## BRITAIN WANTS OUR APPLES SAYS TRADE COMMISSIONER

### Tells Shippers and Growers of Requirements of the Market and Methods of Making Sales

It was not a large audience that greeted Mr. J. Forsyth Smith, Canadian Trade Commissioner with headquarters at Liverpool, in St. Andrews Hall on Thursday evening, July 8, brief mention of which meeting was made in our issue of last week. The message that Mr. Smith brought was one full of interest and of special value and importance to our fruit shippers.

Mr. Smith was the first fruit markets commissioner on the prairie, representing B.C., and previous to going to Calgary was in newspaper work in the Okanagan, being for a time editor of the Vernon News. When the Department of Trade and Commerce wanted a man with special knowledge of the fruit business to represent Canada in Britain, Mr. Smith was selected. In the five years he has been stationed in the old country Mr. Smith has learned much of value on the marketing of apples as well as other products of Canadian soil and factories.

The meeting last week was called under the auspices of the B. C. Fruit Growers' Association. The chair was occupied by Mr. A. McLachlan, president of the Farmers' Institute, who in a few brief words introduced the speaker.

Mr. Smith commenced by extending his congratulations to the B. C. shippers on the progress made in placing their fruit on the British market last year. Previous to that time, shipments were small and had little effect on the market, especially in competition with the large quantities of Washington and other western American apples running to half a million boxes a year. In former years the quantity sent to Britain from B. C. ran between 25 and 85 cars, but last year it totalled about 310 cars, sold in the large centres such as London, Liverpool, Manchester and Glasgow. The quality of the pack was quite satisfactory and the condition of the fruit generally good, although there was some little evidence of frosting. Top prices were received, even for a very fair proportion of the No. 2's. What was more important than price, however, was the excellent impression made on the British trade. Glasgow, which had always been a good market for U. S. fruit, was absolutely enthusiastic over the prospects of business with B. C. Part of this was due to the fact that Glasgow had direct knowledge of the B. C. fruit industry, as representatives of the principal fruit houses in that city had visited the province and had formed connections. As Trade Commissioner, he had worked hard to persuade British fruit importers to go to Canada and learn of the possibilities at first-hand, and he was glad to say that several prominent importing firms would send representatives over this year, including the Scottish Wholesale Co-operative Society and the English Wholesale Co-operative Society. The former bought on quite a large scale, as much as 5,000 boxes at a time, while the English society had an annual turnover of green fruit amounting to \$5,000,000.

### Price Control

Last year the Ministry of Food was beginning to think that the country had had enough of this policy of protection of the consumer, especially with large crops in England and in Nova Scotia, and the speaker sought to obtain a free market for Canadian fruit, the trade backing him up in his efforts. The result was that the Ministry assured him that when ample supplies of fruit came forward, so that it was certain that the price would be reasonable, the market would be opened. However, a change of sentiment ensued, as the Consumers' Council, a very powerful body, had pressed hard to have the price control maintained and succeeded in their endeavors. The Food Ministry's argument was that all food products which had been removed from price control had risen largely in price, but these were articles that were scarce, while apples were plentiful last year. However, there was little prospect now that the Ministry would be illogical and reverse their policy in a year when apples were likely to be scarce. It therefore seemed certain that price control would be continued this year.

### European Markets

Mr. Smith summarized the results of his official visits to various European countries. He found that in Scandinavian boxed apples were imported and highly appreciated. The market was not a large one but might take from 50,000 to 100,000 boxes a year. The type of apple favored was a very highly colored red apple, such as the Winesap and the Newtown was not in favor in Norway on account of its lack of bright color. The size preferred was rather smaller than that called for by the prairie market, and would average from 125 to 225 per box. The usual arrangement for marketing was through agents at the principal points in Norway, Sweden and Denmark, who obtained sole representation for shipping firms on this side of the Atlantic and quoted a price in New York plus a small commission. Orders were obtained by these agents from the principal fruit importers. The agent's business was simply to look out for buyers, the financial details being carried out direct between exporter and importer.

### Few British Apples

The British fruit crop this year would not amount to more than 50 per cent. of that of last year, and some estimates were as low as 25 per cent. The shipment of American barrel apples will be strongly affected by the low rate of exchange. The domestic home market for American boxed apples was favorable for high prices, which made it unlikely that any large quantity of American boxed apples would reach the British market. However, there was the factor of price control to be considered, and it was difficult to forecast what would be the government policy in Great Britain in that regard. To make the position clear to the audience, he gave a short review of the situation in the Old Country under food control. Before the armistice it was not uncommon, he said, to find the best apples selling as high as 4s 6d per pound, hence the Ministry of Food was reluctant to remove price control, once it had been established, as a return to exorbitant prices was feared. He strove to make it clear to the Ministry that there was an essential difference between barrel apples and box apples and that there should be a separate control price for each, but the Ministry had had a disastrous experience with an Apple Order that had been issued and came to the conclusion that there must be only one flat price for apples based on the

barrel pack, and only sufficiently high to attract enough barrel apples to supply the market. Accordingly the maximum price was set at 6 1/4 d per pound as the figure to be charged by the importer. The next dealer to handle the fruit was allowed an advance of two shillings per box, the weight of which was established at 40 lbs. net, and the retailer was allowed to sell at 30s per box, or 9d per lb.

If this resolution is carried out, it means that shippers will suit their selling policy to conditions as they arise. They have four ways at least of counteracting this move: 1st, to store in B.C. and supply the market as needed, or store on the prairie at distributing centres for same purpose; 2nd, to adopt different financial arrangements for payment of fall purchases for winter use; 3rd, to seek wider markets for the available supply; 4th, unite to establish their own selling agencies and arrange with Pacific Coast Associated Shippers for continuous accounts. At present there is a strong movement in Washington, Oregon and Idaho to organize fruit growers in these States for the purpose of establishing their own selling agencies, California has made a success of this plan. British Columbia growers are fully organized and are well able to take care of their own business if circumstances warrant it. The B.C. producers can take the resolution lying down, and consign to the jobbers, which means passing back price control or the want of it to the jobbers, and the conditions obtaining previous to 1917 will soon return, human nature has not changed since that time.

Shipping facilities to Norway were afforded by a service between Montreal and Bergen once a month. There was no direct line between a Canadian port and Sweden and Denmark, but there were steamers from New York. Apple auctions were held in Denmark in free port territories, so that duty was payable only on apples taken into consumption in Denmark, and apples bought for the Swedish trade would not be charged Danish duty. Holland was itself a large apple exporting country and was therefore a customer only for top quality apples of red varieties, although some Newtown would be taken. The sales favored in Holland were somewhat larger than in Scandinavia, running

(Continued on Page 2)

## Trying to Force Fruit Consigning

### This, Says Markets Commissioner, is Aim of Fruit Jobbers

"The prairie market is the natural outlet for B.C. fruit and vegetables. We have gradually eliminated competition in these lines in our season by supplying first-class goods at prices that have fully met outside competition. We intend to maintain our present position on the prairie market, but it looks as though we might have to fight for it." Thus writes Prairie Market Commissioner Grant in his weekly bulletin.

Continuing, Mr. Grant says: "The newly-formed Western Jobbers' Association, by resolution in Vancouver agreed not to buy our apples in advance, thereby challenging the past selling policy. Some of them (and not the least), are advertising all over B.C. in an effort to induce consignment to them of all they require. They have already had more gooseberries consigned than the market is demanding and prices are lowered on prairies below the set price in B.C. It costs the consignee nothing to reduce the price and we sincerely hope that gooseberries will be the only product consigned. We do not think that this resolution will be adhered to by the jobbers, as conditions may vary their winter resolution within 24 hours in shipping season.

