

# The Summerland Review

DEVOTED TO THE INTERESTS OF SUMMERLAND, PEACHLAND AND NARAMATA

Vol. 5, No. 42

SUMMERLAND, B.C., MAY 16, 1913.

Whole No. 250

## Summerland Growers Endorse Central Selling Agency Report.

Messrs. White and Hilborn Appointed Local Representatives to Central Body.

Mr. R. Robertson Very Optimistic Regarding Future of New Organization.

In view of the fact that last week's meeting, when the report of Mr. G. J. C. White, delegate to the organizing committee for the Okanagan Central Selling Agency, was read, revealed apparent widely divergent opinions on the subject of co-operation and organizing for same, there was a general feeling of uncertainty as to the outcome of the adjourned meeting which was held last Monday night in Campbell's Hall. Mr. R. Robertson was present to further explain the report and the proposed method of organization, as well as to discuss the question of contracts between grower and association and between association and selling agency.

Mr. J. L. Hilborn, president of the Farmers' Institute, was in the chair, and after a few remarks called on Mr. White to lay again before the meeting his report of the proceedings at Vernon.

Mr. White thought that now that the people had had time to read and consider the report as prepared at Vernon, matters would be more clear to them. Here he complimented the local press for its publication of this report, and other timely articles helpful to the solving of the market problem. Everywhere the report had been presented and considered, it had been adopted, and he believed Summerland would be in line with the other communities. It was realized that a binding contract between grower and union was necessary. In fact, older centres are gradually stiffening their contracts. For this year, however, he thought special leniency should be shown.

### GROWERS' CONTRACT AND POOLING.

The binding contract is not for the honest man who is willing to stand in with his fellows and play the game fairly, but for the man who wants to play fast and loose; and the speaker intimated that as there were not many—if any at all—of the latter class, the contract should not be objected to. As for the Selling Agency, it was not going into business to make money for itself, but to make money for the growers. The pooling plan was opposed by some because of local circumstances. Objections would be overcome by daily pooling of early fruits and stuff that quickly changed in price. Sectional pooling would be cumbersome and tend to create jealousy between the different locals. With district pooling according to the variety, grade and time, results should be more satisfactory. Referring to the clause giving the Agency the control of the stuff going to the canneries, he said that it was better that the agency should know exactly what fruit is being produced and marketed. Besides, the cannery, if dealing with the individuals, could beat down the price, if so disposed; whereas if they must purchase through the agency, there was more possibility of obtaining better prices for the grower.

### FAITH IN ONE ANOTHER.

The one essential to success was confidence in one another, declared the speaker, who expressed himself thus: "Gentlemen, the greatest thing we want is confidence in one another. If we will come together as one man, with our shoulders to the wheel, and determined that she'll move she WILL MOVE." After a few more general remarks Mr. White moved the adoption of the report as read. This motion was seconded by Mr. J. L. Logie, who unconditionally endorsed the report.

Mr. Logie admitted that after more careful consideration the objection he thought he saw when first read in the report had disappeared. Under the proposed arrangement for pooling he believed matters would work out satisfactorily in this respect. Much had been learned from the past, and he

urged that the experience of the past should be applied to the overcoming of difficulties that would arise in the future.

Mr. Robertson followed, speaking at length on the question. He opened his remarks with an expression of thanks for the heartiness with which he had been received when last here, which had given him courage throughout all the other meetings in the Valley.

### VALLEY A UNIT.

At the meeting of the Valley delegates at Vernon they had started out, said the speaker, anticipating trouble that might arise in 1915 and 1914. Suddenly they realized that we are beginning now an era of new life in the Okanagan, and that there has come over the Valley, from Salmon Arm to Penticton, a new spirit, a determination that this Valley shall be one. No individual crank nor district crank will be permitted to prevent the onward movement. Realizing this, a common policy was laid down as a basis upon which to build, and around which all other questions circled. This policy, as stated in the report, is to get the fruit and produce of its affiliated associations as quickly as possible from the grower to the consumer, and as quickly as possible to bring these two classes closer together than they have ever been. Some had advocated the cutting out of the wholesaler, and other plans had been proposed. Personally he would advise the use of the present channels of marketing, adopting what other methods might appear practical as time went on. The delegates were a unit on that principal.

### A TRIPLE CONTRACT.

Referring next to the proposed contract Mr. Robertson said it was not even suggested that any contracts now existing should be cancelled, and because a man had signed a contract for the sale of part of his crop was no reason why he should not sign the proposed union contract.

Taking up the typewritten contract as outlined by the solicitor, Mr. Robertson jokingly referred to it as a most formidable document, but as such agreements had to be prepared in legal form, and written in legal phrase, it appeared more formidable than it really was. The fact that this was a three-fold contract between grower and union and the union and Central Agency makes it appear more cumbersome. The contract runs in perpetuity, unless notice to the contrary is given in writing at least twenty days before the first of March, and requires that all the fruit and vegetables grown for sale by the individual shall be marketed through the Association. This year exceptions will be made for specified quantities already sold by the grower.

### THE BASIC PRINCIPLE.

Mr. Robertson declared the basic principle of the whole contract to be honesty between grower and association, and between association and Central Agency. The Central Agency reserves the right to cancel a contract if a man does not play fair.

When last here Mr. Robertson said he did not believe organization could be so far completed this year as to make Valley pooling practicable, but at the district meeting all but two delegates were already prepared to pool the Valley, and further, the suggestion had come from the delegate of the one place in the Valley that he thought most likely to object to a Valley pool. This decision was a great step in advance. Evidently with some justification,

[Continued on Page 6.]

### Trout Creek Bridge.

that the water of Trout Creek could in no way interfere with their work, and, in fact, as reported in last week's Review, the date was fixed for the time when the bridge would be in readiness to carry trains across the great chasm.

From what information could be gathered by the Review we had the high freshet in Trout Creek has carried away the falsework, and for the time has completely tied up work on the big bridge.

Much precaution had been taken to make the work secure, and the engineers in charge were confident that the work would not be taken until after the freshet had subsided. President Warren and his associates of the K.V.R., however, have been urging for the early completion of the bridge. To meet their wishes the representative of the bridge construction company says the work was undertaken, with every hope of getting in a foundation that would withstand the force of the water. On Saturday, however, just before the men returned to work after dinner, the water, which had been rapidly rising, undermined the trestle work, two bents of which had been built one on top of the other to the height of 60 feet, and all went down with a crash. Had the accident occurred a little earlier or later it would almost certainly have resulted in a number of casualties. The loss, as stated by the Superintendent, is close on \$5,000, although much of the timber has been saved. Though the railway company have been urging another attempt they are said to have forbidden blasting in the face of the rock beneath the high pier. With this permission, and the bringing in of girders of double length, the work might be proceeded with, but not otherwise, according to the engineer in charge. He has reported to his company's head office in Toronto that the work cannot be resumed until about July 1st. This means a delay of at least two months in the time of opening the bridge to traffic, which will now be about the time already predicted by the Review.

### STRIKE MATTERS.

As announced in this paper last week the strike of the railway men at Naramata was of short duration. While many, evidently anticipating a prolonged struggle, left the district, those who remained soon returned to work. Others are coming in daily, and the camps will soon have their usual number of men. Rumour of another strike, however, are again heard. It is said that some fifty of the men having become disgusted with I.W.W. methods have formed an independent organization, and are working to get the other men in with them, when a more determined strike will be called.

Some twenty men were arrested at Naramata last Tuesday accused of breaking contract. The men had been employed by one of the contractors, through an agent at Vancouver, and had paid their transportation to Naramata. On their arrival they were met by I.W.W. men and persuaded to refuse to work. They were given a trial at Penticton and sentenced to jail.

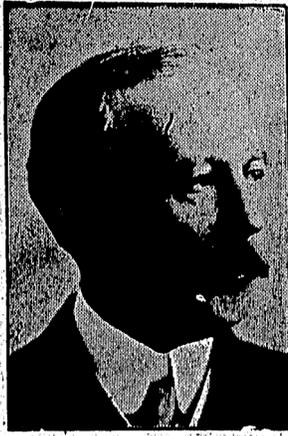

### THE HOTEL.

When asked what was being done towards obtaining a table license for the hotel the proprietor informed the Review that he had decided to drop the matter. Upon looking further into the requirements he found that a petition signed by at least three-fifths of the citizens was required. He was not particularly desirous of engaging in the sale of liquors, even in this way, and it was only as a means of keeping the hotel open that he proposed was entertained, and he did not feel disposed to make the necessary canvass. Rather he had concluded to continue the hotel during the summer and would close it for the winter unless the necessary number of citizens took the matter in hand, and petitioned for the license.

Next Sunday morning in St. Andrew's Church three new elders will be ordained. There will be no evening service.

## New Regulations For Foreign Fruit.

Bill to Compel Foreign Growers to Observe Canadian Laws Regarding Fruit, introduced by Hon. Martin Burrell.

HON. MARTIN BURRELL, FEDERAL MINISTER OF AGRICULTURE.

Ottawa, May 14.—On Monday the Hon. Martin Burrell introduced in committee a resolution designed to amend the Inspection and Sales Act in other than foreign fruit. Growers competing in the Canadian market will be compelled to conform with Canadian regulations regarding marking of boxes, inspection, etc.

Mr. Burrell said that the proposed amendment had been prompted by representations from fruit growers all over Canada, and was designed to place Canadian fruit growers and American fruit growers on an equal basis.

### STOPPING FRUIT IMPORTATIONS.

Mr. Knowles of Moose Jaw says in the proposed amendment an un-

derhand means on the part of the government to increase protection of the British Columbia fruit growers. The resolution proposed to place in the hands of the minister power to impose a duty by stopping the importation of fruit.

The minister was a fruit grower, and the fruit growers apparently had his ear to a greater extent than had the grain growers, who were fruit consumers.

The growers of Oregon and Washington had such a wide market that any restrictions which might be placed on their imports into Canada would have the effect of making them abandon the Canadian market altogether.

Mr. Burrell declared that there was no underhand intention in the resolution. It was simply designed to place both competitors on the same footing. The growers in Canada, under present conditions, had to adhere to strict regulations, which the American growers had not.

