WEST SUMMERLAND, B.C.

Grower Interest In Canning Possibilities, "Forward Thinking"

The Valley's present peach crop is under federal price support on the deficiency payment basis, rather than a cannery formula, B. C. Tree Fruits general manager said this week.

Mr. Walrod was commenting on a Canadian Press story from Penticton, which said "failure" of industry officials and cannery officials to reach agreement for cannery peach prices in the Okanagan has removed any possibility of a guaranteed price for the valley growers.

Mr. Walrod said it was the B.C. Tree Fruit's understanding that a resolution of eight South Okanagan locals of the BCFG, asking their executive to consider entering the commercial cannery field, requested that a study be made of the economic aspects of the fruit industry entering in the field.

"This has no relation whatsoever", Mr. Walrod added to the failure of the industry and the canners to work out a practical formula for price support as reported by the Canadian Press.

"This request is considered by myself, at least, to be an example of forward thinking on the part of the growers and is a natural for those concerned with the marketing of larger peach crops in the future.

"The canning industry in B.C. is finding it increasingly difficult to meet competition from imported canned fruits," Mr. Walrod said. He indicated that a cost study by the tree fruit industry at this time would bring into sharper focus some of the problems with which B. C. canners are currently faced. A study that might indicate at what point the present cannery outlet should be augmented if necessary by growers themselves.

The release issued by the Southern District Council follows:

The August meeting of Southern District Council, BCFG, was held in the Hotel Prince Charles, Monday, August 25. The Council decided to invite Mr. Dave Hugh, M.E., to the September meeting to discuss the government's position on price support.

The Board of Governors' report given by Mr. H. J. Wells of Summerland, stated that this year saw the largest single days shipment of apricots ever to leave the Okanagan. The peach crop, but sales have been lower than last year, but much higher than growers are receiving in Washington State. Total advertising costs on soft fruit have been considerably reduced in 1936.

On a trial basis, some shipments of apples will be made to England in bulk bins this year.

In the B.C. Fruit Processors report presented by Mr. G. De. Brisay, the Council was told that orange-cot juice, the latest juice blend developed by B.C. Fruit Processors, will have a volume of about 100,000 cases in 1936. Apricot concentrate in 105-ounce cans is being sold in quantity to the H. J. Heinz Co. this year. Apple cider production will be greatly increased.

(Continued on Page Five)

Summerland's Peach Orchard Cemetery is today weed free, fresh-cut flowers adorn many of the graves, all this in striking contrast to the unkempt, weed-covered cemetery of a week ago.

Mart Kenney Here September 22 Big Doings Also On September 26-27

IN APPRECIATION

I walked in the lengthening shadows
Down the pathways of our cemetery
I saw all the freshly-cut flowers
And the proud headstones standing weed free.

I walked with an air of contentment
And a gratefulness deep in my heart
That our loved ones — tho' taken from us
Were remembered — and honored — apart.

I felt a new pride in our village
How quickly they righted the wrong!
My heartfelt thanks go to all others
Who helped this project along.

M. J. S.

Summerland's Centennial celebrations will be highlighted this month with two big events. On Monday, Sept. 22, Mart Kenney and His Western Gentlemen will play at a dance sponsored by the Summerland Centennial Committee under chairmanship of Ken Boothe.

The dance will be held in the High School auditorium with Canada's number one dance band featuring such talent as Norm Locke, Elaine Bishenden and the Kimberleys, and nine musicians.

The other event in the same week on Friday and Saturday, September 26 and 27, is the Summerland Board of Trade's annual Fruit Fair.

Already, a wide array of exhibits, hobbies, fruit, flowers, home-cooking, handiwork and art work have been arranged for.

Central theme will be a "dancing down through the ages" program.

The Vernon Girls McIntosh Pipe Band has been booked for the occasion and will appear on Saturday afternoon and evening. A midway, featuring one of the largest merry-go-rounds in western Canada, has also been booked. This will be located outside the arena while the big show will be inside.

Another feature attraction is the big talent contest. See details advertised inside. This carries a rich reward for winners and could be the start of a career, as along with the prizes is included an appearance on television over CIBC-TV.

Entry forms for this talent contest, which will be held on Friday evening, Sept. 26, can be found on page five.

Vancouver Takes Top Money in Horseshoe Meet

Summerland's second annual fall horseshoe tournament was run off during the Labor Day weekend. Attendance was not as large as hoped for, but the event attracted many players from as far afield as Vancouver and Trail.

Walking off with first and second money was G. Norman and Stan Dahl both of Vancouver.

Vancouver pitcher R. Wheeler captured first money in the "B" class with Summerland's Len Jackson taking second place.

In the "C" class, first money went to Junius Johnson, and second money to E. Gowing, both of Summerland. Summerlanders Len Jackson

and W. Hepperle took the Doubles with Stan Dahl of Vancouver pairing off with Junius Johnson of Summerland to take second place.

Dr. W. Evans to Practice Here

Dr. Wilford Evans will establish a medical practice in Summerland in immediate future. Dr. Evans, a graduate of the University of Manitoba, is the son of Mrs. C. P. Evans and the late C. P. Evans of Summerland. In returning to Summerland, Dr. Evans is giving up a 12-year practice in Vancouver. He will establish his office in the Medical Dental Building on Granville Street and will reside, at least for the present, in the Harvey Wilson home on Front Bench.

\$40,000 Money By-law For Electrical System

Within a few weeks the ratepayers of the District will have an opportunity to vote on a money by-law for the improvement of the Electrical System. In recent years the use of electricity in Summerland has increased at a tremendous rate. The total consumption for the year 1936 is now not sufficient for some of our peak months. This large increase has necessitated a continuous improvement in the distribution system. This has included a new switching station, rebuilding of lines with heavier wire and larger transformers and additional transformers to reduce the length of wire from primary circuits to the point of consumption.

With the present voltage the rebuilding of a distribution system has gone as far as is practicable with 4700 volts primary lines. Now the Municipal Council

is in the position of having to increase wire sizes if the 4700 volt distribution is to be continued. The services of Mr. M. A. Thomas, a Consulting Electrical Engineer, who is widely accepted in this field through British Columbia, has made a study of the electrical system and has recommended that the system be changed from the three wire delta 4700 volt type as at present to a four wire 8300 volt grounded wye type. Other engineers have verified the economic of this suggestion. The advantage of changing to the new system is that the present wire sizes will be ample for many years to come, line losses reduced and the system is better protected.

The West Kootenay Power and Light Company Limited have favored the change and this summer have installed three additional transformers

electrical energy available to the district. These three transformers are wired for the new system and will feed the circuits in West Summerland, Peach Orchard, Hospital Hill and lower town. These circuits will be energized under the new system within a few days. This much of the system had to be completed in order to utilize this additional supply of electricity made available by West Kootenay Power and Light at the new voltage. However the main part of the project will be completed in 1937 and the money by-law for \$40,000 will cover the cost of the new system. The amount of money required to build the system will be reduced or the system will be rebuilt in 1937.

This will be a self-liquidating by-law, retired with revenue from the Electric Light Department and will in no way affect the general tax structure which doubles the amount.

Winner of the Dewar Shield for first place in the Pacific National Exhibition District Horticultural Exhibit is this display from the Okanagan Valley. The exhibit from Langley placed second and Peace River third. Horticultural competition this year is greater than ever. The Pacific National Exhibition runs until Labour Day, Monday, September 1.

Police Launch Extradition Proceedings Against Morrison

Details of the shooting which sparked the Okanagan's greatest manhunt and led to the death of three RCMP personnel in a plane crash, was told before Magistrate R. A. Johnstone on Monday, when extradition proceedings were launched aimed at having accused John Morrison returned to Canada to face trial on a charge of attempted murder of RCMP corporal Ralph Brown of the Summerland detachment.

The shooting took place on August 5.

Corporal Brown narrowly escaped with his life when Morrison, the man of many aliases sought by police for questioning in the death of a woman picker at Kelowna, shot him twice.

Dr. H. B. Munn told the court that had the bullet which struck the corporal half an inch in front of the right ear "been half an inch the other way, it is almost certain death would have been the result."

Corporal Brown told the court he stopped Morrison and asked who he was. Morrison re-

plied that his name was Stevens and that he came from Langley. On being asked to produce proof of identification Morrison displayed a wallet with the name Donald Stevens, spelled with an "a", written on brown paper.

Inside the wallet was an unemployment insurance card bearing the name John Morrison, Vancouver.

While examining the wallet Cpl. Brown asked Morrison to step into the car to ride to police headquarters for further questioning. The corporal told the court he heard Morrison say "I'm sorry I have to do this," but before he had time to look up he was shot in the head. He said he heard two more shots but could remember nothing until he came to standing in the road calling for help. In the meantime, Morrison had disappeared.

Following the shooting, the RCMP launched one of the greatest manhunts in Canadian history until Morrison was finally brought to bay and shot in the hip near Tonasket in the United States. For 12 days he eluded RCMP check points throughout the Southern Okanagan.

At Monday morning's hearing depositions were also taken from farm labor placement officer J. S. Kirk, the man who spotted Morrison in a West Summerland cafe and touched off the search which led to the shooting.

Penticton lawyer John S. Akins represented the crown.

BACK FROM USA.

G. E. Woollams, Dr. D. L. McIntosh and Dr. L. E. Lopatecki of the Summerland Plant Pathology Laboratory have just returned from attending the 50th Anniversary meetings of the American Phytopathological Society in Bloomington, Indiana. Enroute, Mr. Woollams conferred with vegetable disease workers at the University of Wisconsin, Madison, Wisconsin.

Softball Tourney Very Successful

Annual Labor Day softball tournament sponsored this year by the Centennial Committee resulted as follows:

First prize went to Kelowna second prize to Summerland and third prize was split between Marshalls and Cozy Lunch of Penticton.

Summerland and Kelowna were tied and a sudden-death game was played in which Kelowna came out on top and left Summerland in second place.

This was a very good tournament and the Summerland Macs Ball Club would like to thank the Centennial Committee for sponsoring the event and making it so successful.

Back to school went a total of 1,365 students on Tuesday of this week. This represents an increase of some 30 over last year. The High School has an enrolment of 456, the MacDonald School 536 and the Trout Creek School, 75. Five new teachers have taken up their duties and four of them are pictured above, from left to right, John Warren, Cambridge, England, Joe Makas of Coquille, Miss Doreen Vlast of Powell River and Don Puddy of Penticton. Missing from the picture is Miss Hamilton, Okanagan Falls.

Letter to Editor

The Editor,
Summerland Review.

Sir:

I trust you will grant me space in the Review for the following observations.

The subject of your editorial "Public Right" demands examination. The ringing phrases of its opening paragraph may well deceive many true sportsmen of Summerland as to the actual state of affairs.

At the meeting called for the purpose of re-organization 18 were present. The majority of these, disgruntled gentlemen - the term is used merely to indicate the sex - met for one purpose only, namely, to force issue on the question of charges at the new Hatheume Lake Resort. I did not recognize the Review as being present but can assure you that "half truths" would be a very generous estimate of many of the statements given as facts.

The name Hah-hume goes a long, long way back and Big Fish swam its water long before the local club ever heard of it, making your use of the expression "Vested Interest" rather presumptuous.

Your employment of the word "Toll", with its connotation of tax imposition is well calculated to arouse resentment. But if we look on it as payment for value received it becomes logical and acceptable. We expect to pay for nearly everything we want, be it goods, services or a weekly nickels' worth of misinformation. And we are free to buy or not as we choose.

Did you know, Mr. Editor, that for over forty years sportsmen have been going into that area for fish and game? Not many, for they paid a heavy "toll" in time, sweat and blisters! Today as a result of private enterprise, one can for a trifling sum, enjoy the benefits of easy access and other aids in camping and fishing. The attitude adopted by a few soreheads and eloquently supported by the Review shows a strange confusion of the meaning of Privilege and Right.

The sixth and the final paragraphs of your article show a lack of understanding that really saddens me. The old time sportsmen of the district knew full well free access, and by this I mean free and easy access; to a lake rings the death knell to good fishing as well as to that indefinable sense of satisfaction one feels on reaching an out-of-way beauty spot. I do not need to list the lakes in the vicinity of Summerland to uphold this view. The very fact that so many from here show such interest in a newly developed but more distant area supports it. Usually, under private enterprise, the cost measured either in effort or dollars automatically settles at a point at which the rule of the greatest good for the greatest number obtains.

If I may trespass further on your space I should like to review the history of one lake, Whitehead Lake, long the Mecca of Summerland fisherman, was reached by nine hilly miles of trail after thirty miles of rough road. For the last ten years or so private enterprise made it accessible by four miles of trail from a fishing camp. Summerland fisherman in increasing numbers welcomed and supported the new service and virtually no one used the old and arduous route. This year new logging roads have provided free and easy access. My information is that this has left a trail of defiled cabins, lost boats and broken equipment - and the fishing - well make your own guess, Mr. Editor.

Yours Truly
Rex Chapman
West Summerland

'The Public Be Damned'

Possible action by the Summerland Fish and Game Club to seek free access to Hatheume Lake and The Review's championship of that cause in last week's issue has aroused the wrath of Mr. Rex Chapman, whose letter on the matter is singeing the left-hand column of this page.

It is interesting to note that Mr. Chapman has given us a new definition of what constitutes a gentleman. A gentleman, judging by Mr. Chapman's letter, is one who agrees with Mr. Chapman - and conversely one who disagrees, is undoubtedly, in Mr. Chapman's book, a "cad".

So we regretfully surrender whatever claim we may have had to the title of gentleman, for we disagree most emphatically with Mr. Chapman's arguments regarding Hatheume Lake.

Last week in this space we commended the people who built a road into this lake and who have started a resort. We were emphatic that they were entitled to reward for their "initiative" but they are not entitled, in our opinion, to retain this vast acreage of lake, wood and mountain as a private preserve.

Public access is provided at all lakes, as a direct result, so we understand of a squabble between the Dole interests and Mr. Chapman, the Dole people, according to Mr. Chapman's own story, sought to acquire the entire frontage at Penask Lake. Our Mr. Chapman, zealous in his own interest protested the move, the net result being that the government took a closer look and moved in the public interest to establish right of access. And now a result of the Penask Lake episode, the government decrees that no lake frontage shall be turned over, holus bolus, and that always public access must be provided for. Good, so far as it goes, there is public access to Hatheume Lake. But that is of little use to the public if the road to that public access is controlled by private interests. Our whole contention is that the public should not be placed in a position where it must pay toll in order to be able to enjoy that which belongs to the public.

And so there is our case and the case of every person in this province

who recognizes the right of the people to access to their lake and mountain heritage.

In the case of Penask Lake it was only the fact that two land barons squabbled, so to speak, over the spoils, that the public came into its own in the matter of free access.

And it is quite in the cards that if the Summerland Fish and Game Club, which we maintain has, by virtue of stocking Hatheume some years back, a "vested interest" in the lake, remained apathetic in the face of the situation which has developed, we would wake up one fine day to find Hatheume sealed off permanently to the public, unless prepared to pay toll.

Mr. Chapman takes exception to The Review's use of the word toll - but he cannot evade the fact that it is a toll road insofar as no one can travel it without paying toll, unless free passage is granted by the builders of the road.

We repeat that The Review hopes to see the enterprising Redstone brothers of Peachland adequately rewarded for their initiative and enterprise; but we are also unshakable in our belief that this area of mountain and lake, described by columnist George Inglis in the Kelowna Courier as "Paradise 7", should be set aside as a public recreation area or park. Mr. Inglis wrote of this country:

"Tamed, teaming with fish and game, dotted with open meadows and parklands, brushing shoulders with the dense jackpine, this country will give the city-dweller the right touch of adventure and "hardship" he craves for his annual jaunt away from his desk. It will also give the ardent sportsman the opportunity to land that big one, stalk the stately moose or bag his limit of succulent ducks.

Concludes George Inglis, 'It's strictly cloud 7'. That, is the country which Mr. Chapman seeks to preserve for the enjoyment of the favored few and to the exclusion of the many who do not possess four-wheel drive vehicles and who certainly could not afford the tariff and the toll levied by private enterprise.

Mr. Chapman's letter shows a degree of rancor and intolerance that ill befits a man who evidently thinks himself a sportsman.

His letter can be summed up in one phrase: "The public be damned."

Deadline Nears To Trade Bonds

Local residents who have yet to convert their Victory Bonds were reminded this week that deadline day is just around the corner.

Finance Minister Donald Fleming, reporting on Tuesday night in a special address that more than three-quarters of the Victory's have already been exchanged for Canada Conversion Loan Bonds, said he hoped that no one would miss out on this "unprecedented opportunity."

He added that efforts were being redoubled in the few days left before September 15 to bring the opportunity to the attention of anyone still owning Victory Bonds here and in other cities, towns and villages across the country.

Pointing out that thousands of Canadians will have returned from vacations during these last few days, the Finance Minister said he hoped that all would make conversion a matter of immediate concern.

"I urge all those who have not yet grasped this opportunity to do so while there is still time."

Part of the Minister's remarks were aimed at bondholders who may have felt that their own holdings of Victory Bonds were too small to be worth converting. He stressed that regardless of size — \$50 or \$500, or \$5000 — it is to the owner's advantage to exchange his old bonds for new ones yielding a higher return and in addition receive cash adjustment.

He said, too, that some Canadians may not yet realize the value of their own Victories, and suggested that everyone holding government bonds of any description check the serial numbers. A number begins with "L7", "L9", "P3", "P5" or "P7", it means that bond is a Victory.

Mr. Fleming also reminded Canadians who do not own Victory Bonds that they, too, can share in the new loan. Victories can be bought at any bank or investment dealer, giving the

FINANCE MINISTER DONALD FLEMING

buver the right to convert. The Finance Minister said the conversion total achieved to date meant that the loan was already a tremendous success and pointed out that it represented an accomplishment in government financing unmatched in scale by any other country in the western world.

He added a note of special interest to small communities throughout the nation, by emphasizing that the loan would help remove market uncertainties arising out of the imminence of large Victory Loan maturities and that extent assist in the planning of development projects by municipalities.

Garden Lovely Setting For Jensen-Adams Nuptials Here

Mr. and Mrs. William Jensen

The Peach Orchard garden of Mr. and Mrs. Clarence Adams, home of the bride, made a pretty setting for the wedding on Saturday afternoon, August 30, at three o'clock of Miss Pauline Cooper and Mr. William Jensen, Rev. C. O. Richmond officiating.

Given in marriage by Mr. C. A. Adams, the bride was lovely in a Princess blue semi-formal of nylon net over taffeta with which she wore a headdress of blue flowers and carried a colonial bouquet of pink and white carnations.

Attending as bridesmaid Miss Ann Beggs' dress, also a semi-formal, was of Flamingo nylon net over taffeta with matching headdress and accessories. Her flowers were also pink and white carnations.

The groom's brother-in-law, Mr. C. Garrett, was best man.

The reception was held outdoors under the shade of a huge chestnut tree, where bouquets of asters and gladiola decorated the scene and refreshments were served from a table centered by a three-tiered wedding cake, pink and white roses and white tapers.

Out of town guests were Mr. and Mrs. Don Spiers, Kamloops; Mrs. A. Jensen, mother of the groom; Miss Rosemary Jensen, sister of the groom, Mr. and Mrs. C. Garrett, brother-in-law and sister of the groom and their son, Cal; Mr. and Mrs. S. Killick, Penticton.

Mr. and Mrs. Jensen left on a honeymoon trip to Campbell River via Kamloops. They will reside in Lake Cowichan, where the groom is with the B.C. Forest Products and the bride will be on the teaching staff of the Elementary School.

Celebrate 25th Anniversary

On Saturday evening, August 30, friends gathered at the beach home of Mr. and Mrs. A. Menu to honor Mr. and Mrs. Dave McInnis on the eve of their 25th wedding anniversary.

A social hour was enjoyed with William Laidlaw acting as emcee and L. Shannon at the controls of the tape recorder, when each guest greeted the honorees with congratulations or songs.

Mrs. Kay Sanborn made the presentation of a purse of silver Centennial dollars to Mr. and Mrs. McInnis on behalf of their friends. Everyone joined in singing "They are Jolly Good Fellows." Mr. and Mrs. McInnis thanked their friends for the gift and the good wishes accompanying it.

A buffet luncheon was served by Mrs. Menu assisted by Mrs. L. Shannon, Mrs. Norm Holmes and Mrs. H. Hackman.

Shower Honors August Bride

Miss Pauline Cooper, whose marriage to Mr. William Jensen took place Saturday, Aug. 30, was the recipient of many lovely and useful gifts when Mrs. A. F. Crawford entertained at a miscellaneous shower for her on Wednesday, Aug. 27. Friends and neighbors gathered to give the bride-to-be a happy send-off included: Mrs. C. A. Adams; Mrs. Irvine Adams; Mrs. W. Birtles; Mrs. F. Beavens; Mrs. L. Fudge; Mrs. G. Beggs; Mrs. K. Boothe; Mrs. T. B. Lott; Mrs. J. Wilson; Mrs. F. E. Atkinson; Mrs. P. Beulah; Mrs. Alex Kean; Mrs. J. Sheelley; Miss Kathleen Yamabe; Miss Midori Matsu; Miss Ann Beggs; Miss Barbara Fudge.

Be On Hand Early To See Circus Awaken

Did you ever stand vigil as the long line of gaily painted circus trucks, filled with travelling wonders, pulled onto the circus lot at the break of day? Or see this mysterious colossus of matchless efficiency rouse itself by disgorging hosts of men, women, horses, and animals, there to erect and house itself in its wonderful city of tents.

If you have never experienced this great adventure do not miss the opportunity which is now so near at hand. And, if you have, come again and note how tremendous has been the advancement in the efficiency with the use of the latest mechanical inventions.

You will gaze upon long line of cages, wagons, vans and mammoth equipment trucks, all loaded with wonders of this mighty circus, the unloading of which forms a great area of motion which gradually takes shape of a gigantic tented city.

There is nothing like it in all the world — this daytime advent of the Trapeze Brothers Circus. You will see the great dynamos that generate current for the hundreds of arc lamps and bulbs that light the tents and the streets of the Magic City.

In another part of the Wonder City you will see stables built of canvas with sleek Shetland ponies. You will see working elephants moving great wagons with as much ease as mother pushes her carpet sweeper. You will look upon great tent poles being raised skyward to support the "Big Top".

You will see the placing of the vast stretches of canvas to form the gigantic tents. You will learn how the keepers of the wild animals train and house, bed and feed them.

ABOUT CREDIT UNIONS

— LOANS —

A Credit Union provides loans to its members, wherever such loans will benefit the member or his family.

From time to time, in every person's life, it becomes necessary to borrow. This may take the form of a straight loan from a lending institution or a purchase on the instalment plan. In either case, it is a form of borrowing.

Frequently short term loans permit us to obtain many things which make our everyday living a little more pleasant.

Comings & Goings

Mr. and Mrs. Gordon McArthur, Trout Creek, had as a weekend guest Mrs. M. Hickman of Tappan.

Mr. and Mrs. Eric Bullock and family have returned after spending two weeks vacationing at the coast.

Corp. and Mrs. Gordon Pohlman have returned to Calgary after visiting at the home of the latter's parents, Mr. and Mrs. E. Harbicht.

Mr. and Mrs. E. Harbicht and family spent the weekend visiting in Rossland.

Mr. and Mrs. Milt Weiss and family are occupying Mr. and Mrs. Lashley Haggman's residence on the Sand Hill Road.

A recent visitor for a few days at the home of Mrs. Peter was Mrs. A. Byatt of Vancouver.

Mr. and Mrs. Verne Charles have visiting them from Toronto Mr. Charles' brother and sister-in-law, Mr. and Mrs. W. D. Charles.

Mr. and Mrs. Art Dunsdon and family have returned from a week's holiday in the Cariboo.

Mr. and Mrs. Les Rumball and family spent the weekend at Silvery Beach Shuswap.

Mr. Ron Dunsdon was in Vancouver for several days and attended the PNE while there.

Mr. and Mrs. J. Y. Towgood have visiting them from Powell River their son and daughter-in-law, Mr. and Mrs. Jim Towgood.

Mrs. Hank Wouters and Mrs. N. Buddingh drove to the Fraser Valley last week. Mrs. Wouters visited in Langley while Mrs. Buddingh attended a wedding in Abbotsford.

Mrs. W. A. Laidlaw has left to visit relatives in Scotland, flying the Polar route.

En-route to Calgary after a holiday at their summer home on Salt Spring Island, Rev. and Mrs. W. R. Ashford were guests last week at the home of Mr. Fred Gartrell.

Mrs. John Vandrick, here from England, is guest at the home of her brother-in-law and sister, Mr. and Mrs. Bryce Farrow. Dr. Vandrick is taking a post-graduate course in surgery at Shaughnessy Military Hospital, Vancouver.

Mr. and Mrs. A. K. Elliott have as guests Mrs. Lee Hatfield and Miss Maud McLaughlin, both of Vancouver.

Chuck Brawner of Victoria and Ken Brawner of Vancouver visited their parents, Mr. and Mrs. V. Brawner, over the weekend.

Mr. and Mrs. Jack Dunsdon and family and Mrs. W. W. Hemingway visited Vancouver and Chilliwack last week.

Staying at the home of Mr. and Mrs. A. F. Crawford over the long weekend were the latter's brother and his wife, Mr. and Mrs. A. Elms of Vancouver.

In Summerland to attend the Jensen — Cooper wedding, the groom's mother, Mrs. A. Jensen, his sister, Rosemary Jensen and sister and brother-in-law, Mr. and Mrs. Cleve Garrett and son Cal, all of Vancouver, were visitors at the home of Mr. and Mrs. Clarence Adams.

Mr. and Mrs. G. W. Dunsdon and Gordon have returned home after spending two weeks visiting in Chilliwack.

Mrs. K. Norstrom enjoyed a week's visit with her daughter, Mrs. H. A. Wallin, and her little granddaughter, Kerrie Lee of Edmonton.

Mrs. Mary Hall of New Westminster has been spending a week's holiday at the home of Mr. and Mrs. Wm. Brown.

Mr. and Mrs. Lashley Haggman, Diane and Gerry, have returned to their home in Burnaby. Mrs. Haggman and children spent the summer in Summerland at their Sandhill home here, Mr. Haggman joining them for weekends.

Dr. W. E. Mason of State College, Pennsylvania, and Mrs. Mason have returned home after spending two weeks visiting at the home of the latter's father and brother, Mr. Harold Gilmour and Mr. Wm. Gilmour, Trout Creek.

Mr. and Mrs. Gerald Dent of Trout Creek have as their guest for an extended visit Mr. Dent's mother, Mrs. W. J. Dent of Squamish.

Mr. and Mrs. W. W. Davis of Trout Creek spent the weekend in Vancouver to attend the PNE and while there they visited with Mr. and Mrs. Bob McCormick, New Westminster, and Dr. and Mrs. Clifton Stark.

Mr. and Mrs. George Lewis have had visiting them from Powell River their daughter-in-law, Mrs. Richard Lewis and baby son.

Mr. and Mrs. W. F. Woodbridge's son, Don, has returned via the Panama Canal from England, where he had been visiting with relatives since last December.

Mr. and Mrs. E. O. White have visiting them their daughter, Mrs. Gerald Andrews, and her daughter from Victoria.

Mr. and Mrs. George Harper, Trout Creek, have as their guests Mr. and Mrs. Art Napier, Prince George.

Mr. and Mrs. Ken Williams visited Trail over the weekend, staying with Mrs. Williams' sister and brother-in-law, Mr. and Mrs. O. I. Johnson.

Mr. and Mrs. T. S. Manning and family spent the holiday weekend in Vancouver.

May Pay To Leave Cee Grades On Trees

ORCHARD RUN

By Wally Smith
VANISHING RETURNS

If the present trend of paying higher wages in the fruit industry continues the apple grower will be forced to make some drastic changes in his orchard practices, particularly in harvesting the crop.

Take the case of the teamsters' demand for a 25 percent wage increase. The International Brotherhood of Teamsters are bargaining agents for the employees of the grower-owned and operated B. C. Fruit Processors Ltd.

The 25 percent pay increase this union is seeking represents a charge of approximately \$5 a ton on the apples put through the processing plants for juice. Five dollars a ton is just about the amount the grower received for processing apples last year.

Unless the price of apple juice can be increased a corresponding amount the grower will get nothing for his apples that go into juice. It would be nice if sale price of the end product could be increased to keep pace with production costs—the way it works in the steel industry. But in the fruit processing business it doesn't work that way

for there is stiff competition from similar products and competitive prices must be met.

LEAVE 'EM

If the Teamsters get their 25 percent increase the grower would be left with two choices as to what to do with his cee grade apples and his green or small culls. He can pay cost of picking, hauling and running them over the grader and then supply them free of charge to the processing plants so that the Teamsters may get their pay increase, or the grower can elect to leave most of them on the trees at picking time and save himself a lot of expense.

Even without the Teamsters pay increase the grower would be money ahead if he left most of his cee grade on the trees. He would have to color pick and this would cost him a little more money, but it would pay him to do so. I am told that leaving cee grade on the trees is common practice in some of the Washington and Oregon orchards. If they can do it, so can we.

ONE IN THREE

The industry is now processing almost one box of apples out of every three grown. It costs the grower at least three dollars to grow those three boxes of apples. The two boxes sold on the fresh fruit market returned him less than a dollar a box. The one box that went through the packinghouse and then on to the processing plant returned the grower 10c.

After spending three dollars to grow three boxes of apples the grower gets back something like two dollars. Is it any wonder he's going broke? Some growers are doing better than this but others are doing worse.

Of course a lot of the processing apples are not cee grade; they are culls because of size, blemishes, hail, lack of color and so forth. The apple picker cannot be expected to grade and cull the apples as he picks them. Nevertheless, color picking is practical and it pays off for picking such trees as Common Delicious and some other varieties that sometimes run 50 percent higher in cee grade.

It costs, say 13 cents to pick a box of cee grade on all apples—just as much as it costs to pick a box of extra fancy apples. Add another three to four cents for trucking to the packinghouse

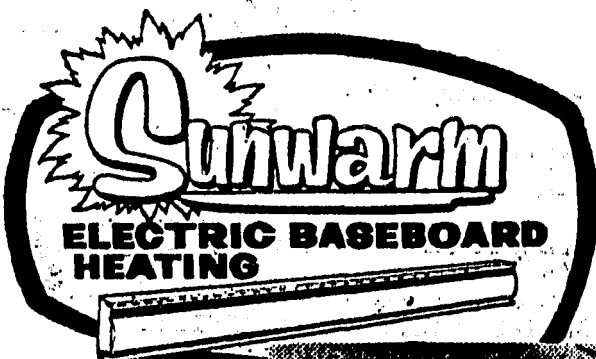

and another 50 cents for receiving, running it over the grader and other charges and you have 65 cents charged against that box of apples which is almost sure to end up in the juice plant.

As a processing apple it will return the grower only a dime (last year's prices) so it costs the grower 55 cents cash outlay because he picked that box of processing apples instead of leaving it on the tree. If that box of apples was cee grade the packinghouse overhead was pretty well taken care of in the price the processing company paid for it, about \$25 a ton, but if the apples didn't have enough color to make cee grade they would be classed as culls and at least 20 cents a box charged to the grower.

REVAMP ORCHARDS

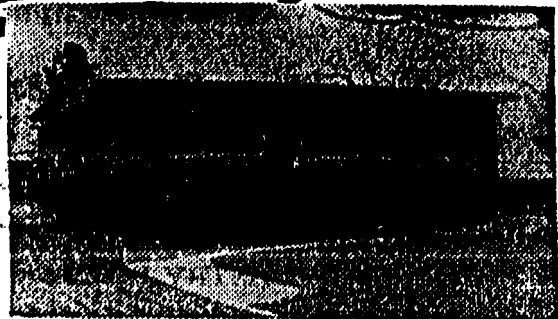

With color picking a certain amount of cee grade fruit will get into the boxes, but this amount can be kept small enough so that it can be sold on the fresh fruit market.

The basis of the trouble, of course, is the fact that the industry produces such a high percentage of poor apples. It looks as though the grower is going to stay up to his neck in financial troubles until he removes old, unproductive trees and poor varieties and replaces them with superior red strains that color so well, there is an extremely small percentage of cee grade.

Valley Baptist Association To Develop Camp Site at Paachland

Municipality of Summerland

POSITION VACANT

Applications will be received by the undersigned until noon September 8th, 1958 for the position of MUNICIPAL ACCOUNTANT

Duties to include all municipal accounting and supervision of Burroughs Sensimatic billing machine operation for all accounting including utilities.

Applicants should submit two references from previous employers and state experience in municipal work, if any. Please state salary expected. Duties to commence not later than October 1st. Further information may be obtained from the Municipal Office.

G. D. SMITH,
Municipal Clerk.

Peachland Municipal Council meeting last week with Reeve Jackson and Councilors G. W. Hawkesley, A. E. Miller and A. R. Miller present, agreed to sell some two and half acres of the Archibald property to the Okanagan Baptist Association for development as a summer camp.

Price was set at \$300 plus the cost of transfer. Ray Harrington closed the deal on behalf of the association making a \$25 deposit. The acreage, Lot 6, Map 410, O.D.Y.D. is ideally located for a campsite, bordering on Deep Creek.

PEACHLAND

By Mrs. Maud Witt

Mrs. Cecil Leduke and family left Monday morning for Burns Lake. Cecil had preceded them and purchased a new home. They will make their new home there and it is with much regret

that we bid them goodbye. It is Burns Lake good fortune and Peachland's loss. They were good neighbors, good citizens and good friends. We wish them success in their new home.

Mrs. W. D. Miller entertained on Sunday her son from Cranbrook, Donald Miller and Mrs. Miller, and three daughters, Mr. and Mrs. Bryson White from Vernon, Mr. and Mrs. Lyle Seaton from Winfields.

Mr. and Mrs. Graham Gerrie and children were weekend visitors at the P. C. Gerrie home.

Miss Shirley May Gerrie is at home and will visit Valemount before returning to Vancouver and the university.

Mr. and Mrs. Alex Cockburn and Sandra arrived from Vancouver, to visit Mr. Cockburn's sister, Mrs. Vic Milner-Jones.

Mr. and Mrs. W. C. Trefry and Betty are visiting at the home of her aunt, Mrs. Ted Topham, and Mrs. Ruffles, Sr.

Mrs. Ray Beaumont, who has visited the past week with the Selwyns, left for Vancouver on Thursday.

Mr. and Mrs. Baptist and their grandchildren, Annita and Tex left Peachland for their home at Spillimacheen on Sunday.

Visiting at the home of Mrs. Witt and Mrs. Valentine, are Mr. and Mrs. H.T. Waters and Narda and Leighton from Nelson, also Mr. and Mrs. Bob Harver and Robbieand (the twins) Heather Hertha, from Victoria.

A very successful fall fair was held in the new hall by the Peachland W. I. on Friday. The event was very well attended.

IN YOUR ORCHARD

By Alec Watt

EARL COLOURING OF RED SPORTS OF DELICIOUS

The development of early red color in apples may come about as a result of physiological differences between one tree and its neighbors. For example, when trees are starved for nitrogen the fruit is usually smaller and brighter red than fruit from surrounding trees which have a normal level of nitrogen.

However buds taken from these trees and placed on to normal nitrogen level trees will no longer produce highly colored apples but will produce fruit of a color more near the average level of the whole orchard. On the other hand a branch or a spur may occasionally develop which has fruit of a brighter red color, because of a sudden change in its chromosome make up. When buds or scions are taken from this branch and placed on other trees the extra color goes with them and is transmitted in all the scions and tissue which originate from that original branch. When this happens the phenomenon is called a "sport".

Some interesting and valuable fruit varieties have originated as sports. A classic example is the nectarine which has the property of sporting from peach and may go back to peach again.

More recently the sporting properties of red apples have produced more and more highly colored strains and these have been propagated to improve color grades within the varieties.

