

# The Summerland Review

DEVOTED TO THE INTERESTS OF SUMMERLAND, PEACHLAND AND NARAMATA

Vol. 12, No. 29, Whole No. 680

SUMMERLAND, B.C., FRIDAY, FEBRUARY 18, 1921.

\$2.50, Pay in Advance

## COMMENCE WORK ON IRRIGATION SYSTEM AND ENGAGE AN ENGINEER

Delegation Urges Extension to Cover More Than One Hundred Acres in Morningside District.

### UNION ASKS TITLE BE MADE SECURE

No Time to Lose if Going to Provide Storage for This Season's Crop—Plans for Courtroom Approved and Work Ordered.

The date fixed by statute for the Court of Revision conflicting with the date of the regular meeting of the Council which otherwise would have been held on the 8th, the first meeting of the month was held on February 14th, when the usual budget of monthly accounts was presented and passed. The water committee presented a report recommending the appointment of Mr. C. A. Barton as municipal engineer, and after some discussion it was agreed that he be engaged immediately for a month's work on the water systems. Reference was made in the report to the difficulty experienced in getting water through from Trout creek to the reservoir. Fortunately the weather had been mild, and the reserve supply in the reservoir had been increased. At one time this was at an uncomfortably low level. It was recommended that an irrigation pipe crossing F. S. Neve's lot, No. 30, D. L. 441, be removed to a more suitable location. The unsatisfactory condition due to the changing of the course of Eneas creek was referred to, and recommendation made that responsibility be fixed. The report further recommended the extension of the flume or ditch on Jones' Flat to permit of taking off domestic pipe connections through which irrigation water is supplied to the Webb and other lots, and also that flume connection instead of the present pipe connection be provided for the Craig, Henry and Wilkinson lots in Prairie Valley. There was some discussion over the item of engaging an engineer, Councillor Scott expressing the opinion that much of the work could be done without this expense. The report was adopted, the council agreeing on recommendation of Councillor Kirk of the water committee that a report be obtained on the proposed flume extension to Capt. Webb's lot.

At the request of the Summerland Fruit Union, who reported that they had concluded an agreement with the Naramata Supply Co. for their interest and title in the shore lot, part of Block 28a, the council decided to obtain indefeasible title so that the Union might get absolute possession. Several property owners of the Morningside district, including Messrs. Tait, Tavender, Charity, Walter, Hargraves and Peturze, waited on the Council urging that irrigation water be put on their properties early this spring. Mr. Tait, who was chief spokesman, urged that any improvement in the pipe service would be inadequate for the needs of that district, and asked that a siphon be carried across Happy Valley from the Prairie Creek main. The reeve advised the delegates that this matter was already before the council, and the earliest possible action would be taken. It was proposed to carry out this and other urgent work in time for this season's irrigation, but the Council's ability to carry out this proposed program depended upon the obtaining of the necessary money. The chairman of the water committee also informed these citizens that this extension was on the report of the water committee, but that the money must first be had. Several of the delegates told of having ordered trees and were making other preparations for developing their properties this season.

Further improvement to the hill running south from G. J. C. White's corner was asked for by Messrs. T. C. Orr and W. A. Caldwell. The latter stated that the repairs made last year had put the hill in worse condition. Early attention was promised. Mr. Orr also asked for a better distribution of the water during the coming season, and Mr. Caldwell made a request that the flume serving Block 17, D. L. 508, be changed in location, and that a regulating box be installed. This and Mr. Orr's request that the flume through his lot be changed were referred to the water committee.

On behalf of his brother, R. H. English asked for definite assurance that irrigation water would be provided for his lot at Trout Creek Point, north of the Gartrell property. Mr. English also wanted to know what plans were being made to deliver water to his own lot which had been supplied through the pumping system. He was informed this matter was under advisement and would be acted upon at an early date.

Presenting a bill for doctor's fees and other expenses, A. Milne asked the Council to pay these accounts which, he said, were incurred because of an accident suffered by Mrs. Milne through alleged defective sidewalk. Referred to Municipal Solicitor.

The water committee submitted a report on the irrigation connections from the south main across the K. V. Ry. and other parts of the system. Instructions were given to have certain repair work referred to therein done at an early date, and the water committee authorized to have the engineer report on a flume and intake box for the siphon near D. C. Barr's property.

Messrs. Ritchie and Ingles asked the Council for the exclusive agency for the sale of Municipal properties, promising to look after rentals and to value all the holdings without charge. This was laid on the table for further consideration.

Plans for a courtroom to be built in the municipal building in the section now used as a warehouse, were adopted, the work to be done under Foreman Tomlin. The foreman's report on the road to the F. S. Neve property was adopted and instructions given to have the road graded.

Purchase of dynamite for road work in connection with roads was authorized.

The usual bylaw authorizing the borrowing from the Bank of Montreal a sum not to exceed \$20,000.00 against current taxes was given the required preliminary readings.

In reply to a letter to the Comptroller of Water Rights, that official stated that before the records could be completed he would require plans of the dam and a diagram showing the channel from this dam to the municipal intake. Instructions were given that he be advised that this would be furnished as soon as possible.

The electrician was authorized on his own recommendation to sell a small generator formerly used as an exciter, for \$123, and to ship a 15 k.w. machine on hand to Vancouver for sale.

The school estimates for the year 1921, as prepared by the School Trustees were received and adopted.

(Continued on Page 8)

Sir James Loughheed, Minister of the Interior, says that the principal reason for the suspension of the oil lease regulations is a desire to prevent "wild-cattling." Two or three years ago Alberta had a stock-selling jamboree on the strength of some oil discoveries in the southern part of the province, and thousands of Albertians as well as eastern people still have script that is nice to look at.

## FINDS RATES IN ARREARS

Council Issues Order With Respect to Light and Water Accounts.

### \$5000 AGAINST LAND

Over This Sum Now Owing for Irrigation, Some Since 1917 Seeking Advice of Counsel

A special meeting of the Municipal Council was held on Wednesday afternoon, when several matters left unattended to from the Monday meeting were dealt with. The loan bylaw authorizing the borrowing of money in the bank against taxes was given its final reading and approval. The clerk was instructed to order certain blue prints for the purpose of making charts of the several utilities. G. S. Marson asked for several openings in the irrigation flume. For obvious reasons this could not be granted. The chairman of the water committee stated that the water system in that district would have to be changed and improved this spring.

A Davidson made application for domestic water extension, which extension will also serve the W. A. Caldwell lot. The Council favored making this extension provided the capital was advanced by parties interested, the same to be refunded by rates.

The necessary bylaw authorizing the sale of lands to E. F. Senborn, Mrs. O. Atkins, and the Hiltz Estate was given preliminary reading.

The collector submitted a list of domestic water and electric light users whose accounts were in arrears to the aggregate total of more than \$800 and asked for instructions. After some discussion in which it was pointed out that others would be glad to have the electric light service for which some of these are not paying, instructions were given to have service discontinued if the arrears have not been paid after two weeks notice.

There was some astonishment expressed when a similar list covering irrigation rates was submitted, showing a total of more than \$5000 past due accounts for irrigation rates. In some instances these rates were in arrears since 1917, and after debating as to the best means of collecting them, it was decided to seek advice of the solicitor before taking action.

The clerk introduced the subject of the annual grant to the hospital. For the last few years this has been \$450, and on the suggestion of the reeve, an even \$500 was voted the hospital in lieu of any claim that might be made for indigent cases from within the municipality.

Instructions were given to have the foreman make a report on all properties having more than one irrigation connection. Under resolution of the 1920 Council an extra charge would be made under certain conditions where more than one connection is given.

Chairman Bristow, of the Roads Committee, reported the sidewalk on Ninth street in need of repairs. Repairs were authorized. One of the Councillors made enquiry as to the pile of concrete blocks on this street, stating that the owner should be required to remove same. No action was taken at this meeting.

## GROWERS DEBATE ALFALFA QUESTION

Decision, Given on Points, Favored Affirmative—Large Attendance.

Before an audience of about 100 interested citizens, a public debate was held on Wednesday evening at the Parish Hall, under the auspices of the Farmers' Institute. The subject of the debate was: "Resolved, That It is Advisable to Grow Alfalfa in Summerland Orchards." The affirmative was taken by Messrs. G. Johnston, H. Smith, S. F. Sharp and G. Thornber, members of the United Farmers of Trout Creek. The negative side was argued by C. H. Tate, G. Marshall, A. MacLachlan and R. V. Agur of the Farmers' Institute. The debate was well conducted and arguments were presented from many angles. The judges were W. C. Kelley, A. Mann and M. Tait. The judging was made on points of de-

bate, and was in favor of the affirmative.

In giving the decision, Mr. Kelley gave some advice as to the conducting of debates, and endorsed the idea of holding discussions on live subjects. He pointed out that this one had brought out many growers, which in itself was a good thing.

Following the debate there was a general discussion on irrigation and soil fertility, many questions being put most of which were answered by Supt. Helmer, of the Experimental Station.

The new cradle song.—Knott in the Dallas News.

## "HOW CANADA IS GOVERNED"

Splendid Address on Constitution of Our Country.

BY W. C. KELLEY

Canada Has Best System of Government Extant is Opinion of Speakers.

"How Canada is Governed," was the subject of a very interesting and instructive address given by Mr. W. C. Kelley at the Open Forum last Sunday afternoon. In introducing the speaker, President Welsh pointed out the great need of better knowledge by Canadians of the constitutional laws of their country. Mr. Kelley outlined briefly the relations to the Crown of a colony and a Crown colony, and gave a brief interpretation of the word nation. In a Crown colony the people have no voice in the government, and in their very early history the Eastern Provinces were all Crown colonies, while a colony was peopled by immigrants who continue their connection with the Mother Country while enjoying a measure of self government. Democracy means rule of the people in the mass.

We in Canada have certain relations with the Crown, which is the symbol of unity. Nothing contributed more to the solidarity of the Empire than did the reign of Queen Victoria. Mr. Kelley contrasted the status of the sovereign with that of the President of the United States, and in several ways showed that our government was more a government by the people than that of the southern republic. Here a government could not continue if it lost the confidence of the people, while in the United States the government's terms is fixed at four years. The speaker described the bonds uniting Canada to the Motherland as bonds of silken threads, and while they continued to be of this nature our present relations would be maintained. If the bonds were made harsh the connection would be broken. Explaining the phrase, "The King can do no wrong," by pointing out that every act of the King is done on the advice of the representatives of the people, Mr. Kelley said that the sovereign's power was in the realm of influence and suggestion, but this gave him tremendous room for good or evil. The same might be said of the Governor-General of Canada, who was the representative of the

(Continued on Page 5)

## ADDRESSES BOYS OF HIGH SCHOOL

A. W. E. Fawkes Gives Talk on "Civil Engineering as a Profession."

SETS AN IDEAL

Only by Clean Life and High Moral Motives Can Top Be Reached.

