

Signifying Nothing By RUSTICUS

Picking fruit puts some queer thoughts into heads that, like mine, are susceptible to such. You take the ordinary apple or pear. It's a nice fruit if you get it by itself. Or if you see it at a distance on a tree, accompanied by a few thousand of its fellows, it can look very attractive, either to the casual passer-by or the owner hoping to make money out of it. It's not too objectionable even to the picker as long as he can handle it in leisure and comfort.

But try to pick those same apples or pears under pressure, faster than your comfortable rate—whether that's two hundred boxes a day, as it may be with you, or forty, as it is with me, alas—and this agreeable Dr. Jekyll fruit suddenly turns malevolent Mr. Hyde. You try to reach a little farther than usual, or take a little bigger handful of fruit, to save time, and a peaceful little McIntosh or Bartlett that would ordinarily snap off at a touch will grip its mother-twig like grim death and refuse to come off, no matter how you twist it, until you give up in disgust and draw your hand away. Brush it as you pull your hand back, though, and plop it goes to the ground, where it lies leering malevolently up at you between its bruises.

know how pears ran small last season when one forgot to thin them—and then when I'd go down and look up before moving the ladder, there would be great big fruit that I'd missed up at the top. Up I'd go again, only to find it suddenly got under-sized again as I reached the top few stops.

Just to make sure of this, I went up and down the ladder several times, watching the same cluster of pears with a fixed stare, and I could see them swell as I went down, shrink as I came up. In fact, I'm almost sure I heard them snickering as they changed.

As result, I am working out, with the aid of Major Hoople, a new scientific theory, to be written in italics in all school physics textbooks, and known as the Rusticus theorem, to wit: Orchard fruit is not fixed in size at any given moment of time, but varies in diameter in inverse proportion to the distance of the picker from it. Quod erat very much demonstrandum.

It's all very annoying, because fast picking, as I see it, is all a matter of eliminating waste motions. Remember the parents in "Chaparral By The Dozen," who were motion-study experts? I become one too, of the common or orchard variety when I'm up on a picking ladder.

It's beautifully simple when you figure it out. All time that is not

actually spent taking off apples is wasted, therefore every time your hands stop picking and move to the picking-bag to deposit fruit, and back, is waste time. Of course, you can't pick indefinitely into any ordinary hand, but if you use two at once, it helps. And if with each hand you make only one trip to the picking-bag for three apples, there's a lot less wasted motion than if you made three trips to deposit the same three apples.

Likewise, if you go down your ladder and up again only once to fill a box, instead of twice, that saves time for picking more apples too.

But whenever I try to practise this, the third apple always refuses to come off, and I end by dropping it and losing another reaching for it, so that I'm left with one apple in my hand and two on the ground; which is quite different from the bird in the hand and two in the bush. Instead of always picking full bags, I usually run out of fruit and have to move my ladder halfway through a bag or boxful; not to mention chasing up and down the ladder several times each move after those elastic ones at the top.

I have the theory down fine; but as long as the fruit is so contrary, cussed, and downright ornery, how can you expect me to be a fast picker?

TWENTY-FIVE YEARS AGO

September 10, 1926

Flames totally destroyed the local box factory this morning about nine o'clock causing a loss conservatively estimated at \$20,000. The factory might have been saved, in fact, it would not be going too far to say it would have been saved—had there been an adequate water supply. The serious water shortage in Summerland moaned that the only water to fight the fire was that in the tanks at the factory. The fire was caused by a spark from the top of one of the boilers lighting on a pile of sawdust in a rather inaccessible place. While there is no cause for alarm, Dr. W. F. Andrew advises as a precautionary measure that Summerland residents boil their drinking water for a time. There is some suspicion that it has been contaminated, as the water is running so low. The situation is being investigated.

The worst accident in the history of the Kettle Valley railway occurred following a wild runaway when a forty car train loaded with twenty cars of lead ore from Trail, a car of canned fruit and several cars of automobiles and coal rush-

ed at headlong speed into a turn on a wooden bridge between Jessica and Lear and plunged thirty feet down an embankment. With the exception of fireman Ray Letts, Penticton, slightly injured after being thrown from the train, the entire crew lost their lives.

Summerland park was the scene of the picnic held annually by Odd-fellows of the South Okanagan.

There will be a whirlwind start for the basketball season when the Ogopegos challenge the local All-Stars to a game, after which a meeting to organize will be held. All-Stars line-up is still intact. Earle Wilson, Howie Daniels, Irvine Adams, Clarence Adams and Alvin Wilson. Ogopegos line-up includes Ralph Purves, Cecil Ritchie, Warren and Joe Gayton, and Nio Solly.

THIRTY YEARS AGO

September 10, 1921

Council held an interesting informal discussion on the subject of individual measuring boxes for lots. The subject was introduced during an interview between the council and W. C. Muldrow, an engineer who has had many years experience in irrigation in Wash-

ington. R. V. Agur, Summerland BCFGA director reports there is a paid local membership in the BCFGA of 177, and he expects the number to go shortly to 200.

The Ladies' Hospital Auxiliary has completed arrangements for a grand concert when Miss Mary Izard, noted young English violinist will be heard here in recital.

Unusually cool weather has been experienced here during the last week or so. The thermometer has registered as low as 38, the coldest for the time of year in 14 years with one exception when on Sept. 9, 1910, it reached the same low.

R. Johnston, J. Dale and C. Wharton have been appointed as municipal fence viewers by the council as a result of a request from J. Fyffe.

Mrs. T. J. McDonald has recovered from her recent operation for appendicitis and is able to leave hospital and return home.

J. Mutton of the government road gang was hurt in a slide which almost completely buried him. The slide is thought to have been caused by road blasting. He was out on the head and suffered injury to his hand as well.

Approval was given by municipal council to proposal of Duncan Woods to cancel the plans of the Woodland Townsite at Trout Creek Point with certain reservations.

At the request of the public works engineer, Municipal Clerk Nixon is to supply that department with a report of the mileage of streets and roads within the municipality giving a description of their condition.

Credit Union to Extend Service

Extension of office hours and employment of Manager Water Bleasdale on a full-time basis has been decided upon by the directors of the Summerland and District Credit Union.
Details of the new office hours are provided in the advertising columns of this issue.
Steady increase in all services of this active savings and loan society have prompted these moves. Savings (shares) have reached \$97,750, while deposits stand at \$5,120 and loans in force exceed \$108,600.
Total loans since the Credit Union was incorporated amount to \$400,000, directors state.
Membership has also increased to a total of 453, making the local Credit Union the largest organization of any type in this area and unique in that many different races, creeds and religions participate, they claim.
Manager Bleasdale will go to the B.C. Central Union in Vancouver shortly to study the operation of a personal cheque service.
At present, members with deposit accounts withdraw and make payments by means of vouchers, cashable within 30 days at the Credit Union office only. Under the new personal chequeing service, cheques would be negotiable anywhere it is proposed.

RECIPE HINTS

Cream Puffs are so deceiving — they look difficult to make, yet if you follow the directions carefully, they'll turn out as nice as these! Fill them with Coffee Cream Filling; easy to make and good to taste.

Cream Puffs
One cup boiling water, ½ cup butter, 1 cup sifted flour, 4 eggs, unbeaten.

Heat water to boiling in saucepan. Add butter and stir until melted. Bring mixture to boil, then lower heat. Add flour all at once, stirring rapidly. Cook and stir until mixture leaves sides of pan and gathers around spoon in smooth, compact mass. Remove from heat.

Add one egg at a time; beat thoroughly after each addition. Continue beating until mixture looks satiny and breaks off when spoon is raised. Drop by small spoonfuls on ungreased baking sheet, making 24 puffs. Bake in hot oven, 425 degrees F., 30 minutes or until puffed, dry and golden brown. Cool. Cut puffs part way through, crosswise. Fill with Coffee Whipped Cream Filling and frost with Coffee Glaze.

Social Creditors Believe Man Most Important Thing, B.C. Organizer Tells Meeting

"Man is the most important thing on earth."

That is the first principle of Social Credit and "we must understand that very well in order to realize what the Social Credit movement is endeavoring to do," Peer V. Paynter, Socred organizer for the province declared at a meeting in the Parish hall on Tuesday evening.

Mr. Paynter is commencing a province-wide speaking tour and chose Summerland as the jumping off place. He met a number of residents in the district Tuesday afternoon prior to the session.

Every other thing must be subordinate to man and must operate to serve man, he continued.

"God in the beginning created man in His image and gave him dominion over all things. So we must recognize that anything that makes man subservient to it is contrary to the Christian principle."

Man's Welfare Secondary
Mr. Paynter declared that today nations and government are controlled by finance and are serving their masters while man and his welfare are secondary.

"Man has become the servant instead of the master," he claimed, declaring that "sleepy-eyed politicians" have given away to the private banking system the right of issue of "our money" which controls the standard of living and the production and consumption of goods.

"Social Creditors insist that the original issue of all money should be returned to parliament and issued to the citizens of Canada according to their need; issued

in direct relationship to the available supply of consumer goods," he pointed out.

"What is physically possible and desirable can and must be made financially possible," he added.

"There is only one reason or excuse for the government to exist at all and that is to govern according to the will of the people, to assure the freedom and security of the people.

Freedom Was Stolen
"We have in this province now a glaring example of how the freedom of a people can be stolen from them," continued Mr. Paynter, referring to the B.C. Hospital Insurance Service.

"We know the costs are high and that control of our hospitalization is centralized, but the fact that we have had our right to choose or refuse taken away from us, is the thing that Social Crediters object to and will fight with all their might," he insisted.

"Any government that will not give the people the right to say what they will have should be forced out of office and replaced by one that has a policy of making available to the people a form of protection and make it possible through a plebiscite for them to say whether they will adopt it or not."

Mr. Paynter declared the B.C. Social Credit League will have a candidate in every constituency at the next election.

He reviewed the progress of the Social Credit government in Alberta where the provincial debt has been reduced in 18 years from \$187 millions to less than \$100 millions,

Mrs. T. Croil Passes Away in Her 86th Year

Mrs. Thomas Croil, widow of Thomas Croil, died in Summerland General hospital on Saturday afternoon, Sept. 8, in her eighty-sixth year.

For health reasons Mrs. Croil had to live at the coast for the past few years, but has enjoyed returning to her cottage at Crescent Beach each summer. It was there that she became ill, and was taken to hospital.

The late Mrs. Croil was a native of Aberdeen, and her maiden name was Christian Chives Mitchell. During her married life she lived at Milwaukee, Montreal, and Aberdeen. She came to Summerland from Scotland in 1920 to join Mr. Croil who had bought a fruit ranch here.

Mrs. Croil was always a busy person with a very active mind, and interested herself in many constructive things. She was artistic and in her younger days did some fine sketching and painting in oil.

At her home here, she landscaped, planned, and worked to make a lovely garden, and she was a member of the Horticultural Society for many years.

When pottery making was being done in Summerland she was one of the first to experiment in the undertaking, and produced interesting pieces.

She and her husband made a trip to Ottawa she personally interviewed the Postmaster General, stating the case to him. On her return the route went through.

She and her husband made a number of trips to the Old Country to visit their daughters, Mrs. M. Vlasto, of Westerham, Kent, wife of a Harley St. Surgeon, formerly of London; and Mrs. Angus MacDonald of Cupar, Fife, married to a Scottish barrister; and their families.

Two sons live in British Columbia, Mr. T. M. Croil, Summerland, and Air Marshal G. M. Croil, AFC, OBE, of Vancouver.

The late Gen. Billy Mitchell of the American airforce after whom Mitchell Field was named was a first cousin of Mrs. Croil, and two of her brothers were American senators.

Funeral services were held from St. Stephen's church on Tuesday afternoon at two o'clock conducted by Canon F. V. Harrison, Pallbearers were: C. J. Huddleston, D. L. Sanborn, George Forster, Ray Fredrickson, Dr. R. C. Palmer and C. N. Higgin.

Interment was in the Anglican cemetery, Giant's Head Road.

whereas B.C. has increased its debts from \$117 million in 1942 to \$229 million in 1952.

He declared that B.C. through its 3 percent sales tax raises more revenue than Alberta does from its oil, yet, has not been able to ease the financial burden of debt in the same manner.

Teen Town

What's the matter with all the kids? There weren't very many at the last couple of dances. Don't tell me that you all stayed home on a Saturday night!

The council has been thinking of having some public dances. They would be put on a trial basis. Also it would depend on the public more or less to keep it going. That would mean there would be a teen dance every other Saturday and a

public dance the other Saturdays. We want to keep the four basic rules of Teen Town: No smoking, No drinking, No swearing and No gambling applied to these dances, too, if possible.

The Youth Centre and Teen Town would work together to stage these dances Marcel Bonthoux and orchestra will play at the public dances.

Next week there will be a Teen Town dance and we would like to see as many as possible turn out. Also, next Monday there will be a council meeting at 7.30 sharp at the Youth Centre. All council members turn out if possible and "on time."

NOTICE

RE OLD AGE ASSISTANCE FOR THOSE 65 TO 69

With the passing of the old age assistance act by the federal parliament to provide assistance for those persons between 65 and 69 who qualify, and in which the province may participate, it is our intention to start accepting applications on September 17th, from all persons within this age group who feel they can qualify under the eligibility tests.

Application forms are available at your local municipal welfare office, or the district office of the provincial social welfare branch in your community.

IN ORDER TO SPEED UP YOUR APPLICATION, IT IS NECESSARY FOR YOU TO HAVE—

1. Proof of age Birth certificate, baptismal certificate or other documentary proof.
2. History of residence for the past twenty years, giving dates and places of residence.
3. Records of property purchased, sold or transferred within the past five years.
4. Details of life insurance policies, Number and type of policy and amount. Stocks or bonds or other securities held, and bank account.
5. Verifications of other income from any source to yourself or spouse, if living with you.
6. Proof of marriage if spouse living and residing with you.

Applications are being accepted in order that all who will be eligible for this old age assistance will receive it starting January 1st, 1952 when it is implemented by the federal government. It should be noted that the benefits of this scheme, require the approval of the B.C. Legislature which will sit in special session to consider this on October 22nd.

 Apart from the monthly power bill from the West Kootenay, the August accounts passed for payment by municipal council on Tuesday amounted to \$11,533.

SCHOOL BOARD GETS REBATE ON ARBITRATION
 School boards in the Okanagan region of the B.C. School Trustees Assn. setup shared the costs of arbitration board sittings in disputes with teachers over salaries last winter. This week, School District 77 received a cheque for \$352 being a rebate of its own costs in presenting the case for the school board before an arbitration board.

Retailers Talk Tuesday Night Store Opening

Suggestion from one group attending the first fall meeting of the Summerland Retail Merchants' Assn. last Thursday evening in the Nu-Way Annex that retail stores should remain open until 8 p.m. each Tuesday evening during the packing and canning season provoked a great deal of discussion but no concrete action.

For more than an hour retailers looked at this suggestion from every angle but, on a divided vote, decided against any action this season.

It was proposed that retail stores remain closed until noon on Monday and that they remain open until eight o'clock Tuesday evening to provide a service for those persons employed in fruit plants who find it difficult to shop before ordinary closing hours.

The proposal was not entirely discarded, however, as a survey is to be taken of all retailers to obtain views on this subject of added service and the results will be passed on to the 1952 executive.

The meeting was informed that the sign posted at the top of Peach Orchard hill pointing the way to the West Summerland business district is in need of renovation. A committee will make plans for re-painting.

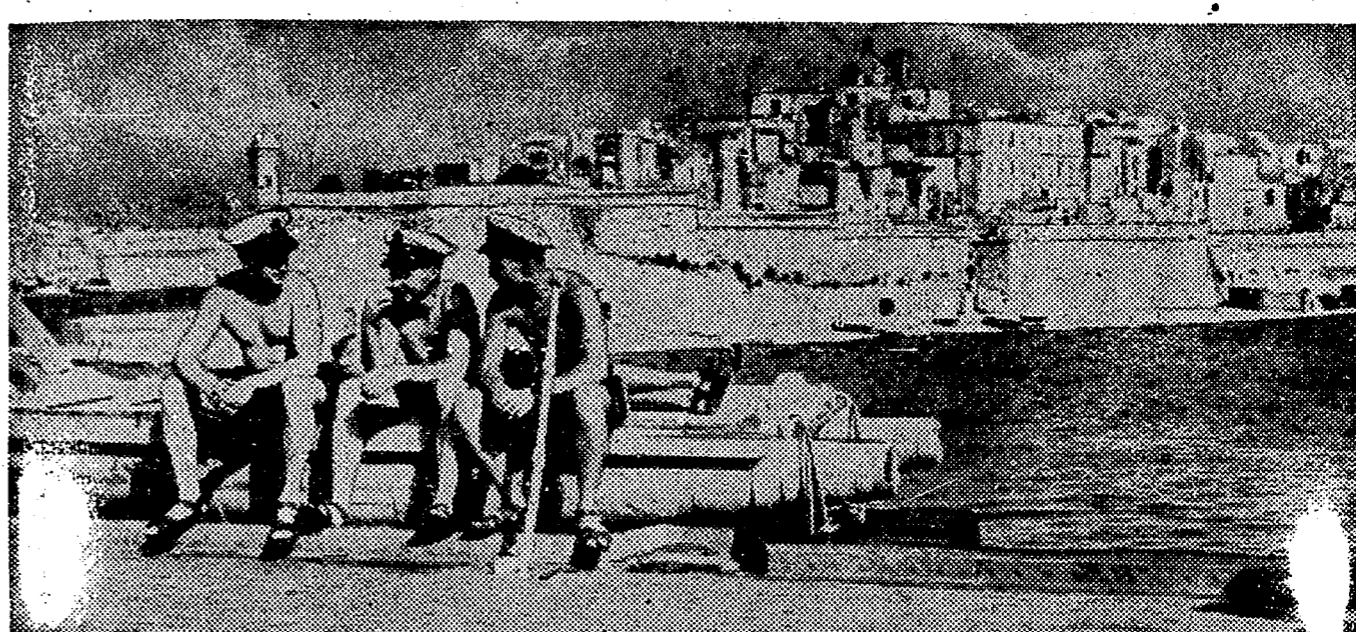

Cecil Wade, retail merchants president, was chairman of last week's meeting.

Canadian Chamber Head Cancels Visit

Visit of F. G. Winspear, president of the Canadian Chamber of Commerce, to the South Okanagan today has been cancelled owing to illness. J. L. Palethorpe, Canadian Chamber director for the Okanagan, informed The Review this morning.

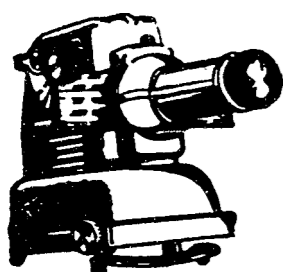

Mr. Winspear was to have addressed the Penitton Board of Trade tonight and representatives of Okanagan boards had been invited to hear him.

Yesterday, however, Mr. Winspear was forced to cancel his trip on his doctor's advice. He expressed the hope that he would be able to make the trip at a later time before his term of office expires in 1952.

Three Canadian petty officers take a sunbath on the flight deck of the aircraft carrier Magnificent, barred from entering the harbor at Valletta, Malta, because of an outbreak of polio among her crew. The ship, which is participating in Mediterranean naval exercises, has been required to anchor in the bay. In the group are, left to right Chief Petty Officer ELDON CONROY, Ottawa; Petty Officer ALBERT LEWIS, Dartmouth, N.S., and Petty Officer WILLIAM WALES, Vancouver. In the background is the town of Senglea with its historic watchtower built by the Knights of St. John.

A A Day

Continued from Page 1

combines our individual contributions. Under our direction, all mankind may use it freely for a more abundant life. But through our negligence, its power may be seized at the source, confined between cement walls of dictatorship and reserved for tapping only by regimented authority. The power to direct is still ours; BELIEF and ACTION may keep it so. But it begins with YOU!"

Lovely Rug on Display

Mrs. East complimented Mrs. Orr on her lovely rug and the hours of work that went into making it such a "thing of beauty", and presented her with a gift to honor her awards. The blue ticket of First Prize from the PNE was still on the rug which was on display in the room.

The occasion was in the form of a luncheon meeting, presided over by the president Mrs. Gordon Ritchie, who as chairman following the delightful meal said that it served a threefold purpose. The first one was that it was the first fall meeting and it was her idea that "good food brings out congeniality"; the second to honor Mrs. McLarty and Mrs. Orr; the third to welcome the provincial president.

Those honored were presented with corsages previously.

At the end of the luncheon each person present was given a copy of Mrs. McLarty's essay.

Aubrey King Could Be Disqualified

It is within the power of the local school board to declare Aubrey King, trustee representing the rural portion of School District No. 77 disqualified as he has not attended board meetings for the past three months.

This was announced at Monday's board meeting but no action was taken by the board. Mr. King will be notified that he should be more regular in his attendance as a trustee with the responsibilities of the large school system.

Building Values up Nearly 25 Percent

Building values have increased between 20 and 25 percent since April, 1949, the local district school board has been informed by its appraisal company. For co-insurance purposes, it would be safe to advance insurance policy value 20 percent, the board was informed. The trustees had already made a fifteen percent adjustment and will inform their insurance brokers to add another five percent to the value of the school buildings, for replacement purposes.

Civil Defence to be Given Major Role in Education Setup of B.C.

Next week, from Monday to Wednesday, trustees from all parts of the province will converge on Vernon to attend the annual meetings of the B.C. School Trustees' Assn. One of the major topics to come under discussion will be the part played by the school system in civil defence, it is expected, and trustees in Summerland heard a few of the requirements as outlined by the department of education in circulars and by the local school inspector, A. S. Matheson of Kelowna.

Lumber Dispute Goes To Conciliation Board

Following a series of negotiations between IWA officials and representatives of northern and southern interior lumber operators, negotiations broke down Wednesday evening, Sept. 5, and the dispute will be referred to conciliation boards, the Interior Lumber Manufacturers' Assn. announces.

A final offer made to union representatives by the operators consisted of a 20c per hour increase

Present dispute between the IWA and southern interior lumber operators does not effect the Summerland Box Company or its employees, The Review learned today. Local box company employees are affiliated with the American Federation of Labor, and are formed under Lumber and Sawmill Workers' Union Local 2742. The Rutland box factory and the Vernon Box and Pine Lumber Co. Ltd. employees also have local unions affiliated with the AFL. The IWA is a CCL-CIO union setup.

Hon. A. D. Turbull, minister of health and welfare and Col. A. D. Logan, former principal of the Fairbridge Farms school system on Vancouver Island will be two principal speakers at Vernon.

The federal authorities are preparing a basic first aid manual for school purposes, trustees learned, while basic first aid is to be taught to all pupils as part of the civil defence scheme.

Inspector Matheson declared that liaison between the board, the principals and the community civil defence committee is highly important and a meeting of all three should be held as soon as possible.

From such a conclave would come a definite understanding of the part the schools must play in civil defence, he pointed out.

Further Work On 'Square' is Done This Week

What will eventually be a black-topped square as an entrance to the Living Memorial park playground and a parking area for vehicles coming to the main business area, has been graded and shaled this week by the municipal roads department.

Quite an appreciable difference has been made to that particular corner.

Councillor F. M. Stuart informed council that levels taken in that area indicated that a four-foot ditch would be needed to drain excess water around the corner and guide it towards Prairie creek.

If the water is taken farther east it could be guided across the Steuart property if an easement was obtained, Councillor Stuart found.

Council decided, however, that a cement box placed at this corner with a pipe down the road allowance to the creek would be a more businesslike approach to the problem of removing excess water from the business area on south side of Granville.

DELEGATES TO UBCM CONVENTION AT HARRISON

Reeve C. E. Bentley and Councillors Norman Holmes and Francis Steuart are delegates to the annual UBCM convention at Harrison Hot Springs October 9, 10 and 11, while Councillor F. E. Atkinson declared on Tuesday it is now doubtful if he will be able to attend.

Here's another of our many satisfied customers. He's learned from experience that motoring is easier, safer and more economical when his car is checked regularly and repaired expertly, by a long established, well-equipped shop such as ours. Drive up for a check-up, now!

Dorothy Blacklock To Lead Baptist YPS

On Monday evening, Sept 10, the annual election of officers of the Summerland Baptist Young People's Society took place at a meeting held in the church hall. Miss Dorothy Blacklock is president for the ensuing year with Miss Marian Turigan, vice-president. Miss Ester Huva is to be secretary, and Sam Imayoshi, treasurer. Roger Smith will be representative for the young people on the care of the church committee, and the social committee will consist of Miss Jean Imayoshi, Miss Adrienne Roberge and Ross Tingley. Miss Norma Arndt is camp committee representative, and group leaders are Sam Imayoshi and Ray Harrington, Peachland. Roger Smith is representative for the denomination's publication, The Western Baptist.

Kutch Imayoshi to Take Baptist Service

Mr. "Kutch" Imayoshi who has had a preaching appointment in Saskatchewan during vacation time is expected home this weekend to visit his parents, Mr. and Mrs. J. Imayoshi. Mr. Imayoshi, who is head of YPS for the Baptist denomination in the four Western provinces, will speak at the Sunday school rally day next Sunday morning, and also, will be the speaker at the church service. He will be attending McMaster University this fall to continue his studies in the ministry. He is planning to go to Japan as a missionary.

VISITING ABROAD

Mr. F. J. Dietrich is spending this week in Penticton, expecting to return on Saturday. Mr. and Mrs. H. R. J. Richards are leaving tomorrow on a motor trip to Prince Rupert. Mr. and Mrs. V. M. Lockwood and Mr. and Mrs. Cliff Hultgren of Penticton returned yesterday from a holiday fishing jaunt to Tacoma, Wash. Mr. and Mrs. W. C. Wilkin and their two little daughters will visit at the coast over next weekend. Mr. Harry Braddick was among the local residents who attended the Okanagan Falls cattle sale yesterday.

Mr. and Mrs. R. A. Fredrickson drove to Vancouver on Wednesday morning, expecting to return tomorrow. Mr. and Mrs. A. K. Elliott and their daughter Miss Bernice Elliott drove out to the coast last Friday, returning yesterday. Miss I. Stewart, PHN, who spent her vacation at the home of her parents at Penhold, Alta. returned to resume her regular duties. Miss Mary Stewart and Miss Joan Howard left at the beginning of the week for a vacation which will include motoring to Trail and other points.

Mr. and Mrs. E. R. Butler and their daughter, Miss Dorothy Butler of Victoria, who is having her vacation, are on a motor trip to Salt Lake City and other centres in the States. Miss Winnifred Mathers whose home is in Australia, and who has been on the staff of Summerland General hospital, has left, planning to go east, doing further nursing on the way, as part of a round-the-world itinerary.

Mrs. R. A. Johnston returned home on Sunday after visiting her daughter, Miss Margaret Johnston in Vancouver and her son and daughter-in-law Mr. and Mrs. R. M. Johnston and the children at Mission.

Mr. and Mrs. Fred Schumann left this week to spend about a week at the coast. Mr. Schumann is on a business trip and expects to spend a day at Harrison Hot Springs attending a Manufacturers' Life Company conference.

Mr. and Mrs. Wm. Jenkinson returned last weekend from a week's motor trip to the Slooan and Monashee country. During their holiday they visited friends at Lumby and Trail, and returned through the States.

Shirley Burnell left last week to enter Grade 10 of Kamloops high school, in order to go on for her university entrance. She plans on becoming a nurse. At the Hub City she will stay with her uncle and aunt, Mr. and Mrs. George Fraser.

Mr. and Mrs. W. R. Grant and Mrs. J. Kean returned on Sunday after being away about three and a half weeks, when they motored to Fortage La Prairie where they visited at the home of Mr. and Mrs. David Kean, who have recently moved there from Ontario.

Mr. W. M. Wright has returned from a trip to Ontario coming home by way of Chicago. From Chicago Mrs. Wright went on to Salt Lake City and San Francisco to join her daughter, Miss Audrey Wright of Vancouver in a short holiday there. They will come up to Vancouver together after which Mrs. Wright will return to Summerland.

Socially Speaking

SOCIAL EDITOR Mrs. A. W. Vanderburgh

W. I. Affairs Successful This Summer

Business conducted at the first fall meeting of the Women's Institute yesterday, Sept. 12, in the parish hall, showed that just over \$30 had been cleared at the Citizenship Banquet. This affair was not planned as a fund-raising event, and it was a satisfaction to know that it had been so successful.

The tea served at the Board of Trade Spring Fair netted \$23.50, and it was considered that the Institute exhibit added to the fair, and Mrs. Linnell of the Edith Adams' Cottage, Vancouver Sun, gave many useful hints in her interesting demonstrations.

It is planned to send six boxes of apples to the Solarium as is the annual custom. These are to be donated by Mrs. C. H. Elsey, Mrs. Orr, Mrs. Gordon Ritchie, and Mrs. V. Charles, and are to be left at the Occidental Packinghouse. The Occidental will transport them to the KVR for shipment.

Mrs. Roy Angus was appointed to the Civil Defence committee to replace Mrs. G. G. Brown who has left Summerland to live at Victoria.

It is planned to hold a large Variety Sale, either the last week in September or early in October, and plans were outlined for this affair.

The luncheon served by the Women's Institute on Wednesday was arranged by the capable home economics committee, convened by Mrs. V. Charles, assisted by committee members, Mrs. George Woitte and Miss Mary Scott.

LLAMA — Beige llama fashions a classic Mayfair coat with a small collar above five buttons. The raglan sleeves end in deep cuffs. The fabric is woven from the fleece of the Peruvian llama.

Will Pupils Want Full Meal or One Hot Dish in New School Cafeteria?

At the start, it is doubtful if a full course meal will be attempted in the proposed cafeteria of the new school system, Summerland school board intimated at Monday evening's regular session.

In time, a system may be worked out whereby a full meal may be made available but for the time being, the trend seems to favor one hot dish prepared daily during the winter months.

Mrs. A. W. Vanderburgh and Secretary B. A. Tingley reported to the board on Monday the success of the Penticton school cafeteria which supplies a meal of sausages and gravy, cabbage salad, bread and butter, half pint of milk and pudding or jello for 25 cents. Penticton Pupils Keen

Trustee J. Y. Towgood also declared he had heard pupil reaction in Penticton and it is enthusiastic over the type of meal provided for those who live too far from home to take their noon meal there.

But Inspector A. S. Matheson produced a doubt that parents would wish to spend 25 cents per day for each child who has to eat a noon meal at the school, especially if there are several children in the family.

"A full meal might be taken by fifty percent of the pupils yet the other 50 percent would probably need it more," he cautioned. "A cheaper deal would probably cover more pupils."

This brought a reply from Mrs. Vanderburgh that Summerland parents are recognized as being very health conscious and only a very few pupils in local schools need "pickling up", according to the school nurse.

Mr. Matheson declared that one hot dish, for four or five cents, is provided daily in the Kelowna district school system and this dish supplements the pupils' lunch brought from home.

As a result of this discussion, the school board authorized a survey of the pupils and their parents to determine to what extent they wish a cafeteria to service the noon day requirements of the student body. Penticton Showed Profit It was stated that at 25 cents

per meal, the Penticton cafeteria system showed a profit of about \$150 last year.

In the meantime, the board is preparing estimates of costs of equipment for the cafeteria and will order sinks, the necessary cooking unit and other requirements as soon as the extent of the service has been determined.

Trays are an expensive part of this equipment, as the cheapest type was quoted at \$260 each.

In the MacDonald elementary school only some sixty pupils do not bring their lunches to school. The auditorium-cafeteria is crowded to capacity at noontime, first sitting being entirely devoted to elementary pupils, apart from primary classes entirely.

Second sitting is taken over by the junior senior high school classes.

Pupils are said to appreciate the accommodation provided in the fine, big auditorium and make a social gathering of the noon-hour.

Miss Jean Angus who spent the summer months on the prairie, is holidaying at the home of her parents, Mr. and Mrs. Roy Angus, before returning to Toronto University, in October.

Hospital Receives 1263 Cans of Peaches

In less than two hours on Monday evening, a group of willing workers prepared 1263 cans of peaches which will be made available for the Summerland General hospital.

This fast-working group gathered at the Garnet Valley Cannery at the invitation of Manager Blair Underwood and made fast work of some fifty boxes of peaches donated by the four packinghouses and several individuals.

Mrs. J. C. Wilcox, president of the hospital auxiliary, organized the excellent work crew which consisted of about 25 women, half of whom were auxiliary members.

Jack and Jill School Reopens with Kiddies Of Five Years of Age

The Jack and Jill kindergarten is, reopening for the fall term on October 1 with a full quota of children, all five years old.

This year will be the first time that the classes have been limited to one age group, and since there are more than enough children for available services, it is thought that more will be accomplished by confining the attendance to five years.

Mrs. Walter B. Powell is the new chairman and Mrs. Mel Ducommun the treasurer. The rest of the committee is made up of the teachers and helpers.

Mrs. Francis Steuart who, with Mrs. Howard Milne, was one of the original teachers, remains on the staff, and this year will be assisted by Mrs. E. E. Bates. Mrs. Bates replaces Mrs. W. H. Durick, who filled the position last year, but found it necessary to retire. Mrs. Bates will train the rhythm band.

Mrs. Leslie Rumball will stay on as a helper, and Mrs. W. A. Laidlaw will take the place of Mrs. H. Braddick, as she is retiring, too, after efficient service.

HOPE TO FILL VACANCY ON SCHOOL STAFF SOON

Two applications have been received by School Board Secretary B. A. Tingley for the vacancy in the school staff of a commercial teacher. One application came from Winnipeg and the other from Vancouver and it is expected the position will be filled by the end of the week. In the meantime, commercial work is being taught by Mrs. A. K. Macleod.

DOUG PRICE ACCEPTS POST AT VICTORIA

Mr. Doug Price, well-known Summerland resident for the past few years, and formerly of Naramata, is leaving this week for Victoria where he has accepted a post in radio and electronics work. Mr. Price has been a sparkplug in amateur radio work in this district. Mrs. Price and their daughters will move to the coast later in the fall.

Mr. and Mrs. Elmer Pollock of Calgary are visiting at the home of the former's parents, Mr. and Mrs. Melvin Pollock.

VISITING HERE

A guest at the home of Mr. and Mrs. Irvine Adams is Miss Price of Vancouver.

Mrs. George Harding of Vancouver, a former resident of Summerland, is visiting here, guest at the Nu-Way.

Mr. and Mrs. W. Gilby of Lulu Island are visiting for a few weeks at the home of Mr. and Mrs. J. H. Pledge.

Mr. and Mrs. A. G. Duncan, their daughter Mrs. Gerald Hackney and her baby, all of Vancouver, are guests at the home of Mr. and Mrs. C. P. Evans.

Guests from San Francisco at the home of Magistrate and Mrs. Sharman are the former's brother Mr. Arthur Sharman and his son Mr. Hugh Sharman.

Mr. and Mrs. Roy Nelson and Mrs. and Mrs. Roy Smith of Toronto were overnight visitors at the home of Mr. and Mrs. V. Charles last week. Mrs. Nelson and Mr. Smith are cousins of Mr. Charles.

Visitors last weekend at the home of Mr. and Mrs. W. Toevs were Dr. and Mrs. C. Dirksen of Vancouver, who arrived on Friday, and Mr. Toevs brother-in-law and sister, Mr. and Mrs. H. Hunt.

Mr. and Mrs. Julian Fry of Kamloops have been in Summerland this week on their way to the stock sale at Okanagan Falls, visiting Mrs. Fry's father, Mr. W. C. W. Fosbery, who will go with them to Kamloops for a short visit on their return.

Mr. and Mrs. W. J. Andrew and their son John are visitors this week at the home of the former's parents, Dr. and Mrs. F. W. Andrew, driving in from their home in West Vancouver. Mrs. Andrew, who has been visiting at their home at the coast, and at the home of Mr. and Mrs. F. Brand, returned with them.

Newlyweds to Make Home at Bridesville

A quiet wedding of interest in Summerland and Penticton was that which took place on August 19 in Omak, Wash. when Miss Edith Stevenson, youngest daughter of Mr. and Mrs. Curtis Stevenson, Trout Creek, was united in marriage with Mr. Jack Stephen Mitchell, of Penticton. Mr. and Mrs. Mitchell will make their home at Bridesville during the winter.

NEW ARRIVALS

Mr. and Mrs. D. B. Clark are the parents of a baby daughter who arrived at Summerland General hospital on Thursday, Sept. 6.

A son was born at Summerland General hospital on Sunday September 9 to Mr. and Mrs. George Taylor.

MOVE FROM PENTICTON TO MAKE HOME HERE

Mr. A. C. Schanuel of Penticton, his daughter Miss Levina Schanuel, and his son, Eddie, have come to Summerland to live having taken over the residence and the business of Mr. and Mrs. John Hecker who have moved to Salmon Arm.

MORE ABOUT

PORTRAITS

Continued From Page 2

Since that time he has been under three superintendents, R. H. Helmer, W. T. Hunter and Dr. R. C. Palmer, and more immediately under three men, Wm. Fleming, Dr. C. Hornby and Lyle Danby.

Since 1926 he has been seed grading and testing. At present there are eighty varieties of tomatoes on test. They are tried out for standard to trueness of type, adaptability, purity, and various other things. Then the seed is tested in different places throughout Canada for verification. When varieties have passed these selections and been re-selected, and are considered good, the seed is released to the Canadian Seed Breeders' Association. This is then called "foundation seed" and may be sent out to raise registered seed.

The tomato is just one vegetable that is being tried out continually to better it. Most other edible garden stuff is worked with, too. Mr. May takes a carrot, or an onion, or what-have-you, out of its row, puts it into a family, and then knows all the given names of the whole connection, as well as its ancestors. He is known to be an authority on vegetables.