About thirty-five years ago the original red sports of Delicious started to occur. These were Starking, Shotwell, Richard, and Turner Red. Because of high color intensity grades obtained with these strains were greatly improved over the original Delicious. However, during the past decade the Starking and to some extent the Richard, have in turn produced sports of even more intense color. Today these are being propagated by nurseries under various names and are known as the "double red strains". They represent as much of an advance in color over the old Red Delicious as the old Reds did over the Common Delicious.

Our own industry has purchased the entire stock of budwood of the Harrold red strain, an early coloring sport of Starking type. The budwood is being propagated by the Experimental Farm in Summerland and will be available to growers in 1959. This should enable B.C. growers to maintain a high standard of red color in their Red Delicious and compete marketwise with Double Red Delicious from other areas.

Meanwhile the search for early coloring sports is still going on. Orchardists might keep an eye out this fall for any outstanding red colored fruit, whether it be single spur, a whole limb or a whole tree. If the horticulturists at the Experimental Farm or the B.C. Department are notified of any such peculiarity they will be able to make a check and, if necessary, obtain buds or scions wood from which to propagate test trees.

Regular Meeting
Wed., Sept. 10
8:00 p.m.

OMBL Playoff Dates

The Okanagan Mainline Baseball semi-finals will start September 14, following a sudden-death game between Kelowna Orioles and Kamloops Okonots to determine the OMBL pennant winner. The two clubs finished regular season play in a tie for first place with identical

records of 20 wins, 8 losses each. The sudden death game will be played in Kamloops ball park on September 7.

The winner of that game will go against Oliver in the semi-finals while the loser meets Summerland, with first games of the semi-final round being played on the home grounds of Kelowna and Kamloops. Both semi's will be a best-of-three series with the games on Sept. 21 at Summerland and Oliver being double-headers if necessary.

The OMBL finals will start September 28 between the two teams surviving the semi-final round. The first game will be at the home of the team which finished highest in the final team standings. The finals will be single games played on Sept. 28, Oct. 5 and 12.

Final statistics on league play have not been compiled and released due to three scoresheets from Penticton not having been filed with the secretary of the league. This will be done as soon as the scoresheets are received.

Obituary

KILLICK - Mrs. Clara M. Killick, 73 years of age, formerly of West Summerland, passed away in Penticton Hospital August 29, 1958.

Left to mourn her loss are: one son, Robert G., of West Summerland; one daughter Mrs. Anna Davidson of Penticton; and four grandchildren.

Funeral services for the late Mrs. Clara M. Killick were conducted from the Free Methodist Church, West Summerland, Wednesday, Sept. 3 at 2:30 p.m., Rev. J. H. James officiating. Interment in Peach Orchard Cemetery. Roselawn Funeral Home entrusted with arrangements.

SCHEDULE OF PAYMENT OF DEBENTURES

Column 1 Year	Column 2 Total Principal Payable	Column 3 Total Interest Payable	Column 4 Total Principal & Interest Payable
1959	3,000.00	2,000.00	5,000.00
1960	3,000.00	1,850.00	4,850.00

The Corporation Of The District Of Summerland BY-LAW NO. 870

A Bylaw of The Corporation of the District of Summerland to authorize the undertaking of certain Electrical Works and to authorize the borrowing of the sum of \$40,000.00 for the purpose of such works.

WHEREAS it is deemed advisable and expedient to undertake the following works, namely, the improvement of The Corporation of the District of Summerland's electrical distribution system by converting the present primary distribution system from the 4,800 volt Delta to a 8,300 Volt Grounded Wye system:

AND WHEREAS the estimated cost of the works described in the next preceding paragraph hereof is the sum of \$40,000.00:

AND WHEREAS it is deemed necessary to borrow upon the credit of The Corporation of the District of Summerland the said sum of \$40,000.00, which is the amount of the debt intended to be created by this By-law, the said sum of \$40,000.00 to be borrowed pursuant to the provisions of this By-law to be used for the purpose of improving The Corporation of the District of Summerland's present primary distribution system by converting the present primary distribution system from the 4,800 Volt Delta to a 8,300 Volt Grounded Wye system:

AND WHEREAS the estimated lifetime of the work by this By-law hereinafter authorized and described in the next preceding paragraph hereof is 15 years:

AND WHEREAS it is intended to create the debt hereinafter authorized in the year 1958, and the amounts of the assessed value for general Municipal purposes of the taxable land and improvements for the years 1958, 1957 and 1956 are respectively as follows:-

For the year 1958 - \$6,358,407.00
For the year 1957 - \$6,227,492.00
For the year 1956 - \$6,027,552.00

AND WHEREAS The Corporation of the District of Summerland holds no subsisting Certificate of Self liquidation granted by the Inspector of Municipalities in respect to any utility system or other Municipal enterprise of the said Corporation:

AND WHEREAS the amount of the existing debenture debt of The Corporation of the District of Summerland is the sum of \$358,510.28, and no amount of the principal or interest of the said Debenture debt are in arrears:

AND WHEREAS the approval of the Inspector of Municipalities for the Province of British Columbia has been obtained to this By-law after the third reading of this By-law by the Council of The Corporation of the District of Summerland and before the reconsideration and adoption thereof:

Now therefore the Municipal Council of The Corporation of the District of Summerland, in open meeting assembled, enacts as follows:

1. That it shall be lawful for The Corporation of the District of Summerland to do the work hereinafter in this section of this By-law described, and such work is hereby authorized, namely, to improve the existing electrical system of the said Corporation by converting the present primary distribution system from the 4,800 Volt Delta to an 8,300 Volt Grounded Wye system.

2. That for the purpose of doing the work authorized by section 1 of this By-law it shall be lawful for The Corporation of the District of Summerland to borrow upon the credit of the said Corporation the sum of \$40,000.00; and to issue Debentures for such sum with interest at Five Per Cent (5%) per annum as hereinafter more particularly described, and the said sum of \$40,000.00 to be so raised by borrowing shall be used for the work authorized by section 1 of this By-law.

3. That the Debentures authorized by this By-law shall be serial Debentures and shall be dated the first day of November, 1958, and shall have attached thereto coupons for the payment of interest at the rate of 5% per annum payable semi-annually on the first day of May and the first day of November in each year of the currency of the Debentures, and the principal of the said Debentures shall be repayable by annual instalments during the currency of the Debentures, and the instalment for the repayment of principal in each year together with the amount required for the payment of interest in each year shall be as set out in the following schedule:-

4. That the respective specific sums set out in Column 2 of the schedule contained in section 3 of this By-law shall be provided in each respective corresponding year set out in Column 1 of the said schedule during the currency of the said Debentures for the repayment of principal, and the respective specific sums set out in Column 3 of the said schedule contained in section 3 of this By-law shall be provided in each respective corresponding year set out in Column 1 of the said schedule during the currency of the said Debentures for the payment of interest.

5. That during the currency of the said Debentures The Corporation of the District of Summerland shall levy and raise by a rate sufficient therefor over and above all other rates, on all the land and improvements subject to taxation for general municipal purposes within the said Corporation at the same time and in the same manner as other rates, in each of the years set out in Column 1 of the said schedule contained in section 3 of this By-law the total amount required for repayment of principal and payment of interest as shown in Column 4 of the said schedule opposite the year shown in Column 1 of the said schedule, so that the said Corporation may make the annual repayment of principal and payments of interest required by the said Debentures.

6. That the Debentures authorized to be issued pursuant to this By-law shall be in sums of not less than One Hundred Dollars (\$100.00) each.

7. That the principal and interest of the said Debentures authorized by this By-law shall be payable in lawful money of Canada at the Bank of Montreal, West Summerland, British Columbia, and at the principal office of the Bank of Montreal in the cities of Vancouver or Victoria, British Columbia, at the option of the holder thereof.

8. That the said Debentures shall be sealed with the Corporate Seal of The Corporation of the District of Summerland and shall be signed by the Reeve and Treasurer of the said Corporation, and the coupons attached to the said Debentures shall bear the signatures of the said officers of the said Corporation, and such signatures attached to the said Debentures may be written, or may be stamped, printed, lithographed, or be in other facsimile form.

9. That all or any of the said Debentures may contain or have endorsed thereon a provision for registration.

10. This By-law shall take effect on the date of adoption.

11. That this By-law may be cited for all purposes as "The Summerland Electrical System Voltage Conversion By-law, 1958."

Read a first time by the Municipal Council of The Corporation of the District of Summerland the Twenty-sixth day of August, 1958, read a second time by the said Municipal Council the Twenty-sixth day of August, 1958, read a third time by the said Municipal Council the Twenty-sixth day of August, 1958.

Received the approval of the Inspector of Municipalities for the Province of British Columbia on the third day of September, 1958.

Received the assent of the owner-electors of The Corporation of the District of Summerland the _____ day of _____, 1958.

Reconsidered, finally passed and adopted by the Municipal Council of The Corporation of the District of Summerland, sealed with the Corporate Seal of the said Corporation, and signed by the Reeve and Clerk of the said Corporation, all on the _____ day of _____, 1958.

Reeve

Clerk

TAKE NOTICE that the above is a true copy of the proposed by-law upon which the vote of the owner-electors of the Municipality will be taken at UNITED CHURCH BUILDING, SUMMERLAND, B.C. and at the MUNICIPAL OFFICE, WEST SUMMERLAND, B.C. on the thirteenth day of September, 1958, between the hours of eight o'clock in the forenoon and eight o'clock in the afternoon; and that Andrew F. Calder has been appointed Returning Officer for the purpose of taking and recording the vote of the electors.

DATED at West Summerland, B.C. this third day of September, 1958.

C. D. SMITH, Municipal Clerk.

Fall Fruit Fair Summerland's Showcase

Entries Now Rolling In For
Big Show September 26 and 27

Fruit Fair planning is getting in high gear this week and the committee reports that exhibit space is going quickly. Thirty local clubs and exhibitors have already indicated their interest in participating in "The Community Showcase" which will show past, present and future work of these clubs in honor of the Centennial Year. In addition there are fruit industry displays and non-competitive flower displays.

Competitive fruit, vegetable and poultry classes have been expanded over last year and while there are no separate classes for juniors it is hoped that parents will encourage the children to exhibit. There are seven classes for apples, four for pears, four for other fruits, 23 for vegetables and three in poultry, two in honey. In vegetables there is class for the heaviest pumpkin and in poultry a special class for commercial growers only of two live laying pullets. Committee in charge, Alec Watt, John Bennett, W. F. Ward, Bill Hepperle, Harold Hatton. Copies of instructions for exhibitors and a provincial government booklet are available at Alec Watt's office.

Women's Institute under Mrs. Lawrence Rumball is arranging a Pie contest with peach, apricot, apple and plum classes. There will also be a demonstration of pie making and cooking at the fair.

Of special interest to church and other ladies' organizations is the competition for table display of flowers, fruits and vegetables.

There will be non-competitive displays of quilts, rugs, ceramics and hobbies which could consist of anything from a model train to collection of birds' eggs. There will be competitive classes in woodworking, metalwork and special junior classes for dolls, stamp collections, etc. Full details of competitive classes will be in the Prize List which will be available from Summerland stores on Saturday, Sept. 13.

Plans for the spectacle "Dancing through the Years" are coming along and the Fair is building up into the largest fall fair in the South Okanagan.

Any club or individual wishing display space who has not been contacted, please get in touch with Lorne Perry as soon as possible.

Talent Contest Deadline Sept. 18

Thursday, Sept. 18 is the deadline for entries in the Summerland Fruit Fair Talent contest, a big feature of the Board of Trade's Fall Fruit Fair, which is to be held on Friday evening, Sept. 26, in the High School Auditorium.

Cash prizes and a TV appearance will reward the winners. Entry forms can be found on Page Nine of this issue.

Another Dream Coming True

Back in 1954 the Summerland Trout Creek Community Association looked forward to having its own hard topped tennis and basketball court.

The dream is nearing reality with the announcement that a community-wide canvass is to be held to secure memberships and membership fees which will finance the cost of hardtopping. Storms Contracting Company will do the job next month.

This is a community effort, part of a long range program to provide a community centre at Powell Beach. A ball park, another example of community effort, was the first objective achieved by the association, which has been cleared and is now awaiting the surfacing.

The tennis court has been three years in the building, with much of the estimated \$2,000.00 cost absorbed by volunteer labor of Community Association members.

The matter was laid before the Summerland Council by Parks Commissioner Ernie Bennett. Mr. Bennett suggested that the 20-year lease should be finalized before the blacktopping was done.

The lease approved by the parks commissioner and the association provides that the tennis court will become the property of the municipality as it is on park land. The association's investment in developing the tennis court will be considered the lease rental.

Mr. Bennett was, however, informed that under the amended Municipal Act, the Municipality cannot grant more than a year's lease unless approved by a vote of the people. This will necessitate a by-law being put to the ratepayers before the 20-year lease can be finalized.

Canners Say Peach Price Offer Based On Meeting Competition

J. A. Rankin, manager of the Western Food Processors Association, today made a statement concerning the reason British Columbia peach canners suggested a price of \$56.17 per ton for processing peaches this year.

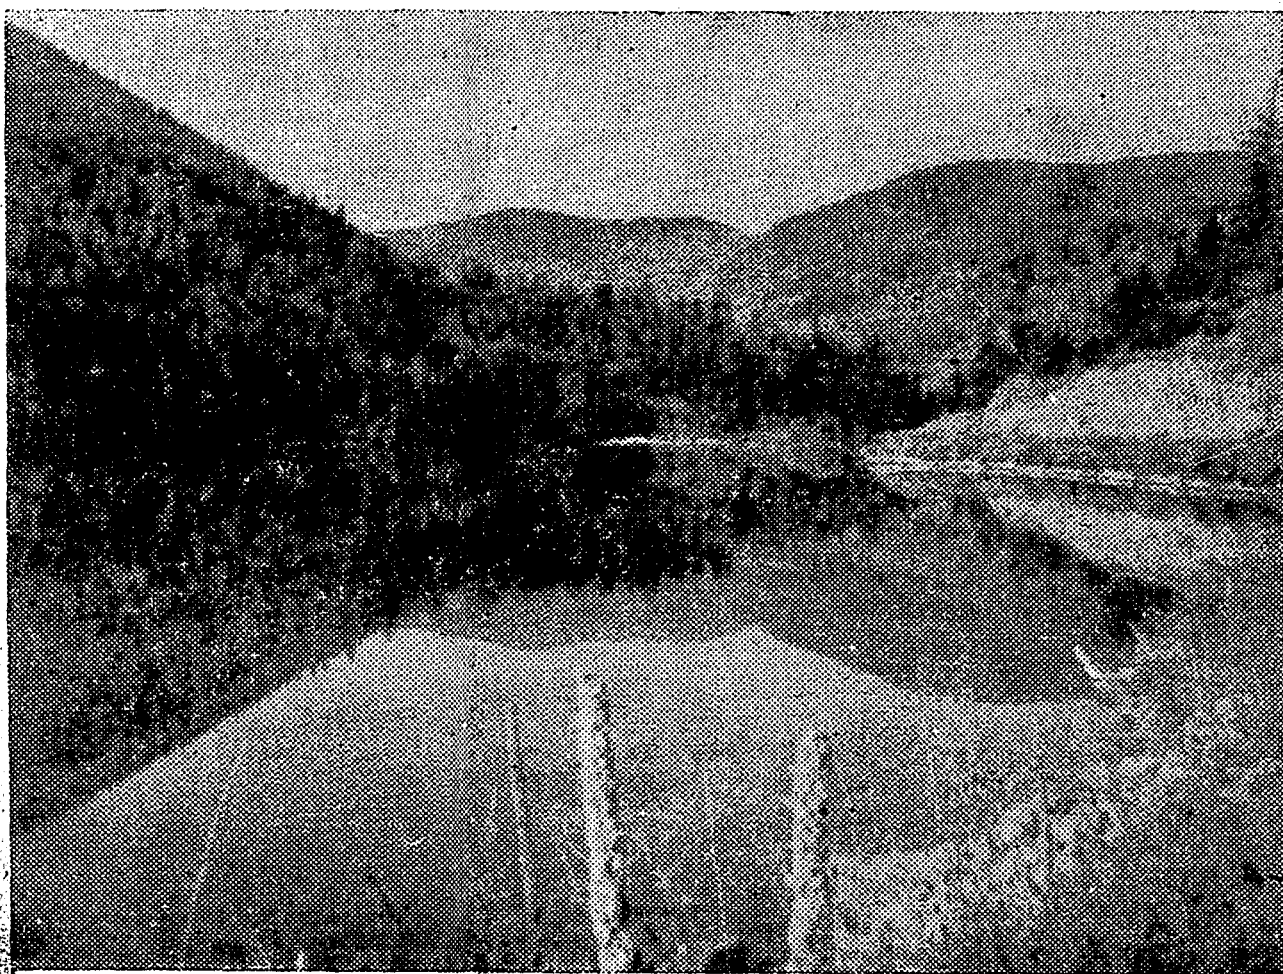

Prior to commencement of the season the industry was approached by the growers' selling agency and asked for assistance in disposing of the anticipated, above-average, 1958 peach crop. The canners advised that a large percentage of their 1957 production remained unsold owing to serious competition on their markets from processors in the United States.

The selling agency indicated they would like the processors to purchase ten percent more peaches than they did in 1957 and following lengthy deliberations the canners agreed they could process and market the large 1958 crop at a price competitive with United States offerings if they were able to purchase peaches at \$56.17 per ton with the Agricultural Stabilization Board making up the difference between the suggested amount and the ten year average price paid to the growers for processing peaches.

The proposal, when submitted to Ottawa, was turned down by the Agricultural Prices and Stabilization Board, which felt the suggested price too low.

The growers' selling agency then announced a price on the main varieties of canning peaches at \$90 a ton. Knowing that this amount would prevent them from competing with U.S. processors, most canners reduced

(Continued on Page Ten)

HATHEBUME LAKE — one of the many lakes Fish and Game Clubs in the valley are seeking in the mountains to the west of Peachland which to open to the public by means of a public road.

New Codling Moth Threat To Unharvested Apples

By Alex Watt

Codling Moth of the third brood have been flying quite heavily during the warm evenings in the latter part of August

and again during the last warm spell. In some orchards fresh entries are being noted.

If the warm weather continues there is almost certain to be a further rash of wings and worms in all the apple varieties still unharvested. There are many fine crops of apples as yet virtually undamaged by Codling Moth. To lose these crops now after so much expense has been put into their culture would be a disaster. Growers are urged to keep a very close watch on all apple trees for fresh Codling Moth entries. If there is any sign of activity, it may be the beginning of serious trouble and a spray should be applied at once. It is not advisable to use

DDT at this stage, but liquid Malathion is effective for a week on Codling Moth and if applied very thoroughly may be all that is needed to prevent further loss. Liquid Malathion will give a minimum of visible residue. It can be applied up to 14 days before harvest.

Sorry For The Inconvenience!

West Summerland residents may not feel too happy about it, but they should at least know that Gordon Blewett, the municipal electrical foreman, is "sorry for the inconvenience."

The inconvenience that Mr. Blewett is sorry about is the power outage which will occur on Sunday between the hours of 6:30 a.m. to 11:00 a.m. and 1:30 p.m. to 4:00 p.m.

There will likely be a similar outage on the following Sunday and throughout Summerland during the following year there will be these outages.

Its all part of the work being done to bring the municipality's electrical system up-to-date.

This is a long and costly job, \$40,000 worth, but one that has to be done if a smooth flow of electrical energy is to reach all parts of the municipality. This entails changing the system over from its present carry of 4,800 volts to 8,300 volts.

This big job cannot be done without outages, Mr. Blewett points out. Sunday was decided upon for the long outages as this would give the least interference with the packinghouses and the general business of the community.

Mr. Blewett hopes that the householders will recognize that the inconvenience is really necessary.

Meeting On Money Bylaw Called Friday

The Summerland Municipal Council is proposing to spend \$40,000 on revamping the municipality's electrical system.

To finance this major undertaking requires authority from the ratepayers to borrow the sum of \$40,000.

Opportunity to learn why the electrical system needs this \$40,000 shot in the arm, and how the \$40,000 will be repaid without affecting the tax structure is offered ratepayers before they vote on the money bylaw September 18, if they attend a meeting called for Friday night in the High School Library at 8:00 p.m., when the matter will be discussed by council and municipal officials.

Junior Red Sox In Finals: Again Beat Out Penticton

Summerland Junior Red Sox play Vernon Juniors here on Sunday in the first game of the best-of-three final series for the Okanagan Junior Baseball championship. Game time is at 2:30 p.m. at the ball park.

This is the only opportunity Summerland fans will get to see their juniors in action in the finals.

The second game of the series and a third, if necessary, will be played at Vernon Sept. 29.

The Summerland Juniors earned the right to enter the finals by defeating Penticton here 8-5 to cop the series.

It was a thrilling game which saw the local hopes come from behind, trailing 3-0 going into the fifth and then bunching four hits for six runs to waltz into the lead.

Penticton soured on that inning, they argued continually with the umpire and the payoff came in the ninth, when with two away and two strikes on the batter, he chose to dispute with the umpire until sent to the showers. This automatically ended the game.

Summerland Juniors played heads-up ball all the way and they outthrust the visitors throughout the game.

Lomke with a double and a single, and Gillard with two singles, were the heavy artillery for the Red Sox.

Sheeley had trouble with his control but finally settled down and pitched himself out of a

couple of nasty holes he'd got into. Sheeley retired 12 men by the strikeout route.

After the game Harry Vanderburgh presented the A. Van

derburgh Memorial Trophy to the Red Sox hustling catcher, Warren Parker, voted the most valuable player on the Red Sox team.

Most Valuable Player — Warren Parker

Mart Kenney Here Monday

One of the big treats of the Centennial Year is in store for Summerland dance fans on Monday night, when the local Centennial Committee proudly presents Mart Kenney and His Western Gentlemen.

Dancing will be from 9:00 p.m. to 1:00 a.m. in the High School Auditorium.

The famous orchestra is touring B.C. under sponsorship of the B.C. Centennial Committee and reports are that he's going over big.

Ken Boothe is chairman of the dance committee. Ladies Hospital Auxiliary will do the catering.

Horticulturists From California Tour Area

A party of horticulturists from California toured the Summerland district on Monday, Sept. 8. The group included three farm advisors from the foothills areas of California and was led by D. C. Alderman and Dr. Proebsting, Pomologists of the University of California. The party was interested in apple production mainly.

Thieves Get Away With Rifles, Shot Guns, Ammunition

Thieves broke into the Sport Centre on Hastings Street early this morning, Wednesday, and escaped with rifles, shot guns and ammunition tentatively valued at about \$500.00.

This is the fourth time in 11 years that we've been burgled, Bert Berry, proprietor, told The Review. "Last time they got away with an outboard motor and fishing tackle. This time they're going hunting," Mr. Berry said dryly.

Thieves, using an orchard ladder taken from behind The Groceteria, smashed a window above the rear door of the premises to gain entry.

Mrs. A. Parry, who lives next door, was aroused by her dog growling at 4:30 a.m. She thought someone was trying to get into The Groceteria. Shortly after she saw a man run behind the corner of the Groceteria warehouse and heard a car move off.

Letter to Editor

The Editor,
—Summerland Review.

I have read your two editorials of August 13 and 20 with a great deal of interest.

From my own point of view I was exceedingly disappointed in the exclusion of soft fruits and the smallness of the payment for apples but whatever disappointment I may have had, or anyone else for that matter, I have no intention of letting the matter drop. The 1957 payment has been declared but we have the 1958 crop to consider. I will be spending a great deal of my time gathering information on all factors which affect the fruit industry and the interpretation here is quite different in many respects to that arrived at by our own fruit industry. This is understandable and therefore there is a duty on officials in the fruit industry, Canadian Horticultural Council and the member to see that each difference is given fullest airing.

To give a few examples, the Department officials here and consequently the Minister of Agriculture have views which are at variance with us on the economic size of an orchard, methods of packing, methods of determining diversion to processing, the time spent by an orchardist in his orchard, sales efficiency of our selling agency, mechanical requirements in an orchard and a host of other things. To be perfectly blunt I thought that I knew the industry fairly well. I know now that any set of figures will prove almost anything and I know that I must have fuller and more detailed knowledge.

As a starter on this I have had long talks with many personnel in the Department, the Minister of Agriculture and his assistant, Les Burrows of the Canadian Horticultural Council and to a lesser extent with Mr. Walrod and Mr. Lander.

In your April 20 issue under the heading "Anti-dumping Proposal Termed Impracticable", I would point out that there is no change in the proposed amendment of the Custom Act. The bill incorporating this change states specifically that:

"where the market price in the country of export of any fresh fruit or vegetable of a class or kind produced in Canada has, as a result of the advance of the season or the marketing period, declined to levels that do not reflect in the opinion of the Minister their normal price, the value for duty of such fresh fruit or vegetable, when imported into such region or part of Canada and during such period as the Minister may specify, shall be the amount determined and declared by him to be the average value, weighted as to quantity, at which like fresh fruits or vegetables were imported during the three-year period immediately preceding the date of shipment to Canada."

You will see from the foregoing that this varies in two ways only from the Canadian Horticultural Council recommendation as set out in my maiden speech. The phraseology has been changed but the meaning is left intact and the three-year period is used instead of the 10-year period. I cannot understand where the information came from but it is certainly erroneous. I do feel that one point must be made here and that is that I had not been advocating anything for fruit and vegetables which is not in accord with the wishes of the Canadian Horticultural Council. The fair value for duty section was fought for some time by our own industry and we had to convince the C.H.C. first. The recent change from 10 year import valuation to three years only is well known to the directors of the B.C. Fruit Growers Association and to B.C. Tree Fruits.

This bill should come up in the next few days and it will be just one more step in firming up our industry.

David Pugh, M.P.

Editorial

Penask, Hatheume Access One

In view of the current controversy over Hatheume Lake we suggest that the following letter from the Kelowna Rod and Gun Club asking Summerland support for the Kelowna efforts to secure an access road to Penask Lake from Peachland is in line with The Review's stand on the Hatheume Lake issue.

A road to Penask Lake, could and would, undoubtedly be made to give access to Hatheume, for the two lakes are less than three miles apart, in fact the road should go first to Hatheume and then to Penask. We think the Kelowna club's objective justifiable and worthy of support — we hope that local sportsmen will write their member and other officials, requesting the opening up of this mountain and lake paradise. The Kelowna Rod and Gun Club letter addressed to the Summerland Club follows:

The Kelowna and District Rod and Gun Club and the B.C. Interior Fish, Game and Forest Protective Association are endeavouring to have the road access completed to Penask Lake via Peachland as soon as possible. This letter is to acquaint you with the project and what it will mean to the Resident and Tourist anglers of the South Okanagan.

We are asking for your support on this project by such means as contacting your member of the Legislature, the Department of Highways, the Department of Recreation and Conservation and the Forestry Department.

Approximately seven miles of bush road needs to be built between Brenda Lake and Penask Lake to gain access from Peachland. There is now a good summer road from Peachland to Brenda Lake. It is a nice drive on a wide gravelled road. The proposed route of the road between Brenda and Penask lakes has been covered both by foot and aerial, and thought quite feasible and without any major problems. Such a road is desirable for the following reasons:

(1) When reasonable access to Penask and its adjacent lakes is made it will open a very large potential for sport fishing. Larger than any other set of lakes in the South Okanagan.

(2) Potentially Penask could yield according to our Fishery Biologists 50,000 fish annually, instead of the present 10,000. There is nothing we can do to bolster sport fishing in the Vernon-

Oliver area equivalent to that accruing from such a road.

(3) Additional sport fishing in the Okanagan is sorely needed for both residents and tourists. Okanagan Lake, because of many factors, has little to offer in the way of sport fishing for the campers at the very large Okanagan Lake Campsite near Peachland. Access to Penask via Peachland would help tremendously.

(4) Anglers from the Okanagan can reach Penask Lake now by car via Princeton and Merrit, a trip of some 200 miles, (the last 32 miles being very poor at times) this is about an eight-hour trip. From Peachland the distance is approximately 35 miles with driving time of about two hours.

(5) Mr. T. R. Broadlands of the Parks Branch Department of Recreation, feels that the area should be developed for additional public use and has submitted a report in this regard. Also the B.C. Game Commission is very anxious to obtain ready access from Penask Lake Hatchery to the Summerland Hatchery. Present access is by road of some 205 miles. Access via Peachland would be 50 miles. This road would greatly increase efficiency of these hatchery operations.

The Parks Branch in Kamloops and the B.C. Game Commission have requested this road recently but to date they have met with little success. We feel that only through the efforts of the Fish and Game Clubs and the Boards of Trade in the Okanagan that the problem will receive the recognition that it deserves. We are asking for your support on this project.

ABOUT CREDIT UNIONS

By saving regularly, a member enables his credit union to grow, thereby providing the necessary funds for loans to members.

1. One payment each pay-day or each month.
2. Lower cost in interest or carrying charges.
3. Payments spread over a longer period, if necessary.
4. Ownership of goods when purchased.
5. Strict confidence observed when dealing with the Credit Union.
6. All debts die with the debtor—in the event of death or disability, full balance (max. of \$10,000) is cancelled through loan protection insurance.

Be Wise! Join Credit Union Today

Comings & Goings

Party refreshments from a table decorated with gaily colored balloons on sticks stuck into apples were popular with the friends of Margot, daughter of Mr. and Mrs. Don Clark, on the occasion of her seventh birthday which she celebrated in August. Helping Margot celebrate were Joanne and Barbara Berry, Lesley Heavysides Sandra Bernhardt, Marilyn and Lois Milne, Shirley Weeks, Dede Emery and her sisters Pat and Susan Clark.

Miss Ann Beggs left by plane on Sunday, August 31, for Vancouver, flying from there to Kitimat where she has accepted a position as teacher.

Mr. and Mrs. Rod Kietch of Victoria were guests of Reeve F. E. Atkinson and Mrs. Atkinson over the Labor Day weekend.

Mr. and Mrs. Don Spiers of Kaploops were in Summerland last weekend to attend the Jensen-Cooper wedding.

Mr. W. I. Crombie and Mrs. J. A. Clark of Vancouver are visiting with relatives in Summerland.

Visitors at the home of Mr. and Mrs. Arts Crooks over the Labor Day weekend were Mr. and Mrs. Jack Crooks and family of South Burnaby.

Mrs. D. Carter has returned home from Edmonton where she visited with her mother, who is ill.

Mr. Charlie Rennie of Vancouver, is spending a holiday at the home of his parents in Garnett Valley.

Mr. and Mrs. M. Ducommun left on Sunday for Vancouver where they will spend a few days.

Mr. and Mrs. Mev. Wells and their three children are visiting with Mrs. Wells' parents, Mr. and Mrs. Earle Wilson.

Guests at the home of Mr. and Mrs. C. B. Snow on Sunday were Mr. and Mrs. Ben Graffenburger of Bend, Oregon.

Mr. and Mrs. J. P. Sheeley left on Tuesday for Chilliwack, where Mr. Sheeley will attend the Assessors' Convention being held there this week.

Mr. Les Rumball is flying to Vancouver Wednesday to attend a Super-Valu meeting.

Miss Edna Glaser has left for the coast to take up psychiatric nursing at the hospital in Esson-dale.

Guests at the home of Mr. and Mrs. F. Brown for a few days were Mr. and Mrs. Jas. Davidson of Vancouver.

Miss Midori Matsu, daughter of Mr. and Mrs. Art Matsu left Saturday for Williams Lake where she has accepted a teaching position.

Mr. Clifford Horwood of Victoria was a weekend guest at the home of Reeve and Mrs. F. E. Atkinson.

Mr. and Mrs. Walter Charles and family have taken up residence in North Vancouver. They sold their home on Peach Orchard to Norman Abernethy.

Mrs. Don T. Turnbull, Joan and Gerald were in Vancouver over the holiday weekend. Mr. Turnbull is now with the Fruit Inspection branch here.

Dr. Wilford Evans, who is establishing a medical practice here, will take up residence with Mrs. Evans and their three children in the H. L. Wilson home. Mr. and Mrs. Jack Dunsdon have been holidaying at the coast.

Mr. and Mrs. W. B. Powell and family spent the Labor Day weekend at the coast.

Mrs. H. A. Edwards of Vancouver has been visiting at the home of her son-in-law and daughter, Mr. and Mrs. Norman Reid. Also visiting at the home of the Reids have been Mr. Reid's brother and sister-in-law, Mr. and Mrs. Clayton Reid of New Westminster.

Mrs. P. L. Booth is visiting in Elkhorn, Man., where her father is ill.

Mr. and Mrs. F. P. Dawes with their son-in-law and daughter, Mr. and Mrs. Alex Klasoff, have returned from a motor trip to Vancouver and Victoria. Mr. and Mrs. Klasoff have now returned to their home in Quesnel after completing their vacation at the home of their parents, Mr. and Mrs. Dan Klasoff and Mr. and Mrs. Dawes in Prairie Valley.

84	48	80	36	52
20	76	64	72	28
16	92	8	60	44
68	0	12	4	56

PLAYING CARDS AVAILABLE AT ALL SUPER-VALU STORES

RULES — IMPORTANT *READ CAREFULLY
1. Place an X in pencil over the alphabet letter to right of the number on your card, if the same number appears in the SUPER-VALU ad.

2. In each week's SUPER-VALU newspaper ad 30 number will each be enclosed in a square-circle-diamond, etc. You can match these numbers on any card.

3. If you have five consecutive numbers in a row — down, across or diagonal — you have a winning card. To receive your gift, return the card as instructed on the back of the card.

4. Numbers on your card are to be matched against numbers in the SUPER-VALU newspaper ad. Check the SUPER-VALU newspaper carefully. Newspaper ads will be posted in every Super-Valu Store each week. Fun for all the family.

5. Cards can be played on any of the newspaper ads during the 12 weeks but cards are winners and redeemable only if played on an individual week's newspaper ad and are surrounded by the same shape: circle, square, diamond, etc.

6. We reserve the right to correct any typographical or other error or errors which might appear in any published matter in connection with this game, and to reject winning cards not obtained through legitimate channels.

7. "CROSS-OUT" cards are given away freely at all SUPER-VALU stores, no purchases are required.

8. Elimination contest will be held if cards are returned in excess of major prizes to be awarded.

Summerland 2198

Guests at the home of Mrs. K. Taylor over the Labor Day weekend were Mr. and Mrs. Bernard Taylor and three daughters, Dean Neville Scarfe of the University of B.C. Mrs. Scarfe and three sons, all of Vancouver, Mr. and Mrs. Cyril Taylor and son of Sicamous.

**CORPORATION OF SUMMERLAND
ELECTRICAL OUTAGE**

The electricity will be off on Sunday, September 14, 1958 from 6:30 a.m. to 11:00 a.m.

affecting the following areas — sub-station west to Prairie Valley Road, West Summerland area north to Jubilee Road, Parkdale, and both sides of Jubilee Road west to C. H. Elsey's.

and from 1:30 p.m. to 4:00 p.m. affecting the above areas and the following additional areas — Crescent Beach, Jones Flat, Garnet Valley and Quinpoole Flat.

G. W. Blewett, Municipal Electrician

REV. AND MRS. ART FRITZKE

A Missionary Farewell Rally will be held in the Kelowna First Baptist Church on Monday, September 15. Rev. Lyle Kennedy of the Summerland Baptist Church points out that this is a district rally and is as much an opportunity for the Summerland congregation to say "Godspeed" to the young missionaries as for others in the district. Rev. Kennedy is hopeful that many from Summerland will attend this farewell rally for the Rev. and Mrs. Art Fritzke, who are bound for India.

Both Arthur and Evelyn Fritzke have B.A. degrees from U.B.C. Evelyn is a daughter of Dr. and Mrs. O. E. Daniel, and was born in India. Arthur has his B.D. from Berkeley Baptist Divinity School. They have one child.

**Wed in Quiet Ceremony
Performed at Victoria**

A quiet wedding was solemnized in the Church of the Nazarene, Esquimalt, Victoria, B.C. on September 1, when Mrs. Elsie Pike of West Summerland, and Mr. William Potts of Ladysmith, B. C. were united in marriage.