Principal Welsh has been endeavoring to arrange a series of talks to the High School students on the different professions, demanding thorough preparation in order to make a success.

The first of these talks was given on Wednesday afternoon to the boys of the High School on "Civil Engineering as a Profession," by Mr. A. W. Fawkes. Mr. Fawkes in a bright lucid style set before the pupils the great objective that must be kept in mind in order to be successful. In engineering there are two sides, the practical knowledge, or use of tools gained by experience, and the theoretical or scientific side obtained in college. These must be properly coordinated to make a success.

In training, money is not the primary object, but experience. The boys who have mechanical ability and are thinking of engineering were strongly advised to take advantage of any opportunity presented to them to get out with a survey party or onto any public construction work. They were cautioned against supposing that upon graduation from a college they were finished with learning. The various branches of the profession afforded a magnificent opportunity to specialize and thus gain the coveted objective, success.

The speaker pointed out in conclusion that in actual life many temptations would come to them to neglect the objective, the top of the ladder, and the ideal, a man among men, a true citizen. Only by living a clean life and cherishing high moral motives can success be reached. To deviate from the straight path is to miss the mark.

The address was warmly appreciated by the students, and the hearty thanks of the school was tendered Mr. Fawkes.

## SCHOOL BOARD MEET PROVINCIAL ARCHITECT

An informal meeting of the School Trustees was called on Saturday evening to meet Mr. Whittaker, Provincial Architect, and discuss the plans proposed for the new school additions. A meeting of the Board will be arranged in the next few days, at which figures and details will be fully gone into.

## Mrs. T. J. Garnett Loses Father

On Monday morning, Mr. David McRitchie, father of Mrs. T. J. Garnett, died in the Summerland hospital, after an illness extending over several months. The deceased lived in Manitoba and Saskatchewan for many years, coming here from Saskatoon. The funeral took place on Tuesday, the Rev. H. E. Livingstone officiating.

## SECOND SESSION IS HELD BY THE COURT OF REVISION

Subdivisions of Lands Into Town Lots is Chief Cause for Appeals Heard on Wednesday.

### PROPOSE TO CANCEL THE PLANS

Reductions Made on Trout Creek Point Townsite and on Properties on Hospital Hill Section.

At the adjourned meeting of the Court of Revision, held on Wednesday, a part of a block near the Trout Creek bridge, the property of the K. V. Ry. and subject to taxation, was reported by the assessor as having been omitted from the assessment roll. The required notice will be given and the property included in the roll.

On behalf of the vendors who had sold on terms, J. L. Logie protested against the assessment fixed at the previous session on the town lots and acreage recently purchased by the Peachland Townsite Co., of whom W. J. Robinson is manager. Mr. Logie thought that if the assessment stood, the property would go back into the hands of the Development Company. There are many small lots included in this group, and after careful consideration, the Court ordered a further reduction, making a total cut of 30 per cent. on the assessor's valuation.

H. H. Creese, owner of 23 lots west of the hospital, appealed against his assessment. Block 21, containing 4 acres, most of which is cliff side running down into Peach Orchard, had been assessed at \$600. His claim that there was but one acre of good land was admitted, and upon recommendation of the assessor, the valuation was reduced to \$500. The rest of the land south to and including the lot on which his house stands is divided into 22 parcels. These had been assessed at \$32 each. They were ordered reduced to \$25.

The appeal of Duncan Wood against the assessment on his townsite at Trout Creek Point came up for hearing on Wednesday. The total valuation of these lots as fixed by the assessor was \$12,245. Mr. Wood complained that he had been paying for years through debenture tax, to the irrigation system and had been receiving no benefit therefrom. The court could not entertain his claim for reduced assessments on this plea, but careful comparisons were made and it was learned that, including roads, the townsite properties owned by him contained 59 acres, and without the roads, 38 acres. On the basis of the total area, the assessment is \$207.50 per acre, or figured on the area of lots only, at the rate of \$319.50 per acre. Mr. Wood stated it was his intention to have the townsite plan cancelled.

A reduction of 10 per cent. on the assessment of these lots was ordered. All three, W. J. Robinson, H. H. Creese and D. Wood, declared their intention of having the subdivisions cancelled.

On behalf of Mrs. Hogg, K. S. Hogg appealed against valuation of several lots occupied by them as a home on Beach avenue. It was shown by the assessor that corner lots in the adjacent block north on the same street were valued at \$500, and inside lots at \$450. The Nelson corner lot in the same block, the Hogg properties is also assessed at \$500, and the others at \$450. Mr. Hogg cited the original price paid for the lots, and pointed out that they were farther from town, and in other ways not as desirable as lots in the other block. He also protested against the assessor's valuation on all properties in that vicinity. Considering location, the Court ordered a reduction on the Hogg lots from \$450 to \$350 each, and the Nelson lot from \$500 to \$400.

There was another long argument over the assessment of certain lots on the north side and near the entrance to Prairie Valley owned by A. Steuart. The total valuation was \$4,150, and Mr. Steuart thought this

should be reduced to \$2,000. A cut of 30 per cent. was finally ordered. On the basis of acreage J. R. Brown asked for a reduction on Block 31, D. L. 441, Trout Creek Point, assessed at \$2,200. After satisfying the court that there were only four acres of arable land, the valuation was reduced to \$1,400. One hundred was allowed W. E. Rines off his assessment of \$2,800.

Having ordered a reduction in assessment on the Lipsett properties, the court considered the valuations of other properties in that vicinity, and made the following changes: G. H. Ingles, 11-3 acres, reduced from \$725 to \$665; A. Frazer, 1 acre, reduced from \$600 to \$550; Mrs. Conway, 2 acres, reduced from \$550 each to \$500 each; Mrs. Gray, 1 acre, reduced from \$575 to \$550; H. G. Fisher, 1 acre, reduced from \$575 to \$550; T. Figgis, 1 acre, reduced from \$550 to \$525; R. E. White, 1 acre, reduced from \$550 to \$500.

The court ordered the valuation of Peach Orchard Park, two lots of 5 acres each, increased from \$100 to \$300 per acre.

An order was issued, that E. N. Rowley be notified of the intention of the court to increase his assessment.

The court adjourned until Wednesday the 23rd.

should be reduced to \$2,000. A cut of 30 per cent. was finally ordered. On the basis of acreage J. R. Brown asked for a reduction on Block 31, D. L. 441, Trout Creek Point, assessed at \$2,200. After satisfying the court that there were only four acres of arable land, the valuation was reduced to \$1,400. One hundred was allowed W. E. Rines off his assessment of \$2,800.

Having ordered a reduction in assessment on the Lipsett properties, the court considered the valuations of other properties in that vicinity, and made the following changes: G. H. The court ordered the valuation of Peach Orchard Park, two lots of 5 acres each, increased from \$100 to \$300 per acre.

An order was issued, that E. N. Rowley be notified of the intention of the court to increase his assessment.

The court adjourned until Wednesday the 23rd.

## FINE COURSE OF LECTURES

Valuable Treat in Store for Fruit Growers is Announced.

GOOD SPEAKERS

Every One an Expert—Every Subject Important to Our Readers.

The fruit growers of Summerland and Naramata are to have the privilege of hearing some splendid lectures this coming week, commencing on Monday next in Naramata, following on Tuesday and Wednesday in Summerland.

It is several years since Summerland had short course lectures and the opportunity of hearing popular leading horticulturists.

These lectures are of vital interest to all and the subjects are of an up-to-date nature. The lecture by Mr. Darlington, Dist. Hort. of Wenatchee, on "Orchard Cover Crops," ought to be listened to with much interest, more especially after the splendid "Alfalfa Debate" held Wednesday evening.

Prof. Barss, Dean of Horticulture, also has something to tell us in "Inter-relation of Orchard Practices." W. Newton, Dept. of Agriculture, will speak on "Soil and Fertilizers."

This will be an opportunity for many to learn the proper method of applying nitrates and other commercial fertilizers. Mr. Newton is an expert in this line of work.

"Cherry," our genial poultry man, will talk on "Poultry Keeping on the Fruit Ranch." Anything "Cherry" does not know about poultry is not worth knowing.

H. H. Evans, who takes up "Control of Insect Pests and Diseases," will give an outline in detail of what is being done in controlling the Codling moth in B. C.

M. S. Middleton, who is well known to many growers here, is to give many useful points in "Pruning." The address will be illustrated by lantern slides.

J. A. Grant, you all know. He's the man who tells you of the prices you don't get. Ask him why? District Horticulturist W. T. Hunter's talk on "The Elimination From the Orchard of Non-Profitable Varieties," will be instructive.

# .. The Winding Trail ..

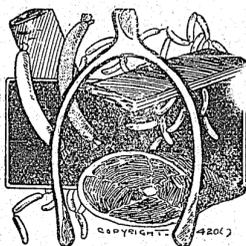

**The Kissing Bug** Rapid increase is a distinguishing feature of microbes, and the kissing bug introduced into the British Columbia legislature by Premier Oliver, is no exception to the rule. It is reported that a member of the Government the other day emulated the example of his chief by leaning over, and saluting the damask cheek of the only lady member of the House, and that the lady took the incident with a good grace. If this practice continues to spread, the position of Mary Ellen will become somewhat embarrassing, and she may have to resort to some means of defence. We may expect to read that, at the conclusion of some speech by the lady which moves the House to enthusiasm, the members will crowd around, each struggling to get in the first kiss of congratulation, and possible sequels may appear in subsequent challenges to mortal combat from disappointed ones to those more fortunate. The Premier of this Province seems to have the gift of introducing new features in public procedure. He has been known to offer a wager of five dollars against the testimony of a police witness; to threaten to use his fists against his opponents; and to call for assistance from above to strengthen his two good hands. All these little idiosyncrasies seem to be part and parcel of the Hon. John's make up, but the establishing of the kissing habit in the House constitutes an easy record so far.

