The Summerland Review

DEVOTED TO THE INTERESTS OF SUMMERLAND, PEACHLAND AND NARAMATA

Vol. 13, No. 2, Whole No. 653 SUMMERLAND, B. C., FRIDAY, August 13, 1920 \$2.00, payable in Advance

NEW LIGHTING PLANT NEEDED

Would Instal Modern and More Powerful Equipment Until Water Is Wasted Less

Though only a preliminary one and incomplete as to detail, a very interesting report by Mr. C. R. Yuill, electrical engineer, was received by the Municipal Council at its regular meeting on Tuesday. Mr. Yuill touched briefly upon the condition of the power plant and from this part of his report it is very apparent that it will not be equal to the load it will be required to carry during the coming fall and winter. On Friday night, while Mr. Yuill was inspecting the plant, it was carrying a maximum load, as is the case nearly every night. Mr. Yuill found "the friction loss in the pipe line is equal to 29 per cent. of the total." "The plant is thus wasting 13 horsepower or 40 per cent. of the amount actually utilized."

Reference was made to the diversion dam at the head of the pipe and Mr. Yuill advised that it be replaced by either a reinforced concrete structure or earth fill dam having a concrete sluiceway and spillway. The cost of these will be the subject of a further report.

Of this pressing need of a new generating outfit Mr. Yuill says:

1. It will be advisable to instal a new generating unit without delay. We recommend that this be somewhat larger than indicated by your immediate needs, as it will be much less affected by the operation of motors, while the difference in friction loss will be negligible. We recommend a water wheel of 90 h.p. capacity when operating under 390-ft. effective head; the wheel to be supplied with a needle nozzle or similar device for conserving water; the wheel to be directly connected by a flexible coupling to a 75 K.V.A. 3-phase revolving field, 2300-volt generator, with directly connected exciter. One switchboard panel will also be required. The water wheel to be arranged for hand control at present, but provision to be made for attaching an oil pressure governor at a later date. This unit could be installed in the present power house and the change could be made with a minimum of inconvenience.

2. Replacement of lower 600 feet of pipe line, by new 8-inch wire-wound wood stave pipe with cast iron or wrought steel collars. Pipe to be wound for 500 feet head and the size and spacing of wire to be specified by each company quoting for the supply of the pipe. The remainder of the 6-inch pipe and all of the present 8-inch should be replaced by 19-inch as they become unfit for service. This would permit of a reduction in friction loss to such an extent that 58 horsepower could be delivered at the switchboard with the present flow of water or more power with a greater flow. This would be practically double what is being produced now and should provide a margin sufficient for several years, by which time the advisability of an auxiliary plant or extension to the water power system can be considered.

3. Reconstruction of the diversion dam.

4. Provision to be made to connect the flume directly into the power pipe line if and when the new unit is installed. This will be advantageous in the irrigation season. The increased head will also help to conserve the water. There is no immediate hurry for this.

A further report dealing with costs, annual charges and revenues will be prepared and forwarded as soon as possible. The necessary debenture issue would be approximately \$12,000.

SUMMERLAND WEATHER REPORT

Below is a report furnished by the Dominion Experimental Station here for the week ending Tuesday:

| Date, 1920 | Max. | Min. | Rain | W. Wind | Humidity |
|------------|------|------|------|---------|----------|
| August 4 | 83 | 58 | ... | ... | 13.8 |
| August 5 | 80 | 60 | ... | ... | 13.0 |
| August 6 | 88 | 62 | ... | ... | 10.2 |
| August 7 | 90 | 67 | ... | ... | 12.1 |
| August 8 | 87 | 62 | ... | ... | 12.1 |
| August 9 | 86 | 71 | ... | ... | 1.0 |
| August 10 | 80 | 62 | ... | ... | 11.3 |

It would take all the sun water in the world two million years to flow over Niagara.

ICED CARS HAVE OFFICIAL TESTS

G. E. McIntosh, in charge of the transportation division of the Fruit Branch, Ottawa; R. G. L. Clark, Dominion fruit inspector for B.C., and O. Walker, of the refrigerator car department of the C.P.R., spent several days here this week in connection with tests being made of the several types of refrigerator cars in order to learn which is the best type of car for the fruit shipping. Some fruit shippers claim that the car built for carrying fresh meats and fish is not a suitable type of car for carrying fruit. Exhaustive tests are being made by Mr. McIntosh in order to ascertain in which of the several types fruit will carry the best. Three cars were loaded here this week under the inspection of the three men mentioned above and when they started rolling were accompanied by an employee of the Fruit Branch, each car being fitted with a thermometer and other registering instruments. All the cars were loaded at the Fruit Union packing house.

MORE EQUITABLE DISTRIBUTION

Aim of Orders Issued by the Council—Claims Received for Water Damage

The regular semi-monthly meeting of the Summerland Municipal Council was held on Tuesday. After sitting from 2 to 6 the council adjourned, leaving a number of items on the agenda to be dealt with at the adjourned meeting, which will be held next Monday.

Claims for damages were made by two citizens. Clayton & McKeen, of Penticon, representing D. C. Barr, entered claim for \$295 for damages to his fruit lot said to have been caused by leaks or overflows from a flume just above the Prairie Valley siphon. The claim was referred to the Reeve and clerk for investigation. The second claimant for damages was T. B. Young, who laid claim to damages under two headings: one, that a leak from a lateral had flooded the cellar of the property formerly occupied by S. M. Young, resulting in damages to the foundations. The second was for damages to a meadow through alleged excessive seepage from an irrigation ditch. These claims were referred to Councilor Johnston. The council agreed that the ditch lining should be extended further up the Prairie Creek ditch so as to make sure that there was no leakage from that ditch into Mr. Young's land.

District Water Engineer Groves advised the council that on July 28th he had served 15 lot owners in the vicinity of Zimmerman Gulch with the usual notices with respect to permitting water to run on the roads.

Several complaints were received of insufficient water, in every case from lot owners on the lower sections of the distributing mains. While there has been more than the usual supply of water in the upper part of the ditches, there have been many complaints from "tail-enders" of the inadequate supply. Coun. White urged that something be done to give those people a good supply of water even if it were necessary to temporarily curtail the service to the lots further up the mains. Reeve Campbell in reply told of efforts being made to improve the service at the end of the ditches wherever possible.

C. P. Evans, who has 50 odd acres under the Trout Creek pumping plant, wrote asking for more than two days' service. He also inquired as to the policy of the council with respect to the pumping plant in the future. Several of the councillors noted the fact that the Evans property had not been flumed and consequently water was being wasted by being carried for long distances in earthen ditches. It was finally agreed to give Mr. Evans an extra day on alternate weeks.

Following a discussion of building regulations when it was agreed that Summerland needs an up-to-date building regulations by-law, a motion by Couns. Kirk and White that a grade line be fixed for the north side of Granville Road was carried and the matter referred to the roads committee.

Surveyor's plans covering a subdivision of the property on the south side of the Granville Road, opposite over Niagara.

CHERRIES WERE OF FINE QUALITY

Apple Shipping Commission's District Official Says Winter Apples Sizing Well

That the cherries shipped from this valley were of fine quality and very satisfactorily marketed is the statement of the district horticulturist, who in his weekly news letter issued to the newspapers of the Valley has something to say on the growing and marketing of "cots," another crop for which a good price is being received. Mr. Hunter's letter follows:

Cherries
The season for sweet cherries is about over and has been one of the most successful deals on cherries for several years. Prices have been very stable and the shipments have been arriving in satisfactory condition, on the whole. Some losses from rotting in transit was noticeable, but taking the Bings and Lamberts all the way through they were of very fine quality and were marketed very satisfactorily. Not only has the quality been most excellent but the tonnage has exceeded our earliest expectations. Sour cherries are moving freely from the northern end of the Valley, and are bringing a splendid price.

Apricots
The apricot crop has been better than average as to quantity and if the growers had paid a little more attention to the thinning of the early varieties such as the Royals, the quality would have been unsurpassed on the whole.

Too little attention has been given to the thinning of the Royal apricot in the past, and as it is impossible to get size on this apricot unless they are very heavily thinned, it would seem to be good economy on the part of the growers to give this matter a little more consideration. Prices have been almost unprecedented on apricots this season; the strong tone on the part of the canners having a very beneficial effect on the market. The extreme hot weather has hastened the picking season somewhat. The Moorpark continues to be the leading favorite both with the growers and canners.

Plums
Plums have commenced to move in some sections, and indications are that there will be a very good crop of this fruit throughout the Valley.

Some wilting of both plums and prunes has been noticed, and those same factors which are causing Drouth Spot and Cork on apples, namely, impoverished soil conditions, which can only be remedied by the addition of vegetable matter and plant food to the soil.

Early Apples
The Yellow Transparents are now moving in small quantities and should go forward freely next week. Duchess are coming on fast and picking should commence inside of a week. Wealthies are already taking on color.

Late Apples
Late apples are sizing well. Indications are that the growth will not be interfered with during the balance of the season, as the water supply in nearly all districts is quite adequate.

Tomatoes
Semi-ripes are now rolling from Kelowna and Summerland and canner crops look particularly well, very little blight on the plants being noticeable as yet.

Vegetable Crops
Onions look particularly well and promise a very heavy crop. Cabbage, carrots and beets are standing up under the hot conditions of the past few days in splendid shape.

Canada's Wool Crop
CALGARY, Alta.—The collection of Alberta's wool crop has commenced and it is estimated that approximately 300,000 pounds will be sent from the province through the central collecting station here.

MOOSE JAW, Sask.—Last week was a record one for wool shipments, 10 carloads weighing 250,000 pounds being sent from points in Saskatchewan and Manitoba. It has been estimated that 1,000,000 pounds of wool will be collected in the two provinces this year, a considerable increase over last year's crop.

FREDERICTON, N.B.—Upwards of 40,000 pounds of the provincial wool clip at present stored here is undergoing grading. The total amount for which applications were made was 100,000, but the slump in prices has caused a withdrawal.

DRY CAMPAIGN OPENED HERE

The initial meeting of the local prohibition campaign was held in St. Andrews, church on Tuesday evening last, when but a fair number of those interested in this important issue were present.

The chairman, G. J. Coulter White, outlined the purpose of the gathering and emphasized the importance of the question which demanded a most loyal adherence and effective support of all those who desired to make our country the best possible.

The address of the evening was delivered by Principal Welsh, who in a splendid fashion reviewed the history of the prohibition movement in the province and showed, considering the difficulties involved, the steady and real progress that had been made up to the present time. Not only was it historic, however, but in a very convincing manner he showed the national, social and moral obligations which belong to true patriotism and real progress, also the subtle and forceful foe which prohibitionists had to face, and urged upon all to become conversant with these facts as they are and not to be misled by false interpretations and unfair handling of great and significant terms.

