

G. H. COWAN AND T. C. NORRIS ARE CONSERVATIVE SPEAKERS

Addressed Meeting in Summerland in Interests of Grote Stirling, Conservative Candidate—Say Tariff Is the Main Issue.

Two excellent speakers addressed a largely attended meeting in the interests of the Conservative candidate, Grote Stirling, on Tuesday evening in the Great War Veterans Association Hall. T. C. Norris delivered a forceful and lucid address and Geo. H. Cowan, former M.P. for Vancouver, spoke in characteristic style, with all the wit and oratorical ability associated with him as a political speaker.

United States and the present was a dark hour for Canada. But with adequate protection the future would nevertheless be very bright. He pictured the prosperous conditions of the United States with its high tariff wall where high wages prevailed and the obtaining of settlers from other countries was no problem at all.

ARE BATTLING FOR DAMASCUS

Druse Tribesmen Set Fire to Native Quarters of City

London, Oct. 22.—A despatch to the exchange telegraph from Bagdad reports that 300 persons were killed when the Druse tribesmen and Arabs burned the native quarter in Damascus.

SPENT EIGHT DAYS IN TRAP

Dog Rescued by Its Master After an Agonizing Experience

To have spent eight days and eight nights with his feet caught in a coyote trap at the side of a wagon road near Keremeos, was the experience of the valued hunting dog of Mr. Wm. LeLievre, well-known to Summerland and indeed, throughout the Okanagan as "Bill the Hunter."

FROZEN BODY IS DISCOVERED

Boy Frozen in Michigan Storm—Companion Is Unbalanced

Negaunee, Mich., Oct. 22.—The body of Walmo Maiki, 14, frozen in the snowstorm that swept this territory early in the week, has been brought back home. Walmo's body was found in the woods near here.

SHOOTING FRAY ON S.S. MELITA

Captain Killed and Engineer in a Critical Condition

Antwerp, Belgium, Oct. 22.—David Gilmore, assist chief engineer Canadian Pacific Melta, underwent an operation today for removal of the bullet which lodged behind his ear when he went to the aid of second engineer John Holliday, during the shooting affray on the liner yesterday in which Captain A. H. Clews was killed.

MORRIS CLAIMS TO HAVE ALIBI

To Be Defence in Coming Murder Trial at Victoria

Victoria, B.C., Oct. 22.—The defense of Charles Morris to the charge of murder preferred against him in the Assize Court here will be an alibi, according to Joseph Oliver his counsel, and friends of accused now on trail for his life before Mr. Justice Murphy and a trial jury here.

SEASON NOW CLOSED DOWN

No Hen Pheasants to Be Shot in Summerland District

Notification was received this week from the Provincial Game Warden that the open season provided for in the Game Regulations for hen pheasants, has been rescinded and consequently no hen pheasants may now be shot in this district.

KELOWNAITES PLAY AT GRASS HOCKEY

At Kelowna, Oct. 16.—For some time the Kelowna has been the scene of activities among a few enthusiasts of the popular English game of grass hockey, and in order to provide the Kelowna residents with competition as well as endeavor to organize the sport a meeting has been called for Monday October 19th at 8 p.m., in Sutherland & Toole's.

KELOWNA WATER IS FOUND TO BE PURE

Kelowna, Oct. 16.—A report upon samples of domestic water, taken at the City intake was received from Dr. W. H. Hill, director, Vancouver General Hospital Laboratories by the municipal council, and showed the water to be wholesome and fit for human consumption.

Names Nurseries AT OLIVER AFTER INDIAN DISTRICT

Capt. Pattison Is Calling His New Property "Kulu" Nurseries

Captain F. R. Pattison, former fruit grower in the Argentine Republic and South Africa, who recently purchased the Government nurseries at Oliver, has decided to call his new premises the Kulu Nurseries, after the fruit region in India. Mr. Pattison is a retired Indian Officer.

Gets Reward For Service To Bank

Ralph Purves, of Summerland who figured in the recent sensational bank hold-up at Vancouver has been awarded \$250 by the Bankers Association in recognition of his services to the bank on that occasion.

TWO YOUNG GIRLS SHOT

Accident Occurs at Summerland—Surgical Treatment Necessitated

The first serious accident in Summerland vicinity since the opening of the hunting season occurred on Sunday afternoon when two local young girls, Miss Naomi Kercher and Miss Helen Adams, received part of the charge from a shot gun aimed at a pheasant by a near-by hunter.

Review Will Print Extra on Elections

The Review is making arrangements to provide its readers with a special election day service.

AUTO BANDITS SECURED HAUL

Chicago, Oct. 22.—Two men in two high powered autos armed with shot-guns and rifled held up the Federal Reserve Bank messengers here and escaped with two pouches.

EVERY DIVISION NOW HAS A CUP

Lawson Cup for Junior Boys Completes List of Trophies

Kelowna, Oct. 22.—Fulfilling the ambitions of the organization, the Interior Basketball Association now has a trophy for each division to be competed for this winter for interior titles, by the generous response to their appeal, the final piece of silverware being offered on Tuesday by Jos. Ball, on behalf of Thos. Lawson and Co., of this city.

SEA-SERPENT FOUND TO BE HUGE, BUT HARMLESS, EEL

Victoria, Oct. 10.—The world-famous and much maligned sea serpent at least has been traced back to its lair and found to be a home-like domesticated creature, according to word received today by John P. Babcock, Deputy Commissioner of Fisheries, from the Queen Charlotte Islands, home of thousands of sea serpents.

HIGHWAY PLANS FOR NEXT YEAR WERE DEBATED

Similkameen Association Had Late Start Last Year

RESUME GIVEN OF ACTIVITIES

C. B. Armstrong of Nesbitt Is President of the Organization

Princeton, Oct. 16.—Satisfaction with the work accomplished after a late start this season and optimism in respect to the results that will follow another, was expressed at the annual meeting of the Similkameen, Nicola & Cariboo Highway Association held at the Adelphi Hotel, Merritt, on Sunday afternoon, according to the Princeton Star.

The following officers and members of the executive were present: Lorne S. Coleman, vice-president, and Thos. Daly, Keremeos; vice-president Marcus Baily and Messrs. Ogston, Richards, Jarvis, Sloan and Cummings, Ashcroft; secretary P. W. Gregory, A. D. Broomfield and J. A. Brown, Princeton; President G. B. Armstrong, Mayor F. Boyd, F. F. Gay and other members of the Merritt association.

President G. B. Armstrong gave a resume of the work accomplished by the association since its inception last June. Owing to the late start the work of compiling and printing advertising folders had to be rushed. A supply of these was available the first week in July and in company with A. D. Broomfield of Princeton he had left on a motor trip to Portland and up the coast to Vancouver, distributing the road guides as they went and spreading the gospel of the Great North Road. They had found the people to the south very courteous and anxious to secure information in respect to the highways on this side of the line. They had no difficulty in arranging for the distribution of their available supply, and while their trip was made too late in the season to secure much benefit this year, he was sure that the result of their efforts would be very evident next year.

Mr. P. W. Gregory presented a financial statement showing that the sum of \$399.00 had been contributed to the association fund as follows:

Merritt	\$398.00
Ashcroft	200.00
Princeton	303.00
Keremeos	98.00
Total	\$999.00

All accounts, with the exception of a small one for some photos, which had not been received, had been paid and there was a balance on hand of \$34.66. Following is a summary of the disbursements:

Map	\$ 70.00
Tracing cloth	2.75
Cut of Map	63.00
Other cuts	27.07
Printing	269.80
Various	29.94
Total	\$495.56
Erecting road signs	\$207.45
Expenses delegates, Armstrong and Broomfield	200.00
Sundries, including postage, stationery, printing, etc.	61.33
Balance on hand	34.66
Total	\$999.00

In discussing the plans for the future the suggestion was advanced that the road map should be altered to show loop routes such as Portland-Seattle-Wenatchee, and the Vancouver-Fraser Canyon highway when completed. The idea however, being abandoned, the general opinion being that it would be better to concentrate on "The Great North Road," the direct route from Portland to the Cariboo, the connecting highways to be described in the text but not shown distinctively on the route maps.

In the opinion of Mr. Ogston of Ashcroft the efforts of the association during the next six months could be devoted to the bringing of pressure to bear upon the government to have some much needed work done on certain portions of the highway on this side of the International Boundary line. His motion that the different associations co-operate with each other in bringing this pressure to bear in every direction possible, was well received and unanimously carried.

A motion to the effect that a salary be paid the secretary-treasurer met with a polite but firm refusal from Mr. Gregory, until such time, as he expressed it, that the association was on a stronger financial footing. The question was disposed of by Mr. Gregory's suggestion that the matter of an honorarium be left with the executive.

mitted at Vancouver the following evening.

NEW ANCHOR LINER "CALIDONIA" REACHED NEW YORK SUNDAY ON MAIDEN VOYAGE

The fifth of the Anchor Line's new steamers, the "Calidonia," arrived from Glasgow, Sunday, Oct. 11th on her maiden trip. She is a sister ship of the "Transylvania" which made her first voyage two weeks ago.

The new "Calidonia" is a vessel of 17,000 tons, 578 feet long, 70 feet broad and 49 feet deep. The propelling machinery consists of two sets double reduction geared turbines, driving twin screws and capable of maintaining a sea speed of 17 knots. The vessel is of the shelter deck type and was constructed under special survey to the rules of the British corporation and in accordance with the recommendations of the International Convention for the Safety of Life at Sea.

Spacious and well-fitted accommodations are provided for 279 first-class, 344 second class and 800 third class passengers. There are cabins de luxe with bathrooms attached and all first-class staterooms have beds instead of berths. The public rooms are done in a variety of styles and inspiration has been drawn from many sources.

The new "Calidonia" is the final vessel in the post-war building program of the Anchor Line so far as its Atlantic service is concerned. She was preceded only a few weeks ago by the "Transylvania."

COUGAR AND BEAR KILLED AT SICAMOUS

Vernon, Oct. 16.—Stories of good hunting come in from Sicamous. On Monday last week, Fred Hollett, chief engineer at the Sicamous Hotel power house, started off with a 22 calibre rifle. Going through the old town his dog treed a cougar. One well placed shot from the small rifle caused him to lose his hold and tumble to the ground dead.

Then George Lillabough, hunting at Mara Lake, about a mile from Sicamous, shot an immense black bear. Many of those who saw it declared it was the largest they had ever seen.

SYNOPSIS OF LAND ACT AMENDMENTS

PRE-EMPTIONS

Vacant, unreserved, surveyed Crown lands may be pre-empted by British subjects over 18 years of age, and by aliens on declaring intention to become British subjects, conditional upon residence, occupation, and improvement for agricultural purposes. Full information concerning regulations regarding pre-emption is given in Bulletin No. 1, Land Series, "How to Pre-empt Land," copies of which can be obtained free of charge by addressing the Department of Lands, Victoria, B.C., or to any Government Agent.

Records will be granted covering only land suitable for agricultural purposes, and which is not timberland, i.e., carrying over 5,000 board feet per acre west of the Coast Range and 8,000 feet per acre east of that Range.

Applications for pre-emption are to be addressed to the Land Commissioner of the Land Recording Division, in which the land applied for is situated, and are made on printed forms, copies of which can be obtained from the Land Commissioner. Pre-emption must be occupied for five years and improvements made to value of \$10 per acre, including clearing and cultivating at least five acres before a Crown Grant can be received.

PURCHASE

Applications are received for purchase of vacant and unreserved Crown lands, not being timberland, for agricultural purposes; minimum price of first-class (arable) land is \$5 per acre, and second-class (grazing) land \$2.50 per acre. Further information regarding purchase or lease of Crown lands is given in Bulletin No. 10, Land Series, "Purchase and Lease of Crown Lands."