**"Mice and Men"** In the interior of this Province we have up to the present been immune from the menace of the common rat, although Vancouver has its quota, and their spread inland is only a matter of time, unless they are halted on the threshold, which does not seem very likely, judging by the apathy displayed by the authorities not so long ago, and remarked on in these notes. It will doubtless be a matter of surprise to most of us to learn that Great Britain has lately enacted a law rendering any householder discovered "harbouring" a rat or a mouse liable to a fine of £5, and on conviction for a second offence, a penalty of four times that amount. This statement was recently made to a London audience by a lecturer on the ways of rats, and seems to show that the old country is fully alive to the desirability of keeping these pests in check. One would hardly have expected to find mice looming as large in the legislative ban as their more vicious associates, and it may be rather difficult to prove the "harbouring" of such an elusive resident. Nevertheless, the mischief they accomplish is so entirely disproportionate to their size, that there is good ground for at least some measure of legislation against them.

**The Weather Man** This is to give notice to the publishers of Foster's Forecast that, unless conditions are materially changed between the date of this writing (February 15th) and the day on which The Review is issued, all is over between us! I have before me Foster's Chart for February 1921, and find therein only one severe storm period predicted for the month, and that centring around the 6th, while from the 12th and onwards, the temperature line goes up and up until on the 16th it is so high that one naturally gets out last summer's clothing, and shakes the moth balls therefrom in happy anticipation. "Instead of which," we are nipped by chill northerly gales, and the line of temperature goes rapidly in the wrong direction. Mr. Foster had better mend his ways, or our childlike faith in him will be for ever destroyed. Let him see to it that his warm waves, storm waves, and cool waves, visit us somewhere near the dates foretold, or at least arrange so that the warm waves arrive on time, even if the others get misled.

I wonder how many of us can recall the story of Murphy's Almanac, which had a brief career as a consequence of some inexplicably correct forecasts of abnormal weather conditions in England over a century ago. One Murphy issued a weather leaflet in which he told of the coming of an extended frost which would seal up the River Thames, and make it a solid highway for some weeks. People laughed at the preposterous notion, and "Murphy's frost" became a standing joke. But in due time the frost set in, and the joke faded away as day after day the thermometer dropped lower and lower, and ice began to creep across the Thames at London Bridge. Eventually Jack Frost had his way, and Murphy's forecast became actual fact. And so long did the frost hold that fairs and carnivals, and the roasting of whole oxen on the ice continued for weeks. The outcome, as far as Murphy was concerned, was an enormous demand for his Almanac the following year, but the mantle of prophecy had fallen from his shoulders, and his day was soon over. Let Foster beware of a like fate!

AUTOLYCUS.

## Peachland Doings

A Weekly Chronicle Furnished By Our Local Representative.

The Methodist Ladies' Circle entertained the Presbyterian Ladies' Aid on Wednesday afternoon at the home of Mrs. Needham. A very pleasant afternoon was spent by all.

Mr. and Mrs. Tremble formerly of Rumsay, Alberta, were among the arrivals on Thursday evening. They have been touring a good part of the country and while looking over this district saw a piece of property which pleased them. They are in communication with the owner with a view to buying. While here they purchased a Chalmers touring car and have stored it in the local garage. They left on Monday morning expecting to return in a short time.

The Kudelka family entertained to a dance in the Orange Hall on Thursday evening. An invitation was extended to all who cared to attend. A goodly number responded and had a very enjoyable evening. Messrs. Fulton, Smalls, and Evans supplied the music during the evening with violin, banjo, mandolin and piano.

Mr. S. H. Mardin and Mr. Johnson were passengers north on Friday morning. Mr. Mardin spent the day in Kelowna, returning in the evening. Mr. Johnson returned on Monday.

After a pleasant trip and short holiday Mrs. Lingo returned home on Friday evening's boat.

The people of the Trepanier Township gathered in the School House on Friday evening at a Valentine party which was well attended and a very pleasant time enjoyed by all present.

The regular meeting of the Women's Institut was held in the Municipal Hall on Friday with a fairly good attendance. A report of the recent convention held in Penitence was given by the delegate, Mrs. H. E. McCall. Some of the musical numbers counted on for the occasion had to be omitted owing to the absence of the contributors. Those present were treated to a well rendered solo by Mrs. Stewart.

After a pleasant visit here with his parents and brothers and sister Mr. Frank Wilson left on Saturday morning to return to his farm in Alberta. He said it was quite possible that he might be back in Peachland again next fall.

Mr. and Mrs. Brinson Sr. returned from Penitence on Saturday morning after a pleasant visit there with Mr. and Mrs. Eph. Brinson.

Mr. J. Kudelka returned on Saturday after a week's visit at his old home, Rumsay, Alberta.

Miss Lily Cousins came down from Glen Rosa on Saturday evening to spend the week-end at home.

Mr. P. Tees, now of Summerland, was in town on Saturday looking after his business interests here and renewing acquaintances.

Miss Jean Gellatly arrived on Saturday evening to spend a few days with friends in the district.

The fellows who visited the local barber on Saturday evening found a pleasant surprise awaiting them there. He had partitioned off a portion of the shop, furnished the room with tables and a number of sets of checkers and had the place comfortably warmed for the convenience of the line up waiting for the chair. The appreciation of the boys was seen by the continuous use made of the boards throughout the evening until quite a late hour.

Mr. Edgecomb was a passenger south on Saturday evening, returning on Monday morning.

Mrs. Seigfried and family left last week to return to Alberta for a time, during the week to having leased their lot for a year to Mr. Robertson and family, who moved in during the week. Mr. Chas. Reid, Mrs. Seigfried's brother came in during the week to attend to getting the effects shipped, and after doing so left on Wednesday morning.

A change has been made in the meeting place of the Union Sunday School. For some time it has been held in the Presbyterian Church, but announcement was made last Sunday that from now on it would be held in the Methodist Church, since the other building has been sold to the Municipality for a Hall.

After a pleasant vacation spent in different parts of the prairie Mr. and Mrs. H. H. Thompson and family re-

turned on Monday evening. Mr. Thompson says he left colder weather there than he finds here.

Mr. and Mrs. Taylor and family paid a short visit to Westbank on Monday last.

Tuesday evening saw the arrival of the two machine guns which have been allotted to Peachland. They are on exhibition at the Municipal Hall.

At a meeting of the water users called on Tuesday evening a committee was appointed to represent the users and assist the Irrigation Water Committee, being in the case of Peachland the Municipal Council. It will be a part of the business of this committee to collect any or all data in the way of constructive criticisms and complaints of various natures and boil it all down and bring it before the main committee in a concise form. The committee appointed at the meeting was as follows: Messrs. Hardy, Smith, and McGirr.

Mrs. McDonald and Mrs. Willis were passengers north on Wednesday morning.

### MORTGAGE SALE.

UNDER AND BY VIRTUE of the powers of sale contained in a certain Indenture of Mortgage dated the 27th day of December, 1910, and made by Frank Cornwell Naper, which will be produced to the purchaser at the sale, the lands therein mentioned, that is to say: Firstly—Block 2, in the Subdivision of Lot 480, Map 288; and Secondly—Block 12, in the Subdivision of Lot 475, Map 161, both in the Osoyoos Division of Yale District, will be sold by private treaty.

The said lands are situate near Summerland, B.C. and the Mortgages are informed that there are about 14 acres in the first parcel and about 9 1/2 acres in the second parcel, and that there is a small dwelling house and outbuildings on the second parcel.

Tenders, for the purchase of the two parcels either separately or together will be received by the undersigned up to and inclusive of the 15th day of March, 1921. The highest or any tender not necessarily accepted.

For further particulars and terms of sale apply to

## Synopsis of Land Act Amendments

Minimum price of first-class land reduced to \$5 an acre; second-class to \$2.50 an acre.

Pre-emption now confined to surveyed lands only.

Records will be granted covering only land suitable for agricultural purposes and which is non-timber land.

Partnership pre-emptions abolished but parties of not more than four may arrange for adjacent pre-emptions with joint residence, but each making necessary improvements on respective claims.

Pre-emptors must occupy claims for five years and make improvements to value of \$10 per acre, including clearing and cultivation of at least 5 acres before receiving Crown Grant.

Where pre-emptor in occupation not less than 3 years, and has made proportionate improvements, he may, because of ill-health, or other cause, be granted intermediate certificate of improvement and transfer his claim.

Records without permanent residence may be issued, provided applicant makes improvements to extent of \$300 per annum and records same each year. Failure to make improvements or record same will operate as forfeiture. Title cannot be obtained in less than 5 years, and improvements of \$10 per acre, including 5 acres cleared and cultivated, and residence of at least 2 years are required.

Pre-emptor holding Crown grant may record another pre-emption, if he requires land in conjunction with his farm, without actual occupation, provided statutory improvements made and residence maintained on Crown granted land.

Unsurveyed areas, not exceeding 20 acres, may be leased as homesites; title to be obtained after fulfilling residential and improvement conditions.

For grazing and industrial purposes areas exceeding 640 acres may be leased by one person or company. Mill, factory or industrial sites on timber land not exceeding 40 acres may be purchased; conditions include payment of stumpage.

Natural hay meadows inaccessible by existing roads may be purchased conditional upon construction of a road to them. Rebate of one-half cost of road not exceeding half of purchase price, is made.

**PRE-EMPTORS' FREE GRANTS ACT**

The scope of this Act is enlarged to include all persons joining and serving with His Majesty's Forces. The time within which the heirs or devisees of a deceased pre-emptor may apply for title under this Act is extended from for one year from the death of such person, as formerly, until one year after the conclusion of the late war. This privilege is also made retroactive.

No fees relating to pre-emptions are due or payable by soldiers on pre-emptions recorded after June 26, 1918. Taxes are remitted for 5 years.

Provision for return of moneys accrued, due and been paid since August 4, 1914, on account of payments, fees or taxes on soldiers' pre-emptions.

Interest on agreements to purchase town or city lots held by members of Allied Forces, or dependents, acquired direct or indirect, remitted from enlistment to March 31, 1920.

**SUB-PURCHASERS OF CROWN LANDS**

Provision made for issuance of Crown grants to sub-purchasers of Crown Lands, acquiring rights from purchasers who failed to complete purchase, involving forfeiture, on fulfillment of conditions of purchase, interest and taxes. Where sub-purchasers do not claim whole or original parcel, purchase price due and taxes may be distributed proportionately over whole area. Applications must be made by May 1, 1920.

**GRAZING**

Grazing Act, 1919, for systematic development of livestock industry provides for grazing districts and range administration under Commissioner. Annual grazing permits issued based on numbers ranged; priority for established owners. Stock owners may form associations for range management. Free, or partially free, permits for settlers, campers or travellers, up to ten head.