It was all that an opening address should be and certainly more of those who no doubt are cordial toward the issue might well have listened to it.

Rev. Page and Livingstone also took part in the meeting.

Miss Snider sang most acceptably. The business necessarily arising out of the meeting resulted in the forming of a committee who will appoint a permanent executive for directing the whole campaign.

This committee will meet on Sunday afternoon next in St. Andrews church so that the work necessary to be done may be soon gotten under way.

RESERVOIR MAY BE ENLARGED

More Water Storage Facilities Is Subject of Discussion by Council

Storage of water was the subject of a discussion by the members of the Municipal Council during the regular session on Tuesday. The long continued dry, hot weather is reducing the natural flow of the creeks and stored water is now being turned into them to be diverted into the irrigation channels. Further storage dams of capacity to assure an ample supply for the latter end of the irrigation season is very desirable.

With enlarged main ditches, miles of which are now of a permanent nature being lined with concrete or metal, there has probably been at least twice as much water diverted from Trout Creek during the present season as at any time in the history of irrigation here. For the satisfaction of the lot owners a flow relatively as great should be maintained during the period when stored water is used.

One of the best storage sites to be found anywhere is that occupied by the now dam in Garnett Valley. When put in this was constructed with the view to raising it later. This will probably be the first move to provide for more storage. Another that has been recommended is a lake near the head waters of Ebanas Creek, but which empties into Trout Creek.

No plan for immediate action was decided upon Tuesday, but no doubt this subject will be further considered at an early date.

To Make Sandpaper

VICTORIA, B.C.—The Canadian Abrasive Company has been incorporated here with a capital of \$100,000, and will have a factory in operation at Vancouver within a short while. The paper used in the manufacture will be obtained from local plants and the hard rock from the limitless supplies of the British Columbia mountains. This is believed to be the first purely Canadian venture in this industry, and the initial plant is to cost about \$500,000. The provincial Department of Industries has loaned the company \$22,000 over a period of 10 years.

A polished mirror can't reflections but a polished man can't. That's the difference.

AMERICAN FRUIT EXPERTS COMING

Will Lunch at Experimental Station on Next Tuesday—Convention at Vernon

A meeting of the Western Horticulturists, with whom are associated the Western Entomologists and Plant Pathologists, will be held in Vernon on August 18th, 19th and 20th.

This organization had its origin on the West Coast about three years ago as a result of a feeling that closer co-operation in investigational studies was necessary between investigators and field inspectors. It was felt that the investigator often lost sight of the practical "touch" and the field inspector did not fully avail himself of the results of the investigational studies that were being pursued, hence this association was born.

Three years ago the first meeting was held at Corvallis, Ore. The second meeting last year was held at Pullman, Wash., and the third meeting is now to be held at Vernon. The British Columbia delegation which attended the meeting at Pullman last year consisted of Messrs. A. F. Barrs, E. W. White, E. R. Buckell and R. C. Treherne, and they were successful in persuading the meeting that Vernon would be the most desirable point for the 1920 convention.

There are no definite officers in the association, the horticultural and entomological officers of the department in the state or province in which the meetings are held automatically arranging the details of the meetings. The programme is being arranged this year by Messrs. E. W. White, A. F. Barrs, and R. C. Treherne and a local committee consisting of Messrs. W. T. Hunter, H. H. Evans, and R. C. Treherne are arranging the details of the entertainment in the Okanagan valley.

Delegates which will doubtless number about fifty will arrive by motor from Oroville, and by train from Vancouver. Arrangements are being made to despatch a number of motor cars to Oroville on August 17th to meet those who are without means of transportation. They will be met and conducted to Penticon, Summerland, Kelowna and Vernon. Lunch is being arranged at Summerland Experimental Farm, and orchards in the vicinity of each of the fruit centres will be visited en route.

The meetings will start at 10 a.m. on Wednesday, the 18th, at the court house, Vernon. The first day will be a joint meeting for all delegates interested in general phases of orchard problems. Discussions will take place on Drouth Spot, Apple Mildew, Strawberry Root Weevil, Codling Moth, Soil Fertility and Cover Crops. On the 19th the delegates will divide up into their respective groups to discuss peculiar problems on a more technical basis. The local committee have arranged to provide a bathing party and a light supper at the Vernon country club for the evening of the 18th and it is possible that arrangements will be made to have a special lecture given on a subject of interest to all fruit growers. Fruit growers are welcome to all the meetings provided it is realized that the discussions are fundamentally "round table" talks. Delegates are not coming prepared at all times to give results of finished work but to discuss problems which really still await solution.

JULY WAS MONTH OF STRONG WINDS

With an average wind velocity for the month of less than 10 miles and with but one occasion on which the wind developed into a gale (32 miles or more), July nevertheless was the windiest month of 1920, according to the records kept at the Dominion Experimental Station here, the following abstract of which records is kindly furnished The Review by the Farm office:

| | |
|---|-------|
| Total mileage for month | 7,108 |
| Greatest mileage in 24 hours | 360 |
| Greatest mileage in 1 hour | 303 |
| No. of gales (32 mi. up) | 1 |
| No. of strong winds (25-31 mi.) | 18 |
| No. of fresh winds (10-25 mi.) | 57 |
| Max. velocity and direction | north |
| north | 33 |
| Dnt. of Max. velocity | 4.7 |
| Av. velocity for month—miles | 0.7 |
| Longest continued direction—west, hours | 10 |
| Prevailing direction, west; mileage | 3,057 |
| Total hours | 200 |

EIGHT HUNDRED VOTERS REGISTER

Just how many more who were eligible for enrollment failed to get their names on the voters' list is not known, but the list for South Okanagan would have been 500 short of its present number of voters had not the period for registration been extended from July 15th to July 31st. South Okanagan now has a total of 3,789 voters as compared with 1914 in 1916, which was before the franchise was extended to women.

In districts the registration was as follows:

| | |
|-----------------|-------|
| Summerland | 798 |
| Mineola | 43 |
| Naramata | 143 |
| Peachland | 241 |
| Westbank | 78 |
| Kelowna | 1,545 |
| Rutland | 236 |
| South Kelowna | 113 |
| Glenmore | 37 |
| Ellison | 81 |
| Benivolun | 97 |
| East Kelowna | 140 |
| Woods Lake | 121 |
| Reids Landing | 10 |
| Okanagan Centre | 51 |

SEEN THROUGH ANOTHER'S EYES

Correspondent Writes Paper Following Brief Visits to Sister Towns

Contributions to the news columns of the Vancouver Province by Charlotte Gordon always make interesting reading. This staff correspondent makes periodical tours of the province and the big Vancouver daily of last Saturday devotes two columns to a write-up of Naramata and Summerland, including the reproduction of a photograph of Mrs. M. B. Smith, a well-known and active citizen of Naramata. Though local readers will find considerable irregularity in details the article is nevertheless interesting reading. Of Naramata the writer says:

The civic activities of this season will add to the many attractions. The public school grounds will be improved by a stone fence, playgrounds will be well equipped, cement walks laid, tennis courts arranged, and all outlined with different varieties of shade trees. A new hotel has been opened, summer cottages are all occupied, and the fruit-packing concerns are preparing for a season's work larger than usual, because of so many new orchards coming into bearing. Another civic movement that is an innovation in Women's Club work has been undertaken by the Women's Unity Club in accepting the deed for the cemetery in the town on condition that they fence, develop and beautify the grounds. A second objective of this club is obtaining funds to furnish a ward in the new Summerland hospital. Mrs. J. M. Robinson is president, and Mrs. Fred Manchester is secretary, and the clubhouse on the lake shore continues to be a community centre. A new factor in the life of the district is a musical and dramatic society, formed this season with a large membership, and the special object of training those taking secondary education. Mrs. Carl Alkon is leader of the dramatic department, and Mrs. Green has charge of the musical study. Open entertainments are given every month, thus bringing out the talent of the younger generation.

One Woman's Work
On the benches overlooking the lake is "Lumindon," the home of Mrs. M. B. Smith. The story of her fruit products industry is a story of a Canadian development which is an echo of the war in that the conservation of fruit was started purely as a war measure. By this work thousands of pounds of fruit have been saved, which would otherwise have gone to waste. Mrs. Smith, the widow of a lawyer, made her home in Ottawa until the death of her husband, about three years ago. As president of the G.W.V.A. and in various offices in the Women's Canadian Club, the National Council of Women, and the I.O.D.E., she was closely associated with the social and club life of the capital city. While visiting on the prairies during the early stages of the war, Mrs. Smith saw dried loganberries of an inferior quality, and it led her to dwell on the possibility of the dehydration of fruit and vegetables. She was much concerned over the large quantity of fruit and vegetables that could not be shipped, and with patriotic vision and

SPECULATION IN APPLES STOPPED

Market Commissioner Gives Advice to Small Shippers—Some Cherry Prices

Writing on prospective apple prices, Fruit Market Commissioner J. A. Grant states in a recent bulletin that so far there is no 1920 apple price established. There is considerable inquiry as to the prospect price that will be obtained for fall apples. Wealthies are being quoted at \$2.30, Macks at \$2.60 to \$2.75, and Jonathans \$2.60, and Delicious at \$3.00 for No. 1s. So far sales have been made on the above figures, but insufficient volume to establish a market price. Some factors that will enter into the apple deal as far as the whole Pacific Northwest is concerned will be the size and cleanness of the Ontario and Quebec apple crop, and the same factor in the U.S. concerning the size of the barrel apple crop east of the Mississippi. The crop there is reported to be the best for some years. Another price determining factor will be the increased price of barrels and picking of the fruit, while a third factor will be the continuance of the maximum price on apples in Britain, which from latest advice is still on.

The Northwestern Box apple yield from careful estimates will be about 65 per cent. of 1919. "Good quality and color is expected." Speculation this year will be almost wiped out; selling on the market will be the rule as far as the prairie trade is concerned. For this reason we suggest to small shippers who have apples to dispose of that they keep in close touch with us so that overlapping in distribution and irregular quoting may be avoided.

Sell on the Market
Continuing, Mr. Grant says: We find many B. C. fruit men trying to make advance sales on plums, prunes, peaches, apricots, pears and apples. The late crop reports point to a light crop of plums and prunes. The market is unsteady and only "safety first" prices tempt

(Continued on Page 4)

broad ideas began the evaporation of fruit. She has made an extensive study of the work, and persisted, despite the fact that men of experience declared that she could not dry fruit, other than apples. Now she is in the unique position of being the only one in Canada who has dried fruits other than apples, on a commercial basis. Her dried peach is the only totally peeled peach on the market in either Canada or the United States. She has placed several new products on the market, and has created three distinct industries—dried fruits, crystallized fruits and the new cherry raisin.