"If this resolution is carried out, it means that shippers will suit their selling policy to conditions as they arise. They have four ways at least of counteracting this move: 1st, to store in B.C. and supply the market as needed, or store on the prairie at distributing centres for same purpose; 2nd, to adopt different financial arrangements for payment of fall purchases for winter use; 3rd, to seek wider markets for the available supply; 4th, unite to establish their own selling agencies and arrange with Pacific Coast Associated Shippers for continuous accounts.

At present there is a strong movement in Washington, Oregon and Idaho to organize fruit growers in these States for the purpose of establishing their own selling agencies, California has made a success of this plan.

British Columbia growers are fully organized and are well able to take care of their own business if circumstances warrant it. The B.C. producers can take the resolution lying down, and consign to the jobbers, which means passing back price control or the want of it to the jobbers, and the conditions obtaining previous to 1917 will soon return, human nature has not changed since that time.

## BURGLARS ENTER PENTICTON STORES

PENTICTON—Unknown burglars broke into the W. R. King store on Thursday night, stealing \$200 in cash from the cash register in the men's clothing section, and also taking about \$400 worth of merchandise, chiefly clothing. The stolen goods included a traveller's sample kit of rainproofs.

It is believed that access was had through a sort of rear air-way or basement window.

They also broke into the hardware store adjoining.

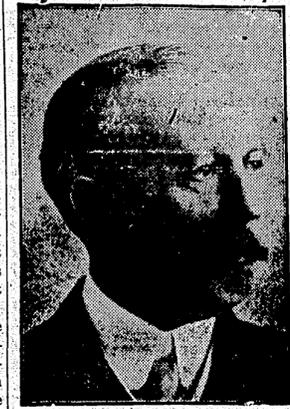

The police believe that the burglary was committed by an outsider and not by any local person, although it is evident that the miscreant was aware of a comparatively easy way to get into the store.

## SUMMARY OF WIND RECORDS FOR JUNE, 1920

Report of Dominion Experimental Station, Summerland	
Total mileage for month	6,200
Greatest mileage in 24 hours	415
Greatest mileage in 1 hour	37
Number of gales (32 miles and over)	4
Number of strong winds (25 to 31 miles)	15
Number of fresh winds (10 to 24 miles)	35
Maximum velocity and direction—South	37
Date of maximum velocity	7th
Average velocity for month	8.0
Longest continued direction—South	25
Prevailing direction, west; mileage, 2117; total hours, 240.	

Be careful to do things which you advise others to do in this way you re-enforce your counsel.

## OUR MEMBER AT OTTAWA RESIGNS

Hon. Martin Burrell last week resigned his position in the cabinet as Minister of Customs. This week he withdrew as member for Yale. He has been a member of the Borden Cabinet since 1911. From 1908 to 1917 he represented Yale-Cariboo. In 1917 he was elected by acclamation as member for Yale, of which the Okanagan is the most important section.

According to persistent rumors, Mr. J. A. MacKelvie, editor of the Vernon News, will be a candidate for the vacancy. Mr. Cossitt of Vernon also is said to be an aspirant for the seat.

## Minister of Public Works Hints at New Route For Highway

Speaking before a public gathering the other day, Hon. Dr. King, minister of public works, touched upon the linking up of the several highway systems of the province, making special reference to the link necessary to give connection between the interior and the lower mainland. The question as to which route the new road would follow, whether the Hope-Princeton route or through the Fraser Canyon is one over which there has been much controversy. Of these the minister said, both have their difficulties; either will be expensive. This piece of road may cost a million dollars. The government still hopes to find a better route than either. It has been suggested that this may be found, along the old Dewdney trail, and a survey is now proceeding. Meantime, plans of the Fraser Canyon route as they affect the railways have been submitted to the railway board.

## Sanitorium and Orchard in Connection

### Government Commission is Looking About for a Suitable Site.

Summerland was visited a few days ago by a Dominion Government commission, the members of which have been investigating Okanagan conditions with the view to establishing a sanitorium with a fruit farm in connection where discharged soldiers recovering from lung or throat trouble might find light outdoor occupation under most favorable circumstances. Before coming here they had visited the institution at Tranquille and from here proceeded to Balfour in the Kootenay. While here they visited the Summerland Experimental Station.

The commission comprises Col. Dr. W. Hart, Dr. D. Steward, of Ninette Sanitorium, Manitoba; Dr. R. Byers, of the Laurentian Sanitorium, Quebec; Dr. C. Parfitt, of Calgary Sanitorium, Gravenhurst, Ont., and Dr. A. E. Millor, of the provincial sanitorium, Kentville, N.S.

## GAMBLERS ROBBED BY STRANGE PLAYERS

PENTICTON—Sports around town are telling a story to the effect that one of the players in blackjack game in a local buffet on Thursday night got away with \$600 from the table. This seems quite a good sized sum for an ordinary blackjack game in such a public place, but those who claim to know declare that fully that much money was taken by the player who made the getaway.

He was taking part in the game and had lost several good sized rounds. Each of the others had a stack of bills in front of him. Suddenly the stranger swept the board with a big paw, stuffed the bills into his pocket and made a hasty dash for an auto outside with the remark, "If you can get me, boys, come ahead!"

## ADMINISTRATION OF WATER TAKES COUNCIL'S TIME

### More Water in Ditches Than Ever Before, But Some Tailenders Go Short

### Disposes of Municipal Motor Car—Changes Date of Regular Meetings

As is experienced at this season of the year, the time of the Summerland Municipal Council at its regular sitting on Monday was largely taken up by matters relating to the administration of water. Though much fewer than formerly, there were still some who complained of an insufficient supply. In some instances these complainants told of a seeming excess of water further up the ditches.

All the members of the Council were present at the Monday meeting, and the Council sat from 2 o'clock until half past ten with a recess between 6:30 and 8. Figures presented by the Treasurer showed that the cost of operating the Trout Creek pumping plant has already exceeded the estimate. During June over \$300 worth of gasoline had been consumed by the pumping plant. Last year the owners of the largest tract under the pumping system had been told that the Municipal Council could not supply sufficient water for satisfactory soil conditions unless the farm was flumed. Complaint was made by more than one member of the Council at Monday's meeting that this had not been done and that an effort was being made to distribute the water to farthest points through open earth ditches.

R. Pollock wrote complaining of the unsatisfactory condition of the domestic water service around Giant's Head, expressing the opinion that the pipe line was being used for other than domestic water purposes and asked the Council to have this practice stopped. The clerk reported that pressure had greatly improved following the showers of the first of the week, thus proving that there was an excessive drain in the pipe line. Councillor Kirk told of several stand pipes from which water was constantly running. Instructions were issued that these be stopped and before the Council adjourned a new bylaw for a better control of domestic water service and providing for the punishment of offenders was given its first reading, and at a special meeting of the Council on Thursday afternoon this bylaw was finally approved and now only awaits the signature of the Lieut.-Governor. Complaints were made by several on the lower end of the Thompson ditch that a very inadequate supply of water was being received. A thorough investigation was promised by Reeve Campbell, who said he would give the matter his personal attention.

Councillor Kirk, whose property is at the lower end of a service ditch, complained of continued irregularity in supply of water. It was generally conceded that measuring devices at the head of each ditch or section will have to be installed before an equitable distribution can be made of the water among the several ditch men.

R. Clouston complained of water from the lot above his being permitted to get away and flood his cellar. He was advised that this was a matter in which the Council was not concerned except that it might be that the neighbor complained of was unduly wasting water.