### Correspondence

The Columns of THE REVIEW are open to the public for the discussion of matters of general interest. No notice can be taken of anonymous communications. Letters intended for insertion must be authenticated by the name and address of the writer, not necessarily for publication. The opinions of correspondents are not necessarily those of the Review.

West Summerland, February 15, 1921.

To the Editor.

Summerland Review.

Dear Sir,

The fact that a subject is mentioned in the Open Forum by a speaker is not in itself important, but the fact that discussion is refused or deliberately averted, in conjunction with the fact that in another organization the right to debate the same subject is refused on the plea "that the subject is not debatable," is vastly important. A few other facts in connection might well be mentioned, but I have already encroached upon your space sufficiently in a previous issue.

Will you kindly allow me to announce that I have resigned from the Executive of the Forum, as there is neither pleasure, profit, nor opportunity for service in association with those whose representatives, when cornered, resort to personal invective, however interesting that exhibition may be as a nature study, or however valuable it may be as an addition to the "convincing local evidence" desired by those who are watching both sides.

Thanking you for the space accorded.

Yours very truly,  
LILY FOSBERY.

## A Two Days' LECTURE COURSE

under the Auspices of the  
**SUMMERLAND FARMERS' INSTITUTE**

The Department of Agriculture (Horticultural Branch) have arranged to hold Afternoon and Evening Sessions in the

**PARISH HALL, West Summerland**

on

**TUESDAY and WEDNESDAY, 22nd and 23rd Feb.**  
at 2 p.m. and 7.30 p.m. Each Day

The Course of Lectures will be of special interest to all Fruit Growers, who are cordially invited to attend.

#### SPEAKERS:

P. S. DARLINGTON, Wenatchee District Horticulturist.  
PROF. A. F. BARSS, University of British Columbia.  
W. NEWTON, Dept. of Agriculture, (Soils and Crop Division).  
W. T. HUNTER, District Horticulturist.  
J. A. GRANT, Markets Commissioner.  
M. S. MIDDLETON, Vernon.  
J. R. TERRY, Chief Instructor in Poultry.  
H. H. EVANS, District Inspector.  
R. H. HELMER, Summerland Experimental Station.

#### SUBJECTS:

"Orchard Cover Crops." "Maintaining the Soil Fertility of the Okanagan Orchards." "Irrigation." "Soils and Fertilizers." "Control of Insect Pests and Diseases." "Practices of Pruning." "Frost Protection." "Markets and Marketing." Etc., etc.

#### NARAMATA.

Some of these lectures will be given in Naramata on the 21st. Afternoon at 2 p.m.; Evening at 7.30 p.m. Meeting in the Fruit Union Building under the auspices of the Naramata United Farmers of B. C.

#### WESTBANK.

On Monday the 28th February in the School House. Afternoon at 3 p.m. and Evening at 7.30 p.m. The above lectures will be delivered under the auspices of the Westbank Farmers' Institute.

#### PEACHLAND.

On Tuesday the 1st of March in the New Municipal Hall. The above lectures will again be delivered under the auspices of the Peachland Farmers' Institute. Afternoon at 2 p.m. Evening at 7.30 p.m. Keep note of these dates as there is a treat in store for all those who attend.

# The Summerland Review

Established August, 1908

Published at Summerland, B.C. every Friday by THE REVIEW PUBLISHING COMPANY, LIMITED

Ralph E. White, Editor and Manager

An independent family newspaper covering Peachland, Summerland and Naramata and adjacent districts.

Subscription Rates—In British Empire, in advance, \$2.50 per year; six months, \$1.40. To U.S.A. and other countries, \$3.00 per year.

Advertising Rate Cards and information respecting territory and samples of paper mailed upon request, or may be seen at the office of any advertising agency recognized by the Canadian Press Association.

Advertisers must have copy in by Wednesday noon in order to insure changes for standing advertisements. New display advertising copy can be accepted one day later.

Correspondence—Letters addressed to the Editor and intended for publication must be short and legibly written on one side of the paper only. The longer an article, the shorter its chance of insertion. All communications must bear the name of the writer, not necessarily for publication. The publication or rejection of articles is a matter entirely in the discretion of the Editor. No responsibility is assumed by the paper for the opinions expressed by correspondents.

FRIDAY, FEBRUARY 18, 1921

## AID TO HOSPITALS

The problem of hospital support is one which is always with us. A deputation from the B. C. Hospital Association, which interviewed the Premier at Victoria last week, would appear to have put the case for greater provincial assistance very strongly before him, and to have elicited some remarks which at any rate indicated a real interest on the part of the government. On the subjects of poll tax and amusement taxes as a means of hospital aid, the Hon. Mr. Oliver does not seem quite clear, and his contention that the province is already paying a greater proportion of hospital expenditure than ever before does not necessarily bar any further increase; the chief difficulty seems to lie in the uncertainty as to the best means of obtaining money to finance such increase. There appears to be a good deal to recommend the suggestion of a regular tax for hospital purposes, the trouble being that taxation is already high, and it is difficult to add fresh calls without creating widespread dissatisfaction.

It is probable that some further assistance will be granted, and this, with an increase of generosity on the part of municipalities whose hospitals are in need, will perhaps suffice. Incidentally, we think there is much point in the Premier's observation as to the reluctance of some sections of the public to pay for services rendered.

## ILL TIMED.

The Review has never been antagonistic to the theory of adequate salaries for the teaching profession, holding that those who are in charge of the education of our children should not be stinted in the matter of financial support. But we have no sympathy with the action of the school teachers of New Westminster, who threaten an immediate strike if their demands are not complied with forthwith. In taking this view we have not in mind the question of amounts, as we do not know just what salaries are being paid at New Westminster; our objection is against the method adopted. Having accepted a specified salary at the beginning of a school term, ordinary business ethics call for a completion of the term on that basis, and the threat of a strike at short notice in the midst of the term does not seem worthy of a class of men such as those who compose our school staffs. It may be that better results are expected from such a procedure, on the theory that concessions will be made in order to avoid the closing down of schools in mid-term, but there is involved an implied disregard of the pupils' interests which will certainly not commend itself to communities in general.

## OIL LEASES

An analysis of the new oil regulations for the Northwest Territories appears to show the determination of the Dominion to safeguard the interests of the public as far as the flotation of development companies is concerned. The area allowed for prospecting is increased, the maximum being raised to four square miles, but in the event of a discovery, a lease will only be granted on one-fourth of that area, the remaining three-fourths reverting to the Government as a reserve. Moreover no location is to exceed 80 acres in extent, the effect of this regulation being that drilling must be done on each area of that extent, and blanketing of adjacent territory will be automatically prevented. A further provision calls for the installation of an adequate drilling outfit within two years of the date of the permit, and drilling to the aggregate depth of 2000 feet must be done within four years, or the permits lapse without notice. These regulations, if strictly enforced, should go a great way towards checking any approach to such disastrous conditions as were seen in and around Calgary a few years ago, when "leases" of more or less problematical value were bought and sold at absurd prices, while not a stroke of testing work had been done on the land transferred.

The rents for leases of 50c and \$1.00, and the permanent royalty of 5 per cent. thereafter, seem reasonable and the regulations in general will commend themselves to the public.

## AIMS AND OBJECTS OF THE WOMEN'S INSTITUTES OF BRITISH COLUMBIA.

The aims and objects of the Women's Institutes are to improve conditions of rural life, so that settlement may be permanent and prosperous in the farming communities. By study of home economics, child welfare, prevention of disease, local neighborhood needs, of industrial and social conditions, and laws affecting women and their work.

By making the Institute a social and educational centre and a means of welcoming new settlers.

By encouragement of agricultural and other local and home industries for women.

Landlord (gently but firmly)—Well, I've decided to raise your rent. Mrs. Flannigan (enthusiastically)—It's the darlin' ye are, sir! I wouderin' how I c'd raise it mesilf.

## STILL IN TROUBLE.

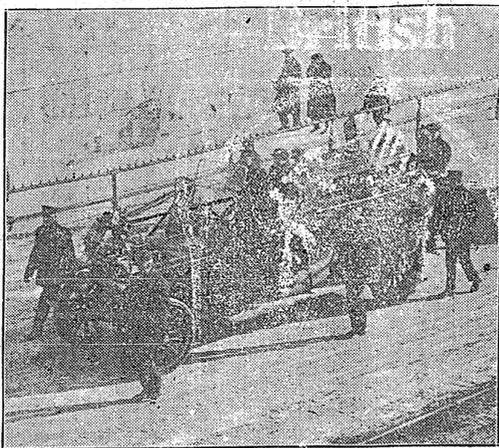

(Penticton Herald).

The lighting system of the town is if anything worse than ever but when the new engineer completes the overhauling of both old and new engines conditions may be improved. Most nights just now, the light winks and blinks off and on and then goes out completely for an hour or two. There is no current in the middle of the day for power purposes. The council is now about in the frame of mind where it wishes it had never encouraged anyone to instal electrical apparatus.

"My friend," sternly began the horse-faced gent, "life is uncertain. If you were struck by a bolt of lightning tonight would you be prepared?"

"What difference would it make," returned J. Fuller Gloom. "Lightning never stops to investigate."

## FUNERAL OF WINNIPEG FIRE VICTIM.

The funeral of William McIlhagga, city fireman, who lost his life in the Dingwall Block Fire, was held on Monday. City firemen acted as pall-bearers and the casket was conveyed to the cemetery on a fire truck. The cortege is shown as it reached the Main St. subway.

## THE EDUCATIONAL VALUE OF DRAWING

(Contributed)

About one child in every ten can draw a free-hand balanced curve. About one child in every hundred possesses real, artistic ability and about one child in every five hundred accomplishes anything of really artistic value.

Why, then, teach drawing at all? What value, educational, moral or even physical, can there be in rows of small heads bent over drawing books, in rows of small tongues pointed between anxiously parted lips, while chubby hands clutch frequently licked black leads and trace in bold black outlines some perfectly senseless "free hand" copy.

And the truthful answer is "No value at all."

Why teach drawing at all unless it is of some value, educationally? And echo trumpets, "why?"

Yet picture writing was one of the earliest mental efforts of the human race. Hunger and thirst satisfied, speech developed, pictures came next. Witness the inscribed rocks in our own neighborhood. And a child is never so happy as when crayons are placed in his hands, and he can draw Daddy frequently with one eye, but colored by his own fervent childish imagination, too soon, alas, faded to the light of common day.