The Rev. J. R. Spittal, formerly of Penticton, was the officiating minister.

Mr. and Mrs. Nelson Wright of Victoria, were the attendants to the bride and groom. Mr. Leslie Gereluk gave the bride away.

Supper for the wedding party was served later at the McEwan restaurant in Victoria.

The newlyweds will make their home in Ladysmith, B.C.

**Shower Honors
Hedley Girl**

A shower in honor of Gail Pizzi, of Hedley, whose marriage to Karl Schramm of Summerland will take place on October 3, was held at the home of Mrs. John Schramm, with Mrs. Louie and Mrs. Bill Schramm, co-hostesses.

In attendance were:

Mrs. C. Schramm, Mrs. W. Thomas, Mrs. G. Szing, Mrs. P. Hollinger, Mrs. J. Utternaegen, Mrs. J. Nilson, Pent., Mrs. J. Morrow, Pent., Mrs. C. Wendel, Mrs. J. Geres, Mrs. J. Coffey, Mrs. R. Mayer, Mrs. A. Mayer, Mrs. N. Dickenson, Mrs. R. Vogue Mrs. E. Trackle, Miss Vi Hollinger, Miss Betty Chernoff, Miss Shirley Wencell. Those sending gifts but unable to attend were: Mrs. F. Morrow, Penticton, Mrs. W. Huva, Mrs. H. Milroy, and Mrs. J. Hrautkoft, Ladysmith.

Miss Marnie Bleasdale has returned to her home in Summerland after spending the summer at Silvery Beach Lodge, Shuswap Lake.

Miss Audrey Wright of Winnipeg, Man., is visiting her parents, Mr. and Mrs. Walter M. Wright.

**Honor Bride-to-be
At Shower**

The home of Mr. and Mrs. Frank Beaven was scene of a miscellaneous shower on Saturday evening, September 6, in honor of Miss Pat Boyd, whose marriage to Mr. Herbert James of Vernon takes place shortly. Gifts were presented in a wishing well complete with a miniature oaken bucket.

Delicious refreshments were later served from a table centered by a prettily decorated shower cake and chrysanthemums.

Paying honor to the bride-to-be were Mrs. W. Boyd, and Sonny, Mrs. Don Wright, Miss Jean Northrup, Miss Amy Berry, Miss Margaret Lott, Miss Diane Durick, Miss Diane Rumball, Miss Barbara Boyd and Mrs. F. Beaven.

Unable to attend but sending gifts were Mrs. Fabbri, Miss Marjorie Campbell and Miss Dot Carston.

**Milady Votes For
Independent Action**

The ladies, bless 'em, have improved their lot a good deal since the days of the kitchen woodstove. Now bright, white appliances stand ready for their command; frozen foods are in the freezer, and little cans of pre-cooked goodies line the shelves.

Makes you wonder why they need a stove at all — a can-opener and a few candles to heat them might do fine.

Actually, all these kitchen improvements are a good thing. With fewer chores at the stove, milady has much more time to enjoy life, and who can blame her for taking advantage of progress? A wife should have independence; it makes for happiness all around.

Nowadays, if the modern wife wants to visit in the next city,

she goes; if she feels a new hat coming on, she buys it without reference to the Master for every penny she wants to spend. That's financial independence. A wife likes to feel she hasn't lost all her independence to 'become "just a housewife."

You know, it's surprising how quickly this 'independent' feeling grows when she has her own Bank of Montreal savings account. She deposits small amounts regularly, and when she wants ready cash for a new hat or pair of shoes, it's there at the B of M, with interest.

Why not visit the Summerland branch of the B of M soon? The accountant, Doug Galloway, will be glad to show you how easy it is — and how profitable, to open a B of M savings account.

anything can happen

That all-day shopping trip to the BIG CITY may sound attractive when you plan it. But road hazards, weather, car failure and heavy traffic can easily make you sorry you strayed so far from home. Especially so when our local stores offer just as much (and often more) in styles, selection and value.

Not only our hometown merchants, but service stations, automobile dealers, banks and professional men in this community can provide everything you need for better living and personal care.

The next time the idea of taking your shopping dollars far from home presents itself, *be realistic*. Ask yourself whether the risks involved are worth the effort.

THIS MESSAGE IS PUBLISHED AS A PUBLIC SERVICE BY:

HERE'S HOW YOU BENEFIT BY DOING ALL YOUR SHOPPING LOCALLY

When you buy from your hometown merchants you get:

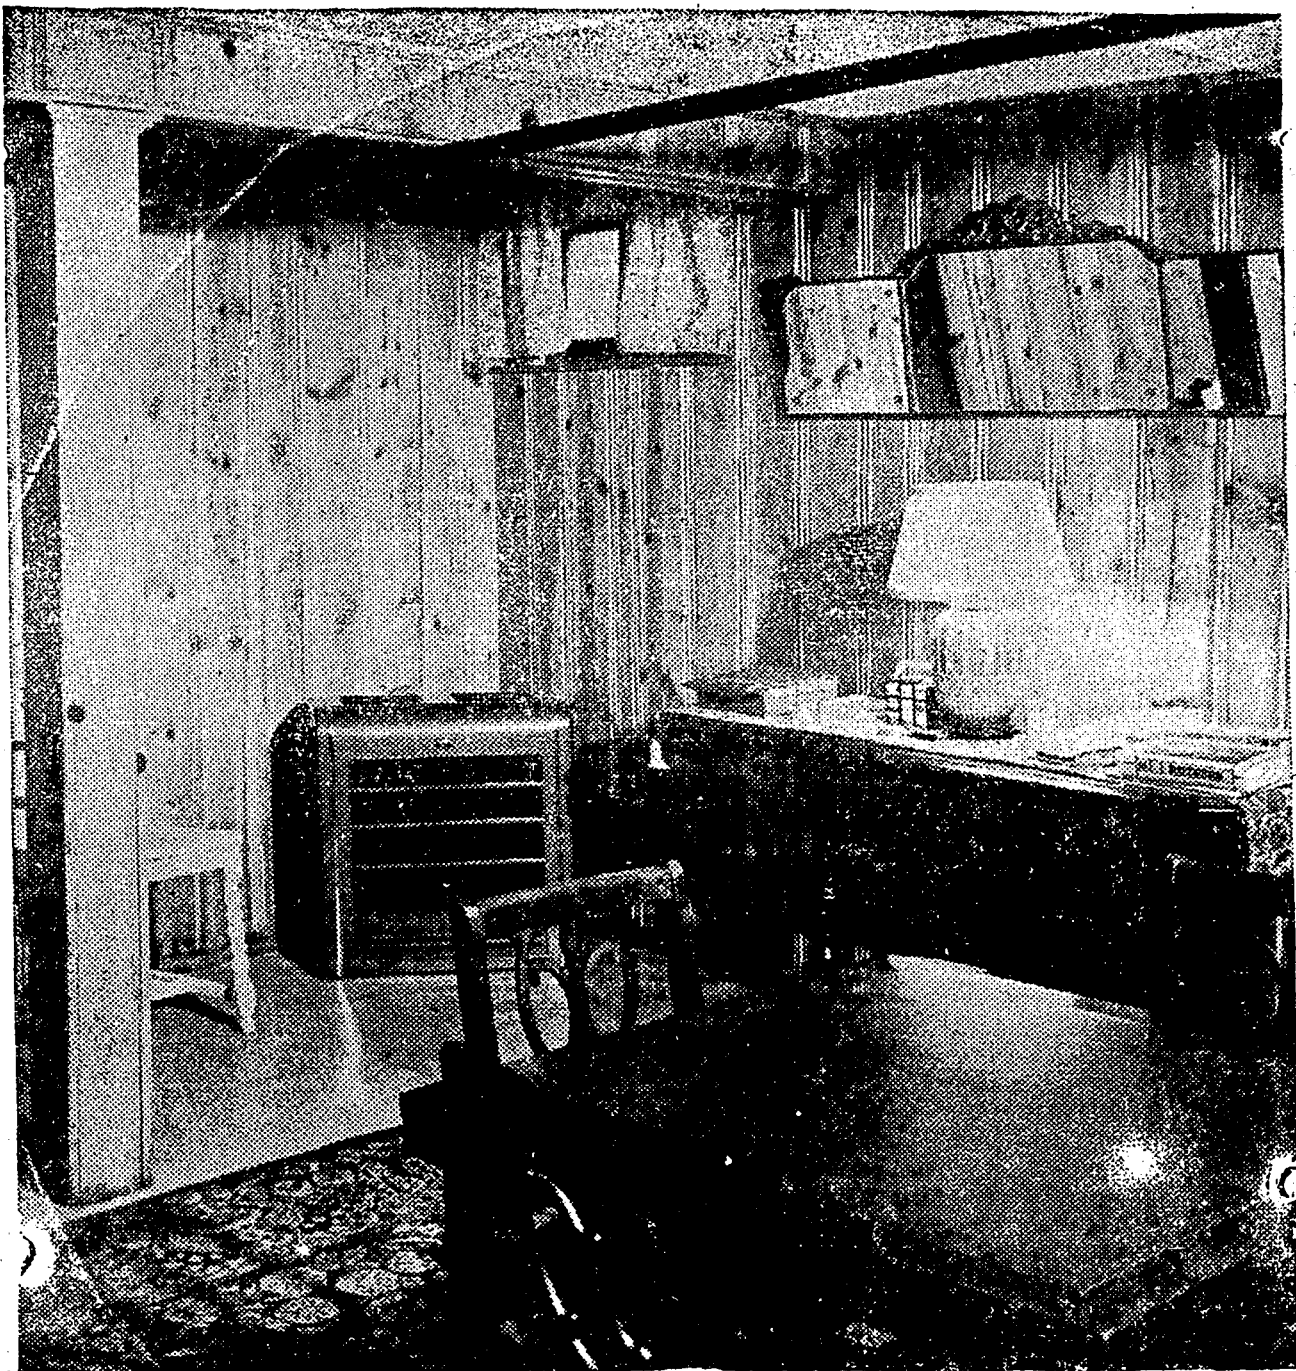

- | | |
|---|---|
| 1. HONEST VALUES | 7. FREEDOM FROM ROAD HAZARDS |
| 2. AMPLE SELECTION | 8. ELIMINATION OF COSTLY PARKING PROBLEMS |
| 3. INSTANT DELIVERY, SERVICE AND ADJUSTMENT | 9. AVOIDANCE OF JOSTLING CROWDS |
| 4. MORE PERSONAL AND FRIENDLIER TREATMENT | 10. THE CHANCE TO BUILD A BETTER COMMUNITY BY PUTTING YOUR DOLLARS TO WORK HERE |
| 5. SAVING OF TIME | |
| 6. RELIEF FROM COSTLY TRAVEL | |

Fish Story

Labor Day weekend at Pillar Lake produced very good fishing, and the usual amusing incidents. 'Corky' Hadrell's family and fishing companions, from West Summerland, were startled and amused to hear him shouting in his sleep, "Gimme the net, quick, where's the net?" All this because he had a nice trout staked out to a snag in Pillar Lake. He had hooked it in the evening, found it too dark to see, cut the line and tied it to the snag, hoping to land him in the morning. He did too! A nice 18½ inch trout all trussed up ready for the net.

Lucky Winner To Get Free Gas Furnace

Some lucky person in this district is going to be the winner of a free gas furnace on October 6. The furnace, plus the installation cost, will be the gift of Inland Natural Gas Company.

In this issue the Inland Natural Gas Company announces the rules of the contest. This is one of the most unique giveaways ever offered to the public in that you select your own prize. Yes that's exactly what you do. Sometime between now and the end of September, if you are planning on installing natural gas, you make the arrange-

ments for the installation of gas heating equipment, furnace, wall or space heater. You select the make and style of heater best suited to your needs and from the dealer of your own choice. After making your purchase you simply fill out an entry form and drop it into the dealer's ballot box. If you win the draw which will take place on October 6, Inland will refund you the full cost of the furnace, plus the installation costs. Summerland dealers are cooperating with the gas company in this contest and on this page

are offering a wide range of furnaces and other gas heating appliances. All will be glad to submit bids on the cost of installation.

There is no better time than right now to make that switch to gas. In next few weeks fall will be upon us and that means the start of the heating season which continues for a long, long time. Gas fires eliminate the drudgery of shovelling coal and removing ashes and if you act now you could well be the lucky person who gets a new furnace for free.

be wise...

buy a GAS FURNACE
before the FALL RUSH

YOU MAY WIN IT FREE!!!

Inland Natural Gas will hold a lucky draw on October 6. The prizes... three gas furnaces installed! The winners... three interior families who are wise enough to buy a gas furnace before September 30. Here are the contest rules.

You must buy a furnace... or wall or space heater... from a natural gas equipment dealer before September 30. You may then fill out an entry form and drop it into the dealer's ballot box. If you win the draw, Inland Natural Gas will refund you the full price of your furnace plus your installation costs.

Win the prize or not, you can't lose in this contest. By buying your furnace before the fall rush you get better service... no installation delays... and you save money sooner. Save money because natural gas heats your home for less money than any other modern fuel.

SAVE AS YOU PAY—THE BUDGET WAY—EQUAL PAY PLAN

EXTRA BONUS. Buy a natural gas heater before September 30 and you can join Inland's EQUAL-PAY plan... the budget billing plan that lets you budget your heating costs in equal monthly payments over the whole year. See your local Inland Natural Gas Office.

INLAND NATURAL GAS

Historic Caravan

The B.C. Centennial Committee have arranged to have a Historic Caravan visit SUMMERLAND on

MONDAY, SEPTEMBER 15

This caravan will contain articles from the Provincial Archives of our historic past, and will be of great interest to young and old. **NO CHARGE FOR ADMISSION.** The Caravan Trailer, 34 ft. long, will be on the **HIGH SCHOOL GROUNDS**, and may be viewed during the day or evening.

Swim Class Instructor Gives Annual Report to Rotarians

Although enrolment was down attendance was up, as was the percentage of those who passed their swim tests, Mrs. M. D. Hyde told Summerland Rotarians when making her annual report on the Rotary Red Cross Swim Classes of which Mrs. Hyde is the chief instructor.

Mrs. Hyde and assistant instructors Eleanor Baynes and Amy Berry, and also Barbara Fudge who pinch-hit when the staff was short-handed, received a gift from the Rotarians in appreciation of their endeavors.

The instructors, with the exception of Eleanor Baynes, who was unable to be present, were hosted by the Rotarians at their Friday dinner meeting.

Mrs. Hyde reported that 307 were enrolled, broken down as follows: beginners 136, tested 72, passed 50; Juniors, 100, tested 54, passed 50; Intermediates, 56, tested 36, passed 26; Seniors, 15, tested 10, passed 10.

Mrs. Hyde went on to give the Rotarians some of the background.

"We're terribly pleased with those results," she said. "Mrs. Ware, the examiner, said that

seniors and juniors were very good.

"As you know, Amy and I had to take our instructor's course over again. One can only hold an Instructor's Certificate for two years, at which time it must be renewed by attending a Red Cross school and passing their exams again. Some of you may wonder why, I did myself a bit, but having taken the course a second time, I can understand the reason. For one thing, one develops faults in one's own swimming and one can't show others how to do a thing unless one has a very good stroke to demonstrate. So stroke correction at these courses is an important point. Also one can't learn too much about the Life-saving end. When you have the responsibility of the safety of so many children, one simply has to learn all one can to protect them. And, methods of teaching change continuously. For instance, we learned a new method of teaching the crawl. As you know, the crawl is an over-arm stroke, which we have previously taught with a bent elbow, but particularly at the beginner level, we've found that almost always a child takes a short stroke, ending the pull at the shoulder instead of pulling right through to the hip. This doesn't give him nearly enough time to breath properly. This year we learned to teach with a straight arm, so that the pull goes from directly in front of the head, at the full reach of the arm, straight through underneath them to emerge from the water at the thigh and recover just above the surface. You can see that this gives far more time to breath and also a far stronger pull. It doesn't look as elegant, but the bent elbow can be taught later when style is more important. You'd be amazed at the difference this point alone has made to the ease with which a beginner catches on to that most difficult of points in the crawl — the breathing.

"To get back to the tests, Mrs. Ware was a very fair examiner, she kept the Red Cross' high standard without failing a child on a technicality. I'd like to tell you something about the standards expected at each class. Children at Junior level are expected to swim a given distance in a recognizable front stroke and the elementary back stroke. Style is not important, as long as the mechanics are there. For Intermediates, three strokes are required and here style is fairly important, but for the Senior test, style is extremely important and a high level of execution must be kept up during the entire distance. In Intermediate and Senior classes we also get into lifesaving. Holger Nielson and Schaeffer methods of artificial respiration being taught.

A boy or girl with a Senior badge on their bathing suit is expected to be able to help in an emergency which accounts for the fact that no child can take a senior test until he has reached his 13th birthday.

SUMMERLAND FRUIT FAIR

SEPTEMBER 26 & 27, 1958

Exhibitors and especially students are reminded to start planning their entries now. McIntosh growers should set aside this class now.

Ladies . . .

Enter the Giant Fruit Pie Contest arranged by the W. I.

Hobby Show . . .

Special competitive classes for children. Anyone needing special display space for a large or unusual type hobby please arrange for space with Lorne Perry.

Ladies . . .

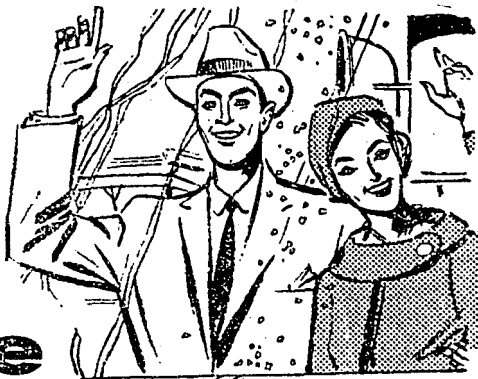

Special class for table display of fruits, vegetables and flowers. Have your organization enter this class. Non-competitive displays of rugs and quilts welcomed.

Prize Lists will be available at Summerland stores on Saturday, September 13.

For further information—

PEACHLAND

By Mrs. Maud Witt

Mr. and Mrs. Cliff Blanchflower jr., from Kelowna, were visitors at the home of Mrs. Lillian Ayers.

Mrs. Connolly of Edmonton was a visitor at the home of Mrs. Ayers, last week.

Bob Schultz who has been stationed at Cornwallis, is visiting his grandmother, Mrs. Ayers

Mrs. Sid Smalls received word that her mother, Mrs. Mary Boehm of New Westminster, passed away, Thursday

Obituary

A long time resident of Peachland, Albert James MacKenzie passed away at his home in Peachland on August 29. at the age of 79.

Born in Guelph, Ontario, Mr. MacKenzie came to Peachland from Portage La Prairie, where he learned his trade as a carpenter, in 1901, and resided here except for a period of 17 years. At that time he lived at Aspen Grove near Merrit. Mr. MacKenzie's five children attended the funeral, Wallace, Ella, Grace Gordon and Muriel. Mr. MacKenzie was a faithful member prominent worker in the affairs of the Baptist Church and a of the district.

"Drunkard" Play Rocked 'Em in Penticton; Shows Here Sept. 17

"The Drunkard", melodrama at its corniest, but the way the

Pioneer Players, led by James Onley, puts it over, The Drunkard becomes the zaniest stage show in North America.

Wed., Thurs., Sept. 10 - 11—
(Adult Entertainment)

P. Cushing, Francis Matthews
Revenge of Frankenstein

Dana Andrews, Peggy Cummins
Curse of the Demon
Starts 7:00 p.m.
Last complete show 8:30 p.m.

Fri. to Tues., Sept. 12 - 16—

P. Newman, Joanne Woodward
The Long Hot Summer

Showing at 7:00 and 9:00 p.m.

Sat. Matinee, 1:00 p.m.—
Children's Picture

The Silver Whip
(Shown First)

The Drunkard will play at the High School Auditorium next Wednesday, under sponsorship of the Summerland Rotary Club.

It is melodrama burlesqued—melodrama which becomes mellerdr-r-r-a-m-a, that rolls audiences in the aisle and yet there are times, thanks to the acting ability of the cast, when the audience becomes silent under the impact of tragedy.

It's a rollicking, roaring and, at times, shocking presentation that invites audience participation by having them boo the villain, and James Onley, as the villain, deserves all the boos he gets.

"The Drunkard" two hours of rollicking melodrama, spiced with some very worthwhile vocals and a recitation guaranteed to bring down the house, is good entertainment, playing at the High School Auditorium on Wednesday, September 17, under the sponsorship of the Summerland Rotary Club. The Rotarians are hoping for a big crowd and big profits with which to help finance their many community causes.

Macs To Battle Orioles In OMBL Playoff Semi-Final Series

Summerland Macs will face the Kelowna Orioles in the first game of the OMBL semi-final playoffs at Kelowna on Sunday, the second game will be played here on Sept. 20.

The Macs are geared to go. They've been playing good ball this last while. They copped third money in the Quesnel Labor Day tournament and showed themselves on their toes in an exhibition tilt at Oliver last Sunday.

Coming on to the top of his form is Bill Chapman, who held Oliver to six hits Sunday and struck out 11.

In the Kelowna Orioles, the Macs meet a club that has been riding high all season, although the Orioles booted away the OMBL pennant in a sudden-death encounter with Len Gatin's Okonots at Kamloops on Sunday, losing by a decisive 6-1 score.

The defending pennant holders were forced to play the sudden-death when the Okies split with them over the season's play but there was no split yesterday and the blue flag will repose in the Hub City for the forthcoming season.

Len Gatin, Okies' playing-coach, allowed eight hits, struck out four and allowed two walks, as his club snagged nine hits

and three walks off Jack Denbow on the Orioles' mound. The sad tale for the O's came in the fact that only two of the Okies' runs were earned.

Bowling News

By Glenn Fell

The bowling season in Summerland begins Monday, October 6 and the annual general meeting will take place at the Bowladrome on Monday, September 15 at 8 p.m. Teams will be organized at that time and an outline of the forthcoming season's activities will be given.

An item of interest to all bowlers is that beginning September 22 there will be a week of 10 cent bowling. This is primarily for league bowlers who want to get practiced up for the season.

The executives of the league Foster Cunningham was unanimous to accept the resignation of held a meeting on August 25, at which the group was sorry to league president Alma. Lekie imously elected president for the forthcoming year.

Canners

(Continued from Page One) their 1958 tonnages which was a fifty percent reduction in the industry rack compared to 1957.

Since that time Ontario processors and growers have received assistance from the Stabilization Board which guarantees growers a floor price of \$83 a ton.

Following establishment of the government price to Ontario growers price quotation from Eastern processors indicated their selling price on the Vancouver market would undercut B. C. processors around 36 cents per case and will completely eliminate the B. C. processor from selling in Manitoba, Saskatchewan, and Alberta, traditionally large markets for B. C. canned peaches. This will prove disastrous to the B. C. industry if it is to continue.

B. C. processors are appealing to Ottawa for a similar support to save the industry.

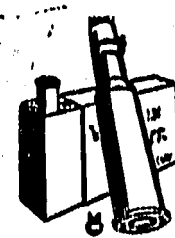

While no quotations have been received to date, canners are concerned about the possible invasion of American canned peaches purchased by processors for as low as \$40 a ton.

Address To Apple Growers Indicates MacPhee Unhappy Over Research

Is Potato Grader Good Enough For Grading Apples?

The MacPhee report, result of the most exhaustive probe ever undergone by the tree fruits industry is, so we are informed, packaged for delivery to the provincial government, which latter set up the Commission some 20 months ago.

How long will it be before the government sees fit to make the report public, is anybody's guess, for when Commissioner E. D. MacPhee, Dean of the Faculty of Commerce and Business Administration, University of British Columbia, turns the report over to the government he ceases to have anything but an academic interest in what the government does with it.

We are hopeful that the government will see fit to publicize the report and accompanying recommendations as early as possible.

The government could, if it so desired, withhold publication of the report until it has been presented to the Legislature, a matter perhaps of courtesy to the Legislature, but such a delay would be working hardship on the grower and the industry as a whole, which is anxiously awaiting the findings of Dean E. D. MacPhee in the hopes that from those findings will come much of profit to the fruit industry.

It is imperative that the report be made available to the industry as early as possible. The B. C. Legislature does not meet until February, whereas the Growers' own parliament, the BCFGA, convenes in January.

The growers require time to study the MacPhee report so that, through their BCFGA locals, they can submit informed and intelligent resolutions, relating to the report, to the 1959 convention.

There is much conjecture on just what Commissioner MacPhee will have to say on the matter. The Commissioner has, of course, been close-mouthed as to his thinking, but he did give one indication that he is far from satisfied with the handling of fruit through the packinghouses and on through to the retailer.

Speaking before the International Apple Association in Montreal on July 30, Dean MacPhee allowed himself a brief reference to the tree fruit industry during which he asked pointedly "... are you accepting that a potato grader is good enough for apple grading?"

It seems clear from the Commissioner's remarks that he does not think too highly of the tree fruit industries research efforts.

Dean MacPhee's remarks before the International Apple Association insofar as they relate to the long and anxiously awaited report and which give at least one indication of his thinking on one facet of the industry, follows verbatim:

Said Commissioner MacPhee:
When I was a boy a man moved three tons of earth in a day with a wheelbarrow; today that same man will move from three thousand to five thousand tons of earth with our modern equipment. Gravity—space—time—these concepts have all changed their meaning since you and I were born.

Now gentlemen, may I suggest to you that while I promised not to talk about the food industry, may I be allowed to say this: I haven't had contact with your industry for more than a year so I am going to ask this question and let you give the answer. I have said that the world has been changed by the people who believed in research. I wonder whether the fruit industry does. If so, you will have occasion to remember this as a century of research. It has been my duty in connection with this Commission to explore the literature and I am just wondering the question as to how far you business men are taking problems to research workers. I wonder how far you are using your great power to insure that government departments or private laboratories are carrying on your problems with adequate staff.

I understand that there are sixty-five laboratories today working on atomic irradiation of food and that sixty-three of these are east of the Mississippi. Whether atomic irradiation with its many problems is going to be important to you or not, I do not know, but I do know that

one of the most fascinating lectures I have ever listened to was that of Hugh O'Donnell at the Pacific Northwest Trade Association meeting when he recounted the areas in which these laboratories were at work:

Leaf feeding.
The irradiation of apple sauce so that you don't need refrigeration.

Insect control—not directly in the sense which you and I are used to it but by very interesting experiments and direct control of the breeding.

I know that there are a lot of problems; we have not begun to find them but are you defining the problems are you insisting on pressure? If so how come the western half of the United States and the whole of Canada are leaving these problems largely to sixty-three laboratories in the Eastern States.

Of course we have made advances in the control of pests. Of course we have made advance in the use of fertilizers and all of these ideas but I am leading you to the problem as to whether your equipment development has paralleled that of the construction industry or the textile industry and, if not, why not?

I am leaving with you the question of whether you are getting adequate answers to a job in the food industry with which you are concerned and for which you are responsible to society.

I am very much concerned about the bruising of fruit. I am sure you are. What are you doing about it or are you accepting that a potato grader is good enough for apple grading? I wonder whether this problem of the handling of fruit by the wholesaler and the retailer as I have seen it in the United States and Canada is good enough in an age which is spending its millions and its billions in control of chemical industries as we see them. When I see a girl in a retail store handle apples as if they were potatoes, then I wonder whether the retailer feels that he is discharging his obligation to society or whether he should go pretending that he is when you see girls throw them over the display rack.

I wonder whether wholesalers recognize it as a responsibility. I don't find in the literature nearly enough to help you settle the problem of claims, except on the basis of much more rigorous and much more spooled out definitions of grading than exist in the regulations of any country I have examined.

Said Mr. MacPhee: "That is my only reference; perhaps even

Mart Kenney

Norma Locke

Mart Kenney and his Western Gentlemen. Big Centennial dance

Summerland Teed Up Over Fall Fruit Fair Sept. 26-27

The big show — all the fun of the fair, the South Okanagan's biggest Fall Fair — is little more than a week away.

Two days, Friday and Saturday, September 26 and 27 — and it's extra special this year with the Summerland Board of Trade combining its second annual fruit fair with Summerland's big Centennial Celebration.

The Summerland Arena will be the venue for the big show with a handsome array of exhibits assured.

A feature attraction will be the TV talent show billed for Friday night, September 26 when the community's talented will compete for prizes and the big prize of a live TV appearance, over CHBC-TV.

Then there is the midway, featuring rides and games which will be located just outside the arena.

Saturday night will see the big dance feature, but you don't have to wait until Saturday for the dance program before visiting the fair. This year you pay fifty cents in admittance and the ticket is good through the two days and you can go in and out as often as you please.

There'll be eats — there'll be exhibits galore.

Keen competition is expected in the fruit and vegetable classes, and the versatility of the district will be demonstrated

with displays, in competition, of honey and poultry.

There'll be a fruit pie contest — this is open to mothers, grandmothers, spinsters, children, fathers and bachelors.

A colorful and striking flower exhibit is being arranged by the Horticultural Society and nursery men. Mass displays of Mums, for which the district is famous, are being considered.

There will be a hobby section for which entries are rolling in.

And there'll be music — the music of Summerland's well-known and highly rated Town Band and then there'll be the lassies of the Vernon Girls McIntosh Band to make the rafters ring.

The Vernon girls will give a demonstration of Highland Dancing — wi' swords an' a'.

The colorful folk dancers of Bavaria will be presented by an Osoyoos group in traditional costumes.

There'll be rock and roll — there'll be square dancing. It's fun and frolic and also a demonstration of what Summerland is — what Summerland can do — all that is required to make the Board of Trade's second annual Fruit Fair and Summerland's Celebration a success, is your attendance.

It's a big fifty cents worth, Friday and Saturday, September 26 and 27.

Summerland property owners will go to the polls Thursday, September 18, to vote upon Bylaw No. 870, a bylaw which if approved will authorize the Municipal Council to borrow the sum of \$40,000 to finance re-vamping of the municipality's electrical distribution system.

Voting will take place at the Municipal Hall, West Summerland, and at Lakeside Church in lower town between the hours of 8 a.m. and 8 p.m. Only owner electors (property owners) are entitled to cast their ballots on a money by-law.

Revamping of the electrical system to carry 8,300 volts as against 4,800 is necessitated by the growth of the area and to ensure that users get sufficient power at all times.

Municipal Council is presenting this bylaw to the property owners of Summerland is doing so after many months of research and on the recommendation of an outstanding electrical consulting engineer.

The borrowing, Reeve F. E. Atkinson has made clear, will not be reflected by any change in the tax structure. Capital and interest payments will be retired from the earnings of the electric light and power department.

Reeve and Mrs. F. E. Atkinson left Saturday for Europe, via the Polar route, on a trip which will keep them away for two months. Councillor Norman Holmes is acting reeve.

The Atkinsons flew to Amsterdam and then on to Switzerland. During the next two months they will travel extensively in England, Scotland and Ireland, and also on the continent.

Reeve Atkinson plans many visits to Experimental Stations and Food Processing plants in many countries.

Talent Show Deadline Monday

Entries for the big TV talent show scheduled for Friday night, September 26, in the High School Auditorium will be received up to Monday, September 22, Roy Wellwood, chairman, has announced.

The show is part of Summerland Board of Trade's Fall Fruit Fair and Centennial celebrations.

Apart from regular prizes there is one big prize for the winners, an appearance over Kelowna's CHBC-TV station. To win at Summerland on Friday September 22 could be the beginning of a career in TV for the winners. Get your entry in now.

Rink Association Meets Sept. 24th

Summerland Rink Association will hold its fall meeting on Wednesday of next week, September 24 at 8 p.m.

The meeting will be held at the arena and it is hoped that there will be a large attendance. The arena is being readied for another winter of activity and many plans have to be made. In calling the meeting the executive stresses that the arena is a community affair and that responsibility for its management rests with the taxpayers, who, willy-nilly, through taxes must pay, in part, for its operation.

Trades Post Office Job For Teaching

Summerland's popular postmaster, Ross McLachlan, has given up 13 years seniority in the postal service to take up a teaching career.

Mr. McLachlan, who took two years University after discharge from the armed services, left for Vancouver early this week where he will take teacher training at the University of British Columbia.

A past president of the Rotary Club, for some years a trustee on the local school board, and also chairman, Mr. McLachlan was always active in the affairs of the community, and the hope has been expressed that he will eventually take up a teaching position here.

Mrs. McLachlan and family will continue in residence here. No successor to Mr. McLachlan has yet been named by the postal department.

Red Cross Blood Donor Clinic Here On October 3

Blood donors—the Red Cross Blood Donor Clinic will be in Summerland on October 3. As usual the clinic will be held in St. Andrew's Church Hall.

Nick Solly, who has succeeded J. Y. Towgood, as Klwanis blood donor committee chairman, says that a community-wide telephone canvass, warning of the impending visit of the Red Cross Clinic will be made this week.

Summerland always responds generously to this appeal and we are hopeful that this year response will be more generous than ever," Mr. Solly said. More details next week.

Jesse Widby

The Rotary Club of Summerland tomorrow will be host to Jesse Widby, governor of the 500th district Rotary International, who is making his annual official visit to each of the 28 Rotary clubs in Washington and British Columbia.

THE KIMBERLEYS, Dick and Sheila. "A show inthemselves" Acclaimed as one of the most versatile and entertaining acts in show business today, The Kimberleys specialize in songs with piano, impressions comedy routines and instrumentals.

The Editor,
Summerland Review,
I was listening to Les Way on my radio on Tuesday and he mentioned an editorial you had written about the condition of Peach Orchard Cemetery. This made me feel very sad because my father, James Kelt, is buried in that cemetery. We buried him there because, during the time he lived in West Summerland at Mountain View Home, he always said how beautiful it was and so we chose it for his last resting place.

We live on a dairy farm and haven't a car so that it is impossible for me to travel to West Summerland to attend to my father's grave. Rev. James of West Summerland has been trying to keep down the weeds. We thought a headstone might help so my sister (who lives near Chicago) and I have almost completed plans to have a headstone shipped to West Summerland.

What I want to know now is: Has your Editorial had the desired effect and are conditions going to be different in Peach Orchard Cemetery?, so that we can complete our plans for a headstone. I taught in a small community in Saskatchewan that had a Women's Auxiliary to the cemetery and it was kept in very good condition. If such a plan or a similar one is taking shape in Summerland, I would like to help to get it started. So, Mr. Editor, I have enclosed a cheque for \$5.00 and would like you to pass it on to the proper person.

Thank you for your help in this matter.

Mary C. Pantou,
Tappen, B.C.

ORCHARD RUN

By Wally Smith

I have just finished reading an article written by Alfred N. Leatherbarrow and published in the Montreal Family Herald. The man with the uncommon name made some rather startling suggestions concerning farming when he addressed a Toronto convention of the Meat Packers Council of Canada earlier this year. The Family Herald article is an outline of what he said on that occasion.

Mr. Leatherbarrow finds fault with the shape of agriculture today and points out that 40 percent of the farmers are producing 80 percent of the food. The other 60 percent of the farmers who produce a meagre 20 percent of the nation's food supply deserve no consideration.

He doesn't want to see the small farmer go out of business any more than he wants to see agriculture in the hands of a few. "But we must realize farming is no longer a way of life, but a means of making a living."

Larger farms of 2,000 acres or more, each with a trained farm manager, said farms owned and operated by the meat packing industry, are suggested by Mr. Leatherbarrow. He is quite right when he says such farms could be operated with a greater degree of efficiency, make the best use of land, reducing waste, and avoiding duplication of equipment.

A farm of this type would be like a factory, with all workers punching the clock, a seniority clause, and assembly line methods.

I can see the larger unit working to advantage in the Okanagan fruit belt. Not a 2,000 acre unit, but certainly something a lot bigger than the 3 or 4 acre orchards that are so numerous in the Okanagan.

If we are going to turn the Okanagan fruit growing industry into a sideline for the man with a steady payroll job who works his orchard evenings, Saturdays and Sundays, then the three or four acre unit is big enough.