W. C. Kelley on behalf of Mrs. W. A. Caldwell asked for a water agreement for two separate lots. The clerk was instructed to reply with the request that the water agreement received with the titles to the properties be submitted. Mr. Kelley wrote on behalf of Mrs. Cartwright with respect to leakage from a flume and of water on the road near the Cartwright entrance. The several matters mentioned were referred to Councillor Blair for a report.

Foreman Tomlin reported that the water in the Garnet Valley dam was up to the same level as last year at this time. This reserve will be drawn upon in a few days. Councillor Johnston expressed his readiness to go to the headwaters of Trout Creek next week or whenever necessary to draw on stored water. It was reported that up to the present there had been plenty of water at the upper end of the ditches. Reeve Campbell stated that there had been more water pass along the upper end of the northern main in one week this season than in a month last season. There was no doubt that the water was not being fairly distributed.

Plans for a change in the location of a road on Jones Flat which will now cross one of the lots owned by Mr. Sanborn was presented and approved by the Council, the clerk being instructed to prepare a bylaw to effect the proposed change.

## Must Keep Water Off Public Roads

### Government Engineer Points Out Responsibility of Water Users

Irrigation water must not be permitted to flow onto public roads, say the authorities. Complaints have been entered of water flowing onto the lakeshore road in the vicinity of Trout Creek. District Engineer Groves, representing the water branch of the Department of Land, visited Summerland on Monday and the same afternoon had a brief conference with the Municipal Council.

Water has been running onto the lakeshore road from the Zimmerman Gulch and over the face of the cliffs in the vicinity of Lakeside Farm. Engineer Groves in speaking before the Council stated the Water Act is very explicit in fixing the liability for the care of "tail water." Land owners or others using water must take particular care not to damage other property. Such persons are liable for damage to such property and to roads. With respect to the Zimmerman Gulch he believed owners of adjacent land might have the right to use the gulch for any waste water, but these land owners were responsible for that water until it gets back to the creek or to the lake. It was impossible to stop all water from getting onto the road, but it was for the owner of the land from which the water escaped to find the way to take care of the water.

Engineer Groves suggested that a ditch might be run south from the Zimmerman Gulch to the Gartrell road and that the water be turned into a ditch on the side of the road. This would require that the ditch be cleaned frequently. Another suggestion was that a small piece of land be rented and diked to be used as a settling pond and the overflow turned into the ditch on the side of the Gartrell road.

After a brief discussion the Council favored using the ditches, as it was said that the sediment might be taken care of for a long time by distribution along the roadside. Continuing, Mr. Groves said that if the people were made to control the water the ditch would not fill very quickly. Those draining into the ditch or diked area should bear the cost of service, although the municipality might help, as there was some snow and rain water coming from the gulch at times. Mr. Groves specially emphasized the responsibility of the land owners and thought that if those in charge of the road on which the water came prosecuted one or two of the offenders the trouble would be greatly minimized.

## The Voter's List

Word was received here yesterday that the Province had extended the time for enrolling voters from July 15th to July 31st. This is your opportunity if you have not already registered.

This time. This reserve will be drawn upon in a few days. Councillor Johnston expressed his readiness to go to the headwaters of Trout Creek next week or whenever necessary to draw on stored water. It was reported that up to the present there had been plenty of water at the upper end of the ditches. Reeve Campbell stated that there had been more water pass along the upper end of the northern main in one week this season than in a month last season. There was no doubt that the water was not being fairly distributed.

Plans for a change in the location of a road on Jones Flat which will now cross one of the lots owned by Mr. Sanborn was presented and approved by the Council, the clerk being instructed to prepare a bylaw to effect the proposed change.

For the Chevrolet car which has been used by Engineer Fawkes two bids were received, one for \$450 and the other for \$500, the latter being from Mr. Fawkes, which offer was accepted.

The clerk read a letter from the Inspector with respect to the proposed domestic water extensions and in compliance with one suggestion made by the Inspector the clerk was instructed to write the Provincial Board of Health to ascertain what information they will require before giving approval to the extension plans.

Before adjourning the Council, at the suggestion of Reeve Campbell, changed the date of regular meeting to the second and fourth Tuesdays of each month.

## Adds Five Dollars To Irrigation Rate

### Penticton Fruit Growers To Pay \$10 Per Acre

### Water Board's Ruling

### Has Important Bearing on the Relations of Summerland Orchardists to Municipal Water System

Findings of the water board with respect to an application by the Municipality of Penticton for permission to increase its irrigation rates are of interest to every person in the Okanagan concerned with water rates and of special interest to the ratepayers of Summerland, the only other municipality in the province owning and operating an irrigation system. Under the old agreement there are two different rates being charged. Those on the benches are now paying \$4.25 per acre and the intention has been to increase that to \$5, the maximum under the agreements referred to. Those on the bottom land on flat at the lower end of the ditches are under a different agreement and are charged \$2.50. It is said that the system in that section is not nearly as extensive and that the water consumption is much less. Finding the rates insufficient for the maintenance and operation of the system, the Municipality of Penticton applied to the water board for authority to increase the rates beyond those fixed by the old water agreements. The Water Board now proposes a surcharge of \$5 per acre in addition to the regular irrigation rate. Of this subject the Penticton Herald says:

Under the proposal made by the board of investigation, Penticton municipality will increase its irrigation rates for 1920 and 1921 by a service charge of \$5 per acre. This will bring the maximum rate for the bench up to \$10 per acre and that for the flat to \$7.50. Bench owners are now paying \$4.25 and flat residents \$2.50, but the present maximum possible for the bench is \$5.

In its application the municipality sought to have the rates for flat and bench made equal, at say \$5 per acre for irrigation charge and \$5 per acre extra for service charge. The board has allowed the service charge but apparently has not conceded the increase in the \$2.50 irrigation rate for the flat. It is proposed to revise the additional toll for 1922 and succeeding years. As mentioned, the existing toll of \$4.25 on the bench is to be raised to the full extent allowed under the agreement, that is to \$5. All water users are to receive two and a half-acre feet of water per year instead of one acre foot as provided under the present agreement. It is said that most of them at present get a good deal more than one acre foot.

The board intends to sit here on August 12 at 9 a.m. to hear objections to its proposed scheme.

Councillors on Monday were rather disappointed with some of the findings of the commission, particularly that portion dealing with the difference in rates between users on the benches and those on the flats. The Reeve and Councillor Mutch were of the opinion that a strong protest should be lodged by the council at the meeting of the board to be held in August. It was time they thought that a uniform rate should prevail, generally speaking.

Another point that met with general disapproval by the council was the suggestion of the commission that the duty of water shall be deemed to be two and a half acre feet of water per annum to one acre of land. How could the council guarantee to provide this quantity of water, said Councillor Huntley, when the experience of past years had demonstrated that no given quantity of water could be relied on. It was an added point in favor of raising the rates of the users on the flats to that of higher rates prevailing elsewhere in the municipality.

The commission in their findings would apparently have the irrigation department of the council guarantee to provide more water to those users already enjoying a cheaper rate without allowing the council to raise the charge to help cover the extra cost.

Even in ordinary life the unselfish people are the happiest—those who work to make others happy and who forget themselves. The dissatisfied people are those who are seeking happiness for themselves.

# The Summerland Review

Established August, 1908

Published at Summerland, B.C., every Friday by THE REVIEW PUBLISHING COMPANY, LIMITED  
Ralph E. White, Editor and Manager

An independent family newspaper covering Peachland, Summerland and Naramata and adjacent districts.

Subscription Rates—In British Empire, in advance, \$2.00 per year; six months, \$1.25. To U.S.A. and other countries, \$2.50 per year.

Advertising Rate Cards and information respecting territory and samples of paper mailed upon request, or may be seen at the office of any advertising agency recognized by the Canadian Press Association.