Their home for a long time where they and their four children lived was a log house, in Trout Creek, handy to Mr. May's work at the foot of the station hill. It has since been pulled down.

Now they have a new home on the highway in Trout Creek and have three acres, so when Mr. May retires this week he will have plenty to do working with his own vegetables and soft fruits.

He is a member of the Summerland Horticultural Society, Kelowna Horticultural Club, and a director of the Interior Exhibition at Armstrong.

At their home they have the Summerland Noca challenge cup for asters, which Mrs. May has won four times, a cup for championship sweet peas, awarded at Kelowna last year, and the Occidental challenge cup for asters given for the first time this year at the Okanagan Valley Flower Show held here last month.

"Working at the Farm has been more fun than at a tourist camp," relates Mr. May. "People of all types come there from all over the world. I should have kept a diary." "All the time I have been working there, I have seen the beauty in the mountains; I have known that the lake is a picture; but, by golly, I've never seen Ogopogo!"

High River Man, F. L. Watt, Passes

Mrs. Arthur Blanchette has received word from High River, Alta., that her cousin, F. L. Watt, a well-known and respected citizen of that community for many years passed away suddenly on August 24.

Mr. Watt had come to Summerland to spend his holidays on several occasions and had many friends and acquaintances here.

One of the town's leading businessmen, the late Mr. Watt had been a mayor or councillor of High River for 22 years.

Post Office Has Happy Customer in Young Vernon Girl

VERNON—Less than one month ago, a nine-year-old pen pal of Jean Hembling sat down in her English home and addressed a letter to Jean thus:

Miss Jean Hembling, 2806 26th Street, CANADA.

This week, the letter was delivered to Jean at her correct address, 2806 26th Street, Vernon, B.C. In those few weeks the letter arrived in Vancouver, been referred to West and North Vancouver and eventually sent to Vernon.

But, wonders Jean's father, George Hembling of the Vernon Fruit Union, how did the letter get into B.C. in the first place? And how did it eventually arrive in Vernon? Anyway, in daughter Jean the oft-criticized post office has at least one satisfied customer.

VERNON LAD AWARDED LEGION SCHOLARSHIP

B.C. Command Canadian Legion scholarship for this Okanagan district has been awarded this year to Howard P. Thornton, son of Mr. and Mrs. Howard J. Thornton of Vernon. It was won last year by Ron MacRae, well-known young Summerland student.

Rains Improve Color and Size Of Apple Crop in This Area

Rain and cooler weather has meant a great improvement in size and color of the apple crop, declares the latest horticultural news letter issued by the department of agriculture, in discussing the Summerland, Peachland and Westbank area.

"It now looks as though McIntosh and Jonathan will have plenty of color and size, too, by the time picking starts."

McIntosh picking started in this area at the first of the week.

"Later apple varieties are also improving and foliage has taken on a darker green hue. Cullage worm codling moth and frost rusting may be the highest in several years, otherwise the pest situation is well in hand.

"Rains have started fire blight running again in some orchards." The news letter also states that the rains delayed the harvesting of V peaches and gave the growers and packinghouses a breathing spell, time to catch up with the rush of harvesting Bartletts and V's at the same time.

Early pickings of V's were rather disappointing owing to the large number of split stones and wormy peaches. Later pickings were much better, the letter states, Peaches Over Estimates

Penticton district reports that peach estimates are being exceeded, while McIntosh apples will probably run to large sizes.

In some Oliver-Osoyoos orchards, further codling moth sprays were applied prior to propping in anticipation of third brood injuries.

From this district south to the border some cracking of prunes has been experienced due to the heavy rains late in August.

Kelowna states apples have been coloring satisfactorily but sizes appear to be on the small side. Codling moth in apples is more serious than for at least five years but otherwise insects or plant diseases are not causing great concern at the moment.

"To date the labor shortage has not been serious but might well be a problem when the main apple picking and packing season gets underway," Kelowna declares. Farther north, in the Vernon area, peach and prune crops appear to be exceeding estimates.

F. Dunsdon Captures Shatford Cup for Fourth Year in Row

Not only did Fred Dunsdon capture the Shatford cup, emblematic of the grand aggregate championship of the Summerland Rifle Club's final shoot of the season, last Sunday, but he took top honors at 200 and 600 yards and was awarded the Loomer pin for the highest total on five declared shots.

This is the fourth year in a row that the Shatford cup has nestled in the Fred Dunsdon home. To win it this year he shot a brilliant 93, next in line being Len Shannon with 97 and John Khalembach with 96.

None of these top men were on the winning team at last Sunday's shoot, as Dewey Sanborn's team of Pop Dunsdon, Bill Young and Ted Dunsdon scored a total of 371. John Khalembach's team was second with 363 and Len Shannon's third with 362.

C. V. Nesbitt was high tyro with a score of 93, while Barbara Price with a 90 score had the high junior mark.

September Button Winners

For September shoots, Ted Dunsdon won the gold button with a 100 score, registered on the previous Sunday. Phil Dunsdon had the second best score with a 99 to take the silver button, and Fred Dunsdon took the bronze button with the next best 99.

The annual grudge match between the City Slickers and the Garnet Valley Polecats, found the former too hot, winning 467 to 459. City Slickers were Fred Dunsdon, Dewey Sanborn, Ted Dunsdon, Phil Dunsdon and Doug Price. The Polecats consisted of George Dunsdon, Dave Taylor, John Khalembach, Len Shannon and Steve Dunsdon.

Fred Dunsdon's 34 was tops at 200 yards, with Len Shannon and Ted Dunsdon, each with 33, in second and third spot.

Adrian Moyle scored a high 34 to top the 500 yard range shots, Bill Young and George Stoll, each with 33 being second and third.

At 600 yards, Fred Dunsdon was again on top with a 33, while Steve Dunsdon and Len Shannon, 32 each were second and third.

Runnerup to Carl Nesbitt for top tyro honors was Dave Taylor with 92 and Barbara Price, 90.

To take the Loomer pin, Fred Dunsdon made an average of 96.8 for five declared shots.

Following is the complete lineup for last Sunday's shoot:

Fred Dunsdon	200	500	600	Ttl
George Stoll	34	32	33	99
Jack Dunsdon	25	33	27	85

Close Contest for Hankey Tennis Cup

George Fudge of Summerland and Ted Cardinal of Pentleton teamed together in the Hankey cup tennis tournament at Vernon Country Club on Labor Day.

The coveted cup was eventually won by Gene Homer-Dixon and Reid Clarke of Vernon, but only after this Vernon pair were tied at ten wins each by two other pairs, Fudge and Cardinal, and Bus Taggart and Ernie Winter of Kelowna.

Tournament officials had to total the number of games lost to find the winner. The winners dropped 59 games, Fudge and Cardinal 61 and Winter and Taggart 65.

Capt. Temple's Horse First at Gymkhana

At the fourth annual horse show and gymkhana staged at Kelowna on Sunday and Monday, Sept 2 and 3, by the Okanagan Light Horse Improvement and Show Assn., in co-operation with Kelowna Lions Club, "Jumper" owned and ridden by Captain A. M. Temple of Summerland captured first prize in Class 11, Elementary Dressage.

Capt. Temple was also a member of the Pentleton team which placed second to Kelowna in the tent pegging competition, along with A. Hyndman, Roy Walsh and Jack Buckley.

Mrs. E. A. Rendell's Gibraltar of Vernon and F. H. Wilmo's Highjacker, of the same city, tied for the grand championship at this big show which attracted 3000 persons the two days.

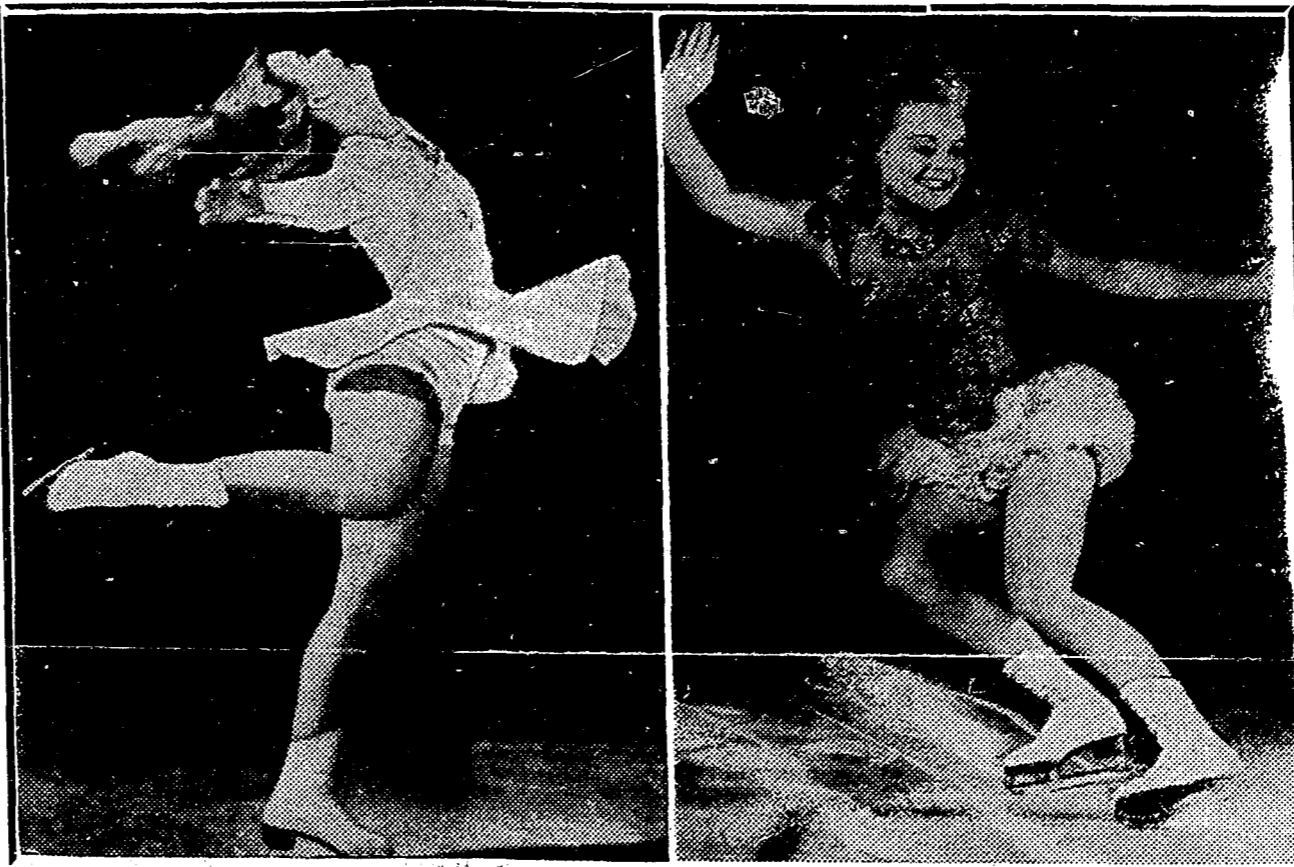

Figure-skating star Sonja Henie was reported today to be mapping an ice war hot enough to melt the rinks — with Ottawa's Barbara Ann Scott, 1948 Olympic champion, as her target. The blond from Norway was described as jolted out of plans for a gradual retirement by news from Chicago that Arthur M. Wirtz, producer, had

engaged Miss Scott to replace her in the next Hollywood Ice Revue. Twenty-three-year-old Barbara Ann, whose home now is in suburban Toronto, is expected to fly from England about Sept. 28 to start rehearsals. Appearances will include those at Madison Square Garden, New York, Chicago Stadium, St. Louis and Detroit.

KELOWNA CHIEFS WIN 14-1

Red Sox Go to Pieces in First Game for Junior Baseball Title

Summerland Red Sox went to pieces at Kelowna last Sunday to drop their first championship playoff series game to the Chiefs of that city by a 14-1 count.

John Wishlove had the Red Sox under control throughout and the Red Sox' ten errors contributed mainly to their one-sided downfall. Because of an interference play, Red Sox announced they would protest the game but at presstime no protest had been filed with League President Les Gould.

Manager Joe Sheeley has subsequently announced that the protest has been waived by Red Sox officials.

It was in the second inning when Casey walked, stole second and third and came home on a close play at home. Murray was at bat and he was called out for interference on the play.

Umpires Stand Fast
Red Sox protested vigorously that Casey should be sent back to third because of the interference, but umpires ruled differently and allowed the run to count. It was on this play, which left Chiefs ahead 6-0, that Red Sox said they would register a protest to the league.

Ken Brawner limited the Chiefs to eight bingles but he failed to get support from his teammates. He struck out another eight and issued only three passes to first. Brawner's own fielding left a lot to be desired, however, as he committed three of the ten miscues himself.

On the other hand, Wishlove had a slight advantage, whiffing ten batters and only allowing three hits.

Right off the bat the Chiefs took a big edge, scoring five runs in the first frame off three hits and the same number of errors. The home-sters added single runs in the second, third and fifth frames to sew up the contest. Three-run splurges in the sixth and eighth were just added misery to the Red Sox.

Bill Eyre scored the only Red Sox counter, in the fourth when he opened the inning with a single, was advanced to second, stole third and came across as the side was being retired.

Chiefs Play Fine Ball
Kelowna Chiefs played errorless ball, Murray at short being the defensive star with eight chances handled perfectly. Ross Lander handled another four at second.

Fisher had a bad day as backstop, committing as many errors as his pitcher. Hooker handled four chances in tip top fashion while Bill Eyre handled another three in good style.

Chiefs ran wild on the bases, stealing 11 sacks at will. This was the same type of game the Red Sox turned in the first contest in the series with Pentleton Beavers. However in the next two games the Red Sox calmed down and trimmed the Beavers decisively in the next two frames.

Red Sox are certain they can give the Chiefs a real battle here this Sunday and are determined that it will be close, at any rate. The main Red Sox "bee" over last Sunday's contest was that the Chiefs have been taught to play a

"dirty" brand of baseball, which the Summerland players resent.

Wakabayashi by Brawner; passed ball, Fisher 1; umpires, Gourlie and McCargar.

GEORGE PENNINGTON HIGH IN C CLASS TRAP SHOOT

George Pennington's name was not included last week in the report of the Interior championships trap shoot at Vernon. The well-known Summerland marksman captured C class championship with a score of 42 out of a possible 50. Gordon Finch, Kelowna, was A class winner with 49, while Henry Rottacher of Kelowna won B class with 45.

NEWS FROM THE GREAT OUTDOORS

(By Bert Berry)

FISHING

Okanagan Lake: Still pretty good, but mostly smaller ones being caught. The biggest one caught here was about 2 pounds. Still catching them off the rocks, casting Silver Lake: One party reports fishing still good, but road bad.

Glenn Lake: Fishing still okay here.

Hearwaters Fishing Camp: Good fishing still.

Fish Lake Camp: Upper lakes have been giving good catches this past week.

Oyama Lake: Dave Waddell reports his party caught some up to 4 1/2 pounds on the fly.

HUNTING

Best of luck to you all on opening of the grouse and deer season this Saturday, September 15.

Blue, Franklin and Willow grouse open Saturday and close Monday, October 15. Six of one species or eight of all species allowed daily and 24 in the aggregate for the season.

One buck only allowed deer hunters again this year, with the season Sept. 15 to Nov. 30. Elk open on Saturday, for the same length of season as deer. In this area, elk may be shot east of Okanagan lake and river in South Okanagan and Similkameen electoral districts.

There is a combination bag limit of one elk or one moose in this year's regulations.

There is a change in the game-tag regulations which all hunters should note carefully:

"Each deer, moose, wapiti (elk) and mountaingoat . . . shall, immediately following the killing or taking thereof, have a seal which

Hockey Loop to Start About October '20

Schedule for the Okanagan Senior Amateur Hockey League is due to get underway on or about October 20 with a 24 home-game playing schedule involving Kamloops Elks, Kelowna Packers, Vernon Canadians and Pentleton's 3-V's, newest loop acquisition.

Four interchange games will be played at home against teams of the Western International league, Trail, Nelson, Kimberley and Spokane, and two with coast squads, Kerrisdale and Nanaimo.

Each Okanagan team will make one swing through the Kootenays and to the coast. Doubleheaders will be played at Spokane, Kerrisdale and Nanaimo but only the first game will count in league standings.

Playoffs will begin about March 1 with the bottom team in league standings dropped, the second and third teams playing a best of three semi-final series, the winners meeting the pennant champs in a best of seven tilt.

Pentleton's new playing-coach is Bill Carse, formerly in that position with Vancouver Canucks.

Oldtimers Bow To Merchants is Diamond 'Classic'

There was lots of fun at Living Memorial athletic park Sunday afternoon when the Summerland Merchants' tied with the "Oldtimers" on the ball diamond.

If anyone is interested in the final score was about 9-5, with the "has-beens" showing flashes of brilliance to keep the young 'uns in check.

Doc Vanderburgh was manager of the Oldtimers, and wore a ball suit which was gleaming new back in the early 20's.

But Brother Harry Vanderburgh went him one better and wore a jacket which went back to 1913 when Summerland's chief rival was the Okanagan College team from up on Giant's Head.

Larruping Les Gould, who was one of the interior's best known hurlers when he was going his best lick as Summerland's chief moundsman, went back for three innings and was touched for five runs in the second frame.

Al Coffey took over four frames and allowed three more, while Bill Evans went the last two frames, allowing one final score.

Merchants used a variety of chuckers and would-be chuckers, starting with Chuck Brawner, then Gil Jacobs, then Lefty Gould and Gil Jacobs alternating and finally George Taylor.

The latter had been holding down the backstop position but gave that to Babe Kuroda, who had been in centrefield and shortstop positions.

Ben Trafford was at firstbase until Al Coffey relieved him after his tour on the mound. Roy Kuroda rivalled his brother Frank in the centre garden, while Harry Vanderburgh held down left field until Wendall Schwab relinquished his catching duties in favor of Roy Kennedy.

Colin McKenzie cavorted around second base while the star of the Oldtimers was Bob Bleasdale, who took part in several sparkling plays. Ray Fredrickson was the third-sacker. Jack Dickson played a couple of frames in right field but stretched a ligament and bowed out in favor of Jim Heavysides.

Francis Gould was first baseman for the Merchants, with John Vanderburgh holding down third base. Fred Kato and Harry Bradick were second basemen, Jomori at short and Weltzel playing both the outer garden and in the infield. Jacobs started at right field, went on the mound and was at first for a time.

OKONOTS TAKE PLAYOFFS IN TWO STRAIGHT GAMES

Kamloops Okonots edged Rutland Adanacs 8-2 at Rutland last Sunday to take the Interior league playoffs two straight. One run at the top of the ninth decided the struggle which was a pitchers' duel between Brewer for Okonots and Mits Koga of Adanacs.

Kelowna Visitors Enthuse Over Beauties of Experimental Station

KELOWNA—The Summerland department of agriculture experimental station is better kept and more beautiful now than it has been at any time at least since prewar days. This was the opinion of a group of Kelowna people who visited the farm on Friday.

The ornamental section of the farm—that in which the general public is interested—is a riot of color, the lawns are well kept and the whole place has a neat and tidy look. The flowers seem to have done particularly well this year and beds of petunias (some new varieties), geraniums, zinnias and others make a complete flower show within the grounds.

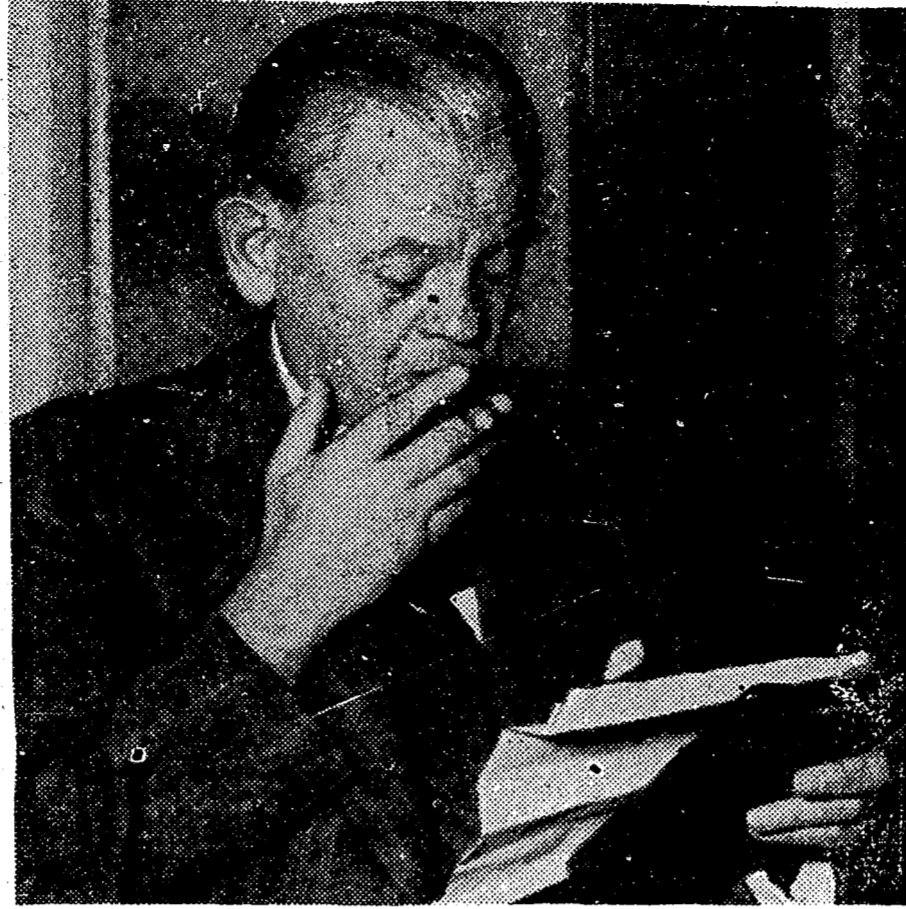

Something new has been added. Gates have been erected with restricted access to the grounds from nine a.m. to nine at night. This was probably a wise move and one forced by the indiscriminate use of the property at night.

The growing of tuberos began

las seems to have taken a fillip locally during the past few years and gardeners interested in this exotic flower would be interested in seeing the very fine specimens of several varieties Dr. Dick Palmer has growing in window boxes and in front of his home. Some of the blooms are little short of magnificent.

The whole appearance of the farm gives ample evidence of better care. The lawns are green, the flowers and shrubs healthy, the borders neat and tidy. While the farm is primarily an agricultural station, that section of it which caters to the home beautification, the soul-feeding part of agriculture, is a decided asset to the Okanagan and has contributed much towards making this the Valley of Flowers it is. It is encouraging to note that this year, apparently, this section of the farm has received a larger financial appropriation than it did during the war years and immediately thereafter.

To Visit McGill

RECOGNIZED as a top British expert in the field of industrial management consulting, Lt. Col. L. Urwick arrived in Montreal on the liner Empress of Scotland recently. He will lecture on business administration at the University of Toronto this fall in addition to visiting McGill, University of Manitoba and the University of British Columbia. He is the first Briton to hold the Gold Medal of the International Committee of Scientific Management.

Summerland is Filing Protest On New Costs

Summerland, in company with four other municipalities in the province, is waging a small "war" against the method adopted by the provincial government in attempting to saddle the municipalities with an extra amount of social assistance burden.

Objecting along with this municipality are Peachland, Armstrong, Spallumcheen and Grand Forks.

Some time ago provincial authorities attempted to convince municipalities that the 80-20 percentage on which the government and municipalities have operated since the 1930's should be changed to 75-25 to meet the rising costs of social service allowances.

Such a storm of objection arose that the 80-20 basis was put into effect again but the increased allowances provided for by the government in lieu of higher cost of living was to be split on a 50-50 basis between the government and the municipalities.

It is on this latter deal that the five municipalities are now "digging in their heels", and have intimated that the entire situation will be reviewed at the forthcoming UBCM convention at Harrison next month.

Other municipalities have entered their objection to the new split basis, but have made payments to social assistance cases on the increased basis.

Two Summerland residents residing now in Surrey and Kelowna municipalities have been provided the increased allowance but Summerland municipal council is balking at meeting the extra payments, believing that the principle of the division of payment is illegal.

Surrey has declared it will take the case to the board of arbitration but Summerland municipal council was informed on Tuesday by Municipal Clerk Gordon Smith that he does not believe this board is authorized to deal with such a case.

Summerland has agreed to the increase in payments but has registered its objection to the method of division of payment, it was pointed out on Tuesday.

Offers Property to Eliminate Bad Curve

As soon as he obtains title to the property from the Kamloops registrar, Elmer Johnston will allow the municipality an easement across his property in Peach Valley to eliminate a sharp turn in the municipal road.

This corner is extremely sharp at present and in the winter vehicles have difficulty in keeping out of the ditch, council was informed. An electric light pole would have to be moved and the corner re-surveyed, total cost to be about \$100.

As soon as title to the property is obtained by Mr. Johnston council will proceed with the work, it was agreed.

Richard Lewis to Talk on Jamboree

Richard Lewis, Summerland Boy Scout troop leader recently returned from Austria where he attended the World Scout Jamboree, will shortly embark on a series of talks to Boy Scout troops throughout the interior region.

He also will address the Legion branch here at the October meeting, the Legion being the main sponsor of 1st Summerland Troop.

It is likely that various service clubs will be calling upon the local boy to give a description of his famous trip to Europe

CLOSE ROAD IN GULCH

Municipal council agreed on Tuesday that the road down Chinaman's Gulch should be closed permanently because of the erosion in that vicinity.

An Old Sea Shanty

Breakage at Point of Union of Young Reliable Cot Trees Causes Concern

Breakage at the point of union, with the rootstock has occurred in a number of young Reliable apricot trees. In most orchards the percentage of trees which have broken off is small but the number of trees affected in this way is large enough to cause concern regarding the future of this new variety.

This situation was discussed at length by the fruit varieties committee of the Okanagan Agricultural Club. Dr. R. C. Palmer, experimental station superintendent states.

A study of apricot production in California, Washington and British Columbia reveals that breakage of young apricot trees at the union with the rootstock is by no means a new phenomenon. Breakage has occurred quite frequently with varieties such as Riland, Perfection and Royal.

Similarly, it is known that breakage has occurred with cots worked on several different rootstocks. Nevertheless with peach seedling rootstocks, which are now used extensively by British Columbia nurserymen for propagating apricots, breakage of Reliable has been greater than breakage of Wenatchee Moorpark.

It is possible that experiments now in progress at the Summerland

experimental station may reveal that Reliable unites better with such stocks as apricot peach seedlings, Marianna 2624, or Myrobalan 29-C than it does with peach seedling rootstocks.

Apricot trees worked on these other rootstocks will soon be available in limited quantities from nurserymen for growers who are interested in testing them. It is usually considered that apricot seedling rootstocks are not suitable for use on the lighter and less fertile types of soils.

However, most of the apricot trees available from nurserymen during the next few years will be worked on peach seedling roots. With this fact in mind growers who decide to plant the Reliable variety are advised to support the trees with stakes strong enough to last for four or five years.

Experience has been that the older varieties become less susceptible to breakage after they have reached five or six years of age and it is hoped that Reliable may show a similar tendency. As breakage is most prevalent in young apricot trees which have made exceptionally rapid growth, it is important to avoid excessive fertilization or other stimulation.

Cattle Guard Was Damaged by Grader

Councillor F. M. Stuart was authorized to investigate further the cattle guard on the Prairie Valley road to Fish Lake and come to an agreement with the Meadow Valley Stock Assn. concerning replacing the decking.

Council was informed that the municipal maintainer had been responsible for damaging the deck, so it was agreed that the municipality should cover part of the cost of new decking.

High School Releases Senior Boys to Relieve McIntosh Apple Crisis

All boys in the senior high school class were released from school on Tuesday to assist in harvesting the McIntosh Red crop in Summerland district.

This sudden action was necessitated when the drop of McIntosh in this district became severe and growers became concerned that a big portion of this valuable crop would be lost unless quick action was taken.

C. J. Bleasdale, chairman of School District No. 77 ordered the student release at the request of Colin McKenzie, chairman of Summerland BCFGA local.

General agreement is voiced by packinghouse managers in this district that the loss through drop of the McIntosh crop will be at least ten percent and may run as high as 15 percent.

In some orchards it is much higher but that is the general average. The situation here is not as severe as reports from Kelowna indicate.

Here, the crop was estimated a short time ago at 140,000 but this morning the provincial agriculturist's office gives the estimate as 120,000 boxes.

Yesterday afternoon a brisk wind sprang up but opinion is divided on the results. Some orchardists and packinghouse operators lay most of the loss to the wind, but others say that the drop was just as bad while the weather remained calm.

McIntosh picking is being rushed in all orchards and should be fairly well completed by the weekend, with some final picking early next week to finish the crop.

The Macs have never come off so fast before, one observer remarked.

Reason for the extra heavy drop in McIntosh is not known although most persons conjecture that the late spring frost probably was a contributing factor.

Most packinghouses will have half the available Mac crop under cover by tonight, it is expected.

School Board stresses that the school has not been closed entirely but only the boys from the senior classes were released in the emergency.

Last week the school board issued a statement deploring the number of pupils still absent from school, but in the face of the emergency in the orchards trustees acted promptly to assist the industry.

McIntosh are always inclined to drop more than other apple varieties, but the drop was much more severe this year than in any past season.

Only No. 1 Prunes Peach picking is practically completed while prunes are showing signs of winding up, although there is a great deal of sorting still to be done.

Prunes have not been of good quality this year and B.C. Tree Fruits issued an order this week that only No. 1 quality would be accepted for the fresh fruit market from now on.

The local pear maturity committee has declared September 28 as the starting date for picking of d'Anjou pears.

TO DECIDE ON FATE OF SALMON ARM SCHOOLS

SALMON ARM—Saturday, September 20 is the day when Salmon Arm municipal property owners will decide whether they are willing to provide the funds required to keep the schools open for municipal pupils for the rest of the fall term.

The Summerland Review

B.C. Jaycee Officers to Come Here

Provincial Jaycee President Bob Innis of Kamloops and District Councillor Clare Way of Penticton will be present at the official installation of new Summerland Junior Chamber of Commerce officers for 1951-52 when the annual banquet is held at the IOOF hall on Tuesday, October 9.

The installation banquet date has been altered from the original date of October 2. New president is E. F. (Ted) Weeks, a member of the MacDonell elementary school teaching staff.

Announcement was also made at Tuesday's Jaycee session in the Nu-Way Annex that a regional district conference of Jaycees will be held in Summerland on Sunday, October 14. Jaycees from Kamloops to Osoyoos will be present.

Richard Lewis, Summerland Boy Scout who attended the World Boy Scout conference in Austria this summer was guest speaker at the Jaycees meeting on Tuesday.

Associated Boards To Meet at Oliver

First quarterly meeting of the Associated Boards of Trade of the Southern Interior since the annual session held in Summerland last June will be held at Oliver next Wednesday, September 26, it was learned yesterday in a communication from W. H. Whimster, secretary.

It is understood that Mr. J. L. Jenkins, Princeton, who was appointed as president at the Summerland meeting despite his absence, has decided to accept the post and carry on at the helm of

Here on Monday—

Hon. W. T. Straith

minister of education in the provincial government, who will bring greetings from his department and officiate at the ceremonies in connection with the opening of the new junior-senior high school in Summerland at 2 o'clock on Monday, September 24.

Mr. Straith will be accompanied by Mrs. Straith and his sister, Mrs. Waldon, of Victoria.

Full details concerning the opening ceremonies, with descriptions of the new school and other data of interest to the community in regards to the school operation may be found in The Review's supplement included in this issue.

Further pictorial records of school activities are included in the main portion of this issue, as well.

EXPORT DEAL ASSURED

At presstime today A. K. Loyd stated information had just been received that the UK would be purchasing apples from Canada through private channels, thus establishing the fact there will be an export deal.

No further information is available.

Many First Prizes Come to Summerland from Fall Fair

Summerland exhibitors at the Interior Provincial Exhibition at Armstrong on Wednesday and Thursday last week made nearly a clean sweep of many sections of the big show, bringing back a multitude of prizes.

W. F. Ward, with 15 first prizes, two seconds and four thirds was the top man in the fruit class.

The Review was informed last week that Mr. Ward had won the coveted Better Fruit Special which goes to the Buckfield trophy. This was mistaken information, as Mrs. J. C. Clarke of Keremeos was the winner of this prized trophy, with Mr. Ward a very close second.

J. M. Kosty of Vernon was third with E. C. Bingham and George Dixon, both of Summerland, fourth and fifth respectively. D. Evans of Oliver was sixth.

Stirling Memorial Comes Here One of the premier honors did come to the Ward family, however, as Bill Ward, son of the chief Summerland prize winner, captured the J. R. J. Stirling memorial trophy for sons and daughters of interior fruit growers. Connor Clarke of Keremeos was second, Vernon Kosty of Vernon third and Bruce Bingham of Summerland fourth.

W. May was Summerland's chief proponent in the vegetable class, winning four firsts for table carrots, broccoli, white pickling onions and beans; three seconds for cantaloupes, savoy cabbage and cauliflower; and three thirds for short red table carrots, globe table beets, and yellow Danvers onions.

W. F. Ward placed second in the same onion class. Mr. May also was successful in the floral class, his chrysanthemums, single asters, and African marigolds winning first.

Continued on Page 10

Three Boards of Trade Pass Brief Calling For New Highway Work

By unanimous vote, the Summerland Board of Trade, meeting for its first fall session in the IOOF hall last Thursday evening, endorsed a suggested brief which will be presented to Hon. E. C. Carson, minister of public works, Victoria, seeking an early start on the modernization of the Penticton-Deep Creek section of Highway No. 97.

The same evening, Penticton Board of Trade took similar action while earlier in the week the Kelowna board executive went on record as being unanimously in favor of the proposal.

The minister of public works is being asked to "include in the highway appropriations for 1952 to be endorsed by the B.C. Legislature next spring, sufficient monies to proceed with the immediate modernization of the Penticton-Deep Creek section of Okanagan Highway No. 97, so that it will be brought up to the standard of other portions of this modern highway."

This brief was produced following a meeting in August of presidents of the three trade boards following a banquet tendered by the Kelowna board to Lieut.-Governor Clarence Wallace.

Col. C. G. Beeston, Kelowna board president, invited Dr. W. Roy Walker, Penticton and J. R. (Tim) Armstrong, Summerland, board presidents, to discuss this subject at the Kelowna meeting.

The idea of a joint brief on the subject of the road emanated from the Summerland Board of Trade.

Alf McLachlan considered the brief a well prepared one, when it came up for discussion last Thursday night here.

Suggests 4-Lane Highway

Only suggested addition came from F. E. Atkinson, who believed that the department of public works, when considering modernizing this highway, should build a four-lane, highway along scenic viewpoints, so that tourists could take their time while driving along the outer edges of the roadway and through traffic, including freight vehicles would have the speedier lanes.

Another speaker declared one of the freight lines in the throes of building an even bigger freight truck and trailer than has yet appeared on Okanagan highway.

It was generally agreed that the idea of a highway built for two types of drivers should be kept in mind, but will not be included in the actual brief.

Board members also considered that the brief should be presented in person to Hon. Mr. Carson by its perpetrators, presidents of the three valley boards.

Brief to be Presented

Following is the brief in full: A brief presented to Hon. E. C. Carson, minister of public works, Victoria, B.C., by the boards of trade of Penticton, Summerland and Kelowna, advocating the start in 1952 of a major program aimed at bringing the unfinished section of Okanagan Highway No. 97, namely the Penticton-Deep Creek stretch, up to a modern standard.

We, the representatives of the three aforementioned boards of trade do humbly wait on the Hon. the minister of public works to present to him and his department some thoughts on Provincial Highway No. 97, particularly that stretch which lies between the City of Penticton and the outskirts of the Municipality of Peachland, at Deep Creek.

The boards of trade of these three communities, Penticton, Summerland and Kelowna, being the ones most vitally concerned with the immediate relocation and improvement of this stretch of highway hereby take this opportunity

Continued on Page 4

Harold Short At Helm of Merchants Club

Harold Short was elected president of the Summerland Merchants Baseball club at a general meeting in the Nu-Way Annex last night.

He succeeds Al Holmes, who has held the post for the past two seasons but who asked to be allowed to step down to the vice-presidency for the coming season.

Secretary-treasurer is Miss Nan Thornthwaite, who will undertake a third term in this important post.

She informed the meeting that the club has a bank balance of \$84 to start next season despite heavy expenditures for equipment which kept the Merchants club hard pressed throughout the year.

New uniforms will be essential for 1952 as the present outfits are not in good shape.

An executive of five prospective officials was suggested and will be contacted with a view to assisting the ball players from an administrative angle. Once appointed, the executive and officers will choose the new manager and coaches for the team.

Harry Bradick took over the managerial duties of the Merchants' club midway through last season and Bob Bleasdale became chief coach.

Presentation to Nan

At the Merchants' club windup party held last Saturday night, Miss Nan Thornthwaite was honored with a presentation from the players for her conscientious work as secretary-treasurer.

Hal Short was named Mr. Fan of 1951 and was given a season's pass for 1952 as the man who has been most faithful to the team in the past year.

Tribute to the efforts of Manager Bradick and Coach Bleasdale was also paid by players and club management at the party.

Licence Plates to Have Totem Pole

Provincial government has announced that 1952 licence plates will consist of black numbers on a silvery background, with a totem pole figure framed in the outline of a maple leaf on the right hand side. The new plates will be of aluminum alloy and will be lighter in weight than the old steel ones.