But if he is going to make fruit growing a business and not a week-end hobby, the orchardist should have 15, 20 or more acres — an operation big enough to justify the cost of machinery needed to work the orchard, and with a few spare acres so that new trees can be planted from time to time to keep the orchard at peak production.

Some will disagree with this claiming that 10 acres of orchard is enough, but be that as it may, the general trend in agriculture today is toward larger farms with fewer workers and more machinery producing more and more food.

Not so many years ago fifty percent of Canada's population was engaged in farming. Today only 17 percent are in agriculture, and Mr. Leatherbarrow thinks that in another 20 years the number will be down to nine percent.

By that time we'll all have our new triple-red apples in full production and a wheel chair that runs on atom power.

Something To Remember

The kids are back in school — they've been back more than two weeks now, long enough for motorists to have regained the habit, lost during the summer holidays, of taking their foot off the gas at the warning sign, "school".

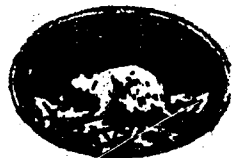

Police are particularly concerned at the road hazard to children and they have requested the press to appeal to the motorists to watch out for children. Needless to say, if the appeal is not heeded the police will take action to see to it that motorists do watch out for children.

And while referring to the police it might be well to suggest that the people of Summerland acquaint themselves with the most direct and quickest method of getting hold of the police after routine office hours. Summerland isn't big enough and cannot afford the cost of a 24-hour staffing of the police office and so, with a car on patrol, and sometimes, of course, even the RCMP has to grab some shuteye, there is no one in the office. So, if there is no response to your call to the local office Summerland 3406, and if the matter is urgent, phone Penticton

4300 or, if you can't recall that number, dial the operator, long distance, ZERO, and ask to be put in touch with the police. Penticton headquarters is in touch with the Summerland patrol car by radio and quick action can be expected.

Remember, if you can't get the local police office 3406, phone the Penticton detachment at Penticton 4300. Had a local resident known this procedure a little while ago it is quite possible that thieves who broke into the Sports Centre would have been apprehended.

And, in the case of fire, call Summerland 2000.

District Governor Tells Of Rotary

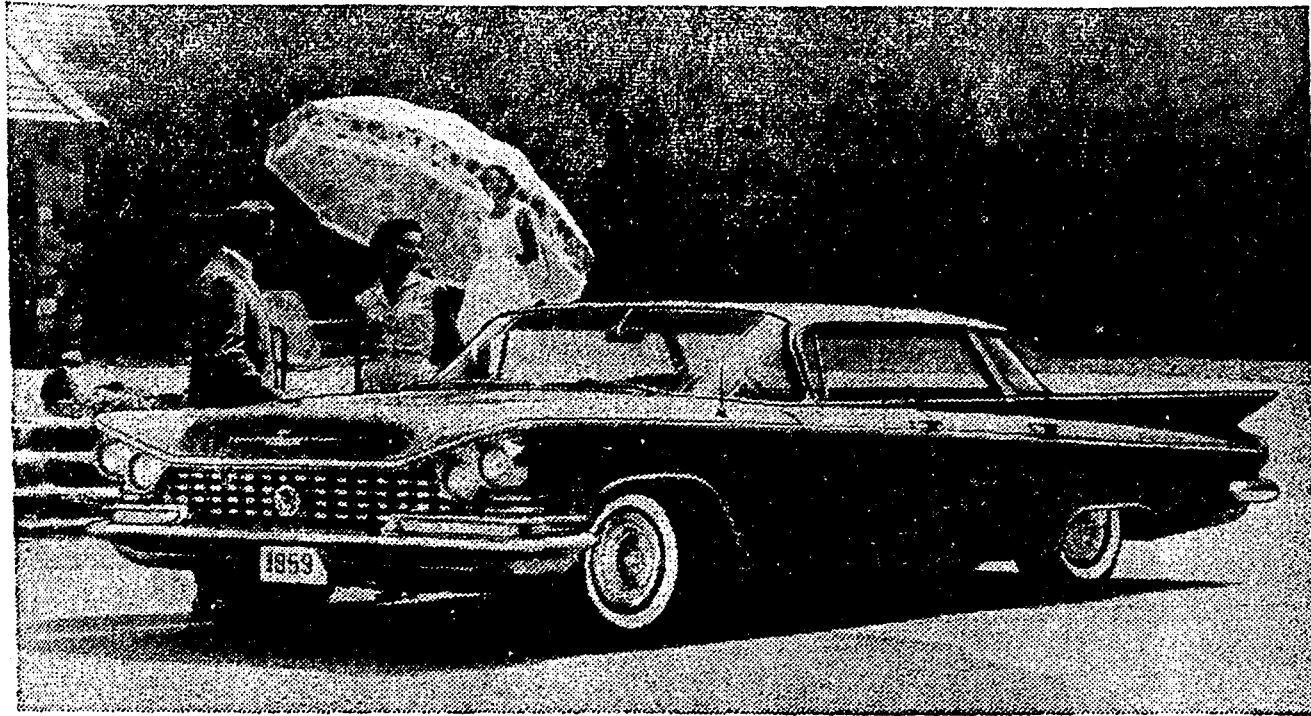

Rotary clubs in 110 countries and geographical regions throughout the world are united in an endeavor to promote international understanding and goodwill and peace. This reminder of the major objective of Rotary International, co-incides with the visit here of Rotary District Governor Jesse Widby of Wenatchee.

In addition to the activities of the more than 9,800 Rotary clubs within their own communities to promote this objective, Mr. Widby explained, Rotary International has awarded grants of more than \$2,600,000 in the past 11 years through its program of student fellowship, which enable outstanding college graduates to study for one year in countries other than their own, as Rotary ambassadors of good will. Since 1947 when this program was established, 1,076 Rotary Foundation Fellowships have been awarded to students in 43 countries.

This Rotary District has awarded three Foundation Fellowships: namely, Harold P. Capozzi of Kelowna, Daniel E. Peterson of Coulee Dam, Washington and Ronald C. Lee of Yakima, Washington.

"With fellowship and service to others as its keynote, Rotary provides a common ground for 462,500 business and professional executives throughout the world, regardless of language and creed," the Rotary governor emphasized.

BUICK PIONEERS NEW HARDTOP STYLING

Buick sets a new trend in 1959 with the flat roof line on all four-door hardtop models. This model, in LeSabre series, features a curved rear window that encompasses the entire rear passenger compartment. Compound windshields that eliminate wind noises are featured on all 1959 Buick models. Aluminum front brake drums are standard on all Buicks in 1959 and all models are equipped with distortion-free safety glass throughout. LeSabre is mounted on a 123-inch wheelbase and is powered by a 364-cubic inch engine with 10.5-to-1 compression ratio.

Free Spinal Examination Offered To All School Students

School children from nursery school through high school will be eligible for free spinal examinations throughout British Columbia September 22-26 inclusive as part of a nation-wide health improvement program.

This public service program is being sponsored in B.C. by the Chiropractors Association,

and every Doctor of Chiropractic in the province is donating his time and services during the week.

Purpose of the Back-to-School Spinal Check-up Clinic is the detection of spinal misalignments and posture defects which may cause trouble in later life by interfering with the transmission of nerve impulses through the spinal cord.

This is the second year of this program and it met with tremendous response in B.C. last year, when more than 5,000 school children were checked. This year the Chiropractors Association expects to at least double the number of spinal examinations in an ever-increasing effort to alert parents and school children alike to the healthy benefits of good posture and spinal alignment.

Parents must accompany elementary and junior high school children to the examination. High school students, however, are not required to be accompanied by a parent.

All children checked will be given a card to take home to their parents, detailing the results of the examination.

A survey of the results of last year's program showed that two out of three children examined had defective backbones.

"These chiropractic findings were virtually identical with those of a Kansas City orthopedic surgeon who recently announced that less than 40 percent of some 6,000 persons examined were free of spinal defects," declared Dr. Evann Davies, president of the Chiropractors Association of B.C. "A misaligned backbone or vertebra can create pressure on nerve

Sunday School Opening Held

Sunday School reconvened at the Summerland United Church on Sunday morning, September 14, in the basement assembly room, all departments meeting together for Promotion Sunday. Although there were still quite a few away after summer recess, there were about 200 children and teachers present.

Commencing with the Nursery Department each class being promoted to a new department received their certificate and were introduced to the superintendent and children in the new department.

There will be about fifty children in the Nursery Department.

22 were promoted from Nursery to Primary.

23 were promoted from Primary to Junior.

20 were promoted from Junior to Senior Department.

Next Sunday, September 21, regular classes will be resumed, only one department, the Nursery Department, under Superintendent Mrs. F. Stewart meeting at 11 a.m. in the Church Hall, all others to meet at 9.45 a.m.

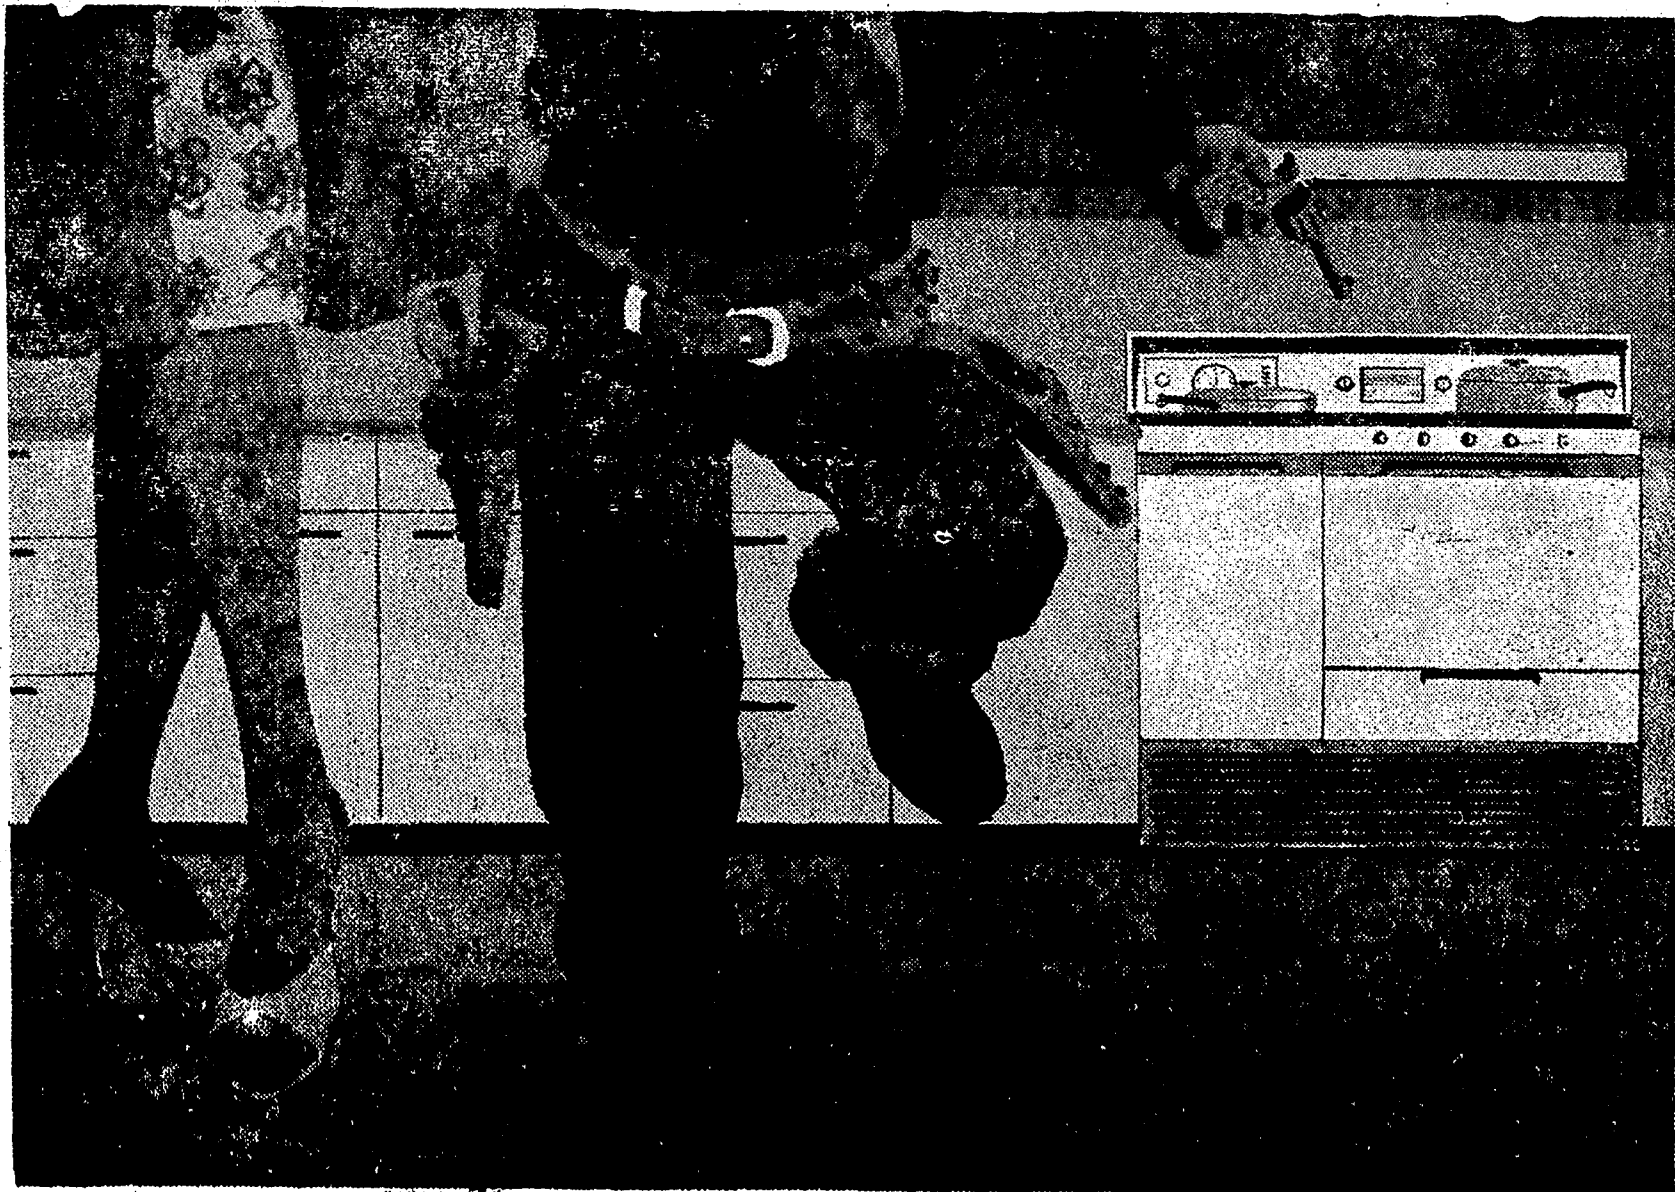

Primary Department under Supt. Mrs. Wm. Durrick, meets in the Church Hall.

Junior Department under Supt. Mr. John Tamblin, meets in the basement.

Senior Department under Sunday School Superintendent Mr. George Ryman meets in the old Church Hall.

of the spinal cord and cause a multitude of illnesses."

Parents can make appointments for free examination of their children by telephoning any one of the chiropractors in their vicinity.

"Have gas range... CAN travel!"

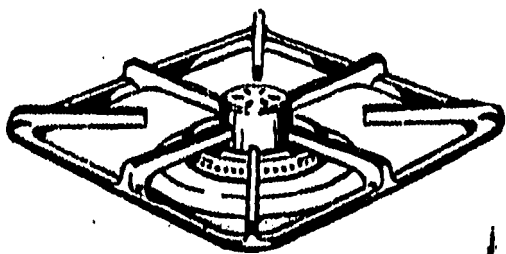

Time off for a jaunt with Junior through outlaw country... time off for a hair-do or a visit to friends... time off from the chore of potwatching for ever.

Yes, cooking time becomes leisure time when you own a modern automatic natural gas range. Food won't, can't burn in an oven that turns itself on and off. Your thermostatic controlled top burners raise and lower the temperature automatically, keep the exact temperature you dial. And yet—with all these time saving automatic advantages—a modern gas range still costs less to buy, install and use.

Take time off today. Have your local gas appliance dealer demonstrate his automatic natural gas ranges. There's nothing so clean, so cool, so convenient as gas cooking!

Burner with a Brain

makes every pot and pan you own an automatic utensil. Ends burning, scorching and boil-overs. And when the burner is off, heats off—instantly.

Large Attendance At W.I. Meeting

Mrs. Harold McLarty showed beautiful slides taken in England and France to members and guests of the Summerland meeting Friday afternoon at the Women's Institute at the regular Anglican parish hall. The slides and commentary were enjoyed by all. Mrs. L. W. Rumball thanked Mrs. McLarty most heartily for presenting such an interesting program.

During the business meeting the president, Mrs. Rumball, was in the chair and welcomed members back after the summer recess.

Mrs. Rumball announced that Summerland had won the cup for the highest aggregate in the

Home Arts section of the P.N.E. for the second consecutive year. Donation of a desk for the new library was reported and will be considered the Centennial project, and will be suitably inscribed.

The Centennial Cookbooks were reported selling well and another order will be made.

The Institute will be in charge of the women's section of the Fruit Fair and much time was spent discussing plans and appointing committees. A pie contest will be held, a display of quilts and rugs and a display of hand-work featuring P.N.E. entries. A guessing game will be held with a Centennial Cookbook being offered as prize.

The annual donation of apples to the Queen Alexander Solarium will be made before October 15th.

Plans for the Fall Sale October 18 were discussed and members were urged to make donations to the various stalls. Mrs. A. A. Fenwick will handle the publicity.

The next meeting on Oct. 10 will be in charge of the Health and Welfare Committee and will feature a panel discussion on juvenile delinquency.

A delicious tea was served by Mrs. J. Y. Towgood, Mrs. Gordon Ritchie and Mrs. C. H. Elsey following the meeting.

Comings & Goings

Recent guests at the home of Mr. and Mrs. Gordon Ritchie have been Mr. and Mrs. Jack Samson of Quesnel, Mr. and Mrs. Sid Thain and their family from West Vancouver and Mrs. Elva Wilson of Vancouver.

Visiting for a few days at the home of Dr. and Mrs. Jack Wilcox is the former's sister, Mrs. Ida Bain of Vancouver.

Dr. James and Mrs. Marshal have returned from a holiday spent at Ocean Falls and Victoria.

Mr. and Mrs. J. S. Mott have as their guests their daughter, Mrs. Lyle Barnes of Burnaby and her baby daughter Kathryn Jean, accompanied by Mrs. Barnes' mother-in-law, Mrs. B. Barnes.

Recent visitors at the home of Mr. and Mrs. Robert Alstead, Trout Creek were Mr. and Mrs. Gordon Drew of New Westminster.

Mr. and Mrs. Walter Wright are visiting for a few days in Vancouver.

Mr. and Mrs. Peter Beulah and son, Micheal left Sunday to return to Vancouver after spending the summer at the home of the latter's parents, Reeve and Mrs. F. E. Atkinson. Mr. Beulah received the Finning Tractor Company's scholarship of \$250 and is entering his fourth year in Engineering at UBC. Mrs. Beulah is entering her fourth year in Home Economics.

Mr. and Mrs. C. R. Adams left Thursday for Prince George to attend the marriage of their son Donny and Miss Lev Tarnowski, which took place Friday, September 12. They returned home Sunday.

Mrs. G. I. Gilman is leaving on September 22 for Bermuda and from there she will go on to an extended vacation in England.

Visiting at the home of Mr. and Mrs. H. J. R. Richards are their son F. O. Norman Richards RCAF Instructor at Portage La Prairie, Mrs. Richards and their baby son, Steven.

Mr. and Mrs. Les Rumball on Sunday accompanied their daughter, Diane, to Vancouver, where she will take nursing at the St. Paul's Hospital.

Guests at the home of Mr. and Mrs. T. B. Lott last week were Mrs. Lott's sister and brother-in-law, Mr. and Mrs. V. R. Thirkell of West Vancouver.

Mr. and Mrs. E. R. Butler have returned from a motor trip to the Cariboo.

Miss Eileen Wilcox is home from the RCAF station at Comox, to spend a few days with her parents, Dr. and Mrs. J. Wilcox, before returning to UBC.

Mr. and Mrs. C. B. Snow and Muriel spent a few days recently visiting in Wenatchee, staying at the home of Mr. and Mrs. E. J. Courney.

Visiting at the home of Mr. and Mrs. Lorne Perry last week was Miss Sheila McGregor of Vancouver.

Dr. C. D. Bishop arrived from Kentsville, N. S. on September 5 to take up his position as Superintendent of the Summerland Experimental Station for the next year. With Dr. Bishop are his wife and daughter. Dr. Bishop has exchanged positions with Dr. Anstey who left some time ago for Kentsville, N. S.

Mrs. D. L. Milne and Mr. Blake Milne left last Wednesday for California.

A family reunion was held this weekend at the home of Mr. and Mrs. John M. Pearson, Trout Creek. Those attending were Mr. and Mrs. Ron Allerton and son, Skipper, of Trail, Mr. and Mrs. John N. Pearson, their son three daughters, of Penticton, Mr. and Mrs. W. L. Pearson and Mr. and Mrs. Frank Pearson, their sons Terry and Lee and daughter, Dorothy, all of Vernon and Mr. and Mrs. Geoffrey Balcom and sons, David and Wayne, also from Vernon.

Mr. and Mrs. Ralph Downing and Mr. and Mrs. Clarence Lackey of Trout Creek are on a hunting trip in the Cariboo this week.

Mrs. Gordon Dinning entertained the Lady Lions Club of Penticton at her Trout Creek home on Wednesday.

Mr. and Mrs. Gordon Dinning had as their guest last week, Mr. H. M. Lockwood of Vancouver. Mrs. Lockwood who is visiting in Cranbrook will spend a few days with the Dinnings while enroute home.

Inadvertently omitted from the report of the shower given in honor of Miss Pat Boyd, held last week at the home of Mr. and Mrs. Frank Beaven, were the names of the three hostesses, Miss Wendy Wright, Miss Philis Fabel and Miss Margaret Beaven.

FUND DRIVE REPORTED SUCCESS

Summerland's hospital administrator, J. E. O'Mahoney, was congratulated by the Hospital Board, meeting last night, on the commendation received from the BCHIS accounting service on the excellence of the hospital records.

Approval with some minor alterations, and in fact with some increases was given by the BCHIS to the new budget.

An increase in 40 cents a day per patient rate has been made by the BCHIS and the charges will be retroactive to the beginning of the year.

The board of directors discussed plans for general hospital improvements including steps to improve egress from the hospital in the event of an emergency.

Visitors at the home of Mr. and L. L. Fudge during the past week were Mr. and Mrs. Harry Hilliard of West Vancouver.

Mr. A. Crawford Sr. had as guests last week Mr. and Mrs. A. Pike of Burnaby.

Comings and Goings

Mrs. V. Parker and son Bryce, accompanied by Mrs. W. Ross, all of Trout Creek, drove to Trail for a few days last week.

Mr. and Mrs. Eric Brinton have left for Vancouver for a holiday. They took the Fraser Canyon route.

Mr. and Mrs. George Lewis had as their guest last week Mr. Alex Knudsen of Powell River. Mrs. F. Olsen of Trout Creek is visiting at present with her sister in Edmonton.

Mr. and Mrs. Ewart Woolliams and their son, Neil, enjoyed a holiday trip to Bella Coola last week. They picked up Jane Woolliams in Vancouver on her return from Europe, where she spent the summer, and drove her to Trail where Miss Woolliams holds a teaching position.

John Woolliams has also returned from Quilchena after spending the holiday months

Summerland Review

Wednesday, September 17, 1958

An elegant double-breasted coat of soft wool with a deep rolled collar of "Terylene" curled to simulate persian lamb was designed by Raoul-Jean Foure for the fall collection of the Canadian Association of Couturiers. Hat is by Irene of Montreal.

UNITED CHURCH W. A. MEETING

The fall general meeting of the United Church W. A. was held on September 15 in the Church Hall, with 24 members present. Mrs. J. Holman, the president was in the chair. Mrs. J. C. Wilcox gave the devotional her theme being, "Using Our Talents".

Plans were discussed for the Christmas bazaar and tea to be held on November 29, convener will be Mrs. L. Wright. The bazaar will feature home baking, aprons, fancywork, novelties and a new item, a delicatessen.

All members were asked to leave donations of canned fruit and jams in the Church, to be sent to the Burnaby Girls Home. Mrs. M. D. Proverb and Mrs. M. D. Ward volunteered to take charge of the cradle roll. This task has been very ably done by Mrs. F. Steuart and Mrs. M. Ducommun for several years. The evening concluded with an interesting film on Christianity in Japan. Refreshments were served by the "Semi Circle".

JACK AND JILL SCHOOL OPENS

Jack and Jill Kindergarten will re-open Wednesday, October 1, in the Summerland United Church Hall. This year's enrolment shows more than 50 children will attend, so there will be two classes. The morning class will be held from 9 to 11 and an afternoon class from 1 to 3. Mrs. F. Steuart is in charge of the kindergarten and her helpers will be Mrs. Roy Kuroda and Mrs. Mel. Ducommun, with Mrs. James Heavy-sides as snack phoning convener. There is still room in the afternoon class, which has as its primary objective the preparation of the five-year-old for grade one in the elementary school.

A workshop for kindergarten teachers and helpers will be held in Vernon on Saturday, Oct. 18 with instructors from UBC. It is being planned to hold four of these schools of instruction during each year in the Okanagan Valley.

Last Rites Held For Mrs. M. Holden

Mrs. Minnie Holden passed away at Princeton, September 13 in her 57th year.

Besides her loving husband, Fred, she leaves to mourn her two sons; Anthony Fetterer of Summerland and Emile Fetterer of Vancouver, and four grandchildren.

The late Mrs. Holden was a resident of Summerland for 22 years prior to moving to Princeton where she resided for the past five years.

Funeral services for the late Mrs. Minnie Holden were conducted from St. Andrews United Church here on Tuesday, September 16 at 10:30 a.m. with the Rev. C. O. Richmond officiating. Pall bearers were: J. Mitchell, J. Maddison, D. Strachan, E. Stevens, G. Brennan and E. Brennan. Interment was in Peach Orchard Cemetery.

Roselawn Funeral Home was entrusted with funeral arrangements.

Attending the 16th annual convention of the Municipal Engineers' Division of the Association of Professional Engineers of B.C. in Prince George this Thursday, Friday and Saturday, September 18, 19 and 21, is K. M. Blagborne, Works Superintendent, Municipality of Summerland.

SUMMERLAND AIRMAN OVERSEAS

Sergeant L. McDonald of Summerland, an electrical technician in the Royal Canadian Air Force, is now serving at 30 Air Material Base, Langar, in Nottinghamshire.

Located near Nottingham, on the fringe of Robin Hood's famous Sherwood Forest, this base the only Commonwealth base in England, provides the equipment that keeps airborne the jet fighters of Canada's NATO Air Division in Europe.

At this base Sgt. McDonald will be employed in 314 Technical Services Unit, the organization responsible for the repair and overhaul of RCAF equipment.

The son of Mr. and Mrs. F. McDonald of West Summerland he was born in New Westminster

ster and educated at Burnaby Hight School. He has been in the RCAF since 1948 and during this time he has served at units in Quebec, Ontario, and at McCord Base, USA. With him in England is his wife (formerly Laurette LeBlanc of Montreal) and their children, Nicole (12) and Bouise (5).

Mr. and Mrs. Bill Croft and Ronnie motored to Anaconda, Montana last weekend to attend the wedding of Mr. Croft's niece. They were accompanied by Mrs. Fred Croft and Mrs. Cecil Wade.

ABOUT CREDIT UNIONS.

If a person wishes to save, the Credit Union is one of the best methods known. Not only does it provide convenient facilities for small or large savings, it also provides life insurance for every dollar saved up to one thousand dollars, subject to limitations on savings deposited after age 55.

When members borrow from their Credit Union, and pledge their fully or partially paid-up insurance policies as collateral, they do so without jeopardizing the protection value of an insurance policy in the event of death, because loans in Credit Unions are insured against death or total disability through their own insurance facility the CUNA Mutual.

Be Wise! Join Credit Union Today

Summerland students attending UBC this year will be:
 1st Year — Diane Jurick, Phyllis Fabbri, Eddie Matsu, Leonard Burdon, John Menu, Wendy Wright and Bruce

Brown.

2nd Year — Barbara Baker, Margaret Lott, Glen Manning, John Adams and Don Campbell.

Local Man Off To Jamaica

A few friends and relatives gathered at the home of Mr. and Mrs. J. T. Littau, Monday evening prior to the departure of Mr. and Mrs. H. A. Littau for

Kingston, Jamaica. The couple had been on a month's visit here with their parents Mr. and Mrs. J. T. Littau and Mr. and Mrs. Prior. A very interesting evening was spent by Mr. Littau showing slides of Jamaica where he is a missionary for the Watch Tower Bible In Tract Society.

Mart Kenney Here On Monday

Canada's top dance band, Mart Kenney and His Western Gentlemen, will play in the Summerland High School Auditorium on Monday, from 9 p.m. to 1 a.m. under the sponsorship of the Summerland Centennial Committee.

The band, which is not exclusive to gentlemen, having a former Canadian Miss Universe contestant among the three ladies associated with it, is a band to dance to, and also to see as it has floor numbers too.

Norma Locke is the band's vocalist, Elaine Bishendene, (1956 Miss Universe contestant) appears as a dancer and featured soloist.

"The Kimberleys", Dick and Sheila, are labelled "a show in themselves" for their versatile brand of entertainment. The two specialize in songs with piano impressions, comedy routines and instrumentals.

Dancing or watching, this is an evening not to be missed.

Mart Kenney and his Western Gentlemen, playing at the High School Auditorium, West Summerland, Monday, September 22

Cancer Essay Exam Announced

High school students throughout B.C. have been invited to play a role in the fight against cancer by entering an essay contest sponsored by the B.C. division of the Canadian Cancer Society.

Students in grades 9 to 12 can compete for 33 prizes ranging from \$50 to \$10. Subject of the essay is "Cancer - The Search for a Cure".

The contest will focus attention on the work being done by Conquer Cancer funds to support vital research work aimed at finding a solution to Canada's No. 2 killer disease.

A variety of literature will be provided for students to thoroughly research their subject and increase their general knowledge about cancer.

The contest is part of the Society's education program which seeks to increase public awareness and knowledge of cancer and to stimulate early diagnosis and treatment when chances for a cure are good.

The contest is organized with the co-operation of high school principals who will screen entries from their schools for the best three to be entered for final judging.

Junior Red Sox Take Lead In Playoffs; Defeat Vernon 7-1

Summerland Junior Red Sox, playing like champions, took a one game lead in a best of three series for the Okanagan Junior Baseball championship, here on Sunday when they defeated Vernon to take the first game by a decisive score of 7-1.

Carl Sheeley on the mound for Red Sox yielded only two hits and retired 11 men via the strikeout route.

Behind Sheeley was a team of hustling ball players.

The second and a third game if necessary will be played in Vernon on Sunday, and the lads are hoping that Summerland fans will follow them.

The large and enthusiastic crowd here Sunday saw Vernon take the lead in the first inning, scoring their lone run when the first batter missed a third strike, but the ball bounced over the catcher's head and the batter

made first, stole second and got home on single.

That was it for Vernon. Summerland, was hitting well but Vernon's strong defensive play held the home team scoreless until on in the eighth. The visitors on their toes pulled off three double plays to nip the Red Sox' rallies.

Came the bottom of the eighth and the roof fell in for Vernon. With one away, Menu was walked, singles by Sheeley and Gillard filled the bases. Parker walked Shannon and DeWitt singled and then Larry Lemke unloaded the bases with a long double. When the fire was finally doused and the fans were down in their seats, the Red Sox had a 7-1 lead. Vernon went down one, two, three in the ninth, marking the first time in three years that the Red Sox had won a playoff game from Vernon.

LINE SCORE	R	H	E
Vernon 100 000 000	1	2	1
S'land 000 000 07X	7	11	1

Macs On Spot Here Sunday

Summerland Macs were pounded into humiliating submission at Kelowna last Sunday when the high riding Kelowna Orioles blasted them for 10 runs in the opening game of the Okanagan - Mainline Baseball League semi-finals, to win in a canter by a score of 10-3.

The second game of the semi-final series will be played at the ball park here on Sunday, when on their own diamond the Macs hope to even the series. Game time is 2:30 p.m.

At Kelowna the Macs were licked in the first inning when the Orioles bunched three hits two singles and a double and with a couple of free passes to first, scored five runs.

Macs replied in that inning with one run, a screaming homer clouted by Parker.

Macs threw their entire pitching staff into the battle using Chapman, Christanti and Hooker.

Chapman was hammered out of the box in that first inning, Christante was relieved in the second by Hooker after Fritz' home run with one on, gave the Orioles another two runs.

Hooker dismissed the visitors one, two, three in the third, but yielded two more runs in the fourth. Orioles threatened another run in the sixth, bunting three singles, but with bases loaded Hooker bore down to cut

them off from home base.

Two singles and an error accounted for the Orioles' number ten run in the seventh.

The Macs were unable to solve the offerings of Orioles' hurler Scott, supported by an air tight field. Scott held the Macs to six scattered hits.

Macs' last kick came in the sixth when two singles and a walk put two runs in for their total of three.

25 Gallons of Paint Waiting For Workers

There are 25 gallons of good paint sitting at Summerland's Arena. There are large expanses of walls and seating requiring to be brought in touch with that paint.

But splashing 25 gallons of paint around is a big job and, so, George Stoll is calling for volunteers to help do the job.

On an annual tour between 25 and 30 students of Agriculture arrived in Summerland on Saturday and are staying at Camp Sorec. They visited the Fraser Valley prior to coming here and are enroute north to Kelowna, Vernon and Kamloops areas, gathering information and must submit a written report on the tour as part of their course in Agriculture at UBC.

On Sunday they attended services at the various churches here and on Monday spent the day at the Summerland Research Centre, visiting the Experimental Station and the Entomology Laboratory.

Engagement

Mr. and Mrs. F. R. Ganzoveld announce the engagement of their daughter, Viola Mae, to Mr. William Hackl, son of Mr. and Mrs. H. Hackl, of Graz Austria. The wedding will take place on October 10, 1958 at 7 p.m. in the Baptist Church, West Summerland. 38-p-1

Mr. and Mrs. Richard Ferrie, of Sannichton, B.C., announce the engagement of their daughter, Elizabeth Esther (Betty) R.N., to Frederick Albert Smith, of West Summerland, son of Mr. Richard Smith of Kelowna. The wedding will take place Friday, October 3, 1958, at 7:30 p.m. in St. Stephen's Anglican Church, West Summerland. Rev. A. A. T. Northrup officiating.

Mr. and Mrs. Arthur Nichol, of Ottawa, Ontario, announce the engagement of their daughter, Gloria Nichol, to Mr. Donald John Blacklock, only son of Mrs. J. Blacklock, of Summerland and the late Mr. John Blacklock. The wedding will take place on Saturday, October 4, Bethel Tabernacle, Ottawa.

Black Weekend For Ball Clubs

Summerland Review
Wednesday, September 17, 1958

Macs

Summerland Macs went into early hibernation for the winter last Sunday, literally blasted into oblivion by the rampaging Orioles who took the best of three semi-finals of the Okanagan Main Line Baseball League, two straight, winning the second game here Sunday by a score of 14-1.

The Macs were lambs led to the slaughter. It began at Kelowna two Sundays back when the Orioles thumped the Macs. The Orchard City nine continued to thump on the Macs home grounds, opening up in the first inning with five runs garnered from two free trips to first and then a cluster of four hits, the last a clean-up double by Culos.

