

The Summerland Review

DEVOTED TO THE INTERESTS OF SUMMERLAND, PEACHLAND AND NARAMATA

Vol. 4, No. 52

SUMMERLAND, B.C., JULY 26, 1912.

Provincial Librarian hole No. 206

Experts Give Optimistic Addresses.

Emphasize Necessity of More Frequent and Thorough Spraying.

Conditions Here are Ideal for Fruit Raising. Comparative Immunity from Serious Pests and Diseases. Prospects Excellent for the Future.

A number of officials of the Provincial Horticultural Department were in town on Tuesday, and their visit was the occasion of the calling together of the members of the Farmers' Institute and others interested in horticulture. But a short notice of their arrival was received and many of the citizens were not aware of their presence in our midst, with the result that the attendance was not as large as it otherwise would have been.

Mr. J. M. Robinson acted as chairman for the evening, and on the platform were Messrs. Thos. Cunningham, W. H. Lyne, Earle Barnhill, Simms, N. Rex Hunt, Forsell and Dr. Bonquet, of the Horticultural Department. Reeve Thomson, Mr. J. Lawler and Mr. F. Rayburn, of Okanagan Centre, also occupied chairs on the platform.

INSP. CUNNINGHAM.

Mr. Cunningham made a few introductory remarks speaking particularly of his work as Inspector of Fruit Pests. His message was largely one of warning, emphasizing the necessity of orchardists always being on the look-out for possible development of insect pests, fungus or other diseases. Speaking of the thoroughness with which his Department carried out its work, he instanced the three years' fight the Department had once experienced in overcoming an invasion of the codling moth near Kamloops. All men were treated alike and no favors were shown, even a high sheriff and the Lieutenant-Governor had suffered the necessary removal of infected trees and shrubs by his Department. He spoke complimentarily of the able staff under him, saying they were all pure, clean men, conscientious and determined to do their duty. He felt grateful to the University at Pullman, Wash. for sending to him several of their best men, some of whom have since decided to remain in British Columbia indefinitely. They have found here an opportunity to do good, and have decided to remain.

He had asked of the Government sufficient money to keep men all over the Province. He hopes to have an expert in Summerland, and will have one in Vernon.

Inspector Cunningham then spoke of the unsatisfactory telegraphic communication the Okanagan Valley has with the outside world. He mentioned a serious delay with a telegraph message he was anxious to send from Vernon late Saturday evening. It was, however, held up until Monday morning. He had registered a complaint, with the result that the telegraph operator there would now have an assistant. Speaking of the Summerland service he asked, "Why does this office now close at 7.30? By the time the man get through with their orchard work and get to town, the office is closed." He felt that they should have constant connection with the outside world, and that telegraphic enquiries should be made of, and received on the market conditions. Across the line in little country places the telegraph offices were open till midnight. Mr. Cunningham then spoke of the pleasure he derived from his work, saying that some people felt that at his time of life he should retire and enjoy more leisurely the few remaining years, but he felt that it was his duty to be working, as in that way he could best serve his fellow men.

MR. REX HUNT.

Chairman Robinson, in a few pleasing remarks, complimented Mr. Cunningham upon his work, and his wonderful success in keeping British Columbia orchards so free from pests and diseases. He then called upon Mr. Rex Hunt, who spoke on Summerland's advantages in raising apples from the standpoint of climate.

Mr. Hunt reviewed the history of apple growing in the Pacific States and compared conditions there with the revival of apple

growing in the East, and of the increased competition the East is giving the West. The apples grown further south, while of high color and of good shape, lacked the flavor of the northern grown apple, and he found that here we not only grew apples of excellent flavor, but of good keeping qualities. This was one of our advantages. Again, in Washington and Oregon they had many pests to contend with of which he enumerated a few: leaf curl, shot hole fungus among the peaches; scab, four varieties of fruit spots, black spot canker, and other fungus diseases among apples. In many places year after year, there is only one-third of the crop free from fruit spots, and there were many varieties of canker. With a little cleaning up of our orchards, none of these would be seen here. We have some insects here, but nothing serious, while to the South they are much more plentiful and of greater variety. There they have the bud weevil, San Jose scale, codling moth, none of which are to be found in British Columbia. The San Jose scale requires constant spraying, and after a number of years it has become immune to the sulphur-lime spray, and oils are now being tried similar to those used in the Eastern States. In the Eastern States the scale has become immune to the oils, and they are there trying the lime-sulphur. If it should become immune to both, he did not know what the result would be. Until recently they sprayed nine times for the codling moth alone, but of late, by doing it just at the opportune time, as much was accomplished by three or four sprayings. He wished it understood, however, that they were not out of business down there by any means. We have here no San Jose scale or codling moth, only the lesser evils to contend with. Here the laws were respected and enforced; down there laws were being made only to be as continually evaded, and the officials were never able to enforce them. Since he had come here, he had had a request from a prominent man in Washington for a copy of the British Columbia horticultural laws, which were reputed to be the best. In Washington public opinion is the only law of enforcement, and if a man displeased his neighbors in the breaking of a law, he might be tarred and feathered and ridden out of town on a rail. The officials, however, were unable to enforce horticultural regulations. He mentioned the trouble they were having this season in Yakima and other districts with fire blight. He knew one man who had lost \$10,000 in a ten acre orchard from this cause alone. He thought we were a people to be congratulated.

MR. EARLE BARNHILL.

Mr. Earle Barnhill was the next speaker called upon. Mr. Barnhill is Government Plant Pathologist at present stationed at Kelowna, but the whole Okanagan is his field. He has been experimenting in spraying and had with him some badly spotted apples which he had brought from that district. There was an orchard with some fifteen year old trees that had not produced clean fruit for eight years. He had, however, been giving it special attention, and prepared a special spray which was used just as the buds were bursting, and again a little later, with the result that this year the fruit was almost wholly clean for the first time in eight years—this the result of spraying. The speaker said that while our orchards are clean now, they cannot be kept so without more spraying; one spraying will not do it. He ridiculed the little hand sprayers so generally in use, and said that in order to make spraying effective power machines with a pressure of two hundred pounds should be used. When he sprayed, the speaker said he sprayed three sides of the tree up and down. He sprayed against the wind using glasses to protect his eyes. We have got to come to the point of better spraying.

Mr. Cunningham explained something of the good work that Mr. Barnhill was accomplishing, and his announcement that Mr. Barnhill was here to stay was received with applause.

MR. W. H. LYNE.

Mr. Lyne then followed, speaking of the present outlook for fruit growing. Our prospects, he said, were the brightest, or as bright as any fruit district on the continent. We were starting under new conditions and would be able to benefit by the experiences of the older districts to the south of us. Our success, however, depended largely upon ourselves. We must heed the commercial demands of the business. Too many looked upon fruit growing as something to retire to. A man had much better sell out at once than engage in the occupation with that impression. Fruit growing required just as hard and intelligent work as any other line of business. We were starting here with a clean slate, and he urged that we keep it clean. Mr. Lyne then spoke of the work of the Department in preventing the spread of disease. Every imported box of fruit was inspected, and much fruit was condemned. He mentioned particularly a shipment of some fifty boxes of apples which arrived in Vancouver, and which he would not allow to be put on the open market. The shipper was notified that the apples must be repacked or shipped back to the orchard, as he would not allow them to be sold. The grower went to Vancouver and repacked the fruit, getting sixteen boxes of No. 1 out of the fifty, and realized more for these than the wholesaler would have paid him for the original fifty. The growers have commercial obligations. They must pack and ship their goods according to standard and quotation. The condemning of nursery stock was next touched upon by the speaker, and he again used one particular instance where a Washington nursery man was notified that he could not sell a certain shipment of considerable proportions in B.C. The shipper came to Vancouver and spent a week there trying to get his stock past the Inspectors; but finally shipped them back to Washington, and before leaving complimented the Inspectors on their work, saying that after all their thoroughness was a help to his business as of some thirty nurseries in that state not one half dozen dared ship to B.C.