IT'S NO FUN TO BE BLIND

Field Supervisor of CNIB Tells Kiwanians How Blind Can be Helped

Work that the Canadian National Institute for the Blind can do for blind persons and numerous instances of afflicted persons being able to carry on and do work of those with normal sight were given in clearcut fashion to Kiwanis Club of Summerland Monday evening at NuWay Annex by J. C. Hembling, Penticton, field representative of the CNIB.

This great organization was founded after World War I and at its head is Capt. Eddy Baker, Superintendent of the western division is Capt. M. C. Robinson. Wherever possible the organization is handled by blind people, he explained.

Mr. Hembling was a high school teacher in Vernon when he began to lose his sight, and is a member of a well-known pioneer Okanagan family.

There are 200 blind persons, ranging in ages from infants to 97 years old in the Okanagan territory now, he stated.

Some blind persons adjust themselves readily but others need help to make the adjustment and still others just won't try to help themselves.

"Blind people are a cross-section of all of us," he told Kiwanians.

Mr. Hembling gave numerous examples of what blind people can do if they really try. He told of a man in the valley who dug foundations and built a house by himself; of another who built a summer cabin only needing help to erect the rafters.

In these endeavors the CNIB field officer and other officials were able to provide the incentive to go ahead with their tasks.

"I am intolerant of individuals who have sight and yet, through lack of interest, have gone down hill mentally," Mr. Hembling declared, while relating these success stories of blind people.

"It's no fun to be blind," he added at another point, "and what a difference it makes to a blind person when he discovers that he can do things despite the fact he is blind."

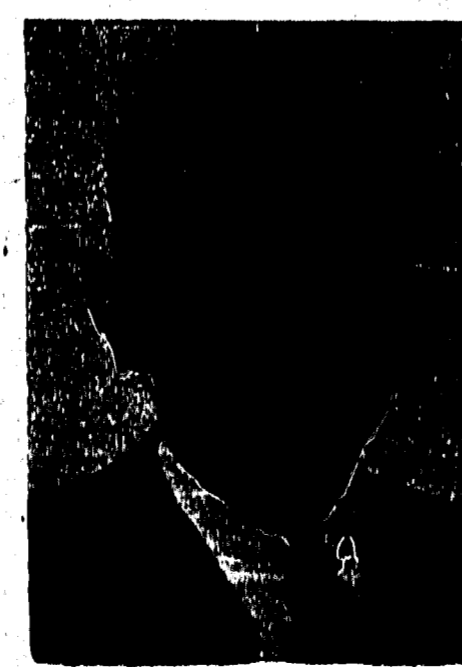

In conclusion, he urged support of the CNIB and also asked Kiwanians to be effective citizens and assist blind people whenever they can, by taking them for drives and doing other similar kindnesses.

The annual CNIB appeal for funds will be launched shortly, it was stated.

Be Thankful for Your New School

NEXT Monday is an important day in the life of this community as it marks the official opening of probably the most important building in the district—the new Summerland junior-senior high school.

For many years Summerland has lagged behind other centres in educational trends because of lack of proper facilities. The old wooden structure which has been home to so many high school classes just wasn't capable of sustaining the new procedures in educational technique.

Principal A. K. Macleod has outlined the transition in educational methods quite clearly in his message contained in the special supplement which The Review is releasing in this issue in connection with the school opening.

It would pay all parents to study Mr. Macleod's explanation in order to obtain a clearer picture in their own minds of the opportunities open to high school students under the two divisions which lead to high school graduation.

Under present-day trends it is important to obtain high school graduation, but to most employers it is not important that this high school degree be that of university entrance standard.

Summerland can now keep a greater percentage of students interested in high school study and can provide the incentive to those students to continue on to high school graduation.

That is one of the chief reasons why we can be particularly joyful over the successful completion of the imposing structure at the corner of Granville and Rosedale, near the main entrance to Summerland's business section.

But there are other important reasons, as well. The provision of a modern gymnasium where sports-minded individuals and teams can have an opportunity to practice and play under proper conditions is a great boon to the community.

From a cultural angle, the new school auditorium has already proved itself to be one of the greatest assets that Summerland has obtained in years. But the auditorium is not only useful for staging dramatic productions, holding public meetings and shows, it also provides a central meeting place for the school students, and supplies a much-needed centre for lunch-hour activities.

School administrators in Summerland have long been handicapped in that there was no place where the entire student body could gather. This lack has been rectified.

This winter, it is hoped that at least one hot dish will be made available to the hundreds of students who bring their lunches to school. If the parents desire an increased service, the school board is prepared to supply a hot meal.

Few school centres in this province have a greater preponderance of their enrolment staying at school for the lunch-hour. Such accommodation as is provided in the new cafeteria-auditorium will be of great benefit in keeping Summerland youngsters healthy in the winter months.

Summerland has much to be thankful for in the new school building and has much to thank a small handful of hard-working and efficient school board members for their hours of time and study which resulted in such a compact functional unit as the new junior-senior high school.

Lucky the girls studying home economics at Summerland High! The "Home Ec" room is such a clean, sparkling, bright place, that it is just fun to be working in there.

It's an ideal spot, and probably on a smaller scale, a mental model of what every girl hopes to have as a kitchen in her home of the future.

Some mothers have been heard to say that they get quite a bit of second-hand instruction in various ways since their daughters have been taking home economics. Even after years of housekeeping one woman was surprised to find easier ways of cooking were being taught at school, and several have found that the text book has excellent, reliable recipes.

At least one young bride of this year, and there are probably more, keeps the cookery book right out on her kitchen counter, and her husband coming in to lunch found her stirring with one hand and hastily turning over its pages with the other.

The home economics room is on the south side of the west wing. It is fifty-six feet long and twenty-eight feet wide, giving a good proportion for the two activities of cooking and dressmaking. It is light throughout, partly due to the diffusion through glass blocks which are above the long row of east windows. Painted green, this monotone is pleasantly broken by the white of six sinks and five electric stoves. There are a number of cupboards, tables, and plenty of counter space for working.

The room is arranged so that the classes can work in small groups, thus giving each individual student a maximum of experimentation and time, and more nearly resembling a possible, practical home group.

Laying a table, cooking and serving meals, are on the agenda as the course advances.

A refrigerator is there for storing materials as well as teaching the care of this important unit in

modern living.

There is a washing machine, laundry tubs, a drying cupboard, and care of clothing and linens while going through the laundering process is part of the curriculum.

Three electric sewing machines and three treadle machines have been provided for sewing, with convenient table for cutting-out. Here girls are taught, not only to sew, but how to dress suitably and economically.

The home economics classes are some of the most enjoyable and useful in a girl's year at school.

It is the aim of the Home Ec course to teach the girl not only all the modern methods available, but also to instruct on equipment which is not so modern but which she will probably have to use when first setting up a home.

Therefore, a wood and coal stove is available, alongside the electric units, while the three "old-fashioned" treadle machines are ranged alongside the shiny, new electric sewing machines.

Success at Armstrong Fair

IN Okanagan Valley agricultural circles there is one premier show in the fall season. That is the Interior Provincial Exhibition which is more popularly known as the Armstrong Fair.

For some years the South Okanagan did not participate in this show to any extent, but gradually the glamor of a Fall Fair has seeped through with the result that Summerland played a major role in the fruit, vegetable and fanciwork classes last week.

It is heartening to see individuals take an in-

terest in such an event and entering exhibits of their own produce and handiwork. It shows a pride of ownership and achievement which is healthy.

Summerland exhibitors, W. F. Ward and his son Bill, Mrs. George Inglis, Mrs. George Woitte, William May, E. C. Bingham and son Bruce, George Dixon and Mrs. James Aitken are to be congratulated that they made the effort to exhibit their wares at Armstrong. Their efforts were crowned with success and it is hoped their lead will be followed by a greater number in future years.

Signifying Nothing *By RUSTICUS*

This is an unpaid, unashamed, pulp for a magazine which I think every Canadian should read—Macleod's.

Not just because it is Canadian. That is important, for surely anybody living in this country wants to learn as much about it as possible, should read of Canada first. Not, please not, Canada only. American publications are desirable also, and it would be a big help to international understanding if every Canadian home had Canadian, American, and British publications coming into it regularly.

A much bigger help if American homes did the same, and I'd like to see Canadian magazines with as big a circulation south of the border as Life and the Satevepost have up here.

A Canadian home, it seems to me, should subscribe to Canadian magazines first, and to more of them than those of any other country. Their Canadian-ness surely gives them top interest, and the quality of the Canadian publications which have survived the sharp American competition is fully as high as that of their competitors.

The big reason for my enthu-

si-asm for Macleod's is this magazine's outlook on world affairs. Most popular American magazines follow a standardized line on international affairs. Who sets the standard I do not know, but you can rely on its sameness; everything American is best in the world, everything Russian or Communist is to be hated and loathed and given no consideration whatsoever.

Macleod's is much less extreme, much more broad-minded, following what seems to me the saner belief that Communism, like any other disease, must have a cause and should be studied that the cause may be found and the disease eradicated.

Thus the current issue has a very thoughtful article on Europe, whose war-weary peoples, poverty-stricken and short of food, are in many cases so unhappy under their present governments—which we support, even if they are as foul as Franco's as long as they are not Communist—that they feel any change must be for the better. Therefore they are quite capable of voting Communist, not because they really want to, but merely because they understand things like food and clothing better than de-

mocracy and liberty, and we who preach the latter have done little to furnish the former.

The current Macleod's, too, has a striking article on the experience of an assistant editor who, because he was taking pictures in the southern United States, like any tourist, and some empty-headed girl remarked casually that he might be a Communist, was arrested, searched, grilled thoroughly—by police officers so ignorant they did not know a passport when they saw one—taken before the FBI, and nearly ended up in jail for "crimes" of which he knew nothing.

Exactly how you'd expect an American or Canadian to be treated by the Russian secret police if he was caught in their country. But this was in the sweet land of liberty of which we sing, on July Fourth, their Independence Day. Nothing shows better how excited and prejudiced our good neighbors have become in their anti-Communist hysteria.

There is an excellent editorial in that last Macleod's—they have had several outstanding ones lately. This one suggests that General Eisenhower, with his great gift for getting opposing factions to work

PORTRAITS

Mrs. Janet Splers McNab

When Janet Splers married Nell McNab, the twin brother of A. P. McNab, Lieut-Gov. of Saskatchewan in 1900 at Raeburn in Manitoba, it was a lovely September day. After the wedding and reception all the guests drove with

the young couple by horse and buggy to Oak Lake station. They were given a great send-off because they were going to Dawson City to live.

They went by train and boat and dog train, finally arriving at the log cabin which was to be their home for about five years.

Mr. McNab went to the Klondike in '97, the days of the gold rush, and when Mrs. McNab lived there everything was as pictured in western movies, with dance halls, and gambling houses, where a poke of raw gold could disappear as easily as it had come.

She has gone down a mining shaft in a bucket and come up by windlassed rope. She has watched and shared in the excitement of the spring clean-up, when the miners washed the winter's dump of black sand, and the gold, that held them all there, dropped through the riffles on the bottom of the sluice-box.

Remembering the sluice-boxes, Mrs. McNab says they are just like the flumes here. As soon as the northern spring breaks and creeks and ponds are no longer frozen, water pours through them, and the rush is on to find the takings of the long dreary months just past.

Their elder son Clarence was born in Dawson City, Dr. Horace

Norquay was the doctor, a son of the Hon. John, well-known politician of the north.

They left the Yukon, coming down to Lake Athabaska, where at Grouard, their son Malcolm arrived.

Then in the Peace River country they homesteaded at Griffin Creek, and other places.

While they did mixed farming at various spots through the years, Mr. McNab bought and sold grain.

Wanderlust overtaking them again, they outfitted at Peace River Crossing, to go adventuring on the McKenzie River and engage in trapping. For twelve years they lived on and around this big, northern waterway.

At Fort Wrigley they had cabins for the winter, and trapped fox, marten, lynx, wolf, coyote and mink. In the summer they lived on the boat, pitching a tent by the river sometimes, while they prepared winter food for themselves and their dogs. They fished, and canned their catch.

They found the Indians good neighbors. Mrs. McNab was often called in to do nursing, and in the 'flu epidemic was constantly busy caring for those who were ill.

She has been the nurse when many a little Indian baby arrived. Continued on Page 6

THIRTY YEARS AGO

September 16, 1921
Summerland hospital is pronounced by hospital authorities to be the model rural hospital of the province. The hospital board and the ladies' auxiliary are making strenuous efforts to pay the balance due the contractor on the building. During the winter a series of lectures, entertainments and dances will be held for this purpose.

The advertising campaign conducted by the Traffic and Credit Association and the BCFGA is producing good results. One good effect it is having is to post dealers on the condition of the B.C. crop and time to expect shipment of the different varieties of fruit.

Summerland entry in the district display at New Westminster was given third place because it was outnumbered in the number of plates shown. Some exhibitors had double the amount of the local entries.

That All's Button was a success was proved by the large attendance at the Empress Theatre at Pentton this week when every seat was occupied to see this well worth while film.

TWENTY-FIVE YEARS AGO

September 17, 1926

Grote Stirling, Conservative candidate in Yale, has a lead over F. B. Cossitt, Liberal candidate, of 3,802 votes, indicating that he will secure a final majority, the largest in the history of Yale riding.

Another dam at Whitehead Lake is under discussion by municipal council. It is considered to be the cheapest storage of any so far constructed by the municipality. Although they have 80 feet there now, they can get 200 acre feet.

Hot ashes emptied outside the house of Mr. Cran were scattered by a little breeze into the dry grass, causing it to catch fire. It was noticed from the Gulch Hill and a fire alarm turned in. Mr. Continued on Page 6

In three different departments of the new junior-senior high school practical training in essentials is stressed. In the above pictures manual arts and science work is depicted, with Harry Wilson operating the intricate metal lathe, Ron Ritchie on the woodworking lathe and Don Allison and John Palmer demonstrating one of their experiments in the science laboratory to a group of interested visitors when the new school was first thrown open to the public.

BOY SCOUT ACTIVITIES

The first troop meeting had a small but enthusiastic turn-out on Tuesday. By next Tuesday it is hoped that a near full attendance will be possible with some boys back to school and finished with emergency fruit picking work.

There is an opening in the troop for four new recruits. Those boys wishing to join should come out next week and get application forms to be filled out. There will be a full program and every Scout is asked to come in full uniform.

Swimmers and athletes badges were presented to Scouts who earned them at summer camp. The balance will be given out next week.

The troop is proud to welcome back P/L Richard Lewis from his trip to Austria with the Canadian Scout contingent to the World Scout Jamboree in Austria. We hope next week Richard will be able to tell us of some of his experiences.

Notices: Next meeting Tuesday, Sept. 25, at 7:00 p.m., at Youth Centre.

GUIDE NEWS

1st Company

The 1st Company of Girl Guides held their first meeting of the season on Wednesday, Sept. 12 with 19 Guides present, not bad for a first meeting, but we hope to have full attendance from now on.

Inspection was held and it was noted, with regret that several Guides were not in uniform.

Miss Atkinson very kindly came to assist Mrs. McKenzie and the first part of the evening was spent in bringing the record-book up to date. We were badly in need of a little exercise and fun by this time, and so we all played some games learned at the Guide camp. Campfire followed and we sang songs also learned at Guide camp. The meeting closed with Taps.

We are very sorry that Mrs. Evans is unable to carry on with Guides.

Cub Calls

1st Summerland Pack

First fall meeting was opened with the grand howl and inspection. Instruction was given on the Union Jack, knot tying and first star tests.

The Cub pack is at capacity right now and no more prospective Cubs can be enrolled.

Duty patrol for Sept. 24: Red Six.

Flin Flon Clan Holds Re-union

Approximately 125 former Flin Flon residents gathered at Manning Park on Sunday Sept. 2 for the second annual Flin Flon Re-union. Members of the clan gathered from many points in the interior as well as the coast, including two from Vancouver Island.

From Summerland were Mr. and Mrs. Cecil Wade, Mr. and Mrs. W. Eyre, Mr. and Mrs. F. W. Croft Sr., Mr. and Mrs. F. W. Croft Jr., Johnny Croft, Mr. and Mrs. Colin Campbell, and their respective families.

Three-Pound Spanish Onions on Display

Nat. May, who was an interested visitor to the Armstrong Fair last week returned home with two enormous Spanish onions which he brought to The Review office. These prize-winning onions were grown by F. W. Hack of Oliver and each weighed three pounds and three and a quarter pounds. There were others which weighed more in Mr. Hack's display, Mr. May declared.

Poor eyesight won't get you out of the army nowadays. They just put you up front where you can see better.

RECIPE HINTS

A SPARKLING MOULD of grape jelly tastes so good with hot muffins, biscuits, and toast. Use an old clean, sterilized teapot to pour the melted paraffin over the jelly. It makes a neat and easy job.

EVERY housewife knows that jams and jellies add just the right touch to meals. And most women like to make the sweet "spreads" since it is an easier task than it was in grandmother's day. Grape jelly can be made when grapes are in season, or with home-made bottled grape juice for quick results. Here's a very good recipe, using the bottled juice.

Quick Grape Jelly
Two cups grape juice, 3/4 cups sugar, 1 box powdered fruit pec-

tin. Measure sugar, and set aside. Add 1 cup of water to the grape juice and mix well, then measure 3 cups of juice into large saucepan and place over high heat. Add powdered fruit pectin and stir until mixture comes to a hard boil, then immediately stir in the sugar. Bring to full rolling boil and boil hard one minute, stirring constantly. Remove from heat, skim, and pour quickly into glasses. Paraffin them at once. (Makes 7 6-ounce glasses).

Kiwanis District Convention is Attracting Summerland Delegates

The Kiwanis Club of Summerland will be represented at the 1951 convention of the Pacific-Northwest Kiwanis district to be held September 23 to 25 at Vancouver, Club President Lacey Fisher.

E. Engdahl, Spokane, Wash., cash and door manufacturer and trustee of Kiwanis International, will be in attendance.

Delegates from 199 clubs in the district, representing a membership of 10,850 business and professional leaders, will participate in the various sessions. Committee conferences, a discussion of plans for the coming year, and election of officers will highlight the convention program, Mr. Fisher said.

The presiding officer will be Harold R. Blything, wholesale meat distributor of Portland, Ore., and governor of the Pacific-Northwest Kiwanis district.

Delegates who will represent the Kiwanis Club of Summerland at the meeting are Jack Towgood, Lacey Fisher and Frank McDonald.

Secretary Father A. M. Meulenbergh and Jack Lawler have signified their intention of attending the convention, while probable attendees are N. O. Solly and W. S. Ritchie. Mrs. Towgood and Mrs. Fisher are attending along with their husbands.

DONALD T. FORSYTHE

er announced on Monday.

Donald T. Forsythe, vice-president of Kiwanis International, will be featured on the speakers' program during the three-day meeting. He is editor and publisher of an outstanding weekly newspaper at Carthage, Ill., and president of the Greater Weeklies Associates Inc. He is also a director of the Carthage Marine Trust Company and a member of the Board of Carthage College.

In addition to Mr. Forsythe, who will serve as the official representative of the international community service organization, Don

CLASSROOM COLOR SCHEME
The color scheme in the new junior-senior high school here is scientifically designed to aid natural light coming through the glass brick and the windows. All classrooms are painted different pastel colors, with warm colors on the north and east exposures and cool colors on the south and west exposures.

Praise For Agricultural Methods Of Barbados Given by Atkinson

Although there are only 15 inches of soil over the coral reefs of the Barbados Island, yet sugar cane has been grown in quantity for 300 years and a record crop had just been harvested.

This was one of the many comments made to the Summerland Board of Trade monthly meeting in the IOOF hall last Thursday evening by F. E. Atkinson, who was commissioned by the federal government to fly to the Leeward Islands this summer to assist the government of those islands to institute tomato cannery operations.

All the land that can be planted is used for sugar cane production, Mr. Atkinson explained. Barbados was the first tropical island he had ever seen and the view from a TCA plane will be long remembered.

He marvelled at the system of agricultural production which allows these islanders to produce abundant crops year after year from such a small amount of soil.

Every bit of humus which can be scraped together is returned to the soil.

Although the island is small, it has a population of 200,000, the greatest population per square mile in the world with the exception of part of Sumatra and China, Mr. Atkinson explained.

There is no electricity on the Barbados, so Mr. Atkinson had to discard his electric razor for a time until he discovered a small plant operating in a frozen food locker.

He described visits to Antigua and Montserrat, the latter being the island principally concerned with tomato production.

Tomatoes Between Cotton

There the chief product is cotton, but in between two cotton crops tomatoes can be produced and harvested in January, February and March. It was because of an excess production and difficulty of transportation that Mr. Atkinson was summoned to the home of the famous lime juice to provide technical information on cannery operation.

The Leeward Islands come under the control of the British Colonial Office and a governor is the chief administrator. But each island is practically a separate state in itself, having its own postage stamps, own customs regulations and administrator.

Consequently, passage between the islands is complicated at times, and Mr. Atkinson found he even had to produce certification of income tax payments before he was allowed to leave one island.

One of the main problems in operating a cannery on these islands is lack of a cheap fuel, but oil is being obtained now from Trinidad.

Collapsed cans must be purchased from eastern Canada in order to cut down on high freight costs. Mr. Atkinson is still lining up equipment for the start of the tomato canneries and expects that they will be in operation early next year.

At Montserrat he found that a number of agitators had come to the island and were fomenting trouble among the black labor. There are only forty white people on the island, all the rest of the dense population being made up of negroes who are none too particular about their hygiene habits.

While he was there nothing could be done about these agitators, as they had not resorted to violence but since his return he understood that they did start trouble and some small riots occurred.

Respect for Administration
Mr. Atkinson expressed his "tremendous respect" for the administrators who make up the colonial offices in such far-flung places. He found them extremely conscientious in the carrying out of their tasks in the face of many problems.

Everywhere on these islands there is a shortage of fuel and peach prunings discarded in an Okanagan orchard would be wonderful fuel for the islanders.

Mr. Atkinson considered that the

transportation companies should consider setting up tourist hotels on these islands as they would be "fascinating" for tourists from all parts of the world. If such a plan was carried out, the present transportation services might be made to pay their way, he thought.

REPLY TO RUSSEL Summerland, B.C. Sept. 18, 1951.

Editor, The Review:

In a previous edition of this paper, you used the Badminton club, or the Summerland Athletic club as an example of the financial difficulties a project could get into, due to lack of interest.

This is only a half truth, as this club's financial troubles were caused by the lack of members during the war when the youths of the district were not here. At a debenture holders' meeting Monday night, it was agreed, after reading the financial statements of the badminton, tennis and central committee, and the auditor's report, that although the club is not in a good position, they are in a better position than ever before, and that the members and committees had taken a great deal of interest in the club, and a lot of voluntary work had been done to improve and better conditions for these sports

St. Stephen's WA to Decorate for Festival

The regular monthly meeting of St. Stephen's WA took place in the Parish hall on Monday evening, with a relatively small attendance. Canon F. V. Harrison addressed the group and fall business of the auxiliary was discussed, arrangements being made to provide flowers and farm produce to decorate the church on Saturday, October 6, for the Harvest Festival service on Sunday prior to Thanksgiving Day.

Tea was served by Mrs. D. L. Sanborn and Mrs. D. Turnbull.

for coming players in the future.

Mr. R. G. Russel, although he could not find any reason, or find anything but minor faults, does not approve of the club's procedure, and insists that the club be turned over to him to be run as he sees fit, which did not find favor with the debenture holders present.

It was pointed out to Mr. Russel that twenty of the present members offered to buy his debentures to the extent of some \$400 odd, and that he refused this offer, contending that they were not fit holders. According to our charter we are in default in interest, and cannot force him to accept this money.

Due to the fact that this debt is an accumulation over a period of years, and all we are asking for is a fair amount of time to rectify this position, and that Mr. Russel has used this paper to give us some very unfair publicity, I would ask that you print this in fairness to a fine bunch of young people who are trying to carry on a good sport in this community.

Thanksgiving Supper Planned for United Church on Oct. 8

The Service Club of St. Andrew's United church held its first meeting of the fall season on Monday, September 17, with Mrs. Ruth Munn greeting members at the door.

The meeting opened with the singing of the hymn, "The King of Love My Shepherd is", while Mrs. Margaret Campbell took the devotional, her topic being "The Good Samaritan."

Mrs. Kay Dunsdon declared that three Sunday school teachers are needed in her department for children 6 to 8 years of age and asked if interested teachers would contact her.

New linoleum may be laid on the kitchen floor but in the meantime a committee was appointed to investigate the subject.

As usual, the Thanksgiving supper will be held, this year on October 8. A committee of Mrs. S. R. Cannings, Mrs. W. H. Durick and Mrs. George Washington has been appointed to arrange details.

Refreshments were served at the close of the session.

CO-HOSTESSES AT KITCHEN SHOWER

Honoring Miss Bernice Elliott, a bride-elect of October 4, Mrs. R. H. Bleasdale and Miss Nan Thornthwaite were hostesses at a kitchen shower at the home of the former on Monday evening, Sept. 17.

The guest of honor was presented with a hamper of lovely gifts and contests were enjoyed by the guests during the evening.

Mrs. A. K. Elliott, mother of the bride-to-be, presided over the coffee cups.

Those present were Mrs. A. K. Elliott, Mrs. Melvin Pollock, Mrs. Harry Thornthwaite, Mrs. B. Mow, at Mrs. Frank Pollock, Mrs. G. A. Laidlaw, Mrs. J. J. Lamey, Mrs. Ed (Hilly) Smith, Mrs. Henry Kuhn, Mrs. Bill Laidlaw, Mrs. Evelyn Skinner and Mrs. George Clark, and Misses Tomi Kubokawa and Mildred Clark.

MORE ABOUT—

TWO BOARDS

Continued from Page 1

to present certain facts before the minister.

In March, 1949, at the spring session of the provincial legislature, a program of public works in the province was outlined by the minister which included the complete renovation of this portion of Okanagan Highway by the end of 1951.

At that time, \$200,000 was allocated for relocation and widening of the Pentiction-Trout Creek section to be spent in 1949, with a further sum of \$400,000 allocated for the 1951 appropriation for the entire Pentiction-Peachland section.

With the year 1951 drawing to a close, none of this money so allocated has been expended on this portion of Okanagan highway and no indication has been given in the legislature that any such sums will be expended in the future.

Again, when the minister of public works visited the South Okanagan in February, 1951, various interested board of trade members were led to believe that the Pentiction-Trout Creek section of the highway would be reconstructed, or a good start made thereon, through appropriations to be included in the public works budget of that year.

Unfortunately, when the public works estimates were presented to the legislature no such expenditure could be included.

After waiting since the cessation of hostilities for the department to proceed with the modernization of this important section of the Okanagan highway, the boards of trade of the three communities aforementioned humbly point out and request the following:

1. The Okanagan highway is one of the most important links in the transprovincial highway system, being the main connecting link between the Trans Canada highway and the Southern Transprovincial highway.

2. No section of Okanagan highway has more traffic daily than the Pentiction-Trout Creek portion, as yet not modernized.

3. With the completion of the Hope-Princeton highway, the main route north from Pentiction has been required to handle an ever-increasing volume of traffic both tourist and freight.

4. The Pentiction-Deep Creek portion is the only part of Okanagan Highway No. 97 from Vernon south to the international boundary which has not been brought up to modern standards, apart from a few minor sections.

5. As this section is narrow, has many treacherous corners, and has not the allowance of the same highway to its north and south, it presents a menace to traffic and a potential hazard for all travellers.

6. Because of narrowness and sharp corners, many serious car crashes have resulted already and some deaths have occurred.

7. Lack of knowledge of the possible route of this highway is restricting commerce, as prospective tourist camps, gasoline stations and other facilities are not being constructed because of the fear that the highway will be moved away to some other location and leave them stranded.

We believe that these are the main considerations and we would request you, the minister to include in the highway appropriations for 1952 to be endorsed by the B.C. Legislature next spring sufficient monies to proceed with the immediate modernization of the Pentiction-Deep Creek section of Okanagan Highway No. 97 so that it will be brought up to the standard of other portions of this modern highway.

In making this request, may we state that we realize the difficulties which have confronted the public works department in the past five years; that we believe that the department has pursued a valiant course in advancing the main highways of the province even to the detriment of other important roads.

But we maintain that the time has come when the main contributory and connecting link to the two main transprovincial highways must be given consideration because of the weight of traffic and the hazard to the travelling public which the narrowness of the said section presents.

VISITING HERE

Mr. and Mrs. Allan McCargar have as their house guests Mr. and Mrs. Del Young of Abernethy, Sask. Mrs. Young is Mrs. McCargar's cousin.

Mr. and Mrs. Fred Fisher, of Ladner were guests at the home of Mrs. J. Sheldrake last weekend en route to Vernon to attend the B.C. School Trustees' Assn. convention.

Guests at the home of Mrs. J. Sheldrake last weekend were her son and daughter-in-law, Mr. and Mrs. Arthur Sheldrake of Vancouver.

Dr. and Mrs. Cyril Woodbridge had as their guests last week the latter's parents, Mr. and Mrs. C. M. Satterlund of Belfry, Mont.

Mrs. J. J. Samson, with her son, of Quesnel, is visiting her mother, Mrs. M. Ritchie, until the end of September.

Mr. Arthur Towgood is home this week from New Westminster where he was employed for the summer. He returns to UBC at the weekend.

Mr. and Mrs. Bertram Long of Honeymoon Bay, V.I., returned to their home last Friday after visiting at the home of Mr. and Mrs. C. B. Snow for a week.

Mr. and Mrs. M. M. Neilson of Victoria are visiting their daughters and families, Mr. and Mrs. J. C. Biollo and Mr. and Mrs. C. B. Snow, in Summerland this week.

Mr. and Mrs. Louis Holmes were visitors to Summerland in the past week from their home in Cranbrook, visiting Mr. Holmes' brothers, Mr. Allen Holmes and Councillor Norman Holmes.

Mr. and Mrs. James Brandon, Mrs. Brandon Sr., and Mr. and Mrs. F. O. Brand all of Vancouver, are visitors in Summerland for 10 days, having arrived here from the coast on Sunday.

Mrs. Marjorie Hansen and Miss Mabel Blackley of Vancouver returned to the coast on Sunday after visiting for a week at the home of Mr. and Mrs. Roy F. Angus. Mrs. Hansen is a sister of Mr. Angus.

Dr. H. A. Senn, chief botanist of the department of botany and plant pathology and Dr. C. Frankton, secretary of the national weed commission, were visitors here from Ottawa last week at the dominion plant pathology lab.

Mr. Jack Wilks, who has been working on Little Cherry virus in the Kootenays along with Dr. Maurice Welsh, was a visitor here last weekend en route to UBC where he intends to take post graduate work this fall.

Mr. William Grieve, an old-time resident in Summerland's pioneer days visited the district last weekend en route from Vancouver to the school trustees' convention in Vernon. He plans to spend a few days in the South Okanagan this weekend before returning to the coast. He is accompanied by his wife.

Mr. and Mrs. B. M. Bowell of New Westminster, have been visiting their son-in-law and daughter, Mr. and Mrs. C. Bernhardt, in Summerland. They are returning this afternoon to the coast and will be accompanied as far as Milner by Mrs. C. A. Gayton, who will visit her son-in-law and daughter, Mr. and Mrs. William Donaldson, and her new granddaughter.

Mr. Clarke Wilson drove to Lumby last week, and was accompanied on his return by Mr. Cliff Hall, a former well-known resident of this district, who spent the weekend at the home of Mr. and Mrs. M. L. Embree. Mr. Hall was in ill health but has shown great improvement lately. He returned to Lumby on Wednesday.

All of which is respectfully submitted.

Honored by Women's Institute—

In the top picture, Mrs. J. H. East, Keremeos, provincial president of the Women's Institute is seen presenting the Tweedsmuir cup to Mrs. H. R. McLarty, member of the Summerland Women's Institute, whose essay on "Democracy Begins with You" was awarded first prize for Canada in recent competition. Below, Mrs. C. Orr is receiving her prize from Mrs. East for attaining top honors in the provincial WI competition, with her hooked rug. Presentations were made at a luncheon in the Parish hall on Wednesday afternoon, Sept. 12. Photos by Maywood.

Two Girls Dressed As Nurses Bring Gifts on Stretcher

Two little girls, Carol Hackman and Louise Shannon, dressed in nurses' costumes and carrying a stretcher brought many miscellaneous gifts in to the shower at the home of Mrs. T. McDonald on Tuesday evening, Sept. 18, to present them to the guest of honor, Miss Bernice Elliott, RN, bride-elect of October.

This lovely shower for the popular bride-to-be was arranged by three old-time family friends, Mrs. George Henry, Mrs. Lloyd Shannon and Mrs. McDonald.

The guest of honor was seated in a specially-decorated chair flanked with streamers and lovely floral decorations.

Four heart-shaped wedding cakes on a beautifully decorated tray and flanked with roses and tulle formed the centerpiece for the attractively-arranged tea table.

Mrs. A. K. Elliott and Mrs. Melvin Pollock, mothers of the bride and groom-elect, respectively, presided at the tea table, and poured for more than twenty guests.

Besides the hostesses, other guests included Mrs. Frank Pol-

Nan Solly Leads St. Stephen's Jr. Girls

Nan Solly was selected as president of St. Stephen's Junior Girls' Auxiliary when the first meeting for fall and winter was held in the Parish hall on Monday afternoon, Sept. 17.

The auxiliary is seeking new members from girls ages 8 to 12 and will be assisted by its leader, Mrs. E. F. Weeks and her assistant, Mrs. George Axworthy.

Other officers are: Vice-president, Anne Macleod; secretary-treasurer, Amy Berry.

Jack, Mrs. J. D. Wood, Mrs. Doreen Thompson, Mrs. E. O. White, Mrs. C. E. McCutcheon, Mrs. T. A. Walden, Mrs. I. Schwass, Mrs. Alex Smith, Mrs. T. B. Young, Mrs. W. D. Laidlaw, Mrs. H. Hackman, Mrs. Joe McLachlan, Mrs. L. W. Rumball, Mrs. Helena Verrier, Mrs. E. McClement, Mrs. B. Mowat and Mrs. Hackman, Sr.

Those who sent gifts but were unable to be present were Mrs. Mary White, Mrs. A. Holmes, Mrs. Shepherd, Mrs. W. S. Ritchie, Mrs. S. W. J. Feltham, Mrs. William White, Mrs. Tom Nelson and Mrs. A. R. Munn.

Eastern Star Worthy Grand Matron Pays Official Visit to Chapter 63

On Friday, Sept. 14, Summerland Chapter No. 63, O.E.S., was honored by the official visit of the Worthy Grand Matron, Mrs. A. Gertrude Purvis of New Westminster. Grand Lecturer and Past Grand Matron Mrs. Estelle Robinson of West Vancouver accompanied the Worthy Grand Matron on her tour, but was returning to her home after the Summerland visit.

Mr. Purvis travelled with his wife and both exclaimed over the charm of this municipality and expressed a very real desire to make their home here. They also thanked Mrs. Florence Stark for her gracious hospitality to them while in Summerland.

During the afternoon Mrs. A. K. Elliott's home was the scene of a lovely tea in honor of the visitor. A large bowl of gladioli in emblematic colors made an appropriate and very delightful decoration.

Delicious refreshments were served under the convenership of Mrs. C. J. Bleasdale, her committee being composed of Mrs. C. H. Elsey, Mrs. J. Heavysides, Miss Mildred Clark, Mrs. Flor. Bergstrom, Mrs. Chris Underwood and Mrs. Ruth Wilson. Mrs. F. B. Bedford and Mrs. E. L. Farnchon presided at the urns.

While the ladies were at tea, Mr. Earle Wilson entertained Mr. Purvis, conducting him through various points of interest in Summerland.

Chapter members were present at a special meeting in the evening. The initiation of two candidates from Peachland, Mrs. Edith Moore

and Mrs. Dorothy Keating, was conducted in a most capable and impressive manner. Many compliments were paid to Worthy Matron Helen Munn and Worthy Patron Tommy Marsh about the excellent way in which they and their officers conducted themselves.

Those acting in an official capacity were as follows: Worthy Matron, Mrs. Helen Munn; worthy patron, Mr. Tommy Marsh; associate matron, Mrs. Florence Stark; associate patron, Mr. Frank Maddocks; secretary, Mrs. Dorothy Fisher; treasurer, Mrs. Velma Feltham; organist, Mrs. Jean Canning; chaplain, Mrs. Helen Marsh; marshal, Mrs. Alva Long; conductress, Mrs. Margaret Wilson; associate conductress, Mrs. V. I. Elliott; Ada, Mrs. Annie Dunsdon; Ruth, Mrs. Hilda Clements; Esther, Mrs. Betty Long; Martha, Mrs. Kay Dunsdon; Electa, Mrs. Gertrude Butler; warder, Mrs. Dorie Forster; sentinel, Mrs. Chris Underwood.

In addition to the worthy grand matron and grand lecturer, there were two grand representatives present, Mrs. May Ward of Summerland, grand representative of Iowa, and Mrs. Hooper of Penticton, grand representative of Michigan.

Other distinguished visitors included Mrs. Whitaker of Penticton, past grand matron, Mrs. Paul and Mr. Dicken, worthy matron and patron of Edina Chapter No. 33, Penticton. Visitors from other chapters also attended.

Gladioli, which might well be called Summerland's floral emblem, were used most effectively to decorate the chapter room. They also formed the lovely corsages for the guests of honor and the initiates.

Fall flowers and fruit graced the white-clothed tables on which Mrs. Lona Washington and her committee, Mrs. Marian Oxley, Mrs. Nellie Stent, Mrs. Dorothy Bates and Mrs. Ruth Munn, served the evening refreshments.