HOMESITE LEASES

Unsurveyed areas, not exceeding 20 acres, may be leased as homesites, conditional upon a dwelling being erected in the first year, title being for one year. For more detailed information see the Bulletin "How to Pre-empt Land."

LEASES

For grazing and industrial purposes areas not exceeding 640 acres may be leased by one person or a company.

GRAZING

Under the Grazing Act the Province is divided into grazing districts and the range administered under a Grazing Commissioner. Annual grazing permits are issued based on numbers ranged, priority being given to established owners. Stock-owners may form associations for range management. Free, or partially free permits are available for settlers, campers and travellers, up to ten head.

Shall We Go Back to the Dark Days of the Meighen Regime in 1921?

Canadian Dollar was then as low as 84c
Unemployment and Bread Lines in many cities

The rapid revival of trade and industry has put a damper on Conservative election hopes. Even The Mail and Empire recently admitted that a "more hopeful feeling is now observable in Canadian trade circles." A stalwart Conservative told his friends at a party gathering that stocks were booming. The advance in industrial stocks has been enormous since 1921. The export trade of Canada has advanced from \$753,000,000 to \$1,081,361,643 in four years. In the same period the balance of trade in Canada's favor has increased by \$278,000,000.

Canadian Dollar Now at a Premium

The Canadian dollar, which sank as low as 84 cents in 1921, is now at a premium. Under the able administration of Sir Henry Thornton the National Railways has been unified. The business is growing; an operating deficit of \$11,543,577 has given place to an operating surplus of \$17,244,251.

Liberal Government Opens Up New Markets

But the energetic government now at the head of affairs in Canada is not standing still. Constantly on the lookout for new markets for Canadian products, it has negotiated trade agreements with Australia, the West Indies and other countries. It has made provision for scientific dealing with the tariff.

Dark Days of 1921

At such a time it is proposed that Canada, instead of going forward, shall go backward to the dark days of 1921, the stagnation and the incompetence and the helplessness of the Meighen regime.

Talk of unemployment! In 1921 the condition was so desperate that a French-Canadian member of Parliament moved a resolution that immigration be suspended. Another member, Mr. Proulx, spoke of unemployment in towns and cities, and said that he did not think there was a small town that was not afflicted thereby. Mr.

McQuarrie, a Conservative member from British Columbia, had visited Hamilton during the Easter holidays, and this was his report to the House of Commons:

"I was in Hamilton during the Easter holidays, and I heard there that a lot of the Hamilton factories were closing down, and that a great many men would be out of employment. Included in the institutions which are closing down, I think, is the International Harvester Company, a big concern which employs 3500 men. Now we have bread lines in nearly all the cities, and a great many men are out of employment who want work and cannot get it."

Mr. Hocken's Cure Was Hard Times

H. C. Hocken, M. P., now Conservative candidate in Toronto Centre West, said: "But the workingman can hardly expect to be employed in industries which are insolvent, nor can he expect the proprietor to run deeper into insolvency in order to give him employment."

"To my mind, that is mainly the reason why there has been so much unemployment in this country during the past few months. We had in Toronto, for instance, the Dominion Shipbuilding Company, that had some large contracts, taken at what they considered to be good prices, but it became insolvent, and the reason given for its insolvency was, not merely high wages, but the impossibility of getting the men to do a fair day's work."

What was Mr. Hocken's proposed remedy? He said nothing about increasing the tariff. His cure was hard times. "I have it from other sources, that in some of the trades the men during the last year refused to

give their employers the efficiency of which they are capable. That has to be corrected, and I think the only way it can be corrected is by such a period of depression as we are going through at the present time."

Sir Henry Drayton's "Swan Song"

Soon after this Sir Henry Drayton made his Budget speech. He also was mournful. He said that, according to the unrevised returns, our exports to the United States were \$560,683,798, and our imports from that country \$856,593,470, leaving an unfavorable trade balance of nearly \$296,000,000. Here it may be pointed out that under the capable administration of the Mackenzie King government the unfavorable balance of trade with the United States has been reduced from nearly \$296,000,000 to \$61,000,000. It has almost disappeared. Taking our whole trade with the outside world, there is now a balance in Canada's favor of \$284,429,106, as against an unfavorable balance of \$29,000,000 under Sir Henry Drayton.

In the face of the deplorable conditions of 1921, Sir Drayton and his colleague did nothing. They promised, in 1920, to revise the tariff. A commission was appointed for that purpose. It travelled over Canada at great expense to the country, collected a huge pile of evidence, and then the Government announced they would leave the tariff alone. No other remedy for unemployment and depression was applied, or even proposed. Toward the close of his Budget speech in 1921 Sir Henry Drayton almost broke into poetry. He said:

"Mr. Speaker, we in Canada have a great task before us. The world is sadly out of tune. May we help in restoring harmony. Trust and confidence are sadly lacking. Class interests are advanced with selfish insistence. Unemployment is with us. Faith in our fellow-men is weakened. Doubt of the future is often voiced. And what is the trouble? The sun still shines. The rivers still sparkle, our lands are as great and as fruitful as ever—our resources just as vast."

There you have it. Nothing about tariff revision. Nothing about cutting down imports, although they were \$440,000,000 more in 1920-21 than they are today. No, the only consolation offered to Canada in this hour of gloom was that the sun would continue to shine and the rivers to sparkle, and that we had fruitful lands and vast resources.

All very true and a reason why we should be grateful to Providence. But hardly a reason why we should again place in office a Minister of Finance whose only remedy for hard times was to watch the sun shine and the rivers sparkle.

The country longed to get rid of the incompetents, and in the general election of 1921 the Conservatives obtained only 50 supporters out of a total of 235. Now these incompetents come limping back, begging to be allowed to take the place of a Government that is fully alive to the needs of the country; a Government that has opened up important new markets for Canada's products; that has unified the National Railways, and made Canada proud of the system; that has made provision for scientific dealing with the tariff and for a vigorous immigration policy under a young and energetic chief—a chief trained to business.

Would Split Canada in Two

Mr. Meighen and his associates did nothing for Canada in 1921 and they have no constructive policy to offer now. Their tariff policy would split Canada in two. They are trying to win seats in Quebec by a wretched attempt to arouse jealousy against the west. Not a gleam of statesmanlike vision or broad patriotism lights up the muddy sky of ward politics. Those who failed in office have learned nothing in opposition. A vote for Mr. Meighen and his colleagues is a vote for sectionalism and stagnation in place of unity and progress. Far better to let Sir Henry Drayton watch the sun shine and the rivers sparkle in the care-free atmosphere of opposition; and let Mr. Meighen continue to nurse the gloom that may be an inheritance from his own unhappy reign.

Vote for Col. C. E. Edgett, D.S.O., and Canada's Progress

THE MEANDERINGS OF "MAC"

THE NOVEL MAN

Yesterday morning having nothing to do, I dropped in at Jenkins' office to see how he was getting along. His stenographer informed me that he was busy, but I had heard that before, and I like to see him when he is pondering over some case that has unusual points.

Jenkins is one of those brilliant young lawyers who, having married and settled down, take their work very seriously and I am sure if I did not drop in to see him three or four times a week, he would degenerate into one of those crusty old gentlemen who eventually become judges and pass state jokes.

"Hello, old man," I said, on entering his private domain. "How's the Supreme Court getting along today?"

"Good Lord—or morning," he answered. "Just a minute, I'm thinking."

I sat down on the edge of his desk and lit a cigarette. Between puffs I watched him alternately reading a large book and scribbling on a note pad. The frown which appeared on his face worried me quite a little I must admit, so at last I was forced to break the silence.

"Why the frown on your noble brow, Jenkins?"

"Nothing at all, old man, I merely wanted to get this business cleared up and there are a few points that are rather intricate. It is very important, but of course it can wait since you have arrived. By the way," he continued, "How did you make out in the golf championship?"

"Oh, fairly good," I replied. "Was rather off my form."

"Is that so," said he. "What's the matter, you don't seem to be taking much joy of life these days. Didn't see you at the Hospital Dance last night?"

"I wasn't there. The fact is that I am very worried at present. I have made up my mind to write a novel and although I have got most of my characters, I can't settle on the type of villain. It seems that in order to make a story really interesting nowadays it is necessary to have a villain out of the ordinary. My hero and heroine are of course right up to the standard but I must have a new type of man to make things awkward for the loving couple. Can you help me, Jenkins?"

"This was a real poser. I could see that at a glance. He was absolutely astonished at my request and could only stare at me."

"Of all the—" he gasped, and stared again. After a few moments he suddenly smiled and thumped his desk. He was so elated. "I've got it. A new type of villain. No one has ever used him before. Just take this down."

I pulled out my notebook and grabbed my pencil. One never knows when an unusual idea may occur and it is necessary to be prepared. No matter where I am, or what time of day it may be, I always stay right on the spot and record any incident which occurs and may be interesting to my friends. I once had quite an altercation with a policeman in the city because I stopped in the middle of the street. He was very abusive and said something about jays. I was very annoyed, because I forgot all about what I had stopped to write and I said to him—

"But I am straying from my story, so will return to Jenkins' great idea. "Now here is your character," said Jenkins when I was ready. "He is not a real wicked villain, only a fellow who is always blundering in at the wrong time. For instance, he will drop into a man's office, delay him when he is very busy, and perhaps hold up his work so that some valuable client gets angry and the business is ruined."

"Or he will arrive at a young lady's house just as she is going out for a drive with a young man, will foolishly accept her invitation to go along and make a third. Or he will butt in on a card game at the club and talk to one of the players and spoil the evening."

"Then again he will invariably visit some young people who are just enjoying their domestic battles and stay to dinner, oblivious to the frosty atmosphere of the hastily declared truce. "You get the idea, don't you? A man who is not morally bad but can't take a hint when it is thrown at him and thereby goes through life marring the happiness of all that come in contact with him."

I was feverishly making notes on this peculiar individual and motioned to Jenkins to continue, which he did. "Of course, you ought to have his description according to my conception, seeing that I invented him."

He was silent for awhile, frowning heavily and tapping his fingers on the desk. He glanced at me twice and then went on.

"He is a fellow about five feet nine; medium build; small black mustache. He has a cheerful countenance, you must put that in, as he thinks he is always cheering people up. Usually wears suits favoring the latest out, has rather small feet and hands for a man, and is generally very neat in his appearance."

I wrote this all down and was pleased to think that now I had my characters complete. I thanked Jenkins for his help and promised to send him an autographed copy of the book when published.

immaculate. The whole description of that man favors my own. I am afraid that Jenkins must have been impressed with my personality when he was describing that character, and must have thought he was describing the hero of my story. I can not use that villain under any circumstances.

Perhaps I had better drop in on Jenkins again tomorrow, and ask him if it wasn't the hero that he had in mind.

MAC NEW FORD GOES ACROSS CANADA

Passage across Canada has been made historical by the feat just accomplished with a Ford motor car, standard equipment, which arrived in Vancouver last Saturday.

It made the romantic journey, for the first time by any conveyance other than a railway, entirely on its own wheels. At 11 points on the journey, changes had to be made to flanged wheels, and the car travel as a special train over the Canadian Pacific Railway. Edward Flickinger, of Ford, Ontario, was at the wheel, or in the car, every mile of the way. The total mileage was 4793, and of this 835 miles was done on steel tracks.

In Vancouver, before the city hall, the car was welcomed by Mayor L. D. Taylor, who received from the driver a letter, sent by this means of special delivery, from J. B. Kenny, Mayor of Halifax, N.S.

After reaching the boundary of British Columbia, on this epoch-making trip, Mr. Flickinger was met by W. G. Patrick, branch manager of the Ford Motor Company of Canada, who acted as pilot to the Terminal City.