MR. FORSELL.

Mr. Forsell of Pullman then followed, reading a prize essay he had prepared in Washington on "How To Make Country Life More Attractive." The paper, while an interesting one in itself, was not as well listened to as it would have been at any other time. The audience were impatient to hear more from the orchard specialists who were present.

DR. A. BONQUETT.

Immediately following Mr. Forsell, the chairman called on Dr. A. Bonquet, who has already made considerable reputation for himself. Dr. A. Bonquet said that he had intended to speak on the life history of a fruit tree, and also on something of the man behind the tree, but due to the lateness of the hour he preferred to speak of the man only and of him he only had one thing to say. Formerly the man behind the plough or the man behind the tree lived largely within himself, but times have changed, and man must live and work for the good of all. "Unless you understand this, you will vanish from the world's activities; it is your duty," he said. At times we were called upon to make sacrifices for the benefit of our neighbors. "As the noble men on the 'Titanic' realized and did their duty, so we, in our occupation, must consider others and work for the good of all. 'I know the nobilities of your hearts,' he continued, "and know you will all work together."

It was only after an urgent request had been made by Mr. Cunningham, supported by the audience, that Dr. Bonquet continued, taking up the history of the fruit tree. He first spoke of the work of the cell of which new things are being learned all the time. Then he dealt with the seedling, showing how that after the planting of the seed and the first season's growth of the little seedling it was taken

up from the soil, the top cut off, a new top grafted on, put in storage for the winter, and replanted the following spring and made to grow. And a nurseryman certainly knows how to make a tree grow. Their ability to do so lies in their knowledge of root growth. The little tree springs to a good height in one summer. The whole plant is forced by irrigation. Soon there will be frost again, and the trees must be out of the field. To remove them is a good process, but not the best for the fruit growers. The nurseryman, however, must fill the demand and produce a tree to your fancy. The little tree is taken out, defoliated either by machine or hand, pruned, its roots cut back and then stored for another winter. The tree then goes into the hands of the buyer and is planted. There is usually a good root system but frequently no tap root. A tree starts to grow soon after the planting and tries to penetrate the soil. Usually the root growth is superficial, spreading out immediately below the surface, but with no tap root it does not grow down. Herein is the trouble of all orchardising. The tree has not a solid root system which is the cause of many troubles. Irrigation is begun, and generally it is superficial; the roots grow towards the water and the root system, therefore, stays superficial instead of going down. If irrigation is not frequent this superficial root system quickly dries, the tree cells become inactive, and the tree suffers. This may occur several times in a season, frequently causing

[Continued on Page 8.]

FRUIT INDUSTRY SUFFERS A SEVERE LOSS.

DEATH OF MR. R. H. AGUR CAUSES GENERAL REGRET.

The death of Mr. Robert H. Agur, of Summerland, President of the British Columbia Fruit Growers' Association, has aroused the keenest regret throughout the province, and it is generally agreed that his loss is almost irreparable.

Hon. Price Ellison, Minister of Finance and Agriculture, expresses his very deep regret at the death of Mr. Agur, and his sense of the loss this would be to the fruit industry.

"Mr. Agur was the very head and front of fruit-raising, not only in the Okanagan, but in the whole province," says Mr. Ellison. "I doubt if there was a man in British Columbia who was more optimistic in regard to it, and certainly none more ready to give his time and means to the advancement of the industry in all its branches. The department looked upon him as a wise counsellor, and was glad to profit by his great knowledge. The Fruit Growers' Association, of which he was so long the President and the moving spirit, will feel his loss greatly. He was a keen business man, and his advice on that very important side of the industry, which really few growers are in a position to appreciate, not having had a business training, was invaluable. He was always ready to give all the information and advice he could to all who called upon him, and it will be long before we have another among us who will be able to fill his place."

The deepest regret was expressed by Mr. W. E. Scott, the Deputy Minister of Agriculture, at the death of Mr. Agur, an old personal friend of his own, and a gentleman whose loss to the fruit growing industry of the province and to the Okanagan district would be very deeply felt. Mr. Agur, in addition to being the President of the B.C. Fruit Growers' Association, was the first Vice-President of the Western Canada Irrigation Association, President of the Okanagan Fruit Union, and Councillor and Reeve of Summerland. His influence in his own district was immense, and he spared no effort to advance the interests of fruit growing in British Columbia. A keen business man, yet he was always doing something for those who came for aid or advice.

At Summerland Mr. Agur had some fifty acres of fruit trees, and operated a cannery in conjunction with his ranch.

Mr. Wm. Winslow also voiced his sense of the loss sustained by the province. — Victoria Colonist.

Municipal Council In Special Session.

Evening Meeting to Relieve Forthcoming Regular Session.

Main Business is Consideration of Communications. New Sub-Division At West Summerland is Approved

A special meeting of the Council was held at the call of the Reeve on Wednesday evening in the municipal offices. The object of the special meeting was to clear up some business that had accumulated so that too much would not be waiting the regular meeting. All the members were present. The Council got down to business about eight o'clock.

A MISUNDERSTANDING CLEARED UP.

The minutes of the previous meeting were read. Objection was taken by Coun. Lewes to the statement that the Reeve had later voted in favor of granting Hon. Wm. Hespeler the discount as read from the minutes and similarly reported in the Review. It was claimed by both Couns. Lewes and Dunsdon that the Reeve had voted against the request, saying that he would take legal advice before approving of the rebate. This was admitted by the Reeve, who said that he had later upon consideration granted the request. The vote had been two for and two against, the Reeve holding the casting vote. After some further discussion of the way in which this rebate was granted, the Council approved of the Reeve's action, so that it might be quite in order and the minutes were approved as read.

COMMUNICATIONS.

Communications were then taken up, there being a number of letters before the Clerk. They included communications from T. G. Marcham, Provincial Water Commissioner J. L. Armstrong, J. Rowley, John D. Calder, the secretary of Okanagan College, W. E. Ward, Mrs. Bentley and others.

Mrs. Bentley complained about an irregular supply of water. The Superintendent, who was present, reported that everything was now satisfactory, and the Clerk was instructed to advise Mrs. Bentley that the matter had been remedied.

Mr. Ward's letter brought forth a long discussion on the present condition of the Garnett Valley flume. Mr. Ward has suffered some injury to his property due to an overflow. Coun. Dunsdon said that while he had no desire to champion Mr. Ward's cause, he declared that the flume was in a dangerous condition in that it might overflow at any time and make the Municipality liable for damages. He had examined the flume recently, and found it low in a number of places, and while it would not be very full in some part in others it would be as high as within half an inch of the top. A little blockade might cause a serious overflow at any time. How the difficulty might best be remedied without interfering with the water service seemed a problem. The matter was finally referred to the Board of Works.

