

# The Summerland Review

DEVOTED TO THE INTERESTS OF SUMMERLAND, PEACHLAND AND NARAMATA

Vol. 14, No. 50, Whole No. 753.

SUMMERLAND, B.C., FRIDAY, JULY 14, 1922.

\$2.50, Payable in Advance

## Opening Main Reservoir Next Week is Probable

Foreman Tomlin Reports Trout Creek Very Low—Conserving Supply.

### BUILD WEIRS.

First of Those Required by Water Board to be Built at Once.

According to the order of the water board, which sat here this spring, the municipality must build measuring weirs below its storage dams and at the intakes of the main ditches. These must be finished by June of next year.

At a special meeting of the council, held Saturday night, it was decided that the measuring weir at Trout Creek head waters should be built at once, and Coun. Johnston volunteered to take a crew of men up on Tuesday of this week to put in a Ceppoletti weir a short distance below the main dam. Two gauges will be put in, one at the weir and one inside No. 1, the main dam.

An engineer's report was quoted, showing that this dam holds 1,000 acre feet of water and with the tributary dams the total volume in reserve there is 1,666 acre feet.

Foreman Tomlin was present and reported that Trout Creek was very low and asked whether he should at once draw on storage, or wait a few days. He stated that he was curtailing the supply and shutting down both north and south mains at night in order to help maintain the supply in the reservoir, in which the water also was exceptionally low. It was decided that the main storage dams be not opened for the present. Coun. Johnston said that he was going to the head of Aeneas Creek on Saturday and would let out the water there so that it would come down into the Garnett Valley dam, and he would cross over to Deer Lake and open the beaver dam on it, which would increase the flow in Trout creek. As soon as he went up to the head waters of Trout creek this week, he would go to Whitehead Lake and release whatever water was available there. By the time these supplies are exhausted, and if there has not been rain sufficient to meet irrigation needs, water will be let down from the main reservoir. For some days water has been flowing from the Garnett Valley dam to supply the Jones' Flat section.

While the storage water is going over the weir to be built at head waters it will be necessary to record the flow and men will be put there to strengthen one of the dams while they are making these records.

Reeve Campbell brought up the question of providing further storage. (Continued on Page 8)

### FIND CODLING MOTH; GET GOVT REWARD

### Horticultural Officers Ask Co-operation of Public in Campaign.

Announcement is made by W. T. Hunter, provincial horticulturist, that the department will give substantial rewards to persons detecting codling moth.

For the detection of a proven infestation a reward of \$100 will be paid.

For the detection of a proven infestation adjacent to existing quarantine areas a reward of \$20 will be given.

By means of these rewards which are payable to any and all persons so long as they are not officials of the department, the government hopes to make codling moth detectives out of all fruit growers and packers.

The struggle against the codling moth in the Okanagan Valley is becoming a serious one and the department is waging an energetic fight to keep this pest from spreading.

Persons finding evidence of the existence of the codling moth in local orchards of fruit are urged to communicate with the provincial horticultural officer here. Steps will at once be taken to examine and trace the evidence and where it is found that there is a local infestation, a reward of \$100 will be paid if it is a new outbreak. In case it is an outbreak adjacent to a quarantine district, such as adjacent to the Experimental Farm, a reward of \$20 will be paid.

### MARRON LAKE DAM FORMALLY OPENED

The formal opening of the new dam at Marron Lake, constructed for the storage of water for the Kaleden irrigation system, took place recently, the ceremony being performed by Mrs. Frank Harrison, of Kaleden. There was a large crowd present to witness the ceremony, after which light refreshments were served.

The dam is 23 feet high, 240 feet long and 165 feet thick at the bottom and 15 feet wide at the top, reinforced with concrete. It has a concrete outlet culvert 24 inches square and a 30-inch spillway to take care of flood water. It is estimated that the reservoir created by this dam will supply storage capacity far in excess of the needs of Kaleden, but the surplus will be used on other areas of land in the district, which will be opened up for orchard purposes later.

The dam was built by Robertson & Partners, Ltd., general contractors and engineers, Vancouver, who erected the Summerland Fruit Storage building last year. The firm now has a contract for a large dam at Ocean Falls for the Pacific Mills, Ltd.

### DONATIONS TO THE HOSPITAL

Donations received during June by the hospital as below, are gratefully acknowledged by the matron: Mr. G. Gray, 2 doz. eggs; Mrs. McLaren, old linen; Mrs. Barnard, 1 qt. milk; Women's Institute, cold meat; Mr. W. Johnson, 2 1/2 qts. ice cream; Mr. McLachlan, large orchard box lettuce; Mrs. Snider, 2 qts. strawberries; Dr. Lipsett, lettuce; Capt. Creese, lettuce; Mr. Pollock, cherries.

### WATER BAILIFF IS MISTREATED

### Case Against Japanese Fails For Lack of Identification.

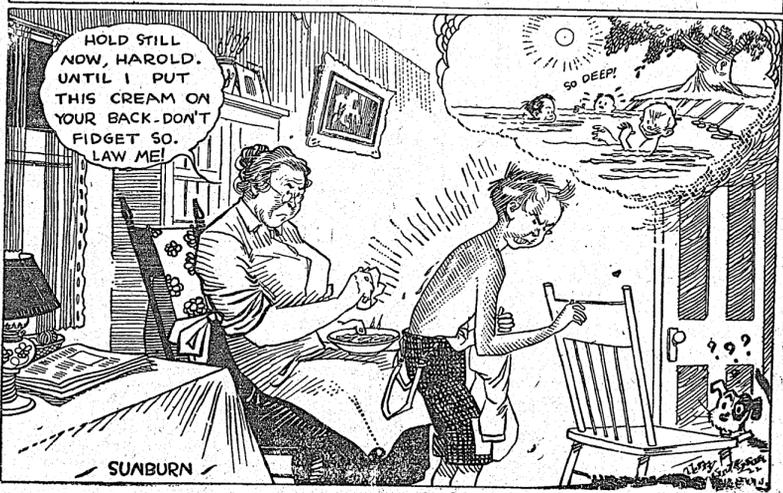

An interesting case was tried before Magistrate Weddell on Monday, when two Japanese named Yamamoto and F. Fudatati were charged with having unlawfully molested and impeded Raymond Laws, a water bailiff duly appointed under the Water Act, in the exercise of his duties under the Act. The date of the alleged offence was Wednesday, June 28th, and the scene was the headgate on Mill Creek which supplies Bankhead, Guisachan, the Pridham orchard and other properties.

According to the evidence given by Mr. Laws, he was at the headgate at about 10 p.m. when he was suddenly assailed from behind by two men whom he judged by their speech to be Japanese. Owing to the suddenness of the assault and the darkness, he was unable to give an accurate description of the men, and he could not swear to the identity of them with the accused. One of them was taller than the other, and one stooped a little, so far as he could see. They said something about wanting water, and then they forced him down on the ground and taking out one of his shoe laces, they trussed him up, tying his wrists, behind his legs in such fashion that he was helpless. They then took him to the creek and put him in, but apparently there was no attempt made to drown him, as the water was too shallow. He got out of the water, the men having disappeared, and crawled in his trussed-up condition to the house of Mr. A. J. Sears, about half a mile away, which he reached about 11.30, and Mr. Sears answered his cries by coming out and releasing him from his bonds.

Capt. G. D. Cameron testified that the night of the alleged assault was the date allotted for irrigation to the Byrons property, upon which the accused Japanese are growing onions upon shares.

Mr. Manly Byrns stated that he was driving to town about 8 o'clock on the night in question with his wife, and he met the Japanese going home. On his return, about 10.15 p.m., he found the men had not left

### Kids Is Kids

### UNION ENTERS SUIT IN COURT

### Action Taken Against Members for Alleged Breach of Contract.

Action has been entered by the Summerland Fruit Union against some of its members for alleged breach of contract. The cases will come up in the next sitting of the county court.

Mr. M. G. Wilson, president of the Union, when interviewed by a representative of The Review, stated that it was absolutely essential that members live up to their contracts, otherwise it would be better that there were no contracts. The directors feel it their duty to take this action in the interests of members generally.

Speaking of growers who had overdrawn their account last year in anticipation of better prices, Mr. Wilson said it was not the intention of the directors to deduct the full amount due from the current year's returns, as arrangements had been made to spread this over a period of years, where the debit balance was for any considerable amount.

At the instance of the members, who demanded better warehouse accommodation, continued Mr. Wilson, a large frost-proof house had been provided in readiness to save the crop against an early frost. Were members to drop out now, this would mean an increase in cost of operation to the others. It requires the large volume to bring down overhead expenses and if for no other reason, members must not, under persuasion, market their crops through other channels. Particularly have the directors resented the action of some who are in debt to the Union and are attempting to dispose of their fruit elsewhere. Mr. Wilson pointed out that the contracts were of a three party nature, and that the O.U.G. was also interested in seeing that each party to the contract adhered to its provisions.

their house since coming back from Kelowna.

Mr. A. C. Parfit, who accompanied Mr. Byrns to Kelowna, corroborated. Maki Yamamoto, wife of one of the accused, gave evidence to prove a complete alibi, stating that the men returned home about 8.30, did a little work round the house, had a smoke and went to bed about 10 o'clock.

Yamamoto gave similar evidence and denied having seen Laws at all on Wednesday. He disclaimed any knowledge of irrigation work, which he left to his partner, Fudatati.

K. Fudatati also denied having seen Laws on the day in question or having assaulted him.

Mr. K. Iwashita interpreted for the Japanese witnesses.

Messrs. O. F. D. Norrington, of the Water Branch, and F. W. Fridham, gave Mr. Laws a good character for reliability and truthfulness.

After hearing the evidence, Magistrate Weddell dismissed the case, holding that identification of the accused with the men who committed the assault had not been established. Mr. T. G. Norris prosecuted on behalf of the Crown, and Mr. H. V. Craig defended.

### SUMMERLAND NOW HAS A 1500 CLUB

At a meeting, held on Monday night, a 1500 Club for Summerland and vicinity was successfully launched. Certificate of incorporation under the Societies' Act has already been obtained by their solicitor, K. M. Elliott.

The sole object of the club is to provide mutual life insurance and it is organized on identical lines with similar clubs in other communities. It is called the 1500 Club, as this is the goal aimed at in number of members and is also the limit fixed by law for an organization of this nature. A small initiation fee is charged, after which \$2 a year is assessed for administration purposes. Beyond this, each member pays \$1 on the occasion of the death of a member. In this way, with a membership of 1500, the widow or other heir or heirs of the deceased member is immediately handed \$1500.

In some communities where this club has been organized and the total membership attained, there is a large waiting list of applicants for membership. In some places the club is popularly known as the "Coffin Club," because of the fact that a member must die before any benefits are distributed.

### EAST REQUIRES WARM WEATHER

### Abundance of Moisture All Through East—Grain Prospects Bright on Prairie.

Below will be found a brief synopsis of telegraphic reports received at the Head Office of the Bank of Montreal from its branches, and issued under date of July 6:

**Province of British Columbia.** Weather hot and dry; rain badly needed everywhere. Half hay average. Grains, 70 per cent.; roots, 60 per cent.; potatoes, Ashcroft, 25 per cent above average. In Okanagan water situation rather serious; apples, 80 per cent.; small fruits above average except plums and prunes. Fraser Valley tree fruits particularly good; berries much below average. Nicola and Ashcroft report grasshopper plague.

**Prairie Provinces.** Crops continue to make good progress. Needed rains have fallen and conditions generally are favorable. Damage from pests is small.

**Edmonton District—Oats** looking well; hay in some districts will be short.

**Calgary District—Heavy rain** somewhat late for northern part of district, where condition of crop only fair. Southern portion, grain, pasture and hay good.

**Lethbridge District—Conditions** generally favorable. Some localities suffering badly from drought have materially improved by recent rains. Unless general rain comes soon crops will be below average. Conditions vary and are best in northern localities. Little damage from hail.

**Regina District—Crops** have benefited from heavy rains and conditions are favorable. Some losses from hail. Prospects indicate average to good crop.

**Winnipeg District—Crops** well (Continued on Page 4)

### LAWN TENNIS TOURNAMENT

### A Record Attendance at Kelowna When Finals Were Played on Saturday.

The splendid new grounds of the Kelowna Lawn Tennis Club presented a gay spectacle last Saturday afternoon, when the finals of the Okanagan Valley Lawn Tennis Tournament were played off. It was a fitting finale to the most notable week in the history of lawn tennis in this Valley. Seats and stands were filled to overflowing by an enthusiastic crowd of spectators, who watched with keen interest the really splendid exhibition of high-class play that the finals of the various events produced. The tournament had been favored with a week of ideal weather, starting on Monday with a day of intense heat (almost too much for some of the competitors), it ended up with a flourish of sunshine, gay dresses and sparkling play. A record of 76 competitors and 221 entries was established. Great credit is due to the referee, Capt. Wilmot, of Vernon, and the committee who supported him that all the finals were completed in good time on Saturday afternoon. Both competitors and on-lookers were loud in their praises of the way their interests were looked after and the smoothness with which all arrangements were carried out, not a hitch of any kind being apparent.