Advertisers must have copy in by Wednesday noon in order to insure changes for standing advertisements. New display advertising copy can be accepted one day later.

Correspondence—Letters addressed to the Editor and intended for publication must be short and legibly written on one side of the paper only. The longer an article, the shorter its chance of insertion. All communications must bear the name of the writer, not necessarily for publication. The publication or rejection of articles is a matter entirely in the discretion of the Editor. No responsibility is assumed by the paper for the opinions expressed by correspondents.

## BRITAIN WANTS OUR APPLES

(Continued from Page 1)

between 112 and 138 and occasionally 163, and smaller apples were not wanted. The best method of doing business with the Dutch trade was through the fruit auctions at Rotterdam, which had a free port warehouse. Steamship service was provided by the Holland-American line from New York, and there would also be a monthly service this year from Montreal.

Belgium was also an apple exporting country and offered a small market, but dealing was almost impossible owing to the rate of exchange. Conditions as to size and color of apples were the same as in Holland. As to France, he found that the apple trade there knew nothing of the western apple pack. It was a difficult market to enter, and at the present time the importation of apples in France was prohibited. Even if the restriction was removed, the low rate of exchange would render it hard to deal, and he thought the best way would be to act through a representative in England.

Returning to the British market, Mr. Smith discussed in detail the different methods available for disposing of fruit. Auctions were very satisfactory, as prices were settled by competition between the largest buyers in the country, and there was quick distribution. On the other hand, the brokers who handled such sales were rather in favor of handling the largest number of boxes instead of getting the highest prices, and when the demand was slow, the auction method had its drawbacks. If shippers could get in touch with a good firm, consignment to an importer at a primary point such as London, Liverpool or Glasgow, for disposal by private sale instead, of by auction, brought good results, but he could not recommend the same procedure in regard to secondary points such as Newcastle and Aberdeen.

It was difficult to make outright sales f.o.b., as much of the business in the Old Country was done on the consignment basis, and he was inclined to think that the consignment method in Great Britain had much to recommend it, as it was very different from the consignment plan in this country, which he did not favor. Owing to the remoteness of the British market, the situation in regard to consigning was quite different there.

As to varieties, with the exception of Cox's Orange, which was very popular, and Newtown Pippin, the English market had a strong preference for red apples. In 1916, Cox's Orange brought 21s to 22s when Jonathan fetched only 10s to 13s, although Jonathan was held in high esteem. Only small sizes of Cox's were wanted, from 175 to 225. Newtown held a high place, owing to the fine quality of the Washington apples of that variety. Spitzenberg was

also very popular and the same applied to Winesap, on account of its splendid color. It was too bad that B. C. did not produce more of the latter. Rome Beauty was not so popular, owing to its large size. He had good hopes of the McIntosh Red, but it had not yet arrived on the English market. He quoted recent prices on the Glasgow market to show that No. 2 Jonathans fetched 19s as against 16s for McIntosh. The only quantity of McIntosh disposed of at present in the British market was in the barrel pack, and the apples often arrived in bad shape. The boxed Mac was practically unknown, and the color of the apple was against it in comparison with the Jonathan. Nor had the Wealthy any chance against the American Jonathan, which could be put on the British market as early as October 10, and was much in demand for the Hallowe'en trade, which was an important season in the fruit business.

Grimes Golden was not popular, and he strongly advised against its shipment. At sales during the winter it fetched only 11s to 12s 6d as against 20s 6d for Jonathan. Winter Banana was not appreciated except to a limited extent in London, and the same might be said of Delicious, although it might be possible to educate the British market to like it. Delicious Fancy brought 18s as against 20s for Jonathan ordinary. There was no demand for Baldwin in boxes, as it was the variety most largely shipped in barrels and was too common. Choice Keremeos Baldwins only made 12s to 14s when Jonathan sold at 20s. If they could be got with the proper color, he would advise shipment of Spies, but most of them he had seen on the British market lacked color. Green varieties such as Stark and R. I. Greening were quite useless for box shipments. He substantiated his statements by quoting the remarks of a large British importer, handling 50,000 boxes, as to varieties, weights, sizes, packs and quality generally of the apples he had dealt with from Canada. Much importance is attached to weight, heavy packings bringing a big premium.

As to sizes, the favorite was from 150 to 175, but from 125 to 200 did quite well, although there was a drop in price at 188. He quoted prices which showed that 200's made a better price than 138's.

There was a strong feeling throughout the trade in favor of wire binding of cases, and the steamship companies would not accept boxes for shipment unless wire bound. It had been proved that the binding reduced the average loss to as low as three-quarters of one per cent. Corrugated paper lining had also proved a great success. Buyers at auctions sampled the boxes by turning out the contents of several and taking note of decay spots and imperfections, and the apples packed in lined

(Continued on Page 5)

**Boy Scout Column**  
1st SUMMERLAND TROOP B. P. SCOUTS  
Headquarters, Ellison Hall  
Scoutmaster O. F. Zimmerman  
Meets every Friday evening at 7.30 p.m.

July 16, 1920.

With camp over, the Scouts now have the task of settling down to a good summer's work. Commissioner Henage is expected in some time this week on his annual inspection of Scout troops, he at present being the guest of the Kelowna troop at their camp at Cedar Creek.

Friday evening there was a fairly good turnout and after general routine had been dispensed with all made their way to the lake.

Sunday the troop paid an official visit to its fellows in camp. The trip was enjoyable in every way, although it was rather disappointing to the S. M. to have so many boys fail to turn up at the last moment. The Skookum left the wharf at 9 a.m. (after waiting for a half-hour for those who had slept in) with 25 passengers enroute for Cedar Creek. It was a perfect day for a trip, lake calm and somewhat obscured by clouds. The camp site was reached a little after 12 and after a dip the party sat down to a meal which made the cook popular immediately. Too much cannot be said of the hospitality extended by S. M. Weddell and his assistants, everything being done to get the boys to know one another thoroughly. During the afternoon dive service was conducted by Rev. Mr. Henage, who delivered a stirring address to the boys. After service another dip was indulged in, followed by a short but fast game of football, Kelowna vs. Summerland, in which the Kelowna Scouts managed to score 2, while the S'land forward line was unable to pierce the defense put up by the opposing goal-keeper. Mr. Henage proved a good umpire. After tea the visitors again boarded the boat and started on the homeward trail. Such visits as this one do much towards keeping the spirit of the Fourth Law among the troops.

A. S. M.'s Harris and Smith were guests of Kelowna for part of the camp. While there was not the attendance of former years, the camp on a whole was better, and the boys had the time of their lives.

A. S. M. Du Moulin, to whom fell the arduous and important task of Quartermaster, is certainly to be congratulated on the management of his work, the meals, which go so far towards making camp a success, being first-rate.

Two of the Vernon troop, Leaders Ball and Shafford, were guests of Kelowna during the entire camp.

It has always been the policy of the Kelowna association to have members of other troops spend some time with them in camp and if so many troop did not go on vacation at the same time it would be a scheme which would pay all troops to adopt.

Commissioner Henage is delighted with the great strides that the Scout Movement is taking. After years of struggle the Scouts are now coming into their own as the boys' organization. Mr. Henage states that orders for badges, etc., are coming into Headquarters so fast that they are unable to supply them. This year's census should certainly prove interesting.