Mr. T. N. Ritchie, secretary of Okanagan College, wrote saying that the management objected to

the manner in which they were billed for electric light. The arrangement with the Council is that the College be charged 9.6 cents on a minimum of five hundred kilowatts. There are four metres in the two buildings, and the municipal office had billed the two buildings separately, neither of them coming up to the five hundred kilowatts, but together totalling more than that amount. It was pointed out that the four metres were placed in the buildings for the convenience of the Municipality, and from the College point of view the whole service might as well go through one metre. Justification of the claim was admitted, although Coun. Robinson said that by including the two buildings in one charge an awkward precedent might be created.

J. Rowley objected to the water rate charged on a ten acre property situated above Trout Creek near Mr. Zimmerman's, which lot he claimed, contained only three or four acres that could be planted. No flume had been laid to the lot and no road opened up. The Clerk advised that he had adjusted the assessment with Mr. Rowley some two or three years ago, taxing him on five acres out of a total of ten. It was suggested by Coun. Robinson that he be charged a water rate on five acres, which suggestion met with the approval of the Board.

The Boy Scouts are organizing a Bugle Band, with C. N. Borton as master, and the latter applied to the Council for the loan of some drums. Reeve Thomson objected to making the loan, but the other members were favorable to granting the request under certain conditions. There was a possibility of the old band being reorganized, and the instruments might be needed. Coun. Robinson suggested that the drums be loaned to the Scouts for three months, and Coun. Lewes in supporting this felt that two ratepayers should sign for the instruments, making themselves responsible for their return in good condition. The loan was also supported by Coun. Dale, who recommended that a proviso be included to have the instruments returned if at any time they were needed.

F. J. Nixon's guarantee policy for \$3,000 was ordered renewed.

K. V. RAILWAY CHANGES.

The Kettle Valley Railway has cut off a corner of the McTaggart property, and in doing so crosses the road allowance when entering and again when leaving, making a small triangular corner, and the railway had proposed, instead of having these two crossings, to divert the road, making it parallel with the railway. While no definite action was taken, this seemed to meet with the approval of the Council provided sufficient width was given for the road. This question was brought up by a letter

[Continued on Page 4.]

DUKE OF CONNAUGHT'S VISIT.

While it has been known for some time that the Governor-General of Canada, the Duke of Connaught, was to honor us with a visit, no definite announcement as to the time of his arrival had been made. Reeve Thomson, however, received on Thursday morning a telegram from the Governor-General's secretary, advising him that the Duke with his party would arrive here on the morning of October 5, and would spend the time between 11 a.m. and 12.30 p.m. in Summerland.

HEAVY DEMAND FOR CANADIAN FRUIT.

The Canadian Trade Commission at Birmingham, England, Mr. Ray, in a communication to the Trade and Commerce Department, gives fruit shippers an important tip on the advisability of shipping straight lines of not more than six

varieties. Large assortments, he says, are the source of loss and disappointment on both sides. There will be a heavy demand in the Old Country for Canadian fruit this season.

CERTIFICATES GRANTED.

Miss A. E. Williams, who taught at the Town School last year under special permit, has been granted a First Class Teaching Certificate by the Education Department of British Columbia. Miss Williams submitted her English credentials to the Department, and on the strength of her standing there, was granted a first class certificate for this province. Miss Williams will again have charge of the Town School for the coming year.

Mrs. D. Lister, of Balcom, in virtue of her Old Country Teaching Certificate, has also been granted a First Class Teacher's Certificate, valid for life, by the British Columbia Education Department.

Try Us a Week

You remember the old saying "The proof of the pudding is the eating of it." It is so with our GROCERIES and service. Unless you try both you cannot know that they are the best you can get in this town: bought and planned to secure and keep your trade.

We know that a satisfied customer is the best advertisement we have. Try us a week. Send or come with your order or phone and a messenger will call for it.

GROCER & COMMISSION MERCHANT

WEDDING.

NELSON-DUGDALE.

A quiet wedding, but one of considerable local interest, was solemnized on Saturday evening last, July 20, when Miss Betsy Dugdale, daughter of the late John Dugdale, of "Clanfield," Long Preston, Yorkshire, England, was married to Mr. Charles Peel Nelson, son of Robert Peel Nelson, Great Baddow, Essex, England.

The ceremony took place at the home of Mr. and Mrs. A. B. Williams, Peach Orchard, in the presence of a few invited friends. Rev. F. W. Pattison officiated. The room was tastefully decorated for the occasion.

The bride was becomingly gowned in cream liberty voile, and carried a charming bouquet of sweet peas. She has been resident in Summerland since last August. Her sister accompanied her here, and remained for some three months.

Mr. Nelson is well-known throughout the district, having been here for about seven years.

The bride will receive at her home, about to be erected on Beach Avenue, on October 16 and 17.

CHURCH NOTICES.

Methodist Church Services, Sun. day, July 28. 10.30 a.m. subject—"Prevention." 7 p.m., "Modern Thought of Future Punishment." Both services down town.

Frank W. Hardy, Pastor.

Presbyterian Church Services: St. Andrew's Church, West Summerland, every Sunday morning, 10.30 a.m., Sunday School, 11.30 a.m. Evening, Fortnightly at 7 p.m., alternating with the Methodist Church. Rev. C. H. Daly, Pastor.

St. Stephen's Church (Anglican)—Holy Communion every Sunday at 8 a.m. except on the first Sunday in the month. First Sunday in the month Holy Communion at 12 noon. Matins, 11. Evensong 7, each Sunday. Rev. H. A. Solly, B.A., Rector.

Baptist Church—At West Summerland every Sunday at 10.30 a.m. Sunday School at 11.45 a.m. At the Lakeshore Church 7 p.m. Sunday School at 11.30 a.m. Rev. F. W. Pattison, Pastor.

Kaleden Comments

Mr. G. D. Marson with Mr. Muir Steuart drove down from Summerland last Sunday.

Mr. and Mrs. J. C. Findlay returned with Mr. and Mrs. Jas. Ritchie on Wednesday for a visit.

Mr. John Eustace, of London, England, who has considerable interests here, is staying at the Hotel.

Mrs. T. N. Ritchie, of West Summerland, with her two daughters, are the guest of her sister, Mrs. Grieve, in town.

A number of young people drove up to Summerland last Saturday evening to attend an Ice Cream Social there, returning on Sunday evening.

The Misses E. M. and A. G. Brown, accompanied by Mr. G. McLaine and Mr. G. Dinning motored down from Summerland last Sunday.

An excellent road has been made recently from the wharf past the Hotel and store. When the cement sidewalks are put in this will make a fine entrance to our rapidly growing town.

The Misses Archina and Florence Preston, from Penticton, are staying with their parents for a visit. Miss Gertrude Preston went up to Summerland to stay with Mrs. H. Elyse there.

Mr. and Mrs. Jas. Ritchie, of West Summerland, motored down last Tuesday. They were obliged to travel through the Indian Reserve, as the lakeshore road is still badly flooded.

It is expected that the new store will be ready for occupancy next week, and the Kaleden Supply Company contemplate moving in immediately. It is a fine, handsome building, replete with all the newest fittings.

The Hotel registered amongst other guests this week, Mr. W. H. Main, Penticton; Mr. C. O. Brownell, Vernon; the Misses E. M. and A. G. Brown, Mr. G. McLaine, Mr. G. Dinning, Mr. G. D. Marson, Mr. Muir Steuart, all of Summerland; Mr. and Mrs. A. A. Forbes Callard, Penticton; Mr. and Mrs. R. Venner, Vasseaux Lake; Dr. and Mrs. McGregor, Penticton; Mr. Richard H. Parkinson, Kelowna; Mr. John Eustace, London, England.