At the end of Saturday's play the various challenge cups and prizes were presented with due ceremony by Mrs. Boyce, wife of the club's president, carrying a handsome bouquet, which had been handed to her by Miss Green as a token of the esteem from the club. Before the actual presentation was made the Bishop of Kootenay made a short speech, in which he referred to the rapid growth of the present club, due to enthusiasm and enterprise, his pleasure on seeing so many contestants gathered together from so many widely separated places, and the excellence of promoting the true spirit of sportsmanship. The cup holders were as follows:

**Men's Singles—J. H. C. Cardinal,** of Vancouver, for the second time in succession.

**Ladies' Singles—Mrs. Belson,** Kelowna.

**Men's Doubles—G. E. Seon, jr.,** Kelowna, and P. G. Dodwell, Summerland.

**Ladies' Doubles—Mrs. Belson** and Mrs. Lyell, Kelowna.

**Mixed Doubles—P. G. Dodwell** and Mrs. Watson, of Vernon.

**Other winners were:**

**Veterans' Singles—A. Carruthers,** Kelowna.

**Junior Singles—J. Kidston,** Vernon.

**Mixed Doubles, handicap,** carrying with it the Kalamalka Challenge Cup—Crichton Spencer and Mrs. Simeon, of Kelowna.

None of these events were won easily, the play being strenuous and keenly contested, but the match of the week it was unanimously admitted was the final of the men's singles between Cardinal and Dodwell, the result being in doubt until the last stroke of the last game; the contrast between Cardinal's hard and accurate driving and placing, mostly from the region of the backline, and Dod-

## Fire Prevention By-Law Establishes Two Zones

well's volleying and brilliant overhead work from the net and middle of the court produced a game full of thrills and brilliant play till the end.

### OSOYOOS SUFFERS \$12,000 FIRE LOSS

The Richter Hotel, Osoyoos, together with the machine shop and garage and lumber yard adjoining, went up in smoke on Tuesday evening of last week, damage amounting to approximately \$12,000 being done. The furniture in the hotel and a small engine which was in the garage, was saved, everything else being a total loss. There was no insurance. The hotel building belonged to the Richter estate, and was leased by Mr. D. Riordan, Penticton. Mr. William Wilson owned the garage, machine shop and lumber yard. The fact that the wind was blowing away from the rest of the buildings was all that saved the entire town from destruction.

The fire started between the ceiling and roof of the kitchen of the hotel shortly after Mrs. D. McDonald who, with her husband and family, resides there, had put on a fire to prepare supper. The fire was first noticed by people who were standing in the road outside, and a number of men attempted to extinguish it by the use of buckets and water from the lake. The efforts to subdue the flames were hopeless almost from the first, the building being as dry as tinder owing to the spell of the hot, dry weather of the past few weeks.

From the hotel the fire spread to the garage and lumber yard, making a clean sweep of everything, while the crowd which had gathered was compelled to stand idly by and watch, for want of anything adequate with which to combat it.

### SILVER BAND HERE MONDAY

### Famous Vancouver Band to Give Open Air Concert—Is Touring Province.

An opportunity will be given the people of Summerland, Naramata and Peachland, next Monday, to hear the well-known Vancouver Silver Band of 40 pieces, which will play in Summerland, beginning at 8 p.m. This band was organized by the Vancouver Salvation Army, and enjoys a high reputation, and is known to many in the Okanagan, it having toured the Valley last year.

The open air concert to be given next Monday will be from the band stand opposite Hotel Summerland, arrangements having been made with the municipality for the occasion.

The Silver Band, which is under the leadership of Adjutant Merritt, who is also commanding officer of Vancouver No. 1 Corps, is considered by musical critics to be one of the leading bands in the west.

Capt. L. Ede and Lieut. Halvorson, of Penticton, were in town on Tuesday and made final arrangements for the visit of the band here, and also for a ferry from Naramata, which will leave that side at 7.30.

To The Review, they expressed the hope that a large number of people of this municipality and the neighboring centres would take advantage of the opportunity to hear this splendid aggregation of musicians. No charge will be made, but a collection will be taken. Rev. H. E. Livingstone, of the Summerland Methodist church, will act as chairman.

### NEW RULE OF ROAD BRINGS TOURISTS

"Change in the rule of the road and general improvement in the roads, is going to mean an influx of thousands more tourists from the United States this year," says a Californian.

"People who came as far as Washington State formerly are coming back this year to see B.C.," he said. "It was only the left-hand drive that kept me and thousands of others from coming here before. Within three or four blocks of my home at Pismo, I know of ten or twelve fam-

### Council in Regular Meeting Devotes Much Time to Irrigation Matters.

### THE FARM Municipality Would Discuss With Minister Question of Irrigation Service.

The regular meeting of the municipal council was held on Tuesday afternoon, with the reeve and all members present, and much routine business was put through.

Application was received from the School Board, and was supported by Trustees Inglis and Darke in person, for domestic water connection to the new school building. A two-inch connection was asked for, and it was found necessary, in order to meet the request of the board, to make an extension from the present main along the road allowance, arrangements being made whereby the school board would meet the cost of so doing, the council to take over the cost of expenditure when making use of the extension for any other supply needed in the future.

The finance committee presented accounts amounting to \$14,334, which were approved for payment.

Notice from the Western Canada Irrigation Association of a convention to be held at Maple Creek, Sask. and Brooks, Alta., and asking that delegates be sent from Summerland, was considered, but the clerk was instructed to reply that the council were not in a position to attend the convention this year.

A long letter was read from R. S. Monro complaining of shortage of water and stating that he had only ten holes out of 200 running on 15 acres.

The reeve reported having interviewed Mr. Monro and there was certainly not enough water going to his place, although he was inclined to think that there was not the best use made of the water at present obtained. He pointed out that in Mr. Monro's soil it was not a good policy to leave the furrows open, and thought that in lieu of a good alfalfa crop, more cultivation should be undertaken.

Referring to Mr. Monro's complaint as to his trees dying, Mr. Scott was inclined to agree that there was not enough water being delivered, while Coun. Johnston thought that not all the trees had died from drought; they were possibly winter killed.

Mr. Kirk stated that he had measured the water going to Mr. Monro's, and he had five acre feet per season.

Reeve Campbell stated that he had previously suggested that the probable cause was lack of cultivation.

The clerk was instructed to write Mr. Monro pointing out that the council were spending money voted by the ratepayers in that section as well as other parts of the municipality.

J. Morrow appeared personally to make application for the purchase (Continued on Page 8)

## WILL OPEN NEW ROAD ON AUG. 17

### Dr. Sutherland Makes This Announcement When at Revelstoke.

Revelstoke.—Hon. W. H. Sutherland, minister of public works, has set Thursday, August 17, for the official opening of the Revelstoke-Okanagan automobile road. Ceremonies in connection with the opening will take place at Malakwa. Among those invited to attend the opening ceremonies are his honor, Lieutenant-Governor W. C. Nichol, Hon. John Oliver, Hon. J. H. King, federal minister of public works; L. W. Humphrey, M.P.; T. G. McBride, M.P., and J. A. McKelvie, M.P. Invitations also will be extended to mayors of interior British Columbia cities. On August 18, it is proposed to take the invited guests up Mount Revelstoke by automobile to a point beyond the Prince of Wales tablet.

lies who are coming to B. C. this summer."

# Correspondence

## Re-Organization of O.U.G.

To the Editor of The Review:  
 Sir,—Among the recommendations to the shareholders of the O. U. G. by the organization committee is one that the directors of the Central Board be elected for a two-year term, instead of a one-year term, as at present. The committee added that the same principle would undoubtedly benefit the Locals. The committee make no suggestion as to how their recommendation can be carried out.

Early last August I submitted to Central a scheme for re-organization. Central deemed the scheme sufficiently important to cause a copy to be sent to each local. Peachland Local unanimously supported it. Of other Locals, I have no information. Ultimately Central decided to pass on my proposal to the new (that is, the present) board. Central acted wisely in this: the subject is too far-reaching to be disposed of hurriedly. The plan of re-organization referred to is embodied in the following letter:

Peachland, B.C.,  
 Aug. 8th, 1922.

To W. J. McDowall, Esq.,  
 General Manager O.U.G.,  
 Vernon, B. C.

Dear Sir,—I submit the following for consideration of your board:

At the last meeting but one of the O.U.G. Board, which I attended, casual reference was made to the danger the O.U.G. runs by reason of the present system of electing the Board.

Each local nominates one or two (as the case may be) of its members to represent it on the Central Board. At the annual meeting of the O.U.G. their names are submitted to the shareholders and the nominations approved and the election thereby made. These men are all elected for one year. It is here where the stability of the O.U.G. as an organization arises.

For the welfare of the institution, it is essential that its by-laws proceed along lines of permanency of policy. This does not mean that changes should not be made, for that would spell stagnation and death in big capital letters. While markets are to be widened consequent upon an ever-increasing production, just as long will modifications and changes be necessary in the carrying out of the organization's policy if the concern is to be kept full of vigor, so as to bring about constantly growing benefits. But growth should be made along something like permanent lines of procedure or policy.

The present system of electing the board is far from affording a guarantee that this will be done. Indeed, it affords no guarantee at all. The history of the O.U.G. shows this: All that is necessary is for a small number of disgruntled, just as long will modifications and changes be necessary in the carrying out of the organization's policy if the concern is to be kept full of vigor, so as to bring about constantly growing benefits. But growth should be made along something like permanent lines of procedure or policy.

The O.U.G. Board consists of nine members. Three or four Locals acting as I have intimated, and at the same time, can produce disaster. The tenure of office of all members of the board being for one year only, no board of nine having an active opposition minority of three or four could work anything like efficiently. It would take all the efforts of the majority, no matter how good and sound the policy, to counteract the proceedings of the minority, and to keep the co-operative ship afloat. Meanwhile competitors would take possession of the O.U.G.'s hard won territory.

The question is: How can the danger I have pointed out be best removed? It is full of difficulties. Local interests, small pettiness and prejudices will likely make themselves felt. These difficulties can be surmounted if the situation is looked at from a full Okanagan view point. While each unit must be considered each should be prepared to meet compromise by compromise if the end to be attained is the placing of the O.U.G. organization out of danger as far as possible.

To do this the period for which members of the Central Board are appointed should be at least two years instead of one, as at present. This means that to begin with (so as to get the proposal into running shape) five members should be elected for two years, and four members for one year. At the end of the first year those four members would go for re-election, but for two years instead of one, the remaining five members having one year to run. This would bring us to the end of the second year, when the four who were first elected for one year would have another year to run. By the time this second term of office had expired the working basis would have been reached of all elections being for two years, practically one-half of the Board being elected annually.

This system, or some similar system, would largely tend to secure that continuity of policy which is so necessary considering the many responsibilities the organization is upon the eve of entering into or assuming.

Then comes the further question: Which shall be the four locals to elect members for one year so as to get the plan into operation?

I would suggest that, as Vernon has two members as against the other Locals' one member each, Vernon Local should have one member for two years and one member for one year. The other three one-year members should be those representing the three smaller Locals, namely, Armstrong, Enderby, Peachland. The other two-year members would come from Penticton, Summerland, Kelowna, Grand Forks.

As an ardent supporter of the principle of co-operation, I submit the foregoing for consideration. The views expressed are put forward by way of suggestion with the hope that, though they may be set aside, some last good may accrue to the O.U.G. as a result of attention having been drawn to this important subject.

Yours truly,  
 THOMAS POWELL.

At the time of writing the immediately preceding, the board consisted of nine members. I believe it is now composed of ten members. If so, a very slight modification of my suggestion will meet all requirements.

Further thought convinced me that the matter of reorganization would not be complete unless extended to the Locals. Some two months later, I therefore wrote as follows:

Peachland, B.C.,  
 18th October, 1921.

W. J. McDowall, Esq.,  
 Gen. Mgr. O.U.G., Ltd.,  
 Vernon, B.C.

Dear Sir,—With reference to my letter of 8th August last, dealing with the mode of electing the Central Board of the O.U.G., I find that the suggestion therein made cannot be carried into effect unless corresponding changes are made in the by-laws of the various local unions.

