

The Summerland Review

DEVOTED TO THE INTERESTS OF SUMMERLAND, PEACHLAND AND NARAMATA

Vol. 14, No. 44, Whole No. 615

SUMMERLAND, B.C., FRIDAY, MAY 28, 1920

\$2.00, payable in advance

Consider Further Consolidation

School Board Proposes Sale of Two Ward School Properties

Close Town School

And Put on Additional Conveyances—To Consider Building Plans

Further consideration of plans for the accommodation of the rapidly increasing school population of Summerland were considered at a special meeting of the school board held on Wednesday evening. Plans and estimates are being prepared by H. W. Harvey for proposed buildings which would be more or less temporary, but these were not ready for this week's meeting. Principal MacDonald was asked to canvass the situation with a view to re-arranging the conveyance routes. It is proposed that higher grades be taught at the Trout Creek Point school, and that the town school be closed, all of the children to be conveyed to the Central. By re-arranging the routes and accommodating an additional year or two at Trout Creek school, it is hoped that only one more conveyance will be required. The board on Wednesday decided to ask the municipal council to arrange for the sale of the Prairie Valley and Garnett Valley school properties to provide the necessary money for additional buildings on the Central site.

Mr. Tees was appointed to the position of assistant to Principal Welsh of the high school staff. It is hoped that after the summer vacation that these two will be able to carry on the high school work.

The resignation of Miss Butters, teacher of Div. III, to take effect at the end of the present term, was accepted.

Summerland Wins Baseball Game

In a very evenly contested game, before a large crowd of enthusiastic rooters, the Summerland baseball team nosed out a win in a 9 to 8 score in playing Peachland at Westbank on Victoria Day, in the first game of the season, the winner not being decided until the last man was out.

The play as a whole was not quite up to mid-season form of course, but there were, however, many brilliant plays pulled off.

Quite a number of fans from Summerland took in the game, and, judging from the enthusiastic rooting, certainly enjoyed it.

The boys are now off to a good start by winning the first game, and look forward to a larger turnout than ever at their practices on Monday and Thursday evenings at West Summerland grounds.

The Summerland baseball team will play Penticton at the latter town at 3 o'clock on Saturday afternoon. Arrangements were made at the same time for a return game to be played here between the same teams on Saturday, June 5th.

A special practice will be held at the grounds at West Summerland tonight (Friday), when the team will be picked for the game tomorrow.

Local Students Very Successful

It is pleasing to note the continued success of our Summerland boys at the University of B.C. In the examination lists published recently the name of Howell Harris appears third in order of merit in the faculty of agriculture. This is the more creditable when it is considered that his studies were interrupted for three years by service overseas.

In the faculty of arts (second year), Allan Harris secured first-class honors in physics and chemistry, also distinction in English and French.

Roy Elsey passed with distinction in English and Chemistry, and Donald McIntyre secured distinction in English and philosophy.

Cars in Collision on Lakeshore Road

One of the cars operated by Capt. P. S. Roe in his stage service came to grief on Tuesday, the direct cause of the accident being the fact that the rules of the road on the B.C. and Washington sides of the international boundary are not the same. Clifton Roe was driving home from Penticton when he noticed a car coming in the opposite direction around a curve. He immediately pulled in close against the bank, but the approaching car, driven by an American, likewise pulled toward the bank, with the result that the two cars came together with much force, sufficient to throw the American car crosswise of the road. Both cars were considerably broken up and Clifton Roe was stunned and the two occupants of the other car somewhat shaken up. The stranger frankly admitted his responsibility for the accident. Mr. Chas. Baker was immediately behind the Roe car and he and others who soon came on the scene gave what assistance they could toward clearing the road.

Sugar Should Be Plentiful Now

Fruit Growers Discuss Situation With Federal Government

A special committee appointed by the B.C. F.G.A. to investigate the sugar shortage, car shortage and other important matters have accomplished good results, and congratulations are due them for the valuable work they have done in the interest of the fruit growers of the province, says the B.C. F.G.A. Bulletin.

Through the efforts of the committee a written statement was secured from the Trade Commission of the policy to be followed on the sugar control. The essential feature of the pledge is that no licenses for export will be given until all domestic requirements are provided for.

Owing to financial conditions it was learned that the refineries would find it impossible to carry the customary surplus of refined sugar through April, May and June. The solution for this difficulty was to inaugurate a campaign of publicity to induce the consumers to buy in advance in order to absorb sufficient of the April, May and June surplus so as to prevent the refineries reaching the limit of their ability to finance.

The committee discussed this problem and its solution with the Trade Commission and Sir George Foster, acting prime minister, and the views of the committee were fully agreed to and assurance that a publicity campaign would be carried out was secured. The committee was also successful in getting the eastern refiners to divert a considerable quantity of eastern sugar into the western market to supply the deficiency which has been caused by the extended delays in the receipt of raws by the B.C. Refinery. Large quantities have already been distributed on the prairies and some has come as far as British Columbia.

The sugar situation, although greatly improved, still needs careful watching. At the request of the executive the special committee has agreed to keep in close touch with the situation and to do everything in their power to secure sufficient sugar to take care of the fruit crop. They should receive the full support of every fruit grower in the province.

OPEN AIR CONCERT GREATLY ENJOYED

The first of the open-air concerts which the Summerland Band propose to give this summer was much enjoyed by a large number of citizens Wednesday evening. It is several years since the bandstand has been used, and many were heard to express delight in the fact that we again have a band with assurance of those periodical summer evening concerts. Each of the several selections rendered was well played, and gave evidence of the many nights of hard work the members have put in since the band was re-organized.

PRESENTS PROPOSITION FOR INCREASING MUNICIPAL REVENUE

FORMER REEVE WOULD HAVE FRUIT TREES VALUED AND TAXED WITH LAND

RESOLUTION BEFORE THE BOARD OF TRADE

SUBJECT REFERRED TO SPECIAL COMMITTEE TO BRING IN RESOLUTION AT LATER MEETING

Assessment of fruit trees with the land, for taxation purposes rather than classing them as among the improvements was the subject of an interesting discussion at the Board of Trade meeting Tuesday evening. Although the subject had been announced, there were less than a score of members present. The discussion was opened by a resolution proposed by E. R. Simpson and seconded by W. C. Kelley, to the effect that the government be requested to amend the Municipal Act as to have the trees valued with the land.

In speaking to his motion, Mr. Simpson said that since 1917 clearing, planting and draining were considered improvements for the purposes of the present act. The custom was to assess the trees as they stood with the land and in unorganized districts improvements in excess of \$1,500 are now taxed. As buildings and other improvements would usually exceed this sum, it meant that orchards were taxed by the province. It would now be impossible to effect any change until 1922.

Not a New Idea

Mr. Simpson said the idea was not original with him, and that we are now doing the unusual thing here. He asked all to view the issue quite aside from personal standpoint, looking to the benefit of the municipality at large. We are now paying a high mill rate, but all realize that the money available is by no means sufficient for municipal needs. The community is growing rapidly and its requirements are increasing. It is a vital matter that our water system be in perfect condition. Our assessment for taxation purposes is not what it might be if the trees were included, which would have the effect of reducing the mill rate. He was not advocating the taxation of improvements, but would confine the taxes to revenue producing features. The time has come when those with large holdings realize the advantage of greater expenditure, in fact further improvements are vital to a man with large investments, and he should be willing to pay accordingly. Our municipal system of taxation is one of the most inflexible. It would be more fair if we could take into consideration each man's revenue and ability to pay. The nearest we can approach this is to tax orchards according to production. The present system is burdensome to owners of unimproved lands. Those who have highly improved lands have been benefiting by the flat rate. It had been argued that the man who has made a success of his property should not be taxed for it, but our situation was different from other agricultural or civic communities. In their cases increased population gives natural, normal increase of land value, resulting in an increased assessment without an increased mill rate. Here we have had a stationary or slightly lowering land valuation. All increase in revenue has to be made in the mill rate. The greater a man's ability, the greater his obligations.

In condemning the present system Mr. Simpson pointed out conditions which would offset the productive value of different properties, such as soil condition, situation in respect to water, the variety of the trees planted and the condition of the nursery stock at the time of planting. He felt the subject so important that it should have the serious consideration of ratepayers.

Asked for Bread, Got a Stone

There were two aspects to the tax question, said W. C. Kelley, one that of the imposing body, the other that of the tax payer. Those better able should pay the larger portion. All over Western Canada civic bodies were wrestling with this problem.

