DEVOTED TO THE INTERESTS OF SUMMERLAND, PEACHLAND AND NARAMATA

Vol. 11, No. 9. Whole No. 530.

SUMMERLAND, B.C., SEPTEMBER 27, 1918.

\$2.00, payable in adv

Celebrate Diamond Wedding Anniv'sy.

Mr. and Mrs. Alexander Fraser receive Congratulations of Large Circle of Relations and Friends. Married 60 years ago

To have this week celebrated the sixtieth anniversary of their wedding day was the unique and happy privilege of two of Summerland's most respected citizens, Mr and Mrs Alexander Fraser. Mr and Mrs Fraser were married in the village of Cummingsville, Ont., on the 24th day of September, 1858. They now have living four sons, four daughters, twenty-one grandchildren and one great-grandchild. The sons are Herbert, Harold, and Kenneth, all of Vancouver, and William of Glennella, Manitoba; the daughters, Mrs John Moffat, Victoria, Miss Mary Fraser, Gainsborough, Sask.; Mrs Flatt, wife of Dr C. E. Flatt, who is now serving in France, and Mrs W. J. Fullerton of Durban, Man.

Both Mr and Mrs Fraser were born in Scotland, Mrs Fraser coming to Canada with her parents when only fourteen months old. As a lad of seventeen Mr Fraser came across the Atlantic alone in a sailing ship. He had scarcely passed his twenty-first birthday and she, as Miss Mary Montgomery, had not quite completed her eighteenth year when they were married.

For over twenty-five years Mr Fraser taught school in Ontario.

This week letters by the score have been reaching Mr and Mrs Fraser congratulating them on the attainment of their diamond wedding anniversary. So numerous have been the local friends who have called upon the happy couple to offer them congratulations and express their wishes for many more happy years that Mr and Mrs Fraser were kept busy during the first three days of the week receiving callers.

Numerous and expensive presents bore further evidence of the esteem in which they are held. Among the letters received was one from the Lakeside Sunday School accompanied by a set of sterling silver spoons. Another congratulatory letter was received from the Women's Institute of which Mrs Fraser is a member.

The ladies of St. Andrew's Church sent Mr and Mrs Fraser a letter of congratulation accompanied by a present as a token of the esteem in which they are held by the members of the Ladies' Aid.

For more than nine years Mr and Mrs Fraser have been residents of Summerland, and are actively engaged in fruit growing, their orchard being one of the most successful small orchards of the district and in many ways a model.

May they long be spared to continue as an inspiration to their many Summerland friends.

Summerland Realty In Good Demand.

The Parker orchard, one of the well-known properties in Summerland, has been purchased by C. W. Lees, Principal of the Summerland Consolidated School. Mr Lees has been operating, under lease, the Sutherland orchard immediately to the south of the Parker property. We understand he will take possession of the latter immediately after the end of this year.

Mr Lees owns a lot immediately west of the Sutherland orchard and which has about one hundred feet of fence line in common with the Parker property.

The sale of the Parker property was made through F. D. Cooper, who has been acting as agent for Mr Parker, now a resident of Vernon.

Another property in the immediate vicinity to change ownership is the Kirchoff lot of sixteen acres at the high flume, which has been sold by Mr F. D. Cooper to Mr Joseph Pennant.

The J. C. Brown orchard, immediately west of the Parker lot, and sold by Mr Brown to Mr Traube, a non-resident, has been purchased by Mr Joseph Davidson of Regina. We understand that Mr Davidson is coming here about the end of October to reside.

In addition to his recent purchase

Delegates Well Pleased With Summerland.

Mayor Gale Determined Coast People Shall Know Us Better.

Numerous were the expressions of surprise and pleasure of the municipal delegates in their visit to Summerland last week. The extent of the district, with its broad areas of orchards was a surprise to many. The visit to the packing house, where the fruit grader was in operation, and where Mayor Gale of Vancouver said that for the first time in his life he had all the melons he could eat, and where others seemed to greatly enjoy the fruit, also gave much pleasure.

Mayor Gale informed the Review that he had no idea that such fruit as he had seen here was produced in this province, and expressed a determination to have a display of our fruit made in Vancouver City Hall. Vancouver's chief magistrate is also determined that citizens shall get more of our fruit and at lower prices than it costs them at present. His plans for this he outlined at greater length in his speech at Kelowna last Friday, where he spoke on the subject of co-operation between city and country. He will endeavor to have a thousand boxes of Okanagan fruit placed each week in the Vancouver City Retail Market, his object being to get more direct connection between producer and consumer.

A formal expression of appreciation of the entertainment given the delegates by Summerland has been received, and is as follows:

Union of British Columbia Municipalities.

Office of Secretary-Treasurer. New Westminster, B.C., Sept. 20th, 1918:

To the Reeve and Council of Summerland.

Your Worship and Gentlemen:—

The Union of B.C. Municipalities wishes me to convey to you the very best thanks of all delegates for the kindly manner in which they were received at Summerland on the 19th inst., appreciating very much the hearty co-operation of your Municipality with the Municipality of Penticton in providing entertainment for them.

All express themselves delighted with what they saw of your beautiful district, and with the success which attended the efforts of your Citizens in providing an enjoyable time.

Kindly convey to your workers who did so much our heartfelt thanks for their many kindnesses.

Yours very truly, E. H. BRIDGMAN, President.

CARROLL C. AIKINS GOING TO PARIS.

Mr Carroll C. Aikins, Naramata's largest fruit grower, accompanied by Mrs Aikins and their two children, left this week for Stanstead, Quebec. After a short stay there Mr Aikins will go to Paris, where he has been given a Y.M.C.A. appointment, and will have an excellent opportunity of meeting the B.C. soldiers on leave from the front, and helping to administer to their needs and comforts. Mr Aikins will be away for the winter at least, and perhaps longer. He has left his large orchard property in care of Mr R. E. J. Hunt, who has looked after the place and tended to the winter work for the past two or three years.

Mrs Aikins and children will remain with relatives in Stanstead.

Of the cottage now occupied by G. L. McWilliams, Mr Peter Edwards has purchased the Traylor lot of two acres close by.

Of the properties which have changed ownership within the past two years or more, most of them have been acquired by our own citizens either for themselves or for friends. In fact, real estate men state that it is now easier to sell our own people land than to sell to strangers, an experience has proved to people resident here that the values are in the properties.

Plans For Bigger Irrigation System Endorsed at Meeting of Ratepayers

Committee's Report in Favor of Scheme Unanimously Adopted.

Greater Storage -- Larger Flow

Council Asked to Raise \$35,000 to so Improve System that All Will Have Water In Plenty.