A choir composed of Mrs. Mona Laidlaw, Mrs. Lona Washington, Mrs. Thelma Heavysides, Mrs. Mary Charles, Mrs. Dorothy Bates and Mrs. Nellie Stent, with Mrs. Jean Canning accompanying, sang to the guests while they enjoyed fruit salad served with thinly-sliced fruit bread, a variety of small cakes and coffee.

Some amusing stories told by the visitors and a pleasant social time, brought the evening to a happy conclusion.

VISITING ABROAD

Mr. Clarke Wilkin was a visitor to Vancouver over the weekend.

Mr. and Mrs. J. E. Britton left on Friday to spend some time at Carrying Place, Ont.

Mr. and Mrs. Ken Heales and children are holidaying at Seaside, Oregon.

Mrs. C. B. Hankins was a passenger on the KVR train last week for a visit to Vancouver.

Mr. George Wotite is in Southern Alberta where he has gone to harvest the crop on his big wheat acreage.

Alec Watt, district agriculturist, Summerland, was one of the judges at the Lilloet Fall Fair held last week.

Dr. James Marshall, chief of the entomological laboratory here, is expected home this weekend after spending two weeks in the Kootenays.

Mr. and Mrs. J. Helchert left on Sunday for a holiday trip to their former home districts of Melville and Regina, Sask., which they have not visited since they came west thirty years ago.

Fred Kato and Don Cristante drove to Vancouver on Sunday, accompanied by Robin Fisher, who is attending high school in West Vancouver, and who came here for the Red Sox baseball game against Kelowna Chiefs.

Miss Ingrid A. Peterson of Salmon Arm has taken the place of Mrs. D. V. Fisher as stenographer at the fruit products laboratory of the experimental station.

LEAVE FOR WEST VANCOUVER AFTER 26 YEARS HERE

After a residence of 26 years in Summerland and since 1909 in the South Okanagan, Mr. and Mrs. James Slater are moving to West Vancouver to make their home in future. The Slater home in the Solly subdivision has been purchased by Mrs. Lydia Johnston who recently disposed of her home to Mr. Louis Smith and family. It was in 1909 that Mr. and Mrs. Slater arrived in Penticton from their native England.

MORE ABOUT

PORTRAITS

Continued From Page 2 and found it a satisfying life.

Malcolm, who was down the McKenzie as a boy, went back and lives at Fort Norman. He helped to look after the reindeer that Bard brought over in a romantic trek from Alaska. He has worked with Laplanders and Eskimos, now he is in government forestry service at Fort Norman.

Because of Mr. McNab's failing health the family came out and lived at Sexsmith near Grande Prairie in the Peace River.

Malcolm married in the north and there were two little girls. When their mother died he flew them down to their grandmother, then living at Battleford, Sask. Then one of the small girls died.

Mrs. McNab had heard of Summerland through T. J. Garnett, an old friend of Manitoba days, and who never tires of telling friends of the advantages of the Okanagan.

She decided to come here a year ago in July, and is living in the Armstrong house, the oldest residence in the Solly sub-division. Here she makes a home for her granddaughter, Mabel, who is in grade 9 in the high school.

They both like living in Summerland, though this was a pretty hot summer, they found.

Mrs. McNab thinks she is here to stay, but she can't help chuckling when she says: "I'm the roving kind!"

MORE ABOUT

PIONEER DAYS

Continued from Page 2 Blewett and others were soon at the spot and had it out before it had gained much headway.

Theo Hermon of Summerland won the gold watch given by the Penticton veterans for the one who correctly estimated the time a watch would stop. This is a novel way of raising money, citizens paying five cents for every estimate as to when the watch would stop.

A pretty wedding took place at the home of the bride's parents, Mr. and Mrs. R. M. H. Turner, on Sept. 6, when their daughter Sarah was married to Mr. W. J. Baker of Penticton. Rev. W. Reid performed the ceremony. The bride was attended by Miss Norah Clements, and Mr. R. Turner, brother of the bride, acted as best man.

Snow Mountain put on its first overcoat of snow on Wednesday night, and the hills on the east side of the lake had their blanket spread on top when the clouds blew off.

VISITED ROTARY CLUBS IN CHICAGO, TORONTO

Walter M. Wright told Rotarians at their weekly dinner session at the Nu-Way Annex Friday night of visits to Rotary clubs in Toronto and Chicago during his recent trip to eastern Canada and the States. At Toronto, 800 attended the luncheon, while at both functions visitors were present from many scattered parts of the world.

Weekly Wage in B.C. Averages New High \$52.66

In releasing figures showing business activity in British Columbia for the first six months of the year, Hon. L. H. Eyres, minister of trade and industry, announced that at June 1st, weekly wages in the province to that date averaged \$52.66 as compared with \$47.38 on the same date last year.

Department stores registered a 11.6 per cent increase in the dollar value of sales for the first six months of the year over the previous year.

Also on the upward trend is the electric power consumption. There

was a 7.43% increase for the first half of the year over the same period in 1950.

The six month total of exports through British Columbia customs ports showed a gain in value of 28% over the corresponding period in 1950. Statistics on the value of imports for the first five months of the year also showed a great increase with total imports for this period 42% higher than in 1950.

Flood Control Likely to be More Costly

KELOWNA—Federal and provincial governments may have to allocate additional money for completion of the Okanagan Flood Control project if the wishes of the U.S. government for fish ladders are carried out.

This was intimated by Hon. E. C. Carson in a letter to city council. Mr. Carson stated the project "has worried me a great deal."

Mr. Carson said: "Further delays brought on by the U.S. requirements for fish ladders, fish ways

and protective procedures not only leave the area vulnerable to high waters, but will make the job more costly and I believe further appropriation on part of both governments."

Work was scheduled to start many months ago, but has now been held up due to the insistence of U.S. authorities for fish ladders to assist spawning of land-locked salmon. A joint board of engineers made the survey in 1942, which was designed to overcome the high water during the freshest season.

The report was tabled in the federal house in 1945, and since then both federal and provincial governments have earmarked money for the project.

Since last spring, boards of trade have been clamoring for a start on the project, even though no decision has been made on installing fish ladders.

Kiwanians Plan Canned Food Matinee For Saturday

This year, on September 22, Kiwanis clubs throughout North America will be working to raise money for youth services. Here in Summerland the Kiwanis club has organized a matinee at the Rialto theatre admission for which is a can of fruit, vegetables, soup or dehydrated food.

These tins will be packaged by Kiwanians and forwarded to Vancouver's CARE office for transmission to the starving youngsters of Europe.

This is an original idea of the local Kiwanis organization and does not follow the general run of Kids' Day functions, which generally raise funds for underprivileged children in the immediate neighborhood.

Kiwanis clubs have emphasized working with youth and with youth problem for many years. It is estimated that 639,884 children were entertained on National Kids' Day a year ago, while 137,226 children were examined or treated in clinics as the result of Kiwanians' efforts.

In a recent issue of The Kiwanis Magazine, an article by Charles J. Thurmond, chairman of the, international committee on boys and girls work and Judge Hubert Glover, chairman of the international committee on underprivileged children, tells something of the background of National Kids' Day.

"In a world filled with strife it would be easy to forget the boys and girls throughout the United States and Canada who need help and need it desperately," states the article.

"But hundreds of Kiwanis clubs, with the promotional assistance of the National Kids' Day Foundation, will see that these boys and girls are not forgotten."

There are many and varied methods used by Kiwanis clubs to raise funds with which to carry on this work. Many clubs use Kids' Day buttons for their projects. Clubs around Cleveland sold 350,000 bags of peanuts last year, grossing approximately \$50,000.

A club in West Texas raised \$3,350 for youth work in 1950 on Kids' Day; and expects to triple the net profit with a football game between two all-star teams.

Here in Summerland the Kiwanians are entertaining their children at their weekly luncheons on Monday evenings at the Nu-Way Annex, to mark Kids' Day and have planned this matinee which should attract a capacity crowd to the Rialto this Saturday afternoon.

Mr. M. Harrison, Rialto manager, has co-operated with the Kiwanians in this endeavor. Frank McDonald and Ed (Hilly) Smith are the Kiwanians in charge of the show.

The show which is billed for the Rialto that afternoon is a technical western entitled "Copper Canyon," starring such well-known actors as Ray Milland, Hedy Lamarr and MacDonald Carey.

Rotary Governor to Be Here October 5

Arrangements are being made to entertain the new Rotary district governor, Sid Woodcock of Coeur d'Alene, Idaho, at a weekly Summerland Rotary club banquet in the Nu-Way Annex on Friday, October 5, it was stated at last Friday's dinner session. This will be the official visit of the new governor to the Okanagan and he will be addressing clubs in Penticton, Kelowna and Vernon as well as Summerland.

During 1950 a total of \$60,000,000 was paid out by Workmen's Compensation Boards in industrial accident cases.

CUSTOM CANNERY OPERATING

Too Busy on Project Inspired by Trade Board to Attend its Meetings

One board of trade-inspired projects has been so successful that it has motivated against board attendance.

Union Library Wants Its Chairs Returned

Ever since the pupils moved out of the library building, located on school grounds, when the new junior-senior high school was ready for occupancy, there has only been one solitary chair in the library building.

This hasn't been right as the library once owned a couple of dozen chairs and a couple of tables before the building was used as a classroom at all.

On Monday, W. C. W. Fosbery, Okanagan Union Library custodian here, after many verbal requests, made a formal request in writing to the school board for return of the library property.

It was agreed that the chairs and tables must be on school property somewhere, or if they have been lost or broken, they should be replaced by the school board.

The library will have at least a dozen chairs returned as soon as they have received a coat of paint.

Invite Speedboat Racers to Valley

KELOWNA—Donald Campbell, 30-year-old son of the late Sir Malcolm Campbell, has been invited by the Kelowna Board of Trade to bring his Bluebird speedboat to Kelowna to race on Okanagan Lake.

Alderman Dick Parkinson has also revealed that the present speedboat record holder, Stanley S. Sayres of Seattle has been invited to come to the Okanagan to make an attempt to improve his present record of 160.323 miles per hour, made in his Sto-mo-shun IV.

"What's new?"

AS HE PULLS UP at the end of his day's run, it's just his friendly way of saying "hello". But if there is some important development in town, he expects his friend the bank manager will know about it: . . . plans for enlarging the school . . . the chance of a new factory opening up . . .

It's part of the bank man's job to know his community. His customers expect him to know "what's new" in other parts of Canada and elsewhere, too . . . business facts, leads to new markets at home and abroad for farm as well as factory.

You will find your bank manager well posted, and ready to serve you. Chartered banks work that way.

One of a series by your bank

Guide Association on Lookout for Leaders

The Local Association to the Girl Guides is hoping to find one or two, or more, who are interested in Guiding and would like to become officers in the local Guide or Brownie companies.

For various reasons some of the leader personnel of both Brownies and Guides have found it necessary to give up the work. One of the duties of the association is to find replacements when this happens.

The members of the association think that there may be older girls or women in town who would like to work with guides and are hoping that anyone who is able to give some time to the organization will telephone to the president, Mrs. D. L. Sanborn.

Guiding has been very successful in Summerland, and there are two Guide companies and two Brownie packs. It is hoped that none will have to be dropped because of the lack of volunteer leaders.

It is not necessary to have had previous experience. A fondness for girls, interest, and willingness are the preliminary qualifications.

Search-and-rescue operations of the Canadian air force in 1950 totalled 252. Included were 137 mercy flights.

how many managers do you know personally?

Look around you! There are quite a few of them. Some manage stores, the corner grocery, the barber shop, the drug store—some run service businesses, the shoemaker, the doctor, the dentist, the service station operator. You probably know someone who operates a larger business too.

Just think about them for a minute. By-and-large aren't they decent respectable people, wanting the same things out of life that you do. By-and-large don't they treat their employees well and do the best they can with the business they have?

You wouldn't believe a stranger telling you lies about someone you know well! And generally speaking you discount malicious gossip about casual acquaintances, so when you hear managers in general criticized the only fair thing to do is to compare them to the ones you know.

If you do, isn't it likely that they are, on the whole, a pretty decent group of people?

B.C. FEDERATION OF TRADE & INDUSTRY

You mean... WE'RE NOT SQUIRRELS?

"No SQUIRREL," frowned Sammy, "would ever do what you've done today!"

"But all I did was buy five new moss pillows," retorted Sophie, his wife.

"Ummmmm," said Sammy, "Did we need to get new moss pillows?"

"No," answered Sophie, "but everybody knows there's a terrific shortage of moss—so moss pillows are getting scarcer and scarcer. Besides, the prices are bound to go higher."

"They certainly will if everybody follows your example," growled Sammy. "That sort of buying just sends prices up higher. But what worries me is—what's happening to our savings?"

"Savings?" echoed Sophie. "How can we save when the cost of living is higher than a Douglas Fir? Take this tall brush, for instance. Ten years ago I could buy one for five measly beechnuts. Now they cost two horse-chestnuts. Or take . . ."

"I know, I know," cut in

Sammy. "But we still need to save for the same reasons we always have. We've got to keep adding to our bank account, paying our life insurance and buying savings bonds. Or leave town."

"Leave town?" gasped Sophie. "For heaven's sake why?"

"Because," said Sammy, "everybody thinks squirrels are savers. So if people find out we're not saving they'll say we're not squirrels! We'll be exiled, banished."

"Oh, dear!" exclaimed Sophie. "I never thought of that. I'm sorry, Sammy. From now on I'll really try to save every way I can. Oak!"

"Oak!" said Sammy.

MORAL: These days, it is vitally important for everyone to save money to help check inflation—and to provide for his own future needs.

NOTE TO FATHERS: Remember—life insurance is your most important form of saving because it provides financial security for your family. So pay your premiums regularly. Add new life insurance as you need it.

Breakwater for Powell Beach Suggested to Trade Board

That a breakwater in the vicinity of Powell Beach to shelter that well-known bathing spot from the northern winds and also provide accommodation for small boats owned by local residents should be sought from the federal government was the proposal submitted by Cecil Wade, chairman of the annual free swim classes, to the Summerland Board of Trade September monthly meeting in the IOOF hall last Thursday evening.

"Powell Beach is one of the main attractions in this district," Mr. Wade contended.

A breakwater for this district has been approved by the federal public works department but has been shelved because of the wartime economy.

It was considered that a request instituted now could at least be surveyed from an engineering standpoint to determine the feasibility of a breakwater being established at this beach.

Original site of the proposed breakwater was in the vicinity of lower town.

It is understood the trade board will first query O. L. Jones, MP for Yale, before passing on this request to the federal public works department.

Mr. Wade prefaced his suggestion

with a report on the board of trade free swim classes which had the greatest enrolment on record this past summer.

He spoke highly of the work of Miss Ruth Klux, chief instructor and her assistants and declared that the classes had been quite successful with no accidents of any kind reported.

Expenses for this project amounted to about \$150, with another \$70 paid by the Pro-Rec, he declared.

Tests Were Severe

Mr. Wade referred to the severity of the examinations as carried out by A. W. Thiessen, chief of the Red Cross swimming and water safety committee for B.C.

Objections to the stiffness of the tests have been voiced but Mr.

ATTENDS MEETINGS OF ASSESSORS AT PENTICTON

J. P. Sheeley, municipal assessor, attended the recent provincial conference of assessors held for two days at the Legion hall in Penticton. More than fifty assessors or those connected with assessing problems in municipalities throughout B.C. and provincial government assessors were present. Next year's convention will be held in Kelowna.

Thiessen explained that every student who passes a test must be qualified to conduct himself or herself according to the standard set.

It would set a poor example for the Red Cross standards if a student who was passed failed later to carry out water safety teachings during an emergency, therefore the Red Cross representative must be absolutely certain that the student is well qualified before being passed, Mr. Wade explained.

This committee also assisted in organizing the first junior regatta held here for many years.

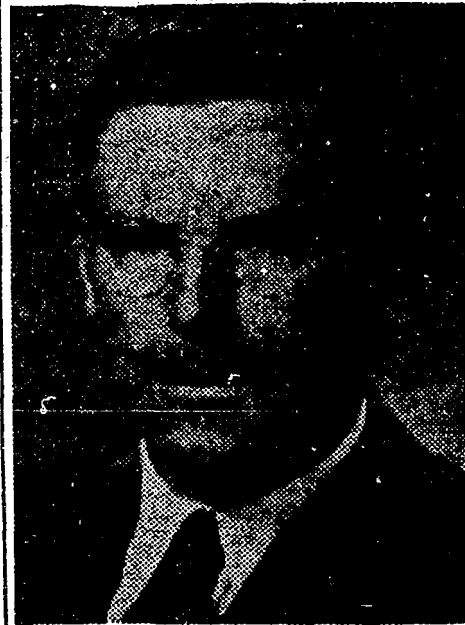

Fears that a north wind might spring up shadowed the committee's work throughout, Mr. Wade pointed out, whereas if a breakwater was established at Powell Beach such aquatic events could be staged without fear of rough water spoiling the show.

He paid tribute to the co-operation received from Walter Toevs and other members of his committee, and Smith & Henry, who had provided transportation each Wednesday afternoon for the swim classes.

White & Thornthwaite buses were offered but were not needed this year, he stated.

Mr. Wade expressed disappointment that rainy weather caused the cancellation of the final windup treat for the swim classes but declared his committee would plan a big finale for next year's classes.

C. N. R. PROMOTION

Eric Wynne has been appointed general superintendent of motive power and car equipment for the Canadian National Railways Western Region, with headquarters in Winnipeg. He succeeds Alan Beardshaw who has retired.

Mr. Wynne joined the company in 1911 as a call boy in the mechanical department at Melville, Sask. He became a machinist there in 1916. After serving in various capacities at McBride, B.C., Mr. Wynne was transferred to the Fort Rouge shops at Winnipeg and in 1936 was appointed engine inspector there. In 1942, he was made supervisor of special work at Winnipeg and the following year went to Montreal as mechanical inspector. He was appointed engineer of shop methods, Montreal, in 1943 and in 1948 was named general superintendent of motive power and car equipment at Moncton, the position he held until his present appointment.

Legion Brief on Pensions Urges Action by Ottawa at Special Session Next Month

South Okanagan-Similkameen zone of the Canadian Legion, meeting in quarterly session at the Legion hall in Summerland Sunday afternoon went on record as favoring a Dominion Command brief on the need for increased pensions and allowances for war veterans and their dependents.

This brief will be presented to a quadri session of Legion zones representing an area from Revelstoke and Kamloops down to the border and west to Princeton to be held in Vernon next Sunday.

O. L. Jones, MP for Yale, will be present and will be acquainted with the Legion demands for pension consideration at the short fall session of parliament which is scheduled for next month.

"We are told that the fall session of parliament will be short; war pensions and allowances must be made an issue," declares Alfred Watts, Vancouver, Dominion president of the Canadian Legion in the official Legion brief.

"Basic pensions and allowances have lagged disastrously behind the rapid increase in the cost of living. The work of the parliamentary committee at the last session centered around the unemployment supplement of \$2,000,000. The Legion is unalterably opposed to this violation of basic pension principles."

Reasons for opposition are outlined by the Legion proxy, as follows:

"It definitely involves a means test, both economic and physical; those in receipt of old age pensions or superannuation will not share in it; it involves a means test on the amount of pension received (under 35% single and 45% married do not partake); the pensioners disability must be a contributing factor to unemployment; he must be unemployable and unemployed."

"It partially solves the problems of only 6,000 out of 165,000 pensioners."

"It gives no consideration to the fact that the disabled veteran, regardless of his state of employment, suffers handicaps in ordinary living which the average citizen does not."

"It is an attempt to adopt something from British legislation and without taking into account any of the social legislation which their pension act supplements."

"It is based on the idea that all recipients are unemployable although one recipient might receive \$165 per month and the next equally unemployable and in an equally helpless condition would only receive \$96 per month. It just doesn't add up."

Mr. Watts adds that "the Legion opposes the unemployability supplement on the principle that a disability pension is based on right, not need, and that it involves a means test."

"A man who carries a handicap throughout his life, a handicap incurred in the voluntary defence of his country, should not be penalized if he has the courage and determination to overcome that handicap and earn a living," the brief also states.

RAF Widows' Pensions

At Sunday's meeting, Peachland delegates introduced a resolution regarding Canadian widows of RAF veterans who trained in Canada and returned to duty overseas and were killed. These widows receive Imperial pensions which Peachland delegates declared to be

only \$13 per month. It was determined by the Legion zone that a strongly-worded resolution should go to provincial command seeking assistance for these widows with a view to having their pensions brought up to the monetary level of Canadian pensions.

At next Sunday's quadri zone meeting, O. L. Jones, MP, will also be acquainted with the need for action on the Canadian Rangers plan. Legion members expressed the thought that delays are being created by Ottawa and that present obstacles should be removed.

The zone session also heard a report from Penticton Legion delegates regarding the west bench development. Ninety-seven holdings of 1.6 acres each will be made available in that section and only awaits official sanction by the treasury department in Ottawa.

Discussion on the holding of Remembrance Day services on Sunday, November 11, also occupied part of the meeting.

At the conclusion of the session, which was attended by Graham Kincaid, zone commander, Penticton, the veterans joined the Legion Ladies' Auxiliary zone delegates at a banquet tendered by the Summerland Legion LA.

South American Tour Described to Rotary By Dominion Botanist

Rotarians were given a brief glimpse of many fascinating parts of South America when they listened with keen interest at their weekly dinner session in the Nu-Way Annex Friday evening to Dr. Harold A. Senn, chief botanist of the division of botany and plant pathology, science service, Ottawa.

Dr. Senn was Canadian representative to a botanical congress in South America three years ago and visited the northwest portion of Argentina near the Andes, one thousand miles from Buenos Aires. On his trip, Dr. Senn went plant hunting, as he was interested in the types of grasses grown in many of the arid areas of that vast country. He brought several specimens back to Canada for research purposes.

He described various parts of Argentina and Chile which have rainfall of about the same amount as the Okanagan and produce tree fruits similar to those grown here. In Peru, he observed old irrigation ditches built by the Incas a thousand years ago, using simple gravity flow.

While flying high above arid stretches, little isolated islands of green would note the presence of small streams or rivers, bringing to mind quite forcibly the role of water in the lives of everyone, he observed.

Dr. Senn described the rich agricultural sections of Chile and told of seeing one 400-acre apple orchard. These are mostly consumed in that country but they do not produce as good a standard of apples as Dr. Senn had seen at the Armstrong Fair last week.

At the outset of his remarks, Dr. Senn declared that despite the many people who have made investigations, there is still little known of the organisms of the common weeds, and this is occupying a good deal of the Canadian botanists' time.

"You bet, we can afford a CHEVROLET!"

Illustrated - Styling 4-Door De Luxe Sedan.

... for only CHEVROLET has all the things we want...
LOWEST COST, FINEST QUALITY, UTMOST DEPENDABILITY AND ECONOMY PLUS THE HIGHEST TRADE-IN VALUE!"

This year's Chevrolet is a marvel of value, every way - and it's all yours at lowest cost!

If you want a car with Body-by-Fisher strength, protection and up-to-the-minute styling - Chevrolet has it. If you want power you can live with through many moons to come - Chevrolet's valve-in-head performance gives you that, too. If you want roominess and comfort and handling ease that make every trip a breeze, there's no simpler way to find them than to take the wheel of a Chevrolet.

Above all, if you're looking for advanced features that perfectly combine pleasure with performance, just look at these:

NEW - improved Centre-Point Steer-

ing (and Centre-Point Design), making steering even easier at low speeds and while parking.

NEW - more powerful Jumbo-Drum Brakes (with Dubl-Life rivetless brake linings) for extra-safe, extra-smooth, extra-long-lasting performance. They're the biggest brakes in Chevrolet history!

NEW - Safety Sight Instrument Panel, - safer, more convenient, more efficient and more beautiful than ever before.

Yes, Chevrolet for '51 is a car that defies comparison from every viewpoint - including price. So, if you've been toying with the notion of settling for a lesser car - come in and see how easily you can buy this thrifty marvel.

WITH TIME PROVEN
POWERGLIDE
AUTOMATIC TRANSMISSION

With ultra-smooth Power-Glide, Chevrolet is first in the lowest-price field to bring you the proudest feature of luxury cars - a fully-proved, fully-automatic transmission. There's no clutch pedal! You can drive all day without ever shifting a gear! And with all this driving ease, you get the extra-abundant power of Chevrolet's new 105 h.p. engine, exclusive to PowerGlide Chevrolets. It's so simple to drive, it's a thrill to drive!

*PowerGlide plus 105 H.P. Engine optional at extra cost on deluxe models.

South Okanagan Junior League Title Rests at Home of Kelowna Chiefs

For the first time since the league was formed, the South Okanagan junior baseball championship has left Summerland and now rests with the capable Kelowna Chiefs, new entry to the loop this year.

On Sunday at Living Memorial athletic park, Kelowna Chiefs bested Summerland Red Sox 7-5, mainly due to Roy Wakabayashi's splendid hurling, to take the final playoffs two games straight. Kelowna won the first game on its home plot 14-1.

The John Norwood trophy, emblematic of the league champs, and presented by Penticton merchants in memory of the late John Norwood, a colored ball player who was known throughout the South Okanagan, was presented to Chiefs' team captain Brian Casey after Sunday's game by League President Les Gould of Summerland.

It was a case of a less experienced team getting the jitters when the chips were down on Sunday. A little bit of steadier play in the pinches would have resulted in a different score, but it was a well-played game just the same.

Roy Wakabayashi, who has vied for top hurling honors with Johnny Wishlove all season, was in prime form on Sunday and struck out 14 opposing batters. He weakened slightly in the 7th but regained control and went on to mow them down.

Red Sox pulled a major surprise when they sent in Don Cristante to do mound duties, the first game of baseball the sturdy junior has ever pitched. Cristante did well for a first appearance and it wasn't until the seventh, when his arm got sore that the Chiefs started to pound him at all.

Ken Brawner went in for the 8th frame and bore down with a vengeance, striking out the first three men to face him.

It was a game of many surprises, of good play immediately followed by stupid and costly mistakes.

Chiefs got their first unearned run at the expense of Cristante. An easy grounder was picked up by the pitcher who proceeded to throw the horsehide way over first base for what should have been the second out. Murray struck out but J. Wishlove patted the pill into deep right field for a triple to score brother Bill.

Red Sox went ahead for the first and only time in the second frame when Alkin hit a Texas leaguer to left and Ernie Jomori was safe when Casey pulled a boner. Hooker lined out a double to score Alkin and Bonthoux laid down a perfect bunt to squeeze Jomori home.

But the Chiefs took command in the third when Casey was safe on Jomori's bad throw. Casey pro-

ceeded to steal second and go to third on a wild pitch, scoring on Bill Wishlove's single through centre. The latter player stole second and scored on an infield play which was too slow to stop him.

Chiefs made it 5-1 in the fourth when Red Sox went up in the air badly. Wolfe singled and came around when Culos singled and Bryden let the roller get by him in right field. Gri sacrificed Culos to third but when Franks bounded the pill to the infield Culos was caught in a hot box. He should have been put out easily but Robin Fisher dropped the ball after a bad throw and he scored.

Another easy out should have been scored in the sixth but Wakabayashi scored when Chuck Alkin threw the ball miles over third.

That was the finish of the loose play by the Red Sox, although Murray connected for a triple in the seventh to score B. Wishlove for the Chiefs' final count. Chiefs got careless on the bases with the result that several players were nipped on close, well-executed plays.

Red Sox started to fight back in the 7th when the Chiefs' hurler lost control for a time.

Desilet, just about broke Wakabayashi's heart when he lifted one to deep right field for the first circuit hit of the day.

Fisher drew a walk and Pohlmann hit into what looked like a cinch doubleplay. Wakabayashi, however, threw the ball away at second base and Fisher came all the way home when Gri returned the pill wildly.

Pohlmann, if Red Sox had wanted to take a chance, could have scored from third while Eyre was being retired, but they played it safe and the side was retired.

Again the unexpected happened in the final frame when Ken Brawner socked a mighty one to deep centre. If should have been picked off with ease but went over the centre gardener's head for a full count, to leave Red Sox trailing by only two runs.

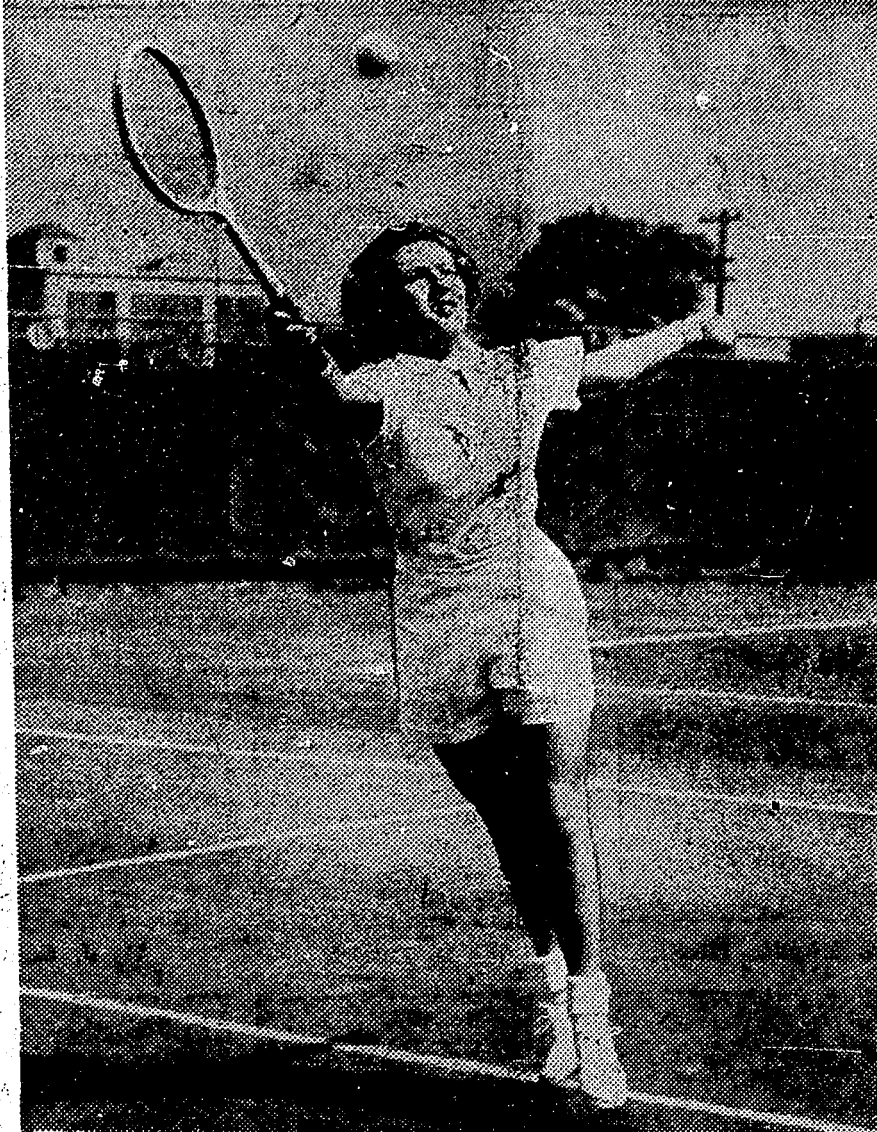

Hooker and Eyre were the steadiest of the Red Sox players, handling twelve chances without a miscue. Chiefs outhit Red Sox 8 to 6 and committed two less errors.

Umpiring was on a high level and the officials held the game under control at all times. Chiefs' coach, Dick Murray, changed his tactics entirely last Sunday and had his proteges bending over backwards to be nice to everybody. It was a good, clean game with a friendly spirit between the two teams despite the rivalry.

Brawner.

MAUREEN CONNOLLY, 15-year-old San Diego's surprising court Princess, is now Queen of them all as United States National singles champion. She defeated Wimbledon champion Shirley Fry in the recent American final at Forest Hills, 6-3, 1-6, 6-4 to become the youngest champion in U.S. Tournament history to cop the title.

Suggest Plan To Enlarge Rifle Range

There is every possibility that the B.C. Inland Rifle Assn. meet may be held once again on the Garnet Valley range in Summerland, the annual meeting of the Summerland Rifle club was told last Thursday evening.

As a consequence, the club is investigating the possibility of enlarging range facilities so that shooting at 800, 900 and 1000 yards may be possible.

If present plans are carried out a fifth target would be added and one of the present targets changed over so that there would be two 10-foot targets and three 6-foot ones available for all the various ranges.

A. R. Dunsdon was re-elected president of the SRA with Dave Taylor Jr. as vice-president and Adrian Moyls secretary-treasurer. An executive of Fred Dunsdon, D. L. Sanborn and C. V. Nesbitt was chosen.

Omak Takes Coulee In Two Straight

Omak won the final championship playoffs of the Okanagan International baseball league in two straight games against Coulee Dam, after eliminating Summerland Merchants in the sudden-death semi-final playoffs.

In the first game, left-hander Marchand pitched a bangup game to beat Coulee 4-3. Going to Coulee, the Omak team pitched Buck Johnston, veteran with the squad who is retiring from active participation in the game. It was his last pitching job and he won a free-scoring tilt 10-7.

Stiles was the losing pitcher in both games for Coulee Dam.

HOLD WINDUP PARTY

Summerland Merchants held their season windup party at the Japanese hall Saturday night.

Two Divisions For Five-Pin Bowling Loop

Main five-pin bowling competition, the Kingpin league, is being divided into two sections this season, with opening games being scheduled for Tuesday, October 9.

Teams which had high averages for season's play last year are being placed in the A division, while low average teams and new teams will go into B division.

Each division will have prizes for high single, high three and high average, and will conduct its own playoffs at the end of the season. Then, when the two divisional champions are decided holder of the community bowling championship will be decided by a final playoff.

Besides the regular 60 cents per night cost, an entry fee of \$1 per person is being charged to try and prevent defaults throughout the season.

Players must have played two-thirds of the league schedule to be eligible for prizes.

Handicaps will be based, as usual, on 70 percent of the difference in total pins between opposing teams, according to American Bowling Congress regulations.

Ed Lloyd is president of the league this season, with Mewa Tada secretary and Mrs. Muriel Walker treasurer. A committee of Anne Carney and Fumi Inaba has been added to the main league officials.

SCORES 100 TO WIN
 KELOWNA RIFLE CUP
 KELOWNA—Scoring 100 out of 105 possible, Sam Lee won the Millie grand aggregate cup at the final shoot of the season by the Kelowna BCD Rifle Assn. Bullock-Lade shield for team honors went to Clarence Henderson's squad consisting of Ron Weeks, Paul Jansen, Ian Grant and Keith Pilkington. They scored 459.

gue this season, with Mewa Tada secretary and Mrs. Muriel Walker treasurer. A committee of Anne Carney and Fumi Inaba has been added to the main league officials.

NEWS FROM THE GREAT OUTDOORS

(By Bert Berry)

FISHING

Okanagan Lake—Has been improving somewhat the last week. No big ones but fair catches of fish up to 1½ pounds.

Silver Lake: Still okay.

Headwaters Fishing Camp: Reports are all okay.

Glen Lake: Fishing holding up well in this little lake.

Fish Lake Camp: Good on upper lakes. Fish Lake is not bad if you minnow fish.

On the whole, fishing is coming back, but most of the boys have swung over to hunting. I think we miss some of the best fishing by so doing.

Echo Lake: One report out of Lumby is that fishing was very good... up to 12 pounds and lots of fish per person being caught.

HUNTING

For most sportsmen, grouse hunting has been pretty tough. Haven't heard of too many with limit bags. Flocks are mostly broken up into small groups of two and three and are quite scarce.

One deer shot on Sunday when George Posthuma didn't have to leave his orchard. He saw this buck, went back to his house for a rifle and returned to shoot it. Very few bucks were even seen over the opening weekend and they must be pretty high up right now.

The Matkovich party went north of Prince George to bring back the first moose of the season. They report extremely rainy weather with lots of mud.

At least twenty-five persons will be leaving for the Cariboo soon to try their luck moose hunting.

Ten Commandments of Safety

We want to remind you of the 10 Commandments of safety for all hunters:

1. Treat every gun with the respect due a loaded gun. This is the cardinal rule of gun safety.
2. Carry only empty guns, taken down or with the action open, into your automobile, camp or home.
3. Always be sure that the barrel and action are clear of obstruction.
4. Always carry your gun so that you can control the direction of the muzzle, even if you stumble.
5. Be sure of your target before you pull the trigger.
6. Never point a gun at anything you do not want to shoot.
7. Never leave your gun unattended unless you unload it first.
8. Never climb a tree or a fence with a loaded gun.
9. Never shoot at a flat, hard surface or the surface of water.
10. Do not mix gunpowder and alcohol.

Legion Auxiliaries Discuss Problems At Zone Meeting

Members of Legion Ladies' Auxiliaries from many parts of the Okanagan-Similkameen zone met in the Legion hall here on Sunday afternoon for a zone conference with Mrs. Liddicoat of Keremeos presiding.

Discussion centered around attendance at meetings, how to increase membership and various methods used by auxiliaries to raise funds to carry on their work.

Auxiliaries were warned that they are devoting too much money to other than Legion activities and that in future they should concentrate more on being of assistance to their own membership and the Legion branches with which they are affiliated.

An appeal for more socks and sweaters for the English Home for Boys was given. Mrs. Al McCargar of Summerland was standard-bearer to the session.

places, and his double asters and dahlia-flowered zinnias taking second prizes.