He was sorry the provincial government had handled the request of the municipalities for wider taxation powers as it did. They had asked for bread and had gotten a stone. He was no longer in favor of the single tax here. Leaving aside the fact that the value of the dollar had decreased, he felt that the land was already assessed too high. If Summerland is to be progressive and made attractive to new settlers, it must have modern conveniences, and our councils must be provided with the money or made to carry on like a storekeeper down at the heels. We have got to alter our system of taxation. Eventually we will have to tax our buildings. When we have high land taxation the poor lands fall into the hands of the municipality and become non-tax paying, thus piling the burden on to the other lands. It is producing power and population that make land values. Mr. Kelley referred briefly to Penticton's municipal finances and to its application for the right to increase irrigation rates. Vancouver had had single tax, but this had been abolished. If we are to get facilities here of a high order, the man with the larger revenue must pay the larger tax. No man should feel that he is being penalized by being required to pay a percentage in taxes.

Several questions were put to the speakers, but there was no one to address the gathering in opposition to the resolution. In answer to a question from F. A. C. Wright as to how much the change would increase the revenue, Mr. Simpson replied that this would all depend on the council. At present without increase of revenue the mill rate would be reduced to less than one half.

Some Criticism Offered

J. R. Tate said the speakers had not taken into consideration the amount spent by the owners in making poor land productive. He said it would be very hard to assess trees. He had some six-year-old trees which must be cut out in a year or two to make room for small ones recently planted.

The Truck Gardener

Mr. Agur thought the trees were not a fixed asset. A good orchard one year might be greatly reduced in value the next. It would take three or four experts to keep the assessment roll in shape.

K. S. Hogg asked about the newly-planted orchard. Reeve Campbell, when called upon, briefly pointed out the necessity of larger municipal revenue.

British Columbia Crabs

British Columbia crabs are again being canned and offered on the local market. It is some years since this industry was discontinued, California and Japanese competition rendering the British Columbia industry unprofitable.

British Columbia Crabs

tion and moved that the matter be referred to an expert committee to be named by the chair who would report to a special meeting. This amendment was seconded by J. Tait and carried almost unanimously. At the suggestion of R. E. White, President Andrew was given time to select his committee. Deciding to act upon this suggestion, the president said he would ask the reeve to appoint a member of the committee.

Women's 'At Home' To New Citizens

The Summerland Women's Institute held a most successful "at home" on Wednesday afternoon at the home of the president, Mrs. W. J. Robinson. The object of the event was to give the members of the institute an opportunity to meet the newer residents, so that all could become better acquainted.

The attendance was very large, between seventy-five and eighty ladies being present. The reception rooms were beautifully decorated with tulips and lilacs and tea was served in the dining-room, the table of which was daintily centred with tulips. Those pouring tea were, for the first hour, Mesdames Andrew and Fawkes, and for the second hour Mesdames J. Sutherland and Cooper.

The following ladies contributed to a programme which was greatly enjoyed by all: Mrs. Angwin, a reading; Miss Banks, pianoforte solo; Miss Barkwill, Mrs. E. N. Rowley and Mrs. G. Ross, solos.

Likes Way Work Is Being Done

American View of the Okanagan Soldier Land Project

The editor of the Oroville Gazette made a recent Sunday run from his prosperous town through the soldier settlement lands now being opened up in the Osoyoos-Fairview section of this Valley. Returning to his desk he wrote enthusiastically thus, respecting the soldier settlement project:

Much has been said of this irrigation system in the press during the past twelve months, and while the press was having its say, the contractors were doing things, and already a sinuous gash plows its tortuous way for several miles from the intake on the Okanagan river, just below Vasseaux lake, to a point a short distance south of Fairview. So far as it has gone that lengthy ditch is still in the raw, but a completed section at the upper end gives the observer some idea of what it will be like when once completed. Nowhere in the west will there be a better or more permanent irrigation system. It is built about like everything else that is undertaken across the line in the way of construction, it is done right. Owing to the gravelly and consequent porous condition of the ground over which the ditches extend it is necessary to cement the main canal, and the sides and bottom are made up of large slabs of concrete that extend flush with the top of the ditch, which is large enough to accommodate the entire flow of the Okanagan river at that point. This stretch of completed canal gives one some idea of the excellency and solidity of the work and what the system will look like when once ready to turn, in the water. The contractors are preparing to rush work this season on a larger scale than heretofore. At several points along the line are groups of new buildings under construction that are to accommodate the enlarged force that will soon be employed, and huge stacks of material are distributed along the line of the main ditch. The initial cost of this vast enterprise is going to run into money, but it will be money well spent, for when the system is once completed it will not be necessary to spend hundreds and thousands of dollars every year in repairs.

While in the east recently the president of the B.C. F.G.A., Mr. Barnes, and Mr. Palmer, of the executive, discussed the car shortage with the railway authorities. The C.P.R. will build 500 new refrigerator cars and expect to have them all ready for the fruit movement this year. They will endeavor to improve the service by speeding up the movement and return of cars, and will also consider running a daily fruit train through to Winnipeg on fast schedule.

Building More Cars For Fruit Traffic

The committee also discussed the type of car most suitable for carrying fruit. The C.P.R. has agreed to immediately construct or alter six cars in accordance with the suggestions made by the committee, and will test these cars out thoroughly for both fruits and other commodities. If this type of car proves most satisfactory for fruit service and does not prove less serviceable for refrigerated meats, it will be adopted for all purposes.

The C.N.T. is building 600 new refrigerator cars, of an improved brine tank car now in use.

NEW CANNERY FOR KAMLOOPS

(Kamloops Standard-Sentinel)

It is said on the street that a local company has been organized with Mr. Fenwick as promoter, to open a cannery in this city. It is understood that the plant at Wallachin has already been purchased and that with some up-to-date machinery will be ready for operation by the time the fruit season comes around.

To Establish Second Cannery

O.U.G. Fruit Products Ltd. To Can Soft Fruits in 1921

May Locate Here

New Company to Have Vernon Plant in Operation This Year

The provisional directors of the O.U.G. Fruit Products, Ltd., the organization of which mention was made in last week's Review, are: E. R. Simpson, Summerland; E. M. Caruthers, Kelowna; Capt. J. T. Mutrie and E. Trask, Vernon; E. J. Chambers, Penticton; T. Powell, Peachland; R. Arnott, Armstrong; L. J. Proctor, Enderby; secretary-treasurer, W. J. McDowall, Vernon; manager, W. A. Ferguson.

The nominal capital will be \$100,000, and it is proposed to issue immediately stock to the amount of \$45,000. This stock will be issued only to the O.U. Growers Ltd., the affiliated local associations and growers under contract. The idea of issuing stock in this way, says Mr. Walter J. McDowall, the secretary-treasurer, in a communication to The Review, is in order that the growers under contract may derive the full benefit which would accrue from the establishment of this industry.

The company has a site at Vernon with ample trackage, and will start immediately the erection of a factory 125x140 feet. This will include an 8-kiln evaporator plant and factory for canning purposes. For this year it will not be possible to operate other than on evaporated apples, apple jelly, apple butter, apple sauce and a limited quantity of cider. The capacity for this year will be twenty tons of apples per day.

The company purposes doing a general cannery business, but as a full line of machinery cannot be delivered in time for this season's operations canning will not be undertaken until next year.

Although Mr. McDowall makes no definite statement on the establishment of a cannery in Summerland next year, he does refer to the advisability of having a cannery in this part of the Valley in order to be in close touch with the soft fruit industry. As Summerland is the centre of this industry, it will be assumed that such a cannery will be established here.

Synopsis of Land Act Amendments

Minimum price of first-class land reduced to \$5 an acre; second-class to \$2.50 an acre.

Pre-emption now confined to surveyed lands only.

Records will be granted covering only land suitable for agricultural purposes and which is non-timber land.

Partnership pre-emptions abolished but parties of not more than four may arrange for adjacent pre-emptions with joint residence, but each making necessary improvements on respective claims.

Pre-emptors must occupy claims for five years and make improvements to value of \$10 per acre, including clearing and cultivation of at least 5 acres before receiving Crown Grant.

Where pre-emptor in occupation not less than 3 years, and has made proportionate improvements, he may, because of ill-health, or other cause, be granted intermediate certificate of improvement and transfer his claim.

Records without permanent residence may be issued, provided applicant makes improvements to extent of \$300 per annum and records same each year.