### POWERS OF INSPECTORS.

Mr. Buchanan, Lethbridge, while favoring the fostering of the Canadian fruit industry, did not believe that anything should be done which would lessen competition.

Mr. Douglas of Strathcona feared that the proposed amendment would place large powers in the hands of the inspectors of the department, which might be used to cause delay and vexation to importers.

The inspector of electric motors is paying Summerland an official visit this week. The motors are being gathered in to the power house, inspected and sealed, and returned to their former positions.

## Municipal Council Meet in Regular Monthly Session.

Some Difficulty Regarding Kettle Valley Railway Replaced Flume Work

More Protests Against Water Rates. Usual Sheaf of Accounts Passed.

The Municipal Council met in regular monthly session at 9 a.m. on Tuesday. Communications, which were dealt with immediately after the reading of the minutes, included those which were read at the special meeting the week previously.

The Council have been requested to enact by-laws prohibiting expectation on the streets and in public places, and for the licensing, inspection and control of dairies, and the distribution of milk, and to require hotels, etc., to thoroughly fumigate any room occupied by a tubercular patient immediately after its being vacated. By-laws covering these matters were ordered prepared, and will be considered at a later meeting.

A request from the Empire Day Committee that the Municipality furnish two policemen to attend at the Empire Day Sports was received. The Council thought if they furnished one officer the committee should furnish the other, and a motion to this effect was carried.

### PROTESTS AND REQUESTS.

A protest from Mr. S. Bartholomew against a domestic water charge was referred to the Board of Works.

S. T. Elliott and Gilbert Thornber both protested against a charge for irrigation water now standing against building lots across the road from Mr. McWilliams' home. It was explained to the Council that these charges are for irrigation rates against the whole block made prior to its being subdivided. When this was done the arrears were apportioned to each lot. All the others had been paid. Instructions were given that the present owners of these lots be made acquainted with the circumstances.

G. H. Wilson was granted a rebate on water rates as no water had been supplied.

A request had been received from the Water Commissioner that a record be kept of the rain and snow fall in the higher elevations. As there seemed to be no one to take up this duty no action was taken.

Mrs. Estabrook of Peach Orchard asked the Council to divert a brook which was contaminating another from which water for domestic use was taken. The Council took the view that as it was running through private property, they could not divert the stream.

A request from Harry Glennie that a leak from a ditch which was overflowing his property in Garnett Valley be stopped was referred to the Board of Works.

J. H. Bowering and C. H. Gayton each applied for a rebate of water rates. The former, who arrived here this spring, had not begun to use water until the latter part of March. He was billed for a full quarter's service. The charge was rebated. Mr. Gayton's claim was referred to the Board of Works.

Applications for electric light were received from Messrs. S. Angove and L. C. Woodworth. The connections were granted.

The Public Works Committee reported that the flume in the rear of the Nelson homo had been lined with galvanized iron. The same committee reported unfavorably on the petition of F. L. Osler and others to road in Prairie Valley, and that the irrigation ditch to James Ritchie's Lot No. 1178, and to J. L. Logie's 0-2014 had been completed; that a 1 1/2 inch pipe in the middle road, and on the north road fronting the Victoria Gardens lots was being laid; that to lay a combined irrigation and domestic water service on the Hillpark Gardens would cost \$1,720.00. There were no funds available for this and the committee recommended furrows to the individual lots, and also that R. S. Monro's request for alterations to flume be left with the Superintendent.

### WOMEN WANT ELECTRIC CURRENT.

A petition from the Women's Institute, supported by a list of users, requested that electric current be furnished on Wednesday mornings to enable them to use their electric irons during summer as well as winter. While there is yet plenty of water it was felt that it would not be many weeks before all the water would be needed during the day for irrigating. The request was therefore not granted.

Billings & Cochrane, solicitors at Vernon, wrote asking for settlement of an account incurred in connection with the transfer of the Development Company and Garnett Valley Land Company interests to the Municipality. The law firm looks to the Municipality for payment of the account in full, while the Councils of former years have felt that the companies' portions should be paid directly to the solicitor instead of being collected by the Municipality. It was decided to advise the law firm that their account would be settled this fall.

The Board of Works reported that a phone had been put in at Peach Valley in connection with the water works which would remain for four months; the Council to pay the cost of installation and removal.

A united request had been made by the workmen employed by the Municipality that their wages, which are not paid until after the 15th, be applied against their taxes and rates due at the end of the month, thus enabling them to take advantage of the discount. The office was instructed to thus charge the taxes and rates against wages.

A copy of the provincial law, received from the Provincial Secretary, in reference to municipal responsibility for the expense of prisoners was read and filed.

The Taube license matter, on which the Municipal Solicitor and a Vernon lawyer had each expressed different opinions, had been referred to the Attorney-General by the Municipal Solicitor Kelley. The Attorney-General declined to give a ruling, and Solicitor Kelley, on the grounds that certain important points had been overlooked by the solicitor at Vernon, advised that the Board adhere to the stand already taken.

### K.V.R. FLUMES NOT SATISFACTORY.

"There was a long discussion over the question of flumes along the line of railway, these flumes having been removed and replaced by the railway company. This

(Continued on page 2.)

### RIFLE ASSOCIATION.

The second stage of the Dominion Silver was shot on Saturday under good shooting conditions. Dates of the other two shoots will be announced later. Jack Conway wins another Silver Spoon for a possible (85) at 500 yards. Tomorrow, Saturday, the usual practice shoot will be held.

### CARD OF THANKS.

To all the kind friends, whose sympathy and services were so kindly tendered in our time of bereavement, we desire to extend our sincere thanks.

R. W. Nelson and Family.

Water Notice.

For License to Store or Pen Back Water.

NOTICE is hereby given that the Municipality of Summerland will apply for a License to store or pen back 960 acre feet of water from Aeneas Creek, a stream flowing in a south-easterly direction and emptying into Okanagan Lake, near Summerland.

This notice was posted on the ground on the 23rd day of April, 1913. The application will be filed in the office of the Water Recorder, at Nicola.

Objections may be filed with the said Water Recorder or with the Comptroller of Water Rights, Parliament Buildings, Victoria, B.C.

J. L. LOGIE, Municipal Clerk.

Water Notice.

For License to Store or Pen Back Water.

NOTICE is hereby given that the Municipality of Summerland will apply for a license to store or pen back 650 acre feet of water from a stream flowing in a south-easterly direction into Trout Creek, near District Lot 2092, Osoyoos. The water will be stored in a reservoir of 650 acre feet capacity, to be built at Headwaters of Camp Creek, a tributary of Trout Creek, and being about six and a half miles S.S.W. of south-west corner of Lot 1378, Osoyoos, and will be used for Domestic and Irrigation purposes, as authorized by Water Records Nos. 275, 875, 913, 960, 975, 976, 977, 978, 979, 980, 981, 982, 983, on lands in the Municipality of Summerland.

This notice was posted on the ground on the 23rd day of April, 1913. The application will be filed in the office of the Water Recorder at Nicola.

Objections may be filed with the said Water Recorder or with the Comptroller of Water Rights, Parliament Buildings, Victoria, B.C.

MUNICIPAL COUNCIL MEET IN REGULAR SESSION.

[Continued from Page 1.]

work was to be done to the satisfaction of the Superintendent, and the latter has reported that they are far from satisfactory. It is now necessary that the water be conveyed to the orchards, and at the same time the Council are not disposed to take over the work until the flumes are made right. It is said that those flumes which cross the track overhead are not substantially built, and the Reeve pointed out the risk the Municipality would assume by taking them over. Were they to fall and cause derailment or other damage the Municipality would be let in for a suit of damages. Coun. Lewes, chairman of the Board of Works, and Supt. Mitchell had inspected the work and reported to K. V. R. Engineer McCulloch that the flumes were not satisfactory and could not be taken over by the Municipality. Engineer McCulloch replied that the flumes were all right, and as the matter now stands there is a deadlock between the Superintendent and the railway Engineer. Coun. Lewes proposed that the matter be referred to Engineer Latimer, with instructions that he take it up with the K.V.R. and have the flumes put in proper condition. Coun. Robinson could see no reason for this expense. Supt. Mitchell was fully qualified to pass upon the flumes, and they were to be made satisfactory to him. He could not see that the Municipality had gained anything by employing Mr. Latimer who was too busy elsewhere to give Summerland matters due attention. It was finally decided that Supt. Mitchell, with the Municipal Clerk, would go over the disputed work and note what changes should be made. The Clerk will then take the matter up directly with President Warren at Penticton, and the feeling was generally expressed that if the matter were duly placed before Mr. Warren he would see the justice of the Council's contention, and order the matter to be made right. At the same time Mr. Warren will be asked that the railway assume the responsibility of maintaining the flumes that lie within the borders of the right-of-way.

K.V.R. WANTS WATER FOR LOCOMOTIVES.

While the Council was in session President Warren telephoned the Clerk asking that the Board consider the railway company's request for a supply of water at mile 9, the station site in Peach Valley, for which he would be willing to pay \$25 per month. The Council were disposed to consider the application favorably, and will ascertain the amount of water required. If a satisfactory rate for payment can be fixed upon no doubt the service will be granted.

The regular monthly report of the Municipal Constable was received, this, among other things, showed that fines, totalling \$110, had been imposed during the month of April.

ACCOUNTS PASSED.

The following accounts were, upon recommendation of the Finance Committee, passed for payment:

Table with 2 columns: Item and Amount. Includes Summerland Supply Co. (\$18.81), A. Richardson, lumber (\$30.60), W. Ritchie, lumber (\$47.74), J. S. Ritchie (\$0.80), T. B. Young, feed (\$15.50), Scott Darkis, smithing (\$8.25), T. P. Thornber, electric work (\$2.91), R. V. Agur, roadwork (\$6.00), Borton Plumbing and Heating Co., fittings (\$11.82), A. B. Elliott, supplies (\$4.75), Dom. Glazed Cement Pipe Co. (\$32.97), Summerland Drug Co. (\$1.75), Okanagan Telephone Co. (\$4.25), Robertson Godson Co., pipe and fittings (\$89.76), Canadian Pipe Co., wood pipes (\$21.88), Postages (\$15.00), Revlow Publishing Co. (\$40.08), F. H. Latimer, engineering (\$50.00), Bank Interest (\$71.80), School Board (\$28.80), Government Telephone Okanagan Telephone Company, tolls (\$1.25), Constable H. McGuffie, expenses, Rudd cargo (\$28.55), E. C. Graham, salary and expenses (\$54.00), C.P.R. freight (\$18.65), M. Arkoll (\$2.00), Pay Roll (\$1,140.85), Total (\$2,047.02).