At a meeting of ratepayers held on Monday evening in Campbell's Hall, endorsement was given the Municipal Council's plans for the enlargement and improvement of certain sections of the irrigation system, and enlarging the storage area at headwaters, an addition being made to the original program by insisting on more permanent work.

At a meeting held four weeks earlier a committee had been appointed by the ratepayers to look carefully into the Council's proposition and report. The meeting of last Monday evening was for the purpose of receiving this report, which in substance approved of the Council's plans.

Prof. W. T. Broad, chairman of the committee, in presenting the report said that Summerland has too many pessimists; there is too much fault-finding. He suggested that a boosting club be organized, and that the people co-operate with those in charge of public affairs. Summerland is well worth boosting. She is the gem of the Okanagan, and the Okanagan is the best part of B.C. God has given us a wonderful climate, exceedingly productive soil, and abundance of water. He expressed great faith in the people of Summerland, and confidence in their ability to work together and to achieve their desire to increase the water supply.

After stating that the committee had held several meetings with the Council, and had examined the plans as prepared for the Council by Mr James Mitchell, and also the report of Engineer Latimer, Prof. Broad submitted the following report:

We understood we were appointed not with any idea of hostility to the Council or of being critics of their past action and inaction, but as helpers, and to try to improve matters by carefully considering the present position and its possibilities and making an independent report thereon to the ratepayers.

We were appointed to consider the irrigation question for the whole municipality and not for any one special section of it. It has been said that we were appointed specially to satisfy growers on Jones' Flat. It is nothing of the kind. In our discussions we never once considered any special section, but our suggestions aim at giving, and we consider will give,

- (1) more water for the south main,
- (2) a better supply of domestic water all over the municipality,
- (3) a direct benefit to Garnett Valley by drawing less on the waters of Enns Creek and the Garnett Valley dam,
- (4) a better supply to Slawish Flat, Slawish Flat gets its supply now from Garnett Valley supplemented by some from Trout Creek. By making a larger ditch and flumes we aim to give more from Trout Creek early in the season, and thus relieve the drain on the Garnett Valley supply,
- (5) A much better supply to Jones' Flat. This point we wish to start to lay stress on so as to remove current misconceptions of what we had to do.

Our first duty was to estimate our local needs. At present we do not get an acre foot of water during the season. After careful consideration of experimental work in the Experimental Farm, and in the State of Idaho specially, we came to the conclusion that we should aim to get as near to four acre foot of water as we could, and a minimum of at least two foot.

Then knowing the acreage to be served and its needs varying with soil and subsoil we were able to estimate the cubic foot of water the

system needs to supply each day during our irrigating season of about 125 days.

Mr Latimer quotes in his report that we require for 1 acre foot of water delivered in 100 days .005 (or five thousandths) of a cubic foot of water each second for each of the 1,800 acres to be served from Trout Creek main, that is a total of 9 cubic feet each second. To give 3 acre feet of water we shall need a system to deliver three times this amount, or 27 cubic feet per second. The Experimental Farm needs .7 cubic feet per second, and if we increase its supply three-fold as the rest, we must give it 2.1 cubic feet per second. This will total 29.1 cubic feet per second. To allow a bigger flow early in the season, allowing two-thirds increase on this, will increase the total to 50 cubic ft. per second, while if we allow for seepage in the reservoir, we need make it 60 cubic feet per second. This is our fundamental need and minimum supply to give us a really good water system. Our calculations are based on giving a system that will supply growers with 3 acre feet of water at least.

We have come to the conclusion unanimously, and we wish to make it very emphatic that whatever work we do must be finished and done thoroughly, and aim to supply all future probable needs. With that in view, we advise that Mr Latimer's additions to Mr James Mitchell's plan be accepted and carried out though it will mean several thousand dollars additional expense. We have suffered too much in the past from construction being far too small for our needs, and from a lot of work having been done anything but thoroughly, and hence the tremendous waste by leakages and seepage. We aim to conserve all the water entering the Trout Creek main, and hence advise thorough work on a scale big enough for all our needs all the way down.

To accomplish all this we adopt Mr James Mitchell's suggestions in the main with sundry alterations and improvements suggested by Mr Latimer and Council and Committee. They are thus, and we recommend the following work to be done at once:—

1. Raise the dam at the Trout Creek Intake 15 inches higher so as to turn a much bigger supply into the gate and ditch.
2. The ditch from the Intake to the steel flume to be walled both sides and the bottom finished with cement and stone with smooth face. Walls to be 42 inches high each side, and bottom of ditch 8 feet wide, and walls to be 12 inches thick and bottom of ditch 8 inches thick. This ditch will be 1050 feet long, and cost about \$3 per foot to build. Its height will need be 6 inches above the sides of the steel flume for an evident reason.
3. The steel flume is 89 inches deep, six feet wide at top, and semi-circular in shape. We consider it will carry the water we need, and if the need increases in the future we can put another flume alongside to increase the supply. Nothing needs doing to the steel flume now, as we consider it is ample for our purposes at present.
4. From the steel flume down to the wood flume, make a ditch with walls and bottom like the first ditch mentioned.
5. Strengthen and widen the wood flume as per Mr Latimer and Mr Mitchell, widening it 36 inches so as to give it 92 inches by 30. It is now 57 inches wide. Widen it by three 12 inch planks or about 35 inches actually. Strengthen the trestles and place them on concrete supports.
6. At the cutting between the two hills near the reservoir make a

New Municipal Act Considered by Convention.

Wider Powers For Councils Under Government Board.

The most important item in the program of the Convention of B.C. Municipalities, held at Penticton last week was the consideration of a draft of the new Municipal Act presented by F. A. McDiarmid, solicitor for the Union, who had been engaged by the government to make the draft.

Mr McDiarmid proposes to divide the existing municipalities of the province into four classes, and to create a new class of districts for carrying out special works such as irrigation, drainage, dyking, etc. This last class would be composed of portions of municipalities, or parts of unorganized districts. Provision is made in first and second class cities for election of the mayor from the body of the council; in bodies of the third class it is provided that the mayor shall be elected annually; in municipalities of the fourth class both mayor and council are suggested for annual election. In the first three classes it is provided for the council members to be chosen for two years.

There are a number of clauses dealing with financing, valuation, assessment, and publication of estimates of expenditure. Three remedies are suggested for the non-payment of rates: A lien on the property, enforcement by action in the courts, and the sale of land for taxes. It is also suggested that there shall be a compulsory sale annually.