Macs' lone run came in the second. Taylor singled and Egeley came through with a two base hit to drive Taylor across the plate.

Winning pitcher was Schaeffer who went the distance. Macs opened with Chapman who went to the showers in the first inning. Hooker took over but he couldn't control the Orioles who mangled his offerings to score three more runs in the second, two in the fifth and did a near repeat of the first inning in the seventh when they bunched four hits, one double by Martino for four runs.

Orioles will now meet the Kamloops Okanots in the OMBL Finals.

Red Sox

The Vernon Hydros evened up the best of three series for the South Okanagan Junior Championship at one game each when they defeated the Junior Red Sox by a 14-6 score in Vernon on Sunday.

It was a hard fought game and a tough one to lose, but the score did not indicate the play.

The Red Sox started fast, scoring one run in the first and knocking out Vernon's starting pitcher in the third.

Vernon came back strong and when Sheeley pulled a muscle in his shoulder and had to be replaced there was no stopping them. Shannon pitched relief and did very well, but lack of experience and control were his downfall. The Red Sox were hitting the ball all day and collected nine hits. Lemke was the

big gun with a double and a home run.

The deciding game of the series will be played in Vernon next Sunday and it looks bad for the locals as Sheeley will be out of action for the remainder of the season.

MIDGET HOCKEY

All interested in midget hockey are requested to turn out for an organizational meeting to be held in the Summerland Arena on Thursday night, of this week, September 25, at 8 p.m.

FOR SALE

EXECUTIVE CARS

Mail bids to A. T. Longmore, Trustee, 55 Nanaimo East, Penticton, B. C. Please mark envelopes "Auto bid".

Promenade

With the coming of fall our thoughts turn to square dancing. This Saturday at Peachland there will be a dance sponsored by the Toten Twirlers in the Athletic Hall with Chuck Inglis as emcee. Bring a sack lunch. A special invitation is extended to callers.

The executive of the Pairs & Squares have not as yet had their meeting to decide on fall and winter dancing in Summerland. However, watch this column and you will be kept up to date on the dance news.

Word has been received that the Peach City Promenaders are sponsoring classes on Wednesday and Thursday nights of each week and the first, second and third Saturday nights of each month.

E. R. Herminston.

was surprised to see that most had died between twenty and thirty years of age. We met some old men who were still prospecting gold in that area. We went to a store where miners had bought their groceries with gold only the day before. Although the gold rush only lasted about 20 years, there are still men today hoping to find their fortune on the banks of the Fraser. We looked through the trailings at Barkerville ourselves but we only found fools gold.

Lucky Winner Of Inland's Contest Gets Gas Furnace Free

Some lucky person in this district is going to be the winner of a free gas furnace on October 6. The furnace, plus the installation cost, will be the gift of Inland Natural Gas Company.

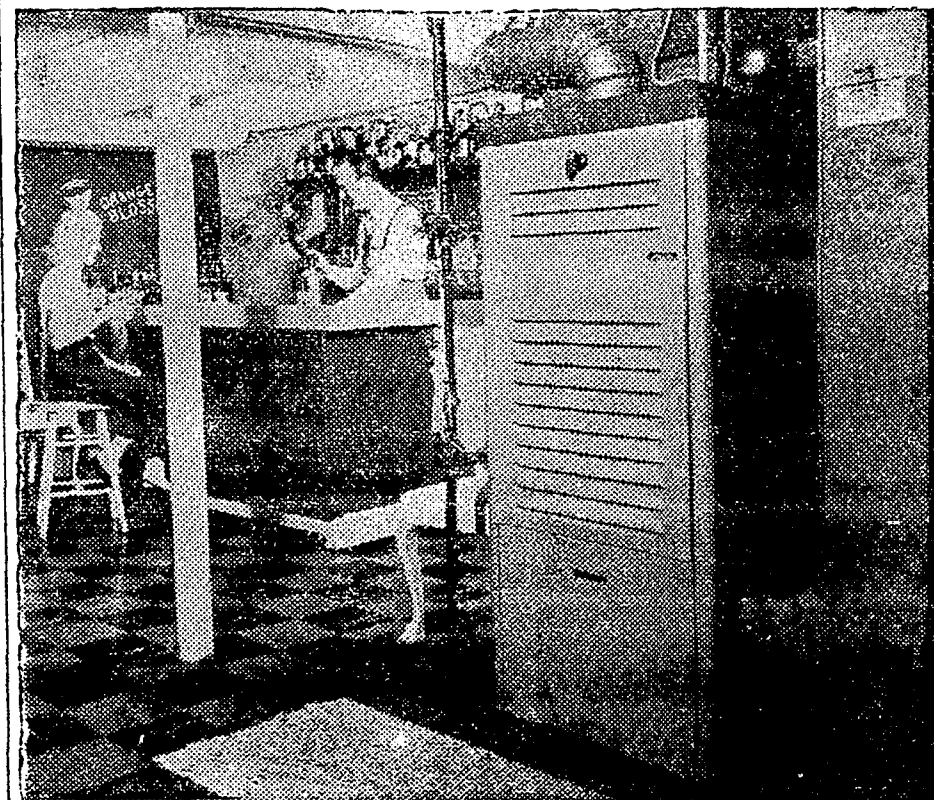

In this issue the Inland Natural Gas Company announces the rules of the contest. This is one of the most unique giveaways ever offered to the public in that you select your own prize. Yes that's exactly what you do. Sometime between now and the end of September, if you are planning on installing natural gas, you make the arrangements for the installation of gas heating equipment, furnace wall or space heater. You select the make and style of heater best suited to your needs and from the dealer of your own choice. After making your purchase you simply fill out an entry form and drop it into the dealer's ballot box. If you win the draw which will take place on October 6, Inland will refund you the full cost of the furnace, plus the installation costs.

Summerland dealers are cooperating with the gas company in this contest and on this page are offering a wide range of furnaces and other gas heating appliances. All will be glad to

submit bids on the cost of installation.

There is no better time than right now to make that switch to gas. In next few weeks fall will be upon us and that means the start of the heating season

which continues for a long, long time. Gas fires eliminate the drudgery of shovelling coal and removing ashes and if you act now you could well be the lucky person who gets a new furnace for free.

You can build your basement room around a gas furnace.

be wise...

buy a GAS FURNACE before the FALL RUSH

YOU MAY WIN IT FREE!!!

Inland Natural Gas will hold a lucky draw on October 6. The prizes... three gas furnaces installed! The winners... three Interior families who are wise enough to buy a gas furnace before September 30. Here are the contest rules.

You must buy a furnace... or wall or space heater... from a natural gas equipment dealer before September 30. You may then fill out an entry form and drop it into the dealer's ballot box. If you win the draw, Inland Natural Gas will refund you the full price of your furnace plus your installation costs.

Win the prize or not, you can't lose in this contest. By buying your furnace before the fall rush you get better service... no installation delays... and you save money sooner. Save money because natural gas heats your home for less money than any other modern fuel.

SAVE AS YOU PAY THE BUDGET WAY—EQUAL PAY PLAN

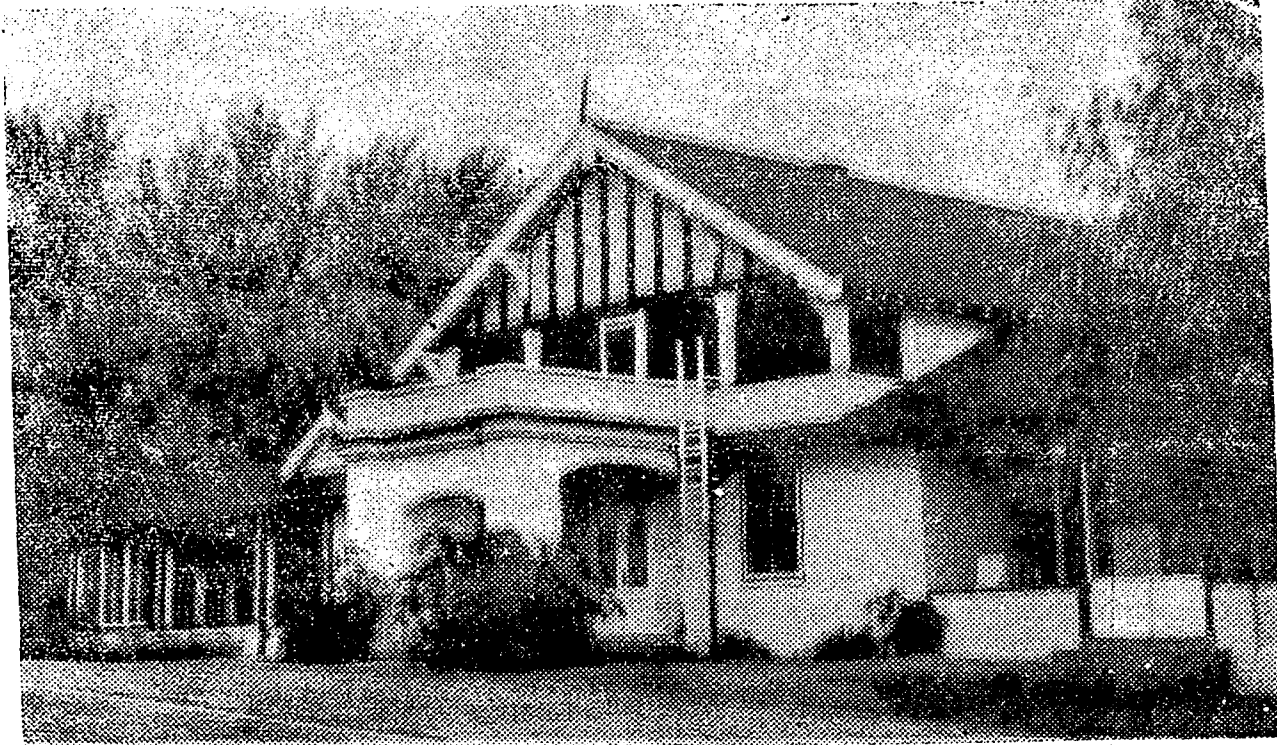

EXTRA BONUS. Buy a natural gas heater before September 30 and you can join Inland's EQUAL-PAY plan... the budget billing plan that lets you budget your heating costs in equal monthly payments over the whole year. See your local Inland Natural Gas Office.

INLAND NATURAL GAS

SUMMERLAND HOSPITAL

*chooses Natural Gas Heating; Air Conditioning
to ensure the maximum comfort of patients and staff*

SUMMERLAND GENERAL HOSPITAL

The first Summerland Hospital was built at the bottom of the Gulch Road. This soon proved to be too small and a larger hospital was built in 1914. This was destroyed by fire in 1919. The new hospital, pictured above, was finished in 1921. The new wing and residence was built in 1947. Total capacity of the hospital is 30 beds and four bassinets, with an operating room and case room. There is a well-equipped X-ray department.

The nursery has an Armstrong baby incubator, fitted with an oxygen limiting tank.

Other services available at Summerland's modern hospital include anaesthesia, basal metabolism tests, electrocardiography, laboratory, therapy, inducto-thermo-therapy, infra-red therapy.

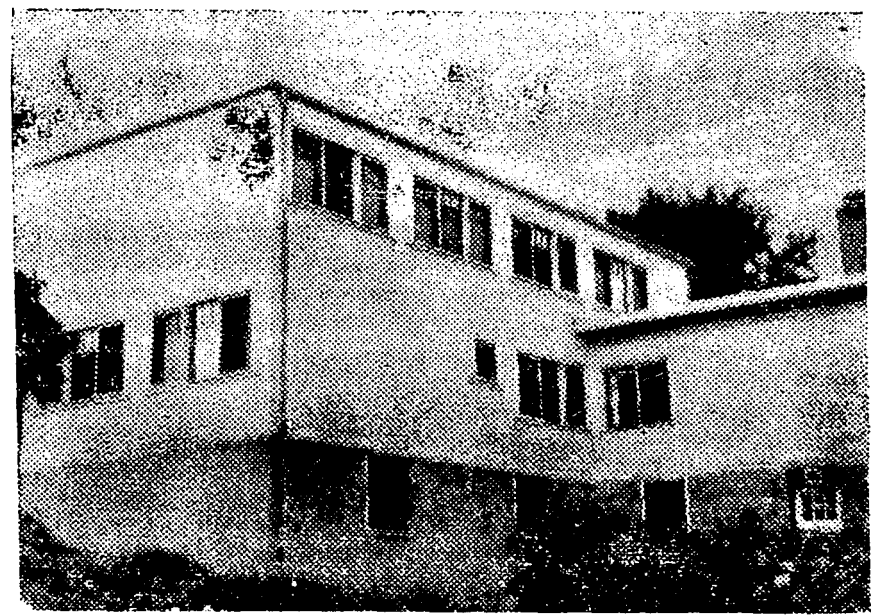

Blood transfusions are given through the Red Cross Blood Transfusion Service, for which no charge is made to the patients.

Summerland's picturesque General Hospital keeps abreast of the times and today is heated the modern way, with Natural Gas, supplied by Inland Natural Gas Co. Ltd.

Work of converting the old coal and sawdust system to Natural Gas was done by McKay and Stretton Ltd. of Penticton, which firm installed two Western conversion burners, one in the hospital boiler and the other at the nurses' home.

The system is fully automatic and temperature range is controlled by thermostat. Heating is a combination of steam and hot water. The domestic hot water supply was also changed over to Natural Gas and officials are highly pleased with the result.

The water heater was replaced with an instantaneous automatic type. Water is heated to a temperature which allows for sterilization of dishes in the final rinse, an important factor in hospital care.

NATURAL RESOURCES

Combine With Natural Gas In Agriculture Research

A view of one small corner of the Summerland Experimental Station grounds.

MILNE'S CANNERY — is a modern plant using the Okanagan's newest and most modern modern fuel—natural gas. The converted boiler at Milne's is fully automatic in every respect which allows for a clean and efficient operation. This was another big conversion job by Pacific Pipe and Flume.

SUMMERLAND'S newest and Canada's most modern fruit packing plant, the Summerland Co-op Growers Association packinghouse is served by natural gas, installed by Pacific Pipe and Flume. The office space, first aid room and large packing and grading area are all heated by this modern fuel. Twelve gas fired units make up this modern heating system.

Dominion Experimental Farm

For many years coal has provided the heat required in the many buildings at the Experimental Farm, now natural gas has taken over the job. To make this possible Pacific Pipe & Flume Ltd. installed Flame-Master gas conversion burners in residences, main office, boarding house, horticultural buildings, machine shop, greenhouses, etc. to provide the best in clean, even heat. A General Electric gas furnace was installed to provide heat for a special drying unit.

This installation illustrates that Pacific Pipe & Flume can install the smaller residential heating equipment as well as the largest jobs.

Cornwall Cannery

The progressive nature of Summerland is well illustrated by the decision of the Cornwall Cannery to convert their steam generating plant to natural gas firing.

To make the change to the new fuel involved long hours of planning by Pacific Pipe & Flume Ltd. A Webster Kinetic natural gas burner was chosen with 40 firing tubes, burning 13,000 cubic feet of gas per hour, producing 13,000,000 BTU's. The installation of this burner resulted in increased steam production from Cornwall's 210 horse power boiler. The burner is equipped with a variable gas flow control which varies the amount of steam required in the plant. Top burning efficiency is insured by a control which sets the correct draft for each rate of fire from low to high.

A device is fitted to automatically replace water used in the boiler and shut the burner off in case of water supply failure. If no steam is required a pressure control shuts off the burner until steam is required again at which time the burner will automatically start.

The complete operation is watched by an electronic "brain" which will shut off the gas flow in case the burner does not light correctly.

Barkwill's Ltd.

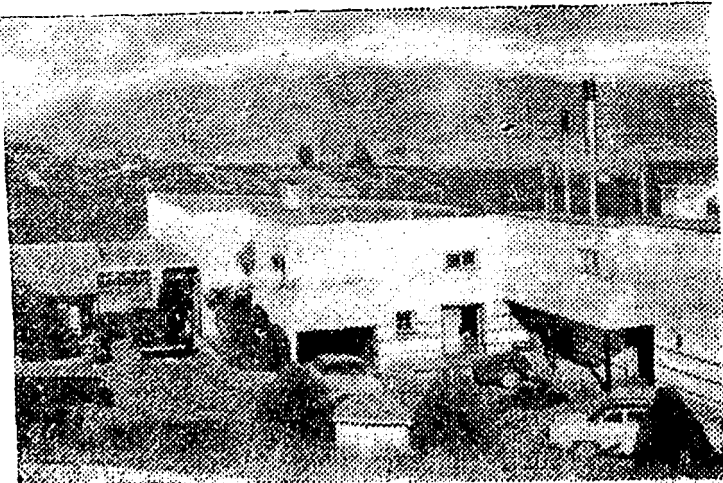

Another firm joining the gas parade of progress was Barkwill's Ltd. The marine boiler in this plant was converted to natural gas by installation of a Rotomatic inshot burner. The burner has 15 firing tubes and burns 3,000 cubic feet of gas per hour, or produces 3,000,000 BTU's of heat. The burner is equipped with a variable gas flow control which varies the amount of flame in the boiler to match the amount of steam required in the plant. If no steam is required a pressure control shuts the burner off until steam is required again at which time the burner will automatically start. A device is fitted to the boiler to automatically replace water used to make steam. This same device will shut off the burner in case of water supply failure.

The complete operation is guarded by an electronic "brain" which will shut off the gas flow in case the burner does not light up correctly.

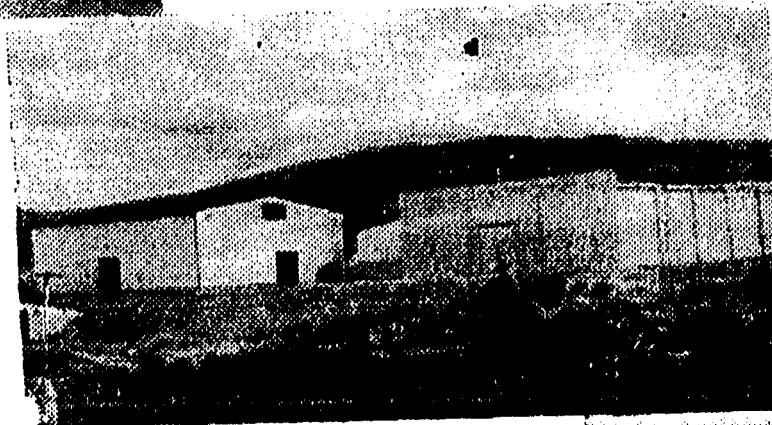

The change to gas has eliminated the ash disposal problem and the continual dirt resulting from coal firing. This installation was carried out by Pacific Pipe & Flume Ltd.

HEATING, VENTILATING and IRRIGATION ENGINEERS

Summerland Co-Operative

Ceaseless research at the Summerland Experimental Station aimed at producing better quality tree fruits is conducted in laboratories and in such orchards as the one pictured above.

This research follows many avenues and trees measured, and bred and watered in controlled

experimenter's that take years to finalize, but which eventually provide the grower with the answer to many of his problems.

Okanagan - The End Of The Rainbow To Many

by Jim Onley

Before the white man came, the Indians who lived in the valley called the place "Okanagan", which name is translated into our language to mean several things . . . Between the waters . . . Meeting of the waters . . . The place where the tribe can stay in winter. But to those who came and stayed during the past century it has come to mean . . . The end of the Rainbow.

Those early wanderers in search of the elusive Will-o-the-Wisp fortune, strayed into this valley, looked at the earth and

the sky, and went no further. Here they discovered the treasure, which in their hearts and minds all men have sought since the beginning of time . . . Peace and Beauty.

When the first homes were built, and first trees were planted, life moved along placidly in the Valley . . . for who can speed the growth of a tree? The even tenor of their way was scarcely interrupted in the peaceful years that followed the reward of their labour, and patience was even greater than they had dreamed, added to the prosperity which the abundant crops brought them, they achieved a peace of mind

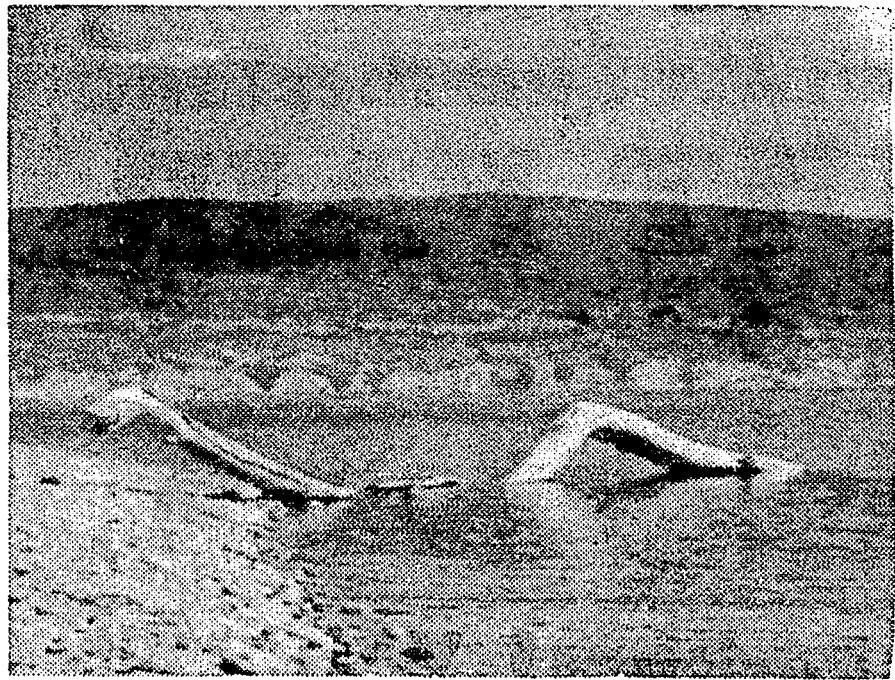

they had never known before.

These were the people who laid the foundation stones of the communities in the Valley, which were destined to pursue their peaceful, industrious way of life in the years to come, without destroying the treasure which nature had entrusted to them . . . Peace and Beauty. It almost seemed that Nature was jealous of Man and wanted to keep one of its nicest places for itself.

Where on this earth will you find skies that reflect every changing mood, from the grey of dawn through the brightest blue, to the deep purple of night, powdered with stars, the sunrise in winter touching the snow, with pink as it slopes down to blue water.

Yes . . . you were lucky, those of you who came, and stayed . . . there have been good times and bad, but in the evening of your days the memory of all the good things will keep you warmer than most things the world has to offer.

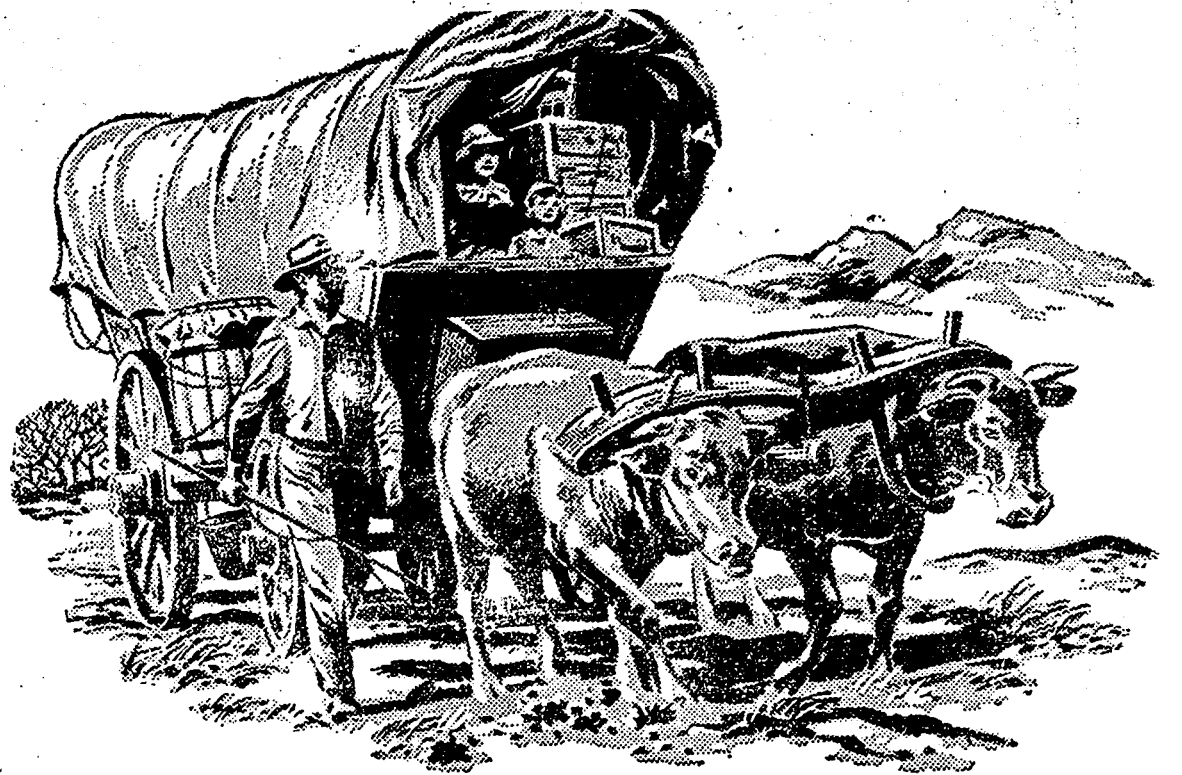

The years have been kind to our Valley, the towns have grown from a few homesteads everyone, to share the communities that we know today, extending the warm hand of welcome and hospitality to everyone, to share the comparative beauty of its mountains, lakes beaches and orchards, inviting all to relax in its friendly atmosphere, and which leaves the traveller in search of Peace and Beauty, someday he will return to "Okanagan" . . . The Valley . . . At the End of the Rainbow.

Truth or Legend-The above picture suggests there is some truth to the legend that Okanagan Lake is the home of a monster known the world over as

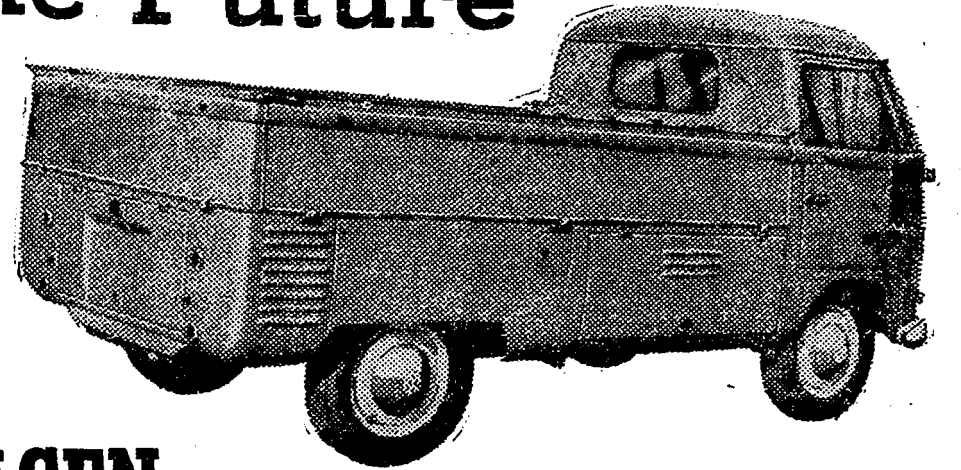

Ogopogo. Monster or not there appears to be little doubt that some creature, apart from the regular finny inhabitants abides in the lake. Many reliable witnesses have sworn to seeing it.

1958 Series, Canada Saving Bonds, On Sale October 18

OTTAWA — September 16th 1958. The Honourable Doris M. Fleming, Minister of Finance has announced that the 1958 Series of Canada Savings Bonds will go on sale on October 14th next.

In making this announcement following the conclusion of the successful Canada Conversion Loan, Mr. Fleming emphasized that the 1958 Canada Savings Bond campaign would form an important part of the government financing programme for the current fiscal year. He said that the Canada Conversion Loan had been immensely successful in its objective of refinancing existing obligations thus making conditions more favourable for the raising of new money requirements, which for the current fiscal year total about \$1,400 millions. The strong demand for Series 11 Canada Savings Bonds in 1957 made it evident that this security retained its popularity with individuals. The decision to offer a new series was taken in response to this demand. Mr. Fleming expressed the hope that this demand would be stimulated by the special importance of the offering this year and would result in a substantial sale. The terms of the new bonds are attractive in comparison with market issues of similar maturity and particularly in relation to the privilege of redemption at par.

The new Canada Savings Bonds will be dated November 1st, 1958. They will be offered for sale at 100 per cent up to

November 14th, 1958. The bonds will carry 15 coupons each covering a one year period. The first coupon will pay interest rate of 3 1/2% and the remaining 14 coupons at 4 1/2%. The average yield to maturity is 4.19%. The limit for holdings for the 1958 series in any one name has been set at \$10,000.

As in recent issues, the 1958 Series Canada Savings Bonds will be available in coupon form in denominations of \$50, \$100, \$500, \$1,000 and \$2,000. They must be registered as to principal in an individual's name whether adult or minor. In addition to coupon bonds in the above denominations, the 1958 Series Canada Savings Bonds will be available in fully registered form in denominations of \$500, \$1,000 and \$5,000. Buyers of the latter will receive their interest payments by cheque. Coupon registered and fully registered bonds will be interchangeable at any time.

The 1958 Series will retain other familiar features of previous issues including the privilege of redemption at full face value plus earned interest at any time at any bank in Canada.

It is expected that more than 12,000 firms will provide their employees with the facilities to purchase Canada Savings Bonds on the Payroll Savings Plan and that investment dealers, chartered banks, trust or loan companies, stock brokers and other savings institutions will be offering the bonds to the general public.

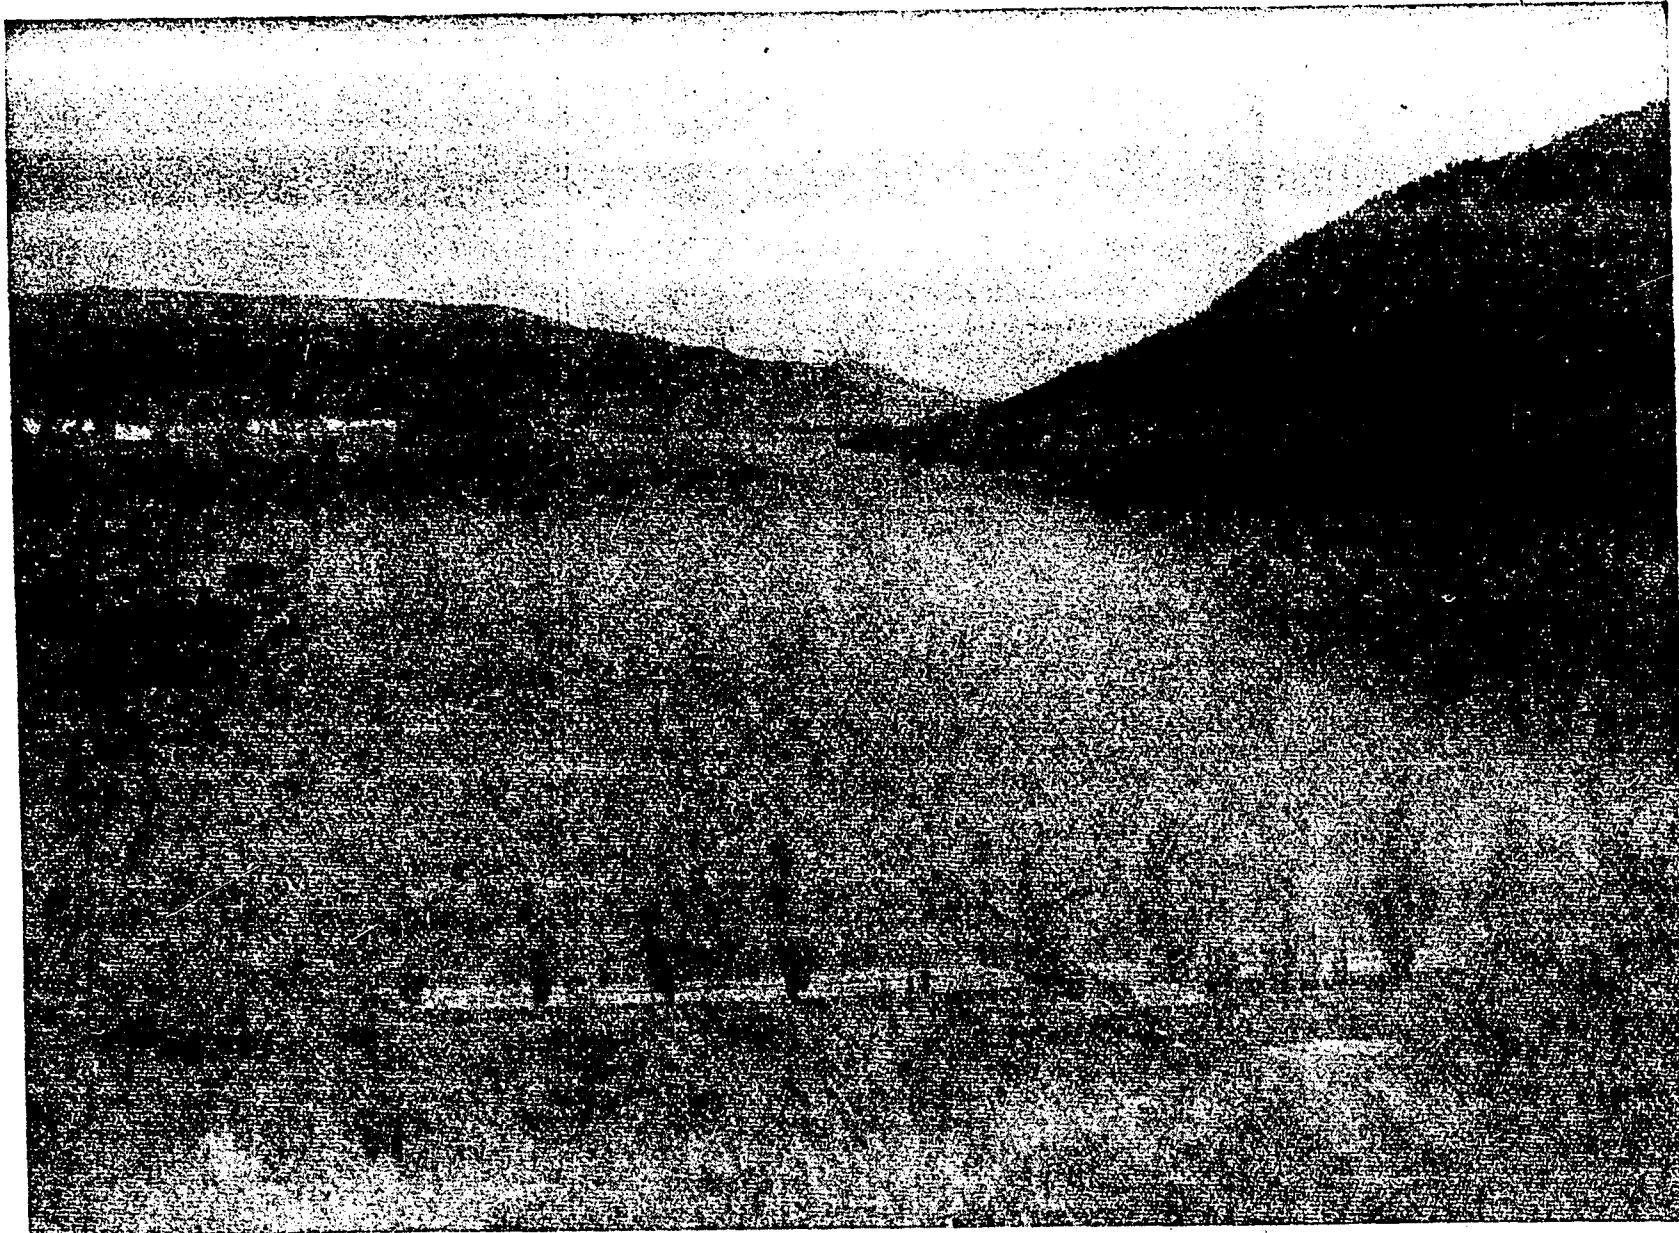

...so both are borrowing from a bank

When borrowing is sound business practice, it is a simple, straightforward process to arrange a loan from a chartered bank. Every day, in every part of Canada, the chartered banks are lending money to farmers, fishermen, producers, manufacturers, processors and other commercial customers, large and small, to meet pay-

rolls, buy raw materials, market goods and meet a multitude of financial needs. A bank manager is constantly on the lookout for opportunities to make such loans — that's his job. Bank loans are an essential part of the process that provides the goods and services that make life better for all Canadians.