Mr. Patrick explained to those present to welcome the car that the trip was made to commemorate the 25th birthday of the establishment of the Ford industry in Canada. It was also fathered by the Ford people, to bring to the attention of the whole public the imperative need for an all-Canada highway from the Atlantic to the Pacific. Motion pictures, taken along the route, which are to be presented to the Dominion government for display in educational interests, will prove the worth of the proposition from a scenic standpoint; the economic feature is an admitted fact.

CODLING MOTH IS DYING HARD

Number of Infestations Increased to an Alarming Extent

The following article taken from the Chicago Packer gives a very good idea of what Growers south of the Border are up against in fighting Codling Moth. The Provincial Department of Agriculture has been fighting this pest in the Okanagan for over ten years, so that even today only small percentage of the total acreage is known to be infested. However, during the past three years the number of new infestations have increased to an alarming extent and it must be considered by every grower as a pest to be reckoned with.

The one best way to check the spread of Codling Moth is for every grower, whether he believes he has Codling Moth or not, to spray thoroughly for it each year. This will do more than anything else to prevent our orchards getting into the condition described in the following article:

Wenatchee, Wash., Oct. 2.—As an initial step towards perfecting an organization to combat the Codling Moth, the Chelan County Horticultural Council has recommended that \$15,000 additional be appropriated for pest control work and that this work be centralized under one head. Definite advice as to the eradication of the are advocated, in place of the voluntary spraying campaign recommended for the past year.

The plan of permitting the growers to set their own spray dates worked splendidly in about 85 per cent. of the district. But unfortunately there were orchards scattered about here and there that were never sprayed properly. It is at all times a result was a most disastrous worm infestation which destroyed the crop and spread to neighboring orchards. Many of these orchards were later sprayed by the Horticultural office, but not until the Moth had carried the infestation to other orchards, making their task that much more difficult.

Weather conditions also enhanced the difficulty of properly controlling the pest. At breeding time for the first brood a very warm day would be followed by a very cool one, thus delaying the hatch and extending the time that the worms came out of the cocoons.

A careful check showed that 48 days elapsed between the time that the first and last worms of the initial brood came out. The usual maximum time for this process all over the district is 25 days, so that the period of pupation was twice as great this year as usual.

To properly protect the fruit against those widely separated installments of worms, it was necessary to apply four distinct cover sprays for the first brood and these had to be timed exactly to secure maximum results. In four days just when one of those cover sprays should have been applied which aggravated the difficulty and made it almost impossible to do perfect work.

A few worms got by the first brood spray campaign, and these multiplied by many fold and came back by the thousands for the second brood. Unseasonably warm weather in early September fostered the third brood and these did the damage.

Duplication of effort is the worst fault charged against the present official Horticultural Organization by the council. Centralized action and authority is asked for, and full cooperation is promised by the council if the County authorities will employ one entomologist to take charge of pest control work and give him full authority to police the district and either compel proper spraying or to

the work under authority of the state granted by statute.

The worm loss in the district is estimated as high as 15 per cent of the total crop this year, which would mean about 2,500 cars, and as low as 6 per cent, which would mean slightly less than 1,000 cars. In addition to the loss in culls there is a very heavy loss in the reduction of grades caused by worm stung apples.

Estimating that there will be 1,000 cars of culls caused by worms, this means a direct loss of \$1,000,000 to the growers of the district. Conservative estimates place the loss to growers through reduction in grade of \$500,000 more.

The cost of spraying, including materials, is declared to be \$40 per acre on the average, or \$1,250,000. Added to this is the additional labor required for thinning out wormy or badly worm stung apples, and the extra cost of sorting made necessary by worm infection, which is placed at \$250,000 for the district.

This makes a total of \$3,000,000 which the Codling Moth has cost the apple industry of North Central Washington this year in labor, material and damage to the crop. The Horticultural Council calls attention to the fact that if successful eradication of the worms cost \$2,000,000, the industry would be ahead \$1,000,000 on the deal.

As a result of the agitation started along this line, many suggestions have been made as to new methods of eliminating the Codling Moth. State college and federal investigators have been experimenting with oil sprays which have killed the eggs of the Moth in many cases. High hopes are entertained by some of these investigators that oil mixed with arsenate of lead may prove the most effective insecticide ever devised. But when it

was used on some orchards this spring, it had a bad effect on the trees and caused the apples to drop off. Delicious were especially affected in this manner.

Deadly gases are also being experimented with. The success attained by the orange growers of California with gas applied inside of a tent which is placed over the trees leads to the belief that such a method of fumigating might solve the Codling Moth problem. It has also been suggested that a gas with sufficient specific gravity might prove efficacious, if released in an orchard. Many gases are available which will kill all animal life, without injuring vegetable life.

Up until July, this year was looked upon as free from worm infection. Then suddenly the second brood appeared in vast numbers, and even those orchardists who escaped worm infection, were unable to prevent worm stings. It is universally agreed that the best and most thorough spraying ever known was done this season. An average of between six and seven applications were made instead of an average of three and four which prevailed heretofore throughout the entire district, yet the worm loss will probably be as high or higher than ever before.

This leads to the conclusion that there is something wrong with the entire method of pest control, and a demand for a more effective insecticide. For 20 years the horticulturists

and entomologists have been studying the Codling Moth problem in this state and growers have been following the advice given, to a greater or less degree of efficiency, yet no real progress seems to have been made in eradicating a pest that cost the district probably one-fifth of the total value of the 1925 apple crop.

Victoria, Oct. 10.—Through the efforts of the Minister of Lands another new market has been found for British Columbia lumber. This is the state railway construction and maintenance service on the Island of Mauritius. Hitherto only European woods have been used but when Hon. Mr. Pattullo learned that the government railways were in the market for a cargo of timber he cabled the general manager stating the qualities of Douglas fir and the excellent results obtained from its use on the British, Indian and Egyptian lines. The outcome is that the first shipment of Douglas fir ever made to Mauritius is now being loaded at B.C. ports.

MRS. E. HAMPSHIRE Shaughnessy Ave. PHONE 191

A great impetus to the raising of sheep and the production of wool in this province is looked for as a result of the formation of a syndicate at the coast which has taken over the Big Bar ranch on the Fraser river and which has already placed about two thousand on it. Present plans contemplate keeping about 7,200 sheep and to market yearly in the neighborhood of 60,000 pounds of wool and 3,000 sheep, the latter to the packing trade. The government is leasing the company 100,000 acres of grazing

lands. It is stated by the grazing commissioner that there is room in British Columbia for at least one million sheep, and there is no doubt that if success crowns the enterprise just undertaken that many others will go into this industry.

In Her Steps
Visitor: "My, but you are a fine little girl. What are you going to do when you grow big like your mother?"
Dorothy: "Diet."

APPLES TO ENGLAND FOR CHRISTMAS

Nothing will give more pleasure to your friends than a box or more of the finest British Columbia Apples.

For \$5.00 we will undertake to deliver a box of McIntosh, Jonathan or Delicious to any address in Great Britain or Ireland.

To be delivered by Christmas all orders should be received by our Locals or our Vernon Office not later than November 1st.

Associated Growers of B. C. Ltd.

Vernon, B. C.

The Rt. Hon. W. L. Mackenzie King

Says "We will give the West Equal Treatment Impartial Justice"

Col. C. E. Edgett, D.S.O.

THE WEST MUST COME INTO ITS OWN

Put your trust in men who believe in the West's future—men who in Canada's darkest hour held out hope—men who believed in developing the West.

Under almost insurmountable difficulties, Canada faces the world today on the wave of industrial prosperity. She has met every debt on its due date to her foreign creditors—her dollar is the highest in the world. And the West flourishes. In the last four years, since Mackenzie King took the helm at Ottawa, the West's port, Vancouver, has shown greater industrial development than in all her previous history.

This in the face of the cries of ruination and foreclosure from Meighen and Stevens in 1921. This in the face of the repudiation of Mr. Meighen by Canada's strongest Conservative journal, which styled his outlook at that time, "the whisper of death." And more than ever in the history of the West does the West need friends at Ottawa. Men who will stand in the councils of the nation afraid of no moneyed interests, no combines, no section of their party or rival city of the Dominion:

Such men are the Liberal Candidates. They know they will have the support of the leader of Canada's next Government, the Rt. Hon. W. L. Mackenzie King. For he has said throughout the country that there must be justice for every section.

The Liberal Candidates are pledged to secure absolute equalization of freights for the West. If it is necessary to make this a national issue in the House of Commons at Ottawa, they will do it.

G. G. McGeer, K.C., Liberal Candidate for Vancouver Centre, said recently:

"There is one Court where we can secure lasting and final justice, and that is the GREAT COURT OF PUBLIC OPINION, the Parliament of Canada."

Vote Liberal, and you will bring about Western development and prosperity for all.

"Our Tariff must have due regard for all parts of the country in its present stage of development," said Mackenzie King recently.

The Liberal tariff is a tariff primarily imposed for revenue. This tariff, which is a tax, should be as light as possible on the people.

Premier King says, "Especially do we believe that the instruments of production essential to the development of our basic industries and the necessities of life should be taxed as lightly as possible."

Vote for Col. C. E. EDGETT D.S.O. Liberal Candidate

The Summerland Review

Established August, 1908

W. S. O'Beirne, Editor and Manager

(Published at Summerland, B. C.)

An independent family newspaper covering Peachland, Summerland and Naramata and adjacent districts.

Member of Canada Weekly Newspapers Association

Member of British Columbia Selected Weeklies

Subscription Rates—in British Empire, in advance, \$2.50 per year; six months, \$1.40. To U. S. and other countries, \$3.00 per year.

Advertising Rate Cards and information respecting territory, and samples of paper, mailed upon request, or may be seen at the office of any advertising agency recognized by the Canadian Press Association.

Typographical Errors—In the event of a typographical error, advertising goods at less than the proper price, the advertiser will furnish letters to be posted in the store, stating the correct price, but goods may not be sold at the price printed and the difference charged to the advertiser.

Correspondence—Letters addressed to the Editor and intended for publication, must be short and legibly written on one side of the paper only. The longer an article, the shorter its chance of insertion. All communications must bear the name of the writer, not necessarily for publication. The publication or rejection of articles is a matter entirely at the discretion of the Editor. No responsibility is assumed by the paper for the opinions expressed by correspondents.

CARELESSNESS IN HUNTING

One serious accident during the past week and several narrow shaves were an indication to the people of Summerland that the pheasant hunting season had commenced in earnest. It is the same story each year. Looking over the files of The Review one can see reports of many accidents caused by criminal carelessness of hunters.

Look before you shoot. If you do see a bird just a short distance away, hesitate if only for a minute while you make sure that no luckless person nearby is in danger of receiving a portion of the discharge of shot. It's better to miss the chance of getting your bird than perhaps to inflict serious injury upon some pedestrian who has as much right to go where he pleases as you have.

A good hunter rarely is the man to blame for an accident while out hunting. He is accustomed to survey the ground carefully before he shoots. It is generally the enthusiastic amateur who gets so excited when he sees a chance for a shot that he forgets everything else. Let Summerland hunters cultivate cool heads, though it is only fair to say that hunters in this district are just as careful as in any other district we know of.

A NEW GREENHOUSE

In line with their policy of extension in the interests of the grower, The Review understands that a large greenhouse is under construction at the Dominion Experimental Farm under the supervision of Mr. McClarty, plant pathologist. It is believed that this added equipment will enable the staff to undertake many experiments and secure valuable data, not possible at present.

It has often been said that local growers do not take all the advantage they might from the presence of a Dominion station with a staff of men specially trained to meet the problems of the grower, and with excellent facilities to enable them to make experiments, financially impossible for an individual grower to make. But as the years pass by, keener interest is being taken in the reports of the Farm, and this is reacting to the benefit of the entire district.