In the fine arts section, Mrs. George Inglis and Mrs. George Woitte were prominent exhibitors, bringing home many awards, while two entries by Mrs. James Aitken were also successful.

Mrs. Inglis scored firsts in Irish crochet, crochet in silk, crochet in cotton, hostess apron, and fancy handkerchiefs. Her seconds included table runners, plate doilies (all crochet), table mats, any article, infant's set in wool, and vanity set.

These awards gave Mrs. Inglis five firsts and six seconds.

Mrs. Woitte scored first prizes in white crochet trim, morning dress and cross stitch classes and seconds in work apron and button holes.

Mrs. Aitken's entries received second prize for stuffed animal, and first for all wool-stuffed toy.

Fruit Display Winners

Following are the complete results of the fruit display awards:

Apples
Cooking, named: 1, W. F. Ward, Summerland; 2, W. A. Middleton, Vernon.

Dessert, named: 1, W. F. Ward; 2, W. A. Middleton; 3, Fred Segenstrom, Oyama.

Delicious, red strains: 1, D. Evans, Oliver; 2, F. W. Hack; 3, E. C. Bingham, Summerland.

Delicious, old type: 1, F. W. Hack; 2, J. M. Kosty, Vernon; 3, W. F. Ward.

Golden Delicious: 1, J. M. Kosty; 2, W. A. Middleton; 3, E. C. Bingham.

McIntosh: 1, Fred Segenstrom; 2, W. F. Ward; 3, Lovatt Ranch, Vernon.

Jonathan: 1, W. F. Ward; 2, G. Dixon.

Wealthy: 1, W. A. Middleton.

Rome Beauty: 1, W. F. Ward; 2, J. M. Kosty; 3, P. D. Smithers, Oliver.

Winesap: 1, F. W. Hack; 2, R. M. Tucker, Oyama; 3, P. D. Smithers, Newtown.

Stayman: 1, P. D. Smithers; 2, W. A. Middleton.

Spartan: 1, J. M. Kosty; 2, W. A. Middleton; 3, Lovatt Ranch.

Jubilee: 1, W. A. Middleton.

Any other variety, named: 1, W. A. Middleton; 2, Fred Segenstrom; 3, W. F. Ward.

Penticton Events Series With Vernon

Penticton Athletics turned the tide with a vengeance last Sunday when they trimmed Vernon 15-2 in the second Okanagan-Mainline baseball playoff championship game. Six home runs featured the contest which tied up the best of three series at two games each. Vernon won the first game at Penticton the previous Sunday 8-7.

This coming Sunday it is anticipated that a large number of local ball fans will be at King's park in Penticton to witness the third and final game.

P-TA Meeting to Be Held Tomorrow

Organization meeting of the proposed Summerland Parent-Teachers' Assn. will not be held this evening, as announced last week, but is being held over until tomorrow night, at the high school auditorium, Mrs. F. E. Atkinson states.

Mrs. Poole, of Kimberley, provincial organizer for the B.C. P-TA, who has been attending the B.C. School Trustees' Assn. convention in Vernon, will be guest speaker.

The P-TA is being planned for junior-senior-high school coverage only at present.

field Trophy): 1, Mrs. J. C. Clarke, Keremeos; 2, W. F. Ward, Summerland; 3, J. M. Kosty, Vernon; 4, E. C. Bingham, Summerland; 5, Geo. Dixon, Summerland; 6, D. Evans, Oliver.

J. R. J. Stirling Memorial Trophy: 1, Bill Ward, Summerland; 2, Connor Clarke, Keremeos; 3, Vernon Kosty, Vernon; 4, Bruce Bingham, Summerland.

Packing House Specials
Wealthy: Salmon Arm Farmers Exchange.

Straith Opens New School on Monday

Estimate of \$400,000 Will Not be Exceeded For Junior Senior High

At 2 o'clock next Monday afternoon, Sept. 24, Hon. W. T. Straith, minister of education in the provincial government, will announce the formal opening of Summerland's brand new junior-senior high school unit.

An elaborate program has been arranged for the entire afternoon which will mark a big day in Summerland's history as this new school is one of the finest in the interior.

It was in March, 1950, that Kenyon & Co. Ltd. was awarded the contract for \$310,000, to construct the new building. Fees for Architect W. K. Noppe and new equipment boost that sum to about \$385,000.

Despite rising costs throughout the building and equipment trade, the original estimate of \$400,000 will not be reached.

Equipment for the cafeteria kitchen and a piano for the auditorium stage are the major items which have not been purchased yet for the new school unit. These equipment items will not bring the total up to the estimated \$400,000, school officials state.

Shaling of the parking area at the southeast corner of the property is another item still to be completed, while there is some further landscaping to complete, although the work accomplished in beautifying the grounds has progressed amazingly, observers believe.

Shade trees are still to be planted along the eastern boundary of the school property which was once known as the Kelley orchard, having been owned by the late W. C. Kelley.

There is still some orchard left on the school property and more than \$500 revenue was realized by the school board last year.

Summerland is believed to be the only school district in B.C. which has a revenue from an orchard.

New teachers who have come here from the prairies are amazed to find fresh fruit so conveniently placed to the school classrooms.

Will Arrive by Plane

On Monday, Hon. Mr. Straith is expected to arrive by plane from the coast, coming here with Inspectors J. N. Burnett of Vancouver, Alex Turnbull of Penticton and A. S. Matheson of Kelowna.

Inspector Burnett had a great deal to do with early planning of the new unit while Inspector Turnbull was interested in its construction phases. Inspector Matheson has Kelowna and Summerland districts under his charge now.

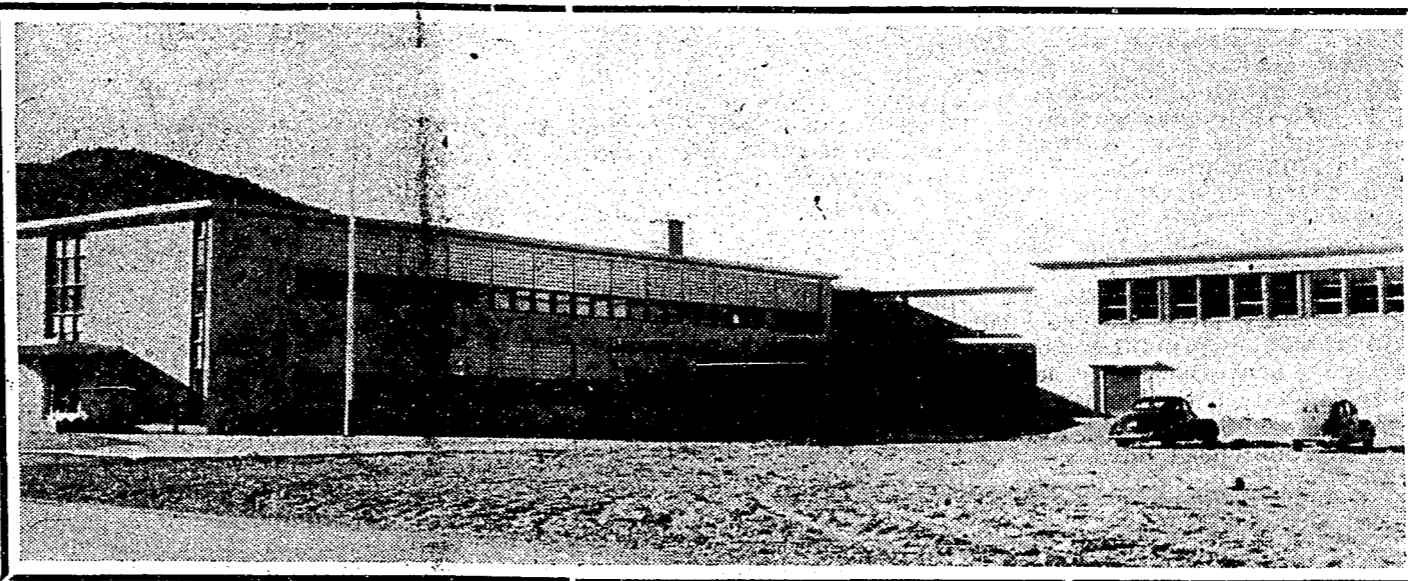

A luncheon has been arranged for the visitors, with school board members and principals in the home economics room at noon on Monday. Guests will then be taken on an inspection tour of the building prior to the opening ceremonies at 2 o'clock.

School board members throughout the southern interior region are being invited to visit Summerland that day and participate in the opening.

Reeve C. E. Bentley will extend greetings from the municipality, while Principal A. K. Macleod and MacDonald Elementary School Principal S. A. MacDonald are to be on the platform.

Another special guest will be Mrs. J. C. Robson, widow of the first high school principal in this district.

Architect W. K. Noppe of Vancouver and Mr. H. S. Kenyon, of the contracting firm of Kenyon

while Western Bridge & Steel Fabricators Ltd. supplied much of the structural steel. The flooring was laid by the Sanson Floor Co. Ltd. of Vancouver.

Local supply houses were able to provide quite a quantity of the lumber and other building materials. T. S. Manning, West Summerland Building Supplies Ltd. and the Summerland Box Co. Ltd. were chief suppliers among local businesses.

Following the opening ceremonies the school will be thrown open for inspection by the public while invited guests will be served tea in the home economics room.

Clock System Synchronized to PA Hookup First in B.C. School Setup

Another first in the new high school unit, as far as B.C. is concerned, is the clock system which has been installed throughout the big building.

In the principal's office is the large master clock, electrically operated, with impulses sending the hand forward each minute.

Other "clocks" throughout the building are really only dials with hands controlled electrically from the master clock.

This master clock is also connected with the public address system which can send messages to any or all classrooms at one time.

The old bell system to mark changes of classes has been eliminated and in its place automatic tone warnings are sounded over the PA. This operation effects a saving over the old bell system.

The public address system is as modern as possible and has a radio hookup which could transmit

Continued on Page 12

Memories Go Back to Many Principals

In the forty-one years since high school classes have been taught in Summerland there have been eleven principals.

There are different memories in town of some of the men, varying from whose memory is affectionately kept, to others who left different impressions.

During 1911 three men came and went, which must have been distracting to the students and to the board of trustees.

Perhaps the most amusing recollection heard this week is in connection with Mr. Hunting, principal from 1911-1916.

He was an excellent teacher, rather effeminate, who was apt to comment on the appearance of the girls, favorably or otherwise.

His little dog always came to school with him and was at his heels as he moved about. As well as this unconventional proceeding, during classes the dog lay on his desk where his master stroked him as he taught.

Following is the list of principals and their term of office: J. C. Robson, 1910; Dr. Fraser, Mr. Hindle, Rev. F. Hardy, 1911; Mr. Hunting, 1911-1916; D. H. McIntosh, 1916-1919; D. J. Welsh, 1919-1922; G. A. Lundie, 1922-1923; J. O. Steeves, 1923-1926; D. L. Milne, 1926-1928; K. P. Caple, 1928-1938; A. K. Macleod, the present principal who came to Summerland succeeding Mr. Caple.

The roof is a mixture of tar and gravel and was applied by the Pacific Pipe & Flume Ltd. of Penticton with a twenty-year bond.

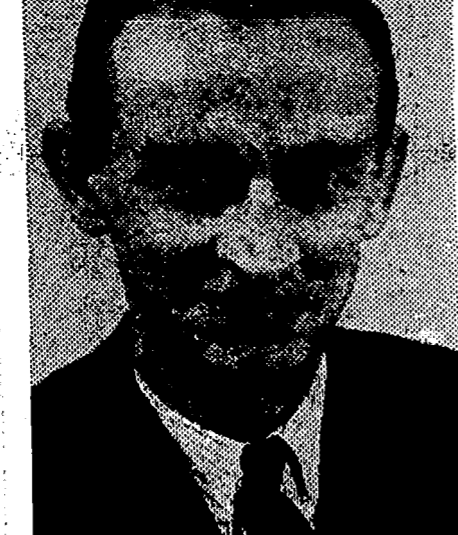

TRUSTEE
Mrs. A. W. Vanderburgh

School Board Chairman Thanks Public For Its Support of New School

It is with great pleasure that the members of the Board of School Trustees of District No. 77 invites you to attend the Official Opening of the new junior-senior high school on September 24.

I think you will agree that we in Summerland now have educational facilities the equal of anywhere in B.C. It is also my belief that we now have sufficient accommodation to serve the pupils of Summerland for a good many years.

I would like to thank the Summerland Review for this opportunity to thank all the citizens of Summerland for their loyal support during the past intensive construction period. Your co-operation at the by-law voting was gratefully appreciated, and we have tried to the best of our ability to give you value for your money.

It was unforeseen and unfortunate that a combination of nature and market conditions have reduced the monetary returns of the primary producer since you agreed to these expenditures; however, we have lived through adversities before, and I feel confident that we will have stability and good times returning to us soon.

The reconstruction of the MacDonald school and the erection of the new junior-senior high school have taken a great deal of time and energy, but we feel that the result more than justifies the effort, and I hope that you will share with your school board members their feeling of justifiable pride, in the knowledge that our coming generations will have the opportunity of receiving their education with facilities and in surroundings so truly in keeping with the Summerland tradition.

C. J. BLEASDALE

There's plenty of light for the workers in the manual arts rooms in the new junior-senior high school, as this picture clearly indicates. In the foreground are the forms at which students work on their models. In the background two wood-working lathes are to be seen while along one wall are layouts for sheet metal work.

Invites the General Public to the

Official Opening

at 2 p.m. on

Monday, Sept. 24, 1951

of the New

SUMMERLAND JUNIOR-SENIOR HIGH SCHOOL

by Hon. W. T. Straith, Minister of Education

THE GENERAL PUBLIC IS INVITED TO INSPECT THE NEW SCHOOL FOLLOWING THE OFFICIAL OPENING CEREMONIES

- The Board of Trustees of School District No. 77 (Summerland) is proud of its now-completed junior-senior high school unit. Throughout the planning and construction stages, it was borne in mind that this structure must supply high school accommodation for the next twenty years, at least.
- No expense was spared to provide the essentials, yet extreme care was taken that no extravagances were included in the plans. The Board of Trustees feels that it can be proud of an extremely functional unit and invites the ratepayers to be present for the official opening next Monday to see for themselves this fine, modern school.

Principal Macleod Relates Change In Present Educational Methods

"In the last ten years there has been an unprecedented growth in population in the Okanagan as in most areas in B.C. This growth has occurred in Summerland as well and is illustrated by the school enrolment figures. Today's school population is double that of a decade ago. Because the pressure of overcrowding was first felt in the elementary grades, a program of enlargement and expansion of the elementary school plant was undertaken," explained A. K. Macleod, high school principal, when asked by The Review to make some observations regarding the new school opening.

"Paralleling and even preceding these developments was a growth in the concept of secondary education. In earlier times there was but one high school course of instruction leading to junior matriculation (now known as University Entrance).

"Except for the laboratory work in chemistry and physics, it was entirely a text book course and therefore convenient and inexpensive to offer.

"There were, however, serious faults with this type of syllabus. Only those pupils with driving interest or native ability in tackling abstract problems had a chance of success. The result was that those who were not fitted for this type of curriculum dropped out from lack of interest or were failed out.

"This, too, is obvious from a glance at our own enrolment figures of the last ten years. Of 406 pupils entered in Grade IX, only 91 received their university entrance standing; and of these, only 48 continued to senior matriculation or to university.

"The department of education was concerned with this situation. It felt that the period of using the high school as an obstacle course to the university must come to an end. It was convinced that the job of education was to make citizens, not to prepare a select few for the university. Something must be provided, then, to retain the large numbers who were denied the benefit of four years high school.

"To this end many more subjects were introduced into the program of studies, chiefly of a technical and vocational nature and the emphasis was removed from the university entrance course, which is now known only as a form

of high school graduation. New regulations were drawn up to permit a pupil to qualify for high school graduation on the completion of required courses in English, effective living, and social studies, and other subjects of his choice, such as typing, shorthand, agriculture, home economics, and industrial arts. The offering of such subjects is only limited by the size of the school and the readiness of the communities to finance them.

"In Summerland we were caught between a sharp rise in population and the new broader philosophy of education. The onus was on us to provide as well as we could the physical conditions under which such a philosophy might be put into practical effect. Therefore the program of extension undertaken several years ago in the elementary school was carried on at the secondary level and has culminated in the splendid junior-senior high school which is to be officially opened on September 24.

"Any one who fears that we may have overbuilt need have no worries. Even if the total population remains stationary in Summerland, there will probably be four hundred pupils in attendance within four years.

"Summerland has taken its place along with principal towns in the Okanagan in providing for the educational needs of its children. While comparisons are sometimes invidious, I think it can be safely stated that Summerland has every right to be proud of its provision and some cause to be grateful to the devoted work of its school trustees who have furnished a school which for its size and economical construction and excellent features is second to none.

"The teachers and pupils are most appreciative of the new facilities, realizing that they are held in trust for their best use and for the use of those who will follow in years to come.

"On their behalf, may I say, 'Thank you, Summerland.'"

MORE ABOUT— CLOCK SYSTEM

school broadcasts. There is provision for tape recording apparatus which could be used to record school broadcasts, speeches or other material for reproduction to classes at a later date.

Glass Block Saved \$2250 On Heating

Summerland's new junior-senior high school was the first such institution in B.C. to have included a large quantity of glass brick in its structure.

In fact, the local school board and architect waged quite a "battle" with the department of education before the powers that be in Victoria were convinced that Summerland had a good point in its argument.

And it wasn't because of any architectural beauty that the argument was won but because of sound, fundamental reasons.

On conventional type windows, canopies and blinds are needed to kill the direct rays of the sun. When this occurs, some artificial light is needed, adding to the expense and not providing the best type of lighting, either.

Glass blocks refract the sun's rays to the ceiling and then to the back of the room, giving much better distribution of light. They are practically unbreakable and being imbedded in mortar no trims need be painted or maintained.

The blocks are also hollow, creating a vacuum in their centre and thus prove an excellent insulator, keeping heat out in the summer and cold out in the winter.

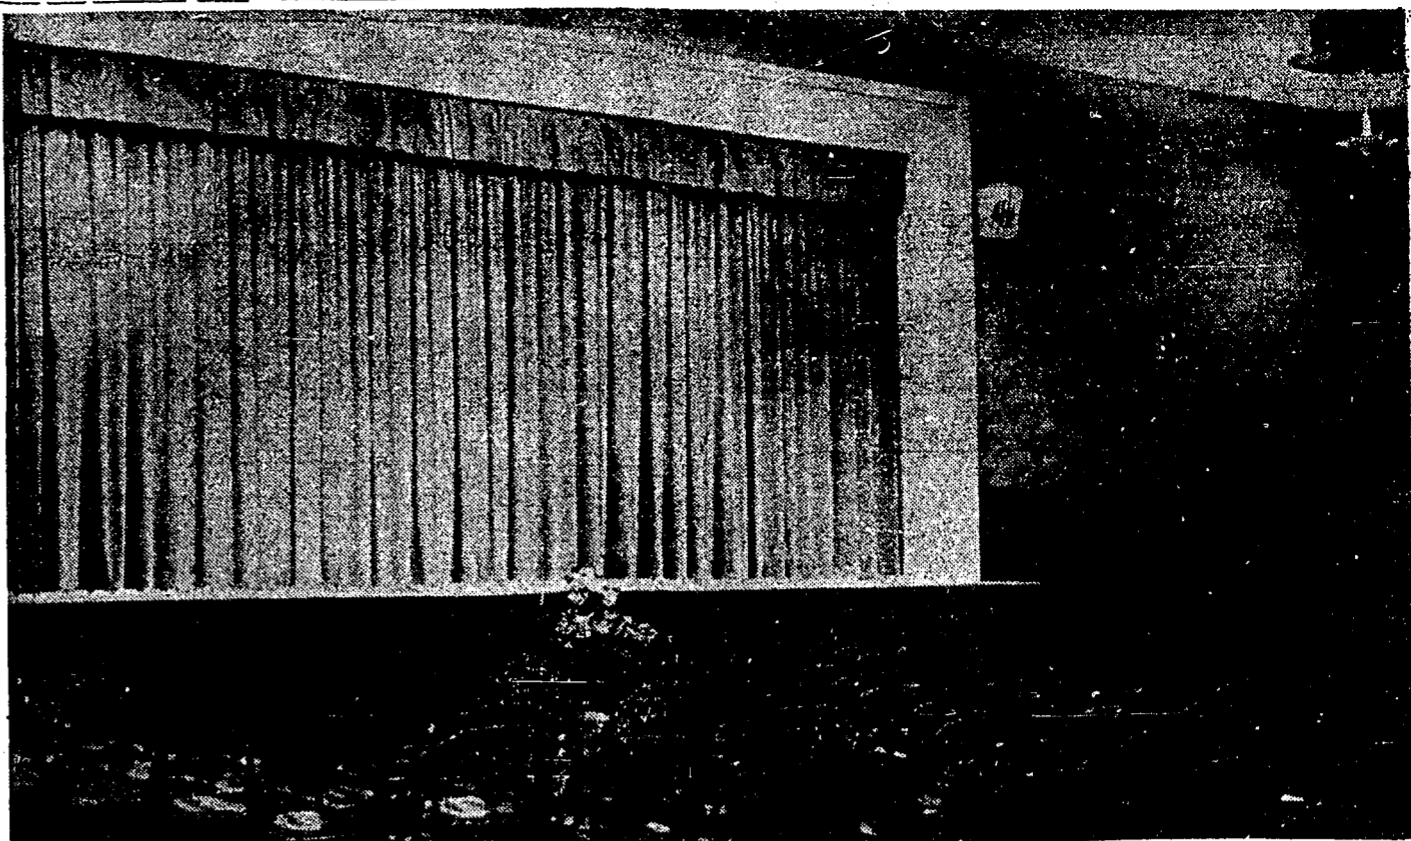

Expensive storm sash is also eliminated.

Almost 400 glass blocks were used in the building, costing approximately 70 cents each, for a total of \$4,500.

Heating engineers advised that a saving of approximately \$2,250 could be saved in the installation of the heating plant by reducing the amount of radiation necessary to heat the building if glass blocks were used instead of clear-glass windows.

In the gymnasium and auditorium there are specially-constructed electrical outlets which can take separate PA hookups and operate independently of the master set in the principal's office.

Thus, if the PA is needed in the evening in either of these halls, a hookup can be established without bothering to open the administration offices.

AUDITORIUM SERVES DUAL PURPOSE—

When the Summerland high school building began to take shape in the minds of its planners, it soon became clear that Summerland could not afford a separate auditorium. It must have one of its larger rooms serve two purposes, they found.

In most B.C. high schools, where this necessity arises, the solution has been the combination gym-auditorium. But this combination proves unsatisfactory because of the constant time-clash in using the building, so local educators conceived the idea of a cafeteria-auditorium.

Here there is no time-clash. The

enthusiastic over its merits, declaring it to be among the finest school stages in B.C.

One interesting problem the architect had to overcome was the fitting of the auditorium into the rest of the building, particularly from the point of view of a way of access from the school to the stage without having to go through the audience.

How neatly this was carried out with a very short corridor can readily be seen by visitors to the school.

This solution was closely related to the discussion to place the stage on the longer side of the wall.

No effort has been spared to make the equipping of the stage flexible so that it may be adaptable to many purposes. The stage and auditorium lights are on a system of dimmers which make it possible to throw light of any intensity from bright sunlight to dim shadow onto the stage from almost any angle.

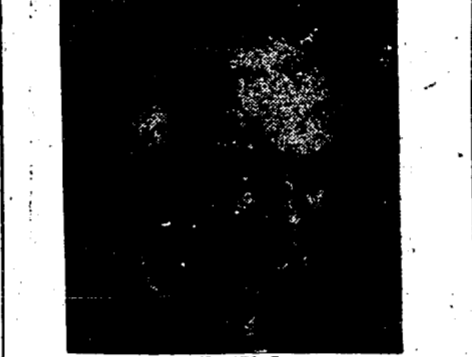

The amount of light can be varied gradually or quickly and can be of any color required.

All lights for stage and auditorium are controlled from a conveniently-placed and fully modern theatrical switchboard with silent switches. Floor and wall outlets and iron pipes at either side of the arch make it possible to hang spotlights from the wire-mesh ceiling or place them in any other desired spot.

Drapes Hung on Wires

The drapes for the stage are individually suspended on wires from the ceiling and may be moved to any position without even the trouble of climbing a ladder.

This convenience is due to a simple but effective device worked out by Father A. M. Meulenbergh who

L. J. Fisher

only limitations to the auditorium are the flat floor and moveable chairs.

And so was born Summerland's cafeteria-auditorium, unique in educational building in British Columbia.

The flat floor affected the planning of the stage. First came the idea of putting the stage in the longer wall, to cut down the craning of necks. This, in turn, led to the necessity of a wide stage opening for visibility.

Principal A. K. Macleod and L. J. Fisher, in charge of school drama, submitted sketches, pamphlets on community stage construction and other authoritative material at the school board's invitation.

Stage Wider Than Usual

Inspector Alex Turnbull and members of the school board became interested in stage construction and contributed valuable ideas. And so a plan was evolved for a stage with a 30-foot arch, rather wider than most stages, with adequate wing space and lighting, a wire-mesh ceiling for hanging lights and drapes, a storage loft, and convenient dressing rooms.

The architect was completely cooperative with the needs and wishes expressed in these preliminary plans and carried them out so well that the stage was a surprise and delight beyond the expectations of all concerned.

On a visit after its completion, H. S. Hurn, provincial director of school and community drama, was

Hon. W. T. Straith

was brought in by the school board to conduct the actual work of putting up the stage drapes.

Short drop curtains ("teasers", to use the theatrical term) mask the top lights, give the stage its ceiling, and are adjustable on lines and pulleys to any height.

They are being paid for by the high school out of profits set aside from the last school play, "What a Life".

The gold velour front curtain has its story. Hung as it was at first on a light-weight domestic curtain track, it was not very satisfactory. This summer a hardwood "traveller" or curtain track of the kind used in professional theatres was purchased from Vancouver's Theatre Under the Stars.

It has a touch of romance in its history since it had been used in the musical comedy "Erigadon" and was shipped to Summerland at the close of the show his summer in Vancouver.

Five Hundred Can See
Looking onto the stage, the audience section is, of course, slightly wider than it is long. The audience is seated in comfortable metal chairs of the collapsible type with a good view of the stage for five hundred spectators.

For theatrical productions that is the limit, but for public meetings where sight lines to give the audience full view of the stage are not necessary, the capacity of the auditorium rises towards 600.

When the auditorium is well filled the acoustically-treated ceiling makes those on the stage more audible.

On either side of the stage, and below stage floor level, are built-in receptacles to hold the metal chairs and tables when not in use. Hidden away are large "trolleys" which can be moved out, the tables and chairs neatly folded inside, then pushed back into the wall where they are "out of sight, out of mind."

Summerland has acquired a multi-purpose public hall which, although it was opened only last spring, has already fulfilled many and varied functions.

Some of the major events already held there have been the Summerland Singers and Players Club "Patience" and "Here Comes Mr. Jordan", the high school graduation ceremony, banquet and dance, the Okanagan Valley flower show, the local Horticultural Society rose show, the AOTS club's concert and hobby show, and the touring UBC Players' Club spring vehicle.

Summerland would appear to be making real use of its spacious, comfortable, modern new auditorium, which is not only an asset to the school but to every citizen of the community.

CONGRATULATIONS

— to —

School District No. 77 (Summerland)

on the opening of the new

JUNIOR - SENIOR HIGH SCHOOL

This building is a distinct acquisition to the educational facilities of British Columbia

The new school reflects a justifiable pride in our Canadian youth and is an expression of our desire to furnish all possible facilities for the education of the present and future generations of British Columbia.

For the student, trained, alert, and adaptable, there will always be a place in the social, commercial, and industrial life of British Columbia.

The Department of Education

Hon. W. T. Straith,
MINISTER

F. T. Fairey,
DEPUTY MINISTER

I AM HAPPY TO EXTEND MY BEST WISHES
TO THE SUMMERLAND SCHOOL BOARD
WITH WHOM MY ASSOCIATION
HAS BEEN MOST PLEASANT

WILLIAM K. NOPPE

Architect
VANCOUVER, B.C.

Full Value Received in New High School, Tour Of Plant Indicates

Visitors to Summerland's lovely junior-senior high school are impressed by one basic fact: Summerland really received full value for the expenditure involved.

There are few schools in this province which have obtained so many facilities for a like amount of money. In fact, most schools being built these days have cost a great deal more.

This situation has come about through a great deal of co-operation on the part of the architect, the school board, the principal and staff members of the high school and the building contractor.

A great deal of thought went into the building and as a result it meets the educational needs of this district quite adequately and will continue to do so for many years.

Chief item of the new school planning is that it can be divided into separate units according to the need of the moment.

The administrative suite is in the centre, and the ten classrooms and library are located in one central wing. On the west side from the classroom unit are the manual arts, home economics and science laboratories. To the north of the classroom section is the modern gymnasium, while on the east side is the cafeteria-auditorium.

This arrangement means that the auditorium or gymnasium, or both, can be used without any need to disturb the classroom section or any other portion of the school.

This in itself eliminates a great deal of extra janitor work.

Light and fuel consumption has already been proved to be well below original estimates, based on costs of buildings of a similar size.

This is partly due to the glass brick construction in the main classroom unit and to the two-inch bats of insulating material inserted in the walls, another reason is the careful planning of the heating units.

The small basement space is as clean and sparkling as any other portion of the school and it glistens with efficiency.

Zoned Heating System

Heating is provided by a hot water forced circulation system divided into seven zones. Each zone takes care of a different part of the building, such as classrooms, hallways, radiator system in the small offices, the auditorium and the gymnasium.

Twin boilers burning stoker coal are fed by an Iron Fireman with stoker worms inserted into a 1-ton coal bunker. The coal is thus fed automatically and requires little attention apart from regulation.

One boiler supplies the classrooms and the second the rest of the school, and both should be operating for best efficiency, it is explained. However, when one boiler needs cleaning then the second unit is quite capable of supplying sufficient heat for the entire school.

There is also a separate domestic hot water system to supply special needs in the school, fired by a small coal unit.

The basement is protected by an automatic sprinkler system.

Considerable saving resulted from careful planning of the main toilet units for boys and girls. A passageway in the wall between these units provides easy access to service the pipes, while extra costs of installation were eliminated by centralizing facilities.

Wall-fin radiators are used in the classrooms, while other types of radiators are in the offices and large circulating univents are installed in the gym and auditorium.

The heating system was designed by Heat & Power Engineering Service, Vancouver while Minneapolis Honeywell controls are installed to regulate the system.

Some idea of the extent of the heating and plumbing system can be gained with the knowledge that 10,000 feet of pipe was installed by the subcontractor, John Lawson of Penticton.

Visitors to the new school, once past the imposing entrance facing south on Granville street, can turn right to the auditorium, straight ahead to the gymnasium or left to the administrative offices and classrooms.

On the east side of the auditorium, provision has been made for a kitchen in connection with the proposed cafeteria. This is the one portion of the school which has not been completed.

Forty metal tables with folding legs so that they can be condensed down to a height of three inches, complete with linoleum tops, are available for the noon hour lunch period. About 500 folding chairs are also provided.

Store Chairs, Tables Easily These tables and chairs can be stored in large "trolleys" built into

the wall below stage floor height and on either side of the big stage. Sinks, a kitchen range, steam tables and other facilities are to be installed in the auditorium kitchen as soon as it is determined to what extent the noonhour service is requested.

The auditorium floor, like floors in all the main hallways and the offices, is a Eansan oxychloride floor which created a bit of a problem. Although a splendid job of laying was done in most sections, in some corridors a cracking occurred.

The Sansan Floor Company Ltd. states that due to a strike at the factory a different type of cement had to be used in these cases and did not prove of sufficient quality for the job.

In the summer holidays, a new composition floor was laid over the cracked corridors and now a smooth, even surface is presented.

This type of floor is laid in one continuous slab and is easy to maintain. Cost for a thickness of 5/8ths of an inch was considerably below that of lino or tile, the school board ascertained.

It is anticipated the floors will last as long as the building.

Dream of sports-minded people here for many years has come true with the completion of the modern gymnasium included in the junior-senior high school.

A well-laid maple floor has plenty of room for basketball, badminton or volleyball. Along the east side of the gym bleachers to seat upwards of 400 persons have been provided, ample for school or community sports crowds.

One of the big features of the gymnasium, like the auditorium, is the lighting arrangement. There is plenty of light for any type of game and is designed as "pattern lighting". This means that sufficient light for one kind of game at a time can be turned on, or the full force of the lighting system can be thrown on the floor at one time.

The lighting is so arranged that it can cover just one court or the whole gym.

Four univents provide heat and ventilation for the gym.

The gym is equipped with flying rings, a high bar, tumbling mats, a horse and a vaulting box.

Below the bleachers are the boys and girls dressing rooms, each with a small cubicle for instructors, with a window looking out onto the gym floor.

Administration Offices

The principal, A. K. Macleod, now has a large office for his own use and it flanks the main reception room and stationery and book supply rooms. In the main offices are located the public address system which is synchronized with the master clock and the school warning system.

In the centre of the entire unit are the lavatories for boys and girls, floors being covered with ceramic tile.

Proceeding on to the west wing, visitors will find the specialists' rooms.

The main science laboratory has a fume chamber, and it is well equipped with demonstration tables and individual units for the students. Water, gas and electricity is provided for every four pupils in the senior science room. Also provided is a good-sized storage space for scientific supplies and equipment. Most of this equipment is expensive and is potentially dangerous if not properly cared for.

The storage rooms connect the senior and junior science rooms, with biology another subject taught in the latter classroom.

Another room in the administrative suite is the nurse's quarters, complete with anteroom, office and dispensary area and a bed for any pupil who needs attention or becomes ill and needs a place to lie down while awaiting transportation home.

The commercial room is divided into two sections, with the typing room as nearly sound-proof as possible.

First of the manual arts rooms is the drafting classroom, complete with 24 special tables arrayed with drafting tools.

In the second room which contains the woodworking and metal working equipment and tools, floors are marked with safety lanes around equipment which will be in use.

Standard type forms are placed in readiness for the pupils, along with two wood and two metal lathes.

Because so much individual instruction is necessary, 24 is the extent of manual arts classes.

Other equipment to be seen are small gas furnaces to keep soldering irons hot, forge and anvil in a fireproof vault, the paintroom

which provides flashproof and vapourproof safety precautions, lumber storage room and a model storage room.

Old and Modern Units Last but by no means least is the home economics room which provides facilities for cooking and sewing. Desirable electrical units which are playing a greater role each day in most homes are included in the equipment, but also more "old-fashioned" units are there to teach those who will not be fortunate enough to have electrical appliances in their future homes.

Large lockers hold drawers of various pupils' handicrafts. They can be taken out of the lockers and inserted in desks where the pupils

On A Job Well Done

We feel that we should offer our congratulations to the School Board of District No. 77 and to the People of Summerland and District as a whole on the completion of a Fine, New Junior-Senior High School.

THIS SPLENDID NEW BUILDING IS THE RESULT OF CAREFUL PLANNING AND WE ARE PROUD TO HAVE BEEN ASSOCIATED IN ITS CREATION AS

General Contractors

Kenyon & Co. Ltd.

225 Martin Street Penticton, B.C.

Any doubts that the new auditorium-cafeteria might be too large have been dispelled this term as the pupils crowd in for the lunch-hour period. In fact, it has been found that the large room is not big enough to take care of all the elementary school pupils who wish to eat their noon-day meal in these pleasant surroundings.

Primary school pupils still eat their lunches in the MacDonald school while the rest of the pupils occupy the cafeteria for the first sitting at the tables arranged for their use.

In the above picture it can be

readily seen that there isn't any more space available when these eager youngsters crowd in.

The auditorium really doubles as a potential cafeteria, with the kitchen to serve it at the north end of the building.

There are already tables to seat 320 and the room is being used as a lunch room now as kitchen equipment has not been installed to date.

At the present time the board of school trustees is working on a plan to send out a questionnaire to parents, to find if cafeteria service is desired and, if so, what sort

of menu would be most acceptable. In any case it would be necessary to have two sittings, as is being done now in the lunch hour, with the elementary school students having their meal first, and the high school following.

The matter of kitchen equipment is being taken up and methods employed in other centres being observed.

A major proportion of elementary school pupils bring lunch to school, but it is difficult to estimate the number who might use cafeteria service until a survey is taken. This will be done in the immediate future.

First Consolidated School System in B.C. Established Here

Summerland has many "firsts" to its credit, and it is in the local tradition that its high school is among the finest in the province.

Forty years ago, in 1912, Summerland led the way in school consolidation in British Columbia, and in having vans to fetch children to a central school.

Next year will be the fiftieth one since the first little Summerland school was opened on the lakeshore where the early settlers lived. No doubt a sturdy hand bell was rung vigorously to call the students together that first morning, and heard more eagerly at noon when it rang for the lunch hour, and later in the hot afternoon as the classes were dismissed for the day.

That was in 1902, and the teacher was Mr. K. M. Hogg. In 1903 a school was built just below the hospital, opposite where Miss Violet and Miss Muriel Banks live, and was taught by a Miss Smith of Peachland.

As more people came, land was taken up in Garnet Valley and Prairie Valley, so schools were erected in these areas.

Siwash Flat, the Indian Reserve land, and the site of West Summerland now, was not surveyed until 1908, so up to that time no school accommodation was required there. As these lots began to go on the market, the trustee board planned a central school to have two rooms, one for the junior pupils of that district, and the other for the senior division to take in all pupils of grades 7 and 8 for the whole municipality.

The three schools established already were to remain open for the younger children of the different areas.