CARD OF THANKS.

Mrs. Agur and family wish herewith to convey to those who have been so kind their sincere thanks for the many expressions of sympathy received in their recent sad bereavement.

SHIPPING LAST YEAR'S WAGENERS.

Some specimens of Wagener apples grown last season were recently brought out and found to be in an excellent state of preservation. The apples were stored all the winter in the cellar of Mr. James Doherty, and were in such fine condition when brought to the light this week that some of them were procured and sent to be included in the British Columbia Fruit Exhibit at Brandon Fair.

THE HOME CIRCLE.
Crude Thoughts From the Editorial Pen.

TWO PERSONS will not be friends long if they cannot forgive each other's little failings.

WORDS OF CHEER are words of help. Words of gloom are words of harm. There is a bright side and a dark side to every phase of life, and to every hour of time. If we speak of the bright side, we bring the brightness into prominence; if we speak of the dark side, we deepen its shadows. It is in our power to help or to hinder by a word, any and every person whom we are with. If we see a look of health or of hope in the face of an acquaintance whom we casually meet, and we tell him so, he goes on his way with new life in his veins. If we see a look of failing strength and of heaviness of heart in one to whom we speak, and we emphasize the fact that he looks poorly, we give him a push downward as our contribution to the forces which effect his course. A look or a word can help or can harm our fellow. It is for us to give cheer or gloom as we pass on our way in life; and we are responsible for the results of our influence accordingly.

THE MOTHER HEART does not need soft satin and lace and embroidered linens and rose-hooded candles to make itself felt. It beats just as devotedly and happily under cheap cottons as under silken folds; it watches in the silence of the night by the lowly couch of some little sufferer as tenderly as it does by the side of some other little patient in the splendid mansion; it reaches out to the convict behind prison doors with the same love that glories in the success of a renowned statesman. Mother love in its countless combination furnishes a theme as old as the hills perhaps, but one from which the noblest of inspirations are drawn. In nearly all relations of life, from those of blood to those of friendship, wonderful combinations can be made—combinations which illustrate to the world the great heights which a pure love can attain, combinations which act as gigantic reflectors which not only send light into dark places, but which draw all within reach into the circle of their brightness.

TAKE TIME, young man, to go out with your sister. If she is a good girl she is much more desirable company for you than that other girl who flirts with you so desperately.

OUTDOOR LIFE.

It is very certain that all the physical universe takes the side of health and activity, wooing us forth into nature, imploring us hourly and in unsuspected ways, to receive her blessed breath into body and soul, and share in her eternal youth. For this are summer and winter, seed time and harvest given; for this do violet and blood-root come; and gentain and witch-hazel go; for this do changing sunsets make yon path between the pines a gateway into heaven; for this do pale meteors wander nightly, soft as wind-blown blossoms, down the air; for this do silent snows transform the wintry woods to feathery things that seem too light to linger, and yet too vast to take their flight; for this does all the fair creation answer to every dream or mood of man, so that we receive but what we give. All is offered to us to call us from our books and our trade, and summon us into nature's health and joy. To study with the artist, the least of her beauties; to explore, with the man of science, the smallest of her wonders; or even simply to wander among her exhaustless resources, like a child, needing no interest unborrowed from the eye—this feeds body, and brain, and heart, and soul together.

IN THE RUSH AND HURRY of modern life do we think as much as we might of the happiness of those who are growing old. They have lost so much! Their youth, often their health, most of the friends and companions who started with them on life's journey, and yet we often grudge them the brightness and joy we might so easily put into their lives. We will not stay to hear the recollections of old and happy days which they love to tell us, we let them see so plainly that their day is over, and ours has come! That those who have borne the burden and heat of the day, toiled and struggled and worn themselves out for others, should be left to feel lonely, and neglected is sorrowful. We can and ought, each and all, in our own place and way, do something to bring the glow of summer and the remembrance of the day of roses and love into the lives fast nearing their winter and their end.

LATEST PICTURE OF BORDEN.

The recent change of government has made R. L. Borden the central figure of our Canadian public life. Many would like a good picture of him. We can supply one FREE. We will send anyone our paper for one year, and the Weekly Mail and Empire, (the regular rate of which is \$1.00 per year), for the same period, the two together, to include the free picture of the new Canadian Premier, for \$2.50.

The Borden picture is on fine paper suitable for framing, in photo tints, 18 x 24 inches, and is in itself as a work of art, easily worth the price of a year's subscription to either paper.

Send all orders to the office of The Summerland Review.

A hen is not supposed to have much sense or tact, yet every time she lays an egg she encloses forth the fact. A rooster hasn't got a lot of intellect to show, but none the less most roosters have good sense enough to crow. But man—the greatest masterpiece that nature could devise, will often stop and hesitate before he'll advertise. Put your advertising in this paper.

ROYAL NAVAL COLLEGE OF CANADA, HALIFAX, N.S.

THE NEXT examination for the entry of Naval Cadets will be held at the examination centres of the Civil Service Commission in November 1912; parents or guardians of intending candidates should apply to the Secretary, Civil Service Commission, Ottawa, for entry papers before 1st October next.

Candidates must be between the ages of 14 and 16 on 1st JANUARY, 1913.

Cadets are trained for appointment as Officers in the Naval Service, the course at the College being two years, followed by one year in a Training Cruiser, after which Cadets are rated Midshipmen.

Further details can be obtained on application to undersigned.

G. J. DESBARATS,
Deputy Minister of the Naval Service,
Department of the Naval Service, Ottawa,
May 6th, 1912.

The Summerland Review

PUBLISHED BY THE REVIEW PRINTING & PUBLISHING COMPANY LIMITED,
RALPH E. WHITE, MANAGING DIRECTOR

SUBSCRIPTION RATES: \$2.00 PER YEAR, IN ADVANCE. SIX MONTHS \$1.00.

Advertising Rates:

LEGAL NOTICES.—Twelve Cents per line for the first insertion: Eight Cents per line for each subsequent insertion.

LAND NOTICES.—\$7.00 for 60 days, \$5.00 for 30 days.

WATER NOTICES.—30 days, 150 words and under, \$3.00; each additional 50 words, \$1.00.

THEATRICAL, ETC.—50c. per inch for first insertion, and 25c per inch each subsequent insertion.

LOCAL NOTICES or Readers, Immediately following regular locals, 20c per counted line; 10c per line each subsequent insertion. Half these rates when accompanying display advertisements.

LODGE NOTICES, Etc., 25c. per week, per column inch.

FOR SALE Advertisements, Etc., 3c. per word first week; 1c. per word each subsequent week.

Transient Advertisements payable in advance.

Rates for Contract Advertisements furnished on application.

Copy for change of contract advertising must be in the hands of the printer not later than Wednesday noon to insure publication in the next issue.

In accordance with schedule of prices adopted throughout the valley, charges for advertising are now being made weekly. Heretofore when five issues were made in one month the result was a loss. By the new method customers are charged each week for just the amount of space used.

FRIDAY, JULY 26, 1912.

BETTER FRUIT REGULATIONS.