This inherited love of picturing or drawing has been too long perverted by teachers who want finished sketches or pretty pictures. It can, if taught properly, be of immense educational value and act moreover as a superb stimulant to the imagination. We have at last arrived at the stage when we recognize that it does not matter what is taught to promote a fuller life, that is to educate our children. How subjects are taught is the test. Drawing in the hands of a skilled workman in minds can be as great a value as history or Latin, if not in the same way.

Possibly the chief practical value of drawing rests in its being an unrivalled auxiliary and tool to other subjects. Psychologists have shown that "interest" is the pivot of all true education and assured drawing is one of the best means of maintaining interest.

Botany is a subject which is doubtless of intense interest in a district like this. All results of botanical researches may be kept quite scientifically, but without the arduous written descriptions so irksome to the young student. For instance, a class of seven-year-olds, studying germination might draw the beans which they intend to grow on flannel in the classroom in crayon mass one week. The next week when germination has begun to take place, they may draw it again, dating their new drawing and appending any scientific terms their teacher may tell them near the part shown in the drawing. Probably that self-same scientific term will sprawl its erratic writing well over the page. That doesn't matter so long as the observation is careful and scientific, as it will be in carefully supervised crayoning. So week by week, the observation and attendant drawing may continue until the bean is in flower for, if possible, the record of each child should be kept on his own particular paper, headed by his name. It is really the picture writing of our forefathers. Beans may also be grown in intense light or in the dark and the results noticed in these "pictures," and so a little elementary chemistry may be taught, easily and vividly.

Of course, with older pupils, especially with microscopic work, the use of drawing is obvious.

The use of drawing in connection with history, geography and literature is not perhaps so obvious. But

it is certainly not of less value. In connection with all these subjects, drawing should be illustrative. Probably Johnny's picture of Columbus discovering the new world may provoke mirth among these dense adults, but his teacher will find out whether Johnny thinks Columbus had a galleon or a steamer, and Johnny himself will be convinced that his picture shows sense. To prevent these illustrations becoming too mirth-provoking for the aforementioned dense adult, it is comparatively simple to teach children a little perspective which will result in observation for themselves in a short time. After several pupils have been drawing men bigger than houses and the error is pointed out, it will not occur again. In the older students this will soon be followed by observations as to the relative position of features and limbs of the human body, especially if they are allowed to draw their school mates occasionally. Really wonderful results have been obtained by this method.

To return to our forsaken perspective. The use of the sky line in picture composition is soon explained. Then it is usually simple to take the children on some long straight road where they may observe that the road seems to rapidly decrease in width as it approaches the horizon or skyline. If it is at all possible, follow out the same observations with regard to rivers, car lines, railway tracks, and soon you will cease to get rivers five miles wide at the horizon and one mile wide where the spectator is presupposedly standing.

It is more than astonishing how keen the children become on making these illustrations accurate and alive. Love of picture drawing is an implement nature herself has put in our hands as a wholesome aid to education. Students of early Italian art will perhaps recognize with some what of surprise how closely akin their own children's efforts at illustration are to that period. The same untrammelled fancy and rainbow hued coloring with the absence of those deepening shadows will come with perhaps wisdom and may be sadness.

Adlesly—Well, I've got to go today and face the music.  
Bartholomew—What, wife home?  
"No; I conduct a band."

## Wholesale Arrests Canadians With Coughs.

Halt! Who goes there? Someone with a cough. Friends! Stop cough! you are under arrest. Thousands of such arrests are being made every day in all parts of Canada. Too long have coughs and colds evaded justice and caused untold suffering to humanity, but at last they have been caught and overpowered by Canada's famous cough detective—Buckley's Bronchitis Mixture. Did you ever hear of this wonderful remedy? Why, everybody is talking and writing about the great work it is doing in curing coughs, colds, bronchitis, asthma, etc.

The following is one of thousands of letters received:—"Kindly accept my sincere thanks for the benefit my wife derived by the use of one of your bottles of Bronchitis Mixture. For over thirteen years she has suffered acutely. After spending dollar after dollar upon various remedies, no relief was obtained. Hearing of your most marvelous remedy she decided to give it a trial and I am glad to say one bottle has made her well. You are at liberty to use my name and should be only too pleased to answer any inquiries. Sincerely yours, John Holmes, Yorkville Ave. The original of this letter may be seen at W. K. Buckley, Limited, 142 Mutual St., Toronto. Don't allow a cough or cold to linger with you. Away with it! Hall Buckley's Mixture and have cough cured. This remedy never fails. On every bottle is a guarantee to refund the money if not satisfactory. Delays are dangerous. Order now from your Druggist."

SOLD IN SUMMERLAND BY THE SUMMERLAND DRUG CO.

## DELIGHTED WITH OUR VALLEY

Nellie McClung Thinks We Do Not Advertise Enough.

The noticeable feature of the Okanagan Valley, according to Nellie McClung, in the Farmers' Magazine, is the neglect of advertising of its unique beauties and advantages. This well-known writer thinks we have everything we can desire—except the people, and cannot quite see the wisdom of hiding our light under a bushel basket. Part of Mrs. McClung's very attractively written article runs as follows:

But the real business of the Okanagan is the growing of fruit, and with its equable climate, its abundant water supply and the quality of its soil, it is going to rank with the finest orchard lands in the world. To this end there is already an efficient organization at work to handle the crop. There are many packing houses all over the country, and each year pickers are brought in from outside points. Many of these are city women and girls who want a holiday, and are glad in this way to have six weeks in the country at its most attractive season, and be able to earn enough to make up for any inconveniences they may suffer. However, the inconveniences are passing away, and now there are many fine bunk-houses and dining-rooms provided for the pickers, and cars are at hand to take them to and from their work.

One noticeable feature of the Okanagan communities is that they do not advertise—at least not in proportion to their opportunities. They are too happy and busy to say much, and just go on raising fruit and clearing up more land to raise more fruit. They are very courteous to strangers and ready to show them around, but there is, so far as I could learn, no definite propaganda to interest outsiders in their community. Perhaps theirs is the wisest course, but when we remember that British Columbia for all its fertility and favorable climate, is still importing food, and cannot yet supply itself, it would seem as if a definite campaign should be put on to get more settlers. They have everything but the people.

A new boot-boy at a hotel took up to one of the rooms a couple of boots, one of which was a top-boot and the other an ordinary shoe.

"What do you mean," said the visitor, "by bringing me two boots of different shapes?"

"I don't know, sir," came the reply. "But what bothers me most is that there is another pair downstairs just like 'em."

## Correspondence

The Columns of THE REVIEW are open to the public for the discussion of matters of general interest. No notice can be taken of anonymous communications. Letters intended for insertion must be authenticated by the name and address of the writer, not necessarily for publication. The opinions of correspondents are not necessarily those of the Review.

Editor of Summerland Review:

Dear Sir,  
Some months ago I suggested that you should turn over your correspondence columns to a sort of Arena or Open Forum, wherein those of your readers who were given to the "breaking out in print" tendency might have a little scope. In your last issue it struck me that just such "writers" had appropriated this space.

When I tell you that my great-uncle, Josh Hayseed, edited the Potunk Palladium; cousin Trifolium was sob-sister on a big New York daily, and another relative, Dr. Alsike, was editor of a great religious weekly, you might consider me eligible to have my little fling before you see fit to shut off the deluge.

The Whang, Bang, stuff was funny

because no painstaking "cribber" of Hashimura Toga could be otherwise; and the poetry (?) was another evidence of the talent running loose and going to waste but for the generosity of the Review. (Yes, our Review.)

I must say, though, that the Socialist dope you run from time to time is very punk; so many words and so few ideas, don't ye know. The bits of Socialism we already have foisted upon us, such as the post office, public schools, public roads, and public health, are quite sufficient considering the homes they have broken up and their disastrous effect upon religion. No thinking person who has the right idea about human nature submits willingly to these horrible examples of what Socialism as a whole would mean to us. Oh, for that glad day when we shall return to the courier post, the log schoolhouse, the corduroy road and the midwife!

I do hope from now on you will muzzle these poor Socialist nuts. Enough is too much!

Yours truly,  
MADGE LOVELL  
Naramata, Tuesday.

## PRINTING PRICES

During the recent dispute in Vancouver between employing printers and employees, references were made to the fact that higher prices would force Vancouver printing orders to Ontario where wages were lower.

This catastrophe has been averted.

But, do you know, those same prices that were to have tempted Coast orders to the East are being quoted by us?

Some weeks ago we adopted a scale of printing prices that is being very extensively used in the cities and towns of Ontario, and in many of the centres of the Middle West and Eastern States.

With modern equipment and a full range of papers and other printing materials, we are in a position to do your work well and expeditiously and at

"HOW CANADA IS GOVERNED"

(Continued from Page 1).

sovereign here; he acted under advice of the ministers. The Canadian Government is a government of two houses, Senate and Commons.

The Canadian Senate originally had 72 members, but had been increased to between 90 and 100 to provide representatives for the new West. Stating briefly the qualifications of a senator, and naming a few conditions which would unseat him, Mr. Kelley pointed out that a senator was appointed for life, and it was the idea that the actions of the senate would be of a dignified and deliberative nature, free from party influence, and in the best interests of the country.

The Commons is the practical working governing body, and the speaker, beginning with the B. N. A. Act, gave an outline of the formation of the Canadian Government with the proportion of representation given to each province and the basis of such up to the present. With Quebec being given a fixed representation of 65 members, and other provinces in like proportion according to population, the membership of the House of Commons fluctuated in numbers, now being 234.

The powers of the House of Commons and the method of organization, the premier selected by the party, and called by the Governor-General to form a cabinet, which now has 14 or 15 members each in charge of a particular department, were explained by the speaker. Each minister prepares legislation to be brought before the House, and in this he is backed by his party. The opposition examines this legislation, and if they are not satisfied, there is a fight over it. When the Minister of Finance brings in his budget a discussion is precipitated.

If the cabinet does not hold the confidence of the people as represented by their members, it resigns. The premier may then go to the Governor-General and recommend another for his position to form a new cabinet. Those ministers would then seek re-election. If the Premier felt that the country at large was with him he would ask for the dissolution of the House and go to the country. He contrasted the Canadian cabinet with that of the United States, describing the latter as a glorified advisory body, not elected by the people, with nothing to do with Congress or Senate, and no authority except in the administration each member of his own department.