THE CHARTERED BANKS SERVING YOUR COMMUNITY

POPLARS AT TROUT CREEK

Okanagan Valley Was Main Highway In Interior Development

The white man marched into the Okanagan as if it was the promised land. This was the fur brigade.

There would be a piper skirling in the fore, his kilt a flash of color that must have made the Indians envious as they peered from the hillsides. The factor would be striding along in his tall beaver hat, followed by 300 or more horses, packers, and often their straggling families.

The route of the white man led up the Columbia from Astoria. A Pacific Fur Company explorer, David Stuart, led the way. In 1811 he ascended the Columbia, built Fort Okanagan near the mouth of a small

stream called Oakinnakin. In 1812, he pushed further north, canoed up Okanagan Lake and built a post northwest of it, on the river later to be named for David Thompson, although Thompson never set eyes on it.

The post was to become Fort Kamloops. After the Hudson's Bay Company acquired Pacific Fur Company's interests, the HBC brigade trail was built between Fort Okanagan and Fort Kamloops, in 1824. It was used continually until establishment of the United States border in 1846.

From Fort Okanagan, the trail wound north to the forks of the Similkameen. Reaching the head of Osoyoos Lake it veered

above Oliver to Marron Valley, Shingle and Trout Creeks to Three Lakes. It followed the mountains down to the shores of Okanagan Lake near Peachland. Following the west side of the lake, it veered again to Grand Prairie, Monte Creek and Kamloops. There were camping grounds every 35 miles — one day's travel apart.

This was the fur highway. The white man shuttled back and forth between the Cascade and Monashee Mountains until after the setting of the international boundary when the fur began to come down the Fraser to Fort Langley. Later, in the Cariboo gold rush of 1856, the route was used again by Americans pouring into the gold areas.

In 1858, the discovery of gold on the Fraser brought a new breed of men into the interior, but few of these at first had eyes for anything but the ground beneath their feet. The quest for gold brought construction of the Dewdney Trail west to east across the very threshold of the Okanagan in 1865, and other hordes passed by towards the Kootenays, mostly without seeing the potential of the valley.

A few men found something that held them. With Father Charles Marie Pandosy, it was a love of his fellow men and a dedication to spreading the teachings of Christ that led him to found a mission near modern Kelowna.

With Joel Palmer, in June of 1860, it was a realization that mining men are hungry men and what better appeases hunger than a thick, rare steak. He drove the first herd of cattle through the Okanagan to feed the men in the gold fields.

And he proved the value of the country to cattle raising. The priests at L'Anse aux Loups, were said to be first to introduce a herd to the Okanagan. Next year John McDougall and William Pio brought in stock from Oregon, then Frank Ritcher and R. L. Cawston and soon in the south Okanagan the life of the cowboy was established. Cattle ranching was the son-

industry for many years. Cattle were poor each spring, for there was little winter shelter on the early ranches. But they fattened by summer. Cattle buyers used to come to the Okanagan in May and September and men, women and children used to turn out to round up their beef. Three-year-old steers would bring \$18 to \$23 a head and that was high living.

The main market was the Cariboo, then after 1865 it was the mines of the Kootenays.

United States ranches were sending cattle in too, sometimes from points as far south as Utah. The west market was flooded, but still few thought of dairying. The first issue of the first paper in Vernon called against the need for early settlers to buy canned milk that came from

Michigan. As the cattle ranching declined slightly the Okanagan pulled

Okanagan Valley (cont.)

another treasure from its piney slopes. It was first found by Father Pandosy, who by heavenly right, might have been expected to be first favored. He planted the first orchard, which was to lead to the modern prosperity of that fruitful land.

By the 1890s, the settlers had effected the change from cattle to fruit. When it started the changeover came swiftly, because farmers and fences have always reduced the range. Finally the Indian reserves were fenced, and ranching took a back seat to orchards.

Father Pandosy was credited with a great many firsts — the first permanent settlement, the first church, the first school, the first cattle, the first marriage performed, and the first orchard. In 1861, the Okanagan Mission had the first flour mill in all the valley. Then, Father Pandosy travelled to the north tip of the Okanagan Lake and built a wayside resting place where grew one of the major cities. At first it was called Priests' Valley, then Centre-ville, and finally, Vernon.

Vernon started as a cowtown. Fruit was introduced in the 1870s and by 1900, mixed farming had edged out cattle ranching and wheat farming. Today it is busied also with dairying, manufacturing and lumbering and has a population of almost 9,000.

The Centerville townsite was laid out in 1885 and the present townsite in 1890. It got its permanent name in 1889 to honor Forbes C. Vernon, a pioneer rancher.

Vernon and his brother came out from England in 1864 to mine at Cherry Creek. Finally they saw their future in agriculture and bought the land which was to become the Coldstream Ranch of 13,000 acres. They were among the first fruit growers. And when they disposed of the ranch to Lord Aberdeen, it was at a reported selling price of \$250,000. The Governor General took over 2,000 cattle, but by the early 1900s, fruit planting was well underway.

The city of Vernon was incorporated in 1892 and its first mayor was W. F. Cameron. There was street lighting in 1902 from a steam power plant. City hall was built in 1903.

The city of Kelowna, which shares supremacy of the valley with Vernon and Penticton, began in 1862, when Augustus Gillard and a partner each staked 320 acres in the mid-Okanagan.

Gillard is described as a big, red-faced man, who wore a heavy beard. The Indians called him bear-face, or, in their tongue, Kim-ach-touch. Somehow, this later became Kelowna.

The townsite was laid out in 1891 by Bernard Lequime. It was to take over from Father Pandosy's Okanagan Mission, seven miles to the south on the same side of the lake, as the centre of trade. It was incorporated in 1905, and now is slightly larger in population than Vernon. It is a wholesale and retail distributing point for the valley fruit growers and claims the largest sawmill in the interior.

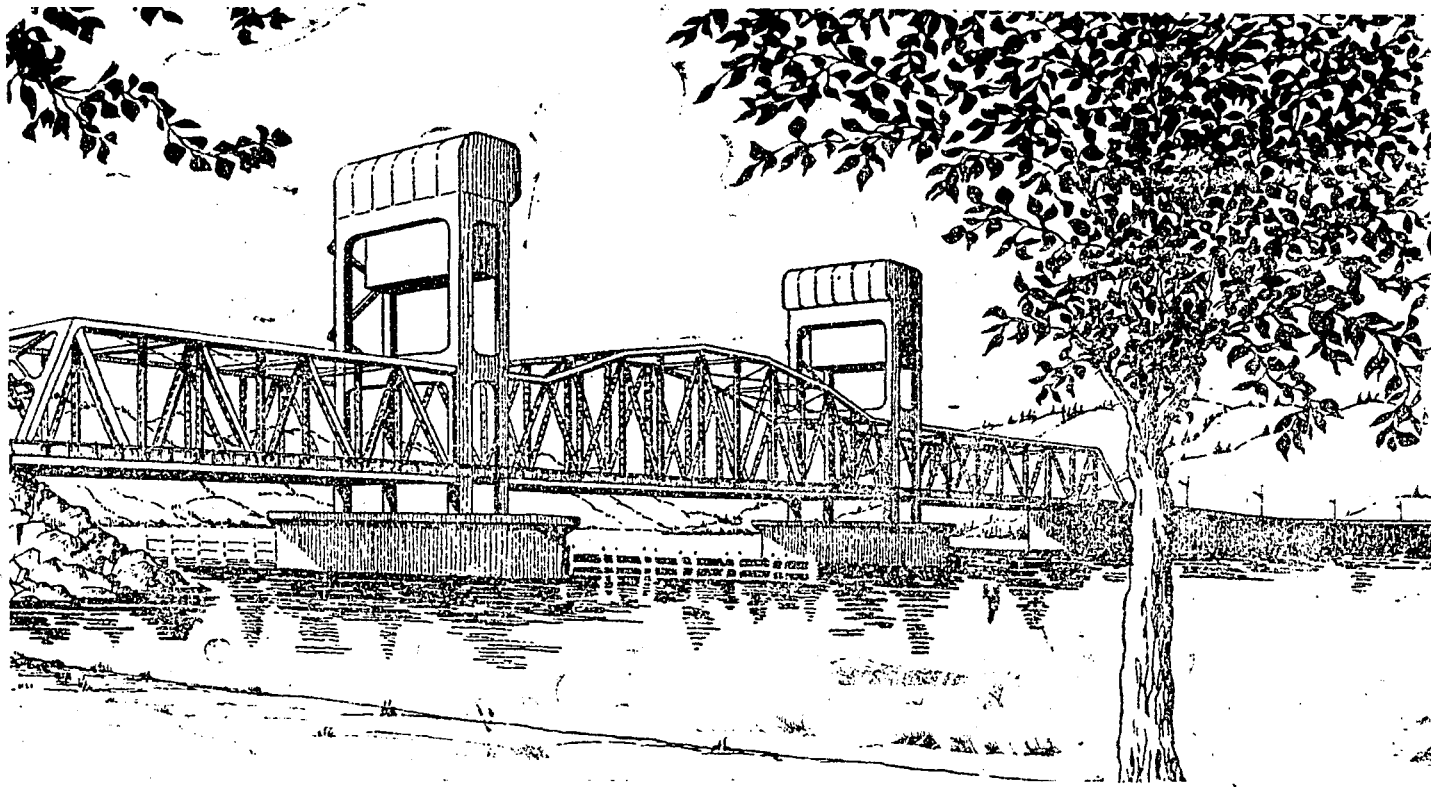

Distribution from Kelowna was awkward at first. In 1865, the first ferry across the lake was operated at that point to connect with Siwash Point. Aeneas and David McDougall operated a barge which measured 18 by 12 feet. The brothers sat near the stern, dropped their legs through a hole in the deck and paddled it across with their feet.

A small steamboat, the Wanderer, captained by L. A. Hayman, took over the paddling in 1901. No one will say whether the aquatic endeavors of the McDougalls contributed to the start of the famous Kelowna Regatta which began drawing visitors in 1907.

At the south end of Okanagan Lake settlement began in 1868. Indians and traders used to barter at a point called Theptan-hauc. The name was shortened to Paentic and eventually became Penticton.

Thomas Ellis pre-empted the land where the town now stands in 1868 and he brought in 127 head of cattle from Oregon. Later, in 1874, Ellis planted an orchard, which residents claim was the first in the valley, despite Father Pandosy's attempts. The same year, Ellis launched a steamboat, the Penticton, into the lake trade.

The townsite was placed on the market in 1905. In 1909 it

Okanagan Lake Bridge, which spans the Okanagan Lake at Westbank, was fittingly enough opened in British Columbia's Centennial Year by H. R. H.

was a municipality and in 1948, a city.

Almost 12,000 persons live in Penticton today. It is a major distribution centre for the Kettle and Similkameen Valleys, as well as the south Okanagan.

When the fruit industry first began to expand in the Penticton area, the CPR put stern-wheelers on the lake to transport the fruit north to Okanagan Landing and the northern railhead. But when packing plants and a cannery appeared in Penticton, the sternwheeler faded out. The last of them, SS Sicamous, became a waterfront restaurant.

The gold rush and the construction of the Canadian Pacific Railway accelerated settlement of important centres which fringe the Okanagan in the Shuswap and Spallumcheen areas. Their histories should be mentioned.

The railway spur which serves the Okanagan meets the main line of the CPR at Sicamous. This area was settled in 1865 and received its first post office in 1893. To the south, between this point and Vernon at the lakehead, are Salmon Arm, Enderby and Armstrong.

Salmon Arm was the name applied to the south west arm of Shuswap Lake where spawning salmon were once so thick they could be tossed ashore with pitch forks. In 1863, William Pion found gold on the Spallumcheen and in later years, Shuswap was well prospected. First permanent settler in that valley was A. J. Hedgman in 1888. Population in 1890 was 56.

Salmon Arm was declared a district municipality in 1905 and first reeve was Joseph Harbell. There were 400 there then. In 1912 it was incorporated as a city. Today the population is near 1,400. It is a shipping point for fruit to prairie markets and has lumbering and dairying and mixed farming as additional main industries.

The site of Enderby was pre-empted by Robert Lambly in 1876 and was known first as Lambly's Landing or Steamboat Landing. There was a flour mill there in 1877 for wheat was then the main crop of the area. The first sawmill came in 1866, then fruit growing. Enderby was incorporated in 1905.

Armstrong claimed its first settler, Alexander L. Fortune, arrived in 1866. This beautiful centre of the Spallumcheen Valley dates as a commercial centre from 1892 when it was first served by the Shuswap and Okanagan Railway which connected Vernon to the main CPR line.

Prior to the railway, a village had sprung up two miles north, called Lansdowne. It was busy during the rail construction, but when the line was finished there was a general move to Armstrong to be on the route of the trains. Wood and Rabbitt moved their complete general store. The blacksmith and the tinsmith moved and so did the government gaol. Armstrong was named after an English financier who bought most of the railway bonds. The merchants had earlier decided on Aberdeen. The first post office opened in July 1892 with Daniel Rabbitt first post master.

Southward, below Vernon and Kelowna, but on the west side of Okanagan Lake lies Summerland, incorporated in 1906. First settlers here were James Gartrell and his family, around 1887 or 1890.

In 1897 J. M. Robinson came to the valley from Brandon, seeking gold. He noted the success of early fruit growing at

Princess Margaret. The more than seven million dollar structure has greatly speeded up travel in Highway 97, but like progress in many things, it

tempts and returned to the east for capital. He bought land and organized a real estate venture which attracted settlers from all parts of the world. He chose the town's name as part of a great advertising promotion. West Summerland started about 1906 in similar fashion, this time the promoter being Jim Ritchie.

South of Penticton lie Oliver and Osoyoos. Oliver was named to honor premier John Oliver. The townsite was laid out in 1920. Oliver was the centre of a giant South Okanagan irrigation project which opened a 22,000-

acre tract for settlement by World War I veterans. In 1923 the population was 150. By that year there was railway connection with the Kettle Valley line and West Kootenay Light and Power had installed service. There was a two-room school, a Presbyterian Church and a recreation hall. The first post office was established in 1921 or 1922 and the first post master was Duncan P. Simpson. An incorporation plebiscite was passed in 1945. First village commissioners were R. W. Smith, G. A. Stuart and Douglas P. Smithers. Population today is almost 1,200.

The townsite was laid out in 1891 by Bernard Lequime. It was to take over from Father Pandosy's Okanagan Mission, seven miles to the south on the same side of the lake, as the centre of trade. It was incorporated in 1905, and now is slightly larger in population than Vernon. It is a wholesale and retail distributing point for the valley fruit growers and claims the largest sawmill in the interior.

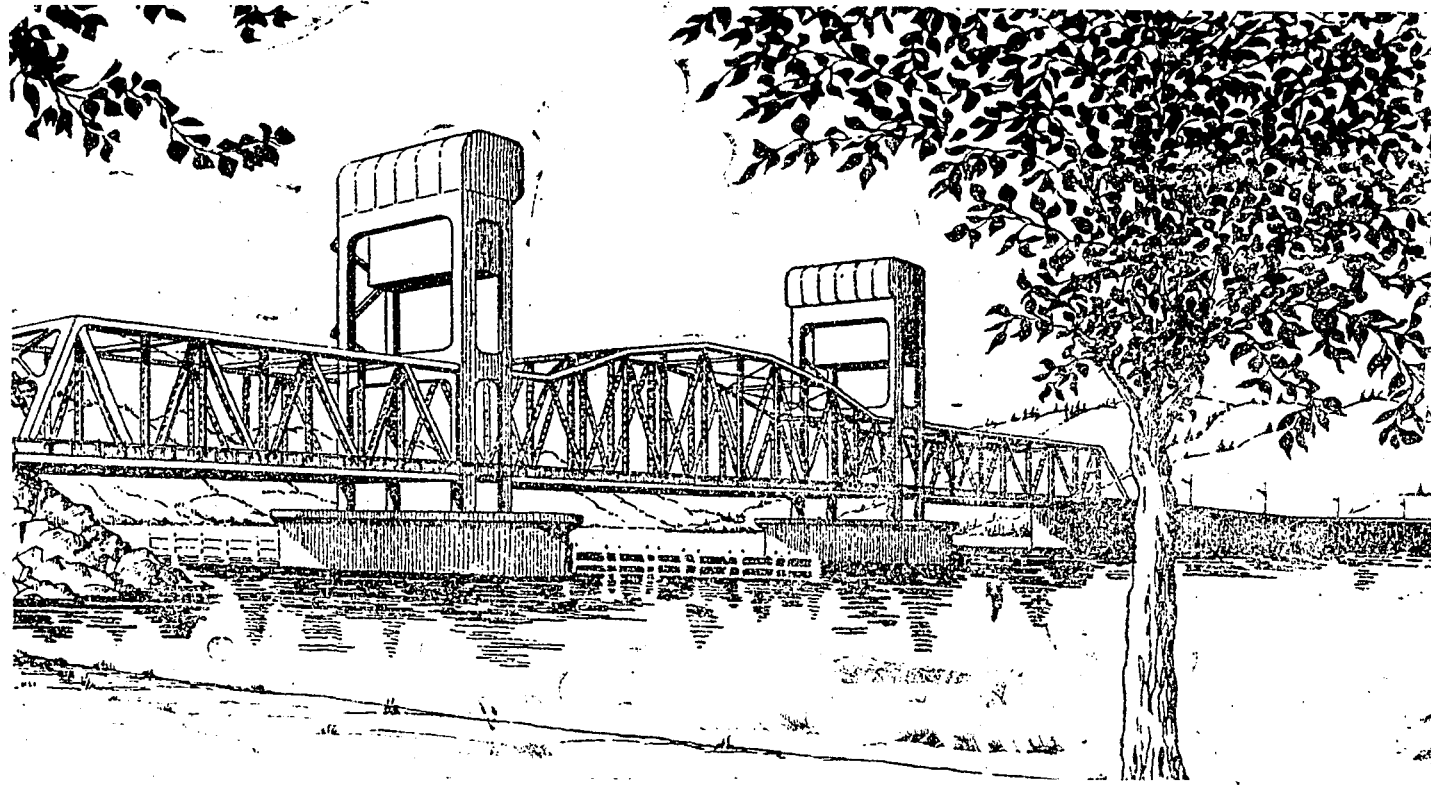

Distribution from Kelowna was awkward at first. In 1885, the first ferry across the lake was operated at that point to connect with Siwash Point. Aenes and David McDougall operated a barge which measured 18 by 12 feet. The brothers sat near the stern, cropped their legs through a hole in the deck and paddled it across with their feet.

A small steambot, the Wanderer, captained by L. A. Hayman, took over the paddling in 1901. No one will say whether the aquatic endeavors of the McDougalls contributed to the start of the famous Kelowna Regatta which began drawing visitors in 1907.

At the south end of Okanagan Lake settlement began in 1868. Indians and traders used to barter at a point called Theptaehauc. The name was shortened to Penticton and eventually became Penticton.

Thomas Ellis pre-empted the land where the town now stands in 1868 and he brought in 127 head of cattle from Oregon. Later, in 1874, Ellis planted an orchard, which residents claim was the first in the valley, despite Father Pandosy's attempts. The same year, Ellis launched a steambot, the Penticton, into the lake trade.

The townsite was placed on the market in 1905. In 1909 it

Okanagan Lake Bridge, which spans the Okanagan Lake at Westbank, was fittingly enough opened in British Columbia's Centennial Year by H. R. H. was a municipality and in 1948, a city.

Almost 12,000 persons live in Penticton today. It is a major distribution centre for the Kettle and Similkameen Valleys, as well as the south Okanagan.

When the fruit industry first began to expand in the Penticton area, the CPR put stern-wheelers on the lake to transport the fruit north to Okanagan Landing and the northern railhead. But when packing plants and a cannery appeared in Penticton, the sternwheeler faded out. The last of them, SS Sicamous, became a waterfront restaurant.

The gold rush and the construction of the Canadian Pacific Railway accelerated settlement of important centres which fringe the Okanagan in the Shuswap and Spallumcheen areas. Their histories should be mentioned.

The railway spur which serves the Okanagan meets the main line of the CPR at Sicamous. This area was settled in 1885 and received its first post office in 1893. To the south, between this point and Vernon at the lakehead, are Salmon Arm, Enderby and Armstrong.

Salmon Arm was the name applied to the south west arm of Shuswap Lake where spawning salmon were once so thick they could be tossed ashore with pitch forks. In 1863, William Pion found gold on the Spallumcheen and in later years, Shuswap was well prospected. First permanent settler in that valley was A. J. Hedgman in 1888. Population in 1890 was 56.

Salmon Arm was declared a district municipality in 1905 and first reeve was Joseph Harbell. There were 400 there then. In 1912 it was incorporated as a city. Today the population is near 1,400. It is a shipping point for fruit to prairie markets and has lumbering and dairying and mixed farming as additional main industries.

The site of Enderby was pre-empted by Robert Lambly in 1876 and was known first as Lambly's Landing or Steamboat Landing. There was a flour mill there in 1877 for wheat was then the main crop of the area. The first sawmill came in 1886, then fruit growing. Enderby was incorporated in 1905.

Armstrong claimed its first settler, Alexander L. Fortune, arrived in 1866. This beautiful centre of the Spallumcheen Valley dates as a commercial centre from 1892 when it was first served by the Shuswap and Okanagan Railway which connected Vernon to the main CPR line.

Prior to the railway, a village had sprung up two miles north, called Lansdowne. It was busy during the rail construction, but when the line was finished there was a general move to Armstrong to be on the route of the trains. Wood and Rabbitt moved their complete general store. The blacksmith and the tinsmith moved and so did the government gaol. Armstrong was named after an English financier who bought most of the railway bonds. The merchants had earlier decided on Aberdeen. The first post office opened in July 1892 with Daniel Rabbitt first post master.

Southward, below Vernon and Kelowna, but on the west side of Okanagan Lake lies Summerland, incorporated in 1906. First settlers here were James Gartroll and his family, around 1887 or 1890.

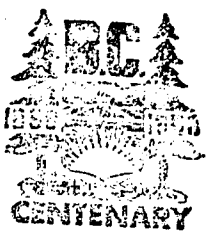

In 1897 J. M. Robinson came to the valley from Brandon, seeking gold. He noted the success of early fruit growing at-

tempt and returned to the east for capital. He bought land and organized a real estate venture which attracted settlers from all parts of the world. He chose the town's name as part of a great advertising promotion. West Summerland started about 1906 in similar fashion, this time the promoter being Jim Ritchie.

South of Penticton lie, Oliver and Osyoos. Oliver was named to honor premier John Oliver. The townsite was laid out in 1920. Oliver was the centre of a giant South Okanagan irrigation project which opened a 22,000-

acre tract for settlement by World War I veterans. In 1923 the population was 150. By that year there was railway connection with the Kettle Valley line and West Kootenay Light and Power had installed service. There was a two-room school, a Presbyterian Church and a recreation hall. The first post office was established in 1921 or 1922 and the first post master was Duncan P. Simpson. An incorporation plebiscite was passed in 1945. First village commissioners were R. W. Smith, G. A. Stuart and Douglas P. Smithers. Population today is almost 1,200.

Summerland Grower Tops At Armstrong

ARMSTRONG — Veteran showman W. F. "Bill" Ward, Summerland, cleaned up again in this year's Interior exhibition here in the fruit show, which re-

flects the Okanagan economy. In addition to winning 30 firsts, Mr. Ward also won all the special prizes as in "most points in plates of apples,"

"best plate of apples," "most points in pears," and so on, right down to boxes and crates of the same.

The fruit show this year had the usual class, but lacked depth.

There were fewer exhibitors and there was a noticeable gap in quality, even for the casual observer, between first prize and second, and between second and third.

As usual, the fruit show was mainly a contest between Mr. Ward, E. C. Bingham and W. J. May of West Summerland and W. A. Middleton of Vernon.

Now strong competitor was Frank Lan, Kelowna, who was runner-up to Mr. Ward with 11 firsts, five seconds and a third.

Fair officials are frankly worried about the decline in fruit exhibits.

One of the most attractive parts of the fruit show was the new box packs, some in cells, like crated eggs, others in form-fitted pressed paper trays and others in the conventional apple box with the pressure-applied lid, the 'bruise pack.'

In first, second and third prizes, here is how the judging went: Ward, 35-2-1; Lanz, 9-5-2; Bingham, 3-9-3; Middleton, 2-15-8.

Editorial

Again the Summerland Board of Trade is holding its fruit fair. This is the second of its kind, although it falls a little later than originally planned.

Joining with the Board of Trade this year is the Summerland Centennial Committee. Considerable time and effort has gone into the organizing of this event.

As usual the service clubs and organizations have rallied around and the Summerland Arena will house one of the most complete exhibitions illustrative of this community and its industries ever to be brought together here. It will be a colorful, interesting and educative spectacle, well worth the price of admission, 50 cents, and at this point we would like to emphasize that one ticket, only 50 cents, entitles the holder to go and come through the two days of activity as often as he pleases. Want to hear the Town Band, see the Vernon McIntosh Girls Pipe Band in the afternoon? Want to see them again in the evening, plus the Bavarian folk dancers? Well, you can — all for the price of 50 cents.

Only the talent show on Friday night in the High School Auditorium is not included in that 50 cents, and that, of course, is a show all its own.

We're stressing that one ticket good throughout the fair, because there is so much to see, so much varied activity that it would prove costly to go home and come back to catch the many events.

Yes, on Friday and Saturday of this week, all the fun of the fair including the midway, merry-go-round and what have you, is yours for the small admission fee of 50 cents.

Many hours of labor have gone into the planning, at this writing many hours of labor are still to be done in setting up what can be truly called "Summerland's Showcase."

The show will go on this Friday and Saturday — the only question as to its success now rests with you Mr. and Mrs. Summerland — without your attendance it will flop.

B of T Second Annual Fruit Fair This Weekend

A Community showcase of attractive live exhibits by Summerland's many clubs recording their work in the community will be seen at this year's Fruit Fair. The Fire Brigade will brighten the entrance to the Arena displaying their newest equipment and some of the old time fire equipment. The Hospital Auxiliary are setting up a hospital room and will have on display some of the latest in hospital equipment. The Experimental Farm will exhibit vegetables and flowers and the Fruit Products Lab, in conjunction with B.C. Fruit Processors, will have a large exhibit of the latest in fruit by-products. The BCFGA local will set the theme of the fair with a colorful display of fruit. The Camera Club will show colored slides and provide information to camera enthusiasts. The Horticultural Society will have a large display of fall flowers and commercial growers Don McLaughlan and Bill Gallop will exhibit flowers. Inland Natural Gas in co-operation with their Summerland dealers will show the latest in gas appliances and will have two ranges in operation on which some of the ladies will try their hand at pie baking.

The Canadian Legion, Library, Rotary and Kiwanis Clubs all plan interesting exhibits featuring their community work. The Art Club have elaborate plans for making silhouettes of visitors to the fair and also displaying work of their members. The Fish and Game Club promise something live and interesting for the children's interest. Women's Institute will display the handicrafts that have been exhibited at the P.N.E. and many articles of interest to everyone. Civil Defence, W.C.T.U., Kinsmen, Yacht Club, Girl Guides, Scouts will also have interesting exhibits. The Guide Association will have a cookie and candy stall. Clarence Lackey will exhibit the latest boats and Durbin Motors Lt., will display the new 1959 Buick. There will be live chickens, rabbits and lots of displays of interest to your children. Mr. W. F. Ward who has won many prizes at the Armstrong Fair will place a large exhibit of his prize winning fruits and vegetables.

Interest in the competitive fruit, vegetable, poultry and honey classes is high, according to committee head Alex Watt. Entries will be received at the Arena Friday morning and afternoon up until 3:30 when judging will take place. Prizes will be awarded on Friday evening at 7:30.

S. A. MacDonald head of the hobby show reports great interest especially by children in all classes and entries will be received up until 3:30 on Friday.

The ladies are busy checking their pie recipes to make sure that they place in the money in this important contest. Entries must be in by 3:30 on Friday.

The fruit fair committee promise that this is the largest most colorful and interesting fair Summerland has ever seen.

Bring the whole family on Friday night and have a good look at the exhibits, then return on Saturday with your friends and have another look and enjoy the wonderful dancing and band music. Rides, refreshments and games of course will be operating throughout the fair. See you at the fair.

Red Cross Clinic

The Red Cross Blood Clinic will be held here on Friday, October 3. A telephone canvas has already been made members of the Summerland Kiwanis Club, who regularly sponsor this event, but those canvassed are mostly the regular donors — what is needed, so to speak, is new blood. More volunteers are needed if Summerland is to maintain its proud reputation for giving and giving generously. The blood clinic will be held in St. Andrew's Church Hall. More details next week.

Miss Kathleen Greenslade daughter of Mr. and Mrs. Melvin Greenslade of Garnett Valley, was presented with the first Summerland Credit Union annual bursary of \$100. This will be given every year to a junior member of the Summerland Credit Union planning to further his or her education, Har-

ry Hackman chairman of the educational committee for the Credit Union reports.

Miss Greenslade is shown receiving the bursary from Dr. J. L. Mason at the regular directors' meeting. She will attend Victoria College in Victoria this fall to take teacher training.

\$40,000 Money By-Law Approved

Property owners of Summerland approved by a decisive majority a money bylaw authorising the Municipal Council to borrow \$40,000, estimated cost of revamping the municipality's electrical system. This change-over will increase the carrying power of the system from the present 4,800 volts to 8,300 volts.

Work on the project has already started, but it will be well on into 1959 before the change-over is completed.

Voting was light, with only 254 ballots cast, but the verdict was beyond question, 240 voted for the bylaw with only two voting against. There were two spoiled ballots.

Voting day was last Thursday with A. F. Calder returning officer at West Summerland, and assisted by Bruce Blagborne while George Foster and J. W. Miller handled the vote at Lakeside.

The Bishop of Barrackpore, the Right Reverend Ronald Bryan, will be in the South Okanagan on Thursday, October 2. A service of witness will be held at St. Saviour's Anglican Church in Penticton at 8 p.m.

Daylight Saving Ends Saturday

Daylight Saving Time ends on Saturday midnight, September 27. This definitely warns of the approach of winter, as did the first snow to mantle the top of Snow Mountain last Thursday and the snow which fell on surrounding mountains this week and, of course, the cool 26 degrees recorded Tuesday night.

So, before going to bed on Saturday night be sure to put your timepiece back one hour, and dig out those extra blankets.

Night School Classes Planned

Night school classes are being planned for adults by Summerland school board. It is expected the classes will offer tuition in woodworking, typing, music and drama, sewing, pottery, art, copper tooling and English for new Canadians, if there is an enrollment of 15 or more in each class.

A Big 50 Cents Worth Fall Fair Time Table

We want you to spend all the time possible at the fair so here in detail is the program and what you should take in on Friday and Saturday.

All exhibitors and contestants should have their displays and entries completely finished at 3:30 on Friday. Arena will open from early morning until 3:30 to exhibitors. Judging takes place at 4:00.

Arena doors open at 6:00 and there will be the presentation of prizes at 7:30. The giant TV Talent Show with M. C. Dave Roegole and a great 2-hour show of variety entertainment gets under way in the School Auditorium at 8:00. Admission to this event is a modest 75c for adults and children 25c. After the show drop over to the Arena and have a look through, a hamburger, coffee, even ride on the merry-go-round. Doors close at 11:00.

Saturday the arena opens at 1:00. The kids will want to have lots of rides on a real old fashioned merry-go-round. This will be a good time for ladies to take in the pie baking contest and inspect the fancy work display of the W.I. and the many other exhibits. The McIntosh Girl's pipe band from Vernon will give a concert in the Arena at 3:30. Doors remain open dur-

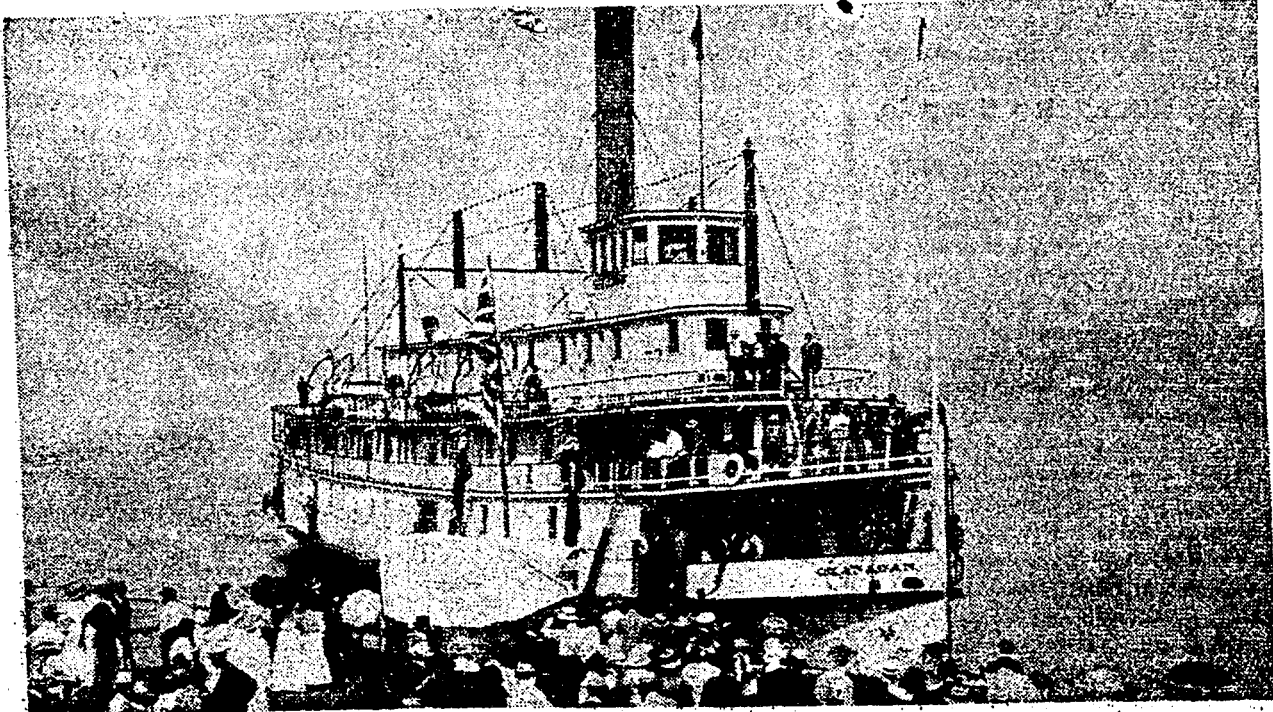

ing the supper hour and in fact you can have your supper at the refreshment stand.

Official opening ceremonies at 7:00 when Mr. David Pugh, M.P. and civic dignitaries will bring greetings. The Summerland Band will then give a concert followed by a wonderful program of dancing numbers on the Arena stage featuring the McIntosh Girls in Scottish dances, the Harmony Dance Club of Osoyoos whose director, Mr. Schmidt was in a film with Bing Crosby made in the Rockies. Special dance numbers by local groups and the magic skirl of the Pipe Band. The Rotary Club will be running Bingo on Saturday night, Kinsmen the games of fortune. Plenty of seating in the Arena so that when you are tired of looking at the exhibits you can sit down and have a spectacular view of the stage and the entertainment provided for you and your family.