Special provision for doing this was made in the "Agricultural Act, 1915" section III, sub-section (2), which reads: "Provided always that any association incorporated under this part of the Act may enact in its by-laws provisions to the effect that one-third of the number of directors elected at the next ensuing election shall retire from office one year after elected, one-third two years after elected, and one-third three years after elected; and that their respective successors in office shall serve for a period of three years, one-third of their number retiring each year."

In its legislation of 1915 the government evidently recognized the great protective value of the principle set out in my letter of 8th of August last.

In view of this, coupled with the reasons stated in my letter, I respectfully submit for consideration of the Central Board the advisability of recommending all Locals to adopt sub-section (2) of section III. of the 1915 Act.

The suggested changes in the Central Board contained in my previous communication are equally desirable in connection with the Locals as with the Central.

Yours sincerely,  
 THOMAS POWELL.

The report of the reorganization committee leads those interested in the O.U.G. to believe Central have been altogether blind to the ever-growing requirements of the institution and indifferent so long as things proceeded anything like smoothly. It looks to me that the committee did not conduct their investigations quite along "every channel" they might have done; otherwise they would have found what they wish for prepared for them.

If, Mr. Editor, I am unduly trespassing on your space, I apologize. The importance of the O.U.G. to the general welfare of the Valley and the necessity of everyone doing his utmost to support it, is my excuse.

After all is said and done the differences of opinion which may exist among us can and will be overcome. We are face to face with difficulties, but difficulties are things which should strengthen rather than weaken, by the bringing together and comparing of ideas. If we work with this determination there can be but one result for the O.U.G.—Success!

THOMAS POWELL.  
 Peachland, B.C., July 8, 1922.

To the Editor of The Review:  
 Sir,—Mr. Powell's letter to you, published in The Review of July 7th, mentions my name in connection with his attack on the O.U.G. committee of re-organization and their report.

It passes Mr. Powell's comprehension to understand how I can subscribe to the chairman's contention that none of the members of the board are expected by the shareholders to be either salesmen or familiar with markets and marketing conditions. Pointing out that in speaking with him over the phone, I considered the members of the Central Board largely responsible with Mr. Lowe for blunders made in connection with selling, and blamed him, Mr. Powell, with the rest of the Board for anything that had gone wrong.

On the occasion of the phone conversation, I was not as familiar with the situation as I am now, my remarks at that time, as a result of

added experience, are confirmed, and I still contend that the Central Board is responsible for the action of their employees. And I still hold Mr. Powell responsible, with other directors, for the reasons that I stated at the meeting of shareholders, "that the committee's report was not based on the results of the business management of the sales department for 1921 only, but for the years 1918, 1919, 1920 and 1921, and that as a result of lack of policy, direction and proper supervision during these periods the situation that came to a head in 1921 was inevitable, no matter what the state of the general financial conditions may have been."

I subscribed to the chairman's remarks, "that members of the Board are not expected to be salesmen or familiar with markets and marketing conditions," as the members of the Board meet but once a month, it is not reasonable to suppose that men who are busy with personal problems and who do their own orchard work, have the time or the opportunity of keeping in close touch with markets and marketing conditions. The Board is, however, responsible for the policy and general supervision of all departments and each member must be conversant with the situation to be a real representative of the growers.

With reference to the full text of Mr. Powell's letter, I shall be glad to meet Mr. Powell and debate the committee's report with him, before a meeting of the growers at as early a date as can be arranged.

MAJOR R. G. HARDISTY.  
 Peachland, B.C., July 10, 1922.

## Post Office Service.

To the Editor of The Review:

Sir,—I have asked several people in this town why the post office should be closed on Sunday, but so far I have not been able to get a satisfactory answer.

From what I understand the office closes at 10.30 a.m. on Sunday, but for the last two Sundays it has been closed at least five minutes ahead of time.

Why should it be closed at all? It is not possible for everyone to get their mail before 10.30. What is the reason for having office boxes? As far as I can understand it is to enable me to get mail at any time. I have been in quite a number of small towns in Canada, but this is the first that it was impossible to have access to mail boxes on Sunday, and I, for one—no doubt there are lots more—would like to see the post office open at all times, so that people who have P. O. boxes do not have to tie themselves to any time limit.

Yours truly,  
 ROBERT A. V. CHEALE.

## A Man's Prayer.

"Teach me that 60 minutes make an hour, 16 ounces one pound and 100 cents one dollar. Help me to live so that I can lie down at night with a clear conscience, without a gun under my pillow and unhaunted by the faces of those to whom I have brought pain. Grant that I may earn my meal ticket on the square, and that in earning it I may do unto others as I would have them do unto me. Deafen me to the tinkle of tainted money and to the rustle of unholy skirts. Blind me to the faults of the other fellow, but reveal to me my own. Guide me so that each night when I look across the dinner table at my wife, who has been a blessing to me, I will have nothing to conceal. Keep me young enough to laugh with little children and sympathetic enough to be considerate of old age. And when comes the day of darkened shades and the smell of flowers, the tread of soft footsteps and the scrunching of wheels in the yard, make the ceremony short and the epitaph simple—"Here Lies a Man."—Exchange.

# A Transcontinental Trip by the Canadian Pacific Railway

## Summerland Citizens in Happy Party on way to Visit Scenes of Childhood in the Maritime Provinces

I wonder if all transcontinental trips by C. P. R. are as delightful as was ours. It began at Victoria at 3.15 p.m. on Saturday, July 1st, where we boarded one of the fine Princess boats of this company. The run of four hours in the narrow channels between the beautiful gulf islands and across the Gulf of Georgia was especially pleasant. Arriving at Vancouver we were soon on board the train bound for "back East."

Next day, after looking around and sizing up our fellow passengers, we soon found that nearly every one in the car was having an old home week of it, bound for the Maritime Provinces.

A Vancouver lady with four bright girls, ranging in age from 8 to sweet 16, was heading for Antigonish, N. S., the place where they raise bishops. A man of the company was on a visit to his old home in Digby, N.S., the original home of the far-famed "finnan haddie," the very name of which makes a Maritime Province man's mouth water. Then there was a charming lady from Summerland, B.C., a pious Sunday school teacher, who knows all about the sin of card playing. She was heading for Canso, N.S., where the people are brought up on "boneless cod," and where the girls find easy victims in the green young Englishmen who come across the Atlantic to operate the N. S. end of the Atlantic cable, which lands at Canso. An editor's wife, with a sweet little girl of 8 or so, with a young child, was also from Summerland. She was on her way to revisit the scenes of her girlhood days in N. B.

Others on board were from Middleton, N.S., Charlottetown, P. E. I., Truro, N.S., and other parts of the three eastern provinces, all bound to the old home for a visit to parents, brothers, sisters, friends. And they formed a jolly company. My, the songs they sang, the yarns they told, the jokes they cracked; some of them coming down to us from the days of Noah.

One lady on board told us that her grandmother had 25 children and raised them all. "And," added the scribe, "I suppose she didn't know a darned thing about child-welfare, germs, microbes, polly-wogs or any other of these new-fangled things we hear so much about." "If she had," interjected the Sunday school teacher from Summerland, "she would have coddled them all so much in their infancy the half of them would have died in their first six months. She knew enough," replied the lady, "to give them good doses of treacle and sulphur in the spring and let them run bare-footed all summer." "That's why she raised them all," said the Summerland lady. "It makes me tired to hear all this talk about child-welfare and such like nonsense."

On Tuesday evening the editor's daughter went around the car and solicited every passenger to give a stunt of some kind in a concert she was giving. When her program was completed it read something like this:

1. Chorus—"O, Canada," by Everybody.
2. Recitation—By Editor's Daughter
3. Song—"Peggy O'Neil," by the Bunch.
4. Song—"Old Black Joe," by the Porter.
5. Song—"Tipperary," by the Bunch

6. Recitation—"Maud Muller on a Winter's Day," by the Scribe

The concert came off in due form and was an unqualified success. The "bunch" consisted of half a dozen little girls of from 8 to 15, all of whom sang very sweetly. Our porter made a typical "Old Black Joe." He speaks with a strong Cockney accent and calls himself an "Unbleached Englishman." He is a whole minstrel show in himself.

We have a very long train with a dozen or more passenger coaches. If our car is a fair representation of the others there must be a small army of people from the three little eastern provinces on this one train. Truly, what a great host of people have these provinces given to Western Canada! And what an influence must these have had in enlightening the ignorance, dispelling the darkness, and upholding Canadian ideals in these western lands. The writer believes it would be difficult to find among all the Maritime people in the west even one Bolshevik or Anarchist, or one who thinks the world owes him a living without working for it.

Most of the Maritime Province people are of U. E. Loyalist descent. In their veins flows the best blood of the New England colonies. They have kept alive the ideals and traditions which their ancestors brought to Plymouth in 1620, which ideals have spread over Canada from the Atlantic to the Pacific and today permeate and dominate the public and private life of our young Dominion. And let me add, it is these ideals and traditions that have made the Anglo-Saxon race the dominant race of the world today.

And now let me add just a brief tribute of praise to this wonderful enterprise—the Canadian Pacific Railway. Every true Canadian is proud of this great railway, so representative of our Canadian resources, Canadian enterprise and Canadian brains. The writer is not travelling on a free pass, but is paying full fare for all he gets, but he is getting full value for all he pays. Nothing is left undone by the officials and servants of the company to add to the convenience and comfort of the passengers on our train. As the years go by the writer will ever have pleasant memories of this delightful July trip from ocean to ocean. Truly it has been a trip of which we can truly say:

# "Can"

ADVERTISING is the public expression of a master's will and wish—his word of power

We want to say this to the merchants of this community:

You CAN make the public of this community buy more goods from you.

You CAN teach the public new customs, new tastes, new habits. You CAN make the public do what it is not in the habit of doing. Powerful and persistent advertising has revolutionized modern life. It sends people travelling. It has made them photographers. It has made the motor-car a necessity. It makes women change the fashion of their apparel twice or thrice a year. It selects the very food we eat.

## A NOTE TO THE PUBLIC.

Does not the publicly expressed will and wish of the merchants of this community influence you in your shopping? Do you not go where you are guided? Are you not very attentive and responsive to the advertisements which appear each week in the columns of The Review?

**Synopsis of Land Act Amendments**

Minimum price of first-class land reduced to \$5 an acre; second-class to \$2.50 an acre. Pre-emption now confined to surveyed lands only.

Records will be granted covering only lands suitable for agricultural purposes and which is non-timber land.

Partnership pre-emptions abolished, but parties of not more than four may arrange for adjacent pre-emptions with joint residences, but each making necessary improvements on respective claims.

Pre-emptions must occupy claims for five years and must make improvements to value of \$10 an acre, including clearing and cultivation of at least 5 acres, before receiving Crown grant.

Where pre-emptor in occupation not less than 3 years, and has made proportionate improvements, he may, because of ill-health, or other cause, be granted intermediate certificate of improvement and transfer his claim.

Records without permanent residence may be issued, provided applicant makes improvements to extent of \$300 per annum and records same each year. Failure to make improvements or record same will operate as forfeiture. Title cannot be obtained in less than 5 years, and improvements of \$10.00 per acre, including 5 acres cleared and cultivated, and residence of at least 2 years are required.

Pre-emptor holding Crown Grant may record another pre-emption, if he requires land in conjunction with his farm, without actual occupation, provided statutory improvements made and residence maintained on Crown granted land.

Unsurveyed areas, not exceeding 20 acres, may be leased as home-sites; title to be obtained after fulfilling residential and improvement conditions.

For grazing and industrial purposes areas exceeding 640 acres may be leased by one person or company.

Mill, factory or industrial sites on timber land not exceeding 40 acres may be purchased; conditions include payment of stumpage.

Natural hay meadows inaccessibility by existing roads may be purchased conditional upon construction of a road to them. Rebate of one-half of cost of road, not exceeding half of purchase price is made.

**PRE-EMPTOR'S FREE GRANTS ACT.**

The scope of this Act is enlarged to include all persons joining and serving with His Majesty's Forces. The time within which the heirs or devisees of a deceased pre-emptor may apply for title under this act is extended from one year from the death of such person, as formerly, until one year after the conclusion of the present war. This privilege is also made retroactive.

No fees relating to pre-emptions are due or payable by soldiers on pre-emptions recorded after June 26, 1918. Taxes are remitted for five years.

Provision for return of moneys accrued, due and been paid since August 4, 1914, on account of payments, fees or taxes on soldiers' pre-emptions.

Interest on agreements to purchase town or city lots held by members of Allied Forces, or dependents, acquired direct or indirect, remitted from enlistment to March 31, 1920.

**SUB-PURCHASERS OF CROWN LAND.**

Provision made for insurance of Crown grants to sub-purchasers of Crown Lands, acquiring rights from purchasers who failed to complete purchase, involving forfeiture, on fulfillment of conditions of purchase interest and taxes. Where sub-purchasers do not claim whole of original parcel, purchase price due and taxes may be distributed proportionately over whole area. Applications must be made by May 1, 1920.