OUR YOUNG POLITICIANS

Summerland High School boys and girls are setting an example to high school students throughout the valley, by their evidence of keen interest in the present election campaign. During their own leisure time they have taken it upon themselves to solve the fate of the district by an election among themselves. All who are not too old to remember their school days will recall that the recess period was a cherished half hour or so for pleasure only. The present day younger generation, in Summerland at least, however, are turning that leisure time to good account.

According to reports, the high school students are endeavoring these days to secure all the data they can on the policies of their respective parties. They can hardly wait until meeting day to present a new argument by which to floor their opponents and perhaps to secure votes for their candidate. No one will deny that the training in public speaking thus obtained will be exceedingly valuable to them in the years to come.

The Summerland voter will have every opportunity to hear the arguments of both Liberals and Conservatives before election day. At least one more meeting for each candidate will be conducted. The Liberals are holding a meeting at which refreshments will be provided on Saturday evening, at Empire Hall in the Lower Town, while the Conservatives have two good speakers lined up for Monday evening in the G.W.V.A. Hall.

The Okanagan Sea-Serpent has apparently died a natural death. Some weeks have passed since the monster was last sighted, and consequently interest in the reptile is declining. However, the mystery is a most perplexing and interesting one. Possibly in the not too distant future someone will make a discovery which will prove an indisputable solution.

Summerland residents are experiencing a period of delightful Indian Summer. It is claimed by many that during the latter part of October and the first few weeks of November is the best part of the year, climatically speaking, in the Okanagan. At all events weather conditions these days are well nigh perfect.

CANADIAN POLITICS

By an Okanagan Grower and Ex-Member of the Ottawa Press Gallery

The apparent lack of interest in the Dominion election by a considerable section of the electorate will be variously interpreted in different quarters but the few who will disagree with the statement that the present contest is causing less excitement than a Dominion election usually does. The seeming indifference of the public may be due to the belief that there is very little possibility of any party securing a working majority at Ottawa, and that things at the capital will be pretty much as they were after the voting is over. But, whatever the cause of the apathetic attitude of many voters, it is not an altogether healthy sign to see an increasing number of people becoming indifferent to the matters of vital importance to the people that are discussed during a campaign. Thinking people in the United States have been perturbed by the knowledge that at the last presidential election but fifty per cent of the American people took the trouble to go to the polls. Half the voters in the United States were so indifferent to the issues and personalities involved that they took no part in deciding who would occupy White House during the next four years and what policies would prevail at Washington. Canadians have never been so indifferent to matters political as were the people of the United States at the last election and tens of thousands who are displaying little interest in the campaign are undoubtedly doing some quiet thinking and will vote on election day, but other tens of thousands will not take the trouble to mark a ballot. Unquestionably the quiet independent voters will constitute the deciding factor in the election as they are in all elections. It would be a very easy matter indeed to figure out in advance just how an election in any constituency would go if the voting were confined to voters who pride themselves on being hard and fast party men. All that would be necessary would be to count noses and declare the poll closed. But the voters who decline to stay put anywhere in particular who vote for policies and personalities before parties and who are sometimes quite sure how they will vote until just before the polls open are surely the bane of the party workers. They make elections worth while, however, and provide the balance wheel that makes government of a country by party, with all its faults, the best system yet provided by the ingenuity of man for the government of nations.

SOME DEVELOPMENTS OF THE WEEK

Within the past ten days, Mr. Mackenzie King, having finished his campaign in the west, proceeded eastward. He will devote all the time still available to Ontario and Quebec, mostly Ontario, winding up the campaign with a series of meetings covering his own constituency of North York. After giving so much of his time to Canada, Mr. King cannot be blamed for devoting some days at the end of the campaign to the defence of his own citadel which is being strongly assaulted by Co. Lennox, a doughty Conservative campaigner. Mr. Meighen, likewise, has considered it expedient to give several days personal attention to the constituency of Portage la Prairie, where he is once more pitted against Harry Leader, the Progressive who defeated him in 1921 by something less than 150 majority. Having done so, Mr. Meighen, likewise, proceeded eastward to conduct an intensive campaign in Ontario until election day. In the prairie provinces, Mr. Meighen again advocated his protective policy, but it has been interesting to note that he, to some extent at least qualified his former statements by assuring the prairie farmers that he does not propose to give the manufacturing interests more protection than would be good for the country as a whole. At Portage la Prairie the Conservative leader repeated his assertion that he will increase the duties on agricultural implements if placed in power, coupling the statements with the promise that if a tariff increase led to higher prices the duties would be lowered. It would surely be a curious development should a Conservative Premier come to the assistance of the Massey-Harris Company after the president of the company retired to become a member of Mr. King's cabinet. Should Mr. Meighen win it will be interesting to see what he really does with the duty on agricultural implements. In British Columbia the outlook is that before voting day interest will centre on the four contests within the borders of Greater Vancouver; Mr. King has made the claim that more Liberals will be elected in this province than in 1921. They claim the certainty of being able to carry the new seat of North Vancouver and Burrard but are not so optimistic about their prospects of winning South and Central Vancouver. Harry Stevens and the other Conservative hand-picked candidates that the Conservatives will sweep the province. We will have to wait and see.

PARTY ORGANIZATIONS FIGURE MAJORITY

Liberal and Conservative headquarters at Ottawa are prepared at the present time to enlighten the world as to just how matters are going to stand after the voting on October 29. Of course, both figure on a nice little majority, and it is interesting to note that the two party organizations have come to almost identical conclusions as to the number of seats they are likely to win. Conservatives claim that Mr. Meighen will have a following of 140 members in the next house, while the Liberal organization predicts that Mr. Mackenzie King will have a party of 138 behind them. The one thing certain about these predictions is that somebody is going to be disappointed, while it is not improbable that there is going to be disappointment in both political camps. The other day I had a letter from one of Canada's leading journalists who made the prediction that "everybody was going to get ticked," and that "the real fun" is likely to commence after the election. It was his way of saying that no party would be able to carry on by itself when the fray is over and there will have to be jockeying and negotiations before it will be possible for either Mr. King or Mr. Meighen to form a government. Should this prediction prove to be correct it would probably mean a Liberal-Progressive combination of some kind for a year or two and another election. But to return to the party predictions. Liberal headquarters count on 15 out of 29 seats in the Maritime provinces, 60 out of 65 seats in Quebec, 30 out of 32 in Ontario, 4 in Manitoba, 12 in Saskatchewan, 7 in Alberta, 3 in British Columbia and 1 in the Yukon. All things considered, the Liberals have a fairly large order for the Government. The Conservative headquarters, even more optimistic, when it is remembered that there were but 50 Conservative members in the last Parliament. It claims 20 seats in the Maritime provinces, 20 in Quebec, 65 to 70 in Ontario, 15 to 20 in the prairie provinces, 11 in British Columbia and 1 in the Yukon. This looks like another pretty generous order that can be filled only in the event of a political landslide. The Financial Post, of Toronto, prints and estimate compiled "for one of the country's big business organizations" which gives the Conservatives a majority of three over the Liberals, Progressives the totals being: Conservatives 24, Liberals 89, Progressives 33. In order to achieve the majority of three, Mr. Meighen must carry 20 seats in the Maritimes, 16 in Quebec, 64 in Ontario, 8 in Manitoba, 2 in Saskatchewan, 3 in Alberta, 10 in British Columbia and 1 in the Yukon. While in this estimate Conservative claims for Alberta and Saskatchewan are quite modest they appear to be unduly optimistic for other provinces, including British Columbia. Both Liberal and Conservative estimates when carefully studied are inclined to make one believe that the man who thinks "everybody is going to get ticked," may not be very far out in his calculations. Barring a landslide one way or another, and this is always possible, it still appears probable that Mr. King and Mr. Meighen are likely to each secure somewhere about ninety or one hundred seats, the remaining 45 going to Progressive and Independent candidates. Should that occur, "the real fun" will begin only after the voting is over.

A HOT FIGHT IN SASKATCHEWAN

With Progressives claiming 17, Liberals 12 and Conservatives 8 seats there is plenty of room for speculation as to the likely result of the election in Saskatchewan. The correspondent of a Winnipeg newspaper who has been looking over the situation in the most populous of the prairie provinces expresses the opinion that the only candidate certain of election in the whole province is M. Campbell who is bearing the Progressive banner in the constituency of Macleod. Outside the cities the best chance the Conservatives have of carrying the seat in Saskatchewan is in Qu Appelle riding which was settled by old-time Ontario Conservatives many of whom still cling to their early political faith. This correspondent is disposed to think that Hon. W. R. Motherwell, Minister of Agriculture, will be able to make the grade in the new constituency of Melville and that in the majority of coun-

OLD TIMES IN SUMMERLAND

Extracts from the files of the Summerland Review of 1910 will prove of interest to present day readers, reprinted in The Review each week.

At the board meeting of the Summerland hospital, held recently, Miss Fox was appointed assistant nurse. If not too busy at the hospital Miss Fox will be at liberty to nurse outside patients. Applications for such service should be made to the secretary of the board.

We have received this week a letter from Mr. W. A. Doyle who has been travelling through the southern states. Amongst other things he says: "Cotton picking is now on in Oklahoma and Texas, larger crops and higher prices than ever since 'de wah' and as cotton is chiefly grown by freed negroes, every cotton growing dandy is as happy as a big sunflower. One half-section (230 acres) of cotton land here has produced 30,000 netting the grower \$7500 and the white owner of the land a like sum."

Captain Weekes is at present the skipper of the Okanagan, Captain Estabrook being on the sick list with a slight attack of typhoid.

The young ladies who are preparing for the bazaar in connection with the Men's Club will meet next Thursday afternoon and evening at the home of Mrs. E. C. Graham. The bazaar will be held on Thursday, December 8th.

Mr. R. Johnson's furniture, motor-car, etc., arrived on Wednesday by the Aberdeen, and on Thursday were all transferred to his residence at Trout Creek, which he recently purchased from Tom Beavis.

The hospital board are considering the advisability of erecting a new hospital during the coming year, with the aid of a government grant. W. J. Robinson, E. B. May and Major Hutton were appointed to locate a suitable site for the building.

The government is calling for sealed tenders for the mail service between Balcom and Summerland; the mail carrier to call for the mails at West Summerland on the way downtown, and also to leave the inward mails on the homeward journey. The tender calls for a daily service.

Mr. James Carmichael of Armprior, Ont., spent last week in this place looking it over. Mr. Carmichael has been all over the Valley, and has now decided to settle in Peachland. He will return in two weeks with Mrs. Carmichael and let her decide on either of the two places, which suit him equally well.

That Okanagan fruit is the best in

the world was again proved by the awards granted at the national apple show in Vancouver this week. The district captured the sweepstakes, three firsts and two second prizes. The list of winners is as follows: The premier prize in the apple show, goes to Kelowna, whose栽培 of Jonathan has been pronounced by the judges to be the finest car of apples ever shown at any exhibition. In practically every respect the apples were perfect. Out of a maximum of 1000 marks possible, the exhibit was awarded 970. In the mixed carload class there was keen competition with six entries in the field. The prizes offered in these classes were \$500, \$250 and \$150. Mixed first and second in sweepstakes, Summerland Agricultural Society; second, Vernon board of trade; third, M. Moran, Wenatchee, Wash. Northern Spy, first, Coldstream Estate Ltd., Vernon. Grimes Golden, W. W. Sawyer Land Company, Sunnyside, Wash.; Tompkins King, Victoria Fruit Growers Association. Yellow Newtowns, first and third in sweepstakes. E. Renshaw, Medford, Ore.; second, C. Starcher, Yakima Valley. In the second sweepstakes prize of \$500 Summerland secured 934 points with its mixed car of Spitzbergs, Yellow Newtowns, Winter Bananas, Spys and Grimes Golden, while E. Renshaw's Yellow Newtowns took the third award of \$250, with 891 points.