THE Federal Department of Agriculture is taking a very commendable step in improving the methods of fruit inspection in Canada. The consuming public of this province have reason to appreciate any efforts which will make for better regulations in the marketing and sale of fruits. In the past they have suffered severely, and they have not had less reason to protest because the inferior articles for which they paid high prices were in most cases imported from south of the boundary line.

In fact, our own products have been seriously handicapped by the immunity enjoyed by the American producer, as far as Canadian regulations were concerned. Accordingly the safeguards to be instituted against the entry of inferior United States fruit will not only be in the interests of the consuming public but in the interest of our own fruit growers, and should encourage the industry in British Columbia.

Hon. Martin Burrell, the Minister of Agriculture, is himself a practical fruit grower and understands the requirements of the industry, both here and in the East, as few men do, and he may be relied on to employ his knowledge for the best interests of the public.—Vancouver Sun.

INDIVIDUAL LOCAL PRIDE.

NOWHERE does individual effort count more than in improving the appearance of a town. If every citizen would consider himself a committee of one to help beautify his home the question of a clean, attractive city would be settled. Too often one man waits for another, or individuals wait for some organization or the city authorities to move first, with the result that little is done.

It requires no committee of organization for a man to sweep the sidewalk or trim the grass on the roadside in front of his house, keep the lawn, house and garden neat, to remove pots and pans, broken bottles and other rubbish from the back yard, but it all helps to make the town more beautiful. One trouble is that here and there is a man who is too indifferent or too indolent to do these things, and one such man can mar the beauty of a whole neighborhood.

Another trouble is found in vacant lots. It is the owner's place to keep the weeds down and it is to his interest, but generally he fails to do it, and the lot is given over to weeds and rubbish.

What is needed is local pride on the part of the individual and a general public spirit that will not tolerate disfigurements.

ELEVEN GOOD REASONS.

A WRITER of more than ordinary ability gives eleven good reasons why he should buy at home instead of placing his patronage elsewhere. While apparently directed against the mail order houses, they apply equally as well to that class of individuals who are so long on bargains and so short on civic pride, that they place their orders in another community, to the disadvantage of the present and future prosperity of their own. Here they are:

Because my interests are here.

Because the community that is good enough for me to live in is good enough for me to buy in.

Because I believe in transacting business with my friends.

Because I want to get what I buy when I pay for it.

Because my home dealer carries me when I run short.

Because every dollar I spend at home stays at home and works for the welfare of my town.

Because the man I buy from stands back of the goods.

Because I sell what I produce here at home.

Because the man I buy from pays his part of the taxes.

Because the man I buy from gives value received always.

Because when ill luck, misfortune or bereavement comes, the man I buy from is here with the kindly greeting, his words of cheer, and his pocket book, if need be

Here I live and here I buy.

BRITISH COLUMBIA is the only country that is free from the codling moth, according to Inspector Cunningham, and our Government are determined that it shall be kept free. A staff of inspectors costing \$2000 per month is maintained, and last year some 50,000 boxes of apples were either destroyed or sent back to the point of shipment.

WHEN are we going to be given a good opportunity to hear Dr. Bonquott? Many citizens went to the meeting on Tuesday night expecting to hear him in a full, practical, interesting and instructive lecture on fruit growing, but were disappointed. Not that the other speakers were disappointing, but our fruit growers have had just enough of Dr. Bonquott's practical knowledge to want more of it, and will not be satisfied till he is given an opportunity to impart to them in his pleasing continental English more of his fund of practical science in horticulture.

[Continued from Page 1.]

from John D. Calder, asking that a road be opened up to his property.

The railway route crosses the Trout Creek ditch and flume system in several places. The railway, with the approval of the Council, have undertaken to build a new channel for the water, and this is being done by Mr. T. McAlpin. It was mutually agreed that the work should meet with the approval of Supt. Mitchell before the water is diverted into the new channel. Mr. Mitchell, who was present, reported that he had been asked to pass the work, but he did not find the ditch satisfactory. It would require a considerable amount of additional work and the new flume trestles would need to be braced better. The Council cautioned the Superintendent not to take over the new work until it was made thoroughly satisfactory. This work is all above the reservoir, and the proposed changes were approved by Engineer Latimer.

Mr. T. G. Marcham submitted for the approval of the Council a blue print of a recent sub-division he had made at West Summerland, and also requested that they adjust the water rates on the new building lots. On motion of Coun. Robinson, seconded by Coun. Dale, the plan was accepted and the Clerk

authorized to sign approval of same. As the general and irrigation rates are now fixed for 1912 the Council took no action on these rates.

WATER EXTENSION.

Reeve Thomson then raised the question of improvement work for the fall, and whether the Council should plan to raise money by debenture for the extension of the water system. Engineer Latimer is expected to make surveys of some lakes in the hills, with a view to conserving more water. It has been called to the attention of the Council that there is a large lake some thirty miles back, which, it is claimed, can be transformed into a large storage reservoir. Coun. Lewes asked if someone should not precede Engineer Latimer and make a preliminary report thus saving him much time. The lake is some seventeen miles north-west from Sullivan's, and it would take three or four days to make the trip. Chairman Dunsdon of the Board of Works, and Superintendent Mitchell will visit the lake and report.

S. M. Young complained of an overflow on his lot near the old Anglican Church, this being the second, he said, inside of two weeks.

The meeting then adjourned.

Now that the lake level is gradually lowering the Government have a gang of men at work between Summerland and Penticton building up the Lakeshore drive so that it may not again be inundated by an unusually high water level.

Local News Items. Local News Items.

Dr. and Mrs. R. C. Lipsett spent Monday at Peachland.

Messrs. Muir Steuart and G. D. Marson visited Kaleden last Sunday.

Dr. F. W. Andrew is expected home either on Saturday or on Tuesday, probably the former.

Mrs. T. N. Ritchie is visiting her sister, Mrs. Grieve, at Kaleden. She is accompanied by her two daughters.

Big stock of the famous Joseph Rodgers Superior Pruning Knives now to hand. The Summerland Supply Company.

A new plank sidewalk has been laid at West Summerland, extending from the Municipal Offices to the main street.

Mr. and Mrs. J. C. Findlay, from Kaleden, are the guests of Mr. and Mrs. James Ritchie, returning with them on Wednesday.

Miss Kerfoot and Miss Ferguson, nieces of Mr. G. A. McWilliams, who have been visiting at his home for a few days, left on Wednesday morning.

L. C. Woodworth is building a cottage on his orchard property. A foundation of stone has been built just opposite the residence of Mrs. Campbell.

Mr. and Mrs. James Ritchie paid Kaleden a visit this week going by motor. It is still necessary to use the upper road between Trout Creek and Penticton, the lakeshore drive being flooded.

A Kettle River Valley Railway Survey party has again camped at Chute Creek evidently with the purpose of making a re-survey of the route between Penticton and the summit eastward.

An invitation will be sent to the delegates at the Irrigation Convention meeting at Kelowna on the 13th, 14th and 15th of August to come to Summerland to visit the Flower Show which is to be held on the 16th prox.

On Thursday morning the Okanagan Lake Boat Company launched a staunch new scow, or barge, for use by picnickers and excursion parties. It was immediately put into commission and made its first trip from Summerland to Trout Creek, conveying the union Sunday School picnic to the grounds there.

The annual union Sunday School picnic was held at Bulyea point on Thursday afternoon and was largely attended. All the Sunday Schools of Summerland united for this occasion, including the Baptist, Presbyterian and Anglican Sunday Schools of West Summerland, and the Methodist and Baptist schools of Summerland.

