District Horticulturist Warns Growers to be on the Watch. June Drop Heavy

FRUIT THINNING

Planning Second Excursion of Fruit Growers to Wenatchee Fruit District

Fruit crop conditions throughout the province are covered by his weekly news letter sent out by District Horticulturist W. T. Hunter last Saturday. The letter reads in part: Lower Mainland.

Weather conditions this week on the lower mainland are spoiling the early strawberries. Last week finished up cold and wet. This week considerable rain has fallen in showers, alternating with short spells of hot weather. Magoons are starting and with a little drier weather we expect a firmer berry to carry to eastern points.

The horticultural branch is conducting strawberry demonstrations this week at all berry shipping points on the lower mainland, and on account of the rush season many growers are being visited on their own patches.

As a result of the showery weather and the resultant mud splashed berries, growers are becoming more persuaded to the necessity of "strawing." Up to the present this has been neglected in many parts but there will be more of it done next year.

Salmon Arm.

Heavy rains have fallen during the past week, and the ground is thoroughly saturated.

Strawberries are just beginning to come in and there is every indication of a good crop. Other small fruits are in fine condition.

The drop has started in apples and looks like being very heavy. Delicious are dropping particularly heavily in most sections. Vegetable and grain crops are in excellent condition.

Vernon.

Rhubarb, asparagus and a few early strawberries are going forward.

The rains which have fallen in the Vernon district during the past week will have very beneficial effects on all growing crops, and their effect of lowering the temperature is aiding the hay and grain crops very considerably.

It has been noticed during the past few days by the horticultural branch that these same rains are having the effect of what may possibly prove to be a heavy infestation of apple scab, as many infestations are becoming quite noticeable on the leaves of apple trees. Growers will be well advised to get busy and apply their cover spray for scab control, following the Calyx application immediately. If allowed to go on and the showery weather continues there is a great possibility of a lot of scab infestation.

What is known as the "June drop" is now in progress among tree fruits, and it is quite evident there will be a heavy drop in most varieties of apples. Duchess, Wealthy and Rome Beauty seem to be three varieties which have set and will hold well. One or two other varieties could be placed on this list, and such varieties should be taken in hand immediately by the thinning gangs and this work pushed forward. Jonathans, Winesaps, Wagners and many other varieties are dropping quite heavily and it is hard at present to make any forecast regarding crop estimates. One thing can safely be said, we will not get the crop which was anticipated by many at the time the trees were in blossom.

Pears will apparently be a good crop. The stone fruits are not nearly as heavy as the early set of these fruits indicated. Cherries which are now going through the stoning period are dropping quite heavily and showing many undeveloped fruit.

The stoning period for plums and prunes is at present on, so we are not able at the present time to say anything definite as to this crop, but more on these two stone fruits can be given in next week's news letter.

A certain amount of frost injury due to the heavy spring frost of recent date is showing up on the developing fruits on certain locations. Drouth spot is showing up in many places. This trouble can no doubt

(Continued on Page 8)

At the threshold of normalcy. Fitzpatrick in St. Louis Post-Dispatch.

ANOTHER PUBLIC MEETING SOON

Board of Trade Orders Committee to Stay in Harness

Much Business Comes Before Regular Monthly Meeting

"Advertising Summerland" was the announced topic for discussion at the regular meeting of the board of trade Tuesday night. Many other subjects came up requiring attention. Some of these are mentioned under other headings in this issue. However some progress was made in that the board decided to have a fruit exhibit worthy of the district sent to the provincial fair, and a committee was named to take up the subject of issuing a folder or pamphlet.

Messrs. J. Shepherd, R. S. Jackson, C. A. Walter and Willis Walter were elected to membership.

The council of the board was instructed to appoint three delegates to represent the board at the irrigation convention at Vernon July 27-30.

A proposal from a motion picture concern to enter into a contract for an Okanagan film to cost \$1,000 was tabled.

A suggestion from Pentiction Good Roads Association to buy a road map issued by that organization for distribution by the Summerland board was filed. The map, while considered good advertising for Pentiction, was not suitable for Summerland purposes.

Supt. F. C. McNab of the C.P.R., in answer to a letter from the secretary, stated that the transparent sign picturing Summerland which had been displayed at Sicamous in a reversed position would be put right.

The local school situation was discussed at some length. Mr. A. E. Smith was asked to make a report for the board of trade committee on this subject. The general opinion seemed to be that another public meeting should be called, Messrs. J. R. Campbell, A. McLachlan and others supporting this proposal. The committee was instructed to carry on and call a public meeting when ready.

As a result of a proposal made by Ned Bentley, the board of trade passed a resolution asking the government to forbid the posting of signs on trees etc., along the highways. These signs are confusing and unsightly. The secretary was instructed to forward the resolution to other Valley boards seeking their endorsement and to have same laid before the associated boards of B. C.

The board decided to ask the municipal council to place road signs between Gartrell's corner, Peach Orchard, and the beginning of the upper Peachland road on Jones' Flat. It was pointed out that it was impossible for strangers and many of our citizens to find the way out.

Messrs. Morkill, White, Crossley, Kelley and McDonald were appointed a committee to go into the subject of issuing a board of trade pamphlet advertising Summerland and district.

It's a wise traveling man who knows when and where to stop.

It's surprising what a lot of noise masquerades as music.

ASKS IF COUNCIL WILL PAY SHARE

Intimation that Improving Upper Road Depends on Municipality

The municipality received a letter from Col. C. Donnelly, who is in charge of the roads in South Okanagan electoral district, asking what the municipality was prepared to spend as its proportion of opening the upper road between Summerland and Peachland. Several miles of this road are within Summerland municipal limits, the boundary being at about Van Hise's, and within which considerable work should be done to make the road reasonably safe.

Under the new road act, the municipalities are required to pay twenty five per cent. of the cost of construction and upkeep of primary highways. The lake shore road is in this grade. The municipal understood that the government was providing an emergency road at its own expense. The matter will come before the council next Tuesday.

NEW FIRM BUYS SUPPLY STOCK

Messrs. Simpson & Gowans Will Carry on Business Took Charge Monday

Two commercial men of Vancouver C. D. Simpson and J. Gowans, were the successful tenderers for the stock of the Summerland Supply Co. Ltd. They arrived here on Saturday morning and took possession of their purchase on Monday morning.

The store was closed the first of the week for stock taking, and has since been reopened.

A sale at bargain prices is announced in this number. Both men express themselves as delighted with the business prospects here, and are looking forward to doing a large volume of business.

A dinner that appeals to the eye doesn't always appeal to the stomach.

WILL EXHIBIT AT WESTMINSTER

Board of Trade Preparing to Enter in District Exhibit Class at Provincial Fair

Summerland will enter an exhibit in the district fruit exhibition class at the provincial fair to be held in New Westminster on September 12 to 17. A decision to this effect was reached by the board of trade on Tuesday, provided a man can be found who would take charge of the exhibit.

The exhibition association will make a grant of \$200 towards the expense of making the exhibit, and besides, offers district prizes of \$50, \$25 and \$10.

Last year plans were well advanced for sending such an exhibit, but at the last moment it was found impossible to find a person who would

ORDER ISSUED TO MAKE UPPER ROAD SAFE

Peachland and Summerland Urge Necessity of Maintaining Safe Communication

CLOSED ALL SUMMER

Slim Prospects of Lake Shore Drive Being Repaired Until Fall. Safe Road Must Be Provided

The Review learned from Mr. J. W. Jones, M.L.A., late last evening that District Engineer Gwyer had issued instructions yesterday to Col. Donnelly to further improve the southern end of the Summerland-Peachland upper road, the total expenditure not to exceed \$1,000.

Mr. W. M. Dryden, C. M. C., of Peachland, has been active in having a reasonably safe road opened between Peachland and Summerland following the washing out of the lake shore drive. Peachland council has put through a resolution urging the necessity of such a road, and wired the minister of public works to that effect. On Tuesday Mr. Dryden and Road Foreman Murdin were visitors to Summerland and interviewed the reeve on the subject.

The question was introduced by the reeve at the board of trade meeting that evening, when Mr. J. W. Jones, M. L. A., who had come down over the -road in company with Messrs. Dryden and Murdin, told of the condition of the road. From Peachland to Greata the road was in reasonably good condition. There is about a mile near Van Hise's which should be relocated and graded and the road from there south widened. Two or three thousand dollars would put the road in good shape, but on Saturday Foreman Arkell and Murdin had received instructions not to do any more work. Mr. Jones got in touch with Engineer Gwyer and learned that Victoria had given instructions to spend no more money on the upper road, and further that it would be a matter of several months before the lake shore drive could again be used. The situation was serious as travel was dangerous with the present condition of the upper road, and further this would seriously interfere with tourist traffic. Up to the present \$1,600 had been spent on the upper road. The road grant for South Okanagan district was \$35,000, and an additional \$12,000 from the Dominion road grant will be forthcoming. Peachland had taken action, Kelowna would do so at once, and he felt that Summerland should press upon the department the necessity of rendering the upper road safe, otherwise there would be serious accidents.

The meeting was a unit in insisting that the road should be made safe, and Secretary MacDonald, and R. E. White were appointed a committee to prepare a telegram to be sent to the minister of public works, and mail a copy of same to Engineer Gwyer.

While returning from attending county court at Pentiction on Tuesday, Mr. W. C. Kelley, accompanied by several others, had a narrow escape from a plunge in the lake. The accident occurred about three quarters of a mile south of the experimental farm pumping plant. Meeting a car going south, Mr. Kelley turned toward the edge of the road, and in doing so the outer wheels broke through the road. While the car did not overturn it stopped at a dangerous angle, and it was necessary to get a team of horses before the car could be gotten back on the road. With him in the car were Mrs. Kelley, Mrs. Rau and Donovan Simpson.

Good fortune nearly always finds a man in a receptive mood.

take charge of it, and the board of trade's plan fell through.

On Tuesday night, Messrs. J. Tait, R. H. Helmer, A. McLachlan, R. C. Lipsett and C. J. Huddleston were appointed a committee to look up a man, to ascertain the expenses necessary and to report at the next meeting of the board. The names of several well known citizens were advanced as possible persons to under-

CHANGE IN RURAL ROUTE SCHEDULED

Courier Ordered to Await Coast Mails

Citizens residing on the rural route will be receiving their mail a little later in the day than has been the case up to the present. An order has been given instructing the courier to delay departure from the post office long enough to take care of the incoming morning mail, including the papers from the coast. This he must do unless the train is more than an hour late.