## DRAWS FUEL FROM ATMOSPHERE WHILE MOTOR IS IN OPERATION

Interesting Story of a Discovery Whereby Gases of the Air Are Utilized for Power Purposes

### RAN ALL DAY AT A COST OF FIVE CENTS

Demonstration Given by Inventor Now Perfecting Engine To Use Free Fuel—Even Oil Is Not Necessary

Increasing costs of gasoline and repeated stories of the shortage of this universally used commodity makes any invention that promises to supplant gasoline of interest to everyone. The following article taken from an authentic publication in Webster City, Iowa, will be particularly interesting:

Without a drop of gasoline or oil of any kind and securing all power from the oxygen of the air, Arthur Bundy yesterday drove an Overland truck about the city the entire day and thus demonstrated beyond question the practicability of his invention—using the oxygen of the air for all power. The oxygen is drawn from the air by certain chemicals which Mr. Bundy has compounded, and not only will it produce power but light and heat also are obtained by the same process.

The chemicals are inexpensive, and running the truck the entire day cost just 5 cents. "The chemicals are taken from the natural resources that are all about us," declared Mr. Bundy this morning. "They cost practically nothing, but they are not inflammable unless there is air pressure; not explosive, and a child may drink them and it will not hurt him."

**Runs Smoothly**  
The generator containing the chemicals was placed on the side of the Overland truck and a small tube connects it with the large tubes of the car engine. A small air-hole in one of these tubes allows the air to pass in and a cap over this opening is regulated by the throttle of the machine. The more the cap is raised and the more air that is allowed to pass into the tubes, the faster the engine runs. There is not one drop of oil of any description used in this new process and the Overland which Mr. Bundy used yesterday, a model of about 10 years ago, runs as smoothly and evenly as the most expensive model car on the market today.

At present the regular car engine is being used, but the inventor now has under way an engine which will occupy only about one-third as much space and which is especially adapted to the oxygen power process. It will weigh not over eighty pounds, will have no spark plugs, no carburetor and the numerous other contrivances necessary on the gasoline motor. The engine is a series of rotary cells through which the air is forced by the chemicals and will occupy a space not more than 9x18 inches and will furnish one horsepower for each pound of weight.

**Used as Heat**  
With the same chemicals to draw the air qualities, a flame with sufficient heat to cook over, or to warm a house, is produced and Mr. Bundy this morning also demonstrated this process. A. J. Potorsen, cashier of the Webster City Savings bank, and one of the promoters of the Bundy invention, plans to use these chemicals in his furnace this winter, and will order no coal if it is found sufficient heat can be produced to warm the house. The cost of heating with the chemicals will be only a fraction of per cent. of that for heating with coal.

**Making Heat**  
Demonstrating the heating method, Mr. Bundy took a small tank containing the chemicals, and over the end of this held a lighted match. There was no ignition. The inventor then attached a gas burner to one end of the tank and placed the other end to his lips, drawing the air in, and holding a lighted match over the gas burner, a clear blue blaze immediately leaped up. The burner itself, the iron frame, does not become hot from the blaze, but only above the blaze, where the oxygen is separated from the air by the chemicals, there is heat.

The benefits which will be derived from this invention, the saving which will be realized by its practical use will be invaluable to the world, and the fact that Mr. Bundy has a "real thing" is recognized now by those who at first scoffed at the idea. "Of course it is not perfect," he declares. "There are numerous details to be worked out and perfected, but it will not be long before people will be cooking with air, heating their homes with air, and running automobiles and motors of every kind with air."

### HOW TO CLEAN VALVE STEMS

A very simple way of cleaning valve stems which are under suspicion of harboring carbon deposits is to inject a little kerosene in the air valve of a carburetor while the engine is running. In this way a little of the kerosene finds its way down the valve stems and softens and washes off the carbon. It is no bad idea to do this once a month or so.

### MONTHLY INSPECTION

A man really ought to go over his car about once a month, inspecting all the nuts and bolts to see that everything is tight and shipshape. It doesn't take long and is insurance against breakdown or accident that is about as cheap as anything will ever be.

### PREMIER SUGGESTS NEW SOURCE FOR LEATHER

Prince Rupert, B.C.—Large numbers of sea lions on the British Columbia coast which destroy annually vast quantities of fish food may be slaughtered and their hides placed on the world's leather market is a proposition which comes from Premier Oliver and has the approval of many experienced fishermen. The sea lion weighs from 2,000 to 2,500 lbs., the hides being nearly an inch in thickness and make a tough and durable rough leather such as is used in workmen's gloves and saddles. It is stated that one of these animals will eat fifty pounds of fish in a day. Four hunters recently killed several hundred sea lions in one day in the Charlotte Islands.

### Scarcity of Gas Brings Tourists to Canada

That the gas question in Washington and Oregon is acute is proved by the inquiries coming to the province from motorists anxious to tour British Columbia. Many inquiries have been received as to the possibility of procuring gasoline enough for proposed tours. The favorite route suggested is the Okanagan circuit, over the Crow's Nest Pass to Calgary, and thence by the only motor road to Banff.

All kinds of rumors are prevalent as to the cause of the gas shortage, no doubt being entertained that profiteering is playing the principal part. Seattle motorists state that one of the leading oil companies there recently sent two tank steamers of gasoline to Japan, being paid at the rate of \$1.04 per gallon before leaving Seattle. The general public firmly believes that the oil companies the shortage scare as a subterfuge to increase prices; they all seem to have first-hand information that the price will shortly advance and that then there will be no shortage.

In British Columbia there is at present no shortage, but all motorists are urged to conserve every possible gallon of gasoline, and to put off pleasure trips to the States.

### Better Facilities for Shipping Machines

Information has been received to the effect that autos will now be handled by the C.P.R. between Hope and Princeton on Mondays and on Thursdays, leaving Hope at 1 p.m. and on the same days leaving Princeton for Hope at 10 a.m. Proper loading and unloading facilities have now been installed at Princeton and blocks for securing autos on the cars will be provided, a deposit of \$2 being required, which will be refunded at the end of the journey.

### SPARK PLUG ILLS

It will sometimes be found that a certain cylinder is missing fire. If the plug has been examined and cleaned, and seems to spark well when the car is running on the level or down hill, but refuses to do duty when a hill is reached, it is an almost certain sign that the plug in that particular cylinder is short-circuiting, either from dirt or oil on the insulator or perhaps because it is crooked. The remedy is to change the plug for a new one.

### HONOR TO PROVINCE

British Columbia is honored in having the head of its University elected first president of the Canadian Society of Technical Agriculturists. President L. S. Klinck is one of the best known authorities in matters pertaining to agriculture in all Canada. The society of which he is now the head has been in process of organization since October of last year. The members will meet in convention at Ottawa early in June.

### LEAKING VALVES

Loss of power is not the only trouble that is caused by leaking valves. The hot flame which escapes past the valves distempers the valve stem, softens the valve spring, corrodes the stem bearing and forms a sediment that prevents free action.

The average length of life of an automobile is 6 1/2 years.

### WAS HUGE CROP

Regina, Sask.—According to government figures slightly over 90,000,000 bushels of wheat were raised in the province of Saskatchewan last year, of which about 10,000,000 bushels were held off the market for seed and other purposes on the farm. An initial payment of \$172,000,000 was made for this by the Wheat Board, and the wheat farmers stand to receive approximately \$32,000,000 over and above this.

### TRUCK LONGEVITY

Automobile records show that some old motor trucks, still running, have travelled in excess of 300,000 miles, more than six times the distance around the world.

Keep up the proper air pressure in your tires. Underinflation and overloading together account for nine-tenths of the tire trouble.

### Peachland Doings

A Weekly Chronicle Furnished  
By Our Local Representative.

As promised last week we mention some further facts with regard to the fire which occurred at the saw mill last week. The fire started apparently in a shavings bin adjoining the boiler room, actual cause not known, although it is supposed to have caught from a spark. The alarm was given at once when Mrs. McClellan happened out of her house and noticed the fire, and the men came from the bush as fast as possible and with those who were around the yard made up a brigade of some twenty men. They fought exceedingly well and managed to check the fire so as to keep it confined to the bin, which was a fair-sized building in itself. It was practically entirely burned, but the rest of the property was kept clear.

