Ken McKay Wins Six Out of Nine At Rose Showing

Ken McKay of Naramata again swept the field for honors at the Summerland Horticultural Society annual rose show Tuesday in the High School auditorium. He won first prize in six of the nine classes and won second in two more.

Winner of two firsts was William Snow while top honors in the remaining class went to Mrs. W. F. Ward.

Mrs. W. H. B. Munn won three seconds, Mr. Snow, Miss Doré, Tait and K. C. Tallyour each received one.

Exhibits of J. N. Kennedy and Mrs. Ward each won two thirds while other winners of thirds were F. Topham and Mr. Snow.

Entries in the competition were submitted by growers in Naramata, Peachland and Penticton, as well as Summerland.

Forgot Summerland Is in Banana Belt

"I forgot Summerland was in the banana belt," apologized Premier Bennett, explaining why he failed to appear at Summerland July 1 celebration on Dominion Day.

Premier Bennett called at The Review Tuesday on his way back to Victoria and asked that his apologies be conveyed to the people of Summerland.

"It was pouring rain in Kelowna," he said, "and it didn't occur to me that you'd be enjoying sunshine down here. I just assumed you were getting the same kind of weather and that the celebration would be cancelled. I forgot Summerland is in the banana belt but I'll certainly remember it in the future."

Building Activity Slack During June

A heavy rush on building during May left no contractors in Summerland available for work which accounts for a light month in the district during June.

Total amount of permits issued during the month according to Building Inspector Roy F. Angus, was \$7,630. One of these was for a new dwelling at an estimated cost of \$7,000 and three were for alterations to a total of \$18,950.

Building for the first six months of the year, however, is still well ahead of the same period last year. Total so far this year is 68 permits for \$160,855 as compared to 55 a year ago for 134,375.

Junior Projects Boost Float Funds

The younger set in Trout Creek have gone into business for the worthy purpose of raising money toward the Trout Creek float that is always a feature of the Penticton Peach Festival parade and last year took first prize.

Roadside stands selling lemonade and cookies have made their appearance lately and have done good business. On Monday afternoon a variety performance was staged at the home of Mrs. Ralph Downing when nursery rhymes were acted out and songs sung to an appreciative audience. Cold drinks and home-made cookies were sold and all funds will go toward the float. Those taking part in the performance were Miss Becky Downing, Miss Anthes Morgan, Miss Mary Morgan and Miss Carole Williams. Miss Pam Brinton also assisted at the roadside stand.

The variety concert was an entirely original production, staged, costumed and presented by the performers. As long as these young sprouts continue to show their talents there will be no lack of materials for the future singers and players.

Frances Atkinson Chosen 1955 Summerland Queen

Chosen to reign as Summerland's queen for this year was Miss Frances Atkinson. Princesses who will attend Queen Frances are Miss Diane Berg and Miss Pearl Hooker.

The attractive winner of the Summerland scholarship in this year's graduating class will reign as Summerland's 1955 queen. She is Frances Atkinson, the daughter of Reeve and Mrs. F. E. Atkinson.

Her selection for the title over eight other contestants makes her the third member of the family to be honored by the community this year. Her mother and father were selected as joint holders of the Good Citizen title for this year.

Selection and crowning of the new queen was carried out Friday afternoon at Living Memorial Park before a crowd of close to 600 who joined in the Summerland Day festivities sponsored by the Board of Trade.

Although not too generous with sunshine for the occasion, the weatherman favored the occasion. Threat of rain hung over the district all day but the threat was not made good and the crowd thoroughly enjoyed the program from the junior races which touched off the celebration at 1:00 o'clock right through to the junior ball game, which finished off the afternoon.

Selected as princesses to attend the new queen were Pearl Hooker and Diane Berg, both also members of this year's graduating class.

The crowning ceremony in the afternoon was particularly effective as the new queen proceeded to the dias down an aisle formed by little girls holding garlands and proceeded by others scattering rose petals. She received her crown from last year's queen, Marilyn Wade.

In charge of decorations and arrangements for crowning was a committee consisting of Mrs. Francis Steuart, Mrs. Ross McLachlan, Mrs. Lionel Fudge, Mrs. Jack Dunson, Mrs. George Washington and Mrs. Wilfred Mitchell.

Little girls holding the garlands to form the aisle for the queen were Lynne Booths, Jean Kersey, Carole Hackmann, Judy Mitchell, Barbara Fudge and Barbara Bonvan Those scattering petals were Penny Piers, Audrey Bergs, Ann McLachlan, Darlene Shannon, Elaine Dunson, Linda Rumball, Ginny Braddick and Linda Scott. Dancing, band music, pageantry and square dancing all formed a part of the entertainment program.

Dancing a highland fling were Jean Kersey, Carole Hackmann, Judy Mitchell and Barry Piers. In the sword dance were Barry Piers, Ann McLachlan, Audrey Bergs, Donna Loidlaw, Darlene Shannon and Linda Rumball. A Tarantella was danced by Linda Scott, Ginny Braddick, Elaine Dunson and Penny Piers. Bands participating were the Summerland Band and the High School Band. Scenes from the Gil-

Struck Down on Highway, Kiddie Gets Leg Broken

Still in Penticton General Hospital but now out of danger is seven-year-old Billy White who was struck by a car on the Penticton highway. He is suffering from a broken leg.

The youthful accident victim, son of Mr. and Mrs. Russel White, was struck down at the Pyramid bend on the Penticton highway as he left a truck driven by his father, to dash across the road to pick up an empty bottle. Driver of the car which struck the youngster was Dr. James Marshall of Trout Creek.

The boy was taken to Summerland General Hospital where he was treated by Dr. W. H. B. Munn and then taken to Penticton hospital for further examination in case of internal injuries. His right leg was fractured.

The accident occurred at 8:15 a.m.

Mrs. E. Brighten Passes in Vernon

A long-time Summerland resident, Mrs. Julia Ann Brighten, passed away last Thursday in Vernon. She had been in failing health for many years.

Mrs. Brighten has lived in Summerland since she moved here with her family in 1919 and was particularly noted for her work in St. Stephen's Church. She was the wife of Ernest Brighten.

She leaves, beside her husband, two sons, William Hack of West Summerland and Harry Hack of Chemanus, two daughters, Mrs. E. Steuart of Kimberley and Mrs. Sid Myers of West Summerland; two brothers, J. T. Washington of West Summerland and James Washington of London, England; six grandchildren and six great-grandchildren.

Funeral services were held Saturday, July 2, from St. Stephen's Anglican church with Rev. A. A. T. Northrup officiating. Burial was in the Anglican cemetery.

Killed His First B'ar At the Age of 40

New claimant for the "Davy Crockett" title in Summerland is Councilor Bill Barkwill.

He staked his claim to the title Wednesday afternoon when he brought down a good-sized black bear in his orchard.

Section of Highway to Antlers Will be Reconstructed This Fall

Reconstruction of the highway south of the Antlers to Summerland will commence this fall, Premier W. A. C. Bennett announced during a brief visit to Summerland Monday. At the same time it is planned to hardsurface the newly-constructed road through Summerland and the mile-long stretch between Antlers and Peachland.

Mr. Bennett also disclosed that the road through Oyama will be reconstructed this fall. These two major projects are part of B. C.'s accelerated road program.

Plans for the Okanagan Bridge are going ahead on schedule, but due to a delay in drafting final engineering plans, tenders will not be called by July 15 as Premier Bennett had thought possible. Bids will be called later in the year, he said.

The premier said the department of highways has instructed the engineering firm, Swan, Wooster and Partners, to secure the best possible advice on soil, foundation, wind tests, etc., as the Okanagan structure will be the largest bridge in the British Commonwealth.

Referring to other bridges con-

Bennett to Speak Here on August 3

Third anniversary of Social Credit party taking power in B. C. will be celebrated in Summerland by the South Okanagan Social Credit party and principal speaker will be Premier W. A. C. Bennett.

Plans for the event were laid last night at a meeting of the executive held at the home of the South Okanagan president, Lloyd Miller. The birthday party will be held in the High School Auditorium and on the entertainment program will be the high school band under direction of director John Tamblin. Address of welcome to the party, which will be open to the public, will be given by Reeve, F. E. Atkinson.

Cutting the enormous birthday cake will be one of the highlights of the event.

School for Bandsmen To Start Next Week

The Summerland High School Summer Band School will start Tuesday, July 12 in the Summerland High School Auditorium.

Three classes will be held this year, the beginners class at 6:00 pm, the Junior band at 6:45 pm and the Senior band at 8:00 pm. The purpose of the classes are to keep the instrumentalists working at their horns so that come September and a new school year they will actually be better instead of worse after the school vacation.

In the case of the Senior band it also holds the group together so that they are able to participate in various engagements during the summer months.

The beginning and junior groups will be brushing up on their techniques and scales while the senior band will spend a good deal of time on parade drill. Already some concerts are planned for the summer months and a large turnout is anticipated.

Plans to Manufacture Ceramics Here

Michel Tollivet, in charge of the Department of Science at Shawinigan Technical Institute in Quebec, who purchased the Harvey Walton place in Prairie Valley, is vacationing here. He is renovating the property and making plans to take up permanent residence here next year.

Mr. Tollivet is instructor in Ceramic Handicraft, specializing in artistic ceramics. He has exhibited his work in Toronto, Montreal and at the P. N. E. in Vancouver. It is his intention, when he returns to Summerland next year,

to install a plant and laboratory for the manufacture of ceramics.

He is hoping to find suitable clays in the district; failing to do so, he will import the clay. The ceramics are moulded by hand and baked in a kiln. The coloring is impregnated in the clay. He has a quantity of bowls, trays and decorative tiles with him. He is assisted in this work by Mrs. Lydie Binz, who will remain here.

He leaves for Shawinigan at the end of August to instruct for the next year before returning to reside in Summerland.

Co-Op Services Society Expands Operations in Move to New Quarters

Summerland Co-Op Services Society this week will broaden its activities with the opening of their new service station and garage in the old Red Building on Jubilee Road.

The three-year-old co-operative society has been operating a service station for the past two years on Hastings Road and a few months ago purchased the old CPR freight shed to provide them with a more suitable location and also accommodation for future expansion as the society decides to extend its activities.

The new service station will be officially opened on Saturday. Incorporated in 1952 with six members, the society now has 120 members with assets worth more than \$80,000. Last year the society

did a \$30,000 volume of business. Principle of the society is that it sells its goods and services at the prevailing market prices and surplus is returned to members proportionately on the basis of each member's patronage.

The Summerland Co-Op Services Society is a member of the B. C. Co-Op Wholesale Society and the B. C. Co-Op Union and is affiliated with the Inter-provincial Co-Op Ltd.

President of the society from its inception until last week has been Roy E. Smith and new president is Carl Krause. W. S. Ritchie is vice-president and directors are Mr. Smith, H. H. Dunson, H. Vanderburgh, George Allen, Wes Taven-

DET. SGT. CUTHBERT

TRAFFIC BOSS ROSSIER

CHIEF MULLIGAN

Known as Canada's crime capital, Vancouver now faces its third major police shake-up in 23 years following suicide attempt of Det. Sgt. Leonard Cuthbert, 54-year old father of three children. Twelve hours after Cuthbert fired a bullet through his chest because he had been named in a weekly tabloid as an informant on graft within the police force, Mayor Fred Hume announced that Police Chief Walter Mulligan, had been placed on leave of absence, and that Attorney-General Robert Bonner would conduct a public inquiry into charges that corruption had again crept into the department. In a second move reminiscent of the turbulent 1946-47 mayoral regime of the late Sen. Gerry McGeer — when Mulligan was raised from an obscure sergeant to detective superintendent and then chief — Mayor Hume elevated a junior inspector, Traffic Boss Alan Rosstier, to take the chief's place for the duration of the inquiry which opened in Vancouver Tuesday.

Packing Cherries In Southern District

Cherry packing has now started in the Oliver-Osoyoos district and it is expected the first carload will be shipped on Saturday.

Washington, Oregon and Idaho cherries are moving in volume with the market somewhat slower than last year at this time.

Farmer-Built Co-Operative Benefit to all Residents

The Summerland Co-operative Association has been, essentially, a farmer's co-operative. But officials and members are fully aware that the character of our district is changing.

The days of the large farms and uncleared land is passing. Many districts, with homes closely spaced along the roads, have taken on the appearance of semi-urban areas, and a lot of our neighbors are not farmers.

Well, since a co-op needs volume business to function most effectively, it must teach the precepts of co-operation and co-operative buying to farmers and townsman alike — and then provide the services to encourage their trade.

Since the farmer needs a car to get to town, and the townsman one to get to work, what is more natural than for the co-op to have a service station to supply gasoline, oils, lubrication and other services.

With this thought in mind, the co-op opened a service station in April, 1958 and handles Co-op Oil products, tires, and other accessories.

Competitive control of gasoline prices means that members pay the same price for gas at our service station as at any other.

But the co-op pays the same rate of patronage refund on all service station purchases as in other departments.

It is owned by the members and its policy and methods are under the democratic control of the members. Each has only one vote, regardless of the number of shares he holds.

The station handles general repair work in addition to tune-up work.

The manager has had wide experience in handling and distributing petroleum products and there's a three-man staff to help him give you the best possible service.

Drop in some time and try it. There is no better gasoline than Co-op. Let us fill up your tank and change your oil while you do the rest of your shopping.

For extra convenience, you may wish to use a credit card.

Co-Op Services Operates Under Rochdale Plan

The requirements to join the Summerland Co-operative are few. Rules of membership are simple and there are no restrictions or hidden costs.

Here are the basic rules of operation, derived from the Rochdale plan:

1. Open membership — anyone who can be served by the Co-operative is eligible for membership, regardless of race, creed, financial or social standing.

2. Democratic control — each member of a co-operative has only one vote on any question regardless of the amount of his shares and loan capital. Proxy voting is not allowed.

3. The interest on share certificates in the Co-operative Association is 4 percent per annum.

4. Patronage savings — the net remainder of funds after providing for all expenses and proper reserves is refunded to patrons in proportion to patronage rather than on amount of capital owned.

5. Trade for cash — as a general rule, business in a co-operative is done on a cash basis to eliminate the extra cost of credit records, and to remove disadvantages of members indebted to the co-op.

6. Creedal neutrality — co-operatives do not take sides on religious or party politics. Legislative activity by co-operatives is limited to protection and advancement of co-operative function.

7. Constant education — members must be kept fully informed about the objectives, services, activities and conditions of their co-operative affairs generally.

8. Constant expansion — to increase the vitality and usefulness of the co-operative, members should make constant effort to serve more people and to expand the types of services provided.

A Message On Co-operation

Submitted

**With Best Wishes by B. C.'s
Co-Operative Educational Service**

Co-operation is a working and living together on various levels of social activity. Through Co-operation human beings and groups may move up from one level of social development to the next richer and more stimulating one. Co-operation may involve little conscious meaning to some persons. At the other pole, even a small purchase at a co-operative may give that member-purchaser the thrill of performing an act that has a world-wide meaning for democracy and a peacefully developing human society. Co-operation underlies all life, and at the same time, its processes seek expression in increasingly conscious ways.

Co-operation is a way of living. It is a philosophy of life. It is a set of processes and procedures of behaving, and it is a test of principles or fundamentals for the guidance of both individuals and human society. Co-operation is a cause as far-reaching as the welfare of mankind. Co-operation in the general sense of working and living together is older than the human race. Without co-operation, human beings would still be living in caves. With it, they have found the mainspring of human society and are achieving civilization. Co-operation is a combination of self-help and mutual help, directed toward the building of universal human values.

Co-operation includes another social process which is nearly as important as itself, namely, competition. Co-operation is often viewed as functioning alongside of competition. But no, the probable fact is that co-operation is basic to competition. Co-operation may be viewed as the dynamic field of social forces within which competition may take place. In fact, when competition becomes a social conflict, that destroys all co-operation, no social life can exist. It appears that the constructive effects of competition occur only when competition is limited to the field of co-operation. Alfred E. Emerson, eminent biologist is the authority of the startling statement that Co-operation is far more important in the evolution of human society than is "struggle for existence between human beings or human groups" and that "Co-operation has been a more evolutionary force in the development of man than has the bitter competitive struggle for existence."

In a general sense Co-operation is exceedingly common. Parents and children co-operate. Teachers and pupils co-operate. Citizens co-operate in the community and state. In a specific sense, Co-operation refers to people working together according to the Rochdale principles, in order to meet, food needs, housing needs, health needs, clothing needs, recreation needs, needs for various kinds of farm supplies such as electricity, feed, fertilizer, petroleum, and so on.

The Pioneers, as the 28 founders of the Co-operative Society in Rochdale are called, achieved fame and gratitude not because they were the first to establish a co-operative association or try to live by co-operative principles of action, but because they were the first to analyze, to formulate, and to set down in black and white a set of principles for people generally to consider, to live by, to work by, and to develop by, in a free and democratic atmosphere or field of social forces.

The original guiding principles of action of the Rochdale Pioneers, were: 1. Open membership in their association to all who would co-operate in good faith without restrictions regarding race, colour or creed. 2. Each member shall have one vote and only one vote and there shall be no proxy voting. 3. Capital shall receive a limited and pre-determined rate of interest. 4. Not savings shall be distributed to members on the basis of their patronage of the Association's goods and services. 5. All trading shall be done on a cash basis at fair market rates. 6. Accounts shall be audited regularly, and reports made regularly so that members may discuss the Association's affairs intelligently, and act accordingly. 7. Frequent discussion meetings shall be held by the members in order to consider the current state and possible development of their association. 8. Constant and continuous education for the members.

A co-operative association is a community institution. It does not function for itself or for its members alone. It functions best when its members, officers and employees serve in community capacities along with their work in the co-operative. A study by Alfred Sheets reveals the roles of co-operatives as community institutions. Many achieve business leadership in their communities. Managers are invited to become members of local businessmen's associations. Members serve as appointed representatives of their co-operatives on public welfare committees, social welfare boards, co-ordinating councils. Sometimes co-operatives sponsor a public lecture series. Their members may stage dramas; they may lead the way in a program for civic betterment; they may become educational leaders in their communities.

When people discover that true co-operatives are democratically controlled organizations of local community persons like themselves, and that co-operatives actually decrease the need for government control, they may become participants. As in the case of democracy in all ages and all countries, it is well to keep in mind that co-operatives cannot avoid attacks by people who do not understand co-operation in its full sense. For "ours is a world where people crucified Jesus, poisoned Socrates, burned Savonarola, assassinated Lincoln."

If the public understood the nature of co-operation, as grounded in the Rochdale Principles, propaganda against co-operatives would wilt almost as soon as it sprung up. A far-reaching problem of all co-operative associations is that of creating public opinion that understands the co-operative way of life.

VISITING ABROAD

Mrs. Arnold Gayton travelled to Vernon last Friday to spend a week or so with her daughter.

Mr. and Mrs. Ken Blagborne were week-end visitors to the coast. Mrs. Stan Taylor left for Vancouver at the first of the week.

Among those girls attending the Junior Intermediate O. A. C. at Wilsons Landing this week are Jane Solly, Sheila Green, Audrey Beggs, Dorothy Watson and Lenore Hanson.

George G. Armstrong is spending a few days at the coast.

Mr. and Mrs. R. Nakamura have left for the coast for a few days. Mrs. Bob Souel, Jamie and Tony and her parents, Mr. and Mrs. E. Darney have gone to Port Moody.

Mr. and Mrs. George Harper and their granddaughter, Miss Carol Williams, spent last week-end with the former's daughter and son-in-law, Mr. and Mrs. O. Johnson of Trail.

Mr. and Mrs. Norris Laidlaw and son Lowell, spent last week-end in Vancouver.

HOME AGAIN

Mrs. Flora Bergstrom and family, accompanied by Mr. and Mrs. W. Baldwin, have returned from a motor trip to Seattle and Tacoma.

Home from a ten-day vacation spent visiting their son-in-law and daughter, Mr. and Mrs. J. P. Robertson of Tatla Lake, B. C., are Mr. and Mrs. C. H. Elsey.

Mr. and Mrs. Archie Nicholson and family just returned from a visit at Eastport, Idaho, where they were guests of cousins, Mr. and Mrs. Carl Johnson. They returned home by way of Spokane and Coulee Dam.

NEW ARRIVALS

BORN: To Mr. and Mrs. Pat Morris (nee Phyllis Verier) on June 25th at Grace Hospital, Vancouver, a daughter.

Visiting Ball Players Too Much for Sox

Summerland Red Sox staged a top notch effort before July 1 watchers at Living Memorial Park but were unable to match the brand of ball displayed by the Vancouver Murphy's who rolled up a 9-4 win over the locals.

Although the Sox were able to pick up nine hits, the visiting hurlers redeemed themselves by striking out 13 of the 27 batters who stepped up to the plate. In the first three innings, the locals didn't even get a look-in, batters going down one-two-three, six from strike-outs. In the fourth, Biollo and Pohlman reached base on singles, Glen Parker struck out then Bobby Parker singled to drive Biollo home but that was as far as they got when the next two batters struck out. Sox picked up their remaining three runs in the sixth when Glen and Bobby Parker and Hackman each singled and Uegama followed with a double to drive home the first two and Campbell sacrificed Hackman home.

The Murphy's, champions of their Vancouver league, got their chance to break away in the third and racked up five runs. They added two more in the fourth and one each in the fifth and sixth.

Bonthoux pitched the first two innings and then was replaced by Murray. Fichel started for the visitors and was relieved by Windblow in the sixth.

After beating out the Russian crew, UBC rowers last week lost out on the world championship at Henley when they were nosed out by the University of Pennsylvania by a third of a length. Above they are seen before leaving Canada as they won in an impromptu race with the North Vancouver ferry.

Visiting Here

Miss Gwen Lamcraft, of Vancouver, was a visitor to Summerland last week-end.

Mrs. Sylvia Riha, of Vellejo, California, is visiting at the home of her parents, Mr. and Mrs. J. T. Washington. Mrs. Riha's brother and family, Mr. and Mrs. George Washington and Marilyn, met her in Vancouver.

Visiting relatives in Summerland are Mr. and Mrs. Bruce MacDonald and children, Mary Lou and Chris, of Calgary.

Mr. and Mrs. Eric Baungart and children, Edward and Raymond, arrived here from Manitoba to spend a week or so visiting at the home of Mr. and Mrs. J. Wolff.

Mr. and Mrs. Harry Darke, of Trail, spent the week-end at the home of Mr. Darke's aunt, Mrs. J. A. Darke.

Guests at the home of Mr. and Mrs. Harry Brown are the latter's sister, Mrs. William Maxwell, accompanied by her two children, Meredith and Richard.

Mr. and Mrs. T. J. Woodhead and daughter Terry of Tranquille, spent the week-end at the home of Mr. and Mrs. F. R. Ganzefeld.

Miss Arlene Floen of Quesnel is spending the summer at the home of her aunt and uncle, Mr. and Mrs. F. R. Ganzefeld, while her father attends summer school in Victoria.