**GRAZING.**

Grazing Act, 1919, for systematic development of livestock industry provides for grazing districts and range administration under Commissioner. Annual grazing permits issued based on numbers ranged; priority for established owners. Stock owners may form Associations for range management. Free, or partially free, permits for settlers, campers or travellers, up to ten head.

**NARAMATA WILL CONTINUE ITS HIGH SCHOOL**

**Ratepayers' Annual Meeting Strongly Favor This—Other Naramata News.**

The annual school meeting, held on Saturday evening, resulted in a decision to continue conducting a superior school here for the ensuing year. Mr. F. C. Manchester occupied the chair. Mr. Stanley Dicken, secretary of the trustee board, gave a very clear financial statement for the past year, and an estimate for the coming year. It appeared that though \$5,500 had been estimated as the expenditure for last year, not all of this had been spent, a comfortable balance of something over \$1,000 remaining on hand. The estimate for the coming year is \$5,000, a decrease of \$500 from the estimate of last year. Some exception was taken on an item of approximately \$80 for renovating the high school building room; others present, however, defending the expenditure as necessary. The main subject of discussion through the evening was the question of what rooms should be kept open during the coming year. Mrs. Rounds, Mr. Cook, and some others advocated running three rooms for public school work alone, contending that the teaching of high school work here was always more or less of a failure and not worth the expenditure on it. Mr. King pointed out that a public school of three rooms would not receive the government grant for the third teacher, as the number of public school pupils did not warrant it. A superior school of three rooms would receive the grant, as the board this year had obtained it. Mr. Horswill championed the cause of those children who finish their public school course at 13 or 14 years of age, claiming that they should not be refused the opportunity to continue their education, and that they were still too young to be sent away from home. Mr. Horswill thought the first year high school work should be provided. On a vote being taken it was decided by 23 votes to 8 to continue the superior school. It was left to the trustees to do what was found to be in accordance with the Act, with regard to the second year of high school.

Mr. King having resigned on account of expecting to leave the district, and Mr. Ritchie's term having expired, two vacancies were to be filled on the board of school trustees. Mr. Ritchie and Mr. F. C. Manchester were elected unanimously, and by Mr. Manchester's wish, Mr. Ritchie was elected to the longer term.

Mr. Harry Matteson, of Sioux Falls, South Dakota, is spending some time here visiting Mr. and Mrs. Iverson and family.

Mrs. Campbell Robinson and her children were visitors in Summerland over the week-end, spending a few days with Miss Grace Logie at Crescent Beach.

Miss Levine, of New York, who is chief dancing instructress at the Neighborhood Theatre of that city, arrived in Naramata last week and will spend the summer season here at the Little Theatre. Miss Levine will give lessons in aesthetic dancing to the students of the Canadian Players, and will also extend the privilege of her instruction to the general public, giving lessons at a moderate price to those desiring to take advantage of this opportunity.

Bings are being packed this week in Naramata in considerable quantities, also the last of the Royal Annes. The first lots of the season came in to the Peach-Belt Fruit Co. on Monday, July 10th, from Mr. Len Smith. Mr. Smith expected to have others ready by Wednesday.

Mrs. Sammett, who has been ill in Penticton hospital for some time, undergoing an operation there recently, is not yet sufficiently recovered to return home.

Mrs. Horswill, who has been absent the past week at the Coast, returned on Sunday to her home here.

Last week's ball game between Summerland and Naramata resulted in a victory for Naramata by a score of 7 to 4. We are coming up!

Miss Mary Fry, who has been spending some time at the Coast, has returned to Naramata and is staying once more with Mrs. Amaron.

Doctor (to patient)—"Well, how are you feeling this morning?"  
Patient—"Very much better, thank you, doctor. The only thing that troubles me is my breathing."  
Doctor—"Um—yes, we must see if we can't get something to stop that."

**Frail Child Develops into Champion**

Dorothy Hucknall, 13 years old, of Atlantic City, N. J., is the youngest girl ever to win swimming honors in Mid-Atlantic competition. She is an ardent advocate of swimming as an athletic way to health. When born, she weighed but three pounds and her life was despaired of by physicians.

**TAKING CARE OF GROWING CHICKS**

**Proper Feeding, Housing and Free Range Necessary to Young Birds.**

Taking care of growing stock is one of the poultryman's first principles—a part of poultry culture that he places in the same category with breeding, hatching and successful egg production. The main idea to observe in regard to young stock is to feed them and care for them in such a manner that they will keep steadily growing, with no setbacks, maturing into healthy, well developed birds.

When feeding growing stock, it is well to remember that the feed given to the birds now contains the material that is to build up a strong body, strong organs and a strong constitution, so that later they will stand up under the strain of heavy egg production. Growing stock should have a grain feed, dry mash, sour milk or buttermilk, green feed and water.

Feeding the fowls' rations in hoppers has its advantages. Then birds can get all they want and know it is there for them when they want it. A flock of growing stock that is hand-fed wait for the morning meal to fill up on the grain. They then seem satisfied and will not get out to scratch for their feed as they would if hopper fed. Hopper fed birds will get out and dig for bugs and worms, and after they have had a fill of these, will return and go to the hoppers for the grain and mash.

Sour milk or buttermilk is one of the best things to feed growing stock; experiments by numbers of poultrymen show it can be used to mix with a wet mash and fed with the noon meal besides being kept before the fowls all the time. It is best, when feeding milk, to always feed it sour, and not sour at one time and sweet at another. It is better to feed the buttermilk in either earthenware or wooden ware, and not in metal dishes.

Green feed is very essential and is one of the best tonics to give to growing stock. The birds should be given range with all the green feed they want; when they are confined, such green as alfalfa, sprouted oats, clover or cabbage should be fed in generous quantities daily. Water is one thing that is often neglected. Birds should have fresh water before them at all times, and in the hot days of summer, care should be taken to see that it is in a shady place.

An essential in the care of growing stock is proper housing. There is no special type of house to be recommended, but the colony type is always good, as then the chicks can be moved from place to place, according to shade, and so that the birds may be given fresh range where the ground has been sown to some kind of grain or planted to corn. The house should be dry, well-ventilated, and so built to form a good protection for the birds during stormy weather. A mistake common among poultrymen is the crowding of young stock in colony houses. Birds growing rapidly need plenty of room. The flock should also be well culled out from time to time, and the cockerels removed.

Growing stock kept on free range grow more rapidly and vigorously, and the cost of feeding the same birds will be found to be considerably less, as they find other feed on the ranges, such as bugs, worms and wild seeds.

Poultry houses should always be kept clean and sanitary. Unclean buildings and yards breed disease and mites. Birds infested with vermin have to spend time scratching and digging after these parasites,

**The Air We Breathe.**

Will the time ever come when all the oxygen gas in the air will be used up, and human beings will die for want of it?

Such a state of affairs would have come to pass long ago had it not been for a natural arrangement of continual new supplies which are provided for man by plant life.

It has been estimated that an adult human being inhales and consumes about one and a half pounds of oxygen gas, and if this is multiplied by the number of the world's inhabitants—human beings and animals—the amount of oxygen removed from the air is represented by an astounding figure.

This is where vegetable life, in a two-fold manner, comes to man's aid. As it is, 100,000 parts of air ordinarily contain about thirty-three parts by volume of carbon dioxide, and if the proportion were bigger the air would be foul, and consequently be seriously prejudicial to health.

But vegetable life absorbs the excess carbon dioxide, and thus prevents this dangerous gathering of foul air. It does more, for after assimilating the carbon by a variety of chemical processes, it gives out again the precious oxygen which we breathe, thus maintaining constantly all over the world the correct composition of the air. In a word, the world is saved from disaster by the work of plants.

The immensity of this process can be imagined when we reflect upon the vast extent of forestry and plant life which covers the surface of the earth. It makes us realize at the

when they should be looking for bugs and feed, and resting at night.

An important point to be observed at this stage of the growth of the flock is the separating of the cockerels from the pullets. Culled cockerels not intended for breeding may be fattened and put on the market. Then, about a month before the pullets should start laying, they should be moved to their permanent laying quarters. As these pullets start laying, if trap-nested and marked, the early-layers, when matured, may be used in the breeding pens. The poultryman in this way gets good stock from among his best layers.

**IMPERIAL POLARINE OIL (Light Medium Body)** is the lubricant recommended for your Ford.

**A Passenger You can't afford to haul—**

Briefly, these are some of the results of using too heavy an oil for your Ford.

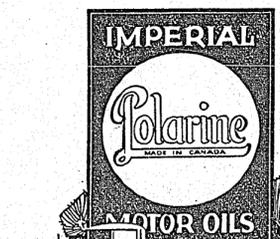

- (1) Engine drag and loss of power.
- (2) Improper oil distribution.
- (3) An overheated engine.
- (4) Excess carbon deposit.
- (5) Unnecessary friction and wear.
- (6) Large repair bills.
- (7) Rapid depreciation.
- (8) Excess fuel and oil consumption.

What is the remedy? Use Imperial Polarine Motor Oil (Light Medium Body), which is especially adapted to the mechanical requirements and operating conditions of your Ford engine.

Have your crank case cleaned and refilled today with Imperial Polarine Oil (Light Medium Body), and realize full Ford economy and efficiency.

**IMPERIAL OIL LIMITED**

Manufacturers and Marketers of Imperial Polarine Motor Oils and Marketers in Canada of Gargyle Mobiloil.

Made in five grades for the proper lubrication of all makes of automobiles, trucks and tractors.

# The Summerland Review

Established August, 1908.  
Published at Summerland, B.C., every Friday by  
THE REVIEW PUBLISHING COMPANY, LIMITED  
Ralph E. White, Editor and Manager

An independent family newspaper covering Peachland, Summerland and Naramata and adjacent districts.

Subscription Rates—In British Empire, in advance, \$2.50 per year; six months, \$1.40. To U.S.A. and other countries, \$3.00 per year.

Advertising Rate Cards and information respecting territory and samples of paper mailed upon request, or may be seen at the office of any advertising agency recognized by the Canadian Press Association.

Advertisers must have copy in by Tuesday noon in order to insure changes for standing advertisements. New display advertising copy can be accepted one day later.

Correspondence—Letters addressed to the Editor and intended for publication must be short and legibly written on one side of the paper only. The longer an article, the shorter its chance of insertion. All communications must bear the name of the writer, not necessarily for publication. The publication or rejection of articles is a matter entirely in the discretion of the Editor. No responsibility is assumed by the paper for the opinions expressed by correspondents.

Friday, July 14, 1922.

## THE SCHOOL CONTRACT.

That the Pentiction firm, who were but thirteen dollars higher in their bid for the new Summerland school, should have had the contract, is the contention of the Pentiction Herald, which deals with the subject editorially as below:

"The Summerland school trustees recently gave a school contract to a Vancouver contractor at a bid of \$34,987. A Pentiction firm put in a bid of \$35,000, being only \$13 higher.

"We have no desire to comment unfavorably upon the decision of the Summerland board, but it does seem that for the very small sum of \$13 the work could have been kept in the Valley. Outside contractors are apt to utilize outside help, and unless the difference in price is marked, it is practically always good policy to favor the local men, assuming that they are competent. The Pentiction firm was Haugen & McKenzie. This firm has constructed several large buildings in the district, and doubtless would be well equipped to build the Summerland school.

"For the small consideration of \$13 on a \$35,000 job, it would have been a gracious and common sense act for Summerland to have given the work to a firm in a neighboring town, ten miles away, rather than to a firm in a big city 250 miles distant.

"We always thought that our slogan in this country should run: 'Home town first, the Valley next, then the province.'"

## THE REGISTRATION OF PLANTS.

The Canadian Horticultural Council, which was recently organized with headquarters at Ottawa, has already taken steps towards the organization of a system for the registration of new varieties of plants. Through the agency of Mr. W. B. Lobjoit, Controller of Horticulture for Great Britain, the Secretary of the Canadian Horticultural Council will be kept informed of the efforts being made not only in England, but on the Continent, to provide a means for the registration of horticultural plants, shrubs, and trees. The Secretary of the Council has also got into touch with the horticultural authorities in the United States who are interested in this matter. It is expected that a conference on the subject will be arranged for during the present year.