There is the suggestion that the police board be abolished, and their duties turned over to the councils with greater control to the attorney-general in the administration of justice. Mr McDiarmid proposes to set up a system of county crown attorneys as is done in Ontario; all prosecutions to be handled by such attorney, and direct control of that officer to be vested in the attorney-general. This would abolish the office of city prosecutor.

No reference is made to revision of school trustees' duties, as had been expected in some quarters. Appeals and questions of law from the local government board's decisions are proposed to be taken to the provincial court of appeal, and in matters of discretion and policy to the lieutenant-governor-in-council.

In view of the fact that the various councils had not had the opportunity to consider the new act a committee was appointed to deal with this important matter, a number of changes having first been voted.

Several of the resolutions which had been presented for the consideration of the convention were referred to this committee.

MANUAL TRAINING.

The foundation having been prepared carpenters are busy this week on the addition to the High School building in which accommodation will be made for manual training and domestic science classes. Instructor Baker informed the Review this week that he expects to start classes on Monday, and that these will be held in the Parish Hall until the building is ready. Equipment, tools, and material are being assembled, and it is expected everything will be in readiness the first of the week.

cement ditch as before, 322 ft. long.

7. Where the South Main branches off, raise the spillway 12 inches each side, and build a hood at the entrance to the culvert at the bottom to prevent the water splashing out. These items planned from the Intake to the Reservoir will necessitate cement lining to ditches for a length

From the Intake to the Steel Flume of 1050 ft. From Steel Flume to Wood Flume along the K.V.R. 1065. In the cutting near the Reservoir 322.

A total of 3337.

This at \$3 a foot as per estimate of Mr Latimer will cost \$10,011.

Besides the ditches there will be the widening and strengthening the (Continued on Page 6.)

Start Construction on Water System

Council Loses No Time on launching work for Increased Water-supply. Indications are Money Needed is Available.

At a special meeting of the Municipal Council held on Tuesday afternoon the Public Works Committee was instructed to have a shack for workmen and a corral for horses built at once at Trout Creek headwaters. This work will be put in charge of R. Mitchell, Superintendent of Irrigation, as will also the construction work on the dams there. This work is to be rushed so that as much as possible can be accomplished before cold weather interferes.

It was the unanimous opinion of the Council that Mr J. J. Mitchell should be asked to take charge of the work on the irrigation system, including the completion of the dam in Garnett Valley. This work, we understand, Mr Mitchell has consented to take up. His instructions are to get together the necessary material and to organize the several crews so that the work may be pushed through in the shortest time possible. Much of the details were discussed in Council, but Mr Mitchell will be given full charge of the work, and will be in no way interfered with by the Council in the working out of the details.

A Toronto brokerage firm, who has dealt in Summerland bonds, learning that a new issue was proposed, wrote asking for information, at the same time laying first claim to the new issue because of past relations. The Council was informed that one man was likely to take \$15,000 of the new debenture issue, and another man \$10,000. Two or three prospective sales of \$500 each were also mentioned. If the two larger blocks are disposed of by private sale as intimated, it was felt that there would be no need to put the bonds on the market in the usual way. The idea of the Council since the improvements were first considered has been that the money necessary would be raised locally and secured by the usual debentures. The Toronto firm will be so advised.

The engaging of a teamster was left with the Public Works Committee. Three applications for the position were received and read.

The assessor was instructed to commence the Assessment Roll on the first day of October, the same to be returned on the tenth day of January.

The Okanagan Telephone Co. would have the Municipality keep its line along the Lakeshore road free from trees, special mention being made in a letter to this effect of the trees in front of the Stark and Andrew homes.

Their Only Son Called Home.

After an illness of about eight days Allen Dockstender, the three and a half year old child of Mr and Mrs A. A. Dockstender of this place, passed away at 11 o'clock on Friday morning, Sept 20th. The funeral service was held on Saturday at the house at 2.30, and was conducted by Rev. W. H. Bates, the burial being in Peach Orchard cemetery. During the service places of business in the vicinity were closed out of respect and sympathy for the stricken parents.

The floral tributes were numerous and beautiful, being as follows: wreath, Stewart Fruit Co. staff; spray, Minnie and Irene Carafot; wreath; Mr and Mrs Korchor; wreath; Mr and Mrs T. Ramsay; spray, Mrs J. C. Arkoll; wreath; Mr and Mrs S. Darkis; wreath; Mrs M. McLaughlin; spray, Peggy and Catherine Ramsay; cross, Mr and Mrs J. S. Ritchie; spray, Nora and Allan Clements; spray, Mabel Kroh; spray, Mr and Mrs C. Pineo; cross, Mr and Mrs Shaw; wreath; Mr and Mrs J. T. Washington; spray, Charlie Darkis; cross, Mrs Kroh; spray, Robert and Mrs Cook; spray, Mrs Bates; spray, Mrs McIntyre and family; bouquets of asters from Mrs A. B. Elliott and Mrs Hunt.

Louis Smith, James Smith, Walter Ramsay, and Kenneth Bates were the pall bearers.

EXPERIMENTS AND TESTS.

THE ANNUAL REPORT of the Dominion Experimental Farms for the year ending March 31st, 1917, is a comprehensive document of some 150 pages, containing matter well worth studying by progressive farmers. It describes briefly and concisely the experiments and tests which have taken place at every farm and station, including, of course, a report from Superintendent Helmer of the Summerland Experimental Station. Just as there is not a branch of agriculture undealt with, so there is not a district the capabilities and possibilities of which have not been tried in the matter of better production by improved methods. In former years the report has been given in two and three volumes, and contained accounts of the scientific experiments that have been made during the year, or that were still in progress, written by professional experts of the Experimental Farm system, but henceforth these are to be given in bulletin form and the report confined to statements of the year's doings at the score and more farms and stations at different parts of the country. The report, which, as has been said, will well repay study, can be had free on application to the Publication Branch, Department of Agriculture, Ottawa.

§ § § § §

THE MAIL ORDER CATALOGUE.

UNDER THE CAPTION "Trading With Toronto," the Peterborough, Ontario, Review again points the moral that the best way to meet the mail order competition is to fight advertising with advertising. We reprint the editorial herewith, trusting that it may make an impression on some merchants:

"Several dray loads of the trade catalogues of a well-known department store in Toronto have just been delivered in Peterborough. The post office is cluttered up with these volumes, every one of which weighs over a pound, and the letter carriers are weighted down with them on their rounds. The rural mail deliverers, too, are finding their duties somewhat more than doubled for a few days in the work of distribution, as a large percentage of these catalogues go to the country.