Mr. and Mrs. Dart Dodding of Lauer Nicola spent the week visiting Mr. and Mrs. John Manning.

Mr. and Mrs. D. R. Allen and daughter Irene of Pine Lake, Alberta, were guests over the week-end at the home of Mr. and Mrs. E. L. Famchon, coming by air to attend the Allen-Bige wedding.

Miss Florence Ferguson, R. N., and her mother, Mrs. Ferguson of Victoria, were visiting Mr. and Mrs. Eric Tait last week.

Mrs. Ruth Simpson of New Westminster was a week-end visitor at the home of Mr. and Mrs. Bob Alstead, Trout Creek.

Mr. and Mrs. J. E. Cafferty and family of South Burnaby, are visiting Mrs. Cafferty's parents, Mr. and Mrs. George Henry.

Miss Marion Rowland and her sister, Vicki, are visiting with their grandparents, Mr. and Mrs. Bob Alstead, Front Creek.

Miss Joan and Freda Daniels returned to Vancouver after spending a week-end at the home of their parents, Mr. and Mrs. M. F. Daniels.

Miss Pat Daniels and Barbara Craddock of Vancouver and Miss Frances Daniels from Fawcett, Alberta, are spending the summer holidays at the home of Mr. and Mrs. F. M. Daniels.

Mr. and Mrs. J. Burnell received word that their daughter Shirley, arrived in St. Johns, Quebec, last Friday and is stationed at the RCAF station there.

Mrs. Roman Balzar of Vancouver is visiting at the home of Mr. and Mrs. Joe Sheeley while taking the art course at the Summerland art class.

Visiting Mr. and Mrs. D. E. Clark are Mr. Clark's brother and sister-in-law, Mr. and Mrs. J. S. Clark and family of Vancouver.

Spending the summer with Mr. and Mrs. J. B. Barkwill is their niece, Miss Joyce Leach of Gloucestershire, England.

Visiting Mr. and Mrs. Roy Gilbert for a few days was Mrs. F. O'Leary of Clay Bank, Sask.

Visiting Mr. and Mrs. John Menu are Mrs. Menu's brother and sister-in-law, Mr. and Mrs. W. Van Wallegham and family of Winnipeg. Mr. and Mrs. Van Wallegham accompanied by Mrs. Menu left for Vancouver on Monday to visit Marguerite Menu.

Friends Honor Bride At Pretty Shower

A shower was held at the home of Mrs. Keith Sayers on Saturday, July 2, honoring the former Yvonne Saucier on the occasion of her recent marriage to Jack Young, Jr., of Summerland.

The bride was seated in a chair decorated with yellow and white streamers under a white wedding bell. The many lovely gifts were presented in a decorated guitar case, also in yellow and white. Flowers and candles throughout the room carried out the same color arrangement.

Tea was served by Mrs. Roy Wellwood and Miss Louise Elliott, assisted by Mrs. Sayers.

Those invited to attend were Mrs. J. Young, Sr., Mrs. W. H. B. Munn, Mrs. A. Watt, Mrs. W. Baldwin, Mrs. W. Sherwood, Mrs. F. Bergstrom, Mrs. R. Wellwood, Miss R. Adams, Miss Miwa Tada, Miss Louise Elliott, Miss Nancy Young and Miss Johan Bergstrom.

Stripes add interest to many clothes categories this season from dance floor to the beach. Plenty of stripes add verve and brightness to this blithe beach outfit. The stripes are vertical on the slim pants, which are front buttoned and slit below the knee, the color scheme putty beige with navy and white stripes. Horizontal navy and white stripes are used for the knitted camisole underneath, the white cotton knit jacket, neatly bound in navy.

THANK YOU

The Summerland Board of Trade wishes to thank the many organizations and individuals who assisted with the "Summerland Day" program July 1.

The Board would like to acknowledge the wonderful public support and would appreciate comments on this year's program, also suggestions for improvement of future celebrations.

SUMMERLAND BOARD OF TRADE

Mr. Householder -

Schedule your repair work now. Every day you neglect to fix those leaks or get the repairs done to the furnace means a loss to you.

Let's get together now

We have the "Know How" and the tools to go with it.

For a job well done call

Selinger Plumbing and Heating

"Light and fluffy as a blue cloud" is the way dress designer Thor de Naguy describes the dress he has made for Marilyn Bell's presentation to the Queen at a Buckingham Palace garden party. Nagay, a Toronto designer, used 60 yards of nylon and spent 100 hours in fashioning the dress which will make Marilyn a "16th-century lady."

Parliament Hill

By O. L. JONES

The Conservative group initiated a discussion seeking a reform of the senate so that it can more effectively discharge the constitutional function it was intended to serve. The Hon. Earle Rowe claimed that Liberal governments have turned the senate into a laughing stock and that something should be done immediately. All opposition parties joined in the debate demanding measures from complete reform to total abolition.

It was pointed out that MacKenzie King extracted a pledge from all senate appointees in 1925 and 1926 that they would support his ideas for a reform but he promptly dropped the plan once he had a large majority in the upper house. At this point the prime minister interrupted to say that none of the persons appointed to the senate by him had any conditions attached to their appointment. The 37 men and women that the present prime minister has appointed since 1948 have been appointed without any strings attached.

The senate is composed of 102 senators, divided on a per capita basis — and with regard to certain French Canadian rights — between all the provinces of Canada. At the present time, there are 22 vacancies, some of them unfilled for the last seven years. Naturally, the government is criticized for allowing certain senate seats to be vacant for that length of time since this is considered as an indication that the province concerned is being denied representation in the upper chamber. It was claimed that all vacancies should be filled within six months of the death of the senator. If the senate is to have any value at all, its quota should be kept full at all times. However, it is well known that the prime minister, who is responsible for making the appointments to the senate, has been worried over the unbalanced state of that body as it is composed almost entirely of Liberals with the exception of seven Conservative senators who are getting on in years.

The suggestion to appoint distinguished men and women, with no particular political background, to the senate appeals to the prime minister but ex-government supporters are, naturally, anxious to receive these plums. The CCF group advocated the total abolition of the senate or, failing that, it should become an elected body for a limited period of four or five years. Mr. Rowe said that it was never intended that the senate should be allowed to develop into a red rubber stamp for the

His "rose" rose grown by Mr. Norton in his garden. The yard won for him the title of "Rose King of Canada." Entries in the competition in Toronto came from all over Canada and numbered over 3,000. But after hours of sniffing and examining minutely, judges awarded the cup to Mr. Norton. There are 980 members in the Rose society in Canada.

Liberal government. Neither was it intended as an institution to be filled with "water-carriers", the chief qualification being blind allegiance to the government. It was pointed out that the United Kingdom has a committee studying further reform of the House of Lords, a house that has already seen its powers reduced to a minimum, while New Zealand has long ago abolished its senate and Australia has brought about drastic reforms in its senate.

Many speakers claimed that the working men of Canada should have representation in the upper house as they composed the largest unit of mutually interested parties in Canada. Others claimed that representation should be given to large ethnic groups such as the Germans, Ukrainians and, particularly, the "native Indians" who, they claimed, had a strong claim for representation in the senate of Canada.

The government has been in a generous mood recently introducing bills to increase all federal judges' salaries throughout Canada. Some opposition was taken to the increase granted to judges who

now receive between \$16,000 and \$25,000 a year plus a generous pension donated by the government by a flat \$2,500 a year each, which also covers the wife of a judge. Support was given to those judges whose income stands at \$8,000 a year on the ground that many of them could do far better in civil life as practicing lawyers.

Following the passage of this bill, the government introduced another to increase the salaries of members of three federal boards, the board of transport commissioners, the income tax appeal board and the tariff board. In this case, the increase in salary ranged from \$1,500 a year to \$2,500 a year. Mr. Harris said that the object of the boost was to keep the commissioner members of these boards in line with salaries paid to judges. The CCF strongly opposed the passage of his bill on the ground that the government should first consider increasing the basic rate of \$40 a month for old age pensioners. However, the bill passed parliament and now becomes law.

The Progressive-Conservatives, at this time, are still carrying on their filibuster against granting C. D. Howe certain powers under the defence production act. They claim that no minister in a democratic country should be given the powers that this act bestows on the minister of defence production as, under these powers, he could do almost anything in the way of expropriation of materials and manpower. However, they indicated that, if the act was altered to limit the period of this power to two or three years, they would agree. Mr. Howe, on the other hand, demands that the power be unlimited; otherwise, he claims that it would be impossible to guarantee the efficient working of the defence production act in this critical time of our history.

Mr. Howe outlined the situation regarding certain Canadian metals such as nickel and copper which are already in short supply and in the case of nickel it can be sold in Europe for approximately double the Canadian price. Therefore, there is great temptation for the Canadian producer

Gas Stored Apples Draw Premium

Gas stored McIntosh apples are now enjoying a premium over fruit stored in the conventional way. W.R. Phillips, of the central experimental farm, Canada department of agriculture, in Ottawa reports that this premium is willingly paid by the consumer to obtain sound fruit.

It is an unfortunate fault in McIntosh that they frequently become brown at the core during the latter part of their storage life. The fact that such apples appear sound when purchased creates a feeling of deception in the mind of the purchaser. This state of affairs has a very depressing effect on apple sales.

Gas storage gives promise of correcting this condition. The higher temperatures and the gas concentrations used in gas storage controls the onset of this internal core disorder, thus extending the storage life.

Gas storage consists of placing the apples in a refrigerated airtight room. For the McIntosh variety, the temperature is controlled at 39 to 40 degrees F. The normal breathing of the apples results in a depletion of the oxygen and an increase in carbon dioxide. The concentration of these gases is controlled at an experimentally determined level of five per cent carbon dioxide and two and one-half per cent oxygen. Storing apples under such conditions is referred to as gas storage.

Operating and construction costs are higher for gas storage than the conventional refrigerated storage. Because of this it should be restricted to a very small percentage of the crop. Nevertheless a storage unit could profitably have 10 to 15 per cent of its McIntosh capacity converted to gas storage.

Gas stored apples would satisfy a demand during January, February and possibly March. At this time of the year refrigerator stored McIntosh Apples will have depreciated through the onset of core damage.

To export this valuable metal which is most essential for the conduct of defence production. Incidentally, Mr. Howe did say that he has found the producers willing to co-operate and, so far, has had no need to resort to the exercise of the powers with which he is now armed and which he seeks to extend for an unlimited period. The Conservatives have filibustered on this bill for several days and, at the time of writing, they threaten to continue for as many more days as they have speakers available to take part in the debate.

Cristante In Starring Role in Win at Kelowna

	P	W	L	Pct.
Summerland Macs	10	8	2	.800
Oliver OBC's	13	10	3	.769
Kamloops Okonots	12	7	5	.583
Penticton Red Sox	11	6	5	.545
Kelowna Orioles	11	3	8	.272
Vernon Canadians	11	0	11	.000

Two home runs and a thrilling relief pitching job in the final inning made Don Cristante the outstanding figure in Kelowna Sunday afternoon when his performance paved the way to a 7-6 victory for the Macs — their eighth in 10 starts.

Cristante took over on the mound in the ninth after Billy Eyre had hit one batter and dished out two doubles and a single to let in two runs and with only one out, and two men on bases, Kelowna needed but a single run to tie up the ball game. Cristante made it even more interesting by hitting the first batter to load the bases, then went on to strike out the next two.

The Macs took a long lead early in the game with Hooker and Gould scoring in the second, then three more were added in the third when Cristante belted his first circuit clout with Eyre and Hooked on bases.

Orioles started closing the gap in the fifth with a pair of runs by Trites and Wickenheiser and then Lingor and Kiellusk added two more in the sixth. A two-base hit by Billy Eyre in the eighth set the stage for Cristante to wallop out his second homer and make it a total of five runs bated in for the game.

Macs went through their full stable of chuckers, starting out with Alan Hooker, switching to Billy Eyre in the seventh and finishing up with Cristante for the breath-taking finish. Orioles collected two hits off hooker and four off Eyre while Ball, who went the distance for Kelowna, gave up seven hits. Orioles played smoother ball with only two errors while Macs were guilty of five flubs.

Suspend Drossos For Two Games

Unless they meet in the playoffs, Macs will hear no more this season from Penticton Red Sox' mouthy manager Sam Drossos. For his actions here in the June 19 baseball fiasco, Drossos has been suspended for the two games yet to be played between Summerland and Penticton.

Following is the text of the wire received from Francis:

"In an official statement following the Okanagan Mainline Baseball League executive meeting held in Kelowna Wednesday, June 29, President Harry Maralia stated that (1) since no official protest was lodged by Penticton Red Sox against Summerland Macs June 19, that the umpire's decision be upheld and the game awarded to Summerland by the score of 9-0; (2) After careful deliberation, that playing coach Sam Drossos of the Penticton club receive a two-game suspension for his actions displayed on the playing field which led to forfeiture of the game to Summerland, suspension to be in effect Wednesday, July 15 — Summerland at Penticton — and August 10 — Summerland at Penticton; (3) That umpires-in-chief and base umpires maintain a strict hold of all league games in order that a recurrence of this type does not happen in the future.

Rain No Deterrent To Range Devotees

Rainy weather Sunday morning dampened everything except the enthusiasm of eleven marksmen who turned out to the regular weekly practice at the rifle range.

Very good scores were made by junior and senior members with George Dunsdon still in top place, scoring 98 out of 105. Scores of the 10 other contestants were: A. McCargar, 96; Len Shannon, 95; Ted Dunsdon, 91; Steve Dunsdon, 88; Ray Blagborn, 82; Dick Dunsdon, 72; Cliff Dunsdon, 67; Wayne McCargar, 57; Cliff Shannon, 63; Ron Dunsdon, 23. One range only.

It is hoped that enough members will attend the Kamloops invitation shoot next Sunday to enable the club to enter at least one team in the competitions.

Yvonne Cousins, Walt Cousins and Ron Taylor, members of the Summerland Rifle Club turned in some excellent shooting at the B. C. Rifle Association annual competition, held last week on Blair Range in North Vancouver.

Leadership at Stake In Game Here Sunday

OMBL leadership will be challenged here on Sunday when they meet Oliver OBC's at Living Memorial Park. A win for Oliver will edge them into the lead and drop the Macs to second place. Oliver is the only team other than the Macs to top the league this year.

The OBC's have played 13 games and lost only three. In two previous engagements between these teams, honors were split with each winning their home games. Macs are determined not to give up their top spot to anybody so one of the best games of the season is promised for this week-end. Game starts at 2:30.

Skinner Tosses No-Hitter In First Time on Mound

Handling a pitching assignment for the first time, Don Skinner last Sunday turned in a performance for Summerland Red Sox that would make any veteran chucker envious. Skinner pitched a shut out to the visiting Hedley juniors and held them to four scattered hits during the game. And on top of that he accounted for one of the seven runs racked up by the locals.

	P	W	L	Pct.
Oliver	5	4	1	.800
Hedley	5	3	2	.600
Summerland	6	3	3	.500
Penticton	4	0	4	.000

After a slow start this season, the Summerland Juniors are now getting to know their way around and are rapidly closing the gap on the leaders in games that are matching the senior tilts for interest and thrills.

Of the 26 batters who faced him, Skinner struck out 10 and gave up only three bases on balls. Beel, pitching for Hedley, struck out eight and handed out eight free passes. The locals were charged with only three errors while four were credited to the losers.

Red Sox started their scoring parade in the second with tallies by Campbell and Bonthoux. Bugama brought home another in the fourth and Glen Parker, Bobby Parker and Hackman added three more in the fifth. Skinner finished off the scoring

with his run in the eighth.

"I love you I love you I love you!..."

...you great big beautiful Buick!"

This is it—the love affair of the CENTURY—the SPECIAL—the ROADMASTER—and the SUPER.

It all began last Fall, when '55 Buick made its bow to society. One look at the "years ahead" styling and stunning colors—and eyes met—hearts soared—thousands of Canadians said "Yes!"

Then came a whispered promise of great things from Buick's truly magnificent 188 hp or 236 hp V8 Engines.

Finally—out on a quiet highway—the moment came for the thrill of them all—the whip-quick go and gas savings of Variable Pitch Dynaflo* automatic transmission.

In a situation like this, who could resist? (To judge by sales, hardly anybody can.) So please—for your own sake—see your Buick dealer—very soon.

*Standard on Roadmaster, optional at extra cost on other Series.
When better automobiles are built BUICK will build them

Thrill of the year is Buick

KIWANIS KORNER

"Not bad, not bad at all, in fact very good," were remarks made by Kiwanians last Monday night after listening to Tommy Young tell some amusing stories (now ladies the stories were quite proper).

This was a refreshing change in our program and Tommy is always welcome.

By the way the only time I ever saw Tommy to be speechless was the time he was held up. A chap stopped him on the street and said, "This is a hold-up." Tommy saw one hand in the fellows pocket and wondered if it was serious, however, when the fellow took his hand out and showed him a safety pin, Tommy fainted.

Plans are well advanced for the Annual Kiwanis Street Carnival to be held in August. This popular event will be put on as only Kiwanis can stage it.

OUTBOARD MOTOR and BOAT INSURANCE

Cruising across a lake in an outboard motorboat represents hours of pleasure all summer long to many people.

You can protect the considerable investment in your boat and motor for a very reasonable premium against all risks of direct personal loss or damage, while afloat or ashore within the United States or Canada.

We have a competitive market for all your general insurance requirements.

Horticultural News Letter Reports Absence of Apple Scab in District

SUMMERLAND, WESTBANK and PEACHLAND

As reported June 27:—Since the issue of our last News Letter the weather has been mostly cool and cloudy. Three warm days occurred last week and culminated in a high of 91 degrees on June 22. A lightning storm followed and since then the weather has been unsettled. One of the heaviest rains to occur this year took place this morning.

With the exception of light crop apricots and some peaches, fruit trees are making good growth and fruit is sizing well. The thinning of peaches and Bartlett pears is now in progress.

Very few mites have been seen so far. Some green aphids have been showing up on peaches and apples, but the infestation is not as serious as last year. Cherry aphids are not serious as yet. Growers are getting ready to apply the second codling moth spray. So far this season no apple making scab has been seen. Fire blight is not showing up as yet. Powdery mildew is in evidence on apples but the infestation is lighter than last years.

Hot house tomatoes are moving in volume. Field tomatoes are making good growth despite the cooler weather. Strawberries are ripening and some harvesting has already been done.

PENTICTON-NARAMATA, HALEDEN-OKANAGAN FALLS, KEREMEOS-CAWSTON

As reported June 23:—Cooler, cloudier weather conditions have been experienced during the past two weeks and a heavy rain is falling as this letter is being prepared.

Growers have completed thinning apricots where this operation was necessary and are now thinning peaches, pears and, in some cases, apples. All tree fruits have developed rapidly and are of very good size considering the lateness of the season. There is a continual drop on cherries but, while the crop is very spotty, it is expected that tonnages will be similar to those in 1954. Appears unlikely that Bing cherries will be ready before the middle of July.

Asparagus is over in the Cawston area. Harvesting of this crop was interrupted when some of the fields were partially flooded. Tomato plants have progressed satisfactorily but warmer weather would be beneficial.

Growers are now starting to apply second cover sprays. Actually, the insect and disease situation has not, so far, been too difficult to cope with although pear psylla and leaf roller have caused some concern recently and aphids on cherries and apples are just starting to build up.

OLIVER and OSOYOOS

As reported June 23:—During the past two weeks the temperature has been mostly in the 70 and 80 degree range. A quarter of an inch of rain fell on June 25 and it has rained quite heavily since five o'clock this morning.

Pear psylla and black cherry aphids are still the most prevalent insects. Green apple aphid has shown up on some of the young trees and two spotted and red mites have necessitated sprays on a few places. A little fire blight has shown up during the past two weeks. To date no apple scab has been noted. The cherries are, at present, turning color with a few Black Tartarians and Carnivals appearing on the fruitstands. Blings and Lamberts appear to be sizing quite well. Deacons at the moment are quite small and there is little doubt as to their making good size.

A few cucumbers have been picked but no volume is expected this week. Early potatoes are now in flower. The tomato plants look quite good and a few tomatoes are expected about the time of the next news letter.

From Salmon Arm to Kamloops the apple crop is showing a fair crop generally. Prune crops look promising but cherry yields will not be as good as earlier prospects indicated. Even so, the yield should be equal to that of last year or better.

Tomato fields at Kamloops and Ashcroft are picking up after the severe set back of early season cool weather. Other vegetable crops are now making a fair showing for the most part. So far there has not been any serious outbreak of pests or diseases. River levels are at a high point, and could cause serious damage if waters rise much higher.

**ARMSTRONG, VERNON, OYAMA
OKANAGAN CENTRE and
WINFIELD**

As reported June 23:—Since our last report the weather has been cloudy and cool with the excep-

tion of the period of June 20, 21 and 22nd when it turned quite hot and the temperature rose to 94 degrees. On the evening of June 22 the Vernon area experienced one of the worst thunderstorms in many years. Power lines were put out of commission and scattered hail fell in the Bella Vista area which broke glass in many greenhouses. This storm was accompanied by strong winds and heavy rain with the result that several fruit trees were blown down in the Bella Vista and BX areas. Some roads were blocked by fallen trees. There has been considerable rain during the past week.

Tree fruits are sizing satisfactorily and growers are busy thinning pears, peaches and early apples, and a few growers have started to thin McIntosh apples. Some growers who reported very little fruit left after thinning sprays now report a good crop and in many cases will have to hand thin. McIntosh apples generally look very good but some Delicious blocks have had quite a drop and some blocks appear to have quite a light crop. The overall apple crop will be quite good and possibly up a little from 1954. The prune crop looks very good at present and trees are in fairly good shape. Local strawberries are now on the market and picking should be general this week-end.

Vegetable growth is now quite rapid and there is quite a good movement of early vegetables. The first car of lettuce left the Armstrong area on June 20, slightly behind the previous season. The peak of the early lettuce crop should be reached this week. Celery in the Armstrong area is now making good growth. The first car of cabbage went out of Vernon on June 25. The spinach and asparagus season will be over by this week and tonnage was down slightly from 1954 but quality has been very good.

Farm crops in general are making good growth, and haying is more or less general throughout the district when weather permits. The dried pea acreage is up from 1954 and fields have improved considerably with the rains of the past few days.

Green aphid is causing concern to some growers and codling moth emergency has been spotty. Apple scab is now beginning to show in some orchards and many growers at present are applying scab sprays.

KELOWNA

As reported June 23:—The weather since the last report has been much cooler with the exception of the occasional hot day. Of most significance are the rains which occurred on June 23 and 24th and more particularly June 28th. It is quite possible that a new lot of apple scab infections occurred as a result of these rains.