## PUBLIC PAYS THE PRICE OF APATHY.

The steel kings are cautious, businesslike, and deeply interested in psycho-analysis. They always study the mental reaction of the people. The price of steel depends largely on fuel conditions, but the steel men know that despite the coal strike the present is not a propitious moment to ask for more money. Eventually, of course, the coal strike will result in an advance in steel prices. This is a foregone conclusion. But a tilt in prices now would react unfavorably, and so the great captains of the industry grit their teeth and await "der tag." Those whose business it is to watch industrial movements predict that this month will see the end of the coal conflict. By that time the miners are likely to have reached the breaking point of endurance, and it is then the public may expect to read in those newspapers whose publishers are the constant and willing victims of the industrial press agents, the accepted propaganda preparing the public mind for a raid on the pocket book. Both coal and steel will advance in price unless the unforeseen takes place, and there is likely to be a race for the first bid, with the chances in favor of the steel men. Certainly someone must pay the cost of stoppage of production, and of course, the victim will be the good old patient public. If the people only realized how much their pocketbooks are stripped because they fail to interest themselves in anything that does not strike immediately into the home, we might see a revival of community activity and a unification of public opinion that would result in more harmonious conditions. Every day the coal strike—quite ignored by the public—is placing a heavier mortgage on the individual citizen, who still passes his days of life serenely and unmindful of the fact that he is continuously caught between the nether millstones. The Lord helps those who help themselves, and consequently good care is taken of the coal and steel barons.

## BATHING.

In the interests mainly of the fair sex, we would like to draw attention to the entire absence of any accommodation along the lake shore during the summer season for those who wish to take advantage of the excellent opportunity which exists for practicing the useful and healthful art of swimming.

Neither in Summerland or at Crescent Beach is there any decent shelter and those who wish to take a dip have to take to the bush in order to shed their conventional dress and don the garb of a water nymph. As far as the young boys are concerned, the absence of any facilities does not seem to disturb their serenity, but for older folk and especially women and girls, the lack of a place to disrobe is a very disturbing factor and in quite a number of cases has a deterrent effect.

Nothing is more enjoyable and health-giving than swimming and anything that can be done to overcome the drawback mentioned would be a great benefit to many residents and their visiting friends. At almost any waterside place this part of sport is provided for by the erection of small bathing houses where those who wish to can, for a small fee, have the privacy desired without having to forego the pleasure of a

swim on account of having no proper accommodation for the purpose.

This is one of the improvements which would mean so much towards making Summerland a desirable stopping place for visitors and tourists and it is to be hoped that something can be done to remedy the omission.

## LEARN ABOUT THE FARMER.

Back of all legislation must stand united public opinion which always is to be trusted when the people have intelligent understanding. Most of our troubles come from imperfect knowledge and consequent lack of interest in public questions. For years this has been the case with the farmer whose situation and importance until lately has not been even measurably sensed. As soon as the people generally in the great cities as well as in the smaller communities come to realize how much of the nation's prosperity depends on the farm then the wheels of reform will begin to turn with rapidity, and all the people will benefit.

What a sad commentary it is upon our legislative intelligence when we realize that the income of each farm factory or farm mine, whichever way we choose to visualize it, averages only \$2,793.

The province of government is to create prosperity, the greatest good for the greatest number, to harmonize the laws under which we live so that reward shall come to the people in relation to their service. There are in our cities thousands of high binders in the world of speculation who have never done an honest day's work in their lives, but who make often in a day and quite frequently in a week, as much if not more than the average farmer makes in a year. It is getting time for the public not only to seek information regarding the farmer, but to insist upon having it. When this demand is felt the information will be forthcoming, and when it is, equitable legislation for the farmer will lead a business development the like of which this country, great as it is, has never known.

## HOMEY PHILOSOPHY FOR 1922.

All the radicals, kickers, general objectionists and fault-finders shriek out loud when somebody says work is the foundation of happiness and contentment. Just a scheme of the rich to keep the poor at the grind they say. Maybe. But why not fool 'em? Work ain't work when a fellow's doin' what he likes to do, and everybody likes to be a leader in his line, so if we can't get to do what we want to do, we can do what we have to do better than the other fellow and lead the procession.

### FRIDAY.

Where is Your Treasure?—Where your treasure is, there will your heart be also.—Matthew 6: 21.

### SATURDAY.

Safety While Asleep.—I will both lay me down in peace, and sleep: for thou, Lord, only makest me dwell in safety.—Psalm 4: 8.

### SUNDAY.

The Glad Awakening.—As for me, I will behold thy face in righteousness: I shall be satisfied, when I awake, with thy likeness.—Psalm 17: 15.

### MONDAY.

Be Charitable.—Brethren, if a man be overtaken in a fault, ye which are spiritual, restore such a one in the spirit of meekness; considering thyself, lest thou also be tempted.—Gal. 6: 1.

### TUESDAY.

Guard the Tongue.—Keep thy tongue from evil, and thy lips from speaking guile. Depart from evil, and do good; seek peace, and pursue it.—Psalm 34: 13, 14.

### WEDNESDAY.

All Is Well.—Let not your heart be troubled: ye believe in God, believe also in me. In my Father's house are many mansions: if it were not so, I would have told you. I go to prepare a place for you.—John 14: 1, 2.

### THURSDAY.

God Cares for His Own.—And they shall be mine, saith the Lord of hosts, in that day when I make up my jewels; and I will spare them, as a man spareth his own son that serveth him.—Malachi 3: 17.

## Anglian Quartette Concert.

The concert to be presented on Friday evening by the Anglian Quartette promises to be of unusual interest to the lover of the best in vocal music, the program covering the centuries between Palestina and Edward German, and ranging from light opera and glee to the massive motet of the ancient church. The quartette is directed by Geo. W. Weaver, well known in Summerland as a successful music teacher, and the only teacher in Canada of the famous "Bel Canto" of the old Italian school. The soprano and baritone, are pupils of this method, and the former has already established herself as a soloist wherever heard, while the latter is the possessor of a very promising voice of fine range and mellow quality. The contralto

has a very rich and flexible range and is highly trained. The quartette is particularly fortunate in the accompanist, Mrs. A. H. Huntley, who combines the rare abilities of brilliant soloist and most sympathetic and capable accompanist. The concert is being presented under the local C. G. I. T., from members of which tickets may be obtained.

## BUD WORM CONTROL.

By H. H. Evans, Assistant District Horticulturist.

The advisability of strenuous efforts to control the bud worm of the apple, should be given serious consideration by our orchardists in an attempt to mitigate one of the chief causes in the heavy culling of apples during the packing season. Few growers realize to what extent apples had to be culled during last season through injury by this worm; fruit which in all other respects was No. 1.

A brief outline here of the life history of this insect may be of use to those having to contend with the pest. The worm, when mature, is of a chocolate brown color, the head being darker than the general body color; ½ in. to ¾ in. long when full grown. Overwinters as partly grown larvae, spun up in cocoon in dark crevices of the tree. When buds are breaking in the spring the worms move out and feed generally on the opening buds and blossom clusters, doing considerable injury to the crop at this period. This emergence covers a long period.

During the summer stage of the life cycle of this pest, moths may be emerging from the latter end of June to late in August, giving us worms in all stages of development through the summer.

The only recommendation of control which can be made from our offices at the present time is Arsenate of Lead sprays in the spring from cluster bud to calyx stage, and the summer sprays from early July to early August. One spray only at each of these periods will not control; to get satisfactory control at least two sprays should be applied in the spring and two during this month, one spray being given this week, the second during the last week of July.

Use Powdered Arsenate of Lead, one pound to 40 gallons of water, using good pressure and making sure the underside of the leaves are well coated with spray where the young worms are generally feeding.

Thin your apples one to a spur to avoid the fruit hanging in clusters, as wherever clusters of fruit occur, or leaves touch an apple, there may be found injury from the Bud Worm.

### The Real Totterers.

"Are Rents Tottering?" inquires the Literary Digest. No, but those who are paying them are.—Green-ville (S. C.) Piedmont.

## IMPROVEMENTS AT HOSPITAL.

Changes in Water System Add Much to Its Efficiency—W. W. Borton Had Contract.

Great improvement has been made to the plumbing at the hospital at the hands of W. W. Borton and the hospital staff are rejoicing over the excellent supply they are now getting since the alterations have been made.

Up to the present, there has been a lack of sufficient hot water for requirements and that fact has been a great drawback to the staff. Recently, however, Mr. Borton, in consultation with the board, suggested and carried out a scheme to overcome this difficulty. Originally all hot water was taken from the 60-gallon tank connected up with the kitchen range, but under the new arrangement, only the kitchen and laundry are supplied from this tank, the rest of the hospital being supplied from an 82-gallontank, with heater attached, which has been installed in the boiler room.

For further convenience and economy, a coil has been placed in the steam boiler, so that in the winter time when the heating plant is being used, the larger tank can be heated by the same furnace, instead of the separate heater. In addition to this, Mr. Borton has so arranged the connections, that in the event of either system getting out of order, both systems can be connected up and a full supply of water obtained just the same.

Needless to say the necessity for some such arrangement has been felt for a long time, and its usefulness has already made itself felt in a constant supply of all the hot water required.

### The Expert.

Very Old General (to ex-service man who had applied for post of valet)—"You know I'm an awkward case to deal with. I've got a glass eye, a wooden leg and a glass arm that need looking after, in addition to false teeth and a wig."

Applicant—"Oh, that's all right, sir. Before I joined the army I was six years in the assembling department of a motor works."—Bystander.

A man who does not advertise may know all about his own business, but no one else does.

He who has some goods to sell, And whispers the details down a well, Is not so apt to collar the dollars As he who climbs a tree and hollars.

## EAST REQUIRES WARM WEATHER

(Continued from Page 1).

advanced. Damage from recent violent wind and hail storms confined to comparatively small part of province. General outlook favorable. Fall rye headed out in some localities.

### Province of Quebec.

Cereal and root crops are looking well, but warm weather is needed. In some districts complaints are heard that there has been too much moisture. Hay and pasture everywhere in splendid condition.

### Maritime Provinces.

Conditions generally bright. An-

napolis Valley prospects are for fair to good crop of good quality apples. Good hay crop practically assured everywhere; in fact, all prospects good except in limited parts of St. John Valley, where floods did damage.

### General.

Heavy general rains have greatly improved prospects in every province east of the Rockies and hopes run high for better than average crops of grain and hay. British Columbia, however, is still suffering badly from drought.

### Just Dead Wood.

## NOW INSTALLING MACHINERY

Manager for Broder Company Arrives — Must Employ Chinamen, is Report.

Work on the cannery in preparation for the Broder Canning operations this summer is proceeding rapidly.

On Wednesday, Mr. H. Foreman, who has been appointed manager, arrived to take charge of the plant and install the necessary machinery. One carload came in on Wednesday and unloading and erecting of same has commenced.

The building itself is practically completed, and it is expected that all will be in readiness when the crop matures.

Work on the spur from the K.V. Ry. main line to the cannery site is also in progress.

Considerable feeling is aroused owing to the report that the cannery firm intend shipping in Chinamen to work in the factory, the reason being given that the company are unable to obtain the necessary white help required.

### CHERRY RIPE!

Take Your Own Baskets and Pick Them.

Milton, Ont., July 12.—A farmer south of Milton offers his cherries at 25 cents for 11-quart basket to those who will go to the orchard and bring their baskets and pick the cherries. It is reported that thousands of baskets of very fine cherries will rot on the trees in the Bronte district unless some more pickers are secured at once.

The special speaker at Lakeside church on Sunday evening, July 16, will be Principal D. J. Welsh, who will give a farewell address. Everybody welcome.

Don't fail to hear the Salvation Army Silver Band, of Vancouver, at the concert to be held in Lower Summerland, at 8 p.m., Monday, July 17. Admission free, collection will be taken. Ferry leaves Naramata at 7.30.

### ST. ANDREW'S GIRLS BACK FROM CAMP

The C. G. I. T. of St. Andrew's Presbyterian church arrived home Tuesday afternoon after having spent eight days of ripping good fun at Camp Killaloo, Dog Lake.

Monday morning, July 3, the C. G. I. T. started for Dog Lake on trucks. Mr. A. E. Smith took the girls down on his truck and Mr. R. Johnston came behind with the supplies. On arriving there, great excitement prevailed while the camp was being put straight, and the first meal prepared. The afternoon was spent in the water, and the evening in telling stories and singing songs. The ordinary rule of the retiring hour for the camp was broken this first night. The lights were all out by about half-past ten, but the girls got no sleep until the wee sma' hours of the morning.

The next two days were spent in swimming and sports of every kind. For one hour each day the girls retired to their respective lairs and kept rigid silence. My! How twenty-four tongues did go when the time was up.

Thursday afternoon the Young People of the church came down, one truck about 5 in the afternoon and a second about 7 in the evening, bringing the packers down. There were all together 105 at the camp that evening. Swimming was greatly enjoyed by all. In the evening, the C. G. I. T. gave a short concert, in which many humorous recitations and songs were given. The chairman's remarks were very suitable to the times. A huge bonfire on the beach caused much merriment for the remainder of the evening.