The founders of the United States Constitution had tried to avoid all the evils seen in European governments. They have a cabinet, congress and senate, not one of which can carry through a bill. The president cannot bind the country by treaty, hence the recent spectacle with respect to the League of Nations. Such a situation could not arise in Canada. Here, the government would have been compelled to resign instantly, and not carry on as did Wilson after losing public confidence.

Provincial government was touched on briefly, and an explanation given of the name "Dominion of Canada." Canada is tacitly and explicitly a Christian nation. One of the fathers of Confederation reading from the Psalms, "He shall have dominion from sea to sea," suggested the name. The speaker liked to think of the Dominion in that sense. We ought to be proud of our country and that it is Christian. To attain true national life we must give emphasis to the principles implied in the Christian religion.

Principal Welsh, of the High School, stated that constitutional government was now a subject of the high school curriculum. T. H. Riley described the address as a fine exposition of the machinery of government, but he would like to know more of how Canada is governed, and referred to Mackenzie King's reference to an invisible government.

Mr. Kelley replied that we have elected representatives who are open to the same influences as you and I. Powerful influences may some times be brought to bear. We will never have perfect government until we have perfect citizenship. Every citizen should study and take an active part in public affairs. Lobbying is carried on everywhere; how successful it is depends on the public. We can be proud of our Canadian government though not wholly satisfied. Some say politics are rotten and stand aside. This is a good way to keep them rotten. He had never seen any graft in politics with which he had been connected.

J. W. S. Logie made reference to what had been termed invisible gov-

Passing Events: Social, Personal, &c.

The William Cross property on the south side of Prairie Valley has been sold by Mr. W. C. Kelley to Geo. Stead.

Mr. and Mrs. E. R. Butler are rejoicing over the arrival of a daughter, born at the hospital on Tuesday the 15th.

Mr. and Mrs. J. R. Campbell and daughter, Miss Florence, have returned from a visit of some months to Lennoxville, Que.

At least some of the lectures to be given here, under the auspices of the Farmers' Institute, will be attended by the students of the High School.

Councillor Bristow is moving around with considerable difficulty having been kicked on the back of the leg by his horse. No bones were broken nor are any complications anticipated.

Miss Blott, who has been staying with her sister, Mrs. F. W. Andrew, left last week for Ontario, having received word that her brother there was ill. It is expected that she will return shortly.

Attention is directed to the Rialto advertisement announcing a special for next Wednesday and Thursday, one of D. W. Griffith's master productions, "Scarlet Days," a tale of the olden west.

Considerable local interest is being taken in the visit to Vancouver of the Naramata Girls' Basketball team, which will play a series of games with the girls of the University. Further particulars are given in our Naramata section.

A. MacLachlan has sold his former home property to H. B. Mair. He took in part payment the property east of Giant's Head, formerly the Page property, and recently purchased by Mr. Mair, and Mr. MacLachlan has since sold this latter property to F. MacKinnon.

The discussion at the Forum on Sunday afternoon will take the form of a debate on the question: "Resolved, that the Senate Should be Abolished." The affirmative will be upheld by Mr. Donald Davidson and Louis Smith, while the negative will be maintained by Mr. P. Tees and Ronald White. Collection. 29

At the regular meeting of the Ladies' Hospital Auxiliary, held on Tuesday, Mrs. T. P. Thornber resigned the position of corresponding secretary and Mrs. W. J. Robinson was elected in her stead. The house committee submitted an inventory of the furnishings now in possession of the hospital together with a list of additional requirements that should be on hand when the new building is opened. Plans are being made to provide these.

ernment, and defied any man to show that our government is not a class government. He referred to an election in Manitoba as an instance of graft. The speaker again advocated industrial democracy. O. E. Mann differed from Mr. Logie and described the Canadian method of government as the most perfect government of the people for the people that existed, being an improvement over the English system. One will find hidden influences everywhere. Our government can be made as near perfect as we wish to make it. The people should work with their representatives.

Mr. Kelley could not subscribe to Mr. Logie's statement with respect to class government, and told of the rise from obscurity to the highest positions of many Canadian leading citizens, and he gloried in the fact that any young man in Canada had an opportunity to go as far as his ability would permit.

A. J. Beer asked as to the abolishment of the Senate, and of its value, to which Mr. Kelley replied that without it legislation might be stamped through, and to abolish it would require an amendment of the B. N. A. Act.

Stating that there were three vacancies on the executive, President Welsh asked that these be filled, and Messrs. Davidson, Garnett and Tees were elected.

BETTER BUSINESS

can be built by an optimist but never by a pessimist.

THE REVIEW

will help

Mr. J. W. Jones, M.L.A. for this district, has been made a member of the House Committee on Agriculture, and House Committee on Public Accounts.

G. K. Devitt is leaving tomorrow for two weeks' business trip to the Coast. During his absence Mr. D. C. Thompson will carry on Mr. Devitt's store for him.

A Vancouver exchange says: Mrs. R. G. Hardisty of Peachland, is visiting in the city and is the guest of Mrs. Hardisty and Miss Hardisty, Englesea Lodge, Beach avenue.

We will grow any variety of vegetable plants you desire at reasonable prices. Also a limited quantity of flowers. Would be pleased to have you consult us as to anything along these lines. Order now. A. McLachlan 29tf

Rev. H. A. Solly has returned from Vancouver, where he had been attending the convention of the Associated Boards of Trade. It is expected that Mr. Solly will give some details of this convention at the Board of Trade meeting here tonight.

The Experimental Station has leased a section of the Indian Reserve lying west of the Farm and immediately south of Trout Creek. Only recently the Farm property was added to by a five year lease of the Antoine Pierre farm at Trout Creek Point.

Mr. H. Whittaker, chief architect to the Provincial Government, made an informal inspection of the new hospital building on Sunday and apparently was well pleased with the structure now nearing completion. Mr. Whittaker was a schoolmate of T. P. Thornber and Geo. Wolstencroft, and spent the day, part here and part in Naramata, with these two friends.

WILL HAVE COMPETITION IN VEGETABLE GROWING

The West Summerland Women's Institute met on Friday, February 11th, at 3 p.m., in the Parish Hall.

The meeting opened with a short address from the new president, Mrs. G. J. Coulter White, which was followed by the regular business. It was arranged to have a gardening competition for the growing of winter vegetables, the prize being Prof. Boving's cup. A committee of two, Mrs. Kelley and Mrs. Pares were appointed to look after all details.

A motion was passed that Mrs. Pares shall act with the Secretary-Treasurer as a committee for the administration of Mothers' Pensions, should any case arise requiring this service.

Mrs. Kelley gave a very interesting report of the Okanagan and N. Thompson Conference, held in Penticton January 26, 27 and 28. This was followed by a most entertaining and original little sketch by Mrs. Solly on names of Summerland people. The roll call was answered by quotations from Canadian poets, after which the meeting adjourned and afternoon tea was served.

GEO. WOLSTENCROFT ON WATER BOARD

Voting took place at Naramata yesterday for the election of a water commissioner to fill the vacancy created by the automatic retirement of one member. The result was the election of Geo. Wolstencroft by a majority of 23, the figures being Wolstencroft 47, Nuttall (retiring member) 24. Every eligible voter in the district, save one, registered his or her vote, the solitary exception arriving late by just a few minutes. The board is now composed of Messrs. Rolt, Languedoc, Armour, Rounds and Wolstencroft.

The medical men in charge of a mental hospital used this test in determining the state of patients. A tap was left running in a bathroom till the tub overflowed, and three were instructed in turn to go in and dry the floor. The first worked faithfully with cloth and pail, without success; the second was found on his knees in the water frantically trying with a wrench to disconnect the pipe; the third calmly regulated the supply with the tap placed there for the purpose. He was pronounced sane.

Kitty, aged four, had been naughty and her father had had to administer vigorous correction before going to business.

What an impression had been made was apparent when, on his return from business in the evening, Kitty called upstairs with frigid politeness: "Mother, your husband's home."

Mr. and Mrs. Darkis have moved from Victoria Gardens to the flat over the Better 'Ole.

Mr. and Mrs. Jack Young, of Naramata, came across the lake this morning, Mrs. Young remaining in the Summerland hospital to undergo an operation.

Some structural alterations have recently been made to the interior of the Baptist Church that will add much to the comfort and convenience of the worshippers.

Miss Master, who is lecturing here and at Peachland, Naramata and other points, arrived Tuesday night. She will speak this afternoon to the members of the Women's Institute.

The hospital is short of chairs, and The Review has been asked to state that the loan of eight or nine chairs until the new hospital building is opened will be appreciated.

In the past it has been the practise of Summerland motorists to apply to the chief of police at Vernon for license and registration. The Vernon office would now point out that applications for motor registrations and license should be made to the Provincial Police Office at Penticton.

We understand that Mr. Rover of Bowden, Alberta, will arrive at Summerland about March 1st next, and will start a boot and shoe manufacturing business here. Mr. Rover was looking round here last week and located premises and has returned to Alberta to ship his machinery and equipment, of which he has a complete outfit.

John Steuart who, with his family, has recently returned from the prairies, has purchased from his brother, A. Steuart, a group of lots on the north side of Prairie Valley, east and north of the Carr property. Mr. Steuart has brought a bunch of cattle with him and they are now grazing on his new holding. It is Mr. Steuart's intention to build a house near the main road and to utilize a section of the property as an orchard nursery.

Having received intimation that the question of electrical power for the Valley would be discussed on Tuesday next with the representatives of the Municipality by Mr. Lorne Campbell, manager of the West Kootenay Light & Power Co., the matter of representation was left with the Reeve, and the Council meeting held on Wednesday was adjourned at the call of the Reeve. Accordingly the regular meeting, which would otherwise have been held on Tuesday, will not be held.

PROCRASTINATION.

My friend, have you heard of the town of Yawn On the banks of the river Slow Where blooms the Waitawhile flower fair, And the Some-time-or-other sent the air, And the soft Go-easys grow? It lies in the valley of What's-the-use, In the province of Let-her-slide. The old tired feeling is native there—It's the home of the listless I-don't-care— Where the Put-it-offs abide.

The Put-it-offs smile when asked to pay up. And they say, "We'll do it tomorrow;" And so they delay from day unto day, Till death slides up and steals them away, And the creditors beg, steal, or borrow. —Walter Pulitzer in N.Y. Globe.

WE PRINT WEDDING and other Society Printing as good as the best, and our prices are right Why Buy Elsewhere? The REVIEW Job Printing Department

WILL HE LIFT THE EMBARGO ON CANADIAN CATTLE?