The Summerland Review of 1908 gives the enrolment of the schools as follows: Central 48, primary 36, Garnet Valley 25, Prairie Valley 10, total enrolment 119.

And still another small school was opened in J. R. Brown's packing-house at Trout Creek, to meet the needs of a spreading settlement.

Tenders Too High
In 1908 the board of school trustees asked for tenders for construction of the central school which they had in mind, the cost of which was to be met by the government. The government considered the tenders too high, and as a result nothing was done.

John Calvert Robson, whose widow lives in Summerland, and whose daughter is Mrs. E. F. Butler, had been appointed principal of the central school, which so far was non-existent. At the beginning of the fall term temporary quarters were opened for grades 7 and 8 in the upstairs of Laidlaw's Store, then the Summerland Supply Co.

Mr. Robson had reasonable and strong objections to classes being held in a dark inconvenient room, and took a hand in matters himself.

He wrote to Mr. Price Ellison, then M.L.A. for this riding, whom he knew well, asking him to urge the government to take action regarding the Summerland school. Inside of ten days the contract was let. By the middle of October construction commenced. The building was ready for use at the New Year, facilities as planned. This building is the old gymnasium.

As well as his principalship Mr. Robson supervised the outside schools, promoting pupils from them when ready for grade 7. At the end of the first year

ten students passed out of grade 8, ready for higher education.

This number, however, did not entitle Summerland to have a high school. Consequently, the board asked Mr. Robson to take the first years of high school work in addition to his regular duties.

He did this, and that year eleven passed the high school entrance examinations, so there were 21 in the district qualified to attend high school. The department of education then gave high school rights to Summerland and the work was taught in a building on the main street of West Summerland, afterward moved.

Well satisfied with the success of the central school experiment, the board of trustees decided to erect a larger central building, and did so.

At that time it was decided, too, to put on school vans, to fetch all the pupils to the one place, and to close the outside ones. This was effected in 1912.

First Consolidated School.

By this action Summerland became the first centre in British Columbia to consolidate its schools, pioneering in this educational move, indicative of the enterprising spirit of its people.

The old schools were converted into residences, and their original use is almost forgotten.

After World War I population increased so rapidly that the high school students were moved into the original central school building. When crowded out of this to make room for elementary school demands, they were housed for a

time in part of Okanagan College, and at the lakeshore in the Men's Club room of the Lakeshore Methodist church.

Again it was necessary to take care of the leaping school population, so the present MacDonald School was erected at a cost of \$30,000, and opened Oct. 13, 1921.

The consolidated school was used as a high school.

In 1936 the first central building was remodelled to make a gymnasium.

In 1937 a course in home economics was added to the high school curriculum starting with girls of grade 6 and up.

Manual training was given and there was musical instruction.

Following World War II improvements were made again, and a room added to the high school, but the pressure made by the influx of residents during the war found the space completely inadequate.

It was known that action would have to be taken, and thought was given to a new up-to-date school.

Through the implementation of the Cameron Report in 1946 Summerland became part of School District 15, Penticton.

Due to disagreement and dissatisfaction of the councils of the two neighboring towns separation was gained, and Summerland became a school district (77) on Jan. 1, 1948.

For three months the district was operated under an official trustee, Inspector J. N. Burnett, after which an election of officers for the newly-formed district was held.

The inaugural meeting was in May, 1948. Chairman was P. G. Doddwell, and trustees, Dr. James Marshall, C. J. Bleasdale, Aubrey King and Mrs. A. W. Vanderburgh.

Planning for the needed new school was immediately done and the necessary by-law steps taken.

can continue their sewing until the drawers are filed away again at the end of the period.

In some classrooms and most of the specialty rooms, triple blackboards have been included in the plans. The triple boards, operating on a system of pulleys, save wall space and are very practical for teachers who have a number of

problems they wish to remain on the boards for a time.

Once one board is filled and is not needed for the moment it can be elevated and a clean board is ready for further work.

Vol. 6, No. 39 West Summerland, B.C., Thursday, September 27, 1951

Some of the platform guests can be seen in this picture of the opening ceremonies last Monday afternoon as Hon. W. T. Straith, minister of education declared the new junior-senior high school officially open. From left to right seated can be seen Reeve C. E. Bentley, Rev. H. R. Whitmore, H. S. Kenyon, S. A. Macdonald, W. K. Noppe, C. J. Bleasdale, A. K. Macleod and Mrs. A. W. Vanderburgh. Mr. Straith is at the microphone. Special mention was made by speakers about the lovely floral decorations which outlined the stage. Some of the profuse blooms can be seen along the edge of the platform.

IMPOSING BUILDING OFFICIALLY OPENED

New School Should be Used by Community at Large Straith Stresses

"Look upon this building not only as a school but as a community centre; keep the lights burning as long as they are serving a useful purpose."

This was the message delivered to the people of Summerland Monday afternoon as Hon. W. T. Straith, minister of education, officially opened the spacious Summerland junior-senior high school with an address delivered from the stage of the new cafeteria-auditorium.

The minister instanced the tremendous growth in school population throughout B.C. and noted that it had increased from 168,000 in 1950 to 180,000 this fall term.

On the basis of 30 to a classroom, this means that 400 new classrooms are needed this year, plus 400 new teachers, to supply the educational needs of B.C.

"We need to build one new school this size every week to look after the increase from last year alone," he emphasized.

Last year \$20 million was spent in new schools. This year, due to national defence needs, this sum is being reduced to \$10 million, but his departmental experts tell him that the figure will have to go back to \$20 million next year.

"That means \$50 million spent in three years to look after the increasing population. And I think it's well worthwhile," he continued.

He urged students to complete their high school graduation and deprecate the falling off of enrolments at normal schools and the university.

Declares School Holiday
Hon. Mr. Straith declared a holiday for Summerland school students on a day selected by the school board when it will be possible for them to see Princess Elizabeth as she passes through the province.

Tribute was paid to C. J. Bleasdale, chairman of School District No. 77, and his trustees for the time and effort expended in bringing the new building to completion. The stage was beautifully decorated with gladioli and fall flowers, making a perfect setting for the auspicious occasion.

On the platform with Chairman Bleasdale and Hon. Mr. Straith were Reeve C. E. Bentley, Trustees Mrs. A. W. Vanderburgh and Dr. W. H. B. Munn, Secretary Bedford Tingley, Principals A. K. Macleod and S. A. Macdonald, Architect W. K. Noppe, Contractor H. S. Kenyon and School Inspectors J. N. Burnett, A. Turnbull and A. S. Matheson, Ken Brawner, representing the students, and Rev. H. R. Whitmore.

"Summerland has travelled quite a long way on the road to better educational facilities," Mr. Bleasdale remarked in opening the afternoon's program. Opening of the new junior-senior

Royal Tour Is Delayed One Week

Visit of Princess Elizabeth and her husband, the Duke of Edinburgh to Canada will be postponed one week, it was announced from Ottawa this morning.

Instead of flying from England to arrive in Canada on October 2, the flight across the Atlantic will take place on October 13, with arrival in Canada on the latter date.

This will mean that all plans for receiving Their Royal Highnesses on their various stops across the country will be postponed a week.

Delay has been caused because of the condition of King George, who was operated on last weekend for a dangerous lung condition.

A period of "some anxiety for the next week or ten days" can be expected before the King is pronounced out of danger, it was stated from Buckingham Palace yesterday. The operation was for lung resection, it was revealed on Sunday.

COUNCIL NEWS CANNOT BE CARRIED IN FULL TODAY

It was found impossible to provide readers with all items of interest arising from last Tuesday's council session in this issue of The Review. However, a more complete coverage will be provided readers in next week's issue.

Lieut. Governor

J. Y. Towgood

who was named Lieutenant-Governor of Division 5 of the Pacific Northwest District of Kiwanis International at the annual district convention in Kelowna this week. A past president of Kiwanis Club of Summerland, Mr. Towgood was removed for this post some weeks ago. He heads the only division in Kiwanis International which has clubs on both sides of the international border, fourteen in number. Mr. Towgood and other members of the local Kiwanis club, including President Lacey Fisher, Secretary A. M. Meulenbergh, Frank McDonald, Jack Lawler, N. O. Solly and W. S. Ritchie attended the Kiwanis district convention which concluded Tuesday in Vancouver.

New Municipal Hall Can be Financed Without Borrowing Any Money Council Reveals

Probably before the end of October, Summerland ratepayers will be asked to ratify a bylaw which will provide this municipality with a new municipal hall. But the surprising part of this deal is that the ratepayers in order to pay for the proposed structure.

It is estimated that the new municipal hall can be constructed for \$45,000.

There is in the municipal coffers the sum of \$33,472.61 which is surplus to sinking fund requirements. This sum has been collected in small amounts from various bylaw accounts and has slowly been accumulating over the years.

For some months, the municipal office staff has been carefully and tediously compiling statistics on the sinking fund surplus until now the listing is complete according to the exacting requirements of the department of municipal affairs.

If ratepayers approve, this sum will be applied to the municipal hall project.

Also unexpended from the domestic water extension, bylaw which saw domestic water service provided to the north bench and Crescent Beach areas is the sum of \$7,200.

Ratepayers are also being asked to approve the transfer of this sum to the municipal hall building fund.

From Current Revenue
Balance of the amount needed, \$4,327.39, will be raised from current year's revenue, it was stated, although no explanation was given at Tuesday's session how such an amount will be found from this year's tax revenues.

First reading of the bylaw which will provide transfers of monies to allow the municipal hall to proceed was given at Tuesday's council session. The bylaw will be submitted to Victoria for approval, will then be given two more readings and presented to the ratepayers for their sanction.

Such a bylaw vote should be held before the end of October, it is anticipated.

If the scheme is approved, a start may be possible before winter sets in, depending on the type of weather before the year ends.

Sketch plans for the new hall have been drawn up by McCarter & Nairne, Vancouver architectural firm and it is on this firm's estimates that the figure of \$45,000 has been arrived at.

Located on Granville
The new hall will be located off Granville street, just east of the Summerland Box Co. Ltd. office, on property purchased last year from the Stewart interests.

Main entrance, up several steps, will be located at the northwest corner of the building, which has a 40-foot frontage with a depth of 64 feet.

A vestibule will greet persons entering the main hall doors, with the main office opening directly off the vestibule. A counter stretches across the front of the office, which extends straight through to the rear of the building.

Renovation Bylaw For Ellison Hall Is Now Prepared

Coupled with the proposed bylaw for a new municipal hall will be a bylaw calling for an expenditure of \$12,000 to renovate Ellison hall.

That was the news revealed by municipal council on Tuesday when first reading of the bylaw was given.

Both the municipal hall bylaw and that for Ellison hall will be presented to the ratepayers at the same time, probably towards the end of October.

It was about a year ago that the Canadian Legion circulated a petition calling upon the municipal council to submit a bylaw to the ratepayers to raise sufficient funds to renovate Ellison hall and place it back in circulation as one of the district's meeting places.

Ellison hall has been condemned for some time because it lacks proper heating facilities and has deteriorated rapidly through lack of use in the past year.

The bylaw for \$12,000 covers estimated cost of repairing the roof, insulating the building, installing a new heating plant, and laying a new floor, besides sundry minor alterations and additions.

This will be a bylaw to borrow \$12,000 for a twelve year period, repayable at \$1,000 per year plus interest. Debentures would yield 4 1/2 percent interest, and would be in denominations of not less than \$100.

KELOWNA BUSINESS LOT SOLD FOR \$85,000

KELOWNA — The corner lot at Bernard and Water formerly occupied by Gordon's Grocery, D. R. Butt & Sons Ltd. and two smaller companies is reported sold to the F. W. Woolworth Co. for \$85,000. The old wooden building was condemned and demolished this year.

The council chambers, which can be entered without bothering the main office. Directly south of the council meeting place is office space for the municipal clerk and the reeve, while stairs leading to the basement rooms is directly behind this office.

The vault is located south of the stairway and more office space is available in the L-shaped space between the vault and the rear wall.

In the basement, there is provision for the heating plant chamber, a second storage vault, toilets and general storage and office space. Windows providing light to the basement are located at ground level around the building, while the main floor is 8 feet 6 inches above ground level. A flat roof conforms to the architectural scheme of the new high school across the street.

Solon Low Condemns "Gestapo" Tactics of B.C. Fruit Marketing Setup

Scathing criticism of the B.C. Interior's fruit marketing setup coupled with complaints that people on the prairies cannot get B.C. fruit, highlighted much of the address delivered yesterday afternoon before a local audience in the IOOF hall by Solon Low, federal leader of the Social Credit party.

He termed it a "travesty on human intelligence" that Okanagan growers were not able to sell their fruit last year or sold it at a loss, and intimated that under a system which would be setup by a Social Credit government marketing difficulties would be erased.

He laid the blame for disappearance of the British market on the doorstep of the Liberal administration at Ottawa.

Throughout his talk, Mr. Low kept referring to the fruit industry's Gestapo or Gestapo-like fruit inspectors who, according to the speaker, prevent persons from taking fruit from this province into Alberta unless it has been purchased through the proper channels.

"How stupid can people get?" he enquired, after leaving no doubt in listeners' minds that he considered regulations whereby all produce to be marketed is sold over one desk as statisticians a move as ever introduced by out and out socialists.

He had heard stories of fruit rotting on the ground, of gasoline being poured on the fruit so it wouldn't be disposed, that farmers on the prairies were prevented from sending in a carload of grain as barter for an equal amount of apples.

Couldn't See Any Fruit

"I travelled for 100 miles on the prairies and I couldn't see fruit of any kind," he told the meeting. In the Peace River, no peaches were to be found and they couldn't get any, he charged.

Turning to the loss of the UK market, Mr. Low blamed Canada's insistence on clinging to the Geneva trade agreements as being responsible.

"Like fools", Canada has followed a financial policy dictated by alien interests, the United States, at the Bretton Woods conference, he declared.

"Great Britain couldn't get U.S. dollars because the United States wouldn't spend enough of her dollars on the purchase of trade goods charged. So, Great Britain couldn't buy Canada's apples, jam or other produce or products, because the Geneva agreements insisted that trade must be carried out in U.S. dollars.

He advocated that this condition could be alleviated by Canada taking payment in pound sterling and leaving it in a bloc
Continued on Page 4

You Get Back That Hour You Lost

On Sunday, September 30, B.C. residents will get back that hour they lost last spring.

At 2 o'clock on Sunday morning, clocks are to be set back one hour in order that standard time can be resumed throughout the province after daylight saving time for the past five months.

But, in case, persons should forget the time change on Sunday morning, it would be best to alter clocks and watches before retiring on Saturday night—that is, if you go to bed before 2 o'clock Sunday morning.

Most Students Back to School

Less than a dozen pupils are still in the orchards and have not returned to resume their studies, A. K. Macleod, principal of the local high school stated yesterday.

High school classes are now getting into high gear and are moving steadily along, now that practically all the classes are at full enrolment, he states.

All boys of senior high school have returned to the orchards last week to help pick the fast-dropping McIntosh crop, but they have all returned to their studies now.

President Reid Johnston and Ross McLashlan, director in charge of international service in the Rotary Club of Summerland will attend an international meeting in Oliver on Sunday, September 30

Grev Rowland Fears Freedom Of Press is Disappearing Along With Other Types of Freedoms

Pictured above is J. C. Homblin, able field worker of the Canadian National Institute for the Blind for the interior of B.C. who has found that with knowledge, experience and patience blind persons may be led along the road of darkness to the light of complete adjustment—to life without sight. Mr. Homblin and members of the Summerland and District Branch of CNIB are appealing to all persons who are able to make contributions so that help can be given the blind to win victory over blindness.

Letters have gone forward to a selected list of 500 persons in the Summerland district from the Summerland branch, under the signature of the local chairman, Mrs. F. E. Atkinson. The public generally is being asked to assist with subscriptions which may be left with Mrs. Marie Robinson, CNIB treasurer here, at the Bank of Montreal. She may issue official receipts which can be applied on income tax.

A tag day is being planned for Summerland area on Saturday, October 6.

Grev J. Rowland, publisher of the Penticon Herald, made an ardent plea to the Rotary Club of Summerland to play its part in preventing the Freedom of the Press from vanishing, when he was heartily applauded as guest speaker at the Nu-Way Annex Friday night.

By Freedom of the Press Mr. Rowland did not mean only the family newspaper, but he referred to all types of newspapers, radio, television and the screen: Freedom of the press has become a symbol for all other freedoms enjoyed in a democracy, he explained.

Although on this continent people have shown an unconcern over the Freedom of the Press which they enjoy, and he considered this a sign of health that they are really satisfied, yet he felt that this freedom is slowly vanishing.

"There are origins that all is not well with the press," he declared, pointing to the "semi-Fascist camp of British South Africa" and the sad story of the Argentine where a beacon—La Prensa—disappeared.

He told the story of Peter Tjebbes, now a prominent Grand Forks businessman, who had been content to "play along" with the business trends of the Argentine until he found that the press of Argentine had disappeared. Then he got out. **Freedoms are Disappearing**

The Freedom of the Press, he reminded, is relative to all other freedoms which "contribute to our happiness", and "we don't realize their existence until they are out off."

These freedoms are disappearing by direct action of the government or ayonous of the government, he felt, and even with the best of intentions Canadians are contributing to the throttling of the press, he felt.

Advertising provides the means whereby newspapers can be published, but there is safety in numbers to prevent advertisers from dictating the policy of a newspaper
Continued on Page 10

Heavy Crop of Anjou Pears is Being Harvested Throughout Okanagan

Quality of pears is not as good as hoped for, the latest issue of the horticultural news letter states for Summerland, Peachland and Westbank area. Russetting and shrivelling are the two main defects.

Anjou pears have a heavy crop this year and picking was recommended to start last Sunday.

Some heavy losses in McIntosh drop have been reported and this tendency towards premature drop is also noticed in Newtowns which are ten days from being mature, the report states.

Jonathans Have Color

Jonathan apples are coloring well and some picking started last weekend. Estimates for Delicious and some later varieties are being revised downwards because of poor size.

"Codling moth injury has been higher than usual in Macs this year and may be expected to be worse in some of the later varieties. Apart from this, there has been little other insect damage to the 1951 apple crop."
Penticton area is expecting a

good Red Delicious crop, although size varies considerably, even on individual trees. Winesaps are inclined to be small, especially in the Keremeos section. McIntosh estimates are not expected to be affected by the drop, as the crop is running to large size.

Oliver-Osoyoos is also disappointed in its prune crop. In addition to small, prunes shrivelled badly so that the crop was expensive to handle and cullage high.

Color of Delicious is much better than 1950, with picking having commenced on September 17, that area states.

In Kelowna the loss from Macdon is estimated by horticulturists as 20 percent. Prune quality and size have been poor, but the Anjou crop is a large one, with little evidence of cork spot to be found right now. Later apple varieties tend to be small and some growers are complaining of slow coloring, especially on Delicious.

Both Kelowna and Vernon areas in the throes of a heavy movement of tomatoes to the canneries.

Editorial

We Pray for His Majesty

THERE could have been no more fitting time for the people of Summerland, through His Worship the Reeve, to extend wishes for a speedy recovery to His Majesty the King than upon the opening of such a magnificent structure as Summerland's new junior-senior high school.

Here in the Okanagan we are especially proud of our connection with the British Commonwealth of Nations and our allegiance to the man who stands as figurehead of that community of nations, The King.

When The King is in ill health we all feel a personal sympathy, so fully has the reigning monarch endeared himself to his subjects. When word was heard over the past weekend that he was undergoing an operation, radio receiving sets received

more than usual attention, to hear the reports of his progress.

It was with a feeling of great relief that we heard of the apparent success of his operation, that he seems to be on the road to recovery, and that despite the seriousness of the operation that he stands an excellent chance of taking his place once more at the helm of affairs in the Commonwealth.

Just as the good people of England pray for his speedy recovery so do we in far-off Summerland hope and pray that The King will be spared to continue his good services on our behalf.

We are happy that Reeve Bentley took such a splendid occasion to express our thoughts to Their Majesties in their hour of crisis.

A Free Press for a Free People

YOUR Newspaper Lights the Way of Freedom" is the theme chosen by newspapers throughout North America for National Newspaper Week, which is being observed next week from October 1 to 8.

It was timely, indeed, that the Rotary Club of Summerland invited Mr. Grev Rowland, the able publisher of the Penticton Herald to speak on the subject of the Freedom of the Press last week.

This National Newspaper Week wishes to focus the attention of every element of society on the importance of Freedom to the future of the entire world and chooses the community newspaper as the prime example of this Freedom.

Mr. Rowland, as fluent a speaker as one can find in this valley, was disturbed in his thoughts about Freedom of the Press. He believes that present-day trends are inclining towards stifling this Freedom and that if allowed to continue we will stand in danger of losing it altogether.

It behooves us all, then, to think of the Freedom of the Press and to wage a continuous campaign to preserve and maintain our basic freedoms, for the story of the development and growth of newspapers forms a vital part of the history of our struggle for these freedoms.

You have all heard of the first days of the "press". First dissemination of news was carried out by town criers, who walked through the streets calling out items of interest and various proclamations.

Gradually the commercial aspect of news began to become apparent and travellers abroad wrote newsletters to their employers telling of events which would affect business.

Then came the printing press, invented by Johannes Gutenberg, in 1450, but governments of the day feared its power and placed its use under careful control, restricting its uses. At first, printing presses were used practically exclusively for purposes of government and a few religious documents.

In the struggle between Parliament and King Charles I. in England, restrictions were relaxed for the first time as both sides were anxious to present

their arguments to the public. But Cromwell suppressed all publications when he became Lord Protector.

It wasn't until 1665 that the first newspaper was established in England. It was the Oxford Gazette, later called the London Gazette, still being published.

But even the Gazette could not publish anything contrary to the policies of the government, without fear of punishment. But publishers continued illegal printing practices and the idea of a free press, unfettered by controls of government, continued to grow.

Both in England and this country, a bitter war was waged against strict libel laws which forbade criticism of the government or its officials, no matter how justified.

It wasn't until 1721 that any periodical in America made a determined stand against government control and censorship. This was the New England Courant, published by James Franklin and assisted by his younger brother, an apprentice printer named Benjamin Franklin.

There followed many trials, one of the most widely known being that of John Peter Zenger, on a charge of seditious libel against the tyrannical New York Governor Crosby. He was so ably defended by Andrew Hamilton that the jury acquitted him.

But only once was the Freedom of the Press seriously questioned in the United States after the American Revolution, and that before the turn of the 19th century.

As Mr. Rowland pointed out last week, we of the Anglo-American world have become so accustomed to the Freedom of the Press that we have taken it for granted. We incline to forget the two-century struggle which was waged by our forbears that we might bask in the relative comfort and security of our basic freedoms.

Let us ever be careful that our watchdog of our freedoms—the free press—is not quietly put away while we bask contentedly. It will be too late when we want to take action.

Ralph White Passes On

SUMMERLAND joins with Kamloops this week in expressing regrets and deepest sympathy at the passing of a pioneer citizen and newspaperman of these two communities—Ralph E. White, publisher of the Kamloops Sentinel.

It was in the very early days of this century that Ralph White came west from the Maritimes to the young town of Summerland to help establish the Summerland Review.

He helped Summerland grow until the mid-

twenties when he relinquished his interests in The Review and took over the Kamloops Sentinel. In the intervening quarter-century he and his family brought that publication into eminence as one of the outstanding weekly newspapers in Canada, and twice winner of the Mason trophy.

Not only was Mr. White an outstanding newspaper publisher but he was active in community work and both Summerland and Kamloops are better for his guidance and counsel. He will be missed, but his good works will carry on.

Signifying Nothing By RUSTICUS

This is a grand time of year for all Okanaganians, whether they be lucky enough to be born into that state of bliss, or merely adopted children of this beautiful valley, like me. Days of mellow sunshine and stary nights, orchards red with apples and the apples themselves individually beautiful with their own bloom, pickers busy gathering in the harvest and cursing Mao-dropping winds, trucks plying back and forth with loads of luscious fruit or pungent-smelling now boxes—it's enough to make even this prosaic columnist turn poetic.

Of a late afternoon or Saturday evening you see the transient pickers hurrying their wearied legs into town, to shop for groceries and, if it's just after payday, some little extra they have set their hearts on, and returning home, afoot or on bicycle, laden with brown paper bags and parcels, to their little rented shacks.

Do I, as I drive back and forth from my palatial mansion—mine, that is, after twenty-three more

payments on the mortgage—to my white-collar job, in my luxuriously appointed saloon—that's an English term for car, in case you are more familiar with the other kind—look with condescension on those less fortunate individuals?

On the contrary, I envy them. Envy them because once upon a time I too worked in orchards or packinghouses, was physically weary rather than mentally hampered by overtime, had nothing but feet to travel on and only a small rented cottage to live in. And those were some of the happiest years of my life.

Why? Because then I had no worries about paying taxes or fire insurance, keeping the back porch painted and the lawn mowed, buying expensive clothes or paying garage and gasoline bills. I had time, in the evenings, to visit with neighbors, or even to stop and chat on the street with acquaintances, of a Saturday night, and nothing at all to do all day Sunday.

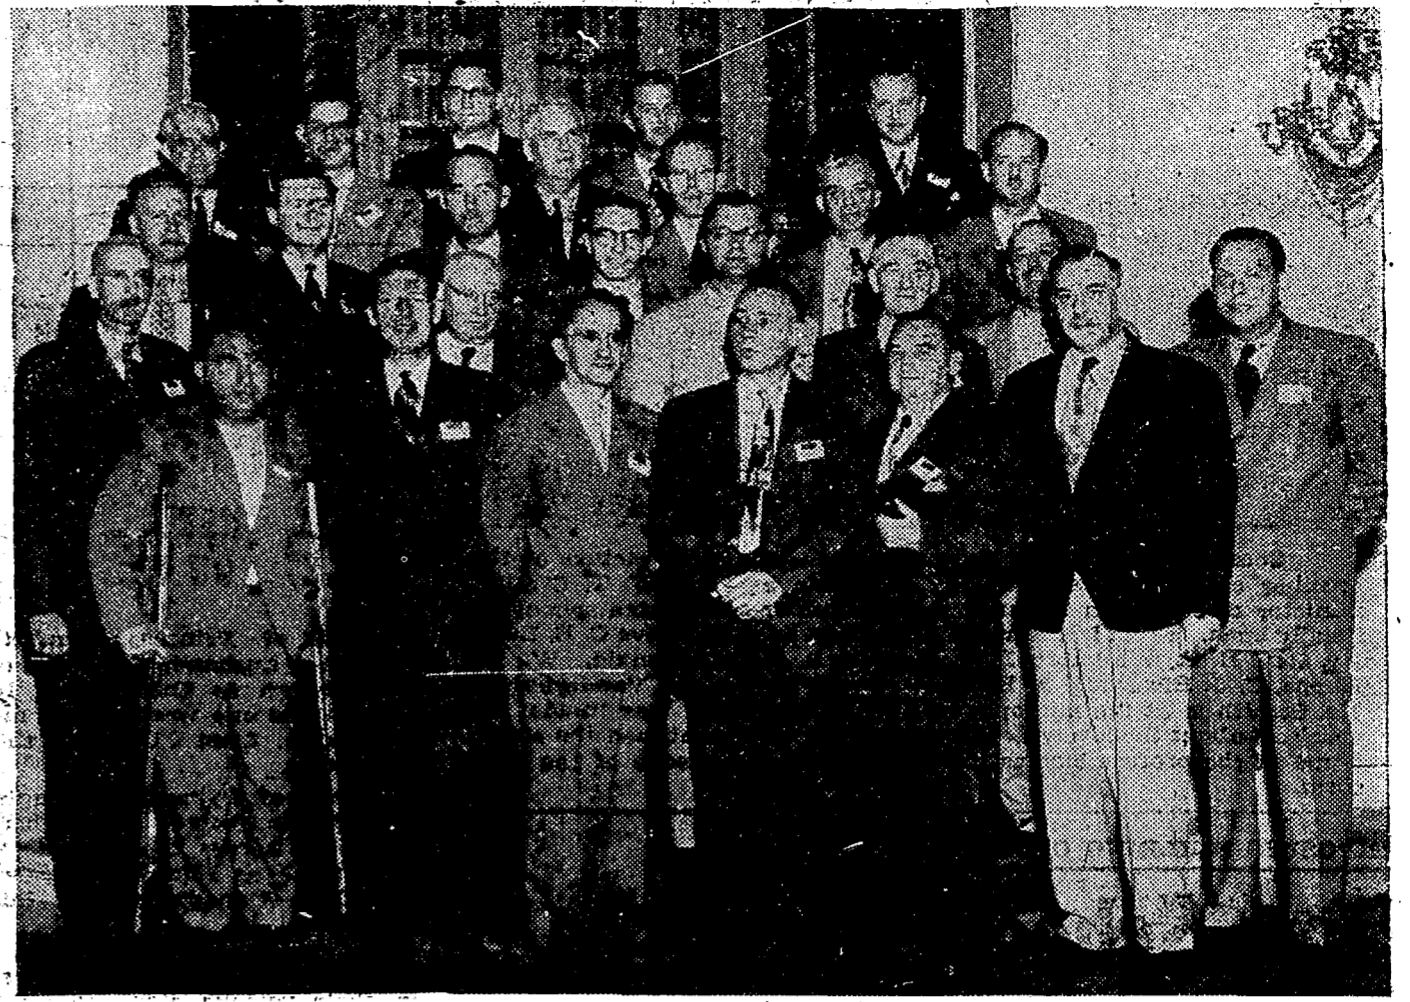

And I sometimes wonder, as I rush worriedly from job to home

chores and on to preparation for the next day's work again, wrestling with accounts and budgets in between whiles, why human beings get this silly craze for buying property.

Why must we sweat and save to get and run a car? There is much more surplus money for other things if you haven't one, and walking is much healthier. Slower, true, but what do we do with the time a car saves but work hard to pay for it? Why do we mull and toil to build or buy a home we can call our own when renting, over a long period of years, is just as cheap as taxes, upkeep and depreciation, and a lot less worrisome?

Aren't we making Esau's mistake in selling our birthright for a mess of pottage? Or car? Or for some savings scheme, either for an old age that will find us too worn-out preparing for it to enjoy it, or for children who will be more harmed than benefitted by inheriting easy money?

Possessions must always be paid Continued on Page 10

WEEKLY NEWSPAPER EXECUTIVE ELECTED: Pictured above is the new executive of the Canadian Weekly Newspapers Association, elected at the recent annual meeting in the Royal Alexandra Hotel at Winnipeg. Front row: (left to right) Lang Sands, Mission, Past President; Cecil Day, Liverpool, N.S.; 2nd Vice-President W. K. Walls, Barrie, Ont.; President A. W. Hanks, St. James, Man.; 1st Vice-President Robert Moore, Swift Current, Sask.; Hugh McCormick, Montreal; Walter Ashfield, Grenfell, Sask.; Secretary-Manager W. E. McCartney, Brampton, Ont.; (second row) F. J. Burns, Kentville, N.S.; John Pinckney, Rosetown,

Sask.; N. S. McLean, Elmwood, Man.; Warden Leavens, Bolton, Ont.; (third row) K. G. Partridge, Camrose, Alta.; J. R. McLachlan, Virden, Man.; F. P. Galbraith, Red Deer, Alta.; W. W. Draayer, Wetaskiwin, Alta.; S. R. Charters, Brampton, Ont.; G. Lancaster, Melfort, Sask.; R. M. Bean, Waterloo, Ont.; (fourth row) G. A. Dills, Acton, Ont.; L. E. Barber, Chilliwack, B.C.; W. H. Cranston, Midland, Ont.; J. A. Vopni, Davidson, Sask.; A. S. King, Estevan, Sask.; and R. S. Evans, Morden, Man. Not present for this picture was another B.C. director, Stan Orris of Grand Forks; president of the B.C. Division, CWNA, Canadian Pacific Railway Photo.

PORTRAITS

Mrs. James C. Ritchie

Those early exhilarating days! Everything and everyone new! So much to be done; no orchards, no water. So hot, so dry; bunch grass and dust! These are the first impressions of Mrs. Ritchie when she came here as a bride in April, 1905, from Manitoba. She was one of three brides on the boat, all coming to Summerland.

Off the S.S. Aberdeen, driving up the hill, the dust wound around and to the buggy wheels like light brown flour. People wouldn't like it today, but in those days no one seemed to mind, for the young country was thrilling and the future full of promise.

Who remembers when the Giant's Head was called Lion's Head? That was its name when Mrs. Ritchie came.

As for the little hump below the top of Giant's Head, Mrs. Ritchie named it The Watchman, for it seemed to be guarding their home, The Old Ranch House. Too, she renamed the house and its surroundings, Parkdale, and now the name has spread to include a much larger area.

In fact, it was originally suggested that West Summerland be called "Ritchie", but both Mrs. Ritchie and her husband preferred it to be named as it is today.

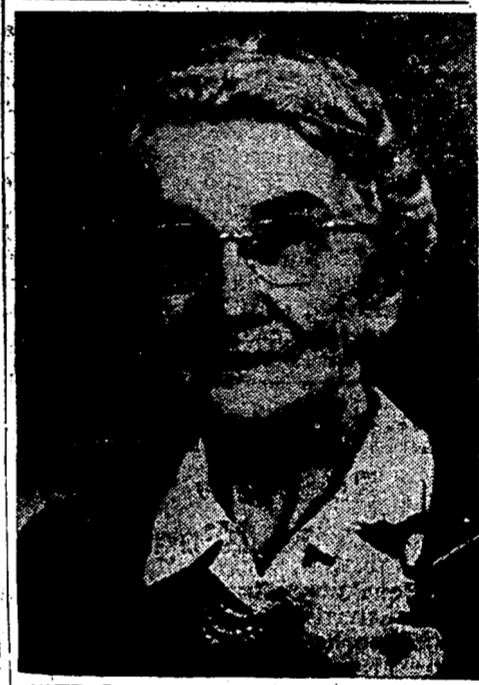

When the Ritchies came The Ranch House was a rambling building with only rough boards inside. It had a fine view overlooking Indian lands and the surrounding hills. They tore off rooms, remodelled, plastered and furnished it, and it became the centre of hospitality for everyone who came along. People were always coming and going and the incoming trunks seemed almost to pass the out-going ones on the stairway. Mrs. Ritchie was busy continually and maintained gracious traditions in her home.

With this home life as the background for all his activities, Mr. Ritchie, always progressive, and a man of vision, began the development of Kaleden, and was responsible for its inception. During this period Mr. and Mrs. Ritchie went on a trip to England where the former furthered the venture. Home

again they camped at Kaleden in tent houses for awhile.

At that time, Mr. Ritchie had an office here with Mr. Alex Steven as his bookkeeper. The site of West Summerland was called Siwash Flat, because Siwash Indians lived there. It was commonly known as The Flat. Summerland at the lakeside was called The Front.

Mr. Ritchie could see that The Flat presented a natural townsite,

and through the federal government and the department of Indian affairs he negotiated for the purchase of the land. In return for this he obtained land and water rights out Shingle Creek way, did some fencing, and gave some cattle to the Indians with whom the exchange was finally made.

He had Siwash Flat surveyed and lots were sold. It was named West Summerland, and over the years, because of his foresight, the town has evolved.

When the railroad was coming through from Nelson to Penticton and to the coast, it was to go along the southern side of Trout Creek Canyon, completely bypassing the new town of West Summerland. Mr. Ritchie heard about this and immediately set about to find some way to get the route changed so that the railway could serve this district.

He knew it was to the advantage of the construction company to

build the rail line on the other side of the canyon where more rock removal would be necessary, greater mileage and greater expense.

So, working quietly, with F. H. Latimer of Penticton surveying the grades for him and C. P. Nelson photographing every foot of the way in a series of pictures, he collected all the information possible regarding a change of route.

Mrs. Ritchie has the original blueprint on which her husband on his own initiative first traced the way he proposed whereby the canyon was bridged and the steel laid around the hills of West Summerland to Faulder, the point where it was to have come anyway.

She recalls looking from an upstairs window of their home with her little son, Bill, on a hot summer day, and seeing the glint of the metal tape as it flashed like a silver ribbon in the sun, while these pioneers worked for the welfare of this place, to give transportation to the coast, and other incalculable service.

With all this data collected, Mr. Ritchie went to Kamloops, spending the night there, secretly wiring to, and getting messages from Ottawa. Finally his suggestion held, and the Kettle Valley was routed through West Summerland.

Purposely a flagpole was set out at the Ritchie home, and a new flag bought. How exciting and gratifying when the first engine nosed carefully around the curve and the dream became a reality! The flag went up and there was general rejoicing.

When the first train went to Penticton, Mrs. Ritchie had the pleasure of being a passenger, and Mr. Ritchie drove down by car to fetch her home again.

One of her earliest activities here was playing Mr. G. J. Coulter White's little portable organ and directing a choir made up of boys she found in the district. They went each Sunday afternoon to the KVR camp-south of Giant's Head where the Baptist minister, Rev. Mr. Pattison had a preaching mission. When the camp was moved nearer town the Swedish camp cook prepared a wonderful banquet for this group, and an official of the railway expressed appreciation of the work done by them.

When the dam was being built Continued on Page 6

THIRTY YEARS AGO

September 23, 1921

A social service council has been formed with Rev. W. A. Alexander or president, Rev. W. E. Livingstone, Rev. James Dunlop and Principal D. J. Welsh vice-presidents, and C. Winfield Matheson, secretary. Part of the program is to have university extension lectures delivered in Summerland during the winter.

The provincial government has formally taken over the maintenance of that section of the road within municipal limits of Summerland extending from Trout Creek bridge to the Van Hise ranch. Notification of this was received by the road foreman, J. C. Arkell.