After several weeks spent in the Summerland Hospital and a short time visiting friends there, after leaving the hospital, Mrs. L. Vivian returned to her home here on Wednesday of last week. She is regaining her strength nicely after her operation.

Miss McNeil and Miss Humphrey of Calgary are spending their vacation here, guests at the home of Mrs. L. Mills. Mrs. and Miss Jean McIntyre of Merritt are other guests of Mrs. Mills, having come over to spend a month in the Okanagan.

A meeting of the members of the B. C. F. G. A. was called on Wednesday evening, the 7th of July, at which the following persons from the outside were in attendance to address the members: Mr. Forsyth Smith, Trade Commissioner to the Old Country; Mr. Clarke, Fruit Inspector, and Mr. Middleton, Secretary of the B. C. F. G. A. These gentlemen acquainted those present with many very interesting facts concerning the fruit business and gave figures in connection with many details.

Mr. and Mrs. F. R. Jeffords and the two girls and Nelson Keating and Cecil Brown spent last week camping in the mountains, touching among other points the North Fork Dam and the Summerland Dam. They were rather unfortunate in having a wheel go out of commission on the democrat they were using to carry them back as far as the wagon road goes, but this was a minor detail and they continued their journey and had a good time just the same. They returned on Saturday about mid-day to be on hand for the scheduled baseball game, which did not come off.

Mrs. J. McLaughlin, Sr., and Mrs. William Suddaby returned on Thursday morning of last week after a short visit to the coast.

Mrs. Pritchard, who has been stopping with Mr. and Mrs. Tailour for a time, left on Thursday morning to spend a short time at Kelowna.

Master Frank Graham left on Thursday morning to join his father up the lake, expecting to go to the Williams Lake country.

After a short visit with her mother and family, Miss Elsie White left on Thursday en route for Portland, where she expects to be with her sister for a time.

Mrs. Roland left on Friday morning to return to Kelowna for a few months.

Among our summer visitors is one who used to be one of our number in the capacity of teacher in the school and later taking up residence in a home of her own; this is the person of Mrs. C. G. Elliott. She is accompanied by her daughter, Dorothy, and two sons, Arthur and Donald. Mr. Elliott remained behind, expecting to follow in about a month and visit the old scenes here for the balance of his holiday season.

Mr. Geo. A. Robinson and Mr. and Mrs. M. Hendrickson left on Friday afternoon on an auto trip north, George to Salmon Arm and the Hendricksons to visit Mr. Hendrickson's people at Canoe. C. George returned on Monday evening accompanied by Miss Ireland, who has come to spend a week of her vacation in Peachland.

After a short sojourn in Peachland, Mrs. Graham and her little daughter, Jenn, left on Saturday morning to join her husband.

Chaplin Veroy was an arrival on Saturday night to spend a time at the ranch with his brother Frank and their grandparents, Mr. and Mrs. W. J. Moore.

Mrs. G. Hanson was a passenger north on Saturday morning last.

Little Miss Pearl Law came up from Pentleton on Saturday last by auto to spend her holidays here with relatives.

After a few weeks' pleasant holi-

day spent in Peachland, a guest in the home of Mr. and Mrs. R. A. F. Moore, Miss Walter left on Sunday morning to return to her home in Vancouver. Mr. and Mrs. Moore motored down with her to the K. V. R. westbound at West Summerland.

William Huntley of Penticton conducted the service in the Methodist church on Sunday morning. The church and Sunday School were united for the day and the service was of a missionary nature. Mr. Huntley related the experiences of the first seven years of the twenty which he spent as a missionary to Inland China. The discourse was exceedingly interesting from several points of view, but Mr. Huntley's wish that it might instill in the hearts of the congregation a more missionary spirit, and possibly be the means of inspiring a desire in the heart of some to prepare themselves for the work as missionaries.

### PRAIRIE IRRIGATION

Medicine Hat, Alta.—Southern Alberta's area under irrigation will be extended by 50,000 acres this summer, when the Canada Land and Irrigation Company begins watering parts of their 500,000 acre tract which contains altogether 200,000 acres of irrigable land. It is expected that the whole of the first 50,000 acre block will be disposed of this summer. This tract lies west of this city.

### Synopsis of Land Act Amendments

Minimum price of first-class land reduced to \$5 an acre; second-class to \$2.50 an acre.

Pre-emption now confined to surveyed lands only.

Records will be granted covering only land suitable for agricultural purposes and which is non-timber land.

Partnership pre-emptions abolished but parties of not more than four may arrange for adjacent pre-emptions with joint residence, but each making necessary improvements on respective claims.

Pre-emptors must occupy claims for five years and make improvements to value of \$10 per acre, including clearing and cultivation of at least 5 acres before receiving Crown Grant.

Where pre-emptor in occupation not less than 3 years, and has made proportionate improvements, he may, because of ill-health, or other cause, be granted intermediate certificate of improvement and transfer his claim.

Records without permanent residence may be issued, provided applicant makes improvements to extent of \$300 per annum and records same each year. Failure to make improvements or record same will operate as forfeiture. Title cannot be obtained in less than 5 years, and improvements of \$10 per acre, including 5 acres cleared and cultivated, and residence of at least 2 years are required.

Pre-emptor holding Crown grant may record another pre-emption, if he requires land in conjunction with his farm, without actual occupation, provided statutory improvements made and residence maintained on Crown granted land.

Unsurveyed areas, not exceeding 20 acres, may be leased as homesteads; title to be obtained after fulfilling residential and improvement conditions.

For grazing and industrial purposes areas exceeding 640 acres may be leased by one person or company. Mill, factory or industrial sites on timber land not exceeding 40 acres may be purchased; conditions include payment of stampage.

Natural hay meadows inaccessible by existing roads may be purchased conditional upon construction of a road to them. Rebate of one-half of cost of road, not exceeding half of purchase price, is made.

**PRE-EMPTORS' FREE GRANTS ACT**

The scope of this Act is enlarged to include all persons joining and serving with His Majesty's Forces. The time within which the heirs or devisees of a deceased pre-emptor may apply for title under this Act is extended from for one year from the death of such person, as formerly, until one year after the conclusion of the present war. This privilege is also made retroactive.

No fees relating to pre-emptions are due or payable by soldiers on pre-emptions recorded after June 20, 1918. Taxes are remitted for 5 years.

Provision for return of moneys accrued, due and been paid since August 4, 1914, on account of payments, fees or taxes on soldiers' pre-emptions.

Interest on agreements to purchase town or city lots held by members of Allied Forces, or dependents, acquired direct or indirect, remitted from enlistment to March 31, 1920.

**SUB-PURCHASERS OF CROWN LANDS**

Provision made for issuance of Crown grants to sub-purchasers of Crown Lands, acquiring rights from purchasers who fail to complete purchase, involving forfeiture, on fulfillment of conditions of purchase, interest and taxes. Where sub-purchasers do not claim whole or original parcel, purchase price due and taxes may be distributed proportionately over whole area. Applications must be made by May 1, 1920.

**GRAZING**

Grazing Act, 1910, for systematic development of livestock industry provides for grazing districts and range administration under Commissioner. Annual grazing permits issued based on numbers ranged; priority for established owners. Stock owners may form associations for range management. Free, or partially free, permits for settlers, campers or travellers, up to ten head.

### Naramata News

Current Events of Town and District

Miss MacDonald and Miss Russell of Vancouver are here for the summer. They are occupying a suite of rooms in one of the cottages on the lake.