This order will delay the working of the mail and will give the courier perhaps as much as three hours work on many mornings before he can start out on the route.

It is understood that this change has been made in order to satisfy those on the rural route who are subscribing to coast dailies.

Mr. W. H. Hayes, president, and Mr. R. H. Helmer, a director of the Storage Co., went down to Vancouver on Sunday to attend to some business matters in connection with the new storage plant.

INSTITUTE OFFERS SCHOOL PRIZE

Women Considering Formation of Parent-Teacher Association

A cash prize of \$5 will be awarded by the Summerland Women's Institute to the pupil making the highest marks in the entrance examinations of Summerland consolidated schools. This decision was made at the regular meeting of the institute held last Friday afternoon in the parlor of the Lakeside church.

Mrs. H. K. Lott addressed the institute on the Parent-Teacher Association movement. She told of the good work being carried on in the coast cities through these associations.

Mrs. J. D. Welsh very ably led the discussion on this subject, and spoke of what is known in Toronto as the "Art League," carrying on a similar great work.

A committee was appointed to meet with a committee from the West Summerland institute to consider the advisability of forming a Parent-Teacher Association here.

FINANCIAL NEEDS ARE NOW SOUGHT

Minister of Finance Sends Out Questionnaires to Civic Bodies

Questionnaires pertaining to the financial needs of municipalities of the province are now being sent out by the Hon. John Hart, minister of finance, of Victoria, one of which was received by the municipal council and was read at the last meeting.

This action on part of the finance minister is due to promises made by him and Premier Oliver some time ago that the government would fully investigate the financial position of the different cities. The reports must be in by June 30 and Municipal Clerk Nixon is now getting the required information.

TOWN PUPILS TO TROUT CREEK

Possible Course of School Board. Make-shift Arrangements Costly

It is not improbable that a number of down town children will be conveyed to the Trout Creek Point school next term. The school board is wrestling with the difficult problem of finding accommodation for all children of school age who will be ready to attend school next September.

A member of the board recently pointed out to The Review that one way in which partial relief may be obtained will be to refuse admittance to children under seven years of age. It is predicted that the make shift arrangements that will be necessary will cost considerable, and that the money thus spent will be largely a waste.

BICYCLE RIDER HURT BY HORSE

Run Down by Horse and Rider, Jap Receives Serious Injuries

Last Friday evening K. Mori was knocked off his bicycle by a horse and rider, and suffered serious injuries. The accident occurred at Dale's corner shortly after dark, the bicycle rider being run down by the horse. He was hurried to the hospital and the doctor summoned and it was found that he was suffering from concussion of the brain and a broken collar bone as well as other injuries. The injured man is about twenty five years of age and works with Jimmie Shimizu, a fellow Japanese. The rider of the horse is said to be Dick Holding.

GETS SALARY INCREASE

His Summerland friends will be pleased to learn that Mr. C. W. Lees' abilities as a high school principal have been further recognized by the Kelowna school board in that they have tendered him another increase in salary which brings this up to \$2,700 a year.

WITH MADE-IN-B.C. MOVEMENT HERE

Summerland Board of Trade Planning for Public Meeting to Encourage Home Industries

Summerland has definitely lined up with the Made-in-B. C. movement. The board of trade at its meeting on Tuesday endorsed the campaign for the purchase of the products of B. C. farms and factories. This decision followed the reading of correspondence from the manager of the Made-in-B. C. campaign and a short address by Mr. J. W. Jones, M.L.A.

Mr. Jones said the movement was of vital importance. We all know of the heavy rate of exchange, the employment situation and the idle industries of the province. Every loyal citizen should demand that the goods he purchases are produced within the empire, in Canada, in B. C., and best of all, in Summerland. Kelowna, he said, is arranging to hold a big public meeting in the interests of this campaign. He told of Okanagan stores offering tomatoes packed in Ontario, and canned fruits put up in the United States.

Pres. Freeman told of learning recently of articles manufactured in this province which he had not known were made in B. C. These were just as good as those made at a distance and should be advertised.

The consumer as well as the retailer should be educated. The whole matter hangs on advertising, declared Mr. A. E. Smith. As the government has assisted some of these industries by advancing capital they should assist them in an advertising campaign.

R. S. Jackson told of manufacturers in Vancouver of which the general public did not know the existence.

After further general discussion, the council of the board of trade was authorized to arrange for a public meeting, when further information and outside speakers will be provided.

It's a poor lawyer who can't construe a law in more ways than one.

It is better to fall out than to be kicked out.

NEW MINISTER IN CABINET OF SASKATCHEWAN

Hon. C. M. Hamilton has been appointed minister of highways in Premier Martin's reorganized Saskatchewan government.

WOMEN MEET IN CONVENTION

District Gathering of Institutes of Okanagan and North Thompson Valleys

ORGANIZE PROVINCE

Plan Floated to Have Provincial Body as in Other Parts of Canada

Endorsement was given the proposal to organize a provincial Women's Institute by the Okanagan and North Thompson Women's Institute conference held last week in Vernon. The Summerland institutes were represented by Mrs. G. J. C. White, Mrs. O. F. Zimmerman, Mrs. F. W. Andrew and Mrs. John Tait.

There was effected closer organization of the district and officers and directors elected, these being: president, Miss Reekie, Kelowna; vice-president, Mrs. Maxwell, Rutland; secretary-treasurer, Mrs. Pixton, Okanagan Center; directors, Mrs. Buchanan, Peachland; Mrs. Shanks, Wood Lake and Mrs. Matlew, Oyama.

At present local institutions hold district conferences. It is now proposed to further organize these and to group them all under one provincial body. British Columbia is the only province without such a body and its lack has occasioned inability to cooperate with the federal organization. The department of agriculture will be asked to finance a bi-annual provincial conference, and it is proposed that each district shall finance its own.

On the first day Miss M. A. McKenzie, director of public health nursing, British Columbia, gave an address emphasizing the need in her work of having the vision to see an ideal rehabilitated community toward which to strive.

On Tuesday afternoon Mr. J. H. McVety, inspector of employment agencies in B. C., spoke to the conference on the vital question of the employment of women and girls for fruit picking. He stated that the government employment office in Vancouver had placed 6,000 women. This address was followed by one on Parent-Teacher work by Mr. T. H. Calder, principal of the Vernon high school, who expressed the opinion that such a system was more effective in the larger cities while the institute was more fitted to carry on the work in smaller centers.

In the evening Dr. R. B. Hills of Pentiction gave an interesting address on the Canadian navy, pointing out the necessity of its upkeep for protection in commerce as well as in war.

Mr. Laidman of Vernon explained to the conference the "Made-in-B. C." campaign. Mr. Laidman is the Okanagan representative to this movement.

On Wednesday a very excellent paper prepared by Miss Marion Cartwright of the West Summerland Institute, was read, the subject being "Our Immigration Laws and How They are Enforced." Miss Cartwright is a member of the standing committee on immigration.

"Legislation for Women and Children" was the subject of another interesting paper given by Mrs. McGregor, covering recently enacted laws.

Mrs. W. C. W. Fosberry, who is a member of the standing committee for agriculture, presented a paper on "Agriculture for Women," which was pronounced a very good paper indeed, and was well received. This and Miss Cartwright's paper were both read by Mrs. G. J. C. White.

Mrs. McGregor of Pentiction was again nominated as representative on the provincial advisory board which position was held for a number of years by Mrs. Lipsett of Summerland.

The conference will be held at Kelowna next year.

The delegates speak highly of the manner in which they were entertained by the Vernon institute. The program was interspersed with musical numbers and the delegates were treated to a drive through the Coldstream and to a banquet and dance.

Reports from Alberta are that rains were general throughout the province last week and the crop conditions have accordingly been greatly improved. A record production is now looked for.

In Orchard and Garden

Helpful Advice and Suggestions by Recognized Authorities

ORIENTALS HOLD MUCH B. C. LAND

1080 Asiatics Control 26,918 Acres, According to Survey Just Made

VICTORIA, June 8.—A survey just completed by officials of the department of agriculture to determine the number of Orientals holding land in the province has disclosed the facts that there are 1080 Asiatics controlling 26,918 acres, of which 367 acres are orchard lands, 2341 acres of small fruit, 10,659 acres of truck farms and 3077 acres land used for mixed farming.

There are 492 Japanese and 116 Chinese owning land to the extent of 14,050 acres. In orchard lands the Japanese own 176 acres whilst the Chinese only own 14 acres. In small fruits the Japanese own 2096 acres and the Chinese 25 acres. In truck farming and mixed farming the Chinese own much larger areas, having 1632 acres of truck farms as against 281 acres owned by Japanese, and in mixed farming 1228 acres as compared with 631 acres owned by the Japanese.

Chinese Truck Farms
In leased lands 103 Japanese control 1781 acres whilst 369 Chinese control 11,087 acres, making a total acreage of 12,868. In orchard lands the Japanese have under lease 139 acres and the Chinese 37 acres. In small fruit the Japanese hold under lease 155 acres and the Chinese 64 acres. In truck farming the amount of land under lease to Japanese is 560 acres, whilst the Chinese rent 8184 acres.

In dairy farming the Japanese are shown as holding under lease 434 acres whilst the returns do not indicate the Chinese as carrying on that class of agriculture. In mixed farming also the Japanese fall far behind the Chinese in the amount of land held by lease. Under this heading the Japanese control only 236 acres, whilst the Chinese control 1581 acres.

Japanese Enter Dairying
It might be noted that in the dairy phase of agriculture the Chinese are not reported as holding any land either as owners or tenants. On the other hand the Japanese are shown as being the owners of 80 acres used for dairying purposes.

A detailed report covering each district of the province is being forwarded to Hon. S. F. Tolmie, federal minister of agriculture, for use at the Imperial conference to be held in London this month.

GAS STORAGE FOR APPLES IS APPROVED

In storing apples there is a very interesting alternative to cold storage, known as "gas storage." The apples are placed in an air tight chamber filled with the gas produced by the respiration of the apples themselves. An electric instrument is used to determine whether at any time the proportion of carbon dioxide in this gas becomes excessive, and when that condition occurs air is admitted to dilute the gas. The air is kept in slow circulation by its own temperature variations and means are taken to remove excess moisture. It is stated that this system doubles the time during which apples can be kept in good condition and that the cost of working is very much below that of any kind of cold storage. The merits of the system are being closely studied by the British Investigation Board.