"Every such catalogue so received is a dead loss to the city as it will divert money to Toronto, money that would be better invested at home. And the pity of it is that anything listed in the catalogue can be secured in Peterborough on terms just as advantageous as those offered by the department store. It is the advertising that draws the custom to the larger centre, and the tide can be turned by the home merchants making the same free use of printer's ink."—Canadian Grocer.

Five Students For University.

Four Summerland High School students went out to Victoria on Monday to enter the University of British Columbia. These were: Miss Susie Wallack, Donald McIntyre, Allen Harris, and Roy Elsey. Harris and Elsey have been working at the Summerland Fruit Union packing house, and last Friday night the Union staff entertained the boys at a corn roast at Okanagan Falls. The same evening the Stuart packing house staff gave a dance in honor of Donald McIntyre. During the evening Donald was presented with a signet ring by the girls and with a fountain pen by the boys.

Another student from here at the University is W. M. Wright, who left last week to enter on his second year.

All five representatives of Summerland at the University have the best wishes of the Review and its readers and their every confidence that they will do themselves and their home town credit as students in the University of British Columbia.

Big Bill of Costs Claimed by Ok. Co.

Messrs H. C. Mellor and K. S. Hogg, president and secretary respectively of the Summerland Telephone Co., spent the earlier part of the week in Vernon in connection with the taxing of the costs in connection with the judgment obtained by the Okanagan Telephone Co. against the local concern.

An itemized bill of costs, totaling about \$1,800 had been filed by the larger company. Many of the

Mountain Goat Or Sheep, Which?

Has a mountain goat been making its home on Giant's Head for the past week or more? The suggestion is ridiculed by many, and one man who claims to have seen the animal pronounced it only a stray domestic goat. Those first reported to have seen it will not accept this theory.

During the past week many boys and several long out of their teens have been climbing the sides of Summerland's mountain in search of the mysterious animal.

By using glasses L. B. Ottley got a good view of the much talked of animal and declared it to be a mountain goat.

We are informed that Dave Dickson succeeded in getting within a few feet of it, and is positive that it is a mountain sheep. Those who first pronounced it a goat will probably accept this opinion of Mr Dickson as being correct, as sheep have been seen occasionally in this part of the province.

California produced more than half the peaches grown in the United States this year, according to a special report of the Department of Agriculture. The commercial crop of California was 11,663,000 bushels, and of the entire country 20,546,000 bushels. Of the California crop 88 per cent. is either canned or dried.

Items were objected to, and though the court's decision had not been given when the officials of the local company left for home, very material reductions had been made, and it was believed the total would be reduced to twelve or thirteen hundred dollars.

Corporation of Summerland

TENDERS INVITED

Tenders will be received by the undersigned up to the First of October next, for all or any part of the old Flume on the North Main.

J. L. LOGIE,
Municipal Clerk,

West Summerland, B.C.,
10th Sept., 1918.

The late Lieut. T. H. Broad.

The service in the Lakeside Church last Sunday evening was of a memorial nature in honor of Lieut. T. H. Broad. The pastor, Rev. A. Henderson, in a splendid sermon, spoke with much feeling, and in words of cheer and comfort for the bereaved parents.

Mr and Mrs Broad, just previous to receiving the news of the loss of this their third son to fall in battle, had received a letter from him written from a base camp where Lieut. Broad had been for about four months training men. In the letter he gave expression to his desire to get up to the front where things were being done. His desire was evidently granted, and he could have been there but a few days at the most before he was killed.

The preacher makes two one and the divorce judge takes one from one and leaves two.

PATENTS PROMPTLY SECURED

In all countries. Ask for our INVENTOR'S ADVISER, which will be sent free. MARION & MARION, 364 University St., Montréal.

Women's Institute.

The Summerland Women's Institute held their meeting last Friday afternoon in the Elliott Hall.

A letter was read from Mr W. C. Scott resigning his position as Deputy Minister and Superintendent of Institutes.

Delegates were appointed to the Women's Institute conference which will meet in Kelowna on October 8-10, the official delegate being Mrs Lipsett. Other delegates are: Mrs Solly, Mrs Lees, Mrs Ross, and Miss Aitchison.

In the absence through illness of Mr Kelley, who was to have addressed the ladies, Mrs Solly read a very interesting chapter from "A Student in Arms."

Mrs Angwin gave a few recipes and hints on the art of crystallizing fruits. Another feature of the program was a Women's Exchange, which realized quite a nice sum of money for Prisoners of War Fund, to which the Institute subscribes monthly.

McWILLIAMS' DRUG STORE

Boy Scout Column

SUMMERLAND TROOP BOY SCOUTS.

O. F. Zimmerman, Scoutmaster, Headquarters, College Gymnasium.

Meets every Friday evening at 7.30 p.m.

At our last regular weekly meeting the last of the boys passed their Second Class Tests, while the rest practiced on the mat, some with the "gloves" and others wrestling. We are hoping to be more skilled at this before many meetings have passed, for Mr T. B. Young and Mr Lawler have consented to help us.

The meeting was dismissed shortly after nine o'clock, the Court of Honor sitting for a few minutes, this latter meeting ending by a Patrol Leader challenging the Scoutmaster to a scrap with the gloves, which resulted in the Scoutmaster declaring himself defeated.

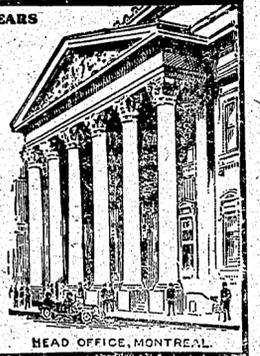

We, all and every Scout, have great cause to regret the departure of Assistant Scoutmaster Allon Harris, who left for Vancouver this week. He is the only Scout belonging to the troop when it was first formed, a matter of eight and one-half years ago. He gradually worked himself to the rank of Patrol Leader, passed his King Scout Badge last year, and he was promoted to the position of Assistant Scoutmaster. And when we thought that it was impossible to run the troop longer he persuaded Mr Zimmerman to take up the Scouts with such success as can only be appreciated by the Scouts themselves. Everyone will join in in saying that he was a good Scout, and could hardly have done more than he did for the troop; and in wishing him a happy and successful year, hoping that on his return to Summerland in good time he may find the work which he aided so generously, carried on to his satisfaction.

Summerland Telephone Co. Limited.

Kitchener was right

when he said—

"Either the Civilian population must go short of many things to which it is accustomed in times of peace or our armies must go short of munitions and other things indispensable to them."

NOW, the only way we can possibly live up to that obligation is by going without in order that our soldiers may have. For the money we waste is not money at all—it is equipment, clothing, shot and shell that are urgently needed in France.