Failure to make improvements or record same will operate as forfeiture. Title cannot be obtained in less than 5 years, and improvements of \$10 per acre, including 5 acres cleared and cultivated, and residence of at least 2 years are required.

Pre-emptor holding Crown grant may record another pre-emption, if he requires land in conjunction with his farm, without actual occupation, provided statutory improvements made and residence maintained on Crown granted land.

Unsurveyed areas, not exceeding 20 acres, may be leased as homesteads; title to be obtained after fulfilling residential and improvement conditions.

For grazing and industrial purposes areas exceeding 640 acres may be leased by one person or company. Mill, factory or industrial sites on timber land not exceeding 40 acres may be purchased; conditions include payment of stumpage.

Natural hay meadows inaccessible by existing roads may be purchased conditional upon construction of a road to them. Rebate of one-half of cost of road, not exceeding half of purchase price, is made.

PRE-EMPTORS' FREE GRANTS ACT
The scope of this Act is enlarged to include all persons joining and serving with His Majesty's Forces.

The time within which the heirs or devisees of a deceased pre-emptor may apply for title under this Act is extended from one year from the death of such person, as formerly, until one year after the conclusion of the present war. This privilege is also made retroactive.

No fees relating to pre-emptions are due or payable by soldiers on pre-emptions recorded after June 26, 1918. Taxes are remitted for 5 years. Provision for return of moneys accrued, due and been paid since August 4, 1914, on account of payments, fees or taxes on soldiers' pre-emptions.

Interest on agreements to purchase town or city lots held by members of Allied Forces, or dependents, acquired direct or indirect, remitted from enlistment to March 31, 1920.

SUB-PURCHASERS OF CROWN LANDS
Provision made for issuance of Crown grants to sub-purchasers of Crown Lands, acquiring rights from purchasers who failed to complete purchase, involving forfeiture, on fulfillment of conditions of purchase, interest and taxes. Where sub-purchasers do not claim whole or original parcel, purchase price due and taxes may be distributed proportionately over whole area. Applications must be made by May 1, 1920.

GRAZING
Grazing Act, 1919, for systematic development of livestock industry provides for grazing districts and range administration under Commissioner. Annual grazing permits issued based on numbers ranged; priority for established owners. Stock owners may form associations for range management. Free, or partially free, permits for settlers, campers or travellers, up to ten head.

Next Week's Work in the Orchard

By R. H. Helmer

Melons and cukes can be seeded now in the open and plants set out.

Transplanting of tomatoes, peppers and egg plants should be done soon. Watch the moisture in the soil, don't make the soil cold by over irrigation. To keep young plants growing irrigate a little often and cultivate often.

Beans should all be planted now for field beans. Beans like hot weather, and those planted now soon catch up to the earlier seedings and avoid frost danger. Garden corn should be started now and planted till the middle or third week in June, so as to keep a rotation of green corn.

Don't irrigate the roads, somebody else may need that water badly—we do for one.

Best Methods of Orchard Cultivation

Practices Vary According to Soil and Climatic Conditions

The method or system of cultivation to be adopted may be varied to some extent to meet local conditions. In reality, however, all systems should be, and in most cases are, a slight modification of the "clean cultivation and cover crop system."

The clean cultivation method calls for all the ground under and around the trees to be plowed and frequently harrowed until around July 1st.

This system has much to recommend it, viz.: (1) maximum conservation of soil moisture; (2) excellent conditions for liberation of plant food especially nitrogen; (3) sightliness and cleanliness of the orchard, and (4) control of insect pests.

In connection with this, either fall or spring plowing may be practiced, the former however, only in those localities with a favorable enough winter to so permit. The great secret of success with any system of cultivation designed to conserve moisture and liberate plant food is to get on the land as early in spring as possible, otherwise, if the orchard is not plowed until late, most of the advantages of cultivation are lost.

Modifications of the above consist of leaving a strip of sod about four feet in width next to the trees. In old orchards where it is difficult to get close to the trees this may be practised successfully, in which case the grass is cut once or twice during the season and allowed to remain as a mulch.

In both these instances, on the cultivated portion a mulch is maintained until about July 1st, when a cover crop of some sort should be sowed. If the seed is not too expensive, some leguminous crop like red clover or crimson clover at the rate of about 12 pounds per acre for the former and 10 pounds of the latter, or summer vetch at the rate of 50 pounds per acre is advisable, as these will add a considerable quantity of plant food to the soil.

If too costly, rape may be used as a cover crop, at the rate of 30 pounds per acre.

The sod mulch system, if properly handled, may be advisable on moist soils where there is abundance of plant food. This system must not be confused with the sod system, which is not to be recommended. In the former, for the first few years grass or old straw is hauled on to the orchard and placed around the trees to form a mulch. This practice is continued until the cuttings from the sod beneath the trees is sufficient in themselves to form a heavy mulch.

POISONOUS PLANTS OF THE DOMINION

The old saying that "one man's meat is another man's poison" appears to be true in the case of different kinds of live stock. It is a fact that some plants which poison horses are not injurious to cattle or sheep, and some which cause loss among cattle and sheep are not eaten by swine and horses. In Bulletin No. 39, second series of the experimental farms, "Principal Poisonous Plants of Canada," by Miss Faith Fyles, B.A., obtainable free upon application to the Publications Branch, Department of Agriculture, Ottawa, a list of plants which do injury to the various classes of animals is given.

The bulletin, which is prepared for livestock owners, gives information regarding poisonous plants and enables the farmer to distinguish the most harmful species in his neighborhood so that he may be able to avoid pasturing animals on infested areas until the danger is past. The yearly loss due to plant poisoning is known to be on the increase, but the amount of the loss is not ascertainable because many fatalities are attributed to other causes through lack of knowledge of poisonous plants.

A WOULD-BE BURBANK

"It's no use," sighed the nature wizard, "I may as well give up."
"What is bothering you?" asked his companion, sympathetically.
"I started a few years ago on a whim of mine. I took a head of cabbage and crossed it with a white potato and grew eyes on it, then I crossed them with a cornstalk and grew ears on it; then I crossed that with celery and grew a neck on it; then I crossed that with a cocoon and grew hair on it, but darned if I can figure out what to do for a nose and mouth."

Several items of expenditure authorized by the house at Ottawa are of interest to the Okanagan, having first been recommended by Dr. Tolmie, minister of agriculture. The sums voted include \$1,200,000 for experimental farms; \$150,000 for the eradication of pests; \$18,000 for entomology. \$140,000 was voted for the fruit branch of the department of agriculture, and \$1,500,000 for the health of animals branch. \$165,000 was voted for development of dairy industry.

Correspondence

Editor, Summerland Review:

Dear Sir:—One Autolyus, who perpetrates the intellectual column of your highly respectable family journal has waxed so strong throwing lead coffins about that he has now ventured into the field of sociology and slain Socialism at one fell blow.

It will be impossible to take up all his mis-statements without encroaching too much on your valuable space, but some of them are so glaring that they may be disposed of in a very few words.

After chattel slavery came feudalism, after feudalism came capitalism, and after capitalism will enter a new order growing out of the development of the economic forces in its parent. History shows us that the method of ownership of land and utilities has always had a direct relation to the prevailing processes of production and distribution. When production was individual the ownership of the tools of production corresponded. Today most of our troubles are caused by the fact that production is social and distribution is still individual. These will by the evolutionary forces inherent in themselves be forced into co-ordination and social ownership will follow as a necessary corollary. We have given the name of socialism to that particular phase of economic evolution, and to say that it has been proven impracticable or a failure is just about as logical as to say that the acorn is a failure because the parent oak has grown so rotten. Socialism, like Christianity, has never yet been tried.

Autolyus is much worried because we cannot all think alike. I consider that it is a very good thing, as some of us would dislike to be held responsible for the mental mush which Autolyus hands out as Socialism. He may know all about music or lead coffins, but evidently knows absolutely nothing of scientific Socialism or he would not rave about Utopias of the Bellamy or any other brand, "casting the opinions and aspirations of mankind in one mould," etc. etc. ad nauseam.

All that we claim for Socialism is that it is the natural outgrowth of capitalism, that while far from perfection, it will be a good deal better than what we have, and when we take a look around at the world today it would be hard to conceive how it could possibly be any worse.

Autolyus finds that the chief obstacle in the way of any better form of society is something which he defines as "human nature." This is an old gag and has been used to oppose progress for thousands of years. It might still be of value to the apostles of reaction if science had not shown us that man has been adapting himself to his environment all that time and that there is nothing so pliable as "human nature." We have been told so long that we are all miserable

sinners and there is no health in us that some of us believe it. For the sake of argument let us grant for the moment that we are all selfish, temperamental, resentful to any form of "beneficent central control."