BERRY GROWERS TO HAVE LARGE PLANT

New Westminster.—The cold storage plant of the St. Mungo Canning Company has been purchased by the B. C. Berry Growers' Association, and is already under operation by the new owners for the storage of strawberries from Mission, Hatzic and other Fraser Valley points. The price at which the property changed hands is not announced, but the plant cost in the neighborhood of \$70,000, when it was built and equipped six years ago, at a time when materials were in the main cheaper than they are today.

The plant will also be used as a concentration and distributing point, berries being shipped here and then re-shipped to the wholesalers in their fresh state when the occasion arises.

The main object of the purchasers is to put berries in storage for jam purposes and for canning, and to prevent glutting of the market in years when there is a heavy surplus over the requirements of the fresh fruit market and consequent disastrously

WASHINGTON HAS NEW ORCHARD PEST

The following, clipped from the Oroville Gazette, tells of the appearance of a new pest just south of the border.

"W. H. Sexson reports the appearance of another pest in the shape of a small worm from half an inch to an inch and a half in length that feeds upon the tender leaves of vegetables and trees. This worm is of a light greenish color with two lighter green stripes down the back. They have appeared on Mr. Sexson's tract in East Oroville by the millions. The voracious creeper started in on weeds, stripping the Russian thistle to the stocks, and then switched their attention to vegetables and trees. Mr. Sexson had two acres of cantaloupes growing in a most flourishing condition. These little fellows with a stevedore appetite hit that patch and there are not ten hills left. Some idea may be formed of the vastness of this army of destroyers when it is stated that from a small tree not two feet high Mr. Sexson picked off 129 of these worms, all of them busy denuding the tree of leaves. Mr. Sexson discovered that the trees can be protected by binding a strip of wood around the trunks, as Mr. Worm with all his agility, cannot crawl over such a barrier. The presence of the worm is reported in other parts of the valley. Joe Miles has had some experience with the nasty little pests on his place at Ellisforde, but in his case, the visitors so far have confined their depredations to growing beets and other young tender plants. It would seem that if it is not one thing it is something else, and the worm is the latest trial."

PRESERVING BY FREEZING

The preserving of fresh fruit by freezing will soon become of practical commercial value. The United States Government for several years has been investigating this method, and reports that such fruits as strawberries, raspberries, logan berries, blueberries, currants and cherries are now being frozen.

The process is simple. The fruit in the same crates in which it is marketed is subjected to a temperature of about 10 degrees F. Soft fruit is usually subjected to a lower degree. The fruit can be kept in storage as long as the temperature is maintained. The frozen product must, however, be used as soon as it is thawed, as thawing breaks down the tissues and allows the fruit to decay rapidly. The frozen fruit is in every way comparable to the fresh product.

Freezing does not do away with mould, though it will not develop as long as the fruit remains at the temperatures advised.

HOUSING OF POULTRY

Not all who keep chickens either in town or country know how to secure the best results from their flocks. For lack of knowledge the chicks often develop into spindle legged, small bodied, poor laying creatures. And yet any amount of instructive literature is published and can be had without cost by applying to the publications branch of the department of agriculture at Ottawa. Housing shares in importance with feeding if the best results are to be gained. In this connection it is interesting to observe that a revised edition of the bulletin on poultry house construction by F. C. Elford, Dominion Poultry Husbandman, has just been issued by the department of agriculture at Ottawa, to meet the constantly increasing demand for information coming from almost every class of the community. The bulletin, which is based on trials of various kinds of poultry houses in different parts of Canada, treats of the subject clearly and comprehensively. Plans and building instructions, with illustrations and diagrams, are so given as to enable anyone to erect such a poultry house as may be desired.

"Why didn't you send your man to mend my electric door bell, as you promised?"

"He did go, madam, but as he rang three times and got no answer, he concluded there was nobody at home."

KILLING SHADE TREES

Undesirable shade trees, such as Norway poplar and Balm of Gilead may be killed by girdling the trees about four feet from the ground; then the bark should be stripped to the roots. This will cause the tree and its roots to die; later the entire tree may be removed and the stump grubbed out.

When a tree is sawed off at the ground without girdling, the stump and roots of the poplar variety immediately send out hundreds of small sprouts which are difficult to destroy.—Ohio Experiment Station.

WHEN NOAH WON OUT

"You remember Noah had to work a long time on that ark. It was up hill business, too, at best, building a boat way out on dry land, while the local anvil-and-hammer club sat around spitting tobacco juice on his lumber, whittling up his pine boards with their jackknives, and telling him what a fool he was for expecting a big rain in a country that was too dry to grow alfalfa. But he kept at it. Finally the flood came and every mother's son of the croakers was drowned. This is the only instance we know, either in sacred or profane history, where a bunch of knockers got exactly what was coming to them.—Ex.

CANADA'S DOLLAR AND UNCLE SAM

Letter is Losing More Through Present Exchange Situation Than is Canada

The superstition that Americans make a profit out of the premium on their funds in Canada dies hard, in spite of the evidence to the contrary. Everyone realizes that Canadian trade with Europe is falling off, due to the depreciation of European funds in Canada. Many of course do not realize that the currency of one country has no legal status in another country, and that a Canadian dollar is not a legal dollar in the United States, but merely a promise to pay a dollar in Canada.

Similarly an American dollar in is only a promise to pay, which must be collected in the United States. It is at a premium in Canada because our currency is depreciated to the extent of our inability to redeem our promises to pay in specie. This is no fault of the United States, and they are doing their best to correct it by the purchase of Canadian securities. Of the total Canadian bond sales of \$324,914,687 last year more than two thirds, or \$223,084,000, were sold in the United States. This does not look as if they were pinching our dollar to hear it squeal. True they hope for a profit from the purchase of these securities, but neither they nor we are in business for fun. They pay the market price and the Canadian sellers are satisfied.

The present premium on New York funds in Canada is a distinct detriment to American trade with Canada, and the fact that a number of hotels and shops in that country are advertising that Canadian money will be accepted at par is sufficient evidence of their desire to retain it, even foregoing a considerable part of their legitimate profit to do so.

Much of the criticism here is an account of the demand for certain classes of American goods in Canada, which helps to swell the balance of trade against us, but this is a matter, due entirely to the belief of the public that they are getting better value in quality or style for their money, and while this belief lasts, so will the trade, unless of course the premium makes the prices too high. Those who prefer American wares must be willing to buy even at the retail prices in Canada, which must allow for the duty as well as the premium on American funds.—The Financial Post.

THE LOCAL NEWSPAPER

The local newspaper must always be the mainstay of any advertising campaign designed to catch the eye of the masses of the people—the buying public. By no other means can so large a proportion of the best trade of the community be reached. The local merchant should not get this idea:

"Oh, my dear fellow, I can not lay off my clerk without losing him; I cannot change my location without losing it; I cannot suspend my insurance without losing my protection—but advertising, that is different! Advertising is a faithful dog, I can kick him into the street whenever I feel like it and he wags his tail, comes back when I want to wipe my feet upon him."

This is not true. Advertising is not different. It is a great force in business and many great and many foolish claims are made for it, but it is not greater, not more powerful than any other factor of business. If any good is to come from it it must be kept on the job.

The local merchant should set aside a definite sum to be spent in a year. His expenditure should be based upon a percentage of last year's business and he should spend it systematically. Don't let the question of "copy" frighten him to death; don't let him get the idea that "copy is the whole thing to advertising. To be sure there is a great difference in the effectiveness of advertisements; but if he will forget all about fine writing or being smart and clever; if he will forget the big sounding, pat phrases which have been used so often that they mean nothing, and sit down and talk to the people of his community, about his store and his stock and his service, he will write a good ad. without knowing it.

Is there any reason in the world why the local people should buy the merchandise he sells. Let him tell them the reason; and tell them again and keep on telling them. That's advertising—good advertising. Has he anything in stock that Mrs. Jones or Miss Smith or Hank Brown would be interested in? Let him tell them about it, and tell them about something else next week, and keep on telling them, until they know beyond all doubt that he has just about the "niftiest" stock of merchandise ever brought together in his neck of the woods.

That's advertising—good advertising.

THE WOMEN'S INSTITUTES.

The West Summerland Women's Institute held its monthly meeting on Friday, June 10, at 3 p.m. in the Parish Hall. The roll call answered by quotations from James Whitcomb Riley.

The committee arranging the prize list for the Institute section of the fall fair reported that this had been done. Mrs. Solly read an appeal from the Red Cross asking for a membership canvass of the district. This was arranged for, Mrs. Solly kindly consenting to act as secretary-treasurer.

Mrs. Lott gave a splendid paper on the Parent-Teachers' Association, which was followed by a discussion led by Mrs. Zimmerman and Mrs. McGown, which all proved very interesting to those present.

The meeting then adjourned and was followed by afternoon tea.

Mrs. Zimmerman and Mrs. G. J. Coulter White were the delegates appointed from West Summerland to be present at the Okanagan and North Thompson conference held in Vernon this week.

Mrs. F. W. Andrew and Mrs. Jack Tait were elected to represent the Summerland Institute.

STEEL MAY SOON BE LAID ON C.N.R. LINE

People directly interested in the construction of the proposed C.N.R. railroad between Kamloops and Kelowna are of the opinion that the long talked of branch will be built this season. Thirty carloads of steel have arrived at Kamloops and construction engineers have left Ottawa for the district. This, together with encouraging word received from Mr. J. A. McKelvie, M.P., gives ample grounds for the contention that operations will begin soon.

While many have given up the idea that the road will come for years yet, others have maintained all along that, in view of the large district it would serve, the matter would receive the attention of the officials at once. They now point to the arrival of the steel and other movements as substantiating their contention.

Star gazing pays the astronomers, anyway.

Justice is just what the unjust are anxious to avoid.

And there's the rest cure; but don't take it too often.

A nobody is a man who is always boasting about his ancestors.

Smiles cost less than electric lights and they make the home brighter.

SASKATCHEWAN STEERS FOR GLASGOW

Eighty head of prime beef raised on the prison farm at Prince Albert. The average weight of the eighty head is 1,385 pounds. It is hoped that they will be a fine advertisement of the cattle fattening possibilities of the Canadian northwest.