Friday-afternoon the mothers paid a visit to their daughters. Unfortunately it had rained quite heavily that afternoon, which had spoiled some of the sports for the girls. In the evening the Penticton C. G. I. T. visited the camp in the care of Mr. Miller and the C. G. I. T. leaders. The camp girls gave them a short program, then built a big bonfire. By this time there was gathered quite a large audience out on the lake. They seemed to enjoy the program and some of the men helped to get wood for the bonfire. The girls took it upon themselves to hint gently in their hearing that their great desire was to have a raft to dive from. The hinting had a good effect for Sunday afternoon a beautiful raft came floating down the lake. The girls greeted it with cheers.

Sunday morning service was conducted in camp by Mr. Alexander. The rest of the day was spent quietly. In the evening the Penticton C. G. I. T. sent out six cars and conveyed the whole camp into church. Mr. Miller gave the girls a very beautiful address.

Monday was certainly an exciting day. It was the last day at camp and the girls made the very most of it. In the evening the Penticton girls came out again and the whole camp had a big marshmallow roast. The men who made the raft for the girls were present and enjoyed the marshmallow as well. As that was the last evening at camp, the girls made a grand ending. Three hearty cheers were given to the men of the raft, and three of the very best cheers the girls could give were given to Mr. and Mrs. Alexander, Mrs. Denton and Miss Munn for giving the girls such a fine time. The next morning was a general bustle to get away, packing up and trying to recover all lost articles. About half-past nine, Clyde Caldwell came with his truck and took the luggage home, and Mr. Wilson, with Garnett's truck, came and conveyed the girls home. The girls did not get home when they expected, as they experienced a blow-out in one of the tires of the truck. But after all, a "blow out" was a mere item, that didn't worry them. They spent the time until it could be fixed on Penticton beach. The girls arrived home amid shouts and laughter, after having one of the best times they had ever known. They are all looking forward with happy anticipation until this time next year.—Contributed.

## PASSING EVENTS

LOCAL, PERSONAL, SOCIAL & OTHERWISE

A son was born to Mr. and Mrs. C. W. Haddrell at the hospital on Friday, July 7th.

A. E. Staples, representing the La Salle Extension University of Seattle, is a business visitor in town.

Dr. Thompson and A. McGowan accompanied Coun. R. Johnston on a trip to the head of Eneas Creek last Saturday.

A. Wishart, manual training instructor at the Central School, went to Vancouver on Sunday morning for a short visit.

Mrs. Guy Walden left on Wednesday morning for an extended trip east by way of Yorkton, Sask., Winnipeg and other cities.

The members of the Baptist C. G. I. T. returned from their annual summer camp at Crescent Beach on Wednesday afternoon.

While hunting ground hogs on Friday, G. Furuya, one of our Japanese citizens accidentally shot himself through the foot.

Mrs. Rose York, who is visiting her sister, Mrs. J. J. Baker, Mineola, is holding a week of special services in the Penticton Baptist church.

J. A. McLachlan, of Los Angeles, California, is visiting his brother here, A. McLachlan. Another guest at the McLachlan home is Miss Gladys Gibson, of Coronation, Alta.

O. Atkins returned by K. V. R. Wednesday noon from a visit to his former home in Ontario. Going by C. P. R., he returned by way of Detroit, Chicago and the Crow's Nest line.

About 60 members of the Baptist Young People's Society made a visit on Monday evening to the C. G. I. T. camp at Crescent Beach, where they entertained the latter with a program of songs, etc., over camp fires, a very enjoyable time being spent.

A score or more members of the Junior W. A. of St. Stephen's church enjoyed an outing last week from Monday to Friday. Half of the party went into camp in Peach Orchard under the charge of Mrs. Solly, and the other half were with Mrs. Wright at Crescent Beach. All had a good time.

Mr. and Mrs. T. J. McAlpine were in town for a day or two this week, having come from Westbridge in the Kettle River district, where Mr. McAlpine has been in charge of bridge construction. From here they went to Coalmont, where he will supervise a bridge being built across the Tulameen River by the public works department.

Mr. and Mrs. C. W. Lees motored down from Kelowna early this week and are the guests of her parents, Mr. and Mrs. W. H. Hayes. They plan on leaving here this week-end on a motor trip to Portland, Ore. It is their intention to spend the summer vacation here as Mr. Lees will be busy with his orchard and shipping business until he returns to his school at Kelowna.

Fruit growers of this district will no doubt attend in large numbers the meeting being called next Wednesday evening by the local branch of the B. C. F. G. Association for the purpose of hearing Mr. J. Forsythe Smith, Canadian Fruit Commissioner to Britain, in the Parish Hall, at 8 o'clock that evening on the subject of the "Old Country Apple Market." This meeting will be open to the public whether members of the association or not.

During the shower last Friday, lightning entered the home of W. C. W. Fosbery over the electric light wire, burning out the fuses and performing a number of great stunts. In one place it jumped from the electric light wire to a curtain rod and sent some plaster flying over the room. Upstairs where a wire was laying against a metal bedstead, the lightning passed through the bedstead and splintered the floor. Three chickens were killed under an electric brooder. None of the inmates of the house suffered.

To Mrs. R. M. Ross, who loaned her home for the occasion, and to the members of the hospital staff who gave the party at the home of Mrs. Ross last week in honor of Mr. A. M. Leslie, The Review wishes to apologize for the slip made by the reporter inadvertently describing the "kitchen shower" as a "kissing shower." The similarity of the two words evidently "got" him. Quite naturally such a description of a very proper surprise affair hurt the feelings of those who participated, which the editor sincerely regrets and can only plead insufficiency of help, through illness, of one of the staff for not having "edited" this and other copy received close to publishing time.

J. Pennant went down to Vancouver on Wednesday for hospital treatment.

Coun. R. Johnston, with a gang of men, started on Monday evening for the head waters.

Miss Dorothy Bowden, assistant in the Premier Hotel, is taking a week's vacation at the Coast.

Miss Doris Lefere, of Vancouver, came in on Sunday morning and is a guest of Mr. and Mrs. V. J. Nicholson.

Contractor Carson now has a good crew of workmen busy on the molding of the foundation of the new school building.

The first tomatoes to be shipped through the Summerland packing houses, was sent by express on Tuesday from R. Pollock's.

Miss Peterson arrived from Winnipeg on Wednesday's train to spend the summer vacation with Rev. W. A. and Mrs. Alexander.

Mrs. Ramsay, with her two children, motored up from Penticton and are making a visit at the home of Mr. and Mrs. W. Atkinson.

Her many friends and acquaintances will be glad to learn that Mrs. Lott has returned to her home from the hospital, greatly improved in health.

Rev. J. Willard Letch, of Vancouver, was a visitor to Summerland on Monday and spent a short time at the Baptist C. G. I. T. camp at Crescent Beach, his daughter being one of the campers.

On Saturday next the Boy Scouts will leave their camp at Miller's Point after spending two weeks there. They will leave their tents up for the use of the "Cubs," who will also make a camp there for a few days.

W. P. Seecrest came up from Oliver on Tuesday bringing with him a party of about fifteen, and was joined by that many more former neighbors in Prairie Valley at the home of J. Hermiston, where a jolly time was spent in picnicking.

Mrs. Loomer, who has been visiting her daughter, Mrs. Rines, returned to Penticton on Wednesday. This lady is a nonagenarian, but vital, is as bright as a button and thoroughly enjoyed her trip to and fro, which was taken by motor.

Mrs. Geo. Ross and young daughter came over from Castlegar this morning to visit her father, Mr. Bartholemew and Mr. Ross' mother, Mrs. R. M. Ross. Mr. Ross, who is C. P. R. agent at Castlegar, will come about the first of August to spend a month here.

Attention is directed to the announcement of a grand Vaudeville concert, made in our advertising columns. This will be the first entertainment in the re-modelled and enlarged Empire Hall, and is given under the auspices of the Ladies' Hospital Auxiliary.

On Wednesday afternoon Naramata visited Crescent Beach to try conclusions with the Summerland baseball team. The locals, however, proved so much superior to the visitors that the game was very one-sided, the score totalling such a difference that it would be too bad to mention it.

One pushing, advertising merchant does more to bring thrift into a community than fifty who huddle by their stoves and wait for business to be brought to them by the energy of some one else. A dozen live business men reaching out in the byways and hedges for business can make any town hum with prosperity, and the town owes them much for the hustle and bustle within its borders. Don't be a sponge and simply absorb; show a little enterprise and a spirit of helpfulness in the town where you live, and to some extent join hands with others in keeping your town to the front.

### SUMMERLAND WEATHER REPORT

Below is a report furnished by the Dominion Experimental Station here for the week ending Tuesday:

	Max.	Min.	Rain	Snow	S.S.
July 5—87	65	.....	.....	.....	9.5
July 6—88	62	.....	.....	.....	13.0
July 7—71	64	.....	.....	.....	0.3
July 8—79	52	.....	.....	.....	8.5
July 9—79	59	.....	.....	.....	7.2
July 10—72	54	.....	.....	.....	2.4
July 11—82	49	.....	.....	.....	13.2

As a result of the increase in piracy, Chinese shipping companies are arming their ships and placing details of guards on board.

## ORANGEMEN HAVE BIG DAY

Large Number Attend Picnic and Hear Speeches at Crescent Beach.

The 232nd anniversary of the Battle of the Boyne was celebrated at Crescent Beach on Wednesday, July 12th, when members of Orange lodges from Keremeos, Cawston, Penticton, Peachland and Summerland, with a goodly number of their friends and well-wishers assembled under ideal weather conditions. The Penticton lodge was accompanied by a fife and drum band, which contributed much to the effectiveness of the occasion and to the enjoyment of those present. By the lake shore, under shady trees, all congregated to hear the speakers of the occasion, whose voices mingled with the music of a north breeze and lapping waves. District Grand Master, Bro. Mills, of Keremeos, occupied the chair, when the following spoke: Bro. Clark, Penticton; Bro. J. M. Robinson, Naramata; Mr. J. W. Jones, M. P. P., Kelowna; Bro. Rev. H. E. Livingstone and Principal D. J. Welsh, Summerland.

District Secretary, Bro. Etches, of Keremeos, presented the following resolutions, which were unanimously passed:

"Resolved, that we re-affirm our unswerving loyalty to His Majesty King George V. and the members of the Royal Family; and our unceasing devotion to the Union Jack, the flag of our Empire and the emblem of freedom. We also declare our determination to maintain the unity and integrity of the British Empire and pledge ourselves to resist all efforts to weaken or dismember the same."

"Inasmuch as there is a perpetual effort to widen the range and enlarge the scope of separate Catholic schools and bi-lingual schools in certain provinces (especially in Ontario) we maintain that these schools create suspicion, distrust and division. Be it, therefore, resolved that we strongly declare for a national non-sectarian school system, which shall be the only system to receive financial aid from the public treasury."

"Be it resolved that we stand for full government inspection of all convents and monasteries, nunneries, asylums, hospitals, houses of correction or detention, or any other institutions where any or all of the inmates are refused free and unrestricted intercourse with the world and friends."

"To Lord Carson of Glencairn and Sir James Craig, premier of Ulster, and our Ulster brethren:

"Be it resolved that the Orangemen of British Columbia, assembled upon our Twelfth of July celebration, extend to Lord Carson of Glencairn and Sir James Craig our unbounded admiration and support in their splendid fight for the integrity and honor of Ulster. That we also extend to our brethren in Ulster the promise of our moral and financial support in their struggle for freedom and British connection. We are mindful of their sacrifice and shedding of their blood for liberty, and we assure them that the Orangemen of British America are proud of their challenge of "no surrender" to traitors and conspirators against our Empire."

The speakers dealt with the various aspects and purposes of the Orange institution, showing that it is based on worthy principles and stands for constitutional government, civil and religious liberty for all, irrespective of religion. They pointed out the great need for vigilance in Canada against disintegrating forces, emphasizing the supreme importance of maintaining a single public school system for the future welfare and security of our Dominion. Parents were urged to teach their children the principles of our Protestant faith and to instil in their minds the truths of scripture as a foundation for Christian character.

During the afternoon two sweet maidens tagged all contributors towards the True Blue Orphanage, Westminster, and realized \$35.

Bro. Alex. Miller ministered to the physical requirements of all in the way of sandwiches, soft drinks and ice cream.

A feature of the day, much appreciated, was the splendid exhibition of physical gymnastics given by our local boy scouts.

The baseball teams of Summerland and Naramata also took advantage of the occasion by playing a well-contested game.

Many friends held pleasant reunions towards evening around lunch baskets, after which all dispersed, having enjoyed the time.—Contributed.

Pa's Ready Answer.