Shiloh The family remedy for Coughs and Colds. Shiloh costs so little and does so much!

Naramata Notes.

William Armour was in Kelowna last Saturday on business.

Miss Bessie Mitchell and Mrs. Stewart of Penticton were in town on Sunday.

Mr. Steele has been confined at his home for the past few days with sciatica.

The road rounding Aikins' point has been widened and re-graded during the past few days.

Miss Lois Wells is giving a tea on Thursday afternoon in honor of her sister, Miss Hazel.

Rev. J. S. Allen arrived on Tuesday night to be present at the funeral services of his son, the late Mr. A. B. Allen.

All strike agitation seems to be over, and the men have left the flat, either back to the camps or out of town entirely.

Mr. H. W. Mallet and son of Victoria, while on a little trip of inspection to their fruit lot in Summerland, spent a short time on Wednesday with the William Mitchell family who are their relatives.

Rev. G. O. Fallis will conduct the services in the Naramata Church on May 25th. This may be the last time that he will conduct a service here before leaving the Valley. It is barely possible that he may be with us on June 1st as well.

We are very sorry to hear that Wm. Armour will lose all the trees in his orchard. An agent sent out by the nursery from which he bought the trees pronounced them all as having "black heart." We understand that the trees will be replaced by the nursery.

On Wednesday evening Mrs. J. S. Gillespie and Mrs. R. C. Robinson entertained a large number of their friends in Naramata Hall to have another good time with Mr. and Mrs. Fred. Manchester before their departure for South Africa. The time was spent in dancing, and two choruses were given by the young people. The Naramata people are losing two friends for a time who always took part in any of their social gatherings. Regret for their departure was sincerely expressed in the responses to toasts proposed by Toastmaster Mr. Lewis Block. All their friends wish them a pleasant voyage, and hope for a speedy recovery of health for Mr. Manchester, so that they will again be back to help along the good times here.

OBITUARY.

Alexander B. Allen, son of Rev. J. S. Allen of Nakusp, N.B., was born at Andover, N.B., in 1871, and passed away at his ranch home in Naramata on May 11th, 1913.

Mr. Allen and family came to Naramata four years ago. He took a leading part in the town's activities and was an earnest worker in church circles until his failing health confined him to his home for the last year.

Even though in retirement he was always deeply interested in local affairs and greatly enjoyed the visits of his many friends. The community loses a man of sterling character, whose influence and example were always for the right.

The loss of such a friend and neighbor is keenly felt, especially so, as he was among us when our numbers were few, and all recollections will bring back remembrance of him.

The sympathy of us all is extended to his family. He leaves a father, wife, four children; Stewart, Harold, Margaret and Stanley; besides three brothers: Frank Allen of the University of Winnipeg, Ewart Allen of Medicine Hat, and J. Aubrey Allen, M.A., of Los Angeles, Cal., also two sisters: A. Aviso Allen, and Jean, both of whom are at present living in California.

The funeral services were held at the home on Wednesday afternoon and conducted by the Rev. F. W. Pattison of Summerland. Interment was made in the Naramata Cemetery.

Last Friday was a showery day for the Only Club "shower" given for Miss Hazel Wells. Nevertheless the ladies turned out in surprising numbers, drawn, no doubt, somewhat by the reports which were spread by the committee in whose hands rested Miss Wells' treatment on that afternoon. The room was tastefully decorated with flowers and foliage; the

(Continued on page 4.)

The Terror That Abides in the Darkness.

The menace of the uneducated in a country governed by its people. Canada is already in danger through secret societies, fostered in ignorance. Compulsory education will have to be resorted to throughout the country.

WE have not yet learned the menace of the uneducated in a country governed by its people. The Montreal Witness thinks that not many years are to elapse before this country, along with others, will be greatly disturbed if not chastised by those whom we are to-day allowing to grow up in ignorance.

"Throughout the whole Christian world to-day," says the Witness, "the ignorant are banding themselves together in societies whose present size, rate of growth, activity and viciousness are amazing."

SYNDICALISM IN CANADA.

"For a short six months have we had the word syndicalism as a part of our ordinary vocabulary; and already a labor organization which claims a membership of a hundred thousand on the Pacific Coast has adopted all its viciousness. They have decided to work as little as possible, to spoil as much of their employers' material as possible, to do all they can to make their employers' business a failure in so far as they can do it secretly enough not to lose their jobs.

"All this they are planning and practising with the ultimate object of preventing anyone from working more than eight hours a day (some say three) and getting twelve dollars a day for that."

THE CURE IS EDUCATION.

"However plain it may appear to us that their theory of hatred of work as work is a wrong one, however clear it may appear, that should they become masters of the situation, and they threaten to resort to force if they cannot carry their object by peaceable methods, the result would be a reversion to a state bordering on savagery. However clear may be to us their unbalanced mentality, we have ourselves to blame until we have a system of compulsory education of the first order.

"These Ignorantists, Syndicalists, or Industrial Workers of the World, under whatever title they go, frankly base their claim to a right to use what would be generally called sneaking methods to undermine their employers' business on their admission that they do not know enough to wield the ballot, and representatives elected from their class are not capable of holding their own against the educated representatives of other races.

WHERE DANGER LURKS.

"In government they say they have no fair chance to impress the ideas that they feel to be just on the combative conservative mentality of the ruling class. Is there not menace enough for even the back-country representatives in the legislature to realize the danger in that single expression, the ruling class, that these people whom our school system has left uneducated are now applying to all who have had the advantage of a good schooling? By that expression they separate themselves off as a class apart and a class that so pities itself that it is ready to go to extremes for vengeance.

ARE WE SAFE?

"Are we safe from all this?" It was suggested to an I.W.W. leader that their organization would not be able to get a foothold in Quebec because of the hatred of the Catholic Church to secret organizations. His reply was: "You don't think so, don't you? You put your finger on any part of the map and I can tell you of our organization there." There is, in fact, no province more ripe for this thing at the present moment than Quebec, where it will work underground without ostentation for some time, but when it does break out it will have an uncommonly ripe lot of uneducated men to prey on.

"Against this terror that faces France and the United States for their negligence in the past, and which has Russia trembling to-day, we have but one defence—compulsory education that must be of a high and emancipating order."

How Concrete Work Was Made Easy For You

UNTIL a few years ago farmers considered concrete a rather mysterious material, that could be used successfully only by experts. They knew that upon the quality of the cement depended much of the success of concrete work. They had no means of testing cement, such as big contractors employ, and so could not be sure of its quality. Yet the farmer needed concrete. He was kept from using this best and most economical of materials by: 1. Lack of knowledge of how to mix and place concrete. 2. Lack of a brand of cement upon the quality of which he could absolutely rely.

Canada Cement

has supplied both these requirements. We employed men to make a thorough investigation of the farmer's requirements; to find out where and how he could use concrete with profit to himself to discover all problems he might come across and to solve them. This investigation was expensive. But when it was completed we had the material for our campaign to show the farmer how and where to use concrete, and we printed a book, "What the Farmer Can do With Concrete," for free distribution. That book makes every farmer who reads it a concrete expert, as far as his needs are concerned. He finds that there is nothing mysterious about concrete—that a few simple rules supply all the knowledge required. At the same time we met the farmer's second objection—inability to test the quality of cement—by producing cement of a quality that does not need to be tested. The Canada Cement that you buy by the bag is the same Canada Cement that is sold by the train-load for great elevators, buildings and bridges.

This label is your assurance of satisfactory concrete work

## Co-operation in Farming.

Its Advantages for the British Columbia Farmer Outlined.

IN AN ADDRESS on "Co-operation," recently given by Mr. Hayward, M.L.A. for Duncan, B.C., some pertinent remarks as to the loss to farmers caused by their attitude of isolation. "If farmers joined together, they could rule the world," he said.

"I would not like to suggest that agriculture is flourishing any too well in the province of British Columbia. My honest belief is that agriculture is doing as well as might be expected under the circumstances; the circumstances are rather hard, I may say, and in that connection there are five or six matters over and above the question of co-operation that I would like, if time permitted, to discuss with you. Co-operation is not the only thing that will make for success in farming, but at least it is one of the chief things that will bring agriculture into a better state in the Province of British Columbia than it enjoys at the present time. I say better, because I believe that one of the greatest difficulties we have is that we are sending out of the province annually \$14,000,000 to bring in that which might very well be produced within our own borders. You will understand, therefore, what a very serious work the agriculturist has before him. Speaking as a supporter of the government, I say that the government intends to do everything possible to assist you.

"In regard to co-operation, I would just call attention to the fact that, so far as I have been able to see, it has operated very successfully in our district and in many other districts. It has done much to put dollars and cents into the farmer's pocket; it has created a friendlier spirit among the farmers, due to the closer association which the effective operation of the idea entails. In the past, it cannot be denied that the petty bickerings and little jealousies between the farmers, due largely to their isolated condition and individual effort, resulted in pecuniary loss, a loss that has since been transformed into a gain by the adoption of the co-operative idea. It is true, in my opinion, that if the farmers joined together they would rule the world. It is absolutely true; but it is likewise true that it is a very hard thing indeed to get the farmers to join together.

"I regard that, the breeding of a spirit of confidence among the farmers—as one of the chief works of co-operation. Wherever you have a co-operative creamery, or wherever you co-operate in any shape or form; you not only increase the quantity of the produce, but you also raise the standard of quality, both of which performances being coincidental with an all-round reduction in the cost. There are hundreds and thousands of farmers who would make butter—and that would be a good thing for the butter and the consumer of butter—if it could be produced on a co-operative principle. The fact that at the present time they have not only to make the butter, but find a market for it, is one of the reasons why so little of that commodity is made. If butter was made on the co-operative principle, that is, if all the farmers centralized the production of butter or the elements of butter, it could be done at a greatly reduced cost to that which at present prohibits them from making that very necessary commodity.