This innate depravity forced us to take over our water system from private ownership and control and make it a public utility. It isn't perfect yet, but who wants to go back to private ownership? The natural cusdomness of fruit brokers caused us to organize our fruit industry as a co-operative concern, and the high cost of living is forcing us as consumers to organize co-operative stores all over the country. (I believe you said this was an expression of class selfishness, Autolyus). Our inherent selfishness is causing the common people, the farmers, laborites and returned men, to unite politically to wring the control of our country from the hands of the plutocratic oligarchy which is exploiting it at present. In short, we are so afraid of the other fellow's "human nature" that we intend to place the natural resources and utilities of this country beyond the reach of private greed by making them a public benefit.

The efficiency will materialize as our "human nature" reacts to a co-operative instead of a competitive environment and man develops his social instead of predatory instincts. We are not naturally selfish, but are made so by the uncertainty of existence under an anarchistic competitive system which has outgrown its usefulness and daily becomes more intolerable. All that we know of the Divine nature is through our knowledge of "human nature," and as the latter is a spark from the former there are no heights of heroic self-sacrifice, of unselfishness, of love eternal to which man may not rise.

We are told that in actual practice government control "looks like a ghastly failure." Private control was such a failure that when the war broke out the governments were compelled to take over most of the utilities, and government control won the war, Autolyus. State operation of utilities will be a success when it falls into the hands of those who believe in it.

There is no conscription of labor in Russia except in the sense that if you want to eat you must work, and most of us have been living under that iron law for some time. In this country we give the parasites more than they can use, while thousands have less than enough.

My Socialist comrades will be glad to know for the first time that "they have arrogated to themselves the position of shining lights in a world of hopeless darkness." We thought that all the arrogating had been done by the politicians and social uplifters of the Autolyus brand who were going to give us "a new world after

the war." Now we are finding out that the politicians, as usual, didn't really mean what they said, and as even our erudite Autolyus has been wandering around in a fog querulously querying as to whether the world is drifting, it would ill become us to hide our lighthouse under a bushel. Old man Economic Determinism assisted by his able lieutenant, Mr. H.C.L., will attend to the rest.

Yours truly,
JACK LOGIE.
West Summerland, May 25, 1920.

To the Editor, The Review.
I have recently noticed frequent bouquets regarding the high standard of journalism embodied in your paper. It certainly is the best newspaper in the valley because it has to be—serving as it does such a superior aggregation of people as reside in Summerland, Peachland and Naramata (ahem), especially Naramata.

I often wish you might combine your Winding Trail and correspondence columns into one department, to be called the Open Forum, The Arena or some such caption. The guide of the Winding Trail might continue to bring into this arena all the wild animals at large on his trail for your subscribers to have a whack at whenever so inclined. A very recent contribution of the guide should prove excellent bait for the opening expedition.

Doyle's article referred to does seem a great waste of printer's ink and Doyle's own precious time. Ancient lore popularly read for many generations contain accounts of the rolling away of stones from sepulchres, the materializing to one's closest friends on the highway a few days after an agonizing death and many other psychic phenomena. These traditions have never seemed to help people to wake up and look up sufficiently to glimpse the Big Truth behind them, probably because of the great length of time since it all happened. The findings of Stead, Lodge, Doyle and many other worthwhile great men in the past ten years are quite a different matter and challenge the attention of every person who is both honest and intelligent. These are happenings of today and the facts may be checked up by living people.

Any attempt to belittle the untiring, self-sacrificing labors of these justly great men is as futile as a dog's barking at the moon—strenuous for the dog, but doesn't hurt the moon any or retard its mission.

Time was when this great truth was accepted by me in the same way as astronomy, geology, circulation of the blood and other such knowledge, because certain scholars had given their lives to demonstrate the truths. Within the past four years, however, one of my own has crossed

the divide, and what was once a passive acceptance of an academic sort of satisfaction regarding the findings of other people is now a personal tangible knowing.

In my own experience I have found that mediums, professional or otherwise, were not absolutely necessary, neither were darkness or mysterious "conditions." Real love is the bridge. The trouble is many people go through life lacking the capacity for perfect love just as many people go through life without truly breathing until the elevator is out of commission and they have to climb to the fifth floor on their own clod-hoppers.

I am not very psychic or spiritual and not at all spirituelle, because I love this old earth and everything on it, save cooking utensils, peach-borers and snakes. I'm really as ordinary as a patch of wild strawberries (and often quite as acid), yet in the privacy of my own home, with the mid-day sun streaming in the windows, I have access to my own "the other side," and death has brought us more closely together instead of separating us. I see no necessity for mystery or isms—just love.

As an afterthought, I suggest that should you ever see fit to offer your readers a forum, you should insist on non de plumes and no more than three contributions from the same person in a twelve-month. In this way you would avoid being deluged with the effusions of would-be Elinor Glynns and John Galworthys and the ever-present neighborhood feuds and pet grievances.

Should you graciously give this space, I hope others of your contributors may express themselves regarding psychic subjects.

Sincerely yours,
MADGE LOVELL.
Naramata, B.C., 1920.

(Ed. Note.—Subject to the conditions mentioned on our editorial page, these columns are always open for contributions on matters of general interest.)

The Summerland Review

Established August, 1908

Published at Summerland, B.C., every Friday by THE REVIEW PUBLISHING COMPANY, LIMITED
Ralph E. White, Editor and Manager

An independent family newspaper covering Peachland, Summerland and Naramata and adjacent districts.

Subscription Rates—In British Empire, in advance, \$2.00 per year; six months, \$1.25. To U.S.A. and other countries, \$2.50 per year.

Advertising Rate Cards and information respecting territory and samples of paper mailed upon request, or may be seen at the office of any advertising agency recognized by the Canadian Press Association.

Advertisers must have copy in by Wednesday noon in order to insure changes for standing advertisements. New display advertising copy can be accepted one day later.

Correspondence—Letters addressed to the Editor and intended for publication must be short and legibly written on one side of the paper only. The longer an article, the shorter its chance of insertion. All communications must bear the name of the writer, not necessarily for publication. The publication or rejection of articles is a matter entirely in the discretion of the Editor. No responsibility is assumed by the paper for the opinions expressed by correspondents.

MAY 28, 1920

THE IRRIGATION RATES

An important question to every ratepayer in Summerland was opened by the two addresses given this week before the Board of Trade. Even though the season is a busy one, it is hard to understand why many more ratepayers were not present. Reference was made more than once to the growing mill rate of municipal taxes in Summerland. The cost of municipal government and of carrying on general municipal affairs is not as high here as it might appear from the tax rate. A considerable portion of the money raised through taxes is expended on our water system.

Without going into details with respect to the history of our water system, the contracts under which the former holding companies delivered water to land owners, the acquiring of the systems by the municipality and the greatly increased demands upon the distributing systems, let us state right here that the water users of Summerland are getting their water at a very low cost as compared with districts in many other parts of B.C. and the north-western States. But this cost is greater than the five dollar per acre rate being charged this year for the first time. Something more is being paid through taxes.

There may have been much in the past to justify the policy of obtaining money through the mill rates to be applied to our irrigation system, but to continue seems no longer a wise practice. If it had not been that the system was owned by the municipality, tax money could not have been used on our irrigation system. There is only one other municipality in the province which owns its irrigation system. Most of the systems in the province are owned by private companies, many of whom have found that the rates stipulated in their contracts with land owners were wholly inadequate. Some districts have organized water communities under new government regulations. In such cases the water systems are perforce self-sustaining. Capital may have been advanced by the government, but must be repaid with interest within a certain period. Maintenance and operating are made an annual charge on the land.

It may yet be found advisable to separate the irrigation system of Summerland from the municipality, and to maintain and operate it quite apart. In such an event the system would have to be self-sustaining. Why not put it on its own feet now? The irrigation rates would need to be increased, but while we would pay more in water rates we would pay less in taxes, or have more tax money for municipal purposes. We must pay for maintaining and operating our system. To treat it as a unit quite distinct from roads, schools and municipal government would be a simpler and more logical course. The adoption of such a policy would at least postpone the now pressing need for some change in municipal taxation, as was emphasized by the discussion at the Board of Trade meeting on Tuesday.

Objection might be made to this on the ground that business property would in this way escape contribution to the irrigation system. This is not of such importance as it might seem, and business property can be made to pay, through taxes, its full share toward the carrying on of the affairs of the community.