Wants Parcel Post
Another idea which Mrs. Smith is promoting which she declares will help to bring down the H. C. of L. is the establishment of a parcel post system direct from the producer to the consumer. Mrs. Smith is very much interested in movements to promote the practical usefulness of women, and has no desire to keep a monopoly of this new industry of which she may be said to be the founder. She desires that all women in fruit growing districts may start small evaporating plants to care for overplus of fruits, not only for their own households but as a means to increase their incomes. By dehydration a large portion of the more than 60 per cent. of the fruits that now spoil would be saved. The products are so reduced in bulk and weight that one railway car or one ship will carry as much fruit as ton now carry. If the evaporated fruit industry in Canada were extensively promoted, there would have been, during the war shortage, no waste of fruit such as was experienced, because the dried fruit could have been stored away until such time as the sugar shortage was over.

Mrs. Smith's ranch is quite an ideal spot, with its slopes of orchard, strawberry plants and garden. Her Mrs. Smith is making a study of conditions with a mind trained for constructive work. It is an accepted fact that environment has a strong influence upon people and surely the gorgeous panorama that is ever before the dwellers in this peaceful spot is conducive to all that is finely progressive. The glory of the lake, the hills, the mountains, tend to develop all that is best, and in such a setting

Peachland Doings

A Weekly Chronicle Furnished By Our Local Representative.

In last week's news we mentioned that the Union Sunday School picnic was in progress as the news went for publication and that we would have further to say in this week's items. The picnic was one which turned out to be very successful. All had a splendid time, the weather and everything else working together to that end. As usual the children enjoyed the land and water sports comprising races for the various ages. A collection was taken up to aid in the financial end of the afternoon's fun. When it came time for eats it was found there was an almost unlimited quantity of dainties to go around and this portion of the day was enjoyed no less than the former portion. Lunch was served on the beach by the pavilion in regular picnic style. The time comprised was from 1:30 p.m. till well on in the evening and a very large percentage of the school was represented at the picnic.

After a pleasant holiday spent here as a guest of Mr. and Mrs. Thomas Powell, Miss Black left on Wednesday evening of last week.

Mr. and Mrs. H. E. McCall are enjoying a visit from a cousin, Mr. Roy McCall of Stoneville, Man., and a travelling friend of his, Mr. E. Nightingale, recently from near Barrie, Ont. These gentlemen are quite taken with the Okanagan Valley and fruit growing and would like to locate here.

Thursday of last week was quite an exciting day for Peachland when a goodly turnout of Peachland young people drifted in by motor launch and spent the afternoon and evening. The afternoon was given over to a game of baseball between the Rutland and Peachland teams. One and all who witnessed the game that afternoon were quite ready to state that they believed it to be the best game played here this season. The game was very keenly contested for from first to last, but especially near the finish was it specially interesting; so much so, in fact, that the onlookers, who had been scattered in little groups all around the park, closed in around home plate till they had to be urged back a little to leave room for the play. Intense were the closing moments of the game, both for the players and the rosters, and our old baseball enthusiasts were seen to be jumping up and down and throwing their hats in the air even before the game was won for Peachland. Many plays might be mentioned in detail, but taking the game throughout the playing was comparatively even, there being very few errors. The score ended 9 to 8 in our favor. Our visitors were sure game through and through and gave three hearty cheers at the finish. The Rutland party stayed for a dance held in the Orange Hall in the evening, which was also attended by quite a crowd from neighboring towns to the south. The Summerland orchestra supplied the music and a very enjoyable evening was spent. A good crowd, good music and a lovely evening all tended for a good time.

As many men as were available for the job have been picked up in the district and taken out to fight against the big bush fire which is raging and has been since last week, in the territory between the north and south fork of Deep Creek. Quite a large acreage is covered by the fire and everything being so dry makes it very hard to gain against the fire. It has already done a great deal of damage to the wood supply on some of the pre-emptions in that vicinity and is, by no means anything like

LANDS FOR SALE

15 Acres of good, dark soil with creek running through bottom land. Ten acres under irrigation, about 7 acres cultivated with three planted with 6-year-old trees. The property of Mr. F. A. C. Wright. A well-built and finished bungalow, six rooms, large bathroom and attic. Closed-in veranda, hot and cold water, gasoline pump to two large tanks in attic. Good stable, garage and other outbuildings. 1 1/2 miles from town on rural route. Will be sold for \$7,500. With Delco light plant and fittings, \$2,500.

The Wismer Estate, originally the old Garnett Homestead, comprising 10.76 acres and 40 acres of timbered range. Ten acres well watered by two flumes and a ditch, also Aeneas creek flowing through the bottom lands. Five acres of bearing trees and five acres under alfalfa. Good dark soil and deep subsoil. House, stable and garage. Price, \$8,000. Terms.

The Oldham Orchard in Prairie Valley. Ten acres planted and 10 acres of timbered range. Good variety of apples, cherries, plums and peaches. Ages up to 15 years. Small thack and stable, domestic water and R.R. Priced \$5,000. Terms.

under control yet. Some of the pre-emption cabins are in danger of being burned if not already down.

Mr. and Mrs. A. J. McKenzie and family, Mrs. R. Harrington and family; Miss Clark, who is visiting here from Vancouver, and Master Hugh Dorian formed a party who turned their faces westward last week Tuesday and kept moving in that direction till they had reached the Glenn Country, where they set camp for the week. On their return on Saturday they reported having had the time of their lives. They had been somewhat fearful of being badly bothered with flies and mosquitoes, but they were not bad.

Mrs. Bryson M. Whyte is enjoying a visit at home with her parents, having motored down from her home at the Centre.

The home of Mrs. A. W. Miller was the scene of a pretty shower on Friday in honor of Miss Leone Morrison. There were many ladies present who showered the bride-to-be with rose leaves and flower petals as she entered the lawn. The numerous gifts were both pretty and useful. A dainty lunch was served.

Mr. R. A. F. Moore returned last week from a short visit to Spokane and vicinity.

Rev. C. D. Clarke has disposed of his Ford and is now driving a new Chevrolet.

Mr. J. E. Kerr has taken unto himself a charge to keep, in a Ford car, and is busy learning its various parts and habits.

Mrs. Grantham paid a short visit to Vernon last week.

Mr. C. Kay and wife of Vancouver arrived last week to spend a short time in town with Mr. Kay's parents, Mr. and Mrs. James Kay, and with Mr. and Mrs. Wm. Dryden and daughter, Jean. They came to lend their presence on the occasion of the 25th anniversary of Mr. and Mrs. Dryden's wedding day. The families spent a very enjoyable time together. Mr. and Mrs. Kay left on Monday to return to the Coast, the Drydens taking them down by auto to catch the train at West Summerland.

After the usual Sunday School service in the Baptist church on Sunday afternoon the congregation proceeded from the church to the lake shore in front of Allan Wilson's home to take part in a baptismal service there. Three candidates, in the persons of Miss Ilyva Murdin, Miss Cora and Master Ed. Wilson, were baptised at the close of a short and interesting discourse by Pastor Grieves, explaining why the Baptists baptize and also explaining where and when they got their name.

The pupils of the Junior Division of the public school and their parents met at the home of Mrs. H. E. McCall on Monday afternoon to show their appreciation of the work done by the retiring teacher, Miss Leone Morrison. During the afternoon the following address was read: "We, the pupils of the Junior Department of the Peachland Public School, feel that we cannot let you leave our school without letting you know how much we appreciate you and your kind interest in our welfare during the past year. In you we had not only an efficient teacher but a friend who sympathized with us in all our

difficulties and was ever ready to do all in your power to help us. We are glad that you are not leaving our community and we feel sure that your presence will grace a home of your own as it has our school room. In conveying the best wishes of ourselves and our parents we beg you to accept this gift, not for its real value but as a token of our esteem and appreciation, and we trust that happiness and prosperity may ever attend you in your new walk of life."

This was read by Miss Margaret Harrington and Miss Phillis Drake presented the purse on behalf of the pupils. Miss Morrison was very much touched by the event and spoke a few words of appreciation to her pupils and gave them a few kind words of advice. After this lunch was served on the verandah and lawn.

Mr. J. Seaton paid town a short visit to attend a function of the Masonic lodge held on Tuesday evening in the Presbyterian church.

Mr. R. Howson of Pentiction spent a couple of days in town this week in the interests of an insurance company and also attended a Masonic meet here on Tuesday evening.

Mr. A. H. Cuthill has recently bought the Orange Hall and from now on will have full charge of same for renting for all necessary functions. It is his intention to make some improvements to the building to put it in better shape for the various requirements.

Mrs. G. L. Harrison is enjoying a

visit from her father, who is spending a short time in Peachland.

Miss (Nurse) Wilson returned from Victoria last week to spend a short visit with her friends, the Powells, before leaving for England. Unfortunately she was taken ill just before leaving Victoria and was quite poorly on arrival here, but is improving nicely and expects to be able to leave for her journey on Friday next.

A number of Masons from points up the lake spent Tuesday evening last in town, attending a Masonic meet and social function held in the Presbyterian church.

Miss Leone Morrison and her mother left on Wednesday morning last accompanied by Mr. Arthur Henderson. It is quite understood that the marriage of Mr. Henderson and Miss Morrison is to take place in Vernon, but further particulars will probably be forthcoming in the next issue.

The Valley Crop

VERNON, B.C.—Whilst it is estimated that the production of apples in this district will this year fall somewhat below that of 1919, pears, it is stated, will double last year's crop, and peaches, cherries and apricots will maintain last season's figure. Onions and tomatoes and potatoes have a larger acreage this season than ever in the history of the district, and the output of all three are expected to constitute records.

ROOSEVELT ON BOYS

One day Roosevelt expressed himself on the subject of sons.

"Some of the most splendid fellows I know have boys that if they were mine I'd want to choke them—pretty boys who know all of the latest tango steps and the small talk and the latest thing in socks and ties—tame cats, mollycoddles, and their fathers real men, and their mothers most excellent women! Throwbacks, I suppose. I'd feel disgraced beyond redemption had I such boys.

"Mine, thank God, have been good boys, a bit mischievous at times, all of them, but every boy is. Honestly, if I had to make my choice I'd rather have a boy that I'd have to go to the Police Station and bail out for beating a cabdriver or a policeman than one of the mollycoddle type. He might worry me, but he wouldn't disgrace me."

Spare minutes are the most fruitful for good or evil, for they are as gaps through which temptation finds easiest access to the garden.

PHONE 6 WEST SUMMERLAND

NORTH AMERICA'S WEALTH IS DUE TO HOME TRADE

What Is True of a Continent Is Equally True of Village, Town, or City—Trading Away From Their Own Home Town Helps Your Own Locality To Commit "Hari-Kari"

Trade was originally—and naturally—brought to this continent by a ship. When Christopher Columbus first sighted the never-to-be-forgotten coast line of what is now known as America, he approached the mainland with some considerable misgivings as to what would be the reception afforded to his little band of heroic adventurers, by the aborigines whom he could perceive flitting excitedly about the forest-fringed shore.