The following additional special prizes have been donated to the Women's Institute Flower Show: For the best pan of home made bread baked from Royal Household flour, offered by the Royal Household Milling Co., through Mr. J. E. Phinney; 1st prize, 98 lb. sack of Royal Household flour; 2nd prize, 49 lb. sack of Royal Household flour. Two and a half dollars has been donated by Mr. J. R. Brown towards the prize fund.

A few cherries are yet being shipped, but of the sour varieties only. Apricots are now coming in quite freely, as are also tomatoes. Some Yellow Transparent and Tetofsky apples are also being shipped. The fruit Union are exporting a few cucumbers and are buying potatoes which, however, they are marketing locally, mostly to the railway contractors. The packing house at West Summerland is not yet receiving fruit but the Union expects to commence packing there the 1st of August.

An interesting league football game was played at Penticton on Thursday afternoon by the Summerland and Penticton teams, resulting in a score of 4-1 in favor of Summerland. In addition to gaining another two points in the league standing, the Summerland boys captured a purse of \$20 which had been put up by the Sports Committee of Penticton for the winners. Fisher again showed himself a strong man and was successful in scoring two of the four goals, Lacey and Tompton each scoring one also. There is yet one game to be played in the league. This is between Vernon and Penticton, at Kelowna. The present league standing is Vernon 8 points, Summerland 6 points, Kelowna 4 points, Penticton 4 points.

Mrs. J. Downton is visiting friends at Vancouver.

Mr. and Mrs. J. R. Brown spent last week-end at Peachland.

E. R. Agur expects to commence canning fruit at the Balcombe Cannery on Monday next.

Mr. and Mrs. J. W. S. Logie and Miss Georgina Logie were at Hotel Naramata last Sunday.

At a suit tried at Vernon recently, James Fyfe obtained judgment against F. von dem Hagen for \$139.00.

The Presbyterian Church choir held their annual picnic last Saturday. About forty people in all drove to Upper Trout Creek.

L. C. Woodworth has purchased the Cross orchard at the head of the Gulch road hill, and immediately east of Thos. E. Moore's orchard.

The Dominion Government is arranging to place additional Fruit Inspectors in British Columbia and the prairie provinces, and hope soon to have a thoroughly efficient staff at work. The object of the increased staff is to assure that the provisions of the Fruit Marks Act are strictly adhered to.

A meeting of the Southern Okanagan Poultry Association is called for Monday next at eight p.m. at the office of the secretary, Mr. C. P. Nelson. It is necessary that arrangements for the Show be made at once, and the British Columbia Association notified, if the local association is to get the usual grant.

A Toronto dinghy (a small boat with one mast and one sail) has just arrived here for Mr. Allen Agur. The boat is of pleasing design and neat construction and finish. Its length is 14 feet over all, with a beam of 5 feet 6 inches, and it is fitted with a balanced steel centre board. It is quite probable that a number of boats of this design will be built in the local factory this winter, and if so we may expect to see some interesting and exciting sailing races in the dinghy class.

NEW SPEED LAUNCH

The boat which was ordered by Mr. Rowley from the Summerland Boat Works has been finished and will be delivered to-morrow. She is without doubt the finest purely speed boat on the lake, being of very graceful mode and easy lines. The boat, which has been named "Lil" is 35 feet long by 5 feet beam, cedar planked with half inch stuff on white oak ribs, and all copper riveted. She is finished with mahogany, upholstered in khaki, and the body paint is a battle gray. The deck is well crowned, covered with union silk, and is also painted gray. The fore deck is 16 feet long and the engine pit 6 feet 6 inches, and the cockpit, which has two cross seats, 6 feet, and the after deck 5 feet. The engine is a 40 horse power Scripps, 4 cylinder 4 cycle, and fitted with an aluminium base to reduce the weight. The engine itself weighs about 865 lbs., the total weight of the equipment being probably 950 lb. She has an auto steering gear and double ignition. Her fittings throughout are either aluminium or brass. The makers have already given this boat a trial run and find her very speedy. She will probably make 25 miles an hour with ease.

FREIGHT RATES.

Winnipeg, July 22. — Commissioner D'Arcy Scott made a clear statement of the present position of the railway freight case at the sitting of the Railway Commission at the City Hall. Mr. Scott said that at previous sessions a case had been made out for the shippers. It has been shown that the rates in the West were excessive as compared with those which obtained in the Eastern Provinces. It has also been shown that the density of traffic was as great or greater in the West, and that the cost of operation in the West was as low or lower than in the East. It was therefore, incumbent on the companies to show cause why a reduction in the rates should not be ordered. The proof rested wholly on the railways. Further evidence was not required from the shippers.

Mr. Scott said, however, that any further statement which shippers desired to make would be considered.

JOHN Mc MILLAN - - Manager

Naramata Notes.

Miss Ida Wilcox, of Salmon Arm, is visiting her friend Miss Orca Williams.

Mr. Reg. Booth, of Penticton, was home for Sunday on a brief visit to his folks.

Full account cannot be given till next week of the entertainment given by the girls on Thursday evening in the Clubhouse in aid of the Unity Club.

Mr. and Mrs. H. F. Powell with their daughter, Miss Mildred, of Battle Creek, Michigan, are here on a holiday, guests of Mr. and Mrs. H. J. Wells.

An elegant climbing rose, "Dorothy Perkins" found in front of Mr. Gillespie's verandah is a lovely sight. There are literally hundreds of clusters of shell pink flowers.

Mrs. Carrie Bacon, of Poplar Bluffs Missouri, is visiting her sister Mrs. H. J. Wells. Miss Dora Brown, of Goshen, Indiana, is another American friend who is holidaying at Naramata.

At a recent citizen's meeting held in the school, the officials for the ensuing year were elected; Messrs. Hancock, J. C. Williams, and Mrs. A. B. Allen, trustees, and Mr. George Wolstencroft auditor.

A few of the outside guests registered at Hotel Naramata are Mrs. J. H. Adams, N. R. and J. V. Adams, of Toronto; John Barr, and wife, Calgary; Mrs. Prowse and two children, Kelowna; M. S. A. S. Irwin, Winnipeg; and Mrs. George Meikle, Kelowna.

A number of pedagogues are finding the lakeshore town a pleasant summer resort from the thralldom of the school room. Miss Tuck of Calgary, is the guest of her sister, Mrs. Jas. Reid, Miss Orca Williams is under the parental roof, as is also Miss Chambers. Miss Edna Bennett, the latter's friend, hails from Chicago.

The Unity Club ladies at their recent meeting, decided upon August 1st as the date, and Trout Creek as the place of the next annual outing. At the close of the meeting a farewell address and presentation were tendered one of the Club's departing members, Mrs. C. W. Johnson, who leaves next week to take up residence in Victoria.

That the powers that be are not yet satisfied with the railway survey leading from North Naramata seems evident from the fact that the line is again to be gone over as far north as Kelowna. A camp was formed this week at Chute Creek with Engineer Brooks in charge. Quite a number of our own boys have enlisted, Messrs. V. Watson, H. Mitchell, C. Grimaldi, R. Gamman, Geo. Nuttal, Sherwood Davies, and others.