THE VALUE OF WATER

What is water worth to an irrigationist, especially to the owner of an orchard of full bearing age? Would the fruit growers of this district pay from \$50 to \$300 per year to augment their present supply of water? There are fruit growers not many miles from here who are bidding high for extra water and the situation of fruit growers in many places with respect to water supply emphasizes the really enviable position in which the fruit growers of Summerland are placed. And the same can now be said of orchardists of Peachland and Naramata.

While visiting with relatives and friends in the American section of this Valley during the holiday, the editor made some inquiries with respect to the water service at Omak and Okanogan, where there are now some thousands of acres of producing orchards. Whether nature has failed them of recent years or the area planted to trees has always been out of proportion to the water supply we do not know. Two or three years ago the federal government, which installed the system, compelled owners of orchards planted in poorer soils to abandon their properties, so that more water might be available to the better lands. The gravity system was augmented at government expense by a pumping plant. Still there is not water enough. This is springing them with very little snow in the mountains and existing reservoirs not filled. The result is a lively trading in water rights, something which has been discouraged up to the present time by the government. Many fruit growers are digging wells and finding water which will be pumped on to the land. Others on the lower lands will pump from the river and sell their water rights to owners on higher levels. Some farmers without trees will sell for the season their entire water supply. One owner of such a ranch has sold to a group of fruit growers his year's water right for \$7,000. Another man told us of paying nearly \$60 for an additional two and a half acre feet.

Congress this spring appropriated over \$600,000 for the

installation of a large pumping plant. The cost of this will be added to other water charges paid by land owners. It will be seen that a man who owns an orchard in that district must pay whatever charges are put upon him, and he does not know what these will be. In addition many are now paying what would seem to us fabulous prices to be sure of an adequate supply of water.

All this digging of wells, pumping and buying up of water rights will be dispensed with when the huge project of carrying water through a fourteen mile tunnel from the Methow to the Okanogan is completed.

Now, all this does not mean heavy losses to fruit growers or disastrous conditions. That part of the country was never so prosperous, and everyone is looking to the future with optimism. The people of that part of the Valley are beginning to learn just what water is worth, and are gladly paying the price. Even from parts of the British Columbian end of this fair Valley come reports of as high as \$15 per acre being willingly paid for water. Truly, the three adjoining districts of Peachland, Summerland and Naramata are fortunately situated.

MOTHERS' PENSIONS

During the last week of the recent session of the provincial legislature, the Mothers' Pension Bill, introduced by Hon. Dr. Maclean, provincial secretary, was put through the house, with the unanimous support of the members. "Mother," for the purposes of the act, is defined, in effect, as a widow, either by the death, desertion, incarceration, or incapacity of her husband, who has one or more children under the age of sixteen years to support, and without the necessary means for such support, to which is added "any other person whose case is a proper one for assistance under the provisions of this act." British citizenship and residence for at least eighteen months within the province are also necessary qualifications for applicants for assistance under the act. The assistance to be granted is limited to a monthly allowance of \$42.50 to a mother with one child, with an additional allowance of \$7.50 for each additional child. There are said to be at present in the province known cases of 235 widows and 652 dependent children who will be entitled to assistance under the act.

THE PROVINCIAL ACCOUNTS

British Columbia has been receiving the congratulations of experts and much favorable press comment on the manner in which the public accounts of the province were presented to the house, and the Toronto Globe says the government of B.C. has set a good example to other governments by the full, clear and complete manner in which its public accounts have been presented. The Financial Post says this is "the first annual statement of public accounts of any Canadian government, federal or provincial, to be issued with revenue and expenditures of each department segregated under one heading and with corresponding tables, showing actual and estimated revenue and expenditure in each item side by side. . . . This business-like form of presenting public accounts is the culmination of a series of important improvements in government auditing." On the same subject the following is gleaned from Canadian Finance:

"The public accounts of British Columbia recently tabled in the legislature are further striking proof of the many improvements in governmental accounting which have resulted in placing expert accountants in charge of such matters. The accounts referred to enable any interested person to ascertain immediately, not only the cost of operating, and the revenue derived from each department of the government, but also from each division or department in that branch. The public accounts now give reliable information readily obtainable and easily understood regarding the value received for the monies expended. Although Manitoba had a start of two years in its efforts to improve governmental accounts, it must be admitted that British Columbia already has taken the lead in this very important work. British Columbia's public accounts are particularly lucid and understandable."

That the imports into Canada of raw sugar is increasing rapidly is shown by recent official returns of Canadian imports. For the eleven months ending last February we imported 929,836,660 pounds of raw sugar, as compared with 690,112,191 pounds in 1918 and 616,085,179 pounds in 1919. During the eleven months ending last February, Canada's exports of confectionery and sugar products reached a value of over \$30,000,000, as compared with but little more than two and one-half million for the previous year. Notwithstanding the sugar shortage and higher prices, there has been a greater consumption of sugar within the Dominion.

Returned men who have been wearing old army uniforms as a means of combatting the high cost of clothing, will have to take them off, according to an order issued by the general officer commanding the military district centering at Winnipeg, says a recent dispatch from that city, which adds that similar orders will be issued all over the west. According to the order, now that demobilization is complete, anyone who appears in parade or at any function other than that of a military nature in military uniform, is liable to prosecution, unless special permission has been granted by the general officer commanding.

A TALK WITH YOU

To the Citizens Who Have the Welfare of the District and of the Younger Generation at Heart

The baseball boys are using their every endeavor to do several things, some of which are: Put Summerland on the sporting map again, by example to help the younger boys learn sport and the value of sport.

All the members of the club are giving their best efforts, time and financial aid to start the remedy for some of the before-mentioned deficiencies and many other ones not mentioned.

This is the start only, and it rests with the citizens themselves whether this start is to continue and broaden, and can only be shown by support—by your personal interest and presence and the presence of your children both at games and practices. Practices are held at West Summerland at 6.45 every Monday and Thursday. Also by your help in a financial way. Any donations may be sent to H. P. Scott, the treasurer of the club, care of Dominion Bank. To date the boys have financed all the expenses.

Are you with us in this cause? THE CLUB PRESS AGENT.

Boy Scout Column

1st SUMMERLAND TROOP B. P. SCOUTS

Scoutmaster O. F. Zimmerman
Headquarters Parish Hall
Meets every Friday evening at 7.30 p.m.

Considering sickness and the proximity of examinations, there was an exceptionally good turn-out at last Friday's meeting. A good evening's work in semaphore was done, the boys being divided into two groups, beginners and the more advanced. Next week the recruits will have the elements of first aid explained to them, and all ready to take the tenderfoot tests will be given an opportunity to do so.

Two of our A.S.M.'s, one leader and one second, after a busy winter with the scouts are now hard at work preparing for the approaching university exams, and the troop wishes them every success.

We are glad to note the great impetus that has been given to the movement in Vancouver with the return of District Commissioner Major Rorrison from overseas. At the recent annual patrol leaders meeting, held in the club rooms of St. Paul's troop, several important matters were threshed out, among which was the question of "Why not a Dominion publicity campaign for the scout movement?"

It was decided that it would be better to start with a city campaign, and so the slogan for 1920 is "1,000 members in Vancouver by fall." This means exactly doubling the present

enrollment, but the council is confident of doing so.

In Summerland since the re-organization of troop the plan of campaigning for recruits was strictly abandoned, and every recruit has come forward of his own free will. This method has proved to be the greatest success, as in spite of sickness, etc., during the winter, the list of new members is the greatest on record, and especial interest is being shown by them in the work.

While the troop knows that the entire community endorses the scout movement, how many, with the exception of one or two, have come forward with offers of assistance of any kind to our hard-working S.M., and how many parents have ever taken the trouble to drop in and see the scouts at work or to show their interest in any way? Such visits would make the boys keener and would help the S.M.'s and give them to understand that the Summerland people really are behind them.

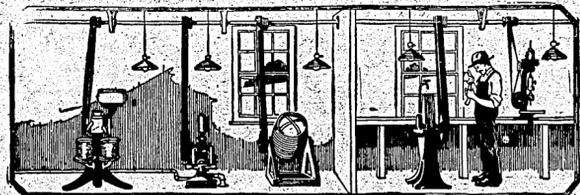

There has been a welcome addition made to the list of officers in the person of Mr. P. C. Tees, who has been doing good work among the scouts as physical instructor.