Lord Lee of Fareham, Minister of Agriculture of Great Britain, on whom much pressure is being brought by every province of Canada to lift the embargo on Canadian cattle.

MR. J. A. MCKELVIE MAKES BOW TO OTTAWA HOUSE

The new member for Yale took his seat in the Dominion House on Monday and lost no time in making his maiden speech, part of which dealt with the necessity of maintaining an adequate tariff for the fruit industry. Dr. S. F. Tolmie, who was one of Mr. McKelvie's introducers, suddenly forgot his first name, and had to be "prompted" by the new member. The house smiled—a good omen.

SUMMERLAND WEATHER REPORT

Below is a report furnished by the Dominion Experimental Station here for the week ending Tuesday:

Table with columns: Date, 1921, Max., Min., Rain, Sn., Sunshine. Rows for Feb. 9, 10, 11, 12, 13, 14, 15.

BIRTHS.

AGUR—To Mr. and Mrs. Philip Agur, at Summerland Hospital, on Feb. 16th, a son.

Marmaduke—"Before we were married she used to say 'bye-bye,' so sweetly, when I went down the steps."

Montmorency—"And what does she say now?" Marmaduke—"Oh, just the same old thing, 'buy, buy.'"

## British Columbia's Pulp and Paper

Pulpwood Ready for the Mills in British Columbia.

The birth and development of the pulp and paper industry in British Columbia has been phenomenal. A decade ago not a single ton of pulpwood, mechanical or chemical, was manufactured in the Pacific coast province; in 1919 the total value of the products of this industry amounted to \$12,554,257. To-day British Columbia stands third among the provinces of the Dominion in the amount of capital invested in the industry. The surprising rate at which this has grown in the last few years and is continuing to grow, is indicated in the jump effected between 1917 and 1920. It was \$22,584,652 in 1917 and \$50,000,000 in 1920.

This is a remarkable history of development of what will doubtless become one of the most important industries of the Pacific coast, but it is more than probable that the next decade will exhibit still more rapid expansion. Great Britain and the United States are drawing the greater part of their paper supplies from Canada, and eyes are turned on British Columbia possessing as it does the largest remaining stands of timber in the world suitable for

the production of pulp and paper. The province's annual export to Australia already amounts to more than 20,000 tons whilst the demand for pulp from the far east exceeds the present available supply.

Of the 370,370,000 cords of pulpwood estimated to exist in Western Canada, British Columbia is credited with 285,370,000 cords, consisting of spruce, western hemlock, and balsam, whilst for the coarser grades of pulp a certain amount of Douglas fir is used. It should also be observed here that British Columbia is highest among the provinces of the Dominion in the average production of pulp per cord of wood the mechanical process giving an average of 2435 pounds.

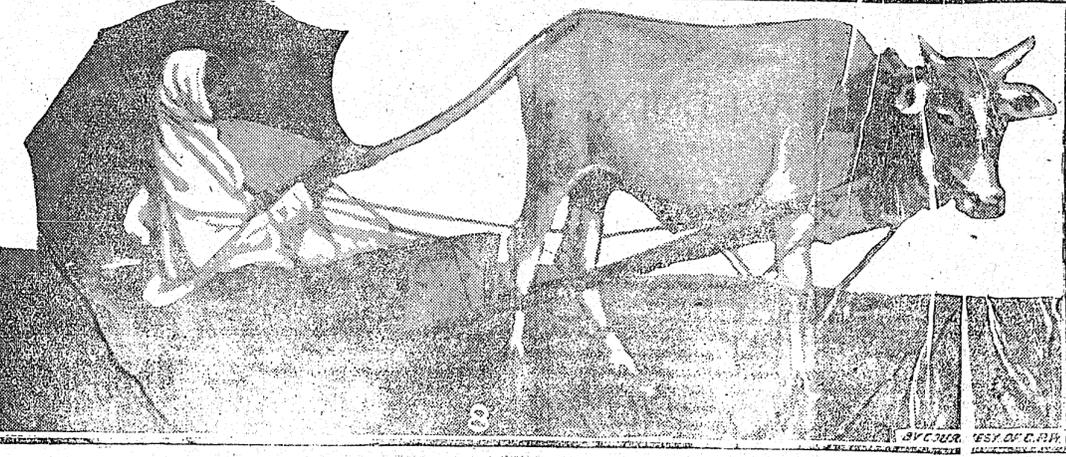

To-day there are only seven plants in British Columbia producing pulp—groundwood and chemical—and newsprint. No other industry offers such boundless opportunities of development. In addition to the enormous areas of suitable timber are the tremendous unharnessed water powers awaiting utilization, which are estimated at 3,000,000 horsepower. The temperate climate of the Pacific Coast gives assurance of open harbors the year round, whilst

apart from the demand in the United States there is an unlimited market for the product of the mills immediately across the ocean.

This may be instanced from the fact that the entire pulp product of one of the largest mills on the coast goes to Japan for manufacture there into newsprint. Up to the present time the provincial government has placed no embargo on the export of the raw product.

British Columbia is producing sufficient newsprint to supply the whole of Canada, taking the most recent estimates of the annual consumption of 120,000 tons. Figures of the province's output of pulp and paper of all kinds for 1919 were as follows: Sulphite, 80,047 tons; sulphate, 9,473 tons; ground wood, 99,769; paper, newsprint, 123,507 tons; wrapping 7,202 tons. In newsprint production British Columbia stands third among the Canadian provinces.

From the standpoint of timber resources, water powers, climate, shipping, a bright future awaits British Columbia in the pulp and paper industry and the coming decade will see it placed high among the paper producing sections of the American continent.

## Naramata News

Current Events of Town and District

### MASQUERADE.

One of the most enjoyable events of the winter took place on Friday evening when a masquerade dance was held in Naramata Hall. The event drew a large crowd. The hall was decorated with festoons of hearts of red paper and other Valentine novelties. The dancers were masked and attired in costumes varied, colorful and attractive. Gypsies and clowns, a most amusing "love Mary," a bride and groom with confetti still visible on their wedding garments, cavaliers, fairies, and many other interesting impersonations were present. Two authentic Eastern costumes, worn by Mrs. Hughes and Mrs. Wolstencroft, created much interest. These were costumes of Syrian women brought from the East by Mr. W. H. Irwin. Several novelties marked the progress of the evening. Each lady was presented with a mascot woolly as she entered the hall. A valentine box was opened in the course of the evening, and each person receiving a valentine asked to stand in the middle of the floor and read its message aloud. Unique in this day of fox-trots and one-steps was the introduction of several old-time dances, the barn dance, the valets, and the lancers. Refreshments for the evening were provided by the ladies attending, and Mr. Fred Manchester, Mrs. Mark Manchester, Mrs. Greene, and various others kindly provided music for the dancers. A very hearty vote of thanks was extended to Mrs. Greene, through whose initiative the evening was arranged, and whose work was chiefly responsible for its success.

Mrs. Walters returned on Friday from Peachland, where she had spent a few days' holiday.

The On-we-go club of girls held its regular monthly meeting at the home of Miss Florrie Lyons. The financial report showed a sum of over \$60 to have been raised since the early fall by the efforts of the girls. Of this, \$10 had been donated to Sunday School funds, \$5 to the S.S. library, and approximately \$40 to the Ladies' Aid. After the business was disposed of and a short examination held, an impromptu musical programme took place. Each girl had come dressed to represent a musical term and much merriment was occasioned by the guessing of these. A resolution of sympathy was passed with regard to the serious illness of Mrs. Myers. Refreshments were served by Mrs. Lyons at the close of the evening.

Mr. R. J. Macrae of Saskatoon, who is going through to the Coast, will stop off at Naramata for a few days, where he will be the guest of Mrs. Amaron.

Mrs. Wells and Mrs. Salting were hostess at a whist drive held in the Unity Club on Saturday, in aid of the Club work. There was a large attendance and a pleasant evening was spent by all. The first prize for the ladies was won by Mrs. Morrish, and that for gentlemen by Mr. Rushberry. The consolation prize went to Mr. David Good. Tea was served by the ladies during the evening.

A considerable amount of illness prevails in the district at present. In addition to the usual colds prevalent at this time of the year, Mrs. Myers has been seriously ill with bronchitis and quinsy, and Mr. W. H. Irwin has been confined to the house with a bronchial attack. Mrs. Mitchell has also been very ill. All are reported as being on the road to recovery.

Mrs. W. J. Robinson of Summerland with her little son, and Mr. Stanley Peacock, passed several days last week in Naramata as guests of Capt. and Mrs. Languedoc.

Mr. and Mrs. Fryer of Winnipeg are visiting Mr. W. S. Young of Naramata, Mrs. Fryer's father.

Mr. McLean of Summerland came over to Naramata on Tuesday and is spending a few days here.

Mr. Ewing of Penticton gave a very interesting address on "The Land of the Rising Sun" in Naramata Church on Monday evening. The lecture was illustrated by lantern slides. Mr. Ewing's kindness in coming from Penticton to give this lecture was much appreciated.

Mr. Baker, principal of the Naramata school, is expecting the arrival of his wife and child on Friday. They are coming to take up residence in Naramata, and will stay at the hotel until able to obtain a house.

Mr. W. B. Greene, who has been spending the winter in Penticton, is

now again resident in Naramata, where he will begin work on his fruit lot

Naramata will gain new residents next month in the arrival from Winnipeg of Mr. F. C. Cross and his wife and family, who are coming to take up permanent residence. Mr. Cross has a fruit lot here.

The girls' basketball team of Naramata will leave on Thursday morning for the Coast to play a series of games with the Vancouver teams. The Naramata girls who are to try their skill against the veteran teams at the Coast are Misses Estelle and Gwen Amaron, Misses Dorothy and Gladys Robinson, and Miss Margaret Simmons. They will be accompanied by their coach, Mr. Hilton Snyder, and by a number of friends from Naramata. Among these will be Mr. Frank Hughes, President of the N.G.A.C., Mr. and Mrs. Partridge, Miss Enid Rayner, and Mr. Steuart Allen. Arrangements have been made for a special ferry and motors to take the party up to the station at West Summerland to meet the Thursday morning train.

Naramata has lost valued citizens in the departure for England of Mr. and Mrs. J. Russell and their family. Mr. Russell is taking up a piece of land near Bristol which he will operate as a garden. They will be away some years, but look forward to returning to Naramata at some future time. Mr. and Mrs. Russell have been visited by many friends during the last few days, who have called to say goodbye and to express a hope for their speedy return to this district.

Visitors to Penticton on Tuesday afternoon were Mr. Hilton Snyder and Mr. Bartlett.