CULLING THE FLOCK

The hatching season should now be over on the well regulated poultry plant and attention directed to culling the flock to make room for the growing youngsters.

In the first place there should be vigorously culled from all flocks all birds that show any physical defects such as crooked beaks, backs or breasts, excessively long toe nails, sunken eyes and long "crow" head, knock knees or other sign of poor stamina and low vitality.

At this season, if they have not already been discarded, the hens over two years old, unless possessing the characters of extra high production and retained as breeders on this account, should be marketed as soon as they stop laying, show signs of broodiness or moulting.

When trap nests are used, this condition is readily noticeable, but if not, the hens that have stopped laying can be easily distinguished by their shrinking comb and fading color of face and wattles, also by the contraction of the pelvic bones.

These bones, slightly protruding on each side of the vent, remain spread to the width of about three fingers placed perpendicularly between them, as long as the hen is laying. In the poor producer they will be found closed to the width of only one finger and when the latter condition is evident early in the season, when she should be still producing, it is a fairly good indication that the bird has given up too soon and is not the type that makes the high record.

Vigor, health and high producing qualities are shown by distinctly visible characters and all birds that do not carry these qualities in a marked degree should disappear from the flock.

The high producing characters of primary significance are: full, red comb, bright, bulging eye, long keel bone, with lots of width between stern extremity and pelvic bones showing depth of body with capacity for feed and room for the producing organs; fine pelvic bones spread well apart and an elastic, velvet texture to the skin of the abdomen.

Hens that moult late in the season and in the yellow skinned varieties those individuals that fade out white in the sections that show pigment, namely the skin, beak, shank and ear lobe, also indicate the possibility of high production and should be kept in preference to those that do not carry these qualities.

There are more intricate decisive characters that help in the selection of good from poor layers, but the foregoing will be of some use in an elementary way, to the farmer in selecting his breeders to carry over to the next season. If carefully followed, they will eliminate most of the undesirable specimens that are a source of expense without profit and rob the deserving hens of the flock of their creditable record.

W. T. SCOTT,
Poultry Division, Experimental Farm, Ottawa.

It's an easy matter to obtain peace; all you have to do is to let the other fellow have his way.

Synopsis of Land Act Amendments

Minimum price of first-class land reduced to \$5 an acre; second-class to \$2.50 an acre.
Pre-emption now confined to surveyed lands only.
Records will be granted covering only land suitable for agricultural purposes and which is non-timber land.

Partnership pre-emptions abolished but parties of not more than four may arrange for adjacent pre-emptions with joint residence, but each making necessary improvements on respective claims.

Pre-emptors must occupy claims for five years and make improvements to value of \$10 per acre, including clearing and cultivation of at least 5 acres before receiving Crown Grant.

Where pre-emptor in occupation not less than 3 years, and has made proportionate improvements, he may, because of ill health, or other cause, be granted intermediate certificate of improvement and transfer his claim.

Records without permanent residence may be issued, provided applicant makes improvements to extent of \$500 per annum and records same each year. Failure to make improvements or record same will operate as forfeiture. Title cannot be obtained in less than 5 years, and improvements of \$10 per acre, including 5 acres cleared and cultivated, and residence of at least 2 years are required.
Pre-emptor holding Crown grant may record another pre-emption, if he requires land in conjunction with his farm, without actual occupation, provided statutory improvements made and residence maintained on Crown granted land.

Unsurveyed areas, not exceeding 20 acres, may be leased as homesteads; title to be obtained after fulfilling residential, and improvement conditions.

For grazing and industrial purposes areas exceeding 640 acres may be leased by one person or company. Mill, factory or industrial sites on timber land not exceeding 40 acres may be purchased; conditions include payment of stumpage.

Natural hay meadows inaccessible by existing roads may be purchased conditional upon construction of a road to them. Rebate of one-half of cost of road, not exceeding half of purchase price, is made.

PRE-EMPTORS' FREE GRANTS ACT

The scope of this Act is enlarged to include all persons joining and serving with His Majesty's Forces. The time within which the heirs or devisees of a deceased pre-emptor may apply for title under this Act is extended from one year from the death of such person, as formerly, until one year after the conclusion of the late war. This privilege is also made retroactive.

No fees relating to pre-emptions are due or payable by soldiers on pre-emptions recorded after June 26, 1918. Taxes are remitted for 5 years. Provision for return of moneys accrued, due and been paid since August 4, 1914, on account of payments, fees or taxes on soldiers' pre-emptions.

Interest on agreements to purchase town or city lots held by members of Allied Forces, or dependents, acquired direct or indirect, remitted from enlistment to March 31, 1920.
SUB-PURCHASERS OF CROWN LANDS
Provision made for issuance of Crown grants to sub-purchasers of Crown Lands, acquiring rights from purchasers who failed to complete purchase, involving forfeiture, on fulfillment of conditions of purchase, interest and taxes. Where sub-purchasers do not claim whole or original parcel, purchase price due and taxes may be distributed proportionately over whole area. Applications must be made by May 1, 1920.

GRAZING
Grazing Act, 1919, for systematic development of livestock industry provides for grazing districts and range administration under Commission. Annual grazing permits issued based on numbers ranged; priority for established owners. Stock owners may form associations for range management. Free, or partially free, permits for settlers, campers or travellers, up to ten head.

The Summerland Review

Established August, 1908

Published at Summerland, B.C., every Friday by THE REVIEW PUBLISHING COMPANY, LIMITED

Ralph E. White, Editor and Manager

Subscription Rates—In British Empire, in advance, \$2.50 per year; six months, \$1.40. To U.S.A. and other countries, \$3.00 per year.

Advertising Rate Cards and information respecting territory and samples of paper mailed upon request, or may be seen at the office of any advertising agency recognized by the Canadian Press Association.

Advertisers must have copy in by Wednesday noon in order to insure changes for standing advertisements. New display advertising copy can be accepted one day later.

Correspondence—Letters addressed to the Editor and intended for publication must be short and legibly written on one side of the paper only. The longer an article, the shorter its chance of insertion. All communications must bear the name of the writer, not necessarily for publication. The publication or rejection of articles is a matter entirely in the discretion of the Editor. No responsibility is assumed by the paper for the opinions expressed by correspondents.

FRIDAY, JUNE 24, 1921.

THE "WEEKLY" IN OUR NATIONAL LIFE

The value and importance of the weekly newspaper is recognized and a splendid tribute is paid to the weekly newspaper men of Canada and the part they play in our national life by the Vancouver Daily Province. The editorial was occasioned by the recent gathering of weekly newspaper editors and publishers of Canada in convention in the coast metropolis. The Province says:

"Vancouver extends a hearty welcome to the representatives of the weekly press of Canada, who have honored this city by holding their convention here. To the weekly journals the daily press must yield the precedence on the score of seniority and of numbers. Weekly journals were published in Canada more than eighty years before the first daily appeared. Everywhere on this continent the weekly has been the pioneer newspaper. It followed close on the discovery of gold, the occupation of the prairie, the establishment of the first settlements on the edge of the forests. A recent cabinet minister hauled his newspaper plant by ox team eight hundred miles to the place of publication. It would not surprise the country to hear that an outfit had been sent to Fort Norman by airship. Such has been the spirit of enterprise in the weekly press. There is nothing to beat it in modern daily journalism. The weekly press is spreading the light in hundreds of Canadian communities today, where a daily paper is hardly ever seen, and is thus continuing to perform the service begun a hundred and seventy years ago.

Not only from the nature of his service, but also on the score of his varied attainments and resources is the successful producer of a weekly paper a person of note. He must know how to do more things well than any person employed on the daily press is required to perform. He is a writer, a reporter, a business man and artificer. Those who conduct weekly papers sometimes make merry over their various accomplishments. But in fact, the men who bring out a good country or town newspaper, covering adequately the activities and interests in their district, and are able to make the enterprise a moderate success, must possess sound business qualities, good judgment, adaptability and patient industry. To say nothing of power to write well on many topics. We say in no spirit of conventional compliment, much less in any patronizing mood, that some of the best newspaper writing in Canada and the United States is found in the weekly newspapers. This means the regular newspapers of the towns and villages, and not especially the journals of opinion and of classes and of interests which appear in the larger cities. The influence of George Brown, Joseph Howe, W. L. McKenzie, D'Arcy McGee, Sir Francis Hincks and many other journalist politicians was largely gained through their weekly message. In his later days Goldwin Smith preferred to address the people through a weekly paper.

During the last year or two a considerable mortality has been reported among the Canadian daily papers. The weeklies seem to have a greater power of endurance. A reaction was due from the tendency to turn flourishing, serviceable and popular weeklies into small and badly supported dailies. Those well established and well conducted weekly journals, whose proprietors resisted this temptation, have in many cases justified their conservatism by the greater satisfaction they gave the average reader, and by the greater return they bring their owner."

FRUIT GROWERS ARE OPTIMISTIC

The first copy of a crop report of the fruit commissioners' branch of the department of agriculture at Ottawa, reached The Review desk this week. The report is published in pamphlet form and contains a fund of information regarding present conditions in the various fruit sections of Canada.

Fruit Commissioner Baxter, in his opening remarks, says there has been a marked increase in the interest being taken in fruit growing in Canada. He declares that there is a feeling of optimism among orchard owners as a result of prospects for a bumper crop and the understanding reached by most growers that even bumper crops may be disposed of at a profitable price if the fruit is of good quality.

In a section of the report devoted to apple prospects for the present season attention is drawn to Summerland and several other Okanagan Valley points.

Besides giving a comparative table showing the average maximum and minimum wholesale prices at which apples sold in Toronto, Ottawa and Montreal during the season of 1918-19, 1919-20, 1920-21, many other points are brought to the attention of the reader. Reference is made also, to the great fruit exhibit planned to take place in Britain between November 2nd and 15th, and the commissioner believes this to be Canada's opportunity to advertise the unexcelled quality of her fruit and to increase her sales in the United Kingdom.

IRRIGATION RATES AND LAND TAXES

"We understand that the future of your irrigation system is still uncertain."

"According to your financial statement your chief public utility shows a large deficit."