The needs of the hardy seamen, who had accomplished what was in those days the gigantic feat of crossing the Atlantic, were many. Food and water were absolutely necessary, and these had to be acquired by means, either warlike or peaceful. History relates that the first Europeans who trod the American continent received anything but a kindly welcome from the savages who inhabited the newly found territory. Water, meat and—almost the food of the greatest importance of all—green vegetables, they certainly obtained, but only succeeded in doing so by a system of bartering in which their war weapons acted as a means of argument. Trade, such as we now understand the word, was quite out of the question.

The successful voyage of Columbus and his merry men was the forerunner of many more adventurous expeditions to these newly found shores. But though the object of these reckless voyageurs was the acquisition of such valuable goods as could be obtained from the native inhabitants, there was no attempt at first made to trade, and possession of the things desired was always obtained by the use of force. These hardy explorers can truthfully be described as pirate pioneers.

It was about the time of the arrival of the Mayflower that trade relations on a businesslike scale were first opened up, between the dusky human denizens of the American continent and the European adventurers who from time to time visited its shores. At first those who had travelled over on that ship of destiny were in a very awkward position, for such was the undesirable reputation which the white man had acquired that the savages looked upon all of that color as possessing the same characteristics.

Those who first attempted to make out of a virgin continent a land in

which to live—and also die—thoroughly realized from the first that it was necessary to establish friendly relations with the original owners of the soil. Only in that way would the land and people flourish.

If one briefly reviews the prosperity which has come to the two great nations on the North American continent, it will be easy to distinguish the reason why. Canada and the U.S. have in a comparatively short space of time outdone many other countries in the matter of wealth. It is an economic fact that the cause for this satisfactory position of affairs is that the vast sums which have been received for the produce of these countries have to a very great extent been retained and used in the land from which they were derived. In other words, these young countries invested their wealth, as they acquired it, in developing their own land. If, instead of doing this, they had recklessly spent their earnings in another country, then the satisfactory economic position they now hold in the world would never have eventuated.

It must be apparent to all that what applies to a country as a whole also applies to portions of it. If those who live in one town spend their wealth—whether it be large or small—in another city, they do so to the hurt of their own community and the aggrandisement of what is in all probability a rival.

Those who have money to spend should think twice ere they spend a dollar unnecessarily away from their own community. They do not mean it, perhaps, but if they trade away they are, metaphorically speaking, helping their own home town to commit "hari-kari."

NOTE PUZZLED SAVAGE

Writing is very puzzling to savages. In South America, on one occasion, a native was sent by a missionary to a friend with a note and four loaves of bread. The native ate one on the way and was amazed to find that the note discovered the theft. On the next occasion that he was sent with four loaves he sat on the note while eating one of them.

It is far better to give work which is above the man than to educate the men to be above their work.—Ruskin.

SEEN THROUGH

ANOTHER'S EYES

(Continued from Page 1)

Mrs. Smith is opening up a new field of service which will demonstrate that women are the natural house-keepers of the race.

The Province's special correspondent writes thus of Summerland, following a brief visit to this centre:

Summerland, the central point on the west side of the lake, has much to recommend it to the tourist, combining scenic beauties with many outstanding points of interest. Visitors to the Dominion Experimental Farm much appreciate the meteorological station with its fine equipment, which has been built on a bench overlooking the lake at an elevation of about 600 feet above the lake and open to the elements.

There has been much building at the experimental station this year, including the new boarding house, with deep verandahs, facing the lake, the foreman's house and a large, eight-sided log house in a wonderful setting of trees, close to the head of the farm irrigation system. This picturesque rustic log pavilion will be equipped with cooking conveniences and is for public use, adding to the many attractions that make the Okanagan Valley a summer playground. Everywhere, indeed, on this developing farm there is much to interest the most advanced agriculturist. Other buildings, in the course of construction or planned, include homes for the superintendent, assistant superintendent, herdsman's house and horse stables, the completion of which will form quite a little village, while more land is being put under cultivation each year.

Summerland's Irrigation

The municipality of Summerland has spent \$100,000 on improvements to the irrigation system, the head waters of which are 25 miles back in the mountains. Activities in the town include the erection of a number of buildings and the packing and shipping interests are preparing for a heavy crop of soft fruits and an average crop of apples. The new hospital will be built this summer on Hospital Hill, above Summerland to replace the one burned down. The cost will be about \$35,000 and the institution will have 18 beds. Mrs. Van Allen will erect one wing at a cost of \$10,000, in memory of her son, who gave his life for his country. Mrs. H. A. Solly is president of the Hospital Aid and Mrs. W. J. Robinson is leader of the Women's Institute, which holds an important place in the community life and is especially active in welfare and health questions. They are arranging to have a travelling dentist and dental clinics for the various districts, including Trout Creek, Peach Orchard, Summerland and Hospital Hill.

Picturesque Situation

Summerland has an unusually picturesque environment, the contour of the land being so varied as to be difficult of description. The main mountain ranges have an elevation of about 6,000 feet, and in the centre of the district rises the peak "Giant's Head," a clear and distinct contour of a man's head, about 200 feet long, is carved in the rock. This grim old monster stands guard over the valleys below. North of Giant's Head is West Summerland, a broad, flat plateau about 500 feet higher than Summerland, and the natural hub of a series of remarkable valleys, each with distinct characters. At Trout Creek Valley is the old Garretts estate, where the first settlers came about 40 years ago. It adjoined the 4,000-acre ranch of Mr. Barclay of Ashcroft, the whole now being a part of the Summerland district, and divided into orchard and farming tracts.

The Summerland Review

Established August, 1908

Published at Summerland, B.C., every Friday by THE REVIEW PUBLISHING COMPANY, LIMITED
Ralph E. White, Editor and Manager

An independent family newspaper covering Peachland, Summerland and Naramata and adjacent districts.

Subscription Rates—In British Empire, in advance, \$2.00 per year; six months, \$1.25. To U.S.A. and other countries, \$2.50 per year.

Advertising Rate Cards and information respecting territory and samples of paper mailed upon request, or may be seen at the office of any advertising agency recognized by the Canadian Press Association.

Advertisers must have copy in by Wednesday noon in order to insure changes for standing advertisements. New display advertising copy can be accepted one day later.

Correspondence—Letters addressed to the Editor and intended for publication must be short and legibly written on one side of the paper only. The longer an article, the shorter its chance of insertion. All communications must bear the name of the writer, not necessarily for publication. The publication or rejection of articles is a matter entirely in the discretion of the Editor. No responsibility is assumed by the paper for the opinions expressed by correspondents.

FRIDAY, AUGUST 13, 1920

A WHITE CANADA

Under the above caption the editor of "Farm and Home" in a series of articles deals with the Oriental question. The following article appeared in a recent issue:

It is a fact that this summer white girls have been employed by Orientals in the berry districts of this coast.

It is a fact that Orientals are today taking crops off British Columbia land which was cleared by Canadian soldiers who died in Flanders.

It is a fact that the potato industry of British Columbia is controlled by Chinese. The Oriental is making steady progress towards controlling the basic industry of the province. He monopolizes the vegetable garden business adjoining the big cities. He controls large celery and fruit garden plantations in the irrigated belt. He is a grower of onions and of beans and tomatoes. He is growing wealthy and with his wealth he is helping his brother Orientals to get a footing.

They are co-operators, these Orientals. In clearing land, in hoeing corn, in planting cabbage they like to work in bands. Ten men working on the garden today make big headway. Next day they move to the ground of another, and the bunch, working as a single man, accomplish work which would discourage an individual.

They produce co-operatively and market co-operatively. They have a great respect for the value of time. They use it with the same caution as they do the precious water with which they irrigate their \$1,000-an-acre crops.

There is a cook at a ranch house up in the Chilcotin country. There is also a white man who manages the ranch. The white homesteaded 160 acres near the place where he was employed. When he got from the government the title to the land, he did not work it, but held it for a year or two—and then sold it to the Chinese cook. The Chinese cook is today taking off a fortune in potatoes from this homestead which was given by a benevolent government to a white Canadian free of any cost—given him to establish him and his children and heirs as independent owners of land and free citizens.

In California the Oriental situation is becoming more serious every day. Slowly the Japanese are taking charge of the agricultural industry. In certain districts where American farmers in other days lived and brought up splendid families, today the brown-skinned sons of Nippon control the land.

British Columbia is vitally interested in the Oriental question. This province, like California in so many respects, is the favored landing place of the Oriental.

In these days of remaking of government and of reorganization and reconstruction, the question should be settled for all time to come whether or not this is to be white Canada.

SPECULATION IN APPLES STOPPED

(Continued from Page 1)

buyers. Medium crop of the balance of other fruits except pears—pears a good crop. Late pears have been scarce on the market for some years and the size of the B.C. crop should not make any difference to the prices ruling as they will likely be in insufficient volume to meet the demand. The same applies to peaches and apricots. Washington is quoting 90c per suit case 16 lb. box, and \$1.40 for 4 basket crate for prunes, with prices expected to rise.

B.C. prunes at \$1.25 for 18 lbs. are a little cheaper than these.

Calgary Market

Business has been fair this week and prices are steady, excepting potatoes. The volume of cherry shipments has been large and good prices have held; sour cherries are not much in demand and quoted prices f.o.b. shipping point vary—Kelowna quotes \$1.75, Vernon \$2.25. There is about the same difference in their quotations on sweet cherries. The retail price is uniform here, so the difference in quotations appears only to interfere with the brokers. Currants in uniform packages are in demand. The market is well supplied with California Bartlett pears and Elberta peaches as well as Tragedy plums from Washington. B.C. cots have made an appearance; so far only the small early variety has arrived. There is no inclination noticed amongst buyers to buy in advance of the market needs.

Washington advices show that an advance in price on prunes and peaches is expected.

The vegetable movement from B.C. is heavy. From now on, cauliflower, cabbage, beet, turnips and potatoes will be in competition with local stuff. B.C. potatoes are scarce. The jobbers who buy car lots have much lower quotations before their roller arrives. It looks from present quotations that new spuds had reached the bottom for a few weeks.

ONE WAY OF HELPING YOUR PAPER OUT.