Next week a court of honor of leaders and seconds will be held to discuss prospects of camp and means of financing same. Owing to unsettled conditions it will be impossible to stage the annual concert, and consequently funds are low. Any donations to such a fund would certainly be appreciated.

A full turn-out is expected next Friday, College Gymnasium, at 7.30 sharp.

—A. S. M.

Some men go broke, and others haven't enough to go broke on.

When you see the "F" Power and Light Plant

at work you will agree it is the handiest and most practical plant made.

It was designed first of all for producing electric light anywhere and everywhere—cheaply and well, and it does that job to perfection. It floods your home, shop, or other buildings with clean, brilliant light for a few cents a day, and still has power to spare.

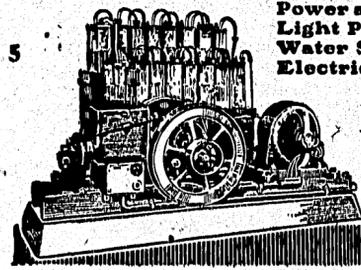

When you examine its sturdy construction, and mechanical simplicity, and note its flexibility and ease of operation, you will wonder how it can be sold at the price.

We have no hesitation in telling you the demand for the "F" Plant all over the country is so great, that now is the time to install your plant if you want the advantages of Power and Light at low cost.

Come in any day and see the "F" Plant in operation, or send me a post card asking for a catalogue.

B. L. HATFIELD

Agent for Fairbanks-Morse Power and Light Plants, Water Systems and Electrical Equipment.

WEDDING

WHITE-ENGLISH

On Saturday morning, at the home of the officiating clergyman, Miss Edna English, daughter of Mr. and Mrs. R. H. English, of Summerland, and Mr. William White, of Moncton, N.B., were united in marriage. The ceremony was performed by Rev. J. Ferguson Millar, of Penticton; with but a few immediate relatives of the bride present. Immediately following the ceremony the bride and groom boarded the westbound train for Vancouver. After a few days at the coast they will go east by the Canadian National Railway to Moncton, where they will reside.

The bride has a large circle of friends among the young people of Summerland who wish her every happiness.

CARD OF THANKS

Mrs. Block desires to express her thanks for all kindness and sympathy received in her recent sorrow, for the beautiful flowers sent by friends, and especially to the matron and nurses of the hospital for their kindly care during the illness of her husband.

T. P. Thornber has returned from a visit to Vancouver.

Prof. McIntosh, of the staff of Brandon college, is here on a visit to his brother, D. H. McIntosh.

Mr. C. P. Nelson has taken charge of the office of the Summerland Garage and will give his full time to this work.

H. C. Mellor and T. G. Beavis have returned from Vancouver, where they attended the annual Methodist conference.

W. M. Wright has sold his house and orchard to A. McGregor, of Saskatoon. Mr. McGregor's wife and child will join him here shortly.

Mr. Fenton, who has been clerking at the Hotel Summerland, is leaving this week to take a vocational course in automobile radiator, fender and lamp repairing.

Mrs. Holder went down to Vancouver a few days ago with her son, Ted, who had been visiting here. He is a resident of Montreal and will return east from the coast city.

Mrs. Mellor and her mother, Mrs. White, went up the lake Wednesday. Mrs. White continuing to Steamous, where she joined her sister, Mrs. Lipsett, and journeyed with her from there as far as Manitoba.

While cranking his Ford car on Monday, W. Carter had the extremely unpleasant experience of seeing it leave him and go tumbling down a steep hillside for a distance of perhaps more than two hundred feet. Mr. Carter had climbed the first long grade from the poultry section of the Experimental Station to the sharp turn at the top of the hill. It was while making this turn that the engine stalled. Though badly broken up, the car was brought into town under its own power and is now being repaired by its new owner, Wm. Bray, Jr.

Fatal Accident Near Princeton

An automobile accident with fatal results occurred on the Granite creek road about four miles west of Princeton recently when a car in which Robert Miller and W. C. Hilton were riding went over an embankment. Miller was killed outright and Hilton was knocked unconscious for a time but came to himself again and managed to attract the attention of Lawrence Lavalley, who was returning from Merritt in a car and was passing the scene of the accident about midnight. Lavalley brought the injured man into town, where Dr. Lee Smith gave him medical attention. Two ribs were found to be broken and there were other injuries and scratches. Hilton is not clear on just how the accident happened. The car was found about 60 feet below the road and pretty badly smashed.

The chest of Miller's body was crushed and some of the ribs had penetrated the lungs.

Miller was about 30 years of age, and came from County Derry, Ireland, where his parents still reside. He was a returned soldier, having been overseas with the 54th battalion. He ran a shoe shop in Penticton, but sold out recently. Hilton is section foreman at Juliet, on the Kettle Valley railway, and had recently bought the car that was in the accident.—Princeton Star.

SUMMERLAND WEATHER REPORT

Below is a report furnished by the Dominion Experimental Station here for the week ending Tuesday:

Table with columns: Date, 1920, Max., Min., Rain, Sun. Above. Rows for May 10, 20, 21, 22, 23, 24, 25.

Through the efforts of the Oroville Commercial Club, that town is to have a cannery. The site for the new cannery is along the railway track just west of the Standard Oil plant. Mr. F. W. Fraser, the manager, an ex-Canadian soldier and well known in this part of the Okanagan, states that the cannery will be ready and doing business by August 1st, say the Oroville Gazette.

Mrs. F. J. Nixon is on a visit to Vancouver.

Miss Bertha Johnston went out early this week to visit friends in Manitoba.

Rev. H. A. Solly has been down to the coast for the past two weeks. He is expected home tomorrow morning.

Mr. and Mrs. J. H. Ritchie have moved from Beach Ave. to the T. N. Ritchie cottage, which they have bought.

Mrs. Estabrook, of Peach Orchard, went out to Vancouver Tuesday morning, where she was met by her son from California, with whom she will visit for a time.

Mr. Dewey Sanborn, of Vancouver, arrived here Friday to visit for a few days his parents, Mr. and Mrs. E. F. Sanborn, returning Tuesday noon. He was highly delighted with the country.

Mrs. G. W. McLaren and her brother, Mr. George B. Conner, left by the K.V.R. on Monday last to attend the wedding of their niece, Miss Lillian E. Cruikshank, to Dr. H. C. Cruikshank, of Toronto. The ceremony takes place at the home of the bride's parents, Maple Grove, Matsqui, B.C.

Miss MacAloney, at one time on the office staff of The Review, was a visitor to Summerland this week. Miss MacAloney holds a responsible position with the Smelter Co. at Trail, and was on her way back to that city from Vancouver where she had been for throat treatment.

An evidence of the growth in population of Summerland is contained in the fact that the Summerland Telephone Co. has installed fifty-seven new phones since the beginning of the year, and has in addition a waiting list of twenty whose phones will be put in as soon as another shipment of instruments is received.

FROST DANGER PAST

Victoria.—The barometer is falling over western B.C. and showery, moderately warm weather will follow in the Okanagan. Danger of killing frosts for tomatoes and fruit is considered over.

THE WOMEN'S INSTITUTES.

Summerland Women's Institute met in regular monthly session last Friday afternoon in the Oddfellows' Hall, with a good attendance. Roll call responded to by "My birth place" proved very interesting.

A communication was read advising of the possibility of Mrs. MacLachlan, secretary of Women's Institutes, coming to Summerland, June 11th, to give a course of lectures.

The following resolution was received from the Cowichan Women's Institute and endorsed by the Summerland Women's Institute:

"Whereas the present municipal law of British Columbia does not permit husband and wife to vote and hold office in the municipality on the one assessment, thereby depriving the community of the services of intelligent people, particularly of the women, and;

"Whereas the provinces of Manitoba, Alberta and Ontario have amended their municipal law to remove this disability, we appeal to you as our representative in the legislative assembly of British Columbia, to work to secure the amendment to the municipal law of B.C., that will recognize the principle of partnership in the family, and will give to husband and wife the right to vote and hold office in municipal affairs, on the one assessment."

Mr. Kolloy gave a most interesting and instructive talk on B.C. laws concerning women. He made special reference to the Dower Act in Alberta compared with the B.C. act, and also mentioned that B.C. is far behind the other provinces in its laws respecting women. The subjects taken up were so interesting that they brought forth many questions from the ladies present, which were fully explained by Mr. Kolloy.

Mrs. E. N. Rowley favored the company by rendering a solo in her usual pleasing manner. Tea was then served and a social time was spent.—Contributed.