The Men's Club was reorganized this week. The following officers were elected: President, H. C. Melior; vice-president, Dr. C. M. Smith; secretary, S. Angove; treasurer, J. Tait; reading room and literary department, J. C. Robson. Other officers will be elected in due course.

John Gellatley received very painful injuries last week whilst riding through the bush after some horses. He was in a battered condition when he transferred to his residence at Trout Creek, which he recently purchased from Tom Beavis.

Word was received Wednesday of a shocking accident near Kelowna whereby Thomas Herener, a well-known farmer of Okanagan Mission, was killed. The details of the accident which have reached us are of a meagre nature, but it seems that Mr. Herener had been in Kelowna purchasing some farm implements, and on his return trip his horses became unmanageable, and he was thrown from the high seat of the farm wagon. His body was found on the road near Mr. Orchard's house, on Wednesday morning, about a mile from his home.

LETTERS TO THE EDITOR

IS NOT AUTOLYCUS

To the Editor of The Review: Dear Sir:— It would be useless to waste either your space or my time upon a controversialist so mendacious as Mr. McDonald. In my previous letter I charged Mr. McDonald with "bearing false witness," and also challenged him to substantiate his statements concerning the "slaughter of the intellectuals in Russia." Mr. McDonald evades both issues, and I therefore conclude that he grants me my points. One other matter remains and that is, Mr. McDonald's effort to identify me with Autolycus. A simple denial will suffice to settle any doubts; I am not Autolycus, nor in any way, directly or indirectly, responsible for the opinions or views expressed by Autolycus. GEO. W. WEAVER.

SINGERS AND PSEUDO-SCIENCE

To the Editor of The Review: Dear Sir:— To one continually on the watch for developments along any given line, it is most amusing to read or hear of theories based upon incomplete experiments, or the deductions of investigators who know but one side of the matter and create a "theory." Nevertheless, the humor is often badly overshadowed by the disconcerting fact that the public is misled by the apparently authoritative statements of a "professor" of some university, and is disposed to accept what seems to be a scientific discovery, merely on the word of a man who often is in a state of dense ignorance except upon the one point in which he has honed the theory. This is especially in singing, pseudo-scientists are constantly airing one-sided and half-digested views based

on very limited experiments and still more limited knowledge;—I am inclined to say also—still further limited reasoning power. For example, some time ago, a soprano was induced to submit to tests with a view to demonstrating certain theories in resonance. Among other things, nasal resonance was to be proven. For this purpose she had her nostrils stuffed with cotton, and it was observed that the tone was precisely the same as before the stuffing operation took place. This was announced to prove conclusively that the theory of nasal resonance is but a myth; there is no such thing as nasal resonance. Of course the singer herself was quite ignorant of vocal processes, and therefore had nothing to say about it, and the new "theory" has passed into currency as proven by "scientific investigation." On the other hand, Dr. Marafioti, who attended Caruso for some years, managed to prove to H. T. Finck and a few others that Caruso's voice was entirely resonance, and that the vocal cords were practically useless. Then, a little later, Professor Scribner of Yale demonstrated that the Carusos never ceased, even on concertants; also that the tone was never perfectly steady, but was poorer in quality if it approached perfect steadiness. Still later comes Professor Stanley of New York, who has been experimenting with singers and obtaining "photographs" of their voices. The apparatus consists of vocal mask, a telephone transmitter, a spirometer, and an oscillograph, with a few small accessories. The conclusions are interesting, even the erroneous conclusions, but the point on which most stress appears to be laid is—in the Professor's words—"What we are discovering is revolutionary." Probably the most sensational "conclusion" is that the world is in a state of "breathless" practically every school of voice employs this theory. It would seem time-honored theories will have to be discarded. The true method, according to the Professor, is that the muscles of the vocal cords must be developed. Caruso's doctor and also his vocal coach must have been barking very much at the wrong end, and one would like to know how the scientific experts—so scientific and so expert—are to reconcile their theories and present an united front to the world. Then listen to this: "Strengthening the hypoglossal, the back, or the intrinsic laryngeal muscles is not only unnecessary but tends to superinduce objective control of the separate factors of speech and an abnormal development of the vocal cords." It is true that the beauty and the glory of Caruso's voice depended to an unusual extent upon the resonators, but the doctor forgot the evident fact that the resonators cannot generate tone; they can amplify and enrich tone already generated, but they cannot initiate tone. There are others aspects of this, but that one fact will do. Then, as to Professor Scribner; his conclusions were correct, and his experiments of great value, but he would like to make the mistake of claiming the results as "new" a "modern scientific discovery." They are not new, but many centuries old; the merit of the "discovery" lies in the fact that science has now explained what had long been known and taught. Finally, the "revolutionary" discovery of Professor Stanley. This "discovery" that breath control is a time-honored theory that "must be abandoned" is also not new, not revolutionary; it has been known and taught for centuries that "breath

barrance of those people who disagree with the views of local writers who adopt a pseudonym, and who rashly form conclusions as their identity. I know of one case of the kind wherein the aggrieved reader, forced into temporary propinquity with the individual he wrongly supposed to be the offending writer, presented a haughty silence for a whole day, much to the astonishment of the innocent one. Later on he was indiscreet enough to publicly fix the writer's identity on the wrong shoulders and thereby covered himself with confusion. It is possible that some of those who are professing to know who "The Gentleman With the Duster" actually is will find themselves just as far astray.

The flood of American magazines which flows into this country without let or hindrance of any kind has been a source of complaint from Canadian publishers for many years. A day, the contention being reasonable limits by the imposition of a tax. Nothing very new a possibility that some action will be taken against magazines of a certain class, at least. Public opinion is being aroused to the constantly increasing overflow of those publications which deliberately set out to attract by salaciousness, and unless our authorities are deaf to the voice of the people and blind to what cannot fall to be seen, we may reasonably expect some legislation which will at least lessen the flood. It is said that the combined circulation of magazines of this particular class is over fifty millions, which gives nearly every second person in the United States a copy that may or may not be a real estimate. But the fact that such figures can be mentioned shows pretty conclusively that this sort of "literature" is quite popular in the land of its publication. That is not our business—if that country which is so concerned in the regeneration of the world at large has an appreciation of such stuff it is its own affair. But Canada is not compelled to take its overflow, and the sooner it is stopped the better.

The fifth I have in mind in this paragraph is that interval of the scale which is known to musicians as the dominant, and stands a fifth above and a fourth below the tonic. In any given octave, it is the controlling figure of the common chord and is the sheet anchor of the piano tuner. It is consequently of all intervals the most important, but why, and oh, why, do so many modern composers of a certain type use it as the final, and leave their melody hanging in the air, as it were, instead of bringing it to a satisfying ending on the keynote? Really great composers are rarely given to this departure, but delight the musical ear by the only ending which can fully satisfy: In most modern programmes, however, we are almost sure to find selections which were by this definition, which Handel would have scored, and Mendelssohn was never guilty of. Of course I may be quite a Philistine in those matters, and the ending on the fifth may be one of the highest forms of development in musical art. Well, that is as it may be—in any case I am easier in my mind for making my protest.

By the way, I wonder what the effect would be if one of these fifth interval endings were sung by a vocalist who is addicted to the fashionable tremolo style of singing, and didn't get within a quarter tone of correct pitch?

The Pedlar's Pack

By AUTOLYCUS "A Snapper Up of Unconsidered Trifles"

I see that "The Gentleman With a Duster" is once again disturbing the serenity of political life in Great Britain. The identity of this "dust" is a matter which probably raised more discussion than WHO'S WHO— that of any journalist since the days of "Junius," but it is doubtful whether the mystery will last as long as really wrote "The Letters of Junius," but his modern disciple will doubtless reveal himself or be discovered. Meantime, his criticisms and suggestions acquire and are added flavour by reason of their unknown origin, and probably are more effective because of that element of mystery. "The Waterbury Novel" were enormously popular for several years before "the great unknown" who wrote them revealed himself as Walter Scott, and "Sketches by Boz" whetted the public fancy for its successor, "The Pickwick Papers" while conjecture was still busy with the puzzle of "who the Dickens 'Boz' could be." The lasting fame of those writers is necessarily unaffected by this initial atmosphere of mystery, but curiosity no doubt added its charm at the time. Our preconceived notions of an unknown writer are liable to lead us badly astray. When "Currer Bell" sent the M.S. of "Jane Eyre" to a publisher for acceptance, and called at the office in response to invitation, the editor was speechless through astonishment at the sight of the quiet and timid little woman who was to become famous under her own name of Charlotte Bronte. He could not reconcile such a retiring personality with the literary creator of a character like Rochester, and needed time to recover himself. Many thousands of readers of "Adam Bede" have been under the impression that "George Eliot" was a man, and we have even been told that Shakespeare was Bacon! That, however, is a perennial old story, and does not concern the present. What is more to the purpose is the consideration of the possible em-

control" is a very small factor indeed in vocal development. The Professor's corollary, that the vocal cord muscles must be trained, is altogether faulty, and based upon a false deduction resulting from his "discovery." Queer to contrast all these complex ideas and scientific theories with the simplicity of the Peabody who says: "I opened my mouth and took in my breath." A man who disposes of matters so simply as that may have been a great singer, but he would have been a signal failure as a "professor." GEO. W. WEAVER.

BLACKHEADS

Get two ounces of peroxide powder from your druggist. Sprinkle on a hot, wet cloth and rub the face briskly. Every blackhead will be dissolved. The one safe, sure and simple way to remove blackheads.

LAND REGISTRY ACT

(Section 160) IN THE MATTER OF Lots 1 to 16 Map 1225, Osoyoos Division, Yale District.

PROOF having been filed in my office of the loss of certificate of title No. 1267F(2) to the above-mentioned lands in the name of R. Ross Sutherland and bearing date the 23rd day of May, 1913, I HEREBY GIVE NOTICE of my intention at the expiration of one calendar month from the first publication hereof to issue to the said R. Ross Sutherland a provisional certificate of title in lieu of such lost certificate. Any person having any information with reference to such lost certificate of title is requested to communicate with the undersigned. DATED at the Land Registry Office Kamloops, B.C. this 12th day of August, 1925.

E. S. STOKES, Registrar.

OSOYOOS CANTS NETTING GROWER \$2.30 PER CRATE

Some Shipments Are Being Sent by Express to Calgary Market

FEW ONTARIOS IN CALGARY MARKET

Consumers on Prairies Not Buying Apples Heavily Until After Harvest

Commissioner Grant, in his weekly bulletin from Calgary, says: Weather conditions are better, but still showery, greatly delaying threshing operations. Almost all potatoes have been dug and pitted, as the impassable state of the roads prevents shipping to storage. The total frost damage is not estimated, but it is estimated at about 10 per cent. Inquiries are being made from Spokane for Alberta potatoes. Prices here for Canada A Ashcroft Netted Gems is from \$42.00 to \$45.00 per ton; Alberta smooth whites same grade run about \$32.00 to \$34.00 per ton. Cantaloupes are arriving by express from Osoyoos and wholesaling here at \$4.50, today's price. The express charges are \$1.56 per crate as against about 30 cents in mixed cars. The express shipments will net the grower \$2.30 per crate.

We notice some Ontario shippers advertising their apples in Calgary papers. In the face of B. C. bulk apple prices we do not think that many Ontario apples will reach Calgary. The bulk apple supply has shot the market for crated and packed apples, there is practically no demand for other than bulk stuff at present. Some wholesalers are offering Jonathans and Spies in flour sacks containing about 36 lbs., at \$1.35.

Onions are being offered as low as \$17.00 per ton f.o.b. Vernon; this has stagnated the movement of onions bought and stored at \$20 f.o.b. shipping point.

Calgary Wholesale Prices.