Mrs. J. M. Robinson arrived from Vancouver on Sunday. Her many friends were very glad to see her and to know she is on the road to recovery after her recent illness and subsequent operation, which was of a serious nature.

Mr. W. A. Robinson is going to coast on Monday to consult a specialist in regard to eye trouble from which he has been suffering lately.

Mrs. H. Griffith of London, Eng., is an we arrival and expects to remain here if all goes well. Mrs. Griffith and her son are living in the cottage near the Supply Co. store.

Mrs. M. B. Smith has returned from the coast, where she has been for the past few days on business.

Mr. Gordon Baine came in to visit relatives and friends this week and Mrs. Baine accompanied him on his return trip from Ft. George by motor.

At the annual school meeting held on Saturday night, Mr. Fred Young was re-elected as trustee for another term.

The Gymnastic Club have arranged for the use of the old school building and will shortly install the necessary gymnasium equipment.

Mr. and Mrs. O. Vaughan of Summerland called on friends in town Sunday.

Mr. Jack Blewitt of Summerland is taking down the cottage recently purchased by Mr. Walters and is moving and putting it up again on Mr. Walters' fruit lot.

Mr. and Mrs. E. Noyes are visiting their mother, Mrs. J. O. Noyes, for a short time.

Miss M. D. Rushbury is visiting her brother, H. Rushbury, for a time.

Mr. Robert Reid and his wife, former residents, arrived from Regina this week and after a few days looking over the district they returned via the coast.

Mr. Percy Thornber of Summerland was here on business Wednesday.

Mr. J. M. Robinson is making extensive improvements and has men tearing down the old grandstand. The material will be used in building other places, among which will be an addition to the present Supply Co. store building. These additions will be used for post office, electric light plant, meat market, etc. The present meat-market building will be moved down to the new location in the near future. Mr. Robinson is arranging for a Delco lighting system which will be large enough to supply the town and furnish night and day service.

A number of our residents attended the Orangemen's Celebration in Penticton on the 12th and a large number also stayed over for the dance at night.

The regular meeting of the Women's Institute, held in the Unity Club house, was well attended on Tuesday night. The feature of the evening was the program of entertainment, which consisted of a piano solo by Miss Alice Meyers, a humorous reading by Mrs. Ameron and a playlet which was given by Margaret Allen, Alice Meyers, Marjory Green, Flora Lyons and Dorothy Partridge. The playlet was taken from A. Midsummer's Night Dream and was directed by Mrs. C. C. Aiken. The whole entertainment was very enjoyable and most of the numbers were staged out-of-doors with a natural setting of green trees and shrubbery. The light was furnished by lanterns and also by a number of cars which were parked nearby. The effect was decidedly pleasing and makes us wonder why more of this work is not done in this manner where we have such wonderful natural scenery.

The Naramata Sunday School will hold its annual picnic on the 21st at Dog Lake and all Naramata people are invited to attend. The rigs will leave Naramata at 10 o'clock. A full program is being arranged. The conveners are: Games, Mr. Ameron; transportation, Mr. Myers; eatables, Mrs. Allen. 51

Passing Events: Social, Personal, &c.

Mrs. O. Vaughan is leaving next week for a visit to England.

Mrs. Douglas A. MacSween of Vancouver is visiting her brother, H. P. Scott, for a few days.

Mr. and Mrs. W. J. Robinson left on Sunday morning for a visit to Winnipeg, going by way of Vancouver.

The Naramata Supply Co. Ltd. has a survey party at work this week surveying a site near the Fruit Union for a wharf.

Mr. and Miss Sinclair have returned from their trip to Toronto and other eastern cities. They were accompanied by their sister, Mrs. David Shrieff of Brandon, who will spend the summer here.

Clarence Elsey has joined the staff of the Summerland Fruit Union and holds the position of field manager. This is a new position here, but such an employee is not new in some other centres. Mr. Elsey will be in the orchards much of the time to supervise picking, etc.

Keep to the right!

The Orangemen of the district gathered at Penticton on Monday to celebrate the battle of the Boyne. The lodges of Summerland, Keremeos and Princeton joined with the Penticton lodge. Sports were indulged in and addresses were given in the grandstand. Among the speakers were Rev. A. W. McLeod, Rev. H. E. Livingstone and Rev. Charles Baker.

Principal D. J. Welsh of the Summerland High School, who is now visiting in Kelowna, motored down from that city this week accompanied by Rev. Reginald Edwards of the Kelowna Baptist church. While here Mr. Welsh by request gave some attention to the pressing question of building accommodation for the high school and inspected the college gymnasium as well as the Baptist church building. We understand that Mr. Welsh favors the gymnasium as being much more suitable for the purpose, and says that it can be converted to high school purposes with much less expense.

LAND REGISTRY ACT

Sections 36 and 134) RE APPLICATION No. 17754F.

TAKE NOTICE that application has been made to register George Henry Greata as owner in fee under a Tax Sale Deed from Wm. M. Dryden, Collector of the District of Peachland, bearing date the 5th day of August, 1918, of ALL AND SINGULAR that certain parcel or tract of land and premises situate, lying and being in the Municipality of the District of Peachland, more particularly known and described as Lot 5, Block D, Map 217, in D.L. 449, Group 1.

You are required to contest the claim of the tax purchaser within 30 days from the date of the service of this notice (which may be effected by publication in two weekly issues of a newspaper circulating in Peachland), and your attention is called to section 86 of the "Land Registry Act" with amendments and to the following extracts therefrom: "and in default of a caveat or certificate of his pendens being filed before the registration as owner of the person entitled under such tax sale, all persons so served with notice, and those claiming through or under them, and all persons claiming any interest in the land by virtue of any unregistered instrument, and all persons claiming any interest in the land by descent whose title is not registered under the provisions of this Act, shall be forever estopped and debarred from setting up any claim to or in respect of the land so sold for taxes, and the Registrar shall register the person entitled under such tax sale as owner of the land so sold for taxes."

AND WHEREAS application has been made for a Certificate of Indefensible Title to the above-mentioned lands, in the name of George Henry Greata, AND WHEREAS on investigating the title it appears that prior to the 18th day of July, 1918 (the date on which the said lands were sold for overdue taxes), you were the assessed owner thereof.

FURTHER TAKE NOTICE that at the same time I shall effect registration in pursuance of such application and issue a Certificate of Indefensible Title to the said lands in the name of George Henry Greata, unless you take and prosecute the proper proceedings to establish your claim, if any, to the said lands, or to prevent such proposed action on my part.

DATED at the Land Registry Office, Kamloops, B.C., this 20th day of December, A.D. 1918.

H. V. CRAIG, District Registrar of Titles. To Bruce Lawson. 61-52

Reeve J. R. Campbell and Mrs. Campbell were visitors to Vernon this week.

Mrs. R. Neve returned Tuesday from a week's visit with her daughter, Mrs. N. F. Tunbridge, of Penticton.

Mr. M. J. Crehan of Crehan, Mouat & Co., municipal auditors, was here on Tuesday in an official capacity and spent a short time at the Municipal office.

Mrs. Fraser, who has been visiting at the home of her brother, Mr. A. Fraser, left by K.V.R. Sunday morning for Vancouver, from where she will go to her prairie home.

Mr. and Mrs. Nayler arrived here a few days ago from Victoria with the intention of settling in Summerland. They were for a few days the guests of Mr. and Mrs. Darkis.

Miss Laura Carruthers has returned to Summerland and taken up her last summer's position with R. Pollock in his fruit business. Miss Carruthers is living with her aunt, Mrs. Vanderburg.

As announced in our advertising columns a dental office has been opened in Hotel Summerland. Dr. Coultas arrived here early this week and has fitted up a comfortable operating room in the hotel building.