Heard about the sport promised for Saturday night? Briefly it is this; a "joy ride" on the new scow built recently for use by the boat company is promised all who wish to avail themselves of the opportunity. Refreshments will be served at one end and music will be provided for those who wish to amuse themselves in the merry mazes of the dance. Mr. Brodie, it is understood, will act as pianist. In this connection it might not be out of place to express on behalf of the people of Naramata their appreciation of the splendid ferry service that has been put into operation this season.

KAMLOOPS CENTENARY.

Kamloops, ever growing and expanding in size and productiveness, is not unmindful of the past, and on August 17, 18, 19, the town will celebrate its centenary.

Honor is to be paid to the town by His Royal Highness the Duke of Connaught, who visits it on the 17th from 3 to 6.15 in the afternoon. The primary object of his stay-over is to open the new Royal Inland Hospital, which by then will have been completed, and the ceremony will, without question, be a popular one, apart from the interest attaching to the Duke's first visit to the place.

To provide for this and the other functions that have been arranged for these three days, a civic fund has been opened and with remarkable color the citizens are contributing in no unaltered degree. More than this, encouragement is being given to the promoters by the equally excellent response from people outside the town.

Kamloops lake will, every evening, be the scene of a water carnival, and through the day sports and manifold attractions will engage the attention of the many thousands who are expected to assist in these centenary celebrations.

A root cellar like this won a prize last year.

THE drawing was made from a photograph of the root-cellar with which D. A. Purdy, of Lumsden, Sask., won a cash prize in last year's contest. In that contest there were 36 prizes. There will be three times as many prizes (108) in the

1912 FARMERS' PRIZE CONTEST

THUS you will have three times as many chances of winning a cash prize. You do not have to use any certain amount of Canada Cement to win a prize. There are absolutely no "strings" to this offer.

There are twelve prizes for each Province (three of \$50; three of \$25; three of \$15; and three of \$10) and you compete only with other farmers in your own Province and not with those all over Canada.

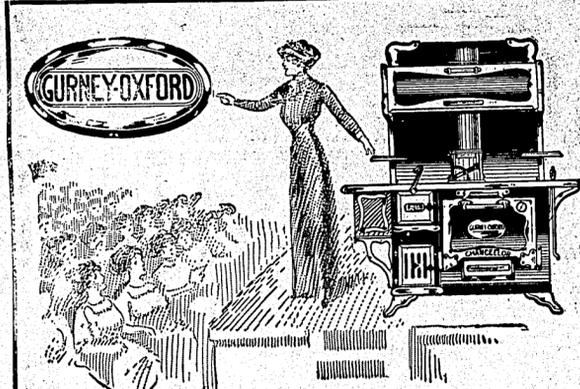

It makes no difference whether you have ever used cement. Many of last year's winners had not used it until they entered the contest. When you write for full particulars, we will send you, free, a book, "What the Farmer Can Do With Concrete," which tells everything you need to know about concrete. It is absolutely free, and you are under no obligation to buy "Canada" Cement or to do anything else for us.

WRITE your name and address on the coupon, and mail it, or use letter or post card, and we will send you at once the book and full particulars of the 1912 Prize Contest.

Woman's Rights

It is your inalienable right to demand in a range—Economy, Promptness and Satisfaction. It is your privilege to expect the same attention, progress and efficiency in the things you use in your daily work as have been brought about in other and often less important lines of endeavour.

The Gurney-Oxford is the foremost example of cooking efficiency.

The Gurney Economizer regulates all the drafts by lifting or dropping one small lever. It keeps the fire alive for hours with practically no coal consumption. It saves 1 ton of coal in 6. The Gurney Economizer is found only on the Gurney-Oxford range.

The Gurney-Oxford Oven is absolutely and always heated the same on all sides and in all corners because the heat is evenly distributed.

This is a sure and unfailing guarantee that whatever comes out of the Gurney-Oxford Oven is crisp and light and delicious—this is the final test and the point most often advanced by those who cook on a Gurney-Oxford, those who believe it is woman's right and privilege to have in her kitchen the labor, time and money saving principles embodied in the Gurney-Oxford.

PROVINCE TO EXHIBIT AT DRY-FARMING CONGRESS.

At the Lethbridge Dry-Farming Congress, which is to be held from October 21 to October 2, the provincial government, through the Department of Agriculture, have decided to make a large display and to secure exhibits for that occasion which will prove a credit to the province, and efficiently advertise the great resources of the land.

In order to do this efficiently the Department have asked for the assistance and co-operation of the several boards of trade in the province, and have stated their willingness to take over at the point of shipment any exhibits collected by these bodies, pay all the costs of transportation to Lethbridge, efficiently stage the same, and take care of them during the time that the exhibition is in progress.

The disposition of the exhibit at the conclusion of the congress will be undertaken as directed by each board of trade, and each exhibit will be staged separately, and the district from whence it was secured will be properly advertised. The whole will appear as a provincial exhibit.

The space to be occupied by each exhibit must not exceed ten feet by ten feet. Other provinces are getting into line for the purpose of turning out a great exhibition of the wealth of the place, and it behoves the people of this province not to be behind.

**POSSIBILITIES OF RED
APPLE VALLEY.**

**AN EXPANSE OF AGRICULTURAL
COUNTRY NOT REALIZED.**

It was the writer's privilege last week to visit some of the hill country west and north of the Municipality of Summerland; and the visit was a revelation, to him, giving, as it did, an entirely different conception of the surrounding country and its possibilities.

The Trout Creek Valley is no doubt well-known to most of our residents. Leaving that valley at the present site of Richardson's mill, and turning directly north, one drives for some miles through a beautiful valley, most of it wider, but in many ways quite similar to Garnett Valley. The elevation of this valley is very little greater than the latter, and the wonderful transformation that has been accomplished in Garnett Valley will no doubt soon be repeated in the other, which is now well-known as Red Apple Valley. The upper end of this valley opens out into a broad stretch of beautiful country, much of it perfectly level, and of sufficient extent to be suggestive of the broad acres of the meadow farms of the East. Along the west and north of this broad piece of prairie lies some of the finest benches to be found anywhere, easily approached, of gentle slope, soil evidently of the best, and nearly all of it without stone. This is unquestionably destined to be a great apple producing district. At the northern and widest portion the valley is divided into two, one part opening up to the north-west and the other to the north, and while some of this will also be fruit land, great stretches of it, together with the higher benches to the west of the broader valley is ideal country for grazing, and now that the sheep industry is to be given every encouragement from the government, we may soon expect to find thousands of sheep grazing on these green hillsides. Dairying will also, no doubt, be engaged in, especially if the growing of alfalfa is taken up.

Near the middle of this broad, open district is the proposed town-site for Appledale. Appledale may be reached from Summerland via Garnett Valley or via Trout Creek and Red Apple Valley, and a drive round the circuit will be a pleasant surprise to many. Recently the Government has extended the Garnett Valley road farther up that valley to beyond the reservoir on Eneas Creek, which is bridged immediately above the reservoir. Another road leaving the Appledale townsite has been built along the edge of what was formerly Darke's Lake, but now transformed—by diverting the water supply—into excellent orchard land, and continues north along the northern branch of the valley, and down a long hill on an easy grade to meet the Garnett Valley road at the new bridge. To anyone who can possibly make the trip we would highly recommend this drive as one of the best and most picturesque to be found anywhere. By using a little care on the newly graded hills, the journey can be made equally well by auto.