B. C. Apples	
McIntosh Fancy, \$2.35 to	\$2.75
Crates, \$1.90 to	2.00

B. C. Lettuce, case, 4 doz.	4.00

SASKATOON
Saskatoon, Oct. 13.—Business very slow on account of light fall of snow and very weather. No threshing. Apples very slow movement. Country cars are hard to clean up, and consumers are not buying in quantities. Do not look for heavy shipment of Winters to start until the consumers get some money from the harvest. Quite a bunch of larger merchants bringing in cars Ontario apples. Looks as though B.C. will have to reduce their price, or market their winters early to clean up.

Apples, McIntosh, nearly cleaned up, Fancy, \$2.75
All other varieties, including Fancy Kings, Bananas, Pippins and Jonathans, \$2.25 to 2.50
All crate Apples 2.00
Hyslop Crabs, market nearly cleaned up.
Bulk Jonathans, B.C., arriving excellent condition, selling, per ton \$0.00
Ontario Fruits all over, with the exception of Grapes, which are very scarce, at .70
Ontario Apples; first car bulk arriving this week stock clean. Understand f.o.b. price is, ton 25.00

MOOSE JAW
Moose Jaw, Oct. 13.—Another rainfall in this community has caused continued delay in harvest operations, which have now been held up approximately three weeks. Due to the extraordinary weather conditions business on this market so far this month has been the worst in the history of the business for six or seven years and there seems to be very little hope of improvement until the weather is better and the threshing completed. In the meantime the situation remains unchanged, very little movement being reported on anything except apples, with a few pears selling and a small quantity of citrus fruit. Practically no movement has been reported on cranberries which are ordinarily a heavy seller at this time of the year and this is a fair indication of the fruit business as a whole. Prices for the week are as follows:
Peaches, Krummell, per box \$2.00
Peaches, Ontario, basket 2.00
Peaches, Simmon's Seedling, per box 2.00
Apples, McIntosh Reds 2.65
Apples, Gravensteins 2.25
Apples, Wealthies 2.25
Apples, McIntosh Reds, per crate 2.10
Apples, Wealthies, per crate 2.00
Apples, Gravensteins, per crate 2.00
Apples, Kootenay Gems, per crate 2.15
Pears, Fancy Bartlett 4.50

EDMONTON
Edmonton, Oct. 15.—The fruit market is still inclined to dring. Bulk apples are arriving and being sent out in Edmonton made crates. These are Spys, Jonathans, Kings and are bringing \$1.50.

WINNIPEG
Winnipeg, Oct. 14.—The weather has been very much unsettled, but the potato market is picking up considerably, and the prospects are much better than for last week. Fruit in great quantities is on the market at the present time, in one day forty cars, of different commodities, came on the market, mostly apples from both Ontario and British Columbia. Owing to the above the market is considerable active just now. The apples coming in are of very good quality and condition. The following car receipts since October 8th are: Ontario, 1 Apples, boxes, 6 grapes, 8 apples, bushel baskets, 9 apples, barrels, 2 bulk apples, 2 mixed fruit, B.C.: 40 apples, 4 bulk apples, 8 onions, 2 celery. Imported: 2 pears, 1 grapes, 1 cranberries. Manitoba: 7 potatoes, 1 onions.

Wholesale prices:

Ont. Apples, Greening, bbls., No. 1	\$6.50
No. 2	6.00

Principal
MR. JAMES GRIFFIN

We are forming a new class for beginners on Nov. 2nd. This is your opportunity to enroll and make yourself proficient in the business world.

Subjects:—Bookkeeping, Pitman's Shorthand, Typewriting, Spelling, Penmanship and Commercial Law. Fees \$22 per month—this includes Text Books

We obtain for you certificates issued by Sir Isaac Pitman & Sons, also those of The Underwood and Remington Typewriter Co.'s.

OPPORTUNITY IS KNOCKING

We had a light rain early yesterday morning and which continued at intervals during the day, it is clearing today. Ontario and imported plums and peaches are about off the market. Ontario apples are being vigorously pushed upon this market in bushel hampers and barrels.

Always park alongside a new and shiny car. It will back out without scraping you.—Duluth Herald.

Some people credit Agnes Macphall's oratorical prowess to the fact that her father was an auctioneer.—Simcoe Reformer.

WATER NOTICE

Storage
Take notice that The Corporation of the District of Summerland, whose address is West Summerland, B.C., will apply for a licence for the storage of 300 acre feet of water out of White Lake (Osoyoos Division of Yale District.), which flows northeasterly and drains into the West Fork of Trout Creek, about three miles from the junction of the East and West Forks of Trout Creek.

The storage-dam will be located at natural outlet of Lake. The capacity of the reservoir to be created is about 300 acre feet, and it will flood about 70 acres of land. The water will be diverted from Trout Creek at a point about Intake "E", Water Rights Map 8550 and will be used for Irrigation purposes upon the lands described as District lots 439, 440, 441, 454, 455, 472, 473, 474, 475, 476, 508, 673, 674, 675, 974, 2195, 2194, 2561, 2196, 2543, 2391, 3319, 3397 and 2562.

The licence applied for is to supplement a right to take and use water as per records Nos. 210, 275, 875, 913, 975 to 982 inclusive, 1168, 1353, 1484 to 1488 inclusive.

This notice was posted on the ground on the 7th day of October 1925.

A copy of this notice and an application pursuant thereto and to the "Water Act, 1914," will be filed in the office of the Water Recorder at Vernon, B.C.

Objections to the application may be filed with the said Water Recorder or with the Controller of Water Rights, Parliament Buildings, Victoria B. C., within thirty days after the first appearance of this notice in a local newspaper.

Corporation of the District of Summerland.
J. J. NIXON,
Municipal Clerk.

Voters of SUMMERLAND

Progress throughout the entire country will mean good times for the OKANAGAN FRUIT GROWER. It has been said that the present election is the most momentous since Confederation. It is in the hands of the voter to decide whether Canada will make material progress during the critical years to come—or to stagnate.

Do you want the progressive policies of the Mackenzie King government to be put into effect, by means of a substantial majority in the House of Commons, or the reactionary policies of the Rt. Hon. Arthur Meighen? No worse disaster could befall Canada, when, if ever a government were needed which would adopt a policy of progress, than the placing into power of a party headed by a man who seems to delight in pessimistic forecasts of Canada's future.

Vote for the Man who wants the West and the Whole of Canada to Progress NOT SIMPLY A FEW FAVORED SECTIONS IN THE EAST

Col Edgett has declared himself for the Okanagan Fruit Grower. He can be depended upon to advance our interests at Ottawa. It means better times for the fruit grower, and better times for the entire people of Canada if men of Col. Edgett's stamp comprise our next government.

A Vote for Col. Edgett is a Vote for the Interest of the Fruit Grower

LIBERAL MEETING

EMPIRE HALL

SUMMERLAND

SATURDAY, OCTOBER 24th

At 8:00 p. m.

Brief Addresses will be delivered by

Col. C. E. EDGETT, D.S.O.

Liberal Candidate, and

Hon. A. M. MANSON, Attorney-General, of Victoria

Refreshments will be served after the meeting to enable Summerland citizens to meet the Liberal Candidate, Col. Edgett.

Everybody cordially invited.

To the Electors of Yale

Edgett Ranch, Vernon, B.C.,

October 10th, 1925

I am offering myself as the Liberal Candidate in the Federal Election to be held on October 29th. This I am doing in the interests of the people of Yale, so that they may have a direct Representative in the next Government, which will be Liberal.

I have, during my residence in B. C., taken an active interest in executive capacity in the following:

- Farmers' and Fruit Growers' organizations.
- Boards of Trade.
- Irrigation Matters.
- Municipal and School Board Matters.
- Representative of ex-Service Men and Dependents

My responsibilities, in the above capacities, have brought me very directly in contact with the needs of the district and the welfare of the people. My record in the discharge of these duties is open to all. I am now asking you, by your vote, to send me to Ottawa, that I may advance and protect your interests there.

You need direct Government representation for the following reasons:

1. Should any change be contemplated, you should have a representative with a voice in the making of that legislation, and not in opposition after it is made.
2. With the increased production of farm products and the opening up of new marketing channels, the cold storage and other marketing facilities provided by the Liberal Government, should be encouraged and not opposed.
3. With the increased activity in the mining and metal trade, the interests of the people in the Southern part of Yale in particular, must be carefully considered in new legislation.
4. That Labor, which is fast becoming a basic factor as a result of the increased activity in mining, farming, railroading, etc., must have its future interests safeguarded by legislation by one known to be sympathetic.
5. The handicap under which we have been laboring as producers as a result of unfair railway rates, will need every ounce of energy from the producers' representative, in opposition to the large financial interests.
6. Those who are suffering from war disabilities and the dependents of those who did not return deserve a champion of their interests in the Parliament of Canada during their shortening years.
7. Sectionalism, so rampant in Canada today, must be replaced by that great Canadian spirit of Unity handed down to us by the Fathers of Confederation. That spirit, which so many of Canada's best men have given their lives for on the field of battle, must be perpetuated in Canada, as part of the British Commonwealth of Nations.

I am offering myself to do my part in leading this great country to its destined goal, where there shall be no preying of class upon class, no race, no creed, no East, no West, but Canada only, whose sons and daughters shall live and work together so that peace and contentment may be our lot at home and Honour and Goodwill accompany us abroad.

You can show your faith in Canada by electing on October 29th, an Empire defender as an Empire builder.

Yours respectfully

C. E. Edgett

EXPERTS REPORTING ON VERNON MINING CLAIMS

Vernon, Oct. 16.—Mining claims near Vernon are receiving attention by experts. Within the last month three mining engineers have examined the claims. What the next step will be, no one can forecast. The claims that are attracting the attention of experts include the Falcon, Dolomite and others located in that vicinity. These quartz claims contain free silver and free gold as is shown in the samples taken therefrom. The first engineer to visit these properties came at the invitation of Frank Mitchell, the well known prospector. This was F. Froiland, a Government engineer. After his departure a Mr. Warren made an examination for his people at Trail, and now R. B. Sheldy, mining engineer, on whose advice the Consolidated Mining & Smelting Co. rely to a large extent, has taken samples for analysis.

Perfect Attendance: Phyllis Daly, Lorine Daly, Janet Dorry, Grant Echlin; Ross Echlin, Willie La Bounty, Clarence La Bounty, David Ramsay, Ruth Sarge, Gladys Wheeler, Alec Milloy.

The Road To Better Health

AN OVERHAULING By Dr. W. J. Scholes

A correspondent sends in the following letter. It contains some interesting and instructive ideas on keeping well. He writes as follows: "I took my car to the garage to have it looked over. It was still going all right, but I got the notion that it may need some attention if I don't want trouble during the coming season. The car had been run two years and has seen some pretty good service. "While I was thinking about the old car I got to thinking about myself. Here I was having the car overhauled after two years' service. My body has been in service for 43 years. I felt pretty good, but not as good as I used to feel and would like to feel now. I figured it would be a good thing to have an 'overhauling' myself.

"So I went to a doctor and told him what I wanted. I told him I wanted everything on the bill. He gave it to me. He weighed me and measured me, asked me a lot of questions, hammered me and listened to my heart and lungs. He looked down my throat, X-rayed my teeth and took my blood pressure. My blood and urine were tested.

"When he had all the returns he told me to come back. This is what was the matter with me. 1. I had bad tonsils and some bad teeth. 2. I was overweight. 3. I did not get enough exercise. 4. I smoked too much.

"Well, the tonsils and three of the bad teeth are out. The dentist is doing the necessary repair work on the others. I am eating less, smoking less and exercising more. I am glad to decide that I am as OK as I am going to be, if I can do anything about it. The car and I are going to be gone over every spring. I figure a good 'going over' and a little upkeep once a year will lengthen the life of both of us."