Miss Jean Robinson spent several days in Naramata last week, visiting Miss Katharine Robinson.

Mr. John Noyes, who has been seriously ill, was taken to the hospital in Penticton on Sunday. A telephone message during the week reported him doing well.

Several new buildings are to be erected in Naramata this summer. Mr. Geo. Routh is building on his fruit ranch. Material for a bungalow on Mrs. May's lot is now being assembled, a contract having been let to Minor & Wheelton, contractors. Others are in prospect.

Mr. Sherwood Davies of Summerland is in Naramata for a few days on a visit to his home.

### WENT HIM ONE BETTER.

It was in the smoking compartment of a Pullman, and an obviously self-satisfied little man had been doing most of the talking for some time.

"I tell you," he declared emphatically, "there is nothing like the good old American stock that goes right back to the beginning. Now—I don't like to boast, but facts are facts—an ancestor of mine signed the Declaration of Independence!"

"That so?" a young Jewish travelling man responded mildly. "Interesting, of course, but—well, one of my ancestors signed and certified to a rather more important and—older document."

"Nothing on earth more important than the Declaration!" the little man bristled. "What sort of a document are you talking about?"

"The Ten Commandments," was the gentle rejoinder.

Thirteen is always an unlucky number to have at a table, when there is only dinner for twelve.

Lady Visitor—So they sent your little boy to the reformatory, Mrs. Grey? What a shame!

Mrs. Grey—Yes, and he was such a good boy, too. Everything he stole he brought straight home to his mother!

### INDIVIDUAL RESPONSIBILITY.

Periods of depression would be much less disastrous if each individual member of the community understood the importance of having reserved resources of his own. After all is said that may be said of the obligations that rest upon society as a whole to provide for the individual, it remains to be said that there is an obligation upon the individual to avoid being a charge upon the community. A man may be willing to work and unable to find work in time of industrial depression without being quit of all responsibility for becoming a public charge. Each person should bear his share of the responsibility of providing against bad times, and not expect to throw up his hands in every period of stress and be rescued by others. Everybody is warned against the dangers and hardships of unemployment. The lessons of prudence, self-reliance, thrift, and provision for a rainy day, have always been taught, and always been practised by some and disregarded by others. The progress of society, the fact that employment is more regular and more remunerative, and the chance for independence better now than in the past, has been due to the former class, and it cannot be doubted that the necessity for individual initiative and foresight has been an essential factor in this progress.

Every plan that purposes to do away with this individual responsibility entirely must be viewed with misgivings. A regime of personal liberty involves personal responsibility. The freedom to go and come, to exercise choice, to take chances, to crowd into preferred occupations, to idle instead of toil, to spend instead of save, to indulge instead of deny the appetites, and all the familiar opportunities to make mistakes, imply responsibility. The results to the individual from one's choice must be different from the other. The community is concerned in every instance and abstract argument ceases for the time being in the presence of distress, but the serious question remains, how far should the community go in a sweeping offer to always provide for those who do not provide for themselves?

It is true that industrial organization is far from perfect; it is in fact a rather hit and miss affair. It was not made to order, the responsibility for it cannot be placed. This is so because of the liberty which belongs to each individual, and it can be made harmonious only as each individual learns to play his part in voluntary and efficient co-operation with the others, and to bear his share of the responsibility of finding his place.

### EXCHANGE.

### APPLICATIONS FOR GRAZING PERMITS UNDER GRAZING ACT 1919.

Applications for permits to graze livestock on the Crown range within each Grazing District of the Province of British Columbia during the grazing season of 1921 must be filed with the District Foresters at Cariboo, Cranbrook, Fort George, Kamloops, Nelson, Prince Rupert, Vancouver, Vernon or with the Commissioner of Grazing, Department of Lands at Victoria, B.C. on or before March 31, 1921.

Blank forms upon which to submit applications may be obtained from the District Foresters at the above named places or from the Department of Lands at Victoria.

The grazing of livestock on the Crown range without permit constitutes trespass, prohibited by law.

G. R. NADEN,  
Deputy Minister of Lands,  
Department of Lands,

January 24th, 1921. 26&29

### BENEFIT DANCE AT NARAMATA

The people of Naramata in general were instrumental in arranging a dance in the Union building on Wednesday night, the object being the raising of funds to assist in the re-establishment of the Rushberry business in suitable premises. We understand the proceeds will form the nucleus for a building or leasing fund, as may be required, and the whole of the receipts of the evening will be handed over without any deduction for expenses, the refreshments having been donated by the community, and the out of pocket expenses defrayed by the local G. W. V. A. A large turnout was a foregone conclusion, and Mrs. May, who was in charge of the pay desk, reports satisfactory financial receipts. Many visitors from Summerland were present, in addition to a full attendance of local dancers and friends.

### EVOLUTION UP TO DATE.

Two little girls were amusing each other by telling stories in turn. The elder began one as follows: "There was once a little boy, and he was an awful good little boy. In fact, he was so good that he grew up to be a woman."

### LANDS FOR SALE

13 Acres, of which 7 are planted to good varieties. Seven tons of Apricots in 1919. Bargain at \$4,000. 4 1/2 Acres good soil at Trout Creek. \$1,100.

## Surplus Stock Announcement

Having completed our annual stocktaking, we find we are still overstocked in some lines of Dry Goods. We have decided therefore to continue our 20 per cent. Cash Reduction Sale on all goods in this department. Some lines will be cut regardless of cost.

These include  
LADIES' COATS, LADIES' HATS,  
UMBRELLAS, ETC.

We also have some beautiful Travelling Rugs, which we are offering at a great sacrifice to clear. These can be put to many uses, such as for your car, or your cosy corner.

Prices Are Steady in

## MEN'S FURNISHINGS

We are making preparations now to remodel and fully stock this

### NEW DEPARTMENT

in a way that will be CREDITABLE TO THE COMMUNITY.

In the meantime we are offering some splendid bargains in UNDERWEAR, OVERALLS, and many other lines now in stock

## Grocery Prices Are Still Coming Down

and we are heartily glad of it. Prices have been so high that it has been unpleasant both for retailer and consumer. The causes of these reductions have been brought about not by local conditions but by far reaching trade conditions covering the continent.

Our price for Flour now is reduced to  
**\$3.20 per 49 lb. Sack.**

Crystal White Soap is worth buying to-day at  
**10c. per Cake.**

Beans, Rice, Sagó, Tapioca are all Reduced in Price.

## Commence Work on Irrigation System

(Continued from Page 1)  
 The Board asks for a total levy of \$20,000.

Councillor Scott was appointed a committee to prepare a preliminary report on the tax sale lands, sixty odd parcels, for which titles have recently been received from the registry office. The Reeve reported having seen William Ritchie and obtained his consent to serve as Police Commissioner if he received the appointment. The clerk was instructed to advise the government that the electorate had failed to elect a police commissioner, and to state that the Council recommended that Mr. Ritchie be appointed by the Lieutenant-Governor-in-Council to the vacancy.

Councillors J. A. Kirk and G. Thornber appointed a special committee for the purpose, submitted a report with certain recommendations covering the duties of the outside staff. This report was adopted, and no doubt the necessary resolutions to bring these recommendations into force will be put through at a later date.  
 Final reading was given the bylaw authorizing indemnity to Reeve and Councillors. After hearing complaints from A. C. Muir, Paradise Flat, with respect to water service, instructions were given to have position of the check valve on that pipe line changed, so that he may have constant service. A. Pentland wrote with respect to irrigation service through the Gray ditch. The engineer is now busy surveying this ditch, much of which must be rebuilt. Mr. Pentland will be so advised.

The Council adjourned at 10.30 p.m. to 2.30 on Wednesday the 16th.

Toronto—A new organization, to be known as the Daughters of Canada, with head office here, has been incorporated. The aims of the organization, it is stated in the letters patent granted by the Department of State, is "to develop a spirit of true Sae. is "to develop a spirit of true patriotism based on love and pride in country." They also propose to study the constitutional history and geography of Canada, to advance knowledge of sound domestic principles, to stimulate a love for Canadian art, music and literature in our schools and community centres, and "to welcome strangers within our gates, help them to understand our institutions and to encourage them to become citizens of Canada."

## The Maori Quartette In Song and Story

Tribal Customs Illustrated Here on Monday Next.

Maori development is the romance of civilization. The Maori Quartette, which is to appear in Summerland on the evening of February 21, is one of the most interesting organizations now before the public. They are native New Zealanders, representatives of the Maori tribesmen, the original New Zealanders of whose origin little is known—nothing in fact except that they are of Polynesian extraction and hundreds of years ago came somehow and from somewhere and settled in New Zealand.

Seventy years ago they settled all disputes by right of might and quite commonly killed and ate their vanquished enemies. To-day they elect their own people to sit in the New Zealand Parliament, educate their children and settle their differences in a civilized fashion.  
 The Maoris will give a delightful program, featuring the songs and legends of their native tribesmen and tracing the development of their race from their tribal battles of sixty years ago down to the memorable day in 1916, when they sent their first Maori division to take their places in the trenches in France.  
 The Maoris enact their tribal life on the platform. They visualize all of the customs of the home and of

the tribe in song and story. All through their delightful program runs the beautiful weird music of the South Sea Islands. The race is essentially musical. The company is personally directed by Mr. V. H. Papikura, who comes from the Ngapuhi tribe of the North Islands. He is a well known tenor of New Zealand and incidentally is an ordained minister. The New Zealanders wear their native garb during their program, which is most interesting from an educational as well as an artistic and musical standpoint. 29

## OKANAGAN POTATOES ARE SHIPPED BELOW COST

Potatoes are being shipped out from Armstrong in car load lots daily. Practically all consignments are sent to Calgary and other prairie points. Prices are low and, freight rates considered, the returns to growers are far below cost of production.

Large quantities of potatoes are on hand in the Northern Okanagan and the warm weather has been forcing stocks onto the markets.

The bulldog is a typical open-faced watch.

## YOUR "REVIEW."

We here use the word "your" advisedly, for is not your home-town paper "your paper, your "Review"? While the company publishing The Review is a private concern, the mission of the paper is essentially a broad public one. This is your paper, and reflects you as seen through the public eye. We aim to keep your paper in the van of paperdom in this great sunny South Okanagan. We do give you more reading matter—and reading matter that is of real local interest—but as papers are only after all a reflection of the public support received, and The Review being no exception in this respect, we must have the unstinted and loyal support of our business men in our advertising columns.