By denying ourselves, therefore, we enable Canada to procure to the fullest extent the materials and labor which she and our Allies need for the successful prosecution of the war.

What happens when we fail to save?

A pull on labor by the Government in one direction and a pull on labor by the people in the opposite

direction. Hundreds of millions of dollars are of no use to the country if goods and services can be secured only to the extent of eighty millions of dollars. So we must do everything in our power to release both goods and labor for the purposes for which Canada needs them.

WHETHER it be food, coal, wool, steel, leather, labor or transportation, the result in all cases is the same. Whoever competes with the nation by freely satisfying his own desires, selfishly appropriates to his own use that which is so urgently required for our fighting men in France.

For the sake of your country and the boys "over there," spend cautiously. Think of what Lord Kitchener has said, and ask yourself first, "Is this something I really need or can I do without it?"

Published under the authority of the Minister of Finance of Canada

A Square Deal For The Community Builders.

ARTICLE No. XXI.

That each one of us must play our part, must do our share, to make our community life as near to the ideal as possible, is very true. It takes all classes to make up a desirable and progressive community.

But who is it, after all, who is utterly indispensable to the welfare of your home town?

Who is it that is the real "U" in Community?

Is it not the man of business? Certainly!

In this age everything is subservient to Commerce.

Commerce, define it as you will, sets the pace—and we all come tumbling after.

This is a national truth, and a communal truth. We must bow to the fact.

Kill off your community commerce, and you have left—Stagnation—Decay.

We arrive, then, at the point where it behooves each one of us to ask ourselves: "What must I do to preserve the commercial life of my community, so that there will be advancement and life instead of rust and stagnation, and so that I shall obtain my just share of the prosperity and comfort of this life?"

The answer is not far to seek.

In order to preserve intact communal attainments and institutions, and to stimulate the development of the germ of commerce, we all must perform a simple economic duty—the duty that every man and woman OWES to his or her community.

Each one of us must assist in the generation of home trade, and in circulating the wealth of the community within the community to the greatest possible extent.

We must conserve at home the fruits of home production, in order that the necessary nourishment for healthy home growth be at hand.

We should make this our permanent, patriotic policy—our unalterable resolve—and we should glory in the stand, for it will bring rich rewards.

Starve your home trade and you must "hit the trail" or dwindle on an empty stomach and shattered hopes.

Don't think you can get by if you simply buy the essentials of life at your home business places,

while you send away for the cream of your requirements. No one can get half-drunk and remain wholly sober.

The half-drunk man cannot fool his family and friends very long; neither can the half-hearted home patriot fool the local business man or, more properly, local business conditions.

As the main-stay of the community, the business man must have stability in evidence on all sides. No merchant can afford to put in large and up-to-date stocks unless he knows there is going to be a local demand for these goods.

The business man must have confidence in the town in order to go the limit of his community usefulness. We must back him up or he cannot back us up. The arrangement must be mutual—the co-operation all-embracing.

Community pride and community loyalty make for permanency and growth and confidence.

With such a spirit, almost any community can get anything in reason. It has a mind to go after. The situation is in our own hands.

As we stand at the base of a mountain we are awed by its majesty; having topped it, we recognize ourselves as its master.

GET BUSY!

Try Potato Bread.

Every household where home-made bread is baked can save wheat flour by an increased use of potatoes in the bread and still have a most appetizing loaf.

Save the left-over potatoes from noon dinner, including the water in which they were boiled unless it happens that you have boiled them with the jackets on. In this case it is better to use fresh water. Mash the potatoes thoroughly while they are still warm and freshly cooked, and a small quantity of lukewarm water in which the yeast has been dissolved with the required amount of salt and set aside until next morning, then mix into a stiff dough in the ordinary way. Set aside again to prove, and when light knead down once; then let the dough rise until light and mould into loaves. Put into the pans. Let the loaves rise again until light. Bake in a moderate oven.

Little Jam in Great Britain

Only about One Ounce per Week in Sight for the Civilians.

The British Ministry of Food has announced that on account of the comparative failure of the fruit crop in Great Britain and the requirements of the Army, only about one ounce of jam will be available for the civil population, and there is no certainty even that this amount will be available.

An agitation for the rationing of jam has developed, but the Ministry has issued a statement as follows:—"At present it is impossible to say exactly how much jam will be available, and therefore it is impossible to ration it. Later on, when the fruit crop is all gathered and the amount available is known, there is no doubt that arrangements will be made by the British Ministry of Food for fair distribution of jam. In the meantime the only thing is for all who have fruit to make as much jam as they can, and for the rest of us to be as sparing as possible in our use of it, so that those who are in the greatest need of it—children and soldiers—shall not go short. It must not be forgotten that jam is essential to the health of the army, and when you thoughtlessly eat more than you need, you are depriving our fighting forces of some of their fighting strength."

The jam shortage overseas makes it certain that there will be an exceptionally heavy demand for butter from Canada this coming fall and winter. Canadian housewives who make all the jam they possibly can will be helping to save butter for our Soldiers and Allies, because a large supply of jam will facilitate conservation of butter.

In France, as well as in the British Isles, the fruit harvest this year will be below normal.

You can use potatoes up to 50 per cent. of the total amount of dough required, but when a large proportion of potatoes is used the dough must be very much stiffer accordingly.

ANOTHER WAR VICTIM.

"What's become of Bliggins?"
"He's laid up, a victim of the war."
"I didn't know he had enlisted."
"He hasn't. He sprained his larynx telling how things ought to be done."

Marriages which should make one out of two often result in sixes and sevens.

ANNOUNCEMENT

THE PRINTERS ARE NOW AT WORK ON
WRIGLEY'S

BRITISH COLUMBIA DIRECTORY

Compiled and Printed in British Columbia—Endorsed by B.C. Government, Boards of Trade, Manufacturers' Association and other bodies.

IN FIVE MAIN SECTIONS

BRITISH COLUMBIA YEAR BOOK—One hundred pages of official data, covering Agriculture, Lands, Timber, Mining, Fisheries, Shipbuilding, and Public Works, prepared by the various Departments. This section will cover fully the development in British Columbia.

GAZETTEER, describing over 1,900 cities, towns, villages, and settlements within the Province, showing location, distance from larger points, how reached, and by what lines, synopsis of local resources, population, etc.

ALPHABETICAL DIRECTORY of all business and professional men, Farmers, Stock Raisers, Fruit Growers, etc., in all towns and districts.

CLASSIFIED DIRECTORY of Manufacturers, Retailers, Producers, Dealers, and Consumers, listing all products from the raw material to the finished article.