The present building boom is a good criterion and augurs well for the future of our home town. Among these are E. H. Plant's house south of the Baptist church; Allan C. Patterson's house on the corner north of the Mutual Fruit

Co.'s packing house; S. E. Pinos' building on his property east of the central school; and J. L. McPherson's home just beyond Jas. Ritchie Jr. The Kelley block is also proceeding rapidly, and in it will be the post office, Guy Walden's store, and The Review Publishing Co.

W. P. Seerast and his son were visitors in town this week from Fairview. Mr. Seerast expects to have 5,000 boxes of apples on his young orchard there, mostly Winesaps.

H. P. Scott of the Dominion Bank is leaving to work in another branch of the bank at the coast. "Scotty" is sorry to go, as he has enjoyed the two years he has been with us.

A number of young friends of Ronald White gave him a surprise party on the eve of his departure for the university at Vancouver. O. Vaughan of the Summerland Mercantile Co.'s staff is away to meet his wife who is returning

from a visit to the Old Country.

TWENTY-FIVE YEARS AGO

September 24, 1926

Dick Miller was lost in the hills while in search of deer, and returned home on Sunday night after having been without food since Thursday morning, is suffering from considerable exhaustion.

Coming from Penticton on Saturday night Archie Scott was making the turn by S. B. Snider's when something went wrong with the steering arrangement and he crashed into the bank. Mr. Scott received some cuts and bruises, and Mr. Bittony who was with him was badly cut about the head and his eye was seriously injured.

The experimental station recorded seven degrees of frost early on Sept. 24. This is the first time that frost has been recorded here in September. Mr. John Tait's dahlias on the lakeshore were blackened. The lake was very rough on Thursday and the CPR scow had to tie up to the old T. J. Smith wharf for a time.

On Sept. 18 a son was born at Summerland hospital to Mr. and Mrs. S. A. MacDonald.

Three Summerland young people who left to attend UBC this week are Miss B. Harris, Mr. N. O. Solly, and Mr. B. Wright.

Mr. Samuel Young is renewing acquaintances in town this week, visiting at the home of Mr. and Mrs. T. B. Young.

CAMPAIGN AGAINST DISEASE S

Pathologists Have Divided Research into Four Disease Categories Dr. McLarty States

Dr. H. R. McLarty, well-known and popular chief of the plant pathology laboratory in Summerland, gave Kiwanians at their weekly dinner meeting in the Nu-Way Annex Monday night an insight into the pathologists' "Campaign against Diseases" which disturb fruit and vegetable growers of the interior.

"If you have an enquiring mind it is fascinating work," the speaker explained, giving as a terse explanation of his task: "If a tree is sick find out what is the matter."

Although research elsewhere is of great value to the pathologists in their investigations, controls that are found to be of benefit in other districts still have to be proved profitable here before progress is made, he pointed out.

For instance, a spray which effects control at the coast may burn off the leaves in the drier interior climate.

Dr. McLarty outlined four different classifications of diseases which are the chief subjects of investigations by his office at present, these being vegetable diseases, parasitic diseases, virus diseases and physiological disorders.

Vegetable Disease Section

G. E. Woolliams is in charge of the vegetable disease section in the pathologists' laboratory here and is experimenting with new chemicals to conquer leaf spot on celery, but his main research centres on a wilt which is widespread among plants and even some trees.

This wilt is caused by a soil-borne organism recognized as a fungus and is especially widespread in tomatoes and potatoes. There are various strains of fungi, with some being more deadly to certain plants than others, he explained.

Research has developed to the stage where chemicals are being obtained so that the soil can be cleaned out to enable the crop to be put back the next year, but rotation of crops is still the best method to stop the spread of fungus disease, he explained.

Spread of Fire Blight

Fire blight is one of the worst of the parasitic diseases of tree fruits, and here Mr. D. L. McIntosh is head of the section which is employed in endeavoring to find out more about this deadly disease.

For years fire blight was controlled by cutting out the cankers in winter but two years ago the blight broke out again and growers have demanded some other remedy, Dr. McLarty observed.

It has been determined that the quickest spread of fire blight is at blossomtime, and dusting or spraying has been carried out effectively in California.

Trial dusting sprays were applied in experimental plots here this spring but it took seven sprays to give complete coverage, he noted. These experiments are continuing to determine if effective control can be obtained by using blossom sprays.

Another parasitic disease receiving considerable attention from the pathologists is the bullseye rot, and it is not known yet if the fungus is well into the fruit when it comes off the tree or whether it goes in later.

Diplomatic Research Man

Dr. Maurice Welsh is in complete charge of virus diseases and Dr. McLarty gave this young Summerland man high praise not only for his ability as a research man but as a diplomat in handling a difficult situation in the Kootenay where the entire cherry industry was being throttled by Little Cherry virus.

In Creston, and other Kootenay areas affected by the Little Cherry virus the trees continue in a healthy condition but the fruit just won't size up, he explained.

However, it has been found that of all cherry varieties the Van cherry does not seem to be affected by the Little Cherry virus. As a consequence Kootenay growers are busily engaged in grafting Van cherry to their old trees.

"The Van cherry looks as if it will rehabilitate the cherry industry in the Kootenays," Dr. McLarty considered, paying tribute to that section as the best cherry production area in the province.

In the Okanagan, other types of virus diseases are receiving the attention of T. B. Lott.

Last on his list were the physiological disorders, which were Dr. McLarty's "pet" investigations for some years. Dr. C. G. Woodbridge, who has been loaned to the pathologists from the chemical division, has charge of this branch of work and, in the main, is investigating three main disorders in the interior, namely zinc deficiency, manganese deficiency and "quick decline" on pears. No answer to the latter disorder has been found yet, he observed in conclusion.

BOY SCOUT ACTIVITIES

The troop's second turnout for the fall showed a very good attendance with 26 present and three absent. There is room for three more boys to complete strength. The troop was glad to welcome as recruits Ed Schanuel of Pentiction; Pat Anderson of Lynn Valley, and Ron Wilson of Summerland.

The program included instruction by ASM McCargar on 2nd Class first aid, map reading by SM Fisher, and tenderfoot instruction by P/L Richard Lewis.

This season it is planned to have a series of instructional films on first aid, fireman's badge, etc., and special instructions for most meetings.

A feature of the meeting was the presentation of the Pat Nisbet memorial trophy to P/L Pohlmann and the Buffalo patrol for winning the patrol competition at summer camp. This beautiful trophy was presented to the troop by Mr. A. W. Nisbet in memory of his son, Pat, a former troop leader of 1st Summerland Troop.

Notices: Next meeting, Tuesday, October 2, at 7 p.m. Full uniform. Duty patrol, Hawks.

Miss Dorothy Somerset Will Conduct Short Course in Acting

Miss Dorothy Somerset, professor of drama at the University of B.C., is expected to come to Summerland towards the end of October to conduct short courses in Singers & Players' club circles on various phases of acting.

Miss Somerset was expected to be here this month but was forced to postpone her trip because of an operation.

She is coming here under the auspices of the UBC extension department in her role as head of the drama section of that department.

RECIPE HINTS

Having a special party soon? Then serve your guests this Peach Almond Dessert — guaranteed to bring compliments galore!

Peach Almond Dessert

For an extra special treat, try Peach Almond Dessert.

One and a third cups evaporated milk, 2/3 cup water, 1 package vanilla freezing mix, 1/2 tsp. almond extract, 1/4 cup chopped, toasted almonds, sponge cake, (shells or slices), sliced peaches.

Chill evaporated milk overnight. Whip 1 cup until stiff. Add contents of package of vanilla freezing mix to remaining evaporated milk

diluted with water. Beat with rotary beater until dissolved. Fold in whipped evaporated milk. Freeze until firm. Remove to bowl. Break up with fork. Beat with rotary beater until fluffy. Add almond extract and shaved almonds. Return to freezer. Freeze until firm but not too hard. When ready to serve, fill sponge cake shells with almond frozen dessert and top with a generous spoonful of sweetened peach slices.

Tourist Bureau at Hope Served 20,000

Interior Tourist Information Bureau has closed its doors for the 1951 season at Hope. Since the doors opened on May 2, 6,510 car drivers registered.

Bureau officials estimate an average of three persons per car, while a number of tourists failed to register at all, so that it is believed certain that 20,000 persons received guidance from the bureau during the past season.

Meritorious Service Medal is Awarded

PENTICTON — M. E. D. (Pete) Adams, secretary-manager of the Pentiction Legion branch since 1947, was awarded the Legion's highest internal award when Donald S. McTavish, provincial president, presented him with the Meritorious Service Medal. Mr. Adams' work in organizing the provincial command convention last May was especially noted by speakers.

High School COMMENTS

Here I am back at school, summer work finished and some money in the bank ready for the winter's spending. This seems to sum up the situation for most of the students who have trickled back to school after the all too short summer months.

As far as I can find out, no student activities have been started, probably because many of the older students have just returned to school after leaving their summer employment.

Despite the late return to school, however, Mr. Greer is holding practices with the soccer team every Monday, Wednesday and Friday evenings.

While on the subject of sports, I have heard talk of basketball practices starting soon but I don't think the day has been decided on yet.

Mr. Fisher has told me that there will be a play produced this year equal in size to "What A Life", the play put on by the school under his direction two years ago. Although Mr. Fisher has decided on the play he will produce this year, he has asked me not to announce the name of it yet.

T. Moore on Executive S. Okanagan teachers

At the organizational meeting of the South Okanagan Teachers' Assn., T. Moore of Summerland was the only member of local teaching staff elected to office. He was named vice-president, with Mr. Kenneth McKenzie of Pentiction as president.

Miss Joan Bennett, new home economics teacher in Pentiction and daughter of Mr. and Mrs. E. H. Bennett, Summerland, was named one of the committee chairmen.

Cub Calls

Some first star tests were passed last meeting and instructions for the new Chums given. Games were played. Remember to practice your skipping, Cubs. Duty Six for Oct. 1, Orange Six.

MORE ABOUT—

SOLON LOW

Continued from Page 1 in England.

Then other countries who, like France could sell Canada fine leathers and Spain her fine wines, could be paid in sterling from this accumulated fund in England.

"Bypass the international exchanges which insist on taking a rakeoff," he insisted.

"There is no reason why the government of Canada couldn't have kept that market for your fruit in Great Britain."

Best market for Canadian produce is right on the home markets, Mr. Low declared, and went on to explain how he would bring about greater distribution.

Markets in Canada
 He harked back to the time when Canada had a surplus of 48 million dozen eggs. If properly handled, Canadians could have been persuaded to eat one more egg per week and the surplus would have disappeared, he claimed. But that distribution never came about and as a result prices were depressed and a great number of flocks were sold off, with the result that eggs are at their high level today, Mr. Low declared.

"There is a market right here in Canada," he insisted, declaring that if every family took just one more box of apples every year an extra four million boxes could be sold.

This is a question of purchasing power, Mr. Low explained, and considered that a system of subsidization could be evolved whereby the consumer could afford to purchase that extra box of apples or that extra egg per week.

Again remarking about the B.C. fruit marketing setup, Mr. Low declared: "You have one of the most dictatorial marketing setups in this province I have ever heard of." He declared it reminded him of Russia.

"Canadians are paying the highest cost of living in their history and he laid the blame to "stupid government taxes at

the manufacturers' level."

On a new car there is \$700 in taxes included in the purchase price.

"That is the reason you can't sell your fruit, there are too many other competing wants," and he listed the high cost of meat, eggs and other necessities.

"Would it be unreasonable for the government to subsidize the distribution of fruit so that the people can buy cheaper and therefore buy more?" he queried.

"Only a slight increase in consumption would get rid of all your fruit in Canada at a reasonable price," he added.

Turning then to the need of dominion-provincial relations, Mr. Low instanced how Alberta surmounted its poultry surplus problem during early war years and setup a producers' marketing board "without any Gestapo board of inspectors."

Help People Then Get Out

"We helped them (poultry producers) to get together, gave them technical assistance and advice, and then appealed to the dominion to come into the scheme and help to open up markets; and the best market is in Canada."

"That is our policy, a policy of inducement and assistance to help people to help themselves, then get out of the way and not have the scene cluttered up with government men," he insisted.

Finally, he reiterated the story of Alberta's success in reducing its \$167 million debt in 1935 to \$98 million now.

There is almost enough built up in surplus now to pay off that old debt and it will be done in the next two or three years, he prophesied.

Then Alberta will be out of debt, just as the Social Credit government promised when it took office in 1935.

Need of a fundamental policy for any government was stressed by Mr. Low, who considered that it must also be carried out as well as formulated. He also declared that the Alberta government had looked about for other revenues besides taxation in order to relieve the bur-

den on the people.

Since coming into office, the Alberta administration had abolished the social service tax, the 2 per cent sales tax and one lands tax. No new taxes or increased rates had been applied.

Also, the government took over mothers' allowance, polio and TB treatment, old age pensions payments from the municipalities and allowed the latter to borrow at 2 per cent interest rates. The government also provided loans for new schools and equipment.

Free hospitalization for maternity cases, hospitalization at \$1 per day, tax reduction to municipalities who would keep the mill rate from being increased this year were other features to the credit of the SC government Mr. Low outlined.

And most of these aids were applied before oil was discovered in 1947, he insisted, pointing out that last year total value of oil production was only \$89 million compared with \$512 million from agricultural production in Alberta.

"We are recovering for the people the heritage which belongs to them," he related, stating that the system of rentals, leases and royalties applied in Alberta provide a just return to the people but are not placed so high as to discourage development.

Not Only Oil That Helped

"It hasn't been oil that did it," he insisted in emphasizing Alberta's financial standing in relation to other provinces. "What Alberta has done could have been duplicated by any other province and could be done in B.C. if the proper policies were laid down and followed," he concluded.

At the outset, Lyle Wicks, Social Credit leader in B.C., spoke briefly declaring that support for and interest in the SC movement has mushroomed lately.

Lloyd Miller was chairman and introduced the speakers to the audience of nearly fifty persons.

Rats, when faced with a difficult problem will bite their nails.

Mrs. F. E. Atkinson Elected President as Parent-Teacher Association Formed Here

A Summerland Parent-Teachers' Association was formed on Friday evening, Sept. 21, at a meeting held in the junior-senior high school auditorium, with Mrs. F. E. Atkinson, elected president; Reeve C. E. Bentley, vice-president; Mrs. C. Reinertson, secretary, and Mr. W. H. Durick, treasurer.

Chairmen were elected to head five committees with power to choose their personnel. Mr. J. Sheeley heads the important membership section; Mrs. Jim Dundson, Jr., social and hospitality; Mrs. R. Blayne, program director; Mrs. Harvey Mitchell, parent education; Mrs. A. W. Vanderburgh, publicity and publications.

The meeting was called by Mrs. F. E. Atkinson who has been interested in the parent-teacher movement for some time, and was attended by over fifty men and wo-

History of Association

Mrs. W. Poole of Kimberley, 2nd vice-president of the BCP-PTA who had been attending the school trustees' convention at Vernon last week addressed the meeting telling some of the early history of organized parent-teachers' relationship since its beginnings in the eastern U.S. in the 1880's.

A bright, fluent speaker, Mrs. Poole held the attention of the audience as she went on to explain the tremendous growth of the organization in numbers and in scope.

Arresting was the idea that the movement is spreading throughout the world, and in the last four years has progressed in Japan so far that there is now a larger membership in that country than in the United States, where it began.

It was begun in B.C. on Dec. 18, 1915, by Mrs. Lorimer, at Craigflower school near Victoria, and in 1922 was organized on a provincial basis.

There are now 412 associations in the province with 50 in Vancouver alone.

Last year there were 33,000 members in British Columbia, she cited, and it is expected that there will be 35 to 40 thousand this year.

P-TA is nation-wide in Canada, though it is called Home and School Club in other provinces than B.C., listeners were told.

Its reason for existence is entirely constructive, said Mrs. Poole, asking teachers to tell what they are trying to do, that adults may become aware of the needs of children, aims of education, and standards and needs of those who educate children.

Not Protest Group
 The P-TA does not become involved in action or protest groups, the speaker said; it is entirely non-commercial, never using a commercial film or product to further its work; is non-sectarian and non-partisan.

Mrs. Poole developed the above points stressing that P-TA is always democratic and its only qualification for membership is to be a mature adult and have an interest in children. It is not necessary to be a parent to become a member, she said.

One side of the work in P-TA is leader-training, the organizer explained, working on the belief that there is latent talent in every democratic society which is now untapped. There are challenges all around and leaders are trained through committees and gradually flow out into larger spheres.

In Victoria an experiment is being tried whereby parent-teacher conferences are being held rather than send in home report cards.

This method of informing parents of the work of their children is being tried successfully in the U.S., it has been found, and was one of the speaker's progressive points.

Conferences and workshops for leaders are set from time to time, and at Nelson on Oct. 20 there will be a meeting with its theme, "There is no liberty without responsibility."

It is expected that one meeting a month will be held, with the president to set the date and call the first meeting, which will probably be the charter night, with those who attended the inaugural meeting also charter members.

Mrs. J. E. O'Mahony to Attend Cancer Meet

Mrs. J. E. O'Mahony will leave on Saturday for Vancouver to attend a directors' meeting of the Canadian Cancer Society, British Columbia division, at which Mr. R. Bruce Buckenfield, president B.C. division, will preside.

On Sunday afternoon the directors will be taken on a tour of the B.C. Medical Research Institute in the precincts of Vancouver General hospital, Dr. G. F. Strong, conducting the tour.

The party will then go to the home of Mrs. Frank Ross, president of the auxiliary to the cancer society on Belmont Avenue, where Mrs. O'Mahony has been invited to pour tea for the occasion.

COMMERCIAL TEACHER ARRIVES AT NEW SCHOOL

Miss Mary Reid, BA, arrived in Summerland last weekend from Vancouver and on Monday took over her duties as the new commercial teacher in the Summerland junior-senior high school.

INVITED GUESTS OMITTED

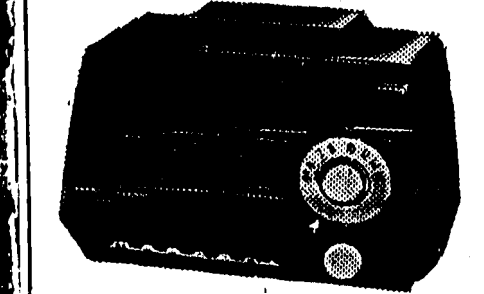

Names of Mrs. K. Taylor, Mrs. D. Wilson and Mrs. Lester Arkell were omitted last week from the guest list of those invited to attend the shower for Miss Bernice Elliott at the home of Mrs. Tom McDonald on Sept. 18.

VISITING HERE

Mrs. Oswald Pease arrived yesterday from Victoria to pay a visit to Mrs. M. E. Collas.

Mrs. Fry of Beaverdell who has been a visitor at the home of Mr. and Mrs. E. O. White returned home on Monday.

Miss Audrey Walker of Keewatin, Ont., is a visitor at the home of her aunt and cousin, Mrs. R. Armour and Miss Rae Armour.

Miss Isabel and Miss Margaret Dewar of Leduc, Alta., were recent visitors at the home of Mr. and Mrs. James Heavysides.

Mr. Stan Fabbri of Medicine Hat, Alta., is visiting his father, Mr. S. Fabbri, for a portion of the hunting season.

Mr. and Mrs. Frank Brand, Mr. and Mrs. James Brandon, and Mrs. Brandon, Sr., who have been visiting here have returned to their homes at Vancouver.

Guests at the home of Mr. and Mrs. T. J. Garnett are two school chums of the latter, Mrs. E. Purcell of Hanev, and Mrs. E. McLean of Winnipeg.

Mr. and Mrs. James Muirhead visited friends in Summerland and Penticton over last weekend on their return trip home to Kimberley from Vancouver.

2nd Lt. Hugh McLarty is visiting at the home of his parents, Dr. and Mrs. H. R. McLarty, Trout Creek, while awaiting a posting. During the summer months he has been at Camp Borden, Ont.

Mr. and Mrs. Endstone of Calgary are arriving tomorrow expecting to make their home here. They will visit Mrs. Eve Bingham, whose lakeshore home they have bought.

Miss Mary Peters spent three weeks here visiting her parents, Mr. and Mrs. Garnett Peters, returning last week to UBC where she will take a post graduate course in social service work.

Mr. and Mrs. W. W. McGill, Victoria, and Mr. and Mrs. Jack Elliott of Sooke, V.I., and Miss Iris Hird of Vancouver were visitors last week at the home of Mr. and Mrs. C. H. Eisey.

Guests of Miss Mary Scott, Peach Orchard, are Mrs. Ina Vincent of Detroit, Mich., Mrs. Elizabeth Morgan, Mrs. Harvey Morgan and two children, and Mrs. Maud Campbell all of Vancouver.

Mr. and Mrs. Paul Ohtman are visitors this week at the home of Dr. and Mrs. F. W. Andrew, on a trip from their Long Island, N.Y., home to Vancouver and south to California. Mrs. Ohtman is a sister of Dr. Andrew.

Mr. and Mrs. C. F. Hunt of Victoria were visitors at the home of Mr. and Mrs. E. L. Farnham twice in the past month, as the coast couple were proceeding to and returning from Banff.

Mr. Thomas Smith, accompanied by Mr. Wilfred Robinson, Mr. Harold Archibald, and Mr. Gilbert Chapman, all of Truro, N.S., visited his sister, Miss Rosalie Smith on Friday of last week.

Miss Elizabeth Theed who drove across the continent from New Brunswick where she has been residing for the past year is visiting at the home of Mr. and Mrs. S. E. E. Beech in Penticton. Miss Theed expects to remain in the Okanagan.

Mrs. Percy Bryant of Vancouver who was attending the school trustees' convention at Vernon last week came down to Summerland to visit at the home of Mr. and Mrs. Sandy Fenwick. Mr. Bryant and their son and daughter motored in from the coast to spend the weekend in the valley and they all drove home together.

Mr. Bob Weitzel returned to Trail on Sunday evening after visiting with his grandparents, Mr. and Mrs. N. M. Nielson of Victoria at the home of Mr. and Mrs. C. B. Snow. Bob was accompanied here by Irvine Matheson of Trail, Norman Richards, Summerland and Keith McLean, Penticton, who are also working at Trail.

Girls Choir Just Wanted To Sing Together

On Tuesday evening, at 7 o'clock the fall practice season for the Summerland girls' choir, under the leadership of Miss Kay Hamilton, got underway at MacDonald elementary school, where all rehearsals are held.

This choir is open to all girls between the ages of 13 and 19 who desire to sing and who will be willing to abide by the chief choir rule: "Regular attendance at every weekly practice and all rehearsals called during the year."

New songbooks have been obtained with the assistance of the Canadian Legion branch and the local Credit Union.

This well-known and appreciated choir came into being because a number of 'teen-age girls expressed the desire to sing together. They started group singing and so enjoyed it that the sessions continued and the personnel increased.

Finally, it was decided to enter the musical festival sing-song class and they won the Legion shield.

In the spring of 1948 the girls' choir was invited to sing at the annual board of trade banquet and with the assistance of several choir-mothers new shoulder-capes of blue and gold satin were produced for the event.

Since then the choir has twice won the Kelley cup in the all-girl choir entry at the musical festival and also won the Legion shield a second time.

Among the various functions which have been graced by the girls' appearance have been the Spring Fair, AOTS request concert, WCTU convention, Peter Pan talent show, musical recitals in aid of the Youth Centre, Credit Union convention at Penticton and the annual banquet in Summerland Grandpappy Jackson's amateur program, and this year's citizenship banquet.

At this year's Spring Fair the girls enjoyed a new experience that of singing to the accompaniment of four bandsmen.

The choir also pays an annual visit to the Summerland hospital at Christmas-time to sing a program of carols and Christmas music for the patients.

UBC Students Are Back at Alma Mater

Among those entering UBC from Summerland this year are Miss Jacqueline Trafford, daughter of Mr. and Mrs. B. Trafford; Mr. John Palmer, son of Dr. and Mrs. R. C. Palmer; Mr. Don Allison, son of Mrs. Hilda Allison, and Mr. Johnnie Huva, son of Mr. and Mrs. W. Huva.

Mr. Arthur and Mr. Jim Towgood, sons of Mr. and Mrs. J. Y. Towgood are continuing their course as is Mr. Richard Palmer, the elder son of Dr. and Mrs. Palmer; Mr. Gil Jacobs, son of Mr. and Mrs. Frank Jacobs, and Mr. Ron MacRae, son of Mrs. M. K. MacRae.

Mr. Blair MacRae, Mrs. MacRae's older son has returned to Brandon College.

NEW ARRIVALS

A baby daughter arrived at the Summerland General hospital on Friday, Sept. 21, to Mr. and Mrs. A. Leardo.

On Sept. 18, a son was born to Mr. and Mrs. Roy Kuroda at the Penticton General hospital.

Canadian Fashion Federation Reviews Past Eleven Years

AMONG THE STYLES for fall is the simple grey flannel coat above. It has red piping, showing the full-skirted silhouette.

Mrs. A. J. Dunsdon is Hostess at Shower for Miss Bernice Elliott

"Showered" for the third time in a week was Miss Bernice Elliott on Thursday evening, Sept. 20, at the home of Mrs. A. J. Dunsdon, Jones Flat.

A fluffy pink parasol from which blue and pink crepe paper streamers were suspended to decorate a chair made a pretty centre for the bride-to-be to open her gifts.

These were brought to her on a tray by little Elaine Dunsdon, dressed as a bride in a white satin frock and billowing veil. A large decorated box with a big pink bow held other presents.

In the dining room the refreshment table was gay with pink hearts and candles in silver holders, and behind the daintily decorated shower cake with its Good Wishes in iced lettering were a little bride and groom in replica.

Other invited guests included the mother of the hostess, Mrs. W. W. Hemingway, who with Mrs. T. McDonald and Mrs. George Forster assisted in serving and Mrs. A. K. Elliott, Mrs. A. R. Dunsdon, Mrs. George Dunsdon, Mrs. Phil Dunsdon, Mrs. Fred Dunsdon, Mrs. Ted Dunsdon, Mrs. Basil Stewart, Mrs. Francis Stewart, Mrs. George Washington, Mrs. C. J. Bleasdale, Mrs. Gordon Beggs, Mrs. Leslie Gould, Mrs. Edgar Gould, Mrs. Norman Holmes, Mrs. E. McClements, Mrs. Myrtle Scott, Mrs. Leslie Rumball, Mrs. Bullock, Mrs. I. G. Thorsteinson, Mrs. Harry Bradick, Mrs. W. Sherwood, Mrs. R. A. Johnston and Mrs. A. W. Vanderburgh.

Reconvening for the fall on Thursday afternoon, Sept. 20, St. Andrew's Women's Federation heard an informative panel discussion on the WA group from its beginning eleven years ago.

Mrs. H. R. Whitmore, Mrs. Wallace Boothe, Mrs. T. J. Garnett and Mrs. H. B. Mair made up the discussion group.

It was stated that the aims of the dominion council are to help all women spiritually in placing God first in their lives, their neighbor second, and themselves last.

The conference WA was organized in B.C. in May of this year, it was pointed out, and the presbytery WA is the connecting link between the local WA and the conference WA.

The Kamloops-Okanagan presbytery consists of 28 churches, the panel announced, and each year names a project towards which these churches may aim. This year the Naramata Leadership Training School is the project of the Summerland church.

Mrs. T. A. Walden interestingly told how the Summerland Federation was formed in 1944 by combining the ladies' aid and the missionary society. In 1950 the federation joined the Kamloops-Okanagan WA presbytery thus combining WMS and WA as one federation.

Mrs. S. A. MacDonald, the president, thanked the group for their contribution to the meeting, and Mrs. Wallace Boothe was unanimously elected a delegate to the WA presbytery meeting to be held in Kelowna in October.

The WMS Blue Book, Through Missionary Windows was introduced by the president.

The October meeting is to be a practical thank-offering with clothing to be collected, sorted, and packed for shipment to Korea and other needy countries. Shipping charges are 10c a pound, and those not having clothing to donate may contribute to transportation.

Mrs. MacDonald greeted visitors and bade au revoir to Mrs. Angove, who is leaving to spend some time in Vancouver, with Mrs. Angove responding in her pleasantry. Others taking part in the program were Mrs. Whitmore who opened the devotional period with a hymn in which all joined; Mrs. Edgar Gould, who read the story of the talents; Mrs. W. R. Powell, led in prayer; and Mrs. Millay whose solo I Know My Saviour Cares was enjoyed.

Since it was the annual Birthday tea, Mrs. J. Shepherd presented a cake in memory of the late Mrs. A. B. Elliott. Four tables were decorated prettily, one for spring with a bowl of pansies, a summer one with roses, fall with fruit, and winter with holly and red berries. Members and visitors grouped about the table representing the season in which their birthday fell, and tea was served by Mrs. W. F. Ward, Mrs. Bancroft, Mrs. MacDonald and Miss Cochrane.

HOME AGAIN

Mr. and Mrs. F. E. G. Plunkett returned last Saturday from a ten-day holiday at Calgary, where they visited Mr. Fred Morgan.

Grace Whitaker First Graduate Of High School

Mrs. H. C. Whitaker, youngest daughter of Mr. and Mrs. J. L. Logie, a pioneer family in Summerland, who came here from Manitoba in the early days, was the first matriculant of Summerland High School.

She was a pupil of Mr. J. C. Robson, the first person to teach high school subjects here, and the man who was instrumental in having the first high school built.

At that time it was required to try government examinations at the end of grade 9, as the policy seems to have been not only to pass exams to enter high school, but to have to pass them to stay there.

Peachland was the examination centre then and Mrs. Whitaker, then Grace Logie, and Ethel McIntyre, a niece of the Rev. Mr. McIntyre, were the only two from Summerland to try, with Miss Logie topping the list of all who tried the exams at that time.

When she tried her matriculation she wrote the papers at Okanagan College, which had become an examination centre.

Mrs. Whitaker attended the provincial normal school and was a highly successful teacher in Penticton and in Trout Creek when there was a small school to serve the pupils there before consolidation.

Her husband is H. C. Whitaker, government road location engineer. For a number of years following their marriage they lived in various places where roads were being built, but now their home is the Logie house on Jones' Flat.

Miss Rosalie Smith left on Sunday to spend a vacation with relatives in Eureka, Cal., and in San Francisco.

VISITING ABROAD

Mrs. R. C. Palmer is among those who are visiting at the coast.

Mr. Eddie Hannah is at Shaughnessy Military hospital in Vancouver this week.

Capt. and Mrs. J. E. Jenkinson left on Wednesday morning to spend a few days at the coast.

On Friday Mr. and Mrs. F. E. Atkinson and Mr. and Mrs. H. R. J. Richards are motoring to Rossland where Mrs. Atkinson will attend the Rebekah district association meeting. They plan to return on Sunday.

Mr. and Mrs. E. R. Butler and Miss Dorothy Butler have returned from a trip to Salt Lake City and with Mrs. J. C. Robson have motored to Victoria. Miss Butler will return to her work there, Mrs. Robson will visit in the Island city for a month, and Mr. and Mrs. Butler have returned to their home here.

Mr. Carrol (Chuck) Brawner is leaving on Saturday for Winnipeg to enter his third year in engineering at the University of Manitoba, after spending the summer at the home of his parents, Mr. and Mrs. V. Brawner. Just before leaving for Manitoba he enjoyed a short holiday in Vancouver.

Mr. and Mrs. J. Slater, who left here recently after residence for 26 years, are spending a month at the home of Mrs. Slater's father, Mr. J. Feather, in Edmonton. In the early days of this valley Mr. Feather was a mate on the SS Aberdeen.

Mrs. Jack Mitchell is Honored at Shower

On Thursday evening, Sept. 13, Miss Ione Embree entertained at a shower for Mrs. Jack Mitchell, the former Miss Edith Stevenson.

The basement assembly room of the Trout Creek Church of God was prettily decorated for the occasion, with the guest of honor asked to sit in a decorated chair beside a table piled high with lovely gifts.

About thirty-six friends were present at the happy affair, enjoying an evening of games, ending with delicious refreshments served.

Auditorium - Gym May Proceed, Vernon

VERNON—The convention of B.C. School Trustees' Assn. here last week resulted in a happy climax to years of planning and negotiations on the part of the trustees of Vernon school district. Presence of department of education officials made a combined meeting between themselves and local trustees possible, with the result that the green light was flashed and the contract for the new auditorium-gymnasium at the senior high was signed.

J. Gabriel, who has been awarded the contract, declared he had pared his figures to the bone to keep the money in town.

for; and is there such a thing as 'easy' payments? Paying for these things we strive after means that we have to hang on to our jobs like grim death, or worry about getting another one right away if anything happens. The more you own, the less you dare tell your employer—or your customers—to go some other place while you take a week off for fishing-pox. So we sacrifice our leisure, our independence, our freedom of movement, for houses, land, cars, refrigerators and other material properties too numerous to mention. We say we own them; I wonder do they own us?

"That is shiftless talk," you say. I know it; in fact, all this is strictly private, just between ourselves. I wouldn't say these things in public. It is clearly the duty of every Christian Canadian to buy and own as many things as he possibly can, both for cash and on credit.

But have you recently read the sixth chapter of the Gospel according to St. Matthew—particularly from the 19th verse on?

MORE ABOUT

PORTRAITS

Continued From Page 2
in Garnet Valley there was no road, and memorable is the trip Mrs. Ritchie made up there in a demeritate with her husband. For part of the way there wasn't even a trail, so Mr. Ritchie had a furrow ploughed out on the mountain side. This furrow held the top wheels of the vehicle, and so they progressed up to see the new construction.

She is well acquainted with the passenger boats that have played a part in Okanagan living. She came on the SS Aberdeen in April 1907 she climbed Giant's Head to see the SS Okanagan going down the lake on her maiden voyage; this year she saw the SS Sicamous travelling on her last voyage to a berth at Penticton.

Her maiden name was Margaret Findlay, and she was born in Ontario. When the family moved to Manitou, one of her school teachers was Nellie Mooney, afterwards Nellie McLung, the well-known Canadian writer, who died recently on Vancouver Island, and whom Mrs. Ritchie visited at her home, Lantern Lane, out of Victoria, some years ago.

The old Ranch House, home for thirty-five years, where all her children were born, she sold in 1940, building a small place for herself beside the home of one of her daughters. Both of these are in the original orchards and near familiar landmarks.

Always a church worker, and fond of music, she is a charter member of the Summerland Baptist church, choir and Sunday school.

She considers it a privilege to have been associated with the sturdy pathfinders of this part of the Okanagan.

Competent and sprightly, she is busy as she has been all her life.

Palethorpe Seeks Directorate Post

J. L. Palethorpe, well-known Penticton businessman is allowing his name to stand for election to the directorate of the Canadian Chamber of Commerce for a second term. Summerland Board of Trade voted on the slate of four nominees placed before the executive last week.

Others seeking the two vacancies on the directorate from B.C. are Dr. C. W. Wright, Trail, president of the B.C. Council of Associated Boards of Trade; Ken Stewart of Fernie, and F. Hawes of Victoria.

C. E. MOUTCHEON — LOCAL REPRESENTATIVE

West Kootenay Manager Asked to Discuss Power Problem with Board

Summerland Board of Trade members, meeting in the IOOF hall for their first session of the fall season on Thursday, Sept. 13, considered they wanted more information on the subject before taking any action, on the request from the City of Pentiction enlisting support for a demand that the West Kootenay provide a "fully adequate uninterrupted power service to the areas depending upon them for electrical support."

As a consequence, the West Kootenay's new manager in Pentiction, Mr. Norman Trough, is being asked to come here next month to acquaint the local board with details of the electrical power hookup in the Okanagan.

The Pentiction request arose out of recent power outages which were claimed by Pentiction council to have been the result of sabotage but which the West Kootenay states was caused by heavy rains following the long dry spell.

During the outage, electrical power was supplied by the B.C. Power Commission from its Whatshan plant near Needles, but this did not prove adequate to meet the demand.

On Friendly Terms

Councillor F. E. Atkinson, when asked by the chairman to voice an opinion, declared that Pentiction has not been on good terms with the power supply company and has not used good psychological approaches to the company.

On the other hand, Summerland municipal council has always been on good terms with West Kootenay officials and he would not like to see any action taken which would jeopardize this position.

"The West Kootenay is just as cognizant of the situation as we are", declared Mr. Atkinson, pointing out that a great deal of expense would be entailed in providing alternate connections between the B.C. Power Commission and the West Kootenay, or to tap Washington power supply lines south of the border from the Okanagan.

Rebuilding of lines from Vernon to Pentiction would be necessary to make certain that an adequate auxiliary supply of power is available at all times, he thought.

Reeve C. E. Bentley mentioned as an alternative the building of huge steam or diesel auxiliary plant, which would be another expensive method of providing an alternative if breaks in power supply occur.

Asked if the Summerland Box Company has had trouble with outages, George Perry, manager, replied that only once since the first of June was there an outage which lasted fifteen minutes, apart from the long shutdown which caused Pentiction's request.

This brought Don Tait, an employee of the Summerland Co-operative Growers' Assn., to his feet to state that there have been many shutdowns at his plant due to power stoppages this summer. He considered that the situation is serious to the economy of the district and any major shutdown with the cold storage plants filled with fruit would be a major catastrophe.

Ivor Solly reported that one cannery operator had explained to him the difficulties and losses which occur when there is a power shutdown but the operator had not intimated that there had been undue number of delays this season.

In order to obtain more information on the possible cost of an auxiliary system which would prevent long shutdowns of power service when outages occur the trade board decided to ask Mr. Trough to appear at the October meeting and address the members.