Writing recently on the subject of delayed copy and the handicap thus placed upon the publishers of a weekly paper, the editor of the Kelowna Courier writes as below. The Courier's situation is exactly that in which The Review has too often been placed, the only difference being that the Courier is published one day earlier:

It is becoming exceedingly difficult to publish the "Courier" on time, owing to the lack of co-operation by advertisers and contributors in forwarding copy to us in sufficient time. We are overwhelmed every Wednesday with material which we should have had on Monday or Tuesday, and work into the early hours of Thursday morning has been entailed for weeks past. It is not generally realized that, as soon as one issue of a weekly paper is disposed of, work should be commenced on the next, and the tendency has been to treat the "Courier" like a daily with a large editorial force and a battery of linotypes at its command, capable of writing all the matter and setting all the type in the paper in one day. The actuality is that the burden of reporting meetings, transcribing the notes, securing general news, correcting proofs, preparing copy generally, and a large share of the business management, falls on the shoulders of one man, and the setting of the type on one machine and one operator, and this large volume of work must be done gradually through the week if severe mental and physical strain is to be avoided.

It is not as though one individual or firm asks indulgence with late material; some weeks the bulk of the matter is crowded in upon us on Wednesday. Each thinks he is the only one to request a favor, but it is

otherwise. If our friends would make a special effort to place all advertising copy in our hands by Tuesday noon and all contributed matter immediately after the event related and by Wednesday noon at latest, they would materially assist in the production of the paper, and would relieve the staff of much unnecessary hard work and unseasonable hours.

"KILLING THE GOOSE"

The surest way to kill production is to starve the producer. Vancouver quotations on the former "king spud" have reached \$45.00 per ton, with potatoes not three-quarters matured. The price of seed was about \$7.00 per 100 lbs.; labor is higher than ever, so are sacks. Under present conditions we figure that potatoes at digging time at a price lower than \$40 per ton, will not return the grower the cost of production. We would advise our growers to stop digging and allow the tubers to mature. Vancouver growers need to be organized and some method of arriving at produce values arranged so that their competition may be directed against outside competitors and not against each other. It is said that 90 per cent. of the growers are Orientals—we should make it 100 per cent. or cure the trouble.

Even at present low prices, one of our jobbers is busy advising customers not to buy as lower prices are due this week-end. We hope he is misinformed.

Talking Sheep

VANCOUVER, B.C.—As a result of the Board of Trade's tour through the Columbia Valley, they were so impressed with the livestock possibility that members of the party will hold a meeting to consider the advisability of forming a company to purchase sufficient acreage in the valley to accommodate an initial flock of 3,000 sheep and meet requirements of future increase in the stock.

SUMMERLAND SCHOOL BOARD

TENDERS FOR SCHOOL CONVEYANCE

Tenders will be received by the undersigned up to noon, Monday, August 16th, for the conveyance of school children by motor on Route 2, from Agur's boat house via Shaughnessy Ave. to Peach Orchard and thence to Central School. Afternoon trip returning via Hospital Hill to Elliott's corner, Shaughnessy Ave.

Tenders to state price per single trip.

All vans to be covered, and of sufficient capacity to accommodate the number of children on the respective routes.

Contractors to provide rugs in cold weather.

J. H. BOWERING,
Secretary, School Board.

The Enigmas

Owing to the successful and highly appreciated Performance and Dance given by the Enigma Company on Thursday evening, the management have decided to repeat the

As there will be no Apple Show this year, this is the chance to exhibit

your best in

FRUIT, FLOWERS, FANCY WORK AND HOME COOKING

The Exhibition will be held in

MEN'S CLUB BLDG.

Place your Entries early with Miss Cartwright or Mrs. J. Tait. Baby Clinic Entries to be given to Mrs. F. W. Andrew. Entries will close on Tuesday. Age limit. two years. All entries free.

Open from 2 p m. until 6:30 p.m.

Afternoon Tea

Boy Scout Column

1st. SUMMERLAND TROOP B. P. SCOUTS

Headquarters, Ellison Hall

Scoutmaster O. F. Zimmerman

Meets every Friday evening at 7.30 p.m.

The water was certainly in fine condition Friday for swimming—clear and calm—so the Scouts who tried for the Swimmers' Badge had everything in their favor. All five took the water simultaneously and after swimming 50 yards with shirt, pants and stockings on, began the arduous task of undressing in the water. Gordon Blewett soon managed to wriggle out of his, then Jack Harris. Clyde Caldwell had a little trouble and also Ralph Purvis. Ralph for quite a time could not undo a patent fastener on the belt, while Clyde's clothes insisted on sinking to the bottom. Nicholas Solly, one of our newest boys, had the misfortune to be wearing a rather tight blouse which refused to budge in spite of great efforts. When the blouse was exchanged for a shirt and the test retaken he was out in a flash. Mac Lacoec successfully completed his swimming for the First Class Test. After the tests the whole troop went in for a splash, following which roll call was taken and discussion led regarding the proposed raid. The boys were unanimous in deciding that one be held, so the town boys under Gordon Blewett will be guards. The object of the game is as follows: Each raider will wear a red neckerchief and his part is to deliver this into the hands of the S.M. at the bandstand BEFORE 8 o'clock. When any raider is caught by a guard the neckerchief must be handed over by the captive. Thus the side handing in most neckerchiefs is decided the winner. After the game the troop will parade to the government wharf for a swim.

Ronald White has successfully completed his tests for Printer's and Photographer's Badges.

Next Friday the inauguration of the new boys will be held, when all recruits who have successfully completed their tenderfoot work will take the oath and be enrolled as Scouts. The address will be delivered by our President and Chaplain, Rev. Mr. Solly, and we would like to have as many parents and those interested present as possible.

Some good tips for Cyclists are given in a handbook entitled "Things All Scouts Should Know," and for the benefit of our bicycle owners we quote a few:

- (1) A Good Puncture Tip
If by chance you get a puncture whilst cycling, and have no glass paper with which to clean the tube and patch, you will find a match a good substitute. Simply rub the head of the match over the rubber you wish to clean, and all the dirt will be removed.
- (2) To Prevent Punctures
Before starting on a journey fasten a piece of twine around the stays of the mudguards about a quarter of an inch from the tire. When a thorn or tack is picked up it is caught by this barrier of string and thrown out before it has time to do any damage.
- (3) A Useful Tip
If a patch is stuck over a long slit in an inner tube in the ordinary way, the hole will possibly lengthen and great annoyance be caused. If, however, a small circular hole be made at each end of the slit, before the patch is applied, further splitting will be prevented.
- (4) To Revive Rubber
Those who use English valves on their tires will find the following of interest: When a cyclist on a long journey and far from anywhere discovers that his valve rubber has perished and suddenly failed letting all the air out of the inner tube, to renovate the perished valve tube, run it once or twice through the flame of a match, taking care not to make it too hot and so blister it. The result is amazing: your tube will be practically as good as new. A similar tip applies to inner tubes which have become porous, only in THIS CASE place the tube in water just off the boil and allow it to remain until the water has cooled.

The troop wishes to acknowledge with thanks the donation of \$8 from Mr. G. R. Hookham.

Butter to U.S.A.

REGINA, Sask.—Large shipments of butter have recently been made through Moose Jaw merchants to the Chicago market, and a new and profitable outlet for the ever-increasing dairy products of the province is believed to have been opened.

Coming Events

Notices under this heading are inserted at 2 cents a word. Minimum charge 25 cents. Each repeat 1 cent a word, minimum charge 10 cents. Contract rates on application.

BIRTH.

DICKINSON—At the Summerland Hospital on Friday, August 6th, 1920, to the wife of Frank Dickinson, a son.

ARMSTRONG—At Summerland Hospital on Thursday, August 12th, 1920, to the wife of Wm. Armstrong, a son.

TO HAVE STABILIZERS

Gyroscopic stabilizers, a contrivance to keep vessels on an even keel during rough weather, will be installed in the two \$4,000,000 twenty-three knot passenger boats which are to be built by the Pacific Steamship company for operation between Los Angeles, San Francisco, Victoria and Seattle. The plans and specifications have been drawn up and the boats will be in operation within eighteen months, it is said.

The two steamers will be electrically driven, will accommodate 590 passengers, and will make the trip from California to Seattle in 36 hours, a run that now requires 50 to 60 hours.

Passing Events: Social, Personal, &c.

Mrs. Harold English is enjoying a holiday visit to the Coast and Vancouver Island.

Mr. B. L. Hatfield is back from a holiday visit to the Coast and Vancouver Island.

Jos. Darke went down to New Westminster Wednesday morning to spend a short vacation with relatives.

The C.P.R. working crew with a train of five cars have been here all week making repairs to the C.P.R. wharf property.

Mr. and Mrs. Wm. Stevens of Armstrong have been visitors to Summerland this week, being present at their son's marriage to Miss Conway.

Mrs. Charles, who with her little son has been visiting with her parents, Mr. and Mrs. Walter, of Peach Orchard, has returned to her home in Castor, Alta.

Mr. E. S. Hopkins, the newly appointed chief of the division of husbandry in the Dominion Department of Agriculture, was a visitor to the Experimental Station on Monday.

One of the most important real estate transfers that has occurred here in some weeks is the sale of the Hespeler property to G. L. Sautler of Winnipeg. Mr. and Mrs. Sautler and their son have been in the Valley for some weeks and will take possession of their new holding next Friday. Mr. and Mrs. Hespeler will leave shortly after to make their home in Vancouver.

While here on Tuesday W. Gardiner, of Vancouver, architect for the Canadian Bank of Commerce, gave H. W. Harvey the contract for the erection of the proposed new bank office building. The new building will be on the corner immediately west of the temporary building now occupied by the Canadian Bank of Commerce and will be 40x24 feet. In addition to the usual office accommodations, there will be a good-sized sitting room on the main floor for the staff, and bed rooms on the floor above. The building will be of frame structure, of neat design, following the general plans of such buildings erected in other towns by the Canadian Bank of Commerce. Mr. Harvey will commence work on the new building at the earliest possible moment and he hopes to have it finished within three months.

SCIENTIFIC FARMING COURSE IS OFF

Recent developments make it seem doubtful if the course in agricultural science will be taken up in the Summerland High School during the next school year. The school board felt quite confident that arrangements would be satisfactorily concluded and in fact have been notified that the instructor had been appointed. In a letter to the board this week, J. W. Gibson, director of elementary agricultural education, reported that the Pentiction school board had advised him that they could not secure suitable rooms for the agricultural course and that the work will have to be postponed until such time as they have a new school built. It was Mr. Gibson's intention to have the instructor divide his time between Summerland and Pentiction. Under the circumstances, Mr. Gibson said, it is not likely that the work can be started here short of one year from this September. Mr. Robinson, who has been selected as instructor, has been transferred to Vernon.

There will be general disappointment that the failure of Pentiction to make provision for this course is also preventing Summerland from taking advantage of the liberal offer of the Canadian Government for free courses in scientific agriculture and horticulture. In reference to this Secretary Bowring made the remark that with the Dominion Experimental Station here he could see no reason why some arrangement could not be made whereby a qualified man could be secured to give half his time to the school work and the other half to work on the Experimental Station, as he felt sure that Supt. Helmer could make use of such a man.