"It is in the details of the work that the farmer loses, and it is in these same details that the co-operative creamery would make those losses gains. If you increase the quantity and raise the quality of dairy produce, you at the same time increase their monetary value. The monetary values of butter and eggs have altered wherever you have a co-operative society controlling the industry. It is not very many years ago when I, who have been farming here for the last seventeen years, used to peddle butter and eggs around this town, and be glad to take from the grocer just whatever he would give me—and I am sorry to say, take it out in trade. To-day, I send my products to the creamery, and the grocer has to pay what we ask, and not what he chooses to give.

"I am going to give you a few figures regarding our Cowichan Creamery. Now, the Cowichan Creamery is a purely co-operative concern. It started out to make butter. As far as my connection with it went, I started in with the hope that the creamery would start an egg-station. We have now gone beyond that into a poultry station. We have got a pig-feeding station; we buy our feed in car-load lots; we have a siding from the railway. Everything is mixed up by the association, and the farmer brings in his produce and takes out his feed. The one offsets the other, and at the end of the month he has paid for his feed and is due to receive the balance on his product. During the year the creamery produced 158,000 lbs. of butter. It shipped 82,000 dozen eggs, and it placed on the market no less than 20,000 lbs of dressed poultry.

"With regard to the feed, it is an enormous amount, somewhere in the neighborhood of \$40,000 to \$50,000 per annum. Everything is increasing by leaps and bounds. Last year the egg product was doubled; the feed product was also doubled. All these things are paying. In 1906, before we started an egg station, I used to have the greatest difficulty in getting rid of eggs; and when I did, I was selling during the spring of the year at 18 cents a dozen in the case. In 1907 we started the egg station, and from that day to this the lowest price I have received in the spring of the year for such eggs was 27½ cents.

"I would call your attention to the fact that a co-operative creamery can do things that an individual cannot do. A creamery can have a cold storage and take care of its own eggs. It can sell eggs in the market in September and October against what are called fresh eggs from Manitoba and the Prairie Provinces, and these will sell at 35 cents and bring to the producer his 27½ cents. There are many other things in which the farmer might co-operate. Our creamery is considering the installation of a fruit-packing station, and acting practically as commissioner or agent to sell anything—vegetables, potatoes, or anything else. I venture to say that there are not many here who, having had dealings with a commission house, have not felt that the commission men got more than they were entitled to get."

### Peachland Notes.

Thompson Elliot of Summerland spent last Wednesday in town.

W. A. Joffries, who is gathering material for a directory of the Okanagan, spent Thursday in town.

Mr. R. J. Hogg has again received an appointment as fire-warden for this season, his district being between Dog Lake and Bear Creek.

A baseball match between Kelowna and Peachland was played here on Thursday afternoon last, when the visiting team won by one run.

On Monday afternoon word was received by the Express Agent here that an express car had been destroyed by fire at Medicine Hat. Several parcels addressed to Peachland were in it, so we have some disappointed ones in our midst.

The "Skookum" came up on Sat-

urday and took the baseball team and many of its friends to Summerland, where a game was played with the College, resulting in a victory of one run for the latter. Jno. Stanton umpired to the satisfaction of all.

On Tuesday morning, as the steamer "Okanagan" was passing Mr. Jno. Drought's ranch, a man jumped overboard and was drowned, his body being lost in spite of the immediate and earnest efforts of the crew to rescue him. No particulars are to hand as yet.

Those connected with the choir in the United Methodist and Presbyterian Church, under the leadership of Mr. R. J. Hogg, are making preparations for giving an entertainment in the near future. As the object (to procure new music for the choir) is a worthy one, it is to be hoped it will be well patronized.

**Shiloh**  
The family remedy for Coughs and Colds.  
"Shiloh costs so little and does so much!"

As fresh as summer roses in early dew.

Such are the Groceries sold at this store. The delicate aroma of the coffee, the delicious taste of the butter—all the appetizing points of good sweet, clean food are carefully preserved at this Grocery. Even our canned and carton goods are kept in lowest quantities that they may be constantly renewed. Everything is pure and Clean—cleanliness is next to godliness here.

All our Groceries are as delightfully fresh as a wild rose sparkling with dew on an early summer morning. Let a trial convince you. Send or come with an order, or 'phone, and a messenger will call.

PUBLISHED BY THE REVIEW PRINTING & PUBLISHING COMPANY LIMITED, RALPH E. WHITE, MANAGING DIRECTOR

SUBSCRIPTION RATES: \$2.00 PER YEAR, IN ADVANCE. SIX MONTHS \$1.00.

### Advertising Rates:

LEGAL NOTICES.—Twelve Cents per line for the first insertion; Eight Cents per line for each subsequent insertion.

LAND NOTICES.—\$7.00 for 60 days, \$5.00 for 30 days.

WATER NOTICES.—30 days, 150 words and under, \$8.00; each additional 50 words, \$1.00.

THEATRICAL, ETC.—50c. per inch for first insertion, and 25c. per inch each subsequent insertion.

LOCAL NOTICES or Readers. Immediately following regular locals, 20c. per count of line; 10c. per line each subsequent insertion. Half these rates when accompanying display advertisements.

LODGE NOTICES, Etc., 25c. per week, per column inch.

FOR SALE Advertisements, Etc., 3c. per word first week; 1c. per word each subsequent week.

Transient Advertisements payable in advance.

Rates for Contract Advertisements furnished on application.

Copy for change of contract advertising must be in the hands of the printer not later than Wednesday noon to insure publication in the next issue.

In accordance with schedule of prices adopted throughout the valley, charges for advertising are now being made weekly. Heretofore when five issues were made in one month the result was a loss. By the new method customers are charged each week for just the amount of space used.

FRIDAY, MAY 16, 1913.

## OBITUARY.

### MISS NELSON.

The death of Miss Thomasin Mary Alice Nelson occurred at the home of her parents, Mr. and Mrs. R. W. Nelson, on Sunday, May 11th. Miss Nelson, who had been an invalid for some years, had been steadily failing in health for several months, and the end was not unexpected. The funeral was held on Tuesday, interment being in the Church of England burying ground, and the funeral service was held in the small church at the cemetery, Rev. Mr. Robertson officiating. The pall-bearers were: Messrs. Fred Nixon, T. J. Garnett, Muir Stewart and Gordon de Renzy.

### \$200,000 STEEL STEAMER ORDERED FOR LAKE SERVICE.

Mr. George J. Bury of Winnipeg, Vice-President of the C.P.R., accompanied by Mr. Sullivan, Chief Engineer, made a tour of inspection down the lake last Friday, continuing through to Midway by auto. Mr. Bury has made the important announcement that among other contracts let for the B.C. Lake Service is one for a \$200,000 steel steamer for Okanagan Lake, and also another for a steel tug for the same waters.

### BUSINESS CHANGES.

The firm of Pares & Hookham of West Summerland, have dissolved partnership. "The Livery" will henceforth be conducted by Mr. G. R. Hookham, who has bought his partner's interest in the business.

Mr. W. E. Grieve, of Elsey & Grieve, meat dealers, has sold his interest in that business to Mr. Christopher Marshall. Mr. Marshall has been a resident of Summerland for some months, and is a brother of Mr. John Marshall, now a student at Okanagan College. The style of the new firm will be Elsey & Marshall.

The Summerland Boat Works, which has been operated by Messrs. Hatfield & Clark, has undergone a change of ownership, Mr. Hatfield having bought the interests of his partner. It is understood that Mr. Hatfield has secured the services of a competent boat builder and will continue the business of boat building as heretofore.

### "THE PLAYERS" IN A VARIETY ENTERTAINMENT ON MAY 24th.

The program arranged for the evening of May 24, is of a varied nature, and evidently designed for a holiday audience. The first item is a one-act play by Sydney Grundy—"In Honor Bound" in which will appear Mrs. Fetherstonhaugh, Miss Heber-Percy, Mr. Sauter and Mr. Villiers. This will be followed by Scotch songs in costume—Mr. George Fisher. Mr. Alex. Bentley will then sing the "Prologue" from Paggliani, accompanied by Miss Phyllis Higgin. On "The Players" last visit to Penticton this was one of the most popular items on the program.

Mr. Knox, who has proved himself a genuinely funny comedian—a truly rare bird—will tell us "How Bill Adams won the Battle of Waterloo." The last part of the program will be devoted to another short play—"Good for Nothing," in which Mrs. Harry Reynolds, Messrs. Cordy, Sauter, Simpson and Hookham will appear. This sounds as though we were to have a jolly evening.

May 24th at 8.30. Advertisement appears in another column. Conveyances leave "The Livery," West Summerland, at eight o'clock. Round trip fare 25 cents.

## W.C.T.U. CONVENTION.

The Okanagan District Convention met in the Baptist Church at Vernon on Tuesday and Wednesday, April 29th and 30th, the chair being occupied by the president, Mrs. Wanless of Penticton. Five sessions were held which were held fully occupied with business and educational matters.

The educational part of the program proved very interesting. A paper on "The Economic Waste of the Liquor Traffic" by Mrs. D. J. Welsh of Kelowna, revealed some astonishing facts.

Rev. O. C. Main of Vernon gave a masterly address on Tuesday evening on "Woman in Modern Life." Mr. Main advocates citizenship for women, and believes it will prove the solution of some of the present day problems, and will help to pave the way for the higher destinies of the race.

A paper on "The Duty of W.C.T.U. Members to the Child, the Girl, and the Mother," by Mrs. E. Freeman of Armstrong, showed deep thought and careful preparation. "Canadian Wealth" was the subject of an excellent paper by Mrs. Innes of Keremeos, our people being considered our chief wealth. "How to Educate the Children in the Homes regarding the Effects of Alcohol on the Body, and sex hygiene," was the subject of a paper by Mrs. Fenner of Summerland. These papers and addresses contained many helpful suggestions and much advanced thought.