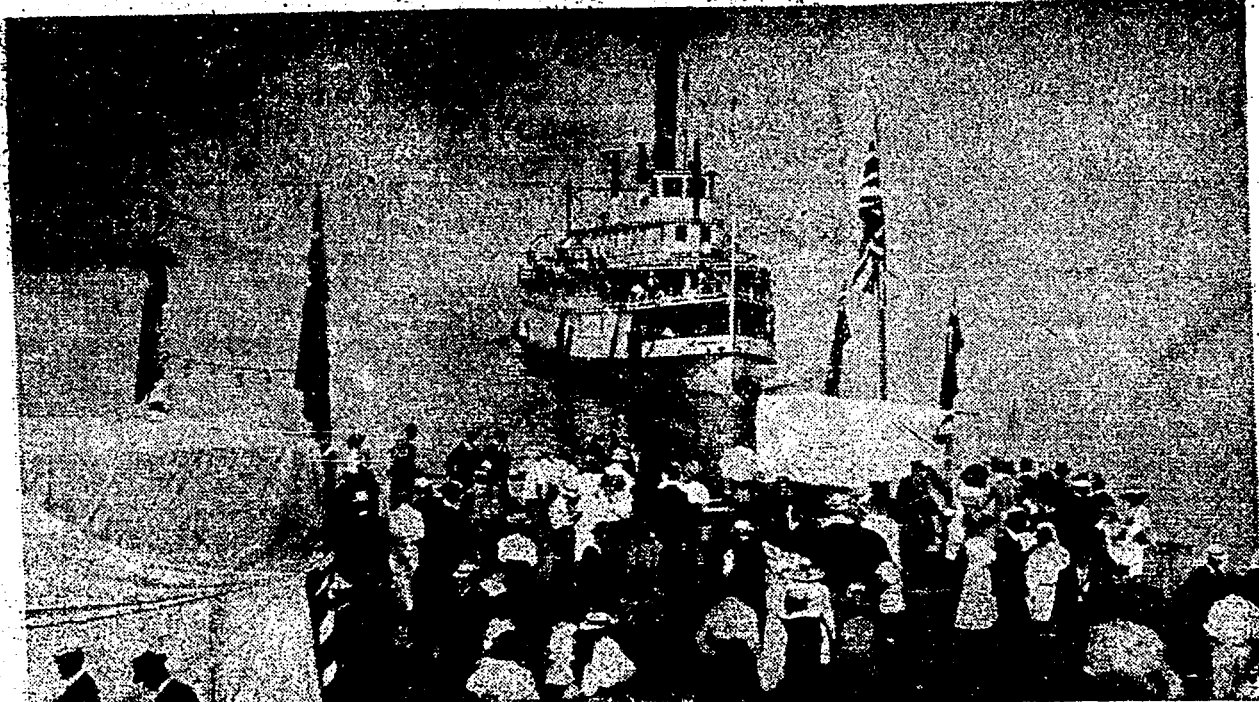

The admission is only 50 cents for adults and one ticket is good for admittance during the two days of the fair, plus the chance of winning many valuable door prizes from your friendly Summerland merchants. Oh yes, and don't forget to get a ticket on the Fruit Fair Raffle. Come to the fair, meet your friends, everyone will be there, have fun.

Low Man On Totem Pole

We are reprinting an interesting editorial that appeared in the Vancouver Sun last week and which, although not remotely connected with the tree fruits industry, dealing with fish and oil, nevertheless it is a striking commentary on the situation as it exists today in the fruit industry.

The editorial is in reply to a whine from the Edmonton Journal to the effect that in times of abundance prices of British Columbia salmon are not reduced. The Sun points out with some vigor that production and processing costs are not reduced because of a bumper fish harvest and it also points out that prices paid to the primary producer, in this case the fisherman, are fixed before the start of the season, often under threat of strike action by that primary producer the fisherman.

We fully agree with the arguments advanced in the Sun's editorial, but Hallelujah! how different the fruit industry at least insofar as the primary producer, the grower, is concerned, if he knew exactly what he was going to get for his fruit before ever he plucked it from the tree.

The fisherman, who apart from the hazards involved in plying his trade, relies completely on Nature and the conservation efforts of governments and the fishing industry itself to produce salmon, herring and cod and what have you in good and sufficient quantities. He, like the fruit grower, gains or loses according to the munificent or parsimonious moods of Mother Nature.

The fisherman has his good years and he has his bad, but at least he knows what he is going to get for his catch and

always he gets a fair percentage.

How different the fruit grower — the grower, the producer, is most undeniably the low man on the totem pole, whereas it can be said that the fisherman is the high man, sitting atop the pole, for he gets the first and the biggest cut.

In many respects the fishing and fruit industries are identical. Both must face fierce competition. Both are vulnerable, insofar as the annual harvest must be disposed of, as nature is remorseless, in producing year after year, and although salmon can be kept indefinitely in cans, purely financial reasons do not permit heavy carry overs. The fruit industry is, of course, the more vulnerable, insofar as its product is a highly perishable one.

The basic difference, however, is that in the fruit industry the grower takes the entire risk, whereas the fisherman only takes the risks any primary producer dependent in large measure upon a capricious nature, must take.

But the fruit grower, having battled the natural hazards then must wait for his share and before he gets his share everyone else involved has taken his cut from the retailer on down. Then the fruit grower gets what is left.

Somewhere the industry took a wrong turning — we are not suggesting that we know the answers — but we at least hope that the Royal Commission report will come up with the answer for surely something is not right when the man who produces becomes nothing but a slave insofar as he labors mightily, the end result being that he gets the leavings, if any, after all others connected with the business have taken their share.

No Salmon Wells To Cap . . . Editorial from Vancouver Sun.

We wonder how the Edmonton Journal would apply its sanctimonious criticism of B.C.'s salmon fishing industry to Alberta's oil industry.

The Journal means that despite the bonanza of the Adams River sockeye run this year, the price of canned salmon didn't come down. "The law of supply and demand works only one way now."

Nothing could be truer of the oil industry. Its economics are based on capping wells to restrict the flow of oil.

This may be justified as "conservation". But it's also a mighty handy way to ensure that the law of supply and demand "works only one way now" in the oil industry. B.C.'s fishing industry uses plenty of oil products.

What the Journal overlooks about canned salmon is that the cost of producing it doesn't go down just because the run is wonderfully abundant. It's hardly reasonable to expect fire sale prices when production prices are fixed.

And canned salmon must be sold against stiff competition from as much good fish as all other countries can catch and can. There are no fish wells capped for "conservation" to protect salmon. Salmon prices are under the stern discipline of highly competitive selling.

But production costs are fixed. Before anyone could say for sure how big the Adams run would be, the fishermen's union under its usual threat of strike, had won a price of 28 cents a pound for raw salmon. This happened to be the highest price ever.

It meant that the canner had to pay \$20.19 to the fishermen for the 72 pounds of raw salmon it takes to produce a 48 pound case of tinned salmon, big run or small run. The case sells for about \$38.

For his \$17.84 share the canner had to transport the fish to the cannery, clean it, cut it to can-size pieces, stuff the cans, inspect them, put the lids on, seal them, cook them, label, case and store them. He borrowed cash from the banks to pay off fishermen now for salmon that often takes up to two years to market. He must also advertise and promote the products.

If an Alberta oil economist or a Journal editorial writer could do these things more cheaply the canners would like to know how.

A Christmas present in September

Here's a novel way of putting money in your pocket when you need it most . . . in Winter . . . when Christmas presents, extra winter clothing and peak heating bills all make heavy inroads on your purse. It's called the Inland Natural Gas EQUAL-PAY plan . . . a new method of budget billing that allows you to spread your natural gas payments equally over the entire year. Here's how the plan works . . . An estimate is made of your yearly heating costs. This sum is divided by ten to establish an average monthly payment. The last two months are reserved for adjustments. If your monthly payment was estimated too low, you will be billed to adjust for underpayment. If it was too high, you will have a credit balance at the end of the year. The EQUAL-PAY plan is just one more reason why you should convert to thrifty . . . modern . . . natural gas. **But do it now.** You can only enjoy the benefits of budget billing this season if you sign before September 30. For details just call in or telephone this office.

Win A Gas Furnace Installed!
Inland is holding a lucky draw. The prizes — **THREE GAS FURNACES INSTALLED.** The draw is open to any Interior family that buys a natural gas heating unit **BEFORE September 30th.** Winners will be refunded the full price of their furnace plus installation costs. See your local gas equipment dealer today. Buy a natural gas furnace before the fall rush — **YOU MAY WIN IT FREE!**

INLAND NATURAL GAS

Last Rites Held For Mrs. J. Kelt

Passed away at the Home for the Aged in Vernon September 15, Mrs. Jane Kelt, in her 82nd year.

She leaves to mourn her loss two daughters; Mrs. Mary Pantton of Tappen, B.C., Mrs. Mina Craft, of Michigan City, Indiana, U.S.A. She was predeceased by her husband, James, in 1936. There are four grandchildren. Also one brother, Rev. William Christie in England.

Funeral services for the late Mrs. June Kelt were conducted from the Summerland Free Methodist Church Thursday, September 18 at 2.15 p.m. Rev. J. James officiating. Interment Peach Orchard Cemetery. Rose-lawn Funeral Home intrusted with arrangements.

Elgar Choir Again Presents Opportunity

The Elgar Choir of B.C., which completed its seventh Overseas Tour last summer, is preparing for another overseas tour in 1959, but with this difference, THE 1959 TOUR IS TO BE A BONUS TOUR.

The tour will take approximately three months, from the middle of June to the middle of September, and will consist of visits to France, Germany, and Ireland.

Approval of this educational Education, and a letter giving full particulars of cost and other details pertaining to the special bonus offer has been sent to all Schools in the Province.

Auditions for interested young singers—Girls between the ages of 12 and 18—will be held in convenient centres if applica-

tion for same is made to Mr. C. E. Findlater, 326 W. Hastings Street, Vancouver, 3, B.C. Such applications must give particulars of musical experience and include a reference from a Teacher, Principal or Minister.

Many Trails Met or Crossed At Osoyoos

Osoyoos name was derived from the Indian for "where two lakes come together." It was originally a camping ground on the brigade trail, but was little used after Indian troubles in Oregon made travel from the south perilous in 1848. The gold rush brought John Carmichael Haynes to Osoyoos in 1862. He headquartered there as assistant gold commissioner.

The cattle from Oregon for the Cariboo reopened the brigade trail at about that time. And Osoyoos was also the point where the brigade trail was intersected by the Dewdney Trail which led miners to the Kootenays. In 1865, a combination customhouse gaol and official residence was established there. The pioneer store was opened by Hiram F. "Okanagan" Smith.

Haynes, later Judge Haynes, was first to pre-empt land with a partner W. H. Lowe in 1869. Cattle was the first business of Osoyoos, but an irrigation project after World War I, gave the spur to fruit-growing. The population today nears 900 and there are packing plants, a cannery and a lumber mill. Incorporation as a village occurred in 1946.

West of Osoyoos lies the Similkameen Valley, gateway to the coast for the Okanagan.

Here lies Keremeos, where an HBC trading post was established by Francois Deschiquette in 1860. One of the earliest cattlemen was Frank Ritcher, who came the same year to settle. Cattle drives from the Similkameen went through to Hope and even to New Westminster. Barrington Price and Henry Nicholson built a flour mill in 1876, a sure sign wheat farming was prospering. The fruit industry went to the fore toward the end of the last century. The village was incorporated in 1956 and claims 1,000 people today.

Hedley also lies in the Similkameen. Mining birthed it. One of B.C.'s major gold mines and the first producing lode mine of the Similkameen was staked on Nickel Plate Mountain by Wollaston and Arundel in 1894. Many other claims followed and Camp Hedley resulted.

It was named for Robert A. Hedley who managed a smelter at Nelson. First supply point for Hedley was Fairview, a mining town which grew and died near Oliver. (Where once were 1,500 residents, stands now a single ranch and a barn that was a gaol).

A road was built from Hedley to Princeton in 1900, the same year a townsite was surveyed and Hedley got its first hotel, built by D. G. Hackney. There was a sawmill in 1901 and a mill for the mines in 1903. The post office and first school also appeared that year.

The building of a town at Princeton, at the junction of the Similkameen and Tulameen Rivers was by order of Governor James Douglas in 1860 when gold was found in the valley. He planned a wagon road across the Coast Range from Hope. The townsite was laid out by Royal Engineers.

The earliest permanent white settler was a man named Allison who arrived in 1858. The town was first known as Allison, but some called it Blackfoot Flats, for the Blackfoot tribe used to come there to obtain vermilion, which is "Tulamocn" in the native tongue. Soon it was known as Vermilion Flats. Others called it Red Earth after the soil which produced the Indian dye. It was finally named Princetown to honor the Prince of Wales, and this became Princeton. It became a mining centre, with the mines at nearby Copper Mountain being the largest. It was incorporated as a village in 1951 and is still a shipping centre for mining operations. This industry is bolstered by lumber mills and a brewery. Today there is a population of 2,245.

ABOUT CREDIT UNIONS

The Credit Union Savings Plan is the safest and most beneficial method yet devised to provide for the future of your children.

A child's early savings are not large. However, through his credit union he learns the value of thrift, and soon understands that his money, no matter how small in amount, is really working for him.

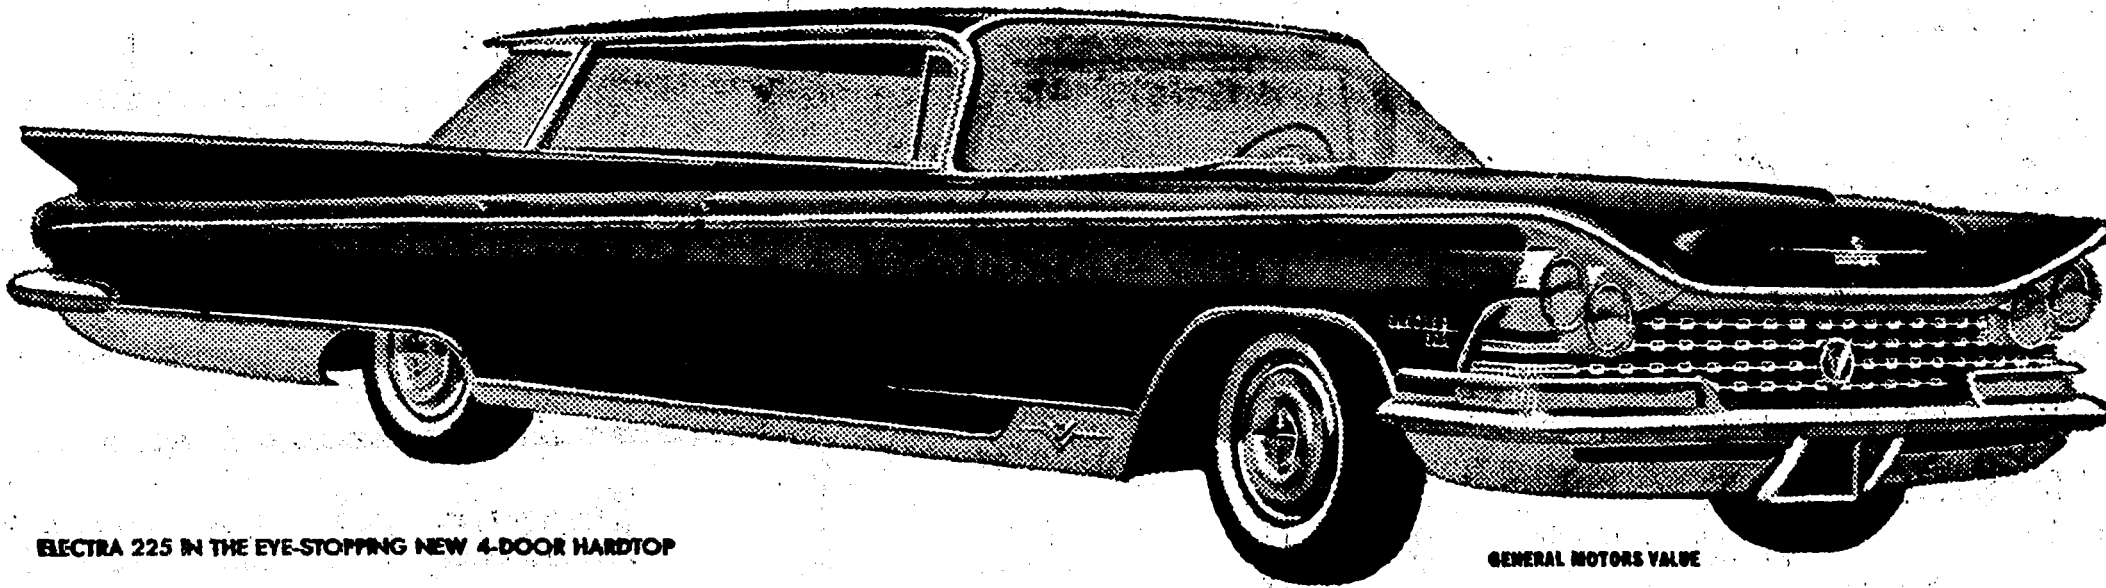

The credit union can be an inspiration to a youngster when it makes him feel his role in society is important.

Besides encouraging savings the Credit Union teaches him how to handle his own affairs, and provides life insurance without cost to him.

Be Wise! Join Credit Union Today

UBC Students Again Tour Farm
The annual tour of UBC students visiting Experimental Stations and leading commercial institutions and growers in the southern part of the province Sept. 13 to 16 at the Summerland Research Centre. The students travelled by chartered bus arriving late Saturday and enjoying the camping facilities of Camp Sorec during their stay and particularly during the free day of Sunday, September 14. On September 15 a comprehensive tour was arranged to explain to those participating, the main features of the work in progress at the Summerland Research Centre. Visits were made to the Plant Pathology and Entomology Laboratories and to the Pomology, Fruit Products, Soils, Vegetable Crops, and garden sections of the Experimental Station.
The purpose of the tour is to acquaint students who are prospective farmers and scientific agriculturists with the problems encountered in various farming and processing operations in fruit, vegetable, animal, poultry, and related industries. The advantage of visiting the experimental station in their tour is to get an insight into the problems which are being investigated and to meet the staff and acquaint themselves with the approaches being made to these problems.

William McNabb Passes, Aged 83

Funeral services will be held Saturday, September 27, for William McNabb, 83, who passed away in Summerland General Hospital on Tuesday, September 23.
Mr. McNabb a native of Ontario, has been a resident here for two years. He is survived by his wife, Anna Eliza, two sons, Leonard, of Summerland and Kenneth of Makinson, B. C.; one daughter, Mrs. L.A. Palmer, Saskatoon, Sask.; Two sisters, Mrs. E. Cowan, Winnipeg and Mrs. H. Boyle, Grandora, Sask. There are also 14 grandchildren and 17 great-grandchildren.
Funeral services at United Church at 2 p.m. Saturday with Rev. C. O. Richmond officiating. Summerland Funeral Home R. J. Pollock and J.V. Carberry, directors, entrusted with funeral arrangements.

Last Rites Held For K. McKenzie

Passed away in the Summerland Hospital, Sept 20, Mr. Kenneth McKenzie in his 82nd year. He leaves to mourn his loss one brother, James of West Summerland and one sister, Mrs. G. (Barbara-Ann) Davidson of Cruden Bay, Aberdeenshire, Scotland.
Mr. McKenzie has been a resident of Summerland for the past 51 years operating an orchard in the Garnet Valley.
Funeral services for the late Mr. Kenneth McKenzie were conducted from the Summerland United Church Tuesday, Sept. 23rd at 2:30 p.m. Rev. C. O. Richmond officiating. Interment Peach Orchard Cemetery. Roselawn Funeral Home entrusted with arrangements.

Comings & Goings

Mr. and Mrs. J. E. O'Mahoney have returned after spending the weekend in Trail. While there they visited Mrs. H. A. Solly.
Mr. and Mrs. Gordon Dinning had as their guests this past weekend Mr. Lawson Allan and Mr. R. Armstrong, both of Vancouver.
Renewing acquaintance with Mr. and Mrs. John N. Pearson of Trout Creek this weekend were Mr. and Mrs. Leo Lewis of Winters, California and Mr. and Mrs. Chas. Hawes of Berkeley, California.
Alan Birtles left last week for the coast, where he will enter Seattle University as a student of Commerce.
On Thursday last Mr. and Mrs. John N. Pearson, Trout Creek, had as luncheon guests Miss Hettie Haskins and Miss Beatrice Fuller, both of Kenora, Ont.
Mr. and Mrs. Henk Wouters, accompanied by Mr. and Mrs. Willemson spent the past weekend at the coast.
Dr. and Mrs. W. O. Daniels and family have moved from Crescent Beach to the Solly house at Trout Creek.
visiting at Trout Creek with her son-in-law and daughter Mr. and Mrs. J. G. Penney, Mrs. McKee has returned to her home in West Vancouver.
Mrs. Betty Farrelly, formerly with the Winnipeg Ballet, resumed dancing classes at Summerland on Wednesday, September 17th, with classes being held in IOOF Hall with preschool children commencing at 2:30 p.m.
After spending a week at the home of his parents, Mr. and Mrs. R. Wilburn, Billy Wilburn has returned to Edmonton, to begin his final year at the University of Edmonton.
Mrs. Dean Carter has left to take her final year of teachers' training at UBC.
Guests of Mrs. C. M. Robinson for a few days last week were Miss Dorothy McPhillips of Vancouver, formerly on the staff of the local Bank of Montreal.

Hospital Aux. Golden Rule Fund Realizes \$475

The first meeting of the new term was held by the Summerland Hospital Auxiliary on Monday, September 8th, in the Health Centre with 23 members present. President, Mrs. Earl Wilson welcomed a new member, Mrs. Wm. Brown. Business included a report from Mrs. F. E. Atkinson, convenor of the Auxiliary's Centennial Project, the Golden Rule of Dimes to help our hospital. Mrs. Atkinson reported

that pride in their community was once more shown by the splendid support given by the good folk of Summerland, and a dime a week until each ruler was filled and returned to the Hospital Auxiliary amounted to \$475.00. This money is to be used to buy furniture — bedside tables, chairs, etc., and to have one ward completely renovated and re-decorated, including tiling the floor, giving it a complete face lifting. Floors in several other wards will also be tiled. The Auxiliary wishes to thank all those who so generously supported this project and if anyone still has a ruler to turn in please contact Doreen Tait by phoning 3092.

United Church Women's Federation Reconvenes

Thursday afternoon, Sept. 18, Mrs. P. Galloway welcomed members and visitors of Summerland United Church to their first meeting after the mid-summer recess. Mrs. J. Dunsdon was in the chair with Mrs. Rex Chapman acting treasurer for Mrs. M. Laidlaw, and Mrs. S. A. MacDonald as secretary for Miss Ada Cochran. Following a few words of welcome by the president, Mrs. W. Ward, Mrs. W. Boothe and Mrs. Bancroft led a devotional, using as their theme topic "Forgiveness". Reports were given by the secretary and treasurer and letters of thanks read, Mrs. H. B. Mair read an interesting letter from Miss A. M. Ross, missionary in Korea, telling of the use made of the numerous articles sent in the parcels. The Korean woman are very clever in making use of even the smallest piece of material. The used men's and women's suits are given to the needy students attending college and university. A request was made for women's discarded nylon stockings. These are unravelled and re-woven into useful articles.

The supply secretary, Mrs. W. Ward was asked to send the blankets on hand to Burn's Lake Mission Hospital. Mrs. S. A. MacDonald spoke briefly on the book "Facts and Figures", advising all members to read this account of the growth of the church as told in comparative figures. In it also is the story of each branch of church work. The decision was made to again sponsor the sale of Christmas cards as a means of raising funds—Mrs. Lazenby to be convener. Mrs. Lazenby then introduced the new study book, "Christian Concerns of North American

Neighbors", giving an outline of what countries were our North American neighbors. The meeting was dismissed with the Mizpah Benediction. A dainty lunch was served by Mrs. Mowatt, Mrs. P. Galloway and Mrs. J. Grant.

Dr. S. R. Laycock, retired Dean of Education, University of Saskatchewan, presently of Kelowna, was a visitor last week at the home of Mr. and Mrs. McLarty, Trout Creek. Dr. Laycock during the past summer gave a course on Education at UBC and this winter will be conducting extramural courses at Kelowna enabling teachers there and in Vernon to accu-

mmulate credits for degrees at UBC. * * * Mr. and Mrs. T. B. Lott have returned home from Vancouver, having driven there last week with their daughter, Margaret who is entering her second year of university at UBC. * * * Mr. Alan Cross has been appointed fruit inspector at Kelowna.

HAPPY HOLIDAYS TAKE MORE THAN NEW SWIMSUIT

How was the holiday? Did it live up to expectations? Or did you have to pinch pennies?

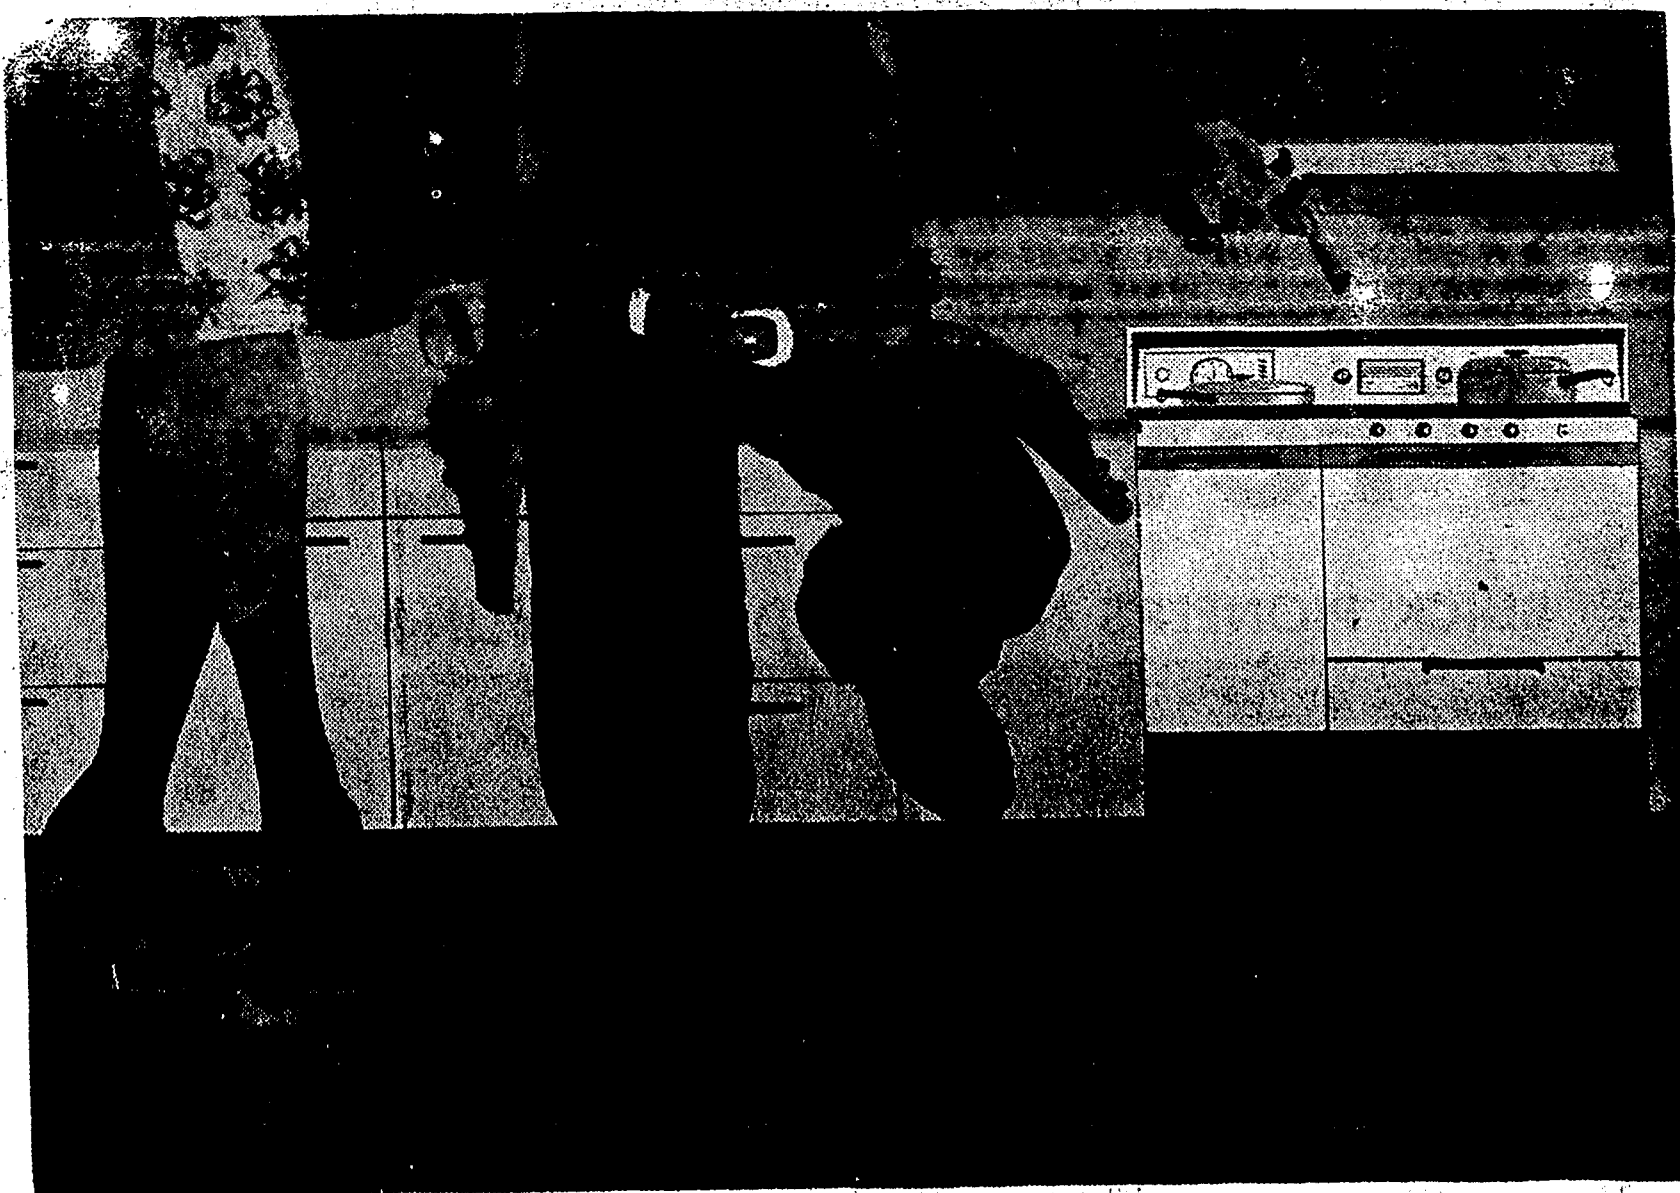

Don't let it happen again next year, when it's so easy to plan wonderful vacations — and to pay for them in advance by steady saving at the Bank of Montreal.

Many modern families now operate their own "do-it-together" savings plan. Everyone contributes according to the amount he can spare, regularly.

The time to start is right now! And the way to do it is to deposit each pay-day enough to cover the expenses of one day of your holidays. Then, when it's holiday time again, your special vacation fund will be big enough to make it a holiday to remember.

Doug Galloway, accountant at the Summerland branch of the B of M can show you how easy it is to start your special savings account.

See Mr. Galloway soon. He's a good man to know!

"Have gas range... CAN travel!"

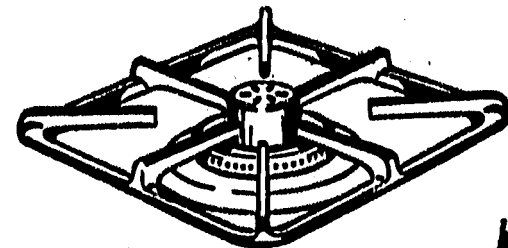

Time off for a jaunt with Junior through outlaw country... time off for a hair-do or a visit to friends... time off from the chore of potwatching for ever.

Yes, cooking time becomes leisure time when you own a modern automatic natural gas range. Food won't, can't burn in an oven that turns itself on and off. Your thermostatic controlled top burners raise and lower the temperature automatically, keep the exact temperature you dial. And yet—with all these time saving automatic advantages—a modern gas range still costs less to buy, install and use.

Take time off today. Have your local gas appliance dealer demonstrate his automatic natural gas ranges. There's nothing so clean, so cool, so convenient as gas cooking!

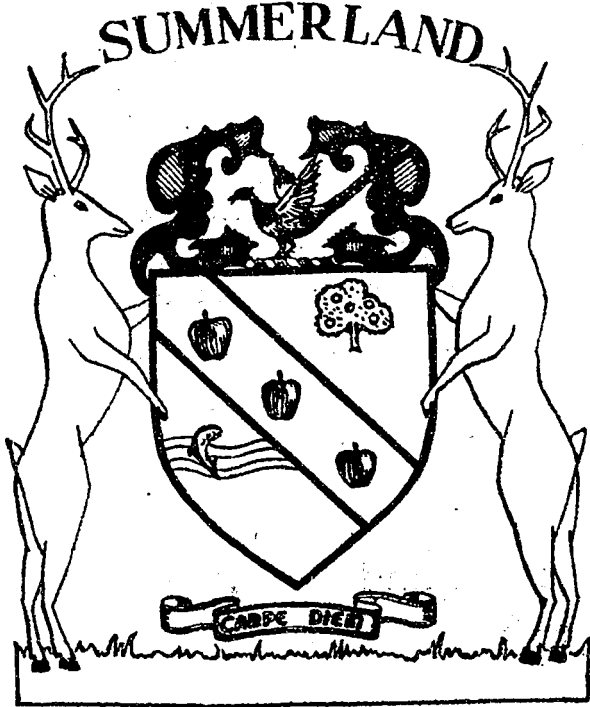

Burner with a Brain . . .

makes every pot and pan you own an automatic utensil. Ends burning, scorching and boil-overs. And when the burner is off, heats off—instantly.

INLAND NATURAL GAS

THIS YEAR BRITISH COLUMBIA PAYS TRIBUTE TO ITS PIONEERS AND TO THOSE WHOSE COURAGE HAS HELPED MAKE IT THE FINE PROVINCE IT HAS BECOME. EACH COMMUNITY HAS DONE ITS PART IN THIS DEVELOPMENT AND CAN BE DEPENDED UPON TO GIVE THE PROVINCE THE MEN AND WOMEN WHO WILL TAKE THE LEAD IN DEVELOPING OUR GREAT INHERITANCE.

The Corporation of the District of Summerland

Mrs. Jack Dunsdon, librarian of the Summerland branch of the Okanagan Regional Library, is beaming in the above picture and well she might, for Summerland's new library, built this year as this community's Centennial project, is a far cry from the shabby, out-dated quarters of a short while ago. Shown above, from left to right, are Mrs. Ken Storey, Mrs. Dunsdon, and immersed in choosing a book is Gina Storey.

The Story Of Summerland

"In the beginning" the land which now constitutes Summerland was set aside along with the rest of the range stretching from Trout Creek to Deep Creek of Peachland as common pasturage for use of both Indians and whites. In 1887 the British Columbia government decided to make this land available for settlement. The first permanent settler was James Gartrell. He had travelled from his home in Stratford, Ontario, through the United States to Sprague, near Spokane and northward into the Okanagan of British Columbia.

Mr. Gartrell arrived in Penticton in 1885 and worked for Tom Ellis, the cattle king of the South Okanagan. In 1887 Mr. Gartrell moved to Trout Creek Point where he and Mr. Duncan Wood pre-empted most of the land north of the creek in about

equal amounts. The first Water Record on Trout Creek was taken out jointly by these men in April 1890. Mr. Gartrell shares the honor of being one of the first to plant stone fruits in the Okanagan. The seedling peaches he grew were distributed throughout the Valley. Some of his shipments of peaches were sold in Kelowna and Vernon for 30 cents a pound.