These and similar comments are frequently received by municipal authorities from financial houses or possible buyers

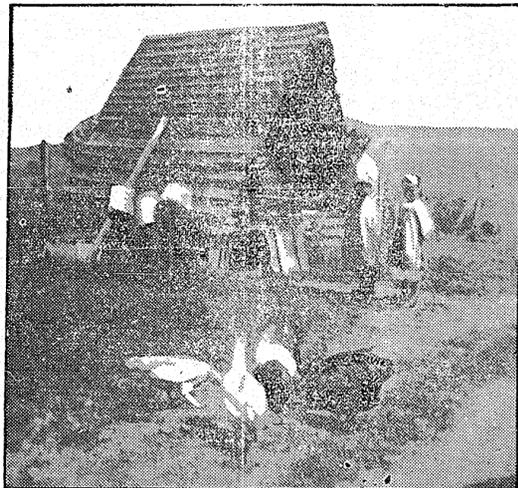

of Summerland municipal bonds. The fact that the irrigation rates are not sufficient to meet the annual operating and other charges against the system is without doubt leaving a bad, if wrong, impression with such people.

True, the deficit is made up through taxes which has been the policy of the municipality since the irrigation system was acquired, but the fact cannot be gainsaid that the deficit shown each year is having a marked depressing effect on the market value of the municipal loan issues.

Looking at this matter from the tax point of view, we find that it has the same ill effect. We are putting ourselves in a false position before enquirers and any who are contemplating settling in Summerland. The prospective buyer is more concerned in the tax rate than he is in the price he is to pay for water, in fact, if you talk with people in sections up and down this valley where water is short, one would conclude that the water user is quite willing to pay almost any price to be assured of an ample supply of water throughout the season, but that same landowner protests against an unduly high tax on his land. Were Summerland to make its irrigation system practically self supporting the lowered tax rate would be an excellent advertisement, and we would be put in an enviable position in this respect in comparison with practically all other municipalities in anyway similarly situated.

More and more it is becoming apparent that we are doing ourselves an injustice and in a measure deceiving ourselves when we continue to hold the irrigation rate to the basis of \$5 an acre.

The Spell of Quebec's Roadside Oven

By courtesy of the C.P.R. A Quebec Roadside Oven.

No housewife in America is so independent of the price of coal and oil as the habitant woman of Quebec, with an out-of-door brick oven at her beck and call.

These roadside-ovens, — and nobody knows exactly what whim or fancy possessed the Quebecois mind for carrying his baking apparatus so far from home, unless it was fear of the roaring fire which must be set up in order to bake the large quantity of bread necessary to fill the many mouths of the grande famille, — are not only landmarks in Quebec but indications of the habitant housewife's hospitality. They seem to say to the passer-by, "Now you know you are in Quebec, and Quebec is the land of home-made bread." Mais oui. "Entrez vous. For a mere song Madame will cut you some thick slices and bring out a pitcher of milk." Oui, the grand oven is undoubtedly the symbol of Quebec! There is a friendly look about these old wayside ovens which arises out of the fact that they are made by hand and fit in perfectly with the landscape and the scheme of life in general obtaining in this province, so pre-eminently the land of the home-made.

In many months of tramping in Quebec we have encountered scores of these ovens. But because they are home-made, each one is different. Each architect builds to suit his own fancy or else to come in to the possibilities as to shape and size contained in the material at hand. Leaks are overcome with smudges of plaster and added coats of white wash. till the oven often resembles

—a frosted cake. Or else an extra roof is attempted with bits of old board, and then the oven resembles some queer little maison . . . a doll's house for the children to play in, or a large kernel for le chien that draws the little cart. Seeing these ovens for the first time you fancy yourself somewhere in the Old-World. But then a similar fancy seizes you about everything in Quebec, which in atmosphere, is all foreign and different. On all occasions, even in the matter of these ovens, Quebec is just herself. It is a Quebec loaf baked here and not the "little bread" of France, nor yet its "wardstick" just a four or five pound loaf that will cut the generous slice that the child at play, or garçon helping with the hay, finds satisfaction in.

These ovens along the Quebec roadside stand for two important factors in our national life. They stand for rural life, for farm life and the development of the country parts. And they stand for family life without which attempts at rural development have proved vain. The women of Quebec are among the most hard working women in Canada and among the most contented. Given a little house with a curved roof, a tiny balcony and an out-of-door oven by the roadside, your habitant woman asks nothing more of life except a host of children to eat her bread. Every day may be "baking day" for all she cares with grain growing in her own fields, for flour, and an oven of character that can always be stretched to hold another loaf.

Women's high cut white canvas dress boots, regular \$3.50 to \$4.25

SALE - - - \$1.95

Bin of men's Fleetfoot running shoes, reg. \$2.00 to \$2.75

SALE - - - \$1.25

Bin of slightly soiled women's white canvas boots, Bed-fords and pumps, regular \$2.75 to \$5.00

SALE - - - \$1.95 up

The above are very exceptional value and are the leading sellers today, but they are remnant pairs and will be disposed of at a sacrifice which will require only one glance to convince the most skeptical.

In addition are many bargains in leather boots and shoes which haste to catch the print has not permitted time to enumerate. If you see you will buy.

Beer's Shoe Store

PASSING EVENTS

LOCAL, PERSONAL, SOCIAL & OTHERWISE

Mrs. P. S. Roe has as her guests her aunt, Mrs. G. B. Moore and niece, Gladys Moore, who arrived here from Vancouver last Friday.

There has been a small but appreciable fall in the level of the lake, probably three inches from the high point reached nearly two weeks ago.

Mrs. Basil Steuart will receive Thursday, June 30, from three to six. Her mother, Mrs. Dan Cassel, of Vancouver, will receive with her.

Messrs. Robertson & Partners who were awarded the contract for building a government road at Oliver, are subletting the work among two or three contractors.

Mrs. T. J. McAlpine went down to Vancouver last Saturday morning. She will represent the women of the local church at the Baptist convention which opens this week.

Miss Laura Caruthers is again spending the summer here. She is employed with R. Pollock in his fruit shipping business and is living at the home of her aunt, Mrs. Vanderburgh.

A basket picnic to take the form of a reunion will be held by the Summerland people formerly residents of Castor, Alberta. This reunion will be held on July 1 at the experimental station.

The pastor, Rev. James Dunlop, and Messrs. W. C. Kelley and H. H. Elsey are delegates from Summerland church to the Baptist convention to be held during the next few days at Vancouver.

This is the last week of school. Some of the classes have already been dismissed. Third year high school pupils are writing their matriculation exams, and the entrance class is also writing.

Dr. H. S. Timberlake will be at the Summerland Drug Co. next Tuesday, June 28th, from 9 to 12 in the Summerland store, and from 1:30 to 5:30 at West Summerland store. Patients wishing to see him would do well to make their appointment at the earliest possible date.

Two police court cases identical in form were heard on Thursday by Major Hutton. Alec. Steven and Andrew Fenwick were each charged with allowing a stallion over one year old to run at large. Both were found guilty with extenuating circumstances and were fined \$5 and costs. The court intimated that but for the extenuating circumstances their fines would have been much heavier.

Mrs. Dan Cassel of Vancouver is here on a visit with her daughter, Mrs. Basil Steuart.

Mrs. C. E. Pineo returned on Monday from Vancouver where she has been visiting since last October.

Mr. K. Shimizu, who is working as a missionary among his fellow countrymen under Dr. S. S. Osterhout, superintendent of Oriental missions in Canada under the Methodist church, is a visitor in Summerland this week. He is arranging to hold a meeting of local Japanese in St. Andrews church next Sunday for the purpose of organizing a mission here.

His many friends will be pleased to learn that the name of A. W. Vanderburgh recently appeared in the list of students who passed the second year in medicine at Toronto University. Mr. Vanderburgh is spending his holidays here with his parents. Another Okanagan College boy, Harry Jennings, has also completed his second year in medicine at the same university.

Mr. and Mrs. Helmer were hosts at an exceedingly pleasant garden party and dance at the experimental station last Friday. The dance was held in the new pavilion, which was tastefully decorated with cut flowers. The gardens are now in full bloom and earlier guests were delighted with the pretty scene which met their view. Supper was served at Mrs. Helmer's home, after which the guests returned to the pavilion.

Many Summerland motorists who made his acquaintance while here this spring will be interested in the announcement in our advertising columns of the decision of Mr. Peckham, formerly of the Giant Motor Co. of Vancouver, to locate here. Mr. Peckham is taking the repair end of the Summerland Garage business. He has the reputation of being one of the foremost auto mechanics in the west, and Summerland motorists are fortunate in having his services.

In our issue of last week there was published a report of a police court case in which it was stated that James Fyffe was found guilty of having let down the bars of a pasture where the plaintiff's horses were grazing. We are now advised that the charge laid against Mr. Fyffe was with having "spoiled" the horses referred to, and that it was on this charge that Mr. Fyffe was found guilty, without any finding on the question of his having let down the bars or opened any fence deliberately of otherwise. The report was written on unquestioned information.

T. B. Young has recently unloaded his third car of Oldsmobile cars.

Mrs. Ibbitson is recovering from a serious illness and is again able to be about.

Mrs. H. H. Elsey returned last Thursday evening from a visit to her daughter in Duhamel, Alta.

Duncan Wood has returned to his mining claim at Hedley, the gold mine there again having started operation.

Mr. and Mrs. J. W. Richmond of Victoria arrived here on Wednesday to spend a vacation with her parents, Mr. and Mrs. Darkis.

Summerland was visited a few days ago by officials from the North West Fruit Exchange who were looking over the district to learn of conditions. They motored here from Vernon.

Theatre goers will learn with pleasure that the management of the Rialto Theatre have booked the famous picture, "Kismet," which will be screened in the local theatre on July 6 and 7.

Official announcement is made in this issue by the municipal tax collector that the poll tax is now due and collectable. Any who are liable to this tax who do not pay at the municipal office will be receiving a call from the constable.

Chairman Kirk of the water committee represented the municipality at a preliminary committee meeting in Kelowna on Wednesday when matters of importance to the district were prepared to be presented at the approaching irrigation convention.

Under the direction of the department, Inspector J. Tait is making a survey of the cellar and other fruit storage space of this district which includes Summerland, Naramata, Peachland and Westbank. A survey of crop prospects will be made at an early date.

Mr. J. McLachlan, editor of the Virden (Man.) Advance, was a recent visitor to Summerland on his way back from attending the press gathering at Vancouver. There are a number of Summerland people, formerly residents of Virden, who were glad to have a visit from Mr. McLachlan.