TRADE NAMES AND TRADE MARKS—A list of popular trade names alphabetically. If you want to know the manufacturer or selling agent of a trade-name article, look up this section.

INCORPORATED CITIES—All gazetteer information in the Directory of the incorporated cities of the Province will be prepared by either the City Council or the Board of Trade, thereby official.

ADVERTISING BRITISH COLUMBIA—It is necessary to continue to advertise British Columbia outside of the Province, in order that tourists and settlers will continue to come. With this aim in view, a copy of the Directory will be placed in the leading Libraries and Boards of Trade throughout the Canadian Prairies, Eastern Canada, the United States, and abroad. The Directory will be used by prospective tourists and settlers as an official guide of the Province.

The subscription price of the Directory is \$10, express paid.

Peachland Doings

A Weekly Chronicle Furnished By Our Local Representative.

In last week's issue we reported Osborne Needham as missing, but it is with deep regret that we are called this week to report that his mother and sister got word that he had been killed on Sept. 2nd. According to any word to hand from the boys suffering from illness or injuries, they are doing as well as can be expected.

After spending a day or two in Penticton Mr Johnston, who has been working for Mr J. McKinnon, returned on Thursday morning.

Mrs J. Wright was a passenger to Summerland on Thursday night of last week, and will probably remain there for nearly a month.

Mr Graham, the evangelist, who with Mr Mess held meetings here this spring for quite a time, came in on Thursday night's boat last week to renew acquaintances made while here before. He stayed here the week-end, leaving by Monday morning's boat.

Passengers to Kelowna on Friday last were Mrs and Miss Gwen Lang and Mr Rowland, returning in the evening.

Mr A. Town and Mr J. McKinnon were passengers north on Saturday last to send the day in Kelowna.

Mr and Mrs W. Dryden returned on Saturday morning from Penticton, where they spent several days attending the Municipal Convention held there.

A young "old timer" stepped off the boat on Saturday morning last in the person of Cecil Brown. Cecil surprised his associates of former days, not only by his presence, but by his stature. He spent a time in the Peace River country, and since has been in the Edmonton district for nearly a year, and has evidently not forgotten to grow all this time. He may stay in town for an indefinite period. He reports his father still in the Peace River district, and says he seems to be satisfied with the country.

Mrs W. Lupton with her little boy came in on Saturday night to spend the week-end with her parents here.

Mr and Mrs Lighthouse with their two boys, who have been visiting here for a few days, left on Saturday night's boat for their home in Vancouver.

Mr E. Fulton came in on Saturday night to spend Sunday here with his brother and sister-in-law. He returned on Monday morning.

After spending Sunday in Summerland with her people, Miss Nicholson returned on Monday morning to resume her duties at the Trepanier School.

Mr J. Michael and Mr Seth Davidson were passengers to Kelowna on Monday, returning by the evening boat.

Mr Lowndes returned on Monday night from his business trip to Vancouver.

Mr and Mrs Robison with Mrs J. Hay motored to Penticton on Saturday evening last.

Mr and Mrs A. Town are enjoying this week a very pleasing outing, being entertained by Mr and Mrs J. M. Robinson of Naramata to a motor trip down to Idaho, where Mr Robinson has his interest in the mine. Mr R. A. F. Moore and Mr B. B. Smith drove Mr and Mrs Town down to Penticton on Monday where they joined the Robinson party for the trip south. Messrs Moore and Smith returning, Mrs Town was pleased to be able to leave her house and family under the able care of Mrs Sanderson.

After spending a few weeks' enjoyable holiday in Peachland as guest of Mr and Mrs A. Town, Mr B. B. Smith left on Tuesday morning to return to his home in Winnipeg. One of the pleasing parts of Mr Smith's holiday here was a deer hunt with Mr A. Town and Mr R. A. F. Moore and himself as a party. They motored out the main road to camp, but we are sorry to report that there were no horns projecting from the car on their return. However, their effort was not entirely in vain for they saw two on their way out.

Startling Results From Irrigation.

Irrigation farming is a branch of agriculture separate and distinct in itself. It has been practised since long before the dawn of history, and as the food requirements

of the world increase it will be adopted and reduced to a scientific exactness everywhere where good water is obtainable. In no other form of agriculture are the results so certain or the yield per acre so large. Some of the greatest engineering feats in the world are embraced in the work of the Reclamation Service of the United States. Included in these are the Roosevelt dam, the Arrowrock dam, and the Elephant-Butt dam. The entire cost of the development of the projects is assessed against the land reclaimed and repaid to the government in instalments.

In 1917 the 29,000 farmers on 1,000,000 acres of land reclaimed by the Reclamation Service, Department of the Interior, U.S.A., went over the top with a crop valued at \$50,000,000, according to the report of the Bureau recently made to Secretary of the Interior Lane.

Such returns should at least allay the apprehensions, if any now exist, that these farmers will not be able to return the investment of money which has been made by the government in constructing the irrigation system. On several of these projects a single crop will suffice to return the entire investment.

We apparently have trained the tastes of two black bear to a liking for fruit delicacies, proven by their frequent visits made on some of the outlying orchards. Several hunters have been trying to make short work of them, but have been unsuccessful so far. The bears not only have been eating some of the plums, etc., but destroy the trees, so it is hoped the hunters will soon have luck.

ADVERTISING

Is An Evidence of Community Loyalty as well as Good Business

ADVERTISING will do more than build your business. It will build your community.

It will encourage the people in your Community to buy at home more.

It will counteract the effect of outside advertising and keep so much more money in the district.

And your community, after all, is only the aggregation of yourself and the rest of us.

Advertising to-day is, therefore, the business and the patriotic duty of the business men in this community.

And the logical medium is your home paper, as it reaches every buyer in the whole district.

Passing Events: Social, Personal, &c.

Miss Beckworth of Victoria is visiting Mrs G. J. C. White.

Don't postpone ordering fruit trees for Spring 1919 delivery, until Fall; ORDER NOW. B.C. Nurseries Co., Ltd., Vancouver. tf

We learn with regret that Mr W. C. Kelley, who has been laid aside with a severe attack of pleurisy, is still confined to his bed.

McIntosh Red apples shipped from Keremeos were bringing \$3.25 wholesale in Vancouver last week according to Market Commissioner Abbott.

Extensive alterations have been made to the interior of the Rialto Theatre. Beside the addition already mentioned, a new floor has been put in with a gradual slope from entrance to stage.

Mr. Frith, who with Mrs Frith, has been living at Peachland since moving out of the Agur boathouse, was a visitor to Summerland this week. He is much improved in health and expects to return to Vancouver next spring.