QUESTIONS AND ANSWERS

Heartburn

J.A.L. writes: "I am frequently bothered with heartburn. I can relieve it by taking a dose of baking soda. It comes on a while after eating but I do not get it after every meal. I have taken medicine for my stomach which stops it for a while but does not cure it. I would like to know what would cause heartburn?"

Reply:—Heartburn is a symptom. While it has generally been attributed to an excessive acidity of the gastric juice (the digestive juice of the stomach), some of the more recent studies of the condition seem to show that heartburn may be present when there is no such excess of acid.

Some of the things that may result in heartburn are infection of the gall-bladder, errors in diet, lack of exercise, constipation, ulcer of the stomach or intestine, Fried foods and an excess of sweets, fat or seasoning may cause it.

Live principally on vegetables and fruit. Drink lots of water. Get more exercise. Avoid constipation.

Condensed Milk for Babies Mrs. R. D. asks: "Is it all right to feed a baby condensed milk when it cannot be nursed at the breast?"

Reply:—Some excellent authorities on infant feeding believe that condensed milk has a place as a baby food. It would be best, however, to let your doctor suggest the proper food for the baby. Knowing its age, weight and condition, he will be in a position to tell you what to feed the baby to meet its individual food requirements.

Not That Way Mr. H. S. asks: "I would like to know if it is possible to get typhoid fever by getting the breath of somebody who has typhoid?"

Reply:—No. Typhoid fever is spread by means of food, milk or water which have been contaminated by the discharges of the typhoid patients. Remember that hands soiled with the discharges of the typhoid patient may be a means of either directly introducing the germs into the system, or of contaminating food.

Dust Mrs. A. McL. writes: "Would you tell me if a person can get sick from dust? I mean if breathing air that has dust in it will make you sick?"

Reply:—How injurious dust is depends upon what it contains. It is conceivable that dust swept from the floors of rooms in which there has been a contagious disease may contain germs. Dust, such as is associated with some industries, may be dangerous. In some cases, it contains hard particles which may damage the lining membrane of the organs of respiration. This may make the lining membrane more susceptible to infections. It is possible for dust from wool to convey a form of anthrax called "wool-sorters' disease."

Then dust may contain things to which some people are hyper-sensitive. On inhaling such dust those people are likely to develop an attack of asthma or a condition similar to hay fever.

It is best to use a vacuum cleaner in the house to avoid dust clouds.

THE IDEAL BABY FOOD

A great deal of attention has been devoted to the modification of cow's milk to make it meet the food requirements of the baby at different ages. Improved sanitation of farms and methods of handling milk have decreased the danger of milk conveying disease. The result is that the artificial feeding of infants is probably more satisfactory than it was a generation or two ago. It is certainly much safer.

But—it is a mistaken idea that cow's milk or any of its modifications are just as good for the baby as human breast milk. There are cases in which it is either impossible or inadvisable for the mother to nurse her baby at the breast. A suitable and healthy wet-nurse cannot always be had. In this country at least, some modification of cow's milk is generally the most practicable substitute for the mother's breast milk. The fact that artificial feeding is sometimes necessary justifies all of the efforts aimed at its perfection. But no baby should be deprived of human

breast milk during the early months of its life except in cases of absolute necessity.

The death rate amongst artificially fed babies still continues to be higher than amongst the breast fed. The artificially fed are more liable to digestive disturbances and to most diseases. They have more disturbances due to faulty nutrition. Taking it all around, they fail to get as good a start in life as the breast fed.

The proper food for the baby during the first months of its life has been provided by Nature. It is always fresh. There is but little chance that it will contain germs. It contains all of the elements required for the nourishment of the baby. It gives the baby a better chance for life, health and normal development than does any substitute. There is no known mixture that can fully take its place.

Human breast milk is still the ideal baby food!

QUESTIONS AND ANSWERS

Swollen Ankles

Mrs. M. C. writes: "Last winter I had a bad case of rheumatism. The doctor said my heart was bad. I got well but lately my ankles swell every night. The swelling is all gone in the morning. What would this come from? Could it come from the rheumatism not being all out of me? Or from the heart?"

Reply:—In your case it may mean that the heart is not quite as good as it should be. This in view of the fact that you have recently had rheumatism which in which the ankles may swell are disease of the kidneys and liver and from anemia. It would be best to have your heart examined. Also the urine and blood. You may require more rest than you are getting. You may require medicine to tone up your heart. Have you bad tonsils?

Four Plus J. L. K. asks: "What does a four plus Wassermann test mean?"

Reply:—The Wassermann test is the blood or serum test for syphilis. The results of the test are reported as positive or negative. A negative test is one that does not show the presence of syphilis. A positive test indicates the presence of syphilis. A four plus Wassermann is very strongly positive.

Whooping Cough Mrs. J. L. A. asks: "If a boy four years old is exposed to whooping cough, how long does it take until he shows symptoms of it? Is it all right for a child with whooping cough to be out-doors?"

Reply:—Whooping cough usually develops from small wounds can often be stopped by holding hot compresses to the wound. Heat favors the clotting of blood. Of course it should be remembered that damage to blood vessels may give rise to an alarming amount of bleeding. Unless the cloth and the water used for hot compresses have been sterilized, there is always a chance of introducing infection in the wound. If you had used hot compresses instead of cold ones, you would have done about all that is advisable in the way of home treatment.

Use Hot Ones Mrs. C. A. R. writes: "A short time ago the little boy of one of my neighbors fell down and cut his face. The cut bled a lot and it was hard to stop it from bleeding. They called a doctor but we were afraid the little fellow would lose too much blood before the doctor came. We put cloths on the cut with cold water. Was this all right? Or was there anything else we should have done to stop the bleeding?"

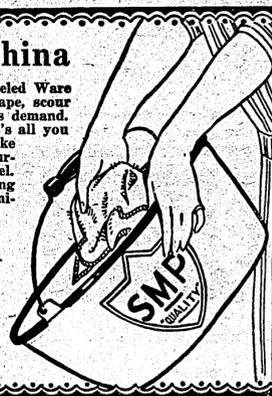

Reply:—Troublesome bleeding from small wounds can often be stopped by holding hot compresses to the wound. Heat favors the clotting of blood. Of course it should be remembered that damage to blood vessels may give rise to an alarming amount of bleeding. Unless the cloth and the water used for hot compresses have been sterilized, there is always a chance of introducing infection in the wound. If you had used hot compresses instead of cold ones, you would have done about all that is advisable in the way of home treatment.

"COUNTRY LIFE" PRAISES FRUIT

Penticton Display at Provincial Exhibition Brings Comment

"Country Life" has the following to say of the district fruit displays at the recent provincial exhibition at New Westminster:

"Once again Penticton is the winner of the district fruit exhibit competition at the provincial exhibition with a really notable display. The exhibit obtained a total of 760 points out of a possible 1,000 which is an even better showing than was made at the 1924 show. Kamloops is second with 630 points, Winfield third with 529 and Burquitlam fourth with 483.

"All the exhibits are splendidly arranged and comprise a wonderful collection of fruit which is truly representative of districts in that branch of agricultural production. The competition this year, according to the judges, was keener than ever before. The district fruit exhibits have become one of the features of the Royal City event and take second place in the agricultural building only to the district exhibit competition."

The Kamloops exhibit was collected and staged entirely by R. B. Homersham of Rayleigh Mount, who desires to thank all whose produce made such a display possible.

YOU MAY COUNT THAT DAY

(By George Eliot) If you sit down at set of sun and count the acts that you have done And, counting find One self-denying deed, one word That eased the heart of him who heard—

One glance most kind, That fell like sunshine where it went— Then you may count that day well spent.

But if, through all the livelong day, You've cheered no heart, by yea or nay— If, through it all, You've nothing done that you can trace

That brought the sunshine to one face— No act most small That helped some soul and nothing cost— Then count that day as worse than lost.

You like Kraft Cheese because of its inimitable flavor. To be sure you get it, always look for this trade-mark.

FRUIT GROWERS! FOOD FOR YOUR TREES

WE ARE BRINGING INTO THE VALLEY CARLOTS OF

Agricultural Lime Superphosphate of Lime O. K. Organic Fertilizer

We believe that a number of the orchards in this district require fertilizers in the worst way, and we would bring to the attention of the growers the O. K. ORGANIC FERTILIZER, which consists of Blood, Bone and Muriate of Potash. This is practically the same as Clark's celebrated Orchard Dressing, which has been so successful in the Wenatchee Valley.

The consensus of opinion among experts is that there is nothing to equal Organic Fertilizer together with a percentage of Muriate of Potash. We would strongly recommend the growers to advise us of their requirements and to take delivery from the cars in order to get the best prices obtainable.

TEAM WORK

HECTIC PERIOD IS NEARING END

Growers' Apples Nearly All Picked — and They Won't Be Sorry

By S. W. DAFOE.

In another week or ten days the tree-climbing farmers of the Interior will have come down to terra firma and retired to winter quarters. They will be fully entitled to the comparatively restful period that follows the harvesting operations, for the picking season has been a hectic period for the apple growers of the southern end of the Okanagan Valley. What with the unexpectedly heavy yield per tree and per acre, the labor shortage and the scarcity of boxes, the fruit growers have been passing through strenuous times and they won't be sorry to see the last truck load of fruit from the farm heading down the road for the packing house. And, by the same token, the packing house people won't be sorry to see it arrive, because if times have been strenuous on the ranches they have been even more so in the packing end of the business, where artificial lighting has made it possible to keep day and night shifts going throughout the greater part of the season.

By the time the Jonathans had been pretty well cleaned up in this district the box situation had become so acute that even with an increased staff of box makers on the job it was impossible to keep pace with the demand of growers wanting boxes for the later varieties, and the problem was solved to some extent by orchardists taking the shooks from the warehouses and making their own boxes.

Weather Conditions Beyond the Growers

Another cause of abnormal stress around the packing house was the large amount of late apples picked and stacked in the orchards, the owners of which were anxious to see them transferred to safe quarters. With knee-deep snow spread over the prairies there was apprehension that a chunk of Alberta's climate might elude the vigilance of the British Columbia weather man and invade the Interior of this province. But nothing of the kind has occurred up to the time of writing, the climate of the interior being on its usual good behavior for this season of the year, albeit a shade cooler than usual at night time.

As the season progresses and the signs multiply, that the price of apples is likely to be maintained on a fair price level, the spirits of the fruit growers have risen superior to the physical fatigue of a strenuous picking season. It is realized that the danger point of the market was in the Jonathan deal. The early selling of the McIntosh crop, however, cleared the boards for the Jonathans, although Mr. Grant, market commissioner at Calgary, gave us a scare when he stated that the trade had not disposed of the big red apples to the public. But the trade, in all probability, is in no great hurry to sell out on McIntoshes. They keep until March, and the dealers who have them later on will probably be able to realize a good profit on all they take out of cold storage in mid-winter. No serious competition in this particular variety is to be feared from the United States, and they can be held with safety until the Jonathan crop has been sold and consumed.

The heavy demands for Jonathans for export probably means that the deal on this apple is quite safe and growers think that this should remove the last possibility of a break in the market. The late winter varieties are this season confined almost exclusively to the production of the lower half of the Okanagan Valley and the market is likely to absorb these supplies and call for more.

Plum Cheques Gladden Growers' Hearts

Additional cheques came through to growers within the past few days from "Central." This time they were for plums and they were fat cheques as compared with those issued for this class of soft fruit in recent seasons. The bulk of the crop sold on the basis of five cents per pound net for the grower for No. 1's and four cents for No. 2's. If the plums always brought these prices the hearts of the growers would be made glad. The plum press but serve to emphasize the point that, given reasonable returns for fruit, there is a comfortable living on any half decent fruit ranch for a grower and his family. The failure of the peach and apricot crops helped the marketing of plums.