A party of some twenty eight ladies of the neighborhood, organized by Mrs. Angove and Mrs. Walden, gathered at the home of Capt. and Mrs. P. S. Roe last Saturday evening, and surprised their daughter, Miss Edith, with a shower of things greatly appreciated by a prospective bride. A very pleasant social evening was enjoyed, refreshments being served by the ladies. The marriage of Miss Roe to Mr. Harold Steers of Pentiction will take place on Saturday of this week at the home of her parents.

SPECIAL EXCURSION STEAMER

S. S. Okanagan will leave Kelowna at 7:30 a.m. for the Pentiction Dominion Day celebration, calling at Peachland, Summerland, Naramata and all intermediate points. Returning boat leaves Pentiction at 8 p.m. Special attractions this year.

The world's character actor in a stupendous ten-reel production costing half a million dollars to produce. Wednesday and Thursday, July 6-7.

Mrs. J. W. Naylor returned on Monday from a two or three weeks visit to Vancouver.

The burning out of a wire in the generator put churches and homes in darkness last Sunday evening the latter part of the usual hour for church service.

Next Week's Work in The Orchard

Fire blight is taking a turn for the worse. Watch your trees and for the guidance of our new comers we would say call in your inspector and ask him to demonstrate methods of handling this serious disease. And don't forget the combination disinfectant which can be procured from the drug stores.

Some cherries seen on Water Street, Vancouver, by the writer, which came from the interior of British Columbia were a positive disgrace to the name of "cherry." They were sitting by the side of prime Wenatchee Bings, and the advertising B. C. fruit got as the crowds passed by and saw them was the kind that kills all our efforts to get out literature and boost the Okanagan. That kind of stuff, whether cherries, plums, apples or any other commodity, never has paid, will not pay now and never will pay.

It is mighty bad hay weather but it is better to leave the hay in coils till well dried before stacking. A damp stack makes mouldy, dusty hay.

There never was a war in which each side couldn't prove the other the aggressor.

The wooden bridge crossing the Similkameen River south of Oroville has been condemned, and a guard placed in charge. The Oroville Gazette speaks of the guard letting through traffic across the bridge at driver's risk. A new concrete bridge will be built by the state to take the place of the condemned structure. The cost of the new bridge is placed at \$57,000.

Notice! To Advertisers and Review Readers

For the purpose of better service to advertisers and reading public, The Review will in future be issued on Thursday afternoon in time for distribution before the arrival of the evening boat, this arrangement being twenty four hours earlier than in the past.

The Review will therefore reach Naramata readers Thursday evening, while Peachland and the rural route will be served on Friday morning.

This change is made in order that advertisers may make announcements of Friday and Saturday bargains, and others who desire can make week end announcements to the public. Under the circumstances it is necessary to call the attention of all advertisers to the following:

Change for display advertisements must be received not later than Tuesday noon, to insure change being made. Classified advertisements and readers will be received until an early hour on day of publishing.

Believing that this alteration in date will better serve and represent the progressive spirit of this splendid community, the management ask the full co-operation of advertisers and contributors to that end.

EVERY MAN IN BUSINESS KNOWS

What HE Has to Sell—But Do Our Readers Know?

Peachland Doings
A Weekly Chronicle Furnished
By Our Local Representative.

Mr. K. C. Tallyour returned home on Wednesday morning from a short visit down the lake.

Mr. J. Wright spent a couple of days in the Kelowna district, returning home on Wednesday evening. He has been laid off for some days with poisoning in his thumb caused by a thorn.

Mr. Orr left on Wednesday to spend a few days in Pentiction. Since coming here he has made a great improvement by cleaning up and clearing the beach in front of his property. It was his intention to erect a small dwelling on the lot, but some changes make him uncertain whether or not to build at present.

Mrs. W. Charlton is enjoying a week's visit from her sister, Mrs. C. Griffiths and her husband, who came in from Vancouver last week.

After a pleasant visit in Pentiction with her mother and his wife, Mr. and Mrs. E. Law, Mrs. L. Vivian returned on Thursday.

Mr. J. Edgecombe returned home on Friday evening from a short business trip up the lake.

Peachland fruit growers were given some first hand instruction on fruit thinning on Thursday last. District Horticulturist W. T. Hunter and Inspector J. Tait gave a public demonstration in Mr. H. Hardy's orchard in the forenoon and in the afternoon in Major K. C. Tallyour's orchard in the Trepanier district. Quite a number of growers availed themselves of this privilege and went away feeling that this time was well spent. Not only did these gentlemen give a very interesting demonstration on the thinning of the fruit, but incidentally touched on many other phases of the orchardists' pleasures and difficulties. In demonstrating the thinning of an apple tree, Mr. Hunter advised eight inch spacing, but stated that while it was impossible for any person to thin a tree so that the fruit would all be eight inches apart, a person was forced to use common every day sense and erect the tree as a whole. That is to say, where you have a branch say 24 inches long, thin to leave three of the fruit to mature and in carrying out this system you averaged your crop on the tree at eight inch spacing. Mr. Hunter explained that some advocated leaving the largest fruit formed, and stated that other points being favorable, he would prefer to leave the largest, but explained that it did not always necessarily follow that the fruit which showed largest at time of thinning would be the largest at the finish, because there is a short space of time in the growth of the fruit when the growth for a time ceases, and very often in the next start off some of the smaller size would even up on the larger. One other point to consider was the formation of the fruit and in every case the fruit which showed any sign of blight or deformity should be the one to remove. Another and quite important point is the position of the fruit on the limb. The fruit which hangs in a downward position is the best to leave because it is less liable to be broken off by the wind. Quite a store of information was given on the matter of pests and valuable information given as to the kinds of spray for each and as well the proper time for the use of the spray.

Mrs. Keating and Mrs. Buchanan returned on Thursday last after attending the Women's Institute convention in Vernon.

After a visit of six months to coast cities, Mrs. E. Howell returned on Thursday last.

Miss Mary Vicary was a passenger south on Friday evening's boat for a short visit.

Mrs. J. Michael was a visitor to Kelowna on Saturday, returning on the evening boat.

Mrs. A. S. McCall of Gibson's Landing, who has been spending a few weeks in Pentiction with her daughter, Mrs. Allan McDonald, is visiting relatives here. She came up on Saturday morning's boat and after a short visit expects to leave for her home.

Miss Ilyva Murdin returned on Saturday after having taught school for a term in Saskatchewan. She expects to write on her "French" this week.

Mr. Joe Sanasac left last week on a short business trip to Seattle. His housekeeper recently left for the east.

On Thursday the Peachland base ball boys put on an afternoon and evening of amusement. The first event was a ball game, the score of which will have been noted in the last issue of The Review. The boys removed the old dressing room and refreshment booth from its former location at the old base ball grounds, placed it on the present grounds and served refreshments. In the evening they put on a concert, a box social and dance, all of which proved a howling success. The Summerland orchestra supplied the music in the evening. Quite a representation of Summerland folks were up for the ball game and a number of them stayed for the evening program.

Mrs. Leverington and family spent the week end in Summerland with Mr. Leverington who is working there.

Mr. C. Drake and Albert Town took the stage for Kelowna on Tuesday last, returning home by the evening boat.

Miss Jean Dryden received quite a surprise on Monday evening when a number of her young friends gathered at her home to help her celebrate her birthday. She had been successfully kept in the dark about the little affair until the crowd arrived at the house. A very enjoyable evening was spent in social intercourse and playing various games. Dainty refreshments were served, including ice cream, and the party broke up just before midnight by singing "For She's a Jolly Good Fellow."

Miss Dancer of Summerland was in town on Monday, spending part of the day with Mrs. E. House and Mrs. Howell, and part with Mr. and Mrs. N. S. Davidson. She returned home on the evening boat. Miss Dancer has just recently returned from a trip home to the Old Country.

Mrs. Crouch and Miss Turner of Pentiction are in town this week, the guests of Mrs. L. Vivian. Miss Turner is the representative of the Spir-ella Corset Co.

Mr. Orr has returned after a short visit with friends in Pentiction.

A little one has arrived to bless Rev. C. D. and Mrs. Clarke since they moved from here to the coast a few weeks ago. Mr. Clarke is expected here shortly to take his auto over.

Naramata News
Current Events of
Town and District

The earliest shipment of Bing cherries from the Okanagan was sent out on Wednesday, June 23, by the Naramata Fruit Union. The cherries were brought in from Mrs. Jack Young's ranch, and were of good size and fully ripe. The Governor Wood and Early Richmond varieties are being shipped in moderate quantities this week, but there will be increased activity at the packing house next week, when cherry picking will be in full swing at Mr. Lyons' fine cherry orchard and various others.

The engagement is announced of Miss Daisy Margaret Weller and Mr. Thomas Scaife, who carries on a boat manufacturing business in Naramata. Both are well known and liked in Naramata, and hearty congratulations are being extended to them by their many friends.

Mr. A. J. McKenzie has closed a deal for a twenty one acre fruit lot in the Belgo orchards back of Kelowna, about two miles from Rutland, planted to trees, just enough being left for a good building site. He will take off the crop and look after the place but does not expect to build or move over this year.

Mr. Mangin went down the lake on Saturday evening, returning Monday morning.

Miss Moran, from the Summerland Hospital, spent some time last week visiting at Mr. J. M. Robinson's.

As is customary, the proposed school bylaw was submitted to the municipal inspector at Victoria for his approval, following the decision of the council to re-submit it to the ratepayers as the result of the largely signed petition. In returning the bylaw, the inspector says that it appears to be in order, not having noted anything wrong with the presenting of the petition. This letter crossed another from Municipal Clerk Nixon pointing out that the bylaw was out of order because of the irregularity of the petition and informing him of the postponement of the balloting.

One of the best things out is a defunct tooth.

Mr. J. W. Jones, M.P.P., spent Wednesday in Naramata in the interests of the district.

The Ladies Aid spent a very pleasant afternoon at the home of Mrs. Lyons on Wednesday, business and sewing being followed by refreshments and a social hour. Mrs. Livingstone was the guest of the Society on this occasion, Mr. Livingstone, the new pastor also coming in at the latter part of the afternoon for tea. Arrangements were made for the holding of a church social at an early date on the church grounds. Several new members were received.

Dr. Wm. A. McConkey who has been practising his profession for the last year on the prairies, spent last week in Naramata visiting Mrs. McConkey and his children. He left on Tuesday morning's boat for points further up the lake.