Mrs. Livingstone, our provincial field worker, was present throughout all the sessions and proved herself very helpful. She dealt with the question box, and gave the closing address of the convention on Wednesday evening.

A recitation by Miss Evans of Vernon, and numerous solos and duets by local people, enlivened the sessions.

The next convention is to meet in Summerland in April 1914. The officers elected were: President, Mrs. Fenner of Summerland; Vice-President, Mrs. Hunter of Vernon; recording secretary, Miss White of Summerland; corresponding secretary, Mrs. Gray of Summerland; Treasurer, Mrs. Ball of Armstrong. Miss Gertrude Stainton of Vernon proved a very efficient recording secretary in the absence of Miss White.

The Summerland Union held its annual meeting at the home of Mrs. R. E. White on Monday afternoon of last week. After disposing of considerable correspondence, the election of officers for the ensuing year took place. These were: President, Mrs. Fenner; Vice-Presidents, Mrs. Daly, Mrs. Kelley, and Miss White; recording secretary, Mrs. D. H. Watson; corresponding secretary, Mrs. Conway; Treasurer, Mrs. (Dr.) Smith.

Mrs. Lipssett, the retiring president, is to be congratulated on her efficient conduct of affairs, during the year that has just closed. During her term of office the membership has doubled, and the interest in the work has increased. The society has at present thirty-six lady members and three honorary members. \$58.80 was raised during the year.

After the election of officers Mrs. Fenner gave a report of the Vernon Convention.

The next meeting will be held on the first Monday in June at the West Summerland Baptist Church.

More people go to church because they think they ought to than because they want to.

Cigarettes are now said to cure the drink habit. Another case where the cure is worse than the disease.

## MUCH B.C. FRUIT TO AUSTRALIA

### Prospects Good for Big Sales in that Market.

Vancouver, May 13.—Good prospects for the fruit growers of the province to market successfully the whole of their crop this year, are held out by Inspector W. H. Lyne of the Provincial Fruit Inspection department. The inspector is now preparing for his summer's field work in the orchards. He will thus spend the season till the crop is harvested in the autumn. His time will be taken up in inspecting the orchards for insect pests while the blossoms are still out, in showing growers how to spray their trees in the most scientific manner, and in general instruction on the art of getting good fruit crops. Later in the year he will supervise the harvesting and packing of the fruit.

"Last year," said Mr. Lyne "the fruit growers had a good crop, but they suffered from the congestion in marketing their crop. They were not represented in many of the markets, as were the American growers. This year, special efforts have been put forward to improve the system of marketing. Wherever possible, the Provincial Government has lent its assistance in this direction, and we look not only for a successful crop, but also for success in marketing it to good advantage."

"It is expected that a large quantity of our fruit will find their way to the Australian markets. The Australian laws prohibit fruit being imported from districts infected by codling moth, or even from orchards within many miles of an infected district. British Columbia, being free from the codling moth, is able to comply with the drastic laws of Australia."

"When our commercial system is perfected, there is no reason why we should not be able to supply any market in any part of the world," said Inspector Lyne.

### EMPIRE DAY SPORTS.

The entries for the five-a-side football must be handed to one of the Secretaries, accompanied by the necessary fee, on or before the 22nd of May. Drawing for sides will take place on the 23rd.

One of the features of the day or rather evening will be a bonfire back of the home of Mr. A. H. Steven. This will be one of the globe-circling series of bonfires by the Overseas Club, commemorating Empire Day.

### SCOTT MEMORIAL FUND.

Already some \$50 have been collected in small amounts by the Overseas Club and St. Andrews Society for the purpose of erecting permanent drinking fountains as memorials to Captain Scott and party of Antarctic fame. Mr. Sauter and others had planned to give an entertainment last Friday evening in the Gymnasium in aid of this fund, but because of the rainy weather the entertainment was cancelled. The committee in charge will gladly receive any further contributions toward the Scott fund. It seems scarcely necessary to point out the worthiness of this cause. The fountains will be constant reminders of the heroism of the true Britishers who died so nobly in their effort to further science and knowledge.

Biggs—"I wonder if Diggs has much money behind him?"

Higgs—"He had the other day when I saw him; he was leaning against the Bank of England."

## OKANAGAN UNITED GROWERS, Ld.

The movement for organizing the fruit growers of the Okanagan into one combination, which has been so ably engineered by Mr. R. Robertson, is now nearing a most successful conclusion. At all the places visited since Mr. Robertson met the growers here last Monday night the growers have been unanimous in their adoption of the proposed plan, as were also those visited last week. On Tuesday Mr. Robertson met some twenty-five growers at Naramata who were unanimous in adopting the proposed plan. At Penticton the same evening unanimous endorsement was given by some sixty growers present, while at Kelowna equal encouragement was given. Peachland, which was visited on Wednesday night, is also fully in line. Mr. Robertson is very confident, and says there is not the slightest doubt of success.

The Vernon Fruit Union, the new cooperative organization for that district, has decided to take over the assets of the Vernon Fruit Company, and it is said that an agreement has already been reached with that company. Nothing is being asked for the goodwill of the company. It is quite probable that the Vernon stock-in-trade of the Okanagan Fruit Union will also be acquired by the cooperative society.

### FOREST BD. FIRE REGULATIONS

Victoria, B.C., May 14.—Settlers throughout British Columbia may with advantage be once more reminded that, according to the regulations of the Forest Board, it is now illegal to burn slash and general debris accumulating as a result of clearing operations, unless a permit for such burning is secured, this order continuing through the dry season—until October 1. It is noteworthy that British Columbia is the only Canadian Province which thus controls and regulates slash burning throughout the summers, and in consequence of this precaution the percentage of loss and danger through settler's land clearing is lower here than elsewhere in the Dominion.

### DANGEROUS HOUSE FLY.

Now is the opportune time to begin the raid on the flies—before they have scarcely made an appearance. Prevention is the surest cure.

Quickly cover up food after a meal, and bury or burn table refuse. Remember that the exposure of any kind of refuse near a dwelling furnishes a breeding place for flies, and if food is exposed the flies will deposit germs upon it. Screen all food; keep stable manure in a vault or pit or screen enclosure; sprinkle chloride of lime in damp places.

Burn pyrethrum powder in the house. It will kill most of the flies, and those it does not will fall stunned.

Screen the windows and doors. Remember that where flies are there is danger of typhoid, tuberculosis, smallpox, etc. They feed upon the decayed substances of garbage heaps. They are a natural disseminator of disease and purveyor of filth.—Ex.

### "FRUIT AND FARM."

Fruit and Farm for April comes in a handsome two-color cover by Malcolm Charleson, a rising young B.C. artist. The frontispiece is a full page of Hon. Martin Burrell, Dominion Minister of Agriculture.

The special articles include "Benech Lands in the Dry Belt," by W. R. Pooley of Kelowna; "Agriculture in B.C., Our Responsibilities," by H. A. Stone, Vancouver; "Pemberton Meadows from a Farmer's Standpoint;" "Manures and Manuring," by H. M. Eddle, F.R.H.S., Alton; "Greater Protection for B.C. Orchards," by Thos. Cunningham; "The Apple Marketing Problem," by J. T. Bensley, B. A., Nelson; "My Experience in Saving Bees," by Jas. Johnstone, Nelson; "Celery Growing at Armstrong," by J. H. Patton, the veteran grower of that place; and "Distance Chart in Planting an Orchard," by Prof. Lewis. There are an unusual number of good illustrations, including a full page plate of Commissioner Robertson, who is now in the Okanagan assisting the growers there to work on a co-operative selling plan. The new U.S. tariff bill receives both editorial and news treatment. There is an excellent woman's department conducted by Kathleen Ferguson, and the first instalment of a distinctive B.C.

## The Influence of Bees on Orchards.

W. White, Brantford, Ont.

Every fruit grower realizes the importance of good methods of cultivation in the orchard. It is doubtful, however, whether he appreciates the fact that in spite of all his improved methods his yearly income would be reduced to a minimum were it not for the labors of the hive-bee. He is, indeed, largely indebted to the beekeeping fraternity, almost entirely dependent upon them, in fact, for his yearly crops. Prof. J. W. Crow, dealt with this phase of fruit growing in a deeply interesting address entitled "The Influence of Bees in the Orchard," delivered at the recent Agricultural Short Course at the Ontario Agricultural College. In his opening remarks he stated that at a certain point, the two lines of agriculture, fruit growing and beekeeping, meet, forming a bond of mutual interdependence. In its search for nectar and pollen, the bee forms an essential agent in the fertilization of tree fruit bloom and of nearly all bush fruits.

Fruit pollen, being heavy and more or less sticky, is not carried by the wind to any extent. Although a few wild native insects may assist in the pollinating process, fruit growers are dependent almost entirely upon the hive or honey bee. In the case of the apple, wind fertilization is practically negligible. Under favorable circumstances, this latter agency may be responsible for from five to ten per cent. of the blooms fertilized.

Prof. Crow remarked that he knew of a number of cases in which barren orchards had been brought into bearing in consequence of the introduction of colonies of bees to the neighborhoods in which the orchards were situated. It was true that bees might possibly be responsible to some extent for the transmission of bacterial disease of bloom. The gummy exudate material, laden with germs, was fed upon by bees, and in this way the bacteria were carried away by the bees. This, however, should not be held to be the fault of the bees. It was the duty of the fruit growers to cut out the diseased or blighted portions of the trees, and so destroy the sources of infection.

Apple scab was usually found on the smaller half of a deformed fruit, because that side was weaker and incapable of withstanding disease attacks. The malformation of the apple was due to imperfect fertilization. A perfectly pollinated apple was better nourished, was larger, and proved more resistant to disease.

Prof. Crow described an experiment undertaken by him. Selecting fifty clutches of blossom, he cut them down to one blossom apiece, thus leaving fifty single blossoms. From each of these single blossoms, he cut out four of the five pistils. He selected three other batches of blossoms, thinning the individual clusters down to single blossoms in the same way; but one batch he treated by cutting out three of the five pistils, the next by cutting down two pistils, and the last batch, by cutting out only one pistil. All the blossoms in the four batches were pollinated at the same time and by the same variety. In the case of the blossoms with only one pistil remaining, the fruit all dropped at an early stage. Not an apple arrived at maturity. In the lot containing two pistils to each bloom, only two apples developed. In the two remaining cases, nearly the whole of the fruit developed. These results proved the importance of thorough pollination. As a pollination agent, the honey bee was by far the most effective.