All tree fruits are making good growth and fruit is sizing well. McIntosh thinning is not yet general since the drop is not finished. There is a great variation in size of fruitlets and growers are hoping the small ones will drop. The prune crop prospects are good. The set is heavy and the trees are in good vigour. Bartlett pear thinning is well under way. Both the Bartlett and Anjou crops look good. Apple scab has shown up in a few McIntosh blocks and the recent rains caught several growers

Predicting Size Is Major Project

A heavy bloom and a heavy set on peach trees and a crop estimate after June drop do not necessarily indicate the size of the final crop to be harvested. This is, according to D.V. Fisher, Summerland experimental station, Canada department of agriculture, because factors such as heaviness of thinning, vigor of tree and adequacy of irrigation may all play important roles in determining final fruit size. Moreover, there is the uncontrollable factor of weather which must always be taken into consideration. It is for these reasons that estimates of the peach crop made a month or six weeks ahead of picking frequently do not reveal the true volume of fruit to be marketed.

British Columbia Tree Fruits Ltd. a project was set up two years ago to study the rate of sizing in peaches throughout the growing season in an effort to determine whether peaches of a given size at a given number of days after full bloom could be expected to reach a definite size at harvest. It is probably the size of the actual peaches themselves that is the most disturbing factor in planning a sales program. Thus if the sales program is based upon offering peaches of sizes anticipated to run between 50 and 55 per crate the volume of fruit to be handled is reduced and the smaller sizes may be less acceptable to the trade. The aim of this project is to determine whether peach size at the month or so from harvest can give an accurate indication of size when the fruit is picked.

Accordingly, 75 fruits from each of numerous trees of standard commercial varieties in different districts have been tagged and measured at regular intervals until picking maturity, starting at 50 days from full bloom. The peaches from each tree were divided into different size groups, and the growth rates of fruits within these groups determined. This information is available for only the 1953 and 1954 seasons, both of which were rather ab-

normal. It is considered this work will need to be carried on for at least one and possibly two or more years before the large volume of data which have been accumulated can be intelligently interpreted.

without a recently applied protective spray. A few codling moth entrances have been noticed. Most growers have completed the second cover spray for codling moth and many now are applying further protective sprays for scab. Mites and aphids are not troublesome except where a dormant or pink miticide spray was omitted. Vegetable crops are responding well to the generally warm weather and frequent showers. Head lettuce, bunch onions, spinach, bunched beets, early cabbage and a few cauliflower are being harvested at the present time. Asparagus shipments are winding up, with the canners reporting some of the best asparagus in years. Hothouse tomatoes and cucumbers are moving in fair volume. Pole beans, which got away to a slow start, are now climbing and field tomatoes are holding the first truss of fruit. Fall-planted onions are sizing well. Most fields of spring sown onions appear to be retarded, many fields having suffered from dry soil conditions earlier in the season. Peppers and the vine crops are moving very slowly.

Aphid and mite activity on vegetable crops is at a minimum. Root maggots have been troublesome in onions and cabbage, while flea beetles and thrips have shown in some vegetable fields but have been easily controlled. Only one case of onion mildew has been observed.

Arbitration Board Upholds Trustees

Arbitration board hearing the seniority dispute between School District No. 77 and the OK Valley School Employees' Union has thrown out the case of James Wilson. Decision of the board was contained in a letter from the Chairman F. M. Clements which stated:

"The board is of the opinion that there has been no discrimination against an employee on the part of the school trustees and consequently uphold their action in appointing Mr. C. A. Gayton."

In a minority report submitted by union appointee to the board, George Snowdon stated: "The fact that Wilson has been re-hired many times would indicate that he is satisfactory and capable of doing his duties. In my opinion the only valid reasons put forth for not giving the job to Wilson are two: His disability through his poor hearing and his age. Now he has corrected the first cause by purchase of a hearing aid.

normal. It is considered this work will need to be carried on for at least one and possibly two or more years before the large volume of data which have been accumulated can be intelligently interpreted.

Will Call For Tenders On Ice Making Equipment

With tenders being called this week on the installation of refrigeration equipment to produce artificial ice for the Summerland Arena, Rink Association officials are preparing to call for volunteers to carry out preliminary work of spreading shale and laying a base cement floor.

The call for tenders by the municipality is only to obtain definite figures on which to base the by-law which will be voted on about the middle of September and award of contract will be contingent on the passage of the by-law. Imbedded in the cement floor will be 40,500 feet of polythene plastic pipe. Specifications call for the spreading of not less than eight inches of shale and over this four inches of concrete on which the pipe will be laid and covered with another inch and three-quarters.

Also needed are an engine room of concrete blocks, ice shaving disposal pit, concrete footings along the east wall for future erection of bleachers and new boardings around the ice area.

Job which is to be undertaken by the Rink Association is to move an inside wall five feet to allow for more seating on the east side of the rink, then lay shale and concrete.

School Trustees Study Resolutions

General meeting of the Okanagan Branch of the B.C. Trustees Association was held Wednesday afternoon in the Summerland High School.

About 30 delegates were present, coming from Revelstoke in the north to Oliver in the south, also from Princeton and Keremeos.

Purpose of the meeting was to consider resolutions to be presented to the provincial convention to be held at Qualicum in September.

Presiding at the meeting was C. T. Hubbard, chairman of the Kelowna school board.

During an intermission, delightful refreshments were served by the hospital Ladies' Auxiliary.

BAND GRANT
 On Tuesday the Council approved the annual grant of \$150 to the Summerland brass band.

Anglican Fete Again Popular Summer Event

Amidst a profusion of gay summer flowers in the beautiful St. Stephen's rectory gardens Wednesday evening, the annual garden party of the Women's Auxiliary proved to be a huge success.

Colored lights lent a soft glow to the pretty scene as members of the Summerland band played a background of musical selections. Tantalizing odors of barbecued hamburgers enticed the many guests to the refreshment corner. On the menu for the evening were delicious strawberry shortcakes smothered in whipped cream home-made pies, hamburgers, ice cream, lemonade, tea and coffee.

The garden party also featured candy, corsage and home cooking stalls, pony rides, fish pond, parcel post and a number of games.

General convener for the event was Mrs. J. Y. Towgood.

Committee looking after flowers was made up of Mrs. E. C. Bingham, Mrs. W. Snow, Mrs. B. T. Washington, Mrs. E. F. Weeks, Mrs. E. Wilson, Barbara Baker and Anne Macleod.

Staffing the fish pond were Mrs. A. J. Berry, Karen Sinclair, Sunny Boyd, Valerie Myles, Vicci Cuthbert, Pauline Cooper, Carol and Isabel Reinertson.

Mrs. W. Snow was in charge of the parcel post while Mrs. J. M. McArthur handled the lemonade and Miss Gwenneth Atkinson was in charge of ice cream.

Directing the pony ride concession was Mrs. W. G. Gilard, assisted by Diane Gillard. Hamburger sales were handled by Mrs. J. A. Heavysides, Mrs. A. Dunsdon and Mrs. R. Barkwill. Kitchen staff was made up of Mrs. C. Adams, Mrs. W. Baker, Mrs. M. Robertson, Mrs. F. Dunsdon, Mrs. W. Birtles and Miss M. Clark. At the serving table were Mrs. E. Skinner and Mrs. B. T. Washington. Candy sale was taken care of by Mrs. H. L. Sinclair and Mrs. F. Beavan.

In charge of the home cooking stall were Mrs. T. B. Lott, Mrs. D. Turnbull, Mrs. E. C. Bingham, and Mrs. E. Wilson. Serving at the tea tables were Mrs. W. F. Evans, Mrs. J. P. Anderson, Mrs. A. Munn, Mrs. A. W. Watt, Mrs. E. F. Weeks, Anne Beggs, Pat Morrow, Carol Krause, Beryl Wiggins and Barbara Beaver. Tea money was handled by Miss Elizabeth Theed.

Advertising was handled by Mrs. A. Moyles and posters by Mrs. V. Hockley.

Robert Murphy, U. S. deputy under-secretary of state; Canadian, Ambassador A. D. P. Heeney; Gerard C. Smith, special U. S. assistant to the secretary of state, and Lewis L. Strauss, chairman of the atomic energy commission, are shown as they signed agreements providing for the free exchange of information on peaceful uses of atomic energy at a ceremony in Washington. Facts signed by Canada, Belgium and the U. S. brought to virtual completion the first phase of the global atomic pool plan presented to the U. N. by President Eisenhower in December, 1953.

Hospital Auxiliary Enjoys Annual Outing

Hospital Auxiliary held its annual party at the Experimental Station Tuesday evening, July 5. A delicious picnic supper was served by the executive, after which singing and games were enjoyed, members being treated to a preview of what can be expected when television finally reaches the Okanagan.

Mrs. C. Adams and Mrs. F. E. Atkinson ably portrayed the many characters in a local version of IV's "Masquerade."

During the evening a souvenir spoon was presented to Mrs. Frank Daniels who is leaving Summerland to take up residence in Vernon.

No. 3 Cherry Pack Will Save Growers Serious Loss from Rain Splitting

Because of the large percentage of cherries showing horse-shoe splits resulting from the excessive rain, permission has been granted to market No. 3 cherries this year which will mean a considerable financial gain to growers.

No. 3 pack will be orchard run and may include fruit with small dry crescent splits at the stem end.

Tree Fruits stated today that overall damage to the cherry crop is about 10 percent although some growers have suffered extensive loss.

The marketing agency reports trade comments on cherry deliveries so far this week have been favorable and judging from these reports, the cherry deal is away to a good start. With favorable weather, deliveries are increasing daily and if there is no set-back, peak volume is expected to be reached around the latter part of next week.

Heavy deliveries of cucumbers anticipated for the early part of this week have not materialized and the present supply position is short. With the continuance of fine weather, however, the volume is expected to reach substantial quantities soon. Manitoba cucumbers have made their appearance on the Winnipeg market and volume deliveries are forecast for the early part of next week.

Demand for cabbage on the western Canadian markets is slow with prices unsteady and Manitoba, coast and interior supplies exceed the demand.

First carlots of new potatoes are expected to move from the Oliver-Osoyoos area on Saturday. Latest reports indicate that most of the interior potato crop is making good growth and the quality at the time of shipment should be satisfactory.

weather, however, the volume is expected to reach substantial quantities soon. Manitoba cucumbers have made their appearance on the Winnipeg market and volume deliveries are forecast for the early part of next week.

NO RENT REDUCTION

The council, on Tuesday refused a request from Chester Reinertson to have a pasture rental in Prairie Valley reduced from \$30 to \$20.

INTERIM PAYMENT

A request from Summerland General hospital requesting a building progress grant of \$300 was approved at the Council meeting Tuesday.

Mrs. A. Soderberg of Penticton has bought the old Laidlaw home. She will make her home here with her family.

Present occupants of the house, Mr. and Mrs. Dave Turnbull will make their future home on Vancouver Island.

The Sisters of Charity, Sister Joan of Kelowna and Sister Regina of Seattle are guests at the home of Mrs. Anna Wolfe for two weeks while they are teaching summer school to the children of the church of the Holy Child

'Weather We Used to Have' is Back ... And It's Likely to Get Hotter

Silenced during the past few days have been all the people in Summerland — about 90 percent of the population — who for the past three months have been wondering what became of the wonderful hot summer weather that used to prevail in the district. For the past few days its been right here. Tuesday, thermometer registered just above 90, Wednesday it was up to 94 and today it has been clocked variously between 96 and 98 with one report of 100 degrees in the West Summerland area. And it's likely to go higher tomorrow!

Second Meeting Next Friday Night Will Advance Plans For Jubilee

First action was taken last Thursday night at laying plans for a monster celebration in Summerland next year to mark the 50th anniversary of the incorporation of this district.

Only action taken by the meeting called last week by Reeve F. E. Atkinson was to appoint a nominating committee to bring in a proposed slate of names to make up a steering committee for the celebration and this steering committee when named will take on the job of planning all phases of the event.

Report of the nominating committee will be heard at a second meeting to be held next Friday evening in the municipal hall. Invited to attend this meeting are representatives of all organizations in the community as well as any interested citizens.

Nominating committee appointed last Thursday night is made up of H. J. R. Richards as chair-

man, Lorne Perry, Mrs. A. W. Vanderburgh, Eric Tait, Alf McLachlan and Ken Boothe. Chairman of the meeting was Reeve Atkinson.

APPROVE FRUIT STAND

A request from S. Uegama to build and operate a fruit stand on the corner of the Lutheran church property was granted by the Council Tuesday. Proviso in the approval is that the building erected is movable and that the church is agreeable.

PASS ACCOUNTS

The monthly accounts for the month of June passed Tuesday by the Municipal Council totalled \$28,828.28.

Speed Blacktopping While Weather Good

Councillor Barkwill Tuesday reported the blacktopping on station road is now completed and that a start had been made on the hospital hill. He also said that the road crew were working overtime mixing blacktop so that as much as possible can be completed while the weather is good.

He mentioned also that some roadside mowing was being carried out where necessary.

Province Trying to Welsh On Surfacing Promise

Ire of municipal councillors was raised Tuesday by a letter from the provincial highway department renegeing on the promise to resurface the Giant's Head Road to compensate for the damage caused municipal roads while being used as detours during construction of the new highway through Summerland.

Council a few months ago was assured by highway department officials that all roads used as detours would be resurfaced when the contractor came in to lay the hard surface on the new highway. Tuesday, council heard a letter from Neil McCallum, highway department engineer, stating that it was not felt necessary to do a complete surfacing job on Giant's Head but only patching in the more seriously damaged areas.

Mr. McCallum stated that he had taken pictures of the road before the extra traffic was routed over it and claimed that study of those photographs has indicated damage to the surface not as severe as was anticipated.

Councillors, however, were unanimous in the opinion that whether damage has been extensive as anticipated or not, they are not prepared to let the provincial department waltz on its original promise and are insisting that the entire stretch of Giant's Head be re-

Fun For All the Family Promised By Rotarians at Saturday Carnival

Fun for all the family is promised by Rotarians for Saturday night at the Swim Class Carnival to be staged at the Living Memorial Playground.

Program will get underway at 7 p.m. and a full evening of entertainment is planned with variety show, bingo, concessions, refreshment stands, band music and a grudge match on the Kiwanis outdoor checkboard.

In attendance will be the Summerland Band to provide music for the occasion and variety acts will be staged at intervals during the evening from the band stand.

At 8 o'clock, former checker player Tommy Young will seek satisfaction from the editor of The Review for remarks he considered slighting remarks about his ability at the game. In order to circulate statements free from challenge, the ex-checker player is

using advertising space in this week's paper to set out rules for the match and utter a few caustic remarks reflecting on the ability of his worthy opponent.

Proceeds from the carnival Saturday night will be used to defray costs of providing free swimming lessons to nearly 200 youngsters of the district.

In charge of arrangements for the affair is Gordon Beggs and working under him committees on which are serving all members of the Summerland club.

Also on Saturday to boost swim class funds will be the annual tag day collection under the direction of Dr. H. R. McLarty.

MAY SUBDIVIDE

At Tuesday's council meeting permission was granted to Mrs. M. T. Laidlaw to subdivide a 100 foot lot on Hastings street, into two parcels of 40 and 60 foot widths. The request was made through her solicitor, Wm. Gilmour.

Hundreds of workers, representing dozens of specialized trades, are putting the finishing touches on the 24,000-ton Canadian Pacific liner "Empress of Britain" in readiness for her maiden voyage in the spring of 1956. Launched June 22 by Her Majesty Queen Elizabeth at Govan on the River Clyde, the newest of the Great White Empress fleet is now being outfitted at the quayside. Of modern design, the vessel will carry 1,050 passengers on her North Atlantic route between Liverpool and Montreal.

Have Fun Saturday Night Rotary Swim Class Carnival

By O. L. JONES

The government has appointed a small committee to review and advise upon certain technical questions relating to the administration of the sales tax. Three well-known Canadians have been appointed to look into the matter. The terms of reference for this committee are, briefly:

1. To examine the problem arising under sales and excise taxes where manufacturers sell to customers at different levels in the marketing process and to make recommendations for a definition of a tax base or statutory method of administrative practice designed to equalize approximately the tax payable on goods of like value.

2. To examine the question of appeals from taxes imposed under the excise tax act and make recommendations with regard hereto.

3. To examine the problem arising under sales and excise taxes with regard to the tax payable by importers of goods and that payable to manufacturers in Canada of goods of like value when sold to customers at different levels in the marketing process and to make recommendations with regard hereto.

4. To examine the system of exemptions for goods based upon the use of such goods and recommend any changes which may achieve greater simplicity and certainty without substantial loss of revenue.

The committee is composed of a chartered accountant, a lawyer and a senior officer of General Motors of Canada. Clarey Gillis, member for Cape Breton South, asked that representatives of those who pay taxes generally and, in particular, the labour unions should be added to the committee. Mr. Harris pointed out that the committee was dealing with methods to improve the administration of the present act. The question of whether or not a sales tax ought to be paid and who should pay it is a matter for the government and parliament to decide.

The government have been negotiating the sale of 10 million bushels of wheat to Poland for approximately \$19 million. This should please the farmer whose stored wheat cannot find any other market. Mr. Drew, on the other hand, objected to making a deal of this type with countries behind the iron curtain. He compared this deal with the Ming Sung transaction by which the government stands to lose \$13 million under a similar guarantee. The Ming Sung transaction was a transaction whereby China purchased ships from Canada on the promise to pay, at a defined time, but the communist government, on taking over control of China, refused to honor the commitments respecting these ships. However, the prime minister pointed out that this sale was made in good faith on the world market and that he was dealing with a people who needed food, particularly food that Canada had in excess.

Canada's surplus wheat is still a problem. Many felt that the recent floods and bad weather conditions on the prairie would appreciably curtail this year's crop thereby lowering the carry-over of surplus wheat. However, the reports coming into Ottawa at the present time would indicate the prairie provinces may produce another bumper crop providing the harvesting season is not cut short by early frost.

The minister of finance placed the report of a special committee on procedure before us. This committee's report has been adopted unanimously by the committee members composed of all political groups. In spite of this unanimity in committee, there appears to be strong dissatisfaction among private members, particularly the so-called "back benchers." Their main complaint is the curtailing of the speech from the throne and the budget speech. On these two occasions, a member can speak on any subject he chooses. Usually, the situation in his own riding gets an airing. This custom has prevailed in the British parliament for generations. What actually will happen if the plan goes through is that some members will lose their only opportunity to discuss their own domestic problems. Indications are that the proposals set out by the committee will definitely be accepted and this should out the life of the session by three to four weeks.

As I am dictating this letter, the prospects of closing within a week are not very bright. The Conservatives seem determined to carry out their filibuster while they have any speakers to spare.

Mr. Nicholson and Mr. Regier objected to the passing of certain

Not Fair to Fans . . . they're entitled to a show.

Right now there are a lot of baseball fans in Summerland and those who witnessed last Sunday's game came away with a feeling of disappointment at the lacklustre performance put on by their favorite baseball players. The Macs certainly showed none of the skill that has kept them at the top of the league practically all season.

There was a good reason for poor showing Sunday. The boys were tired out from an exhibition game the night before in Princeton. We are told they played a good game of ball there — they won the game — then were entertained after the game and next came the long drive home. All of which seems fine — for everybody except the Summerland fans who donated their money expecting to see hot action from their team.

When we start criticizing a team of amateur players for their actions, we're skating on pretty thin ice. They turn out regularly for their games and have worked their hearts out all season to keep the team on the winning side of the ledger pretty regularly and what they do on their own time should be their own business.

BUT the ball team has appealed all season long for community support by way of attendance

at the games and so far the attendance has been pretty good. They have earned that attendance by producing a brand of ball worth seeing and they will lose it just as fast if they let down the bars now and think they can coast the rest of the season.

We've been pretty proud of our team this year. They have done a good job but if they want community support, we suggest that in all fairness that henceforth they plan their exhibition games for some time other than the night before an important league game at home.

By LEWIS MILLIGAN

"Thanks to Inventors" is the title of a new book by Prof. A. M. Low, published by the Lutterworth Press, London, England. I have just come across it in our local public library and found it one of the most fascinating and up-to-date informative books I have read in a long time. If I could afford it I would present a copy to every home, urban and rural, in Canada, and I could guarantee that it would be read by every member of the family. The brief introduction is in itself a masterpiece of condensation and leads on a narrative of human progress that is more exciting than any detective story or romantic novel.

The story is not only of the past, it deals with and describes the results of inventions in the living present; in the home, in the office, the factory and every department of human activity — from when you wake up in the morning till you go to bed at night. The inventor has transformed domestic life, as indicated by such chapter headings as — "In the Bathroom," "When we Dress," "In the Kitchen," "In the Living Room," "Hearing and Seeing the Radio," "Visiting the Doctor," etc.

In the chapter dealing with "When we Dress," the author takes us back to the time when thousands of men and women earned less than a bare living by "sweated labor" stitching long days and often into the night, as was pathetically told in Hood's famous poem, "The Song of the Shirt." It might be thought they would have welcomed any invention to eliminate that drudgery. But those sweated and poorly paid workers smashed the first sewing-machine, fearing they would be put out of employment. The unfortunate inventor saved one machine, took it to his home town and exhibited it as a curiosity!

In case we should flatter ourselves that our attitude towards labor-saving inventions is more enlightened today, Prof. Low says, "We should remember that certain unloading machines which could relieve much hard labor in portering have stood idle because the dockers refused to make use of them. Fear of unemployment has caused some workers to allow the use of labor-saving machines only on condition that those whose labor is saved should also be paid." That same fear is behind the demand for the Guaranteed Annual Wage, with payment for not working.

"If everybody adopted the same attitude there would be little work to do at all, because there would be no goods to unload," says Prof. Low. He declares that "the idea that labor-saving inventions became important." In practice the machine has caused unemployment is a fallacy that has lingered from the eighteenth century when machines first sewed, which can sew as much in one created more employment. A good example is the hour as ten women could by hand. Yet today there are probably twenty times as many women using sewing-machines in factories as were formerly employed as seamstresses at home. A further example is the concrete mixer, the invention of which has created vastly more employment and better buildings and highways, not to mention the enormous growth of the automobile industry which would have been impossible without our paved roads.

The last chapter of this enthralling book is entitled "Making Life Easier," and it not only refers to the countless inventions that have relieved the "fantasy of the future." We are told that "in-labor and enhanced the life of today, but forecasts vention has no conclusion." The marvels of electronics and atomic fission have yet to be fully revealed. Prof. Low concludes: "Only a few years ago we had no television, steam engines, motor cars or aircraft, and it is logical to ask what will take their places in the book of the future when our descendants look back and say, 'Only in 1955 they had no What will be on that list?'"

Of Many Things

by AMBROSE HILL

VISION

I am going to tell you about a fellow that I went to school with. He lives in a small town, physically; but in a Big City, spiritually. He is rich. Not because he ever cheated; he is the soul of honesty. I had all the opportunities he had, but he had more vision.

Last month I met him on the Main Street of our home town. "Listen here," I said, "Let's go have a coffee together. I want to find out how you made yourself such a pot of money in a little place like this."

Settled in the coffee shop, he said, "What makes you call this place little? I think it's pretty big."

Big? My gosh it is less than a thousand, I protested.