Miss May Bateman came in from Vancouver a few days ago to visit at the home of her uncle, Mr. Thos. Dale.

Russell Roe has left the position which he held in Penticton, and has joined his father, P. S. Roe, in his business here.

Miss Edwards, who has just graduated from Wesley College, is visiting her sister here, Mrs. E. Hunt, on her way to her home in Victoria.

Mr. and Mrs. E. Hunt, who were deprived of their home by fire last week, are living in the cottage on what was formerly the Shaughnessy ranch.

A Summerland boy, now away from home, in sending a six months renewal to The Review says if it were not for the paper from good old Summerland his mail would be rather slim. "The little old Review listens pretty good when it blows in here."

F. R. Shikora, in his advertisement in this issue, is offering a farm engine which will be of interest to anyone requiring motive power. His suggestion that metal fluming be substituted on the fruit ranch for lumber flumes will also be worthy of consideration.

The lot on the east side of Giant's Head adjacent to S. M. Young's property and owned by A. J. F. Anderson, has been bought by Wm. H. J. Welsh, through F. D. Cooper. Mr. Welsh has been living in Peach Orchard since coming to Summerland some weeks ago.

OBITUARY.

LEWIS J. BLOCK

The news of the death of Mr. Lewis J. Block, which occurred on Saturday morning last, came as a shock to his many friends and acquaintances. A week before he had been about as usual, but a cold aggravated a malady which he had contracted while in the army and he was ill scarcely a week when the end came. Mr. Block and his relatives were fully aware of the fact that a severe cold or other illness might at any time cause his death.

The funeral service was held in the Naramata Church, the service being conducted by Rev. J. A. Clelland. The church was crowded with friends from Naramata and Summerland, many from here going over by ferry. The ballbearers were: his brother-in-law, B. L. Hatfield; and nephew, Lee Hatfield; A. B. Elliott and Lee McLaughlin.

Mr. Block was the son of Mr. J. W. A. Block, of Naramata, and previous to entering the army he was a successful fruit grower at Naramata.

Since his return, Mr. Block was associated with his brother-in-law, B. L. Hatfield, in his garage business. He was an expert machinist and while in the service held an important position in that capacity. Before coming to the Valley about ten years ago he conducted a machinist business in Regina.

Mrs. Block and little daughter have the sympathy of a wide circle of friends in the Okanagan.

Peachland Doings

A Weekly Chronicle Furnished By Our Local Representative.

After a short holiday down at Lamont, Alta, his former home, Mr. Allan Wilson returned on Wednesday, the 19th.

Mr. Thos. Powell was a passenger north on Thursday morning of last week.

Mrs. Graham and children returned on Thursday of last week, after spending a couple of days at their home in Okanagan Centre.

Rev. C. D. Clarke and Mr. A. D. Ferguson returned Thursday of last week from attending the Methodist church conference at Vancouver. They returned via K.V.R. to Summerland, Mr. R. A. F. Moore meeting them there with his auto. The conference drafted Mr. Clarke for the Peachland Church again.

The checker players visited Kelowna on Thursday, but were not successful enough to carry away the honors. However, it would hardly do for them to win all the time or it might spoil the keen interest in the play. The following is the result of the match, Kelowna players being mentioned first: Leckie 3, Brinson 1; Hill 1, Buchanan 1, 2 draws; Harvey 4, Dryden 0; Aberdeen 4, Marsch 0; Marshall 1, Moore 1, 2 draws; Kerr 0, Miller 1, 2 draws (only three games played); Duggan 2, McDougald 1, 1 draw.

Mrs. Betsen and son were passengers south on Thursday evening's boat.

On Friday morning last Mr. John Brinson left for Calgary, expecting to be away about a week.

Major K. C. Tallyour and his visiting friends, Mr. and Mrs. Pritchard, were passengers north on Friday morning last, returning on Saturday evening.

Mrs. B. Dennis with her children and Mrs. Wm. Hewlett, of Westbank, who has been visiting Mrs. Dennis here, left on Saturday morning for Westbank, to remain over for the Monday sports.

A few friends gathered at the home of Mr. and Mrs. Murdin on Saturday evening as a little farewell party for Mr. and Mrs. Keyes, who were about to leave for Calgary for a time. During the evening games and social intercourse were indulged in and refreshments were served.

Mr. J. A. Edgecombe was a passenger south on Saturday night, spending the week-end down the lake. He returned Monday morning.

Visitors in town on Sunday last by auto via the Lakeshore drive were the McAlpine family, from Summerland, who were guests of the Murdin household, and R. J. McDougall and family of Penticton, guests of Mrs. Dorland and Mrs. H. McDougall. Mr. McDougall remained over and took a load of his friends up to the sports in Westbank on Monday.

Mr. and Mrs. J. McKinnon are enjoying a visit from a brother-in-law from Ontario, who is spending a short time here and at Westbank.

Mr. W. R. Bartlett, of Naramata, was in town on Monday. When a public holiday gives him the chance we usually see him up to look after his Peachland interests.

Quite a representation from Peach-

land went up to enjoy the sports at Westbank on Monday. This was somewhat of a new departure for our neighboring town, and according to the reports of those who went up from here, Westbank is to be congratulated on the results of the day. All enjoyed a fine time, and the young people who stayed or went up specially for the dance said that it was an exceptionally good one. The baseball game between Summerland and Peachland was very interesting and ended 9-8 in favor of Summerland.

Mr. and Mrs. F. A. Maxwell accompanied Mrs. Maxwell's parents to Summerland on Monday evening's boat, where Mrs. Maxwell's father was obliged to go for a slight operation which was made necessary by an attack of pleurisy. He was operated on in the hospital there, and was doing nicely when Mrs. Maxwell left on Wednesday morning.

Mr. Winger returned home on Tuesday on account of the slight illness of Mrs. Winger.

Having gone up to Westbank by boat from Naramata on Monday, Cecil Brown returned from that point to Peachland, expecting to remain for a time.

Mr. D. Lloyd-Jones and Mr. A. Day and men came down from Kelowna on Tuesday with the Kelowna saw mill boat for a boom of logs from W. D. Miller's camp at Deep-Creek.

The directors of the Women's Institute met at the home of the president, Mrs. Wm. Dryden, on Friday. Reeve Hogg was present at the meeting and was presented with the key

to the drinking fountain, along with the following address. "The members of the Peachland Women's Institute have great pleasure in presenting the sanitary drinking fountain, which has been lately erected in our flourishing town for the benefit of its citizens, to the council, and now give to the reeve the key for the regulation of the fountain, in the belief that its interests will be safe in the hands of those who so ably administer our civic affairs. We trust that the pure water gushing out of this fountain will be typical of the lives of all those who will quench their thirst by partaking of its cooling waters." Mr. Hogg accepted the key and replied to the address in most suitable terms.

Mr. Brinson, Sr., has recently purchased the old Ritchie property on "the bump." Mr. Brinson expects to put a building up on the foundation which was built there some time ago.

Mr. Burket Robinson is suffering from a rather bad cut on the hand which he received in an accident at the saw mill.

Mr. and Mrs. Geo. Keyes left on Monday afternoon for Calgary by auto. They took a camp outfit along with them, so that they could camp out at any time or place they wished. They intended going as far as Penticton and visiting friends there till Tuesday noon, then resume their journey. They figured the trip would take them about seven days in easy stages. They will be away possibly some months, visiting various places and friends on the prairie.

An old bachelor is a man that no widow has wanted to marry.

LET US BE GLAD WE ARE CANADIANS

We are asked for increased production. This does not mean for the individual more work or harder work, but it does mean more efficient work and a new attitude towards work, a desire to make every stroke tell to the utmost. In a word it means willing, painstaking and well-directed effort, backed by capital and guided by science, to bring our acres to the fullest fertility; to build up and utilize adequately our forest resources, our fisheries and our mines, to develop and co-ordinate our transportation systems, to develop our water-powers advantageously and to distribute widely the resulting power, to check reckless waste and encourage the effective use of all our resources, to the end that we may establish better and more satisfying types of rural life.