Matters "Locals" Should Attend to.

With fair prices coming through for everything that has been marketed to date, there appears to be less criticism of the selling end of the business, but the difficulties attendant upon the handling of an excess crop and the box shortage have served to emphasize the need of some improvement in the organization of the "locals" to ensure more equality of treatment as between the individual growers. A fair and equitable distribution of boxes when a shortage exists in a hard problem for any over-worked staff to adequately deal with, but if much heart burning and dissatisfaction is to be avoided in future seasons, some system must be worked out to ensure an even and fair distribution of boxes available.

Growers of the late winter varieties in some instances at least, are inclined to think that they have hit the "goats" in connection with this season's shortage. Nearly all the available supplies of boxes were used to bring in the Jonathan crop with the result that those growers were delayed in starting their picking and unduly retarded after they got started.

This is a state of affairs that should be avoided by the locals in future, if possible, because the winter apples have to take the risk of frost, water coming and late autumn rains and these risks should not be unduly accentuated. The early delivery of a high percentage of the estimated crop boxes in orchards where winter varieties predominate would largely cure this difficulty and remove the danger of growers being left "in the air" because of an excessive demand for boxes for the Jonathan crop. It is problems such as this that the management and directors of local unions must work out more successfully in the future than they have succeeded in doing up to the present time if their desire is to have a satisfied set of growers within the organization.

WANT NEW ROTARY CLUBS IN VALLEY

Vernon, Oct. 16.—That it is the duty of the Vernon Club to establish Rotary in Kelowna, Penticton, Armstrong and Enderby, because Rotary principles will be more easily and firmly established in the Valley by five clubs than one, was part of the message Rotarian "Harry" Pout brought to the club from the convention at Everett. The message was delivered at the weekly luncheon at Gateby, at noon on Monday. There was a good attendance of members, and though "Bill" Maddin was to have submitted a supplementary report, Rotarian Guy, in the chair, decreed that there would not be sufficient time and the presentation of the second report was held over.

MAN KILLED AT ALLENBY

Daniel Wilson Fatally Injured While Moving a Building

Princeton, Oct. 15.—Struck on the head by a falling telephone pole while assisting Harry Messinger in moving a small building at Allenby last evening, Daniel Wilson succumbed to his injuries a few hours later at the Princeton General Hospital. He regained consciousness only for a few moments following the accident.

At the inquest which was held by Coroner Doctor McCaffrey this morning it was shown that deceased was not working on company time when the accident occurred. He was assisting Mr. Messinger after his day's work with the company, with whom he has been employed as repair foreman since the renewal of activities. The accident resulted from the gable of the moving building coming in contact with the wire which was still attached to the pole on one side but had been cut on the other. The pole was badly rotted at the ground in falling it had hit the unfortunate man squarely on the head.

Mr. Wilson has a wife and two children living in Utah. They were just making preparations to move up here the furniture and effects having already been shipped. The jury returned a verdict of accidental death. The company is making arrangements for the shipment of the body to the Utah home.

M'KENZIE SEES GOLD PANNED

Makes Visit to Placer Mines in Operation at Slate Creek

Princeton, Oct. 16.—While viewing the development work that Norman McCormack has been carrying out on placer claims up Slate Creek, a tributary which enters the Tulameen a short distance above the town of that name, W. A. McKenzie, M.L.A. of Penticton, made the remark that he had never seen dirt panned. The owner of the claim cheerfully offered to show him how it was done, and selecting at random a panful of gravel from the bank alongside and taking it to the creek proceeded to rock and joggle it in the orthodox manner. When the operation was completed there was disclosed in the bottom of the pan two pieces of coarse gold about the size of the little "Sen-Sens" that used to be so much in demand for breath-destroyers. But that was perhaps the least of the values shown. There were several small particles of pure platinum and about a half cupful of black sand, assays of which Mr. McCormack assured his surprised friend, had always run very high in platinum. Bill is not asking his friends to accept his word in the matter but is carrying the proof in the form of a small gold nugget and a particle of the platinum that was recovered. He is satisfied that Mr. McCormack has, in his Slate Creek claim, a proposition, the returns from which will make the earnings of the C.P.R. look like small change.

LATEST VERSION OF THE BURNING OF ROME

The new version of Nero and his fiddle comes from Arnold Brunner, ex-president of New York's Architectural League. Traffic and housing in Rome used to be unbearably congested, says Brunner. The main thoroughfare was only twelve feet broad. To better things, Nero ruled that wagons should only pass at night. The creaking, creaking wheels made sleep intolerable. So Nero built temporary shelters for the people and stored food in ships on the Tiber and sent his agents out to burn the city. Afterwards he rebuilt it with wide streets and beautiful buildings. No wonder he added. For he was doing the very best thing he knew.

MAIL SCHEDULE

For the convenience of our readers we give below the time of closing of all mails at the local postoffice for dispatch by boat and train; and also interchange between the two offices:

- At SUMMERLAND OFFICE
- For all points North, East and West — 9 p.m.; Sunday, 6 p.m.
- For Naramata, Penticton, South, Similkameen, Boundary and Kootenay — Daily, except Sunday, 6 p.m.

Local Happenings

Contributions to this column will be gladly received. If you have any visitors staying at your home, or know of any friends who are leaving for a holiday, kindly phone or write The Review.

Kelowna-Penticton boat service, attending the Teachers' Convention now in progress at Kelowna. Thursday and Friday of this week were consequently holidays for the pupils.

Mr. and Mrs. John Furbow have returned to Summerland following a holiday spent at the Coast.

Mrs. Schwass has returned home from the Coast feeling greatly improved in health.

Mr. W. W. Borton has moved from Peach Orchard to Professor Broad's house.

The Ladies Aid of the Lakeside Church will hold their annual sale of work on Dec. 6th in the Hotel Annex.

Two children of Mr. C. L. Campbell, a rancher of Four-Mile, were injured in a shooting accident on Sunday, though the injuries were not serious. A hunter out in the neighborhood misdirected his shots after some feathered creatures and a few of the pellets struck the children. The boy was struck in two places in the leg and the girl was also hit. Dr. White attended the pair. First reports of the accident to reach town stated that the boy had been killed, showing how facts are soon distorted by being repeated.

Mr. W. H. Malkin of Vancouver, the B.C. treasurer of the Canadian Armenian Near East Relief and the Save the Children fund, reports that these funds have good friends in the Okanagan district as well as in other parts of B.C. He received last week an anonymous communication enclosing \$10.00 in cash, signed "An Orphan," from the Okanagan district. He takes this method of making acknowledgement and hopes this news note may fall under the eye of the generous donor. The number of orphan children in the Near East shows no sign of diminution. Mr. Malkin regrets to report. A district in northern Palestine, not disturbed for twenty years, has very recently been the subject of fire and sword. The work of salvaging in the Near East areas lies as a heavy burden upon the peoples; 1,400,000 people in Greece are refugees; 80,000 in Solonki alone, trying to live on a ration of two cents worth of bread per day supplied by the Greek Government. Palestine, Syria, Russian Armenia and Crete are scenes of work carried on among refugee populations by the B.C. committee of which Mr. Malkin is treasurer. The committee appeals for immediate help from all parts of British Columbia.

A mangel weighing eighteen pounds is something of a record. Mr. D. R. Blackwell, of Trout Creek, takes justifiable pride in being the possessor of one. It is a long red mangel, perfectly normal in appearance except for its very heavy weight. Many have been interested in viewing this unique specimen.

Friends in Summerland will be interested in the news that a baby boy was born to Dr. and Mrs. Windlor, of Windsor, Ont., on October 9th. Dr. and Mrs. Windlor resided in Summerland for some years and are well-known to local residents who will join with the Review in congratulations. The baby boy will be named Billie.

Mr. Ned Bentley was the victim of an unfortunate accident this week when he fell from a ladder, a distance of some ten feet while doing some wiring at the G.W.V.A. Hall. While no bones were broken, Mr. Bentley sustained some very severe bruises and a bad shaking up. The hall was being prepared for the Conservative Meeting.

Mr. Jack Miller left Friday for Vancouver where he will reside. He has sold his draying business to Mr. E. Smith.

Mrs. H. Sherman came home from Vancouver on Sunday.

Mr. R. L. Saitor returned to Summerland from Winnipeg on Monday night.

Miss Marion Boavis with two girl friends and Mr. Laurie Boavis spent the week-end here from Kelowna.

A. P. Harriday, assistant Fisheries Inspector for British Columbia was in Summerland this week. While here he did some shooting.

Many teachers from both Summerland High and Public Schools are

Miss Adamson from the Coast is visiting Mrs. Wright.

Mr. S. Beggs returned to his home from the hospital this week although his recovery will require some weeks yet to complete.

Mr. Harry Richardson who went to Harrison Hot Springs is reported as improving in health. It will be some weeks, however, before he will be able to come home.

Evidence of the ability of local merchants to successfully compete with mail order houses is given by a sale of boots and shoes commencing to-day at which prices compare favorably with even the greatest "bargains" offered through mail order houses. Mr. Beer is showing that Summerland residents need not avoid patronizing mail order houses through reasons alone of loyalty to the town merchants, but it is in their interests to buy at home.

Week-end Specials

- Grapefruit each 10c
- Brooms 5 string 60c
- Instant Cocoa ½-tins 25c
- Salada Tea per pound 80c
- Skinless Codfish per pound 20c
- Peanut Butter per pound 20c

SUMMERLAND GROCERERIA

PEACHLAND NEWS

By Our Resident Correspondent

Quite an innovation for Peachland was the Sampedo put on here last week by Jim Carry and his associates. They put up their canvas and grand stand on the parkside on the school grounds and put on an afternoon and evening performance. They had real bucking horses and real live-woe cowboys as well as several other interesting characters. Mrs. Carry, on the swinging ladder was good and the Mexican knife thrower did some good work. Jim Carry with the rope and whip did some exceptionally fine work which brought a hearty applause from the crowd. The riding was good, but unfortunately one of the boys missed his step in making his get-away from Baby Doll, the buckner which he had been riding and got stood on his head which resulted in a nasty scalp wound. He was able to ride the next day, however. The party moved on the following morning, travelling north.

Hon. W. J. Bowser, K.C. and J. B. Hawkes, ex-M.L.A., Saskatchewan Legislature addressed a public meeting of electors in the Municipal Hall on Friday last in the interests of Grote Stirling, M.P., Conservative candidate for Yale. There was a good crowd out on this occasion, and many were very much interested in hearing Mr. Hawkes, he being a local resident and not having publically entered politics in the role of speaker here before.

Miss Mary Miller was among the arrivals last week end, just returning home from an extended visit to the Old Country. Her mother, Mrs. J. A. Miller went as far as Okanagan Landing to meet her.

Mr. Stafford, principal of the Central Public School suffered a short illness for a few days but has resumed his work at the school again.

Mr. and Mrs. Chas. Tupper and family, of Penticton, motored up on Sunday last to pay a short visit at the home of Mr. and Mrs. H. E. McCall.

Mr. J. B. Hawkes, accompanied by several local citizens motored to Westbank on Tuesday evening of this week to address the electors of Westbank in the interests of Grote Stirling.

CORPORATION OF THE DISTRICT OF SUMMERLAND

Municipal Voters' List

TRADE LICENSE HOLDERS AND HOUSE-HOLDERS desirous of having their names placed on the Annual Voters' List must make statutory declaration and deliver same to the undersigned during October. Forms can be obtained at the Municipal Office.

F. J. NIXON, Municipal Clerk.

14th October, 1925. 10-2-c

QUICK---SOMEONE IS WAITING FOR YOU!

When the telephone rings, courtesy and efficiency demand that it be promptly answered. To anyone waiting on the telephone, seconds are long. No person likes to be kept waiting. Why keep others waiting? Any call may be important. Why neglect any of them?