He took a map and a pencil from his pocket. He drew a circle with a diameter of 60 miles. At least seven other small towns fell within the area of the circle. "I can be in most of those places in half an hour — about an hour and a half to the furthest. How long does it take you to get to work in the city?"

I confessed I was lucky to make it half an hour through traffic.

"You see," he said, a twinkle in his eye. "This is my city. I advertise to this whole area. I have outlets here and here . . ." He began putting X's within his circle with all the zest of a chain-store merchant choosing city street corners.

If you have vision you can look at a small town in a big way.

Mid-Week Message

Love your enemies, do good to them that hate you. (Luke 6:27. A.S.V.) Read Luke 12:4-7

The story is told of an Armenian girl whose brother was killed by a foreign soldier in one of the massacres of her people. She escaped a similar fate by leaping over a wall. She became a nurse. One day in the hospital where she was working she came upon a wounded soldier very near death. She recognized him as the one who had killed her brother.

She gave him the best care. When the soldier regained consciousness, he recognized her. Upon asking her why she had nursed him so carefully, she replied, "I have a religion that teaches me to do good to those who persecute me." The soldier was silent for a moment and then said, "I never knew that there was a religion like that."

Our world is still far from practicing the teachings of Jesus. Even those who follow the Master as the Lord of their lives find it difficult to love their enemies. But no matter how hard it may be, Christians are expected to do more than others.

PRAYER

O Thou our Lord, we praise Thee for Thy gracious and redeeming love to us and to all mankind. Forgive our sins. Help us to become more like Christ, and to love one another even as He has loved us. In His name, Amen

Letters to the Editor

The Summerland Review:
"You never miss the water, Till the Well Runs Dry."

This old maxim was on the lips of householders on the lake shore last week.

Now we have a new water main down town; I could not help but take note of the crew of men doing the job under rainy conditions and water seepage impeding the task; yet the work was done ahead of schedule.

If a person took time to linger a few minutes you could see that every man knew what to do and working in harmony with a look on their faces of interest in their work.

I took the liberty of complimenting the foreman for the excellent way the job was done, but he modestly stated the credit is due to the men under him. I would like to wish those fellows a dry shirt for the rest of the year and may they never strike a silver in their shovel handles.

Activities at Experimental Farm Recounted in Bi-Monthly Report

General — (T. H. Anstey)

The season remains two to three weeks late with minimum night temperatures remaining below the 40 degree mark for each week up to June 8. Temperatures for the second and third weeks in June rose with a maximum of 90 degrees in the third week. Since then, the weather has deteriorated with moderate precipitation.

In addition to the usual grower and industrial visitors to the station, several research men from outside the province have visited during the past two months. These include L. W. Miller, department of agriculture, Tasmania; I. L. Nonnecke, experimental station, Lethbridge, Alta.; C. E. Ste. Marie, Experimental Station, L'Assomption, P. Q.; Dr. A. W. S. Hunter, Central Experimental Farm, Ottawa; C. A. Eaves, experimental station, Fredericton, N. B.

Percentage Fruit Set in Apricots, Peaches and Cherries Necessary to Provide a Full Crop (S. W. Porritt)

Knowledge of percentage of fruit set required to give a full crop is useful to the fruit grower who practices some form of blossom thinning as well as to the investigators carrying out thinning experiments. In addition, this information is required for accurate prediction of crop following frost damage to blossom or fruit buds.

During the past two years numerous blossom and fruit set counts have been made on apricots, peach and cherry trees. From the work done thus far, the following general observations have been made. On trees carrying a well distributed, heavy bloom, a full crop will result if about 20 percent of the apricot blossoms, 20-25 percent of the cherry and 15 percent of the peach blossoms set fruit. These figures are subject to some modification for specific varieties and location on the tree, but may be considered applicable as a general guide.

Where blossom thinning of peaches or apricots is carried out by some manual or mechanical means it is important to note that not all the remaining blossoms will set fruit.

Extensive counts made in 1953 showed that after blossom thinning only 45 percent of remaining apricots and 75 percent of the remaining peach blossoms set fruit. It is acknowledged that a considerable number of flowers may have failed to set as a result of injury during the thinning operation. When blossom buds are killed during the winter it is probable that a considerably higher percent set would result from the remaining flowers.

N-1-Naphthyl Phthalamic Acid as a Blossom Thinning Agent for Peaches and Pears (D. V. Fisher)

This season a selective pre-emergence herbicide as Alanap-1 containing 90 percent by weight of N-1-Naphthyl phthalamic acid was tried as a blossom thinning agent for peaches and pears.

The material was applied at full bloom to Veteran peaches with a concentrate sprayer at the rate of 1.2 gallons per tree and using 800, 1200 and 2000 parts per million of the chemical. Intermittent rain fell for a period of ten days after time of application and yet no symptoms of leaf injury are apparent at the present time which is 42 days after full bloom. The set of fruit on chook trees is so heavy that 1.5 hours are required per tree to thin, whereas thinning of the sprayed trees can be completed in not more than 10 minutes. There does not seem to be too much difference in effect be-

tween the three concentrations, all of which caused slight to moderate overthinning. The difficulty can likely be overcome in future work by use of lower concentrations. The important feature about this material is that it thins peaches and does so without leaf damage.

The story is different with pears where Alanap-1 was applied to the Bartlett variety with a concentrate sprayer at full bloom at concentrations of 1000, 1500 and 2000 parts per million. These strengths proved far too high with the result that the trees were almost completely defoliated and almost all the fruit removed. New leaves now forming indicate the trees will show good recovery.

Ringling Can Shorten the Fruitless Period in Apple Seedlings (K. Lapins)

Bark ringling, as a means of inducing earlier bearing, was tested in apple seedlings in 1953 and 1954. When ringed, the seedlings were in their eighth year from seed. Further, scions of the Spartan variety were grafted onto a number of seedlings, with the intention of introducing flowering substances from the older variety into the seedlings. Comparable trees were left unringed as a check. The ringling was done in June, the effect of it was evaluated in May next year, by counting the blossom trusses per tree.

Figures indicate that bark ringling may shorten the fruitless or juvenile phase in apple seedlings for one or two years. The effect of ringling was most pronounced if the ringling was done a year or two before the natural breaking of the juvenile phase (1953 experiment). Ringling had no effect in very young seedlings and the effect was partly obscured in seedlings which had naturally attained the fruiting stage. (1954 experiment). Ringling effect lasted for one year only, and the trees which did not respond to the first ringling could be treated again. Since the operation takes only one to two minutes per tree, bark ringling can be considered as a practical measure of shortening the juvenile phase in apple seedlings. Grafting of scions of a variety onto the seedlings did not have a positive effect on formation of fruit buds in the seedlings. The apparent negative effect in the 1954 experiment could be partly attributed to the fact that in the grafting operation, a portion of the terminal shoot of the central leader of the seedling was cut off, and this part usually produces the first blossoms.

Vacuum Method for Frozen Apples (F. E. Atkinson)

The accepted method of preparing apple flesh for freezing up to the present has been to soak the prepared apple pieces for 25-30 seconds in solutions containing up to 4000 parts of sulphur dioxide supplied from sodium sulphite or potassium metabisulphite. This method requires considerable control in order to obtain a uniform sulphur dioxide content in the prepared apple, and has the disadvantage of causing corrosion in the bake oven. It is reported that the bake oven in which SO₂ prepared apples have been used continuously, have burned out from corrosion in three years.

In order to overcome these disadvantages an experiment was set up to determine if the vacuum method of preparing apple tissue as used for pie fillings and solid pack apples would be suitable for apples for freezing. This experiment has proved quite satisfactory and the resulting product was of such good quality that commercial men thought that a premium price

New president of the British Medical Association is Dr. T. C. Routley of Toronto, left, shown with Sir John McNee, retiring president. Dr. Routley is the first Canadian to head the British association, which is holding a convention in Toronto with representatives from Malta, Rhodesia, Pakistan, India, and Ceylon present.

could be obtained for apples prepared in this manner.

Apple Sectors Canned in Syrup (C. C. Strachan)

Three years ago the laboratory developed a satisfactory procedure for canning apple slices or sectors in syrup for dessert purposes. Recently a commercial packer expressed interest in this product. Further tests have been made of syrup packed apples using the Newton variety.

It was thought that if the apples were in cubes with a few red dyed cherries present, the product would be more striking. Cubing the apple was found to be impractical because of the extensive waste. Four or five red cherries per can did add attractiveness. The addition of a few cloves also markedly improved the flavor.

The packing procedure finally adopted was as follows: The apples were prepared in the usual manner and sectioned into pieces one-half inch and five-eighth inch in thickness. The apple sectors were placed in a vacuum chamber for five minutes at a vacuum of 25-28 inches. The vacuum was released with steam for two minutes. The sectors were then filled into 20 oz. plain cans (approximately 14 oz. of fruit per can). Five cloves and four erythrosine dyed cherries were added. The fruit was then covered with a 45 percent sucrose syrup and the containers exhausted to 160 degrees and cooked for 10 minutes in boiling water and followed immediately by water cooling.

Dairy Cattle (J. E. Miltimore)
The blood study which has been in progress for the past two years, has not progressed this season. Cool weather is considered as the main reason for the low incidence of blood on this station.

The Pacific Unit of the Animal Pathology division has reported one positive diagnosis of Vibrio foetus in the Summerland herd. Further tests are being conducted. Veterinary advice assures that adequate control and relief measures are available for this sterility and abortion problem.

An analysis of the blood and plasma copper content of the females in the herd shows a wide variation between animals. However, the copper content ranged well above a deficiency level. There is no apparent explanation for the marked variation.

Orchard Mowing Equipment (J. L. Mason)

Soil management in the orchards of the Okanagan is improving rapidly as a result of the 70 percent change-over from furrow to sprinler irrigation since 1947.

Orchard floors have been smoothed and lush cover crops, natural or seeded, thrive in the improved soil moisture conditions. If these cover crops are allowed to grow unchecked, there is difficulty in moving and working in the orchard. At first, cutter-bar mowers were used to keep down the growth but frequent hand clearing of old cuttings from the cutter bar was necessary and much time was lost.

In the last year or two, rotary mowers have appeared. Almost all of those used in the Okanagan are home-made and many different designs have arisen.

Two have been made by Experimental Farms, one for Summerland and one for East Kelowna. Both utilize used automobile rear-end assemblies with five-foot blades attached. One is wheel mounted on a used car axle and the other is power-lift mounted. Several similar mowers are in use by growers. Another type has an extension of the power take-off shaft ter-

divorce bills. They were determined that two very questionable divorces should not be granted and for that reason, they took the only course open to them, that is to talk the full hour devoted for the passage of these bills. By so doing, they prevented a conclusion being arrived at as the procedure in connection with these bills is that they must be discussed and passed or rejected within the one hour allocated for this purpose. Failure to do so at one sitting still allows them to be brought up a few days later when another hour is provided for private member bills. In the case of the divorce bills, there is a far deeper reason for the opposition. It is felt that parliament should not be responsible for the conduct of a divorce court without the necessary power of a judge to rule on the future of any children involved after the divorce is granted. Many members feel that this should be handled by a properly constituted court ruled over by a competent judge.

The organized trucking companies of Canada were permitted to present a brief to a committee dealing with "agreed charges" being granted to railway companies. By "agreed charges" is meant that a railway company can ignore any existing freight rate to enter into negotiations with any company for the conveyance of their particular freight at an agreed charge which would be lower than normal and, presumably, it would be lower than the competitive price that would be offered by trucking companies. Naturally, the truckers are afraid that this enabling power will allow the railway companies to wreck their organization because the agreed rates in the original bill are not subject to question. The minister altered the bill to meet the truckers wish to the extent that in the event of agreed charges causing distress to the trucking industry, they will now have access to the board of railway transport to make an appeal and produce evidence of any assumed distress that may be caused by the said agreed charges.

This will be my last letter for the current session and I wish to thank the press of the riding for splendid co-operation they have given to myself and the public who appreciate getting these weekly reviews. I wish also to thank the people who have so kindly written to me and who have taken the trouble to read the weekly report.

minating in V belt pulleys. Power is transmitted to two four-foot blades by twin V belts twisted ninety degrees. The owner of the machine said he could cover three times the acreage with it as he could with a six-foot cutter-bar mower. The increase is credited to faster movement and no stoppages to clear the cutter-bar.

A third type has three V belt driven blades cutting a total width of eight and one-half feet.

These rotary mowers shed the cut material, a marked improvement over the windrows left by cutter-bar mowers.

Banff, Alta., which has a winter population of 2,500, swells to 8,000 in the summer.

In 1953 C.P.R. snowplows worked a total of 127,193 miles and snow removal bills on tracks alone that winter amounted to more than \$2,000,000.

PAID ADVERTISEMENT

AN OPEN LETTER

It would seem that the only way to get anything printed in his newspaper without the two-bit editor adding his two-cents worth or twisting anything said to suit his own point of view is to buy advertising space and let him know that he doesn't get paid if anything is changed or added. That stops him!

The purpose of this public statement regarding the forthcoming challenge checker match is to clarify some of the issues which have been clouded by the distortions of the editor who is apparently trying to qualify for a job reporting ball games for the Pentiction newspaper.

It has been suggested that in the interests of peace that this challenge match be dropped but it has already gone too far for that.

Since I am the acknowledged champion, having won every game I have played on the Kiwanis checkerboard (That I have only played one is beside the point), and since the editor is an unknown in the checker world, (I have never heard anyone say he is good except himself) therefore I feel it is my right to lay down the rules which I outline herewith:

1. The match will take place on the Kiwanis checker board at 8 o'clock Saturday night during the Rotary Swim Class Carnival in Memorial Park
2. That dress be formal.
3. That the dispute be settled with one quick game.
4. That a judge be appointed who will act also as announcer and time-keeper.
5. That each may have only one second in his corner.
6. That there shall be no hitting below the belt or kicking the other fellow behind when he's bent over.

Methinks, from his last statement the editor is showing signs of weakening, inasmuch as he has hinted at the idea of having his infant son take his place. However, according to the rules, when a player has hurled a challenge such as he has done, he cannot substitute a better player than himself.

CHILDREN'S EDUCATION GUARANTEED BY SAVING GOVERNMENT ALLOWANCES

FAMILY ALLOWANCE CHEQUES CAN "BOOST" FOR FUTURE USE AT THE BANK OF MONTREAL

While your Family Allowance Cheques are intended, first and foremost, to help you pay for your youngsters' day-to-day expenses, other college courses later in life.

If you deposit every Family Allowance cheque for one child in a B. of M. savings account, there will be over \$1,300, including interest, in it by the time the age of 16 is reached, points out Ivor Solly, West Summerland's Bank of Montreal manager. And, through the years, this nest-egg will always be immediately available, should emergency or opportunity arise.

By this means you can do much to make sure that your youngsters will have every chance to earn a good living when they start their own career or when your orchard is passed on to them. If you can't manage to set aside the whole cheque, try to bank at least a part of it regularly. You'll find the practice will pay off in the future.

So, next time you receive your Family Allowance cheque, why not drop into the B of M and open a savings account in your youngster's name. When you do that, you'll be building security and opportunity into his or her future—and that gives any parent a wonderful feeling.

NIGHT CALLS Frank McDonald 8007 Lucile McKiligan 5642

Believe it or not... this could be you!

The man whose picture belongs here is not necessarily a celebrity or a leading citizen. Indeed, he might be any one of millions of Canadians.

How did so many people benefit their communities so greatly? Simply by insuring their lives! In this way, they set in motion a series of events which have far-reaching effects on themselves and their fellow-citizens.

Take for instance the new highways, schools, bridges, power plants, homes, hotels, hospitals and other important works now being built from coast to coast. Many of these projects have been financed with money which life insurance companies have invested for their policyholders.

Or look at the workers streaming out from some new industrial plant.

They may owe their jobs to life insurance policyholders who provide the money needed for investment in that plant's expansion.

Good health, too, is promoted by life insurance policyholders. Several important medical research projects, supported by life insurance company funds, are waging war against polio, heart ailments, cancer and other dread diseases.

But perhaps the life insurance owner's most important service is not any of these things. It is the way he provides for his family so that they will not be a financial burden to his relatives or the community.

So, if you own life insurance, be proud that in all these ways you're helping to make Canada a better land to live in!

AT YOUR SERVICE

A trained life underwriter, representing one of the more than 50 Canadian, British and United States Life insurance companies in Canada, will gladly help you plan for your family's security and your own needs in later years. Rely on him!

Captain of the Canadian rowing team that defeated a Russian team in England, Mike Harris, left, joins Coach Frank Read in a victory grin. Russia, winner of the Grand Challenge trophy at the Royal Henley regatta last year was expected to have little opposition this year. Canada's Vancouver Rowing club crew, from the University of British Columbia, won by a length and a quarter after trailing at the first of the course.

Trout Creek Church of God Setting For Wittke-Johnson Nuptial Rites

Trout Creek Community Church of God was setting June 15 for nuptials which united Dennis Leola Johnson, the daughter of Mr. and Mrs. A. C. Johnson, Summerland, and Ben Otto Wittke, son of Mr. and Mrs. Otto Wittke of Medicine Hat. Ceremony was performed by Rev. A. F. Irving, pastor of the church, assisted by D. L. Johnson, brother of the bride.

The altar was banked with summer bloom as a setting for the occasion and the bride, given in marriage by her father, was gownned in traditional white satin, lace inserts being set into the net skirt and the fitted bodice featuring seed pearl trimming and lily-point sleeves. Her fingertip veil was held in place with a net bandeau also trimmed with seed pearls. She carried a bouquet of pink rose buds and white carnations.

Her attendants were Rita Greber of Summerland and Evelyn Retzlaff of Penticton as bridesmaids and Myrna Johnson and Meiva Theisen of Penticton as flower girls.

The bridesmaids were gownned identically in net over taffeta, topped with bolero jackets and wore matching headpieces. Miss Greber in Mauve and Miss Retzlaff in pale green. They carried colonial bouquets of yellow carnations.

The tiny flower girls were in matching pink dresses of nylon tulle over net and carried pink carnations.

Groomsman was Wesley Johnson, brother of the bride and James towgood was usher.

Mrs. Harvey Johnson of Medicine Hat, sister of the groom, was pianist, and Mrs. Wesley Davis was soloist, accompanied by Mrs. Nell Theissen.

About 80 were present at a reception which followed on the lawn at the home of the bride's parents. Assisting to receive the guests, the bride's mother was wearing a navy sheer dress in red-gote style and navy and white accessories and a corsage of pink carnations. Mother of the groom was wearing printed nylon in shades of mauve and grey with pink and white carnations. grey accessories and a corsage of pink carnations.

Leaving on a wedding trip by motor to Seattle, the bride donned a powder blue summer suit of rayon baby cord, set off by white accessories. On their return, they will make their home at Trout Creek.

Out-of-town guests included Mr. and Mrs. Otto Wittke and Esther of Medicine Hat; Mrs. Jarvey Johnson, Medicine Hat; Mrs. Flemmer, Suffield, Alta.; Mr. and Mrs. D. L. Johnson, Lulu Island and Miss Marion Schwartz of Vernon.

Corporation of Summerland

Macs In Second Place After Loss To Oliver

Standing to July 10

	P	W	L	Pct.
Oliver OBC's	15	11	4	.733
Summerland Mac's	11	8	3	.727
Penticton Red Sox	12	7	5	.583
Kamloops Okonots	12	7	5	.583
Kelowna Orioles	11	3	8	.273
Vernon Canadians	11	0	11	.000

Summerland Macs Sunday gave up league leadership to Oliver when the southern players ran away from a local squad tired out after an exhibition game the night before at Princeton.

In two previous engagements, the Macs have split honors with Oliver but Sunday they were completely outclassed and there didn't even appear to be any reason why the two teams should be in the same league.

Eyre, Cristante and Hooker each

took a crack at chucking for the Macs but none of them were able to deliver anything the Oliver batsmen could tie into. All three had played in the Princeton game Saturday night and did not return to Summerland until a late hour.

Cristante led off and in three innings had given up seven hits, allowed five runs and walked one. Eyre took over and three innings later he had let in five more runs, been touched for three hits and walked six. Hooker tried his hand on the remainder of the game, gave out only one safety, walked three and allowed three runs.

Surprisingly enough, Macs were chalked with only two errors but three times they were caught in double plays.

From the fans' point of view, the Macs performance Sunday left a lot to be desired.

Mrs. Frank Plunkett Heads Fiat Lux Lodge

Fiat Lux Lodge, Summerland Branch of the Theosophical Society, held its first annual meeting on Friday at the home of Mr. and Mrs. Frank Plunkett and acting officers were all elected unanimously, with the exception of E. Wright who resigned because of pressure of other duties.

Members taking office were, Mrs. Frank Plunkett, president; Kurt Domi, Peachland, vice-president; Mrs. Roland Morgan, secretary; John Mohler, Peachland, treasurer; Frank Plunkett, librarian; Mrs. John Mohler, Peachland, councillor.

Miss Margaret Domi acted as installation officer. The library has recently been enriched by gifts of books from Miss Joan Morris, Federation Secretary; Hermes Lodge, Vancouver; Mrs. Edith Chesman, Besant Lodge, Victoria; Mrs. Edith Latimer, President Bellingham Lodge, Washington; Theosophical headquarters, Wheaton, Illinois and tional Lecturer, now resident in from Miss Clara Codd, International South Africa.

A letter was read from Alexander Logofet of Washington, D. C., thanking the lodge for a donation of \$15 toward the upkeep of the refugee camp Kolokinthou, near Athens, Greece, which has been adopted by the Theosophical Society.

Average weekly wages in Canadian manufacturing industries at Dec. 1, 1954, reached an all-time high of \$58.17.

HOME AGAIN

Mr. D. M. Wright and Wendy arrived home after spending two weeks at Buccaneer Bay. Mrs. Wright and two other children are staying for the summer.

Mr. and Mrs. K. E. Thompson spent three weeks in Edmonton to attend Mrs. Thompson's niece's wedding. They returned home with Mrs. Thompson's sister, Mrs. G. D. McRae of Edmonton and her brother and sister-in-law, Mr. and Mrs. N.V. Johnston of St. Mary, Ontario. They all went to Vancouver for a few days.

Squabbles Mark Junior Game Sunday As Hedley Takes 11-10 Victory

Trailing 6-0 in the third inning, Summerland juniors at Hedley Sunday put on a power drive to push into a 9-6 lead by the seventh, only to see the Hedley Ghosts turn on their reserves in the final two innings and snatch an 11-10 victory.

Fireworks nearly broke out a couple of times during the game and Red Sox came pretty disgruntled over the umpiring. At the beginning of the game, Hedley players refused to go on because Summerland pitcher, Don Skinner was not wearing a cap. This dispute ended suddenly when the Hedley manager was reminded that one of his players was not even in uniform when they played in Summerland a week ago but there had been no protest from the Sox. A cap was produced for Skinner and the game went on.

Next flare-up came in the bottom of the seventh when Summerland catcher, Bob Parker started to protest to the umpire over a strike call on him. He was abruptly ordered out of the game and when he continued to protest, Hedley manager came on the field and pushed him off while the umpire ignored the incident.