Asking the beekeepers present how many colonies of bees were required for an eight acre orchard, Prof. Crow elicited the reply from Dr. Burton N. Gatos, Ph.D., of the Massachusetts Agricultural College, Amherst, Mass., that at least one colony was considered necessary for the complete pollination of fifty trees. Mr. Harkness, of Irona, Ont., considered this proportion insufficient.

Canada comes second among world rivals in percentage of trade growth since 1900, Argentina coming first.

Canada had (July, 1912) 850 rural mail delivery routes and 52,000 delivery boxes. 250 were established in 1911.

serial, "His Measure of Money," by C. D. Ellis, of Windermere, which promises to be of exceptional interest. Fruit and Farm is full of promise, if the admirable contents of the last two numbers is to be maintained as a standard.

### FARSIGHT IN CAR SELECTION

THE measure of your pleasure in motoring depends on the discrimination you use in purchasing your car.

Not alone should you investigate the worth of the car itself. You should be particular about the firm that makes the car. Look a little ahead—ask yourself whether the car you're about to purchase is likely to have a factory at all behind it six months hence.

There's sure satisfaction in the choice of a McLaughlin Car—not only are McLaughlin Cars trustworthy in themselves, but they come from a factory that has been producing high-grade cars for five years, and was making high-grade carriages nearly half a century before that—a factory that is the keystone of a big organization, with completely-equipped sales depots all over Canada.

Will. Angove has gone to Alberta where he will spend the summer with his brother.

Miss McDonald of Carlton Place, Ontario, is visiting at the home of her uncle, Mr. G. A. McWilliams.

It used to be that in the spring a young man's fancy lightly turned to thoughts of love, but nowadays it is firmly glued to baseball.

A Sale of Ladies' Footwear is being held at the Leather Store. Reductions of 20 per cent. to 25 per cent. are given.

Mr. Hewitt, purchaser of the F. A. Gordon orchard and Collinge cottage, arrived with his family last week, and is now residing in Peach Orchard.

W. J. Curtis, Piano Tuner, will be in Summerland about May 17. Orders left with G. A. McWilliams will receive prompt attention.

Messrs. Murray and Sharp, two members of the Penticton staff of the Canadian Bank of Commerce, spent last week-end with the members of the staff of the local office.

A slight change has been made in the ferry time table, making morning trips one half hour later, leaving Naramata at 8, Summerland at 8.30, and Naramata 9.30.

Remember the date of Dr. Taube's visit, the eyesight specialist, at our store on Tuesday, May 27th. All work absolutely guaranteed as tested. Summerland Drug Co.

Mr. C. H. Bent, who some time ago purchased the Campbell property, arrived here this week from Vancouver with his household effects, and will henceforth be one of our citizens.

An exchange wants to know, "what are our young men coming to?" Coming to see our girls, of course. Just keep your eye on them next Sunday evening and you will be convinced we have solved the problem correctly.

Finley McWilliams, who has been attending McMaster University, Toronto, returned home on Tuesday. He has entered the employ of the Angove Mercantile Company with whom he will remain until resuming his studies in the fall.

The family who has a good garden and keeps a few chickens, a cow, and perhaps a pig or two, won't need to worry over the high cost of living. It's the ones who have not the opportunity to do this, or are too indolent, who are held up for big expense.

The Baptist Mission Circle held its regular monthly meeting on Wednesday afternoon in the Lakeshore Church. Quite a number of ladies from Naramata attended. The feature of the meeting was a farewell address given Mrs. Pattison, who leaves shortly for the East.

The country editor is a reliable encyclopedia. A subscriber sent us this query recently: "What ails my hens? Every morning I find one or more of them keeled over to rise no more." Our reply was: "The fowls are dead. It is an old complaint, and nothing can be done except to bury them."

A contribution to the Review columns, signed "A Subscriber," has been received at the editorial desk this week. While we welcome contributions they must, without exception, be accompanied by the name of the contributor, and at the same time be subject to the discretion of the Editor as to whether they be published or not.

While quite a number entered for the First Aid course with the St. John Ambulance Society, and completed the course, few took the examinations. Those who passed the certificate examination in First Aid, which was held on the 14th, were Mrs. Fotherstonhaugh, Miss Dorothy Cooper, Miss Elizabeth Johnston, and Messrs. R. Milne and C. A. Marshall.

There will be an entertainment in the Methodist Club Rooms on Thursday afternoon, May 22nd, under the auspices of the W.C.T.U. The entertainment will consist of a musical and literary program, refreshments and a social time. An offering will be received for the funds of the Provincial Political Equality League. All friends of the cause are cordially invited to attend.

Miss Gladys Limmer of the Government Telegraph Office spent Wednesday in Kelowna.

The Ladies' Hospital Auxiliary will meet next Tuesday at 2 o'clock at the home of Mrs. John Tait.

The railway hospital at Faulder's, which has been open since construction began, is now closed.

Mr. and Mrs. Harrison of Kelowna were this week visitors at the home of their daughter, Mrs. R. G. Tait.

Rev. F. W. Hardy and Mr. H. C. Mellor are attending the Methodist Conference this week at Vancouver.

H. D. Suckling, accountant of the Bank of Montreal, left on Wednesday morning on a business trip to Montreal.

A. A. Derrick is closing out his restaurant business and is removing his stock to his property in Peach Orchard.

Mr. Kennedy, who has just arrived from Ireland, has joined the staff of the local branch of the Canadian Bank of Commerce.

Mrs. J. Rowley, who has been suffering from a severe attack of appendicitis, is now rapidly regaining her strength.

Mrs. Joe Brown of Keremeos is expected to arrive here this afternoon, and will be the guest of Mrs. James Ritchie for a few days.

A. F. Cotton of the Bank of Montreal branch at West Summerland, who has been spending his vacation at the Coast, returned on Wednesday.

W. H. Mallett, formerly of Brandon, now of Victoria, made a visit to Summerland recently, accompanied by his son. The visit was for the purpose of inspecting his fruit lot here.

Mr. John Wilkie, an electrical engineer of Glasgow, Scotland, and cousin of Mr. James Ritchie, is at present a guest of the latter. Mr. Wilkie has come to B.C. to reside, but does not know just yet where he will locate.

Union services will be held by the Methodists and Presbyterians next Sunday in Summerland. In the morning in St. Andrew's, and in the evening in the Methodist Church. Rev. C. H. Daly will conduct both services.

A crew of carpenters are now at work on the new building on the C.P.R. wharf, which will be used for offices, and fruit and freight warehouses. Already the floor is laid, the frame up, and the roof is now being put on.

A public lecture will be given tonight in the Lakeshore Baptist Church by Dr. F. G. Harrington of Okanagan College. His subject will be "Life in Japan." Dr. Harrington has spent twenty years in that country, and will no doubt furnish his hearers with much interesting and useful information. All are welcome.

### NEW TRAIN SCHEDULE.

Vernon, May 14.—The C. P. R. agent here has received from the superintendent the following approximate time table, to come into operation on the Sicamous and Okanagan branch after June 1st, when two trains each way will run daily between Sicamous and Okanagan Landing. While these times cannot be stated as absolutely correct until they have received the assent of the general manager, it is not expected that they will be altered more than a few minutes.

Train No. 805—Leave Okanagan Landing 5.45, arrive Sicamous Junction 8.30.

Train No. 806—Leave Sicamous Junction 9.30, arrive Okanagan Landing 12k.

Train No. 807—Leave Okanagan Landing 16.30, arrive Sicamous Junction 19.15.

Train No. 808—Leave Sicamous Junction 21k, arrive Okanagan Landing 22.45.

The through sleeper to the Coast will probably be attached to the evening train.

Woman wouldn't be half so attractive to man if he understood her. It is the inconsistent porpoisness that entraps man.

**SHILOH**  
quickly stops coughs, cures colds, and heals the throat and lungs.

# International Egg Laying Contest

The Second International Egg-Laying Contest, held under supervision of the Provincial Department of Agriculture, at the Exhibition Grounds, Victoria, began December and will continue for ten months.

Total Eggs laid from December 2, 1912, to May 2, 1913.

Pen.	Owner.	Breed.	No. of Eggs.

Average price of eggs per dozen during month, thirty cents. Pen temperatures, highest 82 degrees; lowest 28 degrees; mean 51 degrees.

Rain fell on six days; three days with high winds. Considerable dull weather occurred, the sun shining on only twelve days during the month.

Some hitherto daily records were smashed this month by a pen in each class. Pen 14 laid seven eggs on the 25th, and Pen 33, Barred Rocks, did even better than this. They laid eight eggs between six p.m. on the 11th, and eleven a.m. on the 12th. Two perfect eggs were laid on droppings board during the month, and six additional were laid before eleven o'clock, the first collecting period. On the 20th, they laid seven eggs, one being found on the droppings board, and on the 24th they again repeated the performance.

Very creditable records were again made in Class One, the lowest record being 112 eggs. Following were top scores:—Pens 18 and 19, 146 eggs; 15, 145; 1 and 16, 144; 4 and 14, 143; 3, 138; 7, 136; and 17, 135.

First six pens in Class One are:—15, 17, 4, 16, 18 and 14. Broodies:—Pens 11 and 20, one in each.

In Class Two, leading six pens are:—32, 39, 37, 35, 22 and 33.

Top scorers for the month:— Pens 39, 152; 31, 146; 32, 144; 33, 134; 35, 126; 24, 120; 37, 115; and 30, 111. Pens 39 and 31 are old rivals, the former being first prize winner last year, and the latter second. The Reds just beat their last month's record by one egg, thus averaging approximately five eggs per day for the last two months.

Broodies:—21, 5; 25, 27, 35, 38 and 40, 4 each; 24, 26, 28, 29, 34, 37, 3 each; 22, 32, 2 each; 23, 30, 33, 36, 39, 1 each—Total 52 birds.