Mr and Mrs J. M. Robinson, Mr and Mrs A. Town and Mr R. C. Robinson left by motor car on Monday for Spokane where the men of the party will attend the annual meeting of the company owning a mine near Silver City, Idaho, and of which they are shareholders.

Sergt. Jack Craig, who was twice wounded at the front, and has been giving instruction in physical culture for the past year in England, has enlisted for service in Siberia, according to information received this week by his brother, George. It is hoped that he will be able to visit Summerland before crossing to Siberia.

Miss Mary Kersteman, the friend of Miss Amy Brown, who came with her from Toronto, left on Monday morning to visit with friends in Winnipeg. It is expected that she will remain there until after Miss Brown leaves here to return to the Ontario capital, and that they will journey together from Winnipeg east. Both these young ladies have signed on for overseas service and unless called earlier expect to leave for Europe almost immediately after they arrive in Toronto in October.

Cows for Sale

1. Grade JERSEY, due to freshen in December; gentle, good milk; \$85.
2. Grade HOLSTEIN Heifer, freshened in April; heavy milker; \$95.
3. Grade HOLSTEIN-AYRSHIRE, freshened in May; \$110.

C. W. LEES

Phone 661

Mr F. D. Cooper is open to accept a few more listings of properties in Peachland and Naramata as well as Summerland. 9

Mr and Mrs J. B. McTaggart of Edmonton, registered at Hotel Summerland this week. Mr McTaggart has an orchard property in Peach Valley.

Mr and Mrs H. M. Lumsden went out this morning by K.V.R. for a short visit to Vancouver, Victoria, Seattle, and other Coast points.

Mrs Wellington Watson returned on Tuesday morning from a brief visit to Vancouver bringing with her a seven weeks' old baby girl which she has adopted.

Harry J. MacLeod and Finlay Munro, both on active service in France, have made recent acknowledgement to the Home Comfort Club of parcels received by them.

Ten tons of tomatoes are being gathered daily, we are informed, on the Lakeside Stock and Dairy Farm. These are being shipped to the Broder Canning Co., New Westminster.

Prof. Clements of the University of B.C. is authority for the statement that there are 13,000 farmers in British Columbia, 15,800 of whom own their own farms. This is 90 per cent., and is a larger average than in any other province in Canada.

Hon. Martin Burrell, Minister of Mines, and Mrs Burrell left Ottawa on Tuesday afternoon for British Columbia. While on a short visit to his constituency Mr Burrell will look into the production of zinc and lead. He will also give some attention to the production of platinum, a platinum plant having been recently installed in the Vancouver branch of the Dominion Mint.

Mr F. A. F. Nuttall has had word that his youngest brother, Lieut. Orrell H. H. Nuttall, of the Royal Irish Rifles, was wounded at Kemmel on the 22nd. He has been moved to Lady Evelyn's Mas-on's private hospital, London. Mr Nuttall's second brother, Pte. Ino L. K. Nuttall, of the 31st Canadian Batt., was killed at Kemmel in 1915. The latter was on the staff of the Canadian Bank of Commerce at Stratheona, Alta., before joining up.

One of the horses of Mr C. H. Gayton's team was badly injured in a runaway last Friday night. Taking fright at some cars being switched on the C.P.R. wharf the horses bolted and broke the tongue of the wagon to which they were hitched, and ran wildly up town turning in at English's stable. The breaking of the tongue caused horses and wagon to swerve from side to side of the street, and a sliver of the broken wood penetrated deeply into one of the heels of the injured horse, causing a wound from which it may never fully recover.

The Prisoners of War branch of the local Red Cross is preparing for a tag day to-morrow, Saturday. The school children are being organized under the direction of the teachers and will make a thorough canvass of the district. The money collected will be turned over to the government for the purchase of necessities for distribution among the 2,500 Canadians now held as prisoners in Germany. It has been established beyond question that without the food, etc., thus provided these men could not exist. \$200 annually is required to provide for each prisoner.

KETTLE VALLEY RAILWAY

TIME TABLE

WEST BOUND

MONDAY, WEDNESDAY & FRIDAY
No. 3, West Summerland - 8.43 a.m.
Arrive Vancouver - 10.05 p.m.
[Local from Penticton to Vancouver]
No. 9, West Summerland - 8.33 p.m.

[Through Train from Nelson]

EAST BOUND

TUESDAY, THURSDAY AND SATURDAY
No. 10, West Summerland - 7.28 a.m.
[Through Train for Nelson, all points East and South]
No. 4, West Summerland - 8.01 p.m.
[Local Vancouver to Penticton only]
T. A. OLIVER, Agent.

A. A. Derrick arrived by K.V.R. on Thursday morning on a short business visit to Summerland.

Mr S. G. Tobin of Leduc, Alta., who owns property near T. J. Washington's, has been a guest at Hotel Summerland this week.

Mr S. J. Broad of Calgary, son of Prof. and Mrs W. T. Broad, arrived here on Monday evening accompanied by his wife and baby.

Canadians are numerically as otherwise featuring strongly in the British air service. Forty per cent. of the men in that service are Canadians.

Dr Wilbur Watson, who at one time attended Okanagan College here, and is now a successful dentist in Vancouver, is the guest this week of Mr and Mrs Thomas Dale.

Kenneth Elliott, who has been training for the air service, has nearly finished the course in flying. We are informed that he expects to leave for England about Christmas, and will then be ready for service.

Word has been received here from Grande Prairie, in the Peace River district, that William Dow who, previous to removing from Summerland, was engaged in trapping, has suffered a paralytic stroke.

Word has been received to-day by Mr and Mrs Thos. Dale that Pte. F. Hilton Snider of the Canadian Artillery had been admitted to the 57th casualty clearing station, wounded, suffering with concussion in back of head.

Mr and Mrs Hespeler returned on Tuesday from Vancouver having left their daughter at the Braemar School for Girls. Since leaving here, Mr Hespeler visited his father in Winnipeg, and from there went to the Coast.

The clocks throughout Canada will be set back one hour at 2.00 a.m. on Sunday morning, October 27th, according to an order recently issued by Ottawa. The daylight saving plan will be thus suspended for the winter months.

Mrs Hespeler received news yesterday of the death of her only brother, Pte. Harry Jermyn, at the Ogden Convalescent Home, Calgary. Pte. Jermyn had spent three years in the trenches, and was very badly gassed about five months ago.

Mr and Mrs Crawford of Vancouver are spending a few weeks in Summerland, and are now living in the Agur cottage on the lakeshore. Mrs Crawford (nee Miss Willans) is well acquainted here, having spent some months in Summerland at the home of her sister, Mrs Rivington.