Skinner and Murray split the pitching chore for the Sox while McInnes, Bradley and Beale handled mound duty for Hedley.

The winners collected a total of 10 hits against 11 for Summerland: Summerland, 000 430 202 - 10 Hedley 006 000 032 - 11

Council Accepts Offer For Part-Surfacing Job

Sections of Summerland municipal roads used as detours during the construction of the new highway are to be resurfaced by the highway department and the remaining sections will be patched.

At the time the new highway construction started, Reeve Atkinson announced that the highway department had given an assurance that all municipal roads used as detours would be resurfaced when the contractor came in to surface the highway. Last week, however, the council was advised by letter from Neil McCallum, provincial highway engineer, that certain sections would not be resurfaced but receive only a patching treatment.

Councillors expressed themselves as determined to hold the highways department to the original promise and asked for a meeting with Mr. McCallum. That meeting was held sometime this week and according to an announcement by Reeve Atkinson, the council apparently has agreed to accept the lesser proposition.

The announcement by the Reeve was contained in a letter to the editor of The Review in which he charged this newspaper with printing an article last week which he branded "misleading" and an "unnecessary and unfair interpretation of this matter."

The arrangements with Mr. McCallum over what work is to be done by the provincial department were apparently worked out at a committee meeting of the council which was closed to the press so details of the discussions are not available.

Under the new agreement, the highway department will resurface the highway from the intersection near the Legion around Giant's Head to the top of the Sand Hill and patch the remainder of this road to Trout Creek Service station. The old lake shore and Peach Orchard road will be resurfaced while the road from the Lutheran Church to the shale pit will be given a seal-coat.

The earlier promise by the department of a complete resurfacing job was reported at the time to be a concession made when the council agreed to accept a level crossing at Peach Orchard, saving the department about \$300,000 on the construction of an overhead bridge.

Following is the letter received from Reeve Atkinson:

The Editor,
Summerland Review,
West Summerland, B. C.
Dear Sir:

In the years that I have been on the Municipal Council there have been several occasions when the Council was criticized for holding too many Committee Meetings that were not open to the press. This year we have endeavored to be as liberal as possible with news regarding municipal business.

For some weeks there has been a question as to how much Municipal road the Province would resurface. The discussion of this matter has been carried on in a friendly basis and it was certainly a shock to the Council to read your misleading article entitled "Province Trying to Welsh on Surfacing Promise".

The relationship between the Council and the various officials of the Provincial Public Works Department engaged in building the highway has always been the very best. You can well imagine the damage that was done by the unnecessary and unfair interpretation of this matter.

The ratepayers will be pleased to learn in spite of this castigation, Mr. McCallum has agreed to re-surfacing the road with a two and one-half inch machine-laid mulch from the intersection near the Legion, along Rosedale Avenue to Granville Road and thence around Giant's Head to the Atkinson entrance at the top of the Sand Hill. The road from this point to the Trout Creek Service Station will be repaired with machine-laid patches. The abandoned Highway through lower town and up Peach Orchard will be resurfaced, while that from the Lutheran Church west on Jones Flat and north to the shale pit will receive a seal-coat and surface treatment.

Yours truly,
F. E. Atkinson, Reeve

Flower Society Marks 30 Years Of Activities

In the beautiful setting of the experimental station grounds the Summerland Horticultural Society held a "birthday party" last Friday night. The occasion was the regular July meeting which marked approximately 30 years of continuous activity for the society.

Members of the society toured the station grounds before the meeting. During the business session the members heard a report that slightly over \$6,000 has so far been subscribed to the R. C. Palmer Memorial Scholarship Fund. The objective of this fund is to raise \$10,000 to provide an annual scholarship for graduate students in agriculture. The society decided to donate \$25 which will be augmented by donations from individual members. W. F. Ward is treasurer of this fund.

Plans for a garden trip to be held in August for members of the senior citizens club were discussed by the executive. This will take the form of a trip to three or four local gardens, and all details will be handled by the Horticultural Society.

Miss Doreen Tait read excerpts from the 1925 minutes of the society. Lew Wright gave a very informative talk on Gloxinias. He brought with him a large collection of potted Gloxinias which were greatly admired. The meeting concluded with refreshments, the feature of which was a large birthday cake.

Socred Organizer At Gathering Here

P. Paynter, first vice-president of the Social Credit League of Canada and assistant organizer, spoke to a fairly large number of the Summerland and Penticton groups last Tuesday evening. The group met on the lawn of the home of E. Miller.

Mr. Lloyd Miller, president of the group acted as chairman. After a few remarks the chairman called on Mr. Carter of Penticton who is the president of the Similkameen constituency. He told the group some of the things they have done and brought greetings from the Penticton group.

The chairman then introduced Mr. Paynter. Mr. Paynter told the meeting of the work there is being done all across Canada in organizing different groups. The membership, he told the meeting, is increasing surprisingly fast in every province.

At the close of the meeting Mr. Paynter showed moving pictures of some of the groups he has organized.

This group was very fortunate in having Mr. Paynter speak to them. Mr. Paynter along with Mrs. Paynter were visiting at the home of their son Murray who now resides in Summerland.

Scientists to Visit Station this Month

Canadian and American scientists in the fruit industry will be in Summerland and Penticton July 27-29 for the annual meeting of the Northwest Association of Horticulturalists, Entomologists and Plant Pathologists.

The convention base will be in Penticton but one day will be spent on a field trip to the Summerland experimental station where visiting scientists will have an opportunity to observe current experimental work being carried out there.

Attending from Summerland will be Dr. T. H. Anstey, J. L. Mason, Dr. D. L. MacIntosh, Dr. J. C. Wilcox, F. E. Atkinson, Stan Porritt, Dr. D. F. Fisher and Ralph Downing.

President of HEPP this year is R. P. Murray, former horticulturist at Penticton and now provincial horticulturist of Victoria.

Old Age Pensioners Guests of Kiwanis

On Tuesday afternoon, July 10 at 4:00 p.m. the old age pensioners held their regular monthly meeting in the IOOF Hall. About 55 attended.

At 5:30 p.m. the local Kiwanis club took them in charge and drove them up to the experimental farm where ice cream, soft drinks, tea and coffee was provided for them. They were brought back by the Kiwanis at 8:00 p.m.

Dr. A. L. Cornish

Dr. A. L. Cornish of New Westminster has been appointed BC - Yukon Contingent leader in charge of 475 boys and 58 experienced Scout leaders to the 8th World Jamboree at Niagara-on-the-Lake, Ontario, from August, 18-28.

Dr. Cornish is District Commissioner for New Westminster. He is an experienced Wood Badge Scout of over 15 years standing. The doctor is the Medical Officer at the George Derby Rehabilitation Centre for Veterans on the shores of Burnaby Lake.

There Must be Two, Alex's Still Loose

"Sheer coincidence" claims Alex Watt, that the day he appeared out driving a new car police arrested Alex Watt in Penticton on a charge of stealing a car.

"We're two different people", Alex insists, and apparently there is some truth in what he says, since he's still around and still driving the new car.

And for those who want further proof, he's willing to bring Vee Durnin around to swear that he obtained the car legitimately.

Trout Creek Residents Discuss Proposal for Two-Room School

About 25 residents of Trout Creek attended a meeting in the church hall on Monday to discuss the matter of building a school in the district. Also present at the meeting was School Inspector A. S. Matheson of Kelowna together with all members of the school board.

Inspector Matheson explained that the department of education is encouraging decentralization of schools where a rural district is considered to have sufficient population to justify a two-room or larger school. The department is loath to contribute towards enlarging a central school. Also, he said the government is trying to cut bus service to a minimum. Continuing he said that other rural areas within neighboring districts, citing Glenmore in the Kelowna district and several in the Salmon Arm district, are decentralizing.

In his experience, he said, the pupils got as good an education in rural two and three-room schools as did the pupils of the larger central schools with the present methods of education.

A lengthy discussion followed which showed arguments for and against the building of a school in Trout Creek but after this was gone over thoroughly it was decided that due to the poor turnout a second meeting would be called for the second week in September. A phoning committee was appointed to ensure that all residents would be notified of the day of the meeting. Secretary of the school board, B. A. Tingly stated that due to increase in enrollment extra accommodation would be required by September, 1956. The importance of finding a suitable location was brought up and it was pointed out that due to the rapidity of expansion of Trout Creek this condition will get worse. Another worry to some of the parents is the fear that the early afternoon bus may be curtailed. This bus brings the younger children down at 3 p.m. whereas if it is out of the children would have to wait until the older pupils are brought down at 4 p.m. This would make too long a day from 8 a.m. to 4 p.m. for the very young ones.

Damage Reported Slight In Hail Storm Saturday

The hail storm which hit the Summerland area around 6:30 p.m. Saturday, was confined chiefly to the western half of Prairie Valley and to the upper part of Garnett Valley, according to a survey made by Alex Watt, district horticulturist.

The storm, approaching from the south west crossed Prairie Valley and passing over Cartwright mountain struck diagonally into Garnett Valley. Hail stones about the size of moth balls were reported by growers in the Garnett Valley area. Extent of damage to crops will be hard to assess for a few days.

According to E. Hannah, BCFG Hail Insurance is starting a detailed survey today.

So far damage appears to be confined to around thirty orchards. Reports of damage vary from 10 percent to 75 percent on apples but these are really just "guesstimates" so far.

Cherries in the Summerland area were not greatly affected by the storm. The heavy rain occurring around mid-night caused very little splitting and even in the hailed areas little damage was done to cherries.

The high winds which broke loose during the height of the electrical storm smashed down a number of fruit trees in scattered locations throughout the district. Torrential rains washed down top soil plugging irrigation ditches and eroding dirt roads. It was the most violent storm since 1946 when a larger area of the district was struck by a violent hail storm on July 28. Damage in the 1946 storm far exceeded that of last Saturday's disturbance.

The storm struck the Princeton, Keremeos-Oliver district around 6 o'clock. One farmer reported that at least 40 trees were uprooted by the gale-force wind. Another reported four acres of tomatoes were flattened. A bolt of lightning struck the Hedley mine about 6 o'clock. Fortunately no one was working at the time. Damage was estimated at \$12,000.

At Westbank, during the height

of the electrical storm and short cloudburst, the supporting gravel bed on which the main Westbank irrigation flume rests, was swept away by the flood. About 120 feet of flume was carried down the hill-side into the swirling waters of Power Creek.

It is estimated that even with a bulldozer on the job, it will take about six days to affect necessary repairs.

Loss of the irrigation flume will prove a serious handicap to growers, especially during the current hot spell of weather.

Boat owners had a few anxious moments as the high waves bashed at insecure craft. Many rushed down to mooring bases, and several would have lost their vessels had they arrived a few minutes later.

Operation "clean-up" got underway Sunday morning. Branches were scattered hither and yon, especially where there were towering poplar or willow trees.

Some telephone lines in the south end of the valley were brought down and storm-water washed out several sections of the Princeton-Tulameen road.

Rain in Summerland Saturday night totalled .27 inches.

Start Paving On New Highway

Paving of the new highway from Evans Point northward started this morning and at the rate they are going it would appear that a two-mile single lane strip will be completed today. The single strip is 11 feet wide.

Total width on the hill from Evans Point to the Legion will be 33 feet. On the level part of the highway from Evans point north to Trout Creek it will be 24 feet wide.

Storm's Construction Co. have 14 trucks hauling the asphalt from the mixing plant near the experimental farm. They unload through the tail gate into the hopper at the front end of the paver where it is spread onto the highway and graded, after which it is pressed and made compact.

Carnival Sandwiched In Between Storms

Rotarians Saturday night managed to sandwich their Swim Class Carnival in between heavy rains although the heavy storm which struck about 10 o'clock cut short the bingo and interrupted a land office business at the refreshment stand.

During the evening Summerland High School band was in attendance and provided a program of entertaining band music.

Winner of the bicycle raffied during the evening was Bon Newton. On hand to draw the winning ticket was Summerland's queen Miss Frances Atkinson.

During the day, members of the Rotary club, assisted by some of the wives were tagging on the streets in a collection for the swim classes.

Gordon Beggs was general chairman of the carnival with Dr. H. R. McLarty in charge of the tagging.

Referee Upholds Protest and Awards Match to Editor With Score of 9-0

In a ruling on a protest, Referee Reid Johnston at press time today awarded last Saturday's checker match to the editor of The Review. Tommy Young was declared the winner by a narrow margin after the match Saturday night but Referee Johnston after reviewing charges of harassment, tergiversation and simony against Young agreed the ex-checker player had employed foul means in gaining the victory and awarded the game to the better player by a score of 9-0. Told there is not supposed to be any score in a checker match, Johnston's retort was "If Shenley can do it, so can I".

Seen about town this week in a verily oripplend condition, the winner has displayed the finest type of sportsmanship by refusing to acknowledge that his condition is a result of a series of foul blows dealt by Young during the match.

Instead, to shield the loser, he has passed it off as being the effects of sunburn.

Another charge brought against Young was that he was guilty of a serious sartorial offence in wearing fawn gloves with a full dress suit. He managed to shift the blame for this breach, however, with the excuse: "How green was my valet."

Some spectators of the match are still a little puzzled about the rapid appearance and disappearance of checkers on the board but that was only because they failed to understand the duties of seconds Allan Cross and John Dunn who engaged in a match of their own during the game.

The match should at least discourage any disputes over checkers for some time to come in this

TLC Representative Claims Board Missed Issue In Seniority Dispute

Protesting that an incomplete report of the arbitration hearing on a seniority dispute involving school janitors was misleading to the public, Wm. H. Fleck, representative of the Okanagan district Trades and Labor Council, contends the board missed the whole point of the dispute.

Mr. Fleck stated the board brought in a ruling that discrimination had been shown by the trustees, thereby ignoring the pertinent point in the union brief which charged not discrimination but non compliance with the seniority clause of the agreement.

A press release issued by the Trades and Labor council outlines the stand taken by that body and Mr. Fleck. Following are the contents of the press release:

"Various reports have been published re the arbitration hearing

Band Will Present Penticton Concerts

First of two concerts by the Summerland High School band, to be held in Penticton band shell, will take place next Wednesday night at 8 p.m.

The band will present a program of varied music chosen from some of the highlights of their past concerts plus new numbers.

The band presented a concert last year and it is in response to requests that such a concert be repeated that the present series has been arranged. Helping the band will be local entertainment who also in the past has proved very well received.

The school band has a heavy summer schedule planned for itself and this is the first of a series of appearances in Penticton. Last year a large portion of the crowd was made up of Summerland people.

As usual the program is made up of a good variety of numbers designed to please all. Marches, selections of popular numbers and novelties.

Add Extra Member To Teaching Staff

Due to an estimated increase of 40 pupils for this school term, approval has been granted for the addition of an extra teacher to the staff of the Summerland school. This will bring the teaching staff up to 31.

Anticipated enrollment this year is 400 pupils.

Other Opinions

Americans have become accustomed to being criticized by Europeans. They have come to discount much of the criticism, sometimes even when it merits attention. What may surprise many of them, however, is that they are now being questioned by their Canadian neighbors, and on some of the same points that have disturbed Europeans.

For example, Canadians now feel it necessary to remind Americans that though both peoples have much in common, they are also different from each other in many ways. And, the Canadians add, they wish to remain different. Here is something that Americans sometimes forget: that for all the virtues in their own way of life, other people may not wish to adopt it, for these others also have ways of life they cherish.

Non-Americans seem to feel the need of saying these things whenever the likelihood appears that Americans will be stationed in their countries in great numbers. That is the prospect for Canada now, due to coordination of United States and Canadian aerial defense.

But this is only part of the story. It is evident from statements by Canadian officials that Washington has been taking too much for granted in the American-Canadian relationship. The assumption that common defense will be worked out with little American-Canadian consultation, along American lines and perhaps under an American commander, has struck some Canadians as overweening. As one of their officials said recently in a public speech, "Our rights as well as our responsibilities must be preserved."

Further dissatisfaction over United States policy arises because of American trade attitudes and the United States agricultural surplus program, which seems to Canadian wheat growers to set up unfair competition.

Similarities of speech and daily life, as one Canadian has pointed out, may seem to make the two peoples appear more alike than they really are. And what irritates many Canadians, he says, is that many Americans are not even aware of differences.

This is a gentle rebuke which Americans visiting Canada or having dealings with Canadians can profitably heed. It is a reminder that American attitudes do not always evoke expected responses, partly because they assume too much.

Americans should remember that their country is a colossus. An offer of an embrace from so powerful a figure can look like a threat of extinction to the prospective "embracee." As Americans come to appreciate how very strong they appear to others they will recognize more often the need of utmost tact in dealing with allies. A word from such a near neighbor and close friend as Canada should find a wise welcome in the United States.

A TRAGEDY

News of the seven American boys killed by a rockslide in the Canadian Rockies comes as a shock, certainly. They were on a mountain expedition by the Wilderness Club of Philadelphia.

At this time, at this distance, and with possibly important details lacking it would be unfair to attempt a verdict as to what extent negligence may have played a part in the tragedy. We do not yet know, for instance, the age or experience of the leader who gave the boys permission to continue alone up the peak. Nor can we know the nature of the immediate terrain. We assume no one is to blame for the avalanche itself.

What has been reported, however, compels some very serious questions. The oldest boy in the climbing group was 16. He, it is said, was the only one with real Alpine experience. The others had made only two lesser climbs. Three of those killed were 18, and one only 12. Does this represent sufficient maturity and experience to tackle what the Banff National Park officials call one of the most difficult climbs in the Canadian Rockies? Why, apparently, were the boys inadequately equipped for climbing? Why were park officials left in ignorance as they declare, that such a climb was being made? In the face of all this, how can the organizer of these youthful expeditions, although 2,000 miles away, appear so sure that all was done that should have been?

Anyone who has had any association with mountain climbing knows that the more experienced and expert the climber the less he leaves to chance. — Christian Science Monitor.

THURSDAY, JULY TWENTY-FIRST, NINETEEN HUNDRED AND FIFTY-FIVE

Empty Charges . . . the whipping boy has his say

Sometimes we wonder what apologists would do if they did not have newspapers to use as a whipping boy when things don't work out right. Invariably it's the press to blame, either for printing too much or else for printing too little.

This week in a letter to the editor of The Review, Reeve Atkinson refers to an article in last week's issue as "misleading" and "unnecessary and unfair interpretation", but as is customary in such cases does not bother to go into details to show why these charges apply.

After a few years in the newspaper business, an editor becomes accustomed to turning the other cheek to charges like this but once in a while he runs out of his supply of other cheeks and does an analysis of the charges. That is what we are going to do right now.

The article in question contains only facts that were given out by the council and is not in any way interpretive so we are at a loss to know just how the reeve finds any basis for his charges. There is only one word used which might by any stretch of the imagination be termed interpretive and that is the word "wesh". The information this newspaper has is the announcement by Reeve Atkinson a couple of months ago that the highway department had promised to repave all the municipal roads being used as detours during the construction of the new highway. Last week a letter from the highway engineer was read to the council stating that the department was prepared to resurface only part and patch the rest. When anybody — individual or government — tries to get away with anything less than was promised, then that is weshing in our book and we'll stand back of the use of that word.

So to the reeve's charge that the article was "misleading," we can only answer that it contained nothing more than facts that were given out by the council. If he had other information that he

was not making public, then we can hardly be held to blame for not printing it. To his charge that the article contained an "unnecessary and unfair interpretation," we challenge him to point to anything in the story that is other than fact.

In the opening paragraph of his letter, Reeve Atkinson states the council has been criticized for holding too many meetings closed to the press. We have not joined in that criticism but perhaps have been remiss for failing to do so. However, we have always been aware that on occasions the municipal position could be unfavorably affected if premature publicity was given to some of its planning and so have acknowledged the right of the council to carry out such deliberations in camera. It is inconceivable though that these circumstances could apply to the considerable number of closed meetings. From time to time such instances occur in open council meeting and this newspaper has always in the community interest refrained from printing stories which would not be in the public interest.

The reeve goes on to state that "This year we have endeavored to be as liberal as possible with news regarding municipal business". While he may feel that this is a very generous attitude, we take the stand that being "liberal as possible" with news of public business is not good enough. There is no reason why the people who pay the bills should not be entitled to know everything about public business.

This newspaper has had a representative sit through hours of tedious council sessions to perform the public service of advising ratepayers in as much detail as available how their business is being conducted — and if sometimes a story is "misleading" because we haven't got the full information, then it's probably because the missing parts never came out of a closed meeting.

Skating Ahead . . . a real contribution to the kids

WITH THE TEMPERATURE hanging around in the nineties, skating is probably about the last thought to enter the minds of most people . . . but fortunately for those youngsters who will want to be engaging in the sport this winter, there is a small group who right now have it very much in mind.

Rink association members this week swung into action to get the preliminary work completed so that if the arena-by-law for artificial ice gets the approval of ratepayers there will be no delay in making the installation and a full season of skating and ice sports will be assured for the winter ahead.

There is a lot of work to be done in this preliminary stage and there is plenty of room for all

volunteers who can find some time to join in the project.

The Rink Association is out to see that the installation of an artificial ice plant is carried out with the lowest possible investment by the municipality and every bit of volunteer work that goes into it now is going to help keep down that cost.

The popularity of the rink last season, with a comparatively long skating period, showed clearly how much it means to the youngsters of the district. So that time spent in helping with this project now is more than just a contribution of time to the Rink Association or the municipality. It is a contribution of countless hours of enjoyment to hundreds of youngsters in the district in the years ahead.

Friendly Old Sol . . . from the shade of a big tree

Many hours of an editorial writer's time are devoted to cautioning his readers against excesses of various sorts. If he happens to be an editor of a weekly newspaper he usually doesn't have to apply these lessons to himself because he doesn't find time to engage in any of the luxury excesses.

The editor of this paper has, however, a different story to tell this week. Three hours in the sun on Sunday equipped him with the voice of experience to warn those who haven't already found out the hard way, that too much inguishing under

Old Sol can be a mighty painful experience.

And the suffering that follows is just as much mental as it is physical. With pneumonia or a broken leg friends will at least express a sincere sympathy for your predicament and send flowers and candy to try and brighten up your state of mind. But with sunburn all you hear is a gleeful laugh and salt-in-the wound observation, "I thought you were old enough to know better."

It's all right to envy those healthy looking tans of the beach crowd, but our advice is that you envy them from the shade of the biggest tree in the neighborhood.

Chump — "Yes, I take very naturally to dancing. My business has helped me a lot."

Dolly — "What is your business?"

Chump — "Furniture moving."

"Pilot to control tower! Pilot to control tower, I'm coming in. Please give me landing instruction."

"Control tower to pilot! Control tower to pilot! Why are you yelling so loud?"

"Pilot to control tower! I don't have a radio!"

Bride — "You didn't talk that way before we were married."

Groom — "What way?"

Bride — "You said you would go through fire and water for me, and now you refuse every time I ask for money."