Mr. Hugh Fraser and Mr. Hugh Russell, of Pentiction, were guests at the Syndica Hotel on Friday, June 17. They came up to attend the dance given at Paradise Ranch, returning later to Pentiction.

The Syndica Hotel has recently acquired a new Chinese cook in preparation for the summer trade which is expected to be fairly heavy.

Miss Bryden, who is in training for the nursing profession at Vancouver General Hospital, is visiting Mr. and Mrs. Fred Young. She will return on Friday to the coast.

Miss Moran, from the Summerland Hospital, spent some time last week visiting at Mr. J. M. Robinson's.

As is customary, the proposed school bylaw was submitted to the municipal inspector at Victoria for his approval, following the decision of the council to re-submit it to the ratepayers as the result of the largely signed petition. In returning the bylaw, the inspector says that it appears to be in order, not having noted anything wrong with the presenting of the petition. This letter crossed another from Municipal Clerk Nixon pointing out that the bylaw was out of order because of the irregularity of the petition and informing him of the postponement of the balloting.

CANADIAN HAPPENINGS

CHRONICLED IN BRIEF

In giving evidence before the fuel committee at Ottawa, Mr. J. G. Scott, chairman of the British Columbia Skeena Coal Co., stated that the coal field, situated on the upper Skeena, had a total area of about 1,200 square miles; that the quality of the coal is anthracite and semi-anthracite; the estimated quantity to exist on the 47 miles controlled by his company is very large, and that the building of 150 or 180 miles of railway would give this valuable deposit an outlet to the Prince Rupert, Victoria and Vancouver markets.

It is estimated that one thousand silos will be built in the three prairie provinces of Canada during this year. It is reported that one firm in the States, which has made a specialty of erecting silos, have secured orders for two hundred of these structures to be erected in Manitoba alone. Saskatchewan farmers will build several this season, while in the south west of Alberta, where fifty silos were erected last year, another fifty will be built this summer.

VANCOUVER.—Lumber business on the coast during the past couple of months has been very active. Shipments being made to Egypt, South America, India, United Kingdom and other distant countries. Recently, the H. R. McMillan Export Co. secured an order for 3,500,000 feet of ties for delivery at Buchang, China, in June. They have also an additional order from the same buyers for 1,500,000 feet of lumber, which is to be shipped at the same time the other order goes forward.

HALIFAX.—The 1921 Nova Scotia apple crop will be between one and a half to two million barrels, according to estimates made by A. E. McMahon, general manager United Fruit Co. of Nova Scotia, Ltd., and George E. Sanders, Dominion entomologist. Spraying is being carried on according to Mr. Sanders' recommendations, and the only influence that can prevent a full crop is a heavy black frost during blossom week.

ST. JOHN.—Grain shipments by the Canadian Pacific Railway through the port of St. John during the season just closed aggregated 9,414,000 bushels. Of this amount, 6,468,000 bushels were wheat, 498,000 bushels oats and the balance other grains. An interesting comparison is shown by statistics compiled in 1897-98. In that season, shipments totaled 3,583,321 bushels, of which quantity wheat absorbed 947,174 bushels, oats 1,565,481 bushels and the balance other grains.

Announcement is made by P. H. Fraser, managing director of the Canadian Iron, Steel Smelters, Ltd., that British capital has been secured to build and operate a large electric smelter in Vancouver. An initial 50 ton plant will be operating by August. The company has been given five thousand tons of ore by the provincial government as an inducement to commence operations. This ore will smelt about four thousand tons of pig iron.

Speaking at Prince George, Mr. B. Westcott of the immigration branch of the G. T. P., predicted greater settlement in central British Columbia this year than ever before.

The changing of the municipal irrigation system on Trout Creek Point in order to link it up with that of the Trout Creek Water Users' Community cost \$527.47, including 10 per cent. charge for overhead expenses. Under the agreement between the municipality and the water community, the former undertook to do the work at a cost not to exceed the estimate of \$522. The actual cost for labor and material was \$479.52, to which the municipal clerk added 10 per cent. for overhead.

What is believed to be the highest rental ever paid for a ranch property in the Creston Valley has been agreed upon for this year's hire of the Tornico ranch, which has been taken over for one year at a rental of \$1,000 for ten acres. This does not include the use of the house. The place is planted entirely to trees and small fruits.

VANCOUVER.—United States buyers are now in Vancouver bespeaking British Columbia logan berries for supplying their logan berry wine, flavoring and cider factories. Prohibition in the United States has created a great demand for fruit juices, and the juice of the logan berry has taken a popular place.

British Columbia business is solid; at heart British Columbia men and women are sound. We must show the world, each other, ourselves, what the B. C. spirit means. If we boost for B. C., work for B. C., and give our support to everything that is identified with B. C., we can make up our minds to go ahead.

VICTORIA.—British Columbia will use airplanes to fight forest fires this year. Twenty thousand dollars have been set aside by the government for this purpose. The planes will be used for locating the exact position of a fire and then rushing fire fighters and equipment to the scene.

LETHBRIDGE.—Wet gas, ascending like smoke from the drill hole, has been struck by the Imperial Oil Company's No. 2 well, south of Pincher Creek, and in the vicinity of Waterton Lake. Oil men are enthusiastic over the showings made in this district.

There is a possibility of an Angora woolen industry being started on Vancouver Island, utilizing the wool from the Angora rabbit, which, it is claimed, can be spun into the finest and softest wool. The rabbits from which the test was made were bred at Prospect Lake, a short distance from Victoria.

Business in British Columbia is getting into its stride again. It is setting a steady pace that it can keep. Let us swing along with it by getting behind the industries in our midst. If the manufacturer and farmer are prosperous, so will everybody else share in the prosperity.

PRINCE RUPERT.—During the first two weeks of May approximately one million eight hundred thousand pounds of halibut were caught on the fishing banks of this coast. Of this catch all but two hundred thousand pounds entered this port.

INTERCROPPING THE YOUNG ORCHARDS

One of the difficulties of fruit growing, either as a main industry or as an incidental to general farming, is the length of time that must elapse before the orchard begins to yield returns. When, as in some sections this spring, a freeze destroys or greatly reduces the expected crop, the loss to many growers, including those who expected to harvest their first fruit in 1921, is likely to be serious. The loss under some conditions can be partly offset and other benefits can be gained by growing vegetable crops between the rows of young fruit trees, say specialists of the United States department of agriculture.

Vegetables Between the Rows
Experienced orchardists frequently find it advantageous to grow crops between the tree rows until the trees reach bearing age. After bearing begins it is impracticable to "double crop" an orchard. As a rule, intercropping cannot be practised in a peach orchard after the third season from planting. Six to eight years is usually the limit for an apple orchard, the exact time depending on the variety, vigor and growth, and other factors. Further the trees will usually shade the ground too much for the growing of vegetable crops by the time the ages mentioned are reached.

In an "off year," with an orchard that was expected to come into bearing for the first time, many fruit growers will find it to their advantage to plant crops of corn, beans or peas, between the orchard rows. The growing of potatoes in an orchard is a doubtful practice, since the digging of them amounts to practically a late cultivation of the ground and under some conditions this might stimulate a late growth of the trees, which would be undesirable. In this way the farmer can utilize about half the space of his orchard land without injury to the trees or seriously hampering the temporary crop. Tomatoes and other truck crops may also be grown in the orchard. These are sometimes classed as "catch crops"—crops planted for a quick growth.

Where such crops are planted, it is well first to make a hasty survey of the operations of the other farmers in the vicinity and of the available market, since often where similar conditions prevail throughout an entire locality there is a tendency for many farmers to enter on a certain line of temporary agriculture, with the result that the supply far exceeds the local demand. A little foresight may prevent disappointment.

These rows between the trees are somewhat more difficult to cultivate than in the open field, and may require considerable hand work, but in many cases the crops which are planted yield a comfortable profit. The intercropping of young orchards has an additional purpose besides the mere direct financial gain.

Not His Name
In Dublin a zealous policeman caught a cab driver in the act of driving recklessly. The officer stopped him and said: "What's your name?" "Ye'd better try and find out," said the driver peevishly. "Sure, and I will," said the policeman, as he went round to the side of the cab where the name ought to have been painted; but the letters had been rubbed off. "Aha!" cried the officer. "Now ye'll git yerself into worse disgrace than ever. Yer name seems to be obliterated." "Ye're wrong!" shouted the driver triumphantly. "'Tis O'Sullivan!"

"Getting busy" often takes a hard fall out of a fit of blues. Sometimes you see a woman who looks pretty when she is angry.

It furnishes an incentive to keep the orchard cultivated, and as a rule this is highly desirable from the standpoint of the trees.

Sowed Crops
Profit may sometimes be found in a sowed crop. Buckwheat is often a good thing when sowed among young trees. The buckwheat may not pay to harvest for grain, but if mowed before fully mature it makes a good mulch, or if permitted to mature, enough grain may be obtained to materially cut down the expenditure for poultry feed. Buckwheat can be sowed in June or even in July and still make a satisfactory growth. Field peas, cowpeas and various other crops that make good forage can be used as occasion suggests, and the soil be improved thereby.

The fruit grower should realize that it is the abuse rather than the use of double cropping systems that may result adversely to the trees. And again, an interplanted crop which is to be harvested and not used entirely for soil improvement, should be looked upon as a means of reducing the expense of maintaining the trees rather than a crop which represents a definite cash income.

Instruction for the Young
Yells from the nursery brought the mother, who found the baby gleefully pulling Billy's curls. "Never mind, darling," she comforted, "Baby doesn't know how it hurts."

Half an hour later wild shrieks from the baby made her run again to the nursery. "Why, Billy," she cried, "what is the matter with baby?" "Nothing, mother," said Billy, calmly, "only now she knows."—Tit-Bits.

Surely Not
Inspector: "Do you teach observation?"
Teacher: "Yes."
Inspector: "Then I will test the class. Now children, shut your eyes and sit still." Following this the inspector made a slow whistling sort of noise, and followed with, "Now, children, what did I do?"
For some time there was no answer, but ultimately one little boy piped out: "Kissed teacher."

A burnt speculator dreads the hot air.

LAND REGISTRY ACT

TO ALL WHOM IT MAY CONCERN
Re Lot 2, Block 7, Map 44, Peachland.