The waste of lumber is deplorable. Take pine, the value of resin, turpentine, thyl alcohol, pine tar, charcoal, lost in this waste, represents three or four times the value of the lumber produced, but, great as is this loss, it is modest compared with our colossal fire waste. We have been prodigal wasters, reckless destroyers, mere skimmers of cream. If we are to meet our national needs, and build up sanely our superstructure on safe and sound foundations, we must change the policy which has guided us in the past. Unrestricted individualism must now give way to controlled co-operation guided by a constructive economic policy which shall be nation-wide in scope. We must bring to the solution of peace problems the unity and cohesive power developed throughout the war. Let us be a nation of builders, creators, and distributors. Let us be proud of our country. It is time to build, time to unite, time to trade and for brotherhood. Let us be glad we are Canadians and let us stand for Canadian institutions. Let us have a little more devotion, less bowing down to the past and a more looking forward to the future when Canada will be ripe for a great burst of light and life.—Extract from speech by S. F. Glass, M.P., in House of Commons, March 24, 1920.

A widow always tries to console herself with the belief that she can't do any worse next time.

Would Re-Open the Upper Road

Motorist Suggests Bench Road For One-Way Traffic

That the towns on the west side of the lake will strongly oppose the expenditure of a quarter million dollars or more to build a road on the east side of the lake is apparent from the discussion, formal and informal, heard at the Board of Trade meeting Tuesday night.

The subject was introduced by K. S. Hogg, who said that Kelowna was pressing for the construction of a road south from that town. While it was true that such a road would shorten the distance a little between Kelowna and the south, it would not serve any new territory, and he thought it time for the west side towns to protest against spending any such sum of money.

The interest on such an investment, said J. W. Wheeler, would maintain a free ferry between Kelowna and Westbank.

W. C. Kelley thought that no government would build such a road.

Mr. Hogg proposed that Messrs. White, Kelley and Tait be appointed a committee to draft a resolution in opposition to such an expenditure, and pointing out the advantage of maintaining the existing road as a part of the Okanagan highway. Mr. Hogg's motion was carried unanimously. It was suggested that the committee's resolution, when adopted, should be forwarded to Westbank and Peachland for endorsement.

A letter from the Naramata Farmers' Institute was read requesting the board to support a resolution asking the Department of Public Works to force the Okanagan Lake Boat Co. to adhere to schedule with respect to charges on parcels and freight. The Institute believes that the company's charter requires it to carry parcels of twenty-five pounds or under free, and freight at ten cents per hundred. After some discussion, in which W. C. Kelley stated that the subject was a matter between the Naramata Institute and the department, a resolution was adopted instructing the secretary to reply according to the views of Mr. Kelley and others, stating further that the meeting was in sympathy with the demands of the Institute if the company was at fault.

The meeting was opened by Reeve Campbell, and after the reading of the minutes, Secretary S. A. MacDonald read some communications, including acknowledgement of membership fee in the affiliated boards of B.C., and a reply from the municipal council with respect to a railway spur on Shaughnessy Ave., in which it was stated the matter would have the attention of the council in due course.

Must Remain Part of Highway

West Side Towns Will Oppose Building New Road

It is of very pressing moment that the travelling public should realize the increasing danger of the Summerland-Peachland lakeshore road. There are on the road very sharp corners where one can get no warning of an approaching car, and where the road is too narrow for two cars to pass. Motorists who know the road have for long been aware that they run a great chance of a collision each time they travel the road. The traffic has been steadily increasing and indications are that during this summer the number of cars passing along the road will be greatly in excess of any previous year. The chances, therefore, of accident will increase correspondingly, so much so that one may fairly expect to hear of a fatality in the near future. Is it wise to wait for such an occurrence before taking steps to eliminate the danger? The matter should be taken in hand without delay.

The upper road could and should be immediately put in order for traffic, and motorists should be prohibited from using either road both ways. A sign could be conveniently placed at Deep Creek, near Peachland, directing travellers to proceed south by the upper road. The small cost of putting the upper road in commission would be quite worth while, as it would enable travellers to have an alternative road when, during a part of the winter months, the lower road is impassible.

A certain amount of work has been done at the Peachland end of the lower road during the past winter, but at the rate of progress that has been made it will be many years before the road can be made in any measure safe for unrestricted traffic. A FREQUENT USER.

NUTS BEHIND THE WHEEL

New Jersey has made the startling discovery that many persons who are mentally deficient are driving motor vehicles about the roads and thoroughfares of that state. "When it is considered that New Jersey's method of examining applicants for driver's licenses ranks in stringency with any in the United States," says George B. Duren, in Motor, "it can easily be imagined how many persons mentally unfit for the responsibility are today sitting behind the wheel of an instrument which has death dealing possibilities. For a motor vehicle in the hands of an incompetent is as dangerous a weapon as a machine gun." What is the condition in this respect in our own province?

Building Good Motor Roads

The State of Washington is making a great improvement in the highway south of the boundary. The condition of that much travelled road running north and south through the Okanagan on the American side of the line has been such as to cause disgust in the minds of the visiting motorists, and has been something of which the residents of Okanagan County have been ashamed. Beginning at the boundary and for many miles south of Oroville the highway has been or is being greatly improved. In places an entirely new route has been selected. The engineers have beautifully graded the road, giving it splendid width and cutting out all curves. When this

work is completed the better part of the Okanagan highway will be on the south side of the line instead of on the north, as has been the case until now, unless our government gets busy and builds a motor highway in the Okanagan.

In the rare cases where the carburetor catches fire because of a back fire, the conflagration may be extinguished by turning off the gasoline and then racing the engine. In this way the engine sucks the flaming liquid out of the carburetor and so the fire dies out of itself.

During the first four months of this year there have been 564 new industries established in British Columbia according to report. This creates a provincial record. Many of the new concerns are returned soldiers' organizations.

.. The Winding Trail ..

UNCONSCIOUS HUMORISTS "Man, man" exclaimed a Scotsman, who was standing up to his knees in water in a front line trench somewhere in France, "this war will be the death of me!" This complaint, quite seriously uttered, was probably as good an example of unconscious humor as could be imagined. It has many counterparts, however, some of which come from sources whence they might be least expected. The learned professor who recently tried communicating with Mars from an elevation of a few miles in the air, on the theory that he would thus be nearer to that planet, was certainly an unwitting humorist of the first water, and the honors might possibly be equally divided between him and President Wilson, who applied the term "helpless" to the British fleet while its ships were busily engaged in transporting American troops to France—an undertaking which, by the way, they accomplished without a mishap. I think, however, I would award the laurel wreath to Mayor Gale, of Vancouver, in recognition of his naive attitude in the matter of the daylight saving mania. Not merely on account of his cheerful readiness to flout the sun, but by reason of the curious position he absent-mindedly adopts as a magistrate appointed to administer municipal law. Standard time is prescribed by provincial legislation, and the solicitor to the Vancouver city council very properly advises that if that body alter municipal time it will become liable to legal proceedings. In the face of this fact, the chairman of the council proceeds to get around the law by "requesting" certain corporations, including the B.C. Electric Railway, to put their clocks ahead, "in conformity to the wish of the people," who, by the way, have never been consulted. This attitude on the part of the mayor of the city, duly elected and sworn to uphold law and order in the municipality, does not appear likely to inculcate in others that respect for existing statutes which most of us would wish to see. If the head of the city is so blissfully unconscious of their obligations, what might we not expect from Tom, Dick and Harry?

Taken "bye and large" the situation is extremely amusing—to those who are unaffected—and stamps the municipal head of Vancouver as a miracle of childlike and bland unconsciousness.

Referring to some recent observations on Canadian magazines, I am glad to see that Maclean's, one of the front rank journals of Canada, has begun a serial by a well-known writer, who has been hitherto chiefly known to us through the medium of an American publication colloquially dubbed the S.E.P. The delightful stories of Pelham Wodehouse never fail to attract, and it is a good sign of progress to find them published in one of our home magazines. The one now concerned is evidently on the right road to an increase of circulation, and has in its favor the fact that, for a time at least, its American competitors are largely out of the running in this country owing to a shortage of paper and a consequent shrinkage in output. Now is the moment for the home product to get a firmer footing and a raising of the standard of quality is the surest guarantee of that result.

One feature which strikes the reader of the Canadian publication favorably is the fact that its advertisement columns have a familiar look by reason of the home names of the advertisers. We need not be so narrow minded as to look coldly at goods made outside Canada and preach the "Buy in Canada" sermon too exclusively; nevertheless it is a good thing to see just what Canadian firms are producing, and there is a certain amount of satisfaction—not unmingled with surprise—in noting the variety of Canadian goods offered to those who read. We have so long been accustomed to take American advertisements as a matter of course that it is a wholesome change to note that home products are in the market more than some of us have quite realized. There seems also to be a hint to advertisers here that home columns are available to tell home buyers of home productions.