Groom — "But I never said I'd go through bankruptcy for you."

Mid-Week Message

The Pharisee . . . spake within himself, saying, . . . she is a sinner . . . And he (Jesus) said to the woman, Thy faith hath saved thee; go in peace. (Luke 7:30,50) Read Luke 7:44-50.

We may well ask who was to blame that this woman received the condemnation, "She is a sinner"? We may well ask who is to blame when some similar statement is made about some person in our community?

Who is to blame, for instance, for the alcoholics, the drug addicts, the moral lepers, the sinners of every kind? Is it possible that any of us professing Christians as we are, have contributed in any way to the making of these sinners? Do we look upon them as enemies? Are we more ready to condemn them than we are to pray for them?

Do we help to make sinners by our neglect to teach the harmfulness of the use of alcoholic beverages, and narcotics and the importance of chastity to the young people in our homes, schools, Sunday school classes, and youth groups?

If we would not help to make sinners, we need to combat the evils by being clean from them ourselves, and by using our powers to persuade and encourage others to abstain from them.

PRAYER

Our Father, help us in all things to walk worthily, to walk as children of Thine. Implant in us the will and give us the courage to do all we can to save others, especially young people, from becoming sinners. In His name, Amen.

NIGHT CALLS

Winning beauty titles is old stuff to "Miss Canada" of 1955 For just last February, 23-year-old Dalcyce Smith, centre, of White Horse, Yukon, was acclaimed "Queen of the Rockies" in a contest held at Banff Springs. The pretty brunette who flew to London, Ont., for the contest held in conjunction with the city's centennial celebrations, plans to use her \$1,000 scholarship given the winner to study for the contest held in conjunction with the city's centennial celebrations. Others sharing in scores of prizes given in connection with the pageant in which 23 girls participated are Valerie Lane, left, Winnipeg and Lorraine Shipley, of London who both shared second place.

Hot Weather Speeding Growth

Westbank, Peachland, Summerland

As reported July 12: Since the issue of the last News Letter the weather has been cloudy and cooler than normal for this time of year. Some moderate rains have occurred. Yesterday and today have been warmer with the mercury in the high eighties this afternoon.

The rains of the past week have caused some splitting in the riper cherries. So far the main crop has escaped serious loss. A few Black Tartarians have been picked but Bings are not yet ready. The current season is now less than a week behind 1954 and if the present spell of warm weather holds there is a good chance of catching up to last year. Peach, pear and apple thinning is now in progress. Fruit is sizing well and thinning of pears and apples is being confined to breaking clusters. Most growers have applied two codling moth sprays up to this date. Pests and diseases have not given much trouble so far this year. Green peach aphid and black cherry aphid, so troublesome last year, are not yet reported in 1955. Very few Red Mite infestations have occurred.

At the Lakeview Heights area near Westbank slugs have been troublesome on young pears and cherries. Blackbirds have been numerous in cherry plantings in the district. In the past few days, some scab development has been noted in two orchards which were infested last year. The lesions are as yet hard to find and are confined mainly to the leaves.

Penticton-Naramata, Kaleden-Okanagan Falls, Keremeos-Cawston

As reported July 12: The last two days have been close to normal for this time of year with clear skies and temperatures in the 80's. Prior to that the weather was cool and cloudy with showery periods.

Royal Ann and a few Bing cherries are being picked in very early locations, but no volume movement of Bings is expected from Penticton until next week. There is a considerable variation in maturity even on the same tree. Rain at the end of June caused nose-splitting and on June 10th caused horseshoe-splitting around the stem. The amount of splitting varies so much it is difficult to estimate the damage, but it is expected that a good portion of the Bing crop will be packed as No. 3's. The apple crop continues to develop satisfactorily with good size and shape. There has been a fairly heavy June drop, and this is about over. Yellow Transparents are not expected from Keremeos area for another week to ten days. The peach crop likewise looks promising, although growers are finding quite a few split-stone fruits during thinning.

The insect and disease situation remains fairly quiet, although traces of codling moth damage and apple web infections have been found in an occasional orchard. Mites on apples and pears appear to be negligible, but are quite severe in some prune blocks.

Oliver and Osoyoos:

As reported July 12: During the past two weeks, 1.00 inches rain have fallen in this area. The temperature has been generally mild

trees with the more heavily loaded trees maturing their crop this week. The rains have caused some splitting but the only trees abandoned so far have been the trees carrying a very light crop. The size of the fruit is quite good. All other types of fruit are sizing their crops well also. Auricots on some lots are at present measuring over one and one half inches.

Green apple aphid has been on the increase during the past several days as have the Red Mites and Rust Mites. A little apple scab on the fruit has been noted and an occasional piece of fire blight.

Vegetable crops in general look vigorous and healthy. On the occasional lot verticillium wilt is starting to take its toll but with the plants as large as they are most growers can expect a reasonable crop. Cucumbers are on the increase in production and early potatoes are ready to harvest.

Armstrong, Vernon, Oyama, Winfield and Okanagan Centre:

As reported July 12: Since our last report the weather has been cloudy and cool with the exception of the past few days when temperatures have risen to around the 80 mark.

Tree fruits throughout the district are sizing well. Some early cherries will be ready in a few days and picking of Bing cherries at Okanagan Centre will likely commence during the coming week. Apple scab control appears to be very good at present with the exception of a few orchards where growers have omitted some of the earlier sprays. At present it looks as though the total apple crop for the coming season will be up slightly from 1954. Growers are still applying scab sprays. The prune crop looks very good although there appears to be less fruit on the trees than in other seasons. Codling moth entrances are to be found quite easily in a few orchards and green aphid have made their appearance and have, in some cases, become troublesome.

Strawberries are now past their peak and the quality has been very good. Raspberries are just coming on the market and should reach volume this coming week.

All vegetables are not making rapid growth and vegetable movement is now in ear lots. Local cucumbers are now available and should be moving freely in a few days. Movement of lettuce from Armstrong appears to be very slow at present. Celery should be available in about a week or ten days time.

All field crops are making excellent growth. Haying, of course, is being carried on wherever possible. Much of the first cut of alfalfa has been of very poor quality owing to the rainy period.

Kelowna:

As reported July 12th: Since the last report the weather has been cooler than is normal for this time of year. However, the last three days have been much warmer. A high of 91 degrees was reported yesterday. Continued warm, dry weather will benefit most crops.

Tree fruits are sizing well. Pear thinning is completed except for late lots. Apple thinning is general and proceeding rapidly since many blocks need only a touching up. Picking of Deacon and Royal Anne cherries has started on early lots. Bings will be ready early next week. Cherries are large this year as is to be expected with a light crop. Maturity

KIWANIS KORNER

Members of the local Kiwanis club listened with considerable interest to Mr. M. Finnerty of Penticton last Monday evening as he outlined his ideas on the duties and responsibilities of service clubs and citizens generally.

He felt service clubs were undertaking local projects that were the responsibility of Parks Boards and Municipal Councils, the cost of which should be spread over the entire municipality.

Turning to the responsibility of individuals he thought business men should not be so hesitant in expressing their opinion and stand on local, provincial or federal matters.

Appreciation was expressed by all the members of the club to Mr. Finnerty for having taken the time to meet the club in Summerland.

Four members of Summerland club and eight from Penticton journeyed to Brewster, Wn. on Tuesday for an inter-club luncheon with the Brewster club. In the afternoon they went to Omak country club where some played golf and others just stayed in the shade of the club verandah.

At 6:30 the group went to Tonasket where another meeting was held with the Tonasket club. This meeting was addressed by a member of the Canadian Customs staff at Osoyoos. He gave an outline of immigration regulations regarding tourists or immigrants crossing the border.

Main function of any industry in Canada or elsewhere — is to provide goods and services acceptable to consumers. If price and product are right, the result is employment. If wrong, the result is unemployment.

SHIRLEY BURNELL PASSES TESTS

Mr. and Mrs. J. Burnell received word that their daughter, Shirley, RCAF, passed her tests and will now be starting her course. She is taking recreational specialists training. She will stay at St. Johns, Quebec until September and will then be transferred to Almer, Ontario for further training.

Several growers have had to spray recently for European Red and Rust mites. Aphid is beginning to appear in quantity on young trees. Apple scab can be found in small amounts in most orchards but it is much less severe than at this time last year. Continued dry weather will help to keep the scab in check.

Vegetable crops are growing vigorously. Harvesting of lettuce is nearly completed. Beets and carrots are available in volume. Early potatoes will be available in volume in a weeks time. Fall onions are still two to three weeks away.

Every 4.19 seconds of every day

somebody buys a new

Incredible but true — this is the amazing result of the ever-growing preference for Chevrolet. Day-in and day-out, Sundays only excepted, there's a proud new Chevrolet owner every 4.19 seconds. You see them here, you see them there, you see them everywhere — enjoying the pleasures of driving Chevrolet. And because motoramic Chevrolet is such an overwhelming favorite this year, to a greater extent than ever before, Chevrolet leads in popularity — value — sales.

(Incidentally, while you were reading this, four Chevrolets were bought!)

Former Summerland Resident Takes Bride in Ceremony at Ketchikan

Miss Alma Nadine Florence and John Lawrence Logie were joined in holy matrimony at Holy Name Catholic church in Ketchikan, Alaska, at 8 o'clock Wednesday evening, July 6 in a ceremony performed by the Rev John J. Concannon. The church was beautifully decorated with roses and gladioli for the occasion.

The bride is the daughter of Mr. and Mrs. A. Leslie Florence of Ketchikan and the bridegroom is the son of Mr. and Mrs. Edward Logie of Summerland, B. C.

The bride was given in marriage by her father. Mrs. Ralph Dale was matron of honor and bridesmaids included Mrs. Al Bentzen, Miss Judy Cramer, Miss Marie Stangland and the bride's cousin, Miss Margaret Florence of Seattle.

Don Shride served as best man for the bridegroom. Usher included Ralph Dale, Al Bentzen, Richard Rockwell and Ronald King.

The bride wore a gown of lustrous white satin and hand-draped chantly lace. The princess line of the gown was swept into a graceful belted skirt and a full chapel train. The exquisite lace was used to outline the oval neckline and for the lily-pointed sleeves and the front bodice. Her two-tiered veil of silk illusion was attached to a jewelled, scalloped lace crown.

The bride carried a bouquet of white roses and stephanotis, cascaded.

Clover pink and Nile green crystal was used in fashioning the identical ballerina-length dresses of the bride's attendants. A panel of pleated self-material caught at the waist gave back interest to their full-skirted costumes. They carried bouquets of pink roses and gladioli.

Mrs. John Roghich played the organ and Mrs. Delora Bray sang 'Ave Maria,' and 'O Perfect Love'.

Following the church ceremony a reception was held at the home of the bride's parents where the decorations carried out the color scheme of the attendants' dresses. During the reception Miss Stangland sang 'Because.'

Out of town guests included the parents of the bridegroom, Mr. and Mrs. Edward Logie and two aunts of the bride, Mrs. Merrill Florence and Mrs. Earl Hurley of Seattle.

When the bride threw her bouquet during the reception, it was caught by Miss Florence, her cousin.

For going away the bride wore a blue suit with a topper of gaitan blue and pale pink accessories. Her corsage was of white roses which had been centered in the bridal bouquet.

The couple will be at home at 429 Edmonds street until the end of August, when they will make their home in Seattle. The bridegroom is with the Alaska communications in Ketchikan and expects to be released from the service at that time.

Visiting Here

Mr. and Mrs. Alfred Thompson and family of Vancouver are visiting Mr. Thompson's father, Mr. Fred Thompson on Rosedale Ave.

Mr. and Mrs. W. Palmer and family of Porcupine, Sask., are guests of Mr. and Mrs. H. R. Hodgson.

Mr. and Mrs. Joseph Sedlar of Branford, Ontario, were visiting their cousin and family, Mr. and Mrs. Joe Sedlar of Summerland last week-end.

Recent guests of Mr. and Mrs. C. H. Elsey were Mr. and Mrs. W. Logan and son, Roddy, of Vancouver.

Visiting Mr. and Mrs. P. G. Agur last week were Mr. and Mrs. E. L. Jackson and family of Vancouver and Mr. and Mrs. B. Teng and family of Pitt Meadows.

Mr. and Mrs. Ivor Harris of Vancouver have been visiting Mr. Harris's father, J. W. Harris.

Visiting at the home of Mr. and Mrs. R. Lawley are Mr. and Mrs. L. Lawley and family of West Vancouver.

Visiting at the home of Mr. and Mrs. I. H. Solly is Miss Barbara McLean of Vancouver.

Visiting Mrs. Helen Miller last week was her son Jack from Camp Borden, her daughters Elaine and Hazel of New Westminster and her son Leo and family of Peachland. This is the first family gathering for a few years.

Mr. and Mrs. Peter Aspell and children of Vancouver were here while Mr. Aspell conducted an art class. He is from the Vancouver Art school.

Mr. and Mrs. George Lead last week were visiting in Vancouver and Mrs. Lead last week.

Mr. and Mrs. R. Purvis and family have returned to their home in Vancouver after visiting here for a week.

Anna Gaudin, top, a former Methodist missionary, lived and died in her church's service without fame. Recognition comes now, 15 years after her death, in the form of a book written by Mrs. Nan Shipley, above, a Winnipeg authoress. In her book "Anna and the Indians," Mrs. Shipley tells of the 39 years Mrs. Gaudin, a nurse, and her husband spent in the wilds of Manitoba, travelling incredible distances by foot and dog team to bring medical assistance to the Cree Indians.

Visiting Mr. and Mrs. Glenn Wood last week were Mr. and Mrs. Schultz, Doreen and Garry of St. Albert, Alberta.

Visitors at the home of Mr. and Mrs. A. K. Elliott during the past two weeks were Mr. and Mrs. Wm. Dodds of Winnipeg and Mrs. E. Lytle of Roland, Manitoba and Mrs. E. Kendall and daughter of Morden, Manitoba.

Rev. F. W. Haskins, former pastor of the Baptist church here, and Mrs. Haskins, enroute to visit their daughter Donna at the coast, called on a few of his former parishioners Wednesday, and expects to be back in about ten days on his return trip to Calgary.

Mrs. Pat Morris and her little girl, Connie May of Vancouver, are visiting her parents, Mr. and Mrs. William Verier of Prairie Valley.

Mr. and Mrs. Walter Wilson of Calgary are visiting Mr. and Mrs. Ernie Jenkinson.

Mrs. M. Mann of Langley Prairie is visiting Mrs. W. H. Welsh at Trout Creek.

Mrs. Muriel Mills of Guelph, Ont., was visiting Mr. and Mrs. J. E. Smith over the week-end. She later left for the coast to visit relatives.

Visiting with Mr. and Mrs. Albert Dickinson is Mrs. Dickinson's mother, Mrs. V. B. Montgomery of Vancouver.

AT MOTHER'S FUNERAL

Mr. and Mrs. R. N. Laidlaw motored to New Westminster on Monday to attend the funeral of Mrs. Laidlaw's mother, Mrs. Percy Rosoman, which was held Tuesday, July 19, from the Columbia Funeral Parlors in New Westminster.

Wife Preservers

Only very hot soapstains and greases will remove baby oil stains from baby's wardrobe.

Vacationing ?

Spend your time IN the car not UNDER it. Let us make the 5-point check up: Engine Tune-up, Steering Check, Ignition Check, Cooling System Check, Brake Check. Enjoy yourself... Get these important parts inspected and put in safe condition before you leave.

GRANVILLE & HASTINGS MOTORS

HOME AGAIN

Mr. and Mrs. F. Dumont returned Saturday after spending a two-week holiday at the coast and island points.

Mr. and Mrs. M. Henker and family have returned from Harison Hot Springs.

Mrs. Verna Stephens returned home after an absence of several months.

Mrs. A. Menu is home after spending a month in Winnipeg visiting her daughter.

Mr. and Mrs. R. N. Laidlaw with Lowell and Mr. and Mrs. J. H. Dronsfeld returned home Saturday after a two-weeks motor trip to Calgary by way of Banff, Jasper and Edmonton and after tending the Stampede returning via Fernie and Spokane.

VISITING ABROAD

Mr. and Mrs. Ken Boothe and family are on a two week motor trip.

Mr. and Mrs. Walter Wright are holidaying at the coast.

NEW ARRIVALS

BORN: At Summerland General Hospital, July 18, to Mr. and Mrs. Lorne Perry a daughter, Katherine Elisabeth.

A nation's wealth and economic strength lies in industrial plants, rail transport systems, agriculture, natural resources and the people's ability and willingness to work.

Average size of Alberta ranches are 2,000 acres owned by the individual rancher with 8,000 additional acres under lease from the provincial government.

Macs Have No Trouble With Winless Canadians

Summerland Macs Sunday kept the Vernon losing streak intact and run rough-shod over the northern visitors to the tune of 9-2. The Macs had no difficulty with the Canadians, who this season in 11 starts have so far been unable to eke out even a single win. The local boys showed they meant business right from the beginning and Doug Kilburn, first man up, took the measure of the third ball across the plate and belted it out for a home-run. A second run was scored in the first inning by Geordie Taylor, who started off with a base on balls.

Vernon too got off to a fast start with shortstop Spley leading off the batting order and making a single count for a run in the first inning. It was not, however, until the eighth that Vernon was able to get another man across the

home plate. Meanwhile Kilburn scored his second of three runs during the game in the second inning and Egeley his first of two. Weitzel, who also accounted for two runs, added one in the third.

Game was scoreless then until the seventh inning when four runs were added by Weitzel, Egeley, McNiven and Kilburn. Weitzel scored on a triple and Kilburn from a double.

Alan Hooker was also good for a two base hit, which brought two runs in, but he was unable to get any further himself.

Billy Eyre was winning pitcher, going the distance for the Macs, allowing six hits and struck out eight. He gave out three passes. Kornisk started on the mound for Vernon, but was replaced by Janicki after two innings. The Macs collected ten hits, had six walks from each pitcher and only four men were struck out.

OUTBOARD MOTOR and BOAT INSURANCE

Cruising across a lake in an outboard motorboat represents hours of pleasure, all summer long to many people.

You can protect the considerable investment in your boat and motor against all risks of direct personal loss or damage, while afloat or ashore within the United States or Canada.

We have a competitive market for a very reasonable premium for all your general insurance requirements.

First person to swim the Strait of Juan de Fuca, Bert Thomas of Tacoma, Wash., is cheered by his wife and daughter at the end of the 18-mile, 11-hour contest with tides and currents. The final mile took two hours. It was his fifth attempt to conquer the strait, which he swam from Port Angeles, Wash., to Victoria, B. C.

Two Home Runs Help Sox Take Win Over Penticton

With the lead seesawing back and forth to end at a 5-5 tie after nine innings, Summerland Juniors saw Penticton Sunday afternoon pile up three runs in the first half of the extra inning and then came out in full force in the bottom half to roll up four of their own and take a 9-8 win in the Peach City.

Playing an important part in the Sox scoring was a pair of circuit hits clouted out by Glen Parker and Bobby Bonthoux.

Penticton got the game underway with two runs in the first inning, but Parker evened it up in the third with his two-run homer. Pohlman scored in the fourth to push the locals into the lead, but Penticton brought in two in the fifth to go ahead 4-3.

Coming up first in the bottom half of the fifth, Bob Bonthoux belted the ball over the two left-field fences and onto the road for the Sox' second homer. Then in the sixth Summerland was back in the lead with a run by Bobby Parker. Penticton evened the score in the eighth.

Ninth inning was scoreless, although Summerland came close to finishing the game with Pohlman being called out in a close decision to slide home.

Winning pitcher, Glem Murray, had a total of 13 strike-outs. The Sox accounted for 13 hits and are rapidly establishing themselves as a slugging team. They have racked up 43 hits in the last four games.

Here's how they stand on hitting:

Harold Biollo	34	8	235
Gary Hackman	31	8	258
Glen Parker	38	13	342
Robert Parker	45	18	400
Tom Campbell	25	8	320
Bob Bonthoux	34	12	353
Walter Ugama	28	10	385
Jack Pohlman	10	3	300
Clem Murray	30	7	233
Allan Birtles	8	1	168
Don Skinner	10	1	100

Two Local Shooters Winners at Kamloops

Twelve members of Rifle Club attended the annual shoot at Kamloops on Sunday, July 10. Art Dunsdon and Ray Blagborn were prize winners. Art took the Tyro the only members to rank with the aggregate with a score of 96 and first Tyro prize at 500 yards. Ray placed second in the junior aggregate with 89 points. The senior grand aggregate award was captured by E. Work of Kamloops with a brilliant 102 out of 105. Complete scores of the Summerland marksmen were as follows: W. Cousins, 99; Len Shannon, 97; A. Dunsdon, 96; G. Dunsdon, 91; Y. Cousins, 91; R. Blagborn, 89.

At the regular weekly practice on the Summerland range on Sunday morning, Phil Dunsdon was high scorer with 98 points, followed by A. Dunsdon with 97 and George Dunsdon with 96 points. Scores posted by the other marksmen were H. Simpson, 93; A. McCargar, 92; R. Blagborn, 91; T. Piers, 81; W. McCargar, 58; Dick Dunsdon, 58.

A meeting of the club will be held on Tuesday evening at the home of A. Dunsdon to make plans for the annual invitation shoot to be held on the local range July 31.

DAD'S COOKIES
Oh, so Good!

BERT BERRY'S Fishing News

Rather spotty luck this last week with no reports of large fish being caught. A lot of Kokanee fish being landed up to 14 inches. Some of the trollers going deeper now and increasing activity off the rocks but fishers will have to wait for the grasshoppers before the fish come back to the drop-offs.

Fish Lake Camp
Some fishermen getting some nice easterns yet at Fish Lake. Upper Lakes producing a lot of limit catches, though I haven't heard of any large sized ones coming out.

Tee Pee Lakes
A couple of nice reports from here up to three pounds. Most luck on the trolling of flat fish.

Headwater Camp
Several parties up here. Lots of fish but only one reported large fish.

Brenda Lake
Has been hot this last week or two with some nice sized ones taken on fly and troll.

Silver Lake
Still O.K. here for fishing but I hear last week-end's storm really washed the road in spots.

Twin Lakes
Is having quite a play this year. Several parties have had good luck here.

Rickter Lake
Some large ones still being landed. Best fishing as darkness takes over at night.

Sawmill
Only one report from here but though large fish were seen they were not biting.

Interference With Boom Danger to Headwater Dam

Council Tuesday heard a report from water foreman Ken Blagborne that interference with the installation at No. 2 Headwaters dam could result in serious damage to the spillway.

The foreman said that a log boom just above the dam has been repeatedly cut out. He attached blame to fishermen who release the boom in order to get their boats to the dam which is the most convenient beaching location.

The boom is placed there to catch driftwood and other debris so it will not smash against the spillway and Mr. Blagborne said a great danger exists, particularly in the springtime when freshet carrying driftwood could easily smash out the spillway.

"I don't worry so much this time of the year," said the water foreman, "but if it cut loose after we made the last visit in the fall that means it will be out in the spring when the danger is greatest."