"Pa, what is the Minority party?"  
"That's me, son," said Pa, "when mother and the girls are in the tonneau telling me how to drive."

## SOME USEFUL NUT CROPS

By W. S. Moore, Dominion Experimental Farm, Agassiz, B. C.

The cultivation of nuts as a commercial undertaking has lately been arousing much interest and it would be advisable to enquire into the possibilities of making a success in that line. Though there is a fair amount of profit in the growing of some varieties of nuts one must not be led to believe that there is any very great profit to be derived from the same; a fair return for one's work and money expended is all one can hope for.

Walnuts appear to be the most profitable of all the nuts, though there is considerable outlay in the foundation of a walnut orchard, and one would have to have the patience to wait some six or seven years before getting returns of any extent.

The walnut most favored for this locality, Pacific Coast, is the Franquette.

The soil best adapted to the growing of walnuts is a good loam with plenty of humus of good depth and well drained. The best method of propagation is by using nursery grafted trees on a known rootstock, that of any variety of the black walnut, *Juglans hindsii*, being probably the best of all.

In planting, use stocky trees of from 6 to 10 feet in height, of good diameter and vigorous, healthy root system, such trees can be obtained from any reliable nurseryman at \$1.00 to \$1.50 apiece. Plant your trees in rows sixty feet apart and thirty feet apart in the rows and when they begin to crowd remove alternate trees in the rows.

Head back your trees to 5 feet or

6 feet at time of planting. Good cultivation is necessary and cover crops of some leguminous variety may be practised.

A small amount of pruning only is necessary, merely trimming off the lower branches, which interfere with cultivation.

A walnut tree will come into profitable bearing at about seven years from the time of planting and a mature orchard should yield nine hundred to twelve hundred pounds per acre.

Walnut trees suffer little from the ravages of disease and insects and the expense in combatting such pests is small, the walnut blight and the walnut aphid being the principal pests and these can be controlled, the first by nicotine dust preparation and the latter by Black Leaf 40.

Walnuts when mature will fall to the ground and their outer husks will break open and this is used as the method of harvesting, for if the nuts are gathered on the tree numbers of the nuts so gathered will be unripe and therefore only culls. After gathering the fallen nuts they must be washed and graded before sacking and shipping to market. An average price obtainable for walnuts is from 16 to 18 cents per pound.

Taking 17 cents as an average price per pound and 1,000 pounds as an average yield per acre and the annual cost of operation \$60, cost of packing and marketing \$16, the net income from one acre of walnuts would be \$94 per acre. The market for walnuts is almost unlimited, all nuts used here are imported.

## Inventor of Telephone Sees Radio Future

Wireless days for commercial telephoning have arrived. The radio-phonograph has been taken from the "plaything" class. Alexander Graham Bell, inventor of the telephone, smiles as he recalls that his invention received the same public reception. The Bell Company announced the opening of a million dollar radio broadcasting station at New York. Similar plants are to be built in other cities throughout the U. S. Services may be had for any purposes except advertising, say officials. This new photo of Mr. Bell was taken at Atlantic City. With him is his daughter, Mrs. Gilbert Grosvenor.

## CHEESE IN THE DIET

Its Value as a Food Told in an Official Pamphlet.

In a pamphlet entitled "Why and How to Use Cheese," recently issued by the Dominion Department of Agriculture, Ottawa, Miss Helen G. Campbell, Dairy and Cold Storage Branch, states that there are probably 250 different kinds of cheese made in the various countries. While this will doubtless be news to the majority of people, it is not difficult to credit when it is considered that practically in every country, civilized and uncivilized, some form of cheese is in use. Settlers from France brought with them a knowledge of cheese-making to this country 300 years ago. Today the annual production amounts on an average to around a hundred and fifty million pounds, its value being approximately thirty-five million dollars. While the home consumption is growing, five-sixths or more of the product finds a market abroad, where in point of quality no cheese stands higher than Canadian.

Sixty years ago such a thing as a cheese factory was unknown to Canada, and it was not until 1864 that the first establishment of the kind was started in Oxford County, Ont. Up to that time all the cheese in this country, except what was imported, was made on the farms, but it was not many years before the merits of

of the factory system became widely recognized, and the making of cheese on the farms became a memory. "Cheddar" is the kind principally made in this country, but cream cheese finds a considerable market among us, and a brand known as Oka is made in Missisquoi County, Que., where the second cheese factory in Canada was established, while

at the Dominion Experimental Farm at Agassiz, B.C., real "Stilton" is made. Cottage cheese is also made to some extent in private households, and a full description of the method is given. Some forty receipts for making dishes in which cheese plays a principal part are given in Miss Campbell's pamphlet. The advantages of cheese as a food are also set forth. Incidentally it is stated that the consumption of cheese is about thirteen pounds per capita in the United Kingdom, compared with not more than three pounds in Canada. The author thinks Canadians could increase home consumption with considerable benefit to themselves.

No Lizzie for Lizzie.

Miss Lizzie Adams was horseback riding Sunday.—Martin County Advertiser.

## "Trouble"

Behind your telephone service is the "plant"—a complicated mechanical equipment of poles, cables, wires, switchboards, instruments, etc., carefully adjusted and absolutely dependent on perfect construction and maintenance.

The "plant" is constantly subject to accident and outside interference. Storms, fires, the carelessness of workmen, the pranks of children, concealed defects of material—all play their part.

The telephone company maintains a skilled force whose sole duty is to quickly restore service interrupted from any cause. Your lines are constantly watched and tested.

In the case of trouble we are generally the first to know it, but a notification to our manager (Phone 1) when there is anything wrong will be appreciated.

THE SUMMERLAND TELEPHONE CO. LTD.

READ REVIEW CLASSIFIED ADVERTISEMENTS

## WILL SPEAK AT CONVENTION OF IRRIGATIONISTS

Leading Authority on Irrigation Will Address Western Canada Irrigation Ass'n.

Among the many valuable and interesting addresses that will be given at the Sixteenth annual convention of the Western Canada Irrigation Association, to be held at Maple Creek, Sask., and Brooks, Alta., July 26th to 29th, will be one by Mr. Frank W. Hanna, on the subject of "The Limits of Profitable Irrigation by Pumping."

Mr. Hanna is now general manager of the Canada Land and Irrigation Company, at Medicine Hat. Previous to coming to Western Canada in April, 1921, he was consulting engineer to the United States Reclamation Service, a position he had occupied since 1915, except for a period in 1918 and 1919, when he was assigned under the activities of the United States Reclamation Service to conduct an investigation of the unused lands throughout the northern parts of the United States and to make a report on them.

Mr. Hanna was born at Geneseo, Ill., in 1867. His elementary education was obtained in the country schools of Iowa and the Normal school of Shenandoah, Iowa. He graduated from Highland Park College at Des Moines, Iowa, receiving the degree of B. S., in 1893, B. C. E. in 1894, M. S. in 1898 and C. E. in 1902. During 1894 and 1895, Mr. Hanna was assistant professor in the department of higher mathematics and civil engineering in Highland Park College, and in 1895 became dean of the departments named.

In May, 1903, Mr. Hanna was appointed assistant engineer in the United States Geological survey and was assigned to stream gauging work in Iowa, Missouri and Indiana, and in 1904 he was in charge of the Chicago district, comprising nine states in the Upper Mississippi Valley and the Great Lakes region. This work involved the performance of stream measurements, stream surveys, power investigations, compilation of hydrographic reports and administrative duties.

In the fall of 1906, Mr. Hanna was transferred to the Reclamation Service and put in charge of the technical section of the service at Washington, D.C. On June 1, 1909, he was appointed projector engineer of the Boise project, and held this position until the practical completion of the project in July 1912. In this position he had full charge of the project of 243,000 acres, involving designing, constructing, operation and administrative duties.

During the summer of 1912, Mr. Hanna was again assigned to the Washington office of the United States Reclamation Service, this time in charge of the engineering division,

## ADVERTISING IS GOOD INVESTMENT

That the use of our columns for advertising purposes of all kinds is a means of satisfaction to many, is the gratifying results almost daily brought to our notice, and we would urge our readers to make more use of this publication in a business way.

One day last week a much-valued watch was inadvertently lost on one of the principal business streets of the municipality and a hurried phone call to the office of The Review just an hour or two before going to press, enabled the owner to insert a short notice of the loss. To the owner's delight almost as soon as the issue was in the mail, a phone message was received from the party who had picked the article up. The watch was similar to many thousands of others and it was in an almost hopeless spirit that any attempt at recovery was made. Suffice it to say, that both owner and finder were made happy and The Review, at only a trifling expense to the advertiser, was able to act as the medium.

Last week also one of our enterprising business men put on a sale and inserted a fairly large announcement in our paper, with the result that before night a very large proportion of his special stock was taken up by the crowd which thronged his store during the day.

In putting these facts before our readers we are adopting the only way we have of advertising our wares which in other words is "advertising," so that although our attitude may appear a bit egotistical, we are doing what every other business is endeavoring to carry out, viz., to sell our "advertising space" instead of hardware, groceries, dry goods, etc., as the different firms do.

Provided the merchant has the right goods at the right price, we can through our advertising columns, get the customers to his door.

Teacher—"Charles, you may spell the word 'neighbor'."

Charles—"N-e-i-g-h-b-o-r."

"That's right; now, Charles, can you tell me what a neighbor is?"

Charles—"Yes, ma'am; it's a woman that borrows things."

where he remained until his appointment on February 1, 1914, as supervising engineer of the southern division, involving six irrigation projects and covering reclamation operations in Texas, New Mexico, Arizona, Southern California, Southern Colorado and Utah. He remained in this position until March 1, 1915, at which time he was appointed consulting engineer of the United States Reclamation Service.

Mr. Hanna is the inventor of an angle multiselector and of two irrigation water meters. He has written numerous articles on engineering subjects for the engineering magazines. He is a member of the American Society of Civil Engineers and formerly of the Cosmos Club, Washington, D.C.

# Debts and Debtors

If we give a merchant our custom, we have a right to expect him to advertise—to tell us weekly in the columns of The Review what he has for us. Advertising is shop news, designed to inform us, save our time, and bring to our attention desirable merchandise.

Every retailer who is alive to the interests of his customers has a message—often many messages—for his customers concerning new goods, special offerings, and things that we ought to know about. Customers and non-customers will be attentive and responsive to these messages, if they are delivered every week in the form of advertisements in The Review. The way to get more business is to ask for it.

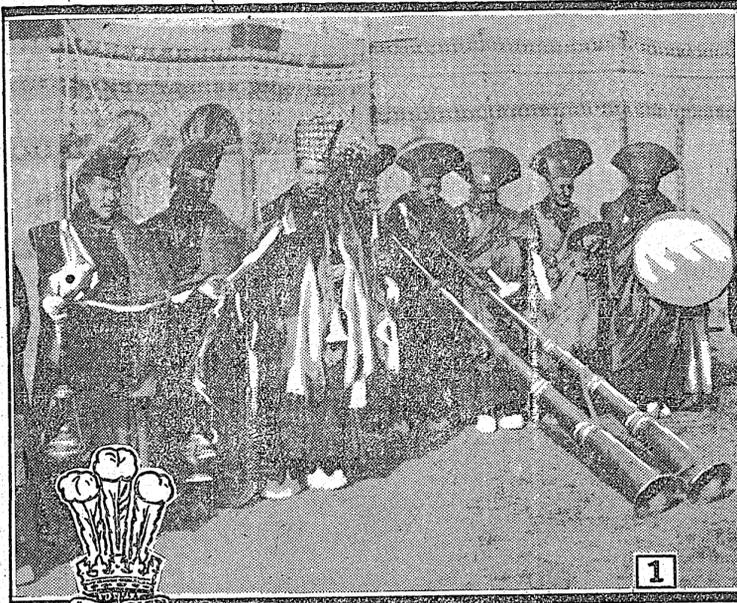

## A NOTE TO MERCHANTS.

Would YOU buy much or regularly from firms that never solicit your trade? Do you not say—"The firm that wants my business must come after it?"

Yet some of you say, in effect, to your customers—we're here. If you want our goods, come and get them, but don't expect us to go after you." It's a poor rule that doesn't work both ways.