Record day's production for month, 170 eggs. Total eggs for month, 4,798.

Comparison with other contests for five months:—

"North American,"	total average yield per hen	47.5
English Contest,	do. do. do.	43.8
International,	do. do. do.	71.7

During the month, daily, omitting Sundays, each Pen has received approximately 1 1/2 pounds of dandelion leaves, for which they have evinced a great liking.

Improved and Unimproved  
 FRUIT LOTS

## W. J. Robinson

NOTARY PUBLIC

### SUMMERLAND GROWERS ENDORSE CENTRAL SELLING AGENCY REPORT.

(Continued from page 1.)

complaints of pooling as heretofore practised had been made. The grading of one district had been marketed with the grading of another not as good as the first to the natural detriment of the higher graded fruit. With a Valley inspection by the Central Agency there would be a uniform standard which with time, pooling would remove any of the objections to Valley pooling. Some difficulties that would arise under this method were suggested, and the speaker suggested yet others, but for each of these he proposed a remedy as one that might be applied to the case.

#### METHOD OF POOLING.

Time pooling and the option of staying out of the pool, together with the fact that the time of these pools would be announced in advance seemingly removed any prevailing objections to Valley pooling. Mr. Robertson declared that experience in the older districts had shown that on the average it was found to be an advantage to remain out of the pool. With this pooling method no suspicions would attach to the Central of favoring certain districts. In Yakima a pooling committee fixes the dates of the pools for the different varieties, which are published before July first. Any member may be permitted to withdraw from a certain pool by giving notice. He then, of course, assumes the risk of getting poorer prices by the sale of his fruit separately. It would be the duty of the locals to say just when the fruit is to come in. The manager should be a horticulturist who knows fruit and can handle the growers, and preferably one who can advise on orchard methods, etc.

#### A CRITICAL PERIOD.

Speaking of the situation in the Valley at present Mr. Robertson declared that marked progress toward organization had been made, and that a crisis had been reached, and asked his hearers, "Are you prepared to go a step further and try to work out the details, or are you going to step back and go into chaos? The bridge has been burned, and I am one of those who believe you will go forward. Never again will there come such a juncture in B.C. as there is now." Mr. Robertson then outlined conditions which made it comparatively easy for the growers to co-operate, emphasizing particularly the advantage to be derived from the government's offer of an 80 per cent. loan, stating that he thought it would be a poor business that could not pay back \$80 in twenty years with 4 per cent. interest. He believed if the organization goes through this year that the association will save more in the buying of supplies for 1914 than will pay the cost of selling the fruit. Mr. Robertson said further "We want all to come in with us and make a success of the organization. I know you can do it, and know you will do it, because YOU CAN'T TURN BACK."

#### PLAN UNANIMOUSLY ADOPTED.

Messrs. White and Logie's motion was then put to vote, and unanimously carried by more than one hundred growers present.

Mr. White announced that as soon as the Articles of Association were returned to the solicitor a meeting to formulate rules would be called.

Fast freight, according to Mr. Logie, would be of even greater advantage than local express rates, and he urged that the C.P.R. should be shown the need to the fruit growers of such service, and also that the minimum charge should be reduced. Just here C.P.R. Agent Ross advised that a lower minimum had been fixed by the railway which would be in operation this year.

The announcement from Mr. Robertson that, from Sir Thomas Shaughnessy down, the C.P.R. are anxiously waiting to hear what the united Valley wants, and that every assurance had been given that all possible would be done to foster the fruit industry of the Valley was received with applause. The future of that company's business in this district depends upon the progress of the fruit industry.

#### DELEGATES TO THE CENTRAL.

The meeting was then asked to appoint two delegates to the Central Selling Agency, one of whom

will be a director of that organization. Only those who had already taken stock in the local association were permitted to vote, which was done by ballot. 58 ballots, each bearing two names, were cast, the count showing 45 for Mr. G. J. C. White, and 23 for Mr. J. L. Hilborn, with Messrs. Logie and James Ritchie next in order. Mr. Logie immediately asked permission to withdraw, and thought the choice of Messrs. White and Hilborn a wise one. Mr. White had closely identified himself with the movement, and had made a study of co-operation, while Mr. Hilborn had had years of experience in just such line of work. Mr. Ritchie wished to withdraw and recommended those first named as being fully capable of performing the duties placed upon them.

Mr. Hilborn, in thanking the meeting for the vote given him said he was not surprised at the large vote for Mr. White, but was surprised at the vote given himself, and thought it must be because he was a stranger here. He promised to do his best for Summerland. A motion that there be no more balloting was put by Mr. Logie, and unanimously carried.

#### THE NEW EXPRESS RATES.

A letter from Mr. R. M. Winslow, Secretary of the B.C. Fruit Growers' Association, was then read stating that the transportation committee of that association were arranging to meet Mr. Stout, Manager of the Dominion Express, and asked for any suggestions that the local association had to make. The letter also contained the good news that the express company did not propose to wait till July 15th to inaugurate the new rates ordered by the railway commission, but that they would be adopted at as early a date as possible.

Mr. Tait announced that two lectures had been arranged for the Farmers' Institute, one on veterinary science, the other on poultry, both to be given the same evening.

Mr. D. H. Watson made the suggestion that Okanagan fruit should be graded higher for color, stating that he found on the prairies that color was made a prominent feature with American fruit. Mr. Robertson announced in reply that an amendment was being made to the Fruit Marks Act, and that color would be considered in the grading which heretofore had not been the case. In any event the Central should set its own standard and uniformly adhere to it.

To a very hearty vote of thanks for Mr. Robertson's work and interest on behalf of the fruit growers he replied that if he had had a small share in making the lot of the fruit grower better he would be satisfied, and urged that the growers remember that their managers would be only human, and would make mistakes, "but stand by them and give them your support."

One of the most successful and unanimous meetings of our fruit growers was then brought to a close, and all went home with renewed optimism and fresh courage for the future.

#### LIFE AT CAMP 9.

Special to the Review.

(Spokane papers please copy.)

Dears Sirs,—Bridge and trestle headquarters at Camp 9 is in deep mourning on account of the sudden death of the splendid and shapely two days old colt of "Black Mary Ann," Mr. McCarthy's beautiful thoroughbred driving mare.

Burial took place at 2 p.m., May 6, the Rev. Dr. Alfred Anderson of Cheney, Wash., officiating, ably assisted by Mr. S. J. Smith of Hoop, Wash., chief mourner, while Mr. Andrew Nelson of Collilo, Or., acted as embalmer and undertaker. A beautiful fragrant spot was chosen for burial, surrounded by mushrooms, poppies, and other beautiful flowers, resulting from the stable refuse.

The services, as rendered by Dr. Anderson, were touching indeed (I missed several things after they left), and many a strong man wept and blinked his eye. Chef Olaf and blacksmith Fogelson did their best to render fitting music on the triango and anvil. After a cup of Chef Nelson's special Moccia and Java our friends departed for pastures green, to take a rest, and incidentally to hunt up some old lost skatos, after which they will return to their native home somewhere in Ireland.

Yours truly,  
 "Romco."

May 6, 1913.

**The English Football Cup Tie.**

**A Crowded Day at the Crystal Palace.**

Another Interesting Letter From Mr. J. O. ROBINSON.

The great English football tie has come and gone. For weeks it has had the English sporting public "by the ears." On the way across the Atlantic some young enthusiasts whose homes are in various parts of the British Isles pleaded with me to see the great game at the Crystal Palace, which was to take place in the latter part of April. I never was very fond of association football, but their powers of persuasion were so great that I found myself looking forward to the event with some enthusiasm. Like baseball in the United States, and hockey and lacrosse in Canada, all the young enthusiasts over there know the full biographies and fame of every footballer of any account. They painted vivid pictures of Thompson of Sunderland dashing through his opponents' defence, and great saves by Butler, the mighty goalkeeper.

Consequently Saturday morning, the 19th of April, my father and I started our sojourn for the Crystal Palace grounds, which, although in the City of London, must be twenty or twenty-five miles away from where we live. We went to Kew Gardens station and boarded the district train for Westminster station. By the time we reached Hammer-smith we could tell by the size and nature of the crowds that something unusual was going on in old London. Many having arrived early were spending their time sight-seeing, and were, perhaps, having their first ride in an underground train. Not being accustomed to strap-hanging, and all the seats being taken, their gyrations and gestures were wonderful and amusing to behold when the train got up speed. One chap, looking uncomfortable in a high collar, carrying a rain-coat over his arm, when the train swung around a curve shot across the aisle and landed in a lady's lap, causing much hilarity among his companions.

We got out at Westminster station to walk up to Trafalgar Square and the crowds on the streets was a rare spectacle. London surely was in the hands of the cup-tie invaders. It was estimated that over 80,000 had taken advantage of the excursion rates, not all intending to see the game. Forty special trains were run from Birmingham alone, most of them arriving early on Saturday morning. The great majority of these methodically went about to see the points of interest. One newspaper said that London had become a city of rubber-necks. They swarmed on the foot-paths, choked the roadways in char-a-bancs and brakes and motor buses, filled St. Paul's and Westminster Abbey with a moving throng, filed through the Houses of Parliament, crowded out the Tower, stared into the doors of fire stations, took possession of restaurants—in short "did London" with all the zest and enthusiasm of which the day tripper is capable. Every conceivable sort of a conveyance was pressed into service, some might have been in their prime when Sarah Bernhardt was a youngster. These, fairly overflowing with human cargo, rumbled along to Hyde Park, Hampton Court, Richmond Park, Kew Gardens, and all the beauty-spots of any historical interest.

We made our way towards Victoria station shortly before noon, and after fighting our way through the crowd got to the platform where special trains of from ten to fifteen coaches were pulling out every few minutes for the Crystal Palace, the Mecca of the English sporting fraternity for the day. The game was not scheduled to start until 3.30, yet at 12 o'clock we were fortunate in getting seats in one of the compartments. Every few minutes empty trains would whizz by us on their return trips for more passengers, so we could see that we were by no means the first to get to the grounds.