The boom has been wired in place and each time it has been hooked up the wire has been cut or unfastened. One councillor suggested using a chain and lock. "They'd probably use a hack saw on it," observed Mr. Blagborne.

Operator of the fishing camp at Headwaters will be asked to warn fishermen about tampering with the installation there.

Will Study Zoning After Highway Open

Any application for re-zoning sections of the district adjoining the new highway will be held in abeyance until the new road is in use. Discussion on this subject arose at Tuesday's council meeting from a letter written by Joseph Cristante asking permission to erect a service station on his property.

He will be advised to file an application for re-zoning and it will be considered at a later date after there has been an opportunity to observe the traffic flow on the new highway.

Also discussed in connection with the highway was the matter of private entries which have affected the construction. It was pointed out by Reeve Atkinson that the job is not yet completed and when it is, he said, all entrances will be inspected to make sure they have been left in satisfactory condition.

School Band Popular in Concert at Penticton Gyro Park Bandshell

The sun came out long enough yesterday to allow the School Band to hold a very successful concert in Penticton Gyro Park.

The large crowd attending was entertained with a wide selection of entertainment which included music by the School Band, drum majorettes, singers and piano music.

Assisting the young musicians were Flora Bergstrom and Clive Atkinson who each sang a solo and also combined in a duet all of which was well received. Accompanying them was Alma Fudge. Joanne Bergstrom and Bruce Brown pleased the audience with two piano duets.

As the band played marches several groups of drum majorettes under the direction of Miss Yvonne Polesello gave a demonstration of their abilities. Yvonne gave a demonstration of twirling that

A uranium find, declared to be the "second best assay yet found in the world," has been staked out near Bancroft, Ontario, by Mrs. Dorothy Madigan, centre, an Akron, Ohio, housewife, and two of her friends, Mrs. Betty Cliff, left, and Mrs. Ruth Wilman. The discovery was made recently, Mrs. Madigan said, in an abandoned feldspar mine. Her part in the find, she added, was a minor one, for two men she has known for 20 years through vacationing in Canada, actually located the uranium. She has filed 16 claims in the strike area.

The Summerland Review

Vol. 10, No. 29 West Summerland, B.C., Thursday, July 28, 1955 5c per copy

Weather Slows Apple Movement

B. C. Tree Fruits in market report today states apple deliveries are now increasing daily but due to the late season shipments are somewhat below last year. Initial demand on the prairies has been steady.

Apricot deliveries so far this week have been lower than was expected due to the unfavorable weather but reports indicate heavy volume will be reached by next week. The "Wait for B. C. Crop" advertising campaign has been successful again this year and a heavy initial demand is expected to meet cots when they reach the market in volume.

All districts are now packing cherries and they are being shipped to practically all the main distributing centres throughout Canada with the exception of Newfoundland. With few exceptions, deliveries continue satisfactory with most markets reporting steady to firm prices.

Ontario made the first delivery of peaches to Winnipeg yesterday and Tree Fruits office reports the quality good and meeting with consumer acceptance.

Will Move Siren To Co-Op Building

Municipal council Tuesday gave authority for moving the fire siren to the top of the new Co-Op Services building where it is believed it will sound a note audible over a greater distance than at present.

Cost of moving the siren is \$80 and councillors approved a payment of \$1.50 per month to the Co-Op Services Society for rental on their wiring and any power it may consume.

STREET CARNIVAL

Council Tuesday approved a request from the Kiwanis Club to hold the annual street carnival on Granville street, on Saturday, August 13. Request, on behalf of the Kiwanis, was made by Jerry Hallquist and George Henry.

Boasting a two-week-old deer for a pet has boosted Billy Horton's popularity rating in Mitchell, Ontario. "Bambi" was rescued by Billy's dad, a game warden, from the wild animals in nearby bush where the animal was found. Now that the deer and Billy are such good friends, the six-year-old boy has been busy acquainting his new pet with his family and friends.

Unable to Predict Effect Here In Event of Packing House Strike

With strike vote to be taken this week in 32 packinghouses in the valley, effect on the movement of fruit in Summerland in the event of a strike is still vague.

None of the Summerland packinghouses have a contract with the Fruit and Vegetable Workers' Union and few, if any of the employees of the local packinghouses are members of the union. However, it is anticipated that local houses would be picketed by union strikers and fruit handled by them would be labeled "hot" so that unionized truckers would refuse to transport it.

Only Summerland operator under contract with the union is Cornwall Canning and theirs is a different contract from that of the packinghouses and is all signed for this year. They would be unable to handle "hot" fruit but could remain in operation either by importing fruit from the U. S. or possibly by an arrangement between growers and B. C. Tree Fruits to short-circuit the packinghouse by taking delivery of fruit right from the orchards.

Basis of the dispute between the union and packinghouses centres around a demand of 10 cents an hour by the union but turned down by a conciliation board. Packers have expressed willingness to have the dispute go to an arbitration board but the union is not agreeable to this method of settlement. Union took the stand against arbitration a year ago when the board then rejected their application for an increase.

A unique situation exists in the valley in that many, probably most, members of the union are members of a grower's family, and in some cases are growers themselves, so that a tie-up of the fruit crop would hit financially in many homes from both directions.

C. A. Clark Rites Monday Afternoon

Collin Andrew Clark, a resident of West Summerland for the past 10 years, passed away July 22 in the Summerland General Hospital. He was 78 years of age.

Graveside services were conducted Monday, July 25 at 2 p.m. at Peach Orchard cemetery with Rev. J. Wylie officiating.

Beside his wife Adeline, he leaves one son, Howard, of West Summerland, two daughters, Mrs. Mary Lymko of West Summerland and Mrs. Aharie Myles of Vancouver; six grandchildren and two great-grandchildren.

Revelawn Funeral Home was in charge of final arrangements.

Midsummer Smoker Draws Good Crowd

A good turn-out was present last night for the Legion revival of the midsummer smoker at which this year ladies were entertained as guests.

Chicken and hams were awarded as bingo prizes and dancing followed later in the evening.

Winner of the fly casting outfit in a raffle was Clarence Adolph.

Bids on Artificial Ice Equipment Indicate Early Estimate Adequate

Three bids on installation of ice-making equipment at the arena were received at the council meeting Tuesday and will be turned over to Engineer Harry Blakeborough at Kelowna for study before any further action is taken.

Policing Costs To Be Studied At OVMA Meet

Okanagan Municipal Association at the quarterly meeting in Enderby today will consider a resolution asking the attorney-general to re-establish the provincial police for policing the province and terminate the contract with the RCMP.

This resolution is being presented by the City of Enderby in a protest to the substantial increase charged municipalities for policing this year. Another resolution on police costs comes from Merritt and proposes freezing police costs at the present rate.

Attending the meeting from Summerland are Reeve F. E. Atkinson and Councillor Francis Steuart. Also in Enderby today is assessor J. P. Sheeley who is attending the quarterly meeting of the Valley Assessors' Association which is going on at the same time as the municipal meeting.

Two Summerland resolutions will also be studied at today's session. One is a protest against the continuation of a per diem hospital charge against municipalities and the other advocates that materials purchased by municipalities of equipment for irrigation purposes should be free from sales tax. Precedent for this latter proposal was established when the federal government exempted the tax road building equipment purchased by municipalities.

Other resolutions cover such subjects as daylight saving time, exemption from tax of diesel fuel used by municipalities for generating electricity and proposal that municipalities be empowered to pass a by-law covering unauthorized parking on private property.

Provincial Marksmen Here Sunday For Annual Invitational Shoot

The annual invitational shoot will be held on the Garnett Valley Rifle Range Sunday, with marksmen from the interior competing with members of Fraser Valley and coast clubs.

Trophies and cash prizes are presented to winners of matches at 200, 500 and 600 yards, with the highest award of the meet being the Dunsdon shield for the high aggregate.

Shooters are divided into four classes: senior, tyro, cadet and midgets, the latter being for competitors under 15 years of age. Shooting will commence at 9 a.m. and continue throughout the day. Wives of the members will be in charge of refreshments, served free of charge to the contestants.

At the competition held last year, 88 sharpshooters were present and the club hopes for an equal or better attendance this year. Visitors are cordially invited to attend and see some of Canada's finest rifle-shots in action.

BCFGA Members Attend Annual Field Day at Experimental Farm

As guests of the Summerland research centre delegates from BCFGAs locally attended a picnic, or field day on Wednesday.

Nearly all locals were represented at the gathering, except those established in the Kootenays. Cherry picking or apple thinning kept some growers at home, but otherwise nearly 50 delegates with their wives and families took part in what proved to be both an enjoyable and instructive affair.

Until the picnic luncheon was disposed of it was a social gathering. Then at 1 o'clock Dr. T. H. Anstey, superintendent explained the arrangements for showing the delegates some features of the work of the different departments of the research centre.

The delegates separated into three groups. One group interested in orchard management, was shown by Dr. D. V. Fisher the cherry breeding program with the new varieties of Van, Sam, Star and Sue cherries. All of these were seen on the trees. Dr. J. C. Wilcox spoke of the study and application of controlled irrigation and the delegates saw soil moisture measuring equipment operating in an orchard.

Under the guidance of Dr. H. R. McLarty, head of the laboratory of plant pathology, another group of delegates saw something of the research in plant diseases. J. Stewart described new developments in the study of trace elements. Dr. D. L. McIntosh gave a short talk on scab and Dr. M. F. Welsh conducted the growers over the virus test orchard where they saw the effects of all the virus diseases of the Okanagan Valley.

At the entomological laboratory Dr. James Marshall, officer-in-charge, talked to a third group on sprays, new equipment and methods of testing them, and showed the party the buildings of the laboratory, describing its equipment and operation.

While these group tours were in progress some of the growers' wives and families visited the fruit and vegetable processing laboratory for a talk on the use of pie fillings and other processed products by Mrs. Dorothy Britton, home economist.

When the group tours concluded at three o'clock in the afternoon a number of growers stayed to see the tomato breeding project, under L. G. Denby, the dairy herd, in charge of J. E. Millmore and the fruit and vegetable processing laboratory under F. E. Atkinson.

Bids are on the refrigeration equipment only. They were Canadian, Ice Machine Co. \$22,499, Linde-Hall Refrigeration Co. \$23,334 and John Inglis Co. \$21,925. All the bids contained proposals for submitting different type of equipment which would vary the bids up or down.

Present when bids were opened were representatives of John Inglis and Linde-Hall and Reeve Atkinson told them successful bidder will be notified as soon as the bids have been examined.

Prices quoted on installation of the refrigeration equipment indicate the job of putting artificial ice in the arena can be carried out within the estimated figure of \$40,000.

At the present time, Rink Association members are busy at the preliminary work to get the rink ready for ice and call has been sounded for volunteers to help with the project.

Mrs. Percy Rosoman Passes at Coast

A Summerland resident since 1948 Mrs. Percy Rosoman passed away July 14 in Port Coquitlam at the age of 75. Mrs. Rosoman has been a bed patient at the Home for the Aged in Port Coquitlam for the past three years.

She was the former Amelia Lawrence and was born in London, England on July 6, 1880. She came to Canada in 1910 and was married the following year in Enderby where she made her home until 1948 when she and Mr. Rosoman came to Summerland to make their home.

Mrs. Rosoman worked as a tailor before coming to Canada and became noted in the Enderby district for her dressmaking and dressmaking.

Funeral service was held July 19 from the Columbia Funeral Parlor in New Westminster and following the service the remains were forwarded to Vancouver for cremation. Her ashes will be taken to Enderby.

Surviving her are her husband, Percy Rosoman of Summerland, twin daughters, Mrs. R. N. Laidlaw of Summerland and Mrs. Doris Beck of Port Coquitlam; two sisters, Mrs. Minnie Gildemeester, Vancouver and Mrs. J. W. Anderson, Revelstoke; two brothers, Charlie Lawrence, Coronation, Alberta and Arthur Lawrence, London England; and also three grandsons. She was predeceased by infant twin daughter and son in 1913.

POWER APPLICATIONS

Council Tuesday approved applications for additional power from J. M. McArthur, J. V. Charles, J. P. Tamblin, L. A. Smith, H. R. Kilx, Mrs. C. Kohlhauser, L. A. Koessl and W. H. Durick.

HOSPITAL PROBLEM

The B. C. Hospital Insurance scheme, financed by two fifths of its five percent retail sales tax, is once again in trouble. Trying to hold down costs of the scheme at its 1954 level of \$28 million, the B. C. government has told hospital boards all over the province that if wage-increases are made in 1955 they need not look to the government for money. The same government, however, under its labor legislation, virtually compels hospital boards and other employers to grant wage increases. And that is not all for the same labor legislation compels hospital boards to reduce the hours of work from 44 to 40 hours per week, thereby necessitating larger staffs on the round the clock operation of hospitals.

On top of all is the fact that the government wage-freeze order came six months after the labor legislation for higher pay and less hours of work were made effective.

The only solution for hospital boards is to keep wages and other expenses down as low as they possibly can, and then make staff lay-offs sufficient to meet the budgets for their year's operations. On the basis of the government wage-freeze order most hospitals are going into debt to the tune of some thousands of dollars each month. Indeed some interior hospital boards are suggesting resigning to force the hospital baby into the lap of the government.

By its own actions in appealing labor with higher wages and less hours the government has created an extremely difficult situation for hospitals in particular because of the fact that hospitals have to operate 24 hours every day, then to clamp on a wage-freeze order, a hopeless situation has been created which is simply impossible for hospital boards to cope with.

True hospital wages and costs have doubled since the scheme was introduced in 1949, and the length of stay in hospitals has increased to ten and one-half days per patient while the national average is nine days, but none of these things are the responsibility of hospital boards, they are the results of the free hospitalization scheme brought in by the former governments of this province. For the present government to pile the responsibility onto the shoulders of hospital boards is neither good sense or fair dealing. — Langley Advance.

AN UNJUSTIFIED HARDSHIP

"Residents of this province who take an extended holiday outside British Columbia are automatically excluded from participation in the coverage offered by the provincial hospital insurance. The resident who spends three months outside the province is completely covered within the limits of the scheme. If he extends his holiday outside the province by another three months the coverage is no longer effective and will only take effect again upon his return.

"We have no fault to find with this part of the provision. If a man is not contributing to the scheme by participation in the sales tax he cannot reasonably expect indefinite coverage.

"However, if he is outside the province for more than six months he is no longer considered a resident and is unable to benefit under the scheme upon his return. He is then treated as a newcomer to the province and must go through the same waiting period as a genuine newcomer. This is a harsh interpretation of the purpose of the system and exerts an unfair burden on the traveller who for any reason may find it necessary or expedient to be away from home for more than six months.

"The ruling is neither necessary nor desirable and should be overhauled. A permanent resident of B.C. should be insured immediately upon his return home irrespective of the time he spends on holiday."—Sidney Review.

NEW AND OLD

Let a style become old enough and it can be reintroduced for now. This is a commonplace among designers of furniture or clothes.

When the pony-tail hairdo came to vogue awhile ago many women knew it was a revival from an earlier period. But how much earlier.

In the Isabella Stewart Gardner Museum in Boston one of the very valuable paintings is a profile entitled "Young Lady of Fashion". It was done by Uccello in the early 15th century, when some Italian painters first began to turn from religious subjects to secular portraits.

The young lady is blond, very good looking, and—has a pony-tail hairdo. Over 600 years ago!

Irrigation Problem . . . depressing emotional appeal

Periodically we hear reports of damage being done at irrigation dams through carelessness of hunters and fishermen and even through downright vandalism. Latest report comes this week of interference with the log boom across Headwaters No. 2 dam.

It seems hard to believe that residents of this district could be guilty of tampering with anything that could conceivably interfere with the irrigation system. Everyone without exception is conscious of the fact that irrigation is the blood stream of the community and nothing could more seriously affect the economy of the district than to have a short supply of irrigation water.

In this latest instance of interference at headwaters, fishermen have cast off a log boom just above the dam because they find it more convenient to beach their boats at the dam. There has, in fact, been a tug-of-war going on between the irrigation crew and the fishermen over this boom — the latter casting it free everytime it is replaced.

How High Is Up? . . . no ceiling on the civil service

It is unfortunate that Mr. Howe and his cabinet colleagues did not perceive earlier the extent to which public opinion, both within parliament and without, was opposed to the idea of conferring sweeping 'emergency powers' upon the minister of defence production in a bill that could in no sense be termed emergency legislation.

In fact, the word 'emergency' occurs nowhere in the bill. Yet the effect of the bill, if passed in its original form, would have been for parliament to surrender to the government powers that parliament, and parliament alone, should exercise except in times of grave national emergency.

What the defence production bill, in its original form, would do, was not merely to confer upon the minister the powers that might be needed to produce new aircraft or to do any other specific, foreseeable job. Rather, it was designed to confer on the minister powers so sweeping as to be almost undefined, and to extend those powers indefinitely.

That the adamant stand taken by Mr. Howe in the earlier stages of the debate on the defence production bill has been damaging to his own reputation and to that of the government is apparent from comment such as the following in the Liberal Winnipeg Free Press:

Unpopular Request . . . there are enough natural ones

Little-noted aspect of senate finance committee's excellent report is manner in which federal civil service continues to grow.

In 1939 number of civil servants in employ of federal government stood at 46,106.

In 1945, the number had increased to 115,908.

In 1955, those on the civil service payroll, exclusive of the crown corporations, stands at 174,860. In addition, there are 9,068 "revenue" postmasters, bringing the real total at the present time to 183,948. Crown corporations, including the CNR, the CBC, TCA, the Bank of Canada and other government bodies employ an additional 138,094 persons.

Problem department, so far as civil servants are concerned, is national defence. Civilian employees in defence department now number 53,560, or 1 civilian to 2.1 men in uniform.

Appendix to evidence in the senate finance committee report, consists of first class statistical summary of growth of civil service by departments. Strange thing is that figures reveal no sensible

Mid-Week Message

Not as the world giveth, give I unto you. (John 14:27.) Read 1 Peter 2:21-25.

During the war I was disturbed that some of our leaders were saying that before men could become good soldiers they must be trained to hate their enemies. To help nurture in people the spirit of hate, many newspapers were filled with reports of enemy atrocities.

That is the way of the world when it is controlled by the evil spirit for the goddess and the unchristian care nothing for the teaching of Jesus. Doubtless some of the stories of atrocities were true. There is also little doubt that the allies committed acts of violence equally sinful in the eyes of God. No wrong is ever right. The second wrong never makes the first one right.

The way of Jesus is, as He said, to "pray for them that persecute you." True, His way led to the cross, but it also led to the glorious resurrection and the coming of the Holy Spirit to lead us into the way of all truth.

PRAYER
Dear Father, so lead us that we may become Thy children, children obedient to Thy will. Teach us to die in self that we may live to Thee, so that we may no longer live in accordance with the ways of the world. In His name. Amen.

The Lighter Side

"Here's a book," said the agent, "which you can't afford to be without."

"I never read," answered the victim.

"Well, buy it for your children."

"I'm single — I have no family. All I have is a dog."

"Well, don't you want a nice heavy book to throw at the dog now and then?"

An automobile dealer sold two cars to one man in the same day. His customer was an old desert rat suddenly grown rich from oil.

The man bought a high-powered car and with a gallon of gin in front seat, fared forth to see the world in about an hour, he came back, bleeding and bruised, ready to buy another car.

"For heaven's sake, what happened?" the dealer inquired.

"Down the road a piece," said the desert man, "fences come fast. Telephone poles come fast. Snow bridge come down the road and I turn out to let go by. Need a new car."

There is only one answer if there is continued interference with the irrigation set-up. It will be necessary to place a closure on the dam and prohibit any fishing at all there. On the municipal council are several ardent fishermen and closing that spot to fishing is the last thing they would want to do, so a little co-operation will make for a happier situation for everybody.

In fact, the irrigation department should be able to count on sportsmen for more than just non-interference. The headwaters dams are visited as frequently as possible but it would be of immeasurable help to the irrigation department if those who travel through that area hunting and fishing would report immediately anytime they detect something amiss.

Particularly depressing is the extent to which Mr. Howe resorted to emotionalism rather than to reason to make his case during the debate. Of his utterances just prior to the concessions to the opposition since made, the Winnipeg Free Press observes:

"He appealed to the imagination with vague talk of new aircraft and new weapons and the enormous risks that have to be taken in developing them. He appealed, pathetically, for sympathy with himself as the man who worries over these risks."

It is unfortunate that the senate finance committee was unable, because of delay in its appointment, to examine figures more closely and question witnesses more fully on causes of civil service growth.

Of Many Things
by AMBROSE HILL

GOLDEN ASSETS
I went to visit a friend of mine the other day at his office. On his desk I noticed an old chunk of rock, and I asked him why he kept it there as I knew he was usually a tidy person.

"It reminds me of a lesson I learned early in my career," he explained. "Times were none too good and I had just been laid off at my job. I was pretty indignant about it. I stalked into the manager and cited my good record I told him I wanted to know why they were laying me off before others. The manager was a friendly guy, and this same piece of rock was lying on his desk. He told me to examine it carefully, and I did. At first I thought it was just an ordinary stone, but if you looked closely you can see a vein of gold in here. He explained that a lot of people are like that piece of ore. They have certain assets and liabilities about their characters; but, like the stone, their golden assets weren't much use until they were refined."

"He said that all of us have both assets and liabilities in our characters, and the person who makes a success in life isn't necessarily the person with the greatest assets; for such a person very often also has strong liabilities. The person who makes a success is the one who makes his assets overcome his liabilities; the person who fails is the one who allows his liabilities to overcome his assets."

"I did a lot of thinking about what he said and I realized that while I had been smart at my work, I had also been very egotistical. I had not been an easy person to work with and that asset is just as important as being 'brave'. That's why I keep that stone. It reminds me that I could be worthless, too, if I thought it was enough just to have talent and not put it to good use."

I thought a lot about that stone later, and I felt it would do us good if more of us carried a worthless piece of ore around with us. It would help remind us that success doesn't come without trying. That merely being is not enough — that we must be doing as well. If more of us exercised our golden assets instead of letting them lie about unrefined like the gold in the ore, there would be less whining about insecurity in the world. We would stand on our own two feet instead of asking for government handouts. We all have the gold inside of us; it's up to us to make it work in our favor.

Life In India Gets Pretty Hot

Life in India can be even hotter than Summerland during the high-temperature stretch felt here last week. In fact, former Summerlanders Rev. and Mrs. Ken Knight report they had to take to the hills for three months to escape the heat of the plains. They are back now, however, to the Baptist Mission at the place with the jaw-breaking name, Bheemunipatnam, and expect soon to be adjusted to the climate of the country.