Charles Marshall returned a few days ago from Vancouver, having gone down to the Coast several weeks ago for surgical treatment. While there he was operated on for appendicitis and has returned feeling much better.

Miss Ruth Dale has returned from a visit to Lumby, having motored down there some days ago. Her mother went up on Saturday on the boat and came back with Miss Dale on Monday. They were accompanied from Kelowna by Mrs. Bateman, who was met here by Mr. Bateman and continued on to Vancouver.

Among the visitors at the baseball game on Thursday was Rev. A. W. McLeod, who is at present a visitor in the Valley. "Dad," as he is popularly known among the Summerland boys, never misses an opportunity to encourage true sport, and when connected with the college here was one of the most active leaders in sport in the community.

Engineer Weir of the K.V.R. was seriously injured on Tuesday while running in the eastbound train from the coast. The accident occurred near Osprey Lake. Part of the machinery about the locomotive broke or burst, a portion of it striking the engineer in the abdomen, rendering him unconscious. He was immediately rushed in by train and medical aid having been given here he was taken on to the Penticton hospital. It is said that he is now practically out of danger.

Miss Cuthbertson of Leeds, Eng., and her sister of Halifax, N.S., are guests at the home of Mr. and Mrs. Thos. Dale. The Cuthbertson home in England was visited by many Summerland men who served overseas; in fact, it was to many their home while in England. Letters and parcels were mailed there and forwarded to the boys, and Miss Cuthbertson and others of the household did all they could for the happiness of our men, many of whom will be glad to welcome her to Summerland. The Misses Cuthbertson are friends of Miss Rothwell, formerly of the Summerland School teaching staff, and who has arrived here this week to spend the summer. Miss Rothwell is the guest of Mrs. A. H. Stoven.

Baseball

Our baseball boys invaded Penticton on the Glorious 12th, winning by a 11-3 score. Penticton's team, however, was weakened by their boys' employers not allowing them off for the two hours necessary to play the game, and great credit should be given the team's manager, Mr. Castor for the excellent results he has produced despite the very lukewarm support his town has given him—if not actual opposition.—Contributed.

At Last

"If at first you don't succeed, try, try again." Peachland trimmed Summerland in a baseball game on Thursday afternoon on their own stumping grounds, 8 to 7, and deserved to win, Summerland making many errors, and giving their pitcher poor support, although pitching a nice, heady game.

The boys go to Peachland on next Thursday at 2 o'clock, and are determined on getting their revenge.

BRITAIN WANTS OUR APPLES

(Continued from Page 2)

boxes had shown up very well in this respect, fetching in a number of instances from 5s 6d to 5s 9d more per box than the fruit in unlined boxes.

The British market was absorbing from 500,000 to 1,500,000 boxes yearly, and the box pack was growing steadily more popular and eventually would make a decided inroad into the barrel business, but, as far as B.C. was concerned, it must be remembered that the fruit of the province had to compete against large imports of first-class American boxed apples. In two or three years' time, after repeated shipments to auction sales, the large buyers would have an accurate idea of the quality of the various packs. It was astonishing how accurately the buyers can size up the quality of the various packs and value them accordingly, and the future market would rest

greatly upon what the shippers did to build a good reputation for the quality of their fruit.

Some years ago, a Canadian cargo inspector at Glasgow whose business it was to watch the unloading of cargoes and to follow them to the sales became convinced that shippers were throwing away money through their carelessness, so he went back to Canada, and went into the fruit export business, profiting by the lessons he had learned. He established a brand which became in demand above all others, commanding a premium of 3s to 5s over other brands. The result showed that if shippers put up good fruit consistently over a term of years, the result would be immensely profitable.

At the invitation of the chair, Fruit Inspector R. G. L. Clarke and Mr. W. A. Middleton, secretary of the B.C.F.G.A., who is in charge of the extension work of the university, briefly addressed the meeting.

A WEEK OF GOOD THINGS AT The RIALTO

# .. The Winding Trail ..

"Maclean's Magazine" for July 1st contains part of an article by Thomas A. Edison, headed "A Startling New Theory of Life." So far as I am able to judge, this title is very misleading—there seems to be no theory advanced which has not been accepted for a long time past. But one or two conclusions drawn from the theory appear to be exceedingly weak, and remind one of the startling gap between theory and actual fact shown to an astonished world when the Edison factory, built on Edison plans as absolutely fireproof, was completely destroyed by fire not so very long after its completion. Edison is admittedly a "wizard" in his own particular department, but it is one thing to develop a talking machine and quite another to formulate a satisfactory scheme of Creation!

Briefly put, the theory which Edison puts forth is that "life" as we see it on this earth is made up of communities of units, each so inconceivably small as to be quite invisible under the most powerful microscope. These life units came on the earth through space and possibly are still coming. What we suppose to be 'a man, a cat, or an elephant' are simply aggregations of these units gathered together in communities, highly organized. When a man "dies" as we erroneously say, these units "merely pass out of the unimportant mechanism which has been called a man. \* \* \* and select some other habitat or habitats."

Except for a slight difference in the way of putting it, this theory does not appear to vary a great deal from the atomic or germ theory which is now commonly accepted. Science has long known that "the unimportant mechanism" called man is built up of cells, atoms, microbes, germs, or units—of one name or another, but true science has not yet plunged into metaphysics so far as to say we only think we see a man. It is sufficient for all practical purposes that the man we see and speak to is actually in existence, and the number of units which go to make him as he is does not concern us. And if one of these "unimportant mechanisms" of the size which happens to wear a seventeen-inch collar and number nine shoes should accidentally step on our feet, we should find small consolation in the reflection that he was only an aggregate of units. Yet Mr. Edison's theory of the non-existence of cruelty would force us to find comfort therein. He says: "Another thing which continually puzzled me was that nature seemed to be so horribly cruel. I could not account for it. Finally, I have come to the conclusion that it is not true. It is only apparent. \* \* \* Take the supposed cruelty of the shark toward the cod for example: it probably is the effort of the vast swarm of individuals which make up the shark, to obtain for its own purposes the mechanism of the group which inhabits the cod." Why, certainly—in other words, the shark is hungry—as it generally is—and eats the cod as a small contribution towards its dinner. Whether the theory of unit-aggregation is of benefit to the cod under the circumstances is another matter. Plain men would consider that the question of cruelty is entirely untouched—it is obvious to all that the entire scheme of nature is that every living creature preys upon others for the means of existence, and in its turn is preyed upon by others. Whatever "cruelty" there is involved is totally unaffected by any theory of units. Pain and the fear of death are as real under that theory as any other, and Mr. Edison's conclusion to the contrary is much more creditable to his heart than his head.

One other faulty deduction seems palpable. Mr. Edison thinks that this theory "will rid the world of harmful superstitions such as those of spiritualism." Setting aside the fact that no amount of reasoning will ever rid the world of superstition, this very theory now put forward leaves an open door to "spiritualism" or any other ism the mind of man can imagine. Thus, in this unit-aggregation, we are told, "The personality swarm abides in the seat of memory." If this swarm keeps together after body-death, our personality still lives:

What more does any apostle of spiritualism require to work on?  
 \* \* \* \* \*

In last week's notes was an omission which somewhat obscured the meaning of the concluding lines of the first paragraph. It should have read—"as a freak of imagination might be put on the same shelf, as the reason given by Mr. Wells why the American" etc.

Mr. Wells has lately given it as his opinion that America rejected the League because it did not go far enough, and not at all because it committed that country to certain responsibilities it did not wish to assume. This conclusion is eminently Mr. Wells' own, and is probably not shared by Senators Johnson and Lodge.