It having been proven that Miss Muriel Phinney was on the wrong side of the road during the recent automobile collision in which the car she was driving and that of Capt. Roe came to grief, a nominal fine of \$5 was imposed in addition to the costs. Action had been taken by the provincial police.

Gordon Robertson, who has been in training in the aviation camp near Toronto, is home on a short visit previous to his going over to England. He arrived last Saturday evening, and will leave by Saturday morning's boat. He has completed his course in "ground work," and when he arrives in England will commence training in flying.

CARD OF THANKS.

Mr and Mrs A. A. Dockatander wish to convey to the many kind friends and neighbors their deepest gratitude for their many thoughtful and helpful acts of kindness and expressions of sympathy during their recent and bereavement.

The funeral of Harry Wellband, a brother of Thomas Wellband of Vancouver, took place at Winnipeg on Sunday.

At Vancouver 3,000 crates of raspberries have been placed in cold storage and will be shipped to Baltimore in December.

After almost two years of negotiation church union at Fernie is now assured. The new organization will be known as the United Church, and a brand new pastor will be called.

Empress Attractions

Friday and Saturday, Sept. 27-28

PLANS FOR BIGGER IRRIGATION.

(Continued from Page 1.)

supports of the wooden flumes, and the work at the spillway at the Reservoir \$2,733. These recommendations will make a complete and thorough job from the intake to the Reservoir. Mr Latimer estimates the total cost of these to be about \$12,750. Mr Mitchell's estimate for a part of the work only was about \$7,000. We advise your adoption of the larger job so as to make a thorough and complete and finished work. To do a part now and another part in the future at increased cost we think unwise. Better do well what we do and finish as we go.

Next we come to the North Main from the Reservoir around to Garnett Valley. We advise here:

8. Making a culvert or cement pipe 204 feet long, made for the first twelve feet, 6 inches higher than Mr Latimer's report to give a better and larger entrance for the water. The main point is to make a good entrance: below the 12 feet it is large enough. This culvert or pipe will separate the two supplies for Domestic Water and Irrigation Water here, and will greatly improve the Domestic Water supply all over the municipality.

9. Beyond the culvert build a wooden flume 160 ft. long 46 inches x 22 inches straight across the depression.

10. Then cement 2,400 feet of ditch as in the South Main, walls and bottom to be finished complete, 3 1/2 feet wide at bottom with sides 2 feet deep and the concrete to be three inches thick.

11. On the other side of the road at the corner of Mr David Clarke's lot, follow down the present ditch and replace it with a new one as above for a distance of 519 feet.

12. Make the flume between these two ditches 46 inches x 22 inches.

13. Increase the size of the flumes thereafter as per Mr Mitchell's report, and line 726 feet and 874 feet of ditch with cement work as above.

14. Build 3248 feet of flume down to the siphon pipe, this flume to be 36 inches x 22 inches.

15. Put in a new siphon pipe across the valley, 12 inches in diameter, and make a concrete cham-

ber at its end to receive the water. This brings us to Jones' Flat.

These details will require lining ditches with cement for a total distance of 4,625 feet, at an estimated cost by Mr James Mitchell at \$1.60 per foot or \$7,400.

The rest of the work on the North Main is work on the wooden flumes, building new in places and enlarging in others.

Mr Latimer estimates this whole work on the North Main will cost \$13,780. The whole of our recommendations are estimated to cost a total of \$26,524. Mr Mitchell's total was about \$15,000 for the part of the work he advised to be done immediately, and to be finished at some future period. We advise doing the whole now if possible.

This Report so far only deals with one part of our water supply, and it is as much as we can possibly get ready for next season's irrigation. The Garnett Valley dam must be finished this fall if pos-

sible, and we suggest \$5,000 for that work and other items needed in Garnett Valley.

The work at the headwaters is imperative, too, at an early date, perhaps next year. But the time for doing work now is only a few weeks now. Hence we advise that the work on the Trout Creek and North Main portions be started at once and if possible completed this fall and next spring, and also the dam be raised at the Garnett Valley dam this fall. This will necessitate the ratepayers authorizing the Council by a by-law to raise some \$30,000 by debentures to cover the cost only of the work that we can do this time. We must leave the completion of the work in Garnett Valley and necessary work at the Headwaters till next year and ask then for another sum of money to make our irrigation and water system really adequate to our needs.

In closing, Prof. Broad strongly urged that the report be accepted

and adopted as "with our magnificent water possibilities we can cheaply and easily make our irrigation and water system one to be really adequate to our needs and one to be proud of."

Mr Broad's motion that the report be adopted was seconded by Mr C. H. Tate. In the discussion which followed there was some considerable criticism of the suggested

delay in making provision for increased storage at the headwaters; the outcome of which was the adding of \$5,000 to the sum of \$30,000 stated above; the additional money being for the purpose of increased storage on Trout Creek as already contemplated by the Council.

The motion asking the Council to raise the \$35,000 by a debenture issue was carried unanimously.

Newspaper Space

Not
For
Fakirs

BUT

For
Honest
Men

The thing that will make your place a landmark and your name a household word is consistent, truthful, rightly supported newspaper advertising.

"A city that is set upon a hill," says the Good Book, "cannot be hid."

The right kind of advertising will, so to speak, set any man, any town, any worthy business upon a hill.

Play fair, look after things, and dip deeply into printer's ink—and you can no more escape becoming prominent and successful than you can reverse gravity and cause rivers to run up grade.

Carry the stuff—deliver the service—keep up a vigorous fire in the papers—know what you print, and live up to it.

The most precious and desirable thing in a business career is public confidence. Getting ever-widening circles of people to believing in you is progress of the first order, but educating strangers to the idea that you're a man not entirely to be trusted, is slipping back—no matter what, for the time being,

the balance sheet may be saying to the contrary.

Forget that old saying of the circus man, that "people like to be humbugged"—they do, on any circus day—and have a bully time over it—but regular business is different.

The fellow who deliberately sets out to deceive the public is a fool and a pikor if he thinks he can get away with it through pages in newspapers. He may manage to put it over for a while, but the backfire will get him in time, and it won't be long before he'll find himself exactly where he deserves to be—nowhere.

Newspaper space isn't for fakirs—it's for honest men, and every honest business can profit greatly through the use of it. It throws a spotlight upon the scene—and men and things that aren't quite standard will not stand the glare.

The crook should eschew printer's ink—he should emulate the Hun propagandists—slip around quietly and pass the bunk heart to heart.

FAIR DATES: **OCTOBER 30th & 31st**