(1) A band of Tibetan priest or Lamas that greatly assisted in giving a rousing welcome to H. R. H. the Prince of Wales when in Northern India recently. The size of the horns and the gang would seem to indicate that the welcome was a hearty one.  
(2) A handsome bronze memorial erected by the C. P. R. to those of its employees who gave their lives in the Great War. The figures are more than life size and on the base is inscribed the following words: "To commemorate those in the service of the Canadian Pacific Railway Company who, at the call of King and Country, left all that was dear to them, endured hardship, faced danger and finally passed out of sight of men by the path of duty and self-sacrifice, giving up their own lives that others might live in freedom. Let those that come after see to it that their names be not forgotten. 1914-1918." Replicas of this statue will also stand in Winnipeg and Vancouver.  
(3) A thrilling canoe trip. This picture was made at a point where the waters of Lake Penage emerge into one of the streams that find their way into the waters of northern Lake Huron. Lake Penage is famous for its game fish. It is reached from White Fish, near Sudbury.  
(4) Miss Jessie Williams, the young lady who created something of a sensation on a Liverpool landing stage by suddenly changing her mind and hurrying ashore just as the Canadian Pacific liner "Melita" was about to bring her to Canada to meet her fiance. She was for the moment overcome by a feeling of loneliness, but later gained courage and made the trip out in the "Metaxawa."  
(5) The troubled times in Ireland are responsible for a good deal of emigration from that country, and Canada is getting a fair share of those leaving. The passengers with their baggage were photographed while being taken by tender to board the steamer "Tunisian" which has resumed its Irish service. They were bound for Canada by way of Quebec.  
(6) A new and charming photograph of Miss Amelia Galli-Curci taken recently at the Vancouver hotel, Vancouver, B.C.  
(7) A boon for the short people. A novel and convenient periscope arrangement by which these two girls got an excellent view of the Oxford-Cambridge boat race despite the fact that the crowd kept them far from the river-side.  
(8) Germans and Russia get together at Genoa. Dr. Wirth, the German Premier, on the left, chatting with M. Tchitcherin, the chief Russian delegate, second from the right. Between the two stands M. Krassin and on the extreme right, M. Joffre.

## Peachland Doings

A Weekly Chronicle Furnished By Our Local Representative.

On a recent afternoon the Peachland W. A. finished up their first season's activities by giving an ice cream social on the lawn of Mrs. Clements, by her kind invitation. The members contributed cakes and cream and the ice cream, served in a dozen different varieties, was made by Mrs. Clements, who took upon herself the main burden of the preparations. She had efficient helpers in the Misses Clements and Edgecombe and Mrs. Ted Smith. The soft drinks were much appreciated as it was very hot. There was a very fair attendance of the public, but the cherry picking and an approaching holiday kept many away. However, the W. A. added the very nice little sum of \$24 to its fund.

Another new auto has been added to the Peachland list, this time in the Trepanier section of the community, being a brand new Chevrolet at the Buchanan home.

Mr. Harry Logan spent a day in town recently and while here visited the old home place now owned by Mr. Geo. McBean. Harry had been called to Kelowna owing to the illness of his father.

Miss Ruth White, of the nursing staff of the Vernon hospital, is spending her vacation here with her parents, Mr. and Mrs. Wm. White, and the rest of the family.

Miss Doris Winger was a visitor to Summerland early last week.

Mr. Shannon, of Edmonton, is a guest of Mr. Carson.

Mr. and Mrs. Chas. Kay, of Vancouver, spent a few days last week here with their parents, Mr. and Mrs. Jas. Kay, and also guests in the home of Mr. and Mrs. Dryden. Their visit at this time was partly due to the illness of Mrs. Kay, sr., who, we are pleased to be able to report, is recovering.

Among the visitors in town last week were Mr. Sam McClymont and Mr. Thackery, of Vancouver, who were holidaying at Naramata and

took a short run up to Peachland to visit Dr. Buchanan.

Mrs. and Miss I. Murdin left early last week for Gladstone, their old prairie home, where they will spend the vacation months visiting relatives and friends.

Mrs. Walters and baby, of Kelowna, spent last week in town, guests of Mr. and Mrs. Smalls. They returned home on Saturday morning.

Mr. Walter Wilson arrived in from Alberta last week to join his wife and little girl here at his parents' home, where they have been spending several months. It was rather fortunate that Mr. Wilson arrived when he did, owing to the fact that shortly after his arrival an accident occurred in which his wife and mother were both badly hurt. They were in the act of cherry picking when a limb gave way with the younger Mrs. Wilson and in her fall she knocked the elder Mrs. Wilson and her ladder down and both received considerable injury. Besides a general shaking up and a number of bruises, the elder of the two received a fracture of one of the bones of the ankle and the younger woman's hip joint had been put out. In the fall but had gone back again and her back was considerably hurt. It was thought for a while that it would be necessary to remove them to the hospital, but we are glad to be able to report that they are making good progress toward recovery.

Miss Campbell, accompanied by her nephew, arrived from Edmonton last week to holiday in Peachland for a short time. Miss Campbell is head nurse on the staff in connection with one of the schools in Edmonton.

Mrs. H. McCall and son Arthur, were visitors to Kelowna on Wednesday.

The Misses Han, of Brantford, Ont., were guests last week of Mr. and Mrs. Wm. Douglas. They left on the southbound boat on Friday.

Mrs. Spredbury, of Calgary, arrived last week to visit Mr. and Mrs. Ruffie.

After a few weeks' visit with relatives, Mrs. W. Henry and her little

boy left on Thursday morning to return to their home in Manitoba.

Report of Division III, in the Central School, which was not included in report for ending of term: Class leaders in First Primer—Doris Kudelka, 1st; Zella Marr, 2nd; Ella Zold, 3rd; Eric Ashley, 4th. These were promoted to second primer. Second Primer—Myrtle Kudelka, 1st; Arthur Topham, 2nd; First Reader—Jean Hyde, 1st; Helen Douglas, 2nd; Dick Smith, 3rd; Richard Hardisty, 4th; these being promoted to second reader. Second Reader—Alice McCall, 1st; Will Wright, second. The honor roll for punctuality and regularity was given to Jessie Brinson; for deportment to Zella Marr, and for proficiency to Helen Douglas.

The school holiday season is bringing back home some of our teachers who have been taking charge of schools elsewhere throughout the province and among those who have arrived to date are Jack Hamilton and Joe Morsh. Miss Carter, who has been teaching in Pentiction is visiting Miss Jean Dryden before returning to her home in Vancouver.

Mr. H. McCall was a passenger to Pentiction on Thursday evening last, paying a short business call there.

Mr. R. H. Houston returned home on Friday after a short visit south to see a sister who has been quite ill.

Mrs. F. A. Maxwell and her sister, who has been visiting with her spent Friday in Kelowna.

Mr. Hawks and family have recently moved from the Bulyea property to their new home, the old Vatican, which he recently purchased and overhauled.

Messrs. Cudmore & Drake, at the general store, have disposed of their old gasoline pump and installed a brand new Bowser pump, which makes an imposing looking pump for the town. This one has a filter system and the boys are well pleased with its operation.

On Friday evening a few of the members of the Baptist Sunday School who have entered a memory course contest, motored up to Mr. Geo. Keyes', where they enjoyed tea and the hospitality of the Keyes'

home and were examined on their course before a committee comprising Mr. and Mrs. Keyes and Miss M. Smith. Supt. H. E. McCall and teacher Mr. Murdin accompanied the group.

Mrs. H. Williams is enjoying a visit from an old acquaintance, Miss Christie, of Winnipeg, Man., who arrived in town last week.

Mrs. E. House has been an unfortunate sufferer for a short time as the result of a rather bad poisoning from poison oak or ivy, but is now well on the way to recovery.

Visitors to Kelowna on Saturday were Mr. Carson, Mrs. J. Michael and Mr. J. McKinnon.

The Peachland Girls' Basketball team, with a number of friends and supporters, motored to Westbank on Saturday evening to play their Westbank friends another game. They played another good game and came off victorious with a score of 18 to 10.

Mrs. Brinson, sr., of Pentiction, was a visitor last week-end at her two sons' homes. Her son, John, took her back to Pentiction on Sunday afternoon by auto.

If a man were wise he would cry "Help, help!" when he sees his wife coming at him with a sweet smile after she has been downtown shopping.

## FIRE PREVENTION BYLAW CREATES TWO ZONES

(Continued from Page 1)  
of two lots east of Elliott's store on Shaughnessy avenue, for which he offered \$125 per lot. After considering the matter fully, and in view of the fact that these lots are assessed at \$450 each, the council decided that the offer submitted by Mr. Morrow was not adequate.

A letter of complaint as to shortage of water supply at the Experimental Farm was received from Superintendent Helmer. Coun. Kirk remarked that the Trout Creek district on Sunday, June 20th, was getting 2.7 acre feet per acre. Reeve Campbell pointed out that the government had not been giving the money promised to be contributed. Mr. Helmer stated in his letter that the minister of agriculture would shortly be visiting the farm, and the clerk was instructed to write and ask Mr. Helmer to let the council know the date of his arrival as they would like to meet him in regard to the matter.

Capt. Temple wrote in regard to the letter issued by the municipality re the use of domestic water for irrigation purposes, and stated that he had no other means of irrigating except through domestic supply, and asked that an exception be made in his case. His request was granted subject to the control of the ditchman, as to time of use.

J. L. Logie, for the Development Company, wrote refusing to pay \$300 for the half lot immediately north of the Empire Block, and after consideration, Coun. Kirk moved that his offer of \$275 be accepted.

R. Morrow's letter asking for permission to enclose lots 17 and 18 at the rear of his premises with wire for chickens was not entertained.

W. C. Kelley reported that he had been unable to get Engineer Latimer to correct palpable errors in the survey of the reservoir site, and suggested action be taken in the matter, and the clerk was instructed to notify Mr. Kelley to that effect.

The Salvation Army, who are visiting Summerland on the 17th, wrote requesting permission to use the band stand on the lake shore, and asked that the electric lights be installed. This request was granted, and instructions will be given accordingly.

Fire Prevention By-law 167 was passed. The fire zone included in this bylaw includes the Fruit Union buildings on both sides of Shaughnessy avenue and Beach avenue as far as the Hogg property, and the Grocerteria subdivision to east side of Fruit Union, and also the new subdivision where Mr. McPherson is reported to have bought.

Bylaw 169, acquiescing in the laying of the spur track by the K.V.R. was also passed.

The clerk reported in regard to payment of irrigation arrears, and showed that in the majority of cases promises made had been kept. In some few instances no payments had been received and it was felt that unless action was taken, criticism would be incurred, and the clerk was instructed to write a further special letter to delinquents.

## OPENING MAIN RESERVOIRS NEXT WEEK

(Continued from Page One)  
age and recommended raising the Garnett Valley dam and building a storage dam on Deer Lake. This lake is at the head of Deer Creek, which flows into the north side of Trout Creek some miles beyond Faulder. This suggestion seemed to meet with favor and arrangements will be made to have proper plans prepared at an early date.

Foreman Tomlin reported that he had visited the Trout Creek district, and found large supplies of water being diverted to several farms very much beyond the quantity stipulated by N. F. Norrington, district water engineer. One flume, two feet wide, was running five inches deep. Two inches would be the maximum to which the land was entitled. Another two-foot flume was running three inches deep, also greatly in excess of the amount allowed. Another 16-inch flume, supplying two places, was running five inches deep. With respect to this matter, the clerk reported that Mr. Norrington had suggested that one of the council interview these water users and if they do not cut down the flow, that he

## VERNON F. G. U. CONSIDERS REPORT ON ORGANIZATION

At a largely attended meeting of the Vernon Fruit Growers' Union, held at Vernon on Monday afternoon, the report presented by the organization committee to the shareholders of the O. U. G. was discussed at length.

The growers passed a resolution endorsing the recommendations of the organization committee in their entirety.

The lengthy letter issued a few days previously by Mr. Mutrie, president of the O. U. G., criticizing the committee and its work, has been freely circulated, and the action of the growers at this meeting would appear to be a direct answer thereto.

would come and attend to the matter personally. Reeve Campbell volunteered to go and talk with these water users.

Both Coun. Ritchie and Foreman Tomlin expressed the opinion that a measuring weir should be put in for the water going to the Trout Creek Water Users' community. This would dispense with friction as users there now claim that not enough is let down to them.

During the discussion of the water situation, Coun. Johnston reported that he had just visited Canyon Creek district, and there was a good flow of water coming down through there from the Snow Mountain watershed.

Different orchards were cited as instances of different methods of orchard practice. While some orchards were showing apparent lack of water, other orchards under similar conditions receiving no more water were in excellent condition. The revee stated that he knew of orchards where the owners were cutting hay and trying to grow fruit on the same land. Orchards with a good mulch of alfalfa were thriving well with the same supply of water that was insufficient for other orchards.

Representing Mrs. Bentley, owner of property near the main intake on Trout Creek, a Vancouver law firm wrote declining to accept the offer of the council to pay \$200 for right of way for a pipe line across the property. They agreed, however, to accept any amount in excess of this sum that a member of the council and an agent named by them might agree upon. The council will also be required to pay the charges of this representative and approximately \$50 to the law firm for their charges.