It certainly is an eye-opener the way these trains of compartment coaches can handle a large crowd, because I should judge no more than three minutes had elapsed after our arrival before the train was emptied and most were on the way for the football grounds. They just simply open the doors on the side and step from their seats out of the train on to the platform, which is nearly on a level with the floors of the coaches.

On paying a shilling each we passed through turnstiles, right in amongst a horde of merry-go-rounds, swings, revolving air-ships, and contraptions of all sorts, to satisfy every taste of the pleasure-seeker in a holiday mood, and furthermore, these contrivances were in full operation, going at top speed. A little farther on, near some artificial lakes and beautiful little gardens, a sight came before our eyes that almost made me home-sick. It was an exact reproduction on a small scale of the main building of the Canadian House of Commons at Ottawa. The reproduction is almost perfect, and judging from the remarks dropped in passing, it is also a mighty good advertisement for Canada.

Near by stands that immense building in height and length and breadth, built almost entirely of glass, the Crystal Palace. In passing through the gardens in front of this famous building one could almost imagine himself in a dream, with a riot of color in flowers, trees, lawns, fountains, statuary, and great stone steps in all directions, leading up to the palace.

Although it was not one o'clock by the time we reached the enclosure where the match was to be played, we were quite ready for luncheon. The Lyons Restaurant Company had erected stands under large tents where refreshments were served. We headed for the nearest one. Here the people were lined up around the counter about ten deep, fighting and struggling for something to eat or drink. We joined the merry throng and for ten or fifteen minutes fought our way up to the counter. Just as we got there, we were informed that all the eatables were sold out, the man to my left getting the last precious sandwich. This had the effect of aggravating rather than appeasing the hunger, so we made haste for another refreshment booth. Here we repented the performance at the first place. It was not until we had gone through this experience three times that we were successful in getting anything to eat. Then we were only successful in getting bread and cheese, but the finest of fowl never tasted better than that morsel did to me that day.

All the tickets in the stands had been sold out last June, so we had to content ourselves with standing room. We took up positions near one end of the field on the side of a hill to wait for about two hours for the kick off, and to watch the crowds stream in. For over an hour before, thousands had taken their places for a long wait, while trainload after trainload was rushing in. For hours they just simply poured through the gates. By the time play commenced they filled the entire enclosure to overflowing. Every tree and post in sight was black with human beings. It was a sight not soon to be forgotten. Everything was a seething mass of humanity that day. The attendance was about 122,000. Just think that over the population of a large city! It went beyond the bounds of my imagination altogether. Two years ago, at a base-ball match in Toronto I thought 32,000 was just about the limit, but it would easily have been lost in that mighty throng at the Crystal Palace last Saturday.

We surely witnessed a battle royal that day. The way the players handled that ball with both their feet and heads was simply marvelous. The teams worked just like clock-work, and especially when close in the goal, they displayed great skill, both in offensive and defensive play. Another feature which is quite noticeable to a Canadian is the absolute freedom from rough play, and the absence of disputes with the referee. There was also an absence of "rooting" by the spectators, the most prominent noise being the clapping of hands in recognition of a good play. I could not help but think what a noise that crowd could make if it once turned loose.

I happened to be amongst Aston Villa supporters, and there was great rejoicing when they scored the one and only goal of the game. After standing there for nearly three hours, I secretly rejoiced, and was thankful to get out of that awful jamb alive, and to get a seat in the train on the return journey home.

**The Full Value of Coal**

You will never derive the full value of the money you pay for coal unless your stove is controlled by the Gurney Economizer. It actually saves 1 ton of coal in every 6 you would ordinarily burn in other ranges.

It also assures a thorough, steady, even heat throughout the entire stove. There is no waste heat going up the chimney.

The Economizer makes sure that the purpose for which fuel is being burnt is carried out.

The Gurney Economizer is a simple device that requires just a light pressure on the lever to result in a consistently heated oven—the secret of successful baking.

No sane person can afford to ignore this saving in coal bills, so make sure that your new range has an Economizer.

The Gurney-Oxford is equipped with other exclusive devices, the Divided Flue, the New Special grate, and the Broiler attachment.

It also is made with a perfectly smooth polished top which forever requires no black lead.

There are no crevices where dirt may lodge—above all it is sanitary.

No intelligent housekeeper to-day can afford to ignore the benefits which science has brought to her through the Gurney-Oxford.

**SYNOPSIS OF COAL MINING REGULATIONS.**

COAL MINING RIGHTS of the Dominion, in Manitoba, Saskatchewan and Alberta, the Yukon Territory, the North-West Territories, and in a portion of the Province of British Columbia, may be leased for a term of twenty-one years at an annual rental of \$1 an acre. Not more than 2,560 acres will be leased to one applicant.

Application for a lease must be made by the applicant in person to the Agent or Sub-Agent of the district in which the rights applied for are situated.

In surveyed territory the land must be described by sections, or legal sub-divisions of sections, and in unsurveyed territory the tract applied for shall be staked out by the applicant himself.

Each application must be accompanied by a fee of \$5 which will be refunded if the rights applied for are not available, but not otherwise. A royalty shall be paid on the merchantable output of the mine at the rate of five cents per ton.

The person operating the mine shall furnish the Agent with sworn returns accounting for the full quantity of merchantable coal mined and pay the royalty thereon. If the coal mining rights are not being operated, such returns should be furnished at least once a year.

The lease will include the coal mining rights only, but the lessee may be permitted to purchase whatever available surface rights may be considered necessary for the working of the mine at the rate of \$10 an acre.

For full information application should be made to the Secretary of the Department of the Interior, Ottawa, or to any Agent or Sub-Agent of Dominion Lands.

W. W. CORY,  
Deputy Minister of the Interior.  
N.B.—Unauthorized publication of this advertisement will not be paid for.

The Commission will hear evidence on all matters affecting agricultural conditions in the Province. All persons interested are invited to be present.

W. H. HAYWARD, M.L.A.,  
Chairman.  
C. B. Christenson,  
Secretary.

**Notes on Sporting Events.**

Peachland was practically depopulated on Saturday the 10th inst. The pillars of church and state, the youth and beauty of our sister burg, came to Summerland on the "Skookum" with the ball team for the closing game of the season with the College. Each team had won two games and were naturally anxious to capture the rubber. A large crowd witnessed the contest, which began about 3.30 on the Campus. The College won by the close score of 8-7. It was anybody's game up to the close of the ninth innings, when the College secured the winning run. For the most part both teams played fast ball, and from the spectators' standpoint the game was the most interesting of the series. Morlock pitched a great game for the College, and the "old reliable" McDougall held him in fine style. Capt. Miller and Ben Gummow did the twirling for Peachland, and were effective most of the way. The games between the College and Peachland have been very interesting and well attended.

The annual game played on Thursday afternoon between the "Faculty" of Okanagan College and the junior team of the same institution was a brilliant social and athletic event. It was won by the juniors by the score of 32 or 132 to 18. The juniors played the same team practically which has represented them throughout the season. The Faculty team contained a galaxy of talent not often witnessed on a ball field. The score is no indication of the game. The Faculty were not out to score. Their intention was educational—to give a scientific exhibition of the fine points of the game. They succeeded. Prof. Morlock acted as catcher for the Faculty, and simultaneously coached Prof. Steeves, the Ty Cobb of Steveston. Steeves will make a brilliant player when he learns not to talk so much. Prof. Baker gave an exhibition of the various curves, inshots, drops, etc., which are used by the great pitchers of modern times. His spit ball was a revelation to everybody. Prof. "Dowie" occasionally missed the ball at first, but never let the sack get away from him. Prof. Ryan was the custodian of third base and the ladies bench, and filled the dual position acceptably. Prof. Wright was shortstop, and showed how the game could be run on business principles. At second Prof. Packham, with the resplendent Roman nose, gave an exhibition of fine sprinting, chasing his opponents from second to third. On several occasions he came within ten or twelve yards of tagging them, in which event they would have been "houted." Prof. Marshall, who goes at the close of the College term to coach Peachland, demonstrated that as a batter the only striking thing about him is his personality, and that covers a multitude of strikes. Prof. Hall, if he gives himself strenuously to practice, will sometime—in time or eternity—make a player. The other members of the Faculty team covered themselves with glory, and the spectators decided to be on hand when these teams hook up again.

**NOTICE.**

NOTICE is hereby given that the partnership heretofore existing between the undersigned, carrying on business as Elsey & Grieve, has this day been dissolved. All claims against the said firm are to be presented to H. H. Elsey, and all monies owing said firm are to be paid to Elsey & Marshall, who will continue the business.

Dated at West Summerland this tenth day of May, 1918.  
Signed H. H. ELSEY,  
W. E. GRIEVE.

A soft answer turneth away wrath but has no effect on a boor agent.

Canada's total immigration has been 74 per cent. English-speaking, 26 per cent. foreign.

There are estimated to be 3,000,000 citizens Canadian-born or of Canadian descent in United States.

The family remedy for Coughs and Colds. Shiloh costs so little and does so much!

**Just What We Have All Been Wanting!**

We have reference to the Fine Rain we have had.

NOW how about a good LAWN MOWER to keep the grass trimmed at a proper length. We have them in different styles and prices. We also have a good line of HOSE, REELS, SPRINKLERS, etc., to keep the grass and vegetables growing when it doesn't rain.

**FLIES**

are dangerous. Keep them out. Two or three SCREEN DOORS and a few WINDOW SCREENS do not cost much, and they may save you dollars. We carry a good line. We also have AWNINGS for the VERANDAH.

**Have You Seen**

our line of GRASS CHAIRS, all styles. They are durable, comfortable and cheap. The line is complete now, but they won't last, and you know the first to come has the best choice. We also have a full line of HAMMOCKS, better get one to enjoy the warm evenings.

**BRIGHTEN UP**

One or two coats of paint make a great difference in the appearance of a place. It is gratifying to yourself as well as to the community. Money is scarce, we know, and one is inclined to let a thing go that doesn't really have to be done, but the expense is small compared with the result, and the effects may be far reaching.

We have just received a large shipment of

**Sherwin-Williams Paint**