In the following excerpt from a letter to The Review, the former pastor of the Baptist church here describes some of the district where they are now living:

In three days we will be leaving this hill station to which we came in April to escape the strength-sapping heat of the plains. Since we are newcomers we have spent three months here to help in adjusting to this new climate and country. Just to step outside our cottage you would hardly know that this is India for the box hedges and flower gardens remind you of charming English countryside. We look down to the main business district for Ootacamund in a bowl-surrounded by hills, some tree-clad, others covered with fields of potatoes which in addition to tea and coffee are the best cash crop of this area. Westward beyond the town are rolling downs, yet another reminder of England. Beyond that in the distance are high hills, almost mountain peaks, often shrouded in clouds since we are living at an altitude of over 7,000 feet. Needless to say we have enjoyed the greenness of Nilgiri Hills with their grassy meadows and foliage and vegetation reminiscent of parts of Canada.

To return to the plains we will travel first on a mountain railroad which is unique in our experience. To begin with it twists and turns like a corkscrew and the engine and passenger cars are a picture. Small, almost toylike, and open to the elements much like an old touring model car without side curtains the train puffs its way up or down as the case may be. Between the rails is another cog-like rail which meshes with a large cogwheel on the front car of the train. One look at the terrain and the grades explains the reason for this feature! On the plains we will travel 350 miles north to India's third largest city, Madras. From there we have another overnight journey of almost 500 miles. Since we will go from temperatures of less than 60 degrees F. to temperatures of 90-100 degrees F. we expect a hot reception!

In Bheemunipatnam, a village whose industrial future is behind it since it used to be a mill-town, our large blue and white bungalow sits on a slope overlooking the blue waters of the Bay of Bengal.

Packaged Apples To be Marketed

A new packaging experiment will be tried this year to place fresh, crispy, juicy apples into the hands of consumers. B. C. Tree Fruits will, as a preliminary experiment, place a million bags of apples on the markets of Vancouver and Victoria.

The bags will have four pounds of apples and it is hoped will move from cold storage to the consumer in less than four days. The bags will be polyethylene. There will be ten bags to a carton which will thus represent a box of apples. A million bags in the original experiment will equal a hundred thousand boxes.

It is understood that the bagging will be done in one packing-house in order that all packing-houses will not have their operations upset by the experiment. It is understood that the No. 15 house of the KGE will be used for this purpose. This was the old Highland fruit house on Ellis Street.

SMALLER SIZES

It is expected that McIntosh and Delicious will be bagged and possibly other varieties if the experiment proves to be the success expected. Another interesting point is that the sizes will be a little smaller than is generally believed to be acceptable to the Canadian market, but it is felt that smaller sizes will be acceptable as bagged apples.

Bagging of apples is not a new marketing scheme. It is widely used in the United States and the operations in Wenatchee and Yakima have been examined carefully by Tree Fruits officials. There is no doubt that the bags have "caught on" south of the border and have accelerated the sales of apples in all markets where they have been used. Officials feel there is no reason that a similar reaction should not be experienced in this country.

The main objective of the bagging is to give the consumer good crisp fruit in a handy package that has all the eye-appeal of the fruit itself.

The packinghouses throughout the valley will be asked to set

aside certain grades and sizes for the experiment. These will be moved to the central house where the packaging will be in operation.

WILL SEAL BAGS

The bags, it is understood, will be sealed by a heat process.

During the past couple of years Tree Fruits has encouraged retailers to bag apples for display purposes but this was not too successful. It meant another operation for the retailer and when he did it, he frequently bagged too many at one time and these remained on the shelves until sold and were often in not too good shape. This was just contrary to the whole idea behind the bagging which is to give the consumer the best possible fruit out of cold storage as soon as possible.

It is anticipated that fruit bagged one day will be shipped to the coast that night and sold in the stores the following day.

Canada's largest hospital is the 5,500 bed hospital St. Jean-de-Dieu at Gamelin, Que.

Scouts in Camp At Osprey Lake

The 1st Summerland Scouts camped this year from July 6 to July 13 at Osprey Lake. Twenty-five boys attended camp with Scoutmaster D. V. Fisher in charge assisted at different times by assistant Scoutmaster David M. Munn, Richard Blewett, George Breke, and Lincoln Goberdan. The weather was favorable and the camp was judged the most successful in years.

In the annual patrol competition for good camping, the Eagles led by Victor Blewett edged out the Hawks by one point in winning the Pat Nisbet Memorial trophy. All patrols did an extremely good job of camping and constructed a number of useful items of camp equipment such as tables, an altar fire place, etc.

Central cooking for lunch and supper was again ably performed by Jack Ellis while the boys cooked their own breakfasts at their camp sites.

The highlight of the camp was the overnight hike to Teepee Lake which is a walking distance of almost nine miles from Osprey Lake. The packs, however, were kindly transported by Gold Brothers from Link Lake, in their Land Rover. This made the hike much more enjoyable. At Teepee Lakes the Gold Brothers also made a cabin and boats available on all three lakes. The weather was perfect, despite 4,000 elevation and some nice catches were obtained. Apart from mosquitoes the overnight hike was a perfect jaunt.

Twenty of the 25 boys attending completed requirements for their Athletes' Badges and Swimmers' Badges were won by David Wooliams, Barry Piers and Dwane Dickinson. There were seven cars of visitors on Sunday, including District Scoutmaster Gordon Blewett, Field Commissioner J. V. Scrivener and Jack Stocks, scoutmaster of 1st Penticton Troop.

A variety of outside games were played each day, suitable to the terrain, and each day six boats were rented from the Osprey fishing camp to allow rowing and fishing for all boys. Two council fires were held at which the patrols presented original skits and stunts. At one campfire Lincoln Goberdan sang some Trinidad calypso songs which were very popular.

Transportation both ways was provided gratis by R. Barkwill and this assistance was much appreciated. Thanks also are extended to Joe McLachlan who provided tomatoes and cucumbers.

Two boys left their fishing rods at the Youth Centre and may have game by phoning D. V. Fisher.

THE CARTERS ARE LUCKIER THAN THEY KNOW!

Like all families, the Carters have plans and dreams for the future. But, unlike the families of just a generation ago, they have a better chance of making those dreams come true.

Why? One important reason is because life insurance is much more flexible today. During the past 25 years, many new policies have been created. The modern "family income" policy, for instance, provides maximum coverage while children are young, and reduces in amount as they become self-supporting. Other policies have been developed to cover mortgages, and to provide retirement income to fit in with the government old age security benefits.

This wider choice reflects just one of the ways in which life insurance companies and their representatives have adapted their services to the changing needs of Canadians in all walks of life!

THE LIFE INSURANCE COMPANIES IN CANADA
Comprising more than 50 Canadian, British and United States Companies

Depositors by Mail Are No. 1 Customers at B of M

Many of the Bank of Montreal's first customers each day don't come anywhere near its office, says Ivor Solly, manager of the B. of M. Branch in West Summerland. These are the men and women who find it more convenient to do their banking through the mails than by calling in person.

"You can get an almost complete range of banking services and protection through the postal service," Mr. Solly explains. "You can deposit funds, pay bills by cheque, arrange for the bank to issue money orders for you or give it instructions about your securities in its safekeeping. In short, you can do much of your spending and saving just as conveniently as if you were visiting the bank yourself."

A B of M folder on banking by mail is yours on request. Simply drop a line to the West Summerland branch of the B of M. Mr. Solly will gladly answer any specific questions you may have.

We're not the biggest...

...but we're probably the proudest

... proud of the quality of material we sell...
proud of our service... proud of our community
... proud that we live here—

And we intend to stay in business here by selling you the best in material, and giving you the best of advice.

That makes you a happy satisfied customer and us a very happy dealer.

Visiting Here

Mrs. Leslie Abernathy and daughter Carol of North Vancouver are visiting Mrs. Abernathy's parents, Mr. and Mrs. Nat May, for a few days.

Dr. and Mrs. Harold Fogle and Linda of Prosser, Wash., are guests of Dr. and Mrs. T. H. Anstey for the duration of the HEPP conference.

Dr. D. F. Millikan of Missouri is visiting the plant pathology laboratory and attending the HEPP meetings.

Mr. Lopatecki from Lethbridge science service laboratory visited the lab here this week.

Last week, W. R. Foster, provincial plant pathologist of Victoria visited the local pathology laboratory.

C. Laing Godfrey of CIL with J. R. Murphy of the research station at Fernhurst, England, visited the plant pathology lab.

J. M. Wilks of the Creston sub-laboratory has been on the virus tour in Oregon and is now attending the HEPP meetings in Penticton and Summerland.

L. Conners of the botany and pathology division, Ottawa, is here in connection with the plant disease survey.

Miss Sheila Daniels and Miss Pauline Blanchard of Vancouver are holidaying at the home of M. and Mrs. M. F. Daniels.

Mrs. C. A. Davis, Mr. and Mrs. Lawrence Davis, Sandra and Reggie, of Three Hills, Alberta, and Mrs. O. Davis of Calgary are visiting Mr. and Mrs. John Manning and Mr. and Mrs. Wesley Davis.

Mrs. Fred Hewitt of Innisfail, Alberta, was visiting friends in Summerland last week.

Mr. and Mrs. Gordon Greig and son Norman, Mr. and Mrs. Stan Dickinson and daughter Janice of New Westminster were visitors of Mr. and Mrs. W. King.

Recent visitors at the home of Mr. and Mrs. V. Brawner were Mr. and Mrs. Art Sorenson, Spokane, Washington, Mr. and Mrs. Tony Ellergodt, Mr. and Mrs. Gordon Norris and sons Brian and Billy and Tony Ellergodt of Brandon, Manitoba, and Mr. and Mrs. Chuck Brawner, Victoria.

Mrs. C. Agur of California is visiting relatives in town.

Mr. and Mrs. K. M. Waldon and children of Edmonton are visiting Mr. Waldon's parents, Mr. and Mrs. T. A. Waldon.

J. Simpson of Vancouver was visiting at the home of D. Wright.

Mr. and Mrs. Rand of Calgary were visitors at the home of Mr. and Mrs. L. Rumball.

Mr. and Mrs. D. Rumball and Pamela, and Mr. and Mrs. D. Smith of Vancouver are visiting at the Rumball summer cottage at Trout Creek.

Visiting Mr. and Mrs. A. Menu is Mrs. Menu's sister and brother-in-law, Mr. and Mrs. R. F. Campbell of Los Angeles. Also their nephew, Victor Buffet of Winnipeg.

Mr. and Mrs. Lindsay Thorburn of Port Elgin, Ontario are guests at the home of Mrs. Thorburn's aunt, Mrs. E. Kercher.

Mrs. C. P. Ewan has her daughter Mrs. R. Spencer and children of La Canada, California visiting her. Also her son and family, Dr. and Mrs. W. Evans and family of Vancouver.

Visiting Mr. and Mrs. A. J. Bonthoux was their daughter Mrs. H. Burgart and children of Revelstoke.

Mrs. H. B. McDonald and children of Calgary have been visiting at the home of her mother, Mrs. J. Wolf.

Visiting Mr. and Mrs. J. Betuzzi and Mrs. E. Bartolo were Mr. and Mrs. I. Arduini of Kamloops.

Mr. and Mrs. T. McDonald are spending the holidays with Mr. McDonald's parents Mr. and Mrs. T. McDonald.

Mr. and Mrs. Harley Blagborne of Vancouver are visiting relatives in town.

Mr. and Mrs. C. Ritchie of Oliver were guests at the home of Mr. and Mrs. H. W. Brown. Mr. Ritchie has been the principal at the Oliver school for 15 years and now goes to Prince Rupert as school inspector.

Visiting Mr. and Mrs. R. F. Smith in Garnett Valley on the weekend was their daughter and son-in-law Mr. and Mrs. Allan Elnis and baby daughter from Revelstoke.

Don Nesbitt spent the week visiting at the home of Dr. and Mrs. A. W. Vanderburgh.

Visitors at the home of Mr. and Mrs. D. Taylor on the weekend were Mr. and Mrs. Bob Crawford and Jimmie and Bobby from Richmond, Lulu Island. Mrs. Crawford is Mrs. Taylor's niece.

VISITING ABROAD

Ewart Wooliams visited Creston and Grand Forks in connection with the plant products survey. His visit related to the seed pea planting for export to the United Kingdom.

Rev. and Mrs. J. James left on Wednesday for Burlington, Wash. to attend the annual Free Methodist church conference.

Mrs. L. Arnusch has gone to Regina where she is visiting relatives.

Miss Rilla Daniels is spending a week in Vernon visiting her aunt and uncle.

C. W. James left by bus on Monday to attend the annual church conference in Burlington, Wash.

Rodger Smith was a weekend visitor to Victoria.

Winnipeg Bride For R. Yamabe

Of interest to many Summerland friends was the nuptials performed in Camrose, Alberta, when former resident, Richard N. Yamabe took as his bride Marianna Wright of Winnipeg.

The groom is the son of Mr. and Mrs. R. K. Yamabe of Summerland and the bride is the daughter of Rev. and Mrs. Walker Wright of Winnipeg.

The ceremony was performed by the bride's father, assisted by Rev. Thomas Hal in the Church of God at Camrose on July 15.

Katherine Yamabe, sister of the groom, was bridesmaid while Leonard Ewert of Silver Grove, Saskatchewan, was best man. Ushers were Gilbert Sonnet of Edmonton and Eugene Ehr of Camrose.

The bride was wearing a pink suit and hat and carried a white bible and gardenia. Her attendant was in a pale green suit set off by a gold rose corsage.

A reception for relatives and close friends followed in the banquet room of the York Cafe.

Those from Summerland attending the rites were Mr. and Mrs. R. K. Yamabe, Miss Katherine Yamabe and Mrs. Frank Kuroda.

IN DENTAL SECTION

Mr. and Mrs. J. L. Brown have received word from their daughter, Joan MacDonald, now at the RCAF Manning Depot in St. Jean's, P. Q., that she has been assigned to duty as a dental assistant.

Joan passed her tests with a mark of 92 percent and on completion of basic training will go to the dental college at Ottawa for three weeks training before receiving a permanent posting.

Honor Bride-Elect At Pretty Shower

Co-hostesses at a shower honoring Laura Mott last week were Mrs. Lillian James and Mrs. J. James.

The shower was held at the home of Mrs. Lillian James with about 40 guests present. Marilyn James presented the gifts to the guest of honor, games were played and delicious refreshments were served.

Holy Child Church Scene of Christening

David Peter were the names given to the infant son of Mr. and Mrs. Wendel Schwab on Sunday, July 24 at the baptismal ceremony held in the Church of the Holy Child.

Rev. J. J. Moulenburgh officiated. Godparents are Philippine Schwab and Joseph Zunti.

Irrigation Officials At Field Day Here

About 35 representatives from widely separated parts of the province were in attendance on Tuesday at a field day in Summerland for the B. C. Irrigation Association.

Attending were agronomists and engineers interested in irrigation. The morning was spent at the experimental farm studying experimental work on soil moisture and irrigation problems. In the afternoon, a tour was made of the Summerland Irrigation system with the assistance of Councillor H. R. J. Richards and K. Blagborne.

The day's events were convened by Dr. J. C. Wilcox.

HOME AGAIN

Mr. and Mrs. L. F. Haggman and two children have returned from a motor trip to the Atlantic coast and the United States. They spent two days in Dartmouth, N. S., with the former Summerland residents, Mr. and Mrs. Fred Schumann who sent best wishes to their many Summerland friends.

E Derringer has returned after a visit to friends on the prairies. Mr. and Mrs. T. A. Walden have returned from a weeks visit at the coast.

Mr. and Mrs. C. F. M. Guernsey and children have returned from a two week motor trip to Banff and surrounding points.

Mrs. C. Bernhart and children returned Sunday from New Westminster where she attended her sister's wedding. On her return she was accompanied by her aunts, Mrs. A. J. Allyson and Miss V. Bowells of New Westminster.

Wins Sunday Puts Macs Close to Top Position

Oliver OBC's
Summerland Macs 16 12 4 .750
Kamloops Okonots 14 10 4 .714
Penticton Red Sox 14 9 5 .540
Kelowna Orioles 14 8 6 .650
Vernon Canadians 15 3 12 .200
Pitching 14 strikeouts and allowing only two hits, Billy Eyre Sunday sparked the Macs to a shutout over Kelowna Orioles and revenge against the team which broke up the Macs winning streak earlier in the season.

Sunday's game was the last home game for the Macs in this season's schedule and their most important tilt will be next Sunday in Oliver when chances for the locals to take the pennant may well hang in the balance. A win next Sunday will put the local nine back on top of the league but they still have five games ahead of them while Oliver will have only three left to go so there is not much margin for error left if the Macs are going to end the season on top of the heap.

If, however, they continue the brand of ball they showed last Sunday, the top place of honor is practically assured. In five of Sunday's innings, Orioles got only three men to the plate before the side retired. In the other four innings, four men handled the bat before they were

back in the field. Eyre allowed only two bases on balls.

Macs collected a total of eight hits but only Lefty Gould was able to connect for an extra base. Ball pitched the distance for Kelowna and handed out seven free passes. Macs played errorless ball while the visitors had two chalked against them.

The game was scoreless until the fifth inning when with two out Gould and Hooker were each handed a base on balls and then Gordie Taylor singled to bring home Gould. Bases filled up then when Cristante collected a free pass and the stage was set for a big Summerland rally but Ball steadied down and fanned Eyre to end the inning.

Darryl Weitzel singled in the sixth and came in on Kilburn's single. Kilburn reached third on Gould's two-base hit and then came in when third-sacker Schaeffer muffed the ball when Hooker hit down the third base line. Taylor was hit by the pitch and again Macs had the bases loaded with two down but Taylor was taken out at second on Cristante's fielder's choice. Final run for Summerland was in eighth when McNiven worked a single into a run.

BERT BERRY'S

Fishing News

The reports, coming in from fishing show a slowing down on fishing in most places, which is common to hot weather.

Okanagan Lake
Pretty spotty, some catches of three or four fish but best fishing result in early morning and in evenings.

Fish Lake Camp
Not too much activity on Fish Lake but the upper lakes have been giving good catches.

Glenn Lake
A little slower but not bad early morning and late evening rises.

Headwater Camp
A couple of reports from here last week. Crescent was good and there seems to be lots of small ones in the lower lakes.

Silver Lake
No reports in from here but it should be O. K.

Sandy Munn back from Johnston Lake got one 4 1/2 pounder but had to return some larger ones because they were spawners.

A couple of big 16 pounders were caught on the Shuswap Lake so maybe the northern lakes are starting to come back.

Too many Councillors Committee Decides

Newly-formed steering committee on arrangements for Summerland's 50th anniversary celebration will meet next week and first order of business may be to accept resignations of some of its members and appoint replacements.

At the public meeting last Friday night, all nominations brought in by the nominating committee were accepted for the steering committee. They are Ivor Solly, Mrs. H. Whitaker, and Councillors H. R. J. Richards, Francis Stewart, J. R. Butler and H. J. Barkwill. Councillor Richards was chosen as chairman.

The steering committee met briefly following the public meeting to start on the job of appointing members to the various committees to be set-up.

This week Chairman Richards said there is a feeling among the members of the steering committee that it is overbalanced by members of the municipal council. The nomination committee had inter-

viewed eight people prior to the public meeting who had all agreed to act if chosen for the committee of five and then just before the meeting two of these notified him they would be unable to take part, leaving only six, four of them councillors, and the meeting offered no further nominations but rather voted that all six be named to the committee.

Councillor Richards said he is asking the nominating committee of which he was chairman, to meet with the steering committee and bring in further names. All of the councillors have indicated they would be only too happy to resign from the committee if given the opportunity, to make room for someone else.

"There has been some criticism that the steering committee is dominated by the council," said Councillor Richards, "It wasn't intended and we don't want to start on this job with any feeling of dissatisfaction in the community. It's too important for that."

Geordie Taylor In Second Place Among Batters in Okanagan League

Batting weakness of Summerland Macs is pointed up in the OMBL batting statistics taken up to and including games of July 17. Geordie Taylor in a close second place position is the only member of the team to make the top 10 in the league. Geordie has 18 hits and 11 runs to his credit out of 44 official times at bat to give him a .409 hitting average. League leader Sam Drossos has an average of .417 with 15 hits and 13 runs out of 36 times at bat.

Following are the batting averages for the top 10:

	AB	R	H	Pct.
S. Drossos, Penticton	36	13	15	.417
G. Taylor, Summerland	44	11	18	.409
B. Martino, Oliver	40	14	15	.375
R. Adams, Vernon	44	11	16	.363
R. Snider, Oliver	52	12	18	.346
W. Clifton, Penticton	55	14	19	.345
E. Russell, Penticton	52	18	17	.327
B. Kielbiski, Kelowna	46	5	15	.323
R. Evensen, Kamloops	41	14	13	.317
B. Raptis, Penticton	38	13	12	.315

Among OMBL pitchers, Billy Eyre holds fifth place and Don Cristante is in seventh. Here is standing of pitchers.

	Games	Won	Lost	Inns Pitched	Earned runs
Nagle, Kamloops	8	5	2	60	32
Martino, Oliver	10	8	1	73	22
Radin, Oliver	8	4	1	48	18
Clifton, Penticton	11	5	3	74	38
Eyre, Summerland	11	5	1	45	20
Getz, Penticton	7	3	2	31	14
Cristante, Summerland	10	3	2	48	18

Disappointed girl is Marilyn Bell, whose slight illness prevented her from attending the royal garden party. She has been confined to her bed for few days and may require a postponement of her attempt to swim the channel until August.

Rash of Errors Costs Sox Match With Oliver Sunday

Summerland juniors were unable to get up a full head of steam at Oliver Sunday and McNabb pitching for the southern nine managed to nip in the bud several rallies which were promised but never came off. Result was a 9-6 for Oliver.

The Red Sox seemed to have difficulty getting organized and seven errors cost them the ball game.

Skinner led off on the mound for the Sox and was relieved by Murray after five innings. Oliver picked up three hits off Skinner and six off Murray. Summerland batters connected for a total of nine hits off McNabb who went the distance for Oliver.

McNabb had 13 strikeouts to his credit while Oliver batters fanned 10 times, five before each of the Sox hurlers.

In spite of some loose playing, Summerland players were able to pull themselves together when the heat was on and prevented a real walk-away. Oliver left 11 men stranded on base while Summerland had only six.

Leadership see-sawed back and forth during the first five innings and Oliver went into the bottom of the sixth trailing by one run. Two markers in that inning pushed them into the lead and then a breakaway in the seventh gave them three runs and the locals

SUMMER SCHOOL ENDS

The two week summer school for the children of the Church of the Holy Child parish ended successfully Sunday with a picnic held at the summer cottage of the J. Betuzzi's, Crescent Beach.

were unable to again close the gap.

Harold Biollo, first man on the Sox batting order, started off the game with a run and Oliver lead-off man, Pinski matched it in the bottom half of the inning. Oliver pushed ahead with two runs in the second and Garry Hackman and Bobby Parker scored in the third to tie up the game. Biollo scored again in the fourth to put Summerland in the lead briefly but Oliver added another in the same inning to again tie the match.

Birtles run in the fifth had Sox back in the lead until the bottom of the sixth when the southern team moved ahead and then clinched it in the seventh.