WHEREAS proof of loss of certificate of title No. 14851A, issued to George Needham and covering the above land has been filed in this office, Notice is hereby given that at the expiration of one month from the first publication hereof, I shall issue a duplicate of the said Certificate of Title unless in the meantime valid objection thereto be made to me in writing. DATED at the Land Registry Office, Kamsloops, B. C., the 8th June A. D., 1921.

Corporation of the District of Summerland.

POLL TAX

A Poll Tax of \$5.00 for the current year from male persons in the Municipality above the age of 18 years and who have been resident in the Povice over one month and who are not liable to pay municipal taxes on land is due and payable either to the undersigned or to the Municipal Constable.

C. E. PINEO,
Collector.

Municipal Office,
West Summerland,
21st June, 1921.

We Are Selling Cheaper Mileage

You may get extraordinary mileage out of any one tire—but that's not the way to figure mileage. Get the average of mileage given by a pair of tires or a set—and you will get nearer to the actual cost of mileage to be charged to the upkeep of your car. It's just because we've taken the trouble to figure values that way, that we recommend Ames Holden "Auto-Shoes."

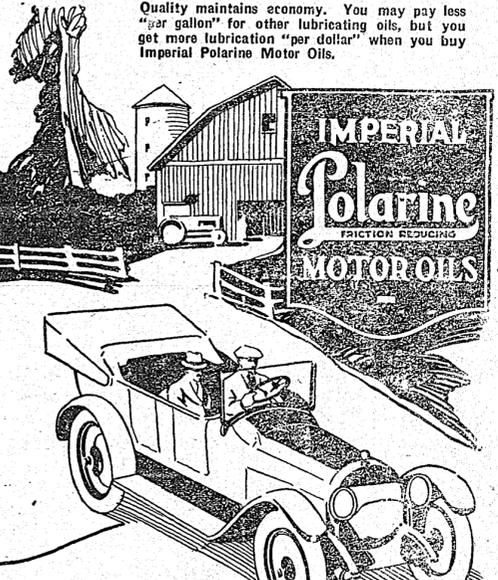

We know they are giving real mileage over the worst roads in the country and their "average" performance leaves no doubt in our minds that Ames Holden "Auto-Shoes" will give you the cheapest mileage you can buy. And they are guaranteed without time or mileage limits. Drop in and let us show you and tell you about

AMES HOLDEN "AUTO-SHOES"
Cord and Fabric Tires in all Standard Sizes

Quality maintains economy. You may pay less "per gallon" for other lubricating oils, but you get more lubrication "per dollar" when you buy Imperial Polarine Motor Oils.

IMPERIAL Polarine MOTOR OILS

CUTS OPERATING COSTS

THE economy of using Imperial Polarine Motor Oils extends over practically every item of motor operation.

The lubrication afforded at every friction point and the gas-tight piston-to-cylinder seal means a big saving in fuel bills and a noticeable increase of power.

Through perfect protection of all motor parts, undue repair bills are avoided and depreciation is greatly reduced. By using Imperial Polarine Motor Oils you can save dollars this year on maintenance alone. Besides, you realize more profit and greater usefulness from your car.

Always use the grade of Imperial Polarine recommended on our Charts for your type of motor. See Charts at your dealer's or write to 56 Church Street, Toronto, for a copy of our interesting booklet, "Automotive Lubrication," which contains the complete Chart of Recommendations.

IMPERIAL OIL LIMITED
BRANCHES IN ALL CITIES

WE GIVE IMPERIAL Polarine CRANK-CASE SERVICE

For a Clean, Efficient Motor

Dealers displaying this sign will thoroughly clean the old oil and the grit and the dirt out of your crank-case; will flush your motor crank-case with Imperial Flushing Oil and refill it with fresh lubricating oil. Your crank-case should be cleaned every 1,000 miles or less. It means more economy and more satisfaction to employ Imperial Polarine Crank-Case Cleaning Service.

G. H. INGLIS & CO.

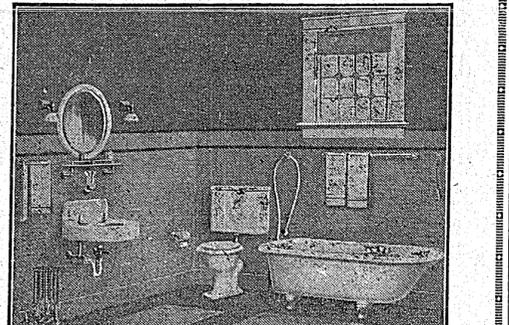

ELEVEN ACRES, \$4,500.00
Eleven acres: six and a half raw land, good soil, some of this is waste land, four and a half planted and bearing, mostly apples (McIntosh and Spitz), a few cherries. On main flume and main road. East side of Lake.
\$1,000.00 Cash.

FOUR AND A HALF ACRES WITH COTTAGE \$5,000.00
Four and a half acres: all planted, two acres old trees, balance in four year old trees. Five room cottage.

TEN ACRES, \$5,000.00
Ten acres: approximately 4 acres apples, balance planted in alfalfa.

Curtain lectures should be delivered behind the scenes.

HUMIDITY FAVORS SPREAD OF PESTS

(Continued from Page 1)
be traced to malnutrition from some source or another.
There has been a heavy infestation of the blossom form of fire blight this season in many districts. Although a lot of this will cause no further trouble, very careful watch should be given to the trees by all growers where fire blight is showing, and on any indication of the disease staying active and travelling in the wood, cutting should be immediately commenced, making sure that where the work is done it is done carefully and the disinfectants necessary for the tools and wood are used to save further spread from the tools.
Kelowna.

The weather during the past week has been changeable. Slight showers have fallen and the nights have been cold.

The outbreak of fire blight, as reported last week, has become more general. Although in many cases it is only a twig infection, growers would be well advised to keep a close watch in case of this becoming more active. The only method to adopt then is to cut well back on the affected branches.

Droth spot on McIntosh has again showed in some orchards. It is interesting to note that Delicious apples are also affected. In some cases whole trees are affected while in others it is only showing up on a few apples. At the time of writing we are planning out a campaign to ascertain the causes of droth spot and also the remedy.

A heavy June drop is taking place on almost all varieties. Stone fruits are, however, showing up well. Tomatoes are looking well at the present stage but there has been considerable damage to the onion crop by

the onion maggot.
Penticton and Keremeos.
During the past week the weather has been somewhat cool and showery. Apples are dropping rather more heavily than was expected, but the trees are carrying in almost every case a good load. At Keremeos Governor Wood and Early Richmond cherries are ripe and some Black Tartarians are being sold on the local market. Tomatoes set out in this district are going ahead fast.
The fire blight infestation from present appearances does not seem to be as serious as at first thought, but every precaution will have to be taken to keep the outbreak under control.

Summerland.
The many local showers of the past week have greatly benefited the vegetable crops, although the nights are still keeping cool.

Summerland had a hail shower which caused some slight damage to the apples.

Fire blight is showing up slightly in some orchards. Trout Creek section suffered to some extent with blossom blight.

Shipments of cherries, (Governor Wood) commenced on Monday, June 13, being twelve days earlier than last year.

The June drop in apples has been fairly heavy in all sections.

Thinning Demonstrations.
The thinning demonstrations conducted by Mr. W. T. Hunter in the South Okanagan the past week, have proved of great interest to the growers in the districts where they have been held, and judging by the attendance, have been much appreciated. At Penticton there was an attendance of 90 and at Summerland an attendance of 100.

Of the growers' excursion to Wenatchee Mr. Hunter says in part: The orchards of Wenatchee are reported as being in very high class condition at this time. The trees

by their vigorous foliage and growth and by the splendid crop which they are setting, give every promise of upholding that high standard which they have established. This existing condition very conclusively proves to us the soundness of their soil cultural methods. The Wenatchee growers have all realized that to obtain maximum returns on their investment and operating expenses, it is imperative that very great attention must be paid at all times to their soil.
Thinning is now in full swing and all the orchardists are, as usual, devoting very considerable time to this important operation which must not be neglected. The British Columbia party were much impressed with the attitude of the Wenatchee growers towards this question.

Growers of the Okanagan Valley should keep in mind the fact that a second party will be conducted to the Wenatchee district by the horticultural branch early in July. All who have visited Wenatchee report the trip well worth taking, as the information obtained at first hand has been of inestimable value to them.

SUMMERLAND WEATHER REPORT

Below is a report furnished by the Dominion Experimental Station here for the week ending Tuesday:

| | Max. | Min. | Rain | Wind | S.S. |

But, having a bank account with us, he can do all this by mail. Consult the Manager.

THE DOMINION BANK

Summerland and West Summerland Branches,

O. F. ZIMMERMAN, Manager.

Consumers of electric power in the municipality of Penticton are put to serious inconvenience through the last mishap to the semi Diesel engine installed in the power plant there last year. It is stated that \$3,500 will be required to repair the damage done in the last smash up. The municipality is looking around with the object of devising some method of carrying on until the Kootenay power is available. Using the steam engine in the saw mill to help carry the night load has been suggested.

Give a little more than you promise, but don't promise too much.

Love is blind until it bumps into an eye opener.

A NEW GARAGE

Messrs. C. V. Nesbitt and G. M. Forster, automobile mechanics of Vancouver, hereby inform the public of Summerland and vicinity that they have taken a lease of the R. H. English building on the west side of Shaughnessy Ave., which they are having remodelled, and will open as a garage on or about July 1.

Tires, Accessories, Gasoline, Oils, etc., will be stocked

F. M. Black, treasurer, and F. J. Collyer, director, who have been sent to England and the continent by United Grain Growers to find an increased market for farmers' cooperative shipments of cattle. Seeking new markets for western cattle now practically excluded from the United States through tariff legislation, Mr. F. J. Collyer, a director, and Mr. F. M. Black, treasurer of United Grain Growers Limited, hope to make arrangements so farmers' cooperative shipments of cattle can be carried through to Old Country markets. They are also to search out an outlet for western beef on the continent of Europe, wherever conditions are settled enough to make trade likely.

In the few weeks which have elapsed since the United States imposed a tariff of thirty per cent. on all cattle entering that country, prices on Canadian live stock markets have fallen severely. This is a time of year when the run of cattle is light and the result on prices of the heavy run of cattle that begins in the fall is bound to be serious. Consequently the farmers' organizations are making every effort to find an outlet for export cattle before the fall commences.