Mrs. T. B. Young and child returned Wednesday morning from a visit to Victoria.

Mrs. M. M. Robinson went down to the Coast on Sunday morning's train to visit with relatives.

Mr. and Mrs. Thomas, of Letlaw, Alta., were guests at the home of Mr. and Mrs. J. T. Washington last weekend.

L. Girdler of the water department of the city of Calgary is spending his vacation here with his friend, A. W. E. Fawkes.

Principal MacDonald of the Central school returned Sunday morning from Victoria, where he has been taking a special course in rural science.

Mr. and Mrs. T. S. Thomas of Retlaw, Alberta, were recent visitors with Mr. and Mrs. Gorrill of Peach Orchard. Their daughter, Miss Thomas, assisted in fruit packing here last season.

A baby clinic will be a feature of the Fruit and Flower Show which will be held next week under the auspices of the Women's Institutes. Further particulars of the event are given in our advertising columns.

D. H. McIntosh has gone to Tranquille Sanatorium for treatment. He was accompanied by his brother and sister, who will remain in Kamloops for a time. Friends here have been advised that he stood the journey well.

His many Summerland friends will be interested in learning that Ed. Sawyer, a former Summerland boy and for several years a resident of Honolulu, is now wireless operator on a U.S. Shipping Board ship and is away on a three months' cruise in the Orient.

A convention of the Labor Party to nominate a candidate for the Yale election will be held in Empire Hall on Thursday evening, August 19th. Summerland Local will meet at 8:30 to arrange necessary details and the convention will be called to order on arrival of the boat from the north.

Mr. J. C. Robson, of the Rossland public schools, returned Tuesday from Victoria, where he has been taking a special course in rural science. After school closed Mr. and Mrs. Robson motored over from Robson and after a few days here he left for Victoria, making the journey both ways by motor. Mr. and Mrs. Robson are guests of their daughter, Mrs. E. R. Butler.

MANY FIRES IN VALLEY FORESTS

For some days heavy clouds of smoke have told of forest fires in this section of the Valley. For about three weeks there has been a fire raging through the brush-growth in the vicinity of Vassaux Lake between the main Okanagan Valley road and what is known as Myers Flat road. Southerly winds have had at times brought great volumes of smoke up the Valley from this fire, which is said to have been started by lightning.

Another fire of similar origin has been burning for some days between the northern end of the lake in the vicinity of Armstrong.

On Sunday morning Councillor Johnston and two of the municipal employees went up to the head of Trout Creek, where the men were given instructions by Councillor Johnston to open up beaver dams and channels to turn more water into the main reservoir. Councillor Johnston returned the next day but not a moment too soon, as he said the trail was skirred by fire for some distance when he came out. He left the two men there to remain until Thursday morning of this week. It is not thought that this Trout Creek fire will do much damage beyond burning up some firewood, and may really do good by consuming much fallen timber.

Mr. and Mrs. J. Rowley left Sunday morning for a brief vacation trip to the Coast.

Mr. W. W. McGill of Vancouver was the guest over the week-end of Mr. and Mrs. H. H. Elsey.

O. Vaughan is leaving Sunday morning for Victoria, where he will spend most of his vacation.

Miss James of the Hospital nursing staff left on Wednesday morning's train for Vancouver on a short vacation visit.

Mrs. Wm. Avery and her daughter, Miss Dorothy, of Winnipeg, are the guests of Mrs. Avery's sister, Mrs. H. H. Elsey.

Supt. Helmer, of the Dominion Experimental Station, recently returned by way of the Kootenay from attending the Western Irrigation Convention held at Lethbridge, Alta.

Mrs. Drake and her daughter, Miss Janet, former residents of Summerland, arrived here Sunday morning on the K.V.R. train from the Coast. They are the guests of Mr. and Mrs. George Graham.

On Tuesday of this week, Doris, the young daughter of Mr. and Mrs. G. E. Silk, passed away after a brief but serious illness at Pentiction. Interment was made at Peach Orchard Cemetery, Summerland, on Wednesday, August 11th.

Rev. H. S. Bagnall, recently of Medicine Hat, a Baptist minister who had quite a few acquaintances in Summerland, was killed near Lethbridge on Wednesday when his car overturned, pinning him underneath. He was dead when found.

George Ross, of the C.P.R. Winnipeg offices, is here this week combining business with the pleasure of a brief visit to his wife and mother. After a business tour of the province he is likely to spend much of the remainder of the fruit shipping season in the Valley in the interests of the railway company.

WEDDINGS.

STEVENS-CONWAY

On Wednesday evening at the home of the bride's mother, Mrs. S. J. Conway, was solemnized the marriage of her youngest daughter, Miss Myrtle Marguerite, to Mr. Halford William Stevens, youngest son of Mr. and Mrs. William Stevens of Armstrong.

At the appointed hour, 8 o'clock, the couple, unattended, took their places under a bell of sweet peas and asparagus fern to the strains of Mendelssohn's Wedding March played by Miss Ida Shields, niece of the bride. The bride was given away by her brother, Mr. J. H. Conway. Rev. H. E. Livingstone, pastor of the Methodist church, performed the ceremony, at the close of which congratulations were extended.

The bride carried a bouquet of roses, carnations and maiden hair fern and wore a travelling suit of navy blue French serge with georgette blouse trimmed with hand-made lace, and a large picture hat of black tulle trimmed with pink roses and ostrich sprays.

The groom's gift to the bride was a ring of emeralds and diamonds and to Miss Shields a pretty pearl ring.

The wedding gifts, which were very numerous, included a lovely cabinet of silver from the groom's sister and a substantial cheque from his fellow employees.

Following the serving of a buffet supper the happy couple left for Pentiction, from which place they took train on route to Rossland, where Mr. Stevens is engaged as Government engineer on highway work.

Mr. Stevens is a comparative stranger here, but Mrs. Stevens has been a resident of Summerland ever since the early days in the development of the community. Popular among the young people, she will be greatly missed from their midst.

The RIALTO

Unless otherwise announced, performance will begin promptly at 8 o'clock, standard time

A PROGRAM OF SELECT PICTURES

SATURDAY, August 14th—

No Thursday Performances Until Further Notice

This means dollars to you, Mr. Merchant

READ IT—

NEWSPAPERS would be much less than they are if they contained no enjoyable, instructive and valuable advertisements. Many persons read the advertisements quite as thoroughly as they read the news matter. This is just as it should be.

The more advertising, the more buying. The more buying, the greater the consumption of the goods or service advertised.

More business could be done by the merchants of Summerland if they advertised more, and if more of them advertised. Much business goes to the big city mail-order houses because they advertise. These houses would cease to draw business from this community if they ceased to advertise.

To the Merchants of Summerland

Advertise more, and more of you advertise, and the big mail-order houses will get less and less business from this community.

Advertisement Reading is worth while

Naramata News

Current Events of Town and District

Dr. Andrew paid us a business visit on Thursday.

About 30 of our young people attended the excursion and dance in Peachland on Thursday night. The Skookum was the excursion boat and a large crowd went from Summerland and others were picked up at Chute Creek and Paradise Ranch. It was nearly daylight when the party reached home, but all had a fine time.

Mr. Fred Mathers of Vancouver stopped over on his way east to visit friends.

Miss E. Leeson of Vancouver is the guest of the Misses Robinson.

Mrs. Arnold and children of Ottawa and Mrs. Johnson of Vancouver are visiting at the home of Mrs. M. B. Smith.

Mr. and Mrs. J. Dean and son of Vancouver are the guests of Mr. and Mrs. George Wolstencroft.

Mr. Fred Newyens, who has been employed by the Fruit Union for the past two seasons, soon returns to Belgium.

Mr. and Mrs. Joe Lyons left on Monday morning for an extensive trip to the Thousand Islands and to other points in the East. They expect to return in time for the apple crop.

Mr. John Noyes is here for a time to visit his family and old friends.

Mrs. Noyes is in Kelowna.

A most delightful social function was held at the home of Mr. and Mrs. J. M. Robinson on Saturday night. The occasion was the birthday of their daughter, Marguerite. There were a number of friends from Pentiction and Summerland as well as a large delegation from here. There was a big bonfire on the beach to start with and plenty of music in which everyone joined. Afterwards the guests repaired to the dining-room for dancing and refreshments. It was an ideal evening for this kind of enjoyment and all declared it was one of the best times of the season.

Mrs. R. C. Robinson pleasantly entertained a few friends on Wednesday evening in honor of Mr. Edward Logie, Miss Grace Logie, Miss Dayenport and Miss and Mr. Kelsberg. The evening was spent with music and dancing and dainty refreshments were served. Mr. Logie, Miss Dayenport and Mr. and Miss Kelsberg are returning to the Coast this week.

Miss Connie Lee celebrated her 15th birthday on last Wednesday night. Fifteen guests were invited and a fine birthday supper served.

Mr. Will Angove has joined the Fruit Union forces and will be here for the rest of the season.

Friends of Mrs. A. L. Gillespie will be glad to learn that she will arrive here from Battle Creek, Mich., about the 24th of this month.

TO PREVENT EGG-EATING

Hens usually learn the egg-eating habit because the nests are poorly built or improperly filled with litter. This causes the eggs to break when they are laid, and it is a slow hen that does not soon find that eggs are fine to eat. The best nests are slightly darkened by being covered in front and on top. The birds enter on a track at the rear. Then if an egg is broken the bird will not find it. Watch the litter in the nests and if it is scratched out, replace it at once. Pack the litter firmly in the corner of the nests and keep the middle smooth, but well upholstered with hay or straw. Few eggs will be broken in such a nest.

Sometimes eggs are broken by two or more hens crowding on the same nest. Make the nests just large enough for one hen, but not large enough for two. If an egg falls on the floor and is broken the hen will eat it eagerly. This does not signify they are egg-eaters that need execution. It is only the hen that is seen to break the egg with her bill and then eat it that needs to be condemned. When feeding egg shells to hens we always break them up and believe that the hen does not connect up the broken bits of shells with the shell of a whole egg. By that method of feeding the egg shells we believe there is no danger of the hens contracting the egg-eating habit. If a hen does break and eat eggs she should be marked rather than allowed to teach other hens the habit. A valuable hen might be isolated and given an egg shell filled with mustard or red pepper. One experience with such a dose is said to have cured some egg-eating hens of the habit. The best method is to furnish plenty of good rations and range and build the nests right. Then the habit seldom appears in the flock.