The City of Pentiction letter to the West Kootenay company, as read at last week's meeting, follows:

During the recent power outages experienced in Pentiction as a result of what has been reported as being sabotage of the power lines in the vicinity of Grand Forks or Greenwood, a great deal of inconvenience and actual financial loss was suffered by residents and industries in our City and upon inquiry the City Council learned that power was being supplied through the alternate source, the B.C. Power Commission Project at Whatshan Lake.

In this City it was very evident that the alternate source of supply utilized by your Company to provide electrical service to this City was inadequate to meet all requirements and in order to supply some power to even a portion of our industries it was necessary to eliminate the use of circuits to a large portion of the City with the result that some parts of the City were without service of any kind for many hours. In that section of the City where some service was still being maintained the voltage proved to be very low and totally inadequate.

The City Council wishes to draw this condition to your attention and suggests in the strongest possible terms that your Company take such steps as are necessary to render an adequate uninterrupted power service through our city, it having been proven during the recent outages that the present alternate source of supply does not fill the need of our City. It is the hope of the City Council that you will give this matter your preferred attention and provide a solution to the present problem of maintaining an uninterrupted power service.

NATIONAL FLAG DESIGN — A. L. Caron of Montreal submitted this flag design to the National Flag Committee believing it to be truly Canadian in conception and execution. The cross is white on a blue background; the 10 stars, blue on a white background; the maple leaf, white on a red background.

Public Works Posts Signs on Highway

L. E. Willis, Kelowna, assistant district engineer for the provincial public works department, has informed Summerland Board of Trade that "Summerland" markers will be included on the signposts at the top of Peach Orchard and at the Trout Creek Service Station corner as an added convenience to travellers who do not understand the division of the two sections of this community.

This additional signpost marking was suggested to the local trade board by operators of tourist camps in the district.

Since the trade board sugges-

tion went to Kelowna the department's sign-posting crew has been through the district and has placed a small sign at Windy Point indicating: "Entering Summerland" on one side, and "West Summerland One Mile" on the other. Another "Entering Summerland" sign has been spotted near the Trout Creek bridge.

PRINCETON COAL MINING PROSPECTS REPORTED GOOD

PRINCETON—With four seams and probably a fifth of mineable coal extending across the four-mile wide Princeton coal basin, Geologist Dr. W. S. Shaw believes the opportunities to develop profitable mines are good.

Good Quality Flowers Can Result from Forcing Bulbs Under Electric Light

Results from forcing bulbs under Mazda incandescent and fluorescent lights at the Dominion Experimental Station, Saanichton, indicate that quite good quality flowers can be obtained, reports J. H. Crossley, of that station.

Several tests have shown that, in general, daffodils and iris respond to forcing under lights somewhat more satisfactorily than tulips, judging by greenhouse standards and florist requirements. At the same time, tests indicate that variety of tulip has considerable bearing on the degree of success obtained and for this reason further tests are being undertaken.

Under illumination, color and size of blooms were equal to those greenhouse grown, but stems and leaves were noticeably weaker. This undesirable feature was more noticeable with tulips than daffodils and iris as the last two kinds have more than sufficient reserve stem strength for average decorative purposes.

Results also showed that illumination for eight or 12 hours daily is sufficient. In one test, for example, with several thousand narcissus, using four varieties under 100-watt Mazda incandescent lamps for eight and 12 hours daily, flowering results for all practical purposes were the same as from 100 to 150 watt lamps 24 hours daily.

Tests also showed that neck-reflector type Mazda incandescent lamps were as satisfactory for forcing bulbs as ordinary clear Mazda

incandescent lamps set in standard enameled reflectors. Neck reflector-type Mazda lamps last as long and are cheaper to instal as no reflector equipment is needed. They cost more to replace than ordinary clear Mazda lamps, however.

In most experiments, the Mazda lamps were mounted at about 36-inch centres and kept at about 24 inches above the tips of the plants. This spacing laterally and vertically seems about optimum.

Daylight fluorescent tubes showed no particular advantage so far as growth or flowering was concerned when operated at the same foot-candles as ordinary 150-watt Mazda incandescent lamps. Increasing the fluorescent foot-candles might prove advantageous to growth, but present preference, according to Mr. Crossley, who is in charge of the experiments, is for Mazda, due primarily to the much lower initial cost.

CHIMNEY FIRE CALL ANSWERED

Summerland Volunteer Fire Brigade answered a call to the home of Mr. and Mrs. John Caldwell on Wednesday afternoon, September 19, when the chimney caught on fire.

VERNON CITY CLERK DIES

VERNON—John W. Wright, Vernon's city clerk for the past 15 years, died suddenly when stricken with a heart attack while vacationing in California.

O'Mahony Will Attend BCHA Convention

Secretary J. E. O'Mahony will represent the Summerland General Hospital at the annual convention of the B.C. Hospitals Assn. in Vancouver on October 16, 17, 18 and 19, directors of the local society determined on Tuesday, Sept. 18, when they met for the first time since the summer recess.

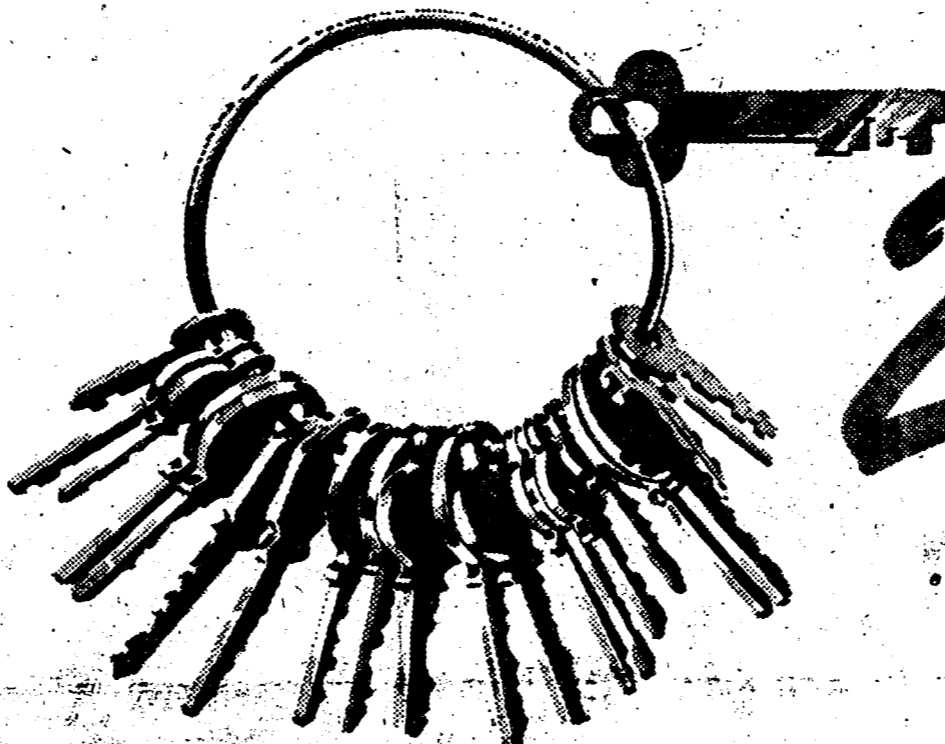

Mr. O'Mahony is first vice-president of the BCHA and will be taking a prominent part in the sessions' discussions.

Dr. J. C. Wilcox, who has been Okanagan region representative on the BCHA, stated he would not be able to attend and that another delegate would probably be chosen at the next regional meeting in Princeton on Saturday, October 6.

A delegate from the ladies' auxiliary to the hospital will be chosen to attend, while directors agreed that the new matron, Miss Verda Snow would be allowed to attend, if staff replacement could be arranged.

Directors were acquainted with the new salary request being made by the registered nurses association of the province. Starting salary for nurses being sought is \$200, with head nurse \$210, and an extra \$10 per month for nurses who have taken special preparation.

Temporary employment should be paid on a basis of \$10 per day, this association believes, also requesting that nurses who have not become registered with the B.C. association be paid \$10 per month less.

Turnbull Silent On Deficits Being Faced by Hospitals

VERNON—No commitment on behalf of the government was made last week by Hon. A. D. Turnbull, minister of health and welfare, on how to resolve the serious deficit position in which the Vernon Jubilee hospital finds itself.

The board cannot match its expenses with the budget allowance of \$8.98 per patient day, on which the BCHIS states it must operate. Approximately \$1 more would be required, Chairman K. W. Kinnard states.

Fluctuation of patient days affects the situation. The minister would only say that any increase in hospital operating costs must be

FOURTH IN DISTRICT

For the month of August, Summerland Rotary was fourth in the district attendance standing, while in September one meeting had one hundred percent attendance last Friday's session in the Nu-Way Annex was informed.

taken care of from some other source.

Earlier this month, a despatch from Victoria indicated that as a result of the findings of the commission enquiring into the BCHIS setup that cuts in hospital 1951 budgets made by the BCHIS would probably be restored before the year end so that hospitals could meet rising costs of operation due to inflationary trends. This statement has not been confirmed.

Mainline Centres Busy Preparing for Royal Visit

KAMLOOPS — Official program for the hour-long visit to Kamloops on Friday, October 12, by Princess Elizabeth and the Duke of Edinburgh has been officially approved by Under-Secretary of State C. Stein and announced by Mayor A. M. Affleck.

Riverside Park will be the centre of the Royal visit from 5:15 to 5:50 p.m. after having motored from the CPR station via Fourth avenue, Victoria street and the First avenue park entrance.

Streets will be lined at five-yard intervals by RCMP, members of the armed services and Canadian Legion members.

At the park, Mayor Affleck will present to Their Royal Highnesses a dozen local dignitaries and their wives, including Kamloops Indian Chief George Leonard and Mrs. Leonard.

Their Royal Highnesses will review a coterie of South African war veterans, also Girl Guides, Brownies, Boy Scouts, Cubs and school children. Princess Elizabeth will also receive a bouquet from a small girl, yet to be chosen. To Be Presented

Those who will be presented at the CPR station on arrival of the Royal train will be Mayor A. M. Affleck and Mrs. Affleck, E. Davie Fulton, MP and Mrs. Fulton, and Syd J. Smith, MLA and Mrs. Smith.

At the park, those presented will be His Honor Judge J. Ross Archibald and Mrs. Archibald, Indian Chief George Leonard and Mrs. Leonard, Ald. J. E. Fitzwater and Mrs. Fitzwater, Ald. Wilf Jordan and Mrs. Jordan, Ald. J. Allan Milton and Mrs. Milton, Ald. Helen J. Millward and Mr. Millward, Ald. J. H. Giddens and Mrs. Giddens,

Ald. W. Ray Turner and Mrs. Turner, City Clerk Howard M. Levey and Mrs. Levey.

First six automobiles in the parade will be those used by the Royal Party in every motor trip during their tour of Canada.

City of Kamloops provides the next four cars holding those to be presented.

City council is making arrangements to decorate the streets to be used by Their Royal Highnesses and party on the way to Riverside park. Special arrangements are also in process for the decorating and flooding of the park.

All storekeepers and businessmen along the procession's route are being asked to initiate their own plans for special decorations, so that the route will be a mass of patriotic color.

Ten-Minute Stop

SALMON ARM — City council is making arrangements for a welcome to Their Majesties now that it has been definitely assured that a ten-minute stop will be made by the royal train on Friday, October 12.

Mayors of Enderby, Armstrong and Vernon will probably be invited to join the Salmon Arm group to be presented to Princess Elizabeth and the Duke of Edinburgh.

Revelstoke Included

REVELSTOKE — Arrangements for the Royal Visit have not reached concrete form yet, but it has been agreed that school children, Guides, Brownies, Scouts and Cubs will be formed up at the CPR station when the Royal train arrives.

The train will arrive at Revelstoke at 11:50 a.m. on Friday, October 12 and will leave at 12:10, twenty minutes later. There will be a slowdown at Sicamous for an observation platform appearance at 1:45 p.m.

Time of arrival at Salmon Arm is 2:25 p.m. with departure at 2:35 p.m. After the hour-long stop between 5 and 6 p.m. at Kamloops, the train will proceed on to Vancouver, arriving at the CPR station at 10 o'clock Saturday morning, October 13.

Britons Arrive for Talks

British Foreign Secretary HERBERT MORRISON, (right), walks with SIR OLIVER FRANKS, British Ambassador to the United States, as he arrives in Washington to confer with Secretary of State Acheson. The meeting was preliminary to a conference of the western Big Three foreign ministers—Acheson, Morrison, and Robert Schuman of France—which now is under way in Washington.

Dogwood Motif Carried Out in Gifts From People of B.C. to Royal Couple

Suitable gifts, indicative of the high esteem of the people of British Columbia, as well as a token of their warmth of welcome to Their Royal Highnesses Princess Elizabeth and the Duke of Edinburgh, have been arranged for by the government on behalf of the people of the province, and the action of the government in connection therewith has been concurred in by the federal authorities who are in charge of the overall arrangements for the Royal visit, it has been announced by Premier Byron I. Johnson.

To Her Royal Highness, there will be given on behalf of the people by the premier at a luncheon to be held at the Empress hotel, a necklace, and earrings to match, mounted in platinum and gold and set with diamonds and emeralds. The Dogwood, British Columbia's official emblem, is the motif of the design.

To the Duke of Edinburgh, there will be presented cuff links and studs of Dogwood design.

For Prince Charles, there will be a specially-made Indian Sweater and for Princess Anne, soft Indian moccasins of elk skin beaded and fur lined, all in white.

In connection with the necklace, earrings, cuff links and studs, insofar as possible all precious metals will be from British Columbia. Craftsmen of Henry Birks and Sons (B.C.) Limited of Vancouver,

are preparing the jewellery.

The centerpiece of the necklace is a Dogwood blossom, made of platinum with the center of yellow gold studded with small round emeralds, giving the natural effect of the flower. Leaves which are made of carved emeralds support the blossom below and on each side of the center.

Running up each side of the necklace is a spray of diamonds and emeralds broken by 2 small bars, one set with 3 diamonds and the other with 3 square-cut emeralds and from this hangs a cluster spray of carved emerald leaves and a lacey effect of the whole necklace is obtained by graceful curves of platinum set with diamonds.

The portion which drapes around the neck is made of flexible white gold being snake-like in appearance.

The earrings carry out the same motif—a dogwood flower fits against the lobe of the ear, supported by 2 lovely square-cut emeralds and small platinum and diamond curves with carved emerald leaf hanging from the center curve. The earrings might be described as miniature Dogwood corsages, and very dainty in appearance.

The cuff links are plain platinum with a Dogwood blossom carved in relief and in the center a small diamond is set. The shirt studs are small dogwood flowers with small diamonds set in the center.

Car Owners! DODGE HAS THE ANSWERS to questions you frequently ask

- Q** In face of the high cost of body repair, why don't all cars have detachable fenders?
A It would seem that some manufacturers have sacrificed the practical for styling. All Dodge fenders are bolted on and are easily removed to facilitate replacement or repair.
- Q** How can I stop my gas lines from clogging with dirt and water?
A With most cars there's no sure way. You might try draining and cleaning out your tank from time to time. In cold weather always keep your tank well filled as this reduces the amount of condensation. With a 1951 Dodge, of course, you cannot experience this annoying trouble. The new Dodge is equipped with an Oilite fuel filter located in the gas tank which keeps the entire fuel system free from dirt and water. It's self-cleaning, too, from the swishing action of the gas in the tank.
- Q** Why is rear seat riding in some cars so tiring?
A That's because a low, sloped-back rear seat places you in an uncomfortable position without support under and behind the knees. Dodge chair-high seats, both front and rear, give you proper knee and back support—let you ride long distances in comfort.
- Q** Is there any real difference in the various types of air cleaners?
A Yes, there are vast differences. For example, all Dodge cars use a heavy-duty oil-bath air cleaner. In "dust storm" tests, this type cleaner proved much more efficient than ordinary mesh-type filters even at the start. And, after 2,000 miles of driving it proved to be still 90% efficient, or nearly double that of other types of cleaners.
- Q** Should I use a standard or premium gasoline in my car?
A That depends on the make of your present car. All new Dodge engines are designed to operate with maximum performance and top efficiency with ordinary gasoline.
- Q** How can I judge the amount of choking my car requires to start under varying weather conditions?
A Unfortunately, you cannot. But new Dodge cars are equipped with an Automatic Electric Choke which makes starting easier—particularly in cold weather, and avoids wasteful over-choking.
- Q** If my foot brake should fail, will my parking brake still operate?
A Yes, if you own a Dodge. The Dodge parking brake is completely independent of the foot brake, operating on a drum of its own fastened to the propeller shaft. When the propeller shaft is locked, the wheels cannot turn. In many cars the parking brake operates on the two rear drums of the foot brake.
- Q** Why do my windshield wipers slow down and sometimes stop working when I accelerate my engine—often when I need them most?
A That's a little technical but here's the answer in simplest terms. Your wiper is a vacuum type, operated from the vacuum in the intake manifold. This vacuum is highest when the engine is idling—lowest when the engine is under full load, such as when you call for fast acceleration, so your vacuum wipers slow down. With the new Dodge cars you do not experience this trouble as they are equipped with constant-speed electric windshield wipers.
- Q** How can I best protect my engine from the dirt and abrasives which collect in the oil?
A You should install an efficient oil filter, if your car is not so equipped. Not only are all Dodge Coronet and Regent models equipped with a highly efficient Micronic Oil Filter as standard equipment, but all Dodge models give you added protection with a Floating Oil Intake. This type of intake draws only the clean oil from just below the surface, preventing both surface foam and bottom sludge from entering the oil lines.

A Special KIND OF SOFTNESS

John McIntosh Named Famous Apple for Himself and its Color

If the County of Dundas (Ontario) never produced anything else to bring it fame, it did give to Northern America the McIntosh-Red apple, which has probably given greater delight to more people than any other natural product of the last two centuries. Its wonderful flavor is very pleasing to the taste, and it is probably the most popular apple in America north of the 40th degree of latitude.

John McIntosh, born in 1777, on the Mohawk River, N.Y., son of Alexander, a native of Inverness, Scotland, came to Upper Canada in 1796, spending a few years along the St. Lawrence, where he married Miss Hannah Doran in 1801. He lived on a farm adjoining Matilda Village until 1811, when he traded that farm with Edmund Doran for the west half of lot No. 9 in the fifth concession of the Township of Matilda, which settlement for a time came to be known as "McIntosh's Corners", and is now Dundela.

In the last named year, he built a house on that lot on the site of which had been a house or shanty, for there were stones which appeared to have been a fireplace. There had been about one-fourth of an acre cleared, and in cutting the second growth, which was about 10 or 12 feet high, he came across several apple trees, which he planted in the place he had selected for a garden. These small trees may have come from the seeds of two or three apples, possibly famous, for the fruit of each tree would be different from that of the others, it being common knowledge now that the seed of a McIntosh of any other apple tree does not produce another of the same variety. Some orchards in the locality were planted with seeds from the McIntosh but, of course, they turned out to be only seedlings of no value. These original seedlings thrived for a time but by 1830, there was only one left of those transplanted and fortunately this was the McIntosh. Locally, it was first called the "Granny Apple", because Hannah was the "push" and looked after the tree. This seems to have been a common practice, because in the Harkness family we had "Aunt's Apple" and "Uncle Bob's Apple", both seedlings. Later, at the suggestion of his neighbors, who told him that so delicious an apple should have a distinctive name, Mr. McIntosh called it the "McIntosh Red", thus combining his name and the color of the apple.

John McIntosh did not realize the value of his find, but he had a son, Allan, who was more ambitious, farseeing, and desirous of giving his neighbors the benefit of the fruit. Allan grafted and budded scions of this tree on other varieties of apple trees and established a nursery. There must now be many millions of "McIntosh Red" apple trees in North America, every one of which is literally the child of this original tree. It was situated about fifteen feet from the house and when the latter was burned in 1894, one side of the tree was badly injured. The other side, however, continued to bear until 1906, when the leaves began to wilt and the small apples to fall off until it was bare.

For almost ninety years, a long life for any apple tree, this grand old freak of nature had played its part and played it well.

The Matilda lovers of the apple thought its site worthy of a memorial. Subscriptions were solicited and a monument was erected bearing this inscription:

"The original McIntosh Red Apple Tree stood about 20 rods north of this spot. It was one of a number of seedlings taken from the border of the clearing and transplanted by John McIntosh in the year 1796."
"Erected by popular subscription 1912."

There is clearly a mistake in the date 1796.

While the McIntosh was a favorite apple in its own locality eighty years or more ago, it was not until 1876 that it began to be known to any extent outside that district, and it was not until the turn of the century that it became famous throughout Ontario. The late Dr. A. T. Macoun has told us that more than once at the Imperial Fruit Show in England, it has been rated as the best dessert apple in the British Empire. By means of pollination with the McIntosh as the male parent, many new varieties have been produced, namely Courtland, Joyce, Malba and others, some of them almost if not quite, equal to the McIntosh.

At meetings of the Ontario Fruit Growers' Association, there were heated discussions as to its merits, but Senator Smith, President of E. D. Smith & Sons, of Winona, Ont., believed in it, propagated the variety very extensively, and it is said was chiefly responsible for establishing its popularity in Ontario. About 1910, it was introduced into British Columbia, and there were extensive plantings in the Okana-

gan and Kootenay Valleys.

In the United States, it was first mentioned in the appendix to Downing's "Fruits and Fruit Trees of America" published in 1876. In 1883, it was put in the catalogue of fruits of the American Pomological Society. In Beach's "Apples of New York" published in 1903, there is this comment:

"The McIntosh is rated by many as one of the most promising varieties of its class for general cultivation in New York." There are extensive plantings in the New England States, Northern New Jersey, New York, Pennsylvania, Ohio, Michigan, Northern Illinois and Wisconsin but it does not do so well in the (U.S.) Pacific Northwest. In New York State in 1928, the McIntosh constituted 31.5 per cent of all varieties, in 1933, 34.2 per cent and in 1936, 36.1 per cent. The census for that year shows a total of 1,529,000 McIntosh trees of all ages.

In Canada, the "Annual Statistics Circular on Fruit Trees Sales" shows the sale of McIntosh trees in 1941 to be 100,874, the total number of apple trees sold here in that year being 301,519, exclusive of crab apple trees, so that slightly over 30 per cent of all apple trees sold were McIntosh Reds.

The proportion of McIntosh to all varieties by province is—Nova Scotia 3.5; New Brunswick 50; Quebec 60; Eastern Ontario 36.1; Western Ontario 18.3; British Columbia 23.6.

During the severe winters of 1917-18 and 1933-34, the McIntosh trees came through better than Baldwin and Rhode Island Greenings, which no doubt has accentuated their sales. John and Allan McIntosh planted better than they knew or dreamed.

In February, 1842, a survey was made in Dundas and the west half of Stormont to obtain information about apple trees in those districts. It was found that there were 843 acres in orchard, the total number of trees being 22,854 of which 12,377 were bearing, and 11,474 were McIntosh, practically fifty per cent. Most of these trees would be in the front concessions of Matilda, Williamsburg and Osnabrock.

(Editor's note: This story was copied from "A History of Stormont, Dundas and Glenora—1784-1945" by John Graham Harkness, K.C., of Cornwall, Ontario.)

Five-Pin Schedule Ruddy Next Week

Schedule for the new two-division five-pin bowling league will be drawn up next Monday evening and will be ready for publication in next week's issue of The Review. Herb Woods, manager of the Kinopin Bowladrome stated this week. First games are to be played on Tuesday, October 9.

Kelowna Lads Go To Medicine Hat

KELOWNA—Brian Casey, who plays third base for the Kelowna Chiefs junior ball club, plans to leave this weekend for another season of junior hockey with the Medicine Hat Tigers. Another Kelowna lad, Ken Lipsett intends to tryout for the same team while Bob Wolfe, Chiefs' catcher is toying with the idea of heading for the same city in the hope of landing a berth.

FOUR VERY HAPPY OTTAWA ROUGH RIDERS after their rout of the Montreal Alouettes over the Sept. 8 week-end by scores 13-9 and 33-8. Left to right: Howie (Touchdown) Turner, Tom O'Malley, Bob Simpson, Bruce Cummings. Turner and Simpson did the running, O'Malley the pitching, Cummings the kicking for the sweep.

NEWS FROM THE GREAT OUTDOORS

(By Bert Berry)

FISHING

Okanagan Lake: Fairly good again this week, but not biting quite as well as last week. This is still a good bet.

Echo Lake: This small lake out of Kamby has been good, one party getting fish up to 15 pounds, so it is really on.

Oyama Lake: Another report from this lake states fishing is still good and worth a try.

Silver Lake: One party in last week and fishing was good.

Peachland Dam: Fishing pretty good here.

Headwater Camp: Reports say it is pretty good.

Glen Lake: Still holding up well.

Fish Lake Camp: Upper lakes good. One party reports a very good catch on Munro Lake.

On the whole fishing is good but heavier clothing is needed now as the weather makes it pretty cold to handle fishing equipment, especially on the mountain lakes.

HUNTING

Don Agur has been the only lucky one this week, as far as we know. He shot a nice buck in the past week.

Deer hunting so far for most of us has been lots of hunting and no shooting. A few hunters have seen bucks but apart from Don, have not connected. The main herds must be way back in the hills yet.

Quite a few parties have left for the north after big game. Only one group, the Matkovich party, has returned with a moose so far.

Grouse hunting is spotty this year and so far hasn't lived up to expectations.

Ducks and geese open for the season next Monday, October 1, but sportsmen will probably have to go farther afield to bag any of these birds.

We are looking forward to October 1 when the pheasant season may be announced. Most hunters here expect that a short pheasant season will be allowed but the game commission is not making any statement before the first of the month.

Coast Gets B.C. Junior Ball Crown

The curtain rang down on inter-lor baseball last weekend when Kelowna Chiefs, champions of the South Okanagan junior baseball league when they defeated Summerland Red Sox two straight failed to hold the mythical B.C. junior baseball crown.

Vancouver Hotel West, mainland champs, conquered Kelowna Chiefs in two of the three games played Saturday and Sunday, to carry the crown won by the Red Sox last year back to the coast.

In the first game Saturday afternoon Chiefs won 11-7 with a seven-run spurge in the third inning which knocked Davies out of the box.

Sunday afternoon the series was tied when the Hotelmen won 6-2 and the coast invaders went on to take the third and final game 7-3.

Parsons and Homenuke, loaned to Hotel West by Collingwood junior club, were the winning pitchers on Sunday. Wishlove won the first one for Chiefs and dropped the final one on Sunday. Roy Wakabayashi was losing pitcher in the second contest.

First Game
Vancouver 102 202 0-7 5 3
Kelowna 317 000 x-11-10 3
Davies, Parsons (3), Homenuke (4) and Sparrow; Wishlove and Wolfe.

Second Game
Kelowna 100 000 1-2 8 3
Vancouver 005 100 x-6 6 1
Wakabayashi and Wolfe; Parsons and Sparrow.

Third Game
Kelowna 010 000 101-3 4 3
Vancouver 420 001 00x-7 10 3
Wishlove and Wolfe; Homenuke and Sparrow.

Vernon Cops League Crown

Vernon Canadians, who only won three previous games all season captured the third and final game of the best of three series for the Okanagan-Mainline baseball championship at Penticton on Sunday afternoon by downing that city's Athletics 8-4.

Vernon won the first game at Penticton 8-7, lost the second at home 15-3 and then staged a comeback to down the pennant winners in the final game.

Biggest crowd of the season saw Sunday's contest which was a tightly-contested one throughout. Ike Jackson went the route and import Bacon was not needed in the final game.

Ted Bowsfield was losing pitcher, giving up six runs in the fatal third frame which decided the game.

On the same day, the Vernon News declared of the same game and the same crowd: "Sunday's huge crowd, watching the Caruck-Athletic set to, believed to be the largest in Vernon baseball history, also contributed a record collection to the ball club—\$465.

MORE ABOUT

NEW SCHOOL

Continued from page 1
ior high school is the final step in the enlargement program started some years ago, he observed, thanking the minister for this department's help in bringing about the successful completion of this program, the school inspectors and neighboring school boards for their assistance.

He did not dwell on various sections of the new school, as he remarked that a full description had been given in last week's issue of 'The Review.'

"This school doesn't belong to the school board or the department of education," he informed the high school students gathered in the auditorium for the opening ceremonies.

"It belongs to your mothers and dads and some of you will be helping to pay for it in the next twenty years," he added, urging the students to consider it their school and treat it accordingly.

First School Graduate

Mr. Bleasdale regretted that Mrs. J. C. Robson, wife of the first high school principal here, could not be present for the ceremonies. However, he introduced Mrs. H. C. Whitaker, who was a member of the first graduating class of the local high school.

Besides introducing the trustees, Mr. Bleasdale remarked on the assistance provided by a former member of the school Dr. James Marshall.

Before introducing H. S. Kenyon, head of Kenyon & Co. Ltd., the firm which was awarded the contract, Mr. Bleasdale paid tribute to Mr. Kenyon's son Al, who took the responsibility for a great proportion of the new school construction.

"As a company we were very proud to be awarded this contract," Mr. Kenyon remarked, stating that as far as possible the subcontracts were also awarded in the South Okanagan. He thanked the Summerland council and school district board for their co-operation with his firm.

"I don't think anything could have gone more smoothly than this job did," remarked Mr.

Kenyon, adding that his son Al was born in Summerland and the Kenyon family lived here when first moving to B.C.

Chairman Bleasdale was highly flattering in his praise of the clear vision of W. K. Noppe who had been mainly responsible for the designing of the building. The entire school, estimated originally at \$400,000 including equipment, will be constructed for \$9,000 less than this figure, Mr. Bleasdale observed.

Mr. Noppe, in turn, spoke highly of the help given him by Chairman Bleasdale and Inspector Burnett in the planning stages of the building.

"There was more goodwill and more striving to fulfill the contract than you usually meet in such construction," Mr. Noppe observed.

Principal A. K. Macleod termed this a significant step in the development of the Okanagan and particularly this district. He felt that coupled with this pride of achievement teachers of the high school staff are thankful for the opportunity to work in such excellent surroundings.

"For a community of this size, this school is a wonderful building," declared Ken Brawner, representative of the students. He thanked the ratepayers for their consideration.

A school quartette consisting of Shirley Gardiner, Shirley Schumann, Jane Woolliams and Melva Stevenson, sang two numbers, Schubert's "Night and Dreams" and Mozart's "Away with Melancholy" with Mary Marshall at the piano.

Reeve C. E. Bentley, first spoke of the King's illness and announced his intention of cabling Summerland's hopes for a speedy recovery from the meeting.

He reminded the audience that Summerland ratepayers left no doubt when they voted overwhelmingly in favor of a new junior-senior high school.

They showed confidence in the board and the school staff by this action, he thought.

He termed a "wonderful thing" the friendly spirit of co-operation which exists between the board and the council. He felt that Mr. Bleasdale and his trustees must be very proud to see the new school opened.

He referred to the many citizens who have made a niche for themselves here at home and abroad, after graduating from Summerland high school. Among names mentioned were Rupert Wright, Leslie Smith, Dr. James Marshall, George Washington, Dr. J. Allen Harris and Dr. G. Howell Harris, Drs. Munn and Vanderburgh, Dr. Maurice Welsh, Councillors Francis Steuart and Eric Tait, Municipal Clerk Gordon Smith and Board Chairman C. J. Bleasdale.

To the children he stressed: "This is your school, Summerland is your town. Be proud of your home, your family, your school and your town."

Greetings were brought from Frank Venables, Oliver board chairman, and newly elected B.C. School Trustees' Assn. president. He specially thanked Hon. Mr.

In its final release of the season, the horticultural division of the provincial department of agriculture has issued the latest estimates giving a complete picture of the 1951 fruit crop in B.C.

Apples are down 1,200,000 boxes from last year's record output but pears show an appreciable increase. Peaches went over the mil-

Table with columns: DISTRICT, Apples (1950 Crop, 1951 Est.), Pears (1950 Crop, 1951 Est.), Cherries (1950 Crop, 1951 Est.), Peaches (1950 Crop, 1951 Est.), Apricots (1950 Crop, 1951 Est.), Plums (1950 Crop, 1951 Est.), Prunes (1950 Crop, 1951 Est.). Rows include Lytton-Chase, Salmon Arm-Sorrento, Armstrong, Vernon, Oyama, Winfield & O.K. Centre, Kelowna, Westbank, Peachland, Summerland, Penticton, Naramata, Kaledon, Oliver-Osoyoos, Keremeos-Cawston, Total Okanagan, Vancouver Island and Gulf Islands, Lower Mainland, Kootenay-Arrow Lakes, Grand Forks, Creston, Totals for Province.

Final Fruit Crop Estimates for B.C. for 1951

lion-mark while apricots have come up somewhat. The prune crop is also better in quantity than last year's tonnage.

In Summerland, the apple crop is down in relation to the rest of the province, showing a decrease of 152,715 boxes from 1950. Peachland is down about 30,000 boxes and Westbank has dropped 48,000

boxes of apples.

Final figures on pears shows that Summerland and the Oliver-Osoyoos section are equal in estimated production at 120,000 boxes each, Penticton leading with 140,000 boxes.

Not included in the following table are crabapples and grapes. Estimated production of crabs for

this year is 547,930 boxes against 182,141 last year in the Okanagan. Over the province the figures are 554,430 boxes and 188,688 respectively.

Grape production in B.C. is 1,513,150 pounds this year against 1,458,594 pounds in 1950.

Following is the picture of 1951 fruit crop:

Straith for his assistance throughout the province in obtaining industrial arts and agricultural instructors.

Principal S. A. MacDonald brought greetings from the elementary school, which he believed to be one of the finest buildings to be found anywhere. He congratulated the school board on the completion of its program which has resulted in two school buildings to be regarded with a great deal of pride.

Chairman Bleasdale's remarks that Mr. MacDonald is the first principal in B.C. to have a school named after him while still in office brought instant applause.

First of the school inspectors who included this district in their setup while the building project was in progress was J. N. Burnett, now in Vancouver. Mr. Burnett said that the Okanagan has long been known for its climate and its apples but is now becoming equally famous for the opportunities it is giving its children.

"This school is second to none in the province and I hope it will add to the life of the people here," he concluded.

Congratulations on completion of the school were heard from Inspector Alex Turnbull of Penticton who considered that such buildings are a monument to the spirit of co-operation prevailing in Summerland.

Inspector A. S. Matheson, Kelowna, considered Summerland made a wise choice in their selection of school trustees for this important expansion period. This has been a great forward step for Summerland and for B.C., he thought and described briefly the educational endeavors now being put forward to provide secondary education for all the children of all the people.

He brought the regrets of W.A. C. Bennett, M.L.A. for South Okanagan, who was unable to be present.

Following Hon. Mr. Straith's address, the school building was dedicated by Rev. H. R. Whitmore, representative of the Summerland Ministerial Association.

GREY ROWLAND

Continued from Page 1

er. By and large, newspapers have to have the confidence of the readers. They have to carry put a service which will provide them with readers in sufficient numbers so that advertisers will patronize them, he explained as the safeguard against advertisers obtaining a monopoly on policy.

"It's a catch-as-catch-can existence with safety in numbers," he admitted.

"I fear any system where the revenues that keep everything going are corralled within the state."

Mr. Rowland admitted he could see the necessity for intrusion of state control to some degree but he failed to see where freedom of the press can exist without a flow of wealth outside the channel of the state.

He warned that "you can't unscramble the egg" and the road to state control is not an easy incline which can be retraced but a stiff precipice "where you can't go back".

"Time to think of these things is now, not when you have to take action," he added, admitting that there is much about the present so-called capitalistic system which makes people turn to more out and out socialism than is needed.

"If we can hold in this country we may be able to save the freedoms for other parts of the world," he was hopeful, asking his listeners to think of a free press in Russia and what a boon it would be to have the people of Russia given all sides of world troubles, as well as informing the rest of the world of the true state of affairs in that country.

"Men have sacrificed to bring about a better shape of things in this country," Mr. Rowland emphasized. "If others have thought of us and have contributed to our happiness, it behooves us to think of our sons and grandsons.

"The press belongs to you, not to the publisher, but if you lose the freedom it won't belong to you. So I suggest you keep it that way," he concluded.

RALPH E. WHITE IS LAID AT REST

KAMLOOPS - Funeral services in memory of Ralph E. White, publisher of the Kamloops Sentinel for 26 years, were held in Kamloops United church on Tuesday afternoon at 2:30 o'clock. Rev. R. R. Morrison officiated at the rites in the church and at the graveside in Hillside cemetery.

The Sentinel's publisher died in Royal Inland hospital at 5:30 a.m. Saturday. He was 76 years old, and had been fatally ill for some months.

Mr. White is survived by his widow, the former Frances Villa Mosher, of St. Martins, N.B. (which also was his birthplace), whom he married on October 6, 1902.

Two sons and three daughters also mourn his death. They are Ronald E. White, Harold White, Mrs. Frank Turner (Helen), Mrs. Hugh T. Vicars (Marjorie) and Mrs. Norman A. MacDonald (Ida). All reside here. There also are ten grandchildren.

Grand Lodge Officers Visit Hope LOBA

On Wednesday, Sept. 19, members of Hope Lodge of the LOBA of Summerland were hosts to the RWGM of British Columbia, Sister Millar, RWFGM Sister Beckett, and RWGJD Sister Blair on their official visit to the interior.

Also present were Sister Klove and Sister Forbes, visiting from New Westminster.

Hope Lodge exemplified the Scarlet degree and were given an intellectual talk by Sister Millar.

After the formal meeting delicious refreshments were enjoyed by all.