In addition to building the new road mentioned above, connecting Red Apple Valley with Garnett Valley, the Government road gang is extending the Garnett Valley road to the north-east to meet the Peachland road. In fact, the road is now so far advanced as to make it possible to reach Peachland by that route.

Old scraps of soap should be collected, placed in a saucepan on the stove with enough water to cover them, and allowed to dissolve. Then roll into balls and place on one side to dry. They can be used for scrubbing.

**SYNOPSIS OF COAL MINING
REGULATIONS.**

COAL MINING RIGHTS of the Dominion, in Manitoba, Saskatchewan and Alberta, the Yukon Territory, the North-West Territories and in a portion of the Province of British Columbia, may be leased for a term of twenty-one years at an annual rental of \$1 per acre. Not more than 2,560 acres will be leased to one applicant. Application for a lease must be made in person to the Agent or Sub-Agent of the district in which the rights applied for are situated.

In surveyed territory the land must be described by sections, or legal subdivisions of sections, and in unsurveyed territory the tract applied for shall be staked out by the applicant himself.

Each application must be accompanied by a fee of \$5, which will be refunded if the rights applied for are not available, but not otherwise. A royalty shall be paid on the merchantable output of the mine at the rate of five cents per ton.

The person operating the mine shall furnish the Agent with sworn returns accounting for the full quantity of merchantable coal mined and pay the royalty thereon. If the coal mining rights are not being operated, such returns should be furnished at least once a year. The lease will include the coal mining rights only, but the lessee may be permitted to purchase whatever available surface rights may be considered necessary for the working of the mine at the rate of \$10.00 an acre. For full information application should be made to the Secretary of the Department of the Interior, Ottawa, or to any Agent or Sub-Agent of Dominion Lands.

W. W. CORY,
Deputy Minister of the Interior.

LETTER TO THE EDITOR.

The Columns of THE REVIEW are open to
the public for the discussion of matters of
general interest. No notice can be taken of anony-
mous communications. Letters intended for
insertion must be authenticated by the name and
address of the writer, not necessarily for publica-
tion. The opinions of correspondents are not
necessarily those of the Review.

A PROTEST.

The Editor,
The Summerland Review,
Dear Sir:
The local hooligans who graced
Peach Orchard with their presence
on Tuesday evening need feel no
pride on account of their visit. In
this community, where one is
accustomed to meet with refine-
ment, such ill-mannered and objec-
tionable demonstrations are not only
unlooked for, but serve to remind
us that Summerland is not alto-
gether free from an undesirable
element of rowdyism as has been
our boast. Such practices cannot
be justified on the plea of "cus-
tom," and the annoyance to sur-
rounding residents more than meets
the argument of "harmless amuse-
ment." We are glad that exhibi-
tions of this nature are seldom
heard of; and after such a display
of execrable taste, and such a vul-
gar exhibition of elementary ruffi-
anism, the most manly thing the
perpetrators can do is to offer
apologies to the many whom they
inconvenienced. There are conven-
tional ways of showing friendship
that bring forth more pleasure and
appreciation than the unmannerly
charivari. If the party contained
persons of responsible age, it is
certainly not to their credit; but
we prefer to think of the occur-
rence as the unaided work of un-
thinking children.

Yours, etc.,
PEACH ORCHARD.

Summerland, B.C.,
July 24, 1912.

(Continued from Page 1.)

ing disaster. The speaker empha-
sized the need of getting the root
growth well down into the soil.
Speaking of conditions here, Dr.
Bonquett said that it was very easy
to make a start with virgin soil,
and this is an ideal way.

He then followed with a talk on
spraying. The people here do not
know what spraying is. Spraying
should be the daily work of the
orchard man. They must not wait
until they see the things to spray
for, but must spray in order not
to see these things. Dr. Bonquett
said: "You are producing the best
kind of fruit, but let difficulties
and pests increase, and where will
you be?" He urged serious applica-
tion and felt that more knowledge
was needed. He next touched upon
irrigation, taking the ideal tree as
an exception. The tree has grown
a good root system, and in order
to properly irrigate this tree the
structure of the soil is the orchard-
ist's guide. The speaker illustra-
ted by blackboard the relation
of the rootlets to the soil particles
and the water they held, and par-
ticularly cautioned his hearers
against over irrigation, showing
some of its evil effects. One orchard-
ist with whom he had been
talking said that he had a right to
eleven inches of water and he must
use it. In doing so, however, he
was killing his trees. He had
found the trees with shrunken
leaves and withered spurs which
had ceased to grow. At the base
of the spurs the growth had again
started. Nature is always very
good, and had done its best to
repair the man's foolishness by
starting new growth.

A good rule in pruning is never
to lose a piece of wood more than
one year old. Cut back your young
tree to, say, about eighteen inches,
select three good, well-located and
balanced branches, cutting out all
the others. Each of these will grow
and only selected branches of these
should be permitted to remain.
And so on, he followed through
the growth of the tree. A tree
pruned in this way to a proper vase
shape will produce in the fifth year
—this if it has a good root system.
Roots must also be pruned; the
new roots will be vigorous and proper
pruning will produce tap roots.

MR. SIMMS.

Chairman Robinson, who had
followed the speaker very closely,
said that he was beginning to get
a new conception of irrigation. He
had always said "Water is king,"
but now he began to realize that
too much water was used and not
enough cultivation. The dry farm-
ing idea was getting him.

The next speaker was Mr. Simms,
another member of the horticultu-
ral staff who has spent some years
in California, and was later in New
Zealand, where he was Nursery In-
spector. We here had no idea of
the New Zealander's difficulties to
get fruit. They must spray and
spray all the time. He had seen
there some of the most perfectly
pruned apricot trees. They pruned
the spurs in such a way that the
tree right down to the main trunk
would be filled with fruit spurs.
The codling moth was formerly a
serious nuisance, but the govern-
ment had taken up systematic spray-
ing, with the result that where
there had been a former loss of 75
per cent, there was now only 5 per
cent. The industry was given every
encouragement from the govern-
ment.

Mr. E. Smith, an expert on cold
storage who was in the audience,
and who had just arrived in Sum-
merland, was asked to speak. He
said he had not much to say on this
subject; he was simply here to in-
vestigate along the line of pre-
cooling and transportation. It was
a well-established fact that unless
the fruit was pre-cooled it could
not be delivered in a satisfactory
condition. He did not find it pos-
sible to establish such a plant this
season, but would get the necessary
data for the establishment of a pre-
cooling plant next year.

RIFLE ASSOCIATION.

The attendance at the range last
Saturday was somewhat reduced by
the counter attraction of a choir
picnic, which some of the younger
members were unable to resist.
The average scoring of those who
did attend, however, was well
maintained.

Table with 4 columns: Name, 200, 500, 600, Total. Rows include O. Smith, H. Dunsdon, G. Loomer, W. E. Ward, F. Gartrell, J. Dunsdon, F. J. Nixon, W. Nelson.

Knavery is the worst trade.

NARAMATA

An Ideal Location for the Tourist. A Haven for the Homeseeker and Investor

Start of Double Canoe Race at one of Naramata's Regattas

Take a trip to the Okanagan this summer and stop at Naramata. Get acquainted with
this lovely Canadian Summer Resort. A splendid Tourist Hotel with every convenience
overlooking the Lake is at your service. One summer spent in Naramata means every
summer spent there until you finally conclude there is no real living anywhere else.
Then a nice 5 or 10 acre fruit farm on the benches solves the question and makes you
independent for ever afterwards.