HOW MANY APPLES SHOULD GO TO BOX

Minimum Sizes Recommended for Principal Varieties

Mr. C. W. Baxter, Dominion Fruit Commissioner, has issued the following useful statement in regard to determining the grade and size of the best-known varieties of apples:

In order to obtain the maximum of uniformity in regard to the size of apples packed in boxes, the following are recommended as being the minimum sizes for the various varieties and grades, as provided in Section 321 of the Inspection and Sale Act, Part IX. These minimum sizes will be used by the Dominion Fruit Inspectors.

No. 1 Grade

321 (2). No person shall sell, or offer, or expose or have in his possession for sale, any fruit packed in a closed package upon which package is marked "No. 1" unless such fruit includes NO CULLS and consists of WELL GROWN specimens of one variety, sound, of not less than medium size and of GOOD COLOR for the variety, of NORMAL SHAPE and not less than 90 per cent. free from scab, wormholes, bruises and other defects, and properly packed.

Summer Varieties

Minimum size for No. 1: Astrachan Red, Astrachan Stripe, Astrachan White, Early Colton, Early Harvest, Livland Raspberry, Red June, Sweet Bough, Tetofsky, and Yellow Transparent, 200 each.

Fall and Winter Varieties

Aiken Red, 200; Alexander, 150; Apple of Commerce (Beach), 188; Arkansas Black, 175; Babbitt and Bailey Sweet, 188; Baldwin, 175; Baltimore Red (Ben Davis), 200; Baxter and Beittgeimer*, 163; Belle de Boskoop (Boskoop), Bellefeur and Ben Davis, 175; Ben Hur*, Benton County (Benton), Bethel and Bismark, 188; Black Twig, 175; Blenheim Orange, 188; Blue Pearmain, 175; Blush Pippin (Blush), 200; Bramley and Canada Baldwin, 175; Canada Red (Red Canada), 188; Cel-

lini, Chenango, Colvert, Colwell* and Copper Market, 175; Cox Orange, 200; Cranberry Pippin, 175; Delaware Red, 188; Delicious, Duchess, Fallwater, Fall Pippin, Fulton and Gano, 175; Geniton (Ralls), 200; Gilliflower (Black Gilliflower), 188; Gloria Mundi, 150; Golden Russet, 213; Grimes Golden, Haas and Holland, 188; Hubbardston and Hyde King, 175; Iowa Blush, Jeffries, Jersey Sweet and Jonathan, 188; Kaighn of Spitz (Kaighn) and Keswick, 188; King, 163; King David (David), 188; King of Tomkins (King), 163; Late Transparent*, 175; Longfield, 200; Maiden Blush, 188; Mann, 175; Milding (Milden) and Missouri, 188; Mother, 200; McIntosh Red, 175; Northern Spy, 163; N. W. Greening, 175; N. Y. Wine*, Okabena, Okanagan Seedling*, and Okanagan Spy, 188; Ontario, 163; Peter, 200; Pe-waukee, 163; Pomme Gris, 250; Pringle Seedling*, 188; Rambo and Rawle Jennette (Ralls), 200; R. C. Pippin (Monmouth), 175; Red Winter Pearmain (Red Winter), 188; Reinetto (Canada Reinetto) and Ribston Pippin, 175; Rivers Early (Rivers), 188; Romanite, 213; Rome Beauty, 175; Ruby, 188; Salome, 175; Scott Winter, 200; Seek No Further and Senator (Oliver), 188; Shackelford, 175; Snow, 200; Spitzenberg (Esopus), Stark, Winesap and St. Lawrence, 175; Stone, 188; Strawberry*, 200; Stump, 188; Sutton Beauty (Sutton), 175; Titus, 188; Tolman Sweet (Tolman), 200; Twenty Ounce, 138; Vandepool Red*, Candevere, 188; Wagner, 175; Wal-bridge, 200; Wealthy, White McMahon (McMahon) and White Pearmain, 175; Williams Early (Williams), Williams Sweet, 188; Winesap, 213; Winter Banana, 163; Winterstein*, 188; Winter St. Lawrence and Wismer's Dessert (Wismer), 175; Wolf River, 150; Yellow Newton and York Imperial, 175.

* Trade name.

No. 2 Grade

321 (3). No person shall sell, or offer, or expose or have in his possession for sale, any fruit packed in a closed package, upon which package is marked "No. 2" unless such fruit

includes NO CULLS and consists of specimens of not less than nearly medium size and SOME COLOR for variety, sound, and not less than 85 per cent. free from scab, wormholes, bruises and other defects, and properly packed.

SIZE: May be not less than two sizes smaller than the minimum requirements for the No. 1 Grade.

Domestic Grade

321 (4). No person shall sell, or offer, or expose or have in his possession for sale, any fruit packed in a closed package, upon which package is marked "Domestic" unless such fruit includes NO CULLS and consists of fruit of not less than medium size for the variety, sound, and not less than 85 per cent. free from wormholes (but may be slightly affected with scab and other minor defects), and properly packed.

SIZE: To be not less than the minimum requirements for the No. 1 Grade.

No. 3 Grade

321 (5). No person shall sell, or offer, or expose or have in his possession for sale, any fruit packed in a closed package, upon which package is marked "No. 3" unless such fruit includes NO CULLS and is properly packed.

Standard Apple Box

All apples packed in Canada, for sale in Canada, by the box, shall be packed in good strong boxes of seasoned wood, the inside dimensions of which shall be: length, 18 inches; width, 11 1/2 inches; depth, 10 1/2 inches; representing as nearly as possible 2,174 cubic inches.

C. E. BELL

PAINTING AND DECORATING

Work taken by contract or day.

Shaughnessy Avenue Summerland

Synopsis of Land Act Amendments

Minimum price of first-class land reduced to \$5 an acre; second-class to \$2.50 an acre.

Pre-emption now confined to surveyed lands only.

Records will be granted covering only land suitable for agricultural purposes and which is non-timber land.

Partnership pre-emptions abolished but parties of not more than four may arrange for adjacent pre-emptions with joint residence, but each making necessary improvements on respective claims.

Pre-emptors must occupy claims for five years and make improvements to value of \$10 per acre, including clearing and cultivation of at least 5 acres before receiving Crown Grant.

Where pre-emptor in occupation not less than 3 years, and has made proportionate improvements, he may, because of ill-health, or other cause, be granted intermediate certificate of improvement and transfer his claim.

Records without permanent residence may be issued, provided applicant makes improvements to extent of \$300 per annum and records same each year. Failure to make improvements or record same will operate as forfeiture. Title cannot be obtained in less than 5 years, and improvements of \$10 per acre, including 5 acres cleared and cultivated, and residence of at least 2 years are required.

Pre-emptor holding Crown grant may record another pre-emption, if he requires land in conjunction with his farm, without actual occupation, provided statutory improvements made and residence maintained on Crown granted land.

Unsurveyed areas, not exceeding 20 acres, may be leased as homestead title to be obtained after fulfilling residential and improvement conditions.

For grazing and industrial purposes areas exceeding 640 acres may be leased by one person or company. Mill, factory or industrial sites on timber land not exceeding 40 acres may be purchased; conditions include payment of stumpage.

Natural hay meadows inaccessible by existing roads may be purchased conditional upon construction of a

road to them. Rebate of one-half of cost of road, not exceeding half of purchase price, is made.

PRE-EMPTORS' FREE GRANTS ACT

The scope of this Act is enlarged to include all persons joining and serving with His Majesty's Forces. The time within which the heirs or devisees of a deceased pre-emptor may apply for title under this Act is extended from one year from the death of such person, as formerly, until one year after the conclusion of the present war. This privilege is also made retroactive.

No fees relating to pre-emptions are due or payable by soldiers on pre-emptions recorded after June 26, 1918. Taxes are remitted for 5 years.

Provision for return of moneys accrued, due and been paid since August 4, 1914, on account of payments, fees or taxes on soldiers' pre-emptions.

Interest on agreements to purchase town or city lots held by members of Allied Forces, or dependents, acquired direct or indirect, remitted from enlistment to March 31, 1920.

SUB-PURCHASERS OF CROWN LANDS

Provision made for issuance of Crown grants to sub-purchasers of Crown Lands, acquiring rights from purchasers who failed to complete purchase, involving forfeiture, on fulfillment of conditions of purchase, interest and taxes. Where sub-pur-

chasers do not claim whole or original parcel, purchase price due and taxes may be distributed proportionately over whole area. Applications must be made by May 1, 1920.

GRAZING

Grazing Act, 1919, for systematic development of livestock industry provides for grazing districts and range administration under Commissioner. Annual grazing permits issued based on numbers ranged; priority for established owners. Stock owners may form associations for range management. Free, or partially free, permits for settlers, campers or travellers, up to ten head.

TO LINK COAST WITH EASTERN B.C.

Construction of a Through Trunk Road Urged by Board of Trade

VANCOUVER—In an effort to further co-operation between Vancouver and the interior districts which they had recently visited, 27 members of the Board of Trade excursion to the interior last month met at the Hotel Vancouver on Friday night. Deeply impressed with the resources and scenic beauty of the country through which they passed, the Board of Trade men discussed for several hours ways and means of bringing about a proper appreciation of the potentialities of the province, not only by strangers to British Columbia but by residents of the province.

The meeting was called by Mr. Duncan M. MacDonald, who acted as chairman, and he, in explaining the reason for the gathering, said that it was essential that the members of the touring party should take the initiative in a movement of practical co-operation between the Coast and

eastern portion of British Columbia. There existed problems, particularly of transportation, which demanded every effort to solve.

Chairman MacDonald threw the meeting open for discussion after supper and a round table talk followed. It was decided that one of the greatest needs of the interior districts was a through trunk road from coast to mountain, and after full discussion of the subject the meeting recommended to the council of the board that it use its best endeavors to have work started on such a project without delay. It was suggested that the board communicate with the organizations throughout the districts interested, advising them of the action and urging that they endorse the proposal. On receipt of such endorsements it was recommended the board send a delegation to Victoria.

The members had been so impressed with the localities they visited that it was decided to write to the boards of trade advising them that the Board of Trade would be pleased to receive literature descriptive of the different towns and cities for distribution to visitors to Van-

couver. It was also suggested that the Provincial Government and the different boards be advised to supply the office of the agent-general in London with up-to-date information of the scenic attractions, industrial possibilities and natural resources of the various sections of the country.

At Nelson the visitors had been attracted by the excellence of the bagpipe band composed of small boys, and when it was suggested that the Vancouver Exhibition be asked to include this band in the musical programme of the annual fair the motion was unanimously endorsed. These little lads, who wear full Highland costumes, have been training for several years, and are considered to be one of the best boys' bands in the country.

It was decided that the meeting volunteer its services to President Chris. Spencer of the Associated Boards of Trade of British Columbia, as a committee of reception; and entertainment for the associated boards' convention to be held here next February.

Go slow and the other fellow may beat you to it.