Mr. Gartrell was also interested in apples and bought stock from the Stone Wellington nurseries in the Niagara District. The Gartrell family has a fine collection of medals and diplomas that Mr. Gartrell Sr. won with his fruit in London, England, and at horticultural shows in the Pacific Northwest, side of Trout Creek which was

In 1889, Antoine Pierre, an Indian, held land on the south later sold to the Canada Depart-

ment of Agriculture for the Experimental Farm. Mr. R. M. H. Turner came to Summerland in 1896 and owned some of the Towgood property which had originally been pre-empted by Arthur Day. Other early settlers were Messrs. E. R. Faulder and Granville Morgan.

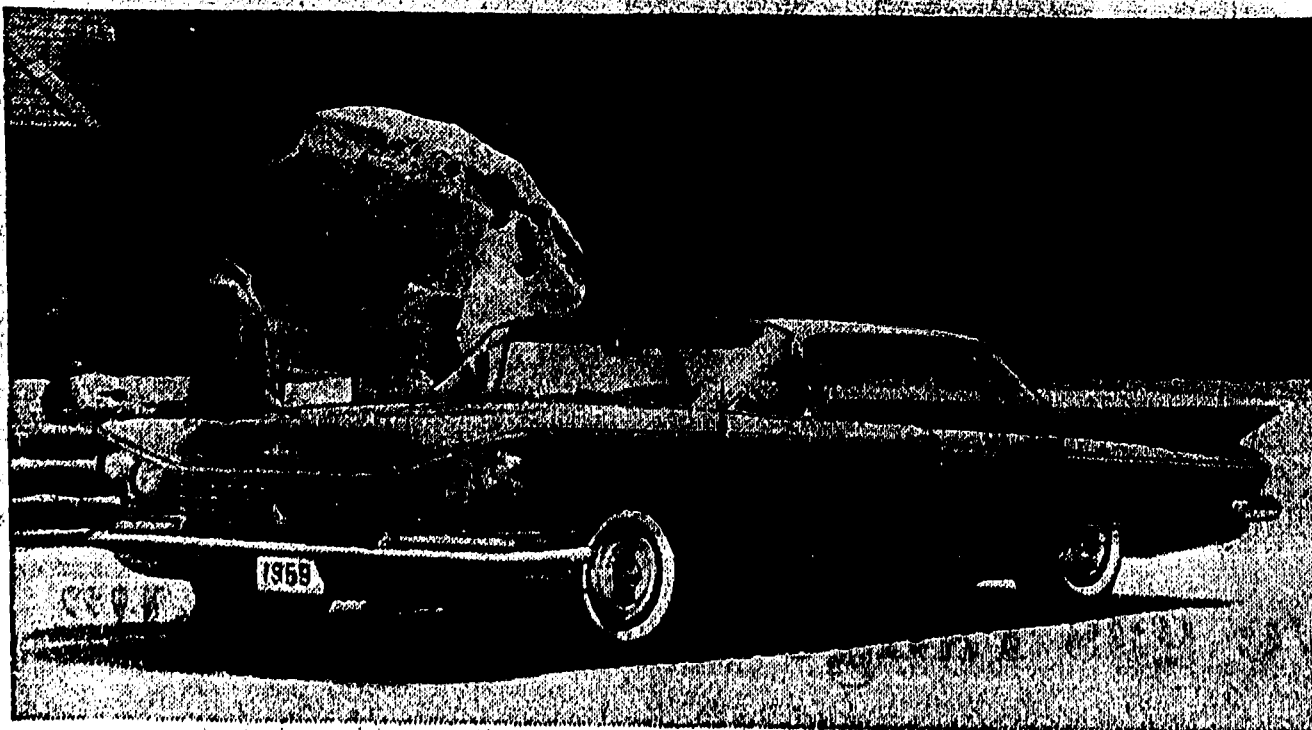

In the 1890's Harry and Jim Dunsdon established their ranches in Garnett Valley. The families of these two pioneers constitute one of the larger groups in present day Summerland. Other names in the pre-1900 group were: E. J. and W. H. Garnet (1880's) after whom Garnet Valley is named, W. C. Fosberry, W. R. J. Hawtrey, M. Keagen, and David Lloyd-Jones. Barclay's Ranch

The Barclay Ranch was one of the first larger enterprises established here. George Barclay

Preview of Buick For '59

BUICK PIONEERS NEW HARDTOP STYLING

Buick sets a new trend in 1959 with the flat roof line on all four-door hardtop models. This model, in LeSabre series, features a curved rear window that encompasses the entire rear passenger compartment. Compound windshields that eliminate wind noises are featured on all 1959 Buick models. Aluminum front brake drums are standard on all Buicks in 1959 and all models are equipped with distortion-free safety glass throughout. LeSabre is mounted on a 123-inch wheelbase and is powered by a 364-cubic inch engine with 10.5-to-1 compression ratio.

Once in a decade or so a new car is introduced that is exceptional in every respect . . . an automobile that makes an indelible mark on motoring history . . . this is the case with the 1959 Buick LeSabre with its bold approach to styling and engineering . . . and within the reach of most every new car buyer.

Mountain View Home Continues Good Work

The Mountain View Home on College Hill on Giant's Head at West Summerland has been sold to Mr. and Mrs. K. V. Hlavac, Czechoslovakian refugees. The Hlavacs are at the head of the Missionary Christian Fellowship—World-Wide, and have missionary interests in Africa, Yugoslavia and Cyprus. They are world travellers and have made their home in Vancouver since coming to Canada. They left their native land following the German occupation of Czechoslovakia during World War II.

The Home is to be carried on in much the same manner as it has been operated. It will be a residence for Christian senior citizens and is licensed under the provincial department of welfare for 25 guests. There are 30 rooms and convenient space for 23 older people.

Mr. and Mrs. H. E. Martin formerly of Penticton, have been engaged as manager and matron, and are in residence.

Mr. Martin has been a business man and his wife has had experience in institutional house-keeping. A houseman-gardener has been engaged and other staff members will be added as required.

Guests will be accepted from anywhere in British Columbia.

Purchase price has not been made public.

Original charter members of the Home have purchased the

Howard Milne residence at West Summerland and have moved into it. They are Miss Florence Taylor, Miss Leila Weese, Miss Violet Harris, Miss Frances Wesley, and Miss Celia Huska. Lottie Warren and John Mason, former residents at the Home, live with them.

The Mountain View Home, built originally in 1910 as a women's residence for Okanagan Baptist College was at that time called "Morton Hall," named after a prominent Baptist woman, Ruth Morton. It served this purpose until the college closed its doors in 1915 when the First World War made such inroads into its enrolment that it was forced to close down. The name of the hump called College Hill, on Giant's Head where the building stands, gets its name from the institution. The other college building, "Ritchie Hall" burned to the ground in 1941.

In 1931 the two buildings were purchased by a charitable organization known as "The Home for the Friendless," a group formed in Winnipeg many years previously. The spiritual teaching of the institution was under the Rev. W. R. Pike, an ordained Mennonite minister. Following Mr. Pike's death, his widow and others carried on the institution until the present time.

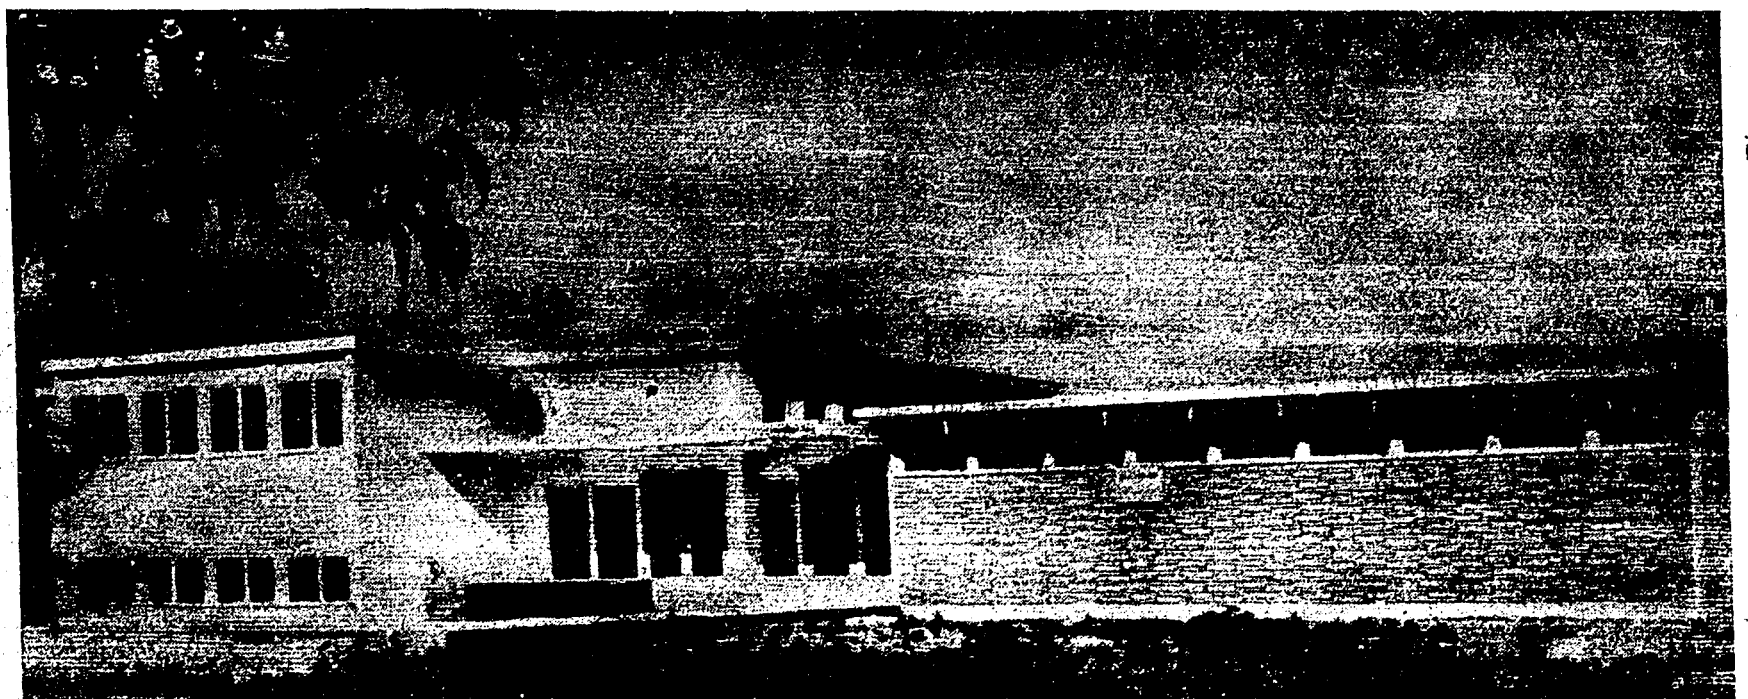

The Story Of Summerland

Continued from Page Five
lay, a son of the founder of the famous London Barclay's Bank, purchased several pre-emptions on the benches around what is now West Summerland and brought young men from England who for a fee were taught ranching. Barclay's total holdings comprised some 4,000 acres. Part of the land purchased by him was the Lloyd-Jones Ranch after whom Jones' Flat is named. An interesting feature of this ranch was that then was an Indian Reserve in the centre of

it, now West Summerland. The schools are located approximately where this Reserve was situated.

Mail and Transportation

Mail had been brought by Joe Brent on horseback from Hope even before Trout Creek was settled. Later William Powers carried the mail in saddle bags over land from Okanagan Mission to Rock Creek. When larger boats began to ply Okanagan Lake, Mr. Lloyd-Jones built the first wharf where the Summerland Co-operative had its plant before the 1957 fire. As years passed the flat-bottomed paddle wheelers became the chief mode of transportation so that many early comers have happy memories of pleasant trips on the

SUMMERLAND'S new Health Centre and Library building, the latter Summerland's Centennial project, is a landmark and a memorial that will always be linked with this province's Centennial year. The new building, pictured above, is another addition to the community centre which now embraces the health centre and library, the municipal hall, lovely Memorial Park, and the Summerland Jubilee Aren.

York, Aberdeen, Okanagan or Sicamous. Meeting "the boat" was a ritual with many people at the various points of call.

J. M. ROBINSON

One day riding behind the present Municipal Reservoir, Mr. J. M. Robinson noticed a flourishing peach tree. He had recently arrived from Man. and the thought passed through his mind that if peaches did so well without much care then surely domesticated peaches could be grown commercially. In 1902 Mr. Robinson aroused the interest of Sir Thomas Shaughnessy and he, with other directors of the Canadian Pacific Railway, formed that year the Summerland Development Company.

New Use For Old Church

The Lakeside Church has been purchased by the Summerland Masonic Lodge to be used as a Masonic Hall. This was approved at a meeting of the session of the United Church recently and a recommendation to this effect is to be forwarded to the Okanagan presbytery for its formal approval. Plans are to renovate the building for use by the Masons,

the Order of the Eastern Star, and other interested groups. It is expected that the Summerland branch of the Okanagan Union library will be carried on in the former church as it is now. The area surrounding the building will be cleaned up and parking space made available. Finance committee in charge of the transaction are F. E. Atkinson, chairman; S. A. Mac-

Donald and E. R. Butler. During Mr. Atkinson's absence in Europe during the next two months, his place on the committee will be taken by H. R. J. Richards. The Masonic Order meets now in a hall over Holmes and Wade Hardware store at West Summerland. The church building will afford good accommodation. It has a large well-lighted auditorium on the main floor with

two other smaller rooms. There is a full size basement and a kitchen. Outside finish is attractive stucco with half-timbering. The church has played an important part in Summerland. It was built in 1909, forty-nine years ago, by the Baptist denomination. Services were held in it by the Baptists until 1926. At that time an exchange of property was made between them and the United Church. The latter congregation worshipped in the Lakeside Church until the upper and lower town groups amalgamated a few years ago to form Summerland United Church, which holds services at West Summerland.

FRED GARTRELL — the only pioneer in this district who qualified to receive the Centennial Pioneer Scroll, a scroll given in tribute to the men and women who pioneered this mountain province. The scroll, signed by Lieut. Governor Frank Ross and Premier W. A. C. Bennett was presented at the July Centennial Celebrations here.

Mr. and Mrs. C. E. McCutcheon returned to S'land last week after spending six weeks in Ontario.

Bud Ward, son of Mr. and Mrs. A. Ormond, a graduate of Pentiction schools, and a winner of a scholarship, left last week to enter UBC as a medical student.

Mr. and Mrs. John Amm, New Westminster were weekend visitors at the home of Mr. Amm's mother, Mrs. C. J. Amm.

John Adams, son of Mr. and Mrs. Adams, left last week for Vancouver where he will enter second year university at UBC.

Mr. and Mrs. W. R. Stevenson of Weatherfield, Connecticut are visiting at the home of the former's sister, Mrs. C. J. Amm.

Kathy Greenslade left Saturday, Sept. 13 for Victoria College to take a teachers' training course. Kathy was awarded the Credit Union bursary of \$100.

Mr. and Mrs. Les Rumball left Saturday for the coast to attend a Super-Valu conference at Qualicum Beach, V.I.

Mr. Bill Wilburn, son of Mr. and Mrs. Ray Wilburn, Peach Orchard, who is entering his last year of Arts at University of Alberta and is planning later to take Theology in the east, conducted services at the Summerland Baptist Church, Sunday, September 21st.

Mr. and Mrs. Ross Tingley spent the weekend at the home of Mr. Tingley's parents, Mr. and Mrs. Roger Tingley.

Mr. and Mrs. V. Lockwood, returned Saturday from a fishing trip to the Shuswap.

Marilyn Washington has left for the coast where she will enter Victoria College to take teachers' training.

Visiting at the home of Mrs. C. J. Amm are her son and daughter-in-law, Mr. and Mrs. Wm. Amm of Hope, B.C.

Dr. J. M. McArthur has returned home from a trip to Chicago and Ottawa.

**From Experimental Station
Bi-Monthly Report**

Blended fruit juices suitable for infant feeding may prove to be another profitable outlet for surplus Okanagan fruit or fruit that is unsatisfactory for the fresh market, according to the bi-monthly report from the Summerland Experimental farm.

Noting that specialized infant foods have become increasingly popular in recent years, the report outlines preliminary experiments to develop apple-pine-apple, apple-prune, apple-apricot and apple-grape juice blends which the H. J. Heinz Company is currently interested in for infants.

TEST FORMULA
Development of satisfactory formulations would undoubtedly result in B.C. Fruit Processors receiving a contract for supplying H. J. Heinz's Canadian needs in this respect, the report observes.

In the preliminary experiments opalescent McIntosh juice was the basic ingredient for all the blends constituting 36-37 per cent of the fruit drink.

Formulae and samples of the test blends have been submitted to the Heinz company through B.C. Fruit Processors.

Meanwhile the farm staff is continuing experimental work on sparkling cider and fruit concentrates as other outlets for fruit.

CIDER PROBLEM
Current problem in the sparkling cider situation is to develop a blend from autumn apples varieties. Delicious Cee grade and orchard run Jonathan seem to be the most promising. A proportion suitable to many palates contains 60 per cent Delicious juice and 40 per cent Jonathan.

Utilization of Cee grade Delicious will aid the fresh market while use of Jonathans overcomes an awkward situation in that canning of apples is very restricted this year.

Interest in fruit concentrates as a means of preserving fruit and purees is increasing. With improved equipment it is now commercially feasible to prepare high quality concentrates of most fruits which, because of lower shipping costs, would enable B.C. fruits to compete in Eastern markets.

PEACH CONCENTRATE
The Summerland fruit processing laboratory is now working on development of a peach concentrate. Several trial lots indicate that it is feasible to make a peach concentrate of 30 per cent solids.

The development of apricot puree proved to be a godsend for apricot growers this past

season. Hundreds of tons of the fruit were so severely hailed that they would not have been picked if this outlet had not been available.

Orders were obtained by B.C. Fruit Processors for 28,000 cases of apricot puree from the 1954 crop but due to needs for other uses such as pie filling, apple-cot and orange-cot, only 10,000 cases of the order could be filled.

APRICOTS REVITAZIZED
The processing company hopes to pay \$100 per ton into the pool for the apricots it used. This is considered an acceptable price to growers and should revitalize the apricot industry, the report observes.

Among other work at the farm were tests to find a method of evaluating frost hardness of apples. A successful method was found and data obtained thereby showed the large superiority of Antonovka apple seedling roots over Malling VII, IX and II in respect to frost hardness.

Also tests are going on to find new peach varieties with superior qualities of firmness, ease of handling and canning suitability. Vee peaches have been the mainstay of the Okanagan peach industry for years but their good flavor and acceptable canning qualities are offset by the fact that they soften very unevenly and often have to be picked slightly immature so that they might be handled in orchard and packing house without excessive bruising.

**Weed Control
In Bulb Crops**

Weed control studies in fall-planted bulb crops such as daffodils, tulips and bulbous iris, show that chemical sprays can be used successfully. R. M. Adamson and J. H. Crossley of the Saanichton, B.C. Experimental Farm, report that the practice of pre-emergence herbicide spraying has become customary with man growers and shows every likelihood of even wider use.

Chemical sprays should be applied soon after the final ridging is done and before weeds have developed beyond the seedling stage. A combination of monuron plus CIPC is recommended to give effective control of a wide range of both broad-leaf and grassy weeds. Any volunteer cereals present will be controlled by the CIPC in the mixture.

Winter weed control by hoeing or cultivating is usually successful. Planting is done at the beginning of the fall rains and the soil surface remains wet throughout the winter months. By the time the soil is dry enough for cultivation, weeds have grown to such an extent that control is a long, tedious and expensive operation.

Weed growth will rob the crop of soil nutrients and moisture. Air movement will be restricted thus providing ideal conditions for fungal infection such as the tulip fire disease. Bulb growth will be retarded and harvesting will be made difficult.

Recommendations for weed control in bulbs and other crops may be found in the chemical weed control chart for British Columbia, available at the office of the local agricultural representative.

Winning Essays In Schools' Centennial Essay Competition

Birthday of British Columbia

Grade 10 - 11 - 12

by Wesley Schindel

"Gramps", asked the ten-year-old, freckle-faced, red-haired Tommy as he took careful aim with his slingshot at a glass telephone pole insulator, "why is British Columbia a hundred years old this year? And why do we celebrate its birthday?"

"Easy with the questions son," answered the old man who sat rocking lazily in a creaky old chair and smoking his corn cob pipe. "We celebrate British Columbia's birthday because we like to remember an event that is important to us and because we want to honour our pioneers and show our appreciation of those brave men who helped to build our beautiful province."

"Wasn't Great Grandfather one of our pioneers?" asked Tommy.

"Yes, Big Bill certainly was," replied Gramps as he gazed reminiscently at the tree-covered hills. "When Big Bill came to British Columbia a hundred and five years ago, this country was an unsettled wilderness of big trees and rivers, a fur land ruled by the Hudson's Bay Company. Fort Langley on the Fraser River was the only white settlement on the mainland coast.

When thousands of gold miners rushed into the Fraser River country, the Governor of Vancouver Island, James Douglas, was worried and reported their arrival to Queen Victoria. Her Majesty knew she must do something at once to protect and keep this Northwest Pacific land which fur traders and explorers had won for her.

"he wrote to Governor Douglas," Gramps continued between puffs on his pipe, "and said, 'I am taking the fur land of New Caledonia away from the Hudson's Bay Company, to make it a Crown Colony named British Columbia. I want you to give up your work with the fur company and become Governor of the new colony. To help you to keep order in the mining fields I am sending you some of my best Royal Engineers and also Mathew Begbie, who will be Chief Justice. My Royal Engineers will build towns and roads for you and will help to open the country for settlers.'

Governor Douglas accepted the offer and The Queen wrote again to him saying, "As soon as possible you will hold a public meeting to proclaim New Caledonia a Crown Colony, and to announce my plans concerning it." Governor Douglas chose Fort Langley for this most

important meeting to be held on November 19, 1858."

"What happened to Big Bill?" asked Tommy excitedly.

"I was just coming to him," said Gramps. "Like so many others he was disappointed in the Fraser River Mines. He was on his way out of the country when he heard that it was about to become a Crown Colony, and decided to take up land in what was going to be thrown open to settlers. Big Bill liked the west the fertile Fraser Valley. Many other people also decided to settle in the new colony. In the meantime he waited at Fort Langley to see the birthday ceremony."

"Oh, please tell me about that!" urged Tommy.

"First I would like to tell you about Fort Langley as it was on November 19, 1858," Gramps said. "The fort was built well up on the bank to avoid spring floods. There was a high picket fence with towers or bastions at the corners and a road that led from the gates down the bank to the river. The buildings were torn down long ago, all except the Big Council Hall, in which the birthday ceremony took place."

"Now," continued the old man, "I will try to tell you the story of the Birthday as your Great Grandfather told it to me. On November 19, 1858, the little pioneer steamship 'Beaver' and the 'Otter' made their way up the Fraser River with Governor Douglas and his party from Victoria.

It wasn't a good day for the ceremony. The skies were dark with clouds and it was drizzling rain as the crowd waited outside the gates of Fort Langley to meet the Governor. At the masthead of the big flag pole dripped the Union Jack, while the flags of the ships on the river hung soddily.

A company of Royal Engineers, newly arrived from England, were in attendance. With their red coats trimmed with braid and polished buttons, they caught the crowd's interest. Their white-plumed high black hats made them look very tall and grand.

"Here they come! Here they come!" someone shouted as the "Beaver" and the "Otter" rounded the bend in the river. Cheer after cheer greeted the steamers as they neared Fort Langley.

Governor Douglas and his officials stepped ashore from the "Beaver". After them came Mrs. Mathew Begbie. As they watched this tall black-bearded young lawyer, many wondered just how long he would last among the rowdy miners at Yale.

To the skirl of the bagpipes, the Guard of Honour escorted the Governor and his officers up the steep muddy bank.

Chief Trader Murray Yale, in command at the fort, met them at the gates. Eighteen guns from the "Beaver" and the "Otter" roared a salute as the Union Jack, hanging very limp in the rain, was raised above the entrance of the fort.

Because of the weather, it was impossible to hold the ceremony as planned in the open courtyard of the fort. It took place, instead, in the crowded Council Hall of the Officers Quarters. The hall was crowded with officers of the navy and militia, officials of the company, and dignitaries of the Colony of Vancouver Island.

Governor James Douglas of Vancouver Island, addressing himself to Mathew Begbie, solemnly administered to him the oath of office as Chief Justice of British Columbia, and Mathew Begbie, donning wig and gown, in turn administered the oath to Douglas as Governor of Her Majesty's newly-born colony of British Columbia.

Then the Governor announced that the exclusive trading rights of the Hudson's Bay Company within the colonial boundaries had ceased, and the proclamation creating the new colony was read.

There were cheers and handshakes. A second salute of guns from the "Beaver" and the "Otter" boomed forth. The guns of Fort Langley proudly answered, "this Crown Colony of British Columbia!"

"Gee!" exclaimed Tommy. "Now I know why we should be proud of our province and our pioneers."

The old man and the red-haired boy lapsed into an awed silence. Gramps puffed leisurely on his pipe and young Tommy sat dreaming about the big guns, the red-coated Royal Engineers, old Fort Langley, and that historic day, November 19, 1858, when British Columbia was born!

Reminiscences of Giant's Head

Grade 8

by Jimmy Jomori

I've been the guardian over the Okanagan for years uncountable. Oh I've had a bit of competition from the Ogoogo but I'm still the supreme idol. You see I'm the Giant of Giant's Head. But I'm not here to talk about myself. I want to talk about the period from 1858 to 1858. Especially about fruit and its problems. Its a relatively short time as far as history goes but quite a bit of progress has been made in that time.

It all started when I was gazing over my domain when I saw some white people. With a closer look I realized they were the Hudson's Bay Fur Brigade. A few months or a few years later, I've forgotten the exact time, the ranchers and their cattle entered the Okanagan. They sold their animals to mining and railway construction camps. As time went by the railway was built into my domain and agriculture was switched to wheat, which was climatically suited to this land. As irrigation was introduced to this relatively dry land fruit farming was introduced. With the prospect of prairie and coastal markets it was quickly increased.

Companies which I personally dislike bought large tracts of land. To add to the value of the land the companies built wooden irrigation flumes. This land was divided and sold. As I saw the people buy the land I felt sorry for them for they know little or nothing about irrigation. But my sympathies were wasted, for these fine people by trial and error gradually gained needed experience.

These companies were in it for personal profit only, so you can see why I disliked them, and the systems were usually inadequate. They profited by selling the land and keeping the water prices as high as possible. Farmers who had planted new orchards could not afford to pay these high costs for ten to fifteen years until their orchards started to produce enough to profit. So many abandoned their orchards passing high costs onto other shoulders. The companies lost money also. Through neglect of the flumes and dams

The History of The Sea Otter

Grade 9

by Iris Willis

Attention first became centered on this part of the North West Coast because of a small marine mammal, the sea-otter, whose beautiful fur pelt found sale in China. A Danish explorer Vitrus Bering, under the employment of the Russian government, made the first discovery of the territory coming through what is now the Bering Strait, but this territory did not become generally known until after the visit of Captain Cook in 1778. The third explorers, the Spaniards, had been gradually pushing their explorations forward also, their northward from Mexico and four years before Captain Cook's arrival had actually sailed in the waters off this coast. The possibility of enormous profit from the sale of the sea-otter pelts drew traders of all nationalities to the Pacific North West. The first Captain George Hanna, an Englishman, after a stay of but a few weeks on the coast, sold his cargo to Canton, China, for twenty thousand dollars. This naturally drew other traders to the scene! Soon Spanish, Russian, and American traders were also actively engaged in the trade, and commercial rivalry among them grew bitter.

The most serious existed between Great Britain and Spain and almost ended in war when the Spaniards seized some English trading ships and sent their crews as prisoners to Mexico. However, when the Nootka Convention was drawn up in 1790 the whole region was to all intents and purposes left open to traders of any country. To make sure that the provisions of this agreement were carried out Great Britain sent Captain George Vancouver to the scene of trouble.

In addition, he was to explore and chart the coast, for at that time the Northwest Passage between the Pacific and Atlantic oceans was being sought.

Captain Vancouver spent three years at work on the coast exploring every "creek and cranny" and producing maps and charts of amazing accuracy.

All the activity of sea-otter trading centered about Nootka Sound, an inlet on the west coast of Vancouver Island until suddenly—the Chinese market collapsed! The whole trade then disappeared; in fact nothing remains as a relic of an important and romantic period in the history of the province, except an excerpt which I will now quote. This was written by Captain Vancouver in the spring of 1792. It reads:

"The serenity of the climate, the innumerable pleasing landscapes, and the abundant fertility that nature puts forth, require only to be enriched by the industry of man with villages, mansions, cottages, and other buildings to render it the most lovely country that can be imagined."

I fully agree with this but what must be done to keep the "abundant fertility"? How can we keep and conserve the sea-otter of the West Coast? These were questions greatly pondered by the world and finally when the thought of extinction became too threatening an international treaty was drawn up.

They fell into disrepair. I gave a sigh of joy when I saw the municipalities take over these companies. With government aid a careful study was made of the engineering problems. New metal flumes and solid dams were built. The quality of the fruit improved and the people started to prosper.

So despite all these difficulties my domain is prosperous. They will continue to prosper with hard work and new and improved methods of farming. A central selling agency was formed to sell the fruit to national and foreign markets. The fruit is packed and shipped in attractive containers. Now Okanagan fruit is famous for its taste and quality.

Another day is closing in the Okanagan. The sun is setting in the west, radiating shafts of red and yellow light which add a tinge to the pink and white blossoms, the start of a new cycle of fruit. As I sit reminiscing thinking of the past I think of what a beautiful change civilization has made from my point of view.

This treaty between Russia, Great Britain, Japan, and the United States in 1911 put the responsibility of sea-otter conservation under United States, with each of the four nations having a share of the great harvest of fur. This harvest was restricted to young males that were not needed for breeding purposes and the agreement worked so well that the "otter" population is almost ten times as large today as what it was when the treaty was signed.

I am sure that many nations have today profited either directly or indirectly from this transaction taken "none too soon!"

100 Years of Agriculture in the Okanagan Valley

Grade 7

by Teresa Keys

We are taking a "backward glance" over British Columbia's history because this is B.C.'s Centennial year. On November seventeenth, 1858, at Fort Langley, Governor Douglas issued the proclamation creating the colony of British Columbia. Since that day our province has shown one hundred years of progress in many different ways. Since I live in the Okanagan Valley I have chosen to write about the advances made in agriculture, in the Okanagan Valley during the past one hundred years. I chose this subject because the people of the district where I live depend on the fruit growing industry.

In the early days of Okanagan history cattle ranching, mining and farming were the chief industries.

About one hundred years ago there were a few settlers in widely separated parts of Okanagan. Where Osoyoos now stands there was some cattle ranching carried on. So hay was an important crop. The ranchers also grew crops of wheat and oats as well as vegetables for their own use. The wheat had to be ground into flour to last the settlers until the following season. The oats were used for the animals. In 1860 the BX Ranch was established near what is now Vernon. Here were raised horses of the Morgan breed for pulling stage coaches in the Cariboo and on the run south to Mission. Stages were drawn by four- or sixhorse teams, while freight wagons required eight to twelve horses. Later the horses were replaced on the BX Ranch by Hereford cattle. Hay was an important crop in all this district. There were many large cattle drives and many thousands of tons of hay were shipped from here to Vancouver.

About the time the BX Ranch was started there was cattle ranching and farming carried on around Woods Lake also. Then, in 1874 the first fruit in the Okanagan was produced in the Woods Lake district. Near Oyama fruit trees were planted some years later, being placed near springs because there was no irrigation in those days. Peaches were first grown around Peachland. At that time peaches could be grown only in the Niagara Peninsula or be imported from California.

Some years later people got the idea that anything could be grown on fertile land if there was water. So dams were built high in the hills where water could be stored for irrigation purposes during the dry, hot summers. Gradually more land was brought under cultivation, more dams were built and the Okanagan Valley became one of the largest fruit growing districts in Canada.

The soil is light and sandy but with an abundant supply of irrigation it is very good for growing tree fruits. Good crops of peaches and apricots can be grown on this soil and it also suitable for apples, pears and plums. Most of the Okanagan is semi-desert, having less than fourteen inches of rainfall per year. Natural vegetation is scanty in the Valley and consists mostly of short grasses, sage brush, balsam fir trees and different kinds of pine trees. In the Okanagan Valley three land projects which are now have been completed, the Westbank irrigation project, near Kelowna, the Barkhead project, and the Cawston Benches project, located east of the town of Keremeos. The three projects irrigate approximately one thou-

sand acres of land. The Penticon West Benches projects, irrigates approximately two hundred acres. When making this land available to settlers the government gave preference to veterans who were in the last world war. Long term loans were given with easy terms of repayment, so many veterans were able to own orchard land who could not have bought land outright.

Since one hundred years ago there has been much progress made in protecting the trees against the many harmful bugs. This progress is still continuing today.

British Columbia

Grade 6

by John Rathjen

In 1858, during the gold rush, the colony of British Columbia came into being with James Douglas as its first governor. The greatest part of its population were miners. Each advance of these miners increased the problems and expense of the government of this large area. Roads had to be built over very wild land. But like most gold rushes the boom days soon passed away and the population became smaller and smaller and business was dull. The taxes were heavy and people began to be discontent.

In 1866 the two crown colonies of Vancouver Island and British Columbia were united. For a time New Westminster was the capital but then the government was moved to Victoria where it has remained ever since. However, this union did not bring the relief they had hoped for and once again British Columbia sought a remedy.

Then in 1867 there were two events which gave British Columbians hope of getting out of their difficulty. That year the United States purchased Alaska from the Russian Government, a Canadian Confederation was and in the same year the Canadian and the people of British Columbia looked forward to the new confederacy. In the end having their colony included in they triumphed and on July 20, 1871, the colony of British Columbia became a province of the Dominion of Canada. One of the things the union called for was the building of a transcontinental railway for without it British Columbia would be almost wholly separated from the rest of the Dominion. In 1886, after a long delay, the Canadian Pacific Railroad was completed. East and West were joined and British Columbia actually became a part of the Dominion. Since then her progress has been very rapid. New highways have been built all through our province which have enabled new industries to be established, and in more recent been opened up.

Gold On The Fraser

Grade 5

by David Storey

On a cold March day, 100 years ago a small party of prospectors stopped to cook lunch beside the river ten miles up the canyon from Fort Hope. As they ate around their fire, one of them, a man named Hill, noticed particles of gold in the moss under his feet. He washed the moss and found glistening nuggets. This was the first big strike of gold on the Fraser. This place was afterwards named Hill's Bar.

Americans, Englishmen, Irishmen, Scotsmen, Chinese and other foreigners all came to pan gold. Many thousands of dollars worth were taken out.

The miners lived in tents and stood a rough life. The season was short and winter was hard and long. Fights and hard drinking helped to shorten their lives.

They obtained the gold with sluice boxes pans and rockers. This (rocker) was a cradle like contraption in which the gold was sifted, the nuggets and dust are caught on a rough blanket beneath.

When supplies ran low they moved North up the Fraser seeking more big veins, on toward what is now Barkerville and Quesnel.

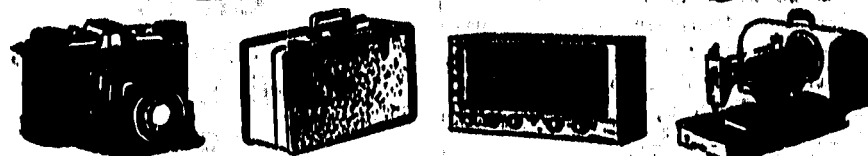

When I visited Barkerville with my parents 100 years later I saw the ghost town where at one time 20,000 men had lived. I also saw the graveyard and