ALL ROADS SHOULD BE SIGNBOARDED

In a recent article in the Scientific American, A. G. Vestal, a Chicago business man, whose experience during the summer-touring may be considered typical of the vast majority of motorists, discusses in an interesting way the important subject of highway marking.

In summing up his experiences Mr. Vestal says: "I must own that I feel more or less inclined to pass up the traditional classification of roads as 'good,' 'fair' and 'poor' and to re-group them according to whether the stranger can follow them with some idea of where he is and whither he is going, or whether he can only speculate on these points. In other words, there are marked roads and there are unmarked roads. Pursuing the matter further among the marked roads there are roads which are intelligently marked and there are roads which are marked continuously and roads that are marked but intermittently; there are roads on which the marks are maintained and roads on which they are not."

Rhode Island has sixteen motor vehicles for every mile of road.

Discuss Gasoline Situation

Representatives of the National Automobile Chamber of Commerce, the Society of Automobile Engineers, and the American Petroleum Institute met in conference in New York recently to discuss the gasoline situation. The reports of 50 per cent. gasoline this summer were condemned. All declared that there was no basis for such reports, and that they resulted in attempts at profiteering.

The oil men pointed out that the price of crude oil was the basis for the price of gasoline, and stated that they are now working on formulas which it is hoped will give greater power to gasoline.

"If the money we've spent on roads durin' the last twenty years had been spent as it should be, we wouldn't be in this fix. The trouble is with us, just us ourselves. We're too careless and easygoing'. We vote money but we're too blessed lazy to keep on the job and see that it is spent right."—Solomon Baker in "The Wisdom of Solomon."

Calcutta, India, has 6,587 motor vehicles.

CLIMBING THE CANADIAN ALPS

Where the Appetite is Always Keen.

Sections of the Alpine Club of Canada in all parts of the Dominion have received the anniversary message of the director, Arthur O. Wheeler, interprovincial boundary survey commissioner for B.C. There is much in this document of special interest to members of the club, but there is also a great deal which affects the general public, since it looks forward to a greatly increased tide of summer travel into the fastnesses of the great hills.

The director's message opens with comments on the prosperous standing of the club and the success of the camp at Yoho lake last summer. Thanks are also tendered to many who helped to make the camp successful. Mention is made of renewed photographic activities in the mountains and of the fact that the challenge cup for competition by amateur mountain photographers was won last summer by Dr. H. E. Bulyes of Edmonton.

With reference to the erection of a suitable memorial to the soldier members of the Alpine club, the director says: "It is decided to do this on two separate lines, first, to place a record of all our members on military service, and particularly those who have joined the supreme honor roll, on the club house grounds at Bank, and second, the erection of a hut above timber line at some serviceable place in the Canadian Rockies for the use of our members and possibly the public who are interested in making mountain climbs."

With reference to independent mountaineering during the past year mention is made of the first ascents of Mt. King George, and several other peaks of the Royal Group, lying in a hitherto unexplored district. Fifty miles southwest of Bank, Mt. Sir Douglas and Mt. Joffre were also climbed for the first time last summer.

Mount Assiniboine, Canadian Pacific Rockies.

the two weeks when they will be occupied by members of the Alpine club. At any time during the summer walking tours may be taken to Mount Assiniboine and these camps will be open to furnish good meals and a bed to the tramp at the end of his day's journey. There is only one way to really see the mountain and that is on foot, but so far this pleasure has been confined to the very few, on account of the difficulty of carrying food and bedding. These difficulties are now to be removed and it is planned in coming years to arrange many such walking and riding tours for the benefit of the public.

In conclusion the director quotes the verse of a gifted Calgary poetess, Miss Marian L. Moodie: Oh wind that comes out of the West, the land of the sunset skies, Where far o'er you mountain's crest walking tours may be taken to Mount Assiniboine and these camps will be open to furnish good meals and a bed to the tramp at the end of his day's journey. There is only one way to really see the mountain and that is on foot, but so far this pleasure has been confined to the very few, on account of the difficulty of carrying food and bedding. These difficulties are now to be removed and it is planned in coming years to arrange many such walking and riding tours for the benefit of the public.

Oh wind that comes out of the West, you sigh on your way to the plain. The mountain land is the best. Will you not come back again? Glow skies with your golden light, Blow softly wind from the hill. For my heart has a longing tonight, that only the mountains can fill.

TAKE YOUR TIRE TROUBLES TO THE SURGERY

If it is a blowout or bad cut we will build in a new section. If the tread is worn down we will build on a new tread—if the tire is worth it. If it isn't, we'll tell you so.

MORE EQUITABLE DISTRIBUTION

(Continued from Page 1)

the block between the Mercantile store and the barber shop, and of lots along the west side of Hastings Road, north from the Baptist church to Steuart's packing house, and from there west to the Sinclair property, were presented for approval by Jas. Ritchie. Mr. Ritchie, in making the survey, made provision for adding 10 feet to the width of both Granville and Hastings Roads. By motion the clerk was authorized to sign the plans.

Complaint from Mr. Ritchie of lack of domestic water pressure on College Hill brought forth reports from members of the council of standpipes along the main pipe line. The matter was referred to the water committee with power to change several lots west of Dale's corner from the pipe line to the ditch. These properties had formerly been served by fumes but have been on the pipe line for several years. The water committee was also instructed to make repairs to a lateral above the Dodwell property in Prairie Valley.

By motion of Counc. Kirk and White, the foreman was instructed to confine irrigation service to two days to each lot and that the water be apportioned in quantity, as near as may be, proportional to the area under cultivation. The motion further required that ditch men must report to the foreman any grower appropriating water without the sanction of the ditch man on his beat. Reports from the ditchmen under the resolution to be handed by the foreman to the clerk for reference to the council. Accounts as follows were approved for payment:

NOTICE OF PROPOSED WHARF CONSTRUCTION

TAKE NOTICE that under the "Act respecting the protection of Navigable Waters" we, the undersigned, intend to apply, thirty days prior to the Honorable the Minister of Public Works at Ottawa, for permission to build a pile bent and timber decked wharf in the Okanagan Lake at Summerland, B.C. The site and dimensions of the proposed wharf may be more particularly described as follows:

COMMENCING at the Southwest corner of Block twenty-eight "A" (28A) in the subdivision of District Lot Four hundred and fifty-five (455), Group One (1), Osoyoos Division of Yale District, as shown on Registered Plan Number One hundred and fifty-seven (157), Thence North Easterly along the West boundary of the said Block twenty-eight "A" (28A), a distance of sixty-three and two-tenths (63.2) feet more or less, to the North West corner of Lot ten (10) in the said Block twenty-eight "A" (28A), Thence South Easterly along the Southerly limit of the Summerland Fruit Union's Packing House a distance of thirty-six (36) feet, more or less, to the point of intersection of the said Southerly limit of the Summerland Fruit Union's Packing House with the Line of High Water, which point is the point of Commencement of the proposed new wharf.

Thence South fifty-five degrees forty-five minutes East (S55 deg. 45 min. E.) a distance of two hundred and seventy-five (275) feet along the North Side of the proposed new wharf to its North-East corner; thence South thirty-four degrees fifteen minutes West (S 34 deg. 15 min. W.) a distance of fifty (50) feet along the East side of the proposed new wharf to its South-East corner; thence North fifty-five degrees forty-five minutes West (N. 55 deg. 45 min. W.) a distance of two hundred and seventy-five (275) feet, more or less, along the South side of the proposed new wharf to a point on the Line of High Water; thence North Easterly along the Line of High Water a distance of fifty (50) feet, more or less, to the point of Commencement.

.. The Winding Trail ..

Those correspondents who protested against Sunday football shared the usual fate of people who venture to make public dissent against any proceeding which they honestly believe to be wrong. From a local source they have been rebuked for criticizing a football match played on a Sunday while the local telephone company is allowed to do repair work on that day without protest, a line of argument which seems to suggest that two blacks may make a white, and in reality strengthens the protest against laxity in these things. We all know that certain things have to be done on Sunday as matters of necessity, but we also know, to our great content, that that day is still regarded as a day of rest and that the mass of public opinion is, happily, against any unnecessary breaking away from that custom. Whether the work on the telephone system might as well have been done on Monday as Sunday, I do not know, but your correspondents can certainly claim that there was at any rate no necessity for the playing of a football match on that day.

The Kelowna Courier, in its very caustic editorial on the subject, says: "Where is the line to be drawn?" Well, that may be a question difficult to answer, but taking it in a general sense one might suggest that a more or less reliable line is indicated by such factors as custom, expediency and public opinion in general. This country follows British traditions in these matters, and it is NOT the general custom in the Old Country to devote Sunday to athletic sports. There is a vast difference between British and Continental observance of Sunday, and the fact that the Kelowna writer apparently prefers the latter has no bearing on the question. The Boy Scout organization, moreover, is an essentially British institution, and it is fair to ask whether there is anything in the Boy Scout Constitution which in any way suggests the playing of football matches on Sundays? To repeat the "Courier's" question, "Where is the line to be drawn?" may we expect to see Boy Scout athletics become a regular Sunday institution, to be followed up, in their logical sequence, by Sunday baseball by the local clubs? That may seem to be pushing the result too far, but where would the line be drawn? If it is broadminded, permissible, and so on, for Boy Scouts to take up Sunday sports, why not any other body of lads fond of outdoor games? According to the "Courier," they might as well do that as practice walking, "which is exercise, just as much as football or cricket," a conclusion which is as sapient as the same writer's dictum that "to attack Mr. Heneage is to attack Baden-Powell,"—and, in parenthesis, his branding of the word "methinks" as smug and Pharisaical, the fact being that it is merely archaic, and none the worse for that. Shakespeare puts it in the mouth of "Hamlet," and there was not much of the smug Pharisee about that personage.

On the whole this incident seems to have brought out opinions which have ranged between the two opposite ends of the matter, and the result will probably be that a little more thought will be given to the subject. It is extremely doubtful whether general opinion will support the views of the "Courier," since, on their own showing, they prove too much and would take us too far. Let us guard our Sundays—with reasonable discretion, but with reasonable vigilance also.

LAKE SHORE RIGHTS

Broken bottles and tin cans are natural affinities, and the note from the Penticton Herald concerning the former seems to follow more or less naturally from some remarks of mine lately concerning the indiscriminate disposal of the latter along some parts of the shores in this valley. The comment also reminds the public of a fact which is generally ignored, and that is private ownership of the beach facing many of the properties along the lake. Many people, of course, do not know that this is so, and look upon the lakeshore as public property, to be used without any restrictions. It is easy to sympathize with residents in a spot which is favored by excursionists, and no one could be surprised if they decided to enclose their land to ensure reasonable privacy. It may be only necessary to offer a reminder in order to check undue liberties—as to the strewing of broken bottles and tin cans, that should not need any reminder whatever. —AUTOLYCUS.
